Fears v. Wilhelmina Model Agency, Inc.

United States District Court for the Southern District of New York

March 29, 2004, Decided ; March 29, 2004, Filed

02 Civ. 4911 (HB)

Reporter
2004 U.S. Dist. LEXIS 5045 *

CAROLYN FEARS, et al., Plaintiffs, -against- WILHELMINA MODEL AGENCY, INC., et al., Defendants.

Subsequent History: Objection sustained by, in part, Objection denied by, in part Fears v. Wilhelmina Model Agency, 2004 U.S. Dist. LEXIS 5575 (S.D.N.Y., Mar. 29, 2004)

Prior History: Fears v. Wilhelmina Model Agency, Inc., 2004 U.S. Dist. LEXIS 4502 (S.D.N.Y., Mar. 23, 2004)

Disposition: **[*1]** Defendants' summary judgment motions were granted-in-part and denied-in-part. All of Plaintiffs' claims against defendant Que were dismissed. Plaintiffs' Sherman Act claim, based on a conspiracy to fix client service fees, was dismissed against all defendants. Plaintiffs' conspiracy to evade Article 11 claim was dismissed against all defendants.

LexisNexis® Headnotes

Governments > State & Territorial Governments > Licenses

HN1[] State & Territorial Governments, Licenses

N.Y. Gen. Bus. Law §§ 170-90 (1998) requires employment agencies to be licensed and places restrictions (caps of 10 percent) on the amount of commissions they may charge.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] Entitlement as Matter of Law, Genuine Disputes

Pursuant to *Fed. R. Civ. P. 56(c)*, a district court must grant summary judgment if the evidence demonstrates that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] Summary Judgment, Entitlement as Matter of Law

Summary judgment is properly regarded not as a disfavored procedural shortcut, but rather as an integral part of the Federal Rules as a whole, which are designed to secure the just, speedy and inexpensive determination of every action.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN4[] Summary Judgment, Burdens of Proof

The court's role at the summary judgment stage is not to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial. *Fed. R. Civ. P. 56(c)* requires a court to enter summary judgment when, after adequate time for discovery a party fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN5[] Regulated Practices, Private Actions

In antitrust cases, the non-moving party upon a motion for summary judgment must set forth evidence that tends to exclude the possibility that the movants were acting independently. To prevail, plaintiffs must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed plaintiffs. While some assessing of evidence is necessary in order to determine rationally what inferences are reasonable and therefore permissible, it is evident that the question of what weight should be assigned to competing permissible inferences remains within the province of the fact-finder at a trial.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN6[] Regulated Practices, Private Actions

The United States Supreme Court's requirement in Matsushita that the plaintiffs' claims make economic sense did not introduce a special burden on plaintiffs facing summary judgment in antitrust cases. The court did not hold that if the moving party enunciates any economic theory supporting its behavior, regardless of its accuracy in reflecting the actual market, it is entitled to summary judgment. Matsushita demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN7[] Regulated Practices, Private Actions

While the inferences that may be drawn from ambiguous evidence in antitrust cases upon a motion for summary judgment may be limited, no special burden is imposed on a plaintiff opposing summary judgment in an antitrust case. At a minimum, the circumstances must be such as to warrant a jury in finding that the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Antitrust & Trade Law, Sherman Act

Section One of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. In order to establish a *§ 1* violation, a plaintiff must sufficiently demonstrate (1) a combination or some form of concerted action between at least two legally distinct economic entities; and that (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason.

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Evidence > Admissibility > Circumstantial & Direct Evidence

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Defenses, Ambiguities & Mistakes

In analyzing claims under *15 U.S.C.S. § 1*, the court may entertain both direct and circumstantial evidence. Direct evidence is evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted. Illegal conspiracies can rarely be proved through evidence of explicit agreement, but must generally be proved through inferences from the conduct of the alleged conspirators. Circumstantial evidence provides the material for such inferences and encompasses everything else including ambiguous statements.

Antitrust & Trade Law > Sherman Act > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

HN10[] Antitrust & Trade Law, Sherman Act

When pursuant to claims under the Sherman Act, 15 U.S.C.S. § 1, the alleged scheme is implausible, such as a price cutting agreement, a conspiracy must be proved by strong direct or strong circumstantial evidence, and the implausibility of a scheme will reduce the range of inferences that may permissibly be drawn from ambiguous evidence. Further, while schemes that involve long-term complex relationships among competitors are more susceptible to direct proof, short-term simple schemes are less apt to involve express agreements.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Evidence > Admissibility > Circumstantial & Direct Evidence

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Evidence > Types of Evidence > Circumstantial Evidence

HN11[] Conspiracy, Elements

While parallel conduct may be probative of an antitrust conspiracy, it does not alone establish a conspiracy, even if the alleged conspirators knew the other defendant companies were doing likewise. To be sure, business behavior is admissible circumstantial evidence from which the fact finder may infer agreement. But the United States Supreme Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act, 15 U.S.C.S. § 1, offense. Circumstantial evidence of consciously parallel behavior may have made heavy inroads into the traditional judicial attitude toward conspiracy; but "conscious parallelism" has not yet read conspiracy out of the Sherman Act entirely.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] Antitrust & Trade Law, Sherman Act

"Conscious parallelism" pursuant to claims under Sherman Act, 15 U.S.C.S. § 1, describes conduct by rivals in an industry who coordinate their conduct simply by observing and reacting to the moves of their competitors.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN13[] Antitrust & Trade Law, Sherman Act

Because parallel activity may be equally suggestive of independent conduct, plaintiffs offering parallel conduct as evidence of an antitrust conspiracy under the Sherman Act, *15 U.S.C.S. § 1*, must demonstrate additional circumstances, often referred to as "plus factors," which provide a supplemental basis to infer a conspiracy. "Plus factors" have been recognized to include (1) a common rational motive to conspire; (3) the performance of actions that are against a defendant's own business interest without collective involvement; (4) evidence of coercion; and (5) market phenomena that may only be attributed to concerted action. It is enough that a concert of action is contemplated and that the defendants conformed to this arrangement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Per Se Rule & Rule of Reason, Per Se Violations**

While factors considered independently, such as the dissemination or gathering of price-related information, may be insufficient to establish an inference of conspiracy under the Sherman Act, *15 U.S.C.S. § 1*, the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole. In the same vein, seemingly innocent or ambiguous behavior can give rise to a reasonable inference of conspiracy in light of the background in which the behavior takes place.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Conduct is only deemed illegal per se in a limited context of cases where a defendant's actions are so plainly harmful to competition and so obviously lacking in any redeeming procompetitive values that they are conclusively presumed illegal without further examination.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN16[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

With per se illegal conduct, there is no need to establish that the restraint was unreasonable, i.e. that it had a negative effect on competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN17[] **Practices Governed by Per Se Rule, Boycotts**

Per se violations have been held to include, inter alia, horizontal and vertical price-fixing, territorial market division, and certain group boycotts involving concerted refusals to deal. However, the majority of cases fall outside these narrow categories found to be illegal per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

International Trade Law > General Overview

HN18[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

The specific elements necessary to prove a claim of horizontal price fixing, as set forth by the United States Supreme Court, are: (1) the existence of an agreement, combination or conspiracy, (2) among actual competitors, (3) with the purpose or effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity, (4) in interstate or foreign commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

Conscious parallelism alone is insufficient to create a material issue of fact as to whether an agreement was formulated under the Sherman Act, *15 U.S.C.S. § 1*. For purposes of summary judgment, additional circumstances, referred to as "plus factors," must provide a supplemental basis to infer a conspiracy. Among recognized plus factors, two in particular have received significant exposure in case law, a motive to conspire and a high level of inter-firm communication.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN20[] **Antitrust & Trade Law, Sherman Act**

The mere opportunity to conspire does not by itself support the inference that such an illegal combination actually occurred under the Sherman Act, *15 U.S.C.S. § 1*.

Criminal Law & Procedure > Defenses > Abandonment & Withdrawal

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN21[] **Defenses, Abandonment & Withdrawal**

To withdraw from a conspiracy, a defendant must show: (1) affirmative acts inconsistent with the object of the conspiracy, that are (2) communicated in a manner reasonably calculated to reach co-conspirators. Mere cessation of activity is not enough. A defendant must take an affirmative action to disavow or defeat the purpose of the conspiracy, to make sure that a withdrawal did occur and is not simply being invented ex post.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN22[] **Conspiracy, Elements**

Until affirmative evidence of withdrawal has been produced, a defendant's participation in a conspiracy is presumed to continue until the last overt act by any of the conspirators. The burden of demonstrating withdrawal lies on the defendant. Whether a defendant withdrew from a conspiracy is often a question of fact for the jury, however, when the material facts are not disputed, courts have decided the issue as a matter of law.

Antitrust & Trade Law > Sherman Act > General Overview

HN23[] **Antitrust & Trade Law, Sherman Act**

A corporate officer can be held liable in civil antitrust actions under the Sherman Act, *15 U.S.C.S. § 1*.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN24[] **Concerted Action, Civil Conspiracy**

Once a conspiracy is shown, only slight evidence is needed to link another defendant with it.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN25[] **Private Actions, Remedies**

In order to recover for an alleged antitrust violation, a plaintiff must have suffered the kind of injury that the antitrust laws were directed at. And, a plaintiff must have antitrust standing, which fails where the indirectness of the asserted injury, the speculative nature of the damage theory, the risk of duplicative recoveries and the danger of complex apportionment are at issue.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN26[] Purchasers, Direct Purchasers

A customer of a customer who is overcharged does not have antitrust standing. It is difficult to calculate the damages suffered by an indirect purchaser. The indirect purchaser is only damaged to the extent that the direct purchaser passes on to it the overcharge resulting from the anticompetitive conduct. Any such calculation would be imprecise and could result in double recovery if both the direct and indirect purchasers sue and the calculations in their suits differed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN27[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In the preponderance of cases (those not within the per se illegal categories), a plaintiff must establish an antitrust injury under the rule of reason. Under this test plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. The traditional indicators of an adverse effect are reduced output, increased price, or decreased quality.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN28[] Private Actions, Remedies

A plaintiff may establish antitrust injury by proving that the defendant possesses sufficient "market power" to hinder competition on a market-wide basis. Such power is defined as the power to raise prices significantly above the competitive level without losing all of one's business.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Burdens of Proof > Initial Burden of Persuasion

HN29[] Antitrust & Trade Law, Sherman Act

Through requiring that a plaintiff demonstrate injury to a relevant market, the Sherman Act, *15 U.S.C.S. § 1*, protects competition within a market, instead of the individual competitors within that market. Once a plaintiff has fulfilled its initial burden of proof, the burden shifts to the defendant to provide evidence of the pro-competitive "redeeming virtues" of their combination. If the defendant can make this showing, the burden shifts back to the plaintiff to demonstrate that any legitimate collaborative objectives proffered by defendant could have been achieved by less restrictive alternatives, that is, those that would be less prejudicial to competition as a whole.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN30[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A court's rule of reason analysis involves a weighing of harms and benefits in order to make a determination as to whether conduct purports to promote or to destroy competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN31[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The true test of legality under a Rule of Reason analysis, is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, therefore reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN32[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In carrying out a rule of reason analysis, the existence of less restrictive alternatives is obviously of vital concern in evaluating putatively anticompetitive conduct.

Opinion

OPINION & ORDER

Hon. HAROLD BAER, JR., District Judge:

Defendants, Ford Models, Inc. ("Ford"), Mr. Gerald W. Ford ("G. Ford"), Que Management, Inc. ("Que"), Wilhelmina Models, Inc. ("Wilhelmina"), [1] Elite Model Management Corp. ("Elite"), Next Management Co. ("Next"), IMG Models, Inc. ("IMG"), Click Model Management, Inc. ("Click"), **[*2]** Images Management ("Images"), and Model Management Corp. ("MMC") f/k/a International Model Managers Association, Inc. ("IMMA"), (collectively "moving defendants"), [2] all of whom are New York model management companies (and one modeling association), move for

[1] Wilhelmina is incorrectly sued as Wilhelmina Model Agency, Inc.

summary judgment pursuant to *Rule 56 of the Federal Rules of Civil Procedure* ("Fed. R. Civ. P."), dismissing the lawsuit brought by plaintiffs, a class of models who now work or have worked at some point over the past three decades for one or more of the defendant modeling management companies. Plaintiffs oppose defendants' motions for summary judgment. For the foregoing reasons, defendants' motions are granted-in-part and denied-in-part.

I. BACKGROUND

A. Procedural History

Plaintiffs filed their first complaint in their action on **[*3]** June 25, 2002, an amended complaint on August 12, 2002, and a first consolidated complaint on September 24, 2002. Defendants moved to dismiss the first consolidated complaint and fully-briefed motions were submitted in November 2002. In an Opinion and Order dated January 17, 2003, this Court dismissed plaintiffs' Article 11 cause of action and the antitrust claims beyond the statute of limitations, i.e., prior to June 25, 1998. Plaintiffs filed a second amended complaint on February 5, 2003 and a third amended complaint on April 30, 2003. The moving defendants submitted their fully-briefed summary judgment motions on January 15, 2004. Oral argument on the summary judgment motions was held on March 9, 2004.

B. Factual Background

Plaintiffs allege that defendants, through their membership in or association with others who were or had been members of the modeling industry's trade association, IMMA (now called MMC), had the opportunity to -- and indeed did -- fix prices (of both models' commissions and clients' service fees), terms and conditions of models' employment, and the manner in which to structure their businesses (as management companies rather than employment agencies).

[*4] Plaintiffs assert that defendants' price-fixing conspiracy originated with "an intention and plan collectively to evade the licensing requirements and fee restrictions imposed by New York state law [General Business Law ("GBL") §§ *170-90 (1998)* ("Article 11")]." Plaintiffs' Opposition ("Pl. Opp.") at 8. Plaintiffs argue that by claiming "that they were each entitled to the 'incidental booking' exception (licensure required if more than incidentally involved in procuring work for clients), defendants gained exemption from the licensure and 10% fee restriction under *GBL Article 11.*" Pl. Opp. at 8. By way of background, ***HN1***[] "Article 11 requires *employment agencies* to be licensed and places restrictions [caps of ten percent] on the amount of commissions they may charge." *Masters, et al. v. Wilhelmina Model Agency, Inc., et al., 02 Civ. 4911, 2003 U.S. Dist. LEXIS 698, at *8 (S.D.N.Y. Jan. 16, 2003)* (emphasis added). Under plaintiffs' theory, collusion provided support and credibility for defendants' transformation--i.e., it was more believable that Ford -- the first agency to undergo the change -- was now legitimately a management company if Elite and Wilhelmina were **[*5]** simultaneously undergoing the same transformation. And, plaintiffs would not bolt against a *particular* agency that raised its commission, became a management agency, or adopted unfavorable terms and conditions if all of the major New York agencies acted together.

Plaintiffs' theory is that defendants agreed upon uniform practices on several fronts - all with the motive to quash competition and preclude objection or dissent.

II. DISCUSSION

A. Summary Judgment Standard

HN2[] Pursuant to *Fed. R. Civ. P. 56(c)*, a district court must grant summary judgment if the evidence demonstrates that "there is no genuine issue as to any material fact and [that] the moving party is entitled to judgment as a matter of law." *Anderson v. Liberty Lobby Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. ***HN3***[] "Summary judgment is properly regarded not as a disfavored procedural shortcut, but rather as an

---

[2] There are other defendants in the lawsuit but only these ten defendants moved for summary judgment.

integral part of the Federal Rules as a whole, which are designed to 'secure the just, speedy and inexpensive determination of every action.'" Celotex Corp. v. Catrett, 477 U.S. 317, 327, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986), quoting Fed. R. Civ. P. 1 **[*6]** . HN4[] The Court's role at the summary judgment stage is not "to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." Anderson, 477 U.S. at 249. Rule 56(c) requires a Court to enter summary judgment when, "after adequate time for discovery … a party [] fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." Celotex, 477 U.S. at 322.

HN5[] In antitrust cases, the non-moving party must set forth "evidence that tends to exclude the possibility that the [movants] were acting independently." Apex Oil Co. v. Dimauro, et al., 822 F.2d 246, 253 (2d Cir. 1987) (reversing district court's grant of summary judgment as to certain defendants), citing Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). To prevail, plaintiffs "must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed [plaintiffs]." Matsushita, 475 U.S. at 588, **[*7]** citing First Nat'1 Bank of Arizona v. Cities Service Co., 391 U.S. 253, 280, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968). "While some assessing of evidence is necessary in order to determine rationally what inferences are reasonable and therefore permissible, it is evident that the question of what weight should be assigned to competing permissible inferences remains within the province of the fact-finder at a trial." Apex Oil Co., 822 F.2d at 253 (citations omitted).

> HN6[] The Court's requirement in Matsushita that the plaintiffs' claims make economic sense did not introduce a special burden on plaintiffs facing summary judgment in antitrust cases. The Court did not hold that if the moving party enunciates any economic theory supporting its behavior, regardless of its accuracy in reflecting the actual market, it is entitled to summary judgment. Matsushita demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision.

Eastman Kodak Co. v. Image Technical Servs., 504 U.S. 451, 468, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992). Therefore, HN7[] while the inferences that may be drawn from ambiguous **[*8]** evidence in antitrust cases may be limited, "no special burden is imposed on a plaintiff opposing summary judgment in an antitrust case." Virgin Atlantic Airways Ltd. v. British Airways PLC, 257 F.3d 256, 262 (2d Cir. 2001) (citations omitted). "At a minimum, … 'the circumstances [must be] such as to warrant a jury in finding that the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'" Int'l Distribution Cntrs., Inc. v. Walsh Trucking Co., 812 F.2d 786, 793 (2d Cir. 1987), quoting Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1043 (2d Cir. 1976).

B. Section One Violations

HN8[] Section One of the Sherman Act ("Section One"), 15 U.S.C. § 1, prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States …" In order to establish a Section One violation, a plaintiff must sufficiently demonstrate "(1) a combination or some form of concerted action between at least two legally distinct economic entities; and [that] (2) such combination **[*9]** or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason." Dresses For Less, Inc., et al. v. CIT Group/Commercial Servs., Inc., et al, 01 Civ. 2669, 2002 U.S. Dist. LEXIS 18338, at *17 (S.D.N.Y. Sept. 30, 2002), quoting Virgin Atlantic Airways Ltd., 257 F.3d at 273.

HN9[] In analyzing claims under Section One, the Court may entertain both direct and circumstantial evidence. Direct evidence is "evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted." Jacob Blinder & Sons, Inc. v. Gerber Prods. Co. (In re Baby Food Antitrust Litig.), 166 F.3d 112, 118 (3d Cir. 1999). "Illegal conspiracies, of course, can rarely be proved through evidence of explicit agreement, but must generally be proved through inferences from the conduct of the alleged conspirators." Venture Tech., Inc. v. Nat'l Fuel Gas Co., et al., 685 F.2d 41, 45 (2d Cir. 1982) (citations omitted). Circumstantial evidence provides the material for such inferences and encompasses "everything else *including* ambiguous statements." In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 662 (7th Cir. 2002). **[*10]**

HN10[] When the alleged scheme is implausible, such as a price cutting agreement, "a conspiracy must be proved by strong direct or strong circumstantial evidence, and the implausibility of a scheme will reduce the range of inferences that may permissibly be drawn from ambiguous evidence." Apex Oil Co., 822 F.2d at 253, citing Matsushita, 475 U.S. at 594-598. Further, while schemes that involve long-term complex relationships among competitors are more susceptible to direct proof, short-term simple schemes are less apt to involve express agreements. *See* Apex Oil Co., 822 F.2d at 253 (citation omitted).

HN11[] While parallel conduct [3] may be probative of an antitrust conspiracy, it does not alone establish a conspiracy, even if the alleged conspirators "knew the other defendant companies were doing likewise." Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 110 (2d Cir. 1975).

> To be sure, business behavior is admissible circumstantial evidence from which the fact finder may infer agreement. But this Court has never held that proof of parallel business behavior conclusively establishes agreement **[*11]** or, phrased differently, that such behavior itself constitutes a Sherman Act offense. Circumstantial evidence of consciously parallel behavior may have made heavy inroads into the traditional judicial attitude toward conspiracy; but 'conscious parallelism' has not yet read conspiracy out of the Sherman Act entirely.

Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540-541, 98 L. Ed. 273, 74 S. Ct. 257 (1954) (internal citations omitted).

HN13[] Because parallel activity may be equally suggestive of independent conduct, plaintiffs offering parallel conduct as evidence of an antitrust conspiracy must demonstrate additional circumstances, often referred to as "plus factors," which provide a supplemental **[*12]** basis to infer a conspiracy. *See* Apex Oil Co., 822 F.2d at 253. "Plus factors" have been recognized to include (1) a common rational motive to conspire (*see* Ambook Enters. v. Time Inc., 612 F.2d 604, 616 (2d Cir. 1979)); (2) a concentrated degree of inter-firm communications (*see* Apex Oil Co., 822 F.2d at 254); (3) the performance of actions that are against a defendant's own business interest without collective involvement (*see id.*); (4) evidence of coercion (*see* Ambook Enters., 612 F.2d at 616); and (5) market phenomena that may only be attributed to concerted action (*see* Stephens, et al. v. CMG Health, et al., 96 Civ. 7798, 1997 U.S. Dist. LEXIS 23797, at *19 n.13 (S.D.N.Y. July 22, 1997) (citation omitted). "It is enough that a concert of action is contemplated and that the defendants conformed to this arrangement." In re Nasdaq Market-Makers Antitrust Litig., 894 F. Supp. 703, 713 (S.D.N.Y. 1995), quoting Ambook Enters., 612 F.2d at 614.

HN14[] While factors considered independently, such as the "dissemination or gathering of price-related information," may be insufficient **[*13]** to establish an inference of conspiracy (Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 647, 64 L. Ed. 2d 580, 100 S. Ct. 1925 (1980) ("advance price announcements are perfectly lawful"); United States v. Citizens & S. Nat'l Bank, et al., 422 U.S. 86, 113, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975) ("dissemination of price information is not itself a *per se* violation of the Sherman Act.")), "the character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole" (Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)). In the same vein, "seemingly innocent or ambiguous behavior can give rise to a reasonable inference of conspiracy in light of the background in which the behavior takes place." In re Medical X-Ray Film Antitrust Litig., 946 F. Supp. 209, 218 (E.D.N.Y. 1996), quoting Minpeco, S.A. v. Conticommodity Servcs., Inc., 673 F. Supp. 684, 688 (S.D.N.Y. 1987), quoting Apex Oil Co., 822 F.2d at 254-55.

1. *Per Se* Violations

[3] HN12[] "'Conscious parallelism' describes conduct by rivals in an industry who 'coordinate their conduct simply by observing and reacting to the moves of their competitors.' Stephens v. CMG Health, 96 Civ. 7798, 1997 U.S. Dist. LEXIS 23797, at *18 n.12 (S.D.N.Y. July 21, 1997) (citation omitted).

HN15[] Conduct is only deemed illegal *per se* in a limited context of cases "where a defendant's actions are so **[*14]** plainly harmful to competition and so obviously lacking in any redeeming procompetitive values that they are 'conclusively presumed illegal without further examination.'" *Capital Imaging v. Mohawk Valley Medical Ass'n, 996 F.2d 537, 542 (2d Cir. 1993)*, citing *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. ***HN16***[] With *per se* illegal conduct, there is no need to establish that the restraint was unreasonable, i.e. that it had a negative effect on competition. *See NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133-34, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. ***HN17***[] *Per se* violations have been held to include, *inter alia,* horizontal and vertical price-fixing (*United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*; *Dr. Miles Medical Co. v. Park & Sons Co., 220 U.S. 373, 405, 55 L. Ed. 502, 31 S. Ct. 376 (1911))*, territorial market division, and certain group boycotts involving concerted refusals to deal (*NYNEX, 525 U.S. at 133*; *Capital Imaging, 996 F.2d at 542-43*). The majority of cases fall outside these narrow categories found to be illegal *per se. See Capital Imaging, 996 F.2d at 543*; *CDC Techs., Inc. v. IDEXX Laboratories, Inc., 186 F.3d 74, 79 (2d Cir. 1999).* **[*15]** *See also Nat'l Camp Assoc., Inc. v. Am. Camping Assoc., Inc., 99 Civ. 11853, 2000 U.S. Dist. LEXIS 18194, at *15 (S.D.N.Y. Dec. 15, 2000)* (highlighting Supreme Court's refusal to expand *per se* categories).

a. *Conspiracy to Fix Models' Commissions*

In Count I of their third amended complaint ("complaint"), plaintiffs assert that defendants violated Section One by (1) initially conspiring to charge the majority of their models a commission in excess of the ten percent statutory cap imposed by Article 11, and then (2) conspiring to increase this commission to fifteen percent, and finally twenty percent. 3d Am. Compl. PP 98-99.

Plaintiffs allege that defendants colluded to fix models' commissions through discussions, exchanges, and agreements at IMMA meetings and outside of IMMA's formal setting. Because the alleged conspiracy, as it involves horizontal price-fixing, is illegal *per se,* this Court need only determine whether plaintiffs have established a material issue of fact as to whether defendants conspired to fix models' commissions. *See Capital Imaging, 996 F.2d at 542*. Although the defendants, through well-briefed and argued motions, **[*16]** have convinced me that this claim raises difficult questions and close calls, I conclude that, at least with regard to all defendants other than Que, who was never a member of IMMA or MMC, plaintiffs have provided sufficient evidence to allow for a reasonable inference of collusion on models' commissions. It will be for the jury to decide, after watching and listening to live testimony and cross-examination, whether these defendants actually conspired to fix the commissions required to be paid by the models to the defendants.

HN18[] "The specific elements necessary to prove a claim of horizontal price fixing, as set forth by the Supreme Court, are: (1) the existence of an agreement, combination or conspiracy, (2) among actual competitors, (3) with the purpose or effect of 'raising, depressing, fixing, pegging, or stabilizing the price of a commodity,' (4) in interstate or foreign commerce." *In re Medical X-Ray Film Antitrust Litig., 946 F. Supp. at 215-16*, citing *Socony-Vacuum Oil Co., 310 U.S. at 223-24*. The critical element here, and the one in dispute, is the first - whether defendants *agreed* to fix models' commissions.

i. *Parallel Pricing "Plus"*

[*17] While plaintiffs have not uncovered direct "smoking gun" evidence to confirm that defendants operated under an agreement to fix models' commissions, it is undisputed that there is evidence of parallel pricing, both at rates exceeding ten percent, and at rates of twenty percent. [4] Plaintiffs' expert, Martin A. Asher, Ph.D. ("Asher") concluded, "from data provided by defendants" that "more than 97 percent of models who had billings within the class period, from 1998 through 2003, paid commissions in excess of 10 percent." Asher, 12/15/03, at 6. [5] Further,

---

[4] While defendants may contest the reliability of the evidence utilized by plaintiffs' experts to make conclusions as to pricing, and offer evidence of "variation in average earning by commission rates among Defendants," (Daniel S. Levy, Ph.D., at 7), the task of weighing the competing evidence is the role of the jury. *Anderson, 477 U.S. at 249*.

Asher reports that "approximately 91 percent of the models paid commission rates of 20 percent." *Id.* at 8. Similarly, plaintiffs' second expert, John C. Beyer, Ph.D. ("Beyer"), concludes that "most models (approximately 96 percent) have been charged a commission rate of 20 percent or more …" Beyer, 12/15/03, at 4. While plaintiffs' experts demonstrate parallel pricing, assuming defendants were aware of each other's pricing patterns, which the evidence suggests they were, ***HN19***[] conscious parallelism alone is insufficient to create a material issue of fact as to whether an agreement was formulated. For purposes of summary judgment, **[*18]** additional circumstances, referred to as "plus factors," must "provide a supplemental basis to infer a conspiracy." *Theatre Enters., 346 U.S. at 540-41*. Among recognized plus factors, two in particular have received significant exposure in case law, both of which have a strong presence in this case - a motive to conspire and a high level of inter-firm communication. *See Modern Home Institute, Inc., 513 F.2d at 110*; *Ambook Enters., 612 F.2d at 616*.

[*19] With regard to the first plus factor, there is no question that defendants possessed a common rational motive to conspire - the ability to raise models' commissions without suffering loss of business. General theories of competition make clear that without collective action, price increases can result in loss of business. *See Apex Oil Co., 822 F.2d at 254*. The benefit of joint action with regard to pricing was discussed at a September 16, 1986 IMMA meeting, when Monique Pillard ("Pillard") of Elite "made a point about lowering the prices of catalogs; that we are all committing suicide, if we do not stick together … Pauline's agreed with me … by not sticking together, we would have to make 40% more volume in order to make the same figures as last year …" Haazen Affirmation, Exhibit. ("Pl. Exh.") 26 at EL 04131.

Second, it is beyond peradventure that IMMA members engaged in a concentrated degree of inter-firm communication (*Apex Oil Co., 822 F.2d at 254*), including but hardly limited to models' commissions directly. This Court was unable to find any cases in this Circuit or in this District that elucidated whether the inter-firm communication, **[*20]** in order to be relevant, had to be specifically about the subject matter of the alleged conspiracy, or instead, whether it was sufficient to uncover extensive discussions and agreements among defendants, on related but collateral issues. The cases merely state that "a high level of interfirm communications" can serve to bolster the inference of a conspiracy drawn from parallel acts. *See, e.g. In re Medical X-Ray Film Antitrust Litig., 946 F. Supp. at 218*; *Apex Oil Co., 822 F.2d at 254*; *Minpeco, 673 F. Supp. at 688*. While I agree with defendants that evidence of discussions directly *about models' commissions* would represent the strongest inference of price-fixing, I disagree that evidence of discussions and agreements, even related to other pricing strategies, lacks relevance here and fails to bolster an inference that defendants colluded on commissions as well. The evidence of parallel pricing, the sheer volume of communications and agreements, coupled with crystal clear evidence that suggests IMMA members even colluded to fix client service fees, a close cousin of models' commissions, when viewed together, "tends to exclude the **[*21]** possibility" that the defendants acted independently with regard to models' commissions.

a. Inter-firm Communications.

1. <u>About Pricing (Commissions, Rates, Service Fees) and Billing Practices</u>

Plaintiffs assert that the conspiracy began with an agreement among defendants, collectively, to transform the structure of their businesses from employment agencies to management agencies for the express purpose of avoiding the ten percent cap imposed upon employment agencies by Article 11. [6] **[*23]** According to plaintiffs, Ford

---

[5] Asher noted that he had incomplete financial data productions from a few defendants, and intended to "supplement [his] presentation with respect to the defendants from whom more complete computerized data may be required and may hereafter be obtained." Asher, 12/15/03, at 7 fn 9. This "intention" resulted in an Order to Show Cause by several of these defendants, aimed at blocking plaintiffs' ability to supplement the record. Shortly thereafter, the parties amicably resolved their dispute without the need for a hearing. Although plaintiffs again raise questions, in supplemental submissions, requested by the Court, about the adequacy of certain defendants' productions, and defendants again hotly contest any deficiencies, plaintiffs and defendants agree that their dispute should not affect the timing of the summary judgment decision. Therefore, although unaware of the substance of plaintiffs' and defendants' discussions and resolutions concerning productions, the Court will proceed under the assumption that these percentages apply to *all* defendants.

initiated the formal transformation on April 15, 1971, [7] when it declined to renew its license with the DCA because it had "now become management." Pl. Opp. at 11, citing Pl. Exh. 4 (letter to DCA). Notably, Ford retained its licensure as an employment agency in California (Pl. Exh. 261D (California Licensure Certificates, including 2003)), a fact which plaintiff's suggest warrants an inference that Ford needed the unified action of its New York co-conspirators to effectuate this transformation without scrutiny. [8] **[*24]** Plaintiffs then assert that "shortly after IMMA was founded [in 1971,]" predominantly by Ford, "each IMMA member--comprising essentially the entire industry **[*22]** in New York -- had either resigned or not renewed its license." [9] Pl. Opp. at 7, citing Pl. Exh. 317 (Foster-Fell Dep.) at 42:14-21. Plaintiffs assert that this pattern was hardly a coincidence, as a requirement of membership in IMMA was "that they be managers and not employment agents." Pl. Exh. 283 (Gerald Ford Dep.) at 71:18-20. Prior to IMMA's eventual adoption of a form contract, plaintiffs assert that several defendants, Ford, IMG, and Wilhelmina, utilized essentially identical contract language to elucidate the position that they were not artist managers, but rather were personal managers, and that they were not employment agencies under Article 11. Pl. Exhs. 304 (Ford Contract) at P 10; 306 (IMG Contract) at P 9; 309 (Wilhelmina Contract) at P 3.

Therefore, the agencies that subsequently joined IMMA were all unlicensed. Pl. Opp. at 13. Plaintiffs assert that Que, though never a member of IMMA, still adopted contracts "that were either silent regarding the agencies' role in

---

[6] Defendants expend considerable time and effort arguing that plaintiffs are barred by the *Noerr-Pennington* doctrine from introducing evidence of defendants' alleged evasion of Article 11. The *Noerr-Pennington* doctrine, however, does not protect conspiracies so defendants may *evade* the law, but rather, conspiracies so defendants may *change* the law. *See* *Eastern Railroad Presidents Conference, et al. v. Noerr Motor Freight, Inc., 365 U.S. 127, 136-37, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)* ("We think it equally clear that the Sherman Act does not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. Although such associations could perhaps, through a process of expansive construction, be brought within the general proscription of 'combination[s] … in restraint of trade,' they bear very little if any resemblance to the combinations normally held violative of the Sherman Act, combinations ordinarily characterized by an express or implied agreement or understanding that the participants will jointly give up their trade freedom, or help one another to take away the trade freedom of others through the use of such devices as price-fixing agreements, boycotts, market-division agreements, and other similar arrangements.") (emphasis added), citing *15 U.S.C. § 1*; *United Mine Workers v. Pennington, 381 U.S. 657, 670, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)* (citing to *Noerr* and stating that "joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act."). To the extent that plaintiffs have any intention of introducing evidence of defendants' joint efforts to "seek legislation" by, for example, lobbying to amend or revoke Article 11, which this Court has no reason to believe they do, such evidence will be barred by the *Noerr-Pennington* doctrine. In other words, while any efforts that defendants undertook to influence the DCA are protected by the *Noerr-Pennington* doctrine, defendants' joint efforts to avoid the DCA's enforcement are not shielded.

[7] Ford asserts that it altered its business structure in the mid-1960's but did not formalize the change with the DCA until 1971. Pl. Opp. at 12.

[8] Although the parties dispute whether defendants are employment agencies (subject to Article 11) or management agencies (permitted to exceed the ten percent cap), this Court does not have jurisdiction to adjudicate this substantive disagreement. *See* *Masters, 2003 U.S. Dist. LEXIS 698, at *29-32* (the statute's legislative scheme provides for exclusive enforcement (in New York City) by the Department of Consumer Affairs ("DCA")). Though not controlling, it is interesting to note that on April 11, 2003, after this Court held that it lacked jurisdiction to determine whether defendants were in violation of Article 11, the DCA determined that "… we are unpersuaded by your [plaintiffs'] contention that model management companies … meet the New York General Business Law ("GBL") *§ 171* definition of an 'employment agency.' Instead, every indication is that these types of companies fall under the theatrical managers exception of *GBL § 171(8)*. This is because they are primarily career managers and only 'incidentally' do job placements for their clients." After plaintiffs proffered additional evidence,, the DCA concluded that "… we remain unconvinced that model management companies do not fall within the managers exception to the employment agency licensing law in *§ 171(8)*." Def. Reply at 2.

[9] Ford was a member of IMMA from October 1974 through December 2003, Wilhelmina from the early 1970's through December 2003, Elite from 1979 through November 1993, Next from April 1990 through September 1994 and again from March 1996 through April 1997, IMG from in or about 1980 through December 2003, Click from April or May 1994 through December 2003, and Images from 1982 through December 2003.

finding work for the model, or affirmatively disavowed any obligation to do so." Pl. Opp. at 13. And, plaintiffs assert that the fact that Elite was invited to join IMMA, when Ford was currently suing it [10] and Gerald Ford had made statements attacking Elite's founder, John Casablancas ("Casablancas"), and more particularly, his moral fiber, suggested that the current members of IMMA had an ulterior interest in securing the membership of all major New York modeling companies **[*25]** -- i.e., a desire to perpetuate the conspiracy. Pl. Opp. at 13, citing Pl. Exh. 283 at 67:19-70:5. After all, if a predominant agency were excluded, and that agency were not forced, through membership, to become a management company, models would have the option of hiring a modeling *agency,* which would be obliged to charge a commission at or below ten percent.

Plaintiffs argue that through their conspiracy to evade Article 11, or more aptly their joint agreement **[*26]** to become management companies, defendants were able to raise the commission that they charged to models above Article 11's ten percent cap, and eventually agree to uniformly charge models commissions of twenty percent -- a commission rate which would have been impossible under their previous configurations. While defendants hotly contest the formation of any agreements as to models' commissions, they concede that there was significant information exchanged among IMMA members about pricing. Casablancas noted proudly that each company "basically knew the price practices of all the agencies … everybody knows what everybody else is doing." Pl. Exh. 281 (Casablancas Dep.) at 109:5-6, 44:22-23. He also admitted that he "knew instantly every time an agency raised or when an agency didn't raise." *Id.* at 143:1-2. [11] Dieter Esch ("Esch"), then President and Chief Executive Officer of Wilhelmina, admitted that he may have announced to attendees of an IMMA meeting, in the approximate timeframe of 1996 through 1998, that he was charging a twenty-five percent commission to models (Pl. Exh. 279 (Esch Dep.) at 299:12-24, 323:12-16) and Casablancas made a similar, yet even more troubling announcement **[*27]** at the December 12, 1991 IMMA meeting that he too "***would be*** charging twenty percent commission to all clients as a firm policy." Pl. Exh. 53 at FORD 058239 (emphasis added). While Casablancas' announcement does not explicitly demonstrate an agreement among IMMA members to follow course, it suggests that IMMA members were made aware of their competitors' price increases before the price increases were enacted -- leaving time for others to agree to increase their fees accordingly. Further, Casablancas conceded that "the more uniformity in the prices, the more I think it was -- it was something that you could then compete on the quality of your models on the service, and not just on -- on rates, you know. So we were always favorable to letting everyone know as much as possible about -- about our pricing policies." Pl. Exh. 281 at 121:8-16. Casablancas also testified that "I was always hoping that as leaders, we would be followed, and that we would not be left as we were on many instances by ourselves with higher rates, and having a lot of clients segregating against us because we were too expensive." *Id.* at 112:9-113:15. While it is possible that Elite simply took the lead **[*28]** in raising its commissions, with the blind hope that other members would follow, it is far more reasonable to assume that Elite sought some guarantee that the other defendants would acquiesce, to ensure that its clients would not segregate against them.

This assumption is bolstered by significant evidence of discussions and agreements concerning raising the client service fees. Elite's internal memorandum "RE: IMMA Meeting -- Minutes," reports that at a January 21, 1980 IMMA meeting, trade association members acted in unison with regard to pricing decisions. The memorandum reads in part that "the suggestion of increasing client service charge from 10% which Alain Kittler suggested I [Jo Zagami ("Zagami")] make at this meeting **was not accepted by the Association.** The general feeling was that **with the increase of model rates,** and the agencies **[*29]** benefiting by models' commissions, clients would not be agreeable to a higher service charge." Pl. Exh. 13 at EL 04073 (emphasis added). This memorandum reveals both that one agency sought the "acceptance" of the trade association before increasing its client service fee and also

---

[10] Quite notably, Elite's suit alleged (almost identically to plaintiffs' current action) that Ford, Wilhelmina, and other IMMA members "had agreed to increase their rates and adopt a uniform price structure and circumvent the licensing requirements of the New York General Business Law." Pl. Opp. at 15, citing Pl. Exhs. 7-10 (Court Documents). John Casablancas, Elite's founder, was even quoted as stating that he was contemplating an antitrust class action on behalf of the models. It appears that Elite abandoned the action, and instead joined IMMA.

[11] Whether Casablancas learned about the other defendants' pricing practices from clients or from discussions with defendants will be for the jury to decide.

strongly suggests that the "increase of model rates" was applicable to all members and not a decision made unilaterally by each company. Similarly, a memorandum recounting a November 14, 1980 IMMA meeting, makes clear that "certain members" had made "requests" "to increase the service charge from 10 to 15%." This Court can think of no other rationale for the need for such a "request," other than that members were required to act jointly with regard to price increases. At the same meeting, the memorandum reflects that Zagami suggested that "IMMA send out a letter stating that **we plan on pursuing** [a 1 1/2 percent finance charge on clients who pay after 30 days] **in lieu of increasing our service charge.**" *Id.* at EL 04086-04087. Again, this statement suggests joint action.

At this same November 14 meeting, the members also discussed the lost fees associated with allowing models to book hourly **[*30]** rates instead of day, quarter day, half day, or three quarter day rates, which have increased at levels greater than hourly rates. G. Ford "came up with a much better suggestion which he has in effect, that being: certain of his top girls can only be booked half and full days. It was the general feeling that Elite too would put this into effect, although as John mentioned, we would have to give the clients the availability of half and three quarter days." *Id.* at 04085. Members even discussed, as proposed by Casablancas, "that IMMA members have meeting [sic] with the different branches of the industry, such as publishing houses, administrative agencies, etc." regarding rates. *Id.* At his deposition, Casablancas could not recall this discussion concerning hourly/day rates, but stated that "at this time I think it's not good [to discuss]." Pl. Exh. 283 at 119:21.

The evidence suggests that the management companies did approve an increase in the client service fee to twenty percent, with Elite taking the initiative in doing so. On April 14, 1987, Casablancas sent Pillard the letter that he intended to send to his clients, announcing the increase in the service fee, and explained **[*31]** that "you may show [the letter] to some people at the next IMMA meeting." He explained further that "you should say that **it is our intent to send this letter** and you should be very careful that in no way can this be construed as 'price fixing'. You are merely to inform our competitors of our intention to send this letter or a similar one." Pl. Exh. 30 at EL 04160. The tone and tense of this letter suggests that Casablancas provided his fellow IMMA members with advance notice of Elite's intended price increase. [12] As further evidence that Elite actually provided its competitors with notice of its intended price increase, and secured their agreement to follow suit, plaintiffs provide a May 5, 1987 memorandum from Pillard to all Elite staff, informing them of the service charge increase from fifteen to twenty percent, effective June 1, and stating that "**all other agencies will go along with this increase.** Please inform you clients accordingly so that there is no misunderstanding." Pl. Exh. 32. Only a rich fantasy life could lead one to an inference other than that Pillard was directing her staff to inform clients that the other agencies would institute similar increases **[*32]** so that clients would not "misunderstand" and cease utilizing Elite's services, in hopes of moving to a management company with lower fees. Additionally, in October 1987, Zagami circulated to all IMMA members a copy of an article, published in a trade publication, denouncing the increase in service fees by Elite, Wilhelmina, and Zoli. At the same time, Zagami circulated Casablancas' July 17, 1987 letter response to Stan Malinowski (the author), in which he asked, "why did you single out Elite Wilhelmina and Zoli" and informs Malinowski that "Ford, as well as American Models, Faces and others have also increased their service charge." Pl. Exh. 33 at DEV 00427-00430. For obvious reasons, both Casablancas' knowledge that other companies had increased their service charges and his interest in informing the public of such a fact, support powerful inferences of a conspiracy as to service fees.

[*33] At a September 16, 1986 IMMA meeting, as reflected in an internal Elite memorandum, Pillard "made a point about lowering the prices of catalogs; that we are all committing suicide, if we do not stick together. Pauline's agreed with me but as usual, Bill Weinberg [of Wilhelmina] cautioned me about price fixing … Ha! Ha! Ha! …. the usual bulls..t! I warned him that by not sticking together, we would have to make 40% more volume in order to make the same figures as last year, but you know Bill, he always thinks he can get more if he acts that way." Pl. Exh. 26 at EL 04131. Again, it is difficult for me to escape the inference that discussions of the benefits of joint action on pricing ensued. While Wilhelmina objects to the outward discussion of price fixing, it is plausible from Pillard's

---

[12] Pillard's testimony that she "decided it was best not to show the letter" (Pl. Exh. 288 (Pillard Dep.) at 61:8-62:2) at best, creates an issue of fact as to whether Pillard did in fact follow Casablancas' instructions.

reaction that Wilhelmina's objection was to the dissemination of information not to the underlying price-fixing agreement.

On March 31, 1987, Zagami wrote to Joseph Hunter ("Hunter"), then the President of IMMA, to assert that "the members of IMMA must stop the photographers and or studios from using us to increase their profits. As long as models fees are billed to the various studios and not **[*34]** directly to the client, this practice will never cease." Zagami suggested "a meeting first with all IMMA members" and then "a meeting with the Photo Studio Association and Photographers Association." He explained that "unless we curtail the holding back of money due us … we as managers will lose our ability to control model fees even more in the future." Pl. Exh. 29 at PAU 00417. On the flip-side of this letter is what appears to be a proposed letter on IMMA stationery, with a blank where the recipient(s) name(s) would be inserted, informing the recipient(s) that after "discuss[ions] at recent IMMA meetings … we have [] decided that as of this date we will honor bookings only and exclusively when they have been directly made to the mother agency in New York City [not by out-of-town agencies]." *Id.* at PAU 00418. Earlier, on March 19, 1987, Jeremy Foster-Fell ("Foster-Fell") had written to Hunter, regarding "the [same] issue of 'out of town agency' bookings." He had explained that "we discussed and partially resolved" that all agencies would send letters "along the lines of the drafted example handed out at the meeting, to those clients who have made this practice the **[*35]** norm." However, he suggested, instead, that IMMA send "one letter signed by the industry in unison," which in his opinion, would be more "startling." He added that "I don't believe all our clients are aware of the existence of IMMA and its members **who can and will act in concert together.**" Pl. Exh. 28. He also explained that discussions had ensued regarding "the contractual relationship between manager and model" and creating a system of exclusivity to prohibit models from working through out-of-state agencies. In Foster-Fell's words, "[a] model can afford to lose one New York agent but cannot afford to lose New York." *Id.* These letters demonstrate once more that the members viewed (and wanted the public to view) IMMA as a unified front who worked in concert to achieve jointly beneficial results.

Notably, just prior to IMMA's distribution of its standard Model Management Agreement to its members in May 1993, its counsel Edward Klagsbrun ("Klagsbrun") found serious antitrust problems with pertinent sections. Klagsbrun noted in an April 6, 1993 memorandum to co-IMMA counsel David Blasband ("Blasband") that "any agreement suggested by a trade association to its members who **[*36]** are competitors is inherently suspect and vulnerable to attack from the point of view of Federal and state ***antitrust law***." Pl. Exh. 65. In this same memorandum, Klagsbrun stated that "if it is in any way mandated rather than suggested it is unlawful per se." *Id.* Klagsbrun instructed that "the risks associated with the proposed agreement … may be reduced by … making it clear to all members on the record that it is a recommended agreement and that agencies are entirely free to develop their own agreements …" *Id.* When this "proposed form of management agreement" was sent to IMMA members on or about May 7, 1993, Blasband was careful to instruct that "there are no financial terms incorporated in this form, and none are suggested. Each manager should insert in their form the financial terms that they have negotiated with models, as well as any other terms that they believe should be added, deleted from or otherwise modify the enclosure." Pl. Exh. 75 at 1. [13] However, in July 1993, Casablancas sent Blasband a draft of the letter that he wished to circulate among IMMA members -- a letter which can, without much embellishment, be read to urge agreement on forbidden terms such **[*37]** as rates, fees, and commissions. Pl. Exh. 79 at M&SX 01938-01940. For example, Casablancas wrote that "Blasband took note of our 'wish list' of elements to be included into the contract" but that "unfortunately some elements could be interpreted as restraining models trade, and therefore can not be included …" *Id.* at M&SX 01938. Casablancas explained further that "it will be up to each agency thereafter to add, on an individual basis, the elements that they feel are missing; but such additions may not be discussed collectively." *Id.* With regard to a clause concerning agreements between competitors as to models who switch agencies, Casablancas explained that while this issue could not be decided "collectively," "there is nothing objectionable about this type of agreement existing between managers on a one to one basis." *Id.* at M&SX 01939. Further, with regard to the reimbursement of models' debts, Casablancas similarly offered that "even though there

[13] Defendants rightly assert that form contracts are efficiency-enhancing tools that do not violate ***antitrust law*** when the use of the form contract is voluntary and the rate or fee is left blank. *See* U.S. Dep't of Justice, Antitrust Division, Business Review Letter 02-7 (Nov. 15, 2002).

may not be a concerted agreement, there can exist a substantial amount of information that allows each agency, if it so wishes, to harmonize their policies with other members of their profession." *Id.* As to "payments and **[*38]** advances to models," Casablancas stated that while "we may <u>not</u> agree on a common policy … there is nothing wrong with individual managers, informing each other case by case about their own methods of payment …" *Id.* at M&SX 01940. In general, Casablancas urged that while "the guidelines set by the law are clearly strict and [] limit IMMA's ability, as an association, to discuss certain matters or to take any decision that could, in anyway [sic], be interpreted as a restraint of trade for either models, other competitors, or clients … it is obvious that a certain harmonization of systems can only benefit our profession …" *Id.* Casablancas closed his letter with the following plea: "our attorney and Joey Hunter will include into our model contracts as many common elements as the law permits, the rest can only be left to each manager's individual initiative." *Id.* While it is unclear whether Casablancas' letter was ever circulated, it provides evidence that management companies -- members of IMMA and beyond -- may have entered into implicit agreements on terms that were omitted from the model contract.

[*39] Despite advice of counsel as to the antitrust problems associated with mandating any agreement, by cover letter of August 16, 1993, Hunter circulated a draft of the model contract and wrote that he felt that it was "a very good contract for IMMA Members to **endorse.**" Pl. Exh. 78 (emphasis added). Similarly, draft IMMA meeting minutes from September 15, 1993 reflect that "members who <u>had</u> received copies of the draft agreement were in agreement that the contract was ready to be adopted." Pl. Exh. 81 at M&SX 01889. While it is unclear who objected to the words "ready to be adopted," it is obvious that someone recognized that a record reflecting the "adoption" by the members could be seen to contradict the advice of counsel that the agreement must not be "in any way mandated." These IMMA minutes were later amended to replace the troublesome language with the words "in good order." Pl. Exh. 83 at M&SX 01580. Shortly after IMMA adopted its standard Model Management Agreement in 1993, plaintiffs assert that four defendants, Ford, IMG, Next, and Wilhelmina, inserted substantially identical language in the section stating that models understood that managers were also "entitled to **[*40]** receive a service charge from clients." Pl. Exhs. 305 (Ford Agreement), 306 (IMG Agreement), 308 (Next Agreement), 309 (Wilhelmina Agreement).

2. <u>About Terms, Conditions, and Practices</u>

An internal Elite memorandum, [14] reflecting discussions at a January 21, 1980 IMMA meeting, suggests that members entered into tentative agreements concerning cancellation fees. In this memoranda, Zagami explains to Casablancas and Pillard, all of Elite, that "as you recall my discussion with you, this matter was brought up at the first meeting and at that time it was decided that this was a policy **we would only <u>try</u> to implement.** However, the other agencies went ahead without notifying Elite that **they had put this into effect.** Pl. Exh. 13 at EL 04072 (bold emphasis added). An Elite memorandum from a May 5, 1982 IMMA meeting reflects an agreement between G. Ford and Zagami about "problem clients," namely that "if we work together … we will eliminate additional work or collection problems." Pl. Exh. 16 at EL 04101. This same memorandum also provides evidence of an agreement between IMMA members, that was formalized in a letter from IMMA to the Fashion Photographers Association, **[*41]** that "tentative bookings when cancelled by photographers are not billed as cancellations" so "no model could be charged if the model or agency does not honor a tentative." *Id.* at EL 04102.

IMMA minutes also reflect that IMMA members adopted uniform schedules for the Christmas holiday. For example, in 1990, "it was confirmed that **[*42]** IMMA agencies will close … on Friday, December 21 and reopen on Wednesday, January 2." Pl. Exh. 47. And, in 1992, "all agencies agreed to be closed December 24th and to reopen January 4th 1993." Pl. Exh. 54 at FORD 058322. Similarly, in 1993, "members agreed to close at 6:00 P.M. December 23, 1993 and to re-open on January 3, 1994." Pl. Exh. 81 at M&SX 01890. The fact that IMMA members

---

[14] Defendants argue that plaintiffs, in opposing summary judgment, may not rely on internal Elite memoranda, summarizing IMMA meetings, which have yet to be authenticated, as the non-movant may only rely on "such facts as would be admissible in evidence." *Fed. R. Civ. P. 56(e)*. While defendants are correct as to *Rule 56(e)*'s requirement on admissibility, I have no reason to believe that these memoranda are inherently inadmissible, and instead find, based on the arguments presented at this stage, that plaintiffs may, for example, authenticate these documents as business records pursuant to Federal Rule of Evidence ("Fed. R. Evid.") 803(6).

realized the benefit in eliminating differences among them in seemingly innocuous areas such as holiday schedules, lends credence to plaintiffs' assertion that IMMA members agreed to significantly more crucial details. At the very least, the inference to be drawn from these minutes raises an issue of fact for the jury.

Plaintiffs also provide evidence that IMMA has "generally accepted rules by which we all agree to ethically operate," which include "never offering a model a guarantee to intice [sic] a model to leave an agency at which they were happy, to come to your agency." In particular, plaintiffs offer a November 27, 1991 letter from Millie Pellet ("Pellet") of Next to Esch, copying all members of IMMA, bringing to light that Esch broke this rule with regard to a particular model, Michele Weweje. **[*43]** Pellet wrote that "if I am naive in believing what is said and agreed to by all of the participating agencies, then the IMMA meetings are just a waste of everyone's time." Pl. Exh. 52. While this agreement alone obviously strikes at the essence of competition, Pellet's statement is broad enough to warrant a general inference that the "generally accepted rules" forbade additional actions that could stir competition.

The record also contains a November 18, 1993 memorandum from Blasband to Klagsbrun, requesting that Klagsbrun "look over the attached resolution, which may have actually been voted on as an amendment to IMMA's by-laws back in 1979" because Blasband believed that the resolution "may violate the antitrust laws." Pl. Exh. 90 at M&SX 01831. The resolution, which begins: "Upon motion duly made, seconded, and unanimously carried, it is RESOLVED …" establishes a system whereby, in the event of a change in representation from one New York agency to another, a model's debts with the first agency would be subsumed by the second. *Id.* at M&SX 01832. Subsequently, the minutes from a March 30, 1995 IMMA meeting reflect that "an additional document purporting to be an agreement **[*44]** among the membership of IMMA has been found in the IMMA files … The members of IMMA do not recognize the document or its validity." The members then voted unanimously that "the document has no force or effect and does not constitute either a by-law of IMMA or an agreement among its members." Pl. Exh. 123 at DEVX 04328. In this manner, IMMA members rid themselves of this problematic resolution in a manner that questioned, perhaps dishonestly, its validity and hinted that it had never been adopted by IMMA. [15]

ii. *Sufficiency of Evidence To Establish Price-Fixing Conspiracy*

While I agree with defendants that the majority **[*45]** of this evidence more directly demonstrates agreement on elements other than models' commissions, about which, for other reasons, plaintiffs' claims do not survive (*see infra*), I do not agree that, as a result, such evidence is irrelevant. Rather, I find that the extensive evidence of agreements between IMMA members, on various components of their businesses, such as client service fees, holiday closing schedules, cancellation policies, and penalties borne by management companies who attract models from competitors, may reasonably be inferred to demonstrate an industry inundated with collusion. [16] This evidence provides additional support for an inference of collusion on models' commissions.

[*46] Despite the artful innocent explanations that defendants have offered for their parallel pricing, and sworn testimony, expressly refuting that any conspiracy occurred, the fact that "associations are not walking conspiracies" [17] (*AD/SAT v. Assoc. Press, et al., 920 F. Supp. 1287, 1308 (S.D.N.Y. 1996)* (citation omitted), *aff'd,* 181 F.3d 216

---

[15] Notably, at an IMMA meeting on January 21, 1980, "all members were very much in favor of instituting" "an agreement among ourselves whereas any model debt will be honored by any agency in the event the model should switch agencies." Pl. Exh. 14 at EL 04086-04087. "John mentioned the procedure at Elite wherby [sic] all models sign a letter to this effect …" *Id.* at EL 04086.

[16] I find plaintiffs' reliance on *Fed. R. Evid. 404*, as the basis for which to allow evidence of collateral agreements to establish a conspiracy on models' commissions, to be inapposite. *Rule 404*, as an evidentiary rule, pertains to the *admissibility* of evidence, not to the *sufficiency* of evidence on a summary judgment motion in an antitrust case.

[17] *See In re Citric Acid Litig., 191 F.3d 1090, 1098 (9th Cir. 1999)*("Gathering information about pricing and competition in the industry is standard fare for trade associations. If we allowed conspiracy to be inferred from such activities alone, we would have to allow an inference of conspiracy whenever a trade association took almost any action. As the Supreme Court has recognized, however, trade associations often serve legitimate functions, such as providing information to industry members, conducting research to further the goals of the industry, and promoting demand for products and services."), citing *Maple Flooring Mfrs.*

(2d Cir. 1999)), and that HN20[] "the mere opportunity to conspire does not by itself support the inference that such an illegal combination actually occurred" (Capital Imaging, 996 F.2d at 545 (citation omitted)), when analyzed together, as it must be, the evidence of parallel pricing coupled with the evidence of discussions and agreements among association members, demonstrates a material issue of disputed fact as to whether IMMA members acted independently with regard to models' commissions. *See* In re Med. X-Ray Film Antitrust Litig., 946 F. Supp. at 220 ("Despite the plausibility of defendants' innocent explanations for the circumstantial evidence plaintiffs have presented when considered piece by piece, this evidence when taken in combination tends to exclude the possibility that **[*47]** defendants acted independently in setting their prices for medical x-ray film each year.").

Plaintiffs have established that all defendants who were members of IMMA, and therefore participated **[*48]** in or were privy to the conversations and agreements discussed above, "had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." Int'l Distribution Centers, Inc., 812 F.2d at 793. None of these defendants have sufficiently established, through their cessation of involvement in IMMA, that they withdrew from the alleged price-fixing conspiracy. Even the strongest cases, where certain defendants terminated their membership because they disagreed with particular agreements adopted by the association, do not establish such defendants' withdrawals from the alleged price-fixing conspiracy, as these contested agreements were collateral to the conspiracy on models' commissions. [18] **[*49]** Therefore, Ford's, G. Ford's, [19] Wilhelmina's, Elite's, Next's, IMG's, Click's, Images, and MMC's motions for summary judgment on plaintiffs' claim of a conspiracy to fix models' commissions are denied.

Despite the fact that HN24[] "once a conspiracy is shown, only slight evidence is needed to link another defendant with it" (Apex Oil Co., 822 F.2d at 257, quoting United States v. Wilkinson, 754 F.2d 1427, 1436 (2d Cir. 1985) (citations omitted)), there is still insufficient evidence to link Que to any illegal price-fixing scheme. It is undisputed that Que has never been a member **[*50]** of IMMA or MMC and has never even attended a meeting of either association. Further, plaintiffs fail to highlight any discussions that Que had with any of the other defendants, from which Que's participation in the alleged conspiracy could be inferred. Instead, plaintiffs argue that the fact that the contracts utilized by Que resembled the ones utilized by the other defendants, especially with regard to the classification of the companies as management rather than employment agencies, coupled with the concept that when Que opened in 1998, two of its employees had previously worked for management companies with ties to

Ass'n v. United States, 268 U.S. 563, 567, 69 L. Ed. 1093, 45 S. Ct. 578 (1925). Here, IMMA members engaged in significantly more than "gathering information about pricing and competition."

[18] *See* Drug Mart Pharm. Corp. v. Am. Home Prods. Corp., 288 F. Supp. 2d 325, 328-329 (E.D.N.Y. 2003) HN21[] ("To withdraw from a conspiracy, a defendant must show: (1) 'affirmative acts inconsistent with the object of the conspiracy,' that are (2) 'communicated in a manner reasonably calculated to reach co-conspirators.' United States v. United States Gypsum Co., 438 U.S. 422, 464-65, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978); Hyde v. United States, 225 U.S. 347, 369, 56 L. Ed. 1114, 32 S. Ct. 793 (1912). 'Mere cessation of activity is not enough.' United States v. Borelli, 336 F.2d 376, 388 (2d Cir. 1964); United States v. Greenfield, 44 F.3d 1141, 1149 (2d Cir. 1995). A defendant must take an affirmative action 'to disavow or defeat the purpose of the conspiracy,' United States v. Nerlinger, 862 F.2d 967, 974 (2d Cir. 1988) (quoting United States v. James, 609 F.2d 36, 41 (2d Cir. 1979)), 'to make sure that a withdrawal did occur and is not simply being invented ex post,' Greenfield, 44 F.2d at 1150. HN22[] Until affirmative evidence of withdrawal has been produced, a defendant's participation in the conspiracy is presumed to continue until the last overt act by any of the conspirators. United States v. Panebianco, 543 F.2d 447, 453 (2d Cir. 1976). The burden of demonstrating withdrawal lies on the defendant. *See* United States v. Berger, 224 F.3d 107, 118 (2d Cir. 2000); James, 609 F.2d at 41; Borelli, 336 F.2d at 388. Whether a defendant withdrew from a conspiracy is often a question of fact for the jury, *see, e.g.,* Panebianco, 543 F.2d at 454 n.5; Borelli, 336 F.2d at 390; however, when the material facts are not disputed, courts have decided the issue as a matter of law, *see, e.g.,* United States v. Goldberg, 401 F.2d 644, 648-49 (2d Cir. 1968); Morton's Mkt., Inc. v. Gustafson's Dairy, Inc., 198 F.3d 823, 839 (11th Cir. 1995) …").

[19] Because HN23[] a "corporate officer can also be held liable in civil antitrust actions" under Section One of the Sherman Act (New York ex rel. Spitzer v. Feldman, 01 Civ. 6691, 2003 U.S. Dist LEXIS 11759, at *8 (S.D.N.Y. July 10, 2003) (denying summary judgment for an individual dealer), citing 15 U.S.C. § 15c)), G. Ford may be held liable in his representative capacity. Notwithstanding G. Ford's assertions to the contrary (G. Ford Decl. PP 22, 37), the evidence discussed *supra,* in addition to G. Ford's concession that "only liars like competition" (Pl. Exh. 283 at 138:10-15), allows for a reasonable inference that G. Ford participated in the conspiracy.

IMMA and the alleged conspiracy, together establishes Que's involvement. [20] I disagree. Although plaintiffs assert that the two individuals who came to Que from other management companies, carried with them information about the price-fixing conspiracy and other illicit agreements, whereby infecting Que, plaintiffs offer no evidence to establish that these two individuals actually convinced Que to join the conspiracy, or for that matter, to act in any way upon any such information. While this Court credits plaintiffs' theory as credible, albeit a bit of a stretch, the **[*51]** inference urged by plaintiffs does not "tend to exclude the possibility that [Que was] acting independently in following the pricing pattern of the industry." *Monsanto Co. v. Spray-Rite Serv. Co., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. Therefore, Que's motion for summary judgment on plaintiffs' models' commissions claim, is granted.

b. *Conspiracy to Fix Client Service Fees*

Plaintiffs also seek to recover damages from defendants' alleged price-fixing conspiracy to fix, at an inflated rate, the service fee charged to clients (those who hired models), based on a theory that clients would have been more willing to pay plaintiffs a higher rate for their services had they not been charged an inflated fee by defendants. While there is evidence of significant inter-firm communication about instituting and raising client service **[*52]** charges, as demonstrated *supra,* plaintiffs are not the proper class to assert this claim.

HN25[] In order to recover for an alleged antitrust violation, a plaintiff must have suffered "the kind of injury that the antitrust laws were directed at." *G.K.A. Beverage Corp., et al. v. Honickman, et al., 55 F.3d 762, 766 (2d. Cir. 1995)*, citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. And, a plaintiff must have antitrust standing, which fails where "the indirectness of the asserted injury, the speculative nature of the damage theory, the risk of duplicative recoveries and the danger of complex apportionment" are at issue. *Triple M Roofing Corp. v. Tremco, Inc., 753 F.2d 242, 247 (2d Cir. 1985)*, citing *Assoc. Gen. Contractors v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. *See also* *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)* (indirect purchasers lack standing to recover for antitrust violations). In this case, the clients, as they were the parties directly charged the allegedly inflated service fees, not the models, whose injury, if any, is indirect and speculative, **[*53]** would be the proper plaintiffs.

> ***HN26***[] A customer of a customer who is overcharged … does not have antitrust standing … it is difficult to calculate the damages suffered by an indirect purchaser. The indirect purchaser is only damaged to the extent that the direct purchaser passes on to it the overcharge resulting from the anticompetitive conduct. Any such calculation would be imprecise and could result in double recovery if both the direct and indirect purchasers sue and the calculations in their suits differed.

Law Offices of Curtis V. Trinko, L.L.P., et al. v. Bell Atlantic Corp., 305 F.3d 89, 106 (2d. Cir. 2002), *rev'd and remanded on other grounds sub nom.* *Verizon Commns., Inc. v. Law Offices of Curtis V. Trinko, L.L.P., 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, citing *Illinois Brick, 431 U.S. at 737-47*.

In this case, as in *Illinois Brick,* the plaintiffs are not the direct victims, but rather seek damages based on an argument that overcharges have been passed down the stream. It is clear beyond cavil that the clients, whom defendants allegedly charged a fixed inflated service fee, suffered the most direct injury. Therefore, as **[*54]** indirect victims, plaintiffs lack antitrust standing to assert a claim that carries the potential for duplicative recovery. Further, plaintiffs' damage theory -- that clients would have been willing to pay more for their services, had they been charged less by defendants -- is highly speculative. This Court finds possible defendants' assertion that if defendants had not recouped this needed capital from their clients, by way of increased service fees, they would have looked to plaintiffs to supplement their profits, by way of further increases in commissions. While it is impossible to know with any definiteness exactly what would have ensued, had defendants not increased the service fees, one thing is clear -- and that is that any damage suffered by plaintiffs is wholly speculative. Therefore,

[20] Que contests both that its contracts parallel those of the other defendants and also that anyone on its staff was ever a former executive of any of the other defendants.

plaintiffs' claim that defendants conspired to fix the service charges invoiced to their clients is dismissed, as against all defendants, for lack of standing.

2. Rule of Reason Claims

HN27[] In the preponderance of cases (those not within the *per se* illegal categories), a plaintiff must establish an antitrust injury under the rule of reason. "Under this test plaintiff bears the initial burden **[*55]** of showing that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice." *Capital Imaging, 996 F.2d at 543* (emphasis in original). "The traditional indicators of an adverse effect [are] reduced output, increased price, or decreased quality …" *Commercial Data Servers, Inc. v. Int'l Bus. Machines Corp., 262 F. Supp. 2d 50, 78 (S.D.N.Y. 2003)*, citing *Virgin Atlantic Airways, Ltd., 257 F.3d at 264*. ***HN28***[] A plaintiff may establish antitrust injury by proving that the defendant possesses sufficient "market power" to hinder competition "on a market-wide basis." *Dresses For Less, Inc., 2002 U.S. Dist. LEXIS 18338, at *19*. "Such power is defined as the power to 'raise prices significantly above the competitive level without losing all of one's business.' *Id.,* citing *CDC Techs., Inc., 186 F.3d at 81*, quoting *Capital Imaging, 996 F.2d at 546*. ***HN29***[] Through requiring that a plaintiff demonstrate injury to a relevant market, the Sherman Act protects competition within a market, **[*56]** instead of "the individual competitors within that market." *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 96 (2d Cir. 1998)*, citing *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342-44, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*. Once a plaintiff has fulfilled its initial burden of proof, the burden shifts to the defendant to provide evidence of the "pro-competitive 'redeeming virtues' of their combination." *Capital Imaging, 996 F.2d at 543* (citation omitted). If the defendant can make this showing, the burden shifts back to the plaintiff "to demonstrate that any legitimate collaborative objectives proffered by defendant could have been achieved by less restrictive alternatives, that is, those that would be less prejudicial to competition as a whole." *Id.* (citations omitted).

HN30[] A Court's rule of reason analysis involves a weighing of harms and benefits in order to make a determination as to whether conduct "purports to promote or to destroy competition." *Capital Imaging, 996 F.2d at 543*.

> ***HN31***[] The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether **[*57]** it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, therefore reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Id., citing *Chicago Bd. of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*. ***HN32***[] "In carrying out a rule of reason analysis, 'the existence of (less restrictive) alternatives is obviously of vital concern in evaluating putatively anticompetitive conduct.'" *North Am. Soccer League, et al. v. Nat'l Football League, et al., 670 F.2d 1249, 1259 (2d Cir. 1982)*, citing *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 303 (2d Cir. 1979)*.

a. *Conspiracy* [*58] *to Evade Article 11*

Plaintiffs argue, in Count II of their complaint, as a separate and distinct Section One violation, that defendants conspired to evade Article 11, by collusively holding themselves out to be management companies, entitled to charge commissions greater than the ten percent cap imposed by Article 11. Although plaintiffs have, in their complaint, throughout the discovery process, and again in their summary judgment opposition, taken the position that this claim is also a *per se* violation (3d Am. Compl. P 109; Pl. 56.1 Opp. P 129 ("Market share is irrelevant in a per se case."); Oral Argument Transcript, 3/9/04 ("Oral Arg. Tr.") at 46:9-11), they have not provided any foundation for such an argument, either directly or by analogy. Because of their reliance on this position, plaintiffs have also failed to make the necessary showing required for a rule of reason claim, i.e., to define the relevant market, or demonstrate the anti-competitive effects of this alleged conspiracy. Summary judgment is granted for all defendants on plaintiffs' Count II claim, of a conspiracy to evade Article II (rather than a conspiracy to fix prices above ten percent which is subsumed **[*59]** in the surviving Count I) as a result of insufficient evidence.

b. *Conspiracy to Fix Terms and Conditions of Employment*

Similarly, to the extent that Count III of plaintiffs' complaint asserts, as a separate and distinct Sherman Act violation, a claim based on defendants' alleged conspiracy to fix various terms and conditions of models' employment, this claim also fails. Although it is difficult to make out exactly what claim Count III is asserting, it is clear that Count III does not purport to comprise a *per se* claim, and even alleges market power, a touchstone of a rule of reason claim. Therefore, as to this claim, plaintiffs have the burden of establishing the relevant market, and demonstrating the antitrust injury associated with the violation. However, as explained *supra,* plaintiffs fail to present any evidence to support a rule of reason claim. Therefore, to the extent that plaintiffs did not also voluntarily withdraw this claim at oral argument (Oral Arg. Tr. at 52:2-4) ("We'd be prepared, your Honor, not to proceed on Count 3 as a rule of reason claim in order to streamline the issues"), this claim is hereby dismissed as to all defendants. [21]

[*60] III. CONCLUSION

For the foregoing reasons, defendants' summary judgment motions are granted-in-part and denied-in-part. All of plaintiffs' claims against defendant Que are dismissed on the basis of insubstantial evidence to support an inference of Que's participation in any alleged conspiracies. Plaintiffs' Sherman Act claim, based on a conspiracy to fix client service fees, is dismissed against all defendants, on the basis of lack of standing. Further, plaintiffs' conspiracy to evade Article 11 claim is dismissed against all defendants, as it is either duplicative of plaintiffs' price-fixing claim, or insubstantially established pursuant to the rule of reason. Similarly, plaintiffs' claim of a conspiracy to fix the terms and conditions of models' employment, is dismissed as to all defendants for failure to substantiate the claim under the rule of reason. Finally, Plaintiffs' price-fixing models' commissions claim survives the motions to dismiss of all defendants other than Que. The Clerk is requested to close all motions made pursuant to *Rule 56*.

IT IS SO ORDERED.

March 29, 2004

Harold Baer, Jr.

U.S.D.J.

End of Document

[21] While this claim does not survive on its own, as discussed *supra,* evidence of agreements as to various terms and conditions of models' employment is admissible as probative of an agreement on models' commissions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A court considering a Fed. R. Civ. P. 12(b)(6) motion must assess the legal feasibility of the complaint. The court must determine not whether a plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support the claims. In assessing the adequacy of the complaint, the court must take all of the allegations contained therein as true and draw all reasonable inferences in favor of the plaintiff. A court may dismiss a complaint under Rule 12(b)(6) only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Regulated Practices, Private Actions**

In the context of antitrust cases, the generous approach to pleading continues to apply. Indeed, especially in antitrust cases, where the inquiries a court must conduct are often extremely fact-intensive, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly. Despite this deferential standard, conclusory allegations which merely recite the litany of antitrust will not suffice. Moreover, it is inappropriate for the court to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated antitrust laws in ways that have not been alleged.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN4[] **Vertical Restraints, Price Fixing**

Despite its broad language, the Sherman Act prohibits only contracts or agreements that unreasonably restrain trade. Courts analyze the legality of such agreements using one of two frameworks: either the per se approach, or the rule of reason. In general, there is a presumption against applying the per se rule. Courts should only apply the per se rule in limited circumstances when the agreement at issue is of the sort that has proven so manifestly anticompetitive in the past that because of its pernicious effect on competition and lack of any redeeming virtue is conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm it has caused or the business excuse for its use. Examples of per se unlawful conduct include horizontal and vertical price-fixing, and certain types of group boycotts. Absent these special circumstances, courts should conduct a rule of reason analysis and consider all of the circumstances of the case, such as the nature of the market and market participants involved, in determining whether the agreement at issue has an actual adverse effect on competition.

Evidence > ... > Illegally Obtained Evidence > Eavesdropping, Interception & Wiretapping > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Evidence > ... > Illegally Obtained Evidence > Eavesdropping, Interception & Wiretapping > General Overview

HN5[] **Vertical Restraints, Nonprice Restraints**

As a general matter, restrains imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints. An exclusive distribution arrangement, as it involves a vertical non-price restriction between a manufacturer and a distributor, is therefore typically analyzed under the rule of reason unless there is some evidence of price-fixing. This rule holds true even for "dual distribution" systems where the manufacturer supplies its product to wholesale distributors and also sells its product directly to retailers, thereby operating on two different market levels simultaneously.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Courts have refused to place exclusive distributorship agreements within the category of per se restraints not simply because they are vertical in nature, but because vertical restrictions on intrabrand competition often have the procompetitive effect of increasing interbrand competition in the relevant market. Vertical restrictions promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products. Moreover, the severity of the intrabrand competitive restrictions are kept in check by the manufacturers themselves, because manufacturers have an economic interest in maintaining as much intrabrand competition as is consistent with the efficient distribution of their products. Accordingly, manufacturers should be given wide latitude in determining the profile of its distributorships. Indeed, absent a showing of price-fixing or an anticompetitive effect on the market as a whole, run-of-the-mill exclusive distributorship agreements are presumptively legal. This presumption falls squarely in line with the general principle articulated by the United States Supreme Court at a very early stage in the development of ***antitrust law*** that a manufacturer is free to exercise his own independent discretion as to parties with whom he will deal.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Practices Governed by Per Se Rule, Boycotts**

The United States Supreme Court has warned against expanding the category of restraints classed as group boycotts, observing that courts should exercise great caution in extending per se analysis to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious. Precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Practices Governed by Per Se Rule, Boycotts**

The per se approach generally applies if a group boycott was not justified by plausible arguments that it was intended to enhance overall efficiency and make markets more competitive. A plaintiff seeking application of the per se rule must present a threshold case that the challenged activity falls into a category likely to have predominantly anticompetitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN9[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A conspiracy is horizontal in nature when a number of competitor firms agree with each other and at least one of their common suppliers or manufacturers to eliminate their price-cutting competition by cutting his access to supplies.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

HN10[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Manufacturers who wish to create an exclusive distributorship must be allowed to communicate with those distributors who will be a part of the distribution scheme. Moreover, it is not even inappropriate, absent evidence of price-fixing, if the impetus for the exclusive distributorship came from the distributors, rather than the manufacturer. Vertical restrictions employed to enforce an exclusive distributorship arrangement, sometimes called "anti-bootlegging" provisions, are not per se unlawful and do not convert the arrangement into an impermissible horizontal boycott among distributors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Evidence > ... > Illegally Obtained Evidence > Eavesdropping, Interception & Wiretapping > General Overview

HN11[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The decision to terminate a distributor in order to create an exclusive distributorship will be analyzed under the per se rule against price-fixing only if there is evidence of a further agreement on the price or price levels to be charged by the remaining dealers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In order for a price-fixing claim to survive, it is essential that plaintiffs properly define a relevant market where the alleged anticompetitive effects are being felt. The alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the cross-elasticity of demand -- and it must be plausible. Dismissal pursuant to *Fed. R. Civ. P. 12(b)(6)* is therefore appropriate if a complaint fails to allege facts regarding substitute products, to distinguish among apparently comparable products, or to allege other pertinent facts relating to the cross-elasticity of demand. At the same time, courts must remember that market definition is a deeply fact-intensive inquiry, and thus courts should hesitate to grant motions to dismiss for failure to plead a relevant product market. In general, courts have granted dismissals for failure to allege a relevant market in cases that have involved (1) failed attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) failure even to attempt a plausible explanation as to why a market should be limited in a particular way.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] Per Se Rule & Rule of Reason, Sherman Act

To state a claim for a rule of reason violation under *15 U.S.C.S. § 1*, a plaintiff must allege that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. Stated differently, the Sherman Act protects competition as a whole in the relevant market, not the individual competitors within that market. Furthermore, a plaintiff must also allege more than just an adverse effect on competition among different sellers of the same product ("intrabrand" competition). Rather, a plaintiff must demonstrate that the challenged actions diminish overall competition, and hence consumer welfare. A plaintiff can demonstrate an adverse effect on competition in one of two ways. Either it can show an actual adverse effect on competition, such as reduced output, or it can demonstrate adverse effect indirectly by establishing that the defendant had sufficient market power to cause an adverse effect on competition. If a plaintiff uses the latter method, however, they must allege more than just market power, but also that there are other grounds to believe that the defendant's behavior will harm competition market-wide, such as the inherently anticompetitive nature of defendant's behavior or the structure of the interbrand market.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN20[] **Robinson-Patman Act, Claims**

In order to state a claim of secondary-line price discrimination under *§ 2(a)* of the Robinson-Patman Act, plaintiffs must establish four facts: (1) that the seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition. A prohibited effect on competition may be inferred from evidence that an individual competitor suffered injury from a substantial price difference over time.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN21[] **Price Discrimination, Competitive Injuries**

Primary line price discrimination occurs where the seller's price discrimination harms other sellers. Secondary-line price discrimination occurs where the seller's price discrimination harms competition among the seller's customers.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Promotional Allowances & Services

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN22[] Robinson-Patman Act, Claims

Sections 2(d) and 2(e) of the Robinson-Patman Act prohibit indirect price discrimination in the form of advertising and other promotional allowances made available to purchasers on disproportionate terms.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN23[] Price Discrimination, Buyer Liability

In order for a buyer to be liable under § 2(f) of the Robinson-Patman Act for receiving an illegal price discrimination, the plaintiff must first show that the seller is liable under § 2(a) of the Act. Having adequately alleged a § 2(a) claim against the seller, the plaintiff must show that the buyer knowingly induced or received a discrimination in price which is prohibited. 15 U.S.C.S. § 13(f). The knowledge requirement may be satisfied by showing that the buyer had either actual knowledge, i.e., he or she must have known that the price in question was illegal, or constructive knowledge, i.e., he or she must have been reasonably cognizant of its illegality.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN24[] Business Torts, Fraud & Misrepresentation

Under New York law, to hold a defendant liable for fraud, a plaintiff must prove four elements: (1) a misrepresentation or a material omission of fact which was false and known to be false by defendant; (2) made for the purpose of inducing the other party to rely upon it; (3) justifiable reliance of the other party on the misrepresentation or material omission; and (4) injury.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN25[] Heightened Pleading Requirements, Fraud Claims

Fraud actions are also subject to the heightened pleading requirements of Rule 9(b), which require that the circumstances constituting fraud or mistake be stated with particularity. Fed. R. Civ. P. 9(b). The elements of knowledge or intent, however, may be alleged generally. Fed. R. Civ. P. 9(b).

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN26[] **Pleadings, Heightened Pleading Requirements**

To satisfy *Fed. R. Civ. P. 9(b)*'s particularity requirement, a plaintiff's complaint must: (1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent. Moreover, where multiple defendants are involved, the rule requires that the complaint allege facts that specify each defendant's connection to the fraud. The false representation need not have been made by the defendant personally. If he authorized and caused it to be made it is the same as though he made it himself. However, bare allegations that a defendant aided, abetted, assisted, connived with and acquiesced in the fraud are insufficient to state a cause of action.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN27[] **Contracts Law, Breach**

Under New York law, the elements of a tortious interference claim are: 1) the existence of a valid contract between the plaintiff and a third party; 2) defendant's knowledge of the contract; 3) defendant's intentional procurement of the third party's breach of contract; 4) actual breach of the contract, and 5) damages resulting from the breach. The plaintiff must allege each of these elements in a non-conclusory fashion in the complaint. If multiple contracts are at issue, the complaint must specify the particular contracts that have been interfered with by the defendant. The exact level of specificity, however, is not a settled matter. Nevertheless, it is clear that the plaintiff must present at least some specific facts which put the defendant on notice as to which contracts they are accused of interfering with.

Contracts Law > Breach > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN28[] **Contracts Law, Breach**

Where there is an existing, enforceable contract and a defendant's deliberate interference results in a breach of that contract, a plaintiff may recover damages for tortious interference with contractual relations even if the defendant was engaged in lawful behavior.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN29[] **Intentional Interference, Elements**

There are more demanding requirements for proving interference with prospective contractual relations and contracts that are terminable at will. In such contracts, a defendant's status as a business competitor may excuse him from liability for tortious interference, so long as the interference is intended at least in part to advance the competing interest of the interferer, no unlawful restraint of trade is effected, and the means employed are not wrongful. "Wrongful means" have been further defined as including physical violence, fraud or misrepresentation, civil suits and criminal prosecutions, and some degrees of economic pressure but not persuasion alone although it is knowingly directed at interference with the contract.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Contracts Law > Breach > Breach of Contract Actions > General Overview

Contracts Law > Breach > General Overview

HN30[] **Breach of Contract Actions, Elements of Contract Claims**

Under New York, California and Texas law, the essential elements of a breach of contract claim in federal court are: (1) the existence of an agreement, (2) adequate performance of the contract by the plaintiff, (3) breach of contract by the defendant, and (4) damages. Such elements need not be pleaded extensively or individually; they need only constitute a short and plain statement showing that the pleader is entitled to relief.

Opinion by: RAYMOND J. DEARIE

Opinion

[*382] **MEMORANDUM & ORDER**

DEARIE, District Judge.

This case focuses on allegedly anticompetitive conduct of a supplier and two distributors of home videos and digital video devices ("DVDs") in the United States. Plaintiffs Flash Electronics, Inc. ("Flash") and East Texas Distributing, Inc. ("ETD"), both wholesale distributors of videos and DVDs, claim that defendants Ingram Entertainment, L.L.C., Ingram Entertainment, Inc. (individually and collectively, "Ingram"), V.P.D. IV, Inc. and V.P.D., Inc. (individually and collectively, "VPD"), also wholesale distributors of videos and DVDs, have conspired with defendants Universal

Music & Video Corp. and Universal Studios Home Video, Inc. (collectively and individually, "Universal"), suppliers of videos and DVDs, to deny plaintiffs the right to distribute Universal videos and DVDs in violation of the antitrust laws. Plaintiffs **[**3]** claim that defendants' actions violated both *Sections 1and 2* of the Sherman Antitrust Act ("Sherman Act"), *15 U.S.C. §§ 1-2*, and the Robinson-Patman Act, *15 U.S.C. § 13*. Plaintiffs also assert state law causes of action for breach of contract, tortious interference with a contractual relationship, and fraud. Defendants bring this motion to dismiss all of plaintiffs' claims pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure.* For the reasons discussed below, defendants' motion is granted in part and denied in part.

BACKGROUND

Plaintiffs are two of the six major wholesale distributors of home videos and DVDs in the United States. Competitors Ingram and VPD are also among the six major national video distributors still in business. Universal, along with Sony, Paramount, Twentieth Century Fox, Time Warner and Disney, are the six major movie production studios in the country. Each of them produces and markets home videos and DVDs of motion pictures and television shows. To distribute their product, these studios supply videos and DVDs to wholesale distributors, such as plaintiff, who, **[**4]** in turn, sell or license them to retail outlets in the "sell-through" [1] and rental home video and DVD markets. Universal also sells its product directly to certain larger retail chains.

Plaintiffs assert that in the years prior to 2000, defendants Ingram and VPD began to pressure Universal to make them the exclusive distributors of Universal videos and DVDs in the United States. Plaintiffs contend that in September 2000 Ingram, VPD and Universal began negotiations to effectuate this plan. According to plaintiffs, the defendants met several times, in person and by telephone, and discussed plans concerning this venture. Plaintiffs specifically mention one meeting that allegedly took place at the Broadmoor Hotel in Colorado Springs, Colorado from **[*383]** September 18, 2000 to September 20, 2000. Am. Compl. P 65.

Plaintiffs maintain that defendants eventually reached an agreement that gave Ingram **[**5]** and VPD exclusive rights to distribute Universal Videos in the rental market. According to the complaint, Universal also entered into an agreement with Valley Media, Inc. ("Valley"), another wholesale distributor, giving it the right to distribute Universal videos and DVDs in the "sell-through" market. [2] Plaintiffs contend that the agreements required the distributors "to give certain exclusive and favorable terms to Universal over all other film studios," resulting in more active promotion of Universal products than those of other studios -- an arrangement that plaintiffs analogize to "favored nations" treatment. Id. P 72. Furthermore, according to plaintiffs, Universal's agreements with Ingram and VPD prohibited the two distributors from selling Universal products to plaintiffs. Id. P 76(d).

Once the agreements were completed, defendants allegedly **[**6]** began taking steps to implement their plan. Prior to terminating its agreements with Flash and ETD, Universal asked plaintiffs for confidential customer information supposedly to "better evaluate its business in order to best support the plaintiffs with future promotions." Id. P 66. Plaintiffs maintain, however, that Universal then passed this information along to Ingram and VPD, who contacted these retailers and told them that Flash and ETD were now "unauthorized" to sell Universal videos and DVDs -- a statement that Flash and ETD maintain was, at the time, a misrepresentation because their agreements with Universal had not yet been terminated. Id. PP 73-74, 76(c), 76(f)-(g). Plaintiffs also claim that defendants exerted further pressure on retailers by "bribing" them not to do business with plaintiffs in exchange for free Universal videos and DVDs, and by "coercing" them to agree to buy Universal product from defendants alone, and to agree not to sell Universal product to plaintiffs. Id. P 76(a)-(b), 76(e). Furthermore, plaintiffs claim that defendants threatened to interfere with their supply of films produced by "Dreamworks SKG," another movie studio, if plaintiffs **[**7]** continued to sell Universal products. Id. P 76(i)-(j).

---

[1] The "sell-through" market refers to videos and DVDs that are sold to customers of the retail outlets, as opposed to rented.

[2] Valley is not a defendant in this case. Plaintiffs allege upon information and belief that Ingram is in the process of purchasing Valley. Am. Compl. P 31.

In October 2000, Universal terminated its agreements with Flash and ETD. That same month, Ingram purchased a controlling interest in Major Video Concepts, which was, at the time, the second largest of the then eight national wholesale distributors. Plaintiffs allege that this transaction gave Ingram control over roughly 50% of the "video rental market channeled through distributors." Id. P 27. Plaintiffs also assert that VPD controls roughly 25% of the same market, giving the two companies a combined market share of 75%. Id. PP 28-29.

Plaintiffs contend that these agreements have had a profound effect on the wholesale distribution market for home videos and DVDs. According to plaintiffs, retailers prefer to buy videos and DVDs from wholesalers that can provide them with all of the product they require. Hence, those distributors who no longer can supply Universal videos and DVDs are at a distinct disadvantage. Id. PP 39-40. Plaintiffs assert that the effects are already being felt. According to plaintiffs, Valley has been eliminated from the wholesale video and DVD distribution market entirely, see id. **[*384]** P 32, **[**8]** [3] and Baker & Taylor, another wholesale distributor, has recently terminated several employees. Id. P 80. Moreover, plaintiffs assert that Ingram and VPD now possess a market share that allows them to inflate prices. By way of example, plaintiffs note that Universal submitted a June 2001 price quote to a Staten Island retailer for the film "Family Man" that was $ 10 above cost, whereas previously a comparable movie would have been quoted at roughly $ 1 above cost. Id. P 86.

Plaintiffs assert that the agreements between Universal, Ingram and VPD were calculated to eliminate competition in the video rental market and increase prices in violation of the antitrust laws. They claim that the defendants' agreements constitute a "group boycott" that is a per se violation of *Section **[**9]** 1 of the Sherman Act.* Additionally, plaintiffs contend that defendants have engaged in illegal "price-fixing," also a per se violation of *Section 1 of the Sherman Act.* Plaintiffs also claim that the agreements constitute a violation of *Section 1* under the "rule of reason." Furthermore, plaintiffs assert that the agreements threaten to create a monopoly in the video and DVD distribution market in violation of *Section 2 of the Sherman Act.* Plaintiffs also contend that defendants engaged in impermissible price discrimination under the *Robinson-Patman Act.* Finally, plaintiffs maintain that defendants' actions surrounding the termination of plaintiffs' written agreements with Universal support claims for breach of contract, tortious interference with a contractual relationship and fraud.

DISCUSSION

HN1[] A court considering a *Rule 12(b)(6)* motion must "assess the legal feasibility of the complaint." *Global Disc. Travel Servs., LLC. v. Trans World Airlines. Inc., 960 F. Supp. 701, 704 (S.D.N.Y. 1997)*. The court must determine "not whether a plaintiff will ultimately prevail, but whether the claimant is entitled to offer evidence to support the claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974).* **[**10]** In assessing the adequacy of the complaint, the court must take all of the allegations contained therein as true, *Hishon v. King & Spalding, 467 U.S. 69, 73, 104 S. Ct. 2229, 81 L. Ed. 2d 59 (1984)*, and draw all reasonable inferences in favor of the plaintiff. *Todd v. Exxon Corp., 275 F.3d 191, 197 (2d Cir. 2001)*; *Hamilton Chapter of Alpha Delta Phi, Inc. v. Hamilton Coll., 128 F.3d 59, 63 (2d Cir. 1997)*. A court may dismiss a complaint under *Rule 12(b)(6)* only if "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Todd, 275 F.3d at 197-98* (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80* (1957)).

HN2[] In the context of antitrust cases, the Second Circuit has stated that the "generous approach to pleading outlined in Conley v. Gibson" continues to apply. *Furlong v. Long Island Coll. Hosp., 710 F.2d 922, 927 (2d Cir. 1983)*; *Hamilton Coll., 128 F.3d at 63*; see also *Todd, 275 F.3d at 198* (quoting *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 554 (2d Cir. 1977)* **[**11]** ("[A] short plain statement of a claim for relief which gives notice to the opposing party is all that is necessary in antitrust cases, as in other cases under the Federal Rules.")). Indeed, especially in antitrust cases, where the inquiries a court must conduct are often extremely fact-intensive, "dismissals **[*385]** prior to giving the plaintiff ample opportunity for discovery should be

[3] Presumably plaintiffs are referring to Valley's presence in the video and DVD rental market, as they have alleged that Valley has the exclusive right to market Universal films in the "sell-through" market. Am. Compl. P 71.

granted very sparingly." Todd, 275 F.3d at 198 (quoting George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 139 (2d Cir. 1998)). Despite this deferential standard, "conclusory allegations which merely recite the litany of antitrust … will [not] suffice." Global Disc., 960 F. Supp. at 704 (quoting John's Insulation, Inc. v. Siska Constr. Co., 774 F. Supp. 156, 163 (S.D.N.Y. 1991)); see also Furlong, 710 F.2d at 927 (conclusory allegations cannot "substitute for minimally sufficient factual allegations"). Moreover, it is inappropriate for the court to assume that the plaintiff can "prove facts that it has not alleged or that the defendants have violated antitrust laws in ways that have not been alleged." Electronics Communications Corp. v. Toshiba Am. Consumer Prods., Inc., 129 F.3d 240, 243 (2d Cir. 1997) **[**12]** (quoting Associated Gen. Contractors, Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)).

A. Section 1 of the Sherman Act

Section 1 of the Sherman Act prohibits **HN3**[] "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." 15 U.S.C. § 1. **HN4**[] Despite its broad language, the Sherman Act prohibits only contracts or agreements that "*unreasonably* restrain trade." NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 133, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998) (emphasis in original). Courts analyze the legality of such agreements using one of two frameworks: either the per se approach, or the "rule of reason." See Virgin Atl. Airways Ltd. v. British Airways PLC, 257 F.3d 256, 263 (2d Cir. 2001); CDC Techs., Inc. v. IDEXX Lab., Inc., 186 F.3d 74, 79 (2d Cir. 1999); Capital Imaging Assocs. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537 (2d Cir. 1993). In general, there is a presumption against applying the per se rule. Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 726, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988); **[**13]** Bogan v. Hodgkins, 166 F.3d 509, 514 (2d Cir. 1999). Courts should only apply the per se rule in limited circumstances when the agreement at issue is of the sort that has proven so "manifestly anticompetitive" in the past that "because of [its] pernicious effect on competition and lack of any redeeming virtue [is] conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm [it has] caused or the business excuse for [its] use." Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977) (quoting Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)); accord Bogan, 166 F.3d at 514. Examples of per se unlawful conduct include horizontal and vertical price-fixing, and certain types of group boycotts. See Capital Imaging, 996 F.2d at 542-43. Absent these special circumstances, courts should conduct a rule of reason analysis and consider "all of the circumstances of [the] case," such as the nature of the market and market participants involved, in determining **[**14]** whether the agreement at issue has an actual adverse effect on competition. GTE Sylvania, 433 U.S. at 49.

1. Per Se Violations ("Group Boycott" and "Price Fixing")

Plaintiffs first argue that the agreements between Universal, Ingram and VPD are a per se unlawful horizontal "group boycott" designed to exclude competitors, such as plaintiffs, from the video and DVD wholesale market. Defendants, on the other hand, maintain that the decision to terminate plaintiffs as distributors of Universal product represented **[*386]** nothing more than a completely legal, and rather unremarkable, effort on the part of Universal to restructure its distribution system to grant exclusive distributorships in the wholesale market to Ingram and VPD. Defendants contend that the agreements are therefore more properly characterized as vertical agreements, which are not analyzed under the per se rule absent evidence of price-fixing. Furthermore, defendants argue that their exclusive distributorship agreements with Ingram and VPD have a procompetitive effect on the market by allowing Universal to benefit from a more dedicated sales force which vigorously promotes its product, and in **[**15]** the process, spurs interbrand competition. Accordingly, defendants maintain that these arrangements cannot be subject to per se condemnation.

HN5[] As a general matter, "restrains imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." Sharp Electronics, 485 U.S. at 730; Electronics Communications, 129 F.3d at 243. An exclusive distribution arrangement, as it involves a vertical non-price restriction between a manufacturer and a distributor, is therefore typically analyzed under the rule of reason unless there is some evidence of price-fixing. Id.; Westman Comm'n Co. v. Hobart Int'l. Inc., 796 F.2d 1216, 1224-25 (10th Cir. 1986); see also Sharp

Electronics, 485 U.S. at 735-36 ("[A] vertical restraint is not illegal per se unless it includes some agreement on price."). This rule holds true even for "dual distribution" systems, like the one set up between Universal, Ingram and VPD, where the manufacturer supplies its product to wholesale distributors and also sells **[**16]** its product directly to retailers, thereby operating on two different market levels simultaneously. *Electronics Communications, 129 F.3d at 243*; *Copy-Data Sys., Inc. v. Toshiba Am., Inc., 663 F.2d 405, 408-09 (2d Cir. 1981)*; *Beyer Farms, Inc. v. Elmhurst Dairy, Inc., 142 F. Supp. 2d 296, 302 (E.D.N.Y. 2001)*.

HN6[] Courts have refused to place exclusive distributorship agreements within the category of per se restraints not simply because they are vertical in nature, but because vertical restrictions on intrabrand competition often have the procompetitive effect of increasing interbrand competition in the relevant market. As the Supreme Court recognized in GTE Sylvania, "vertical restrictions promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products." *GTE Sylvania, 433 U.S. at 54*. Moreover, the severity of the intrabrand competitive restrictions are kept in check by the manufacturers themselves, because "manufacturers have an economic interest in maintaining as much intrabrand competition as is consistent with the efficient distribution of their **[**17]** products." *Id. at 56*; see also *Westman, 796 F.2d at 1226* ("The only real incentive a manufacturer has to restrict distribution of its product is to make its product more competitive."). Accordingly, manufacturers should be given "wide latitude in determining the profile of its distributorships." *Id. at 1225*. Indeed, the Second Circuit has stated that absent a showing of price-fixing or an anticompetitive effect on the market as a whole, run-of-the-mill exclusive distributorship agreements are "presumptively legal." *IDEXX Lab., 186 F.3d at 80*; *Electronics Communications, 129 F.3d at 245*. This presumption falls squarely in line with the general principle articulated by the Supreme Court at a very early stage in the development of ***antitrust law*** that a manufacturer is free "to exercise **[*387]** his own independent discretion as to parties with whom he will deal." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

Plaintiffs attempt to circumvent these principles by characterizing the agreements between the defendants as a horizontal group boycott. Essentially, **[**18]** plaintiffs argue that Ingram and VPD, who are horizontal competitors, conspired to eliminate their rivals and either pressured or enlisted the support of Universal to achieve this goal, all in an attempt to gain market share and increase prices. See Am. Compl. PP 55-58. Plaintiffs also allege that the three defendants had several conversations by telephone and met in mid-September 2000 in order to advance their conspiracy. See id. PP 64-65. Finally, plaintiffs make several allegations that defendants improperly interfered with plaintiffs' business relationships with their retail customers by spreading false information about plaintiffs' authority to carry Universal product before they were, in fact, terminated by Universal as distributors. See id. PP 73-74, 76(f)-(g). Plaintiffs cite several cases in support of their position in which courts applied the per se rule despite the fact that the conspiracy in question was not exclusively horizontal. See, e.g., *Rossi v. Standard Roofing, Inc., 156 F.3d 452 (3d Cir. 1998)*; *Big Apple BMW, Inc. v. BMW of North Am., Inc., 974 F.2d 1358 (3d Cir. 1992)*; *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 **[**19]** (1966)*; *Klor's. Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*.

Yet even assuming that the events transpired as plaintiffs contend, an assumption the Court must make at this stage, the allegations in the complaint cannot sustain a group boycott claim meriting the application of the per se rule. ***HN7***[] The Supreme Court has warned against expanding "the category of restraints classed as group boycotts," observing that courts should exercise great caution in extending per se analysis "to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious." *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 458-59, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. The Second Circuit has echoed that caution, while noting that "the scope of the per se rule against group boycotts is a recognized source of confusion in ***antitrust law***." *Bogan, 166 F.3d at 515*. The Supreme Court has more recently stated that "precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors. **[**20]** " *NYNEX, 525 U.S. at 135*. Defendants argue, and at least one court in this Circuit has agreed, that only when there is evidence that an agreement is "attributable solely" to horizontal competitors, having been conceived without the input of a party higher up in the distribution chain, will the per se rule apply. *PepsiCo. Inc. v. Coca-Cola Co., 114 F. Supp. 2d 243, 259 (S.D.N.Y. 2000)*.

Here, plaintiffs' allegations do not fit this entirely horizontal scenario. Rather, the allegations in the complaint seem to suggest that the alleged conspiracy was hatched by all three defendants. Indeed, plaintiffs suggest that Universal harbored improper motives even before Ingram and VPD approached it. The amended complaint alleges that Universal desired "to control distribution of videos and DVDs in the market place, gain an unfair advantage over Universal's competitors [and] fix prices." Am. Compl. P 54. Furthermore, plaintiffs allege that Universal entered into the agreements with Ingram and VPD "[to] reduce or eliminate competition at the distribution level" so that it could "raise prices of Universal product above the **[*388]** then current market level." Id. **[**21]** P 55. These allegations seem to suggest that the agreement was not "attributable solely" to horizontal competitors. See *PepsiCo. 114 F. Supp. 2d at 259*. However, it is at least possible to interpret the complaint as alleging a conspiracy first devised by Ingram and VPD, and then expanded to include Universal as a party necessary to effectuate the plan. As the Court must grant plaintiffs every favorable inference at the motion to dismiss stage, *Todd, 275 F.3d at 197*, it would be inappropriate to dismiss the claim on this ground. [4]

[22]** Nevertheless, plaintiffs' per se group boycott claim fails for a different reason -- there exists a compelling procompetitive reason for the agreements between Universal, Ingram and VPD. In *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)*, the Supreme Court laid out some basic principles governing the application of the per se approach to boycott cases. Among the factors to consider, the Court noted that ***HN8***[] the per se approach generally applies if the boycott "[was] not justified by plausible arguments that [it was] intended to enhance overall efficiency and make markets more competitive." *Id. at 294*. The Court further counseled that "[a] plaintiff seeking application of the per se rule must present a threshold case that the challenged activity falls into a category likely to have predominantly anticompetitive effects." *Id. at 298*. The Supreme Court in NYNEX endorsed this same approach, approving of the Second Circuit's decision to allow the defendants to justify the boycott before it would apply the per se rule. See *NYNEX, 525 U.S. at 135.* **[**23]**

In this case, plaintiffs themselves admit that there is a procompetitive justification for the agreements among Universal, Ingram and VPD. The amended complaint states, "Universal's agreements with Ingram, VPD (and Valley (in the sell-through market only)) require distributors to give certain exclusive and favorable terms to Universal over all other film studios including a dedicated sales force for Universal product and requires [sic] these distributors to pay for promotions, advertising, mailer pages and brand managers which are costs customarily paid by the studios themselves ...." Am. Compl. P 72. Insisting on a sales force that promotes one manufacturer's product over another is exactly the sort of arrangement that generates interbrand competition that benefits the market. See, e.g., *Hendricks Music Co. v. Steinway, Inc., 689 F. Supp. 1501, 1514 (N.D. Ill. 1988)*. The existence of this procompetitive effect is enough to take this case out of the category of a per se unlawful group boycott and into the realm of rule of reason analysis. See *Bogan, 166 F.3d at 514* ("Absent a showing that a presumption of anticompetitive effect is appropriate, **[**24]** we apply the rule of reason.").

The cases cited by plaintiffs do not suggest a contrary result. *General Motors*, *Big Apple BMW*, *Klor's* and *Rossi* all involved **[*389]** manifestly anticompetitive behavior on the part of the defendants to eliminate a price-cutting competitor. As the Rossi court summarized, "the common principle we glean from [General Motors, Big Apple BMW and Klor's] is that ***HN9***[] a conspiracy is horizontal in nature when a number of competitor firms agree with each other and at least one of their common suppliers or manufacturers to eliminate their *price-cutting* competition by cutting his access to supplies." *Rossi, 156 F.3d at 462* (emphasis added). In applying this principle to the facts of that case, the Rossi court once again reiterated that the fact that defendants were "driving a price-cutting competitor out of business" was critical to its decision that application of the per se rule was appropriate. *Id. at 464*. Here, by contrast, plaintiffs have made no allegations that they were price-cutters. Accordingly, these cases do not support

[4] The Court does not read *PepsiCo* to require that a group boycott be exclusively horizontal in nature for the per se rule to apply. This interpretation would call into doubt several seminal group boycott cases, cited by plaintiffs, which applied the per se rule to boycotts involving parties on different levels of the distribution chain. See, e.g., *United States v. General Motors, 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. Rather, the Court reads PepsiCo to stand for the proposition that the boycott must *originate* among the horizontal competitors. To the extent that the defendants are arguing the former interpretation, the Court rejects that position.

their contention that the Court should apply the per se rule. Indeed, there **[**25]** is nothing in these cases that demonstrates to the Court that the alleged agreements between Universal, Ingram and VPD should be analyzed as anything other than a "presumptively legal" exclusive distributorship arrangement.

Finally, it is worth noting that plaintiffs' other allegations do not counsel in favor of applying the per se rule. For example, there is nothing inherently suspect about the alleged meeting between the defendants at the Broadmoor Hotel. ***HN10***[] Manufacturers who wish to create an exclusive distributorship must be allowed to communicate with those distributors who will be a part of the distribution scheme. See *Business Electronics, 485 U.S. at 726* (courts should not find evidence of an antitrust violation in "legitimate communication between a manufacturer and its distributors"). Moreover, it is not even inappropriate, absent evidence of price-fixing, if the impetus for the exclusive distributorship came from the distributors, rather than the manufacturer. See, e.g., *Electronics Communications, 129 F.3d at 245*. Finally, there is nothing inherently improper about defendants' alleged efforts "to prevent retailers and foreign distributors **[**26]** from selling Universal product to the plaintiffs." Am. Compl. P 76(e). Vertical restrictions employed to enforce an exclusive distributorship arrangement, sometimes called "anti-bootlegging" provisions, are not per se unlawful and do not convert the arrangement into an impermissible horizontal boycott among distributors. See *Sports Center, Inc. v. Riddell, Inc., 673 F.2d 786, 791 (5th Cir. 1982)*. For all of these reasons, even assuming the facts in the complaint are true, it would not be appropriate to apply the per se rule governing group boycotts to the agreements at issue in this case.

Plaintiffs also fail to allege facts to support a per se unlawful price-fixing claim. ***HN11***[] The decision to terminate a distributor in order to create an exclusive distributorship will be analyzed under the per se rule against price-fixing only if there is evidence of "a further agreement on the price or price levels to be charged by the remaining dealers." *Business Electronics, 485 U.S. at 726*. Plaintiffs have not adequately advanced such claims. Plaintiffs do make several conclusory allegations that defendants were engaged in "price-fixing." See, e. **[**27]** g., Am. Compl. P 53 ("Universal sought to … fix prices."), P 87 ("Defendants Ingram and VPD have acquiesced and/or agreed affirmatively and/or impliedly to fix, control, stabilize, maintain or raise prices."), P 90 ("Universal (as the seller) and Ingram/VPD (as buyers) agreed to fix, control, stabilize and/or raise the prices at which the buyers will resell Universal's product."). As already stated, "conclusory allegations which merely recite the litany of antitrust … **[*390]** will [not] suffice." *Global Disc., 960 F. Supp. at 704* (quoting *John's Insulation, Inc. v. Siska Constr. Co., 774 F. Supp. 156, 163 (S.D.N.Y. 1991))*. The only factual allegations contained in the complaint that arguably relate to possible price-fixing is that the prices of Universal videos have risen. See Am. Compl. PP 76(h), 85, 86. Plaintiffs specifically allege, as an example, that a Staten Island retailer received a price quote from Ingram for the Universal picture "Family Man" at $ 10 above cost, whereas the rate for this type of film prior to the defendants' agreements would have been approximately $ 1 above cost. Id. P 86. However, alleging that prices have risen **[**28]** is not the same as alleging that there is a separate agreement on price levels between Universal, Ingram and VPD. As the Supreme Court noted in Business Electronics, virtually all vertical restraints "can be attacked as designed to allow existing dealers to charge higher prices." *Business Electronics, 485 U.S. at 728*. It was for this very reason that the Supreme Court required a showing of an additional agreement on price levels for the per se rule to apply. See id. (if all agreements that spawned price increases were per se illegal "manufacturers would be likely to forgo legitimate and competitively useful conduct rather than risk [antitrust damages]"). Plaintiffs have not alleged sufficient facts to establish that any such agreement existed. Accordingly, the Court finds no basis in the complaint to allow plaintiffs' *Section 1* claim to proceed under a theory of per se price-fixing.

2. *Rule of Reason*

The Court now focuses on whether the plaintiffs have adequately alleged a violation of *Section 1* under the rule of reason. Defendants assert that plaintiffs' allegations are insufficient for two reasons. First, they argue that plaintiffs have **[**29]** failed to adequately define a relevant market, without which it is impossible to assess any potential anticompetitive effects. Second, defendants maintain that, even if plaintiffs have sufficiently alleged a relevant market, the facts they have alleged do not establish that there has been any anticompetitive effect on the market as a whole. Rather, defendants assert that the only effect on the market that plaintiffs have alluded to is that the prices of Universal videos have risen. According to defendants, this establishes at most that the exclusive distributorship arrangement may have reduced *intrabrand* competition, as opposed to interbrand competition, which is what

antitrust law is designed to protect. Thus, defendants argue that absent any factual allegations in the complaint establishing that the agreements harmed interbrand competition, plaintiffs' rule of reason claim must be dismissed.

HN12[] In order for the claim to survive, it is essential that plaintiffs properly define a relevant market where the alleged anticompetitive effects are being felt. See *Carell v. Shubert Org., Inc., 104 F. Supp. 2d 236, 264 (S.D.N.Y. 2000)*; *Global Disc., 960 F. Supp. at 704*; **[**30]** *Re-Alco Indus., Inc. v. Nat'l Ctr. For Health Educ., Inc., 812 F. Supp. 387, 391 (S.D.N.Y. 1993)*. The alleged product market "must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the cross-elasticity of demand -- and it must be plausible." *Todd, 275 F.3d at 200* (internal quotation marks and citations omitted). [5] Dismissal pursuant **[*391]** to *Rule 12(b)(6)* is therefore appropriate "if a complaint fails to allege facts regarding substitute products, to distinguish among apparently comparable products, or to allege other pertinent facts relating to the cross-elasticity of demand." *Re-Alco, 812 F. Supp. at 391*; accord *Beyer Farms, Inc. v. Elmhurst Dairy, Inc., 142 F. Supp. 2d 296, 303 (E.D.N.Y. 2001)*; *Carell, 104 F. Supp. 2d at 264*; *Global Disc., 960 F. Supp. at 705*. At the same time, courts must remember that "market definition is a deeply fact-intensive inquiry," and thus courts should "hesitate to grant motions to dismiss for failure to plead a relevant product market." *Todd, 275 F.3d at 199-200*; **[**31]** see also *PepsiCo, Inc. v. Coca-Cola Co., Inc., 1998 U.S. Dist. LEXIS 13440, No. 98 Civ. 3282, 1998 WL 547088, at *6 (S.D.N.Y. Aug. 27, 1998)* (because defining a relevant market involves a factual inquiry, "motions to dismiss in this context … may be granted only if the alleged market makes no economic sense under any set of facts") (internal quotation marks omitted). In general, courts have granted dismissals for failure to allege a relevant market in cases that have involved "(1) failed attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) failure even to attempt a plausible explanation as to why a market should be limited in a particular way." *Todd, 275 F.3d at 200*.

[32]** In this case, plaintiffs suggest several possible markets. Many of these fall into the first category of insufficient allegations outlined in Todd. For example, in their brief and at oral argument, plaintiffs attempted to argue that "[a] single movie" or "a single supplier's movies" can be a market. Pls.' Mem. of Law in Opp. at 20; Tr. of Oral Argument at 26-27. Plaintiffs assert that because each movie is a unique product, it has no adequate substitute, and therefore defendants are immune to the downward pressure on price caused by interbrand competition, which in a properly functioning market, would lead consumers to switch brands in response to an increase in price. By way of example, plaintiffs contend that if consumers wanted to see "Jaws" (a Universal movie) on video, they would not be content to rent "Piranha" (not a Universal movie) instead simply because they are both movies about killer fish. Am. Compl. P 23.

This is exactly the sort of argument courts have routinely rejected in the past. See, e.g., *Hack v. President & Fellows of Yale Coll., 237 F.3d 81, 86-87 (2d Cir. 2000)* (finding that although a Yale education is undoubtedly unique, there are **[**33]** many colleges and universities that provide top quality education which plaintiffs could have selected); *Carell, 104 F. Supp. 2d at 264-66* (the make-up designs and other intellectual property from the musical "Cats," though unique, do not constitute their own market); *Theatre Party Assocs. Inc. v. Shubert Org., Inc., 695 F. Supp. 150, 154-55 (S.D.N.Y. 1988)* (finding no plausible explanation "why other forms of entertainment, namely other Broadway shows … are not adequate substitute products [for "Phantom of the Opera"]"); see also *Global Disc., 960 F. Supp. at 705* (finding that plaintiff's contention that a consumer "is 'locked into' Pepsi because she prefers the taste, or NBC because she prefers 'Friends,' 'Seinfeld,' and 'E.R.'" was unconvincing). That each movie is unique is undisputed. However, as these cases indicate, the simple fact that a particular product is unique does not mean that it is its own market. See *Carell, 104 F. Supp. 2d at* ***[*392]*** *265* (plaintiff must allege "a plausible basis for finding the [specific product] is a 'market unto [itself]'). "Jaws" is no more unique to movie enthusiasts than "Phantom **[**34]** of the Opera" is to theater patrons. Although a particular customer may have his heart set on renting "Jaws," it is highly likely that, if it is unavailable, he will select a different title, perhaps one that does not

[5] "Cross-elasticity of demand" refers to "the extent to which consumers will change their consumption of one product in response to a price change in another." *PepsiCo. Inc. v. Coca-Cola Co., Inc., 1998 U.S. Dist. LEXIs 13440, No. 98 Civ. 3282, 1998 WL 547088, at *5 (S.D.N.Y. Aug. 27, 1998)* (quoting *Eastman Kodak v. Image Technical Servs., 504 U.S. 451, 469, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*).

even involve killer fish at all. Thus, the Court finds that plaintiffs have failed to support their contention that each Universal video constitutes a relevant market. [6] For similar reasons, the Court also rejects plaintiffs' attempts to define the relevant market as all movies produced by Universal. See *Carell, 104 F. Supp. 2d at 265* ("The law is clear that the distribution of a single brand, like the manufacture of a single brand, does not constitute a legally cognizable market."); accord *Global Disc., 960 F. Supp. at 705*; *Re-Alco, 812 F. Supp. at 391*.

[35]** Despite these failed attempts, the Court finds that plaintiffs' complaint, read broadly, does identify a relevant market. Although the complaint does not specifically mention a "relevant product market," or devote a particular section to defining its parameters, the complaint does reference "the rental and 'sell-through' home video and DVD markets in the United States," Am. Compl. P 19, "the wholesale distribution market for 'sell-through' and rental movie videos and DVDs in the United States," id. P 22, and "the video rental market channeled through wholesale distributors." Id. P 28. Taken together, these references do comprise a potentially viable relevant market, best summarized in paragraph 22 as "the wholesale distribution market for 'sell-through' and rental movie videos and DVDs in the United States." Id. P 22.

Identifying the contours of the relevant market, however, is only the first step of the process. Plaintiffs must also address why certain products are not adequate substitutes, and are thus not part of the relevant market. See, e.g., *Todd, 275 F.3d at 200* (complaint must address "interchangeability of use or the cross-elasticity of demand" **[**36]** to adequately allege a relevant market). As the complaint defines the relevant market as all videos and DVDs sold by wholesalers in the United States, defendants contend that plaintiffs, at a bare minimum, must discuss why the manufacturers (i.e., the studios) themselves are not contained within this market. Defendants argue that because the studios engage in direct marketing of their films, as well as marketing through distributors, plaintiffs must address why retail video shops would not buy their movies directly from the studios if the distributors raised their prices. According to defendants, the complaint fails to do this.

The court does not agree. Plaintiffs have alleged that "in order to save time and expense, retailers historically tend to purchase product from those wholesale distributors that are capable of supplying all product available through wholesale distribution as opposed to purchasing product piece-meal from different wholesale distributors." Am. Compl. P 39. Thus, plaintiffs have posited that retailers engage in a form of "one-stop shopping" in **[*393]** purchasing their videos, and that there are compelling business reasons for doing so. Although the complaint does not **[**37]** specifically indicate that it would be prohibitively expensive for a retailer to begin buying directly from a studio, plaintiffs have provided at least a "plausible" reason why retailers would not respond to an increase in the prices charged by wholesale distributors by switching to direct dealing with the studios. See *Todd, 275 F.3d at 200* (to survive a motion to dismiss, a plaintiff must provide a "plausible explanation as to why a market should be limited in a particular way"). [7]

[38]** In this respect, this case is similar to PepsiCo. In that case, PepsiCo accused Coca-Cola of actual or attempted monopolization of the fountain-dispensed soft-drink industry. See *PepsiCo, 1998 U.S. Dist. LEXIS 13440, 1998 WL 547088, at *4*. In its complaint, PepsiCo defined the relevant product market "not [as] the market for soft-drinks, or fountain-dispensed soft drinks, but rather [as] the market for 'fountain-dispensed soft drinks *distributed through foodservice distributors.*" *1998 U.S. Dist. LEXIS 13440, [WL] at *9* (emphasis in original). In

[6] Plaintiffs' reliance on *United States v. Loew's Inc., 371 U.S. 38, 83 S. Ct. 97, 9 L. Ed. 2d 11 (1962)* is misplaced. Although the Loew's Court affirmed that a copyrighted film is entitled to a presumption of uniqueness, that case focused on whether a court could infer the presence of market power from ownership of a particular copyright in analyzing the legality of "block-booking" practices -- a form of tying arrangement. See *id. at 48-50*. The case contains no general discussion of whether each film constitutes its own market. Hence, the Court sees no direct support in Loew's for plaintiffs' position.

[7] Moreover, it is worth noting that, although Universal markets its movies directly to major retail chains such as Blockbuster and Hollywood Video, see Pls.' Mem. of Law in Opp. at 21, there is no indication that Universal would sell its films directly to smaller retail outlets if it were approached. Indeed, it seems likely that the reason Universal employs a dual distribution system is so that marketing to smaller retailers, and the considerable time and effort that it takes, may be handled by intermediate distributors who have built up business relationships and networks with these smaller shops.

response to Coca-Cola's argument that PepsiCo had failed to allege a relevant market by limiting it in this way, the court found that "the complaint posits that the buyers in question have real efficiency-based reasons to take delivery of all of their supplies, including fountain syrup, from foodservice distributors; the complaint maintains that for these customers delivery through other means simply will not do." Id. So, too, in this case, plaintiffs have alleged an efficiency-based reason for looking to wholesale distributors to supply all of their videos. [8] Hence, this is not a case where the plaintiffs have entirely failed to explain why certain alternative **[**39]** sources of supply are not part of the relevant market. See *Beyer Farms, 142 F. Supp. 2d at 303-04*. In so finding, however, the Court expresses no opinion as to whether the market, as alleged by plaintiffs, is ultimately viable or not. Indeed, plaintiffs have a difficult task before them. Nevertheless, the Court's focus at this stage is on the complaint alone, and while plaintiffs' presentation on the issue is admittedly thin, the Court cannot say that they have failed to allege a relevant product market.

[40]** ***HN13***[] To state a claim for a rule of reason violation under *Section 1*, a plaintiff must also allege that "the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice." *Tops Markets, Inc. v. Quality Markets. Inc., 142 F.3d 90, 96 (2d Cir. 1998)* (quoting **[*394]** *Capital Imaging, 996 F.2d at 543*); accord *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 127 (2d Cir. 1995)*. Stated differently, "the Sherman Act protects competition as a whole in the relevant market, not the individual competitors within that market ...." *Tops Markets, 142 F.3d at 96*. Furthermore, a plaintiff must also allege "more than just an adverse effect on competition among different sellers of the same product ('intrabrand' competition) ...." *K.M.B. Warehouse, 61 F.3d at 127*; *Electronics Communications, 129 F.3d at 245*. Rather, a plaintiff must demonstrate that the challenged actions "diminish overall competition, and hence consumer welfare." *K.M.B. Warehouse, 61 F.3d at 128* **[**41]** (quoting *Graphic Prods. Distribs. v. Itek Corp., 717 F.2d 1560, 1571, 1573* (llth Cir. 1983)). A plaintiff can demonstrate an adverse effect on competition in one of two ways. Either it can show "an actual adverse effect on competition, such as reduced output," or it can "demonstrate[] 'adverse effect' indirectly by establishing that [defendant] had sufficient market power to cause an adverse effect on competition." *Tops Markets, 142 F.3d at 96*. If a plaintiff uses the latter method, however, they must allege more than just market power, but also that "there ... [are] other grounds to believe that the defendant's behavior will harm competition market-wide, such as the inherently anticompetitive nature of defendant's behavior or the structure of the interbrand market." *K.M.B. Warehouse, 61 F.3d at 129*.

Here, defendants argue that plaintiffs have alleged only that the prices of Universal videos have increased, and therefore they have not alleged any harm to interbrand competition. The Court disagrees. Plaintiffs' complaint contains the following allegation, "the price affect [sic] that the defendants' actions have and will have **[**42]** on the video and DVD industry is corroborated by numerous video retailers, including those represented by the Pudget Sound Alliance, Video One Buying Group and New England Buying Group, who have acknowledged the detrimental affect [sic] on market prices resulting from the fact that the Universal agreements with Ingram, VPD and Valley has made the industry non-competitive." Am. Compl. P 85. This allegation does not specifically limit itself to the prices of Universal videos alone, but rather seems to indicate that the prices of all videos have been rising since the creation of the challenged agreements. Thus, plaintiffs have indeed alleged an actual injury to interbrand competition.

Nevertheless, even assuming that defendants are correct that only the prices of Universal videos are rising and that, as a result, the restrictions are strictly intrabrand, the Court is not convinced that such a trend could never give rise to an antitrust violation. Though undoubtedly more focused on protecting interbrand competition, antitrust laws are not entirely unconcerned with intrabrand restraints. As the Eleventh Circuit stated in Graphic Products:

[8] Defendants cite PepsiCo in support of their position, asserting that the court held that distribution of fountain-dispensed soft drinks by independent foodservice distributors was not a relevant market. However, defendants cite the court's decision concerning Coca-Cola's *summary judgment* motion. See *PepsiCo, 114 F. Supp. 2d at 247-58*. At that point, the court had before it sufficient evidence, elicited through discovery, to be able to evaluate the alleged relevant market and determine whether it was, indeed, viable. By contrast, at the motion to dismiss stage, the court felt unable to hold that the market was inadequately alleged. See *PepsiCo, 1998 U.S. Dist. LEXIS 13440, 1998 WL 547088, at *12*.

> The argument … that the reduction **[**43]** or elimination of intrabrand competition is, by itself, never sufficient to show that a trade restraint is anticompetitive must rest, at bottom, on the view that intrabrand competition -- regardless of the circumstances -- is never a significant source of consumer welfare. This view is simply not supported by economic analysis, or by the cases. A seller with considerable market power in the interbrand market -- whether stemming from its dominant position in the market structure or from successful differentiation of its products -- will necessarily have some power over price. In that situation, intrabrand competition will be a significant source of consumer welfare **[*395]** because it alone can exert downward pressure on the retail price at which the good is sold.

Graphic Prods., 717 F.2d at 1572 n.20. In this case, plaintiffs have alleged that Ingram and VPD combined have a significant market share of 75% of the wholesale video and DVD distribution market, indicating substantial market power. See *K.M.B. Warehouse, 61 F.3d at 129* ("Market share may be used as a proxy for market power."). Moreover, plaintiffs have alleged that Ingram and VPD stand to **[**44]** gain an ascendent position in the wholesale video distribution market by virtue of their exclusive right to sell Universal videos. See Am. Compl.P 43 ("Without access to the supply of product from a major studio, such as Universal, a wholesale distributor will lose a substantial amount of its customers."). Thus, the structure of the interbrand market for wholesale videos may indeed be such that intrabrand competition is necessary to avert market-wide anticompetitive effects. See *Graphic Prods., 717 F.2d at 1572 n.20*.

Defendants contend that if prices of Universal videos go up, retailers either will decide to take advantage of the higher prices by purchasing more copies and marketing them to customers more aggressively in order to reap higher returns, or will simply elect to buy fewer copies of Universal films, and push lower-priced brands. See V.P.D. Reply Brief at 9. This may indeed be the case. Nevertheless, a court may dismiss a complaint only if "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Todd, 275 F.3d at 197-98* (quoting *Conley, 355 U.S. at 45-46*). **[**45]** At this point in the litigation, there is at least a possibility that plaintiffs will be able to demonstrate a rule of reason violation. Accordingly, the Court must allow them to proceed with this claim.

B. Section 2 of the Sherman Act

Section 2 of the Sherman Act states in pertinent part:

> ***HN14***[] Every person who shall monopolize, or attempt to, monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony.

15 U.S.C. § 2. As is apparent from the language of the statute, *Section 2 of the Sherman Act* prohibits ***HN15***[] three separate offenses: monopolization, attempted monopolization, and conspiracy to monopolize. See *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. ***HN16***[] To state a claim for monopolization, plaintiffs must allege "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic **[**46]** accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997)*. ***HN17***[] To state a claim for attempted monopolization, plaintiffs must allege "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, 506 U.S. at 456*; *Tops Markets, 142 F.3d at 99-100*. In determining whether there is a "dangerous probability" of success, courts must evaluate "defendant's economic power in the relevant market." *Id. at 100*. Finally, ***HN18***[] to state a claim for conspiracy to monopolize, plaintiffs must allege "(1) concerted action, (2) overt acts in furtherance of the conspiracy, **[*396]** and (3) specific intent to monopolize." *Santana Prods., Inc. v. Sylvester & Assocs., Ltd. 121 F. Supp. 2d 729 (E.D.N.Y. 1999)*.

Plaintiffs maintain that they have alleged facts to support all three claims. In response, defendants first argue that plaintiffs' *Section 2* claims must be dismissed because **[**47]** they have failed to allege a relevant market for the same reasons expressed in defendants' challenge to their *Section 1* claims. As the Court has determined that plaintiffs' complaint sufficiently alleges a relevant market, this argument is unavailing. Nevertheless, defendants' alternative argument -- that the *Section 2* claims must be dismissed because they allege, at most, a "shared monopoly" between Ingram and VPD -- is persuasive. Defendants correctly point out that neither Universal, Ingram nor VPD individually can be considered to have monopoly power in the relevant market. Universal is only one of six major studios who supply movies to wholesale video distributors. [9] Plaintiffs allege that Ingram has a market share of roughly 50% of the wholesale video distribution market, while VPD has approximately a 25% market share. Am. Compl. PP 101-02. It is only when their market shares are combined to reach roughly 75% does the percentage approach a level that may give rise to an inference of market power necessary to sustain a *Section 2* claim. See *Tops Markets, 142 F.3d at 99* (quoting *Broadway Delivery Corp. v. United Parcel Serv. of America, Inc., 651 F.2d 122, 129 (2d Cir. 1981)* **[**48]** ("Sometimes, but not inevitably, it will be useful to suggest that a market share below 50% is rarely evidence of monopoly power, a share between 50% and 70% can occasionally show monopoly power, and a share above 70% is usually strong evidence of monopoly power.")). Moreover, while not specifically mentioning the term "shared monopoly," a fair reading of the complaint indicates that plaintiffs' *Section 2* claims are framed in terms of a "shared monopoly." See Am. Compl. P 107 ("Upon information and belief, Ingram and VPD will soon control nearly all of the U.S. video rental market ...."). Accordingly, the success of plaintiffs' *Section 2* claims rises and falls on the viability of the "shared monopoly" theory.

[49]** The idea of a "shared monopoly" giving rise to *Section 2* liability repeatedly has been received with skepticism by courts who have squarely addressed the issue. See, e.g., *Santana Prods., 121 F. Supp. 2d at 737-38* (rejecting plaintiff's claim of conspiracy to form a shared monopoly); *Sun Dun, Inc. of Washington v. Coca-Cola Co., 740 F. Supp. 381 (D. Md. 1990)* (noting that the idea of a "shared monopoly" giving rise to *Section 2* liability is contrary to the legislative history of the Sherman Act which indicates that "the concept of 'monopoly' did not include 'shared monopolies' or 'oligopolies' at all, but rather the complete domination of a market by a *single* economic entity"); *Consol. Terminal Sys., Inc. v. ITT World Communications, Inc., 535 F. Supp. 225 (S.D.N.Y. 1982)* (rejecting outright the argument that a "shared monopoly" can give rise to a *Section 2* violation). Thus, while some learned commentators **[*397]** have advanced the argument that *Section 2* may be invoked against "shared monopolies" in certain situations, see P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 810 (1996) (cited in *Santana Prods., 121 F. Supp. 2d at 737*), **[**50]** courts have yet to embrace this theory.

With respect to plaintiffs' claims of actual or attempted monopolization, ***HN19***[] the Second Circuit has specifically indicated that it will not entertain arguments based on a "shared monopoly" theory of liability. See *H.L. Hayden Co. of New York, Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005 (2d Cir. 1989)* (stating that "the district court correctly concluded that the market shares of [defendants] could not be aggregated to establish an attempt to monopolize in violation of Sherman Act section 2, *15 U.S.C. § 2 (1982)*"); *Kramer v. Pollock-Krasner Found., 890 F. Supp. 250, 256 (S.D.N.Y. 1995)* (citing Hayden for the proposition that "allegations of a shared monopoly, i.e., that the defendants' combined market power constitutes monopolization or attempted monopolization of the relevant market … do not constitute a violation of *Section 2*"); see also *Consol. Terminal, 535 F. Supp. at 228-29* ("An oligopoly, or a shared monopoly, does not itself violate *§ 2 of the Sherman Act.* Rather, in order to sustain a charge of monopolization or attempted monopolization, a plaintiff must **[**51]** allege the necessary market domination of a particular defendant."). Hence, these claims must be dismissed.

The Second Circuit has not squarely addressed the question of whether a "shared monopoly" theory of liability is viable in the context of a claim of conspiracy to monopolize. See *Santana Prods., 121 F. Supp. 2d at 737*. Those courts that have considered this issue have expressed similar doubts as to its persuasiveness, but have stopped short of rejecting it entirely. The court in Sun Dun stated that a claim of conspiracy to form a shared monopoly may be viable "if the aim of the conspiracy is to form a single entity to possess the illegal market power." *Sun Dun, 740*

---

[9] Plaintiffs' argument that Universal can be considered a monopolist because it controls 100% of Universal products is meritless. As the Fifth Circuit has stated, "obviously, every manufacturer has a natural monopoly over the distribution of its products. That monopoly, however, does not contravene the antitrust laws." *Riddell, 673 F.2d at 791* (citing *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. Moreover, as previously explained, the relevant market in this case is not Universal products; it is "the wholesale distribution market for 'sell-through' and rental movie videos and DVDs in the United States." Am. Compl. P 22.

F. Supp. at 391-92. The court in Santana Products took a somewhat broader view, stating that "a claim for conspiracy to monopolize may also be stated where two or more competitors seek to allocate a market and exclude competitors, even if they do not form a single corporate entity." *Santana Prods., 121 F. Supp. 2d at 740 n.1*. In this case, plaintiffs have alleged that "upon information and belief, Ingram and VPD have entered into agreements not to compete **[**52]** with each other over certain large customer accounts." Am. Compl. P 105. Even if the Court were to adopt the broader view of Santana Products, alleging that Ingram and VPD agreed to divvy up a few accounts is not the same as alleging that they agreed to allocate the entire wholesale video and DVD distribution market amongst themselves. The allegations are therefore insufficient to allege a claim of conspiracy to form a "shared monopoly" even under the most permissive interpretation of the theory's viability. Accordingly, the Court dismisses this claim.

C. Robinson-Patman Act

Plaintiffs allege several claims under the Robinson-Patman Act. First, plaintiffs assert that Universal violated section 2(a) of the Robinson-Patman Act, *15 U.S.C. § 13(a)*, by selling its product to plaintiffs' competitors at a lower price than it charged plaintiffs. Second, plaintiffs allege that Universal violated sections 2(d) and 2(e) of the Robinson-Patman Act, *15 U.S.C. §§ 13(d)* &*(e)*, by providing subsidies, incentives and other forms of preferential treatment to plaintiffs' competitors that were not made available to plaintiffs. Finally, plaintiffs **[**53]** claim that Ingram and VPD violated section 2(f) of the Robinson-Patman Act, *15 U.S.C. § 13(f)*, by knowingly **[*398]** inducing and receiving discriminatory prices on Universal product.

1. Section 2(a)

Plaintiffs' *section 2(a)* claim involves allegations of secondary-line price discrimination. [10] ***HN20***[] In order to state a claim of secondary-line price discrimination under *section 2(a)*, plaintiffs must establish four facts: "(1) that seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition." *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 141 (2d Cir. 1998)*. A prohibited effect on competition may be inferred from evidence that an individual competitor suffered injury from "a substantial price difference over time." *Id. at 142* (discussing *FTC v. Morton Salt Co., 334 U.S. 37, 46-47, 68 S. Ct. 822, 92 L. Ed. 1196, 44 F.T.C. 1499 (1948))*.

[54]** Defendants make several arguments that the pleadings are inadequate to state a price discrimination claim. While there is no question that the pleadings are thin with respect to the price discrimination claims; the Court finds that they ultimately survive. Defendants first assert that plaintiffs have not established "a clear link between the timing and location of any competition and the timing and location of the alleged price discrimination." *United Magazine Co. v. Murdoch Magazines Distribution, Inc., 146 F. Supp. 2d 385, 396 (S.D.N.Y. 2001)*. In Murdoch, the various competitors each had a distinct territory in which they operated. Because the plaintiffs lumped together all of the defendants in their allegations, it was unclear whether the plaintiffs did in fact compete with any particular defendant. Hence, the Court concluded that plaintiffs had to be more specific as to the timing and location of the alleged price discrimination in order to state a claim under the Robinson-Patman Act. In this case, it is clear that plaintiffs were competitors of Ingram and VPD in the national market for wholesale video distribution. Plaintiffs therefore need not be any more **[**55]** specific than they already have with respect to this point.

Defendants also argue that plaintiffs have not adequately alleged that the products at issue were of "like grade and quality." Defendants attempt to use plaintiffs' own theory of the case against them by asserting that if, as plaintiffs claim, each video is a unique product, plaintiffs must then allege that Universal charged different distributors

---

[10] ***HN21***[] Primary line price discrimination occurs where the seller's price discrimination harms other sellers. Secondary-line price discrimination occurs where the seller's price discrimination harms competition among the seller's customers - in this case, the wholesale distributors. See *George Haug Co. v. Rolls Royce Motor Cars, Inc., 148 F.3d 136, 141 n.2 (2d Cir. 1998)*

different prices for individual, specific movies. Plaintiffs instead have included only general allegations that Universal sold "its product" at lower prices to plaintiffs' competitors.

Although this is a clever argument, the Court has already rejected the notion that each video is a unique product. Moreover, it appears from the language "its product" that plaintiffs are alleging that *all* of the products Universal made available to wholesale distributors it sold to Ingram and VPD at lower prices. It seems indisputable that the "grade and quality" of the entire Universal video collection made available to one wholesale distributor is of the same grade and quality as the entirety made available to another wholesale distributor-indeed, **[*399]** it is the same collection of Universal videos. **[**56]** Accordingly, this argument fails.

Finally, defendants claim that plaintiffs have not adequately alleged that the purported price discrimination was "sustained and substantial." In Haug, the Court found that it was necessary for a complaint to allege a "substantial and sustained price differential" to survive a motion to dismiss. *Haug, 148 F.3d at 144*. However, the court did not find this requirement to be onerous. While the plaintiff in Haug "[did] not detail the amount and degree of the price discrimination," it did allege that it was "injured during the 4 years prior to its termination." *Haug, 148 F.3d at 144* (internal quotations omitted). Such a recitation was deemed "adequate to withstand *Fed.R.Civ.P. 12(b)(6)* dismissal." Ibid.

Plaintiffs allege that "for a period of several years, on more than two occasions and to more than one distributor, including but not necessarily limited to the period of approximately 1998-2000, Universal sold its product to wholesale distributors at a cheaper price than sold to the plaintiffs." Compl. P 141. The complaint also states that "plaintiffs' cost for Universal **[**57]** product was significantly higher than their competition due to Universal's unfair treatment." Compl. P 143. Such statements seem to describe price discrimination that is at least as "sustained and substantial" as that detailed in Haug, It is therefore sufficient to withstand a motion to dismiss.

2. Sections 2(d) and 2(e)

Sections 2(d)and 2(e) of the Robinson-Patman Act ***HN22***[] "prohibit indirect price discrimination in the form of advertising and other promotional allowances made available to purchasers on disproportionate terms." *Haug, 148 F.3d at 144*. Plaintiffs allege that Universal paid Ingram and VPD more money to advertise its product and offered them rebates and incentive programs that were not offered to plaintiffs, see Compl. PP 142-44. Defendants argue that plaintiffs have not specifically alleged that any benefit Universal provided to Ingram and VPD was not also made available to plaintiffs on the same terms. Plaintiffs simply may not have availed themselves of the benefits, qualified for volume discounts by purchasing enough product, or purchased the products that had the largest promotions, defendants suggest. Def. Universal's Memo of Law at 20. **[**58]** Citing Bouldis v. U.S. Suzuki Motor, defendants assert that a plaintiff who does not take advantage of such promotions or who fails to satisfy the requirements for obtaining these concessions cannot make out a price discrimination claim. *Bouldis v. U.S. Suzuki Motor Corp., 711 F.2d 1319, 1326 (6th Cir.1983)*.

Defendants are correct in their assertion of the law. [11] However, their characterization of plaintiffs' pleading is not entirely accurate. Plaintiffs have in fact stated with specificity that concessions made available to Ingram and VPD were not made available to them. In their description of the Universal rebate program in which they participated, for example, plaintiffs state that "if other distributors failed to achieve the goal for entitlement to the rebate, these distributors were afforded rebates *at times when plaintiffs were **[*400]** not."* Amend. Comp. P 142(b) (emphasis added). In the next paragraph, they describe being shut out of another program: "Universal also gave programs to plaintiffs' competitors in which if the competitors reached a certain level of sales they get a certain amount of money per tape. These so-called 'focus programs' were not given **[**59]** to the plaintiffs." Amend. Complaint P 142(c).

[11] But see *FTC v. Morton Salt Co., 334 U.S. 37, 92 L. Ed. 1196, 68 S. Ct. 822, 44 F.T.C. 1499 (1948)* (holding that quantity discounts that appear on the face of things to be "available" to all buyers may not functionally be available to many smaller buyers). Flash and FTD are arguably "smaller buyers" in comparison to Ingram and VPD, who according to plaintiffs' complaint, control approximately 50% and 25% of the market for wholesale distribution of video rentals. Amend. Comp. PP 27-28.

Lastly, they allege that "Universal gave a disproportionate amount of 'free goods' to plaintiffs' competitors." Amend. Comp. P142(e).

As the wording of each of these allegations suggests, these were programs and benefits that plaintiffs believed they were equally qualified for and entitled to, but which were not made available to them on an equal basis. Defendants present the possibility that plaintiffs were not entitled to these benefits; however, at the motion to dismiss stage, such factual **[**60]** arguments are inapposite. Plaintiffs simply need to satisfy the pleading requirements of alleging that these allowances and reimbursements were not made available to them on a "proportionally equal basis." *15 U.S.C. § 13(d)*; *O'Connell v. Citrus Bowl, 99 F.R.D. 117, *120 (E.D.N.Y.1983)*. Plaintiffs have satisfied this burden. As a result, this claim also survives the motion to dismiss.

3. Section 2(f)

HN23[] In order for a buyer such as Ingram or VPD to be liable under *section 2(f)* for receiving an illegal price discrimination, plaintiffs must first show that the seller is liable under *section 2(a)*. See *Great Atl. & Pac. Tea Co., Inc. v. FTC, 440 U.S. 69, 77, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*. Having adequately alleged a *section 2(a)* claim against Universal, plaintiffs must show that Ingram and VPD "knowingly [induced] or received a discrimination in price which is prohibited." *15 U.S.C. § 13(f)*. The knowledge requirement may be satisfied by showing that the buyer had "either actual knowledge, i.e., he or she must have known that the price in question was illegal, or constructive knowledge, i.e., he or **[**61]** she must have been reasonably cognizant of its illegality." *Hygrade Milk & Cream Co. v. Tropicana Prods., Inc., 1994 U.S. Dist. LEXIS 1091, No. 88 Civ. 2861, 1994 WL 38549, at *3 (S.D.N.Y. Feb. 4, 1994)* (citing *Automatic Canteen Co. v. FTC, 346 U.S. 61, 79-80, 73 S. Ct. 1017, 97 L. Ed. 1454, 49 F.T.C. 1763 (1953))*.

As to this claim, the language of the plaintiffs' complaint is admittedly thin, straying into the realm of conclusory statements that do little more than parrot the language of the statute. Plaintiffs only allege the following: "VPD and Ingram knowingly induced Universal and/or received a discrimination in price in violation of *15 U.S.C.A. Section 13*." Compl. P 146. Plaintiffs do not specifically state how the Court might infer knowledge of the price discrimination from Ingram and VPD's "trade experience" or other behavior. See *Automatic Canteen, 346 U.S. at 79-82*. Nevertheless, it is well settled that a court should dismiss a complaint under *Rule 12(b)(6)* only if "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Todd, 275 F.3d at 197-98*. Plaintiffs' **[**62]** claim does not appear so bare or meritless as to fail this minimal test. Indeed, when considering plaintiffs' 2(f) claim together with the totality of the complaint, it seems plausible to the Court that plaintiffs could adduce evidence of Ingram and VPD's knowing receipt of lower-priced videos from Universal. Plaintiffs' allegation earlier in the complaint that Ingram and VPD "jointly control in excess of 75% of the video rental market channeled through distributors" (Amend. Comp. P 29) certainly bespeaks a significant degree of "trade experience," **[*401]** and the allegation that "for a period of several years, defendants Ingram and VPD encouraged and applied pressure on Universal to make them exclusive distributors of Universal product in the U.S. rental market, at the exclusion of the Plaintiffs" suggests that Ingram and VPD acted intentionally to induce preferred status with Universal. Drawing all inferences in favor of the plaintiff, the Court concludes that these allegations collectively are sufficient for the *2(f)* claim to survive a motion to dismiss. [12]

---

[12] Defendants also raise a series of other objections to plaintiffs'*2(f)* claim. First, they allege that plaintiffs do not mention them specifically by name in their allegations, instead referring to "wholesale distributors" and "plaintiffs' competitors." While it is true that plaintiffs do not refer to defendants by name in each of their allegations, plaintiffs do refer to them frequently enough throughout the section that a reader, especially a reader who was drawing inferences in favor of the plaintiff, could easily understand the defendants to be the subjects of the claims. Moreover, in plaintiffs' *2(f)* allegation in P 146, Ingram and VPD are mentioned specifically by name.

Next, defendants allege that plaintiffs cannot raise a *§ 2(f)* claim on the basis of a violation of *§ 2(d)* or *§ 2(e)*. While courts are split on whether a *§ 2(f)* claim can be derived from §§ *2(d)-(e)* violations (see *Murdoch, 2001 U.S. Dist. LEXIS 20878, 2001 WL 1607039 (S.D.N.Y.2001)*; but see *Intimate Bookshop, 88 F. Supp.2d 133 (S.D.N.Y.2000))*, such a charge is mooted by the fact that plaintiffs' have also successfully raised a *§ 2(a)* claim, from which a *§ 2(f)* claim can indisputably be derived.

[63]** *D. State Law Claims*

Plaintiffs also allege that defendants committed common law fraud and misrepresentation, tortious interference with business contracts, and breach of contract. Defendants assert that plaintiffs have failed to state claims in each of these areas.

I. Fraud and Misrepresentation

Plaintiffs allege that in an effort "to gain unfair advantage over its competitors and to assist Ingram, VPD and Valley to gain market share over plaintiffs," defendant Universal fraudulently induced plaintiffs to turn over confidential customer information. Amend. Compl. P 117. On August 28, 2000, Universal purportedly e-mailed plaintiffs requesting substantial information about plaintiffs' retail customers, including sales totals, units sold, gross and net revenues and returns. Amend. Comp. P 114. Universal told plaintiffs that it was soliciting such information for the purpose of "better understanding our business" and "to better evaluate our goal setting process so that we can set more accurate BPIs [i.e., percentage of Universal's business by the distributor] for you on our future promotions." Amend. Comp. P 115. The complaint alleges that this proffered purpose was **[**64]** false. Amend. Comp. P 116. The true purpose was to facilitate defendants Ingram and VPD in their goal of "weakening or eliminating Flash and ETD as wholesale distributors in the video and DVD market." Amend. Comp. P 120. Indeed, after plaintiffs relied on Universal's statement and provided the requested information to Universal, the complaint alleges that Ingram and VPD began contacting plaintiffs' customers, who were previously unknown to them, and solicited their business. Amend Comp. P 122. Defendants Ingram and VPD moreover informed plaintiffs' customers **[*402]** that plaintiffs were no longer authorized to supply Universal products even during a time when plaintiffs' contracts with Universal were still intact. Amend. Comp. PP 122-23. As a result of all of these actions by defendants, plaintiffs allege that they suffered loss of customers and damage to their reputation. Amend. Comp. PP 124-25.

Defendant Universal does not contest the sufficiency of this claim in their motion to dismiss. The more difficult question is whether plaintiffs have adequately stated a claim of fraud and misrepresentation against defendants Ingram and VPD. Ingram and VPD have contested the sufficiency of plaintiffs' **[**65]** fraud claims, arguing that plaintiffs have not alleged any facts indicating that either of them engaged in, induced or authorized the alleged fraud or misrepresentation.

HN24[🡅] Under New York law, to hold a defendant liable for fraud, a plaintiff must prove four elements: (1) a misrepresentation or a material omission of fact which was false and known to be false by defendant; (2) made for the purpose of inducing the other party to rely upon it; (3) justifiable reliance of the other party on the misrepresentation or material omission; and (4) injury. See *AUSA Life Ins. Co. v. Ernst and Young, 206 F.3d 202, 208 (2d Cir.2000)* (citing *Lama Holding Co. v. Smith Barney, Inc., 88 N.Y.2d 413, 421, 646 N.Y.S.2d 76, 668 N.E.2d 1370 (1996))*. ***HN25***[🡅] Fraud actions are also subject to the heightened pleading requirements of *Rule 9(b)*, which require that "the circumstances constituting fraud or mistake ... be stated with particularity." *Fed.R.Civ.P. 9(b)*. The elements of knowledge or intent, however, may be alleged generally. *Fed.R.Civ.P. 9(b)*.

HN26[🡅] To satisfy *Rule 9(b)*'s particularity requirement, a plaintiff's **[**66]** complaint must: "(1) specify the statements that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements were made, and (4) explain why the statements were fraudulent." *Stevelman v. Alias Research Inc., 174 F.3d 79, 84 (2d Cir.1999)* (quoting *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1175 (2d Cir.1993))*. Moreover, where multiple defendants are involved, the rule requires that the complaint allege facts that specify each defendant's connection to the fraud. See *DiVittorio v. Equidyne Extractive Indus., 822 F.2d 1242, 1247 (2d*

Lastly, defendants assert that plaintiffs have not alleged that the purported price differentials granted to Ingram and VPD were not justified by Universal's need to meet the price of its competitors. While "meeting the competition's price" is admittedly an affirmative defense for sellers under *§§ 2(a), (d)and (e)*, it is irrelevant to a buyer's defense under *§ 2(f)* and particularly irrelevant at the motion to dismiss stage.

Cir.1987). It is well-settled that the false representation need not have been made by the defendant personally. "If he authorized and caused it to be made it is the same as though he made it himself." Voisin v. Providence Washington Insurance Co., 51 A.D. 553, 559, 65 N.Y.S. 333 (1st Dep't 1900), quoting Brackett v. Griswold, 112 N.Y. 454, 467, 20 N.E. 376 (3d Dep't 1889)). However, bare allegations that a defendant "aided, abetted, assisted, connived with and acquiesced in" the fraud are insufficient to state a cause of action. Halperin v. Lieberman, 271 A.D. 878, 66 N.Y.S.2d 78, 79 **[**67]** (2d Dep't 1946).

Again drawing all inferences in favor of the plaintiff, this Court finds that plaintiffs have satisfied the pleading requirements regarding Ingram and VPD, albeit barely. Plaintiffs have specified the statements they contend were fraudulent-namely the e-mails requesting customer information for helping plaintiffs with future promotions, identified Universal as the so-called "speaker," detailed that the statements were made via e-mail on August 28, 2000, and explained why the statements were fraudulent. Furthermore, plaintiffs go beyond bare allegations to describe Ingram and VPD's connection to the fraud, specifying how Ingram and VPD "conspired to elicit information from the plaintiffs about plaintiffs' customers **[*403]** and … used that information to steal plaintiffs' clients by using plaintiffs' customer information to contact and solicit plaintiffs' customers …." Amend. Comp. P 77(g). See also Amend. Comp. PP 117, 120-25. Such an allegation of a conspiracy between all three defendants and the subsequent use by Ingram and VPD of the fruits of Universal's statement suggest that Ingram and VPD prompted Universal to make the fraudulent statement in the first place. **[**68]** As a result, plaintiffs have satisfied their burden of pleading their fraud claim against Ingram and VPD with particularity, and the claim survives the motion to dismiss with respect to all three defendants.

2. Tortious Interference with a Contractual Relationship

Plaintiffs have also asserted a tortious interference claim against all three defendants. According to plaintiffs, defendants Ingram and VPD intentionally induced Universal to breach its dealer/supplier contracts with plaintiffs through two means: 1) by threatening that all wholesale distributors would go out of business due to an oversaturated distributors market if they were not granted exclusive distributorships, leaving Universal with no distributors for its products, and 2) through offers of special treatment if granted the exclusive distributorships. Additionally, all three defendants allegedly used "threats, bribery, defamation and/or coercion" to induce numerous retailer-customers of plaintiffs to terminate their relationships with plaintiffs. Amend. Comp. P 131. As a result, plaintiffs assert that their business contracts were damaged in excess of $ 30 million. Amend. Comp. PP 132-33. Defendants maintain **[**69]** that plaintiffs have failed to allege the requisite elements of a tortious interference claim, and therefore their claim should be dismissed.

HN27[] Under New York law, the elements of a tortious interference claim are: 1) the existence of a valid contract between the plaintiff and a third party; 2) defendant's knowledge of the contract; 3) defendant's intentional procurement of the third party's breach of contract; 4) actual breach of the contract, and 5) damages resulting from the breach. Trionic Assocs., Inc. v. Harris Corp., 27 F. Supp.2d 175, 184 (E.D.N.Y.1998), *aff'd, 198 F.3d 235 (2d Cir.1999)*; Lama Holding Co. v. Smith Barney, Inc., 88 N.Y.2d 413, 646 N.Y.S.2d 76, 668 N.E.2d 1370, 1375 (N.Y.1996). Plaintiffs must allege each of these elements in a non-conclusory fashion in their complaint. World Wide Communs. v. Rozar, 1997 U.S. Dist. LEXIS 20596, No. 97 Civ. 1056, 1997 WL 795750, at *6 (S.D.N.Y. 1997). If multiple contracts are at issue, the complaint must specify the particular contracts that have been interfered with by defendants. See Campo v. 1st Nationwide Bank, 857 F. Supp. 264, 273 (E.D.N.Y. 1994); Quail Ridge Assoc. v. Chemical Bank, 162 A.D.2d 917, 558 N.Y.S.2d 655, 658 **[**70]** (3d Dept.), *appeal dismissed, 76 N.Y.2d 936, 563 N.Y.S.2d 64, 564 N.E.2d 674 (1990)*. The exact level of specificity, however, is not a settled matter. See World Wide Communs., 1997 U.S. Dist. LEXIS 20596, 1997 WL 795750 at *6-7 (holding that the absence of factual allegations as to the underlying contracts, such as the parties to the contracts, the terms of the contracts, and whether or not they were terminable at will, led the court to dismiss the tortious interference claim. However, the Court went on to state: "We do not mean to suggest that all of these facts are necessary given our liberal rules, see Fed.R.Civ.P. 8."). Nevertheless, it is clear that plaintiffs must present at least some specific facts which put defendants on notice as to which contracts they are accused of interfering with.

[*404] Perhaps the thorniest issue in a tortious interference claim is the question of what specifically constitutes improper interference. One begins the analysis by drawing a distinction between interference with existing contracts and interference with prospective contracts or contracts that are terminable at will. (See Restatement, Torts 2d, *§ 768* **[**71]** , for the proposition that contracts terminable at will are treated like prospective contractual relations.) It is much easier for a plaintiff to prove improper interference with existing contracts. Plaintiffs simply need to prove the above-stated five elements, and defendants are not afforded the excuse that they were acting as business competitors in procuring the breach. *Guard-Life Corp. v. S. Parker Hardware Manufacturing Corp., 50 N.Y.2d 183, 191, 406 N.E.2d 445, 428 N.Y.S.2d 628 (1980)*. Or as NBT Bancorp stated, ***HN28***[] "Where there is an existing, enforceable contract and a defendant's deliberate interference results in a breach of that contract, a plaintiff may recover damages for tortious interference with contractual relations even if the defendant was engaged in lawful behavior." *NBT Bancorp Inc. v. Fleet/Norstar Financial Group, Inc., 87 N.Y.2d 614, 664 N.E.2d 492, 641 N.Y.S.2d 581, 585 (1996)*. [13]

[72]** ***HN29***[] There are "more demanding requirements," however, for proving interference with prospective contractual relations and contracts that are terminable at will. *Guard-Life, 50 N.Y.2d at 191*. In such contracts, a defendant's status as a "business competitor" may excuse him from liability for tortious interference, so long as the "interference is intended at least in part to advance the competing interest of the interferer, no unlawful restraint of trade is effected, and the means employed are not wrongful." *Guard-Life, 50 N.Y.2d at 191*. "Wrongful means" have been further defined as including "physical violence, fraud or misrepresentation, civil suits and criminal prosecutions, and some degrees of economic pressure" but not "persuasion alone although it is knowingly directed at interference with the contract." *Guard-Life, 50 N.Y.2d at 191*, *aff'd. by* *NBT Bancorp, 87 N.Y.2d 614, 624, 664 N.E.2d 492, 641 N.Y.S.2d 581*. Such a differentiation between interference with existing contracts and interference with prospective and terminable contracts has been justified as striking a balance between "respect for individual contract rights" and the "public benefit **[**73]** to be derived from unfettered competition." *Guard-Life, 50 N.Y.2d at 191*.

In applying the law to the facts of our case, we first assess plaintiffs' contracts with Universal and then plaintiffs' contracts with their retailer-customers.

a. Plaintiffs' contracts with Universal

Plaintiffs have generally alleged that all three defendants tortiously interfered **[*405]** with their dealer/supplier contracts with Universal. As a preliminary matter, this claim as brought against Universal must be dismissed. Indeed, as Universal has correctly asserted, there can be no liability for tortiously interfering with one's own contract. See *Koret, Inc. v. Christian Dior, S.A., 161 A.D.2d 156, 554 N.Y.S.2d 867 (1990)* (holding that only a stranger to a contract can be liable for tortious interference with that contract); *Kosson v. "Algaze", 203 A.D.2d 112, 610 N.Y.S.2d 227, 228 (1994)*, aff'd, *84 N.Y.2d 1019, 622 N.Y.S.2d 674, 646 N.E.2d 1101 (1995)*; *Mackie v. La Salle Indus., Inc., 92 A.D.2d 821, 460 N.Y.S.2d 313, 316 (1983)*.

However, plaintiffs' claims against Ingram and VPD survive. To begin, defendants do not dispute that **[**74]** plaintiffs had dealer/supplier contracts with Universal. (In passing, Ingram suggests that plaintiffs have pleaded insufficient factual allegations of the material terms of the contract; however, in light of PP 45, 47, 127 and 128 of the Amended Complaint, which detail aspects of plaintiffs' contract with Universal, the Court rejects this argument.) There is also no dispute that defendants Ingram and VPD knew of plaintiffs' contracts with Universal, or that there

---

[13] The requirement stated in defendant Universal's brief that a plaintiff must prove that defendant acted with "exclusively malicious motivation" in procuring the breach of contract was implicitly overruled by the 1996 Guard-Life decision. While defendants cite a 1997 case in support of this proposition, *Elliott Assocs., L.P. v. Republic of Panama, 975 F. Supp. 332, 341 (S.D.N.Y. 1997)*, a closer examination of that case reveals that it only cites pre-1996 cases to support this notion. (e.g. *Wegman v. Dairylea Coop., Inc., 50 A.D.2d 108, 376 N.Y.S.2d 728, 736 (4th Dep't 1975)*; *Sadowy v. Sony Corp. of America, 496 F. Supp. 1071, 1080 (S.D.N.Y.1980)*; *Ultramar Energy Ltd. v. Chase Manhattan Bank, N.A., 179 A.D.2d 592, 579 N.Y.S.2d 353, 354 (1st Dep't 1992)*; *Benjamin Goldstein Productions, Ltd. v. Fish, 198 A.D.2d 137, 603 N.Y.S.2d 849, 851 (1st Dep't 1993)*. As a result, Elliot states the wrong proposition of law. The correct standard is stated above.

was a breach of such contracts. The crux of this claim is therefore whether or not defendants' alleged behavior rose to the level of "intentional interference" with the dealer/supplier contracts.

Plaintiffs' contracts with Universal appear to be contracts that are "terminable at will." See Amend. Comp. P 135, stating: "Paragraph "10" of the Universal/ETD contract provides that the contract may be terminated 'upon ten (10) days written notice.'" As a result, plaintiffs must show that defendants used "wrongful means" in bringing about Universal's breach. Plaintiffs have pled three different wrongful means in this regard: 1) Ingram and VPD's threats to Universal that all distributors would go out of business if they were **[**75]** not given exclusive distributorships, 2) offers of "unprecedented special treatment to Universal product," Amend. Comp. P 129, and 3) violations of the Sherman Act.

The former two means cited by plaintiff do not appear to rise to the level of "wrongful means." Indeed, offers of special treatment and forecasts of the distributor market's demise seem more on the level of "persuasion" than anything else. Universal could freely choose to accept or reject them as it wished. The latter means, however, does appear to be wrongful. To induce Universal's breach in order to further an anti-competitive conspiracy rises to the level of unlawful behavior that the tortious interference claim is designed to prevent. Since we have not dismissed all the of the antitrust claims above, the tortious interference claim can rest on this single allegation of improper means.

b. Plaintiffs' contracts with Retailer-Customers

Plaintiffs have also alleged that all three defendants tortiously interfered with their contracts with retailer-customers by coercing numerous customers to terminate their contracts with plaintiffs. Defendants respond that plaintiffs have not adequately specified which contracts **[**76]** were interfered with nor have they alleged critical elements such as whether the contracts were for a specified period of time or terminable at will. Moreover, notwithstanding the foregoing, defendants assert that plaintiffs have not alleged any tortious interference beyond the bare conclusory statement that defendants used "treats, bribery, defamation and/or coercion" to achieve their goals.

While plaintiffs have alleged a number of facts suggesting wrongful means under **[*406]** this claim, the Court finds that plaintiffs' failure to specify which contracts with retailer-customers were interfered with and whether or not those contracts were terminable at will warrants dismissal of this claim. While plaintiffs attempt in their brief to salvage the claim by specifying that it is "the retailers on plaintiffs' customer lists" who have been interfered with, even this level of specificity is inadequate. As World Wide Communications has held, "without pleading anything beyond the existence of 'contracts,' we cannot find that the interference alleged is wrongful or improper, and therefore tortious." *1997 U.S. Dist. LEXIS 20596, 1997 WL 795750, at *7* (internal citations omitted). The Court is provided with no **[**77]** information about the identity of any of these retailer-customers and is given no sense of how many of them terminated their contracts. Furthermore, plaintiffs' failure to specify whether the alleged agreements with retailers were guaranteed or terminable at will leaves the Court unable to determine which standard to apply when assessing defendants' behavior for tortious interference. Accordingly, the Court dismisses this allegation of tortious interference for lack of particularity.

3. Breach of Contract

Plaintiff ETD has also alleged a breach of contract claim against defendant Universal. According to ETD, paragraph 10 of its contract with Universal provides that their contract can be terminated only "upon ten (10) days written notice." Universal has never provided it with any written notice of termination, ETD alleges. All the same, Universal has refused to provide ETD with Universal product as their agreement requires, and has thereby breached their contract. As a result, ETD claims, it has suffered damage from having been unable to notify its retailer-customers in advance that it would be unable to fulfill their orders, attendant harm to its business reputation and the **[**78]** loss of a substantial number of current and future clients. Am. Compl. PP 124-25.

HN30[] Under New York, California and Texas law, the essential elements of a breach of contract claim in federal court are: (1) the existence of an agreement, (2) adequate performance of the contract by the plaintiff, (3) breach of contract by the defendant, and (4) damages. *Harsco Corp. v. Segui, 91 F.3d 337, 348 (2d Cir.1996)*; *M.G.*

Chamberlain & Co. v. Kenneth R. Simpson, 343 P.2d 438, 445, 173 Cal.App.2d 263, 274 (1959); 2 Witkin, California Procedure, 1226, § 251 et seq.; *Prudential Sec., Inc. v. Haugland, 973 S.W.2d 394, 397 (Tex.App.--El Paso 1998, pet. denied)*; *Wright v. Christian & Smith, 950 S.W.2d 411, 412 (Tex.App.--Houston [1st Dist.] 1997, no pet.)*; *McCulley Fine Arts Gallery, Inc. v. "X" Partners, 860 S.W.2d 473, 477 (Tex.App.--El Paso 1993, no writ)*. Such elements need not be pleaded extensively or individually; they need only constitute "a short and plain statement showing that the pleader is entitled to relief." *Campo v. 1st Nationwide Bank, 857 F. Supp. 264, 270*.

The Court finds that plaintiff has satisfied the **[**79]** pleading requirements with respect to this claim. It has adequately alleged the existence of a written contract, defendant's breach and damages. Defendant, to be sure, has raised three arguments in support of its motion to dismiss this claim: 1) that plaintiff cannot demonstrate that defendant's breach was the proximate cause of its injury, 2) that plaintiff's claim was a mandatory counterclaim to Universal's collection action against ETD in the Central District of California, and 3) that the only damages available to plaintiff are those which accrued during the 10-day notice period allegedly required by the contract. However, all three of these arguments concern the merits of plaintiff's claim and are therefore not **[*407]** properly addressed on a motion to dismiss. Accordingly, plaintiff's claim for breach of contract against Universal survives the motion to dismiss.

CONCLUSION

For the aforementioned reasons, the Court dismisses plaintiffs' claims under *Section 2 of the Sherman Act*, as well as plaintiffs' claims of per se illegal group boycott and price-fixing violations under *Section 1 of the Sherman Act*. However, plaintiffs have adequately alleged a rule of reason violation **[**80]** of *Section 1 of the Sherman Act*, as well as claims under *§§ 2(a), 2(d), 2(e)and 2(f)* of the Robinson-Patman Act. The Court also dismisses the tortious interference claims against Universal on all counts and against Ingram and VPD with respect to plaintiffs' contracts with retailer-customers, but not the claim against Ingram and VPD with respect to plaintiffs' contracts with Universal. Finally, the Court finds that plaintiffs have adequately pleaded a fraud and misrepresentation claim and a breach of contract claim.

SO ORDERED.

Opinion

MEMORANDUM OF OPINION AND ORDER

Plaintiffs, Profile Grinding, Inc. and Lincoln Electric Company ("Plaintiffs") seek certification of a litigation class of plaintiffs pursuant to *Fed. R. Civ. P. 23* (Doc. 203). Defendants, Bluestar Metal Recycling Co. ("Bluestar"), DeMilta Iron & Metal ("DeMilta"), Columbia Iron & Metal Company, and Columbia National Group, Inc. (collectively

"Columbia") oppose Plaintiffs' **[*6]** request (Docs. 248, 250 and 254, respectively.)[1] In connection with these filings, Plaintiffs also have filed a motion to exclude certain testimonial evidence proffered in support of Weingold and Rock's opposition to the motion for class certification. (Doc. 285). Upon consideration of Plaintiffs' motions and the oppositions thereto, for the reasons that follow, the Court hereby **GRANTS** both motions. The testimonial evidence that is the subject of Plaintiffs' motion to strike is hereby **STRICKEN**, and the Court declines to consider that evidence in evaluating the Plaintiffs' motion for class certification. Additionally, the Court hereby certifies a litigation class of plaintiffs, defined as follows:

> all persons or entities with scrap generating facilities located in Northeast Ohio and the surrounding counties, which is comprised of Ashtabula, Cuyahoga, Lake, Lorain, Medina, Stark and Summit counties, who sold ferrous or nonferrous industrial scrap metal to Defendants between December 1992 and March 2000. Excluded from the Class are Defendants, and their respective parents, subsidiaries and affiliates, as well as any governmental entities. Also excluded from the Class is any party, whether **[*7]** named or not, who is ultimately deemed to have participated in an illegal conspiracy.

I. Background[2]

Manufacturing processes for products with metal components generate both ferrous and nonferrous industrial scrap metal. This scrap metal can be resold to mills and foundries, which recycle the scrap into the manufacture of new metal products. Defendants operate businesses that buy the residual scrap from industrial and other customers and resell it to buyers in Ohio and other states. Generally, Defendants submit bids to generators of the scrap, in which they offer to purchase scrap generated by the customers for a given period of time, at a specified variance from the pricing for scrap set forth in various publications, such as *Iron Age* magazine.[3] If a bid is accepted, a contract is entered into at the bid price, for the bid period. Defendants then leave collection boxes with their contract partners, where the scrap is deposited for pick up. Once retrieved fromthe collection boxes, the scrap is weighed by Defendants and then resold to the mills, foundries and other buyers.

Plaintiffs allege that, beginning no later than December 1992, Defendants conspired to restrain trade, suppress **[*8]** and eliminate competition, and fix the price of scrap. Plaintiffs assert that Defendants furthered this conspiracy through a variety of unlawful and improper acts, including the following:

> (1) Participation in meetings and conversations to allocate customers and rig bids for the purchase of ferrous and nonferrous scrap metal;
>
> (2) Participation in meetings and conversations to set pricing for the purchase of scrap and exchange of documents establishing the agreed-to pricing for certain accounts;

---

[1] While Defendants M. Weingold & Company and Jack Weingold (collectively "Weingold") and Harry Rock & Associates, Inc. ("Rock"), also initially opposed the Motion for Class Certification, they have informed the Court that they have withdrawn that opposition and, in fact, intend to join Plaintiffs in seeking approval of a class-wide settlement of claims against Weingold and Rock. While the DeMilta and Columbia Defendants did not file independent briefs in opposition to Plaintiffs' motion, they did file notices of joinder in the opposition filed by Weingold and Rock, a procedure the Court expressly allowed. Hence, while Weingold and Rock have withdrawn their own opposition, the Court will consider the substantive arguments in their opposition brief, as if asserted by DeMilta and Columbia. The remaining Defendants have not opposed Plaintiffs' motion.

[2] The facts contained in this section are taken from the Plaintiffs' Second Amended Consolidated Class Action Complaint ("Complaint")(Doc. 180), and are set forth here for purposes of aiding the Court in its understanding of the factual backdrop of this case. In its consideration of the Plaintiffs' class certification motion, the Court does not determine the truth of these alleged facts.

[3] Defendants vigorously argue that the prices set forth in the industry publications are those for <u>processed</u> scrap, not the unprocessed raw materials. The record unambiguously indicates, however, that the prices for unprocessed scrap bear some relationship to the quoted prices.

(3) Engaging in "quid pro quo" arrangements to compensate the pre-arranged losing bidder or companies that agreed to refrain from bidding, i.e., by agreeing to sell the losing bidder specified volumes of scrap at favorable pricing;
(4) Submitting rigged and collusive bids to Plaintiffs and class members;
(5) Intimidating other scrap dealers not to offer competitive bids;
(6) Maintaining the illegal conspiracy by directing their own employees not to compete for certain customers;
(7) Imposing financial penalties on co-conspirators that disobeyed customer allocation agreements and other rules of the cartel; and

(8) Concealing the conspiracy by holding meetings in secret and, upon information and belief, **[*9]** withholding information from government investigations.

Complaint, at ¶ 41. As examples of such anti-competitive conduct, Plaintiffs point to the following:

(1) An incident in 1993 where Weingold sought a contract to buy scrap from a customer and class member. The customer required three bids from prospective scrap purchasers. Weingold, through Jack Weingold, secretly met with the owners of Bay Metals, Inc. and colluded with Bay Metals, Inc. to submit a low and non-competitive bid. Through the bidding process, the conspirators fraudulently concealed the collusion and created the false impression that the bids were fair and competitive;
(2) In or about 1993, Atlas Lederer Company, Inc. employees were directed not to compete for a certain account because the account "belonged" to another scrap dealer;

(3) In or about 1995, a major stamping company and longtime Weingold customer put its scrap out to bid. At that time, Atlas Lederer Company, Inc. had a pending bid for the scrap. At Columbia National Group, Inc.'s direction, Atlas-Lederer Company, Inc. retracted its bid, allowing Weingold to retain the contract. In exchange for Atlas Lederer Company, Inc.'s retraction, Weingold then sold volumes **[*10]** of scrap to Columbia Trading, Inc.; and
(4) In or about 1996 Rock arranged for at least one other scrap dealer to submit a bid to make "Rock look good."

Complaint, at ¶ 42.

Plaintiffs also assert that the Defendants and other co-conspirators directed salespersons not to bid on certain accounts, placed phone calls to employees of other co-conspirators complaining that they were driving up the prices of scrap, and threatened non-conspirators with retaliation for bidding on the accounts of conspirators. According to Plaintiffs, the clear intent of these actions was to depress pricing to noncompetitive levels. Plaintiffs contend that, as a result of Defendants' unlawful conduct, Defendants intended to and did reduce and restrain price competition in the purchase of scrap, with the result that prices paid to Plaintiffs and class members were fixed, restrained, and maintained at artificially low levels.

In addition, Plaintiffs allege that Defendants fraudulently concealed their unlawful conspiracy from Plaintiffs and class members until March 2000. At that time, Plaintiffs learned that Bay Metals, Inc. had agreed to plead guilty to conspiracy with unnamed co-conspirators to rig bids and to allocate **[*11]** supplies of ferrous and nonferrous scrap from 1992 through 1999, in violation of *15 U.S.C. § 1*. Plaintiffs assert that they did not discover this secret activity until it was disclosed publicly by government attorneys. Defendants and their co-conspirators allegedly fraudulently concealed this conspiracy through:

(1) Secret meetings and telephone calls in which the prices, bids, and markets for scrap were discussed and agreed to;
(2) Allocating secretly among themselves sellers of scrap (including, among others, Plaintiffs) and/or contracts for the purchase of scrap;
(3) Creating a false and misleading appearance of competition for Plaintiffs and/or other class members;
(4) Instructing members of the conspiracy not to divulge the existence of the conspiracy to others not in the conspiracy;
(5) Limiting the anticompetitive, unlawful plan to a small number of people and key officials at each Defendant company and misrepresenting the reasons for unlawful conduct to their own employees;

> (6) Avoiding references in documents, or the creation of documents otherwise created in the ordinary course of Defendants' and the co-conspirators' businesses, regarding conduct which would constitute an antitrust violation **[*12]** or anticompetitive act, destroying documentary proof, and/or creating code words and code names in records to disguise the activities of the conspiracy.
> (7) Participating in secret meetings and conversations to monitor and enforce adherence to the agreed-upon prices, bids, and market shares; and
> (8) Falsely representing to sellers that prices were fair and competitive.

Complaint, at ¶ 48.

II. Discussion

The Plaintiffs allege in their Complaint that the Defendants and other co-conspirators engaged in a horizontal conspiracy to fix the price of scrap metal in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. This case is before the Court upon the following motions: (1) Plaintiffs' motion to preclude testimonial evidence proffered by Rock and Weingold in opposition to the Plaintiffs' motion for class certification; (2) Plaintiffs' motion for class certification. The Court addresses each of these motions in turn.

A. Motion to Preclude Testimonial Evidence

Plaintiffs seek to strike the declarations of Gary Clayman, Joseph Curtin, John Lancaster, Bruce Safar and Jerry Negrelli, offered in opposition to Plaintiffs' motion for class certification by Rock and Weingold. Rock and Weingold rely on the proffered declarations **[*13]** to support their assertion that the diversity of the scrap metal industry precludes the possibility of common proof (and thus militates against class certification in this context). Plaintiffs contend that consideration of the declarations should be precluded because Defendants neither (1) identified any of the declarants as persons with knowledge in their initial disclosures pursuant to *Fed. R. Civ. P. 26*, nor (2) provided their identities in response to interrogatories specifically asking for the identification of such persons. Plaintiffs assert, moreover, that Defendants failed to comply with this Court's August 14, 2003 order directing them to identify all persons with information regarding Defendants' defenses, and to comply fully with their *Rule 26* disclosure obligations.

While Rock and Weingold initially opposed Plaintiffs' motion to strike, that opposition has since been withdrawn.[4] For this reason, and because the Court is unpersuaded by the proffered explanations for Defendants' failure to identify these witnesses earlier, Plaintiffs' motion to strike is**GRANTED**. Accordingly, the Court will consider the arguments made in the Rock and Weingold opposition brief without reference to or the support of the **[*14]** subject declarations.

B. Motion for Class Certification

The Plaintiffs request the Court to certify as a class

> all persons or entities with scrap generating facilities located in Northeast Ohio and the surrounding counties, which is comprised of Ashtabula, Cuyahoga, Lake, Lorain, Medina, Stark and Summit counties, who sold ferrous or nonferrous industrial scrap metal to Defendants between December 1992 and March 2000. Excluded from the class are Defendants, their co-conspirators, and their respective parents, subsidiaries and affiliates, as well as any governmental entities.

Plaintiffs have the burden of proving that all of the requirements of *Fed. R. Civ. P. 23*, which governs certification of federal class actions, have been satisfied. *See* *Amchem Prods. v. Windsor, 521 U.S. 591, 614, 117 S. Ct. 2231,*

---

[4] Despite having joined in Rock and Weingold's opposition to Plaintiffs' underlying motion for class certification, no defendant filed a notice of joinder in Rock and Weingold's opposition to the motion to strike.

138 L. Ed. 2d 689 (1997). In reviewing a motion for class certification, the court must accept the Plaintiffs' allegations as true. *See* Fears v. Wilhelmina Model Agency, Inc., 2003 U.S. Dist. LEXIS 11897, 2003 WL 21659373 at *1 (S.D.N.Y. Jul. 15, 2003), *citing* Shelter Realty Corp. v. Allied Maintenance Corp., 574 F.2d 656, 661, n.15 (2d Cir. 1978). The pleadings, evidentiary records and affidavits may be used. *See* Fears, 2003 U.S. Dist. LEXIS 11897, 2003 WL 21659373, *1; Sirota v. Solitron Devices, Inc., 673 F.2d 566, 571 (2d Cir. 1982), *cert. denied*, *459 U.S. 838, 103 S. Ct. 86, 74 L. Ed. 2d 80 (1982)*. The court should take a flexible stance and, depending on the circumstances, may base its decision whether or not to certify a class action on the pleadings alone. *See* Gen. Tel. Co. of the Southwest v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)("[s]ometimes the issues are plain enough from the pleadings. . . and sometimes it may be necessary **[*15]** for the court to probe behind the pleadings. . . ."); In re Visa Check/MasterMoney Antitrust Litig. 192 F.R.D. 68, 79 (E.D.N.Y. 2000), *aff.*, 280 F.3d 124 (2d Cir. 2001), *cert. denied*, 536 U.S. 917, 122 S. Ct. 2382, 153 L. Ed. 2d 201 (2002). A court does not have the authority to conduct a preliminary inquiry into the merits of a suit to determine whether it may be maintained as a class action.*See* Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 178, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974).

The Supreme Court has noted that Rule 23 is important in the private enforcement of antitrust actions. *See* Hawaii v. Standard Oil Co., 405 U.S. 251, 266, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972). When in doubt as to whether to certify a class action in the antitrust context, accordingly, the court should err in favor of doing so. *See* In re Cardizem CD Antitrust Litig., 200 F.R.D. 297, 303 (E.D. Mich. 2001).

To justify class certification, Plaintiffs must establish that they meet the requirements of both Fed. R. Civ. P. 23(a) and (b). Rule 23(a) contains four threshold requirements applicable to all class actions:

> (1) numerosity (a "class [so large] that joinder of all members is impracticable"); (2) commonality("questions of law or fact common to the class"); (3) typicality (named parties' claims or defenses "are typical . . . of the class"); and (4) adequacy of representation (representatives "will fairly and adequately protect the interests of the class").

Amchem, 521 U.S. at 613 (quoting Fed. R. Civ. P. 23(a)(1-4)). "Once those conditions are satisfied, the party seeking certification must also demonstrate that it falls within at least one of the subcategories of Rule 23(b)." In re American Medical Sys., 75 F.3d 1069, 1079 (6th Cir. 1996). Plaintiffs seek class certification **[*16]** only pursuant to Fed. R. Civ. P. 23(b)(3), which provides for class certification if:

> (3) the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. The matters pertinent to the findings include: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Fed. R. Civ. P. 23(b). The Court considers the requirements of Fed. R. Civ. P. 23(a) and (b) in turn.

1. *Fed. R. Civ. P. 23(a)(1)*: Numerosity

The first requirement of Fed. R. Civ. P. 23(a) is numerosity—specifically, that the class members in the action be "so numerous that joinder of all members is impracticable." Fed. R. Civ. P. 23(a)(1). In this case, Plaintiffs allege that the proposed class numbers at least in the hundreds. No defendant has objected to the Court's finding the existence **[*17]** of this element and, in any case, the Plaintiffs clearly have satisfied this requirement.

"There is no strict numerical test for determining impracticability of joinder."American Medical Sys., 75 F.3d at 1079. Rather, "[t]he numerosity requirement requires examination of the specific facts of each case and imposes no absolute limitations." General Tel. Co. v. EEOC, 446 U.S. 318, 330, 100 S. Ct. 1698, 64 L. Ed. 2d 319 (1980).

"When class size reaches substantial proportions, however, the impracticability requirement is usually satisfied by the numbers alone." *American Medical Sys., 75 F.3d at 1079*. The Sixth Circuit Court of Appeals has affirmed class certification in cases involving substantially fewer than 100 individuals. *See Haytcher v. ABS Industries, Inc., 1991 U.S. App. LEXIS 30643, 1991 WL 278981 at *1-2 (6th Cir. Dec. 27, 1991)* ("approximately 61 individuals");*Afro American Patrolmens League v. Duck, 503 F.2d 294, 298 (6th Cir. 1974)*(35 individuals).

Finally, Plaintiffs' approximate definition of the proposed class is sufficient for purposes of certification, and the precise size of the class can be determined at a later point in the litigation. *See In re Infant Formula Antitrust Litig., 1992 U.S. Dist. LEXIS 21981, 1992 WL 503464 (N.D. Fla. Jan. 13, 1992)*. With these principles in mind, the Court finds that the proposed class of several hundred is more than sufficient to satisfy the numerosity requirement of *Fed. R. Civ. P. 23(a)(1)*.

2. *Fed. R. Civ. P. 23(a)(2)*: Commonality

The second element, that of "commonality," requires that there be "questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*. As with the numerosity requirement, Defendants have declined **[*18]** to object to this element, and the Court finds that the commonality requirement is satisfied.

The commonality test "is qualitative rather than quantitative[;] that is, there need be only a single issue common to all members of the class." *American Medical Sys., 75 F.3d at 1080*, *quoting* 1 Herbert B. Newberg & Alba Conte, *Newberg on Class Actions*, §3.10, at 3-47 (3d ed. 1992). *See also Sprague v. GMC, 133 F.3d 388, 397 (6th Cir. 1998)*, *cert. denied*, *524 U.S. 923, 118 S. Ct. 2312, 141 L. Ed. 2d 170 (1998)*. Thus, although individual differences in issues among putative class members are relevant to the commonality inquiry, such differences do not necessarily defeat commonality. *See Sterling v. Velsicol Chem. Corp., 855 F.2d 1188, 1196-97 (6th Cir. 1988)*; *Senter v. General Motors Corp., 532 F.2d 511, 523-24 (6th Cir. 1976)*, *cert. denied*, *429 U.S. 870, 97 S. Ct. 182, 50 L. Ed. 2d 150 (1976)*.

The court must be mindful, however, of the purpose underlying the commonality requirement—that "the class-action device save[] the resources of both the courts and the parties by permitting an issue potentially affecting every [class member] to be litigated in an economical fashion under *Rule 23*." *Califano v. Yamasaki, 442 U.S. 682, 701, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)*. Thus, if questions of law or fact common to all of the class members are far outweighed by differences, then class certification should be denied. A conspiracy antitrust action, however, generally involves numerous common legal and factual issues, making class certification particularly appropriate in this context. *See Cumberland Farms, Inc. v. Browning-Ferris Indus., 120 F.R.D. 642, 647 (E.D. Pa. 1988)*.

Plaintiffs point to specific **[*19]** common questions of law and fact involved in the present case, including:

(1) Whether Defendants combined, agreed, or conspired to fix the price of scrap metal at artificially depressed levels;
(2) Whether Defendants combined, agreed, or conspired to allocate customers;
(3) The duration of the illegal combination, agreement, or conspiracy to fix the price of scrap metal;
(4) Whether the Defendants' activities have substantially affected interstate commerce;
(5) Whether, and to what extent, Defendants' conduct caused injury to the business or property of Plaintiffs and members of the class;
(6) The appropriate relief and/or measure of damages; and
(7) Whether Defendants actively sought to conceal the conspiracy.

As noted above, none of the Defendants has disagreed with Plaintiffs' characterization of these issues of fact and law, and none disagrees that the commonality element of *Rule 23(a)* can be satisfied in this case. Accordingly, the Court finds that this action contains common questions of law and fact, and the commonality element of *Fed. R. Civ. P. 23(a)* is satisfied.

3. *Fed. R. Civ. P. 23(a)(3)*: Typicality

A plaintiff's claim is typical "if it arises from the same event or practice or course of conduct that gives rise to the claims of other **[*20]** class members, and if his or her claims are based on the same legal theory" as those of other class members. *American Medical Sys., 75 F.3d at 1082*, *quoting* *1 Newberg, supra*, § 3-13, at 3-76 (footnote omitted). The typicality requirement ensures that the representative plaintiffs' interests are aligned with those of the proposed class and thus that, in pursuing their own claims, the named plaintiffs also will advance the interests of the class members. *See id.* The Court finds that the Plaintiffs sufficiently have demonstrated that the named plaintiffs' claims are typical of the claims of the entire class.

Plaintiffs assert that all class members here seek to prove the same legal theory; i.e., Defendants conspired to fix the price of scrap metal at artificially low levels and, as a result, the Plaintiffs sustained injury. Although there may be differences among class members involving products purchased, methods of purchase, or the amount of damages suffered, the typicality element is not defeated by disparities in such factual issues. *See* *In re Vitamins Antitrust Litig., 209 F.R.D. 251, 261 (D.D.C. 2002)*("[t]he typicality requirement does not mandate that products purchased, methods of purchase, or even damages of the named plaintiffs must be the same as those of the absent class members. . . ."). Moreover, **[*21]** where a conspiracy is involved, typicalityis not defeated simply because a named plaintiff has not dealt with each of the defendants. *See* *Sebo v. Rubenstein, 188 F.R.D. 310, 318 (N.D. Ill. 1999)*; *Emig v. American Tobacco Co., Inc., 184 F.R.D. 379, 386 (D. Kan. 1998)*.[5] The Court finds that, on balance, the Plaintiffs' claims are typical of those of the entire class, and the typicality element of *Fed. R. Civ. P. 23(a)(3)* is satisfied.

4. *Fed. R. Civ. P. 23(a)(4)*: Adequacy

The adequacy requirement ensures that the named representative plaintiffs "will fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. The Sixth Circuit has articulated two criteria for determining adequacy of representation: "(1) the representative must have common interests with unnamed members of the class, and (2) it must appear that the representatives will vigorously prosecute the interests of the class through qualified counsel." *American Medical Sys., 75 F.3d at 1083*, *quoting* *Senter, 532 F.2d at 525*. Essentially, the adequacy requirement tests "the experience and ability of counsel for the plaintiffs and whether there is any antagonism between the interests of the plaintiffs and other members of the class they seek to represent." *Cross v. National Trust Life Ins. Co., 553 F.2d 1026, 1031 (6th Cir. 1977)*. "The adequate representation requirement overlaps with the typicality requirement because[,] in the absence of typical claims, the class representative has no incentive[] to pursue the claims of the other **[*22]** class members." *American Medical Sys., 75 F.3d at 1083*.

As discussed above, the Court already has found that the class representatives have claims typical of those of the class. In any event, a court will deny certification for failure to satisfy the adequacy prong only in rare situations. "[A]typicality or conflict must be clear and must be such that the interests of the class are placed in significant jeopardy." *Hedges Enterprises, Inc. v. Continental Group, Inc., 81 F.R.D. 461, 466 (E.D. Pa. 1979)*; *see also* *Fears, 2003 U.S. Dist. LEXIS 11897, 2003 WL 21659373, at * 5*. Each class member here has an interest in establishing the liability of Defendants and the fact of resultant injury. Furthermore, Plaintiffs have alleged in the Complaint that the artificially low prices resulting from Defendants' conspiracy affected all those who sold scrap metal to Defendants during the relevant time period. There is no indication in the record of antagonism between the interests of the named plaintiffs and those of the class. Finally, the Plaintiffs are represented by competent counsel who have extensive experience in antitrust litigation and in class action representation. (Doc. 204, Exh. 26). All that has occurred in this case to date demonstrates that Plaintiffs and counsel are likely to prosecute this action vigorously.

---

[5] Accordingly, the Court rejects the argument of defendant Bluestar (the only defendant to object to the satisfaction of either the typicality or adequacy requirements) that the class should be divided into subclasses based on whether a class member has dealt with each particular defendant. (Doc. 248, at 3). Bluestar's attempt to limit the scope of the class is appropriate to the damages inquiry, not to the liability class certification inquiry. Similarly, the fact that certain customers of Bluestar may have signed release documents as to Bluestar does not defeat the appropriateness of certification. Again, this fact is appropriate for consideration at the damages stage, since the releases may limit the amount of damages recoverable by certain class members, or may affect the percentage of damages potentially attributable to Bluestar.

Bluestar, the only defendant to object to the satisfaction **[*23]** of this element, argues that the fact that three named plaintiffs have withdrawn as proposed class representatives counsels against a finding of adequacy of representation, because the withdrawal suggests that overly aggressive counsel may have coerced some or all of the plaintiffs into serving as class representatives.[6] Bluestar provides no evidence, however, to support this conclusory assertion and, in the absence of such evidence, the Court will not find the named Plaintiffs to be inadequate representatives on this basis. In any event, a court may take action to modify or decertify a previously certified class, where subsequent developments warrant such action. *See* *Barney v. Holzer Clinic, 110 F.3d 1207, 1214 (6th Cir. 1997)*; *Fed. R. Civ. P. 23(c)(1)*(advisory committee notes to 1966 amendment). The Court concludes that the Plaintiffs have carried their burden of showing that the named representatives and their counsel will fairly and adequately represent the interests of the class in this case. Accordingly, the Court turns to examine the requirements of *Fed. R. Civ. P. 23(b)(3)* and the Defendants' objections to class certification.

5. *Rule 23(b)* Analysis: *Fed. R. Civ. P. 23(b)(3)*

Not only must the "four prerequisites [of *Rule 23(a)*] . . . *all* be met before a class can be certified," "the party seeking certification must also demonstrate **[*24]** that it falls within at least *one* of the subcategories of *Rule 23(b)*." *In re American Medical Sys., 75 F.3d 1069* (emphasis in original). Plaintiffs seek class certification under *Rule 23(b)(3)*, and the Court accordingly examines that subsection.[7]

Rule 23(b)(3) requires the court to find "that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy." *Fed. R. Civ. P. 23(b)(3)*. The plain language of the rule indicates that common issues need only predominate over, not outnumber, individual issues. *See* *In re School Asbestos Litigation, 789 F.2d 996, 1010 (3d Cir. 1986)*, *cert. denied*, *479 U.S. 852, 107 S. Ct. 182, 93 L. Ed. 2d 117 (1986)*("There may be cases in which class resolution of one issue or a small group of them will so advance the litigation that they may fairly be said to predominate. Resolution of common issues need not guarantee a conclusive finding on liability, . . . nor is it a disqualification that damages must be assessed on an individual basis."). Thus, common issues must be important to resolution of the dispute but need not be dispositive of the litigation. *See* *In re Toilet Seat Antitrust Litigation, 1976 U.S. Dist. LEXIS 14904, 1976 WL 1265 at * 4 (E.D. Mich. May 26, 1976)*. Antitrust price-fixing cases generally are considered appropriate for class action certification. *Robinson v. Texas Automobile Dealers Association*, 2003 WL 21756591 at *4 (E.D. Tex. Mar. 25, 2003)("antitrust price fixing cases are **[*25]** particularly suitable for class action treatment.")(quotation omitted).

a. Predominance of Common Questions

Plaintiffs bring this action under *Section 1 of the Sherman Act*, to which *Section 4 of the Clayton Act* applies. *See* *Cardizem CD, 200 F.R.D. at 300-01*; *Weber v. NFL, 112 F. Supp. 2d 667, 670 (N.D. Ohio 2000)*.[8] In order to be successful in their antitrust claim, the Plaintiffs must show (1) a violation of ***antitrust law*** (conspiracy); (2) direct injury from such violation (impact); and (3) damages that can be quantified with the requisite precision. *See* *Cardizem CD, 200 F.R.D. at 301*; *Jackshaw Pontiac, Inc. v. Cleveland Press Pub. Co., 102 F.R.D. 183, 194 (N.D. Ohio 1984)*. Additionally, in this case, since the Plaintiffs seek to toll the statute of limitations, the Plaintiffs must

---

[6] The motion for withdrawal filed by Bic Manufacturing, Inc. and Talan Products, Inc.(Doc. 205) explains that these entities desired to withdraw as class representatives because of the enormous expense they were required to incur in representing the class. Plaintiff Shiloh Industries, Inc. indicated its desire to withdraw for similar reasons. (Doc. 179).

[7] Since the Plaintiffs do not seek class certification under any other subsection, the Court need not conduct a detailed analysis of those subsections here.

[8] Paragraph one of the Complaint refers to *Sections 4* and *16 of the Clayton Act*, *15 U.S.C. §§ 15*, *26*, while the Count I title refers to *15 U.S.C. §§ 1*, *15*.

prove that the Defendants undertook actions to fraudulently conceal their unlawful conduct and prevent Plaintiffs from discovering the conspiracy. Accordingly, in reviewing whether Plaintiffs have satisfied the requirements of *Fed. R. Civ. P. 23(b)(3)*, the Court must examine whether Plaintiffs may prove each of these elements through general, class-wide proof.

Defendants argue that individual issues predominate with respect to each element of Plaintiffs' claim. Specifically, Defendants assert that whether bids were rigged requires a separate inquiry into each generator's practice, the complex combination of services provided, types of scrap metals purchased, **[*26]** levels of contamination of scrap, levels of segregation, and volume and transportation costs. According to Defendants, such an individually-based inquiry would make it impossible to fix class-wide prices for the purchase of scrap metal from scrap generators. Further, Defendants claim that the allegations of a conspiracy to rig bids and to engage in threats and intimidation to restrain competition are complicated by vast differences in the geographic service area of each of the Defendants, the need to determine which scrap metal dealers in Northeast Ohio were part of the alleged conspiracy, and the fact that the guilty pleas on which Plaintiffs rely actually involve multiple conspiracies and six different time periods, none of which match the purported class period.

After careful consideration, the Court finds that the Defendants' arguments are not well taken. The Plaintiffs sufficiently have alleged facts demonstrating that common questions predominate over individual issues in this litigation. The Court examines the commonality of proof on each of the elements of the Plaintiffs' claim below.

(1) Antitrust Violation - Conspiracy

Plaintiffs allege that Defendants conspired to horizontally **[*27]** fix prices and allocate customers concerning the purchase of scrap metal, and thus that proof of the conspiracy will be an issue common to all class members. Defendants, on the other hand, vigorously assert that merely alleging a price fixing conspiracy is insufficient to demonstrate that the conspiracy allegations may be proven with common, generalized evidence. *See* *In re Catfish Antitrust Litig., 826 F. Supp. 1019, 1039 (N.D. Miss. 1993)*("[A] mere charge of conspiracy does not mean that common questions predominate. . . . The suitability for *Rule 23* certification is, by design and necessity, a fact sensitive process for each case.").

Specifically, defendants claim that this is a case involving heterogeneous goods and services, where a variety of factors affect price, and each purported class member's claims must be analyzed on an individual basis, thus requiring a series of "mini-trials." *See* *Loeb Indus. v. Sumitomo Corp.(In re Copper Antitrust Litig.), 196 F.R.D. 348, 354 (W.D. Wisc. 2000)*. Defendants assert, moreover, that any allegations of bid-rigging or intimidation would require inquiry into individual issues, which could only be addressed with respect to the specific class members involved.

Defendants, however, misconstrue the nature of Plaintiffs' claims. Defendants attempt to separate Plaintiffs' allegations in order to portray them as involving multiple, **[*28]** individual conspiracies rather than one unified scheme. Plaintiffs allege more here than discrete rigged bids; rather, Plaintiffs allege that the bid rigging was a part of a larger conspiracy to depress scrap metal prices. Plaintiffs do not allege, moreover, intimidationby Defendants of particular class members, in which case individual examination of the allegations would be appropriate. Rather, Plaintiffs allege intimidation of other conspirators to prevent them from revealing or obstructing operation of the larger conspiracy. Finally, Plaintiffs do not allege that they were harmed individually by particular acts of "bid-rigging" or customer allocation. Plaintiffs contend, instead, that Defendants' overall conduct created an environment in which market prices could not fluctuate freely, and thus, despite individual differences in price and product, all Plaintiffs were harmed by the artificial depression of the "base price." This overarching conduct, rather than any one particular act, is the central focus of the Plaintiffs' claim.

Examination of the allegations of price fixing and market allocation will focus on the actions of the Defendants; thus, proof for these issues will not **[*29]** vary among class members. *See* *Vitamins Antitrust, 209 F.R.D. at 251*. Courts have found that the existence of a conspiracy is the predominant issue to consider in determining whether to allow certification of the class, even where significant individual issues also exist. *See* *In re NASDAQ Market-Makers*

Antitrust Litig., 169 F.R.D. 493, 518 (S.D.N.Y. 1996)("existence of a conspiracy is the predominant issue in price fixing cases, warranting certification of the class even where significant individual issues are present. . . ."). Courts also have certified classes in cases where the industry, pricing structure, products, and transactions between defendants and their customers are complex, varied, fragmented, and diverse. *See* Vitamins Antitrust, 209 F.R.D. at 264, *citing* In re Commercial Tissue Prods., 183 F.R.D. 589 (N.D. Fla. 1998); In re Wirebound Boxes Antitrust Litig., 128 F.R.D. 268 (D. Minn. 1989).

Again, Plaintiffs have alleged a single conspiracy; Defendants may not recharacterize the Plaintiffs' allegations in order to garner support for their own arguments. *See* Vitamins Antitrust, 209 F.R.D. at 265. The fact that three separate guilty pleas have been entered in parallel proceedings does not compel the conclusion that separate conspiracies existed and that class action certification is, thus, inappropriate. Id. at 265, n. 16. Defendants appear to argue that, where the Plaintiffs' complaint involves more than mere allegations of price fixing, a court should not certify a class. Reference to multiple cases indicates, **[*30]** however, that courts have certified classes even where the defendants' alleged conduct involved multiple acts beyond "pure" price fixing. *See* DeLoach v. Philip Morris Cos., 206 F.R.D. 551, 552 (M.D.N.C. 2002)(defendants rigged bids at auction, submitted decreased purchase intentions to reduce the federal tobacco control and refused to purchase tobacco at auction in order to receive an artificially low discount from tobacco cooperatives). *See also* Vitamins Antitrust, 209 F.R.D. at 254 (class certified where defendants fixed the prices of numerous vitamins and allocated customers); Wirebound Boxes, 128 F.R.D. at 269 (class certified where defendants conspired to fix prices, allocate customers, and eliminate competition).

Defendants' argument concerning Plaintiffs' defined geographic area similarly is without merit. Plaintiffs' expert has analyzed the U.S. Census data, the location of Defendants' customers, and other documents from Defendants in order to determine the geographic area relevant to this action (Leitzinger Reply, ¶¶ 8-13) and, in their reply memorandum, Plaintiffs have clarified and redefined the geographic area involved. The revised area includes named counties in Northeast Ohio: Ashtabula, Cuyahoga, Lake, Lorain, Medina, Stark, and Summit. Plaintiffs' revised geographic area is sufficiently specific to allow **[*31]** Plaintiffs to address their antitrust allegations with common proof.[9] Accordingly, the Court finds that the allegations of antitrust violations and conspiracy present common issues of fact, which support the certification of a class action pursuant to Fed. R. Civ. P. 23(b)(3).

(2) Impact

Similarly, Plaintiffs' proposed evidence of impact—the fact of injury—presents common issues, which support the certification of a class action pursuant to Fed. R. Civ. P. 23(b)(3). In order to demonstrate impact at the class certification stage, Plaintiffs need not actually prove impact; rather, they need only show that they "intend to use generalized evidence[,] which is common to the class and will predominate over individualized issues." Vitamins Antitrust, 209 F.R.D. at 266. *See also* In re Linerboard Antitrust Litig., 305 F.3d 145, 152 (3d Cir. 2002)("Plaintiffs need only make a threshold showing that the element of impact will predominantly involve generalized issues of proof, rather than questions which are particular to each member of the plaintiff class. . . ."). Courts have found that plaintiffs presented generalized evidence of impact in price fixing cases even where the allegations involved individual negotiations and varied purchase methods, as well as different amounts, prices, and types of products purchased.*See* Vitamins Antitrust, 209 F.R.D. at 266.

Defendants' arguments **[*32]** with respect to antitrust impact essentially mirror the arguments set forth with respect to the conspiracy prong. Defendants cite Windham v. American Brands, Inc., 565 F.2d 59, 68 (4th Cir. 1977), in support of the proposition that, where a commodity is heterogeneous or non-fungible, or where the chain of distribution is complex, the sale of different products at different prices necessitates an individual examination of each sale. In essence, Defendants claim that each plaintiff must demonstrate that it was specifically harmed by a failure to receive the appropriate price in a particular transaction. Finally, Defendants repeat their argument that a

---

[9] Thus, the Court rejects defendant Bluestar's argument that the Plaintiffs' class definition is insufficiently specific. (Doc. 228, at 2-3).

variety of factors (including negligence or mismanagement on the part of scrap sellers) may have affected the price that sellers received for their scrap.

The Court rejects, however, the suggestion (particularly at this stage in the proceedings) that this case is too complicated to permit class-wide proof. First, Plaintiffs have presented case law indicating that, in price fixing cases, impact on all participants in the affected market may be presumed. *See, e.g., Vitamins Antitrust, 209 F.R.D. at 267*; *In re Potash Antitrust Litig., 159 F.R.D. 682, 695 (D. Minn. 1995)*. Moreover, at least one later case has suggested that *Windham* is outdated, since modern courts have a number of formulaic methods at their **[*33]** disposal for determining impact and damages, even in a complex case. *See DeLoach, 206 F.R.D. at 559*.

At any rate, even absent a presumption of impact, the Plaintiffs have presented sufficient evidence to survive a *Rule 23* inquiry. Plaintiffs have presented the declaration of their economic expert, Dr. Jeffrey J. Leitzinger, in support of their theory that the defendants' conspiracy caused a class-wide price depression inscrap metal. Although the Defendants disagree with Leitzinger's methods of analysis and conclusions, these issues are more appropriate for jury resolution. *See Vitamins Antitrust, 209 F.R.D. at 267*. At this stage in the proceedings, Plaintiffs need only identify a valid method for determining impact. *See id.* Dr. Leitzinger has explained in his original and reply declarations (1) the relevance and existence of product homogeneity (within product categories); (2) the presence of brokers, who tend to equalize the price of a grade of industrial scrap across the market; (3) the price transparency within the market; and (4) the low barriers to competition among market participants. This evidence is sufficient, at this stage, to indicate that the Plaintiffs' evidence of impact presents a common question for resolution by the Court.

(3) Damages [*34]

At this time, the Court's inquiry is limited to assessing whether methods are available to prove damages on a class-wide basis. *See In re Potash Antitrust Litig., 159 F.R.D. 682, 697 (D. Minn. 1995)*(must show only that damage methodologies are not "so insubstantial as to amount to no method at all."). In connection with class certification, the Court does not assess the class plaintiffs' damages or even determine the appropriate method for calculating such damages. Rather, courts focus on whether the computation of damages would be a "complex, highly individualized task" or a "mechanical task" that is "capable of mathematical or formula calculation." *Butt v. Allegheny Pepsi-Cola Bottling Co., 116 F.R.D. 486, 492-93 (E.D. Va. 1987)*.

Defendants argue that, even assuming that Plaintiffs could prove conspiracy and antitrust impact, a determination of damages suffered by each class member will require a highly individualized inquiry. Defendants assert that such separate calculations would be necessary because the disparities in services provided, type of scrap involved (whether homogeneous, mixed, high in moisture content, etc.) and geography would prevent any sort of uniform calculation.

Dr. Leitzinger asserts that a class-wide damage calculation is possible through application of a two-step process. First, an undercharge could be determined **[*35]** by computing, on an absolute or a percentage basis, the difference on a per unit basis between the amounts actually paid for industrial scrap and the amounts that would have been paid but for the conspiracy. Depending upon the facts as they develop in the merits portion of the case, undercharges might be calculated separately for different time periods or for different products. Second, Defendants' aggregate purchases from each member of the proposed class could be multiplied by the undercharge amounts.

The difficulty with this analysis lies, of course, in calculation of the difference in price caused by the conspiracy. According to Dr. Leitzinger, however, there are three widely accepted methodologies for estimating the prices that would have prevailed but for the alleged conspiracy: (1) a but-for benchmark based upon profit margins dealers earned and/or prices they paid pre-conspiracy and/or post-conspiracy; (2) a "yardstick approach" based upon profit margins dealers earned and/or prices they paid during the same time period as the alleged conspiracy in a "comparable" geographic market believed to be free of conspiracy; and (3) an econometric analysis designed to predict prices paid **[*36]** by dealers in the absence of the alleged conspiracy.

At this stage, the Court need not calculate the Plaintiffs' damages, nor even determine which of these calculation methods is preferable. *See Vitamins Antitrust, 209 F.R.D. at 267-68* ("[t]he Court will not assess weight to be given to parties' experts at this stage. It is enough that plaintiffs have made a threshold showing of how they intend to prove impact using generalized evidence on a class wide basis."). Plaintiffs have shown that there is a viable method for calculating class-wide damages. *See id. at 268*. Accordingly, the Court concludes that, despite the likely existence of individual damages issues, common damages issues will predominate in this case. *See id.*

(4) Fraudulent Concealment

In order to overcome the four-year statute of limitations set forth in *15 U.S.C. § 15b*, which would bar the Plaintiffs' claim for most of the class period, the Plaintiffs must demonstrate fraudulent concealment. Plaintiffs' proposed proof of this element also presents a common question for resolution on behalf of the class and supports class certification in this case.

Fraudulent concealment requires proof that (1) Defendants concealed the conduct that constituted the cause of action; (2) Plaintiffs failed **[*37]** to discover the operative facts that are the basis of the action within the limitations period; and (3) Plaintiffs used due diligence until discovery. *See Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, 394 (6th Cir. 1975)*; *Alba v. Marietta Mem'l Hosp., 184 F.R.D. 280, 289 (S.D. Ohio 1998)*. The issue of fraudulent concealment by an antitrust defendant has been held to be a common question that can be resolved on behalf of all members of a class. *See Linerboard Antitrust, 305 F.3d 145, 160 (3d Cir. 2002)*, *cert. denied*, *538 U.S. 977, 123 S. Ct. 1786, 155 L. Ed. 2d 666 (2003)*; *Vitamins Antitrust, 209 F.R.D. at 269*.

Defendants argue that class-wide proof of fraudulent concealment is particularly inappropriate here, because the inquiry will focus primarily on the last two elements—that is, what each purported class member knew and when it knew it. Plaintiffs allege that they had no knowledge of the Defendants' conspiracy (nor should they, by the exercise of reasonable diligence, have had such knowledge) prior to March 2000, when defendant Bay Metals pleaded guilty to conspiracy. Defendants contend, however, that several of the Plaintiffs at least had heard rumors of price fixing prior to that date and that Lincoln Electric, in particular, had direct evidence of such anti-competitive activity. Issues of knowledge on behalf of some of these class members, defendants assert, will result in an extensive and particularized inquiry as to when each purported class member **[*38]** became aware of the allegedly anti-competitive conduct.

Individual determinations may be necessary as to a plaintiff's knowledge and diligence; however, these individual issues do not preclude class certification, because the key "inquiry necessarily focuses on defendants' conduct, that is, what defendants did rather than what plaintiffs did." *Linerboard Antitrust, 305 F.3d at 163*, *quoting In re Flat Glass Antitrust Litig., 191 F.R.D. 472, 488 (W.D. Pa. 1999)*; *Vitamins Antitrust, 209 F.R.D. at 269*; 1 Herbert B. Newberg & Alba Conte, *Newberg on Class Actions*, §4.26 at 4-104 (3d ed. 1992). The focus is on whether "defendants successfully concealed the existence of the alleged conspiracy, which proof will be common among the class members . . . " *Linerboard Antitrust, 305 F.3d at 163*, *quoting Flat Glass, 191 F.R.D. at 488*. In determining whether the Plaintiffs' proof of fraudulent concealment presents a question common to the class, the fact of concealment is more important than the question of whether Plaintiffs suspected that prices were lower than they should have been or even whether Plaintiffs heard rumors of an alleged conspiracy.*See Linerboard Antitrust, 305 F.3d at 163* ("[k]ey questions will not revolve around whether Appellees knew that the prices paid were higher than they should have been or whether Appellees knew of the alleged conspiracy. . . ."). Accordingly, common issues are often found to "predominate" over individual **[*39]** issues in fraudulent concealment cases. *See Catfish Antitrust, 826 F. Supp. at 1044* ("[t]he court's finding that common issues would predominate over any individual considerations of fraudulent concealment is in accord with the great weight of authority. . . .").[10]

---

[10] Additionally, the applicable due diligence standard is an objective one; thus, if a reasonably diligent plaintiff would not have discovered the conspiracy, then it does not matter whether a plaintiff in fact exercised reasonable diligence. *See Sterlin v. Biomune Sys., Inc., 154 F.3d 1191, 1202, n.20 (10th Cir. 1998)*.

Moreover, to the extent that Plaintiffs' case does involve individual factual determinations, mechanisms exist for handling such issues. If necessary, a trial may be bifurcated into liability and damages segments, with individual questions handled during the damages phase. *See* Linerboard Antitrust, 305 F.3d at 163; Vitamins Antitrust, 209 F.R.D. at 269; In re Industrial Diamonds Antitrust Litig., 167 F.R.D. 374, 385 (S.D.N.Y. 1996)(individualized issues considered when the court determines each class member's damages); Town of New Castle v. Yonkers Contracting Co., 131 F.R.D. 38, 43 (S.D.N.Y. 1990)(individual issues on statute of limitations can be considered in separate determination of damages).

Whether or not Plaintiffs have established the elements necessary to prove fraudulent concealment by a preponderance of the evidence should be determined at a trial on the merits or through a well-developed summary judgment motion. *See* Vitamins Antitrust, 209 F.R.D. at 269. The Court finds, however, that at the class certification stage, common issues of fraudulent concealment predominate.

b. Superiority of Class Action

The Court finds that a class action is superior to any other type of adjudication for resolution of this matter. Defendants **[*40]** argue that class certification should be denied because it is not possible for this litigation to result in a manageable trial, where thousands of purported class members' particular circumstances and hundreds of thousands of scrap metal purchases by hundreds of dealers must be analyzed individually. The Court is not persuaded, however. Since the Court already has found that the issues involved in this case are overwhelmingly common to the class, there is no reason to conclude that litigation of this case through a class action procedure is too complex to be manageable.

This case is suitable for class action adjudication for the same reasons that courts have found such treatment appropriate in previous antitrust class actions. Courts have favored certification of a class of plaintiffs in the antitrust context, particularly where individual plaintiffs are unlikely to pursue their claims separately because the cost of an individual action outweighs the potential return for each plaintiff. *See Robinson*, 2003 WL 21756591 at * 6; Deloach, 206 F.R.D. at 567.[11] Where support for certification of a class of antitrust plaintiffs is doubtful, courts consistently have chosen to err in favor of certification. A court may review the appropriateness of such **[*41]** certification if trial later appears to be unmanageable. *See Robinson*, 2003 WL 21756591 at * 6; Deloach, 206 F.R.D. at 567.

In any event, denying class certification based only on manageability is disfavored, and any manageability problems in this case should not prohibit class certification. *See* In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 140 (2d Cir. 2001), *cert. denied*, 536 U.S. 917, 122 S. Ct. 2382, 153 L. Ed. 2d 201 (2002); *Robinson v. Texas Automobile Dealers Ass'n*, 2003 WL 21756591 at * 5. Again, any doubt should be resolved in favor of certification. *Robinson*, 2003 WL 21756591 at * 6.

III. Conclusion

---

[11] *See also* In re Sugar Industry Antitrust Litig., 73 F.R.D. 322, 358 (E.D. Pa. 1976), which sets forth severally generally applicable reasons for certifying a class in the antitrust context:

> (1) the alleged economic injuries to many proposed class members are too minuscule to justify their independent commencement of actions; (2) the proliferation of lawsuits that otherwise would result from the alleged pervasive conspiracy absent class actions will be minimized; (3) duplicative efforts by the judiciary and the litigants will be eliminated; (4) duplicative litigation expenses and attorneys' fees will be prevented; (5) defendants will be relieved from the burden of defending numerous lawsuits geographically scattered throughout the nation; and (6) inconsistent judicial decisions will be avoided.

Id.

A court should not refuse to certify a class simply because problems may later arise. *Deloach, 206 F.R.D. at 568*. The Court has determined that Plaintiffs have satisfied the requirements of *Fed. R. Civ. P. 23(a)* and *23(b)(3)*.

Accordingly, Plaintiffs' motions to preclude testimonial evidence and **[*42]** for class certification are **GRANTED**. The declarations of Gary Clayman, Joseph Curtin, John Lancaster, Bruce Safar and Jerry Negrelli are hereby excluded for purposes of this motion for class certification. The class is certified pursuant to *Rule 23(b)(3)* and is defined as follows:

> all persons or entities with scrap generating facilities located in Northeast Ohio and the surrounding counties, which is comprised of Ashtabula, Cuyahoga, Lake, Lorain, Medina, Stark and Summit counties, who sold ferrous or nonferrous industrial scrap metal to Defendants between December 1992 and March 2000. Excluded from the Class are Defendants, and their respective parents, subsidiaries and affiliates, as well as any governmental entities. Also excluded from the Class is any party, whether named or not, who is ultimately deemed to have participated in an illegal conspiracy.[12]

IT IS SO ORDERED.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo whether the district court correctly granted summary judgment, applying the same standard that governed the district court.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > ... > Relief From Judgments > Grounds for Relief from Final Judgment, Order or Proceeding > Newly Discovered Evidence

HN2[] **Standards of Review, Abuse of Discretion**

An appellate court reviews whether the district court correctly denied a motion for relief under *Fed. R. Civ. P. 60* for abuse of discretion.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN3[] **Monopolies & Monopolization, Attempts to Monopolize**

To demonstrate attempted monopolization a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The offense of monopoly under *15 U.S.C.S. § 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Claims

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Sherman Act, Claims**

The first element of a *15 U.S.C.S. § 2* claim, monopoly power, is the power to control prices in or to exclude competition from the relevant market. The second element requires predatory or exclusionary acts or practices that have the effect of preventing or excluding competition within the relevant market. For a practice to be exclusionary, it must harm the competitive process and thereby harm consumers. Harm to one or more competitors will not suffice for a *§ 2* violation. The relevant inquiry is not whether a company's attempt to exclude adversely impacts competition, but rather whether its acquisition of the power to exclude competitors had a sufficiently adverse impact on competition to constitute a Sherman Act violation.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Two theories exist upon which to predicate a unilateral refusal to deal claim: (1) the intent test and (2) the essential facility test. Under the intent test, it is unlawful for a monopolist to maintain or extend its monopoly power by intentionally engaging in conduct that unnecessarily excludes competitors and impairs competition. Under the essential facility test, a company that has exclusive control over a facility essential to effective competition may not deny potential competitors access to that facility on reasonable terms and conditions if to do so would create or maintain monopoly power in the relevant market. A plaintiff asserting a refusal to deal claim has the burden of proving that the defendant controls an essential facility that cannot be practically or economically duplicated.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

In the absence of any purpose to create or maintain a monopoly, a company may deal or refuse to deal with whomever it pleases. Even a company with monopoly power has no general duty to cooperate with its business rivals and may refuse to deal with them if valid business reasons exist for such refusal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

Unlawful monopoly power requires anticompetitive conduct, which is conduct without a legitimate business purpose that makes sense only because it eliminates competition. Likewise, refusal to deal that is designed to protect or further the legitimate business purposes of a defendant does not violate the antitrust laws, even if that refusal injures competition. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws. Once the defendant has met its burden to show its valid business justification, the burden shifts to the plaintiff to show that the proffered business justification is pretextual.

Civil Procedure > ... > Relief From Judgments > Grounds for Relief from Final Judgment, Order or Proceeding > Newly Discovered Evidence

HN10[] **Grounds for Relief from Final Judgment, Order or Proceeding, Newly Discovered Evidence**

Relief pursuant to *Fed. R. Civ. P. 60(b)(2)* is appropriate only if the moving party offers newly discovered evidence that could alter the outcome of the trial. An appellate court reviews a district court's decision for abuse of discretion. It is not enough that a grant of the motion might have been permissible or warranted.

Opinion by: DUBINA

Opinion

[*1446]** **[*1290]** DUBINA, Circuit Judge:

Plaintiff-Appellant, Morris Communications Corp. ("Morris"), brought suit against Defendant-Appellee PGA TOUR, Inc. ("PGA"), alleging that PGA violated section 2 of the Sherman Act, codified at *15 U.S.C. § 2*, by monopolizing the markets for (1) the publication of compiled real-time golf scores on the internet, and (2) the sale, or syndication of those scores. In addition, Morris alleged that PGA further violated *section 2 of the Sherman Act* by refusing to deal with Morris. The district court granted summary judgment in favor of PGA because it found, *inter alia*, that PGA had a valid business justification for **[***1447]** its actions. For the reasons that follow, we affirm the judgment of the district court.

I. BACKGROUND

A. Facts

Morris is a media company that publishes print and electronic newspapers. PGA is the sponsor of a series of professional golf tournaments throughout North America **[**2]** known as the PGA Tour. In order to provide golf scores during its tournaments, PGA has developed a Real-Time Scoring System ("RTSS") that allows PGA to monitor the play around the entire golf course. RTSS is an elaborate electronic relay scoring system that relies on state-of-the-art computer technology and equipment as well as dozens of trained workers and volunteers.

RTSS works as follows. During a PGA golf tournament, volunteers known as walking scorers follow each group of golfers on the course and tabulate the scores of each player at the end of each hole **[*1291]** played. The scores are then collected by other volunteers, known as hole reporters, located at each of the eighteen greens on the golf course, who relay the scoring information to a remote production truck staffed by PGA personnel. The scores of all participating golfers are then processed at the remote production truck and transmitted to PGA's website, *www.pgatour.com*, as real-time golf scores, which are scores that are transmitted electronically nearly contemporaneously to their actual occurrence on the golf course. At the same time, the compiled scores are also transmitted to an on-site media center where members of the media **[**3]** are able to access the scores. The same information is also transmitted to various electronic leaderboards located throughout the golf course. As their name suggests, the leaderboards typically show only the top ten or fifteen players' scores.

The nature of a PGA golf tournament makes it impossible for one person to physically follow all the players at once. First, the average golf course spans approximately 150 acres and various golfers play numerous holes simultaneously. In addition, the PGA does not allow its invitees to use cell phones and hand-held devices on the course because such devices might disrupt play. Therefore, the only source of compiled golf scores for all tournament players is RTSS. Likewise, the only physical location at which to obtain compiled golf scores is the media center.

In order for media organizations to have access to the PGA media center, they must obtain free press credentials from PGA. To obtain these credentials, all media organizations must agree to follow PGA's terms and conditions, including PGA's On-Line Service Regulations ("OLSR"). The OLSR require media organizations to delay publication on their internet websites of scoring information obtained **[**4]** by RTSS until the earliest of (1) thirty minutes after the actual occurrence of the shot [1] **[**5]** or (2) such information has become legally available in the public domain, i.e. after the scores are posted on PGA's official website, *www.pgatour.com*. [2] In addition, the OLSR prohibit credentialed media organizations from selling, or syndicating, compiled scoring information obtained in the media center to non-credentialed third-party internet website publishers without first buying a license to do so from PGA. [3]

Morris contends that, as a result of the OLSR, PGA is the only entity able to publish and sell real-time golf scores. Thus, Morris continues, PGA has an unfair advantage in the publication and syndication **[*1292]** of the scores. PGA counters that it adopted the OLSR to preserve the value of its investment in creating **[***1448]** and developing RTSS and to promote the competitiveness of its own website.

Based on the allegedly illegal OLSR, Morris filed suit against PGA, asserting four antitrust claims: (1) monopolization of the internet markets, (2) unlawful refusal to deal, (3) monopoly leveraging, and (4) attempted monopolization of the internet markets. [4]

1

> Prior to 1999, credentialed members of the media could view scores in the media center and then re-key them directly into their own computers for transmission to their company's Internet servers. The result was that competitors of pgatour.com, including Morris, were able to publish real-time scores on their web sites as fast as or possibly faster than pgatour.com. Beginning in January 1999, shortly after the PGA Tour entered into an exclusive syndication contract with USA Today, it instituted [OLSR] applicable to all credentialed media invitees. Around the same time, Morris began publishing scores from PGA Tour tournaments on its web sites and selling them to third parties, and Morris appears to have been the PGA Tour's only major competitor in the syndication market.

Morris Communications Corp. v. PGA Tour, Inc., 235 F. Supp. 2d 1269, 1274 (M.D. Fla. 2002). The version of the OLSR at issue here was instituted in January 2000.

2 PGA agreed that once the golf scores are posted on its website, they are in the public domain. *Id. at 1275 n.9*.

3 "No scoring information may be used by, sold, given, distributed or otherwise transferred to, any party other than the Credentialed Site in any manner whatsoever, without the prior written consent of PGA TOUR." [R. Vol. 1 at Tab 1, Exh. 4.]

[6]** *B. Procedural History*

After extensive pre-trial discovery, the parties filed cross-motions for summary judgment on each claim. The district court granted PGA's motion for summary judgment, finding that PGA had a valid business justification for its OLSR because the OLSR prevented Morris from free-riding on PGA's investment in its costly RTSS. Accordingly, the district court found that PGA had not violated the antitrust laws even if it operated a monopoly and refused to deal with Morris. [5]

[7]** Subsequent to the granting of summary judgment in favor of PGA, Morris filed a *Rule 60* motion for relief from judgment on the ground that, following the issuance of judgment in favor of PGA, PGA adopted new terms of service ("TOS") regarding *www.pgatour.com* in further violation of *§ 2 of the Sherman Act*. The new TOS prohibit anyone from using the information displayed on *www.pgatour.com* for a commercial purpose without first buying a license from PGA. The district court denied the motion, finding that the new TOS were beyond the scope of the instant lawsuit, which addressed only PGA's media credentialing regulations and the OLSR. Accordingly, the district court found that Morris's challenge to the new TOS would be more aptly addressed in a separate lawsuit.

Morris timely and separately appealed the adverse summary judgment and *Rule 60* orders. This court consolidated the two appeals.

II. STANDARDS OF REVIEW

HN1[] This court reviews *de novo* whether the district court correctly granted summary judgment in favor of PGA on all counts, applying the same standard that governed the district court. *Levinson v. Reliance Standard Life Ins. Co., 245 F.3d 1321, 1325 (11th Cir. 2001).* **[**8]**

HN2[] This court reviews whether the district court correctly denied Morris's *Rule 60* motion for abuse of discretion. *See Bivens Gardens Office Bldg., Inc. v. Barnett Banks of Fla., Inc., 140 F.3d 898, 905 (11th Cir. 1998)*.

III. ANALYSIS

Before discussing the antitrust issues in this case, it is important to note what this case is *not* about. Contrary to the arguments of Morris and its *amici curiae*, this case is not about copyright law, [6] the Constitution, **[*1293]** the *First Amendment*, [7] or freedom of the press in news reporting. This case is a straight-forward antitrust case involving a

---

[4] Morris also alleged violations of Florida Deceptive and Unfair Trade Practices Act, *Fla. Stat. Ann. § 501.201 et seq.*, and tortious interference with contract. Morris has not appealed the district court's grant of summary judgment in favor of PGA on these claims.

[5] The district court did not, however, find that PGA had unlawfully monopolized or refused to deal. To the contrary, the district court found that Morris failed to prove a *§ 2* claim of monopolization as a matter of law, *Morris Communications, 235 F. Supp. 2d at 1283*; that the media center was not an essential facility, *id. at 1285*; that PGA did not have unlawful intent to harm competition or a competitor, *id. at 1284*, and thus did not unlawfully refuse to deal with Morris, *id. at 1285-86*, engage in unlawful monopoly leveraging, *id. at 1286*, or unlawfully attempt to monopolize, *id.*

[6] The arguments of Morris and its amici, who are various media organizations, entities, and associations, focus largely on irrelevant copyright law and argue that facts, such as golf scores, and compilations of facts are generally not a proper subject for copyright protection. While this assertion is a correct statement of law, it has no bearing on whether the golf scores and compilation of golf scores are the proprietary product of PGA's RTSS. At oral argument, Morris conceded that this is not a copyright case.

product and a defendant's assertion of a valid business justification as its defense to anticompetitive actions, if any. Also important to note is that this case is being decided based upon the facts presented, not a hypothetical situation, no matter how probable its actualization. [8] **[**10]** Accordingly, the only real issue before us is whether PGA's restrictions and prohibitions regarding Morris's ability to *sell* compiled real-time golf **[***1449]** scores to third parties violates *§ 2 of the Sherman Act.* We do not address Morris's right of access to and internal dissemination of compiled **[**9]** real-time golf-scores, as permitted by the PGA. [9]

[11]** *A. Monopolization*

10

Section 2 of the Sherman Act provides that ***HN4***[] "every person who shall monopolize, **[**12]** or attempt to monopolize, . . . any part of the trade or commerce among the several States, . . . shall be deemed guilty of a felony. . . ." *15 U.S.C. § 2*. ***HN5***[] "The offense of monopoly under *§ 2 of the Sherman Act* has two elements: (1) the possession of monopoly power in the relevant **[*1294]** market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*.

HN6[] The first element, monopoly power, is the power to control prices in or to exclude competition from the relevant market. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 1005, 100 L. Ed. 1264 (1956)*. The second element requires predatory or exclusionary acts or practices that have the effect of preventing or excluding competition within the relevant market. *See United States v. Microsoft, 346 U.S. App. D.C. 330, 253 F.3d 34, 58 (D.C. Cir. 2001)*. In order for a practice to be exclusionary, "it must harm the

---

[7] In its argument for summary judgment in the district court, Morris stated that "this case is not a *First Amendment* case . . . it's an antitrust case." [R. Vol. 10 at pp. 8-9.]

[8] As the district court stated at the hearing on the cross-motions for summary judgment, "all that this court is interested in is the issues that you people bring to it. We're not making advisory opinions. And we don't change the facts. The facts are what the facts are. And what [we] rule on today may be a lot different than the case the two of you are involved in tomorrow." [R. Vol. 10 at p. 106.]

[9] At the hearing regarding the preliminary injunction, the district court asked counsel for PGA if PGA would permit "Morris . . . to disseminate this information to its companies, its various news companies, not charging them anything, just disseminating it"? Counsel for PGA responded:

> There's no problem because that to us is news coverage, and . . . we eagerly, eagerly invite and want the press to do their function, their normal function of gathering and disseminating the news, and because it's so important to us to have them do that, we told Morris a year ago that we would allow them in the media center to sit there and re-key right from there into their own website and any of their related companies as a matter of news coverage, they could have those real-time scores right away for free. . . . The problem comes in only when Morris wishes to go into another business, which they label the news syndication business. . . . It is not the business of gathering and disseminating news. It is the business of selling a commercially valuable product that we have developed and paid for and we ought to be the ones to sell that.

[R. Vol. 8 at pp. 34-36.]

[10] Morris challenges the district court's resolution of its monopolization and attempt to monopolize claims. For the purposes of this case, the elements of the two offenses differ in only one material respect: attempt to monopolize requires specific intent to achieve monopoly power. *See Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890-91, 122 L. Ed. 2d 247 (1993)* ***HN3***[] ("To demonstrate attempted monopolization a plaintiff must prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power."). Therefore, the attempt claim in this case is more difficult to maintain and prove. Because Morris does not withstand summary judgment on its monopolization claim, it cannot maintain its attempt claim. Accordingly, we decline to discuss the attempt claim further.

competitive **[**13]** *process* and thereby harm consumers." *Id.* "Harm to one or more *competitors* will not suffice" for a *§ 2* violation. *Id*.; *see also* *Consultants & Designers, Inc. v. Butler Serv. Group, Inc., 720 F.2d 1553, 1562 (11th Cir. 1983)* ("The relevant inquiry is not whether [a company's] present attempt to exclude adversely impacts competition but rather whether its acquisition of the power to exclude competitors had a sufficiently adverse impact on competition to constitute a [Sherman Act] violation.").

B. Refusal to Deal

11

[14]** ***HN7***[] Two theories exist upon which to predicate a unilateral refusal to deal claim: (1) the intent test and (2) the essential facility test. *Mid-Texas Communications Sys., Inc. v. AT&T, 615 F.2d 1372, 1387 n.12 (5th Cir. 1980)*. [12] Under the intent test, it is unlawful for a monopolist to maintain or extend its monopoly power by intentionally engaging in conduct that unnecessarily excludes competitors and impairs competition. *See* *id. at 1388*; *see also* *Eastman Kodak Co. v. S. Photo Materials Co., 273 U.S. 359, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*. **[***1450]**

Under the essential facility test, a company that has exclusive control over a facility essential to effective competition may not deny potential competitors access to that facility on reasonable terms and conditions if **[**15]** to do so would create or maintain monopoly power in the relevant market. *Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272, 1285 (11th Cir. 2002)*, *cert. granted and judgment vacated on other grounds*, *540 U.S. 1147, 124 S. Ct. 1143, 157 L. Ed. 2d 1040 (2004)*; *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1132-33 (7th Cir. 1983)*; *see also* *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872, 881 (2004)* ("The indispensable requirement for invoking the doctrine is the unavailability of access to the 'essential facilities'; where access exists, the doctrine serves no purpose."). The plaintiff has the burden of proving that the defendant controls an essential facility that cannot be practically or economically duplicated. *See* *Covad Communications, 299 F.3d at 1285*.

HN8[] In the absence of any purpose to create or maintain a monopoly, however, a **[*1295]** company may deal or refuse to deal with whomever it pleases. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601-02, 105 S. Ct. 2847, 2857, 86 L. Ed. 2d 467 (1985)* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)).* **[**16]** Even a company with monopoly power has no general duty to cooperate with its business rivals and may refuse to deal with them if valid business reasons exist for such refusal. *See* *Mid-Texas Communications, 615 F.2d at 1388*.

Ordinarily, when determining whether a defendant has violated *§ 2 of the Sherman Act*, we first determine the relevant market and then decide whether the defendant possessed monopoly power in that market. In this case, however, we do not pursue such an inquiry because we agree with the district court that even if PGA possessed monopoly power in the relevant market, Morris's *§ 2* claims cannot prevail because PGA has a valid business justification for its actions. Therefore, even if PGA is monopolistic, and even if PGA refused to deal with Morris, it has not violated *§ 2 of the Sherman Act*.

C. Valid Business Justification as a Defense

---

[11] Morris challenges the district court's resolution of its refusal to deal and monopoly leveraging claims. For purposes of this case, the elements of the two claims are sufficiently similar to warrant only one discussion. *See* *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872, 883 n.4 (2004)* ("Leveraging presupposes anticompetitive conduct, which in this case could only be the refusal-to-deal claim we have rejected.").

[12] In *Bonner v. City of Prichard, 661 F.2d 1206, 1207-09 (11th Cir. 1981)* (en banc), this court adopted as binding precedent all Fifth Circuit decisions issued prior to October 1, 1981.

"The Sherman Act is . . . the 'Magna Carta of free enterprise,' but it does not give judges *carte blanche* to insist that a monopolist alter its way of doing business whenever some other approach might yield greater competition." Verizon Communications, 124 S. Ct. at 883 (internal quotations **[**17]** omitted). To the contrary, "Section 2 of the Sherman Act . . . seeks merely to prevent *unlawful monopolization*" and unlawful refusals to deal. *Id.*

HN9[] Unlawful monopoly power requires anticompetitive conduct, which is "conduct without a legitimate business purpose that makes sense only because it eliminates competition." *Gen. Indus. Corp. v. Hartz Mountain Corp., 810 F.2d 795, 804 (8th Cir. 1987)*; **see also** , *LePage's Inc. v. 3M324 F.3d 141, 153-54 (3rd Cir. 2003)* (discussing *Conwood Co., L.P. v. United States Tobacco Co., 290 F.3d 768 (6th Cir. 2002)*, *cert. denied*, *537 U.S. 1148, 154 L. Ed. 2d 850, 123 S. Ct. 876 (2003))*. Likewise, refusal to deal that is designed to protect or further the legitimate business purposes of a defendant does not violate the antitrust laws, even if that refusal injures competition. *See Aspen Skiing, 472 U.S. at 604, 105 S. Ct. at 2858*; *see also NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 137, 119 S. Ct. 493, 499, 142 L. Ed. 2d 510 (1998)* (citing *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 2589, 125 L. Ed. 2d 168 (1993)),* **[**18]** for the proposition that "even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws"); *United States Football League v. National Football League, 842 F.2d 1335, 1360 (2d Cir. 1988)* (concluding that no *§ 2* liability existed where network's actions were based on desire "to obtain $ 736 million in rights fees, not to exclude competitors").

Once the defendant has met its burden to show its valid business justification, the burden shifts to the plaintiff to show that the proffered business justification is pretextual. *See U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 1002 (11th Cir. 1993)*; *see also Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1212 (9th Cir. 1997)*.

In this case, PGA met its business justification burden by showing that it seeks to prevent Morris from "free-riding" on PGA's RTSS technology. *See Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 55, 97 S. Ct. 2549, 2560, 53 L. Ed. 2d 568 (1977)* (stating that prevention of "free-riding" by competitors is a **[***1451]** legitimate business **[*1296]** purpose); **[**19]** *Consultants & Designers, 720 F.2d at 1559* (concluding that defendant "had a legitimate interest in protecting from opportunistic appropriation its investment in acquiring the information necessary to carry on its business"). To achieve its business purpose, PGA has refused to grant Morris access to PGA tournaments unless Morris agrees not to sell the product of PGA's proprietary RTSS - compiled real-time golf scores - to noncredentialed third-party internet publishers. Morris responds that it has a right to sell such product notwithstanding that RTSS was developed and paid for, and is operated by, PGA. [13] We disagree with Morris. The compiled real-time golf scores acquired through RTSS are not a product that Morris has a right to sell because they are a derivative product of RTSS, which PGA owns exclusively. [14] We agree with the district court that PGA "has a right to sell or license its product, championship golf, and its derivative product, [compiled] golf scores, on the Internet in the same way the [PGA] currently sells its rights to television broadcasting stations." *Morris Communication Corp. v. PGA Tour, Inc., 235 F. Supp. 2d 1269, 1282 (M.D. Fla. 2002).* **[**20]**

[21]** If Morris wishes to sell PGA's product, it must first purchase it from PGA. *See Consultants & Designers, 720 F.2d at 1559* (explaining that plaintiff did not have the right to abrogate defendant's property interest). *Section 2 of the Sherman Act* does not require PGA to *give* its product freely to its competitors. *See Seagood Trading Corp. v.*

---

[13] Morris also argues that PGA is not allowed to put restrictions on the dissemination of the compiled golf scores once they reach the media center because PGA did not previously put any restrictions on their dissemination. This argument is unpersuasive. PGA has a right to control its property interest in its RTSS and the compiled golf scores, which are the product of RTSS, regardless of its past practices. As the district court stated: "what [PGA] say[s] the delay should be and what delay [PGA] can legally impose are two different things perhaps." [R. Vol. 10 at p. 104.] The lack of prior restrictions is merely indicative of PGA's symbiotic relationship with the media.

[14] Morris stated in the district court that it was "not disputing that [PGA] may have a property right." [R. Vol. 10 at p. 93.] As counsel for PGA stated at the hearing on the preliminary injunction: "without this elaborate, comprehensive system there wouldn't be real-time scores that Morris would like to sell to third parties. It just wouldn't be there because these don't exist in the air." [R. Vol. 8 at p. 31.]

Jerrico, Inc., 924 F.2d 1555, 1573 (11th Cir. 1991) (stating that it "is not a function of the antitrust laws" to equip plaintiffs with defendants' competitive advantages). PGA is willing to sell its product to its competitors, including Morris, thereby allowing credentialed media organizations like Morris to syndicate compiled real-time golf scores after paying a licensing fee to PGA. Accordingly, we conclude from the record that PGA has satisfied its burden to show a valid business justification.

D. Business Justification Is Not Pretextual

Because PGA has met its burden of showing that its asserted business justification is valid, the burden shifts to Morris to allege facts that support an inference that the proffered justification is merely pretextual, thereby establishing genuine issues of material **[**22]** fact. *U.S. Anchor Mfg., 7 F.3d at 1002*; *see also* *Image Technical Servs., 125 F.3d at 1212*. Morris argues that PGA's only justification for its refusal to deal with Morris on Morris's terms is economic and such sole motivation is not a valid business justification; thus, PGA's justification is pretextual. *See* *LePage's, 324 F.3d at 163* ("Defendant's assertion that it acted in furtherance of its economic interests does not constitute the type of **[*1297]** business justification that is an acceptable defense to *§ 2* monopolization.").

Morris supports its argument with a series of cases which are fundamentally distinguishable from this case. In the cases upon which Morris relies, the plaintiffs alleging antitrust violations had created with their own work and efforts, or purchased with their own money, their *very own products* that defendants prohibited them from selling. *See, e.g.*, *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 485, 112 S. Ct. 2072, 2092, 119 L. Ed. 2d 265 (1992)* (plaintiffs "invest substantially . . . in parts inventory"); *Aspen Skiing, 472 U.S. at 587-88, 105 S. Ct. at 2850* **[**23]** (plaintiff developed and maintained its own competitive ski resort and ski packages); *Lorain Journal Co. v. United States, 342 U.S. 143, 149-50, 72 S. Ct. 181, 184-85, 96 L. Ed. 162 (1951)* (injured competitor trying to sell its radio air time for advertisements); *Int'l News Serv. v. Associated Press, 248 U.S. 215, 221, 39 S. Ct. 68, 69, 63 L. Ed. 211 (1918)* (plaintiff "gathers in all parts of the world, by means of various instrumentalities of its own, **[***1452]** by exchange with its members, and by other appropriate means, news and intelligence of current and recent events of interest to newspaper readers"); *LePage's, 324 F.3d at 144* (plaintiff selling its own transparent tape); *Microsoft Corp., 253 F.3d at 63* (injured competitors deterred from selling their own computers and browsers); *Nat'l Basketball Ass'n v. Motorola, Inc., 105 F.3d 841, 854 (2d Cir. 1997)* (analyzing free-riding issues and noting that plaintiff did not free-ride because it used its own efforts to conduct business); *U.S. Anchor Mfg., 7 F.3d at 990* (plaintiff manufactures and supplies anchors); *Trans Sport, Inc. v. Starter Sportswear, Inc., 964 F.2d 186, 187 (2d Cir. 1992)* **[**24]** (plaintiffs purchased product from defendants).

Morris refers to this distinction as PGA's "sweat of the brow" defense and correctly states that it is not a defense *in a copyright case*. *Feist Publ'ns, Inc. v. Rural Tel. Serv. Co., Inc., 499 U.S. 340, 359-60, 111 S. Ct. 1282, 1295, 113 L. Ed. 2d 358 (1991)* (concluding that "sweat of the brow" is no defense in a copyright case). [Appellant Br. at 53-55.] This well-established rule of copyright law is irrelevant, however, in this antitrust case. The "sweat of the brow" product, to which Morris (and the district court) refer, is no different than, for example, the interconnection services in *Verizon Communications, 124 S. Ct. at 876*, the job shoppers in *Consultants & Designers, 720 F.2d at 1555*, and the sports jackets in *Starter Sportswear, 964 F.2d at 187*.

Moreover, even if we overlook the fundamental and dispositive distinction between this case and the cases cited by Morris, the case law supports summary judgment in favor of PGA. *See* *Verizon Communications, 124 S. Ct. at 879* ("*Aspen Skiing* is at or near the outer boundary of *§ 2* liability"); **[**25]** *Aspen Skiing, 472 U.S. at 593-94, 105 S. Ct. at 2852-53* (defendant refused to accommodate and cooperate with plaintiff, refused to *sell* its product to plaintiff, and acted contrary to its own economic interests in order to eliminate plaintiff); *Otter Tail Power Co. v. United States, 410 U.S. 366, 370-72, 93 S. Ct. 1022, 1026-27, 35 L. Ed. 2d 359 (1973)* (defendant was already in the business of *selling* a service to certain customers and refused to *sell* the same service to certain other customers); *Lorain Journal, 342 U.S. at 148-49, 72 S. Ct. at 183-84* (defendant refused to *sell* to plaintiff in violation of the Sherman Act); *Starter Sportswear, 964 F.2d at 189-91* (holding, in a factually analogous case, that defendant had valid business justification for refusal to deal); *Fishman v. Estate of Wirtz, 807 F.2d 520, 562 (7th Cir. 1986)* (holding defendant liable under *§ 2* for refusing to *lease* Chicago Stadium to plaintiff).

[*1298] The relevant law supports our conclusion that Morris's argument is unavailing and does not show that PGA's business justification is pretextual. The prevention **[**26]** of free-riding, which is an inherently economic motivation, provides a valid business justification on the facts presented here. Accordingly, Morris has not raised any issues of material fact and summary judgment in favor of PGA was proper. *See Int'l Rys. of Cent. Am. v. United Brands Co., 532 F.2d 231, 239-40 (2d Cir.)*, *cert. denied*, *429 U.S. 835, 50 L. Ed. 2d 100, 97 S. Ct. 101 (1976)* (stating that proof of a company's reasonable steps to preserve its business interests does not, without more, raise a genuine issue of material fact under *§ 2*).

E. Morris's Rule 60(b) motion

HN10[] Relief pursuant to *Rule 60(b)(2)* is appropriate only if the moving party offers newly discovered evidence that could alter the outcome of the trial. *See Wilson v. Thompson, 638 F.2d 801, 804 (11th Cir. 1981)*; *Fed. R. Civ. Pro. 60(b)(2)*. Because we review the district court's decision for abuse of discretion, "it is not enough that a grant of the motion might have been permissible or warranted." *Fackelman v. Bell, 564 F.2d 734, 736 (5th Cir. 1977)*. After reviewing the record, we conclude that the district court **[**27]** did not err in finding that the new TOS evidence would have failed to alter the outcome of the trial in light of PGA's valid business justification for its regulations. Accordingly, we hold the district court did not abuse its discretion when it denied the *Rule 60* motion.

IV. CONCLUSION

Contrary to Morris's argument regarding copyright law, this case is not about copyright and the district court did not find the golf scores to be trade secrets. [15] The district court correctly found that a company - even a monopolist **[***1453]** company - that expends time and money to create a valuable product does not violate the antitrust laws when it declines to provide that product to its competitors for free. PGA has accommodated Morris at every step along the way, has agreed to sell its product to Morris, and has acted appropriately to protect its economic interests and investments. Yet Morris demands that it be given access to the product of PGA's proprietary RTSS, without compensating PGA, so that Morris can then sell that product to others for a fee. That is the classic example of "free-riding," the prevention of which, under ***antitrust law***, constitutes a legitimate pro-competitive reason **[**28]** for imposing a restriction. For the foregoing reasons, we affirm the district court's grant of summary judgment in favor of PGA and the district court's order denying Morris's *Rule 60(b)* motion.

AFFIRMED.

---

[15] "The [PGA]'s property right does not come from copyright law, as copyright law does not protect factual information, like golf scores." *Morris Communications, 235 F. Supp. 2d at 1281*.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

Pursuant to *Fed. R. Civ. P. 56(c)*, a court may grant summary judgment where the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The moving party bears the initial burden of showing an absence of evidence to support the nonmoving party's case. Once the moving party meets this burden, the burden shifts to the nonmoving party to demonstrate a genuine issue for trial on a material matter. The nonmoving party may not rest solely on the allegations in the pleadings, but must instead designate specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Entitlement as Matter of Law, Appropriateness**

A genuine issue of fact does not exist, and summary judgment is appropriate, if the evidence is such that a reasonable jury could not return a verdict for the nonmoving party. If the nonmoving party's evidence is merely colorable, or is not significantly probative, summary judgment may be granted. In essence, the inquiry is whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law. The court may consider only admissible evidence when ruling on a summary judgment motion. Additionally, the court, when ruling on a motion for summary judgment, must construe the facts in the light most favorable to the nonmoving party.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN3[] **Federal & State Interrelationships, Choice of Law**

Federal courts applying state law ascertain and apply the proper state law with the goal of insuring that the result obtained is the one that would have been obtained in state court. To determine which state's substantive law to apply, a federal court applies the choice of law provisions of the state in which the court sits.

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN4[] **Corporations, Subsidiary Corporations**

Absent allegations or evidence of "independent conduct" on the part of the parent, there is no basis upon which to hold a parent directly liable for the acts of a subsidiary. The question is what level of independent conduct is sufficient to hold a parent directly liable for anticompetitive effects occurring at the subsidiary level.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN5[] Antitrust & Trade Law, Sherman Act

A parent cannot be held liable for conspiring with its subsidiaries to engage in anticompetitive conduct under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, because the parent and subsidiaries are, for antitrust purposes, a single enterprise acting with a unity of purpose.

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN6[] Corporations, Subsidiary Corporations

Absent allegations or evidence of independent conduct on the part of the parent, there is no basis upon which to hold a parent directly liable for the acts of a subsidiary. Specifically, when a plaintiff alleges, as the only basis for liability against a parent, that the parent owns the subsidiary that engaged in wrongful conduct, such allegation is insufficient to hold a parent directly liable for the wrongful conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Agency Relationships > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

Torts > Vicarious Liability > Corporations > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

If a parent corporation, through its own employees and agents, is directing, controlling, and encouraging a wholly-owned subsidiary's anticompetitive conduct, the subsidiary dare not defy its sole shareholder's policies. To conclude that a parent can direct and require anticompetitive conduct of its subsidiaries, like any principal directing the conduct of an agent, and then escape antitrust liability by hiding behind its separate incorporation is counterintuitive. Furthermore, the United States Supreme Court has suggested that direct liability may exist for parent corporations under the Sherman Act, *15 U.S.C.S. § 1 et seq.* Additionally, lower courts have recognized that parent corporations can be held directly liable for independently participating in the antitrust violations of their subsidiaries.

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] Antitrust & Trade Law, Clayton Act

A parent corporation is not a competitor of another corporation merely because its subsidiary is. On the other hand, to interpret the Clayton Act as meaning that the business activity of the subsidiary can never be considered in determining whether the parent is a competitor within the meaning of § 8 would assume that Congress intended to permit such a simple and obvious means of avoidance as to render the statute meaningless, and would ignore the United States Supreme Court's admonition that the antitrust laws are aimed at substance rather than form. This reasoning holds equal force in determining liability under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, as each of these sections of antitrust laws shares the primary concern of preventing the undue aggregation of market power.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN9[] **Antitrust & Trade Law, Sherman Act**

Wrongful conduct may occur at the parent level resulting in anticompetitive effects reverberating at the subsidiary level. A parent may be directly liable for anticompetitive conduct at the subsidiary level when the parent sufficiently controls the subsidiary.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN10[] **Antitrust & Trade Law, Sherman Act**

A parent can be considered a competitor in a market where its subsidiary is a participant if, and only if, the parent sufficiently controls, dictates, or encourages the policies of the subsidiary. When the parent controls, directs, or encourages the subsidiary's anticompetitive conduct, the parent engages in sufficient independent conduct to be held directly liable as a single enterprise with the subsidiary under the Sherman Act, *15 U.S.C.S. § 1 et seq.*

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > General Overview

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

Torts > Vicarious Liability > Corporations > General Overview

HN11[] **Shareholder Duties & Liabilities, Piercing the Corporate Veil**

A corporation may be held liable for the acts of its subsidiary, and its corporate veil may be pierced, where the subsidiary is merely an alter ego of the principal.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Fraud & Misrepresentation

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > General Overview

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Inadequate Capitalization

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > Sham Corporations

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN12[] **Alter Ego, Fraud & Misrepresentation**

A subsidiary is the alter ego of its parent when (1) there is such a unity of interest and lack of respect given to separate identity of parent and subsidiary that personalities and assets of parent and subsidiary are indistinct, and (2) adherence to the corporate fiction sanctions fraud, promotes injustice, or leads to an evasion of legal obligations. Among the specific factors used in determining whether the parent and subsidiary have maintained their separate identities are: (1) whether the subsidiary is operated as a separate entity; (2) whether parent and subsidiary have commingled funds; (3) whether the subsidiary has failed to maintain adequate minutes and records; (4) whether the parent owns and controls the subsidiary; (5) whether the subsidiary lacks corporate assets or is undercapitalized; (6) whether the subsidiary is used as a mere shell, instrumentality or conduit of the parent; (7) whether the parent and subsidiary have disregarded the legal formalities and failed to maintain an arms-length relationship, and (8) whether there has been a diversion of the subsidiary's assets for use by the parent.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] **Relevant Market, Geographic Market Definition**

The first step in analyzing an antitrust claim is to determine the relevant product market in which the defendant is operating. In order to state a claim under ***antitrust law***, plaintiff must define this market. The relevant market consists of both a geographic market and a product market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN14[] **Market Definition, Relevant Market**

There is no subject matter in ***antitrust law*** more confusing than market definition. The concept of market definition itself oversimplifies the very complex interactions between a number of differently situated buyers and sellers, each of whom has different costs, needs, and substitutes. At its simplest, the relevant product market is that market which is relevant to the legal issue before the court. By defining the relevant market, the court strives to identify firms that compete with each other and the alleged anticompetitive conduct restraining trade in the market. The definition of the relevant market is a question of fact for the factfinder, and the plaintiff has the burden of proof on the issue.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN15[] **Regulated Practices, Market Definition**

A product market is composed of products reasonably interchangeable for the purposes for which they are produced. The definition of relevant market, therefore, turns on a determination of available substitutes. Available substitutes are demonstrated if, when prices are appreciably raised or volume appreciably curtailed for the product within the geographic area, supply from other sources can be expected to enter promptly enough or in large enough amounts to restore the old price and volume. Reasonable interchangeability, therefore, includes analysis of cross-elasticity of demand. Demand for a product is said to be "elastic" if an increase in the price causes less of the product to be purchased. There is said to be "cross-elasticity of demand" between two products if rising prices for product A cause consumers to switch to product B. The inference is that consumers readily substitute one product for the other and that the products, therefore, probably compete in the same market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN16[] **Regulated Practices, Market Definition**

The identity of the relevant product to be studied to determine the market varies based on the level of commerce where the plaintiffs argue the defendants have monopolized competition. Within the universe of a product market, therefore, there may exist a submarket -- a portion of the product market that, for purposes of the specific antitrust case, is considered a separate market. Submarket analysis is par and parcel of the reasonable interchangeability test. Similarly, the identity of the relevant consumer for the purposes of determining market definition is not necessarily the end-user of the product, but, rather, is also determined based on the level of commerce effected by defendant's behavior.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Regulated Practices, Market Definition**

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated. The United States Supreme Court has clearly held that antitrust laws apply not only to restraints on output markets, but to input markets as well, including both labor and input commodities. Restraints on input markets fall under antitrust purview because they will eventually adversely affect end-consumers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN18[] **Monopolies & Monopolization, Actual Monopolization**

In an antitrust case, when evaluating many different instances of conduct by defendant, the conduct as a whole must always be analyzed, rather than compartmentalized, because it is the cumulative impact of the conduct on consumers which is the relevant inquiry in a monopolization claim.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN19[] **Regulated Practices, Market Definition**

Antitrust law was not enacted to protect a competitor who compounds his wrong by using his market power in an illegal market to restrain competition in another, legal market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN20[] **Regulated Practices, Market Definition**

The scope and definition of the market is determined by examining reasonable interchangeability, which includes the cross-elasticity of demand for a product, or whether consumers view product A as a substitute for product B. Economists determine cross-elasticity of demand by dividing the percent change in quantity demanded of product A by the corresponding percent change in price of product B.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN21[] **Regulated Practices, Market Definition**

In determining cross-elasticity of demand, an antitrust plaintiff may not limit a market to a select group of customers without identifying a difference in the product supplied to that group of customers. A different product market may be founded upon a distinction between products in degree as opposed to a distinction between products in kind. Within the universe of a product market, therefore, there may exist a submarket -- a portion of the product market that, for purposes of the specific antitrust case, is considered a separate market. The boundaries of an antitrust submarket are determined by examining practical indicia, such as (1) industry and public recognition of the submarket as a separate economic entity and (2) the product's unique and distinct uses, qualities, price, price sensitivity, production facilities, customers, and vendors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN22[] **Regulated Practices, Market Definition**

In defining the scope of the market, a court also examines cross-elasticity of supply, which measures the responsiveness of producers to price increases. Even if consumers do not view product A as a substitute for product B, if producers of product A can readily shift their production facilities to produce product B in response to a price shift in product B, then the sales of both should be included in the relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN23[] **Market Definition, Relevant Market**

The lynchpin in determining the boundaries of the relevant market is the rule of reasonable interchangeability. The question, therefore, is whether reasonable interchangeability can be determined for antitrust purposes without economic analysis of cross-elasticity of demand. A plaintiff may, through sufficient evidence of other indicia of market definition, define a relevant market without economic study of cross-elasticity of demand, especially when economic analysis of cross-elasticity of demand is infeasible based on pricing data.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN24[] **Regulated Practices, Market Definition**

The scope of the market is usually a question of fact for the jury. In rare circumstances, however, insufficient evidence of market definition in the record may require the court to grant summary judgment against the plaintiff on the issue of market definition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN25[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Courts have recognized that tying may provide a way for a monopolist to hide activities that are illegal or disfavored by the law. A monopolist may seek to evade regulatory control in the tying product market by hiding the price in the tied product's price.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN26[] **Antitrust & Trade Law, Sherman Act**

Section 1 (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, states every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is declared to be illegal. *15 U.S.C.S. § 1*. *Section 1* of the Sherman Act proscribes anticompetitive conduct as part of concerted action or a conspiracy; it does not apply to unilateral conduct. A tying arrangement exists when a seller conditions the purchase of a highly desirable product on the purchase of an additional product. Whenever a buyer consents to the tying arrangement by purchasing the tied product so as to obtain the tying product, concerted action occurs between buyer and seller so as to implicate *§ 1* of the Sherman Act.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN27[] **Tying Arrangements, Clayton Act**

Every refusal to sell two products separately does not amount to an illegal tying arrangement. If each product can be purchased separately in a competitive market, one seller's decision to sell both products in a single package does not impose an unreasonable restraint on the market for either product. If, however, the seller has significant market power in the market for one product and exploits its control over this "tying" market to force the buyer to purchase a different product in the "tied" market, which the buyer either did not want or would have purchased elsewhere, the tying arrangement violates 1 (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN28[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The fundamental restraint against which the tying proscription is meant to guard is the use of power over one product to attain power over another, or otherwise to distort freedom of trade and competition in the second product. This distortion injures the buyers of the second product, who, because of their preference for the seller's brand of the first are artificially forced to make a less than optimal choice in the second. And even if the customer is indifferent among brands of the second product and therefore loses nothing by agreeing to use the seller's brand of the second such tying agreements may work significant restraints on competition in the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN29[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The tying seller may be working toward a monopoly position in the tied product, and, even if he is not, the practice of tying forecloses other sellers of the tied product and makes it more difficult for new firms to enter the market. They must be prepared not only to match existing sellers in the tied product in price and quality, but to offset the attraction of the tying product itself. Even if this is possible through simultaneous entry into production of the tying product, entry into both markets is significantly more expensive than simple entry into the tied market, and shifting buying habits in the tied product is considerably more cumbersome and less responsive to variations in competitive offers. In addition to these anticompetitive effects in the tied product, tying arrangements may be used to evade regulations concerning prices in the tying product through clandestine transfer of the profit to the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN30[] Price Fixing & Restraints of Trade, Tying Arrangements

When there is an unlawful tying arrangement, the consumer's freedom to select the best bargain the second market is impaired by his need to purchase the tying product and perhaps by an inability to evaluate the true cost of either product when they are available only as a package. Tying claims are analyzed under two different tests: (1) per se analysis, and (2) rule of reason analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN31[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The per se rule condemns practices that are devoid of redeeming competitive rationales. When a seller's share of the tying market is high, or when the seller offers a unique product that competitors are not able to offer, the United States Supreme Court has held that the likelihood that market power is being used to restrain competition in a separate market is sufficient to make per se condemnation appropriate.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN32[] Tying Arrangements, Defenses

The elements of a per se violation are (1) two separate products; (2) a tie, or conditioning of the sale of one product on the sale of another; (3) sufficient economic power in the tying product market (rock radio air play), and (4) a substantial volume of commerce affected in the tied product market (rock concert promotions services). The plaintiff is not required to show anticompetitive effects in the tied market. Similarly, the court need not consider defendant's procompetitive justifications for the practice.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN33[] Price Fixing & Restraints of Trade, Tying Arrangements

In determining the validity of a tying arrangement, the court must first identify the two separate products that are the subject of the arrangement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN34[] Price Fixing & Restraints of Trade, Tying Arrangements

The test for determining whether two objects are separate products, as opposed to the same product, turns not on their function, but on the nature of any consumer demand for them.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN35[] Tying Arrangements, Per Se Rule

The second element of a per se tying claim is a tie, or conditioning of the sale of one product on the sale of another. The seller must force the buyer to purchase the tied product. To establish forcing, a plaintiff must show that: (1) he himself complied with the tying practice by purchasing the tying and tied product; or (2) although he did not make the purchase, other buyers agreed to the arrangement under threat of losing the tying product.

Evidence > ... > Exceptions > State of Mind > General Overview

HN41[] **Exceptions, State of Mind**

Under *Fed. R. of Evid. 803(3)*, written correspondence showing evidence of intention is admitted to prove the doing of the act intended.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN42[] **Price Fixing & Restraints of Trade, Tying Arrangements**

In examining a tying claim, once the distinct products are identified, the question arises whether the consumer has sufficient choice to forgo the tying product altogether and, hence, the tied product, or whether the defendant has sufficient market power to force the consumer to purchase the tied product against his desire, based on defendant's control of the tying product. If the consumer has sufficient choice, no forcing is present, and the tying arrangement is perfectly lawful. This determination is made by focusing on market power in the tying product market. The existence of market power in the tying product market is ordinarily inferred from the seller's possession of a predominant share of the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN43[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The final element that a plaintiff must demonstrate in proving a tying claim is that a substantial volume of commerce has been affected in the tied product market. In demonstrating per se liability, however, this element is loosely applied because, once the defendant is found to have appreciable market power in the tying market, the ability to leverage this power to restrain trade in the tied market is presumed. This presumption arises because the foundational principle of per se liability is that some acts are so inherently anticompetitive that no examination of their impact on the market as a whole is required. No inquiry, therefore, need be made into the actual prevailing market conditions in the tied market. Instead, all that is required is that the restraint in the tied market caused by the tie affect a substantial volume of commerce, which in this context means only an amount greater than a de minimis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN44[] **Price Fixing & Restraints of Trade, Tying Arrangements**

If a plaintiff is unable to prevail on a theory of per se liability, a plaintiff can seek to prove a tying claim under a different analysis. In order to prevail in the absence of per se liability, a plaintiff has the burden of proving that the tying arrangement unreasonably restrains competition in the tied product market. This is known as "rule of reason" analysis. Rule of reason analysis first requires a determination of whether the challenged restraint has a substantially adverse effect on competition in the tied market. The arrangement must lead to an increase in the price charged to the consumer or a decrease in the quality of the tied product offered by the seller. The tied product market and defendant's market share, therefore, must be closely examined to prove tying under rule of reason analysis.

HN45[] **Monopolies & Monopolization, Attempts to Monopolize**

Section 2 (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, makes it unlawful for a firm to "monopolize." *15 U.S.C.S. § 2*. In order to prove monopolization, a plaintiff must show (1) defendant's possession of monopoly power in the relevant market, and (2) the willful acquisition of monopoly power, as opposed to growth as a result of a superior product, business acumen, or historic accident. While concerted conduct under *§ 1* of the Sherman Act is subject to sanction if it merely restrains trade, unilateral conduct under *§ 2* is subject to sanction only if it actually monopolizes.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN46[] **Sherman Act, Claims**

In order to prove a monopolization claim, the plaintiff must first define the relevant market. Second, in proving a monopolization claim, plaintiff must demonstrate that the defendant has monopoly power in the relevant market. While merely possessing monopoly power is not itself an antitrust violation, it is a necessary element of a monopolization charge. Monopoly power under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, requires something greater than market power under *§ 1* (*15 U.S.C.S. § 1*). Proof of monopoly power requires a showing of the power both to control prices and to exclude competition. Monopoly power may be inferred from a firm's possession of a dominant share of the relevant market, which is protected by entry barriers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN47[] **Monopolies & Monopolization, Actual Monopolization**

While the United States Supreme Court has refused to specify a minimum market share necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share between 70% and 80%.

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > General Overview

HN48[] **Clayton Act, Claims**

In the United States Court of Appeals for the Tenth Circuit, four elements must be proven to establish an attempt to monopolize under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*: (1) relevant market, including both geographic and product market, in which the alleged attempt occurred; (2) dangerous probability of success in monopolizing the relevant market; (3) specific intent to monopolize; and (4) conduct in furtherance of such attempt. Additionally, any plaintiff seeking treble damages under § 4 of the Clayton Act must show antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN49[] **Sherman Act, Claims**

In order to satisfy the dangerous probability of success element on an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, the plaintiff must show that there is a dangerous probability that defendant will achieve monopoly status as the result of the predatory conduct alleged by the plaintiff. It is not necessary for the defendant to already possess monopoly power in the target market. Factors to be considered in determining dangerous probability include (1) the defendant's ability to control prices or exclude competition, (2) defendant's market share, (3) the number and strength of other competitors, or whether defendant is a multimarket firm, (4) market trends, and (5) entry barriers. Where predatory pricing is alleged, the defendant's financial strength and ability to absorb losses are also relevant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN50[] **Monopolies & Monopolization, Attempts to Monopolize**

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, to demonstrate "market power," a plaintiff may show evidence of power to control prices or exclude competition. One measure of a firm's ability to monopolize is the persistence of a firm's ability to profitably charge monopoly prices. If the evidence demonstrates that a firm's ability to charge monopoly prices will necessarily be temporary, the firm does not possess the degree of market power required for attempted monopolization. To justify a finding that a defendant has the power to persistently control prices, entry barriers must be significant -- they must be capable of constraining the normal operation of the market so that the problem is unlikely to be self-correcting. If entry barriers exist, a firm is a monopolist if it can profitably raise prices substantially above the competitive level. When evidence shows that a firm has in fact profitably done so, monopoly power exists.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN51[] Monopolies & Monopolization, Attempts to Monopolize

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, another factor indicative of a defendant's probability of success in monopolization is the defendant's ability to exclude competition and thereby control output. If the predator has control of market-wide output at the supply level, other firms cannot increase their output because they have no access to the necessary inputs to increase output. When a business firm is in a position to use its leverage over one industry in order to exclude or slow down the development of additional competitors in another industry, the business firm may have the power to exclude competition and, therefore, market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN52[] Monopolies & Monopolization, Attempts to Monopolize

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, the likelihood of successful monopolization is typically evaluated by examining the defendant's share of the relevant market. The plaintiff must show that there is a dangerous probability that the defendant's conduct will propel it from a non-monopolistic market share to a market share that is large enough to constitute a monopoly. The higher the firm's initial market share, the more likely it will eventually gain monopolistic control over the market. Market share is relevant but not conclusive as to the existence of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN53[] Monopolies & Monopolization, Attempts to Monopolize

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, a market share of 41% indicates that a firm has substantial economic power in the market, and, therefore, has the tools at its disposal to elevate its market share to monopolistic levels.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN54[] Monopolies & Monopolization, Attempts to Monopolize

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, market trends may demonstrate a probability of success in monopolization. Specifically, when the defendant's market share grows significantly in a short period of time, while the market share of its major competitors shrinks significantly in a short period of time, a probability of monopolization may exist.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > Clayton Act

Communications Law > Overview & Legal Concepts > Ownership > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Patent Law > ... > Damages > Collateral Assessments > Costs

HN55[] Costs & Attorney Fees, Clayton Act

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, entry barriers are relevant to the analysis of market power because the significance of market power depends upon its durability. Entry barriers are particular characteristics of a market which impede entry by new firms into that market. They may include high capital costs or regulatory or legal requirements such as patents or licenses. Other examples include: (1) control over an essential or superior resource, (2) entrenched buyer preferences, and (3) high capital costs for new entrants. When significant and continuing barriers to entry are present, substantial market power can persist unimpeded.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN56[] Tying Arrangements, Defenses

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, entry barriers may be created by the defendant's conduct itself. For example, an organized boycott of the plaintiff's product may constitute an entry barrier that confirms the defendant's dangerous probability of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN57[] Monopolies & Monopolization, Attempts to Monopolize

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, the number of competitors does not conclusively show a lack of entry barriers, however. Likewise, the fact that entry has occurred does not preclude the existence of significant entry barriers. If the output of the new entrant is insufficient to take significant business away from the predator, the entrant is unlikely to represent a challenge to the predator's market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN58[] Attempts to Monopolize, Elements

In the context of an attempt claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, after a plaintiff has defined the relevant market and shown a probability of success in monopolization, the third element that must be proven by plaintiff is the specific intent to monopolize. Specific intent to monopolize is a necessary element of an "attempt to monopolize" claim under *§ 2*. Improper exclusion is always deliberately intended.

Antitrust & Trade Law > Sherman Act > Claims

Mergers & Acquisitions Law > Antitrust > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Defenses

HN59[] **Sherman Act, Claims**

The final element of an attempted monopolization claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, is proof that the defendant engages in anticompetitive conduct. Anticompetitive or exclusionary conduct under *§ 2* is conduct constituting an abnormal response to market opportunities. Such predatory practices are illegal if the conduct appears reasonably capable of contributing to the creation or maintenance of monopoly power, and the practices (1) do not constitute competition on the merits or (2) are more restrictive than reasonably necessary for competition. A defendant may avoid liability by showing a legitimate business justification for the conduct. If, however, the defendant adopts its policies and engages in certain conduct as part of a scheme of willful acquisition of monopoly power, it violates *§ 2* of the Sherman Act. Specifically, anticompetitive conduct is that conduct directed toward competitors and intended to injure competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN60[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

All business firms have a right to select their customers and associates and to refuse to deal with others. Additionally, there is no duty to cooperate with one's competitors. The antitrust laws protect competition but not individual competitors. The absence of a duty to cooperate, however, does not mean that the refusal to deal never gives rise to antitrust liability. After all, most rights are qualified. Under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, of the Sherman Act, the right of the business firm to exercise independent discretion as to the parties with whom it will deal is circumscribed when the firm intends the behavior to create or maintain a monopoly. Additionally, the behavior is anticompetitive when it injures competition in the market.

Antitrust & Trade Law > Sherman Act > General Overview

HN61[] Antitrust & Trade Law, Sherman Act

Under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, a business has the right to refuse to deal with whomever it likes as long as it does so independently, without conspiring with others. Under *§ 2* (*15 U.S.C.S. § 2*), however, independent action may form the basis of liability.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN62[] Antitrust & Trade Law, Sherman Act

Illegal tie-ins under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, may also qualify as anticompetitive conduct for *§ 2* (*15 U.S.C.S. § 2*) purposes.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN63[] Monopolies & Monopolization, Attempts to Monopolize

Predatory pricing may qualify as anticompetitive conduct under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.* To be predatory, prices must be set below an appropriate measure of costs. Accordingly, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs.

Antitrust & Trade Law > Regulated Industries > Sports > Football

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN64[] Sports, Football

Antitrust laws apply to restraints on competition in the non-unionized labor markets.

Antitrust & Trade Law > Sherman Act > General Overview

HN65[] Antitrust & Trade Law, Sherman Act

Antitrust laws are not concerned with conduct's effect on individual competitors, only its effect on competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN66[] **Monopolies & Monopolization, Actual Monopolization**

A firm's refusal to sell or provide its products and services to a competitor may rise to the level of an antitrust violation under the essential facilities doctrine, if the refusal is part of a vertical integration scheme calculated to drive a competitor out of business. To establish liability under the doctrine, a plaintiff must show (1) control of an essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the facility; (3) the denial of the use of the essential facility to a competitor; and (4) the feasibility of providing the facility. In order for an essential facilities claim to succeed, the defendant's power to exclude the plaintiff from such facility must amount to the power to eliminate meaningful competition in the downstream market. This power to eliminate competition must not be a momentary power, but must have relative permanence. Additionally, plaintiff must have evidence that some competitors have been refused access to the facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN67[] **Monopolies & Monopolization, Actual Monopolization**

In order to show control, a plaintiff must define the relevant market and show that the defendant has an actual monopoly in that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN68[] **Monopolies & Monopolization, Actual Monopolization**

An essential facility is one that is essential to engage in meaningful competition in the market. An essential facility need not be one that is indispensable; it is sufficient if denial of its use inflicts a severe competitive handicap on market entrants.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN69[] **Monopolies & Monopolization, Actual Monopolization**

In order to prove an essential facilities claim, a plaintiff must secondly show that an alternative to the facility is not available, and the facility cannot be duplicated by plaintiff. The test is not whether it would be impossible to duplicate the facility but whether it would be economically infeasible. The point of the essential facilities doctrine is that a market entrant should not be forced simultaneously to enter a second market, with its own large capital requirements.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN70[] **Monopolies & Monopolization, Actual Monopolization**

To establish the third element of an essential facilities claim, a plaintiff must show that the defendant did not provide access to the facility on reasonable, non-discriminatory terms. There need not be an outright refusal to deal in order to determine that denial of an essential facility has occurred. To avoid liability, defendant must provide access to an essential facility upon such just and reasonable terms and regulations as will place every company upon nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies.

Antitrust & Trade Law > Sherman Act > General Overview

HN71[] Antitrust & Trade Law, Sherman Act

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, does not restrict a trader from refusing to deal with another party, except in narrow circumstances.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN72[] Monopolies & Monopolization, Actual Monopolization

The final element of an essential facilities claim is defendant's feasibility of providing the facility. Feasibility of providing the facility can be demonstrated by showing that defendant provided the facility on non-discriminatory terms in the past, and no intermittent business reason has arisen to justify an inability to provide the facility.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

HN73[] Consumer Protection, Deceptive & Unfair Trade Practices

A person engages in a deceptive trade practice when, in the course of such person's business, vocation, or occupation, such person disparages the goods, services, property, or business of another by false or misleading representation of fact. *Colo. Rev. Stat. § 6-1-105(1)(g)* . In order to show violation of the Colorado Antitrust Act, *Colo. Rev. Stat. § 6-4-105* (1999), a plaintiff must demonstrate that (1) defendant engaged in an unfair or deceptive trade practice; (2) the challenged practice occurred in the course of defendant's business, vocation, or occupation; (3) it significantly impacts the public as actual or potential consumers of the defendant's goods, services, or property; (4) the plaintiff suffered injury in fact to a legally protected interest; and (5) the challenged practice caused the plaintiff's injury. Evidence that a person has engaged in a deceptive trade practice shall be prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition. *Colo. Rev. Stat. § 6-1-105(2)*.

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

HN74[] Sales (Article 2), Form, Formation & Readjustment

One who intentionally and improperly interferes with the performance of a contract between another and a third party by causing the third person not to perform the contract, is subject to liability to the other for the pecuniary loss resulting to the other from the failure of the third person to perform the contract. In order to prove tortious interference with contract, a plaintiff must show: (1) a contract existed; (2) the defendant had knowledge of the contract; (3) the defendant interfered and induced the other party to breach the contract; and (4) the plaintiff was injured as a result. Most importantly, the interference must be intentional and improper.

Labor & Employment Law > Employment Relationships > Employment Contracts > Breaches

Torts > ... > Commercial Interference > Contracts > General Overview

Labor & Employment Law > Employment Relationships > At Will Employment > General Overview

HN75[] **Employment Contracts, Breaches**

Even a contract terminable at will is entitled to some protection from tortious unwarranted interference.

Torts > ... > Commercial Interference > Contracts > General Overview

HN76[] **Commercial Interference, Contracts**

For liability to descend on defendants, the interference with the at-will contract must have been improper. Interference with a contract is not improper when it involves a matter of competition between the parties. More specifically, a defendant who intentionally causes a third person to breach a contract with the plaintiff does not engage in improper conduct if: (1) it concerns a matter of competition between the defendant and plaintiff; (2) the defendant does not employ wrongful means; (3) the action does not amount to an unlawful restraint of trade; and (4) the defendant's purpose is, at least in part, to advance its own interest. "Wrongful means" include physical violence, fraud, civil suits, and criminal prosecutions.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Evidence > ... > Hearsay > Rule Components > General Overview

Evidence > ... > Hearsay > Rule Components > Truth of Matter Asserted

HN77[] **Entitlement as Matter of Law, Materiality of Facts**

A statement is not considered hearsay if the significance of the statement lies solely in the fact that it was made, not in the truth of its contents. *Fed. R. of Evid. 801(c)*.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN78[] **Intentional Interference, Elements**

Colorado has adopted the *Restatement (Second) of Torts §§ 766B*, *767* and *768* in determining whether a party is liable for intentional interference with prospective business advantage.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN79[] **Intentional Interference, Elements**

To establish a claim for tortious interference with prospective business relations under Colorado law, a plaintiff must show intentional and improper interference with another's prospective contractual relation. For liability to attach, defendant's intentional and improper interference must either induce or cause the third party not to enter into or continue relations. It is not necessary to prove an underlying contract. Rather, a continuing business or customary relationship, which includes a prospective quasi-contract, suffices to create rights against intentional interference.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN80[] **Intentional Interference, Elements**

To establish a claim for tortious interference with prospective business advantage, a plaintiff must show that defendant engaged in (1) improper conduct with (2) the intention to induce or cause a third party not to enter into or continue business relations with the plaintiff, and (3) defendant actually induced or caused such result.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN81[] **Intentional Interference, Elements**

Improper conduct is a necessary element of a claim for intentional interference with prospective business relations. There are seven factors a judge or jury should balance to determine whether a defendant's conduct is improper. These factors include: (a) the nature of the defendant's conduct, (b) the defendant's motive, (c) the plaintiff's interests interfered with, (d) the defendant's interests in interfering, (e) the social interests in protecting defendant's freedom of action and plaintiff's prospective business relations, (f) the proximity of the defendant's conduct to the interference, (g) the relations between the parties. The nature of some conduct, such as fraud and physical violence, is always improper, while other means, such as economic pressure, may be permissible under some circumstances and wrongful under others. Whether economic pressure is improper depends on the degree of coercion, the effects upon competition, and the appropriateness of the pressure as a means of accomplishing the defendant's objectives.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN82[] **Commercial Interference, Prospective Advantage**

A defendant does not engage in improper conduct, so as to be liable for intentional interference, if: (1) it concerns a matter of competition between the defendant and plaintiff; (2) the defendant does not employ wrongful means; (3) the action does not amount to an unlawful restraint of trade; and (4) the defendant's purpose is, at least in part, to advance its own interest. "Wrongful means" include physical violence, fraud, civil suits, and criminal prosecutions. "Wrongful means" do not include breach of the duty of good faith and competitive economic pressure.

Governments > Legislation > Effect & Operation > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN83[] **Legislation, Effect & Operation**

The second element of tortious interference with prospective business relations is that the improper conduct must be intentional. The situation may be one in which many persons are induced to act. Thus a boycott campaign may be intended to induce numerous persons to refuse business relations with the plaintiff.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN84[] **Intentional Interference, Elements**

The final element of tortious interference with prospective business relations is that the conduct of the defendant must cause the third party to refuse to enter business relations with the plaintiff. The question whether the actor's conduct caused the third person to refuse to enter relations with the plaintiff raises an issue of fact. The reasonableness of the claimed reaction of the third person to the actor's conduct is material evidence on this issue, but it is not conclusive. Thus the fact that only a fool would have been influenced by the defendant's conduct is evidence that may warrant a finding that the third person was not in fact influenced by it. On the other hand, if other evidence establishes that the actor did in fact induce the third person's conduct, the actor is liable even though the third person was foolish or otherwise unreasonable in permitting himself to be so influenced.

Opinion

[*1055] ORDER AND MEMORANDUM OF DECISION

In this case, a concert promoter and its affiliates seek damages and an injunction for alleged antitrust violations **[**2]** and tortious conduct by its competitor. Plaintiffs Nobody In Particular Presents, Inc. ("NIPP"), Ogden Resurrection Project, Inc., Swank Management, Inc., and N.I.P.P., L.L.C., claim that Defendants Clear Channel Communications, Inc. ("Clear Channel Communications"), SFX Entertainment, Inc. d/b/a/ Clear Channel Entertainment, Inc. ("SFX/Clear Channel Entertainment"), Clear Channel Broadcasting, Inc., Jacor Broadcasting of Colorado, Inc. ("Jacor"), Citicasters Co., Citicasters Licenses, Inc., and Tsunami Communications, Inc. (collectively "Clear Channel") engage in anticompetitive conduct that violates (1) the Sherman Act, 15 U.S.C.A. §§ 1-2 (West 1997), (2) the Colorado Antitrust Act, Colo. Rev. Stat. § 6-4-105 (1999), (3) the Colorado Consumer Protection Act, Colo. Rev. Stat. § 6-1-101 (1999), and (4) Colorado common law prohibiting tortious interference with contracts and prospective business relations. This matter is before the court on (1) "Defendants' Motion for Summary Judgment," filed October 7, 2002, (2) "Defendants' Motion for Summary Judgment," filed November 1, 2002, (3) "Combined Motion and Memorandum **[**3]** for Summary Judgment of Parent Defendant Clear Channel Communications, Inc., On All Claims," filed November 1, 2002, and (4) "Defendants' Motion to Exclude Expert Testimony," filed August 6, 2003. Jurisdiction is based on 28 U.S.C.A. §§ 1331,1337 (West 1993), and 15 U.S.C.A. § 15 (West 1997).

FACTS

I. Factual Background

A. The Parties

Plaintiff NIPP is a music concert promoter in the Denver, Colorado area. (First Am. Compl. & Jury Demand P3 [filed August 8, 2002] [hereinafter "Am. Compl."]; *admitted at* Defs.' Answer and Affirmative Defenses to Pls.' First Am. Compl. P3 [filed August 21, 2002] [hereinafter "Answer"].) Founded in 1987, it has been a fixture in the Denver music industry since that time. (*Id.*) NIPP has promoted music concerts by jazz, folk, rock, and blues artists, including Beck, Pearl Jam, Sarah McLachlan, and the Neville Brothers. (*Id.*) It has promoted music concerts at numerous music venues in Denver, including the Ogden Theater, the Bluebird Theater, the Denver Botanic Gardens Amphitheater, Red Rocks Amphitheater, the Gothic Theater, and the Pepsi Center. (Statement **[**4]** of Undisputed Material Facts P13 [filed November 1, 2002] [hereinafter "Statement of Undisputed Facts"]; *admitted at* Pls.' Resp. to Defs.' Statement of Undisputed Material Facts P13 [filed December 23, 2002] [hereinafter "Resp. to Statement of Undisputed Facts"].) NIPP controls concert-promotion access to the Ogden Theater, the Bluebird Theater, and the Denver Botanic Gardens Amphitheater. (*Id.* P13; *admitted in pertinent part at* Resp. to Statement of Undisputed Facts P13.) The parties dispute whether NIPP allows other concert promoters to use these venues. **[*1056]** (*Id.* P13; *disputed at* Resp. to Statement of Undisputed Facts P13.)

Clear Channel Communications, a Texas corporation and holding company, is one of the largest radio and entertainment conglomerates in the world. It owns significant holdings in radio, television, billboard advertising, concert venues, and the concert promotions industry, through its numerous wholly-owned subsidiaries. (Combined Mot. and Mem. for Summ. J. of Parent Def. Clear Channel Communications, Inc. on All Claims, Statement of Undisputed Material Facts P2 [filed December 23, 2002] [hereinafter "CCC Mot. for Summ. J."]; *admitted* **[**5]** *at* Pls.' Resp. to Undisputed Material Facts, Statement of Additional Disputed Facts, and Resp. to Mot. and Mem. for Summ. J. of Parent Def. Clear Channel Communications, Inc., Resp. to Undisputed Material Facts P2 [filed December 23, 2002] [hereinafter "Resp. to CCC Mot. for Summ. J."].) Clear Channel Communications' wholly-owned subsidiaries include defendants SFX/Clear Channel Entertainment and Jacor. Eight years ago, Clear Channel Communications was just one of numerous radio station owners, unknown to most people living outside of San Antonio, Texas, where the company is based. (CCC Mot. for Summ. J., Statement of Undisputed Material Facts P1; *admitted at* Resp. to CCC Mot. for Summ. J., Resp. to Undisputed Material Facts P1; Sarah Greene, *Clear Channel v. Competition Act of 2002: Is There A Clear End In Sight?,* 12 Depaul-LCA J. Art & Entm't L. 387, 402 [2002].) At that time, Clear Channel Communications owned 43 radio stations and 16 television stations through its subsidiaries. (*12 Depaul-LCA J. Art & Entm't L. at 402*.) After Congress enacted the Telecommunications Act of 1996, however, Clear Channel Communications began acquiring broadcast and entertainment companies **[**6]** at amazing speed. (*Id.*) Today, Clear Channel Communications consists of what was once seventy separate broadcast companies, owning 1200 radio stations, or 10% of the radio stations in the United States. (Defs.' Br. at 14.)

In May 1999, Clear Channel Communications entered the Denver radio market when it acquired Jacor. (Mem. in Supp. of Defs.' Mot. for Summ. J. at 15 [filed November 1, 2002] [hereinafter "Defs.' Br."]; Pls.' Resp. in Opp'n to Defs.' Mot. for Summ. J. at 3 [filed December 23, 2002] [hereinafter "Pls.' Resp."].) As a result of this acquisition, Clear Channel Communications' subsidiaries now own and operate eight radio stations in Denver, the maximum allowed by the Federal Communications Commission ("FCC"). (Statement of Undisputed Facts P11; *admitted at* Resp. to Statement of Undisputed Facts P11.) These stations include five FM stations, KBCO, KBPI, KFMD, KRFX, and KTCL, and three AM stations, KHOA, KOA, and KTLK. (*Id.* P11; *admitted at* Resp. to Statement of Undisputed Facts P11.)

Additionally, as a result of the $ 4.4 billion dollar acquisition of SFX in 2000, SFX/Clear Channel Entertainment, Clear Channel Communications' national concert promotions **[**7]** division, is the largest concert producer and entertainment promoter in the nation. (Statement of Undisputed Facts P11; *admitted at* Resp. to Statement of Undisputed Facts P11; *12 Depaul-LCA J. Art & Entm't L. at 402*.) Additionally, Clear Channel Communications has a radio concert promotions division, previously known as Clear Channel Concerts, and now as Clear Channel Radio Festivals. (Statement of Undisputed Facts P11; *admitted at* Resp. to Statement of Undisputed Facts P11.) Both of these divisions operate in Denver. (*Id.* P11; *admitted at* Resp. to Statement of Undisputed Facts P11.) Clear Channel Communications also owns or has control over more than 100 music concert venues **[*1057]** nationwide. (*12 Depaul-LCA J. Art & Entm't L. 387, 402*.) SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals promote music concerts by jazz, folk, rock, and blues artists. It has promoted these music concerts at numerous music venues in Denver and has exclusive access to the Fillmore Auditorium in Denver. (*Id.* P11; *admitted at* Resp. to Statement of Undisputed Facts P11.)

The parties dispute the extent to which Clear Channel Communications participates **[**8]** in the operation of its subsidiaries, such as its radio stations and SFX/Clear Channel Entertainment. Clear Channel argues that Clear Channel Communications merely acts as a holding company, while NIPP asserts that Clear Channel Communications acts as an operating company, determining the strategy and culture for all subsidiaries. (CCC Mot. for Summ. J.; *disputed at* Resp. to CCC Mot. for Summ. J.)

B. Concert Promotion in Denver

Music concert promoters are in the business of planning and promoting music concerts for the ticket-purchasing public. Specifically, a concert promoter bids on a particular musician or band in order to obtain the right to promote the artist's concert. In bidding on an artist, the concert promoter must often deal with the artist's manager or record label, which, in the jargon of the industry, is the entity that produces and sells the artist's recordings. (Pls.' Resp., Exs. Vol. 2, Ex. 35 [Dep. of Sabrina Saunders at 44, 116-118], Ex. 30 [Dep. of Michael O'Connor at 425-427], Ex. 22 [Dep. of David Loncao at 37-40].) The concert promoter then arranges for the venue, ticketing, and advertising, among other things. Concert promoters advertise **[**9]** concerts using radio, television, the internet, newspapers, magazines, posters, and flyers. (Defs.' Br., Exs. Vol. 1, Ex. A-7 [Am. Compl. P21]; Am. Compl. P21.) If the concert generates little interest and few ticket sales, the promoter absorbs the loss. Conversely, if the concert is hugely successful, the promoter keeps the profits.

Some promoters promote concerts of all kinds of music, while others may promote, for example, only rock or jazz concerts. Similarly, many venues will accept concerts by artists of all kinds of music, while others will not. (Statement of Undisputed Facts P26; *admitted at* Resp. to Statement of Undisputed Facts P26.) Artist agents may represent both rock and non-rock artists, and record labels often produce recordings for both kinds of artists; however, some agents represent only rock artists, and record companies and talent agencies may have separate divisions that deal with only rock artists. (Statement of Undisputed Facts P27; *admitted in pertinent part* at Resp. to Statement of Undisputed Facts P27.)

There are a large number of music concert promoters in the Denver, Colorado area, compared to other cities of its size. (Defs.' Br., Exs. Vol. **[**10]** 2, Ex. A-19 [Dep. of David Kirby at 149-151].) In recent years, however, three music promoters have emerged as the main promoters in terms of revenue and the number of concerts promoted: Plaintiff NIPP, Defendants SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals, and House of Blues. (Defs.' Br., Exs. Vol. 1A, Ex. A-1 [Decl. of Gustavo Bamberger P50, Table 11]; Pls.' Resp., Exs. Vol. 1, Ex. 1 [Decl. of Owen Phillips, Table 5]; Statement of Undisputed Facts PP14-16; *admitted at* Resp. to Statement of Undisputed Facts PP14-16.)

From the late 1960's to the mid 1990's, Barry Fey and his company, Fey Concerts, were the leading concert promoters in Denver. (Defs.' Br., Exs. Vol. 1, Ex. A-13 [Dep. of Jesse Morreale at 57-58], Exs. Vol. 2, Ex. A-18 [Dep. of Douglas Kauffman **[*1058]** at 60], Ex. A-27 [Dep. of Christopher Swank at 248-250].) During that time, many individuals who have roles in the Denver concert promotion business today worked for Fey Concerts, including Jesse Morreale, Chuck Morris, Bill Bass, and Brent Fedrizzi. (*Id.,* Exs. Vol. 1, Ex. A-13 [Morreale Dep. at 64, 71].) In 1987, Doug Kauffman founded NIPP, which competed with **[**11]** Fey Concerts in the Denver market. (*Id.,* Exs. Vol. 2, Ex. A-18 [Kauffman Dep. at 53-54], Ex. A-27 [Swank Dep. at 249].) In August 1997, Fey sold his interest in Fey Concerts to Universal Concerts and retired, triggering a mass exodus of his employees and introducing more competition in the concert promotions industry. (*Id.,* Exs. Vol. 1, Ex. A-13 [Morreale Dep. at 95-100].) Morreale started the concert promotions company, Gess Presents; Chuck Morris started the company Bill Graham presents/Chuck Morris presents and hired Fedrizzi as a talent buyer; and Bass founded Bill Bass Concerts. (*Id.,* Exs. Vol. 1, Ex. A-13 [Morreale Dep. at 97], Exs. Vol. 2, A-16 [Dep. of Brent Fedrizzi at 10-15].)

In 1998, SFX, a national concert promotion company, acquired Bill Graham Presents and formed a partnership with Chuck Morris Presents. (*Id.,* Exs. Vol. 2, Ex. A-16 [Fedrizzi Dep. at 11-12].) In 1998, NIPP and Kauffman were joined by Jesse Morreale and Christopher Swank, who owned the Bluebird Theater. (*Id.,* Exs. Vol. 2, Ex. A-18 [Kauffman Dep. at 13-14].) In 1999, Clear Channel Communications acquired SFX and affiliated with Don Straussburg of the Fox Theater in Boulder. **[**12]** (Statement of Undisputed Facts P11; *admitted at* Resp. to Statement of Undisputed Facts P11, 16.) In 1999, House of Blues, another national concert promotion company, acquired Universal Concerts and, later, Bill Bass Concerts. (Defs.' Br. at 17.)

In 1999, according to NIPP, Clear Channel, NIPP, and House of Blues combined to hold 47% of the market share in revenue for all music concert promotion in Denver. (Pls.' Resp., Exs. Vol. 1, Ex. 1 [Phillips Decl., Table 5].) In 2001, according to NIPP, they combined to hold 76%. (*Id.,* Exs. Vol. 1, Ex. 1 [Phillips Decl., Table 5].) The parties dispute the exact market share held by each entity in all concert promotion in Denver. The following tables show the dispute of their market share for 1999 and 2001.

Plaintiff NIPP asserts the following breakdown of market share for all music concerts:

Year	Promoter	Revenue	Concerts	Concert Promo Market
1999	Clear Channel			.27%
	NIPP	$ 3,734,565	344	10.86%
	House of Blues			36.28%
2001	Clear Channel	$ 25,000,000		43.81%
	NIPP	$ 2,963,518	324	5.25%
	House of Blues	$ 14,127,205		26.67%

(*Id.,* Exs. Vol. I, Ex. **[**13]** 1 [Phillips Decl., Table 5]; Resp. to Statement of Undisputed Facts PP14-16.)

Defendant Clear Channel claims the following breakdown existed in 2001 for all music concerts:

Year	Promoter	Revenue	Concerts	Concert Promo Market
2001	Clear Channel	$ 19,886,613		40%
	NIPP	$ 3,888,000	369	4.1%
	House of Blues	$ 11,810,621		25.6%

[*1059] (Defs.' Br., Exs. Vol. 1A, Ex. A-1 [Bamberger Decl. P50, Table 11]; Statement of Undisputed Facts PP14-16.)

In the rock music concert market, NIPP claims that, in 1999, Clear Channel held a 0.45% market share, House of Blues held a 32.51% market share, and NIPP held a 16.89% market share. (Pls.' Resp., Ex. 1 [Phillips Decl., Table 5].) In 2001, according to NIPP, Clear Channel held a 50.48% share, House of Blues held an 18.85% share, and NIPP held an 8.2% share. (*Id.,* Ex. 1 [Phillips Decl., Table 5].)

Other promoters in the Denver market include Soda Jerk Presents, Alex Crothers, Eric Pirritt, Dan Steinberg, and Jason Coulter. (Statement of Undisputed Facts P16; *admitted at* Resp. to Statement of Undisputed Facts P16.) In 2001, however, these promoters, in the aggregate, made up less **[**14]** than one percent of the market. (Defs.' Br., Exs. Vol. 1A, Ex. 1 [Bamberger Decl., Table 11]; Resp. to Statement of Undisputed Facts P16.) Other promoters that made up more of the market in Denver in 2001, such as Concerts West and Jam Productions, promoted no concerts in Denver during 2002. (Pls.' Resp., Exs. Vol. 1, Ex. 2 [Morreale Decl. P31].)

C. Radio Denver

1. Play Lists

In the radio industry, stations usually have a particular music format. Different types of formats in radio include: country music formats, contemporary hit formats, adult contemporary formats, rock music formats, urban music formats, talk radio formats, jazz radio formats, and world music formats, among others. (Arbitron.) [1] Some rock music formats include Modern Rock, Active Rock, Alternative, and Classic Rock. (Arbitron.)

[15]** There are, at least, fifty radio stations in the Denver area. (Statement of Undisputed Facts P54; *admitted at* Resp. to Statement of Undisputed Facts P54.) Of these fifty, Clear Channel owns eight. (*Id.* P54; *admitted at* Resp. to Statement of Undisputed Facts P54.) Of the five FM stations owned by Clear Channel, four, KBPI, KBCO, KRFX, and KTCL, have a rock format according to Arbitron. (Arbitron.) The parties dispute the number of other stations that have a rock format in the Denver radio market because they dispute what qualifies as a rock format. (Statement of Undisputed Facts PP50-53; *disputed at* Resp. to Statement of Undisputed Facts PP50-53.) Additionally, the parties dispute whether radio stations can easily switch formats. (*Id.* PP55-56; *disputed at* Resp. to Statement of Undisputed Facts PP55-56.)

Radio stations create a play-list of songs based on the station's format, and the disc jockey must adhere to the play-list. How a station creates its play-list is disputed by the parties. Clear Channel argues that it makes its decisions about which songs to play based on the popularity of the song with its audience, according to polling data. (Defs.' Br., Exs. **[**16]** Vol. 1, Ex. 24 [Dep. of Michael O'Connor at 383-385]; Pls.' **[*1060]** Resp., Exs. Vol. 2, Ex. 24 [Dep. of Mark Mays at 91-93].) NIPP argues that, although polling data plays some role, Clear Channel also makes its decisions based on which concerts Clear Channel is or is not promoting, and which "indies" have paid Clear Channel the most money. (Pls.' Resp. at 18-24, 29-30, Exs. Vol. 2, Ex. 20 [Dep. of David Kirby at 129-132].)

"Indies," in the industry's jargon, are independent record promoters that represent record labels. (*Id.,* Exs. Vol. 2, Ex. 18 [Dep. of Theodore Guggenheim at 113-116], Exs. Vol. 3, Ex. 82 [Joint Statement of Current Issues in Radio].) The record labels pay the independent promoters, who, in turn, pay radio stations for "access." (*Id.,* Exs. Vol. 2, Ex. 36 [Dep. of Barbara Scull at 33-36], Ex. 22 [Dep. of David Loncao at 18-19].) "Access" allows the independent promoter to meet with the radio station and present marketing and polling data about the popularity of songs on the record label's albums. (*Id.,* Exs. Vol. 2, Ex. 24 [M. Mays Dep. at 92-93, 101].) Many commentators and NIPP view the independent record promotion market as a mechanism by which **[**17]** record labels pay for play of their songs, while simultaneously avoiding liability for "payola." (*Id.* at 30; *United States v. Goodman, 945 F.2d 125 [6th Cir. 1991]*.)

Payola, or paying radio stations for record spins, has been outlawed by federal law since the 1930's. *47 U.S.C.A. § 508 (West 2001 & Supp. 2003)*. Clear Channel receives millions of dollars from indies each year; however, it denies that indies' payments influence Clear Channel's decisions to add songs to its radio play lists. (*Id.,* Exs. Vol. 2, Ex. 24 [M. Mays Dep. at 93].) For record labels that are in the business of selling records, radio air play of their records and live concerts by their artists are essential to generate demand for the records themselves. (*Id,* Exs. Vol. 2, Ex. 36 [Scull Dep. at 29], Ex. 39 [Dep. of Todd Sievers at 129-130].) Accordingly, record labels and their indies are highly dependent on, and in regular contact with, radio stations concerning air play for their records. Similarly,

[1] Arbitron is an international marketing and research firm serving radio broadcasters, cable companies, advertisers, advertising agencies, and outdoor advertising companies. Arbitron's core business is measuring network and local market radio audiences across the United States. Both parties cite to Arbitron research in their briefs because Arbitron is the radio industry standard for polling data.

record labels are often in direct contact with concert promoters. (*Id.,* Exs. Vol. 2, Ex. 30 [O'Connor Dep. at 425-426], Ex. 35 [Saunders Dep. at 44-46, 116-117]. **[**18]**)

2. Advertising and Concert Promotions

Although radio stations receive income from independent promoters at the behest of record labels, radio stations derive most of their income from advertisers who pay for advertising spots. (*Id.* at 21-23, 44.) Radio stations with the largest audiences can command the highest advertising rates from advertisers. (Defs.' Br., Exs. Vol. 1A, Ex. A-3 [Aff. of Lee Larsen PP3-4].) When a promoter seeks to advertise a concert on radio, therefore, it competes with advertisers of other goods and services. (*Id.,* Exs. Vol. 3, Ex. A-61 [Dep. of Ashley McGhee at 10-12].)

What makes concert promoters different from a regular advertiser, however, is the potential benefit the radio station receives from advertising a concert of a popular artist. By advertising the concert, the radio generates more interest in the artist, which encourages listeners to listen to the radio to hear about the artist's concert and to hear the artist's songs. (*Id.,* Exs. Vol. 2, Ex. A-24 [O'Connor Dep. at 385-386].) Radio stations, therefore, often "promote" concerts for free, above and beyond the advertising time paid for by the concert promoter, by mentioning **[**19]** the concert on-air, holding ticket giveaways, and conducting interviews with artists. (*Id.,* Exs. Vol. 2, Ex. A-26 [Dep. of Bob Richards at 253-255, 275, 311-312].) Such free promotion greatly benefits the concert promoter, as well as the station, by generating publicity **[*1061]** and demand for the concert. (*Id.,* Exs. Vol. 2, Ex. A-26 [Richards Dep. at 255-256, 311-312].)

NIPP has purchased and continues to purchase advertising time on Clear Channel radio stations. (*Id.,* Exs. Vol. 1A, Ex. A-3 [Larsen Aff. P8, Attach. A.].) Clear Channel radio stations have also provided NIPP with free promotional support for its concerts in the past, though Clear Channel admits that they provide less now. (*Id.,* Exs. Vol. 1A, Ex. A-3 [Larsen Aff. P8, Attach. A.].) NIPP claims, however, that, since Clear Channel entered the concert promotion business, Clear Channel radio stations have withheld free promotional support from NIPP for its concerts. (Pls.' Resp. at 25-27.)

In 1999, NIPP only purchased radio advertising for approximately 8% of its concerts. (Statement of Undisputed Facts P38; *admitted in pertinent part at* Resp. to Statement of Undisputed Facts P38.) Although NIPP does **[**20]** not purchase radio advertising for all of its concerts, especially not for its low-budget productions, it almost always purchases radio advertising for its shows predicted to generate more than $ 10,000 in revenue. (Pls. Br., Exs. Vol. 1, Ex. 2 [Morreale Decl. PP13-14]; Resp. to Statement of Undisputed Facts P38.) In 1999, NIPP claims that more than 70% of its revenue came from concerts that relied on radio advertising. (Resp. to Statement of Undisputed Facts P38.)

In a market encompassing all Denver radio stations, Clear Channel's share of radio advertising revenue was 46.8% in 2000. (Statement of Undisputed Facts PP50; *admitted in pertinent part at* Resp. to Statement of Undisputed Facts P50.) In a market encompassing only rock-format radio stations, depending of which party's definition of rock-format is utilized, Clear Channel's market share in terms of advertising revenue may be as high as 87.3%. (Statement of Undisputed Facts PP50, 53; *admitted in pertinent part at* Resp. to Statement of Undisputed Facts P50, 53.)

D. Anti-Competitive Conduct

NIPP complains about several different kinds of conduct that, NIPP contends, violate federal and state antitrust laws **[**21]** and the common law.

1. Using Radio Air Play to Coerce Artists in Concert Promotions Decisions

NIPP complains that Clear Channel uses its position in rock-format radio to intimidate and coerce rock artists and their record labels into signing with SFX/Clear Channel Entertainment and Clear Channel Radio Festivals for promotion of the artists' concerts. (Pls.' Resp. 9-17.) Specifically, NIPP claims that rock artists and labels are afraid that Clear Channel radio stations will refuse to give artists' songs as many spins as Clear Channel would if the artist signed with SFX/Clear Channel Entertainment or Clear Channel Concerts/Clear Channel Radio Festivals. (*Id.)* According to NIPP, the dependency of record labels on radio for spins and the resultant promotion of records enables Clear Channel to wrongfully exploit this relationship with labels to book concerts. (*Id.,* Exs. Vol. 2, Ex. 30 [O'Connor Dep. at 425-426].)

NIPP cites testimony and messages from former Clear Channel employees and record label owners to support their position. One of the central figures in Clear Channel's radio operations in Denver is Michael O'Connor, the program director for KTCL and director **[**22]** of programming for all five Clear Channel FM stations in Denver. (*Id.,* Exs. Vol. 2, Ex. 29 [O'Connor Dep. at 356-358].) Ted Guggenheim, a former talent buyer for Clear Channel **[*1062]** Concerts/Clear Channel Radio Festivals, testified that record labels could have inferred from conversations with O'Connor that the label's artist would not get spins unless Clear Channel was allowed to promote the artist's concert. (*Id.,* Exs. Vol. 2, Ex. 18 [Guggenheim Dep. at 102].) Additionally, Sabrina Saunders, the music director at KTCL, testified that, when record labels made O'Connor unhappy, O'Connor punished labels by withholding spins of their artists' records. (*Id.,* Exs. Vol. 2, Ex. 35 [Saunders Dep. at 122, 133-134].)

Jason Martin, a representative of Roadrunner Records, testified that, in 2000, O'Connor threatened to pull Roadrunner's records off of Clear Channel stations when NIPP gave KXPK, KBPI's competition, the right to do promotional support for the "Tattoo the Earth Tour," which featured several Roadrunner artists. (*Id.,* Exs. Vol. 2, Ex. 23 [Dep. of Jason Martin at 112].) In order to dampen Clear Channel's wrath, Dave Lancao, another representative of Roadrunner Records, **[**23]** upon O'Connor's demand, sent an electronic message to the artist managers of Roadrunner's artists suggesting they avoid using NIPP as their concert promoter in Denver to avoid losing air play. (*Id.,* Exs. Vol. 2, Ex. 22 [Loncao Dep. at 82-83, 104, 146-147].)

In 1999-2000, Clear Channel refused to have any dealings with Reprise Records, and O'Connor sent electronic mail messages to the label stating, "we are out of business with your label;" "I have left instructions for KTCL to have NO relations with Reprise . . . I want nothing to do with Reprise Records;" and "you can all go f*ck yourselves as far as I'm concerned." (*Id.,* Exs. Vol. 3, Ex. 52 [Electronic Mail Message from O'Connor to Sievers of 3/28/2000], Ex. 53 [Electronic Mail Message from O'Connor to Sievers of 5/1/2000], Ex. 54 [Electronic Mail Message from O'Connor to Sievers of 5/1/2000].) In an effort to regain favor with Clear Channel, Reprise encouraged its band Orgy to allow SFX/Clear Channel Entertainment to promote the band's Denver concert. (*Id.,* Exs. Vol. 3, Ex. 55 [Letter from Sievers to Michael Papale of 6/27/2000], Ex. 55A [Letter from Sievers to Saunders of 8/22/2000], Ex. 43 [Electronic **[**24]** Mail Message from Sievers to Saunders of 8/25/2000], Ex. 43A [Electronic Mail Message from Sievers to O'Connor].) After the concert was booked, Reprise complained to O'Connor, "[We] can't help but feel taken advantage of with only 126 spins to date on KTCL; why did we do this show? It cost us $ 80 per spin!" (*Id.,* Exs. Vol. II., Ex. 44 [Electronic Mail Message from Sievers to O'Connor of 10/24/2000].)

In September 2000, Margie Weatherly, a record label representative, sent an electronic mail message to O'Connor asking for reasons that songs by one of her artists, Vast, were being played less on KTCL. (*Id.,* Exs. Vol. 3, Ex. 42 [Electronic Mail Message from Weatherly to O'Connor of 9/18/2000].) Instead of answering her question, O'Connor responded by asking Weatherly whether or not Vast was going to book its Denver Christmas show with SFX/Clear Channel Entertainment. (*Id.,* Exs. Vol. 3, Ex. 42 [Electronic Mail Message from O'Connor to Weatherly of 9/18/2000].) He concluded his message by stating, "[if] you will investigate these issues, I would love to have a conversation with you about 'where we stand.'" (*Id.,* Exs. Vol. 3, Ex. 42 [Electronic Mail Message **[**25]** from O'Connor to Weatherly of 9/18/2000].) The next day, Weatherly sent a message to O'Connor assuring him that the concert booking with SFX/Clear Channel Entertainment was being finalized and adding, "NOW LET'S SEE SOME SPINS, BABY!!!!!!!!!" (*Id..,* Exs. Vol. 3, Ex. 42 [Electronic Mail Message from Weatherly to O'Connor of 9/19/2000].) In the weeks prior to Weatherly's first message **[*1063]** to O'Connor, Vast's number of spins on KTML had dropped from twenty-three per week to six per week. After Weatherly confirmed the concert booking, KTCL increased the weekly spins for Vast to twenty. (*Id.,* Exs. Vol. 1, Ex. 8 [Decl. of Victoria Lovato, Ex. C].)

NIPP cites numerous other examples of such conduct. On September 27, 2001, the band "Puddle of Mudd" confirmed a concert booking with NIPP for a concert on November 12, 2001. (*Id.,* Exs. Vol. 1, Ex. 2 [Morreale Decl. PP37-38].) Data showing number of spins for Puddle of Mudd's songs show that for the three months preceding September 27, 2001, KBPI played the band's songs steadily more than twenty times per week. (*Id.,* Exs. Vol. 1, Ex. 2 [Morreale Decl. PP37-38], Ex. 8 [Lovato Decl., Ex. F].) The week ending September 23, 2002, KBPI **[**26]** played the band's songs 25 times; however, the week ending September 30, the spins dropped to eleven, and the following week to zero. (*Id.,* Exs. Vol. 1, Ex. 2 [Morreale Decl. PP37-38], Ex. 8 [Lovato Decl., Ex. F].) Thereafter, KBPI resumed playing the band's songs, but not at pre-September 27 levels. (*Id.,* Exs. Vol. 1, Ex. 2 [Morreale Decl. PP37-38], Ex. 8 [Lovato Decl., Ex. F].)

Clear Channel Communications has, to a certain extent, admitted this behavior in its own intra-company communications. In an electronic message to Clear Channel radio program directors in Denver, O'Connor urged them to encourage record labels' involvement with the labels' artists' bookings:

> I encourage you to communicate our new policy concerning artist promotion to labels in advance so they understand why we might potentially be in a position to ignore their artist's appearance in the Denver market. Quite simply, if a local promoter is unwilling or unable to properly compensate us for our . . . valuable audience reach, then we will be forced to ignore the show. Label will be in a better position to intervene [with artists] on your behalf if outside promoters resist this new policy **[**27]** and attempt to put you at a disadvantage.

(*Id.,* Exs. Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001].) In an electronic mail message to Tom Owens, the Vice President of Programming for Clear Channel Radio, O'Connor admitted:

> This is happening a lot in Denver . . . using threat of airplay to take shows away from another promoter in the market. Very VERY Dangerous. I know for a fact that an SFX talent buyer did what I described below despite my soft peddling of the issue. Am collecting letters of denial every time this comes up so that the radio side is covered. It has come up at least five times in the last 3 months.

(*Id.,* Exs. Vol. 3, Ex. 64 [Electronic Mail Message from O'Connor to Tom Owens of 3/26/2001].)

2. Refusing Promotional Support on Radio to NIPP Concerts

Additionally, NIPP argues that Clear Channel Communications denies free promotional support and advertising to concert promoters besides SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals. (*Id.*) According to NIPP, before **[**28]** Clear Channel entered the concert promotion business, it was customary for local concert promoters to have regular contact with radio program, music, and promotions directors, and the stations would usually give free promotional support, such as ticket giveaways and on-air mentions, for any concert in the same musical style as the radio station's format. (*Id.,* Exs. Vol. 2, Ex. 12 [Dep. of Michael DuCharme at 22-23], Ex. 21 [Dep. of Justin Levy at 89-90], **[*1064]** Ex. 31 [Dep. of at 200-202].) Now, Clear Channel allegedly gives preferential treatment to its concert promotion business and limits or denies the historical levels of support previously provided to other promoters. (*Id.,* Exs. Vol. 2, Ex. 12 [DuCharme Dep. at 23-30], Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001].)

Additionally, according to NIPP, no outside promoters are allowed contact with Clear Channel's radio program, music, and promotions directors. (*Id.* at 26.) As evidence of this policy, NIPP cites the following electronic mail message that O'Connor sent to all radio program, promotions, **[**29]** and music directors at Denver Clear Channel rock radio stations on June 19, 2001:

> This notice will serve as an update to our policy concerning dealing with outside promoters.
>
> 1. No program, promotion, or music director is to have direct contact with either House of Blues, Nobody in Particular Presents, or any other non-clearchannel concert entity.. (sic) This includes telephone, fax, and, especially, email conversations. . (sic) . . . There is to be no direct contact with any outside promoter for any reason whatsoever without my approval.

> 2. You are free to continue to have direct conversations with labels and SFX concerning concert promotion in the Denver market.
> 3. Effective immediately, there will be no "added value" attached to spot buys placed by concert promoters. You can negotiate NTR promotions or trade ticket giveaways, . . . but only after the promoter has placed a commercial buy on the station. . . . Airtime WILL NO LONGER be given for free under any circumstances without mine or Donnie's approval. This policy does not apply to SFX/Clear Channel Entertainment/our (sic) our local Radio Concert Division.
>
> 4. I encourage you to communicate our new policy concerning **[**30]** artist promotion to labels in advance so they understand why we might potentially be in a position to ignore their artist's appearance in the Denver market. . . . .

(*Id.,* Exs. Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001].) Clear Channel raised the price at which NIPP can purchase commercial advertising, and O'Connor and Richards sometimes instruct their staff at KBPI and KTCL to give no promotional support to NIPP. (*Id.,* Exs. Vol. 2, Ex. 12 [DuCharme Dep. at 23-30], Ex. 35 [Saunders Dep. at 57-58], Ex. 18 [Guggenheim Dep. at 120-121].)

NIPP cites a concert by the bands Styx and Bad Company in 2001, which was promoted by House of Blues. (*Id.* at 24.) When House of Blues decided to use KKHK (the "Hawk") to promote the show, Clear Channel wrote messages internally stating, "Let's crush the Hawk and HOB on this show . . . hope you will tow the line . . . do not give free impressions to this Hawk festival on any of your stations . . . avoid accepting advertising . . . let's get our f*ckstick out." (*Id.,* Exs. Vol. 3, Ex. 45 [Electronic Mail **[**31]** Message from O'Connor to Clear Channel Directors of 3/20/2001].) Additionally, O'Connor wrote, "we are not going to accept any advertising or promotional schedule for the HOB Styxx show . . . ." (*Id.,* Exs. Vol. 3, Ex. 76 [Electronic Mail Message from O'Connor to Clear Channel Radio Directors of 3/20/2001].)

3. Hiring NIPP's Media Director and Talent Buyer

NIPP complains about the manner in which Clear Channel hired NIPP's media **[*1065]** director and talent buyer, Michael DuCharme, in October 2000. (*Id.* at 27-28.) DuCharme worked at NIPP from August 1998 until October 2000. When Clear Channel hired DuCharme, he never returned to work at NIPP, but, instead, in the middle of the night, cleaned out his office, deleted files from his NIPP computer, and removed and destroyed various other files. (*Id.,* Exs. Vol. 2, Ex. 12 [DuCharme Dep. at 136-142], Ex. 28 [Morreale Dep. at 376-378], Ex. 31 [Ore Dep. at 156-157], Ex. 37 [Swank Dep. at 377-381], Ex. 38 [Dep. of Jerri Theil at 73-76].) Only after he had deleted and taken his files did DuCharme inform NIPP that he had been hired by Clear Channel Concerts/Clear Channel Radio Festivals. (*Id.,* Exs. Vol. 2, Ex. 12 **[**32]** [DuCharme Dep. at 136-137].) Additionally, DuCharme took many of NIPP's artist clients to Clear Channel. (*Id.,* Exs. Vol. 2, Ex. 28 [Morreale Dep. at 224-229].)

4. Other Conduct

Finally, NIPP briefly complains that Clear Channel engages in several other anti-competitive practices. First, NIPP claims that SFX/Clear Channel Entertainment sometimes bids significantly more to promote an artist's concert than the artist requests, driving up the costs to competing bidders and causing higher ticket prices for the consumer. (*Id.,* Exs. Vol. 1, Ex. 4 [Mickelson Decl. PP5-6, 10].) Specifically, NIPP points to evidence that Clear Channel charges monopolistic prices for rock concert tickets. (Defs.' Br., Ex. A-8 [Prelim. Economic Report of Phillips at 25-26].) According to NIPP's expert and available Pollstar data, in 2000, NIPP charged an average $ 13.32 per rock concert ticket, Clear Channel Concerts/Clear Channel Radio Festivals an average $ 18.10, SFX/Clear Channel Entertainment an average of $ 33.69, and House of Blues an average of $ 31.69. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips, Ex. E].) From 2000 to 2001, the average increase in price of rock **[**33]** concert tickets in the Denver area was 3.7%. Consistent with this average, NIPP raised the price of its rock concert tickets by 3.8% to $ 13.83. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) Similarly, in 2001, House of Blues raised its rock concert tickets by 2.2% to $ 32.40. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) Rock concerts promoted by Clear Channel Concerts/Clear Channel Radio Festivals experienced a 46.5% increase in ticket prices to $ 26.51 per ticket, and rock concerts promoted by SFX/Clear Channel Entertainment increased by 23.5% to $ 41.59 per ticket. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) NIPP argues that this pricing data is evidence of monopoly power.

Second, NIPP claims that Clear Channel has made numerous derogatory comments about NIPP to artists, their management, and record labels; these comments include statements that (1) NIPP does not pay its bills to radio stations for advertising, and (2) NIPP has made other misrepresentations to record labels and their artists. Third, according to NIPP, Clear Channel's practice of booking entire national tours of artists excludes **[**34]** other promoters from competing for their concerts in local markets. (*Id.,* Exs. Vol. 1, Ex. 4 [Mickelson Decl. PP10-11], Ex. 2 [Morreale Decl. P30].) Fourth, NIPP claims that Clear Channel's refusal to allow other promoters to book concerts at the Fillmore Auditorium in Denver and its preferential access to the Pepsi Center, Denver's sports arena, and the City Lights Pavilion, give Clear Channel an improper competitive advantage. (*Id.,* Exs. Vol. 1, Ex. 4 [Mickelson Decl. PP8].)

II. Procedural History

On August 6, 2001, NIPP filed a complaint in this court against Clear Channel **[*1066]** Communications, SFX/Clear Channel Entertainment, Clear Channel Radio, Inc., Clear Channel Broadcasting, Inc., KBCO, KBPI, KRFX, and KTCL. (Compl. & Jury Demand [filed August 6, 2001] [hereinafter "Compl."].) In its complaint, NIPP alleges that Clear Channel is liable for violation of *sections 1* and *2 of the Sherman Act*, *15 U.S.C.A. §§ 1-2 (West & Supp. 2003)*, for (1) monopolization, (2) attempted monopolization, (3) unlawful tying, and (4) withholding an essential facility. (Compl. PP59-89.) Additionally, NIPP argues that Clear Channel is liable for violation **[**35]** of the Colorado Antitrust Act, *Colo. Rev. Stat. § 6-4-105*, violation of the Colorado Consumer Protection Act, *Colo. Rev. Stat. § 6-1-101*, tortious interference with contractual relations, and tortious interference with prospective business relations. (Compl. PP90-121.) On October 5, 2001, defendants filed a motion to dismiss for lack of jurisdiction and other issues. (Mot. to Dismiss [filed October 5, 2001].) On July 19, 2002, the court denied defendants' motion to dismiss. (Courtroom Minutes from July 19, 2002.)

On August 8, 2002, NIPP filed its first amended complaint, wherein it added plaintiffs Ogden Resurrection Project, Swank Management, and NIPP, LLC, and defendants SFX, Jacor, Citicasters Co., Citicasters Licensing Co., and Tsunami Communications. (Am. Compl.) NIPP also dismissed its claims against KBCO, KBPI, KRFX, KTCL, and Clear Channel Radio. (*Id.*) NIPP did not alter the claims for relief in its amended complaint. (*Id.*) On August 21, 2002, defendants filed their Answer and affirmative defenses with the court. (Answer [Filed August 21, 2002].)

On October 7, 2002, defendants filed a motion for summary judgment **[**36]** without supporting materials. On November 1, 2002, defendants again filed a motion for summary judgment, but included supporting exhibits and memoranda. (Defs.' Mot. for Summ. J. [filed November 11, 2002].) In their motion, defendants make numerous arguments in support of dismissing the case. First, Clear Channel argues that NIPP has failed to state a claim under federal or state antitrust laws because (1) it has not properly defined the relevant market under ***antitrust law***; (2) NIPP cannot show monopoly power; and (3) NIPP has no evidence of instances of anti-competitive conduct on the part of Clear Channel Communications or its subsidiaries. (Defs.' Br. at 32-64.) Clear Channel further argues that NIPP's antitrust claims fail because (1) NIPP cannot prove a "tying arrangement," since a tying product does not exist, and (2) NIPP has no claim under the "Essential Facilities Doctrine" as radio stations are not an essential facility. (*Id.* at 75-82.) Additionally, Clear Channel asserts that, since NIPP has not demonstrated specific instances of tortious conduct directed toward NIPP, it cannot prove its claims for violation of the Colorado Consumer Protection Act, tortious interference **[**37]** with contract, or intentional interference with prospective business relations. (*Id.* at 83-86.)

On December 23, 2002, plaintiffs filed their response to defendants' motion for summary judgment. (Pls.' Resp.) Therein, NIPP argues that it has stated proper claims for relief under federal and state antitrust laws, the Colorado Consumer Protection Act, and the common law against tortious interference. Specifically, NIPP claims that (1) the markets of "rock concert promotions" and "rock radio stations" are definable, (2) Clear Channel has monopoly power in the rock radio market and has a dangerous probability of acquiring it in the rock concert promotions market, and (3) Clear Channel has engaged in anti-competitive conduct by threatening artists with loss of radio air play to gain leverage in the concert promotions industry. (Pls.' Resp. at 9-32, **[*1067]** 37-90.) Additionally, NIPP asserts that there is evidence of a tying arrangement, and radio stations are an essential facility for the promotion of rock concerts. (*Id.* at 91-100.) Finally, NIPP argues that it has produced admissible evidence to support its state claims for violation of the Colorado Consumer Protection Act, tortious interference **[**38]** with contract, and tortious interference with prospective business relations. (*Id.* at 101-106.)

On November 1, 2002, Defendant Clear Channel Communications, the parent company of all other defendants, also filed its own motion for summary judgment. (CCC Mot. for Summ. J.) In its motion, Clear Channel Communications argues that, although it is the parent company to the alleged wrongdoers in this case, it cannot be held liable for the alleged misconduct of its separately incorporated radio or concert promotion subsidiaries, because it is merely a shareholder in these entities and does not operate the radio stations or engage in concert promotions. (CCC Mot. for Summ. J. at 1, 6-12.) On December 23, 2002, NIPP filed its response to Clear Channel Communications motion for summary judgment. (Resp. to CCC Mot. for Summ. J.) In its response, NIPP argues that Clear Channel Communications is liable for its subsidiaries' wrongdoings both directly and as an alter ego of its subsidiary. (*Id.* at 6-22.)

On August 6, 2003, defendants filed a motion to exclude the testimony of NIPP's expert witness, Dr. Owen Phillips. (Defs.' Mot. to Exclude Expert Test. [filed August 6, 2003] [hereinafter **[**39]** "Mot. to Exclude Expert"].) On November 3, 2003, NIPP filed a response to this motion. (Pls.' Resp. in Opp'n to Defs.' Mot. to Exclude Expert Test. [filed November 3, 2003] [hereinafter "Resp. to Mot. to Exclude Expert"].) On December 19, 2003, Clear Channel Communications filed a reply in support of its motion to exclude. (Reply Mem. in Supp. of Defs.' Mot. to Exclude Expert Test. [filed December 19, 2003] [hereinafter "Reply in Supp. of Mot. to Dismiss"].) All motions having been fully briefed, the court may now appropriately rule upon them.

ANALYSIS

I. Legal Standard for Summary Judgment

HN1[] Pursuant to *rule 56(c) of the Federal Rules of Civil Procedure*, the court may grant summary judgment where "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and the . . . moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*; *see* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 106 S. Ct. 2505, 2511, 91 L. Ed. 2d 202 (1986)*; **[**40]** *Concrete Works, Inc. v. City & County of Denver, 36 F.3d 1513, 1517 (10th Cir. 1994)*. The moving party bears the initial burden of showing an absence of evidence to support the nonmoving party's case. *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 2554, 91 L. Ed. 2d 265 (1986)*. "Once the moving party meets this burden, the burden shifts to the nonmoving party to demonstrate a genuine issue for trial on a material matter." *Concrete Works, Inc., 36 F.3d at 1518* (citing *Celotex Corp., 477 U.S. at 325, 106 S. Ct. at 2554*). The nonmoving party may not rest solely on the allegations in the pleadings, but must instead designate "specific facts showing that there is a genuine issue for trial." *Celotex Corp., 477 U.S. at 324, 106 S. Ct. at 2553*; *see* *Fed. R. Civ. P. 56(e)*.

HN2[] A genuine issue of fact does not exist, and summary judgment is appropriate, if the evidence is such that a reasonable jury could not return a verdict for the nonmoving party. *Anderson, 477 U.S. at 248, 106* ***[*1068]*** *S. Ct. at 2510*. If the nonmoving party's evidence is merely **[**41]** colorable, or is not significantly probative, summary judgment may be granted. *Id. at 249, 2511*. In essence, the inquiry is whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law. *Id. at 252, 2512*. The court may consider only admissible evidence when ruling on a summary judgment motion. *See* *World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1474 (10th Cir. 1985)*. Additionally, the court, when ruling on a motion for summary judgment, must construe the facts in the light most favorable to the nonmoving party. *Id.*

HN3[] Federal courts applying state law ascertain and apply the proper state law with the goal of insuring that the result obtained is the one that would have been obtained in state court. *Occusafe, Inc. v. EG&G Rocky Flats, Inc., 54 F.3d 618, 621 (10th Cir. 1995)* (citing *Allen v. Minnstar, Inc., 8 F.3d 1470, 1476 [10th Cir. 1993])*. To determine which state's substantive law to apply, a federal court applies the choice of law provisions of the state in which the court sits. **[**42]** *Trierweiler v. Croxton and Trench Holding Corp., 90 F.3d 1523, 1532 (10th Cir. 1996)* (citing *Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 60 S. Ct. 1020, 1021-1022, 85 L. Ed. 1477 [1941])*. Under Colorado 'choice of law' law, Colorado law applies to this case because Colorado has the most significant relationship to plaintiffs' claims, considering that the allegedly tortious and anti-competitive behavior occurred in Colorado and all parties operated in Colorado at the time of the alleged tortious behavior. *First Nat'l Bank in Fort Collins v. Rostek, 182 Colo. 437, 514 P.2d 314, 320 (Colo. 1973)*; *ITT Specialty Risk Servs. v. Avis Rent A Car Sys., Inc., 985 P.2d 43, 47 (Colo. Ct. App. 1998)*.

II. Parent Clear Channel Communications' Motion for Summary Judgment

In its motion for summary judgment, Parent Clear Channel Communications asks the court to dismiss it as a defendant. (CCC Mot. for Summ. J.) According to Clear Channel Communications, it cannot be held directly liable or liable as an alter ego to its subsidiaries, SFX/Clear Channel Entertainment and Jacor, for the allegedly wrongful **[**43]** conduct at issue in this case. (*Id.* at 6-12.) The court addresses each argument in turn.

A. Direct Liability

First, Clear Channel Communications argues that it cannot be held directly liable for antitrust violations under the Sherman Act because it is a holding company and not a seller, supplier, participant, or competitor in any of the product and geographic markets relevant to this case. [2] (*Id.* at 6.) NIPP counters that Clear Channel Communications sufficiently participates in the behavior of SFX/Clear Channel Entertainment and Jacor to be directly liable under the Sherman Act, because Clear Channel Communications directs and encourages the anticompetitive conduct. (Resp. to CCC Mot. for Summ. J. at 4.) According to NIPP, Clear Channel Communications acts as an operating company, as opposed to a holding company, and can, therefore, be held directly liable. (*Id.*)

[44]** *HN4*[] Absent allegations or evidence of "independent conduct" on the part of the parent, there is no basis upon which to hold a **[*1069]** parent directly liable for the acts of a subsidiary. *Invamed, Inc. v. Barr Lab., 22 F. Supp.2d 210, 219 (S.D.N.Y. 1998)*; *Drinkwine v. Federated Publ'ns, Inc., 780 F.2d 735, 741 (9th Cir. 1986)*; *Gemco LatinoAmerica, Inc. v. Seiko Time Corp., 685 F. Supp. 400, 403 (S.D.N.Y. 1988)*; *Reynolds Metals Co. v. Columbia Gas Sys., Inc., 669 F. Supp. 744, 750 (E.D. Va. 1987)*. The question is what level of independent conduct is sufficient to hold a parent directly liable for anticompetitive effects occurring at the subsidiary level. Clear Channel Communications' apparent response to this question is that a parent must be an actual seller, competitor, or participant in the market before it can be held liable under the antitrust laws. (CCC Mot. for Summ. J. at 6.) Clear Channel Communications, however, never endeavors to define the terms "seller, competitor, or participant." It appears to take the position that a parent corporation must actually be a named party to a transaction in the market in order to qualify **[**45]** as a market participant.

NIPP counterargues that the terms "seller" and "participant" have a broader meaning under antitrust laws, encompassing parents who direct their subsidiary's behavior in a relevant market. NIPP bases its argument on the Supreme Court's holding in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 773-774, 104 S. Ct. 2731, 2743, 81 L. Ed. 2d 628 (1984)*. In *Copperweld,* the court held *HN5*[] that a parent cannot be held liable for conspiring with its subsidiaries to engage in anticompetitive conduct under *section 1 of the Sherman Act*, because the parent and subsidiaries are, for antitrust purposes, a single enterprise acting with a unity of purpose. *Id.* According to NIPP, therefore, a parent can be directly liable for a subsidiary's anticompetitive conduct when it

---

[2] NIPP alleges that the relevant markets are the markets for rock radio and rock concerts in the Denver, Colorado metropolitan area.

directs and or chestrates such conduct, because parents and subsidiaries may be considered a single enterprise by the Sherman Act.

Clear Channel Communications claims, however, that no court has ever found a parent liable for the acts of a subsidiary under the antitrust laws, absent alter ego liability. In support of its argument, Clear Channel Communications cites cases holding **[**46]** that, ***HN6***[] absent allegations or evidence of independent conduct on the part of the parent, there is no basis upon which to hold a parent directly liable for the acts of a subsidiary. *Invamed, 22 F. Supp.2d at 219*; *Drinkwine, 780 F.2d at 741*; *Gemco LatinoAmerica, 685 F. Supp. at 403*; *Reynolds Metals, 669 F. Supp. at 750*. Specifically, when a plaintiff alleges, as the only basis for liability against a parent, that the parent owns the subsidiary that engaged in wrongful conduct, such allegation is insufficient to hold a parent directly liable for the wrongful conduct. *Id.* Clear Channel Communications' argument, however, misses the mark because, in contrast to the cases which it cites, independent conduct on the part of the parent has been alleged in this case, and the question is whether this independent conduct is sufficient under antitrust laws to implicate direct liability.

HN7[] If a parent corporation, through its own employees and agents, is directing, controlling, and encouraging a wholly-owned subsidiary's anticompetitive conduct, the subsidiary dare not defy its sole shareholder's policies. To conclude that a parent **[**47]** can direct and require anticompetitive conduct of its subsidiaries, like any principal directing the conduct of an agent, and then escape antitrust liability by hiding behind its separate incorporation is counterintuitive. Furthermore, the Supreme Court has suggested that direct liability may exist for parent corporations under the Sherman Act. *Copperweld, 467 U.S. at 777, 104 S. Ct. at 2744-2745* (stating in dicta that **[*1070]** "any anticompetitive activities of corporations and their wholly-owned subsidiaries meriting antitrust remedies may be policed adequately without resort to the intra-enterprise conspiracy doctrine. . . . The ***enterprise*** is fully subject to *§ 2 of the Sherman Act* . . . ."). Additionally, lower courts have recognized that parent corporations can be held directly liable for independently participating in the antitrust violations of their subsidiaries. *Reading Int'l, Inc. v. Oaktree Capital Mgmt., LLC, 317 F. Supp. 2d 301, 2003 U.S. Dist. LEXIS 22256, 2003 WL 22928728 (S.D.N.Y. December 10, 2003)* (slip copy); *Carl Hizel & Sons, Inc. v. Browning Ferris Indus., Inc., 590 F. Supp. 1201, 1202 (D. Colo. 1984)*.

In *Reading Int'l,* an independent movie theater sued **[**48]** two large, national movie houses, Loews and Regal Entertainment, which each owned large multiplexes in competition with plaintiff. Additionally, the plaintiff sued shareholders of these movie house companies, including Oaktree Capital Management ("Oaktree") that held 40% of the shares in Loews and 17% of Regal Entertainment. *Reading Int'l, 2003 U.S. Dist. LEXIS 22256, 2003 WL 22928728 at 4*. Defendants argued that Oaktree could not be held accountable under the Sherman Act, absent alter ego liability, because Oaktree was not a competitor in the relevant market. *Id.* The court in *Reading Int'l* rejected this argument. In reaching its conclusion, the court analogized the definition of competitor under the Sherman Act to the definition of competitor under the *Clayton Act*. Specifically, the court stated:

> ***HN8***[] 'A parent corporation is not a competitor of another corporation merely because its subsidiary is. On the other hand, to interpret [the Clayton Act] as meaning that the business activity of the subsidiary can never be considered in determining whether the parent is a competitor within the meaning of *section 8* would assume that Congress intended to permit such a simple and obvious means **[**49]** of avoidance as to render the statute meaningless, and would ignore the Supreme Court's admonition that the antitrust laws are 'aimed at substance rather than form.' This reasoning holds equal force in determining liability under *section 2* [of the Sherman Act], as each of these sections of antitrust laws shares the primary concern of preventing the undue aggregation of market power.

2003 U.S. Dist. LEXIS 22256, [WL] at 17 (quoting *U.S. v. Crocker Nat'l Corp., 656 F.2d 428 [9th Cir. 1981]* [reversed on other grounds]). The *Reading Int'l* court recognized that ***HN9***[] wrongful conduct may occur at the parent level resulting in anticompetitive effects reverberating at the subsidiary level. *Id.* The court, therefore, held that a parent may be directly liable for anticompetitive conduct at the subsidiary level when the parent sufficiently controls the subsidiary. *Id.*

This court finds the above analysis persuasive and holds that *HN10*[] a parent can be considered a competitor in a market where its subsidiary is a participant if, and only if, the parent sufficiently controls, dictates, or encourages the policies of the subsidiary. When the parent controls, directs, or encourages the subsidiary's **[**50]** anticompetitive conduct, the parent engages in sufficient independent conduct to be held directly liable as a single enterprise with the subsidiary under the Sherman Act. *Id.*; *Copperweld, 467 U.S. at 777, 104 S. Ct. at 2744-2745*.

Clear Channel Communications argues that NIPP has failed to sufficiently allege or demonstrate independent conduct on the part of Clear Channel Communications. Here, however, the allegations in the complaint and the contents of the record create a dispute of material fact as to whether Clear Channel Communication engaged in sufficient independent conduct to be deemed a competitor in the rock concert and rock radio markets at issue in **[*1071]** this case. In the amended complaint, NIPP specifically alleges as to Clear Channel Communications:

> This is an action for damages and injunctive relief arising out of the unlawful and anticompetitive practices of a major radio broadcasting and concert promotion conglomerate, Clear Channel Communications, Inc. -- by itself and through its various subsidiaries and affiliates -- to prevent NIPP and others from competing to offer concert promotions services in the Denver, Colorado metropolitan area . . . . **[**51]** . . . Upon information and belief, Clear Channel intends to continue and extend its anticompetitive, predatory and exclusionary conduct . . . . Clear Channel Communications states as follows, "We can now leverage our broadcasting assets to reach listeners who have an affinity for music to promote our live entertainment events and ultimately increase ticket revenue. . . . "Opportunities for synergies" among Clear Channel's various business divisions "are explosive and are in the very early innings."

(Am. Compl. PP1, 50.) Additionally, NIPP makes allegations concerning "Clear Channel," which collectively includes Clear Channel Communications:

> Clear Channel has repeatedly used its size and clout to coerce artists . . . to use Clear Channel to promote their concerts or else risk losing airplay or other on-air promotional support on radio stations owned or otherwise controlled by Clear Channel. . . . Clear Channel is leveraging its market power over certain dedicated formats of local FM radio . . . to unlawfully acquire, maintain and extend its market power over the local concert promotion business in the relevant market.

(Am. Compl. PP46-47.) These allegations **[**52]** clearly refer to Clear Channel Communications, as do others. Additionally, these main allegations focus on Clear Channel Communications' coordinated use of its different subsidiaries to increase the power of its subsidiaries and, hence, itself, in various markets. This allegation of coordinated action emanating from the parent is sufficient to state a claim against Clear Channel Communications for direct liability.

Furthermore, the record supports a finding that Clear Channel Communications directs and controls the policies and behavior of its subsidiaries. First, management of Clear Channel Communications sets the vision, strategy, and culture of all subsidiaries. (Resp. to CCC Mot. for Summ. J., Ex. 5 [M. Mays Dep. at 39, 85].) Mark Mays, President and Chief Operating Officer of Clear Channel Communications, and Randall Mays, Chief Financial Officer of Clear Channel Communications, testified that Clear Channel Communications operates its subsidiaries as divisions of the company, with each division, such as entertainment and radio, reporting up to Mark Mays at Clear Channel Communications. (*Id.,* Ex. 5 [M. Mays Dep. at 43-44], Ex. 6 [R. Mays Dep. at 26].) According to Randall **[**53]** Mays, written reports from Jacor on its radio operations in Denver are regularly required to be submitted to its parent company and ultimately Clear Channel Communications. (*Id.,* Ex. 6 [R. Mays Dep. at 38-39].)

Furthermore, Clear Channel Communications participates in the budgeting process for all subsidiaries and reviews subsidiaries' plans for achieving revenue. (*Id.,* Ex. 5 [M. Mays Dep. at 64].) Clear Channel Communications controls subsidiaries' budgets by writing most of the checks that the subsidiaries require so the divisions cannot spend money on capital acquisitions without consulting with Clear Channel Communications for funding. (*Id.,* Ex. 5 [M. Mays Dep. at 84-85].) Clear Channel Communications handles **[*1072]** the payroll for all of its subsidiaries' Denver radio employees. (*Id.,* Ex. 6 [R. Mays Dep. at 40].) Finally, according to Clear Channel's 10-K filings, Clear Channel Communications "routinely reviews staffing levels and operating costs . . . [and] advises local managers on broad policy matters and is responsible for long-range planning, allocating resources, and financial reporting, and controls." (*Id.,* Ex. 4 [10-K Filing at 100].)

Mark Mays **[**54]** further testified that Clear Channel Communications coordinates meetings between managers from the different subsidiaries "to try and encourage networking within the company . . . to try to get people to work better together." (*Id.,* Ex. 5 [M. Mays Dep. at 51].) Clear Channel Communications has gone so far as to create a Synergy Department to facilitate communication and cooperation between the different subsidiaries. (*Id.,* Ex. 5 [M. Mays Dep. at 51].) Additionally, Randall Mays testified that Clear Channel Communications takes advantage of synergies between radio and live entertainment by using radio stations to cross-promote live entertainment. (*Id.,* Ex. 6 [R. Mays Dep. at 125-126].) Because a reasonable jury could conclude, based on the evidence in the record, that Clear Channel Communications operates as an operating company, controlling and managing the conduct of its subsidiaries, rather than as a holding company, summary judgment is inappropriate on the issue of Clear Channel Communications' potential direct liability.

B. Alter Ego Liability

Even if Clear Channel Communications did not engage in sufficient independent conduct to be directly liable **[**55]** for alleged violations of the Sherman Act, NIPP has properly alleged and set forth sufficient evidence to create a triable issue of fact as to whether Clear Channel Communications may be held liable as an alter ego of its wholly-owned subsidiaries.

HN11[] A corporation may be held liable for the acts of its subsidiary, and its corporate veil may be pierced, where the subsidiary is merely an alter ego of the principal. [3] *Nat'l Labor Relations Board v. Greater Kansas City Roofing, 2 F.3d 1047, 1054 (10th Cir. 1993)*. ***HN12***[] A subsidiary is the alter ego of its parent when (1) there is such a unity of interest and lack of respect given to separate identity of parent and subsidiary that personalities and assets of parent and subsidiary are indistinct, and (2) adherence to the corporate fiction sanctions fraud, promotes injustice, or leads to an evasion of legal obligations. *Id.* Among the specific factors used in determining whether the parent and subsidiary have maintained their separate identities are: (1) whether the subsidiary is operated as a separate entity; (2) whether parent and subsidiary have commingled funds; (3) whether the subsidiary has failed to maintain adequate **[**56]** minutes and records; (4) whether the parent owns and controls the subsidiary; (5) whether the subsidiary lacks corporate assets or is undercapitalized; (6) whether the subsidiary is used as a mere shell, instrumentality or conduit of the parent; (7) whether the parent and subsidiary have disregarded the legal formalities and failed to maintain an arms-length relationship, and (8) whether there has been a diversion of the subsidiary's assets for use by the parent. *Id.* n.6.

Here, Clear Channel Communications first argues that NIPP has failed to plead **[*1073]** facts which, if established, would show that piercing the corporate veil is warranted. **[**57]** NIPP has, however, sufficiently plead facts pertaining to one or more of the forgoing factors. NIPP alleges in its complaint that Clear Channel Communications has used its subsidiaries to engage in legal misconduct for its own benefit. (Am. Compl. P1.) NIPP alleges that Clear Channel Communications wholly-owns its subsidiaries, SFX/Clear Channel Entertainment, Jacor, Clear Channel Concerts/Clear Channel Radio Festivals, Clear Channel Broadcasting, Citicasters Co., Citicasters Licenses, Inc., and Tsunami Communications, Inc. (Am. Compl. PP8-14.) Additionally, NIPP alleges that Clear Channel Communications controls its subsidiaries and treats its subsidiaries' assets as its own. (Am. Compl. P26.) Finally, NIPP alleges that Clear Channel Communications controls its subsidiaries' assets so as to leverage those assets to aid other subsidiaries in accomplishing illegal ends. (Am. Compl. P50.) Because these allegations bear on several factors necessary to prove alter ego liability, the court finds that NIPP's amended complaint is sufficient to set forth a claim for alter ego liability. *See* *Accordia Northeast, Inc. v. Thesseus Int'l Asset Fund, 205 F. Supp.2d 176, 181-182 (S.D.N.Y. 2002)*; **[**58]** *William E. Black Invs., Inc. v. Eric Envtl., Inc., 1998 U.S. Dist. LEXIS 9856, 1998 WL 801837 (N.D. Ill. 1998)*.

---

[3] There is a lack of case law regarding whether state or federal alter ego common law is properly applied in federal antitrust cases. Because federal law and Colorado state law are very similar, the result would be the same whether federal or state law were applied. Accordingly, the court will apply federal law because the majority of the relevant claims fall under federal law.

Secondly, Clear Channel Communications argues that the record does not contain sufficient evidence proving alter ego liability for NIPP's claim to survive summary judgment. NIPP has, however, adduced sufficient evidence. As stated earlier, the record supports a finding that Clear Channel Communications directs and controls the policies and behavior of its subsidiaries with such a unity of interest and lack of respect given to separate identity of parent and subsidiary that personalities and assets of parent and subsidiary are indistinct. First, management of Clear Channel Communications sets the vision, strategy, and culture of all subsidiaries. (Resp. to CCC Mot. for Summ. J., Ex. 5 [M. Mays Dep. at 39, 85].) Mark Mays and Randall Mays testified that Clear Channel Communications operates its subsidiaries as divisions of the company, with each division, such as entertainment and radio, reporting up to Mark Mays at Clear Channel Communications. (Resp. to CCC Mot. for Summ. J., Ex. 5 [M. Mays Dep. at 43-44], Ex. 6 [R. Mays Dep. at 26].) Accordingly, there is evidence that Clear **[**59]** Channel Communications' subsidiaries are not operated as separate entities but are controlled by Clear Channel Communications. *Greater Kansas City Roofing, 2 F.3d at 1054 n.6*.

Second, Clear Channel Communications controls subsidiaries' budgets by writing most of the checks that the subsidiaries require so the divisions cannot spend money on capital acquisitions without consulting with Clear Channel Communications for funding. (*Id.,* Ex. 5 [M. Mays Dep. at 84-85].) Additionally, Clear Channel Communications handles the payroll for all of its subsidiaries' Denver radio employees. (*Id.,* Ex. 6 [R. Mays Dep. at 40].) Accordingly, a dispute of fact exists as to whether Clear Channel Communications and its subsidiaries commingle their funds and the subsidiaries lack corporate assets to manage their own business affairs. *Greater Kansas City Roofing, 2 F.3d at 1054 n.6*.

Additionally, written reports from Jacor on its radio operations in Denver are regularly required to be submitted to its parent company and ultimately Clear Channel Communications. (*Id.,* Ex. 6 [R. Mays Dep. at 38-39].) As stated earlier, Clear Channel Communications participates **[**60]** in the budgeting process for all subsidiaries and reviews subsidiaries' plans for achieving revenue. (*Id.,* Ex. 5 [M. Mays Dep. at **[*1074]** 64].) Clear Channel Communications "routinely reviews staffing levels and operating costs . . . [and] advises local managers on broad policy matters and is responsible for long-range planning, allocating resources, and financial reporting, and controls." (*Id.,* Ex. 4 [10-K Filing at 100].) Accordingly, evidence exists demonstrating that (1) the subsidiaries may be used as mere shells and instrumentalities of the Clear Channel Communications and (2) they have disregarded the legal formalities and failed to maintain an arms-length relationship. *Greater Kansas City Roofing, 2 F.3d at 1054 n.6*.

Finally, evidence demonstrates that a reasonable jury could conclude that Clear Channel Communications utilizes its separate subsidiaries for a common goal of inequitable, anticompetitive conduct. *Greater Kansas City Roofing, 2 F.3d at 1054*. Clear Channel Communications coordinates meetings between managers from the different subsidiaries. (*Id.,* Ex. 5 [M. Mays Dep. at 51].) Clear Channel Communications has created **[**61]** a Synergy Department. (*Id.,* Ex. 5 [M. Mays Dep. at 51].) And Clear Channel Communications takes advantage of synergies between radio and live entertainment by using radio stations to cross-promote live entertainment. (*Id.,* Ex. 6 [R. Mays Dep. at 125-126].) Based on the record before the court, NIPP has raised sufficient evidence and disputes of material fact regarding Clear Channel Communications' relationship with its subsidiaries to survive summary judgment on its claim for alter ego liability.

III. Defendants' Motion for Summary Judgment

Defendants' motion for summary judgment seeks dismissal of plaintiffs' claims based on plaintiffs' alleged failure to provide sufficient evidence to support the elements of each claim. Specifically, defendants seek dismissal of plaintiffs' federal antitrust claims under the Sherman Act, plaintiffs' state antitrust claims under Colorado statute, and plaintiffs' other state law claims for tortious interference with contract, tortious interference with prospective business advantage, and violation of Colorado's Consumer Protection Act. The court addresses each of plaintiffs' claims in turn.

A. Antitrust

4

[62]** Clear Channel argues that summary judgment should be granted as to all of NIPP's antitrust claims because NIPP can prove no set of facts showing that: (1) Clear Channel has imposed a tying arrangement on rock artists, requiring that artists choose Clear Channel for concert promotions if artists wish to "buy" radio air play for their records; (2) Clear Channel possesses monopoly power in the rock-concert promotions market; (3) Clear Channel has attempted to monopolize the rock-concert promotions market; and/or (4) Clear Channel has denied NIPP and other promoters access to radio promotions, which are an essential facility. (Defs.' Br. 1-4.) Conversely, NIPP claims that disputes of relevant fact permeate NIPP's antitrust action to such an extent that summary judgment is inappropriate. (Pls.' Resp. at 1.) Although NIPP's different antitrust claims require different elements of proof, proof of a relevant product market is required for all of NIPP's antitrust claims. Because all of NIPP's antitrust claims require examination of the threshold issue of relevant product market, the court first addresses this issue. **[*1075]** Thereafter, the court examines each of NIPP's antitrust claims individually.

[63]** ***1. Relevant Market Definition***

HN13[] The first step in analyzing an antitrust claim is to determine the relevant product market in which the defendant is operating. *Telecor Communications, Inc. v. S.W. Bell Tel. Co., 305 F.3d 1124, 1130 (10th Cir. 2002)*. In order to state a claim under ***antitrust law***, plaintiff must define this market. *Id.* The relevant market consists of both a geographic market and a product market. *Full Draw Prods. v. Easton Sports, Inc., 182 F.3d 745, 756 (10th Cir. 1999)*; *Tarabishi v. McAlester Reg'l Hosp., 951 F.2d 1558, 1567 (10th Cir. 1991)*. Here, the parties concede that the relevant geographic market is the Denver metropolitan area. Accordingly, the scope of the product market is the only market issue in this case. *Telecor, 305 F.3d at 1130*.

NIPP has classified the relevant product markets as (1) the market for rock music concert promotions/tickets and (2) the market for advertising and promotional support on rock music radio. (Pls.' Resp. at 42-51, 52-60.) According to NIPP, these product markets are properly defined as relevant because Clear Channel's anticompetitive behavior has **[**64]** impacted various inputs, thereby affecting output in these markets. In the alternative, NIPP claims that a product market exists for all music concert promotion services, not just rock music. (*Id.* at 51-52.) Conversely, Clear Channel argues that NIPP has failed to define a relevant market because NIPP has provided no economic data to support its allegations. (Defs.' Br. at 33-35, 37-38.)

HN14[] There is no subject matter in ***antitrust law*** more confusing than market definition. *Telecor, 305 F.3d at 1130*. The concept of market definition itself oversimplifies the very complex interactions between a number of differently situated buyers and sellers, each of whom has different costs, needs, and substitutes. *Id. at 1131* (citing *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 966 [10th Cir. 1994])*. At its simplest, the relevant product market is that market which is relevant to the legal issue before the court. *Id. at 1130*. By defining the relevant market, the court strives to identify firms that compete with each other and the alleged anticompetitive conduct restraining trade in the market. *Id.* (citing *SCFC ILC, 36 F.3d at 966*). **[**65]** The definition of the relevant market is a question of fact for the factfinder, and the plaintiff has the burden of proof on the issue. *Id.*

More specifically, ***HN15***[] a product market is composed of products reasonably interchangeable for the purposes for which they are produced.*Id.* The definition of relevant market, therefore, turns on a determination of available substitutes. *Id.* Available substitutes are demonstrated if, when prices are appreciably raised or volume appreciably curtailed for the product within the geographic area, supply from other sources can be expected to enter promptly enough or in large enough amounts to restore the old price and volume. *Id.* (citing *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 966 [10th Cir. 1994])*. Reasonable interchangeability, therefore, includes analysis of cross-elasticity of demand. *Id. at 1131*. Demand for a product is said to be "elastic" if an increase in the price causes less of the product to be purchased. *See id.* There is said to be "cross-elasticity of demand" between two products if rising

[4] Because Colorado ***antitrust law*** mirrors federal ***antitrust law*** under the Sherman Act, the court will solely examine plaintiffs' claims under federal law as dispositive of plaintiffs' state law claims.

prices for product A cause consumers to switch to product B. *See* id. The inference is that consumers **[**66]** readily substitute one product for the other and that the products, therefore, probably compete in the same market.

a. Choosing the Relevant Market

At the outset, it is important to note that NIPP's allegations implicate numerous different **[*1076]** buyers and sellers, and, consequently, numerous different potentially relevant product markets. Accordingly, the first determination necessary in defining the market in this case is locating, in a meringue of transactions and exchanges, the sellers, the buyers, and the products at issue. Only after determining these broader issues can the court focus on the narrower issue of the scope of the product market based on reasonable interchangeability.

HN16[] The identity of the relevant product to be studied to determine the market varies based on the level of commerce where the plaintiffs argue the defendants have monopolized competition. *Telecor, 305 F.3d at 1132*. Within the universe of a product market, therefore, there may exist a submarket -- a portion of the product market that, for purposes of the specific antitrust case, is considered a separate market. *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962).* **[**67]** Submarket analysis is par and parcel of the reasonable interchangeability test. *White and White, Inc. v. Am. Hosp. Supply Corp., 723 F.2d 495, 500 (6th Cir. 1983)*. Similarly, the identity of the relevant consumer for the purposes of determining market definition is not necessarily the end-user of the product, but, rather, is also determined based on the level of commerce effected by defendant's behavior. *Telecor, 305 F.3d at 1132-1133*; *Full Draw, 182 F.3d at 753*; *see also* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481-482, 112 S. Ct. 2072, 2090, 119 L. Ed. 2d 265 (1992)* (citations omitted).

For example, in *Telecor,* a telephone company, Telecor, accused a competitor, Southwestern Bell, of monopolizing the market for pay-telephone services. *Id. at 1132-1133*. Specifically, Telecor complained that Southwestern Bell had locked all owners of pay-telephone locations into punitive, long-term contracts with Southwestern Bell, so location owners could not allow other telephone **[**68]** companies to place their pay-telephones on the location owner's property. *Id. at 1133*. In seeking to define the relevant product market, Southwestern Bell argued that cellular telephones were a part of the relevant market because cellular telephones are reasonably interchangeable with pay phones by the end-consumers using telephones. *Id.* The Tenth Circuit rejected Southwestern Bell's proposed market definition and held that the relevant consumer for purposes of market definition was the location owner, who would not view cellular telephones as a reasonable substitute for pay-telephone contracts. *Id.* In essence, the court recognized that, because Southwestern Bell competed with Telecor for pay-telephone locations, the owners of those locations, not the end-users of telephones, constituted the relevant market, even though this market was only one component or input to the universe of end-consumers of telephones. *Id.* Specifically, the court stated:

> A monopolist may [not] act with impunity so long as end-use consumer prices are unaffected. . . . ***HN17***[] [The Sherman Act] does not confine its protection to consumers, or to purchasers, or to competitors, or to sellers. **[**69]** Nor does it immunize the outlawed acts because they are done by any of these. The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices by whomever they may be perpetrated. . . . The Supreme Court has clearly held that antitrust laws apply not only to restraints on output markets, but to input markets as well, including both labor and input commodities. . . . [Restraints on input markets] fall under antitrust purview because **[*1077]** [they] will eventually adversely affect [end]-consumers.

Id. at 1133-1134, 1136 (quoting *Mandeville Island Farms v. Am. Crystal Sugar Co., 334 U.S. 219, 235-236, 68 S. Ct. 996, 92 L. Ed. 1328 [1948]*; *Brown v. Pro Football, Inc., 311 U.S. App. D.C. 89, 50 F.3d 1041, 1061 [D.C. Cir. 1995])*.

Defining the relevant set of consumers is the first issue prescribed by the parties. In some of its antitrust claims, NIPP defines the relevant market as the market for the sale of rock music concert tickets, where the seller is the rock promoter and the ***buyer is the rock-concert going public.*** Clear Channel argues that the relevant markets for the monopolization **[**70]** and attempted monopolization claims are two specific input markets, (1) the market for all music concert promotional services, where the seller is the promoter and the ***buyer is the artist,*** and (2) the market for all advertising on all radio, where the seller is the radio station and the ***buyer is the advertiser.*** (Defs.' Br. at 36, 43-46.) Based on NIPP's allegations regarding the alleged anticompetitive conduct, several different markets are relevant, depending upon which claim the court is analyzing.

(1) The Market for Live Music Concerts (Monopolization and Attempted Monopolization Claims)

In NIPP's monopolization and attempted monopolization claims, NIPP alleges competitive injury in the end-use product market, which is the market for tickets to rock music concerts, where the seller is the music concert promoter and the buyer is the concert-going public. (Pls.' Resp. at 42-47.) NIPP alleges that Clear Channel's conduct injures competition in this market by denying Clear Channel's competitors access to several different inputs crucial to competition in the market for rock music concert ticket sales. (Exs. to Mem. in Supp. of Defs.' Mot. for Summ. J. **[**71]** , Ex. A-08 [Prelim. Economic Report of Owen R. Phillips, Ph.D. at 4].) NIPP describes these inputs as rock artists, rock radio advertising, rock radio promotional support, concert venues, and promotions employees. (*Id.,* Ex. A-08 [Prelim. Economic Report of Dr. Phillips at 4].) Specifically, NIPP argues that (1) Clear Channel manipulates artists into choosing Clear Channel concert promotion services by threatening loss of radio air play if the artist uses a competitor to promote a concert; (2) Clear Channel engages in predatory pricing by offering rock artists substantially higher amounts than sought by the artist, thereby significantly outbidding its promotions competitors and recouping its losses by charging ticket purchasers higher monopolistic prices; (3) Clear Channel denies its promotions competitors historical access to advertising, promotional support, and air play on its rock radio stations; and (4) Clear Channel uses predatory practices to steal NIPP's employees. (Pls.' Resp. at 80-90.) Because Clear Channel's anticompetitive conduct allegedly affects NIPP's access to these inputs, the separate product markets for these inputs are also implicated. These input markets **[**72]** include the market for promotional services, radio air play, advertising, and promotional support, which are addressed below.

Clear Channel argues that analysis of the output market is inappropriate because, absent harm in the separate input markets, there can be no harm in the output markets. (Defs.' Br. at 36.) According to Clear Channel, therefore, only the input markets should be analyzed. Clear Channel would analogize this case to *Telecor* where the court limited its analysis to the input market. *Telecor, 305 F.3d at 1132*. This case, however, is not analogous to *Telecor* because, in *Telecor,* the defendant's behavior affected only one market, a single input market, while, here, defendants' behavior is asserted to affect several **[*1078]** input markets, plus the downstream output market. *Id.*

HN18[] In an antitrust case, when evaluating many different instances of conduct by defendant, the conduct as a whole must always be analyzed, rather than compartmentalized, because it is the cumulative impact of the conduct on consumers which is the relevant inquiry in a monopolization claim. *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 1410, 8 L. Ed. 2d 777 (1962)*; **[**73]** *Aspen Highlands Skiing Corp. v. Aspen Skiing Corp., 738 F.2d 1509, 1522 n.18 (10th Cir. 1984)* (affirmed in *Aspen Skiing, 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467*); Philip E. Areeda, Roger D. Blair & Herbert Hovenkamp, ***Antitrust Law*** P310 (2d ed. 2000). Although compartmentalized examination of the separate input market would be proper if only one input were implicated, when many different instances of conduct allegedly affect different inputs and collectively injure competition in a downstream output market, the relevant market is the downstream market, which is the only level of commerce at which the behavior can be examined collectively.

Even if Clear Channel's conduct does not injure competition in each separate input market individually, its conduct in all of the input markets may injure competition in the downstream market collectively. *See Aspen Skiing, 738 F.2d at 1522 n.18*. Accordingly, the court believes that the first relevant market where the parties compete is the market for live music concert tickets, where the parties, among others, sell tickets, and concert attendees buy them. That is, it must examine the reasonable **[**74]** interchangeability of the rock concerts and non-rock concerts to the concert-going public in order to determine whether NIPP sets forth sufficient evidence to define the scope of the relevant market for the monopolization and attempted monopolization claims. [5]

[75]** ***(2) The Two Markets Relevant to the Tying Claim***

(a) The Market for Promotions Services

In NIPP's tying claims, NIPP asserts that Clear Channel manipulates rock artists into choosing Clear Channel's concert promotion services by implying that artists' songs will not receive air play on the rock radio stations that Clear Channel controls. (Pls.' Resp. at 91-92.) The first relevant product market stemming for the tying claim is the market for promotion services, where the promoter is the seller and the artist is the buyer. The rock artist chooses which promoter will promote the artist's concert based on the quality of the promoters' promotions skills and the amount the promoter bids on the artist. The artist may be considered the consumer of concert promotions services from the promoter, even though the money flows in **[*1079]** the opposite direction -- from the promoter to the artist. *See* *Todd v. Exxon Corp., 275 F.3d 191 (2d Cir. 2001)*.

In the *Todd* case, employees of oil companies sued the companies for conspiring to set wages below market price. *Todd, 275 F.3d at 202*. The employees alleged that this behavior amounted to price-fixing **[**76]** in violation of antitrust laws.*Id.* The companies argued that the employees had failed to properly define a relevant market because they failed to show that different types of employment services provided by the employees, such as accounting, lawyering, and engineering, were reasonably interchangeable to the companies, which were argued to be the buyers or consumers in the transaction. *Id.* The court rejected the companies' reasoning and held that the relevant product for purposes of defining the market was employment opportunities, not employment services. *Id.* The relevant question, therefore, was whether employment at different oil companies was reasonably interchangeable in the eyes of the consumer employee. *Id.* In this sense, the court considered the employees of oil companies as consumers "purchasing" employment opportunities from competing oil companies, despite the fact that oil companies paid for employee services, and not vice versa.*Id.*

Todd is analogous to this case. Because promoters, including plaintiffs and defendants, compete to promote artists' concerts, just as the oil companies competed to retain employees in *Todd,* artists may properly **[**77]** be viewed as consumers of promotion services in this case. Accordingly, to define the market, the court must examine promotions services reasonably interchangeable to rock artists, the relevant consumers.

(b) The Market for Radio Air Play

In NIPP's tying claims, NIPP's allegations concerning Clear Channel's threats to artists and their record labels to withhold radio air play implicates the radio market. (Pls.' Resp. at 52-53.) In such a market, the radio station is the seller of radio air play of an artist's songs. The troubling questions are whether consideration, so as to create a potential market, is exchanged for radio air play and, if so, whether such exchange can constitute a relevant market.

Clear Channel argues that there is no market for radio air play because the sale of such is illegal under federal law. (Defs.' Br. at 81-82.) Just because a practice is illegal, however, does not mean it does not occur. Based on the court's review of the record, NIPP has set forth sufficient evidence that, through covert use of "indies" and concert

---

[5] Should the jury conclude that the relevant market is the output market for rock concert tickets, the jury will have to examine Clear Channel's control over inputs necessary for the production of concert tickets in order to evaluate the anticompetitive nature of Clear Channel's conduct. Because Clear Channel's alleged control over all of these inputs stems from its alleged control over rock radio stations, NIPP introduces evidence of Clear Channel's control over the rock radio market in the Denver metropolitan area. While such evidence will be useful, and perhaps necessary, to demonstrate Clear Channel's control over inputs and monopolistic leveraging to control the downstream market, it is unnecessary at the relevant market definition stage of the analysis of NIPP's monopolization and attempted monopolization claims. There is only one relevant market definition for NIPP's monopolization and attempted monopolization claims, despite the fact that numerous inputs are implicated. The rock radio market is implicated in NIPP's other antitrust claims, however.

promotion services contracts, Clear Channel may actually be selling air play. Accordingly, a reasonable jury may find that Clear **[**78]** Channel sells radio air play to artists, which constitutes a black market.

Does a black market qualify as a relevant market for antitrust purposes? Clear Channel argues that, because the sale of radio air play, also known as "payola," is illegal under federal law, it cannot constitute a relevant market. (*Id.*) Although no significant case law exists on this issue, this court is confident that ***HN19***[] ***antitrust law*** was not enacted to protect a competitor who compounds his wrong by using his market power in an illegal market to restrain competition in another, legal market. The court believes that a close reading of *Trans World Airlines, Inc. v. Am. Coupon Exch., Inc., 682 F. Supp. 1476 (C.D. Cal. 1988)*, (*aff'd in part, vacated in part on other grounds, 913 F.2d 676 [9th Cir. 1990])* supports this view. In *Trans World Airlines,* the counterclaimant sought to recover for antitrust injury in a market for the trade of frequent flyer awards. *Id. at 1487*. The court held that, because the airline industry had contractually **[*1080]** prohibited trade of frequent flyer awards, there was no legal, relevant market, despite the fact that counterclaimant traded in the **[**79]** market. *Id.* In effect, the court reasoned that plaintiff's trade in a black market should not be rewarded, and found that no legitimate product market existed because anticompetitive effects were alleged to have occurred in an illegitimate market. *Id.*

This case is distinguishable from*Trans World Airlines,* however. Here, plaintiffs allege that defendants, not plaintiffs, trade in a black market and utilize this trade to gain leverage in a legitimate, legal market. In contrast to the facts presented in *Trans World Airlines,* the alleged anticompetitive effects here occur in a legitimate market, not the black market. Furthermore, defendants seek protection from antitrust liability for their alleged sales in this black market based on the illegal nature of their own conduct. Although no case law exists on this subject, the court finds that, if a defendant's illegal conduct in an illegal market propels it to monopolistic control in a legal market, the defendant cannot escape the purview of ***antitrust law*** by hiding behind the illegality of the market over which it exerts control. Just as this court is confident that antitrust laws do not protect competitors in a black market **[**80]** from anticompetitive effects in that market, the court is equally convinced that a black market can be considered a relevant market for antitrust purposes when the behavior in the black market is alleged to have anticompetitive effects in a legitimate, legal product market. Accordingly, the court must examine reasonable interchangeability of rock radio air play with non-rock radio air play to the rock artist.

(3) The Market for Rock Radio Advertising and Promotional Support (Essential Facilities Claim)

In its essential facilities claim, NIPP seeks to define the relevant market as rock radio advertising and promotional support, where the seller is the rock radio station and the consumer is the concert promoter. Clear Channel, in turn, argues that the relevant market is all radio advertising, or even all media advertising, where the seller is the radio station or the media company and the consumer is any advertiser, not just a concert promoter. (Defs.' Br. at 43-49.) The parties do not dispute that the market for advertising serves as the appropriate area of inquiry in regards to NIPP's essential facilities claim. Accordingly, the court must examine whether NIPP has produced **[**81]** sufficient evidence to support the scope of its proposed market definition.

b. Defining the Boundaries of the Chosen Market

Having determined the potential market areas, the court must now define the scope of these potential markets. The parties vigorously dispute the scope of the relevant markets. NIPP claims that all of the markets should be defined in terms of rock music. (Pls.' Resp. at 42-60, 92-95.) More specifically, to NIPP, the relevant markets are rock concert tickets, rock music promotions services, rock radio air play, and rock radio advertising and promotional support. Clear Channel counters that all of the markets should be defined in terms of all music, not just rock. (Defs.' Br. at 39-49.) To Clear Channel, therefore, the relevant markets are all music concert tickets, all music concert promotions, all radio air play, and all radio advertising and promotional support. Clear Channel further argues that NIPP has no economic data to support its proposed narrow markets and that this failure is fatal to NIPP's antitrust claims. (*Id.* at 32-35.)

As stated earlier, ***HN20***[] the scope and definition of the market is determined by examining **[*1081]** reasonable interchangeability, **[**82]** which includes the cross-elasticity of demand for a product, or whether consumers view product A as a substitute for product B. *Telecor, 305 F.3d at 1131*. Economists determine cross-elasticity of demand by dividing the percent change in quantity demanded of product A by the corresponding percent change in price of product B. Dictionary of Marketing Terms (2003). If the calculation yields a positive number, products A and B are reasonable substitutes for consumers. *Id.*

HN21[] In determining cross-elasticity of demand, an antitrust plaintiff may not limit a market to a select group of customers without identifying a difference in the product supplied to that group of customers. *T. Harris Young & Assoc., Inc. v. Marquette Elecs., Inc., 931 F.2d 816, 824 (11th Cir. 1991)*. A different product market may be founded upon a distinction between products in degree as opposed to a distinction between products in kind. *Int'l Boxing Club of New York, Inc. v. United States, 358 U.S. 242, 249-250, 79 S. Ct. 245, 249, 3 L. Ed. 2d 270 (1959)*. Within the universe of a product market, therefore, there may exist a submarket -- a portion of the product market **[**83]** that, for purposes of the specific antitrust case, is considered a separate market. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 1524, 8 L. Ed. 2d 510 (1962)* (citing *United States v. E.I. du Pont de Nemours & Co., 353 U.S. 586, 593-595, 1 L. Ed. 2d 1057, 57 S. Ct. 872, 877 [1957])*. The boundaries of an antitrust submarket are determined by examining practical indicia, such as (1) industry and public recognition of the submarket as a separate economic entity and (2) the product's unique and distinct uses, qualities, price, price sensitivity, production facilities, customers, and vendors. *Id.; Lantec, Inc. v. Novell, Inc., 146 F. Supp.2d 1140, 1148 (D. Utah 2001)*, (*aff'd, 306 F.3d 1003 [10th Cir. 2002])*.

For example, in *International Boxing Club,* the Supreme Court found that the promotion of championship, professional boxing contests was a product market distinct from the promotion of all boxing or all professional boxing contests, despite the fact that most of the inputs for both services were the same. *Int'l Boxing Club, 358 U.S. at 249-250, 79 S. Ct. at 249*. Specifically, the court noted **[**84]** that although all boxing contests include one ring, two boxers, one referee, the same rules, and an audience, championship boxing was a separate market because of its distinctive uses, qualities, and price. *Id. at 250, 79 S. Ct. at 250*. The fact that two products may involve many of the same inputs, therefore, is not determinative of the definition of the relevant product market. *Id.*

HN22[] In defining the scope of the market, the court also examines cross-elasticity of supply, which measures the responsiveness of producers to price increases. *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1436 (9th Cir. 1995)*. Even if consumers do not view product A as a substitute for product B, if producers of product A can readily shift their production facilities to produce product B in response to a price shift in product B, then the sales of both should be included in the relevant market. *Id.* For example, in *Rebel Oil,* the court found that full-service and self-service gasoline were in the same market even though consumers did not view them as interchangeable, because full-service gasoline stations could easily convert their facilities to **[**85]** self-service stations if self-service stations raised their prices to monopolistic levels. *Id.*

Clear Channel argues that all of NIPP's proposed market definitions fail as a matter of law because NIPP's expert, Dr. Owen Phillips, did not calculate cross-elasticity of demand for any of the proposed markets in his expert reports. (Reply in **[*1082]** Supp. of Defs.' Mot. for Summ. J. at 18 [filed January 24, 2003] [hereinafter "Defs.' Reply"].) Clear Channel asserts that a relevant market cannot be defined without the use of economic criteria through a formal study of cross-elasticity of demand. (*Id.*) Although NIPP concedes that Dr. Phillips did not undertake a formal economic study, NIPP argues that market definition can and must be proven through other practical indicia besides cross-elasticity of demand because calculations of cross-elasticity of demand are difficult when analyzing the entertainment industry. (Pls.' Resp. to Mot. to Exclude Expert at 11-12.) Specifically, Dr. Phillips claims that calculating cross-elasticity of demand in this case was not possible because price shifts above 5% over an extended period of time are necessary in order to accurately measure cross-elasticity **[**86]** of demand. (*Id.,* Ex. A [Second Decl. of Owen Phillips PP5-6].)

HN23[] The lynchpin in determining the boundaries of the relevant market is "the rule of reasonable interchangeability." *United States v. E.I. du Pont Nemours & Co., 351 U.S. 377, 394-395, 76 S. Ct. 994, 1007, 100 L. Ed. 1264 (1956)*. The question, therefore, is whether reasonable interchangeability can be determined for antitrust purposes without economic analysis of cross-elasticity of demand. Although the Tenth Circuit has not addressed this specific issue, *Lantec, 146 F. Supp.2d at 1148*, the court finds that a plaintiff may, through sufficient evidence of other indicia of market definition, define a relevant market without economic study of cross-elasticity of demand, especially when economic analysis of cross-elasticity of demand is infeasible based on pricing data. *Bacchus Indus., Inc., v. Arvin Indus., Inc., 939 F.2d 887 (10th Cir. 1991)* (holding that the plaintiff properly defined the relevant market by presenting lay testimony concerning distinctive uses and qualities of product); *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997)* **[**87]** (holding that, since the test for reasonable interchangeability includes factual inquiry into the commercial realities faced by consumers, and price, use, and qualities of the product, plaintiff's failure to prove various factors was fatal to its claim); *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 995 (11th Cir. 1993)* (stating that "reliable measures of supply and demand elasticities provide the most accurate estimates of relevant markets. However, it is usually necessary to consider other factors that can serve as useful surrogates for cross-elasticity data. In the case of product market definition, these factors may include . . . distinctive uses, characteristics, . . . industry [recognition] . . ., consumers['] [perceptions], . . . and price . . . ."); *Satellite Television & Assoc. Res., Inc. v. Cont'l Cablevision of Va., Inc., 714 F.2d 351 (4th Cir. 1983)* (holding that, since the test for reasonable interchangeability includes consumers' perceptions, plaintiff's failure to prove such was fatal to its claim); *Worldwide Basketball & Sports Tours, Inc. v. Nat'l Collegiate Athletic Assoc., 273 F. Supp.2d 933 (S.D. Ohio 2003)* **[**88]** (holding that when the relevant product is not fungible, failure to examine cross-elasticity of demand is not fatal to claim as long as plaintiff presents evidence of distinctive price, use, and qualities); *Indep. Ink, Inc. v. Trident, Inc., 210 F. Supp.2d 1155, 1170-1171 (C.D. Cal. 2002)* (holding that in order to prove relevant market definition, plaintiff must proffer market data and figures, ***or*** other relevant material adequately describing the nature, cost, usage, or other features of competing products); *Lantec, Inc. v. Novell, Inc., 146 F. Supp.2d 1140, 1148 (D. Utah 2001)*, (*aff'd, 306 F.3d 1003 [10th Cir. 2002])* (holding that the absence of expert testimony on cross-elasticity of demand was not, *per se,* fatal to the plaintiff's antitrust claims, but that, because **[*1083]** plaintiff failed to present sufficient evidence of factors delineated in *Brown Shoe* and *Eastman Kodak,* judgment as a matter of law was appropriate); *Brooks Fiber Communications of Tucson, Inc. v. GST Tucson Lightwave, Inc., 992 F. Supp. 1124 (D. Ariz. 1997)* (holding that relevant market may be narrowed, despite cross-elasticity **[**89]** of demand, to account for identifiable submarkets); *Maris Distrib. Co. v. Anheuser-Busch, Inc., 2000 U.S. Dist. LEXIS 21001, 2000 WL 33403622 (M.D. Fla. 2000)* (holding that triable issue of fact existed as to determination of market definition, despite the fact that plaintiff failed to calculate cross-elasticity of demand). With these broad principles in mind, the court examines plaintiffs' evidence to determine if it is sufficient to sustain a jury verdict on the issue of market definition, despite NIPP's failure to calculate cross-elasticity of demand. *Id. at 1435*.

(1) Market for Rock Music Concerts (Monopolization and Attempted Monopolization Claims)

HN24[] The scope of the market is usually a question of fact for the jury. *Telecor, 305 F.3d at 1131* (citing *Westman Comm'n Co. v. Hobart Int'l Inc., 796 F.2d 1216, 1220 [10th Cir. 1986])*. In rare circumstances, however, insufficient evidence of market definition in the record may require the court to grant summary judgment against the plaintiff on the issue of market definition. NIPP argues that the relevant product is solely rock concert tickets because the concert-going public does not view rock concert **[**90]** tickets as reasonably interchangeable with non-rock concert tickets, such as tickets to classical music performances or concerts by country artists. (Pls.' Resp. at 45-51.) Alternatively, NIPP argues that the relevant market is the market for all live music concerts. (Pls.' Resp. at 51-52.)

As previously noted, the boundaries of an antitrust market may be determined by examining practical indicia, such as (1) industry and public recognition of the submarket as a separate economic entity, and (2) the product's unique and distinct uses, qualities, price, price sensitivity, production facilities, customers, and vendors. *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524*; *Lantec, 146 F. Supp.2d at 1148*. NIPP's expert witness, Dr. Owen Phillips, while failing to perform economic tests for cross-elasticity of demand, has investigated other practical indicia that tend to delineate a relevant market, as set forth in *Brown.* Accordingly, Dr. Phillips' conclusions based on his investigation, if found credible by the jury, are sufficient to support a jury's definition of the market as rock concert ticket sales.

First, Dr. Phillips assimilated data supporting **[**91]** the assertion that the industry and the public view rock concerts as a separate and distinct market from non-rock concerts. Dr. Phillips cites industry reporters and publications, such as Billboard, Radio and Records, and Arbitron, as distinguishing between rock music and non-rock music in their reporting. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 17].) Additionally, Dr. Phillips' cites consumer polls indicating that music tastes vary greatly by demographic, and concert-goers tend not to view country or classical concerts as substitutes for rock concerts, or country or classical radio stations as substitutes for rock radio stations. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 14].)

Second, Dr. Phillips set forth evidence that rock concerts have uses and qualities distinctive from non-rock concerts. Although both rock and non-rock concerts are used by the end-consumer for entertainment value, a rock music afficionado, does not get the same use out of a country music concert as a rock music concert, if one believes Dr. Phillips' testimony on consumer preferences. (*Id.,* Ex. 1 [Phillips' **[*1084]** Decl. at 14].) Just as Dr. Phillips' observations concerning consumer preferences indicate that **[**92]** rock concerts have a distinctive customer base, common sense supports NIPP's assertion that consumers do not view non-rock concerts as substitutes for rock concerts.

Clear Channel argues that rock concerts do not have distinct qualities from non-rock concerts because all concerts involve similar venues, similar ticket services, similar vending, and similar advertising. (Defs.' Br. at 36.) Although rock concerts may involve the same venues, ticketing services, and vending companies as utilized in non-rock concerts, Dr. Phillips' demonstrates that rock concerts most certainly do not involve the same advertising and promotional inputs. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 6]). Testimony by numerous industry insiders demonstrates that the promotional inputs for rock concerts include rock radio and print advertising, rock radio promotional support, and rock radio air play. (Pls.' Resp., Ex. 2 [Morreale Decl. P19], Ex. 4 [Mickelson Decl. P3], Ex. 20 [Kirby Dep. at 51-52], Ex. 21 [Levy Dep. at 157], Ex. 22 [Loncao Dep. at 33-36].) For rock concerts, all promotional support through radio advertising and air play must be directed to a specific demographic, the listener that **[**93]** typically enjoys rock music. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 6]). Advertising in newspapers and media directed toward individuals over forty years of age, while appropriate for promoting country music or oldies artists, does not substitute as sufficient promotion for rock concerts. Accordingly, NIPP has provided sufficient evidence that rock concerts have distinct uses and inputs, namely distinct radio support.

Third, Dr. Phillips cites evidence of distinct price and of pricing patterns for rock concerts. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 44]; Defs.' Br., Ex. A-8 [Prelim. Economics Report of Owen R. Phillips, Ph.D. at 25-26].) Dr. Phillips sets forth average ticket prices for both rock, rock-pop, and all music concerts. (Pls.' Resp., Ex. 1 [PPhillips' Decl., Tables 6-7 at 41-44].) Based on Dr. Phillips' analysis of consumer and industry perceptions, a review of all of the testimony from members of the industry, and Dr. Phillips' review and analysis of pricing data, NIPP has set forth evidence of the practical indicia necessary to define the relevant market as ***tickets for rock music concerts.***

Alternatively, a reasonable jury could surely find that NIPP **[**94]** has set forth evidence of practical indicia showing a distinct market for ***all live music concerts.*** First, the music concert industry recognizes itself as distinct from other non-live performances, and it tracks its own sales through industry agencies such as BillBoard and Pollstar. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 16].) Dr. Phillips' states, based on his review of lay testimony and industry publications, that live music concerts have distinct qualities not shared by other live events or recorded events, including interaction with the crowd, specific lighting, a different noise level, a distinct length of event, distinct concessions, and a distinct atmosphere. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 16].) The music concert industry has production facilities and vendors which are different from other entertainment industries, such as the sports industry or movie industry. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 16].) Additionally, NIPP states that the prices for live music concert tickets are distinct from price of movie tickets or tickets to sporting events. (Pls.' Resp., Ex. 1 [Phillips' Decl. at 16].) Clear Channel does not dispute any of NIPP's common sense **[**95]** assertions, as practical indicia of an independent relevant market for live music concerts. Accordingly, NIPP has set forth sufficient evidence **[*1085]** for a jury to find a relevant market for all live music concerts.

As stated earlier, besides practical indicia, cross-elasticity of supply is another tool to define the relevant market. In evaluating cross-elasticity of supply, the question raised is whether a monopolistic increase in the price of rock concert tickets would cause other non-rock promoters to enter the market and provide rock concert tickets at lower prices. There are several reasons why supply elasticity does not exist the market for rock concert tickets and the market for all live music concert tickets. First, in the Denver geographic market, access to inputs for production of rock concerts has allegedly been restricted by a single competitor, Clear Channel. Allegedly, Clear Channel has restricted access to artists, radio promotional support, radio advertising, and radio air play, by utilizing its control of rock radio stations in Denver. Allegedly, this single competitor has increased the cost for these inputs to a point where no competitor could enter the market for rock **[**96]** concert tickets and provide tickets at lower prices than the competitor who has control of the cost of these inputs.

NIPP has provided relevant evidence that these restricted inputs create a supply-side barrier to entry for other promoters. *Full Draw, 182 F.3d at 756* (holding that anticompetitive conduct itself may amount to a significant entry barrier). Absent purchasing several rock radio stations in the Denver market, these promoters cannot obtain cheaper access to artists, radio advertising, radio promotional support, and radio air play, so as to enable them to keep ticket prices at a competitive level in the wake of monopolistic ticket pricing by Clear Channel. NIPP has provided sufficient evidence that the cost of acquiring a radio station or obtaining a radio license is a significant barrier to entry, which has arguably become necessary to compete successfully in the Denver geographic market. *Reazin v. Blue Cross & Blue Shield, Inc., 899 F.2d 951, 971* (holding that licensing requirements can present a substantial barrier to entry); (Pls.' Resp. at 74.) Accordingly, because a country music promoter cannot easily acquire a rock radio station, NIPP has presented sufficient evidence **[**97]** that a country music promoter could not easily enter into the rock concert promotions services business and compete successfully for rock artists. Cross-elasticity of supply and practical indicia, therefore, support NIPP's allegations of relevant market.

(2) The Two Markets Relevant to the Tying Claim

(a) Market for Rock Promotional Services

As stated earlier, in NIPP's tying claim, NIPP alleges that Clear Channel covertly manipulates artists, their agents, and their record labels into choosing SFX/Clear Channel Entertainment or Clear Channel Concerts/Clear Channel Radio Festivals promotional services by threatening to withhold air play of the artists' songs. In the market for promotional services, the artist, his agent, and his record label are the buyers and the promoter is the seller. Whether or not rock concert promotion services and country concert promotion services are separate service markets can only be determined after a factual inquiry into the commercial realities faced by artists and their management, who are the relevant consumers in this case. *Eastman Kodak, 504 U.S. at 481-482, 112 S. Ct. at 2090*. The same questions involved in **[**98]** finding a submarket for rock concerts, such as the relevant uses, qualities, and prices of the product, therefore, arise in the context of attempting to define the concert promotions service market. *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524*; *Lantec, 146 F. Supp.2d at 1148*.

[*1086] The record before the court demonstrates that NIPP has utterly failed to define by economic data or lay testimony a relevant market for rock concert promotions services where the consumers are artists and their management. NIPP has set forth no information whatsoever about the transactions that occur between artists and promoters. NIPP has provided no information concerning the qualities or uses of the services received by artists from the promoter, such as monetary payment, backstage catering, specific types of advertising, or other negotiated consideration. Furthermore, NIPP has provided no polling data or other consumer information concerning what artists and their management perceive to be the differences in promotion services offered by various promoters. Finally, NIPP has provided no information on bids provided to rock or non-rock artists or any other pricing information **[**99]** relevant to this submarket. NIPP has failed, as a matter of law, to adduce sufficient evidence for a jury to define the market for concert promotional services where the artist, his manager, and his record label are the consumer, and the promoter is the seller. Accordingly, there is insufficient evidence to prove one of the two markets relevant to NIPP's tying claim.

(b) The Market for Rock Radio Air Play

In its tying claim, NIPP seeks to define a relevant market as rock radio air play of songs, where the relevant seller is the rock radio station and the consumer is the rock artist. Whether or not rock radio air play is distinct from non-rock radio air play can only be determined after a factual inquiry into the commercial realities faced by the consumer. *Eastman Kodak., 504 U.S. at 481-482, 112 S. Ct. at 2090*. Here, NIPP has set forth sufficient evidence of practical indicia of qualities, prices, and uses to survive summary judgment on the market definition of rock radio air play for both its tying claim. *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524*; *Lantec, 146 F. Supp.2d at 1148*.

First, NIPP provides data supporting **[**100]** the assertion that the radio industry and the public view rock radio stations as distinct from non-rock radio stations. Radio stations classify and categorize themselves based on the specific format of music played by the station, whether it be rock, country, jazz, or oldies. (Pls.' Resp., Ex. 1 [Phillips Decl. at 7].) This categorization permeates all of a radio station's promotional literature, whether the literature is directed at listening audiences or potential advertisers. Similarly, companies that research and report on radio industry trends, such as Arbitron and Duncan's, categorize radio stations based on the format of music they play. (*Id.,* Ex. 1 [Phillips Decl. at 7].) Radio industry data shows that the public views rock radio as distinct from non-rock radio. As shown by "duplicate cume" data compiled by the radio industry, listeners of rock radio stations usually only switch between other rock radio stations when listening to the radio. [6] (*Id.,* Ex. 1 [Phillips Decl. at 14, 37].)

[101]** Because the industry and the public view rock radio as a distinct commodity, artists also view rock radio air play as a distinct commodity. When a rock radio station advertises its rock format categorization, the radio station attracts a particular demographic of listener, a younger individual who prefers listening to rock music. (*Id.,* Ex. 1 [Phillips Decl. at 14].) The rock radio station does not attract an **[*1087]** older listener who hates rock music. Undoubtedly, an artist desires his or her songs to be played on a station that will attract the types of listeners who enjoy the style of music that the artist plays. (Pls. Resp., Ex. 1 [Phillips Decl. at 6].) Accordingly, a rock artist will not view air play of his or her songs on a country format station as a substitute for air play on a rock station. (*Id.,* Ex. 1 [Phillips Decl. at 6].)

Secondly, NIPP sets forth evidence that rock radio has distinctive uses and qualities from non-rock radio. NIPP has demonstrated that rock radio reaches a specifically defined demographic of listeners, which non-rock radio does not reach. (Pls. Resp., Ex. 1 [Phillips Decl. at 3-4, 5-7].) This distinction is quite important to the artist who **[**102]** wants his or her type of music to reach the demographic of consumer who is most likely to enjoy it. Finally, play list data from self-described rock radio stations shows that rock radio stations play the same songs from the same artists more often than not. (*Id.,* Ex. 1 [Phillips Decl. at 37].) Accordingly, a different type of music is played on rock radio stations. Although Clear Channel makes a compelling argument that non-rock stations play many of the same songs as rock stations, NIPP's evidence that non-rock stations play rock songs more infrequently than non-rock songs creates a dispute of fact that it best resolved by the jury. (Defs.' Br. at 47-48; *disputed at* Pls.' Resp., Ex. 1 [Phillips Decl. at 37].)

The third practical indicia of relevant, separate market is distinct pricing. Dr. Phillips, NIPP's expert, does not set forth any information regarding the alleged cost to artists to obtain air play on the radio. Although NIPP suggests in its briefing that indies make payments to radio stations, such a statement does not amount to evidence of pricing which suggests a separate market for rock radio air play. Nevertheless, this omission is not fatal to NIPP's position **[**103]** at the summary judgment stage. ***HN25***[] Courts have recognized that tying may provide a way for a monopolist to hide activities that are illegal or disfavored by the law. *Town Sound and Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 476 (3d Cir. 1992)* (citing *Fortner Enters v. United States Steel Corp., 394 U.S. 495, 513, 89 S. Ct. 1252, 1263, 22 L. Ed. 2d 495 [1969])*. A monopolist may seek to evade regulatory control in the tying product market by hiding the price in the tied product's price. *Id.* Here, NIPP alleges that Clear Channel evades regulations prohibiting payola by incorporating payola into the concert promotions services contracts with artists. Because Clear Channel allegedly hides payola pricing information, there is no price information for the market for radio air play.

A final tool that may be useful in defining the scope of the relevant market is cross-elasticity of supply. *Rebel Oil Co., 51 F.3d at 1436*. Even if artists do not view non-rock radio air play as a substitute for rock radio air play, if producers of non-rock radio can readily shift their production facilities to produce rock radio in response to **[**104]** a price shift in rock radio air play, then the sales of both should be included in the relevant market. *Id.* Construing the facts in the light most favorable to NIPP, producers of non-rock radio in the Denver area market cannot easily shift to rock radio due to barriers to entry. NIPP cites barriers to entry into the rock radio industry in the Denver market, including the high cost of switching formats, customer goodwill and name recognition, and Clear Channel's large

---

[6] "Duplicate cume" data is a term of art used by the radio industry for data showing how often radio listeners switch between stations and which stations the listeners choose when switching.

size nationwide. (*Id.,* Ex. 1 [Phillips Decl. at 8-9].); *Multistate Legal Studies v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, 63 F.3d 1540, 1555*. Additionally, NIPP notes that the Denver market is so saturated with rock radio stations that it cannot support another rock radio station. (*Id.*) Based on evidence **[*1088]** of barriers to entry, sufficient dispute of material fact regarding cross-elasticity of supply exists so that summary judgment on rock radio air play market definition is inappropriate. Accordingly, the lack of price information on the market for radio air play is not fatal to the definition. Disputes of fact concerning the availability of pricing information make summary judgment inappropriate.

(3) The Market for Rock Radio* [**105] *Advertising and Promotional Support (Essential Facilities Claim)

In its essential facilities claim, NIPP seeks to define the relevant market as rock radio advertising and promotional support, where the seller is the rock radio station and the consumer is the concert promoter. Whether or not rock radio advertising and promotional support is a distinct product from all radio advertising can only be determined after a factual inquiry into the commercial realities faced by the consumer. *Eastman Kodak, 504 U.S. at 481-482, 112 S. Ct. at 2090*. Here, NIPP has set forth sufficient evidence of practical indicia of qualities, prices, and uses to survive summary judgment on the market definition of rock radio advertising and promotional support for its essential facilities claim. *Brown Shoe, 370 U.S. at 325, 82 S. Ct. at 1524*; *Lantec, 146 F. Supp.2d at 1148*.

First, as set forth above, NIPP provides data supporting the assertion that the public views rock radio stations as distinct from non-rock radio stations. NIPP has also cited testimony by Clear Channel showing that the radio industry views advertising and promotional support for concert **[**106]** promoters as distinct from advertising for other advertisers. Michael O'Connor of Clear Channel Radio in Denver specifically states that radio stations gain valuable consideration when they advertise and provide promotional support for concerts because listeners tune in more regularly to obtain information on the concert of their favorite artist. (Defs.' Br., Exs. Vol. 2, Ex. A-24 [O'Connor Dep. at 385-386].) Additionally, electronic mail messages sent by Clear Channel personnel to record labels and artist managers demonstrate that radio stations highly value the right to engage in certain types of promotional support, such as having radio studio appearances of artists. (Pls.' Resp., Exs. Vol. 3, Ex. 67[Electronic Mail Messages between O'Connor and Spivak of 8/23/2001], Ex. 68 [Electronic Mail Messages between O'Connor, Scott Arbough, and Sabrina Saunders of 11/13/2001-11/14/2001].) Accordingly, NIPP has set forth sufficient evidence that advertising and promotional support for concerts is a distinct product from advertising for general consumer goods.

Secondly, NIPP sets forth evidence that rock radio advertising and promotional support has uses and qualities distinct from **[**107]** non-rock radio advertising and promotional support. When a rock radio station advertises its rock format categorization, the radio station attracts a particular demographic of listener, a younger individual who prefers listening to rock music. (*Id.,* Ex. 1 [Phillips Decl. at 14].) The rock radio station does not attract a listener who hates rock music. Undoubtedly, a promoter prefers to advertise and promote a rock concert on a station that will attract the type of listeners who enjoy rock music. (Pls. Resp., Ex. 1 [Phillips Decl. at 6].) Accordingly, a rock concert promoter will not view advertising and promotional support for a rock concert on a country format station as a substitute for advertising and promotional support on a rock radio station. (*Id.,* Ex. 1 [Phillips Decl. at 6].)

Clear Channel argues that the relevant inquiry is not whether a rock concert promoter views advertising on a pop radio station as a reasonable substitute for advertising **[*1089]** on a rock radio station; instead, the relevant inquiry is whether an advertiser of any product views advertising on a pop radio station as a substitute for advertising on a rock radio station. (Defs.' Br. at 44.) According **[**108]** to Clear Channel, advertisers may view these as reasonable substitutes because the stations may reach the same age group demographic of consumers. Although this argument has merit as to commercial advertisers, it also highlights why advertising and promotional support for concert promoters may be defined as a distinct product market from advertising for other businesses. When purchasing advertising spots on radio, advertisers of products and services seek to reach a particular age or other demographic of consumers, some of whom may like their product. When purchasing advertising and seeking promotional support for a rock concert, however, rock concert promoters seek to reach an audience who enjoys rock music, regardless of age or other demographic information. Radio advertising and promotional support for a concert puts the promoter directly in touch with his consumer, at the very instant the consumer is enjoying the product sold by the promoter, rock music. Advertising rock concerts on other non-rock format stations does not provide this reach. (Pls.' Resp., Ex. 2 [Morreale Decl. PP16-19], Ex. 4 [Mickelson Decl. P3], Ex. 22 [Loncao Dep. at 35-36], Ex. 39 [Sievers Dep. 101-102]. **[**109]**) Similarly, advertising in newspapers or magazines, or on television stations, even if these forms of media are targeted to rock audiences, do not carry the advertisement for a concert to an end-consumer who necessarily is enjoying at that moment the very product advertised. (*Id.,* Ex. 92 [Electronic Mail Message Between Clear Channel Personnel regarding the Value of Radio Promotion Compared to Print Promotion].)

Third, NIPP provides evidence of distinct prices involved in advertising and promotional support of rock concerts as compared to general advertising. (*Id.,* Ex. 90 [Synopsis of Promotional Support Value Provided to U2 by KTCL].) NIPP demonstrates the value obtained by the promoter for promotional support which offsets the cost of the advertising, a pricing adjustment which does not occur in regular advertising.

A final tool that may be useful in defining the scope of the relevant market is cross-elasticity of supply. *Rebel Oil Co., 51 F.3d at 1436*. Even if rock concert promoters do not view non-rock radio advertising and promotional support as a substitute for rock radio advertising and promotional support, if producers of non-rock radio can readily **[**110]** shift their production facilities to produce rock radio in response to a price shift in rock radio advertising, then the sales of both should be included in the relevant market. *Id.* Construing the facts in the light most favorable to NIPP, producers of non-rock radio in the Denver area market cannot easily shift to rock radio due to barriers to entry. NIPP cites barriers to entry into the rock radio industry in the Denver market, including the high cost of switching formats, customer goodwill and name recognition, and Clear Channel's large size nationwide. (*Id.,* Ex. 1 [Phillips Decl. at 8-9].); *Multistate Legal Studies, 63 F.3d at 1555*. Additionally, NIPP notes that the Denver market is so saturated with rock radio stations that it cannot support another rock radio station. Based on evidence of barriers to entry, and practical indicia of distinct markets, sufficient disputes of material fact regarding market definition exist so that summary judgment on the rock radio advertising and promotional market definition is inappropriate.

(4) Rock vs. Non-Rock Generally

Clear Channel argues that NIPP's proposed relevant markets fail as a matter of **[*1090]** law **[**111]** because the markets are too narrow, and a jury will have no evidentiary basis to distinguish between rock and non-rock. (Defs.' Br. at 43.) NIPP, however, has demonstrated sufficient evidence for a reasonable jury to find that the relevant market definitions in this case are properly categorized in terms of rock music. Although these markets are narrowly drawn submarkets, such narrow markets are appropriate when commercial realities faced by the consumer dictate this stricture. Other courts have found sufficient evidence to support narrow submarkets for antitrust purposes in similar circumstances. *Eastman Kodak, 504 U.S. at 481-482, 112 S. Ct. at 2090* (holding that a market for purchase and repair of Kodak photography equipment exists separately from market for purchase of all photography equipment); *Full Draw, 182 F.3d at 756* (holding that archery-only trade shows may be a separate market from gun shows that include archery); *Olin Corp. v. FTC, 986 F.2d 1295, 1304 (9th Cir. 1993)*, (*cert. denied, 510 U.S. 1110, 114 S. Ct. 1051, 127 L. Ed. 2d 373 [1994])* (holding that dry sanitizer swimming pool products are in a **[**112]** separate market from liquid pool bleach); *Omni Outdoor Adver., Inc. v. Columbia Outdoor Adver., Inc., 891 F.2d 1127, 1142 (4th Cir. 1989)*, (*rev'd on other grounds, 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 [1990])* (finding that billboard advertising is a separate market from other advertising); *Flip Side Prods., Inc. v. Jam Prods., Inc., 843 F.2d 1024, 1032 (7th Cir. 1988)*, (*cert. denied, 488 U.S. 909, 109 S. Ct. 261, 102 L. Ed. 2d 249 [1988])* (finding that "the relevant market in this case was the promotion of arena level concerts in the Chicago metropolitan area"); *Ad-Vantage Tel. Directory Consultants v. GTE Directories Corp., 849 F.2d 1336 (11th Cir. 1987)* (holding that yellow pages advertising is in separate market from other advertising); *Danny Kresky Enters. Corp. v. Magid, 716 F.2d 206, 208 (3d Cir. 1983)* (reinstating jury verdict for plaintiff who had alleged antitrust violations in connection with "the promotion of 'black-oriented' concerts in Pittsburgh").

Additionally, Clear Channel argues that those markets that NIPP's attempts to delineate markets based on **[**113]** a distinction between rock and non-rock artists or music fail because NIPP has provided no criteria to aid the jury in determining why some artists and radio stations are defined as rock, while others are considered pop. (Defs.' Br. at 39.) Although Clear Channel concedes that distinguishing between country and rock may not be difficult for a jury, it more specifically argues that, because NIPP cannot properly justify why certain fringe artists, such as Jewel and Sheryl Crow, fall into the rock or non-rock category, any market definition that makes distinctions on this basis is flawed and erroneous. (*Id.* at 41.)

While the court is mindful of the difficulty of categorizing certain fringe artists, such as the Neville Brothers and the Cowboy Junkies, such difficulty does not justify a holding that no submarket for rock, therefore, exists. Just as "customers know a department store when they see it," customers know a rock concert when they hear it, as will the jury. *Bon-Ton Stores v. May Dep't Stores Co., 881 F. Supp. 860, 870*. That the outer edge of a market's boundaries are a disputed does not mean the market is legally flawed for purposes of a motion for summary judgment. Market boundaries **[**114]** of necessity may be imprecise. ***Antitrust Law*** Developments (Fifth) at 525. Therefore, the question of boundaries is most properly answered by the jury.

Finally, Clear Channel argues that plaintiffs' expert's distinction between rock and non-rock fails because it is based solely on his subjective judgments. (Defs.' Br. at 39-40.) Plaintiffs' expert, however, cites many reports from the radio industry **[*1091]** and from SFX/Clear Channel Entertainment itself as evidence to aid the jury in determining what qualifies as rock music for purposes of the rock concert promotions and rock radio industries. (Defs.' Br., Ex. A-8 [Prelim. Phillips' Report at 40-47].) Because the expert utilized industry materials in defining rock music, this distinction is not subjective, and the expert's opinions are sufficiently grounded to be admissible.

Furthermore, because Clear Channel's derives its alleged market power in the rock concert promotions industry based on its control of "rock radio," an alleged source of advertising, promotional, and air play inputs for rock concert promotions, definitions of rock according to the radio industry are extremely relevant to any jury's inquiry into the definition of rock **[**115]** music in this case. After all, NIPP alleges that the rock radio industry and the rock concert promotions industry have a symbiotic relationship, both affecting what consumers of concerts consider to be rock or non-rock music. Accordingly, the music defined as rock and played by rock radio stations in Denver is extremely relevant to defining the scope of the "rock" market in this case. At the summary judgment stage, therefore, the court cannot hold as a matter of law that there is insufficient evidence in the record for the jury to properly distinguish between rock and non-rock music. Having evaluated the sufficiency of NIPP's evidence of relevant market definition, the court turns to NIPP's individual claims for relief under the Sherman Act.

2. Section 1 of the Sherman Act: Tying

NIPP claims that Clear Channel has violated *section 1 of the Sherman Act* by conditioning air-play of an artist's songs and promotional support for the artist's concerts on the artist's use of SFX/Clear Channel Entertainment or Clear Channel Concerts/Clear Channel Radio Festivals for the artist's concert-promotions needs in the Denver market. (Pls.' Resp. at 91.) NIPP argues that this conditioning **[**116]** creates an illegal tying arrangement. ***HN26***[] *Section 1 of the Sherman Act* states, "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is declared to be illegal . . . ." *15 U.S.C.A. § 1 (West 1997 & Supp. 2003)*. *Section 1 of the Sherman Act* proscribes anticompetitive conduct as part of concerted action or a conspiracy; it does not apply to unilateral conduct. *Systemcare, Inc. v. Wang Lab. Corp., 117 F.3d 1137, 1139-1140 (10th Cir. 1997)*. A tying arrangement exists when a seller conditions the purchase of a highly desirable product on the purchase of an additional product. *Id.* Whenever a buyer consents to the tying arrangement by purchasing the tied product so as to obtain the tying product, concerted action occurs between buyer and seller so as to implicate *section 1 of the Sherman Act*. *Systemcare, 117 F.3d at 1139-1140*. Here, NIPP argues that Clear Channel conditions the "sale" of air play to artists (tying product) on the artist's purchase of Clear Channel's concert promotion services (tied product).

HN27[] Every refusal to sell two products separately does not amount **[**117]** to an illegal tying arrangement. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 11-12, 104 S. Ct. 1551, 1558, 80 L. Ed. 2d 2 (1984)*. If each product can be purchased separately in a competitive market, one seller's decision to sell both products in a single package does not impose an unreasonable restraint on the market for either product. *Id. at 11-12, 104 S. Ct. at 1558*. If, however, the seller has significant market power in the market for one product and exploits its control over this "tying" market to force the buyer to purchase a different product in the "tied" market, which the buyer either did not want or would have purchased elsewhere, the tying **[*1092]** arrangement violates *section 1 of the Sherman Act*. *Id. at 12, 104 S. Ct. at 1558*.

> ***HN28***[] The fundamental restraint against which the tying proscription is meant to guard is the use of power over one product to attain power over another, or otherwise to distort freedom of trade and competition in the second product. This distortion injures the buyers of the second product, who, because of their preference for the seller's brand of the first are artificially forced to make **[**118]** a less than optimal choice in the second. And even if the customer is indifferent among brands of the second product and therefore loses nothing by agreeing to use the seller's brand of the second . . . such tying agreements may work significant restraints on competition in the tied product. ***HN29***[] The tying seller may be working toward a monopoly position in the tied product, and, even if he is not, the practice of tying forecloses other sellers of the tied product and makes it more difficult for new firms to enter the market. They must be prepared not only to match existing sellers in the tied product in price and quality, but to offset the attraction of the tying product itself. Even if this is possible through simultaneous entry into production of the tying product, entry into both markets is significantly more expensive than simple entry into the tied market, and shifting buying habits in the tied product is considerably more cumbersome and less responsive to variations in competitive offers. In addition to these anticompetitive effects in the tied product, tying arrangements may be used to evade [regulations] concerning [prices] in the tying product through clandestine transfer **[**119]** of the profit to the tied product.

Id. at 12, 104 S. Ct. at 1558 n.19 (citing *Fortner I, 394 U.S. at 512-514, 89 S. Ct. at 1263-1264* [J. White, *dissenting*]). ***HN30***[] When there is an unlawful tying arrangement, the consumer's freedom to select the best bargain the second market is impaired by his need to purchase the tying product and perhaps by an inability to evaluate the true cost of either product when they are available only as a package. *Id. at 14, 104 S. Ct. at 1560*. Tying claims are analyzed under two different tests: (1) *per se* analysis, and (2) rule of reason analysis. *Brokerage Concepts, Inc. v. U.S. Healthcare, Inc., 140 F.3d 494, 512-513 (3d Cir. 1998)*. Here, NIPP sets forth sufficient evidence and disputes of material fact regarding NIPP's *per se* tying claim to survive summary judgment. NIPP's tying claim based on rule of reason analysis, however, fails as a matter of law because of its failure to define one of the two relevant markets.

a. Per Se Liability

HN31[] The *per se* rule condemns practices that are devoid of redeeming competitive rationales. *SCFC ILC, 36 F.3d at 963.* **[**120]** When a seller's share of the tying market is high, or when the seller offers a unique product that competitors are not able to offer, the Supreme Court has held that the likelihood that market power is being used to restrain competition in a separate market is sufficient to make *per se* condemnation appropriate. *Jefferson Parish, 466 U.S. at 17, 104 S. Ct. at 1560-1561*. Based on the record, NIPP has sufficiently demonstrated that Clear Channel's share of the rock radio market is sufficiently high to justify *per se* analysis in this case. Dr. Phillips, NIPP's expert witness, defined the scope of the rock radio air play market (tying market) based on play list data, "duplicate cume" data, and radio station and industry materials. Based on his calculations, Clear Channel controls four of the six rock radio stations in the Denver area, or 66.6%. [7] (Defs.' Br., **[*1093]** Ex. A-8 [Prelim. Economic Report of Phillips at 18]; Pls.' Resp., Ex. 1 [Phillips Decl. at 15].) If the number of listeners is considered, as reflected in advertising revenue for the rock radio stations and Arbitron data, Clear Channel controls 73% of the rock radio air play market. (Pls.' Resp. at 58, **[**121]** Ex. 1 [Phillips Decl. at 14].) Additionally, Clear Channel allegedly controls a unique product, radio, for which there are arguably high entry barriers. Construing this data in the light most favorable to NIPP, Clear Channel's alleged market share of the rock radio industry is sufficient to justify *per se* analysis of NIPP's tying claim.

---

[7] In April 2002, Dr. Phillips found that Seven rock radio stations constitute the rock radio market in Denver: KBPI (CC), KRFX (CC), KTCL (CC), KBCO (CC), KALC (Emmis), KXPK (Emmis), and KKHK (Tribune). Since then, however, KXPK has exited the rock radio market. KKHK ("the Hawk") has changed its name and ownership but maintains its rock format. It is now KQMT ("the Mountain").

HN32[] The elements of a *per se* violation are: (1) two separate products; (2) a tie, or conditioning of the sale of one product on the sale of another; (3) sufficient economic power in the tying product market (rock radio air play), and (4) a substantial volume of commerce affected in the tied product **[**122]** market (rock concert promotions services). *Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal and Prof'l Publ'ns, Inc., 63 F.3d 1540, 1546 (10th Cir. 1995)*. Plaintiff is not required to show anticompetitive effects in the tied market. *Law v. Nat'l Collegiate Athletic Assoc., 134 F.3d 1010, 1016 (10th Cir. 1998)*. Similarly, the court need not consider defendant's procompetitive justifications for the practice. *Id.* Here, NIPP has demonstrated sufficient evidence of the *per se* elements to create disputes of material fact, making summary judgment on the *per se* tying claim inappropriate.

(1) Two Separate Products

HN33[] In determining the validity of a tying arrangement, the court must first identify the two separate products that are the subject of the arrangement. *Jefferson Parish, 466 U.S. at 15, 104 S. Ct. at 1560*. Here, NIPP claims that Clear Channel forces artists and their management to purchase rock concert promotional services from Clear Channel in order to purchase rock radio air play of the artists' songs and promotional support for the artists' concerts. To NIPP, therefore, the tying product is **[**123]** rock radio air play and promotional support, and the tied product is rock concert promotional support services.

Apparently conceding that concert promotional services provided to artists are a product, Clear Channel argues that there is no tying product because radio air play and promotional support are not sold, but are freely given. (Defs.' Br. at 80-82.) As stated earlier in this order, however, NIPP has provided evidence that radio air play is sold to artists through "indies," and perhaps through the tying arrangement itself. Additionally, as stated earlier in this opinion, NIPP has set forth sufficient evidence that radio stations receive an amount of consideration when providing air play and promotional support, indicative of an actual product. Accordingly, there is a legitimate dispute of fact whether air play and promotional support are actually sold, and, therefore, could potentially be considered products.

HN34[] The test for determining whether two objects are separate products, as opposed to the same product, turns not on their function, but on the nature of any consumer demand for them. *Multistate Legal Studies, 63 F.3d at 1547*. Here, NIPP has shown that the **[**124]** demand for rock radio air play and radio promotional support, as evidenced through the existence of "indies," **[*1094]** exists separately from the demand for concert promotional services, just as it did prior to the time that Clear Channel entered the concert promotions market. At the summary judgment stage, the court cannot say, as a matter of law, that NIPP will not be able to adduce sufficient evidence at trial to prove the existence of two products.

(2) Tie

HN35[] The second element of a *per se* tying claim is a tie, or conditioning of the sale of one product on the sale of another. *Multistate Legal Studies, 63 F.3d at 1547*. The seller must force the buyer to purchase the tied product. *Sports Racing Servs., Inc. v. Sports Car Club of Am., Inc., 131 F.3d 874, 887 (10th Cir. 1997)*. To establish forcing, a plaintiff must show that: (1) he himself complied with the tying practice by purchasing the tying and tied product; ***or*** (2) although he did not make the purchase, other buyers agreed to the arrangement under threat of losing the tying product. *Systemcare, 117 F.3d at 1140*. Clear Channel argues that NIPP provides no evidence **[**125]** that any buyer agreed to this arrangement under threat of losing air play. (Defs.' Br. at 80.) More specifically, Clear Channel argues that NIPP has produced no artist who will testify that he or she felt forced to utilize Clear Channel's promotional services in order to prevent losing air play. (*Id.*)

Although no artists have stepped forward to testify against Clear Channel, a fact that may be equally indicative of their fear of losing air play and promotional support as not, NIPP has provided evidence of at least four record labels and/or agents agreeing to the tying arrangement under threat of losing air play and/or promotional support. First, NIPP cites electronic mail messages passed between a director at Reprise Records, Todd Sievers, and Michael O'Connor at Clear Channel. (Pls.' Resp. Exs. Vol. 3, Exs. 52-55A [Electronic Mail Messages and Letters between O'Connor and Sievers of 3/2000-6/2000].) In these messages, Sievers arguably agrees to allow Clear Channel Concerts/Clear Channel Radio Festivals to promote the band Orgy's concert in the Denver market in order to prevent loss of air play for Orgy songs and other Reprise artists' songs. During his deposition, Sievers admitted **[**126]** agreeing to this tying arrangement. (*Id.,* Exs. Vol. 3, Ex. 55A [Sievers Dep. at 73].) Similarly, other electronic messages show instances where artists, their agents, or their record labels agreed to use Clear Channel Concerts/Clear Channel Radio Festivals or SFX/Clear Channel Entertainment in order to ensure that they received air play and promotional support. (*Id.,* Exs, Vol. 3, Exs. 42, 58, 64 [Electronic Mail Messages and Letters between Clear Channel Personnel and Various Artists' Agents and Record Labels].) Although Clear Channel argues that these artists were mistaken about Clear Channel's willingness to withhold air play, NIPP has provided these documents containing party-opponent admissions creating a dispute of material fact as to whether this was the case. Furthermore, NIPP provides several admissions by O'Connor himself that, if artists and their management desire air play and effective promotional support for their concerts from Clear Channel radio stations, they must choose Clear Channel for their concert promotions needs. (*Id.,* Exs., Vol. 3, Exs. 71-72, 75 [O'Connor statements].)

Clear Channel counters that all of the above-mentioned evidence is inadmissible **[**127]** and, therefore, cannot be used to create a dispute of material fact on summary judgment. (Defs.' Br. at 65.) Clear Channel is correct that ***HN36***[] the court may consider only admissible evidence when ruling on a summary judgment motion. *See World of Sleep, 756 F.2d at 1474*. All of the electronic **[*1095]** mail messages from O'Connor and other Clear Channel personnel, such as Bob Richards and Sabrina Saunders, are admissible under *Federal Rule of Evidence 801(d)(2)*. *Fed. R. of Evid. 801(d)(2)(C)-(D)* provides that a statement is not hearsay if made by a party-opponent or its agent and offered against the party, if the agent is an employee who is authorized to engage in the type of correspondence at issue. Here, because the electronic mail messages were written by Clear Channel personnel who are authorized to engage in this type of correspondence with record labels, the messages are admissible for the purposes of summary judgment and at trial. A more difficult question concerns the correspondence drafted and sent by record labels, which confirm the labels and artists' consent to the tying arrangement. Because the parties **[**128]** do not significantly address the issue, the court is left to its own devices.

Based on a review of the Federal Rules of Evidence, the court finds ***HN37***[] several exceptions to the hearsay rule indicating that the electronic mail messages from record labels are admissible. First, *Rule 801(d)(2)(E)* provides that a statement is not hearsay if the statement is offered against a party, and the statement is a statement by a coconspirator of a party during the course and in furtherance of the conspiracy. This rule is not limited to criminal cases, but applies to civil antitrust case as well. *World of Sleep, 756 F.2d at 1474*. ***HN38***[] Because *section 1 of the Sherman Act* states, "every . . . conspiracy, in restraint of trade or commerce . . . is declared to be illegal . . .," *15 U.S.C.A. § 1*, and tying arrangements have been found to be illegal conspiracies under *section 1*, the coconspirator exception to the hearsay rule may be properly applied to correspondence confirming a tying agreement if the other requirements of the exception are fulfilled. The coconspirator exception only allows admittance of statements in furtherance of a conspiracy if there is sufficient independent **[**129]** evidence, besides the statements, to establish the existence of the conspiracy. *World of Sleep, 756 F.2d at 1474*; *State of New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1073 (2d Cir. 1988)*. Here, there is other evidence of the conspiracy besides the messages written by record labels. The other evidence includes testimony from witnesses, such as Sievers, the messages written by Clear Channel personnel, and the play list data for songs. Accordingly, this exception likely applies to the electronic mail messages written by record labels and artists' management.

Even if the coconspirator exception is inapplicable, the evidence itself is very likely not hearsay. ***HN39***[] A verbal act is not considered hearsay if it is a statement that bears on the rights of the parties to the statement. *Fed. R. of Evid. 801(c)* advisory committee note. Conversations as to the making and terms of an oral agreement may be presented into evidence because the proof of the words spoken is not made to establish their truth but to establish the fact that they were spoken. *First Nat'l Bankshares of Beloit, Inc. v. Geisel, 853 F. Supp. 1344, 1355 (D. Kan. 1994)* **[**130]** (citing *Creaghe v. Iowa Home Mut. Cas. Co., 323 F.2d 981, 984-985 [10th Cir. 1963])*. Here, because the electronic mail messages show record labels agreeing to a tying arrangement, and because the agreement itself is the relevant act for stating a tying claim under *section 1 of the Sherman Act*, the electronic mail messages are not hearsay but are verbal acts under the Federal Rules of Evidence.

Finally, assuming the statements were hearsay, the state of mind exception to the hearsay rule provides:

> HN40[] the following are not excluded by the hearsay rule, even though the declarant is available as a witness: . . . [a] statement **[*1096]** of the declarant's then existing state of mind, emotion, sensation, or physical condition (such as intent, plan, motive, design, mental feeling, pain and bodily health), but not including a statement of memory or belief to prove the fact remembered or believed . . . .

Fed. R. of Evid. 803(3). **HN41**[] Under this rule, written correspondence showing evidence of intention is admitted to prove the doing of the act intended. *Id.* advisory committee notes. Here, to the extent the electronic mail messages from **[**131]** the record labels show the intention of the labels to commit their artists to Clear Channel concert promotions, the electronic mail messages are admissible under the state of mind exception. Any statements of the record labels' beliefs as to why they chose to commit their artists may not be admitted under the exception, however, because it is a statement of belief. *Fed. R. of Evid. 803(3)*. Accordingly, based on review of the hearsay rule and its exceptions, the electronic mail messages set forth by NIPP are admissible as evidence of a "tie."

As stated earlier, Clear Channel also argues that there is no evidence of a "tie" because radio air play and radio promotional support are freely given away by radio stations and not purchased. Once again, NIPP has set forth evidence that radio air play is bought and sold through the use of "indies." Furthermore, to the extent that NIPP has provided no evidence of the cost of radio air play, NIPP has shown that the price of a bundled product may reflect both the costs of the tied product and the tying product. In this situation, when customers purchase the bundled product, customers are purchasing the tying product, **[**132]** even if it is touted as being free. *Multistate Legal Studies, 63 F.3d at 1548* (citing *Directory Sales Mgmt. Corp. v. Ohio Bell Tel. Co., 833 F.2d 606, 610 [6th Cir. 1987])*. Here, because NIPP alleges that the cost of acquiring radio air play is implicit in the artist's choice to use Clear Channel's concert promotions services, the fact that radio air play independently costs nothing is irrelevant. Additionally, NIPP has presented evidence that consideration is exchanged in transactions for radio promotional support, because both the radio station and the promoter benefit from the transaction. (Defs.' Br., Exs. Vol. 2, Ex. A-24 [O'Connor Dep. at 385-386].) Because the evidence demonstrates that radio air play and radio promotional support are exchanged for consideration, the court finds that NIPP has set forth sufficient evidence of a "tie" to create a dispute of material fact. Summary judgment on this issue, therefore, is inappropriate.

(3) Market Power in Tying Product Market

HN42[] In examining a tying claim, once the distinct products are identified, the question arises whether the consumer has sufficient choice to forgo the tying product **[**133]** altogether and, hence, the tied product, or whether the defendant has sufficient market power to force the consumer to purchase the tied product against his desire, based on defendant's control of the tying product. *Jefferson Parish, 466 U.S. at 24-25, 104 S. Ct. at 1565*. If the consumer has sufficient choice, no forcing is present, and the tying arrangement is perfectly lawful. *Id., 466 U.S. at 25, 104 S. Ct. at 1565*. This determination is made by focusing on market power in the tying product market. The existence of market power in the tying product market is ordinarily inferred from the seller's possession of a predominant share of the market. *Eastman Kodak, 504 U.S. at 464, 112 S. Ct. at 2081* (citations omitted). NIPP claims that Clear Channel controls the market for rock radio air play, the tying market, in Denver, based on the number of rock stations it owns and the percentage of rock radio advertising it controls.

[*1097] NIPP has adequately shown that Clear Channel's share of the rock radio market is sufficiently high to fulfill this element of a tying claim. Dr. Phillips, NIPP's expert witness, defined the scope of the rock radio **[**134]** air play market (tying market) based on play list data, duplicate cume data, and radio station and industry materials. Based on his calculations, Clear Channel controls four of the six rock radio stations in the Denver area, or 66.6%. (Defs.' Br., Ex. A-8 [Prelim. Economic Report of Phillips at 18]; Pls.' Resp., Ex. 1 [Phillips Decl. at 15].) If the number of listeners is considered, as reflected in advertising revenue for the rock radio stations and Arbitron data, Clear Channel controls 73% of the rock radio air play market. (Pls.' Resp. at 58, Ex. 1 [Phillips Decl. at 14].) Construing this data in the light most favorable to NIPP, Clear Channel's alleged market share of the rock radio industry is, therefore, sufficient to demonstrate market power in proving a *per se* tying claim.

(4) Substantial Volume Affected in Tied Product Market

HN43[] The final element that a plaintiff must demonstrate in proving a tying claim is that a substantial volume of commerce has been affected in the tied product market. *Multistate Legal Studies, 63 F.3d at 1546*. In demonstrating *per se* liability, however, this element is loosely applied because, once the defendant **[**135]** is found to have appreciable market power in the tying market, the ability to leverage this power to restrain trade in the tied market is presumed. *Brokerage Concepts, 140 F.3d at 511*. This presumption arises because the foundational principle of *per se* liability is that some acts are so inherently anticompetitive that no examination of their impact on the market as a whole is required. *Datagate, Inc. v. Hewlett-Packard Co., 60 F.3d 1421, 1425 (9th Cir. 1995)* (citing *Fortner I, 394 U.S. at 501, 89 S. Ct. at 1258*). No inquiry, therefore, need be made into the actual prevailing market conditions in the tied market. *DiGidyne Corp. v. Data Gen'l Corp., 734 F.2d 1336, 1347 (9th Cir. 1984)*. Instead, all that is required is that the restraint in the tied market caused by the tie affect a substantial volume of commerce, which in this context means only an amount greater than a *de minimis. Id.*

Clear Channel has not addressed this issue in its briefing on summary judgment, and the court, therefore, will not dispose of NIPP's tying claim based on this element on summary judgment. Accordingly, sufficient disputes of material **[**136]** fact exist as to NIPP's *per se* tying claim that Clear Channel's motion for summary judgment on NIPP's *per se* tying claim is denied.

b. Rule of Reason Analysis

HN44[] If a plaintiff is unable to prevail on a theory of *per se* liability, a plaintiff can seek to prove a tying claim under a different analysis. In order to prevail in the absence of *per se* liability, a plaintiff has the burden of proving that the tying arrangement unreasonably restrains competition in the tied product market. *Jefferson Parish, 466 U.S. at 29, 104 S. Ct. at 1567*. This is known as "rule of reason" analysis. *Tarabishi, 951 F.2d at 1571*. Rule of reason analysis first requires a determination of whether the challenged restraint has a substantially adverse effect on competition in the tied market. *Law, 134 F.3d at 1016-1017*. The arrangement must lead to an increase in the price charged to the consumer or a decrease in the quality of the tied product offered by the seller. *Jefferson Parish, 466 U.S. at 31, 104 S. Ct. at 1568 n.52*. The tied product market and defendant's market share, therefore, must be closely examined to prove **[**137]** tying under rule of reason analysis.

As stated earlier, NIPP has set forth no evidence of the tied product market (the **[*1098]** tied product market here is the market for the sale of concert promotions services to artists by concert promoters). NIPP has provided no information concerning pricing of the tied product or market share of various concert promoters. Specifically, there is no evidence of what payment is made to artists in exchange for the right to promote their concerts, or what value artists confer on promoters when choosing their promotions services. More importantly, NIPP has not provided information on which promoters hold the lion's share of prominent artist contracts. While this information may be reflected to a certain extent in the end-use market for ticket sales, NIPP has not sufficiently set forth evidence on the input market to prove a tying claim under rule of reason analysis.

3. Section 2 of the Sherman Act: Monopolization

NIPP alleges that Clear Channel has monopolized the market for rock-concert tickets in the Denver metropolitan area by engaging in anticompetitive conduct such as predatory pricing, tying, and preventing its competitors from using radio **[**138]** for promotions. *HN45*[] *Section 2 of the Sherman Act* makes it unlawful for a firm to "monopolize." *15 U.S.C.A. § 2 (West 1997 & Supp. 2003)*. In order to prove monopolization, a plaintiff must show (1) defendant's possession of monopoly power in the relevant market, and (2) the willful acquisition of monopoly power, as opposed to growth as a result of a superior product, business acumen, or historic accident. *Reazin, 899 F.2d at 973*; *United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. While concerted conduct under *section 1 of the Sherman Act* is subject to sanction if it merely restrains trade, unilateral conduct under *section 2* is subject to sanction only if it actually monopolizes. *Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 541 (9th Cir. 1991)*.

As stated earlier, *HN46*[] in order to prove a monopolization claim, plaintiff must first define the relevant market. NIPP has set forth sufficient evidence for a jury to conclude that the relevant market for purposes of NIPP's monopolization and attempted monopolization claims is the market for rock concerts. Second, in **[**139]** proving a monopolization claim, plaintiff must demonstrate that the defendant has monopoly power in the relevant market. While merely possessing monopoly power is not itself an antitrust violation, it is a necessary element of a monopolization charge. *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 51 (D.C. Cir. 2001)*. Monopoly power under *section 2 of the Sherman Act* requires something greater than market power under *section 1*. *Eastman Kodak, 504 U.S. at 481, 112 S. Ct. at 2090* (citations omitted). Proof of monopoly power requires a showing of the power ***both*** to control prices and to exclude competition. *United States v. E.I. du Pont Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *Tarabishi, 951 F.2d at 1567*. Monopoly power may be inferred from a firm's possession of a dominant share of the relevant market, which is protected by entry barriers. *Microsoft, 253 F.3d at 51*.

Here, although NIPP has set forth some evidence that Clear Channel has charged supercompetitive prices and excluded competition by limiting access to certain inputs, such as **[**140]** artists, rock radio air play and rock radio promotional support, Clear Channel's alleged market share does not currently rise to the level necessary to indicate monopoly power. According to NIPP, as of the commencement of this lawsuit Clear Channel held a 50.48% share of the rock concert market. While this figure is impressive, it is not monopolistic. ***HN47***[] "While the Supreme Court has refused to specify a minimum market share **[*1099]** necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share between 70% and 80%." *Colo. Interstate Gas Co. v. Natural Gas Pipeline Co. of Am., 885 F.2d 683, 694 n.18. (10th Cir. 1989)*. Based on Clear Channel's market share, therefore, the court finds that NIPP cannot prove its monopolization claim. Accordingly, Clear Channel's motion for summary judgment is granted as to NIPP's monopolization claim under *section 2 of the Sherman Act*.

4. Section 2 of the Sherman Act: Attempted Monopolization

HN48[] In the Tenth Circuit, four elements must be proven to establish an attempt to monopolize under *section 2 of the Sherman Act*: (1) relevant market, including both geographic and product market, in which the **[**141]** alleged attempt occurred; (2) dangerous probability of success in monopolizing the relevant market; (3) specific intent to monopolize; and (4) conduct in furtherance of such attempt. *Colo. Interstate Gas, 885 F.2d at 693*. Additionally, any plaintiff seeking treble damages under *section 4 of the Clayton Act* must show antitrust injury. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. Here, plaintiffs have already demonstrated sufficient evidence that the relevant market is the market for rock concerts. Plaintiffs must, therefore, have sufficient evidence of the other three elements for a reasonable jury to find Clear Channel liable for attempted monopolization under *section 2 of the Sherman Act*.

a. Probability of Success in Monopolization: Market Power

HN49[] In order to satisfy the dangerous probability of success element on an attempt claim, the plaintiff must show that there is a dangerous probability that defendant will achieve monopoly status as the result of the predatory conduct alleged by the plaintiff. *Colo. Interstate Gas, 885 F.2d at 693*. Because we are talking **[**142]** about probabilities, it is not necessary for the defendant to already possess monopoly power in the target market. *Multistate Legal Studies, 63 F.3d at 1554*. Factors to be considered in determining dangerous probability include (1) the defendant's ability to control prices ***or*** exclude competition, (2) defendant's market share, (3) the number and strength of other competitors, or whether defendant is a multimarket firm, (4) market trends, and (5) entry barriers. *Full Draw, 182 F.3d at 756* (citing *Bacchus Indus., 939 F.2d at 894*). Where predatory pricing is alleged, the defendant's financial strength and ability to absorb losses are also relevant. *Multistate Legal Studies, 63 F.3d at 1554* (citing *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 125 L. Ed. 2d 168, 113 S. Ct. 2578, 2589*). The court addresses each consideration, in turn.

(1) Raise Prices or Exclude Competition

HN50[] To demonstrate 'market power,' a plaintiff may show evidence of power to control prices ***or*** exclude competition. *Reazin, 899 F.2d at 966*. NIPP has demonstrated that Clear Channel may have the ability to control prices and/or **[**143]** exclude competition. One measure of a firm's ability to monopolize is the ***persistence*** of a firm's ability to profitably charge monopoly prices. *Colo. Interstate Gas, 885 F.2d at 695*. If the evidence demonstrates that a firm's ability to charge monopoly prices will necessarily be temporary, the firm does not possess the degree of market power required for attempted monopolization. *Id. at 693*. To justify a finding that a defendant has the power to persistently control prices, entry barriers must be significant -- they must be capable of constraining the normal operation of the market so that the problem is unlikely to be **[*1100]** self-correcting. *Rebel Oil Co., 51 F.3d at 1439*. If entry barriers exist, a firm is a monopolist if it can profitably raise prices substantially above the competitive level. *Microsoft, 253 F.3d at 51*. When evidence shows that a firm has in fact profitably done so, monopoly power exists. *Id. at 51*.

NIPP points to testimony and expert analysis in the record showing that barriers to entering the rock concert industry are significant. To NIPP, these barriers to entry include relationships **[**144]** with rock industry insiders, including rock artists, Clear Channel's ownership of rock radio stations and commensurate access to rock radio promotional support and rock radio air play, Clear Channel's ownership of venues in Denver and nationwide, Clear Channel's accumulated customer goodwill, Clear Channel's large, national size, and Clear Channel's significant capital. (Pls.' Resp. at 69.) Potentially, a reasonable jury could find that such barriers are capable of constraining the normal operation of the rock concert market, allowing Clear Channel to charge monopoly prices persistently. *Multistate Legal Studies, 63 F.3d at 1555*.

Secondly, NIPP asserts that Clear Channel has actually charged prices above the competitive level. The ability to raise prices above the industry average while increasing market share demonstrates entry barriers and a potential ability to control prices. Dr. Phillips, NIPP's expert, points to pricing patterns that demonstrate that Clear Channel has raised ticket prices high above the industry average and increased its market share simultaneously. (Defs.' Br., Ex. A-8 [Prelim. Economic Report of Phillips at 25-26].) According to NIPP's expert **[**145]** and available Pollstar data, from 2000 to 2001 the average increase in the price of rock concert tickets in the Denver area was 3.7%. (Defs.' Br., Ex. A-8 [Prelim. Economic Report of Phillips at 25-26].) Consistent with this average, NIPP raised the price of its rock concert tickets by 3.8%. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) Similarly, in 2001, House of Blues raised its rock concert tickets by 2.2%. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) Clear Channel rock concert ticket prices, however, increased at a rate high above the industry average. Rock concerts promoted by Clear Channel Concerts/Clear Channel Radio Festivals experienced a 46.5% increase, and rock concerts promoted by SFX/Clear Channel Entertainment increased by 23.5%. (*Id.,* Ex. A-8 [Prelim. Economic Report of Phillips at 25, Ex. E].) Despite these above market average price increases, Clear Channel still increased its market share, according to Dr. Phillips, from .27% to 43.81%. (Pls.' Resp., Exs. Vol. I, Ex. 1 [Phillips Decl., Table 5].)

Clear Channel argues that this data is invalid and should not be considered by the court because it does **[**146]** not take into account the quality of the artist being promoted, and the concomitant greater costs to the promoter to produce the concert. (Defs.' Br. at 58-59.) As pointed out by Clear Channel, the more popular the rock artist, the more the concert promoter is forced to bid on the right to promote the artists concert. (*Id.*) Higher bidding results in higher costs to the concert promoter and, hence, a higher ticket price. (*Id.*) Clear Channel, therefore, argues that NIPP's pricing data is of no use in proving attempted monopolistic pricing because the data does not consider the costs incurred by Clear Channel, as opposed to NIPP or House of Blues. (*Id.*) Monopoly power is "the ability to profitably raise price above marginal cost." (*Id.* at 59.)

To the extent that NIPP argues that Clear Channel's prices are above industry average based on a comparison between average ticket prices charged in a given year by Clear Channel versus average **[*1101]** ticket prices charged by other promoters, Clear Channel is correct that NIPP's failure to consider the different costs born by Clear Channel is fatal to NIPP's argument. If Clear Channel promotes all of the most expensive, top artists, Clear **[**147]** Channel's ticket prices will be higher than tickets sold by other promoters, and this price difference does not indicate monopolistic pricing or conduct.

To the extent, however, that NIPP attempts to show that Clear Channel's prices are above industry average based on a comparison between the percentage increase in prices charged by Clear Channel versus the percentage increase in prices charged by other promoters, NIPP's failure to consider the different costs is not detrimental to their argument for two reasons. First, in 1999, SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals arguably promoted rock artists of equal or greater quality in the eyes of consumers than the rock artists they promoted in 2001. (Defs.' Br., Ex. A-01 [List of Concerts and Promoters from 1995-2001].) In

1999, SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals solely promoted the Rolling Stones, Limp Bizkit, and Bonnie Raitt, three arguably top quality performers. (*Id.,* Ex. A-01 [List of Concerts at 53, 57, 60].) In 2001, they promoted some rock performers that are arguably equally popular, such as U2 and Bob Dylan, but also **[**148]** some arguably less popular performers, such as Echo and the Bunnymen and Dark Star Orchestra. (*Id.,* Ex. A-01 [List of Concerts at 83, 90, 95, 98].) Assuming Clear Channel promotes artists of equal popularity and, hence, quality every year, a dispute of a material fact which increases Clear Channel's costs, this does not explain why Clear Channel Concert's costs may have risen by 45%, while everyone else's rose by approximately 3%. It does not appear that the popularity of artists promoted by Clear Channel corresponds to a 45% increase in price.

Second, the fact that NIPP's expert did not consider Clear Channel's costs in attempting to show monopolistic pricing is not fatal to NIPP's claim because NIPP claims that Clear Channel creates its own higher costs by upbidding the costs of artists in order to eliminate competition. (Pls.' Resp., Exs. Vol. 1, Ex. 4 [Mickelson Decl. PP5-6, 10].) If Clear Channel engages in this predatory bidding in order to raise costs and drive competition from the market, as alleged by NIPP, evidence of Clear Channel's higher costs does not necessarily show that Clear Channel's increase in ticket practices is unrelated to monopolistic activity. Although **[**149]** ticket prices vary according to the public's perception of the quality of the artist, the ticket prices also vary based on the amount of money the promoter is willing to bid on the artist. Because costs of artists are disputably manipulated by Clear Channel, NIPP need not necessarily include costs to demonstrate monopolistic pricing. Thus, material disputes of fact exist as to Clear Channel's ability to control prices in the rock concert market.

HN51[] Another factor indicative of a defendant's probability of success in monopolization is the defendant's ability to exclude competition and thereby control output. *Reazin, 899 F.2d at 966*. If the predator has control of market-wide output at the supply level, other firms cannot increase their output because they have no access to the necessary inputs to increase output. *Id.* When a business firm is in a position to use its leverage over one industry in order to exclude or slow down the development of additional competitors in another industry, the business firm may have the power to exclude competition and, therefore, market power. *Reazin, 899 F.2d at 970*; *Full Draw, 182 F.3d at 757*.

[*1102] Here, **[**150]** as stated earlier, NIPP has effectively demonstrated that Clear Channel's control of the rock radio industry in Denver gives it the ability to limit other promoters' access to rock artists and rock radio promotional support, two inputs that are disputably necessary for the output of rock concerts. NIPP has cited electronic mail messages from O'Connor and others showing Clear Channel's ability and willingness to deny radio promotional support to other promoters and to manipulate artists with threats of lost air play. (Pls.' Resp., Exs. Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001], Ex. 55 [Letter from Sievers to Michael Papale of 6/27/2000], Ex. 55A [Letter from Sievers to Saunders of 8/22/2000], Ex. 43 [Electronic Mail Message from Sievers to Saunders of 8/25/2000], Ex. 43A [Electronic Mail Message from Sievers to O'Connor].) Accordingly, a dispute of material fact exists as to whether Clear Channel has the ability to control output and exclude competition in the rock concert market.

(2) Market Share

HN52[] The likelihood of successful monopolization is **[**151]** typically evaluated by examining the defendant's share of the relevant market. *Colo. Interstate Gas, 885 F.2d at 693*. The plaintiff must show that there is a dangerous probability that the defendant's conduct will propel it from a non-monopolistic market share to a market share that is large enough to constitute a monopoly. *Id. at 693*. The higher the firm's initial market share, the more likely it will eventually gain monopolistic control over the market. *Id. at 694*. Market share is relevant but not conclusive as to the existence of market power. *Reazin, 899 F.2d at 966*.

Here, NIPP has set forth evidence that Clear Channel holds a 50.48% share of the market for rock concerts. (Pls.' Resp., Exs. Vol. I, Ex. 1 [Phillips Decl., Table 5].) ***HN53***[] A market share of 41% indicates that a firm has substantial economic power in the market, and, therefore, has the tools at its disposal to elevate its market share to monopolistic levels. *Colo. Interstate Gas, 885 F.2d at 694*; see also *Rebel Oil, 51 F.3d at 1438* (holding that a market share of 44% is sufficient as a matter of law to support a finding **[**152]** of market power, if entry barriers are high and competitors are unable to expand their output in response to supercompetitive pricing). Accordingly, Clear Channel's market share, construed in the light most favorable to NIPP, supports NIPP's claim for attempted monopolization.

(3) Defendants' Resources & Competitors

NIPP has produced evidence that Clear Channel is a multimarket firm with significant market power in other cities across the United States and significant resources to absorb short term losses. NIPP has also shown that, as of December 31, 2001, Clear Channel controlled more than 100 venues for live entertainment performances in the country and accounted for 70% of concert ticket revenue in the United States. (Pls.' Resp., Exs Vol. 3., Ex. 78 [Clear Channel 2001 Annual Report], Exs. Vol. 4, Ex. 87 [Clear Channel 2001 Shareholder's Report].) Based on the record, it is clear that Clear Channel has significant economies of scale in its chosen industries.

Clear Channel's sheer size dwarfs all other concert promoters in the Denver area. Although SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals have a large number of competitors **[**153]** in the Denver metropolitan market, few of these competitors have a fraction of the market **[*1103]** share or financial strength of Clear Channel. Additionally, unlike Clear Channel, these competitors own no rock radio stations, further hindering their access to inputs readily available to SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals for the production of rock concerts. Based on a review of the record, therefore, the court concludes that Clear Channel's financial strength, multimarket domination, and competitors in the Denver market support NIPP's claim for attempted monopolization.

(4) Market Trends

HN54[] Market trends may demonstrate a probability of success in monopolization. Specifically, when the defendant's market share grows significantly in a short period of time, while the market share of its major competitors shrinks significantly in a short period of time, a probability of monopolization may exist. *Multistate Legal Studies, 63 F.3d at 1554-1555*. Here, NIPP has set forth evidence that Clear Channel's share of revenue in the rock concert market rose from .45% in 1999 to over 50.48% in 2001. [8] (Pls.' Resp., Exs. Vol. **[**154]** 1, Ex. 1 [Phillips Decl., Table 5].) Additionally, NIPP and House of Blues' market shares shrunk during that time period. (*Id.,* Exs. Vol. 1, Ex. 1 [Phillips Decl., Table 5].) That Clear Channel entered the marketplace and immediately propelled itself to this high market share supports NIPP's claim for attempted monopolization.

(5) Entry Barriers

HN55[] Entry barriers are relevant to the analysis of market power because the significance of market power depends upon its durability. *Reazin, 899 F.2d at 968*. Entry barriers are particular characteristics of a market which impede entry by new firms into that market. *Id.* They may include high capital costs or regulatory or legal requirements such as patents or licenses. *Id.* Other examples include: (1) control over an essential or superior resource, (2) entrenched buyer preferences, **[**155]** and (3) high capital costs for new entrants.*Id.* When significant and continuing barriers to entry are present, substantial market power can persist unimpeded. *Id.*

NIPP claims that the barriers to entry include (1) Clear Channel's ownership of rock radio stations and commensurate access to rock radio promotional support and air play, (2) relationships with rock industry insiders, including rock artists, (3) Clear Channel's ownership of venues in Denver and nationwide, (4) Clear Channel's accumulated customer goodwill, (5) Clear Channel's large, national size, and (5) Clear Channel's significant capital. (Pls.' Resp. at 69.) Importantly, NIPP emphasizes the difficulty for any promoter to obtain a rock radio station due to the significant cost of purchasing a station and the licensing requirements to operate a station. (*Id.*) A reasonable jury could find that such barriers are capable of constraining the normal operation of the rock concert market. *Multistate Legal Studies, 63 F.3d at 1555*.

---

[8] NIPP calculates Clear Channel's share of the rock concert market in 1999 by examining the shares of Clear Channel, Jacor Communications, and SFX combined.

HN56[] Entry barriers may also be created by the defendant's conduct itself. *Full Draw, 182 F.3d at 756*. For example, an organized boycott of the plaintiff's **[**156]** product may constitute an entry barrier that confirms the defendant's dangerous probability of monopolization. *Id.* Similarly, here, according to NIPP, Clear Channel has allegedly utilized an illegal tying arrangement to limit other promoters' access to artists. This limited access to artists is a legitimate entry barrier, if proven.

[*1104] Clear Channel argues that the high numbers of concert promoters in the Denver area demonstrate that significant entry barriers do not exist in the relevant market. (Defs.' Br. at 53.) HN57[] The number of competitors does not conclusively show a lack of entry barriers, however. *Rebel Oil Co., 51 F.3d at 1440*. Likewise, the fact that entry has occurred does not preclude the existence of significant entry barriers. *Id. at 1440*. If the output of the new entrant is insufficient to take significant business away from the predator, the entrant is unlikely to represent a challenge to the predator's market power. *Id.* Indeed, the important inquiry regarding competitors is whether any competitors approach Clear Channel's financial strength in the relevant market. *Reazin, 899 F.2d at 971*.

Based on a review of the **[**157]** record, the court concludes that no promoters approach the financial strength or current market share of Clear Channel. As evidence of significant entry and competition in the rock concert market, Clear Channel states that the following promoters entered the rock concert industry in 2001: Alex Crothers, Eric Pirritt, Jason Colter, Soda Jerk Presents, Concerts West, and Jam Productions. (Defs.' Br. at 53.) Of these six promoters, however, four, Crothers, Pirritt, Colter, and Soda Jerk, combined to grab a mere .7% of the market. (Pls.' Resp., Exs. Vol. 1, Ex. 1 [Phillips Decl., Table 6].) Although Concerts West posted a 4.63% market share in 2001, it has since completely exited the Denver market. (*Id.* at 71, Exs. Vol. 1., Ex. 2 [Morreale Decl. P31].) Similarly, while Jam Productions held a 14.91% market share in 2001, this share was due solely to a single concert, the Eagles Concert that opened Invesco Field at Mile High, and Jam exited the market immediately thereafter. (*Id.* at 71, Exs. Vol. 1, Ex. 4 [Mickelson Decl. P13].) Whether the brief entry and hurried exit of Concerts West and Jam Productions demonstrates additional entry barriers or the opposite is a question **[**158]** of fact for the jury. The sole remaining promoters that booked over $ 250,000 in 2001 are NIPP, House of Blues, and Clear Channel, and, since 1999, Clear Channel's share of the rock concert market has increased, while that of NIPP and House of Blues has decreased. (*Id.,* Exs. Vol. 1, Ex. 1 [Phillips' Decl., Table 5].)

Finally, Clear Channel argues that the entry barriers alleged by NIPP exist for entering the concert market as a whole but not for entering the rock concert market specifically. (Defs.' Br. at 51, 54.) According to Clear Channel, therefore, NIPP has failed to demonstrate any barriers to entry into the rock concert market. (*Id.*) While some of the entry barriers set forth by NIPP pertain to the concert market as a whole, many of the alleged barriers apply solely to the rock concert market. For example, ownership of a rock radio station, and the commensurate access to rock artists and rock radio promotional support, is not a barrier to entering the country music concert market, but only the rock concert market. Similarly, relationships with rock industry insiders and artists is an entry barrier to the rock concert market and not the general concert market.

Furthermore, **[**159]** just because a barrier to entry exists for entry into the all music concert market does not mean it cannot also be a barrier to entry for the rock concert market. Specifically, that Clear Channel owns numerous venues nationwide is a deterrent for newcomers' entry into the rock concert market, just as it is a deterrent to entry into the general concert market. The same holds true for Clear Channel's financial strength. Clear Channel's economies of scale make entry into the rock concert market difficult because of Clear Channel's hold on rock radio. Thus, NIPP has demonstrated sufficient **[*1105]** disputes of material fact as to entry barriers to support its claim for attempted monopolization. Accordingly, plaintiff has satisfied its burden on summary judgment to show Clear Channel's probability of success in monopolization.

b. Specific Intent

HN58[] After a plaintiff has defined the relevant market and shown a probability of success in monopolization, the third element that must be proven by plaintiff is the specific intent to monopolize. *Colo. Interstate Gas Co., 885 F.2d at 693*. Specific intent to monopolize is a necessary element of an "attempt to monopolize" claim under **[**160]** *section 2*. *Aspen Skiing, 472 U.S. at 601, 105 S. Ct. at 2857*. Improper exclusion is always deliberately intended. *Id. at 601, 105 S. Ct. at 2856*.

Here, NIPP has set forth sufficient evidence of improper exclusion, as demonstrated throughout this order, to create a question of fact regarding Clear Channel's specific intent. Additionally, electronic mail messages between Michael O'Connor and Clear Channel personnel indicate that Clear Channel had the specific intent to deny radio promotional support and advertising to other promoters, despite the fact that providing the support would have financially benefitted the radio stations. (Pls.' Resp., Exs. Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001].) Clear Channel's decision against its own financial interest demonstrates an intent to monopolize because Clear Channel would rather injure its competitors reap monopoly profits in the long run than gain benefits in the short run. Similarly, electronic mail messages between O'Connor and record label personnel create a dispute of fact as to whether **[**161]** Clear Channel had the specific intent to manipulate artists with threat withholding radio air play. (*Id.,* Exs. Vol. 3, Ex. 55 [Letter from Sievers to Michael Papale of 6/27/2000], Ex. 55A [Letter from Sievers to Saunders of 8/22/2000], Ex. 43 [Electronic Mail Message from Sievers to Saunders of 8/25/2000], Ex. 43A [Electronic Mail Message from Sievers to O'Connor].)

c. Anticompetitive Conduct

HN59[] The final element of an attempted monopolization claim is proof that the defendant engages in anticompetitive conduct. *Colo. Interstate Gas Co., 885 F.2d at 693*. Anticompetitive or exclusionary conduct under *section 2* is "conduct constituting an abnormal response to market opportunities." *Multistate Legal Studies, 63 F.3d at 1550*. Such predatory practices are illegal if the conduct appears reasonably capable of contributing to the creation or maintenance of monopoly power, ***and*** the practices (1) do not constitute competition on the merits ***or*** (2) are more restrictive than reasonably necessary for competition. *Id.* A defendant may avoid liability by showing a legitimate business justification for the conduct. *Id.* **[**162]** If, however, the defendant adopts its policies and engages in certain conduct as part of a scheme of willful acquisition of monopoly power, it violates *section 2* of the Sherman Act. *Eastman Kodak, 504 U.S. at 483, 112 S. Ct. at 2090* (citations omitted). Specifically, "[anticompetitive] conduct [is that conduct] directed toward competitors and . . . intended to injure competition." *Intergraph Corp. v. Intel Corp., 195 F.3d 1346, 1353 (Fed. Cir. 1999)*.

NIPP alleges several different instances of anticompetitive conduct by Clear Channel and argues that this conduct, taken as a whole, demonstrates attempted monopolization. (Pls.' Resp. at 80-81.) First, NIPP alleges that Clear Channel withholds rock radio advertising and promotional support to its promoter competitors and the artists the promoters seek to **[*1106]** promote. (*Id.* at 86.) Secondly, NIPP claims that Clear Channel uses its power over the rock radio market in Denver as leverage to gain control over the rock concert business by baiting artists with radio air play and promotional support in order to get their promotion business. (*Id.* at 83.) Third, NIPP alleges that Clear Channel engages in **[**163]** predatory pricing by intentionally bidding for artists at a rate high above the market rate in order to eliminate other promoters who do not have the financial strength to bear such costs; Clear Channel then allegedly passes these costs on the to the end-use rock concert ticket purchasers by charging monopolistic prices for concert tickets. (*Id.* at 89.) Finally, NIPP claims that Clear Channel has utilized wrongful means to steal NIPP's employees. (*Id.* at 81.) The court addresses each argument, in turn.

(1) Denial of Radio Advertising and Promotional Support

First, NIPP complains that Clear Channel's refusal to provide equal rock radio advertising and radio promotional support for other promoters is anticompetitive conduct. (*Id.* at 86.) NIPP presents evidence that, for rock concert promoters, rock radio advertising enables promoters to reach the exact end-consumer who prefers music by rock artists, during a moment in time when the end-consumer is enjoying listening to the very musical product that concert tickets also provide. Advertising on other format stations does not provide this reach. (Pls.' Resp., Ex. 2 [Morreale Decl. PP16-19], Ex. 4 [Mickelson Decl. **[**164]** P3], Ex. 22 [Loncao Dep. at 35-36], Ex. 39 [Sievers Dep. 101-102].) Similarly, advertising in newspapers or magazines, or on television stations, even if these forms of media are targeted to rock audiences, do not carry the advertisement for a concert to an end-consumer who necessarily is enjoying at that moment the very product advertised. According to NIPP, therefore, Clear Channels' refusal to provide this advertising and promotional support is anticompetitive conduct.

Clear Channel makes several counterarguments to this proposition. First, Clear Channel argues that its radio stations do not have to accept paid advertising from promoters because the antitrust laws do not compel a company to do business with competitors. (Defs.' Br. at 66.) ***HN60***[] All business firms have a right to select their customers and associates and to refuse to deal with others. *Aspen Skiing, 472 U.S. at 601, 105 S. Ct. at 2856*. Additionally, there is no duty to cooperate with one's competitors. *Id. at 601, 105 S. Ct. at 2856*. [9] The antitrust laws protect competition but not individual competitors. *Intergraph, 195 F.3d at 1354*. The absence of a duty to cooperate, **[**165]** however, does not mean that the refusal to deal never gives rise to antitrust liability. *Aspen Skiing, 472 U.S. at 601, 105 S. Ct. at 2856*. After all, most rights are qualified. *Id.* Under *section 2 of the Sherman Act*, the right of the business firm to exercise independent discretion as to the parties with whom it will deal is circumscribed when the firm intends the behavior to create or maintain a monopoly. *Id.* Additionally, the behavior is anticompetitive when it injures competition in the market. *Intergraph, 195 F.3d at 1360*.

Here, NIPP has presented sufficient evidence that Clear Channel's refusal **[**166]** to accept paid advertising is founded upon an **[*1107]** intention to create monopoly power for itself in the rock concert promotions market. As shown earlier in electronic mail messages, Michael O'Connor asked his station personnel to refuse advertising for promoters competing with SFX/Clear Channel Entertainment and/or Radio Festivals. This refusal to deal may not be in the commercial best interest of Clear Channel's radio stations because, as O'Connor himself testified, providing radio advertising and radio promotional support benefits the radio stations. (Defs.' Br., Exs. Vol. 2, Ex. A-24 [O'Connor Dep. at 385-386].) Assuming that the refusal to deal is not in the best commercial interests of the radio stations, an inference could be made that the refusal supports other, more sinister motives, such as the creation of a monopoly. Additionally, Clear Channel's refusal to deal, as defined in O'Connor's electronic mail message to Clear Channel personnel, is not a refusal to deal with an individual competitor, but a refusal to deal with all competitors in the rock concert promotions market. Finally, NIPP has demonstrated evidence of marketwide injury by showing an increase in ticket prices and **[**167]** a decreasing market share for all of Clear Channel's competitors in the rock concert market, not just a single, individual competitor.

Second, Clear Channel argues that Clear Channel does not have to offer its competitors free radio promotional support because "no case has held that . . . the provision of special or privileged treatment to a legal adversary can be compelled on a refusal to deal antitrust premise. (Defs.' Br. at 73 [citing *Intergraph, 195 F.3d at 1358*].) According to Clear Channel, it has the right to refuse to offer its free promotional services to other promoters as part of its independent discretion. (*Id.*) Free promotional support is not special treatment because the radio stations have historically provided it to all promoters; it is not special but a typical exchange that occurs in the business. This refusal is, arguably, in the worst interest of Clear Channel radio stations, which demonstrates an intent to monopolize. Additionally, what Clear Channel characterizes as free promotional support could equally be characterized as an exchange of consideration, since both the radio stations and the promoters benefit form promotional support. The **[**168]** fact that Clear Channel labels the promotional support as free, therefore, does not affect the analysis for antitrust purposes.

In support of its position that Clear Channel is not required to give its competitors access to radio advertising and promotional support, Clear Channel cites the *Intergraph* case for the proposition that its behavior is not anticompetitive. (Defs.' Br. at 65-68.) Clear Channel's reliance on *Intergraph* is misplaced, however. In *Intergraph,* Intergraph, a manufacturer of computer modems, which purchased computer microprocessors for its modems from Intel, sued Intel for patent infringement. *Intergraph, 195 F.3d at 1350*. In retaliation for filing suit, Intel refused special benefits to Intergraph which Intergraph alone had previously enjoyed when purchasing Intel microprocessors, such as pre-release products and allocation of new products. *Id. at 1351*. Thereafter, Intergraph sued Intel for violation of the Sherman Act based on Intel's refusal to provide these benefits. *Id.*

---

[9] ***HN61***[] Under *section 1 of the Sherman Act*, a business has the right to refuse to deal with whomever it likes as long as it does so independently, without conspiring with others. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*. Under *section 2*, however, independent action may form the basis of liability.

Although the Court of Appeals for the Federal Circuit ruled in Intel's favor, it did not do so, as alleged by Clear Channel, because a company **[**169]** has no duty to deal under antitrust laws. *Id.* Rather, the court found that Intel's refusal to deal was not anticompetitive conduct because Intel and Intergraph were not competitors in any market. *Id. at 1356*. Furthermore, the court found Intel's behavior was not anticompetitive because it only injured Intergraph **[*1108]** individually, as opposed to injuring an entire market. *Id.* Specifically, the court noted, "[anticompetitive] conduct [is only that conduct] directed toward competitors and . . . intended to injure competition." *Id. at 1353*. Additionally, the court noted that Intel's market strength was due to its superior product, not to the allegedly wrongful conduct of withholding benefits to Intergraph. *Id.*

Here, in contrast, Clear Channel's refusal to deal is directed against all competitors and, arguably, injures competition. Furthermore, NIPP claims that Clear Channel's refusal to deal is conduct that will impel Clear Channel to monopoly control over the market. *Intergraph* does not lead to the conclusion that Clear Channel's behavior is proper under the Sherman Act. Rather, it compels a trial on the issue of anticompetitive conduct **[**170]** in this case.

(2) Tying

NIPP alleges that Clear Channel has conditioned air play of rock artists' songs on their use of Clear Channel rock concert promotional services and that this "tie" amounts to anticompetitive conduct. (Pls.' Resp. at 83.) ***HN62***[] Illegal tie-ins under *section 1 of the Sherman Act* may also qualify as anticompetitive conduct for *section 2* purposes. *Multistate Legal Studies, 63 F.3d at 1550*. As stated earlier in this order, disputes of material fact exist as to whether Clear Channel engages in tying arrangements with record labels and artists. Accordingly, questions of fact exist as to whether Clear Channel engages in anticompetitive conduct under the Sherman Act.

(3) Predatory Pricing

Third, NIPP alleges that Clear Channel engages in predatory pricing by intentionally bidding for artists at a rate high above the market rate in order to eliminate other promoters who do not have the financial strength to bear such costs; Clear Channel then allegedly passes these costs on the to the end-use rock concert ticket purchasers by charging monopolistic prices for concert tickets. (Pls.' Resp. at 89.) ***HN63***[] Predatory pricing may qualify as anticompetitive **[**171]** conduct under *section 2* of the Sherman Act. *Multistate Legal Studies, 63 F.3d at 1550*. To be predatory, prices must be set below an appropriate measure of costs. *Id. at 1548-1549* (citing *Brooke Group, 509 U.S. at 222, 113 S. Ct. at 2587*). Accordingly, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs. *Brooke Group, 509 U.S. at 222, 113 S. Ct. at 2587*.

The second prerequisite to holding a competitor liable under *section 2 of the Sherman Act* for predatory pricing is a dangerous probability of the rival's recouping its losses by charging supercompetitive, monopolistic prices. *Id. at 224, 113 S. Ct. at 2588*. Recoupment is the ultimate object of an unlawful predatory pricing scheme. *Id.* Without it, predatory pricing produces lower aggregate prices in the market, and consumer welfare is enhanced. *Id.* Where evidence indicates that a firm has in fact profitably charged monopolistic prices, the existence of monopoly power is clear. *Microsoft, 253 F.3d at 51.* **[**172]**

Here, NIPP has alleged that Clear Channel engages in a predatory pricing scheme by upbidding costs for artists, driving other promoters out of the market, and recouping its high costs by charging monopolistic prices to the end ticket purchaser. Although NIPP has presented evidence of allegedly monopolistic prices of end-use tickets, NIPP has not demonstrated predatory pricing in terms of the amounts paid in bids for the right to promote artists. NIPP has solely cited an interview from the Bill Moyers Show on **[*1109]** PBS as evidence that Clear Channel is upbidding the costs for artists. This is not sufficient to prove to a reasonable jury that Clear Channel consistently raises costs above market price by upbidding on artists. Because the price of artists is the price allegedly manipulated by Clear Channel, NIPP is required to introduce evidence of Clear Channel bidding above cost in order to state a claim for predatory pricing. *Brooke Group, 509 U.S. at 222, 113 S. Ct. at 2587*. Because NIPP has failed to do so, NIPP cannot prove predatory pricing as anticompetitive conduct.

(4) Stealing Employees

Finally, NIPP alleges that Clear Channel engages in anticompetitive **[**173]** behavior in the market for concert promotion employees. ***HN64***[] Antitrust laws apply to restraints on competition in the non-unionized labor markets. *Brown v. Pro Football, Inc., 311 U.S. App. D.C. 89, 50 F.3d 1041, 1054 (D.C. Cir. 1995)* (citing *Radovich v. NFL, 352 U.S. 445, 449-452, 77 S. Ct. 390, 392-394, 1 L. Ed. 2d 456 [1957])*. Accordingly, if Clear Channel engages in conduct that injures competition in the labor market, the conduct is anticompetitive and grounds for liability under *section 2 of the Sherman Act*.

Here, NIPP cites one incident, when Clear Channel lured an NIPP employee, Michael DuCharme, NIPP's media director and part-time talent buyer, away from NIPP to work for Clear Channel. (Pls.' Resp. at 27-28.) Specifically, NIPP complains that, after Clear Channel had secretly hired DuCharme, DuCharme and others entered NIPP's offices at night and removed and destroyed various files. (*Id.* at 28.) Additionally, NIPP alleges that DuCharme took NIPP business to Clear Channel. (*Id.*) To NIPP, this behavior constitutes anticompetitive conduct.

Although NIPP may feel betrayed by DuCharme and Clear Channel's actions, these actions encapsulated **[**174]** in a single event do not amount to anticompetitive conduct. Importantly, ***HN65***[] antitrust laws are not concerned with conduct's effect on individual competitors, only its effect on competition. *Reazin, 899 F.2d at 960*. This single event is not alleged to have injured competition in the concert promotion labor market. Rather, it involved a single employee and effected a single competitor, NIPP. Because the conduct amounts to a single isolated event, which had no effect on competition in any market, Clear Channel's hiring of DuCharme cannot form the basis for an attempted monopolization claim under *section 2 of the Sherman Act*.

Despite NIPP's failure to demonstrate anticompetitive conduct through Clear Channel's employment practices or predatory pricing alone, the individual aspects or events of a defendant's conduct viewed in isolation need not be supported by sufficient evidence to amount to a *section 2* violation for liability to exist. *Aspen Highlands, 738 F.2d at 1522 n.18*; 2 Phillip E. Areeda, Roger D. Blair & Herbert Hovenkamp, ***Antitrust Law*** P310, at 147 (2d ed. 2000). Rather, it is enough that the incidents taken together as a whole create sufficient **[**175]** evidence of attempted monopolization. *Id.* Based on a review of the entire record of alleged anticompetitive conduct, taken as a whole, the court concludes that NIPP has demonstrated sufficient evidence of attempted monopolization that a reasonable jury could find in favor of NIPP. Accordingly, summary judgment for Clear Channel on this claim is inappropriate.

5. Section 2 of the Sherman Act: Essential Facility

NIPP's final antitrust claim arises under section 2 of the Sherman Act for violation of the essential facilities doctrine. **[*1110]** NIPP claims that Clear Channel violated the essential facilities doctrine by denying rock radio advertising and promotional support to other non-Clear Channel promoters' for their rock concerts. (Pls.' Resp. at 96-100.) As stated earlier, a business firm is generally free to choose the parties with whom it will deal, in the absence of any purpose to create or maintain a monopoly or competitive injury. *Aspen Skiing, 472 U.S. at 601, 105 S. Ct. at 2856*. ***HN66***[] A firm's refusal to sell or provide its products and services to a competitor, however, may rise to the level of an antitrust violation under the essential facilities doctrine, **[**176]** if the refusal is part of a vertical integration scheme calculated to drive a competitor out of business. *McKenzie v. Mercy Hosp. of Independence, Kansas, 854 F.2d 365, 368-369 (10th Cir. 1988)*, (*superseded on other grounds, Systemcare, 117 F.3d at 1137*). To establish liability under the doctrine, a plaintiff must show: (1) control of an essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the facility; (3) the denial of the use of the essential facility to a competitor; and (4) the feasibility of providing the facility. *Id. at 369*. In order for an essential facilities claim to succeed, the defendant's power to exclude the plaintiff from such facility must amount to the power to eliminate meaningful competition in the downstream market. *Alaska Airlines, 948 F.2d at 544*. This power to eliminate competition must not be a momentary power, but must have relative permanence. *Id. at 544 n.11*. Additionally, plaintiff must have evidence that some competitors have been refused access to the facility. *Id. at 545*.

a. Control of an Essential Facility By a Monopolist

First, **[**177]** NIPP has set forth sufficient evidence to create a dispute of fact as to whether Clear Channel controls an essential facility in the form of rock radio in Denver. ***HN67***[] In order to show control, a plaintiff must define the relevant market and show that the defendant has an actual monopoly in that market. *Consul, Ltd. v. Transco Energy Co., 805 F.2d 490, 494 (4th Cir. 1996)*; *McKenzie, 854 F.2d at 369*. As stated earlier, NIPP has defined a relevant market for rock radio advertising and promotional support in Denver. Dr. Phillips, NIPP's expert witness, defined the scope of the rock radio advertising and promotional support market based on play list data, "duplicate cume" data, and radio station and industry materials.

Additionally, NIPP has demonstrated that Clear Channel may have monopoly power in this market. Monopoly power may be inferred from a firm's possession of a dominant share of the relevant market, which is protected by entry barriers. *Microsoft, 253 F.3d at 51*. Based on Dr. Phillips' calculations, Clear Channel controls at least four of the six rock radio stations in the Denver area, or 66.6%. (Defs.' Br., Ex. A-8 [Prelim. Economic **[**178]** Report of Phillips at 18]; Pls.' Resp., Ex. 1 [Phillips Decl. at 15].) If the number of listeners is considered, as reflected in advertising revenue for the rock radio stations and Arbitron data, Clear Channel controls 73% of the rock radio advertising and promotional support market. (Pls.' Resp. at 58, Ex. 1 [Phillips Decl. at 14].) A market share of 70% demonstrates monopoly power. *Colo. Interstate Gas, 885 F.2d at 694 n.18*. Similarly, NIPP has alleged significant entry barriers in the rock radio market, including license requirements, high capital requirements, and significant customer goodwill. (Pls.' Resp. at 69.); *Reazin, 899 F.2d at 968*. Construing this data in the light most favorable to NIPP, Clear Channel's alleged market share of the rock radio industry demonstrates monopoly power in that market.

[*1111] The next issue is whether Clear Channel's monopoly power relates to a resource that is an essential facility for rock concert promotion. ***HN68***[] An essential facility is one that is essential to engage in meaningful competition in the market. *McKenzie, 854 F.2d at 369*. An essential facility need not be one that is indispensable; it **[**179]** is sufficient if denial of its use inflicts a severe competitive handicap on market entrants. *Fishman v. Estate of Wirtz, 807 F.2d 520, 539 (7th Cir. 1987)*.

NIPP argues that rock radio advertising and promotional support is essential to meaningfully compete in the rock concert market. Clear Channel make several counter-arguments. First, Clear Channel argues that other radio stations or forms of media, such as newspapers, magazines, and television, are just as effective as rock radio for advertising and promotional support. (Defs.' Br. at 76-77.) According to Clear Channel, therefore, rock radio is not essential to compete in the rock concert market. (*Id.*) Concerning this issue, NIPP presents evidence that, for rock concert promoters, rock radio advertising enables promoters to reach the exact end-consumer who prefers music by rock artists, during a moment in time when the end-consumer is enjoying listening to the very musical product that rock concert tickets also provide. According to testimony, advertising on other non-rock format stations does not provide this reach. (Pls.' Resp., Ex. 2 [Morreale Decl. PP16-19], Ex. 4 [Mickelson Decl. P3], Ex. 22 [Loncao **[**180]** Dep. at 35-36], Ex. 39 [Sievers Dep. 101-102].) Similarly, advertising in newspapers or magazines, or on television stations, even if these forms of media are targeted to rock audiences, do not carry the advertisement for a concert to an end-consumer who necessarily is enjoying at that moment the very product advertised. NIPP's evidence creates a genuine dispute of material fact as to whether rock radio advertising and promotional support differs enough from other advertising to create a distinct essential facility.

Secondly, Clear Channel argues that rock radio is not an essential facility to NIPP because NIPP did not utilize any rock radio advertising or promotional support for 73% of its concerts in 2001. (Defs.' Br. at 77 [citing Phillips' Rebuttal to Supp. Expert Report at A-11].) NIPP counters that, although rock radio advertising and promotional support is not essential for use on rock concerts that gross under $ 10,000, as many of the artists are not well-known, it is essential to for concerts that gross over $ 10,000. (Pls.' Resp. at 99.) According to NIPP, such advertising and promotional support is essential to meaningfully compete because concerts that gross over **[**181]** $ 10,000 account for the lion's share of NIPP's revenue. (*Id.*) Specifically, the 46 shows where NIPP used rock radio advertising and/or promotional support accounted for 73% of NIPP's gross ticket revenue in 2001. (Defs.' Br., Exs. Vol. 1, Ex. A-11 [Rebuttal to Supp. Expert Report of Gustavo E. Bamberger at 7].) Because the bulk of NIPP's revenue comes from rock concerts utilizing rock radio advertising and promotional support, NIPP has demonstrated sufficient disputes of fact as to whether rock radio is essential to meaningfully compete in the rock concert industry.

b. Competitor's Inability to Reasonably Duplicate Facility

HN69[] In order to prove an essential facilities claim, a plaintiff must secondly show that an alternative to the facility is not available, and the facility cannot be duplicated by plaintiff. *City of Chanute, Kansas v. Williams Natural Gas Co., 955 F.2d 641, 648 (10th Cir. 1992)*, (*overruled on other grounds, Systemcare, 117 F.3d at 1137*) (citing *Twin Labs, Inc. v. Wieder Health & Fitness, 900 F.2d 566, 568 [2d Cir.* **[*1112]** *1990])*. The test is not whether it would be impossible to duplicate the facility but **[**182]** whether it would be economically infeasible. *Fishman, 807 F.2d at 540*. The point of the essential facilities doctrine is that a market entrant should not be forced simultaneously to enter a second market, with its own large capital requirements. *Id.* Here, NIPP claims that rock concert promoters cannot feasibly enter the rock radio market because of the expense of acquiring a rock radio station and the strict FCC licensing requirements. The expense of purchasing and operating radio station shows that the essential facility cannot be duplicated.

c. Denial of Use of Facility to Competitor

HN70[] To establish the third element of an essential facilities claim, a plaintiff must show that the defendant did not provide access to the facility on reasonable, non-discriminatory terms. *City of Chanute, 955 F.2d at 648*. There need not be an outright refusal to deal in order to determine that denial of an essential facility has occurred. *Delaware & Hudson Ry. Co. v. Consol. Rail Corp., 902 F.2d 174, 179-180 (2d Cir. 1990)*. To avoid liability, defendant must provide access to an essential facility "upon such just and reasonable terms and **[**183]** regulations as will . . . place every . . . company upon nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies." *Id.* (citing *United States v. Terminal R.R. Ass'n, 224 U.S. 383, 411, 32 S. Ct. 507, 516, 56 L. Ed. 810 [1912])*.

Clear Channel argues that no denial has occurred because Clear Channel still permits NIPP to purchase advertising time and provides rock radio promotional support for NIPP's concerts. (Defs.' Br. at 78-79.) Although Clear Channel still allows some advertising and promotional support, NIPP sets forth evidence that Clear Channel has significantly raised the price of obtaining these services. According to NIPP's expert, Dr. Phillips, in 1999 NIPP received $ 48 worth of radio support for every $ 1 spent on radio advertising. (Defs.' Br., Exs. Vol. 1, Ex. A-11 [Rebuttal to Supp. Expert Report of Gustavo Bamberger].) In 2001, however, NIPP claims that NIPP received $ 9 worth of radio promotional support for every $ 1 spent on radio advertising. (*Id.,* Exs. Vol. 1, Ex. A-11 [Rebuttal to Supp. Expert Report of Gustavo Bamberger].)

Additionally, Clear Channel has informed its own **[**184]** personnel and record labels that outside promoters are discriminated against for radio time when compared to SFX/Clear Channel Entertainment and Clear Channel Concerts/Clear Channel Radio Festivals. (Pls.' Resp., Exs. Vol. 3, Ex. 41 [Electronic Mail Message from O'Connor to All Denver Clear Channel Radio Program Directors, Music Directors, and Promotions Directors of 6/19/2001], Ex. 75 [Electronic Mail Message from O'Connor to Clear Channel personnel of 7/11/2001], Ex. 94 [HOB Memoranda re: Stone Temple Pilots of 10/24/2000],.) Finally, NIPP presents evidence that Clear Channel has avoided giving NIPP promotional support on certain occasions for allegedly pretextual reasons. (Pls.' Resp., Exs. Vol. 4, Ex. 110 [Electronic Mail Messages Between Clear Channel and NIPP of 07/03/2001].) NIPP's evidence creates a dispute of material fact as to whether Clear Channel has denied other promoters access to rock radio advertising and promotional support on a discriminatory basis.

Clear Channel argues that a recent Supreme Court case, *Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko, LLP, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, defeats NIPP's antitrust **[**185]** claim under the essential facilities doctrine. (Mot. by Defs. for Leave to **[*1113]** File Supplemental Briefs In Supp. of Mot. for Summ. J. Based on Recent Supreme Court Authority [filed February 20, 2004] [hereinafter "Mot. to File Supplement"].) In *Verizon,* the Supreme Court, in holding that a class of plaintiffs had no valid antitrust claim under the essential facilities doctrine, stated that "where access exists, the [essential facilities] doctrine serves no purpose." *Verizon, 124 S. Ct. at 881, 157 L. Ed. 2d 823*. According to Clear Channel, therefore, because NIPP still has access to paid advertising and a *de minimis* amount of unpaid promotional support, NIPP cannot invoke the essential facilities doctrine. (Mot. to File Supplement.)

However, a closer look at*Verizon* demonstrates that the case actually supports NIPP's claim under the essential facilities doctrine. In *Verizon,* a class of AT&T telephone customers sued Verizon under *section 2 of the Sherman Act* for failing to fill orders from AT&T for service on Verizon's network, as required under the Telecommunications Act of 1996. *Id. at 877*. Prior to the 1996 Act, Verizon was not **[**186]** required to give its competitors access to its local network and did not do so. *Id. at 876-877*. At the time of the filing of the lawsuit, the Federal Communications Commission had the day before disciplined and fined Verizon for failing to fill orders from AT&T and other LECs, as compelled by the 1996 Act. *Id. at 877*. The complaint alleged that Verizon's refusal to fill orders was a wrongful refusal to deal and denial of an essential facility. *Id. at 878*.

In analyzing the case, the Supreme Court first noted that ***HN71***[] the Sherman Act does not restrict a trader from refusing to deal with another party, except in narrow circumstances, such as those in the *Aspen Skiing* case. *Id. at 879* (citing *Aspen Skiing, 472 U.S. at 601, 105 S. Ct. at 2847*). The Court then distinguished the *Verizon* case from *Aspen Skiing* on the following basis.

First, the Court contrasted *Verizon* with *Aspen Skiing,* noting that Verizon had not engaged in a course of dealing with its rivals, and its prior conduct, therefore, did not shed light on whether its motivation in refusing to deal was prompted by competitive zeal or anticompetitive **[**187]** malice. *Id. at 880*. Additionally, in contrast to *Aspen Skiing,* the product offered by Verizon to its rivals was not offered to other customers. *Id.* Rather, it was only offered because of the force of statute. *Id.* The Supreme Court, in analyzing an essential facilities case, therefore, focused on the monopolistic intent of the defendant. In *Aspen Skiing,* the plaintiff prevailed because the defendant (1) refused to provide a product that it had in the past, despite the fact that defendant would benefit financially from the transaction, and (2) chose to thereby sacrifice short-term gains in hopes of making long term monopolistic profits. *Id at 879-880*. In *Verizon,* the plaintiffs failed because there was no evidence of monopolistic intent since no course of dealing profitable to *Verizon* had ever occurred; therefore, Verizon's conduct did not suggest a willingness to forsake short-term profits to achieve an anticompetitive end. *Id.* Here, NIPP alleges that Clear Channel provided advertising and concert promotional support in the past because concert promotions benefit the radio station as well as the promoter. Furthermore, NIPP claims that Clear Channel **[**188]** now refuses this support and sacrifices short-term gains in hopes of destroying other promoters and reaping long-term monopolistic profits. Clearly, the conduct alleged in this case bears striking resemblance to the refusal to deal in*Aspen Skiing,* conduct that the Supreme Court states is proscribed by the Sherman Act.

[*1114] Importantly, as well, although the Supreme Court in *Verizon* stated that the essential facilities doctrine serves no purpose when access to the facility exists, this statement was an explanation of why an "essential facilities claim should be denied where a state or federal agency has effective power to compel sharing and regulate its scopes and terms." *Id. at 881*. Because the Federal Communications Commission was compelling access to Verizon's network, plaintiffs could not bring a claim for denial of an essential facility under the Sherman Act. Here, no government agency is compelling Clear Channel to allow access to it airwaves. Rather, Clear Channel may freely restrict access and had done so already without hindrance of federal or state law. ***Antitrust law*** is the only mechanism by which Clear Channel's behavior may be policed. Accordingly, this court finds **[**189]** that Clear Channel's behavior does fall into the limited category of cases where refusal to deal implicates the Sherman Act.

d. Feasibility of Providing Facility

HN72[] The final element of an essential facilities claim is defendant's feasibility of providing the facility. Feasibility of providing the facility can be demonstrated by showing that defendant provided the facility on non-discriminatory terms in the past, and no intermittent business reason has arisen to justify an inability to provide the facility. *Delaware & Hudson Ry., 902 F.2d at 179*. Here, NIPP has demonstrated sufficient evidence that it is feasible for Clear Channel to provide rock radio advertising and promotional support to other promoters. Clear Channel has provided non-discriminatory access to rock radio in the past. Furthermore, as stated earlier, O'Connor admits that providing promotional support to concert promoters usually benefits the radio stations. Accordingly, no business justification on the radio side has arisen for refusing to provide promoters with access to advertising and promotional support. Accordingly, NIPP has demonstrated sufficient evidence of a viable claim for violation **[**190]**

of *section 2 of the Sherman Act* under the essential facilities doctrine. Summary judgment on this claim, therefore, is inappropriate.

B. Consumer Protection Act

Besides its state antitrust claims, NIPP makes three claims under state law. First, NIPP claims that Clear Channel violated Colorado's Consumer Protection Act ("CCPA"), *Colo. Rev. Stat. § 6-1-105*, by disparaging NIPP to its record label and artist customers. Specifically, NIPP claims that personnel at KBCO informed John Hiatt's manager that KBCO would not promote John Hiatt because NIPP does not pay its bills to KBCO for advertising time. (Pls.' Resp. at 102.) Additionally, NIPP alleges that Michael O'Connor of Clear Channel Radio informed the senior vice president of Roadrunner Records that NIPP did not contact KBPI in attempts to get KBPI to promote the Tattoo the Earth Tour, despite the fact that NIPP did do so. (*Id.*)

HN73[] A person engages in a deceptive trade practice when, in the course of such person's business, vocation, or occupation, such person "disparages the goods, services, property, or business of another by false or misleading representation of fact." *Colo. Rev. Stat. § 6-1-105(1)(g)* **[**191]** . In order to show violation of the CCPA, plaintiff must demonstrate that (1) defendant engaged in an unfair or deceptive trade practice; (2) the challenged practice occurred in the course of defendant's business, vocation, or occupation; (3) it significantly impacts the public as actual or potential consumers of the defendant's goods, services, or property; (4) the plaintiff suffered injury in fact to a legally **[*1115]** protected interest; and (5) the challenged practice caused the plaintiff's injury. *Hall v. Walter, 969 P.2d 224, 235 (Colo. 1998)*. Evidence that a person has engaged in a deceptive trade practice shall be prima facie evidence of intent to injure competitors and to destroy or substantially lessen competition. *Colo. Rev. Stat. § 6-1-105(2)*.

Although NIPP has arguably met the first three factors in proving a claim, NIPP has utterly failed to show any injury to NIPP's reputation or business. NIPP has adduced no testimony that any record label or artist changed its opinion of NIPP or decided not to do business with NIPP as a result of the alleged representations. NIPP has only provided the self-serving deposition testimony of Douglas Kauffman **[**192]** that record labels, artists, and their managers generally would likely lose faith in NIPP based on these representations. (Pls.' Resp., Ex. 19 [Kauffman Dep. at 177-178].) Accordingly, Clear Channel's motion for summary judgment is granted as to NIPP's claim for violation of the Colorado Consumer Protection Act.

C. Tortious Interference with Contractual Relations

NIPP's second state law claim, other than antitrust, is a claim for tortious interference with contractual relations. ***HN74***[] One who intentionally and improperly interferes with the performance of a contract between another and a third party by causing the third person not to perform the contract, is subject to liability to the other for the pecuniary loss resulting to the other from the failure of the third person to perform the contract. *Mem'l Gardens, Inc. v. Olympian Sales & Mgmt. Consultants, Inc., 690 P.2d 207, 210 (Colo. 1984)* (quoting *Restatement (Second) of Torts § 766* [1977]). In order to prove tortious interference with contract, a plaintiff must show: (1) a contract existed; (2) the defendant had knowledge of the contract; (3) the defendant interfered **[**193]** and induced the other party to breach the contract; and (4) the plaintiff was injured as a result. *Westfield Dev. Co. v. Rifle Inv. Assoc., 786 P.2d 1112, 1117 (Colo. 1990)* (en banc). Most importantly, the interference must be intentional and improper. *Amoco Oil Co. v. Ervin, 908 P.2d 493, 501 (Colo. 1996)* (en banc) (citing *Restatement (Second) of Torts § 767 cmt. a*).

Here, first, NIPP alleges that Clear Channel interfered with NIPP's at-will employment contract with Michael DuCharme by hiring DuCharme away from NIPP. (Pls.' Resp. at 103.) Clear Channel counters that NIPP has failed to state a claim in relation to DuCharme's employment because DuCharme's employment was at-will, and Clear Channel did not cause DuCharme to *breach* any contract. (Defs.' Br. at 84.) Contrary to Clear Channel's argument, ***HN75***[] "even a contract terminable at will is entitled to some protection from tortious unwarranted interference." *Zappa v. Seiver, 706 P.2d 440, 442 (Colo. Ct. App. 1985)*. Nevertheless, as stated earlier, ***HN76***[] for liability to descend on defendants, the interference with the at-will contract must have been improper. **[**194]** *Ervin, 908 P.2d at 501*. Interference with a contract is not improper when it involves a matter of competition between the parties. More specifically, a defendant who intentionally causes a third person to breach a contract with the plaintiff does not engage in improper conduct if: (1) it concerns a matter of competition between the defendant and plaintiff; (2) the defendant does not employ wrongful means; (3) the action does not amount to an unlawful restraint of trade; and (4) the defendant's purpose is, at least in part, to advance its own interest. *Ervin, 908 P.2d at 501* (citing *Restatement (Second) of Torts § 768*). 'Wrongful means' include physical violence, fraud, civil suits, and criminal prosecutions. **[*1116]** *Ervin, 908 P.2d at 502* (citing *Restatement [Second] of Torts § 768 cmt. e*).

Here, Clear Channel's behavior in luring DuCharme away from NIPP to work for Clear Channel was not improper. First, the interference concerns a matter of competition between NIPP and Clear Channel because NIPP and Clear Channel compete for concert promotions employees who have significant **[**195]** contacts in the music industry. Secondly, even if DuCharme snuck into the NIPP offices at night and removed various files improperly, NIPP has set forth no evidence that Clear Channel directed this behavior or utilized any other wrongful means in hiring DuCharme. Thirdly, hiring one employee away from a competitor does not amount to a restraint of trade because it does not injure competition, as explained earlier in this order. Finally, Clear Channel's purpose was to advance its own interest because DuCharme has many contacts in the music industry that might be utilized by Clear Channel. Accordingly, Clear Channel's motion for summary judgment is granted as to NIPP's tortious interference claim based on DuCharme's departure from NIPP.

NIPP secondly alleges that Clear Channel tortiously interfered with NIPP's contract with the band Lennon for Lennon to play at the Bluebird Theatre in February 2002. (Pls.' Resp. at 103.) Specifically, Jeffrey Pringle, the owner of the record label and management company Next Level Records, declares that he negotiated a contract with NIPP on behalf of Lennon, a band managed by Pringle, for promotion of a Denver concert in February 2002. (Pls.' Resp. **[**196]** , Ex. 6 [Decl. of Jeffrey Pringle P5].) Pringle further declares that, after confirmation of the concert, Lennon's record label, Arista Records, demanded that Pringle cancel Lennon's concert with NIPP to avoid losing radio air play for Lennon on KBPI, because Clear Channel had eliminated air play for other Arista artists booking with NIPP, like Adema. (*Id.,* Ex. 6 [Pringle Decl. PP6-7].) Pringle complied with Arista's request. (*Id.,* Ex. 6 [Pringle Decl. P7].)

Clear Channel counters that Pringle's declaration is inadmissible, because it is hearsay, and, therefore, cannot be used to create a dispute of material fact on summary judgment. Clear Channel is correct that the court may consider only admissible evidence when ruling on a summary judgment motion. *See* *World of Sleep, 756 F.2d at 1474*. ***HN77***[] A statement is not considered hearsay, however, if the significance of the statement lies solely in the fact that it was made, not in the truth of its contents. *Fed. R. of Evid. 801(c)* advisory committee note. Here, the statements made by Arista may be offered to show that Arista caused Pringle to breach the contract, because the statements **[**197]** are being offered to show that Arista made such statements to Pringle. The statements cannot be offered to show, however, that Clear Channel took air play away from Adema. NIPP, however, provides a declaration from Victoria Lovato with radio air play data attached from KBPI for Adema during the relevant time period. (Pls.' Resp., Ex. 8 [Decl. of Victoria Lovato, Ex. J].) This data confirms that Adema's air play was eliminated by Clear Channel after Adema signed with NIPP for a concert. Because portions of Pringle's testimony and radio air play data are admissible, NIPP has provided sufficient evidence to support its factual assertions.

More problematic, however, is whether NIPP's factual assertions regarding the Lennon concert are sufficient to support a claim for tortious interference with contract. As stated earlier, in order to prove tortious interference with contract, a plaintiff must show: (1) a contract existed; (2) the defendant had knowledge **[*1117]** of the contract; (3) the defendant interfered and induced the other party to breach the contract; and (4) the plaintiff was injured as a result. *Westfield Dev. Co., 786 P.2d at 1117*. Most importantly, the interference **[**198]** must be intentional and improper.*Id.* Here, assuming there was a contract, NIPP has presented no evidence that Clear Channel knew about the contract between Lennon and NIPP. In fact, Arista and Pringle's behavior seems to have been driven by a desire to prevent Clear Channel from learning about the contract between Lennon and NIPP. Because NIPP provides no evidence that Clear Channel had knowledge of the contract, an essential element of the claim, NIPP's claim for tortious interference with contract based on the Lennon contract fails. [10] Accordingly, Clear Channel's motion for summary judgment on that claim is granted.

[199]** ***D. Tortious Interference with Prospective Business Relations***

Clear Channel's final state law claim is for tortious interference with prospective business relations. ***HN78***[] Colorado has adopted the *Restatement (Second) of Torts §§ 766B, 767and 768* in determining whether a party is liable for intentional interference with prospective business advantage. *Ervin, 908 P.2d at 500-501* (citing *Restatement [Second] of Torts §§ 766B-768* [1979]); *Wasalco, Inc. v. El Paso County, 689 P.2d 730, 732 (Colo. Ct. App. 1984)*; *Dolton v. Capital Fed. Sav. & Loan Ass'n, 642 P.2d 21, 23 (Colo. Ct. App. 1981)*. ***HN79***[] To establish a claim for tortious interference with prospective business relations under Colorado law, a plaintiff must show ***intentional and improper*** interference with another's prospective contractual relation. *Dolton, 642 P.2d at 23* (citing *Restatement [Second] of Torts § 766B*) (emphasis added). For liability to attach, defendant's intentional and improper interference must either ***induce or cause*** **[**200]** the third party not to enter into or continue relations. *Wasalco, Inc., 689 P.2d at 732* (citing *Restatement [Second] of Torts § 766B*) (emphasis added). It is not necessary to prove an underlying contract. *Plaza Esteban v. La Casa Nino, Inc., 738 P.2d 410, 412 (Colo. Ct. App. 1987)*, (*rev'd on other grounds, 762 P.2d 669 [Colo. 1988]*). Rather, a continuing business or customary relationship, which includes a prospective quasi-contract, suffices to create rights against intentional interference. *Restatement (Second) of Torts § 766B cmt. c* (emphasis added).

NIPP points to several different incidents as evidence of tortious interference with prospective business relations. (Pls.' Resp., Ex. 2 [Morreale Decl. PP34-39].) Specifically, NIPP claims that Clear Channel tortiously interfered with NIPP's relationship with the bands Cold, Eve 6, the Toadies, and Puddle of Mudd, and the talent agencies The Agency Group, Evolution Talent, and Chaotica. (*Id.,* Ex. 2 [Morreale Decl. PP34-39].) NIPP's arguments related to Cold, the Toadies, and Puddle of Mudd fail **[**201]** because NIPP provides no admissible evidence that these bands discontinued relations with NIPP on account of Clear Channel or at all. NIPP's arguments related to the talent agencies also fail because NIPP provides no evidence that it has a customary relationship with these agencies, of the type that is protected against tortious interference. NIPP's only remaining evidence of intentional interference with prospective **[*1118]** business relationships is its experience with the band Eve 6.

In his declaration, Morreale of NIPP states that, on June 21, 2000, NIPP, in competition with Clear Channel, submitted a bid to promote Eve 6 for a July 14th concert in Denver. (*Id.,* Ex. 2 [Morreale Decl. P35].) Thereafter, Ken Fermaglich of the Agency Group, which represented Eve 6, informed Morreale that Eve 6 would have to use Clear Channel to avoid loss of air play. (*Id.,* Ex. 2 [Morreale Decl. P35].) Subsequently, the Agency Group awarded the Eve 6 concert to SFX/Clear Channel Entertainment. (*Id.,* Ex. 2 [Morreale Decl. P35].) Clear Channel argues that this evidence is inadmissible hearsay.

The court disagrees for two reasons. First, a statement is not considered hearsay if the significance **[**202]** of the statement lies solely in the fact that it was made, not in the truth of its contents. *Fed. R. of Evid. 801(c)* advisory committee note. Here, the statements made by Fermaglich may be offered to show that Fermaglich refused NIPP's bid based on a fear of losing air play. The statements cannot be offered to show, however, that Clear Channel took air play away from any other artists in retaliation for their failure to utilize Clear Channel promotions services. NIPP, however, provides a declaration from Victoria Lovato with radio air play data attached, which arguably demonstrates Clear Channel's practice of pulling radio air play for artists signing with NIPP. (Pls.' Resp., Ex. 8

[10] NIPP provides other alleged examples of interference with contract. (Pls.' Resp., Ex. 84 [Chart of Alleged Interference].) However, the chart set forth by NIPP contains merely conclusory allegations about interference and does not point to admissible evidence proving the elements of the claim. Accordingly, NIPP cannot use the chart to support its tortious interference claim with contract or with prospective business relations.

[Decl. of Victoria Lovato, Ex. J].) Because portions of Fermaglich's statement and radio air play data are admissible, NIPP has provided sufficient evidence to support its factual assertions. [11]

[203]** More problematic is whether NIPP's factual assertions, if true, are sufficient to state a claim for tortious interference with prospective business relations. As stated earlier, ***HN80***[] to establish a claim for tortious interference with prospective business advantage, a plaintiff must show that defendant engaged in (1) improper conduct with (2) the intention to induce or cause a third party not to enter into or continue business relations with the plaintiff, and (3) defendant actually induced or caused such result. *Dolton, 642 P.2d at 23* (citing *Restatement [Second] of Torts § 766B*) (emphasis added).

First, NIPP provides sufficient evidence that Clear Channel engaged in improper conduct. ***HN81***[] Improper conduct is a necessary element of a claim for intentional interference with prospective business relations. *Dolton, 642 P.2d at 23*. *Restatement (Second) of Torts § 767* sets forth seven factors a judge or jury should balance to determine whether a defendant's conduct is improper. *Ervin, 908 P.2d at 500* (citing *Restatement (Second) of Torts § 767* **[**204]**). These factors include:

> (a) the nature of the defendant's conduct,
>
> (b) the defendant's motive,
>
> (c) the plaintiff's interests interfered with,
>
> **[*1119]** (d) the defendant's interests in interfering,
>
> (e) the social interests in protecting defendant's freedom of action and plaintiff's prospective business relations,
>
> (f) the proximity of the defendant's conduct to the interference,
>
> (g) the relations between the parties.

Id. The nature of some conduct, such as fraud and physical violence, is always improper, while other means, such as economic pressure, may be permissible under some circumstances and wrongful under others. *Id.* Whether economic pressure is improper depends on the degree of coercion, the effects upon competition, and the appropriateness of the pressure as a means of accomplishing the defendant's objectives. *Id.*

Here, the conduct is arguably improper for several reasons. First, Clear Channel's behavior, if proven to be an illegal tying arrangement, may be anticompetitive economic pressure and violative of the antitrust laws. Additionally, Clear Channel's conduct in denying air play to artists using NIPP may be inappropriate if it's a means of avoiding **[**205]** payola laws. Accordingly, whether Clear Channel's conduct may be considered improper depends largely on NIPP's success in proving its antitrust claims at trial. NIPP's allegations of improper conduct, therefore, survive summary judgment.

HN82[] A defendant does not engage in improper conduct, so as to be liable for intentional interference, if: (1) it concerns a matter of competition between the defendant and plaintiff; (2) the defendant does not employ wrongful means; (3) the action does not amount to an unlawful restraint of trade; and (4) the defendant's purpose is, at least

---

[11] Additionally, the state of mind exception to the hearsay rule provides:

> the following are not excluded by the hearsay rule, even though the declarant is available as a witness: . . . [a] statement of the declarant's then existing state of mind, emotion, sensation, or physical condition (such as intent, plan, motive, design, mental feeling, pain and bodily health), but not including a statement of memory or belief to prove the fact remembered or believed . . . .

Fed. R. of Evid. 803(3). Here, the alleged statement from Fermaglich shows his intention to commit Eve 6 to Clear Channel due to fear of losing air play and is admissible to show this intention. His statement is not admissible, however to prove that Clear Channel ceased air play for those artists choosing other concert promoters.

in part, to advance its own interest. *Ervin, 908 P.2d at 501* (citing *Restatement (Second) of Torts § 768*). 'Wrongful means' include physical violence, fraud, civil suits, and criminal prosecutions. *Ervin, 908 P.2d at 502* (citing *Restatement [Second] of Torts § 768 cmt. e*). 'Wrongful means' do not include breach of the duty of good faith and competitive economic pressure. *Id. at 502-503*. At this stage in the litigation, Clear Channel does not qualify for this competitor's privilege because its **[**206]** conduct may involve wrongful means if Clear Channel is circumscribing the payola laws, and Clear Channel's actions may amount to a restraint on trade if the conduct amounts to an illegal tying arrangement.

HN83[] The second element of tortious interference with prospective business relations is that the improper conduct must be intentional. NIPP provides sufficient evidence that Clear Channel intends its manipulation of air play to interfere with NIPP and other promoters' prospective business relations with artists. It is not necessary that NIPP show that Clear Channel intended to specifically interfere with the Eve 6 booking, as long as NIPP can show that Clear Channel generally desired to interfere with NIPP's bookings as a whole. "The situation may be one in which many persons are induced to act. Thus a boycott campaign may be intended to induce numerous persons to [refuse business relations] with the plaintiff." *Restatement (Second) of Torts § 767 cmt. q*. Here, NIPP has presented sufficient evidence of a pattern and practice of behavior by Clear Channel whereby Clear Channel lessens radio air play for artists booking with NIPP. Furthermore, NIPP **[**207]** has introduced evidence of electronic mail messages, written by Clear Channel employees, which demonstrate that Clear Channel intends to manipulate artists' promotion decisions and interfere with competitors by withholding air play. Accordingly, NIPP has created a dispute of material fact as to whether Clear Channel intended to interfere with NIPP's prospective relation with Eve 6.

[*1120] ***HN84***[] The final element of tortious interference with prospective business relations is that the conduct of the defendant must cause the third party to refuse to enter business relations with the plaintiff. The question whether the actor's conduct caused the third person to refuse to enter relations with the plaintiff raises an issue of fact. *Restatement (Second) of Torts § 767 cmt. o*. The reasonableness of the claimed reaction of the third person to the actor's conduct is material evidence on this issue, but it is not conclusive. *Id.* Thus the fact that only a fool would have been influenced by the defendant's conduct is evidence that may warrant a finding that the third person was not in fact influenced by it. *Id.* On the other hand, if other evidence establishes that **[**208]** the actor did in fact induce the third person's conduct, the actor is liable even though the third person was foolish or otherwise unreasonable in permitting himself to be so influenced. *Id.* Here, Fermaglich admitted that he was induced and influenced by his perception of Clear Channel's conduct. Accordingly, NIPP provides sufficient evidence to create a dispute of material fact as to whether Clear Channel caused Eve 6 to avoid business relations with NIPP. Based on the forgoing, Clear Channel's motion for summary judgment is denied as to NIPP's claim for tortious interference with prospective business relations with Eve 6.

IV. Defendants' Motion to Exclude Expert Testimony

Defendants argue that the opinion of Dr. Phillips, plaintiffs' expert, should be excluded under *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. (Mot. to Exclude Expert.) ***HN85***[] According to *Daubert,* under *Federal Rule of Evidence 702*, expert testimony is only admissible if it will assist the trier of fact and if (1) the testimony is based on sufficient facts or data, (2) the testimony is the product **[**209]** of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case. *Lantec, 306 F.3d at 1025*. Specifically, defendants argues that Dr. Phillips' testimony concerning market definition and damages is not based on sufficient scientific knowledge or criteria to be reliable or admissible under *Daubert.* (*Id.* at 2-5, 9-27.)

As to the market definition, defendants claim that Dr. Phillips failed to utilize economic criteria in making a distinction between rock and non-rock artists. (*Id.* at 9-14.) Furthermore, defendants claim that, not only did Dr. Phillips fail to calculate cross-elasticity of demand, but he also relied on his subjective opinions regarding music, a subject in which he has no expertise. (*Id.*) As explained earlier in this order, calculation of cross-elasticity of demand is not always necessary to define a relevant market. Although Dr. Phillips did not calculate cross-elasticity of demand, he did rely on other economic data, including industry materials, pricing data, and public recognition of the market, all of which have been held relevant to determining the scope of a market. Additionally, **[**210]** Dr. Phillips does not base his opinion on his subjective beliefs but on his research of industry materials regarding the industry's categorization of rock music. Because Dr. Phillips relies on sufficient data and applies that data to define the market, his opinion is sufficiently reliable for admission on the issue of market definition under*Daubert.* The court elects to refrain from ruling on defendants' motion as to the admissibility of Dr. Phillips' opinion on damages at this time, since decision is not relevant to the summary judgment motion.

V. Conclusion

Based on the foregoing, it is therefore

ORDERED as follows:

[*1121] 1. Defendant Parent Clear Channel Communications' motion for summary judgment (# 130 & 163) is DENIED.

2. Defendants' motion for summary judgment (# 158) is GRANTED in part and DENIED in part. It is GRANTED as to plaintiff's claims for (1) monopolization under the Sherman Act, *15 U.S.C.A. § 2*, (2) monopolization under the Colorado Antitrust Act, *Colo. Rev. Stat. § 6-4-105*, (3) violation of the Colorado Consumer Protection Act, *Colo. Rev. Stat. § 6-1-101*, and (4) tortious **[**211]** interference with contract. Defendants' motion is DENIED in all other respects. At the appropriate date, the clerk will enter judgment in favor of the defendants and against plaintiffs, dismissing their claims with prejudice.

3. Defendants' motion to exclude expert testimony (# 223) is DENIED in part, and RULING IS RESERVED in part. It is DENIED as it pertains to the expert's testimony on liability issues in the case. RULING IS RESERVED as to the damages issues in the case, which will be addressed at a later date by the court.

4. Defendants' motion to file a supplemental brief in support of their motion for summary judgment (# 239) is DENIED.

5. The court will hold a Final Pretrial Conference commencing at 4:00 o'clock p.m. on April 30, 2004 in Courtroom 14, Alfred A. Arraj United States Courthouse, Denver, Colorado. In preparing for and participating in the conference, the parties and counsel will follow the Instructions for Preparation and Submission of Final Pretrial Order, a copy of which is attached

Dated this 2 day of April, 2004.

BY THE COURT:

s/

EDWARD W. NOTTINGHAM

United States District Judge

HN1[] **Supporting Materials, Discovery Materials**

Summary judgment shall be entered if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact. *Fed. R. Civ. P. 56(c)*. When analyzing this evidence, the court must view the underlying facts in the light most favorable to the party opposing the motion for summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Antitrust & Trade Law, Sherman Act**

In the civil antitrust context, in order to survive summary judgment, litigants must establish that there is a genuine issue of material fact as to whether defendants entered into an illegal conspiracy that caused the plaintiffs to suffer a cognizable injury. This showing has two components. First, respondents must show more than a conspiracy in violation of the antitrust laws; they must show an injury to them resulting from the illegal conduct. Second, the issue of fact must be genuine. In the language of *Fed. R. Civ. P. 56(e)*, the nonmoving party must come forward with specific facts showing there is a genuine issue for trial. If the factual context renders the respondents' claim implausible -- if the claim is one that simply makes no economic sense -- the respondents must come forward with more persuasive evidence to support their claim than would otherwise be necessary.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

In the civil antitrust summary judgment context, in the face of economic factors dictating that the nonmoving party's theory is irrational, that party must submit evidence to establish that the theory remains practical and genuine despite economic evidence to the contrary. The limits ***antitrust law*** places on the range of permissible inferences from ambiguous evidence dictate that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

In the civil antitrust context, the absence of any plausible motive to engage in the conduct charged is highly relevant to whether a genuine issue for trial exists within the meaning of *Fed. R. Civ. P. 56(e)*. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if petitioners had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

The requirement that the plaintiffs' claims make economic sense does not introduce a special burden on plaintiffs facing summary judgment in antitrust cases. The only demand is that the nonmoving party's inferences be reasonable in order to reach the jury.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

The elements to define what constitutes a conspiracy are: (1) the defendants must have had knowledge of a conspiracy, (2) the defendants must have intended to join the conspiracy, and (3) by joining the conspiracy, the defendants were interdependent upon one another in that their respective benefit depended on the success of the venture.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In order to establish the requisite knowledge of a conspiracy, the plaintiffs must prove that each defendant was united in a common unlawful goal or purpose, or knew of the conspiracy's general scope and purpose.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

Although the plaintiffs must show that each defendant had knowledge of an agreement as to the overall conspiracy, they need not show (1) evidence of a formal agreement, or (2) knowledge, on behalf of the defendant, of every detail of the alleged conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Although the plaintiffs must establish a common goal, it is not necessary to provide direct evidence of a conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

Knowledge alone is not sufficient to prove that any particular defendant intended to join a conspiracy. Although mere knowledge of another similarly motivated conspiracy or an overlap in personnel do not prove one overall agreement, there may be an intent to join an overall, conspiracy if the common purpose of a single enterprise motivates each participant and each act. A party progresses from mere knowledge of an endeavor to intent to join it when there is informed and interested cooperation, stimulation, instigation. And there is also a stake in the venture which, even if it may not be essential, is not irrelevant to the question of conspiracy. The intent that must be shown in a conspiracy case is the intent to advance the unlawful purpose of the conspiracy.

Opinion

[*3] ORDER

Pending before the Court is E.I. DuPont de Nemours & Company's Motion to Amend the Court's March 9, 2004 Memorandum Opinion Re: Defendants' Motion for Summary Judgment on the Issue of an All-Vitamins Conspiracy and Vacate the Order as to DuPont [# 4611]. The Court has carefully considered the motion as well as the opposition submitted by Publix and Meijer. For the reasons stated in the Amended Memorandum Opinion Re: Defendants' Motions for Summary Judgment on the Issue of an "All-Vitamins Conspiracy" issued April 8, 2004 [# 4619], it is hereby

ORDERED that the motion is **GRANTED.** It is further

ORDERED that the Order dated March 9, 2004 [# 4606] is **VACATED.** A new **[*4]** Order is issued contemporaneously herewith.

SO ORDERED.

April 8, 2004

AMENDED MEMORANDUM [13] OPINION**

Re: Defendants' Motions for Summary Judgment on the Issue of an "All-Vitamins Conspiracy"

Pending before the Court are five defendants' motions [1] **[**14]** for summary judgment seeking judgment on the issue of the scope of the conspiracy pursuant to *Fed. R. Civ. P. 56*. Upon careful consideration of the parties' briefs, arguments presented, and the entire record herein, the Court denies for certain Defendants and grants for one Defendant motions for summary judgment on Plaintiffs' "all-vitamins conspiracy" claim. [2]

---

[1] Originally, the various defendants filed twenty-one (21) motions for summary judgment concerning the scope of the all-vitamins conspiracy. Many of these motions became moot as a result of settlement. The following defendants' motions remain at issue before the Court with respect to the direct action cases which are scheduled to be remanded:

[# 11:] Bioproducts, Inc. ("Bioproducts")

[# 13:] DuCon, DCV, Inc., DuCoa ("DuCoa")

[# 16:] Chinook Group Limited and Chinook Group, Inc. ("Chinook")

[# 17:] UCB S.A., UCB, Inc., and UCB Chemicals Corporation ("UCB")

The defendant parties to this motion will collectively be referred to as "Defendants" or "choline Defendants." The individual defendant parties will be referred to as the names indicated in parenthesis above. The plaintiffs will be referred to as "Plaintiffs."

The number listed before each defendant's name above refers to the August 14, 2002 list of dispositive motions from Dickstein, Shapiro, Morin & Oshinsky, LLP. There are additional motions concerning the all-vitamins conspiracy that will be addressed at a later date. These affect the so-called "indirect purchaser cases" which are on a separate scheduling track.

[2] This opinion amends the Memorandum Opinion re: Defendants' Motions for Summary Judgment on the Issue of an "All-Vitamins Conspiracy" issued March 9, 2004. Specifically, the Court removes the holding as to E.I. DuPont de Nemours and Company ("DuPont") having granted Dupont's Motion to Amend the March 9, 2004 Memorandum Opinion.

[15] I. BACKGROUND**

This case stands at the heels of one of the largest criminal antitrust investigations ever undertaken by the United States Department of Justice. To date, the Antitrust division of the Department of Justice has prosecuted 30 cases and gathered well over $ 875 million in criminal fines relating to the international vitamins cartel. [3] This vitamins cartel enacted one **[*5]** of the most elaborate and wide-spread conspiracies ever prosecuted by the United States Department of Justice. [4]

The case before this Court is equally formidable. As of a few months ago, the consolidated action before the Court involved 55 separate multiparty lawsuits from 32 different federal courts. The enormity and complexity of this case can be seen through the fact that over 1,000 **[**16]** opinions and rulings have been issued by the Court in this case. Furthermore, well over 100 law firms participated in the preparation of over 10,000 separate filings that have been lodged in this matter to date. This opinion addresses five of the motions that have been filed in this case.

Plaintiffs allege that Defendants, along with their co-conspirators, conspired to artificially inflate the price of certain vitamins and vitamin products, allocate shares of the vitamin market, predetermine sales volume in the vitamin industry, eliminate competition from non-co-conspirators, limit supply, and allocate specific customers among themselves and their co-conspirators in the following vitamin markets: Vitamin A, Vitamin B1 (Thiamine), Vitamin B2 (Ribloflavin), Vitamin B3 (Niacin), Vitamin B4 (Choline Chloride), Vitamin B5 (CalPan), Vitamin B6 (Pyridoxine), Vitamin B9 (Folic Acid), Vitamin B12, Vitamin C, Vitamin D, Vitamin E, Vitamin H (Biotin), Astaxanthin, Beta Carotene, Canthaxonthin, Apocarotenal, and vitamin premix, in violation of *Section 1 of the Sherman Act*. See, e.g., Second Am. Compl. for Antitrust Violations, Blue Seal Feeds, Inc., et al., v. BASF A.G. **[**17]** , et al., PP 1, 121-135. This alleged conspiracy between the sellers of the various vitamins listed above is referred to as the all-vitamins conspiracy. The issue before the Court is the viability of Plaintiffs' alleged all-vitamins conspiracy.

As mentioned above, the procedural history in this case is quite extensive, and a brief review of the pertinent parties and pleadings affecting this motion is warrented. On or shortly before August 6, 2002, various Defendants filed forty-nine (49) motions with the court, while various Plaintiffs filed two dispositive motions. Of the forty-nine dispositive defense motions, twenty-two related to "scope of the conspiracy" defenses. Of those twenty-two motions, sixteen of them specifically addressed Plaintiffs' alleged all-vitamins conspiracy.

On November 21, 2002, the Court heard oral argument on the all-vitamins conspiracy motions. Since that time, many individual cases have been resolved. The all-vitamins conspiracy motions that remain pending are # 11, # 13, # 16, and # 17 (as numbered in the chart submitted by Dickstein, Shapiro, Morin & Oshinsky, LLP under cover of its

---

On August 6, 2002, DuPont filed a Motion for Partial Summary Judgment on the Issue of an All Vitamins Conspiracy in ten individual cases. At the time the March 9, 2004 Memorandum Opinion was issued, DuPont had settled with each of the plaintiffs against whom it had moved for summary judgment. DuPont failed, however, to inform the Court of the status of its motion. In the Proposed Agenda for February 18, 2004 Status Conference, DuPont's all-vitamins conspiracy motion was listed in section G as one of the "Dispositive Motions Before the Court that the Parties Agree Should Be Decided Prior to Remand." Furthermore, at the February 18, 2004 status conference, which DuPont's counsel chose not to attend, counsel for parties other than DuPont specifically addressed section G of the agenda confirming which listed motions had been mooted. See Tr. of Feb. 18, 2004 Status Conference at 25-27.

The Court is loath to consider the number of hours and judicial resources that were wasted in deciding a motion, the moot status of which counsel neglected to timely inform the Court. In the interests of justice, however, the holding as to DuPont must be removed from this Memorandum Opinion in light of the settlements that had taken place before the original Memorandum Opinion was issued.

[3] Press Release, United States Department of Justice, Former DuCoa Executive Charged With Price Fixing on Choline Chloride (June 4, 2003); 1999 USDOJ Antitrust Div. Ann. Rep. at 7.

[4] 1999 USDOJ Antitrust Div. Ann. Rep. at 6.

August 14, 2002 letter to the Court). These motions were filed by the **[**18]** following Defendants, respectively: Bioproducts, DuCoa and DCV, Chinook, and UCB.

Two separate moving papers have been filed on behalf of each Defendant: first, Defendants collectively filed Certain Defendants' Joint Memorandum of Law in Support of Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claim ("Defs.' Mem."); second, each Defendant filed an individual motion and reply brief on their own behalf. [5] **[**19]** Plaintiffs submitted **[*6]** two primary documents in opposition to Defendants' motions for summary judgment: first, Certain Plaintiffs' Joint Opposition to Certain Defendants' Joint Memorandum of Law in Support of Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claims (the "PJO"); second, Plaintiffs' Joint Counterstatement of Facts in Opposition to Defendants' Motions for Summary Judgment Regarding the Fact and Scope of the Conspiracy, Fraudulent Concealment, and Subsidiary Liability (the "PJC"). Plaintiffs also filed individual opposition papers against specific Defendants. [6]

Two groups of cases remain. Some cases against Defendants will be remanded to their original jurisdictions, while others will remain in this Court for trial. [7] The following is a breakdown of the remaining cases pending against each Defendant:

Bioproducts: (1) Class action plaintiffs' [8] cases to tried in Minnesota [9]
(2) Direct action plaintiffs' [10] cases to be remanded
DuCoa: (1) Direct action plaintiffs' cases to be remanded
Chinook: (1) Class action plaintiffs' cases to be tried in Minnesota

(2) Direct action plaintiffs' cases to be **[**20]** remanded
UCB: (1) Hill's Pet Nutrition cases to be remanded

All parties agree that the instant motion is to be decided before these cases are remanded to their original filing jurisdictions.

1. The Defendants

a. UCB

There are three UCB defendants: UCB, S.A.; UCB, Inc.; and UCB Chemicals Corporation. UCB, S.A. is a Belgium-based company that produces and sells prescription pharmaceuticals, high **[**21]** performance film and packaging

---

[5] As indicated in the Plaintiffs' spreadsheet, enclosed under August 14, 2002 Letter from Richard Leveridge to the Court Re: In Re Vitamins Antitrust Litigation, the following are the individual dispositive motions filed by the choline Defendants: # 11 Bioproducts Incorporated's Motion For Summary Judgment on Plaintiffs' "All-Vitamins" Conspiracy Claim; # 13 DuCoa, L.P.'s and DCV, Inc.'s Motion for Summary Judgment on "All-Vitamins" Conspiracy Claim; # 16 Chinook Group Limited and Chinook Group, Inc.'s Motion for Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claim; # 17 Defendants UCB S.A., UCB, Inc. and UCB Chemicals Corporation's Motion for Summary Judgment on Plaintiffs' All Vitamins Conspiracy Claim.

[6] Those opposition papers are as follows: # 11 Plaintiffs' Joint Counter-Statement of Facts in Opposition to Defendants Bioproducts, Inc.'s and Thomas Sigler's Motions for Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claim; # 13 Opposition to Defendants Ducoa, L.P. and DCV Inc.'s Motion for Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claim; # 16 Plaintiffs' Memorandum of Law in Opposition to Defendants Chinook Group Ltd. and Chinook Group, Inc. Motion for Summary Judgment on Plaintiffs' All-Vitamins Conspiracy Claim.

[7] See, Proposed Agenda for February 18, 2004 Status Conference.

[8] Co-lead counsel for the class plaintiffs is Boies, Schiller and Flexner, LLP; Cohen, Milstein, Hausfeld and Toll, PLLC; and Susman Godfrey, LLP.

[9] A settlement in principle has been reached in this matter. See, Proposed Agenda for February 18, 2004 Status Conference, Ex. C.

[10] Dickstein, Shapiro, Morin & Oshinksy represents the "direct action Tysons, et al. plaintiffs" (hereinafter referred to as the "DSMO plaintiffs"). DSMO has also acted as plaintiffs' liaison counsel for the purposes of the motions presented.

materials, and specialty chemical products. The Chemical Sector of UCB, S.A., which is involved in the production and sale of specialty chemical products, manufactures and sells choline chloride. UCB, Inc. is a subsidiary of UCB, S.A. located in the United **[*7]** States, and UCB, Inc. is a holding company that offers support services to its subsidiaries. UCB, Inc. never manufactured or sold choline chloride. UCB Chemicals Corporation is a subsidiary of UCB, Inc. and is also located in the United States. UCB Chemicals Corporation manufactures and markets specialty chemicals. UCB Chemicals Corporation did not manufacture choline chloride during any of the conspiracy periods but did sell choline from 1999-2001. UCB Mem. in Support Mot. Summ. J. ("UCB Mem.") at 3-5.

UCB asserts that it did not manufacture or sell any vitamins other than choline chloride during the alleged conspiracy period, and did not participate in the markets for any of the non-choline vitamins during the conspiracy period. Id.

b. DuCoa/DCV

There are two DuCoa defendants: DuCoa, L.P. and DCV, Inc. In December 1986, E.I. DuPont De Nemours and Company ("DuPont") [11] and ConAgra **[**22]** formed DuCon, a general partnership joint venture, in order to manufacture choline chloride. DuPont Statement of Undisputed Material Facts In Supp. Mot. For Partial Summ.J. On All-Vitamins Conspiracy P 4. DuCon changed its name to DuCoa on October 1, 1991. Id. at P 5. On December 31, 1992, DuCoa was converted to a limited partnership with DuPont and ConAgra as limited partners and DCV, Inc., a newly formed Delaware corporation, as the general partner. Id. Among the fourteen different partnerships organized under the umbrella of DCV, Inc., only DuCoa was involved in the manufacture and sale of choline chloride. Plaintiffs contest the accuracy of DuCoa's formation in that an insufficient record was provided by DuCoa in support thereof. Pls.' Opp'n. to Defs.' Statement of Facts Which Precludes Entry of Summ. J. on DuCoa, L.P. and DCV Inc.'s Mot. Summ. J. at 7.

[23]** DuCoa (originally as DuCon) began manufacturing choline chloride in approximately December 1987. DuCoa manufactured choline chloride from December 1987 through June 1, 2001. DuPont Statement of Undisputed Material Facts in Supp. Mot. Partial Summ. J. at P 5-6. On June 1, 2001, DuCoa's choline business was sold as part of a package of businesses to Balchem. Id. In 1995, DuCoa began buying and reselling various "Vitamins" [12] and blending and selling premix. Id. at P 6.

[24]** *c. Bioproducts*

There is one Bioproducts Defendant: Bioproducts, Inc. Bioproducts is a wholly-owned subsidiary of Mitsui [13] located in **[*8]** Fairlawn, Ohio. Bioproducts manufactured choline and vitamin premixes. Pls.' Joint Counterstatement of Facts in Opp'n to Defs.' Mots. Summ. J. ("PJC") P 38. Bioproducts manufactured and sold feed-grade choline chloride during the conspiracy periods alleged by Plaintiffs. Bioproducts' Mem. Supp. Mot. Summ. J. at 2. Bioproducts maintains that it did not manufacture or sell any vitamins other than choline chloride during the conspiracy periods alleged by Plaintiffs. Id.

---

[11] E.I. DuPont De Nemours and Company is a world-wide "science company" that "delivers science-based solutions in markets such as food and nutrition, health care, apparel, home and construction, electronics and transportation." DuPont Statement of Undisputed Material Facts In Supp. Mot. For Partial Summ. J. On All-Vitamins Conspiracy P 2. DuPont is headquartered in Wilmington, Delaware. Id.

[12] Defendants have used the term "Vitamins" to describe all the vitamins in which they have been alleged to have conspired, minus Vitamin B4 (choline chloride). See, e.g., UCB's Mem. Supp. Mot. Summ. J. at 2. where UCB states:

> Plaintiffs in the above-captioned actions continue to allege that [UCB] participated in a single, all-vitamins conspiracy to fix the prices of and/or allocate the markets for Vitamins A, B1 (Thiamine), B2 (Ribloflavin), B3 (Niacin), B5 (CalPan), B6 (Pyridoxine), B9 (Folic Acid), B12, C, D, E, H (Biotin), Beta Carotene, Astaxanthin, Canthaxonthin, Apocarotenal, and premix (collectively "Vitamins"), as well as choline chloride …

[13] Mitsui & Co. USA, Inc. of New York and Mitsui & Co., Ltd. of Japan, one of the largest trading conglomerates of commodities in the world, are the parent corporations of Bioproducts. PJC at P 37.

D. Chinook

There are two Chinook defendants: Chinook Group Limited and Chinook Group, Inc. Chinook Group Limited is a corporation organized under the laws of Ontario, Canada, with its principal **[**25]** place of business in Sombra, Ontario. Chinook Mot. Summ. J. Ex. A (Aff. of Dean Lacy). Chinook Group, Inc. is a Minnesota corporation that is wholly-owned by its Canadian parent, Chinook Group Limited. Chinook Mot. Summ. J. on All-Vitamins Conspiracy at 2.

Chinook Group Limited manufactures and sells choline chloride which is produced at its plants in Canada. Chinook Group, Inc. provided a "toll" manufacturing service to Chinook Group Limited (formerly known as Chinook Group) from 1988 through 1998, converting aqueous choline chloride into dry choline chloride. Id.

Neither Chinook Group Limited nor Chinook Group, Inc. manufactured or sold any vitamin product, nor any products that could be used as ingredients in any vitamin product, other than choline chloride. Id.

2. The Product

Defendants are all manufacturers of choline chloride, also known as Vitamin B4, more commonly known as "choline." Choline is a nutritional supplement used primarily in animal feed. Choline is synthesized from three chemical products: trimethylamines, ethylene oxide, and hydrochloric acid. During the relevant time period, all of the choline chloride manufacturers made at least one of the raw **[**26]** materials needed to manufacture choline. Pls.' Mem. Opp'n. UCB's Mot. Summ. J. at 5.

Defendants differentiate choline from other vitamins because choline (1) is produced through a process using largely different raw materials than other vitamins, and (2) there are no substitutes for choline (and, conversely, choline is not a substitute for any other vitamin). Defendants have even defined the term "Vitamins" so as not to include choline chloride. See, e.g., UCB's Mem. Supp. Mot. Summ. J. at 2. Plaintiffs argue that this "arbitrary" definition has been devised solely "to support [Defendants'] motions to sever choline from the rest of the conspiracy." Pls.' Mem. Opp'n. UCB's Mot. Summ. J. at 5.

3. The Alleged "Ringleaders"

a. BASF

BASF Atkiengesellschaft, or BASF AG ("BASF"), is a corporation organized and existing under the laws of Germany. BASF's principal place of business is in Ludwigshafen, Germany. BASF Agreed Statement of Facts (Fed. Ct. Canada) (Sept. 17, 1999). Among other things, BASF is involved in the production and/or sale of oil and gas, bulk chemicals, plastics, high performance chemical products, plant protection products, and pharmaceuticals. BASF AG's **[**27]** Fine Chemicals Division produces and sells vitamins. At one time, BASF was the second largest supplier of bulk vitamins and carotenoids in the world. PJC at P 7. From at least 1992 through 1995, BASF was one of the principal European manufacturers and marketers of choline chloride. BASF Agreed Statement of Facts (Fed. Ct. Canada) (Sept. 17, 1999). **[*9]** BASF is no longer a defendant in any active litigation as BASF has settled all claims with Plaintiffs.

b. F. Hoffman-LaRoche Ltd

F. Hoffman-LaRoche Ltd ("Roche"), headquartered in Basel, Switzerland, is one of the largest pharmaceutical and health groups in the world. PJC at P 1. At the time of the European Commission decision against Roche (Nov. 21, 2001), Roche was the largest vitamin producer in the world, controlling approximately 50% of the overall market. ECF P 77. Roche's vitamin operations account for approximately 8% of the corporation's overall gross income. PJC P4.

c. Coordination of Activities

Although BASF and Roche are no longer parties to the instant motion, both are critical to Plaintiffs' case. Plaintiffs theorize that both BASF and Roche controlled the choline conspiracy. See, e.g., Pls.' Slide **[**28]** Ex. at 19 ("Roche and BASF were joint leaders and instigators of the collusive arrangements affecting the common range of vitamin products they produced …." (quoting ECF P712)).

BASF acknowledged to both Canadian and European authorities its "pre-eminent role" in the global agreements. PJC at P 344; BASF Agreed Statement of Facts (Fed. Ct. Canada (Sept. 17, 1999)). BASF provided several documents to the EC indicating its intent to fix prices and allocate market shares in the choline chloride market. See, e.g., BASF AG 0033336-55; BASF AG 003361-62; BASF AG 0033449-75; BASF AG 0033477-79; BASF AG 0033480-33564; BASF AG 0033580-613. The documents also indicate BASF's coordination of conspiracy activities with Defendants. Id.

The only direct link that Plaintiffs provide establishing Roche's connection to the conspiracy is a document produced by BASF. [14] **[**29]** BASF AG 0025648-49. [15] The European Commission found that Roche was the "prime mover and main beneficiary of the complex of collusive arrangements." ECF P 568. The Commissions' findings, however, do not specifically address choline. [16]

A secondary argument setting forth Roche's involvement in the choline conspiracy is Roche's economic incentives. In addition to manufacturing and selling many vitamin products, Roche is also a buyer and reseller of choline chloride, primarily in the form of premix. Premix is a blend of vitamins sold as a separate product. Most animal feed is purchased in the form of premix. Choline is a component in 25% of Roche animal feed premix and therefore affects the level at which Roche sets its premix **[**30]** prices. PJC P 63.

Plaintiffs' theorizes that Roche helped coordinate the effort to raise choline prices because higher choline prices helped Roche justify higher premix prices to their customers. Additionally, Plaintiffs assert **[*10]** that Roche was able to "marginalize" other premix competitors by "charging higher prices and limiting access to key vitamins." Pls.' Slide Ex. at 34. Plaintiffs attempt to establish, at times without direct evidence of meetings between these two co-conspirators and Defendants, that the "dominant positions" of BASF and Roche gave each the incentive to control several markets. This theory holds that the higher the price of choline, the more "reasonable" the prices of other vitamins look to BASF and Roche's customers. See, e.g., Pls.' Slide Ex. at 19.

4. The Choline Conspiracy

For purposes of the instant motion, Defendants do not contest liability with respect to a choline chloride conspiracy. Each Defendants' formal acceptance of responsibility for the choline conspiracy varies as follows:

> *UCB:* UCB has ***not*** pleaded guilty.
>
> *DuCoa:* DuCoa has pleaded guilty to price fixing and customer and market allocation in the choline **[**31]** industry. [17] **[**32]**

---

[14] Other evidence is cited for the proposition that "BASF served as Roche's proxy for choline chloride." Pls.' Slide Ex. at 31, 53, 54.

[15] This document is a BASF memorandum memorializing an August 12, 1993 meeting between BASF and Roche. The purpose of the meeting was to "find out whether there [was] a possibility of … cooperation [between BASF and Roche] with [choline chloride]."

[16] The Commission found certain companies, including BASF and Roche, to have illegally fixed prices and allocated shares in the markets for vitamins A, E, B1, B2, B5, B6, C, D3, H, Folic Acid, beta carotene and carotinoids. See, e.g., ECF at 10 (chart showing "infringers" and their participation in illegal schemes in relevant vitamin markets).

[17] Plea Agreement of DuCoa, L.P. (September 30, 2002) *available at* http://www.usdoc.gov/atr.cases/f200300/200380.htm. In the Plea Agreement, DuCoa agreed to the following statement:

Employees Lindell Hilling, John "Pete" Fischer and Antonio Felix have pleaded guilty to price fixing and customer and market allocation in the choline industry. [18]

Bioproducts: Bioproducts has ***not*** pleaded guilty. [19]

Employee John Kennedy pleaded guilty to engaging in price-fixing while employed at Bioproducts/Nutrius. [20] **[**33]**

[*11] *Chinook:* Chinook has pleaded guilty to engaging in price-fixing and market allocation of the North American market for choline chloride. [21]

Employees Russell Cosburn, John Kennedy, and Robert Samuelson have also pleaded guilty to engaging in illegal price fixing while employed by Chinook. [22]

…The information will charge the defendant with participating in a conspiracy to suppress and eliminate competition by fixing the price of, allocating customers for, and allocating the volume of the choline chloride manufactured by the defendant and its co-conspirators and sold by them in the United States and elsewhere, beginning at least as early as January 1988 and continuing until at least September 29, 1998, in violation of the Sherman Antitrust Act, *15 U.S.C. § 1*.

DuCoa also provided information to the European Commission regarding its role in the following agreements:

- the worldwide market for choline chloride was to be shared among the participants

- the North American producers were to withdraw from Europe and vice versa; sales volumes and market shares were to be stabilized;

- the activities of converters and distributors were to be controlled by cutting their supplies and/or forcing them out of business;

- prices for each grade or form of the product were to be increased worldwide according to an agreed schedule;

- regular meetings were to be held and commercial information was to be exchanged in order to monitor the implementation of the above agreement.

DUCOA SUPP 000869.

[18] PJC P40; Plea Agreements of Lindell Hilling (Mar. 2, 1999), John L. "Pete" Fischer (Mar. 2, 1999), Antonio Felix (Mar. 2, 1999). In their Plea Agreements, Hilling, Fischer, and Felix all agree to the following statement:

> …The information will charge the defendant with participating in a conspiracy to suppress and eliminate competition by fixing the price and allocating customers for, and the volume of the choline chloride sold in the United States and elsewhere, beginning at least as early as January 1988 and continuing until at least September 29, 1998, in violation of the Sherman Antitrust Act, *15 U.S.C. § 1*.

Hilling Plea at 2; Fischer Plea at 2; Felix Plea at 2.

[19] Although it has not pleaded guilty in any forum, Bioproducts obtained immunity from prosecution in the United States for its role in the vitamins conspiracy by cooperating with the United States Department of Justice investigation into the industry. PJC P38.

[20] PJC P38. Mr. Kennedy was the former choline business manager at Bioproducts. Id. Mr. Kennedy also worked at Chinook as vice-president for marketing sales. In his plea agreement, Mr. Kennedy admits that during the time period from January 1988 through at least September 29, 1998, during which time Kennedy worked at Bioproducts and subsequently at Chinook, he "participated in a conspiracy with representatives from other vitamin manufacturers, the primary purpose of which was to fix the price, allocate customers, and allocate the volume of choline chloride sold in the United States and elsewhere." Tr. of Guilty Plea of John Kennedy before N.D. Tex. (Aug. 16, 1999).

[21] PJC at P36; Chinook Plea Agreement (Sept. 29, 1999).

[22] PJC at P36; Cosburn Agreed Statement of Facts (Fed. Ct. Canada) (Sept. 21, 1999); Kennedy Plea Agreement (Mar. 2, 1999); Samuelson Plea Agreement (Mar. 2, 1999).

Additionally, there is evidence in the record of UCB's participation in the choline conspiracy. For example, in BASF's Agreed Statement of Facts to the Department of Justice in Canada, BASF states that it met in 1992 with senior representatives from Akzo Nobel, UCB, Bioproducts, Chinook, and DuCoa in Mexico City. In that meeting, the parties "discussed, but did not agree on, a market allocation arrangement and the desirability of a price increase for choline chloride." BASF Agreed Statement of Facts (Fed. Ct. Canada) (Sept. 17, 1999).

The above facts indicating the Defendants' positions with respect to admissions on a choline conspiracy are recited merely for foundational purposes. The instant motion focuses solely on whether an all-vitamins conspiracy existed from the viewpoint of each Defendant.

II. DISCUSSION

The Summary Judgment Standard [23]

[34]** *1. Matsushita and the Antitrust Standard*

HN1[] Summary judgment shall be entered "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact …." *Fed. R. Civ. P. 56(c)*). When analyzing this evidence, the Court must view the underlying facts in the light most favorable to the party opposing the motion for summary judgment. See e.g. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, **[*12]** 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*, *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, *United States v. Diebold, Inc., 369 U.S. 654, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962)*. At issue in this case is whether Plaintiffs' claim that Defendants participated in an all-vitamins antitrust conspiracy can survive summary judgment. The Matsushita line of cases addresses the summary judgment standard relating to conspiracy allegations in the civil antitrust context, and controls in the instant case. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986).* **[**35]** [24]

Based on an analysis of *Fed. R. Civ. P. 56(c)*) and *56(e)*, the Court held in Matsushita that ***HN2***[] in order to survive summary judgment, litigants "must establish that there is a genuine issue of material fact as to whether [Defendants] entered into **[**36]** an illegal conspiracy that caused [Plaintiffs] to suffer a cognizable injury." *Matsushita, 475 U.S. at 585-86*. The Court further explained this analysis stating:

---

[23] The parties attempted in their briefs to diverge from the central Celotex/Matsushita line, which is the primary analysis here. The Court has considered these arguments and finds them unpersuasive.

Plaintiffs cite to criminal cases (*United States v. Tarantino, 269 U.S. App. D.C. 398, 846 F.2d 1384 (D.C. Cir. 1998)*; *United States v. Poindexter, 725 F. Supp. 13 (D.D.C. 1989)*; *United States v. Kanchanalak, 37 F. Supp. 2d 1 (D.D.C. 1999))*; criminal antitrust cases (*United States v. Yonkers Contracting Co., 706 F. Supp. 296 (S.D.N.Y. 1989)*; *United States v. American Honda Motor Co., 273 F. Supp. 810 (N.D. Ill.)*); and a civil antitrust case (*In re Copper Antitrust Litig., 98 F. Supp. 2d 1039 (W.D. Wis. 2000))* to support their contention that a single or multiple conspiracy issue is always a question of fact for the jury.

The single civil case that Plaintiffs point to for support, In re Copper Antitrust Litig., is distinguishable in that the court was considering a motion to dismiss for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. *Id. at 1042*. The standard of review under a *Rule 12(b)(6)* motion, that the plaintiff must provide only "a short and plain statement of the claim showing that the pleader is entitled to relief," is substantially different from the standard of review for summary judgment. *Id. at 1047*.

[24] In Matsushita, respondents Zenith Corporation and National Union Electric Corporation sued Matsushita and 20 other Japanese manufacturers and distributers of consumer electronic parts for antitrust violations under *§§ 1and 2* of the Sherman Act, as well as other antitrust provisions. Respondents alleged that the Japanese manufacturers conspired to fix and maintain high prices for television sets sold in Japan while simultaneously conspiring to fix and maintain low prices for television sets exported to the United States. The sets exported were allegedly sold at substantial losses for the defendants. *Matsushita, 475 U.S. at 577-78*.

> This showing has two components. First, respondents must show more than a conspiracy in violation of the antitrust laws; they must show an injury to them resulting from the illegal conduct.
> ....
>
> Second, the issue of fact must be "genuine" .... In the language of [Fed. R. Civ. Pro. 56(e)], the nonmoving party must come forward with "specific facts showing there is a "*genuine issue for trial.*"
> ....
> It follows then from these settled principles that if the factual context renders respondents' claim implausible - if the claim is one that simply makes no economic sense - respondents must come forward with more persuasive evidence to support their claim than would otherwise be necessary.

Matsushita, 475 U.S. at 585-87 (citations omitted) (emphasis in original).

The Court in Matsushita clarified that **HN3**[] in the face of economic factors dictating that the nonmoving party's theory is irrational, that party must submit evidence to establish that the **[**37]** theory remains practical and genuine despite economic evidence to the contrary. Citing Monsanto Co. v. Spray-Rite Serv. Corp., the Matsushita Court reiterated that the limits ***antitrust law*** places on the range of permissible inferences from ambiguous evidence dictate that "conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id. at 588* (citing *465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984))*. The importance of the nonmovant asserting a theory that makes "economic sense" is further explained by the Court:

> **HN4**[] The absence of any plausible motive to engage in the conduct charged is highly relevant to whether a "genuine issue for trial" exists within the meaning of Rule **[*13]** *56(e)*. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if petitioners had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.

Id. at 596-97 **[**38]** .

2. Economic Plausibility

The defense argues that Plaintiffs' economic theory is implausible, and the evidence presented indicates procompetitive, rather than anticompetitive, conduct. Defendants further submit that the Monsanto case bars Plaintiffs from an inference of antitrust behavior because there are two reasonable interpretations of the evidence, and Plaintiffs interpretation of the evidence is supported by an economic theory that is irrational like the theory presented in Matsushita. See, e.g., Hr'g Tr. at 121-23; *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. The reason that there are competing inferences, Defendants argue, is that the so-called "co-conspirators" had legitimate business relationships with the choline Defendants as either buyers or sellers of certain products. Hr'g Tr. at 121-23. Defendants contend that all of the evidence proffered by Plaintiffs in response to their motions is consistent with procompetitive conduct. For example, Defendants argue that Roche's position as a buyer of choline renders every communication with the choline Defendants legitimate.

In response to Defendants **[**39]** references to the implausible economic theory rejected by the Matsushita Court, Plaintiffs argue their all-vitamins conspiracy theory stands on solid ground:

> Many vitamin purchasers - and plaintiffs in this litigation - bought a broad range of different vitamins. Because many customers purchased a panoply of vitamins, defendants needed to avoid the appearance of vigorous price competition on one vitamin vis-a-vis any other vitamin. As defendants frequently recognized, price trends on one vitamin product could affect prices for other vitamin products and especially that deterioration of pricing on one vitamin could spread to other vitamins. Thus, the success of the overall vitamins conspiracy depended on the participation by each member of the conspiracy, including those who sold only a single vitamin.

PJO at 37.

The question is whether communications among Defendants regarding the vitamin markets are justified as procompetitive behavior or are consistent with collusive activity. Judge Posner, writing for the three judge panel in In re High Fructose Corn Syrup, suggested that Matsushita permitted a sliding scale approach in antitrust cases, stating: "more **[**40]** evidence is required the less plausible the charge of collusive conduct." *In re High Fructose Corn Syrup Antitrust Litig. 295 F.3d 651, 661 (7th Cir. 2002).* [25] **[**41]** Judge Posner **[*14]** further explained in cases where there is no proof of defendant admissions as to a price fixing conspiracy, evidence "from which the existence of such an agreement can be inferred" may be presented to defeat summary judgment. *Id. at 654*. This point was further explained when Judge Posner warned of certain "traps" courts should avoid when ruling on motions for summary judgment. He explains that a court should not fall into the trap of assuming that:

> if no single item of evidence presented by the plaintiff points unequivocally to conspiracy, the evidence as a whole cannot defeat summary judgment. It is true that zero plus zero equals zero. But evidence can be susceptible of different interpretations, only one of which supports the party sponsoring it, without being wholly devoid of probative value for that party. [26]

Id. at 656.

One certainty that can be drawn in this case is that various Defendants' alleged conduct is without question dissimilar to the conduct at issue in Matsushita. In Matsushita, the defendants' conduct had tangible, procompetitive effects: each defendant was lowering the price of their product in the U.S. market. *Matsushita, 475 U.S. at 577*. When prices are lowered, other competitors are forced to compete and consumers win. The rationale behind the Supreme Court's decision in Matsushita is to protect market players who exhibit this type of unquestionably **[**42]** procompetetive behavior that leads to consumer-friendly results in the overall marketplace.

If Roche discusses choline production with a choline producer, that discussion is one of many routine business transactions that occurs world-wide in virtually every market on a daily basis. Although the inference of collusion may be unclear, as Defendants suggest, it is just as unclear that any *procompetitive* effects result from such behavior. Furthermore, the inference against procompetitive effects in these situations is significantly stronger in light of the concession made by some defendants that a choline chloride conspiracy took place. The Court recognizes that Roche is also a legitimate purchaser of choline chloride and has the right to talk to its sellers as a legitimate purchaser. As explained in High Fructose, however, the evidence as a whole - i.e., the backdrop of widespread, admitted, illegitimate behavior - cannot be ignored. Defendants position that discussions between admitted conspirators *must* be evidence of procompetitive behavior simply is not convincing.

In looking at the entire factual context to determine whether the reasonable inferences that Plaintiffs **[**43]** seek could have a competing inference of independent action, as is required by *Matsushita, 475 U.S. at 587-88*, the Court finds that the Plaintiffs' inference of conspiracy is, in general, entirely plausible. Furthermore, ***HN5***[] as the Supreme Court explained in Eastman Kodak Co. v. Image Technical Serv., Inc., "The Court's requirement in *Matsushita* that the plaintiffs' claims make economic sense did not introduce a special **[*15]** burden on plaintiffs facing summary judgment in antitrust cases ... *Matsushita* demands only that the nonmoving party's inferences be

---

[25] In the High Fructose Corn Syrup case, the plaintiff class of direct purchasers brought suit against the principal manufacturers of high fructose corn syrup ("HFCS"). *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651 (7th Cir. 2002)*. The plaintiffs claimed that in 1988, the defendants secretly agreed to raise prices of differently graded HFCS products. These artificial price increases allegedly continued until approximately mid-1995. *Id. at 653-54*. Judge Posner, writing for the three judge panel, held that although there was no proof of defendant admissions as to a price fixing conspiracy, evidence "from which the existence of such an agreement can be inferred" could be presented to defeat summary judgment. *Id. at 654*. Judge Posner suggested that Matsushita permitted a sliding scale approach: "more evidence is required the less plausible the charge of collusive conduct." *Id. at 661*.

[26] The other two traps Judge Posner warned against include "weighing conflicting evidence (the job of the jury)" and "failing to distinguish between the existence of a conspiracy and its efficacy ... An agreement to fix list prices [even where actual sales were made below those list prices] is ... a per se violation of the *Sherman Act* even if most or for that matter all transactions occur at lower prices. *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 656 (7th Cir. 2002)*.

reasonable in order to reach the jury, a requirement that was not invented, but merely articulated in that decision." *504 U.S. 451, 468, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

The Alleged "All-Vitamins" Conspiracy

Both Plaintiffs and Defendants use essentially ***HN6***[] the same elements to define what constitutes a conspiracy: [27] (1) Defendants must have had knowledge of an "all-vitamins" conspiracy, (2) Defendants must have intended to join the "all-vitamins" conspiracy, and (3) by joining the "all-vitamins" conspiracy, Defendants were interdependent upon one another in **[**44]** that their respective benefit depended on the success of the "all-vitamins" venture. E.g. *United States v. Tarantino, 269 U.S. App. D.C. 398, 846 F.2d 1384, 1392 (D.C. Cir. 1988)*.

[45]** *1. Knowledge*

HN7[] In order to establish the requisite knowledge of the conspiracy, Plaintiffs must prove that each Defendant was united in a common unlawful goal or purpose, or knew of the conspiracy's general scope and purpose. *Tarantino, 846 F.2d at 1392* ("A single conspiracy may be established when each conspirator knows of the existence of the larger conspiracy and the necessity for other participants, even if he is ignorant of their precise identities."). [28] **[**46]** The parties are in agreement on this issue. [29]

HN8[] Although Plaintiffs must show that each Defendant had knowledge of an agreement as to the overall conspiracy, they need not show (1) evidence of a formal agreement, or (2) knowledge, on behalf of the Defendant, of every detail of the alleged conspiracy. *United States v. Nusraty, 867 F.2d 759, 763 (2d Cir. 1989)* **[*16]** ("the 'government's proof of an agreement' does not require evidence of a formal or express agreement; it is enough that the parties have a tacit understanding **[**47]** to carry out the prohibited conduct.") (citations omitted)); *Mylan Lab., Inc. v. Akzo, N.V., 770 F. Supp. 1053, 1066 (D. Md. 1991)* ("[plaintiff] need not show that each alleged conspirator had knowledge of all of the details of the conspiracy" (citations omitted)).

---

[27] Compare the headings in the Plaintiffs' brief:

> A. A Defendant Joined the General Vitamins Conspiracy if [1] It Knew That Vitamins Other Than Those It Sold Were Involved and [2] That Its Own Benefits Depended on the Success of the Larger Venture.
>
> F. Defendants' Intent to Join the Common Goal Can Be Inferred from the Evidence of Knowledge and Interdependence

PJO at 26, 47.

> with the elements proscribed in the Defendants' brief:
>
> To meet their burden of showing the Moving Defendants participated in an all-vitamins conspiracy, plaintiffs must demonstrate, defendant by defendant, that: (i) each Moving Defendant had knowledge of such a purported all-vitamins conspiracy; (ii) each Moving Defendant intended to join the purported all-vitamins conspiracy; and (iii) there was interdependence among the defendants alleged to have participated in the purported conspiracy.

Defs.' Mem. at 9.

[28] The Court agrees with Defendant's statement, "The substantive legal standards for determining the existence and scope of a conspiracy are the same in the civil and criminal contexts." Defs.' Mem. at 10, n.6. Judge Posner, writing for the court in Jones v. City of Chicago, held in a *section 1983* tort claim that "the requirements for establishing participation in a conspiracy are the same … as in a case (criminal or civil) in which conspiracy is a substantive wrong." *856 F.2d 985, 992 (7th Cir. 1988)* (citing *Hartford Accident & Indem. Co. v. Sullivan, 846 F.2d 377, 383 (7th Cir 1988))*.

[29] Compare PJO at 27 ("If plaintiff can show a single plan, goal or purpose on the part of defendants, it can establish a single conspiracy." (citing *In re Copper Antitrust Litigation, 98 F. Supp.2d 1039, 1054*; *United States v. Daily, 921 F.2d 994, 1007 (10th Cir. 1990)))*; with Defs.' Mem. at 11-12 ("A defendant need not be aware of every detail of the alleged conspiracy to be found liable, but it must at least know the object and general scope of the conspiracy." (citing *Mylan Lab., Inc. v. Akzo, N.V., 770 F. Supp. 1053, 1066-67 (D. Md. 1991)))*.

Additionally, *HN9*[] although Plaintiffs must establish a common goal, it is not necessary to provide direct evidence of the conspiracy. See *United States v. Consol. Packaging Corp., 575 F.2d 117, 126 (7th Cir. 1978)* (holding that direct evidence is not needed to prove a conspiracy, rather "a common purpose and plan may be inferred from a 'development and a collocation of circumstances") (citing *Glasser v. United States, 315 U.S. 60, 80, 86 L. Ed. 680, 62 S. Ct. 457 (1942))*. Cf. *Continental Ore Co. v. Union Carbide and Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)* (noting that parties should be given the full benefit of their evidence without the Court "compartmentalizing the various factual components and wiping the slate clean after scrutiny of each").

2. Intent to Join

HN10[] **[**48]** Knowledge alone is not sufficient to prove that any particular Defendant intended to join the all-vitamins conspiracy. *United States v. Townsend, 924 F.2d 1385, 1391 (7th Cir. 1991)* (mere knowledge not enough to "tie the conspiracy together"); *United States v. Simms, 508 F. Supp. 1188, 1198 (W.D. La. 1980)* (mere knowledge of object or purpose, "without the intention and agreement to cooperate" not sufficient). Cf. *United States v. Saro, 306 U.S. App. D.C. 277, 24 F.3d 283, 288 (D.C. Cir. 1994)* (defendant "not accountable" where co-conspirators actions are merely foreseeable).

Although "mere knowledge of another similarly motivated conspiracy or an overlap in personnel do not prove one overall agreement," there may be an intent to join an overall, conspiracy if the "common purpose of a single enterprise .... motivates each participant and each act." *United States v. Snider, 720 F.2d 985, 988 (8th Cir. 1983)*. The Supreme Court has explained that a party progresses from mere knowledge of an endeavor to intent to join it when there is "informed and interested cooperation, stimulation, instigation. And there is also **[**49]** a 'stake in the venture' which, even if it may not be essential, is not irrelevant to the question of conspiracy.". *Direct Sales Co. v. United States, 319 U.S. 703, 713, 87 L. Ed. 1674, 63 S. Ct. 1265 (1943)*. The intent that must be shown in a conspiracy case is the intent to advance the unlawful purpose of the conspiracy. *United States v. Haldeman, 181 U.S. App. D.C. 254, 559 F.2d 31, 112 (D.C. Cir. 1976)*.

3. Interdependence

In this case, Defendants argue that "[Plaintiffs must show that] each individual vitamin producer needed to have the prices of many vitamins fixed to benefit from anticompetitive conduct in its vitamin market" and if there is no such showing, "a fact finder could not legitimately conclude that a single conspiracy existed." Defs.' Mem. at 20. "Thus, plaintiffs must show, for example, that price fixing activities in Vitamin B5 were somehow necessary for manufacturers of choline chloride to successfully raise prices." Defs.' Mem. at 21.

This Circuit has recognized a more relaxed standard. *HN11*[] "Fairly minimal" evidence is needed in order to establish interdependency between various branches of a common conspiracy. *United States v. Gatling, 321 U.S. App. D.C. 63, 96 F.3d 1511, 1522 (D.C. Cir. 1996)* **[**50]** **[*17]** (finding interdependence between various participants in conspiracy to commit bribery based on minimal factors such as an overlap in participation and timing); *United States v. Graham, 317 U.S. App. D.C. 418, 83 F.3d 1466, 1471-72 (D.C. Cir. 1996)* (finding interdependence between members of competing drug cliques who assisted each other on occasion, even though the assistance was not significant to the success of each clique). *United States v. Mathis, 342 U.S. App. D.C. 127, 216 F.3d 18, 24 (D.C. Cir. 2000)* ("Fairly minimal' evidence may establish interdependency").

The All-Vitamins Conspiracy Evidence

1. The Choline Conspiracy

a. The North American Market

Chinook and other North American co-conspirators admit that they began fixing prices, allocating customers, and allocating the volume of choline chloride sold in Canada, the United States, and elsewhere around January 1988.

Chinook Plea Agreement (Sept. 29, 1999); Hilling Plea Agreement (Mar. 2, 1999); Felix Plea Agreement (Mar. 2, 1999); Fischer Plea Agreement (Mar. 2, 1999). The North American choline producers' conspiracy agreement ran at least until September **[**51]** 1998. Id.

Russell Cosburn testified that around 1988 he met with representatives from companies including Bioproducts, DuCoa, and DuPont at DuPont's offices in Wilmington, Delaware. PJC P 358 (citing Cosburn Dep. at 54). Cosburn stated that the meeting was called and chaired by Dr. Earnest Porta on behalf of DuPont. Porta indicated to the group that the European choline producers "knew how to market and sell products better than the participants they had sort of industry connections amongst themselves." Cosburn Dep. at 53-54. Porta suggested that the meeting attendees (i.e., the North American choline producers) "should start doing the same things in North America." Id. Porta proposed that the North American producers should "decide how [they] could keep price stability in the market" by, for example, "divid[ing] up customers, or … stay[ing] firm on prices." Id. at 56.

In early 1988, DuCoa, Bioproducts and Chinook agreed to raise prices of choline. Cosburn indicated that the agreement to do so was carried out as follows:

> … We would increase the choline prices by three-quarters of a cent or a cent or whatever was decided by whose turn it was to raise prices **[**52]** … so that [for example] if DuCoa announced an increase of one cent a pound on choline chloride on such and such a date, across the board … then Chinook would come out and say, "We are going to adopt the new price list published by," et cetera, and then Bioproducts would do it, and this would go on and on.

Cosburn Dep. at 62-63. The price increases were published in trade publications such as the industry trade journal, Feedstuffs. Id.

b. The European Market

The evidence indicates that the European producers began fixing prices and allocating market shares of choline chloride as early as 1983. See, e.g., UCB Answers to Interrogs. (Dec. 7, 2001). UCB submissions to the European Commission indicate meetings among the European producers to fix prices and allocate markets in Europe. See, e.g., UCBSA-017937 (meeting between UCB, BASF and Akzo Nobel re: "guid[ing] prices, supply to a certain number of clients in Germany, Belgium, France, and The Netherlands"). [30]

[53]** **[*18]** Russell Cosburn testified in his deposition that by around January 1988, it was "fairly common knowledge" in the choline industry that the Europeans were engaged in cartel activity. Cosburn Dep. at 54. Specifically, the European producers "probably got together and managed the industry in one way or another." Id. Management of the industry included the choline chloride market. Id.

c. The Europeans vs. the North Americans: Conspiracies Threatened

The North Americans and Europeans were successfully controlling their respective markets by the early 1990s. Cooperation across the two markets did not arise until players from each side entered, or threatened to enter, the other's market. Price competition from overseas would have destabilized or destroyed the separate conspiracies in each market. PJC at P 355.

For example, around 1990, Chinook, the North American producer located in Canada, began to "aggressively" expand their choline sales into Europe, which "upset" the European producers. Cosbum Dep. at 98-99; Hooghe Dep. at 295. Mr. Leopold Hooghe, a UCB employee, testified that around 1990, he met with Chinook representative Russell Cosburn at a bar in the **[**54]** Brussels, Belgium airport. Hooghe Dep. at 299-300. Hooghe testified that:

> [Cosburn] became a bit talkative and [began] telling me that [Chinook was] to become the biggest [choline producer] all over the world … because [Chinook] had the best quality and the best product and the lowest

[30] While BASF admitted to conspiratorial activity in North America, BASF only acknowledged that "sporadic efforts" were made among the three European producers of choline to "reach agreements regarding European markets and prices" but that "no effective agreement was ever reached or implemented" regarding choline chloride. BASF AG 0033446.

> price … [Cosburn said that Chinook would] just start in Belgium, but one country after another [Chinook would] take and … within a couple of years, there will be left only one name in choline chloride and that will be Chinook.
> … [Cosburn] told me that [Chinook was] happy and they could always undercut [UCB]. There wouldn't be a problem even if they had to sell at very low prices.

Id. At that same meeting at the Brussels airport, Mr. Hooghe also became aware that American choline producers (i.e., Bioproducts and DuCoa) had "agreements" among themselves to control market prices: "So in that same informal meeting, Russ Cosburn made very clear to me that there were agreements between the American producers." Id.

Cosburn testified that only "a few months" after Chinook started selling in Europe, he received a phone call from Dr. Walter Kohler of BASF. Cosburn **[**55]** Dep. at 98. Kohler indicated "that [the European producers] had noticed Chinook had become very active in the Far East … and the most disturbing thing to him was that [Chinook was] now putting product into Europe." Id. at 99. Kohler wanted to know what Chinook's objectives and intentions were in the choline markets. Id.

The Europeans retaliated. In 1992, a BASF subsidiary in Mexico entered into a contract to supply choline in the United States. In response, Bioproducts, Chinook and DuCoa called a meeting with BASF to "complain about [BASF's] pricing and to suggest setting limit prices in the U.S." BASF AG 0033443.

In early 1992, Leopold Hooghe from UCB traveled to North America for separate meetings with DuCoa and Chinook. **[*19]** Hooghe Dep. at 293. Hooghe told the North American producers that UCB was interested in selling choline in the United States. The statement was a bluff, intended to force the North Americans to "reconsider the way they started behaving in selling … in Europe one or two years before." Id. at 294. Hooghe told Chinook about the sham strategy, then told Bioproducts and DuCoa a day and two days later in part to confirm "there were [illegal] **[**56]** contacts" among those producers. Id. at 301-02.

d. The North Americans and Europeans Meet

The greater choline conspiracy involving both the North Americans and Europeans began at least in 1992, at approximately the same time both sides began penetrating each other's markets. PJC PP 343-44. It is through this interaction to coordinate conspiracies that Plaintiffs allege the North American Defendants became aware of the all-vitamins conspiracy.

In a call Walter Kohler made to Russell Cosburn of Chinook, Kohler suggested that Cosburn meet with representatives from UCB and Akzo Nobel, the two other European choline producers. Cosburn Dep. at pp. 104-05. Kohler even provided names for Cosburn to contact. Id. Cosburn followed up with meetings with representatives from both companies. Id.

The first meeting between all the major parties was in Mexico around October 1992. Hooghe Dep. at pp. 290-91. There, UCB met with BASF, Akzo Nobel, Bioproducts, Chinook and DuCoa. Both sides talked about exiting the other's markets. Kennedy Dep. at 419. BASF then took the lead and proposed that the parties stop arguing about territory and settle on "world capacities for choline." **[**57]** Id. at 420. The parties agreed to meet again in Germany. Id. at 426.

The following month, the parties gathered at Ludwisghaven, Germany. In Ludwigshafen, an agreement was made whereby the North American suppliers would withdraw from Europe and the Europeans would withdraw from the United States. Id. at 447. The parties also discussed "target prices" which the parties agreed to charge customers. Id. at 448-450. From November 1992 through April 1994, the parties met on a number of occasions to reaffirm their agreement by exchanging data regarding market shares, sales and overall progress. PJC at PP 367-68

2. The All-Vitamins Conspiracy Evidence Against Each Party

HN12[] The Court must view the evidence from the standpoint of each Defendant to determine liability in a conspiracy case. *United States v. United States Gypsum Co., 438 U.S. 422, 463, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)* ("Liability [can] only be predicated on the knowing involvement of each defendant, considered individually, in the conspiracy charged.")

a. UCB

Although UCB contests liability for the choline conspiracy, there is evidence that UCB participated in the price fixing and **[**58]** allocation of the choline market. For example, the evidence indicates that UCB attended the Mexico City meeting in 1992 where senior representatives from BASF, Akzo Nobel, Bioproducts, Chinook, and DuCoa discussed choline market allocation. See, e.g., BASF Agreed Statement of Facts (Fed. Ct. Canada) (Sept. 17, 1999).

The main document Plaintiffs offered to link UCB to the all-vitamins conspiracy is the internal memorandum from Christopher Tarmu to Guy Van Den Bossche, both UCB employees, detailing Tarmu's meeting with John Hobbs from Roche. **[*20]** UCBSA 018056-018057. The relevant portion of the memo reads, "I learned some interesting information about competition and the price information which is given below was taken directly off John Hobbs' computer screen which he turned round for me to read!!" Id. (emphasis in original).

The document indicates that Tarmu was meeting with Hobbs, "who is Purchasing Director at Roche Products," in order to "sort out the ongoing problem about this first trial bulk delivery." Id. Looking at the document in its entirety, the statement quoted above has a much more innocuous meaning. In addition, there is evidence in the record **[**59]** that Tarmu frequently met with Hobbs in order to discuss legitimate sales. See, e.g., UCBSA013971-013972. Further, Tarmu writes,

> One of the problems with Roche is the transparency of their purchasing information around Europe. John Hobbs is a smart man, and he only revealed the UCB Leuna information to me after we had quite a hard negotiation in which I was attempting to justify no weakening of the current price offered of £ 520/tonne.
>
> John Hobbs has accepted this further trial order, but I quite understand his point against the background of the above information, when he says that if UCB wishes to have business every month …., then there has to be further negotiation on prices.

UCBSA-018057. The Plaintiffs' theory that Roche is coordinating the price-fixing of choline through its buyer position is not supported here. Rather, it is contradicted. Roche is conducting negotiations with UCB. The implication to be drawn is that Roche is willing to deal with UCB, but only if their price can be negotiated. Plaintiffs cannot be entitled to the inference of an all-vitamins conspiracy from this document that so plainly speaks in competitive terms.

The Plaintiffs also attempt **[**60]** to establish UCB's liability on the all-vitamins conspiracy through its seller/buyer relationship with Roche and Rhone-Poulenc:

> Like the other choline producers … UCB had a close relationship with non-choline producer and Vitamins Inc. ringleader Roche. In addition to these arrangements with Roche, UCB sold choline to Rhone Poulenc, another key member of Vitamins Inc. UCB also sold choline to Degussa, another member of Vitamins Inc. that did not produce choline. Through these relationships with companies involved in other aspects of the conspiracy, UCB knew the full scope and implication of Vitamins Inc. In addition, it even adopted the conspiracy's terminology calling the choline component the "club." And UCB followed the same model that was used throughout the conspiracy in setting prices and adhering to market allocation.

PJC at *1918 OK 751, 71 Okla. 286, 177 P 376*. This "relationship" evidence, even viewed in the light most favorable to Plaintiffs, does not indicate even an inference of UCB's knowledge of or participation in an all-vitamins conspiracy.

The Plaintiffs have provided no evidence that can satisfy even a very low burden of establishing that **[**61]** UCB at least knew of and possibly participated in an all-vitamins conspiracy.

b. DuCoa

One of the most damaging documents indicating DuCoa's participation in the alleged all-vitamins conspiracy is a fax from Takeda to DuCoa regarding a February 9, 1993 meeting between the two companies. DUCOA 060806. The fax lists "Overall market review" as one of the topics on the proposed agenda. Id. The next line on the fax proposes that the choline **[*21]** chloride market be next on the agenda, broken down between the world market and the Asia/Japan market. Id.

Although the term "Overall market review" is not defined, the Court can infer that this phrase relates to vitamins other than choline for two reasons. First, discussion of the Choline Chloride market is listed as a separate agenda item. Second, because Takeda neither manufactures, sells nor purchases choline chloride, [31] it is hard to believe that discussion of "Overall market review," which is to be lead by Takeda, will discuss Choline Chloride. Although there is no evidence that this meeting actually took place, that issue is immaterial to the Court's analysis. At a minimum, this document indicates that these two parties **[**62]** had discussions regarding vitamins other than choline.

The Court is not bound to examine this document in a vacuum. See, e.g., *Continental Ore Co. v. Union Carbide and Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)* ("The character and effect of a conspiracy are not to be judged by dismembering it and viewing its separate parts, but only by looking at it as a whole." (citations omitted)). In light of the factual background that Takeda was found to have participated illegally in five different cartels (specifically, vitamins B1, B2, B6, Folic Acid, and C); [32] **[**63]** and DuCoa has pleaded guilty to price-fixing and customer and market allocation in the choline industry, [33] there is a higher probability that this document supports a finding of illegal activity on behalf of DuCoa.

A similar document sent by Rhone-Poulenc to DuCoa shows substantially the same conduct. In an April 1, 1997 fax from Rhone-Poulenc to DuCoa, Rhone-Poulenc lays out a planned agenda for meetings between the two parties on April 28, 1998 and April 29, 1998. DUCOA087581-DUCOA087583. On the top of the list of topics to be covered at the meeting states the following: "First and Foremost is this is an opportunity for open sharing of plans and directions for both companies to complement each others objectives and goals in the long term." DUCOA-087582. These are two competitors meeting about "sharing plans" and "complementing" their businesses - not the types of discussions that should take place between competitors.

Also included in the topics to be covered during the meeting **[**64]** were "DuCoa's plans for vitamin premixes" and "How can RPAN support [DuCoa's] efforts"; a review of DuCoa's operations, products, and services; "DuCoa's perception of how the livestock market will evolve in the next 5 years;" comments DuCoa has "regarding **[*22]** key players in the market"; and a request for comments on DuCoa's competitors of choline, premixes and distribution, Roche, BASF, Novus, Degussa, and the National feed companies." Id. In exchange, the agenda called for Rhone-Poulenc to "share their perspective in several of the [same areas]." Id. Rhone-Poulenc was also to cover an "update on the global vitamin market (demand and pricing) with a focus on vitamin E." DUCOA-087583.

These two documents establish that there is a genuine issue of fact as to whether DuCoa had knowledge of an all-vitamins conspiracy. Additionally, this documents show there is enough evidence to create a factual issue as to

---

[31] There is no indication in the record that Takeda manufactured, sold or bought choline chloride. See, e.g., PJC at PP 17-20.

[32] See, e.g., Mem. of Points and Authorities Supp. Takeda's Mot. Partial Summ. J. Dismissing Pls.' All-Vitamins Conspiracy Claim, Any Claim That Takeda Participated in Any Conspiracies Involving Vitamins That It Did Not Manufacture, and Any Claim That Takeda Participated in Any Conspiracies Extending Beyond 1995, at 7 (citing Comm'n of the European Communities, Comm'n Decision of November 21, 2001 relating to a proceeding pursuant to Article 81 of the EC Treaty and Article 53 of the EEA Agreement, at 10(a)).

This document is not part of the record of the instant motions, but was submitted in conjunction with all dispositive motions. It is cited here solely for use of the information conveyed.

[33] "Three individuals employed by DuCoa have pleaded guilty to price-fixing and customer and market allocation in the choline industry: Lindell Hilling, Pete Fischer, and Antonio Felix." PJC at 19 P40 (citing Plea Agreements of Lindell Hilling (Mar. 2, 1999), John L. "Pete" Fischer (Mar. 2, 1999) and Antonio Felix (Mar. 2, 1999)).

whether DuCoa manifested an intent to join, and interdependence on, the all-vitamins conspiracy. Summary judgment in DuCoa's favor is therefore not justified.

c. Bioproducts

Bioproducts asserts it did not manufacture or sell any vitamin other than choline and **[**65]** premix, or any of the raw materials used in the manufacture of other vitamins, during the conspiracy periods alleged by Plaintiffs. Bioproducts Mem. at 2. Bioproducts also points out that it has never been tried for, convicted of, or pleaded guilty to any criminal offense in the United States. Id. at 4. Nevertheless, John Kennedy, a former Bioproducts employee who later was employed by Chinook, pleaded guilty to charges relating to his involvement in a choline chloride conspiracy and served time in prison. Id. at 10.

On June 27, 1991, Kennedy, who was working for Bioproducts at the time, had a meeting with Dietz Kaminski and Peter Haag of BASF. Among the notes taken during that meeting, Kennedy drew out a rough organizational chart of the BASF Fine Chemical Division. BIO 019731. Kennedy, Kaminski and Haag discussed BASF's general sales figures and research costs. BIO 019732. Kaminski and Haag broke down for Kennedy the total market for vitamin feed among the four main world competitors: BASF, Roche, Rhone-Poulenc, and Takeda. Kaminski and Haag also gave company-specific sales volumes for vitamins A, E, B2, C, and Calpan. BIO 019733.

In his narrative notes of the same meeting, **[**66]** Kennedy mentioned discussions about "acceptable margins" for the "vitamin businesses." BIO 019734. Kennedy reported, "[BASF] obviously [is] trying to push vitamin and choline prices up to achieve acceptable profitability." Id. Kennedy thought this information was so productive that he proposed "Bioproducts should make the effort to meet with [BASF] no less than annually for both vitamin and choline world perspectives." Id. This document provides a clear indication that Bioproducts was aware of the vitamins conspiracies in general. Bioproducts wanted to update itself frequently on the progress of the conspiracies in each market, likely in order to track parallel progress of the conspiratorial successes or failures outside their market.

Furthermore, Kennedy had been aware of the interrelationship of the conspiratorial agreements. In the choline meeting set up in Ludwigshaven shortly after the Mexico meeting, Kennedy had commented (in the context of choline-specific agreements) that "everything was interrelated, that it didn't make sense to agree on one thing if [the producers] could not agree on the other things." Hooghe Dep. at 386.

This evidence fulfills Plaintiffs **[**67]** burden to demonstrate that there exists a genuine issue as to Bioproducts knowledge of the all-vitamins conspiracy. Furthermore, the evidence establishes that whether Bioproducts possessed an intent to join and interdependence on the all-vitamins conspiracy **[*23]** are issues that should be presented to a jury.

d. Chinook

Evidence connecting Chinook to the alleged all-vitamins conspiracy is seen through the deposition testimony of Chinook employee, Russell Cosburn. Cosburn testified that around January 1988, he met with representatives from companies including Bioproducts, DuCoa, and DuPont at DuPont's offices in Wilmington, Delaware. Cosburn Dep. at 52-53. At that meeting, Dr. Porta of DuPont referred to European "cartel type business" in the vitamin markets. Id. at 53-53. It was suggested that North American producers should adopt these cartel type business practices. Id. at 56. During the last couple months of 1988, a second meeting was held in which North American Choline producers, including Chinook, agreed to fix the prices of choline chloride. Id. at 62-63.

Cosburn also testified that during a trip to Europe that included a meeting with Dr. Walter Kohler **[**68]** of BASF, he learned that Europeans had a cartel related to vitamins other than choline. Cosburn Dep. at 104-106. Cosburn testified, "On more than one occasion there was [sic] vitamin cartels referred to … ." Id. This evidence establishes that Cosburn, acting on behalf of Chinook and with the consent of his boss Peter Copland, [34] had knowledge of a conspiracy other than the choline conspiracy.

There is evidence that Chinook, through Cosburn, actively participated in the choline price-fixing conspiracy. Furthermore, Chinook employees knew there were conspiracies involving vitamins other than choline. When the evidence supporting these two facts is woven together and viewed in the light most favorable to the plaintiffs, it establishes a genuine issue as to whether Chinook **[**69]** knew of, intended to join, and was interdependent on the all-vitamins conspiracy.

III. CONCLUSION

Under the Matsushita analysis, the conspiratorial actions engaged in by Defendants do not indicate a reasonable presumption of procompetitive conduct. Therefore, Plaintiffs are entitled to the benefit of the jury determining inferences rather than the Court doing so at the summary judgment stage. Where the evidence is insufficient to allow a reasonable inference of participation in the alleged all-vitamins conspiracy, however, Plaintiffs' case must fail. The Court has evaluated Plaintiffs' claims from the standpoint of each individual Defendant. The elements of conspiracy doctrine are minimally satisfied by the evidence presented with respect to DuCoa, Bioproducts and Chinook.

For the reasons set forth above, Defendants DuCoa, Bioproducts and Chinook's Motions for Summary Judgment are denied; Defendant UCB's Motion for Summary Judgment is granted. An appropriate order will accompany this Memorandum Opinion.

HN1[] Class Actions, Certification of Classes

It is well-settled in the Eleventh Circuit that prior to the certification of a class, and before undertaking any of the analysis under *Fed. R. Civ. P. 23*, the district court must determine that at least one named class representative has U.S. Const. art. III standing to raise each class claim. Indeed, only after the court determines the issues for which the named plaintiffs have standing should it address the question whether the named plaintiffs have representative capacity, as defined by *Fed. R. Civ. P. 23(a)*, to assert the rights of others.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN2[] Justiciability, Standing

Under the principles of standing, a plaintiff must allege and show that he personally suffered injury. To meet the requirement for standing under U.S. Const. art. III, a plaintiff must establish either that the asserted injury was in fact the consequence of the defendant's action or that the prospective relief will remove the harm. Thus, to satisfy this requirement, the court must determine that the class representative is part of the class and possesses the same interest and suffered the same injury as the class members. Ordinarily, it is not sufficient that a named plaintiff can establish a case or controversy between himself and the defendant by virtue of having standing as to one of many claims he wishes to assert. Rather, each claim must be analyzed separately, and a claim cannot be asserted on behalf of a class unless at least one named plaintiff has suffered the injury that gives rise to that claim.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN3[] Justiciability, Standing

With respect to standing requirements in general, the required showing depends on the stage of the litigation at which the standing issue is being decided.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] Standards of Review, Abuse of Discretion

Once a court has considered whether the named class representatives have standing to assert claims on behalf of the class, the analysis shifts to the requirements of *Fed. R. Civ. P. 23*. The burden of proof to establish the propriety of class certification rests with the advocate of the class. As the Eleventh Circuit instructs, the district court retains broad discretion in determining whether an action should be certified as a class action, and its decision, based upon the particular facts of the case, should not be overturned absent a showing of abuse of discretion. Assuming that the district court properly exercised its discretion within the parameters of the criteria of *Rule 23*, the court's determination should stand. Nonetheless, the court must conduct a rigorous analysis into whether the prerequisites of *Rule 23* are met before certifying a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN5[] Class Actions, Certification of Classes

A class action may be maintained only when it satisfies all of the requirements of *Fed. R. Civ. P. 23(a)* and at least one of the alternative requirements of *Rule 23(b)*. Pursuant to *Rule 23(a)*, a class may be certified only if: (1) the class is so numerous that joinder of all members would be impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*. These four prerequisites of *Rule 23(a)* are commonly referred to as numerosity, commonality, typicality, and adequacy of representation, and they are designed to limit class claims to those fairly encompassed by the named plaintiffs' individual claims.

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN6[] Parties, Joinder of Parties

Fed. R. Civ. P. 23(a)(1) requires that the class be so numerous that joinder of all members is impracticable.

Civil Procedure > ... > Class Actions > Class Members > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN7[] **Class Actions, Class Members**

To meet the numerosity requirement, plaintiffs need not establish the exact size of the proposed class or identify all of the class members, but rather must demonstrate that the number is sufficiently large so as to make joinder impracticable. Impracticability, however, does not mean impossibility. The numerosity requirement is met when it would be inconvenient or difficult to join all of the class members, and may be satisfied with as few as 25-30 class members. While the size of the class is a highly relevant consideration, courts must take into account a number of other factors under *Fed. R. Civ. P. 23(a)(1)*, including the geographic diversity of the class members, the nature of the action, the size of each plaintiff's claim, judicial economy and the inconvenience of trying individual lawsuits, and the ability of the individual class members to institute individual lawsuits.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN8[] **Class Actions, Certification of Classes**

Under *Fed. R. Civ. P. 23(a)(2)*, class certification requires a showing that there are questions of law or fact common to the class. The threshold finding for commonality under this section is qualitative rather than quantitative. Consequently, *Rule 23(a)(2)* does not require that all the questions of law and fact raised by the dispute be common. Instead, courts in the Eleventh Circuit have held that a single common question is sufficient to satisfy *Rule 23(a)(2)*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

Where a complaint alleges that the defendants have engaged in a standardized course of conduct that affects all class members, the commonality requirement will generally be met. Specifically in the antitrust context, courts in the Eleventh Circuit have consistently held that allegations of price-fixing, monopolization, and conspiracy by their very nature involve common questions of law or fact.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN10[] Class Actions, Certification of Classes

Under the third prerequisite for class certification, a court must assess whether the claims or defenses of the named representatives are typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. A sufficient nexus is established if the claims or defenses of the class and the class representative arise from the same event or pattern or practice and are based on the same legal theory. If the party advancing the class can establish that the same unlawful conduct was directed at or affected both the class representatives and the class itself, then the typicality requirement is usually met irrespective of varying fact patterns which underlie the individual claims. Any atypicality or conflict between the named plaintiffs' claims and those of the class must be clear and must be such that the interests of the class are placed in significant jeopardy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN11[] Class Actions, Prerequisites for Class Action

The main principle behind typicality is that the plaintiff will advance the interests of the class members by advancing her or his own self-interest. The alignment of interest is not the test for typicality. It is the result. The plaintiffs and class members have similar interests because they have similar claims. The plaintiff whose claim is typical will ordinarily establish the defendants' liability to the entire class by proving his or her individual claim.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN12[] Class Members, Named Members

Typicality refers to the nature of the claims of the representative, not the individual characteristics of the plaintiff. Indeed, there is nothing in *Fed. R. Civ. P. 23(a)(3)* which requires named plaintiffs to be clones of each other or clones of other class members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN13[] Class Actions, Prerequisites for Class Action

Fed. R. Civ. P. 23(a)(4) requires that the representative party in a class action must adequately protect the interests of those he purports to represent. As interpreted by the United States Supreme Court and by the United States Court of Appeals for the Eleventh Circuit, this requirement applies to both the named plaintiffs and to the class counsel. Because all members of the class are bound by the res judicata effect of the judgment, a principal factor in determining the appropriateness of class certification is the forthrightness and vigor with which the representative party can be expected to assert and defend the interests of the members of the class. This analysis encompasses two separate inquiries: (1) whether any substantial conflicts of interest exist between the representatives and the class; and (2) whether the representatives will adequately prosecute the action.

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN14[] **Class Actions, Appellate Review**

The United States Court of Appeals for the Eleventh Circuit Court of Appeals has held that if substantial conflicts of interest are determined to exist among a class, class certification is inappropriate. However, the existence of minor conflicts alone will not defeat a party's claim to class certification; the conflict must be a fundamental one going to the specific issues in controversy. A fundamental conflict exists where some party members claim to have been harmed by the same conduct that benefited other members of the class. In such a situation, the named representatives cannot vigorously prosecute the interests of the class through qualified counsel because their interests are actually or potentially antagonistic to, or in conflict with, the interests and objectives of other class members.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN15[] **Class Actions, Certification of Classes**

The burden of establishing that class certification is appropriate rests with the advocate of the class. While this is a correct statement of the law in the Eleventh Circuit, class certification cannot be defeated merely because defendants assert unsupported allegations of conflict between potential class members. When defendants come forward with an alleged conflict, the court must scrutinize the record citations defendants cite to determine whether such evidence establishes the existence of a conflict, or whether it provides a basis for the court to imply that a realistic possibility of antagonism exists. If the evidence provided by the defendants is deemed to be inaccurate or unreliable the plaintiffs may yet meet their burden of proof necessary to maintain a class action under *Fed. R. Civ. P. 23(a)(4)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN16[] **Class Actions, Certification of Classes**

In addition to satisfying the four requirements of *Fed. R. Civ. P. 23(a)*, plaintiffs must meet one of the alternative requirements set forth in *Rule 23(b)*. Class certification under *Rule 23(b)(3)*, imposes two additional requirements: (1) that questions of law or fact common to the members of the class predominate over any questions affecting only individual members; and (2) that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. *Fed. R. Civ. P. 23(b)(3)*. In conducting this analysis, the court must scrutinize the evidence plaintiffs propose to use in proving their claims without unnecessarily reaching the merits of the underlying claims.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN17[] Prerequisites for Class Action, Commonality

That common questions of law or fact predominate over individualized questions means that the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole, must predominate over those issues that are subject only to individualized proof. The predominance inquiry focuses on the legal or factual questions that qualify each class member's case as a genuine controversy, and is far more demanding than *Fed. R. Civ. P. 23(a)*'s commonality requirement. Nonetheless, common questions need only predominate; they need not be dispositive of the litigation.

Civil Procedure > ... > Class Actions > Class Members > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN18[] Class Actions, Class Members

As part of the predominance analysis, courts must examine the causes of action asserted in the complaint on behalf of the putative class. Whether an issue predominates can only be determined after considering what value the resolution of the class-wide issue will have in each class member's underlying cause of action. The predominance inquiry trains on the legal or factual questions that qualify each class member's case as a genuine controversy. Therefore, when there exists generalized evidence which proves or disproves an element on a simultaneous, class-wide basis, since such proof obviates the need to examine each class member's individual position, the predominance test will be met.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] Class Actions, Prerequisites for Class Action

In determining whether *Fed. R. Civ. P. 23(b)(3)* is satisfied, a court must consider how plaintiffs intend to prove: (1) liability on each of their claims; (2) the fact of injury; (3) the quantum of injury, namely the amount of their damages; and (4) whether the evidence is common to the class or unique to the individual class members. In so doing, the court must not consider the merits of the plaintiffs' claims, but rather must consider whether each element is susceptible to proof by generalized evidence. A *Rule 23* determination is wholly procedural and has nothing to do with whether a plaintiff will ultimately prevail.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN20[] **Private Actions, Remedies**

In general, a federal or state claim based upon a theory of antitrust conspiracy raises three ultimate issues to be proven at trial: (1) the existence of a contract, combination or conspiracy in restraint of trade (liability); (2) injury-in-fact (antitrust injury); and (3) the extent of injury (damages).

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN21[] **Price Fixing & Restraints of Trade, Horizontal Market Allocation**

Courts repeatedly have held that the existence of a conspiracy is the predominant issue in price fixing cases, warranting certification of the class even where significant individual issues are present. This holding is equally applicable to market allocation cases.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN22[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Whether proceeding under federal or state ***antitrust law***, claims of monopolization are generally proven by demonstrating: (1) possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance or use of that power by anti-competitive or exclusionary means.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN23[] **Monopolies & Monopolization, Actual Monopolization**

The first element of a monopolization claim -- monopoly power -- is the power to control market prices or exclude competition. The material consideration in determining whether a monopoly exists is not that prices are raised and that competition actually is excluded, but that power exists to raise prices or to exclude competition when it is desired to do so. In determining whether a defendant has market power, a court must assess whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN24[] **Private Actions, Remedies**

In an overcharge case, impact is shown through proof that: (1) defendants charged more than they would have but-for their antitrust violation; and (2) class members made some purchases at the illegally inflated or stabilized price. Courts in the Eleventh Circuit have recognized that a presumption of impact properly arises in such cases where the defendants have market power and are alleged to have conspired with competing manufacturers.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > General Overview

HN25[] Types of Contracts, Quasi Contracts

A person who has been unjustly enriched at the expense of another is required to make restitution to the other. A person is enriched if he has received a benefit. A person is unjustly enriched if the retention of the benefit would be unjust. Finally, a person confers a benefit upon another if he gives to the other possession of or some interest in money, land, chattels, or chooses in action, performs services beneficial to or at the request of the other, satisfies a debt or a duty of the other, or in any way adds to the other's security or advantage. Taken together, these set forth a four-part test for claims of unjust enrichment: (1) the unjust; (2) retention of; (3) a benefit received; (4) at the expense of another.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > General Overview

HN26[] Types of Contracts, Quasi Contracts

Courts have recognized that state claims of unjust enrichment are universally recognized causes of action that are materially the same throughout the United States.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN27[] Purchasers, Indirect Purchasers

Antitrust plaintiffs have a limited burden with respect to showing that individual damages issues do not predominate. Plaintiffs do not need to supply a precise damage formula at the certification stage of an antitrust action. Instead, in assessing whether to certify a class, the court's inquiry is limited to whether or not the proposed methods are so insubstantial as to amount to no method at all. At the class certification stage, therefore, plaintiffs need only come forward with plausible statistical or economic methodologies to demonstrate impact on a class-wide basis.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN28[] **Class Actions, Prerequisites for Class Action**

Fed. R. Civ. P. 23(b)(3) requires that a court determine that the class action device is superior to other available methods for the fair and efficient adjudication of these controversies. Factors to be considered as part of this analysis include: (1) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (3) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (4) the difficulties likely to be encountered in the management of a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

HN29[] **Class Actions, Prerequisites for Class Action**

The class action device is particularly appropriate where it is necessary to permit the plaintiffs to pool claims which would be uneconomical to litigate individually.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > ... > Class Actions > Class Attorneys > Appointments

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Attorneys > General Overview

HN30[] **Prerequisites for Class Action, Adequacy of Representation**

A court, in making the appointment of class counsel, must consider: (1) the work counsel has done in identifying or investigating potential claims in the action; (2) counsel's experience in handling class actions, other complex litigation, and claims of the type asserted in this action; (3) counsel's knowledge of the applicable law; and (4) the resources counsel will commit to representing the class. Fed. R. Civ. P. 23(g)(1)(C)(i). The court may also consider any other matter pertinent to counsel's ability to fairly and adequately represent the interests of the class and may, if it deems it necessary, direct the proposed class counsel to provide information on any subject pertinent to the appointment. Fed. R. Civ. P. 23(g)(1)(C)(ii)-(iii).

Opinion

[*675] ORDER GRANTING INDIRECT PURCHASER PLAINTIFFS' MOTIONS FOR CLASS CERTIFICATION OF STATE-WIDE CLASSES

THIS CAUSE is before the Court upon the Indirect Purchaser Plaintiffs' ("IPPs") Motions for Class Certification of a State-Wide Class of End-Payers in: Alabama [DE-453], California [DE-452], the District of Columbia [DE-451], Florida [DE-450], Illinois [DE-464], Kansas [DE-463], Maine [DE-462], Michigan [DE-461], Minnesota [DE-460], Mississippi [DE-459], Nevada [DE-458], New Jersey [DE-457], New Mexico [DE-455], New York [DE-456], North Carolina [DE-454], North Dakota [DE-465], South Dakota [DE-466], West Virginia [DE-467], and Wisconsin [DE-468]. Upon review of the Motions and supporting memoranda, the Defendants' joint opposition, Indirect **[**5]** Purchaser Plaintiffs' Reply, the parties' supplemental briefings, and oral argument, the Court will GRANT the Indirect Purchasers' Motions for Class Certification of a State-Wide Class of End Payers with the exception of the Motion for Class Certification in the District of Columbia [DE-451], which is DENIED, and the Motion for Class Certification in New Jersey [DE-457], which is DENIED AS MOOT. [1]

I. Factual Background

This case arises from Indirect Purchaser Plaintiffs' assertion of antitrust **[**6]** injury and unjust enrichment in nineteen states, based on the allegedly anti-competitive conduct of Defendants Abbott Laboratories ("Abbott"), Geneva Pharmaceuticals, Inc. ("Geneva"), and Zenith Goldline Pharmaceuticals, Inc. ("Zenith") [2]. Since 1987. Abbott has been **[*676]** exclusively manufacturing and marketing the chemical compound terazosin hydrochloride under the brand name "Hytrin," a drug used for the treatment of hypertension and enlarged prostate. Both Geneva and Zenith are generic drug manufacturers that developed generic versions of Hytrin for sale in the United States. Indirect Purchaser Plaintiffs assert that two 1998 agreements, one between Abbott and Geneva and another between Abbott and Zenith, violated the laws of the various states and resulted in delayed domestic competition for the sale of terazosin hydrochloride. Indirect Purchaser Plaintiffs further allege that Abbott unlawfully extended its monopoly power over the market for terazosin hydrochloride by misusing its Hytrin patents, ignoring certain regulations issued by the Food and Drug Administration ("FDA"), and engaging in baseless patent litigation against Geneva and Zenith. The relevant facts of the case, which **[**7]** firmly situate this case in the complex intersection of antitrust and patent law, are as follows:

A. The Regulatory Framework and Abbott's Patent Litigation

Under federal law, FDA approval is required before a company may begin selling a new drug in interstate commerce in the United States. [3] Applications for FDA approval can be filed as either new drug applications ("NDA") or abbreviated new drug applications ("ANDA"). If FDA approval is granted pursuant to an NDA, the drug manufacturer is issued a new patent which allows the patent owner to exclude others from making, using, or selling the drug in the United States for the duration of the patent. **[**8]** Upon approval by the FDA, information regarding any claimed patents are listed in a publication known as the Orange Book.

As a patent nears expiration, generic manufacturers often seek to market the generic version of brand name drugs that the FDA previously approved as an NDA. In that case, the Drug Price Competition and Patent Term

---

[1] On September 11, 2002, this Court issued an Order Granting In Part and Denying In Part Defendants' Motion to Dismiss Certain State Counts of the Indirect Purchaser Plaintiffs' Third Amended Coordinated Complaint [DE-873]. In that Order, this Court dismissed with prejudice the claims of the New Jersey indirect purchasers. *Id.* at p.7. Accordingly, the motion to certify a class of indirect purchasers in New Jersey, which was filed a year before the Court's dismissal of their claims, must be denied as moot.

[2] Zenith, now known as Ivax Pharmaceuticals, Inc., entered into a settlement with Indirect Purchaser Plaintiffs in 2002. The Settlement Agreement was preliminarily approved by this Court on August 23, 2002 [DE-858]. Following a fairness hearing, the Court finally approved the settlement and entered final judgment as to Ivax on December 19, 2002 [DE-913].

[3] The regulatory framework governing FDA approval for drugs, and the significance of the patent system, is more thoroughly explained in the Eleventh Circuit Court of Appeals' decision in *Valley Drug Co. v. Geneva Pharms., 344 F.3d 1294, 1296-1300 (11th Cir. 2003)*.

Restoration Act of 1984, 21 U.S.C. § 355 ("the Hatch-Waxman Act") permits the generic drug manufacturers to seek expedited FDA approval by filing an ANDA pursuant to 21 U.S.C. § 355(j). While the NDA applicant must submit safety and efficacy studies for every proposed new drug, ANDA applicants may rely on the safety and efficacy data already **[**9]** filed with the FDA by the manufacturer of the equivalent brand name drug.

After a generic applicant has submitted its ANDA to the FDA, it must file a patent certification with respect to each patent claiming the listed drug (or a method of using the listed drug) of which the applicant is aware. In so doing, the applicant must certify that: (1) the patent information has not been filed with the FDA; (2) the underlying patent is expired; (3) the patent will expire, identifying the expiration date; or (4) the patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug. If the applicant certifies either that the patent information has not been filed or that the patent is expired, the FDA approval of the ANDA can proceed immediately. If the patent has not yet expired, the ANDA will not be approved until after the expiration date of the relevant patent. However, if the certification falls into the fourth category (known as a "paragraph IV certification"), the applicant must notify the patent holder, who then has the statutory right to bring suit for patent infringement, which will automatically delay approval of the ANDA for a period of thirty months.

Abbott **[**10]** holds a number of patents permitting it to manufacture and market drugs containing the chemical compound terazosin hydrochloride. Specifically, between 1977 and 1996, the United States Patent and Trademark Office ("the PTO") issued Abbott seven different patents covering various terazosin formulations. According to Indirect Purchaser Plaintiffs, prior to March 1995, only three of Abbott's relating to Hytrin had been submitted to the FDA for **[*677]** listing in the Orange Book. Indirect Purchaser Plaintiffs contend that Abbott's other claimed patents are invalid "add-on" patents. Add-on patents, as Indirect Purchaser Plaintiffs explain, are those that are improperly obtained and listed in the Orange Book with expiration dates long after the expiration date of the patent for the active ingredient. The purpose of listing such an "add-on" patent on the eve of an anticipated ANDA application, as Indirect Purchaser Plaintiffs' allege Abbott did, is to be able to initiate a patent infringement suit against the ANDA applicant and to trigger the automatic thirty-month stay under the Hatch-Waxman Act. It can, therefore, be used as a blockade by the brandname drug manufacturer to delay generic competition.

[11]** Because of Hytrin's success in the pharmaceutical market, [4] in the early 1990s, several generic drug makers including Geneva and Zenith began taking steps to develop generic versions of Hytrin that contained the same active chemical components but different inactive ingredients. For instance, between 1993 and 1996, Geneva filed four ANDAs based on Abbott's NDA for Hytrin, each time making paragraph IV certifications. In September 1994, Abbott exercised its statutory right to sue Geneva for patent infringement and initiated several actions against Geneva in the United States District Court for the Northern District of Illinois. The ensuing litigation, as alleged by Indirect Purchaser Plaintiffs, delayed Geneva's efforts to market its own generic drug for an indefinite period of time pending resolution of the parties' ongoing patent disputes. Abbott also instituted legal actions against Zenith in 1994 and 1995, after it learned that Zenith had filed an ANDA for a terazosin hydrochloride drug. Therefore, from 1994 onwards, Abbott found itself involved in concurrent disputes with both Geneva and Zenith, as well as other generic manufacturers, over the validity of its Hytrin patents while **[**12]** Geneva and Zenith competed with each other to bring the first generic terazosin hydrochloride drug to market.

B. The Abbott-Zenith and Abbott-Geneva Agreements

In late March and early April 1998, Abbott entered into separate confidential settlement agreements with Zenith and Geneva, its two fiercest potential competitors, to resolve the ongoing patent litigation. Under the Abbott-Zenith agreement, entered into on March 31, 1998, Zenith agreed to accept $ 3 million to join Abbott in dismissing the pending actions between the two parties, as well as an additional $ 6 million per quarter to "not sell, offer for sale, donate, or otherwise commercially distribute in the United States any Terazosin **[**13]** Hydrochloride Product."

---

[4] Hytrin proved to be a highly profitable drug for Abbott, generating $ 481 million in sales for Abbott in 1998 alone. This figure constituted approximately 20% of Abbott's net sales of pharmaceutical products that year, and made Hytrin the 33rd best selling prescription drug in the United States by dollar volume.

Zenith also obtained Abbott's permission to market such products once generic competition began. Similarly, pursuant to the April 1, 1998 Abbott-Geneva agreement, Geneva agreed to accept Abbott's payment of $ 4.5 million per month to refrain from selling any generic terazosin hydrochloride drug, including a terazosin capsule for which Geneva had obtained FDA approval in March 1998, until the earlier of: (1) the date on which another drug maker sold a generic version of Hytrin in the United States; or (2) the date on which Geneva received a final, unappealable judgment that its proposed generic tablet did not infringe Abbott's patents.

As a result of these agreements, Abbott exclusively sold the only terazosin hydrochloride drug available in the United States until August 1999. The Abbott-Zenith and Abbott-Geneva agreements terminated on August 13, 1999, in response to a Federal Trade Commission investigation of the agreements which resulted in a consent settlement. On August 13, 1999, Geneva began to market its terazosin capsules, the first generic terazosin hydrochloride drug in the United States. Other generics, such as Mylan's terazosin capsule introduced **[**14]** in February 2000, soon followed. While Abbott raised its average wholesale price for Hytrin capsules by 11.8% in the nine months following Geneva's entry into the market, Geneva's capsules were sold **[*678]** at a price approximately 46% lower than Hytrin. Further generic penetration into the market caused the generic average wholesale price to drop even further to less than 16% of Abbott's Hytrin price by April 2000.

II. The Indirect Purchaser Plaintiffs' Class Certification Motions

As asserted in their Fourth Amended Complaint, Indirect Purchaser Plaintiffs seek damages from Defendants based on antitrust [5] and unjust enrichment theories. Specifically, Indirect Purchaser Plaintiffs allege that the Abbott-Zenith and Abbott-Geneva agreements evidence a conspiracy to restrain trade in violation of the various state statutes. [6] Indirect Purchaser Plaintiffs also allege that Abbott's conduct in filing "add-on" patents, pursuing frivolous patent litigation, and entering into anti-competitive agreements with their primary generic competitors delayed generic entry in the market, and served to extend Abbott's monopoly over the domestic market for terazosin hydrochloride. Finally, Indirect **[**15]** Purchaser Plaintiffs contend that the delayed generic entry into the market resulted in Defendants being unjustly enriched, in that: (a) Abbott derived excess profits from the overcharges that Hytrin purchasers paid during the period of generic foreclosure; and (b) Geneva was paid substantial amounts to delay marketing its generic terazosin capsule under the Abbott-Geneva agreement of April 1998.

[16]** On September 4, 2001, Indirect Purchaser Plaintiffs moved for certification of nineteen statewide classes of "end-payers" in Alabama, the District of Columbia, California, Florida, Illinois, Kansas, Maine, Michigan, Minnesota, Mississippi, Nevada, New Jersey, New Mexico, New York, North Carolina, North Dakota, South Dakota, West Virginia, and Wisconsin [DE-450 through 468]. Indirect Purchaser Plaintiffs define "end -payers" as those consumers and third-party payers [7] who bore the economic risk for purchases of terazosin. Invoking the interest of judicial economy, Indirect Purchaser Plaintiffs have moved to certify the following class:

---

[5] Under United States Supreme Court precedent, indirect purchasers do not have standing to seek damages under the federal ***antitrust law*** *See* *Hanover Shoe v United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*; *see also* *Illinois Brick Co v Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*. However, in the instant case, each proposed indirect purchaser state class is proceeding under an *Illinois Brick* repealer statute, or under unfair trade practices legislation.

[6] As will be addressed in section III.C.I below, the various state statutes under which Indirect Purchaser Plaintiffs are proceeding require the same elements for claims of monopolization and restraint of trade as the federal antitrust laws.

[7] Third-party payers, sometimes referred to here as TPPs, can be further categorized into: (1) traditional insurers, such as proposed class representatives Cobalt, Blue Cross Blue Shield of Michigan, and Blue Cross/Blue Shield of Alabama, and (2) self-funded employer health benefit plans ("SFPs") that act as insurers for their own employees.

> All persons and entities who or which have at any time from October 15, 1995 to June 30, 2002 [8] **[**18]** paid all or part of the purchase price of Hytrin or its AB-rated generic bioequivalents other than for resale, in [state] or via mail for residents of [state]. Excluded from the Class are the Defendants, their officers and directors, their direct and indirect parent and subsidiary corporations and their officers and directors; government entities; entities that purchased Hytrin and its generic bioequivalents for resale, to the extent of such **[**17]** purchases for resale; direct purchasers of Hytrin and its generic bioequivalents from Defendants, to the extent of such direct purchases; and indirect purchasers who **[*679]** suffered no economic injury as a result of Defendants' allegedly unlawful conduct. [9]

See IPPs' Response to Defs.' Submission Regarding Alternative Indirect Purchaser Class Definitions, filed on March 2, 2004 [DE-1085] at p. 2. As Indirect Purchaser Plaintiffs bear the burden of satisfying the requirements for a class action under *Fed. R. Civ. P. 23*, *see* *Gilchrist v. Bolger, 733 F.2d 1551, 1556 (11th Cir. 1984)*, the Court will address those provisions in turn.

III. Discussion

A. Standing

HN1[] It is well-settled in the Eleventh Circuit that prior to the certification of a class, and before undertaking any of the analysis under *Rule 23*, the district court must determine that at least one named class representative has Article III standing to raise each class claim. *Wolf Prado-Steiman v. Bush, 221 F.3d 1266, 1279 (11th Cir. 2000)*; *see also* *Griffin v. Dugger, 823 F.2d 1476, 1482 (11th Cir. 1987)* ("Any analysis of class certification must begin with the issue of standing."). Indeed, "only after the court determines the issues for which the named plaintiffs have standing should it address the question whether the named plaintiffs have representative capacity, as defined **[**19]** by *Rule 23(a)*, to assert the rights of others." *Griffin, 823 F.2d at 1482*.

HN2[] Under the principles of standing, "a plaintiff must allege and show that he personally suffered injury." *Id. (see* *Payne v. Travenol Lab., Inc., 565 F.2d 895, 898 (5th Cir.)* ("To meet the requirement for standing under Article III, a plaintiff must establish either that the asserted injury was in fact the consequence of the defendant's action or that the prospective relief will remove the harm.") (citation omitted), *cert. denied, 439 U.S. 835, 58 L. Ed. 2d 131, 99 S. Ct. 118 (1979)*). Thus, to satisfy this requirement, the Court must determine that the class representative is "part of the class and possess[es] the same interest and suffered the same injury as the class members." *Prado-Steiman, 221 F.3d at 1279* (citing *Gen. Tel. Co. of Southwest v. Falcon, 457 U.S. 147, 156, 72 L. Ed. 2d 740, 102 S. Ct. 2364 (1982))*. Ordinarily, it is not sufficient that a named plaintiff can establish a case or controversy between himself and the defendant by virtue of having standing as to one of many claims he wishes to assert. Rather, "each claim must be analyzed separately, **[**20]** and a claim cannot be asserted on behalf of a class unless at least one

---

[8] The Court notes that this proposed class definition represents a slight modification of the original definition suggested by the Indirect Purchaser Plaintiffs. Specifically, the current proposal provides a June 30, 2002 end date for the class period. When asked about the significance of this date at the March 12, 2004 oral argument. Indirect Purchaser Plaintiffs responded that it does not have any particular significance, but that it represents a reasonable ending date for the class period. While some residual damages may have continued to accrue after that date, Indirect Purchaser Plaintiffs believe that prices had stabilized by then. Defendants have not asserted any particular opposition to the June 30, 2002 date.

[9] The clear exclusion of "indirect purchasers who suffered no economic injury as a result of Defendants' allegedly unlawful conduct" also represents a modification of the original class definition. As will be more fully discussed below, this exclusion eliminates some of the potential conflicts that may arise in the context of the *Rule 23(a)(4)* analysis.

named plaintiff has suffered the injury that gives rise to that claim." [10] *Prado-Steiman, 221 F.3d at 1280* (citing *Griffin, 823 F.2d at 1483*).

The classes proposed by Indirect Purchaser Plaintiffs include both third-party **[**21]** payers and individual consumers. As will be addressed more fully in connection with the Court's *Rule 23* analysis, Defendants object to the inclusion of both types of purported end-payers in the same class, contending that the claims of insurance companies are atypical of the individual consumers' claims and that antagonistic interests exist between the two groups. *See* Section III.B.4(a). [11] While these arguments were raised as challenges to typicality and adequacy of representation, and not as part of an Article III standing analysis, the Court recognizes that the issues **[*680]** of standing and typicality are closely aligned. *See* *Prado-Steiman, 221 F.3d at 1279* (stating that "it should be obvious that there cannot be adequate typicality between a class and a named representative unless the named representative has individual standing to raise the legal claims of the class"). As discussed in Section III.B.4(a) below, Indirect Purchaser Plaintiffs have demonstrated the requisite nexus between the claims of the third-party payers and the individual consumers, and the Court has concluded that no conflicts exist between the two types of end payers that would preclude class **[**22]** certification. With these principles in mind, the Court assesses each proposed class to determine whether at least one named class representative, whether a third-party payer or an individual consumer, has Article III standing to raise the classes' claims of antitrust violations and unjust enrichment.

1. Named Third-Party Payer Class Representatives

a. Cobalt

As an initial matter, the Court notes that in an Order dated September 11, 2002. this Court concluded that Cobalt (formerly known as United Wisconsin Services, Inc. or "UWSI") had Article III standing to assert the class claims in the states at issue. [DE-873]. Specifically, the Court held that "despite Defendants' arguments to the contrary, UWSI is **[**23]** not limited to pursuing a claim under the laws of Wisconsin only." *Id.* at p. 6. This ruling was made in the context of Defendants' Motion to Dismiss Certain State Counts of the Indirect Purchaser Plaintiffs' Third Amended Coordinated Complaint. However, it is worth noting that ***HN3***[] with respect to standing requirements in general, the required showing depends on the stage of the litigation at which the standing issue is being decided. *See* *Lujan v. Defenders of Wildlife, 504 U.S. 555, 562, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992)*. Because this case has proceeded far beyond the pleading stage, the Court must now look beyond the allegations of the complaint and assess whether record evidence supports a finding that Cobalt has Article III standing. *Id.*

Cobalt purports to be a named class representative in fifteen states California, Florida, Illinois, Kansas, Michigan, Minnesota, Mississippi, Nevada, New Mexico, New York, North Carolina, North Dakota, South Dakota, West Virginia, and Wisconsin. The record evidence reflects that during the class period, Cobalt reimbursed the following number of Hytrin and terazosin prescriptions in each state: 274 in California; 1,518 in Florida; 648 **[**24]** in Illinois; 95 in Kansas; 369 in Minnesota; 28 in Mississippi; 137 in Nevada; 22 in New Mexico; 29 in New York; 342 in North Carolina; 3 in North Dakota; 23 in South Dakota; 47 in West Virginia; [12] and 79,429 in Wisconsin. *See* Defs.' Opp'n,

---

[10] Although the Eleventh Circuit instructs that each claim must be analyzed separately for standing purposes. In this case, the interwoven facts that give rise to both Plaintiffs' antitrust and unjust enrichment claims indicate that any class representative who has Article III standing for one claim will necessarily have standing for the other. *See* IPPs' Mot. at p. 45 ("The same operative facts which form the basis of each of the state Classes' claims based upon antitrust theories form the basis of the Classes' claims for unjust enrichment") Indeed, in then arguments on standing and typicality. Defendants have failed to distinguish between the antitrust and unjust enrichment claims.

[11] Because many of the elements relevant to class certification overlap with one another, the Court will often cross-reference other sections in this Order. For the convenience of the parties, the Court has appended to the end of this Order an index listing the pages on which each subsection begins.

[12] Defendants, in a footnote devoid of any citations, also challenge Cobalt's standing in South Dakota and West Virginia. Specifically, Defendants argue that because those states' monopolization claims test on allegations regarding Abbott's unilateral

at Ex. 44. There is no record evidence reflecting whether Cobalt made any purchases (or reimbursed any purchases) of Hytrin and/or generic terazosin in Michigan.

[25]** Defendants do not dispute that Cobalt, a Wisconsin corporation whose principal place of business is in Wisconsin, may serve as a named class representative in Wisconsin. *See* Defs.' Opp'n. at p. 51; *see also* Compl. at P 13. Defendants do assert, however, that Cobalt lacks standing in any state other than Wisconsin. *Id.* at 50-53. Specifically, applying the "most significant relationship" test, Defendants conclude that any injury suffered by Cobalt occurred in Wisconsin, thereby making Cobalt's claims subject to Wisconsin law. *Id.* In support of this argument, Defendants point out that: (1) Cobalt is a Wisconsin corporation with its principal place of **[*681]** business in Wisconsin; (2) the vast majority of Cobalt's claims are based on transactions that occurred in Wisconsin; and (3) the reimbursements giving rise to Cobalt's claims in the various states are based on transactions that occurred in Wisconsin. *Id.* at p. 51.

While Defendants' claim is premised on the notion that the state of purchase is the state where Cobalt reimburses the claims, Defendants have failed to provide any support for this argument. Indeed, other courts have recognized the propriety of basing class **[**26]** eligibility on the state where the patient resides, as opposed to the state where the pharmacy or insurance company is located. *See generally* *In re Cardizem, 200 F.R.D. 297 (E.D. Mich. 2001)*; *see also* *FTC v. Mylan Labs., Inc. (In re Lorazepam & Clorazepate Antitrust Litig.), 205 F.R.D. 369, 396 (D.D.C. 2002)* (holding that "the plaintiffs' choice to base class eligibility upon the [third-party payer] class members' plan members' states of residence [is] fair and reasonable because it generally comports with the purposes of the states' antitrust laws."). [13] Accordingly, the Court concludes that Cobalt has standing to assert the claims of the class members in California, Florida, Illinois, Kansas, Minnesota, Mississippi, Nevada, New Mexico, North Carolina. North Dakota, South Dakota, West Virginia, and Wisconsin.

[27]** As for Michigan, because Indirect Purchaser Plaintiffs have failed to proffer any evidence establishing that Cobalt reimbursed any claims in that state, Cobalt does not have standing to assert the Michigan class' antitrust and unjust enrichment claims. Cobalt also lacks standing to assert the class claims in New York. As Defendants correctly argued, because the *Donnelly Act*'s *Illinois Brick* repealer was effective on January 1, 1998 and is not retroactive, and because Cobalt's sole pre-1998 reimbursement in New York occurred in 1996, Cobalt is an inadequate class representative in that state. [14] However, as with Michigan, Cobalt's exclusion as a class representative in New York is not fatal to that state's class certification motion, as another appropriate class representative exists. *See* Section III.A.2(g).

[28] b. Blue Cross/Blue Shield of Alabama and of Michigan**

---

conduct between 1995 and 1998, and Cobalt made no purchases in those states during that time period. Cobalt lacks standing either individually or as a representative of the class. *See* Defs.' Opp'n. at p. 51, n. 26. Defendants have failed to provide any support for this argument. As will be discussed in more detail under the typicality requirement, there is no requirement under *Rule 23* that the claims of the named class representatives be identical in substance or scope to those of the class members, either for standing or for typicality purposes. *See* Section III. B. 3 below. Therefore, the mere fact that Cobalt's rembursements were not made during the same time period as the class' allegations does not defeat Cobalt's standing in those states.

[13] In the *Lorazepam & Clorazepate Antitrust Litig* case, the United States District Court for the District of Columbia recognized that basing class eligibility on, for instance, the location of the pharmacy where the prescription is filled or the state where the third-party payer resides, would result in "anomalous situations" in which residents of particular states could benefit from other state's statutes although the legislature of their own states intended for no such protections. *205 F.R.D. at 396-97*.

[14] Although Indirect Purchaser Plaintiffs' did not dispute Defendants' interpretation of the *Donnelly Act*, they did argue that "Defendants' merits-based statute of limitations arguments are improperly raised in this class certification motion." However, the Eleventh Circuit has recognized that "a class representative whose claim is time-barred cannot assert the claim on behalf of the class." *See* *Piazza v Ebsco Indus. Inc, 273 F.3d 1341 (11th Cir. 2001)* (citing *Carter v West Publ'g Co, 225 F.3d 1258, 1267 (11th Cir 2000)* (reversing class certification because the named plaintiff, whose claim was time-barred, lacked standing to assert the claim)). While the Court reaches no ultimate conclusion on the merits of Defendants' statute of limitations argument, it appears, based on the information presently before the Court, that Cobalt's New York claims cannot proceed.

Blue Cross/Blue Shield of Alabama ("Alabama Blue") and Blue Cross/Blue Shield of Michigan ("Michigan Blue") seek to serve as named class representatives in Alabama and Michigan, respectively. [15] **[**29]** Although there is no specific evidence in the record indicating the amount of reimbursements these two third-party payers made in Alabama and Michigan, there is a sufficient basis for this Court to find that they have standing to pursue the claims of the Alabama and Michigan state classes. First, the parties have engaged in extensive discovery regarding Alabama Blue and Michigan Blue, and Defendants have not contested these third-party payers' standing in Alabama and Michigan. Second, Defendants' own expert, Dr. Daniel Rubenfeld, has repeatedly made reference to the data regarding Alabama Blue and Michigan Blue's reimbursements in those states, **[*682]** and has conducted his own regression analyses using such data. *See* Defs.' Opp'n, at Exs. 42-43. Accordingly, there is a sufficient basis for the Court to conclude that these third-party payers have standing to assert their antitrust and unjust enrichment claims. [16]

2. Named Consumer Representatives

a. Alabama

Class representative Willie O'Neal purchased Hytrin and generic terazosin hydrochloride from pharmacies in Alabama during the period of 1997-2001. *See* IPPs' Pre-Argument Submission on Class Certification, Ex. G, Tab 1. Mr. O'Neal paid cash out-of-pocket for all of his prescription drug purchases during that period, and paid a lower price for generic terazosin than for Hytrin. *Id.* Mr. O'Neal testified that he switched to generic terazosin as soon as his pharmacist informed him that a generic had become available. *Id.* at 29, 33. Because Mr. O'Neal paid more for Hytrin during the period of alleged generic foreclosure, and later switched to the generic, he has the same interest and has alleged facts sufficient to indicate that he suffered the same injury as the purported **[**30]** class.

b. California

As to the named consumer class representatives, the record indicates that Victor Scafani and William Mednick both purchased Hytrin and generic terazosin hydrochloride from pharmacies in California during the periods of 1998-2000 and 1996-2002, respectively. See Ex. G, at Tabs 2-3. Mr. Seafani's purchase records indicate that he incurred a $ 15 co-payment for Hytrin, but paid only a $ 10 co-payment for generic terazosin hydrochloride once it became available *Id.* at Tab 2. As for Mr. Mednick, pursuant to the terms of his health insurance benefit plan, his co-payments for purchases of Hytrin ranged from $ 10 to $ 15, while his co-payments for purchases of the generic drug ranged from $ 5 or $ 9 during the relevant period. *Id.* at Tab 3. Both Mr. Scafani and Mr. Mednick, therefore, have the same interest and have alleged facts sufficient to indicate that they suffered the same injury as the purported class.

c. District of Columbia

As to the proposed District of Columbia class, the sole named class representative, Clarence Reid, does not have Article III standing. While Mr. Reid purchased Hytrin during part of the class period, the record does **[**31]** not indicate that he suffered any injury from Defendants' alleged anticompetitive conduct. *See* Ex. G, at Tab 4. Specifically, Mr. Reid's deposition testimony indicates that under his health insurance benefits plan, he initially incurred a $ 15 co-payment for Hytrin prescriptions, which subsequently increased to $ 40 when generic terazosin hydrochloride became available. *Id.* Further, Mr. Reid testified that he never purchased the generic because as of November 1999, shortly after the generic became available, he became asymptomatic and no longer required medication for his prostate. *Id.* at pp. 42-43. There is also no indication that Mr. Reid would have purchased the generic had it been available earlier. [17] **[**32]** Consequently, absent any evidence that he personally suffered an

---

[15] On March 2, 2004, Alabama Blue and Michigan Blue moved the Court for permission to be joined as named class representatives in all of the other proposed state classes [DE-1086]. The Court denied their motion as untimely.

[16] If the record evidence ultimately reveals that Alabama Blue and or Michigan Blue do not have standing to assert these claims, the Court may, under *Fed. R. Civ. P. 23(e)(1)(C)*, amend its Order at any time before final judgment.

injury attributable to delayed generic entry, Mr. Reid does not have standing to assert any of the claims raised by the District of Columbia class. [18] Because Mr. Reid **[*683]** is the only named class representative, his lack of Article III standing is fatal to the purported District of Columbia class' certification motion.

d. Florida

As Indirect Purchaser Plaintiffs conceded at the March 12, 2004 hearing, the named individual representative for the proposed Florida class, Antonio Lopez-Souto, does not have Article III standing. Indeed, in his deposition testimony, Mr. Lopez-Souto admitted that the never gave any thought to substituting generic terazosin hydrochloride for Hytrin. *See* Ex. G, at Tab 5, p. 14. However, because Cobalt does have standing in Florida, the standing requirement is met.

e. Maine

Class representative David Grund purchased Hytrin and generic terazosin from a pharmacy in Maine during **[**33]** the period of 1995-2001. *See* Ex. G, at Tab 6. Pursuant to his health insurance benefits plan, Mr. Grund made co-payments of $ 10, $ 20, or $ 30 during that time period for various pill counts and dosages of terazosin hydrochloride. *Id.* Based on the record evidence, Mr. Grund has standing to assert the claims of the purported class.

f. Michigan

Class representative Martin Bernstein purchased Hytrin and generic terazosin from a pharmacy in Michigan during the period of 1999-2001. *Id.* at Tab 7. Pursuant to his prescription drug benefits coverage, Mr. Bernstein was initially charged a co-pay of $ 3, which subsequently increased to $ 10, for each prescription filled. *Id.* Mr. Bernstein does not recall the specific difference in his co-payment for brand name drugs versus the generic versions, but he does recall that the generic cost him less. *Id.* Typical of the claims of other class members, Mr. Bernstein claims that he was overcharged during the period preceding generic entry into the market. *Id.* at 43. Based on the record evidence, Mr. Bernstein has standing to assert the claims of the purported class.

g. New York

Class representatives Albert J. Meyer **[**34]** and Lloyd Latona both purchased Hytrin and generic terazosin from pharmacies in New York, the former from 1998-2001 and the latter from 1994-2001. Mr. Meyer paid cash for Hytrin until 1998, when his wife changed health insurance coverage. *See* Ex. G, at Tab 8. Under the insurance plan, Mr. Meyer paid a $ 10 co-payment for Hytrin, until he switched to generic terazosin in January 2000 and began paying a $ 5 co-payment. *Id.* at pp. 29-30. Mr. Meyer, therefore, has alleged the same injury as the class, and Indirect Purchaser Plaintiffs have provided evidence that adequately supports his claim for purposes of the standing analysis. As to Mr. Latona, while it is clear that he switched from Hytrin to generic terazosin, Indirect Purchaser Plaintiffs have not provided the Court with any record evidence to indicate that he actually paid less for the generic than he did for the branded Hytrin. Based on the evidence currently before the Court, Mr. Latona, therefore, does not have Article III standing.

h. Wisconsin

---

[17] At the hearing held on March 12, 2004, Indirect Purchaser Plaintiffs' counsel posited that evidence exists to support the conclusion that Mr. Reid *would have* switched to the generic had it been available earlier. However, Indirect Purchaser Plaintiffs' counsel admitted that any claim by Mr. Reid under the antitrust laws is too speculative, thereby conceding that Mr. Reid does not have standing to assert any antitrust violations on behalf of the class.

[18] In conceding that Mr. Reid does not have standing to assert the antitrust violations on behalf of the class. Indirect Purchaser Plaintiffs suggested that Mr. Reid does have standing for unjust enrichment claims. However, Indirect Purchaser Plaintiffs have failed to demonstrate (either in their submissions of at oral argument) how Mr. Reid, who did not pay any overcharge or suffet any economic damage, has standing to raise the claims that Defendants were unjustly enriched with excessive profits.

Class representative Lavera Grosskrueger's husband, Ewald Grosskrueger, was prescribed Hytrin and generic terazosin hydrochloride during the period from 1998-2001. **[**35]** *See* Ex. G, at Tab 10. The Grosskruegers paid cash out-of-pocket for those prescriptions, which were filled via mail order by the American Association of Retired Persons Pharmacy and through two local pharmacies in Wisconsin. *Id.* Because she paid a lower price for the generic than for branded Hytrin, Mrs. Grosskrueger has standing to assert the claims of the Wisconsin class.

3. Standing Analysis Conclusion

Based on the foregoing analysis, the Court finds that for all of the proposed classes, except for the District of Columbia, at least one named plaintiff possesses the same interest and suffered the same alleged injury as the class members. *Prado-Steiman, 221 F.3d at 1279-80*. As to the District of Columbia **[*684]** class, the Court concludes that class certification is inappropriate due to lack of standing. The Court will therefore proceed to the *Rule 23* analysis only as it relates to the remaining seventeen proposed state classes.

B. Standards for Determining Class Certification Under *Fed. R. Civ. P. 23*

HN4[] Once a court has considered whether the named class representatives have standing to assert claims on behalf **[**36]** of the class, the analysis shifts to the requirements of *Fed. R. Civ. P. 23*. The burden of proof to establish the propriety of class certification rests with the advocate of the class here, the Indirect Purchaser Plaintiffs. *See Jones v. Diamond, 519 F.2d 1090, 1099 (5th Cir. 1975)* [19]; *see also Heaven v. Trust Co. Bank, 118 F.3d 735, 737 (11th Cir. 1997)*. As the Eleventh Circuit instructs, the district court retains broad discretion in determining whether an action should be certified as a class action, and its decision, based upon the particular facts of the case, should not be overturned absent a showing of abuse of discretion. *See Andrews v. AT&T, 95 F.3d 1014, 1022 (11th Cir. 1996)* ("Assuming that the district court properly exercised its discretion within the parameters of the criteria of *Rule 23*, the court's determination should stand."). Nonetheless, the Court must conduct a "rigorous analysis" into whether the prerequisites of *Rule 23* are met before certifying a class. *Jones v. Firestone Tire and Rubber Co., Inc., 977 F.2d 527, 534 (11th Cir. 1992)* (citing **[**37]** *General Tel. Co. v. Falcon, 457 U.S. 147, 161, 72 L. Ed. 2d 740, 102 S. Ct. 2364 (1982))*.

HN5[] "A class action may be maintained only when it satisfies all of the requirements of *Fed. R. Civ. P. 23(a)* and at least one of the alternative requirements of *Rule 23(b)*." *Rutstein v. Avis Rent-A-Car Sys., Inc., 211 F.3d 1228, 1233 (11th Cir. 2000)* (citing *Jackson v. Motel 6 Multipurpose, Inc., 130 F.3d 999, 1005 (11th Cir. 1997))*. Pursuant to *Rule 23(a)*, a class may be certified only if: (1) the class is so numerous that joinder of all members would be impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims **[**38]** or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*. These four prerequisites of *Rule 23(a)* are commonly referred to as "numerosity, commonality, typicality, and adequacy of representation, and they are designed to limit class claims to those fairly encompassed by the named plaintiffs' individual claims." *Prado-Steiman v. Bush, 221 F.3d 1266, 1278 (11th Cir. 2000)*. Reviewing each of these requirements in turn, the Court finds that Indirect Purchaser Plaintiffs have met their burden under *Rule 23(a)*.

I. Numerosity

HN6[] *Fed. R. Civ. P. 23(a)(1)* requires that the class be "so numerous that joinder of all members is impracticable." Defendants do not dispute that the proposed classes, as defined, satisfy the numerosity requirement. *See* Defs.' Opp'n, at p. 13, n. 6. Nonetheless, despite Defendants' concession on this element, the Court "has the responsibility of conducting its own inquiry as to whether the requirements of *Rule 23* have been

---

[19] In *Bonner v City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)* (en banc), the Eleventh Circuit Court of Appeals adopted as binding precedent all decisions of the former Fifth Circuit handed down prior to October 1, 1981.

satisfied in a particular case." *See* *Valley Drug Co. v. Geneva Pharms., Inc., 350 F.3d 1181, 1188 (11th Cir. 2003)* **[**39]** (citing *Martinez-Mendoza v. Champion Int'l Corp., 340 F.3d 1200, 1216 n. 37 (11th Cir. 2003))*.

HN7[] To meet the numerosity requirement, Indirect Purchaser Plaintiffs need not establish the exact size of the proposed class or identify all of the class members, but rather must demonstrate that the number is sufficiently large so as to make joinder impracticable. *See* *Kilgo v. Bowman Transp., Inc., 789 F.2d 859, 878 (11th Cir. 1986)*. Impracticability, however, does not mean impossibility. The numerosity requirement is met when it would be inconvenient or difficult to join all of the class members, and may be satisfied with as few as 25-30 class members. *In re NASDAQ Market-Makers Antitrust Litig., 169 F.R.D. 493, 508 (S.D.N.Y. 1996)*; *see also* ***[*685]*** *Kreuzfeld A.G. v. Carnehammar, 138 F.R.D. 594, 599 (S. D. Fla. 1991)* (Paine, J.). While the size of the class is a highly relevant consideration, courts must take into account a number of other factors under *Fed. R. Civ. P. 23(a)(1)*, including "the geographic diversity of the class members, the nature of the action, the size of each plaintiff's **[**40]** claim, judicial economy and the inconvenience of trying individual lawsuits, and the ability of the individual class members to institute individual lawsuits." *Walco Invs., v. Thenen, 168 F.R.D. 315, 324 (S.D. Fla. 1996)* (Moreno, J.).

Considering these several factors, the Court finds that the Indirect Purchaser Plaintiffs have met their burden of establishing that the proposed classes are "so numerous that joinder of all members is impracticable." In the Fourth Amended Complaint, Plaintiffs allege that between October 1995 and August 1999, Hytrin was the highest-margin product of Abbott's Pharmaceutical Products Division, with total sales of Hytrin exceeding $ 1.75 billion. *See* Compl. at P10. Based on these sales figures, and using IMS data, [20] Indirect Purchaser Plaintiffs have posited that in each of the seventeen remaining classes, the most conservative estimate of the number of class members ranges from roughly 3,200 (North Dakota) to nearly 150,000 (California). [21] *See* Supplemental Measures of Class Damages, attached to IPPs' Pre-Argument Submission on Class Certification as Ex. K. Adding together all seventeen classes, the conservative estimated **[**41]** number of class members exceeds half a million end payers. *Id.*

It is undisputed that these thousands of members **[**42]** of the state Classes are geographically dispersed across their jurisdictions and throughout the United States. Further, many of the individual members of the state classes have claims that are far too small to justify bringing individual suits against the corporate Defendants. For these reasons, joinder of all members of the prospective classes would be highly impracticable. The Court therefore finds that the numerosity requirement of *Rule 23(a)(1)* has been satisfied.

2. Commonality

HN8[] Under *Fed. R. Civ. P. 23(a)(2)*, class certification requires a showing that "there are questions of law or fact common to the class." The threshold finding for commonality under this section is qualitative rather than quantitative. *See* 1 Alba Conte & Herbert Newberg, *Newberg on Class Actions* § 3:10 (4th ed. 2002). Consequently, *Rule 23(a)(2)* "does not require that all the questions of law and fact raised by the dispute be common." *See* *Cox v. American Cast Iron Pipe Co., 784 F.2d 1546, 1557 (11th Cir. 1986)*. Instead, courts in the Eleventh Circuit have held that "a single common question is sufficient to satisfy *Rule 23(a)(2)*." *Powers v. Stuart-James Co., 707 F. Supp. 499, 502 (M.D. Fla. 1989).* **[**43]** As with the numerosity element, Defendants do not dispute that this

---

[20] IMS monitors prescriptions, compiling data by product and by distribution channel for a number of customers, including pharmaceutical companies. As Indirect Purchaser Plaintiffs noted at the March 12, 2004 oral argument. Abbott itself also relied on IMS data to predict the impact that generic entry would have on the market. Abbott has not disputed this.

[21] As observed by several courts and commentators, once the good faith estimate of the class size reaches the thousands, the joinder impracticability test is satisfied and the analysis focuses on the "manageability and superiority of the proposed class action relative to other means for fan adjudication of the controversy." *See* I Alba Conte & Herbert Newberg, *Newberg on Class Actions* § 3:5 (4th ed. 2002). These issues will he addressed later in the Court's analysis of *Fed. R. Civ. P. 23(b)(3)*.

requirement is met. [22] Nonetheless, the Court has conducted its own inquiry into the Rule 23(a)(2) requirement, and concludes that it has been satisfied.

HN9[] Where the complaint alleges that the Defendants have engaged in a standardized course of conduct that affects all class members, the commonality requirement will generally be met. *See* Roper v. Consurve, Inc., **[*686]** 578 F.2d 1106, 1113 (5th Cir. 1978). Specifically in the antitrust context, courts in this Circuit have consistently held that allegations of price-fixing, monopolization, **[**44]** and conspiracy by their very nature involve common questions of law or fact. In re Carbon Dioxide Antitrust Litig., 149 F.R.D. 229, 232 (M.D. Fla. 1993); *see also* In re Infant Formula Antitrust Litig., 1992 U.S. Dist. LEXIS 21981, No. MDL-878, 1992 WL 503465, at *3 (N.D. Fla. Jan. 13, 1992); *see also* State of Alabama v. Blue Bird Body Co., 573 F.2d 309, 319 (5th Cir. 1978).

Indirect Purchaser Plaintiffs cite several common questions of law and fact that affect all class members. *See* IPPs' Mem. at pp. 8-9. Among them are: (1) whether, under common principles of antitrust and unfair trade practice law, Defendants' methods, practices and acts, including, but not limited to, the Abbott-Zenith and Abbott-Geneva Agreements, violated the applicable laws of the respective Indirect Purchaser States; (2) whether Defendants' acts, contracts, combinations and conspiracy restrained competition for the sale of Hytrin and its generic bioequivalents and prevented or delayed introduction of any AB-rated generic version of Hytrin in the United States; (3) whether, and the amount by which, Defendants' illegal, inequitable and unfair trade practices have inflated the prices **[**45]** paid by members of the classes for Hytrin and its generic bioequivalents over the amounts they would have paid in a competitive market unaffected by Defendants' illegal acts; and (4) whether, under common principles of unjust enrichment. Defendants unjustly enriched themselves to the detriment of Plaintiffs and the classes, entitling Plaintiffs and the classes to disgorgement of all benefits derived therefrom. *Id.*

Because these, and many other, common questions of law and fact are applicable to the claims of all class members, the Court finds that the requirements of Rule 23(a)(2) have been satisfied.

3. Typicality

HN10[] Under the third prerequisite for class certification, the Court must assess whether the claims or defenses of the named representatives are typical of the claims or defenses of the class. Fed. R. Civ. P. 23(a)(3). [23] "A sufficient nexus is established if the claims or defenses of the class and the class representative arise from the same event or pattern or practice and are based on the same legal theory." *Kornberg v. Carnival Cruise Lines, Inc., 741 F.2d 1332, 1337 (11th Cir. 1984)*; *see also In re Domestic Air Transp. Antitrust Litig., 137 F.R.D. 677, 698 (N.D. Ga. 1991).* **[**46]** If the party advancing the class can establish that the same unlawful conduct was directed at or affected both the class representatives and the class itself, then "the typicality requirement is usually met irrespective of varying fact patterns which underlie the individual claims." In re Managed Care Litig., 209 F.R.D. 678, 682 (S.D. Fla. 2002) (Moreno, J.) (citing Davis v. Southern Bell Tel. & Tel. Co., 1993 U.S. Dist. LEXIS 20033, No. 89-2839-CIV-NESBITT, 1993 WL 593999, at *4 (S.D. Fla. Dec. 23, 1993) (Nesbitt, J.); *see also* Appleyard v. Wallace, 754 F.2d 955, 958 (11th Cir. 1985) (noting that "a strong similarity of legal theories will satisfy the typicality requirement despite substantial factual differences"). "Any atypicality or conflict between the named Plaintiffs'

---

[22] While Defendants do not contest that there are common questions of law or fact sufficient to meet the Rule 23(a)(2) requirement, they do contend that the proposed classes cannot be certified because those common issues do not predominate over questions affecting only individual class members. This argument, however, is properly considered in the Rule 23(b)(3) analysis, and will be addressed at that time.

[23] The Eleventh Circuit has recognized that "in many ways, the commonality and typicality requirements of Rule 23(a) overlap. Both requirements focus on whether a sufficient nexus exists between the legal claims of the named class representatives and those of individual class members to warrant class certification. Traditionally, commonality refers to the group characteristics of the class as a whole and typicality refers to the individual characteristics of the named plaintiff in relation to the class." Prado-Steiman, 221 F.3d at 1278-79 (internal citations omitted).

claims and those of the Class 'must be clear and must be such that the interests of the class are placed in significant jeopardy.'" *Id.* (citing *Walco, 168 F.R.D at 326*).

[47]** Indirect Purchaser Plaintiffs assert that they have met the typicality requirement by virtue of the fact that all of the members of the proposed classes consumers and third party payers alike have been subjected to overcharges for their payments for Hytrin because of the Defendants' same unlawful conduct. *See* IPPs' Mem. at p. 10. Specifically, Indirect Purchaser Plaintiffs argue that because "all of the claims of both the representative Plaintiffs and the Classes **[*687]** arise out of the same conduct of Defendants and are based on the same related antitrust theories of monopolization and conspiracy in restraint of trade," the claims of the class representatives are typical of those of the class members. *Id.* Further, Indirect Purchaser Plaintiffs emphasize that despite some variation in the manner in which the overcharge was paid (for instance, in some cases either the consumer or the third party payer paid the entire amount of the prescription, while at other times, the consumer paid a portion and the third-party payer paid the remainder), the consumers and third party payers who comprise the proposed state classes all overpaid for Hytrin or generic terazosin as a direct result of **[**48]** Defendants' alleged misconduct. *Id.*

Defendants challenge Indirect Purchaser Plaintiffs' ability to satisfy the typicality requirement, arguing that each class member's ability to prove its claim will depend on the unique facts surrounding that class member's payment for its prescription for Hytrin and/or its generic alternatives. Further, Defendants dispute that the claims of third-party payers are properly considered "typical" of the claims of consumers, and that the claims of consumers are "typical" of the claims of third-party payers. These arguments, however, misconstrue Indirect Purchaser Plaintiffs' burden under *Rule 23(a)(3)*. [24]

[49]** As noted above, once the party advancing the class establishes that the same unlawful conduct was directed at or affected both the class representatives and the class itself, then "the typicality requirement is usually met irrespective of varying fact patterns which underlie the individual claims." *In re Managed Care Litig., 209 F.R.D. at 682*; *see also Singer v. AT&T Corp., 185 F.R.D. 681, 689 (S.D. Fla. 1998)* (noting that typicality "does not demand factual homogeneity. Therefore, the existence of factual differences does not defeat typicality."). In this case, Indirect Purchaser Plaintiffs allege that the same unlawful conduct affected both the class representatives and the class itself. Specifically, consumers and third-party payers "engaged in the exact same type of transactions (retail payments for terazosin), most often as partners in common transactions (as co-payers) and suffered the same damage as a result of generic delay - they paid more than they otherwise would have paid for terazosin." *See* IPPs' Pre-Argument Submission on Class Certification, at p. 11.

As explained in *Newberg on Class Actions,*

> ***HN11***[] The main principle behind **[**50]** typicality is that the plaintiff will advance the interests of the class members by advancing her or his own self-interest. The alignment of interest is not the test for typicality. It is the result. The plaintiffs and class members have similar interests because they have similar claims. The plaintiff whose claim is typical will ordinarily establish the defendants' liability to the entire class by proving his or her individual claim.

See 6 Alba Conte & Herbert Newberg, *Newberg on Class Actions* § 18:8 (4th ed. 2002). Here, the claims of the consumer and the third-party payer class representatives are not only typical of the claims of all class members, they are virtually identical in nature, notwithstanding variations in the amount of damages. Consequently, if one class representative is able to prove that Defendants' alleged anticompetitive acts caused an overcharge for terazosin hydrochloride, or that Defendants were unjustly enriched at Indirect Purchaser Plaintiffs' expense, such proof will likewise prove the case on liability for every other class member. While Defendants attempt to distinguish

[24] While Defendants state that they challenge Indirect Purchaser Plaintiffs' ability to meet the *Rule 23(a)(3)* standard, they have focused their arguments on the 23(a)(4) and 23(b)(3) elements, never clearly articulating the nature of their opposition with respect to the typicality prong. The elements of *Rule 23* are overlapping and often difficult to extricate from one another. Therefore, while Defendants have asserted additional arguments that may, arguably, apply to the typicality analysis, those arguments are more appropriately considered in the Court's analysis of *Rule 23(a)(4)and 23(b)(3)*.

the claims of the individual consumers from those of the third-party **[**51]** payers, it must be noted that ***HN12***[] "typicality refers to the nature of the claims of the representative, not the individual characteristics of the plaintiff." *In re Playmobil Antitrust Litig., 35 F. Supp. 2d 231, 242* ***[*688]*** *(E.D. N.Y. 1998)*. Indeed, "there is nothing in *Rule 23(a)(3)* which requires named plaintiffs to be clones of each other or clones of other class members." *Id.* (quoting *In re Catfish Antitrust Litig., 826 F. Supp. 1019, 1036 (N.D. Miss. 1993)* (rejecting the argument that diversity among named plaintiffs destroys typicality)). Accordingly, the Court finds that the interests of the class representatives and the absent class members are sufficiently aligned for purposes of *Rule 23(a)(3)*.

4. Adequacy of Representation

HN13[] *Rule 23(a)(4)* requires that the representative party in a class action "must adequately protect the interests of those he purports to represent." *Valley Drug Co. v. Geneva Pharms., Inc., 350 F.3d 1181, 1189 (11th Cir. 2003)* (citing *Phillips v. Klassen, 163 U.S. App. D.C. 360, 502 F.2d 362, 365 (D.C. Cir. 1974))*. As interpreted by the Supreme Court and by the Eleventh Circuit, this requirement **[**52]** applies to both the named plaintiffs and to the class counsel. *See London v. Wal-Mart Stores, Inc., 340 F.3d 1246, 1253 (11th Cir. 2003)* (citing *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 626 n. 20, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997))*. "Because all members of the class are bound by the res judicata effect of the judgment, a principal factor in determining the appropriateness of class certification is the forthrightness and vigor with which the representative party can be expected to assert and defend the interests of the members of the class." *Lyons v. Georgia-Pacific Corp. Salaried Employees Ret. Plan, 221 F.3d 1235, 1253 (11th Cir. 2000)* (internal citations omitted). This analysis "encompasses two separate inquiries: (1) whether any substantial conflicts of interest exist between the representatives and the class; and (2) whether the representatives will adequately prosecute the action." *Valley Drug Co., 350 F.3d at 1189* (citing *In re Healthsouth Corp. Secs. Litig., 213 F.R.D. 447, 460-61 (N.D. Ala. 2003))*.

a. Conflicts of Interest

HN14[] The Eleventh Circuit Court of Appeals has held that "if substantial **[**53]** conflicts of interest are determined to exist among a class, class certification is inappropriate." *Id.* However, "the existence of minor conflicts alone will not defeat a party's claim to class certification; the conflict must be a 'fundamental' one going to the specific issues in controversy." *Id.* (citations omitted). A fundamental conflict exists "where some party members claim to have been harmed by the same conduct that benefited other members of the class." *Id.* "In such a situation, the named representatives cannot 'vigorously prosecute the interests of the class through qualified counsel' because their interests are actually or potentially antagonistic to, or in conflict with, the interests and objectives of other class members." *Id.* (citing *In re Healthsouth Corp. Secs. Litig., 213 F.R.D. 447, 461-63 (N.D. Ala. 2003))*; *see also Pickett v. Iowa Beef Processors, 209 F.3d 1276, 1280 (11th Cir. 2000)* (holding that "a class action cannot be certified when its members have opposing interests or when it consists of members who benefit from the same acts alleged to be harmful to other members of the class."). Notably, a class conflict **[**54]** can be established in two ways: (1) where the record shows hard evidence of an actual disagreement or conflict; or (2) where the class is such that the court can simply imply that a realistic possibility of antagonism exists. [25] *See Miles v. Metro, Dade County, 916 F.2d 1528, 1534 (11th Cir. 1990)* (citing *Horton v. Goose Creek Ind. School Dist., 690 F.2d 470, 485-86 (5th Cir. 1982))*.

Defendants assert several potential "conflicts" and alleged antagonistic interests that they claim defeat Indirect Purchaser Plaintiffs' class certification motions. Specifically, Defendants focus on: (1) perceived **[**55]** conflicts of interest between third-party payers and insured consumer class members; (2) conflicts among third-party payer insurers and pharmacy benefits management companies ("PBMs"); (3) consumers who paid the same flat co-payment for branded drugs as for the **[*689]** generic equivalent; and (4) "brand loyal" consumers. *See Defs.'*

---

[25] In assessing whether a realistic possibility of antagonism exists, the Eleventh Circuit has looked at the economic realities of the case to determine whether "the economic interests and objectives of the named representatives differ significantly from the economic interests and objectives of unnamed class representatives." *See Valley Drug Co., 350 F.3d at 1189-90*.

Submission Regarding Application of Eleventh Circuit's Direct Purchaser Class Certification Ruling to Indirect Purchaser Plaintiffs' Consolidated Motion for Class Certification, [DE-1052] at pp. 2-8; *see also Defs.' Citations of Record Evidence,* [DE-1080] at pp. 2-10. The Court has carefully considered each of these purported "conflicts," and concludes that they do not preclude certification of the proposed classes.

i. Conflicts Between Third-Party Payers and Consumers

As addressed in Section III.B.3, *supra,* Defendants object to the inclusion of both consumers and third-party payers in the same class. [26] Here, Defendants argue that third-party payers have not been injured by any alleged antitrust violations, and therefore are not proper class members or class representatives, because they would have recovered any overcharges to which they **[**56]** may have been subjected through premiums collected from insured consumers. *See Def.'s Opp'n,* at pp. 14-15; *see also* DE-1052 at pp. 7-8. The crux of Defendants' argument on this issue is summarized in the following passage:

> … Insurers generally determine an insured group's prescription drug benefit premiums for a plan year by adding up the group's covered claims experience for the preceding year, using actuarial techniques to project the prior experience forward and estimate expected claims for the coming year, and then calculating the premium needed to recover the expected claims (plus any administrative expenses and profit). Because they reflect a group's complete claims experience, including reimbursements for all covered branded and generic drugs, premiums automatically reflect not only the costs of all covered drugs but also all changes in such costs, including from the introduction of generics. Under this system, therefore, the premiums paid by all insured consumers and their employers (because they pay a portion of the premiums) will vary depending on the availability of generic versions of drugs without the insurer needing to track or predict specific generic **[**57]** launches because the claims experiences will incorporate the prices of all drugs and will fall with generic entry as a new generic makes price and market share inroads on a branded drug.

See Defs.' Opp'n, at p. 14. Indirect Purchaser Plaintiff's argue that Defendants' asserted "conflict" is based on a misreading of the record evidence and misapprehends the nature of the premium setting process. [27]

[58]** In support of this contention, Defendants rely primarily on the testimony of Janet McGowin, a Vice President with Alabama Blue, and Michael Murray, Cobalt's Vice President and Chief Actuary. Ms. McGowin and Mr. Murray both testified (either through depositions or affidavits) as to the model used by insurance companies for setting future premiums. Specifically, Defendants rely on Ms. McGowin's testimony that **[*690]** Alabama Blue looks at the premiums received from a particular group in the previous year, considers the amount of claims incurred from the group, and projects the claims forward to see how much of a percentage increase would be required to cover those claims. Defendants also point to Ms. McGowin's testimony that the claims experience used to project new premiums consists of "any claims paid to any provider or subscriber during the time period" leading up to the

---

[26] While this issue was already addressed in the typicality section, it is also relevant to the analysis of the "adequacy of representation" prong, as Defendants contend that fundamental conflicts between the two types of end-payers preclude the certification of mixed consumer-TPP classes.

[27] Indirect Purchaser Plaintiffs also contend that the pass-on issue is "at best, an affirmative defense and may not be considered at the class certification stage." *See IPPs' Reply,* at pp. 11-12. Because Defendants' pass-on argument requires resolution of the factual issue of whether overcharges are actually passed on to premium payers, as well as the legal issue of whether the pass-on defense is viable under a given state's ***antitrust law***. Indirect Purchaser Plaintiffs contend that consideration of this issue is premature at the class certification stage. *Id.* (citing ***In re Domestic Air Transp Antitrust Litig., 137 F.R.D. at 696*** Indirect Purchaser Plaintiffs also contend that *Hanover Shoe v United Shoe Machinery Corp, 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, prohibits defensive use of the pass-on argument. However, in *Valley Drug Co.,* the Eleventh Circuit disapproved of Indirect Purchaser Plaintiff's attempt to use *Hanover Shoe* as "a talisman warding away the requirements of *Rule 23* and barring this court from exercising its duty to conduct an inquiry into whether the plaintiffs' proposed class satisfied the four requirements of *Rule 23(a)*." *Valley Drug Co., 350 F.3d at 1192*. Therefore, because the pass-on issue is relevant to the determination of whether any conflicts exist that would preclude class certification, the Court has conducted its own analysis of the record evidence upon which Defendants rely.

renewal calculation, including all drug costs. Similarly, Defendants note Mr. Murray's testimony that Cobalt "analyzes a group's prior pharmacy benefit experience in the aggregate, then factors in information about future trends in drug costs to set a premium for pharmacy benefit coverage."

While these quotes are accurate, **[**59]** the record indicates, and Defendants concede, that the third-party payers take no account of the expected impact of individual drugs (such as Hytrin) on claims when determining premiums to be charged. In fact, Mr. Murray testified that "Cobalt does not consider potential price increases for specific drugs when predicting future trends in drug costs … Instead, Cobalt analyzes drug costs in the aggregate to determine appropriate trend factors for these pharmacy benefits services." Therefore, Defendants' claim that any overcharges for Hytrin in particular were passed on by the third-party payers to consumers the following year is unsupported by the record.

Further, to the extent that any third-party payer did charge its insureds a higher premium because of a drug company's monopolistic activities, the charging of a higher premium in the future cannot be accurately described as a "pass on" of those charges. The record is clear that the purpose of a future projection is, as the name implies, to estimate anticipated future costs. Defendants point to nothing in the record that indicates that the purpose of projecting a future cost (and charging such a cost as a premium in the future) is **[**60]** to recover money that a third-party payer is paying out for present claims. Nor have Defendants shown such a recovery to be the result of future claims projections. Indeed, as Ms. McGowin testified, if, in a given year, an insurance company pays out more in claims that it has charged as a premium, the company records that deficit as a loss and there is no retroactive increase of the premium charged for that year.

Defendants repeatedly argue, throughout their submissions, that ***HN15***[] the burden of establishing that class certification is appropriate rests with the advocate of the class, here the Indirect Purchaser Plaintiffs. While this is a correct statement of the law in this Circuit, *see Gilchrist v. Bolger, 733 F.2d 1551, 1556 (11th Cir. 1984)*, class certification cannot be defeated merely because Defendants assert unsupported allegations of conflict between potential class members. When Defendants come forward with an alleged conflict, the Court must scrutinize the record citations Defendants cite to determine whether such evidence establishes the existence of a conflict, or whether it provides a basis for the Court to imply that a realistic possibility of antagonism **[**61]** exists. *See Valley Drug Co., 350 F.3d at 1192*; *see also Miles, 916 F.2d at 1534*. If "the evidence provided by the defendants is deemed to be inaccurate or unreliable … the plaintiffs may yet meet their burden of proof necessary to maintain a class action under *Rule 23(a)(4)*." *Id.* In this case, extensive discovery on the issue of the alleged "pass on" has been conducted, and Defendants' citations fail to establish any *fundamental* conflict, or provide any indication that a "realistic probability of antagonism" exists, such that class certification would be inappropriate. Accordingly, the Court rejects this argument. [28]

[62]** ii. Conflicts Between Third-Party Payers and PBMs

Next, Defendants contend that conflicts between third-party payers and PBMs **[*691]** preclude certification. [29] PBMs are pharmacy benefit managers, such as Medco, AdvancePCS and Express Scripts, that serve as "conduits" for third-party payers in administering pharmacy benefits. Specifically, PBMs' principal business is to administer pharmacy benefits that their customers, insurers and self-funded plans, offer to insured individuals. *See* Defs.' Opp'n, at p. 31 and included citations. These companies process patient claims and requests for coverage or

[28] Defendants also make a more general argument that conflict necessarily exists between third-party payers and consumers because third party payers will presumably seek to maximize their damages to the detriment of consumer class members. *See* Defs.' Opp'n, at pp. 44-45. The same argument was rejected by the Court in *In re Cardizem200 F.R.D. 326 at 337*. "Such hypothetical conflicts regarding proof of damages are not sufficient to defeat class certification at this stage of the litigation." *Id.* (citing *In re NASDAQ, 169 F.R.D. at 512*).

[29] Defendants also present this argument as a challenge to the predominance requirement of *Rule 23(b)(3)*. I here, Defendants contend that the role of PBMs creates individualized issues that preclude class treatment. In the interest of clarity and brevity, the Court will only analyze this asserted challenge in this section.

reimbursement and pay pharmacies and covered members for the costs of prescriptions filled. *Id.* According to specific contractual terms negotiated with each insurer customer, the insurers then reimburse the PBMs for some or all of the costs of the claims they process and pay. *Id.*

[63]** Defendants contend that the multi-faceted and complex roles that PBMs play in the pharmaceutical distribution and benefits administration process create irreconcilable intra-class conflicts between PBMs and their insurer clients, and render class-wide determination of impact and damages impossible. [30] First, Defendants argue that if a PBM bears the risk of any overcharge for Hytrin purchases, [31] then the insurer would be shielded from the risk and the PBM, not the insurer, would be a class member. In such a situation, Defendants contend, no common formula for calculating damages could properly account for the PBMs absent highly complex, individualized inquiries regarding the reimbursement terms of specific contracts. Second, Defendants argue that PBMs earning fees under an administrative-services only ("ASO") contract may have benefitted by the delay in generic entry because they were compensated with a percentage of the value of claims; therefore, they would have earned more by opting for the more expensive brand-name Hytrin over the less expensive generic substitutes. Similarly, Defendants contend that PBMs receiving Hytrin rebates from Abbott may have fared better prior to generic **[**64]** entry.

[65]** Again, Defendants have failed to identify any specific record evidence supporting their allegations of conflict, or to provide the Court with a sufficient basis for implying that a realistic probability of antagonism exists. First, Indirect Purchaser Plaintiffs concede that to the extent that a PBM is at risk for paying the overcharge at issue, then the PBM falls within the definition of the classes, a possibility taken into account in their damages model. *See* IPPs' Reply Mem., at p. 20. And while Defendants argue that the inclusion of PBMs will create the need for individualized inquiries, any such individual issues can be adequately addressed during the claims administration stage of this litigation. *See* Section III.C.1 below.

Second, Defendants' allegations of fundamental intra-class conflicts are premised **[*692]** largely on unsupported speculation and hypothetical situations. As explained above, *see supra* note 26, Defendants' conflicts argument focuses on the alleged "spread" between the amounts that PBMs pay to pharmacies and the amounts they are reimbursed, the existence of purported "capitated" fee arrangements, and the alleged rebates that Abbott pays to PBMs for Hytrin. **[**66]** As to the first issue, Defendants proffer no evidence that the existence of "spreads" is prevalent or that they existed with respect to Hytrin or generic terazosin at all. [32] In fact, several PBM

---

[30] As with other areas of their argument, Defendants' issues regarding PBMs apply to several portions of the *Rule 23* analysis. In particular, Defendants argue that: the inclusion of PBMs in the classes will require several individualized inquiries to prove impact (which relates primarily to the predominance requirement of *Rule 23(b)(3)*); calculating class-wide damages will be impossible in light of the PBMs (also relevant to the *Rule 23(b)(3)* analysis): and intra-class conflicts potentially exist between PBMs and their insurer clients (relevant to the instant *Rule 23(a)(4)* adequacy of representation analysis). Because these issues are, to a certain extent, inextricably intertwined, they will all be addressed in this section.

[31] Defendants provide two potential sources of the "risk" allegedly borne by the PBMs. First, they argue that PBMs have manipulated "spreads" between the amounts that PBMs pay to pharmacies for prescriptions and the amounts that PBMs are reimbursed by their insurer clients in order to reap unfair profits at the insurers' expense. *See* DE-1052 at 4; *see also* Defs.' Opp'n, at pp. 31-32. To the extent that there was an overcharge on Hytrin. Defendants argue. PBMs would have borne a portion of the overcharge as a result of the spread between their pharmacy and insurer reimbursement formulas. *Id.* Second, Defendants contend that PBMs with "capitated" fee arrangements where the insurer pays the PBM a negotrated fee per member per month in exchange for the PBM bearing the responsibility for reimbursing all covered claims bear the risk of any overcharges and also shield the insurer from any such overcharges. *Id.*

[32] On the "spread" issue, Defendants primarily rely on two recently filed state court complaints in California and Ohio. *See* DE-1052 at pp. 4-6. In those two cases, the plaintiffs merely alleged what Defendants argue here, that such spreads existed, resulting in PBMs like Medco reaping improper benefits from then processing of Hytrin prescriptions. *Id.* However, Defendants' assertion that "the very existence of the two lawsuits demonstrates an actual conflict among putative class members on these issues," *see id.* at p. 6. is incorrect. As noted above, a party seeking to demonstrate a fundamental class conflict must either cite to record evidence establishing an actual disagreement or conflict, or provide a sufficient basis for the court to imply that a

representatives testified that to their knowledge, no such "spreads" were in place. *See* IPPs' Reply at pp. 20-21 and citations thereto. Next, while there has been no evidence in this case to support a finding that PBMs have capitated fee arrangements for pharmacy benefits, if such arrangements existed, the number would be *de minimis* and would not impact on the damages calculations. *Id.* And finally, Defendants, despite having taken extensive discovery on the issue of PBMs, have failed to provide any record evidence buttressing their position that the existence of rebates benefitted PBMs and created a "fundamental" intra-class conflict. Indeed, nothing in the record even indicates that a reasonable probability of antagonism exists, particularly one that would result in a "fundamental" intra-class conflict. The presence of PBMs, therefore, will not suffice to defeat class certification.

[67]** iii. Flat Co-Payers

Relying on the Eleventh Circuit's decision in *Valley Drug Co.,* Defendants argue that certification of the proposed classes is inappropriate because they include class members who were unharmed or who, in fact, benefitted from delayed generic entry. As to the former, Defendants point to those insured consumers who paid the same flat co-payment for drug purchases irrespective of whether they opted for the brand name drug or the generic bioequivalent. With respect to these individuals. Defendants argue, there can be no showing that generic foreclosure resulted in any antitrust injury. Further, as Defendants note, Indirect Purchaser Plaintiffs' damages expert. Dr. Hartman, conceded that consumers with flat co-payments would not have been harmed by delayed generic entry.

In this regard, the Court agrees that flat co-payers, who suffered no economic injury due to delayed generic entry, are not proper class members. However, Indirect Purchaser Plaintiffs' proposed class definition properly accounts for the flat co-payer problem, as it specifically excludes "indirect purchasers who suffered no economic injury as a result of Defendants' allegedly unlawful conduct. **[**68]** " Thus, the Court finds that flat co-payers are not part of the proposed classes, as defined, and therefore present no obstacle to class certification. [33]

Iv. Brand Loyalists

Finally, Defendants oppose Indirect Purchaser Plaintiffs' ability to establish the adequacy of class representation requirement because of the presence of brand loyalists in the proposed class definition. Brand loyalists, as defined by Defendants, are those consumers who would not have switched from Hytrin to generic terazosin even if the **[*693]** generic had been available, *i.e.* in the "but-for" world. Defendants contend that these individuals would have benefitted from delayed generic entry because Hytrin prices, on average, increased after generic entry. *See* Defs.' Opp'n, **[**69]** at p. 36. For that reason, Defendants argue that their presence in the class defeats certification under the *Rule 23(a)(4)* analysis. In turn, Indirect Purchaser Plaintiffs seek to include brand loyalists in the classes, to the extent that those who paid less for branded Hytrin post-generic entry were injured by the delayed generic entry to market.

The record is devoid of any evidence that brand loyalists "benefitted" from delayed generic entry, nor does it appear from the record that a reasonable probability of antagonism exists with respect to such individuals. In fact, when asked to provide evidence supporting their argument that brand loyalists benefitted from generic foreclosure. Defendants instead argued that Dr. Hartman's damages methodology fails to adequately account for, or quantify, such consumers. [34] However, the Court also notes that Indirect Purchaser Plaintiffs have failed to identify any

---

realistic possibility of antagonism exists. *See* *Miles, 916 F.2d at 1534*. The existence of untested allegations in two state court complaints satisfies neither standard.

[33] Defendants argument that Dr. Hartman's proposed methodologies for calculating class-wide damages fails to account for the exclusion of flat co-paying insurers will be addressed in connection with the Court's *Rule 23(b)(3)* analysis. *See* Section III.C.I below.

[34] As with the flat co-payers. Defendants lead into their *Rule 23(b)(3)* challenge on the predominance issue by arguing that Dr. Hartman's methodology fails to account for brand loyalists. Specifically, Defendants contend that Dr. Hartman has not quantified how many brand loyal consumers are in the proposed classes, and that he has not proposed any method to determine this

record evidence establishing that such injured brand loyalists exist, and supporting their theory that such consumers have suffered an injury. Therefore, at this stage of the litigation, the Court will exclude brand loyalists from the definition of the Indirect Purchaser state classes. **[**70]**

b. Vigorous Prosecution of Class Claims

Rule 23(a)(4) is also designed to ensure that the class representatives and class counsel will vigorously prosecute the class claims. *See Andrews v. AT&T, 95 F.3d 1014, 1023 (11th Cir. 1996)* (citing *In re American Medical Sys., 75 F.3d 1069, 1083 (6th Cir. 1996))*. [35] As discussed in previous sections, the Court **[**71]** has concluded that the claims of the class representatives are typical, that they have an interest in vigorously prosecuting the class claims, that no conflicts exist between the class representatives and the unnamed class members, and that the interests of the class representatives are sufficiently aligned with those of the class members for purposes of *Rule 23(a)* analysis. [36] Further, as will be addressed in Section III.D below, Co-Lead Counsel for the Indirect Purchaser Classes are knowledgeable in the antitrust field, experienced in complex litigation and in jury trials, and possess the necessary incentives and qualifications to vigorously prosecute this action on behalf of the Classes. Therefore, the Court concludes that the vigorous prosecution test of *Rule 23(a)(4)* has been satisfied.

[72] C. The Requirements of *Rule 23(b)(3)***

HN16[] In addition to satisfying these four requirements of *Rule 23(a)*, Indirect Purchaser **[*694]** Plaintiffs must meet one of the alternative requirements set forth in *Rule 23(b)*. With respect to this element, Indirect Purchaser Plaintiffs seek class certification under *Rule 23(b)(3)*, which imposes two additional requirements - (1) that "questions of law or fact common to the members of the class predominate over any questions affecting only individual members"; and (2) that "a class action is superior to other available methods for the fair and efficient adjudication of the controversy." *Fed. R. Civ. P. 23(b)(3)*. In conducting this analysis, "the Court must scrutinize the evidence plaintiffs propose to use in proving their claims without unnecessarily reaching the merits of the underlying claims." *See In re Domestic Air Transp. Antitrust Litig., 137 F.R.D. 677, 684 (N.D. Ga. 1991)*.

1. Predominance of Common Questions of Law or Fact

HN17[] That common questions of law or fact predominate over individualized questions means that "the issues in the class action that are subject to generalized proof, **[**73]** and thus applicable to the class as a whole, must predominate over those issues that are subject only to individualized proof." *Kerr v. City of West Palm Beach, 875 F.2d 1546, 1558 (11th Cir. 1989)* (quoting *Nichols v. Mobile Bd. of Realtors. Inc., 675 F.2d 671, 676 (5th Cir. 1982))*. "The predominance inquiry focuses on 'the legal or factual questions that qualify each class member's case as a genuine controversy,' and is 'far more demanding' than *Rule 23(a)*'s commonality requirement." *Jackson, 130 F.3d at 1005* (quoting *Amchem Prods. v. Windsor, 521 U.S. 591, 623-24, 138 L. Ed. 2d 689, 117 S. Ct.*

---

information without individualized inquiries. Again, these issues, which overlap somewhat with the instant *Rule 23(a)(4)* conflicts analysis, are more appropriately addressed as part of the Court's *Rule 23(b)(3)* analysis. *See* Section III.C.

[35] To a certain extent, the *Rule 23(a)(4)* analysis collapses into the *Rule 23(a)(3)* consideration of typicality, "because in the absence of typical claims, the class representative has no incentives to pursue the claims of the other class members."

[36] The Court also notes that to the extent that they will act as representatives of the consumer class members (and state agencies who purchased Hytrin) in their states, the Attorneys General from the states of Florida and Kansas are adequate representatives who will vigorously prosecute the claims of those states' consumers. At the March 12, 2004 oral argument, the Court inquired of the Indirect Purchaser Plaintiffs as to the precise nature of the Attorneys General's involvement in this litigation. As explained by Barbara Smithers, Assistant Florida Attorney General, and Patricia Connors, the Chair of the Multistate Task Force of the Antitrust Division of the Florida Attorney General's office, class counsel to the Indirect Purchaser Plaintiffs has ceded the lead in representation of the consumer claims in Florida and Kansas to the Attorneys General's offices In fact, the Attorneys General have a "co-counsel" relationship with Co-Lead Counsel. Then primary involvement, however, will be in the civil penalties damages phase of the case and in representing the interests of the individual consumers in any mediation activities.

2231(1997)). Nonetheless, "common questions need only predominate; they need not be dispositive of the litigation." *In re Potash Antitrust Litig., 159 F.R.D. 682 at 693*.

HN18[] As part of the predominance analysis, courts must "examine the causes of action asserted in the complaint on behalf of the putative class." *Rutstein, 211 F.3d at 1234* (citing *McCarthy v. Kleindienst, 239 U.S. App. D.C. 247, 741 F.2d 1406, 1412 (D.C. Cir. 1984))*. Whether an issue predominates can only be determined after **[**74]** considering what value the resolution of the class-wide issue will have in each class member's underlying cause of action. *Id.* (citing *Amchem, 521 U.S. at 623*) ("[The predominance] inquiry trains on the legal or factual questions that qualify each class member's case as a genuine controversy."). [37] Therefore, "when there exists generalized evidence which proves or disproves an element on a simultaneous, class-wide basis, since such proof obviates the need to examine each class member's individual position," the predominance test will be met. *See In re Potash Antitrust Litig., 159 F.R.D. at 693* (internal citations omitted); *see also In re NASDAQ, 169 F.R.D. at 517* (noting that the predominance requirement is satisfied "unless it is clear that individual issues will overwhelm the common questions and render the class action valueless.").

[75]** ***HN19***[] In determining whether *Rule 23(b)(3)* is satisfied, the Court must consider how Indirect Purchaser Plaintiffs intend to prove: (1) liability on each of their claims; (2) the fact of injury; (3) the quantum of injury, namely the amount of their damages; and (4) whether the evidence is common to the class or unique to the individual class members. *See In re Cardizem, 200 F.R.D. at 340*. In so doing, the Court must not consider the merits of the Indirect Purchaser Plaintiffs' claims, but rather must consider whether each element is susceptible to proof by generalized **[*695]** evidence. *See Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)* ("A *Rule 23* determination is wholly procedural and has nothing to do with whether a plaintiff will ultimately prevail ..."); *see also In re Polypropylene Carpet Antitrust Litig., 178 F.R.D. 603, 611 (N.D. Ga. 1997)* (noting that the Court must examine "whether sufficient evidence exists to reasonably conclude that Plaintiffs may proceed in the manner proposed, not whether the evidence can withstand any and all factual challenges leveled by Defendants").

Upon examination of the antitrust **[**76]** and unjust enrichment claims of the proposed classes, and based on an analysis as to whether the resolution of class-wide issues will have a substantial impact on each class member's underlying case, the Court concludes that common questions of law <u>and</u> fact predominate over individuals issues. Therefore, the requirements of *Rule 23(b)(3)*'s predominance test have been met.

a. Common Proof on Antitrust Liability

In this case, the claims of the proposed state classes arise out of the same alleged illegal conduct by Defendants and are based on the same related antitrust theories of monopolization and conspiracy in restraint of trade. Although each proposed class is proceeding under its own state law, class certification pursuant to *Rule 23(b)(3)* is nonetheless appropriate where there is a commonality of substantive law applicable to all class members. *See Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 821-23, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985)*. Indirect Purchaser Plaintiffs have cited case law under each state antitrust statute interpreting the acts coextensively with the federal antitrust laws. *See* IPPs' Mot. at pp. 21-40. As explained below, the essential elements **[**77]** of Indirect

---

[37] *See generally Coopers & Lybrand v. Livesay, 437 U.S. 463, 469, 57 L. Ed. 2d 351, 98 S. Ct. 2454 (1978)* ("Class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action.") (quoting*Mercantile Nat'l Bank v. Langdeau, 371 U.S. 555, 558, 9 L. Ed. 2d 523, 83 S. Ct. 520 (1963))*; *id at 469 n. 12* ("'The more complex determinations required in *Rule 23(b)(3)* class actions entail even greater entanglement with the merits.'") (quoting 15 C. Wright, A. Millet, & E. Cooper, Federal *Practice and Procedure* § 3911.p. 485 n. 45 (1976)); *Castano v. American Tobacco Co., 84 F.3d 734, 744 (5th Cir. 1996)* ("Going beyond the pleadings is necessary, as a court must understand the claims, defenses, relevant facts, and applicable substantive law in order to make a meaningful determination of the certification issues."); *Huff v. N.D. Cass Co., 485 F.2d 710, 714 (5th Cir. 1973)* (enbanc) ("It is inescapable that in some cases there will be overlap between the demands of [*Rule] 23(a)* and *(b)* and the question of whether plaintiff can succeed on the merits.").

Purchaser Plaintiffs' antitrust claims do not vary significantly from state-to-state, [38] and they are susceptible to proof using common evidence.

i. Conspiracy to Restrain Trade

HN20[] In general, a federal or state claim based upon a theory of antitrust conspiracy raises three ultimate issues to be proven at trial: (1) the existence of a contract, combination or conspiracy in restraint of trade (liability); (2) injury-in-fact (antitrust injury); and (3) the extent of injury (damages). *See J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. As demonstrated by Indirect Purchaser **[**78]** Plaintiffs, all proof relative to Defendants' alleged conspiracy to restrain trade is common to the members of each of the state classes. In fact, ***HN21***[] "courts repeatedly have held that the existence of a conspiracy is the predominant issue in price fixing cases, warranting certification of the class even where significant individual issues are present." *In re NASDAQ, 169 F.R.D. at 518*; *see also In re Potash Antitrust Litig., 159 F.R.D. 682*. This holding is equally applicable to market allocation cases. *See In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 682, 706 (E.D. Mich. 2000)*.

Indirect Purchaser Plaintiffs intend to rely on common evidence, in the form of Defendants' covert written agreements to delay domestic competition for the sale of terazosin hydrochloride, to establish the existence of a conspiracy to restrain trade. On this element, there can be no serious dispute that the proposed generalized evidence will apply to each class as a whole, as "such proof obviates the need to examine each class member's individual position." *In re Potash Antitrust Litig., 159 F.R.D. at 693*.

ii. Monopolization

[79]** ***HN22***[] Whether proceeding under federal or state ***antitrust law***, claims of monopolization are generally proven by demonstrating: (1) possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance or use of that power by anti-competitive or exclusionary means. *United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 **[*696]** (1966)*. In the instant case, all proof relevant to the monopolization claims is common to each of the state classes.

HN23[] The first element of a monopolization claim -- monopoly power -- is "the power to control market prices or exclude competition." *United States v. E.I. DuPont NeMours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. "The material consideration in determining whether a monopoly exists is not that prices are raised and that competition actually is excluded, but that power exists to raise prices or to exclude competition when it is desired to do so." *American Tobacco Co. v. United States, 328 U.S. 781, 811, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*. In determining whether a defendant has market power, a court must assess whether the "seller has the power to raise prices, or impose other burdensome terms such **[**80]** as a tie-in, with respect to any appreciable number of buyers within the market." *Fortner Enter., Inc. v. United States Steel Corp., 394 U.S. 495, 504, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*. All of these issues are capable of determination using common proof, as they focus on Abbott's power and are not impacted by any individual determinations relating to specific classes or class members.

Additionally, the definition of the relevant market for determining market power is a question common to all members of the class, and is one that will predominate over any individualized inquiries. *See Jennings Oil Co., Inc. v. Mobil Oil Corp., 80 F.R.D. 124, 129 (S.D.N.Y. 1978)*; *see also Gold Strike Stamp Co. v. Christensen, 436 F.2d 791, 794 n. 6 (10th Cir. 1970)*. Indirect Purchaser Plaintiffs from all states have uniformly alleged, and will attempt to prove through common evidence, that Abbott had market power in the United States market for terazosin hydrochloride. Each absent member of the proposed classes will assert the same definition. Therefore, whether

---

[38] Based on the controlling precedents in each state, the primary difference between the state antitrust laws and the federal statutes is that indirect purchasers, to the extent they can prove that they were injured by Defendants' conduct, have standing to prosecute the state law claims. *See California v. ARC Am Corp., 490 U.S. 93, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)*.

Abbott had market power is a question common to all members of each of the state classes, and the **[**81]** resolution of this common issue will affect all members of the classes without regard to individualized inquiries.

Finally, as to the second element of a monopolization claim, Indirect Purchaser Plaintiffs can establish the willful acquisition or maintenance of monopoly power by demonstrating that the alleged monopolist "impaired competition in an unnecessarily restrictive way." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. In this case, once the members of the state classes establish that Abbott is a monopolist, Indirect Purchaser Plaintiffs will uniformly focus on the Abbott-Geneva and Abbott-Zenith agreements to satisfy this second element of the monopolization claim. *See* IPPs' Mot. at p. 18. Accordingly, the predominance test has been met as it relates to Indirect Purchaser Plaintiffs' monopoly claims.

iii. Common Proof of Antitrust Impact

The fact of injury or "impact" is an essential element of the antitrust claims that requires proof that Indirect Purchaser Plaintiffs suffered some injury that was caused by Defendants' antitrust violations. *See Martino v. McDonald's Sys Inc., 86 F.R.D. 145, 147 (N.D. Ill. 1980)* **[**82]** (observing that "the fact of damage pertains to the existence of injury, as a predicate to liability; actual damages involve the quantum of injury, and relate to the appropriate measure of individual relief."). Indirect Purchaser Plaintiffs have shown that they can use common evidence to prove the impact of the Defendants' alleged anti-competitive conduct with a fair degree of certainty as to the proposed classes, without resorting to lengthy individualized examinations.

HN24[] In an overcharge case, impact is shown through proof that: (1) Defendants charged more than they would have but-for their antitrust violation; and (2) class members made some purchases at the illegally inflated or stabilized price. *See Hanover Shoe v. United Shoe Mach. Corp., 392 U.S. 481, 489, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*; *Alabama v. Blue Bird Body Co., Inc., 573 F.2d 309, 324 (5th Cir. 1978)*. Courts in the Eleventh Circuit have recognized that a presumption of impact properly arises in such cases where the defendants have market power **[*697]** and are alleged to have conspired with competing manufacturers. *SeeIn re Agricultural Chems. Antitrust Litig., 1995 U.S. Dist. LEXIS 21075, No. 94-40216-MMP, 1995 WL 787538,* ***[**83]*** *at *12 (N.D. Fla. Oct. 23, 1995)*). Thus, here, a presumption of impact may apply.

However, even putting aside this presumption of impact, Indirect Purchaser Plaintiffs have presented ample common evidence, premised on market data and expert testimony, on this element. Specifically, Indirect Purchaser Plaintiffs propose to establish antitrust impact by showing, *inter alia,* that: [39] (1) Hytrin and its AB-rated generic bioequivalent are interchangeable versions of the same prescription drug product, with the exception that the generic costs significantly less than the branded Hytrin; (2) generic entry into the market results in significant savings for end-payers and a greater market share for the generic drug because many consumers would switch to the lower-priced alternative; (3) after Geneva launched its generic terazosin capsule on August 13, 1999, the shares of sales accounted for by the generic terazosin markedly increased, while the price of terazosin decreased; (4) class members made payments for Hytrin at inflated rates during the period of generic foreclosure, from 1995 through August 12, 1999, which can be confirmed through generalized market data; (5) class members could **[**84]** have obtained terazosin hydrochloride at much lower prices absent the existence of the Abbot-Geneva and Abbot-Zenith accords, and in the absence of Abbott's sham prosecution of the add-on patents; and (6) Defendants used the same data and a substantially similar methodology as that used by Indirect Purchaser Plaintiffs here to forecast the economic effects of generic competition for Hytrin. Other courts have found such generalized evidence of impact to be sufficient for class certification purposes. *See In re Cardizem, 200 F.R.D. at 341*.

---

[39] In their papers supporting class certification, Indirect Purchaser Plaintiffs never succinctly set forth their proposed common proof on impact. However, reading the relevant submissions and exhibits in their entirely, it is apparent that the factual demonstrations listed above are the primary sources of Indirect Purchaser Plaintiffs' proposed "generalized evidence" to prove impact.

Defendants primarily challenge the impact element by arguing that: **[**85]** (1) third-party payers passed on all claimed overcharges to consumers, and therefore, cannot prove that they sustained any antitrust impact; (2) the multi-faceted role of PBMs creates individualized inquiries that are not susceptible to common proof on impact; and (3) some consumers included in the class definition were not harmed. The Court has previously addressed, and rejected, each of these contentions. And to the extent that Defendants argue that these issues will necessarily result in individualized inquiries, such individualized examinations "will relate to the quantum of damages, not the fact of injury." *See* *In re Cardizem, 200 F.R.D. at 307*. Therefore, because the fact of antitrust injury is susceptible to common proof, as outlined above, Defendants' challenges are insufficient to defeat class certification.

b. Common Proof of Unjust Enrichment

Likewise, the question of whether Defendants were unjustly enriched is susceptible to proof using common, generalized evidence. *Section 1 of the Restatement (First) of Restitution* provides that ***HN25***[] a "person who has been unjustly enriched at the expense of another is required to make **[**86]** restitution to the other." Under *Comment (a) to Section I*. the Restatement further explains that a "person is enriched if he has received a benefit. A person is unjustly enriched if the retention of the benefit would be unjust." Finally, *Comment (b)* provides that a "person confers a benefit upon another if he gives to the other possession of or some interest in money, land, chattels, or chooses in action, performs services beneficial to or at the request of the other, satisfies a debt or a duty of the other, or in any way adds to the other's security or advantage." Taken together, the Restatement sets forth a four-part test for claims of unjust enrichment: (1) the unjust; (2) retention of; (3) a benefit received: (4) at the expense of another. [40]

[87]** **[*698]** Indirect Purchaser Plaintiffs have proffered common evidence that will be used to establish all of the class members' unjust enrichment claims. Indirect Purchaser Plaintiffs posit that all class members' proof will boil down to the common issues of whether: (1) Abbott's invalid patents and agreements with Geneva delayed generic competition; (2) such delay in generic competition enriched Abbott and/or Geneva to a greater extent than if there had been no such delay; (3) such additional profit came at the expense of end-payers; and (4) Abbott, as a matter of equity, should be required to return the excess profits to the end-payers. *See* DE-1021 at p. 13. Indeed, the same common operative facts that form the basis for each of the state classes' antitrust claims forms the basis for the unjust enrichment claims. [41]

[88]** According to Indirect Purchaser Plaintiffs, proof of the conferral of a benefit on Defendants will be established through testimony of participants in the pharmaceutical distribution chain that Abbott's profits from Hytrin were directly attributable to consumer and third-party payer purchases. *See* IPPs' Pre-Argument Submission, at p. 21. Once conferral of a benefit is established, Indirect Purchaser Plaintiffs will demonstrate, through common

---

[40] The standards for evaluating each of the various states classes' unjust enrichment claims are virtually identical. ***HN26***[] Courts have recognized that state claims of unjust enrichment "are universally recognized causes of action that are materially the same throughout the United States." ***Singer v. AT&T Corp. 185 F.R.D. 681, 692 (S.D. Fla. 1998)*** (citing *Sollenbarger v. Mountain States Tel. & Tel. Co., 121 F.R.D. 417, 428 (D.N.M. 1988)*). In fact, courts in Alabama, California, Illinois, Kansas, Michigan, Minnesota, Mississippi, Nevada, New Mexico, New York, North Carolina, North Dakota, West Virginia, and Wisconsin have expressly followed or cited with approval the Restatement's definition of unjust enrichment. *See* IPPs' Mot. at p. 19. n. 11. While Florida, Maine and South Dakota do not cite the Restatement, the elements of an unjust enrichment claim in those states mirror those of the Restatement, only adding the additional element of "realization," "appreciation," or some kind of knowledge on the part of the Defendants of the conferral of the benefit by the Plaintiff. *Id.* at pp. 19-20 (citing Florida, Maine and South Dakota appellate decisions interpreting the unjust enrichment standard). Because Indirect Purchaser Plaintiffs have indicated that they will present common evidence establishing this additional "appreciation" element, the absence of such a requirement under the Restatement (and the law of the states that follow it) presents no obstacle to class certification.

[41] Indirect Purchaser Plaintiffs have explained the evidentiary link between their antitrust and unjust enrichment claims as such "All of the Classes' claims allege that Abbott's illegal conduct created an exclusionary, anti competitive market for the sale of terazosin and that as a result. Plaintiffs paid too much for their prescriptions Defendants were unjustly enriched by the illegal overcharges and equity requires disgorgement for the benefit of the Plaintiffs and the members of each of the state Classes." *See* IPPs' Mot. at p. 45.

evidence from Dr. Hartman, the amount of excess profits that Abbott reaped because of its allegedly invalid patents and its alleged efforts to block generic competition. As is the nature of unjust enrichment claims, this common evidence will focus on the defendant's gain and not on the plaintiff's loss. Accordingly, it is evident that success or failure in proving this unjust enrichment claim will mean success or failure for the class as a whole, not for individual class members. *See* In re Cardizem, 200 F.R.D. at 352. Therefore, the Rule 23(b)(3) analysis has been met.

c. Common Proof of Damages

In addition to showing class-wide injury as a result of Defendant's conduct, Indirect Purchaser Plaintiffs must show that **[**89]** computation of class-wide damages (or the quantum of injury) is susceptible to common proof. *Domestic Air Transp. Antitrust Litig., 137 F.R.D. 677, 692 (N.D. Ga. 1991)*. ***HN27***[] "Antitrust plaintiffs have a limited burden with respect to showing that individual damages issues do not predominate." In re Cardizem CD Antitrust Litig., 200 F.R.D. 326, 348 (E.D. Mich. 2001) (citing In re Potash Antitrust Litig., 159 F.R.D. at 697). Plaintiffs do not need to supply a precise damage formula at the certification stage of an antitrust action. Instead, in assessing whether to certify a class, the Court's inquiry is limited to whether or not the proposed methods are so insubstantial as to amount to no method at all." *Id.* At the class certification stage, therefore, Indirect Purchaser Plaintiffs need only come forward with plausible statistical or economic methodologies to demonstrate impact on a class-wide basis.

[*699] Upon review of the detailed reports that Indirect Purchaser Plaintiffs' damages expert, Dr. Raymond S. Hartman, submitted in connection with the class certification motions, the Court concludes that Indirect Purchaser Plaintiffs have proffered **[**90]** reasonable damage methodologies for measuring class-wide damages on an aggregate basis and for calculating damages for individual class members on both the antitrust and unjust enrichment claims. Specifically, Dr. Hartman proposes application of a "before-and-after" regression analysis to calculate the impact of delayed generic entry, buttressed by a secondary analysis using the yardstick model. [42] *See* Defs.' Opp'n, at Exhibits 39-40. These economic methods are widely accepted and have been used in numerous other antitrust class actions. *See* In re Cardizem, 200 F.R.D. at 348-49; *see also* In re NASDAQ, 169 F.R.D. at 521. Furthermore, the methodologies are common to the class, and their validity "will be adjudicated at trial based upon economic theory, data sources, and statistical techniques that are entirely common to the class." In re NASDAQ, 169 F.R.D. at 521. And, as explained by Dr. Hartman and by Indirect Purchaser Plaintiffs at the March 12, 2004 oral argument, these methodologies apply equally to the antitrust claims as to the unjust enrichment claims. The only difference in their application stems from different assumptions **[**91]** upon which the calculations are based.

While Defendants complain that Dr. Hartman's methodologies are too imprecise for class certification, and further object to many **[**92]** of the underlying assumptions upon which his calculations are based, such contentions cannot defeat class certification. As noted above, for class certification purposes, plaintiffs need not supply a precise damage formula and the Court need not decide which approach is best-suited to the particularities of this case. "It is sufficient to note at this stage that there are methodologies available, and that Rule 23(c)(1)and (d) allow ample flexibility" to deal with the individual damages issues that may develop. [43] Id. at 522.

---

[42] As part of this analysis, Dr. Hartman calculates the actual price of Hytrin minus the "but for" price absent the illegal conduct, times the quantity that would have been purchased absent the illegal conduct. Using this formula, Dr. Hartman determines: (1) the but-for penetration rate of generic terazosin during the relevant period; (2) the but-for prices of Hytrin and generic terazosin; and (3) the price differential between actual Hytrin prices and the but-for price of its AB-rated generic bioequivalent during the class period. Dr. Hartman has determined each of these inputs and calculated actual damages, with data covering a sufficient number of transactions so as to be scientifically accurate. Dr. Hartman has also factored into his calculations the necessary variations in the industry, such as pricing and substitution rates.

[43] Both Rule 23(e)(1)(C), which allows for the amendment of class certification orders at any time before final judgment, and Rule 23(d), which authorizes courts to make appropriate orders to facilitate class action proceedings, provide ample avenues for the Court to deal with any potential difficulties associated with damage allocations as they may arise. In addition, while the Court acknowledges that this case has progressed further than most cases prior to the class certification ruling, the temporal proximity to trial does not mandate that the Court select a definite damages-methodology, particularly in advance of any *Daubert* proceedings.

[93]** Further, Defendants' challenges to Dr. Hartman's methodologies are concerns that relate primarily to the allocation of damages among individual class members, not to the computation of aggregate damages on a class-wide basis. Assuming the jury renders an aggregate judgment, allocation will become an intra-class matter accomplished pursuant to a court-approved plan of allocation, and such individual damages allocation issues are insufficient to defeat class certification. *See* *In re Potash, 159 F.R.D. at 697* ("The amount of damages largely involves individualized questions. This is typically true in antitrust class actions, however, and does not preclude certification."). Indirect Purchaser Plaintiffs need only show that the proof they will utilize is sufficiently generalized in nature that "the class action will provide a tremendous savings of time and effort" to the Court. Based on the analyses offered by Dr. Hartman, the Court is satisfied that Indirect Purchaser Plaintiffs have sufficiently demonstrated that common issues relating to Defendants' liability, in the aggregate, predominate over potential individual damage issues.

[*700] 2. Superiority of Class Action Mechanism

[94]** ***HN28***[] *Rule 23(b)(3)* requires that the Court determine that the class action device is superior to other available methods for the fair and efficient adjudication of these controversies. Factors to be considered as part of this analysis include: (1) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (3) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (4) the difficulties likely to be encountered in the management of a class action. *See* *Fed. R. Civ. P. 23(b)(3)*. Considering these factors, it is clear that a class action is the superior method for the fair and efficient adjudication of this controversy.

The class action mechanism offers substantial economies of time, effort, and expense for the litigants in this matter, as well as for the Court. Indeed, Indirect Purchaser Plaintiffs' "conservative" estimate of the number of potential class members demonstrates the superiority of the class mechanism. Multiple **[**95]** lawsuits brought by thousands of consumers and third-party payers in seventeen different states would be costly, inefficient, and would burden the court system. *See* *In re Cardizem, 200 F.R.D. at 351* (citing *In re NASDAQ, 169 F.R.D. at 527*).

Further, as to the consumer class members, ***HN29***[] the class action device is particularly appropriate where, as here, it is necessary to "permit the plaintiffs to pool claims which would be uneconomical to litigate individually." *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 809, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985)*; [44] *see also* *In re NASDAQ, 169 F.R.D. at 527* (noting that "the exclusion of class members who cannot afford separate representation would be neither 'fair' nor an 'adjudication' of their claims"). If not for the class mechanism, consumers who purchased Hytrin for only a short period of time, but who nonetheless suffered an injury based on Defendants' alleged anticompetitive conduct, would be effectively left without any reasonable means of recovering their damages. *See* *Payne v. Goodyear Tire & Rubber Co., 216 F.R.D. 21, 29 (D. Mass. 2003)* (recognizing that absent the **[**96]** class action mechanism, "the litigation costs, including extensive scientific expert analysis, of pursuing individual claims ... would be likely, in many cases, to be prohibitive."). And while the third-party payer class members may be financially able to assert their own claims in separate actions, the fact that the same allegedly anticompetitive conduct gives rise to each class member's economic injury makes it highly desirable to concentrate litigation of their claims in this forum. *See* *In re Synthroid Marketing Litig., 188 F.R.D. 295, 295-96 (N.D. Ill. 1999)*.

Defendants argue that the proposed classes are unmanageable because: **[**97]** (1) they would require countless individualized analyses of choice of law questions; [45] **[**98]** (2) substantial variations exist in the individual state

---

[44] *See also* *Deposit Guaranty Nat'l Bank v Roper, 445 U.S. 326, 339, 63 L. Ed. 2d 427, 100 S. Ct. 1166 (1980)* (noting that "where it is not economically feasible to obtain relief within the traditional framework of a multiplicity of small individual suits for damages, aggrieved persons may be without any effective redress unless they may employ the class action device.").

[45] In particular, the Court finds Indirect Purchaser Plaintiffs' response to this argument particularly persuasive. Indirect Purchaser Plaintiffs point out that they "are not seeking to apply a single state's law to a nationwide, or even a multistage, class of

unjust enrichment laws; and (3) Indirect Purchaser Plaintiffs' proposed methodologies for determining damages are unworkable. These manageability arguments, however, assume that individual rather than common issues predominate as to both the fact of injury and the quantum of injury. [46] As the **[*701]** Court has already concluded, the common issues, and not the individual question, are the ones that predominate. *See supra* Section III.C.1. Further, this position is in stark contrast to the arguments Defendants advanced before state courts in California and New York. [47] And finally, despite their many objections to the class action mechanism, Defendants have failed to suggest any superior alternatives.

[99]** In reaching this conclusion, the Court acknowledges that management of the several state classes will raise numerous challenges. However, these challenges are ones that routinely arise in complex litigation, and they are insufficient to overcome the innumerable advantages that class treatment will afford. Further, Indirect Purchaser Plaintiffs have presented the Court with compelling arguments demonstrating the manageability of the classes, particularly in light of the common evidence that will be used to prove Defendants' alleged illegal conduct. Accordingly, the Court finds that the superiority requirement of *Rule 23(b)(3)* has been satisfied.

D. Appointment of Class Counsel Under *Rule 23(g)(1)*

On June 6, 2000, the Court designated the firms of Lowey Dannenberg Bemporad & Selinger, P.C. ("LDBS") and Cohen, Milstein, Hausfeld & Toll, P.L.L.C. ("CMHT") as co-Lead Counsel for the Indirect Purchaser Plaintiffs. *See* [DE-110] at P5. The law firm of Gauthier, Downing, LaBerre, Beiser & Dean was also added as additional Co-Lead Counsel on August 25, 2000, but was ultimately replaced by Wallace, Jordan, Ratliff & Brandt, LLC ("WJRB") [48] on February 18, 2004 [DE-1072].

[100]** While these firms have been acting on behalf of the proposed Indirect Purchaser Classes as interim counsel, pending a final decision on class certification, the Court must now formally appoint class counsel to represent the certified Indirect Purchaser Classes for the remainder of these proceedings. Pursuant to the amendments to *Rule 23* that took effect on December 1, 2003, ***HN30***[] the Court, in making this appointment, must consider: (1) the work counsel has done in identifying or investigating potential claims in this action; (2)

---

purchasers, but rather to apply state law to separate state classes that include those persons who purchased Hytrin in each state." *See* IPPs' Reply, at p. 24. Therefore, each state's substantive ***antitrust law*** will apply to that particular state class' claims. As addressed in Section III.C.1 above, this does not pose a manageability problem because the applicable substantive laws are virtually identical in their required elements.

[46] In addressing manageability arguments similar to those that Defendants assert, the Southern District of New York noted that "if individual damage questions were a barrier to class certification, there would be little if any place for the class action device in the adjudication of antitrust claims." *In re NASDAQ, 169 F.R.D. at 524*. In the event that complications in calculating damages arise, the court in *Cardizem* has suggested three solutions for remedying the problem: (1) the Court could alter or amend its class certification order under *Rule 23(c)(1)*; (2) the Court could bifurcate the liability and damages phases of the litigation, and only allow the action to proceed as a class for liability purposes; and (3) the Court could appoint a special master or a magistrate judge to assist in calculating damages. *See In re Cardizem, 200 F.R.D. at 351* (citing *Little Caesar Entm't, Inc v. Smith, 172 F.R.D. 236, (E.D. Mich. 1997))*. All of these options are similarly available to this Court should complications arise.

[47] As pointed out by Indirect Purchaser Plaintiffs, Defendants successfully stayed other individual and class cases in various state courts pending the outcome of the state law claims now before this Court. *See* DE-1021 at pp. 14-15. In support of their motions to stay, Defendants contradicted their current position, arguing that this Count is the superior forum to resolve all of the state law claims. For instance, in *Damels v. Abbott Lab., et al,* Case No. 00CC04975 (Cal.), Defendants acknowledged that this Court "is uniquely positioned to reach a comprehensive and appropriate resolution of this nationwide dispute that adequately accounts for the interests of all concerned and avoids inconsistent or duplicative judgments." In another related state court case, *Asher v. Abbott Laboratortes, et al, 307 A.D.2d 211, 763 N.Y.S. 2d 555 (1st Dep't 2003)*, the New York appellate court, responding to Defendants' request to stay, agreed that this "federal action will result in a more complete disposition of the basic antitrust issues alleged." *Id.* Therefore, Defendants have, in essence, conceded that this class action is the superior mechanism for adjudicating these disputes.

[48] Although WJRB was only appointed as Co-Lead Counsel on February 18, 2004, the Court notes that the firm had previously been an active member of the Executive Committee on behalf of the end-payer classes.

counsel's experience in handling class actions, other complex litigation, and claims of the type asserted in this action; (3) counsel's knowledge of the applicable law; and (4) the resources counsel will commit to representing the class. *See* *Fed. R. Civ. P. 23(g)(1)(C)(I)*. The Court may also consider any other matter pertinent to counsel's ability to fairly and adequately represent the interests of the class and may, if it deems it **[*702]** necessary, direct the proposed class counsel to provide information on any subject pertinent to the appointment. *See* *Fed. R. Civ. P. 23(g)(1)(C)(ii)-(iii)*.

[101]** To comply with this recent amendment to *Rule 23*, the Court, on February 9, 2004, directed Indirect Purchaser Plaintiffs to provide supplemental information regarding proposed class counsel. [49] In their response to the Court's query, Indirect Purchaser Plaintiffs have detailed the work performed by class counsel LDBS, CMIIT and WJRB. Specifically, Indirect Purchaser Plaintiffs note that Co-Lead Counsel have explored every avenue of recovery on behalf of the end payer classes, including several claims that this Court has dismissed. *See* IPPs' Pre-Argument Submission on Class Certification, at p. 23. Co-Lead Counsel's efforts have included reviewing millions of pages of documents, taking depositions around the country, surviving several motions to dismiss, and prosecuting the class certification motions. *Id.* In so doing, Co-Lead Counsel has committed substantial resources to representing the classes, already spending approximately $ 1,000,000 in prosecuting this action, and will continue to bear substantial expenses to represent the Indirect Purchaser Classes. *Id.* at pp. 23-24.

[102]** The consideration that the Court finds to be most persuasive, however, relates to Co-Lead Counsel's experience in, and knowledge of, the applicable law in this field. As noted in the firm resumes of LDBS, CMHT, and WJRB, as well as the individual resumes of the firms' members, Co-Lead Counsel have extensive experience in the antitrust and complex litigation fields. For example, LDBS served as co-lead counsel for end payers in the *In re Cardizem* case in Michigan and CMHT was co-lead counsel for end payers in the *Buspirone* litigation in New York, among many others. [50] *Id.* at Tab N. The Court also notes that Co-Lead Counsel have considerable trial experience in complex litigation matters. *Id.* Based on the Court's observations of Co-Lead Counsel, a review of their resumes, and the absence of any argument by Defendants disputing the qualifications of counsel, the Court must conclude that Co-Lead Counsel have fairly and adequately represented the interests of the end-payer classes to date, and expects that they will continue to do so. Accordingly, LDBS, CMHT, and WJRB are appointed as class counsel to represent the certified Indirect Purchaser Classes for the remainder **[**103]** of these proceedings.

IV. Conclusion

For the reasons expressed in the foregoing opinion, it is hereby

ORDERED that:

(1) The Indirect Purchaser Plaintiffs' Motions for Class Certification of a State-Wide Class of End-Payers are GRANTED in: Alabama [DE-453], California [DE-452], Florida [DE-450], Illinois [DE-464], Kansas [DE-463], Maine [DE-462], Michigan [DE-461], Minnesota [DE-460], Mississippi [DE-459], Nevada [DE-458], New Mexico [DE-455], New York [DE-456], North Carolina [DE-454], North Dakota [DE-465], South Dakota [DE-466], West Virginia [DE-467], and Wisconsin [DE-468] [51];

---

[49] Specifically, the Court's Order [DE-1055] required Indirect Purchaser Plaintiffs to submit additional information regarding the work proposed class counsel has done in this case, counsel's knowledge of the applicable law (and particularly, the law as to damage calculation involving third-party payers of ultimate consumer drug costs), the resources counsel will commit to representing the class, and counsel's proposed terms as to attorneys fees and nontaxable costs.

[50] While Indirect Purchaser Plaintiffs have not provided a list of cases in which Co-Lead Counsel WJRB participated, the Court notes that members of that firm have experience as lead counsel to several Blue Cross and Blue Shield plans in national mass tort litigation, including proceedings involving breast implants and fen-phen.

[51] The class representatives for each state class of end-payers are identified in Section III.A., *supra.*

(2) The Indirect Purchaser Plaintiffs' Motion for Class **[**104]** Certification of a State-Wide Class of End-Payers in the District of Columbia [DE-451] is DENIED;

(3) The Indirect Purchaser Plaintiffs' Motion for Class Certification of a State-Wide **[*703]** Class of End-Payers in New Jersey [DE-457] is DENIED AS MOOT, in light of the Court's dismissal of the New Jersey indirect purchasers claims in its September 11, 2002 Order [DE-873];

(4) In those states where the Court is granting the motions for certification of a state-wide class of end-payers, the definition of the classes shall be as follows:

> All persons and entities who or which have at any time from October 15, 1995 to June 30, 2002, paid all or part of the purchase price of Hytrin or its AB-rated generic bioequivalents other than for resale, in [state] or via mail for residents of [state]. Excluded from the Class are the Defendants, their officers and directors, their direct and indirect parent and subsidiary corporations and their officers and directors; government entities; entities that purchased Hytrin and its generic bioequivalents for resale, to the extent of such purchases for resale; direct purchasers of Hytrin and its generic bioequivalents from Defendants, to the extent **[**105]** of such direct purchases; and indirect purchasers who suffered no economic injury as a result of Defendants' allegedly unlawful conduct.

(4) These determinations are conditional and may be modified prior to the decision on the merits in light of any changes in the circumstances that make such modification advisable. *See* *Fed. R. Civ. P. 23(c)(1)*.

DONE and ORDERED in Miami, Florida, this 8th day of April, 2004.

PATRICIA A. SEITZ

LexisNexis® Headnotes

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN1[] **Standards of Review, Substantial Evidence**

In determining whether the evidence is sufficient to support a jury's verdict, the appellate court views the evidence in a light most favorable to the appellee. The appellate court must assume as proven all facts that the appellee's evidence tended to show, give it the benefit of all reasonable inferences, and assume that all conflicts in evidence were resolved in its favor.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN2[] **Conspiracy to Monopolize, Sherman Act**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. Because defendants typically cannot be relied on to confess that they have entered into an unlawful agreement, conspiracy cases usually must be proved by circumstantial evidence. Thus, an antitrust plaintiff may prove the existence of a combination or conspiracy by providing either direct or circumstantial evidence sufficient to warrant a finding that the conspirators had a unity of purpose or common design and understanding, or a meeting of the minds in an unlawful arrangement.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN3[] **Antitrust & Trade Law, Sherman Act**

Although it may be in the form of circumstantial evidence, a plaintiff must present some evidence that tends to exclude the possibility that the alleged coconspirators acted independently. Conduct that is as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Furthermore, in situations where a trade association, its officers, employees or members are found to have violated the antitrust laws, membership in the association will not automatically involve all members in the violation. There must, instead, be some evidence of actual knowledge of, and participation in, the illegal scheme in order to establish a violation of the antitrust laws by a particular association member.

The appellate court reviews a district court's determination that an agreement constituted a per se antitrust violation de novo.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] Antitrust & Trade Law, Sherman Act

Despite its broad language, *15 U.S.C.S. § 1* has long been interpreted to outlaw only those restraints that are unreasonable. The United States Supreme Court has set forth three methods for analyzing the reasonableness of a restraint on trade: rule of reason analysis, per se analysis, and quick look analysis. The rule of reason is the prevailing standard for determining a restraint's effect upon competition in a relevant market. Under this approach, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Per Se Rule Tests, Manifestly Anticompetitive Effects

When a restraint's negative impact on competition is immediately discernable and the restraint has no redeeming virtue, the per se mode of analysis applies. Unlike the rule of reason analysis, per se analysis does not allow inquiry into the intent behind the restraint, its pro-competitive justifications, or its actual effect on competition. Instead, the per se mode of analysis applies a conclusive presumption of illegality. Because of the strength of this presumption, the per se analysis is appropriate only where experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it. Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In cases where the repercussions of a suspicious restraint are unclear, courts may make a truncated inquiry into the restraint's output or price effects before deciding which mode of analysis to apply. This "quick look" approach is reserved for circumstances in which the restraint is sufficiently threatening to place it presumptively in the per se class, but lack of judicial experience requires at least some consideration of proffered defenses or justifications. After taking a quick look at the defendant's proffered reasons for the restraint, a district court has three options: First, it may reject that evidence and condemn the restraint with little or no inquiry into power (as unlawful "per se"); second, it may find the evidence essentially unconvincing, but still have a few doubts about whether the restraint itself is appropriate for per se condemnation, thus making at least a quick look at market power appropriate; or third, it may find the evidence plausible, in which case the restraint is subjected to general rule of reason analysis requiring full consideration of power and anticompetitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Exclusion by the joint setting and enforcement of standards is ordinarily evaluated under the rule of reason. This is so because the creation and enforcement of standards, including safety standards, often has pro-competitive effects.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

When determining whether to apply the rule of reason analysis to non-price advertising restrictions related to product safety, the issue is not whether the restrictions were procompetitive, but whether they could be.

HN14[] **Testimony, Expert Witnesses**

A district court has great latitude in determining whether expert testimony meets the reliability requisites of Fed. R. Evid. 702. In making that determination, the district court is free to evaluate one or all of the following factors: (1) whether the theory or technique can be or has been tested; (2) whether the theory or technique has been subjected to peer review and publication; (3) whether the theory or technique has a known or potential error rate and standards controlling the technique's operation; and (4) whether the theory or technique is generally accepted in the scientific community.

Counsel: For CRAFTSMEN LIMOUSINE, INC., a Missouri corporation, JMRL SALES & SERVICE, INC., a Missouri corporation dba Craftsmen Limousine, Plaintiffs - Appellees (03-1441, 03-1544): Fred E. Stoops, Sr., Gary L. Richardson, Keith A. Ward, RICHARDSON & STOOPS, Tulsa, OK. Charles L. Richardson, Mark L. Collier, Nancy C. Curtis, RICHARDSON & WARD, Tulsa, OK. Matthew Francis Trokey, CANTWELL & SMITH, Branson, MO.

For FORD MOTOR COMPANY, a Delaware Corporation, Defendant - Appellant (03-1441): David C. Hilliard, Janet A. Marvel, Nerissa Coyle, PATTISHALL & MCAULIFFE, Chicago, IL. Richardson, RICHARDSON & WARD, Tulsa, OK. George Elliott Feldmiller, Lawrence M. Berkowitz, Patrick J. Stueve, Kirk A. Peterson, H. David Barr, BERKOWITZ & STANTON, Prairie Villiage, KS.

Judges: Before MELLOY, **[**2]** LAY, and SMITH, Circuit Judges. LAY, Circuit Judge, dissenting.

Opinion by: MELLOY

Opinion

[*763] MELLOY, Circuit Judge.

Limousine manufacturers, Craftsmen Limousine, Inc. and JRML Sales & Service, Inc., collectively referred to as "Craftsmen," sued American Custom Coach ("American Coach"), several other limousine manufacturers, and Ford Motor Company ("Ford") for antitrust violations under the Sherman Act, 15 U.S.C. § 1. [1] Craftsmen alleged that

---

[1] Craftsmen voluntarily dismissed or settled with all defendants but Ford and American Coach.

defendants conspired to prevent it from advertising in the limousine industry's two trade publications and from attending trade shows. At trial, the jury rendered a verdict in favor of Craftsmen in the amount of $ 2,109,707.00. Craftsmen then filed a motion to treble the verdict and for attorney fees and costs. After denying defendants' post-trial motions, the district court granted Craftsmen's motion for fees and trebled Craftsmen's damage award to $ 5,941,621.00. Defendants now appeal. We affirm in part and reverse in part.

[3]** **[*764]** I. BACKGROUND

A. Craftsmen, Ford, American Coach, & the National Highway Traffic Safety Administration

Craftsmen is a closely held corporation owned by Robert Haswell and Marc Haswell. Since it began in the late 1980's, Craftsmen has converted many automobiles, including Ford's Lincoln Town Cars, into limousines. Like other coachbuilders, Craftsmen creates limousines by cutting a base vehicle in half and adding structural pieces of varying lengths in the middle. Craftsmen sells from an inventory of pre-built units and also offers conversion services on vehicles already owned by the end-users. American Coach, one of the largest manufacturers of limousines in the United States, is one of Craftsmen's direct competitors.

Ford does not make limousines. Instead, it manufactures base vehicles that are later converted into limousines by independent coachbuilders like American Coach and Craftsmen. During the relevant time period in this case, approximately sixty percent of the six thousand limousines produced each year were converted from Ford's Lincoln Town Cars.

The limousine industry is regulated by the National Highway Traffic Safety Administration. The National Highway Traffic **[**4]** Safety Administration promulgates Federal Motor Vehicle Safety Standards with which limousine manufacturers must comply. Coachbuilders are responsible for self-certifying that their vehicles meet the federal safety standards. This self-certification can be in the form of engineering analysis, computer analysis, or other valid documentation. If the National Highway Traffic Safety Administration determines that a coachbuilder's limousine fails to comply with federal standards, it has the authority to fine the coachbuilder and recall the limousine.

In 1992, upon the National Highway Traffic Safety Administration's request, Craftsmen submitted data identifying its limousine conversion techniques. Craftsmen did not provide engineering analyses to demonstrate compliance with all Federal Motor Vehicle Safety Standards requirements. Instead, it claimed its vehicles were safe based on the construction techniques employed and the fact that none of its customers ever returned a limousine out of a concern for safety. [2] At the time, no engineers worked for Craftsmen, and the company had not contracted an independent engineer to test the safety of its vehicles.

[5]** After receiving Craftsmen's data, the National Highway Traffic Safety Administration conducted an inspection of Craftsmen's limousines. The investigation resulted in the recall of some of Craftsmen's vehicles. One recall required Craftsmen to put a placard in its limousines instructing passengers that they had to "unlock door and pull door latch" to exit the vehicle. Another required Craftsmen to replace tires on approximately twenty of its limousines. Craftsmen complied with the recall orders and was not fined by the National Highway Traffic Safety Administration.

B. The Formation of Ford's QVM Program

On April 3, 1987, a wedding party in New York was killed when its limousine was hit and split in half as it crossed an intersection. National media coverage of **[*765]** this accident, coupled with other reports of limousine fires and tire blowouts, prompted the National Highway Traffic Safety Administration to conduct an investigation of the limousine industry. The National Highway Traffic Safety Administration found that there were approximately fifty to sixty coachbuilders nationwide. A few large coachbuilders converted up to one thousand vehicles per year, but many coachbuilders converted **[**6]** one hundred vehicles or less. Some coachbuilders had engineering backgrounds, others did not; some worked out of dirt floor garages, and others out of modern facilities. At trial, Robert Hellmuth,

---

[2] Craftsmen also relied upon testing Ford had conducted on its base vehicles to verify the safety of components that were not altered during the conversion process, such as door locks.

former director of the National Highway Traffic Safety Administration's Office of Vehicle Safety Performance, testified that there was little uniformity in the conversion techniques being used at the time. Most coachbuilders either disregarded the Federal Motor Vehicle Safety Standards or were unaware they existed.

After the National Highway Traffic Safety Administration's investigation, Robert Hellmuth urged Ford, General Motors, and the members of the limousine industry to pool their resources to develop testing to make sure that limousines were in compliance with federal safety standards. At trial, Robert Hellmuth recalled his discussion with Ford and General Motors as follows:

> I said, you know, [the coachbuilders] are buying your product, and it would certainly be a wonderful idea for you to help them out, because they certainly don't have the facilities you do, they don't have the technical information you do, and if, if they can't rely on you, you know, they're really not **[**7]** going to be able to build a safe vehicle. (Tr. 1536-37.)

Thereafter, Ford assembled a team of forty-five to fifty engineers to ensure that the 418-Town Car chassis met all federal safety requirements when stretched within certain defined limits. After spending over one year and millions of dollars designing and testing the new 418-Town Car chassis, Ford initially limited 418-conversions to end-products that weighed 7,100 pounds or less and were not longer than 85 inches. Later, Ford determined that 418-Town Cars could be safely stretched to 120 inches.

After conducting this research, Ford formed a vehicle certification program called "Quality Vehicle Modifier" ("QVM"). Through its QVM program, Ford distributed information explaining how to convert Ford 418-Town Cars into limousines that met Federal Motor Vehicle Safety Standards. The manufacturing guidelines, which were available to non-QVM participants and QVM participants alike, set forth conversion techniques, quality control procedures, and continuous improvement practices. As an incentive for complying with its guidelines, Ford paid QVM participants $ 2,000 to $ 3,000 for each 418-Town Car properly converted. If a QVM participant **[**8]** stretched a 418-Town Car outside the limits Ford specified, or stretched any other Ford product, the coachbuilder would no longer be eligible for the QVM program incentives unless it provided test data establishing Federal Motor Vehicle Safety Standards compliance. [3] Ford engineer, Roy Radokovich, testified that by helping coachbuilders build safer products that met all Federal Motor Vehicle Safety Standards, Ford hoped to reduce the potential liability it faced from having its name associated with untested limousines. Radokovich further testified that Ford hoped the QVM program would improve **[*766]** its product image and help Ford compete with General Motors in the luxury car market.

Within two years after Ford's introduction of the QVM program, General Motors introduced a similar safety program, the Cadillac Master Coachbuilders program ("CMC"). The vast **[**9]** majority of coachbuilders in the industry participated in the QVM or CMC program or both.

Shortly after unveiling QVM, Roy Radokovich visited Craftsmen's facilities and asked Robert Haswell to enroll Craftsmen in the program. Haswell testified that he declined for the following reasons: (1) Craftsmen had little to gain from joining, as it was already employing the conversion techniques described in the QVM manual; (2) Craftsmen had already safely built and sold a number of limousines that exceeded the QVM's length restrictions, and if it were to stop building these longer limousines, Craftsmen would dissolve; [4] **[**10]** and (3) Craftsmen did not want to purchase insurance naming Ford as an insured, which was a requirement of the QVM program. At trial, Radokovich admitted that he was impressed with Craftsmen's building process. He testified that Craftsmen had all the QVM information Ford had disseminated, and that Craftsmen had built conversion parts in accordance with the

---

[3] To assist those coachbuilders wanting to safely go beyond the QVM guidelines, Ford provided the names of engineering firms that did testing or analysis. T1461.

[4] The record indicates that more than ninety percent of Craftsmen's conversions were over 120 inches.

QVM guidelines. A National Highway Traffic Safety Administration safety compliance engineer who inspected Craftsmen's limousines in the early 1990's agreed that Craftsmen appeared to be following QVM practices. [5]

At trial, Craftsmen argued that although QVM disguised itself as an overseer of safety, it was actually formed to increase Ford's profits from its control of the limousine manufacturing market. Marc Haswell testified that Ford's safety goals were belied by the fact that some QVM builders reduced the gauge of the metal they used and omitted structural pieces that ensured the structural integrity of their limousines. Marsha Tortora, one of the first participants in QVM, testified that from 1990 to 1997 Ford did nothing to determine whether her limousines were **[**11]** safe. Craftsmen claimed that during that time period, Ford never tested the safety of any of the vehicles produced by QVM manufacturers.

Robert Hellmuth, former director of the National Highway Traffic Safety Administration's office of Vehicle Safety Performance, gave a different account of the efficacy of the QVM program. He stated:

> The people that got into the QVM program really started building nice vehicles because they had something they could hang their hat on . . . . They had all the Ford test data[.] Ford did all the crash work for them, did all the documentation, they did everything. Basically if you were in the QVM program and you built it like they told you to build the thing, it would be fully certifiable, it would meet the [federal] standards, it would be a safe vehicle. (Tr. 1547-48.)

Hellmuth further testified that Ford's QVM handbook was "basically a cookbook recipe on how to build a limousine to **[*767]** meet all the federal safety standards." (Tr. 1547.)

C. The Formation of LIMO

Around the same time Ford created QVM, the National Highway Traffic Safety Administration, Ford, and General Motors suggested the formation of the Limousine Industry Manufacturers' **[**12]** Organization ("LIMO"). The National Highway Traffic Safety Administration hoped that LIMO would provide its members with technical information, keep them apprised of upcoming legislation, and enable them to pool their resources for additional safety testing. The record suggests that LIMO did not accomplish all of these objectives. In 1990, the National Highway Traffic Safety Administration commended LIMO's effort to organize safety testing but criticized its failure to provide significant test data. [6]

Although Ford was not a limousine manufacturer, it became a non-voting member of LIMO. American Coach was a voting member. Craftsmen contends that defendants lobbied to exclude it from LIMO. Former LIMO President, Marsha Tortora, testified that during LIMO meetings, Ford's representative would "talk about the importance of QVM, [and] that they had to **[**13]** keep non-compliant people out." (Tr. 323.) Tortora testified that American Coach's representative was equally adamant against allowing non-QVM coachbuilders to join LIMO. According to Tortora, he feared it would take the spotlight away from American Coach's product and would "make Ford unhappy." (Tr. 295.)

Although Tortora believed that LIMO's doors should be opened to QVM and non-QVM coachbuilders alike, LIMO's bylaws initially limited membership to QVM coachbuilders. However, the bylaws were amended in 1995 to allow non-QVM coachbuilders to join LIMO upon submitting valid crash-test results. Because Craftsmen was not a member of QVM and did not perform crash-tests on its vehicles, it was not eligible to join LIMO.

D. Alleged Group Boycott

---

[5] The National Highway Traffic Safety Administration safety compliance engineer who inspected the brake systems on Craftsmen's vehicles concluded: "It appears Craftsmen exercised caution during vehicle production by following Ford's QVM guidelines for limousine manufacturers and sound manufacturing processes for all other vehicles. Therefore, Craftsmen's limousines may meet the performance requirements of [the federal safety standard pertaining to hydraulic brakes], but there is no test data to form definite conclusions." (App. at 2320.)

[6] The only test reports LIMO submitted to the National Highway Traffic Safety Administration were in regard to the safety of limousine hydraulic brake systems.

To reach its target market, Craftsmen advertised in limousine magazines and displayed its vehicles at the magazines' trade shows. Craftsmen advertised in *Limousine & Chauffeured Magazine* from 1989 to 1991, when the two had a disagreement over a billing dispute. Thereafter, it began advertising in *Limousine Digest*. Until 1997, *Limousine Digest* and *Limousine & Chauffeured Magazine* were the only trade publications in the limousine **[**14]** industry. [7]

In 1993, *Limousine & Chauffeured Magazine* enacted a policy limiting all limousine advertisements and participation in its trade shows to products that met QVM or CMC standards. Thereafter, *Limousine Digest* also stopped allowing Craftsmen to advertise vehicles that exceeded QVM restrictions, and it rescinded Craftsmen's invitation to attend its 1995 trade show. In May 1996, *Limousine Digest* formally enacted a restrictive advertising policy similar to the one *Limousine & Chauffeured Magazine* had previously adopted. [8] However, *Limousine Digest's* **[*768]** policy was not a blanket-ban on all non-QVM products; it allowed non-QVM coachbuilders to advertise **[**15]** upon submitting independent proof of Federal Motor Vehicle Safety Standards compliance.

At trial, Craftsmen introduced evidence that the magazines' restrictive advertising policies were the result of threats leveled by Ford, American Coach, and other members of LIMO. Marsha Tortora testified that *Limousine & Chauffeured Magazine's* publisher, Sara McLean, told her that the magazine's policy was a result of direct pressure she had received from Ford and the QVM coachbuilders who were voicing their concerns through LIMO. (Tr. 310-12.) Similarly, Robert Haswell testified that *Limousine Digest's* publisher, **[**16]** Ric Cohen, told him that he "was getting pressure to change [Craftsmen's] ad so that [Craftsmen] did not show anything that [QVM coachbuilders] couldn't build." (Tr. 936.) Haswell further testified that when he asked Cohen why he had removed a particular Craftsmen advertisement from *Limousine Digest*, Cohen replied that he had received "all kinds of heat," and that "in order to have a show, [he] had to agree to remove [Craftsmen] and the other non-QVM builders from the magazine as well as the show." (Tr. 958.)

Craftsmen also introduced written evidence showing that *Limousine Digest* was pressured into adopting its advertising restrictions. Minutes of an April 30, 1996 LIMO meeting established that LIMO members unanimously agreed not to endorse or participate in any publication or trade show that promoted non-QVM/CMC coachbuilders. (App. at 2091-92.) Thereafter, LIMO President, Cabot Smith, wrote *Limousine Digest's* publisher, Ric Cohen, a letter informing him of LIMO's policy. (App. at 2093-94.) Upon receiving Smith's letter, Ric Cohen, replied with the following confirmation:

> Effective immediately, we have decided to respond favorably to all of your requests **[**17]** by removing all Non-Compliant advertisements from *Limousine Digest*, as of the very next issue to go to press (July '96). We will also maintain our policy of only allowing QVM and CMC certified limousine manufacturers to exhibit their vehicles at the '96 Limo Digest Show. [9] We are making those concessions contingent upon your agreement to provide the full and exclusive endorsement of LIMO and all of its members for the '96 Limo Digest Show.

[7] In 1997, two new magazines entered the limousine publications market, *Dealer's National Limousine Exchange and International Limousine and Livery Trader*. At trial, Haswell testified that these two publications were not comparable to *Limousine Digest* or *Limousine & Chauffeured Magazine*, as neither provided national exposure.

[8] Although Craftsmen was allowed to attend *Limousine Digest's* 1996 trade show, which took place before *Limousine Digest* adopted its formal ban, Craftsmen received unfavorable treatment: it was relegated to an obscure location behind a curtain; it was required to remove its display car from the showroom after only one night of the three-night show; and it was not allowed to distribute brochures.

[9] At trial, Ric Cohen testified that *Limousine Digest's* policy allowed non-QVM/CMC coachbuilders to advertise if they presented independent proof of Federal Motor Vehicle Safety Standards compliance. (Tr. 1285.) Ultra Limousine, a non-QVM coachbuilder, provided *Limousine Digest* with independent crash-testing data and subsequently advertised a non-QVM limousine in the publication. Ultra agreed to share its crash-testing data with Craftsmen in exchange for $ 35,000, half the crash-testing cost. Robert Haswell testified that he declined Ultra's offer, because crash-testing was not required for Craftsmen to meet National Highway Traffic Safety Administration standards. The record contains a memorandum written by a National Highway Traffic

> Please understand the severe financial implications that this will have upon my company and kindly convey your understanding to any members of our industry **[*769]** that can help to support the changes we are making. I would greatly appreciate LIMO's assistance in attracting additional and more regular support from Lincoln and Cadillac to further assist us in this development. (App. at 2095.)

[18]** Two days after receiving Cohen's letter, Cabot Smith sent the following fax to his fellow LIMO members:

> Congratulations!
>
> Attached you will find a commitment in writing from Ric Cohen of *Limousine Digest* to remove all non-QVM and non-CMC advertisers from his magazine and from displaying at this show.
> The message LIMO sent was loud and clear because it was supported in writing by the individual member companies.
> This unified voice and member support is what LIMO needs to accomplish its objectives. (App. at 2085.)

Craftsmen also presented evidence that LIMO members continued to apply pressure to *Limousine Digest* even after the publication adopted its 1996 restrictions. Coachbuilder Bill Alden testified that he listened to a telephone conference call between Cohen and a number of LIMO members in 1997 or 1998, during which the coachbuilders threatened to quit advertising in *Limousine Digest* if it allowed non-QVM coachbuilders to attend its trade show. To the best of Alden's knowledge, no one from Ford participated in the conference call.

E. Was Ford Driving LIMO?

Ford argues that to the extent LIMO may have influenced *Limousine & Chauffeured* **[**19]** *Magazine* or *Limousine Digest* to exclude non-QVM coachbuilders, Ford played no role in LIMO's actions. Ford relies on the testimony of Marsha Tortora to support its position. Tortora admitted that the main focus of every LIMO meeting was on how to keep non-QVM coachbuilders from advertising and attending trade shows, but she said that most of those discussions were held in executive sessions that Ford, as a non-voting member, was not allowed to attend. Tortora acknowledged that some of the discussions took place in open session, but stated that "Ford was very hands off in those conversations most of the time." [10] According to Tortora, "in open discussion, . . . Ford didn't tell [coachbuilders] not to participate in the shows, they said they won't participate in the shows that had non-QVM's in it." (Tr. 372.)

[20]** Craftsmen maintains that Ford was well aware of LIMO's goals, inasmuch as it attended LIMO meetings, heard its discussions about boycotting non-QVM dealers, and lobbied to keep non-QVM members from joining LIMO. Craftsmen notes that although Tortora testified that Ford was ordinarily "very hands off" during the open session discussions about advertising, she also testified that it was "no secret" that Ford did not want QVM members to advertise in magazines that promoted non-QVM products. (Tr. 375-76). In fact, she stated that "[Ford] told [her] outright and in writing that [she] couldn't participate or sell or have any business with anybody who was non-QVM." (Tr. 376.)

F. Damages

Craftsmen claimed that it lost conversion fees, ranging from $ 25,000 to $ 35,000 per **[*770]** vehicle, from January 1995 through June 1998. [11] It presented evidence that its sales decreased from approximately 50 vehicles in 1995 to approximately 37 vehicles in 1997. Craftsmen alleged that this decline was a result of defendants' alleged

---

Safety Administration safety compliance engineer indicating that the National Highway Traffic Safety Administration did not require Craftsmen to crash-test its limousines due to their weight. (App. at 2317).

[10] During cross-examination, Tortora testified that when Vinnie Bergman, a non-QVM coachbuilder, tried to join LIMO, Ford spoke out loudly against it. Despite Ford's protest, LIMO extended membership to Bergman. Defendants claim that they did not want Bergman in LIMO, because he had a reputation for dishonesty and engaged in questionable business practices.

[11] The record suggests that by 1998, Craftsmen began converting sport utility vehicles and buses to mitigate its damages. One of the sport utility vehicles Craftsmen converted was Ford's Lincoln Navigator. *Limousine & Chauffeured Magazine* allowed Craftsmen to advertise the stretched Navigators until Ford barred QVM dealers from converting Navigators.

boycott. In support of Craftsmen's contention, Robert Haswell testified that some of Craftsmen's customers called just to see if it was still in business when Craftsmen **[**21]** was not advertising in the trade magazines. However, Marc Haswell admitted that between 1995 and 1999 Craftsmen's website received approximately 90,000 hits.

Defendants denied that any of their actions caused the decrease in Craftsmen's conversions. They claimed that other factors, including increased competition, affected Craftsmen's growth rate. At trial, Robert Haswell conceded that two new non-QVM coachbuilders, Legendary Coachworks and S&R Coachworks, entered the market in 1995. S&R Coachworks was founded by a person who previously had been responsible for cutting, welding and stretching Craftsmen limousines. Like Craftsmen, Legendary Coachworks and S&R **[**22]** Coachworks both built non-QVM limousines in excess of one-hundred twenty inches.

Before trial, the district court held a hearing to determine whether plaintiffs' expert witness, David Cole, passed muster under *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*. Cole is a certified public accountant. In addition to taking post-graduate courses covering all areas of financial management, including economics, marketing, and finance, Cole has also served as the executive vice president for a national accounting firm and has worked with privately held businesses to establish property values for buy-sell agreements and values for estate tax purposes. Although Cole had no experience in the field of antitrust litigation, he reviewed scholarly literature to support his method of calculating damages in this case.

Cole used a "but for" method to determine Craftsmen's damages. Using Craftsmen's financial statements and tax returns, he calculated an average growth rate of sixty-two percent for the time period beginning in 1991 and ending in 1994. Cole testified that this figure was reasonable in light of conversations he had with Robert Haswell **[**23]** and his review of an outside study that supported his figure. Cole then testified that he calculated what Craftsmen's sales would have been with the projected growth rate and compared those figures to Craftsmen's actual sales. After offsetting the difference between these two figures by Craftsmen's projected operating expenses during the damage period, [12] Cole concluded that Craftsmen sustained a net profit loss of $ 2,109,770.00. In reaching this figure, Cole did not analyze whether general economic conditions or increased **[*771]** competition affected Craftsmen's growth rate. Instead, he assumed that defendants caused all of Craftsmen's injuries. The district court found that Cole's testimony was sufficiently relevant and reliable to go to the jury.

[24]** II. APPLICABLE LAW AND DISCUSSION

A. Whether the Evidence Was Sufficient to Establish an Antitrust Conspiracy

Defendants argue that the jury's verdict must be reversed, because the evidence was insufficient to establish a conspiracy between Ford and American Coach. ***HN1***[] In determining whether the evidence is sufficient to support a jury's verdict, we view the evidence in a light most favorable to the appellee. *Pumps & Power Co. v. Southern States Indus., Inc., 787 F.2d 1252, 1258 (8th Cir. 1986)*. We must assume as proven all facts that the appellee's evidence tended to show, give it the benefit of all reasonable inferences, and assume that all conflicts in evidence were resolved in its favor. *Id. at 1258*.

HN2[] *Section 1 of the Sherman Act* prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. Because defendants typically cannot be relied on to confess that they have entered into an unlawful agreement, conspiracy cases usually must be proved by circumstantial evidence. *ES Development, Inc. v. RWM Enterprises, Inc., 939 F.2d 547, 553 (8th Cir. 1991)* **[**25]** ("It is axiomatic that the typical conspiracy is rarely evidenced by explicit agreements, but must almost always be

[12] Cole used the term "cost of sales" to reflect Craftsmen's operating expenses. He testified that he needed a calculation to derive an average growth profit percentage "so that sales that we didn't realize in the future wouldn't have been all profit. They would have been a percentage, because there's obviously a cost associated with those sales. So, we had to come up with the average growth profit percentage in order to apply it to the sales that were lost in order to get a lost profit number." Ap. 1773-74 Cole testified that he calculated a figure of 83.75% as the "average cost of sales as compared to gross sales for the period '95 through '98." Id.

proved by inferences that may be drawn from the behavior of the alleged conspirators.") (internal quotations omitted). "Thus, an antitrust plaintiff may prove the existence of a combination or conspiracy by providing either direct or circumstantial evidence sufficient to warrant a . . . finding that the conspirators had a unity of purpose or common design and understanding, or a meeting of the minds in an unlawful arrangement." *Id. at 554* (internal quotations omitted).

HN3[] Although it may be in the form of circumstantial evidence, a plaintiff must present some evidence that tends "'to exclude the possibility that the alleged coconspirators acted independently.'" *St. Louis Convention & Visitors Comm'n. v. N.F.L., 154 F.3d 851, 861 (8th Cir. 1998)* (quoting *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 585, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*. "Conduct that is as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Lovett v. General Motors Corp., 998 F.2d 575, 578 (8th Cir. 1993)* **[**26]** (citing *Matsushita, 475 U.S. at 588*). Furthermore, "In situations where a trade association, its officers, employees or members are found to have violated the antitrust laws, membership in the association will not automatically involve all members in the violation. There must, instead, be some evidence of actual knowledge of, and participation in, the illegal scheme in order to establish a violation of the antitrust laws by a particular association member." *AD/SAT v. Associated Press, 181 F.3d 216, 234 (2nd Cir. 1999)* (quoting Thomas Vakerics, Antitrust Basics, § 6.13).

Defendants argue that the record contains no evidence from which a reasonable jury could find that they conspired to exclude Craftsmen from advertising or attending trade shows. They note that LIMO's President testified that Ford "didn't tell us not to participate in shows, they said they won't." According to defendants, this evidence confirms that Ford acted **[*772]** independently. Ford argues that even if LIMO's policies evinced concerted action, Ford never voted on or participated in the making of those policies. Defendants' arguments are unpersuasive.

We agree with the district court **[**27]** that the April 30, 1996 LIMO meeting minutes, the May 7, 1996 letter from Ric Cohen to Cabot Smith, and the May 9, 1996 fax from Cabot Smith to his fellow LIMO members provided ample evidence from which a reasonable jury could find that defendants engaged in a conspiracy in violation of *Section 1 of the Sherman Act*. The clear import of these documents is that LIMO members collectively pressured *Limousine Digest* to exclude non-QVM coachbuilders, like Craftsmen, from advertising in their publications and attending their trade shows. From this evidence, a reasonable jury could infer that LIMO applied similar pressure to the industry's only other national publication at the time, *Limousine & Chauffeured Magazine*. Although Ford was not a voting member of LIMO, there is sufficient evidence, including Marsha Tortora's testimony, [13] from which a reasonable jury could find that Ford influenced LIMO's agenda. Taken as a whole, the evidence introduced at trial was sufficient to create a jury question as to whether the defendants acted in concert or independently.

[28]** B. Whether the District Court Erred in Applying the *Per Se* Analysis.

HN4[] We review the district court's determination that the alleged agreement between Ford and American Coach constituted a *per se* antitrust violation de novo. *In re Cardizem CD Antitrust Litigation, 332 F.3d 896, 905-06 (6th Cir. 2003)*; *United States v. Brown, 936 F.2d 1042, 1045 (9th Cir. 1991)*; Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P1909b (1998) (although a court's determination that the *per se* rule applies "might involve many fact questions, the selection of a mode [of analysis] is entirely a question of law.").

Section 1 of the Sherman Act provides that ***HN5***[] "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN6***[] Despite its broad language, *Section 1* has long been interpreted to outlaw only those restraints that are "unreasonable." *Arizona v. Maricopa County Med. Soc'y, 457 U.S. 332, 343, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. The United States Supreme Court has set forth three **[**29]** methods for analyzing the reasonableness of a restraint on trade: rule of reason analysis, *per se* analysis, and quick look analysis.

[13] Tortora testified that Ford sometimes took part in LIMO meeting discussions on how to keep non-QVM coachbuilders from advertising and attending trade shows, and that Ford expressly forbade her from dealing with non-QVM coachbuilders. (Tr. 376.)

The rule of reason is the "prevailing standard" for determining a restraint's effect upon competition in a relevant market. *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. See also *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 726, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* ("there is a presumption in favor of a rule-of-reason standard"); *State Oil Co. v. Khan, 522 U.S. 3, 22, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)* ("The majority of commercial arrangements subject to the antitrust laws[] should be evaluated under the rule of reason"). Under this approach, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the **[*773]** relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect." *State Oil Co., 522 U.S. at 10*.

HN7[] When a restraint's negative impact on competition **[**30]** is immediately discernable and the restraint has no redeeming virtue, the *per se* mode of analysis applies. *Continental T.V., Inc., 433 U.S. at 50*; *State Oil Co., 522 U.S. at 10* ("Some types of restraints . . . have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful *per se*."). Unlike the rule of reason analysis, *per se* analysis does not allow inquiry into the intent behind the restraint, its pro-competitive justifications, or its actual effect on competition. *Cardizem, 332 F.3d at 906-07* (citing *National College Athletic Ass'n. v. Board of Regents, 468 U.S. 85, 100, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984))*. Instead, the *per se* mode of analysis applies a "'conclusive presumption'" of illegality. *Id*. (quoting *Maricopa County, 457 U.S. at 344*). Because of the strength of this presumption, the *per se* analysis is appropriate only where "experience with a particular kind of restraint enables the court to predict with confidence that the rule of reason will condemn it." *Maricopa County, 457 U.S. at 344.* **[**31]** "Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements." *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)* (internal citations omitted).

HN8[] In cases where the repercussions of a suspicious restraint are unclear, courts may make a truncated inquiry into the restraint's output or price effects before deciding which mode of analysis to apply. See *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 459, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* (applying quick look approach to a horizontal agreement among dentists to withhold from their customers a particular service); *Chicago Prof'l Sports Ltd. P'ship. v. NBA, 961 F.2d 667, 676 (7th Cir. 1992)* cert. denied, *506 U.S. 954, 121 L. Ed. 2d 334, 113 S. Ct. 409 (1992)* (finding that district court did not err in application of "quick look" analysis). This "quick look" approach is "reserved for circumstances in which the restraint is sufficiently threatening to place it presumptively in the *per se* class, but lack of judicial experience requires at least some consideration of proffered **[**32]** defenses or justifications." Areeda & Hovenkamp at P 1911a. After taking a "quick look" at the defendant's proffered reasons for the restraint, a district court has three options:

> First, it may reject that evidence and condemn the restraint with little or no inquiry into power (as unlawful "*per se*"); second, it may find the evidence essentially unconvincing, but still have a few doubts about whether the restraint itself is appropriate for *per se* condemnation, thus making at least a quick look at market power appropriate; or third, it may find the evidence *plausible*, in which case the restraint is subjected to general rule of reason analysis requiring full consideration of power and anticompetitive effects. Areeda & Hovenkamp at P 1911c (emphasis added).

At trial, the district court found that Ford had "transformed itself into a horizontal competitor" through its action and influence with the QVM manufacturers. (Tr. 1431.) Without further analysis, the district court held that the *per se* rule was applicable. On appeal, Ford argues that it is not a horizontal competitor of Craftsmen, because Ford does not manufacture limousines. Ford therefore contends **[*774]** that **[**33]** the alleged agreements between Ford and American Coach were vertical restraints subject to the rule of reason analysis. See *Nynex Corp. v. Discon, Inc., 525 U.S. 128, 135, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)* (holding that the *per se* rule does not apply to a vertical agreement between a buyer and supplier, and noting that "precedent limits the *per se* rule in the boycott context to cases involving horizontal agreements among direct competitors"); *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)* (applying the *per se* rule to a boycott arranged by a single competitor of the plaintiff, but carried out by a "wide combination" consisting of manufacturers and distributors, as well as the competing retailer). We need not determine whether Ford "transformed" itself into a horizontal competitor. Even assuming Ford and American Coach were direct competitors of Craftsmen, the *per se* rule should not have been applied in this case. [14]

[34]** Through its QVM program, Ford established voluntary safety standards for the manufacture of limousines. Although most coachbuilders joined the QVM program and agreed to build within QVM guidelines, some coachbuilders, like Craftsmen, chose not to join or abide by QVM restrictions. Craftsmen alleged that defendants effectively shut them out of the market by pressuring the limousine industry's trade publications to exclude non-QVM coachbuilder from advertising and attending trade shows. In essence, defendants' alleged restraint was an attempt to force Craftsmen to either comply with QVM guidelines or stop selling limousines. The question is whether Ford's insistence on QVM compliance was arguably rooted in safety concerns, and if so, whether this should remove the alleged agreement from the *per se* rule's realm. We believe it does.

As Areeda & Hovenkamp note, ***HN9***[] "Exclusion by the joint setting and enforcement of standards is ordinarily evaluated under the rule of reason." P 2232b. This is so because the creation and enforcement of standards, including safety standards, often has pro-competitive effects. For example, having unsafe limousines in the market could tend to undercut consumer **[**35]** confidence in all limousines, and thereby decrease overall limousine sales. On the other hand, "When consumer confidence in a market is increased, consumers enter the market or are willing to purchase more." Areeda & Hovenkamp at P 2230b. Because the economic impact of safety standards is not immediately discernable, something more than a cursory *per se* analysis is required to determine whether the restraint was unreasonable.

The Seventh Circuit recognized these principles in *Moore v. Boating Indus. Ass'ns, 819 F.2d 693 (7th Cir. 1987)*. There, an association of boat trailer manufacturers was concerned that a boat trailer lamp manufacturer's products did not meet federal safety standards. *Id. at 700-02*. After the association received tests from an independent laboratory indicating that the lamps indeed failed to meet federal standards, the association decided it could no longer certify boat trailers that used **[*775]** the non-complying lamps. *Id. at 702*. The lamp manufacturer filed suit claiming that the association violated antitrust laws by engaging in a group boycott with the purpose of eliminating competition in trailer lights. *Id*. **[**36]** The Seventh Circuit held that plaintiff's claim should have been analyzed under the rule of reason. *Id. at 710*. First, the Court found that there was not a horizontal group boycott, as the boat trailer manufacturers and the boat trailer lamp manufacturers were not competitors. *Id. at 700*. Second, the Court found that *per se* analysis was inappropriate because the anticompetitive affects of the restraint were not immediately apparent. *Id. at 710-11*. The Court stated,

> To promote compliance with the [*National Traffic and Motor Vehicle Safety Act*] and the standards under it, admittedly the purpose of defendants in their compliance program, is not an activity which is "characteristically . . . likely to result in predominantly anticompetitive effects," [*Northwest Wholesale Stationers, Inc., v. Pacific Stationery & Printing Co.,] 472 U.S. 284, 296, 86 L. Ed. 2d 202, 105 S. Ct. 2613*. There is no justification, therefore, for applying a *per se* analysis to such activity. *Id*.

Admittedly, the case at bar presents a closer question than Moore. Many of the limousine manufacturers with whom Ford allegedly conspired were direct competitors **[**37]** of Craftsmen. In addition, there is no evidence that Craftsmen's products failed to meet federal safety standards at the time defendants allegedly pressured the trade publications to exclude non-QVM products. Nevertheless, the record reveals that the National Highway Traffic Safety Administration encouraged Ford to develop product safety testing, because it was concerned that many coachbuilders were either ignorant of or not abiding by the Federal Motor Vehicle Safety Standards. Ford responded to the call. It spent millions of dollars researching and developing base vehicles, and it determined how

---

[14] The dissent in footnote 3 glosses over a fundamental question that must precede application of the *per se* analysis-whether Ford is a horizontal competitor of the coachbuilders. Ford does not manufacture or sell limousines. It manufactures base vehicles that are later converted into limousines by coachbuilders. Aside from safety and liability concerns, we question whether there are any rational economic reasons for Ford to compete with any of the coachbuilders. Unlike the dissent, we also question whether Ford's position in the market as a supplier of base vehicles to coachbuilders changed with the formation of QVM and LIMO.

to convert those vehicles in compliance with federal safety standards. Through its QVM program, Ford made all coachbuilders aware of the federal safety standards and taught all coachbuilders how to comply with them. Ford disseminated the engineering designs, instruction manuals and test data it developed to QVM and non-QVM coachbuilders alike. [15]

[38]** Ford also may have had profit-making motives in mind when it created the QVM standards and allegedly pressured the trade publications not to advertise non-QVM vehicles. However, the fact remains that safety concerns were arguably a motivating factor behind Ford's actions. On this point, we find it significant that the trade magazines did not exclude *all* non-QVM products; *Limousine & Chauffeured Magazine* allowed non-QVM coachbuilders to advertise upon submission of independent crash-testing data, and *Limousine Digest* allowed non-QVM advertisements so long as the coachbuilder certified, through "some independent means," that its vehicles met federal safety regulations. (Tr. 1185.) We acknowledge that the National Highway Traffic Safety Administration did not require Craftsmen to crash-test its vehicles to prove they were safe. However, the fact that at least one of the trade publications required Craftsmen to **[*776]** take measures beyond what the National Highway Traffic Safety Administration required does not convince us that the *per se* rule should be applied. Whether the crash-testing requirement was disproportionate to the harm it sought to remedy is a question that is appropriately **[**39]** analyzed under the rule of reason. See *State Oil Co., 522 U.S. at 10* (when applying the rule of reason, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect").

At this juncture, we cannot and need not determine whether defendants' alleged restraint actually had procompetitive effects. As the Supreme Court held in *California Dental Ass'n v. FTC, 526 U.S. 756, 143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*, ***HN10***[] when determining whether to apply the rule of reason analysis to non-price advertising restrictions related to product safety, the issue is not whether the restrictions *were* procompetitive, but whether they *could be*. *Id. at 778* ("The plausibility of competing claims about the effects of the professional advertising restrictions rules out the indulgently abbreviated review to which the Commission's order was treated."). See also Areeda & Hovenkamp at P 1911b (stating that **[**40]** courts must consider the *plausibility* of procompetitive effects when determining which mode of analysis to apply). Because the alleged restraints were arguably based, at least in part, on safety concerns, they may have had some procompetitive effects. It follows that an abbreviated *per se* analysis was inappropriate. See *California Dental, 526 U.S. at 770-781* (holding that a "quick look" analysis was inappropriate for restrictions imposed by professional association of dentists on member advertising where the likelihood of noncompetitive effects of restrictions were not obvious, and restrictions could plausibly be thought to have procompetitive effect on competition).

C. Whether the Testimony of David Cole Satisfied the Requirements for the Admissibility of Expert Testimony.

HN11[] The Court of Appeals reviews the district court's decision regarding the admissibility of expert witness testimony for an abuse of discretion. *White v. Ford Motor Co., 312 F.3d 998, 1007 (9th Cir. 2002)*.

HN12[] *Federal Rule of Evidence 702* governs the admission of expert testimony. The rule provides:

> ***HN13***[] If scientific, technical, or **[**41]** other specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, skill, or experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

---

[15] The dissent makes the case for why Ford's safety concerns were a pretext for anti-competitive behavior. However, it ignores countervailing evidence that the Federal Government encouraged Ford to develop testing to ensure that converted limousines complied with federal safety standards. The evidence presented at trial created a legitimate fact dispute that the jury should have analyzed under the rule of reason rather than the *per se* rule, which presumes that Ford's motives and the effect of its actions were anti-competitive.

HN14[] A district court has great latitude in determining whether expert testimony meets the reliability requisites of Rule 702**.** In making that determination, the district court is free to evaluate one or all of the following factors: (1) whether the theory or technique can be or has been tested; (2) whether the theory or technique has been subjected to peer review and publication; (3) whether the theory or technique has a known or potential error rate and standards controlling the technique's operation; **[*777]** and (4) whether the theory or technique is generally accepted in the scientific community. Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 592-95, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993) **[**42]** (stating that "many factors will bear on the inquiry" and that the above-listed factors do not constitute "a definitive checklist or test"). See Blue Dane Simmental Corp. v. American Simmental Ass'n, 178 F.3d 1035, 1039-1040 (8th Cir. 1999) (applying Daubert analysis to expert witness testimony in an antitrust case).

We agree with the district court that Craftsmen's expert, David Cole, had sufficient education and experience to testify as an expert regarding plaintiffs' damages. However, Cole's testimony did not sufficiently aid the jury in determining whether there was an "unreasonable" restraint on trade in violation of the Sherman Act. Cole *assumed* that Craftsmen's alleged lost growth from 1995 through 1998 was caused by defendants' alleged conspiracy. He did not determine whether other factors, including the emergence of two direct competitors, may have affected Craftsmen's growth rate. Under the rule of reason analysis, which should have been applied in this case, such an analysis was required. Because Cole's expert opinion failed to "incorporate all aspects of the economic reality," Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1057 (8th Cir. 2000), **[**43]** it should not have been admitted. [16]

III. CONCLUSION

For the foregoing reasons, the district court's damages award is vacated, and the case is remanded for a new trial on Craftsmen's Sherman Act claim.

Dissent by: LAY

Dissent

LAY, Circuit Judge, dissenting.

It would be hard to imagine a more clearly expressed boycott and resulting restraint on trade than in this case, where these actions were, extraordinarily, documented by the Defendants. [17] It would also be hard to imagine a restraint with a more pernicious anticompetitive effect, as it effectively forced Craftsmen to join either the QVM or CMC programs or cease advertising its product. Reflecting on these undisputed facts, the district court applied the *per se* rule, evidently deciding that the advertising restraint "facially appears to be one that would **[**44]** always or almost always tend to restrict competition." [18] Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)**.** The majority now remands for application of the rule of reason on the basis that the restraint "could be" procompetitive and that safety concerns were "arguably" a motivating factor behind Ford's actions. I submit that the evidence does not support these "safety concerns" arguments, and respectfully dissent.

---

[16] We are not foreclosing the possibility Cole can testify at a new trial. We agree he is qualified. He will have to formulate a new opinion using the proper standard under a rule of reason analysis.

[17] The boycott agreement and resulting advertising restriction were documented in: 1) the April 30, 1996, LIMO minutes that set out the boycott agreement (J.A. 02091-92); 2) the May 6, 1996, letter from LIMO to the magazine that threatened the boycott (J.A. 02093-94); and 3) the May 9, 1996, fax from the president of LIMO to his fellow members congratulating them on the magazine's change of policy to ban advertisements of non-QVM/CMC coachbuilders (J.A. 02085).

[18] The district court decided the parties' motions for and against application of the *per se* rule from the bench at the close of the Plaintiff's evidence and did not give a rationale for why application of that rule was appropriate. (Tr. 1431-32.)

[45] [*778]** The *Per Se* Rule

The majority is correct to note that the rule of reason is the prevailing standard for analyzing a restraint's effect upon competition. However, the *per se* rule is not entirely obsolete. Both the Supreme Court and other circuit courts continue to identify the *per se* rule as the accepted method of analysis for restraints that are obviously anticompetitive. *See* *State Oil Co. v. Khan, 522 U.S. 3, 10, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997)* ("Some types of restraints . . . have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful *per se*."); *see also* *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 158-59 (3d Cir. 2003)*; *Cont'l Airlines, Inc. v. United Airlines, Inc., 277 F.3d 499, 509 (4th Cir. 2002)*; *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1058 (8th Cir. 2000)*.

The instant case appears to meet all of the characteristics of a typical *per se* case as described in *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 294, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)*: **[**46]**

> Cases to which this Court has applied the *per se* approach have generally involved joint efforts by a firm or firms to disadvantage competitors by either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle. In these cases, the boycott often cuts off access to a supply, facility, or market necessary to enable the boycotted firm to compete, and frequently the boycotting firms possessed a dominant position in the relevant market. In addition, the practices were generally not justified by plausible arguments that they were intended to enhance overall efficiency and make markets more competitive. Under such circumstances the likelihood of anticompetitive effects is clear and the possibility of countervailing procompetitive effects is remote.

Id. (citations and quotations omitted). In this case, Ford was irritated by the existence of small coachbuilders who were exploiting the profitable market for extra-long limousines. The existence of these small coachbuilders threatened Ford's QVM program because it essentially penalized QVM coachbuilders, who were prohibited from building extra-long **[**47]** limousines because of QVM restrictions. Consequently, Ford acted in concert with LIMO to quash this competition by using their combined influence to cut off all national advertising resources to these small coachbuilders. [19] **[**48]** In light of this bold and undisguised anticompetitive behavior, I believe this case fits into that category of "agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to **[*779]** establish their illegality-they are 'illegal *per se*.'" [20] *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)*.

Safety Concerns

[19] I submit that there should be little doubt as to the existence of a horizontal agreement between the Defendants. Ford, a member of LIMO, had obviously involved itself in the manufacturing of limousines. Furthermore, the majority was correct to identify the existence of a conspiracy among the Defendants. I would only add that in addition to the evidence highlighted by the majority, the following evidence also supports that Ford influenced LIMO's agenda and spearheaded the boycott effort: 1) Ford encouraged the formation of LIMO around the time QVM began (Tr. 275); 2) Ford lobbied to keep non-QVM members out of LIMO (Tr. 28990); 3) Ford voiced its opposition to allowing QVM members to advertise in trade journals that allowed non-QVM members to advertise (Tr. 347); 4) the magazines themselves seemed to be receiving similar pressure directly from Ford (Tr. 332-35); and 5) Ford pressured LIMO coachbuilders to make them keep non-QVM members out of LIMO because "[Ford] felt it was better coming from [LIMO] as an organization." (Tr. 282.)

[20] Neither Defendant advocated, or discussed, the application of the "quick look" standard, and it is not appropriate in any event because, in my view, the restraint is obviously anticompetitive.

I am not persuaded that Ford's supposed "safety concerns" remove this case from the purview of the *per se* rule. The evidence simply does not support that Ford was motivated by safety concerns. The majority stresses that Ford spent "millions of dollars" to develop the QVM program to establish safety standards for the manufacture of limousines. However, Ford's own internal documents demonstrate that the motivation behind the program was not safety, but to "ensure that Ford would retain its competitive advantage over Cadillac and further improve the image of [the] Lincoln Town Car" and "produce incremental sales and profits to Ford and its dealers." (J.A. 02213-16.)

The manner in which Ford implemented the program reinforces the idea that Ford was interested in market control and profits, not safety. Coachbuilder Marsha Tortora testified that from 1990 to 1997, Ford never **[**49]** once tested any of her limousines to confirm that she was following QVM guidelines or building safe limousines. (Tr. 274.) This would suggest that Ford was not as concerned with the safety of the end-product as it was with enrolling coachbuilders into the program to ensure that the builders were buying and converting its Lincoln Town Cars.

The idea that Ford was concerned with safety is further undermined by the fact that Ford took a very strong stand against allowing a non-QVM coachbuilder, Vinny Bergman, into LIMO, even though he could show compliance with federal safety standards through separate testing. Bergman, owner of Ultra Coach, wanted to join LIMO. (Tr. 290.) Although he stretched Lincoln Town Cars, he did not join the QVM program, presumably because he stretched the cars 180 inches, outside the QVM program parameters. (Tr. 289.) Bergman, however, proved his 180-inch stretches were compliant with federal safety standards, using an independent crash test study, which cost him $ 250,000. (Tr. 291.) Despite the fact that Bergman had proven compliance with federal safety standards, Ford pressured LIMO members to keep him out of the trade group. (Tr. 290.)

Despite this evidence, **[**50]** the majority insists that Ford's "safety concerns" take this case outside the scope of the *per se* rule. The majority relies principally on two cases to support its position. First, it cites *Moore v. Boating Industry Ass'ns, 819 F.2d 693 (7th Cir. 1987)*, for the principle that the promotion of federal safety standards is not something that is likely to be anticompetitive, and therefore application of *per se* analysis is inappropriate. *Id. at 710-11*. The critical distinction between this case and *Moore*, however, is the absence of evidence that Craftsmen's limousines were unsafe or failed to meet federal safety standards. There was also no suggestion in *Moore* that "safety concerns" were merely a subterfuge for the desire for greater market control and profits, as is true in the instant case. Indeed, none of the conspirators in the *Moore* boycott were direct competitors of the plaintiff-manufacturer, whereas here, both of the Defendants stood to gain from Craftsmen's demise.

Second, the majority cites *California Dental Ass'n v. FTC, 526 U.S. 756,* ***[*780]*** *143 L. Ed. 2d 935, 119 S. Ct. 1604 (1999)*, stating that "the issue is not whether the restrictions **[**51]** *were* procompetitive, but whether they *could be*." I respectfully submit, however, that *California Dental* cannot be read to support such a sweeping proposition. The relevant language of the case actually reads, "the plausibility of competing claims about the effects of the professional advertising restrictions rules out the indulgently abbreviated review to which the Commission's order was treated. The obvious anticompetitive effect that triggers abbreviated analysis has not been shown." *Id. at 778*. It is not sufficient under *California Dental* to recognize, as the majority does, only that "safety concerns were arguably a motivating factor behind Ford's actions." Instead, a court must determine whether it is "plausible" that the procompetitive effects of the restraint outweigh, or at least equal, the anticompetitive effects. I respectfully submit this understanding of the case is compelled by the fact that the Court speaks of the restraint at issue in that case as plausibly having a "*net* procompetitive effect," *id. at 771* (emphasis added), and not a "*net* anticompetitive effect," *id. at 774* (emphasis added), suggesting **[**52]** that a court is required to weigh the competing effects when deciding which method of analysis to apply.

In other words, application of the rule of reason is not warranted simply because the restraint "could be" procompetitive, based on the Defendants' "arguable" motivations. If this were the case, the *per se* rule would hereafter be extinct, as inventive lawyers could always create a procompetitive justification for their clients' monopolistic behavior. Instead, the procompetitive effects of a restraint must plausibly outweigh, or at least equal, the anticompetitive effects in order to move the case to rule of reason review.

Here, the procompetitive safety rationale is not plausible at all, and I submit the majority's fixation on these doubtful "safety concerns" is particularly inappropriate in light of the anticompetitive effect of the restriction on competition.

Again, there is no evidence that Craftsmen's limousines were unsafe or failed to meet federal safety standards. Furthermore, as discussed above, the evidence suggests that Ford was not motivated by safety, but was interested only in extinguishing small companies that were taking advantage of the market for extra-long **[**53]** limousines, a market outside the control of Ford's QVM program. The majority finds significance in the fact that the restriction allowed advertisements of non-QVM coachbuilders who proved compliance with federal safety standards through separate testing, but this fact has little significance. I do not see how placing this burdensome testing requirement on small coachbuilders who already appear to be in compliance with federal safety standards, but who cannot afford to conduct expensive testing, is procompetitive. Finally, in contrast to these suspect safety claims, the anticompetitive effects of the restriction are overwhelming and undeniable, as it basically eliminated Craftsmen's ability to nationally advertise and promote its limousines. Accordingly, I would affirm the district court.

From my examination of the record, I fail to understand how any jury, under any method of analysis, could find for the Defendants in this case. The very purpose of the *per se* rule is to streamline antitrust analysis by making conclusive presumptions about restrictions that are obviously unreasonable. I respectfully submit that by remanding this case to be retried on the basis of this dubious safety **[**54]** rationale, the majority wastes time and judicial resources.

[*781] The anticompetitive effects of this restriction are so clear and pernicious, and the procompetitive effects of the restriction are so questionable and attenuated, that I submit the *per se* rule is the appropriate method of analysis in this case. I also suggest that the majority's proposed application of the rule of reason to any restraint that arguably "could be" procompetitive is a misinterpretation of *California Dental*, and an expansion of the rule of reason analysis.

Constitutional Law > Supremacy Clause > Federal Preemption

International Trade Law > General Overview

HN5[] **Federal & State Interrelationships, Federal Common Law**

It is a fundamental principle of the United States Constitution that Congress has the power to preempt state law.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

HN6[] **Federal & State Interrelationships, Federal Common Law**

Congress has the authority, in exercising its U.S. Const. art. I powers, to pre-empt state law.

Civil Procedure > ... > Federal & State Interrelationships > Federal Common Law > General Overview

HN7[] **Federal & State Interrelationships, Federal Common Law**

There is a presumption against finding pre-emption of state law in areas traditionally regulated by the states, such as antitrust regulation, absent an express statement by Congress indicating such an intention. However, this presumption may be overcome in two instances: First, when Congress intends that federal law occupy a given field, state law in that field is pre-empted. Second, even if Congress has not occupied the field, state law is nevertheless pre-empted to the extent it actually conflicts with federal law, that is, when compliance with both state and federal law is impossible, or when the state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Securities Law > Regulators > Self-Regulating Entities > General Overview

Securities Law > Regulators > US Securities & Exchange Commission > General Overview

HN8[] **Regulators, Self-Regulating Entities**

The Securities and Exchange Commission's (Commission) explicit obligation to balance the competitive implications of self-regulatory and Commission action should not be viewed as requiring the Commission to justify that such actions be the least anti-competitive manner of achieving a regulatory objective. Rather, the Commission's obligation is to weigh competitive impact in reaching regulatory conclusions.

Antitrust & Trade Law > Sherman Act > General Overview

Securities Law > Regulators > US Securities & Exchange Commission > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Competition is the touchstone of the antitrust laws, while in the regulated securities industry the emphasis is on requiring full disclosure without otherwise changing the balance in the market for corporate control. Tension and at times conflict exist between these established public policies.

Opinion

MEMORANDUM AND ORDER

WILLIAM H. PAULEY III, District Judge:

On November 3, 2004, this Court issued a Memorandum and Order in this consolidated class action holding that the conduct alleged by the various plaintiffs was impliedly immune from antitrust scrutiny. *See* *In re Initial Public Offering Antitrust Litig., 287 F. Supp. 2d 497 (S.D.N.Y. 2003)* ("*IPO Antitrust Litig.*") [1] On November 18, 2003, the *Sherman Act* Plaintiffs moved for partial reconsideration of that decision, arguing that this Court's dismissal of their state law antitrust claims was in error. Specifically, the Sherman Act Plaintiffs argue that this Court overlooked controlling decisions cited in their underlying briefs, principally *California v. ARC America Corp., 490 U.S. 93, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)*, standing for the proposition that defendants failed to overcome the presumption against **[*4]** federal preemption of state law. For the reasons set forth below, the Sherman Act Plaintiffs' motion for partial reconsideration is denied.

BACKGROUND

In its November 3, 2003 Memorandum and Order, this Court held that the conduct alleged by plaintiffs was impliedly immune from application of the Sherman Act given the SEC's sweeping jurisdiction to regulate the national securities markets and its explicit congressional mandate to balance competition with its other regulatory policies. *IPO Antitrust Litig., 287 F. Supp. 2d at 523-24*. This Court also held that the federal securities regulatory regime entrusted to the SEC preempted the Sherman Act Plaintiffs' state law antitrust claims, holding that failure to apply such preemption would "eviscerate the implied immunity doctrine." **[*5]** *IPO Antitrust Litig., 287 F. Supp. 2d at 524*. The Sherman Act Plaintiffs move this Court to reconsider only this latter portion of its earlier decision.

DISCUSSION

---

[1] Familiarity with this Court's November 3, 2003 Memorandum and Order, and the facts and defined terms set forth therein, is presumed.

I. *Standard for a Motion for Reconsideration*

Local Civil Rule 6.3 provides in relevant part: **HN1**[] "There shall be served with the notice of motion a memorandum setting forth concisely the matters or controlling decisions which counsel believes the court has overlooked." **HN2**[] A motion for reconsideration pursuant to Local Rule 6.3 "is not a motion to reargue those issues already considered when a party does not like the way the original motion was resolved." *Yurman Design, Inc. v. Garden Jewelry Mfg. Corp., 2003 U.S. Dist. LEXIS 15051, No. 99 Civ. 9307 (JFK), 2003 WL 22047849, at *1 (S.D.N.Y. Aug. 29, 2003)*. Thus, **HN3**[] to be entitled to reconsideration, a movant must demonstrate that the court overlooked controlling decisions or factual matters that were put before it on the underlying motion, which, had they been considered "might reasonably have altered the result reached by the court." **[*6]** *Consol. Gold Fields v. Anglo Am. Corp., 713 F. Supp. 1457, 1476 (S.D.N.Y. 1989)*. Courts narrowly construe this standard and apply it strictly against the moving party "so as to avoid repetitive arguments on issues that have been fully considered by the court." *Lopez v. Comm'r of Soc. Sec., 2002 U.S. Dist. LEXIS 5091, No. 01 Civ. 183 (NRB), 2002 WL 465298, at *1 (S.D.N.Y. Mar. 27, 2002).* **HN4**[] The decision to grant or deny a motion for reconsideration is within the sound discretion of the district court. *See, e.g., Dietrich v. Bauer, 76 F. Supp. 2d 312, 327 (S.D.N.Y. 1999)*.

II. *Federal Preemption of State Antitrust Claims*

The Sherman Act Plaintiffs fail to meet their burden for reconsideration. This Court did not overlook any controlling decisions in reaching its conclusion that the Sherman Act Plaintiffs' state antitrust claims are preempted by the federal securities regulatory regime. The parties fully briefed the issue of preemption of the state antitrust causes of action in their underlying motions, and this Court rejected plaintiffs' arguments based on *ARC America* and related cases. Their arguments are **[*7]** no more persuasive the second time around.

In this Court's view, *ARC America* is not a "controlling decision" with respect to the doctrine of implied immunity. In *ARC America,* the Supreme Court decided the question of whether the federal antitrust rule prohibiting indirect purchaser recovery preempted state antitrust laws expressly permitting such recovery. *ARC America, 490 U.S. at 100*. The question of whether federal ***antitrust law*** preempts contradictory state ***antitrust law*** is different and more narrow than the question presented here. In this case, the issue is whether the SEC's pervasive authority to balance competition against other forces in regulating the national securities markets, in combination with the its active regulation of and regulatory authority over the conduct alleged, renders that conduct impliedly immune from state antitrust scrutiny. As this Court held in its earlier decision, the answer to that question is yes. *IPO Antitrust Litig., 287 F. Supp. 2d at 524* ("To shield the securities regulatory regime from encroachment by the Sherman Act, only to expose that regime to assault by a swarm of state antitrust claims, would **[*8]** shatter the federal regulatory framework for national securities markets."); *cf. Boyle v. United Techs. Corp., 487 U.S. 500, 504-05, 101 L. Ed. 2d 442, 108 S. Ct. 2510 (1988)* (allowing preemption of state law by federal common law where the interests at stake are "uniquely federal" in nature).

However, even if this Court analyzed the question of implied immunity under the preemption framework described in *ARC America,* the result would be the same. **HN5**[] It is "[a] fundamental principle of the Constitution" that Congress has the power to preempt state law. *Crosby v. Nat'l Foreign Trade Council, 530 U.S. 363, 372, 147 L. Ed. 2d 352, 120 S. Ct. 2288 (2000)*; *accord ARC America, 490 U.S. at 100* ("It is accepted that **HN6**[] Congress has the authority, in exercising its Article I powers, to pre-empt state law."). **HN7**[] There is a "presumption against finding pre-emption of state law in areas traditionally regulated by the States," such as antitrust regulation, absent an express statement by Congress indicating such an intention. **[*9]** *ARC America, 490 U.S. at 100*. However, this presumption may be overcome in two instances:

> First, when Congress intends that federal law occupy a given field, state law in that field is pre-empted. Second, even if Congress has not occupied the field, state law is nevertheless pre-empted to the extent it actually conflicts with federal law, that is, when compliance with both state and federal law is impossible, or when the state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress."

ARC America, 490 U.S. at 100-01 (internal citations omitted) (quoting *Hines v. Davidowitz, 312 U.S. 52, 67, 85 L. Ed. 581, 61 S. Ct. 399 (1941))*.

Here, the presumption is overcome. As this Court held in its prior decision, "the SEC, both directly and through its pervasive oversight of the NASD and other SROs, either expressly permits the conduct alleged in the Sherman Act Complaint or has the power to regulate the conduct," and possesses a "unique mandate to balance competition with other market concerns." **[*10]** *IPO Antitrust Litig., 287 F. Supp. 2d at 512, 523*. Thus, allowing plaintiffs to use various state antitrust regulations to balkanize the national securities regulatory regime would "stand[] as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress." *Hines, 312 U.S. at 67*; *see* S. Rep. No. 94-75, at 13 (1975), *reprinted in* 1975 U.S.C.C.A.N. 179, 191 (noting that ***HN8***[] the SEC's "explicit obligation to balance . . . the competitive implications of self-regulatory and Commission action should not be viewed as requiring the Commission to justify that such actions be the least anti-competitive manner of achieving a regulatory objective. Rather, the Commission's obligation is to weigh competitive impact in reaching regulatory conclusions."); *Finnegan v. Campeau Corp., 915 F.2d 824, 825-26 (2d Cir. 1990)* ("It is recognized that ***HN9***[] competition is the touchstone of the antitrust laws, while in the regulated securities industry the emphasis is on requiring full disclosure without otherwise changing the balance in the market for corporate control. Tension and at times conflict exist between these established **[*11]** public policies."); *In re Stock Exchs. Options Trading Antitrust Litig., 2001 U.S. Dist. LEXIS 1381, No. 1283, M-21-79(RCC), 99 Civ. 962(RCC), 2001 WL 128325, at *10 (S.D.N.Y. Feb. 15, 2001)*, *aff'd* *317 F.3d 134 (2d Cir. 2003)* (noting ***HN10***[] the Commission's mandate to "balance the benefits of competition against its other regulatory aims."). Accordingly, preemption is appropriate even under the *ARC America* framework.

CONCLUSION

For the reasons set forth above, the Sherman Act Plaintiffs' motion for partial reconsideration of this Court's November 3, 2003 Memorandum and Order is denied.

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Defects of Form

HN1[] **Defenses, Demurrers & Objections, Defects of Form**

A court should not grant a Fed. R. Civ. P. 12(e) motion unless the pleading in question is so vague that a party cannot reasonably be required to frame a responsive pleading. The United States Court of Appeals for the Eleventh Circuit refers to the most vague pleadings as "shotgun pleadings." One typical feature of a shotgun pleading is incorporation of the same lengthy allegations into each claim alleged, which makes it difficult to know which allegations of fact are intended to support which claims for relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] **Motions to Dismiss, Failure to State Claim**

For purposes of a motion to dismiss, a court must view the allegations of the complaint in the light most favorable to the plaintiff. *Fed R. Civ. P. 12(b)(6)*. Furthermore, a court must accept all reasonable inferences from the complaint and consider all allegations as true. A court may not, however, accept conclusory allegations and unwarranted factual deductions as true. Only pleadings and attached written exhibits may be considered in making these determinations. *Fed. R. Civ. P. 10(c)*. Unless it appears beyond doubt that the plaintiff can prove no set of facts entitling him to relief, a complaint should not be dismissed for failure to state a claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

A plaintiff is entitled to survive a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* if there is any set of facts that, if proven at trial, would entitle it to recover. A court may not assume, however, that a plaintiff can prove facts that it has not alleged or that a defendant has violated laws in ways that have not been alleged. Nor is the court bound to accept as true a legal conclusion couched as a factual allegation. Although the federal rules embrace a liberal pleading standard, bald assertions and conclusions of law will not defeat a properly supported motion to dismiss.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN6[] Private Actions, Racketeer Influenced & Corrupt Organizations

See 18 U.S.C.S. § 1962(d).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN7[] Private Actions, Racketeer Influenced & Corrupt Organizations

Under the Racketeer Influenced and Corrupt Organizations Act, an enterprise includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. 18 U.S.C.S. § 1961(4). The existence of an enterprise is proved by evidence of an ongoing organization, formal or informal, and by evidence that the various associates function as a continuing unit.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN8[] Private Actions, Racketeer Influenced & Corrupt Organizations

The Racketeer Influenced and Corrupt Organizations Act (RICO) does not require that an enterprise possess an "ascertainable structure" distinct from the associations necessary to conduct the pattern of racketeering activity. Moreover, the United States Court of Appeals for the Eleventh Circuit has rejected the contention that Turkette's reference to the RICO enterprise as a "continuing unit" requires participation of all members throughout the life of the enterprise.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN9[] Private Actions, Racketeer Influenced & Corrupt Organizations

A Racketeer Influenced and Corrupt Organizations Act plaintiff need not allege a definable structure distinct from the "racketeering activity."

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN10[] Private Actions, Racketeer Influenced & Corrupt Organizations

In the United States Court of Appeals for the Eleventh Circuit, the definitive factor in determining the existence of a Racketeer Influenced and Corrupt Organizations Act enterprise is an association of individuals, however loose or informal, which furnishes a vehicle for the commission of two or more predicate crimes. The Eleventh Circuit has also stated that an enterprise exists if persons associate formally or informally, with the purpose of conducting illegal activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN11[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

A Racketeer Influenced and Corrupt Organizations Act "enterprise" is not the "pattern of racketeering activity"; it is an entity separate and apart from the pattern of activity in which it engages. A single pattern of racketeering activity thus does not define the scope of the enterprise.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN12[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Under *18 U.S.C.S. § 1962(c)*, the allegations must name a Racketeer Influenced and Corrupt Organizations Act (RICO) person distinct from the RICO enterprise. This is because the plain language of *§ 1962(c)* envisions two separate entities, which comports with legislative intent and policy. This distinctness rule reflects Congress' intention in *§ 1962(c)* to target a specific variety of criminal activity, the exploitation and appropriation of legitimate businesses by corrupt individuals.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN13[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Distinctness under the Racketeer Influenced and Corrupt Organizations Act (RICO) is a fact-intensive inquiry that is not driven solely by formal legal relationships among the alleged associates in fact. Even where formalities are important to the distinctness inquiries, the courts are guided by common-sense readings of the complaints in the context of the RICO statute and by the purposes of the statute.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN14[] Private Actions, Racketeer Influenced & Corrupt Organizations

Whether a corporation may be named as a Racketeer Influenced and Corrupt Organizations Act "person" cannot be said to be dependent solely on formalities or reducible to a single set of rules because the distinctness rule is rooted in the language of 18 U.S.C.S. 1962(c), comports with legislative intent and policy, and recognizes that the enterprise is often a passive instrument or victim of racketeering activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN15[] Private Actions, Racketeer Influenced & Corrupt Organizations

The distinctness requirement arises from the language of 18 U.S.C.S. § 1962(c), which says that it applies to persons who are employed by or associated with the enterprise. In ordinary English one speaks of employing, being employed by or associating with others, not oneself.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Governments > Legislation > Interpretation

HN16[] Private Actions, Racketeer Influenced & Corrupt Organizations

The Racketeer Influenced and Corrupt Organizations Act is to be liberally construed to effectuate its remedial purposes.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN17[] Private Actions, Racketeer Influenced & Corrupt Organizations

The history of the Racketeer Influenced and Corrupt Organizations Act reveals that it was meant to protect the public not only from wholly illegitimate or illegal enterprises, but also from those who would use unlawful acts to victimize a legitimate enterprise and from those who would unlawfully use a legitimate enterprise as a vehicle through which unlawful activity is committed.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN18[] Private Actions, Racketeer Influenced & Corrupt Organizations

An individual who incorporates gets some legal protections from the corporate form, such as limited liability; and it is just this sort of legal shield for illegal activity that the Racketeer Influenced and Corrupt Organizations Act (RICO) tries to pierce. Fictitious legal "distinctness," such as between an individual and his corporate self, is important to RICO distinctness to the extent it bears on effectuating this historical policy, not because formalities are always a sufficient basis on which to rest a finding of distinctness.

Business & Corporate Law > ... > Authority to Act > Apparent Authority > Elements

Business & Corporate Law > Agency Relationships > General Overview

Business & Corporate Law > Agency Relationships > Authority to Act > General Overview

Business & Corporate Law > ... > Authority to Act > Actual Authority > General Overview

Business & Corporate Law > ... > Authority to Act > Apparent Authority > General Overview

Business & Corporate Law > ... > Authority to Act > Apparent Authority > Reliance

Business & Corporate Law > ... > Establishment > Elements > General Overview

HN19[] **Apparent Authority, Elements**

Three elements are needed to establish an apparent agency: (1) a representation by the purported principal; (2) reliance on that representation by a third party; and (3) a change in position by the third party in reliance upon such representation. Actual agency requires a showing of: (1) acknowledgment by the principal that the agent will act for him; (2) the agent's acceptance of the undertaking; and (3) control by the principal over the actions of the agent.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN20[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeer Influenced and Corrupt Organizations Act does not suggest that every person who "associates with" an association-in-fact enterprise and participates in conducting that enterprise's affairs illegally need be considered a defining member of that enterprise. Indeed, associations-in-fact are often fluid, "amoeba-like," and comprised of shifting personnel.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN21[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

If distinctness were not required for a *18 U.S.C.S. § 1962(d)* claim, the plaintiffs could circumvent the distinctness rule by simply bringing conspiracy claims, which are arguably easier to allege, rather than *18 U.S.C.S. § 1962(c)* claims.

HN22[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

To state a civil conspiracy claim under the Racketeer Influenced and Corrupt Organizations Act (RICO), a plaintiff need only allege that the defendant conspired to violate some substantive provision of RICO, that some member of the conspiracy committed an overt act of racketeering, and that the act of racketeering injured the plaintiff. The existence of an "agreement" to participate in a RICO conspiracy may be proved by showing (1) the existence of an agreement on an overall objective, or (2) in the absence of an agreement on an overall objective that the defendant agreed personally to commit two or more predicate acts. A fact-finder may infer there was an agreement from circumstantial evidence of the scheme. In this way, the conspiracy provision allows persons who are responsible for an injury, but did not actually participate in the injury-causing activity, to be held liable.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN23[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The elements of a *18 U.S.C.S. § 1962(c)* claim are: (1) the existence of an enterprise; (2) that the enterprise affected interstate commerce; (3) that the defendants were employed by or associated with the enterprise; and (4) that the defendants participated, either directly or indirectly, in the conduct of the affairs of the enterprise; and (5) that the defendants participated through a pattern of racketeering activity. The fifth element of a *§ 1962(c)* claim requires allegations (a) that the defendant committed at least two of the predicate racketeering acts listed in *18 U.S.C.S. § 1961(1)*; (b) that there was relatedness among the predicate acts; and (c) that the multiple predicates amounted to, or threatened the likelihood of, continued criminal activity.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN24[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The United States Court of Appeals for the Eleventh Circuit has stated that proof of the fifth element of an *18 U.S.C.S. § 1962(c)* claims requires not only evidence of pattern but also evidence that the defendants' predicate acts were related to the enterprise charged.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > General Overview

HN25[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The specific facts of each Racketeer Influenced and Corrupt Organizations Act case determine whether a threat of continued criminal activity has been sufficiently alleged or shown. The concept of continuity may refer to either a closed period of repeated conduct, or to past conduct that by its nature projects into the future with a threat of repetition. The former period is referred to as "closed-ended continuity," and the latter as "open-ended continuity."

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Transportation Law > Carrier Duties & Liabilities > Contraband

HN26[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In a Racketeer Influenced and Corrupt Organizations Act action, a party may demonstrate closed-ended continuity by proving a series of related predicates extending over a substantial period of time. Predicate acts extending over a few weeks or months and threatening no future criminal conduct do not satisfy this requirement.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN27[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Under the Racketeer Influenced and Corrupt Organizations Act, a plaintiff must establish that the acts of racketeering by the alleged enterprise be related and amount to, or pose a threat of, continued criminal activity. A person is not liable under *18 U.S.C.S. § 1962(c)* for an enterprise's pattern of racketeering activity; he is liable for conducting the affairs of an enterprise through his own pattern of racketeering activity. *18 U.S.C.S. § 1962(c)*. To state a claim against a particular person, the plaintiff thus needs to establish much more than that the enterprise's activities pose a threat of continued criminal activity; the plaintiff needs to establish that the acts of the person pose a threat of continued criminal activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN28[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Under the Racketeer Influenced and Corrupt Organizations Act, the threat of continuity may be established by showing that the predicate acts or offenses are part of an ongoing entity's regular way of doing business. Thus, the threat of continuity is sufficiently established where the predicates can be attributed to a defendant operating as part of a long-term association that exists for criminal purposes. Such a showing may be made with reference to a traditional criminal enterprise or with respect to an ongoing legitimate business. Furthermore, there is no requirement that the predicate acts each be a part of separate illegal "schemes." A showing of this sort ordinarily must encompass a sustained period or set of examples sufficient to draw this conclusion with reasonable certainty. However, a plaintiff attempting to show continuity by reference to the enterprise itself may make use of the totality of the evidence. The plaintiff may thus present evidence of the defendant's business practices with respect to not just the plaintiff, but others as well.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN29[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Florida Racketeer Influenced and Corrupt Organizations Act provides that it is unlawful for any person employed by, or associated with, any enterprise to conduct or participate, directly or indirectly, in such enterprise through a pattern of criminal activity or the collection of an unlawful debt. *Fla. Stat. Ann. § 772.103(2)* (2003).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > Criminal Offenses > General Overview

HN30[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Under the Florida Racketeer Influenced and Corrupt Organizations Act (Florida RICO Act), criminal activity includes several predicate crimes named in *Fla. Stat. Ann. 772.104(1)* (2003), and a "pattern of criminal activity" consists of engaging in at least two incidents of criminal activity that have the same or similar intents, results, accomplices, victims, or methods of commission or that otherwise are interrelated by distinguishing characteristics and are not isolated incidents; provided that the last of such incidents occurred within five years after a prior incident of criminal activity. The term "pattern of criminal activity" does not include two or more incidents of fraudulent conduct arising out of a single contract or transaction against one or more related persons. *Fla. Stat. Ann. § 772.102(4)* (2003). The definition refers to engaging in at least two "incidents" of racketeering conduct rather than "acts" of racketeering conduct set forth in the Racketeer Influenced and Corrupt Organizations Act. Thus, crimes committed at the same time cannot qualify as separate incidents for purposes of proving racketeering conduct under the Florida RICO Act.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN31[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The fact that only a single scheme is alleged does not render a Florida Racketeer Influenced and Corrupt Organizations Act claim insufficiently pled if there are several incidents alleged.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN34[] Monopolies & Monopolization, Attempts to Monopolize

In order to state a claim for attempted monopolization under either the Sherman Act or the Florida Antitrust Act, a plaintiff must allege facts that, if proven, would satisfy his burden at trial to prove that: (1) the defendant has engaged in predatory or anticompetitive conduct (2) with a specific intent to monopolize and (3) that there is a dangerous probability that defendant will achieve monopoly power. The third element of a proper attempted monopolization claim requires a two-part showing that a defendant is close to acquiring controlling market power over the relevant product market.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Sherman Act > General Overview

HN36[] Monopolies & Monopolization, Attempts to Monopolize

Determining the relevant product market for an attempted monopolization claim provides the frame of reference within which a defendant's relative market power is measured. The relevant product market is the part of trade or commerce that the defendant is allegedly attempting to monopolize. *15 U.S.C.S. § 2*. The "outer boundaries" of a product's market are defined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. All purchasers and suppliers within those boundaries make up the market for that product unless there is evidence that the market is narrower because of other considerations. Where evidence shows, for example, that consumers within the geographic area cannot realistically turn to outside sellers should prices rise within the defined area, the relevant market is limited by excluding suppliers outside of that geographic area. The scope of the relevant market may also in some cases be narrowed to a certain portion of customers.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN37[] **Regulated Practices, Market Definition**

Ultimately, the contours of the relevant market and the defendant's relative power in that market are issues of fact. Dismissals are exceedingly disfavored in antitrust cases because of their fact-intensive nature. Where, however, a plaintiff alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in the plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted. A complaint is also legally insufficient where it shows that the plaintiff's proposed relevant market clearly excludes relevant geographic areas, purchasers, or suppliers. Such a complaint may therefore be dismissed because proving the facts alleged could not support a finding of attempted monopolization.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN38[] **Regulated Practices, Market Definition**

While a relevant product market can be limited to a portion of customers, such a limitation must be based on a distinction in the product sold to those customers. If, for example, a product is specially designed for a certain group of purchasers and the suppliers concentrate their efforts almost exclusively on those purchasers the product dimension may be limited to the sale of that product to those purchasers. Similarly, where one product is distinct from another because of its salability the relevant market can consist solely of that product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN39[] **Monopolies & Monopolization, Attempts to Monopolize**

A plaintiff's allegations regarding the third element of an attempted monopolization claim--dangerous probability of monopolization--must not only propose an appropriate relevant market but must also include allegations that the plaintiff's competitor is close to acquiring controlling market power. The plaintiff's allegations of a defendant's current market share are the most important factor in determining whether the market power issue should go to the jury. Generally, a showing that a defendant has between 60 and 65 percent market share is sufficient to present the issue of market power to a jury. Other factors, including barriers to entering the relevant market, are thereafter "relevant" to the question of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN40[] Monopolies & Monopolization, Attempts to Monopolize

The United States Court of Appeals for the Eleventh Circuit has stated that courts should be wary of the numbers game of market percentage when considering an "attempt to monopolize" suit under the dangerous probability standard. Other factors, such as barriers to entry into the market like high startup costs and the advantages of experience, may be important to the ultimate decision of whether a defendant has captured a dangerous market share.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN41[] Monopolies & Monopolization, Conspiracy to Monopolize

Conspiracy to monopolize has three elements: (1) the existence of a combination or conspiracy; (2) an overt act in furtherance of the conspiracy; and (3) specific intent to monopolize.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN42[] Monopolies & Monopolization, Attempts to Monopolize

The third element of a claim for conspiracy to monopolize requires a showing of specific intent to achieve monopoly power. The Sherman Act prohibits conspiring to monopolize any part of the trade or commerce, *15 U.S.C.S. § 2*. That "part" of trade that it is illegal to conspire to monopolize is the relevant product market: Commodities reasonably interchangeable make up that 'part' of trade or commerce which *§ 2* protects against monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN43[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Because monopoly power is, by definition, power over a relevant market, what constitutes the relevant market is a necessary issue in measuring a defendant's specific intent for conspiracy purposes.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN44[] **Antitrust & Trade Law, Sherman Act**

The defendants' intentions with regard to the market in which the litigants compete are what concern the Sherman Act. Allegations that conspiring defendants specifically intended to drive a plaintiff from a single deal will not ordinarily support a conspiracy to monopolize claim. On the other hand, a plaintiff need not allege that the defendants conspired to drive competitors from commerce altogether. The middle ground suggested by *15 U.S.C.S. § 2* is the requirement that the plaintiff allege that the defendants intended to monopolize a part of trade or commerce. A plaintiff must thus allege a proper relevant market to survive a motion to dismiss a Sherman Act conspiracy claim.

Business & Corporate Law > ... > Corporate Governance > Directors & Officers > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Governments > Courts > Court Personnel

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Powers > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN45[] **Corporate Governance, Directors & Officers**

In Copperweld, the United States Supreme Court held that, under *15 U.S.C.S. § 1*, a wholly-owned subsidiary could not form a conspiracy with its parent corporation because agreements between parents and subsidiaries do not suddenly bring together economic power that was previously pursuing divergent goals, and these agreements are therefore not within the concern of the antitrust conspiracy statutes. In so holding, the Court noted that officers also cannot conspire, for *§ 1* purposes, with the corporations that employ them because officers of a single firm are not separate economic actors pursuing separate economic interests. In the United States Court of Appeals for the Eleventh Circuit, this Copperweld intracorporate conspiracy doctrine applies equally to *15 U.S.C.S. §§ 1* and *2* conspiracy claims. Courts in the Eleventh Circuit have left open the possibility of, but have rarely found applicable, an exception to the Copperweld doctrine. Though the doctrine applies to officers and employees acting in their official capacities, the exception might bar application of the doctrine where the plaintiff can demonstrate that the officers of a corporation have a personal stake in achieving the object of the alleged conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN46[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN47[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The United States Court of Appeals for the Eleventh Circuit has suggested that an individual's status as an agent in the typical sense is not determinative of whether that individual falls within the Copperweld intracorporate conspiracy doctrine. The court has cited with approval a United States Court of Appeals for the Seventh Circuit decision holding that the intracorporate conspiracy doctrine does not preclude a conspiracy or combination between a corporation and any agent. The guiding principle is the requirement that there be more than one independent business entity involved in the combination or conspiracy. The Eleventh Circuit's decisions therefore use the term "agent" to broadly describe entities who are not separate economic powers pursuing divergent goals from the corporation (or other second entity) in question.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Business & Corporate Law > Agency Relationships > Types > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN48[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Officers of a single firm cannot conspire with that firm to monopolize not because they are officers, and not precisely because, as agents, their acts are attributed to their principal, but because they are not divergent economic powers. Because the antitrust conspiracy statutes are only triggered when previously divergent economic powers make agreements, a plaintiff's claim must allege a joining of two independent sources of economic power or be dismissed.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN49[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Applying the Copperweld intracorporate conspiracy doctrine in different contexts, the United States Court of Appeals for the Eleventh Circuit has made clear that the doctrine does not turn on particular legal relationships, but rather, as the United States Supreme Court has reiterated since Copperweld, turns on specific antitrust objectives.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN50[] **Antitrust & Trade Law, Sherman Act**

The fact that the Copperweld intracorporate conspiracy doctrine does not per se apply to employees highlights the importance of keeping the Sherman Act's goals in mind. In the Eleventh Circuit and other circuits, when the officers or employees of a corporation act for their own interests, and outside the interests of the corporation, they are legally capable of conspiring with their employers for purposes of the Sherman Act.

Opinion

[*1201] MEMORANDUM AND ORDER

Lockheed Martin has filed a twenty-three count Complaint against the Boeing Company and certain individuals related to their alleged theft of trade secrets pertaining to a bid competition to provide the U.S. Government space launch capability. Defendants the Boeing Company, William Erskine, Larry Satchell, and Kenneth Branch have all filed motions to dismiss several of the counts of Lockheed Martin's Complaint for failure to state a claim. Specifically, Defendants seek dismissal of all of the claims pursuant to the *Racketeer Influenced and Corrupt Organizations Act* and the *Florida Civil Remedies For Criminal Activities Act* stated in Counts I - IV ("the racketeering claims" and the "racketeering conspiracy claims") and of all of the claims brought under the *Sherman Act* and the *Florida Antitrust Act of 1980* stated in Counts V - VIII (the "attempted monopolization claims" and the "conspiracy to monopolize claims"). William Erskine's motion also seeks a more **[**3]** definite statement from Lockheed. [1] This memorandum and order supplement the Court's order of March 31, 2004. (Doc. 189, filed March 31, 2004.)

I. BACKGROUND

[2]

Lockheed Martin ("Lockheed") is a company heavily involved in the defense and aerospace industries, including satellite launch services. The Boeing Company ("Boeing") competes with Lockheed in the satellite launch services business. This competition extended to the multi-billion dollar Evolved Expendable Launch Vehicle ("EELV") Program, an Air Force program **[*1202]** seeking assistance from the private **[**4]** sector to develop a cost-efficient national space launch capability. The Air Force contemplated that interested aerospace contractors would engage in a multi-phased competition covering the design, development, and prototyping of the EELV. Initially, the Air Force planned to select the contractor that submitted the proposal representing the "best value" to the Air Force in a "winner take all" competition. The winner was to beawarded $ 1 billion for the development cost of the EELV as well as contracts for future space launches.

The first phase of the competition was called the "Low Cost Concept Validation" ("LCCV") and it required competitors to develop cost and risk reduction concepts. On August 24, 1995, the Air Force awarded LCCV contracts to four contractors: Lockheed, Boeing, McDonnell Douglas, and Alliant Techsystems. The Air Force agreed to pay each competitor $ 30 million for its participation.

The Air Force then called upon the participating companies to submit proposals for the next phase of the competition, which was called "Pre-Engineering and Manufacturing Development" ("Pre-EMD"). The proposals were required to show at least a twenty-five percent savings over current **[**5]** launch costs. On December 20,

---

[1] Defendants also challenged Count IX of the Complaint, which alleged violations of the Federal Procurement Act. A prior Order of this Court dismissed the claims in that Count. (Doc. 109, filed October 29, 2003.)

[2] These are the facts as alleged in Lockheed Martin's Complaint. (Doc. 1.)

1995, after receiving the proposals, the Air Force eliminated two of the competitors, Alliant Techsystems and Boeing, and awarded Pre-EMD contracts to Lockheed and McDonnell Douglas. Approximately eight months later, Boeing re-entered the competition when it acquired McDonnell Douglas.

On November 3, 1997 the Air Force changed its acquisition policy by abandoning the "winner take all" approach. The Air Force announced that, instead, it would award each of the two remaining competitors--Lockheed and Boeing--$ 500 million Engineering, Manufacturing and Development contracts ("the EMD contracts"). The EMD contracts awarded to Lockheed and Boeing required that they each develop the engineering and manufacturing process for the "launch vehicle system, launch pads, satellite interfaces, and support infrastructure." The contracts required each of the competitors to demonstrate that its system was capable of launching commercial satellites as well as meeting the Air Force's launch mission requirements.

Also under the new Air Force strategy, the contractors were expected to submit firm, fixed-price bids for the initial thirty launch missions. Information generated **[**6]** by the bidders in the earlier phases of the bid remained relevant to the final award. Believing the winning contractor would enjoy "an enhanced position in the national and international commercial space launch vehicle market from [Department of Defense's] investment in the program," the Air Force also required each contractor to make a financial investment in the new technology.

At the end of the Pre-EMD phase, the Air Force requested that Lockheed and Boeing submit separate proposals for EMD contracts and Launch Services contracts. The Air Force advised the contractors that its allocation of the initial thirty launch missions would be based on which company's proposal would provide the best value to the Air Force. On October 16, 1998, much to Lockheed's disappointment, the Air Force awarded nineteen of the first twenty-eight initial Launch Services contracts to Boeing and only nine to Lockheed. Additionally, the first seven of the Launch Services contracts went to Boeing, while Lockheed's first launch contract was not to take place until the fourth fiscal year of the EELV program. In making this uneven allocation, the Air Force took into account Boeing's lower proposed **[*1203]** price, **[**7]** Boeing's lower evaluated risk in several assessment categories, and the Air Force's determination that Boeing's proposal was technically equivalent to Lockheed's proposal. These were factors contributing to the Air Force's assessment as to which company offered the "best value." The Air Force is now considering expanding the EELV program from thirty to fifty launches within the next ten to twelve years. Lockheed believes the original disproportionate allocation places it at a distinct disadvantage in competing for future Launch Services contracts.

All three of the individual Defendants are former Boeing employees. Kenneth Branch ("Branch") began work with General Dynamics, Lockheed's predecessor, at Cape Canaveral, Florida in 1989, and stayed on when Lockheed took over. He worked on the Atlas I and Atlas II launches and continued to be assigned to Lockheed facilities at Cape Canaveral or Kennedy Space Center until he terminated his employment with the company on January 29, 1997.

In May 1995, Lockheed temporarily assigned Branch to Lockheed's Denver facility to assist with the company's LCCV proposal. Because of his experience with the Atlas II, which was the starting point for the **[**8]** EELV design concept, Branch was again asked to assist with the EELV proposal team at the Denver facility from October 1995 to August 1996. During his second assignment to the Denver facility, Branch was a member of the Operations Group and focused on cost data and on reduction of launch vehicle processing time at the launch site. While performing this work for Lockheed, Branch had access to sensitive Lockheed proprietary documents.

In August 1996, about the time Lockheed was completing its Pre-EMD proposal, Branch returned to Florida to find that his position with Lockheed had been eliminated. He maintained a position with the company as a consultant to the EELV team in Denver, however, while he sought another position. On November 3, 1996, Branch accepted a position with Lockheed's Reusable Launch Vehicle program in Florida. On January 14, 1997, Branch gave Lockheed two weeks' notice of his intention to leave and resigned effective January 29, 1997. Surprisingly, he began employment with Boeing on January 28, 1997, the day before his employment with Lockheed ended. Branch continued to work for Boeing until August 2, 1999, when he was terminated for violating Boeing policy by possessing **[**9]** and distributing Lockheed EELV-related proprietary documents during the EELV competition--the conduct that ultimately gave rise to this suit.

Lockheed alleges that as early as August 1996, when it was finalizing its Pre-EMD proposal, Branch traveled to Boeing's facilities in Huntington Beach, California to be interviewed by Boeing employees Tom Alexiou ("Alexiou") and William Erskine ("Erskine") regarding possible employment with Boeing. Mr. Alexiou was Boeing's EELV Infrastructure Team Lead and Erskine was Boeing's EELV Ground Operations Lead. At this meeting, Branch allegedly showed Erskine Lockheed documents including a presentation entitled "EELV Launch Operations Cycle Time Reduction," a document that contained trade secrets and was marked as Lockheed property. This document described Lockheed's strategy for reduction of costs and reduction of the time period a launch vehicle must remain on a pad in preparation for a flight. During the meeting, Mr. Alexiou questioned Branch regarding elements of Lockheed's EELV proposal, including engines and performance. Branch disclosed Lockheed's plan for reducing costs of its EELV program and gave the two Boeing employees other Lockheed documents. **[**10]** While still employed **[*1204]** by Lockheed and prior to being hired by Boeing, Branch had at least two other meetings with Boeing employees assigned to the EELV program.

On January 14, 1996 Boeing offered Branch a position on Boeing's EELV proposal team. Branch immediately accepted the offer and Branch began work on January 28, 1997. When Branch joined the Boeing EELV proposal team, Boeing officials then questioned him about his work with the Lockheed EELV program. At one point Mr. Alexiou, introducing Branch to Tom Parkinson, Boeing's Vice-President, and to program managers, described Branch as a former Lockheed employee who knew the details of Lockheed's EELV program. Boeing officials questioned Branch regarding Lockheed's proprietary and trade secret information, including strategy, cost, and other information relevant to Lockheed's EELV proposal.

On February 19, 1997, Branch returned to Huntington Beach, where he met with Boeing's EELV Capture Team. A short time later he was assigned on paper to Mr. Alexiou's office in Huntington Beach even though his office was actually in Florida. According to Lockheed, Branch made forty-three trips to Huntington Beach to provide Boeing with Lockheed **[**11]** proprietary information and trade secrets. Boeing promoted Branch to the position of Ground Command Control & Communication Mechanical Equipment Lead in charge of sixty employees responsible for developing the electrical ground support system for EELV launches.

After starting with Boeing, Branch spent time with Larry Satchell ("Satchell"), Boeing's EELV Program Manager of Strategic Planning and Analysis. Lockheed charges that Satchell's position with Boeing was also known as the "Black Hat Team Leader" because one of his job responsibilities was to gather information about Lockheed's EELV Program for Boeing's benefit. By speaking with former Lockheed employees, Satchell attempted to discover technical and cost aspects of Lockheed's EELV proposal. This information was sought to give Boeing a better chance of proposing a lower price to the Air Force. Satchell had numerous conversations with Branch regarding Lockheed's EELV program, and Branch gave him Lockheed proprietary and trade secret information, including cost data.

Kimberly Tran, a Boeing software engineer, became alarmed upon seeing Branch in possession of a binder containing Lockheed proprietary materials while on the Boeing **[**12]** premises at Huntington Beach. Ms. Tran reported the incident to her Boeing supervisors. When Mr. Alexiou learned of Ms. Tran's report he told her she should have made the report to him instead of to her supervisors. Mr. Alexiou maintains that Boeing conducted an investigation in response to Ms. Tran's report and the investigation cleared Branch of wrongdoing. Boeing has since admitted, however, that there is no record of the investigation.

In June of 1999, Steve Griffin, a Boeing engineer, heard Erskine boast that he had offered Branch the Boeing job in exchange for the Lockheed EELV proposal. Mr. Griffin reported these remarks made by Erskine to the Boeing Human Resources Representative and the Boeing Delta IV launch site manager. Coincidentally, Mr. Griffin's wife, Bridget Griffin, was an engineer with Lockheed at this time and made a similar report outlining Erskine's remarks to a Lockheed ethics officer. Lockheed contends that, when Mr. Griffin made his report, Boeing became aware that it could no longer conceal the fact that Boeing had received proprietary information and trade secrets. Only then did Boeing report the situation to Boeing's lawyer, Mark Rabe.

[*1205] Mr. Rabe began his **[**13]** investigation of the report by speaking to Mr. Griffin, who repeated what Erskine had told him. Erskine allegedly said that Branch had come to Erskine and offered him the entire Lockheed

EELV proposal to assist Erskine in preparing Boeing's EELV proposal. Erskine also told Mr. Griffin that he had told Branch that if Boeing were not eliminated from the competition, Branch would have a job with Boeing in return for the Lockheed information. Indeed, as soon as the Air Force selected Lockheed and Boeing for the final phase of the competition, Boeing hired Branch. Erskine added that the documents delivered by Branch assisted Boeing in explaining weaknesses in Lockheed's proposal to the Air Force. When Mr. Griffin suggested to Erskine that his conduct was unethical, Erskine replied that he did not care because he had been hired to win the bid and he would do whatever it took to do so.

Mr. Rabe interviewed Branch in June and July 1999. Upon questioning by Mr. Rabe, Branch disclosed a stack of Lockheed documents located in his office and admitted that they were Lockheed property. After this disclosure, Branch was suspended pending further investigation. After the suspension, other Lockheed **[**14]** documents, marked "proprietary," were found in Branch's office, including one marked "Satchell EELV Observations." Mr. Rabe also interviewed Erskine, who confirmed that he had been part of the Boeing EELV team when he met with Branch in August 1996.

Lockheed alleges that by the end of June 1999 Boeing was aware of the facts outlined above. Notwithstanding this knowledge, Boeing intentionally and fraudulently withheld this information from Lockheed and the Air Force to protect Boeing's interest in the EELV program. Lockheed maintains that in continuing the cover-up, Boeing's in-house lawyer, Gary Black, telephoned Lockheed's Deputy General Counsel, Stephen E. Smith, on June 29, 1999 and said that he had just learned that Boeing had hired Branch, who had brought two Lockheed documents dated 1996 to Boeing. Mr. Black told Mr. Smith that Boeing had suspended Branch. Mr. Black added that there was no indication that the two documents in Branch's possession had been seen or used by anyone on Boeing's EELV proposal team. Upon Mr. Smith's request, Mr. Black also spoke to Michael Kramer, General Counsel of Lockheed Astronautics. Mr. Black repeated his understated assessment of the facts to **[**15]** Mr. Kramer and assured him that none of the information from Branch had been seen by Boeing personnel or used in preparing Boeing's EELV proposal. Relying on the representations that only two documents had been found and that they had not been seen by Boeing EELV personnel, Lockheed did not take action at that time.

On November 1, 1999, Mr. Black again called Mr. Kramer to inform him that another fifteen Lockheed documents possibly containing proprietary and trade secret information were in Boeing's possession. Despite what had been gleaned from the Boeing internal investigation, Mr. Black represented that the documents were all dated earlier than 1996, that they had not been out of Boeing's Florida office, and that they had not been seen by anyone on Boeing's EELV proposal team. In this conversation Mr. Black assured Mr. Kramer that Branch was a "first line engineer" and that he was not involved with Boeing's EELV proposal team.

The fifteen documents Mr. Black referred to were sent to Lockheed. Upon receipt, the documents were inspected and fourteen were found to have been proprietary and confidential. Nonetheless, based on the foregoing assurances from Mr. **[*1206]** Black that the documents **[**16]** had not been seen by the EELV proposal team, Lockheed continued to believe it had not been injured.

After Mr. Black's last conversation with Mr. Kramer, Boeing fired Branch and Erskine. Thereafter, Branch and Erskine initiated an action against Boeing for wrongful termination ("the Erskine litigation"). During that litigation, a lawyer for Boeing contacted Lockheed to advise that, as evidence of Erskine and Branch's misconduct, Boeing was prepared to file a box of Lockheed documents that "might be proprietary." Boeing asserted along with the submission that it had found the box in Branch's office in June or July of 1999. These documents detailed Lockheed's specific cost estimates and pricing strategies, including labor plans and cost-cutting measures, for Lockheed's EELV proposal. The documents also made it possible for Boeing to direct its efforts toward developing technology that it had not previously possessed. The documents, furthermore, revealed that Boeing had hired Branch because of his access to Lockheed's proprietary and trade secret information. Though it was not a party in the Erskine litigation, Lockheed sought review of documents filed with the court in connection with **[**17]** that case, but Boeing objected on grounds that the documents were protected from inspection by order of court. Lockheed's motion to review the documents in the Erskine litigation was denied.

In March 2002, Valerie Schurman, Boeing Vice President and Assistant General Counsel, wrote to Lockheed and stated that she could not explain why all the documents obtained from Mssrs. Erskine and Branch had not been sent to Lockheed in 1999. Ms. Schurman concluded, "At any rate, all documents have now been transmitted to you and I would like to apologize for the series of errors that have occurred in handling this case." Notwithstanding this representation, in April of 2002, Boeing issued an "Investigative Report" stating that it "possessed approximately two boxes of Lockheed documents." In May 2002, Mr. Smith asked Ms. Schurman to confirm that Boeing possessed only the two boxes of Lockheed documents mentioned earlier. Confirming her earlier report, Ms. Schurman replied: "On your question about documents, I think we've answered that a number of times. We have provided you with all Lockheed documents of which we are aware." This, too, turned out to be incorrect.

On April 23, 2003, while the **[**18]** Air Force was conducting an investigation of Boeing, Steven Horton, Boeing's Chief Counsel at its Seal Beach, California office, admitted to Mr. Smith, Lockheed's counsel, that Boeing had ten additional boxes of Lockheed documents, three or four of which might contain Lockheed proprietary information and one or two of which might contain trade secrets belonging to Lockheed's predecessors, including General Dynamics. Mr. Horton explained that the documents had been removed from Branch's office and that Boeing's Law Department believed the relevant documents had been turned over to Lockheed. Mr. Horton assented to Mr. Smith's request for the documents. On April 24, 2003, Lockheed received nineteen documents, eighteen of which contained Lockheed or General Dynamics proprietary markings. Included in the documents were the detailed launch operations plan for Lockheed's EELV launch vehicle and an internal strategic plan containing cost estimates. On April 26, 2003, Boeing sent eleven more boxes of Lockheed documents to Lockheed's outside counsel. Those boxes also contained Lockheed proprietary and trade secret information.

Boeing continued to produce Lockheed documents in its possession. **[**19]** On May 9 **[*1207]** and May 23, 2003, Boeing sent Lockheed another four boxes of Lockheed proprietary and trade secret information. On June 2, 2003, Boeing turned over copies of two e-mail messages from Branch to another Boeing employee attaching Lockheed proprietary documents. On June 4, Boeing surrendered another 1,850 pages of Lockheed documents, and finally, on June 6, 2003 Boeing advised Lockheed that it had still more Lockheed documents in its possession. By the time the Complaint in this case was filed on June 10, 2003, Boeing had turned over 37,173 pages of Lockheed documents.

II. MOTION FOR A MORE DEFINITE STATEMENT

Erskine describes Lockheed's Complaint as a "shotgun pleading" and seeks a more definite statement from Lockheed under *Federal Rule of Civil Procedure 12(e)*. (Doc. 55 at 2.) ***HN1***[] A court should not grant a *Rule 12(e)* motion unless the pleading in question is "so vague that a party cannot reasonably be required to frame a responsive pleading." *Fed. R. Civ. P. 12(e)*; *Anderson v. Dist. Bd. of Trs. of Cent. Fla. Cmty. Coll., 77 F.3d 364, 367 (11th Cir. 1996)*. The Eleventh Circuit **[**20]** Court of Appeals refers to the most vague pleadings as "shotgun pleadings." One typical feature of a shotgun pleading is incorporation of the same lengthy allegations into each claim alleged, which makes it difficult "to know which allegations of fact are intended to support which claim(s) for relief." *Anderson, 77 F.3d at 366*. Lockheed's Complaint is not a shotgun pleading. Lockheed does repeatedly incorporate into each Count all of the general allegations in paragraphs 1-168. In each Count, however, Lockheed also reiterates in detail the particular relevant portions of those general allegations. Erskine was able to and did file adequate responsive motions to this Complaint. For these reasons, Erskine's motion for a more definite statement is denied.

III. MOTION TO DISMISS FOR FAILURE TO STATE A CLAIM

HN2[] For purposes of a motion to dismiss, a court must view the allegations of the complaint in the light most favorable to the plaintiff. *Fed R. Civ. P. 12(b)(6)*; *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Jackson v. Okaloosa County, Fla., 21 F.3d 1531, 1534 (11th Cir. 1994).* **[**21]** Furthermore, a court must accept all reasonable inferences from the complaint and consider all allegations as true. Id. A court may not, however, accept conclusory allegations and unwarranted factual deductions as true. Gersten v. Rundle, 833 F. Supp. 906, 910 (S.D. Fla. 1993) (citing Associated Builders, Inc., v. Ala. Power Co., 505 F.2d 97, 100 (5th Cir. 1974)). Only pleadings and attached written exhibits may be considered in making these determinations. See Fed. R. Civ. P. 10(c); GSW, Inc., v. Long County, Ga., 999 F.2d 1508, 1510 (11th Cir. 1993). Unless it appears beyond doubt that a plaintiff can prove no set of facts entitling him to relief, a complaint should not be dismissed for failure to state a claim. Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957); Hunnings v. Texaco, Inc., 29 F.3d 1480, 1484 (11th Cir. 1994). "Rule 12(b)(6) dismissals are particularly disfavored in fact-intensive antitrust cases." Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272, 1279 (11th Cir. 2002).

HN3[] A plaintiff is "entitled to **[**22]** survive a motion to dismiss under Fed. R. Civ. Proc. 12(b)(6) if there is any set of facts that, if proven at trial, would entitle [it] to recover." Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 551 n.8, 74 **[*1208]** L. Ed. 2d 723, 103 S. Ct. 897 (1983). A court may not assume, however, that a plaintiff can prove facts that it has not alleged or that a defendant has violated laws in ways that have not been alleged. Id. at 526; Beck v. Interstate Brands Corp., 953 F.2d 1275, 1276 (11th Cir. 1992) (per curiam). Nor is the court bound to accept as true a legal conclusion couched as a factual allegation. See B.H. Papasan v. Allain, 478 U.S. 265, 286, 92 L. Ed. 2d 209, 106 S. Ct. 2932 (1986). Although the federal rules embrace a liberal pleading standard, bald assertions and conclusions of law will not defeat a properly supported motion to dismiss. See Leeds v. Meltz, 85 F.3d 51, 53 (2d Cir. 1996).

IV. THE RACKETEERING CLAIMS

In Counts I - IV of the Complaint, Lockheed alleges that it is entitled to civil damages because the Defendants violated the Racketeer **[**23]** Influenced and Corrupt Organizations Act ("RICO") and the Florida Civil Remedies for Criminal Activities Act ("the Florida RICO Act"). In Count I, Lockheed contends that

> Boeing, Erskine, Satchell, Branch, together with Alexiou, Black, and others known and unknown to Lockheed Martin, acting in concert and on behalf of Boeing, have unlawfully, knowingly, and intentionally conducted and are continuing to conduct [through a pattern of racketeering activity] an enterprise referred to herein as the "Boeing Trade Secrets Theft Enterprise," an association in fact. This same enterprise includes, and may not be limited to, the "Boeing EKV Proposal Team," and, more recently, the "Boeing EELV Proposal team."

(Doc. 1 PP175-77.) [3] The proposed Boeing Trade Secrets Theft Enterprise ("BTSTE") allegedly existed to steal trade secrets not only from Lockheed, but also from other competitors, including Raytheon, with whom Boeing competed to win the Missile Defense Agency's EKV contract, and AssureSat. (Doc. 1 PP156-63.) Count I is based on section 1962(c) of RICO, which provides that

> **HN4**[] It shall be unlawful for any *person* employed by or associated with any *enterprise* engaged **[**24]** in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such *enterprise's* affairs through a pattern of racketeering activity or collection of unlawful debt.

18 U.S.C § 1962(c)(2001) (emphasis added); see 18 U.S.C. § 1964(c) (**HN5**[] providing for private right of action and civil damages).

In Count II, Lockheed alleges that, in violation of section 1962(d) of RICO, the Defendants all conspired to violate section 1962(c). Section 1962(d) provides that it **HN6**[] "shall be unlawful for any person to conspire to violate any of the provisions of subsection (a), (b), or (c) of this section." 18 U.S.C. § 1962(d). In Counts III and IV, Lockheed attempts **[**25]** to state claims under parallel provisions of the Florida RICO Act, sections 772.103(3) and (4) of the Florida Statutes. [4] Lockheed alleges that all of the Defendants are "persons" within the RICO definition because

---

[3] "EKV" stands for exoatmospheric kill vehicle. Lockheed alleges that in 1999, Boeing was involved in misconduct pertaining to its involvement in the U.S. Missile Defense Agency's competition for the EKV. (Doc. 1 PP156-59.)

they are entities capable of holding a legal or **[*1209]** beneficial interest in property, and that the BTSTE is an "association-in-fact" enterprise. *18 U.S.C. §§ 1961(3)-(4)*. In their motions to dismiss, Defendants make several arguments: (1) that the allegations would not support a finding that Lockheed's proposed enterprise, the BTSTE, was an ongoing organization and thus a true "enterprise"; (2) that, in light of the distinctness rule, Boeing may not be liable as a "person" who associated with the BTSTE; (3) that Lockheed has not sufficiently alleged a "pattern of racketeering activity;" and (4) that Lockheed's conspiracy claims necessarily fail if Lockheed has failed to state a sufficient underlying racketeering claim.

[26]** *A. The BTSTE as the "Enterprise": RICO & The Florida RICO Act*

Defendants argue that Lockheed fails to state a claim under *section 1962(c)* because the Complaint does not contain allegations that would support a finding that the BTSTE is an association-in-fact enterprise. (See, e.g., Doc. 46 at 9.) ***HN7***[] Under RICO, an enterprise "includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity." *18 U.S.C. § 1961(4) (2001)*. The existence of an enterprise "is proved by evidence of an ongoing organization, formal or informal, and by evidence that the various associates function as a continuing unit." *United States v. Turkette, 452 U.S. 576, 583, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)*. Defendants contend that proof of the facts alleged would not support a finding that the BTSTE is an "ongoing organization" in which the "various associates function as a continuing unit" because Lockheed's definition of the enterprise consists "entirely of two Boeing *bid proposal teams,"* which "makes clear that . . . the enterprise itself . . . ended upon proposal submission, **[**27]** after which the proposal teams by definition ceased to exist." (Doc. 46 at 9; see also Doc. 41 at 5; Doc. 55 at 4.)

Defendants suggest that, under Turkette, a plaintiff must allege that an association-in-fact enterprise was made up of a "coherent association of members." (See, e.g., Doc. 46 at 9 n.7.) This argument, however, was rejected in United States v. Hewes, in which the Eleventh Circuit Court of Appeals held that shifting associations can form an enterprise if the participants "overlapped to a significant degree." *729 F.2d 1302, 1311 (11th Cir. 1984)*. The court confirmed this in 1985, when it stated that Turkette did not alter the rule that

> ***HN8***[] [RICO does not require that an] enterprise . . . possess an "ascertainable structure" distinct from the associations necessary to conduct the pattern of racketeering activity . . . . Moreover, [the Eleventh Circuit has also rejected] the contention that Turkette's reference to the RICO enterprise as a "continuing unit" required participation of all members throughout the life of the enterprise.

United States v. Weinstein, 762 F.2d 1522, 1537 n.13 (11th Cir. 1985). Defendants' **[**28]** arguments hinging on the lack of a "coherent association" are therefore unavailing. Defendants also suggest that under Turkette, there must be some organization or purpose distinct from the object of the enterprise's criminal acts. (See, e.g., Doc. 46 at 9-10 n.7.) The Eleventh Circuit Court of Appeals also rejected this reading of Turkette in Hewes, in which it held that ***HN9***[] a plaintiff need not allege "a definable structure distinct from the 'racketeering activity.'" *729 F.2d at 1310*.

HN10[] In this circuit, "the definitive factor in determining the existence of an enterprise [is] an association of individuals, however loose or informal, which furnishes a vehicle for the commission of two or more predicate crimes . . . ." *Weinstein, 762 F.2d **[*1210]** at 1537*. The Court of Appeals has also stated that an enterprise exists if persons "associate formally or informally, with the purpose of conducting illegal activity." *Hewes, 729 F.2d at 1311*, quoted in *Weinstein, 762 F.2d at 1537*.

---

[4] With one exception, addressed in subsection C.2. of this discussion, the parties agree that the Florida RICO Act was modeled after RICO and that their arguments about RICO apply equally to the counterpart state claims. See *Gross v. State, 765 So. 2d 39, 42-43 (Fla. 2000)*. (See, e.g., Doc. 46 at 4-5 n.2; Doc. 57 at 2 n.2.)

Lockheed's allegations satisfy these very broad definitions of a RICO enterprise. It is true that the focus of Lockheed's Complaint, including **[**29]** the RICO allegations, is the Defendants' conduct with regard to the EELV bid. The allegations about the enterprise, however, do--if only just barely--allege that the BTSTE was ongoing and continuing. The association- in-fact enterprise is, for example, alleged to include members of a proposal team unrelated to the EELV project, the "EKV Proposal Team." This allegation refers to claims in the Complaint that, as "part of a pattern and practice by Boeing to engage in economic espionage," Boeing employees were involved in stealing trade secrets not just from Lockheed, but also from Raytheon (Boeing's competitor in the Missile Defense Agency's EKV competition), and also from AssureSat. (Doc. 1 PP156-61.) Both the proposed enterprise and these other allegations suggest that the BTSTE had a life beyond the EELV proposal. Lockheed also alleges that the enterprise members' illegal activity was allegedly geared toward not just the EELV bid, but toward "procuring, analyzing, and using the highly sensitive, proprietary and trade secret information of its competitors, *including, without limitation,* Lockheed Martin." (Doc. 1 P175) (emphasis added.) These allegations add to the implication that **[**30]** winning the EELV bid was only "one ostensible purpose" of the BTSTE and that Lockheed will attempt to prove that the enterprise existed to continually steal from several or all of Boeing's competitors. [5] (See id.) Lockheed has thus sufficiently alleged a RICO enterprise. Whether Boeing may be held liable as a defendant "person" who "associated with" that ongoing and continuing enterprise also requires discussion.

B. Boeing as a "Person": RICO & The Florida RICO Act

1. 18 U.S.C. § 1962(c) & Section 772.103(3), Fla. Stat.

[31]** Boeing challenges the allegations that it is a RICO defendant "person" who associated with the alleged enterprise, the BTSTE. The BTSTE, again, is alleged to "include[], and may not be limited to, the 'Boeing EKV Proposal Team,' and, more recently, the 'Boeing EELV Proposal team.'" (Doc. 1 PP175-77.) Boeing concedes that a corporation may be a "person" under *section 1961(3)*, [6] but argues that the Boeing corporation is not sufficiently distinct from the enterprise as alleged. Because of the lack of distinctness between it and the alleged enterprise, Boeing urges that it cannot be a defendant "person" and that dismissal of the RICO claims against it is required.

HN12[] Under *section 1962(c)*, the allegations "must name a RICO person distinct from the RICO enterprise." *United States v. Goldin Indus., 219 F.3d 1268, 1271 (2000)* **[**32]** ("Goldin I"). This is because "the plain language of *§ 1962(c)* envisions two separate **[*1211]** entities, which comports with legislative intent and policy." *Id. at 1270*. This distinctness rule "reflects Congress' intention in *§ 1962(c)* to target a specific variety of criminal activity, 'the exploitation and appropriation of legitimate businesses by corrupt individuals.'" Id. (quoting *Yellow Bus Lines, Inc. v. Drivers, Chauffeurs & Helpers Local Union, 639, 280 U.S. App. D.C. 60, 883 F.2d 132, 139 (D.C. Cir. 1989)*, rev'd in part on other grounds, *286 U.S. App. D.C. 182, 913 F.2d 948 (D.C. Cir.1990)* (en banc).

When the Eleventh Circuit Court of Appeals recently adopted the distinctness rule in Goldin I, it joined all of the other circuits and overruled the contrary prior decision of a three-judge panel in *United States v. Hartley, 678 F.2d 961 (11th Cir. 1998)*. Courts have applied this rule in several ways to preclude suits against corporations. For example, the rule has prevented a plaintiff from naming a corporation as both the person and the enterprise, *Haraco v. American National Bank & Trust Co. of Chicago, 747 F.2d 384, 402 (7th Cir. 1984)*; **[**33]** from naming a corporation as the person and naming a division of that corporation as the enterprise, *United States v. Computer Sciences Corp., 689 F.2d 1181, 1190 (4th Cir. 1982)*, overruled on other grounds by *Busby v. Crown Supply, Inc.,*

---

[5] It is true that the "pattern of racketeering" is alleged to have a much more narrow goal, (see Doc. 1 P177, alleging that the pattern of activity was all "in furtherance of" the EELV scheme), but ***HN11***[] the "'enterprise' is not the 'pattern of racketeering activity'; it is an entity separate and apart from the pattern of activity in which it engages." *Turkette, 452 U.S. at 583*. A single pattern of racketeering activity thus does not define the scope of the enterprise.

[6] Under RICO, "'person' includes any individual or entity capable of holding a legal or beneficial interest in property . . . ." *18 U.S.C. § 1961(3)*.

896 F.2d 833, 840 (4th Cir. 1990); from naming a corporation as the person and naming a grouping of that corporation's subsidiaries as the enterprise, Discon v. NYNEX Corp., 93 F.3d 1055, 1063 (2d Cir. 1996) (contra Haraco, 747 F.2d at 402); and from naming a corporation as the person and naming a grouping of that corporation's own employees and agents as the enterprise, Riverwoods Chappaqua Corp. v. Marine Midland Bank, 30 F.3d 339, 344 (2d Cir. 1994).

It is on the Riverwoods application of the rule that Boeing hangs its hat. Boeing characterizes the alleged enterprise as a grouping of divisions of Boeing (the EELV and EKV proposal teams), Boeing employees (Erskine and Satchell) and a Boeing "agent" (Branch). [7] Boeing argues it cannot be named as a RICO "person" because the alleged enterprise is "nothing more than a subdivision or a part of" Boeing and thus **[**34]** Boeing is no more distinct from the BTSTE than the corporation in Riverwoods was from the grouping of the corporations' employees and agents alleged in that case to be the enterprise. (Doc. 46 at 6.)

Lockheed counters that because Branch was not technically **[**35]** a Boeing employee or agent at all relevant times, Boeing is sufficiently distinct from the enterprise that includes Branch. According to Lockheed, Boeing was simply one of many distinct members of the association-in-fact enterprise, the BTSTE. Lockheed analogizes this case to one in which a district court held that "where the alleged enterprise consists of a corporation and its present and former employees who allegedly continued their racketeering activity after leaving their employment in the corporation, the pleadings sufficiently allege an enterprise separate and distinct from the RICO persons." *Ctr. Cadillac, Inc. v. Bank Leumi Trust Co. of N.Y., 808 F. Supp. 213, 236* ***[*1212]*** *(S.D.N.Y. 1992)*, aff'd, *99 F.3d 401 (2d Cir. 1995)*.

Because Branch was neither formally an employee or agent of Boeing, nor completely disassociated from Boeing like an ex-employee, neither the facts of *Riverwoods* nor those of *Center Cadillac* are convincingly analogous to the facts presented here. [8] The Eleventh Circuit's decision in *United States v. Goldin, 219 F.3d 1271, 1277 (11th Cir. 2000)* ("Goldin II"), along with Riverwoods, two other important **[**36]** Second Circuit distinctness cases, and the only Supreme Court distinctness case, *Cedric Kushner Productions, Ltd. v. Don King, 533 U.S. 158, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*, demonstrates that ***HN13***[] distinctness is a fact-intensive inquiry that is not driven solely by formal legal relationships among the alleged "associates in fact." Even where formalities were important to the distinctness inquiries in these cases, the courts were guided by common-sense readings of the complaints in the context of the RICO statute and by the purposes of the statute. These cases show that the allegations of Branch's "association with" the BTSTE does not make Boeing sufficiently distinct from the BTSTE to render Boeing a "person" under RICO.

The first and only case in which the Eleventh Circuit Court of Appeals applied the distinctness rule must **[**37]** guide the analysis of Lockheed's allegations. In *Goldin II,* the court found that each of three corporations--Goldin Mississippi, Goldin Alabama, and Goldin Louisiana--was sufficiently distinct from an alleged association-in-fact enterprise consisting of the three corporations, such that each corporation could be a RICO defendant "person." *219 F.3d at 1277*. The Court of Appeals reasoned that, despite mutual connection to the original Goldin and some overlapping ownership, each corporate "person" was truly "separate and distinct. Each is incorporated in a separate state. Each is a separate ongoing business with a separate customer base. Each is free to act independently and advance its own interests contrary to those of the other two corporations." Id.

---

[7] Even this is a generous reading of Lockheed's definition of the enterprise. Lockheed's proposed enterprise specifically includes only the two proposal teams, and does not specifically include Branch. (Doc. 1 P175.) Read strictly, the Complaint alleges that subdivisions of Boeing made up the enterprise and thus does not allege that Branch formed a *part* or was a *member* of the enterprise. Pursuant to this reading, the Complaint only alleges that Branch, along with the other Defendants, "conducted" the affairs of the enterprise through a pattern of racketeering activity. (Id.) Branch eventually became a part of the EELV proposal team, however, so it is not unfair to presume that Lockheed included Branch as a member of the alleged enterprise.

[8] It is noted that Center Cadillac was decided before the Second Circuit ruled in Riverwoods that a corporation is not sufficiently distinct from an enterprise comprised of its own employees.

The Eleventh Circuit Court of Appeals considered the facts in Goldin II to lie somewhere in between those in two Second Circuit cases, Securitron Magnalock Corp. v. Schnabolk and Discon, Inc. v. NYNEX Corp. Goldin II, *219 F.3d at 1277*. In Securitron, the Second Circuit Court of Appeals held that even though two corporations had the same owner and president, each corporation was sufficiently **[**38]** distinct from an enterprise consisting of the two corporations and their owner because the corporations were "independent entit[ies]." *65 F.3d 256, 263 (2d Cir. 1995)*. In Discon, in contrast, the same court upheld the dismissal of a complaint that named a parent holding company, NYNEX, and two of its wholly-owned subsidiaries as "persons" who had illegally conducted the affairs of an association-in-fact enterprise made up of those same three companies. *93 F.3d 1055, 1063 (2d Cir. 1996)*, vacated on other grounds *525 U.S. 128, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. The court in Discon reasoned that, despite the fact that the subsidiaries were legally distinct from the holding company, they were in fact indistinct from the holding company with whom they allegedly formed the association-in-fact enterprise. *Id. at 1064*. This was because the subsidiaries acted "on behalf of the" NYNEX. Id. This holding made clear that formally separate entities are not always truly distinct for RICO purposes. *Id. at 1063-64* (distinguishing *Cullen **[*1213]** v. Margiotta, 811 F.2d 698 (2d Cir. 1987)*, in which the Second Circuit found that a **[**39]** municipality, the town's Republican Committee, and the county's Republican Committee were *both* legally distinct *and* capable of being be differentiated from the enterprise-group).

Discon only confirmed what had been hinted at by the Second Circuit Court of Appeals in Riverwoods. [9] In the latter case, real estate developers who had borrowed from Marine Midland Bank's predecessor alleged that when the Bank acquired the predecessor, the Bank and several of its vice presidents illegally forced the borrowers to restructure their loans. The plaintiffs sought RICO civil damages from the Bank itself, alleging that the Bank was a "person" who illegally conducted the affairs of the "Restructuring Group Enterprise," an association-in-fact consisting of the Bank itself and the employees who had negotiated the restructuring. The Second Circuit Court of Appeals held that the Bank was not distinct enough from the proposed enterprise to justify a claim against the Bank as a RICO "person."

[40]** In Riverwoods, the court wrote that the distinctness principle "may not be circumvented" by artful pleading such as alleging that the employees of the corporation, rather than just the corporation, make up the enterprise. Id.; see also *Discon, 93 F.3d at 1063* (quoting this language). Thus, though the distinctness rule "does not foreclose the possibility of a corporate entity being held liable as a defendant under *section 1962(c)* where it associates with others to form an enterprise," the rule *does* foreclose the prospect of a corporation being held liable where it associates with others who are not "sufficiently distinct from itself." *Riverwoods, 30 F.3d at 344*. The court did consider traditional notions of the formal legal relationship of employee/agent to employer important to the distinctness inquiry presented by the facts of that case. *Riverwoods, 30 F.3d at 344* ("Because a corporation can only function through its employees and agents, any act of the corporation can be viewed as an act of such an enterprise, and the enterprise is in reality no more than the defendant [person] itself."). The opinion as a whole, however, **[**41]** makes the point that the ultimate test of sufficient distinctness does not always turn on "legal fictions." ***HN14***[] Whether a corporation may be named as a RICO "person" cannot be said to be dependent solely on formalities or reducible to a single set of rules because, as the Second Circuit noted, the distinctness rule is rooted in the language of 1962(c), "comports with legislative intent and policy," and "recognizes that the enterprise is often a passive instrument or victim of racketeering activity." *Riverwoods, 30 F.3d at 343*.

The only Supreme Court case to address the distinctness rule, *Cedric Kushner Productions, Ltd. v. Don King, 533 U.S. 158, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*, echoes Riverwoods by instructing that the designations of "persons" and "enterprises" should fit naturally into the language of the statute and should effectuate the purposes of the statute. In Cedric Kushner, the Supreme Court held that the RICO distinctness principle was not offended by

---

[9] Lockheed's assertion that *Riverwoods* is no longer good law lacks merit. It is true that another Second Circuit Court of Appeals decision that was later overruled by the Supreme Court had relied on *Riverwoods. Cedric Kushner Promotions, Ltd. v. King, 219 F.3d 115, 117 (2d Cir. 2000)*, rev'd, *533 U.S. 158, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*. The Supreme Court made clear, however, that the Second Circuit Cedric Kushner decision had *incorrectly* analogized to Riverwoods; the Supreme Court did not suggest that Riverwoods was not good law. *Cedric Kushner, 533 U.S. at 166*.

charging Don King, the individual, **[*1214]** as a "person" who associated with or was employed by the "enterprise," Don King Productions, an incorporated entity of which King was the president and sole shareholder. *533 U.S. at 163.* **[**42]** The Court wrote that it found nothing in the statute to require more "separateness" than that entailed by the different legal status an individual has from his incorporated self. Id. Contrary to Lockheed's suggestion at oral argument, however, Cedric Kushner does not stand for the proposition that formal legal relationships or a lack thereof among those allegedly "associated in fact" will always be determinative of distinctness in every case. (See Tr. of Hr'g on Mot. to Dismiss at 87-90.) The opinion as a whole, like those of *Riverwoods* and *Discon*, makes clear that distinctness is not always commensurate with "legal fictions."

As the Second Circuit Court of Appeals had in Riverwoods, the Supreme Court noted in Cedric Kushner that ***HN15***[] the distinctness requirement arises from the language of *section 1962(c)*, which "says that it applies to 'person[s]' who are 'employed by or associated with' the 'enterprise.' In ordinary English one speaks of employing, being employed by or associating with others, not oneself." *Cedric Kushner, 533 U.S. at 161* (citations omitted). It was natural, the Court wrote, to speak of Don King, "a corporate employee, **[**43]** as 'a person employed by or associated with' the corporation," Don King Productions. *Id. at 164*. The Court distinguished the facts in Riverwoods because in that case it was "less natural to speak of [the Bank] as 'employed by' or 'associated with' an 'enterprise'" made up of a bank together with its own employees and agents. *Id. at 166* (also distinguishing facts of Discon on same basis).

As it regularly does when construing the terms of the RICO statute, the Supreme Court also considered whether applying the statute and the distinctness principle to find Don King a proper RICO "person" was "consistent with the statute's basic purposes as [the] Court has defined them." *Cedric Kushner, 533 U.S. at 164*; see *Sedima v. Imrex Co., 473 U.S. 479, 498, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)* (noting that ***HN16***[] RICO is to be "liberally construed to effectuate its remedial purposes") (quoting *Pub. L. 91-452, § 904(a), 84 Stat. 947*). ***HN17***[] The history of the statute reveals that it was meant to protect the public not only from wholly illegitimate or illegal enterprises, but also from those who would use unlawful acts to victimize a legitimate **[**44]** enterprise and from "those who would unlawfully use a [legitimate] enterprise as a 'vehicle' through which 'unlawful . . . activity is committed' . . . ." *Cedric Kushner, 533 U.S. at 164-65*; see also *Reves v. Ernst & Young, 507 U.S. 170, 180-82, 122 L. Ed. 2d 525, 113 S. Ct. 1163 (1993)* (describing differences in other bills proposed and that which became RICO).

As the Seventh Circuit Court of Appeals put it, ***HN18***[] an individual who incorporates "gets some legal protections from the corporate form, such as limited liability; and it is just this sort of legal shield for illegal activity that RICO tries to pierce." *R.D. McCullough, II v. Suter, 757 F.2d 142, 144 (7th Cir. 1985)*. Fictitious legal "distinctness," such as between an individual and his corporate self, is important to RICO distinctness to the extent it bears on effectuating this historical policy, *not,* as Lockheed suggests, because formalities are always a sufficient basis on which to rest a finding of distinctness. Indeed, the Supreme Court distinguished the facts in Cedric Kushner from those in Discon, in which, as discussed, the Second Circuit found that *despite* the formal **[**45]** distinctness between a holding company and its subsidiaries, an association-in-fact enterprise **[*1215]** made up of those companies was not sufficiently distinct from each company named as a RICO defendant "person."

Analysis of the facts and reasoning in *Goldin II*, *Securitron*, *Discon*, *Riverwoods*, and *Cedric Kushner* confirms the common-sense conclusion that Boeing is not a proper defendant "person" in this case because Boeing is not sufficiently distinct from the BTSTE despite Branch's involvement in the BTSTE. Lockheed alleges that Branch was at all relevant times seeking a job with Boeing; that Boeing promised Branch a job, *quid pro quo,* if he provided Boeing with the Lockheed information that would help Boeing win the first phase of the EELV bid; and that Branch was always working "on behalf of" Boeing. (See, e.g., Doc. 1 PP63-70, 75, 101.) The distinctness rule may not be circumvented by Lockheed's artful grouping into an association-in-fact of the corporation itself (Boeing), employees of the corporation (Erskine and Satchell), groups of employees of the corporation (the EKV and EELV proposal teams), and a would-be employee of the corporation (Branch), all of whom were at **[**46]** all relevant times allegedly working on behalf of the corporation. Not only was Branch himself not "sufficiently distinct" from Boeing during the five months before he became an actual employee, those five months did not morph the allegedly years-long BTSTE, which would otherwise clearly be a corporate enterprise indistinct from Boeing, into something separate from Boeing. [10]

[47]** Unlike the corporations named as "persons" and alleged to comprise the association-in-fact in Goldin II and Securitron, none of those alleged to make up the BTSTE ever acted independently from Boeing or the BTSTE to advance his own interests. Erskine and Satchell were employees of Boeing, and Branch was analogous to them and to the employees or agents in Riverwoods because even before he became an agent or employee of Boeing, he was always "acting on behalf of" Boeing. [11] Like the subsidiaries in Discon vis-a-vis their parent holding company, Branch, as a "non-employee," was only technically distinct from Boeing.

[48]** As was the case in Discon and Riverwoods there is an unnatural fit between the allegations against Boeing as a person and *section 1962(c)*. Lockheed's allegations about Boeing being "employed by" or "associated with" the alleged enterprise are like those in Riverwoods, which the Supreme Court called "odd" in Cedric Kushner, because Lockheed's allegations speak of Boeing as "a person employed by or associated with" a group made up of Boeing employees and Branch, who was **[*1216]** working on behalf of Boeing. There can be little doubt that the odd grouping Lockheed alleges is designed as it is for no other reason than to reach the deep pockets of Boeing. It would have been far more obvious, workable, and natural to allege that Boeing was the "enterprise" which Erskine, Satchell, and Branch conducted through a pattern of racketeering activity. [12] There is no suggestion in this case,

---

[10] With regard to whether there was a continuing and ongoing *enterprise,* Lockheed's arguments emphasize the several different goals of the alleged enterprise and the enterprise's long history and varied personnel. In that context, Lockheed de-emphasizes the allegations suggesting that one person and one bid, Branch and the EELV bid, were so integral to many of the alleged predicate acts. As already discussed, the allegations about the enterprise do indeed suggest that it was ongoing and continuing beyond the five months before Branch was hired and was much larger than Branch himself. With regard to the issue of whether Boeing may be a liable person associated with this enterprise, however, Lockheed seeks to define the enterprise by Branch's association with it, particularly by five months of that two-year long association. Lockheed cannot have it both ways.

[11] ***HN19***[] "Three elements are needed to establish an apparent agency: (1) a representation by the purported principal; (2) reliance on that representation by a third party; and (3) a change in position by the third party in reliance upon such representation." *Ilgen v. Henderson Props., Inc., 683 So. 2d 513, 514 (Fla. 2d DCA 1996)*. Actual agency requires a showing of: "(1) acknowledgment by the principal that the agent will act for him; (2) the agent's acceptance of the undertaking; and (3) control by the principal over the actions of the agent." *Id. at 515*.

[12] There is no debate about whether Lockheed has sufficiently alleged that Branch (and the other individual defendants) "associated with" and was later "employed by" Boeing/the BTSTE. ***HN20***[] The statute does not suggest, however, that every person who "associates with" an association-in-fact enterprise and participates in conducting that enterprise's affairs illegally need be considered a defining member of that enterprise. Indeed, the Court of Appeals for the Eleventh Circuit has often held that associations-in-fact are often fluid, "amoeba-like," and comprised of shifting personnel. See, e.g., *United States v. Hewes, 729 F.2d 1302, 1311 (11th Cir. 1984)* (rejecting the contention that an association-in-fact "requires participation of all of its members throughout the life of the enterprise" and finding that "shifting associations" whose participants "overlapped to a significant degree" formed an enterprise under the statute); *United States v. Church, 955 F.2d 688, 698-99 (11th Cir. 1992)* (same).

Many of these difficult distinctness cases could potentially be eliminated by a more particular reading of the association-in-fact definition. It could be argued that a RICO defendant corporation should never be considered a "member" of an association-in-fact. The definition of enterprise "includes any *individual,* partnership, corporation, association, or other legal entity, and any union or group of *individuals* associated in fact although not a legal entity . . . ." *18 U.S.C. § 1961(4) (2001)* (emphasis added). As the Eleventh Circuit Court of Appeals once stated, because *section 1961(3)* defines a "person" as an individual or entity capable of holding a beneficial interest in property, "it is clear . . . that 'individual' is used differently from 'person' in the act to connote *a living person." United States v. Hartley, 678 F.2d 961, 989 n.46 (11th Cir. 1982)*, overruled on other grounds by *Goldin I, 219 F.3d. 1268 (11th Cir. 2000)* (en banc) (emphasis added). Because corporations are not living individuals, they thus arguably cannot be a part of an association-in-fact under *section 1962(c)*, though of course they can, as "persons," associate *with* an association-in-fact enterprise. Id. This theory that Congress did not have corporations in mind when it wrote the second half of *section 1961(4)* is buttressed by the fact that corporations necessarily fall within the first half of the definition. So does the often-repeated theory that the second part of the definition of enterprise was designed to snare not "duly formed corporation[s] moreover, that endorsing an unnatural fit between the allegations and the statute or focusing on the lack of a formal employment relationship between Branch and Boeing is necessary to effectuate the special remedial purposes of RICO. Branch's association with the BTSTE does not make Boeing sufficiently **[**49]** distinct from that enterprise such that Boeing is a "person" under *section 1962(c)*.

[50]** Lockheed also argues that the allegation that the enterprise included "others unknown" to Lockheed makes the BTSTE sufficiently distinct from Boeing. It does not. The "others unknown," first of all, **[*1217]** are alleged to have been working on behalf of Boeing and thus furnish no more distinctness than Branch does. Secondly, while it is reasonable to infer from the Complaint that Boeing included Branch in the "EELV Proposal Team" that was said to be a part of the enterprise, the Complaint does not reasonably imply that these unknowns are alleged to be part of the enterprise. Thirdly, it would not be fair to hold that simply alleging "unknowns" is sufficient to circumvent the distinctness rule. Lockheed's final argument for distinctness, raised for the first time at oral argument, is that the Complaint alleges that McDonnell Douglas was another entity in the "enterprise" because some of the predicate acts took place before Boeing acquired McDonnell Douglas. (Tr. of Hr'g on Mot. to Dismiss at 8.) Only an extremely strained reading of the Complaint supports this argument, and Defendants cannot be said to have been on notice that Lockheed was claiming that McDonnell Douglas played a part in this **[**51]** enterprise.

The *section 1962(c)* RICO claim against Boeing and the parallel state claim against Boeing under *section 772.103(3)* of the Florida Statutes are accordingly dismissed.

2. Conspiracy: 18 U.S.C. § 1962(d) & Section 772.103(4), Fla. Stat.

The conclusion that Boeing is indistinct from the BTSTE also dictates that Lockheed's conspiracy claims in Counts II and IV against Boeing, under *section 1962(d)* and *section 772.103(4), Florida Statutes*, be dismissed. Lockheed's claim in essence is that Boeing conspired to conduct or participate, directly or indirectly, in the conduct of an enterprise comprised of Boeing, employees of Boeing, and Branch through a pattern of racketeering activity. See *18 U.S.C. §§ 1962(c)*,*(d)*. This allegation fits no more smoothly into *section 1962(d)* than the statement that Boeing conducted the affairs of that enterprise through a pattern of racketeering activity fits into *section 1962(c)*. Furthermore, ***HN21***[] if distinctness were not required for a *section 1962(d)* claim, plaintiffs could circumvent the distinctness rule by simply **[**52]** bringing conspiracy claims, which are arguably easier to allege, rather than *section 1962(c)* claims. [13] Accord *Sluka v. Estate of Herink, 1996 U.S. Dist. LEXIS 20230, No. 94 CV 4999, 1996 WL 612462, at *7 (E.D.N.Y. Aug. 13, 1996)*.

that elect[] officers and hold[] annual meetings," but "amoeba-like infra-structure[s] that control[] secret criminal networks." *Hewes, 729 F.2d at 1310* (quoting *United States v. Elliott, 571 F.2d 880, 898 (5th Cir. 1978))*; contra *C.A. Westel de Venez. v. Am. Tel. & Tel. Co., No. 90 Civ. 6665, 1994 U.S. Dist. LEXIS 14481, at *13-15 (S.D.N.Y. Oct. 11, 1994)* (holding that only an "overly rigid" reading of *section 1961(4)* would convince that groups of corporations cannot be "associations in fact" because the definition of enterprise is by its terms not exhaustive, and stating that such a reading would "perversely insulate the most sophisticated racketeering combinations from RICO's sanctions, the precise opposite of Congress' intentions.") This issue is academic, however, because it has been either not litigated or overlooked by courts. Moreover, courts in this circuit and others have approved associations-in-fact enterprises made up of groupings of corporations. See, e.g., *Goldin II, 219 F.3d 1271 (11th Cir. 2000)*.

[13] ***HN22***[] To state a civil conspiracy claim under RICO, a plaintiff need only allege that the defendant conspired to violate some substantive provision of RICO, that some member of the conspiracy committed an overt act of racketeering, and that the act of racketeering injured the plaintiff. *Beck v. Prupis, 162 F.3d 1090, 1098 (11th Cir. 1998)*, aff'd, *529 U.S. 494, 146 L. Ed. 2d 561, 120 S. Ct. 1608 (2000)*. The existence of an "agreement" to participate in a RICO conspiracy may be proved by "showing (1) the existence of an agreement on an overall objective, or (2) in the absence of an agreement[] on an overall objective that the defendant agreed personally to commit two or more predicate acts." *United States v. Castro, 89 F.3d 1443, 1451 (11th Cir. 1996)*. A fact-finder may infer there was an agreement "from circumstantial evidence of the scheme." *United States v. Church, 955 F.2d 688, 695 (11th Cir. 1992)*. In this way, "the conspiracy provision allows persons who are responsible for an injury, but did not actually participate in the injury-causing activity, to be held liable." *Beck, 162 F.3d at 1099 & n.18*; *Beck, 529 U.S. at 506-07*.

[53]** Several other courts have concluded that distinctness is required for civil section 1962(d) conspiracy claims in the same way as for section 1962(c) claims. See, e.g., New Beckley Mining Corp. v. Int'l Union, United Mine Workers of Am., 18 F.3d 1161, 1165 (4th Cir. 1994); Genty v. Resolution Trust Corp., 937 F.2d 899, 907 (3d Cir. 1991); Sluka, 1996 U.S. Dist. LEXIS 20230, 1996 WL 612462, at *7. Others have held the same but on the more limited theory that a corporation only acts through its employees and agents. See, e.g., Neb. Sec. Bank v. Dain **[*1218]** Bosworth, Inc., 838 F. Supp. 1362, 1371 (D. Neb. 1993). Still others have reached the same conclusion but solely on the theory that the Copperweld antitrust intracorporate conspiracy doctrine, which forbids finding that a conspiracy exists between a corporation and either its employees or its subsidiaries for purposes of Sherman Act conspiracy claims, applies equally to RICO conspiracy claims. See, e.g., Fogie v. THORN Americas, Inc., 190 F.3d 889, 899 (8th Cir. 1999). [14]

[54]** Those courts that have allowed section 1962(d) claims to stand in cases where distinctness was an issue for companion section 1962(c) claims have done so for either one or both of two reasons. The first is that the court in question either did not address distinctness or found that plaintiffs *had* alleged an enterprise distinct from the corporate defendant "person." See, e.g., Webster v. Omnitrition Int'l, 79 F.3d 776, 787 (9th Cir. 1996) (declining to dismiss section 1962(d) claim, but never addressing whether there was distinctness between the alleged enterprise and the named defendant "persons"); Ashland Oil, Inc. v. Arnett, 875 F.2d 1271, 1280-81 (7th Cir. 1989) (declining to apply distinctness principle to section 1962(d) claims against corporate defendant because defendant "person" was distinct from the enterprise it allegedly conspired to conduct through a pattern of racketeering activity).

The second reason cited by these courts for declining to dismiss section 1962(d) claims where there was an issue of distinctness is that the parties simply debated whether the Copperweld intracorporate conspiracy doctrine applied to RICO claims, **[**55]** and the courts in question correctly declined to apply that doctrine to RICO claims because the Copperweld doctrine applies only in the antitrust context. See, e.g., Ashland Oil, 875 F.2d at 1281 (refusing to apply Copperweld intracorporate conspiracy doctrine to case of alleged RICO conspiracy between a parent corporation and its wholly-owned subsidiary); Webster, 79 F.3d at 787 (adopting rationale of Ashland Oil); Bowman v. W. Auto Supply Co., 773 F. Supp. 174, 180 (W.D. Mo. 1991) (adopting rationale of Ashland Oil);Mauriber v. Shearson/Am. Express, Inc., 567 F. Supp 1231, 1241 (S.D.N.Y. 1983) (rejecting extension of Copperweld to RICO conspiracy and also noting that intracorporate conspiracies are allowed in other contexts).

Section 1962(d) cases in which the court did find distinctness between the defendant "person" and the enterprise do not apply. As stated above, in the instant case there is a lack of distinctness between Boeing and the BTSTE. Furthermore, the Copperweld doctrine has not been offered by Defendants as a grounds for dismissal. [15] Lockheed's section 1962(d) RICO claim **[**56]** against Boeing, and its parallel state claim against Boeing under section 772.103(4), Florida Statutes, are accordingly dismissed. The RICO and the Florida RICO Act claims in Counts I - IV against Erskine, Satchell and Branch are discussed below.

C. Erskine, Satchell, & Branch: Pattern of Racketeering Activity

1. 18 U.S.C. § 1962(c)

Assuming that Lockheed has sufficiently alleged **HN23**[] "(1) the existence of an enterprise; (2) that the enterprise affected interstate **[*1219]** commerce; (3) that the defendants were employed by or associated with the enterprise; [and] (4) that the defendants participated, either directly or indirectly, in the conduct of the affairs of the enterprise," all of the individual Defendants challenge the allegations relating to the fifth element, "that **[**57]** the defendants

[14] Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984), and the intracorporate conspiracy doctrine are discussed at length in the context of Lockheed's Sherman Act claims.

[15] The Supreme Court did recently confirm that the Copperweld intracorporate conspiracy doctrine "turns on specific antitrust objectives." Cedric Kushner, 533 U.S. at 166.

participated through a pattern of racketeering activity." United States v. Starrett, 55 F.3d 1525, 1541 (11th Cir. 1995). [16] This fifth element of a section 1962(c) claim requires allegations (a) that the defendant committed at least two of the predicate racketeering acts listed in section 1961(1); (b) that there was relatedness among the predicate acts; and (c) that the multiple predicates "amounted to, or threatened the likelihood of, continued criminal activity." H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 237, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989); Starrett, 55 F.3d at 1542. [17]

[58]** Lockheed alleges that the individual Defendants committed several predicate acts in the categories of mail and wire fraud and receipt and use of stolen property that had traveled across state lines. (Doc. 1 P184); see 18 U.S.C. § 1961(1) (listing predicate acts). None of the individual Defendants argues that Lockheed attributes to him an insufficient number of predicate acts. The individual Defendants also do not argue that Lockheed has pled the predicate acts with insufficient particularity, or that the alleged acts were not related. Instead, they all argue that the allegations would not support a finding that the alleged predicate acts demonstrate continued criminal activity or a threat of continued criminal activity. (Doc. 46 at 6; Doc. 41 at 3-5; Doc. 55 at 4; Doc. 56 at 1.) [18]

[59]** ***HN25***[] The specific facts of each case determine whether a threat of continued criminal activity has been sufficiently alleged or shown. H.J. Inc., 492 U.S. at 242-43. The concept of continuity may refer to either "a closed period of repeated conduct, or to past conduct that by its nature projects into the future with a threat of repetition." Id. at 242. The former period is referred to as "closed-ended continuity," and the latter as "open-ended continuity." See id.; Aldridge v. Lily-Tulip, Inc. Salary Retirement Plan Benefits Comm., 953 F.2d 587, 593 (11th Cir. 1992).

Lockheed first argues that it has alleged sufficient facts to state a claim of closed-ended continuity. ***HN26***[] A party may demonstrate closed-ended continuity "by proving a series of related predicates extending over a substantial period of time. Predicate acts extending over a few weeks or months and threatening no future criminal conduct do not satisfy this requirement." H.J. Inc., 492 U.S. at 242.

[*1220] Lockheed alleges that each of the individual Defendants committed at least two predicate acts over a period of at least two years. Branch's first alleged predicate **[**60]** act took place in 1996 when he transported stolen Lockheed property interstate from either Florida or Colorado to California to meet with Erskine and Alexiou. (Doc. 1 P183(i).) Between 1997 and mid-1998, Branch allegedly flew approximately forty-three times from Florida to California to transport stolen documents and spoke with Satchell over the phone about those documents. (Id. PP182(ii)-(iii), 183(xi).) Erskine's first alleged predicate act took place in 1996 when he transported from Colorado to California stolen Lockheed papers that Branch had given him at their first meeting. (Id. P183(i).) Throughout the course of the EELV competition and until Boeing submitted its bid in July of 1998, Erskine allegedly took receipt of stolen documents that had been transported across state lines and used them in preparing Boeing's bid. (Id. PP183(xii), (xiii).) Satchell's first alleged predicate act took place "shortly after Branch began working for Boeing," which was in early 1997 (id. P71), when Satchell and Branch began having telephone conversations about the Lockheed papers (id. P182(ii)). Lockheed alleges that the phone conversations continued into mid-1998 and that **[**61]** Satchell also received Lockheed papers in the mail in 1997 and 1998. (Id. at P182(iii).) These allegations of interstate fraud and trafficking in stolen property over at least two years represent much more than

---

[16] Though Boeing addressed this element, because the RICO claims against Boeing are dismissed for lack of distinctness the rest of this discussion of RICO deals only with the allegations against the individual Defendants-Erskine, Satchell, and Branch.

[17] ***HN24***[] The Eleventh Circuit has also stated that proof of the fifth element requires not only evidence of pattern but also evidence "that the defendants' predicate acts were related to the enterprise charged." Starrett, 55 F.3d at 1542. Erskine, Satchell, and Branch have not argued that Lockheed's allegations fail to satisfy this "relationship" requirement.

[18] Erskine does state that "there is no allegation that Erskine participated in any purported conversion of trade secrets from any person or any other than the alleged incident involving Lockheed [sic]." (Doc. 55 at 4.) It is not clear what he means by this. Assuming he means that he is not alleged to have stolen anything himself, this does not bar the claim against him and is not a reason to dismiss. Lockheed alleges that the individual Defendants' predicate acts were in the categories of mail fraud, wire fraud, and interstate transportation and use of stolen property. (See Doc. 1 P184.)

claims of "predicate acts extending over a few weeks or months." See H.J., Inc., 492 U.S. at 242. The Complaint thus sufficiently alleges closed-ended continuity for purposes of the pattern element. See Starrett, 55 F.3d at 1549 (finding that evidence of a series of related predicates extending over a period of two years was sufficient to establish the fifth RICO element against one defendant) (citing H.J. Inc., 492 U.S. at 242). [19]

[62]** Lockheed also argues that it has alleged facts sufficient to show open-ended continuity. The Supreme Court has suggested examples of how open-ended continuity **[*1221]** might be shown, including the following:

> **HN28**[] The threat of continuity may be established by showing that the predicate acts or offenses are part of an ongoing entity's regular way of doing business. Thus, the threat of continuity is sufficiently established where the predicates can be attributed to a defendant operating as part of a long-term association that exists for criminal purposes.

H.J. Inc., 492 U.S. at 242-43. Such a showing may be made with reference to "a traditional criminal enterprise or with respect to an ongoing legitimate business." Jones v. Childers, 18 F.3d 899, 911 (11th Cir. 1994). Furthermore, there is no requirement that the predicate acts each be a part of separate illegal "schemes." H.J. Inc., 492 U.S. at 237, 241-42 & n.3. A showing of this sort "ordinarily must encompass a sustained period or set of examples sufficient to draw this conclusion with reasonable certainty." Jones, 18 F.3d at 912. As the Supreme Court's language **[**63]** suggests, however, a plaintiff attempting to show continuity by reference to the enterprise itself may make use of "the totality of the evidence." Id. The plaintiff may thus present evidence of the defendant's business practices with respect to not just the plaintiff, but others as well. In Jones, for example, the Eleventh Circuit Court of Appeals found that the defendant's two predicate acts perpetrated against the plaintiffs did not, "in and of themselves, provide a sufficient basis for finding 'continuity . . . .'" Jones, 18 F.3d at 912. Nevertheless, the court found that "the totality of the evidence as to [the defendant's] business practices with respect to [other individuals] sufficiently established a pattern of criminal activity." Id. at 913; see also United States v. Church, 955 F.2d 688, 694 (11th Cir. 1992).

Lockheed's Complaint alleges multiple related predicate acts and that the BTSTE existed for purposes of stealing trade secrets from Boeing's competitors "including, without limitation, Lockheed Martin." (Doc. 1 PP175, 180.) Most of the alleged predicate acts were associated with winning the EELV bid, but **[**64]** the Complaint also contains allegations about stealing proprietary information from Raytheon regarding the EKV bid and about stealing from AssureSat. (Id. PP156-61.) Under H.J. Inc. and Jones, these allegations sufficiently state an open-ended pattern. Satchell, Erskine, and Branch's motions to dismiss the section 1962(c) RICO claims against them are accordingly denied.

---

[19] The allegations about the acts of "Boeing," and about the acts of Alexiou, Black, and others employed by Boeing are irrelevant here. The RICO claims against Boeing have been dismissed and the other individuals are not named as defendants. The listing of these individuals' acts among the allegations of racketeering perhaps stems from confusion about the nature of the pattern element. Like each Defendant's failure to focus on the predicate acts alleged to have been committed by himself in favor of more general arguments, the allegations referring to non-parties seem to stem from the understanding that, **HN27**[] under RICO, the plaintiff must establish "that the acts of racketeering *by the alleged enterprise* be related and amount to, or pose a threat of, continued criminal activity." (See, e.g., Doc. 41 at 5) (emphasis added.) A person is not liable under section 1962(c) for an *enterprise's* pattern of racketeering activity; he is liable for conducting the affairs of an enterprise through his *own* pattern of racketeering activity. 18 U.S.C. § 1962(c); H.J. Inc., 492 U.S. at 232, 244. To state a claim against a particular person, a plaintiff thus needs to establish much more than that the enterprise's activities pose a threat of continued criminal activity; the plaintiff needs to establish that the acts of the *person* pose a threat of continued criminal activity.

This confusion between what a plaintiff must show about what the "person" did and what a plaintiff must show about the alleged "enterprise" may exist in part because, as discussed in section A of this discussion, "continuity" is relevant to proof of an association-in-fact "enterprise" and, as explained in this section, to proof of a "person's" pattern of racketeering activity. Further confusing the issues is the fact that, as discussed below, the nature of the "enterprise" may serve as part of the proof that the defendant "person's" acts constitute an open-ended pattern of racketeering activity.

Because Satchell agreed with Boeing that the federal law conclusions should determine the fate of the Florida RICO claims, his motion to dismiss the parallel claim against him pursuant to *section 772.103(3)*, Florida Statutes, is also denied. This conclusion would apply to Erskine and Branch as well had they not raised an argument Satchell did not. As already noted, Erskine and Branch agreed that federal law should govern the Florida RICO claims, except in the context of the "pattern of racketeering activity" element. [20] Their extra argument that the Florida RICO Act's more stringent pattern requirement requires dismissal of the Florida claims against them is discussed below.

[65]** *2. Section 772.103(3), Fla. Stat.*

Erskine and Branch argue that Lockheed has failed to state a claim against them for violation of *section 772.103(2)* of the Florida Statutes, pointing out that the Florida RICO Act "pattern requirement" is more stringent than the RICO requirement. (Doc. 55 at 5; Doc. 56 at 1.) ***HN29***[] The Florida RICO Act provides that **[*1222]** it is unlawful for any person "employed by, or associated with, any enterprise to conduct or participate, directly or indirectly, in such enterprise through a pattern of criminal activity or the collection of an unlawful debt." *§ 772.103(2), Fla. Stat. (2003)*. ***HN30***[] Criminal activity includes several predicate crimes named in *section 772.103(1)*, Florida Statutes, and a "pattern of criminal activity" under the Florida RICO Act consists of

> engaging in at least two *incidents* of criminal activity that have the same or similar intents, results, accomplices, victims, or methods of commission or that otherwise are interrelated by distinguishing characteristics and are not isolated incidents; provided that the last of such incidents occurred **[**66]** within 5 years after a prior incident of criminal activity. For the purposes of this chapter, the term "pattern of criminal activity" shall not include two or more incidents of fraudulent conduct arising out of a single contract or transaction against one or more related persons.

§ 772.102(4), Fla. Stat. (emphasis added). The definition "refers to engaging in at least two 'incidents' of racketeering conduct rather than 'acts' of racketeering conduct set forth in [RICO.]" State v. Marks, *758 So. 2d 1131, 1138 (Fla. 4th DCA 2000)* (quoting *State v. Lucas, 600 So. 2d 1093, 1095-96 (Fla. 1992))*. "Thus, crimes committed at the *same time* cannot qualify as separate incidents for purposes of proving racketeering conduct under the Florida act." Id. (emphasis added).

Erskine and Branch characterize Lockheed's Complaint as "merely" alleging "one incident." At worst, however, the alleged predicate acts arose in the context of one scheme-the scheme to steal and use Lockheed's EELV secrets. ***HN31***[] The fact that only a single *scheme* is alleged does not render a Florida RICO Act claim insufficiently pled if there are several **[**67]** *incidents* alleged. *Davis v. S. Bell Tel. & Tel. Co., 1994 U.S. Dist. LEXIS 13257, No. 89-2839-CIV, 1994 WL 912242, at *20 (S.D. Fla. Feb. 1, 1994)* (holding that multiple solicitations in furtherance of one scheme to defraud customers satisfied the Florida Act requirements) (citing *H.J. Inc., 492 U.S. at 239*). The Complaint alleges several incidents that took place at *several different times* spanning at least two years, satisfying the Florida Act pleading requirements. Erskine and Branch's motions to dismiss the *section 772.103(3)* claims against them are denied.

D. Erskine, Satchell, & Branch: Conspiracy

1. 18 U.S.C. § 1962(d)

Erskine, Satchell, and Branch argue that the conspiracy claims against them should be dismissed because "where the Plaintiff fails to allege a substantive violation of RICO, no claim for civil conspiracy to violate RICO may exist." (Doc. 41 at 6; see also Doc. 55 at 5; Doc. 56 at 1.) This argument is without merit. First of all, as concluded in the previous section of this discussion, Lockheed *has* stated a claim against these three Defendants under *section 1962(c)*. Secondly, the Defendants do not cite any **[**68]** case that supports their proposition that *section 1962(d)* claims necessarily fall with *section 1962(c)* claims. They all cite Beck v. Prupis, but in that case, in which the

[20] See supra note 4.

Supreme Court affirmed the Eleventh Circuit Court of Appeals, the Supreme Court explicitly declined to either adopt or even address that proposition:

> We do not resolve whether a plaintiff suing . . . for a RICO conspiracy must allege an actionable violation under *§§ 1962(a)-(c)*, or whether it is sufficient for the plaintiff to allege an agreement to complete a substantive violation and the commission of at least one act of racketeering that caused him injury.

[*1223] *Beck, 529 U.S. 494, 506 n.10, 146 L. Ed. 2d 561, 120 S. Ct. 1608 (2000)*. The issue in Beck was actually "whether a plaintiff can bring a *section 1962(d)* claim for injury flowing from an overt act that is not an act of racketeering." Id. The individual Defendants do not raise this or any other issue regarding the RICO conspiracy counts, and they do not cite any authority other than Beck for their proposition.

The Eleventh Circuit Court of Appeals' Beck opinion also does not support the individual Defendants' argument. In that **[**69]** opinion, the court did not address the idea that all *section 1962(d)* claims fall with *section 1962(a)-(c)* claims, nor did it suggest that such is the case. [21] On the contrary, the court upheld summary judgments for the defendant on *section 1962(c)and (d)* claims *for different reasons.* The court wrote that the plaintiff had standing to sue under *section 1962(c)* but had failed to prove the underlying predicate racketeering acts and so had failed to prove a violation of *section 1962(c)*. *Beck v. Prupis, 162 F.3d 1090, 1096-98 (11th Cir. 1998)*. The court did not then automatically find that the *section 1962(d)* claim also failed. Instead, the court found that the plaintiff did not have standing to sue under *section 1962(d)* because he alleged that his injury had been proximately caused by an overt act committed in furtherance of the conspiracy instead of by actual racketeering activity. *Id. at 1098*.

[70]** The motions of Erskine, Satchell, and Branch to dismiss the RICO conspiracy claims against them are denied. Satchell's motion to dismiss the Florida RICO Act conspiracy claim against him is also denied. This conclusion would also apply to Erskine and Branch had they not raised an argument regarding conspiracy claims under the Florida RICO Act that Satchell did not. Their extra argument is discussed below.

2. Section 772.103(4), Fla. Stat.

Erskine and Branch add the argument that the conspiracy claim brought under *section 772.103(4)* of the Florida Statutes is dependent on the *section 772.103(3)* Florida RICO Act claim so that the former should be dismissed because the latter should be. (Doc. 55 at 6; Doc. 56 at 1.) As was the case with the same argument regarding the federal conspiracy claims, because the *section 772.103(3)* claims against them are not dismissed, this argument is unavailing. The motions of Erskine and Branch to dismiss the Florida RICO Act conspiracy claims against them are accordingly denied.

E. Summary

Lockheed's Complaint sufficiently alleges that the BTSTE is an enterprise. The allegations do not support **[**71]** naming Boeing as a liable defendant "person," however, because Boeing is not sufficiently distinct from the BTSTE. The claims against Boeing in Counts I - IV are accordingly dismissed. Because Lockheed has sufficiently alleged the five elements of a *section 1962(c)* claim against Erskine, Satchell, and Branch, including that they engaged in a pattern of racketeering activity, their motions to dismiss the claims in Counts I and III against them are denied. Because Erskine, Satchell, and Branch have also provided no reason to dismiss the conspiracy claims against them and none is apparent, their motions to dismiss Counts II and IV against them are also denied.

---

[21] Many other circuits *have* held that a plaintiff must allege a viable claim that the defendant violated one of *sections 1962(a)-(c)* in order to state a claim that a defendant violated *section 1962(d)*. See *In re Managed Care, 298 F. Supp. 2d 1259, 1285-86 (S.D. Fla. 2003)* (citing cases). Because Lockheed has alleged viable claims against the individual Defendants under *section 1962(c)*, there is no need to address this issue.

[*1224] V. THE ANTITRUST CLAIMS

Lockheed alleges that Boeing, Erskine, Satchell, and Branch intended to obtain monopoly power for Boeing by acquiring and using Lockheed's trade secrets in preparation for Boeing's EELV bid. Lockheed also alleges that the Defendants furthered the attempt by concealing their actions. Based on these allegations, Lockheed claims violations of the Sherman Act, *15 U.S.C. § 2 (2001)*, and of the Florida Antitrust Act of 1980, *§ 542.19, Florida Statutes (2003)*. **[**72]** Counts V and VII charge attempted monopolization under *15 U.S.C. § 2* and *§ 542.19, Florida Statutes*. Counts VI and VIII charge conspiracy to monopolize under *15 U.S.C. § 2* and *§ 542.19, Florida Statutes*. Defendants Boeing, Erskine, Satchell, and Branch have all moved to dismiss these antitrust claims, and they join in each others' arguments. (Docs. 46, 55, 41, & 56.)

A. Counts V & VII: Attempted Monopolization

Section 2 of the Sherman Act provides, in part, that ***HN32***[] "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony . . . ." *15 U.S.C. § 2 (2001)*; see also *15 U.S.C. § 15(a)* (***HN33***[] providing for private right of action and civil damages). ***HN34***[] In order to state a claim for attempted monopolization under either the Sherman Act or the Florida Antitrust Act, [22] a plaintiff must allege facts that, if proven, would satisfy his burden at trial to prove that: (1) the defendant has **[**73]** engaged in predatory or anticompetitive conduct (2) with a specific intent to monopolize and (3) that there is a dangerous probability that defendant will achieve monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*; *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 993 (11th Cir. 1993)*. The third element of a proper attempted monopolization claim requires a two-part showing that a defendant is close to acquiring controlling market power over the relevant product market. *U.S. Anchor Mfg., Inc., 7 F.3d at 994*. Focusing on this third element, Defendants challenge the legal sufficiency of Lockheed's allegations of both the relevant market and of Boeing's proximity to acquiring a controlling market share.

[74]** *1. The Relevant Product Market*

HN36[] Determining the relevant product market for an attempted monopolization claim provides the frame of reference within which a defendant's relative market power is measured. The relevant product market is the "part of trade or commerce" that the defendant is allegedly attempting to monopolize. See *15 U.S.C. § 2*; *United States v. Grinnell Corp., 384 U.S. 563, 571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. The "outer boundaries" of a product's market are defined by the "reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *U.S. Anchor Mfg. Inc., 7 F.3d at 995* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. All purchasers and suppliers within those boundaries make up the market for that product unless there is evidence that the market is narrower because of other considerations. [23] **[*1225]** Id. Where evidence shows, for example, "that consumers within the geographic area

---

[22] ***HN35***[] "The Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act." *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1032 (Fla. 2d DCA 1984)*; *§ 542.32*, Fla. Stat.; *All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 745 n.11 (11th Cir. 1998)* ("Federal and Florida antitrust laws are analyzed under the same rules and case law.").

[23] Courts sometimes refer to "relevant product submarkets" to describe narrow relevant product markets. "Submarket," however, is a misnomer; the submarket is simply the relevant market for a specially designed product for which the consumer has a relatively inelastic demand. See 2A Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** pt. 2, ch.5 P533 ("Speaking of submarkets is both superfluous and confusing in an antitrust case, where the courts correctly search for a 'relevant market'--that is, a market relevant to the particular legal issue being litigated."); *U.S. Anchor Mfg., Inc., 7 F.3d at 995* (noting that the process for defining a submarket is the same as that for defining a market). In the hope of dispensing with this confusion, only the terms "relevant market" and "relevant product market" will be used in this discussion.

cannot realistically turn to outside sellers should prices rise within the defined area," the relevant market is limited by **[**75]** excluding suppliers outside of that geographic area. *T. Harris Young & Assoc., Inc. v. Marquette Electronics, Inc., 931 F.2d 816, 823 (11th Cir. 1991)*. The scope of the relevant market may also in some cases be narrowed to a certain "portion of customers." *Id. at 824-25*. Lockheed's attempt to define the relevant market with reference to only a subset of customers, the U.S. Government, is at issue here.

[76]** ***HN37***[] Ultimately, the contours of the relevant market and the defendant's relative power in that market are issues of fact. *U.S. Anchor Mfg., Inc., 7 F.3d at 994*. Dismissals are exceedingly disfavored in antitrust cases because of their fact-intensive nature. *Covad Communications Co. v. BellSouth Corp., 299 F.3d 1272, 1279 (11th Cir. 2002)*. Where, however, a plaintiff "alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, [the] relevant market is legally insufficient and a motion to dismiss may be granted." *JES Props., Inc. v. USA Equestrian, Inc., 253 F. Supp. 2d 1273, 1282 (M.D. Fla. 2003)*. A complaint is also legally insufficient where it shows that a plaintiff's proposed relevant market clearly excludes relevant geographic areas, purchasers, or suppliers. Such a complaint may therefore be dismissed because proving the facts alleged could not support a finding of attempted monopolization.

As explained earlier, EELV is the Air Force's term for the service of designing, developing, building, and operating "the next **[**77]** generation of expendable launch vehicles." (Doc. 1 P11.) Lockheed proposes that EELVs are the relevant product, or rather the relevant service, and that no other services are in this market because EELVs are "a highly complex and unique product [and are] the only means reasonably available to launch medium, intermediate and heavy lift satellites into space economically and efficiently. There are no economic and technological substitutes." (Doc. 1 PP221-22.) Lockheed thus alleges that there is no reasonable interchangeability of use between EELVs and other services because at no price would those needing to launch medium, intermediate, and heavy lift satellites stop purchasing EELVs in favor of another service. Defendants do not contest this delineation of the outer boundaries of the relevant market.

Lockheed's allegations propose alternative relevant markets for EELVs: (a) the "U.S. Government EELV market," for which the United States is the "relevant geographic market," or (b) the "worldwide commercial EELV market." (Doc. 1 PP221-22.) Defendants argue that the Complaint shows that the first alternative, which excludes all purchasers other than the U.S. Government, is too narrow **[**78]** and therefore an insufficient proposed market. Defendants argue that the Complaint itself **[*1226]** demonstrates that the second alternative is the relevant market.

a. The U.S. Government EELV Market

Lockheed's first alternative allegation of the dangerous probability element of its attempted monopolization claim is based on the statement that Boeing "currently has a market share of approximately 75%" of its first proposed relevant market--the U.S. Government EELV market. (Doc. 1 P223.) Lockheed argues that the relevant market should exclude purchasers other than the U.S. Government because the government can only buy from domestic suppliers and would be the victim of reduced innovation and higher prices if one of its potential suppliers had a "monopoly" on the government's purchases. (Doc. 57 at 10-12.)

A relevant market sometimes consists of only a portion of those purchasers of a generally-defined product or service--boats, for example. It is not the nature of the purchasers that makes this narrowing appropriate, however. Rather, it is the nature of the more specific product or service in question--aircraft carriers, for example--that makes designating the narrower market legitimate: **[**79]**

> ***HN38***[]
>
> While a relevant product market can be limited to a portion of customers, such a limitation must be based on a distinction in the *product* sold to those customers. If, for example, a product is specially designed for a certain group of purchasers and the suppliers concentrate their efforts almost exclusively on those purchasers . . . the

> product dimension may be limited to the sale of that product to those purchasers. Similarly, where one product is distinct from another because of its salability . . . the relevant market can consist solely of that product.

T. Harris Young & Assocs., 931 F.2d at 824-25. Following this logic, in T. Harris Young, the Eleventh Circuit Court of Appeals found that the market for EKG recording paper could not be limited to particular purchasers--hospitals with more than 200 beds--as the plaintiff proposed, because the evidence did not show a distinction between the paper sold to hospitals with more than 200 beds and the paper sold to "smaller hospitals, clinics, and doctors' offices." *Id. at 825*.

In Heatransfer Corp. v. Volkswagenwerk, A.G., by contrast, the Fifth Circuit Court of Appeals **[**80]** held that the relevant market for automobile air conditioners was legitimately narrowed to include only Volkswagen importers rather than all purchasers of the air conditioners. *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 980 (5th Cir. 1977)*. [24] The court reasoned that "the distinct engineering problems associated with the Volkswagen imports" meant that the *product* marketed to these importers was different from the air conditioners marketed to other purchasers of automobile air conditioners. Id. The court also noted that the production and sales by the producers of Volkswagen air conditioners made up the bulk of the business of those who produced the special air conditioners. Id.

A Supreme Court case about monopolizing the boxing promotion business also illustrates **[**81]** that product or service distinctions, and not purchaser characteristics *per se,* work to narrow markets. In International Boxing Club of New York v. United States, the Supreme Court found that the relevant market was the market for the promotion of championship boxing contests as opposed to all boxing contests because the two products were different **[*1227]** and the former was a product for which there was no substitute in the eyes of consumers. *358 U.S. 242, 250-51, 3 L. Ed. 2d 270, 79 S. Ct. 245 (1959)*. Because of a "particular and special demand" for championship boxing, most of its consumers would not, if prices went up in championship boxing, substitute by watching and paying for regular boxing. *Id. at 251*.

Likewise, in Associated Radio Services Co. v. Page Airways, Inc., though the defendants contended "that the relevant market was the sale and installation of avionics and interiors in all turbine-powered private aircraft," the Fifth Circuit Court of Appeals upheld the jury's finding that the relevant market was instead the sale and installation of avionics and interiors in Grumman Gulfstream-II aircraft only. *624 F.2d 1342, 1349 (5th Cir. 1980)*. This conclusion **[**82]** reflected that, due to their complexity and expense, avionics produced for the G-II were distinct from the broader field of avionics. Id. [25]

The instant Complaint presents a situation analogous to that in *T. Harris Young* and distinct from those in *Heatransfer*, *International Boxing*, and *Associated Radio Services*. Lockheed does not allege any distinction between the EELVs sold to the U.S. Government and those sold to commercial **[**83]** buyers of launch services or that the launch services needs of the U.S. Government differ substantially from those of other potential purchasers. If Lockheed had alleged that the EELVs designed for the U.S. Government were truly distinct from those designed for commercial consumers of EELVs, and that "Boeing, Lockheed and other suppliers of EELVs concentrate their efforts almost exclusively on the U.S. Government," as required by the court in Heatransfer, the U.S. Government market for EELVs might be a legally sufficient proposed relevant market. Lockheed, however, does not allege this; instead, the allegations actually indicate the same EELVs that the U.S. Government buys are marketable to commercial purchasers of launch systems and services. Lockheed alleges, for example, that at the time the U.S.

---

[24] Decisions of the former Fifth Circuit handed down prior to October 1, 1981 are binding precedent in the Eleventh Circuit. *Bonner v. City of Prichard, 661 F.2d 1206, 1207 (11th Cir. 1981)*.

[25] Lockheed also cites National Reporting Co. v. Alderson Reporting Co. in its argument on this issue. In that case, no court specifically addressed the allegations regarding the size of the relevant market because at the district court level the parties "basically concurred" that the market should be limited to the "geographic market" of the "United States Tax Court," and the Court of Appeals passed over the issue. *National Reporting Co., 567 F. Supp 1011, 1019 (E.D. Mo. 1983)*, rev'd on other grounds, *763 F.2d 1020 (8th Cir. 1985)*.

Government first sought bids on EELVs, all parties involved hoped to "increase the U.S. space launch industry's international competitiveness in the commercial launch services business." (Doc. 1 P11); commercial enterprises were "clamoring for additional satellite capacity" (id. P5); and there was a "robust commercial space launch market" (id. P24).

The cases Lockheed relies **[**84]** upon do not support its arguments that characteristics of purchasers, other than their demands, should determine the scope of the relevant market. As Boeing notes, a number of Lockheed's cases "rely upon *product characteristics--i.e.,* function, brand, or means of distribution--to define the market." (Doc. 78 at 6.) Two courts, for example, allowed narrowing of the market on the basis of distribution methods because the different methods provided distinct services and benefits to purchasers of a good. *PepsiCo, Inc. v. Coca-Cola Co., 1998 U.S. Dist. LEXIS 13440, at *38, 98 CIV-3282 (S.D.N.Y. Aug. 27, 1998)*; *FTC v. Cardinal Health, 12 F. Supp. 2d 34, 48 (D. D.C. 1998)*. In another case, *In re* Owens-Illinois, the Federal Trade Commission defined several relevant **[*1228]** markets according to the distinct elasticities of demand of subgroups of purchasers, not, as Lockheed suggests, according to the purchasers' ability to turn to a greater or lesser number of suppliers of a single good they needed. *115 F.T.C. 179 (1992)*. Specifically, producers of some end-products (such as shelf-stable juices, liquors and spaghetti sauces) could substitute **[**85]** metal or plastic for their containers if glass container prices significantly rose; the "product market for the supply of glass containers for shelf-stable juices" had thus "not been established." *Id. 115 F.T.C. at 306*. In contrast, some purchasers, such as mayonnaise bottlers, could not, because of their particular needs, substitute metal or plastic for glass in the face of significant price increases in the latter. A relevant market including those purchasers thus could exclude suppliers of metal and plastic. Id. These delineations of separate markets based on the different capacities of consumer subgroups to substitute do not suggest that, when it is agreed that only one product (EELVs) will do for all purchasers (Government and commercial space launchers), certain purchasers of the unique product should be excluded when measuring market power. The allegations of the Complaint do not suggest that there are not "enough customers" other than the U.S. Government who can "defeat the price increase by taking their business elsewhere," so there is no suggestion that the "grouping of all [EELVs] is not a relevant product market." *Id. at 297*.

The other cases **[**86]** Lockheed cites for the proposition that its proposed narrowing by reference to purchaser characteristics is legitimate are also inapposite because they deal with characteristics of *suppliers* in a relevant market. See *FTC v. Imo Indus., Inc., 1989 U.S. Dist. LEXIS 14050, No. 89-2955, 1992-2 Trade Cas. (CCH) P69, 943 at P68, 558 (D. D.C. 1989)*; *FTC v. Alliant Techsystems, Inc., 808 F. Supp. 9, 15, 18, 20 (D. D.C. 1992)*; *Int'l Logistics Group v. Chrysler Corp., 884 F.2d 904, 909 (6th Cir. 1999)*; *Fiberglass Insulators, Inc. v. Dupuy, No. 84-1244-1, 1986 U.S. Dist. LEXIS 19711, at *9-10 (D. S.C. Sept. 30, 1986)*. Again, the issue is not whether suppliers of launch services other than Boeing and Lockheed are part of the relevant market but rather whether other purchasers are part of the relevant market.

Although one case Lockheed cites does seem to follow Lockheed's logic in defining the relevant market, the reasoning of that case is not persuasive. In Dauro Advertising, Inc. v. General Motors Corp., an advertising agency accused defendant GM of illegally tying advertising services to wholesale sale of GM automobiles to dealerships. The court **[**87]** in that case began its relevant market analysis with the premise that particular buyers, GM dealerships, were adversely affected by an alleged tying program. *Dauro Adver., Inc., 75 F. Supp. 2d 1165, 1169 (D. Colo. 1999)*. The court then derived the definition of the relevant product--GM automobiles--by reference solely to these dealers because, it reasoned, "GM dealers have no interest in purchasing cars or trucks from any other manufacturer." Id. It was a mistake in that case, however, for the court to assume which purchasers make up the relevant market and then decide what the relevant product was on that basis. Determining which products make up the market is the first step. Purchasers are relevant at this initial stage only insofar as their demands govern cross-elasticity, which determines whether and which substitutes are relevant products. Other considerations serve to narrow the field only after these outer limits are defined.

The argument that, because it cannot turn to many suppliers, the U.S. Government has been or will be harmed by unfair **[*1229]** trade practices by one of few suppliers does not alter this analysis. The goal of ***antitrust law*** is to prevent harm **[**88]** to *competition,* not to prevent harm to one of many purchasers of a product: "Purchasing constraints on a single consumer, such as a required competitive bidding procedure, do not change that conclusion;

the fundamental objective of our antitrust laws is to promote fair competition for the benefit of all consumers." Smalley & Co. v. Emerson & Cuming, Inc., 13 F.3d 366, 368 (10th Cir. 1993); United States v. E.I. DuPont de Nemours, 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). The relevant market is not the U.S. government EELV market.

b. The Worldwide Commercial EELV Market

Lockheed's complaint alternatively alleges that the relevant market is the worldwide commercial market for EELVs, and the Defendants do not quarrel with this assertion. As already noted, the Complaint repeatedly and emphatically alleges that the same EELVs that the U.S. Government buys are marketable to commercial purchasers of launch systems and services and that there was a "robust commercial space launch market." (Doc. 1 P24.) Whether Defendants are correct that the attempted monopolization claims should nevertheless be dismissed for failure to sufficiently allege that Boeing has sufficient **[**89]** market power is addressed below.

2. Market Power

HN39[] Lockheed's allegations regarding the third element of an attempted monopolization claim--"dangerous probability of monopolization"--must not only propose an appropriate relevant market but must also include allegations that the plaintiff's competitor is close to acquiring controlling market power. U.S. Anchor Mfg., Inc., 7 F.3d at 993. A plaintiff's allegations of a defendant's current market share are the most important factor in determining whether the market power issue should go to the jury. Generally, a showing that a defendant has between sixty and sixty-five percent market share is sufficient to present the issue of market power to a jury. Id. at 999-1000. Other factors, including barriers to entering the relevant market, are thereafter "relevant" to the question of market power. Id.; Associated Radio Servs. Co., 624 F.2d at 1354. Lockheed's Complaint does not include any allegations about Boeing's relative share of the worldwide commercial EELV market, the minimum required to survive a motion to dismiss. Valet Apartment Servs., Inc. v. Atlanta Journal & Constitution, 865 F. Supp. 828, 832 (N.D. Ga. 1994) **[**90]** (case dismissed where plaintiff failed to allege market shares of participants in relevant markets "that could support an allegation that defendants have a dangerous probability of monopolizing"), aff'd mem., *50 F.3d 1039 (11th Cir. 1988)*; see also U.S. Anchor Mfg., Inc., 7 F.3d at 999-1000. The allegations are thus not sufficient to state a claim of attempted monopolization of the market that has been determined above to be the only adequate proposed relevant market, the worldwide commercial EELV market.

As noted above, the U.S. Government EELV market is not the relevant market. Defendants' arguments regarding the sufficiency of Lockheed's market power allegations as to that alternative market nevertheless merit brief discussion. Defendants argue that even if the relevant market were the narrower U.S. Government EELV market, Lockheed's allegations fail on this issue. This is not the case. Were the relevant market the U.S. Government EELV market, it would be too early to foreclose the possibility that Lockheed could prove a dangerous probability of monopolization.

[*1230] Lockheed alleges that Boeing controls 75% of the U.S. Government EELV market. (Doc. **[**91]** 1 P223.) Defendants argue that this figure is meaningless in this case because under the EELV bidding system of fixed-price, fixed-term contracting, no contractor can achieve monopoly power, which is defined as the power to increase prices or exclude competition. U.S. Anchor Mfg., Inc., 7 F.3d at 994. "No dangerous probability of monopoly power exists," Defendants argue, "because [Boeing] cannot raise the price during the contract term, and the contract can be rebid at the end of the term." (Doc. 46 at 13.) Defendants thus suggest that there is a *per se* rule that fixed-price, fixed-term bid markets can never be monopolized. Lockheed counters that such a bidding process does not necessarily preclude monopoly because factors such as high barriers of entry into the EELV market mean that Boeing's winning all of the early bids will give it control or at least a major head start in future bids.

HN40[] The Eleventh Circuit Court of Appeals has stated that courts should be "wary of the numbers game of market percentage when considering an 'attempt to monopolize' suit under the dangerous probability standard." U.S. Anchor Mfg., Inc., 7 F.3d at 999. Other factors, **[**92]** such as barriers to entry into the market like high startup costs and the advantages of experience, may be important to the ultimate decision of whether a defendant has captured a dangerous market share. Id.; Associated Radio Servs. Co., 624 F.2d at 1354; Gen. Cigar Holdings, *Inc. v. Altadis, S.A., 205 F. Supp. 2d 1335, 1351 (S.D. Fla. 2002)*, aff'd mem. *54 Fed. Appx. 492, 2002 WL 31519816 (11th Cir. 2002)*. Lockheed does allege that barriers to entry of the U.S. Government market for EELVs make this a non-standard market. If this were the relevant market, these allegations would not be susceptible to the conclusion that Lockheed cannot allege "dangerous probability of monopolization" because there is no *per se* rule that fixed-price, fixed-term bid markets can never be monopolized.

The cases Defendants cite to support their suggestion are not persuasive. In Alabama Ambulance Service, Inc. v. City of Phenix City, Alabama, for example, a district court relied on another district court case for its conclusion that a defendant, the winner of a fixed-term, fixed-cost bid contract "in open bidding against a number of other bidders **[**93]** . . . [did] not have the power to control prices or exclude competition" and thus had no market power. *71 F. Supp. 2d 1188, 1195 (M.D. Ala. 1999)* (citing *Kirk-Mayer, Inc. v. Pac Ord, Inc., 626 F. Supp. 1168 (C.D. Cal. 1986))*. Both of these cases ultimately take their reasoning from an Eighth Circuit case, National Reporting v. Alderson Reporting Co., Inc. See *Ala. Ambulance Serv., Inc. at 1195-1196* (discussing *Kirk-Mayer, Inc., 626 F. Supp. at 1169-71*, which cited rationale of *Nat'l Reporting, 763 F.2d 1020 (8th Cir. 1985))*. None of these cases supports Defendant's contention that the winner of 75% of the contracts in a fixed-term, fixed-price bidding market can *never* be shown to have dangerous market power. The decision in National Reporting, read in context, instead reflects that there are no *per se* rules regarding measuring market power:

> As soon as the contract goes back up for bids, *there are numerous other court-reporting companies* who can bid and try to undercut the company holding the contract. Alderson could not control prices, because if it tried to raise its price, the contract would **[**94]** again be up for bids. Both parties agree that Alderson could not exclude any company from bidding, and by 1980 there were several other companies capable of meeting the Tax Court court-reporting contract requirements. Competition was alive and well in the relevant market.

[*1231] *Nat'l Reporting, 763 F.2d at 1023* (emphasis added).

Reading Nat'l Reporting narrowly is consistent with the Eleventh Circuit Court of Appeals' emphasis on considering many factors when determining market power. Accord William E. Kovacic, "Mixed Signals: Recent Cases Make the Legality of Future Hospital Mergers Less Predictable," 59 Antitrust L.J. 1005, 1088-94 (1991) (emphasizing that "mechanical application" of relevant market and market power rules is often not appropriate in government bid cases.) Assuming, therefore, that the "U.S. Government EELV market" were the relevant market, if Lockheed could show that high barriers to entry prevent it and others from making bids in the future, that Boeing will have significant advantages over potential competitors at the end of its current fixed-term contracts, or that other factors are significant, it might be able to **[**95]** convince a fact-finder that there is a dangerous probability of monopolization of that market. The relevant market is *not* the U.S. Government EELV market, however, so allegations about Defendant's power in that market are irrelevant.

Because the U.S. Government EELV market is not the relevant market and Lockheed has failed to allege facts relating to Boeing's market power in the worldwide commercial EELV market, the attempted monopolization claims against all of the Defendants under the Sherman Act and the Florida Antitrust Act of 1980 are dismissed. Focus now turns to the issues raised by the claims in Counts VI and VIII alleging conspiracy to monopolize under *15 U.S.C. § 2* and *section 542.19* of the Florida Statutes.

B. Counts VI & VIII: Conspiracy to Monopolize

Defendants Boeing, Erskine, Satchell, and Branch all move to dismiss the antitrust conspiracy claims against them. (Docs. 46, 55, 41, & 56.) ***HN41***[] "Conspiracy to monopolize has three elements: (1) the existence of a combination or conspiracy, (2) an overt act in furtherance of the conspiracy, and (3) specific intent to monopolize." *Ala. Ambulance Serv., Inc. v. City of Phenix City, Ala., 71 F. Supp. 2d 1188 (M.D. Ala. 1999)*; **[**96]** *United States v. Yellow Cab Co., 332 U.S. 218, 225, 91 L. Ed. 2010, 67 S. Ct. 1560 (1947)*, overruled on other grounds by *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*; *Levine v. Cent. Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1555-56 (11th Cir. 1996)*.

Lockheed alleges that Boeing, Erskine, Satchell, and Branch, "acting in concert and on behalf of Boeing," intentionally conspired to monopolize the relevant markets, and that in furtherance thereof they obtained and misused Lockheed's trade secrets and concealed these acts. Defendants argue that the conspiracy claims should be dismissed because Lockheed has failed to allege facts sufficient to support the first and the third elements of the conspiracy claims. These arguments are discussed in reverse order.

1. Specific Intent: The Relevant Product Market

The Defendants maintain that this claim rises or falls with the sufficiency of Lockheed's relevant market allegations. (See, e.g., Doc. 46 at 14.) Lockheed does not respond to this argument but in its Complaint Lockheed implicitly acknowledges that a relevant market showing is important to a conspiracy claim **[**97]** because it alleges that Defendants conspired to "monopolize the relevant markets described herein." (Doc. 1 P244.) The Court of Appeals for the Eleventh Circuit has not specifically ruled on the need to propose a sufficient relevant market for conspiracy to monopolize claims. The failure to allege facts that could support a proposed relevant product market would indeed be fatal to conspiracy to monopolize counts **[*1232]** under *section 2* just as it is for the attempted monopolization claims.

HN42[] The third element of a claim for conspiracy to monopolize requires a showing of specific intent to *achieve* monopoly power. *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 995 (11th Cir. 1993)*; cf. *Ala. Ambulance Serv. Inc., 71 F. Supp. 2d at 1196-97* ("Where the alleged conspiracy, if successful, would not amount to illegal monopolization, there may be no liability for conspiracy to monopolize."). The Sherman Act prohibits conspiring to monopolize "any part of the trade or commerce," *15 U.S.C. § 2*. That "part" of trade that it is illegal to conspire to monopolize is the relevant product market: "Commodities reasonably interchangeable make **[**98]** up that 'part' of trade or commerce which *section 2* protects against monopoly power." *United States v. Grinnell Corp., 384 U.S. 563, 571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *U.S. Anchor Mfg., Inc., 7 F.3d at 995* (defining the relevant product market as made up, at the outer boundaries, of "reasonably interchangeable" commodities).

HN43[] Because monopoly power is, by definition, power over a relevant market, what constitutes the relevant market is a necessary issue in measuring a defendant's specific intent for conspiracy purposes. *U.S. Anchor Mfg., Inc., 7 F.3d at 995* (monopoly power is "the power to raise prices to supra-competitive levels or . . . the power to exclude competition in the relevant market either by restricting entry of new competitors or by driving existing competitors out of the market").

HN44[] Defendants' intentions with regard to the market in which the litigants compete are what concern the Sherman Act. Allegations that conspiring defendants specifically intended to drive a plaintiff from a single deal will not ordinarily support a conspiracy to monopolize claim. On the other hand, a plaintiff need not allege that the defendants conspired **[**99]** to drive competitors from commerce altogether. The middle ground suggested by *section 2* is the requirement that the plaintiff allege that the defendants intended to monopolize a "part of trade or commerce." See also *Associated Radio Servs. Co. v. Page Airways, Inc., 624 F.2d 1342, 1348 (5th Cir. 1980)* (noting that "the jury's finding on the extent of the market must be upheld if we are to sustain the jury's verdict finding [attempt or conspiracy] violations of *[section 2*] of the Sherman Act"). A plaintiff must thus allege a proper relevant market to survive a motion to dismiss a Sherman Act conspiracy claim. [26]

---

[26] In a criminal *section 2* conspiracy case, the Second Circuit Court of Appeals found there to be no need to allege or prove what market the defendants attempted to monopolize, but the opinion is not persuasive. The court wrote that

> the charge here is conspiracy to monopolize, not monopolization. In a monopolization case the market must be proved. See *International Boxing Club v. United States, 358 U.S. 242, 3 L. Ed. 2d 270, 79 S. Ct. 245*. This is because such a charge requires a showing of power to exclude competitors, and without an accurate delineation of the market, it is impossible to determine the presence or absence of this power. But where the charge is conspiracy to monopolize, the essential element is not the power, but the specific intent, to monopolize. *Section 2* makes it unlawful "to conspire to monopolize 'any part' of interstate commerce," without specifying how large a part must be affected. Hence it is enough if "some appreciable part of interstate commerce is the subject" of the conspiracy.

[100] [*1233]** As explained above, the "U.S. Government space launch market" is not the relevant market. If Lockheed's only allegation were that Defendants conspired to monopolize that market, its antitrust conspiracy claims would fail. As already noted, however, Lockheed alleged in the alternative that Defendants conspired to monopolize the "national and international commercial space launch market." (Doc. 1 P244.) As already stated, there is nothing in the pleadings to suggest that this is not the relevant market. Lockheed has alleged, therefore, specific intent to monopolize [the worldwide commercial space launch market]." *Ala. Ambulance Servs., Inc., 71 F. Supp. 2d at 1196*; *Levine, 72 F.3d at 1555-56*. Failure to allege a relevant market is therefore not a reason to dismiss Lockheed's conspiracy claims.

2. The Existence of a Conspiracy

Defendants also argue, however, that the Copperweld intracorporate conspiracy doctrine dictates that the Sherman Act conspiracy claims against them be dismissed because no conspiracy can have existed between Boeing and the individual Defendants. Therefore, Defendants argue, Lockheed has failed to allege the "existence **[**101]** of a combination or conspiracy," the first element of a *section 2* conspiracy claim. *Ala. Ambulance Serv., Inc., 71 F. Supp. 2d at 1196*. ***HN45***[] In Copperweld Corp. v. Independence Tube Corp., the Supreme Court held that, under *section 1*, [27] a wholly-owned subsidiary could not form a conspiracy with its parent corporation because agreements between parents and subsidiaries "do not suddenly bring together economic power that was previously pursuing divergent goals," and these agreements are therefore not within the concern of the antitrust conspiracy statutes. *467 U.S. 752, 769, 771, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. In so holding, the Court noted that officers also cannot conspire, for *section 1* purposes, with the corporations that employ them because "officers of a single firm are not separate economic actors pursuing separate economic interests." Id. In the Eleventh Circuit, this Copperweld "intracorporate conspiracy doctrine" [28] applies equally to *section 1* and *section 2* conspiracy claims. *Bolt v. Halifax Hosp. Med. Ctr., 891 F.2d 810, 817 n.9 (11th Cir. 1990)*, overruled on other grounds, *980 F.2d 1381 (11th Cir. 1993)* ("Bolt III"). **[**102]** Courts in **[*1234]** this circuit have left open the possibility of, but have rarely found applicable, an exception to the Copperweld doctrine. Though the doctrine applies to officers and employees acting in their official capacities, the exception might bar application of the doctrine where "the plaintiff can demonstrate that the officers of a corporation have a personal stake in achieving the object of the alleged conspiracy." *Tiftarea Shopper, Inc. v. Ga. Shopper, Inc., 786 F.2d 1115, 1118 (11th Cir. 1986)*.

United States v. Consol. Laundries Corp., 291 F.2d 563, 573 (2d Cir. 1961) (internal citations omitted).

In Consolidated Laundries Corp., the court contrasted conspiracy to monopolize and monopolization, but the Sherman Act provisions regarding those acts both aim to prevent control over only a "part of trade or commerce," which has been defined as the relevant product market. The court did not make clear the difference, in the context of a conspiracy claim, between the need to allege "dangerous probability of monopolization," which is done by defining the relevant market *and* alleging defendant's off-balance market power in that market, and the need to just allege a "relevant product market." The law is clear that alleging the "dangerous probability of monopolization" is not required to state a conspiracy claim. *Levine, 72 F.3d at 1555-56*. The plaintiff thus need not allege the defendant's relative market power--*how large* a part of the trade or commerce defendant intended to monopolize. The plaintiff must nevertheless show *what* part of the trade or commerce defendant had in mind, namely the relevant market. To hold otherwise is to hold that *section 2* could support liability for conspiring to "monopolize" a single transaction. Other statutes address unfair trade practices which are illegal regardless of any larger antitrust intent. Antitrust statutes, however, cannot be interpreted without reference to their remedial goals.

[27] *Section 1* provides that ***HN46***[] "every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony . . . ." *15 U.S.C. § 1 (2001)*; see also *15 U.S.C. § 15(a)* (providing for a private right of action and civil damages).

[28] The doctrine stated in Copperweld is also sometimes referred to as the "intraenterprise conspiracy doctrine." See, e.g., *Copperweld, 467 U.S. at 783 n.9* (citing articles); *Bankers Ins. Co. v. Fla. Residential Prop. & Cas. Joint Underwriting Ass'n, 137 F.3d 1293, 1296 (11th Cir. 1998)*. To avoid confusion with the RICO issues presented by Lockheed's Complaint, only the terms "intracorporate conspiracy doctrine" and "Copperweld doctrine" will be used in this discussion.

[103]** *a. Boeing, Erskine, & Satchell*

Erskine and Satchell were employees of Boeing during the period Lockheed claims they conspired with Boeing. No allegation suggests that any exception applies to their cases. Under *Copperweld*, Erskine and Satchell thus cannot be held liable under *section 2* for actions in furtherance of a conspiracy with Boeing. The antitrust conspiracy claims against Erskine and Satchell are accordingly dismissed.

b. Boeing and Branch

The Copperweld doctrine also bars Lockheed's conspiracy claims to the extent that they stem from any alleged actions or agreements between Boeing and Branch that took place after Branch became a Boeing employee in January of 1997. Lockheed argues, however, that because it alleges the conspiracy began five or more months before Branch became an employee of Boeing, the doctrine does not bar the claim that Branch conspired with Boeing. Boeing and Branch counter that Branch was Boeing's "agent" for the whole relevant period and that the Copperweld doctrine bars claims of conspiracies among corporations and all of their "agents." Boeing and Branch are correct that the Copperweld doctrine bars the *section 2* conspiracy **[**104]** claims against them, but this conclusion does not turn on whether Branch was an "agent" during that period.

Tiftarea Shopper, Inc., upon which Boeing and Branch rely, is only the latest of a series of cases in this circuit to use "agents of the corporation" to describe the class of people with whom the corporation generally cannot conspire and to cite Copperweld for that proposition. *786 F.2d at 1117*. Though the Eleventh Circuit Court of Appeals has often used the term "agent" when stating the doctrine, it usually has done so in the context of holding that actual *employees* of a corporation cannot conspire with the corporation, as it did in Tiftarea Shopper. Viewed in the context of the facts of these cases, these statements of the doctrine do not necessarily support Defendant's argument that, for Sherman Act purposes, Branch cannot have conspired during the five months before he became a Boeing employee. The Court of Appeals has never held that a non-employee who has no formal or acknowledged relationship with a corporation, like Branch during those five months, cannot conspire with a corporation for antitrust purposes.

HN47[] The Court of Appeals has suggested, **[**105]** however, that an individual's status as an agent in the typical sense is not determinative of whether that individual falls within the Copperweld doctrine. The court has cited with approval a Seventh Circuit decision holding that the intracorporate conspiracy doctrine "does not preclude a conspiracy or combination between a corporation and *any agent.* The guiding principle is the requirement that there be more than one independent business entity involved in the combination or conspiracy." *St. Joseph's Hosp. v. Hosp. Corp. of Am., 795 F.2d 948, 956 (11th Cir. 1986)* (quoting *Tamaron Distrib. Corp. v. Weiner, 418 F.2d 137 (7th Cir. 1969))*. The Court of Appeals' decisions therefore use the term "agent" to broadly describe entities who are not separate economic powers pursuing divergent goals from the corporation **[*1235]** (or other second entity) in question. The exact nature of Branch's relationship with Boeing during those five months, however, is not controlling. [29] What is important is that Branch himself was not at any time an "economic power pursuing divergent goals" from Boeing's. It is for this reason that any agreements between him and Boeing cannot **[**106]** be the basis for a *section 2* conspiracy claim. The rationale of Copperweld, and not formal titles or legal relationships, determines the application of the doctrine.

Eleventh Circuit cases evaluating agreements between doctors and hospitals confirm that **[**107]** the purpose of the Sherman Act's conspiracy provisions is key to understanding the Copperweld doctrine. The Court of Appeals'

[29] It is not clear what the Eleventh Circuit Court of Appeals means when it uses the term "agent" in the context of the Copperweld doctrine. If the court means "agent" in the traditional sense of agency law, then the allegations do not precisely support Branch's falling within the doctrine. See supra note 11 (noting Florida definitions of agency). It would be possible to interpret the Eleventh Circuit statements of the doctrine as referring to the traditional understanding of agent, because the court frequently lists the term among other parties to specific formal relationships (employees, officers). The actual application of the doctrine in a variety of cases, and Copperweld itself, however, show that this interpretation would be too limited.

statements of the doctrine's exceptions along with the general rule in these cases that courts must favor realities over form also confirm that emphasis on the Act's rationale is critical.

The decision in Copperweld about subsidiaries, and similar rules about employees and divisions that the Court mentioned, are not based on formal arrangements or titles but on the relative threats to competition presented by concerted activity between these entities and the corporations (or other entities) with whom they are associated. In that case, the Court wrote that, in order to properly understand whose conduct is prohibited by the antitrust conspiracy provisions, it was important to keep in mind the nature of the threat concerted activity presents to competition. The Court wrote:

> Concerted activity inherently is fraught with anticompetitive risk. It deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands. In any conspiracy, two or more entities that previously pursued their own interests separately are **[**108]** combining to act as one for their common benefit. This not only reduces the diverse directions in which economic power is aimed but suddenly increases the economic power moving in one particular direction. Of course, such mergings of resources may well lead to efficiencies that benefit consumers, but their anticompetitive potential is sufficient to warrant scrutiny even in the absence of incipient monopoly.

Copperweld, 467 U.S. at 768-69.

The Court of Appeals sometimes states the doctrine in shorthand, stating, for example, that "an agreement among the officers of a single corporation acting in their official capacity is not a conspiracy *because a corporation cannot conspire with itself,"* implying that the doctrine has its root in agency principles. *Tiftarea Shopper, Inc., 786 F.2d at 1118* (emphasis added). The rationale of Copperweld, however, makes clear that ***HN48***[] officers of a single firm cannot conspire with that firm to monopolize not *because* they are officers, and not precisely because, as agents, their acts are attributed to their principal, but because they are not divergent economic powers. *Copperweld, 467 U.S. at 769.* **[**109]** Because the antitrust conspiracy statutes **[*1236]** are only triggered when previously divergent economic powers make agreements, a plaintiff's claim must allege a "joining of two independent sources of economic power" or be dismissed.

HN49[] Applying Copperweld in different contexts, the Eleventh Circuit Court of Appeals has made clear that the doctrine does not turn on particular legal relationships, but rather, as the Supreme Court has reiterated since Copperweld, "turns on specific antitrust objectives." *Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 166, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*. The Court of Appeals agreed, for example, with a district court holding that the executive director, counsel, and director of operations for an underwriting association could not conspire, for Sherman Act purposes, with the association which controlled them "because they lack the requisite diversity of interests. . . ." *Bankers Ins. Co. v. Fla. Residential Prop. & Cas. Joint Underwriting Ass'n, 137 F.3d 1293, 1295 (11th Cir. 1998)*. The court has also noted that "the guiding principle is the requirement that there be more than one independent business entity involved in **[**110]** the combination or conspiracy." *St. Joseph's Hosp., 795 F.2d at 956* (quoting *Tamaron Distrib. Corp., 418 F.2d at 137*).

The application of the Copperweld doctrine to cases in this circuit dealing with entities other than corporations and other than formal employees also makes clear that the special concerns of ***antitrust law*** determine the protective reach of the doctrine. In Bolt III, a physician alleged that three hospitals and members of their medical staffs who were on peer review committees had conspired to revoke his privileges at the hospitals. The court held that the defendant staff physicians--part of a hospital's staff for peer review purposes--were not within the Copperweld doctrine because "a hospital and the members of its medical staff . . . are legally separate entities." *Bolt III, 891 F.2d at 819*. In later similar cases, the Court of Appeals refined this holding, clarifying that doctors who served on hospital staff for some hospital purposes were not *per se* within the Copperweld doctrine "if they are not employed by the hospital *and* are acting as separate economic actors." *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1446 n.13 (11th Cir. 1991)* **[**111]** (emphasis added); *Crosby v. Hosp. Auth. of Valdosta & Lowndes County, 93 F.3d 1515, 1529 (11th Cir. 1996)*. Todorov makes it especially clear that the Copperweld doctrine can protect individuals who are not employees and who are not otherwise officially associated with the larger defendant entity: the individual defendants in that case were not on the hospital's peer review committee performing "official duties," as were the individual defendants in Bolt III and Crosby; their only connection to the hospital had been to give "negative recommendations about plaintiff to the relevant peer review committees." *Crosby, 93 F.3d at 1529 n.19*. These cases illustrate that antitrust conspiracy law targets entities such as doctors who compete with a hospital to sell medical services yet suddenly join forces with the hospital to keep other doctors out of the competition. In contrast, antitrust conspiracy law does not concern itself with an employee joining forces with his corporate employer unless the employee *himself,* the first entity, previously competed with or pursued "divergent goals" from the employer, the second entity.

HN50[] The fact that **[**112]** the Copperweld doctrine does not *per se* apply to employees also highlights the importance of keeping the Sherman Act's goals in mind. In this and other circuits, when the officers or employees of a corporation "act for their own interests, and outside the interests of the corporation, they are legally capable of conspiring with their employers for purposes of" the Sherman Act. Id.; *St. Joseph's* ***[*1237]*** *Hosp., 795 F.2d at 956* (internal citations omitted).

The allegations in the instant case do not suggest that Branch *himself* ever competed with or otherwise pursued goals divergent from Boeing's. In the five months before Branch was hired by Boeing, it is true that his alleged acts cannot be said to have been in *Lockheed's* interest. His acts, however, were also not in his *own* interest as distinct from Boeing's interest, any more so than Erskine's or Satchell's acts in their official capacities were in their own distinct interests. Whether Branch was being paid by Boeing in those five months for handing over Lockheed's documents or simply doing it to impress Boeing in his hopes of obtaining employment, his interests, for antitrust conspiracy purposes, were **[**113]** analogous to those of any formal employee or a wholly owned-subsidiary of Boeing. Indeed, the allegations of this Complaint more than once characterize Branch as "associated with Boeing," or as acting "on behalf of Boeing." (Doc. 1 PP178, 179.) The collusion between Branch and Boeing represented no joining of economic powers; it did not "deprive[] the marketplace of the independent centers of decisionmaking that competition assumes and demands." *Copperweld, 467 U.S. at 769*. Collusion between Boeing and Lockheed or a similar competitor would have represented a threat targeted by the Sherman Act, but collusion between Boeing and Branch, no matter how despicable, did not represent such a threat. All conspiracy claims against Branch and Boeing are accordingly dismissed.

The conspiracy allegations regarding the "others known and unknown to Lockheed Martin" are also dismissed. (Doc. 1 P243.) ***HN51***[] A district court can have no jurisdiction over "known" parties who have not been named or served with process. *Fed. R. Civ. P. 4*. In addition, both they and the unknown co-conspirators allegedly were acting "on behalf of Boeing." (Doc. 1 **[**114]** P243.) Assuming these people exist, they accordingly are analogous to Erskine, Satchell, and Branch and could not have conspired with Boeing under Copperweld. See also *Lombard's, Inc. v. Prince Mfg., Inc., 753 F.2d 974, 975 (11th Cir. 1985)* (finding that allegations that co-conspirators of single named defendant were "at this time unknown" to plaintiff were not sufficient to state a claim of conspiracy and did not give fair notice to named defendant).

C. Summary

Lockheed has failed to state a claim under *section 2 of the Sherman Act* that the Defendants attempted to monopolize the "U.S. Government EELV market" because the allegations show that the relevant market is, as a matter of law, not so narrow. Lockheed has also failed to state a claim under *section 2* that the Defendants attempted to monopolize the "worldwide commercial EELV market," which is the relevant market, because Lockheed did not allege any facts relating to Boeing's share of that market. Finally, Lockheed has failed to state a claim under *section 2* that the Defendants conspired to monopolize because it has failed to allege a conspiracy among formerly divergent economic powers.

VI. CONCLUSION

[115]** Based on the foregoing discussion, the Court rules as follows:

It is **ORDERED** and **ADJUDGED** that:

1. The Boeing Company's Motion to Dismiss (Doc. 46) is **GRANTED** as follows:

Counts I - VIII, as against The Boeing Company, are **DISMISSED** without prejudice.

[*1238] 2. William Erskine's Motion to Dismiss (Doc. 55) is **DENIED IN PART** and **GRANTED IN PART** as follows:

a. As to Counts I and III (the racketeering claims), the motion is **DENIED.**

b. As to Counts II and IV (the racketeering conspiracy claims), the motion is **DENIED.**

c. As to Counts V and VII (the attempted monopolization claims), the motion is **GRANTED.** Counts V and VII, as against William Erskine, are **DISMISSED** without prejudice.

d. As to Counts VI and VIII (the conspiracy to monopolize claims), the motion is **GRANTED.** Counts VI and VIII, as against William Erskine, are **DISMISSED** without prejudice.

e. As to the motion for a more definite statement, the motion is **DENIED.**

3. Larry Satchell's Motion to Dismiss (Doc. 41) is **DENIED IN PART** and **GRANTED IN PART** as follows:

a. As to Counts I and **[**116]** III (the racketeering claims), the motion is **DENIED.**

b. As to Counts II and IV (the racketeering conspiracy claims), the motion is **DENIED.**

c. As to Counts V and VII (the attempted monopolization claims), the motion is **GRANTED.** Counts V and VII, as against Larry Satchell, are **DISMISSED** without prejudice.

d. As to Counts VI and VIII (the conspiracy to monopolize claims), the motion is **GRANTED.** Counts VI and VIII, as against Larry Satchell, are **DISMISSED** without prejudice.

4. Kenneth Branch's Motion to Dismiss (Doc. 56) is **DENIED IN PART** and **GRANTED IN PART** as follows:

a. As to Counts I and III (the racketeering claims), the motion is **DENIED.**

b. As to Counts II and IV (the racketeering conspiracy claims), the motion is **DENIED.**

c. As to Counts V and VII (the attempted monopolization claims), the motion is **GRANTED.** Counts V and VII, as against Kenneth Branch, are **DISMISSED** without prejudice.

d. As to Counts VI and VIII (the conspiracy to monopolize claims), the motion is **GRANTED.** Counts VI and VIII, as against Kenneth Branch, are **DISMISSED** without prejudice. **[**117]**

5. Lockheed Martin is **GRANTED LEAVE** to file an amended complaint within thirty (30) days of the issuance of this memorandum.

DONE and **ORDERED** in Orlando, Florida on this 22nd day of April, 2004.

JOHN ANTOON II

UNITED STATES DISTRICT JUDGE

Dooley v. Crab Boat Owners Ass'n

United States District Court for the Northern District of California

April 26, 2004, Decided

No. C 02-0676 MHP

Reporter
2004 U.S. Dist. LEXIS 7117 *; 2004-1 Trade Cas. (CCH) P74,421

JOHN DOOLEY, JOHN B. JONES III, DAVID GRATZER, NYLE GRIFFIN, DAN REYES and CAITLIN ANN, LLC, Plaintiffs, v. CRAB BOAT OWNERS ASSOCIATION, FISHERMEN'S MARKETING ASSOCIATION OF BODEGA BAY, HALF MOON BAY FISHERMEN'S MARKETING ASSOCIATION, JOHN MORGAN, MORGAN FISH COMPANY, INC., DUNCAN MACLEAN, TODD WAILEY, JIM SALTER, ROBERT N. MILLER, MICHAEL MCHENRY, DAVID BETTENCOURT, LARRY COLLINS, WILLIAM WISE, JOHN T. TARANTINO, and GEORGE BOOS, Defendants.

Subsequent History: Related proceeding at *Crab Boat Owners Ass'n v. Hartford Ins. Co., 325 F. Supp. 2d 1057, 2004 U.S. Dist. LEXIS 13481 (N.D. Cal., July 16, 2004)*

Prior History: *Dooley v. Crab Boat Owners Ass'n, 271 F. Supp. 2d 1207, 2003 U.S. Dist. LEXIS 12381 (N.D. Cal., 2003)*

Disposition: [*1] Defendants' motions for summary judgment granted in part and denied in part. Counterdefendants' motion for summary judgment granted.

Core Terms

crab, fishing, plaintiffs', defendants', counterdefendants, associations, genuine issue of material fact, fishermen, enterprise, summary judgment motion, tie-ups, antitrust, extortion, lines, predicate act, caught, Fresh, present evidence, damages, season, vessel, sufficient evidence, crab pot, participated, conspiracy, alleges, pattern of racketeering activity, reasonable factfinder, prices, intentional interference

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

Summary judgment is proper when the pleadings, discovery and affidavits show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. Material facts are those which may affect the outcome of the case. A dispute as to a material fact is genuine if there is sufficient evidence for a reasonable jury to return a verdict for the nonmoving party.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] Supporting Materials, Affidavits

The moving party for summary judgment bears the burden of identifying those portions of the pleadings, discovery and affidavits that demonstrate the absence of a genuine issue of material fact. On an issue for which the opposing party will have the burden of proof at trial, the moving party need only point out that there is an absence of evidence to support the nonmoving party's case. Once the moving party meets its initial burden, the nonmoving party must go beyond the pleadings and, by its own affidavits or discovery, set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. Mere allegations or denials do not defeat a moving party's allegations. Nor is it sufficient for the opposing party simply to raise issues as to the credibility of the moving party's evidence. If the nonmoving party fails to show that there is a genuine issue for trial, the moving party is 'entitled to judgment as a matter of law.

18 U.S.C.S. § 1962(c) prohibits persons whose actions affect interstate commerce from using an enterprise to engage in a pattern of racketeering activity. To prove a violation of *18 U.S.C.S. § 1962(c)*, plaintiffs must demonstrate that defendants engaged in conduct of an enterprise through a pattern of racketeering activity. *28 U.S.C.S. § 1962(c)* provides: It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt. "Person" is defined broadly under the statute to include any individual or entity capable of holding a legal or beneficial interest in property. *18 U.S.C.S. § 1961(3)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN4[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Establishing the existence of an enterprise requires proof of an ongoing organization, formal or informal, with various associates functioning as a continuing unit. An enterprise may include both legitimate and illegitimate entities, but it must exist separate and apart from the pattern of racketeering activity in which it engages. At a minimum the entity must exhibit some sort of structure for the making of decisions, whether it be hierarchical or consensual. The structure should provide some mechanism for controlling and directing the affairs of the group on an on-going, rather than an ad hoc, basis. The structure requirement, however, does not mean that every decision must be made by the same person, or that authority may not be delegated. In order to participate in the conduct of the enterprise, one must have participated in the operation or management of the enterprise. The function of overseeing and coordinating the commission of several different predicate offenses and other activities on an on-going basis is adequate to satisfy the separate existence requirement. Furthermore, a plaintiff may name members of an association-in-fact enterprise as individual defendants.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN6[] Hobbs Act, Elements

In order to satisfy the requirement under the Racketeer Influenced and Corrupt Organizations Act that a defendant have engaged in a pattern of racketeering activity, each defendant must have committed at least two predicate acts within 10 years. 18 U.S.C.S. § 1961(5). An indictable offense under the Hobbs Act is considered "racketeering activity," 18 U.S.C.S. § 1961(1)(B), and two or more such offenses within ten years may constitute a "pattern," 18 U.S.C.S. § 1961(5). In relevant part, the Hobbs Act prohibits extortion, or an attempt or conspiracy to commit extortion, that in any manner affects interstate commerce. 18 U.S.C.S. § 1951(a). The Hobbs Act defines extortion as the obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear, or under color of official right. 18 U.S.C.S. § 1951(b)(2). Threats or acts of physical violence in furtherance of a plan or purpose to do anything in violation of this section are also prohibited. 18 U.S.C.S. § 1951(a). Under the Hobbs Act, the term "property" includes the right to make business decisions free from wrongful coercion.

Criminal Law & Procedure > ... > Extortion > Hobbs Act > Elements

Criminal Law & Procedure > Criminal Offenses > Racketeering > General Overview

Criminal Law & Procedure > ... > Extortion > Hobbs Act > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

HN7[] Hobbs Act, Elements

Because the Hobbs Act prohibits not only extortion, but also attempt or conspiracy to commit extortion, an attempt or conspiracy to commit extortion constitutes an indictable offense under the Racketeer Influenced and Corrupt Organization Act (RICO). 18 U.S.C.S. § 1951(a); 18 U.S.C.S. § 1961(1)(B). Thus, attempting or conspiring to commit extortion through the use of actual or threatened force, violence, or fear may be considered a predicate act for purposes of RICO.

Criminal Law & Procedure > Criminal Offenses > Racketeering > General Overview

Criminal Law & Procedure > ... > Extortion > Hobbs Act > General Overview

Criminal Law & Procedure > ... > Extortion > Hobbs Act > Penalties

HN8[] Hobbs Act, Elements

Whoever in any way or degree obstructs, delays, or affects commerce or the movement of any article or commodity in commerce, by robbery or extortion or attempts or conspires so to do, or commits or threatens physical violence to any person or property in furtherance of a plan or purpose to do anything in violation of this section shall be fined under this title or imprisoned not more than twenty years, or both. 18 U.S.C.S. § 1951(a).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN9[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In order to establish a pattern of racketeering activity, a plaintiff must also demonstrate a "relationship" between the predicate acts and a threat of continuing activity. A plaintiff may establish a threat of continuing activity if the related predicates themselves involve a distinct threat of long-term racketeering activity, either implicit or explicit, even if the number of related predicate acts is small and if they occur close together in time.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN10[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In order to sue for a violation of the Racketeer Influenced and Corrupt Organizations Act (RICO), a plaintiff must have been injured in his business or property by reason of the RICO violation. *18 U.S.C.S. § 1964(c)*.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN11[] **Conspiracy, Elements**

Under *18 U.S.C.S. § 1962(d)*, a conspirator must intend to further an endeavor which, if completed, would satisfy all of the elements of a substantive criminal offense. For purposes of conspiracy liability, a plaintiff is not required to show that each defendant agreed to commit two predicate acts. Rather, the defendant must have been aware of the essential nature and scope of the criminal enterprise and intended to participate in it.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] **Scope, Monopolization Offenses**

Section 2 of the Sherman Act prohibits monopolization, attempts to monopolize, and conspiracies to monopolize any part of trade or commerce in a particular state. *15 U.S.C.S. § 2*. In order to succeed on a claim of actual monopolization, a plaintiff must demonstrate that the defendant willfully acquired or maintained monopoly power in the relevant market through anticompetitive conduct. In order to succeed on a claim of attempted monopolization, a plaintiff must demonstrate that the defendant engaged in anticompetitive conduct with a specific intent to monopolize and had a dangerous probability of achieving monopoly power. Under either claim, a plaintiff must demonstrate that the anticompetitive conduct caused antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

Under either a claim for monopolization or a claim for attempted monopolization, a plaintiff must set forth both the relevant product and geographic markets that defendants have endeavored to monopolize. The relevant product market includes the pool of goods or services that enjoy a reasonable interchangeability and a cross-elasticity of demand. The relevant geographic market is defined by the area of effective competition where buyers can turn for alternate sources of supply. The definition of the relevant market--both product and geographic--is generally a question of fact reserved for the jury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] **Attempts to Monopolize, Elements**

Plaintiffs must also show that the defendant has monopoly power within the relevant market. *15 U.S.C.S. § 2*. The question of whether monopoly power exists depends heavily upon market share and barriers to entry. A lesser showing of market power is required in an attempt case than in an actual monopolization case. Entry barriers are factors in the market that deter entry while permitting incumbent firms to earn monopoly returns. In order to demonstrate sufficient barriers to entry, plaintiff must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Business Torts > Unfair Business Practices > Elements

Torts > Business Torts > Unfair Business Practices > Remedies

HN15[] **Antitrust & Trade Law, Sherman Act**

A violation of the Sherman Act also requires a showing of anticompetitive conduct. While competition among rivals does not violate the Sherman Act, a reduction of competition which harms consumer welfare does contravene the Act. Thus, a plaintiff must demonstrate a significant and more-than-temporary harmful effect on competition, not just on a competitor or consumer. Therefore, it is necessary to consider defendants' conduct not only as it relates to plaintiffs, but also as it impacts consumers and competition overall. A company engages in predatory behavior when it attempts to exclude rivals on some basis other than efficiency. Thus, exclusionary conduct includes behavior that not only tends to impair the opportunities of rivals, but also fails to further competition or furthers competition in an unnecessarily restrictive manner.

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

In order to recover under the Sherman Act, a plaintiff must demonstrate antitrust injury. To prove antitrust injury, plaintiffs must prove that their loss flowed from the defendants' anticompetitive conduct. The conduct that causes the injury must also adversely affect competition.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] **Standing, Requirements**

In order to maintain an antitrust action, the injured party must be a participant in the same market as the defendants.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Business & Corporate Law > ... > Shareholder Actions > Actions Against Corporations > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN18[] **Standing, Requirements**

A shareholder of a corporation injured by an antitrust violation does not have standing to sue. This rule applies even if the injured shareholder is the sole shareholder or if the shareholder alleges that the antitrust violations were intended to drive the individual out of the industry.

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act prohibits parties from entering into agreements and conspiracies that unreasonably restrain trade. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN20[] **Per Se Rule & Rule of Reason, Sherman Act**

Courts analyze agreements or conspiracies to restrain trade under either the "per se rule" or the "rule of reason." Courts evaluate concerted activity under *15 U.S.C.S. § 1* more rigorously than under *15 U.S.C.S. § 2*, and may hold that certain agreements are so inherently anticompetitive that they are illegal per se without further inquiry into the harm they have actually caused.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN21[] **Antitrust & Trade Law, Sherman Act**

The Cartwright Act, *Cal. Bus. & Prof. Code § 16750*, is patterned after the Sherman Act, and federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN22[] **Regulated Practices, Trade Practices & Unfair Competition**

Cal. Bus. & Prof. Code § 17200 borrows violations from other laws by making them independently actionable as unfair competitive practices. An action may also be deemed unfair even if it does not amount to a violation of some other law.

HN23[] **Private Actions, Remedies**

Under California's Unfair Competition Laws, damages are limited to restitution.

Contracts Law > Breach > General Overview

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

HN24[] **Contracts Law, Breach**

Intentional interference with contractual relations requires that the plaintiff demonstrate (1) a valid contract between the plaintiff and a third party; (2) defendants knowledge of the contract; (3) intentional acts designed to induce breach or disrupt the contractual relationship; (4) actual breach or disruption of the relationship; and (5) resulting damage.

Governments > Legislation > Effect & Operation > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN25[] **Legislation, Effect & Operation**

Intentional interference with prospective economic advantage requires (1) an existing economic relationship or one containing the probability of future economic benefit; defendants' knowledge of the relationship; (2) acts designed to disrupt the relationship; (3) actual disruption of the relationship; and (4) damages proximately caused by the defendants. A plaintiff must demonstrate that defendants' conduct was wrongful by some legal measure; it is not sufficient to prove merely interference itself. A plaintiff may prove that a defendants' conduct was independently wrongful by presenting evidence that defendants' actions fell outside of the realm of legitimate business transactions.

Governments > State & Territorial Governments > Licenses

Insurance Law > ... > Coverage > Advertising & Personal Injuries > Advertising Injuries

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Insurance Law > Claim, Contract & Practice Issues > Allocation

HN26[] **State & Territorial Governments, Licenses**

To succeed on a claim of predatory pricing under *Cal. Bus. & Prof. Code § 17043*, a plaintiff must prove both that the seller (1) sold its product below cost, and (2) had the purpose of injuring competitors or destroying competition. To meet the cost requirement, the vendor must have sold below his or her own fully allocated or fully distributed cost. Cost includes the cost of raw materials, labor and all overhead expenses. *Cal. Bus. & Prof. Code § 17026* . Overhead expenses include labor, rent, interest on borrowed capital, depreciation, selling cost, maintenance of equipment, deliver costs, credit losses, all types of licenses, taxes, insurance and advertising. *Cal. Bus. & Prof. Code § 17029*. California's fully allocated cost standard includes both fixed and variable costs attributable on an average basis to each unit of output. Stated simply, cost includes the initial expense of producing the article together with its share of the load of carrying on the business through which it is sold. Determination of cost is an issue of fact. To meet the purpose requirement, the vendor must act with the purpose, i.e., the desire, of injuring competitors or destroying competition. Where the plaintiff proves both below cost sales and injurious effect, the court may infer an intent to injure competitors or destroy competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN27[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Whether the sale was conducted with the purpose of injuring competitors and had the tendency or capacity to injure the plaintiff are usually questions of fact.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN28[] Regulated Practices, Trade Practices & Unfair Competition

A business practice violates the California Unfair Competition Act, *Cal. Bus. & Prof. Code § 17200 et seq.*, if it violates another provision of California law.

Opinion

MEMORANDUM & ORDER

Cross Motions for Summary Judgment

The Caitlin Ann fishing company, its managing director John Dooley, and several crew members bring this action against three fishing associations and their members, as well as a purveyor of fish, seeking relief for alleged interference with the Caitlin Ann's Dungeness crab harvesting off the coast of California. Now before the court are defendants' motions for summary judgment and plaintiffs' motion for summary judgment on **[*3]** defendant Half Moon Bay Fishermen's Marketing Association's counterclaims. After having considered the parties' arguments and submissions, and for the reasons set forth below, the court rules as follows.

BACKGROUND [1]

In its memorandum and order of July 14, 2003, the court set forth the background of this action. For context, the court will repeat some of this background here.

The Caitlin Ann LLC, a Washington limited liability corporation, is the owner of a fishing boat also named the Caitlin Ann. Under the management of John Dooley, the company harvests Dungeness crab off the coast of California, Washington and Oregon. Plaintiffs and defendants agree that crabs are harvested commercially using steel and wire traps, or pots, that rest on the ocean floor. A buoy, attached to each pot, acts as a marker for the fishermen.

The parties agree on little else. According to plaintiffs, the conflict between the parties **[*4]** began when the State of California opened the Northern California Dungeness crab season on December 1, 1999. Plaintiffs contend that two fishermen's marketing associations not named in this action refused to harvest crab, hoping that this refusal would help them negotiate a favorable fixed price with buyers. [2] In a show of solidarity, members of the three defendant associations--the Crab Boat Owners Association ("CBOA"), the Fishermen's Marketing Association Incorporated of Bodega Bay ("FMABB"), and the Half Moon Bay Fishermen's Marketing Association ("HMBFMA")--also allegedly refused to fish in order to set a price more favorable to the fishermen.

[*5] Plaintiffs, however, did not join this "tie up." [3] **[*6]** Instead, Dooley prearranged to sell his catch to Three Captains, a local buyer in Half Moon Bay. Maclean, the President of the HMBFMA, came to the Three Captains facility and told the owners, Larry and Mary Fortado, that the HMBFMA would "blackball" [4] their company if they purchased Dooley's crab. When the Caitlin Ann boat returned to port, a group of angry HMBFMA members, including Maclean, confronted the crew and yelled obscenities. Dooley later discovered the word "scab" spray painted on the side of the vessel. During the next crab season, members of the associations refused to sell their crab to Three Captains. Three Captains suffered financial harm as a result of being "blackballed," and it refused to buy crab from Dooley during the 2000 crab season.

When the Southern California Dungeness crab season opened on November 15, 2001, plaintiffs claim that the three defendant associations and their members once again refused to fish so as to fix a favorable price for crab. The Caitlin Ann company had already contracted with a buyer, Exclusive Fresh. On November 16, 2001, plaintiffs allege that association members told Dooley that there would be "trouble" and "heavy repercussions" if he harvested crab during the tie-up, and a group of members, including Maclean and Salter, came to the dock and threatened the Caitlin Ann's crew.

Despite these threats, the Caitlin Ann departed on November 16, 2001, and set approximately 930 crab pots. The following day, the crew of the Caitlin Ann returned to the area where they had set the pots and found approximately 647 crab pot lines cut. Plaintiffs allege that defendant Todd Whaley [5] was involved in cutting the lines. Plaintiffs **[*7]**

---

[1] Unless otherwise noted, this fact recitation is culled from the parties' moving papers.

[2] Fishermen typically enter into market orders with local purchasers prior to leaving port. Before entering into a market order, the associations typically require the purchaser to sign an "Assessment Agreement." This Agreement includes a clause which provides that the purchaser agrees to remit a tax, in addition to the minimum price per pound, to the Association on a regular basis. The tax required for Dungeness Crab is three-cents per pound, and is required regardless of whether the fisherman selling the crab is a member of the association. The associations will not enter into a market order with the purchaser if it refuses to sign the Assessment Agreement.

[3] If fishermen are unable to reach an agreed upon price for crab at the start of the season, they will keep their boats tied up at the dock, resulting in a "tie-up" or "strike." Plaintiffs argue that tie ups typically occur during the first two weeks of the season, from November 15th to December 1st, in order to obtain a higher price for crab and to keep Northern District fishermen from fishing. The Northern District consists of District 6, 7, 8, and 9 and runs from Point Arena to the California/Oregon border. District 10 is immediately south of the Northern District and includes the bays at issue in this case. The Northern District season typically opens on December 1st, while the District 10 season opens as early as November 15th.

[4] The parties use the word "blackball" to refer to a situation where members of the associations and other fishermen would refuse to sell their crab catch to specific individuals.

spotted a Crescent City style boat near plaintiffs' gear. Whaley's boat, the Dynamik, is a Crescent City style boat. Whaley does not dispute that his boat was near the lines. Rather, he claims that on the evening of November 17, 2001, he went out to pull plaintiffs' buoys to see if they were catching crab and that when he arrived the lines had already been cut. Prior to returning to Half Moon Bay, Dave Bracciotti, a fisherman, had warned John Dooley's brother, Robert Dooley, that someone intended to cut their crab pot lines. [6]

Defendants also allegedly interfered with plaintiffs' ability to deliver crab to Exclusive Fresh. Prior to Caitlin Ann's return to port, Dooley contacted Phil Bruno, the owner of Exclusive Fresh. Bruno informed Dooley that **[*8]** Michael McHenry had contacted him and urged him not to purchase Dooley's crab. Bruno also informed Dooley that he would be unable to purchase the crab because the transient dock at Half Moon Bay was blocked by another vessel owned by defendant Duncan Maclean. Dooley had previously made plans with the harbor master to use the transient dock, the only space that could accommodate a vessel the size of the Caitlin Ann. Plaintiffs contend that Maclean, encouraged by the associations, deliberately blocked the Caitlin Ann from docking in order to punish plaintiffs for harvesting crab during the strike. Maclean argues that he tied up at the transient dock to undertake maintenance of his vessel. [7]

[*9] Unable to access Half Moon Bay, plaintiffs sailed to San Francisco, where they had identified a new buyer for their crab, J&S Quality Seafood ("J&S"). Prior to plaintiffs' arrival, members of the associations allegedly threatened Jim Schach, the owner of J&S, with "blackballing" if he purchased Dooley's crab. John Morgan, the owner of Morgan Fish Company, Inc., a large purveyor of Dungeness crab, also contacted Schach, warning him not to buy Dooley's crab. One of Morgan's employees contacted Shach to convey a similar message. Following J&S' purchase of plaintiffs' crab, Morgan contacted customers of J&S to dissuade them from purchasing crab from J&S and allegedly told them they would be boycotted if they purchased the crab. Morgan, a distributor of Polar Ice, a company owned by John Tarantino, also refused to sell ice to J&S. [8]

[*10] On February 7, 2002, plaintiffs filed a complaint against three defendant fishermen associations located in the greater San Francisco Bay Area, the CBOA, FMABB, and HMBFMA; individual members of the associations, Duncan Maclean, Jim Salter, Robert N. Miller, Michael McHenry, Larry Collins, William Wise, John T. Tarantino and George Boos; and other individuals that allegedly cooperated with the associations, John Morgan, Morgan Fish Company, Inc., [9] Todd Whaley and David Bettencourt. In large measure, plaintiffs accuse defendants of violating *sections 1962(c)and (d)* of the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *sections 1* and *2 of the Sherman Act*, and *sections 16750* and *17200 of the California Business and Professions Code*. *18 U.S.C. §§ 1962(c)*,*(d)*; *15 U.S.C. §§ 1*,*2*; *Cal. Bus. & Prof. Code §§ 16750, 17200*. Plaintiffs also allege that defendants unlawfully interfered with contractual relations and with prospective economic advantage, and adding conversion and trespass to chattels claims as well. In turn, defendant HMBFMA brings three counterclaims against Caitlin Ann LLC and Dooley (collectively **[*11]** "counterdefendants"). HMBFMA alleges that counterdefendants sold crab below

---

[5] Plaintiffs erroneously spelled his name "Wailey" in their complaint.

[6] Plaintiffs later recovered a small portion of their gear. They made an effort to fish with the crab pots that remained, but were unable to reach their anticipated income for the crab season.

[7] The log book for the San Mateo Harbor District at Pillar Point, dated November 17, 2001, states, "Fisherman approached the office asking to use the end of pier to block Dooly [sic] from offloading." The log further states on November 18, 2001, "Duncan asked to tie FV Barbara Faye to load crab gear--gave permission--but now think he just wants to make it difficult for FV Caitlin Ann to tie there."

[8] Similar events occurred with respect to Richard Axelson, a fisherman who had agreed to fish for Bodega Bay Fish Company during the 2001 tie-up. The company refused to purchase Axelson's crab after being threatened by members of the FMABB. Axelson had seventy of his crab pots cut. Later in the season, J&S purchased approximately 6,000 lbs. of crab from Axelson, which he placed into a tank. That night someone disabled J&S' circulating seawater system causing the crab in the tank to die. Shach also found a note on his truck stating: "It's not over."

[9] Throughout their papers, John Morgan and the Morgan Fish Company, Inc. refer to themselves as the "Morgan defendants." They have not indicated that Morgan Fish Company, Inc. should be treated as anything other than the alter ego of John Morgan. Thus, for purposes of this motion, the court treats John Morgan and the Morgan Fish Company, Inc. as a single defendant.

cost from 1999 to the present, used a boat that had a trawling net in violation of state permitting requirements, and, in 1999, fished in a wasteful and destructive manner. HMBFMA also alleges that counterdefendants threatened HMBFMA members and other fishermen with damage to their fishing gear, and did in fact damage gear by trawling through fishing areas already set with pots. Through this conduct, HMBFMA alleges that counterdefendants violated *sections 17200and 17043* of the California Business and Profession Code, and engaged in tortious interference with prospective economic advantage.

[*12] On March 31, 2003, countedefendants filed a motion for summary judgment. On July 14, 2003, following a hearing on that motion, this court issued a memorandum and order finding that HMBMFA had not produced any evidence demonstrating that counterdefendants had (1) engaged in predatory pricing, (2) procured and renewed a permit for Dungeness crab with a vessel that was equipped with a trawling net, or (3) dragged a trawling net over fishing areas in order to deter HMBFMA members from placing their crab pots there. Accordingly, the court ordered HMBMFA to submit declarations explaining the reasonable basis for its claims. HMBFMA subsequently filed two declarations with the court. On August 12, 2003, the court granted HMBFMA's motion to dismiss its third counterclaim for tortious interference with prospective economic advantage. Now before the court are defendants' motions for summary judgment as to all of plaintiffs' claims and plaintiffs' motion for summary judgment as to HMBFMA's counterclaims.

LEGAL STANDARD

HN1[] Summary judgment is proper when the pleadings, discovery and affidavits show that there is "no genuine issue as to any material fact and that the moving party is entitled **[*13]** to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. Material facts are those which may affect the outcome of the case. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. A dispute as to a material fact is genuine if there is sufficient evidence for a reasonable jury to return a verdict for the nonmoving party. *Id.* ***HN2***[] The moving party for summary judgment bears the burden of identifying those portions of the pleadings, discovery and affidavits that demonstrate the absence of a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. On an issue for which the opposing party will have the burden of proof at trial, the moving party need only point out "that there is an absence of evidence to support the nonmoving party's case." *Id. at 325*.

Once the moving party meets its initial burden, the nonmoving party must go beyond the pleadings and, by its own affidavits or discovery, "set forth specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. 56(e)*. Mere allegations **[*14]** or denials do not defeat a moving party's allegations. Id.; see also *Gasaway v. Northwestern Mut. Life Ins. Co., 26 F.3d 957, 959-60 (9th Cir. 1994)*. Nor is it sufficient for the opposing party simply to raise issues as to the credibility of the moving party's evidence. *National Union Fire Ins. Co. v. Argonaut Ins. Co., 701 F.2d 95, 97 (9th Cir. 1983)*. If the nonmoving party fails to show that there is a genuine issue for trial, "the moving party is 'entitled to judgment as a matter of law.'" *Celotex Corp., 477 U.S. at 323* (quoting *Fed. R. Civ. P. 56(c)*).

DISCUSSION

I. Plaintiffs' Claims

A. *RICO Section 1962(c)*

Plaintiffs seek treble damages under the civil provisions of RICO for acts of extortion prohibited by the *Hobbs Act*. Specifically, plaintiffs contend that defendants violated *RICO section 1962(c)*. ***HN3***[] *Section 1962(c)* prohibits persons whose actions affect interstate commerce from using an enterprise to engage in a "pattern of racketeering activity." [10] *18 U.S.C. § 1962(c)*. To prove a violation of *section 1962(c)*, plaintiffs must demonstrate **[*15]** that

[10] *Section 1962(c)* provides:

defendants engaged in conduct of an enterprise through a pattern of racketeering activity. *Salinas v. United States, 522 U.S. 52, 62, 139 L. Ed. 2d 352, 118 S. Ct. 469 (1997)*.

1. Defendants' Enterprise

Defendants contend that plaintiffs' RICO claim fails because plaintiffs have not put forward sufficient evidence to demonstrate the existence of an enterprise. ***HN4***[] Establishing the existence of an enterprise **[*16]** requires proof of an ongoing organization, formal or informal, with various associates functioning as a continuing unit. *Chang v. Chen, 80 F.3d 1293, 1299 (9th Cir. 1996)*. An enterprise may include both legitimate and illegitimate entities, but it must exist separate and apart from the pattern of racketeering activity in which it engages. *United States v. Turkette, 452 U.S. 576, 580-81, 583, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)*. At a minimum the entity:

> must exhibit some sort of structure . . . for the making of decisions, whether it be hierarchical or consensual. The structure should provide some mechanism for controlling and directing the affairs of the group on an on-going, rather than an ad hoc, basis. The structure requirement, however, does not mean that every decision must be made by the same person, or that authority may not be delegated.

Chang, 80 F.3d at 1299 (citations and internal quotation marks omitted). In order to participate in the conduct of the enterprise, one must have participated in the "operation or management" of the enterprise. *Reves v. Ernst & Young, 507 U.S. 170, 180, 122 L. Ed. 2d 525, 113 S. Ct. 1163 (1993).* **[*17]** "The function of overseeing and coordinating the commission of several different predicate offenses and *other activities* on an on-going basis is adequate to satisfy the separate existence requirement." *Chang, 80 F.3d at 1298*. Furthermore, a plaintiff may name members of an association-in-fact enterprise as individual defendants. *River City Markets, Inc. v. Fleming Foods West, Inc., 960 F.2d 1458, 1462 (9th Cir.1992)*.

Plaintiffs allege that defendants participated in an enterprise separate and apart from the pattern of racketeering activity. The three associations cooperated at the beginning of the crab season to determine an appropriate "ex-vessel" price for crab. [11] The associations abided by the decisions of each other as to the agreed upon price and voted by majority vote. Salter Dep. at 63, 117. Jim Salter stated in his deposition that, in 2001, the entire fleet of commercial crab fishermen in fishing in the Gulf of the Farollones agreed not to fish because two of the three associations were unwilling to accept a market price of $ 2.00 per pound. Salter Dep. at 117. John Tarantino regularly contacted association representatives and served **[*18]** as a central clearinghouse for information among the fishermen. McHenry Dep. at 142; Whaley Dep. at 57. Phone records also indicate that the associations and individual defendants contacted each other prior to the opening of the season. Sheer Decl., Exh. S. A reasonable factfinder could conclude that the three associations constitute an enterprise because they operate as an informal organization, separate and distinct from the alleged racketeering activity at issue in this case. Because Maclean, Salter, Wise, Miller, Collins, and Boos were all members of and served in executive positions in the associations, a reasonable factfinder could determine that they participated in the operation of the enterprise.

Plaintiffs have also demonstrated that there exists a genuine question of material fact as to whether John Morgan **[*19]** and the Morgan Fish Company, Inc. participated in the enterprise. Morgan and the Morgan Fish Company, Inc. cooperated in the operation of an ice plant owned by Tarantino. Morgan abided by the associations' decision not to fish or sell crab at the start of the season by not purchasing crab and by picketing in front of J&S following their purchase of Dooley's crab. The Morgan Fish Company, Inc. also assessed a three-cent tax on each pound of Dungeness crab against the fisherman and remitted this tax to the association. As a result, a reasonable

---

> It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

18 U.S.C. § 1962(c). "Person" is defined broadly under the statute to include "any individual or entity capable of holding a legal or beneficial interest in property." *18 U.S.C. § 1961(3)*.

[11] Members of the associations sell crab at a fixed price through market orders issued by the associations. The market order states the agreed-upon or "ex-vessel" price set by the associations.

factfinder could conclude that Morgan and the Morgan Fish Company, Inc. participated in the operation of the enterprise.

Finally, plaintiffs have demonstrated a genuine issue of material fact as to whether Whaley, McHenry and Bettencourt participated in the enterprise. Defendants' primary argument is that these individuals were not members of any association and thus could not have participated in the operation or management of the enterprise. As the Supreme Court noted in Reves, *HN5*[] "an enterprise is operated not just by upper management but also by lower rung participants in the enterprise who are under the direction of upper management." **[*20]** *Reves, 507 U.S. at 178-79, 184* (internal quotation marks omitted). Moreover, on a motion for summary judgment, the court must construe the evidence in a light most favorable to the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. Defendant Whaley abided by the price schedule set by the associations and participated in the 2001 tie-up. While McHenry was not a member of an association, he also abided by the price schedule set by the associations and contacted Tarantino to determine whether he could fish based on the associations' decision as to the set price. In addition, Bettencourt allegedly refused to sell crab to Three Captains following their purchase from Dooley during the 1999 tie-up. Based on these facts, a reasonable factfinder could conclude that an enterprise existed between the associations, Whaley, McHenry and Bettencourt.

2. Pattern of Racketeering Activity

HN6[] In order to satisfy the requirement under RICO that a defendant have engaged in a pattern of racketeering activity, each defendant must have committed at least two predicate acts within ten years. **[*21]** *18 U.S.C. § 1961(5)*; *Banks v. Wolk, 918 F.2d 418, 421 (3d Cir. 1990)*; see also *Volmar Dist. Inc. v. New York Post Co., Inc., 825 F. Supp. 1153, 1166 (S.D.N.Y. 1993)*; *Pelfresne v. Village of Rosemont, 22 F. Supp. 2d 756, 764 (N.D. Ill. 1998)*. An indictable offense under the *Hobbs Act* is considered "racketeering activity," *18 U.S.C. § 1961(1)(B)*, and two or more such offenses within ten years may constitute a "pattern," *18 U.S.C. § 1961(5)*. In relevant part, the *Hobbs Act* prohibits extortion, or an attempt or conspiracy to commit extortion, that in any manner affects interstate commerce. *18 U.S.C. § 1951(a)*. [12] *The Hobbs Act* defines extortion as "the obtaining of property from another, with his consent, induced by wrongful use of actual or threatened force, violence, or fear, or under color of official right." *18 U.S.C. § 1951(b)(2)*. Threats or acts of physical violence "in furtherance of a plan or purpose to do anything in violation of this section" are also prohibited. *18 U.S.C. § 1951(a)*. Under the *Hobbs Act*, the term "property" **[*22]** includes "the right to make business decisions free from wrongful coercion." *United States v. Zemek, 634 F.2d 1159, 1174 (9th Cir. 1980)*. *HN7*[] Because the *Hobbs Act* prohibits not only extortion, but also attempt or conspiracy to commit extortion, an attempt or conspiracy to commit extortion constitutes an indictable offense under RICO. See *18 U.S.C. § 1951(a)*; *18 U.S.C. § 1961(1)(B)*. Thus, attempting or conspiring to commit extortion "through the use of actual or threatened force, violence, or fear" may be considered a predicate act for purposes of RICO. See *18 U.S.C. § 1951(a)*; *18 U.S.C. §§ 1961(1)(B)*,*(5)*; see also *United States v. Private Sanitation Indus. Ass'n of Nassau/Suffolk, Inc., 793 F. Supp 1114, 1133 (E.D.N.Y. 1992)*.

[*23] Defendants argue that no defendant committed two predicate acts, and so no defendant engaged in a pattern of racketeering activity. A genuine issue of material fact exists as to whether defendants Morgan and Maclean committed two predicate acts. This court determined in its prior order that the following acts could function as the necessary predicate acts:

---

[12] In full, the *Hobbs Act* provision at issue states:

> *HN8*[] Whoever in any way or degree obstructs, delays, or affects commerce or the movement of any article or commodity in commerce, by robbery or extortion or attempts or conspires so to do, or commits or threatens physical violence to any person or property in furtherance of a plan or purpose to do anything in violation of this section shall be fined under this title or imprisoned not more than twenty years, or both.

18 U.S.C. § 1951(a).

> Defendants Maclean and Michael McHenry, as well as other members of the associations, threatened Exclusive Fresh with loss of business so that the company reneged on its promise to purchase crab from plaintiffs;
> Defendant Morgan and other members of the associations threatened J&S Quality Seafood with loss of business if the company purchased crab from plaintiffs;
> Defendant Morgan and his company, Morgan Fish, threatened buyers and customers of J&S Quality Seafood with loss of business if they purchased "scab crab" from the company;
> Defendants Maclean, Jim Salter and other members of the associations threatened the crew of the Caitlin Ann with harm if they went fishing;
>
> Defendant William Wise and FMABB threatened Bodega Bay Fish with loss of business if the company provided bait to another fisherman, **[*24]** Richard Axelson, who planned to go fishing during the strike in November 2001; and
> Defendant Whaley as well as members of the associations conspired to and were involved in cutting the lines to the Caitlin Ann's crab pots.

July 14, 2003, Order at 9. With the exception of the allegations in regard to Wise, plaintiffs have put forward sufficient evidence, through the depositions of Dooley, Shach, Axelson, Whaley, and others, to raise a genuine issue of material fact as to whether these acts occurred. Whether defendants engaged in these acts to further a scheme of extortion is a question of fact, resolution of which depends upon the intent of the individuals involved. If these acts did in fact occur, and if the defendants did participate in these acts to further a scheme of extortion, a reasonable factfinder could determine that defendants Morgan and Maclean engaged in a pattern of racketeering activity in violation of *section 1962(c)*. [13]

[*25] A genuine issue of material fact also exists as to whether the defendant associations committed two predicate acts. Plaintiffs have presented evidence that the defendant associations attempted to commit extortion in violation of the *Hobbs Act*. See *18 U.S.C. § 1951(a)*. In particular, in 1999, members of the associations allegedly threatened Three Captains, telling Three Captains that it would be "blackballed" if it purchased Dooley's crab. L. Fortado Decl. P5. During the 2001 tie-up, association members threatened Dooley with "trouble" and "heavy repercussions" if Dooley harvested crab. Dooley Decl. P15. Tarantino, who allegedly served as a central contact person between the associations, refused to sell ice to J&S through his company, Polar Ice, following J&S' purchase of Dooley's crab during the 2001 tie-up. Schach Decl. P11. These actions were not limited to Dooley, but also extended to other fishermen who attempted to harvest crab during tie-ups. See Axelson Decl. P7. Based on this evidence, a reasonable juror could conclude that the defendant associations engaged in repeated attempts to keep Dooley from selling crab in District 10 during tie-ups. **[*26]** See *Zemek, 634 F.2d at 1174*. Individual members of the associations, who were also fishermen, stood to gain financially from Dooley's exclusion from the local market. While they were not ultimately successful in keeping Dooley out of the market, a genuine issue of material fact exists as to whether, through their actions, the associations violated the *Hobbs Act*. See *18 U.S.C. § 1951(a)*. As this court noted in its prior order, "That defendants in fact failed to halt the Caitlin Ann's operations does not affect the analysis, since the *Hobbs Act* reaches both actual extortion and attempts or conspiracies to commit extortion." July 14, 2003, Order at 8-9. A reasonable juror could conclude that the defendant associations engaged in multiple attempts to extort plaintiffs in violation of the *Hobbs Act*. See *18 U.S.C. § 1951(a)*. Because each of these attempts is an indictable offense under the *Hobbs Act*, each constitutes a predicate act for purposes of RICO.

---

[13] Plaintiffs also argue that other predicate acts support their claim. Plaintiffs allege that defendants boycotted Three Captains because Three Captains purchased crab from Dooley; that defendants cut crab pot lines belonging to Axelson; that defendants sabotaged the catch purchased by J&S; that defendants coordinated strikes designed to keep boats from the North out of District 10; that defendants refused to terminate a strike even though buyers offered a price acceptable to the fishermen; that defendants slashed a fisherman's tires in retaliation for fishing during a strike; that defendants vandalized Schach's vehicle; and that defendants threatened to blow-up Schach's car if he purchased "scab crab." Plaintiffs do not allege that any particular defendants committed these acts. They merely state that "defendants" engaged in such acts. These aallegations are insufficient to constitute predicate acts for purposes of RICO because plaintiffs have not produced any evidence showing that these defendants or which defendants committed these acts.

See *18 U.S.C. § 1961(1)(B)*. Plaintiffs have therefore demonstrated a genuine issue of material fact as to whether the defendant associations **[*27]** engaged in a pattern of racketeering activity. See *18 U.S.C. § 1962(c)*.

A genuine issue of material fact also exists as to whether John Tarantino committed two predicate acts. Tarantino allegedly attempted and conspired to commit extortion in violation of the *Hobbs Act*. See *18 U.S.C. § 1951(a)*. Tarantino's direct connection with the associations, and his service as a central contact person between the associations, indicates that he conspired to extort defendants in violation of the *Hobbs Act*. See McHenry Dep. at 142; Whaley Dep. at 57. In addition, Tarantino refused to sell ice to J&S through his company, Polar Ice, in connection with Morgan and Morgan Fish Co., following J&S' purchase of Dooley's crab. See Schach Decl. P11. A reasonable juror could conclude that Tarantino's refusal to sell ice to J&S constitutes an attempt to commit extortion in violation of the *Hobbs Act*. Because both acts are considered indictable offenses under the *Hobbs Act*, a genuine issue of material fact exists as to whether Tarantino committed two predicate acts for purposes of RICO. See *18 U.S.C. § 1962(c)*. While **[*28]** plaintiffs have properly demonstrated that Morgan, Morgan Fish Co., Maclean, the defendant associations and Tarantino committed two predicate acts, they have not presented sufficient evidence to demonstrate that any other defendant engaged in two predicate acts for purposes of RICO. [14] See *18 U.S.C. § 1961(5)*.

Defendants also argue that plaintiffs' alleged pattern of racketeering lacks continuity. ***HN9***[] In order to establish a pattern of racketeering activity, a plaintiff must also demonstrate a "relationship" between the predicate acts and a "threat of continuing activity." *H.J. Inc., v. Northwestern Bell Telephone Co., 492 U.S. 229, 239, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989).* **[*29]** A plaintiff may establish a threat of continuing activity "if the related predicates themselves involve a distinct threat of long-term racketeering activity, either implicit or explicit," even if the number of related predicate acts is small and if they occur close together in time. *Id. at 242*. In this case, defendants allegedly engaged in "tie-ups" and threatened crab purchasers not only during the 2001 season, but also in previous years. Further, defendants did not confine these threats to plaintiffs. They allegedly threatened to "blackball" Three Captains during the 1999 season and later threatened Richard Axelson and J&S for engaging in crab sales during the November 2001 "tie-up." The threat of long-term, continuous racketeering activity against Dooley, J&S, Schach, Axelson, and others is at least implicit in defendants' acts. Construing this evidence in a light most favorable to the nonmoving party, the court concludes that plaintiffs' RICO claim does not fail for lack of continuity.

3. Standing

Defendants argue that plaintiffs' only recoverable damages are the loss of plaintiffs' crab pots and gear, and that plaintiffs have failed to demonstrate that the **[*30]** associations or any of the individual defendants were involved in the cutting of plaintiffs' crab pot lines. As a result, defendants allege that plaintiffs do not have standing to bring a RICO claim because they cannot show that defendants injured their business or property. ***HN10***[] In order to sue for a violation of RICO, a plaintiff must have been injured "in his business or property" by reason of the RICO violation. *18 U.S.C. 1964(c)*. Whaley allegedly damaged plaintiffs' crab gear. Plaintiffs suffered financial losses for the season due to the cost of replacing that gear and the inability to fish until they were able to replace it. Defendants' threats to crab purchasers and to customers of crab purchasers may have resulted in financial loss to plaintiffs' business as well. As a result of these alleged acts, plaintiffs suffered financial losses. These financial losses demonstrate injury to plaintiffs' business and property sufficient to survive a motion for summary judgment

B. RICO Conspiracy Under *Section 1962(d)*

Plaintiffs also allege that defendants conspired to violate *section 1962(c)*, which is itself a violation of *RICO section 1962(d)*. **[*31]** *18 U.S.C. § 1962(d)*. ***HN11***[] Under *section 1962(d)*, "a conspirator must intend to further an endeavor which, if completed, would satisfy all of the elements of a substantive criminal offense." *Salinas, 522 U.S.*

---

[14] While plaintiffs have presented evidence that Jim Salter, Michael McHenry, and Todd Whaley committed a single predicate act, in order to be liable under *section 1962(c)*, each of these defendants must have committed at least two predicate acts within ten years. See *18 U.S.C. § 1961(5)*.

52, 65, 139 L. Ed. 2d 352, 118 S. Ct. 469 (1997). For purposes of conspiracy liability, a plaintiff is not required to show that each defendant agreed to commit two predicate acts. Id.; United States v. Frega, 179 F.3d 793, 810 n.21 (9th Cir. 1999). Rather, the defendant "must have been aware of the essential nature and scope of the criminal enterprise and intended to participate in it." Howard v. America Online Inc., 208 F.3d 741, 751 (9th Cir. 2000) (citing Baumer v. Pachl, 8 F.3d 1341, 1346 (9th Cir. 1993)) (internal quotation marks omitted).

As stated above, plaintiffs have sufficiently demonstrated, for purposes of a motion for summary judgment, that defendants were involved in an enterprise which engaged in a pattern of racketeering activity. Plaintiffs have put forward evidence that several of the defendants participated in the enterprise and engaged in acts to further the purpose of the enterprise. These acts include the aforementioned predicate **[*32]** acts, as well as the following overt acts:

> Defendant Maclean threatened Larry and Mary Fortado that Three Captains would be blackballed if they purchased scab crab;
> Defendant Bettencourt and others refused to sell to Three Captains after they purchased crab from Dooley;
> Defendant Whaley as well as members of the associations allegedly conspired to and were involved in cutting the lines to the Caitlin Ann's crab pots;
> Tarantino served as a central contact person between the associations and, in connection with Morgan, refused to sell ice to J&S following Dooley's sale of crab to J&S; and
> Defendant Maclean blocked the transient dock in order to prevent Dooley from docking in Half Moon Bay to deliver crab to Exclusive Fresh.

Plaintiffs have put forward sufficient evidence, through the declarations of Larry and Mary Fortado, Schach and Dooley, as well as the depositions of Whaley, McHenry and others, to raise a genuine issue of material fact as to whether these acts occurred. Based on the aforementioned predicate acts and these overt acts, a reasonable factfinder could conclude that the associations, Morgan, Morgan Fish Company, Inc., Maclean, Whaley, **[*33]** Salter, McHenry, Bettencourt, and Tarantino conspired to further an endeavor to prevent plaintiffs and other individuals who did not participate in the "tie-up" from engaging in the crab business within the greater San Francisco Bay Area. In contrast, plaintiffs have not raised a genuine issue of material fact with respect to the conspiracy claim in regard to defendants Miller, Collins, Wise and Boos because they have not put forward evidence demonstrating that these defendants intended to further the conspiracy.

C. Claim for Violation of Section 2 of the Sherman Act

The associations, joined by Whaley, also contend that this court should grant summary judgment in their favor with regard to plaintiffs' claim that defendants violated section 2 of the Sherman Act. **HN12**[] Section 2 of the Sherman Act prohibits monopolization, attempts to monopolize, and conspiracies to monopolize any part of trade or commerce in a particular state. 15 U.S.C. § 2. [15] In order to succeed on a claim of actual monopolization, a plaintiff must demonstrate that the defendant willfully acquired or maintained monopoly power in the relevant market through anticompetitive conduct. Verizon Communications, Inc. v. Law Offices of Curtis V. Trinko LLP, 540 U.S. 398, 157 L. Ed. 2d 823, 124 S. Ct. 872, 878-79 (2004) **[*34]** (citing United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)); American Prof'l Testing Serv. v. Harcourt Brace Jovanovich Legal & Prof'l Publs., Inc., 108 F.3d 1147, 1151 (9th Cir. 1997). In order to succeed on a claim of attempted monopolization, a plaintiff must demonstrate that the defendant engaged in anticompetitive conduct with a specific intent to monopolize and had a dangerous probability of achieving monopoly power. Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993); see also Thurman Indus., Inc. v. Pay'N Pak Stores, Inc., 875 F.2d 1369, 1378 (9th Cir. 1989). Under either claim, a plaintiff must demonstrate that the anticompetitive conduct caused antitrust injury. Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421, 1433 (9th Cir. 1995).

---

[15] Section 4 of the Clayton Act provides a private right of action for violations of section 2 and allows the plaintiff, in such an action, to recover treble damages. 15 U.S.C. § 15.

[*35] 1. Relevant Market

HN13[] Under either a claim for monopolization or a claim for attempted monopolization, a plaintiff must set forth both the relevant product and geographic markets that defendants have endeavored to monopolize. *Spectrum Sports, Inc., 506 U.S. at 459*. The relevant product market includes "the pool of goods or services that enjoy a reasonable interchangeability and a cross-elasticity of demand." *Morgan, Strand, Wheeler & Biggs, 924 F.2d 1484, 1489 (9th Cir. 1991)*. The relevant geographic market is defined by "the area of effective competition where buyers can turn for alternate sources of supply." *Id. at 1490*. The definition of the relevant market--both product and geographic--is generally a question of fact reserved for the jury. *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)*; see also *Oahu Gas Serv., Inc. v. Pac. Resources Inc., 838 F.2d 360, 363 (9th Cir. 1988)* ("Our previous decisions establish that both market definition and market power are essentially questions of fact.").

Plaintiffs contend that the product market is limited to crab caught in **[*36]** the San Francisco Bay Area between November 15th and December 1st. Plaintiffs have presented evidence demonstrating that crab caught in the San Francisco Bay Area is fuller, firmer, and more flavorful than crab caught in other areas, and that fresh crab is not reasonably interchangeable with frozen crab. Caito Decl., P3; Dooley Decl., P11. While plaintiffs have alleged that demand for fresh crab peaks between November 15th and December 1st, they have failed to present any evidence that crab caught during this period differs from crab caught later in the season. Based on this evidence, a reasonable factfinder could not determine that the relevant product market was limited to crab caught between November 15th and December 1st, but could conclude that relevant product market is fresh crab caught in the San Francisco Bay Area.

Plaintiffs contend that the relevant geographic market is limited to the greater San Francisco Bay Area, which includes San Francisco Bay, Half Moon Bay, and Bodega Bay. Defendants argue that consumers can turn to other sources of supply for crab, including the Crescent City/Eureka area, Oregon and Washington. The crab season in these northern areas does not open **[*37]** until December 1st. Therefore, crab caught in the North does not compete with local San Francisco crab caught during the November 15th to December 1st time period. Defendants also argue that certain Native American tribes compete with San Francisco Bay Area crab fishermen for sales by fishing in the North prior to November 15th and shipping the crab by truck to San Francisco. In contrast, plaintiffs have presented evidence that crab caught in the San Francisco Bay Area is superior to crab caught in other areas, and that customers prefer and will pay more for crab caught in the San Francisco Bay Area. Dooley Decl. P11. In addition, the industry segregates and markets crab caught in the San Francisco Bay Area as a branded product. Caito Decl. P4. Based on this evidence, plaintiffs have demonstrated a genuine issue of material fact as to whether the relevant geographic market is limited to crab caught in the San Francisco Bay, Half Moon Bay, and Bodega Bay areas.

2. Monopoly Power

HN14[] Plaintiffs must also show that the defendant has monopoly power within the relevant market. *15 U.S.C. § 2*. The question of whether monopoly power exists depends heavily upon market **[*38]** share and barriers to entry. *Oahu Gas Serv., Inc., 838 F.2d at 366*; see also *Rebel Oil, 51 F.3d at 1437*. A lesser showing of market power is required in an attempt case than in an actual monopolization case. [16] *Rebel Oil, 51 F.3d at 1438*. Entry barriers are "factors in the market that deter entry while permitting incumbent firms to earn monopoly returns." *Id. at 1439*. In order to demonstrate sufficient barriers to entry, "the plaintiff must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price." *Id.*

[16] A market share of less than 50% in an actual monopolization case, and a market share of less than 30% in an attempted monopolization case, will generally be deemed insufficient. *Rebel Oil, 51 F.3d at 1438*.

Plaintiffs have demonstrated that a genuine issue of material fact exists with regard to defendants' **[*39]** monopoly power. Plaintiffs have presented evidence that association members owned and operated 289 of approximately 300 vessels in the District 10 fleet. Dooley Decl. at P7; Sheer Decl., Exhs. Q, U, V, W, and X. This amounts to a 96% market share, and it is well within the range that would allow defendants to exercise actual monopoly power over the local San Francisco fresh crab market. In addition, plaintiffs have put forward sufficient evidence to create a genuine issue of material fact as to barriers to entry. Plaintiffs have presented evidence that defendants prevented non-local fishermen, including Dooley, from selling crab to local buyers during the tie-ups. Bruno Decl. at P7; Dooley Decl. at P12. They have also presented evidence that defendants encouraged local buyers not to purchase crab from fishermen during the tie-ups. Bruno Decl. at P6; L. Fortado Decl. at P5; Scach Decl. at P6. Based on the evidence of defendants' market share and barriers to entry, a reasonable factfinder could determine that defendants have acquired monopoly power within the relevant market.

3. Anticompetitive Conduct

HN15[] A violation of the *Sherman Act* also requires a showing of anticompetitive conduct. **[*40]** *Verizon Communications, Inc., 124 S. Ct. at 879*. While competition among rivals does not violate the *Sherman Act*, a reduction of competition which harms consumer welfare does contravene the Act. *Rebel Oil, 51 F.3d at 1433* ("An act is deemed anticompetitive under the *Sherman Act* only when it harms both allocative efficiency *and* raises the prices of goods above competitive levels or diminishes their quality."). Thus, a plaintiff must demonstrate a "significant and more-than-temporary harmful effect on competition," not just on a competitor or consumer. *American Prof'l Testing, 108 F.3d at 1151*; see also *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (9th Cir. 1993)* ("Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws; those laws do not create a federal law of unfair competition or 'purport to afford remedies for all torts committed by or against persons engaged in interstate commerce.'"); *Oahu Gas Serv., 838 F.2d at 370* ("The goal of antitrust laws, however, unlike that of **[*41]** business tort or unfair competition laws, is to safeguard general competitive conditions, rather than to protect specific competitors."). Therefore, it is necessary to consider defendants' conduct not only as it relates to plaintiffs, but also as it impacts consumers and competition overall. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. A company engages in predatory behavior when it attempts to "exclude rivals on some basis other than efficiency."*Id.* Thus, exclusionary conduct includes behavior that not only tends to impair the opportunities of rivals, but also fails to further competition or furthers competition in an unnecessarily restrictive manner. *Id. at 605 n.32* (citations omitted).

Plaintiffs have demonstrated a genuine issue of material fact as to whether defendants' alleged conduct is anticompetitive and may have a long-term harmful effect on competition. Defendants engaged in tie-ups that restrained the sale of crab. They also allegedly organized and participated in boycotts of consumers who purchased crab from fishermen not participating in the tie-ups, including Three Captains and J&S. **[*42]** See L. Fortado Decl. at PP5, 7; Schach Decl. at P12. Furthermore, defendants allegedly threatened fishermen and purchasers and committed tortious acts, including cutting Dooley's crab pot lines. See Schach Decl. at P6; L. Fortado Decl. at P5; Dooley Decl. at PP16, 21. These allegations, if true, would have harmed competition by preventing crab from reaching market at a competitive price, by intentionally harming those consumers that purchased crab during the tie-ups, and by attempting to keep northern fishermen who only fished for crab in the relevant market between November 15th and December 1st from competing with local fishermen. Plaintiffs have thus raised a genuine issue of material fact as to whether defendants intended to acquire monopoly power.

4. Antitrust Injury

HN16[] In order to recover under the *Sherman Act*, a plaintiff must demonstrate antitrust injury. *Rebel Oil, 51 F.3d at 1433*; *Gray v. Shell Oil Co., 469 F.2d 742, 748-49 (9th Cir. 1972)*. To prove antitrust injury, plaintiffs must prove that their loss flowed from the defendants' anticompetitive conduct. *Rebel Oil, 51 F.3d at 1433*. The conduct that causes the **[*43]** injury must also adversely affect competition. *Id.* Plaintiffs have demonstrated sufficient evidence of antitrust injury. In particular, plaintiffs have proffered evidence that they incurred approximately $ 218,000 in damages as a result of the losses associated with the cutting of their crab pot lines. Sheer Decl., Exh. Y. Defendants' anticompetitive conduct also caused their injury. Plaintiffs have presented evidence that defendants intended to exclude non-local fishermen from fishing in District 10 and engaged in the tie-ups in order to keep these fishermen out of the relevant market. Dooley Decl. at P21; Whaley Dep. at 47; Cannia Dep. at 33. Based on this evidence, a reasonable factfinder could conclude that defendants cut plaintiffs crab pot lines in order to exclude Dooley from competing with defendants. Such conduct adversely affects competition by limiting the crab available to consumers and thus driving up the price of crab.

5. Standing

While neither Caitlin Ann's crewmembers nor Dooley, as an individual, have standing to bring an antitrust action against defendants, Caitlin Ann LLC does have standing. **HN17**[] In order to maintain an antitrust action, the injured party must **[*44]** be a participant in the same market as the defendants. *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538, 540 (9th Cir. 1987)*. While sellers of the crab are considered part of the same market as defendants, individual crewmembers of fishing vessels are not. *See id.* The crewmembers lack standing to bring an antitrust action.

Dooley also lacks standing to sue in his capacity as an individual or as a shareholder of Caitlin Ann LLC. **HN18**[] "A shareholder of a corporation injured by an antitrust violation does not have standing to sue." *Vinci v. Waste Management, Inc., 80 F.3d 1372, 1375 (9th Cir. 1996)*. "This rule applies even if the injured shareholder is the sole shareholder or if the shareholder alleges that the antitrust violations were intended to drive the individual out of the industry." *Id.* (citations omitted).

D. Claim for Violation of *Section 1 of the Sherman Act*

HN19[] *Section 1 of the Sherman Act* prohibits parties from entering into agreements and conspiracies that unreasonably restrain trade. *15 U.S.C. § 1*; *Copperweld Corp. v. Independent Tube Corp., 467 U.S. 752, 767-68, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. **HN20**[] Courts analyze agreements or **[*45]** conspiracies to restrain trade under either the "per se rule" or the "rule of reason." *Thurman Indus., 875 F.2d at 1373*. Courts evaluate concerted activity under *section 1* more rigorously than under *section 2*, and may hold that certain agreements are so inherently anticompetitive that they are illegal per se without further inquiry into the harm they have actually caused. *Copperweld Corp., 467 U.S. at 768*.

Plaintiffs have raised a genuine issue of material fact as to whether defendants' conduct is per se illegal under *section 1 of the Sherman Act* because defendants fixed prices and attempted to exclude competing fishermen from the market. [17] **[*47]** *Local 36 of Int'l Fishermen & Allied Workers of America v. United States, 177 F.2d 320 (9th Cir 1949)*, presents a set of facts highly analogous to the present situation. In that case, a fishermen's cooperative conspired to fix and maintain noncompetitive prices for fresh fish and to exclude non-cooperative members from the market. *Id. at 327*. The cooperative used coercive means to accomplish these objectives, including the use of picketing, boycotting and unconcealed threats **[*46]** of violence and pressure. *Id. at 328*. The Ninth Circuit held that "where a complaint charges that defendants have engaged in price fishing, or have concertedly refused to deal with nonmembers of an association . . . the amount of commerce involved is immaterial because such restraints are per se illegal." *Id. at 331*. The court concluded not only that the conspiracy to fix prices constituted a per se violation of *section 1*, but also that the exclusion of other fishermen from the market violated the statute. *Id. at 331*. [18]

---

[17] Because the court concludes that a reasonable factfinder could find that defendants' acts were per se illegal, the court need not engage in a "rule of reason" analysis. *See Local 36 of Int'l Fishermen & Allied Workers of America, 177 F.2d at 331*. The court notes in addition that plaintiffs have demonstrated a genuine issue of material fact under the rule of reason analysis, because a jury could conclude that defendants' anticompetitive conduct restrained competition within the relevant market. See *Thurman Indus., 875 F.2d at 1373*; *Morgan, Strand, Wheeler & Biggs, 924 F.2d at 1489*.

[18] Other cases have also held that associations of fishermen that combined to fix the price of fish violated *section 1 of the Sherman Act*. See e.g., *Hinton v. Columbia River Packers Ass'n, Inc., 131 F.2d 88, 89 (9th Cir. 1942)* (holding that a union of fishermen violated *section 1* by combining to fix the price of fish and control the sale of fish because such actions deprived consumers of "the advantages which accrue to them from free competition in the market"); *Manaka v. Monterey Sardine Ind.,*

Like the fishermen's cooperative in *Local 36*, the CBOA, FMABB and HMBFMA combined and voted to fix the price of crab. They also allegedly engaged in "tie-ups" designed to increase the price of crab in the market, and used both unconcealed threats and violence to exclude plaintiffs from the market. In particular, **[*48]** defendants allegedly threatened plaintiffs and their customers, and cut plaintiffs crab pot lines. A reasonable jury could find that these acts constitute per se violations of *section 1 of the Sherman Act* because they deprive consumers of fair prices for crab and adversely affect competition within the fresh crab market. [19]

[*49] E. State Antitrust Claims

Defendants claim that plaintiffs' state ***antitrust law*** claim under *section 16750* of the California Business and Professions Code (the "Cartwright Act") fails for the same reasons the federal antitrust claim fails. ***HN21***[] "The Cartwright Act is patterned after the *Sherman Act*, and 'federal cases interpreting the *Sherman Act* are applicable to problems arising under the Cartwright Act.'" *Nova Designs, Inc. v. Scuba Retailers Ass'n, 202 F.3d 1088, 1092 (9th Cir. 2000)* (citing *Marin County Bd. of Realtors v. Palsson, 16 Cal. 3d 920, 130 Cal. Rptr. 1, 549 P.2d 833 (1976))*. Neither party contends that the analysis under state ***antitrust law*** differs from the analysis under the *Sherman Act*. Thus, defendants' motion for summary judgment in regard to plaintiffs' *section 16750* claim fails for the same reasons stated by the court in sections I(C) and I(D).

F. *California Business and Professions Code Section 17200* Claim

Defendants claim that plaintiffs have not presented any evidence indicating that they engaged in "unfair, unlawful or fraudulent" business practices in violation of *section 17200* of the California Business **[*50]** and Professions Code. ***HN22***[] "*Section 17200* borrows violations from other laws by making them independently actionable as unfair competitive practices." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* (citing *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999))*. An action may also be deemed unfair even if it does not amount to a violation of some other law. *Id.* Defendants argue that plaintiffs' *section 17200* claim fails because plaintiffs have not presented sufficient evidence to support either its RICO or federal antitrust claims or otherwise demonstrated that defendants engaged in unfair business practices. They also argue that the damages requested by plaintiffs are not recoverable under *section 17200*. Plaintiffs claim a total of $ 218,292 in compensatory damages as a result of not being able to fish due to the cutting of their crab pot lines. ***HN23***[] Under California's Unfair Competition Laws, damages are limited to restitution. *Id. at 1144*. Thus, even if plaintiffs could demonstrate a genuine issue of material fact as to defendants' violation of *section 17200*, their request for compensatory **[*51]** relief would not be recoverable. The court therefore grants defendants motion for summary judgment as to plaintiffs *section 17200* claim.

G. State Tort Claims

Inc., 41 F. Supp. 531, 534 (N.D. Cal. 1941) (Fee, J.) (holding that an association of sardine fishermen could be held liable under the antitrust laws for fixing the price at which sardines were to be sold and excluding non-local competitors from the market).

[19] Defendants claim that they are not liable under *section 1 of the Sherman Act* because the activity of the associations should be considered the activity of a single firm under the Fisherman's Collective Marketing Act ("FCMA"), *15 U.S.C. §§ 521-22*. Defendants cite *Maryland and Virginia Producers Assoc., Inc. v. United States, 362 U.S. 458, 4 L. Ed. 2d 880, 80 S. Ct. 847 (1960)*, for the proposition that they should not be liable under that Act. While that Act does give individual fishermen joining in a cooperative or association the same rights as other business entities, it does not provide them with immunity for antitrust violations. *Maryland and Virginia Producers Assoc., 362 U.S. at 466-67* ("In the event that associations authorized by this bill shall do anything forbidden by the *Sherman Antitrust Act*, they will be subject to the penalties imposed by that law."). Nor does it allow them to join collectively so as to use a monopoly position to suppress competition. *Id. at 472* ("We hold that the privilege the *Capper-Volstead Act* grants producers to conduct their affairs collectively does not include a privilege to combine with competitors so as to use a monopoly position as a lever further to suppress competition by and among independent producers and processors."); see also *Hinton v. Columbia River Packers Ass'n, Inc., 131 F.2d 88, 89 (9th Cir. 1942)* (holding that fishermen acting together as a union to fix prices were not exempt from *section 1 of the Sherman Act* by virtue the FCMA).

Plaintiffs bring four state tort claims: (1) intentional interference with contractual relations; (2) intentional interference with prospective economic advantage; (3) conversion; and (4) trespass to chattels. The court will address each in turn.

1. Intentional Interference With Contractual Relations

Plaintiffs claim that defendants unlawfully and intentionally interfered with their contract with Exclusive Fresh. ***HN24***[] Intentional interference with contractual relations requires that the plaintiff demonstrate (1) a valid contract between the plaintiff and a third party; (2) defendants knowledge of the contract; (3) intentional acts designed to induce breach or disrupt the contractual relationship; (4) actual breach or disruption of the relationship; and (5) resulting damage. *Pacific Gas and Electric Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587 (1990)*. While plaintiffs have demonstrated that they had a contract with Exclusive Fresh and that defendants interfered with this contract, **[*52]** see Bruno Decl. at PP2, 7, they have not presented evidence of damages flowing from the loss of the contract. With regard to damages, plaintiffs' evidence is limited to damages suffered as a result of lost crab pots and gear. See Sheer Decl., Exh. Y. These damages do not relate directly to the breach of plaintiffs' contract with Exclusive Fresh. Plaintiffs have failed to demonstrate a genuine issue of material fact as to this claim because they have not presented sufficient evidence of resulting damages. Therefore, the court grants defendants' motion for summary judgment on plaintiffs' claim for intentional interference with contractual relations.

2. Intentional Interference with Prospective Economic Advantage

Plaintiffs claim that defendants intentionally interfered with plaintiffs prospective sales of crab in the San Francisco Bay Area. ***HN25***[] Intentional interference with prospective economic advantage requires (1) an existing economic relationship or one containing the probability of future economic benefit; defendants' knowledge of the relationship; (2) acts designed to disrupt the relationship; (3) actual disruption of the relationship; and (4) damages proximately caused **[*53]** by the defendants. *Accuimage Diagnostics Corp. v. Terarecon, Inc.. 260 F. Supp. 2d 941, 956 (N.D. Cal. 2003)* (Patel, J.) (citing *Della Penna v. Toyota Motor Sales, U.S.A., 11 Cal. 4th 376, 380 n.1, 391-92, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995))*. A plaintiff must demonstrate that defendants' conduct was wrongful by some legal measure; it is not sufficient to prove merely interference itself. *Della Penna, 11 Cal. 4th at 393*. A plaintiff may prove that a defendants' conduct was independently wrongful by presenting evidence that defendants' actions fell outside of the realm of legitimate business transactions. *Gemini Aluminum Corp. v. California Custom Shapes, Inc., 95 Cal. App. 4th 1249, 1258, 116 Cal. Rptr. 2d 358 (Cal. Ct. App. 2002)*. In this case, plaintiffs have presented sufficient evidence upon which a reasonable factfinder could conclude that defendants engaged in wrongful acts by participating in coercive tie-ups; threatening prospective customers, fishermen and others; and utilizing allegedly violent tactics to pressure competitors to abide by prices set by the associations. Furthermore, defendants intentionally interfered with plaintiffs' contract with Exclusive **[*54]** Fresh. However, while plaintiffs have produced evidence that they suffered damages as a result of the cutting of their crab pot lines, they have presented no evidence of damage to prospective economic relationships. Plaintiffs have failed to demonstrate a genuine issue of material fact as to this claim. Thus, the court grants defendants' motion for summary judgment with respect to plaintiffs' claim for intentional interference with prospective economic advantage.

3. Conversion & Trespass to Chattels

Defendants argue that they are not liable for conversion or trespass to chattels because plaintiffs have not demonstrated that any of the associations or individual defendants were responsible for cutting plaintiffs' crab pot lines. In order to succeed on a claim of conversion, a plaintiff must demonstrate that defendants actually interfered with plaintiffs' dominion or control over her property. 5 Bernard E. Witkin, Summary of California Law § 610 (9th ed. 1990). Trespass to chattels, although rarely applied in California, requires a plaintiff to show that defendants' intentional interference with personal property proximately caused injury. Id. at § 627(A). In this case, **[*55]** plaintiffs have presented evidence that Whaley cut plaintiffs crab pot lines. Whaley Dep. at 50-51; Cannia Dep. at 38, 39; Sheer Decl., Exh. Z. Plaintiffs suffered financial losses as a result of losing their crab gear. Sheer Decl., Exh. Y. Based on this evidence, a reasonable factfinder could conclude that Whaley is liable for either conversion or trespass to chattels. Plaintiffs have not demonstrated that any other defendant involved in this suit proximately caused plaintiffs injuries stemming from the cutting of plaintiffs' crab pot lines. Thus, the court denies defendants' motion for summary judgment with respect to Whaley and grants defendants' motion with respect to all other defendants.

II. HMBFMA's Counterclaims

HMBFMA alleges that counterdefendants engaged in unlawful or unfair business practices pursuant to the California Unfair Competition Act ("UCA"), *Cal. Bus. & Prof. Code § 17200 et seq.*, by (1) engaging in predatory pricing in violation of *section 17043* of the California Business and Professions Code; and (2) procuring a permit for a fishing vessel equipped with a trawling net in violation of *section 8280.1* of the California **[*56]** Fish and Game Code. [20]

A. Predatory Pricing

HN26[] To succeed on a claim of predatory pricing under *section 17043* of the California Business and Profession Code, a plaintiff must prove both that the seller (1) sold its product below cost, and (2) had the purpose of injuring competitors or destroying competition. *Cal. Bus. & Prof. Code § 17043*. To meet the cost requirement, the vendor must have sold below his or her own fully allocated or fully distributed cost. *Turnbull & Turnbull v. ARA Transp., Inc., 219 Cal. App. 3d 811, 819-20, 268 Cal. Rptr. 856 (1990)*. Cost includes the cost of raw materials, labor and all overhead expenses. *Cal. Bus. & Prof. Code § 17026* **[*57]** . Overhead expenses include labor, rent, interest on borrowed capital, depreciation, selling cost, maintenance of equipment, deliver costs, credit losses, all types of licenses, taxes, insurance and advertising. *Cal. Bus. & Prof. Code § 17029*. California's fully allocated cost standard includes both fixed and variable costs attributable on an average basis to each unit of output. *Pan Asia Venture Capital Corp. v. Hearst Corp., 74 Cal. App. 4th 424, 432, 88 Cal. Rptr. 2d 118 (Cal. Ct. App. 1999)*. Stated simply, cost includes "the initial expense of producing the article together with its share of the load of carrying on the business through which it is sold."*Id.* Determination of cost is an issue of fact. Id. To meet the purpose requirement, the vendor "must act with the purpose, i.e., the desire, of injuring competitors or destroying competition." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 175, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Where the plaintiff proves both below cost sales and injurious effect, the court may infer an intent to injure competitors or destroy competition. *Cal. Bus. & Prof. Code § 17071* **[*58]** . ***HN27***[] Whether the sale was "conducted with the purpose of injuring competitors" and "had the tendency or capacity to injure the plaintiff" are usually questions of fact. *Fisherman's Wharf Bay Cruise Corp. v. Superior Court, 114 Cal. App. 4th 309, 327, 7 Cal. Rptr. 3d 628 (Cal. Ct. App. 2003)*.

While HMBFMA has presented evidence that counterdefendants sold crab below cost, they have not raised a genuine issue of material fact as to whether counterdefendants intended to injure competitors or destroy competition. Counterdefendants claim that for the years 1999 to 2001, the Caitlin Ann sold crab for a profit, earning $ 108,166.68 in 1999, $ 45,820.55 in 2000, and $ 20,845.53 in 2001. In response, HMBFMA has presented evidence that counterdefendants did not include all fixed costs in their expenses related to fishing for crab because Dooley believed the primary business to be pollock fishing in Alaska, and only intended to operate the vessel in the crab fishery to earn a profit above variable costs. Dooley Decl. P6. HMBFMA has presented evidence that counterdefendants operated at a loss, based on their fully-allocated cost, for the years 1999 to 2001. Greene Decl. P3, Exh. C. HMBFMA's evidence **[*59]** suggests that counterdefendants' variable and allocated fixed costs exceeded revenues by $ 16,670 in 1999, $ 50,223 in 2000 and $ 81,371 in 2001. Id. HMBFMA's estimation of costs appears to be reasonable.

Even if HMBFMA's figures are correct, however, a reasonable juror could not determine that counterdefendants engaged in predatory pricing because HMBFMA has not presented sufficient evidence to show that counterdefendants intended to injure competitors or destroy competition. While intent may be presumed from below cost sales and evidence of an injurious effect on competition, HMBFMA has presented no evidence that counterdefendants were capable of injuring competition. See *Cal. Bus. & Prof. Code § 17071*. HMBFMA claims that

[20] In defendants' opposition papers, HMBFMA states that it no longer intends to pursue its claim that Dooley fished in a wantonly wasteful and destructive manner in 1999 or that he threatened to harm and actually did harm defendants' fishing gear by trawling of the coast off Central California.

counterdefendants injured competition by depleting the ocean of available crab. While they have put forward evidence that counterdefendants sold approximately 150,000 pounds of crab over the course of a three-year period (1999 to 2001), Greene Decl., Exh. B, they have not shown that this amount of crab constitutes a substantial amount of market share. In fact, counterdefendants have demonstrated that they had only a negligible **[*60]** market share within the San Francisco crab market and that they only fished for crab during the beginning of the season. Dooley Decl. at PP4, 7. Even if the court were to assume that counterdefendants sold all of the crab caught between 1999 and 2001 below cost, HMBFMA has failed to show how this would negatively impact competition. Caitlin Ann is only one boat out of three hundred, and there are, of course, other crabs in the sea. Because HMBFMA has not demonstrated that counterdefendants were capable of injuring competitors or destroying competition they have not raised a genuine issue of material fact in regard to their predatory pricing claim. [21]

[*61] B. Violation of Permit Requirements

HN28[] A business practice violates the UCA if it violates another provision of California law. [22] **[*62]** *Stop Youth Addiction, Inc. v. Lucky Stores, Inc., 17 Cal. 4th 553, 560, 71 Cal. Rptr. 2d 731, 950 P.2d 1086 (1998)*. HMBFMA alleges that counterdefendants engaged in unlawful business practices when they violated *section 8280.1* of the California Fish and Game Code by procuring and renewing a permit for Dungeness crab with a vessel that was equipped with a trawling net. [23] HMBFMA also alleges that counterdefendants transferred the permit from Dooley to Caitlin Ann LLC in violation of *section 8280.1*. A Dungeness crab permit may be issued to someone with a commercial fishing license that has not been suspended or revoked who is, "at the time of application, the owner of a fishing vessel that is not equipped for trawling with a net." *Cal. Fish & Game Code § 8280.1(b)(3)*. A fisherman may have only one Dungeness crab permit, and that permit is nontransferable. Id.

HMBFMA has not produced sufficient evidence to create a genuine issue of material fact with regard to whether counterdefendants violated *section 8280.1*. In its previous order, the court ordered HMBFMA to submit declarations explaining the reasonable basis for its unlawful business practices allegations. HMBFMA's has produced a declaration by Duncan Maclean, in which he states that he observed the Caitlin Ann was equipped with a trawl net. Maclean Decl. at P5. Neither the United States Coast Guard documents attached to Maclean's declaration nor the California Fish and Game Records submitted by Dooley support HMBFMA's claim that counterdefendants violated the statute. Maclean Decl., Exh. 7; Dooley Decl., Exh. 1. HMBFMA has presented no other evidence that the vessel was equipped with a trawl net at the time Dooley applied for the permit for the Caitlin Ann. [24] Therefore, HMBFMA has not demonstrated a genuine issue of material fact in regard **[*63]** to whether Dooley procured or renewed a permit in violation of *section 8280.1*.

---

[21] In their moving papers, counterdefendants argued that any below cost sales were made in a good faith effort to meet the price of competitors. See *Cal. Bus. & Prof. Code § 17050(d)*. The Court need not address this defense in light of the conclusion that HMBFMA has failed to demonstrate a genuine issue of material fact with regard to its predatory pricing claim.

[22] *Section 17200* also prohibits unfair business practices. *Cal. Bus. & Prof. Code § 17200*. HMBFMA has not demonstrated that counterdefendants' conduct was unfair within the meaning of the statute because they have not presented any evidence that counterdefendants' alleged procuring of a permit or transferring of that permit threatened an incipient violation of the antitrust laws or violated the policy or spirit of the law in a way that is comparable to a violation of the law or otherwise significantly threatened or harmed competition. See *Cel-Tech Communications, Inc., 20 Cal. 4th at 187*.

[23] It is undisputed that the Caitlin Ann had a Dungeness crab permit, issued by the Department of Fish and Game, for 1999, 2000 and 2001. Dooley Decl., Exh. 1.

[24] As this court noted in its prior order:

> To the extent HMBFMA alleges that counterdefendants' crab fishing without a valid permit was an unlawful business practice, this is not a separate cognizable claim. *Section 8280.1* does not prohibit fishing for crab with a vessel that has a trawl net. The unlawful business practice at issue is procuring a permit for a vessel that at the time has a trawl net, in violation of *section 8280.1*.

Furthermore, HMBFMA has not demonstrated a genuine issue of material fact as to whether Dooley unlawfully transferred the permit. They allege that the permit was originally issued to Dooley and that the permit must have been illegally transferred to the Caitlin Ann LLC, based on the statement in plaintiffs' complaint that "Caitlin Ann is the registered owner of the fishing vessel F/V CAITLIN ANN." Dooley is the managing member of the Caitlin Ann LLC. HMBFMA has not presented any evidence that **[*64]** Dooley and Caitlin Ann LLC are separate entities for purposes of the permit. Even if HMBFMA had presented such evidence, such a distinction would not alter the fact that the Dooley had a valid permit to fish for Dungeness Crab with the Caitlin Ann for the years 1999, 2000 and 2001. HMBFMA has not presented sufficient evidence to demonstrate that counterdefendants violated*section 8280.1 of the California Fish and Game Code*. Therefore, HMBFMA has not raised a genuine issue of material fact as to whether counterdefendants violated *section 17200* of the California Business and Professions Code. [25]

CONCLUSION

Defendants' motions for summary judgment are GRANTED in part and DENIED in part. Counterdefendants' motion for summary judgment is GRANTED. In particular, the court holds as follows:

1. Defendants' motions for summary judgment **[*65]** with respect to plaintiffs' claim that defendants violated *section 1962(c) of Title 18 of the United State Code* are GRANTED with respect to Todd Whaley, Jim Salter, Robert N. Miller, Michael McHenry, David Bettencourt, Larry Collins, William Wise, and George Boos. The motions are DENIED with respect to CBOA, FMABB, HMBFMA, John Morgan, Morgan Fish Company, Inc., Michael McHenry, and John T. Tarantino.

2. Defendants' motions for summary judgment with respect to plaintiffs' claim that defendants violated *section 1962(d) of Title 18 of the United State Code* are GRANTED with respect to Robert N. Miller, Larry Collins, William Wise, and George Boos. The motions are DENIED with respect to all other defendants.

3. Defendants' motions for summary judgment with respect to plaintiffs' *Sherman Act* claims are DENIED with respect to all defendants.

4. Defendants' motions for summary judgment on plaintiffs' *California Business and Professions Code sections 17043and 17200* claims and on plaintiffs' claims for intentional interference with contract and prospective economic advantage are GRANTED with respect to all defendants.

5. Defendants' motions **[*66]** for summary judgment on plaintiffs' conversion and trespass to chattels claims are DENIED with respect to Todd Whaley and GRANTED with respect to all other defendants.
6. Counterdefendants' motion for summary judgment is GRANTED with respect to all of HMBFMA's counterclaims.

IT IS SO ORDERED.

Dated: April 26, 2004

Headnotes/Summary

Headnotes

Courts--Jurisdiction.--Proceeding to invalidate certain actions undertaken by municipalities dismissed insofar as it alleged violation of federal ***antitrust law*** since federal antitrust claims are within exclusive jurisdiction of federal courts.

Monopolies--Donnelly Act.--Proceeding to invalidate certain actions undertaken by municipalities dismissed insofar as it alleged violation of state ***antitrust law***, known as Donnelly Act (*General Business Law § 340 et seq.*) since petitioners failed to state cause of action for violation of Donnelly Act; action taken by municipalities, consisting of enactment of particular ordinance, was purely unilateral and thus was not accomplished by means of essential statutorily proscribed "contract, agreement, arrangement or combination."

Counsel: ANTHONY J. EMMI, GRAND ISLAND, FOR PETITIONERS-APPELLANTS.

BENNETT, DI FILIPPO & KURTZHALTS, EAST AURORA (DAVID S. WHITTEMORE OF COUNSEL), FOR RESPONDENTS-RESPONDENTS.

Judges: Present--Green, J.P., Wisner, Hurlbutt, Kehoe and Lawton, JJ.

Opinion

[*1185] [687]** Appeal from a judgment (denominated order) of the Supreme Court, Erie County (Robert E. Whelan, J.), entered December 5, 2002 in a proceeding pursuant to *CPLR article 78*. The judgment granted respondents' motion for summary judgment dismissing the petition.

It is hereby ordered that the judgment so appealed from be and the same hereby is unanimously affirmed without costs.

Memorandum: Petitioners commenced this *CPLR article 78* proceeding seeking to invalidate certain actions undertaken by two municipalities on the ground that the actions violated **[**688]** federal and state ***antitrust law***. Petitioners appeal from a judgment granting the motion of respondents for summary judgment dismissing the petition on the merits and with prejudice. In addition, Supreme Court in its written decision concluded "that respondents **[***2]** are [permitted] to enact such ordinances as are necessary to limit electrical inspection and certification services to a single entity such as the New York Board of Fire Underwriters."

We conclude that the court properly granted that part of respondents' motion for summary judgment dismissing the petition insofar as it alleges a violation of federal ***antitrust law***, but for a different reason. ***HN1***[] Federal antitrust claims are within the **[*1186]** exclusive jurisdiction of the federal courts (*see Marrese v American Academy of Orthopaedic Surgeons, 470 U.S. 373, 379-380, 84 L. Ed. 2d 274, 105 S. Ct. 1327 [1985], reh denied 471 U.S. 1062 [1985]*; *Freeman v Bee Mach. Co., 319 U.S. 448, 451 n 6, 87 L. Ed. 1509, 63 S. Ct. 1146 [1943], reh denied 320 U.S. 809, 88 L. Ed. 489, 64 S. Ct. 27 [1943]*; *General Inv. Co. v Lake Shore & Mich. S. Ry. Co., 260 U.S. 261, 286-288, 67 L. Ed. 244, 43 S. Ct. 106, 1 Ohio Law Abs. 162 [1922]*; *Simpson Elec. Corp. v Leucadia, Inc., 72 N.Y.2d 450, 456-458, 530 N.E.2d 860, 534 N.Y.S.2d 152 [1988]*; *Capital Tel. Co. v Pattersonville Tel. Co., 81 A.D.2d 970, 971, 439 N.Y.S.2d 759 [1981], affd 56 N.Y.2d 11, 436 N.E.2d 461, 451 N.Y.S.2d 11 [1982]*; *Theatre Confections v Andrea Theatres, 126 A.D.2d 969, 511 N.Y.S.2d 744 [1987]*). Although the issue was not raised by the litigants or addressed **[***3]** by the court, we address the exclusively federal nature of the claim sua sponte inasmuch as it goes to the subject matter jurisdiction of the court (*see Matter of Fry v Village of Tarrytown, 89 N.Y.2d 714, 718, 680 N.E.2d 578, 658 N.Y.S.2d 205 [1997]*; *Matter of Reis v Zimmer, 263 A.D.2d 136, 144, 700 N.Y.S.2d 609 [1999], amended 270 A.D.2d 968, 710 N.Y.S.2d 259 [2000]*; *see generally CPLR 3211 [a] [2]*).

We further conclude that the court properly granted that part of respondents' motion for summary judgment dismissing the petition insofar as it alleges a violation of state ***antitrust law***, known as the Donnelly Act (*General Business Law § 340 et seq.*), but again for a different reason. Petitioners have failed to state a cause of action for violation of the *Donnelly Act* (*see CPLR 3211 [a] [7]*; *North Atl. Util. v Keyspan Corp., 307 A.D.2d 342, 343, 762 N.Y.S.2d 820 [2003]*, *lv denied 1 N.Y.3d 503, 807 N.E.2d 893, 775 N.Y.S.2d 780 [2003]*; *Pharmacists' Assn. of W. N.Y. v Blue Cross of W. N.Y., 112 A.D.2d 728, 729, 492 N.Y.S.2d 221 [1985]*). *General Business Law § 340 (1)* provides that ***HN2***[] "[e]very contract, agreement, arrangement or combination" is illegal **[***4]** and void insofar as it establishes and maintains a monopoly or restrains competition or trade. We conclude that the action taken by each of the municipalities in this case, consisting of the enactment of a particular ordinance, was purely unilateral and thus was not accomplished by means of the essential statutorily proscribed "contract, agreement, arrangement or combination" (*id.*; *see State of New York v Mobil Oil Corp., 38 N.Y.2d 460, 464, 344 N.E.2d 357, 381 N.Y.S.2d 426 [1976]*; *see also Hall Heating Co. v New York State Elec. & Gas Corp., 180 A.D.2d 957, 958, 580 N.Y.S.2d 528 [1992]*; *Pharmacists' Assn. of W. N.Y., 112 A.D.2d at 729*; *cf. Englert v City of McKeesport, 872 F.2d 1144, 1149-1152 [1989]*, *cert denied 493 U.S. 851, 107 L. Ed. 2d 108, 110 S. Ct. 149 [1989]* [interpreting analogous provisions of federal ***antitrust law*** in circumstances identical to those at bar]). We note that ***HN3***[] the statutory term "arrangement," like the statutory terms "contract," "agreement," and "combination," refers to bilateral conduct and does not connote "a one-sided practice" **[**689]** such as that challenged by petitioners in this case (*Mobil Oil Corp., 38 N.Y.2d at 464*).

In view of our determination, **[***5]** we do not address the parties' **[*1187]** remaining contentions.

Present--Green, J.P., Wisner, Hurlbutt, Kehoe and Lawton, JJ.

Harrison Aire, Inc. v. Aerostar Int'l, Inc.

United States District Court for the Eastern District of Pennsylvania

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN1[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A parent company and its wholly owned subsidiary are incapable of conspiring with each other for antitrust purposes.

Transportation Law > Air & Space Transportation > Airships, Balloons & Blimps

Transportation Law > Air & Space Transportation > Aviation Certificates > Airworthiness Certificates

Transportation Law > Air & Space Transportation > Maintenance & Safety

Transportation Law > Air & Space Transportation > US Federal Aviation Administration > Authorities & Powers

HN2[] **Air & Space Transportation, Airships, Balloons & Blimps**

The language of Federal Aviation Administration (FAA) regulations makes clear the FAA has created a mechanism by which third-parties can be approved to manufacture and sell replacement parts for hot air balloons. The Federal Rules of Aviation do not mandate that replacement fabric has to be of the same manufacture as the balloon, nor could any manufacturer impose such a requirement in their Instructions for Continued Airworthiness manuals (ICAs), given that the ICAs need not be followed strictly by their owners.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

HN3[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. An issue is "genuine" if the evidence is such that a reasonable jury could return a verdict for the non-moving party. A factual dispute is "material" if it might affect the outcome of the case under governing law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN4[] **Summary Judgment, Burdens of Proof**

A party seeking summary judgment always bears the initial responsibility for informing the district court of the basis for its motion and identifying those portions of the record that it believes demonstrate the absence of a genuine issue of material fact.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN5[] **Entitlement as Matter of Law, Genuine Disputes**

On a motion for summary judgment, where the non-moving party bears the burden of proof on a particular issue at trial, the moving party's initial burden can be met simply by pointing out to the district court that there is an absence of evidence to support the non-moving party's case. After the moving party has met its initial burden, the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN6[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment is appropriate if the non-moving party fails to rebut by making a factual showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN7[] **Summary Judgment, Entitlement as Matter of Law**

Under *Fed. R. Civ. P. 56*, the court must view the evidence presented on the motion in the light most favorable to the opposing party.

Governments > Legislation > Statute of Limitations > General Overview

HN8[] **Regulated Practices, Private Actions**

A plaintiff's claim is viable under the federal antitrust provisions only if suit is commenced within four years after the cause of action accrued, *15 U.S.C.S. § 15(b)*, plus any additional number of years during which the statute of limitations is tolled. Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

To succeed on a fraudulent misrepresentation claim, the plaintiff must demonstrate that the defendants fraudulently concealed their own unlawful activities and that the plaintiff did not discover these facts despite the exercise of due diligence.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN10[] **Statute of Limitations, Time Limitations**

Generally, a cause of action accrues - and the statute of limitations begins to run - when a defendant commits an act that injures a plaintiff.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Governments > Legislation > Statute of Limitations > Extensions & Revivals

Governments > Legislation > Statute of Limitations > Time Limitations

HN11[] **Regulated Practices, Private Actions**

In the context of a continuing antitrust violation, each time a plaintiff is injured by the act of the defendant, a cause of action accrues to the plaintiff to recover damages caused by that act. However, a suit may be brought more than four years after the events that initially created the cause of action if the defendant commits an act that by its very nature constitutes a "continuing antitrust violation." An act constitutes a "continuing antitrust violation" if it injures the plaintiff over a period of time. ***Antitrust law*** provides that in the case of a continuing antitrust violation each overt act that is part of the violation and that injures the plaintiff, starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times. A new cause of action may arise from later overt acts in furtherance of a challenged conspiracy or from each injury resulting from a continuing violation. However, to trigger a new cycle of the limitations period, the overt act must specifically affect the plaintiff and not be merely a continuation of the conspiracy. If the plaintiff suffered injury at the beginning of the continuing conspiracy but not thereafter, the plaintiff may not enjoy the benefits of an extended limitations period.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN12[] **Regulated Practices, Private Actions**

In the context of a continuing antitrust violation, each overt act starts the statutory period running again regardless of the plaintiff's knowledge of the alleged illegality at much earlier times.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN13[] **Exemptions & Immunities, Parker State Action Doctrine**

The doctrine of implied immunity arises where an alleged violator of the law has acted pursuant to congressional or regulatory authority that conflicts with conduct alleged to be in violation of the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN14[] Exemptions & Immunities, Parker State Action Doctrine

An express exemption to antitrust liability exists wherever Congress explicitly states that the antitrust laws will not apply to the conduct authorized by the legislation, either in general, or under the specific circumstances enumerated in the legislation. By contrast, where a Congressional statute mandates certain behavior, but omits to exempt the behavior expressly from the purview of the antitrust laws, an exemption might need to be implied in order to preserve Congress's regulatory intentions.

HN15[] Banking Law, Regulators

Defendants have a heavy burden to prove an implied immunity. Implied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system. Implied antitrust immunity is restricted only to the activity challenged, and will not extend to conduct otherwise overseen by the regulatory agency. In conformance with these principles, while the United States Supreme Court has recognized implied immunity from certain prosecutions under the antitrust laws, the Court has steadfastly held that the Federal Aviation Act does not completely displace the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] Exemptions & Immunities, Parker State Action Doctrine

Only where Congress has invested pervasive supervisory authority in a regulatory agency should a court conclude that Congress intended to ease liability under the Sherman Act.

Business & Corporate Law > ... > Actual Authority > Implied Authority > General Overview

HN19[] Exemptions & Immunities, Parker State Action Doctrine

Immunity is implied only where the challenged conduct is subject to a regulatory scheme that expressly directs the agency to consider antitrust policies in the context of the regulated industry.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Business & Corporate Law > ... > Actual Authority > Implied Authority > General Overview

Governments > Federal Government > US Congress

Business & Corporate Law > ... > Authority to Act > Actual Authority > General Overview

HN20[] Exemptions & Immunities, Parker State Action Doctrine

A defendant wishing to invoke implied antitrust immunity must demonstrate that the regulatory agency was authorized by Congress to consider the anticompetitive implications of its actions and enact regulations that essentially "trumped" the antitrust laws. Under those circumstances, Congress intended the regulatory scheme to operate as a more refined, but functionally equivalent, substitute for the standard antitrust regime, and that to penalize the challenged conduct would be an invasion of the regulatory agency's competence.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN21[] Exemptions & Immunities, Parker State Action Doctrine

Antitrust immunity is not conferred by the bare fact that defendants' activities might be controlled by an agency having broad powers over their conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN22[] Monopolies & Monopolization, Actual Monopolization

The offense of monopoly under *15 U.S.C.S. § 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN23[] Sherman Act, Claims

In order to prevail on an attempted monopolization claim under the Sherman Act, a plaintiff must prove that the defendant (1) engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize and with (3) a dangerous probability of achieving monopoly power. In order to determine whether there exists a dangerous probability of achieving monopoly power, a court must inquire into the relevant product and geographic market and the defendant's economic power in that market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN24[] Monopolies & Monopolization, Attempts to Monopolize

A monopolist, or person attempting to monopolize, can be found liable in regard to distribution of its own product if it is (1) illegally attempting to destroy competition by refusing to deal or (2) controlling an essential service or bottleneck.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN25[] Summary Judgment, Entitlement as Matter of Law

Conclusory statements, hearsay, and testimony based merely on conjecture or subjective belief are not competent summary judgment evidence.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN26[] Monopolies & Monopolization, Actual Monopolization

In the context of a monopoly claim, it is the reasonable perception of the purchasers in the marketplace that are relevant in determining interchangeability.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN27[] Monopolies & Monopolization, Actual Monopolization

In the context of a monopoly claim, a plaintiff's proposed relevant market in a unique and non-interchangeable derivative product or service cannot be defeated on summary judgment by a defendant's assertion that the proposed derivative market is cross-elastic with the primary market, if there is a reasonable possibility that the defendant's assertion about cross-elasticity is factually incorrect.

Opinion

[*188] *MEMORANDUM*

Baylson, J.

April 30, 2004

I. Jurisdiction, Procedural Background, and Summary

Plaintiff Harrison Aire, Inc., an owner and operator of hot air balloons, filed this action on March 12, 2002, alleging that Defendants Aerostar International, Inc. and Raven Industries, Inc. (Aerostar's corporate parent) operated their hot air balloon business in violation of *Sections 1and 2* of the federal antitrust laws. *15 U.S.C. §§ 1* &*2*. Plaintiff also makes state law allegations of fraud and negligence. This Court has jurisdiction over Plaintiff's claims under *28 U.S.C. §§ 1331*,*1332*, and*1337* and *15 U.S.C. § 15*. Venue is proper under *28 U.S.C. § 1391(b)*. Presently before the Court is Defendants' Motion for Summary Judgment **[**2]** (Docket No. 12). The Court held oral argument on January 27, 2004, and the parties submitted supplemental briefs on April 2, 2004.

Defendants move for summary judgment on three grounds. For the reasons which follow, Defendants' motion will be granted, and the Court summarizes its rulings as follows:

One: Defendants' contention that Plaintiff's antitrust claim is barred by the four-year statute of limitations applicable to antitrust claims is rejected as presenting an issue of fact. (*See infra* pp. 27-32.)

Two: Defendants claim that summary judgment is warranted upon application of implied immunity to Plaintiff's antitrust claims is rejected as a matter of law. (*See infra* pp. 33-46.)

Three: Defendants argue that Plaintiff cannot succeed in proving the requisite elements for its antitrust, fraud, or negligence claims, thus justifying summary judgment against Plaintiff. The Court concludes that Plaintiff has not adduced sufficient facts to warrant a trial on its antitrust claims and the Court will grant summary judgment for Defendants, as to Counts I and II. (*See infra* pp. 46-67.)

II. Factual Background

A. Description of Parties and Ballooning Industry [1] **[**3]**

Plaintiff Harrison Aire, Inc. is a New Jersey corporation in the business of providing commercial balloon hot air rides, aircraft maintenance, and pilot training for hot air balloons and fixed wing aircraft. (Defs.' Undisputed Facts P2.) Its sole owner and proprietor is Terry Harrison. [2] **[**5]** **[**4]** **[*189]** Defendant Aerostar International, Inc. is a hot air balloon manufacturer located in South Dakota. Aerostar International is a wholly owned subsidiary of Raven Industries. [3] Raven Industries preceded Aerostar International in the manufacture of hot air balloons, but formed

---

[1] The record on Defendants' Motion consists of excerpts of depositions of Plaintiff's President, Defendants' employees, three Federal Aviation Administration officials, and three other witnesses with experience in the hot air balloon industry. Defendants have submitted excerpts of their hot air balloon maintenance manuals, some correspondence between the FAA and a third party (Ronald DiGiovanni), a recent company newsletter, and a letter subsequently sent to the newsletter's mailing list that listed corrections to the newsletter. Defendants also have filed two affidavits both sworn by Mark West, President of Aerostar. Plaintiff has submitted an actuarial-economic consultants' report. Plaintiff has not filed any affidavit.

[2] Mr. Harrison has been involved in aviation for several decades. He holds a variety of licenses and certifications qualifying him to fly hot air balloons and fixed wing aircraft. Mr. Harrison is a former flight engineer and co-pilot for Eastern Airlines. He is a licensed FAA Airframe and Powerplant mechanic with inspection authority. This certification authorizes him to perform maintenance work on many types of aircraft, including hot air balloons. He served ten years as an accident prevention counselor and designated pilot examiner. (Harrison Dep., Defs.' Ex. B, at 12-16; Defs.' Undisputed Facts P3.)

Aerostar International in 1986 for the purposes of undertaking the hot air balloon aspect of the company's business. (*Id.* P6.) Raven Industries has not manufactured hot air balloons since February 1986; rather, Aerostar International, as its wholly owned subsidiary, has fulfilled that role. (Compl. P14.) During the 1970s and 1980s, Harrison Aire purchased hot air balloons for its flight operations from Raven Industries, and subsequently from Aerostar Industries.

Hot air balloons are comprised of three principal components: the basket (which contains the balloon's instruments and occupants); the fuel and heater system (which produces the hot air); and the envelope (which contains the hot air). (Compl. P10.) With use and age, balloon envelopes deteriorate, with the top hemisphere of the envelope deteriorating much more quickly than the lower hemisphere. (*Id.* P12.) After approximately 300-500 hours of use (actual mileage may vary), because of this deterioration, at least the upper portion of the envelope must be replaced in order to continue piloting safely. (*Id.*) This replacement typically extends the life of the envelope for another 200-300 hours. (*Id.*) In general, replacement of **[**6]** the fabric in the upper hemisphere of the envelope is significantly less costly than replacement of the entire envelope. Because of design and wear patterns, replacement of up to 80% of the envelope fabric (somewhat more than the top half of the envelope) is generally most practical and economical. (*Id.* P13.)

B. Federal Regulations Applicable to Hot Air Ballooning

At the heart of this case are issues regarding replacement fabrics for the envelope for Raven/Aerostar hot air balloons. Although these issues were present in the 1980s, the present case centers on events beginning in late 1995 or early 1996. Plaintiff needed to buy replacement fabric for one of its Raven/Aerostar balloons, and believed the balloon's accompanying manual restricted its abilities to purchase replacement fabric. The plaintiff contends that the defendants issued fraudulent statements that purportedly required the users and owners of Defendants' hot air balloons to buy replacement fabric from the defendants, whose fabric was more expensive than third-party fabric. The defendants, on the other hand, assert that federal regulations did require that owners of Raven/Aerostar hot air balloons had to **[**7]** purchase replacement fabric from either Defendants or a limited number of entities that made replacement fabric in satisfaction of Defendants' standards. Thus, in **[*190]** understanding the regulatory parameters of this case, the Court first sets out the federal regulations at issue.

1. Manufacturer-Provided Instructions for Balloon Owners: Instructions for Continued Airworthiness and Airworthiness Limitations Section

Ballooning in the United States is regulated by the Federal Aviation Administration, which has promulgated regulations - the Federal Aviation Regulations or the Federal Rules of Aviation ("FARs") - that apply *inter alia* to the replacement of balloon envelope fabric. The regulations generally require that major balloon repairs, such as the replacement of significant areas of envelope fabric, be performed by a repairman or mechanic certified by the FAA. Since 1980, FAA regulations require balloon manufacturers to publish a maintenance manual for their product; this manual is known as "Instructions for Continued Airworthiness" ("ICA"). *14 C.F.R. § 31.82*. [4] **[**9]** *Section 31.82* provides:

> The applicant must prepare Instructions for Continued **[**8]** Airworthiness in accordance with Appendix A to this part that are acceptable to the Administrator. The instructions may be incomplete at type certification if a program exists to ensure their completion prior to delivery of the first balloon or issuance of a standard certificate of airworthiness, whichever occurs later.

---

[3] Although no suggestion has been made that Aerostar and Raven have conspired to violate the antitrust laws, the Court notes that ***HN1***[] a parent company and its wholly owned subsidiary are incapable of conspiring with each other for antitrust purposes. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

[4] The regulations cited within this section have been in effect since 1980 or earlier.

Id. [5] A hot air balloon manufacturer must provide this model-specific ICA to each purchaser of its product. *14 C.F.R. § 21.50*. *Section 21.50* provides in pertinent part:

> (b) The holder of a design approval, including either the type certificate or supplemental type certificate for an aircraft . . . shall furnish at least one set of complete Instructions for Continued Airworthiness, prepared in accordance with [§ 31.82] to the owner of each type of aircraft . . . upon its delivery, or upon issuance of the first standard airworthiness certificate for the affected aircraft, whichever occurs later, and thereafter make those instructions available to any other person required by this chapter to comply with any of the terms of these instructions.

Id.

Generally, the maintenance standards and procedures specified in the ICA are permissive in nature ("FAA accepted") in that maintenance personnel may substitute other "FAA accepted" maintenance standards and procedures. *14 C.F.R. § 43.13*. *Section 43.13* provides in relevant part:

> (a) Each person performing maintenance, alteration, or **[**10]** preventive maintenance on an aircraft, engine, propeller, or appliance shall use the methods, techniques, and practices prescribed in the current manufacturer's maintenance manual or Instructions for Continued Airworthiness prepared by its manufacturer, *or other methods, techniques, and* ***[*191]*** *practices acceptable to the Administrator, except as noted in § 43.16. . . .*
>
> (b) Each person maintaining or altering, or performing preventive maintenance, shall do that work in such a manner and use materials of such a quality, that the condition of the aircraft, airframe, aircraft engine, propeller, or appliance worked on will be at least equal to its original or properly altered condition . . . .

Id. (emphasis added).

However, if a manufacturer or the FAA chooses to require a particular maintenance standard or procedure, that particular standard or procedure must be published in a separate and distinct portion of the ICA, known as the Airworthiness Limitations Section ("ALS"). Part A31.4 of Appendix A to Part 31 - Instructions for Continued Airworthiness defines the ALS portion and specifies how the manufacturer should present the ALS to the balloon owner. Part A31.4 reads: **[**11]**

> The Instructions for Continued Airworthiness must contain a section titled Airworthiness Limitations that is segregated and clearly distinguishable from the rest of the document. This section must set forth each mandatory replacement time, structural inspection interval, and related structural inspection procedure, including envelope structural integrity, required for type certification. If the Instructions for Continued Airworthiness consist of multiple documents, the section required by this paragraph must be included in the principal manual. This section must contain a legible statement in a prominent location that reads: *"The Airworthiness Limitations section is FAA approved and specifies maintenance required under §§ 43.16 and 91.403 of the Federal Aviation Regulations."*

Id. (emphasis added). In contrast to an ICA's maintenance standards, which may be replaced by other "FAA accepted" maintenance procedures, maintenance personnel are required to adhere strictly to the provisions of an Airworthiness Limitations Section, if one exists. *14 C.F.R. § 43.16*. *Section 43.16* states in relevant part, "Each person performing an inspection or **[**12]** other maintenance specified in an Airworthiness Limitations section of a manufacturer's maintenance manual or Instructions for Continued Airworthiness shall perform the inspection or other maintenance in accordance with that section . . . ." *Id.*

---

[5] The aircraft manufacturer holds the "type certificate" for the aircraft, which constitutes the FAA's approval of the design of the aircraft. (Pl.'s Undisputed Facts P49.) The FARs establish the procedure for securing type certification for new aircraft designs, from the manufacturer's own analysis and testing of the design to the FAA's review of those engineering data before determining airworthiness. *14 C.F.R §§ 21.11-21.53*. "Every aircraft that's out there with an airworthiness that's flying around needs to be type certificated or receive a type certificate from the FAA, essentially saying that the design complies with the airworthiness regulation." (Michalik Dep., Pl.'s Ex. D & Defs.' Ex. G, at 9.)

2. Replacement Parts for Hot Air Balloons

The FAA also has instituted a regulatory scheme that governs the manufacture and sale of replacement parts. When the FAA approves an aircraft, it issues a type certificate under Part 23 of its regulations. *14 C.F.R §§ 21.11-21.53*. For example, as a type certificate would be for the whole aircraft (*e.g.*, Waligunda Dep., Pl.'s Ex. F, at 21) [6], Defendants would hold the type certificate for each of their separate hot air balloon designs. The FAA must also approve modifications to a particular aircraft, whether designed by the original manufacturer or a third-party, after which the FAA issues a supplemental type certificate ("STC"). *14 C.F.R. § 21.113*. An STC would enable its holder to manufacture a component or a part for a balloon system, e.g., a balloon envelope. (Waligunda Dep., **[*192]** Pl.'s Ex. F, at 20; DiGiovanni Dep., Pl.'s Ex. B, at **[**13]** 26-27.) Any person, in addition to the original manufacturer, may petition the FAA for a Parts Manufacturer Approval ("PMA"), which allows the holder to manufacture and sell specific replacement parts directly to aircraft owners. *14 C.F.R. § 21.303* ("No person may produce a modification or replacement part for sale for installation on a type certificated product unless it is produced pursuant to a Parts Manufacturer Approval . . . ."). A PMA covers a part, such as the balloon fabric itself. (Waligunda Dep., Pl.'s Ex. F, at 21; DiGiovanni Dep., Pl.'s Ex. C, at 27-28.)

The Court concludes **[**14]** that ***HN2***[] the regulatory language makes clear the FAA has created a mechanism by which third-parties can be approved to manufacture and sell replacement parts for hot air balloons. The FARs do not mandate that replacement fabric has to be of the same manufacture as the balloon, nor could any manufacturer impose such a requirement in their ICAs, given that the ICAs need not be followed strictly by their owners. The Court presumes that were a hot air balloon manufacturer to place such restrictions in its ALS, which is not the case here, the balloon's owner then would be obligated to follow that language.

In this case, Defendants' ICA purportedly implied that only replacement parts approved for use by Raven/Aerostar could be used in repairing Raven/Aerostar hot air balloons. [7] As stated above, there is no requirement in the FARs that replacement envelope material be tested in accordance with the *manufacturer's* standards. In fact, before Defendants even published their ICA, the FAA already had set forth its own standards for strength and safety, *14 C.F.R. §§ 31.21-31.27*, which must be met by all manufacturers and replacement parts manufacturers, including holders **[**15]** of STCs and PMAs. As the parties have not submitted copies of Defendants' ALS and as the parties have focused their arguments on perceptions surrounding Defendants' ICA, the Court presumes that any and all allegedly offensive, restrictive language is contained in the ICA and that there are no restrictions on third-party fabric whatsoever in Defendants' ALS.

C. Chronology of Events

1. Plaintiff's Business

[16]** Harrison Aire is a corporation which derives its income from selling hot air balloon rides to members of the general public. (Harrison Dep., Defs.' Ex. B, at 28.) In the late 1970s, Mr. Harrison purchased his first Raven-made balloon. (Harrison Dep., Pl.'s Ex. H, at 154.) In 1986, he purchased the "Big Ride" balloon from Defendants.

---

[6] Robert Waligunda was a distributor for Defendants for a number of years. Defendants terminated him allegedly because he "blew the whistle" regarding Defendants' purportedly deceptive manual. (Waligunda Dep., Pl.'s Ex. F, at 66.) Mr. Waligunda is an experienced hot air balloonist, having been involved in the industry for thirty-five years and having logged over 5000 hours in flight. (*Id.* at 19-20.)

[7] Mr. Waligunda testified that sometime before May 1982, concerned that its competitors would produce replacement envelopes for Raven balloons, Raven allegedly "made [its] manual stronger" by seemingly telling Raven owners that they had to buy Raven fabric exclusively. (Waligunda Dep., Pl.'s Ex. F, at 17-19.) Because only the manual's ICA portion was changed - a non-mandatory section - Raven knew that its customers would remain technically free to purchase third-party parts; Raven allegedly hoped, though, that the limitation would appear mandatory to the uneducated person. (*Id.* at 24.)

(Actuarial-Economic Consultants Report, Pl.'s Ex. A, at 2.) [8] Since 1986, Plaintiff has had five or six conversations with Defendants' agents about the language in their ICAs restricting **[*193]** third-party fabric, and each time Defendants responded with the same "buy our fabric" answer. (Harrison Dep., Pl.'s Ex. H, at 159-61.) In the late 1980s, having considered the venture, Mr. Harrison decided not to enter the replacement fabric business himself. (Harrison Dep., Defs.' Ex. D & Pl.'s Ex. I, at 48-49.)

[17]** Plaintiff's "Big Ride" balloon needed repairs to its envelope in 1995, which would have extended the life expectancy of the balloon another ten years. (Pl.'s Undisputed Facts, P8; Defs.' Undisputed Facts P8.) Plaintiff earlier had stockpiled sufficient amounts of Defendants' balloon fabric (purchased at 50% of cost from Raven/Aerostar distributors) for use when any of his balloon envelopes became unairworthy (Defs.' Undisputed Facts P7), but had exhausted his stockpiled resources when his "Big Ride" balloon required repairs. (*Id.* P8; Harrison Dep., Defs.' Ex. B, at 112-13.) Plaintiff claims it could not afford to purchase Defendants' fabric at this time, and instead investigated buying less-expensive third-party parts. (Harrison Dep., Defs.' Ex. C, at 35; Harrison Dep., Defs.' Ex. D, at 67.) According to Robert Waligunda, a former Raven/Aerostar distributor, Defendants' fabric was more expensive than any other fabric on the market. (Waligunda Dep., Pl.'s Ex. F, at 67.)

Plaintiff long had criticized Defendants' ICA for purportedly implying that only replacement parts approved for use by Raven/Aerostar could be used in repairing Raven/Aerostar hot air balloons. In meetings with **[**18]** Defendants and their representatives, Mr. Harrison frequently inquired whether this policy had changed and was repeatedly informed that Defendants' stance remained firm. Regarding Plaintiff's interaction with Raven in particular, Mr. Harrison's deposition proceeded as follows:

> Q. What was your particular complaint to Raven then if you didn't believe it was misleading? What was your particular complaint?
> A. The complaint was if - if the manufacturer is providing or a supplier is providing the same material to Raven, and it's available directly at half the cost to someone else, same fabric, and the same factory is saying, "We make it for Raven, and the same specs coming off the same mills, the same run, the same colors and everything. We'll provide it to you directly."
> Q. Would it be - go ahead. You finish.
> A. And Raven said, "No. You can't do that."
> . . .
> Q. Did you ever get any resolution of that issue that you took with Raven from Raven?
> A. No.

(Harrison Dep., Pl.'s Ex. H, at 157-58.) Regarding Plaintiff's interaction with Aerostar in particular, Mr. Harrison's deposition proceeded as follows:

> Q. When you received your first Aerostar **[**19]** manual, did it have the same type of provision regarding replacement fabric that you complained about with Raven?
> A. Yes.
> . . .
> Q. Do you remember what your specific complaint to [Aerostar] was?
>
> A. I had two or three items, maintenance items that I wanted to discuss that I was having problems with. Then when I brought those items up, I just want to see if their position was still the same on the fabric. . . . So there's probably been through the years five or six conversations that I had over other things, and at the end I always said, "By **[*194]** the way, has your position on fabrics changed?"
> Q. And the answer was?
> A. "As long as you buy the fabric, we don't care what you do," basically. The emphasis, "buy the fabric."
> Q. In any event, is it fair to say that you registered the complaint with Aerostar at its inception or shortly thereafter, within a year or two, that you did with Raven and didn't get any change

---

[8] The Court cites this expert report, which is not sworn testimony but is undisputed in the record, to connect Plaintiff's retired "Big Ride" balloon to Defendants. The parties have not identified - and the Court has not located - any sworn testimony that links Plaintiff's balloon with Defendants.

A. Correct.

Q. Okay. And that particular complaint, and correct me if I'm wrong, but the particular complaint was that the manual required you to purchase fabric from Aerostar or Raven before it and only Aerostar or Raven before it?

A. **[**20]** Correct.

(*Id.* at 159-62.)

In 1995, there were only three possible purveyors for fabric sales: Defendants (the manufacturer); Custom Nine Designs, run by Ronald DiGiovanni; [9] and Head Balloons; [10] these were the only lawful market options available to Harrison Aire. (Defs.' Undisputed Facts PP9-10.) Mr. Harrison met with Mr. DiGiovanni in 1995 or 1996 to discuss purchasing replacement fabric for Plaintiff's Raven/Aerostar balloons. (*Id.* P11.) Plaintiff decided not to purchase Mr. DiGiovanni's fabric - which was "much cheaper" than Defendants' own (Waligunda Dep., Pl.'s Ex. F, at 28) - concluding that any purchase would conflict with the Defendants' ICA restrictions on third-party fabric, even though Plaintiff knew the FAA had certified Mr. DiGiovanni to produce and sell Raven/Aerostar fabric. (Defs.' Undisputed Facts PP12-14; Harrison Dep., Defs.' Ex. B, at 124-28.) Mr. Harrison provided two reasons for not purchasing Mr. DiGiovanni's fabric, notwithstanding Mr. DiGiovanni's apparent FAA authorization to sell the replacement parts: One, that Mr. DiGiovanni could not confirm that his fabric was "equal to or better" than Defendants' fabric, as Mr. Harrison believed **[**21]** Defendants' manual required (Harrison Dep., Defs.' Ex. B, at 127); and two, that Mr. DiGiovanni was involved in a "bait and switch" ruse in which he had secured FAA approval with one product, but then switched the product with a substandard "knock off," selling the shoddy substitute to unknowing, less discerning customers (Harrison Dep., Defs.' Ex. D, at 36-37).

Without replacement fabric, Plaintiff retired the "Big Ride" balloon in 1996, never to use **[**22]** it again commercially (Defs.' Undisputed Facts P17), and Plaintiff seeks damages for the alleged inability to use it, due to Defendants' misconduct.

In 2001 or 2002, Plaintiff noticed that the Defendants' manual specifically allowed for third-party replacement fabric, mentioning only that STC holders (but not PMA holders) may repair Raven/Aerostar hot air balloons. (Pl.'s Undisputed Facts P35.) [11]

[23] [*195] 2. Defendants' Business**

Defendants manufacture and sell hot air balloons, cold air inflatables, helium inflatables, remote control blimps, inflatable costumes and mascots, and specialty sewn products. http://www.aerostar.com. In 1981, Raven first made replacement fabric specifically for a competitor's balloon. (Waligunda Dep., Pl.'s Ex. F, at 11.) [12] In 1982, Raven

---

[9] In 1994, Ron DiGiovanni started Custom Nine Designs, a competitor of Defendants authorized by the FAA to sell replacement fabric for certain balloons manufactured by Defendants. (Waligunda Dep., Pl.'s Ex. F, at 26.) The record includes excerpts of Mr. DiGiovanni's deposition.

[10] Head Balloons joined the market in approximately 1984. (West Aff. of Nov. 2003 P13.) Head Balloons, run by Tarp Head and based in Georgia, has an STC to produce replacement fabric. (Waligunda Dep., Pl.'s Ex. F, at 21-22.) There is no testimony in the record from Head Balloons.

[11] According to Plaintiff's Statement of Undisputed Facts, "[Mr.] Harrison has testified that he did not realize that he was not required to use Aerostar fabric until [Mr.] DiGiovanni told him about the result in *Braden's [Balloons]*." (*Id.* P84.) *Braden's Balloons* is discussed below at Section II.C.3. However, the Court notes that Plaintiff fails to cite any testimonial evidence supporting this contention, and upon independently reviewing the excerpts of Mr. Harrison's depositions submitted to the Court, the Court concludes that the record does not support this assertion. Notwithstanding this discrepancy, the relevant date for purposes of this Motion, as discussed below in the "Statute of Limitations" section, is the date on which Defendants removed their allegedly restrictive ICA language and not the date on which Plaintiff actually learned about third-party fabric alternatives.

[12] The parties dispute whether Raven's decision conflicted with a gentlemen's agreement among balloon manufacturers not to produce replacement parts for a competitor's product. (Pl.'s Mem. at 5; Defs.' Reply Mem. at 4; *see also* Waligunda Dep., Pl.'s Ex. F, at 13.)

introduced new language into its balloon owners' manual that required owners either to buy replacement fabric from Raven itself or to secure Raven's approval in advance if purchasing third-party fabric. (Waligunda Dep., Pl.'s Ex. F, at 18-19.) Plaintiff complained to Raven, some time before 1986, about the ICA language. (Harrison Dep., Pl.'s Ex. H, at 156-58.) Raven formed Aerostar International in 1986 for the purposes of taking over the hot air balloon aspect of Raven's business. Raven Industries has not manufactured hot air balloons since February 1986; rather, Aerostar International, as its wholly owned subsidiary, has fulfilled that role. (Compl. P14.) After the inception of Aerostar, the Defendants' ICA language read as follows:

> *WARNING*
>
> Only fabric which has been tested and approved according **[**24]** to AEROSTAR (Raven) factory standards may be used for repair of AEROSTAR (Raven) envelopes. *Failure to comply with this requirement constitutes a departure from type design and renders the balloon unairworthy*.

(Defs.' Supplemental Ex. B.) [13]

In 1993, Defendants revised the language in their ICAs. (West Aff. of Nov. 2003 P9.) In 1993, the ICA language read as follows, in pertinent part:

> **6.0 STANDARD PROCEDURES FOR REPAIR AND REPLACEMENT**
> . . .
>
> **WARNING**
>
> **Improper repairs will render the aircraft unairworthy until repaired properly.**
>
> *****
>
> Likewise, repair/replacement materials must be obtained from Aerostar to be considered a "certified part". **[**25]** In the event that repair materials are obtained, the supplying company or the repair station performing the repair must act to "certify" the material and part as equal to or better than the original equipment. [14]
> . . .
>
> **[*196] 6.1.2 Fabric Repair and Replacement**
> . . .
>
> **WARNING**
>
> **Only fabric which has been tested and approved according to AEROSTAR (Raven) factory standards may be used for repair of AEROSTAR (Raven) envelopes. Failure to comply with this requirement constitutes a departure from type design and renders the balloon unairworthy.**
>
> ***** $. . .
>
> **Note**
>
> Fabric replacement is normally limited to 35% of the surface area of the envelope within a period of 100 flight hours or one year, (whichever comes first), except for additional minor patches and repairs. Deviation from this procedure up to 65% total fabric replacement may be approved after consultation with the AEROSTAR (Raven) factory. Such extensive replacement may only be undertaken if approved *in writing* by AEROSTAR (Raven). To

[13] *See supra* text accompanying note 7.

[14] It appears obvious that the two sentences in this paragraph are contradictory. In 1995, the second sentence of this paragraph was changed to read, "In the event that non-Aerostar repair materials are obtained elsewhere, the supplying company or the repair station performing the repair must act to 'certify' the material and part as equal to or better than the original equipment." (West Aff. of Nov. 2003 P9 & Ex. B.) Even with the correction, these two sentences remain contradictory.

> protect the integrity of manufacturers' type designs, "100% rebuilding" of balloon envelopes is expressly prohibited according to FAR 43.13.
>
> FOR APPROVAL **[**26]** TO REPLACE MORE THAN 35% OF THE ENVELOPE FABRIC, please contact:
> Dee M. Rose
> Aerostar International, Inc.
> Customer Service
> 1812 "E" Avenue, PO Box 5057
> Sioux Falls, SD 57117-5057
> 605/331-3500 Fax 605/331-2547

(Defs.' Supplemental Ex. C.)

According to Plaintiff, Defendants again changed their ICA language in 2001, removing the language that required Defendants' permission before replacing more than 35% of the envelope fabric and the "WARNING" that failure to use fabric which has been tested and approved according **[**27]** to Aerostar factory standards would make the balloon unairworthy. (Pl.'s Mem. Opp'n Summ. J. at 13.)

3. *Braden's Balloons* and Ronald DiGiovanni

In 1996, Braden's Balloons Aloft, Inc., an FAA-approved repair station, replaced between 54% and 64% of a Raven/Aerostar balloon's envelope fabric with material from Custom Nine Designs without first obtaining Defendants' written permission. *In re Braden's Balloons Aloft, Inc.*, FAA Docket No. CP99SWO037, at *1 (July 26, 2000) (Defs.' Ex. O) [hereinafter *Braden's Balloons*]. The FAA prosecuted Braden's in an administrative civil penalty action, on the theory that Braden's had violated various regulations by failing to follow Defendants' ICA requirement that maintenance personnel secure written permission before performing the replacement. Even though Mr. DiGiovanni, President of Custom Nine Designs, has no formal legal training, Mr. DiGiovanni represented Braden's in the administrative action.

The Administrative Law Judge dismissed the FAA's complaint, concluding that the FAA had failed to allege facts that, if proved, would have established the elements of the violations of the FARs with which Braden's had **[**28]** been cited. For example, the FAA complained that Braden's failed to comply with Defendants' ICA by replacing the envelope fabric without **[*197]** Defendants' permission, but the FAA had failed to allege that Braden's replaced the fabric in a manner not otherwise acceptable to the FAA, a fatal pleading defect considering that procedures listed in a balloon's ICA (unlike those in the balloon's ALS) may be substituted for other FAA-accepted methods. *Braden's Balloons*, *supra*, at *6. In his opinion supporting dismissal, the ALJ observed:

> The Complaint lists an alleged violation of *FAR § 43.16*. This section requires that, if one performs an inspection or maintenance specified in an Airworthiness Limitations section of a manufacturer's maintenance manual or Instructions for Continued Airworthiness, such an inspection or maintenance must conform to that Airworthiness Limitations section. Thus, unless the requirement that Braden's receive written permission for the extensive envelope repair it performed on N57199, is contained in the Airworthiness Limitations section of the maintenance manual or Instructions Continued Airworthiness promulgated by Aerostar (Raven), Braden's would not be **[**29]** required to comply with such a requirement.
>
> The Complaint does not state whether or not such a requirement is contained in the Airworthiness Limitations section of the maintenance manual or the Instructions for Continued Airworthiness. It merely states that such a requirement is a part of the Instructions for Continued Airworthiness, without making clear, one way or another, whether it is specifically located in the Airworthiness Limitations Section. The difference is important, as whether it is required or not hinges on its location. If located within the Airworthiness Limitations section, it is approved by the Administrator and a person performing an inspection or maintenance must follow its prescription. *See* *14 C.F.R. Part 31, App. A, § A31.4*. However, if not located within the Airworthiness Limitations' section, the inspection and maintenance information is only accepted by the Administrator, and there is no requirement to follow the manufacturer's instructions. A deviation from those instructions will not result in a violation in *§ 43.16* so long as the inspection or maintenance falls under the "other methods,

> techniques, and practices acceptable to the Administrator" language **[**30]** of *FAR § 43.13(a)*. Because the Complaint fails to specifically allege that the requirement, that Braden's consult with Aerostar (Raven) prior to performing the fabric replacement, is found in the Airworthiness Limitations section of the Aerostar (Raven) Instructions for Continued Airworthiness, this claim must also fail.

(*Braden's Balloons*, *supra*, at *7-8) (emphasis removed). Defendants downplay the relevance and applicability of *Braden's Balloons* to the instant case by referring to *Braden's Balloons* as an "irrelevant," "unrelated, insignificant administrative action." (Defs.' Reply Br. at 5 & n.2.) While the Court recognizes that the ALJ dismissed the case for defects within the pleadings, it is important to note the distinction which the ALJ made between the mandatory Airworthiness Limitations Section (ALS), and the Instructions for Continued Airworthiness, which may be substituted by alternate methods, techniques, and practices acceptable to the Administrator. As explained below, this distinction is of great relevance to the claims and issues presented in this case.

Mr. DiGiovanni had taken it upon himself to inform the ballooning community of the case's **[**31]** result and of his interpretation of the case's precedential value, most notably through his privately maintained website, **[*198]** *http://home.earthlink.net/tildeaironon*, which chronicles the *Braden's Balloons* saga. In a September 7, 2000 response to Mr. DiGiovanni's trumpeting, Defendants made the following representation in a letter to Raven/Aerostar owners:

> We are extremely concerned with the recent mailing which claims that the ruling in *FAA v. Bradens* "effectively nullifies the Aerostar Instructions for Continued Airworthiness manual." This is patently false and seems to suggest ignoring the Airworthiness Manual which would pose possible significant risk to balloon owners, operators and passengers. The ruling in this case was, simply, that the FAA had not met the correct technical pleading requirements in its complaint and, accordingly, the complaint was dismissed. The ruling did not nullify the Aerostar Instructions for Continued Airworthiness manual and we urge you to follow the procedures contained in the manual as well as all applicable FAA rules and directives. We have been in contact with various offices within the FAA and have their full agreement, based on the **[**32]** FAR's and the requirements within the FAA Type Certificate Data Sheet that "all inspections, repairs, and replacements must be accomplished in accordance with the latest issue of Aerostar Instructions for Continued Airworthiness."

(Pl.'s Mem. Opp'n Summ. J. at 14-15, emphasis removed; also *available at* *http://home.earthlink.net/tildeaironon/new_page_80.htm*.) According to Plaintiff, Mr. Harrison has testified that he did not realize he was not required to use Aerostar fabric until Mr. DiGiovanni told him about the result in *Braden's Balloons*. (Pl.'s Undisputed Facts P84.) [15]

According to Plaintiff, Defendants changed their ICA language in 2001, removing the language that required Defendants' permission before replacing more than 35% of the envelope fabric and the "WARNING" that failure to use fabric which has been tested and approved according to Aerostar factory standards would make the balloon unairworthy. (*Id.* at 13.) Plaintiff suggests that **[**33]** Defendants undertook these revisions at the stern request of the FAA, supposedly "stung by the result in *Braden's*" and "prodded unmercifully by Custom Nine." (*Id.*, citing Michalik Dep., Pl.'s Ex. D, at 72.)

III. Plaintiff's Allegations

Plaintiff brings four counts against Defendants (Antitrust - Monopolization; Antitrust - Tying Arrangement; Fraud; and Negligence). As stated above, Plaintiff is a corporation that derives its income from selling hot air balloon rides to the public. Plaintiff alleges that Raven Industries consciously developed and implemented several schemes to deceive balloon owners and to convince them that federal law required the exclusive use of Raven Industries fabric in the repair and replacement of hot air balloon envelopes originally purchased from Raven. (Compl. P19; *see also* Waligunda Dep., Pl.'s Ex. F, at 24-25.) Plaintiff alleges that after its incorporation, Aerostar International assumed

---

[15] *See supra* text accompanying note 11.

continued responsibility for implementing and maintaining the original schemes, with the full knowledge, participation, and consent of the directors and officers of Raven, its parent corporation. (Compl. P19.) As a direct and proximate result of **[**34]** Defendants' behavior (to be detailed below), Plaintiff claims it could not afford to purchase replacement envelope fabric directly from Defendants for one of its hot air balloons - its "big ride" balloon - and was therefore unable to utilize that particular **[*199]** balloon commercially after 1996. (*Id.* P28.) Plaintiff apparently could have afforded to replace the envelope fabric had Plaintiff thought it was permitted to use third-party fabric, and Plaintiff contends that it would have indeed purchased the third-party fabric if the defendants had not implemented the scheme described above. (*Id.* P29.) Plaintiff claims economic losses totaling $ 35,000 per year (at least) from 1996 continuing through the present. (*Id.* P30; Actuarial-Economic Consultants Report, Pl.'s Ex. A.)

A. Defendants' Alleged Schemes

In its complaint, Plaintiff describes three schemes purportedly undertaken by Defendants that constitute a violation of federal ***antitrust law***.

1. Scheme One

According to Plaintiff, Raven Industries officers expressed their interest and desire in controlling the replacement fabric market at various meetings between Raven Industries and its distributors during the 1980s. **[**35]** At one meeting, shortly before Raven Industries created Aerostar International, Raven Industries officers allegedly advised the attendees, among whom was at least one distributor, that its maintenance manual ("Instructions for Continued Airworthiness" or "ICA") would be changed in order to control the replacement fabric market. (Compl. P20.B; *see also* Waligunda Dep., Pl.'s Ex. F, at 14-19.)

Plaintiff avers that Raven Industries deliberately inserted language into its ICA that appeared to require balloon owners either to use only Raven/Aerostar replacement fabric or to secure Raven/Aerostar approval before obtaining replacement fabric elsewhere. Plaintiff contends that at this meeting, at least one distributor in attendance raised concerns that the proposed manual language would run afoul of federal antitrust laws, and that Raven Industries officers replied that the inserted language would simply "imply" that federal regulations required the owners to use Raven replacement fabric. (Compl. P20.C; *see also* Waligunda Dep., Pl.'s Ex. F, at 23-25.) These officers allegedly told the attendees that because the inserted language appeared in the ICA (which would not require strict compliance), **[**36]** and not in the Airworthiness Limitations Section (which would have required strict compliance), there would be no actual antitrust violation. (*Id.*) Plaintiff claims that this scheme was implemented in 1986, ten days after the incorporation of Aerostar International.

As stated above, *Section 43.13* of the FARs requires that with limited exceptions, all repairs of any type be performed consistent with the ICA. That is, according to this FAR, a hot air balloon repairman should follow the methods listed in the manufacturer's ICA or an alternative method acceptable to the FAA. *14 C.F.R. § 43.13*. Furthermore, this FAR directs a hot air balloon repairman to use materials that equal or surpass the manufacturer-supplied originals in order to create a (repaired) balloon that will be at least equal to its original condition. *Id.*

The parties do not dispute that the FAA has regulated the repairs of hot air balloons. (Tr. at 18.) What the parties do dispute, and what centrally defines Plaintiff's action against Defendants, is whether Defendants acted appropriately in 1993 and 1995 (*see supra* pp. 14-16 and notes 7 & 13) by inserting language that required Raven/Aerostar **[**37]** balloon owners either to use Defendants' own fabric in repairs or to secure Defendants' written permission before using third-party fabric. According to Plaintiff, nothing in the FARs requires a balloon owner to use the manufacturer's **[*200]** own fabric in repairs or to secure the manufacturer's written approval before using third-party fabric. (Compl. P20.F.) Plaintiff criticizes Defendants' WARNING language, which specified that, under penalty of unairworthiness, Raven/Aerostar factory standards were to be applied when testing third-party fabric, especially since the FAA regulations provide separate standards for strength and safety, *14 C.F.R. §§ 31.21-31.27*, which must be met by all manufacturers and replacement parts manufacturers, including holders of STCs and PMAs.

Plaintiff further contends that Defendants inserted language that appeared to require, at penalty of violation of law, that owners get specific approval from Defendants in advance before replacing more than 35% of envelope fabric, and which prohibited replacement of more than 65% of envelope fabric without the defendants' approval. (Compl. P20.E.) Plaintiff alleges that Defendants had arranged the **[**38]** language in such a manner, and with such authority, that it reasonably appeared to balloon owners that federal law and regulations required compliance with these restrictions on envelope fabric replacement. (*Id.* P20.G.)

According to Plaintiff, Defendants purposely misled Mr. Harrison - and, by implication, all other Raven/Aerostar balloon owners (*see, e.g.*, Waligunda Dep., Pl.'s Ex. F, at 25) - regarding his rights and alternatives on the matter of repairing envelope fabric for Raven/Aerostar balloons. Plaintiff contends that in practice, and in furtherance of the foregoing scheme, Defendants refused to approve any replacement that did not utilize Raven/Aerostar fabric. (Compl P20.H.) In order to reinforce its deception of fabric purchasers, Defendants allegedly contacted FAA officials and persuaded them to initiate the administrative prosecution of a certified repairman (Braden's Balloons Aloft, Inc.), who had failed to obtain Defendants' pre-approval before replacing more than 35% of a balloon envelope's fabric. (*Id.* P20.I.)

2. Schemes Two and Three

Next, as Plaintiff contends, in order to deal with balloon owners and repairmen not fooled by the foregoing scheme, **[**39]** Defendants' manuals required that third-party fabric be subjected to highly-destructive "tear testing" before the fabric could be used as replacement fabric on Defendants' balloons; this fabric was later subjected to the same testing procedure annually. (*Id.* P20.J.) Defendants allegedly did not require their own fabric to undergo such testing until it had nearly reached the end of its useful life. (*Id.*) Because the test procedure required that relatively large pieces of fabric be removed for testing and then replaced, both the labor costs involved and the resulting unsightly patches in the envelope deterred owners and repairmen from using third-party fabric, and increased the probability that Aerostar International fabric would be used in the replacement process. (*Id.*)

Third, in order to discourage balloon owners from purchasing third-party fabric, Defendants allegedly defamed at least one third-party manufacturer (Custom Nine Designs, Inc.) by publishing an article in their newsletter reporting fabric strength tests purportedly demonstrating that Custom Nine Designs fabric was unsuitable for use in Raven/Aerostar envelopes. (*Id.* P20.K.) Plaintiff contends that Defendants **[**40]** knew their article was untrue and that Defendants refused to retract or correct the story even when its falsity was brought to their attention. (*Id.*) [16]

[*201] The parties have not developed their contentions regarding Schemes Two and Three in the summary judgment context. Plaintiff does not even explain how these **[**41]** acts would constitute antitrust violations. Therefore, for purposes of this Memorandum, the Court mentions these schemes in the interest of describing Plaintiff's allegations in the entirety, but will focus predominantly on Scheme One, finding that the parties have largely ignored Schemes Two and Three.

B. Plaintiff's Counts Against Defendants

1. Count One: Antitrust - Monopolization

---

[16] In either 1999 or 2000, Defendants published their testing standards for fabric in their manual. (West Dep., Pl.'s Ex. G, at 131.) Defendants started subjecting competitors' fabric along with their own to these newly announced testing standards, and published the results in a newsletter mailed to Raven/Aerostar owners in either 1999 or 2000. (*Id.*) A typo in the newsletter misrepresented the results for fabric produced by Ron DiGiovanni and Custom Nine Designs and indicated that that fabric is unsafe for use with Raven/Aerostar balloons. Defendants claims they corrected any error by subsequently mailing a correction letter to the same mailing list three months later. (West Aff. of Jan. 2004 P5.)

Plaintiff asserts that Defendants possessed monopoly power in the Raven/Aerostar hot air balloon replacement fabric market in the United States. (Compl. P32.) In the alternative, even if Defendants had not actually possessed monopoly power in the relevant market, their acts were intended as an attempt to monopolize the Raven/Aerostar envelope replacement fabric market. (*Id.* P34.) Defendants' alleged acts supposedly constituted impermissible exclusionary practices under *Section 2 of the Sherman Act*, practices which were designed by Defendants to strengthen and to perpetuate their monopoly position. According to Plaintiff, Defendants' acts directly and proximately restrained trade, and directly and proximately caused Plaintiff's damages.

2. Count Two: Antitrust - Tying Arrangement

[42]** According to Plaintiff, Defendants possessed monopoly power in the market for the tying product (i.e., hot air balloons) and used this monopoly power to restrain trade in the tied product (i.e., replacement fabric for balloon envelopes). (Compl. P38.) This alleged tying arrangement supposedly substantially affected - and continues to affect - interstate commerce. (*Id.* P39.) Defendants' acts, as alleged, directly and proximately restrained trade, and directly and proximately caused Plaintiff's damages. (*Id.* PP40, 42.)

3. Count Three: Fraud

Defendants allegedly intended that Plaintiff and all other Aerostar International balloon owners rely upon these supposed misrepresentations. (Compl. P44.) Plaintiff contends that it justifiably relied upon these misrepresentations, and that its damages were a direct and proximate result of its justifiable reliance upon the misrepresentations. (*Id.* PP45-46.) Additionally, as represented by Plaintiff, Defendants' conduct was outrageous and warrants the imposition of punitive damages. (*Id.* P47.)

4. Count Four: Negligence

Plaintiff alleges that Defendants' conduct was negligent and that its damages were a direct and proximate **[**43]** result of said negligence. (Compl. PP49-50.)

[*202] IV. Defendants' Motion for Summary Judgment

Defendants have moved for summary judgment. ***HN3***[] Summary judgment is appropriate "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *FED. R. CIV. P. 56(c)*. An issue is "genuine" if the evidence is such that a reasonable jury could return a verdict for the non-moving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A factual dispute is "material" if it might affect the outcome of the case under governing law. *Id.*

HN4[] A party seeking summary judgment always bears the initial responsibility for informing the district court of the basis for its motion and identifying those portions of the record that it believes demonstrate the absence of a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986).* **[**44]** ***HN5***[] Where the non-moving party bears the burden of proof on a particular issue at trial, the moving party's initial burden can be met simply by "pointing out to the district court that there is an absence of evidence to support the non-moving party's case." *Id. at 325*. After the moving party has met its initial burden, "the adverse party's response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial." *FED. R. CIV. P. 56(e)*. ***HN6***[] Summary judgment is appropriate if the non-moving party fails to rebut by making a factual showing "sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex, 477 U.S. at 322*. ***HN7***[] Under *Rule 56*, the Court must view the evidence presented on the motion in the light most favorable to the opposing party. *Anderson, 477 U.S. at 255*.

Defendants move for summary judgment on three grounds. One: Defendants contend that Plaintiff's antitrust claim is barred by the four-year statute of limitations applicable to antitrust **[**45]** claims. Two: Defendants claim that summary judgment is warranted upon application of implied immunity to Plaintiff's antitrust claims. Three: Defendants argue that Plaintiff cannot succeed in proving the requisite elements for its antitrust, fraud, or negligence claims, thus justifying summary judgment against Plaintiff. The Court will discuss these arguments *seriatim*.

A. First Argument: Statute of Limitations

1. Parties' Contentions

HN8[] A plaintiff's claim is viable under the federal antitrust provisions only if suit is "commenced within four years after the cause of action accrued," *15 U.S.C. § 15(b)*, plus any additional number of years during which the statute of limitations is tolled. *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. *Id.* According to Defendants, the four-year limitations period commenced in 1996 when Plaintiff's "big ride" balloon was no longer in service and its commercial losses began to accrue.

Defendants note **[**46]** that Plaintiff did not file its complaint until March 2002, almost six years beyond the time Plaintiff claims to have first suffered a loss. Moreover, Defendants contend that Plaintiff's actual **[*203]** knowledge about the source of any losses - i.e., the "restrictive" manual - well predated the retirement of the big ride balloon. Defendants state that Mr. Harrison repeatedly expressed his complaints about the Raven/Aerostar language in the 1970s, 1980s, and 1990s, and contend that Mr. Harrison should not now be heard regarding damages that would have begun accruing in 1995 and 1996. Further, Defendants argue that given his 1995-1996 visit with its competitor for replacement fabric, Custom Nine Designs, Inc. and Mr. Harrison's general familiarity with the FARs, Plaintiff clearly knew or should have known its legal avenues for fabric replacement as set forth within the FARs.

Defendants emphasize that Mr. Harrison testified that in the late 1980s, he contemplated going into business as a manufacturer of replacement fabric, but did not do so, at least in part due to the allegedly restrictive language within Defendants' ICA. Mr. Harrison opted not to pursue that venture believing that he could **[**47]** not effectively compete with Defendants for business. (Harrison Dep., Defs.' Ex. D & Pl.'s Ex. I, at 48-49.) With Mr. Harrison's longstanding knowledge of Defendants' stance on replacement fabric, Defendants contend that Plaintiff's Complaint - filed more than six years after the retirement of the big ride balloon and decades after his complaints and aborted enterprise - must be dismissed as untimely. Moreover, Mr. Harrison conceded that certain language in Aerostar's ICA indicates that balloon owners could purchase replacement fabric from third-party sources provided that the third-party held an STC or a PMA, [17] and Mr. Harrison testified that such language would imply that third-party fabric, if so certified, was acceptable. (Harrison Dep., Defs.' Ex. B & Pl.'s Ex. H, at 164-65.) While Mr. Harrison stated that he did not first notice this language until 2003, Defendants argue that such language had been printed in their ICA as early as 1993, thus placing Mr. Harrison on constructive notice since that time. Defendants conclude that Mr. Harrison had everything necessary to pursue his claim in 1996.

[48]** Plaintiff alleges that Defendants engaged in fraudulent misrepresentation; ***HN9***[] to succeed on this claim, Plaintiff must demonstrate that Defendants fraudulently concealed their own unlawful activities and that Plaintiff did not discover these facts despite the exercise of due diligence. *E.g.*, *In re Linerboard Antitrust Litig., MDL No. 1261, 203 F.R.D. 197, 2001 U.S. Dist. LEXIS 13862 (E.D. Pa. Sept. 4, 2001)*. Plaintiff claims that equitable tolling applies and would have extended Plaintiff's deadline for suit past its original date. Defendants disagree, arguing that Plaintiff's pre-existing knowledge of the allegedly wrongful conduct defeats its attempt to establish equitable tolling.

[17] As explained above at pages 7-8, a hot air balloon envelope can only be repaired with FAA approved replacement parts (fabric falls under the category of "parts") from either: (a) the manufacturer of the product; (b) the holder of a Supplemental Type Certificate ("STC"); or (c) an entity with Parts Manufacturing Approval ("PMA"). *14 C.F.R. § 21.303*.

Defendants also emphasize that Plaintiff failed to exercise any form of due diligence to pursue the alleged wrong. Plaintiff supposedly did nothing between 1996 and 2002 to pursue its legal remedies following the loss of use of his "big ride" balloon and his alleged inability to have it repaired, notwithstanding his longstanding complaints about the manufacturers' language, notwithstanding changes in the Aerostar ICA which alerted the owner to the validity of other replacements, and **[**49]** notwithstanding Mr. Harrison's knowledge of, and access to, the federal regulations that govern this field. Defendants claim there **[*204]** were no efforts to seek redress with calls to the manufacturer, no calls to the FAA, no independent research, no calls for any form of legal representation or advice. Defendants also argue that Plaintiff cannot display any active conduct by the Defendants which would reveal fraudulent concealment or an intention to mislead. Defendants contend that Plaintiff cannot cite one conversation with the defendants, one passage of deposition testimony, one document, or any other evidence that bespeaks fraudulent intentions.

2. Analysis

HN10[] Generally, a cause of action accrues - and the statute of limitations begins to run - when a defendant commits an act that injures a plaintiff. ***HN11***[] In the context of a continuing antitrust violation, each time a plaintiff is injured by the act of the defendant, a cause of action accrues to the plaintiff to recover damages caused by that act.

> However, a suit may be brought more than four years after the events that initially created the cause of action if the defendant commits "an act that by its very nature constitutes **[**50]** a 'continuing antitrust violation.'" *Zenith Radio Corp. v. Hazeltine Resch., Inc., 401 U.S. 321, 338, 28 L. Ed. 2d 77, 91 S. Ct. 795 & n.2 (1971)*. An act constitutes a "continuing antitrust violation" if it injures the plaintiff over a period of time. *See Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 502, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 & n.5 (1968)*. ***Antitrust law*** provides that in the case of a continuing antitrust violation each overt act that is part of the violation and that injures the plaintiff, "starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times." *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 138 L. Ed. 2d 373, 117 S. Ct. 1984 (1997)*; *see also Hanover Shoe, 392 U.S. at 502*.

*In re Linerboard Antitrust Litig., 2000 U.S. Dist. LEXIS 14433, at *16-17, MDL No. 1261 (E.D. Pa. Oct. 5, 2000)*.

> [A] new cause of action may arise from later overt acts in furtherance of a challenged conspiracy or from each injury resulting from a continuing violation. However, to trigger a new cycle of the **[**51]** limitations period, the overt act must specifically affect the plaintiff and not be merely a continuation of the conspiracy. If the plaintiff suffered injury at the beginning of the continuing conspiracy but not thereafter, the plaintiff may not enjoy the benefits of an extended limitations period.

ABA SECTION OF ***ANTITRUST LAW***, ***ANTITRUST LAW*** DEVELOPMENTS 893-94 (5th ed. 2002) (footnotes omitted) [hereinafter ABA ANTITRUST].

Defendants thoroughly chronicle Plaintiff's actions since the 1970s that potentially indicate Plaintiff's longstanding awareness of any allegedly offensive behavior, and Defendants essentially argue that Plaintiff's claim should not be considered timely considering its decades-old knowledge of the offending behavior and overall inactivity until only recently. (Harrison Dep., Defs.' Ex. B & Pl.'s Ex. H, at 150-54, 156-58, 159-62; Harrison Dep., Defs.' Ex. D & Pl.'s Ex. I, at 43-44, 46, 47-48.) Defendants claim that in 1993, their ICA first alerted balloon owners that they could purchase third-party replacement fabric instead of directly from Raven/Aerostar. Therefore, even though Mr. Harrison testified that he had not read this language until 2003, Defendants **[**52]** argue that Plaintiff had been on notice of its expanded alternatives for nearly ten years before filing this suit. In 1993, a portion of the relevant ICA language read, "Repair/replacement **[*205]** materials must be obtained from Aerostar to be considered a 'certified part'. In the event that repair materials are obtained, the supplying company or the repair station performing the repair must act to 'certify' the material and part as equal to or better than the original equipment." (Defs.' Supplemental Ex. C.) The Court cannot conclude that this language necessarily placed Raven/Aerostar balloon owners on notice that they could purchase third-party replacement fabric, given that the first and second sentences appear to contradict each other. As Defendants point out, balloon owners are notified that third-party fabric must be certified before use, thus indicating that third-party fabric is acceptable material; however, the preceding sentence states that only materials supplied by Defendants are considered certified. Given that the Court must give the benefit of the doubt to Plaintiff, as the non-moving party, the Court cannot conclude as a matter of law that this language placed Plaintiff and **[**53]** other Raven/Aerostar balloon owners on notice regarding their ability to purchase third-party fabric.

Here, Plaintiff has presented facts that Defendants' predatory acts continued unabated through 2001, at which time Defendants changed the ICA language. According to Plaintiff, it has been harmed by Defendants' antitrust activity continuously until the ICA change, because the company has lost income which it otherwise would have earned had Plaintiff repaired its most profitable balloon. [18] It is undisputed between the parties that the written change allegedly removing the language offensive to Plaintiff occurred in 2001. Given that Plaintiff filed the instant suit less than four years following Defendants' rewriting of the ICA, there is an issue of fact for trial as to whether the applicable statute of limitations had expired.

[54]** In light of case law such as *Linerboard* and *Klehr*, *supra*, which held that, ***HN12***[] in the context of a continuing antitrust violation, each overt act starts the statutory period running again "regardless of the plaintiff's knowledge of the alleged illegality at much earlier times," *Linerboard, 2000 U.S. Dist. LEXIS 14433, at *17*, even though Plaintiff might have realized that it suffered injury each year, assuming Plaintiff filed this case within four years of its last alleged injury, its case is timely and the statute of limitations will not bar these claims from continuing. The Court cannot resolve this issue as a matter of law at this time. Thus, summary judgment will be denied on these grounds.

B. Second Argument: Implied Immunity

1. Parties' Contentions

HN13[] The doctrine of implied immunity arises where an alleged violator of the law has acted pursuant to congressional or regulatory authority that conflicts with conduct alleged to be in violation of the antitrust laws. *See generally* ABA ANTITRUST, *supra*, at 1238-40. Because the hot air balloon industry is heavily regulated, Defendants argue that their actions and activities **[**55]** undertaken pursuant to congressional or regulatory authority should be entitled to implied immunity from the federal antitrust laws. Defendants assert they developed their ICAs jointly with the FAA, as they were obligated to do by operation of FAA guidelines, **[*206]** and each successive year after this initial acceptance by the FAA, the ICA remained subject to FAA oversight.

In developing and maintaining their ICAs pursuant to the direct obligation imposed by the FAA, and having worked both with and under the direction of the FAA in creating their ICAs, Defendants contend that they cannot now be held liable in antitrust. At a minimum, Defendants claim they had a reasonable belief that their actions vis-a-vis Plaintiff were appropriate if not necessary in complying with regulatory and administrative mandates, confirmed by the FAA itself. According to Defendants, to hold them accountable in antitrust would subject them to severe liability for conduct they took in order to ensure aviation safety for hot air ballooning.

2. Analysis

This case features the friction that occasionally arises when Congress establishes a regulatory regime which appears inconsistent with the vigorous competition **[**56]** also mandated by Congressional statutes. ***HN14***[] An

---

[18] Had Plaintiff repaired its "big ride" balloon, the balloon would have remained aloft and commercially viable until 2006, its next anticipated repair date. Plaintiff has submitted an expert report that details the company's economic losses following the retirement of its "big ride" balloon. (Actuarial-Economic Consultants Report, Pl.'s Ex. A.)

express exemption to antitrust liability exists wherever Congress explicitly states that the antitrust laws will not apply to the conduct authorized by the legislation, either in general, or under the specific circumstances enumerated in the legislation. *See generally* ABA ANTITRUST, *supra*, at 1238. By contrast, where a Congressional statute mandates certain behavior, but omits to exempt the behavior expressly from the purview of the antitrust laws, an exemption might need to be implied in order to preserve Congress's regulatory intentions. *Id.* In this case, where the relevant statutes contain no express exemption, Defendants argue that this Court should find that the regulations that mandated their conduct, now challenged by Plaintiff contain an implied exemption that would insulate Defendants' behavior from antitrust liability.

HN15[] Defendants have a heavy burden to prove an implied immunity. "Implied antitrust immunity is not favored, and can be justified only by a convincing showing of clear repugnancy between the antitrust laws and the regulatory system." *United States v. Nat'l Ass'n of Sec. Dealers, Inc., 422 U.S. 694, 719, 95 S. Ct. 2427, 45 L. Ed. 2d 486 (1975)*; **[**57]** *see also* *United States v. Phila. Nat'l Bank, 374 U.S. 321, 348, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*. Implied antitrust immunity is restricted only to the activity challenged, and will not extend to conduct otherwise overseen by the regulatory agency. *See generally* ABAANTITRUST, *supra*, at 1238. In conformance with these principles, while the Supreme Court has recognized implied immunity from certain prosecutions under the antitrust laws, the Court has steadfastly held that the Federal Aviation Act does not completely displace the antitrust laws. *Hughes Tool Co. v. Trans World Airlines, Inc., 409 U.S. 363, 387, 93 S. Ct. 647, 34 L. Ed. 2d 577 (1973)*; *Pan Am. World Airways, Inc. v. United States, 371 U.S. 296, 305, 83 S. Ct. 476, 9 L. Ed. 2d 325 (1963)*.

Whether Defendants are entitled to implied antitrust immunity because they developed, drafted, and promulgated their ICAs in conjunction with the FAA appears to be a matter of first impression. ***HN16***[] Only where Congress has invested pervasive supervisory authority in a regulatory agency should a court conclude that Congress intended to ease liability under the *Sherman Act*. **[**58]** *See, e.g.*, *Nat'l Ass'n, supra.* The Court concludes that Defendants have not established a sufficiently coherent and pervasive theory of regulation, nor do they document any congressional intent that companies in the balloon industry are immune from antitrust litigation by virtue of **[*207]** collaboration with the FAA in drafting and promulgating their ICAs.

a. Federal Regulations Applicable to Hot Air Ballooning

As discussed above in Section II.B, there are numerous federal regulations that apply *inter alia* to the manufacture and sale of both hot air balloons and replacement parts. To summarize, balloon manufacturers are required to distribute to their customers ICAs, which are model-specific maintenance manuals that detail standards and procedures to be used during maintenance, alteration, or preventive maintenance of the aircraft. These methods or practices generally may be substituted by other maintenance methods or practices acceptable to the FAA. The ICA might contain a segregated section of additional techniques, known as the ALS, from which maintenance personnel may not deviate. Replacement parts may be manufactured and sold by the aircraft's original manufacturer **[**59]** or by a third-party that holds either an STC or PMA, documents which indicate that the FAA has approved the third-party's product. However, these regulations did *not* require the conduct which Plaintiff contends violated the antitrust laws: for example, no federal regulation requires that a hot air balloon owner first secure the original manufacturer's permission to use third-party fabric before repairing the balloon envelope.

It appears clear from the record that although Defendants' ICA implied that only Defendants-approved replacement parts could be used, there is no requirement in the FARs that replacement envelope material be tested in accordance with the *manufacturer's* standards. In fact, the FAA has set forth its own standards for strength and safety, *14 C.F.R. §§ 31.21-31.27*, which must be met by all manufacturers and replacement parts manufacturers, including holders of STCs and PMAs. Thus the Court concludes that both Plaintiff and Defendants have overstated the case. The regulations do not require the defendants to what they did, and what Plaintiff claims is unlawful under the antitrust laws. Nonetheless, the Court will review the applicable **[**60]** case law.

b. Relevant Case Law

The starting point in the case law on implied immunity are two Supreme Court opinions that hold that ***HN17***[] implied immunity from the antitrust laws is to be sparingly inferred from the enactment of a regulatory statute: *Pan*

American World Airways v. United States, supra, and Hughes Tool Co. v. Trans World Airlines, supra. The Court notes that neither *Pan American* nor *Hughes Tool Co.* give Defendants any specific support regarding ICAs and implied immunity.

In Pan American, supra, the United States brought a civil antitrust action against Pan American World Airways, W.R. Grace & Company, and their jointly-owned subsidiary, Pan American-Grace Airways ("Panagra"). When Pan American and Grace organized Panagra, the companies agreed that Panagra and Pan American would not parallel each other's air routes, a combination and conspiracy allegedly in restraint of trade and monopolization and attempted monopolization of air transportation between the United States and South America. The United States further alleged that Pan American had used its control over Panagra to prevent it from obtaining **[**61]** authority from the Civil Aeronautics Board to extend its route from the Canal Zone to the United States. The district court dismissed the case against Grace and Panagra, finding that none of their practices violated the Sherman Act. Regarding Pan American, however, the lower court concluded that by suppressing **[*208]** Panagra's efforts to extend its route from the Canal Zone to the United States, Pan American had violated the Sherman Act, and ordered Pan American to divest itself of its stock in Panagra.

On direct appeal to the Supreme Court, the Court held that the issues presented had been congressionally entrusted to the Civil Aeronautics Board for resolution, and dismissed the complaint in its entirety. Finding that the limitation of routes and divisions of territories, and the relation of common carriers to air carriers, were fundamental to the regulatory scheme developed by Congress, the Court held that the antitrust violations charged in the complaint had been reserved for the Board's authority "in granting, qualifying, or denying certificates to air carriers, in modifying, suspending, or revoking them, and in allowing or disallowing affiliations between common carriers and air carriers. **[**62]** " Pan American, 371 U.S. at 305. While the Court accordingly ordered the dismissal of all claims against all defendants, the Court was careful to stress the narrowness of its holding; that is, the Federal Aviation Act does not completely displace the antitrust laws, but only those segments necessarily implicated by the particular regulatory scheme enacted by Congress. The Court held, "While the Board is empowered to deal with numerous aspects of what are normally thought of as antitrust problems, those expressly entrusted to it encompass only a fraction of the total." *Id.*

In Hughes Tool Co., supra, Trans World Airlines ("TWA") brought an antitrust action against Hughes Tool Company ("Toolco") that challenged Toolco's ability, in exercise of its controlling interest in TWA, to control and dictate how TWA acquired and financed aircraft. Toolco had defended itself claiming that its challenged transactions were under the control and surveillance of the Civil Aeronautics Board ("CAB") and subsequently immune from the antitrust laws by virtue of the Federal Aviation Act of 1958. The district court had entered a default judgment against Toolco, which **[**63]** the Second Circuit Court of Appeals upheld. The Second Circuit had distinguished *Pan American*, concluding that the continuing supervision of the CAB over the Toolco-TWA relationship was general and not related to any specific conduct that would have constituted an antitrust violation. Hughes Tool Co., 409 U.S. at 378. The Supreme Court disagreed and found *Pan American* applicable to the case, especially in consideration of the relevant statute and the several opinions and orders issued by the CAB regarding the Toolco-TWA relationship.

> From 1944 through 1960 every acquisition or lease of aircraft by TWA from Toolco and each financing of TWA by Toolco required Board approval. Each transaction was approved by the Board and each approval was an order under § 408, for the Board regarded its transactional orders as modifications or interpretations of its antecedent control order. Each of the modification orders recited a finding of the Board that the transactions were "just and reasonable and in the public interest."

409 U.S. at 379. Toolco was forbidden from acquiring control of TWA without CAB approval; under the Federal Aviation Act, **[**64]** the CAB only could have approved the acquisition if it were found consistent with the public interest, id. at 381, and the CAB could not have approved Toolco's actions had there been the possibility of a resultant monopoly which could have restrained competition or jeopardized another air carrier. Id. at 384. As in *Pan American*, the Court in *Hughes Tool Co.* emphasized the narrowness of its holding, namely that **[*209]** while the defendant was entitled to antitrust immunity in this case, ***HN18***[] the Federal Aviation Act overall does not completely displace the antitrust laws. Id. at 389.

According to Defendants, *Scroggins v. Air Cargo, Inc., 534 F.2d 1124 (5th Cir. 1976)*, supports their argument for implied immunity in this case, [19] that Plaintiff's action should be dismissed considering the FAA's participation in the initial drafting of the challenged ICA's and its continued involvement throughout Defendants' revisions thereof. In *Scroggins*, several airlines contractually created a jointly-owned transportation arrangement agency, which was entrusted with such powers as the ability to negotiate contracts with third parties **[**65]** for the pick-up and delivery of air cargo. *534 F.2d at 1126-27*. The Civil Aeronautics Act of 1938 required the airlines to submit these contracts for the approval of the CAB. *Id. at 1127*. The Board expressly found that the agreement was not contrary to the public interest, but also announced an intention to reexamine the arrangement if future circumstances so required. *Id.* Plaintiff was the trustee in bankruptcy for a trucking company which had requested an increase in the rates under its contract with the agency; the agency responded by diverting its business to another trucking company.

The court in *Scroggins* held that the defendant's conduct was immunized from antitrust liability **[**66]** because "(a) the actions complained of were within the contemplation of prior CAB orders which specifically considered effects upon future competition and (b) the CAB has retained an active supervisory jurisdiction to correct anti-competitive developments as they arise." *534 F.2d at 1132*. Concerning the involvement of the regulatory agency in the formulation and oversight of the air cargo contracts, the court in *Scroggins* found it persuasive that the CAB continued to subject contractual amendments to scrutiny in order to determine whether the amendments furthered the public interest. The CAB had been exercising continuing jurisdiction over the affected area of operations, and only approved the revised contracts when found not to be adverse to the public. *Id. at 1131-32*. The court wrote, "The CAB has continued to scrutinize every amendment to the contract which defines ACI's rights and duties, and has approved the revised contracts only when found not to be adverse to the public interest. . . . The Board also announced that it would reconsider its approval if the future development of ACT should so warrant." *Id. at 1132*.

c. Implied [67] Immunity Does Not Apply in This Case**

The Court concludes as a matter of law that Defendants are not entitled either to express or to implied immunity from antitrust prosecution. Defendants contend that they could not have promulgated their ICAs had the FAA not first participated in the drafting and revision of the language and then later approved the language. Defendants suggest that because they have acted in obedience to a regulatory authority, they are impliedly immune from Plaintiff's subsequent charges that their conduct violated the antitrust laws.

The Court rejects Defendants' contentions for two reasons. First, as noted above, Defendants have overstated the thrust of the FAA regulations. Second, **[*210]** Defendants' argument that those industry actors who adhere to a regulatory agency's regulations are thereafter insulated from antitrust liability is incorrect in its breadth. Even if Defendants' theory were generally correct, Supreme Court precedent firmly establishes that the Federal Aviation Act, which created the regulatory agency at issue in this case, does not completely displace the antitrust laws. *Pan American, 371 U.S. at 305*; *Hughes Tool Co., 409 U.S. at 389.* **[**68]** The major theme of those cases is that ***HN19***[] immunity is implied only where the challenged conduct is subject to a regulatory scheme that expressly directs the agency to consider antitrust policies in the context of the regulated industry. There is no evidence to this effect in this case. Defendants correctly contend that the overriding federal interest in aviation safety compels them to adhere to the guidelines and requirements of the regulatory body. But compliance with safety regulations does not lead to antitrust immunity from the antitrust laws.

Defendants' overstatement is argued in their reply brief,

> When companies stray from the mandates and requirements of governmental regulation, people get hurt, people even die. One need go no further than a daily newspaper to recognized [sic] this fact, with commonplace examples such as polluters bypassing regulation by discharging harmful agents into the environment and businesses violating fire codes. So too with the aviation industry.

---

[19] Regarding Defendants' implied immunity defense, the parties have not cited any Third Circuit precedent, as the Third Circuit has apparently not yet addressed under what circumstances in the aviation context a defendant would be entitled to implied immunity from the federal antitrust laws.

(Defs.' Reply Br. at 9.) While this Court certainly cannot question the importance of compliance with federal regulations where aviation safety is concerned, the Court notes that Defendants' **[**69]** argument does not support its implied immunity claims. That is, Defendants would have this Court find them impliedly immune from antitrust litigation because the FAA concluded that Defendants' manual - written collaboratively by Defendants and the FAA - would be effective in promoting and guaranteeing hot air balloon safety. The disconnect is obvious.

What Defendants neglect to show, with any evidence, is that the FAA, in collaborating with Defendants, specifically considered the potential alleged anticompetitive consequences of the ICA and nonetheless approved or accepted the language. Defendants have only presented evidence that the primary concern of the FAA was aviation safety, which this Court obviously should not question or second-guess. In a December 1998 letter to Mr. DiGiovanni, submitted to the Court by Defendants, Ava L. Mims of the FAA stated, "*It is not the responsibility* of the FAA to monitor antitrust issues, which are a matter for the civil courts." (Defs.' Ex. K.) Mark West, President of Aerostar International, Inc., stressed that the Defendants and the FAA were cooperating with aviation safety (and not the anticompetitive consequence) as their chief consideration, **[**70]** stating that:

> The overall goal of both Raven and the FAA was to promote aviation safety through language which instructed the aircraft owner as to how and when the aircraft would no longer be airworthy, i.e., when and how repairs were required so that the aircraft could be legally, and safely, flown.

(West Aff. of Nov. 2003 P7; *see also id.* PP4, 8.) Demonstrating further that the Defendants and the FAA were primarily concerned with fostering and ensuring aviation safety, Mr. West also stated, "The language of the ICA was not the product of any effort by defendants to limit or restrict the market, rather, it was a function of Raven and Aerostar's compliance with the Federal laws and the Federal **[*211]** Agency empowered to enforce those laws in the interest of aviation safety." (*Id.* P11.) That the FAA had not considered the anticompetitive consequences of Defendants' ICA is no surprise, especially upon consideration that nothing in the ICA outright forbids the use of third-party replacement fabric.

However, under*Pan American* and*Hughes Tool Co.*, it is clear that ***HN20***[] a defendant wishing to invoke implied antitrust immunity must demonstrate that the regulatory agency **[**71]** was authorized by Congress to consider the anticompetitive implications of its actions and enact regulations that essentially "trumped" the antitrust laws. Under those circumstances, Congress intended the regulatory scheme to operate as a more refined, but functionally equivalent, substitute for the standard antitrust regime, and that to penalize the challenged conduct would be an invasion of the regulatory agency's competence. The Court in *Pan American, supra*, concluded that the plaintiff's complaint should have been dismissed because the relevant statute explicitly gave the regulatory agency broad power to investigate and halt unfair practices and unfair methods of complaint - including those alleged in the complaint - and because if the courts later were to intrude, imposing their own interpretation of the antitrust laws, the two regimes potentially would collide. Similarly in *Hughes Tool Co., supra*, the Court concluded that the defense of implied immunity was applicable because the regulatory agency, pursuant to statutes that empowered it to permit only those acquisitions of control that were not inconsistent with the public interest and **[**72]** that would not have resulted in a monopoly, had considered the anticompetitive consequences of the defendant's every acquisition and lease of aircraft. Along these lines, the court in *Scroggins, supra*, held that the defendant's conduct was immunized from antitrust liability because "(a) the actions complained of were within the contemplation of prior CAB orders which specifically considered effects upon future competition and (b) the CAB has retained an active supervisory jurisdiction to correct anti-competitive developments as they arise." *534 F.2d at 1132*.

d. The Evidence in This Case Does Not Show FAA Consideration of Anticompetitive Consequences

The deposition testimony in evidence shows that the FAA reviewed Defendants' ICAs in order to promote and preserve aviation safety. There is nothing in the record demonstrating that the FAA considered the antitrust laws and weighed the anticompetitive effects, if any, of its approval of Defendants' ICA language. Gregory Michalik is the FAA Senior Aerospace Engineer and Program Manager in charge of FAA oversight for the Aerostar program on behalf of the FAA, and it is on his testimony Defendants rely for their **[**73]** contention that the relationship between Defendants and the FAA is a formal, collaborative process to ensure aviation safety from which Defendants may not deviate. The Court finds that Mr. Michalik's testimony demonstrates the overarching safety concern in drafting the ICAs. When asked whether he knew the purpose of the particular provision that required approval to replace up to the maximum 65 percent of the hot air balloon envelope, Mr. Michalik testified, "My understanding is to maintain the structural integrity of the envelope and so it would be a safe vehicle to fly." (Michalik Dep., Defs.' Ex. G, at 38; *see also id.* at 42-43.) Mr. Michalik's deposition proceeded as follows in pertinent part:

> [Defense Counsel]: What were you conveying to Mr. DiGiovanni in [a letter **[*212]** addressed to him], what were you telling him?
> [Mr. Michalik]: It was that if you need to replace more than 35 percent of your fabric that a request should be sent to Aerostar. Aerostar will then evaluate the request, see where the damage is, help them with putting together a repair, and provide them with the necessary instructions and documents in order to complete that repair.
>
> Q: Is the **[**74]** reason for that because that's what the ICA said?
> A: Yes.
> Q: And on behalf of the FAA you were making it your position that the ICA's instructions were to be followed by the balloon owner, correct?
> A: Yes.
> Q: What would be the underlying purpose of that instruction?
> A: To insure that the repaired balloon would be in a safe condition for flight.

(*Id.* at 55-56.) Mr. Michalik stated that in drafting the ICA language alongside Defendants, the predominant consideration of the parties was aviation safety (*see, e.g.*, *id.* at 46), and nowhere does Mr. Michalik even hint that the FAA contemplated the anticompetitive consequences of its collaboration with Defendants. In addition to Mr. Michalik, Michael Gallagher and William Timberlake - FAA Small Plane Directorate Manager and FAA Manager, respectively - also testified that FAA acceptance of ICA language is a formal, *safety-driven* process undertaken by all manufacturers before they can place their aircraft and parts on the market. (Gallagher Dep., Defs.' Ex. I, at 32; Timberlake Dep., Defs.' Ex. J, at 82-83.)

Defendants have not argued that the FAA considered the anticompetitive ramifications **[**75]** of its approval or acceptance of their ICA language, nor does the evidence of record support this Court independently finding as a matter of law that the FAA had actually contemplated and condoned, as was its administrative prerogative, the effects of its imprimatur on competition within the hot air balloon industry. Instead, in their papers and arguments submitted to the Court, Defendants consistently have contended that the FAA approved or accepted their manuals in the interest of aviation safety, and not in the interests of promoting competition within the industry. Defendants argued that "at all times, the defendants operated within the strictures of a statutory scheme developed and maintained by the FAA *for the primary purpose of ensuring air safety*." (Defs.' Mem. Supp. Mot. Summ. J. at 31) (emphasis added).

As Defendants stated in their reply brief, "each FAA representative has testified that these considerations are grounded in *safety* considerations, the FAA's primary charge to the public, implemented by regulating manufacturers in the market . . . ." (Defs.' Reply Br. at 9) (emphasis added).

The Court cannot conclude as a matter of law that exposing Defendants to **[**76]** antitrust liability stemming from a challenged safety manual written in collaboration with a regulatory agency would interpose a second, potentially adverse construction of the antitrust laws, as proscribed by *Pan American* and *Hughes Tool Co.*, where the regulatory agency at issue is not demonstrated to have authorized (or ever considered) the possible anticompetitive consequences, nor even alleged to have such regulatory power. ***HN21***[] "Antitrust immunity is not conferred by the bare fact that defendants' activities might be controlled by an agency having broad powers over their conduct." *Phonetele, Inc. v. AT&T Co., 664 F.2d 716, 729 (9th Cir. 1981)*.

[*213] The Court concludes that Defendants have not satisfied their burden to succeed on this argument of their motion for summary judgment.

C. Third Argument: Whether Plaintiff Has Presented Sufficient Facts to Prove a *Prima Facie* Case

1. § 2 Monopoly Claim

a. Parties' Contentions

Count I of Plaintiff's complaint charges monopolization and attempted monopolization, and alleges that the relevant product market is "the Raven/Aerostar balloon replacement fabric market in the U.S." (Compl. **[**77]** P32.) Defendants argue again, as an alternative to immunity, not only that Plaintiff cannot demonstrate that their conduct was anticompetitive, (because their actions in formulating and maintaining their ICAs were taken while acting pursuant to a regulatory system that obligated them to take the very actions at issue in this case), but also, that Plaintiff can display nothing other than a highly subjective, personal opinion that the defendants' conduct was anticompetitive. According to Defendants, all the objective evidence - as derived from other parties, from the ICAs and FARs, and from the FAA itself, through the testimony of Mr. Mickalik - indicates that Defendants were acting under the auspices of the FAA and the FARs, and solely in the interest of promulgating air safety for hot air balloonists within the confines of a regulatory system.

Defendants also argue that the evidence of record does not indicate any anticompetitive activity by them. According to Defendants, the evidence reveals that even if they are not immune, the market for replacement fabric is a function of the extreme regulatory measures placed upon any person or entity wishing to participate in the market. As **[**78]** Defendants emphasize, until the mid-1980s, Raven/Aerostar was the only participant in this market and has only since been joined by two other companies able to secure regulatory preapproval. (West Aff. of Nov. 2003 P13.) Defendants argue that their standing in the market is not a function of anticompetitive activity, but of natural market forces within a highly regulated industry. (*Id.*)

b. Analysis

Plaintiff acknowledges that Defendants' early prominence in the market largely was due to FAA regulations and prerequisites no other company had satisfied. (Pl.'s Mem. at 32.) Plaintiff argues that after attaining such status, Defendants took full advantage of its monopoly position to discourage any competition by implying through its ICAs, as discussed above, that use of any other company's fabric would render the balloons "unairworthy". Defendants allegedly placed further restrictions upon how much fabric could be replaced without first obtaining its permission to make the repair, and informed all owners and repairmen that these restrictions were "expressly" authorized by law. [20]

[79]** **[*214]** The Court requested both parties to submit supplemental briefs on the leading Supreme Court decision on the interplay between the antitrust laws and replacement products, *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. In this case, the district court had granted summary judgment for Kodak on allegations that Kodak unlawfully monopolized and attempted to monopolize the sale of service and parts for copy and micro-graphic equipment manufactured by Kodak and had also engaged in an alleged tying arrangement. The plaintiffs were independent service organizations (ISO's) which asserted that Kodak's policies to limit the availability of replacement parts for its equipment to ISO's, and to make it more difficult for ISO's to compete with Kodak in servicing such equipment, violated the antitrust laws. The Ninth Circuit had reversed the summary judgment for Kodak and the Supreme Court affirmed.

The Court will follow the order established by Plaintiff's Complaint and first consider Plaintiff's claims under *Section 2*. The Supreme Court has defined monopoly as follows:

---

[20] The most notable example of this behavior was the September 7, 2000 letter Defendants mailed to their hot air balloon customers in the wake of the *Braden's Balloons* litigation, in which Defendants wrote, in pertinent part:

> We have been in contact with various offices within the FAA and have their full agreement, based on the FAR's and the requirements within the FAA Type Certificate Data Sheet that "all inspections, repairs, and replacements must be accomplished in accordance with the latest issue of Aerostar Instructions for Continued Airworthiness."

(Pl.'s Mem. Opp'n Summ. J. at 15, emphasis removed; *see also supra* p. 19.)

> HN22[] The offense of monopoly under § [**80] 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Kodak, 504 U.S. at 481 (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)). [21]

[81]** In *Kodak*, the Supreme Court, in an opinion by Justice Blackmun, rejected Kodak's contention that as a matter of law, there could not be a separate product market for the replacement parts of one manufacturer. In *Kodak*, the Supreme Court held that although there was evidence that there was substantial competition in the sale of copiers, there could be relevant markets confined to the servicing of Kodak copiers (as opposed to servicing of all copiers) and confined to the sale of Kodak's spare parts, because there were facts in the record to support the ISOs' contention that the parts and servicing of Kodak copiers were unique. *See* 504 U.S. at 481-82. [22]

[82] [*215]** In Plaintiff's submission on *Kodak*, as to the claim of monopolization, Plaintiff asserts that *Kodak* squarely rejects any concept that a defendant with a natural monopoly cannot be guilty of monopolization. However, Plaintiff goes on to argue that the Defendants' marketing strategy was similar to Kodak's and that Defendants used their control over the contents of their air worthiness manuals (the ICAs) to expand their control into the replacement fabric market, and that Defendants, as Kodak, utilized the monopoly they initially enjoyed as a result of having created a new product in order to perpetuate their monopoly improperly and to destroy competition.

Plaintiff also asserts that the testimony of Mr. Waligunda (Pl.'s Ex. F, at 17-19, 23-25) establishes that Defendants intended to utilize its market power to gain a competitive advantage and to destroy a competitor. Plaintiff argues that the *Kodak* decision requires this Court to defer to a jury trial for resolution of Defendants' assertion that their exclusionary practices were necessary to maintain service for sophisticated equipment, and to ensure safety of balloon owners and riders.

Defendants' submission on *Kodak* **[**83]** acknowledges the holding, but attempts to distinguish the facts, which have been reviewed above. Defendants assert that the facts of this case do not rise to the level which the Supreme Court found in *Kodak* to require a trial on either monopolization or the tying claim, and that Plaintiff's claim must be considered economically senseless, once again relying on the federal regulation and/or oversight as negating any conceivable antitrust theory.

---

[21] Plaintiff also alleges attempted monopolization. HN23[] In order to prevail on an attempted monopolization claim under the Sherman Act, a plaintiff must prove that the defendant (1) engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize and with (3) a dangerous probability of achieving monopoly power. *See, e.g.*, Armstrong Surgical Ctr., Inc. v. Armstrong County Mem'l Hosp., 185 F.3d 154, 157 (3d Cir. 1999). In order to determine whether there exists a dangerous probability of achieving monopoly power, a court must inquire "into the relevant product and geographic market and the defendant's economic power in that market." Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 442 (3d Cir. 1997) (quoting Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)). In light of the Court's disposition of Plaintiff's monopolization claim, the Court need not separately consider the claim of attempted monopolization.

[22] There are many cases in which other district courts have found replacement markets limited to the products of a single supplier where they are unique and have no reasonably interchangeable substitutes. *See, e.g.*, U.S. Anchor Mfg., Inc. v. Rule Indus., 7 F.3d 986, 997-98 (11th Cir. 1993) (considerably more expensive anchor excluded from broader market of functionally interchangeable but up to 50 less expensive anchors), *cert. denied*, ***512 U.S. 1221, 114 S. Ct. 2710, 129 L. Ed. 2d 837 (1994)***; ***Woods Exploring & Producing Co. v. Aluminum Co. of Am., 438 F.2d 1286, 1305-07 (5th Cir. 1971)*** (concluding that single natural gas field constituted relevant market), *cert. denied*, ***404 U.S. 1047, 92 S. Ct. 701, 30 L. Ed. 2d 736 (1972)***; Hewlett-Packard Co. v. Arch Assocs. Corp., 908 F. Supp. 265, 270 (E.D. Pa. 1995) (complaint adequately pleaded relevant product market, even where market limited to distribution of Hewlett-Packard computer printers); Nat'l Communications Ass'n, Inc. v. AT&T Co., 808 F. Supp. 1131, 1135 (S.D.N.Y. 1992) (denying motion to dismiss because HN24[] "a monopolist, or person attempting to monopolize, can be found liable in regard to distribution of its own product if it is (1) illegally attempting to destroy competition by refusing to deal or (2) controlling an essential service or bottleneck").

Based on*Kodak* and its progeny, this Court is unable to hold as a matter of law that there cannot be, in the abstract, for *Section 2* monopolization charges, a separate product market limited to Raven/Aerostar balloon envelope replacement fabrics. [23] However, that does not end the Court's inquiry as to whether plaintiff has submitted sufficient evidence, in opposition to Defendants' Motion for Summary Judgment, to warrant a trial on the issue of monopolization.

[84]** In *Kodak*, looking from the perspective of Kodak equipment owners, the Supreme Court concluded that the relevant market was composed only of those companies that serviced Kodak machines, as the service and parts for Kodak equipment were not interchangeable with service and parts for the original equipment of other manufacturers. *Kodak, 504 U.S. at 482*.

This Court concludes that there is insufficient evidence in the record to support such a finding. First, the record is undisputed that Defendants did not have any monopoly power in the sale of balloons, as there were a number of manufacturers of balloons (consisting of the entire balloon, that is the "basket" and the "envelope"). Gregory Michalik, quoted by both parties as a knowledgeable FAA official, identified Cameron Balloons, U.S., and Lindstrand U.S.A. as competing hot air balloon manufacturers. **[*216]** (Michalik Dep., Defs.' Ex. G, at 12.) Mr. DiGiovanni identified Balloon Works and Thunder & Colt as competing hot air balloon manufacturers. (DiGiovanni Dep., Pl.'s Ex. B, at 23-24.) Mr. Waligunda identified Picard as another competing hot air balloon manufacturer. (Waligunda Dep., Pl.'s Ex. F, at 16.) It is unclear **[**85]** from the record whether Harrison Aire had purchased any balloons from any third-party manufacturers. There was nothing to prevent him from doing so.

Although there is evidence in the record that Defendants may have misrepresented the facts by implying that owners or users of their balloons had to purchase replacement envelopes from Defendants (*see* discussion above), the evidence is clear that this was not a requirement of the FAA. Plaintiff had reason to know Defendants' statements were not FAA-mandated, as Mr. Harrison testified that the FAA authorized third-parties to sell Raven/Aerostar replacement parts through the PMA and STC processes. (Harrison Dep., Pl.'s Ex. H, at 164.) Mr. Harrison testified that he believed the FARs required total compliance with Defendants' manual (Harrison Dep., Defs.' Ex. C, at 51), but his interpretation overlooks the distinction, well articulated in this record, and discussed above, between the ICA and the ALS portions. Mr. Harrison also testified that he knew, back when the "big ride" balloon required repairs to remain flyable, that Head Balloons and Custom Nine Designs sold replacement balloon envelopes (Harrison Dep., Defs.' Ex. D, at 13; Harrison **[**86]** Dep., Defs.' Ex. B, at 124-28.) Mr. Harrison's testimony does not indicate any awareness that other operators of balloons purchased replacement fabrics from entities other than the manufacturer of the balloon, but other witnesses' testimony describes purchases from third-parties. (*E.g.*, Waligunda Dep., Pl.'s Ex. F, at 28.) Thus, the *Kodak* facts do not fit.

Further, in *Kodak*, there was additional anticompetitive conduct by Kodak which the Supreme Court held required a trial on the overall issue of monopolization. *See* *504 U.S. at 483* ("Respondents have presented evidence that Kodak took exclusionary action to maintain its party monopoly and used its control over parts to strengthen its monopoly share of the Kodak service market."). There is insufficient evidence in the record to show that defendants achieved monopoly power in the replacement market, by virtue of conduct illegal under *Section 2*.

Thus, the record shows only that Plaintiff had the subjective belief that it thought it had to purchase replacement envelopes from Defendants. However, this subjective belief does not, in and of itself, entitle Plaintiff to a trial on this issue. ***HN25***[] "Conclusory statements, **[**87]** hearsay, and testimony based merely on conjecture or subjective belief are not competent summary judgment evidence." *Frosty Bites, Inc. v. Dippin' Dots, Inc., 2003 U.S. Dist. LEXIS 8472, at *8, No. 3-01-CV-1532-M (N.D. Tex. May 19, 2003)*; *see also* McKnight v. Sch. Dist. of Phila., 171 F. Supp. 2d 446, 448 (E.D. Pa. 2001) ("Unsubstantiated and subjective beliefs and opinions are not competent summary judgment evidence.") (quotation omitted). There is no objective evidence in the record that supports Plaintiff's misunderstanding or misconception of the requirements for replacement fabric. If, as Plaintiff contends, the Defendants had a plan of persuading all other balloon owners that they had to buy replacement fabric for Defendants' balloons only from Defendants, the plan did not succeed.

[23] There does not appear to be any dispute that the geographic market is the entire United States.

There is abundant testimony in the record that other balloon owners knew they could buy replacement fabric from entities other than the manufacturer, and that they **[*217]** did so. The record shows that other balloon owners knew they were not obligated to purchase Defendants' replacement fabric in repairing their Raven/Aerostar hot air balloons; other balloonists purchased **[**88]** third-party fabric for their Raven/Aerostar hot air balloons. While one replacement fabric competitor (Head Balloons) had not been advertising too heavily, Custom Nine Designs had been loudly promoting itself by sending letters to Defendants' distributors and advertising its services in industry magazines. (Waligunda Dep., Pl.'s Ex. F, at 27-28.) Mr. Waligunda, a distributor for Defendants, testified that Defendants sought to put Custom Nine Designs out of business because "from a competitor's standpoint, [Custom Nine Designs] was hurting [Defendants'] sales." (*Id.* at 28.) This statement implies that other hot air balloon owners were buying replacement fabric from others. Moreover, in their newsletter sent to Raven/Aerostar balloon owners, Defendants published test data that purportedly demonstrated the superiority of Defendants' own fabrics compared to those of their competitors in order to convince their readership to remain loyal to Defendants' product line. (West Aff. of Jan. 2004, Ex. A, at 5.) Defendants would not have published these comparisons had they not felt commercially threatened by the presence and availability of these competing fabrics. Mr. Harrison himself **[**89]** testified that he had contemplated purchasing less expensive third-party fabric from Colvin Rouse and other distributors, but never did so, believing that Defendants' ICA forbade him from using other replacement fabrics. (Harrison Dep., Defs.' Ex. D, at 43-44.)

The Court finds that Defendants' ICA did not forbid Plaintiff from purchasing other manufacturers' fabric and that a reasonable investigation on this point by Plaintiff would have disclosed, accurately, the relevant regulatory environment and that Plaintiff could buy replacement fabric from anyone who manufactured them to the FAA standards.

This Court concludes it would be error to transform Defendants' statements in their ICA into an antitrust violation. Further probing by Plaintiff, rather than mere reliance on the admitted ambiguity of Defendants' ICA, would have revealed that there was no bar to Plaintiff's securing replacement fabric from other sources. Plaintiff cites no case allowing mere ambiguities or misrepresentations to become an antitrust violation.

Returning to the concept of market power in a relevant market, there is no dispute that Raven/Aerostar was one of several manufacturers of hot air balloons. (*See,* **[**90]** *e.g.*, Michalik Dep., Defs.' Ex. G, at 12, identifying Cameron Balloons, U.S., and Lindstrand U.S.A as market competitors; DiGiovanni Dep., Pl.'s Ex. B, at 23-24, identifying Balloon Works and Thunder & Colt; Waligunda Dep., Pl.'s Ex. F, at 16, identifying Picard.) As noted above, there is no evidence whatsoever that Defendants had a monopoly share of the sales of hot air balloons themselves. Assuming *arguendo* that Plaintiff reasonably believed replacement parts for Defendants' hot air balloons had to be purchased from Defendants alone, that does not necessarily make Defendants monopolists in the sale of replacement parts. The Supreme Court in *Kodak* did state that a market is defined with reference to reasonable interchangeability. *504 U.S. at 481-82*. In *Kodak*, the Supreme Court held that the market for repair parts and services for Kodak photocopiers was a valid relevant market because repair parts and services for Kodak machines are not interchangeable with the service and parts used to fix other copiers. *Id.* As the Supreme Court said, ***HN26***[↑] it is the reasonable perception of the purchasers in the marketplace that **[*218]** are relevant in determining interchangeability.

[91]** In this case, the objective evidence is clear that replacement fabrics manufactured by others are interchangeable with Defendants' replacement fabric for Raven/Aerostar hot air balloons. Both Head Balloons and Custom Nine Designs were authorized by the FAA to sell replacement parts specifically for Defendants' hot air balloons. (*E.g.*, Waligunda Dep., Pl.'s Ex. F, at 21-22, 26.) There is no evidence in the record, other than Plaintiff's own mistaken beliefs, to support finding a lack of interchangeability. Indeed, it is not the fact of interchangeability that is in dispute here, but it is only that Defendants are alleged to have misrepresented the fact of interchangeability. However, the misrepresentations do not themselves become antitrust violations because there is no evidence that the Defendants had market power in the sale of hot air balloons themselves, or in the overall sale of replacement fabric.

It would not be an antitrust violation for Defendants falsely to assert that the purchaser of their hot air balloons should use only Defendants' replacement parts. In *Queen City Pizza, Inc. v. Domino's Pizza, Inc., supra*, the Third

Circuit affirmed summary **[**92]** judgment dismissal of an antitrust complaint where the plaintiff had alleged an illegal tie in the sale of products associated with a pizza franchise and required by the contractual documents existing between the parties. On the issue of the relevant product market, the court said the inquiry must be

> whether pizza makers in general might use such products interchangeably. Clearly, they could. Were we to adopt plaintiffs' position that contractual restraints render otherwise identical products non-interchangeable for purposes of relevant market definition, any exclusive dealing arrangement, output or requirement contract or franchise tying agreement would support a claim for violation of the antitrust laws.

124 F.3d at 438. Applying that holding to his case, the Court cannot conclude that, assuming Defendants made misrepresentations in their marketing efforts, these misrepresentations can alter what the market realities were in terms of defining the relevant product market.

The Third Circuit distinguished *Kodak* as follows:

> *Kodak*, we believe, held that ***HN27***[] a plaintiff's proposed relevant market in a unique and non-interchangeable derivative product **[**93]** or service cannot be defeated on summary judgment by a defendant's assertion that the proposed derivative market is cross-elastic with the primary market, if there is a reasonable possibility that the defendant's assertion about cross-elasticity is factually incorrect. . . . Here, it is uncontroverted that Domino's approved supplies and ingredients are fully interchangeable in all relevant respects with other pizza supplies outside the proposed relevant market. For this reason, dismissal of the plaintiffs' claim as a matter of law is appropriate.

124 F.3d at 439-40.

The Court also notes that there is no evidence in this record of some of the other indicia of a monopoly, such as increasing prices, reduced competition, or difficulty of entry into the marketplace. The evidence is uncontradicted that several other hot balloon manufacturers became active competitors of Defendants during the time period, and also the market for replacement fabrics expanded, and other entities became involved in selling replacement fabrics for different manufacturers' balloons. (*See, e.g.*, West Aff. Of Nov. 2003 P13; Waligunda Dep., Pl.'s Ex. F, at 21-22, 26.) Furthermore, any evidence **[**94]** on **[*219]** pricing is minimal. Plaintiff contends that Defendants priced its replacement fabric at a higher price than available elsewhere, but there is no other indication of any other pricing behavior by the Defendants or price levels in the market in the record.

2. *Section 1* Tying Claim

Count II of Plaintiff's complaint charges an antitrust tying arrangement, and alleges in paragraph 38, "Defendants possessed monopoly power in the market for the tying product (Aerostar hot air balloons) and used this monopoly power to restrain trade in the tied product (replacement fabric for Aerostar balloon envelopes)." Plaintiff's tying charges are not specifically identified to either *Section 1* or *Section 2*, but the law is clear that ***HN28***[] a tying claim can be made under both *Sections 1and 2*. [24] *Ortho Diagnostic Sys. v. Abbott Lab., 920 F. Supp. 455, 472 n.26 (S.D.N.Y. 1996)*, *Caldera, Inc. v. Microsoft Corp., 72 F. Supp. 2d 1295, 1328 (D. Utah 1999)*, *In re Indep. Serv. Orgs. Antitrust Litig., 114 F. Supp. 2d 1070, 1082 n.6 (D. Kan. 2000)*. In *Kodak*, the tying claim was clearly brought under *§ 1*. [25]

---

[24] The Court notes some pleading issues relating to the tying claims in Plaintiff's complaint. In paragraph 4, Plaintiff asserts that it brings this case "by reason of Defendants' violation of *§ 1 of the Sherman Act*, *15 U.S.C. § 1*." Because Plaintiff has cited both *Sections 1and 2* in his complaint, and given the requirements of liberal construction of pleadings under the Federal Rules, the Court will consider Plaintiff's tying claims as brought under both *Sections 1and 2*.

[25] In Plaintiff's brief on the *Kodak* issue, the Plaintiff also seeks to cite Section 3 of the Clayton Act, *15 U.S.C. § 14*, as support for the tying claim. However, because there is no mention of *Section 3 of the Clayton Act* in Plaintiff's complaint, the Court will, therefore, not consider it. However, this is not prejudicial to Plaintiff as such a statutory basis for a tying claim would be redundant to the claims stated under *Sections 1and 2* of the Sherman Act.

[95]**

Defendants deny there was any condition that Defendants' replacement fabric had to accompany the purchase of a new balloon from Defendants, nor any condition that replacement parts be purchased only from Defendants.

b. Analysis

HN29[] "In a tying arrangement, the seller sells one item, known as the tying product, on the condition that the buyer also purchases another item, known as the tied product." *Allen-Myland, Inc. v. IBM Corp., 33 F.3d 194, 200 (3d Cir. 1994)*. "The antitrust concern over tying arrangements **[**96]** is limited to those situations in which the seller can exploit its power in the market for the tying product to force buyers to purchase the tied product when they otherwise would not, thereby restraining competition in the tied product market." *Id.*

In support of their argument that Plaintiff cannot establish its prima facie case for a tying arrangement. Defendants cite Mr. Harrison's deposition testimony that he had options to purchase balloon fabric from any number of Aerostar distributors, and at times did so at half price. (Harrison Dep., Defs.' Ex. B, at 112-13.) Defendants contend that Plaintiff also had PMA and STC options, *14 C.F.R. § 21.303*, but opted not to pursue them. Defendants contend that there is no evidence that indicates that Aerostar controlled a particular market share within what is clearly a market which is subject to significant regulation. Plaintiff responds that its tying arrangement allegation remains viable as Defendants required purchasers to accept burdensome terms that could not be exacted in a competitive market: i.e., to search for fabric that had been "tested and approved **[*220]** according to Raven factory standards," or to obtain **[**97]** permission before performing a top-half fabric replacement.

Under the tying allegation, the Court first notes that the Complaint alleges that the defendant possessed monopoly power in the market for the tying product (Aerostar Hot Air Balloons) (Compl. P38), but there is no evidence in the record to support a single brand market of hot air balloons. ***HN30***[] "Relevant markets generally cannot be limited to a single manufacturer's products." ABA ANTITRUST, *supra*, at 566 (noting exception only for some after-market cases). *See Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 479 (3d Cir.)* (en banc), *cert. denied*, *506 U.S. 868, 113 S. Ct. 196, 121 L. Ed. 2d 139 (1992)*. The evidence shows, to the contrary, that Defendants had several competitors in the sales of balloons. (Michalik Dep., Defs.' Ex. G, at 12.) As noted above in the *Section 2* discussion, there is no evidence that Defendants had monopoly power in the sale of the balloons, usually defined as a large percentage of the relevant market. ***HN31***[] There cannot be an illegal tie without monopoly power over the tying product. *Kodak, 504 U.S. at 464*. [26]

[98]** In the *Kodak* case, Kodak urged that because it did not have a monopoly in the sale of original equipment, it could not be liable for tying its replacement parts and the tied product service. The Supreme Court concluded that in *Kodak* the record showed that the ISOs were facing Kodak market power in the service and parts markets, and that the evidence allowed an inference that Kodak had market power to raise prices and drive out competition in the after-markets, and had presented evidence that Kodak did exactly that. This evidence consisted of noting that market power existed because of locked-in customers, high information costs and discriminatory pricing. *504 U.S. at 477-78*.

To the contrary, the record in this case does not disclose any relation between parts and service, or other industry-wide anticompetitive practices, such as increasing market shares, locked-in customers, high information costs or any evidence about pricing other than Plaintiff's limited evidence that replacement fabric available from Defendants was priced higher than replacement fabric available from other purveyors. There is no evidence in the record that the quality was exactly the same. **[**99]** The record would only allow an inference that Defendants charged more for their replacement fabric because Plaintiff (and perhaps other potential customers who owned or operated hot air

[26] It is important to note that in *Kodak* the plaintiffs did not allege that the tying product was Kodak copiers, but alleged that service and parts are two distinct markets, and that Kodak had used its monopoly power over the parts market as the tying product, to compel the owners and users of Kodak equipment to use Kodak's own service personnel, rather than ISOs.

balloons) thought they had to buy the replacement fabric from Defendants. But the record does not allow an inference this higher price was due to an illegal tie.

In *Kodak*, the Supreme Court noted evidence that Kodak had agreed to sell parts to third parties only if they had agreed not to buy service from the ISOs. There were also many other restrictions instituted by Kodak as to the sale of replacement parts, all designed to put economic pressure on users of Kodak copiers to use Kodak's own service personnel. In the present case, there are no issues or contentions concerning service.

In *Kodak*, the Supreme Court held that there was a factual issue for trial as to **[*221]** whether Kodak had appreciable economic power in the tying market, i.e., the market for replacement *parts* for Kodak copiers. In *Kodak*, the Court related in detail why there could be a separate product market for replacement parts for Kodak copiers. In fact, in *Kodak*, there was really no dispute that replacement parts for **[**100]** Kodak machines were unique and not interchangeable with other copiers.

In the present case, this product distinctiveness is lacking. There is no evidence that only Defendants' replacement fabric could be used on Defendants' hot air balloons. Although Defendants did claim at various times that the owner of their balloons should use their replacement fabric, and even asserted that the FAA required this, there is nothing in the record to show that, in fact, for scientific, safety or any other reason, only Defendants' replacement fabric could be used on Defendants' hot air balloons.

The Court notes in passing that the Complaint alleges two separate markets. The market alleged in Count I for *Section 2*, as noted above, is the "Raven/Aerostar hot air balloon replacement fabric market" whereas under Count II, charging tying, the tying product is alleged to be Aerostar hot air balloons, but the tied product is, with only slightly different descriptive language, alleged to be the same market as in Count I, charging monopolization and attempted monopolization. [27]

[101]** As noted above, the Supreme Court rejected as a matter of law Kodak's contention that a single brand of product or service can never be a relevant market, holding "the relevant market for antitrust purposes is determined by the choices available to Kodak equipment owners." *504 U.S. at 481-82*. The Court accepted as a fact, based on the record in *Kodak*, that parts for Kodak equipment are not interchangeable with other manufacturers' parts, and thus, there was an issue of whether Kodak used its parts sales as a tie to service its equipment owners to use Kodak service. Thus, the relevant market from the Kodak equipment owners perspective is composed of only those companies that service Kodak machines. *Id.*

The evidence in this case does not allow the Court to reach such a conclusion, because there is an acknowledgment running throughout the case that the replacement envelopes manufactured by any company and meeting standards are in fact interchangeable with Defendants' replacement fabric, and that some balloon owners realized this, and purchased replacement envelopes from competing manufacturers. (*See supra* pp. 52-54.) The record discloses that it was only because **[**102]** of the alleged fraud by Defendants toward Plaintiff that Plaintiff believed that it had to buy replacement envelopes from Defendants. For this reason, the Court concludes that Plaintiff's evidence does not show a "tie."

3. Whether Plaintiff Has Been Injured by Reason of Defendants' Violation of the Antitrust Laws

The Court notes another defect with Plaintiff's claims. ***HN32***[] Under the antitrust laws, a plaintiff can only sue for injuries sustained as a result of that forbidden by the antitrust laws. Here, Plaintiff's damages, if any, arise out of fraud, **[*222]** not out of the abuse of market power by Defendants. Thus, the Court concludes Plaintiff has not suffered "antitrust injury."

---

[27] There is a certain inconsistency in Plaintiff's definitions. If Defendants indeed have a monopoly of the replacement fabric market, as alleged in Count I for monopolization purposes, it is hard to understand how Defendants would need the help of a "tie", i.e., the forced sale of replacement fabric, as a "tied" product. However, inconsistent contentions, particularly in the summary judgment context, are not fatal.

Mr. Harrison testified during his May 13, 2003 deposition regarding his opinion whether Defendants' manuals were deliberately misleading and what effect the manuals had on his behavior. Mr. Harrison stated "that Raven clearly in their manuals said that you could not use anything other than Raven fabric." (Harrison Dep., Pl.'s Ex. H, at 151.) Mr. Harrison testified:

> There was fabric available on the outside market that was also being represented as being the same manufacturer [sic] of Raven, and that **[**103]** it was available to the . . . balloon public, if you wanted to - if you wanted to buy it. . . . But when I came up with any - brought the question up to Aerostar - or Raven, they said if it doesn't come from us, if you don't have an invoice from us . . . it's not Raven fabric, and it's in violation of the FAA 43, and it's unairworthy.

(*Id.* at 152-53.) His deposition continued as follows, in pertinent part:

> Q. What was your particular complaint to Raven then if you didn't believe it was misleading? What was your particular complaint?
> A. The complaint was if - if the manufacturer is providing or a supplier is providing the same material to Raven, and it's available directly at half the cost to someone else, same fabric, and the same factory is saying, "We make it for Raven, and the same specs coming off the same mills, the same run, the same colors and everything. We'll provide it to you directly."
> Q. Would it be - go ahead. You finish.
> A. And Raven said, "No. You can't do that."

(*Id.* at 157.) Mr. Harrison thought he ought to be able to purchase fabric from another source and he believed that the particular guidelines set forth in the Raven **[**104]** manual forbade him from doing so. (*Id.* at 158.) Mr. Harrison testified that he had contemplated purchasing less expensive third-party fabric from Colvin Rouse and other distributors, but never did so, believing that Defendants' ICA restricted him from using other people's fabrics. (Harrison Dep., Defs.' Ex. D, at 43-44.)

Mr. Harrison testified that he had frequently asked Defendants' representatives whether the policy regarding replacement fabric had changed, and, according to Mr. Harrison, the representatives responded, "'As long as you buy the fabric, we don't care what you do,' basically. The emphasis, 'buy the fabric.'" (Harrison Dep., Pl.'s Ex. H, at 161.) As Mr. Harrison testified, even though Plaintiff would have preferred using third-party fabric, because it believed that federal law required its compliance, Plaintiff continued purchasing Raven/Aerostar fabric:

> Q. Did you believe Raven was requiring you to purchase fabric only from Raven?
> A. Yes.
> Q. Did you believe that they had the authority to do that?
> A. Yes.
> Q. Did you make any investigation with the FAA or any other source as to whether or not they indeed had the authority to do that?
>
> A. **[**105]** It was an FAA document that said you have to do that.
> Q. What FAA document said that they had to do it?
> A. The manual said if you don't use Raven, Aerostar fabric your balloon is unairworthy. It's on an FAA document.

[*223] (*Id.* at 163.) The "FAA document" to which Mr. Harrison refers is Defendants' ICA itself, which, as stated above, is only reviewed by the FAA before publication and promulgation. Mr. Harrison continued to believe that the FAA had authorized Defendants to forbid its customers from patronizing third-party suppliers until he received a forwarded copy of an FAA letter, contradicting Defendants' position. (*Id.* at 162.) This "letter from Gallagher," as Mr. Harrison referred to it, does not appear in the exhibits submitted to the Court. As noted above, Mr. Harrison's belief was simply unfounded. That his belief was caused by Defendants' misrepresentation does not establish antitrust injury. In addition to his presumed inability to purchase third-party replacement fabric, Mr. Harrison testified that he abandoned plans to design and replace his own balloon fabric and to sell his excess fabric to other balloonists, because he independently concluded that **[**106]** this venture would have been professionally difficult given

Defendants' ICA language limiting use of third-party fabric, but he could not say that an FAA representative had told him he could not pursue the venture unless Defendants retracted their ICA. (Harrison Dep., Defs.' Ex. D, at 48-50.)

Plaintiff has submitted evidence (including an expert's report) that it has suffered damages due to Defendants' allegedly fraudulent misrepresentations, but Plaintiff has not supported its antitrust claims with evidence that it suffered injury of the type that the antitrust laws were intended to prevent, and that flows from that which makes the defendants' acts unlawful, as required by the landmark ruling in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. In *Brunswick*, independent bowling centers brought an antitrust action against the Brunswick Corporation, then one of the two largest bowling equipment manufacturers and the largest operator of bowling centers. Brunswick had been selling bowling equipment to the plaintiffs' competitors on credit, and had started acquiring the financially unstable alleys when they defaulted **[**107]** in payments. The *Brunswick* plaintiffs claimed that Brunswick's acquisitions might substantially lessen competition or tend to create a monopoly under *Section 7 of the Clayton Act*, which prohibits mergers whose effect "may be substantially to lessen competition, or to tend to create a monopoly."

The issue in *Brunswick* was "whether antitrust damages are available where the sole injury alleged is that competitors were continued in business, thereby denying [the plaintiffs] an anticipated increase in market shares." *429 U.S. at 484*. The parties did not contest the lower court's determination that the acquisitions were unlawful; nor did the parties contest the lower court's determination that had Brunswick not acquired these properties that the moribund companies would have gone out of business, thus increasing the plaintiffs' income. *Id.* However, the Court concluded that the lower court had erred in determining that once a merger occurred in violation of *Section 7*, that all dislocations caused thereby are automatically actionable, regardless of whether the consequences had anything to do with the reason the merger was condemned. *Id. at 487.* **[**108]** As the Court explained, ***HN33***[] "Every merger of two existing entities into one, whether lawful or unlawful, has the potential for producing economic readjustments that adversely affect some person. But Congress has not condemned mergers on that account; it has condemned them only when they may produce anticompetitive effects." *Id.*

Regarding the instant case, this Court only can conclude that Plaintiff has not presented sufficient evidence to show a **[*224]** genuine issue of fact that he suffered any ***HN34***[] *antitrust* injury, "which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Id. at 489*. Assuming *arguendo* that Plaintiff established liability, Plaintiff has not produced anything of record that would demonstrate that its injury reflects the anticompetitive effect either of the violation, or of anticompetitive acts made possible by the violation. *Id.* Simply put, Plaintiff has adduced no evidence demonstrating that its damages followed an antitrust violation and were caused by that characteristic which made the violation one sounding in antitrust.

The Third Circuit has applied the **[**109]** *Brunswick* rule in several cases. In *Alberta Gas Chemicals, Ltd. v. E.I. Du Pont Nemours & Co., 826 F.2d 1235 (3d Cir. 1987)*, the Third Circuit affirmed a grant of summary judgment on *Brunswick* grounds, holding that plaintiffs must prove more than harm causally linked to an illegal presence in the market, but that antitrust injury must reflect the anticompetitive effect, either of the violation or anticompetitive acts made possible by the violation. *826 F.2d at 1240*. In this case, Plaintiff's injuries have nothing to do with Defendants' market power, but rather relate to the contention that Defendants misrepresented the FAA regulations in its ICAs, and made (at least) Plaintiff, as a prospective purchaser, believe that Plaintiff had to buy its replacement fabric from Defendants. Any injuries that Plaintiff suffered would have come from Defendants' misrepresentations, not from any market power, abuse of market power or other anticompetitive conduct. *See also Int'l Raw Materials, Ltd. v. Stauffer Chem. Co., 978 F.2d 1318 (3d Cir. 1992)* (granting summary judgment on this ground, albeit with different facts).

4. Whether Plaintiff [110] Has Shown Any Impact on Competition Generally**

It is axiomatic that ***HN35***[] as part of its *prima facie* case, a plaintiff must show that the conduct of the defendant restrained competition generally, in addition to causing plaintiff harm. *See generally* ABA ANTITRUST, *supra*, at 61-73. The Third Circuit has said, "mindful that ***antitrust law*** aims to protect competition, not competitors, we must analyze the antitrust injury question from the viewpoint of the consumer. *Alberta Gas Chems., Ltd., 826 F.2d at*

1242. In this case, evidence showing a diminution of competition from the viewpoint of the consumer is sparse. However, the Court need not consider the issue in view of the holdings above.

V. Conclusion

The Court concludes that whether the applicable statute of limitations had expired before Plaintiff filed its Complaint remains an issue of fact for trial. The Court also rejects Defendants' argument that summary judgment is warranted upon application of implied immunity to Plaintiff's antitrust claims. However, as the Court concludes that Plaintiff has failed to substantiate its *prima facie* case regarding its monopoly and tying arrangement allegations, **[**111]** the Court will grant Defendants' Motion for Summary Judgment. As to Plaintiff's negligence and fraud claims, the defendants' Brief did not discuss or refute them. Therefore, the Court cannot grant summary judgment on these claims. In light of the holdings above, the Court will have a final pre-trial conference on the state law claims promptly.

An appropriate order follows.

ORDER

AND NOW, this 30th day of April, 2004, upon consideration of Defendants' Motion **[*225]** for Summary Judgment (Docket No. 12), it is hereby ORDERED that Defendants' Motion is GRANTED as to Counts I and II. The Court will have a final pre-trial conference on the remaining claims on Friday, May 7, 2004, at 2 p.m. by telephone.

BY THE COURT:

MICHAEL M. BAYLSON, U.S.D.J.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Sherman Act, Claims**

To establish a *15 U.S.C.S. § 1* violation, a plaintiff must show: (1) a contract, combination or conspiracy; (2) that imposed an unreasonable restraint of trade. It is incontestable that concerted action in restraint of trade lies at the heart of a violation of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act. In other words, *§ 1* does not reach conduct that is wholly unilateral.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

In the context of *15 U.S.C.S. § 1*, proof of concerted action requires evidence of a relationship between at least two legally distinct persons or entities. Thus, it is perfectly plain that an internal "agreement" to implement a single, unitary firm's policies does not raise the antitrust dangers that *§ 1* was designed to police. The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

15 U.S.C.S. § 1 is not violated by the internally coordinated conduct of a corporation and one of its unincorporated divisions. For similar reasons, the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act. Accordingly, a parent and its wholly owned subsidiary are legally incapable of conspiring with each other for purposes of *§ 1*. A parent and a wholly owned subsidiary always have a unity of purpose or a common design so the law's concern with a sudden joining of independent interests is not present in such a case.

Healthcare Law > Business Administration & Organization > Hospital Privileges > Professional Review

Healthcare Law > Business Administration & Organization > Hospital Privileges > Restrictions

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

HN7[] **Peer Review, Organizations**

The court has applied the "intracorporate immunity" doctrine articulated in Copperweld to hold that a hospital lacked the capacity to conspire with its peer review committee for purposes of *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Peer Review > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Organizations

HN8[] Antitrust & Trade Law, Sherman Act

The court has continued to recognize the existence of one narrow exception to the intracorporate immunity doctrine--the independent personal stake exception. An exception to the intracorporate immunity doctrine may be justified when the officer has an independent personal stake in achieving the corporation's illegal objective. If the officer cannot cause a restraint to be imposed and his firm would have taken the action anyway, then any independent interest is largely irrelevant to antitrust analysis. Put differently, to give advice when asked by the decisionmaker is not equivalent to being the decisionmaker itself.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Antitrust & Trade Law, Sherman Act

In the context of *15 U.S.C.S. § 1*, a plaintiff can offer direct or circumstantial evidence to prove concerted action.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Antitrust & Trade Law, Sherman Act

Antitrust law limits the range of permissible inferences from ambiguous evidence in a *15 U.S.C.S. § 1* case. Direct evidence is extremely rare in antitrust cases and is usually referred to as the smoking gun. Direct evidence in this context is explicit and requires no inferences to establish the proposition or conclusion being asserted. Mere contacts and communications, or the mere opportunity to conspire, among antitrust defendants is insufficient evidence of an anticompetitive conspiracy.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN11[] Standards of Review, De Novo Review

The appellate court reviews a grant of summary judgment de novo.

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN12[] Commercial Interference, Prospective Advantage

Virginia law permits recovery for tortious interference where a party can show (1) the existence of a business relationship or expectancy, with a probability of future economic benefit to plaintiff; (2) the defendant's knowledge of the relationship or expectancy; (3) a reasonable certainty that absent defendant's intentional misconduct, plaintiff would have continued in the relationship or realized the expectancy; and (4) damages to plaintiff. Proof of the existence of the first and third elements of the tort must meet an objective test, and mere proof of a plaintiff's belief and hope that a business relationship will continue is inadequate to sustain the cause of action. Instead, a plaintiff must establish a probability of future economic benefit, not a mere possibility. When a plaintiff is alleging that a third party has interfered with a business expectancy rather than with an actual contract, the plaintiff must show that the defendant interfered by employing improper methods. Improper methods are those means that are illegal or independently tortious, such as violations of statutes, regulations, or recognized common-law rules.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Procedure > Appeals > Dismissal of Appeals > General Overview

HN13[] **Standards of Review, De Novo Review**

The appellate court reviews the dismissal of a complaint under *Fed. R. Civ. P. 12(b)(6)* de novo. On appeal from an order granting a *Rule 12(b)(6)* motion to dismiss, the court accepts as true the facts as alleged in the complaint, views them in the light most favorable to the plaintiff, and recognizes that dismissal is inappropriate unless it appears to a certainty that the plaintiff would be entitled to no relief under any state of facts which could be proved in support of his claim.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN14[] **Industry Practices, Insurance Company Operations**

By their clear terms, *Va. Code Ann. §§ 38.2-2203*, *38.2-4221*, *38.2-4312* do not apply to a for-profit stock corporation that operates in the field of accident and sickness insurance.

Governments > Legislation > Statutory Remedies & Rights

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN15[] **Legislation, Statutory Remedies & Rights**

Virginia would not recognize a private cause of action under *Va. Code Ann. § 38.2-3408*.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN16[] **Industry Practices, Insurance Company Operations**

See *Va. Code Ann. § 38.2-3408*.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN17[] **Industry Practices, Insurance Company Operations**

See *Va. Code Ann. § 38.2-200*.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN18[] **Industry Practices, Insurance Company Operations**

Va. Code Ann. § 38.2-221 grants the State Corporation Commission the power to levy and enforce penalties against insurers for violations of the insurance code. *Va. Code Ann. § 38.2-221*. That section, however, also states that the power and authority conferred upon the Commission by this section shall be in addition to and not in substitution for the power and authority conferred upon the courts by general law to impose civil penalties for violations of the laws of the Commonwealth.

Governments > Legislation > Statutory Remedies & Rights

HN19[] **Legislation, Statutory Remedies & Rights**

Federal courts should be reluctant to read private rights of action into state laws where state courts and state legislatures have not done so. Without clear and specific evidence of legislative intent, the creation of a private right of action by a federal court abrogates both the prerogatives of the political branches and the obvious authority of states to sculpt the content of state law.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Governments > Legislation > Statutory Remedies & Rights

HN20[] **Regulated Practices, Trade Practices & Unfair Competition**

The Virginia Unfair Trade Practices Act (UTPA) does not create a private cause of action because it lacks explicit language creating such an action.

Business & Corporate Compliance > ... > Industry Practices > Unfair Business Practices > Unfair Trade Practices Acts

Governments > Legislation > Interpretation

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

Governments > Legislation > Statutory Remedies & Rights

HN21[] **Unfair Business Practices, Unfair Trade Practices Acts**

Like the Virginia Unfair Trade Practices Ac (UTPA), *Va. Code Ann. § 38.2-3408* does not create a private right of action because it does not contain any specific statutory language creating such an action. The existence of *§ 38.2-221* does not evince a legislative intent to create private rights of action under the insurance code. Rather, that statutory provision only leaves in place pre-existing statutory and common-law rights of action.

HN23[] **Savings Clause, Business of Insurance Test**

The McCarran-Ferguson Act provides that no Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any state for the purpose of regulating the business of insurance. *15 U.S.C.S. § 1012(b)*. The McCarran-Ferguson Act does not apply to federal laws that are specifically targeted at the business of insurance. For a federal law to be preempted by McCarran-Ferguson: (1) the state law in question must be enacted for the purpose of regulating the business of insurance; (2) the federal law must not be specifically related to the business of insurance; and (3) the federal law must invalidate, impair or supersede the state law in question.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN24[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeer Influenced and Corrupt Organizations Act is not a law that specifically relates to the business of insurance.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

Insurance Law > Industry Practices > General Overview

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN25[] **Industry Practices, Insurance Company Operations**

Va. Code Ann. tit. 38.2 is a set of laws enacted for the purpose of regulating the business of insurance. Statutes aimed at protecting or regulating the relationship between insurer and insured, directly or indirectly are laws regulating the "business of insurance." The focus of the McCarran-Ferguson Act is upon the relationship between the insurance company and its policyholders. Accordingly, the McCarran-Ferguson Act encompasses laws that possess the end, intention, or aim of adjusting, managing, or controlling the business of insurance. Applying these standards, Va. Code Ann. tit. 38.2, specifically *Va. Code Ann. §§ 38.2-200*, *38.2-221*, *38.2-3408* is a set of laws enacted for the purpose of regulating the business of insurance. Va. Code Ann. tit. 38.2 is limited to insurance companies and creates a comprehensive network of statutory provisions aimed at controlling and managing the business of insurance.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

HN26[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In the context of whether the Racketeer Influenced and Corrupt Organizations Act has invalidated, impaired or superseded Nevada's laws regulating insurance, the U.S. Supreme Court has defined "invalidate" as to render ineffective, generally without providing a replacement rule or law, and "supersede" as to displace (and thus render ineffective) while providing a substitute rule.

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN27[] **Industry Practices, Federal Regulations**

When federal law does not directly conflict with state regulation, and when application of the federal law would not frustrate any declared state policy or interfere with a state's administrative regime, the McCarran-Ferguson Act does not preclude its application.

Insurance Law > Industry Practices > Insurance Company Operations > General Overview

Insurance Law > Industry Practices > Federal Regulations > General Overview

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

Criminal Law & Procedure > ... > Fraud Against the Government > Mail Fraud > General Overview

HN34[] Claims, Fraud

The federal mail and wire fraud statutes prohibit the use of the mails or interstate wires in furtherance of schemes to defraud. *18 U.S.C.S. §§ 1341*, *1343*. For the government to obtain a conviction for mail or wire fraud it must prove (1) a scheme disclosing an intent to defraud; and (2) the use, respectively, of the mails or interstate wires in furtherance of the scheme. In a prosecution for mail or wire fraud, the government is not required to show reliance on any misrepresentation. To recover civil Racketeer Influenced and Corrupt Organizations Act (RICO) damages, however, an individual must also allege that he was injured "by reason of" the pattern of racketeering activity. *18 U.S.C.S. § 1964(c)*. To meet this burden with respect to mail fraud and wire fraud, a plaintiff must plausibly allege both that he detrimentally relied in some way on the fraudulent mailing or wire and that the mailing or wire was a proximate cause of the alleged injury to his business or property. The alleged fraud must be a classic one, the plaintiff must have justifiably relied, to his detriment, on the defendant's material misrepresentation.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Rule Application & Interpretation

HN35[] Motions to Dismiss, Failure to State Claim

Although as a general rule extrinsic evidence should not be considered at the *Fed. R. Civ. P. 12(b)(6)* stage, the court has held that when a defendant attaches a document to its motion to dismiss, a court may consider it in determining whether to dismiss the complaint if it was integral to and explicitly relied on in the complaint and if the plaintiffs do not challenge its authenticity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Counsel: ARGUED: George P. McAndrews, MCANDREWS, HELD & MALLOY, LTD., Chicago, Illinois, for Appellants.

Howard Feller, Bryan Alan Fratkin, MCGUIREWOODS, L.L. P., Richmond, Virginia, for Appellees.

ON BRIEF: Steven J. Hampton, Patrick J. Arnold, Jr., Peter J. McAndrews, Ronald A. Dicerbo, MCANDREWS, HELD & MALLOY, LTD., Chicago, Illinois; William G. Shields, THORSEN & SCHER, Richmond, Virginia, for Appellants.

Judges: Before WILLIAMS and MICHAEL, Circuit Judges, and William D. QUARLES, Jr., United States District Judge for the District of Maryland, sitting by designation. Judge Williams wrote the opinion, in which Judge Michael and Judge Quarles joined.

Opinion by: WILLIAMS

Opinion

[*217] WILLIAMS, Circuit Judge:

In this appeal, we consider whether Trigon Healthcare, Virginia's largest for-profit health insurance company, and its affiliated companies (collectively, Trigon), [1] **[**3]** were engaged in an anticompetitive conspiracy with medical

[1] Trigon Healthcare was recently purchased by Anthem Healthcare, an Indiana based health insurance company. To be consistent with the district court's usage and the factual record developed below, we refer to the corporation as "Trigon."

doctors and medical associations whose purpose was to harm chiropractors. American Chiropractic [2] filed this eight **[**2]** count complaint alleging violations of federal antitrust laws, the *Racketeer Influenced and Corrupt Organizations Act (RICO)*, and various state laws, claiming that Trigon and the medical doctors and associations were engaged in a conspiracy that used Trigon's reimbursement policies and treatment guidelines to limit severely the flow of insurance dollars to chiropractors and steer those monies toward **[*218]** medical doctors. Trigon argues that no conspiracy exists, and that it implemented its coverage policies unilaterally based on market supply and demand. The district court agreed with Trigon, dismissing two counts of the complaint for failure to state a claim and disposing of the remaining counts by granting Trigon's motion for summary judgment. Although we apply different reasoning than the district court in some areas, we affirm its disposition of the case in favor of Trigon.

I.

Trigon is a for-profit, publicly-traded health insurance company located in Virginia. Trigon's business consists of selling individual and group healthcare benefit plans to its subscribers. Generally, these healthcare benefit plans list the benefits and services covered by Trigon under the plan and describe any services that are excluded from the plan or are the subject of coverage limitations. Trigon makes a network of healthcare providers, including medical doctors, hospitals, pharmacies, chiropractors, and therapists, available to plan members to provide the services covered under the plan. Trigon creates this network of healthcare providers by entering into contracts with providers who are willing to abide by Trigon's terms and conditions, as set forth in Trigon's provider agreements. Simply put, "Trigon is essentially purchasing services from the healthcare **[**4]** providers who agree to become participating providers in Trigon's [provider] networks." (J.A. at 1344.) Trigon strives to offer "the best coverage at the lowest possible cost," and it endeavors to pay "the lowest possible price" to healthcare providers to ensure low-cost access for plan enrollees. (J.A. at 1597, 4579.) Chiropractic medicine is "a non-pharmaceutical, nonsurgical system of health care based on the self-healing capacity of the body" with the aim of "removing irritants to the nervous system and restoring proper function" to the nervous system. *Dorland's Medical Illustrated Dictionary* 347 (30th ed. 2003). Chiropractic treatment most commonly involves spinal manipulations [3] **[**5]** to relieve musculoskeletal complaints. *Id*. Trigon has provided coverage for chiropractic services since the 1980's, and Trigon "acknowledges that chiropractic care has a health effect, a positive health effect when rendered appropriately." [4] (J.A. at 4186.)

Despite Trigon's coverage of chiropractic services, and the fact that chiropractic medicine is, as the district court noted, a "recognized branch of the healing arts," *see* *American Chiropractic Association v. Trigon Healthcare, Inc., 258 F. Supp. 2d 461, 463 (W.D. Va. 2003)*, there is a history of animus from medical doctors and insurers aimed at chiropractors. Beginning in 1962, the American Medical Association (AMA), aided by the National Association **[*219]** of Blue Shield Plans, **[**6]** [5] **[**7]** began a "lengthy, systematic, successful, and unlawful" national group boycott aimed at destroying chiropractic medicine. *Wilk v. Am. Medical Ass'n., 895 F.2d 352, 371 (7th Cir. 1990)*. As the Seventh Circuit explained:

> In 1963 the AMA formed its Committee on Quackery (" Committee"). The Committee worked diligently to eliminate chiropractic. A primary method to achieve this goal was to make it unethical for medical physicians to professionally associate with chiropractors. Under former Principle 3, it was unethical for medical physicians to

---

[2] We refer to the appellants, the American Chiropractic Association, the Virginia Chiropractic Association, certain individual chiropractors and some patients of individual chiropractors, collectively as "American Chiropractic."

[3] Spinal manipulation is defined by the Agency for Health Care Policy and Research, a division of the U.S. Department of Health and Human Services, as "manual therapy in which loads are applied to the spine using short or long lever methods." (J.A. at 5507.)

[4] The use of chiropractors by Trigon's plan enrollees has increased substantially since Trigon began covering chiropractic care. For instance, in 1996 only 26,275 plan enrollees received spinal manipulation treatment from chiropractors, but that number jumped to 74,477 by 2001. The number of chiropractic providers in Trigon's network rose from 513 to 961 during the same time span, and now almost 90% of chiropractors in the Commonwealth of Virginia are in Trigon's provider network. In addition, the total amount of payments from Trigon to chiropractors rose from $ 12,380,737 in 1996 to $ 21,510,503 in 2001.

[5] This organization is now called Blue Cross & Blue Shield Association of America.

> associate with "unscientific practitioners." In 1966, the AMA's House of Delegates passed a resolution labelling chiropractic an unscientific cult.

Id. at 356.

Beginning in 1977, the AMA slowly began to phase out its boycott of chiropractors, and the Seventh Circuit adopted the *Wilk* district court's finding that the boycott became dormant in 1980 when Principle 3 was revised. [6] Id. at 356, 374. Although Trigon is a licensee of Blue Cross & Blue Shield Association of America, there is no record evidence connecting Trigon to this boycott.

American Chiropractic, however, asserts that medical doctors continue to harbor animosity toward chiropractors and have entered into an anticompetitive conspiracy with Trigon to harm chiropractors. American Chiropractic contends that medical doctors and their medical associations have conspired with Trigon to limit the usage of chiropractors by Trigon's plan enrollees and to restrain severely the reimbursement paid to chiropractors for services rendered to plan enrollees. The ultimate goal of this conspiracy, American Chiropractic argues, is to shift insurance dollars away from chiropractors toward medical doctors and harm the business of chiropractors.

In response to this perceived anticompetitive conspiracy, American Chiropractic brought this **[**8]** action in the United States District Court for the Western District of Virginia on August 18, 2000. American Chiropractic's eight-count complaint alleged that Trigon [7] conspired with medical doctors and medical associations to restrain interstate trade in violation of § 1 of the Sherman Antitrust Act, 15 U.S.C.A. § 1 (West 1997) (count one); attempted to monopolize the market for treatment of neuromusculoskeletal conditions in violation of § 2 of the Sherman Act, 15 U.S.C.A. § 2 (West 1997) (count two); engaged in a pattern of racketeering activity in violation of the Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C.A. § 1962 (West 2000) (count three); tortiously interfered with the business enterprise of chiropractors in violations of state common law (count four); conspired to injure chiropractors in their trade or practice in violation of Va. Code Ann. § 18.2-499 (Michie 1996) (count five); committed state common law breach of contract (count six) and conspiracy (count seven); and violated Va. Code Ann. §§ 38.2-2203, *38.2-3408*, 38.2-4221, and **[*220]** 38.2-4312(E) **[**9]** (Michie 2002), referred to as the Virginia insurance equality laws (count eight). The district court exercised supplemental jurisdiction over the state law claims pursuant to 28 U.S.C.A. § 1367 (West 1993).

Trigon moved to dismiss the complaint in its entirety on October 13, 2000. The district court, on July 19, 2001, granted that motion in part and dismissed American Chiropractic's RICO (count three) and Virginia insurance equality (count eight) claims for failure to state claims. The district court held that the RICO claim was preempted by the McCarran-Ferguson Act and that the Virginia insurance equality laws relied upon by American Chiropractic did not create private causes of action.

Following discovery, on August 13, 2002, Trigon filed a motion **[**10]** for summary judgment on the remaining counts in the complaint. American Chiropractic did not file a Rule 56(f) motion requesting further discovery, but it did contest Trigon's motion for summary judgment. After the benefit of oral argument, the district court, on April 25, 2003, granted Trigon's motion for summary judgment on the remaining counts. As to counts one, five, and seven, the district court found that the intracorporate immunity doctrine precluded any conspiracy between Trigon and the medical doctors that served on one of its committees, the Managed Care Advisory Panel, and that American Chiropractic had produced no other evidence of a conspiracy between Trigon and the medical doctors or medical associations. As to American Chiropractic's claim for monopolization (count two), the district court granted summary judgment because Trigon did not possess monopoly power in the relevant market. It also granted Trigon's motion

---

[6] Although the Seventh Circuit recognized that the boycott ended in 1980, it affirmed a grant of injunctive relief against the American Medical Association because some of its actions in 1983 "indicated the AMA's likelihood of returning to its old (anti-chiropractic) ways." Wilk v. Am. Medical Ass'n., 895 F.2d 352, 367 (7th Cir. 1990).

[7] The complaint initially named Blue Cross & Blue Shield of America in addition to Trigon Healthcare, Inc. and its affiliated companies. Blue Cross & Blue Shield of America was voluntarily dismissed as a defendant by American Chiropractic.

for summary judgment as to American Chiropractic's state law claims for tortious interference (count four) and breach of contract (count six). American Chiropractic noted a timely appeal of the district court's rulings, and we have jurisdiction under *28 U.S.C.A. § 1291*.

[11]** On appeal, American Chiropractic argues: (1) that the district court erred in holding the intracorporate immunity doctrine applies to this case; (2) that the district court erred in holding that there was insufficient evidence of a conspiracy between Trigon and the medical associations to withstand summary judgment; (3) that the district court erred in granting summary judgment on the tortious interference claim; (4) that the district court erred in dismissing the Virginia insurance equality claim; (5) that the district court erred in dismissing the RICO claim as preempted by the *McCarran-Ferguson Act* ; and (6) that the district court abused its discretion in conducting discovery. [8] We address each contention in turn.

II.

Counts One, Five, and Seven (The Conspiracy Counts)

American Chiropractic first contends that **[**12]** the district court erred in finding that the intracorporate immunity doctrine barred the possibility of a conspiracy between Trigon and its Managed Care Advisory Panel (MCAP) and in granting summary judgment on American Chiropractic's claim under *§ 1 of the Sherman Act* and its state law conspiracy claims. [9] ***HN1***[] **[*221]** We review the grant of summary judgment de novo, viewing the facts in the light most favorable to the non-moving party. *See Figgie Int'l, Inc. v. Destileria Serralles, Inc., 190 F.3d 252, 255 (4th Cir. 1999)*. Summary judgment is appropriate "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*.

[13]** Under its *Section 1* claim, American Chiropractic alleged that Trigon and its MCAP, a committee established by Trigon, created false referral guidelines meant to limit the usage of chiropractors for the treatment of lower back pain and, accordingly, to keep insurance reimbursement monies away from chiropractors. Trigon established the MCAP, composed of six Trigon employees and nine independent medical doctors appointed by professional organizations, [10] to "obtain input and advice from medical doctors on clinical issues such as quality control initiatives." (J.A. at 1348.) The MCAP "was formed and appointed by officers and employees of Trigon." (J.A. at 1352.) Dr. Lawrence Colley, Trigon's Vice President for Corporate Medical Policy during the relevant time period, also served as a member of the MCAP. It is undisputed that the MCAP was never given information regarding specific payment policies and that it lacked any decisionmaking authority.

[14]** American Chiropractic points to the MCAP's approval, in October 1995, of Trigon's practice guideline, titled "Managing Low Back Problems in Adults" (the Low Back Guideline), as evidence of an anticompetitive conspiracy between the members of the MCAP and Trigon. (J.A. at 6119.) This Low Back Guideline was drafted as an informative practice guideline for physicians. The Guideline also did not bear any relation to Trigon's coverage and reimbursement policies. (J.A. at 1539-40.) The Low Back Guideline was written by Trigon's employees, not the MCAP, and was issued in response to a lengthy study by the Agency for Health Care Policy and Research (AHCPR), a division of the U.S. Department of Health and Human Services.

---

[8] We note that American Chiropractic does not appeal the district court's grant of summary judgment on its *§ 2 Sherman Act* claim (count two) or the state law breach of contract claim (count six).

[9] Because the state law conspiracy claims follow the same analysis as the *§ 1* claim, we do not address them separately. *See Va. Vermiculite, Ltd. v. Historic Green Springs, Inc., 307 F.3d 277, 284 (4th Cir. 2002)* ***HN2***[] (noting that the *Virginia Civil Conspiracy Act* does not create liability absent a violation of the federal antitrust laws); *Fox v. Deese, 234 Va. 412, 362 S.E. 2d 699, 708, 4 Va. Law Rep. 1248 (Va. 1987)* (adopting intracorporate immunity doctrine for Virginia conspiracy laws).

[10] These organizations include the Virginia Society of Internal Medicine, the Medical Society of Virginia, the American College of Physicians, the University of Virginia School of Medicine, the Eastern Virginia Medical School and other medical organizations.

The AHCPR study was titled "Acute Low Back Problems in Adults" and was accompanied by a reference guide for treating low back pain. The study recommended spinal manipulation "in place of medication or a shorter trial [of manipulation] if combined with NSAIDS" [11] for the treatment of low back pain. (J.A. at 5653.) The AHCPR study defined "manipulation" as "manual therapy in which loads are applied to the spine using short or long lever methods." (J.A. at 5507.) This definition **[**15]** of manipulation referred to the procedure rendered primarily by chiropractors, as opposed to medical doctors. One medical journal, the *Annals of Internal Medicine*, stated in July 1998 that "the [AHCPR] recently made history when it **[*222]** concluded that spinal manipulative treatment is the most effective and cost-effective treatment for acute low back pain." (J.A. at 4984.) American Chiropractic argues that this AHCPR study "was a boon to chiropractors and a setback for medical doctors." (Appellant's Br. at 22.)

Trigon intended its under ten page Low Back Guideline to be "a shortened and user-friendly format" of the over one-hundred and fifty page AHCPR study for health care providers. (J.A. at 1538.) The Low Back Guideline stated that it was "adapted from the [AHCPR] and … approved and endorsed by Trigon's Managed Care Advisory Panel." (J.A. at 6123.) The MCAP considered the Low Back Guideline, alongside **[**16]** two other practice guidelines, on October 25, 1995. During that meeting, one of the medical doctors on the MCAP asked if the guidelines the MCAP was considering were meant to be referral guidelines. Dr. Colley told them that the guidelines were referral guidelines. [12] The MCAP then adopted and approved the Low Back Guideline without making or suggesting any changes to it.

American Chiropractic argues that the Low Back Guidelines are false and misleading in two principal ways. First, the Low Back Guideline provided that "[a] short trial of manipulation may be as effective as NSAIDs." (J.A. at 6120.) American Chiropractic contends that the AHCPR guideline **[**17]** stands for the proposition that manipulation is *more effective* than NSAIDs. Second, the Low Back Guideline did not define the term "manipulation." According to American Chiropractic, the absence of this definition meant that the Low Back Guideline deterred primary care physicians from referring patients to chiropractors because it failed to identify manipulation practiced by chiropractors as the specific type of manipulation recommended. Dr. Scott Haldeman, one of American Chiropractic's experts and a member of the AHCPR panel, opined that "[b] y omitting the AHCPR's definition of manipulation, Trigon and its Managed CareAdvisory Panel materially altered the recommendations of the AHCPR." (J.A. at 5672.) Because of this omission, according to Dr. Haldeman, Trigon's guidelines would "deprive patients of the benefit from spinal manipulation as practiced by doctors of chiropractic, and …deprive doctors of chiropractic of the opportunity to treat those patients." (J.A. at 5672.)

The district court was not persuaded by American Chiropractic's argument, and held that, under the intracorporate immunity doctrine, Trigon was legally incapable of conspiring with the MCAP. Additionally, **[**18]** the district court then found that American Chiropractic had failed to adduce sufficient evidence of a conspiracy between Trigon and the medical associations who appointed individuals to the MCAP to survive summary judgment. On appeal, American Chiropractic argues that the intracorporate immunity doctrine does not apply, either because the medical doctors on the MCAP lacked a unity of interest with Trigon or because the independent personal stake exception to the doctrine should apply. American Chiropractic also contends that it has produced direct evidence of a conspiracy among Trigon and the medical doctors on the MCAP and the medical associations that appointed those doctors.

[*223] A.

We consider first American Chiropractic's argument that Trigon conspired with the medical doctors who served on the MCAP. [13] *Section 1* of the Sherman Act provides, in relevant part, that ***HN3***[] "[e] very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with

---

[11] NSAIDs is an abbreviation for non-steroidal anti-inflammatory drugs such as aspirin and ibuprofen.

[12] It is unclear whether Dr. Colley was stating that the Low Back Guideline was a referral guideline, or if he was referencing one of the other guidelines before the Managed Care Advisory Panel. Because this fact does not affect our analysis on American Chiropractic's *Section 1* claim, we will assume that Dr. Colley was referencing the Low Back Guideline.

[13] American Chiropractic did not argue that Trigon conspired with its own employees serving on the MCAP.

foreign nations, is declared to be illegal." *15 U.S.C.A. § 1*. Thus, ***HN4***[] to establish a *§ 1* violation, a plaintiff must show: "(1) a contract, combination **[**19]** or conspiracy; (2) that imposed an unreasonable restraint of trade." *Dickson v. Microsoft Corp., 309 F.3d 193, 202 (4th Cir. 2002)*. "It is incontestable that 'concerted action' in restraint of trade lies at the heart of a *Sherman Act section 1* violation." *Va. Vermiculite, Ltd. v. Historic Green Springs, Inc., 307 F.3d 277, 280 (4th Cir. 2002)*. In other words, *§ 1* "does not reach conduct that is wholly unilateral." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* (internal quotation marks omitted).

HN5[] "Proof of concerted action requires evidence of a relationship between at least two legally distinct persons or entities." *Oksanen v. Page Memorial Hosp., 945 F.2d 696, 702 (4th Cir. 1991)* (en banc). Thus,

> it is perfectly plain that an internal 'agreement' to implement a single, unitary **[**20]** firm's policies does not raise the antitrust dangers that *§ 1* was designed to police. The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly bring together economic power that was previously pursuing divergent goals.

Copperweld, 467 U.S. at 769. Moreover, ***HN6***[] " *§ 1* is not violated by the internally coordinated conduct of a corporation and one of its unincorporated divisions." *Id. at 770*. "For similar reasons, the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1 of the Sherman Act*." *Id. at 771*. Accordingly, the Supreme Court has held that a parent and its wholly owned subsidiary are legally "incapable of conspiring with each other for purposes of *§ 1 of the Sherman Act*." *Id. at 777*. The Court in *Copperweld* noted further that "a parent and a wholly owned subsidiary *always* have a 'unity of purpose or a common design'" so the law's concern with a sudden joining of independent interests is not present in such a case. *Id. at 771* **[**21]** (emphasis added).

HN7[] We have applied this "intracorporate immunity" doctrine articulated in *Copperweld* to hold that a hospital lacked the capacity to conspire with its peer review committee for purposes of *§ 1*. *See Oksanen, 945 F.2d at 706*.[14] The plaintiff in *Oksanen*, a doctor, contended that the hospital conspired with its peer review committee, composed of staff physicians at the hospital, to limit and then revoke his staff privileges. Although the hospital and its medical staff were "legally separate entities," we held that the intracorporate immunity doctrine applied, explaining that "we must examine the substance, rather than the form, of the **[*224]** relationship between the hospital and the medical staff during the peer review process." *Id. at 703*. We concluded that the hospital and the doctors on the peer review committee possessed a unity of interest: improving the quality of patient care. "Like a corporation delegating authority to its officers, the [hospital] delegated peer review decisionmaking in the first instance to the medical staff." *Id. at 703*. Thus, "[i] n effect, the medical staff was working as the [hospital's] **[**22]** agent." *Id.; see also Detrick v. Panalpina, Inc., 108 F.3d 529, 544 (4th Cir. 1997)* (" The intracorporate immunity doctrine provides that a conspiracy can not exist between the agents of a corporation and the corporation itself."); *ePlus Technology v. Aboud, 313 F.3d 166, 179 (4th Cir. 2002)* ("[A] cts of corporate agents are acts of the corporation itself, and corporate employees cannot conspire with each other or with the corporation."). Moreover, the hospital "retained ultimate responsibility for all of the hospital's credentialing decisions." *Oksanen, 945 F.2d at 704*. The hospital's "ultimate control over peer review decisions enabled it to employ peer review to pursue its interests." *Id*. Finally, we questioned whether hospitals possessed any economic motive for conspiring with some medical doctors to exclude others from the staff: "[i] f a physician is qualified and does not disrupt the hospital's operations, it is in the hospital's interest to include, not exclude, that physician." *Id.; see also* P. Areeda and H. Hovenkamp, ***Antitrust Law*** P 1471b (1999 Supp.).

[23]** ***HN8***[] We have continued to recognize the existence of one narrow exception to the intracorporate immunity doctrine - the independent personal stake exception. In *Greenville Pub. Co. v. Daily Reflector, Inc., 496*

---

[14] A lawsuit alleging a conspiracy between a hospital and its peer review committee currently would be barred under the *Health Care Quality Improvement Act of 1986*. *42 U.S.C.A. §§ 11101-11152* (West 1995 & Supp. 2003). That Act was passed after the filing of Oksanen's lawsuit and was not made retroactive to pending cases.

F.2d 391 (4th Cir. 1974), we held that an exception to the intracorporate immunity doctrine "may be justified when the officer has an independent personal stake in achieving the corporation's illegal objective." Id. at 399. We declined an invitation to apply the exception in *Oksanen* because the peer review committee lacked the ability to bind the hospital. "If the officer cannot cause a restraint to be imposed and his firm would have taken the action anyway, then any independent interest is largely irrelevant to antitrust analysis." Oksanen, 945 F.2d at 705. Put differently, "[t]o give advice when asked by the decisionmaker is not equivalent to being the decisionmaker itself." Pennsylvania Dental Ass'n. v. Medical Serv. Ass'n., 745 F.2d 248, 259 (3d Cir. 1984).

Applying this reasoning here, we agree with the district court that, under the intracorporate immunity doctrine, Trigon lacked the legal capacity **[**24]** to conspire with the medical doctors on the MCAP. American Chiropractic argues that because the medical doctors on the MCAP do not share a unity of interest with Trigon, the MCAP cannot be considered a corporate agent of Trigon. A similar argument was raised and rejected in *Oksanen*. There, the plaintiff had alleged that the medical doctors on the peer review committee did not have a unity of interest with the hospital because the medical doctors would act in their own best interest, not the best interest of the hospital. As mentioned above, we found that the medical doctors, in their role as members of the peer review committee, had a unity of interest with the hospital: ensuring patient care. We believe that *Oksanen's* reasoning is not only instructive but persuasive here.

American Chiropractic is undoubtedly correct that medical doctors and insurance companies do not, generally speaking, share a unity of interest. That, however, is not the correct inquiry in cases applying the intracorporate immunity doctrine. Instead, **[*225]** we look to whether the medical doctors, in their role as members of the MCAP, share a unity of interest with Trigon that makes them corporate agents of Trigon. **[**25]** We believe that they do.

Because Trigon established the MCAP to offer input on clinical issues faced by Trigon, the individual medical doctors, in their role as members of the MCAP, shared the same interest as Trigon: addressing clinical issues in a manner that would best serve its consumers, the plan enrollees. The MCAP is without question a corporate agent of Trigon, chaired by a Trigon employee, and we believe that the intracorporate immunity doctrine applies to its actions. The decision to consult with doctors on the MCAP does not "represent the sudden joining of economic forces that section one is designed to deter and penalize." Oksanen, 945 F.2d at 703. By creating the MCAP, Trigon did not bring together independent economic forces. Instead, Trigon had "ultimate control" over the MCAP's actions and was able to employ the MCAP to pursue its interests. In fact, we are presented with even stronger reasons for applying the doctrine here than we were in *Oksanen* because, in *Oksanen*, the peer review committee and the hospital were legally distinct entities. The MCAP is not legally distinct from Trigon.

American Chiropractic's argument paints with too broad **[**26]** a brush, and would, in effect, undercut much of the rationale of the intracorporate immunity doctrine by focusing on form over substance. Penalizing "coordinated conduct simply because a corporation delegated certain responsibilities to autonomous units might well discourage corporations from creating divisions with their presumed benefits." Copperweld, 467 U.S. at 771. "Far from being a competitor with [Trigon], the [MCAP] was in fact a natural component of [Trigon's] management structure. "Oksanen, 945 F.2d at 703.

Moreover, the independent personal stake exception does not apply because the MCAP did not have the power to bind Trigon; it only made non-binding recommendations and endorsed materials already composed by Trigon employees. In fact, the MCAP did not even recommend changes to the Low Back Guideline. While the MCAP's seal of approval was important to Trigon from a business perspective because it allowed Trigon to market various publications as approved by a panel of medical doctors, American Chiropractic has made no showing that the MCAP itself could rewrite any part of such a publication and make Trigon issue those rewritten publications. **[**27]** The ultimate decision as to the contents of any document before the MCAP always rested with Trigon, and, accordingly, the independent personal stake exception cannot apply. *See* id. at 705.

Thus, we agree with the district court that Trigon lacked the capacity to conspire, within the meaning of § 1, with its corporate agent, the MCAP or its members.

B.

American Chiropractic next argues, assuming that the MCAP did not conspire with Trigon, that the medical associations who placed their members on the MCAP conspired with Trigon to publish the allegedly misleading guidelines and to implement several coverage policies aimed at limiting the usage and reimbursement of chiropractic services. As discussed above, to establish a *§ 1* violation, a plaintiff must show: "(1) a contract, combination, or conspiracy, (2) that imposed an unreasonable restraint of trade." *Dickson, 309 F.3d at 202*. ***HN9***[] A plaintiff can offer direct or circumstantial evidence to prove **[*226]** concerted action. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 754, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. American Chiropractic argues on appeal that it provided direct evidence of this conspiracy, **[**28]** in the form of the minutes from the MCAP meeting where the MCAP approved the Low Back Guideline, and the Low Back Guideline itself. These minutes and the Low Back Guideline, American Chiropractic alleges, represent direct evidence of a conspiracy orchestrated between the medical associations and Trigon. Additionally, American Chiropractic argues that it presented direct evidence that Trigon and the medical associations conspired to implement two other coverage policies with the intent to harm chiropractors - a $ 500 cap on spinal manipulations and a reduced reimbursement rate for chiropractors and other limited license providers.

In 1988, Trigon instituted a $ 500 yearly reimbursement cap on spinal manipulations, regardless of "what type of provider renders the services." (J.A. at 5345.) Although this $ 500 reimbursement cap is facially neutral, in that it does not target a specific provider, neither side disputes that chiropractors are the main providers of spinal manipulations. One chiropractor testified that no other insurance company had a cap as harsh as Trigon's, and that a "majority" of insurance companies did not use a hard coverage cap on spinal manipulations. (J.A. at 7900, **[**29]** 7903-04.) This $ 500 annual coverage limit on spinal manipulations has remained in place since 1988.

In 1996, Trigon lowered the reimbursement rate for limited-license practitioners, [15] including chiropractors, to 60% (from 70%) of that received by fully-licensed practitioners performing the same procedure. As explained by Trigon, "the marketplace for third party healthcare coverage is extremely competitive and our customers are extremely price sensitive," making the lower reimbursement rate "appropriate and reasonable." (J.A. at 4636, 6337.)

American Chiropractic argues that both of these policies resulted from a conspiracy between Trigon and the medical associations. The $ 500 annual cap, American Chiropractic asserts, was implemented with the purpose of limiting the utilization of chiropractic services, while the lower reimbursement rate was intended to shift **[**30]** insurance dollars from chiropractors to medical doctors. American Chiropractic argues that, because Trigon recognizes that chiropractic care is effective and inexpensive, policies like these that have an adverse effect on chiropractic care are direct evidence that Trigon is not making an independent economic judgment but rather conspiring to harm chiropractors.

HN10[] "[A] ntitrust law limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. Direct evidence is extremely rare in antitrust cases and is usually referred to as the "smoking gun." *InterVest, Inc. v. Bloomberg, L. P., 340 F.3d 144, 159 (3d Cir. 2003)*. We agree with the Third Circuit that direct evidence in this context is "explicit and requires no inferences to establish the proposition or conclusion being asserted." *Id*. (quotation marks omitted); *see* *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 676, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)* (Goldberg, J., dissenting) (" Only rarely will there be direct evidence of an express agreement" in conspiracy cases). American **[**31]** **[*227]** Chiropractic's offering falls far short of this standard. At most, the MCAP meeting shows contact between two independent economic actors, but "mere contacts and communications, or the mere opportunity to conspire, among antitrust defendants is insufficient evidence [of] an anticompetitive conspiracy." *Cooper v. Forsyth County Hosp. Auth., 789 F.2d 278, 281 (4th Cir. 1986)*. The two coverage policies are also not direct evidence of a conspiracy because both require the rather large inferential leap that Trigon drafted and implemented the policies only after reaching an agreement with medical doctors and associations.

---

[15] Limited-license providers are defined by Trigon to include chiropractors, speech therapists, occupational therapists and physical therapists.

Furthermore, as the district court explained, [16] American Chiropractic has not entered sufficient indirect evidence of a conspiracy to harm chiropractors. It is undisputed that use of chiropractic treatment by Trigon subscribers has substantially increased since the Low Back Guideline was issued in 1996. *See supra* note 4. Since 1996, the amount of money paid to chiropractors by Trigon has also risen substantially, from approximately $ 12 million dollars to over $ 21 million in 2001. The reimbursement policies about which American Chiropractic **[**32]** complains are facially neutral policies that admittedly have an effect on chiropractors. There is, however, no evidence of an effort by Trigon to harm chiropractors apart from these facially neutral reimbursement policies and the Low Back Guideline, and, more importantly, American Chiropractic has failed to show that either the reimbursement policies or the Low Back Guideline was the result of an antitrust *conspiracy*. They have pointed to no evidence that Trigon conspired with any entity in forming its policies. In fact, the only evidence in the record is that all of the actions in dispute were taken unilaterally by Trigon employees. In the face of Trigon's affidavits that it acted unilaterally, American Chiropractic needed more to create a genuine issue of material fact.

[33]** Moreover, American Chiropractic has not explained why Trigon would, as an economic matter, attempt to exclude chiropractors from its provider network or dissuade patients from the use of chiropractic services if chiropractic care is more cost-effective than other medical care. As the district court ably explained, *see Trigon Healthcare, 258 F. Supp. 2d at 466-67*, this alleged conspiracy does not make economic sense from Trigon's perspective. We agree with the district court that, "as a profit-seeking corporation, [Trigon] had no economic motive to prevent referrals to chiropractors." *Id. at 466*.

Accordingly, we affirm the district court's grant of summary judgment on American Chiropractic's claim under *§ 1 of the Sherman Act* (count one) and its state law conspiracy claims (counts five and seven). [17]

[34]** III.

Count Four

(Tortious Interference)

American Chiropractic next challenges the grant of summary judgment **[*228]** in favor of Trigon on its state law claim for tortious interference. ***HN11***[] We review the grant of summary judgment de novo. *Figgie Int'l, 190 F.3d at 255*. ***HN12***[] Virginia law permits recovery for such claims where a party can show "(1) the existence of a business relationship or expectancy, with a probability of future economic benefit to plaintiff; (2) the defendant's knowledge of the relationship or expectancy; (3) a reasonable certainty that absent defendant's intentional misconduct, plaintiff would have continued in the relationship or realized the expectancy; and (4) damages to plaintiff." *Commercial Bus. Sys., Inc. v. Halifax Corp., 253 Va. 292, 484 S.E. 2d 892, 896 (Va. 1997)* (quotation marks omitted). "[P] roof of the existence of the first and third elements of the tort must meet an objective test," and "mere proof of a plaintiff's belief and hope that a business relationship will continue is inadequate to sustain the cause of action." *Id. at 897*. Instead, a plaintiff must "establish a *probability* of future economic benefit, not **[**35]** a mere possibility." *Id*. (emphasis added). When a plaintiff is alleging that a third party has interfered with a business expectancy rather than with an actual contract, the plaintiff must "show that the defendant interfered by employing improper methods." *Peterson v. Cooley, 142 F.3d 181, 186 (4th Cir. 1998)*. Improper methods are "those means that are illegal or independently tortious, such as violations of statutes, regulations, or recognized common-law rules." *Duggin v. Adams, 234 Va. 221, 360 S.E. 2d 832, 836, 4 Va. Law Rep. 820 (Va. 1987)*.

---

[16] American Chiropractic also limited its arguments to direct evidence of a conspiracy before the district court, but that court found that American Chiropractic offered no direct evidence of a conspiracy and instead analyzed whether there was circumstantial evidence of a conspiracy.

[17] Because we find that American Chiropractic failed to prove the existence of an anticompetitive conspiracy, we do not consider whether American Chiropractic entered sufficient evidence that Trigon and the medical associations and medical doctors implemented unreasonable restraints on trade.

Under this count, American Chiropractic argues that the $ 500 annual coverage cap on spinal manipulations tortiously interfered with the chiropractors' business expectancy that their patients would continue to seek treatment from them. This argument fails because American Chiropractic has not shown a business expectancy with a probability of future economic benefit. Virginia law requires objective proof of a probability of future economic benefit, not just a hope or a belief that a business relationship will continue. American Chiropractic admitted that patients have the ability and the right to terminate their relationship **[**36]** at any time, and it has not introduced any evidence showing more than a hope or belief that, generally speaking, patients would continue seeking treatment from chiropractors. The chiropractors never had written contracts with their patients, and some patients unilaterally terminated their treatment relationships with the chiropractors. Because American Chiropractic failed to show that it has an objective, valid business expectancy with a probability of future economic benefit, the district court was correct to grant summary judgment to Trigon on this count. [18]

IV.

Count Eight

(Virginia Insurance Equality Statutes)

American Chiropractic also argues that the district court erred in dismissing its claim under the Virginia **[**37]** insurance equality laws for failure to state a claim. ***HN13***[] We review the dismissal of a complaint under *Federal Rule of Civil Procedure 12(b)(6)* de novo. *Ostrzenski v. Seigel, 177 F.3d 245, 251 (4th Cir. 1999)*. On appeal from an order granting a *Rule 12(b)(6)* motion to dismiss, this court accepts as true the **[*229]** facts as alleged in the complaint, views them in the light most favorable to the plaintiff, and recognizes that dismissal is inappropriate "unless it appears to a certainty that the plaintiff would be entitled to no relief under any state of facts which could be proved in support of his claim." *Mylan Labs., Inc. v. Matkari, 7 F.3d 1130, 1134 n. 4 (4th Cir. 1993)*; *see Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)* (explaining that dismissal for failure to state a claim is proper "only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations").

In its complaint, American Chiropractic alleged that Trigon violated Virginia's insurance equality laws, found in *Va. Code Ann. §§ 38.2-2203* **[**38]** , *38.2-3408, 38.2-4221*, and *38.2-4312(E)*, because Trigon implemented reimbursement and utilization restrictions targeted only at chiropractors, not medical doctors. The district court found that none of these statutory provisions created private rights of action on their face and declined to read a private right of action into the sections.

As a preliminary note, *§§ 38.2-2203, 38.2-4221 and 38.2-4312* do not apply to Trigon's business, so American Chiropractic cannot state a claim under those code sections. *Section 38.2-2203* deals with "bodily injury liability insurance"; *§ 38.2-4221* applies to non-stock corporations; and *§ 38.2-4312(E)* applies to health maintenance organizations. Trigon is a for-profit stock corporation that operates in the field of accident and sickness insurance. Thus, ***HN14***[] by their clear terms, these statutory provisions do not apply to Trigon's business decisions.

The issue is thus, whether *§ 38.2-3408*, which applies to accident and sickness insurance companies, creates a private cause of action. For the following reasons, we hold that ***HN15***[] Virginia would not recognize a private cause of action under this code section. The section reads, in relevant part, ***HN16***[] "[i] f an **[**39]** accident and sickness insurance policy provides reimbursement for any service that may be legally performed by a person licensed in this Commonwealth as a chiropractor …reimbursement under the policy shall not be denied because the service is rendered by the licensed practitioner." *Va. Code Ann. § 38.2-3408*. The code section itself does not include an enforcement mechanism, but *§ 38.2-200* explains that the ***HN17***[] "[State Corporation] Commission is charged with the execution of all laws relating to insurance and insurers." *Va. Code Ann. § 38.2-200*. ***HN18***[] *Section 38.2-221* grants the Commission the power to levy and enforce penalties against insurers for violations of

---

[18] Because we conclude that American Chiropractic lacked a valid business expectancy, we do not address the district court's alternative ground for granting summary on this claim - that Trigon did not use improper means in interfering with the chiropractors' alleged business expectancy.

the insurance code. *Va. Code Ann. § 38.2-221*. That section, however, also states that the "power and authority conferred upon the Commission by this section shall be in addition to and not in substitution for the power and authority conferred upon the courts by general law to impose civil penalties for violations of the laws of this Commonwealth." *Va. Code Ann. § 38.2-221*.

We have previously stated that ***HN19***[] "federal courts **[**40]** should be reluctant to read private rights of action into state laws where state courts and state legislatures have not done so. Without clear and specific evidence of legislative intent, the creation of a private right of action by a federal court abrogates both the prerogatives of the political branches and the obvious authority of states to sculpt the content of state law." *A & E Supply Co. v. Nationwide Mut. Fire Ins. Co., 798 F.2d 669, 674 (4th Cir. 1986)*. Applying this test, we held that ***HN20***[] the *Virginia Unfair Trade Practices Act* (UTPA) did not create a private cause of action because it lacked explicit language creating such an action. The Virginia **[*230]** UTPA contained a statutory provision similar to *§ 38.2-221*, [19] and we explained that it "[did] not create any new rights of action but instead preserved any existing right of action that an injured person may have against a wrongdoer." *Id. at 674 n. 5*. We have found no Virginia cases since *A & E Supply* that call this understanding into question.

[41]** ***HN21***[] Like the *Virginia UTPA, § 38.2-3408* does not create a private right of action because it does not contain any specific statutory language creating such an action. The existence of *§ 38.2-221* does not evince a legislative intent to create private rights of action under the insurance code. Rather, as we explained in *A & E Supply*, that statutory provision only leaves in place pre-existing statutory and common-law rights of action.

Accordingly, the district court was correct in dismissing American Chiropractic's claim under the Virginia insurance equality laws. V. Count Three (RICO) American Chiropractic's final contention of error relating to the substantive holdings of the district court is that the district court erredin finding that its RICO claim was preempted by the *McCarran-Ferguson Act* and dismissing that claim pursuant to *Rule 12(b)(6)*. [20] As stated above, we review de novo a complaint for failure to state a claim and "take all allegations as admitted and examine whether the plaintiff can prove any set of facts that would entitle him to relief." *Anderson v. Found. for Advancement, Educ. and Employment of Am. Indians, 155 F.3d 500, 505 (4th Cir. 1998).* **[**42]** ***HN22***[] "Federal 'notice' pleading standards require that the complaint be read liberally in favor of the plaintiff." *Id*. For the reasons that follow, we agree that American Chiropractic's claim is not preempted by the *McCarran-Ferguson Act*, but nonetheless affirm the district court's dismissal of this count because American Chiropractic failed to allege a claim for mail fraud or wire fraud and, accordingly, failed to state a claim for a RICO violation.

A.

HN23[] The *McCarran-Ferguson Act* provides that "[n] o Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance." *15 U.S.C.A. § 1012(b) (West 1997)*. The *McCarran-Ferguson Act* does not apply to federal laws that are specifically targeted at the business of insurance. **[**43]** *Id*. Trigon argues that applying RICO to American Chiropractic's claims would invalidate, impair or supersede Virginia's insurance code, found at Title 38.2 of the Code of Virginia. For a federal law to be preempted by McCarran-Ferguson: (1) the state law in question must be enacted for the purpose of regulating the business of insurance; (2) the federal law must not **[*231]** be specifically related to the business of insurance; and (3) the federal law must invalidate, impair or supersede the state law in question. *Humana, Inc. v. Forsyth, 525 U.S. 299, 307, 142 L. Ed. 2d 753, 119 S. Ct. 710 (1999)*. The second factor is easily satisfied because the Supreme Court has held that ***HN24***[] "RICO is not a law that specifically relates to the business of insurance." *Humana, 525 U.S. at 307* (quotation marks omitted). Thus, we are left to decide whether Title 38.2 is a law enacted

---

[19] The provision at issue in *A & E Supply* read that "no order of the Commission under this article shall in any way relieve or absolve any person affected by such order from any liability under any other laws of this Commonwealth." *A & E Supply Co. v. Nationwide Mut. Fire Ins. Co., 798 F.2d 669, 674 n. 5 (4th Cir. 1986)* (quoting Va. Code Ann. § 38.1-57.1)).

[20] As discussed *infra*, in its RICO claim, American Chiropractic alleged that Trigon engaged in a pattern of racketeering activity including mail fraud, wire fraud, and extortion.

for the purpose of regulating the business of insurance and, if so, whether RICO impairs, invalidates or supersedes its operation.

We have little difficulty concluding that ***HN25***[] Title 38.2 is a set of laws enacted for the purpose of regulating the business **[**44]** of insurance. The Supreme Court has stated that "[s] tatutes aimed at protecting or regulating this relationship [between insurer and insured], directly or indirectly are laws regulating the 'business of insurance.'" *SEC v. National Sec., Inc., 393 U.S. 453, 460, 21 L. Ed. 2d 668, 89 S. Ct. 564 (1969)*. "[T] he focus of McCarran-Ferguson is upon the relationship between the insurance company and its policyholders …." *United States Dep't of Treasury v. Fabe, 508 U.S. 491, 501, 124 L. Ed. 2d 449, 113 S. Ct. 2202 (1993)*. Accordingly, the *McCarran-Ferguson Act* encompasses "laws that possess the 'end, intention, or aim' of adjusting, managing, or controlling the business of insurance." *Id. at 505*. Applying these standards, Title 38.2 of the Code of Virginia, specifically *§§ 38.2-200, 38.2-221 and 38.2-3408* at issue here, is a set of laws enacted for the purpose of regulating the business of insurance. Title 38.2 is limited to insurance companies and creates a comprehensive network of statutory provisions aimed at controlling and managing the business of insurance. For instance, *§ 38.2-3408*, by requiring insurers to **[**45]** provide reimbursement for all providers of covered services, helps to manage the relationship between the policyholder and the insurance company by ensuring that if a particular service is covered by an insurance company, the policyholder can seek treatment from any provider able to perform that service.

Accordingly, we next must decide whether allowing a RICO claim to proceed against an insurance company would "invalidate, impair, or supersede" Virginia's insurance code. The Supreme Court recently considered a similar question: ***HN26***[] whether RICO invalidated, impaired or superseded Nevada's laws regulating insurance. *Humana, 525 U.S. at 307*. In *Humana*, the Court defined "invalidate" as "to render ineffective, generally without providing a replacement rule or law," and "supersede" as "to displace (and thus render ineffective) while providing a substitute rule." *Id*. Using these definitions, it is clear that, as in *Humana*, RICO's application would neither "invalidate" nor "supersede" Virginia law. [21]

[46]** Thus, the key question, as in *Humana*, is whether RICO's application to Trigon's alleged conduct would "impair" Virginia's law. In holding that RICO did not impair Nevada's law, the Supreme Court stated that

> ***HN27***[] When federal law does not directly conflict with state regulation, and when application **[*232]** of the federal law would not frustrate any declared state policy or interfere with a State's administrative regime, the *McCarran-Ferguson Act* does not preclude its application.

Id. at 310. The only difference between the Nevada laws considered in *Humana* and the Virginia laws at issue in this case is that the Nevada laws explicitly provided for a private right of action, whereas the Virginia laws, as discussed *supra*, Part IV, do not. The district court found this difference dispositive, holding that application of RICO would convert Virginia's system of public redress into a federal system of private redress and thus that RICO would impair, invalidate, and supersede Virginia law. *Am. Chiropractic Ass'n, 258 F. Supp. 2d at 465*. We disagree.

Instead, we agree with the Tenth Circuit's resolution of this issue in *Bancoklahoma Mortgage Corp. v. Capital Title Co., 194 F.3d 1089 (10th Cir. 1999).* **[**47]** The Missouri insurance laws at issue in that case, like the Virginia insurance laws at issue here, did not provide for a private right of action. The court nonetheless concluded that *Humana* compelled a holding that the RICO claims were not barred by the McCarran-Ferguson Act. *Id. at 1099*. The court held

> RICO "advances" Missouri's "interest in combating insurance fraud" and "does not frustrate any articulated [Missouri] policy." Although Missouri does not provide a private cause of action under its [insurance laws], it

[21] The district court relied heavily on *Ambrose v. Blue Cross & Blue Shield of Va., Inc., 891 F. Supp. 1153 (E.D. Va. 1995)*, *aff'd* ***95 F.3d 41 (4th Cir. 1996)*** (unpublished per curiam opinion). Because *Ambrose* was decided before the Supreme Court's decision in *Humana, Inc. v. Forsyth, 525 U.S. 299, 142 L. Ed. 2d 753, 119 S. Ct. 710 (1999)*, and because the district court in *Ambrose* applied different definitions for the statutory terms than did the *Humana* Court, that decision is not helpful to our decision today.

> does allow causes of action under other state law. *See* Mo. Rev. Stat. 375.944(4) (1991). Therefore, the McCarran-Ferguson Act does not bar [the] RICO claims.

Id. (quoting Humana, 525 U.S. at 314); *see also* Humana, 525 U.S. at 312 (" Moreover, the [Nevada] Act is not hermetically sealed; it does not exclude application of other state laws, statutory or decisional."); Sabo v. Metropolitan Life Ins. Co., 137 F.3d 185 (3d Cir. 1998) (holding that RICO does not impair a state insurance law that permits private rights of action under other state **[**48]** laws). *But see* LaBarre v. Credit Acceptance Corp., 175 F.3d 640 (8th Cir. 1999) (holding that the lack of a private right of action in the state insurance laws was dispositive without considering whether the statute at issue permitted the application of other state laws to the conduct of insurers).

RICO furthers Virginia's interest in policing insurance fraud and misconduct and does not frustrate any declared state policy. Although RICO's damage provisions are admittedly more severe than many state laws, RICO does not interfere with Virginia's administrative scheme. Moreover, as discussed in Part IV, although Virginia's insurance laws do not create private rights of action, § 38.2-221 allows for other state laws to apply to the conduct of insurers.[22] Va. Code Ann. § 38.2-221 ***HN28***[] (The "power and authority conferred upon the Commission by this section shall be in addition to and not in substitution for the power and authority conferred upon the courts by general law to impose civil penalties for violations of the laws of this Commonwealth."). We agree with the Tenth Circuit that in such a situation, Humana compels a conclusion that American **[**49]** Chiropractic's RICO claim was not barred by the McCarran-Ferguson Act.

B.

HN29[] Although we disagree with the reasoning of the district court, we can affirm the **[*233]** dismissal of the complaint "on any basis fairly supported by the record." *Eisenberg v. Wachovia Bank, N. H., 301 F.3d 220, 222 (4th Cir. 2002)*. Perhaps anticipating our conclusion in Part V. A., Trigon has argued in the alternative that we should affirm the 12(b)(6) dismissal of the RICO claim because American Chiropractic has failed to state a claim under RICO. RICO provides, in pertinent part, that ***HN30***[] "[i] t shall be unlawful for any person who has received any income derived, directly or indirectly, from a pattern of racketeering activity …to use or invest, directly or indirectly, any part of such income, or the proceeds of such income …[in] **[**50]** the establishment or operation of, any enterprise which is engaged in, or the activities of which affect, interstate or foreign commerce." *18 U.S.C.A. § 1962(a)*. ***HN31***[] "Any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue …and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee." *18 U.S.C.A. § 1964(c)*.

HN32[] A plaintiff bringing a civil RICO action under *§ 1964(c)* must adequately plead at least two predicate acts of racketeering that form a "pattern of racketeering." *18 U.S.C.A. § 1961(5)*. Private civil RICO suits may be brought regardless of whether the government chooses to prosecute the criminal RICO violation. *Sedima, S.P.R.L. v. Imrex Co., Inc., 473 U.S. 479, 493, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)*. Here, American Chiropractic's complaint stated that Trigon committed ***HN33***[] mail fraud, wire fraud, and extortion.[23] All three qualify as "racketeering activity," *see 18 U.S.C.A. § 1961(1)*, but Trigon contends that American Chiropractic cannot state a claim for any of those **[**51]** predicate acts.

We consider first the alleged mail and wire fraud. ***HN34***[] The federal mail and wire fraud statutes prohibit the use of the mails or interstate wires in furtherance of schemes to defraud. *18 U.S.C.A. §§ 1341, 1343 (West 2000)*. For the government to obtain a conviction for mail or wire fraud it must prove (1) a scheme disclosing an intent to defraud; and (2) the use, respectively, of the mails or interstate wires in furtherance of the scheme. *See Chisolm v.*

---

[22] For example, in this case American Chiropractic asserted state law claims for tortious interference with a business relationship, common law and statutory conspiracy, and breach of contract.

[23] American Chiropractic also alleged the predicate act of securities fraud in its complaint, but it did not pursue that claim because Trigon previously had not been convicted of securities fraud, as required by *18 U.S.C.A. § 1964(c) (West 2000)*.

Transouth Fin. Corp., 95 F.3d 331, 336 (4th Cir. 1996). In a prosecution for mail or wire fraud, the government is not required to show reliance on any misrepresentation.

To recover civil RICO damages, however, an individual must also allege **[**52]** that he was injured "by reason of" the pattern of racketeering activity. *Id.; see also* 18 U.S.C.A. § 1964(c). To meet this burden with respect to mail fraud and wire fraud, a plaintiff must "*plausibly* allege both that [he] detrimentally relied in some way on the fraudulent mailing [or wire] …and that the mailing [or wire] was a proximate cause of the alleged injury to [his] business or property." Chisolm, 95 F.3d at 337 (emphasis added). The alleged fraud "must be a 'classic' one[,] …the plaintiff must have justifiably relied, to his detriment, on the defendant's material misrepresentation." *Id*. American Chiropractic's complaint states that Trigon committed mail and wire fraud by representing, in its "Ancillary Professional Provider Agreement," that it reimburses healthcare providers pursuant to the Federal Resource Based Relative Value Scale (RBRVS). [24] The complaint stated that **[*234]** chiropractors justifiably relied upon this alleged misrepresentation in deciding to enter into provider agreements with Trigon and that the chiropractors were injured because Trigon does not, in fact, reimburse chiropractic services pursuant **[**53]** to the RBRVS. [25] Trigon entered the Ancillary Professional Provider Agreement in full to support its motion to dismiss.

HN35[] Although as a general rule extrinsic evidence should not be considered at the 12(b)(6) stage, we have held that when a defendant attaches a document to its motion to dismiss, "a court may consider it in determining whether to dismiss the complaint [if] **[**54]** it was integral to and explicitly relied on in the complaint and [if] the plaintiffs do not challenge its authenticity." Phillips v. LCI Int'l Inc., 190 F.3d 609, 618 (4th Cir. 1999); *see also* Parrino v. FHP, Inc., 146 F.3d 699, 705-06 (9th Cir. 1998). As the Third Circuit has explained

> The rationale underlying this exception is that the primary problem raised by looking to documents outside the complaint - lack of notice to the plaintiff - is dissipated "[w] here plaintiff has actual notice …and has relied upon these documents in framing the complaint." What the rule seeks to prevent is the situation in which a plaintiff is able to maintain a claim of fraud by extracting an isolated statement from a document and placing it in the complaint, even though if the statement were examined in the full context of the document, it would be clear that the statement was not fraudulent.

In re Burlington Coat Factory Securities Litigation, 114 F.3d 1410, 1426 (3d Cir. 1997) (quotation marks omitted).

As stated above, American Chiropractic explicitly referred to the Ancillary Professional Provider Agreement, and its mail **[**55]** and wire fraud claims are based on the alleged misrepresentation made in that document. In addition, American Chiropractic does not contest the authenticity of the documents. Accordingly, we can consider those documents at the 12(b)(6) stage of the litigation.

The Ancillary Professional Provider Agreement states, in part, that "[m]ost Trigon fees are based upon external benchmarks of relative value, for example, the [RBRVS]." (J.A. at 156.) Thus, American Chiropractic alleges, Trigon has misled chiropractors into believing that their reimbursement would be based upon Medicare's reimbursement system. In full, however, the Ancillary Professional Provider Agreement states that

> *Trigon's fee schedules represent the maximum Allowable Charge for each covered service that corresponds to a single service code*. The preponderance of valid service codes [are] from Current Procedural Terminology (CPT), HCFA Common Procedural Coding System (HCPCS), American Dental Association (ADA), or National Drug Codes (NDC). For *covered services represented by a single code, the maximum Allowable Charge is the fee schedule amount determined by Trigon in its sole discretion* or your usual **[**56]** charge for the service, whichever is less. *Most Trigon fees are **[*235]** based upon external benchmarks* or relative value, for example, the Federal Resource Based Relative Value Scale (RBRVS), Average Wholesale Price (AWP),

[24] The RBRVS is the relative value scale used by Medicare in setting its reimbursement rates for providers under that program.

[25] At oral argument before this court, counsel for American Chiropractic also alleged that Trigon committed mail fraud by telling its plan enrollees that healthcare providers were reimbursed in accordance with Medicare rates. The district court previously had held that American Chiropractic lacked standing to advance the claims of individual patients, and American Chiropractic did not appeal that ruling. Thus, the argument that Trigon committed mail fraud against its enrollees is not properly before this court.

> American Society of Anesthesiologists (ASA), relative value and Medicare's laboratory and Durable Medical Equipment (DME) fees.

(J.A. at 156 (footnote omitted) (emphases added).)

The Agreement comes with Trigon's fee schedule attached. Relevant here, Trigon's fee schedule includes the maximum allowable charge for the four service codes associated with spinal manipulations. The fee schedule discloses that Trigon reimburses providers who perform spinal manipulations the same amount regardless of how many "regions" of the spine are manipulated. The RBRVS, however, provides a higher reimbursement when more spinal regions are manipulated. It is undisputed that Trigon began this reimbursement practice in 1997.

We conclude that American Chiropractic, as a matter of law, could not justifiably rely on the statement that "most" Trigon fees are based on the RBRVS for two reasons. First, the statement only provides that "*most*" fees are based on the external benchmark **[**57]** of the RBRVS. The term "most" indicates that some of Trigon's reimbursement payments were not based upon the RBRVS. Second, the remainder of the document clearly explains that Trigon's fee schedule represents the maximum allowable charge for a service. Moreover, the fee schedule discloses that Trigon does not follow the RBRVS when reimbursing for spinal manipulations. Because the fee schedule discloses that Trigon does not reimburse for spinal manipulation services according to the RBRVS, American Chiropractic could not have justifiably relied on Trigon's alleged misrepresentation that most of Trigon's fees were based on the RBRVS. Accordingly, American Chiropractic has failed to plausibly allege that it justifiably relied on a misrepresentation by Trigon.

HN36[] To withstand a motion to dismiss for failure to state a RICO claim, a plaintiff must plausibly allege at least two predicate acts of racketeering. As noted above, American Chiropractic's complaint alleged three predicate acts - mail fraud, wire fraud, and extortion. Because we have held that American Chiropractic failed to state a claim for mail or wire fraud, it has failed to allege at least two predicate acts of racketeering, **[**58]** and we need not address whether it properly alleged a claim of extortion.

Although, in light of *Humana, Inc v. Forsyth*, American Chiropractic's claim is not preempted by the *McCarran-Ferguson Act*, we affirm the dismissal of this count because American Chiropractic failed to state a claim for a RICO violation.

VI.

Finally, American Chiropractic argues that the district court abused its discretion in handling discovery in this case by refusing to extend the temporal scope of discovery to include events prior to 1996 and by failing to lengthen discovery after Trigon turned over documents relating to the MCAP in a tardy manner. [26] ***HN37***[] "We afford **[*236]** substantial discretion to a district court in managing discovery and review discovery rulings only for abuse of that discretion." *United States ex rel. Becker v. Westinghouse Savannah River Co., 305 F.3d 284, 290 (4th Cir. 2002)*, *cert. denied*, *538 U.S. 1012, 123 S. Ct. 1929, 155 L. Ed. 2d 848 (2003)*.

[59]** Discovery commenced in September 2001, soon after the district court addressed Trigon's motion to dismiss, and the parties agreed in writing to limit discovery requests to events occurring after January 1, 1996. [27] Discovery lasted ten months, concluding on June 28, 2002. On June 14, 2002, just prior to the close of discovery, Trigon turned over documents relating to Dr. Colley and his involvement with the MCAP. Trigon admitted that

---

[26] American Chiropractic raises four other arguments relating to the conduct of discovery. Those arguments are that the district court abused its discretion by: (1) failing to require Trigon to produce the identity of all medical doctors employed by Trigon; (2) refusing to compel Trigon to turn over information regarding any service code that paid a lower reimbursement amount to limited-license practitioners than to medical doctors; (3) by refusing to compel Trigon to turn over more of Dr. Colley's file; and (4) by refusing to allow American Chiropractic to conduct another *Rule 30(b)(6)* deposition. We have examined these issues carefully and conclude that they are without merit; thus, we affirm those rulings as well.

[27] The parties agreed that this time limit could be revised by negotiations in good faith if American Chiropractic could show a valid basis for requesting additional information.

despite its efforts to locate the documents, they had been "overlooked" and offered to cure the late production by allowing American Chiropractic to depose Dr. Colley after the stated discovery deadline passed. Trigon also permitted American Chiropractic to depose two representatives of medical societies with members on the MCAP after the close of discovery.

American Chiropractic's first assertion is **[**60]** that the district court abused its discretion by limiting the scope of discoverable materials to those created after January 1, 1996. By doing so, American Chiropractic contends, the district court rendered American Chiropractic unable to pursue key avenues of investigation in the case, including the $ 500 coverage cap instituted in 1988 and the MCAP meeting from October of 1995 where the Low Back Guideline was approved. Unfortunately for American Chiropractic, this limitation was imposed not by judicial fiat, but by the mutual agreement of the parties. The record shows that American Chiropractic and Trigon agreed, in writing, to limit discovery to events arising after January 1, 1996 unless, in good faith, a more expansive time period was necessary. American Chiropractic failed to contact Trigon to discuss expanding the time period and did not mention the limiting nature of the agreement to the district court until June 18, 2002, a mere ten days before the close of discovery. The district court found that expanding the time period to events before January 1, 1996, would be "overly burdensome" to Trigon and refused American Chiropractic's invitation to do so. (J.A. at 1137.) We cannot **[**61]** say the district court abused its discretion by refusing, at such a late date, to expand the scope of discovery beyond that mutually agreed to by the parties.

Next, American Chiropractic contends that the district court abused its discretion by refusing to extend the end-date of discovery when Trigon turned over documents relating to the Low Back Guideline and the MCAP's October 25, 1995 meeting just before the close of discovery. Trigon does not dispute that it was dilatory in turning over those particular documents; in a letter to American Chiropractic, it admitted that "despite Trigon's good faith efforts to produce all of the relevant documents, these documents were not found and were overlooked during the previous document productions. This was admittedly a mistake by Trigon." (J.A. at 5296.) Despite this admitted mistake, the district court denied American **[*237]** Chiropractic's request for more discovery and found that "any mistakes on Trigon's part have not caused prejudice." (J.A. at 1131.)

While we are not sure that Trigon's late production of these documents did not have the potential to cause prejudice, two factors lead us to conclude that the district court did not abuse its **[**62]** discretion in refusing to extend discovery. First, Trigon offered to cure the late production by allowing American Chiropractic to conduct an additional deposition of Dr. Colley after the close of discovery. Second, Trigon allowed American Chiropractic to take depositions of two of the medical societies with members on the MCAP after the close of discovery as well.

Additionally, if American Chiropractic felt that it had insufficient time to conduct discovery given the late production of documents, and/or that Trigon was not negotiating in good faith an agreement for further discovery, it could have filed a *Rule 56(f)* motion in response to Trigon's motion for summary judgment. [28] We have held that ***HN38***[] "[i] f a party believes that more discovery is necessary for it to demonstrate a genuine issue of material fact, the proper course is to file a *Rule 56(f)* affidavit." *Harrods Ltd. v. Sixty Internet Domain Names, 302 F.3d 214, 244 (4th Cir. 2002)*. This American Chiropractic did not do. In sum, we find that the district court did not abuse its discretion in its discovery rulings.

[63]** VII.

In conclusion, we affirm the district court's grant of summary judgment on American Chiropractic's *§ 1 Sherman Act* claim, Virginia civil and common law conspiracy claims, and tortious interference claim. We also affirm the district court's dismissal of American Chiropractic's claim under the Virginia insurance equality laws for failure to state a claim. Although we disagree with the district court's holding that American Chiropractic's RICO claim is preempted

---

[28] *Federal Rule of Civil Procedure 56(f)* provides that ***HN39***[] "[s] hould it appear from the affidavits of a party opposing [a summary judgment] motion that the party cannot for reasons stated present by affidavits facts essential to justify the party's opposition, the court may …order a continuance to permit …discovery to be had."

by the *McCarran-Ferguson Act*, we affirm the district court's dismissal of that claim because American Chiropractic has failed to state a claim for a RICO violation. We also find that the district court's discovery rulings were not an abuse of discretion.

AFFIRMED

Schecher v. Purdue Pharma L.P.

HN1[] **Federal Venue Transfers, Convenience Transfers**

The venue statute, *28 U.S.C.S. § 1404(a)*, does not vest courts with unlimited power to transfer a civil action to any federal district; rather, *§ 1404(a)* limits transfer of a civil action to any other district or division where it might have been brought. A district or division is one where the action might have been brought if, among other things, when the action began the proposed transferee district court would have had subject matter jurisdiction over the action.

Civil Procedure > ... > Removal > Elements for Removal > General Overview

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

Civil Procedure > ... > Removal > Postremoval Remands > Jurisdictional Defects

HN3[] **Removal, Specific Cases Removed**

A civil action is removable to federal district court only if a plaintiff could have originally brought the action in federal court. *28 U.S.C.S. § 1441(a)*. The court is required to remand if at any time before final judgment it appears that the district court lacks subject matter jurisdiction. *28 U.S.C.S. § 1447(c)*. Because federal courts are courts of limited jurisdiction, the law imposes a presumption against federal jurisdiction. The rule is inflexible and without exception, and requires a court to deny its jurisdiction in all cases where such jurisdiction does not affirmatively appear in the record. Accordingly, the court must strictly construe the federal removal statute, *28 U.S.C.S. § 1441*.

Constitutional Law > ... > Jurisdiction > Subject Matter Jurisdiction > Federal Questions

Copyright Law > ... > Civil Infringement Actions > Jurisdiction > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

HN4[] **Subject Matter Jurisdiction, Federal Questions**

Federal district courts have original federal question jurisdiction over all civil actions arising under the Constitution, laws, or treaties of the United States. *28 U.S.C.S. § 1331*. Additionally, district courts have exclusive original jurisdiction over actions arising under any Act of Congress relating to patents. *28 U.S.C.S. 1338(a)*. The Supreme Court uses the same standard to evaluate the "arising under" language in both *28 U.S.C.S. §§ 1331* and *1338(a)*, that is, the presence or absence of federal question jurisdiction is governed by the well-pleaded complaint rule, which provides that federal jurisdiction exists only when a federal question is presented on the face of the plaintiff's properly pleaded complaint. A defense is not part of a plaintiff's well pleaded statement of his claim. Thus, a case may not be removed to federal court on the basis of a federal defense even if the defense is anticipated in the plaintiff's complaint and even if both parties admit that the defense is the only question truly at issue in the case.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > Substantial Questions

HN5[] **Removal, Specific Cases Removed**

Under the well-pleaded complaint rule, a plaintiff as "master of his complaint," can generally control the possibility of removal to federal court by asserting only state law claims in the complaint. Consequently, the majority of federal cases will be those in which federal law creates the cause of action. A corollary rule, however, provides that a plaintiff may not defeat removal jurisdiction by omitting to plead necessary federal questions in a complaint. Even though state law creates a party's cause of action, its case might still arise under the laws of the United States if a well-pleaded complaint established that its right to relief under state law requires resolution of a substantial question of federal law. Thus, merely because a claim makes no reference to federal law does not necessarily mean that the claim does not arise under federal law. However, jurisdiction does not exist if only one of plaintiff's alternate theories for its claim requires resolution of a federal question.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > Substantial Questions

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

Patent Law > Infringement Actions > General Overview

HN6[] **Bad Faith, Fraud & Nonuse, Fraud**

Fraud on the U.S. Patent & Trademark Office (PTO) is distinct from mere inequitable conduct because a fraud finding requires higher threshold showings of both intent and materiality than does a finding of inequitable conduct. Indeed, federal patent law bars the imposition of liability for conduct before the PTO unless a plaintiff can show that the patent holder's conduct amounted to fraud or rendered the patent application process a sham. Thus, by pleading fraud in the PTO process and reliance on fraudulently obtained patents as the only basis for an alleged unlawful restraint of trade and a monopoly, a plaintiff raises substantial questions of federal patent law, which would support federal question jurisdiction over the action.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN7[] **Bad Faith, Fraud & Nonuse, Fraud**

Inequitable conduct is an equitable defense in a patent infringement action and serves as a shield, while a more serious finding of fraud potentially exposes a patentee to antitrust liability and thus serves as a sword.

HN9[] **Federal Venue Transfers, Convenience Transfers**

The purpose of *28 U.S.C.S. § 1404(a)* is to permit easy change of venue within a unified federal judicial system. Pursuant to *§ 1404(a)*, a court may transfer a case to any other district or division where it might have been brought originally for the convenience of parties and witnesses and in the interest of justice. Reference to an action as a potential tag-along action in its transfer order does not limit a court's power to enter further procedural orders, including a motion to transfer. The party seeking the transfer bears the burden of demonstrating that transfer is appropriate and that the balance of considerations tilts strongly in its favor.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN12[] **Judges, Discretionary Powers**

The decision whether to grant a party's motion to transfer is within the sound discretion of the district court. A court has the discretion under U.S.C.S. *§ 1404(a)* to adjudicate transfer motions according to an individualized, case-by-case consideration of convenience and fairness. Among the factors to be considered by a court are: the plaintiff's choice of forum; the accessibility of witnesses and other sources of proof, including the availability of compulsory process to insure attendance of witnesses; the cost of making the necessary proof; questions as to the enforceability of a judgment if one is obtained; relative advantages and obstacles to a fair trial; difficulties that may arise from congested dockets; the possibility of the existence of questions arising in the area of conflict of laws; the advantage of having a local court determine questions of local law; and, all other considerations of a practical nature that make a trial easy, expeditious and economical. In considering a motion for transfer, the trial court is called upon to carefully weigh the competing equities relied upon by the parties for changing the place of trial.

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN13[] **Venue, Federal Venue Transfers**

The pendency of related litigation in another forum is a proper factor to consider in resolving choice of venue questions.

HN15[] **Service of Summons, Content & Form**

The Southern District of New York can compel the appearance of anyone within 100 miles of New York. *Fed. R. Civ. P. 4(k)(1)(B)*.

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

HN16[] **Venue, Federal Venue Transfers**

The court must normally give great weight to a plaintiff's choice of forum. However, when a plaintiff is a class representative, that weight is diminished and factors other than plaintiff's choice must necessarily take on increased significance. The weight accorded a plaintiff's choice of forum is also reduced when the plaintiff does not reside in the forum. Additionally, when the facts giving rise to a lawsuit have no material relation or significant connection to plaintiff's chosen forum, plaintiff's choice of forum is given reduced weight on motion to transfer.

Opinion

[*1255] MEMORANDUM [2] AND ORDER**

This matter comes before the Court on defendants' Motion to Transfer (Doc. 11), plaintiff's Motion to Remand (Doc. 16) and defendants' Motion to Stay (Doc. 41). Defendants Purdue Pharma, L.P., Purdue Pharma Company, Purdue Frederick Co., [1] and P.F. Laboratories, Inc. seek transfer of this case to the Southern District of New York. Plaintiff Bob Schecher opposes transfer and has filed a Motion to Remand the case to state court for lack of subject matter jurisdiction. Additionally, defendants have filed a Motion to Stay plaintiff's remand motion, pending resolution of the motion to transfer. For the reasons stated below, defendants' motion to transfer is granted, plaintiff's motion to remand is denied, and defendants' motion to stay is denied.

I. Background

This antitrust litigation was originally filed by plaintiff in the District Court of Shawnee **[**3]** County, Kansas, on January 13, 2004, as a class action on behalf of all persons or entities in the United States who purchased OxyContin(R) other than for re-sale or distribution from 1995 to the present. Plaintiff also sought to represent a subclass of individuals within Kansas who purchased OxyContin(R). In his Complaint, plaintiff asserts violations of the *Kansas Restraint of Trade Act*, K.S.A. *§§ 50-101, 50-112and 50-117*. Plaintiff alleges that Defendants "fraudulently obtained" its patents and relied on those fraudulently obtained patents "to thwart generic competition for OxyContin(R)" and that, as a result, plaintiff Bob Schecher and the other members of the class paid more for OxyContin(R) than they would have paid if generic competitors had been allowed to enter the market.

This action follows on the heels of a separate, but related patent action [2] in the United States District Court for the Southern District of New York that defendants brought against Endo Pharmaceuticals (Endo). Following an eleven-day bench trial, Judge Stein issued a memorandum opinion holding that Endo's products infringed upon defendants' OxyContin(R) Tablets, but that the patents were unenforceable **[**4]** due to defendants' inequitable conduct before the U.S. Patent and Trademark Office (PTO). [3] Further, in its answer to the patent action, Endo asserted antitrust counter-claims and alleged, among other things that defendants had monopolized the market. Fact discovery on the antitrust counterclaims is complete and expert reports have been exchanged, but the counterclaims have yet to be substantively resolved.

Plaintiff's case is not the only related case which followed the New York decision. On April 22, 2004, the Judicial Panel on Multidistrict Litigation entered a Transfer Order which consolidated two actions filed in the District of Connecticut with similar actions pending in the Southern District of New York. The Order states that in addition to

---

[1] Although plaintiff named the Purdue Franklin Company in his caption, the parties agree he intended to name the Purdue Frederick Company.

[2] Indeed, plaintiff quotes from the opinion issued in the case in his Complaint.

[3] *Purdue Pharma L.P., v. Endo Pharms., Inc., 2004 U.S. Dist. LEXIS 10, 2004 WL 26523 (S.D.N.Y. January 5, 2004)*.

the consolidated actions, forty-one related actions have been filed. [4] Twenty-three **[**5]** of these actions are pending in the Southern District of New York and eighteen actions are pending in other districts, including "one action . . . in the . . . District of Kansas." **[*1256]** Though the Transfer Order does not identify the "one action" pending in the District of Kansas by docket number, the Panel's reference was surely to this case, because this case was the only Kansas case included in a list of eighteen related matters pending in judicial districts, which the Panel notified the Court of in mid-March. The Order indicated that "these and any other related actions will be treated as potential tag along actions." To the Court's knowledge, the Panel has yet to issue a transfer order in this case.

II. Discussion

Defendants contend that the Court should transfer this case to the Southern District of New York and stay plaintiff's motion to remand to allow Judge Stein to resolve the remand issues **[**6]** in all the removed cases simultaneously. Conversely, plaintiff asserts that the threshold jurisdictional issue raised by the remand motion should be addressed before the motion to transfer venue, and that the motion to stay is without merit.

HN1[] The venue statute, *28 U.S.C. § 1404(a)*, does not vest courts with unlimited power to transfer a civil action to any federal district; rather, *§ 1404(a)* limits transfer of a civil action to "any other district or division where it might have been brought" [5] **[**7]** A district or division is one where the action "might have been brought" if, among other things, when the action began the proposed transferee district court would have had subject matter jurisdiction over the action. [6] Because a court may only transfer a case to a venue where the case could have been brought originally, this Court must necessarily address plaintiff's contention that subject matter jurisdiction is lacking before reaching the motion to transfer.

A. Motion to Stay

Although defendants suggest that it would more efficient to stay plaintiff's pending remand motion to allow Judge Stein to rule on the remand issues at once, the Court disagrees. Judge Vratil recently addressed this precise issue and determined:

> While staying the proceedings might allow a single district court to rule on the jurisdictional issue in the various cases, a stay would not affect the law that applies to the present case and little would be gained by a stay of decision on the motion to remand. The **[**8]** parties would still be subject to Kansas law. No great judicial economy will be realized from a delay. The parties will not save time, for they have already briefed the remand issue. The Court is well versed in both Kansas and federal law, while the transferor court would need to apply the law of different states to different claims. For purposes of judicial economy, the jurisdictional issue should be resolved immediately. If federal jurisdiction does not exist, the case can be remanded before federal resources are further expended. In the Court's view, judicial economy dictates a present ruling on the remand issue. [7]

---

[4] Defendants have informed the Court that, at the latest tally, fifty-five related actions have been filed.

[5] *28 U.S.C. 1404(a)*; ***Hoffman v. Blaski, 363 U.S. 335, 343-44, 80 S. Ct. 1084, 4 L. Ed. 2d 1254 (1960)***.

[6] ***U.S. Sprint Communications Co. v. Boran, 716 F. Supp. 505, 507 (D. Kan. 1988)***; *U.S. Telecom, Inc. v. Hubert, 678 F. Supp. 1500, 1504 (D. Kan. 1987)*; *see also* *Leroy v. Great W. United Corp., 443 U.S. 173, 180, 99 S. Ct. 2710, 61 L. Ed. 2d 464 (1979)* ***HN2***[] ("Neither venue nor personal jurisdiction is fundamentally preliminary in the sense that subject matter jurisdiction is, for both are personal privileges of the defendant, rather than absolute strictures on the court, and both may be waived by the parties.")

[7] *Aetna U.S. Healthcare v. Hoechst Aktiengesellschaft, 54 F. Supp. 2d 1042, 1047 (D. Kan. 1999)*.

[*1257] The Court agrees that there is no benefit to be gained from staying the remand motion.

B. Motion to Remand

Plaintiff alleges that defendants illegally removed this action and that remand is proper because this court lacks subject matter jurisdiction. ***HN3***[] A civil action **[**9]** is removable only if plaintiffs could have originally brought the action in federal court. [8] The Court is required to remand "if at any time before final judgment it appears that the district court lacks subject matter jurisdiction." [9] Because federal courts are courts of limited jurisdiction, the law imposes a presumption against federal jurisdiction. [10] The rule is inflexible and without exception, and requires a court to deny its jurisdiction in all cases where such jurisdiction does not affirmatively appear in the record. [11] Accordingly, the Court must strictly construe the federal removal statute. [12]

[10]** Defendants allege that federal subject matter jurisdiction exists because plaintiff's claims arise under federal patent law creating federal question jurisdiction, diversity jurisdiction is present, and plaintiff's claims are completely pre-empted by ERISA.

1. Federal Question Jurisdiction

Plaintiff argues that he has pleaded only state law claims that do not arise under federal law; consequently, federal question jurisdiction is lacking. On the other hand, defendants claim federal jurisdiction is proper because plaintiff's claims "necessarily depend on resolution of a substantial question of patent law" and each of plaintiff's factual allegations can only be resolved as a matter of federal patent law.

HN4[] Federal district courts have original federal question jurisdiction over "all civil actions arising under the Constitution, laws, or treaties of the United States." [13] Additionally, district courts have exclusive original jurisdiction over actions "arising under any Act of Congress relating to patents . . . ." [14] The Supreme Court uses the same standard to evaluate the "arising under" language in both *§§ 1331and 1338(a)*, [15] that is, "the presence or absence of federal- **[**11]** question jurisdiction is governed by the well-pleaded complaint rule, which provides that federal jurisdiction exists only when a federal question is presented on the face of the plaintiff's properly pleaded complaint." [16] A defense is not part of a plaintiff's well pleaded statement of his claim. [17] Thus, "a case may not be

removed to federal court on the basis of a federal defense . . . even if the defense is anticipated in the plaintiff's complaint and even if both parties admit that the defense is the only question truly at issue in the case." [18]

[12]** *HN5*[] **[*1258]** Under the well-pleaded complaint rule, the plaintiff as "master of his complaint," can generally control the possibility of removal by asserting only state law claims in the complaint. [19] Consequently, the majority of federal cases will be those in which "federal law creates the cause of action." [20] **[**13]** A corollary rule, however, provides that "a plaintiff may not defeat removal jurisdiction by omitting to plead necessary federal questions in a complaint." [21] "Even though state law creates [a party's] cause of action, its case might still arise under the laws of the United States if a well-pleaded complaint established that its right to relief under state law requires resolution of a substantial question of federal law." [22] Thus, "merely because a claim makes no reference to federal patent law does not necessarily mean that the claim does not arise under patent law." [23] However, jurisdiction does not exist if only one of plaintiff's alternate theories for its claim requires resolution of a federal question. [24]

Defendants argue that plaintiff's claims require the resolution of substantial questions of federal patent law because all of plaintiff's allegations are based on defendant's conduct in obtaining and enforcing their patent rights. In his Complaint, Plaintiff refers to two types of misconduct by defendants: that defendants made material misrepresentations to the PTO to fraudulently obtain the patents, and that defendants sued for patent infringement, relying on the "fraudulently obtained patents to thwart generic competition." These allegations are the basis of the plaintiff's state law claims that defendants engaged in misconduct to create an unlawful trust in restraint of trade and to obtain and enforce a monopoly.

Plaintiff's complaint demonstrates that he cannot prove his state law claims without resolving **[**14]** substantial questions of federal patent law. [25] **[**15]** The alleged submission of misrepresentations to the PTO to fraudulently procure patents necessarily involves questions of patent law, including what information the patent applicant had a duty to disclose and what information was material to the patent application. [26] Similarly, the allegation that defendants "relied on its fraudulently obtained patents to thwart generic competition" through litigation **[*1259]** necessarily turns on questions of federal patent law because the allegation depends on what constitutes a

[23] *Christianson, 486 U.S. at 809 n.3*.

[24] *Id. at 810*.

[25] Indeed, Judge Donald reached this same conclusion with identical facts in *Coker v. Purdue Pharma Co., 314 F. Supp. 2d 777, 2004 U.S. Dist. LEXIS 6988, No. 04-2145-DP, 2004 WL 870661 at *4*, although there the plaintiff also alleged a collateral estoppel theory, which allowed the plaintiff to prove that Defendants made material misrepresentations to the PTO without involving the resolution of substantial questions of federal patent law. *2004 U.S. Dist. LEXIS 6988 at *5*. No such collateral estoppel theory was presented by plaintiff in this case.

[26] *See, e.g.*, *37 C.F.R. § 1.56* (discussing the duty to disclose information material to patentability); *Rohm & Haas Co. v. Brotech Corp., 770 F. Supp. 928, 934 n.2 (D. Del. 1991)* (noting that allegations of fraudulent procurement of a patent involve fundamental issues of patent law which are logically related to infringement issues. "For example, to determine whether an applicant had practiced fraud on the PTO, the factfinder must assess what evidence must be presented to the PTO to obtain legitimate approval of a given patent application.")

fraudulently obtained patent under federal patent law. [27] Thus, the sole assertions in plaintiff's well-pleaded Complaint to support his charge of an unlawful trust and a monopoly depend on whether defendants fraudulently obtained the OxyContin(R) patents.

[16]** After asserting that his case involves only state law antitrust claims and is divorced from federal patent law, plaintiff curiously suggests that "the patent issues the defendants claim require resolution here have already been resolved by Judge Stein . . . who, after conducting a bench trial, issued a lengthy opinion including detailed findings of fact that Defendants obtained their patents for OxyContin(R) by fraud." However, Judge Stein did not conclude that defendants fraudulently obtained their permits. Instead, Judge Stein analyzed whether the patents were infringed and whether the equitable defense of inequitable conduct barred enforcement of those patents. ***HN6***[] Fraud on the PTO is distinct from mere inequitable conduct because a fraud finding requires "higher threshold showings of both intent and materiality than does a finding of inequitable conduct." [28] Indeed, "federal patent law bars the imposition of liability for conduct before the PTO unless the plaintiff can show that the patent holder's conduct amounted to fraud or rendered the patent application process a sham." [29] By pleading fraud in the PTO process and reliance on fraudulently obtained patents as his only basis for **[**17]** an alleged unlawful restraint of trade and a monopoly, plaintiff has raised substantial questions of federal patent law which have not yet been resolved. Thus, plaintiff's own assertions serve to strengthen the case for federal question jurisdiction.

Finally, plaintiff argues that *Aetna U.S. Healthcare v. Hoechst Aktiengesellschaft* [30] dictates that his case be remanded **[**18]** to state **[*1260]** court for lack of federal subject matter jurisdiction. However, Aetna is clearly distinguishable from the instant case. In *Aetna*, the defendant branded drug manufacturer had previously brought a patent infringement suit against a proposed generic manufacturer, which then brought antitrust counterclaims. [31] Before the court came to resolve the patent infringement issue, the generic and branded manufacturer entered into a stipulation agreement, by which the generic manufacturer agreed to drop its counterclaims in the patent infringement suit in return for quarterly payments of $ 10 million, and to diligently prosecute its claim for FDA approval and assert its right as first in line against other potential producers of generic drugs. [32] Subsequently, the two drug manufacturers did not actively pursue the patent infringement suit and the generic drug manufacturer did

[27] *See e.g., Hunter Douglas, Inc., v. Harmonic Design, Inc., 153 F.3d 1318, 1329 (Fed. Cir. 1998)* (holding that a state law action for injurious falsehood depended on the resolution of a question of federal patent law where defendant's stated assertion of exclusive patent rights could only be false if the patents were in fact invalid and unenforceable), *overruled on other grounds by Midwest Indus., Inc. v. Karavan Trailers, Inc., 175 F.3d 1356 (Fed. Cir. 1999)*; *Additive Controls & Measurement Sys., Inc. v. Flowdata, Inc., 986 F.2d 476, 477-78 (Fed. Cir. 1993)* (holding that *§ 1338(a)* provided jurisdiction over a claim for business disparagement involving false accusations of infringement); ***Baxa Corp. v. McGaw, Inc., 996 F. Supp. 1044, 1054 (D. Colo. 1997)*** ("A patent is presumed valid. *35 U.S.C. 285* Therefore, to the extent Excelsior relies on . . . fraud on the PTO to support its [state law] claims . . . it must prove . . . fraud and . . . knowledge thereof by clear and convincing evidence.")

[28] *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1070-71 (Fed. Cir. 1998)* ***HN7***[] (Inequitable conduct is an equitable defense in a patent infringement action and serves as a shield, while a more serious finding of fraud potentially exposes a patentee to antitrust liability and thus serves as a sword.)

[29] *Hunter Douglas, Inc., 153 F.3d at 1336*; *In re Indep. Serv. Orgs. Antitrust Litig., 964 F. Supp. 1479, 1488-89 (D. Kan. 1997)* (noting that ***HN8***[] "where a patent has been lawfully acquired, subsequent conduct under the patent laws cannot trigger any liability under the ***antitrust law***").

[30] *54 F. Supp. 2d 1042 (D. Kan. 1999)*. Plaintiff cites other cases which he claims mandate remand, many of which involve the same facts and law the *Aetna* court encountered, but in none of those cases was a court faced with the precise issue this Court faces. In the only decision interpreting identical facts, *Coker, 2004 U.S. Dist. LEXIS 6988, 2004 WL at *4*, Judge Donald determined that but for a collateral estoppel argument, federal question jurisdiction existed because plaintiff's claims involved substantial questions of federal patent law.

[31] *Id. at 1046*.

[32] *Id.*

not begin to sell its generic product. [33] Producers of competing generic products were thus barred from entering the market and unable to compete. [34] On behalf of a class of Kansas plaintiffs, *Aetna* filed suit in state court alleging that the branded and generic manufacturers had harmed members of the **[**19]** public by preventing production of a lower-cost generic drug. [35]

The *Aetna* court held that plaintiff's complaint did not raise substantial issues of federal patent law because "plaintiffs . . . do not seek to litigate the validity of the [] patents." [36] The court reasoned that "plaintiffs' claims do not depend on whether **[**20]** the patents were valid," because plaintiffs allege only that the drug manufacturer "had an impure heart when it filed [the patent infringement] suit." [37] Additionally, the court noted that "regardless [of] whether the patent is valid, plaintiffs allege that defendants committed other acts of unfair competition -- such as the stipulation agreement." [38] In this case, however, plaintiffs claims require litigation of the validity of the patents. Indeed, plaintiff rests his unfair competition and monopoly claims on the fact that defendants "fraudulently obtained" the patents and "relied on the fraudulently obtained patents" to thwart generic competition, issues of federal patent law. Nor are allegations of other acts of unfair competition present, such as a stipulation agreement, as in *Aetna*. For all of these reasons, *Aetna* is not controlling.

Because **[**21]** the Court concludes that federal question jurisdiction is present, it need not address whether diversity of the parties or ERISA preemption might also confer subject matter jurisdiction.

B. Motion to Transfer Venue

In addition to arguing that this case belongs in federal court, defendants suggest that transfer to the Southern District of New York is appropriate. ***HN9***[] The purpose of *28 U.S.C. § 1404(a)* is to permit easy change of venue within a unified federal judicial system. [39] **[**22]** Pursuant to *§ 1404(a)*, a court may transfer a case to **[*1261]** any other district or division where it might have been brought originally for "the convenience of parties and witnesses" and "in the interest of justice." [40] The Panel's reference to this action as a potential tag-along action in its Transfer Order does not limit the Court's power to enter further procedural orders, including a motion to transfer. [41] But, the

party seeking the transfer bears the burden of demonstrating that transfer is appropriate and that the balance of considerations tilts strongly in its favor. [42]

HN12[] The decision whether to grant a party's motion to transfer is within the sound discretion of the district court. [43] A court has the discretion under § 1404(a) to adjudicate transfer motions according to an individualized, case-by-case consideration of convenience and fairness. [44] Among the factors to be considered by a court are:

> the **[**23]** plaintiff's choice of forum; the accessibility of witnesses and other sources of proof, including the availability of compulsory process to insure attendance of witnesses; the cost of making the necessary proof; questions as to the enforceability of a judgment if one is obtained; relative advantages and obstacles to a fair trial; difficulties that may arise from congested dockets; the possibility of the existence of questions arising in the area of conflict of laws; the advantage of having a local court determine questions of local law; and, all other considerations of a practical nature that make a trial easy, expeditious and economical. [45]

In considering a motion for transfer, "the trial court is called upon to carefully weigh the competing equities relied upon by the parties for changing the place of trial." [46]

[24]** The Court concludes that the balance of equities favors transferring this case to the Southern District of New York because any inconvenience caused to the plaintiff by transfer is far outweighed by the interest of justice, and plaintiff's choice of forum is not entitled to blind deference.

1. The Interest of Justice

The interest of justice clearly favors transfer. First, the allegations of plaintiff and those at issue in the pending patent litigation are closely related. HN13[] "The pendency of related litigation in another forum is a proper factor to consider in resolving choice of venue questions." [47] Plaintiff argues that defendants used fraudulently obtained patents to thwart generic competition for OxyContin(R), issues that overlap significantly with matters **[*1262]** already heard before Judge Stein in the patent case. Moreover, this case raises nearly identical issues to those raised in Endo's antitrust counterclaims. Namely, Endo claimed, *inter alia*, that defendants wrongfully enforced its patents and attempted monopolization, just as plaintiff now claims defendants attempted to stymie competition through fraudulently obtained patents.

[25]** In addition, this action raises legal and factual issues that are related to forty other actions pending in federal court, all of which the Judicial Panel on Multidistrict Litigation has termed "potential tag-along actions." By definition, "[a] HN14[] tag-along action refers to a civil action pending in a district court and involving common questions of fact with actions previously transferred under Section 1407." [48] Because of the similarities in this action and other pending actions, transfer to the Southern District of New York is warranted to both facilitate the interest of justice and avoid inconsistent results. Indeed, were this Court not to transfer the case, "two different federal district courts would be simultaneously litigating claims involving virtually the same parties and the same issues, certainly not a desirable outcome from the standpoint of either judicial efficiency or convenience to the parties and witnesses."

[45] Id.

[46] Hustler Magazine, Inc., v. United States Dist. Ct. for the Dist. of Wyoming, 790 F.2d 69, 71 (10th Cir. 1986).

[47] Hill's Pet Prods., 808 F. Supp. 774, 777 (D. Kan. 1992).

[48] J.P.M.L. Rule 1.1.

Albeit unsuccessfully, plaintiff attempts to distinguish this **[**26]** case from those cases already pending in the New York court in a bid to avoid transfer. First, plaintiff argues that "none of the cases pending in the S.D.N.Y. assert claims under Kansas law on behalf of indirect purchasers of OxyContin(R) in the State of Kansas." But, this argument is simply incorrect as plaintiff's class is the same as eighteen purported classes of indirect purchasers pending in the Southern District of New York. In addition, plaintiff states that the pending New York cases do not support transfer because they "allege violations of federal ***antitrust law***, not Kansas state law." However, a number of the cases currently pending in the Southern District of New York expressly include claims under the same Kansas law that plaintiff invokes. Hence, plaintiff's argument only bolsters the reasons for transfer.

For the same reason, plaintiff's argument that the Kansas courts' familiarity with Kansas law weighs against transferring this case to New York fails. This Court has already determined that plaintiff's well-pleaded case raises substantial issues of federal patent law, giving federal courts exclusive jurisdiction over plaintiff's claims. Thus, the only remaining decision **[**27]** is whether this Court or Judge Stein, who is intimately familiar with the facts upon which this case is based, is best equipped to resolve plaintiff's claims. Because cases invoking Kansas law are currently before the New York court, Judge Stein is already familiar with Kansas law. In any event, the Court is confident Judge Stein can properly apply Kansas law.

2. The Convenience of the Parties and Witnesses

The Court finds that because nearly all the events giving rise to the Complaint occurred in New York, the convenience of the parties and witnesses would be best served by transferring this case to the Southern District of New York. Defendants have no facilities in Kansas, and no witnesses with knowledge of the prosecution of the patents are located in Kansas. Rather, OxyContin(R) was developed and the patents were prosecuted in New York and Connecticut. Moreover, all of the defendants' witnesses who testified in the previous patent infringement lawsuit reside in the New York metropolitan area and are within the Court's subpoena power. [49] **[*1263]** Although plaintiff alleges that his Complaint pertains to defendants' conduct in Kansas, the root of his Complaint stems from the defendants' **[**28]** reliance on the fraudulently obtained patents to thwart competition and the effect such monopolization had upon the Kansas market, which are both inexorably linked to the New York litigation.

3. Plaintiff's Choice of Forum

HN16[] The Court must normally give great weight to a plaintiff's choice of forum. [50] **[**29]** However, when a plaintiff is a class representative, that weight is diminished and factors other than plaintiff's choice must necessarily take on increased significance. [51] The weight accorded a plaintiff's choice of forum is also reduced when the plaintiff does not reside in the forum. [52] Additionally, when the facts giving rise to a lawsuit have no material relation or significant connection to plaintiff's chosen forum, plaintiff's choice of forum is given reduced weight on motion to transfer." [53]

Plaintiff chose Kansas as his forum and the Court must give some deference to his choice, but this deference need not be blind. Plaintiff brings this action as a class representative so the weight normally given to his choice of forum is diminished. Moreover, while plaintiff resides in Kansas, he seeks to represent a nationwide class of plaintiffs in his lawsuit. According to plaintiff's Complaint, "there are hundreds of thousands of members of the Class and the

---

[49] ***HN15***[] The Southern District of New York can compel the appearance of anyone within 100 miles of New York. *See* *Fed. R. Civ. P. 4(k)(1)(B)*.

Kansas Class who are geographically dispersed throughout Kansas and the United States." Furthermore, the facts giving rise to this lawsuit, i.e, the fraudulent procurement of patents, occurred in New York and Connecticut, not Kansas so that such facts have no significant connection to plaintiff's chosen forum other than the fact that plaintiff is a Kansas resident. Thus, the Court concludes that the balance of equities, **[**30]** even after taking into account plaintiff's choice of forum, require that this case be transferred to the Southern District of New York.

IT IS THEREFORE ORDERED BY THE COURT THAT defendants' Motion to Transfer (Doc. 11) is GRANTED.

IT IS FURTHER ORDERED BY THE COURT THAT plaintiff's Motion to Remand (Doc. 16) is DENIED.

IT IS FURTHER ORDERED BY THE COURT THAT defendants' Motion to Stay (Doc. 41) is DENIED.

IT IS SO ORDERED.

Dated this 6th day of May, 2004.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN1[] **Class Actions, Certification of Classes**

On a motion for class certification, a district court must conduct a rigorous analysis of the prerequisites established by *Fed. R. Civ. P. 23*. This analysis should not involve a preliminary hearing into the merits, but rather an inquiry into whether the requirements of *Rule 23* are met. The moving party bears the burden of establishing the elements necessary for class certification: the four requirements of *Rule 23(a)* and one of the several requirements of *Rule 23(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN2[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(a) imposes four threshold requirements applicable to all class actions: (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative parties will fairly and adequately protect the interests of the class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN3[] Class Actions, Certification of Classes

In addition to the requirements of *Fed. R. Civ. P. 23(a)*, a party seeking class certification must establish the elements of *Rule 23(b)(1)*, *(2)*, or *(3)*. *Rule 23(b)(2)* permits a class action when the party opposing the class has acted or refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole. *Rule 23(b)(3)* permits a class action when common questions predominate over any question affecting only individual members, and class resolution is superior to other available methods for the fair and efficient adjudication of the controversy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN4[] Prerequisites for Class Action, Predominance

Matters pertinent to evaluating predominance and superiority under *Fed. R. Civ. P. 23(b)(3)* include: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action. This list of pertinent factors is nonexhaustive.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5[] Class Actions, Prerequisites for Class Action

Numerosity is established if the size of a proposed class, even if inexactly determined, is sufficiently large as to make joinder impracticable, given the relevant circumstances.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN6[] Class Actions, Prerequisites for Class Action

Where each of the plaintiffs claims injuries resulting from the same alleged conduct, resolving these common questions collectively will advance the litigation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN7[] Class Actions, Prerequisites for Class Action

The element of typicality requires that the named plaintiffs' claims arise from the same course of conduct that gave rise to the claims of the absent class members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN8[] Class Actions, Prerequisites for Class Action

The adequacy requirement establishes as an essential prerequisite to certification that the court be certain the named plaintiffs will protect the interests of the class.

Constitutional Law > ... > Case or Controversy > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN9[] **Justiciability, Standing**

Once a class is properly certified, statutory and U.S. Const. art. III standing requirements must be assessed with reference to the class as a whole, not simply with reference to the individual named plaintiffs. This flexible inquiry acknowledges that in the nontraditional context of class actions, the purpose of the standing requirement -- limiting judicial power to disputes capable of judicial resolution (that is, disputes involving sharply presented issues in a concrete factual setting and self-interested parties vigorously advocating opposing positions) -- may be served even absent a personal stake held by the named plaintiff. The assurance of vigorous advocacy may be provided instead by the collective interest of the class, advanced by the named representative serving as a sort of private attorney general. The focus of the standing inquiry is therefore appropriately directed toward the class rather than its representative.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN10[] **Class Actions, Prerequisites for Class Action**

Plaintiffs seeking class certification must establish the two parts of the adequacy inquiry: first, an absence of potential conflict and second, an assurance of vigorous prosecution.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN11[] **Class Actions, Prerequisites for Class Action**

Where any uncertainty regarding certification of classes concerns the amount rather than the fact of injury, it should not preclude recovery, particularly where the uncertainty stems from delay that the plaintiffs attribute to the defendant's wrongful conduct. It does not come with very good grace for the wrongdoer to insist upon specific and certain proof of the injury which it has itself inflicted.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12[] **Class Actions, Prerequisites for Class Action**

A court may not, at the preliminary stage of a class certification inquiry, weigh conflicting expert evidence or engage in statistical dueling of experts.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Remedies > Injunctions > General Overview

HN13[] Remedies, Damages

Claims for injunctive relief under § 16 of the Clayton Act, 15 U.S.C.S. § 26, do not undermine the indirect purchaser rule but rather fall properly outside its scope. Section 4 of the Clayton Act, 15 U.S.C.S. § 15, prevents indirect purchasers from seeking antitrust damages except in certain limited circumstances. The indirect purchaser rule does not apply to claims brought under § 16 of the Clayton Act, 15 U.S.C.S. § 26, which permits injured parties to seek injunctive relief rather than money damages. The concerns motivating the indirect purchaser rule are simply inapplicable to claims for injunctive relief. The risk of exposure to multiple liability, the difficulty in tracing the allocation of the overcharge among different levels of purchasers, and the general desirability of symmetrical application of the pass-on theory to plaintiffs and defendants are wholly unrelated to the issue whether a party should be entitled to sue for injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Remedies > Injunctions > General Overview

HN14[] Private Actions, Remedies

Antitrust plaintiffs seeking injunctive relief must demonstrate threatened loss or damage by a violation of the antitrust laws. 15 U.S.C.S. § 26. This requirement is satisfied by a showing of significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN15[] Prerequisites for Class Action, Predominance

To establish predominance under Fed. R. Civ. P. 23(b)(3), the end payor plaintiffs must demonstrate that the proposed class is sufficiently cohesive to warrant adjudication by representation. In the First Circuit, this requirement is satisfied where, notwithstanding individualized concerns, a sufficient constellation of common issues binds class members together. After all, Rule 23(b)(3) requires merely that common issues predominate, not that all issues be common to the class.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] Private Actions, State Regulation

Under both federal and state law, the essential elements of a private antitrust action are the same: proof of a violation by the defendant, a demonstration of injury to the plaintiff, and an approximation of the plaintiff's damages.

Where an alleged antitrust violation relates solely to a defendant's conduct, it constitutes a common issue subject to common proof in a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Prerequisites for Class Action, Predominance**

The amount of damages is invariably an individual question and does not defeat class action treatment. Courts are generally willing to find the predominance requirement to be satisfied even if individual damages issues remain.

Contracts Law > Remedies > Equitable Relief > General Overview

HN18[] **Remedies, Equitable Relief**

Unjust enrichment actions rest on the equitable principle that a person who is unjustly enriched at the expense of another is required to make restitution to the other. Consistent with this principle, claims for unjust enrichment share a core of common elements: the plaintiff conferred a benefit upon the defendant, the defendant appreciated or knew of the benefit, and the defendant accepted or retained the benefit under such circumstances as to make non-payment inequitable. Although claims for unjust enrichment often accompany and supplement those for breach of contract, they may also accompany and supplement those for tortious injury. A person who interferes with the legally protected rights of another, acting without justification and in conscious disregard of the other's rights, is liable to the other for any profit realized by such interference.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Statutory Sources

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Purchasers, Indirect Purchasers**

A court's approach to certification of indirect purchaser classes may depend in part on the nature of the jurisdiction's indirect purchaser statute. Several courts have denied class certification after concluding that their states' indirect purchaser statutes require proof of injury to each class member.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN20[] **Purchasers, Direct Purchasers**

The courts of Florida, Maine, Michigan, and Minnesota have interpreted their respective indirect purchaser statutes with a skeptical view of antitrust policies and remedies. The skeptical view values deterrence over compensation, efficiency over equity, and accuracy over approximation. Courts adopting this view question their ability to apportion overcharges between direct and indirect purchasers, finding that the realities of the evidentiary issues, as opposed to theoretical models, are difficult for courts to resolve accurately. The indirect purchaser statutes of Florida, Maine, Michigan, and Minnesota require a somewhat stronger and more precise showing of individual impact.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN21[] **Regulated Practices, Trade Practices & Unfair Competition**

Under California law, a challenge to unilateral conduct does not state a cognizable antitrust claim. However, the scope of the unfair competition statute, *Cal. Bus. & Prof. Code §§ 17200* -17208, is broad. The statutory language referring to any unlawful, unfair or fraudulent practice makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN22[] **Public Enforcement, State Civil Actions**

Although broad and undeveloped by case law, the Kansas Monopolies and Unfair Trade Act, *Kan. Stat. Ann. § 50-132*, by its terms prohibits combinations and conspiracies only.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN23[] **Public Enforcement, State Civil Actions**

See *Kan. Stat. Ann. § 50-132*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Torts > Procedural Matters > Statute of Limitations > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN24[] **Regulated Practices, Trade Practices & Unfair Competition**

Actions brought under the Kansas Consumer Protection Act, *Kan. Stat. Ann. §§ 50-623* to -644, are subject to a three-year statute of limitations.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Governments > Legislation > Statute of Limitations > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN25[] Class Actions, Certification of Classes

A necessity for individualized statute-of-limitations determinations invariably weighs against class certification under *Fed. R. Civ. P. 23(b)(3)*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN26[] Public Enforcement, State Civil Actions

The Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101*, declares the following anticompetitive conduct to be against public policy: all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article. None of these terms appears to include unilateral conduct.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Banking Law > Federal Acts > Federal Trade Commission Act > Unfair Competition & Practices

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN27[] Deceptive & Unfair Trade Practices, Federal Trade Commission Act

Although modeled after the Federal Trade Commission Act, the Tennessee Consumer Protection Act, *Tenn. Code Ann. §§ 47-18-101* to -108, differs in one significant respect: unlike the federal provision, which prohibits both unfair methods of competition and unfair or deceptive acts or practices, the Tennessee statute prohibits only unfair or deceptive acts or practices. The Tennessee Court of Appeals has interpreted this difference to reflect a conscious choice to exclude unfair methods of competition from the scope of the Tennessee Act.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

HN28[] Class Actions, Prerequisites for Class Action

Under New York law, an action to recover a penalty imposed by statute may not be maintained as a class action unless the statute imposing the penalty specifically authorizes class recovery. N.Y. C.P.L.R. 901(b). For purposes of this rule, the treble damages permitted by the New York antitrust statute, N.Y. Gen. Bus. Law §§ 340-347 (the Donnelly Act), are deemed a penalty. Because the Donnelly Act imposes a mandatory penalty but does not specifically authorize class recovery, New York courts have dismissed class actions brought under the act as impermissible.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN29[] Class Actions, Prerequisites for Class Action

On its face, Fed. R. Civ. P. 23 merely establishes the procedures for pursuing a class action in the federal courts. It sets forth the circumstances under which one or more members of a class may sue or be sued as representative parties, but makes no reference to the remedies that representative parties may seek.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN30[] Federal & State Interrelationships, Erie Doctrine

Fed. R. Civ. P. 23, like all federal rules, must be interpreted with sensitivity to important state interests and regulatory policies that may be frustrated by the application of federal procedures.

Governments > Legislation > Statutory Remedies & Rights

HN31[] Legislation, Statutory Remedies & Rights

N.Y. C.P.L.R. 901(b) expresses a state interest in avoiding annihilatory punishment by discouraging multiple recoveries of statutory penalties.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Governments > Legislation > Statutory Remedies & Rights

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN32[] Class Actions, Prerequisites for Class Action

Under N.Y. Gen. Bus. Law § 349(h), private plaintiffs may recover actual damages, a statutory minimum, or up to treble damages if the court finds a willful or knowing violation. Because this section does not specifically authorize class recovery, N.Y. C.P.L.R. 901(b) bars class claims for minimum or treble damages. Class claims for actual damages, in contrast, are not similarly barred. Accordingly, a class action may be maintained to recover actual damages and injunctive relief pursuant to *N.Y. Gen. Bus. Law § 349(h)*. Yet bringing such an action requires named plaintiffs to waive their claims to minimum and treble damages.

Contracts Law > Remedies > Equitable Relief > General Overview

HN33[] **Remedies, Equitable Relief**

Under North Carolina law, to establish a claim for unjust enrichment, a party must have conferred a benefit that was consciously accepted by the defendant. The benefit must be neither officious nor gratuitous, and it must be measurable. In addition to these things, the benefit must be direct.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN34[] **Prerequisites for Class Action, Predominance**

The requirement of superiority, like that of predominance, ensures that resolution by class action will achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results. With its focus on individuals' interests in conducting separate lawsuits, the superiority requirement directly addresses the vindication of the rights of groups of people who individually would be without effective strength to bring their opponents into court at all. This concern is particularly compelling where protection of the public depends upon vigorous private enforcement of state laws but the small size of individual claims renders such enforcement unlikely.

Opinion

[*263] MEMORANDUM

YOUNG, C.J.

I. INTRODUCTION

On November 21, 2003, this Court issued an order allowing the End Payor Plaintiffs' Motion for Class Certification with respect to two exemplar classes certified under *Rule 23(b)(3)*. Order of 11/21/03 [Doc. No. 168]. This memorandum details the analysis that led to that order.

II. BACKGROUND

This case presents a consolidated action against SmithKline Beecham Corporation and GlaxoSmithKline PLC (collectively "Smithkline") for violations of the antitrust laws related to its patent for the chemical compound nabumetone, which it sells commercially as "Relafen." Parties who purchased Relafen from sources other than SmithKline [1] for purposes other than resale (the "end payors" or "end payor plaintiffs") here moved for class certification under *Federal Rule of Civil Procedure 23(b)(2)and (3)*. [Doc. No. 126].

[**9] A. FACTUAL BACKGROUND

[2]

On December 13, 1983, SmithKline received U.S. Patent No. 4,420,639 (the "'639 **[*264]** patent") for the compound nabumetone, a non-steroidal anti-inflammatory drug. SmithKline commenced commercial sales of nabumetone under the brand name Relafen in February 1992. In August and December of 1997, Copley Pharmaceutical, Inc. ("Copley"), Teva Pharmaceutical Industries, Ltd. and Teva Pharmaceuticals USA ("Teva"), and Eon Laboratories, Inc. ("Eon") sought approval from the Food and Drug Adminsitration (the "FDA") to market generic nabumetone products. Upon commencement of SmithKline's lawsuits to enforce the '639 patent, however, the FDA stayed approval of the generic drugs for **[**10]** thirty months. On August 8, and December 24, 1998, respectively, the FDA issued tentative approval to Teva's and Eon's generic nabumetone products, but withheld final approval until the conclusion of the thirty-month stay period. That stay period terminated in May 2000.

SmithKline filed the patent suits in question on October 27, 1997 (against Copley), November 13, 1997 (against Teva), and February 17, 1998 (against Eon). The three suits were consolidated and tried before Judge Lindsay of this District. On August 14, 2001, Judge Lindsay issued a sixty-seven-page opinion, which held, inter alia, that (1) claims 2 and 4 of the '639 patent were invalid as anticipated by prior art; and (2) the '639 patent was unenforceable because of SmithKline's inequitable conduct before the Patent Office. *In re '639 Patent Litig., 154 F. Supp. 2d 157, 194-95 (D. Mass. 2001)* (Lindsay, J.). On August 15, 2002, the Federal Circuit affirmed the District Court's decision

---

[1] Parties who purchased Relafen directly from SmithKline ("direct purchasers") also moved for class certification. The direct purchasers' motion was discussed in *In re Relafen Antitrust Litig., 218 F.R.D. 337 (D. Mass. 2003)*.

[2] Unless otherwise indicated, these facts are drawn from the Court's Memorandum and Order, issued October 1, 2003, that discussed the parties' motions based on the statute of limitations and the doctrine of collateral estoppel. *In re Relafen Antitrust Litig., 286 F. Supp. 2d 56 (D. Mass. 2003)*.

as to the invalidity of the '639 patent, but did not reach the issue of inequitable conduct. *Smithkline Beecham Corp. v. Copley Pharm., Inc., 45 Fed. Appx. 915, 917 (Fed. Cir. 2002)* (unpublished opinion). [3]

[11]** Essentially, the plaintiffs claim that but for SmithKline's wrongful filing of patent lawsuits, consumers could have begun purchasing nabumetone in a competitive market -- comprising both Relafen and its generic alternatives -- as early as September 1998. Because of the pending litigation, however, the generic alternatives did not become available until after the stay period terminated and Smithkline's patent was invalidated. Teva [4] began marketing its generic products in August 2001, with Eon following suit in February 2002.

B. Procedural Background

On February 11, 2003, the end payor plaintiffs filed a consolidated class action complaint against SmithKline. [Doc. No. 68 in Teva Pharm. v. Smithkline Beecham, Civil Action No. 01-12222-WGY]. The lead end payor plaintiffs, on behalf of themselves and other consumers and health benefit providers, asserted claims under federal and state antitrust laws, state unfair competition **[**12]** statutes, and state consumer protection statutes. Compl. P 1. On September 16, 2003, the end payor plaintiffs moved for class certification under *Federal Rule of Civil Procedure 23(b)(2)and (3)*. [Doc. No. 126] After hearing oral argument, the Court tentatively denied the motion under *Rule 23(b)(2)* and allowed the motion under *Rule 23(b)(3)* subject to review of the end payor plaintiffs' proposed order. See 10/23/03 Hr'g Tr. [Doc. No. 156] at 24. The end payor plaintiffs then submitted a proposed order denying the motion under *Rule 23(b)(2)*, and allowing the motion under *23(b)(3)* with respect to the following exemplar class:

> All persons or entities who purchased and/or paid for Relafen(R) (known generically as nabumetone) or generic versions of Relafen(R) in the states of Arizona, California, Florida, Kansas, Maine, Massachusetts, Michigan, Minnesota, New York, North Carolina, Tennessee and Vermont ("the Exemplar States") during the period February 1, 1992 through and including June 30, 2003 (the ["] Class Period") for **[*265]** consumption by themselves, their families, or their members, employees, insureds, participants or beneficiaries **[**13]** (the "Class").

Proposed Order at 1. The end payor plaintiffs' proposed exemplar class excluded governmental entities, SmithKline and its Officers, Subsidiaries, and affiliates; persons or entities who purchased Relafen or its generic equivalents directly from SmithKline or its affiliates; persons or entities who purchased Relafen or its generic equivalents for purposes of resale; persons or entities who continued to purchase Relafen after generic equivalents became available for purchase in August 2001; and persons who, under the terms of their third-party health insurance plans, pay the same fixed price for brand-name and generic prescription drugs. Id. The Court examines the terms of the end payor plaintiffs' proposed order below.

C. Federal Jurisdiction

Having denied certification with respect to the end payor plaintiffs' federal law claims, see Order of 11/21/03, at 2 (holding that these claims were inappropriate for injunctive relief), this Court nevertheless retains supplemental jurisdiction over the remaining state law claims. *28 U.S.C. § 1367(a)*. The advanced stages of other actions forming part of the same controversy, including **[**14]** those brought by a separately certified class of direct purchaser plaintiffs, individual drugstore plaintiffs, and a generic manufacturer, [5] urged the Court to exercise rather than

---

[3] Under the Local Rules for the Federal Circuit, unpublished decisions are not to be cited as precedent, but may be relied upon in asserting "claim preclusion, issue preclusion, judicial estoppel, law of the case, or the like." ***Fed. Cir. R. 47.6(b)***.

[4] Teva acquired Copley (and its generic nabumetone products) in August 1999.

[5] The fact that these actions have now settled, see Order of 2/13/04 [Doc. No. 286]; Order of 2/13/04 [Doc. No. 62 in Eon Labs., Inc. v. Beecham Group PLC, Civil Action No. 03-10506-WGY], present action is now sufficiently advanced to counsel against

decline jurisdiction. Because the Court has chosen to exercise supplemental jurisdiction, it need not address the end payer plaintiffs' assertion of diversity jurisdiction, see 10/23/03 Hr'g Tr. at 9, at length. The Court notes only that the end payor plaintiffs have not established the amount in controversy, with the reference to either the named representatives or the members of the end payor class. See *Spielman v. Genzyme Corp., 251 F.3d 1, 7 n.5 (1st Cir. 2001)* (noting, but not deciding, the question whether the holding in *Zahn v. International Paper Co., 414 U.S. 291, 38 L. Ed. 2d 511, 94 S. Ct. 505 (1973)* -- "that courts may not exercise supplemental jurisdiction over the claims of class action plaintiffs who do not separately meet the jurisdictional minimum" -- remains good law); *Payne v. Goodyear Tire & Rubber Co., 229 F. Supp. 2d 43, 48 (D. Mass. 2002)* (discussing the "opposite results" reached by the courts in this District that have addressed the question). **[**15]**

III. DISCUSSION

A. Legal Standard

HN1[] On a motion for class certification, "[a] district court must conduct a rigorous analysis of the prerequisites established by *Rule 23*." *Smilow v. Southwestern Bell Mobile Sys., Inc., 323 F.3d 32, 38 (1st Cir. 2003)* (citing *General Telephone Co. v. Falcon, 457 U.S. 147, 161, 72 L. Ed. 2d 740, 102 S. Ct. 2364 (1982))*. This analysis should not involve a "preliminary hearing into the merits," *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)*, but rather an inquiry into "whether **[**16]** the requirements of *Rule 23* are met," *id. at 178* (quoting *Miller v. Mackey International, Inc., 452 F.2d 424, 427 (5th Cir. 1971))* (internal quotation marks omitted). The moving party bears the burden of establishing the elements necessary for class certification: the four requirements of *Rule 23(a)* and one of the several requirements of *Rule 23 (b)*. *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 613-14, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)*; *Guckenberger v. Boston Univ., 957 F. Supp. 306, 325 (D. Mass. 1997)* (Saris, J.).

Rule 23 (a) ***HN2***[] imposes four four "threshold requirements" applicable to all class actions:

> (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the **[*266]** representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a); *Amchem, 521 U.S. at 613*. ***HN3***[] In addition to the requirements of *Rule 23(a)*, the **[**17]** moving party must establish the elements of *Rule 23(b)(1), (2), or (3)*. *Amchem, 521 U.S. at 614*. The end payor plaintiffs here sought certification under *Rule 23(b)(2)and (3)*. *Rule 23(b)(2)* permits a class action when "the party opposing the class has acted or refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole." *Fed. R. Civ. P. 23(b)(2)*.

Rule 23(b)(3) permits a class action when common questions "predominate over any question affecting only individual members," and class resolution is "superior to other available methods for the fair and efficient adjudication of the controversy." *Fed. R. Civ. P. 23(b)(3)*. ***HN4***[] Matters "pertinent" to evaluating predominance and superiority include:

> (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability **[**18]** of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

---

declining jurisdiction. See, e.g., Order of 11/21/03 (specifying the form of notice) ; Order of 2/18/04 (directing that notice be provided to the end payor plaintiffs' class).

Fed. R. Civ. P. 23(b)(3). This list of pertinent factors is "nonexhaustive." *Amchem, 521 U.S. at 615-16*.

B. Class Period

Before considering the requirements of *Rule 23*, the Court addreses the period for which class damages may be claimed. The end payor plaintiffs proposed that the class period run from "February 1, 1992 through and including June 30, 2003." Proposed Order at 1. They contended that at least with respect to their unjust enrichment claims, "damages could accrue as early as February 1992, when Defendants entered the market under the banner of a patent procured by fraud." End Payor Pls.' Proposed Order Reply [Doc. No. 155] at 3. SmithKline responded that the "Class Period cannot possibly begin before December 1998," the date on which Teva received tentative FDA approval to market generic nabumetone. Defs.' Proposed Order Opp'n [Doc. No. 152] at 3.

The Court notes that at least as a general matter, entry into the marketplace for branded and generic **[**19]** drugs is governed by the FDA rather than the Patent Office. See Rebecca S. Eisenberg, Lecture, Patents, Product Exclusivity and Information Dissemination, *72 Fordham L. Rev. 477, 488 (2003)* (discussing the relationship between the legal regimes administered by the FDA and the Patent Office regarding biomedical research and product development, and describing the FDA's role as a "market gatekeeper"). Accordingly, any profits that SmithKline earned during its initial period of market exclusivity are more properly attributed to the fact that generic competitors lacked FDA approval than to the fact that SmithKline had obtained the '639 patent. See *21 C.F.R. 314.108* (providing a period of exclusive FDA approval for "new drug products" -- such as Relafen). Eon and Teva obtained tentative FDA approval to market their generic nabumetone products on August 8, and December 24, 1998, respectively. *Relafen, 286 F. Supp. 2d at 60*. The end payor plaintiffs have offered no evidence to suggest that these manufacturers could have received earlier approval in the absence of SmithKline's alleged conduct. [6] For this reason, the Court **[**20]** determined that the class period should run from the date of tentative FDA approval, which in the interest of consistency **[*267]** was set, as it was for the direct purchaser plaintiffs' class action, at September 1, 1998.

C. *Rule 23(a)*

To satisfy *Rule 23(a)*, the end payor plaintiffs must establish **[**21]** numerosity, commonality, typicality, and adequacy. *Amchem, 521 U.S. at 613-14*. ***HN5***[] Numerosity is established if the size of a proposed class, even if inexactly determined, is sufficiently large as to make joinder impracticable, given the relevant circumstances. See *McAdams v. Mass. Mut. Life Ins. Co., 2002 U.S. Dist. LEXIS 9944, No. Civ. A. 99-30284-FHF, 2002 WL 1067449, at *3 (D. Mass. May 15, 2002)* (Freedman, J.); *In re Cardizem CD Antitrust Litig., 200 F.R.D. 326, 334-35 (E.D. Mich. 2001)*. The end payor plaintiffs have established such impracticability here. Pharmaceutical data indicates that more than four million units of Relafen were dispensed between January and October 2000, and more than three million additional units were dispensed between January and December 2001. Cafferty Decl. [Doc. No. 128], Exs. 1-2 (excerpts from 2001 Red Book (Medical Economics Staff ed., 2001) and 2002 Red Book (Medical Economics Staff ed., 2002)); see *Cardizem, 200 F.R.D. at 335* (concluding, under analogous circumstances, that national data recording thirteen million prescriptions for the branded drug provided a sufficient basis for the assumption that **[**22]** "there are thousands of class members in Michigan" such that "joinder would be impracticable").

The end payor plaintiffs have identified a number of common questions, the resolution of which will "affect all or a substantial number of the class members." *Duhaime v. John Hancock Mut. Life. Ins. Co., 177 F.R.D. 54, 63 (D.*

---

[6] In its separate action, Eon asserted that it could have filed its abbreviated new drug application as early as December 24, 1996. Am. Compl. [Doc. No. 74] P 51. Yet in support of this assertion, Eon explained only that SmithKline's "sham Orange Book listing [of the '639 patent]" and "malicious Sham Infringement Action" resulted in thirty-month stay periods (the earliest of which was triggered in September 1997), and a subsequent 180-day "Generic Exclusivity Period" (which was triggered in August 2001). See id. PP 29, 51-54. Neither of these periods account for the fact that the first applications, filed not by Eon, but by Copley and Teva, were not filed until August 1997. See Compl. P 52(a)-(b).

Mass. 1997) (O'Toole, J.) (quoting Jenkins v. Raymark Indus., 782 F.2d 468, 472 (5th Cir. 1986)). The questions common to all class members' claims include whether SmithKline engaged in the alleged conduct and whether SmithKline is shielded from liability for any resulting injuries. See End Payor Pls.' Mem. [Doc. No. 127] at 3 (citing Compl. P 89); Cardizem, 200 F.R.D. at 335 (determining that the plaintiffs had established commonality by identifying as common questions "whether Defendants' conduct caused injury to Plaintiff class members" and, if it did, how to determine appropriate damages). **HN6**[] Because each of the end payor plaintiffs claims injuries resulting from the same alleged conduct, resolving these common questions collectively will "advance the litigation." Cardizem, 200 F.R.D. at 335 **[**23]** (citing Sprague v. General Motors Corp., 133 F.3d 388, 397 (6th Cir. 1998)).

HN7[] The element of typicality requires that the "named plaintiffs' claims arise from the same course of conduct that gave rise to the claims of the absent [class] members." Duhaime, 177 F.R.D. at 63 (alteration in original) (quoting Burstein v. Applied Extrusion Technologies, Inc., 153 F.R.D. 488, 491 (D. Mass. 1994) (Collings, M.J.)) (internal quotation marks omitted). As stated above, the claims of each of the end payor plaintiffs, including those of the proposed representatives for the class, arise from the same course of conduct: SmithKline's alleged efforts to delay generic competition. End Payor Pls.' Mem. at 4. Accordingly, the claims of the named plaintiffs are typical of those asserted by other members of the class.

HN8[] The adequacy requirement establishes as an "essential prerequisite" to certification that this Court be certain the named end payor plaintiffs will protect the interests of the class. 7A Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice and Procedure § 1765. Before addressing the specific inquiries encompassed **[**24]** by the adequacy analysis, the Court turns to SmithKline's more general argument that the named end payor plaintiffs' lack of standing renders them inadequate representatives. Defs.' Opp'n [Doc. No. 130] at 34-35.

SmithKline asserted that the named end payor plaintiffs, Louise Houchins of California, Tyler Fox of Massachusetts, and Emily Feinberg of Massachusetts, having purchased Relafen or its generic alternatives in only some of the specified states, lacked standing to assert the claims of, or to serve as adequate representatives for, class members who made their purchases in the remaining states. See id. The end payor plaintiffs rejected this challenge as improperly **[*268]** conflating the standing requirements of Article III with the class certification standards of Rule 23. End Payor Pls.' Reply [Doc. No. 132] at 33.

In support of its standing challenge, SmithKline cited *In re Terazosin Hydrochloride Antitrust Litig., 160 F. Supp. 2d 1365 (S.D. Fla. 2001)*, an antitrust action involving analogous allegations of delayed generic entry. There, the United States District Court for the Southern District of Florida allowed the defendants' motion to dismiss **[**25]** claims arising under the laws of states in which no named plaintiffs resided or purchased the branded drug. *Id. at 1372*. In doing so, the court explained that under Eleventh Circuit precedent, "a claim cannot be asserted on behalf of a class unless at least one named plaintiff has suffered the injury that gives rise to that claim." Id. (quoting Griffin v. Dugger, 823 F.2d 1476, 1483 (11th Cir. 1987)); accord Prado-Steiman ex rel. Prado v. Bush, 221 F.3d 1266, 1279 (11th Cir. 2000) (characterizing this requirement as "well-settled").

The lower courts in this circuit, however, are bound by no such precedent. Indeed, in Mowbray v. Waste Management Holdings, Inc., 189 F.R.D. 194 (D. Mass. 1999), this Court concluded that a single named plaintiff with a contract claim arising under the law of Illinois could adequately represent class members with similar claims arising under the laws of California, Georgia, Pennsylvania, Maryland, Michigan, New York, Texas, Virginia, and Wisconsin. Mowbray, 189 F.R.D. at 195, 199, 202. The First Circuit subsequently affirmed the certification order but did not specifically **[**26]** discuss the adequacy or standing of the named plaintiff. See Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 299 (1st Cir. 2000).

The approach ofMowbray is consistent with that adopted by several other courts, which have interpreted Supreme Court precedent to direct consideration of class certification issues before those of standing, at least under certain circumstances. See, e.g., Payton v. County of Kane, 308 F.3d 673, 680, 682 (7th Cir. 2002); James v. City of Dallas, 254 F.3d 551, 562 & n.9 (5th Cir. 2001); In re Buspirone Patent & Antitrust Litig., 185 F. Supp. 2d 363, 377 (S.D.N.Y. 2002); Clark v. McDonald's Corp., 213 F.R.D. 198, 204-05 (D.N.J. 2003); In re Pharmaceutical Industry

Average Wholesale Price Litig., 263 F. Supp. 2d 172, 193-94 (D. Mass. 2003) (Saris, J.). These courts note that the Supreme Court's decision in Ortiz v. Fibreboard Corp., 527 U.S. 815, 144 L. Ed. 2d 715, 119 S. Ct. 2295 (1999), created an exception to ordinary jurisdictional principles for circumstances in which class certification is "logically antecedent to Article III concerns" and therefore **[**27]** "should be treated first." Ortiz, 527 U.S. at 831 (quoting Amchem, 521 U.S. at 612) (internal quotation marks omitted). The Supreme Court in Amchem characterized as "logically antecedent" issues that "would not exist but for the [class action] certification." Amchem, 521 U.S. at 612 (alteration in original).

The Fifth and Seventh Circuits have interpreted Ortiz to favor a "nuanced approach" for consideration of standing challenges. Linda S. Mullenix, Standing, Nat'l L.J., June 16, 2003, at 43, col. 1. [7] In Rivera v. Wyeth-Ayerst Laboratories, 283 F.3d 315 (5th Cir. 2002), the Fifth Circuit described the Ortiz exception as applicable where class certification creates the jurisdictional issue. Id. at 319 n.6. Where, however, "the standing question would exist whether [the class representative] filed her claim alone or as part of a class," the court "must decide standing first." Id. at 319 & n.6; accord Payton, 308 F.3d at 680, 682 (7th Cir. 2002) (noting that where "putative representatives were personally injured," Ortiz directs courts to "consider **[**28]** issues of class certification prior to issues of standing").

As between the conflicting approaches of the Eleventh Circuit on the one hand, and the Fifth and Seventh Circuits on the other, this Court adopts the latter, finding it more **[*269]** consistent with the policies of Ortiz, other Supreme Court decisions, and the class action rule. In Payton, the Seventh Circuit explained that Ortiz "rest[s] on the long-standing rule that, ***HN9***[] once a class is properly certified, statutory and Article III standing requirements must be assessed with reference to the class as a whole, not simply with **[**29]** reference to the individual named plaintiffs." Payton, 308 F.3d at 680. Ortiz thus builds upon the reasoning reflected in certain, but not all, of the Supreme Court's prior determinations of standing in class actions. See Jean Wegman Burns, Standing and Mootness in Class Actions: A Search for Consistency, 22 U.C. Davis L. Rev. 1239, 1240 (1989). In Sosna v. Iowa, 419 U.S. 393, 42 L. Ed. 2d 532, 95 S. Ct. 553 (1975), for example, the Supreme Court established that an Article III controversy "may exist … between a named defendant and a member of the class represented by the named plaintiff, even though the claim of the named plaintiff has become moot." Sosna, 419 U.S. at 402; accord United States Parole Comm'n v. Geraghty, 445 U.S. 388, 404, 63 L. Ed. 2d 479, 100 S. Ct. 1202 (1980). But see, e.g., Warth v. Seldin, 422 U.S. 490, 502, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975) ("Petitioners must allege and show that they personally have been injured, not that injury has been suffered by other, unidentified members of the class to which they belong and which they purport to represent."). The flexible inquiry described in Sosna **[**30]** and Geraghty acknowledges that in the "nontraditional" context of class actions, the purpose of the standing requirement -- "limiting judicial power to disputes capable of judicial resolution" (that is, disputes involving "sharply presented issues in a concrete factual setting and self-interested parties vigorously advocating opposing positions") -- may be served even absent a personal stake held by the named plaintiff. Geraghty, 445 U.S. at 396, 403. The assurance of vigorous advocacy may be provided instead by the collective interest of the class, advanced by the named representative serving as a sort of "private attorney general." See id. at 403. The focus of the standing inquiry is therefore appropriately directed toward the class rather than its representative.

This flexible, functional standing inquiry also proves consistent with the policies served by class action procedure. See Burns, supra, at 1287-88 (urging the Supreme Court "to acknowledge that the peculiar class-action beast requires a different, and more flexible, standing-and-mootness analysis"). The more traditional inquiry, which under the Eleventh Circuit's and SmithKline's **[**31]** interpretation, would require class counsel to identify representatives from each state involved in a multi-state class action, would render class actions considerably more cumbersome to initiate, and in turn, less effective in overcoming a lack of incentives to prosecute individual rights and in "achiev[ing] economies of time, effort, and expense." Amchem, 521 U.S. at 615-17 (quoting Fed. R. Civ. P. 23 Advisory Committee's Note); see also Gratz v. Bollinger, 539 U.S. 244, 268 & n.17, 156 L. Ed. 2d 257, 123 S. Ct. 2411

[7] Mullenix contrasts the "nuanced" approach of the Fifth and Seventh Circuits with the "restrictive" rule observed by other courts, which "prevents review of [all] standing challenges prior to the class certification decision." Mullenix, supra. Because this Court finds deferral of SmithKline's standing challenge appropriate even under the approach of the Fifth and Seventh Circuits, it need not address this distinction.

(2003) (observing that the challenged class action, which involved a named representative with an arguably different claim but the "same set of concerns" as the members of the class, "save[d] the resources of both the courts and the parties" (alteration in original) (quoting Califano v. Yamasaki, 442 U.S. 682, 701, 61 L. Ed. 2d 176, 99 S. Ct. 2545 (1979)); Payton, 308 F.3d at 681 (permitting named representatives to represent plaintiffs from other counties in part because "the class action device may be superior to 19, or 102, different cases in each Illinois county challenging the effects **[**32]** of the same state statute").

Here, adopting the approach of the Fifth and Seventh Circuits, the Court defers consideration of SmithKline's standing challenge until after certification of the end payor class. Certification is in this case "logically antecedent" because SmithKline's challenge would not arise but for the proposed certification. Amchem, 521 U.S. at 612. Specifically, SmithKline did not challenge the representatives' standing to assert personal claims under the laws of states in which they resided or purchased medication. See Defs.' Opp'n at 34. Rather, Smithkline challenged only their standing to "represent a class of **[*270]** indirect purchasers of Relafen in the other 16 Indirect Purchaser jurisdictions." Id. Accordingly, the Court applies theOrtiz exception to defer consideration of SmithKline's standing challenge and to address the remaining issues of certification first. See Rivera, 283 F.3d at 319 n.6 (explaining that the Ortiz exception applies only when class certification "creates the jurisdictional issue"); Clark, 213 F.R.D. at 204-05 (deferring consideration of the argument that the plaintiff lacked **[**33]** standing to assert claims on behalf of class members regarding restaurants or states that he had not visited).

Aside from standing, the end payor ***HN10***[] plaintiffs must establish the two parts of the adequacy inquiry: first, an absence of potential conflict and second, an assurance of vigorous prosecution. See Andrews v. Bechtel Power Corp., 780 F.2d 124, 130 (1st Cir. 1985). But see Linda S. Mullenix, Taking Adequacy Seriously: The Inadequate Assessment of Adequacy in Litigation and Settlement Classes 19-23, 26-27 (unpublished manuscript) (advocating what the author concedes is a minority view: that in evaluating the adequacy of class representatives, courts should consider not only potential conflicts of interest, but also other characteristics including familiarity with the action, financial stake, and moral character). With respect to the first element, the Court notes that shortly after the parties submitted their memoranda and argued this motion, the Eleventh Circuit issued an opinion in Valley Drug Co. v. Geneva Pharmaceuticals, Inc., 350 F.3d 1181 (11th Cir. 2003), a class action involving analogous allegations of delayed generic **[**34]** marketing. See id. at 1183-84. There, the Eleventh Circuit interpreted the adequacy requirement to preclude certification where evidence suggested that certain direct purchasers of the branded drug experienced a net economic benefit from the lack of generic competition while other direct purchasers did not. Id. at 1193. The court reasoned that "this economic reality," while not relevant to the direct purchasers' standing to sue, was relevant to defining their "interests and objectives," which in that case were likely "divergent" from those of named representatives who experienced no net benefit. Id. at 1193.

Finding this reasoning persuasive, the Court concluded that the injured named representatives could not adequately represent the interests of class members who had not suffered similar economic injury. [8] The Court accordingly excluded from the end payor plaintiff classes "all persons or entities who suffered no economic harm as a result of SmithKline's alleged conduct." Order of 11/21/03, at 3 & n.l. Such persons and entities include, for example, those who under the terms of their health insurance plans, owe the same co-payment **[**35]** for brand-name or generic drugs, or are reimbursed in full for all drug purchases. See Defs.' Opp'n at 14-15; Cardizem, 200 F.R.D. at 347 (excluding from an analogous class of indirect purchasers alleging delayed generic entry "consumers whose out-of-pocket expenditures do not vary with the cost of their prescription drugs" because they "cannot show that they suffered an economic injury").

[8] The Court notes that Valley Drug identified a conflict between direct purchasers who benefit from generic delay versus those who were injured, a conflict arguably different from -- and more serious than -- that between end payors who were not injured by generic delay versus those who were. Indeed, in contrast to the direct purchasers ofValley Drug, the end payor plaintiffs here might be characterized as uniformly "not benefitted." Yet this superficial uniformity would not imply uniformity of economic interests. With respect to settlement, for example, an uninjured end payor might be willing to accept a far lesser sum than would an injured end payor with an entirely different economic situation.

[36]** The Court is aware of at least one decision, Goda v. Abbott Laboratories, No. 01445-96, 1997 WL 156541 (D.C. Super. Feb. 3, 1997), which reached a different conclusion regarding fixed co-pay and full reimbursement consumers. The Goda court rejected the argument that such consumers could not demonstrate economic injury, explaining that although "the injury is absorbed by the managed care plan or an insurance company," "there is nevertheless an injury." Id. at *9. The court referenced the collateral source rule applied to personal injuries, and reasoned that antitrust injuries should similarly fall upon defendants **[*271]** rather than insured plaintiffs: "It is better here to benefit the injured than the wrongdoer …. Effective enforcement of the antitrust laws is thus promoted." Id. Significantly, however, the Goda court also acknowledged that these insured consumers "deserve special and separate treatment" and divided the class accordingly. Id. The court indicated that the "collateral source problems" raised by the subclass of insured consumers would be "sorted out" at a later administrative stage. Id. at *9-*10.

In contrast to the plaintiffs in **[**37]** Goda, who moved to certify a class of consumers who purchased branded drugs "in the District," id. at *3, the end payor plaintiffs in the present action moved to certify a class of consumers who purchased Relafen or its generic equivalent "throughout the United States and its territories." End Payor Pls.' Mem. at 1. In light of the additional complexity and problems of manageability presented by the proposed multi-state class, see *Amchem, 521 U.S. at 624*, the Court opted to exclude fixed co-pay and full reimbursement consumers from the exemplar classes rather than create subclasses requiring "separate scrutiny." Goda, 1997 WL 156541, at *9. This decision appears consistent with the rationales discussed in Goda. Because these classes, unlike that proposed in Goda, expressly include insurers as "third-party payors," Compl. PP 8-15, the Court was otherwise assured of benefits for the injuredand effective antitrust enforcement. Moreover, as in Valley Drug, the Court's determination regarding certification of the exemplar classes did not affect the potential right of these consumers to recover individually or in a separate class **[**38]** action, see *Valley Drug, 350 F.3d at 1193*; *In re Warfarin Sodium Antitrust Litig., 212 F.R.D. 231, 259 (D. Del. 2002)*, although any recovery may be subject to claims for indemnification by their insurers.

The Court found more persuasive Goda's alternative argument that the insured consumer does in fact suffer injury, simply in the future rather than in the past: "Although copayments and/or premiums may be stabilized for one year, they will surely rise in the next to the detriment of the consumer/beneficiary." Goda, 1997 WL 156541, at *9 n.13. The Court nevertheless concluded that the injuries suffered by this class of insured consumers differed materially -- in time, amount, and certainty -- from those suffered by other members of the end payor plaintiff classes. Cf. *Amchem, 521 U.S. at 626, 628* (discussing the divergence between the goals and awareness of plaintiffs with current versus future asbestos claims); *Ortiz, 527 U.S. at 856-59* (explaining that Amchem requires structural protections against the conflicts arising between plaintiffs with claims arising in the past versus the future, **[**39]** and before versus after the expiration of the defendant's insurance policy). But see *Warfarin, 212 F.R.D. at 259* (permitting fixed co-pay consumers to share in a settlement fund in light of two concerns not present here -- the fact that the settlement would deprive the consumers of their right to seek injunctive relief, and the difficulty of providing, at that late stage, additional notice and an opportunity to opt-out). Consumers who felt "no pinch" from delayed generic entry, Goda, 1997 WL 156541, at *9, were therefore excluded from the end payor plaintiff classes.

In contrast, several other classes of end payors challenged by SmithKline were not excluded. SmithKline asserted that plaintiffs who purchased only branded Relafen -- those who purchased Relafen before generic entry but purchased neither Relafen nor generic nabumetone after generic entry ("pre-generic purchasers"), and those who purchased Relafen both before and after generic entry ("brand loyalists") -- suffered no injury. Defs.' Opp'n at 15-17. With respect to pre-generic purchasers, the end payor plaintiffs emphasized that patients "are bound by the limits of their doctor's prescription. **[**40]** " End Payor Pls.' Reply at 17. Patients with prescriptions for Relafen were, prior to August 2001, limited to Relafen "because no substitute drug substitutes entered the market, the end payor plaintiffs estimated that nearly 90 percent of Relafen sales were lost to generic nabumetone. End Payor Pls.' Reply at 11 (citing Rebuttal Declaration of Raymond S. Hartman ("Hartman Rebuttal Decl.") [Doc. No. 133] P 26). Given the high likelihood of "switching," the Court **[*272]** declined -- at least at this preliminary stage -- to exclude pre-generic purchasers, who were never presented with the opportunity to switch. The Court acknowledges that the amount of damages suffered by pre-generic purchasers is somewhat uncertain, but concludes that SmithKline overstated the uncertainty. [9] See Defs.' Proposed Order Opp'n at 4 ("There is simply no way of knowing whether such persons would have availed themselves of a generic alternative had one been on the market prior to August 2001 ...."). Moreover, the end payor plaintiffs alleged that even consumers who would not have switched, like the brand loyalists discussed below, suffered injury resulting from overcharges on Relafen. ***HN11***[] Any uncertainty accordingly **[**41]** concerns the amount rather than the fact of injury, and therefore should not preclude recovery, particularly where the uncertainty stems from delay that the end payor plaintiffs attribute to SmithKline's wrongful conduct. See *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 567, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)* ("It does not come with very good grace for the wrong doer to insist upon specific and certain proof of the injury which it has itself inflicted." (citation and internal quotation marks omitted)).

In contrast to the purchases by pre-generic purchasers, the purchases of brand loyalists may reflect their "conscious choices." [10] End Payor Pls.' Proposed Order Reply at 155. For these consumers, health insurance plans again become relevant. If the amount that brand loyalists owed varied according to the price of Relafen -- for example, insured brand loyalists who owed percentage **[**42]** of the price, and uninsured brand loyalists who owed the entire price -- the end payor plaintiffs allege economic injury based on the allegedly inflated price of Relafen in the actual world. See End Payor Pls.' Resp. [Doc. No. 144] at 1 (citing Dr. Hartman's observation that "although brand prices still rise at retail, they do no rise as quickly as they had in the actual world, prior to generic launch"); cf. *In re Terazosin Hydrochloride Antitrust Litig., 220 F.R.D. 672, 2004 U.S. Dist. LEXIS 6176, No. 99-MDL-1317, 2004 WL 828997, at *18 (S.D. Fla. Apr. 8, 2004)* (excluding all brand loyalists because the plaintiffs failed to establish that these consumers existed or had suffered an injury). Although SmithKline's expert vigorously contested the allegation of inflated prices, see, e.g., Defs.' Opp'n at 16, ***HN12***[] the Court may not at this preliminary stage "weigh conflicting expert evidence or engage in 'statistical dueling' of experts." *Wal-Mart Stores, Inc. v. Visa USA Inc. (In re Visa Check/MasterMoney Antitrust Litig.), 280 F.3d 124, 135 (2d Cir. 2001)*.

[43]** If, on the other hand, the amount that brand loyalists owed did not vary according to the price of Relafen, but instead varied only with the choice between branded and generic drugs -- for example, insured brand loyalists who owed a fixed copayment for branded drugs and a different fixed copayment for generic drugs -- the end payor plaintiffs can identify no economic injury. For these brand loyalists, there was no difference between the cost associated with Relafen in the actual versus the but-for world. Brand loyalists whose direct costs did not vary according to the price of Relafen were accordingly excluded from the end payor plaintiff **[*273]** classes. [11] **[**44]** The test, as described above, is whether the end payor suffered economic injury as a result of SmithKline's alleged conduct. [12]

---

[9] The Court could imagine, for example, discounting the damages to account for the probability of non-switching.

[10] The Court assumes that consumers who continued to choose Relafen in the actual world would have done so in the but-for world -- that is, even if generic nabumetone had become available in August 1998 rather than August 2001. This assumption is continued purchasing Relafen after generic entry, but only because they were reluctant to switch after starting treatment with the branded drug. Had generic alternatives been available earlier, such consumers might have started with and continued purchasing generic nabumetone rather than Relafen. The Court nevertheless excludes such consumers because identifying them would require the sort of individualized inquiries that would render class certification inappropriate. See *Cardizem, 200 F.R.D. at 343* (distinguishing between switchers, for whom "there is no need for individual analysis of switching behavior," and non-switchers, for whom there is such a need); cf. *Basic, Inc. v. Levinson, 485 U.S. 224, 242, 99 L. Ed. 2d 194, 108 S. Ct. 978 (1988)* (recognizing that requiring proof of an individualized issue such as reliance "effectively would have prevented respondents from proceeding with a class action, since individual issues then would have overwhelmed the common ones").

[11] A similar analysis applies to consumers who purchased only generic nabumetone. See Defs.' Proposed Order Opp'n at 4. Consumers whose costs varied according to the price of generic nabumetone were injured by what the end payor plaintiffs allege were artificially inflated prices. See End Payor Pls.' Mem. at 1. Consumers whose costs did not vary according to the price of generic nabumetone were not injured and were accordingly excluded from the end payor plaintiff classes.

[12] Under this test, patients who were first prescribed Relafen after August 1998 -- the date of generic entry in the but-for world -- were not excluded from the end payor plaintiff classes. That these patients might not have been prescribed Relafen in the but-for world, see Defs.' Opp'n at 19 (asserting a probable decline in prescriptions because SmithKline would have ceased its promotion

With the class limited as described above, the Court determined that no potential conflicts existed. With respect to the second element of the adequacy inquiry, the Court notes the considerable class action experience of the firms appointed co-lead counsel: Milberg Weiss Bershad Hynes & Lerach LLP; Spector, Roseman & Kodroff, P.C.; Miller Faucher and Cafferty LLP; and Heins Mills & Olson, P.L.C. At least one of these firms has represented classes of end payors in actions involving analogous claims of delayed generic entry. See e.g., *Warfarin, 212 F.R.D. at 235* **[**45]** (listing Miller Faucher and Cafferty LLP among plaintiffs' counsel); *Cardizem, 200 F.R.D. at 330* (same). Moreover, class counsel advocated vigorously in favor of its motion for certification. For these reasons, the Court concluded that the named representatives and their counsel would adequately protect the interests of the class. With the elements of *Rule 23(a)* thus established, the Court proceeds to consider the elements of *Rule 23(b)(2)and (b)(3)*.

D. *Rule 23(b)(2)*

Rule 23(b)(2) permits a class action when the Court may fashion "appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole." *Fed. R. Civ. P. 23(b)(2)*. The plaintiffs asserted that SmithKline's " continuing unlawful acts of monopolization … thereaten continuing harm to all Class members," entitling them not only to damages, but also to an injunction preventing SmithKline from acquiring and maintaining a future monopoly. End Payor Pls.' Mem. at 6. SmithKline contended that this "ill-defined prayer," -- merely a "thinly veiled attempt to make an end run around *Illinois Brick Co. [v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)]* **[**46]** " -- was an inappropriate basis for certification "because the redress plaintiffs seek is predominantly monetary." Defs.' Opp'n at 36-37.

As an initial matter, the lower courts that have addressed the issue have held that ***HN13***[] claims for injunctive relief under Section 16 of the Clayton Act, *15 U.S.C. § 26*, do not undermine Illinois Brick, but rather fall properly outside its scope. See e.g., *Mid-West Paper Prods. Co. v. Continental Group, 596 F.2d 573, 589-94 (3d Cir. 1979)*; accord *Lucas Automotive Eng'g, Inc. v. Bridgestone/Firestone, Inc., 140 F.3d 1228, 1234 (9th Cir. 1998)*; *Campos v. Ticketmaster Corp., 140 F.3d 1166, 1172 (8th Cir. 1998)*; *In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1167 (5th Cir. 1979)*. In Illinois Brick, the Supreme Court considered an antitrust action brought by governmental entities that had purchased concrete blocks indirectly from the manufacturer defendants. *Illinois Brick, 431 U.S. at 726* (explaining that the concrete blocks passed from the manufacturer to masonry contractors to general contractors before reaching the governmental entities). **[**47]** In rejecting the action for lack of standing, the Supreme Court interpreted Section 4 of the Clayton Act, *15 U.S.C. § 15*, to prevent indirect purchasers from seeking antitrust damages except in certain limited circumstances. See id., *431 U.S. at 728-29*. The Third Circuit subsequently concluded that the "indirect purchaser rule" of Illinois Brick does not apply to claims brought under *Section 16 of the Clayton Act*, which permits injured **[*274]** parties to seek injunctive relief rather than money damages. See *Mid-West Paper, 596 F.2d at 594*. The Third Circuit reasoned that the concerns motivating the indirect purchaser rule were simply inapplicable to claims for injunctive relief:

> Obviously, the risk of exposure to multiple liability, the difficulty in tracing the allocation of the overcharge among different levels of purchasers, and the general desirability of symmetrical application of the pass-on theory to plaintiffs and defendants are wholly unrelated to the issue whether a party should be entitled to sue for injunctive relief. Nor does the position taken in Illinois Brick, that effective enforcement of the antitrust **[**48]** laws requires that only direct purchasers be permitted to sue for treble damages, have validity in the context of *[§] 16* …. With respect to injunctive relief, … the entitlement of one group to sue does not diminish the incentive of another group to sue.

Id. at 592. [13] If applied here, the Third Circuit's reasoning would permit the end payor plaintiffs to assert their claim for injunctive relief notwithstanding their status as indirect purchasers. See *Relafen, 218 F.R.D. at 344* (explaining that branded drugs typically pass from manufacturers to pharmaceutical wholesalers and then to end payors).

---

of Relafen upon generic entry), does not change the fact that they were prescribed Relafen in the actual world and therefore suffered economic injury.

[49]** Yet even assuming their standing, the end payor ***HN14***[] plaintiffs must also demonstrate "threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. The Supreme Court has held that this requirement is satisfied by a showing of "significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*. Here, however, the end payor plaintiffs alleged a violation of the antitrust laws based on SmithKline's "obtaining, and continually listing with the Food and Drug Administration, a fraudulent and unenforceable patent," bringing "objectively baseless patent infringement suits," and "blocking generic nabumetone tablets from the market." End Payor Pls.' Mem. at 1. Each of these activities has terminated. Specifically, SmithKline's patent has been declared invalid, its infringement suits have been terminated with judgment for the defendants, and generic nabumetone tablets have entered the market. See *SmithKline Beecham, 45 Fed. Appx. at 917*; End Payor Pls.' Mem. **[**50]** at 1. Under these circumstances, it is difficult to imagine how Smithkline's violation might recur. See also Greenhalgh Decl. P 13 (discussing additional competition from a new type of branded anti-inflammatory drug). Nor have the end payor plaintiffs asserted other violations that might "fairly be anticipated from the defendant's conduct." *Zenith Radio, 395 U.S. at 132* (quoting *NLRB v. Express Publishing Co., 312 U.S. 426, 435, 85 L. Ed. 930, 61 S. Ct. 693 (1941))* (internal quotation marks omitted). For this reason, the Court found injunctive relief inappropriate. See *id. at 133* (explaining that while a district court may restrain related unlawful acts, it "may not enjoin all future illegal conduct of the defendant, or even all future violations of the antitrust laws"). The end payor plaintiff's motion for class certification was accordingly DENIED with respect to *Rule 23(b)(2)*.

E. *Rule 23(b)(3)*

Certification under *Rule 23(b)(3)* requires that common questions "predominate" over individual questions, such that class treatment is "superior" to other methods of resolution. *Fed. R. Civ. P. 23(b)(3)*; see also **[**51]** *Tardiff v. Knox County, 365 F.3d 1, 2004 WL 758407, at *3 (1st Cir. 2004)* (describing *subsection (b)(3)* as "the cute tiger cub that has grown into something unexpectedly fearsome in civil rights and mass tort litigation"). The Court begins its discussion with predominance, the requirement SmithKline most vigorously contests.

1. Predominance

HN15[] To establish predominance under *Rule 23(b)(3)*, the end payor plaintiffs must demonstrate **[*275]** that the proposed class is "sufficiently cohesive to warrant adjudication by representation." *Amchem, 521 U.S. at 623*. The First Circuit has held that this requirement is satisfied where, notwithstanding individualized concerns, "a sufficient constellation of common issues binds class members together." *Waste Mgmt., 208 F.3d at 299*; accord *Smilow, 323 F.3d at 39 (1st Cir. 2003)* ("After all, *Rule 23(b)(3)* requires merely that common issues predominate, not that all issues be common to the class."). The end payor plaintiffs asserted that their unjust enrichment and antitrust claims focused primarily on common issues, specifically SmithKline's conduct, SmithKline's **[**52]** profits, and the classes' aggregate damages. End Payor Pls.' Mem. at 7-16. Accordingly, the end payors contended, these common issues predominated. Id. SmithKline challenged this contention as too simplistic, citing "overwhelming" individualized and complex questions regarding impact and governing state law. Defs.' Opp'n at 13-33.

a. Impact

As an initial matter, the Court emphasizes that the end payor plaintiffs' claims for damages and restitution arise solely under state law. Compl. PP 3-4. In contrast to federal ***antitrust law***, see *Illinois Brick, 431 U.S. at 728-29*, certain state antitrust and consumer protection laws permit indirect purchasers to assert claims for damages. Each of the twelve states listed in the end payor plaintiffs' proposed order authorizes such suits, under statutes either

---

[13] In a more recent decision, the Supreme Court explained, consistent with the Third Circuit's view, that the indirect purchaser rule is applied to claims for money damages to "eliminate the complications of apportioning overcharges," "eliminate multiple recoveries," and "promote the vigorous enforcement of the antitrust laws." *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 208, 212, 214, 111 L. Ed. 2d 169, 110 S. Ct. 2807 (1990)*.

passed explicitly to repeal Illinois Brick, or interpreted to depart from it. See Notice of Proposed Order [Doc. No. 150], Schedule B; Kevin J. O'Connor, Is the Illinois Brick Wall Crumbling?, 15 Antitrust 34, at 34-35 & nn. 3-4 (Summer 2001) (listing the thiry-six states that "provide for some sort of right of action on behalf of **[**53]** some or all indirect purchasers."). The Supreme Court has recognized this type of state statute as independent of, and not preempted by, federal ***antitrust law***. See *California v. ARC America Corp., 490 U.S. 93, 101-02, 104 L. Ed. 2d 86, 109 S. Ct. 1661 (1989)*. The Supreme Court has stated further that "no clear purpose of Congress" indicates that the states are barred from imposing antitrust liability "over and above that authorized by federal law." *Id. at 105*. There may, however, be state policies against such double recovery. See, e.g., *Bunker's Glass Co. v. Pilkington PLC, 206 Ariz. 9, 206 Ariz. 9, 75 P.3d 99, 108 (2003)*.

HN16[] Under both federal and state law, the essential elements of a private antitrust action are the same: proof of a violation by the defendant, a demonstration of injury to the plaintiff, and an approximation of the plaintiff's damages. See, e.g., *Bell Atlantic Corp. v. AT & T Corp., 339 F.3d 294, 302 (5th Cir. 2003)* (discussing the elements necessary to demonstrate civil liability under federal law); *Bunker's Glass, 206 Ariz. 9, 75 P.3d at 102* (affirming the substantive parallels between federal law and Arizona **[**54]** law). Here, as in many antitrust class actions, the nature of the first and third elements was not in serious dispute. The alleged antitrust violation relates solely to SmithKline's conduct, and as such, constitutes a common issue subject to common proof. See *Bell Atlantic, 339 F.3d at 302* ("Proof of these elements [of an antitrust violation] will necessarily be identical for the members of both proposed classes …."); *Advocate Health Care v. Mylan Labs., Inc. (In re Lorazepam & Clorazepate Antitrust Litig.), 202 F.R.D. 12, 29 (D.D.C. 2001)* ("As is true in many antitrust cases, the alleged violations of the antitrust laws at issue here respecting price fixing and monopolization relate 'solely to Defendants' conduct, and as such proof for these issues will not vary among class members.'" (quoting *In re Potash Antitrust Litig., 159 F.R.D. 682, 694 (D. Minn. 1995)))*. In contrast, the amount of class members' damages depends in part upon the amount of Relafen or generic nabumetone purchased, and as such, is an individualized issue requiring individualized proof. *Blackie v. Barrack, 524 F.2d 891, 905 (9th Cir. 1975)* ***HN17***[] ("The amount of damages is invariably an individual **[**55]** question and does not defeat class action treatment."); *Smilow, 323 F.3d at 40* (citing Blackie as an example of courts' general willingness to "find the predominance requirement to be satisfied even if individual damages issues remain").

In relation to the first and third element discussed above, the second element of the **[*276]** end payor plaintiffs' action -- a demonstration of injury -- requires closer scrutiny. On the one hand, each class member has, by definition, both "purchased and/or paid for Relafen(R) (known generically as nabumetone) or generic versions of Relafen(R)," and suffered resulting economic harm. Proposed Order at 1. The end payor plaintiffs alleged that overcharges on Relafen and nabumetone can be demonstrated through "generalized evidence," including a government study of the pharmaceutical industry, SmithKline's statements regarding competition between branded and generic drugs, empirical data regarding the prices of Relafen and generic nabumetone, and expert testimony interpreting the industry and market data. See End Payor Pls.' Reply at 7-12. Except as it applies to those consumers excluded above, who experienced no economic harm from SmithKline's **[**56]** alleged conduct, see Defs.' Opp'n at 14-17, the end payor plaintiffs' assertion of common injury appears persuasive. Several courts have found or presumed class-wide injury cognizable under federal law under analogous circumstances. See, e.g., *Visa Check/MasterMoney, 280 F.3d at 137-38* (affirming the district court's determination that injury could be proven on a class-wide basis where "every single class member[] overpa[id] for off-line debit cards"); *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 455 (3d Cir. 1977)* ("If, in this case, a nationwide conspiracy is proven, … an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price.").

Yet even assuming that these decisions interpreting federal ***antitrust law*** would be otherwise persuasive, but see, e.g., 7B Wright, Miller & Kane, supra, § 1781 (cautioning that "although many courts have certified antitrust suits under *Rule 23(b)(3)*, certification is not always appropriate"), the Court must examine the end payor plaintiffs' claims under governing state law. As emphasized **[**57]** above, state law defines the elements of the end payor plaintiffs' claims and in turn, proves relevant to determining the demonstration of common injury necessary for certification. See William H. Page, The Limits of Indirect Purchaser Suits: Class Certification in the Shadow of Illinois Brick, 67 Antitrust L.J. 1, 27 (1999); cf. *Windham v. American Brands, Inc., 565 F.2d 59, 66 (4th Cir. 1977)* (rejecting class-wide proof of damages as inconsistent with the terms of the Clayton Act). The Court accordingly turns to SmithKline's second and related objection: that "significant variations" in state law predominate here. Defs.' Opp'n at 25; see also *Castano v. American Tobacco Co., 84 F.3d 734, 740 (5th Cir. 1996)* (concluding that the district court erred by failing to consider how variations in state law affected predominance and superiority).

b. Governing State Law

The Court begins by acknowledging that federal appellate courts have viewed class actions governed by the law of multiple states with serious skepticism. See, e.g., *In re Bridgestone/Firestone, Inc., 288 F.3d 1012, 1015 (7th Cir. 2002)* (collecting **[**58]** cases in which the Seventh Circuit has held that certification of a nationwide class was inappropriate due to variations in states' laws governing warranties, fraud, and products liability); *In re American Med. Sys., 75 F.3d 1069, 1085 (6th Cir. 1996)* (characterizing the task of instructing a jury as "impossible" where state laws differ). The end payor plaintiffs offered two responses, however.

First, they contended that "because SKB is based in Pennsylvania, the Court could also apply Pennsylvania law to the entire Class." End Payor Pls.' Mem. at 8 n.9. Because state antitrust, consumer protection, and unjust enrichment laws vary on such issues as prohibited practices and limitations periods, see, Section III.E.1.b.ii-iv, infra, this Court must determine if Pennsylvania has a "significant contact or significant aggregation of contacts" to this litigation that would justify the application of its law over the various laws of other states. *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985)*. *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 818, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985)* (quoting *Allstate Ins. Co. v. Hague, 449 U.S. 302, 312-13, 66 L. Ed. 2d 521, 101 S. Ct. 633 (1981)* **[**59]** (plurality opinion)). Clearly, Pennsylvania has a substantial **[*277]** connection to SmithKline and some, though not all, of its alleged conduct. See End Payor Pls.' Mem. at 1 (discussing, in addition to internal strategizing, which presumably took place in Pennsylvania, SmithKline's prosecution, listing, and enforcement of the '639 patent, which took place in Washington, D.C. and Massachusetts); see also *ATX ATX II & Wilderness Tires Prods. Liab. Litig. v. Bridgestone/Firestone Inc. (In re Bridgestone/Firestone Inc.), 205 F.R.D. 503, 513 (S.D. Ind. 2001)* (applying the laws of the defendants' principal places of business, in which substantial conduct relevant to the plaintiffs' products liability and breach of warranty claims took place), rev'd sub nom. *In re Bridgestone/Firestone, Inc., 288 F.3d 1012*. Yet the primary aim of antitrust and consumer protection laws generally -- and those of indirect purchaser states particularly -- is compensating consumers, not policing corporate conduct. See, e.g., *Bunker's Glass, 206 Ariz. 9, 75 P.3d at 110* (choosing to "afford greater protection to Arizona citizens [than federal law does]" by recognizing indirect purchaser standing under the state's **[**60]** antitrust statute); *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 66-67, 762 N.E.2d 303 (2002)* ("We read the language of *G.L. c. 93A* as a clear statement of legislative policy to protect Massachusetts consumers through the authorization of such indirect purchaser actions."); *Restatement (Second) of Conflict of Laws § 6(2)* (1971) (listing "the basic polices underlying the particular field of law" among the factors relevant to a choice of law). Accordingly, the Court considers the more significant contact in this context to be the location of the injury -- that is, the location of the sales to the end payor plaintiffs.

By definition, the sales at issue in this litigation did not involve SmithKline or its Pennsylvania location. See Proposed Order at 1 (excluding from the proposed class persons or entities who purchased Relafen or its generic equivalents directly from SmithKline). Rather, many -- if not most -- of the relevant sales took place wholly outside Pennsylvania, between out-of-state direct purchasers, see *Valley Drug, 350 F.3d at 1191 & n.18* (identifying the three existing national wholesalers, two of which **[**61]** are headquartered outside Pennsylvania, and noting that the national wholesalers' purchases constituted more than fifty percent of the plaintiff class's claims), and out-of-state end payors. Applying Pennsylvania law to these wholly out-of-state transactions would be at best a "novelty," and at worst a violation of constitutional limitations. *Bridgestone/Firestone, 288 F.3d at 1016*; *Shutts 472 U.S. at 822*; *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 613 (7th Cir. 1997)* (stating that under federal constitutional limits, "[a] state cannot regulate sales that take place wholly outside it.").

In the alternative, the end payor plaintiffs argue that "even if the law of multiple states must be applied," the laws governing the classes' antitrust, consumer protection, and unjust enrichment claims reveal 'no significant conflict.'" End Payor Pls.' Mem. at 17. As an initial matter, the Court must determine whether the "law of multiple states" must in fact be applied. Both Massachusetts and Pennsylvania [14] have adopted a flexible or "functional choice of law approach," under which courts consider "the interests of the **[**62]** parties, the States involved, and the interstate system as a whole." *Bushkin Assoc., Inc. v. Raytheon Co., 393 Mass. 622, 631, 473 N.E.2d 662 (1985)*; see *Griffith v. United Air Lines, Inc., 416 Pa. 1, 21-23, 203 A.2d 796 (1964)* (permitting "analysis of the policies and interests underlying the particular issue before the court"). As stated above, "the basic policies underlying the particular field of law," *Restatement, supra, § 6(2)(e)*; see *Griffith, 416 Pa. at 24* (considering the policies that "apparently underlie" the conflicting statute), are those of consumer protection, suggesting that any balancing of the parties' contacts or expectations, see *Restatement, supra, § 6(2)(d)*, should be weighted toward those of **[*278]** consumers. The location of consumers' purchases thus assumes special significance. Appropriate consideration must also be given to the "relative interests of … states." *Restatement, supra, § 6(2)*; see *Griffith, 416 Pa. at 24* (comparing the interests of the place of injury and the domicile of the defendant). States have a strong interest in protecting consumers with respect to sales within their borders, **[**63]** see, e.g., *Bunker's Glass, 206 Ariz. 9, 75 P.3d at 109* (discussing the protection from anti-competitive practices guaranteed to Arizona citizens by the state constitution), but they have a relatively weak interest, if any, in applying their policies to consumers or sales in neighboring states, see *BMW of North America, Inc. v. Gore, 517 U.S. 559, 571, 134 L. Ed. 2d 809, 116 S. Ct. 1589 (1996)* ("It is clear that no single State could … impose its own policy choice on neighboring States."). For these reasons, the Court concluded that Massachusetts and Pennsylvania choice of law rules would select the various states in which consumers' purchases were made, rather than Pennsylvania law.

[64]** This fact alone, however, does not necessarily defeat certification. Indeed, this Court has previously certified a class of plaintiffs whose claims were governed by the laws of several states. *Mowbray, 189 F.R.D. at 202*. In doing so, the Court rejected the defendant's argument that differences in the states' statutes of limitations would predominate over common issues. *Id. at 200*. On appeal, the First Circuit affirmed, stating that the individualized limitations determinations were relevant but not necessarily fatal to certification. *Waste Mgmt., 208 F.3d at 296* (noting that the Court "acknowledged the lack of uniformity, and explained why the limitations problems nonetheless appeared to be inconsequential"). As it did in Mowbray, the Court proceeds to consider whether variations in state law are sufficiently significant to negate predominance. *Mowbray, 189 F.R.D. at 199-201*. In light of its previous statements to counsel and the subsequent proposed order, see 10/23/03 Hr'g Tr. at 30, the Court limits its consideration to the twelve states suggested as "Exemplar States": Arizona, California, Florida, **[**65]** Kansas, Maine, Massachusetts, Michigan, Minnesota, New York, North Carolina, Tennessee, and Vermont. Proposed Order at 1.

A. Standing

As stated above, each of the exemplar states permits indirect purchaser actions under its antitrust, consumer protection, or unfair trade practices statutes. [15] **[**68]** See *Bunker's Glass, 206 Ariz. 9, 75 P.3d 99, 102*; *Cal. Bus. & Prof. Code § 17203*; *Mack v. Bristol-Myers Squibb Co., 673 So. 2d 100, 103 (Fla. Dist. Ct. App. 1996)*; *Kan. Stat. Ann. §§ 50-624(j), 50-626(a)*; [16] *Me. Rev. Stat. Ann. tit. 10, § 1104(1)*; *Ciardi, 436 Mass. at 58-59*; *Mich. Comp.*

[14] One of the cases consolidated in this action was transferred from the Eastern District of Pennsylvania, see Twin Cities Bakery Workers Health & Welfare Fund v. SmithKline Beecham Corp., No. 02-CV-985 (E.D. Pa. filed 2002), and therefore requires application of Pennsylvania's choice of law rules. see van *Dusen v. Barrack, 376 U.S. 612, 639, 11 L. Ed. 2d 945, 84 S. Ct. 805 (1964)*.

[15] The fact that the exemplar states have recognized indirect purchaser actions brings the present claims out from under "the long shadow of Illinois Brick." ***Terazosin, 160 F. Supp. 2d at 1372***. Unlike states that have adopted the Illinois Brick prohibition, the exemplar states have not expressed a policy against indirect purchaser actions that might otherwise be undermined by the end payor plaintiffs' present claims.

[16] See ***Cole v. Hewlett Packard Co., 84 P.3d 1047, 2004 WL 376471, at *6 (Kan. App. 2004)*** (unpublished table decision) ("Based on the plain wording of *K.S.A. 2003 Supp. 50-624(j)*, Cole, the consumer, did not need to deal directly with HP, the

Laws Ann. § 445.778(2); Minn. Stat. Ann. § 325D.57; N.Y. Gen. Bus. Law § 349(h); Hyde v. Abbott Labs., Inc., 123 N.C. App. 572, 584, 473 S.E.2d 680 (1996); Blake v. Abbott Lab., 1996 Tenn. App. LEXIS 184, C.A. No. 03A01-9509-CV-00307, 1996 WL 134947, at *4 (Tenn. Ct. App. Mar. 27, 1996); Vt. Stat. Ann. tit. 9, § 2465(b). With respect to substantive matters -- as opposed **[**66]** to procedural concerns such as standing -- these state statutes uniformly parallel their federal counterparts, the Sherman Act and the Federal Trade Commission Act. See Bunker's Glass, 206 Ariz. 9, 75 P. 3d at 106; Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 185, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999); Mack, 673 So. 2d at 104 (Florida); Tri-State Rubbish, Inc. v. Waste Mgmt., Inc., 998 F.2d 1073, 1081 (1st Cir. 1993) (Maine) (noting the manner in which "the Maine antitrust **[*279]** statutes parallel the Sherman Act"); Mass. Gen. Laws ch. 93A, § 2(b); Mich. Comp. Laws Ann. § 445.778 Mich cmt.; Minnesota Twins Partnership v. State ex rel. Hatch, 592 N.W. 2d 847, 851 (Minn. 1999); R. Givens, Practice Commentaries, N.Y. Gen. Bus. Law § 349 (McKinney's 1996); Hyde, 123 N.C. App. at 584; Tenn. code Ann. § 47-18-115; Vt. Stat. Ann. tit. 9 § 2453(b). As SmithKline notes, the remedies available under the state statutes differ, Defs.' Opp'n at 27-30, but "the individuation of damages in consumer **[**67]** class actions is rarely determinative under Rule 23(b)(3)." Smilow, 323 F.3d at 40. Nor do the individual damages issues appear "especially complex or burdensome," at least not with respect to the five exemplar states listed in the Court's certification order. Order of 11/21/03; see Ariz. Rev. Stat. § 44-1408(B), Mass. Gen. Laws ch. 93A, § 11, Vt. Stat. Ann. tit. 9, § 2465 (permitting the recovery of up to treble damages, plus fees and costs, if available, as determined by the court); Cal. Bus. & Prof. Code § 17203, Browder v. Hite, 602 S.W.2d 489, 492 (Tenn. App. 1980) (establishing restitution as the appropriate remedy for unfair competition under California law and unjust enrichment under Tennessee law).

In addition to these statutory causes of action, each of the exemplar states recognizes a cause of action for unjust enrichment. Murdock-Bryant Constr., Inc. v. Pearson, 146 Ariz. 48, 52, 703 P.2d 1197 (1985); First Nationwide Sav. v. Perry, 11 Cal. App. 4th 1657, 1662, 15 Cal. Rptr. 2d 173 (1992); Hillman Constr. Corp. v. Wainer, 636 So. 2d 576, 577 (Fla. Dist. Ct. App. 1994); A.F.A.B., Inc. v. Town of Old Orchard Beach, 610 A.2d 747, 749 (Me. 1992); Keller v. O'Brien, 425 Mass. 774, 778, 683 N.E.2d 1026 (1997); Kammer Asphalt Paving Co. v. East China Township Sch., 443 Mich. 176, 185, 504 N.W.2d 635 (1993); **[**69]** Youngstown Mines Corp. v. Prout, 266 Minn. 450, 475-76, 124 N.W.2d 328 (1963); Parsa v. State, 64 N.Y.2d 143, 148, 474 N.E.2d 235, 485 N.Y.S.2d 27 (1984); Booe v. Shadrick, 322 N.C. 567, 570, 369 S.E.2d 554 (1988); Paschall's, Inc. v. Dozier, 219 Tenn. 45, 54, 407 S.W.2d 150 (Tenn. 1966); Legault v. Legault, 142 Vt. 525, 531, 459 A.2d 980 (1983). ***HN18***[] Such actions rest on the equitable principle that "[a] person who is unjustly enriched at the expense of another is required to make restitution to the other." *Restatement (Third) of Restitution and Unjust Enrichment § 1*. Consistent with this principle, claims for unjust enrichment share a core of common elements: [17] the plaintiff conferred a benefit upon the defendant, the defendant appreciated or knew of the benefit, and the defendant accepted or retained the benefit under such circumstances as to make non-payment inequitable. See City of Sierra Vista v. Cochise Enters., Inc., 144 Ariz. 375, 381, 697 P.2d 1125 (Ariz. Ct. App. 1984); Lectrodryer v. SeoulBank, 77 Cal. App. 4th 723, 726, 91 Cal. Rptr. 2d 881 (2000); Hillman Constr., 636 So. 2d at 577 (Florida); J.W. Thompson Co. v. Welles Prods. Corp., 243 Kan. 503, 512, 758 P.2d 738 (1988); **[**70]** A.F.A.B., 610 A.2d at 749 (Maine) (quoting Estate of White, 521 A.2d 1180, 1183 (Me. 1987)); Keller, 425 Mass. at 778; B & M Die Co. v. Ford Motor Co., 167 Mich. App. 176, 181, 421 N.W.2d 620 (1988); First Nat'l Bank of St. Paul v. Ramier, 311 N.W.2d 502, 504 (Minn. 1981); Lake Minnewaska Mountain Houses Inc. v. Rekis, *259 A.D.2d 797, 798, 686 N.Y.S.2d 186 (N.Y. App. Div. 1999)*; Booe, 322 N.C. at 570; Browder, 602 S.W.2d at 492; Morrisville Lumber Co. v. Okcuoglu, 148 Vt. 180, 184, 531 A.2d 887

---

supplier, for the sale of the 882C printer in order for her and HP to be involved in a consumer transaction. As a result, this transaction falls within the KCPA [Kansas Consumer Protection Act].").

[17] To be sure, there are variations in states' definitions of unjust enrichment. As examples, SmithKline cites differences in the conduct required and the availability of equitable defenses. See Defs.' Opp'n at 31-32. Yet with the exception of the variation discussed below, see Section III.E.1.b.v, infra, such differences prove largely irrelevant. As the end payor plaintiffs note, the conflict between states that require illegal conduct and those that do not is "immaterial … because Plaintiffs here do allege unlawful conduct." End Payor Pls.' Reply at 32. Similarly, although states may "vary significantly in the requirements necessary to establish the defense [of unclean hands]," Lilly v. Ford Motor Co., 2002 U.S. Dist. LEXIS 5698, No. 00 C 7372, 2002 WL 507126, at *2 (N.D. Ill. Apr. 3, 2002) (citation omitted), there is no suggestion here that SmithKline could establish any set of relevant requirements.

(1987). Although claims for unjust enrichment often accompany and supplement those for breach of contract, they may also -- as here -- accompany and supplement those for tortious injury. **[*280]** See *Restatement (Third) of Restitution § 3* ("A person who interferes with the legally protected rights of another, acting without justification and in conscious disregard of the other's rights, is liable to the other for any profit realized by such interference.").

[71]** Notwithstanding these commonalities, the laws of certain exemplar states incorporate variations that counsel against certification. These variations are the subject of the discussion below. As a general matter, the Court considered statutory and common law claims asserted under the laws of the same state as a pair. Accordingly, if variations between state laws required excluding statutory claims raised under the laws of State *A,* equitable claims raised under the laws of State *A* were also excluded. The Court concluded that a contrary approach would be inconsistent with the requirements of adequacy and superiority. To the extent that a judgment in this action would be claim preclusive, including State *A* equitable claims would effectively waive State *A* statutory claims, raising adequacy concerns for end payors who might prefer to litigate their statutory claims individually or as part of a State *A* class. See *Clement v. American Honda Fin. Corp., 176 F.R.D. 15, 23-24 (D. Conn. 1997)* (denying certification where as a condition of class treatment, members were forced to forego their claims for unfair trade practices and minimum statutory damages); **[**72]** see also David A. Dana, "Adequacy of Representation" in Time 3 (Apr. 2004) (unpublished manuscript) (urging courts to evaluate adequacy in class action settlements by examining the relief that a class member receives "in return for ceding her legal claims"). To the extent that a judgment in this action would not be claim preclusive, including State *A* equitable claims would leave open the possibility of individually litigating State *A* statutory claims, suggesting that individual actions, or more likely, a class action limited to State *A* end payors, would provide more complete and efficient resolution.

B. Individual Injury

As stated above, the second element of the end payor plaintiffs' antitrust claims -- demonstration of injury -- warrants special scrutiny. State courts have differed significantly in their consideration of this element, prompting one commentator to observe: "The most important determinant of class certification of indirect purchaser suits appears to be where the suit is filed." Page, supra, at 21; compare, e.g., Bellinder v. Microsoft Corp., Nos. 00-C-0855, 00-C-00092, 99CV17089, 2001 WL 1397995 (Kan. Dist. Ct. Sept. 7, 2001), **[**73]** with *A & M Supply Co. v. Microsoft Corp., 252 Mich. App. 580, 654 N.W.2d 572 (Mich. App. 2002)* (granting and denying, respectively, certification of virtually identical classes of indirect purchasers based on virtually identical evidence including affidavits submitted by the same opposing experts). Differences in state certification decisions reflect, at least to some degree, differences in substantive state law. See Page, supra, at 27 (explaining that ***HN19***[] a court's approach to certification of indirect purchaser classes "may depend in part on the nature of the jurisdiction's indirect purchaser statute"). The Goda court, for example, certified a class of indirect purchasers after noting that the District of Columbia Antitrust Act explicitly provides for class-wide proof of injury: "The fact of injury and the amount of damages sustained by members of the class may be proven on a class-wide basis, without requiring proof of such matters by each individual member of the class." Goda, 1997 WL 156541, at *5 (quoting *D.C. Code Ann. § 28-4508(c)*).

In contrast, several other courts have denied class certification after concluding that their **[**74]** states' indirect purchaser statutes, unlike the District of Columbia's, require proof of injury to each class member. In *Execu-Tech Business Systems, Inc., v. Appleton Papers Inc., 743 So. 2d 19 (Fla. Dist. Ct. App. 1999)*, the Florida District Court of Appeal affirmed the denial of certification where the plaintiffs "had failed to meet their burden to come forward with a methodology by which they would be able to show by generalized proof that the alleged price-fixing conspiracy had impacted each class member individually." *Id. at 21-22*. The Execu-Tech plaintiffs' proposed methodology, an "incidence analysis" performed by an expert economist, was rejected by the court below as dependent on "simplifying assumptions that have **[*281]** little support in the real world." *Execu-Tech, 743 So. 2d at 22* (internal quotation marks omitted); compare In re Florida Microsoft Antitrust Litig., No. 99-27340, 2002 WL 31423620, at *11 (Fla. Cir. Ct. Aug. 26, 2002) (permitting certification where, unlike Execu-Tech, the conclusions of the plaintiffs' economist were supported by those of other experts, including economists employed by **[**75]** the

Department of Justice during the previous action brought by the United States, who also identified methodologies for demonstrating the individual impact of Microsoft's behavior).

In Melnick v. Microsoft Corp., Nos. CV-99-709, CV-99-752, 2001 WL 1012261 (Me. Super. Aug. 24, 2001), the Maine Superior Court similarly declined to certify a proposed class of indirect purchasers. Id. at *16. Noting that Maine's indirect purchaser statute "does not change the plaintiffs' burden of proof on a motion for class certification," the court required "an entirely separate level of evidence and proof" demonstrating that overcharges had been passed on to consumers. Id. at *6 & n.7 (citing *Karofsky v. Abbott Laboratories, Inc., CV-95-1009, 1997 Me. Super. LEXIS 316 (Oct. 15, 1997)*, which rejected expert testimony regarding impact as uncertain and incomplete). The court determined the plaintiffs had failed to produce such evidence, relying on "general, untried economic theory" rather than "real world facts" regarding Maine consumers. Id. at *16.

Michigan courts have declined to certify indirect purchaser classes on four occasions. See *A & M Supply, 252 Mich. App. at 616-32* **[**76]** (reviewing the certification decisions of Michigan trial courts). The Appeals Court in A & M Supply gathered from prior denials that "Michigan's trial courts tend to interpret MARA [*Michigan Antitrust Reform Act*] and our state court rules as requiring a rigorous analysis" of individual impact. *Id. at 635*. The A & M court agreed with this approach, holding that it was "mandate[d]" by MARA's requirement of "actual damages." Id. The court accordingly rejected the affidavits sworn by the plaintiffs' expert, whose methodologies "failed to bridge the gap between economic theory and the reality of economic damages." *Id. at 640*. Citing what Judge Posner termed the "central insight of Illinois Brick" -- that the proportion of pass-on will be difficult to determine in imperfect markets -- the Court found the expert's theories, "generalized slogans," and "vague promises for future analysis" simply insufficient to meet the plaintiffs' burden. *Id. at 638-42* (quoting *Illinois ex rel Hartigan v. Panhandle Eastern Pipe Line Co., 852 F.2d 891, 894 (7th Cir. 1988)*, overruled on other grounds sub nom. *Illinois ex rel. Burris v. Panhandle Eastern Pipe Line Co., 935 F.2d 1469 (7th Cir. 1991)).* **[**77]** But see *Cardizem, 200 F.R.D. at 349-51* (concluding, on the basis of exclusively federal decisions, that a lesser burden applied to a class of indirect purchasers asserting claims under Michigan law).

In Gordon v. Microsoft Corp., No. 00-5994, 2001 WL 366432 (Minn. Dist. Ct. Mar. 30, 2001), the Minnesota District Court noted the "consistency" with which Minnesota courts have denied class certification motions in indirect purchaser cases. Id. at *4 (citing five such denials). In *Keating v. Philip Morris, Inc., 417 N.W.2d 132 (Minn. App. 1987)*, for example, the Court of Appeals agreed that class certification was inappropriate where the calculation of cigarette retailers' individual damages presented an "unmanageable, if not impossible, task." *Id. at 137*. The court foresaw "thousands of trials" examining "hundreds of thousands of transactions between thousands of retailers, wholesalers, distributors and manufacturers." Id. In Gordon, apparently the only Minnesota decision to certify a class of indirect purchasers, 2001 WL 366432, at *2, the court considered its case "different" from "each of **[**78]** the prior cases," in which plaintiffs had "failed to propose a viable method for proving class-wide fact of injury, amount of individual damages, or both," id. at *6 (internal citations omitted). Unlike those plaintiffs, the plaintiffs in Gordon had "actually produced a time-consuming but apparently workable method for calculating damages." Id. More importantly, the Gordon court declared at the beginning of its analysis that "standards for class certification should be interpreted if at all possible **[*282]** in a fashion that indirect purchasers can meet." Id. at *4.

The above decisions suggest that ***HN20***[] these courts have interpreted their respective indirect purchaser statutes with a more "skeptical view" of antitrust policies and remedies. See Page, supra, at 17. [18] As Professor Page has explained: "The skeptical view, typified by the Illinois Brick majority, values deterrence over compensation, efficiency over equity, and accuracy over approximation." Id. Courts adopting this view question their ability to apportion overcharges between direct and indirect purchasers, finding that "the realities of the evidentiary

[18] Certainly, the denials of certification also reflect other factors. See e.g., Gordon, 2001 WL 366432, at *6 (considering prior denials "different," not only because those plaintiffs lacked workable methods for calculating damages, but also because they had sued more defendants, bought more products, and made more purchases). The Court simply notes that views regarding antitrust policies and proof are among the relevant factors, and in some cases, are the most significant among them. See *A & M Supply, 252 Mich. App. at 633, 642* (finding certification inappropriate on facts "virtually identical" to those of Gordon based on a more skeptical review of the evidence).

issues, as opposed to theoretical models, **[**79]** are difficult for courts to resolve accurately." Id. Finding these decisions a persuasive "indication of what state law is," 19 Wright, Miller & Cooper, supra, § 4507, the Court concludes that the indirect purchaser statutes of Florida, Maine, Michigan, and Minnesota require a somewhat stronger and more precise showing of individual impact. But see *Terazosin, 2004 U.S. Dist. LEXIS 6176, 2004 WL 828997, at *25, *28* (certifying classes of indirect purchasers from Florida, Maine, Michigan, and Minnesota without reference to or analysis of state court interpretations of their respective statutes).

[80]** The end payor plaintiffs have not made such a showing. Rather, they rely on the declarations of Raymond S. Hartman ("Dr. Hartman"), an economist who proposes methodologies "potentially available to calculate damages of the Class on an aggregate basis." End Payor Pls.' Mem. at 15. Specifically, Dr. Hartman discusses the "top-down" method, which would trace but-for and actual prices from SmithKline down to end payors, the "bottom-across" method, which would compare but-for and actual prices paid by end payors at the bottom of the distribution chain, and a hybrid version "making use of the most reliable components of each method." Hartman Decl. P 23. Although these methods are "aimed at estimation of aggregate class-wide overcharge damages," Dr. Hartman asserts that they can also be applied to specific groups or individuals to "differentiate[e] and allocate[e] damages." Id. P 25. He does not, however, go further toward differentiating or allocating damages based on, for example, the unique characteristics of various states' markets or consumers. In fact, in response to SmithKline's objection, Dr. Hartman states: "It is my understanding that the formulaic methods … must provide **[**81]** a sufficiently accurate calculation of aggregate damages. At this stage of the litigation, it is unnecessary that I calculate individual damages to each and every Class member." Hartman Rebuttal Decl. P 10 (emphasis in original). More significantly, none of Dr. Hartman's proposed methods demonstrates individual impact to members of the end payor plaintiffs' classes. See also Defs.' Opp'n, Ex. 3 (Hartman Dep.) at 93:10-93:16 (A: "Well, there has been a different -- there has been different quanta of effects for different class members and some of those quanta for certain purchasers are zero and they're the ones you're identifying." Q: "How will you identify those people?" A: "This report doesn't go after that.").

Because the end payor plaintiffs had not made the stronger showing deemed necessary under the indirect purchaser statutes of Florida, Maine, Minnesota, and Michigan, end payor plaintiffs from these states were excluded from the exemplar classes.

iii) Unilateral Monopolies

In addition to the "skeptical" interpretations discussed above -- which some might describe as differences "in nuance," *In re Rhone-Poulenc Rorer Inc., 51 F.3d 1293, 1300 (7th Cir. 1995)* **[**82]** -- an examination of state antitrust laws also reveals differences in their terms. For example, the antitrust statutes of several states extend only to concerted conduct, not to unilateral conduct of the **[*283]** sort alleged here. See *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768-69, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)* (discussing the rationale for "treat[ing] concerted behavior more strictly than unilateral behavior" under the analogous federal statute: "Concerted activity inherently is fraught with anticompetitive risk."). For these states, discussed below, the Court considers the alternative statutory and equitable claims asserted by the end payor plaintiffs.

HN21[] Under California law, a challenge to unilateral conduct does not state a cognizable antitrust claim. See *Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986)* (stating that a challenge to unilateral conduct is "not cognizable under the *Cartwright Act*, for it fails to allege any combination"), modified on other grounds, *810 F.2d 1517 (9th Cir. 1987)*. In addition to the Cartwright Act, the end payor plaintiffs cite the unfair competition statute, *Cal. Bus. & Prof. Code §§ 17200-17208* **[**83]** . Compl. P 102(b). As interpreted by the California Supreme Court, the scope of this statute is broad: "The statutory language referring to 'any unlawful, unfair *or* fraudulent' practice (italics added) makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. The end payor plaintiffs thus may assert that SmithKline's unilateral conduct, even if permissible under the Cartwright Act, is actionable under the unfair competition statute. See *Motors, Inc. v. Times Mirror Co., 102 Cal. App. 3d 735, 741, 162 Cal. Rptr. 543 (1980)* (concluding that the plaintiff adequately stated a claim of unfair competition even though it had not alleged "any agreement, understanding, or conspiracy to restrain trade"). As stated above, the California unfair competition statute, like those of other exemplar states, parallels *Section 5 of the Federal Trade Commission Act* with regard to prohibited practices. See *Cel-Tech Communications, 20 Cal. 4th at 185*. The Court accordingly included plaintiffs from California **[**84]** in the end payor plaintiff classes, concluding that claims asserted under the unfair competition statute, notwithstanding their more limited remedies, *id. at 179* (stating that prevailing plaintiffs generally may seek injunctive and restitutionary remedies only), are sufficiently similar to those asserted under the statutes of other exemplar states.

HN22[] Although "broad and undeveloped by case law," *Bergstrom v. Noah, 266 Kan. 829, 842, 974 P.2d 520 (1999)*, the Kansas Monopolies and Unfair Trade Act, *Kan. Stat. Ann. § 50-132*, by its terms prohibits combinations and conspiracies only. See *Kan. Stat. Ann. § 50-132* ***HN23***[] ("No person, servant, agent or employee of any person doing business within the state of Kansas shall conspire or combine with any other persons, within or without the state for the purpose of monopolizing any line of business ...." (emphasis added)). In addition to the Monopolies and Unfair Trade Act, the end payor plaintiffs cite the Consumer Protection Act, *Kan. Stat. Ann. §§ 50-623 to -644*. ***HN24***[] Actions brought under the Consumer Protection Act are subject to a three-year statute **[**85]** of limitations. *Alexander v. Certified Master Builders Corp., 268 Kan. 812, 824, 1 P.3d 899 (2000)*. This Court previously determined that the end payor plaintiffs' claims accrued for statute of limitations purposes on August 8, 1998. *Relafen, 286 F. Supp. 2d at 64* (holding that the plaintiffs' claims were timely under the four-year statute of limitations applied to federal antitrust actions). The earliest of the end payor plaintiffs' complaints was filed on January 30, 2002, more than three years after the date of accrual. See Lynch Compl. [Doc. No. 1 in Lynch v. SmithKline Beecham Corp., Civil Action No. 02-CV-10163]. Because claims asserted under the Kansas Consumer Protection Act are subject to an individualized limitations defense, end payor plaintiffs from Kansas were excluded from the exemplar classes. [19] See *Waste Mgmt., 208 F.3d at 296* ***HN25***[] ("[A] necessity for individualized statute-of-limitations determinations invariably weighs **[*284]** against class certification under *Rule 23(b)(3)* ....").

[86]** The Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101*, ***HN26***[] declares the following anticompetitive conduct to be "against public policy": "all arrangements, contracts, agreements, trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article." Id. (emphasis added). None of these terms appears to include unilateral conduct. See 6 Julian O. von Kalinowski, Antitrust Laws and Trade Regulation § 116.03 (2d ed. 2003). The end payor plaintiffs also allege violations of the Consumer Protection Act, *Tenn. Code Ann. §§ 47-18-101 to - 108*. Compl. P 102(u). ***HN27***[] Although modeled after the Federal Trade Commission Act, the Tennessee Consumer Protection Act differs in one significant respect: unlike the federal provision, which prohibits both unfair methods of competition and unfair or deceptive acts or practices, the Tennessee statute prohibits only unfair or deceptive acts or practices. *Sherwood v. Microsoft Corp., 2003 Tenn. App. LEXIS 539, No. M2000-01850-COA-R9-CV, 2003 WL 21780975, at *31 (Tenn. Ct. App. July 31, 2003)* **[**87]** . The Tennessee Court of Appeals has interpreted this difference to reflect a conscious choice to exclude unfair methods of competition from the scope of the Tennessee Act:

> This history makes clear that by the time Tennessee adopted its Consumer Protection Act, its drafters and the legislators considering it had the benefit of the federal act and experience under it, the proposed Uniform Trade Practices Act and Consumer Protection Law, the statutory language adopted in many other states, and the evaluations of a number of authors of learned articles and treatises. We cannot presume other than that the Tennessee General Assembly knowingly chose not to include antitrust or anticompetitive conduct as actionable under the TCPA.

*Id. 2003 Tenn. App. LEXIS 539, [WL] at *32*. Because neither of their statutory claims is cognizable under state law, end payors from Tennessee were included in the exemplar classes with respect to their claims for unjust enrichment only. [20]

---

[19] In so excluding the Kansas plaintiffs, the Court makes no comment on the validity of the end payor plaintiffs' previously asserted claim of fraudulent concealment. See *Relafen, 286 F. Supp. 2d at 64 n.4*. It merely finds the claim inappropriate for class treatment.

[88] iv) Restrictions on Remedies**

HN28[] Under New York law, "an action to recover a penalty … imposed by statute may not be maintained as a class action" unless the statute imposing the penalty "specifically authorizes" class recovery. *N.Y. C.P.L.R. 901(b)*. For purposes of this rule, the treble damages permitted by the New York antitrust statute, *N.Y. Gen. Bus. Law §§ 340-347* (the "Donnelly Act"), have been deemed a "penalty." *Asher v. Abbott Labs., 290 A.D.2d 208, 737 N.Y.S.2d 4, 4 (N.Y. App. Div. 2002)*; *Cox v. Microsoft Corp., 290 A.D.2d 206, 737 N.Y.S.2d 1, 2 (N.Y. App. Div. 2002)*. Because the Donnelly Act imposes a "mandatory" penalty but does not "specifically authorize" class recovery, New York courts have dismissed class actions brought under the Act as impermissible. See *Asher, 737 N.Y.S.2d at 4*; *Cox, 737 N.Y.S.2d at 2*. These decisions suggest that *C.P.L.R. 901(b)*, if applicable, would bar the end payor plaintiffs from pursuing their claims under the Donnelly Act in the present class action.

It is not, however, completely clear that *C.P.L.R. 901(b)* ought **[**89]** be applied by federal courts. But see *In re Microsoft Corp. Antitrust Litig., 127 F. Supp. 2d 702, 727 (D. Md. 2001)* (concluding that *C.P.L.R. 901(b)* required dismissal of the plaintiffs' class action claims without considering whether the state rule applied in federal courts). Under *Hanna v. Plumer, 380 U.S. 460, 14 L. Ed. 2d 8, 85 S. Ct. 1136 (1965)*, if the law of the relevant state is in "direct collision" with a valid Federal Rule of Civil Procedure, *id. at 472*, the "Federal Rule applies regardless of contrary state law." *Gasperini v. Center for Humanities, Inc., 518 U.S. 415, 428 n.7, 135 L. Ed. 2d 659, 116 S. Ct. 2211 (1996)* (citing *Hanna, 380 U.S. at 469-74*). The Court's initial inquiry, then, is whether *C.P.L.R. 901(b)* directly conflicts **[*285]** with the applicable Federal Rule, *Rule 23*. See 19 Wright, Miller & Cooper, supra, § 4504.

HN29[] On its face, *Rule 23* "merely establishes the procedures for pursuing a class action in the federal courts." *Wade v. Danek Med., Inc., 182 F.3d 281, 290 (4th Cir. 1999)*. It sets forth the circumstances under which "one or more members of a class may sue or be sued as representative **[**90]** parties," but makes no reference to the remedies that representative parties may seek. See *Fed. R. Civ. P. 23*. In addition, *Rule 23*, *HN30*[] like all Federal Rules, must be interpreted "with sensitivity to important state interests and regulatory policies" that may be frustrated by the application of federal procedures. *Gasperini v. Center for Humanities, Inc., 518 U.S. 415, 428 n.7, 135 L. Ed. 2d 659, 116 S. Ct. 2211 (1996)*.

Here, *C.P.L.R. 901(b)* *HN31*[] expresses a state interest in avoiding "annihilatory punishment" by discouraging multiple recoveries of statutory penalties. See *Lennon v. Philip Morris Cos., Inc., 189 Misc. 2d 577, 734 N.Y.S.2d 374, 380 (N.Y. Sup. 2001)* (quoting Joseph M. McLaughlin, Practice Commentaries, C901:7, *N.Y. C.P.L.R. 901(b)* (McKinney)). As one commentator explains: "The increased deterrent effect class actions create may intensify the already heightened deterrent effect of a penalty provision, to a point perhaps counter-productive to statutory policies." Developments in the Law -- Class Action, 89 Harv. L. Rev. 1329, 1361 (1976). With regard to statutory policies, **[**91]** the Court considers it significant that "since enacting the Donnelly Act, the New York State Legislature has twice considered the indirect purchasers' right to bring suit," but has adopted "no express language[] … which authorizes the maintenance of a class action." *Lennon, 734 N.Y.S.2d at 381*. In light of the text and policies of the provisions, the Court declines to interpret *Rule 23* so broadly as to control the remedial issues governed by *C.P.L.R. 901(b)* and the Donnelly Act. Accordingly, the Court discerns no direct conflict between the state law and the Federal Rule. See *United States v. Dentsply Int'l, Inc., 2001 U.S. Dist. LEXIS 9057, Nos. Civ. A. 99-005-SLR, 99-255-SLR, 99-854-SLR, 2001 WL 624807, at *16 (D. Del. Mar. 30, 2001)* (distinguishing the scope of *Rule 23* from that of *C.P.L.R. 901(b)*); but cf. *Bridgestone/Firestone,* *205 F.R.D. at 516*, rev'd in part on other grounds sub nom. *In re Bridgestone/Firestone, Inc., 288 F.3d 1012* (refusing to apply the reasoning of Dentsply International, and concluding that a Michigan provision limiting class action plaintiffs to those residing or injured in the state conflicts with *Rule 23*).

---

[20] Although Tennessee courts have required that unjust enrichment plaintiffs first exhaust their legal remedies, see *Paschall's Inc. v. Dozier, 219 Tenn. 45, 57-58, 407 S.W.2d 150 (1966)*, such exhaustion would be futile here as the Tennessee plaintiffs' statutory claims are not cognizable under the state's antitrust or consumer protection laws.

[92]** Because it found no "direct collision" between the state and federal provisions, the Court's decision whether to apply *C.P.L.R. 901(b)* was guided not by Hanna, but by the "twin aims of the Erie rule: discouragement of forum-shopping and avoidance of inequitable administration of the laws." 19 Wright, Miller & Cooper, supra, § 4504 (quoting *Hanna, 380 U.S. at 468*); see *Erie R.R. Co. v. Tompkins, 304 U.S. 64, 82 L. Ed. 1188, 58 S. Ct. 817, 11 Ohio Op. 246 (1938)*. Significant to the Court's Erie analysis was the fact that New York courts consistently apply *C.P.L.R. 901(b)* to bar class actions brought under the Donnelly Act. See *Cox, 737 N.Y.S.2d at 2*; *Asher, 737 N.Y.S.2d at 4*; *Lennon, 734 N.Y.S.2d at 380* ("Even where treble damages are discretionary and need not be sought by the injured party, it is this Court's understanding that no New York court has sustained such a claim either under the Donnelly Act or any other statutory provision."). For this reason, declining to apply *C.P.L.R. 901(b)* would clearly encourage forum-shopping, with plaintiffs and their attorneys migrating toward federal court to obtain the "substantial **[**93]** advantages" of class actions. See *Deposit Guar. Nat'l Bank v. Roper, 445 U.S. 326, 338-39 & n.9, 63 L. Ed. 2d 427, 100 S. Ct. 1166 (1980)* (discussing the increased fees and decreased costs associated with class actions). In addition, permitting Donnelly Act class actions exclusively in federal court would inequitably injure plaintiffs unable to demonstrate diversity of citizenship. See *Walker v. Armco Steel Corp., 446 U.S. 740, 753, 64 L. Ed. 2d 659, 100 S. Ct. 1978 (1980)* (finding it inequitable that an action barred in the state courts should proceed to judgment in the federal courts "solely because of the fortuity that there is diversity of citizenship between the litigants"); *Dornberger v. Metropolitan Life Ins. Co., 182 F.R.D. 72, 84 (S.D.N.Y. 1998)* **[*286]** (applying *C.P.L.R. 901(b)* because it would be "patently unfair" not to). Accordingly, the Court determined that *C.P.L.R. 901(b)* should be applied and that the end payor plaintiffs' claims under the Donnelly Act are therefore barred.

The Court's application of *C.P.L.R. 901(b)* does not, however, necessarily bar the end payor plaintiffs' claims under the New York consumer protection act, *N.Y. Gen. Bus. Law § 349* **[**94]** . Compl. P 102(q). ***HN32***[] Under *Section 349(h)*, private plaintiffs may recover actual damages, a statutory minimum, or up to treble damages if the court finds a willful or knowing violation. *N.Y. Gen. Bus. Law § 349(h)*. As with the Donnelly Act, because this Section does not "specifically authorize" class recovery, *C.P.L.R. 901(b)* bars class claims for minimum or treble damages. *Super Glue Corp. v. Avis Rent A Car Sys., Inc., 132 A.D.2d 604, 517 N.Y.S.2d 764, 767 (N.Y. App. Div. 1987)*. Class claims for actual damages, in contrast, are not similarly barred. Id. Accordingly, "the weight of authority holds that a class action may be maintained to recover actual damages and injunctive relief pursuant to *General Business Law § 349(h)*." Id.

Yet bringing such an action requires named plaintiffs to waive their claims to minimum and treble damages. See id.; *Burns v. Volkswagen of Am., Inc., 118 Misc. 2d 289, 460 N.Y.S.2d 410, 413 (N.Y. Sup. Ct. 1982)*. Such waiver necessarily casts doubt on the named plaintiffs' fitness to represent class members who might prefer to pursue statutory or punitive remedies individually. See *Burns, 460 N.Y.S.2d at 413*; **[**95]** cf. *Molski v. Gleich, 318 F.3d 937, 956 (9th Cir. 2003)* (finding representation of the settlement class inadequate where the terms of the consent decree "waived practically all of the class members' claims without compensation and allowed the defendants to escape with little penalty"); *Arch v. American Tobacco Co., 175 F.R.D. 469, 480 (E.D. Pa. 1997)* ("Indeed, named plaintiffs who would intentionally waive or abandon potential claims of absentee plaintiffs have interests antagonistic to those of the class.").

Nor are the Court's concerns lessened because "any class member wish[ing] to pursue his or her statutory right to minimum and treble damages … may opt out of the class." *Super Glue Corp., 517 N.Y.S.2d at 767*. Scholars have recognized that as a practical matter, the opportunity to opt out is "unevenly distributed," with far lesser opportunity held by plaintiffs like those here, who have small rather than independently viable claims, and who receive "best practicable" rather than individual notice. See Michael A. Perino, Class Action Chaos? The Theory of the Core and an Analysis of Opt-Out Rights in Mass Tort Class Actions, **[**96]** *46 Emory L.J. 85 (1997)*; John Bronsteen & Owen Fiss, The Class Action Rule, *78 Notre Dame L. Rev. 1419, 1435 (2003)* (discussing the importance of notice in "rendering viable the right of unnamed class members … to intervene or to opt out of the lawsuit"); Theodore Eisenberg & Geoffrey P. Miller, The Role of Opt-Outs and Objectors in Class Action Litigation: Theoretical and Empirical Issues (Mar. 23, 2004) (unpublished manuscript) (testing scholars' conclusions against empirical data and reporting that "opt-out rates vary by case type," with consumer class actions having a relatively low mean opt-out rate of less than 0.2 percent). In light of these adequacy concerns regarding their consumer protection act claims, plaintiffs from New York were excluded from the exemplar classes.

v) Direct Benefit

HN33[] Under North Carolina law, "to establish a claim for unjust enrichment, a party must have conferred a benefit" that was "consciously accepted" by the defendant. Booe, 322 N.C. at 570. The benefit must be neither officious nor gratuitous, and it must be measurable. Id. The North Carolina Court of Appeals has suggested that in **[**97]** addition to these things, the benefit must be direct. See Effler v. Pyles, 94 N.C. App. 349, 353, 380 S.E.2d 149 (1989). But see Terazosin, 2004 U.S. Dist. LEXIS 6176, 2004 WL 828997, at *23 n.40 (concluding, without reference to Effler, that the standard for evaluating unjust enrichment claims is "virtually identical" across various states including North Carolina). In Effler, the court affirmed the entry of summary judgment against a plaintiff who failed **[*287]** to show that she had conferred a benefit directly on the defendant:

> Linda Pyles received title to the property through her husband. Although he had previously acquired his interest in this property with plaintiff's assistance, this does not satisfy plaintiff's burden of showing that she conferred a benefit directly on defendant Linda Pyles.

94 N.C. App. at 353

The end payor plaintiffs have similarly failed to satisfy this burden. Any enrichment that SmithKline received was conferred more directly by pharmaceutical wholesalers than by end payors, who by definition purchased Relafen from sources other than SmithKline. Proposed Order at 1. Moreover, as in Effler, the fact that many pharmaceutical **[**98]** wholesalers passed on and in fact benefitted from the overcharges paid by end payors, see Valley Drug, 350 F.3d at 1193, does not change the Court's analysis. Accordingly, because North Carolina plaintiffs would be subject to an individualized defense regarding the "direct benefit" element of their unjust enrichment claims, [21] they were excluded from the exemplar classes.

[99]** After thus limiting the exemplar classes to account for differences in state law, the Court concluded that the end payor plaintiffs had demonstrated the predominance of common issues for the remaining class members. The Court accordingly turned to superiority, the final requirement of Rule 23.

2. Superiority

As stated by the Supreme Court in Amchem, **HN34**[] the requirement of superiority, like that of predominance, ensures that resolution by class action will "achieve economies of time, effort, and expense, and promote … uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results." Amchem, 521 U.S. at 615 (alteration in original) (quoting Advisory Committee's Note on Fed. R. Civ. P. 23) (internal quotation marks omitted). With its focus on individuals' interests in conducting separate lawsuits, the superiority requirement directly addresses the Advisory Committee's core concern: the "vindication of the rights of groups of people who individually would be without effective strength to bring their opponents into court at all." Id. at 617 **[**100]** (quoting Benjamin Kaplan, A Prefatory Note, 10 B.C. Ind. & Com. L. Rev. 497, 497 (1969)) (internal quotation marks omitted).

The Advisory Committee's core concern was particularly compelling here, where protection of the public depends upon vigorous private enforcement of state laws but the small size of individual claims renders such enforcement unlikely. See Hartman Decl., tbl. 2 (documenting differences between branded and generic prices that range from $ 0.35 to $ 1.21 per pill); Bronsteen & Fiss, supra, at 1419 ("The most compelling [use of the class action] occurs

[21] In an unpublished opinion, the Fourth Circuit suggested that on different facts, North Carolina courts adopt "a broader approach to unjust enrichment than is indicated by Effler's 'direct benefit' rule." Metric Constructors, Inc. v. Bank of Tokyo-Mitsubishi, Ltd., 72 Fed. Appx. 916, 921 (4th Cir. 2003). This Court makes no comment on the end payor plaintiffs' ability to distinguish the present facts from those of Effler. It merely concludes that any attempt to do so would be inappropriate for consideration in the present class action. The Court also notes that citation of unpublished opinions is disfavored in the Fourth Circuit. See 4th Cir. R. 36(c).

when someone Inflicts a small harm on each member of a large group of people."); cf. *Illinois Brick, 431 U.S. at 745* (discussing, with respect to the analogous federal statute, the "important weapon" of private enforcement and selecting the direct purchaser rule in part to ensure adequate incentives to sue). Moreover, given the predominance of common questions, resolution of the end payor plaintiffs' numerous claims by class action would provide substantial savings in time, effort, and expense. See 7B Wright, Miller & Kane, . supra, § 1781 ("Since antitrust actions **[**101]** typically present many complicated issues, the courts should utilize these [class action] provisions to settle the common issues on a representational basis to avoid congesting the courts with separate actions requiring the repetitive adjudication of the same matters.").

Turning now to the pertinent factors identified in *Rule 23(b)(3)*, the Court emphasizes **[*288]** again that small size of the end payor plaintiffs' claims suggests that class members' "interest ... in individually controlling the prosecution or defense of separate actions," *Fed. R. Civ. P. 23(b)(3)(A)*, is limited -- if not nonexistent. See *McIntosh v. Irwin Union Bank & Trust, Co., 215 F.R.D. 26, 35 (D. Mass. 2003)* ("It cannot be reiterated too strongly that denial of class certification is the effective death knell of this litigation."). In addition, the Court is not aware of any other "litigation concerning the controversy," *Fed. R. Civ. P. 23(b)(3)(B)*, that might create a threat of "multiplicity" or "inconsistent adjudications," 7A Wright, Miller & Kane, supra, § 1780. In fact, the consolidation of several related claims **[**102]** -- including those of a generic manufacturer and a separately certified class of direct purchasers -- before this Court suggested that consistency would best be served by "concentrating the litigation" in this forum. *Fed. R. Civ. P. 23 (b)(3)(C)*.

As in most multi-state class actions, potential "difficulties likely to be encountered in the management of" this action, *Fed. R. Civ. P. 23(b)(3)(D)*, posed a more serious concern. See *Szabo v. Bridgeport Machs., Inc., 249 F.3d 672, 677 (7th Cir. 2001)* (observing that "nagging issues of choice of law, commonality, and manageability" beset a proposed national class action); *In re LifeUSA Holding Inc., 242 F.3d 136, 148 (3d Cir. 2001)* (declaring that an adjudication that involved individual determinations of, inter alia, state law "would not only be inordinately time consuming and difficult, but it would impermissibly transgress upon the required standards of fairness and efficiency"). Nevertheless, having thoroughly examined the relevant statutes, the Court concluded that the remaining states' laws are neither so varied nor **[**103]** so numerous as to render this action unmanageable. See *Waste Mgmt., 208 F.3d at 296-97* (affirming certification notwithstanding variations in states' statutes of limitations where "the limitations problems nonetheless appeared to be inconsequential"). The Court acknowledges that difficulties might later arise concerning, for example, the availability of certain remedies, see Defs.' Opp'n at 28-30, but the Court concluded that any damages-related difficulties could be more appropriately dealt with as they arose. *Yaffe v. Powers, 454 F.2d at 1365 (1st. Cir. 1972)*; see also *Visa Check/MasterMoney, 280 F.3d at 140-41* (citing Yaffe and describing the several "management tools available to a district court to address any individualized damages issues that might arise in a class action"). The Court accordingly concluded that the end payor plaintiffs had established superiority as required under *Rule 23(b)(3)*.

IV. CONCLUSION

For the foregoing reasons, the End Payor Plaintiffs' Motion for Class Certification [Doc. No. 119] was ALLOWED in part and DENIED in part. The motion was DENIED under *Rule 23(b)(2)*, and ALLOWED **[**104]** under *Rule 23(b)(3)* for the following exemplar classes:

With respect to their antitrust and consumer protection claims --

All persons or entities who purchased Relafen or its generic alternatives in the states of Arizona, California, Massachusetts, or Vermont during the period of September 1, 1998 through June 30, 2003 for consumption by themselves, their families, members, employees, insureds, participants, or beneficiaries.

and with respect to their unjust enrichment claims --

All persons or entities in the United States who purchased Relafen in the states of Arizona, California, Massachusetts, Tennessee, or Vermont during the period September 1, 1998 through June 30, 2003 for consumption by themselves, their families, members, employees, insureds, participants, or beneficiaries.

Excluded from both classes were governmental entities; SmithKline and its officers, directors, management, employees, subsidiaries, and affiliates; persons or entities who purchased Relafen for purposes of resale; and persons or entities who purchased Relafen directly from SmithKline or its affiliates.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN2[] Opposing Materials, Accompanying Documentation

Former U.S. Dist. Ct., D.P.R., R. 311.12 requires that a party who moves for summary judgment submit, in support of the motion, a separate, short, and concise statement of the material facts as to which the moving party contends there is no genuine issue to be tried and the basis of such contention as to each material fact, properly supported by specific reference to the record. The rule requires a party opposing a summary judgment motion to include with its opposition a short and concise statement of the material facts as to which it is contended that there exists a genuine issue to be tried, with proper record citations. The penalty for failure is that the facts delineated in the movant's statement will be deemed to be admitted unless controverted by the statement required to be served by the opposing party.

Governments > Courts > Rule Application & Interpretation

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN3[] Summary Judgment, Supporting Materials

Former U.S. Dist. Ct., D.P.R., R. 311.12, as written, does not always require that a party opposing summary judgment put forth its version of the facts in a separate statement. The rule requires only that the nonmovant identify any facts in the movant's statement with which it takes issue.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN4[] Standards of Review, De Novo Review

An appellate court affords de novo review to orders granting or denying summary judgment. It need not adopt the trial court's reasoning, but may sustain its decree on any ground made manifest in the record.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits every contract, combination or conspiracy, in restraint of trade or commerce. There are two prerequisites for a successful *§ 1* claim. First, there must be concerted action. Second, the actors' agreement must involve either restrictions that are per se illegal or restraints of trade that fail scrutiny under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN6[] **Price Fixing & Restraints of Trade, Vertical Restraints**

A vertical restraint is a restraint of trade involving a combination of persons at different levels of the market structure. While vertical restraints may reduce intra-brand competition by limiting the number of sellers of a particular product, competing for a given group of buyers, they also promote inter-brand competition by allowing a manufacturer to achieve certain efficiencies in the distribution of its products. Thus, vertical restraints often have both pro-competitive and anti-competitive effects. For this reason, such restraints generally are not deemed per se illegal, but, rather, are tested under a rule of reason analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN7[] **Vertical Restraints, Price Fixing**

Vertical price-fixing agreements are a special subset of vertical restraints. As such, they qualify for different treatment. A vertical price-fixing agreement that establishes a minimum price normally is regarded as a naked restraint of trade and, thus, as illegal per se.

HN8[] **Entitlement as Matter of Law, Appropriateness**

An appellate court must examine a district court's ruling on summary judgment in light of the full record. In carrying out that task, a court remains cognizant that the proper office of summary judgment is to pierce the boilerplate of the pleadings and assess the proof in order to determine the need for a trial. Summary judgment is appropriate only if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

HN9[] **Summary Judgment, Opposing Materials**

In considering the evidence on a summary judgment motion, a court must array it in the light most hospitable to the party opposing the motion, indulging all reasonable inferences in that party's favor. To avoid summary judgment, the evidence upon which the nonmovant relies to create a genuine issue of material fact must be significantly probative, not merely colorable.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN10[] **Standards of Review, De Novo Review**

Where parties file cross-motions for summary judgment, a reviewing court examines each motion independently, applying the summary judgment principles.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN11[] **Remedies, Damages**

A special constraint applies to summary judgment rulings in vertical restraint cases. Antitrust liability is strong medicine (it exposes a defendant to treble damages, *15 U.S.C.S. § 15*), and thus *§1* of the Sherman Act, *15 U.S.C.S. § 1*, is interpreted to limit the inferences that may be drawn from ambiguous evidence. In a vertical restraint case, conduct that is as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Thus, a *§ 1* antitrust case predicated upon an alleged vertical restraint can survive summary judgment only if the evidence relied upon by the nonmovant suffices to show a bona fide dispute about a fact that has the potential of affecting the outcome of the case under the applicable law.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

To create a trialworthy issue in a vertical restraint case brought pursuant to *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must make two showings: concerted action and harm to the competitive process.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

To satisfy the "concerted action" requirement of a claim brought under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, there must be evidence that tends to exclude the possibility of independent action by the manufacturer and distributor. Phrased another way, there must be direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective. *Section 1* is not intended to prohibit entrepreneurial action, and a manufacturer, acting independently, ordinarily has a right to sell (or not to sell) to whichever customers it chooses.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN14[] **Price Fixing & Restraints of Trade, Vertical Restraints**

In an antitrust case, the burden is on the accuser to make at least a prima facie showing of concerted action. Thus, a court inquires whether the plaintiff has presented evidence that reasonably tends to prove that the manufacturer and others conspired to achieve an illicit objective.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] Antitrust & Trade Law, Sherman Act

In Sherman Act cases the permissible inferences that can be drawn from ambiguous evidence are quite limited. If the evidence shows conduct that is as consistent with lawful competition as it is with an illicit conspiracy, it cannot be said to support an inference of concerted action.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN16[] Antitrust & Trade Law, Sherman Act

The raw fact that a distributor's actions are an attempt to pressure a manufacturer into terminating a distribution relationship with a price-cutting competitor is not enough either to show concerted action or to defeat summary judgment dismissal of a claim brought under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN17[] Antitrust & Trade Law, Sherman Act

In a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, the fact that a dealer was terminated from its dealership in response to complaints from competing dealers is insufficient, without more, to survive a motion for summary judgment.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN18[] Price Fixing & Restraints of Trade, Vertical Restraints

An agreement to terminate a price-cutter to placate another dealer does not constitute a per se violation of *§ 1* of the Sherman Act, , *15 U.S.C.S. § 1*. To render such an agreement illegal per se, there must be a further agreement on the price or price levels to be charged by the remaining dealer. Without an agreement as to a specific minimum price or price level, a vertical restraint is unlawful only if it fails a rule of reason analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN19[] **Price Fixing & Restraints of Trade, Vertical Restraints**

In a vertical restraint case, liability under the rule of reason analysis requires a showing of harm to the competitive process.

Counsel: Armando Llorens, with whom Dora Penagaricano and McConnell Valdes were on brief, for appellant.

Jose L. Barreto-Rampolla, with whom Rivera, Barreto & Torres Marcano was on brief, for appellee Clubman, Inc.

Edna Hernandez-Arroyo, with whom Maria Luisa Martinez-Lopez, Avila, Martinez & Hernandez, PSC, Lawrence Fechner, and Jaffe, Segal & Ross were on brief, for appellee Zanella, Ltd.

Judges: Before Selya, Circuit Judge, Coffin, Senior Circuit Judge, and Lipez, Circuit Judge.

Opinion by: SELYA

Opinion

[*13] SELYA, *Circuit Judge*. This antitrust case, which requires us to clarify what sort of evidence a plaintiff must adduce to make out a trialworthy claim for a vertical restraint of trade, presents a question of first impression in this circuit. We turn to this question mindful that vertical restraints have "provoked more reconsideration of established rules, or more disagreement between courts and commentators" than most other areas of ***antitrust law***. Herbert Hovenkamp, Federal Antitrust Policy: The Law of Competition and Its Practice § 11.1, at **[**2]** 441 (2d ed. 1999).

I

We begin with the cast of characters. Plaintiff-appellant Euromodas, Inc. is a corporation engaged in the retail sale of men's clothing. Defendant-appellee Clubman, Inc. is engaged in the same business. The two retailers are direct competitors in San Juan, Puerto Rico. Defendant-appellee Zanella, Ltd. is an Italian manufacturer of fine men's clothing. Until 1997, both Euromodas and Clubman sold Zanella trousers. What happened thereafter propelled the parties from the marketplace to the federal courthouse.

Euromodas alleges that Clubman, which operates a large number of stores in Puerto Rico, used its market power to force **[*14]** Zanella into a minimum resale price maintenance scheme. Euromodas claims that this scheme was in part intended to -- and did -- restrict its access to Zanella pants. Because this appeal arises in an unusual posture, *see infra* Part II, we defer further development of the background facts until we reach the merits of the antitrust claim.

For the nonce, it suffices to say that Euromodas, endeavoring to regain its competitive footing, sued both Clubman and Zanella in the federal district court. It alleged a violation of section 1 of **[**3]** the Sherman Act, *15 U.S.C. § 1*. After pretrial discovery had been completed, all three parties moved for summary judgment. The district court granted the defendants' motion and denied the plaintiff's cross-motion. *Euromodas, Inc. v. Zanella, Ltd., 253 F. Supp. 2d 201 (D.P.R. 2003)*.

The district court's decision comprised three discrete but interdependent rulings. Initially, the court determined that the plaintiff -- Euromodas -- had not complied with local procedural rules. *Id. at 203-04*. This determination shaped the court's conception of which parts of the record could be considered on summary judgment. Viewing the case through that prism, the court ruled that the plaintiff had not adduced sufficient evidence of concerted action to fix prices and, thus, had failed to make out an antitrust violation. *Id. at 205-06*. Along the way, the court denied the plaintiff's cross-motion for summary judgment on the ground that it did not comply with the court's local rules. *Id. at 204 n.5* (discussing D.P.R.R. 311.12).

This appeal followed. In it, the plaintiff (i) challenges the district court's resolution **[**4]** of the procedural issue; (ii) assigns error to the court's entry of summary judgment for the defendants; and (iii) protests the denial of its cross-motion for brevis disposition.

II

Our logical starting point is the procedural issue, for its resolution will determine what facts properly comprised the summary judgment record and, thus, what facts the lower court should have considered in deciding whether to grant summary judgment. This inquiry centers on D.P.R.R. 311.12. [1] ***HN1***[] The District of Puerto Rico promulgated that rule to aid in the task of identifying genuine issues of material fact that might affect the entry of summary judgment. *See*, *e.g.*, *Ruiz Rivera v. Riley, 209 F.3d 24, 28 (1st Cir. 2000)*.

The local rule imposes bilateral obligations. **[**5]** ***HN2***[] It requires that a party who moves for summary judgment submit, in support of the motion, "a separate, short, and concise statement of the material facts as to which the moving party contends there is no genuine issue to be tried and the basis of such contention as to each material fact, properly supported by specific reference to the record." D.P.R.R. 311.12. In turn, the rule requires a party opposing a summary judgment motion to include with its opposition a short and concise statement "of the material facts as to which it is contended that there exists a genuine issue to be tried," with proper record citations. *Id.* The penalty for failure is potentially harsh; the facts delineated in the movant's statement will be "deemed to be admitted unless controverted by the statement required to be served by the opposing party." *Id.*

Rules such as Local Rule 311.12 were adopted pursuant to a suggestion of this court, *see* *Stepanischen v. Merchants Despatch* ***[*15]*** *Transp. Corp., 722 F.2d 922, 931-32 (1st Cir. 1983)*, and we consistently have upheld their use, *see*, *e.g.*, *Cosme-Rosado v. Serrano-Rodriguez, 360 F.3d 42, 45 (1st Cir. 2004)*; *Ruiz Rivera, 209 F.3d at 28.* **[**6]** Here, however, the issue is not the enforceability of the local rule but, rather, how it applies to oppositions to summary judgment motions. Specifically, the plaintiff questions the way in which the district court, based on its reading of the local rule, restricted its consideration of the plaintiff's evidence in analyzing the defendants' summary judgment motion. [2] In an effort to put matters into perspective, we explain what transpired.

Zanella **[**7]** moved for summary judgment in full compliance with Local Rule 311.12 (Clubman joined Zanella's motion and we need not discuss separately its quest for summary judgment). When the plaintiff served its opposition, it omitted a separate statement listing controverted material facts. The district court perceived this omission as a "blatant disregard" of Local Rule 311.12, proceeded to "deem as admitted the relevant uncontested facts submitted by Zanella with its motion for summary judgment," and limited the summary judgment record to those facts. *Euromodas, 253 F. Supp. 2d at 203-04*.

---

[1] The District of Puerto Rico revised, reorganized, and renumbered its compendium of local rules in September of 2003. Because the summary judgment motions in this case were adjudicated prior thereto, we refer throughout to the earlier version.

[2] To be sure, the district court also denied the plaintiff's motion for summary judgment on the basis of the plaintiff's supposed noncompliance, qua movant, with the requirements of D.P.R.R. 311.12. *See* *Euromodas, 253 F. Supp. 2d at 204 n.5* (refusing to "scavenge through the record to pinpoint the facts that would support Euromodas's arguments"). But as our subsequent discussion of the merits reveals, *see infra* Part III, any error in that regard was harmless. Accordingly, we discuss only the district court's treatment of the plaintiff's opposition.

The plaintiff asserts that this approach constituted error. It tells us that it complied with the imperatives of Local Rule 311.12 notwithstanding its failure to formulate a separate statement of controverted material facts. Therefore, its thesis runs, the district court, while entitled to deem the defendants' assertions of fact admitted, also should have taken the facts identified in the plaintiff's opposition fully into account.

We conclude that the district court erred in its interpretation of the local rule. The court found Euromodas to have violated Local Rule 311.12 merely because **[**8]** it did not include a separate statement of disputed facts with its opposition. But ***HN3***[] Local Rule 311.12, as written, does not always require that a party opposing summary judgment put forth its version of the facts in a separate statement. The rule requires only that the nonmovant identify any facts *in the movant's statement* with which it takes issue. *See* D.P.R.R. 311.12. In other words, an opposing party is required to file such a statement only if (and to the extent that) it wishes to register and preserve a potential dispute as to one or more of the facts advanced by the movant.

In this instance, Euromodas was content to accept the facts proffered by the defendants, so the district court appropriately treated those facts as admitted. The plaintiff, however, regarded those facts as incomplete, and it desired to augment them with further facts -- facts that it viewed as undisputed and which were neither inconsistent with nor contradictory to those contained in the movants' Local Rule 311.12 statement. The local rule, as it existed at that time, did not require those *additional* facts to be presented in a particular form. [3] Because those additional facts were supported by **[**9]** the record, the **[*16]** lower court should have considered them (while at the same time accepting the facts set forth in the movants' Local Rule 311.12 statement). Its failure to do so constituted error.

III

This error does not necessarily require reversal. After all, ***HN4***[] we afford de novo review to orders granting or denying summary judgment. *Podiatrist Ass'n, Inc. v. La Cruz Azul de P.R., Inc., 332 F.3d 6, 13 (1st Cir. 2003)*; *Garside v. Osco Drug, Inc., 895 F.2d 46, 48 (1st Cir. 1990)*. And, moreover, we are not wedded to the trial court's reasoning, but, rather, may sustain its decree on any ground made manifest in the record. *Houlton Citizens' Coalition v. Town of Houlton, 175 F.3d 178, 184 (1st Cir. 1999)*. Consequently, we undertake an examination of the full summary judgment record **[**10]** in order to assess the supportability of the lower court's order. *Accord Rathbun v. AutoZone, Inc., 361 F.3d 62, 70-80 (1st Cir. 2004)* (proceeding in this manner).

A

HN5[] Section 1 of the Sherman Act prohibits "every contract, combination . . . or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. There are two prerequisites for a successful section 1 claim. First, there must be concerted action. *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*; *Podiatrist Ass'n, 332 F.3d at 12*. Second, the actors' agreement must involve either restrictions that are per se illegal or restraints of trade that fail scrutiny under the rule of reason. *Monsanto, 465 U.S. at 761*; *Podiatrist Ass'n, 332 F.3d at 12*.

In this instance, the plaintiff's case hinges on the interposition of what is alleged to be an illegal vertical restraint. ***HN6***[] A vertical restraint is a restraint of trade involving a combination of persons at different levels of the market structure. *See M & H Tire Co. v. Hoosier Racing Tire Corp., 733 F.2d 973, 978 (1st Cir. 1984).* **[**11]** While vertical restraints "may reduce intrabrand competition by limiting the number of sellers of a particular product, competing for a given group of buyers, they also promote interbrand competition by allowing a manufacturer to achieve certain efficiencies in the distribution of its products." *Id.* (quoting *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131 (2d Cir. 1978)* (en banc)). Thus, vertical restraints often have both pro-competitive and anti-competitive effects. For this reason, such restraints generally are not deemed per se illegal, but, rather, are tested under a rule of reason

---

[3] The current iteration of this obligation, codified in Local *Rule 56(c)*, is worded somewhat differently. We take no view as to what that language requires. *See supra* note 1.

analysis. *See* Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988).

HN7[] Vertical price-fixing agreements, however, are a special subset of vertical restraints. As such, they qualify for different treatment. A vertical price-fixing agreement that establishes a minimum price normally is regarded as a naked restraint of trade and, thus, as illegal per se. *See* Business Elecs. Corp., 485 U.S. at 724; Dr. Miles Med. Co. v. John D. Park & Sons Co., 220 U.S. 373, 404-09, 55 L. Ed. 502, 31 S. Ct. 376 (1911); *cf.* State Oil Co. v. Khan, 522 U.S. 3, 22, 139 L. Ed. 2d 199, 118 S. Ct. 275 (1997) **[**12]** (holding that a maximum vertical price maintenance scheme is not per se illegal).

Here, the district court concluded that the plaintiff had not adduced enough evidence to sustain a viable section 1 claim under either theory. Euromodas, 253 F. Supp. 2d at 205-06. **HN8**[] We must examine this conclusion in light of the full summary judgment record. *See supra* Part II. In carrying out that task, we remain cognizant **[*17]** that the proper office of summary judgment is to pierce the boilerplate of the pleadings and assess the proof in order to determine the need for a trial. Wynne v. Tufts Univ. Sch. of Med., 976 F.2d 791, 793-94 (1st Cir. 1992). It follows that summary judgment is appropriate only if "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed. R. Civ. P. 56(c).

HN9[] In sifting the evidence, we must array it in the light most hospitable to the party opposing summary judgment (here, the plaintiff), indulging all reasonable **[**13]** inferences in that party's favor. [4] Houlton Citizens' Coalition, 175 F.3d at 184; Garside, 895 F.2d at 48. To avoid summary judgment, the evidence upon which the nonmovant relies to create a genuine issue of material fact must be "significantly probative," not merely colorable. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249-50, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986).

In addition to these familiar principles, **HN11**[] a special constraint applies in vertical restraint cases. Antitrust liability is strong medicine (for example, it exposes a defendant to treble damages, *see* 15 U.S.C. § 15), and thus section 1 of the Sherman Act has been authoritatively interpreted **[**14]** to limit the inferences that may be drawn from ambiguous evidence. Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). In a vertical restraint case, [5] conduct that is "as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.* This means that a section 1 antitrust case predicated upon an alleged vertical restraint can survive summary judgment only if the evidence relied upon by the nonmovant, when viewed through this specially-constructed lens, suffices to show a "bona fide dispute about a fact that has the potential of affecting the outcome of the case under the applicable law." Podiatrist Ass'n, 332 F.3d at 13.

[15]** **HN12**[] To create a trialworthy issue in a vertical restraint case brought pursuant to section 1 of the Sherman Act, a plaintiff must make two showings: concerted action and harm to the competitive process. *See* id. at 12. The plaintiff cannot make either of these showings here.

We need not go beyond the first prong of this two-part test. **HN13**[] To satisfy that requirement, there "must be evidence that tends to exclude the possibility of independent action by the manufacturer and distributor." Monsanto, 465 U.S. at 764. Phrased another way, there must be "direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Id.* (citation and internal quotation marks omitted). This makes perfect sense: section 1 is not

---

[4] **HN10**[] The fact that the plaintiff had cross-moved for summary judgment does not alter this methodology. In that circumstance, a reviewing court examines each motion independently, applying the principles articulated above. *See* Blackie v. Maine, 75 F.3d 716, 721 (1st Cir. 1996).

[5] It is abundantly clear that this special constraint -- limiting inferences from ambiguous evidence -- applies in vertical restraint cases. *See, e.g.*, Monsanto, 465 U.S. at 763-64. The proposition may be less clear in horizontal conspiracy contexts, but we need not probe that distinction here.

intended to prohibit entrepreneurial action, and a manufacturer, acting independently, ordinarily has a right to **[*18]** sell (or not to sell) to whichever customer(s) it chooses. *See id. at 761*; *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)*. Thus, absent a showing of concerted action, a *section 1* **[**16]** claim fails as a matter of law.

B

The basic premise of the plaintiff's complaint is that a manufacturer (Zanella) and a dealer (Clubman) conspired to maintain an artificially high retail price for Zanella pants; and that Clubman, to further this scheme, successfully pressured Zanella to stop selling goods to its price-cutting competitor (Euromodas). The question is whether these averments, on the facts of record and under the applicable legal standards, add up to a potential antitrust violation.

As a threshold matter, the plaintiff suggests that we should answer this question in the affirmative because the defendants failed to provide any evidence negating the possibility that they were acting in combination. Appellant's Br. at 32. We reject this resupinate reasoning. ***HN14***[] In an antitrust case, the burden is on the accuser to make at least a prima facie showing of concerted action. *See Monsanto, 465 U.S. at 763*; *Garment Dist., Inc. v. Belk Stores Servs., Inc., 799 F.2d 905, 911 (4th Cir. 1986)*. Thus, we inquire whether the plaintiff has presented evidence that reasonably tends to prove that the manufacturer and others conspired to achieve an **[**17]** illicit objective. *Monsanto, 465 U.S. at 764*.

We start this phase of our inquiry by rehearsing the facts that were deemed admitted for purposes of summary judgment. *See Corrada Betances v. Sea-Land Serv., Inc., 248 F.3d 40, 43-44 (1st Cir. 2001)* (discussing effect of failure to controvert facts contained in movant's statement of material facts not in dispute); *Ruiz Rivera, 209 F.3d at 28* (similar). Both Clubman and the plaintiff sell men's clothing at retail in San Juan. Historically, their wares included Zanella trousers. In mid-1996, Clubman informed Zanella that the plaintiff had sold trousers to a common customer at a sharply discounted price. A face-to-face conversation between officials of Zanella and officials of the plaintiff regarding Clubman's complaints occurred in July of 1996. The next year, Clubman again expressed concern to Zanella about the plaintiff's persistent discounting. Despite Clubman's obvious unhappiness, Zanella continued to supply the plaintiff. Clubman placed no further orders for Zanella pants.

Zanella kept up a dialogue with Clubman during this period of abstinence. At a meeting in New York, held in **[**18]** September of 1997, Zanella informed the plaintiff that Clubman had agreed to create "Zanella corners" in its stores. Although Zanella expressed enthusiasm about this concept, pricing policies were not discussed. In or around April of 1998, however, Zanella told the plaintiff that it would no longer sell to it. Zanella gave no reason for this exclusionary decision. Clubman proceeded to resume the marketing of Zanella trousers and to inaugurate the "Zanella corners."

To these facts we must add the augmentative evidence assembled by the plaintiff. In a deposition, Clubman's chief executive officer (German Ramirez) testified that he had resolved not to handle Zanella pants in the future unless Zanella satisfactorily addressed his concerns about being undersold by the plaintiff. Ramirez discussed this resolve with Zanella's president (Armando DiNatale) and received assurances that Zanella would "take care of" the problem. Ramirez professed neither to know nor to care how Zanella intended to proceed or what action it purposed to take. **[*19]** The plaintiff sees this as "smoking gun" testimony. It asks us to interpret Ramirez's words as showing that Clubman was seeking to have Zanella cut off its **[**19]** (the plaintiff's) supply of Zanella trousers and terminate the preexisting distribution relationship.

The plaintiff also places substantial weight on the testimony of a Zanella vice-president (Thomas Cohan), which corroborates the fact that Clubman threatened to stop buying Zanella pants unless Zanella addressed Clubman's concerns about the plaintiff's pricing practices. Cohan's testimony does not, however, go anywhere near as far as the plaintiff suggests. We have scoured the deposition transcript and find no support for the plaintiff's brazen assertion that Cohan's testimony "confirmed that Zanella and Clubman agreed that Euromodas be terminated in order to allow Clubman to maintain its preferred price of $ 265 [per pair of trousers]." Appellant's Br. at 38.

The plaintiff also relies, to some extent, on DiNatale's deposition testimony. Without question, that testimony shows that Zanella made no bones about its intention to halt trouser sales to the plaintiff. It also supports a clear inference that, when pressed, Zanella opted to do business with the larger retailer (Clubman) rather than to jeopardize that relationship by continuing to deal with the plaintiff. But DiNatale, like **[**20]** Cohan, made no mention of wanting to maintain a particular price or price level, and the deposition, taken as a whole, does not evince concerted action.

These facts leave room for many inferences, which -- to the extent that they are reasonable -- ordinarily would be taken in favor of the plaintiff. *See* *Podiatrist Ass'n, 332 F.3d at 13*. ***HN15***[] In Sherman Act cases, however, the permissible inferences that can be drawn from ambiguous evidence are quite limited. *Matsushita Elec., 475 U.S. at 588*. If the evidence shows conduct that is as consistent with lawful competition as it is with an illicit conspiracy, it cannot be said to support an inference of concerted action. *Id.*

So it is here. The record, read as favorably to the plaintiff as ***antitrust law*** and summary judgment practice permit, shows that Clubman complained bitterly to Zanella about the plaintiff's low prices, and that Zanella reassured Clubman that it would, in some unarticulated manner, "take care of" the situation (i.e., the price-cutting issue). There is nothing, however, that reflects a commitment on Zanella's part to a minimum retail price maintenance scheme or that suggests that Zanella's **[**21]** reassurances were anything more than an acknowledgment of its unilateral decision to stop supplying the plaintiff. ***HN16***[] The raw fact that a distributor's actions are an attempt to pressure a manufacturer into terminating a distribution relationship with a price-cutting competitor is not enough either to show concerted action or to defeat summary judgment. *See* *Garment Dist., 799 F.2d at 911*.

This case is not unique. Other courts consentiently have held that ***HN17***[] the fact that a dealer was terminated in response to complaints from competing dealers is insufficient, without more, to survive a motion for summary judgment. *See*, *e.g.*, *Winn v. Edna Hibel Corp., 858 F.2d 1517, 1520 (11th Cir. 1988)*; *Garment Dist., 799 F.2d at 908*; *Burlington Coat Factory Warehouse Corp. v. Esprit De Corp., 769 F.2d 919, 923-24 (2d Cir. 1985)*; *see also* *Monsanto, 465 U.S. at 763-64* (explaining that "something more than evidence of complaints is needed"). The policy justification for this rule is powerful. To allow "the inference of concerted action on the basis of receiving complaints alone and thus to expose the defendant to **[**22]** treble damage liability would both inhibit management's **[*20]** exercise of its independent business judgment and emasculate the terms of the statute." *Monsanto, 465 U.S. at 764* (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 n.2 (3d Cir. 1980))*. Thus, even were we to assume for argument's sake that Zanella's termination of its distribution relationship with the plaintiff was in direct response to Clubman's withdrawal of its patronage, summary judgment would nonetheless be warranted. *See* *Winn, 858 F.2d at 1520* (stating that "a manufacturer may legitimately respond to pressure from a dealer in order to avoid losing that dealer's business").

The plaintiff strives to deflect the force of this reasoning in two ways: (i) by seeking refuge in a pair of Eleventh Circuit cases, and (ii) by pointing to the fact that Zanella never advanced any alternative explanation for severing ties with the plaintiff. Neither foray succeeds.

The Eleventh Circuit's decision in *Helicopter Support Systems, Inc. v. Hughes Helicopter, Inc., 818 F.2d 1530 (11th Cir. 1987)*, provides no shelter for the plaintiff. Although the **[**23]** court of appeals vacated summary judgment in favor of the manufacturer-defendant in that antitrust case, the evidence was appreciably different. There was proof that the manufacturer terminated a price-cutter, informed the complaining distributor of the termination, and requested that it advise the manufacturer if it learned about any further price-cutters. *Id. at 1535*. The complaining distributor responded by thanking the manufacturer in a way that the court believed reasonably could be viewed as an agreement to report future violations. *See id.* Last -- but far from least -- the surviving distributorship agreement itself contained language that reasonably could be read as fixing the resale price of the goods. *Id. at 1536*. Given these idiosyncratic facts, the Eleventh Circuit's decision that the case presented a trialworthy issue, *id. at 1536-37*, is unhelpful here.

The plaintiff's reliance on *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548 (11th Cir. 1998)*, is equally mislaid. In that antitrust case, the court overturned the entry of summary judgment in favor of one of the defendants because its former **[**24]** chief executive had admitted an involvement "in fixing chlorine prices in the [relevant market area]." *Id. at 557*; *see also id. at 568*. The court overturned the entry of summary judgment as to two other defendants based on its determination that certain expert testimony and data precluded summary judgment. *Id. at 569*. The record before us contains neither an analogous admission of illegal activity nor any comparable expert testimony or data. Accordingly, that decision too is inapposite.

The plaintiff's second foray is no more rewarding. It is true that alternative explanations sometimes are cited as a basis for finding the existence of substantial evidence supporting a plausible and legitimate reason for the conduct of antitrust defendants. *See*, *e.g.*, *Burlington Coat, 769 F.2d at 923-24*. There is no flat rule, however, that requires a defendant to proffer an alternative explanation. In some instances, the facts speak for themselves.

This is such a case. The most natural inference from the evidence -- that the manufacturer took sides as between two dealers and chose the more lucrative of them -- makes manifest **[**25]** a legitimate, independent reason for terminating the less desirable distribution relationship. *See Garment Dist., 799 F.2d at 910-11*. Any other inference necessarily would require building an antitrust claim on ambiguous evidence -- a practice that the Supreme Court has forbidden. *See Matsushita, 475 U.S. at 588* (warning that conduct that is equally consistent with permissible **[*21]** competition and with illegal activity cannot "support an inference of antitrust conspiracy"). Because the plaintiff failed to provide any significantly probative evidence tending to negate this legitimate business reason, the lack of an alternative explanation is irrelevant.

That ends this aspect of the matter. The plaintiff has charged price-fixing, impure and simple -- and the utter absence of meaningful evidence of concerted action dooms the plaintiff's case.

C

Although we need go no further, we add a coda. Even were we to find significantly probative evidence of concerted action (which we do not), the fabric of the plaintiff's case reveals yet another flaw. For the sake of completeness, we mention this shortcoming.

HN18[] An agreement to terminate a price-cutter to placate **[**26]** another dealer does not constitute a per se violation of *section 1 of the Sherman Act*. *See Business Elecs. Corp., 485 U.S. at 726-27*. To render such an agreement illegal per se, there must be "a further agreement on the price or price levels to be charged by the remaining dealer." *Id. at 726*. Without an agreement as to a specific minimum price or price level, a vertical restraint is unlawful only if it fails a rule of reason analysis. *Id. at 726-27*; *Bi-Rite Oil Co. v. Indiana Farm Bureau Coop. Ass'n, Inc., 908 F.2d 200, 203 (7th Cir. 1990)*.

There is no evidence here that the defendants ever agreed on either a minimum price or price level. Thus, the plaintiff's claim of per se illegality founders. *See Business Elecs. Corp., 485 U.S. at 726-27*; *A-Abart Elec. Supply, Inc. v. Emerson Elec. Co., 956 F.2d 1399, 1403 (7th Cir. 1992)*; *see also* Hovenkamp, *supra* § 11.1, at 441.

This leaves the rule of reason. ***HN19***[] In a vertical restraint case, liability under that approach requires a showing of harm to the competitive process. *See Interface Group, Inc. v. Mass. Port Auth., 816 F.2d 9, 10 (1st Cir. 1987)* **[**27]** (clarifying that the term unreasonable anticompetitive conduct, when used in an antitrust context, necessarily refers "to actions that harm the competitive process").

Here, the plaintiff has made no showing that the putative restraint had an adverse impact on the competitive process. Although it tendered evidence of its own losses, an injury to an individual competitor is not the legal equivalent of an injury to competition in the relevant market. *Id.* Without any evidence that the defendants' actions were inimical to the competitive process, the plaintiff -- who had the burden of proof on this point, *see Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* -- cannot make out at a trialworthy claim under *section 1 of the Sherman Act*.

IV

We summarize succinctly. [6] Although the district court took too narrow a glimpse of the summary judgment record, de novo review of the record as a whole persuades us that there is no genuine issue as to any material fact and that the defendants are entitled to judgment as a matter **[*22]** of law. There is no rational view of the proffered facts that can support the imposition of antitrust liability. **[**28]**

***Affirmed*.**

End of Document

[6] Because we have upheld the entry of summary judgment for the defendants, it would be an empty exercise to probe the circumstances surrounding the denial of the plaintiff's cross-motion for summary judgment. We caution, however, that we express no opinion on the district court's reasoning in that regard. *See Euromodas, 253 F. Supp. 2d at 204 n.5*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] Standards of Review, De Novo Review

The motion alleging a failure of a complaint to state a claim upon which relief can be granted, pursuant to Tenn. R. Civ. P. 12.02(6), challenges the legal sufficiency of a complaint. An appellate court must construe the complaint liberally, presume all factual allegations to be true and give the plaintiff the benefit of all reasonable inferences. A complaint should be dismissed only if it appears that the plaintiff can prove no set of facts in support of its claim that would entitle it to relief. The court's review is de novo with no presumption of correctness attaching to the trial court's judgment because the question before the appellate court is one of law.

HN5[] Monopolies & Monopolization, Attempts to Monopolize

Section 1 of the Sherman Act makes contracts, combinations, and conspiracies in restraint of trade or commerce among the several states illegal. 15 U.S.C.S. § 1. Similarly, § 2 of the Act prohibits monopolies and conspiracies to monopolize any part of the trade or commerce among the several states. 15 U.S.C.S. § 2. Consequently, there is an interstate commerce jurisdictional requirement under the Act. Just as actions under federal antitrust statutes can proceed only if there is a jurisdictional basis in interstate commerce, a plaintiff seeking relief under state antitrust statutes must show that those statutes apply, whether such a showing is required to establish subject matter jurisdiction or simply to state a claim.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Constitutional Law > Supremacy Clause > General Overview

Transportation Law > Intrastate Commerce

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

As a general rule, federal ***antitrust law*** does not preempt state ***antitrust law***. Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies. And on several prior occasions, courts have recognized that the federal antitrust laws do not pre-empt state law. The interstate versus intrastate commerce issue is only raised as a defense where it is arguable that a particular state has limited the scope of its antitrust statute by imposing a greater connection with or impact upon commerce within the state than is the general constitutionally required standard. Apparently, only a few states fall in that category; Tennessee is one. Thus, it is not federal law that determines whether Tennessee has jurisdiction under the Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101 et seq.* (2001). Rather, it is state law that determines what degree of connection with or impact upon commerce within the state must exist.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] **Regulated Practices, Trade Practices & Unfair Competition**

Tennessee's antitrust statute, the Tennessee Trade Practices Act (TTPA), *Tenn. Code Ann. § 47-25-101 et seq.* (2001), is not limited to anticompetitive conduct occurring within the boundaries of the state. It is not limited to transactions between the parties that are predominantly intrastate in character. Neither a transaction-based nor a locality-of-illegal-conduct based test is appropriate for determining the scope of the TTPA. Instead, the proper test must relate to the potential effect or impact on commerce within Tennessee of the illegal acts condemned by the statute because such a standard is directly related to the purpose of the TTPA. The "predominantly intrastate" test has been rejected, finding that the legislature did not intend to limit the application of the statute geographically other than the effect on competition and prices in Tennessee. Instead, the TTPA applies to illegal conduct that substantially affects commerce within Tennessee. Indirect purchasers are "persons" who may bring an action for an injury caused by a violation of the TTPA.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN8[] **Regulated Practices, Trade Practices & Unfair Competition**

Sherwood is authority for the proposition that indirect purchasers may recover under the Tennessee Trade Practices Act (TTPA), *Tenn. Code Ann. § 47-25-101 et seq.* (2001). Sherwood does not extend the purview of the TTPA to cover those indirect purchasers who are not Tennessee consumers, i.e., those consumers who did not consume or purchase their products in transactions within the state of Tennessee. The TTPA applies to anticompetitive conduct that decreases competition in or increases the price of goods paid by consumers in Tennessee.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN9[] Regulated Practices, Trade Practices & Unfair Competition

The sole object and purpose of the enactment of the Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101 et seq.* (2001), was to correct and prohibit abuses of trade within the state.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN10[] Regulated Practices, Trade Practices & Unfair Competition

A claimant cannot rely upon the claims of other unidentified individuals and entities to establish subject matter jurisdiction for itself under the Tennessee Trade Practices Act, *Tenn. Code Ann. § 47-25-101 et seq.* (2001).

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN11[] Standards of Review, Abuse of Discretion

The decision whether to grant or deny a motion for class certification rests within the sound discretion of a trial court. Accordingly, an appellate court will not reverse a trial court's denial of class certification unless the party seeking certification has demonstrated an abuse of that discretion.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > General Overview

HN12[] Class Actions, Prerequisites for Class Action

A party seeking class certification has the burden of proving that the prerequisites set forth in Tenn. R. Civ. P. 23.01 have been satisfied.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN20[] **Types of Contracts, Quasi Contracts**

The Tennessee Supreme Court has never required that a plaintiff confer a direct benefit on a defendant before proceeding with its claim for unjust enrichment.

Counsel: John S. Bingham, Kingsport, Tennessee, for the appellant, Freeman Industries LLC.

William T. Gamble, Kingsport, Tennessee, and Thomas Demitrack, Cleveland, Ohio, for the appellee, Eastman Chemical Company.

S. Morris Hadden, **[*2]** Kingsport, Tennessee, for the appellees, Hoechst Aktiengesellschaft; Nutrinova Nutrition Specialties & Food Ingredients, GmbH; Daicel Chemical Industries, Ltd.; and Nippon Gohsei Industries, Ltd (Michael D. Blechman and Jennifer B. Patterson, New York, New York, of counsel for the appellees, Hoechst Aktiengesellschaft and Nutrinova Nutrition Specialties & Food Ingredients, GmbH; Herbert S. Washer and Jennifer Wendy, New York, New York, of counsel for the appellee, Daicel Chemical Industries, Ltd.; Eugene Illovsky and Peter Stern, Walnut Creek, California, of counsel for the appellee, Nippon Gohsei Industries, Ltd.).

Judges: CHARLES D. SUSANO, JR., J., delivered the opinion of the court, in which HERSCHEL P. FRANKS, P.J., E.S., and GARY R. WADE, SP. J., joined.

Opinion by: CHARLES D. SUSANO, JR.

Opinion

In this antitrust case, Freeman Industries LLC ("Freeman") sued Eastman Chemical Company ("Eastman") and others for damages, alleging that the defendants engaged in the illegal price-fixing of sorbates, a generic label for several food preservatives. Freeman, who purchased products containing sorbates from entities in New York State, brought suit **[*3]** under the Tennessee Trade Practices Act ("the TTPA") and pursuant to a theory of unjust enrichment. In addition, Freeman sought class certification for all other individuals and entities similarly situated in thirty-five states, including New York, but, significantly, not including the state of Tennessee. Following a hearing on the defendants' motion to dismiss, the trial court granted the motion with respect to the TTPA claim, holding that the TTPA does not apply to indirect purchasers or out-of-state transactions. At a subsequent hearing, the trial court denied Freeman's motion for class certification; and also denied the defendants' motion for summary judgment on Freeman's unjust enrichment claim. Both sides appeal. Because we find that the trial court reached a conclusion that is contrary to the decision of this court in the case of ***Sherwood v. Microsoft Corp****., 2003 Tenn. App. LEXIS 539, No. M2000-01850-COA-R9-CV, 2003 WL 21780975 (Tenn. Ct. App. M.S., filed July 31, 2003)* (Tenn. R. App. P. 11 application pending) - which decision was released after the trial court rendered its decision - we modify the trial court's judgment by deleting that **[*4]** portion of the court's decision holding the TTPA does not apply to indirect purchasers. In all other respects, we affirm the trial court's judgment.

I.

Freeman is a New York corporation, whose principal place of business is in Tuckahoe, New York. It is an end-user of food products such as cheese, bagels, and baked goods that contain minute amounts of food preservatives generically known as sorbates. Freeman purchases its food products at supermarkets in New York State.

In its business, Freeman produces and sells products such as vitamin A and D concentrates to, among others, food processors. In connection with its business, Freeman makes direct purchases of sorbates. However, Freeman does not premise its right of recovery in the instant case on such direct purchases; rather it relies upon its indirect purchases from supermarkets in its role as an end-user.

Eastman is a Delaware corporation with its principal place of business in Kingsport. The other defendants are two German corporations and two Japanese corporations. All of the defendants are producers of sorbates. They sell sorbates to distributors or directly to food manufacturers.

Between 1998 and 2001, all of the **[*5]** defendants pled guilty to fixing the price of sorbates, in violation of *Section 1 of the Sherman Antitrust Act*. [1] Subsequent to the entry of their guilty pleas, the defendants settled with a nationwide class of direct purchasers under federal law. In addition, the defendants settled lawsuits filed by indirect purchasers in fourteen states, *including Tennessee*, and the District of Columbia. [2]

On January 31, 2002, Freeman filed this class action lawsuit on behalf of itself and all similarily-situated individuals and entities in thirty-five other states, [3] who, after January 1, 1979, purchased products containing sorbates from entities other than the defendants. Such purchasers are referred to as "indirect purchasers" because they do not purchase sorbates **[*6]** directly from the defendants, but rather purchase products containing sorbates from others who are lower down in the distribution chain. Freeman premised its lawsuit on dual theories: (1) that the defendants violated the TTPA, codified at *Tenn. Code Ann. § 47-25-101, et seq.*, by selling sorbates from Tennessee into the states where Freeman and the putative class members make or made their purchases from others; and (2) that the defendants were unjustly enriched by virtue of the fact that Freeman and the putative class members are or were forced to pay inflated prices for sorbates.

The defendants filed a motion to dismiss Freeman's **[*7]** complaint. Following a hearing, the trial court granted the defendant's motion with respect to the TTPA, concluding that the act does not apply to transactions outside of Tennessee and does not apply to indirect purchasers.

The trial court then held a second hearing, this time with respect to Freeman's motion for class certification and the defendants' motion for summary judgment on Freeman's unjust enrichment claim. The trial court refused to certify the class, holding that Freeman could not satisfy some of the requisite elements under Tenn. R. Civ. P. 23. The court also determined that the defendants were not entitled to summary judgment on Freeman's unjust enrichment claim. This appeal followed.

II.

---

[1] *15 U.S.C. § 1 (1997)*.

[2] The fourteen states are as follows: Arizona, California, Kansas, Maine, Michigan, Minnesota, Mississippi, New Mexico, North Carolina, North Dakota, South Dakota, *Tennessee*, West Virginia, and Wisconsin.

[3] The states involved are Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Massachusetts, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Vermont, Virginia, Washington, and Wyoming.

The TTPA provides, in pertinent part, as follows:

> *Tenn. Code Ann. § 47-25-101 (2001)*
>
> **HN1**[] All arrangements, contracts, agreements, trusts, or combinations between persons or corporations made with a view to lessen, or which tend to lessen, full and free competition in the importation or sale of articles imported *into this state*, or in the manufacture or sale of articles of *domestic* growth or of *domestic* raw material, and all arrangements, contracts, agreements, **[*8]** trusts, or combinations between persons or corporations designed, or which tend, to advance, reduce, or control the price or the cost to the producer or the consumer of any such product or article, are declared to be against public policy, unlawful, and void.
>
> *Tenn. Code Ann. § 47-25-102 (2001)*
>
> **HN2**[] Any arrangements, contracts, and agreements that may be made by any corporation or person, or by and between its agents and subagents, to sell and market its products and articles, manufactured *in this state*, or imported *into this state*, to any producer or consumer at prices reduced below the cost of production or importation *into this state*, including the cost of marketing, and a reasonable and just marginal profit, to cover wages or management, and necessary incidentals, as is observed in the usual course of general business, and the continuance of such practice under such contracts and arrangements for an unreasonable length of time, to the injury of full and free competition, or any other arrangements, contracts, or agreements, by and between its agents and subagents, which tend to lessen full and free competition in the sale of all such articles manufactured and imported **[*9]** *into the state*, and which amount to a subterfuge for the purpose of obtaining the same advantage and purposes are declared to be against public policy, unlawful, and void.
>
> *Tenn. Code Ann. § 47-25-106 (2001)*
>
> **HN3**[] Any person who is injured or damaged by any such arrangement, contract, agreement, trust, or combination described in this part may sue for and recover, in any court of competent jurisdiction, from any person operating such trust or combination, the full consideration or sum paid by the person for any goods, wares, merchandise, or articles, the sale of which is controlled by such combination or trust.

(Emphasis added).

III.

A.

Both parties raise issues on appeal. Freeman argues that the trial court erred in dismissing its TTPA claim because, according to Freeman, the TTPA applies to indirect purchasers who are out-of-state residents or entities. Further, Freeman contends that the trial court abused its discretion in denying the motion for class certification with respect to Freeman's claim of unjust enrichment. On the other hand, the defendants argue that the trial court erred in refusing to grant them summary judgment on Freeman's unjust enrichment **[*10]** claim. We will address these issues in turn.

B.

As previously stated, the trial court granted the defendants' motion to dismiss Freeman's TTPA claim. The defendants' motion was premised on **HN4**[] the failure of the complaint to state a claim upon which relief can be granted. *See Tenn. R. Civ. P. 12.02(6)*. "Such a motion challenges the legal sufficiency of the complaint." ***Trau-Med of Am., Inc. v. Allstate Ins. Co.**, 71 S.W.3d 691, 696 (Tenn. 2002)*. Our role on this appeal is clear. We "must construe the complaint liberally, presume all factual allegations to be true and give the plaintiff the benefit of all reasonable inferences." ***Id.*** A complaint should be dismissed only if "it appears that the plaintiff can prove no set of facts in support of [its] claim that would entitle [it] to relief." ***Cook v. Spinnaker's of Rivergate, Inc.**, 878 S.W.2d 934, 938 (Tenn. 1994)*. Our review is *de novo* with no presumption of correctness attaching to the trial court's judgment, ***Trau-Med**, 71 S.W.3d at 696-97,* because the question before us is one of law.

Freeman and the members of the putative class, by the limiting **[*11]** language of the complaint, are out-of-state residents and entities who purchased products containing sorbates in states other than Tennessee; in other words, Freeman and the others purchased products that contained sorbates from retailers or wholesalers, rather than purchasing sorbates directly from the defendants who originally produced the food preservatives. The sole connection of Freeman's claim to the state of Tennessee is the allegation that Eastman - who admittedly engaged in illegal conduct proscribed by the TTPA - engaged in that conduct in, and shipped sorbates from, Tennessee, into the states in which Freeman and the putative class members reside and where they engaged in the transactions about which they complain. Nevertheless, Freeman contends that the TTPA authorizes a recovery for indirect purchasers, such as itself and the members of the putative class, when the transactions occurred out-of-state, provided the defendants' misconduct "substantially affects" Tennessee commerce. Freeman asserts that the "defendants' price-fixing agreements were hatched in Tennessee" and that these agreements "substantially affected commerce [in Tennessee] because all sorbates sold inside **[*12]** and outside Tennessee were tainted" by the illegal agreements. In advancing this position, Freeman relies primarily upon the recent opinion of this court in the case of ***Sherwood v. Microsoft Corp.****, 2003 Tenn. App. LEXIS 539, No. M2000-01850-COA-R9-CV, 2003 WL 21780975 (Tenn. Ct. App. M.S., filed July 31, 2003)* (Tenn. R. App. P. 11 application pending). We agree that the ***Sherwood*** opinion is dispositive with respect to the TTPA claim asserted in Freeman's complaint. Because we find the ***Sherwood*** opinion, authored by Judge Patricia J. Cottrell, to be an excellent and exhaustive study of the evolution of ***antitrust law*** in this state and a correct interpretation of the TTPA, we will rely on ***Sherwood*** extensively in this opinion.

The plaintiffs in ***Sherwood*** were a class of *Tennessee* consumers who purchased - *in Tennessee* - Microsoft software. *2003 Tenn. App. LEXIS 539, [WL] at *1*. The plaintiffs alleged that Microsoft had violated the TTPA by "engaging in conduct that eliminated or retarded the development of new software products that could support or become alternative platforms to Microsoft's **[*13]** operating systems" and that the price of the software "was higher than it would have been in a competitive market." ***Id.*** The trial court found that the plaintiffs, indirect purchasers, had a cause of action under the TTPA. *2003 Tenn. App. LEXIS 539, [WL] at *2*.

Before addressing whether the TTPA applies to indirect purchasers, Judge Cottrell examined the evolution of both federal and state ***antitrust law***:

> *Section 1 of the Sherman Act* ***HN5***[] makes contracts, combinations, and conspiracies "in restraint of trade or commerce among the several States" illegal. *15 U.S.C. § 1*. Similarly, *Section 2 of the Act* prohibits monopolies and conspiracies to monopolize "any part of the trade or commerce among the several States." *15 U.S.C. § 2*. Consequently, there is an interstate commerce jurisdictional requirement under the Act. ***Summit Health, Ltd. v. Pinhas****, 500 U.S. 322, 111 S. Ct. 1842, [114 L. Ed. 2d 366] (1991)*.
> * * *
>
> Just as actions under federal antitrust statutes can proceed only if there is a jurisdictional basis in interstate commerce, a plaintiff seeking relief under state antitrust statutes **[*14]** must show that those statutes apply, whether such a showing is required to establish subject matter jurisdiction or simply to state a claim.
> * * *
>
> ***HN6***[] As a general rule, federal ***antitrust law*** does not preempt state ***antitrust law***. "Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies. And on several prior occasions, the Court has recognized that the federal antitrust laws do not pre-empt state law." ***Cal. v. ARC Am. Corp.****, 490 U.S. 93, 101-102, 109 S. Ct. 1661, 1666, 104 L. Ed. 2d 86 (1989)*.
> * * *
>
> The interstate versus intrastate commerce issue is only raised as a defense where it is arguable that a particular state has limited the scope of its antitrust statute by imposing a greater connection with or impact upon commerce within the state than is the general constitutionally required standard. Apparently, only a few states fall in that category; *Tennessee is one*.
> * * *

> Thus, it is not federal law that determines whether Tennessee has jurisdiction under the TTPA. . . . Rather, it is state law that determines what degree of connection with or impact upon commerce within the state must exist. **[*15]**

***Sherwood**, 2003 Tenn. App. LEXIS 539, 2003 WL 21780975, at *5-*9* (emphasis added).

The court then discussed the few Tennessee cases that have addressed the reach of the TTPA, beginning with ***Standard Oil Co. v. State**, 117 Tenn. 618, 100 S.W. 705 (1907)*. The defendants in ***Standard Oil*** were found guilty of conspiring to lessen the competition of coal oil sales in Tennessee, in violation of the TTPA. [4] ***Id.** at 706*. The defendants appealed, arguing that the antitrust statute was an unconstitutional attempt to regulate interstate commerce. ***Id.** at 709*. Specifically, the defendants contended that the statute's application to transactions involving "the importation of articles of commerce from other states" into Tennessee was a regulation of interstate commerce, which violated the United States Constitution. *See* *U.S. Const. art. I, § 8*. The Supreme Court disagreed, finding that the TTPA, "when properly construed, does not apply to interstate commerce." **[*16]** ***Standard Oil**, 100 S.W. at 709*. The Court went on to identify the sole purpose of the TTPA as "correcting and prohibiting abuses of trade *within the state*." ***Id.*** (emphasis added).

> The wrongs to trade which were intended to be corrected and punished were those being perpetrated against commerce *within the state*, which Congress could not reach, and for which there was then no efficient remedy.

***Id.** at 710* (emphasis added).

The Court of Appeals first addressed the present-day version of the TTPA in ***Lynch Display Corp. v. Nat'l Souvenir Ctr., Inc.**, 640 S.W.2d 837 (Tenn. Ct. App. 1982)*. Lynch was a Maryland corporation that agreed to lease wax figures to HRI, a Tennessee corporation **[*17]** that was operating a wax museum. ***Id.** at 839*. The lease contained a requirement that HRI enter into a franchising agreement with a District of Columbia corporation, NHM. ***Id.*** HRI subsequently stopped making payments to NHM under the franchise agreement. ***Id***. HRI then filed suit in federal court for a violation of federal ***antitrust law***. ***Id.*** Lynch filed suit in state court; HRI filed a counterclaim alleging that both the original lease agreement and the franchise agreement "were forced on HRI because of the monopoly position of Lynch," resulting in void agreements under the Tennessee antitrust statute. ***Id.*** This court, in agreeing with the trial court, found that the transactions of the parties exclusively involved interstate commerce, which did not trigger the state antitrust act. ***Id.** at 839, 840*. We opined that "the Tennessee ***antitrust law*** applies to transactions which are *predominantly* intrastate in character." ***Id.** at 840* (emphasis in original).

More recently, we addressed the TTPA in **[*18]** ***Blake v. Abbott Labs., Inc.**, 1996 Tenn. App. LEXIS 184, No.03A01-9509-CV-00307, 1996 WL 134947 (Tenn. Ct. App. E.S., filed March 27, 1996)*. The plaintiffs in ***Blake*** were Tennessee consumers who purchased infant formula in Tennessee. *1996 Tenn. App. LEXIS 184, [WL] at *1*. They sued the defendant, an out-of-state company, for "grossly overcharging" the plaintiffs for the formula. ***Id.*** This court, in reaffirming the "predominantly intrastate" test set forth in ***Lynch***, determined that there were insufficient facts to make a determination as to whether the transactions involved in the case predominantly affected interstate commerce rather than intrastate commerce. *1996 Tenn. App. LEXIS 184, [WL] at *5*. Consequently, the court held that the case should not have dismissed under Tenn. R. Civ. P. 12. ***Id.***

After further analyzing the TTPA as interpreted by courts in other states, the ***Sherwood*** court held as follows:

> We conclude that ***HN7***[] Tennessee's antitrust statute is not limited to anticompetitive conduct occurring within the boundaries of the state. **[*19]** We also conclude that it is not limited to transactions between the parties that are predominantly intrastate in character. We also conclude that neither a transaction-based nor a locality-of-illegal-conduct based test is appropriate for determining the scope of the TTPA. Instead, the proper test must relate to the potential effect or impact on commerce *within this state* of the illegal acts condemned by the statute because such a standard is directly related to the purpose of the Act.

---

[4] While the statute as it existed in 1907 was not known as the TTPA, the essential language of the statute has not changed since that time. Therefore, for ease of reference while discussing Standard Oil, we will refer to the statute as the TTPA.

2003 Tenn. App. LEXIS 539, [WL] at *17 (emphasis added). The court went on to reject the "predominantly intrastate" test, holding that "we simply cannot conclude that the legislature intended to limit the application of the statute geographically *other than the effect on competition and prices in Tennessee*." 2003 Tenn. App. LEXIS 539, [WL] at *20 (emphasis added). Instead, the court determined that the TTPA applies "to illegal conduct that substantially affects commerce *within this state*." 2003 Tenn. App. LEXIS 539, [WL] at *21. The court then concluded that the plaintiffs had "sufficiently alleged substantial effects on commerce within **[*20]** this state" in order to sustain a claim under the TTPA. 2003 Tenn. App. LEXIS 539, [WL] at *22. After making the determination that the plaintiffs had passed the "substantial effects" test, the court proceeded to hold that "indirect purchasers are 'persons' who may bring an action for an injury caused by [a] violation of the TTPA." 2003 Tenn. App. LEXIS 539, [WL] at *29.

In the instant case, Freeman argues that it and the putative class members, as indirect purchasers of sorbates, have standing to bring suit against the defendants under the TTPA based upon the holding in ***Sherwood***. While we agree with Freeman that ***HN8***[] ***Sherwood*** is authority for the proposition that *indirect* purchasers may recover under the TTPA, ***Sherwood*** does not extend the purview of the TTPA to cover those indirect purchasers who are not Tennessee consumers, *i.e.*, those consumers who did not consume or purchase their products in transactions within the state of Tennessee. Freeman and the putative class members are all residents of other states, and all of their purchases of products containing sorbates occurred outside of Tennessee. **[*21]** There is simply no caselaw, nor is there an interpretation of the TTPA, that would allow this statutory scheme to be relied upon in such a situation.

Throughout the ***Sherwood*** opinion, there are repeated references to the effects on commerce within the state. The court specifically held that the TTPA applies to "anticompetitive conduct that decreases competition in or increases the price of goods paid by consumers *in Tennessee*," 2003 Tenn. App. LEXIS 539, [WL] at *16 (emphasis added), and concluded that the Tennessee legislature did not intend to "limit the application of the statute geographically *other than the effect on competition and prices in Tennessee*." 2003 Tenn. App. LEXIS 539, [WL] at *20 (emphasis added). The plaintiffs in ***Sherwood*** were Tennessee consumers who purchased Microsoft software in Tennessee. 2003 Tenn. App. LEXIS 539, [WL] at *1. Even though Microsoft was a corporation that clearly engaged in significant interstate commerce, the fact that its software was sold in Tennessee supported a finding that Microsoft's anticompetitive conduct "substantially affected" Tennessee commerce, *i.e.*, **[*22]** transactions in Tennessee involving the ***Sherwood*** plaintiffs. 2003 Tenn. App. LEXIS 539, [WL] at *22.

In the instant case, the indirect purchase of sorbates by out-of-state residents in states other than Tennessee cannot be characterized as *Tennessee* commerce that has been substantially affected by the anticompetitive conduct alleged in this case. The TTPA simply was not designed to protect such out-of-state transactions involving non-Tennessee based consumers. As the Tennessee Supreme Court stated in ***Standard Oil***, ***HN9***[] "the sole object and purpose of the enactment of [the TTPA] was to correct and prohibit abuses of trade *within the state*." ***Id.*** at 709 (emphasis added).

Freeman strenuously argues that the defendants' illegal conduct occurred in Tennessee and that this conduct - in Freeman's words - "substantially affected commerce [in Tennessee] because all sorbates sold inside and outside Tennessee were tainted." It contends that their "substantially affected commerce" allegation is sufficient to place their complaint within the ambit of the TTPA and therefore sufficient to avoid dismissal at this juncture in the proceedings. **[*23]** It is true that "substantially affected commerce" within this state gives rise to a claim *for an appropriate plaintiff* under the TTPA; but *all* of the claims which could have been pursued based on *such* transactions - be they associated with direct or indirect purchasers - *have been settled in earlier litigation*. Freeman's complaint expressly refers to transactions that occurred outside the state of Tennessee. It does not seek to claim *any* transactions in Tennessee and the class sought to be certified is expressly limited to indirect purchasers whose transactions were outside this state. Freeman cannot rely upon the transactions of others, all of whose claims have been settled. As we clearly indicated in ***Sherwood***, ***HN10***[] a claimant cannot rely upon the claims of other unidentified individuals and entities to establish subject matter jurisdiction for itself under the TTPA. *See* ***Sherwood***, 2003 Tenn. App. LEXIS 539, 2003 WL 21780975, at *4 ("Plaintiffs argue that since Microsoft has stated that virtually all its sales are through middlemen, there is some possibility that there may have been some direct sales to some unknown Tennesseans. **[*24]** *However, Plaintiffs have made no such claim themselves. The named plaintiffs cannot rely on unidentified persons who may have suffered an injury to state a claim for relief.*") As applied to the facts of the instant case, Freeman cannot rely upon the activity of individuals or entities who were involved in "substantially affected commerce" in Tennessee to obtain subject matter jurisdiction under the TTPA for itself and the members of the putative class when neither Freeman nor any of the putative class members were themselves involved in Tennessee commerce. The issue is *not* whether someone at some time had a transaction *in Tennessee* that was substantially affected by the defendants' illegal conduct; rather, the issue is whether Freeman and the putative class members had such transactions. The answer is clearly no. Simply stated, the allegations of the complaint, construed liberally in favor of Freeman and the putative class, demonstrate a lack of subject matter jurisdiction under the TTPA.

Because ***Sherwood*** - which we would note was decided more than a year after the trial court made its decision in this case - holds that the TTPA *does* apply to indirect purchasers, **[*25]** we modify the trial court's decision holding to the contrary. However, because Freeman cannot show that its purchases of sorbates were in "substantially affected" Tennessee commerce, the trial court's ruling that the TTPA does not apply to Freeman's claim is affirmed.

C.

Freeman next contends that the trial court abused its discretion in refusing to grant Freeman's motion for class certification on the unjust enrichment claim. ***HN11***[] The decision whether to grant or deny a motion for class certification rests within the sound discretion of the trial court. *See* ***Warren v. Scott****, 845 S.W.2d 780, 782 (Tenn. Ct. App. 1992)*. Accordingly, we will not reverse a trial court's denial of class certification unless the party seeking certification has demonstrated an abuse of that discretion. *See* ***Hamilton v. Gibson County Util. Dist.****, 845 S.W.2d 218, 225 (Tenn. Ct. App. 1992)*.

HN12[] The party seeking class certification has the burden of proving that the prerequisites set forth in *Tenn. R. Civ. P. 23.01* have been satisfied. *See* **[*26]** ***Hamilton****, 845 S.W.2d at 224-25*. *Rule 23.01* provides as follows:

> ***HN13***[] One or more members of a class may sue or be sued as representative parties on behalf of all only if (1) the class is so numerous that joinder of all members is impracticable, (2) there are questions of law or fact common to the class, (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class, and (4) the representative parties will fairly and adequately protect the interest of the class.

HN14[] In addition, the party must comply with one of the three requirements found in *Tenn. R. Civ. P. 23.02*. In the instant case, Freeman relies on *Rule 23.02(3)*, which states as follows:

> ***HN15***[] The court finds that the question of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy. The matters pertinent to the findings include: (a) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (b) the extent and nature of any litigation **[*27]** concerning the controversy already commenced by or against members of the class; (c) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (d) the difficulties likely to be encountered in the management of a class action.

In ruling on Freeman's motion for class certification, the trial court found that Freeman had satisfied the *Rule 23.01* requirements of numerous class members and Freeman's ability to fairly and adequately protect the interest of the class, but questioned whether Freeman had sufficiently proven the elements of common questions of law or fact and whether Freeman's claim is typical of the claims of the class, due to the possibility that the law of each of the 35 affected states would apply. However, the court unequivocally found that Freeman had not satisfied the requirements, under 23.02(3), of predominance and superiority. Specifically, the court stated the following:

> But since we're going under 23.02(3) then you have to also have a question of [law or] fact common to the members of the class predominate over any questions affecting only indirect members. Once again, I think

> you're going to get in a quagmire **[*28]** of law and of fact. Certainly, in the ***Meighan*** [***v. U.S. Sprint Communications Co.***] case the Tennessee Supreme Court approved the aggregate damage thing and counsel is absolutely correct on that. But what damage? As I said, you may go through five different consumers before you get the ultimate consumer. Who passed it on and who didn't? If it was not passed on then the ultimate consumer suffered no loss. And there must be proof of loss before the plaintiff can recover. Also, that the class action is superior to other methods. . . . Now it appears that the State of New York is suing and seven other states are suing. It appears to me that the individual state's Attorney Generals are the proper people to represent the people in their individual states and under their individual law rather than Tennessee where there are no Tennessee consumers involved in the class attempting to interpret the laws of the other states. Also, the interest of the members of the class [in] . . . individually control[ling the] prosecution or defense must be satisifed. You have the State of New York representing the people of New York and other states want to control it. On the class action, **[*29]** they would not. Under 23.02(3)(b) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class. Although most of this litigation by the respective Attorneys General has not been filed, it appears they would. And I think it would be useless to continue on with a class action when that would not [sic] be met soon as these individual suits are filed. C, the desirability or undesirability of [concentrating] the litigation of the classes in this forum. As I said previously, Tennessee only has an interest because one of the defendants was involved in the price fixing. Otherwise, it's the other states that really have the interest and it seems, as I've stated, more appropriate that the Attorney Generals of those states proceed.
>
> And, lastly, the difficulties likely to be encountered in the management of this class action. It's uncontrovertedly got around 200 million ultimate consumers. The difficulty to manage that in notice and resolving the damages, the plaintiffs say they want equity. How can I give equity under the aggregate damage when some states there may not - many of the people may not have suffered any damage?
>
> * * * **[*30]**
>
> Then, of course, you have to use the best practical notice. Now, what would be practical notice? It's pointed out by counsel the - we know who they are and there are methods of notifying them. I suppose it would be proper to consider that the cost of individual notice is not practical when you could go by publication. However, for all of these reasons I feel it's not an appropriate case to certify as a class action.

We find the trial court's approach to the class certification issue to be thorough and well-reasoned. The involvement of the attorneys general and the undesirability of concentrating the class litigation in Tennessee is enough to destroy predominance and superiority. Accordingly, we find no abuse of discretion in the court's decision to deny Freeman's motion for class certification.

D.

The defendants argue that the trial court erred in denying their motion for summary judgment on Freeman's unjust enrichment claim. ***HN16***[] Since summary judgment presents a pure question of law, our review is *de novo* with no presumption of correctness as to the trial court's judgment. **[*31]** ***Gonzales v. Alman Constr. Co.****, 857 S.W.2d 42, 44-45 (Tenn. Ct. App. 1993)*.

HN17[] As the Tennessee Supreme Court has pointed out,

> unjust enrichment is a quasi-contractual theory or is a contract implied-in-law in which a court may impose a contractual obligation where one does not exist." ***Paschall's, Inc. v. Dozier****, 219 Tenn. 45, 407 S.W.2d 150, 154-55 (1966)*. Courts will impose a contractual obligation under an unjust enrichment theory when: (1) there is no contract between the parties or a contract has become unenforceable or invalid; and (2) the defendant will be unjustly enriched absent a quasi-contractual obligation. ***Id.*** []

Whitehaven Cmty. Baptist Church v. Holloway*, 973 S.W.2d 592, 596 (Tenn. 1998)*. ***HN18***[] Before a party can recover under an unjust enrichment theory, the party seeking to recover must "have exhausted his remedies against the person with whom he had contracted, and still has not received the reasonable value of his services." **[*32]** ***Paschall's****, 407 S.W.2d at 155*.

In denying the defendants' motion for summary judgment on the issue of unjust enrichment, the trial court found, with respect to Freeman's individual claim, that the choice of law issue, *i.e.*, whether Tennessee or New York law should apply, was a factual question under the teaching of ***Hataway v. McKinley**, 830 S.W.2d 53 (Tenn. 1992)*. With respect to whether Freeman conferred a direct benefit on the defendants, the trial court stated that it didn't "think [that issue has] been decided by Tennessee so I have to guess what the Supreme Court would do. And my guess is they would not find that there had to be direct contact." The trial court did not address the issue of whether Freeman had exhausted its remedies.

First, with respect to the choice of law issue, ***HN19***[] Tennessee has adopted the approach that "the law of the state where the injury occurred will be applied unless some other state has a more significant relationship to the litigation." ***Hataway**, 830 S.W.2d at 59*. The defendants argue that the alleged injury in the instant case occurred in New York, that no other state, especially **[*33]** Tennessee, has a more significant connection to the case, and that New York law should therefore apply. However, we agree with the trial court that the question of whether another state has "a more significant relationship to the litigation" is a question of fact, which, when disputed, as in the instant case, is inappropriate for summary judgment. Second, we agree with the trial court's conclusion that ***HN20***[] the Tennessee Supreme Court has never *required* that a plaintiff confer a direct benefit on a defendant before proceeding with its claim for unjust enrichment. Considering all of the above, we find no error in the trial court's denial of the defendants' motion for summary judgment on Freeman's unjust enrichment claim.

IV.

The judgment of the trial court, as modified, is affirmed. Freeman's individual claim based upon a theory of unjust enrichment is allowed to proceed in a manner consistent with this opinion. Exercising our discretion, we tax the costs on appeal one-half to the appellant, Freeman Industries LLC., and one-half to Eastman Chemical Company, Hoechst Aktiengesellschaft, Nutrinova Nutrition Specialties & Food Ingredients, GmbH, Daicel Chemical Industries, Ltd., and **[*34]** Nippon Gohsei Industries, Ltd.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN3[] Public Enforcement, State Civil Actions

The dominant purpose of the New Jersey Antitrust Act, N.J. Stat. Ann. §§ 56:9-1 to 19, is to advance public policy in favor of competition and to prevent practices that deprive consumers of the benefit of competitive markets.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

HN4[] Public Enforcement, State Civil Actions

N.J. Stat. Ann. § 56:9-18 mandates that the New Jersey Antitrust Act shall be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws of those states which enact it. Thus, the New Jersey court looks to federal jurisprudence to guide its interpretation of the Act.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] Antitrust & Trade Law, Sherman Act

The federal analog to N.J. Stat. Ann. § 56:9-3, the restraint of trade provision, is § 1 of the Sherman Act, 15 U.S.C.S. § 1, which contains virtually identical language.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] Antitrust & Trade Law, Sherman Act

N.J. Stat. Ann. § 56:9-4, the monopolization provision, is analogous to § 2 of the Sherman Act, 15 U.S.C.S. § 2.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Evidence > Burdens of Proof > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Regulated Practices, Trade Practices & Unfair Competition**

Under N.J. Stat. Ann. § 56:9-3, a plaintiff must prove the existence of a conspiracy in restraint of trade and either an unlawful purpose or an anti-competitive effect. Unilateral action, regardless of its motivation, cannot constitute a violation of § 56:9-3. Instead, a plaintiff must establish a unity of purpose, a common design and understanding, or a meeting of the minds in an unlawful arrangement between, at minimum, two independent, self-interested economic entities. Such a proof must be made by direct or circumstantial evidence that tends to prove a common scheme designed to achieve an unlawful objective.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN10[] **Antitrust Actions, Facilities**

An antitrust conspiracy where hospital surgical privileges have been denied cannot be inferred from the mere opportunity or ability to conspire. Even if an ultimate peer review decision is consistent with the economic interests of a competitor, conspiracy cannot be inferred "from whole cloth."

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

There can be no contract, combination or conspiracy by a corporation with its own officers, agents or employees, who are performing their usual job of formulating and carrying out its managerial policy. Thus, employees of same company do not provide plurality of actors necessary for conspiracy under § 1 of the Sherman Act, 15 U.S.C.S. § 1. For that reason, a hospital is incapable of conspiring with its staff in deciding whether to grant staff privileges.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

HN12[] **Regulated Practices, Trade Practices & Unfair Competition**

A hospital cannot conspire with its executive or medical staff committees. While each medical staff member has an independent economic interest in competition with one another, thus satisfying the concerted action element of a restraint of trade claim, the staff as an entity has no interest in competition with the hospital and, in fact, operates similarly to an officer of a corporation who makes decisions on behalf of the corporate entity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN13[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A restraint of trade claim can be evaluated by two methods: the rule of reason, and the per se rule. Under a per se analysis, a plaintiff need prove only the existence of an illegal agreement and the defendant's anticompetitive intent; anticompetitive effect is presumed. However, the per se rule is reserved for plainly anticompetitive practices, such as price-fixing and tying arrangements, which are always considered harmful to competition.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN14[] **Antitrust Actions, Facilities**

Both the United States Supreme Court and the New Jersey Supreme Court have been reluctant to extend the per se rule, especially in the context of hospital-doctor associations. Thus, a tying arrangement between a hospital and a group of medical specialists does not warrant per se invalidation absent proof of market power. Hospital-doctor associations are not inherently anticompetitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN15[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the rule of reason, only restraints of trade that are unreasonably restrictive of competitive conditions are illegal. The focus is on whether the conduct adversely affects competition. A trial judge must closely examine the relevant product and geographic markets and evaluate the effect of the defendant's conduct on that market. The fact that the conduct may have an injurious effect on an individual competitor is irrelevant. The balancing process under the rule of reason requires defining the market in which the restraint operates, evaluating the evils inherent in the conduct, and weighing those anticompetitive influences against any pro-competitive justifications. Proof of adverse effects on profits is insufficient as a matter of law. Actual or probable harm to competition is essential under a reasonableness approach. The consumer does not care how many sellers of a particular good or service there are; he cares only that there be enough to assure him a competitive price and quality.

HN16[] **Regulated Practices, Monopolies & Monopolization**

For a monopolization claim under *N.J. Stat. Ann. § 56:9-4*, a plaintiff must show that defendants have a dangerous probability of achieving monopoly power in the relevant market. A defendant is prohibited from using its monopoly power to gain a competitive advantage by destroying or eliminating its competitors. Monopoly power is defined as the power to control prices or exclude competition in the relevant market. The likelihood of achieving a monopoly is demonstrated through a market share sufficient to create a monopoly. To demonstrate a monopoly under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must prove possession of monopoly power in the relevant market and willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN17[] **Sherman Act, Jurisdiction**

The only difference between the monopolization provision of the federal act, *§ 2* of the Sherman Act, *15 U.S.C.S. § 2* and the monopolization provision of the state statute New Jersey Antitrust Act, *N.J. Stat. Ann. §§ 56:9-4* is that the state Antirust Act does not require that defendant's activity affect interstate commerce. It is the effect on interstate commerce that supplies the necessary federal jurisdiction under the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

The critical issue in both monopolization and restraint of trade analyses is demonstration of the relevant market. Where a plaintiff fails to adduce any proofs regarding market area or monopoly power, any antitrust claim will fail and must be dismissed as a matter of law. Moreover, since the market power necessary for a monopolization claim requires something more than the market power necessary for a restraint of trade claim, a plaintiff who fails in its proofs for the latter will also fail in its proofs for the former.

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

***HN19*[ ] Regulated Practices, Market Definition**

The relevant geographic market is the area in which potential buyers may rationally look for the goods or services they seek. It is the area where customers look to buy products, not the area where the seller attempts to sell its product. In the case of hospitals, the geographic market inquiry focuses on the area within which hospital "customers" can turn to other "sellers" (hospitals) if the hospital raises prices or restricts output. A judge must consider, among other factors, whether the hospital is near major metropolitan areas and whether those areas also have hospitals. Absent an allegation that a hospital exclusively serves a particular area or offers a unique set of services, an antitrust plaintiff may not limit the geographic market to a single hospital.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

***HN20*[ ] Regulated Practices, Trade Practices & Unfair Competition**

Any relevant inquiry for purposes of ***antitrust law*** is the effect on consumers, not on an individual competitor.

***HN21*[ ] Antitrust & Trade Law, Sherman Act**

The antitrust laws are not intended to replace the common law of unfair competition or to afford remedies for all business torts. Whereas the law of unfair competition is grounded in ethical considerations, ***antitrust law*** is grounded solely in economic considerations and requires specific proof for recovery.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN22[] Intentional Interference, Elements

To establish a cause of action for tortious interference with a prospective economic advantage, a plaintiff must prove that he had a reasonable expectation of advantage from a prospective contractual or economic relationship, that the defendant interfered with this advantage intentionally and without justification or excuse, that the interference caused the loss of the expected advantage, and that the injury caused damage. The protected interest need not rise to the level of an enforceable contract. Instead, the plaintiff must demonstrate that without the interference, there was a reasonable probability that he would have received the anticipated economic benefits.

Torts > Business Torts > Trade Libel > General Overview

Torts > Intentional Torts > Defamation > General Overview

HN25[] Business Torts, Commercial Interference

Trade libel identifies the tort addressing aspersions cast upon one's business operation. The tort is also known as injurious falsehood, disparagement of property, or commercial disparagement. However, the tort is broader in scope than any of those terms would indicate, and is probably as broad as any injurious falsehood which disturbs prospective advantage. It is similar to the tort of intentional interference with one's economic relations, rather than a branch of the general harm to reputation involved in libel and slander. The tort of trade libel is but one part of a rather amorphous concept consisting of communication to a third person of false statements concerning the plaintiff, his property, or his business. A plaintiff alleging trade libel must prove publication of a matter derogatory to the plaintiff's property or business, of a kind designed to prevent others from dealing with him or otherwise to interfere with the plaintiff's relations with others. The communication must be made to a third person and must play a material part in inducing others not to deal with plaintiff.

Torts > Intentional Torts > Defamation > General Overview

Torts > ... > Defamation > Defenses > Statute of Limitations

HN26[] **Statute of Limitations, Waiver**

Certain differences between defamation and trade libel are significant. Whereas a defamation claim is subject to a one-year statute of limitations, a claim for trade libel is subject to the general six-year statute of limitations applicable to malicious interference claims. Also, whereas the need to demonstrate damages is waived in a defamation suit where the statement is oral, constitutes slander per se, and concerns conduct incompatible with the plaintiff's business, proof of damages is essential in an action for trade libel.

Torts > Intentional Torts > Defamation > General Overview

Torts > Business Torts > General Overview

Torts > Business Torts > Trade Libel > General Overview

HN27[] **Intentional Torts, Defamation**

Interference by falsehoods that cause pecuniary loss, but are not personally defamatory, has been regarded as a tort "more or less distinct" from defamation. Distinguishing between personal defamation of a plaintiff and disparagement of the plaintiff's property may be difficult. Generally, the latter tort has been applied to statements that are injurious to plaintiff's business, but cast no reflection on either plaintiff's person or property. For example, if the statement charges a plaintiff with personal misconduct, or imputes to a plaintiff reprehensible personal characteristics, it is regarded as libel or slander. If, however, the aspersion reflects only on the quality of a plaintiff's product, or on the character of a plaintiff's business as such, it is disparagement. The rule of liability for trade libel applies only when the matter published goes no further than to attack the quality of the thing in question and does not attack the personal character of its owner as vendor. Many statements effectuate both harms. Some accusation of personal incompetence may be implied in imputations directed against a business or its product.

Torts > Intentional Torts > Defamation > General Overview

Torts > Business Torts > Trade Libel > General Overview

HN28[] Intentional Torts, Defamation

Personal defamation is usually found only where the imputation fairly implied is that the plaintiff is dishonest or lacking in integrity, or that he is deliberately perpetrating a fraud upon the public by selling a product which he knows to be defective. No personal defamation will be found where the most that can be made out of the words is a charge of ignorance or negligence. Additionally, one may disparage a plaintiff's business by reflecting upon its character, the manner in which it is conducted, or its popularity or danger, and not affect any property.

Torts > Remedies > Damages > General Overview

Torts > Business Torts > General Overview

Torts > Business Torts > Trade Libel > General Overview

HN29[] Remedies, Damages

The elements of a disparagement action include proof of publication of material derogatory to the quality of a plaintiff's business, or to his business in general, of a kind calculated to prevent others from dealing with him, or otherwise to interfere adversely with his relations with others. To establish loss of trade or other dealings, a plaintiff must show the falsehood was communicated to a third person and played a material and substantial part in leading others not to deal with the plaintiff. The plaintiff must also prove that the statement is false, and that the defendant made the statement knowingly or recklessly. Finally, the plaintiff must prove special damages, such as the loss of a present or prospective advantage, in the form of pecuniary loss.

Torts > Remedies > Damages > General Overview

Torts > ... > Pain & Suffering > Emotional Distress > General Overview

Torts > ... > Defamation > Elements > General Overview

Torts > ... > Defamation > Remedies > General Overview

HN30[] Business Torts, Trade Libel

The special damages requirement of a disparagement action goes to the cause of action itself, such that a plaintiff will be denied even nominal or punitive damages if he cannot show special damages. The necessary showing is specific: a plaintiff must establish pecuniary loss that has been realized or liquidated, such as lost sales, or the loss of prospective contracts with customers. Traditionally, a plaintiff was required to identify particular business interests who have refrained from dealing with him, or explain the impossibility of doing so. However, where requiring such identification is unreasonable, proof of lost profits resulting from breach of contract may suffice, especially where the loss is shown with reasonable certainty and where the possibility that other factors caused the loss is satisfactorily excluded. General, implied, or presumed damages of the kind available in personal defamation actions do not satisfy the requirement of special damages needed for disparagement causes of action. In addition, personal elements of damages, such as mental distress, are strictly excluded.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > Business Torts > Trade Libel > General Overview

Governments > Legislation > Statute of Limitations > General Overview

Torts > ... > Defamation > Defenses > Statute of Limitations

HN31[] **Statute of Limitations, Time Limitations**

The gravamen of a complaint for malicious intent to cause harm to one's business or employment is not the means used, but the wrongfulness of the defendant's intent. It is not necessary to set out the words of the false representation. For such a cause of action, the more restricted statute of limitations for slander does not apply.

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

Healthcare Law > Business Administration & Organization > Peer Review > Peer Review Statutes

Torts > ... > Defenses > Privileges > Qualified Privileges

HN32[] **Evidence, Privileges**

A communication made bona fide upon any subject matter in which the party communicating has an interest or in reference to which he has a duty, is privileged if made to a person having a corresponding interest or duty. The critical elements of this privilege are the appropriateness of the occasion on which the information is published, the legitimacy of the interest sought to be protected or promoted, and the pertinence of the receipt of the information by the recipient. The privilege is based on the public policy that it is essential that true information be given whenever it is reasonably necessary for the protection of one's own interests, the interests of third persons, or certain interests of the public. A defendant abuses the privilege if he knows the statement is false or acts in reckless disregard of its truth or falsity, if publication serves a purpose contrary to the interest sought to be promoted by the privilege, or if the statement is excessively published. The question of abuse is for the factfinder and must be proven by the plaintiff by clear and convincing evidence. In the case of a hospital performing its credentialing function on applicants for surgical privileges, these competing interests and principles have been codified in both federal and state law under *N.J. Stat. Ann. § 2A:84A-22.10(d)* and *42 U.S.C.S. §§ 11111* and *11112(a)*.

Torts > ... > Defenses > Privileges > Qualified Privileges

HN33[] **Privileges, Qualified Privileges**

To overcome the privilege providing immunity from a defamation action on the ground that a defendant conducted a reckless investigation, a plaintiff must establish that the defendant knew the statement was false or acted in reckless disregard of its truth or falsity. The standard is whether the defendant published a statement while entertaining serious doubts about the statement's truth. Errors of interpretation or judgment and misconceptions are insufficient.

Torts > Business Torts > Trade Libel > General Overview

Torts > ... > Defenses > Privileges > Qualified Privileges

HN34[] **Business Torts, Trade Libel**

In trade libel actions, as in defamation actions, an abuse of a qualified privilege will be found if the publisher knows the statement is false or acts in reckless disregard of its truth, if the publication serves a purpose contrary to the interests of the privilege, or if there is excessive publication.

Torts > ... > Defamation > Remedies > Damages

Torts > Business Torts > Trade Libel > General Overview

Judges: Before Judges CARCHMAN, WECKER and WEISSBARD. The opinion of the court was delivered by CARCHMAN, J.A.D.

Opinion by: [810]** CARCHMAN

Opinion

[*206] The opinion of the court was delivered by

CARCHMAN, J.A.D.

Plaintiff Kumar A. Patel, M.D., a board certified surgeon with a subspecialty in vascular surgery, sought vascular surgical privileges at defendant Irvington General Hospital (IGH). According to plaintiff, defendant Jaime R. Soriano, [1] M.D., the chief of vascular surgery at IGH, [2] sabotaged plaintiff's application and communicated false statements about **[***2]** plaintiff to other members of IGH's medical staff--all to continue his own monopolistic control over IGH's vascular surgery department. As a result, plaintiff filed an action in the Chancery Division, seeking equitable relief as well as damages for both Soriano's and IGH's misconduct.

[811]** Following an extended bench trial after transfer to the Law Division, the trial judge found in favor of plaintiff and concluded that both IGH and Soriano had defamed plaintiff and had tortiously interfered with plaintiff's reasonable expectation of economic advantage. In addition, she found that Soriano had violated the New Jersey Antitrust Act, *N.J.S.A. 56:9-1 to -19*. The judge awarded joint and several damages including prejudgment interest and costs of $ 1,195,377.61 against IGH and Soriano, and $ 1,184,316.25, including **[***3]** prejudgment interest and costs, against Soriano individually. The judge dismissed plaintiff's breach of **[*207]** contract claim and concluded that IGH was immune from antitrust liability. Both defendants appeal and plaintiff cross-appeals.

We reach the following conclusions:

1) the trial judge's finding of liability for tortious interference was correct and is affirmed;

2) the judge's factual findings support a cause of action for trade libel rather than defamation and a judgment of liability for the former cause of action shall be entered on remand;

3) the judgment for liability and damages for antitrust violations is reversed;

4) the matter shall be remanded for reconsideration of damages on the causes of action for tortious interference and trade libel as well as punitive damages;

5) the cross-appeal is dismissed;

6) in all other respects the judgment is affirmed.

I.

---

[1] "Defendant" shall refer to Soriano.

[2] Defendant's position title at IGH is also referred to as "division chair." The terms "division chair" and "chief" are interchangeable.

After completing his medical training, plaintiff ultimately became board certified in both general and vascular surgery. In 1984, plaintiff was named chief of vascular surgery at Metropolitan Hospital, an 800-bed hospital in New York City where among his other duties, he oversaw Metropolitan's vascular laboratory. **[***4]** During his years of practice, plaintiff served as an associate professor of surgery at a medical college, was a member of several medical societies, authored numerous publications, served as a consultant to various insurance companies, and participated in numerous symposia and presentations to the medical profession.

Plaintiff became licensed to practice medicine in New Jersey in 1992. At that time, he decided to leave Metropolitan because of the perceived need to start a private practice in anticipation of his three children going to college. In 1993, plaintiff applied for and was granted attending physician privileges at Mountainside Hospital, **[*208]** St. Joseph's Hospital, and Wayne General Hospital, all in New Jersey.

In February 1995, at the urging of a medical colleague, Dr. Shirish Patrawalla, plaintiff applied for vascular surgical privileges at IGH. Patrawalla, a cardiologist at IGH, felt that IGH needed a vascular surgeon and told plaintiff that other doctors at IGH shared this belief. Plaintiff claimed that Patrawalla told him that he could expect to perform thirty to forty percent of the vascular surgery procedures at IGH. However, Patrawalla also warned him to expect resistance **[***5]** from defendant, the chair of vascular surgery at IGH. Although he was not board certified in vascular surgery, defendant performed virtually all of IGH's vascular surgery procedures and maintained significant influence at the hospital through his membership on various committees and the board of trustees. Plaintiff decided to apply for privileges at IGH because he realized that he needed more than one hospital in which to develop his practice in vascular surgery and IGH appeared to be a promising opportunity for such development.

[812]** In plaintiff's IGH application, he listed four references--Dr. Roy Clauss, plaintiff's surgical colleague and immediate predecessor as chief of vascular surgery at Metropolitan; Dr. Herbert Dardik, a nationally renowned vascular surgeon at Englewood Hospital who was professionally acquainted with plaintiff; Dr. Kamalakar Ayyagari, on staff at IGH, but with whom plaintiff had never worked; and Patrawalla. All of these individuals wrote favorable letters of recommendation supporting plaintiff's application. No one from IGH informed plaintiff that his references were deficient.

Janice Nemeckay, IGH's director of medical staff affairs, oversaw the compilation **[***6]** of documents that comprised a doctor's application for medical staff privileges and would be reviewed by the various levels of peer review at the hospital. She contacted both the New Jersey Board of Medical Examiners and the New York Division of Professional Licensing Services and determined that plaintiff was a doctor in good standing in both states with no **[*209]** derogatory information reported. Nemeckay also reached out to every hospital where plaintiff had privileges as of February 1995. As part of plaintiff's application, he had signed releases which allowed IGH to obtain information about him from third parties. These releases all contained the following language: "You are hereby requested and authorized to furnish, make available and release to Irvington General Hospital, its medical staff and their authorized representatives all information concerning professional competence, ethics, character, and other qualifications relevant to my application for medical staff appointment and clinical privileges."

Dr. Francis Wyckoff, the head of surgery at Mountainside, completed the confidential evaluation form for plaintiff. Mountainside did not have a separate section for, or a separate director **[***7]** of, vascular surgery. Because plaintiff had been at Mountainside for less than two years when Wyckoff reviewed him, he was still under supervision at that hospital, a standard practice at most institutions. Wyckoff rated plaintiff "superior" in every category except one, in which he rated plaintiff "good." Wyckoff recommended "without reservation" that plaintiff be granted privileges at IGH "with supervision and observation as required in Irvington General's Dept. of Surgery." His impression of plaintiff was "favorable."

Dr. Joseph Farrell, a general surgeon and the acting chairman of surgery at St. Joseph's at the time of plaintiff's application to IGH, rated plaintiff "good" in all categories. Farrell considered plaintiff a "capable" applicant and recommended him for privileges "without reservation." The surgical department chair at Wayne General was unable to comment on plaintiff's application because plaintiff had little or no surgical activity at that hospital.

Dr. William Stahl, the chief of surgery at Metropolitan, also completed an evaluation form for plaintiff, rating plaintiff "superior" in all categories. Stahl considered plaintiff an "excellent individual and surgeon" **[***8]** and recommended him without reservation.

[*210] According to Nemeckay, plaintiff's completed application was referred to Dr. Capistrano Luzano, the director of the department of general surgery at IGH, for his recommendation. Luzano noted on his recommendation to the credentials committee that the "record speak[s] for itself" and elected not to interview plaintiff.

This seemingly routine processing of plaintiff's application appeared on track when plaintiff met with defendant who, as chair of the surgery division and the director of vascular surgery, was next to **[**813]** review plaintiff's file. [3] He interviewed plaintiff on June 13, 1995, the same day he reviewed the file. Plaintiff claimed that the interview was brief and defendant did not discuss plaintiff's references.

[*9]** Defendant considered the interview to be cordial and uneventful and gave no indication that the application was deficient in any way. However, he wrote a letter to Patrawalla, the chairman of the credentials committee, asking that the committee postpone its interview of plaintiff since defendant was still obtaining information.

On June 29, 1995, Nemeckay notified plaintiff that his file was complete and that he would be interviewed by the credentials committee on July 12, 1995. On July 12, 1995, when plaintiff met with the committee, Patrawalla handed him a letter dated July 11, 1995, from defendant. According to this letter, which was addressed to plaintiff, defendant asked plaintiff to send him a list of *all* the surgical cases he had performed since September 1993. Plaintiff was also asked to include the following information: the patient's name, pre- and post-operative diagnosis, date and type of procedure performed, and any complications or mortality. The **[*211]** list was to be certified by the chief of vascular surgery or general surgery at the appropriate institution. The credentials committee informed plaintiff that defendant, not the committee, was requesting the information. **[***10]** The committee meeting minutes for July 12, 1995, stated that there was nothing adverse in plaintiff's file and that defendant had requested the delay in recommendation until the additional information was received. The committee agreed with plaintiff that defendant's request for two years' worth of information was "highly unusual."

Plaintiff felt that it would have taken an exhaustive effort to comply with defendant's request, since he would have had to pull each individual patient's chart and there were over one hundred cases at issue. Also, plaintiff concluded that defendant had not complied with IGH's own credentialing procedures since any deferral by a division chair had to be accompanied by a notice in writing to the applicant, stating the reasons for the deferral. Defendant's letter of July 11, 1995, did not inform plaintiff why the additional information was needed.

On July 13, 1995, the medical executive committee (MEC), including defendant, who was a member, met at IGH. According to the minutes of this meeting, there was a "lengthy discussion" regarding the appropriateness of defendant's "laborious request," given the lack of any negative credentials in plaintiff's file. **[***11]** Also, these minutes noted that defendant "elaborated on certain information received verbally (i[.]e.[,] high mortality rate and unsuccessful aneurysm surgery), which caused him to request such surgical information." No action was taken on plaintiff's application.

According to defendant, after his interview with plaintiff in June, he again reviewed plaintiff's application. Certain matters prompted his attention, such as plaintiff's failure to name as a reference any vascular surgeon at a hospital where he currently had privileges. Also, defendant **[**814]** saw no reference from the director of vascular surgery at Metropolitan.

---

[3] After the recommendation of the department and division chairs, an application proceeds 1) to the credentials committee for a recommendation to 2) the medical executive committee for a recommendation to 3) the board of trustees, which makes the final decision. At the time of plaintiff's application, defendant was not only the division chair but also a member of the medical executive committee as well as a member of the board of trustees.

[*212] Defendant wanted to ensure that no quality of care issues surrounded plaintiff's decision to leave Metropolitan. Although the chief of general surgery at Metropolitan, Stahl, had given plaintiff a very positive evaluation, he was not a vascular surgeon, and defendant specifically sought to talk to the director of vascular surgery at Metropolitan. Defendant claimed that he placed three phone calls to Metropolitan, looking for the head of vascular surgery, and that he never received a return call. Defendant did not write a letter, nor did he contact Clauss, the vascular **[***12]** surgeon who had been plaintiff's immediate predecessor as chief of that department. Defendant surmised, incorrectly, that plaintiff and Clauss had been associated together in practice. Defendant claimed that if he had obtained a positive recommendation from the current director of vascular surgery at Metropolitan, that would have been the "end of the story."

Also troubling to defendant was the fact that the positive evaluation given by Wyckoff was accompanied by a caveat that plaintiff be given privileges "with supervision and observation." In defendant's opinion, that caveat was a "red flag" even though such supervision and observation is standard practice at most hospitals for a newly admitted surgeon's first two years. Defendant did not, however, call Wyckoff for clarification.

Instead, defendant placed a call to the main switchboard at Mountainside and asked for the head of vascular surgery. He was directed to Dr. Donald C. Syracuse, someone with whom defendant was familiar on a professional, but not personal, basis. Syracuse was a cardiothoracic surgeon who had privileges at Mountainside. About seventy-five percent of his practice was vascular surgery. He had never operated **[***13]** with plaintiff and had never seen him perform surgery.

According to defendant's contemporaneous handwritten notes of his conversation with Syracuse, which were later transcribed, Syracuse told defendant that: plaintiff had provisional status at Mountainside; plaintiff's mortality and morbidity rates were "higher than anyone else here"; plaintiff's first six aneurysm **[*213]** patients had complications and died; plaintiff's cases were discussed "almost every month" in mortality and morbidity conferences; and plaintiff should be asked to submit the cases he had done in the past one to two years. Syracuse declined defendant's request to put his comments in writing.

Defendant also placed a call to St. Joseph's and spoke to Dr. Nazmi Elrabie, the chief of vascular surgery. According to defendant's contemporaneous handwritten notes of that conversation, which were also later transcribed, Elrabie told defendant that plaintiff did not do much surgery at either St. Joseph's or Wayne General, and that most of his practice was at Mountainside. Elrabie also told defendant that plaintiff's privileges to read vascular lab studies at St. Joseph's were removed because he was "bad-mouthing" the three other **[***14]** doctors doing the readings, saying they "didn't know what they were doing."

At trial, Elrabie denied having said anything negative about plaintiff to defendant. He denied having said or implied that the decision to terminate plaintiff's lab privileges was because plaintiff "bad-mouthed" other doctors. Rather, Elrabie claimed that he told defendant only that a decision had been made by St. Joseph's surgical department's executive committee to require that doctors have their primary work at the hospital to be allowed to read the lab studies.

[815]** Armed with the information he claimed to have received from Syracuse and Elrabie, unable to reach the head of vascular surgery at Metropolitan, and having consulted with counsel for the hospital, [4] defendant drafted his letter of July 11, 1995, requesting the list of all of plaintiff's surgical cases performed since September 1993. Defendant admitted that this letter did not notify **[*214]** plaintiff of the reasons for the request or deferral of plaintiff's application.

[*15]** At the MEC meeting on July 13, 1995, defendant was asked to state those reasons. Defendant claimed that he was reluctant to divulge that information since he had not yet had a chance to verify what he had heard.

---

[4] This attorney indicated at trial that when defendant called him, he told him that a reasonable way to verify the information he had received about plaintiff would be to request a list of his cases for the prior two years. If any case raised a question, then the hospital could request specific medical records. Since the attorney was not admitted as an expert on any issue, the judge considered this testimony only for the limited purpose of determining whether defendant had acted out of malice.

Nevertheless, defendant admitted that he read to the committee the substance of his notes of his conversations with both Syracuse and Elrabie, including Syracuse's allegations about plaintiff's high mortality and morbidity rates and that his first six aneurysm patients died, as well as Elrabie's allegation that plaintiff "bad-mouthed" other doctors.

Plaintiff considered defendant's request for the information about his surgical cases a "declaration of war." In plaintiff's view, he would have to either withdraw his application or seek legal redress. He chose the latter and retained a lawyer, who immediately sent a letter to the president of IGH, objecting to defendant's request. Plaintiff's lawyer also noted that defendant had not notified plaintiff of the reasons for the deferral. On September 22, 1995, plaintiff himself wrote to Dr. Mahesh Desai, the president of IGH's medical staff, to note his objection, among other things, to defendant's review of his application as being **[***16]** an "obvious conflict of interest."

On October 5, 1995, the MEC, including defendant, met again. According to the minutes of this meeting, an "error" was noted on the MEC minutes for July 13, 1995. Those minutes should have read only that: "[Defendant] reported that he is awaiting information regarding [plaintiff's] surgical procedures during the past two (2) years, prior to submitting a recommendation." Notably, this "correction" meant that all reference to the lengthy discussion about defendant's "laborious request" was deleted, as was any reference to the verbal information received by defendant regarding plaintiff's high mortality rate and unsuccessful aneurysm surgery.

At this October 5 meeting, defendant told the MEC that he had not yet received a response from plaintiff regarding his request **[*215]** and that he would elaborate on his reasons for the request in a letter to plaintiff--a letter dated October 25, 1995, which plaintiff received shortly thereafter.

In that letter, a copy of which defendant sent to Romeo Tiu, who had replaced Desai as president of IGH's medical staff, defendant told plaintiff that during his review of plaintiff's application, he learned that plaintiff **[***17]** held only a provisional appointment at Mountainside Hospital. Since plaintiff had been at that hospital for two years, defendant inquired as to whether plaintiff had yet been promoted to full attending. Also, in further discussions with the chief of vascular surgery at Mountainside, defendant learned that plaintiff's mortality and morbidity rates were higher than those of other doctors performing the same procedures and that **[**816]** plaintiff's cases were "consistently discussed almost every month." It was this information that prompted defendant to request the two-year list of plaintiff's cases, a request which defendant viewed as "prudent and not unreasonable."

Defendant also learned from the chief of vascular surgery at St. Joseph's that plaintiff's privileges to read non-invasive laboratory studies had been removed and defendant wanted to know the circumstances surrounding that removal. Finally, defendant sought clarification as to whether plaintiff sought privileges in general surgery or only vascular surgery.

Upon receipt of this letter, plaintiff noted several issues. First, Mountainside did not have a chief of vascular surgery. Second, plaintiff's mortality and morbidity rates were **[***18]** not higher than other doctors' rates, and plaintiff was unaware of any statistics that kept track of such information. Third, plaintiff's cases were not discussed "almost every month" at mortality and morbidity conferences. Prior to July 1995, plaintiff's cases had been discussed on only four occasions and at no time was a conclusion reached that plaintiff had provided inappropriate care. [5] Finally, **[*216]** plaintiff noted that St. Joseph's had decided, for economic reasons alone, to allow only those surgeons whose primary practices were at St. Joseph's to read laboratory studies. The decision did not affect plaintiff alone.

Plaintiff assumed that it was Syracuse who had spoken to defendant about plaintiff's practice at Mountainside, even though Syracuse was not chief of vascular surgery. According to plaintiff, Syracuse was "constantly" critical of him during mortality and morbidity conferences at **[***19]** Mountainside, often with no reasonable explanation and while ignoring basic surgical knowledge.

Plaintiff's attorney wrote to Syracuse, seeking verification of his statements to defendant, as reported by defendant. Syracuse responded in writing, telling plaintiff that he had been "misinformed" regarding the discussion he had with

---

[5] Mortality refers to a patient's death; morbidity refers to complications. Every mortality is discussed at conference.

defendant. According to Syracuse, he told defendant to obtain a list of cases performed by plaintiff and their associated mortality and morbidity. He denied making the specific statements referenced in plaintiff's attorney's letter.

At trial, Syracuse contradicted defendant and claimed that his conversation with defendant was very brief. He denied having identified himself to defendant as the chief of vascular surgery at Mountainside. Syracuse admitted that he did not have any statistics regarding plaintiff's mortality and morbidity rates when he spoke to defendant and that he merely tried to convey an impression to defendant about plaintiff's performance. That is, he implied to defendant, truthfully, that plaintiff had more than a representative number of cases discussed at the mortality and morbidity conferences. Syracuse suggested to defendant that he **[***20]** obtain plaintiff's actual mortality and morbidity records or surgical logs. He admitted that the clear implication of this suggestion was that the records would reveal something negative about plaintiff, even though Syracuse was not aware of any instance where it had been found that plaintiff did not provide quality care. Syracuse denied telling defendant that plaintiff's first six aneurysm patients had died or that his cases were discussed every **[*217]** month. In fact, he denied discussing any specific cases with defendant. In essence, Syracuse refrained **[**817]** from making a judgment about plaintiff, and merely asked defendant to do his "homework" so he could make his own judgment. He also denied that defendant ever asked him to put his comments in writing.

Syracuse also claimed at trial, though he denied it at a prior deposition, that he had heard many negative comments about plaintiff's performance from other doctors and nursing supervisors at Mountainside. He also claimed that Wyckoff, the chief of surgery, verbally expressed doubts to Syracuse about plaintiff's competence, outside of the mortality and morbidity conferences. All of these comments were reflected in Syracuse's overall impression **[***21]** of plaintiff when he spoke to defendant.

Plaintiff also wrote to and received a response from Dr. David Bregman, the chief of surgery at St. Joseph's. According to Bregman, Elrabie had decided that only those surgeons who worked primarily at that hospital should be allowed to read noninvasive vascular laboratory studies. Since plaintiff worked primarily at Mountainside, he was asked to stop reading those studies. The decision was purely a financial one and had nothing to do with the quality of care provided by plaintiff, who Bregman noted had "exceptional qualifications and experience in vascular surgery."

Plaintiff sent the written responses of Syracuse and Bregman, along with other material, to Tiu. On December 14, 1995, Tiu wrote to defendant, asking that defendant submit his recommendation regarding plaintiff prior to the next MEC meeting, which was scheduled for January 11, 1996.

Throughout the first half of 1996, the MEC met monthly. At each of these meetings, no action was taken on plaintiff's application because it was noted that the file remained incomplete and could not be considered as plaintiff had failed to comply with defendant's request. During this entire period **[***22]** of time, plaintiff and his attorney were corresponding with Tiu, insisting that a decision be made on plaintiff's application.

[*218] On March 29, 1996, plaintiff received notification from Mountainside that he had been promoted to an associate attending physician and that all supervision and observation had been removed. This information was passed along to IGH.

On July 18, 1996, Tiu sent a letter to defendant, with a copy to plaintiff, asking that defendant have his final recommendation ready for the next MEC meeting. The MEC met as scheduled on September 5, 1996, at which time a letter written by defendant to Tiu on September 4, 1996, was considered. According to that letter, IGH tried to accommodate plaintiff by allowing an outside vascular surgeon to review his cases and reducing the number of cases he had to submit to those performed within the last one year, instead of two years. The MEC noted that plaintiff did not intend to comply with the modified request and that defendant was therefore unable to make a recommendation for his appointment. Asserting incompleteness of plaintiff's application, the MEC voted to deny it.

Although the president of IGH sent plaintiff a letter dated **[***23]** September 6, 1996, notifying him of this denial, plaintiff apparently did not receive this letter until September 12. However, on September 9, 1996, plaintiff commenced litigation by filing his verified complaint and order to show cause in the Chancery Division, seeking final action on his application. On September 17, 1996, plaintiff requested a hearing to appeal the denial, pursuant to IGH's Medical Staff Fair Hearing Plan.

The next day, defendant filed a certification in opposition to plaintiff's order to show cause, detailing the telephone conversations **[**818]** he had with Syracuse and Elrabie. This certification is significant because plaintiff claimed it was the first notice he had of these allegedly defamatory statements. [6] In his certification, **[*219]** defendant particularized the information he was told by Syracuse and Elrabie that he then related to IGH. This included references to mortality and morbidity rates, aneurysm-related deaths and denial of privileges to read vascular studies.

[*24]** On October 1, 1996, counsel for IGH issued a subpoena duces tecum to Mountainside, seeking production of: (1) all documents and records discussing the surgical procedures performed by plaintiff at Mountainside since September 1, 1993, which were investigated or discussed at the hospital's mortality and morbidity meetings; and (2) the patient case files for every one of those surgical procedures.

On October 9, 1996, IGH provided plaintiff with transcriptions of the contemporaneous handwritten notes taken by defendant during his telephone conversations with Syracuse and Elrabie. According to these notes, both conversations took place on July 5, 1995.

The Chancery judge entered an order directing defendants to withdraw their requests for information, as contained in defendant's letters to plaintiff of July 12 and October 25, 1995. He concluded that those requests were overbroad and violated IGH's credentialing procedures manual. Defendants were also directed to identify each questioned case of plaintiff's and to set forth in detail all the reasons for denying his application. In response to this order, IGH formally withdrew its request for the information. [7]

[*25]** On February 4, 1997, IGH issued another subpoena duces tecum to Mountainside. This subpoena sought all documents relating to plaintiff's mortality and morbidity rates in connection with vascular surgical procedures at Mountainside, and for a comparison of **[*220]** plaintiff's rates to those of the other vascular surgeons at Mountainside with respect to the same procedures.

St. Barnabas Health Care System, IGH's parent corporation, retained Dr. Robert P. Shack to review the records generated at Mountainside for fourteen of plaintiff's patients. Shack was asked to provide an opinion as to the appropriateness and competency of the care rendered. More significantly, defense counsel thereafter wrote to the judge advising him that after reviewing six of the fourteen patient files, Shack concluded that plaintiff was performing "within the median standard of care" of a vascular surgeon. Accordingly, plaintiff's application for privileges at IGH would be considered at the credentials committee meeting scheduled for May 21, 1997, and at the MEC meeting scheduled for June 5, 1997. On June 5, 1997, the MEC met and voted to recommend approval of plaintiff's application to the board of trustees. On June 20, 1997, plaintiff **[***26]** was notified by the board of trustees that **[**819]** he was granted a provisional appointment to the associate staff at IGH with privileges in general surgery and vascular surgery, operating under observation for major cases. Plaintiff's supervisor would be defendant.

Plaintiff never exercised those privileges; plaintiff contended that he could not work under the designated supervision of defendant. According to plaintiff, defendant would have to be present in the operating room, a situation that could present a danger to the patient since it would increase plaintiff's level of stress. Also, plaintiff

---

[6] Plaintiff claimed that the defamatory comments referred to in his original complaint, filed in September 1996, were the ones made by defendant in his October 25, 1995, letter to plaintiff, which was copied to Tiu. It was not until October 1996, when plaintiff received minutes of the MEC meeting, that plaintiff discovered what defendant had said about him at the meeting. Those statements were the subject of plaintiff's amended complaint, filed in August 1997.

[7] On December 5, 1996, plaintiff deposed Syracuse. A few days later, plaintiff received a letter from Dr. Richard A. Kaiser, the head of surgery at Mountainside, advising him that Mountainside had decided to review "selected vascular surgical cases" involving plaintiff's patients at that hospital.

would be obligated to tell his patients that he was being supervised by someone he had sued, a circumstance to which according to plaintiff no patient would consent. Plaintiff's application for relief from this supervisory requirement was denied.

On October 15, 1999, more than two years after having been granted privileges, plaintiff formally resigned from IGH's medical staff, citing the intolerable situation of defendant's supervision. Plaintiff claimed that IGH notified him that since he did not have any patient activity during his two-year provisional period, IGH would discontinue his privileges **[***27]** and report that fact to the National **[*221]** Practitioner Data Bank, a permanent registry that maintained information about any negative performance by a doctor. Plaintiff thus had the choice of voluntarily resigning or being reported as a physician whose privileges were discontinued. He chose the former, although his account of events was disputed by Dr. Amit K. Mody, the executive director of IGH who claimed that plaintiff told him that he would prefer to go his own way and had no intention of practicing at IGH.

Plaintiff claimed that in the more than two years he had privileges at IGH, only two cases had been referred to him there. Plaintiff also related how his practice at Mountainside had diminished dramatically. In 2000, he did only twenty-three procedures there. According to plaintiff's tax returns, in 1995 plaintiff's income was $ 302,000. In 1996, the first full year following his application to IGH, his income dropped to $ 181,000. Plaintiff claimed that everything changed for him at Mountainside in 1996, in that other doctors stopped discussing their cases with him. This had an impact on plaintiff professionally, since vascular surgeons depend on referrals from primary care doctors **[***28]** and other specialists for their patients. It also had an impact on him personally, since he considered it "a blessing" to be able to take care of patients and he was not prepared for the "political" side of private practice or for people who would undermine his reputation and view plaintiff as a threat to their own practice.

In 1997 plaintiff's income dropped even further, to $ 124,000. In early 1998, plaintiff applied for staff privileges at Valley Hospital in Ridgewood. He was accepted and also granted privileges to read vascular studies. [8] After he was granted privileges at Valley, his income increased to $ 185,000, and in 1999, it was $ 322,000. Plaintiff, capable of performing 250 or more procedures per year, was then performing about 100 to 120 a year.

Plaintiff also sought to establish defendant's alleged "monopolistic" control over vascular surgery at IGH. In 1999, 154 vascular **[*222]** surgery procedures were performed at IGH. Defendant performed all **[***29]** of them. In 1998, defendant performed 208 of the 219 vascular surgery procedures there; in 1997, 186 of the 188 procedures; in 1996, 133 out of 136; in 1995, 145 out of **[**820]** 153; in 1994, 150 out of 154; and in 1993, 153 out of 159. For his part, defendant claimed that general surgery represented seventy to seventy-five percent of his practice and that vascular surgery comprised the remaining twenty-five to thirty percent. Of all the vascular surgery defendant performed in a year, all but about twenty to thirty percent was derived from IGH. Defendant's tax returns from 1993 to 1999 showed a gross income of about $ 450,000 to $ 550,000 for each of those years. About five to ten percent of the income reflected in those returns was income from other sources. [9] To derive the amount of income generated by vascular surgery performed at IGH, one would have to deduct that five to ten percent, then deduct another seventy to seventy-five percent as income attributable to general surgery only, and then deduct another twenty to thirty percent as income attributable to vascular surgery performed at hospitals other than IGH.

[*30]** Defendant admitted that the practice of vascular surgery was based on referrals and that to secure referrals, a vascular surgeon had to develop the trust and confidence of the other doctors on staff. He maintained that about five to ten percent of his vascular cases at IGH came to him from the IGH emergency room, and about sixty percent came from primary care doctors and other specialists at IGH. The remaining twenty to thirty percent came from current and former patients and doctors who did not use IGH as their primary hospital. He also maintained that his referrals came from other doctors he knew, other patients, and doctors he did not even know. [10]

---

[8] As of trial, most of plaintiff's practice was at Valley.

[9] Defendant originally stated the percentage as ten to fifteen percent. Counsel then restated this percentage as five to ten percent, to which defendant agreed.

Defendant claimed that he was **[*223]** never the only vascular surgeon at IGH. At the time plaintiff applied for privileges, there were four vascular surgeons on staff, including defendant. As of the date of trial, one of the three resigned after defendant temporarily suspended him, one left to work at other hospitals, and one relinquished his privileges. Since plaintiff's application, two doctors had been granted vascular surgical privileges at IGH, and defendant had not noticed any diminution in his own practice or in the number of referrals. **[***31]**

Defendant admitted that no vascular surgeon could see a patient who had been admitted to or was in the emergency room at IGH unless that surgeon had privileges at the hospital. If a patient had vascular surgery done at IGH and had other medical problems, as was often the case with vascular surgery patients, the patient's other doctors would be "boxed out" of their care unless they too had privileges at IGH.

Since 1986 defendant had also been the director of the vascular laboratory at IGH. The laboratory was started at defendant's initiative. He offered to bring his own lab to IGH if he could run the lab, read all the tests, and bill for his professional services. Pursuant to his agreement with IGH, which was never reduced to writing, defendant had been the only reader of lab studies since the lab's inception, claiming such privilege by appointment of the board of trustees. **[***32]** He also claimed that no other doctor ever needed to read the studies since these studies were never done on an emergency basis, and he could read the studies by fax when he was away from the hospital.

[821]** Dr. Ramesh Sawhney, an anesthesiologist who previously practiced at IGH until termination of his privileges, claimed that he spoke to Gerry Goodrich, the CEO of IGH, in 1995 about the need for another vascular surgeon at IGH. Goodrich was open to the suggestion and encouraged doctors to apply. Sawhney also claimed that over the years, he had spoken to many doctors about the need for a vascular-trained surgeon at IGH and defendant's running that department as a monopoly. Doctors were enthusiastic about plaintiff's decision to apply to IGH.

[*224] According to Sawhney, he once mentioned plaintiff's name to defendant when the two doctors were in the operating room together. Defendant said that he would not allow plaintiff to work in the hospital and that plaintiff was incompetent. Defendant also told Sawhney that he would never allow another vascular surgeon in "his" institution. Sawhney maintained that defendant, a very powerful individual at IGH, thought of the hospital as his to run. For example, **[***33]** he often barged into the administrator's office and told the administrator what he wanted done. Defendant also walked the hallways bragging that he could determine who would get privileges at the hospital. After defendant started questioning plaintiff's competence in connection with his application for privileges, other doctors at the hospital began to doubt plaintiff's abilities.

On cross-examination, plaintiff admitted that soon after he began practicing at Mountainside, i.e., before he ever applied for privileges at IGH, Syracuse and other doctors questioned the quality of his work during mortality and morbidity conferences. At these conferences, plaintiff's "competitors" made comments that either were inaccurate or distorted the facts. Plaintiff conceded that these doctors were making defamatory statements about plaintiff's practice long before he applied for privileges at IGH. At a prior deposition, plaintiff admitted that he was perceived as a threat by other doctors at Mountainside and that he attributed the decrease in his practice from 1995 to 1996 to their efforts to harm him. Plaintiff also admitted that there was a concerted effort at Mountainside to distort plaintiff's **[***34]** handling of his cases, an effort that started as soon as it became apparent that plaintiff's practice at Mountainside was expanding, a "substantial amount of time" before plaintiff applied to IGH. Plaintiff believed that Syracuse found in plaintiff's application for privileges at IGH the perfect opportunity to hurt plaintiff's Mountainside practice. This was consistent with other problems plaintiff had experienced at Mountainside resulting in meetings to discuss plaintiff's clinical performance and other derogatory comments regarding plaintiff's performance.

[*225] Plaintiff suggested that notwithstanding these negative comments at Mountainside, his income from that hospital actually increased in 1993 and 1994. His income dropped only in 1996, when IGH issued its subpoenas to Mountainside, which hurt plaintiff's reputation because "word gets around" that another hospital is looking at a doctor's mortality and morbidity statistics. However, plaintiff admitted that no one at Mountainside, or any other

---

[10] Especially since the advent of managed care, many doctors merely referred their patients to surgeons who were on the required provider lists.

hospital, ever told him about hearing defendant's comments about him spoken at IGH's peer review committees, or refused to refer cases to him because of those comments or the subpoenas IGH issued **[***35]** to Mountainside. Plaintiff contended that defendant's comments made at IGH's MEC meetings were especially damaging to his reputation since doctors from every major department at the hospital attended those meetings and he relied on those doctors for referrals. He claimed that defendant's comments "poisoned the atmosphere" for **[**822]** him in the "very small community" of Essex County, where negative news spread very fast. In contrast, the comments made about him at Mountainside were confined to departmental meetings, where only other surgeons were present. Those surgeons were his competitors, not referring physicians. Plaintiff admitted that theoretically, he could get referrals from doctors at one hospital and perform the vascular surgical procedure at another. However, in practice that never happened because ordinarily no reason existed to move the patient, such that most vascular procedures were done at the same hospital where the referring doctor practiced.

Both sides presented expert testimony with respect to the credentialing and privileging procedures at hospitals. According to plaintiff's expert, John Shershow, defendants violated the standard and fair practice for handling a doctor's **[***36]** application as well as the hospital's own bylaws and credentialing policies, and acted unreasonably and inappropriately in pursuing their request for more information from plaintiff. In Shershow's opinion, when a hospital questions an applicant's references, the standard and fair practice is to make follow-up phone calls to the doctors who wrote the references. If those calls do not answer all the questions, then **[*226]** the applicant may be asked to produce additional references. Standard practice requires contacting the department chairperson of any hospital at which the applicant practiced as well as contacting peer references provided by the applicant. Shershow opined that allowing an applicant's economic competitors to submit solicited or unsolicited comments without speaking to the applicant first was unfair practice.

Here, defendant was entirely unreasonable in failing to call the surgery department chiefs at Mountainside, St. Joseph's, and Metropolitan. Defendant also acted inappropriately when he called Syracuse, who had no position of authority at Mountainside, and Elrabie, who was the head of vascular surgery only at St. Joseph's. Assuming that defendant received negative information **[***37]** from Syracuse and Elrabie, defendant then should have asked them the bases for their statements and verified the specific concrete facts alleged. Most significantly, defendant should not have repeated these statements to the MEC without first confirming them. He should have merely asked the MEC for additional time to continue his investigation until the allegations could be resolved.

Shershow further believed that defendant's request to plaintiff for additional information was unprecedented and onerous. Both the credentials committee and the MEC should have refused to honor defendant's request for this information and either told defendant to call the surgery chief at Mountainside or made that call themselves. Also unprecedented was obtaining an external peer review of an applicant's records. Such a review is necessitated only when there is some internal adverse peer review or internal controversy. Finally, Shershow opined that it was unreasonable for IGH to expect plaintiff, once he got privileges at IGH, to be supervised by defendant, given the history of the litigation.

Shershow's opinion was not altered by the broad language contained in the waiver and release signed by plaintiff **[***38]** in connection with his application. The expert believed that the "universal **[*227]** expectation" of doctors was that the only people contacted would be the references given.

Eric Nelson Burkett, defendants' credentialing expert, opined that defendant acted in an appropriate manner to further investigate plaintiff's credentials. Except for Wyckoff, all of plaintiff's references were more than two years old. Additionally, **[**823]** Wyckoff was only a general surgeon and plaintiff should have offered a vascular surgeon at Mountainside or St. Joseph's as a reference. Burkett believed that it was within defendant's prerogative to go to any peer source he felt was authoritative. Finally, the release form signed by plaintiff, which gave defendant that right, was a standard one used by most hospitals, and defendant did not have to ask plaintiff's permission before making the phone calls beyond the submitted references.

Significantly, however, Burkett conceded that if the reviewer believes there is a conflict of interest, the reviewer should ask someone else to make the phone calls. Also, Burkett admitted that a request for one year of plaintiff's surgical cases probably would have been sufficient here. In **[***39]** previous deposition testimony, Burkett had indicated that defendant should have asked plaintiff for only six months of his cases or for only those cases which had complications. Nevertheless, Burkett maintained that defendant was entitled to the two-year list, as well as all of the accompanying information requested, to be able to ascertain whether any cases presented a quality of care problem. That Syracuse held no position of authority at Mountainside was irrelevant to Burkett. As a vascular surgeon, Syracuse was a peer of plaintiff and in a good position to evaluate plaintiff's performance over the past two years. Examining plaintiff's charts and records was the best way for defendant to verify what Syracuse told him.

According to Burkett, it was also appropriate for defendant to tell the MEC why he was withholding a recommendation on plaintiff's application. Burkett admitted, however, that once plaintiff's application was approved, it was not unreasonable for plaintiff to ask to be supervised by someone other than defendant.

[*228] On cross-examination, Burkett gave conflicting testimony with respect to whether defendant had violated the hospital's manual by failing to give plaintiff **[***40]** notice of the reasons for the deferral of his application. He also admitted that defendant should have asked himself whether any reference had an "ax to grind" with plaintiff. Burkett indicated that defendant should have called Wyckoff to reconcile the difference between Wyckoff's evaluation and Syracuse's accusations. Finally, Burkett admitted that if defendant fabricated or embellished the statements he attributed to Syracuse or Elrabie, then he would have breached his duty of fairness to plaintiff.

To challenge plaintiff's antitrust claims, defendants offered the testimony of Gerry Goodrich, a former State deputy commissioner of health who subsequently became president and CEO of IGH. Goodrich explained that in 1995 and 1996, thirteen hospitals were located in Essex County, making that county one of the more densely hospital-serviced communities in the nation. At least five other hospitals shared the same service area with IGH. Two of those hospitals, Newark Beth-Israel and St. Barnabas, were considerably larger than IGH, each having close to 600 beds and 20,000 to 30,000 admissions a year, compared to IGH's 157 beds and 4000 admissions. In addition, three of the five hospitals **[***41]** were full-service institutions, whereas IGH was a small medical surgical hospital, providing no obstetrical, pediatric, or other tertiary services.

Goodrich acknowledged that defendant was opinionated, voluble, envied, and controversial, but did not believe that defendant "got his way" at IGH more than any other doctor. Although defendant was the sole provider of the service of reading non-invasive lab reports, IGH also had exclusive contracts with several other doctors or groups of doctors for other types of services. **[**824]** To Goodrich's knowledge, no one at IGH conspired with defendant to keep plaintiff from getting hospital privileges. IGH tried to have as many doctors as possible with privileges, because it meant more business. Mody, IGH's executive director, also confirmed that **[*229]** IGH was always recruiting doctors in all specialties, including in the vascular surgery area, to enhance services provided and bring in new patients.

In her written opinion, the trial judge made certain discrete findings that are relevant to our disposition of the appeal. The judge found that, in reviewing plaintiff's application, defendant's mission was to "protect his fiefdom" and to keep out qualified competition **[***42]** by any means possible and "at all costs." When faced with the "red flag" of Wyckoff's caveat that plaintiff be supervised and observed at IGH, defendant chose not to call the author of that note because he "knew in his heart" that Wyckoff would give plaintiff a very positive recommendation. Instead, defendant chose to call Syracuse, a competitor of plaintiff's. The judge also found that rather than call Wyckoff to verify the information given by Syracuse, defendant started an endurance test of "burdensome, inappropriate and unnecessary" requests to wear down plaintiff. Significantly, the judge found defendant's demeanor on the witness stand to be "arrogant and egotistical." The judge had no doubt about his motivation, with all of these findings relevant to the judge's ultimate finding that defendant was not a credible witness.

The judge further found that defendant published both Syracuse's and Elrabie's statements, later revealed as untrue, to the MEC. While she believed that both Syracuse and Elrabie had given negative information to defendant, she could not tell to what extent. She found that Syracuse was not a believable witness and that from his demeanor on the witness stand, **[***43]** "he clearly did not want to admit too much." While Syracuse denied making specific negative statements about plaintiff to defendant, he did admit to general criticisms about him. Elrabie flatly denied making the statements defendant attributed to him. In any event, according to the judge, defendant should have been more circumspect in the weight he gave to those statements and in the way he confirmed their veracity.

[*230] Plaintiff's income levels showed that his credentials and talent were in demand. Also, the evidence demonstrated that defendant had a "virtual lock" on the vascular surgery at IGH. The delay in completing plaintiff's credentialing process, coupled with the negative statements made about plaintiff in connection with that process, led other doctors at IGH to question plaintiff's competence. That meant fewer referrals and diminished income for plaintiff. Furthermore, the initial wrongful denial of privileges to plaintiff at IGH because of plaintiff's refusal to comply with defendant's unwarranted requests, prompted Mountainside to launch its own investigation into plaintiff's practices.

The judge also concluded that Shershow's expert testimony established that defendants **[***44]** violated standard practices in the way they processed plaintiff's application. Burkett, the defense expert, testified "quite incredibly" in the judge's opinion. He ultimately agreed with plaintiff that there had been no negative information in plaintiff's file before defendant made his phone calls, that someone other than defendant was designated to verify any allegations, and that defendant should have called Wyckoff for information about plaintiff's references and Syracuse's allegations. Moreover, at no time did anyone on the credentials committee or the MEC at IGH ask defendant, who generated a high number **[**825]** of patients at the hospital, to modify his request. Rather, the members of both committees simply endorsed defendant's recommendations.

With respect to plaintiff's tortious interference claim, the judge found that plaintiff had been invited to apply to IGH and had been told that IGH had a need for more than one practicing vascular surgeon. Thus, he had a reasonable expectation that patient referrals and income would be forthcoming. The judge concluded that plaintiff, whose excellent credentials defendant recognized would make him a viable option for referrals, posed a threat **[***45]** to defendant's "virtual lock" on vascular surgery. This, in turn, would threaten to diminish defendant's own $ 500,000 annual income. Such risk prompted defendant to seek through discovery, **[*231]** embellishment or creation, negative information to keep plaintiff out of the hospital, or to delay the process so that plaintiff would withdraw his application out of fear or frustration.

The judge had no doubt that defendant had acted maliciously by failing to handle plaintiff's application fairly, his deliberate delays in violation of the hospital's credentialing procedures manual, and his interjection and publication of extremely damaging false information about plaintiff's competence. IGH was also responsible because its committees and their members did nothing to stop defendant's baseless hunt for negative information, and thus IGH acquiesced in defendant's conduct. The judge also found that plaintiff was damaged by defendants' tortious conduct. "Based upon [plaintiff's] income making ability at Mountainside and Valley Hospitals it is reasonable that he would have done the same at IGH had he been given timely privileges."

With respect to plaintiff's antitrust claims, the judge found that **[***46]** IGH was immune from such liability under *N.J.S.A. 56:9-5(b)(5)*. However, defendant was liable because he acted not only as an agent of IGH, but also to protect his own income. The judge found that defendant held a monopoly in vascular surgery at IGH and worked to keep plaintiff out of that institution. As such, for purposes of analysis under the antitrust laws, IGH was the "relevant market."

With respect to plaintiff's defamation claim, the judge found that the statements made by Elrabie and Syracuse which defendant published "pierce one's heart [in] their severity." The comments, if believed, would end plaintiff's career. The same was true for the statements made by defendant to Sawhney. Defendant either fabricated the statements from general information he reviewed, or acted with malice and wanton disregard in failing to verify them. Nor did the committees at IGH verify the statements or ask defendant to do so. Moreover, the statements were meant to damage plaintiff's reputation. Because of the gossip about plaintiff's credential problems, he suffered harm with respect to his work at Mountainside.

[*232] The judge rejected plaintiff's breach of contract claim, **[***47]** finding that the law had not extended contractual rights to hospital procedural manuals which set forth appropriate procedures for granting privileges to hospitals. A contract was formed by bylaws only once privileges were granted. Moreover, the hospital's general duty of good faith did not equate with a contract.

With respect to damages, the judge found the loss due to the tortious interference and antitrust claims were the same, i.e., what plaintiff would have earned at IGH had he been granted privileges in September 1995 rather than September 1997. Defendant earned $ 1 million in that two-year period. The judge found that plaintiff reasonably could have received about twenty-five percent of defendant's **[**826]** referrals; hence, his damages were $ 250,000. The damages to plaintiff due to defendant's defamatory statements were reflected in the years 1996, 1997, and 1998, when plaintiff's gross income substantially dropped from its 1995 high of $ 302,000. Notably, in 1999, plaintiff's income returned to over $ 300,000. The judge found that the loss in plaintiff's net income for this three-year period was $ 472,000, and that no proofs were presented to show any basis for this loss other than **[***48]** defendant's conduct. Plaintiff had also established emotional harm "as evidenced by his being on the verge of tears" when he testified. He clearly had suffered both personal and professional humiliation and had been deprived of the "blessing" of patient care. The judge believed that $ 250,000 was a "fair and reasonable" amount to compensate for this emotional harm.

The judge also found that defendant's conduct was "malicious and heinous," warranting a punitive damage award of $ 250,000. Such an award would punish defendant and send a message to deter others from similar conduct. The court later clarified that of the $ 250,000 awarded for tortious interference and antitrust, $ 125,000 represented a joint and several award against IGH and defendant for tortious interference, and $ 125,000 represented the award against defendant alone for antitrust. Plaintiff was entitled to treble that amount, or $ 375,000. The judge also awarded **[*233]** prejudgment interest and attorneys' fees, which are not disputed on appeal.

II.

We first address the issue of plaintiff's antitrust claim. Defendant challenges the judge's finding in favor of plaintiff, asserting that plaintiff failed to establish three **[***49]** elements of a viable antitrust cause of action: 1) the geographic market; 2) the product market as vascular surgery; and 3) defendant's exercise of monopoly power so as to cause injury to competition.

We start our analysis with the language of the statute. *N.J.S.A. 56:9-3* sets forth the underlying proscriptive conduct: ***HN1***[] "Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce, in this State, shall be unlawful." *N.J.S.A. 56:9- 4(a)* follows and provides: ***HN2***[] "It shall be unlawful for any person to monopolize, or attempt to monopolize, or to combine or conspire with any person or persons, to monopolize trade or commerce in any relevant market within this State." ***HN3***[] The dominant purpose of the New Jersey Antitrust Act (the Act), *N.J.S.A. 56:9-1 to 19*, is to advance public policy in favor of competition and to prevent practices that deprive consumers of the benefit of competitive markets. *Ideal Dairy Farms, Inc. v. Farmland Dairy Farms, Inc., 282 N.J. Super. 140, 175, 659 A.2d 904 (App.Div.)*, *certif. denied, 141 N.J. 99, 660 A.2d 1197 (1995)*.

N.J.S.A. 56:9-18 **[***50]** ***HN4***[] mandates that the Act "shall be construed in harmony with ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws of those states which enact it." We look to federal jurisprudence to guide our interpretation of the Act. *G & W, Inc. v. Bor. of E. Rutherford, 280 N.J. Super. 507, 512, 656 A.2d 11 (App.Div.1995)*; *Van Natta Mech. Corp. v. DiStaulo, 277 N.J. Super. 175, 188, 649 A.2d 399 (App.Div.1994)*.

[*234] ***HN5***[] The federal analog to *N.J.S.A. 56:9-3*, the restraint of trade provision, is § 1 of the Sherman Act (*15 U.S.C.A. § 1*), [11] which **[**827]** contains virtually identical language. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 175, 659 A.2d 904*. The issue is joined by the parties in their disparate interpretation of the applicable sections of the Act that apply here. Defendants analyze plaintiff's claim solely under *N.J.S.A. 56:9-4*, ***HN6***[] the

[11] *§ 1* provides: ***HN7***[] "Every contract, combination in the form of trust or otherwise, or conspiracy, inrestraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal . . . ." *15 U.S.C.A. § 1*.

monopolization provision, which is analogous to § 2 of the Sherman Act, *15 U.S.C.A. § 2*. [12] Plaintiff urges that his claim is viable under *N.J.S.A. 56:9-3* **[***51]** and invokes the "per se" rule of liability.

Unfortunately, we are constrained by the failure of the trial judge to analyze either provision of the Act or to set forth the statutory basis for the entry of judgment in favor of plaintiff. The trial judge's opinion on plaintiff's antitrust claim consisted of one paragraph and made no reference to either state or federal law.

> IGH is immune by virtue of *N.J.S.A. 56:9-5(b)(5)*. Dr. Soriano is **[***52]** not. His conduct was dual in that he acted on behalf of IGH as to credentialing and on his own behalf in protecting his income. IGH wants qualified competent physicians to serve its patient population. If one, two or more vascular surgeons do the work the result is the same for IGH. That is not the case for Dr. Soriano. He has virtually been the only act in town. Dr. Soriano holds a monopoly in vascular surgery at IGH and worked to keep Dr. Patel out. The only way to do work and get referrals at IGH is to have privileges. That is the relevant market. All the previously cited facts support a finding against Dr. Soriano.

We set forth the basic principles regarding restraint of trade. ***HN9***[] Under *N.J.S.A. 56:9-3*, a plaintiff must prove the existence of a conspiracy in restraint of trade and either an unlawful purpose or an anti-competitive effect. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 186, 659 A.2d 904*. Unilateral action, regardless of its motivation, cannot constitute a violation of **[*235]** *N.J.S.A. 56:9-3*. *Id. at 187 n.3, 659 A.2d 904* (citing *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 110 (3d Cir.1980)* **[***53]**). Instead, plaintiff must establish a unity of purpose, a common design and understanding, or a meeting of the minds in an unlawful arrangement between, at minimum, two independent, self-interested economic entities. *Urdinaran v. Aarons, 115 F. Supp. 2d 484, 488 (D.N.J.2000)*. Such a proof must be made by direct or circumstantial evidence that tends to prove a common scheme designed to achieve an unlawful objective. *Brown v. Our Lady of Lourdes Med. Ctr., 767 F. Supp. 618, 630 (D.N.J.1991)*, *aff'd o.b., 961 F.2d 207 (3d Cir.1992)*. ***HN10***[] An antitrust conspiracy where hospital surgical privileges have been denied cannot be inferred from the mere opportunity or ability to conspire. *Id. at 629-30*; *Petrocco v. Dover Gen. Hosp. & Med. Ctr., 273 N.J. Super. 501, 525, 642 A.2d 1016 (App.Div.)*, *certif. denied, 138 N.J. 264, 649 A.2d 1284 (1994)*. Even if the ultimate peer review decision is consistent with the economic interests of a competitor, conspiracy cannot be inferred "from whole cloth." *Urdinaran, supra, 115 F. Supp. 2d at 488*.

Moreover, ***HN11***[] "[t]here can be no [] contract, combination or conspiracy **[***54]** by a corporation . . . with its own officers, **[**828]** agents or employees, who are performing their usual job of formulating and carrying out its managerial policy." *Exxon Corp. v. Wagner, 154 N.J. Super. 538, 545, 382 A.2d 45 (App.Div.1977)*; *see* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 2741, 81 L. Ed. 2d 628, 642 (1984)* (stating that employees of same company do not provide plurality of actors necessary for conspiracy under *§ 1 of the Sherman Act*). For that reason, a hospital is incapable of conspiring with its staff in deciding whether to grant staff privileges. *Petrocco, supra, 273 N.J. Super. at 524, 642 A.2d 1016.*

The Third Circuit has similarly held that ***HN12***[] a hospital cannot conspire with its executive or medical staff committees. *Nanavati v. Burdette Tomlin Mem'l Hosp., 857 F.2d 96, 117-18 (3d Cir.1988)*, *cert. denied,* **[*236]** *489 U.S. 1078, 109 S. Ct. 1528, 103 L. Ed. 2d 834 (1989)*; *Weiss v. York Hosp., 745 F.2d 786, 817 (3d Cir.1984)*, *cert. denied, 470 U.S. 1060, 105 S. Ct. 1777, 84 L. Ed. 2d 836 (1985)*. While each medical staff member has an independent **[***55]** economic interest in competition with one another, thus satisfying the concerted action element of a restraint of trade claim, the staff as an entity has no interest in competition with the hospital and, in fact, operates similarly to an officer of a corporation who makes decisions on behalf of the corporate entity. *Nanavati, supra, 857 F.2d at 118*; *Weiss, supra, 745 F.2d at 817*. *But see* *Islami v. Covenant Med. Ctr., Inc., 822 F. Supp. 1361, 1381-82 (N.D.Iowa 1992)* (noting the split in circuits on this issue and an exception to the rule where agents have a personal stake involved).

---

[12] *§ 2* provides: ***HN8***[] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . ." *15 U.S.C.A. § 2*.

Applying these principles here, we conclude that plaintiff did not demonstrate the concerted action element of a restraint of trade claim under *N.J.S.A. 56:9-3*. The trial judge found that defendant acted in a dual capacity as an agent of the hospital and in his own capacity to further his own economic interests. While that finding is supported by the record, the judge also found that IGH had absolutely no economic interest in preventing plaintiff from getting privileges since, as the evidence showed, the hospital either would gain from having additional **[***56]** doctors or would suffer no detriment. Only defendant would lose from the presence of competitors.

There was no proof that defendant conspired with anyone, much less IGH or one of its agents. That IGH may have acquiesced to defendant's unreasonable demands and chosen to let him "run the show" is not proof of an unlawful agreement between two separate and independent entities.

Plaintiff also failed to prove the necessary unlawful purpose or anticompetitive effect for a claim under *N.J.S.A. 56:9-3*. ***HN13***[] A restraint of trade claim can be evaluated by two methods: the rule of reason, and the per se rule argued by defendant. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 175, 659 A.2d 904*.

[*237] Under a per se analysis, plaintiff need prove only the existence of an illegal agreement and defendant's anticompetitive intent; anticompetitive effect is presumed. *Id. at 178, 186, 659 A.2d 904*. However, the per se rule is reserved for plainly anticompetitive practices, such as price-fixing and tying arrangements, which are always considered harmful to competition. *Id. at 177, 659 A.2d 904*; *G & W, Inc., supra, 280 N.J. Super. at 513, 656 A.2d 11*; *EZ Sockets, Inc. v. Brighton-Best Socket Screw Mfg. Inc., 307 N.J. Super. 546, 552, 704 A.2d 1364 (Ch.Div.1996),* **[***57]** *aff'd, 307 N.J. Super. 438, 704 A.2d 1309 (App.Div.1997)*.

HN14[] Both the United States Supreme Court and our Supreme Court have been reluctant **[**829]** to extend the per se rule, especially in the context of hospital-doctor associations. *See*, *e.g.*, *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 16, 104 S. Ct. 1551, 1560, 80 L. Ed. 2d 2, 15 (1984)* (tying arrangement between hospital and group of medical specialists does not warrant per se invalidation absent proof of market power); *Desai v. St. Barnabas Med. Ctr., 103 N.J. 79, 97-98, 510 A.2d 662 (1986)* (hospital-doctor associations are not inherently anticompetitive).

We reject the application of the per se rule of liability here. Even assuming that defendant and IGH acted in concert, there was no evidence of plainly anticompetitive conduct on the part of these defendants that should relieve plaintiff of the burden of proving anticompetitive effect. Most significantly, the judge made no such finding of such conduct. Although plaintiff relies on defendant's overwhelming market share to prove a per se restraint of trade, his analysis rests on what we determine to be the improper assumption **[***58]** that the relevant market was IGH, a subject we address, *infra.*

HN15[] Under the rule of reason, only restraints of trade that are "unreasonably restrictive of competitive conditions" are illegal. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 175, 659 A.2d 904* (citing *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 60-66, 31 S. Ct. 502, 516-18, 55 L. Ed. 619, 645-47 (1910)*). The focus is on whether the conduct adversely affects competition. **[*238]** A trial judge must closely examine the relevant product and geographic markets and evaluate the effect of the defendant's conduct on that market. *Pomanowski v. Monmouth Cty. Bd. of Realtors, 89 N.J. 306, 315-16, 446 A.2d 83*, *cert. denied, 459 U.S. 908, 103 S. Ct. 213, 74 L. Ed. 2d 170 (1982)*; *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 176, 659 A.2d 904*; *EZ Sockets, Inc., supra, 307 N.J. Super. at 553, 704 A.2d 1364*. The fact that the conduct may have an injurious effect on an individual competitor is irrelevant. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 176, 659 A.2d 904*; *EZ Sockets, Inc., supra, 307 N.J. Super. at 553, 704 A.2d 1364*; *see* *Urdinaran, supra, 115 F. Supp. 2d at 489* (interpreting **[***59]** federal statute).

The balancing process under the rule of reason requires defining the market in which the restraint operates, evaluating the evils inherent in the conduct, and weighing those anticompetitive influences against any pro-competitive justifications. *Pomanowski, supra, 89 N.J. at 315-16, 446 A.2d 83*; *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 176, 659 A.2d 904*. Proof of adverse effects on profits is insufficient as a matter of law. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 188, 659 A.2d 904*. "Actual or probable harm to *competition* is essential under a reasonableness approach." *Ibid.* "The consumer does not care how many sellers of a particular good or service there are; he cares only that there be enough to assure him a competitive price and quality." Id. at 188-89, 659 A.2d 904 (quoting Prods. Liab. Ins. Agency, Inc. v. Crum & Forster Ins. Cos., 682 F.2d 660, 663-64 (7th Cir.1982)).

The analysis is similar HN16[] for a monopolization claim under N.J.S.A. 56:9-4. A plaintiff must show that defendants have a dangerous probability of achieving monopoly power in the relevant market. **[***60]** Van Natta Mech. Corp., supra, 277 N.J. Super. at 188, 649 A.2d 399; *see* Brader v. Allegheny Gen. Hosp., 64 F.3d 869, 877 (3d Cir.1995) (interpreting § 2 of Sherman Act). A defendant is prohibited from using its monopoly power to gain a competitive advantage by destroying or eliminating its competitors. **[*239]** G & W, Inc., supra, 280 N.J. Super. at 513, 656 A.2d 11. **[**830]** Monopoly power is defined as the power to control prices or exclude competition in the relevant market. *Ibid.* The likelihood of achieving a monopoly is demonstrated through a market share sufficient to create a monopoly. Van Natta Mech. Corp., supra, 277 N.J. Super. at 188, 649 A.2d 399. To demonstrate a monopoly under § 2 of the Sherman Act, a plaintiff must prove "possession of monopoly power in the relevant market and [] willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." [13] Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 2089, 119 L. Ed. 2d 265, 292-93 (1992) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778, 786 (1966)); **[***61]** Urdinaran , supra, 115 F. Supp. 2d at 491; Brown, supra, 767 F. Supp. at 630.

HN18[] The critical issue under both analyses is demonstration of the relevant market. Where a plaintiff fails to adduce any proofs regarding market area or monopoly power, any antitrust claim will fail and must be dismissed as a matter of law. Desai, supra, 103 N.J. at 99, 510 A.2d 662. *See* Belmar v. Cipolla, 96 N.J. 199, 213-18, 475 A.2d 533 (1984); Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 190, 659 A.2d 904. Moreover, since the market power necessary for a monopolization claim requires **[***62]** something more than the market power necessary for a restraint of trade claim, a plaintiff who fails in its proofs for the latter will also fail in its proofs for the former. Urdinaran, supra, 115 F. Supp. 2d at 491.

[*240] HN19[] The relevant geographic market is the area in which potential buyers may rationally look for the goods or services they seek. It is the area where customers look to buy products, not the area where the seller attempts to sell its product. Id. at 490. In the case of hospitals, the geographic market inquiry focuses on the area within which hospital "customers" can turn to other "sellers" (hospitals) if the hospital raises prices or restricts output. Brown, supra, 767 F. Supp. at 630. A judge must consider, among other factors, whether the hospital is near major metropolitan areas and whether those areas also have hospitals. *See* id. at 631. Absent an allegation that a hospital exclusively serves a particular area or offers a unique set of services, an antitrust plaintiff may not limit the geographic market to a single hospital. Brader, supra, 64 F.3d at 877.

In Urdinaran, supra, 115 F. Supp. 2d at 489, the district court **[***63]** held that a plaintiff failed to prove the elements of an antitrust claim where he alleged no more than a decline in his business as a result of the loss of his privileges at the Atlantic City Medical Center, and where he failed to provide any evidence of rising prices or a decline in the quality of care to customers in the geographic area. The court also noted that surgical patients in the Atlantic City area might take advantage of medical facilities as far away as Philadelphia. Id. at 490.

Similarly, in Belmar, supra, 96 N.J. at 201, 475 A.2d 533, the Supreme Court was faced with a challenge to a hospital's decision to enter into an exclusive contract with a group of anesthesiologists for the **[**831]** provision of all anesthesiology services at the hospital. The Court refused to find any antitrust violation where the record was devoid of any proof that patients were forced to use the services of those doctors as a result of the hospital's market power. Id. at 218, 475 A.2d 533. Plaintiffs offered no evidence of the relevant market area for anesthesiological

[13] HN17[] The only difference between the federal and state statutes is that the Act does not require that defendant's activity affect interstate commerce. Urdinaran, supra, 115 F. Supp. 2d at 492. It is the effect on interstate commerce that supplies the necessary federal jurisdiction under the Sherman Act. McLain v. Real Estate Bd. of New Orleans, Inc., 444 U.S. 232, 241, 100 S. Ct. 502, 508, 62 L. Ed. 2d 441, 449-50 (1980).

services and rested their case on the sole fact that the choice of anesthesiologists at that one hospital **[***64]** was limited to doctors comprising that one group of doctors. *Ibid.* The record also showed that there were four **[*241]** other hospitals within a ten-mile radius of the defendant hospital, and that the defendant hospital had forty-five percent of the share of the market in its "primary area" and eighteen percent of the market in its "secondary area." *Id. at 213, 475 A.2d 533*.

Applying these principles here, we conclude that the judge's finding of violation of the Act must be reversed. Plaintiff produced nothing to support a finding regarding defendant's market power and, like the plaintiffs in *Belmar* rested his case on the sole fact that patients *at IGH* would be limited to using defendant as their vascular surgeon.

If anything, defendants established in their case in chief that the relevant geographic market for vascular surgical services in the community in which IGH was located is *not* limited to IGH. There are numerous other hospitals in Essex County, even disregarding the readily accessible New York hospital market, including many hospitals that are larger and provide a fuller range of services than IGH.

Most significantly, ***HN20***[] any relevant inquiry for purposes of ***antitrust*** **[***65]** ***law*** is the effect on consumers, not on an individual competitor. Defendant's conduct did not restrict the quality or price of vascular surgical services in and around Essex County, and plaintiff's claim must fail. Plaintiff failed to demonstrate that IGH was the only hospital in the community providing these services. That defendant was the sole provider of such services at IGH was irrelevant. Likewise irrelevant for the purposes of application of the Act is that defendant acted improperly in making himself the sole provider of services at IGH. ***HN21***[] The antitrust laws are not intended to replace the common law of unfair competition or to afford remedies for all business torts. *Ideal Dairy Farms, Inc., supra, 282 N.J. Super. at 185, 659 A.2d 904*. Whereas the law of unfair competition is grounded in ethical considerations, ***antitrust law*** is grounded solely in economic considerations and requires specific proof for recovery. *Ibid.* That proof was sorely lacking here. The judge should have dismissed plaintiff's antitrust claim.

[*242] III.

We reach a different result on plaintiff's claim for tortious interference.

HN22[] To establish a cause of action for tortious interference with a prospective economic **[***66]** advantage, a plaintiff must prove that he had a reasonable expectation of advantage from a prospective contractual or economic relationship, that defendant interfered with this advantage intentionally and without justification or excuse, that the interference caused the loss of the expected advantage, and that the injury caused damage. *Printing Mart-Morristown v. Sharp Elecs. Corp., 116 N.J. 739, 751-52, 563 A.2d 31 (1989)*. On appeal, defendants challenge only the first element of proof. That is, they claim that plaintiff failed to prove that his expectation of future vascular surgery referrals was reasonable or rose to the level of a protectable interest.

The protected interest need not rise to the level of an enforceable contract. **[**832]** *Jenkins v. Region Nine Hous. Corp., 306 N.J. Super. 258, 265, 703 A.2d 664 (App.Div.1997)*, *certif. denied, 153 N.J. 405, 709 A.2d 798 (1998)*. Instead, plaintiff must demonstrate that without the interference, there was a reasonable probability that he would have received the anticipated economic benefits. *Lamorte Burns & Co. v. Walters, 167 N.J. 285, 306, 770 A.2d 1158 (2001)*; *MacDougall v. Weichert, 144 N.J. 380, 404, 677 A.2d 162 (1996).* **[***67]**

The record clearly supported the judge's findings and conclusion that but for defendants' malicious interference with plaintiff's application for privileges, that application would have been approved. It is true that, once approved, plaintiff was not guaranteed any particular percentage of the referrals at IGH. Moreover, plaintiff's reliance on Patrawalla's optimistic prediction that he would receive thirty percent of the vascular surgery referrals was unfounded. Nevertheless, these are damage rather than liability issues. They did not bar plaintiff from any recovery, especially as it was undisputed that without privileges, a doctor **[*243]** cannot perform any surgery at that particular institution. The issue, then, was not whether plaintiff proved a loss to a reasonable expectation of economic advantage, but the extent of that loss, an issue we address, *infra.*

We affirm the judgment of liability on plaintiff's tortious interference claim.

IV.

Defendants argue that the judgment in plaintiff's favor on the defamation claim must be reversed because this claim was barred by the one-year statute of limitations; the evidence failed to establish that the alleged defamation caused plaintiff **[***68]** the damages found by the judge; and plaintiff failed to show knowledge of falsity or reckless disregard for the truth, the appropriate standard when a qualified privilege applies.

With respect to the time bar issue, plaintiff responds that defendants waived this defense by failing to plead it as an affirmative defense; that his claim was for trade libel, not defamation, and was therefore governed by a six-year statute of limitations; that the equitable tolling and fraudulent concealment doctrines applied; and that his amended complaint related back to the filing date of the initial verified complaint.

Although we need not address the issues of waiver, equitable tolling, fraudulent concealment or relation back as we now conclude that plaintiff did set forth a cause of action for trade libel that was not barred by the one-year limitation period, we first set forth the relevant statute and then recount the procedural background of this litigation to put our determination in context.

N.J.S.A. 2A:14-3 provides that: ***HN23***[] "Every action at law for libel or slander shall be commenced within 1 year next after the publication of the alleged libel or slander." However, **[***69]** *N.J.S.A. 2A:14-1* also provides:

> ***HN24***[] Every action at law . . . for any tortious injury to real or personal property, for taking, detaining, or converting personal property, . . . [or] for any tortious injury to the rights of another not stated in sections 2A:14-2 and *2A:14-3* of this Title, . . . **[*244]** shall be commenced within 6 years next after the cause of any such action shall have accrued.

On September 9, 1996, plaintiff filed his initial verified complaint in the Chancery Division, seeking to compel defendants to act on his application. At that point in time, plaintiff had not yet received notification that his application had been denied. Once that notification was received, apparently several days later, his complaint became one for relief from the onerous request **[**833]** to supply two years' worth of his surgical records. That relief was granted by the Chancery judge in October 1996. In June 1997, plaintiff was finally granted the privileges he sought. Within a few months, he filed his amended complaint, which was transferred to the Law Division, tried and is now the subject of this appeal.

Plaintiff's initial complaint contained three counts: the first count alleged **[***70]** breach of IGH's credentialing procedures manual, bylaws, rules and regulations; the second count alleged tortious interference with plaintiff's prospective economic advantage and libel and slander which "*adversely affected [plaintiff's] professional reputation and trade and business;*" and the third count alleged violation of the antitrust statute (emphasis added).

As of the filing of this initial complaint, plaintiff did not yet know about the details of defendant's phone conversations with Syracuse and Elrabie. Those details were revealed in defendant's certification of September 18, 1996, filed in opposition to plaintiff's order to show cause. However, by virtue of defendant's October 25, 1995, letter to plaintiff, plaintiff already knew that defendant had spoken to doctors at Mountainside and St. Joseph's who had allegedly transmitted negative information about plaintiff. Plaintiff also knew that Tiu had been copied on this letter. Moreover, plaintiff suspected that it was Syracuse to whom defendant had spoken at Mountainside, because plaintiff's attorney immediately wrote to Syracuse for his response to these allegations. Although Syracuse denied making the specific statements **[***71]** attributed to him, he did admit that he told defendant to obtain a list of plaintiff's cases.

[*245] We cannot discern from the record at what point plaintiff found out that on July 13, 1995, defendant related to the MEC what he learned from Syracuse. It was not disputed that on October 5, 1995, the MEC voted to redact the minutes of the July 13 meeting. However, the original minutes for July 13 were made available to plaintiff at some point in discovery following the filing of the initial complaint.

Plaintiff's amended complaint filed on August 14, 1997, contained a separate count for defamation. In that count, plaintiff alleged that defendant had "in certain conversations that he had with and in the hearing and presence of certain persons, including but not limited to members of the Hospital's Medical Executive Committee, maliciously spoke and published of and concerning [plaintiff], certain slanderous, false, libelous, malicious, scandalous and defamatory words." Specifically, these words were the ones defendant told the MEC about his conversations with Syracuse and Elrabie. Plaintiff alleged that the slanderous statements injured and damaged him in his good name and reputation, "including **[***72]** but not limited to other physicians at the Hospital and the other hospitals where [plaintiff] holds privileges."

In their answer to plaintiff's amended complaint, defendants did not affirmatively plead the defense of the statute of limitations. However, they did plead the defense of failure to state a claim upon which relief could be granted. In November 2000, defendants filed a notice of motion to dismiss the defamation claim on various grounds, including the one-year statute of limitations bar. Defendants argued that this was not a trade libel claim subject to a six-year statute of limitations. On February 26, 2001, the judge denied the motion. She found that the damages claimed by plaintiff went to the alleged interference with his ability to practice at IGH. Even if the one-year statute applied, defendants had waived the defense "by failure to so **[**834]** plead and move in a timely fashion on that ground."

However, following trial, the judge reversed herself and found that defendants' pleading of "failure to state a claim" **[*246]** *was* sufficient to raise the statute of limitations defense. However, the claim was not time-barred because "[w]hen the statements were made and when [plaintiff] **[***73]** was able to determine when they were made was like chasing a moving target." Moreover, specific information was within defendants' control. While plaintiff's original complaint did not plead this cause of action "in so many words," the claim was there "by inference" and was within the knowledge of defendants, who knew that "negative statements" had delayed plaintiff's credentialing process. We disagree with the judge that this was a defamation case, and plaintiff was subject to the one-year limitations period. Our review of the record reveals that this cause of action should have been reviewed as one of trade libel where a six-year limitations period applies. Our determination renders moot any asserted error as to the application of the one-year limitations period.

We now address the principles of law applicable to plaintiff's asserted trade libel claim. ***HN25***[] Trade libel identifies the tort addressing aspersions cast upon one's business operation. The tort is also known as injurious falsehood, disparagement of property, or commercial disparagement. *Prosser & Keeton on Torts* § 128 at 963 (5th ed. 1984) (*Prosser & Keeton*). However, the tort is broader in scope than any of those **[***74]** terms would indicate, and is probably as broad as any injurious falsehood which disturbs prospective advantage. *Id.* at 963, 967. It is similar to the tort of intentional interference with one's economic relations, rather than a branch of the general harm to reputation involved in libel and slander. *Id.* at 964; *see* *Henry V. Vaccaro Constr. Co. v. A.J. DePace, Inc., 137 N.J. Super. 512, 514, 349 A.2d 570 (Law Div.1975)* (noting that "the tort of trade libel is but one part of a rather amorphous concept" consisting of communication to a third person of false statements concerning the plaintiff, his property, or his business).

A plaintiff alleging trade libel must prove publication of a matter derogatory to the plaintiff's property or business, of a kind designed to prevent others from dealing with him or otherwise to **[*247]** interfere with plaintiff's relations with others. *Prosser & Keeton, supra,* § 128 at 967. The communication must be made to a third person and must play a material part in inducing others not to deal with plaintiff. *Ibid.*; *Enriquez v. W. Jersey Health Sys., 342 N.J. Super. 501, 524, 777 A.2d 365 (App.Div.)*, *certif. denied, 170 N.J. 211, 785 A.2d 439 (2001).* **[***75]**

HN26[] Certain differences between defamation and trade libel are significant. Whereas a defamation claim is subject to a one-year statute of limitations, a claim for trade libel is subject to the general six-year statute of limitations applicable to malicious interference claims. *Crawford v. W. Jersey Health Sys. (Voorhees Div.), 847 F. Supp. 1232, 1239* and n. 7 (D.N.J.1994); *Henry V. Vaccaro Constr. Co., supra, 137 N.J. Super. at 516, 349 A.2d 570*. Also, whereas the need to demonstrate damages is waived in a defamation suit where the statement is oral, constitutes slander per se, and concerns conduct incompatible with the plaintiff's business, *McLaughlin v. Rosanio, Bailets & Talamo, Inc., 331 N.J. Super. 303, 313-14, 751 A.2d 1066 (App.Div.2000)*, proof of damages is essential in an action for trade libel. *Prosser & Keeton, supra,* § 128 at 970-71.

HN27[] Interference by falsehoods that cause pecuniary loss, but are not personally **[**835]** defamatory, has been regarded as a tort "more or less distinct" from defamation. *Id.* at 962. Distinguishing between personal defamation of a plaintiff and disparagement of plaintiff's property may be difficult. **[***76]** *Ibid.* Generally, the latter tort has been applied to statements that are injurious to plaintiff's business, but cast no reflection on either plaintiff's person or property. *Id.* at 963. For example, if the statement charges plaintiff with personal misconduct, or imputes to plaintiff reprehensible personal characteristics, it is regarded as libel or slander. *Id.* at 964. If, however, the aspersion reflects only on the quality of plaintiff's product, or on the character of plaintiff's business as such, it is disparagement. *Id.* at 964-65; *accord Restatement (Second) of Torts* *§ 626* comment d at 346 (1977) (noting that the rule of liability for trade libel applies "only when the matter **[*248]** published goes no further than to attack the quality of the thing in question and does not attack the personal character of its owner as vendor").

Many statements effectuate both harms. *Prosser & Keeton, supra,* § 128 at 965. Some accusation of personal incompetence may be implied in imputations directed against a business or its product. *Ibid.* However, ***HN28***[] personal defamation is usually found only "where the imputation fairly implied is that **[***77]** the plaintiff is dishonest or lacking in integrity, or that he is deliberately perpetrating a fraud upon the public by selling a product which he knows to be defective." *Ibid.* No personal defamation will be found "where the most that can be made out of the words is a charge of ignorance or negligence." *Ibid.* Additionally, one may disparage plaintiff's business by reflecting upon its character, the manner in which it is conducted, or its popularity or danger, and not affect any property. *Id.* at 966.

HN29[] The elements of a disparagement action include proof of publication of material derogatory to the quality of a plaintiff's business, or to his business in general, of a kind calculated to prevent others from dealing with him, or otherwise to interfere adversely with his relations with others. *Id.* at 967. To establish loss of trade or other dealings, plaintiff must show the falsehood was communicated to a third person and played a material and substantial part in leading others not to deal with plaintiff. *Ibid.* Plaintiff must also prove that the statement is false, and that defendant made the statement knowingly or recklessly. *Id.* at 967, 969-70. Finally, plaintiff **[***78]** must prove special damages, such as the loss of a present or prospective advantage, in the form of pecuniary loss. *Id.* at 964.

HN30[] The special damages requirement goes to the cause of action itself, such that a plaintiff will be denied even nominal or punitive damages if he cannot show special damages. *Id.* at 970-71. The necessary showing is specific: plaintiff must establish pecuniary loss that has been realized or liquidated, such as lost **[*249]** sales, or the loss of prospective contracts with customers. *Id.* at 971. Traditionally, plaintiff was required to identify particular business interests who have refrained from dealing with him, or explain the impossibility of doing so. *Id.* at 972-73. However, where requiring such identification is unreasonable, proof of lost profits resulting from breach of contract may suffice, especially where the loss is shown with reasonable certainty and where the possibility that other factors caused the loss is satisfactorily excluded. *Id.* at 973.

General, implied, or presumed damages of the kind available in personal defamation actions do not satisfy the requirement of special damages needed for disparagement causes of action. **[***79]** *Id.* at 971. **[**836]** In addition, personal elements of damages, such as mental distress, are strictly excluded. *Ibid.*; *Henry V. Vaccaro Constr. Co., supra, 137 N.J. Super. at 517, 349 A.2d 570*.

HN31[] The gravamen of a complaint for malicious intent to cause harm to one's business or employment is not the means used, but the wrongfulness of the defendant's intent. *Strollo v. Jersey Cent. Power & Light Co., 20 N.J. Misc. 217, 223, 26 A.2d 559 (Sup.Ct.1942)*. It is not necessary to set out the words of the false representation. *Van Horn v. Van Horn, 56 N.J.L. 318, 324, 28 A. 669 (E & A 1893)*. For such a cause of action, the more restricted statute of limitations for slander does not apply. *Ibid.*; *Henry V. Vaccaro Constr. Co., supra, 137 N.J. Super. at 516, 349 A.2d 570*.

Applying these principles here, we conclude that plaintiff established a cause of action for trade libel, in that he established that false statements made knowingly or recklessly about him by defendant caused him to lose referrals at IGH. The statements pertained solely to the character of the medical services provided by plaintiff and essentially charged plaintiff with negligence. **[***80]** Since the statements did not imply that plaintiff was personally dishonest, reprehensible, or lacking in integrity, they fall under the tort of trade libel, as opposed to personal defamation. *Prosser & Keeton, supra*, § 128 at 964-65. We need not recount in detail **[*250]** the statements satisfying the trade libel cause of action. However, the finding of the trial judge as to the defamation cause of action satisfied the proofs necessary to support the trade libel cause of action. The statements regarding such matters as mortality and morbidity, aneurysm-related deaths, and even plaintiff's relationship with others on staff all were focused on his performance as a surgeon as opposed to personal defamation. We hold that plaintiff proved a trade libel cause of action.

Defendants contend that because defendant was qualifiedly privileged to utter the statements he did to the MEC, plaintiff had to prove that defendant knew those statements were false or that he uttered them with reckless indifference to their truth. [14] We conclude that the evidence supported the trial judge's finding that the privilege did not apply and defendant acted with the requisite knowledge or recklessness to abate **[***81]** the privilege.

We review the relevant legal principles. ***HN32***[] "A communication made bona fide upon any subject matter in which the party communicating has an interest or in reference to which he has a duty, is privileged if made to a person having a corresponding interest or duty." *Williams v. Bell Tel. Lab., Inc., 132 N.J. 109, 121, 623 A.2d 234 (1993)* (citing *Coleman v. Newark Morning Ledger Co., 29 N.J. 357, 375, 149 A.2d 193 (1959)* (citations omitted)); *Govito v. W. Jersey Health Sys., Inc., 332 N.J. Super. 293, 309, 753 A.2d 716 (App.Div.2000)*; *Bainhauer v. Manoukian, 215 N.J. Super. 9, 36, 520 A.2d 1154 (App.Div.1986)*. The critical elements of this privilege are the appropriateness of the occasion on which the information is published, the legitimacy of the interest sought to be protected **[***82]** or promoted, and the pertinence of the receipt of the information by the recipient. *Govito, supra, 332 N.J. Super. at 309-10, 753 A.2d 716*; *Bainhauer, supra, 215 N.J. Super. at 37, 520 A.2d 1154*.

[*251] The privilege is based on the public policy that it is essential that true information be given whenever it is **[**837]** reasonably necessary for the protection of one's own interests, the interests of third persons, or certain interests of the public. *Erickson v. Marsh & McLennan Co., 117 N.J. 539, 563, 569 A.2d 793 (1990)* (citing *Restatement (Second) of Torts* *§ 592A* at 258 (1965)). A defendant abuses the privilege if he knows the statement is false or acts in reckless disregard of its truth or falsity, if publication serves a purpose contrary to the interest sought to be promoted by the privilege, or if the statement is excessively published. *Williams, supra, 132 N.J. at 121, 623 A.2d 234*; *Govito, supra, 332 N.J. Super. at 312, 753 A.2d 716*; *Bainhauer, supra, 215 N.J. Super. at 42-43, 520 A.2d 1154*. The question of abuse is for the factfinder and must be proven by plaintiff by clear and convincing evidence. *Williams, supra, 132 N.J. at 121, 623 A.2d 234*; **[***83]** *Erickson, supra , 117 N.J. at 565-66, 569 A.2d 793*; *Govito, supra, 332 N.J. Super. at 312, 753 A.2d 716*. [15]

HN33[] To overcome the privilege on the ground that defendant conducted a reckless investigation, a plaintiff must establish that defendant knew the statement was false or acted in reckless disregard of its truth or falsity. *Govito, supra, 332 N.J. Super. at 316-17, 753 A.2d 716*. The standard is whether defendant published a statement while entertaining serious doubts about the statement's truth. *Id. at 318, 753 A.2d 716*. Errors of interpretation or judgment and misconceptions are insufficient. *Id. at 316-17, 753 A.2d 716*.

Applying these principles here, there was sufficient evidence in the record for the judge to conclude that defendant abused the qualified **[***84]** privilege extended to members of peer review bodies when he made the defamatory statements to the MEC for the sole **[*252]** purpose of keeping his competitors out of the hospital and to protect his own "fiefdom." Although the judge never expressly analyzed the issue in terms of privilege and abuse, nor explicitly stated that defendant acted in reckless disregard for the truth, those findings were implicit in her conclusion that defendant either fabricated or embellished the information given to him by Syracuse and Elrabie.

Moreover, although defendants argue that defendant could not have been reckless, since he reasonably tried to investigate the information given to him by asking plaintiff to supply a list of his surgical cases, that conclusion was

---

[14] Although the issue of qualified privilege arose in the context of personal defamation, we discuss the issue of privilege in the context of trade defamation.

[15] In the case of a hospital performing its credentialing function on applicants for surgical privileges, these competing interests and principles have been codified in both federal and state statutes. *See* *N.J.S.A. 2A:84A-22.10(d)*; *42 U.S.C.A. §§ 11111* and *11112(a)*.

one for the trier of fact to reach based on the evidence presented. Both sides presented expert testimony that touched on this issue. As the judge noted, defendants' expert not only testified quite incredibly but also supported plaintiff's expert's conclusions. Defendants' expert conceded that defendant should not have called a competitor of plaintiff's and that he should have called Wyckoff directly. Based on the deference given to the findings **[***85]** of fact of judges sitting without a jury, *Rova Farms Resort, Inc. v. Investors Ins. Co. of Am., 65 N.J. 474, 483-84, 323 A.2d 495 (1974)*, we will not disturb these findings.

Since the trial judge found that defendant abused his qualified privilege as a member of a peer review body, such abuse precludes reliance on the principle here as well. ***HN34***[] In trade libel actions, as in defamation actions, an abuse of a qualified privilege will be found if the publisher knows the statement is false or acts in reckless disregard of its truth, if the publication serves a purpose contrary to the interests of the privilege, or if there is **[**838]** excessive publication. *Kass v. Great Coastal Express, Inc., 152 N.J. 353, 356, 704 A.2d 1293 (1998)*. That was the case here.

V.

We now address the issue of damages. As to the defamation claim, the judge found that the loss to plaintiff as a result of the false statements made about him were reflected in the years 1996 to 1998. Even though the judge decided this in the context of a **[*253]** defamation cause of action, in considering a cause of action for trade libel, our analysis remains the same. But a more significant issue arises as **[***86]** to the damages awarded.

First, the judge awarded plaintiff damages in the amount of $ 250,000 for the emotional harm he suffered as a result of the defamation. The judge found that plaintiff was near tears when he testified, that he suffered personal and professional humiliation, and that he was deprived of the "blessing" of taking care of patients. ***HN35***[] This aspect pertains solely to the personal element of plaintiff's damages and is strictly excluded under the tort of trade libel. Recovery for emotional distress under this cause of action is barred. We vacate that portion of the award.

Additionally, the judge assumed that plaintiff's decreased income resulted from defendant's defamatory conduct, absent any reason. This assumption included damage to plaintiff's reputation at Mountainside as an element of damages. Plaintiff's theory was that not only did the doctors at IGH refuse to refer their cases to plaintiff because of the defamation, but the doctors at Mountainside also stopped referring cases to plaintiff when they learned about IGH's allegations against him.

We question whether the evidence supported this theory. The evidence demonstrated that the accusations about plaintiff's **[***87]** competency were first made against him and originated at Mountainside. Even accepting, as we must, the trial judge's finding that defendant uttered false words to the MEC by fabricating or embellishing the information given to him by Syracuse, there was no dispute that Syracuse had indeed conveyed some negative information to defendant about plaintiff.

More importantly, plaintiff himself admitted that negative information about him was extant at Mountainside, long before he ever applied to IGH, though he vigorously denied the truth of any of those allegations. In fact, his defense to those allegations was much the same as his defense to the allegations made against him at IGH--that the allegations were motivated by the ill will of his **[*254]** economic competitors and circulated by doctors who possessed less knowledge and skill than he. Plaintiff also admitted that his cases were frequently discussed at mortality and morbidity conferences at Mountainside and that other surgeons at Mountainside were frequently, albeit incorrectly, impugning his medical competence.

We question, then, whether plaintiff sufficiently proved that the words uttered by defendant at the MEC meetings at IGH resulted **[***88]** in damage to his reputation at Mountainside. While plaintiff pointed to the subpoenas which IGH issued to Mountainside and to the fact that Mountainside launched its own investigation against him only days after Syracuse was deposed, the judge failed to make adequate findings as to causation and linkage between the conduct at Mountainside and the damages claimed.

Significantly, Mountainside's decision to investigate plaintiff was the result **[**839]** of IGH's decision to investigate plaintiff, which in turn was the result of Mountainside's own negative comments about plaintiff. The judge was apparently impressed with the fact that notwithstanding the prior negative comments, plaintiff's Mountainside income did not start to decrease until after IGH started processing his application. Again, we are constrained by a lack of detailed analysis or findings as to this element of charges. While we question whether defendants should be liable at all for the decrease in plaintiff's income derived from Mountainside, on remand the judge should examine this issue and make specific findings as to whether defendant is responsible for the downturn at Mountainside.

The lost referrals at IGH for the period **[***89]** 1996 through 1998 are a different matter. Plaintiff received virtually no referrals from any doctor at IGH once he obtained his privileges, which plaintiff claimed was because every major player at the hospital was on the MEC and heard the defamatory statements uttered about him by defendant on July 13, 1995. While defendant noted that many factors went into a doctor's referral decision, that his own referrals came from many sources, and that it took a long time for a **[*255]** surgeon to build up a reputation at any particular institution, the judge properly awarded plaintiff damages for his lost IGH referrals based on the evidence presented.

In sum, we set aside the $ 250,000 for emotional harm as that element of damages is not viable in a claim for trade libel. The $ 472,000 in lost income on the now trade libel claim contains elements that must be revisited. Plaintiff is entitled to damages for lost income at IGH and the trial judge must, on remand, reexamine and make specific findings regarding the damages arising from lost income at Mountainside. On remand, the judge shall specifically identify those damages attributable to lost income at IGH and those lost at Mountainside in arriving **[***90]** at a total damage award for trade libel.

As to the damages for tortious interference, a different result ensues. A portion of the award of $ 250,000 is flawed.

Defendants allege two separate errors with respect to the $ 250,000 awarded on plaintiff's claims for tortious interference and antitrust. [16] First, they claim that the judge erred in calculating the award by erroneously assuming that the $ 500,000 earned by defendant in both 1995 and 1996 was attributable solely to his vascular surgery work at IGH. The judge then assumed that plaintiff would have earned twenty-five percent of this amount, or $ 250,000 for the two-year period his privileges had been wrongfully denied.

Defendants correctly note that the evidence at trial demonstrated that: five to ten percent of the total income shown on defendant's tax returns was from income from other sources; only twenty-five to thirty **[***91]** percent of his practice was vascular surgery; and only seventy to eighty percent of his vascular surgery was performed at IGH. Hence, the court erroneously based its twenty-five percent award on defendant's full $ 500,000 annual income.

[*256] Plaintiff responds that defendant noted that only one or two vascular cases each year were performed at a hospital other than IGH. However, the testimony to which plaintiff alludes is deposition testimony in which defendant stated that he had only one or two vascular cases at Newark Beth-Israel each year. Defendant, **[**840]** however, also had privileges at St. Barnabas Hospital. More importantly, in that same deposition and again at trial, defendant admitted that only eighty percent of his practice was at IGH. Plaintiff correctly notes that defendant indicated at his deposition that thirty-five to forty percent of his practice was vascular surgery, rather than the twenty-five to thirty percent figure he gave at trial. However, the judge erroneously assumed that it was 100 percent.

To support the award, plaintiff further argues that the judge should have used thirty percent, not twenty-five percent, as the share of referrals he would have gotten had he been **[***92]** timely granted privileges. He bases this on Patrawalla's estimate of his ability to successfully establish himself at both Mountainside and Valley Hospitals.

According to plaintiff's figures, then, the judge could have awarded him $ 123,000 in damages for tortious interference, which is only $ 2000 less than what the court did award. However, as defendants correctly note, the judge awarded plaintiff $ 250,000, not $ 125,000. The judge assessed only $ 125,000 against defendant alone, and then trebled that amount to arrive at the antitrust verdict. Plaintiff has virtually conceded error in the judge's analysis.

---

[16] Although we vacate the antitrust award, we briefly discuss the award since it was integrated into the tortious interference claim.
