Contracts Law > Defenses > Unconscionability > General Overview

Commercial Law (UCC) > Sales (Article 2) > General Overview

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

HN30[] Contract Terms, Gap Filler Provisions

Ala. Code § 7-2-309(3), intends the focus of an unconscionability determination under 7-2-309 be on the result of its application as seen at the time of termination.

Commercial Law (UCC) > ... > Contract Terms > Gap Filler Provisions > General Overview

Commercial Law (UCC) > Sales (Article 2) > General Overview

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > Unconscionable Terms

HN31[] Contract Terms, Gap Filler Provisions

Ala. Code. § 2-309(2), imposes an obligation to give "reasonable notification" of termination. This commercially imposed standard embraces both policy and economic rationales.

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

HN32[] Contract Provisions, Contract Terms

See Ala. Code § 7-2-309, Cal. Comm. Code § 2309 (Official Comment 8).

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > General Overview

HN33[] Contract Provisions, Contract Terms

The question of "reasonable notification" is typically one for the trier of fact. However, little or no notice is unreasonable as a matter of law. Reasonable notice is that time period that, under the circumstances of the particular case, would allow a party to make alternate arrangements upon termination of the contract and would allow a party to minimize losses.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN34[] Injunctions, Preliminary & Temporary Injunctions

The court is possessed with inherent and broad equitable powers to fashion an appropriate remedy to deal with the particular wrong in each case. The court also has the power to grant preliminary injunctive relief where a party's conduct is calculated to frustrate litigation.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN35[] Injunctions, Preliminary & Temporary Injunctions

A preliminary injunction to be fashioned by the court is designed solely to preserve the status quo, to prevent the irreparable harm that threatens a plaintiff and to achieve the appropriate equitable balance of what is necessary, what is fair, and what is workable.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN36[] **Injunctions, Mandatory Injunctions**

To establish the need for a mandatory injunction a plaintiff must establish (1) a substantial likelihood of success on the merits of one or more of its claims, (2) the imminent threat of irreparable injury in the absence of injunctive relief, (3) that the threatened harm to Intergraph outweighs any potential harm to Intel that would be caused by an injunction, and (4) that the grant of an injunction will not disserve the public interest.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN37[] **Injunctions, Preliminary & Temporary Injunctions**

Loss of good will and harmed reputation are types of injuries that are sufficient to establish the need for injunctive relief. By its very nature, injury to good will and reputation is not easily measured or fully compensable in damages.

Judges: Edwin L. Nelson, United States District Judge.

Opinion by: Edwin L. Nelson

Opinion

[*1258] Memorandum [2] of Opinion and Preliminary Injunction**

I. Background.

The court has for consideration the motion and the renewed motion of plaintiff Intergraph Corporation for a preliminary injunction. The motions essentially seek to prevent defendant Intel Corporation from refusing to engage in future business with the plaintiff in the same or similar manner that it has done from approximately 1993 until the present dispute arose between the parties in 1997. The amended complaint is in twenty-three counts and includes, *inter alia,* claims under state law theories of fraud, fraudulent suppression, negligent failure to warn, negligence, wantoness and willfulness, breach of contract, intentional interference with business relationships, breach of express warranty, breach of implied warranty of fitness for a particular purpose, and violation of the Alabama Trade Secrets Act. The complaint contains three claims for patent infringement and a single count charging anti-trust violations under *15 U.S.C. §§ 1* and *2*. Jurisdiction in this court is founded upon *28 U.S.C. § 1331* (federal question), *28 U.S.C. § 1332* (diversity of citizenship), *28 U.S.C. § 1338(a)* and *(b)* (patent infringement **[**3]** and unfair competition), and *28 U.S.C. § 1367(a)* (supplemental jurisdiction).

On Monday, December 8, 1997, the court held a hearing (the "Hearing") on Intergraph's verified motion to enjoin Intel from cutting off or delaying its supply of computer chips and product information (the "Verified Motion"), which was filed in open court on November 21, 1997 (Document # 16). [1]

At the Hearing, Intergraph presented the live testimony of Wade Patterson, currently the President of Intergraph's Computer Hardware Division (Tr. 51), who testified that he holds a B.S. degree in Electrical Engineering (Tr. 207) and that he has previously worked as Intergraph's Vice-President of Engineering and its Executive Manager for Systems Development (Tr. 101-02). [2] Intergraph also submitted **[**4]** and served in open court during the Hearing Mr. Patterson's supplemental affidavit on which Intel was allowed to cross-examine him. (Intergraph Ex. I; Tr. 236-41). In support of its motion for a preliminary injunction, Intergraph also filed the affidavits of Allen Blaxton, Bryan Floyd, Mike Ellard, James Meadlock, Terry Phillips, and Wade Patterson. (Document # 29).

Prior to the Hearing, on December 3, 1997, Intel filed and served on Intergraph the affidavits of Keith Johnson and Ron Epstein (Documents 26 and 27). At the Hearing, Intel presented no live testimony from its **[**5]** own employees, but it called as its own witness, James Meadlock, Chairman and CEO **[*1259]** of Intergraph, who was voluntarily present in the courtroom. (Tr. 241). Intel also submitted the affidavit of Anand Chandrasekher during the Hearing. (Tr. 122; Intel Ex. 2).

Then on December 10, 1997, with permission of the court, Intel supplemented its hearing presentation with the affidavit of Edwin Bauernfreund under seal. Intergraph responded with the affidavits of Sanford C. Morris, Jr., Kirk Totten, and Allen Blaxton and the Second Supplemental Affidavit of Wade Patterson on December 12, 1997. Also, the parties have each submitted proposed findings of fact and conclusions of law for the court's consideration, and those submissions have been helpful.

Generally, ***HN1***[] under *Fed. R. Civ. P. 65*, in order to prevail on its motion for a preliminary injunction, Intergraph must prove: (1) it has a substantial likelihood of ultimate success on the merits of one or more of its substantive claims; (2) there is a substantial threat that it will suffer irreparable injury in the absence of preliminary relief; (3) the likely injury to itself is greater than that likely to be suffered by the defendant; and **[**6]** (4) entry of the preliminary injunction would not disserve the public interest. *Lucero v. Operation Rescue of Birmingham, 954 F.2d 624, 627 (11th Cir. 1992)*, *reh'g denied, 961 F.2d 224 (1992)*. Where, as here, the plaintiff advances anti-trust claims, preliminary relief is specifically authorized by *15 U.S.C. § 26*. [3]

---

[1] In this opinion, the court will often identify the particular document that is the subject of discussion by referring to the clerk's document number. For example, the plaintiff's motion is Document # 16 in the clerk's official file.

[2] References to the Hearing transcript are made parenthetically with "Tr." and the relevant page number(s). References to affidavits and declarations under *28 U.S.C. § 1746* are made parenthetically using the affiant's last name and the relevant paragraph or exhibit number. For convenience, both affidavits and declarations will be referred to as affidavits. Hearing exhibits are referenced by party name and exhibit number or letter.

[3] ***HN2***[] Title 15, *section 26* provides:

Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections 13, 14, 18, and 19 of this title, when and under the same conditions and principles as injunctive relief against

[7]** Upon due consideration, the plaintiff's motion for a preliminary injunction will be granted.

II. Findings of Facts.

Based upon the affidavits filed by the parties, the testimony at the Hearing and the exhibits received at the Hearing, the court makes the following findings of fact. [4]

A. Intel's Position in the Microprocessor Market.

Defendant Intel Corporation is the world's largest designer, manufacturer, and supplier of high-performance microprocessors, [5] frequently described as the "brains" of a computer because they control the central processing of data in personal computers. [6] **[**9]** (Intergraph Ex. F). Intel also designs, **[*1260]** manufactures, and supplies: (1) "chipsets" which, in conjunction with **[**8]** the CPUs, perform essential logic functions surrounding the CPU in computers based on Intel architecture processors; [7] *(Id.);* (2) motherboards which combine Intel microprocessors

---

threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue: Provided, That nothing herein contained shall be construed to entitle any person, firm, corporation, or association, except the United States, to bring suit for injunctive relief against any common carrier subject to the jurisdiction of the Surface Transportation Board under subtitle IV of Title 49. In any action under this section in which the plaintiff substantially prevails, the court shall award the cost of suit, including a reasonable attorney's fee, to such plaintiff.

15 U.S.C. § 26.

[4] It should be clearly understood that the "facts" found here are for purposes of ruling on the motions for a preliminary injunction only. They are based upon the evidence received to this point and may prove illusory after a full trial on the merits of the parties' contentions.

[5] In the technical community comprising the personal computer industry, these microprocessors are also called "central processing units," or "CPUs." The court may from time to time in this opinion refer to them using any of those three terms.

[6] Of primary interest in the present context is the "workstation" which comprises the largest part of Intergraph's business. A "workstation" is defined as

[A] machine designed to run as fast as possible, that includes not only the CPU, such as a Pentium II, but all the different subsystems that go within the machine. That means that the machines cost a little bit more, in some cases a lot more, but the customers that we sell those to are willing to pay more because performance is everything to them.

Workstations are powerful computers designed to run demanding scientific, engineering, design and graphic intensive applications. They are generally used in the design of complex facilities such as nuclear power plants and bridges. They are also used in the entertainment and motion picture industry for creating special effects and animation for movies and for television commercials.

(Tr. 54-55).

[7] By affidavit, Mr. Patterson testified:

Intel's 386 and 486 computer chips became popular in the early eighties, through their inclusion in the IBM personal computer ("PC"). The Intel x86 chips were the brain of the IBM PC, but were only designed to handle low end tasks. Intel's x86 chips were not capable of handling high-end workstation needs. However, the IBM PC was an "open architecture" system which permitted others to design their own IBM "compatible" PCs. As a result, "open architecture" and "compatibility" became of utmost importance to personal computer users. "Open architecture" compatibility also became of utmost importance to workstation users.

(First Patterson Aff. 5).

and "chipsets" to form the basic subsystem of a PC or server; [8] *(Id.);* and (3) graphics subsystems to provide graphic functions for computers and workstations. (Patterson Supp. Aff. PP 7-9).

Most of the entire world's personal computers **[**10]** today are powered by Intel designed and manufactured microprocessors of the "x86" variety, originally created by Intel. [9] *See* Competitive Impact Statement and Complaint in *United States v. Microsoft,* 59 Federal Reporter 42845, August 14, 1994. In 1996, Intel received eighty-eight percent of the total revenue derived from microprocessors sold for use in desktop computers, laptops, [10] servers, and workstations, or $ 14.6 billion out of a total of $ 16.6 billion. Within the "x86" market, Intel had a market share of eighty-five percent. (Patterson Supp. Aff. P 7). *See* December 22, 1997, *Business Week* article.

In its fiscal year 1996, Intel had total revenues of $ 20.8 billion and net income **[**11]** before taxes of $ 7.9 billion a profit percentage of approximately thirty-eight percent. It has consistently made very high profits. (1996 Intel Annual Report) [11]

Intel, over a period of almost twenty years, has continued to develop the "x86" line of microprocessors, creating ever faster and more powerful units. Its current generation of the "x86" microprocessors, the Pentium series, is an extraordinarily complex product, which is difficult and expensive to design and manufacture. According to Intel, the Pentium Pro processor has 5.5 million transistors and can execute 300 million instructions per second. More than 200 major steps are required to produce the Pentium Pro. (1996 Intel Annual Report). [12]

[12]** Intel's dominance in the market for personal computer CPUs is reflected in its name recognition among the computer buying public, the great majority of whom insist upon having a genuine Intel CPU in their computers. [13] The "Intel Inside" brand promotion has helped to create a remarkable demand for the Intel product. More than 1,300 licensees worldwide participate in the "Intel Inside" program with each computer bearing a distinctive Intel logo. In 1996, the journal *Financial World* designated the Intel brand **[*1261]** as the tenth most valuable brand in the world. (1996 Intel Annual Report).

The Intel microprocessors are compatible with a number of computer operating systems, but they are used primarily with operating systems created and supplied by Microsoft **[**13]** Corporation. [14] In other litigation, the United

---

[8] A "PC" is generally described as a less powerful computer than a "workstation" and is generally used by individuals for business, academic, and pleasure uses. Many PCs, also called "desktops," are quite powerful and many, particularly those used in businesses and academia, are interconnected through networks" that are hosted by one or more servers.

[9] The "x86" line of computer chips apparently derives its name from the Intel 8086 and 8088 chips, which powered the first IBM line of personal computers, beginning in the early 1980s.

[10] A "laptop" is a small battery powered portable computer that, at least in theory, will fit on one's "lap."

[11] "With a ninety percent market share in PC microprocessors, Intel's sales have headed skyward, growing fifty to eighty percent annually for the past four years. That made it "the eighth-most-profitable company in the world in 1996…." Business Week, December 22, 1997, p. 70.

[12] In its issue of December 22, 1997, Business Week reported that Intel was spending $ 4.5 billion in 1997 on new chip making plants.

[13] Other manufacturers of personal computer CPUs based upon the "open" architecture previously used by Intel are Cyrix, AMD, and IBM. (Tr. 106). As noted, combined they, and perhaps other manufacturers, share less than fifteen percent of the market.

[14] These operating systems are Microsoft DOS, Microsoft Windows, Windows 95, and Windows NT. Just as other microprocessors may be used with the Microsoft computer operating systems, those operating systems are capable of being used with microprocessors other than those made by Intel. It would be a mistake, however, to assume that microprocessors and computer operating systems are freely interchangeable. They are not. Instead, operating systems, microprocessors, and computer subsystems, such as Intergraph's graphics subsystems, must be carefully matched to assure reliable optimum performance. For example, several years ago IBM and Motorola engaged in a joint effort to create and produce an alternative to Intel's high performance microprocessors. The IBM/Motorola microprocessor, the PowerPC, was originally supported by Microsoft with its Windows NT operating system. As noted at the Hearing by Mr. Patterson, however, Microsoft has now

States Department of Justice has contended for a number of years that Microsoft itself has a monopoly on operating systems for personal computers. *See* *United States v. Microsoft, supra.* Intergraph uses Microsoft's Windows NT, a thirty-two bit operating system powerful enough to run both business and technical applications for all Intergraph workstations and other products. (Tr. 75-76).

[14]** Until the development of its latest generation of Pentium II microprocessors, Intel used an "open architecture," which was available generally to all participants in the industry. For example, other manufacturers such as Cyrix, AMD, and IBM designed, developed and marketed microprocessors that were more or less compatible with the earlier Intel CPUs. Beginning with the Pentium II, however, Intel changed to a closed or proprietary architecture, which included the use of a new "bus," the P6. This means that the Pentium II and planned Intel microprocessors, the Deschutes and the Merced, are not and will not be compatible with other CPUs. (Tr. 64-65). Moreover, the latest Intel CPUs are technologically superior, at least in terms of their ability to interact with and handle the advanced graphics functions required by high-end workstations, [15] **[**15]** to all other so-called Intel compatible microprocessors. (Tr. 70-71). [16]

[16]** Computers manufactured by Original Equipment Manufacturers ("OEMs") to use Intel microprocessors must be specifically designed and manufactured to meet the precise physical and technical requirements of the Intel architecture. For example, Intel chips, before the Pentium II, were mounted on flat sockets, the P7 Bus, that physically accepted similar chips from other manufacturers. (Plaintiff's Exhs. C and D). The Pentium II is mounted on its edge in the P6 Bus, which, as of the date of the Hearing, accepts microprocessors from no other manufacturer. (Plaintiff's Exhs. A and B). These **[*1262]** physical differences may be only the most obvious ones, vis-a-vis other Intel CPUs. Intel has purposely changed its CPU architecture by using proprietary sockets and otherwise, converting from the previously "open architecture" to a new "closed architecture." [17] **[**18]** (Tr. 85). This "closed architecture," for practical purposes, allows Intel, by exercising its intellectual property rights in its "closed architecture," to wield absolute power over who will and who will not be allowed to participate in that part of the high-end computer industry that is based upon the "x86" microprocessor. Inasmuch as it **[**17]** requires two or

---

withdrawn its support for the PowerPC microprocessor, making it unavailable to manufacturers, such as Intergraph, who are committed to the Windows NT operating system. (Tr. 165-166).

[15] Intel submitted the affidavit of Keith Johnson, its Huntsville, Alabama, representative, in which he states that some other manufacturers produced microprocessors that are "advertised to be comparable to" Intel's Chips. (Johnson Aff. 14).

[16] There are, in fact, microprocessors on the market that are faster than any current version of the Pentium II. The Alpha microprocessor from Digital Equipment Company was the fastest CPU available as of the time of the Hearing, and there are others that are faster than the Intel products. None of these, however, are compatible with, and therefore usable, in the Pentium based workstations designed and manufactured by Intergraph. (Tr. 103-104). Not all of these CPUs are capable of running on the Windows NT operating system. See, for example, the PowerPC. Also, it is not mere operating speed that distinguishes the Pentium II. The Pentium II microprocessor also has the capability to handle the advanced graphics requirements of high-end workstations. In cross-examining Mr. Patterson, counsel for Intel implied that the Alpha CPU would be a potential alternative to Intel's products. While not a part of the evidence, counsel for Intergraph stated (Tr. 25), and the court is aware of reports in the media, that as a part of the settlement of litigation between Intel and Digital Equipment Company, Intel will acquire ownership and control of the Alpha chip. Thus, even if it were economically and technologically feasible for Intergraph to switch its products to the Alpha chip, it could still be forced into a customer/seller relationship with Intel.

[17] Mr. Patterson testified that the new P6 Bus is not compatible with products available from others in the computer industry and that no one else in the industry is working on an alternative product that would be compatible with the P6 Bus. (Tr. 66, 70-71). Intel's lawyer suggested that Intel had licensed the rights to the P6 Bus to others, including IBM, implying that such licensees could soon produce a product that would be competitive with the Pentium II. (Tr. 109-10). Intel, however, introduced no evidence to support this suggestion. In any event, Mr. Patterson confirmed (on re-direct) that the mere license of rights to the P6 Bus does not solve the problem of lack of alternative products that confronts Intergraph (or others similarly situated). (Tr. 217-18). The court finds that Intel manufactures the only microprocessor with the necessary speed and graphics handling capabilities that also will "fit" the P6 Bus, the Bus that has been designed into and used on Intergraph's most recent mother boards. Furthermore, there was no evidence that IBM or any other chip maker could produce a P6 compatible CPU within a reasonable time or even that any chip maker might be inclined to invest the billions of dollars that would be required to duplicate the performance of Intel's latest products.

more years and millions of dollars to design and develop a mother board and graphics subsystem to accept and take advantage of a CPU such as the Pentium II or any possible alternative, (Tr. 69) [18] OEMs, such as Intergraph, who rely entirely on Intel for their supply of microprocessors and chip sets have become technologically and financially locked in to the Intel CPU, its associated chip sets, and the P6 Bus, and they have no feasible alternative to it. (Patterson Supp. Aff. P 14). The evidence makes clear that Intel has 100 percent of the market for the high-end CPUs that are used in "x86" based computer workstations, approximately 60 percent of the total workstation market. (Tr. 262).

In addition to requiring an adequate supply **[**19]** of the fastest and most powerful Intel microprocessors, OEMs, such as Intergraph, are capable of competing in the marketplace only if they also have access to: (1) Intel's advance confidential technical information, which is necessary to develop new products and to service existing products, (2) advance samples of Intel's development chips, which are needed by Intergraph to develop its own next-generation products using those chips (hereinafter referred to as "Chips Samples"); and (3) early releases of Intel chips, related products, and related technical information, which is necessary for Intergraph to test and produce its products (hereinafter referred to as "Early Release Chips").

The evidence suggests, and the court finds for present purposes, that, because of Intel's dominant position in the microprocessor market, no other computer industry participant can realistically be expected to expend the enormous sums required to develop and produce a product that could compete with the Pentium II and its anticipated successors. (Tr. 160-61). Moreover, it would not be possible for any potential Intel competitor to create a competitive product sufficiently soon to provide a viable **[**20]** alternative to which Intergraph could switch in the immediate future.

[*1263] In sum, the court finds if Intergraph is to compete in the high-end work station market for the foreseeable future, it has no alternative but to do so using Intel's latest and most powerful microprocessors and associated chip sets, and in order to use those microprocessors, it must have the cooperation of Intel, whether given willingly or by compulsion.

In the words of Mr. Patterson, Intergraph is both "technologically and economically 'locked in'" to its relationship with Intel. (First Patterson Aff. P 19). Unless it is able to secure a continued supply of Intel chips, advance chip samples, essential advance technical information, support and advice, Intergraph cannot continue to design, manufacture and sell competitive workstations. (Id.) Moreover, if Intergraph is not allowed to participate on a competitive basis in that market, it will suffer enormous losses of revenue, adversely impacting on the employment opportunities of its 8,500 employees. Finally, Intergraph's reputation for technical excellence and its business goodwill in the workstation market and the computer industry will suffer long-term **[**21]** injury. These are harms that, in the opinion of the court, cannot be recompensed merely by the payment of money because jobs, reputation, and good will, once lost, may never be regained.

B. Intergraph and the Workstation Market.

Intergraph Corporation was begun as M&S Computing, Inc. in 1969 with three employees for the purpose of providing computer assisted guidance systems to the United States military services, but it soon changed direction toward the development of advanced computer-aided designing and drafting systems, which, as noted above,

---

[18] Defendant, though admitting that there is no other CPU presently available that could give the plaintiff the performance it requires to be competitive in the high-end workstation market, suggested at the Hearing that Intergraph could easily substitute a different microprocessor for the Intel Pentium II. That contention is simply fantasy. The record refutes any such notion. In response to the court's question regarding a substitute CPU, Intel's counsel stated, "If you are asking me does there exist a chip out there today that they could pull out the Intel chip and plug it in, I think the answer to that is no." (Tr. 164). The simple fact is there is presently no practical substitute for the Pentium II, and if there were, it would be two years or more before Intergraph could design and produce the mother board and graphics subsystems necessary to use any such substitute. Even then, in the words of Intel's counsel, "They [Intergraph] may be downgraded from first class to coach, but they haven't been told they can't get on the plane." (Tr. 232).

became known as "workstations." (Meadlock Aff. P 3; Tr. 71). [19] **[**22]** Intergraph's first graphical interface computer was built and sold in 1972. [20] Those early "workstations" were based upon computers Intergraph purchased from Digital Equipment Corporation ("DEC"), which were then integrated with its own automated design software. (Meadlock Aff. P 4). Intergraph developed a "Graphics Processor" in 1982, a component that allowed computer modeling and shading for very high quality images. (Meadlock Aff. P 5). [21]

Beginning in 1986, Intergraph workstations were based upon a then advanced high powered microprocessor called the "Clipper," which was then the property of Fairchild Semiconductor. [22] Upon learning that Fairchild was to be sold, Intergraph purchased Fairchild's Advanced Processor Division ("APD") in 1987, thereby acquiring ownership of the Clipper technology and lessening its own reliance on outside sources for its supply of microprocessors. This purchase also enabled Intergraph to design and build future products more rapidly. Until 1993 Intergraph used the Clipper microprocessor **[**23]** in all its workstations. (Meadlock Aff. P 7).

In the early 1990s, after the computer industry began to shift from the Microsoft **[*1264]** DOS to the Microsoft Windows operating system, Intergraph learned that Microsoft planned to create a very high-end operating system to be called Windows NT, and Intergraph became convinced that this new operating system would likely become the dominant operating system for future high-end workstations. Intergraph further concluded that its own future lay with the development of a Windows NT based workstation **[**24]** product to supplement the Clipper (RISC microprocessor) [23] and Unix based operating system (Tr. 76) workstations it was then producing.

In 1992, Intel was, and had been for **[**25]** years, the predominant designer and producer of microprocessors for the "open architecture" PC market, that segment of the market previously called the IBM compatible market. Based on Intel's assurances and representations that Intel's CPUs had the necessary computing power and speed for Intergraph's high-end workstations and that Intel would supply its CPUs to Intergraph on fair and reasonable terms, [24] in late 1992, Intergraph began a major and expensive two-year development and engineering effort to convert its

---

[19] Intergraph has approximately 8,500 employees around the world, with approximately 4,500 of those being in Huntsville, Alabama. Its business is conducted through three divisions. The Intergraph Computer Systems Division handles all hardware activities for the company. The Intergraph Software Division creates and markets software applications for the engineering market. The Intergraph Federal Systems Division sells commercial systems to and provides consulting work for the federal government. (Tr. 72).

[20] A graphical interface allows the user to operate the system and applications software by using a cursor and screen image instead of using programming languages. (Meadlock Aff. 4).

[21] Mr. Patterson testified:

Back in those early days, you didn't have enough horsepower that you could put it all in one box. So Intergraph made a business selling systems wrapped around Digital Equipment Corporation minicomputers and Intergraph designed a very high-end graphic termals [sic] to work with those. (Tr. 75).

[22] Mr. Patterson stated in testimony at the Hearing:

Then in the mid 1980's, Intergraph decided that the horsepower that you would need to have an all in one solution was going to become available and so Intergraph used Fairchild's RISC microprocessor called Clipper and designed an all in one workstation for doing graphics and high-end work within that workstation. That was based on the Unix operating system, not on Windows. Windows wasn't around in those days. (Tr. 75).

[23] "RISC" is an acronym for "Reduced Instruction Set Computer," a type of microprocessor designed for faster computers. Intergraph claims ownership to all of the patent rights to Clipper, including patent rights on advanced designs of Clipper, (Meadlock Aff. 7), though it should be noted that one or more of those patents are at issue in this case and in litigation now pending in the United States District Court for the Northern District of California. In this litigation, Intergraph alleges that Intel has incorporated some of Intergraph's key Clipper technology into Intel's CPUs and infringes Clipper patents owned by Intergraph. See Counts 19-21 of Intergraph's First Amended Complaint. According to Intergraph, the internal architecture of Intel's Pentium CPUs incorporate RISC technology covered by the Clipper patents. (Tr. 159-160).

[24] By affidavit, James Meadlock testified:

products from incorporating its own Clipper microprocessor to incorporating the Intel microprocessors and to convert its technical software applications to the Microsoft Windows NT operating system. (Meadlock Aff. P 9; Tr. 78-79).

[26]** By the end of 1993, Intergraph had discontinued further development of its own Clipper microprocessor, eliminating the Clipper as a competitor of Intel and other producers of microprocessors in the high-end work station market. (Tr. 79-80). [25] Intergraph has, since 1992, invested enormous financial and engineering resources to design and build its products and systems based on Intel's CPUs. As noted earlier, Intergraph cannot for the foreseeable future either economically or technically switch to any other CPU. (Tr. 79-80). As a result of the migration to Intel's CPUs, Intergraph is now technologically and economically "locked-in" to Intel's CPUs for at least the next two to three years. (Patterson Supp. Aff. P 14). [26]

[27] [*1265]** The court concludes that, before it was induced by the representations of Intel CEO Andy Grove to abandon its own Clipper technology, Intergraph competed successfully in the relevant market for high-end microprocessors. Because of the conduct of Intel, inducing the plaintiff to abandon the Clipper, Intergraph has been eliminated as a competitor in the high-end microprocessor market and is now locked-in to Intel as its sole source of CPUs and relevant technical data. Moreover, the cessation of further development of the Clipper technology may well have diminished further innovation and competition generally because no further efforts were made to improve or advance the Clipper CPU technology. [27]

C. The Relationship Between Intergraph and Intel.

In 1993, I personally met with Andy Grove of Intel to discuss Intel's future development plans. Mr. Grove represented to me that Intel's chips would soon have the necessary computing power and speed for the development of an Intergraph workstation. I also expressed my concern with Intel being the sole source supplier of its chips, but was assured by Mr. Grove that Intel was sensitive to such issues and that Intel treated all of its developers fairly and equally. Based upon such representations, the company began development of an Intel-based workstation and discontinued further development of the Clipper and Clipper-based workstations and servers.

(Meadlock Aff. 9). Mr. Meadlock acknowledged, however, that Mr. Grove did not commit Intel to provide a perpetual supply of chips, pre-released chips, or confidential information. (Tr. at 242-3.) Mr. Meadlock also acknowledged that Mr. Grove did not commit Intel to any continued or "perpetual business relationship" with Intergraph. (Tr. at 243.)

[25] On direct examination, Mr. Patterson was asked whether Intergraph could now return to its own Clipper based CPU technology, abandoning the Intel product. He answered, "No. All the people [technical staff] are gone and we have not been developing Clipper now for about three years, so there is no way to start that up." (Tr. 80).

[26] The court is aware that technology in the computer/workstation industry changes so rapidly that what is true today may not be true six months from now. Mr. Patterson stated in his affidavit, "Due to ever-changing chip technology and market demand, Intergraph's workstations have an average market life of six months before the company must release its next generation product." (Patterson Aff. 16). Today, Intel stands as the victor in the so-called "platform war," dominating the competition between RISC-Unix workstations and Intel-Windows workstations. Currently Intel-Windows workstations outsell RISC-Unix by a ratio of about two to one. (Tr. 212-214). Projections of future market shares indicate sales of RISC-Unix products will remain flat while Intel-Windows workstations will grow very rapidly. (Id.). An industry research company, IDC, projects that Intel's share of technical workstations will surge to eighty-six percent by the year 2000. See *Business Week, supra,* p. 74. Nevertheless, the court is also aware of press reports that IBM will soon demonstrate a new microprocessor that it claims will be more powerful than Intel's Pentium II and will run at speeds of one gigahertz. Thus, assuming IBM can produce what it claims, to say that Intergraph has no alternative to Intel products now is not to say it will have no alternative in the future. The critical point is that it has no practical alternative to Intel products today.

[27] That the Clipper technology held some potential for future innovation will be demonstrated if, as Intergraph contends in this lawsuit, Intel has indeed incorporated some of the Clipper RISC technology in the Pentium products.

In 1993, when **[**28]** Intergraph and Intel began their business relationship, it was the practice of Intel to freely share with its OEM customers technical information about its products. (Patterson Aff. P 7; Tr. 83-84). [28] As Intel moved to a closed architecture and Intergraph became dependent upon the use of Intel microprocessors, Intel began insisting that Intergraph and its other customers sign comprehensive Non-disclosure Agreements ("NDAs") and Restricted Use Non-disclosure Agreements ("RUNDAs"). (Meadlock Aff. P 11; Tr. 84-85). NDAs were often accompanied by Confidential Information Transmittal Records ("CITRs"). The CITRs are executed by both parties and identify the specific Intel Confidential Information to be disclosed. The CITRs expressly incorporate the terms of the respective NDA. (Johnson Aff. P 6; Patterson Aff. PP 8-10; Johnson Aff. Exh. 2.) These Agreements established procedures for exchanging product information that previously had been freely exchanged. (Patterson Aff. P 7; Tr. 84-85). The NDAs, CITRs and RUNDAs were forms prepared by Intel to which it allowed no changes. (Patterson Aff. P 9-10; Tr. 128-29; Johnson Aff. P 6).

[29]** The parties signed NDAs, which contain standard provisions including: (1) one provision that expressly negates any obligation on the part of either party to supply confidential information; [29] (2) a second provision that establishes that the NDA does not create a business relationship, joint venture, partnership or other form of business association, between the parties and does not create an obligation on the part of Intel to sell products to Intergraph; [30] **[**30]** and (3) a third provision **[*1266]** that states that the agreement can be terminated at any time without cause. [31] (Johnson Aff. Exh. 1.) Other documents signed by the parties also provide that they create no obligations to supply products or confidential information and to engage in future business activities. [32]

[31]** Information supplied by Intel under the NDAs, RUNDAs, and CITRs contained the necessary technical data to provide OEM engineers and designers with the ability to develop their own products. This data would not permit any third party to duplicate Intel's own technology. (Tr. 85, 185-86). There is no evidence that Intergraph has

---

[28] By affidavit, Mr. Patterson testified:

Initially, most of the information necessary to develop products using Intel's chips was provided in product data books. Product data books were generally available from Intel or its distributors. However, as each subsequent generation of chips were made available, the technical information contained in the product data books became less comprehensive. Information which was no longer contained in product data books, but necessary for product development, was migrated into packets of confidential information commonly referred to as "yellow books." The information contained in yellow books was considered by Intel to be confidential information. Intel managed the supply of such yellow books, and the information disclosed therein, through the use of non-disclosure agreements.

(Patterson Aff. 7).

[29] NDA 6: "No Obligation of Disclosure. Neither party has any obligation to disclose Confidential Information to the other. Either party may, at any time, cease giving Confidential Information to the other party without any liability or request in writing the return of Confidential Information previously disclosed."

[30] NDA 8(a): "This Agreement is neither intended to nor shall it be construed as creating a joint venture, partnership or other form of business association between the parties, nor an obligation to buy or sell products using or incorporating the Confidential Information, nor as creating an implied or express license grant from either party to the other."

[31] NDA 7: "Termination and Duty to Return. Either party may terminate this Agreement at any time without cause upon notice to the other party. However, all obligations of confidentiality shall survive the termination of this Agreement. In the event this Agreement is terminated, and the disclosing party so requests, the receiving party shall promptly return or destroy (and certify destruction of) all Confidential Information which is received from the disclosing party along with copies which it made."

[32] RUNDA 14(a): "This Agreement is neither intended to nor shall it be construed as creating a joint venture, partnership, or other form of business association between the parties, nor an obligation to buy or sell products or services using or incorporating Confidential Information." (Johnson Aff. Exh. 3.)

MERCED DISCLOSURE AGREEMENT 10: "Neither party warrants that the information that it discloses is necessarily complete. Neither party undertakes to advise the other of any changes in its plans. Neither party shall be obligated to take into consideration any plans of the other or to design any of its products specially to accommodate the products of the other or to do business with the other in the future." (Johnson Aff. Exh. 4.)

misused or mishandled Intel's confidential data in any way at all. The record is not to the contrary. (Patterson Aff. P 11-12). [33]

[32]** In 1995, Intergraph successfully participated as a "Validation Partner" in the development and release of Intel's Pentium Pro product, (Johnson Aff. P 12), prompting Intel to feature Intergraph's workstations in the "roll out" of the Pentium Pro chip and in its 1995 Annual Report. [34]

[33]** In 1997, some OEM customers of Intel made inquiries about whether Intel would indemnify them with regard to claims of patent infringement they had received from Intergraph. (Epstein Aff. P 4; Epstein Aff. **[*1267]** Exh. 1). In response, Intel's Senior Licensing Counsel contacted Intergraph about the possibility of negotiating a cross-license arrangement so that Intel and Intergraph each would then have access to certain patent rights held by the other. (Epstein Aff. P 5; Epstein Aff. Exh. 2).

Those negotiations were unsuccessful, and eventually, at some point that is not clear, Intel changed the text of the NDAs it presented to Intergraph for execution in connection with the development of future projects. (Tr. 88-89). Specifically, in those proposed NDAs, Intel inserted a new provision that would have given Intel a license to use all of Intergraph's patented technology without cost (Patterson Aff. P 12; Tr. 154). When Intergraph asked for the provision, which would license its patented technology to Intel, to be removed, Intel withdrew the proposed NDAs and refused to allow Intergraph to participate in the new programs or to provide any of its confidential information to Intergraph, **[**34]** which was necessary for Intergraph to continue product development. (Tr. 89, 133).

On March 28, 1997, responding to Intergraph's expressed concerns about the relationship between Intel and itself, the defendant's Huntsville, Alabama-based Field Representative, Keith Johnson, provided Allen Braxton, a purchasing agent for Intergraph, a letter in which he confirmed that Intel intended to: (1) treat Intergraph "as a strategic customer in current and future programs; " (2) support Intergraph with "product supply, design, quality, manufacturing and marketing;" and (3) provide Intergraph "the benefit of additional price reductions." [35] (Johnson

---

[33] Mr. Patterson stated by affidavit:

As noted, the company has entered into numerous non-disclosure agreements with Intel, for a variety of products and information. The company has maintained the confidentiality of information supplied under such non-disclosure agreements. The company took reasonable precautions to protect the confidentiality of information supplied by Intel, to the satisfaction of Intel. The company has maintained such information in its restricted access facilities, and by only supplying such information to specifically named personnel who needed the information for development or support efforts.

Intel has never accused Intergraph of violating, or disregarding, any non-disclosure agreement, or improperly disclosing such information. Nor has Intel ever complained to Intergraph about confidentiality or compliance issues pertaining to information supplied under a non-disclosure agreement. In fact, the first time Intel ever raised an issue about information provided under a non-disclosure agreement was after Intergraph refused to grant Intel royalty free rights under the company's Clipper patents. Specifically, I was advised by both Pat Gelsinger and Annand Chandreshaker, on four separate occasions, that Intel would not enter into any future non-disclosure agreements or supply any information normally provided under non-disclosure agreements, unless Intergraph conceded and granted Intel rights under its Clipper patents. Shortly thereafter, Intel first demanded the return of information under (sic) non-disclosure agreement. Even then Intel did not allege that we had failed to comply with the non-disclosure agreements, rather that said they [sic] could unilaterally terminate for any reason at any time.

(Patterson Aff. 11 and 12).

[34] Intel's validation partners enjoy a mutually beneficial, but transitory, relationship whereby an Intel customer participates in the developmental testing of a specific Intel product that would potentially be useful for integration into the customer's own product. (Johnson Aff. 11-12). As part of this relationship, the customer receives Intel confidential information with respect to the product, and sample products, before such information and products are available to others. (Johnson Aff. 11). Intergraph was a validation partner with respect to Intel's Pentium Pro processor, which has now been on the market for approximately two years. (Johnson Aff. 11). Intergraph has not been a validation partner for any subsequent Intel products. (Johnson Aff. 12).

[35] The entire text of Mr. Johnson's letter was as follows:

This is to confirm Intel's intent of supporting Intergraph as a strategic customer in current and future programs. This support includes product supply, design, quality, manufacturing and marketing.

Aff. Ex. E; Blaxton Aff. P 3-4). In his March 28, 1997, letter Mr. Johnson specifically includes the "Deschutes" and "Merced"" programs under development by Intel. (*Id.*). Additionally, the undisputed evidence shows that, at the time of the letter, Intel already had projected "current and future programs" through the year 1999. (Patterson Second Supp. Aff. Ex. C) (filed under seal).

[35]** Notwithstanding the representations made by Mr. Johnson on behalf of Intel in the March 28, 1997, letter, Intel continued to propose a cross-license agreement whereby Intergraph would be required to surrender its patent rights in the Clipper related technology. (Tr. 155). The court is not persuaded by Intel's suggestion that its offer to license some of its patents to Intergraph created a *quid pro quo,* a tit-for-tat. (*Id.*). As Mr. Patterson observed, Intergraph no longer has need of the Intel patents because it is no longer in the business of producing microprocessors. (Tr. 155-159).

On August 13, 1997, after Intel was unable to secure the Intergraph patent rights on terms it considered acceptable, it summarily and unilaterally canceled all Intergraph's outstanding NDAs and RUNDAs and demanded the return of all confidential information it had provided to Intergraph. (Verified **[*1268]** Motion Ex. A). Apparently, Intel backed away from its decision to terminate Intergraph's NDAs at that time, because, immediately after Intergraph filed this action, Intel wrote to Intergraph terminating NDAs and demanding the return of all confidential information. [36]

[36] D. Intel's Conduct with Respect to Intergraph.**

1. Intel's Product Distribution System.

Mr. Patterson testified that Intergraph is unable to obtain Production Chips through distributors unless Intergraph has previously obtained an allocation of such chips from Intel. (Tr. 170-73). Mr. Patterson testified that Intergraph has attempted to purchase Production Chips through a distributor and has been informed that such a purchase is not possible unless advance approval is received by the distributor from Intel. (Tr. 173-74). In response to the testimony of Mr. Patterson, Intel submitted the affidavit of Edwin Bauernfreund, who testified that Intel's sales to distributors are based on allotments to the distributors themselves, rather than allotments to the ultimate purchaser.

As a strategic customer, Intel is offering Intergraph the benefit of additional price reductions on all microprocessor products placed direct with Intel. Intel and Intergraph are currently involved in multiple programs efforts. I have outlined several below for your review.

1. Pentium(R) Processor, Pentium(R) II Processor and Pentium Pro(R) Processor production programs.

2. Pentium(R) Processor, Pentium(R) II Processor and Pentium Pro(R) Processor design programs.

3. Development efforts with Intel's next generation microprocessor and chipset technology, i.e., Deschutes, Merced, etc. These are currently being managed under Non-Disclosure.

4. Marketing involvement and new product introduction events. The Pentium(R) II Processor and Wired for Management efforts being the most recent. Intergraph is also active in the Intel Inside(R) Program.

It is Intel's intent to assist Intergraph in its efforts whenever possible. These efforts are integral to our respective companies (sic) future success.

Intel's goal is to lead the market in personal computer, workstation and server industry. We look forward to a mutually beneficial business relationship and appreciate Intergraph's continued support toward this goal.

(Intergraph's Preliminary Injunction Motion Exh. 7).

[36] Intergraph filed this action on Monday, November 17, 1997, in this court. Within hours Intel filed an action in the Northern District of California seeking a declaratory judgment asserting that Intergraph's patents were invalid and that it had not infringed those patents. One week later, Intel filed a second action in the Northern District of California by which it claimed that Intergraph had breached its contract with Intel by refusing to return confidential information that had been provided under the canceled NDAs. On December 1, 1997, the court issued a temporary restraining order to prevent Intel from proceeding with the California law suits. That order was allowed to expire after Intel counsel represented to the court that Intel would not pursue the California actions pending resolution of its motion under *28 U.S.C. § 1404(a)*. That motion has been filed and briefed and is under consideration by the court.

(Bauernfreund Aff. P 3). Mr. Bauernfreund further testified that Intel's microprocessors are generally available through distributors without allocation figures or specific approval from Intel. (Bauernfreund Aff. P 4). Finally, Mr. Bauernfreund stated that there currently is a supply of a particular chip, the Intel Pentium II 300 MHz, through distributors, which is adequate to supply **[**37]** Intergraph's needs of approximately 10-20,000 units per quarter. *(Id).*

Intergraph responded to the Bauernfreund affidavit with an affidavit of one of its own employees, Sanford C. Morris, Jr., who formerly was employed by one of Intel's distributors. Mr. Morris stated that Intel's allotments to distributors are directly and specifically related to the ultimate purchaser of the chips, and that distributors lack sufficient inventory to fill customer orders, especially larger orders such as those placed by Intergraph, without a specific allotment and approval from Intel. (Morris Aff. P 3). Kirk Totten, an Intergraph employee who previously was employed by a contract computer manufacturer, testified that Intel sold chips to the contractor for resale to a third party only through specific allotments that identified the ultimate purchaser of Intel's chips. (Totten Aff. P 7). Mr. Totten further testified that, since November, Intergraph has been unable to fill through distributors an order for approximately 5,000 Pentium II 300 MHz chips. (*Id.* P 8). Allen Blaxton testified that Intergraph has been unable to purchase Intel chips from distributors, which have informed Intergraph **[**38]** that they require a specific allocation in order to sell Intel chips to Intergraph. (Blaxton Supp. Aff. P 3-4).

Mr. Bauernfreund goes on to state that, without an allocation, the new Pentium II processor, the 333 MHz version, will not be available through distributors until 30-90 days after introduction by Intel. (Bauernfreund Aff. P 8). This testimony confirms Intergraph's position that purchasing through distributors is an inadequate means by which it can procure the Production Chips necessary for its manufacturing needs. A 30-90 day delay was described by Mr. Patterson as extremely injurious to Intergraph efforts to maintain a competitive presence in the high-end workstation market. (Patterson Aff. P 16).

The court accepts Mr. Bauernfreund's testimony that Intel does not explicitly "tell" its distributors to whom they may sell Intel Products. (Bauernfreund Aff. P 4). This, testimony, however, begs the ultimate question of whether Intel Product would be available to Intergraph without an allocation from **[*1269]** Intel. On this issue, even Mr. Bauernfreund admitted that Intergraph would fall 30-90 days behind its competitors. Mr. Morris confirms that such delays occur due to inventory **[**39]** shortages. (Morris Aff. P 3). At least as important, advance samples of Intel microprocessors, which are necessary for Intergraph to have its products ready for deployment at the same time as its competitors, are available only from Intel. (Blaxton Supp. Aff. P 5).

The delay conceded by Mr. Bauernfreund would prevent Intergraph from maintaining a competitive presence in the high-end workstation market. Though Mr. Bauernfreund stated generally that there was an "adequate supply" of Intel's previously released 300 MHz Pentium II available (Bauernfreund Aff. P 7), the available evidence is to the contrary. In late November Intergraph sought to purchase 5,000 such microprocessors for delivery in February and was told repeatedly that this small quantity was not available. (Totten Aff. P 8).

2. Intel, Intergraph and Essential Facilities.

Before mid-1996, Intel and Intergraph enjoyed a mutually beneficial business relationship. As a result of this relationship, Intel regularly provided Intergraph with CPUs, technical information, and support essential for Intergraph to be competitive in its chosen field Intel regularly supplied Intergraph with early samples of its **[**40]** CPUs for testing and development, often within weeks of their first production. (Phillips Aff. P 4-5). Intel provided motherboard design assistance, and it reviewed Intergraph's design schematics to ensure that any "bugs" or defects in the Intel CPU or chips were avoided. *Id.* Intel provided detailed information on its technology and future plans, and it solicited Intergraph information and technology for incorporation into future Intel designs. *Id.* Intel provided advance information on its own design and development efforts, and it supported Intergraph's development efforts. *Id.*

The court finds that essential to Intergraph's competitive survival is for it to have access to Intel's CPUs, Advance Chips Samples, and advance technical and design assistance and information as quickly as possible and no later than Intergraph's competitors. [37] (Meadlock Aff. PP 13-16; Patterson Aff. PP 13-17).

[41] [*1270]** The court also finds that Intel has no legitimate business purpose in refusing to deal with Intergraph in accordance with the previously established business relationship between the parties, especially in view of Intel's exclusive control of the CPUs used by Intergraph and the complete lack of feasible alternatives available to Intergraph. The patent dispute that arose between the parties could and should be resolved without linking it to the supply of products and information that are essential to Intergraph's business survival. [38]

The court finds that the Advance Chips Samples and advance design and technical **[**42]** information are essential products and information necessary for Intergraph to compete in its markets. Denial of these products and information will seriously impair Intergraph's competitive ability, thereby severely injuring Intergraph as a competitor and injuring competition generally.

3. The Graphics Subsystem Market.

---

[37] In his affidavit, Terry Phillips, Manager of Workstation Development for Intergraph for some three years, described the manner in which Intergraph and Intel had previously worked together:

I have worked directly with Intel's technical support personnel to obtain advance technical information and ongoing development assistance for the development of Intergraph's workstations. I have also worked with Intel's technical support personnel to obtain information on Intel defects and corrections for Intel products incorporated into Intergraph's workstations. Additionally, I have worked with Intel's local representative in Huntsville, Keith Johnson, to obtain early releases of advance product samples for workstation development. All of which are necessary for continued development and support of Intergraph's workstations.

Intel has supplied Intergraph with advance technology, product information and advance product samples since 1993 as an integral part of Intergraph's purchase of Intel chips. The technical information and advance product samples are essential for the incorporation of Intel's products into Intergraph workstations, "debugging" Intel's chips, and providing support to Intergraph customers. For instance, new shipments and revisions of microprocessors and chips generally contain new technical information made available under a non-disclosure agreement, including information on debugging and errata as such problems become known to Intel. Intel's products cannot be utilized without this essential product information, much of which was provided in years past to the general public in "data books," but which now is parceled out through non-disclosure agreements.

Intel supplied advance technical product information and support, as well as early releases of advance product samples until about August 1997. Since August, Intel has refused, or delayed, access to product information, defect and defect correction information, technical support and advance product samples. As a result, Intergraph has had to expend significant time and resources to work through development issues and delays caused by Intel's refusal to supply such necessary technical information and support. Further, Intergraph has been significantly delayed in releasing previously announced workstation products. If Intel is permitted to continue to withhold advance technical information and support, Intergraph will be unable to properly utilize the product obtained from Intel, and unable to correct defects in Intel's products or errors in Intergraph's designs based upon such defects.

Intergraph cannot continue to develop competitive workstation products without a sustained supply of microprocessors, chips, early release product samples, and technical product information and support. Further, Intergraph cannot continue to support customers utilizing Intergraph's Intel-based workstations, without ongoing technical support and defect information and assistance.

Without a sustained supply of microprocessors, chips, early release product samples, technical information and support, Intergraph will not be able to supply competitive workstation products or ongoing support, and will lose its significant technological lead, reputation and goodwill in the highly technical workstation market.

(Phillips Aff. 4-8).

[38] The conduct of Intel in this dispute contrasts sharply with that of IBM. Mr. Patterson testified that Intergraph and IBM have been engaged in a continuing dispute over their respective patent rights. That dispute has apparently not risen to the level of litigation but, in any event, Intergraph and IBM continue an amicable and profitable business, each being a customer of the other.

An essential component of Intergraph's business is the design and production of graphics subsystems. These are critical systems for high-end workstations, which provide high performance 2D or 3D graphics capabilities essential to the work of design and graphics engineers, as well as graphics artists. Intergraph designs its own graphics cards and motherboards to create its high performance graphics subsystems. (Patterson Supp. Aff. PP 3-6).

Intel has entered the graphics subsystem market (Patterson Second Supp. Aff. Ex. C (filed under seal)) and is now a direct competitor of Intergraph in that market. Intel has recently signed an agreement to purchase Chips & Technology Company, an experienced and successful producer of graphics chips and chip sets. (Patterson Supp. Aff. P 7). The proposed acquisition of Chips & Technology is currently being **[**43]** reviewed by federal antitrust regulators. Intel has also entered into a joint development relationship to form a company called Real 3D, Inc. to create 3D graphics technology. Intel has already incorporated graphics technology, called MMX, into its own CPUs. (Tr. 67-68; Patterson Supp. Aff. P 7). Intel has announced that its motherboard graphics subsystem will be available in early 1998. *See* December 12, 1997, Article "Intel's Graphics Chip Due Soon;" (Tr. 67-68). By withholding advance CPU samples and essential design and technical information from Intergraph, Intel restrains Intergraph's ability to compete in the graphics subsystem market and may be using its monopoly power in the "x86" CPU market to obtain a monopoly in the graphics subsystem market.

The motherboard and graphics subsystems markets are fast-evolving, high technology markets. Users of high-end workstations such as those produced by Intergraph and others demand the most current and best performing technology available. If these consumers cannot get the most advanced product from Intergraph, they will get it from Intergraph's competitors who have not been denied access to the advance information, sample chips, **[**44]** and production chips that Intel has denied to Intergraph. By its conduct toward Intergraph, Intel threatens to substantially restrain actual and potential competition in the graphics subsystem market. The effect of Intel's conduct may be to leverage its monopoly in the "x86" CPU market **[*1271]** and to create a monopoly power in the graphics subsystem market.

4. Intel's Use of NDAs to Coerce Intergraph.

Intel provides its products, as well as technical and design information, to Intergraph under NDAs, which are terminable at will by Intel. These NDAs are documents drafted by Intel and presented to Intergraph and other customers on a take-it-or-leave-it basis. Intel simply dictates the terms under which it provides its products and design information to customers such as Intergraph. (Patterson Tr. 128-130).

The evidence suggests strongly that Intel has used the threatened or actual termination of NDAs as a contractual weapon, coercing customers such as Intergraph to accede to Intel's demands and restraining competition. The court takes judicial notice of the fact that, when Intergraph and Digital Equipment separately asserted their patent rights against Intel, Intel **[**45]** immediately used the termination provisions of their respective NDAs to deny both Intergraph and Digital further technical information, samples, and products and demanded the return of all Intel confidential information provided to them. *See Intel v. Intergraph* and *Intel v. DEC* lawsuits. Also, the court takes judicial notice of the current government antitrust investigation of Intel by the Federal Trade Commission involving allegations of similar conduct by Intel in withholding crucial technical or design information or terminating NDAs to restrain competition. (Verified Motion Ex. D).

In view of Intel's previous policy of providing much of the same type of information now subject to NDAs in a much less restricted manner and in view of the fact that Intel has offered no reasonable explanation of any present need for the use of the NDAs, it seems reasonable to conclude that Intel's present use of one sided and terminable-at-will NDAs and its retaliatory cancellation of the NDAs are unreasonable and anticompetitive contractual restraints using Intel's monopoly in CPUs and related design and technical information. Furthermore, the chilling effect which Intel's arbitrary enforcement **[**46]** of the NDAs in this manner must have on other members of the industry, who are dependent upon Intel for microprocessors, is obvious.

Other than Intel's position that it does not wish to do business with those who sue it (Tr. 313 - 314), the court perceives of no rational or legitimate business reason why Intel would immediately terminate its NDAs with Intergraph. As noted before, there is no suggestion in the record that Intergraph has failed in any way to fully honor and comply with its obligations of confidentiality under the NDAs.

5. Intel's Conduct to Restrain Competition in the Graphics Subsystem and Workstation Markets.

Intergraph will likely prove that Intel has recently entered into agreements, conspiracies and combinations with Intergraph's competitors and suppliers to restrain competition from Intergraph in the graphics subsystem and workstation markets. Intel has offered Intergraph customers in the digital media market funding for projects or other support on condition that such customers use workstations from Intergraph's competitors and that they not deal with Intergraph. (Patterson Supp. Aff. P 8; Tr. 91-93). Intel has agreed with competitors **[**47]** of Intergraph, such as Compaq and NetPower, to make joint presentations to Intergraph's customers to convince them not to deal with Intergraph and to buy from Intergraph's competitors instead. (Tr. 199-201).

Intel has used the termination of a three-way NDA to prevent a test equipment supplier from doing business with Intergraph, to prevent that supplier from providing needed test equipment to Intergraph, and to prevent Intergraph from fixing a "bug" in Intel's product. [39] Moreover, Intel refused to provide **[*1272]** information to Intergraph, which was needed to fix the "bug," requiring Intergraph to spend substantial time and resources to solve the problem and delaying Intergraph's product entry into the market. (Tr. 205-211). The court can find no legitimate business justification for Intel's conduct. By preventing Intergraph from acquiring the data necessary to fix the "bug," Intel failed to comply with its own warranties and contractual obligations.

[48]** The court also finds that Intel has attempted to leverage its monopoly power in the "x86" CPU market to prevent Intergraph from competing in the graphics subsystem and workstation markets and to control and dominate competition in these markets through discriminatory and favored agreements and understandings with some of Intergraph's competitors. This reduces competition in the markets in which Intergraph competes, depriving customers of alternative and improved technology in these markets, stifling innovation, reducing competition in price and quality, and impairing competition generally.

6. Intel's Conduct Toward Intergraph Since the Hearing.

Intel originally promised Intergraph that it would deliver samples and technical information pertaining to Intel's latest microprocessor (code named "Deschutes") by December 15, 1997. Those samples were not delivered to Intergraph until January 26, 1998, the date on which Intel publicly released that product as the 333 MHZ, "Pentium II" microprocessor. That same day, Intergraph's competitors announced that they had Deschutes-based workstations available for delivery. Likewise, based upon the assurances of Keith Johnson, **[**49]** as reaffirmed by the affidavit of Mr. Bauernfreund, Intergraph also announced that its TDZ 2000 workstation would incorporate the new 333 MHz Pentium II microprocessors. (Second Meadlock Aff. P 6).

On January 26, 1998, however, Mr. Johnson, at a meeting at Intergraph in Huntsville, Alabama, informed Intergraph, for the first time, that Intel would not honor its commitment to supply Intergraph with technical design, defect or user information pertaining to the newly released Deschutes processors. Mr. Johnson also advised Intergraph that Intel would not supply Intergraph with the revised Deschutes "BIOS" code. [40] As a result, Intergraph lacked the information and software necessary to complete the system integration of the Deschutes processor and a third-party motherboard for the TDZ 2000. (Phillips Aff. P 5). Mr. Johnson further advised Intergraph that the only information that would be made available to it was the information already available on Intel's publicly accessible site on the World Wide Web, information that did not include the technical data necessary to design or support

[39] The evidence was that after Intel refused to provide Intergraph with technical data required to "fix" a bug in one of its processors, which prevented the computer from being turned off, Intergraph sought to purchase certain equipment from Tektronix, a manufacturer and provider of test machines, so that it might analyze and "fix" the bug without the aid of Intel. Because Intel had canceled its NDAs and three-way NDAs with Intergraph, Tektronix refused to sell the test equipment to Intergraph. (Tr. 204-06).

[40] BIOS is an acronym for Basic Input Output System. It is the most basic level of software which provides communications services between the CPU and other hardware components of a computer.

Deschutes/Pentium II-based products. (Dobbins Aff.) Mr. Johnson even refused to give Intergraph **[**50]** the address of the Intel Web Site [41] containing the public information. (Dobbins Aff.).

Subsequent to the Huntsville meeting with Mr. Johnson, Intergraph requested a copy of the revised BIOS from the BIOS developer, but it was told that Intel had instructed the developer to withhold the BIOS from Intel's customers. Intergraph was able to acquire a copy of the BIOS from a local Intel distributor, but still has not been supplied **[**51]** with the necessary Des chutes technical information. (Elliott Aff. P 3, Greg Vance Aff. P 3.) As a result, Intergraph still cannot complete a deliverable Deschutes-based product. (Phillips Aff. P 5, Ellard Aff. P 5, Farmer Aff. PP 3, 4, Elliott Aff. P 3).

[*1273] With respect to other Deschutes-based products, Intergraph had to cancel several motherboard developments and the F5 server project. (Phillips Aff. P 3, 4, Hall Aff. P 3, Worden Aff. P 3). Intergraph has also been compelled to contract with third-party manufacturers on an emergency basis to design and build mother boards so that it will have some product to offer. Third party contracting delayed Intergraph's ability to get a competitive product to market, and will yield motherboards and systems which are not specifically tailored to Intergraph's needs. (Ellard Aff. P 5, Farmer Aff. P 3, Vance Aff. P 3)

Because Intel has continued to withhold technical information from Intergraph, the plaintiff has no Deschutes-based "next generation" products available. (Ellard Aff. P 5, Elliott Aff. P 3.) According to Mr. Meadlock, Intel's refusal to deal continues to further erode Intergraph's goodwill and reputation with its customers **[**52]** and the industry. (Meadlock Aff. P6.) The termination of Intergraph's Deschutes-based projects is irreparably effecting Intergraph's future product development, "and the effect of that is going to be to put Intergraph in a position where it cannot compete in its market." (Transcript page 232, lines 1-3.)

III. Monopoly Power and the Relevant Market.

In addition to the relevant market of high performance microprocessors (or "CPUs"), the court finds that Intel CPUs are a separate relevant product market or relevant submarket based on the following facts:

(a) Intel's Pentium CPUs and Intel's next generation CPUs (such as Deschutes and Merced) are not interchangeable with other CPUs; (Tr. 64-65);

(b) Intel's Pentium CPUs have performance capabilities that surpass the performance of other CPUs; (Tr. 70-71);

(c) Intel has enormous brand recognition and appeal among consumers, who demand an Intel CPU, and end-user consumers do not consider other systems to be substitutes or alternatives. (1996 Intel Annual Report 1996); [42]

(d) Once customers are technologically and financially locked-in to an Intel CPU, they cannot feasibly switch to an alternative **[**53]** CPU. (Patterson Supp. Aff. P 14);

(e) Intel has a huge installed base of customers locked in to Intel's network. This creates network barriers, compatibility barriers and increasing returns to scale [43] that further entrench Intel; and

(f) Intel has deliberately designed its related CPU architecture (such as proprietary sockets) to prevent other CPUs from being compatible, thereby converting its CPU architecture from an "open" to a "closed" system; (Tr. 85).

[41] The court is not impressed that withholding this readily available web site address was significant except to the extent that it demonstrates the level of Mr. Johnson's own animus toward Intergraph. His attitude may or may not reflect that of his superiors at Intel, though the court is impressed with the manner in which Intel apparently plays "hard ball" with those who cross it.

[42] Because of the demand for Intel's newest generation CPUs, Intel operates an allocation system to control supply of CPUs to its customers. (Keith Johnson Aff. 16).

[43] See Section V.A. 1.e, infra, for discussion of "returns to scale" as a basis for finding the existence of monopoly power.

It is self-evident, as admitted by Intel's counsel, that Intel has a 100 percent absolute monopoly of Intel CPUs. (Tr. 262).

There are enormous and extreme financial and technological barriers to entry so that no other company can feasibly **[**54]** enter the relevant market and provide effective competition to Intel. IBM and Motorola unsuccessfully attempted to compete with Intel with the PowerPC CPU. But Microsoft no longer supports the PowerPC with a compatible Windows program, so it is not an alternative. (Tr. 165-166). Counsel for Intel alluded to the Alpha CPU, owned by Digital Equipment Corporation, as a potential competitive CPU, but the court takes judicial notice of published reports of the settlement between Intel and Digital giving Intel ownership and control of Alpha.

Based on the foregoing facts, the court finds that Intel has monopoly power in the relevant market of high performance CPUs **[*1274]** and the separate relevant market of Intel CPUs on a worldwide basis.

IV. Harm to Intergraph and Hardship to Intel if the Injunction is Granted.

As the court has found, Intergraph has no viable alternative to Intel's Pentium II microprocessor for its high-end computer workstations. Because it has no such alternative, there is no way Intergraph can mitigate the harm it faces from Intel's conduct during the foreseeable pendency of this lawsuit. Intergraph has established to this court's satisfaction that Intel **[**55]** dominates the high-end Windows-based workstation market in which Intergraph operates and in which Intergraph has built its reputation. (Tr. at 96-97; Patterson Aff. PP 18-19).

Intel advanced technical information, samples, and products, which are distributed through the use of NDAs, are all necessary to Intergraph's survival as a competitor in the high-end computer work station market, which depends upon its ability to adequately service and provide customer support for its existing products, as well as its ability to create, manufacture, and sell competitive products in the future. (Patterson Aff. P 16; Tr. at 97). Adequate supplies of Intel Production Chips are necessary to Intergraph's manufacturing operations because of its technological and economic lock-in to Intel. Virtually all of Intergraph's manufacturing is dedicated to the production of Intel-based computers and graphics subsystems. (Meadlock Aff. P 15). Intel Chips Samples and Early Release Chips are critical to Intergraph's development of new products, and, particularly because of the short shelf life of these products, those Chips Samples and Early Release Chips are critical to Intergraph's ability to compete. For **[**56]** instance, while the Pentium II 300 MHz processor was the fastest and most powerful microprocessor available in the Windows-based workstation market at the time of the Hearing, the testimony indicates that Intel planned to release a faster version in January 1998. [44] (Tr. 55-56). Competitors of Intergraph apparently have already received substantial lead time in developing new workstations based upon Early Release Chips and Chips Samples. (Meadlock Aff. PP 13-14; Patterson Aff. PP 14, 17, 21).

The court is persuaded that disruption in the supply of Intel Products will adversely affect Intergraph's relations with its customers, employees, shareholders, creditors, distributors and suppliers. (Meadlock Aff. P 16; Patterson Aff. PP 23, 25; Blaxton Aff. P 7; Floyd Aff. PP 3-5; Phillips Aff. P 8; Ellard Aff. P 7; Tr. at 97-100). Disruption in the supply of Intel Products has the serious potential of shutting **[**57]** down the development and manufacturing efforts at Intergraph, potentially causing the loss of thousands of jobs. (Tr. 99; Meadlock Aff. P 17; Patterson Aff. P 22).

Some of Intel's actions directed against Intergraph in 1996 and early 1997 were in response to Intergraph's refusal to license its Clipper patent rights. Apparently, that conduct was exacerbated and continued because Intergraph filed the present lawsuit. Recent events demonstrate that the potential damage to Intergraph in terms of loss of good will, harm to reputation, and other losses is difficult, if not impossible, to calculate. Intel's counsel has admitted that Intel withheld Information from Intergraph on "bug" problems with Intel Chips in the fall of 1997. *See* December 5, 1997, Letter from Intel's counsel. Intel's failure to detect a design problem as simple as turning a computer on and off cost Intergraph thousands of design hours. Further, Intel then failed to provide Intergraph with curative

[44] In fact, the court takes judicial notice that Intel has released a 333 mhz. version since the Hearing.

information and later denied Intergraph access to testing equipment. (Tr. 89-91; 210-212). Because of Intel's conduct, Intergraph was delayed in getting its TDZ 2000 products to the market. (Floyd Aff. P 4). Most recently, **[**58]** Intel reneged on its commitment to supply the Deschutes Chips Sample in mid-December of 1997. (Blaxton Aff. P 5). The effect of this delay is to put Intergraph materially behind its competitors.

[*1275] In 1996, Intel reported net earnings of Five Billion Dollars ($ 5,000,000,000), while Intergraph reported a net loss of Sixty-Nine Million Dollars ($ 69,000,000). Intergraph has improved its system sales for 1997, as its sales of high performance workstations were projected to increase by eighty percent over 1996 sales. (Tr. 215). These are the very workstations that are dependent on Intel Products.

Given Intel's position as the exclusive supplier of microprocessors in this market, the court finds that Intel's actions are likely to cause harm to Intergraph that would thwart this court's ability to provide meaningful relief at the conclusion of this action, should Intergraph prevail on its claims. On the other hand, if the injunction is issued, Intel will be required to do nothing more than what it willingly, and apparently profitably, did with Intergraph for several years. It will merely be required to engage in business with Intergraph on substantially the same terms that it did **[**59]** between 1993 and 1997 and on substantially the same terms it does with others in the computer industry today. The balance of the harm to Intergraph and the hardship to Intel weighs heavily in favor of issuing the injunction.

V. Conclusions of Law.

A. Section II of the Sherman Anti-Trust Act.

HN3[] *Section 2* of the Sherman Anti-Trust Act ("*§ 2*") provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony…." *15 U.S.C. § 2*. ***HN4***[] In order to prevail on its *§ 2* monopolization claim, Intergraph only needs to establish that Intel (1) possesses monopoly power in the relevant market and (2) has willfully acquired or maintained that power. *Eastman Kodak v. Image Technical Services, Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 2089-90, 119 L. Ed. 2d 265 (1992)* (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1703-04, 16 L. Ed. 2d 778 (1966))*. The court concludes that Intergraph has established a substantial likelihood of proving **[**60]** both elements at trial.

1. Intel Monopoly Power.

a. The Relevant Market.

Based on the Findings of Fact, the court concludes there are two relevant markets in which Intel has monopoly power: (a) the relevant market for high performance microprocessors or CPUs and (b) the separate relevant market for Intel CPUs. Intel's counsel conceded the first relevant market at the Hearing. (Tr. 289: "I think there is one market which is a market for CPUs or microprocessors that are supplied to high-end workstations.").

The court concludes that Intel CPUs are also a separate relevant market under well-established criteria for determining relevant markets. *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 998 (11th Cir. 1993)* (holding that the market for a premium-priced anchor, which is part of a broader anchor market, constituted its own relevant market); *Los Angeles Mem. Coliseum Comm'n v. National Football League, 726 F.2d 1381, 1393 (9th Cir. 1984)*, *cert. denied sub. nom., Oakland-Alameda County Coliseum, Inc. v. Oakland Raiders, Ltd., 469 U.S. 990, 105 S. Ct. 397, 83 L. Ed. 2d 331 (1984)*; *Eastman Kodak, 504 U.S. 451, 119 L. Ed. 2d 265, **[**61]** 112 S. Ct. 2072* (Kodak spare parts are a separate relevant market).

b. Intel's Extraordinary Market Share.

Intel's extraordinarily high market shares in the relevant markets clearly exceed the legal threshold for presumptive monopoly power. In the market for Intel CPUs, Intel has an absolute monopoly of 100 percent of the market. In the market for "x86" CPUs, Intel has a ninety percent share of the market. These shares alone support the court's conclusion that Intel possesses monopoly power in the relevant markets. ***HN5***[] A sixty to sixty-five percent market share establishes a prima facie case of market power and creates a genuine issue of dangerous probability of monopolization. *U.S. Anchor, 7 F.3d at 999*; *see also* *United States v. Microsoft Corp., 980 F. Supp. 537, 1997 U.S. Dist. LEXIS 19496* **[*1276]** (approximately eighty percent market share in PC operating system software constitutes monopoly power); *United States v. Grinnell Corp., 384 U.S. 563, 570, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)* (eighty percent market share is a "substantial monopoly" and eighty-seven percent "leaves no doubt" of monopoly power).

c. Intergraph is Technologically and Economically [62] "Locked-In" to Intel's Microprocessor and Technical Information.**

Because, Intergraph has re-designed its workstation program around Intel's microprocessor in reliance on Intel's representations that it would be a reliable source of technical information and technology to Intergraph--Intergraph is "locked-in" to Intel's microprocessor technology and cannot feasibly switch to other microprocessors. Intel's other customers are similarly "locked-in." This reinforces and magnifies Intel's monopoly power. *Eastman Kodak, 504 U.S. at 477* (antitrust concerns are heightened where "locked-in" customers cannot readily switch to alternative technology).

d. Customer Loyalty To Intel Enhances Its Monopoly Power.

HN6[] Strong customer brand loyalty is an impediment to competition, aids the exercise of market power and facilitates monopolization. *U.S. Anchor, 7 F.3d at 998*; *see also* *United States v. E.I. du Pont de Nemours and Co., 351 U.S. 377, 392-93, 76 S. Ct. 994, 1005-06, 100 L. Ed. 1264 (1956)*; *Ware v. Trailer Market, Inc., 623 F.2d 1150, 1154 (6th Cir. 1980)*. Intel clearly has brand identification through its "Intel Inside" program and other brand recognition **[**63]** that reinforces and magnifies Intel's monopoly power. Intel enjoys the extraordinary loyalty of its customers with almost all purchasers of personal computers and the great majority of workstation buyers insisting upon having a genuine "Intel Inside" their computers.

e. Intel's Large Installed Base And Network Of Customers Further Enhances its Market Power.

As the installed base of Intel-based computers, servers, and workstations increases, Intel's market power is magnified, entry barriers are raised higher, and competitors are foreclosed from the market. *See* *United States v. Microsoft, 312 U.S. App. D.C. 378, 56 F.3d 1448 (D.C. Cir. 1995)*, *on remand,* 1995-2 Trade Cases P 71,096, 1995 WL 505998 (D.D.C. 1995) (increasing returns to scale represent a significant entry barrier in computer software market to compete against Microsoft with its large installed base; antitrust consent decree approved). This factor also supports the court's conclusion that Intel possesses monopoly power in the relevant markets. ***HN7***[] A rapidly evolving high technology market such as microprocessors provides a market environment favorable to increased concentration of market power. *Greyhound Computer Corp., Inc. v. IBM, 559 F.2d 488, 497 **[**64]** (9th Cir. 1977)* ("But rapid technological progress may provide a climate favorable to increased concentration of market power rather than the opposite.")

The court concludes that the combination of all the foregoing factors establishes that Intel has monopoly power as a matter of law in the two microprocessor relevant markets.

2. Intel has Willfully Acquired and Maintained Its Monopoly Power.

The second element of a *§ 2* monopolization violation is the willful acquisition or maintenance of monopoly power. The court concludes that the facts amply establish this element. "Market power is the power to force a purchaser to do something that he would not do in a competitive market." *Eastman Kodak, 504 U.S. at 464*. This describes Intel's power and the exercise of this power in the relevant markets in this case, for it strongly appears that Intel has attempted to coerce Intergraph into relinquishing its intellectual property rights as a condition of Intel permitting

Intergraph to continue as a competitor in the high-end graphics workstation market. Intel induced Intergraph to discontinue the use and further development **[**65]** of its then competitive Clipper microprocessor. Intel has won the microprocessor platform competitive war and dominates the high-performance CPU market.

[*1277] Because Intel is a monopolists, the law imposes upon it affirmative duties to refrain from acting in a manner that unreasonably harms competition. It is not necessary for Intergraph to establish that Intel acquired its monopoly unlawfully. It is enough to show that Intel has misused or maintained that monopoly, even if lawfully acquired. ***HN8***[] "The use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful." *U.S. v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 945, 92 L. Ed. 1236 (1948)*.

HN9[] Even conduct by a monopolist that is otherwise lawful may violate the antitrust laws where it has anticompetitive effects. *Image Technical Services, Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1207 (9th Cir. 1997)* ("Legal actions, when taken by a monopolist, may give rise to liability, if anticompetitive."); *Greyhound Computer v. IBM, 559 F.2d 488, 498 (9th Cir. 1977)*, *cert. denied, 434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)* (otherwise **[**66]** lawful conduct may be unlawfully exclusionary when practiced by a monopolist); *Bonjorno v. Kaiser Aluminum & Chemical Corp., 752 F.2d 802, 811 (3d Cir. 1984)*, *cert. denied, 477 U.S. 908, 106 S. Ct. 3284, 91 L. Ed. 2d 572 (1986)* ("When a monopolist competes by denying a source of supply to his competitors, raises his competitor's price for raw materials without affecting his own costs, lowers his price for finished goods, and threatens his competitors with sustained competition if they do not accede to his anticompetitive designs, then his actions have crossed the shadowy barrier of the Sherman Act."); *Oahu Gas Service, Inc. v. Pacific Resources, Inc., 838 F.2d 360, 368 (9th Cir. 1988)*, *cert. denied, 488 U.S. 870, 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)* ("Because of a monopolist's special position the antitrust laws impose what may be characterized as affirmative duties.").

Accordingly, the court concludes that Intel has violated its affirmative duties as a monopolist not to misuse its monopoly power and to compete in a manner that does not unreasonably or unfairly harm competition. Moreover, the court has concluded that Intergraph is likely to prevail on its *§ **[**67]** 2* monopolization claims under one or more established theories of antitrust liability discussed below and that the preliminary injunction is due to be granted.

B. Intel's Unlawful Refusal to Deal and Denial of Access to Essential Facilities.

HN10[] A refusal to deal "may be unlawful because a monopolist's control of an essential facility (sometimes called a 'bottleneck') can extend monopoly power from one stage of production to another, and from one market into another." *MCI Communications Co. v. AT&T, 708 F.2d 1081, 1132 (7th Cir. 1983)*, *cert. denied, 464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*. Courts have held that the antitrust laws protect customers and purchasers in cases when a monopolist refuses to deal in order to control a downstream market or to frustrate litigation. *Image Technical Services, 125 F.3d 1195 at 1211* (supplier's refusal to deal with its "customers" in order to control a downstream market); *Bergen Drug Co. v. Parke, Davis & Co., 307 F.2d 725, 726 (3d Cir. 1962)* (preliminary injunction granted where defendant drug company refused to sell its products to "purchasers" on the same terms as they are sold to other purchasers).

HN11[] The antitrust **[**68]** laws impose on firms controlling an essential facility the obligation to make the facility available on non-discriminatory terms. *MCI Communications Co., 708 F.2d at 1132*; *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, *reh'g denied, 411 U.S. 910, 93 S. Ct. 1523, 36 L. Ed. 2d 201 (1973)*; *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)* (access to essential facility must be granted by ski lift owner controlling seventy-five percent of the ski lifts); *Tic-X-Press, Inc. v. Omni Promotions Co. of Ga., 815 F.2d 1407, 1420 (11th Cir. 1987)* (Omni arena was unique facility with substantial economic advantages; lack of viable alternative arenas gave the owner substantial market power).

Intel's advanced CPUs and Intel's ***HN12***[] technical information are "essential" if they **[*1278]** are vital to competitive viability and competitors cannot effectively compete in the relevant market without access to them. *City of Anaheim v. Southern Calif Edison Co., 955 F.2d 1373, 1380 n.5 (9th Cir. 1992)* (a facility is "essential" if it is otherwise unavailable and cannot be "reasonably or practically **[**69]** duplicated"). Intel's Advanced Chips Samples, Early Release Chips and Technical Information need not be indispensable, but their denial must "impose a severe handicap on potential market entrants." *TCA Bldg. Co. v. Northwestern Resources Co., 873 F. Supp. 29, 39 (S.D. Tex. 1995)*.

HN13[] Reasonable and timely access to critical business information that is necessary to compete is an essential facility. *Bellsouth Adver. & Publ'g Corp. v. Donnelley Info. Publ'g, Inc., 719 F. Supp. 1551, 1566 (S.D. Fla. 1988)*, *aff'd*, *933 F.2d 952 (11th Cir. 1991)*. Furthermore, a monopolist's unilateral refusal to deal violates *§ 2* of the Sherman Act where such conduct unreasonably handicaps competitors or harms competition. *Image Technical Services, 125 F.3d at 1209*.

Accordingly, the court concludes that Intel's refusal to supply advanced CPUs and essential technical information to Intergraph likely violates *§ 2* of the Sherman Act, because they are not available from alternative sources and cannot be feasibly duplicated, and because competitors cannot effectively compete in the relevant markets without access to them. Moreover, the court concludes that Intel has no legitimate business **[**70]** reason to refuse to deal with Intergraph. Intergraph has been a loyal and beneficial customer of Intel. The dispute over Intergraph's patent claims could be resolved separately without Intel denying Intergraph the essential CPUs and technical information it needs.

C. Intel's Unlawful Monopoly Leveraging.

The court also finds that Intel has improperly used its monopoly power in microprocessors to extend or leverage its power into the markets for graphic subsystems and workstations in which Intergraph competes. *Eastman Kodak, 504 U.S. at 479 n.29* ("The Court has held many times that ***HN14***[] power gained through some natural and legal advantage such as a patent, copyright, or business acumen can give rise to liability if a seller exploits his dominant position in one market to expand his empire into the next."). Unlawful monopoly leveraging occurs where a firm uses its market power in one market to gain competitive advantage in another market other than by competitive means. *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 276 (2d Cir. 1979)*, *cert. denied, 444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)* (The use of monopoly power attained in one **[**71]** market to gain a competitive advantage in another is a violation of *§ 2*, even if there has not been an attempt to monopolize the second market.").

HN15[] The requirements for liability under a monopoly leveraging claim include: "monopoly power in one market; the use of that power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor in another market; and injury caused by the challenged conduct." *Grand Light & Supply Co. v. Honeywell, Inc., 771 F.2d 672, 681 (2d Cir. 1985)*; *see also* *Kerasotes Mich. Theatres v. National Amusements, Inc., 854 F.2d 135, 136-37 (6th Cir. 1988)*, *reh'g denied,* (1988), *cert. dismissed, 490 U.S. 1087, 109 S. Ct. 2461, 104 L. Ed. 982 (1989)*.

Recently, in *United States v. Microsoft, 980 F. Supp. 537, 1997 U.S. Dist. LEXIS 19496*, the court concluded that a preliminary injunction was proper because of the danger that Microsoft would be able to leverage its existing monopoly in the computer operating systems market over the market for Internet browsers. "The probability that Microsoft will not only continue to reinforce its operating system monopoly by its licensing practices, **[**72]** but might also acquire yet another monopoly in the Internet browser market, is simply too great to tolerate indefinitely. . . . Those practices should be abated until it is conclusively established that they are benign." Microsoft, 980 F. Supp. 537, 544, 1997 U.S. Dist. LEXIS 19496, at *23. This court similarly concludes that Intel is unlawfully using its monopoly in the high-performance CPU relevant market to foreclose or restrain competition by Intergraph in the graphic subsystem relevant market. Intel has already entered **[*1279]** that market and has clearly announced plans to expand in that market while at the same time denying Intergraph access to the CPUs and technical information it needs to compete. This will unnecessarily "handicap" or restrain Intergraph's ability to compete in that market.

D. Intel's Unlawful Coercive Reciprocity.

HN16[] Coercive reciprocity refers to the practice of using economic leverage in one market coercively to secure competitive advantage in another. Betaseed, Inc. v. U and I, Inc., 681 F.2d 1203, 1216 (9th Cir. 1982) ("coercive reciprocity presupposes the existence of economic leverage in one market to gain an unfair advantage in another. . . ."). Courts have held **[**73]** that coercive reciprocity is a *per se* violation of the antitrust laws because of its pernicious effect and economic similarity to illegal tying cases. *See* Id. at 1216-17; Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 425 (5th Cir. 1978), *cert. denied, 444 U.S. 831, 100 S. Ct. 59, 62 L. Ed. 2d 39 (1979)*. According to the Ninth Circuit:

> Because the labels tie-in and coercive reciprocal dealings refer to similar phenomena, coercive reciprocal dealings should be judged according to the standards applied in a *per se* tie-in analysis.... [In] our view, the malevolent economic results of market foreclosure and raising of artificial entry barriers in a market tinged with coercive reciprocity evinces the anticompetitive and predatory nature of the practices.
> ***
> The two labels (tying and reciprocal dealings) refer to similar phenomena. In each case one side of a transaction has special power in the market place. It uses this power to force those with whom it deals to make concessions in another market.... In both cases, the key is the extension of economic power in one market to another market.

681 F.2d at 1216-17, 1221. *See also Spartan Grain* **[**74]** *&* Mill, 581 F.2d at 425. Once a plaintiff has established a prima facie case of a *per se* violation, no specific showing of anticompetitive effect is necessary. Betaseed supra, 681 F.2d at 1228.

Accordingly, the court concludes that Intel's overall course of conduct, including its tying of a continued supply to Intergraph of CPUs and technical information with its demand for Intergraph's relinquishment of its Clipper technology patents without costs to Intel, is a form of coercive reciprocity proscribed under both §§ 1 and 2 of the Sherman Act.

E. Intel's Use of Patented Technology to Restrain Trade.

That Intel owns patent rights to its CPUs does not confer upon it a privilege or immunity to violate the antitrust laws. ***HN17***[] Patent rights do not "confer an absolute immunity from antitrust claims." Image Technical Services, 125 F.3d at 1216 (citing Eastman Kodak, 504 U.S. at 479 n.29, 112 S. Ct. at 2089 n.29). Unlawful "exclusionary conduct can include a monopolist's unilateral refusal to license a [patent or] copyright or to sell a patented or copyrighted work." Image Technical Serv., 125 F.3d at 1218 (citing Data Gen. Corp. v. Grumman ***[**75]*** Sys. Support Corp., 36 F.3d 1147, 1187 (1st Cir. 1994)).

A monopolist cannot use the pretext of protecting intellectual property in order to violate the antitrust laws. Image Technical Serv., 125 F.3d at 1218-1219 ("Neither the aims of intellectual property law nor the antitrust laws justify allowing a monopolist to rely upon a pretextual business justification to mask anticompetitive conduct.")(citing *Eastman Kodak,* 504 U.S. at 484, 112 S. Ct. at 2019).

The Court concludes that Intel has no legitimate intellectual property basis with which it can refuse to supply Intel microprocessors and technical information to Intergraph, especially since Intel has been doing so for the last four years on a mutually beneficial basis.

F. Intel's Retaliatory Enforcement of the NDAs.

HN18[] Contracts used as part of an anticompetitive scheme are unlawful under the antitrust laws. *CVD, Inc. v. Raytheon Co., **[*1280]** 769 F.2d 842, 854-55 (1st Cir. 1985)*, *cert. denied, 475 U.S. 1016, 106 S. Ct. 1198, 89 L. Ed. 2d 312 (1986)* ("the policies expressed in the federal antitrust laws will override any agreement in contravention of those policies, regardless of the agreement's **[**76]** legality under private contract law").

The Court concludes that Intel's retaliatory lawsuits and the threatened and actual termination of its nondisclosure agreements (NDAs) with Intergraph, under which Intel provided technical information to Intergraph, constitute unlawful restraints of trade. *See e.g. United States v. Microsoft Corp.,* 1995-2 Trade Cas. P 71,096, at p. 75,245 (Microsoft enjoined from using NDAs for purpose of restraining competition).

The Court concludes that Intel had no legitimate business justification for the immediate termination of its NDAs with Intergraph, particularly since there is no evidence that Intergraph ever failed to conform to its obligations under any of the NDAs. The Court concludes that Intel's enforcement of the at-will termination provisions through two retaliatory lawsuits and other threatened actions is unreasonably onerous and intended to restrain competition by Intergraph and others.

G. Intel's Agreements are Unlawful Restraints of Trade in Violation of *Section 1* of the Sherman Act.

HN19[] *Section 1* of the Sherman Act ("*§ 1*") provides that "every contract, combination . . ., or conspiracy, in restraint of trade **[**77]** or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. In order to prevail on this claim, Intergraph must prove: (1) an agreement to enter a conspiracy; (2) designed to achieve an unlawful objective; and, (3) actual unlawful effects or facts which radiate a potential for future harm to competition. *Times-Picayune Publ'g Co. v. United States, 345 U.S. 594, 622, 73 S. Ct. 872, 888, 97 L. Ed. 1277 (1953)*; *Bolt v. Halifax Hosp. Med Ctr., 891 F.2d 810, 820 (11th Cir. 1990)*, *cert. denied, 495 U.S. 924, 110 S. Ct. 1960, 109 L. Ed. 2d 322 (1990)*, *appeal after remand, 980 F.2d 1381 (11th Cir. 1993)*; *U.S. Anchor Mfg., 7 F.3d at 1001*. The plaintiff is not required to show that Intel's conspiracy under *§ 1* has a dangerous probability of successfully achieving its objectives. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-68, 104 S. Ct. 2731, 2740, 81 L. Ed. 2d 628 (1984)*; *U.S. Anchor Mfg., 7 F.3d at 1001*.

It is not necessary for Intergraph to provide evidence of actual, present competition to show a violation of *§ 1* so long as it "shows that the potential for competition exists." *Sullivan **[**78]** v. National Football League, 34 F.3d 1091, 1100 (1st Cir. 1994)*, *cert. denied, 513 U.S. 1190, 115 S. Ct. 1252, 131 L. Ed. 2d 133 (1995)*; *Los Angeles Mem'l Coliseum Comm'n v. National Football League, 726 F.2d 1381, 1391-92* (9th Cir.), *cert. denied, 469 U.S. 990, 105 S. Ct. 397, 83 L. Ed. 2d 331 (1984)*. The court is satisfied that Intel is an actual and serious potential competitor of Intergraph in the graphics subsystem market and that Intel controls essential tools that Intergraph needs to compete in that market. It is also obvious to the court that Intergraph will be seriously impaired in that competition without the benefit of a preliminary injunction.

HN20[] Intergraph "need not prove an intent on the part of the co-conspirators to restrain trade or to build a monopoly . . . so long as the purported conspiracy has an anticompetitive effect, the plaintiff has made out a case under *Section 1*." *Bolt, 891 F.2d at 819-20*; *U.S. Anchor Mfg., Inc., 7 F.3d at 1001*. Intergraph has established a *§ 1* violation and antitrust injury by showing it has suffered "a loss of opportunity to compete" resulting from Intel's discontinuing Intergraph's supply of essential CPUs and technical **[**79]** information while conspiring with Intergraph's competitors to take away Intergraph's customers. *DeLong Equip. Co. v. Washington Mills Electro Minerals Corp., 990 F.2d 1186, 1198-99 (11th Cir. 1993)*, *cert. denied, 510 U.S. 1012, 114 S. Ct. 604, 126 L. Ed. 2d 569 (1993)* (terminated distributor had valid *§ 1* claim against favored distributors and supplier which cut off plaintiff from supply of vital product needed to compete).

The Court concludes there is a substantial likelihood that Intergraph will succeed in **[*1281]** proving that Intel has entered into one or more agreements and contracts in restraint of trade in violation of *§ 1*.

H. Necessity of Preliminary Relief to Prevent Threatened Anti-Trust Harm.

HN21[] *Section 16* of the Clayton Act ("*§ 16*") specifically provides for preliminary injunctive relief for threatened ***antitrust law*** violations, as follows: "Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws. . . ." *15 U.S.C. § 26*; *see also* *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* **[**80]** (*Section 16* "requires a showing only of 'threatened' loss or damage"). The legislative history of *§ 16* clearly shows a strong Congressional policy supporting preliminary injunction because an antitrust plaintiff "does not have to wait to be ruined in his business before he has his remedy." *Id. at 112 n.8*.

HN22[] Courts have granted preliminary injunctions when there is a serious antitrust issue, serious harm to an antitrust plaintiff and little or no harm to defendant. *Bergen Drug Co. v. Parke, Davis & Co., 307 F.2d 725 (3d Cir. 1962)*; *Stenberg v. Cheker Oil Co., 573 F.2d 921 (6th Cir. 1978)*; *Foremost Int'l Tours, Inc. v. Qantas Airways, Ltd., 379 F. Supp. 88, 97 (D. Haw. 1974)*, *aff'd*, *525 F.2d 281 (9th Cir. 1975)*, *cert. denied, 429 U.S. 816, 97 S. Ct. 57, 50 L. Ed. 2d 75 (1976)*; *Gilder v. PGA Tour, Inc., 936 F.2d 417, 422-24 (9th Cir. 1991)* (preliminary injunction upheld prohibiting enforcement of rule banning type of golf club).

HN23[] Courts often grant mandatory injunctions when necessary to remedy an antitrust violation. *Bergen Drug Co., 307 F.2d at 726* (preliminary antitrust injunction granted based on rule of equity that a court may "by **[**81]** mandatory injunction compel a restoration of the status quo" pending final resolution of the case). "District courts are invested with large discretion to model their judgments to fit the exigencies of the particular case." *United States v. Glaxo Group Ltd., 410 U.S. 52, 64, 93 S. Ct. 861, 35 L. Ed. 2d 104 (1973)* (stating that mandatory selling on specified terms or compulsory licensing of intellectual property are appropriate antitrust remedies); *Image Technical Serv., 125 F.3d 1195* (upholding a permanent injunction compelling Kodak to sell its spare parts and related equipment to plaintiffs for all existing copiers and all new model copiers Kodak introduced during the 10-year term of the injunction).

I. Public Interest in the Anti-Trust Laws.

The Court concludes that Intergraph has antitrust standing to assert its antitrust claims against Intel as a former microprocessor competitor (the "Clipper technology") of Intel, as a current competitor of Intel in the graphics subsystem market, as a potential competitor in related markets utilizing CPUs, and as a long-standing customer/competitor of Intel, dependent on Intel as the sole source provider of high **[**82]** performance CPUs and related technical information necessary for Intergraph to compete. The Court is aware, and takes judicial notice, of the current Federal Trade Commission investigation of Intel involving claims of similar conduct toward others by Intel (such as withholding technical information). The Court is also aware of the pending government antitrust case against Microsoft involving claims of monopoly leveraging similar to those made against Intel in this case.

The court is also aware of the important public interest and policies in enforcement of the antitrust laws. Given the clear monopoly power of Intel in the market for high performance CPUs and in the market for its own CPUs, and given the evidence of joint action by Intel with some of Intergraph's competitors to persuade Intergraph's customers to boycott Intergraph, the Court concludes that Intergraph has established a likelihood of success in proving antitrust violations of *Sections 1* and *2* of the Sherman Act.

In light of the strong purposes behind the antitrust laws, to prevent threatened harm to competition and to protect potential and actual competition, the court concludes that a preliminary injunction **[**83]** is necessary and appropriate to restore the status quo so that **[*1282]** Intergraph will not be driven out of business or severely impaired pending trial.

J. Specific Performance of Intel's Commitments.

During the course of their business relationship, Intergraph facilitated Intel's entry into the workstation market, respected the confidentiality of Intel's information and participated in all major programs upon which reasonable conditions were imposed by Intel. Until this dispute over the use of Intergraph's intellectual property rights arose, Intel never canceled an NDA or RUNDA with Intergraph. Even when friction between the companies emerged in early 1997 over unrelated patent issues, Intel made a number of commitments to Intergraph in its March 28, 1997, letter to Intergraph. In this letter, Mr. Johnson's specific references to the Deschutes and Merced programs, as well as "future programs" for which there was a known time frame, convince the court that this is a promise of determinable duration, one that is not terminable at will.

In *UFE Inc. v. Methode Electronics, Inc., 808 F. Supp. 1407 (D. Minn. 1992)*, the Court affirmed the finding by a jury that an **[**84]** agreement, which was silent as to its duration, was for a five year minimum term. The parties' discussion of a five year term, and references to that same time period in both parties' internal documents, were cited in support of this conclusion. *See also Panhandle Agri-Service, Inc. v. Becker, 231 Kan. 291, 644 P.2d 413 (Kan. 1982)* (reference to specific quantity of material to be supplied gave the contract a duration: the time necessary for that quantity in fact to be supplied). Here, the writing between Intel and Intergraph, in the form of a letter from Mr. Johnson, contains sufficient evidence of a determinable duration to their agreement.

The letter also contemplates a reciprocal obligation or consideration on the part of Intergraph: its "continued support" (as well as payment for Intel Products). Accordingly, this court finds that there is a substantial likelihood that Intergraph will establish on the merits that the letter and surrounding circumstances constitutes an enforceable agreement of definite duration. [45] For purposes of this Opinion, then, the March 28, 1997 letter is hereinafter referred to as "the Letter Agreement."

[85]** Intel contends that the Letter Agreement, or any agreement between the parties, "incorporates by reference" all terms in the NDAs and RUNDAs. One of those provisions is the unilateral right to terminate an NDA or a RUNDA at will (i.e., the "Termination Clause"). But, if the Termination Clause is incorporated by reference, then the promises in the Letter Agreement, which Intel contends are "aspirational," are actually illusory. It is axiomatic that courts will not interpret agreements so that they become meaningless. An incorporation by reference theory that renders a contract meaningless simply cannot overcome Intel's specific commitments to Intergraph.

An NDA typically is very limited in duration and scope; this fact further undercuts Intel's claim that its terms are incorporated into broad commitments such as those set forth in the Letter Agreement.

The court, accordingly, finds there is a substantial likelihood that Intergraph will establish on the merits that the Letter Agreement and surrounding circumstances form the basis for an agreement between the parties without the right on the part of either party to unilaterally and arbitrarily terminate the agreement. **[**86]** Moreover, the court finds there is a substantial likelihood that Intergraph will be able to establish on the **[*1283]** merits that the agreement was of a sufficiently definite duration: at a minimum through the time period in which Intel develops the Deschutes and Merced programs, and perhaps longer.

---

[45] Notwithstanding the presence of open terms, the promises in the Letter Agreement are sufficiently definite to be enforceable. *Thermal Sys. Of Ala. v. Sigafoose, 533 So. 2d 567, 571 (Ala. 1988); H.C. Schmieding Prod Co. v. Cagle, 529 So. 2d 243, 248 (Ala. 1988).* In cases such as this, the UCC's "gap-filler" provisions supply the open terms. See *Ala. Code §§ 7-2-305 to 310*.

Intel has submitted a single NDA containing a California choice of law provision. However, the Letter Agreement originated in Huntsville, Alabama. Accordingly, Alabama law applies to the interpretation of this Agreement. In any event, California has adopted verbatim the same provisions of the Alabama Uniform Commercial Code discussed herein. Moreover, California commercial law is more favorable to Intergraph, as, unlike Alabama, it allows the UCC's obligation of "good faith and fair dealing" (Section 1-203) to stand alone as a cause of action.

Because this is HN24[] a commercial case involving the sale of "goods," the Uniform Commercial Code ("UCC") authorizes the court to specifically enforce an agreement where the "goods are unique or in other proper circumstances." *Ala. Code § 7-2-716(1)*. "Output and requirements contracts involving a particular or peculiarly available source or market present today the typical commercial specific performance situation. . . ." *Id.* at Official Comment, Note 2.

The Court finds several cases to be of particular importance. The first such case is *Kaiser Trading Co. v. Associated Metals & Minerals Corp., 321 F. Supp. 923, 925 (N.D. Cal. 1970)*, *appeal dismissed, 443 F.2d 1364 (9th Cir. 1971)*, involving an aluminum manufacturer that sought a preliminary injunction to enforce a supply agreement. The agreement in *Kaiser Trading* was for the supply of cryolite, a unique, scarce and indispensable **[**87]** chemical compound used in the production of aluminum. *321 F. Supp. at 925*. The only natural source of cryolite had been effectively exhausted, requiring aluminum manufacturers to rely on a synthetically produced substitute. There was no question but that synthetic cryolite was available on the open market; however, the court found it was not available in the quantity, or in the time-frame needed, by the manufacturer. *Id. at 933*. Accordingly, the court granted the preliminary injunction, requiring the supplier to specifically perform its obligations. *Id. at 932, 937*.

Equally persuasive is *Ross-Simons of Warwick Inc. v. Baccarat, Inc., 102 F.3d 12 (1st Cir. 1996)*, even though that decision avoided strict UCC analysis. In *Ross-Simons,* the First Circuit affirmed the trial court's mandatory injunction requiring a manufacturer of crystal to specifically perform its obligation to supply its product to a jewelry and gift retailer. Even though the crystal constituted less than one percent (1 percent) of the retailer's sales, the court relied upon its "uniqueness." *Id. at 19*. It observed, in this regard, that "several courts have recognized that HN25[] the loss of a prestigious **[**88]** brand of product line may create a threat of irreparable injury if it is likely that customers (or prospective customers) will turn to competitors who do not labor under the same handicap." *Id.* at 10 (citations omitted). *See also Eastern Air Lines, Inc. v. Gulf Oil Corp., 415 F. Supp. 429, 433 (S.D. Fla. 1975)* (under certain "circumstances, a decree of specific performance becomes the ordinary and natural relief rather than the extraordinary one.").

Intel Products are "unique." The evidence establishes there is no alternative source for these items. If specific performance can apply to an agreement to supply a particular type of crystal to a jewelry and gift retailer, as it did in *Ross-Simon,* it certainly can apply to the supply of products for which there exists no present replacement. This is particularly so given the "Intel Inside" marketing program and the prestige associated with Intel Products. Furthermore, as demonstrated in *Kaiser Trading,* specific performance is also appropriate where an alternative distribution system for the unique product cannot assure it will be received in the time, or in the quantities, necessary to maintain the status quo.

Accordingly, **[**89]** the court finds that there is a substantial likelihood that Intergraph will be able to establish on the merits that it is entitled to specific performance of the Letter Agreement, including Intel's support of Intergraph as a "strategic customer" at least through 1999, when the Merced program is publicly launched, and perhaps through the year 2000.

K. Relief from the Unconscionable Nature of NDAs.

Intel contends the Termination Clause applies--because, either the March 28, 1997, letter is not an enforceable agreement, leaving the NDAs or RUNDAs to control, or because the termination clauses of the NDAs and RUNDAs are incorporated by reference into the letter agreement. Even if Intel is correct, the court concludes, in the alternative, that the deliberate termination of the parties' relationship by Intel, under the **[*1284]** terms of the NDAs and RUNDAs, is unconscionable for two independent reasons. First, the circumstances in existence at the time the NDAs and RUNDAs were executed between the parties reveal that the respective Termination Clauses are unconscionable at the outset. Second, the evidence demonstrates that operation of the respective Termination Clauses in the **[**90]** way now advocated by Intel would create an unconscionable situation with regard to Intergraph.

1. The NDA's Were Unconscionable At The Time They Were Made.

HN26[] Applicable provisions of both the Alabama and California versions of the UCC provide:

> (1) If the court as a matter of law finds the contract or any clause of the contract to have been unconscionable at the time it was made the court may refuse to enforce the contract, or it may enforce the remainder of the contract without the unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.
>
> (2) When it is claimed or appears to the court that the contract or any clause thereof may be unconscionable, the parties shall be afforded a reasonable opportunity to present evidence as to its commercial setting, purpose and effect to aid the court in making the determination.

Ala. Code § 7-2-302 (1975); *Cal. Civil Code § 1670.5*. ***HN27***[] While unconscionability is not defined by the code or the comments, the commentary to *Section 7-2-302* describes the basic test as "whether, in light of the general commercial background and the *commercial needs* **[**91]** *of the particular trade or the case,* the clauses involved are so one-sided as to be unconscionable under the circumstances existing at the time of the making of the contract." *Ala. Code § 7-2-302* (Official Comment 1) (emphasis added).

HN28[] The determination of unconscionability is a question of law, to be determined by the court with each case decided on its own facts. *E & W Bldg. Material v. American Sav. & Loan Ass'n of Brazoria County, Tex., 648 F. Supp. 289, 290 (M.D. Ala. 1986)*. Alabama courts have identified four factors to be considered in determining whether a contract is unconscionable: (1) whether there was an absence of meaningful choice on one party's part, (2) whether the contractual terms unreasonably favor one party, (3) whether there was unequal bargaining power among the parties, and (4) whether there were oppressive, one-sided, or patently unfair terms in the contract. *See e.g. Lloyd v. Service Corp. of Ala., Inc., 453 So. 2d 735, 739 (Ala. 1984)*. While unconscionability cases most often arise in the consumer context, the principle applies with equal force in the commercial field.

In *Allen v. Michigan Bell Telephone Co., 18 Mich. App. 632, **[**92]** 171 N.W.2d 689 (Mich. Ct. App. 1969)*, the plaintiff sued Michigan Bell for its failure to include plaintiff's advertisements in the "yellow pages" directory. Michigan Bell raised as an affirmative defense a contract term relieving it from liability for the failure to include items of advertising in its directory. *171 N.W.2d at 690*. Finding this term unconscionable, the court explained:

> Implicit in the freedom of contract is the concept that at the time of the contracting each party has a realistic alternative to acceptance of the terms offered. *Where goods and services can only be obtained from one source (or several sources on non-competitive terms) the choices of one who desires to purchase are limited to acceptance of the terms offered or doing without.* Depending on the nature of the goods or services and the purchaser's needs doing without may or may not be a realistic alternative. Where it is not, one who successfully exacts agreement to an unreasonable term cannot insist on the courts enforcing it on the ground that it was "freely" entered into, when it was not.

Id. at 692 (emphasis added).

The Alabama Supreme Court, in *Morgan v. South Central Bell* ***[**93]*** *Telephone Co., 466 So. 2d 107 (Ala. 1985)*, also found invalid an exculpatory clause that sought to limit a telephone company's liability when it failed to publish a professional association's advertisement. While the *Morgan* court focused on the company's status as a regulated utility (though its "yellow pages" business was not regulated), it nevertheless focused on the fundamental commercial purpose behind the **[*1285]** unconscionability doctrine, stating, "We are satisfied that the plaintiffs did not have a meaningful choice . . . and that the defendants had the bargaining power in a gross and unbalanced manner in determining the terms and conditions [of the contract]." *Id. at 118*.

What the evidence demonstrates in the instant case, regarding the circumstances under which Intel and Intergraph entered into NDAs and RUNDAs, is that: (1) after Intergraph shifted its design and production efforts away from the

Clipper/UNIX based systems it had been producing and entered into a relationship with Intel, the defendant began to condition the delivery of Intel Products and information to Intergraph upon the execution of NDAs and RUNDAs, which contained a unilateral and unconditional **[**94]** termination provision; (2) as Intel and Intergraph enjoyed a mutually beneficial and productive relationship, there was no special commercial need in the computer industry for automatic termination of ongoing agreements; (3) while the termination provision was available to both parties, Intergraph had no suitable alternatives and, in a practical sense, had no real option to exercise its right to terminate; (4) Intel was the sole source of Information and Chips necessary for Intergraph to stay in business; (5) Intel had a greatly disproportionate bargaining power that enabled it to impose terms and conditions in the NDAs and RUNDAs that benefitted it, to the detriment of Intergraph; and (6) Intel, using its disproportionate bargaining power, imposed terms and conditions unfavorable to Intergraph in the NDAs and RUNDAs, making them non-negotiable.

Accordingly, the court finds it likely that Intergraph will be able to establish on the merits of its claims that the Termination Clause in each respective NDA and RUNDA was unconscionable at the time it was made and would not be enforceable even if it applied.

2. Termination of the NDAs Would Be Unconscionable.

Furthermore, **[**95]** the court finds that, even if the Termination Clauses are applicable and were not unconscionable at the time they were made, it would be unconscionable to permit Intel to enforce them against Intergraph today. ***HN29***[] The UCC deals with the subject of unconscionability in a context similar to the present circumstances, namely when one party to a commercial agreement seeks to exercise its claimed rights under an automatic termination clause, and where no advance notice to the other party is required under the clause. *Section 2-309(3)*, which focuses on contract termination, provides: ". . . an agreement dispensing with notification [of termination] is invalid if its *operation* would be unconscionable". *Ala. Code § 7-2-309(3)*; *Cal. Comm. Code § 2309* (emphasis added). The commentary to this provision directs attention to the "results" of exercising such power: "An agreement dispensing with notification or limiting the time for the seeking of a substitute arrangement is, of course, valid under this subsection unless the results of putting it into operation would be the creation of an *unconscionable state of affairs." Id.* (Official Comment, Note 8) (emphasis added).

In **[**96]** *Shell Oil Co. v. Marinello, 63 N.J. 402, 307 A.2d 598, 602 (N.J. 1973)*, *cert. denied, 415 U.S. 920, 94 S. Ct. 1421, 39 L. Ed. 2d 475 (1974)*, the court voided a clause giving an oil company the right to terminate a dealership agreement on 10 days' notice, even though the dealer knew and understood the terms of his lease at the time it was signed. Notwithstanding the dealer's sophistication, the court found the termination clause grossly unfair because, if the oil company terminated the contract, it could always get another dealer. The dealer, in contrast, had everything to lose, since, even if he could move to another location, the going business and trade he built would remain with the old location.

It is apparent that the drafters of *Section 2-309(3) of the UCC* focused upon the circumstances created by the threatened or actual use of the termination clause and not upon the circumstances under which the agreement was made. "The conclusion seems inescapable that ***HN30***[] the Code intends the focus of an unconscionability determination under 2-309 be on the result of its application as seen at the time of termination. " White & Summers, Uniform Commercial **[*1286]** Code, 4th Ed., Vol. 1, p. **[**97]** 139-140; *see also* Hillman, McDonnel & Nickles, Common Law & Equity Under the UCC, p. 3-42 (1985) ("the court must focus on its effect at the time of contract breakdown"). It follows that the focus in this case must be on the circumstances present at the time of "contract breakdown," which was in or about August of 1997. That was when Intel first terminated the NDAs and RUNDAs, and when Intel denied Intergraph critical information or equipment necessary to debug Chips previously supplied by Intel. Significantly, at no time has Intergraph been in breach of any NDA or RUNDA, which makes the abrupt termination even less justified.

With respect to the "results" that Intel's exercise of the Termination Clause would have on the "state of affairs" between the parties, the Court finds: (1) Intel presently maintains 100 percent of the market for microprocessors and related products in the high speed workstation market in which Intergraph specializes; (2) Intergraph has taken reasonable steps to investigate alternatives to Intel Products; (3) presently, Intergraph has no viable alternative to

Intel Products; (4) Intel concedes there will be no alternative in the immediate future; and **[**98]** (5) if it does not receive Intel Products on a timely basis and in sufficient quantities, then Intergraph very quickly will fall behind its competitors, and Intel, rather than the marketplace, will determine whether or not Intergraph will stay in business.

Furthermore, the court also concludes that there is a substantial likelihood that Intergraph will establish on the merits that Intel's present attempt to invoke the Termination Clause, or otherwise delay Intergraph's involvement with future Intel Products, will create an unconscionable state of affairs. The Termination Clause therefore is unenforceable even if it applies.

3. Intergraph is Entitled to "Reasonable Notification" of Termination.

Under the Court's earlier finding, the Letter Agreement is specifically enforceable. If it is not, or if it is a contract of indefinite duration, then an unconscionable result must yet be avoided. ***HN31***[] *Section 2-309(2) of the UCC* imposes an obligation to give "reasonable notification" of termination. This commercially imposed standard embraces both policy and economic rationales. While it is a fluid standard--what is reasonable turns upon the particular circumstances of **[**99]** the situation--its purpose is unwavering: a supplier may not abandon its purchaser until that purchaser has made suitable, alternative arrangements, which are least disruptive to its business.

HN32[] The commentary to *Section 2-309* amplifies the policy and economic rationales behind the "reasonable notification" requirement:

> Subsection (3) recognizes that the application *of principles of good faith and sound commercial practice normally call for such notification* of the termination of a going contract relationship *as will give the other party reasonable time to seek a substitute arrangement.*

Ala. Code § 7-2-309; *Cal. Comm. Code § 2309* (Official Comment 8) (emphasis added).

HN33[] The question of "reasonable notification" is typically one for the trier of fact. However, little or no notice is unreasonable as a matter of law. In *Jo-Ann, Inc. v. Alfin Fragrances, Inc., 731 F. Supp. 149, 160 (D.N.J. 1989)*, the court determined that no notice was unreasonable as a matter of law. Instead, the court in *Jo-Ann* observed, with respect to distribution agreements, that the notice must allow the buyer reasonable time to find other arrangements. *Id. at **[**100]** 160*. In *Pharo Distributing Co. v. Stahl, 782 S.W.2d 635*, 11 U.C.C.R. Serv. 2d(Callaghan) 814, 817 (Ky. App. 1990), the court held that six days notice left no "inference" other than that is was unreasonable. There, the court commented that reasonable notice is that time period that, under the circumstances of the particular case, would allow a party to make alternate arrangements upon termination of the contract and would allow a party to minimize losses. 11 U.C.C.R. Serv. 2d(Callaghan) at 816.

One court has held that one-year advance notice of termination was not, as a matter of law, sufficient. *Hamilton Tailoring Co. v. **[*1287]** Delta Air Lines, Inc., 14 U.C.C. Rep. Serv. 1310, 1316, 1974 WL 21756 (S.D. Ohio 1974)*. Even cases finding a certain amount of advance notice to be "reasonable" illustrate the policy and economic factors at work. In *Monarch Beverage Co. v. Tyfield Importers, Inc., 823 F.2d 1187, 1190-91 (7th Cir. 1987)*, a wholesaler of wine products sued its supplier, the exclusive importer of a brand of sparkling wine, on an oral distribution agreement. The Seventh Circuit ruled that a district court's determination, finding that thirty days' notice of termination was reasonable, was not clearly **[**101]** erroneous after considering the nature, purpose, and circumstances of the action. *Id. at 1189*. In affirming the district court's conclusion, the Seventh Circuit was influenced by the following factors:

1. Advance notice of 30 days provided the wholesaler with sufficient time to find a substitute product.
2. The wholesaler also distributed a competitor's brand of sparkling wine, so the wholesaler could easily use that brand as a substitute.

3. The sales of the product at issue constituted only one percent or less of the wholesaler's total sales.

Id. at 1190. *See also* Teitelbaum v. Hallmark Cards, Inc., 25 Mass. App. Ct. 555, 520 N.E.2d 1333 (Mass. App. Ct. 1988) ("the adequacy of the notice is generally coextensive with the amount of harm that can be proved by the party who has incurred the loss of a supplier."); Aaron E. Levine & Co. v. Calkraft Paper Co., 429 F. Supp. 1039 (E.D. Mich. 1976) (ten months' advance notice was reasonable; supplier gave dealer the names of competing suppliers and dealer did, in fact, find a substitute).

In this instance, Intel has sought to abuse its dominant market position in the workstation microprocessor **[**102]** industry by terminating, without notice, its supply relationship with Intergraph. Such conduct is not permitted by the Uniform Commercial Code and the circumstances of this case.

Accordingly, the Court alternatively concludes that a substantial likelihood exists that Intergraph will establish on the merits that Intel failed to give "reasonable notification" of its intent to terminate the parties' agreements. The Court further finds that, under these circumstances, reasonable notification would take effect at the conclusion of the Deschutes and Merced Programs continuing through 1999.

VI. The Propriety of Injunctive Relief Against Intel.

A. The Court's Inherent Power to Order Injunctive Relief.

HN34[] The court is possessed with inherent and broad equitable powers to fashion an appropriate remedy to deal with the particular wrong in each case. *See* Williams v. City of Dothan, Ala., 818 F.2d 755, 760 (11th Cir. 1987), *opinion modified and reh'g denied, 828 F.2d 13 (1987)* (finding mandatory injunction issued by district court valid in later proceeding to enforce injunction). Accordingly, the power resides in this court to "do equity and to mould each **[**103]** decree to the necessities of the particular case." Hecht Co. v. Bowles, 321 U.S. 321, 329, 64 S. Ct. 587, 592, 88 L. Ed. 754 (1944) (equity jurisdiction distinguished by flexibility rather than rigidity); *see also* FTC v. U.S. Oil & Gas Corp., 748 F.2d 1431, 1434 (11th Cir. 1984) (affirming trial court's power to issue a preliminary injunction and order a freeze of assets during pendency of action for permanent injunctive relief).

The Court also has the power to grant preliminary injunctive relief where a party's conduct is calculated to frustrate litigation. Bergen Drug Co. v. Parke, Davis & Co., 307 F.2d 725 (3d Cir. 1962) ("True enough, the defendant can choose customers, but it should not be permitted to do so in order to stifle the main action, especially where it is apparent that such conduct will further the monopoly which plaintiff alleges defendant is attempting to bring about and which, if proved, would entitle plaintiff to permanent relief.").

In the present case, Intel has engaged in a number of acts that justify the exercise of this Court's inherent equitable power For example, on March 28, 1997, Intel delivered to Intergraph a letter containing a **[**104]** significant number of commitments. **[*1288]** While the Court believes this communication rises to the level of a contract, it at least evidences conduct that easily could support Intergraph's claim of fraud. At a time when patent disputes between the parties already had surfaced, Intel wrote in friendly terms about the parties' relationship and declared its "intent of supporting Intergraph as a strategic customer in current and *future* programs." Intel did not in any way link these promises to a resolution of the separate dispute involving Intergraph's patent rights, much less the surrender of those rights. At the very least, Intel's assurances, contained in the letter of March 28, 1997, could have lulled Intergraph into believing that its relationship with Intel was secure and that there was then no need to investigate and seek out alternatives to Intel's products.

HN35[] The preliminary injunction to be fashioned by the court is designed solely to preserve the status quo, to prevent the irreparable harm that threatens Intergraph and to achieve the appropriate equitable balance of "what is necessary, what is fair, and what is workable." *Lemon v. Kurtzman, 411 U.S. 192, 200-01*. *93 S. Ct. 1463, 1469, **[**105]** 36 L. Ed. 2d 151 (1973)*.

B. Standard for Granting Injunctive Relief.

Intergraph has adequately established a need for mandatory injunctive relief at this stage of the proceedings. The court is of the opinion that Intergraph has ***HN36***[] established (1) a substantial likelihood of success on the merits of one or more of its claims, (2) the imminent threat of irreparable injury in the absence of injunctive relief, (3) that the threatened harm to Intergraph outweighs any potential harm to Intel that would be caused by an injunction, and (4) that the grant of an injunction will not disserve the public interest. *Johnson v. U.S. Dept. of Agriculture, 734 F.2d 774, 781 (11th Cir. 1984)*.

In making these determinations, the court specifically finds that the issuance of preliminary injunctive relief is necessary "to preserve [this court's] ability to render a meaningful decision on the merits." *United States v. State of Ala., 791 F.2d 1450, 1459 (11th Cir. 1986)*, *reh'g denied*, *796 F.2d 1478 (1986)*, *cert. denied sub. nom., Board of Trustees of Ala. State Univ. v. Alabama State Bd. of Educ., 479 U.S. 1085, 107 S. Ct. 1287, 94 L. Ed. 2d 144 (1987)*. **[**106]** For instance, the court believes that the potential for the loss of thousands of jobs at Intergraph by the time this case is ready for trial would be an untenable result that could not be remedied by an award of money damages to Intergraph.

C. Substantial Likelihood of Success on the Merits.

Intergraph has established a substantial likelihood of success on the merits on one or more of its claims. *Johnson, 734 F.2d at 789* ("it is sufficient to note that plaintiffs will likely prevail at least in part"). While Intel has raised questions about Intergraph's ability to ultimately prove several elements of its causes of action, the court's role at this juncture is not to make final determinations on the merits. *See University of Texas v. Camenisch, 451 U.S. 390, 394, 101 S. Ct. 1830, 1833, 68 L. Ed. 2d 175 (1981)*; *Johnson, 734 F.2d at 781-82* (findings at preliminary injunction hearing have "no conclusive bearing at the trial on the merits"); *Meis v. Sanitas Serv. Corp., 511 F.2d 655, 656 (5th Cir. 1975)* (plaintiff's allegations of misrepresentations, not conclusively controverted in the record on preliminary injunction, are sufficient to sustain temporary **[**107]** injunction). Instead, the Court must determine whether the evidence presented demonstrates a substantial likelihood that Intergraph will prevail on one or more of its claims on the merits.

Intergraph has sufficiently demonstrated that it is substantially likely to establish on the merits one or more of its claims that support the grant of injunctive relief. While not necessary to the Court's conclusions, this is particularly so in light of the severity of the injury that Intergraph faces in the absence of injunctive relief. [46] *Cf. Canal Authority* **[*1289]** *of State of Fla. v. Callaway, 489 F.2d 567, 576 (5th Cir. 1974)* (severity of hardship may lessen the showing needed on the merits); *Gartrell v. Knight, 546 F. Supp. 449, 455 (N.D. Ala. 1982)*; *Clark Const. Co. v. Pena, 895 F. Supp. 1483, 1489 (M.D. Ala. 1995)*.

[108]**

D. Threat Of Irreparable Harm.

Intergraph has carried its burden of showing the threat of irreparable harm. While Intel would ask the court to await a more complete record that establishes actual harm to Intergraph, this request ignores the fact that injunctive relief is only meaningful if used to counter the threat of such harm. To wait for actual irreparable harm to occur would render this relief futile, or at the very least, incomplete. Moreover, particularly in the context of the heavy media

[46] It is important to note that on a preliminary injunction determination, the quality of evidence is not restricted to what would be admissible at trial At this stage, Intel has had an opportunity to rebut, but has failed to rebut, the key evidentiary assertions made by Intergraph, and therefore, the court finds the quality of evidence submitted by Intergraph to be sufficient to support the findings herein.

scrutiny attendant in this case, Intergraph has established that Intel's refusal to deal likely will have an immediate impact on Intergraph's good will and reputation with its customers. ***HN37***[] Loss of good will and harmed reputation are types of injuries that are sufficient to establish the need for injunctive relief. *Ross-Simons, 102 F.3d at 19-20* ("By its very nature, injury to good will and reputation is not easily measured or fully compensable in damages"); *see also* *American Hosp. Supply v. Hospital Prods., Ltd., 780 F.2d 589, 595 (7th Cir. 1985)* (finding that good will is a common factor showing irreparable harm); *Computer Assocs. Int'l Inc. v. State Street Bank* ***[**109]*** *and Trust Co., 789 F. Supp. 470, 471-72 (D. Mass. 1992)* (finding of irreparable harm to Bank's business and reputation because lack of maintenance support threatened "functionality" of computer program, or alternatively, raised questions about the program's continued "availability" to the Bank and its customers).

The Court is convinced that Intel's current course of action in cutting off the supply of Chips, Information and Support to Intergraph, if not certain to force Intergraph out of business, would almost certainly create losses impossible to calculate in terms of monetary value. *Ferrero v. Associated Materials Inc., 923 F.2d 1441, 1449 (11th Cir. 1991)*.

In *Ross-Simons,* the First Circuit Court of Appeals affirmed the grant of an injunction to maintain the status quo, i.e., to require Baccarat, Inc., a supplier of fine crystal, to continue to supply Ross-Simons, a distributor, with crystal in the manner which it had previously agreed upon before the interruption. *102 F.3d 12*. With only the substantial likelihood of prevailing and the irreparable harm factors at issue, the appellate court found that the plaintiff had carried its burden of showing the elements **[**110]** entitling it to an injunction. In particular, the court found that, because of the "unique top-shelf" nature of the product at issue, plaintiff's "inability to supply products as advertised would wreak substantial (but immeasurable) damage to the good will that [the plaintiff] painstakingly had created over the years." *Id. at 19*. Further, "the lost sales . . . alienation of future [bridal] registrants, and harm to its reputation, would defy accurate quantification." *Id.*

Intergraph has adequately demonstrated to the court that, at the very least, it will suffer a loss of good will and harm to its reputation--in other words, irreparable harm--in the absence of injunctive relief.

E. Balancing the Harms.

The court is persuaded that the harm to Intergraph, in the absence of injunctive relief, would outweigh any harm that Intel will potentially suffer if the court grants the relief. Intel's counsel has argued that Intel would be harmed by a mandatory injunction because it would not be allowed to fully control its intellectual property, but that is the sort of harm to any party that is subject to injunctive relief. The question is whether that loss of **[**111]** control causes it any harm and, if so, whether that harm outweighs the threatened harm to the movant.

Intel has failed to show that providing its intellectual property and products to Intergraph causes it any significant harm. The lack of control of this intellectual property **[*1290]** would only be as to Intergraph. There is no record of Intergraph providing Intel's confidential information to others or otherwise using such information in a way that harms Intel. Further, the relief proposed by Intergraph includes its obligation to maintain the confidentiality of information disclosed pursuant to the NDAs, the RUNDAs or the injunction. The court finds that, at most, Intel's partial loss of control of its intellectual property will cause a *de minimus* harm, which in no way outweighs the substantial threatened harm shown by Intergraph. As noted earlier, Intel will be required to do now only what it did willingly until the parties were unable to resolve a completely unrelated matter, the use of Intergraph's patent rights.

F. The Public Interest.

Finally, the court finds that granting the mandatory injunction will not disserve the public interest. On the contract, injunctive **[**112]** relief at this stage of this proceeding is more likely to serve the public interest than to disserve that interest. Intel currently is the subject of a Federal Trade Commission investigation that appears to target similar alleged conduct by Intel in using its control of the microprocessor market in a coercive manner. The only effect on the market that this court can foresee, as a result of its mandatory injunction, would be to enhance competition, not to harm competition. In addition, granting the injunction is likely to preserve the jobs of Intergraph employees that otherwise are at risk because of the demonstrated threat to the continued viability of Intergraph during the pendency of this action.

In conclusion, the court's burden in weighing the standards for injunctive relief is not to make binding determinations of fact about the ultimate merits of this case. Instead, the court is to judge the likelihood of success, along with the threatened harm to Intergraph, as balanced against any harm to Intel that an injunction would cause. In doing so, the court should not take action which would disserve the public interest. In light of these factors, the court finds that it is appropriate **[**113]** for an injunction to issue in order to protect its ability to render a meaningful decision on the merits of this action.

G. Administrative Burdens Associated with Administering Injunctive Relief.

Intel suggests that injunctive relief of the sort requested by Intergraph will impose undue administrative burdens on the court. The court is satisfied that burdens will fall to it regardless of whether the requested relief is granted or denied. The parties have made it clear that the court should anticipate a hard-fought, paper-intensive litigation process. Since Intergraph refused to relinquish its patent rights to Intel:

a. Intel mailed a letter to Intergraph on August 13, 1997, which terminated all NDAs, demanded the immediate return of confidential information, and cut off the supply of Chips after December 31, 1997. It thereafter withdrew this termination.

b. Within hours of the time this lawsuit was filed on November 17, 1997, Intel again canceled all NDAs, demanded the immediate return of confidential information, and cut off the supply of Chips after December 31, 1997, even though it already had committed to supply Chips through March 31, 1998. After **[**114]** this conduct was called to the attention of this Court, Intel agreed to supply chips through March 31, 1998.

c. One day after suit was filed, Intel imposed a three day deadline for Intergraph to submit a request for the allocation of Chips for the Second Quarter of 1998. There is no evidence the letter was received by Intergraph until December 1, 1997. In any event, the deadline of November 21, 1997, was several weeks earlier than that previously imposed by Intel. Intel thereafter agreed to permit Intergraph to submit an allocation on December 9, 1997.

d. Within a week of suit being filed, Intel informed Intergraph that it was reneging on its earlier promise to supply 25 sets of Advance Chip Samples for the Deschutes program by the middle of December 1997.

e. Within 10 days of Intergraph's suit, Intel filed two separate lawsuits in the **[*1291]** federal courts in California that clearly have a substantial overlap with the claims made in the instant case.

f. Intel withheld information it was obligated to provide Intergraph. It thereafter supplied some of the needed information.

g. Intel refused to provide a supply of its Deschutes chip to Intergraph until those chips **[**115]** were publicly released, and then it refused to provide the technical data necessary for the plaintiff to make proper use of those chips.

Whether, as counsel to Intel suggests, Intergraph seeks "most favored nation" status, Intel should be assured that the court has no intention of granting it any special status. The terms of the injunctive relief will not require Intel to designate Intergraph a "Validation Partner" or to afford it other unusually favorable treatment. Rather, the relief is directed to the "nuts and bolts" of Intergraph's business, and it simply requires that Intel supply Intel products to Intergraph at the same time, and in proportionate quantities, that such items are supplied to Intergraph's competitors. If, however, Intel insists that the practical effect of the relief is to grant Intergraph rights beyond the status quo that existed prior to the contract breakdown, then the court is willing to examine the terms of Intel's deals with Intergraph's competitors and craft an appropriate remedy consistent with the intent of this Order.

To reiterate, it is the intent of the court that Intel treat Intergraph similarly to the way it treats its customers who are **[**116]** similarly situated to Intergraph, no better and no worse. Men and women of good will should have no difficulty doing as the court will direct. Should any party not be able or willing to follow the court's instructions, they should be advised now that the court can and will take appropriate steps to enforce its order. That conceivably could include the appointment of a special master, whose duty it would be to examine the parties' compliance with the court's order and to report the facts and make a recommendation to the court. Counsel and the parties should also clearly understand that the court has little patience with lawyer "word games," but tends instead to cut through to the heart of a matter.

VII. Preliminary Injunction.

Accordingly, pending further order of the court, it is hereby **Ordered, Adjudged, and Decreed:**

Intel Corporation, its officers, agents, servants, employees, and attorneys, and anyone acting in concert with any of them, shall be and they hereby are **PRELIMINARY ENJOINED** from terminating Intergraph's rights as a "strategic customer in current and future programs," or from otherwise taking any action adversely affecting Intel's business **[**117]** relationship with Intergraph or Intergraph's ability to design, develop, produce, manufacture market or sell products incorporating, or based upon, Intel products or information, including but not limited to the following:

a. Intel shall supply Intergraph with all Intel product information, including but not limited to technical, design, development, defect, specification, support, supply, future product, product release or sample data, whether existing in product data books, "yellow backs," Confidential Information Transmittal Records, email or other mediums (hereinafter "Information"), in such form and content as supplied to and at the same time Intel supplies such Information to Intergraph's similarly situated competitors, such as Hewlett Packard, Compaq, Dell, IBM, NetPower and Silicon Graphics (hereinafter "the Competitors"), whether it is on an advance basis for the development of motherboards, graphics subsystems or workstations utilizing Intel's existing, or future generation products (hereinafter "Product Development"), on current products as needed for support of such products. Intel shall be required to maintain a log of the disclosure of Information to Intergraph **[**118]** and its similarly situated Competitors, and upon request of the court, certify to this court its compliance with the procedures and timely delivery of such Information.

b. Intel shall supply to Intergraph all Information of the type or content made available by Intel to Intergraph through third parties (hereinafter "Third Party Information"), **[*1292]** at the same time it permits, or provides, the disclosure of such Third Party Information to Intergraph's similarly situated Competitors, whether it is on an advance basis for Product Development or on a current basis for the support of products in distribution. Intel shall be required to maintain a log of the disclosure of Third Party Information to Intergraph and its Competitors, and upon request of the court, certify to this court its compliance with the procedures and timely delivery of such Information.

c. Intel shall supply Intergraph with an allocation, and set aside a supply of microprocessors, semiconductors, chips, and buses (hereinafter "Chips") on an advance basis for product development ("Chips Samples"), in such quantities as forecasted by Intergraph in the same manner and the same terms as is done by Intergraph's similarly **[**119]** situated Competitors, or in proportional quantities as supplied to Intergraph's similarly situated Competitors, and at the same time Intel supplies such Chips Samples to Intergraph's similarly situated Competitors, at the prevailing rate charged to Intergraph's similarly situated Competitors. Intel shall be required to maintain a log of the release, or delivery, of Chips Samples to Intergraph and its Competitors, and upon request of the court, certify to this court its compliance with the procedures and delivery of such Chips Samples.

d. Within eleven (11) days of the date on which Intergraph posts the bond, as required by subsection (h) of this order, Intel shall supply Intergraph with 25 sets of Deschutes Chips Samples, together with all technical data needed to permit Intergraph to develop, design, and manufacture its products. Such technical data shall be of the same type, nature, and extent of technical data provided to Intergraph's similarly situated Competitors.

e. Intel shall supply Intergraph with an allocation, and set aside a supply, of Chips which have been manufactured by or on behalf of Intel for distribution (hereinafter "Production Chips"), as well as all **[**120]** future chips proposed by, or available from Intel, including but not limited to 333 mhz Pentium II, BX, Deschutes and Merced Chips, in accordance with a forecast supplied by Intergraph. Intergraph shall provide

Intel with a forecast for Production Chips at least one (1) quarter in advance of the quarter in which Intergraph desires to receive delivery of such Production Chips.

(i) Intel shall supply its authorized distributors with sufficient quantities of Production Chips to fulfill Intergraph's allocation of Production Chips, when such allocation has been presented by Intergraph to Intel's authorized distributor for fulfillment. Intergraph shall, as it has agreed to do, purchase Production Chips available through Intel's authorized distributors by placing an order for such an authorized distributor to fulfill Intergraph's Production Chips allocation. Intergraph shall negotiate the terms and conditions for the supply of its Production Chips allocation with any Intel authorized distributor of its choosing, and Intel shall not take any action, or fail to take any action, that will interfere with or effect Intergraph's terms, conditions, negotiations or relationship with **[**121]** the Intel authorized distributor selected by Intergraph, including but not limited to actions pertaining to prices, discounts, volumes, shipping or delivery pertaining to such Production Chips. Intel shall be required, upon request of the court, to certify to this court its compliance with the procedures with the applicable authorized distributor and delivery of such Production Chips.

(ii) Intel shall supply Intergraph with Production Chips not yet available from Intel's authorized distributors ("Early Production Chips") in such quantities as forecasted by Intergraph, or in proportional quantities as supplied to Intergraph's similarly situated Competitors, at the same time Intel supplies such Early Production Chips to Intergraph's similarly situated Competitors, at the prevailing rate charged to Intergraph's similarly situated Competitors. Intel shall be required to maintain a log of the simultaneous release, or delivery, of Early Production Chips to Intergraph and its similarly situated Competitors, and upon request of the court certify to this court its compliance with the procedures and delivery of such Early Production Chips. Notwithstanding the foregoing, Intel shall supply **[**122]** Intergraph those Early Production Chips ordered by Intergraph **[*1293]** for the 1st Quarter of 1998 at the prices previously agreed to by the parties.

f. Intel shall include Intergraph as an "active member of the Intel Inside program," and provide it all rights, privileges and opportunities made available to all other members.

g. Intel shall provide Intergraph "marketing involvement" and include it in "new product introduction events" of the type in which Intel includes Intergraph's similarly situated Competitors.

h. Within eleven (11) days of the date on which this order is entered, Intergraph shall post a bond with the clerk of the court, subject to approval by the clerk of the court, as required by *Fed. R. Civ. P. 65(c)*, in the amount of $ 25,000.00, as security against and as payment for such costs and damages as may be incurred or suffered by Intel in the event that Intel is found to have been wrongly enjoined by this order.

i. Intergraph shall maintain the confidentiality of all Information, Third Party Information, Chip Samples and Early Production Chips, in accordance with the terms, conditions and procedures of the applicable non-disclosure agreements as previously **[**123]** agreed to by the parties. The Confidentiality provisions of any applicable non-disclosure agreements previously entered into by and between Intel and Intergraph are expressly incorporated herein.

Done and ordered at Birmingham, Alabama, this 10th day of April, 1998, at 1:21 o'clock p.m.

Edwin L. Nelson

United States District Judge

Southeast Fla. Laborers Dist. Heath & Welfare Trust Fund v. Philip Morris

United States District Court for the Southern District of Florida

April 13, 1998, Decided ; April 13, 1998, Filed

Case No. 97-8715-CIV-RYSKAMP

Reporter
1998 U.S. Dist. LEXIS 5440 *; 1998-1 Trade Cas. (CCH) P72,163

SOUTHEAST FLORIDA LABORERS DISTRICT HEALTH AND WELFARE TRUST FUND, Plaintiff, vs. PHILIP MORRIS, et al., Defendants.

Disposition: [*1] Defendant's motion to dismiss for failure to state claim [DE-8] GRANTED.

Core Terms

tortfeasor, antitrust, unjust enrichment, third-party, injuries, motion to dismiss, damages, tobacco, failure to state a claim, proximate cause, costs, plaintiff's claim, anti trust law, defendants', subrogation, remote

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN2[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 8(a)(2) provides that a complaint need only be a short and plain statement of the claim. As long as the pleadings give the defendant fair notice of what the plaintiffs claim is and the grounds up which it rests, notice pleading is satisfied. A complaint should not be dismissed for failure to state a claim upon which relief can be granted unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. When considering a motion to dismiss, the court must construe the allegations of the complaint favorably to the pleader. The threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim is exceedingly low.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN3[] Defenses, Demurrers & Objections, Motions to Dismiss

If a court grants a motion to dismiss, the court must determine whether the complaint should be dismissed with or without prejudice. Dismissal of a claim on the basis of the bare bone pleadings is a precarious one with a high mortality rate. However, where the allegations are well plead and amendment would be futile, a court may properly prohibit amendment.

Public Health & Welfare Law > Social Security > Medicaid > General Overview

HN4[] Social Security, Medicaid

The state cannot pursue common law claims directly against third-party tortfeasors prior to enactment of the Medicaid Third-Party Liability Act, Fla. Stat. Ann. § 409.901 (1995), which gives the state an independent cause of action.

Public Health & Welfare Law > Social Security > Medicaid > General Overview

Torts > ... > Elements > Causation > General Overview

HN5[] Social Security, Medicaid

Florida common law does not permit a plaintiff to recover in its own name from defendants for injuries that defendants allegedly caused to individual third party health care recipients.

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

Torts > Intentional Torts > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN6[] **Courts, Common Law**

The common law rule regarding proximate cause is that: where the plaintiff sustains injury from the defendant's conduct to a third person, it is too remote, if the plaintiff sustains no other than a contract relation to such a third person, or is under contract obligation on his account, and the injury consists only in increasing the plaintiffs expense or labor of fulfilling such contract, unless the wrongful act is willful for that purpose. The rule applies to negligent as well as intentional torts.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN7[] **Types of Contracts, Quasi Contracts**

To maintain a claim for unjust enrichment, a plaintiff must make clear from the face of their complaint that no adequate legal remedy exists.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN8[] **Types of Contracts, Quasi Contracts**

To survive a motion to dismiss on an unjust enrichment claim, the plaintiff must allege that the plaintiff conferred a benefit upon the defendant.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN9[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Section 1962 of the Federal Racketeer Influenced and Corrupt Organizations Act (RICO), codified at *18 U.S.C.S. § 1962*, provides that any person injured in his business or property by reason of a violation of *§ 1962* may sue therefor. The language limits standing to plaintiffs whose injuries were proximately caused by the RICO predicate acts. A central element of proximate cause is a showing of some direct relation between the injury asserted and the injurious conduct alleged. Thus, a plaintiff who complains of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts is too remote a distance to recover. There are three considerations to guide a proximate cause inquiry: the difficulty of ascertaining damages, the need to avoid multiple recoveries, and the fact that the law will be vindicated. Causation principles generally applicable to tort liability must be considered applicable in RICO cases.

HN10[] Antitrust & Trade Law, Clayton Act

Section 4 (15 U.S.C.S. § 15(a)) of the Clayton Act states that any person who shall be injured by reason of anything forbidden in the antitrust laws may sue. The federal courts do not interpret § 4 as expansively as its literal language suggests. The limitations include common-law tort concepts such as proximate cause, directness of injury, and certainty of damages. Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Accordingly, a court must evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. The first inquiry that a court must undertake is whether the plaintiff has suffered an antitrust injury. Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN11[] Regulated Practices, Private Actions

An antitrust injury cannot be alleged by a party that is neither a consumer nor a competitor in the market in which trade was restrained.

Counsel: For Plaintiffs: Zell Davis, Jr., Esquire, Robert E. Gordon, Esquire, Davis, Gordon, Donner & Chandler, West Palm Beach, Florida.

For Plaintiffs: Perry Weitz, Esquire, Steven E. Fineman, Esquire, Weitz & Luxenberg, P.C., New York, New York.

For Plaintiffs: Melvyn I. Weiss, Esquire, David J. Bershad, Esquire, Michael C. Spencer, Esquire, Kenneth J. Vianale, Esquire, Milberg Weiss Bershad Hynes & Lerach, LLP, New York, New York.

For Plaintiffs: William S. Lerach, Esquire, Patrick J. Coughlin, Esquire, Allen M. Mansfield, Esquire, Milberg Weiss Bershad Hynes & Lerach, LLP, San Diego, California.

For Plaintiffs: Robert J. Connerton, Esquire, John McN. Broaddus, Connerton & Ray, Washington, D.C.

For Defendants (except Liggett): Stephen J. Krigbaum, Esquire, Carlton, Fields, Ward, Emmanuel, Smith & Cutler, P.A., West Palm Beach, Florida.

For Defendants, (except Liggett): Amy E. Furness, Esq., Carlton, Fields, Ward, Emmanuel, Smith & Cutler, P.A., Miami, Florida.

Opinion

ORDER GRANTING MOTION TO DISMISS

THIS CAUSE came before the Court upon the defendants' motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim [DE-8] and alternative motion to dismiss under *Rule 12(b)(7)* for failure to join necessary parties [**DE-11**]. The motions have been fully briefed and the Court has heard oral argument.

I. BACKGROUND

1. The Complaint

In its 123 page thirteen-count complaint, the plaintiff, Southeast Florida Laborers District Counsel Health and Welfare Trust Fund ("Fund" or "plaintiff"), brings suit directly against the nation's **[*4]** leading tobacco companies [1] and their lobbying and public relations agents. [2] The Fund seeks to recover the health care costs expended to treat its participants who have suffered from tobacco-related illnesses, to require defendants to finance tobacco-use cessation programs for Fund participants, and to obtain various forms of injunctive relief. [3] **[*5]** The claims are as follows: fraud (Counts IV), breach of special duty (Count IX), unjust enrichment (Count XIII), violation of the Federal Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1962* (Counts I and II), and federal and

---

[1] Phillip Morris, R.J. Reynolds, Brown & Williamson, B.A.T. Industries, American Tobacco, Lorillard, United States Tobacco, and Liggett ("Tobacco Companies").

[2] The Council for Tobacco Research, The Tobacco Institute, Smokeless Tobacco Council, and Hill & Knowlton (with the Tobacco Companies, "Defendants").

[3] The Fund also seeks certification as a class action with a number of similar funds operating in Florida. The Court has stayed the motion for class certification pending resolution of the instant motions to dismiss. For the purpose of this motion to dismiss, the Court will consider only the Fund which is the named plaintiff.

state antitrust laws pursuant to the Sherman Act, *15 U.S.C. § 1*, and the Florida Antitrust Act of 1980, F.S.A. § 542 (Counts III, V, VI, and VII). [4]

2. The Plaintiff

The Fund is a nonprofit, multi-employer trust which operates solely in the State of Florida to provide comprehensive health care benefits for union members and their families through an employee welfare benefit plan. The plan is financed by collectively-bargained contributions made by employers of the participating workers. Instead of receiving money in their paychecks, the workers -- through the unions -- negotiate to have their employers contribute to the Fund to finance health care coverage for themselves and their families. *See UMWA Health & Retirement Funds v. Robinson, 455 U.S. 562, 572, 102 S. Ct. 1226, 1232, 71 L. Ed. 2d 419 (1982)*; *Miree Constr. Corp. v. Dole, 930 F.2d 1536 (11th Cir. 1991)*.

The Fund is governed by ***HN1***[] ERISA and by the Labor Management Relations ("Taft-Hartley") **[*6]** Act, § 302(c)(5)(A); *29 U.S.C. § 186(c)(5)(A)*. These statutes require the Fund to hold Fund assets in trust for the purpose of providing benefits to participants in the trust and their beneficiaries. *See* ERISA, § 403(c)(1); *29 U.S.C. § 1101(c)(1)*. *See also* Taft-Hartley, § 302(c)(5)(A); *29 U.S.C. § 186(c)(5)(A)* (assets of union-sponsored fund for medical or hospital care must be held in trust "for the sole and exclusive benefit of the employees of such employer, and their families"). The Fund is administered by a board of trustees, typically union officers. The trustees' performance of their Fund-related duties is governed by statutory standards of fiduciary responsibility. *See* ERISA, §§ 404-412; *29 U.S.C. §§ 1104-1112*.

If the Fund recovers in this lawsuit, it would not reimburse contributing employers for their overpayments because it is statutorily prohibited from doing so. *See 29 U.S.C. § 1103(c)(1)(1997)*. The Fund could not unilaterally reduce the employers' contributions because these contributions are determined in a collective bargaining agreement to which the Fund is not a party. The Fund does not allege that its current participants actually suffered **[*7]** the injuries alleged.

3. The Motions to Dismiss

The defendants move to dismiss for failure to state a claim and, in the alternative, for failure to join necessary parties. The Court will not consider the alternative motion to dismiss because it finds that the arguments raised in the motion to dismiss for failure to state a claim are dispositive. In their motion to dismiss, defendants argue that all of plaintiff's claims fail because of the Florida Supreme Court case *Agency for Health Care v. Associated Industries, 678 So. 2d 1239 (Fla. 1996)*, *cert. denied*, *117 S. Ct. 1245, 137 L. Ed. 2d 327 (1997)*, and because the claims are too remote. Defendants further attack each of plaintiff's claims on claim-specific grounds.

II. DISCUSSION

A. Standard of Review

HN2[] *Rule 8(a)(2) of the Federal Rules of Civil Procedure* provides that a complaint need only be "a short and plain statement of the claim." As long as the pleadings "give the defendant fair notice of what the plaintiffs claim is and the grounds up which it rests," notice pleading has been satisfied. *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 103, 2 L. Ed. 2d 80 (1957)*. A complaint should not be dismissed **[*8]** for failure to state a claim upon which

[4] Plaintiff has abandoned its claims for violation of the Florida Unfair and Deceptive Trade Practices Act (Count VIII), strict liability (Count X), negligence (Count XI), and breach of express and implied warranties (Count XII). (*See* Pl.'s Mem. in Opp. to Def.'s Mot. to Dismiss at 1 n.3.)

relief can be granted "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley, 355 U.S. at 45-46, 78 S. Ct. at 102*. When considering a motion to dismiss, the Court must construe the allegations of the complaint favorably to the pleader. *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 1686, 40 L. Ed. 2d 90 (1974)*. As the Eleventh Circuit has noted, "the threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim is exceedingly low." *Quality Foods v. Latin Am. Agribusiness Devel., 711 F.2d 989, 995 (11th Cir. 1983)*.

HN3[] If a court grants a motion to dismiss, it must determine whether the complaint should be dismissed with or without prejudice. "Dismissal of a claim . . . on the basis of the barebone pleadings is a precarious one with a high mortality rate." *Barber v. Motor Vessel "Blue Cat"*, *372 F.2d 626 (5th Cir. 1967)*. However, where the allegations are well plead and amendment would be futile, a court may properly prohibit amendment. *See* *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct.* ***[*9]*** *227, 230, 9 L. Ed. 2d 222 (1962)* (futility is basis for denying amendment under Rule 15).

B. Common Law Claims

1. *Associated Industries* and Remoteness -- Fraud and Breach of Special Duty

The defendants argue that *Associated Industries* mandates dismissal of the Fund's common law tort claims. The Court agrees. In *Associated Industries, supra*, the Florida Supreme Court held that ***HN4***[] the State could not pursue common law claims directly against third-party tortfeasors prior to enactment of the Medicaid Third-Party Liability Act, F.S.A. *§ 409.901* (1995). The Court stated, "it was the [1994 amendments] that gave the State an independent cause of action." *678 So. 2d at 1248*. Prior to the 1994 amendments, the State could only recover by suing under the traditional method of subrogation. *Id. at 1249*. The only Florida case interpreting *Associated Industries* acknowledges that *Associated Industries* held that "prior to the 1994 law there was no *independent* cause of action permitting the State to go forward in seeking Medicaid reimbursement." *State of Florida v. The American Tobacco Co.*, Case No. CL 95-1466 AH, at 2 (Fla. Cir. Ct. Sept. 16, 1996), **[*10]** *cert. denied*, *697 So. 2d 1249 (Fla. 4th DCA 1997)*.

The defendants assert *Associated Industries* stands for the proposition that everyone who sues a third-party tortfeasor to recover medical costs expended may recover only by bringing a subrogation claim and cannot sue a third-party tortfeasor directly. The Fund responds that *Associated Industries* has no bearing on the instant case because it concerned only the State's ability to bring a claim against third-party tortfeasors and did not rule on private litigants' rights to sue for damages. The Court agrees that the common law principles upon which *Associated Industries* is based mandate dismissal of the Fund's common law tort claims.

Prior to 1978, the State of Florida could not recover Medicaid reimbursements, either directly or indirectly, from a third-party tortfeasor. In 1978, the Florida legislature passed F.S.A. § 409.266(3) (1978) which "gave the State the authority to pursue third-party resources. However, the method of pursuit was limited to traditional subrogation means." *Associated Industries, 678 So. 2d at 1249*. In 1991, F.S.A. § 409.266(3) was repealed and, in 1994, the current Medicaid Third-Party **[*11]** Liability Act was passed. The 1994 Act permits the State to recover directly from third-party tortfeasors.

For the Fund to prevail, it must show that its claims take higher priority than those of the State. It must demonstrate why, although the State could not bring any type of suit against a third-party tortfeasor without statutory authorization, the Fund may bring similar common law claims without statutory authorization. This the Fund cannot do. The Fund is subject to the same common law principles which would apply to the State if there had been no statutory change in the common law.

HN5[] Florida common law does not permit a plaintiff to recover in its own name from defendants for injuries which defendants allegedly caused to individual third party health care recipients. *See Holyoke Mut. Ins. Co. in Salem v. Concrete Equipment, Inc., 394 So. 2d 193, 197* (Fla. 3d DCA) (insurer which has paid insured's loss is a subrogee of insured's cause of action against tortfeasor), *rev. denied*, *402 So. 2d 609 (Fla. 1981)*. *See also*

Travelers Ins. Co. v. Warren, 678 So. 2d 324 (Fla. 1996) (when insurer pays insurance claim, it typically receives subrogation rights from its insured against **[*12]** the tortfeasor).

Florida's common law follows **HN6**[] the well-established common law rule regarding proximate cause. The general rule is that:

> where the plaintiff sustains injury from the defendant's conduct to a third person, it is too remote, if the plaintiff sustains no other than a contract relation to such a third person, or is under contract obligation on his account, and the injury consists only in . . . increasing the plaintiffs expense or labor of fulfilling such contract, unless the wrongful act is willful for that purpose.

Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 533 n.25, 103 S. Ct. 897, 906 n.25, 74 L. Ed. 2d 723 (1983) (quoting 1 J. Sutherland, *A Treatise on the Law of Damages* 55-56 (1882)); Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1499 (11th Cir. 1985), *cert. denied*, *475 U.S. 1107, 106 S. Ct. 1513, 89 L. Ed. 2d 912 (1986)*. This rule applies to negligent as well as intentional torts. *See* Anthony v. Slaid, 52 Mass. (11 Met.) 290 (1846) (plaintiff could recover only by bringing subrogation claim against third party tortfeasor who intentionally assaulted individual **[*13]** to whom plaintiff owed a duty to provide medical care). *See generally State of Maryland v. Philip Morris*, No. 96122017, CL 211487, 1997 WL 540913, at *9-14 (Md. Cir. Ct. May 21, 1997) (extensive discussion of common law right and plaintiff's inability to recover from third-party tortfeasor); *State of Iowa v. R.J. Reynolds*, No. CL 71048, at 7-8 (Iowa Dist. Ct. Aug. 26, 1997) (injuries too remote to give plaintiff claim against third-party tortfeasor); *State of Washington v. American Tobacco Co.*, No. 96-2-15056-8, at 11-13 (Wash Super. Ct. Nov. 19, 1996) (dismissing special duty claim because no physical harm and no proximate cause).

To escape Florida's common law rule, the Fund argues that it is unlike an insurer and that its injuries are not purely derivative of the injuries of its participants. The Court is unconvinced. The Fund asserts that the insurance cases do not "take into account the special relationship between the Funds and their participants." (Pl.'s Mem. in Opp. to Def.'s Mot. to Dismiss at 12.) This "special relationship" apparently consists of the fact that the Fund does not sell insurance at public rates to ensure profitability and that the Fund could have **[*14]** taken action to reduce the cost burdens from tobacco-related disease. This "special relationship" fails to show that the Fund has suffered direct harm. As the Minnesota Supreme Court noted, the fact "that [the plaintiff] occupies a different niche in the complex web of health care institutions . . . do[es] not . . . overcome the need for a closer connection between the injury and the tort." State of Minnesota v. Philip Morris, Inc., 551 N.W.2d 490, 495 (Minn. 1996). The Fund cannot escape the fact that any economic injuries which it incurred are purely-derivative of the physical injuries which its participants suffered. The Fund cannot, as a matter of law, sustain a claim against the defendants without a closer connection to the defendants.

2. Unjust Enrichment

The Fund also alleges that the defendants have been unjustly enriched. The Fund's claim is as follows: the defendants owe a duty to the public not to deceive them regarding smoking, (Compl. P 335), the defendants have breached their duty, (Id. P 336), because of this breach, the defendants owe the plaintiff a duty to compensate Fund participants for the medical costs expended, (Id. P 337), the defendants' **[*15]** retention of the Fund's medical expenditures would be unjust, (Id. P 340).

HN7[] To maintain a claim for unjust enrichment, a plaintiff must make clear from the face of their complaint that no adequate legal remedy exists. Martinez v. Weyerhaeuser Mort. Co., 959 F. Supp. 1511, 1518 (S.D. Fla. 1996) (citing Bowleg v. Bowe, 502 So. 2d 71, 72 (Fla. 3d DCA 1987)). The defendants have not alleged that an adequate legal remedy does exist. However, the Court will decline to dismiss this count with leave to amend because amendment would be futile. Instead, the Court will treat the count as properly pled and will dismiss it on substantive grounds.

HN8[] To survive a motion to dismiss on an unjust enrichment claim, the plaintiff must allege that the plaintiff conferred a benefit upon the defendant. *Florida Power & Light Co. v. Allis-Chalmers Corp., 752 F. Supp. 434, 438 (S.D. Fla. 1990)* (citing *Challenge Air Transport, Inc. v. Transportes Aereos Nacionales, S.A., 520 So. 2d 323, 324 (Fla. 3d DCA 1988)*. The Fund has not cited, nor has the Court located, any Florida case employing an unjust enrichment theory to obligate a defendant to provide medical care to smokers where the plaintiff **[*16]** is legally obligated to do so. "Courts of equity have no power to overrule established law." *Orr v. Trask, 464 So. 2d 131, 135 (Fla. 1985)*. Because the Court declines to invent a new cause of action, the plaintiff cannot, as a matter of law, state a claim of unjust enrichment. *See State of Iowa, supra*, at 14 (no unjust enrichment claim where defendants owed no duty to individual smokers that plaintiff satisfied by paying health care costs, plaintiff has independent duty to pay medical costs, and any benefit to defendants was incidental to plaintiff's fulfillment of its duty); *State of Maryland, supra*, at *16 (no unjust enrichment claim where plaintiff's claim is purely speculative); *State of Texas v. American Tobacco Co., 1997 U.S. Dist. LEXIS 22580*, No. 5-96CV-91, at 26 (E.D. Tex. Sept. 8, 1997) (unjust enrichment claim too attenuated and indirect to find support under theory of unjust enrichment).

C. Statutory Claims

1. RICO

HN9[] *Section 1962* of RICO provides that "any person injured in his business or property by reason of a violation of *section 1962* . . . may sue therefor." The Supreme Court has interpreted this language as limiting standing to plaintiffs whose injuries were proximately **[*17]** caused by the RICO predicate acts. *Holmes, 503 U.S. 258 at 268, 117 L. Ed. 2d 532, 112 S. Ct. 1311 at 1318*. A central element of proximate cause is a showing of some "direct relation between the injury asserted and the injurious conduct alleged. Thus, a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts was generally said to stand at too remote a distance to recover" *Id.* The *Holmes* Court raised three considerations to guide its proximate cause inquiry: the difficulty of ascertaining damages, the need to avoid multiple recoveries, and the fact that the law will be vindicated. *Id.* "Causation principles generally applicable to tort liability must be considered applicable" in RICO cases." *Cox v. Administrator U.S. Steel & Carnegie, 17 F.3d 1386, 1399*, *modified on other grounds*, *30 F.3d 1347 (11th Cir. 1994)*, *cert. denied*, *513 U.S. 1110, 115 S. Ct. 900, 130 L. Ed. 2d 784 (1995)*.

Inspection of the Fund's claims reveals that the alleged harm does not affect the Fund directly, but only affects the Fund's participants. Furthermore, the three considerations relied upon in *Holmes* demonstrate that the Court should avoid **[*18]** finding that proximate cause exists here. The Fund is not suing to recover damages which the defendants caused to it directly, but is attempting to recover economic damages which it incurred by virtue of its contractual relationship with third parties who were allegedly harmed by the defendants. The "direct relation" between the Fund's alleged injury and the defendants' conduct is absent.

Analysis of the *Holmes* factors reveals that this conclusion is the correct one. First, if the Court permitted this claim to go forward, it would open a Pandora's box of damage calculations. The Court would be required to determine how much of the damages should be paid to the Fund's participants, the smokers, and how much should be paid to the Fund. Second, the risk of multiple recoveries is real. A certified class action of allegedly injured Florida smokers is currently pending in Dade County Circuit Court. The plaintiff class includes the Fund's participants and seeks to recover the same medical expenses which the Fund seeks in the instant case. *See Engle v. R.J. Reynolds Tobacco Co., et al.*, No. 94-08273-CA-20 (Dade County Ct., filed May 5, 1994). Third, pendency of the *Engle* action **[*19]** and the State's recent tobacco settlement demonstrates that there are ample "private attorneys general" who will vindicate the alleged wrongs. [5] The Fund's RICO claims are dismissed.

---

[5] Judge Cohen's decision not to dismiss the State's RICO claim in *State of Florida v. American Tobacco Co.*, 1996 WL 788371 (Fla. Cir. Ct. Dec. 13, 1996), *rev. denied*, ***697 So. 2d 1249 (Fla. 4th DCA 1997)*** does not affect this Court's ruling. Judge Cohen's decision was based upon Florida's RICO act and upon the fact that the State did not have to meet the proximate cause requirements of a private litigant.

2. Antitrust Claims

HN10[] Section 4 of the Clayton Act states that "any person who shall be injured . . . by reason of anything forbidden in the antitrust laws may sue." *15 U.S.C. § 15(a)*. "The federal courts . . . have not interpreted section 4 as expansively as its literal language suggests." *Todorov v. DCH Healthcare Authority, 921 F.2d 1438, 1448 (11th Cir. 1991)*. [6] These limitations include common-law tort concepts **[*20]** such as proximate cause, directness of injury, and certainty of damages. "Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Associated General Contractors, 459 U.S. at 534, 103 S. Ct. at 906*. Accordingly, a court must "evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Id. at 535, 103 S. Ct. at 907*. The first inquiry which the Court must undertake is whether the plaintiff has suffered "an antitrust injury." *921 F.2d 1438 at 1449*. Antitrust injury is defined as "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*.

[*21] The Fund has not and cannot ***HN11***[] allege antitrust injury. It is "neither a consumer nor a competitor in the market in which trade was restrained," as required by *Associated General Contractors, 459 U.S. at 539, 103 S. Ct. at 909*. *See* *Florida Seed Co. v. Monsanto Co., 105 F.3d 1372, 1374* (11th Cir.) (dismissing antitrust claim where plaintiff not customer or competitor in relevant antitrust market), *cert. denied*, *118 S. Ct. 296, 139 L. Ed. 2d 228 (1997)*. Even if the Fund were in the proper market, it still could not state an antitrust claim. The gravamen of the Fund's complaint is that health care prices soared as a result of the defendants' concealment of information. Because many of the Fund's participants were addicted to cigarettes, the Fund's health care costs increased. This injury is simply not the type of injury that the antitrust laws were intended to prevent. *See* *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (antitrust injury consists of injury caused by higher prices, reduced output, or damage to a competitor's business). Furthermore, the claim is wholly derivative and thus not cognizable as an antitrust **[*22]** injury. *See* *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710-11 (11th Cir. 1984)* (dismissing antitrust claim for derivative injuries by officer, employer, and shareholder). [7]

III. CONCLUSION

The tobacco industry has, as of late, become the whipping-boy of American political discourse. The fact that the tobacco industry has recently become very unpopular, however, is insufficient ground for this Court to overturn well-established common law rules and well-settled methods of statutory interpretation to permit recovery where recovery would otherwise be barred. If courts were **[*23]** to ignore the law and permit recovery as a matter of course against an unpopular defendant for the sole reason that the defendant is unpopular, courts would have abandoned their constitutionally-mandated role of interpreting the law and would have assumed the role of political institutions.

---

[6] The Florida legislature and courts have "adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act [because] statutory interpretation is of little help in ascertaining Sherman Act violations. Reliance must be upon the case law which over the years has, however broadly and sometimes inconsistently, laid out the parameters of conduct proscribed by those antitrust laws." *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So. 2d 1028, 1032 (Fla. 2d DCA 1984)*

[7] Plaintiff's reliance on *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)* is misplaced. Contrary to plaintiff's assertions, *Blue Shield* did not involve a derivative claim. On the contrary, it involved a purchaser's claim against an antitrust offender. In this case, the Fund has not purchased any products from the defendants. Thus, its claim is wholly derivative.

Having considered the motions and the pertinent portions of the record, it is

ORDERED AND ADJUDGED that the defendant's motion to dismiss for failure to state a claim [**DE-8**] is GRANTED in its entirety.

DONE AND ORDERED in Chambers at West Palm Beach, Florida, this 13 day of April, 1998.

KENNETH L. RYSKAMP

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN1[] **Clayton Act, Claims**

Proof that an entity has committed an antitrust violation does not afford plaintiffs an automatic right to damages under 15 U.S.C.S. § 15. Such proof establishes only that injury may result and does not mean that any plaintiff has been actually injured within the meaning of § 15. In order to recover under § 15, plaintiffs must establish that their injuries were caused by reason of defendant's anticompetitive activity. 15 U.S.C.S. § 15. The "by reason of" language is the starting point for analyzing causation and damages.

Antitrust & Trade Law > Clayton Act > General Overview

HN2[] **Antitrust & Trade Law, Clayton Act**

Causation evidence under *15 U.S.C.S. § 15* must establish that the injuries which plaintiffs claim are attributable to the antitrust conspiracy, and not to other factors. Plaintiffs seeking damages under *15 U.S.C.S. § 15* must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. In order to establish causation under *§ 15*, plaintiffs must demonstrate that the anticompetitive activity was a material cause of their injury. If there is sufficient evidence in the record to support an inference of causation between the antitrust violation and the injury suffered, the ultimate conclusion as to what that evidence proves is for the jury. Once plaintiffs establish that defendant's anticompetitive activity was a material cause of "some" of their injury, however, the remainder of the damage inquiry is judged under the amount of damage standard. While the evidence which links the alleged antitrust violation to plaintiffs' injuries must be more precise than the evidence establishing the amount of injury which they have suffered, plaintiffs' burden in proving fact of injury may be discharged by reasonable inferences from circumstantial evidence. Any evidence which is logically probative of a loss attributable to the violation will advance plaintiffs' case.

Antitrust & Trade Law > Clayton Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN3[] **Antitrust & Trade Law, Clayton Act**

In the class action context the inference of antitrust injury is predicated on the establishment of certain facts: (1) an antitrust violation, typically a conspiracy to fix prices or allocate markets; (2) an ability on the part of defendant-conspirators to effectuate the conspiracy; (3) generalized price increases or damages in the industry involved; and (4) purchase or, as here, rental by plaintiffs during the period of anti-competitive activity. In such circumstances, unless it is clear that no plaintiff was injured, the fact that defendant may be able to defeat a showing of causation as to a few individual class members would not defeat the inference of antitrust injury; the exact amount of injury to each class member should be treated as an issue at the damage phase of the trial.

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] **Antitrust & Trade Law, Clayton Act**

An antitrust plaintiff who is injured in his person or property by anticompetitive activity is entitled to recover damages. In economic terms, the amount of damages is the difference between what plaintiff could have made in a hypothetical free economic market and what plaintiff actually made in spite of defendant's anticompetitive activities. Once an antitrust violation has been established, however, the burden of proving damages is to some extent lightened.

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] **Antitrust & Trade Law, Clayton Act**

To establish the amount of injury for antitrust violations, plaintiffs need not establish their damages with mathematical precision. Plaintiffs need only provide such evidence that the jury is not left to speculation or guesswork in determining the amount of damages to award.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

HN6[] **Class Members, Absent Members**

The claims of absent class members in opt-out class actions cannot properly be dismissed for failure to return a questionnaire. To require them to complete and return a questionnaire, on the condition that failure to do so would result in dismissal from the lawsuit, would have the prohibited effect of requiring them to opt into the class and violate the opt-out policy of *Fed. R. Civ. P. 23*.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

A conspirator is liable for damages which flow from its conspiracy, and such liability does not automatically cease when the conspirator ceases its anti-competitive conduct. A conspirator is liable for the damages caused by its unlawful conduct, even if they are sustained after the unlawful conduct ceases.

Opinion

[*924] MEMORANDUM AND ORDER

These class action price-fixing cases come before the Court on defendant's Motion For Partial Summary Judgment (Doc. # 613) in Law, et al. v. National Collegiate Athletics Association, Case No. 94-2053; defendant's Motion For Partial Summary Judgment (Doc. # 91) in Hall, et al. v. National Collegiate Athletics Association, Case No. 94-2392; and defendant's Motion For Partial Summary Judgment (Doc. # 41) in Schreiber, et al. v. National Collegiate Athletics Association, Case No. 94-2026. In all three cases, the National Collegiate Athletic Association [NCAA] seeks partial summary judgment with respect to groups of coaches "for whom plaintiffs do not have and will not have **[**3]** evidence of impact" because their final expert report contains no analysis or individualized finding of damage. It also seeks summary judgment as to (1) claims of any individual class member who failed to return a timely and accurate "Restricted Earnings Coach Information Sheet"; (2) claims of individuals who are not class members; (3) damages incurred after May 25, 1995, when the NCAA rescinded the salary cap which violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (4) damages which represent a Consumer Price Index adjustment to plaintiff's base damage calculation; and (5) plaintiffs' claim for injunctive relief. At a status conference on April 2, 1998, the Court advised the parties of its intended ruling on these motions. This **[*925]** memorandum will briefly articulate the basis for its ruling.

I. HISTORY OF THE CASE

On January 23, 1998, the Tenth Circuit affirmed this court's order which permanently enjoined the NCAA from re-enacting compensation limits such as those contained in the restricted earnings rule [the Rule] because, as a matter of law, the Rule violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*. *Law v. National Collegiate Athletic Ass'n, 134 F.3d 1010, 1024* ***[**4]*** *(10th Cir. 1998)*. In determining that the Rule constituted an unreasonable restraint of trade under *Section 1*, the Tenth Circuit inquired whether the challenged restraint had a substantially adverse effect upon competition, and whether the pro-competitive virtues of the alleged wrongful conduct justified the otherwise anticompetitive effects. *134 F.3d at 1016-17, 1019*. The Court of Appeals answered the first question in the affirmative, holding that anticompetitive effect was established as a matter of law on the undisputed record. *134 F.3d at 1020*. It noted that "under a quick look rule of reason analysis, anticompetitive effect is established, even without a determination of the relevant market, where the plaintiff shows that a horizontal agreement to fix prices exists, that the agreement is effective, and that the price set by such an agreement is more favorable to the defendant than otherwise would have resulted from the operation of market forces." Id. It reasoned that the undisputed facts in this case supported a finding of anticompetitive effect, as follows:

> The NCAA adopted the REC Rule to reduce the high cost of part-time coaches' salaries, over $ 60,000 annually **[**5]** in some cases, by limiting compensation to entry-level coaches to $ 16,000 per year. The NCAA does not dispute that the cost-reduction has effectively reduced restricted-earnings coaches' salaries. Because the REC Rule was successful in artificially lowering the price of coaching services, no further evidence or analysis is required to find market power to set prices.

Id. Having concluded that the Rule had a substantially adverse effect upon competition, the Tenth Circuit inquired whether the pro-competitive benefits of the restriction -- retaining entry level jobs, reducing costs, and maintaining competitive equity -- justified the anticompetitive effects. *134 F.3d at 1021-24*. The Court of Appeals resolved this question in the negative, noting that the NCAA had failed to present evidence that the Rule would be effective over time in creating entry-level positions, reducing deficits, enhancing competition, leveling an uneven playing field, or reducing coaching inequities. Id. It also noted that cost-cutting by itself is not a valid pro-competitive justification. As a result, the Tenth Circuit concluded that the NCAA had not demonstrated a genuine issue of fact whether **[**6]** it had violated *Section 1* of the Sherman Act.

HN1[] Proof that the NCAA committed an antitrust violation does not afford plaintiffs an automatic right to damages, however, under Section 4 of the Clayton Act, *15 U.S.C. § 15*; such proof establishes only that injury may result and does not mean that any plaintiff has been actually injured within the meaning of Section 4. *J. Truett Payne Co., Inc. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. In order to recover under Section 4 of the Clayton Act, plaintiffs must establish that their injuries were caused "by reason of" defendant's anticompetitive activity. *15 U.S.C. § 15*. The "by reason of" language is the starting point for analyzing causation and damages, the two aspects of plaintiffs' case which are at issue here.

II. ISSUES TO BE RESOLVED

The parties have sharply divergent views on two issues which pervade the motions for partial summary judgment: (1) whether the fact of antitrust injury has already been established as a matter of law, so that plaintiffs are relieved of any burden of further proof on that issue, or whether the matter remains to be determined at trial; and (2) whether **[**7]** plaintiffs are entitled to prove the fact of antitrust injury on a class wide basis or whether they must do so on a coach-by-coach basis for more than 3,000 class members. Plaintiffs maintain that the fact of damage was conclusively resolved in the order which granted plaintiffs' motion for summary judgment **[*926]** on August 2, 1995, and the Tenth Circuit affirmance on January 23, 1998. Defendant disagrees, contending that the Tenth Circuit said noting about whether any particular plaintiff sustained injury and did not mention Section 4 of Clayton Act. The NCAA further notes that a finding of anticompetitive effect under *Section 1* of Sherman Act does not mean that every class member sustained antitrust injury and that in fact plaintiffs' expert, Dr. Robert D. Tollison, found that many coaches (some 60% of the class members) sustained no damages whatsoever.

The Court agrees with the NCAA that the fact of antitrust injury remains an issue for trial. [1] It disagrees with the NCAA's ancillary arguments that Dr. Tollison seeks to prove antitrust injury by estimating the amount of damages which plaintiffs incurred; that aside from Dr. Tollison's statistical analysis, plaintiffs have no evidence **[**8]** of antitrust injury; and that fact of injury cannot be established on a class wide basis.

A. Causation

HN2[] Causation evidence under Section 4 must establish that the injuries which plaintiffs claim are attributable to the antitrust conspiracy, and not to other factors. *See, e.g.*, *Van Dyk Research Corp. v. Xerox Corp., 631 F.2d 251, 254-56 (3d Cir. 1980)*, *cert. denied*, *452 U.S. 905, 69 L. Ed. 2d 405, 101 S. Ct. 3029 (1981)* (plaintiff not entitled to recovery where injury caused by cash flow problems, inability to raise money through new stock offerings, and failure of marketing arrangement); *R. S. E., Inc. v. Pennsy Supply, Inc., 523 F. Supp. 954, 964 (M.D. Pa. 1981)*. The purpose of the antitrust injury requirement is to ensure that the harm claimed by plaintiff corresponds to the rationale for finding a violation of **[**9]** the antitrust laws in the first place. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 342, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*. The Supreme Court's observation in Atlantic Richfield underscores the salience of the fact of injury inquiry, as follows:

> Conduct in violation of the antitrust laws may have three effects, often interwoven: In some respects the conduct may reduce competition, in other respects it may increase competition, and in still other respects effects may be neutral as to competition. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

495 U.S. at 344. In this regard, the Supreme Court reaffirmed *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, which held that plaintiffs seeking damages under Section 4 of the Clayton Act must prove "antitrust injury, which is to say injury of the type the antitrust laws were intended to

[1] This ruling disposes of Plaintiffs' Motion In Limine To Preclude Evidence Or Argument Concerning Impact Or Fact Of Damage To The Class (Doc. # 661) filed February 4, 1998.

prevent and that flows from that which makes defendants' acts unlawful. [2] *See also*, Cargill, Inc. v. Monfort of Colorado, Inc., 479 **[**10]** U.S. 104, 122, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986). [3]

[11]** In order to establish causation under Section 4, plaintiffs must demonstrate that the anticompetitive activity was "a material **[*927]** cause" of their injury. Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 & n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969). [4] They need not rule out "all possible alternative sources of injury." Id.; *see also* Mulvey v. Samuel Goldwyn Productions, 433 F.2d 1073, 1075 n. 3 (9th Cir. 1970), *cert. denied*, *402 U.S. 923, 28 L. Ed. 2d 662, 91 S. Ct. 1377 (1971)* (antitrust violation need not be "sole" or the "controlling" cause of injury). If there is sufficient evidence in the record to support an inference of causation between the antitrust violation and the injury suffered, the ultimate conclusion as to what that evidence proves is for the jury. Perkins v. Standard Oil Co., 395 U.S. 642, 648, 23 L. Ed. 2d 599, 89 S. Ct. 1871 (1969). Once plaintiffs establish that defendant's anticompetitive activity was a material cause of "some" of their injury, however, the remainder of the damage inquiry is judged under the amount of damage standard. Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. at 114 n. 9.

[12]** While the evidence which links the alleged antitrust violation to plaintiffs' injuries must be more precise than the evidence establishing the amount of injury which they have suffered, see Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562-63, 75 L. Ed. 544, 51 S. Ct. 248 (1931); Van Dyk Research Corp. v. Xerox Corp., supra, 631 F.2d at 255; Flintkote Co. v. Lysfjord, 246 F.2d 368, 391-92, 394 (9th Cir.), *cert. denied*, *355 U.S. 835, 2 L. Ed. 2d 46, 78 S. Ct. 54 (1957)*, plaintiffs' burden in proving fact of injury may be discharged by reasonable inferences from circumstantial evidence. World Of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1478 (10th Cir.), *cert. denied*, *474 U.S. 823, 88 L. Ed. 2d 63, 106 S. Ct. 77 (1985)*; Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1525 (10th Cir. 1984), *aff'd* 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985). Any evidence which is logically probative of a loss attributable to the violation will advance plaintiffs' case. Bogosian v. Gulf Oil Corp., 561 F.2d 434, 454 (3d Cir. 1977) (absolutely no requirement that loss be personal or unique to individual plaintiff, **[**13]** so long as plaintiff has suffered loss in his business or property; thus, when violation impacts class of persons, no reason why proof of causation cannot be made on common basis so long as common proof adequately demonstrates some damage to each individual).

As a practical matter, in a class action context, proof of an effective conspiracy to fix prices will include facts which tend to establish -- perhaps circumstantially -- that each class member was injured. Presidio Golf Club v. National Linen Supply Corp., 1976 U.S. Dist. LEXIS 11577, 1976 WL 1359, *5 (N.D. Cal. 1976). The district court in Presidio Golf noted that an inference of antitrust injury is justified in certain circumstances, as follows:

---

[2] In Brunswick, the Supreme Court noted that the injury "should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation" and that "it should, in short, be 'the type of loss that the claimed violations . . . would be likely to cause.'" 429 U.S. at 489 (quoting Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)).

[3] In Cargill, the Supreme Court emphasized the necessity for scrutinizing the Brunswick antitrust injury factor and extended this requirement to cases such where plaintiffs sought an injunction under Section 16 of the Clayton Act, 15 U.S.C. § 26. The Court held that in such a case, a private plaintiff is required to show threatened antitrust injury just as a plaintiff seeking damages under Section 4 of the Clayton Act is required to show actual antitrust injury. 479 U.S. at 113. The Court reaffirmed that an injury, although causally related to an antitrust violation, nevertheless does not qualify as "antitrust injury" unless it can be attributed to an anticompetitive aspect of the practice under scrutiny. The Court added that "a showing of loss or damage due merely to increased competition does not constitute such injury." 479 U.S. at 122.

[4] As noted above, plaintiffs have already proven that the NCAA violated the antitrust laws. Under Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. at 114 n. 9, their burden of proving fact of damage under Section 4 of the Clayton Act is satisfied by proof of "some damage" flowing from the unlawful conspiracy.

> HN3[] In the class action context the inference is predicated on the establishment of certain facts: (1) an antitrust violation, typically a conspiracy to fix prices or allocate markets; (2) an ability on the part of defendant-conspirators to effectuate the conspiracy; (3) generalized price increases or damages in the industry involved; and (4) purchase or, as here, rental by plaintiffs during the period of anti-competitive activity.

Id. (citations omitted). In such circumstances, unless **[**14]** it is clear that no plaintiff was injured, the fact that defendant may be able to defeat a showing of causation as to a few individual class members would not defeat the inference of antitrust injury; the exact amount of injury to each class member should be treated as an issue at the damage phase of the trial. Id. at *5-6. *See also* *In re Master Key Antitrust Litigation, 528 F.2d 5, 12 n. 11 (2d Cir. 1975)* (if plaintiffs establish that defendants engaged in unlawful national conspiracy which had effect of stabilizing prices at noncompetitive levels and that plaintiffs were consumers of that product, jury could reasonably conclude that defendants' conduct caused injury to each plaintiff), **[*928]** citing *In re Ampicillin Antitrust Litigation, 55 F.R.D. 269, 275-76 (D.D.C. 1972)*.

The Third Circuit Court of Appeals took a similar view in *Bogosian v. Gulf Oil Corp., supra, 561 F.2d at 455*, when it directed the district court to reconsider its refusal to allow proof of antitrust injury on a class wide basis, as follows:

> If, in this case, a nationwide conspiracy is proven, the result of which was to increase prices to a class of plaintiffs beyond the prices which would **[**15]** obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage. "(The) burden of proving the fact of damage under § 4 of the Clayton Act is satisfied by . . . proof of some damage flowing from the unlawful conspiracy . . . ." *Zenith Radio, supra, 395 U.S. at 114, 89 S. Ct. at 1571 n. 9*. Under these circumstances, proof on a common basis would be appropriate.

Accord, *Hedges Enterprises, Inc. v. Continental Group, Inc., 81 F.R.D. 461, 475 (E.D. Pa. 1979)* (proof of conspiracy to establish "base" price for negotiations with individual plaintiffs, together **[**16]** with proof that price was higher than would prevail under competitive conditions, would be common to class and "would establish at least the fact of damage, even if the extent of the actual damages suffered by the plaintiffs" would vary); *In re Wirebound Boxes Antitrust Litigation, 128 F.R.D. 268, 272 (D. Minn. 1989)* (common proof of impact possible even where prices individually negotiated, because proof of impact typically follows from proof of price-fixing conspiracy where defendants have sufficient market power); *In re Folding Carton Antitrust Litigation, 75 F.R.D. 727, 734 (N.D. Ill. 1977)* ("Courts have consistently held that an illegal price fixing scheme presumptively impacts upon all purchasers of a price fixed product in a conspiratorially affected market.").

B. Damages

HN4[] An antitrust plaintiff who is injured in his person or property by anticompetitive activity is entitled to recover damages. In economic terms, the amount of damages is the difference between what plaintiff could have made in a hypothetical free economic market and what plaintiff actually made in spite of defendant's anticompetitive activities. [5] *Bigelow v. RKO Radio Pictures, **[*929]** Inc., 327 **[**17]** U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946)*

---

[5] Methods by which an antitrust plaintiff can establish lost profits include (1) comparing plaintiff's profits before or after the alleged anticompetitive activity with the profits made while plaintiff was subjected to the anticompetitive activity; (2) examining the profits of a business comparable to plaintiff's business which was not affected by the anticompetitive activity; and (3) projecting the market share which plaintiff would have attained absent the anticompetitive activity, and then projecting plaintiff's profits accordingly. ABA Antitrust Section, ***Antitrust Law*** Developments (3d ed. 1992) at 411-13, 669-673, and cases cited

(antitrust damages measured by "comparison of profits, prices and values as affected by the conspiracy, with what they would have been in its absence under freely competitive conditions."). See generally, II Areeda & Turner, ***Antitrust Law*** 231-34 (1978.

[18]** Once an antitrust violation has been established, however, the burden of proving damages is "to some extent lightened." *J. Truett Payne Co. v. Chrysler Motors Corp., supra, 451 U.S. at 568*. Our willingness to accept a degree of uncertainty in fixing the amount of damages rests in part on the difficulty of ascertaining business damages, in that "the vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of the defendant's antitrust violation." *Id. at 566*. Our willingness also rests on the principle that "it does not come with very good grace" for the wrongdoer to insist upon specific and certain proof of the injury which it has itself inflicted. Id.

In *Zenith Radio Corp. v. Hazeltine Research, Inc., supra*, the Supreme Court accepted the proposition that damages could be awarded under relaxed rules, on the basis of plaintiff's damage estimate. In doing so, it repeated that "in the absence of more precise proof, the factfinder may 'conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of **[**19]** the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs." In *Bigelow v. RKO Radio Pictures, Inc., supra*, the Supreme Court explained that "any other rule would enable the wrongdoer to profit by his wrongdoing at the expense of his victim" and that "failure to apply it would mean that the more grievous the wrong done, the less likelihood there would be of a recovery." *327 U.S. at 264-65*.

Therefore, ***HN5***[] to establish the amount of injury, plaintiffs need not establish their damages with "mathematical precision." *Cackling Acres, Inc. v. Olson Farms, Inc., 541 F.2d 242, 246 (10th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977)*. Plaintiffs need only provide such evidence that the jury is not left to "speculation or guesswork" in determining the amount of damages to award. *Bigelow v. RKO Radio Pictures, Inc., supra, 327 U.S. at 263-65*; *see also* *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. at 123-24*; *Moore v. Jas. H. Matthews & Co., 682 F.2d 830, 836 (9th Cir. 1982)* (study of cases in this area readily dispels any impression **[**20]** that question of damages is governed by application of common law rule of reasonable certainty; cases have long since departed from this rule in antitrust litigation); *Graphic Products Distributors, Inc. v. ITEK Corp., 717 F.2d 1560, 1579-80 (11th Cir. 1983)* (once antitrust violation and its causal relation to plaintiff's injury have been established, burden of proving amount of damages is much less severe). Once the existence of injury is established by direct evidence or inference from the character of a sustained conspiracy, the proof necessary to set the amount of damages need not be exact.

III. ANALYSIS

As noted above, in all three cases, the NCAA seeks partial summary judgment regarding (1) groups of individual coaches "for whom plaintiffs do not have and will not have evidence of impact"; (2) claims of any individual class

---

therein. In this case, plaintiffs have combined the "before-and-after" and "yardstick" approaches to project the compensation they would have attained absent the NCAA's anticompetitive activity.

Methodologies of this kind have been cited with approval by numerous courts. *See, e.g.*, *In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407, 422 (M.D. La. 1980)* (certifying class based on representations that impact of defendants' conspiracy could be shown by using at least one of four accepted methods, or a combination of these methods: comparing prices in different geographical regions, comparing prices and profits of conspirators versus non-conspirators, comparing prices in comparable markets, and comparing prices or profits before and after termination of the conspiracy); ***In re Domestic Air Transportation Antitrust Litigation, 137 F.R.D. 677, 689-90, 692 (N.D. Ga. 1991)*** (certifying 12.5 million member class where plaintiffs presented potential statistical methodologies for proving injury); *In re Corrugated Container Antitrust Litigation, 80 F.R.D. 244, 251-52 (S.D. Tex. 1978)* (class certified based on prediction that injury could be determined to a "reasonable degree of certainty" by "either of two generally accepted methodologies"); *In re Potash Antitrust Litigation, 159 F.R.D. 682, 697-98 (D. Minn. 1995)*.

member who failed to return a timely and accurate "Restricted Earnings Coach Information Sheet"; (3) claims of individuals who are not class members; (4) damages incurred after May 25, 1995, when the NCAA rescinded the salary cap which violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (5) damages representing a Consumer Price Index adjustment **[**21]** to plaintiff's base damage calculation; and (6) plaintiffs' claim for injunctive relief. We address each argument in turn.

A. Groups of individual coaches "for whom plaintiffs do not have and will not have evidence of impact"

The NCAA asserts that plaintiffs' expert methodology is "the only basis on which **[*930]** plaintiffs claim they can demonstrate the essential element of fact of injury for each class member"; that Dr. Tollison's report contains no individualized finding of damages for certain coaches; and that as to such coaches, defendant is entitled to summary judgment. According to the NCAA, coaches in this category include coaches for whom Dr. Tollison's final report contains no analysis or individualized finding of damages; coaches for whom Dr. Tollison's methodology finds "negative damages"; coaches whose academic year compensation was always less than $ 12,000; graduate assistant coaches whose pay was determined by the amount of graduate tuition at a particular institution; and coaches who did became restricted earnings coaches after the NCAA rescinded the Rule and who received more than $ 12,000 academic year compensation. According to the NCAA, plaintiffs do not have and **[**22]** will not have evidence of impact as to such coaches.

Dr. Tollison is the Duncan Black Professor of Economics and General Director of the Center for Study of Public Choice at George Mason University in Fairfax, Virginia. He earned his Ph.D. in Economics from the University of Virginia in 1969. His background and credentials are impressive, and his qualifications as an expert are undisputed. Plaintiffs claim that he has developed a methodology which is a scientifically valid way of demonstrating that the Rule had an impact on all three classes. More specifically, plaintiffs argue that Dr. Tollison's testimony will demonstrate "in the aggregate, that the REC Rule was a material or substantial factor causing injury to class members." Consistent with *Fed.R.Civ.P. Rule 26(a)(2)(B)*, Dr. Tollison afforded defendant a complete statement of the opinions which he intends to express and the reasons therefore, the data and other information which he considered in forming his opinions, and other necessary information.

Because of scheduling issues peculiar to this case, Dr. Tollison's compliance with *Rule 26(a)(2)(B)* was evidenced not by a single written report but by a series of reports which, **[**23]** read together, reveal the scope of his research and intended testimony. See Amended Preliminary Damage Report (February 20, 1997) [6]; Interim Damage Report (November 21, 1997); and Damage Report (January 19, 1998). [7] **[**25]** Dr. Tollison's opinion, as revealed in these reports, has two components. First, based on economic theory and common sense, Dr. Tollison first explains that the NCAA engaged in the exercise of monopsony power; that it singled out a class of specific coaches from whom to extract salary concessions; and that in doing so the NCAA injured members of the plaintiff class by reducing to $ 12,000 the compensation of restricted earnings coaches who had been earning more than $ 12,000 and exerting downward pressure on salaries of coaches below the $ 12,000 cap. See Declaration (April 3, 1997). Dr. Tollison then uses a statistical damage model to determine: (1) whether statistical data confirm his theoretical conclusions concerning the NCAA's cartel behavior and the injuries flowing therefrom; and (2) if so, the

---

[6] Dr. Tollison's original Damage Report was dated February 3, 1997. He amended it on February 5 and February 20, 1997.

[7] The NCAA's expert, John R. Umbeck, Ph.D., likewise authored a series of reports which reveal the scope of his research and intended testimony under ***Rule 26(a)(2)(B)***. See Expert Report (March 14, 1997), which critiqued the methodology proposed by Dr. Tollison's report of February 20, 1997; Affidavit of Dr. John R. Umbeck (February 2, 1998), which critiqued the methodology proposed by Dr. Tollison's report of January 19, 1998; and Expert Report (February 9, 1998).

On March 4, Dr. Tollison responded to Dr. Umbeck's critiques. See Declaration of Robert D. Tollison (April 3, 1997). The battle of the experts raged on as Dr. Umbeck countered with a critique of Dr. Tollison's critique. See Supplemental Affidavit of Dr. John R. Umbeck (April 16, 1997). Dr. Tollison also filed an affidavit in opposition to the instant motions for summary judgment. See Declaration of Robert D. Tollison (January 19, 1998).

amount of resulting damages which plaintiffs sustained. Based on that analysis, Dr. Tollison concludes that the damage model "work[s] well" and that it **[**24]** offers "a robust explanation of coaches' compensation, a statistically reliable estimate of the effect of coaches' age on compensation, and a sound basis for estimating what RECs would have been compensated but for the REC rule." Damage Report (January 19, **[*931]** 1998), at 7. According to Dr. Tollison, the analysis reveals that restricted earnings coaches on a classwide basis sustained actual damages in the amount of $ 32,764,579. This figure represents the sum of all damages sustained by coaches for whom plaintiffs' methodology predicts damages. For other coaches - those for whom Dr. Tollison's methodology predicts no damages - plaintiffs make no claim for compensation. [8]

In seeking summary judgment, the NCAA argues that plaintiffs' methodology is the only evidence on which they rely to demonstrate antitrust injury. In so arguing, the NCAA misreads or ignores the broader import of Dr. Tollison's testimony - and this fact is fatal to its argument. Dr. Tollison does not seek to prove the fact of antitrust injury "only" through statistical methodology; he uses the methodology to test his theoretical opinions about the manner in which the Rule depressed salaries for restricted earnings coaches, and also to calculate damages. Dr. Tollison's methodology is by no means the "only" basis for plaintiffs' claim of antitrust injury. Plaintiffs rely upon Dr. Tollison's economic expertise concerning the **[**26]** operation of cartels and price restraints, among other things, and established evidence concerning the formation, duration and operation of this conspiracy in particular. To the extent that plaintiffs rely on such evidence, independent of their expert methodology, the NCAA's motion misses the mark.

The NCAA's motion is also doomed by a plethora of disputed facts. It is perhaps true that class members sustained no injury if they always earned less than $ 12,000, before, during, and after the Rule went into effect. The NCAA makes a superficially appealing if simplistic argument that they did not. But Dr. Tollison's view is that the Rule exerted a downward ripple effect on salaries below the $ 12,000 cap, thus depressing the salaries of all coaches who were subject to the Rule. According to Dr. Tollison:

> Both economic theory and common sense suggest that plaintiff coaches were in a radically different bargaining environment after the imposition of the restrictions so that there is every reason to predict that RECs earning less than $ 12,000 were impacted by these restrictions. My damage methodology provides a way to assess the fact and amount of these damages.

Declaration **[**27]** of Dr. Robert D. Tollison (January 19, 1998), P8. As to class members who did became restricted earnings coaches after May 25, 1995, and who received more than $ 12,000 academic year compensation, the NCAA's position is similarly subject to dispute. While the NCAA's position may again have superficial appeal, Dr. Tollison's testimony is that the price-fixing conspiracy continued to depress salaries even after the NCAA's enforcement mechanism (the challenged bylaw) was rescinded. His opinion is as follows:

> The defendant . . . continues to argue that there were no damages to coaches after the National Collegiate Athletic Association ("NCAA") moved to "rescind" the REC compensation limitations on May 25, 1995. As I have discussed in my reports and prior declaration in more detail, I strongly disagree with this analysis. Cartels, especially cartels against labor, do not easily or quickly dissolve. Moreover, the NCAA's actions during this period do not suggest the dissolution of the REC cartel. These points are discussed in detail in my Amended Preliminary Damage Report cited above. For this reason, I think it is appropriate to calculate damages through 1996-97. My damage methodology **[**28]** will assign damages in this period if a coach's predicted pay exceeds his or her actual pay. Hence, it is entirely possible that coaches in the analogous REC position who were hired after May 25, 1995, and who were paid more than $ 12,000 were injured by the REC compensation limitations.

---

[8] Although the NCAA's seeks summary judgment regarding coaches for whom Dr. Tollison has prepared no analysis or individualized finding of damages, the ready answer is that plaintiffs do not seek damages for such coaches. The same is true for coaches for whom Dr. Tollison finds "negative damages." As to both categories, the NCAA's motion for partial summary judgment is moot.

[*932] Declaration of Dr. Robert D. Tollison (January 19, 1998), P9. These issues are not ones which can be resolved as a matter of law on this record. [9] As to such coaches, plaintiffs will indeed have evidence of impact, and the NCAA's motion for summary judgment on these issues must be overruled.

[29]** In Hall and Schreiber, the NCAA also seeks summary judgment concerning all class members who held positions that were created after August 1, 1992. This argument springs from Dr. Tollison's Amended Preliminary Damage Report of February 20, 1997. This aspect of defendant's motion is rendered moot by Dr. Tollison's final Damage Report dated January 19, 1998, and it is therefore overruled.

B. Claims of any individual class member who failed to return a "Restricted Earnings Coach Information Sheet"

In its order approving the form of notice to the class on June 11, 1997, the Court informed each class member that "if you remain a member of the Class and wish to have your claim for monetary damages considered, you must complete the enclosed Restricted Earnings Coach Information Sheet" [RECIS] no later than August 1, 1997. The NCAA argues that class members who failed to heed this directive by submitting timely and complete RECIS forms should be barred from relief: first, for disobeying the court's order, and second, because plaintiffs have no independent evidence of antitrust injury and damages for such individuals.

The NCAA's first argument is without merit. In **[**30]** circumstances such as these, ***HN6***[] the claims of absent class members in opt-out class actions cannot properly be dismissed for failure to return a questionnaire. To require them to complete and return a questionnaire, on the condition that failure to do so would result in dismissal from the lawsuit, would have the prohibited effect of requiring them to opt into the class and violate the opt-out policy of *Rule 23, Fed. R. Civ. P.* E.g., *Cox v. American Cast Iron Pipe Co., 784 F.2d 1546, 1556-57* (11th Cir.), *cert. denied*, *479 U.S. 883, 93 L. Ed. 2d 250, 107 S. Ct. 274 (1986)*; *Kline v. First Western Gov't Securities, Inc., 1996 U.S. Dist. LEXIS 3329*, *6, 1996 WL 122717, *2 (E.D. Pa. 1996); *McCarthy v. Paine Webber Group, 164 F.R.D. 309, 313 (D. Conn. 1995)*; *Abulaban v. R. W. Pressprich & Co., 51 F.R.D. 496, 497 (S.D.N.Y. 1971)*.

The NCAA's second argument is equally non-persuasive. Dr. Tollison provides independent evidence of antitrust injury and damages for such individuals by extrapolating damages from the vast universe of data from other sources, including the class members, NCAA member institutions and the NCAA itself. The NCAA disagrees with the extrapolations. But the points of disagreement merely **[**31]** identify factual issues which are for the jury - not the Court - to resolve.

C. Claims of individuals who are not class members

The NCAA claims that certain individuals who returned RECIS forms are outside any relevant class, and that it is entitled to summary judgment concerning their claims. Plaintiffs agree that the Court may properly enter summary judgment on the question of class membership, and the Court concurs. [11]

---

[9] Likewise, the NCAA's argument with respect to coaches whose pay was determined by graduate tuition must fail. While the NCAA's argument on this issue is not clear, it apparently insists that for graduate assistant coaches, their compensation was determined not by the Rule, but by the amount of graduate tuition at their respective institutions. This is the proverbial distinction without a difference. The Rule set alternative caps for the academic year: $ 12,000 or the cost of graduate tuition at the institution in question. The graduate tuition cap did not exist independently of the Rule; it merely placed the salary cap at a different level. The NCAA's argument that "there is no causal connection between the REC Rule and compensation to graduate assistant coaches" cannot be intelligently followed.

[11] By separate order, to which all parties have agreed, the Court determined that except for Doug Leichner, Greg Paradine and Brian Madeira, all individuals who were the subject of the NCAA's argument on summary judgment fall outside any relevant class. See Order Granting Partial Summary Judgment (Doc. # 813) entered April 16, 1998.

In Law, the NCAA seeks summary judgment on the claims of Doug Leichner. Leichner claims that he was a restricted **[*933]** earnings coach in mens' basketball at Central Connecticut State University. The University initially agreed, but later retracted its **[**32]** statement, insisting that "Doug Leichner was listed as a restricted earnings coach through error." In Hall, the NCAA seeks summary judgment on the claims of Brian Madeira - whose circumstances are similar to those of Leichner, except that Madeira worked in the women's basketball program at Syracuse University. Like Central Connecticut State University, Syracuse initially vouched that Madeira was a restricted earnings coach but later claimed that he was so listed "due to administrative error." The jury is entitled to judge for itself whether the universities got it right the first time or the second time. Both plaintiffs are entitled to the benefit of all favorable inferences, and defendant's motion for summary judgment on their claims must be overruled.

The NCAA also argues that it is entitled to summary judgment on the claims of Greg Paradine. Paradine was a restricted earnings coach at Ohio State University in 1993-94 and 1994-95, and the parties agree that he is a proper class member to that extent. Paradine later served as a coach at the University of North Carolina and - although he was not a *restricted earnings* coach at that school - he submitted a RECIS form for that **[**33]** school. Plaintiffs do not dispute the fact that Paradine was not a restricted earnings coach at UNC and the NCAA's motion for partial summary judgment on the issue of class membership should be sustained.

In Schreiber, the NCAA also seeks summary judgment on the claims of John Leudtke, a restricted earnings baseball coach at the University of Arkansas who received a special bonus of $ 10,356 from the Razorback Foundation -- just before the Rule went into effect. It also seeks summary judgment as to Robin Dreizler, a restricted earnings baseball coach at the University of California-Los Angeles who - for three years after the Rule went into effect - received $ 10,000 to $ 15,000 in annual compensation from Easton Sports Corporation. Defendant claims that Dreizler performed no services for Easton and that Dreizler -- like Leudtke -- suffered no financial loss on account of the Rule. As to Leudtke, the record reveals a genuine issue of material fact whether the Razorback payment was disguised compensation for coaching services or whether it was what it was purported to be -- a "career achievement bonus" for "extraordinary services" during his career as an assistant coach. As to Dreizler, **[**34]** the record reveals a genuine issue of material fact whether his agreement to perform services was a sham -- a conduit for disguised compensation for coaching services. Because both plaintiffs are entitled to the benefit of all favorable inferences, defendant's motion for summary judgment on their claims must be overruled.

D. Damages incurred after May 25, 1995, when the NCAA rescinded the salary cap which violated *Section 1* of the Sherman Act, *15 U.S.C. § 1*

The NCAA claims that it is entitled to summary judgment on all claims for damages which occurred after May 25, 1995, when the NCAA rescinded the Rule, because "the law is clear that an alleged co-conspirator (in this case, the NCAA) cannot be liable for damages occurring after it withdraws from a conspiracy." The NCAA reasons that any damage which occurred after May 25, 1995 was caused solely by the "unilateral decisions" of NCAA member institutions for which it cannot properly be held accountable. Plaintiffs respond that the NCAA's half-hearted announcement that it had rescinded the Rule was "a far cry from a cessation of the NCAA's anti-competitive conduct," and that it was legally insufficient to immunize the NCAA from **[**35]** liability for the full extent of its unlawful activity.

Plaintiffs correctly identify genuine issues of material fact which preclude summary judgment on this issue: whether the NCAA's action on May 25, 1995, constituted an effective "withdrawal" from the conspiracy and whether the NCAA's withdrawal (if it occurred) brought the price-fixing conspiracy to an end. Plaintiffs are entitled to the benefit of all favorable inferences on this subject, and on this record a jury might reasonably conclude that the effects of the Rule survived the Rule itself -- either because the NCAA and its members informally conspired after May 25, 1995 to maintain restricted earning coach salaries at noncompetitive **[*934]** levels, or because budget constraints, contractual commitments and other factors prevented salaries from promptly rebounding to competitive levels on May 26, 1995.

In addition, as to the law, the NCAA has it wrong. ***HN7***[] A conspirator is liable for damages which flow from its conspiracy, and such liability does not automatically cease when the conspirator ceases its anti-competitive conduct. A conspirator is liable for the damages caused by its unlawful conduct, even if they are sustained after the **[**36]** unlawful conduct ceases. See *In re Brand Name Prescription Drugs Antitrust Litigation, 123 F.3d 599, 616 (7th Cir. 1997)*, *cert. denied*, *__ U.S. __, 118 S. Ct. 1178 (1998)* (where conspirator withdraws from conspiracy by announcing withdrawal or reporting conspiracy to authorities, liability for *continuing illegal acts of other conspirators* ceases); *United States v. Andrus, 775 F.2d 825, 850 (7th Cir. 1985)* (once conspirator withdraws from conspiracy, his liability ceases as to *acts committed after his withdrawal by other conspirators*); *Pope v. Bond, 641 F. Supp. 489, 496 (D.D.C. 1986)* (under conspiracy law, co-conspirator may avoid liability for *subsequent conspiratorial acts* by withdrawing from conspiracy). Accordingly the NCAA is not entitled to summary judgment on this theory. [12]

E. Damages which represent a [37] Consumer Price Index adjustment to plaintiff's base damage calculation**

Citing *Locklin v. Day-Glo Color Corp., 429 F.2d 873, 876 (7th Cir. 1970)*, *cert. denied*, *400 U.S. 1020 (1971)*, the NCAA argues that Dr. Tollison cannot use the Consumer Price Index to adjust plaintiffs' damage figures to 1997 dollars, because "the automatic trebling of damages under § 4 of the Clayton Act more than compensates antitrust plaintiffs for the time value of [their] money." See also, *State of Colorado v. Goodell Brothers, Inc., 1987 U.S. Dist. LEXIS 14549, 1987 WL 6771*, *4 (D. Col. 1987) (holding without discussion, based on Locklin, that adjustment for inflation should not be allowed in antitrust action because damages trebled).

Citing *Multiflex, Inc. v. Samuel Moore & Co., 709 F.2d 980, 996 (5th Cir. 1983)*, *cert. denied*, *465 U.S. 1100, 80 L. Ed. 2d 126, 104 S. Ct. 1594 (1984)*, and *H.J., Inc. v. International Tel. & Tel. Corp., 867 F.2d 1531, 1549 (8th Cir. 1989)*, plaintiffs disagree. Plaintiffs contend that they are entitled to adjust their damage calculations to create a net present value for damages which they sustained in the past. In the Court's view, plaintiffs would have the better end of **[**38]** this argument [13] -- were it not for *15 U.S.C. § 15 (a)*, which none of the parties addressed in their summary judgment briefs. *Section 15* provides in pertinent part as follows:

> *§ 15*. Suits by persons injured
> (a) Amount of recovery; prejudgment interest
> . . . The court may award under this section, pursuant to a motion by such person promptly made, simple interest on actual damages for the period beginning on the date of service of such person's pleading setting forth a claim under the antitrust laws and ending on the date of judgment, or for any shorter period therein, if the court finds that the award of such interest for such period is just in the circumstances. In determining whether an award of interest under this section for any period is just in the circumstances, the court shall consider only--
> (1) whether such person or the opposing party, or either party's representative, made motions or asserted claims or defenses so lacking in merit as to show that such party or representative acted intentionally for delay, or otherwise acted in bad faith;
>
> (2) whether, in the course of the action involved, such person or the opposing party, or either party's representative, **[**39]** violated any applicable rule, statute, or court order providing for sanctions for dilatory behavior or otherwise providing for expeditious proceedings; and
>
> (3) whether such person or the opposing party, or either party's representative, engaged **[*935]** in conduct primarily for the purpose of delaying the litigation or increasing the cost thereof.

---

[12] This holding disposes of the NCAA Motion In Limine Objecting To Evidence Of Damages Incurred After May 25, 1995 (Doc. # 655) filed February 4, 1998.

[13] The Court is in substantial agreement with the criticisms of Locklin that are articulated by Judge Easterbrook, dissenting in *Fishman v. Estate of Wirtz, 807 F.2d 520, 582-84 (7th Cir. 1986)*.

Dr. Tollison has estimated damages by taking the predicted pay of each restricted earnings coach, and deducting his or her actual pay (adjusted to the age of the coach and further adjusted for inflation). Nominal damages are adjusted to 1997 dollars using the October 1997 Consumer Price Index (CPI).

On the summary judgment record, the Court cannot discern whether Dr. Tollison's CPI adjustment is different from an award of interest and if so, in what respect and to what **[**40]** extent. If the CPI adjustment is the economic equivalent of interest, plaintiffs' right to prejudgment interest would appear to be governed by *15 U.S.C. § 15(a)* - rather than the rationale articulated in Locklin or State of Colorado. Because the nature of Dr. Tollison's CPI adjustment remains unclear and because plaintiffs as non-moving parties are entitled to the benefit of all reasonable inferences in their favor, the NCAA's motion for summary judgment on this score must be denied. [14]

[41] F. Plaintiffs' claim for injunctive relief**

The NCAA argues that it is entitled to summary judgment on the question of injunctive relief because plaintiffs have "not one shred of evidence "that they or any class members are presently threatened with loss or damage from any action that the NCAA has taken or might take against them or that they or any class members are "threatened in a real and immediate sense with any injury by the NCAA's actions." Plaintiffs disagree, citing *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 697, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978)* for the proposition that the Court is not limited to enjoining future threats, but is "empowered to fashion appropriate restraints on the [] future activities both to avoid a recurrence of the violation and to eliminate its consequences."

On this record, while the prospect of a further antitrust violation does not appear to be real and immediate, it also cannot be said with clear conviction that the NCAA has abandoned its unlawful activity. Protestations of repentance and reform are conspicuously absent and plaintiffs may well receive an inadequate remedy if injunctive relief is not **[**42]** afforded. The relevant facts remain in dispute, however, and any determination on the summary judgment record would be premature. The parties have agreed that all issues which relate solely to injunctive relief may be reserved for trial to the Court at a later date, that resolution of this issue shall await that stage of the proceeding. See Order To Show Cause (Doc. # 707) filed March 13, 1998; Defendant's Response To The Court's Order To Show Cause Regarding A Separate Trial Of Plaintiffs' Motion For A Permanent Injunction (Doc. # 743) filed March 23, 1998.

IT IS THEREFORE ORDERED that except to the extent otherwise ordered in the Court's Order Granting Partial Summary Judgment (Doc. # 816) entered April 16, 1998, and except with respect to Greg Paradine in Hall, et al. v. National Collegiate Athletic Association, Case No. 94-2392, defendant's Motion For Partial Summary Judgment (Doc. # 613) in Law, et al, v. National Collegiate Athletics Association, Case No. 94-2053, be and hereby is overruled; defendant's Motion For Partial Summary Judgment (Doc. # 91) in Hall, et al. v. National Collegiate Athletics Association, Case No. 94-2392, be and hereby **[**43]** is overruled; and defendant's Motion For Partial Summary Judgment (Doc. # 41) in Schreiber, et al. v. National Collegiate Athletics **[*936]** Association, Case No. 95-2026, be and hereby is overruled.

IT IS HEREBY FURTHER ORDERED that defendant's Motion For Partial Summary Judgment (Doc. # 91) in Hall, et al. v. National Collegiate Athletics Association, Case No. 94-2392, be and hereby is sustained to the limited

---

[14] In itself, this ruling does not dispose of the NCAA Motion In Limine Objecting To Evidence Of Consumer Price Index Adjustment (Doc. # 655) filed February 4, 1998. On April 14, 1998, however, the Court conducted a brief evidentiary hearing outside the presence of the jury. At that time Dr. Tollison explained his calculations with respect to the CPI and how his CPI adjustment differs from interest. At the hearing, the parties agreed that plaintiffs' right to a CPI adjustment is an issue which is properly bifurcated and tried to the Court at an appropriate time after the jury trial on the issues of damages. Consequently, the Court will later determine whether the CPI adjustment is the functional equivalent of pre-judgment interest and is thus governed by *15 U.S.C. § 15(a)*. See *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 986 n. 20 (5th Cir. 1977)*. The NCAA's motion in limine is rendered moot by the parties' agreement to proceed in this manner.

extent that the Court finds as a matter of law that Greg Paradine is not a member of the plaintiff class for periods when he served as a coach at the University of North Carolina in 1995-96 and 1996-97.

IT IS HEREBY FURTHER ORDERED that Plaintiffs' Motion In Limine To preclude Evidence Or Argument Concerning Impact Or Fact Or Damage To The Class (Doc. # 661) filed February 4, 1998, be and hereby is overruled.

IT IS HEREBY FURTHER ORDERED that the NCAA Motion In Limine Objecting To Evidence Of Damages Incurred After May 25, 1995 (Doc. # 655) filed February 4, 1998, be and hereby is overruled.

IT IS HEREBY FURTHER ORDERED that the NCAA Motion In Limine Objecting To Evidence Of Consumer Price Index Adjustment (Doc. # 655), be and **[**44]** hereby is overruled as moot.

Dated this 20th day of April, 1998, at Kansas City, Kansas.

Kathryn H. VRATIL

United States District Judge

Earles v. State Bd. of Certified Pub. Accountants

United States Court of Appeals for the Fifth Circuit

April 24, 1998, Decided

No. 97-30159

HN4[ ] State Sovereign Immunity, Federal Judicial Limitations

U.S. Const. amend. XI thus negates federal jurisdiction over covered suits, including federal suits against a state brought by the citizens of that state. The scope of U.S. Const. amend. XI, however, is not limited to suits that name a state as a defendant. U.S. Const. amend. XI bars any suit in which a state is the real, substantial party in interest.

HN5[ ] State Sovereign Immunity, State Immunity

State agencies are immunized by U.S. Const. amend. XI in certain circumstances. Simply being a political subdivision of a state, however, is not enough. The court must look to see whether the entity in effect, stands in the shoes of the state itself. The matter is determined by reasoned judgment about whether the lawsuit is one which, despite the presence of a state agency as the nominal defendant, is effectively against the sovereign state. In determining whether a given state agency operates as an arm of the state, the court takes many factors into account, including: (1) whether the state, through statutes or case law, views the entity as an arm of the state; (2) the source of the entity's funding; (3) whether the entity is concerned with local or statewide problems; (4) the entity's degree of authority independent from the state; (5) whether the entity can sue and be sued in its own name; and (6) whether the entity has the right to hold and use property.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

HN8[] Antitrust & Trade Law, Regulated Industries

The state-action doctrine has been construed to exempt both state agencies and private individuals from liability for activities that might otherwise violate federal ***antitrust law***. When the exemption is invoked by a defendant other than the state, however, the allegedly anticompetitive activity is subjected to greater scrutiny before state-action immunity is granted. In most cases, two criteria must generally be satisfied: (1) the alleged anticompetitive conduct must have been taken pursuant to a clearly articulated and affirmatively expressed state policy to displace competition with state regulation; and, (2) the state must actively supervise the implementation of its policy. Some defendants are not subject to both prongs of review. Municipalities are exempted from the active-supervision prong of the test.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN9[] Exemptions & Immunities, Parker State Action Doctrine

In order to take advantage of the state-action exemption, the defendants must simply demonstrate that they acted pursuant to state policy to displace competition with regulation or monopoly public service that was clearly articulated and affirmatively expressed. Courts have rejected the contention that this requirement can be met only if the delegating statute explicitly permits the displacement of competition. It is enough if suppression of competition is the "foreseeable result" of what the statute authorizes.

Governments > State & Territorial Governments > Licenses

HN10[] State & Territorial Governments, Licenses

See *La. Rev. Stat. Ann. § 37:75(A)*.

Governments > State & Territorial Governments > Licenses

HN11[] State & Territorial Governments, Licenses

See *La. Rev. Stat. Ann. § 37:75(B)*.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN12[] Exemptions & Immunities, Parker State Action Doctrine

As long as the state clearly articulates its intent to adopt a permissive policy, the first prong of the test for the Parker state-action doctrine is satisfied.

Opinion

[*1034] DEMOSS, Circuit Judge:

Rules promulgated by **[**2]** the State Board of Certified Public Accountants of Louisiana prohibit CPAs from accepting commissions and engaging in the practice of so-called "incompatible professions." These rules apply to

Louisiana's CPAs and have been used to prevent the three plaintiffs in this lawsuit from carrying out their accounting practices while simultaneously selling securities. The plaintiffs sued the Board and its individual members, seeking to block the enforcement of these rules.

The defendants filed a motion to dismiss the lawsuit, claiming immunity from suit (1) under the *Eleventh Amendment* and (2) under the state-action exemption doctrine of federal antitrust laws. The motion was denied, and the defendants now seek interlocutory review. The Board is entitled to *Eleventh Amendment* immunity; however, the federal claims against the Board's individual members may proceed under the doctrine of ***Ex parte Young**, 209 U.S. 123, 52 L. Ed. 714, 28 S. Ct. 441 (1908)*. Finally, the state-action doctrine does block scrutiny of the Board's rules under federal antitrust laws. Accordingly, we affirm in part, reverse in part, and remand the matter with instructions for further proceedings in the district **[**3]** court.

I. Factual and Procedural Background

A. *The Plaintiffs*

Kenneth Don Earles, a CPA, has practiced as an accountant in Crowley, Louisiana since 1969. Beginning in 1987, he obtained the licenses necessary to become a securities **[*1035]** broker and began practicing as a broker-dealer licensed with H.D. Vest Investment Securities, Inc. Mr. Earles earns commissions from his sales of securities. His securities business is kept separate from his accounting business, with separate books, records, and bank accounts.

In October 1988, the Board of Certified Public Accountants of Louisiana notified Mr. Earles that it considered his practice of concurrently acting as a CPA and a securities broker to be a violation of the Board's rules pertaining to "incompatible occupations" [1] **[**4]** and "receipt of commissions." [2] A series of communications ensued between the Board and Mr. Earles, culminating in a March 1990 administrative hearing on the Board's complaint.

In August 1990, the Board issued its decision finding Mr. Earles in violation of the rule proscribing the practice of incompatible occupations. Mr. Earles's future certification and licensure as a CPA were expressly conditioned upon cessation of his securities business. Mr. Earles responded by filing this lawsuit against the Board and its individual members in federal court. He also sought judicial review of the Board's decision in state court. The federal suit was stayed pending state-court review. [3] In state court, the Board's ruling was initially overturned but later reinstated on

---

[1] ***HN1***[] The incompatible occupations rule provides:

> A licensee shall not concurrently engage in the practice of public accountancy and in any other business or occupation which impairs his independence or objectivity in rendering professional services, or which is conducted so as to augment or benefit the accounting practice, unless these rules are observed in the conduct thereof.

LA. ADMIN. CODE tit. 46, § XIX.501(E) (Sept. 1997) <*www.state.la.us/osr/lac/lac.htm>*.

[2] ***HN2***[] The rule against receiving commissions provides:

> A licensee shall not pay a commission to obtain a client or accept a commission for a referral to a client of products or services of others. This rule does not prohibit payments for the purchase of all, or a part, of an accounting practice, or retirement payments to persons formerly engaged in the practice of public accountancy, or payments to the heirs or estates of such persons.

LA. ADMIN. CODE tit. 46, § XIX.501(C) (Sept. 1997) <*www.state.la.us/osr/lac/lac.htm>*.

[3] *See* ***Earles v. State Bd. of Certified Pub. Accountants**, 1992 U.S. Dist. LEXIS 693, 1992 WL 10329* (E.D. La. Jan. 16, 1992) (abstaining from further proceedings pursuant to the doctrine of ***Railroad Comm'n v. Pullman Co.**, 312 U.S. 496, 85 L. Ed. 971, 61 S. Ct. 643 (1941))*.

appeal. *See* ***Earles v. State Bd. of Certified Pub. [**5] Accountants**, 665 So. 2d 1288 (La. Ct. App. 1995)*, *writ denied*, *669 So. 2d 397 (La. 1996)*.

In August 1996, after Mr. Earles had exhausted his remedies in state court, the federal suit was reactivated. Soon thereafter, two additional plaintiffs joined the suit -- Albert R. Leger, who had practiced as a CPA in Marksville, Louisiana since 1975, and Joseph Michael Sledge, who had practiced as a CPA in Shreveport, Louisiana since 1975. Like Mr. Earles, both Mr. Leger and Mr. Sledge are licensed securities brokers affiliated with H.D. Vest. Each also keeps his securities-related business separate from his accounting practice. In January 1997, Mr. Leger and Mr. Sledge were found by the Board to be guilty of violating the rules against practicing incompatible **[**6]** professions and receiving commissions. They were each fined, and their accounting licenses were revoked.

B. *The Defendants*

The defendants in this lawsuit are the Board of Certified Public Accountants of Louisiana and its individual members in their official capacities. The Board was created by the State of Louisiana for the purpose of licensing public accountants and regulating the profession of public accounting within the state. *See* *LA. REV. STAT. ANN. §§ 37:73*, *37:75* (West 1988 & Supp. 1998). The Board's seven members are chosen by the governor from a slate of candidates proposed by the Society of Louisiana Certified Public Accountants, and they must be confirmed by the state senate. *See* ***id*.** *§ 37:73* (West 1988).

Among the powers of the Board is the ability to "adopt and enforce all rules and regulations, bylaws, and rules of professional conduct as the board may deem necessary and proper to regulate the practice of public accounting in the state of Louisiana." ***Id*.** **[*1036]** *§ 37:75(B)(2)*. Pursuant to this power, the Board adopted the incompatible-occupations and receipt-of-commissions rules which gave rise to this lawsuit. [4]

[7] II. Appellate Jurisdiction**

Pursuant to our precedent applying *28 U.S.C. § 1291* and the collateral order doctrine, [5] **[**8]** we have appellate jurisdiction to consider an interlocutory appeal from the denial of a motion to dismiss based upon immunities bestowed by the *Eleventh Amendment* and the state-action antitrust exemption. *See* ***Puerto Rico Aqueduct & Sewer Auth. v. Metcalf & Eddy, Inc.**, 506 U.S. 139, 147, 121 L. Ed. 2d 605, 113 S. Ct. 684 (1993)* (denial of *Eleventh Amendment* immunity is subject to interlocutory review); ***Martin v. Memorial Hosp.**, 86 F.3d 1391 (5th Cir. 1996)* (denial of the state-action exemption is subject to interlocutory review). [6]

III. *Eleventh Amendment* Immunity

---

[4] The purported justification for these rules is the preservation of the independence of CPAs. The Supreme Court has acknowledged that a state's interest in "maintaining CPA independence and ensuring against conflicts of interest" is a substantial one. ***Edenfield v. Fane**, 507 U.S. 761, 770, 123 L. Ed. 2d 543, 113 S. Ct. 1792 (1993)*.

[5] *See* ***Coopers & Lybrand v. Livesay**, 437 U.S. 463, 468, 57 L. Ed. 2d 351, 98 S. Ct. 2454 (1978)* ("To come within the 'small class' of decisions excepted from the final-judgment rule by ***Cohen*** [***v.*** ***Beneficial Indus. Loan Corp.**, 337 U.S. 541, 93 L. Ed. 1528, 69 S. Ct. 1221 (1949)]*, the order must conclusively determine the disputed question, resolve an important issue completely separate from the merits of the action, and be effectively unreviewable on appeal from a final judgment.").

[6] At oral argument, the plaintiffs conceded that ***Martin*** controls the question of appellate jurisdiction over the state-action element of this case. They urged our panel to overrule ***Martin***, but this is not an option available to us. It has been well established in this circuit that one panel may not ignore the holding of a previous panel absent intervening authority from the Supreme Court, an en banc decision of our Court, or Congress. *See, e.g.*, ***Okoro v. INS**, 125 F.3d 920, 925 (5th Cir. 1997)*.

HN3[] The United States Constitution provides: "The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State." *U.S. CONST. amend. XI*. **HN4**[] The *Eleventh Amendment* thus negates federal jurisdiction over covered suits, including federal suits against a state brought by the citizens of that state. *See* ***Hans v. Louisiana**, 134 U.S. 1, 33 L. Ed. 842, 10 S. Ct.* ***[**9]*** *504 (1890)*.

Of course, the Board and its members are not the state itself. The scope of the *Eleventh Amendment*, however, is not limited to suits that name a state as a defendant. *See, e.g.*, ***Regents of the Univ. of Cal. v. Doe**, 519 U.S. 425, 117 S. Ct. 900, 903, 137 L. Ed. 2d 55 (1997)*. The *Eleventh Amendment* bars any suit in which a state is the "real, substantial party in interest." ***Pennhurst State Sch. & Hosp. v. Halderman**, 465 U.S. 89, 101, 79 L. Ed. 2d 67, 104 S. Ct. 900 (1984)*; *see also* ***Ford Motor Co. v. Department of Treasury**, 323 U.S. 459, 464, 89 L. Ed. 389, 65 S. Ct. 347 (1945)*. We must thus decide whether the Board and its members satisfy this standard and thereby avoid suit.

A. *The Board*

The Board claims that because it is a "state agency," LA. STAT. REV. ANN. *§ 37:73(A)* (West Supp. 1998), it is entitled to *Eleventh Amendment* immunity. Federal law controls the Board's eligibility for *Eleventh Amendment* immunity. *See* ***Doe**, 117 S. Ct. at 904 n.5*. **HN5**[] State agencies are immunized by the *Eleventh Amendment* in certain circumstances. *See, e.g.*, ***Pennhurst**, 465 U.S. at 100*; ***Papasan v. United States**,* ***[**10]*** *756 F.2d 1087, 1092 (5th Cir. 1985)*, *aff'd in part, vacated in part sub nom.* ***Papasan v. Allain**, 478 U.S. 265, 92 L. Ed. 2d 209, 106 S. Ct. 2932 (1986)*. Simply being a political subdivision of a state, however, is not enough. *See* ***Edelman v. Jordan**, 415 U.S. 651, 667 n.12, 39 L. Ed. 2d 662, 94 S. Ct. 1347 (1974)*. We must look to see whether the entity "in effect, stands in the shoes of the state itself." ***Hander v. San Jacinto Junior College**, 519 F.2d 273, 278* (5th Cir.), *modified on other* **[*1037]** *grounds*, *522 F.2d 204 (5th Cir. 1975)*; *see also* ***Mt. Healthy City Sch. Dist. Bd. of Educ. v. Doyle**, 429 U.S. 274, 280, 50 L. Ed. 2d 471, 97 S. Ct. 568 (1977)* (entity must be an "arm of the state"); ***Voisin's Oyster House, Inc. v. Guidry**, 799 F.2d 183, 186 (5th Cir. 1986)* (entity must be an "alter ego" of the state). Our analysis must consider the particular nature of the entity, including its powers and duties, the nuances of its organizational structure, and its interrelationship with other organs of the state. *See, e.g.*, ***Mt. Healthy**, 429 U.S. at 280*; ***Jacintoport Corp. v. Greater Baton Rouge Port Comm'n**, 762 F.2d* ***[**11]*** *435, 438 (5th Cir. 1985)*, *cert. denied*, *474 U.S. 1057, 88 L. Ed. 2d 774, 106 S. Ct. 797 (1986)*; ***Laje v. R.E. Thomason Gen. Hosp.**, 665 F.2d 724 (5th Cir. 1982)*; ***United Carolina Bank v. Board of Regents of Stephen F. Austin State Univ.**, 665 F.2d 553, 557 (5th Cir. Unit A 1982)*.

There is no simple litmus test that determines whether a state agency is an "arm of the state" for the purposes of *Eleventh Amendment* immunity. Rather, the matter is determined by reasoned judgment about whether the lawsuit is one which, despite the presence of a state agency as the nominal defendant, is effectively against the sovereign state. In determining whether a given state agency operates as an "arm of the state," our Court has taken many factors into account, including: (1) whether the state, through statutes or case law, views the entity as an arm of the state; (2) the source of the entity's funding; (3) whether the entity is concerned with local or statewide problems; (4) the entity's degree of authority independent from the state; (5) whether the entity can sue and be sued in its own name; and (6) whether the entity has the right to hold and use property. *See, e.g.*, **[**12]** ***Voisin's Oyster House**, 799 F.2d at 186-87*; ***Clark v. Tarrant County**, 798 F.2d 736, 744-45 (5th Cir. 1986)*; ***Jacintoport**, 762 F.2d at 438-40*; ***United Carolina Bank**, 665 F.2d at 557-58*; ***Huber, Hunt & Nichols, Inc. v. Architectural Stone Co.**, 625 F.2d 22, 24-25 (5th Cir. 1980)*. Considering these factors, we conclude that a suit against the Board is, in effect, a suit against the State of Louisiana.

1. *The state's view.* -- First, we consider the Board's place in the overall scheme of Louisiana government. The Board is "a state agency within the Department of Economic Development." LA. STAT. REV. ANN. *§ 37:73(A)* (West Supp. 1998). The Department of Economic Development is a department of the executive branch of the government of Louisiana. *See* ***id.*** §§ 36:3, 36:4 (West 1985 & Supp. 1998). In this situation, it appears that Louisiana would regard the Board as part of the state. We are compelled to draw this conclusion by our disposition in ***Voisin's Oyster House, Inc. v. Guidry**, 799 F.2d 183 (5th Cir. 1986)*. There, as here, the entity in question was a subdivision of a department of the executive branch. Our Court **[**13]** reasoned:

> According to Louisiana statutes, the Department is a part of the executive branch of the state government, *LA. REV. STAT. ANN. § 36:4* (West 1985), and the Commission is part of the Department. *LA. REV. STAT. ANN. § 36:610* (West 1985). In its statutes, ***HN6***[] Louisiana treats all executive departments the same, *LA. REV. STAT. ANN. § 36:4(A)*, and provides that "no suit against the state or a state agency or political subdivision shall be instituted in any court other than a Louisiana state court." *LA. REV. STAT. ANN. § 13:5106(A)* (West Supp. 1986). *See* ***Fireman's Fund Insurance Co. v. Department of Transportation and Development**, 792 F.2d 1373 (5th Cir.1986)* (holding that a similar executive department had *Eleventh Amendment* immunity and implying that all Louisiana executive departments have such immunity). The Louisiana Supreme Court has held "if the office is created by the legislature, or is established in the first instance by the constitution, it is a state office." ***Mullins v. Louisiana**, 387 So. 2d 1151, 1152 (La. 1980)*. The Department was created by the state legislature, *LA. REV. STAT. ANN. § 36:601*, and, therefore, the Louisiana courts would **[**14]** view the Department as part of the state.

Voisin's Oyster House**, 799 F.2d at 186* (alterations in original). The circumstances encountered in ***Voisin's Oyster House pertaining to that entity's place in Louisiana government are substantially identical to the present case, and we therefore conclude that **[*1038]** this factor weighs in favor of *Eleventh Amendment* immunity.

2. *Source of the entity's funding.* -- Next, we consider the source of the Board's funding. In this case, the Board is financially independent from the state. The Board is funded solely by fees collected from accountants. *See* *LA. REV. STAT. ANN. §§ 37:80*, *37:82* (West 1988 & Supp. 1998); LA. ADMIN. CODE tit. 46, §§ XIX.1911, .2101, .2501 (Sept. 1997) <*www.state.la.us/osr/lac/lac.htm>*. Moreover, statutes and regulations prohibit the Board from resorting to state coffers for funding. *See* *LA. REV. STAT. ANN. § 37:76* (West 1988) ("No expenses incurred by the board shall ever be charged to or against the funds of the state of Louisiana."); ***id.*** *§ 37:75(B)(8)* ("The Board may . . . employ legal counsel to carry out the provisions of this Chapter, provided that the fees of such counsel **[**15]** and the costs of all proceedings, except criminal prosecutions, are paid by the board from its own funds . . . ."); LA. ADMIN. CODE tit. 46, § XIX.903 (Sept. 1997) <*www.state.la.us/osr/lac/lac.htm>* ("The compensation of board members and all other necessary expense incurred by the board . . . shall be paid out of the treasury of the board."). Thus, the Board is financially independent, and there is no threat that Louisiana will pay money damages to a citizen pursuant to a judgment obtained in federal court. Our examination of this factor weighs against a finding of *Eleventh Amendment* immunity for the Board.

3. *Scope of the entity's responsibilities.* -- The Board is concerned with regulating the practice of public accounting on a statewide, rather than local, scale. *See* *LA. REV. STAT. ANN. § 37:75* (West 1988 & Supp. 1998). This factor favors *Eleventh Amendment* immunity for the Board.

4. *Independence from the state.* -- The Board exercises considerable authority independent from the state. The Board has the power to "adopt and enforce all rules and regulations, bylaws, and rules of professional conduct as the board may deem necessary and proper to regulate **[**16]** the practice of public accounting in Louisiana, to provide for the efficient operation of the board, and to otherwise discharge its duties and powers." *LA. REV. STAT. ANN. § 37:75(B)(2)* (West 1988). The legislature may review proposed rule changes. *See* ***id.*** *§ 49:968* (West 1987 & Supp. 1998). In the usual case (such as the adoption of the rules at the heart of this lawsuit), however, the Board's proposed rule changes simply take effect without any legislative consideration or action whatsoever. *See* ***id.*** *§ 49:968(H)(1)* (if the legislature fails to act on proposed rule changes, the rule may be adopted ninety days after notice is published in the State Register). This factor cuts against *Eleventh Amendment* immunity.

5. *Capacity to sue and be sued.* -- The Board has a limited capacity to sue and be sued. *See, e.g.*, *LA. REV. STAT. ANN. §§ 49:963-:965* (West 1987 & Supp. 1998) (authorizing judicial review of Board actions). The Board's power to sue and be sued is not established as plainly as for other similarly situated state agencies in Louisiana. *See, e.g.*, ***id.*** § 37:1393(A) (West Supp. 1998) (State Licensing Board for Locksmiths "may sue **[**17]** and be sued"); ***id.*** § 37:3273(A) (West 1988) (Louisiana State Board of Private Security Examiners "may sue and be sued"). The Board does, however, have some power to "sue and be sued" insofar as it has the power to litigate as an independent party. *See, e.g.*, ***State Bd. of Certified Pub. Accountants v. Donnelly**, 688 So. 2d 127* (La. Ct. App.), *writ denied*, *694 So. 2d 247 (La. 1997)*. Ultimately, this is not a case in which the state has granted "express authority to 'sue and be sued, plead and be impleaded'" in the entity's own name, ***Huber, Hunt & Nichols**, 625 F.2d at 25* (quoting ***Hopkins v. Clemson Agric. College**, 221 U.S. 636, 646, 55 L. Ed. 890, 31 S. Ct. 654 (1911))*, so this factor lends slight guidance to our *Eleventh Amendment* immunity inquiry.

6. *Right to hold and use property.* -- The parties have presented conflicting views as to whether the Board has the right to hold and use property. There is no express statutory grant of such power to the board. But on the other hand, the powers that are granted to the Board are so broad that they arguably encompass the right to hold and use property. *See, e.g.*, *LA. REV. STAT. ANN.* ***[**18]*** *§ 37:75(B)(9)* (West 1988) ("The board may . . . incur all necessary and proper expenses . . . ."). Because **[*1039]** of this statutory ambiguity, this factor again has little effect on our analysis.

In sum, when we evaluate the mixed indications given by the various factors discussed above, we are led to the conclusion that the Board is entitled to immunity. The question is a close one, but ultimately we are persuaded by the legislature's broad grant of power to a state agency (composed of members who are appointed by serve at the pleasure of the governor) charged with carrying out the governmental function of regulating the practice of public accounting on a statewide basis. We therefore conclude that the Board is entitled to *Eleventh Amendment* immunity.

B. *Individual Members of the Board*

Though the Board itself is eligible for *Eleventh Amendment* immunity, it does not follow that the members of the Board may claim immunity for their official actions. The doctrine of ***Ex parte Young**, 209 U.S. 123, 52 L. Ed. 714, 28 S. Ct. 441 (1908)*, precludes the individual Board members' claims of *Eleventh Amendment* immunity.

The rule of ***Ex parte Young*** has been traditionally **[**19]** viewed as establishing that ***HN7***[] a "federal court is not barred by the *Eleventh Amendment* from enjoining state officers from acting unconstitutionally, either because their action is alleged to violate the Constitution directly or because it is contrary to a federal statute or regulation that is the supreme law of the land." 17 CHARLES ALAN WRIGHT, ET. AL, FEDERAL PRACTICE AND PROCEDURE, § 4232 (2d ed. 1988). Since the filing of the briefs in this case, the Supreme Court has handed down its decision in ***Idaho v. Coeur d' Alene Tribe**, 117 S. Ct. 2028, 138 L. Ed. 2d 438 (1997)*. That decision, despite its disclaimer of intent to "question the continuing validity of the ***Ex parte Young*** doctrine," ***Coeur d' Alene**, 117 S. Ct. at 2034*, casts some doubt upon previous conventional wisdom in this area.

The Fifth Circuit has not yet had the opportunity to consider the effect of ***Coeur d'Alene***, though several other circuits have. *See* ***Doe v. Lawrence Livermore Nat'l Lab.**, 131 F.3d 836, 839 (9th Cir. 1997)*; ***Marie O. v. Edgar**, 131 F.3d 610, 616 n.10, 617 n.13 (7th Cir. 1997)*; ***Strahan v. Coxe**, 127 F.3d 155, 166-67 (1st Cir. 1997)*, *petition for cert. filed*, **[**20]** *66 U.S.L.W. 3605* (U.S. Mar 6, 1998) (No. 97-1485); ***Sofamor Danek Group, Inc. v. Brown**, 124 F.3d 1179, 1183-85 (9th Cir. 1997)*; ***Mille Lacs Band of Chippewa Indians v. State of Minn.**, 124 F.3d 904, 913-14 (8th Cir. 1997)*, *petition for cert. filed*, *141 L. Ed. 2d 156, 1998 U.S. LEXIS 3866 (U.S. 1998)* (No. 97-1337). We concur with the consensus among other courts that although the principal opinion in ***Coeur d'Alene*** suggests a case-by-case (rather than rule-based) approach to the application of ***Ex parte Young***, *see* ***Coeur d' Alene**, 117 S. Ct. at 2038-40* (opinion of Kennedy, J.), this part of the opinion did not muster a majority, and a majority of the Court would continue to apply the rule of ***Ex parte Young*** as it has been traditionally understood, *see* ***id** at 2047* (O'Connor, J., concurring in part and concurring in the judgment (joined by Scalia and Thomas, JJ.)); ***id**. at 2048* (Souter, J., dissenting (joined by Stevens, Ginsburg, and Breyer, JJ.)).

The rule of ***Ex parte Young*** empowers the federal courts to grant the prospective injunctive relief sought by the plaintiffs if the rules challenged in this case do indeed **[**21]** violate federal law. The plaintiffs' state-law claims, however, are not cognizable in a proceeding under ***Ex parte Young*** because state officials continue to be immunized from suit in federal court on alleged violations of state law brought under the federal courts' supplemental jurisdiction. *See* ***Pennhurst**, 465 U.S. at 103-21*; *see also* ***Papasan v. Allain**, 478 U.S. 265, 277, 92 L. Ed. 2d 209, 106 S. Ct. 2932 (1986)*; ***Oneida County v. Oneida Indian Nation**, 470 U.S. 226, 251, 84 L. Ed. 2d 169, 105 S. Ct. 1245 (1985)*; ***Hays County Guardian v. Supple**, 969 F.2d 111, 125 (5th Cir. 1992)*, *cert. denied*, *506 U.S. 1087, 122 L. Ed. 2d 371, 113 S. Ct. 1067 (1993)*. The ***Ex parte Young*** doctrine promotes federal sovereignty, but is limited by the constitutional immunity granted to the states by the *Eleventh Amendment*. *See* ***Pennhurst**, 465 U.S. at 105-06*. It therefore does not serve to subject state officials to suit in federal court over alleged violations of state law, as that result does not advance the **[*1040]** concerns of ***Ex parte Young*** and also "conflicts directly with the principles of federalism that underlie the *Eleventh Amendment*." **[**22]** ***Id.** at 106*. The availability of the supplemental jurisdiction statute does not change this result because that rule arises merely from "a judge-made doctrine of expediency and efficiency derived from the general Art. III language conferring power to hear all 'cases' arising under federal law or between diverse parties." ***Id.** at 120* (citing ***United Mine Workers v. Gibbs**, 383 U.S. 715, 725, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966))*.

Thus, the plaintiffs' suit may proceed against the individual members of the Board under the doctrine of ***Ex parte Young***, but the limitations of the doctrine require that the plaintiffs' state-law claims be dismissed upon remand.

IV. State Action Exemption

We now turn to the defendants' state-action defense. The state-action exemption from federal antitrust liability was first recognized in the case of ***Parker v. Brown**, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. State action is properly treated as an immunity from suit, [7] and therefore our review of the district court's pretrial rejection of a state-action exemption is appropriate. [8] We begin, as do all of the Supreme Court's opinions on **[**23]** state action, [9] with a look back to ***Parker***'s first principles.

[24]** In ***Parker***, the Court considered the legal effect of the California Agricultural Prorate Act. The California statute permitted regulations -- or as they were called, a "marketing program" -- designed to protect the raisin industry. One effect of this program was that the freedom of raisin producers to sell their crops in interstate commerce was seriously restricted. *See* ***Parker**, 317 U.S. at 344-49*. The program was challenged under the Sherman Act. The Supreme Court decided that Congress, in enacting federal antitrust legislation, had not intended to preempt economic regulation by the states. The central holding of ***Parker*** was that the Sherman Act does not "restrain a state or its officers or agents from activities directed by its legislature." ***Id.** at 350-51*. The Court expressly rested its analysis on federalism principles:

---

Louisiana Power & Light Co.**, 435 U.S. 389, 408-09, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*; ***Bates v. State Bar**, 433 U.S. 350, 359, 53 L. Ed. 2d 810, 97 S. Ct. 2691 (1977)*; ***Cantor v. Detroit Edison Co.**, 428 U.S. 579, 585-91, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*; ***Goldfarb v. Virginia State Bar**, 421 U.S. 773, 788, 44 L. Ed. 2d 572, 95 S. Ct. 2004 (1975)*.

> In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

Id. *at 351*. **[**25]** ***HN8***[]

The ***Parker*** state-action doctrine has been construed to exempt both state agencies and private individuals from liability for activities that might otherwise violate federal ***antitrust law***. *See, e.g.*, ***Southern Motor Carriers Rate Conference, Inc. v. United States****, 471 U.S. 48, 56-57, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*. When the ***Parker*** exemption is invoked by a defendant other than the state, however, the allegedly anticompetitive **[*1041]** activity is subjected to greater scrutiny before state-action immunity will be granted. *See* ***Hoover v. Ronwin****, 466 U.S. 558, 569, 80 L. Ed. 2d 590, 104 S. Ct. 1989 (1984)*. In most cases, two criteria must generally be satisfied: (1) the alleged anticompetitive conduct must have been taken pursuant to a clearly articulated and affirmatively expressed state policy to displace competition with state regulation; and, (2) the state must actively supervise the implementation of its policy. *See* ***California Retail Liquor Dealers Ass'n v. Midcal Aluminum****, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*; ***DFW Metro Line Servs. v. Southwestern Bell Tel., Corp.****, 988 F.2d 601, 605* (5th Cir.), *cert.* **[**26]** *denied*, *510 U.S. 864, 126 L. Ed. 2d 142, 114 S. Ct. 183 (1993)*; PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** P 212.1a (Supp. 1997). This two-pronged review is commonly known as the ***Midcal*** test.

Some defendants are not subject to both prongs of ***Midcal*** review. In ***Town of Hallie v. City of Eau Claire****, 471 U.S. 34, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)*, the Supreme Court exempted municipalities from the active-supervision prong of the ***Midcal*** test. *See* ***Town of Hallie****, 471 U.S. at 46-47*. The Court distinguished municipalities from other defendants subjected to the ***Midcal*** test:

> Where a private party is engaging in the anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State. Where the actor is a municipality, there is little or no danger that it is involved in a private price-fixing arrangement. The only real danger is that it will seek to further purely parochial public interests at the expense of more overriding state goals. This danger is minimal, however, because of the requirement that the municipality act pursuant **[**27]** to a clearly articulated state policy. Once it is clear that state authorization exists, there is no need to require the State to supervise actively the municipality's execution of what is a properly delegated function.

Id. *at 47*. Fortunately for the defendants, [10] the Board is functionally similar to a municipality and is also exempted from the active-supervision prong. Despite the fact that the Board is composed entirely of CPAs who compete in the profession they regulate, the public nature of the Board's actions means that there is little danger of a cozy arrangement to restrict competition. So long as the Board is acting within its authority and pursuant to a clearly established state policy, there is no need for active supervision of the exercise of properly delegated authority. This conclusion comports with our prior precedent and that of other courts of appeals. *See* ***Benton, Benton & Benton v. Louisiana Pub. Facilities Auth.****, 897 F.2d 198, 203 (5th Cir. 1990)* (determining the defendant to be a state agency and "as such" not subject to the active state supervision prong of ***Midcal***), *cert. denied*, *499 U.S. 975, 113 L. Ed. 2d 717, 111 S.* ***[**28]*** *Ct. 1619 (1991)*; *see also* ***Porter Testing Lab. v. Board of Regents for Okla. Agric. & Mechanical Colleges****, 993 F.2d 768, 772* (10th Cir.) (where the antitrust defendants included "a constitutionally created state board, its executive secretary, and a state created and funded university . . . a showing of active supervision is unnecessary to qualify for state action antitrust immunity"), *cert. denied*, *510 U.S. 932, 126 L. Ed. 2d 309, 114 S. Ct. 344 (1993)*; ***Cine 42nd Street Theater Corp. v. Nederlander Org., Inc.****, 790 F.2d 1032, 1047 (2d*

---

[10] Exemption from the "active supervision" requirement is fortunate from the Board's perspective because its rulemaking process was not actively supervised. Despite the legislature's reservation of power to review the Board's proposals for new rules, rule changes can take effect without any active oversight by the legislature. *LA. REV. STAT. ANN. § 49:968* (West 1987 & Supp. 1998). That is in fact what happened regarding the rules challenged in this case, and the situation is indistinguishable from the "negative option system" which was determined by the Supreme Court not to constitute active state supervision. *See* ***Ticor****, 504 U.S. at 629, 638-40*.

Cir. 1986) (where the defendant was a statutorily created political subdivision of the state, defendant's "interests must be defined as public rather than private, and consequently, the active state supervision requirement is unnecessary"); *see also* AREEDA & HOVENKAMP, **[*1042]** *supra*, P 212.7a ("Dispensing with any supervision requirement for municipalities implies, a fortiori, the same for departments and agencies of the state itself."). Moreover, this development was expressly anticipated by the Supreme Court's ***Town of Hallie*** decision. *See* ***Town of Hallie****, 471 U.S. at 46 n.10* ("In cases in which the actor is **[**29]** a state agency, it is likely that active state supervision would also not be required, although we do not here decide that issue.").

The individual Board members take advantage of the Board's privileged status for the purposes of the ***Midcal*** test. The individuals' actions in adopting and enforcing the rules involved in this case were performed in **[**30]** their official capacities as members of the Board. They were, in effect, agents of the Board for the purposes of state-action immunity. *See* ***Crosby v. Hospital Auth.****, 93 F.3d 1515, 1529-30 (11th Cir. 1996)*, *cert. denied*, *137 L. Ed. 2d 328, 117 S. Ct. 1246 (1997)*.

Thus, ***HN9***[] in order to take advantage of the state-action exemption, the defendants must simply demonstrate that they acted "pursuant to state policy to displace competition with regulation or monopoly public service" that was "clearly articulated and affirmatively expressed." ***Community Communications Co., Inc. v. City of Boulder****, 455 U.S. 40, 51, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*. The Supreme Court has further elaborated on this requirement, noting: "We have rejected the contention that this requirement can be met only if the delegating statute explicitly permits the displacement of competition. It is enough . . . if suppression of competition is the 'foreseeable result' of what the statute authorizes." ***City of Columbia v. Omni Outdoor Adver., Inc.****, 499 U.S. 365, 372-73, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*. [11]

[31]** The evidence of the Louisiana policy supporting the rules against the practice of incompatible professions and the acceptance of commissions consists of the following statutory language:

> ***HN10***[] The board shall:

* * *

> (3) Take appropriate administrative action to regulate the practice of public accounting in the state of Louisiana in the interest of and to preserve and protect the public health, safety and welfare;

* * *

LA. REV. STAT. ANN. § 37:75(A) (West 1988).

> ***HN11***[] The board may:

* * *

> (2) Adopt and enforce all rules and regulations, bylaws, and rules of professional conduct as the board may deem necessary and proper to regulate the practice of public accounting in the state of Louisiana, to provide for the efficient operation of the board, and otherwise to discharge its duties and powers under this Chapter;

* * *

> (5) Authorize any member of the Board to make any affidavit necessary to the issuance of any injunction or other legal process authorized under this Chapter or under the rules and regulations of the board;
> (6) Employ inspectors, special agents, and investigators;

* * *

[11] To the extent that ***United States v. Texas State Bd. of Pub. Accountancy****, 592 F.2d 919 (5th Cir. 1979)*, *aff'g 464 F. Supp. 400 (W.D. Tex. 1978)*, *cert. denied*, ***444 U.S. 925, 62 L. Ed. 2d 180, 100 S. Ct. 262 (1979)***, suggests that the state-action exemption may be denied because the state statute authorizing the challenged conduct was cast in permissive language rather than mandatory language, the opinion has been overruled by numerous subsequent Supreme Court cases disavowing that reasoning. *See, e.g.*, ***Southern Motor Carriers****, 471 U.S. at 59-60*.

(8) **[**32]** Employ legal counsel to carry out the provisions of this Chapter, provided that the fees of such counsel and the costs of all proceedings, except criminal prosecutions, are paid by the board from its own funds;

* * *

(10) Issue subpoenas under its seal to require attendance and testimony and the production of documents and things for the purpose of enforcing the laws relative to **[*1043]** the practice of public accounting and securing evidence of violations thereof;

* * *

(12) Adopt and enforce rules and regulations providing for the board's regular, periodic review of the form of audit, review, and compilation reports issued by individuals and firms registered with the board for compliance with applicable, generally accepted standards. * * *

* * *

Id. *§ 37:75(B)* (West 1988 & Supp. 1998). These statutes grant the Board broad power to regulate the profession of accounting. We must determine whether the rules challenged by the plaintiffs are a "foreseeable result" of the state's enabling legislation and therefore promote the state's public policy for the purposes of the state-action doctrine.

The plaintiffs contend that "clear articulation" **[**33]** is not present on these facts. They argue that the state-action doctrine is to be applied narrowly, and the Board members' actions simply do not merit the exemption. Particularly, the plaintiffs object that (1) any "policy" evidenced by the above-quoted statutory language is not "clearly articulated" and (2) the rules enacted by the Board are not the "foreseeable result" of the statues enacted by the state. The plaintiffs assert that their view is supported by Supreme Court precedent which holds that merely neutral statutory language is inadequate to meet the standards of clear articulation and affirmative expression. *See, e.g.*, ***Community Communications****, 455 U.S. at 55-56* ("The requirement of 'clear articulation and affirmative expression' is not satisfied when the State's position is one of mere neutrality respecting the municipal actions challenged as anticompetitive.").

That argument cannot be accepted. With respect to a regulated entity such as the Board, the Supreme Court has dictated a standard that accords appropriate deference to state sovereignty: ***HN12***[] "As long as the State clearly articulates its intent to adopt a permissive policy, the first prong of the **[**34]** ***Midcal*** test is satisfied." ***Southern Motor Carriers****, 471 U.S. at 60*. Thus, we cannot deny the state-action exemption based merely upon the failure of the Louisiana legislature to expressly state an intention to displace competition in the accounting profession by restricting the practice of "incompatible professions" and the acceptance of commissions. As the Supreme Court has noted in a analogous context, such an approach would take an "unrealistic view of how legislatures work and of how statutes are written." ***Town of Hallie****, 471 U.S. at 43*; *see also* AREEDA & HOVENKAMP, *supra*, P 212.3a ("Unfortunately, state statutes seldom speak with clarity on [the elements of the 'clear articulation' requirement], for the federal antitrust consequences of state legislation -- especially of state delegations to subordinate units -- was hardly significant in the legislators' minds.").

Objectively, the Louisiana legislature "intended" that the Board, through its members, exercise any power which the legislature authorized. Here, the Board was authorized to "adopt and enforce all rules and regulations, bylaws, and rules of professional conduct as the board may deem **[**35]** necessary and proper to regulate the practice of public accounting in the state of Louisiana." *LA. REV. STAT. ANN. § 37:75(B)(2)* (West 1988). This is a broad grant of authority which includes the power to adopt rules that may have anticompetitive effects. [12] It is thus the

[12] For example, the Board uses its state-granted monopoly power over the practice of public accounting to determine who may compete in the profession. *See* LA. REV. STAT. ANN. § 75(A) (West 1988) (the Board shall administer the licensing of CPAs)***; id.*** § 77(B) (West Supp. 1998) (CPA license required to practice public accounting in Louisiana); LA. ADMIN. CODE tit. 46, §§ XIX.1101-.2701 (Sept. 1997) <*www.state.la.us/osr/lac/lac.htm>* (regulations pertaining to examination, certification, and licensing). This has the effect of artificially limiting supply and therefore raising prices.

"foreseeable result" of enacting such a statute that the Board may actually promulgate a rule that has anticompetitive effects.

Whether or not the **[**36]** rules challenged by the plaintiffs would violate the Sherman Act in the absence of a state-action exemption, it is **[*1044]** plain that Louisiana has established a permissive policy with respect to the Board's regulation of CPAs. In doing so the state rejected pure competition among public accountants in favor of establishing a regulatory regime that inevitably has anticompetitive effects.

Our analysis is faithful to the principles of federalism that gird the state-action doctrine. As the Supreme Court has noted:

> If more detail than a clear intent to displace competition were required of the legislature, States would find it difficult to implement through regulatory agencies their anticompetitive policies. Agencies are created because they are able to deal with problems unforeseeable to, or outside the competence of, the legislature. Requiring express authorization for every action that an agency might find necessary to effectuate state policy would diminish, if not destroy, its usefulness.

Southern Motor Carriers*, 471 U.S. at 64*. We thus conclude that the "clear articulation" requirement is satisfied by the Louisiana statutes which bless the Board with broad rulemaking **[**37]** authority over the profession of public accounting within the state. The members of the Board are therefore entitled to state-action immunity from federal antitrust laws.

V. Conclusion

For the aforementioned reasons, the judgment of the district court denying defendants' motion to dismiss based on the *Eleventh Amendment* is reversed to the extent that it denies immunity to the Board itself and to individual Board members on claims grounded in state law. In all other respects, the ruling is affirmed. The denial of the motion to dismiss based on the state-action doctrine is also reversed. We remand the case for further proceedings. On remand, the district court shall dismiss all claims against the State Board of Certified Public Accountants of Louisiana and all federal antitrust and state-law claims against its Board members.

AFFIRMED IN PART, REVERSED IN PART, AND REMANDED WITH INSTRUCTIONS.

HN2[] **Justiciability, Abatement Upon Death**

Whether an action survives the death of a party must be determined by looking to the law, state or federal, under which the cause of action arose. In the absence of a legal ruling directly on point by the state courts, a federal court should rule as the state supreme court would, if squarely presented with the issue.

Torts > Wrongful Death & Survival Actions > General Overview

HN3[] **Torts, Wrongful Death & Survival Actions**

Survivability of a claim under the Wisconsin Organized Crime Control Act (WOCCA) is governed first and foremost by Wisconsin's omnibus survival statute, *Wis. Stat. § 895.01(1)*, which provides that all causes of action that survive at common law survive in Wisconsin, as do certain other specified causes of action, including claims for all damage done to the property rights or interest of another. The list of causes enumerated in *§ 895.01(1)* is exclusive, and a WOCCA claim is not among them.

Torts > Wrongful Death & Survival Actions > General Overview

HN4[] **Torts, Wrongful Death & Survival Actions**

A Wisconsin Organized Crime Control Act claim does not survive at common law.

HN9[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Wisconsin courts have held federal case law interpreting the Racketeer Influenced and Corrupt Organizations Act to be persuasive authority in interpreting the Wisconsin Organized Crime Control Act.

Torts > Wrongful Death & Survival Actions > General Overview

HN10[] **Torts, Wrongful Death & Survival Actions**

Survivability is determined by looking to the law of the jurisdiction under which the cause of action arose.Analysis begins with the language of the statute itself.

Civil Procedure > Remedies > Costs & Attorney Fees > Costs

Civil Procedure > Remedies > Damages > General Overview

Civil Procedure > Remedies > Damages > Punitive Damages

HN11[] **Costs & Attorney Fees, Costs**

Wis. Stat. § 946.87(4) states that any person who is injured by reason of a Wisconsin Organized Crime Control Act violation has a cause of action for two times the actual damages sustained and, when appropriate, punitive damages. The person shall also recover attorney fees and costs of the investigation and litigation reasonably incurred.

Civil Procedure > Remedies > Damages > General Overview

Governments > Legislation > Interpretation

HN12[] **Remedies, Damages**

When determining whether a particular statutory provision is punitive, courts generally look in the first instance to whether the purpose of the statute as a whole primarily redresses individual wrongs or more general wrongs to the public.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Remedies

Governments > Legislation > Interpretation

Torts > Wrongful Death & Survival Actions > General Overview

HN13[] **Racketeer Influenced & Corrupt Organizations, Remedies**

The United States Court of Appeals for the Seventh Circuit sets forth a three-part test for determining whether an action is penal for survival purposes: (1) whether the purpose of the action is to redress individual wrongs or wrongs to the public; (2) whether recovery runs to the individual or to the public; and (3) whether the authorized recovery is wholly disproportionate to the harm suffered.

Torts > Vicarious Liability > Agency Relationships > General Overview

HN14[] **Vicarious Liability, Agency Relationships**

Where an employee is acquitted of a libel, presumably on the grounds that he has committed none, his corporation cannot be liable. But the situation is quite different where by death or by operation of law an action against the corporation's agent has abated. This is not the same as a judgment on the merits and should not bar the plaintiff from getting such a judgment against the corporation. Once the employee has acted, if he has acted in the corporation's behalf, any stigma which arises due to his act immediately attaches to the corporation. The subsequent death of the agent tortfeasor does not alter this.

Torts > Procedural Matters > Multiple Defendants > Joint & Several Liability

Workers' Compensation & SSDI > Coverage > Employment Status > Dual Employees

HN15[] **Workers' Compensation, Fraud**

Where there is joint and several liability the injured person may sue all defendants jointly, or either separately.

Business & Corporate Law > Agency Relationships > Types > Employees & Employers

Torts > Negligence > Defenses > General Overview

Business & Corporate Law > ... > Duties & Liabilities > Negligent Acts of Agents > General Overview

Business & Corporate Law > ... > Duties & Liabilities > Negligent Acts of Agents > Liability of Principals

Torts > Vicarious Liability > Agency Relationships > General Overview

Torts > Vicarious Liability > Employers > General Overview

HN16[ ] **Types, Employees & Employers**

An agent's immunity from civil liability for an act does not translate into a defense for the principal. A finding of no civil liability on the part of an employee because of an immunity doctrine does not shield the employer, since the servant's negligence or wrongful act, and not the servant's own civil liability, establishes the employer's liability under respondeat superior. Immunities are not delegable and are available only to persons who have them.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Opinion

[*1151] ***DECISION AND ORDER***

Currently pending before me are two motions: (1) the plaintiffs' motion for reconsideration of an order substituting the administrator of defendant Edward Keiser's estate for Keiser, and (2) Keiser's (or his representative's) motion to dismiss the case for lack of personal jurisdiction or to transfer it to the Northern District of Illinois. For the reasons set forth below, the motion for reconsideration will be granted and upon reconsideration the motion for substitution will be granted in part and denied in part, and the **[**2]** motion to dismiss or transfer the case will be denied.

I. Factual and Procedural Background

The following facts derive from the Amended Complaint. The twelve individual plaintiffs in this case are relatives, all living in Wisconsin. Plaintiff S&R Egg Farms, Inc., their family business, is a Wisconsin **[*1152]** corporation; its principal place of business is in Wisconsin. Defendant Gerald, Inc. is a New York corporation; its principal place of business is in New York. At all times material to this lawsuit, Gerald had an office in Chicago, Illinois, and was in the business of buying and selling commodities for customers through the Chicago Board of Trade. Defendant Edward Keiser lived in Illinois at the time this case was filed; Keiser was Gerald's vice president of accounts in its Chicago office.

Although not a party to this lawsuit, Michael Schwarzmann ("Michael") played a large role in causing it. Michael is a close relative of the individual plaintiffs. Working through his company, M.S.I Capital Management, Michael held himself out as an expert and investor in the commodities futures market. He solicited funds from the plaintiffs, who gave him substantial amounts of money to invest **[**3]** on their behalf, based on Michael's representation that the money would be invested with defendants Keiser and Gerald in Chicago. Michael's parents, Eve and Frank Schwarzmann, for instance, gave him $ 332,000, aunt and uncle Helen and Nick Schimpf gave Michael $ 881,200, and S&R put in $ 578,000, all of which was supposed to be invested with Gerald.

But rather than investing the money, Michael and Keiser allegedly were defrauding plaintiffs. Michael invested little, if any, of his relatives' money with Gerald. Instead, by making small "interest" payments and by providing plaintiffs with falsified statements, Michael was able to keep them satisfied and unconcerned, while he used the money for his own purposes. In 1995 Michael pled guilty to wire fraud in connection with the scam. According to plaintiffs, Keiser used his position at Gerald to assist Michael in various ways.

Plaintiffs allege they are still short approximately $ 1,265,000. On March 31, 1997, they filed this lawsuit against Keiser and Gerald in an attempt to recover that money. Plaintiffs brought the case in Walworth County Circuit Court, but defendants removed it to this district on May 8, 1997, because diversity jurisdiction **[**4]** exists under *28 U.S.C. § 1332*. Plaintiffs allege three causes of action: (1) civil conspiracy to defraud, (2) violation of the Wisconsin Organized Crime Control Act (WOCCA), *Wis. Stat. §§ 946.80 - 946.88*, and *(3)* negligent misrepresentation. According to plaintiffs, Gerald is liable because at all times material, Keiser was acting within the scope of his employment and was Gerald's agent.

In 1997, Keiser died. Plaintiffs filed a suggestion of death and moved to substitute Charles F. Marino, administrator of Keiser's estate, for Keiser. At the time of the motion, this case was assigned to District Judge Rudolph T. Randa. Judge Randa granted the motion for substitution on December 2, 1997, but he inaccurately calculated the deadline for responses and incorrectly assumed the defendants and the estate had no objection, as none had been filed. On December 8, Gerald filed a motion for reconsideration, indicating it indeed planned to object. The next day Judge Randa acknowledged the mistake, indicated he would accept responses to the motion for substitution, and ordered his prior ruling on the substitution matter held in abeyance pending further review of the merits of the issue. The case **[**5]** was transferred to me when I became a district judge. The parties have since fully briefed the motion for substitution and agree that reconsideration is appropriate. As the objection to substitution of the estate for Keiser concerns only the second count of the Amended Complaint, Judge Randa's order granting the substitution will be reinstated as to counts one and three.

On January 6, 1998, the estate (assuming it would be substituted for at least part of the case) filed a motion to dismiss the claims against it for lack of personal jurisdiction or, alternatively, for transfer of the case to the Northern District of Illinois. That motion has been fully briefed as well. Plaintiffs have since filed an Amended Complaint. The motion to dismiss or transfer has been renewed as to the Amended Complaint and is ready for decision.

II. Survival of WOCCA Claim Against Keiser

A. Survival is an Issue of Wisconsin Law

HN1[] *Federal Rule of Civil Procedure 25(a)(1)* (emphasis added) states that "if a party **[*1153]** dies *and the claim is not thereby extinguished*, the court may order substitution of the proper parties." In their motion for substitution plaintiffs asserted that the WOCCA claim was **[**6]** not extinguished by Keiser's death and thus Marino and the estate should be substituted as defendants for all claims. Notice of Motion and Motion for Substitution (Nov. 17, 1997) at 2. Keiser's estate and Gerald object to the substitution because they believe the WOCCA count of the Amended Complaint expired along with Keiser. According to Gerald, because its liability would be derivative of Keiser's the WOCCA count evaporates against it as well as the estate.

HN2[] Whether an action survives the death of a party must be determined by looking to the law, state or federal, under which the cause of action arose. *Continental Assurance Co. v. American Bankshares Corp., 483 F. Supp. 175, 177 (E.D. Wis. 1980)*. Wisconsin case law does not address whether a WOCCA civil claim survives death. In the absence of a legal ruling directly on point by the state courts, a federal court should rule as the state supreme court would, if squarely presented with the issue. *L.S. Heath & Son v. AT&T Info. Sys., 9 F.3d 561, 574 (7th Cir. 1993)*.

HN3[] Survivability of plaintiffs' WOCCA claim is governed first and foremost by Wisconsin's omnibus survival statute, *Wis. Stat. § 895.01(1)*, which provides that all **[**7]** "causes of action that survive at common law" survive in Wisconsin, as do certain other specified causes of action, including claims "for all damage done to the property rights or interest of another." The list of causes enumerated in *section 895.01(1)* is exclusive, *Pettygrove by Scholl v. Pettygrove (In re Marriage of Pettygrove), 132 Wis. 2d 456, 463, 393 N.W.2d 116 (Ct. App. 1986)*, and a WOCCA claim is not among them. WOCCA itself fails to address the survivability of a civil lawsuit brought under its terms. Therefore, unless a WOCCA cause of action can be considered a "cause[] of action that survive[s] at common law" in Wisconsin, or a statutory action for "damage done" to property rights, it evaporated when Keiser died.

Plaintiffs' ***HN4***[] WOCCA claim does not "survive at common law." ***HN5***[] The original version of Wisconsin's survival statute was enacted in 1849, *see* *Wis. Stat. § 895.01* note (Historical and Statutory Notes); *Prunty v. Schwantes, 40 Wis. 2d 418, 422 n.3, 162 N.W.2d 34 (1968)*, and the "causes of action that survive at common law" appear to have been fixed at that time, *see* *Prunty, 40 Wis. 2d at 424* (because personal injury cause of action did not survive **[**8]** death of injured party until legislature acted in 1887, "it is quite obvious that the common law of Wisconsin will not support an award of damages to the deceased's estate" under version of survival statute in effect in 1968). WOCCA became effective in 1982. *See* *Wis. Stat. §§ 946.80-946.88* notes (Historical and Statutory Notes). Thus a WOCCA claim is not part of the "common law" as contemplated in *section 895.01(1)*. And even if "causes of action that survive at common law" as stated in *section 895.01(1)* is a developing concept, the Wisconsin Supreme Court recognizes as "an accepted axiom of law in Wisconsin" that ***HN6***[] "statutes are not to be construed as changing the common law unless the purpose to effect such change is clearly expressed therein." *Kranzush v. Badger State Mutual Cas. Co., 103 Wis. 2d 56, 74, 307 N.W.2d 256 (1981)*. WOCCA is silent in regard to any intent to change the common law. *See* *Wis. Stat. §§ 946.80-946.88*.

Therefore, in order to survive, a WOCCA civil suit would have to be deemed a claim "for all damage done to the property rights or interest of another." ***HN7***[] "Damage" is undefined by the statue, but, in general, it means a "loss, injury, or deterioration", **[**9]** that produces "a right in them who have suffered any damage . . . to demand reparation of such damage from the authors of the injury." Black's Law Dictionary 389 (6th ed. 1990). A person who has suffered "loss, detriment, or injury" then may be able to recover "damages", meaning "a pecuniary compensation or indemnity." *Id.; see also* *Employers Mut. Liab. Ins. Co. v. De Bruin, 271 Wis. 412, 414, 73 N.W.2d 479 (1955)* (defining "damages" as "a compensation, recompense, or satisfaction in money for a loss or injury sustained"). The key question, then, as all parties recognize, is whether the WOCCA civil cause of action is deemed compensatory or remedial, **[*1154]** in which case it survives, versus penal, in which case it has been extinguished.[1]

[10] B. Is the WOCCA Claim Penal or Compensatory?**

1. Case Law With Respect to RICO Claims

The Seventh Circuit has a test for determining whether a cause of action is penal or remedial in nature. *See* *Smith v. No. 2 Galesburg Crown Fin. Corp., 615 F.2d 407, 414 (7th Cir. 1980)*, *overruled on other grounds by* *Pridegon v. Gates Credit Union, 683 F.2d 182, 194 (7th Cir. 1982)*. Wisconsin does not appear to have a similar test. While the *Smith* test does not necessarily apply to a state statute, with no state test *Smith* nevertheless is helpful.

In addition, WOCCA is patterned on the federal Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C. §§ 1961-1968*, *State v. Evers, 163 Wis. 2d 725, 730, 472 N.W.2d 828 (Ct. App. 1991)*, and ***HN9***[] Wisconsin courts have held federal case law interpreting RICO to be persuasive authority in interpreting WOCCA, *State v. Mueller, 201 Wis. 2d 121, 144, 549 N.W.2d 455 (Ct. App. 1996)*; *Evers, 163 Wis. 2d at 732*.

Numerous decisions regarding the survivability of RICO treble-damages citizen suits indicate a split of authority. Several courts, almost all of them located in the Northern District of Illinois, have determined **[**11]** such lawsuits to be penal and have found they do not survive the passing of a party. *See, e.g.,* *Confederation Life Ins. Co. v. Goodman, 842 F. Supp. 836, 837-38 (E.D. Pa. 1994)*; *Ball v. Field, 1993 U.S. Dist. LEXIS 4273, 1993 WL 101485*, *9 (N.D. Ill. 1993); *Lincoln Nat'l Life Ins. Co. v. Silver, 1990 U.S. Dist. LEXIS 13669, 1990 WL 160037*, *6 (N.D. Ill. 1990); *Washburn v. Brown, 1988 U.S. Dist. LEXIS 13474, 1988 WL 130021*, *3 (N.D. Ill. 1988); *Eliasen v. Hamilton, 1987 U.S. Dist. LEXIS 1826, 1987 WL 7815*, *10-*11 (N.D. Ill. 1987); *First Interstate Bank of Nevada, N.A. v. National Republic Bank,1985 U.S. Dist. LEXIS 21944, 1985 WL 1118*, *3-*4 (N.D. Ill. 1985).

Other courts, notably the Fourth Circuit and a judge in the Northern District of Indiana, have decided that the RICO treble-damages provision is remedial and thus survives death. *See, e.g.,* *Faircloth v. Finesod, 938 F.2d 513, 518 (4th Cir. 1991)*; *Epstein v. Epstein, 966 F. Supp. 260, 262-63 (S.D.N.Y. 1997)*; *Holford USA Ltd. v. Harvey, 169 F.R.D. 41, 43 (S.D.N.Y. 1996)*; *First Am. Corp. v. Al-Nahyan, 948 F. Supp. 1107, 1122 (D.D.C. 1996)*; *County of Oakland by Kuhn v. City of Detroit, 784 F. Supp. 1275, 1285 (E.D. Mich. 1992)*; *State Farm Fire and Cas. Co. v. Estate of Caton, 540 F. Supp. 673, 681-82 (N.D. Ind. 1982)*, **[**12]** *overruled on other grounds by* *Ashland Oil, Inc. v. Arnett, 656 F. Supp. 950, 953 (N.D. Ind. 1987)*. Moreover, RICO's treble-damages civil suit provision in turn is patterned on that found in section 4 of the Clayton Act, *15 U.S.C. § 15*, and several cases have held that antitrust treble-damage claims are compensatory or survive the death of a party. *See, e.g.,* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 485-86, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* (recognizing § 4's dual nature but concluding that "it nevertheless is true that the treble-damages provision, which makes awards available only to

---

[1] Even if WOCCA existed at the time Wisconsin codified the survival of common law claims, if the double-damages provision is penal in nature it nevertheless would abate. At common law, actions on penal statutes did not survive death, *Ex parte Schreiber, 110 U.S. 76, 80, 28 L. Ed. 65, 3 S. Ct. 423 (1884)*, because a deceased criminal could no longer be punished, *Canino v. New York News, Inc., 96 N.J. 189, 475 A.2d 528, 529 (N.J. 1984)*. "Death pays all when the criminal has gone. 'The party cannot be punished when he is dead.'" Winfield, *Death as Affecting Liability in Tort*, 29 Colum. L. Rev. 239, 249 (1920) (quoting Pollock, *Law of Torts* 578 (12 ed. 1923)), *quoted in* *Canino, 475 A.2d at 529*. ***HN8***[] Abatement of criminal actions upon death of the defendant continues today. *See* *United States v. Zizzo, 120 F.3d 1338, 1346 (7th Cir. 1997)*.

injured parties, and measures the awards by a multiple of the injury actually proved, is designed primarily as a remedy"); *Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1986)* (holding that antitrust treble damage claims do not abate with death of defendant); *see also* *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 635, 87 L. Ed. 2d 444, 105 S. Ct. 3346 (1985)* ("Notwithstanding its important incidental policing function, the treble-damages cause of action conferred on private parties by § 4 of the Clayton Act, *15 U.S.C. § 15*, . . . seeks **[**13]** primarily to enable an injured **[*1155]** competitor to gain compensation for that injury.").

2. Damages and Costs Under WOCCA Exceed Compensation

Because ***HN10***[] survivability is determined by looking to the law of the jurisdiction under which the cause of action arose, *Continental, 483 F. Supp. at 177*, analysis begins with the language of WOCCA itself. ***HN11***[] *Wisconsin Statute § 946.87(4)* states that "any person who is injured by reason of [a WOCCA violation] has a cause of action for 2 times the actual damages sustained and, when appropriate, punitive damages. The person shall also recover attorney fees and costs of the investigation and litigation reasonably incurred.. . ."

Plaintiffs first point out that subsection 946.87(4) speaks of "damages" and "recovery"; they contend that these terms mean the section is compensatory. I am not convinced. The statute imposes a mandatory doubling of actual damages, plus payment of the victim's attorney fees and litigation expenses, plus cost of the pre-lawsuit investigation. The double-damages provision alone exceeds what can be deemed mere compensation and remedy for harm done. To the extent they exceed actual damages, multiple damages by their nature **[**14]** are "exemplary" -- they do not compensate for the individual harm suffered as much as they serve as a deterrent. *Eliasen, 1987 WL 7815* at *11.

Plaintiffs next argue that because the Wisconsin legislature included in subsection 946.87(4) both double damages *and*, when appropriate, punitive damages, the legislature must have considered the double damages simply to be compensatory -- in other words, plaintiffs say, double damages must be "something other than punitive," Brief in Response (Dec. 22, 1997) at 3, or else the legislature would not have included both. I again disagree. In *John Mohr & Sons, Inc. v. Jahnke, 55 Wis. 2d 402, 412, 198 N.W.2d 363 (1972)*, which involved a jury's finding of an illegal conspiracy in restraint of trade and its award of both statutory treble damages and common-law punitive damages to the plaintiff, the Supreme Court of Wisconsin struck the punitive damages award because the statutory remedy was exclusive. The WOCCA legislature appears simply to have enacted statutory punitive damages to get around the problem of common-law punitive damages being excluded under *John Mohr*. An award of punitive damages is not identical to or truly duplicative **[**15]** of automatic multiplied damages. *See* *Carlson & Erickson Builders, Inc. v. Lampert Yards, Inc., 190 Wis. 2d 651, 660 n.9, 529 N.W.2d 905 (1995)* (noting, for example, that willful, wanton or reckless behavior generally must be proven to recover punitive damages but not treble damages, and the wealth of a defendant bears on the calculation of punitive damages while statutory multiple damages are based on an automatic multiplier of actual damages). The legislature's inclusion of both types of damages merely provides for an automatic type of fine as well as a variable component within the jury's discretion for egregious situations. It does not mean that the legislature treated double damages solely as compensation for injury.

3. Purpose of WOCCA is to Fight Crime

Plaintiffs next point to the Wisconsin legislature's expression of intent for WOCCA, which is set forth in *Wisconsin Statute § 946.81*: "The legislature declares that the intent of the Wisconsin Organized Crime Control Act is to impose sanctions against this subversion of the economy by organized criminal elements and to provide compensation to private persons thereby.. . ." According to plaintiffs, the "sanctions" discussed in *section **[**16]** 946.81* must be WOCCA's criminal penalties and fines and the "compensation" is the legislature's recognition of remedial subsection 946.87(4). Plaintiffs have left out the immediately preceding sentence, though, which gives better insight into the overall nature of WOCCA. Read together, the two sentences state:

> The legislature finds that a severe problem is posed in this state by the increasing organization among certain criminal elements and the increasing extent to which criminal activities and funds acquired as a result of criminal activity are being directed to and against the legitimate economy of the state. The legislature declares that the intent of the Wisconsin Organized Crime Control Act is to impose sanctions against this subversion of the economy by organized criminal elements and to provide **[*1156]** compensation to private persons injured thereby.. . .

The additional language shows the real focus of WOCCA to be a response to crime. Nothing in the language of the statute suggests that the Wisconsin legislature intended to exclude subsection 946.87(4) when it stated that its goal was to address criminal activities and "impose sanctions against this subversion of the economy."

[17]** The WOCCA title and *section 946.87*'s placement within the Wisconsin statutes further suggest that the double-damages provision is penal in nature. *Section 946.87* is part of the Wisconsin Organized *Crime Control* Act, which addresses the problem of criminal behavior and creates criminal sanctions triggered by such conduct. ***HN12***[] When determining whether a particular statutory provision is punitive, courts generally look in the first instance to whether the purpose of the statute *as a whole* primarily redresses individual wrongs or more general wrongs to the public. *Genty v. Resolution Trust Corp., 937 F.2d 899, 912 (3d Cir. 1991)*. *Section 946.87* is just one small part of a predominantly penal act and is merely one piece of the puzzle in trying to solve the problem of crime. Moreover, *section 946.87* also is part of the Chapter of the Wisconsin Statutes entitled "Crimes Against Government and Its Administration." Other portions of Chapter 946 address, for instance, treason, bribery, perjury, interference with law enforcement, and obstruction of justice. *See* Wis. Stat., ch. 946. The placement of *section 946.87* with all of these criminal statutes involving injury to government **[**18]** (and thus the public) buttresses the view that Wisconsin's legislature intended the double damages provision to be penal.

4. Wisconsin Statute Indicates Double Damages Not Compensatory

The statute immediately following Wisconsin's omnibus survival statute expressly prohibits the recovery of "vindictive or exemplary damages" against the executor or administrator of an estate and limits recovery to damages actually sustained. *Wis. Stat. § 895.02*. *Section 895.02* thus treats claims for amounts in excess of actual damages as if they cannot survive against an estate. Because a WOCCA civil claim mandates double damages, permitting a WOCCA claim to be brought against an estate would be inconsistent with *§ 895.02*.

5. No Wisconsin Case Law Directly On Point

Having analyzed the statutory language, I next look to Wisconsin case law. In *Carlson, supra*, the defendants argued that antitrust treble damages were considered punitive in nature and thus claims for such damages required the same "middle" (i.e. clear and convincing) burden of proof as used for common-law punitive claims. The court rejected the argument and held that the lower preponderance of the evidence standard **[**19]** applied, but stated: "Nor are treble damages in Wisconsin private, civil antitrust actions solely or predominantly punitive, as the defendants assert. A more accurate portrayal of the case law is that the state "antitrust laws are remedial in nature as well as penal. . .." *Carlson, 190 Wis. 2d at 667*. *Carlson* thus does not solve the penal/remedial dichotomy.

6. *Smith* and RICO Cases From N.D. Ill. Suggest WOCCA Claim Penal

The Seventh Circuit's *Smith* test and the RICO cases from the Northern District of Illinois and the Eastern District of Pennsylvania, however, solidify the conclusion that a WOCCA civil claim is penal in nature. *Smith* ***HN13***[] sets forth a three-part test for determining whether an action is penal for survival purposes: (1) whether the purpose of the action is to redress individual wrongs or wrongs to the public, (2) whether recovery runs to the individual or to the public, and (3) whether the authorized recovery is wholly disproportionate to the harm suffered. *Smith, 615 F.2d at 414*. As *Washburn, supra*, and *First Interstate, supra*, similarly concluded in regard to RICO civil suits, the *Smith* test indicates WOCCA civil suits are penal. **[**20]** Only the second factor of the test suggests a remedial nature, because recovery does run to the individual. The other two factors point toward WOCCA's penal nature.

In regard to the first factor, although *section 946.87(4)* itself may redress individual wrongs, its broader purpose and that of WOCCA overall is to redress wrongs to the public, based upon the same reasoning set forth above regarding legislative intent and **[*1157]** WOCCA's placement within the Wisconsin code. *See also* *Genty, 937 F.2d at 910* ("The criminal and civil penalties in [RICO] thus comprise sharply-cutting edges of a double-edged sword to strike more completely the insidious influences plaguing our nation's enterprises.. . . There is convincing authority that Congress authorized civil RICO's powerful treble damages provision to serve a punitive purpose.").

And in regard to the third factor, the authorized recovery is wholly disproportionate to the harm suffered. Because the amount of damages under WOCCA are unlimited, so is the potential penalty. Unlike *Smith*, where the Seventh Circuit determined that a fine pursuant to the Truth in Lending Act, *15 U.S.C. § 1640*, was not penal because it was limited to modest **[**21]** amounts of not more than $ 1,000, *see* *Smith, 615 F.2d at 414-15*, the penalty under WOCCA can be extraordinary. A $ 100,000 penalty added to damages of $ 100,000, for example, is wholly disproportionate, especially because it is unrelated to any degree of willfulness or intent to injure.

7. Arguments That WOCCA Claims Are Civil Are Less Persuasive

The courts finding that RICO civil claims survive death rely mainly on Congress's statement that RICO provisions "shall be liberally construed to effectuate its *remedial* purpose," Pub. Law No. 91-452 § 904(a), 84 Stat. 947, *reprinted* following *18 U.S.C. § 1961* note (emphasis added), the fact that recovery runs to a private individual, the parallels in ***antitrust law***, and certain Supreme Court comments in *Shearson/American Express, Inc. v. McMahon, 482 U.S. 220, 96 L. Ed. 2d 185, 107 S. Ct. 2332 (1987)*. *See, e.g.,* *First American, 948 F. Supp. at 1122*; *County of Oakland, 784 F. Supp. at 1285*; *Epstein, 966 F. Supp. at 262*. None of these reasons changes my view that the WOCCA civil cause of action is penal in nature.

The first two reasons are easily dismissed. The "liberal construction" phrase from Congress **[**22]** can be read to encourage active use of both RICO's criminal and civil provisions to combat and "remedy" crime. And the fact that recovery runs to the individual is only one factor among at least three, as *Smith* recognizes.

While courts generally have found the treble damages provision of the antitrust laws to be remedial in nature, and RICO (and one step further down the line, WOCCA) is patterned on the antitrust provision, those decisions do not mandate any decision here. In *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 498, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)*, the Supreme Court cautioned against leaning heavily on antitrust case law for interpreting RICO; by making RICO a separate statute, Congress hoped to avoid strangling RICO with antitrust precedent. Embedding federal antitrust precedent into RICO survivability issues would create the problem that Congress expressly sought to avoid with RICO. Even statements of members of Congress involved in enacting RICO suggest that the RICO treble damages provision was not simply a rubber-stamp of the antitrust provision. *See* *Sedima, 473 U.S. at 487-88* (discussing comments by legislators indicating that treble-damages provision **[**23]** was "another example of the antitrust remedy being *adapted* for use against organized criminality," 116 Cong. Rec. 35295 (1970) (emphasis added)).

Most significantly, there is little correspondence between the types of conduct the antitrust laws and RICO and WOCCA prohibit; the former is concerned with regulating competition, the latter with defeating and deterring crime. RICO and WOCCA, each taken as a whole, are more penal in nature -- i.e. aimed directly at the public's common notions of crime -- than the antitrust laws, and can be deemed so even though similar language regarding remedies may exist in both. And while *Fishman* is precedent for this court, the Seventh Circuit spent little time analyzing the remedial/punitive issue and itself based the *Fishman* decision on the "precise circumstances" of the case. *Fishman, 807 F.2d at 561*. In spite of the parallel language between RICO and the antitrust acts, and in spite of *Fishman*, the judges of the Northern District of Illinois have found it inappropriate simply to adopt ***antitrust law*** interpretation for RICO civil claims. I similarly decline to find that antitrust case law rules control WOCCA civil claims.

[*1158] In **[**24]** *Shearson* the United States Supreme Court opined that the emphasis placed on the civil treble damage award of section 1964(c) by Congress is remedial first and only secondarily penal. *Shearson, 482 U.S. at*

240-42. In *Shearson* the Court determined that parties could agree to arbitrate RICO treble-damages claims. Id. at 238-42. The Supreme Court first found no hint that Congress intended for RICO treble-damages claims to be exempt from the provisions of the Federal Arbitration Act, *9 U.S.C. § 1 et seq.*, and then found no public interest in the enforcement of RICO precluding submission of such claims to arbitration. *Id. at 238-42*. Regarding the latter issue, the Court analyzed statements of various legislators and concluded that the RICO treble-damages provision focused on the remedial rather than the deterrent function. According to the Court, "the legislative history of § 1964(c) reveals the . . . emphasis on the remedial role of the treble-damages provision.. . . The policing function of § 1964(c), although important, was a secondary concern." *Id. at 240-41*.

The Court's comment was dicta, however, and this statement in the context of arbitrability does **[**25]** not govern survivability as well. As is clear by now, the multiple damages provisions of RICO and WOCCA can be considered compensatory for some purposes and penal for others. The *Shearson* Court itself, while emphasizing the remedial function for purposes of the arbitrability issue, nevertheless also recognized that "RICO's drafters likewise sought to provide vigorous incentives for plaintiffs to pursue RICO claims that would advance society's fight against organized crime." *Id. at 241*. A multiple-damages provision's dual nature can result in it being considered more like a compensatory remedy for purposes of arbitration, which involves looking only at the nature of the treble-damages provision itself, while being considered more like a penalty for purposes of survivability, which, as the *Smith* test indicates, involves a broader look at the provision's overall purpose and placement in the statutory scheme. *See Lincoln Nat'l*, 1990 WL 160037 at *4"(It is clear that both RICO and the Clayton Act contain elements that are both penal and remedial; thus, depending on the context, a claim may be characterized one way or the other."); *see also Genty, 937 F.2d at 913-14* (discussing **[**26]** *Shearson* but finding the RICO treble-damages cause of action penal for its purposes); *compare Shearson, supra, with Sedima 473 U.S. at 498* ("RICO was an aggressive initiative to supplement old remedies and develop new methods for fighting crime.. . . it is in this spirit that all of the Act's provisions should be read.").

Shearson and antitrust precedent do not overcome the essential nature of the WOCCA statute itself and the persuasive reasoning of *Washburn, Ball, Lincoln National*, and *Confederation Life* regarding RICO civil suits, all of which were decided after *Shearson* and yet concluded that the RICO claims were extinguished by death, and the comments in *Genty*, also written after *Shearson* yet finding it not to control.

For all of the foregoing reasons, I believe the Supreme Court of Wisconsin would hold plaintiffs' WOCCA double-damages civil cause of action to be penal in nature. The claim died when Keiser died, and thus the estate cannot be substituted for Keiser on that count.

III. Survival of WOCCA Claim Against Gerald

Gerald, however, is another matter. Gerald argues that because the claim against Keiser no longer exists and its **[**27]** liability is secondary to Keiser's, the plaintiffs' WOCCA claim against it must abate as well. Gerald cites *Wiechmann v. Huber, 211 Wis. 333, 248 N.W. 112 (1933)*, for support. In *Wiechmann*, the plaintiff sued an insured and his insurance carrier for damages arising from the death of her husband, who was killed in an automobile accident while riding with the insured. The insured died shortly after the collision and plaintiff conceded that any action against him abated with his death under the survival statute existing at that time. *Id. at 334*. She nevertheless asserted a claim against the insurance company pursuant to the insured's policy. The Supreme Court of Wisconsin found that no action against the insurer could lie either. *Id. at 334-36*.

[*1159] *Wiechmann* is distinguishable from the present situation, as it was not based upon reasons of respondeat superior at all. The court instead based its decision on the language of the policy, which insured against "loss and/or expense arising or resulting *from claims upon the assured . . .*.", *id. at 335* (emphasis added), and the terms of state statutes, which indicated that in a motor vehicle case any insurer could be held **[**28]** directly liable and made a proper defendant "in any action brought by plaintiff *on account of any claim against the insured," id.* As the court stated,

> It is quite impossible to read into the statutes an intent to create a liability on the part of the insurance carrier completely dissociated from the liability of the insured. The terms of this policy are as positive as may be to the effect that the liability of the insurer depends upon the liability of the insured.
> ***
> …Nothing in [other] statues affects the terms of the policy here considered, which requires as a substantive matter a valid existing claim against the insured before a liability against the insurer in favor of a third party beneficiary can exist.

Id. at 336.

Plaintiffs, however, offer a case directly on point: *Soraghan v. Henlopen Acres, Inc., 236 F. Supp. 489 (D. Del. 1964)*. In *Soraghan* defendant Corkran died after commencement of the lawsuit, and it was plain that the defamation cause of action against Corkran abated with his death under the Delaware survival statute. *Id. at 489-90*. The district court found the plaintiff's respondeat superior claim against Corkran's former **[**29]** employer did *not* abate, even in the face of an argument virtually identical to Gerald's here. *Id. at 490-91*. The court found that while Corkran's death forestalled any judgment of liability against him personally or against his estate, it was not as if the plaintiff's claim had been adjudged to be without merit.

> Certainly the court would not dispute the argument that ***HN14***[] where Corkran was acquitted of a libel, presumably on the grounds that he had committed none, his corporation could not be liable.. . . But the situation is quite different where by death or by operation of law an action against the corporation's agent has abated. This is not the same as a judgment on the merits and should not bar the plaintiff from getting such a judgment against the corporation.
> ***
> . . . Once [the employee] has acted, if he has acted in the corporation's behalf, any stigma which arises due to his act immediately attaches to the corporation. The subsequent death of the agent tortfeasor does not alter this.

Id. at 490-91.

The court has found extremely little case law on the subject, but what there is comports with *Soraghan*. In *Manson v. Wabash R.R. Co., 338* ***[**30]*** *S.W.2d 54 (Mo. 1960)* (en banc), the Supreme Court of Missouri considered whether a respondeat superior case against employer Wabash abated when the two employees charged with assault and false imprisonment died while the case was pending. The court found that the causes of action against Wabash did not die with the employees because the master and servant "were jointly and severally liable for assault and false imprisonment committed by the servant in the scope and course of his employment.. . . ***HN15***[] Where there is joint and several liability the injured person may sue all defendants jointly, or either separately." *Id. at 57*.

In *Biel, Inc. v. Kirsch, 240 Ind. 69, 161 N.E.2d 617 (Ind. 1959)*, the Supreme Court of Indiana expressly disapproved of an appellate court's holding that a cause of action against a corporate defendant based solely upon the theory of respondeat superior abated for any amount in excess of what the law would have permitted against the estate of the corporate defendant's deceased driver. *Id. 161 N.E.2d at 618*. The higher court concurred, however, in the result based upon other grounds and therefore did not itself address the issue. Comments of two judges of the Supreme **[**31]** Court of Indiana in regard to the transfer of the case to that court for review are instructive, though:

> The fact that upon the death of an agent the liability in a negligence case is limited or extinguished against his estate, should **[*1160]** not accrue to the benefit of the principal and release the principal also from liability.
> There is no analogy in the instant case and one in which a jury or court finds the agent not guilty of negligence for which the principal at the same time is held liable. The negligence still exists, even though the agent may die or his liability be limited by statute in the case before us.
> . . . It was not intended a principal should get the benefit of a special privilege allowed a deceased agent's estate by limiting the amount of recovery therefrom in case of death.
> ***

> It likewise follows that a privilege personal to an agent or his estate may not be claimed or taken advantage of by a principal to avoid liability.

Biel, Inc. v. Kirsch, 159 N.E.2d 575, 575-76 (Ind. 1959).

In *Parrott v. Ellis Trucking Co., 179 F. Supp. 534, 534-35 (S.D. Ind. 1960))*, a district court in Indiana, based upon *Biel* and the comments quoted above, struck an **[**32]** employer's affirmative defense to a respondeat superior claim where the defense was based upon the fact that the employee tortfeasor had died.

The reasoning of these cases is persuasive. Gerald's alleged respondeat superior liability arose at the time Keiser committed the alleged acts and those facts have not changed. Once Keiser acted, any stigma upon Gerald immediately attached and has not been proven false. The facts necessary to find Gerald liable -- such as whether Keiser acted within the scope of his employment -- can still be established.

As noted by some of the courts above, the current situation is not equivalent to one where the employee has been exonerated and therefore the employer is as well. The situation instead is like one where the employee has been given relief from civil liability because of a type of immunity. *See* *Restatement (Second) of Torts § 217 cmt. b* ("immunity" denotes the absence of civil liability for what would be a tortious act but for the actor's status). ***HN16***[] An agent's immunity from civil liability for an act does not translate into a defense for the principal. *Restatement (Second) of Torts § 217(b)(ii)*. "It has been held that a finding of no civil **[**33]** liability on the part of an employee because of an immunity doctrine does not shield the employer, since the servant's negligence or wrongful act, and not the servant's own civil liability, establishes the employer's liability under respondeat superior." 27 Am.Jur.2d § 469 (1996). Immunities are not delegable and are available only to persons who have them. *Restatement (Second) of Torts § 217 cmt. b*. Gerald provides no legal basis upon which to transfer to it the personal benefit created by Wisconsin's survival laws. The fact that Wisconsinites believe estates should not face punitive claims does not automatically convert into a public policy benefitting corporations whose employees die.

While the punitive nature of a WOCCA claim raises questions regarding the applicability of the respondeat superior doctrine at all, *see, e.g.,* *D & S Auto Parts, Inc. v. Schwartz, 838 F.2d 964 (7th Cir. 1988)*, that is a question for another day. In the meantime, the WOCCA claim abates against Keiser but not against Gerald.

IV. Motion to Dismiss or Transfer

A. Personal Jurisdiction and Dismissal

Pursuant to *Federal Rule of Civil Procedure 12(b)(2)* the administrator of Keiser's estate **[**34]** contends that this court has no personal jurisdiction over Keiser or it and the case therefore must be dismissed. ***HN17***[] Plaintiffs have the burden of proving personal jurisdiction exists, *Dietrich by Padway v. Wisconsin Patients Compensation Fund, 169 Wis. 2d 471, 478, 485 N.W.2d 614 (Ct. App. 1992)*, although the burden is not a heavy one, 5A Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1351 (2d ed. 1990). ***HN18***[] In support of jurisdiction the plaintiffs have proffered the allegations in their complaint as well as deposition testimony and affidavits, which the court may receive and weigh to assist it in determining the jurisdictional facts. *O'Hare Int'l Bank v. Hampton, 437 F.2d 1173, 1176 (7th Cir. 1971)*.; *Cram v. Medical College of Wis., 927 F. Supp. 316, 319 (E.D. Wis. 1996)*. The plaintiff need only make a prima facie showing that personal jurisdiction exists, and the court will take as true the plaintiffs' allegations **[*1161]** and resolve all factual disputes in their favor. *O'Hare, 437 F.2d at 1176*; *Cram, 927 F. Supp. at 319*.

HN19[] A federal court sitting in diversity analyzes personal jurisdiction by first determining whether the forum state's long-arm **[**35]** statute confers personal jurisdiction and then deciding whether personal jurisdiction would comport with due process requirements. *Federated Rural Elec. Ins. Corp. v. Inland Power & Light Co., 18 F.3d 389, 391, 394 (7th Cir. 1994)*. ***HN20***[] In Wisconsin, compliance with the long-arm statute is presumed to be compliance with due process requirements; defendants have the burden of overcoming the presumption. *Marsh v. Farm Bureau Mut. Ins. Co., 179 Wis. 2d 42, 53, 505 N.W.2d 162 (Ct. App. 1993)*.

The plaintiffs rely on only one subsection of the Wisconsin long-arm statute, the specific jurisdiction language of ***HN21***[] *Wis. Stat. § 801.05(4)(a)*, which provides for personal jurisdiction

> in any action claiming injury to person or property within this state arising out of an act or omission outside this state by the defendant, provided in addition that at the time of the injury . . .
>
> (a) Solicitation or service activities were carried on within this state by or on behalf of the defendant[.]

While a single act causing injury may be enough to satisfy due process concerns, the long-arm provision cited requires at least one additional contact -- a solicitation or service activity **[**36]** -- to meet the test of jurisdictional sufficiency. *Dietrich, 169 Wis. 2d at 479*. ***HN22***[] The long-arm statute, though, is to be liberally construed in favor of exercising jurisdiction. *Schroeder v. Raich, 89 Wis. 2d 588, 593, 278 N.W.2d 871 (1979)*; *Dietrich, 169 Wis. 2d at 478*.

The estate argues that Keiser himself never conducted solicitation or service activities within Wisconsin at the time of the injury and that none of Michael's solicitations can be considered "on behalf of" Keiser in order to confer personal jurisdiction. I disagree for two reasons.

First, plaintiffs have presented prima facie evidence that Keiser himself conducted solicitation activities within Wisconsin during the time of plaintiffs' injuries. Michael stated at deposition that when he and Keiser discussed how they could fool Nick Schimpf and his accountant into believing that Michael's account at Gerald was large, Keiser "suggested to me that if I make a deposit with a check, a personal check that it would show as being hard funds for several days". Michael's Dep. at 16-17.

The estate urges that I disregard Michael's testimony because he is an admitted crook and therefore unreliable. While the estate **[**37]** has not proffered any affidavits of its own in regard to its motion, it points to some contradictory testimony from Keiser's deposition, which plaintiffs included with their response. ***HN23***[] All credibility determinations must be made in plaintiffs' favor at this stage, however. *O'Hare, 437 F.2d at 1176*; *Cram, 927 F. Supp. at 319*. Plaintiffs need only establish personal jurisdiction with prima facie evidence, and taking Michael's testimony as true, they have, as the above is a solicitation by Keiser for money to put in a Gerald account. Moreover, Keiser's own deposition testimony supports the exercise of jurisdiction. Although Keiser disavowed any participation in the scheme to fake the amount in the account, his own deposition indicates he did tell Michael "you can wire the money in or you can give us a check" and that in response Michael sent him a check for $ 441,000, which was deposited into Michael's Gerald account. Keiser's Dep. at 95, 98.

The estate contends that the above solicitation cannot count because it was not made to one of the plaintiffs, basing its argument on Seventh Circuit dicta in *Federated, 18 F.3d at 393* ("according to Wisconsin law, before solicitation **[**38]** triggers *§ 801.05(4)(a)* it must be made by the defendant *to the plaintiff*" (emphasis added)). The cases upon which the Seventh Circuit relied, *Pavlic v. Woodrum, 169 Wis. 2d 585, 486 N.W.2d 533 (Ct. App. 1992)*, and *Fields v. Playboy Club of Lake Geneva, Inc., 75 Wis. 2d 644, 250 N.W.2d 311 (1977)*, however, do not specify that solicitations must be "to the plaintiff" and the text of *section 801.05(4)(a)* does not so require. *Fields*, in fact, involved a situation where solicitations made by the defendant did not have any relation to the cause of action whatsoever. In *Fields*, Audi was sued for product **[*1162]** defects that allegedly caused an automobile accident in which the plaintiff was injured. Evidence showed that during the year prior to the car accident 25 advertisements for Audi appeared in magazines widely distributed in Wisconsin, inviting potential customers to phone toll-free numbers to find the nearest dealer. According to the Supreme Court of Wisconsin these advertising solicitations were sufficient to make Audi amenable to jurisdiction under 801.05(4)(a) (at that time codified as 262.05(4)(a)) for purposes of the car accident lawsuit. According to the court the evidence was "uncontroverted **[**39]** that solicitation of the Audi product was carried on in the state." *Fields, 75 Wis. 2d at 650*. *See also* *id. at 651* (noting three facts required for jurisdiction as (1) an act outside the state by the defendant, (2) injury to a person within the state related to the foreign act, and (3) "some additional contact, *not necessarily related to the injury sued on*, which links the defendant to the state (emphasis added)) (quoting Wis. Stat. § 262.05 revision notes). Wisconsin law controls this issue and it does not require the additional contact for purposes of the long-arm statute to be made to the plaintiffs themselves.

Fields and *Pavlic* do indicate, however, that ***HN24***[] in order for a solicitation to trigger personal jurisdiction the person soliciting must anticipate a direct or indirect financial benefit and thereby subject himself to the jurisdiction of the courts of the state where the solicitation occurs. *Fields, 75 Wis. 2d at 653*; *Pavlic, 169 Wis. 2d at 592*. Here, that requirement is met. The plaintiffs' Amended Complaint alleges that Keiser received commissions from all funds invested through him with Gerald. Even taking Keiser's version of events as true, he **[**40]** could anticipate either a direct or indirect financial benefit from a $ 441,000 deposit to one of his accounts. Thus, Keiser's statement telling Michael to send him a check constitutes a solicitation for purposes of long-arm jurisdiction.

Second, construing the Wisconsin long-arm statute broadly as I must, Michael's solicitations of his relatives are considered solicitations "on behalf of" Keiser, based on the theory of apparent agency. [2] In *Pavlic, 169 Wis. 2d at 591*, the Wisconsin Court of Appeals analyzed whether principles of apparent authority allowed personal jurisdiction over a defendant. While determining in that case that apparent agency did not exist, the court implicitly recognized the use of apparent authority for purposes of long-arm jurisdiction. In this case, the apparent authority doctrine sweeps Michael's actions into the category of those "on behalf of" Keiser.

[41]** ***HN25***[] An agency exists if there has been a manifestation by the principal to the agent that the agent may act on the principal's behalf. *Id.* Apparent agency is created by conduct of the principal that, reasonably interpreted, causes *a third person* to believe that the principal consents to have an act done on his behalf by the person purporting to act for him. *Id.* For agency by apparent authority to exist, three elements must be present: (1) acts by the agent or principal justifying belief in the agency; (2) knowledge thereof by the principal sought to be held bound; and (3) reliance thereon by the plaintiffs, consistent with ordinary care and prudence. *Pamperin v. Trinity Memorial Hospital, 144 Wis. 2d 188, 203, 423 N.W.2d 848 (1988)*.

In this case, the Amended Complaint alleges, and no evidence presently contradicts, that at one point in 1990 Eve Schwarzmann telephoned Keiser to inquire about her investment and Keiser "assured [her] that the funds were invested with Gerald, Inc. and that the investment was safe." Amended Complaint at P 25. At deposition Michael stated that Keiser met with Michael's parents in Chicago and "confirmed" the accuracy of forged account statements **[**42]** indicating $ 1,500,000 in the Schwarzmanns' account. Michael's Dep. at 14-15. Also, Michael's deposition testimony indicates that when he, Nick Schimpf and Nick's accountant visited Keiser at Gerald's office in Chicago **[*1163]** in 1991, Keiser told them that the account held hard funds and that a lot of trading was going on. Michael's Dep. at 16-18. Keiser stated at deposition that he "always operated with Mr. [Michael] Schwarzmann under the guise that [Michael] was going to refer large accounts to me, and a lot of business." Keiser's Dep. at 99-100. Keiser's own actions in responding to Eve Schwarzmann's telephone call, personally meeting with the Schwarzmanns, and meeting with Nick Schimpf and his accountant, constitute conduct by Keiser himself that justifies plaintiffs' reasonable belief that they were such account holders referred by Michael to Keiser. All of these acts by Keiser justified the plaintiffs' reasonable belief that Michael was soliciting money for investment with Keiser and that by giving Michael money to invest they were investing with Keiser. In his role as solicitor of money from the Schimpfs he acted as the purported agent of Keiser, with Keiser's apparent consent.

[43]** The elements of apparent authority are met by prima facie evidence. Keiser knew that his actions reasonably caused the plaintiffs to believe that he consented to and authorized Michael to solicit money from them to be turned over to Gerald for investment. And the plaintiffs' Amended Complaint asserts (and no evidence tendered by the estate contradicts) that they relied upon Keiser's comments and assurances when giving more money to Michael. Thus Michael's solicitations can be considered "on behalf of" Keiser for purposes of establishing personal jurisdiction.

---

[2] The parties' briefs on the personal jurisdiction matter focused mainly on whether Michael's solicitations of his relatives could be attributed to Keiser based on a theory of conspiracy. Because personal jurisdiction exists based upon Keiser's own solicitation and the doctrine of apparent agency I do not need to reach that issue of first impression.

The estate really has not attempted to rebut the presumption that constitutional concerns are satisfied. I find in any event that Keiser had minimum contacts with the Wisconsin forum such that maintenance of the suit here does not offend traditional notions of fair play and substantial justice. *See* *International Shoe Co. v. Washington, 326 U.S. 310, 316, 90 L. Ed. 95, 66 S. Ct. 154 (1945)*. Keiser's conduct and connection with Wisconsin were such that he should reasonably have anticipated being haled into court in this state. *See* *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 62 L. Ed. 2d 490, 100 S. Ct. 559* ***[**44]*** *(1980)*. As a result, this court has personal jurisdiction over Keiser and his estate.

B. Venue and Transfer

As an alternative to dismissal on jurisdiction grounds, the estate argues that venue is improper in this district and that the case should be transferred to the Northern District of Illinois. ***HN26***[] A diversity case may be brought in "a judicial district where any defendant resides, if all defendants reside in the same State" or "a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred. . .." *28 U.S.C. § 1391(a)(1)*, *(2)*.

While the estate is correct that venue would lie in the Northern District of Illinois under subsection 1391(a)(1), that does not mean that venue is improper here. According to the complaint and plaintiffs' affidavits, a substantial portion of the underlying events occurred in Wisconsin between Michael and his relatives, satisfying subsection 1391(a)(2). Therefore, a transfer pursuant to *28 U.S.C. § 1406(a)* is not appropriate.

HN27[] Title *28 U.S.C. § 1404(a)* allows a transfer "for the convenience of parties and witnesses, in the interest of justice." I find that keeping the case here is more convenient for the **[**45]** parties and witnesses and in the interest of justice. Gerald indicates that the current venue also is more convenient for it, as its attorneys are located here. All twelve individual plaintiffs, who also will be witnesses, reside in Wisconsin. Documentary evidence is mainly in the plaintiffs' hands and thus in Wisconsin. And Michael, who will be called to testify by the plaintiffs and/or Gerald, is located in Wisconsin and subject to this court's subpoena power, but would not be within the Northern District's subpoena power if the case were transferred. This district is more convenient for all involved, with the sole exception of the administrator, and the interest of justice requires that it remain here.

V. Conclusion

THEREFORE IT IS ORDERED that the motion for reconsideration is **GRANTED** and upon reconsideration the motion for substitution is **GRANTED IN PART** in that Charles F. Marino, administrator of the estate of Edward F. Keiser, is **SUBSTITUTED** for defendant Edward F. Keiser in regard to **[*1164]** counts one and three of the Amended Complaint. The motion for substitution is **DENIED** in regard to count two of the Amended Complaint.

IT FURTHER IS ORDERED [46]** that count two of the Amended Complaint is **DISMISSED** as to Keiser only.

IN ADDITION, IT IS ORDERED that the estate administrator's motion to dismiss or transfer is **DENIED**.

Dated at Milwaukee, Wisconsin, this *24* day of April, 1998.

HN1[] **Judicial Officers, Judges**

The appellate court reviews matters not within its exclusive jurisdiction, such as matters relating to discovery, under the applicable law of the regional circuit in which the district court sits. *Fed. R. Civ. P. 72(a)* provides that when objecting to a magistrate judge's non-dispositive order a party must serve and file objections with the district court judge within 10 days after service of the order. The Ninth Circuit has held that a party who fails to file timely objections to a magistrate judge's non-dispositive order with the district judge to whom the case is assigned forfeits its right to appellate review of that order.

Patent Law > ... > Defenses > Estoppel & Laches > General Overview

HN5[] Estoppel & Laches, Elements

Under "equitable estoppel," a patentee may be estopped from asserting a claim of infringement. Equitable estoppel requires the alleged infringer to prove by a preponderance of the evidence that (1) the patent owner, through misleading conduct, led the alleged infringer to reasonably infer that the patent owner did not intend to enforce its patent against the alleged infringer; (2) the alleged infringer relied on this conduct; and (3) due to the reliance, the alleged infringer will be materially prejudiced if the patent owner is allowed to proceed on its claim. A finding that a patentee is equitably estopped from asserting a claim is committed to the sound discretion of the trial court.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Patent Law > Subject Matter > General Overview

HN6[] Standards of Review, De Novo Review

Whether a claim is directed to statutory subject matter is a question of law which the appellate court reviews de novo.

Patent Law > ... > Utility Patents > Process Patents > Computer Software & Mental Steps

HN7[] Process Patents, Computer Software & Mental Steps

The first step of the Freeman-Walter-Abele test is to determine whether a mathematical algorithm is recited directly or indirectly in the claim, and the second step is to determine whether the claimed invention as a whole is no more than the algorithm itself.

Patent Law > ... > Utility Patents > Process Patents > Computer Software & Mental Steps

Patent Law > ... > Specifications > Description Requirement > General Overview

HN8[] Process Patents, Computer Software & Mental Steps

Claims written in means-plus-function format contain statutory subject matter even if functional phrases of the means limitations recite mathematical calculations.

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN9[] **Attempts to Monopolize, Elements**

In order for a plaintiff to prevail on Sherman Act claims, he must prove that a dangerous probability of the defendant achieving monopoly power exists. He therefore must define a relevant market, establish that the defendant possessed market power, and show an actual adverse effect on competition. Appellate courts apply regional circuit law in determining antitrust issues such as relevant market and market power. All circuits review a district court's grant of summary judgment de novo, applying the same standards as would a district court.

Opinion by: MICHEL

Opinion

MICHEL, *Circuit Judge*.

Roger Schlafly appeals the decisions of the United States District Court for the Northern District of California (1) granting defendants Public Key Partners' ("PKP's") and RSA Data Security, Incorporated's ("RSA's") (collectively, "defendants'") motion for protective order, *Schlafly v. Public Key Partners*, C-94 20512 SW (PVT), slip op. at 4 (N.D. Cal. July 19, 1995); (2) denying Schlafly's motion to compel production of documents, Transcript of Hearing on Motion to Compel, at 11 (N.D. Cal. July 21, 1997); (3) denying Schlafly's motion for summary judgment that defendants are estopped from asserting United States Patent No. 4,405,829 (the " '829 patent") against him and that the '829 patent is invalid as not directed to statutory subject matter under *35 U.S.C. § 101 (1994)*, **[*2]** *Schlafly v. Public Key Partners*, C-94 20512 SW (PVT), slip op. at 2, 7, 11 (N.D. Cal. Aug. 22, 1997); and (4) granting defendants' motion for summary judgment on Schlafly's antitrust and state unfair business practices claims, *Schlafly v. Public Key Partners*, C-94 20512 SW (PVT), slip op. at 2 (N.D. Cal. Aug. 29, 1997). This appeal was submitted for our decision on the briefs on April 1, 1998, without oral argument.

We hold that (1) Schlafly is precluded from appealing the 1995 protective order because of his failure to object to the magistrate judge's decision within the time provided under *Fed. R. Civ. P. 72(a)*; (2) the magistrate judge did not abuse his discretion in denying Schlafly's motion to compel production of documents in 1997; (3) the district court did not err in refusing to estop RSA from enforcing the '829 patent against Schlafly and in holding that the claims of the patent had not been shown to be directed to non-statutory subject matter; and (4) the district court did not err in dismissing Schlafly's antitrust and state unfair business practices claims on summary judgment. We therefore *affirm* the decision of the district court.

BACKGROUND

In 1994, **[*3]** defendants learned that Information Security Corporation was planning to sell products developed by Schlafly to American Telephone & Telegraph Company, Inc. ("AT&T") for resale by AT&T. Defendants believed that the sale of these products violated the terms of the consent judgment between RSA and Schlafly involving the latter's alleged infringement of the '829 patent. Consequently, PKP wrote to AT&T and demanded that AT&T cease distribution and marketing of the products. Several months later, Schlafly wrote to PKP and demanded that PKP refrain from telling others that he had breached the consent judgment or had infringed the '829 patent. PKP wrote back, stating that Schlafly's letter was "defectively vague" and that he had admitted to infringing numerous patents. *Schlafly*, slip op. at 5 (Aug. 22, 1997).

Later in 1994, Schlafly, appearing *pro se*, filed a complaint in the Northern District of California alleging the invalidity of many of defendants' patents, including the '829 patent and United States Patent No. 4,995,082 (the " '082 patent"), and alleging violation of federal antitrust laws and state unfair business practices laws. In 1995, defendants successfully petitioned **[*4]** the court for a protective order to prevent the disclosure of proprietary information to Schlafly. The protective order provided a two-tiered organization of confidential information. Schlafly had access to the first tier entitled "CONFIDENTIAL BUSINESS INFORMATION PROTECTED BY COURT ORDER," but Schlafly had no access to the second tier entitled "CONFIDENTIAL -- ATTORNEY'S EYES ONLY" because of his status as a non-attorney litigant and a direct competitor of the defendants.

In granting the protective order, the magistrate judge reasoned that ordinarily, the "ATTORNEY'S EYES ONLY" limitation protects confidential information from possible misuse by the opposing party, yet allows access to opposing counsel for litigation purposes. Here, however, because Schlafly was appearing *pro se*, the court recognized that the limitation would essentially bar Schlafly from seeing certain evidence at all. The court analyzed whether such a protective order was necessary and determined that, because Schlafly and defendants were direct competitors, the protective order was warranted. The district court, however, recommended to Schlafly that he either obtain legal representation or that he retain **[*5]** an "independent expert consultant" who would be allowed to have access to the information designated "CONFIDENTIAL -- ATTORNEY'S EYES ONLY" and be able to advise Schlafly accordingly. *See Schlafly*, slip op. at 2 (July 19, 1995). Schlafly, however, obtained neither legal counsel nor an independent expert consultant.

In 1997, Schlafly filed, *inter alia*, a motion to compel defendants to produce certain documents. The magistrate judge, however, denied the motion holding that the discovery requests were overly broad and that Schlafly did not carry his burden to tailor his discovery requests with "reasonable particularity" under *Fed. R. Civ. P. 34*.

Schlafly also filed a motion for summary judgment that the '829 patent was invalid for failure to claim statutory subject matter under *35 U.S.C. § 101 (1994)*, and a motion for a declaration of noninfringement of the '082 patent. RSA opposed Schlafly's motion on the '829 patent and filed a counter-motion for summary judgment. RSA also filed a counter-motion for dismissal of Schlafly's claims relating to the '082 patent for absence of an actual case or controversy. *Schlafly*, slip op. at 5 (Aug. 22, 1997). PKP, joined by RSA, moved **[*6]** for summary judgment on Schlafly's antitrust and state unfair business practices claims for failure to produce any evidence to support his allegations. *Schlafly*, slip op. at 2 (Aug. 29, 1997). The district court denied Schlafly's motion and granted RSA's motion regarding the validity of the '829 patent, and the district court dismissed Schlafly's claim on noninfringement of the '082 patent for lack of an actual case or controversy. [1] *See Schlafly*, slip op. at 2 (Aug. 22, 1997). Subsequently, the district court granted PKP's motion for summary judgment on Schlafly's antitrust and unfair business practices claims. *See Schlafly*, slip op. at 2 (Aug. 29, 1997). Schlafly timely appealed to this court. We have subject matter jurisdiction under *28 U.S.C. § 1338 (1994)*.

DISCUSSION

I. The Discovery Orders

Schlafly asserts that one reason the court denied his summary judgment motions **[*7]** is that the earlier adverse discovery decisions prevented him from obtaining relevant documents he needed to prevail on summary judgment. Hence, we address these decisions.

---

[1] Schlafly has not argued for reversal of the decision of the district court relating to the '082 patent.

A. The Protective Order

Schlafly argues that the protective order entered on August 29, 1995, is unfair because the category "CONFIDENTIAL -- ATTORNEY'S EYES ONLY" prohibited Schlafly from looking at the specified documents, even though he was acting as his own attorney. ***HN1***[] We review matters not within our exclusive jurisdiction, such as matters relating to discovery, under the applicable law of the regional circuit in which the district court sits, in this case the Ninth Circuit. *See* *Serrano v. Telular Corp., 111 F.3d 1578, 1584, 42 U.S.P.Q.2D (BNA) 1538, 1543 (Fed. Cir. 1997)*.

Fed. R. Civ. P. 72(a) [2] provides that when objecting to a magistrate judge's nondispositive order a party must serve and file objections with the district court judge within 10 days after service of the order. Schlafly did not do so. The Ninth Circuit has held that "a party who fails to file timely objections to a magistrate judge's nondispositive order with the district judge to whom the case is assigned forfeits its right to appellate **[*8]** review of that order." *Simpson v. Lear Astronics Corp., 77 F.3d 1170, 1174 (9th Cir. 1995)*. It cannot be disputed that Schlafly did not object to the entry of the protective order within the time allotted by *Fed. R. Civ. P. 72(a)*; therefore, following *Simpson*, we hold that Schlafly has forfeited his right to appellate review of that order.

Schlafly argues, however, that his status as a *pro se* litigant entitles him to a more lenient interpretation of the rules. We cannot agree. The plaintiff in *Simpson* who forfeited his right to appellate review was acting on his own behalf as well. *Id. at 1172*.

B. The Order Denying the Motion [*9] to Compel [3]

Schlafly argues that the magistrate judge's July 21, 1997 denial of his motion to compel production of documents should be reversed. Schlafly argues that all of the requested documents, which relate to the PKP partnership and its demise, are relevant and should have been discoverable because they "concerned the PKP patents' validity, scope, licensing, and agreements between the partners to control the patent business. These are all issues that are central to my case. Almost every single document is probably relevant."

HN3[] Schlafly, however, has the burden to state his discovery requests with reasonable particularity and not to make unreasonably cumulative or duplicative requests such that the burden or expense of complying with the requests outweighs their likely benefit. *See Fed. R. Civ. P. 26(b)(2)*, *34(b)*. In denying Schlafly's motion to compel, the magistrate judge found that Schlafly was "requesting every **[*10]** single piece of paper that's been produced in four other litigations plus an arbitration, many of which -- in fact, all of which have protective orders in those cases, issued by other courts and judges." Transcript of Hearing, at 9 (July 21, 1997). The magistrate judge, therefore, denied Schlafly's motion, and Schlafly has not shown us that this denial was an abuse of discretion. We therefore affirm the decision to deny Schlafly's motion to compel.

II. The '829 Patent

Schlafly asserts that the '829 patent is unenforceable based on "partnership estoppel" and is invalid under *35 U.S.C. § 101* for claiming nonstatutory subject matter.

---

[2] *Rule 72*. ***HN2***[] Magistrate Judges; Pretrial Orders

(a) Nondispositive Matters. . . . Within 10 days after being served with a copy of the magistrate judge's order, a party may serve and file objections to the order; a party may not thereafter assign as error a defect in the magistrate judge's order to which objection was not timely made.

Fed. R. Civ. P. 72(a).

[3] Schlafly was represented by counsel in the district court for this motion to compel.

A. Estoppel

Schlafly asserts that RSA should be estopped from enforcing the '829 patent because its former partner, Cylink, has challenged its validity in another lawsuit. Schlafly terms his allegation "partnership estoppel." According to Schlafly, RSA now should not be allowed to enforce its '829 patent "when it had allowed a partner to allege the patent's invalidity in court." However, when Cylink asserted the invalidity of the '829 patent in court, the partnership had dissolved. RSA, therefore, did not "allow" Cylink to assert the **[*11]** patent's invalidity; it had no say in the matter.

HN4[] A patent is presumed valid. *See* *35 U.S.C. § 282 (1994)*. No judgment has been rendered against RSA invalidating its '829 patent. Accepting Schlafly's argument would, therefore, give a binding effect to Cylink's unproven allegations and would vitiate the statutory presumption of validity. This we cannot do. Because the presumption of validity continues, the burden of proof of the elements of estoppel remains on Schlafly.

Schlafly does not cite any patent decisions dealing with "partnership estoppel." Schlafly's reliance on a 1930 California state court decision based on a failed land agreement, *Favali v. Richardson, 285 P. 1062, 1066, 104 Cal. App. 301, 308 (1930)*, is not persuasive. The state court in *Favali* held that an estoppel against one partner arose where the other partner made misleading promises to the plaintiff and the plaintiff relied to his detriment. *See id. Favali*, however, does not support Schlafly's assertion that unproven allegations of patent invalidity by a former partner can support an estoppel barring the patentee from asserting its right to exclude.

The closest doctrine in patent law to Schlafly's **[*12]** "partnership estoppel" is "***HN5***[] equitable estoppel," under which a patentee may be estopped from asserting a claim of infringement. Equitable estoppel requires the alleged infringer to prove by a preponderance of the evidence that (1) the patent owner, through misleading conduct, led the alleged infringer to reasonably infer that the patent owner did not intend to enforce its patent against the alleged infringer; (2) the alleged infringer relied on this conduct; and (3) due to the reliance, the alleged infringer will be materially prejudiced if the patent owner is allowed to proceed on its claim. *See* *A. C. Aukerman Co. v. R. L. Chaides Constr. Co., 960 F.2d 1020, 1041, 22 U.S.P.Q.2D (BNA) 1321, 1335-36 (Fed. Cir. 1992)* (*in banc*). A finding that a patentee is equitably estopped from asserting a claim is committed to the sound discretion of the trial court. *See id.* at 1041, 22 U.S.P.Q.2D (BNA) at 1335.

In order to show equitable estoppel, Schlafly must be able to prove each of the above requirements recited in *Aukerman*. However, he fails all three; he has not demonstrated that anyone made misleading representations that the patent would not be enforced against him or that he relied on any such **[*13]** misrepresentations to his detriment. *See* *Gasser Chair Co. v. Infanti Chair Mfg. Corp., 60 F.3d 770, 776, 34 U.S.P.Q.2D (BNA) 1822, 1826 (Fed. Cir. 1995)* (equitable estoppel requires misleading conduct to lead the alleged infringer to reasonably infer that the patent owner did not intend to enforce its rights). Quite the contrary, RSA had already sued Schlafly under the '829 patent and had him enjoined from infringement. He, therefore, should have been aware that RSA might later enforce its rights in the '829 patent, for it had done so before. Furthermore, the PKP partnership was dissolved in 1995, and the lawsuit filed by Cylink alleging the invalidity of the '829 patent was filed thereafter. Schlafly, however, filed his lawsuit against RSA and PKP in 1994, *prior* to the dissolution of the partnership. Therefore, Schlafly could not have relied to his detriment on any later misleading representations made by either RSA or PKP about the patent's validity. Schlafly, therefore, cannot succeed on his assertion of estoppel, and we affirm the holding of the district court in that regard.

B. Statutory Subject Matter Under *35 U.S.C. § 101*

Schlafly asserts that the '829 patent is invalid **[*14]** for failure to claim statutory subject matter under *35 U.S.C. § 101*. ***HN6***[] Whether a claim is directed to statutory subject matter is a question of law which we review *de novo*. *See* *Arrhythmia Research Tech. v. Corazonix Corp., 958 F.2d 1053, 1055, 22 U.S.P.Q.2D (BNA) 1033, 1035 (Fed. Cir. 1992)*.

Schlafly argues that the '829 patent recites only a mathematical formula, and a mathematical formula alone is not patentable. Schlafly further asserts that the claims of the '829 patent preempt all uses of the recited algorithm and hence fail to pass the *Freeman-Walter-Abele* two-step test for statutory subject matter under *section 101*. *See generally* *In re Abele, 684 F.2d 902, 214 U.S.P.Q. (BNA) 682 (CCPA 1982)*; *In re Walter, 618 F.2d 758, 205 U.S.P.Q. (BNA) 397 (CCPA 1980)*; *In re Freeman, 573 F.2d 1237, 197 U.S.P.Q. (BNA) 464 (CCPA 1978)*. ***HN7***[] The first step of this test is to determine whether a mathematical algorithm is recited directly or indirectly in the claim, and the second step is to determine whether the claimed invention as a whole is no more than the algorithm itself. *See* *In re Alappat, 33 F.3d 1526, 1559, 31 U.S.P.Q.2D (BNA) 1545, 1557 (Fed. Cir. 1994)* (*in banc*) (holding that "the proper inquiry in **[*15]** dealing with the so called mathematical subject matter exception to *§ 101* alleged herein is to see whether the claimed subject matter as a whole is a disembodied mathematical concept, . . . which in essence represents nothing more than a 'law of nature,' 'natural phenomenon,' or 'abstract idea'").

Although Schlafly does not specify what claims of the '829 patent he believes to be invalid, the basis for declaratory judgment jurisdiction rests upon the 1994 letter from PKP to AT&T demanding that AT&T cease distribution and marketing of the products developed by Schlafly. *See Schlafly*, slip op. at 4 (Aug. 22, 1997). As AT&T was not practicing the method of establishing cryptographic communications claimed by the method claims of the '829 patent because it was simply reselling the accused products, declaratory judgment jurisdiction, in the absence of other evidence, rests only on the apparatus claims of the '829 patent. *See* *Grain Processing Corp. v. American Maize-Prods. Co., 840 F.2d 902, 906, 5 U.S.P.Q.2D (BNA) 1788, 1791 (Fed. Cir. 1988)* (holding no "reasonable apprehension" of suit on process claims, but sustaining jurisdiction on product claims).

We therefore address whether the **[*16]** apparatus claims of the '829 patent recite non-statutory subject matter under *section 101*. Each of the apparatus claims of the '829 patent contains limitations drafted in means-plus-function format. Those limitations are therefore limited according to *35 U.S.C. § 112*, P 6 to structure disclosed in the specification and equivalent structures.

This court, *in banc*, has determined that ***HN8***[] claims written in means-plus-function format contain statutory subject matter even if functional phrases of the means limitations recite mathematical calculations. *See* *Alappat, 33 F.3d at 1544, 31 U.S.P.Q.2D (BNA) at 1558*. Therefore, the claims of the '829 patent do not wholly preempt the use of mathematical calculations because the claims are limited to the structure disclosed in the specification and equivalent structures for performing the claimed functions. We therefore affirm the decision of the district court denying Schlafly summary judgment that the '829 patent is invalid.

III. The Antitrust and Unfair Business Practices Claims

Schlafly contends that defendants' partnership and licensing policies violated both *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2 (1994)*, and the California **[*17]** Unfair Business Practices Act, *Cal. Bus. & Prof. Code §§ 17001*, *17046*, *17048*, *17500* (1990).

A. Antitrust Claims

HN9[] In order for Schlafly to prevail on his Sherman Act claims, he must prove that a dangerous probability of RSA or PKP achieving monopoly power exists. He therefore must define a relevant market, establish that defendants possessed market power, and show an actual adverse effect on competition. *See* *Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)* (holding that plaintiff must prove a dangerous probability of achieving monopoly power for an attempted monopolization claim under *section 2* of the Sherman Act); *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1488-89 (9th Cir. 1991)* (holding failure to establish a relevant market defeats a Sherman Act, *section 1* claim).

This court applies regional circuit law in determining antitrust issues such as relevant market and market power. *See* *Nobelpharma v. Implant Innovations, Inc., 141 F.3d 1059, 1998 U.S. App. LEXIS 5564, 1998 WL 122399, *8*

(Fed. Cir. 1998) (holding, *in banc*, that "whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity **[*18]** from ***antitrust law*** is . . . a question of Federal Circuit law," but applying regional circuit law to all other aspects of an antitrust allegation). The Ninth Circuit, like all other circuits, reviews a district court's grant of summary judgment *de novo*, applying the same standards as would a district court. *See* Sicor Ltd. v. Cetus Corp., 51 F.3d 848, 853 (9th Cir. 1995). As did the district court, we agree that Schlafly has failed to make the requisite showing of market power in a relevant market for his claim to survive summary judgment.

Schlafly claims that the relevant market is public key cryptography and cryptography software, with PKP monopolizing the former and RSA the latter. Schlafly, however, does not provide any economic analysis or other evidence to support his mere allegations of relevant market or market power. There is nothing in the record to indicate that anything was unlawful about defendants' patented inventions, licensing practices, or business partnerships. *See* United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966) (distinguishing the willful acquisition or maintenance of monopoly power from its "growth or development **[*19]** as a consequence of a superior product, business acumen, or historic accident").

Schlafly further argues that simply because RSA "is the dominant U.S. vendor of cryptography software," it has market power in the relevant market. Schlafly, however, fails to submit any evidence to support this assertion other than the ownership and licensing of patents. ***HN10***[] Mere possession of a patent, or a family of patents, does not establish a presumption of antitrust market power. *See* Abbott Labs. v. Brennan, 952 F.2d 1346, 1354, 21 U.S.P.Q.2D (BNA) 1192, 1199 (Fed. Cir. 1991) (holding "the commercial advantage gained by new technology and its statutory protection by patent do not convert the possessor thereof into a prohibited monopolist," citing Grinnell, 384 U.S. at 570-71). Furthermore, a patentee may lawfully refuse to issue licenses at all. *See* 35 U.S.C. § 271(d)(4) (a patentee is not guilty of misuse by virtue of having "refused to . . . use any rights to the patent").

Schlafly contends further that RSA's patent licensing policy is unreasonable because RSA refuses to license "toolkits" or allow licensees to purchase "toolkit" products from another supplier. However, under 35 U.S.C. § 271(d) ***[*20]*** (1994):***HN11***[]

> No patent owner . . . shall be denied relief or deemed guilty of misuse or illegal extension of the patent right by reason [that he] . . . (5) conditioned the license of any rights to the patent or the sale of the patented product on the acquisition of a license to rights in another patent or purchase of a separate product, unless, in view of the circumstances, the patent owner has market power in the relevant market for the patent or patented product on which the license or sale is conditioned.

Thus, RSA's decision to restrict its licenses and to retain its "toolkit" rights does not constitute an unlawful practice in the absence of proof that it has market power in the relevant market.

We, therefore, affirm the district court's grant of summary judgment to defendants on Schlafly's antitrust claims.

B. California Unfair Business Practices

HN12[] In order for Schlafly to prevail on his unfair business practices claim, he must show that defendants committed some predicate act that is unfair, unlawful, or fraudulent. *See* Cal. Bus. & Prof. Code § 17001.

Schlafly contends that defendants misused their patents and maintained unfair and unlawful licensing policies **[*21]** because defendants exaggerated the scope of some of their patents and licensed other patents known to be invalid. The evidence, however, even when viewed in the light most favorable to Schlafly, does not show either that statements about the scope of defendants' patents were made in bad faith or that defendants knew that any of the patents were invalid. Furthermore, we note that Schlafly has failed to establish the invalidity of any of these patents during the present litigation.

We therefore affirm the district court's grant of summary judgment in favor of defendants on Schlafly's state unfair business practices claim.

[Omega Homes v. City of Buffalo]

United States District Court for the Western District of New York

April 30, 1998, Decided

97-CV-0680C(M)

Reporter

4 F. Supp. 2d 187 *; 1998 U.S. Dist. LEXIS 6087 **; 1998-1 Trade Cas. (CCH) P72,174

OMEGA HOMES, INC., Plaintiff, -vs- CITY OF BUFFALO, NEW YORK; ANTHONY M. MASIELLO, individually and as Mayor of Defendant City of Buffalo; and ALAN DeLISLE, individually and as Commissioner, Department of Community Redevelopment of Defendant City of Buffalo; MJ PETERSON/FORBES HOUSING CO., DENNIS J. PENMAN, President of Defendant MJ PETERSON/FORBES HOUSING CO.; JAMES MANAGEMENT CORP. and JAMES ANDERSON, President of Defendant JAMES MANAGEMENT CORP., Defendants.

Disposition: [1]** Defendants' motion to dismiss (Items 11, 14, 16) granted. Plaintiff's motion for a preliminary injunction (Item 3) denied as moot. Complaint dismissed.

[HN1][ ] **Higher Education & Professional Associations, Colleges & Universities**

In a motion to dismiss, all facts and allegations in the complaint must be viewed in a light most favorable to the plaintiff. A dismissal is warranted under [Fed. R. Civ. P. 12(b)(6)] only if it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Notably, this generous approach to pleading applies in the antitrust context.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN4[] Exemptions & Immunities, Parker State Action Doctrine

State economic regulation should not be preempted by federal antitrust laws without explicit evidence that such is Congress' will. When a state acts in its sovereign capacity, its actions are immune from federal antitrust scrutiny. A municipality will be immune from antitrust liability only if it acts as an instrumentality of the state, through which the state has clearly and affirmatively chosen to implement its policies. When a state agency, municipality, or other state subdivision claims a state immunity from federal law, it must first identify a "clearly expressed state policy" that authorizes its actions. So long as the resulting anticompetitive activities are a foreseeable consequence of the state delegation, the "clear articulation" standard has been met.

Governments > Public Improvements > Community Redevelopment

Public Health & Welfare Law > Housing & Public Buildings > General Overview

Governments > Local Governments > Finance

HN5[] Public Improvements, Community Redevelopment

N.Y. Gen. Mun. Law § 503 states in part that every municipality is hereby authorized to plan and undertake one or more urban renewal projects and shall have the powers necessary or convenient to carry out and effectuate such project or projects and the purposes and provisions of this article, including but not limited to the powers to cooperate with the federal government and apply for and accept advances, loans, grants, subsidies, contributions and any other form of financial assistance from the federal government, or from the state, county or other public body, or from any sources public or private, for the purposes of this article.

Governments > Public Improvements > Community Redevelopment

Public Health & Welfare Law > Housing & Public Buildings > General Overview

HN6[] **Public Improvements, Community Redevelopment**

N.Y. Gen. Mun. Law § 507 states in part that notwithstanding anything to the contrary contained in this article and notwithstanding the provisions of any general, special or local law applicable to the sale of real property by a municipality, such real property and appurtenances thereto may be sold, leased for a term not exceeding ninety-nine years or otherwise disposed of for the effectuation of any of the purposes of the urban renewal plan in accordance with the urban renewal plan.

Antitrust & Trade Law > ... > US Department of Justice Actions > Civil Actions > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN7[] **US Department of Justice Actions, Civil Actions**

Noerr- Pennington's general principle is that the federal antitrust laws also do not regulate the conduct of private individuals in seeking anticompetitive action from the government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN8[] **Noerr-Pennington Doctrine, Sham Exception**

A "sham" situation involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all, not one who genuinely seeks to achieve his governmental result, but does so through improper means.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN9[] **Jurisdiction, Jurisdictional Sources**

When all federal claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them without prejudice.

Opinion

[*188] DECISION and ORDER

CURTIN, District Judge

INTRODUCTION

Before the court are defendants' motions to dismiss plaintiff's complaint pursuant to *Rules 12(b)(1)* and *12(b)(6) of the Federal Rules of Civil Procedure* and *28 U.S.C. § 1367* (Items 11, 14, 16). Plaintiff responded with an affidavit and a **[**2]** memorandum of law (Items 25 and 26), and defendants filed reply briefs (Items 27, 28, 29). The parties appeared before the court on December 22, 1997, for oral argument.

PROCEDURAL HISTORY

Plaintiff Omega Homes, Inc. ("Omega"), commenced this action on September 2, 1997, with the filing of a summons and complaint (Item 1). Plaintiff alleges that defendants City of Buffalo ("City"), Mayor Anthony Masiello, and Commissioner of Community Development **[*189]** Alan DeLisle (the "City defendants") violated the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2 et seq.*, the Donnelly Act, *New York General Business Law § 340*, and the *New York State Constitution, Articles 1* and *3*, when they granted exclusive development rights for the Willert Park neighborhood in the City of Buffalo to defendants M.J. Peterson/Forbes Housing Co. ("Peterson"), Dennis J. Penman (President of Peterson), James Management Corp. ("James"), and James Anderson (President of James) (the "private sector defendants") (Id.).

On October 17, 1997, plaintiff filed a motion for an Order granting a preliminary injunction pursuant to *Rule 65 of the Federal Rules of Civil Procedure* because plaintiff claims it is threatened **[**3]** with irreparable injury (Item 3). In response, defendants filed motions to disqualify plaintiff's attorney (Items 7, 8, 10). After the court denied defendants' motion to disqualify (Item 24), defendants filed motions to dismiss (Items 11, 14, 16). The parties agreed that the court should address defendants' motions to dismiss (Items 11, 14, 16) before addressing plaintiff's motion for a preliminary injunction (Item 3).

BACKGROUND

Plaintiff is in the business of developing and constructing affordable and subsidized residential housing. Since its formation in 1980, plaintiff has been involved in the development and building of approximately 1,000 residential units in Buffalo and Albany, New York. A number of these projects have been funded by the United States

Department of Housing and Urban Development ("HUD") and plaintiff has been selected as a "HUD Demonstration Developer" (Item 1, P 2).

Plaintiff claims that the City defendants created an exclusive development arrangement when they gave the private sector defendants the exclusive right to develop, build, and sell all of the 344 new residential housing units in the Willert Park Neighborhood redevelopment project. Plaintiff **[**4]** asserts that these acts are per se unlawful and constitute a restraint of trade, commerce, and competition (Item 1, P 41).

Defendants explain that this project began after HUD issued a "Notice of Funding Availability" ("NOFA") for grants under section 108(q) of the Housing and Community Development Act of 1974 on July 16, 1996, in the Federal Register. *61 Fed. Reg. 37,132*-41. HUD solicited proposals "to undertake large-scale projects that would create Homeownership Zones--proposals designed to reclaim hard-pressed neighborhoods by creating homeownership opportunities for hardworking low- and moderate-income families and serving as a catalyst for private investment, business creation and neighborhood revitalization." *Id. at 37,132*. "Homeownership Zones are intended to make a major impact in distressed neighborhoods by converting vacant, abandoned land and buildings into thriving, vibrant neighborhoods by using single-family homeownership as a catalyst for revitalization." *Id. at 37,134*. The NOFA further stated that "offering these home ownership opportunities to low- and moderate-income residents in designated neighborhoods will provide the foundation for needed commercial **[**5]** and economic development." Id.

HUD's NOFA stated that "construction should be ready to proceed promptly" and "particular attention will be paid to applications that can begin significant construction activities within 60 days of the award of the EDI grant." Id. The NOFA explained that "it is expected that applicants will donate land, commit to construct site improvements and public facilities, waive fees, expedite approvals of permits and plans, and otherwise act to remove impediments to the development of affordable housing." Id. The NOFA further stated that "it is further expected that the applicant will establish extensive partnerships with the private and nonprofit sectors, such as businesses, lending institutions, real estate professionals, builders, educational institutions, nonprofit organizations, religious entities, and other city-wide and community-based organizations." Id. Applicants initially were required to postmark their applications by September 16, 1996, *id. at 37,132*, but on September 9, 1996, this date was extended until October 8, 1996, in the Federal Register. Id. at 47, 523-24.

[*190] The City of Buffalo applied to establish a Homeownership **[**6]** Zone ("HOZO") in the Willert Park neighborhood. Willert Park is within a New York State Economic Development Zone, pursuant to New York General Municipal Law Article 18-B and City Charter § 281 (subzone 1), and is within the City's Federal Enterprise Community ("FEC"). Willert Park qualified as an Economic Development Zone under *New York General Municipal Law § 958* because it is an area of pervasive poverty, high unemployment, and economic distress. Forty-seven percent of the population in this area lives below the poverty level, the unemployment rate is twenty-seven percent, and the owner-occupancy rate is five percent, as compared to fifty-eight percent nationwide (Item 11, Exh. A. (HOZO Application)).

On September 11, 1996, there was a public hearing on the proposal before the Economic Development Committee of the Common Council of the City of Buffalo. At this meeting, Council Member at Large Beverly Gray questioned why there were only two developers, Peterson and James, to work on the project. The Buffalo News, 9/29/96. After debate, a compromise by Council President James Pitts was approved that requires community development officials to devise a plan to include other **[**7]** qualified developers if the city is awarded the federal grant. Id.

The City of Buffalo submitted its application on October 7, 1996, and proposed that a HUD Economic Development Initiative ("EDI") grant and Section 108 loan funds would be used to redevelop the Willert Park neighborhood by subsidizing low- and moderate-income housing. The City's HOZO application indicated that the redevelopment of the Willert Park neighborhood is a continuation of the City's Ellicott Urban Renewal Plan, adopted pursuant to Article 15 of the General Municipal Law. The City also noted that previous development by Peterson and James in the Pratt-Willert project was nationally recognized, and extolled by HUD as an example for HOZO development in HUD's publication "New American Neighborhoods" (Item 19, pgs. 18-19).

In formulating its HOZO application, the City put together a private/public partnership including the City, the New York State Affordable Housing Corporation, M & T Bank, the Ellicott District Community Development Corporation, the Buffalo Urban Renewal Agency, and the Buffalo Neighborhood Revitalization Corporation. The City planned to utilize $ 7,675,000 in Section 108 loan funds, $ 5,000,000 **[**8]** in EDI funds, $ 1,000,000 in New York State Affordable Housing Corporation funds, $ 400,000 in FEC funds, $ 1,200,000 from a Community Development Block Grant ("CDBG"), $ 1,000,000 in City Funds, $ 540,000 in Buffalo Enterprise Development Corporation ("BEDC") funds, $ 1,461,600 in home buyer down payment, and approximately $ 27,770,000 in permanent mortgage financing to provide for funding of land assembly, demolition, site preparation, public improvements, park improvements, and homeownership assistance (Id.).

On April 8, 1997, a press release issued by HUD announced that Buffalo was one of six cities nationwide chosen to receive HOZO EDI grants and Section 108 loan funds. On or about July 22, 1997, HUD formally approved the City's application. According to defendant DeLisle, "the City's application was the highest scoring application among the 97 reviewed by HUD and the City's application was the only one granted in full." (Item 11, P 31).

Based on the foregoing facts, the City defendants and the private sector defendants filed motions to dismiss (Items 11, 14, 16).

DISCUSSION

HN1[] In a motion to dismiss, all facts and allegations in the complaint must be viewed in **[**9]** a light most favorable to the plaintiff. *Hamilton Chapter of Alpha Delta Phi. Inc. v. Hamilton College, 128 F.3d 59, 63 (2d Cir. 1997)*. "A dismissal is warranted under *Rule 12(b)(6)* only if 'it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.'" *Id. at 62-63* (quoting *Conley v. Gibson, 355 U.S. 41, 45- 46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957))*. Notably, "this generous approach to pleading applies in the antitrust context." *128 F.3d at 63* (citing *Furlong v. Long Island College Hosp., 710 F.2d 922, 927 (2d Cir. 1983))*.

[*191] I. Plaintiff's Federal Antitrust Claims

Plaintiff's first four claims against defendants arise under the Sherman Antitrust Act ("Sherman"), *15 U.S.C. §§ 1* and *2 et seq.* ***HN2***[] *Section 1* of Sherman forbids "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1 (1994)*. Plaintiff alleges that defendants violated *Section 1* of Sherman when the City, Masiello, and DeLisle (the "City defendants") granted Peterson, Penman, James, and Anderson (the "private sector defendants") an exclusive **[**10]** right to develop, build, and sell all 344 homes in the Willert Park Neighborhood. Plaintiff argues that this constitutes an unlawful restraint of trade, commerce, and competition, and that defendants conspired to unlawfully restrain competition in violation of *Section 1* of Sherman.

Plaintiff also alleges that defendants violated *Section 2* of Sherman because they attempted to monopolize and destroy competition. ***HN3***[] *Section 2* of Sherman makes it an offense for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states." *15 U.S.C. § 2 (1994)*. Plaintiff argues that Willert Park constitutes an "essential facility" and/or "relevant market" and that maintenance of this "monopoly" will cause plaintiff to suffer irreparable injury and thus defendants should be enjoined from maintaining a monopoly pursuant to *Section 2* of Sherman.

A. Defendants City, Masiello and DeLisle (in their official capacities)

The City defendants argue that their actions are protected from federal ***antitrust law*** under the state action immunity doctrine articulated by the Supreme Court in *Parker* ***[**11]*** *v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)* and its progeny. In *Cine 42nd Street Theater Corp. v. Nederlander Org., Inc., 790 F.2d 1032, 1039 (2d Cir. 1986)*, the Second Circuit explained that Parker's "primary teaching is that ***HN4***[] state economic regulation should not be preempted by federal antitrust laws without explicit evidence that such is Congress' will." The Second Circuit summarized the Parker doctrine in Cine 42nd Street as:

> (1) When a state acts in its sovereign capacity, its actions are immune from federal antitrust scrutiny. *Parker, 317 U.S. at 351-52*. . . .
>
> (2) . . . A municipality will be immune from antitrust liability only if it acts as an instrumentality of the state, through which the state has clearly and affirmatively chosen to implement its policies. *Community Communications Co. v. City of Boulder, [455 U.S. 40, 52-54, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)]*; [*Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 411-13, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)]*. (3) When a state agency, municipality, or other state subdivision claims a state immunity from federal law, it must first identify a "clearly expressed **[**12]** state policy" that authorizes its actions. [*Town of Hallie v. City of Eau Claire, 471 U.S. 34, 40, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)]*.
>
> (4) So long as the resulting anticompetitive activities are a foreseeable consequence of the state delegation, the "clear articulation" standard has been met. Hallie, [*471 U.S. at 42-44*.] . . . (5) The second requirement--"active state supervision"--is no longer required in the case of a municipality, because a municipality, unlike a private party, has no incentive to act other than in the public interest. Hallie, [*471 U.S. at 47*].

Cine 42nd Street, 790 F.2d at 1042-43.

Based on the foregoing, defendant City argues that it is a municipality which is immune from antitrust liability because it acted pursuant to a clearly articulated state policy to combat urban blight. The City further argues that anticompetitive activities are a foreseeable consequence of this policy. In contrast, plaintiff argues that the state action immunity doctrine does not apply because no state legislation contemplates the monopoly and/or restraint of trade under attack. Plaintiff argues that none of the New York State Urban Renewal Statutes **[**13]** cited by defendants evince a clearly articulated **[*192]** state policy to replace competition in the residential and/or affordable housing markets.

Under Parker and its progeny, the City defendants do not enjoy immunity per se, because the City is a municipality and not a state. See *Cine 42nd Street, 790 F.2d at 1042*. However, the City defendants are immune since they acted as an instrumentality of the state pursuant to a clearly expressed state policy and the anticompetitive effects of their actions were foreseeable. See *Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 370-73, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*. New York state law authorizes the City defendants' actions because the City acted pursuant to Article 15 of the New York General Municipal Law entitled "Urban Renewal Law" in applying for the EDI grant from HUD. Specifically, the City defendants acted pursuant to ***HN5***[] *§ 503*, "Powers of Municipalities," that states in pertinent part:

> Every municipality is hereby authorized to plan and undertake one or more urban renewal projects and shall have the powers necessary or convenient to carry out and effectuate such project or projects and the purposes and provisions **[**14]** of this article, including but not limited to the following powers:
> (a) Cooperate with the federal government and apply for and accept advances, loans, grants, subsidies, contributions and any other form of financial assistance from the federal government, or from the state, county or other public body, or from any sources public or private, for the purposes of this article; . . . .

The City defendants also acted pursuant to *§ 507*, "Disposition of Property," of Article 15 of the New York General Municipal Law and *§ 968*, "Disposition of Property," of Article 18-B of the New York General Municipal Law, when they disposed the real property in Willert Park to the private sector defendants. ***HN6***[] *Section 507* states in pertinent part:

> 2. Notwithstanding anything to the contrary contained in this article and notwithstanding the provisions of any general, special or local law applicable to the sale of real property by a municipality, such real property and appurtenances thereto may be sold, leased for a term not exceeding ninety-nine years or otherwise disposed

> of for the effectuation of any of the purposes of the urban renewal plan in accordance with the urban renewal plan: ….

[15]** *Section 968(b)* under Article 18-B, "New York State Economic Development Zones," also supports the actions taken by the City defendants and states:

> (b) Any real or personal property owned by any local governmental entity or the state and located within an economic development zone may be sold or leased to any person pursuant to this section without public bidding or public sale. . . .

(Emphasis added.)

A plain reading of the New York State statutes demonstrates a "clearly articulated" policy under *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 40, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)*, to combat urban blight. One of the purposes of the Urban Renewal Statute was to combat urban decay in "slum or blighted areas." *N.Y. Gen. Mun. Law § 501*. Arguably, without this statute, private enterprise would not enter areas of urban decay and blight. See *Cine 42nd Street, 790 F.2d at 1035*.

Contrary to plaintiff's arguments, it is evident that the New York State Legislature contemplated anticompetitive effects when it passed the Urban Renewal Statutes and the laws establishing Economic Development Zones. In attempting to defeat urban blight, the Urban Renewal Statutes **[**16]** removed obstacles and barriers normally faced in a truly competitive market. Many sections of the General Municipal Law state that a public auction or public bidding is not required. See, e.g., *N.Y. Gen. Mun. Law §§ 507*, *968*. As the Second Circuit stated in Cine 42nd Street, "when the state allows for the creation of model cities and urban redevelopment zones, a reasonable consequence of such redevelopment is that decisions internal to the zones will have effects outside them." *Cine 42nd Street, 790 F.2d at 1047*.

Furthermore, contrary to plaintiff's contentions, *Oberndorf v. City and County of Denver, 653 F. Supp. 304 (D. Colo. 1986)* (Oberndorf I) supports this court's findings **[*193]** in the case at bar. In Oberndorf I, the city of Denver acted under the state urban renewal statutes and formed a redevelopment plan and condemnation scheme. In ruling, the district court did not grant defendants' motion to dismiss because plaintiffs' allegations of a "sham" created an issue of fact as to whether the officials personally gained from the activity. However, the case at bar is distinguishable from Oberndorf I because plaintiff does not allege a "sham" here.

As such, **[**17]** the case at bar is similar to *Oberndorf II, Oberndorf v. City and County of Denver, 696 F. Supp. 552 (D. Colo. 1988)*, aff'd, *900 F.2d 1434* (10th Cir.), cert. denied, *498 U.S. 845 (1990)*. Following discovery after the ruling in Oberndorf I, the District Court granted the defendants' motion for summary judgment and dismissed the complaint because the defendants' actions were consistent with Colorado state law regarding urban renewal, and discovery revealed that the evidence of conspiracy did not reach the level of a "sham." *Oberndorf II, 696 F. Supp. at 560*. In the case at bar, defendants' acting pursuant to the urban renewal statutes and the lack of allegations of a "sham" are similar to Oberndorf II. Accordingly, the federal antitrust claims against the City defendants are dismissed.

B. Defendants Masiello, and DeLisle (in their individual capacities)

Plaintiff has sued defendants Masiello and DeLisle in their individual capacities as well as their official capacities. However, plaintiffs complaint focuses on decisions taken by them in their roles as City officials. In *Fisichelli v. City Known as Town of Methuen, 956 F.2d 12, 15-16 (1st Cir. 1992)*, **[**18]** then Chief Judge Breyer explained that a plaintiff cannot "avoid the ruling of Columbia [v. *Omni Outdoor Advertising, Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)]* simply by substituting, for the name of the town, the names of the town officials who approved the challenged municipal action." As such, I conclude that the actions of which plaintiff complains "are actions taken by a municipal authority, and, for antitrust purposes, they amount to 'an authorized implementation of state policy.'" *Fisichelli, 956 F.2d at 16* (citing *Columbia, 499 U.S. at 370*). Therefore, plaintiff's federal antitrust claims against defendants Masiello and DeLisle in their individual capacities are dismissed.

C. Defendants Peterson, Penman, James, and Anderson

Inasmuch as the City defendants had the authority to act in an anticompetitive manner, the private sector defendants (Peterson, Penman, James, and Anderson) acting in concert with them are also entitled to state immunity. See *Cine 42nd Street, 790 F.2d at 1048*.

Furthermore, the actions of the private sector defendants are protected from federal ***antitrust law*** under the Noerr-Pennington doctrine, which is the **[**19]** "corollary to Parker." *Columbia 499 U.S. at 379*. Noerr-Pennington is a corollary doctrine because Parker "did not purport to immunize from antitrust liability the private parties who urge them to engage in anticompetitive regulation." Id.

Noerr-Pennington is derived chiefly from three Supreme Court decisions: *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523*, reh'g denied, *365 U.S. 875, 5 L. Ed. 2d 864, 81 S. Ct. 899 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*; and *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*. ***HN7***[] Noerr- Pennington's general principle is that "the federal antitrust laws also do not regulate the conduct of private individuals in seeking anticompetitive action from the government." *499 U.S. at 379-80*.

In the case at bar, Noerr-Pennington protects the private sector defendants from federal antitrust liability. Attempts to influence governmental action are immune from antitrust liability under the doctrine even when undertaken for anticompetitive purposes. Miracle **[**20]** *Mile Associates v. City of Rochester, 617 F.2d 18, 20 (2d Cir. 1980)*. Plaintiff's complaint only alleges that the private **[*194]** sector defendants entered into an agreement with the City defendants that, at most, could be considered successful lobbying activity. While plaintiff uses the words "conspiracy," "restraint of trade," and "monopoly" in its complaint, no facts are presented other than the entering into of an agreement. No bad acts are alleged, and no fraud is alleged. "Assuming *arguendo* that the agreement between the City and the Developers restricts competition, they are immune from liability under the antitrust laws." *Juster Assocs. v. City of Rutland. Vt., 901 F.2d 266, 269 (2d Cir. 1990)*.

Furthermore, the "sham exception" to the Noerr-Pennington doctrine, which would overcome Noerr-Pennington immunity, does not apply to invalidate the actions of the private sector defendants in the case at bar. ***HN8***[] "A 'sham' situation involves a defendant whose activities are 'not genuinely aimed at procuring favorable government action' at all, *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 500 n.4, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*, not one 'who 'genuinely **[**21]** seeks to achieve his governmental result, but does so *through improper means,"* *id., at 508, n.10* (quoting *Sessions Tank Liners, Inc. v. Joor Mfg., Inc., 827 F.2d 458, 465, n.5* ([9th Cir.] 1987))." *Columbia, 499 U.S. at 380*.

In *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*, the Supreme Court held "that a 'conspiracy' exception to Noerr must be rejected." *Id. at 383*. While a jury had found that the defendant billboard company had conspired with the City of Columbia to keep the plaintiff, a rival, out of the city, the District Court granted defendants' motions for judgment notwithstanding the verdict. The Court of Appeals reversed and reinstated the verdict. The Supreme Court reversed the Court of Appeals and explained:

> Insofar as the identification of an immunity-destroying "conspiracy" is concerned, Parker and Noerr generally present two faces of the same coin. The Noerr-invalidating conspiracy alleged here is just the Parker-invalidating conspiracy viewed from the standpoint of the private-sector participants rather than the governmental participants. The same factors which, as **[**22]** we have described above, make it impracticable or beyond the purpose of the antitrust laws to identify and invalidate lawmaking that has been infected by selfishly motivated agreement with private interests likewise make it impracticable or beyond that scope to identify and invalidate lobbying that has produced selfishly motivated agreement with public officials.

Id. at 383.

In the case at bar, even viewing the facts and allegations in a light most favorable to plaintiff, the actions of the private sector defendants are protected by the Noerr-Pennington doctrine because their actions, at most, were aimed at procuring favorable government action. Accordingly, the federal antitrust claims against the private sector defendants are dismissed.

II. Plaintiff's State Law Claims

The City defendants assert that plaintiff's state law claims are based on the same facts and circumstances as its federal antitrust claims. They also aver that "the Donnelly Act is modeled on and governed by the same standards as the federal antitrust laws." *Music Center v. Prestini Musical Instruments Corp., 874 F. Supp. 543, 555 (E.D.N.Y 1995)*.

However, "this circuit has not gone **[**23]** so far as to apply the Noerr-Pennington doctrine to state law causes of action." *Suburban Restoration Co., Inc. v. ACMAT Corp., 700 F.2d 98, 101 (2d Cir. 1983)*. In *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 98 L. Ed. 2d 720, 108 S. Ct. 614 (1988)*, the Supreme Court "announced that ***HN9***[] when all federal claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them *without* prejudice." *Tops Markets, Inc. v. Quality Markets. Inc., 142 F.3d 90, 1998 U.S. App. LEXIS 7106*, (2d Cir. 1998) (quoting *Carnegie-Mellon, 484 U.S. at 350*). Thus, under *28 U.S.C. § 1367(c)(3)*, this court declines to exercise supplemental jurisdiction over the state law claims. See **[*195]** id. Therefore, plaintiff's state law claims are also dismissed, without prejudice.

CONCLUSION

Based on the foregoing, defendants' motions to dismiss (Items 11, 14, 16) are granted. Plaintiff's motion for a preliminary injunction (Item 3) is denied as moot. Accordingly, the complaint is dismissed, and the Clerk is ordered to enter judgment for the defendants.

So ordered.

Opinion

[*363] On Remand from the Supreme Court of the United States

Posner, Chief Judge. This case is before us on remand from the Supreme Court, which, overruling *Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*, vacated (*118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* our decision reported at *93 F.3d 1358 (7th Cir. 1996)*. The plaintiffs (collectively "Khan") operated a gas station under contract with the defendant, State Oil Company, whereby State Oil sold Khan gasoline **[**2]** for 3.25 cents less than the retail price suggested by State Oil. Khan was free to charge less than the suggested retail price, though if he did so his profit margin would be reduced--to zero or below if he charged a price 3.25 cents or more below the suggested retail price. But if Khan tried to charge more than the suggested retail price, then the contract required him to rebate to State Oil the difference. This placed an effective ceiling on his retail pricing, which we held, in reliance on *Albrecht,* violated *section 1* of the Sherman Act, *15 U.S.C. § 1*, per se.

The Supreme Court remanded for consideration of whether State Oil's maximum price-fixing violated the Sherman Act under the "Rule of Reason," as distinct from the per se rule, but Khan does not pursue this avenue of relief in the brief that he has filed with us on remand, and we consider it waived. He argues instead that we should return the case to the district court for trial on the theory that the contract placed a floor under his retail price, thus violating the per se rule, left undisturbed by the Supreme Court, against fixing a retailer's minimum **[*364]** price. Although this theory was not emphasized in the previous stages **[**3]** of this litigation, it was mentioned by the district court and we cannot say that it has been waived. But it is plainly without merit.

Khan argues as follows. (1) He was required by the contract to buy gasoline only from State Oil. (2) The suggested retail price was only 3.25 cents higher than the wholesale price that Khan had to pay, so, as a practical matter, he could not afford to sell below the suggested retail price, which thus became his floor price (as well as his lawful ceiling price), since he could not seek a lower price from some other supplier. (3) He could not make up any lost margin on gasoline that he sold below the suggested retail price by selling other grades of gasoline above the suggested retail price, since that would have violated the contract.

Argument (3) is flatly inconsistent with the Supreme Court's decision, for it would convert every maximum price-fixing case into a minimum price-fixing case. It is always possible that the retailer would have used profits obtained by piercing the ceiling imposed on him by his supplier to finance a low-price strategy in some other area of his business.

Argument (2) is frivolous, because it amounts to saying that a supplier **[**4]** must reduce his price to his retailer in order to enable the retailer to cut prices without sacrifice of margin. A supplier is free to charge any price he wants to his retailers. The fact that the higher that price is, the higher the retailer's price will have to be unless he is willing to sell below his cost has never been thought to be price-fixing. Suppose State Oil's suggested retail price for some grade of gasoline was $ 1 per gallon. Then its price to Khan would have been 96.75. If Khan had wanted to sell the gasoline for only 50, would this mean that State Oil would be required by the Sherman Act to reduce its price to Khan to 46.75, so that Khan's margin would be unimpaired? That is the implication of Khan's argument, and it has no basis in ***antitrust law***. We actually addressed the argument in our previous opinion, noting that "***HN1***[] a supplier is under no obligation to lower his price to his customer just because the customer wants to resell the supplier's product for less than the supplier has suggested without sacrificing any of his profit margin." *93 F.3d at 1360*. Nothing in the Supreme Court's opinion suggests that this statement was in error, and we reaffirm it today.

We must **[**5]** consider, however, whether the exclusivity feature in State Oil's contract with Khan can make these very bad arguments good. We think not. Khan does not tell us what the term of the contract is or whether it was terminable without penalty before expiration. Even if it was a long-term contract, there would be no basis for presuming in the absence of evidence (and there is no evidence bearing on this issue) that the effect was to interfere with the competitive pricing of gasoline. There is no suggestion of collusion among suppliers of gasoline, and in the absence of collusion a dealer who wanted to pursue a low-price strategy could seek out a supplier who shared his goals.

For these reasons and those stated by the Supreme Court, by us in our previous decision, and by the district court, we conclude that the suit has no merit, and so the case is remanded to the district court with directions to enter judgment for the defendant and dismiss the suit.

HN1[] **Constitutional Law, Congressional Duties & Powers**

The *Commerce Clause* provides that Congress shall have Power To regulate Commerce with foreign Nations, and among the several States. *U.S. Const. art. I, § 8, cl. 3*. Although the *Commerce Clause* is by its text an affirmative grant of power to Congress to regulate interstate and foreign commerce, the Clause has long been recognized as a self-executing limitation on the power of the States to enact laws imposing substantial burdens on such commerce. This negative restriction on state power is known as the "dormant" *Commerce Clause*.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Balancing Tests

Transportation Law > Interstate Commerce > Per Se Invalidity

HN2[] **Congressional Duties & Powers, Commerce Clause**

To determine whether an ordinance is valid despite its effect on interstate commerce, a court must undertake two inquiries. First, the court must determine whether the ordinance discriminates against interstate commerce. Discrimination against interstate commerce in favor of local business or investment is per se invalid, save in a narrow class of cases in which the municipality can demonstrate, under rigorous scrutiny, that it has no other means to advance a legitimate local interest. If, however, the court finds that the ordinance does not discriminate against interstate commerce, then the court must proceed to the second inquiry: assessing whether the ordinance imposes a burden on interstate commerce that is clearly excessive in relation to the putative local benefits.

Governments > Local Governments > Duties & Powers

HN3[] **Local Governments, Duties & Powers**

Garbage collection and disposal is a core function of local government in the United States. At their option, cities may provide garbage pick-up to their citizens directly or they may rely on a closely regulated private market to provide those services.

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

When a municipal government acts pursuant to a clearly articulated and affirmatively expressed state policy to displace competition with regulation or monopoly public service, the state action doctrine exempts the municipality's anticompetitive activities from antitrust liability. The municipality's anticompetitive conduct need only be a "foreseeable result" of the statutes establishing the state policy to displace competition. It is not necessary for the state legislature to have stated explicitly that it expected the City to engage in conduct that would have anticompetitive effects.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN5[] **Exemptions & Immunities, Parker State Action Doctrine**

The U.S. Court of Appeals for the Eleventh Circuit employs a three-part test to determine whether the "clear articulation" test of the state action doctrine is satisfied for purposes of anti-trust law. The public entity must establish (1) that it is a political subdivision of the state; (2) that, through statutes, the state generally authorizes the political subdivision to perform the challenged action; and (3) that, through statutes, the state has clearly articulated a state policy authorizing anticompetitive conduct.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN6[] **Exemptions & Immunities, Parker State Action Doctrine**

Fla. Stat. Ann. §§ 180.06(5) and *180.13(2)* "generally authorize" a municipality to provide waste collection services, and also constitute a clearly articulated and affirmatively expressed state policy to displace competition in the area of waste collection. It is clear that anticompetitive effects logically would result from this broad authority to regulate.

Opinion by: FEDERICO A. MORENO

Opinion

[*1349] ***ORDER GRANTING DEFENDANT'S MOTION TO DISMISS AND ORDER CLOSING CASE***

This case presents the question of whether a municipality's decision to take control of the local waste collection market violates the *Commerce Clause* or the federal antitrust laws. The Court concludes that the municipality's actions neither discriminate against nor unduly burden interstate commerce, and that the municipality is entitled to state action immunity from the antitrust laws. Therefore, the municipality's motion to dismiss the Amended Complaint is GRANTED.

I. *BACKGROUND*

Pursuant to the Miami Shores Village Code, commercial establishments and residential units must use the waste collection and disposal services of the Village of Miami Shores unless authorized **[**2]** to hire a private, village-licensed waste collector. [1] Plaintiffs' Amended Complaint [2] alleges that this municipal Ordinance violates the *Commerce Clause*, and the Sherman and Clayton Acts.

In their Amended Complaint, Plaintiffs claim that Miami **[**3]** Shores did not begin to enforce the portion of the Ordinance at issue until July 1995. At that time, numerous multi-family buildings and businesses contracted with private collectors for waste collection and disposal services, instead of using Miami Shores' services. On July 11, 1995, Miami Shores' Public Works Director recommended to the Miami Shores Manager that the entities that used private collectors be prohibited from doing so and be required to use and pay for Miami Shores' waste collection and disposal services.

On July 18, 1995, the Miami Shores Council began to enforce the Ordinance based in part on the recommendation of the Public Works Director and the Manager. The Council required all accounts, except for certain accounts which were exempted, to use and pay for Miami Shores' waste collection and disposal services. Plaintiffs allege that the Council began enforcing the Ordinance in order to fund capital improvements that are unrelated to waste collection.

As of the July 18, 1995, Council vote, Plaintiff Bennett Electric Company was utilizing Miami Shores' waste collection and disposal services. In September 1995, Bennett received a $ 3,170.50 statement from Miami Shores **[**4]** for anticipated waste collection and disposal services from October 1, 1995 to September 30, 1996.

Bennett subsequently sent a letter to Miami Shores terminating the municipal waste collection and disposal service. On October 1, 1995, Bennett entered into a one-year contract with a private collector--Environmental Waste Systems ("EWS")--for waste collection and disposal services. Bennett's contract with EWS was for $ 737.52, which Bennett notes is less than 25% of what Miami Shores would have charged for comparable services.

[*1350] In early April 1996, Bennett received a notice from the Public Works Department indicating that the private collectors' licenses would not be renewed and that Bennett would be required to use Miami Shores' waste collection and disposal services. On April 26, 1996, Bennett's owner was informed by the Public Works Director that Bennett could no longer use the private collector, and that Bennett would have to use and pay for Miami Shores' waste collection and disposal services. Bennett was also informed by the Manager that Miami Shores would begin servicing Bennett on June 1, 1996.

In early May 1996, Bennett received a letter from the Public Works Director indicating **[**5]** that the charge for Miami Shores' waste collection and disposal services would be $ 3,589.35. Based on Miami Shores' actions, Bennett was unable to renew its contract with EWS after it expired on September 30, 1996, and Bennett was billed by both EWS and Miami Shores from June 1, 1996 through September 30, 1996.

Plaintiff West Side Sanitation, Inc., d/b/a Lazaro's Waste & Recycling Systems, Inc. ("Lazaro's") alleges that numerous contracts that it had with private commercial residents of Miami Shores to collect and dispose of their waste, as well as contracts that Lazaro's had purchased from another private collector, became valueless and were terminated as a result of Miami Shores' enforcement of the Ordinance.

II. *LEGAL ANALYSIS*

A. The *Commerce Clause*

---

[1] Miami Shores' Village Code § 9-2(a) (the "Ordinance") provides, in pertinent part, that "every commercial establishment and residential unit shall utilize the waste collection services of the village, except as otherwise authorized in this chapter."

[2] Plaintiffs filed their original Complaint, which had named individual members of the Miami Shores Village Council as defendants, on March 21, 1997. Plaintiffs subsequently agreed to the voluntary dismissal of the individual defendants. On February 17, 1998, Plaintiffs filed an Amended Complaint, which named only the Village as a defendant, and which added a claim for declaratory relief under state law regarding the applicability of the Ordinance to source-separated recovered materials as defined by state law.

HN1[] The Commerce Clause provides that Congress "shall have Power . . . To regulate Commerce with foreign Nations, and among the several States . . . ." U.S. Const. art. I, § 8, cl. 3. "Although the Commerce Clause is by its text an affirmative grant of power to Congress to regulate interstate and foreign commerce, the Clause has long been recognized as a self-executing limitation on the power of the States to enact laws **[**6]** imposing substantial burdens on such commerce." *South-Central Timber Dev., Inc. v. Wunnicke, 467 U.S. 82, 87, 81 L. Ed. 2d 71, 104 S. Ct. 2237 (1984)*. This negative restriction on state power is known as the "dormant" Commerce Clause. *Oklahoma Tax Comm'n v. Jefferson Lines, Inc., 514 U.S. 175, 179, 131 L. Ed. 2d 261, 115 S. Ct. 1331 (1995)*.

HN2[] Under pertinent Supreme Court caselaw, this Court must conduct two inquiries to determine whether the Ordinance is valid despite its effect on interstate commerce. [3] First, the Court must determine "whether the ordinance discriminates against interstate commerce . . . ." *C & A Carbone, Inc. v. Town of Clarkstown, 511 U.S. 383, 390, 128 L. Ed. 2d 399, 114 S. Ct. 1677 (1994)*. "Discrimination against interstate commerce in favor of local business or investment is *per se* invalid, save in a narrow class of cases in which the municipality can demonstrate, under rigorous scrutiny, that it has no other means to advance a legitimate local interest." *Id. at 392* (citing *Maine v. Taylor, 477 U.S. 131, 91 L. Ed. 2d 110, 106 S. Ct. 2440 (1986))*.

[7]** If, however, the Court finds that the Ordinance does not discriminate against interstate commerce, then the Court must proceed to the second inquiry: assessing "whether the ordinance imposes a burden on interstate commerce that is 'clearly excessive in relation to the putative local benefits.'" *Id. at 390* (quoting *Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 25 L. Ed. 2d 174, 90 S. Ct. 844 (1970))*.

1. Discrimination Against Interstate Commerce

The parties' arguments as to whether the Ordinance violates the Commerce Clause focus on two recent cases addressing similar Commerce Clause issues: *C & A Carbone, Inc. v. Town of Clarkstown, 511 U.S. 383, 128 L. Ed. 2d 399, 114 S. Ct. 1677 (1994)*, and *USA Recycling, Inc. v. Town of Babylon, 66 F.3d 1272 (2d Cir. 1995)*, *cert. denied*, *517 U.S. 1135, 134 L. Ed. 2d 544, 116 S. Ct. 1419 (1996)*. *Carbone* involved a challenge by a solid waste processing company and related entities to a so-called flow control ordinance adopted by the Town of Clarkstown, New York. The flow **[*1351]** control ordinance basically provided that all nonhazardous solid waste within the town had to be processed at a designated transfer station before **[**8]** leaving Clarkstown. At this transfer station, bulk solid waste would be separated into recyclable and nonrecyclable items. The recyclable waste would then be shipped to a recycling facility, while the nonrecyclable waste would be sent to a landfill or incinerator. Carbone operated a recycling center in Clarkstown, performing many of the functions that the transfer station would perform. For example, Carbone would sort and bale bulk solid waste, and then ship it off to various processing facilities.

Under the flow control ordinance, the processing fees charged at the transfer station would be used to amortize the cost of the station. The local contractor who agreed to construct the facility was permitted to charge haulers a so-called tipping fee of $ 81 per ton, and the town guaranteed the contractor a minimum of 120,000 tons per year. If the station did not receive the minimum 120,000 tons, the town agreed to pay the deficit in the tipping fees. After five years under this arrangement, the town would purchase the facility from the contractor for one dollar.

The facility's ability to reach the 120,000 ton yearly guarantee was made more difficult by the fact that the $ 81 per ton tipping **[**9]** fee was greater than the disposal cost on the private market. To solve this problem and to help achieve the 120,000 ton guarantee, the town passed the flow control ordinance, thereby requiring all nonhazardous solid waste within Clarkstown to pass through the transfer station.

[3] The parties do not dispute the fact that the Ordinance regulates interstate commerce, thus bringing the Ordinance "within the purview of the Commerce Clause." *C & A Carbone, Inc. v. Town of Clarkstown, 511 U.S. 383, 389, 128 L. Ed. 2d 399, 114 S. Ct. 1677 (1994)*.

Under the flow control ordinance, Carbone was still allowed to receive solid waste, but Carbone had to bring the nonrecyclable items from that waste to the transfer station. Carbone thus could not ship the nonrecyclable waste itself, and Carbone had to pay the tipping fee on trash it had already sorted.

The Supreme Court held that the flow control ordinance violated the *Commerce Clause*. *Carbone, 511 U.S. at 386*. The Court explained that "the flow control ordinance discriminates, for it allows only the favored operator to process waste that is within the limits of the town. The ordinance is no less discriminatory because in-state or in-town processors are also covered by the prohibition." *Id. at 391*. The Court further reasoned that the flow control ordinance "hoards solid waste, and the demand to get rid of it, for the benefit of the preferred processing facility." *Id. at 392*. Similarly, the flow **[**10]** control ordinance was found to "squelch[] competition in the waste-processing service altogether, leaving no room for investment from outside." *Id.*

The Court rejected the Town of Clarkstown's argument that special financing was needed for the facility to survive: "If so, the town may subsidize the facility through general taxes or municipal bonds. But having elected to use the open market to earn revenues for its project, the town may not employ discriminatory regulation to give that project an advantage over rival business from out of State." *Id. at 394* (citation omitted).

In support of its argument that the Ordinance does not violate the *Commerce Clause*, Miami Shores attempts to distinguish *Carbone* and relies heavily on the Second Circuit Court of Appeals' decision in *USA Recycling, Inc. v. Town of Babylon, 66 F.3d 1272 (2d Cir. 1995)*, *cert. denied*, *517 U.S. 1135, 134 L. Ed. 2d 544, 116 S. Ct. 1419 (1996)*. In *USA Recycling*, the Second Circuit analyzed, under the *Commerce Clause*, the Town of Babylon's decision to "take over the local commercial garbage market." *USA Recycling, 66 F.3d at 1275*. To establish control of the local market, the Town of Babylon **[**11]** hired two private companies: one to pick up commercial garbage, and the other to operate the incinerator to burn the garbage. To finance this system, Babylon relied on flat property taxes and user fees (based on the amount of garbage generated) paid by businesses and commercial property owners. The Second Circuit rejected the plaintiffs' arguments that Babylon's waste management plan discriminated against, or imposed an undue burden on, interstate commerce in violation of the *Commerce Clause*. *Id. at 1276*.

In its Motion to Dismiss, Miami Shores asserts that the Ordinance does not violate the *Commerce Clause* because, rather than selling waste collection services, Miami **[*1352]** Shores is providing these services as a municipal government performing traditional municipal functions that are not in conflict with federal law. Miami Shores argues that the instant case is more analogous to *USA Recycling* than to *Carbone*, and that the Ordinance thus does not violate the *Commerce Clause*. This Court agrees.

As in the Town of Babylon in *USA Recycling*, in Miami Shores "no one enjoys a monopoly position selling garbage collection services in [the Village's] commercial garbage market, because **[**12]** the [Village] has eliminated the market entirely. Not even the [Village] itself remains as a seller in the market. Although the [Village] is now the lone provider of garbage collection services . . ., it does so as a local government providing services to those within its jurisdiction, not as a business selling to a captive consumer base." *USA Recycling, 66 F.3d at 1283*.

Here, as in *USA Recycling*, the municipality has taken over the waste collection services to the exclusion of private haulers. *Id. at 1282*. Thus, "Babylon's [and Miami Shores'] waste management plan[s] differ[] dramatically from the flow control ordinances struck down by the Supreme Court in *Carbone* and by [the Second Circuit in a related case]. In both of those cases, the challenged flow control ordinances required local garbage haulers to buy processing or disposal services from a local facility. In Babylon [and in Miami Shores], local businesses do not buy services from anyone. Instead, the Town unilaterally provides garbage service to everyone in the District." *Id. at 1283*. Unlike the situation in *Carbone*, in the instant case, the Village "is not selling anything, [and] **[**13]** it cannot be considered to be a favored single local proprietor as in *Carbone." Id.* This Court concludes that if the Town of Babylon's decision to hire two private companies to control the local commercial garbage market satisfies the *Commerce Clause*, then Miami Shores' decision to take over the market itself, without favoring any private companies, certainly does not violate the *Commerce Clause*.

This Court also agrees with the *USA Recycling* court's rejection of the argument that *Carbone* "fashioned from the 'dormant' Commerce Clause a new, and unprecedentedly sweeping, limitation on local government authority to provide basic sanitation services to local residents and businesses, on an exclusive basis and financed by tax dollars." [4] *Id. at 1276*.

[14]** Plaintiffs argue that the Ordinance discriminates against interstate commerce because it hoards a local resource--waste--for the benefit of the favored local processor--Miami Shores. However, the *Carbone* Court merely found that the Clarkstown flow control ordinance constituted "just one more instance of local processing requirements that we long have held invalid." Carbone, 511 U.S. at 391 (citations omitted). The Court explained that the flow control ordinance was similar to laws that had previously been found by the Court to "hoard a local resource--be it meat, shrimp, or milk--for the benefit of local businesses that treat it." *Id. at 392*. The Court concluded that the flow control ordinance "hoards solid waste, and the demand to get rid of it, for the benefit of the preferred processing facility." *Id.*

The *Carbone* Court's concerns are not implicated where, as here, a municipality has completely eliminated the private market. In Miami Shores, no "local businesses" benefit from the Ordinance, and there is no "preferred processing facility." *Carbone* does not forbid a municipality from taking over waste collection itself. Miami Shores' decision to provide waste **[**15]** collection services using its own trucks and employees ensures that local and out-of-state businesses and investment are treated equally. Therefore, the Ordinance does not discriminate against interstate commerce. *See* USA Recycling, 66 F.3d at 1285 (finding that the "Town [of Babylon] has indeed excluded all garbage haulers . . . from selling garbage collecting services to businesses in Babylon. The Town's waste management system treats all **[*1353]** garbage haulers alike and thus does not discriminate against interstate commerce.").

The distinction between a municipality taking over waste collection within its boundaries, as Miami Shores has done, and a municipality acting as a participant or regulator of a private market, was recognized by a district court in this Circuit, in a case relied on by Plaintiffs. *See* *Waste Recycling, Inc. v. Southeast Alabama Solid Waste Disposal Auth., 814 F. Supp. 1566 (M.D. Ala. 1993)*, *aff'd without opinion*, *29 F.3d 641 (11th Cir. 1994)*. The court in *Waste Recycling* held that municipal flow control ordinances enacted by three cities (as named representatives of 36 local governments) violated the Commerce Clause. The ordinances at issue required **[**16]** that all solid waste collected within each city by public or private collectors be delivered only to the waste disposal facility of the Southeast Alabama Solid Waste Authority, a public non-profit corporation organized by four counties, along with more than 30 cities and towns within the counties, to provide for solid waste management. However, the *Waste Recycling* court recognized the difficult questions raised by the issues currently before this Court:

> The defendants hypothetically question whether it would violate the commerce clause if a single municipality completely occupied the collection and disposal of solid waste within its boundaries--that is, the city collected and disposed of all solid waste at its own landfill, and prohibited any participation by private parties. Because this is not the scenario presented in this case, the court need not reach this difficult question. Here, the parties have defined the issues as whether the cities are participants in or regulators of *private* markets and, if the latter, whether their regulation of these *private* markets violates the commerce clause; the issue is not whether the cities have *nationalized* the markets **[**17]** within their boundaries.

Waste Recycling, 814 F. Supp. at 1583 n.22 (emphasis added).

Plaintiffs assert several arguments to distinguish this case from *USA Recycling*. First, Plaintiffs argue that Miami Shores' actions are not "traditional municipal functions" and are illegal, while in *USA Recycling*, "New York law made clear that the Town is fulfilling a governmental duty, not making a sale, when it provides garbage services."

[4] Plaintiffs note that the ordinance in *USA Recycling* involved generally applicable taxes, while Miami Shores charges user fees as a private waste processor would. However, the Town of Babylon also employed user fees for garbage generated beyond a fixed base amount. *See* *USA Recycling, 66 F.3d at 1276, 1279*. In any event, even if Miami Shores relies solely on user fees rather than taxes, the Ordinance does not discriminate against interstate commerce.

USA Recycling, 66 F.3d at 1283. Plaintiffs claim that a municipality cannot foreclose private competition in waste processing and charge inflated prices to raise revenues. Plaintiffs also posit that Florida's enactment of the Solid Waste Management Act, Fla. Stat. § 403.702 et seq. (the "SWMA"), indicates that waste collection is no longer a traditional municipal function in Florida. The Court rejects these contentions.

The Florida Statutes and Florida caselaw support Miami Shores' arguments that waste collection is indeed a traditional municipal function. *See* Fla. Stat. § 180.06(5) (1997) (authorizing municipalities to "provide for the collection and disposal of garbage"); *id.* § 180.13(2) (1997) (authorizing municipalities **[**18]** to "establish just and equitable rates or charges to be paid to the municipality for the use of [a] utility by each person, firm or corporation whose premises are served thereby"); United Sanitation Servs. of Hillsborough, Inc. v. City of Tampa, 302 So. 2d 435, 436 (Fla. 2d DCA 1974) (although not addressing Commerce Clause issues, finding that "unlike virtually every other enterprise, the 'business' [of garbage collection] may not only be regulated, but in fact exclusively performed--as an essential part of a 'public service'--by municipalities or other governmental subdivisions, even if such a decision results in the complete preclusion of private facilities for the same use"); *see also* United Sanitation, 302 So. 2d at 436 (explaining that the "private business of [garbage] collection . . . is not, nor has it ever been, akin in any way to 'ordinary' examples of private enterprise--the selling of shoes, the repair of automobiles, or the selling of motel rooms. . . . The 'enterprise' of garbage collection is one of those unique callings which are subject to the plenary power of government."). Plaintiffs cite no authority to support the notion that Fla. Stat. § 180 has **[**19]** been repealed or that *United Sanitation* has been overruled by the SWMA.

The Court is also not convinced by Plaintiffs' argument that waste processing is a "proprietary," or quasi-private, function rather **[*1354]** than a "governmental" function based on Smoak v. City of Tampa, 123 Fla. 716, 167 So. 528 (Fla. 1936). While noting that "there is certainly nothing connected with garbage disposal that partakes of a public or governmental function," the *Smoak* court merely found that a city could not claim sovereign immunity in tort when its employees negligently perform garbage collection duties. 167 So. at 529. However, as Miami Shores notes, Florida courts no longer decide the sovereign immunity issue using the "proprietary/governmental" distinction, but rather employ an "operational/discretionary" distinction. *See* Dep't of Health & Rehab. Servs. v. B.J.M., 656 So. 2d 906, 911-912 (Fla. 1995). [5] In addition, a high-speed police chase can be an "operational" function that is not shielded from tort liability by sovereign immunity. *See* City of Pinellas Park v. Brown, 604 So. 2d 1222, 1227 (Fla. 1992). However, this surely does not indicate that police pursuit of criminals is not **[**20]** a governmental function.

The Court also notes that the SWMA contemplates that municipalities will play a significant role in providing waste collection services. *See, e.g.*, Fla. Stat. § 403.702(2)(i) (1997) (noting that one goal of the SWMA is to "encourage counties and municipalities to utilize all means reasonably available to promote efficient and proper methods of managing solid waste . . ."); Fla. Stat. § 403.7049(3) **[**21]** (1997) (defining "service area" as "the area in which the county or municipality provides, directly or by contract, solid waste management services").

The *USA Recycling* court noted that "for ninety years, it has been settled law that ***HN3***[] garbage collection and disposal is a core function of local government in the United States. At their option, cities may provide garbage pick-up to their citizens directly . . . or they may rely on a closely regulated private market to provide those services." USA Recycling, 66 F.3d at 1275. The *USA Recycling* court relied in part on two long-standing Supreme Court cases that, while not addressing Commerce Clause issues, are certainly relevant to the issues before this Court. In California Reduction Co. v. Sanitary Reduction Works, 199 U.S. 306, 50 L. Ed. 204, 26 S. Ct. 100 (1905) and Gardner v. Michigan, 199 U.S. 325, 50 L. Ed. 212, 26 S. Ct. 106 (1905), the Supreme Court rejected takings and due process challenges to San Francisco and Detroit ordinances that granted the exclusive garbage collection and disposal rights within the cities to single scavenger companies. The *USA Recycling* court found, and this Court

[5] Certain "discretionary" governmental functions are immune from tort liability. "Discretionary" acts are those involving "an exercise of executive or legislative power such that, for the court to intervene by way of tort law would inappropriately entangle it in fundamental questions of policy and planning." B.J.M., 656 So. 2d at 911 n.3. "Operational" functions, which are subject to tort liability, are those which are "not necessary to or inherent in policy or planning, that merely reflect[] a secondary decision as to how those policies or plans will be implemented." *Id.* at n.4.

agrees, that "if **[**22]** we were to rule in plaintiffs' favor, the municipal garbage systems upheld by the Court in *California Reduction* and *Gardner* would be unconstitutional, and municipalities could no loner undertake the traditional local governmental function of collecting town garbage." USA Recycling, 66 F.3d at 1294. This Court would overstep its authority if it concluded that waste collection was no longer a traditional municipal function in Florida.

Plaintiffs also attempt to distinguish *USA Recycling* on several additional grounds. First, Plaintiffs assert that the Town of Babylon used competitive bidding for its waste contract, thereby giving out-of-state private competitors a chance to compete in the market, while Miami Shores has eliminated all private competition by taking over the waste collection itself. Plaintiffs also argue that in *USA Recycling*, the Town of Babylon was saving its residents money by consolidating services, while Miami Shores is charging its customers more than private competitors would in an effort to raise revenues. Plaintiffs further claim that *USA Recycling* is incompatible with *Carbone* and is simply wrong. The Court finds these arguments untenable.

[23]** Miami Shores' decision to use its own trucks and employees, rather than those of an independent contractor, obviated the need for competitive bidding. The *USA Recycling* **[*1355]** court recognized the Town of Babylon's use of a competitive bidding process, which left open the possibility that an out-of-state firm could be selected to provide the waste collection services. *See* USA Recycling, 66 F.3d at 1287. Local and out-of-state firms were thus treated equally in Babylon, because either type of firm could theoretically be chosen to provide the waste collection duties. However, Miami Shores' decision to take over waste collection also results in equal treatment of local and nonlocal firms: all of them are precluded from collecting waste in the Village.

Plaintiffs also argue that Miami Shores' enforcement of the Ordinance stems from the Village's desire to raise revenue. *See* Amended Complaint PP 12, 31. After finding that the flow control ordinance discriminated against interstate commerce and "rigorous scrutiny" thus applied, the Court in *Carbone* noted that "by itself, of course, revenue generation is not a local interest that can justify discrimination against interstate commerce." **[**24]** Carbone, 114 S. Ct. at 1684. However, Miami Shores' Ordinance does not discriminate against interstate commerce, and thus "rigorous scrutiny" does not apply, as in-state and out-of-state waste collection firms are treated alike. Therefore, even accepting as true the allegation that the Ordinance has resulted in increased bills for Bennett based in part on the Town's desire to raise revenues, this Court is not compelled to find that the Ordinance discriminates against interstate commerce.

Plaintiffs' contention that *USA Recycling* is both "simply wrong" and irreconcilable with *Carbone* is without merit. While both cases present similar issues, the Second Circuit in *USA Recycling* thoroughly analyzed *Carbone* and found it distinguishable. This Court's conclusion that Miami Shores' Ordinance does not violate the Commerce Clause is consistent with both *Carbone*, which is binding authority, and with *USA Recycling*.

2. Undue Burden on Interstate Commerce

Having determined that the Ordinance does not discriminate against interstate commerce, the Court must evaluate whether the "burden imposed on [interstate] commerce is clearly excessive in relation to the putative **[**25]** local benefits." *Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 25 L. Ed. 2d 174, 90 S. Ct. 844 (1970)*.

As in *USA Recycling*, Miami Shores' takeover of waste collection services "will not impose any different burdens on nonlocal as opposed to local garbage haulers." USA Recycling, 66 F.3d at 1287. All local and nonlocal private firms are treated equally by the Ordinance: they are prohibited from providing waste collection services in Miami Shores.

Plaintiffs argue that *USA Recycling* is distinguishable because the Town of Babylon hired its garbage hauler using a bidding process that left open the possibility that an out-of-state firm could be selected, "which would actually shift a portion of the garbage collection market into interstate commerce." Id. at 1287. Miami Shores does not use a competitive bidding process, as it simply provides the waste collection services with its own trucks and employees. However, neither an out-of-state nor a local firm could provide the waste collection services in Miami Shores, as the

Village does so itself. Therefore, the Miami Shores Ordinance "has imposed no greater burdens on nonlocal firms that it has placed on local firms." **[**26]** *Id. at 1287*.

In addition, the fact that Bennett may pay more for waste collection under the Ordinance does not compel a finding that the Ordinance discriminates against, or imposes an undue burden on, interstate commerce. The *USA Recycling* court noted that saving residents money by consolidating services was one benefit of the Town of Babylon's takeover of waste collection. *See id. at 1295*. However, as Miami Shores notes, the Ordinance may allow low-volume residential customers, who are more expensive to serve than high-volume commercial customers, to benefit from the lower unit costs associated with serving commercial customers. Nevertheless, even without this benefit, the mere fact that Bennett's waste collection bills may increase when the municipality provides the service does not dictate a finding that the Ordinance violates the *Commerce Clause*.

Assuming that the Ordinance did burden interstate commerce, other putative local benefits--including "safety, sanitation, [and] **[*1356]** reliable garbage service"--remain. *Id. at 1295*. The *USA Recycling* court further noted that municipalities have "legitimate--indeed, compelling" interests in taking over the garbage market. **[**27]** "In our multi-tiered federal system, local governments have historically borne primary responsibility for ensuring the safe and reliable disposal of waste generated within their borders--a role that Congress has expressly recognized. . . . Local governments must enjoy some leeway in coping with the solid waste crisis." *Id. at 1288*.

B. The Sherman Act

Miami Shores argues that Count II of the Complaint, which asserts a claim for monopolization under the Sherman Act, should be dismissed because Miami Shores' waste-collection activities are exempt from antitrust scrutiny pursuant to the state action doctrine. Miami Shores also contends that Count II should be dismissed because Miami Shores is not a seller in the relevant market. The Court finds that Miami Shores' actions are entitled to state action immunity from the antitrust laws. Therefore, the Court need not address whether Miami Shores is a seller in the relevant market.

1. The State Action Doctrine

Miami Shores contends that its actions are exempt from the federal antitrust laws under the state action doctrine enunciated in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)* and *Town of* **[**28]** *Hallie v. City of Eau Claire, 471 U.S. 34, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)*. ***HN4***[] When a municipal government acts pursuant to a "clearly articulated and affirmatively expressed" state policy to displace competition with regulation or monopoly public service, the state action doctrine exempts the municipality's anticompetitive activities from antitrust liability. *Town of Hallie, 471 U.S. at 44*; *see also Bankers Ins. Co v. Florida Residential Prop. and Cas. Joint Underwriting Ass'n, 137 F.3d 1293, 1296 (11th Cir. 1998)*. The municipality's anticompetitive conduct need only be a "foreseeable result" of the statutes establishing the state policy to displace competition. *Town of Hallie, 471 U.S. at 42*. "It is not necessary . . . for the state legislature to have stated explicitly that it expected the City to engage in conduct that would have anticompetitive effects." *Id.*

HN5[] The Eleventh Circuit employs a three-part test to determine whether the "clear articulation" test is satisfied. Miami Shores must establish "'(1) that it is a political subdivision of the state; (2) that, through statutes, the state generally authorizes the political subdivision to perform the challenged **[**29]** action; and (3) that, through statutes, the state has clearly articulated a state policy authorizing anticompetitive conduct.'" *Crosby v. Hospital Auth. of Valdosta and Lowndes County, 93 F.3d 1515, 1532 (11th Cir. 1996)*, *cert. denied*, *137 L. Ed. 2d 328, 117 S. Ct. 1246 (1997)* (quoting *F.T.C. v. Hospital Bd. of Directors of Lee County, 38 F.3d 1184, 1187-88 (11th Cir. 1994)*). Plaintiffs argue that Miami Shores fails both the second and third parts of the *Crosby* test. [6]

[6] Plaintiffs agree that Miami Shores is a political subdivision of the state, thus satisfying the first prong of the *Crosby* test.

In support of its assertion of state action immunity, Miami Shores relies on *Florida Statutes §§ 180.06(5)* and *180.13(2)*. *Florida Statutes § 180.06(5)* authorizes municipalities to "provide for the collection and disposal of garbage." *Florida Statutes § 180.13(2)*, in turn, grants municipalities the power to "establish just and equitable rates or charges to be paid to the municipality for the use **[**30]** of [a] utility by each person, firm or corporation whose premises are served thereby . . . ."

This Court concludes that ***HN6***[] *Florida Statutes §§ 180.06(5)* and *180.13(2)* "generally authorize" Miami Shores to provide waste collection services, *see Crosby, 93 F.3d at 1532*, and also constitute a "clearly articulated and affirmatively expressed" state policy to displace competition in the area of waste collection. *See Town of Hallie, 471 U.S. at 44* (finding that Wisconsin statutes authorizing city to provide sewage services and to determine service area "evidence a 'clearly articulated and affirmatively expressed' state policy to displace competition with regulation"). As in *Town of Hallie*, in **[*1357]** the instant case "it is clear that anticompetitive effects logically would result from this broad authority to regulate." *Id. at 42*.

In addition, the Eleventh Circuit has previously found that similar legislative grants of authority contained in *Fla. Stat. § 180.06* and related sections governing water and sewage services satisfied the state action test. *See Falls Chase Special Taxing Dist. v. City of Tallahassee, 788 F.2d 711 (11th Cir. 1986)*; *Auton v. Dade City, 783 F.2d 1009* ***[**31]*** *(11th Cir. 1986)*. Thus, Miami Shores is entitled to antitrust immunity under the state action doctrine.

Plaintiffs argue that the state action doctrine does not immunize Miami Shores' actions from antitrust scrutiny because the Florida legislature's enactment of the Solid Waste Management Act, *Fla. Stat. § 403.702 et seq*. (the "SWMA"), establishes a policy forbidding municipal monopolization of waste processing and supporting competition in the field. Plaintiffs claim that the provisions of the SWMA encompass almost all of the waste involved in this case, and that the Ordinance, both on its face and as applied, covers all waste generated by businesses within Miami Shores. Plaintiffs thus contend that the Ordinance violates state law and policy as set forth in the SWMA, and that the general statements concerning waste processing contained in Fla. Stat. § 180 are controlled by the explicit provisions of Florida's SWMA.

Miami Shores argues that the Ordinance is in compliance with the SWMA, that the goal of the SWMA is to protect the environment, rather than to promote competition in waste collection, and that the Court need not determine whether the Ordinance technically complies **[**32]** with the SWMA, as long as Florida has expressed a policy which contemplates anticompetitive behavior by the municipality.

Although *Fla. Stat. §§ 180.06(5)* and *180.13(2)* satisfy the state action test, thereby immunizing Miami Shores' anticompetitive behavior from the federal antitrust laws, the Court finds that Florida's SWMA expresses a policy supporting competition in waste processing involving "source-separated recovered materials" (SSRMs). [7] **[**33]** The SWMA provides, for instance, that a local government "may not require a commercial establishment that generates source-separated recovered materials to sell or otherwise convey its recovered materials to the local government or to a facility designated by the local government. . . ." *Fla. Stat. § 403.7046(3)*(1997). The SWMA also protects the right of an establishment that generates SSRMs to sell the SSRMs to a certified recovered materials dealer, as well as protecting the right of such dealers to purchase or collect such SSRMs from commercial establishments. *See id.* Other provisions of the SWMA also support competition related to SSRMs. *See id. § 403.7046(3)(d)*. [8]

---

[7] The SWMA defines "recovered materials" to include "metal, paper, glass, plastic, textile, or rubber materials that have known recycling potential [and] can be feasibly recycled." *Fla. Stat. § 403.703(7)* (1997). "Source separated" is defined as the "recovered materials [that] are separated from solid waste where the recovered materials and solid waste are generated," and "*de minimis* solid waste . . . may be included in the recovered materials." *Fla. Stat. § 403.703(44)* (1997).

[8] *Fla. Stat. § 403.7046(3)(d)* provides, in pertinent part:

> In addition to any other authority provided by law, a local government is hereby expressly authorized . . . to enter into a *nonexclusive* franchise or to otherwise provide for the collection, transportation, and processing of recovered materials at

Miami Shores asserts in its briefs that, because the Ordinance and the SWMA are not in conflict, the Ordinance "does not prohibit Bennett . . . from making private arrangements for the collection of any source-separated recyclable materials, nor does it prohibit Lazaro's . . . from collecting and processing such materials." Rep. Mem. of Def. in Supp. of Mot. to Dis., at 12. The Court concludes that it need not decide whether the Ordinance is in strict compliance with the **[**34]** SWMA.

The Supreme Court has explained that, in the context of the state action doctrine:

> **[*1358]** in order to prevent *Parker* from undermining the very interests of federalism it is designed to protect, it is necessary to adopt a concept of authority broader than what is applied to determine the legality of the municipality's action under state law.

City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 372, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991).

The Court in *City of Columbia* considered South Carolina statutes that authorized a municipality to regulate the size, location and spacing. of billboards. The Court rejected the argument that the municipality's regulation was not authorized if it was not, as the state statute required, adopted for a legislatively authorized purpose. The Court adopted the "broader" concept of authority for *Parker* purposes because otherwise, the federal court would "'inevitably become[] the standard reviewer not only of federal agency activity but also of state and local activity whenever it is alleged that the governmental body, though possessing the power to engage in the challenged conduct, has actually exercised its **[**35]** power in a manner not authorized by state law.'" *Id. at 372* (quoting P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 212.3b, p. 145 (Supp. 1989)).

Therefore, for state action immunity purposes, this Court will examine the authority granted to Miami Shores under a broader concept than what might be used to determine the legality of Miami Shores' actions under Florida law.

Since the Court concludes that Fla. Stat. § 180 provides the necessary state policy to displace competition, and since Miami Shores agrees that the Ordinance does not cover source-separated recyclable materials because the Ordinance and the SWMA are not in conflict, this Court will not conduct a detailed analysis of whether the Ordinance technically complies with the SWMA. Analyzed under a broad concept of authority, Miami Shores' actions are entitled to *Parker* immunity from the federal antitrust laws.

III. *Declaratory Relief*

In Count III of their Amended Complaint, Plaintiffs seek a declaration that the Ordinance does not apply to them because Miami Shores has taken the position that the Ordinance does not apply to the collection of SSRMs. Bennett argues that Miami Shores cannot force it to use **[**36]** Miami Shores' waste processing services for SSRMs. Similarly, Lazaro's argues that Miami Shores cannot prevent it from collecting and processing SSRMs within Miami Shores.

As previously noted, Miami Shores contends that the SWMA and the Ordinance are not in conflict, and that the Ordinance "does not prohibit Bennett . . . from making private arrangements for the collection of any source-separated recyclable materials, nor does it prohibit Lazaro's . . . from collecting and processing such materials." Rep. Mem. of Def. in Supp. of Mot. to Dis., at 12. Nonetheless, because the Court has dismissed Plaintiffs' *Commerce Clause* and Sherman Act claims, the Court lacks subject matter jurisdiction over the state law claim for declaratory relief. *See* *28 U.S.C. § 1367(c)(3)*. Therefore, Count III is dismissed.

CONCLUSION

> commercial establishments provided that such franchise or provision *does not prohibit* a certified recovered materials dealer from entering into a contract with a commercial establishment to purchase, collect, transport, process, or receive source-separated recovered materials. . . .

(emphasis added).

Miami Shores' decision to take over the local waste collection market does not violate the *Commerce Clause*, and is immune from the federal antitrust laws pursuant to the state action doctrine. Therefore, the Defendant's Motion to Dismiss is GRANTED. The entire complaint is dismissed with prejudice.

DONE AND ORDERED in Chambers at Miami, Florida, this *7th* **[**37]** day of May, 1998.

FEDERICO A. MORENO

UNITED STATES DISTRICT JUDGE

Minnesota Ass'n of Nurse Anesthetists v. Unity Hosp.

United States District Court for the District of Minnesota, Fourth Division

May 7, 1998, Decided

Civil No. 4-96-804 (ADM/JGL)

Reporter

5 F. Supp. 2d 694 *; 1998 U.S. Dist. LEXIS 6626 **; 1998-1 Trade Cas. (CCH) P72,168

Minnesota Association of Nurse Anesthetists, Gayle McKay, Ladonna Schweer, John Okonek, Bernadine Okonek, Annette Atchison, Fred Benjamin, Bart Barry, Faye Leatherman, Sue Milbach, Sandra Henschke, Judith A. Schmidt and Gary Hagen, Plaintiffs, vs. Unity Hospital, Mercy Hospital, William MacNally, President and Chief Executive Officer of Unity and Mercy Hospitals, Allina Health System Corp., Mark Sperry, M.D., Gary Baggenstoss, M.D., John Murphy, in his capacity as Vice President of Unity and Mercy Medical Centers, James Cumming, M.D., John Rydberg, M.D., Midwest Anesthesia, P.A., Thelma M. Albay, M.D., Minda Castillejos, M.D., Teri Heil, M.D., Sang Hong, M.D., Ted Janossy, M.D., Raymond Kloepper II, M.D., John Magdsick, M.D., Thomas Maggs, M.D., Thomas Polta, M.D., John Roseberg, M.D., Jai Suh, M.D., Jeffrey Yue, M.D., Mark Eggen, M.D., Metropolitan Anesthesia Network, Allen Tank, Theodore Grindal, Esq., Craig Johnson, M.D. (both individually and in his capacity as President of the Minnesota Society of Anesthesiologists), St. Cloud Hospital, John Frobenius, Chief Executive Officer of St. Cloud Hospital, Linda Chmielewski, Vice President Hospital Operations of St. Cloud Hospital, Anesthesia Associates of St. Cloud Ltd., Gary A. Boeke, M.D., Philip F. Boyle, M.D., L. Michael Espeland, M.D., Alan D. Espelien, M.D., Paul J. Halverson, M.D., Lanse C. Lang, M.D., William H. Rice, M.D., Allan Reitz, M.D., and Annette E. Zwick, M.D., Defendants.

Disposition: **[**1]** Defendants' Motion for Summary Judgment GRANTED IN PART and DENIED IN PART. Plaintiffs' state law claims (Counts 2, 8, 12 and 16) DISMISSED WITHOUT PREJUDICE.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Summary Judgment, Evidentiary Considerations**

A party is entitled to summary judgment as a matter of law only if it can show that no genuine issue of material fact exists. *Fed. R. Civ. P. 56(c)*. There is no different or heightened standard for summary judgment in a complex antitrust case. The basic inquiry on summary judgment is whether the evidence presents a sufficient disagreement to require submission to a jury, or whether it is so one-sided that one party must prevail as a matter of law. If the evidence rebutting the motion for summary judgment is only colorable or not significantly probative, summary judgment should be granted.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] **Summary Judgment, Evidentiary Considerations**

At the summary judgment stage, the court should not weigh the evidence, make credibility determinations, or attempt to determine the truth of the matter. Rather, the court's function is to determine whether a dispute about a material fact is genuine, that is, whether a reasonable jury could return a verdict for the nonmoving party based on the evidence. The evidence of the non-movant is to be believed, and all justifiable inferences are to be drawn in favor of the non-moving party. If reasonable minds could differ as to the import of the evidence, summary judgment is inappropriate.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[] **Summary Judgment, Opposing Materials**

Under *Fed. R. Civ. P. 56(c)*, the moving party bears the initial burden of demonstrating the absence of a genuine issue for trial. When a summary judgment motion is properly supported, the opposing party may not rest on the allegations or denials of its pleadings, but must come forward with sufficient evidence to demonstrate a genuine issue for trial. The non-moving party must do more than simply show that there is some metaphysical doubt as to the material facts.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN4[] Regulated Practices, Price Fixing & Restraints of Trade

To succeed on an antitrust claim, a plaintiff must prove that there has been "antitrust injury." Antitrust injury is defined as injury of the type that the antitrust laws were intended to prevent, and that flows from that which makes defendant's acts unlawful. The injury to the private plaintiff must coincide with the public harm, increasing the likelihood that public and private enforcement of the antitrust laws will further the same goal of increased competition.

Antitrust & Trade Law > Sherman Act > General Overview

International Trade Law > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act (Act) provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations is declared to be illegal." *15 U.S.C.S. § 1*. The statutory language, however, is not strictly interpreted; such an interpretation would clearly encompass many legitimate, competitive activities. The United State Supreme Court recognizes that the Act was intended to prohibit only unreasonable restraints of trade.

Antitrust & Trade Law > Sherman Act > Claims

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Sherman Act, Claims

To establish a claim under *§ 1* of the Sherman Act, a plaintiff must demonstrate (1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce. The first element of a *§ 1* case requires that defendants had a conscious commitment to a common scheme designed to achieve an unlawful objective. Concerted action forms the essence of a *§ 1* claim; unilateral actions do not give rise to antitrust liability under *§ 1*.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN7[] **Summary Judgment, Opposing Materials**

Although *Fed. R. Civ. P. 56* requires that the inferences drawn from the underlying facts must be viewed in the light most favorable to the party opposing a motion for summary judgment, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a case under *§ 1* of the Sherman Act. The United States Supreme Court, in clarifying the nature and extent of a plaintiff's burden in establishing proof of a conspiracy that violates *§ 1*, holds that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. The plaintiff must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed respondents.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN8[] **Antitrust & Trade Law, Sherman Act**

It is possible to infer the existence of a conspiratorial agreement from consciously parallel conduct if the parallelism is accompanied by substantial additional evidence -- often referred to as the "plus factors." A plaintiff may satisfy the "plus factors" requirement by demonstrating that the conspirators acted against their own self-interest by engaging in the parallel conduct or that a high-level of interfirm communication existed in conjunction with the parallel actions. Where an examination of the proffered "plus factors" leads to an equally plausible inference that merely interdependent behavior is at hand, then there is no triable issue that would preclude a grant of summary judgment.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

As to the reasonableness of the alleged restraint regarding a claim under *§ 1* of the Sherman Act, a restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held to be "per se" unreasonable, or because it violates what has come to be known as the "Rule of Reason," under which the test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

If the challenged behavior in a claim under *§ 1* of the Sherman Act falls within the discrete category of conduct that is illegal per se, a plaintiff need not establish its anti-competitive effects.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

The United States District Court for the District of Minnesota agrees with most appellate courts, including the United States Court of Appeals for the Eighth Circuit, that the examination of the denial or revocation of hospital privileges occurs primarily under a rule of reason rather than per se analysis.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

In assessing the legality of a restraint of trade under the rule of reason, the focus is on the detrimental effects to competition. A plaintiff may demonstrate the existence of detrimental effects in one of two ways. First, a plaintiff may delineate a relevant market and show that the defendant has enough market power to significantly impinge on competition. Second, a plaintiff may demonstrate that the challenged practice has actually produced significant anti-competitive effects. If a plaintiff demonstrates the existence of actual detrimental effects, formal market analysis is unnecessary. Either showing -- market power or actual detrimental effects -- shifts the burden to the defendant to demonstrate pro-competitive effects. If the defendant satisfies this burden, the burden then shifts back to the plaintiff to demonstrate that any legitimate objectives could be achieved through substantially less restrictive means. The court then weighs the benefits and detriments to determine if the conduct is reasonable "on balance."

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

Relevant markets are defined both in terms of product and geography. A geographic market is that geographic area to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN14[] **Antitrust & Trade Law, Sherman Act**

Monopolization requires that a defendant possess monopoly power in a relevant geographic market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Monopolies & Monopolization, Attempts to Monopolize**

A claim of attempted monopolization requires a showing of (1) a specific monopolistic intent on the part of the defendant; (2) predatory or anti-competitive conduct on the part of the defendant in an effort to accomplish an unlawful purpose; (3) a dangerous probability of success; and (4) antitrust injury.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

The elements of a conspiracy to monopolize claim are (1) the existence of a combination or conspiracy; (2) an overt act in furtherance of the conspiracy; and (3) specific intent to monopolize.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN17[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To prevail under the essential facilities doctrine, the plaintiff must establish (1) control of an essential facility by a monopolist; (2) the inability to practically or economically duplicate the facility; and (3) the unreasonable denial of the use of the facility to a competitor when such is economically and technically feasible.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN18[] **Jurisdiction, Jurisdictional Sources**

Pursuant to *28 U.S.C.S. § 1367(c)(3)*, a district court may decline to exercise supplemental jurisdiction over a claim if the district court has dismissed all claims over which it has original jurisdiction. The district court has the discretion to exercise or to refuse to exercise pendent jurisdiction. The district court should exercise judicial restraint and avoid state law issues wherever possible.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN19[] **Jurisdiction, Jurisdictional Sources**

Factors that the district court should consider in deciding whether to exercise supplemental jurisdiction include (1) the stage of the litigation; (2) the difficulty of the state claim; (3) the amount of judicial time and energy necessary for the claim's resolution; and (4) the availability of a state forum.

Opinion

[*698] MEMORANDUM OPINION AND ORDER

INTRODUCTION

The above-entitled matter came on for hearing before the undersigned United States District Judge on January 21, 1998, pursuant to Defendants' motion for summary judgment. This case alleges a conspiracy in which Defendants purportedly **[**2]** conspired to eliminate the use of certified registered nurse anesthetists in the provision of anesthesia services. Plaintiffs characterize the gravamen of their Complaint as follows: "To maintain their unusually high level of compensation, to facilitate their fraudulent billing and to increase their dominant position in the market, defendant anesthesiologists have conspired with defendant hospitals to terminate plaintiff CRNAs who they see as a threat both to their unusually high level of compensation and to the future of their profession." Pl.'s Mem. in Opp'n to S.J., at 1.

In their Complaint, Plaintiffs assert the following claims: violation of *§ 1* of the Sherman Act through unreasonable restraint on competition; violation of Minnesota's Antitrust Statute; violation of *§ 1* of the Sherman Act through illegal boycott; violation of *§ 2* of the Sherman Act through monopoly, attempted monopolization, and conspiracy to monopolize; violation of *§§ 1*, *2*, *14*, *15*, and *26* of the Sherman and Clayton Acts through an illegal tying arrangement; violation of federal antitrust laws through the denial of essential facilities; violation of the Minnesota Deceptive Trade Practices Act; violation of **[**3]** the Minnesota Whistleblower Statute; and civil conspiracy. [1]

BACKGROUND

I. The Parties

The Plaintiffs in this action include twelve certified registered nurse anesthetists ("CRNAs") and the Minnesota Association of Nurse Anesthetists ("MANA"). The Defendants include the Allina Health System, Mercy and Unity Hospitals and two of their administrators (the "Allina Defendants"); the anesthesiologists who work at Mercy and Unity Hospitals, their practice group, and its administrator (the "MAPA Defendants"); the St. Cloud **[**4]** Hospital and two of its administrators (the "St. Cloud Hospital Defendants"); the anesthesiologists who work at St. Cloud Hospital and their practice group **[*699]** (the "AASC Defendants"). [2] Defendants Unity and Mercy Hospitals, which are located in Fridley, Minnesota, and Coon Rapids, Minnesota, respectively, are jointly owned and administered by Allina Health System.

II. Factual Background

The landscape of the health care industry has undergone kaleidoscopic changes in the last decade. Today, models of health care built on cost containment and managed care predominate. This transformation has resulted in a number of conflicts which, like the present one, involve difficult human resource issues.

Anesthesiology is a medical specialty in which a qualified medical practitioner renders a patient **[**5]** insensitive to pain during invasive medical procedures. Both anesthesiologists ("MDAs") and CRNAs may administer anesthesia. Although CRNAs do not have the extensive medical education required for MDAs, CRNAs are clinically qualified to administer anesthesia under many circumstances. Stone Aff., Ex. 199, 201. Plaintiffs contend that the delivery of anesthesia services has historically been dominated by nurses rather than doctors. Stone Aff., Ex. 673. According to Plaintiffs, this balance began to shift to some extent when anesthesia delivery became more profitable. Despite this shift, sixty-five percent of the 26 million anesthetics in the United States are still administered by CRNAs. Stone Aff., Ex. 1.

---

[1] United States District Judge Michael J. Davis dismissed a number of Plaintiffs' other claims in his September 29, 1995, Order ruling on Defendants' motion to dismiss. The dismissed claims included: violation of Minnesota's Consumer Fraud Act, tortious interference with contractual and prospective business and economic relations, unfair competition under Minnesota law, breach of implied covenant of good faith and fair dealing, and wrongful termination in violation of public policy.

[2] Plaintiffs also alleged claims against attorney Theodore Grindal, who represented the Minnesota Society of Anesthesiologists. Judge Davis, however, dismissed all claims against Grindal in his September 29, 1995 Order.

A significant portion of the recipients of anesthesia services are Medicare patients. As a result, the method and criteria for Medicare reimbursement are critically important for both MDAs and CRNAs. Due to the increasing profitability of the profession, Plaintiffs contend that MDAs across the country began to systematically tender multiple, contemporaneous Medicare bills for services provided by CRNAs but ostensibly supervised by MDAs. In an effort to discourage MDAs from billing **[**6]** for anesthesia services in which they played a de minimus role, Congress passed the Tax Equity And Fiscal Responsibility Act of 1982 ("TEFRA"). Plaintiff's Ex. 673, 199, 201. The TEFRA regulations "recognize that an anesthesiologist may either: (1) 'personally perform' the anesthesia service; (2) 'medically direct' concurrent anesthesia procedures (that is, two, three or four concurrent procedures) involving qualified anesthesia personnel, usually certified registered anesthetists ("CRNA"); or (3) medically supervise anesthesia procedures (that is, more than four concurrent cases)." Stone Aff., Ex. 280. Under the TEFRA regulations, "medical direction" applies only to concurrent procedures, never to a single case. Id. In short, TEFRA required that MDAs maintain a minimal level of involvement, supervisory or otherwise, in order to obtain Medicare reimbursement.

After implementation of the TEFRA regulations, the Health Care Financing Administration ("HCFA") continued to negotiate the delicate balance between reimbursement for MDA and CRNA services. Stone Aff., Ex. 280. Prior to 1989, hospitals billed Medicare collectively for CRNA services and other necessities such as anesthetics, **[**7]** equipment, and operating room time. The Omnibus Budget Reconciliation Act of 1986, however, authorized HCFA to develop a CRNA fee schedule payment system to allow separate Medicare reimbursement for services rendered by CRNAs. [3] Id. Consequently, in 1989, CRNAs **[*700]** could bill Medicare directly. CRNA services, however, are not billable when an MDA is billing for full-time service. The 1989 regulations provided: "When an anesthesiologist and an anesthetist are both involved in a single anesthesia service, the service is considered personally performed by the anesthesiologist. No separate payment is ordinarily recognized for the anesthetist's service." Stone Aff., Ex. 18. Plaintiffs contend that this and other changes to the reimbursement methodology fostered competition between MDAs and CRNAs.

[8]** Plaintiffs allege that Defendant MDAs disregarded the Medicare reimbursement requirements and used CRNAs, who were then employed by the hospitals, to actually provide the anesthesia services while the MDAs themselves spent little or no time in the operating room. Stone Aff., Exs. 534, 527, 578. Defendant MDAs allegedly continued to bill Medicare "as if they were personally present in the room and providing the services." Pl.'s Mem. in Opp'n to Df.'s Mot. for S.J., at 5. MDA billing practices allegedly became contentious after 1989, when CRNAs began to bill directly for the same services. Medicare and other insurers refused to pay both a CRNA bill and an MDA bill for the same procedure. Stone Aff., Ex. 242.

In 1991, Travelers Insurance Company performed an audit at Mercy Hospital, which revealed a problem with this "double-billing." Pursuant to its postpayment review of CRNA charges on Medicare claims, Travelers requested that Mercy repay $ 1476.91 for duplicative bills submitted by MDAs and CRNAs. Stone Aff., Ex. 18. The President of the American Society of Anesthesiology ("ASA") expressed alarm that "this intolerable situation has arisen because of claims being submitted by CRNAs **[**9]** for anesthesia services, which has led these carriers to issue new policies recognizing only the CRNA claim." Stone Aff., Ex. 456.

---

[3] An official at the Health Care Financing Administration illustrated the difficulty of delineating a payment system for services rendered by CRNAs and/or MDAs:

> [HCFA] differentiated, for payment purposes between the services of CRNAs who are medically directed and the services of non-medically directed CRNAs, that is CRNAs working without being directed by an anesthesiologist. One issue HCFA had to address in these regulations was how to pay CRNAs where concurrent procedures aren't involved but both a CRNA and an anesthesiologist are involved in a single procedure. Both the proposed regulation . . . and the final regulation . . . included a regulatory provision that advised CRNAs that, if an anesthesiologist and a CRNA are both involved in a single anesthesia service, for purposes of determining whether to pay the CRNA, we would deem the service to have been personally performed by the anesthesiologist. In such cases, we also allow payment of the CRNA if the CRNA furnishes documentation to the carrier explaining the medical necessity for two anesthesia providers.

Stone Aff., Ex. 280 (letter to David S. Stone from the HCFA).

Theodore Grindal, an attorney for the state association of anesthesiologists, allegedly circulated a letter dated October 28, 1992, (the "Grindal letter") to all anesthesiologists in the state concerning Medicare reimbursement for MDAs and CRNAs. Plaintiffs contend the Grindal letter was a carefully constructed "blueprint" designed to eliminate CRNAs as competitors. The letter cautions the anesthesiologists that "active participation in such a hospital business decision making process (i.e. firing CRNAs) could expose anesthesiologists to legal liability under the antitrust laws." Stone Aff., Ex. 24. Although Grindal is no longer a defendant in the case, Plaintiffs allege that this letter provided the vehicle through which the conspiracy to restrain trade was effectuated.

In March 1994, Unity and Mercy Hospitals terminated the CRNAs employed at the hospitals. [4] Plaintiffs assert that the terminations were the product of a conspiracy to eliminate CRNAs as competitors in the provision of anesthesia services. Defendants maintain that the hospitals instead **[**10]** reorganized their anesthesia departments to address the economic realities of a dynamic health care market in which Medicare reimbursement was rapidly declining. The Defendant hospitals contend that the terminations were necessary to reduce costs and achieve the economic efficiency concomitant with sole-source contracting. Duncan Aff. I, Ex. 1.

Unity and Mercy Hospitals entered into an exclusive contract with the practice group, Midwest Anesthesia, P.A. ("MAPA"), in March 1994, to provide anesthesia services at the hospitals for five years. Duncan Aff. I, Ex. 2. Rather than have the hospitals employ CRNAs directly, the contract required that MAPA provide CRNA coverage. Unity and Mercy offered the CRNAs the opportunity to continue working at the hospitals as either employees of the anesthesiologists or as independent subcontractors to the anesthesiologists. **[*701]** The CRNAs **[**11]** formerly employed by Unity and Mercy formed an organization called Nurse Anesthesia Services, P.A. ("NASPA"), which then contracted with MAPA to provide CRNA services at Unity and Mercy. Wasche Aff., P 7.

Despite the transition to sole-source contracting, Defendants maintain that nothing has changed in the clinical practice of CRNAs at Unity and Mercy. Defendants continue to use the "anesthesia care team" model, in which an MDA supervises two or more CRNAs in the administration of anesthesia. Haviland Aff., P 3. Defendants maintain that CRNA responsibilities have not changed significantly and that CRNAs continue to engage in the same scope of practice that existed before the reorganization. Duncan Aff. I, Ex. 4.

In November 1994, St. Cloud Hospital also reorganized its anesthesia department in a similar fashion. [5] For Fiscal Year 1993, St. Cloud Hospital experienced a net loss of $ 247,000 on anesthesia reimbursement. Hospital administrators at St. Cloud contend that they anticipated greater losses if they continued to employ CRNAs directly. Id. As a result, they terminated the CRNAs and entered into an exclusive contract with the anesthesiology group at the hospital, Defendant **[**12]** Anesthesia Associates of St. Cloud ("AASC"). Plaintiffs contend that the reorganization at St. Cloud Hospital occurred as the result of a conspiracy with other Defendants to eliminate CRNAs. Parsons Aff., PP 4-5. Defendants maintain, however, that St. Cloud Hospital, like Unity and Mercy, was merely responding to the economic realities of declining Medicare reimbursement and cost containment pressures. Id.

Defendant St. Cloud Hospital invited the previously employed CRNAs to continue practicing at the hospital as employees of AASC. Chmielewski Dep., at 255-56. Some CRNAs accepted employment with AASC; some did not. Honkomp Aff., P 12. Defendants maintain that there has been no change in the clinical practice of CRNAs at St. Cloud Hospital.

Plaintiffs also allege **[**13]** that CRNAs who reported fraudulent billing practices among the MDAs suffered retaliation from the Defendant Hospitals. Plaintiffs contend that in the wake of the Traveler's audit certain CRNAs met with hospital administrators to advise them that the CRNAs had observed widespread fraudulent billing by

---

[4] The record suggests that administrators at Unity/Mercy began to consider terminating the CRNAs in early 1993. Stone Aff., Exs. 292, 295, 212.

[5] Hospital administrators at St. Cloud Hospital made the decision to terminate CRNAs and reorganize the anesthesia department in the fall of 1993. The hospital, however, did not complete its transition to sole-source contracting until November 1994.

MDAs. Plaintiff's allege that they were terminated by the Defendant hospitals, not only to eliminate them as competitors, but also in retaliation for reporting alleged Medicare fraud.

DISCUSSION

I. Standard for Summary Judgment

HN1[] A party is entitled to summary judgment as a matter of law only if it can show that no genuine issue of material fact exists. *Fed.R.Civ.P. 56(c)*; *Anderson v. Liberty Lobby Inc., 477 U.S. 242, 256, 106 S. Ct. 2505, 2514, 91 L. Ed. 2d 202 (1986)*. There is no different or heightened standard for summary judgment in a complex antitrust case. *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483, 1490 (8th Cir. 1992)*. The basic inquiry on summary judgment is "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." *477 U.S. at 251-52, 106 S. Ct. at **[**14]** 2512*. If the evidence rebutting the motion for summary judgment is only colorable or not significantly probative, summary judgment should be granted. *Id. at 249, 106 S. Ct. at 2511*.

HN2[] At the summary judgment stage, the court should not weigh the evidence, make credibility determinations, or attempt to determine the truth of the matter. *Quick v. Donaldson Co., Inc., 90 F.3d 1372, 1376-1377 (8th Cir. 1997)* (citing *Anderson, 477 U.S. at 249, 106 S. Ct. at 2510*)). Rather, the court's function is to determine whether a dispute about a material fact is genuine, that is, whether a reasonable jury could return a verdict for the nonmoving party based on the evidence. *Id. at 1377*. The evidence of the non-movant is to be believed, and all justifiable inferences **[*702]** are to be drawn in favor of the non-moving party. Id. "'If reasonable minds could differ as to the import of the evidence,'" summary judgment is inappropriate. Id. (quoting *Anderson, 477 U.S. at 250*, S. Ct. at 2511.)

HN3[] Under *Federal Rule of Civil Procedure 56(c)*, the moving party bears the initial burden of demonstrating the absence of a genuine issue for trial. *Matsushita Elec. Ind. Co. v. Zenith Radio Corp.,* ***[**15]*** *475 U.S. 574, 586-87*; *106 S. Ct. 1348, 1355-56, 89 L. Ed. 2d 538 (1986)*. When a summary judgment motion is properly supported, the opposing party may not rest on the allegations or denials of its pleadings, but must come forward with sufficient evidence to demonstrate a "genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. The non-moving party "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita, 475 U.S. at 586-87*.

II. Antitrust Claims

A. Antitrust Injury

HN4[] To succeed on an antitrust claim, a plaintiff must prove that there has been "antitrust injury." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Antitrust injury is defined as "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful." Id. The injury to the private plaintiff must coincide with the public harm, "increasing the likelihood that public and private enforcement of the antitrust laws will further the same goal of increased competition." *Todorov v. DCH Healthcare* ***[**16]*** *Auth., 921 F.2d 1438, 1449-50 (11th Cir. 1991)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 320*; *82 S. Ct. 1502, 1521, 8 L. Ed. 2d 510 (1962)* (antitrust laws were enacted for the "protection of competition, not competitors"); see also 2 Areeda & Hovenkamp, ***Antitrust Law***, P 362 ("Compensation for that injury must be consistent with the purposes of ***antitrust law*** generally and with the rationale for condemning the particular defendant").

In the present case, Plaintiffs must demonstrate the existence of antitrust injury. This can be accomplished by establishing that the Defendants changed their behavior in an anti-competitive way such as an increase in the price of anesthesia beyond competitive levels or a decrease in the output or quality of care decreased. See *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 31 n. 52, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* ("The record simply tells us little if anything about the effect of this arrangement on price or quality of anesthesiological services"); *Oksanen v. Page Memorial Hospital, 945 F.2d 696, 708-09 (4th Cir. 1991)* ("The fact that a hospital's decision caused a disappointed physician to practice medicine **[**17]** elsewhere does not of itself constitute antitrust injury"). Because the HCFA sets the prices for anesthesia in Medicare and Medicaid cases, Defendants cannot exercise any potential market power to raise the price for anesthesia services in those cases. In such public-pay cases, the rate of reimbursement is fixed. Regarding private-pay patients, Plaintiffs offer little support for their contention that fewer CRNAs in the labor force will result in higher anesthesia prices. [6]

Plaintiffs contend that the removal of CRNAs as hospital employees results in public antitrust injury because CRNAs are no longer available to thwart the alleged "double-billing" and Medicare fraud. **[**18]** Such an injury, however, is not the type the antitrust laws were designed to prevent. As such, it does not constitute a legally cognizable "antitrust injury." Plaintiffs boldly assert several other types of injury but provide no record support for these assertions, offering instead "to present extensive testimony and evidence at trial . . . ." Pls.' Mem. in Opp'n to Dfs.' Mot. for S.J., at 51; see also *Robles, M.D. v. Humana Hospital Cartersville, 785 F. Supp. 989, 999* ("[Plaintiff] has only made conclusory statements and unsupported allegations concerning what might happen in the future **[*703]** to obstetric prices if he is not allowed to compete in this particular . . . market").

Plaintiffs rely on Judge Davis' decision that they established sufficient antitrust injury to withstand Defendants' motion to dismiss. Judge Davis' Order, however, was issued prior to the completion of discovery. Based on the fully developed record, Plaintiffs have failed to demonstrate a triable issue as to the existence of antitrust injury. Further, even if this Court were to find that Plaintiffs have satisfied the requirement of demonstrating antitrust injury, there are alternative grounds, discussed below, **[**19]** for granting Defendants' motion for summary judgment.

B. Conspiracy

HN5[] *Section 1* of the Sherman Act provides, in pertinent part, that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations is declared to be illegal." *15 U.S.C. § 1*. The statutory language, however, is not strictly interpreted; such an interpretation would clearly encompass many legitimate, competitive activities. See *United States v. Topco Assocs., 405 U.S. 596, 606*; *92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515 (1972)*. The Supreme Court recognized that the Act was intended to prohibit only unreasonable restraints of trade. *Board of Trade of Chicago v. United States, 246 U.S. 231, 238*; *38 S. Ct. 242, 244, 62 L. Ed. 683 (1918)* ("The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition").

HN6[] To establish a claim under *§ 1* of the Sherman Act, a plaintiff must demonstrate: (1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained trade **[**20]** under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce. *Bhan v. NME Hospitals, Inc., 929 F.2d 1404, 1410 (9th Cir. 1991)*. The first element of a *§ 1* case requires that defendants "had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*. Concerted action forms the essence of a *§ 1* claim; unilateral actions do not give rise to antitrust liability under *§ 1*. *Willman v. Heartland Hosp. East, 34 F.3d 605, 610 (8th Cir. 1994)*.

HN7[] Although *Rule 56* requires that "the inferences drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion, . . . ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita, 475 U.S. at 587*. In Matsushita, the Supreme Court clarified the nature and extent of a plaintiff's burden in establishing proof of a conspiracy that violates *§ 1*. The Court held:

> Conduct as consistent with permissible competition as with illegal conspiracy does **[**21]** not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment . . ., a plaintiff seeking damages for a violation of *§ 1* must present evidence 'that tends to exclude the possibility' that the alleged

[6] Plaintiffs' expert, Dr. Jerry Cromwell, draws vague conclusions and speculates about the impact of the termination of the CRNAs. On the issue of antitrust injury, the Cromwell report does not offer empirical evidence similar to that of Defendants' expert, Dr. William Lynk. As a result, it does not effectively refute the findings of Dr. Lynk.

> conspirators acted independently. [Plaintiffs] . . . must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed respondents.

Id. at 588 (citations omitted).

In a recent case interpreting Matsushita, the Eighth Circuit rejected plaintiffs' contention that the district court "usurped the jury's function by inferring lawful conduct from defendants' descriptions of the marketplace." Corner Pocket of Sioux Falls, Inc. v. Video Lottery Technologies, Inc., 123 F.3d 1107, 1112 (8th Cir. 1997). The Eighth Circuit commented: "Because '***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case,' the court must necessarily weigh the summary judgment evidence of both parties in determining whether plaintiffs' evidence 'tends to exclude the possibility that the alleged conspirators acted independently.'" **[**22]** Id. (citing Matsushita, 475 U.S. at 588).

[*704] In the present case, Plaintiffs rely primarily on evidence of "parallel conduct" in an effort to demonstrate the existence of a conspiratorial agreement. Plaintiffs allege that the hospitals terminated their CRNAs at approximately the same time, with the same motivation, and in a similar manner. [7] Plaintiffs contend that the similar courses of action undertaken at Unity/Mercy and St. Cloud Hospital compel an inference of conspiracy. According to Plaintiffs, the Grindal letter provided a "blueprint" for this purportedly tacit collusion.

[23]** Many courts have examined the issue of conscious parallelism in the context of parallel pricing in oligopolistic markets. [8] Although the instant case does not involve parallel *pricing*, the fundamental tenets of conscious parallelism are applicable. ***HN8***[] It is possible to infer the existence of an agreement from consciously parallel conduct if the parallelism is accompanied by substantial additional evidence -- often referred to as the "plus factors." *In re Potash Antitrust Litigation, 954 F. Supp. 1334, 1350 (D. Minn. 1997)* (citing Torodov v. DCH Healthcare Authority, 921 F.2d 1438, 1456 n.30 (11th Cir. 1991)).

A plaintiff, for example, may satisfy the "plus factors" requirement by demonstrating that the conspirators acted against **[**24]** their own self-interest by engaging in the parallel conduct or that a high-level of interfirm communication existed in conjunction with the parallel actions. See e.g., Petruzzi's IGA v. Darling-Delaware, 998 F.2d 1224, 1242 (3rd Cir. 1993); Market Force, Inc. v. Wauwatosa Realty Co., 906 F.2d 1167, 1172 (7th Cir. 1990); Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 883 (8th Cir. 1978) (requiring additional evidence such as evidence that the parallel conduct was "inconsistent with the self-interest of the individual actors"). "Where an examination of the proffered 'plus factors' leads to an equally plausible inference that merely interdependent behavior is at hand, then there is no triable issue that would preclude a grant of summary judgment . . . ." *In re Potash, 954 F. Supp. at 1351*.

---

[7] Plaintiffs allege that Defendants engaged in conscious parallelism in an effort to eliminate CRNAs as competitors. The allegations of parallel behavior include the following: "Defendant MDAs secretly approached the Defendant hospitals to terminate their CRNA employees and later lied about the communications to make it appear the hospitals had independently decided to do so;" "both hospitals used operations improvement-type vehicles as a smoke screen to terminate the CRNAs;" "both hospitals claims [sic] that they terminated the CRNAs because they were losing money even though the facts demonstrate that CRNAs were profitable;" "both hospitals used severance as a carrot and a stick to force CRNAs to work for the MDAs;" "both hospitals refused to meet with CRNAs individually or jointly;" "both hospitals excluded CRNAs from the restructuring process;" "both MDA groups refused to allow CRNAs to see their contracts with the hospital prior to being employed by the MDAs . . .;" "both MDA groups hired Ted Grindal and his firm to represent them . . .;" "both hospitals and MDAs negotiated indemnifications from the hospitals to the MDAs to pay their legal fees . . .;" "both hospitals threatened to bring in the same . . . national temporary anesthesia services agency . . .;" "the MDAs at both hospitals made similar statements to the effect that CRNAs got what they were asking for by obtaining the right to direct bill . . . ." Pl.'s Mem. in Opp'n to Dfs.' Mot. for S.J. at 19-24.

[8] An oligopoly is a market containing only a few sellers, in which all sellers recognize that they are primarily interdependent. Consequently, an oligopolist seller will likely account for its competitor's reactions in determining output and prices. VI Areeda, § 1410b at 65.

Plaintiffs contend that numerous actions taken by Defendant hospitals evidence collusion. [9] However, the only action articulated by Plaintiffs that involves conduct which arguably could be interpreted as contrary to Defendants' self-interest is that Defendant hospitals terminated the CRNAs even though the CRNAs were profitable. Although Plaintiffs criticize the profitability **[**25]** analysis conducted at Defendant St. Cloud Hospital, Plaintiffs do not affirmatively demonstrate that the hospitals acted against their own self-interest in terminating the CRNAs. Plaintiff's bald assertion that "it is clear that shifting CRNAs off of the hospital payroll and onto the MDA payroll actually substantially increased the cost of anesthesia" is insufficient to constitute a 'plus factor.' Even if true, this assertion, which is offered with little factual support, merely indicates **[*705]** that the cost to the consumer or third party payer increased. Plaintiffs do not address whether the decision was economically efficient for the hospitals. To be a 'plus factor' the action must be against the interest of each defendant hospital; accordingly, Plaintiffs have failed to establish that this is a 'plus factor' based on the contrary to self-interest analysis.

Plaintiffs do not explicitly contend that the level of interfirm communication **[**26]** is sufficiently high to constitute a 'plus factor.' Plaintiffs suggest, however, that information was channeled between hospitals and professional associations through Theodore Grindal and Al Tank. There is a paucity of sufficient evidence to support this allegation of channeled communication. Defendants concede that three telephone conversations occurred in which anesthesia was discussed: one between St. Cloud Hospital President John Frobenius and Unity/Mercy Hospital President Bill MacNally; one between Frobenius and Unity/Mercy Vice President John Murphy; and one between St. Cloud Hospital Vice President Linda Chmielewski and Murphy. Defendants contend that the brief conversations occurred after Unity/Mercy publicly announced the reorganization of the anesthesia department in July 1993.

Plaintiffs also allege that a number of documents found in the files of AASC could only have come from Unity/Mercy. The documents, most of which are of unknown origin, are neither quantitatively nor qualitatively sufficient to satisfy the requirement for 'plus factors.' The three brief telephone conversations and the documents identified by Plaintiffs do not constitute the requisite high-level of **[**27]** interfirm communication, which "viewed in conjunction with paralleling acts, can serve to allow a jury to reasonably infer a conspiracy." See *In re Potash, 954 F. Supp. at 1351* (citing *Market Force Inc., 906 F.2d at 1172*). Given these facts, even when viewed in the light most favorable to the non-moving party, it is equally plausible that the Defendant hospitals acted independently, in response to market conditions, in terminating their respective CRNA employees.

Plaintiffs also rely on the affidavit of a CRNA from Florida, Randolph Harvey, to indicate the existence of an agreement. Harvey allegedly overheard Defendant Craig Johnson, an anesthesiologist at St. Cloud Hospital, talking with several people at a breakfast meeting in May 1993. Harvey allegedly heard Johnson say: "We have a way to take care of CRNAs in Minnesota to gain control of anesthesia without worrying about antitrust. We will get the hospitals to fire the CRNAs and force them to work for us, or the CRNAs may apply for privileges as private contractors with the hospital. . . ." Harvey Aff., P 4.

In *Bolt v. Halifax Hosp. Medical Ctr., 891 F.2d 810 (11th Cir. 1990)*, cert. denied, *495 U.S. 924, 109 L.* ***[**28]*** *Ed. 2d 322, 110 S. Ct. 1960 (1990)*, the Eleventh Circuit Court of Appeals held that similar statements were insufficient as a matter of law to establish a conspiracy. The plaintiff in Bolt, a physician whose privileges had been revoked at three different hospitals within two months, alleged that the hospitals and others conspired to unreasonably restrain trade. Bolt testified that one of the defendant physicians made the following statements to the credentials committee at one of the hospitals:

> "Listen, here's the plan. They're going to get rid of [Bolt] at [Halifax Hospital]. That means we're going to get rid of him at [Orman Beach Hospital] and I think because the other two hospitals are going to get rid of him, we've got to seriously think of getting rid of him at [Daytona Community Hospital]."

Bolt, 891 F.2d at 826. The Eleventh Circuit held that the statements were insufficient to permit an inference of conspiracy. The court opined: "Viewed in the light most favorable to Dr. Bolt, the evidence merely establishes that the decisionmakers at each one of the three hospitals based their decisions at least in part on matters that occurred at the other **[**29]** two hospitals." *Id. at 827*.

---

[9] See supra note 6 (listing allegedly collusive or parallel conduct).

Similarly, when viewed in the light most favorable to Plaintiffs, the Harvey affidavit does not refer to an agreement between Defendants to terminate the CRNAs. It is equally plausible that the statements attributed to Dr. Johnson merely reflect his own interpretation of the situation at St. Cloud Hospital. As in Bolt, the statements do not **[*706]** evidence *concerted* action or an *agreement* of any kind.

The Defendants' actions were equally consistent with permissible, legitimate business conduct as they were with an illegal conspiracy. Consequently, Plaintiffs have failed to demonstrate the existence of a genuine issue of material fact on the element of conspiracy.

C. Reasonableness of Restraint

Despite the conclusion that Plaintiffs have failed to demonstrate a contract, combination, or conspiracy, the second prong of a *§ 1* claim will be addressed to assess whether there is a genuine issue of material fact regarding the reasonableness of the alleged restraint. ***HN9***[] "[A] restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held to be 'per se' unreasonable, or because it violates what has come to **[**30]** be known as the 'Rule of Reason,' under which the 'test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.'" *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 457-58*; *106 S. Ct. 2009, 2017, 90 L. Ed. 2d 445 (1986)* (citation omitted).

1. The Per Se Rule

HN10[] If a court determines that the challenged behavior falls within the discrete category of conduct that is illegal per se, a plaintiff need not establish its anti-competitive effects. *Flegel, D.O. v. Christian Hospital, Northeast-Northwest, 4 F.3d 682, 686 (8th Cir. 1993)*. In the present case, Plaintiffs assert that because Defendants' conduct resulted in the exclusion of a class of medical service providers, Defendants' actions are so manifestly anti-competitive that they are illegal per se.

HN11[] Most courts of appeals, including the Eighth Circuit Court of Appeals, have examined the denial or revocation of hospital privileges primarily under a rule of reason rather than per se analysis. *Flegel, D.O. v. Christian Hospital, Northeast-Northwest, 4 F.3d 682, 686 (8th Cir. 1993)* (citing *Oksanen v. Page* ***[**31]*** *Memorial Hosp., 945 F.2d 696, 708-09 (4th Cir. 1991)* (en banc), cert. denied, *502 U.S. 1074, 112 S. Ct. 973, 117 L. Ed. 2d 137*, (1992); *Bhan v. NME Hosp., Inc., 929 F.2d 1404, 1412 (9th Cir. 1991)*, cert. denied, *502 U.S. 994, 112 S. Ct. 617, 116 L. Ed. 2d 639 (1991)*; *Oltz v. St. Peter's Community Hosp., 861 F.2d 1440, 1445 n. 1 (9th Cir. 1988)*; *Goss v. Memorial Hosp. Sys., 789 F.2d 353, 354-55 (5th Cir. 1986))*. In Bhan, the Ninth Circuit Court of Appeals addressed the applicability of per se analysis in the context of group boycotts, such as the one alleged in Count 1 of Plaintiffs' Complaint. The court determined that "the per se rule should be invoked for a group boycott when the challenged activity would almost always tend to be anti-competitive." *Bhan, 929 F.2d at 1412*.

Significantly, in a situation very analogous to the present case, the plaintiff in Bhan alleged that physicians conspired with a hospital to allow only physician, rather than nonphysician, providers to offer specific medical services. The court recognized that under certain circumstances, "the practice of excluding nonphysician providers as a class would appear to be anti-competitive." **[**32]** Id. The court determined, however, that under some circumstances "the choice of physician over nonphysician providers may actually sharpen competition by making [the hospital] a more attractive competitor in the patient market." Id. As a result, the court held that the rule of reason was applicable, because the practice of excluding nonphysicians was not one that would always have an anti-competitive effect. Adopting this analysis, the Court will examine the challenged conduct under the rule of reason.

2. Rule of Reason Analysis

HN12[] In assessing the legality of a restraint of trade under the rule of reason, courts focus on the detrimental effects to competition. *Flegel, 4 F.3d at 687*. A plaintiff may demonstrate the existence of detrimental effects in one of two ways. Id. (citing IFD, 476 U.S. at 460-61; *106 S. Ct. at 2019*). First, a plaintiff may delineate a relevant market and show that the defendant has enough market power to significantly impinge on competition. *Bhan, 929 F.2d at 1413*; see also 7 Phillip Areeda, ***Antitrust* [*707] *Law*** PP 1507, 1511 (1986). Second, a plaintiff may demonstrate that the challenged practice has actually produced significant anti-competitive **[**33]** effects. If a plaintiff demonstrates the existence of actual detrimental effects, formal market analysis is unnecessary. *FTC, 476 U.S. at 460-61*; *106 S. Ct. at 2018-19*.

"Either showing -- market power or actual detrimental effects -- shifts the burden to the defendant to demonstrate pro-competitive effects." *Flegel, 4 F.3d at 688*. If the defendant satisfies this burden, the burden then shifts back to the plaintiff to demonstrate that any legitimate objectives could be achieved through substantially less restrictive means. Id. (citing *Bhan, 929 F.2d at 1413*). The court then weighs the benefits and detriments to determine if the conduct is reasonable "on balance." Id.

(a) Actual Detrimental Effects

In the present case, Plaintiffs assert, albeit in a footnote, that "there is proof of actual detrimental effects, to wit: an actual increase in the price of anesthesia as a result of CRNAs being forced to leave hospital employment and to work for MDAs." [10] Despite this assertion of alleged "fact," there is a dearth of evidence indicating Defendants' conduct actually had an adverse impact on competition. As previously discussed, there has been no showing that the price **[**34]** of anesthesia services has increased substantially, that the output has decreased, or that the quality has declined. [11] Plaintiffs cannot demonstrate a genuine factual issue regarding the existence of actual anti-competitive effects.

[35]** (b) Market Power

Because Plaintiffs failed to show actual detrimental effects, Plaintiffs must instead demonstrate that Defendants have market power in a well-defined relevant market. *Assam Drug Co. v. Miller Brewing Co., 798 F.2d 311, 318 (8th Cir. 1986)*. ***HN13***[] Relevant markets are defined both in terms of product and geography. *Flegel, 4 F.3d at 689*; *Morgenstern v. Wilson, 29 F.3d 1291, 1296 (8th Cir. 1994)*. A geographic market is that geographic area "to which consumers can practically turn for alternative sources of the product and in which the antitrust defendants face competition." *Morgenstern, 29 F.3d at 1296*.

Plaintiffs assert that the definition of the relevant market is a factual inquiry which is typically reserved for the jury. The Eighth Circuit, however, has held that market definition, like any issue, "is subject to summary judgment if the Plaintiffs fail to provide sufficient evidence from which a jury could reasonably find in their favor." *Flegel, 4 F.3d at 690* (citing *Assam Drug, 798 F.2d at 317*; *Bhan, 929 F.2d at 1413 n. 9*).

Plaintiffs allege unreasonable restraint of trade in two product markets: (1) the labor market for CRNA services; [12] **[**36]** and (2) the market for anesthesia services to customers. Regarding the labor market for CRNA services, Plaintiffs concede that the market is national or potentially larger in scope. Cromwell Rebuttal Report, at 3-4 ("[Dr. Lynk] rightly concludes (paragraph 27) that so long as a sufficient number of these providers [MDAs and CRNAs] remains geographically **[*708]** mobile, their tendency to locate in areas where demand is highest prevents local

---

[10] Plaintiffs cite to successive pages in their memorandum in support of this proposition. The cited pages, however, do not contain any significant evidence of an increase in the price of anesthesia. Moreover, Plaintiffs' memorandum is not evidence properly before the Court.

[11] Plaintiffs assert, through the affidavit of Ladonna Schweer, that the quality of anesthesia services has declined at the Defendant hospitals since the termination of CRNAs as direct hospital employees. Schweer's affidavit recites inadmissible hearsay from another employee "that, based on her personal observations since the CRNAs at Unity and Mercy were terminated as employees of the hospital, the quality of care in those hospitals has decreased rather than increased." Stone Aff., Ex. 14, at 2. Moreover, the notes purportedly offered in support of these conclusory statements merely contain critiques of recent services. Without any reference to prior delivery of services, the notes are not probative of any *increase* or *decrease* in the quality of care.

[12] Plaintiffs attempt to address the labor markets for both CRNAs and MDAs. Plaintiffs' expert, however, concedes that "the defendant hospitals have no power to alter the national average income of anesthesiologists." Cromwell Rebuttal Report, at 3-4.

anesthesia providers from being insulated from the national conditions of supply and demand"). The deposition testimony of CRNAs affirmed that the labor market for anesthesia providers is national. CRNA depositions revealed significant, interstate job mobility among CRNAs who received job offers or accepted employment in other states as a result of the reorganizations at issue in this case. See Lynk Report, Table 5, Fig. 2. Because the labor market for CRNA services is national, the Defendant hospitals have no power to impact the market. Consequently, there is no factual issue regarding the labor market that would preclude summary judgment.

[37]** The market for anesthesia services requires more detailed analysis. [13] Although Judge Davis noted that Plaintiffs' Complaint alleged anti-competitive conduct in three different potential markets, Plaintiffs have settled on a theory of atomized markets for St. Cloud Hospital and the Allina system, which includes Mercy, Unity, United, St. Francis, and the Phillips Eye Institute.

i. The Allina System

Defendants contend that the seven-county Twin Cities metro area is the appropriate geographic market within which Allina hospitals compete for patients. Defendants maintain that using the metro area to define the market parameters is actually underinclusive of the relevant geographic market. Nevertheless, Defendants conclude that even this under-inclusive benchmark results in a finding of insufficient market power. Plaintiffs assert: "We disagree **[**38]** with the approach of using the entire 7-county area as the single market area for the five Allina hospitals. . . . We believe that the true market areas of the Allina hospitals need to be parsed out one by one." Cromwell Rebuttal Report, at 14.

Defendants' expert, Dr. Lynk, defines the geographic market for Allina hospitals using a technique referred to as the Elzinga-Hogarty ("E-H") method. The E-H test is a method created by professors of economics, Kenneth G. Elzinga and Thomas F. Hogarty, "to analyze patterns of consumer origin and destination and to identify relevant competitors of the merging entities." *FTC, 69 F.3d 260, 264*. The E-H approach involves adding counties to Allina's market area until 90% of its surgical patients are included within that geographical area. The method is premised on the simple notion that if a hospital draws a significant number of patients from a county, it is competing for patients in that county, and consequently, that county should be included in its market area. See generally Lynk Report; Cromwell Rebuttal Report, at 5.

Using patient origin data and the E-H method of market definition, Defendants' expert, Dr. Lynk, determined that Allina's **[**39]** relevant geographic market was at least as large as the Twin Cities metro area. Within this market, he concluded that the Allina Defendants had a market share of 31%. Such a market share is insufficient as a matter of law to constitute market power. [14] See *Jefferson Parish, 466 U.S. at 26-27* (30% market share is insufficient to infer market power even in the face of "'market imperfections' that permit petitioners to charge noncompetitive prices for hospital services…").

Plaintiffs' expert, Dr. Cromwell, rejects the E-H approach and favors a formulation articulated by the Justice Department. The Justice Department approach "seeks to identify a geographic **[**40]** market area such that a hypothetical firm that was the only present and future producer or seller of the relevant product in that area could profitably impose a small but significant and nontransitory increase in price." Cromwell Rebuttal Report, at 7. Under this analysis, Dr. Cromwell contends that "St. Cloud and Mercy & Unity **[*709]** Hospitals definitely enjoy such market power in their 20-25 mile market areas." Id. Plaintiffs, however, provide little information regarding how and in what context the Justice Department implements their preferred approach. Similarly, Plaintiffs cite no case in which such a methodology is used. Despite Plaintiffs' criticism of the E-H test, the methodology has been accepted by the Eighth Circuit. *FTC, 69 F.3d at 264*.

---

[13] Because anesthesia is provided attendant to surgery, surgical statistics may be used as a proxy indicating the proportion of anesthetics provided at a given hospital.

[14] Plaintiffs rely on *Oltz v. St. Peter's Community Hospital, 861 F.2d 1440 (9th Cir. 1988)* in support of their antitrust claims. Oltz, however, is distinguishable because the defendants in that case had an 84% market share. Also, the plaintiff CRNA in Oltz was prevented from delivering any anesthesia services, unlike Plaintiffs in the present case.

Plaintiffs also use mileage figures to delineate the relevant markets. To that end, Plaintiffs' expert, Dr. Cromwell, selected distances of 10 miles and 25 miles as parameters within which to define the relevant market. Plaintiffs, however, fail to provide significant factual or legal support for the use of these particular distances as benchmarks. Dr. Cromwell merely offers his opinion that 25 miles is the maximum reasonable patient **[**41]** travel distance. Cromwell Rebuttal Report, at 12. Dr. Cromwell notes that 25 miles is "the threshold distance the federal government uses to define an 'isolated sole community hospital.'" Id. Because none of the hospitals at issue in this case constitute a sole community hospital, the 25 mile benchmark is inapposite and arbitrary, particularly in the absence of any cited authority for the use of this distance in the context of market definition.

Recent decisions by the Eighth Circuit establish a stringent requirement that a party accurately define the relevant market. In *Morgenstern v. Wilson, 29 F.3d 1291 (8th Cir. 1993)*, the court held that the plaintiff had failed to successfully define the relevant geographic market area, because the plaintiff did not analyze where consumers could practicably turn for alternative sources of the product. *Id. at 1296-97* ("[Plaintiff's] expert focused upon where Lincoln and Omaha residents *actually* went, as opposed to where they *could* practicably go, for their cardiac surgery services, and specifically presented insufficient evidence regarding whether or not [defendants'] patients could practicably turn for alternative sources **[**42]** of the product to Omaha or other more distant heart programs").

Similarly, in *Bathke v. Casey's General Stores, Inc., 64 F.3d 340 (8th Cir. 1995)*, the Eighth Circuit affirmed the district court's grant of summary judgment on the basis of plaintiff's failure to define a relevant geographic area. As in Morgenstern, the court determined that the plaintiff's expert neglected to offer evidence regarding the alternative areas defendants' customers could practicably turn for the products in question. *Id. at 345*; see also *FTC, 69 F.3d at 269* (criticizing plaintiff's expert's analysis because it merely analyzed current patient flow into and out of the three Joplin hospitals as well as hospitals located within a twenty-seven mile radius of Joplin and therefore provided only "a static, rather than a dynamic, picture of the acute care market in Joplin. . ."). In the case at hand, Plaintiffs failed to adequately address the question of where consumers could practicably go for alternative sources of anesthesia services, a flaw which is fatal to their definition of the relevant geographic market.

Plaintiffs further contend that an atomized market, which separates the Allina facilities, **[**43]** is more appropriate. Although Plaintiffs' expert, Dr. Cromwell, advocates an atomized market and critiques Dr. Lynk's use of the E-H method, Dr. Cromwell offers no other evidence of the relevant geographic market for the Allina system. Rather, Dr. Cromwell relies on generalized assertions about the oligopolistic nature of the market. [15] See e.g., Cromwell Rebuttal Report, at 16.

[44]** **[*710]** ii. St. Cloud Hospital

Dr. Lynk also conducted the first part of the E-H test for the St. Cloud Hospital market and concluded that St. Cloud Hospital obtains 90% of its anesthesia/surgical patients from a ten-county area in central Minnesota. Lynk Report, P 35. Within this area, the hospital has a 34.6% market share. Id. This market share, like that of the Allina system, is

---

[15] Dr. Cromwell opines:

> Allina's market share of inpatient and ambulatory surgery for its five hospitals (excluding St. Francis but including Phillips Eye) was 32.84, almost exactly what Dr. Lynk estimated. However, the three hospitals in the Healtheast system enjoyed a 9.4% market share while the four hospitals in the Fairview system (including the University of Minnesota) enjoyed a 27.7% share. This leaves four independents: North Memorial, Methodist, St. Paul-Ramsey, and Hennepin County. The overall Herfindahl Index for the four independents and the three systems was 2116, above the threshold for antitrust concerns by the Justice Department. The three systems, alone, generated a Herfindahl Index value of 1935, a value exceeding the Justice Department's threshold. Coupled with the fact that Mercy & Unity Hospitals have a special geographic niche on the northeast side of the Mississippi River, these index values certainly raise anti-competitive concerns.

Cromwell Rebuttal Report, at 16. This is the only evidence proffered by Dr. Cromwell that attempts to quantify market share in the context of the Allina system. It appears, however, that Dr. Cromwell merely aggregates hospitals or systems when it is advantageous to do so.

not sufficient to constitute anti-competitive market power. See *Jefferson Parish, 466 U.S. at 26-27*; *Morgenstern, 29 F.3d at 1296*; Lynk Report, P 35.

Dr. Cromwell attempts to counter the conclusions of Dr. Lynk by analyzing St. Cloud Hospital's market share based on seemingly arbitrary mileage figures, including the city limits, ten miles outside the city, and 25 miles outside the city. The shortcomings of Dr. Cromwell's approach become more apparent when one considers the alternative hospitals that are 25-35 miles away and 50-70 miles away. Cromwell Report, P 23. Plaintiffs acknowledge, through Dr. Cromwell, that such alternatives exist but offer no analysis indicating to what extent patients would travel to these facilities in search of anesthesia alternatives. As such, Plaintiffs' proffered market **[**45]** definition is insufficient as a matter of law. See *Morgenstern, 29 F.3d at 1297*.

Plaintiffs have not demonstrated the existence of a genuine issue of material fact concerning the relevant geographic market for anesthesia services with regard to either the Allina system or the St. Cloud Hospital. Plaintiffs have failed to delineate a relevant market in both situations and therefore have failed to show the existence of a factual issue regarding an unreasonable restraint of trade. Plaintiffs' failure to show an unreasonable restraint of trade and their failure to produce evidence of a conspiracy provide alternative grounds for granting summary judgment as to Plaintiffs' *§ 1* claims, which are asserted in Counts I, III, and V.

C. Illegal Boycott

Count III of Plaintiffs' Complaint alleges an illegal boycott of CRNA labor. Count III specifically alleges that the purported boycott "has had a direct anti-competitive effect on relevant markets. . . ." Complaint, P 87. As discussed above, however, Plaintiffs failed to demonstrate the existence of a genuine issue of material fact regarding anticompetitive effects in a relevant market. Also, the boycott claim cannot withstand summary judgment **[**46]** in light of the fact that many CRNAs continue to practice at the Defendant hospitals.

D. Tying Claim

Count V alleges that Defendants conspired to illegally "tie" anesthesiological services to surgical services. [16] Because a successful claim of illegal tying requires proof of legally sufficient market power, it is unnecessary to delve further into the merits of Plaintiffs' tying claim. See e.g., *Jefferson Parish, 466 U.S. at 13-14* ("We have condemned tying arrangements when the seller has some special ability -- usually called 'market power' -- to force a purchaser to do something that he would not do in a competitive market"). As discussed above, Plaintiffs have failed to demonstrate that Defendants have market power in the relevant markets.

[47]** E. Monopolization

Count IV of Plaintiffs' Complaint alleges monopolization, attempted monopolization, and a conspiracy to monopolize, in violation of *§ 2* of the Sherman Act. ***HN14***[] Monopolization requires that a defendant possess monopoly power in a relevant geographic market. As discussed above, Allina's market **[*711]** share of 31% and St. Cloud Hospital's market share of 34.6% do not reflect monopoly power. Moreover, Defendants contend, and this Court agrees, that the Defendant hospitals "cannot be liable for monopolizing a service they do not provide," because it is the anesthesiologist groups that actually provide the anesthesia services. Dfs.' Mem. in Supp. of Mot. for S.J., at 59; see *Boczar v. Manatee Hospitals and Health Systems, Inc., 731 F. Supp. 1042, 1047 (M.D. Fla. 1990)*.

HN15[] A claim of attempted monopolization requires a showing of: (1) a specific monopolistic intent on the part of the defendant; (2) predatory or anti-competitive conduct on the part of the defendant in an effort to accomplish an

[16] Although in *Jefferson Parish, 466 U.S. 2, 21, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*, the Court held that markets for anesthesia services and surgical services were sufficiently distinct to allege an illegal tying arrangement, the Court also recognized that this alone did not make an exclusive contract illegal and that there was nothing inherently illegal about packaged sales. *466 U.S. at 24-25*.

unlawful purpose; (3) a dangerous probability of success; and (4) antitrust injury. *Midwest Radio v. Forum Publishing Co., 942 F.2d 1294, 1297 (8th Cir. 1991)*. As discussed previously, **[**48]** Plaintiffs failed to demonstrate antitrust injury, and as such, cannot maintain a claim for attempted monopolization.

HN16[] The elements of a conspiracy to monopolize claim are: (1) the existence of a combination or conspiracy; (2) an overt act in furtherance of the conspiracy; and (3) specific intent to monopolize. *Baxley-DeLamar Monuments, Inc. v. American Cemetery Ass'n, 843 F.2d 1154, 1157 (8th Cir. 1988)*. As discussed in the context of *§ 1* of the Sherman Act, Plaintiffs have failed to demonstrate a genuine factual issue as to the existence of a conspiracy.

F. Denial of Essential Facilities Claim

Count VI alleges a claim for denial of essential facilities. ***HN17***[] "To prevail under the essential facilities doctrine, the plaintiff must establish '(1) control of an essential facility by a monopolist; (2) the inability to practically or economically duplicate the facility; and (3) the unreasonable denial of the use of the facility to a competitor when such is economically and technically feasible.'" *Willman v. Heartland Hospital East, 34 F.3d 605, 612-13 (8th Cir. 1994)* (internal citation omitted). Because Plaintiffs have failed to demonstrate that Defendants possess monopoly power **[**49]** in any relevant market, Plaintiffs cannot avoid summary judgment on this claim as well. Moreover, many CRNAs continue to provide anesthesia services at Defendant hospitals, albeit within a different employment structure. As such, Plaintiffs cannot sustain a claim for denial of essential facilities.

G. Supplemental Jurisdiction

By virtue of this Order granting summary judgment on Plaintiffs' federal antitrust claims, the only remaining claims are Plaintiff's state law claims. As such, this Court must decide whether or not to exercise supplemental jurisdiction over the state claims.

HN18[] Pursuant to *28 U.S.C. § 1367(c)(3)*, a district court may decline to exercise supplemental jurisdiction over a claim if: "the district court has dismissed all claims over which it has original jurisdiction,. . . ." A district court has the discretion to exercise or to refuse to exercise pendent jurisdiction. *Marshall v. Green Giant Co., 942 F.2d 539, 549 (8th Cir. 1991)* (citation omitted). Courts should "exercise judicial restraint and avoid state law issues wherever possible." *Condor Corp. v. City of St. Paul, 912 F.2d 215, 220 (8th Cir. 1990)*.

HN19[] Factors a court should consider in deciding whether **[**50]** to exercise supplemental jurisdiction include: the stage of the litigation; the difficulty of the state claim; the amount of judicial time and energy necessary for the claim's resolution; and the availability of a state forum. *Marshall, 942 F.2d at 549 (8th Cir. 1991)* (quotation omitted). See also *Hanson v. Hancock Memorial Hosp., 938 F. Supp. 1419, 1434 (N.D.Iowa 1996)* (citing *Willman v. Heartland Hosp. East, 34 F.3d 605, 613-14 (8th Cir. 1994))* ("matter may be remanded even after the parties have completed a lengthy and complex discovery process and the court has disposed of a motion for summary judgment just weeks before trial").

Upon a review of all the factors, the Court concludes it will not exercise supplemental jurisdiction. Consequently, Plaintiffs' remaining claims will be dismissed without prejudice, so that they may be considered in an appropriate state forum.

[*712] CONCLUSION

Based on the foregoing, and all of the files, records and proceedings herein, **IT IS HEREBY ORDERED** that:

1. Defendants' Motion for Summary Judgment is **GRANTED IN PART** and **DENIED IN PART**. Defendants' Motion for Summary Judgment is **GRANTED** as to all of **[**51]** Plaintiffs' federal antitrust claims (Counts 1 through 6); Defendants' Motion for Summary Judgment is **DENIED** as to Plaintiffs' state law claims (Counts 2, 8, 12, and 16).

2. Plaintiffs' state law claims (Counts 2, 8, 12, and 16) are **DISMISSED WITHOUT PREJUDICE**.

LET JUDGMENT BE ENTERED ACCORDINGLY.

HN5[] **Motions to Dismiss, Failure to State Claim**

A "professional review action," as the Health Care Quality Improvement Act, 42 U.S.C.S. § 11101-11152, defines it, is an action or recommendation of a professional review body which is taken or made in the conduct of professional review activity which affects (or may affect) adversely the clinical privileges, or membership in a professional society, of a physician. Such term also includes professional review activities relating to a professional review action. *42 U.S.C.S. § 11151(9)*. A "professional review activity" means an activity of a health care entity with respect to an individual physician (A) to determine whether the physician may have clinical privileges with respect to, or membership in, the entity, (B) to determine the scope or conditions of privileges or membership, or (C) to change or modify such privileges or membership. *42 U.S.C.S. § 11151(10)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN6[] **Regulated Practices, Private Actions**

Even under the liberal Federal Rules of Civil Procedure, there is a limit to how much a court may be called upon to divine in assessing the sufficiency of the complaint before it, particularly when the plaintiff is represented by counsel.Conclusory allegations of antitrust violations are simply not enough.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] **Regulated Practices, Private Actions**

While summary disposition is difficult as to antitrust claims, it is not improper.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN8[] **Entitlement as Matter of Law, Genuine Disputes**

Although defendants have the initial burden to show that no genuine issue of material fact exists as to a plaintiff's claims, once met, plaintiff is required to designate specific facts showing that there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. As such, plaintiff needs to point to genuine issues of material fact that (1) defendants violated laws and (2) the violation caused her actual injury. More than a metaphysical-doubt has to be shown, and plaintiff needs to set forth facts tending to preclude inferences of permissible conduct.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN9[] **Regulated Practices, Private Actions**

Where conduct is as consistent with permissible conduct as with an illegal conspiracy it does not, standing alone, support an inference of antitrust conspiracy. Evidence must be presented that tends to exclude the possibility that the defendants were acting independently.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Sherman Act, Claims**

In order to bring a private action under the Sherman Act, *15 U.S.C.S. § 1 et seq.*, an antitrust injury must be proven. The Sherman Act protects competition, not competitors. Thus, vital to any antitrust claim is the allegation that the defendants' conspiracy or illegal contract has caused injury to competition. Plaintiffs must prove antitrust injury that reflects the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. In turn, in order to find market injury, the impact within the market must be assessed, requiring some factual submission as to that market's structure and the services offered therein.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN11[] **Antitrust & Trade Law, Sherman Act**

To show an injury under the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must show (1) a contract, combination or conspiracy; (2) in restraint of trade; (3) affecting interstate commerce existed between the defendants. Indeed, only if the collusion necessary for the first element is evident can the court consider whether issues of fact exist as to whether an antitrust violation, per se or otherwise, has been committed.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

The inference of "opportunity to conspire" is insufficient; a triable issue must exist as to whether an illegal contract between or "concerted action" by the defendants exists. Moreover, a plaintiff is required to negate any reasonable inference that the defendants acted independently and/or properly by showing they had made a conscious commitment to a common scheme designed to achieve an unlawful objective. The ordinary prospect of competition from any defendant is not enough on which to base her claim, and any consequent commercial injury to her as an individual is irrelevant.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN13[] **Regulated Practices, Private Actions**

Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***.

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Antitrust & Trade Law, Sherman Act**

Section 2 of the Sherman Act, *15 U.S.C.S. § 2*, requires injury to the market, as opposed to individual impact.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

An "attempted monopolization" claim requires a plaintiff to prove (1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize, and (3) a dangerous probability of achieving monopoly power.

Opinion

[*272] *OPINION AND ORDER*

OWEN, District Judge

Plaintiff, Dr. Ifeoma Ezekwo, is a physician licensed in New York State to practice both internal medicine and opthamology. She maintains a practice at 2685 Grand Concourse in Bronx, New York, and had admitting privileges at various hospitals. [1] Regardless of these credentials, however, Dr. Ezekwo did not receive board certification in internal medicine until August 1997, after having failed the certifying exam in 1984, **[*273]** 1990, 1992, **[**2]** 1994, and 1995. Despite her practice, but flowing from her repeated exam failures, Dr. Ezekwo now asserts that the American Board of Internal Medicine, the certifying organization, along with various health care providers have conspired to boycott her from the practice of and restrained trade in internal medicine, and that they have

[1] Dr. Ezekwo has maintained a practice in internal medicine since 1983. She became licensed in opthamology in 1988. As of April 1993, she represented that she held admitting privileges at Beth Israel Medical Center hospitals, Our Lady of Mercy Medical Center (233rd Street and Pelham Divisions) and Manhattan Eye, Ear and Throat Hospital.

monopolized, or attempted to monopolize, the market area being defined as roughly the North Central Bronx. All of these claims are asserted under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, with Dr. Ezekwo seeking treble damages and injunctive relief under Sections 4 and 16 of the Clayton Act respectively, *15 U.S.C. §§ 15*, *26*. [2]

[3]** The defendants are the certifying organization, the said American Board, and Montefiore Medical Center, Empire Blue Cross/Blue Shield, and The Bronx Health Plan (BHP), an HMO regulated under New York law. In response to Dr. Ezekwo's claims, each, other than Empire, seeks judgment on the pleadings, *Fed. R. Civ. P. 12(c)*. All seek dismissal of the complaint for failure to state a claim for which relief can be granted on the basis of *Fed. R. Civ. P. 12(b)(6)*. The Board, Montefiore and BHP also move for conversion to summary judgment as allowed under *Fed. R. Civ. P. 12(b)*, *56(c)*. Finally, Montefiore and BHP also assert immunity under The Health Care Quality Improvement Act, *42 U.S.C. §§ 11101-11152*, which grants limited immunity as to money damages for those participating in professional peer review processes. *42 U.S.C. §§ 11101(5)*, *11111(a)*.

The Board administers the certifying exam that Dr. Ezekwo repeatedly failed. It is a private, non-membership organization that provides for the voluntary certification of internists, which the public and health care employers may, but are not required to, rely upon in making health care and employment choices. The Board is not a health care provider **[**4]** or employer and creates its certification criteria independent of the market, having no control over how the certification is used or perceived once it is granted. [3]

Over the years, however, [4] the Board's certification has become an important credential for internists, with many (but not all) hospitals, insurance companies and HMOs relying on its certification of a doctor's knowledge and competence in the field of internal medicine. The other defendants, Montefiore, Empire, and BHP, each rely upon the Board's certification--among other things--to some extent in their employment choices. It is this reliance that Dr. Ezekwo equates with conspiracy.

[5]** When Dr. Ezekwo first failed the Board's examination in 1992, she requested--under the Board's established review procedures--that her exam be rescored by hand. [5] When the hand-scoring revealed no errors, Dr. Ezekwo suggested that "foul play" had taken place. After asking for and not receiving substantiation for the claim, the Board offered Dr. Ezekwo the opportunity to review her examination along with the answer key, and to meet with the Board, along with her counsel, so the Board could explain its scoring procedure. Dr. Ezekwo did not accept the Board's offer.

In the same year, Dr. Ezekwo applied to Montefiore for admitting privileges in its Departments of Medicine and Opthamology. The record **[**6]** substantiates that these applications **[*274]** were processed according to Montefiore's by-laws and established procedures. [6] **[**7]** Of particular note, Montefiore's by-laws set forth the

---

[2] ***HN1***[] One "who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" may receive treble damages under Section 4 of the Clayton Act. *15 U.S.C. § 15(a)*. Section 16 provides for injunctive relief. *15 U.S.C. § 26*.

Due to the fact that Dr. Ezekwo passed the certifying examination in August 1997, the injunctive relief sought against the certifying organization is now moot.

[3] To receive the Board's certification, a doctor must complete three years of post-graduate training in internal medicine and pass the two-day written exam that the Board administers.

[4] The Board has been certifying internists for over 50 years, and is, indeed, the only such certifying body in the field of internal medicine.

[5] The Board's examination is machine-scored in the first instance. Under the Board's review procedures, if a candidate for certification believes the exam to be erroneously scored, he or she can request hand scoring. If a candidate fails the exam more than two times, he or she can go over the exam with a Board officer.

[6] Montefiore's Medical Staff By-Laws delineate the process for obtaining voluntary attending privileges as well as full-time staff admitting privileges. The hospital is divided into clinical departments that correspond to areas of medical and surgical practice. The by-laws provide that each department is responsible for establishing its own criteria for the grant of clinical privileges. The

general qualifications required of a doctor seeking admission to its medical staff: (1) the doctor must be licensed to practice in New York State, (2) must be able to document his or her background, experience, training, (3) must demonstrate competence, good reputation, character and ability to work with others, as well as physical and mental capacity to practice, and (4) must provide supporting letters of recommendation. The by-laws also require that the applicant demonstrate an ability and willingness to satisfy the teaching and research needs of the Hospital. [7] Finally, the Department of Medicine requires the Board's certification in internal medicine as part of the documentation supporting an applicant's knowledge and expertise in the field. [8]

Dr. Ezekwo was first interviewed by Montefiore in July 1992, by the Chair and Vice-Chair of the Department of Medicine. She was later interviewed by the Credential Committee in June 1993, which unanimously recommended her application be denied in July 1993. Shortly thereafter, both the Committee on Promotions & Appointments and the Divisional Credentials Committee recommended the same. Finally, in accordance with the by-laws, Dr. Ezekwo was informed that the Medical Staff Executive Committee (Executive Committee) had prepared an adverse recommendation for the Board of Trustees, on September 24, 1993. [9] The stated rationale for the **[**8]** adverse recommendation was (1) an evident limited fund of medical knowledge based on Dr. Ezekwo's two previous failures on the certification examination, (2) lack of ongoing involvement in house staff teaching programs and an ambivalent attitude regarding participation in the Medical Department's educational programs, and (3) failure to obtain adequate letters of recommendation from Chiefs of Medical Services at other institutions regarding Dr. Ezekwo's current hospital practice. Upon receiving notice of the adverse recommendation, Dr. Ezekwo exercised her right of appeal, requesting a hearing before the Ad Hoc Hearing Committee in October 1993.

[9]** Dr. Ezekwo's request for a hearing triggered the extensive appellate procedures established **[*275]** under Montefiore's Medical Staff By-Laws. [10] The first hearing was held on November 30, 1993, with six subsequent evidentiary sessions being held, involving over twenty hours of review, ending February 7, 1995. While aware of her right to counsel, Dr. Ezekwo appeared on her own behalf. [11] Dr. Ezekwo presented documentary evidence in large volume and testimony is support of her applications. [12] At the close of the hearings, the Hearing Committee

---

applications receive a three-tiered evaluation, by (1) the Promotion and Appointment Committee, (2) the relevant Department Chair, and (3) the pertinent divisional Credential Committee of the Medical Staff. The Department of Medicine then reviews each application, the accompanying letters of recommendation, and interviews the applicant. Finally, the Medical Staff Executive Committee makes a recommendation to Montefiore's Board of Trustees as to whether privileges should be extended to the applicant.

[7] Montefiore is a voluntary tertiary care teaching hospital, affiliated with the Albert Einstein College of Medicine of Yeshiva University.

[8] Exceptions are made for certain doctors with whom the hospital has a prior history or regarding whom the hospital has established knowledge of competence and quality of care; i.e., recent graduates from resident training and nationally renowned researchers, as well as doctors who have been on the medical staff for years.

[9] Under Montefiore's Medical Staff By-Laws, an applicant has numerous opportunities for hearing and appeal of adverse recommendations. The by-laws provide that an applicant can appeal the Executive Committee's recommendation *prior* to that recommendation being relayed to the Board of Trustees. If appeal is taken, the applicant can request a hearing before the Ad Hoc Hearing Committee of the Executive Committee, where the applicant can submit further documentation, examine and cross-examine witnesses, and be represented by counsel. After that hearing, the Ad Hoc Hearing Committee makes a written recommendation to the Executive Committee, which then issues another recommendation for the Board of Trustees. Within fifteen days of that issuance, the applicant may request another appeal if still dissatisfied with the outcome. The second appeal takes place strictly on the record, as reviewed by either the Board of Trustees or a committee thereof, although the applicant does have the right to request oral argument at this stage. If a committee of the Board of Trustees makes the review, it then issues a recommendation to the Board as a whole. The Board as a whole can accept or reverse the prior recommendation, or send it back to the Executive Committee for further consideration or amend the recommendation itself. In any event, the Board's determination is a final one.

[10] *See, id*.

[11] There were occasions, however, where Montefiore received communications from a Joseph Fleming, Esq., who described himself as Dr. Ezekwo's attorney.

requested a written report marshalling the evidence from both the Executive Committee and Dr. Ezekwo. Dr. Ezekwo refused, however, to provide *her* report.

After two meetings to review the record in February and May of **[**10]** 1994, the Hearing Committee issued a 45-page report and recommendation to the Executive Committee, noting that Dr. Ezekwo had failed the certification examination three times and--while this was not the sole basis for the denial of privileges--it did evince "a lack of fundamental medical knowledge". It also found that Dr. Ezekwo had failed to secure acceptable letters of recommendation; those provided did not address Dr. Ezekwo's teaching ability and working relationships, nor did they include the evaluation of her clinical practice by the Chiefs of Service of those hospitals where Dr. Ezekwo already had privileges. Finally, the Hearing Committee noted that Dr. Ezekwo had refused to confirm in writing that she would satisfy the Medical Department's teaching requirements despite the fact that such written confirmation was required of all applicants. [13] On these bases, the Hearing Committee recommended denial of Dr. Ezekwo's applications. A copy of the Committee's report was provided to Dr. Ezekwo. The Executive Committee's unanimous confirmation of its original denial of Dr. Ezekwo's applications, based on the Hearing Committee's findings, followed on June 12, 1995.

[11]** Again, under Montefiore's Medical Staff By-Laws, Dr. Ezekwo received notice of both the Executive Committee's adverse recommendation and her right to further appellate review. Dr. Ezekwo requested that review, which was provided on August 9, 1995. [14] Dr. Ezekwo was then informed, on August 17, 1995, that the Medical Committee of the Board of Trustees had upheld the denial of privileges. Its recommendation was reported to the full Board of Trustees in October of 1995, and the full Board's final denial was reported to Dr. Ezekwo on October 12, 1995. [15]

[12]** Earlier, in April 1993, Dr. Ezekwo first accused defendant The Bronx Health Plan (BHP) and Montefiore of collusion. [16] She first approached BHP for participation in its **[*276]** network in January 1993, and the exchange of communications that followed quickly led to threats of litigation on Dr. Ezekwo's part. [17] BHP chose not to put Dr. Ezekwo into its application process, stating: (1) it did not need additional opthamologist for efficiency reasons; (2) Dr. Ezekwo was not affiliated with any of the hospitals with which BHP contracted; and (3) of particular relevance to

---

[12] The hearing's record included over 700 transcript pages and 200 exhibits.

[13] At the same time, the Hearing Committee addressed Dr. Ezekwo's claims that Montefiore had acted improperly and in bad faith, basing its denial on racial or gender or religious discrimination, and that Dr. Ezekwo's failure at board certification was somehow orchestrated by hospital personnel in fear of competition from her managed care practice. The Hearing Committee found the claims conclusory and without basis.

[14] Pursuant to the by-laws, this second review was strictly of the record, although Dr. Ezekwo was informed that she could request oral argument and did not do so. *See, supra*, note 10.

[15] Beyond Montefiore's procedures and review regarding Dr. Ezekwo's admitting privileges, the matter has received thorough review as well from the Public Health Council of New York State (the Council) as well as the New York State Division of Human Rights (DHR). In September 1993, Dr. Ezekwo filed a complaint against Montefiore with the Council under Public Health Law § 2801-b. That filing was deemed premature given that the Montefiore's appellate procedures were pending. Dr. Ezekwo filed again, subsequent to Montefiore's final determination, on November 11, 1995. As of the time of argument and briefing, the Council had not issued its final determination. As to the DHR investigation, Dr. Ezekwo's complaint against Montefiore was dismissed with a finding of no probable cause to believe the discrimination alleged had occurred.

[16] Evidently, the BHP offices are in the same building facility as Montefiore Medical Center Clinic. Montefiore was one of the hospitals with which BHP contracted at that time, the others being Bronx-Lebanon Hospital Center and Barnabas Hospital.

[17] On January 18, 1993, Dr. Ezekwo wrote to BHP requesting information on BHP's health plan, "so that [she] could start participating immediately." BHP responded on February 1, 1993, that the Plan had no need at that time for additional opthamologists. Dr. Ezekwo replied on February 15, 1993, accusing BHP of discrimination and "anti fair business" and threatening litigation. Separately, on the same date, Dr. Ezekwo requested an investigation by the New York State Insurance Commissioner. (After making inquiries on April 4, 1993, the Commissioner's office did not pursue the matter. After a further communication from Dr. Ezekwo's counsel on February 25, 1995, BHP responded that is would not consider Dr. Ezekwo's queries and applications in the area of opthamology or internal medicine, and clarified its position as to why.

participation as an internist, BHP did not use seek solo practitioners for participation in its Plan. As BHP explained, because its network is structured such that its "primary care services are presently provided in comprehensive settings such as community health centers, where the entire family can receive a broad array of services under one roof, Dr. Ezekwo could not--as a solo practitioner--"provide the comprehensive services that [BHP's] members demand." Later, in response to Dr. Ezekwo's accusation of collusion, BHP responded as before but further emphasized that (1) even if Dr. Ezekwo were affiliated with one of its **[**13]** contracted hospitals, it had the right to not retain her services, and (2) BHP is an independent HMO, "not an operational unit" of Montefiore. At no point in its communications with the Dr. Ezekwo did BHP mention board certification, although it is clearly a requirement under its participation criteria.

[14]** Finally, at some point during this chronology, Dr. Ezekwo apparently approached defendant Empire for participation within its HMO or PPO structure, but was evidently rejected. [18]

In the first instance, I address Montefiore's and BHP's claims to immunity from money damages under Health Care Quality Immunity Act of 1986, *42 U.S.C. §§ 11101-11152* (the Act). ***HN2***[] The Act provides for such immunity where a peer review process meets certain criteria and is undertaken to achieve certain statutorily permissible ends. [19] The Act establishes a rebuttable presumption of the peer review's propriety that must be overcome by a preponderance of the evidence. [20] **[**17]** As such, although addressed on summary judgement, "[Dr. Ezekwo bore]

---

[18] There are in the record no facts as to what transpired between Dr. Ezekwo and Empire.

[19] ***HN3***[] In pertinent part, *Section 11111* provides:

(a) In general

(1) Limitations on damages for professional review actions

If a professional review action (as defined in *section 11151(9)*) of this title) of a professional review body meets all the standards specified in *section 11112(a)* of this title . . .

(A) the professional review body,

(B) any person acting as a member or staff to the body,

(C) any person under a contract or other formal agreement with the body, and

(D) any person who participates with or assists the body with respect to the action, shall not be liable in damages under any law of the United States or any State (or political subdivision thereof) with respect to the action . . . .

42 U.S.C. § 11111.

[20] ***HN4***[] *Section 11112(a)* provides:

(a) In general

For purposes of the protection set forth in *section 11111(a)* of this title, a professional review action must be taken--

(1) in the reasonable belief that the action was in furtherance of quality health care,

(2) after a reasonable effort to obtain the facts of the matter,

(3) after adequate notice and hearing procedures are afforded to the physician involved or after such other procedures as are fair to the physician under the circumstances, and

(4) in the reasonable belief that the action as warranted by the facts known after such reasonable effort to obtain facts and after meeting the requirement of paragraph (3).

A professional review action shall be presumed to have met the preceding standards necessary for the protection set out in *section 11111(a)* of this title unless the presumption is rebutted by a preponderance of the evidence.

42 U.S.C. § 11112(a).

the burden of proving that the peer review process was not reasonable." *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 630 (3rd* ***[*277]*** *Cir. 1996)*. At issue is whether Dr. Ezekwo submitted sufficient evidence to allow **[**15]** a jury-finding that, objectively, a health-care employer had unreasonably believed that it had met the standards set by the Act. *See Bryan v. James E. Holmes Reg'l Med. Ctr., 33 F.3d 1318, 1333 (11th Cir. 1994)*; *Austin v. McNamara, 979 F.2d 728, 734-35 (9th Cir. 1992)*. There is not enough on the record before me to determine the contours of BHP's peer review procedures, or even if it was applied in this instance. Therefore, even with the statutory presumption of propriety where a peer review process is used, BHP's claim to immunity cannot be upheld. *See, e.g., Matthews, 87 F.3d at 634* (letter communication between individual doctor and hospital did not equate with a "professional review activity" such that the Act's immunity was triggered). But, Montefiore, on the other hand, has clearly established that a full and fair peer review process was used in this case, [21] and that it should properly receive immunity under the Act as to Dr. Ezekwo's monetary claims. Although the Act does not extend to decisions based solely on "the physician's association, or lack of association, with a professional society or association", it is clear on the record that Montefiore's rejection **[**16]** of Dr. Ezekwo is based on considerations relating to competence, and not just Dr. Ezekwo's non-certification. [22] This leaves, however, her ongoing claims for injunctive relief against Montefiore, the monetary claims against the Board, and both types of claims as pursued against Empire and BHP.

As stated at the outset, all defendants have sought dismissal for failure to state a claim, with the Board, Montefiore and BHP seeking summary judgment. *See Fed. R. Civ. P. 12(b)(6)*, *56(c)*.

Empire is the only defendant **[**18]** that moved to dismiss with no motion for summary judgment. Accordingly, I first address Empire's motion to dismiss. At the threshold, I observe that ***HN6***[] "even under the liberal Federal Rules of Civil Procedure, there is a limit to how much a court may be called upon to divine in assessing the sufficiency of the complaint before it, particularly when the plaintiff is represented by counsel." *Heart Disease Research Found. v. General Motors Corp., 463 F.2d 98, 100 (2d Cir. 1972)*. Conclusory allegations of antitrust violations are simply not enough. *See Int'l Audiotext Network, Inc. v. American Tel. and Tel. Co., 893 F. Supp. 1207, 1211 (S.D.N.Y. 1994)*, *aff'd 62 F.3d 69 (2d Cir. 1995)*. Dr. Ezekwo needed to "'adequately . . . define the relevant product market, . . . allege antitrust injury, [and] . . . allege conduct in violation of antitrust laws.'" *Id.* (citation omitted). Thus, viewing Dr. Ezekwo's pleading as favorably as possible, Empire's motion is granted, as not a single fact is alleged to support the claim that Empire properly operates in Dr. Ezekwo's market, and allegations of conspiracy are limited to the statutory conclusion. [23]

---

[21] ***HN5***[] A "professional review action", as the Act defines it, is:

> an action or recommendation of a professional review body which is taken or made in the conduct of professional review activity . . . which affects (or may affect)(adversely the clinical privileges, or membership in a professional society, of a physician. Such term . . . also includes professional review activities relating to a professional review action.

42 U.S.C. § 11151(9). A "professional review activity" means:

> an activity of a health care entity with respect to an individual physician--
>
> (A) to determine whether the physician may have clinical privileges with respect to, or membership in, the entity,
>
> (B) to determine the scope or conditions of privileges or membership, or
>
> (C) to change or modify such privileges or membership.

42 U.S.C. § 11151(10).

[22] *See 42 U.S.C. 11151(9)(A)*.

[23] Because Dr. Ezekwo has already amended her complaint, leave to replead will not be granted. *See Berger v. Lowden, 1997 U.S. Dist. LEXIS 4516, 1997 WL 170823* (S.D.N.Y.) at *4.

[19]** As to the remaining defense motions, I need to and do reach only those for summary judgment, which are granted. The Second Circuit has recognized that, ***HN7***[] while summary disposition is difficult as to antitrust claims, it is not improper. *Capital Imaging Assocs. v. Mohawk Valley Med. Assoc., Inc., 996 F.2d 537, 541 (2d Cir. 1993)*. ***HN8***[] Although the defendants have the initial burden to show that no genuine issue of material fact exists as to Dr. Ezekwo's claims, once met, Dr. Ezekwo is **[*278]** required to designate "specific facts showing that there is a genuine issue for trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Fed. R. Civ. P. 56(e)*. As such, she needed to point to "genuine issue[s] of material fact that (1) defendants violated the antitrust laws and (2) the violation caused her actual injury." *Maric v. St. Agnes Hosp. Corp., 65 F.3d 310, 313 (2d Cir. 1995)*. More than "a metaphysical-doubt" had to be shown, and Dr. Ezekwo needed to "set forth facts [] tending to preclude inference[s] of permissible conduct". *Capital Imaging Assocs., 996 F.2d at 542*. Summary judgment is granted not only because the defendants meet their initial **[**20]** burden, but because Dr. Ezekwo has utterly failed to counter with any specific facts undercutting the independence and legitimacy of the defendants' actions. [24]

First, ***HN10***[] in order to bring a private action under the Sherman Act, an antitrust injury must be proven. The Sherman Act protects competition, not competitors. *Balaklaw v. Lovell, 14 F.3d 793, 797 (2d Cir. 1994)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, **[**21]** Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977))*. Thus, vital to any antitrust claim is the allegation that the defendants' conspiracy or illegal contract has caused injury to competition. *See, e.g., Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 734 (9th Cir. 1987)*. "'Plaintiffs must prove antitrust injury. . . [that] reflect[s] the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Balaklaw, 14 F.3d at 797* (quoting *Brunswick Corp., 429 U.S. 477 at 489)*. In turn, in order to find market injury, the impact within Dr. Ezekwo's market must be assessed, requiring some factual submission as to that market's structure and the services offered therein. *Balaklaw, 14 F.3d at 800*. While Dr. Ezekwo has submitted North Central Bronx--however that is defined--as the geographical market, she submits no other evidence regarding its contours. She makes only the bare allegation that her clients have less market choice due to her lack of association with defendants, providing no substantial evidence that shows the number of internists offering services in that area or that the options available to the public **[**22]** have been limited by the defendants' actions. As such, no alleged facts suggest market injury, and accordingly antitrust standing has not been established.

Second, even if Dr. Ezekwo could show antitrust injury, her claim under *Section 1* would fail on the merits. [25] She does not allege facts supporting an inference that ***HN11***[] "(1) a contract, combination or conspiracy; (2) in restraint of trade; (3) affecting interstate commerce" existed between the defendants. *Maric, 65 F.3d at 313*. Indeed, only if the collusion necessary for the first element was evident could I consider whether issues of fact exist as to whether an antitrust violation, per se or otherwise, has been committed. [26]

---

[24] ***HN9***[] Where "'conduct is as consistent with permissible conduct as with [an] illegal conspiracy" it "does not, standing alone, support an inference of antitrust conspiracy.'" *Apex Oil Co. v. DiMauro, 822 F.2d 246, 252 (2d Cir. 1987)* (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*. Evidence must be presented that "'tends to exclude the possibility that [the defendants] were acting independently.'" *Id*. (quoting *Monsanto Co. v. Spray-Rite Servs. Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984))*.

[25] *Section 1* of the Sherman Act provides that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . is declared to be illegal." *15 U.S.C. § 1*.

[26] The fact that Dr. Ezekwo has pleaded a "per se" boycott violation does not change the outcome, because a per se allegation still requires a showing that antitrust injury has occurred, *Balaklaw, 14 F.3d at 800*.

[23]** Dr. Ezekwo has alleged no factual support for her claim of conspiracy, asserting only a theoretical construct. [27] ***HN12***[] The inference of "opportunity to conspire" is insufficient; a triable issue must exist as to whether an illegal contract between or "concerted action" by the defendants exists. *See Maric, 65 F.3d at 313* **[*279]** (citing *Capital Imaging Assocs., 996 F.2d at 545*). *See also Fort Wayne Telsat v. Entertainment and Sports Programming Network, 753 F. Supp. 109, 115 (S.D.N.Y. 1990)* (factual basis for allegation of conspiracy under Sherman Act, *Section 1*, is required). Moreover, Dr. Ezekwo was required to negate any reasonable inference that the defendants acted independently and/or properly by showing they had made "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)* (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (CA3 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*); *Capital Imaging Assocs., 996 F.2d at 545*. The ordinary prospect of competition from any defendant is not **[**24]** enough on which to base her claim, *Maric, 65 F.3d at 314*, and any consequent commercial injury to her as an individual is irrelevant. *See, e.g., Balaklaw, 14 F.3d at 797*; *Rutman Wine Co., 829 F.2d at 735*. Thus, the essence of Dr. Ezekwo's complaint is that the Board, alone, developed arbitrary certification criteria that set her up for failure, and the other three defendants then relied thereon to her commercial detriment. There is only the unsubstantiated claim that defendants acted within the market for "internal medicine", and no showing that defendants agreed to or colluded in conduct injurious to that market. [28] Accordingly, the factual allegations not supporting a showing of concerted action, Dr. Ezekwo's *Section 1* claim is dismissed on summary judgment as to defendants so moving.

[25]** Dr. Ezekwo has also asserted a claim under Sherman Act, *Section 2*, *15 U.S.C. § 2*, alleging that the defendants have monopolized, or attempted to monopolize, the market for internal medicine. Dr. Ezekwo's *Section 2* claim falls on said defendants' motions for summary judgment for much the same reasons as do her *Section 1* claims.

First, ***HN14***[] the Act's *Section 2* requires injury to the market, as opposed to individual impact, which--again--is not established on this record. *See, e.g., Volmar Distrib., Inc. v. New York Post Co., 825 F. Supp. 1153, 1159-60 (S.D.N.Y. 1993)*. Additionally, at trial Dr. Ezekwo would have to prove that the defendants both "possess[] monopoly power in the relevant market, and . . . [that they have willfully acquired or maintained] that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. *See also, Irvin Indus. v. Goodyear Aerospace Corp., 974 F.2d 241, 244 (2d Cir. 1992)* (requiring monopoly power in the relevant market, anticompetitive conduct by the defendant, **[**26]** and injury in fact caused by that conduct). There are simply no facts alleged supporting this. [29] Dr. Ezekwo has not even addressed how exactly the Board operates in the market, and has alleged no facts supporting the conclusion that Montefiore and BHP have or are seeking monopoly power, much less that such power has been wrongfully acquired or maintained, or caused

---

[27] ***HN13***[] "Legal presumptions that rest on formalistic distinctions rather than actual market realities are generally disfavored in ***antitrust law***." *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 466-67, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

[28] While Dr. Ezekwo stresses the fact that BHP is located in the same building as a Montefiore clinic, that proximity does not support an inference of conspiracy. Likewise, Dr. Ezekwo asserts the fact that many individuals on Montefiore's reviewing committees are board certified as indicative of conspiracy. But, without a more specific factual basis, the assertion represents only "an opportunity to conspire". *See Maric, 65 F.3d at 313* (citation omitted). Finally, Dr. Ezekwo argues that further discovery would allow her to substantiate her claims. *See Fed. R. Civ. P. 56(f)*. But, in light of the extensive review her case has received on administrative levels, greater discovery would be abusive without a concrete showing of market harm. *See, e.g., Rutman Wine Co., 829 F.2d at 738*; *Car Carriers v. Ford Motor Co., 745 F.2d 1101, 1106-107 (7th Cir. 1984)*, *cert. denied*, ***470 U.S. 1054, 84 L. Ed. 2d 821, 105 S. Ct. 1758 (1985)***.

[29] ***HN15***[] An "attempted monopolization" claim would require Dr. Ezekwo to prove "(1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize, and (3) a dangerous probability of achieving monopoly power." *Int'l Audiotext Network, Inc., 893 F. Supp. at 1212* (citations omitted). Again, no facts asserted give rise to a reasonable inference that could meet any of these elements.

subsequent market injury. Dr. Ezekwo's *Section 2* claim under the Sherman Act is likewise dismissed on summary judgment.

[*280] In sum, all of defendants' motions are granted as specified above, except for BHP's claims for immunity, which **[**27]** however is hereby rendered moot.

Submit orders on notice.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Dismissal > Involuntary Dismissals > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under Fed. R. Civ. P. 12(b)(6) challenges the sufficiency of the complaint for failure to state a claim upon which relief may be granted.

Civil Procedure > Appeals > Standards of Review > De Novo Review

* This opinion has been circulated among all judges of this court pursuant to Circuit Rule 40(e). No judge favored a rehearing en banc.

Civil Procedure > Dismissal > Involuntary Dismissals > General Overview

HN2[] **Standards of Review, De Novo Review**

Whether a district court correctly dismissed a complaint is a question of law that an appellate court reviews de novo.

Civil Procedure > Dismissal > Involuntary Dismissals > General Overview

Evidence > Inferences & Presumptions > General Overview

Civil Procedure > Appeals > Standards of Review

HN3[] **Dismissal, Involuntary Dismissals**

In reviewing a motion to dismiss, an appellate court reviews all facts alleged in the complaint and any inferences reasonably drawn therefrom in the light most favorable to the plaintiff. Dismissal is warranted only if the plaintiff can prove no set of facts in support of her claims that would entitle her to relief.

Governments > Legislation > Effect & Operation > General Overview

Governments > Legislation > Interpretation

HN4[] **Legislation, Effect & Operation**

The starting point in a case involving the meaning of a statute is the language of the statute itself.

Constitutional Law > Supremacy Clause > General Overview

Governments > State & Territorial Governments > Relations With Governments

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN5[] **Constitutional Law, Supremacy Clause**

See *15 U.S.C.S. § 1012(b)*.

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Constitutional Law > Supremacy Clause > General Overview

Insurance Law > ... > Savings Clause > Business of Insurance Test > General Overview

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Governments > State & Territorial Governments > Relations With Governments

Insurance Law > Industry Practices > General Overview

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN6[] **Federal Regulations, Antitrust Regulations**

The first clause of the McCarran-Ferguson Act, *15 U.S.C.S. § 1012(b)*, establishes that state law enacted for the purpose of regulating the business of insurance preempts federal law of general applicability to the extent the federal law invalidates, impairs, or supersedes the state law. It also creates an exception to this preemption. If the federal law specifically relates to the business of insurance, the federal law may be applied even if it would invalidate, impair, or supersede a state law.

Constitutional Law > Supremacy Clause > General Overview

Contracts Law > Contract Conditions & Provisions > General Overview

Insurance Law > Industry Practices > General Overview

Banking Law > Consumer Protection > Truth in Lending > General Overview

Governments > Legislation > Interpretation

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN7[] **Constitutional Law, Supremacy Clause**

The test to determine whether the first clause of the McCarran-Ferguson Act, *15 U.S.C.S. § 1012(b)*, precludes application of a federal statute when state law has enacted a law regulating such agreements requires three inquiries. First, does the federal statute at issue specifically relate to the business of insurance? Second, was the state statute enacted for the purpose of regulating the business of insurance? Third, would application of the federal statute invalidate, impair or supersede the state law?

Governments > Legislation > Interpretation

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN8[] **Legislation, Interpretation**

The three part inquiry is the appropriate test for questions involving the first clause of *15 U.S.C.S. § 1012(b)* of the McCarran-Ferguson Act although many courts utilize a four part test.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Governments > Legislation > Interpretation

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Governments > Courts > Judicial Precedent

Insurance Law > Industry Practices > General Overview

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN9[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

To understand fully the impact of analyzing the activity regulated instead of the purpose of the regulation itself, a court must examine how other courts have determined whether an activity is part of "the business of insurance."

Constitutional Law > Supremacy Clause > General Overview

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN10[] **Constitutional Law, Supremacy Clause**

See *215 Ill. Comp. Stat. 5/513a9*.

Governments > Legislation > Interpretation

Insurance Law > Industry Practices > Federal Regulations > General Overview

Insurance Law > Industry Practices > General Overview

HN11[] **Legislation, Interpretation**

A statute is enacted for the purpose of regulating the business of insurance if it possesses the end, intention, or aim of adjusting, managing, or controlling the relationship between the insurance company and the policyholder, directly or indirectly.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Creditors & Debtors

Constitutional Law > Supremacy Clause > General Overview

Insurance Law > Contract Formation

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN12[] **Standards of Performance, Creditors & Debtors**

A financing agreement is a contractual arrangement separate from an insurance policy, and an insurance company acts not as an insurance company but as a creditor under the financing agreement contract. Financing activity is ancillary to the insurance relationship.

Constitutional Law > Supremacy Clause > General Overview

Governments > Legislation > Interpretation

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN13[] **Constitutional Law, Supremacy Clause**

A statute enacted to regulate disclosure and delivery requirements in premium financing agreements is not the kind of statute rightfully protected from federal preemption under the McCarran-Ferguson Act, *15 U.S.C.S. § 1012(b)*.

Counsel: For KIMBERLY AUTRY, Plaintiff - Appellant: Daniel A. Edelman, EDELMAN & COMBS, Chicago, IL USA.

For NORTHWEST PREMIUM SERVICES, INCORPORATED, NORTHWEST INSURANCE NETWORK, INCORPORATED, MARTIN JOSEPH, Defendants - Appellees: Cary S. Fleischer, CHUHAK & TECSON, Chicago, IL USA.

Judges: Before Bauer, Coffey, and Kanne, Circuit Judges.

Opinion by: KANNE

Opinion

[*1038] Kanne, *Circuit Judge*. In April 1997, Kimberly Autry filed a class action complaint in the United States District Court for the Northern District of Illinois. Count I of her complaint alleged that the disclosures contained in her Premium Financing Agreement ("Agreement") violated the Truth In Lending Act ("TILA"), *15 U.S.C. § 1601 et seq.* Autry also alleged that the disclosures violated the Illinois Consumer Fraud and Deceptive Business Practices Act ("Illinois CFA"), *815 Ill. Comp. Stat. 505/1 et seq*. The district court granted the defendants' motion to dismiss Count I of the complaint on the ground that the McCarran-Ferguson Act ("McCarran Act"), *15 U.S.C. § 1012(b)*, barred application of TILA to the Agreement. The district court then declined to exercise its supplemental jurisdiction authority over Autry's state law claims. Because we find that the McCarran Act does not bar application **[**2]** of TILA to the Agreement, we reverse the dismissal of Autry's complaint and remand for further proceedings consistent with this opinion.

I. History

In June 1996, Autry financed the purchase of an insurance policy on her automobile by signing a Premium Finance Agreement and Disclosure Statement. Autry claims that the disclosures in the Agreement misstate the amount financed, the finance charge, and the total amount of payments in violation of TILA and the Illinois CFA. Autry sued both Northwest Premium Services, Inc. and Northwest Insurance Network, Inc. because she contends that the Agreement refers to both parties and the identity of the party that actually extended the credit is unclear.

The defendants filed a motion to dismiss in June 1997, asking that the district court dismiss the TILA count as barred by the McCarran Act. The district court granted defendants' motion, finding that under our precedent in *Lowe v. Aarco-American, Inc.,* ***[*1039]*** *536 F.2d 1160, 1162 (7th Cir. 1976)*, [1] the financing of insurance premiums was part of the "business of insurance" under the McCarran Act, that application of TILA would impede Illinois law, and therefore premium financing activities were **[**3]** beyond the reach of TILA and instead governed solely by state law. The district court dismissed Autry's TILA claim with prejudice and dismissed her state law claims without prejudice.

On appeal, Autry asks us to reevaluate whether premium financing is part of the "business of insurance." Autry argues that several Supreme Court cases decided after *Lowe* suggest that *Lowe* was incorrectly decided and we should now overrule it. In addition, Autry notes the circuit split on the issue between our Circuit and the Fifth as a reason to reconsider *Lowe*. In the alternative, Autry argues that even if premium financing is the "business of

[1] *Lowe* was overturned on other grounds by *NAACP v. American Family Mut. Ins. Co., 978 F.2d 287, 297 (7th Cir. 1992)*. The district court determined that the *American Family* decision left Lowe's holding that premium financing involved the "business of insurance" untouched.

insurance," TILA does not impair, invalidate, or supersede the Illinois law on premium financing agreements, and therefore **[**4]** TILA may still be applied.

The defendants respond that *Lowe* was correctly decided and that the intervening Supreme Court cases only serve to reinforce Lowe. They urge us to renew our holding in *Lowe* that premium financing constitutes the "business of insurance." Defendants also argue that application of TILA would impede the state law in the area, and thus TILA may not be applied. They ask that we find that the McCarran Act bars Autry's TILA claim. [2]

II. Analysis

A. *Standard of Review*

HN1[] A motion to dismiss under *Rule 12(b)(6)* challenges the sufficiency of the complaint for failure to state a claim upon which relief may be granted. *See* *Fed. R. Civ. P. 12(b)(6)*. ***HN2***[] Whether a district court correctly dismissed a complaint is a question of law that we review *de novo. See Moss v. Healthcare Compare* *Corp., 75 F.3d 276, 279 (7th Cir. 1996)*. ***HN3***[] In reviewing a motion to dismiss, we review all **[**5]** facts alleged in the complaint and any inferences reasonably drawn therefrom in the light most favorable to the plaintiff. *See* *Caldwell v. City of Elwood, 959 F.2d 670, 671 (7th Cir. 1992)*. Dismissal is warranted only if the plaintiff can prove no set of facts in support of her claims that would entitle her to relief. *See* *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*.

B. The McCarran-Ferguson Act

1. History

Congress enacted the McCarran Act in response to the Supreme Court's decision in *United States v. South-Eastern Underwriters Ass'n, 322 U.S. 533, 88 L. Ed. 1440, 64 S. Ct. 1162 (1944)*. *See* *United States Dept. of the Treasury v. Fabe, 508 U.S. 491, 499, 124 L. Ed. 2d 449, 113 S. Ct. 2202 (1993)*. Prior to *South-Eastern Underwriters*, courts had determined that issuing an insurance policy was not a transaction in commerce and therefore not subject to federal regulation. *See id*. (citing *Paul v. Virginia, 75 U.S. (8 Wall.) 168, 183, 19 L. Ed. 357 (1869))*. Thus "'States enjoyed a virtually exclusive domain over the insurance industry.'" *Id*. (quoting *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 539, 57 L. Ed. 2d 932, 98 S. Ct. 2923 (1978))*.

This situation was soon to change. In light of "the emergence of an interconnected and interdependent national economy," *id.*, courts expanded their **[**6]** conception of interstate commerce. This expanded conception led the Supreme Court to hold that an insurance company that conducted business across state lines was engaged in interstate commerce and thus subject to federal antitrust laws. *See* *South-Eastern Underwriters, 322 U.S. at 533*. This development caused states to be concerned about their power to tax and regulate the insurance industry. See *Fabe, 508 U.S. at 499*. Specifically, *South-Eastern* **[*1040]** *Underwriters* "threatened the continued supremacy of the States," *SEC v. National Sec., Inc., 393 U.S. 453, 459, 89 S. Ct. 564, 21 L. Ed. 2d 668 (1969)*, "in regulating the dealings between insurers and their policy holders," *id.* Congress responded by passing the McCarran Act.

Congress expressed the purpose of the McCarran Act in its first section:

> Congress hereby declares that the continued regulation and taxation by the several States of the business of insurance is in the public interest, and that silence on the part of the Congress shall not be construed to impose any barrier to the regulation or taxation of such business by the several States.

15 U.S.C. § 1011. As this section demonstrates, Congress intended the McCarran Act to allow the states to regulate the business **[**7]** of insurance "free from inadvertent preemption by federal statutes of general applicability." *Merchants Home Delivery Serv., Inc. v. Frank B. Hall & Co., 50 F.3d 1486, 1488-89 (9th Cir. 1995)*. To this end, Congress reversed the standard rules for preemption, creating a "clear-statement rule . . . that state

---

[2] This description reflects how the parties have framed the issue for review. We conceptualize the inquiry differently. See infra.

laws enacted 'for the purpose of regulating the business of insurance' do not yield to conflicting federal statutes unless a federal statute specifically requires otherwise." *Fabe, 508 U.S. at 507*.

2. The Language of the McCarran Act

HN4[] "'The starting point in a case involving construction of the McCarran-Ferguson Act, like the starting point in any case involving the meaning of a statute, is the language of the statute itself.'" *Fabe, 508 U.S. at 500* (quoting *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 210, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979))*. ***HN5***[] The specific statutory provision at issue in this case is § 2(b) of the Act, which provides as follows:

> No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates **[**8]** to the business of insurance: *Provided*, That after June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, as amended, shall be applicable to the business of insurance to the extent that such business is not regulated by State Law.

15 U.S.C. § 1012(b).

Section 2(b) contains two clauses, separated by the colon. The first clause may be broken down into two phrases: ***HN6***[] The first establishes that state law "enacted . . . for the purpose of regulating the business of insurance" preempts federal law of general applicability to the extent the federal law invalidates, impairs, or supersedes the state law. The second phrase creates an exception to this preemption--if the federal law specifically relates to the business of insurance, the federal law may be applied even if it would invalidate, impair, or supersede a state law. The second clause, known as the "antitrust exemption," provides that federal ***antitrust law*** will control the business of insurance unless that business is regulated by state law. The Supreme Court recently **[**9]** elaborated on the purposes behind the clauses:

> The first clause of § 2(b) was intended to further Congress' primary objective of granting the States broad regulatory authority over the business of insurance. The second clause accomplishes Congress' secondary goal, which was to carve out only a narrow exemption for "the business of insurance" from the federal antitrust laws.

Fabe, 508 U.S. at 505.

C. *The Appropriate Inquiry for Cases Involving the First Clause of the McCarran Act*

This case turns on the application of the first clause of § 2(b). ***HN7***[] The question before us is whether the first clause of the McCarran Act precludes application of TILA to premium financing agreements when Illinois has enacted a law regulating such agreements. This question requires three inquiries: first, does the federal statute at issue "specifically relate to the business of insurance;" second, was the state statute "enacted **[*1041]** . . . for the purpose of regulating the business of insurance"; and third, would application of the federal statute "invalidate, impair or supersede" the state law. *See id. at 501*; *see also Ambrose v. Blue Cross & Blue Shield, 891 F. Supp. 1153, 1158 (E.D. Va. 1995)*, *aff'd*, *95* ***[**10]*** *F.3d 41 (4th Cir. 1996)*.

HN8[] While we find this three part inquiry is the appropriate test for questions involving the first clause of § 2(b), we note that many courts utilize a four part test. *See, e.g., Sabo v. Metropolitan Life Ins. Co., 137 F.3d 185, 1998 WL 70610 (3d Cir. 1998)*; *Merchants Home Delivery Serv., 50 F.3d at 1489*. The four part test runs as follows:

> The McCarran-Ferguson Act precludes the application of a federal statute if: (1) the statute does not "specifically relate" to the business of insurance, (2) the acts challenged under the statute constitute the business of insurance, (3) the state has enacted a law or laws regulating the challenged acts, and (4) the state law would be superseded, impaired or invalidated by the application of the federal statute.

Merchants Home Delivery Serv., 50 F.3d at 1489 (citing Cochran v. Paco, Inc., 606 F.2d 460, 464 (5th Cir. 1979)). The first and last parts of this test are identical to the first and last parts of the three part test. The difference lies in parts two and three. While the three part test asks "was the state statute enacted for the purpose of regulating the business of insurance," the four part test breaks **[**11]** this down into two questions: (a) is the action at issue part of the business of insurance, and (b) has the state enacted a law to regulate this action?

We decline to use the four part test for two reasons: First, the Court in *Fabe*, while not explicitly setting forth a three part test, stated:

> The parties agree that application of the federal priority statute would "invalidate, impair, or supersede" the Ohio priority scheme and that the federal priority statute does not "specifically relate to the business of insurance." All that is left for us to determine, therefore, is whether the Ohio priority statute is a law enacted "for the purpose of regulating the business of insurance."

Fabe, 508 U.S. at 501. This language leads us to believe that the Supreme Court conceptualized the inquiry as involving those three questions. Second, the four part test misplaces the emphasis of the inquiry. The four part test requires the court to examine the activity at issue to determine whether the *activity being regulated* is part of the "business of insurance." However, the statutory language counsels us to examine the *purpose for which the statute was enacted* to determine whether the statute is one **[**12]** "enacted . . . for the purpose of regulating the business of insurance." While this distinction may seem somewhat semantic, the effect is far from inconsequential.

HN9[] To understand fully the impact of analyzing the activity regulated instead of the purpose of the regulation itself, we must examine how courts have been determining whether the activity is part of "the business of insurance." The Supreme Court has twice defined the term "business of insurance" in the context of the second clause, or "antitrust exemption," of the McCarran Act. *See* Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 73 L. Ed. 2d 647, 102 S. Ct. 3002 (1982); Royal Drug, 440 U.S. at 210. In *Pireno*, the Court stated the test as follows:

> Three criteria [are] relevant in determining whether a particular practice is part of the "business of insurance" exempted from the antitrust laws by § 2(b): *first*, whether the practice has the effect of transferring or spreading a policyholder's risk; *second*, whether the practice is an integral part of the policy relationship between the insurer and the insured; and third, whether the practice is limited to entities within the insurance industry.

Pireno, 458 U.S. at 129. Courts using the four part test borrow **[**13]** this definition and apply it to the "activity" under scrutiny to determine whether the activity is part of "the business of insurance." *See, e.g., Sabo*, 1998 WL 70610 at *6; Merchants Home Delivery Serv., 50 F.3d at 1490.

The problem with this approach is that it casts too small a net to capture all of the statutes that were "enacted . . . for the purpose of regulating the business of insurance." **[*1042]** There will be cases where the regulated activity does not constitute the "business of insurance" as that term is defined in *Pireno*, yet the statute that regulates the activity may have been enacted "for the purpose of regulating the business of insurance." As the *Fabe* Court stated, the "broad category of laws enacted 'for the purpose of regulating the business of insurance' . . . necessarily encompasses more than just the 'business of insurance.'" Fabe, 508 U.S. at 505.

Take, for example, the statute at issue in *Fabe*. The state statute at issue regulated creditor priority in a bankruptcy dissolution and gave policyholders a higher preference than they received under the federal statute. If we asked only whether the activity in question, bankruptcy dissolution, was the "business of insurance" **[**14]** as defined in *Pireno*, the answer would be "no." If the activity in question is not the "business of insurance," it would follow from the four part test that the statute enacted to regulate it cannot be a statute "enacted . . . for the purpose of regulating the business of insurance." Yet, as the Supreme Court noted, the preferencing of policyholders "serves to ensure that, if possible, policyholders ultimately will receive payment on their claims." Id. at 506. "Because the [state] statute is 'aimed at protecting or regulating' the performance of an insurance contract . . . it follows that it is a law 'enacted for the purpose of regulating the business of insurance' within the meaning of the first clause of § 2(b)." Id. at 505 (citation omitted). In sum, courts applying the four part test may have concluded that the McCarran Act did not preclude application of the federal statute, while the Supreme Court, applying what we believe to be a three part test, reached the opposite conclusion.

The Supreme Court did not simply look to the activity being regulated to determine whether it qualified as the "business of insurance." Instead, it dissected the statute and looked to an ultimate **[**15]** effect of the statute: increased probability of enforcement of the insurance contract. *Id. at 502-05*. Thus, a statute that regulates bankruptcy proceedings may still be a statute "enacted . . . for the purpose of regulating the business of insurance" even though bankruptcy proceedings themselves are not the "business of insurance." The Supreme Court's approach reinforces our belief that the four part test misplaces the emphasis by examining the activity regulated by the statute instead of the purpose of the statute.

We conclude that the appropriate test to employ is the three part test. *Accord* Ambrose, 891 F. Supp. at 1161 & n.5. The three part test requires the following three inquiries: (1) Does the federal statute at issue "specifically relate to the business of insurance"? If so, the standard preemption rules apply and the federal statute is applied. If the federal statute does not "specifically relate to the business of insurance," a court must ask (2) whether the state statute was "enacted . . . for the purpose of regulating the business of insurance." If the state law was not enacted for this purpose, then the court's inquiry ends. If, however, the state statute was so enacted, **[**16]** a court must proceed to determine (3) whether application of the federal statute would "invalidate, impair or supersede" the state law. If the federal statute would have one of these effects, then it may not be applied in the face of the state law. On the other hand, if the federal statute would not "invalidate, impair, or supersede" state law, then the federal statute may be applied. [3]

[17]** **[*1043]** Neither party in this action suggests that TILA specifically relates to the business of insurance. We therefore proceed to whether the Illinois statute was "enacted . . . for the purpose of regulating the business of insurance." If it was so enacted, we proceed to the third inquiry. If, however, the state statute was not "enacted . . . for the purpose of regulating the business of insurance," then the state statute is outside of the McCarran Act's protective umbrella and our inquiry ends.

D. *Determining Whether 215 Ill. Comp. Stat. 5/513a9 Is a Statute Enacted for the Purpose of Regulating the Business of Insurance*

Section 513a9 of the Illinois Compiled Statutes provides as follows:

> § 513a9. ***HN10***[] Premium finance agreement.
> (a) A premium finance agreement must be dated and signed by or on behalf of the named insured, and the printed portion shall be in at least 8-point type. The following items must be set forth on the first page of the accepted finance agreement:
> (1) the total amount of the premiums;
> (2) the amount of the down payment;
> (3) the principal balance (the difference between items (1) and (2));
>
> (4) the amount of the finance charges expressed in dollars and as an annual **[**18]** percentage rate;
> (5) the balance payable by the insured (sum of items (3) and (4));
> (6) the number of installments, the due dates thereof, and the amount of each installment expressed in dollars; and
> (7) the policy numbers or binder numbers.
> (b) The premium finance company is required to furnish full and complete disclosure of the terms and conditions of the premium finance agreement including, but not limited to, the specific insurance coverages

[3] We recognize that our formulation today differs from the one used in *American Deposit Corp. v. Schacht, 84 F.3d 834, 838 (7th Cir. 1996)*, *cert. denied*, *__ U.S. __, 136 L. Ed. 2d 123, 117 S. Ct. 185 (1996)*. In *Schacht* we first addressed whether the state statute was "enacted . . . for the purpose of regulating the business of insurance." After answering that question in the affirmative, we asked whether the particular activity at issue in the case was part of the "business of insurance." No doubt we took this second step because *Fabe* counsels that a statute "need not be treated as a package which stands or falls in its entirety," *Fabe, 508 U.S. at 509 n.8*, and instead that a state statute should only displace federal law "to the extent that it regulates policyholders," *id. at 508*. Because we find that the Illinois statute regulating premium financing agreements is not one "enacted . . . for the purpose of regulating the business of insurance," we need go no further.

> financed to the named insured no later than the date that the first premium payment notice is sent to the insured.
> (c) As to policies written primarily for personal, family, or household use, the premium finance company must:
> (1) deliver or mail the premium check or checks in the amount of the principal balance directly to the insurer or insurers unless the insurer or insurers have given written authority to the premium finance company to deliver the checks to the producer;
> (2) issue the premium check or checks payable to the insurer, insurers, or, if the insurer gives written authority to the premium finance company, to the producer; and
>
> (3) properly identify the premium check or checks by policy number or binder number when the premium is **[**19]** paid to the insurer or insurers.
> (d) As to all other policies the premium finance company may:
> (1) deliver or mail the premium check or checks in the amount of the principal balance directly to the producer; and
> (2) issue the premium check or checks payable to the producer.

215 Ill. Comp. Stat. 5/513a9. [4]

[20]** Although we have settled the question of whether we should use a four part test and look at the activity regulated or employ a three part test and look to the purpose of the statute itself, we must still resolve how to determine whether the statute at issue is one "enacted . . . for the purpose of regulating the business of insurance." The Court has addressed this question twice in its history, the first time in *National Securities* and the second time in *Fabe*.

[*1044] The Supreme Court in *National Securities* concluded that a law "enacted . . . for the purpose of regulating the business of insurance" is one "aimed at protecting or regulating [the] relationship [between insurer and insured], directly or indirectly." *National Sec., 393 U.S. at 460*. The Court elaborated:

> Congress was concerned with the type of state regulation that centers around the contract of insurance, the transaction which Paul v. Virginia held was not "commerce." The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation and enforcement--these were the core of the "business of insurance." Undoubtedly, other activities of insurance companies relate so closely **[**21]** to their status as reliable insurers that they to [sic] must be placed in the same class. But whatever the exact scope of the statutory term, it is clear where the focus was--it was on the relationship between the insurance company and the policyholder.

Id. In *Fabe*, the Court stated, "the broad category of laws 'enacted for the purpose of regulating the business of insurance' consists of laws that possess the 'end, intention, or aim' of adjusting, managing, or controlling the business of insurance." *Fabe, 508 U.S. at 505*. Putting the *Fabe* and *National Securities* formulations together, ***HN11***[] a statute is "enacted . . . for the purpose of regulating the business of insurance" if it possesses the end, intention, or aim of adjusting, managing, or controlling the relationship between the insurance company and the policyholder, directly or indirectly. [5]

---

[4] In their brief, the defendants refer to several statutes within Article XXXII of the Illinois Compiled Statutes. Article XXXII is entitled "Premium Finance Companies," and the statutes within it regulate all manner of things related to such companies. However, the only state statute at issue in this case is *215 Ill. Comp. Stat. 5/513a9*, the statute relating to premium finance agreements. Specifically, the only sections at issue are subsections (a) and (b) of § 513a9. The question we must address is whether § 513a9 is a law "enacted . . . for the purpose of regulating the business of insurance." Examining other state statutes, even if such statutes are located in the same section of the Illinois Compiled Statutes, would not assist our inquiry and we therefore decline to do so.

[5] We confess some uncertainty as to whether *Fabe* counsels us to employ the *Pireno* test in cases involving the first clause of § 2(b) to determine whether a statute is one "enacted . . . for the purpose of regulating the business of insurance." Although the Court distinguished *Pireno* as applying to cases involving the antitrust exemption, it employed a *Pireno* analysis in its discussion.

[22]** Under this formulation, we hold that 215 Ill. Comp. Stat. 5/513a9 is not a statute "enacted . . . for the purpose of regulating the business of insurance." The Illinois law addresses the relationship between a creditor and a debtor, not the relationship between an insurance company and a policyholder. Although sections (a) and (b) of the statute regulate disclosure in the financing of insurance premiums, and subsections (c) and (d) regulate to whom the finance company must deliver the premium check, the critical point is that the state is attempting to protect the interests of the borrower qua borrower. The statute may serve to protect someone who happens to be an "insured," but it does not protect that person in his capacity as a party to a contract of insurance. The fact that the money borrowed ultimately pays insurance premiums is incidental. The statute in question **[*1045]** simply regulates the lending activities of companies involved in premium finance.

Our analysis is the same even if it is the insurance company doing the financing. ***HN12***[] The financing agreement is a contractual arrangement separate from the insurance policy itself, and the insurance company acts not as an insurance company **[**23]** but as a creditor under that contract. The financing activity is ancillary to the insurance relationship. Thus, the Illinois statute, which regulates the debtor-creditor relationship under premium financing agreements, does not possess an end, intention, or aim of directing, managing, or controlling the relationship between the insurance company and the policyholder. As such it is not a law "enacted . . . for the purpose of regulating the business of insurance" and therefore it is outside the scope of the McCarran Act. Because the Illinois statute is outside of the McCarran Act's protective umbrella, it does not preempt federal law, and the court may apply TILA.

E. *Lowe v. Aarco-American, Inc.*

In *Lowe* we summarily determined that the credit sale of insurance policies by an insurance broker and a premium finance company was part of the "business of insurance" and therefore exempt from TILA's application. *See* 536 F.2d at 1162. The Fifth Circuit, in Perry v. Fidelity Union Life Ins. Co., 606 F.2d 468 at 470 (5th Cir. 1979) and Cochran, 606 F.2d at 460, disagreed with our holding and created a circuit split.

In *Lowe*, we asked whether the activity of premium financing was part of the "business **[**24]** of insurance." As argued *supra*, given intervening Supreme Court decisions and particularly the recent *Fabe* opinion, we believe that the appropriate inquiry is whether the statute at issue is one "enacted . . . for the purpose of regulating the business of insurance," not whether the activity the statute regulates may properly be considered the "business of insurance." This approach, in addition to being consistent with the language of the statute, has the added benefit of addressing state law statute by statute to determine whether it trumps federal law. Under the *Lowe* approach, any state statute

---

Many other courts have struggled with the same question. *See, e.g.,* Ambrose, 891 F. Supp. at 1160. We do not understand *Fabe* to require the *Pireno* analysis in this situation. We read the *Fabe* Court's *Pireno* analysis as responding to the petitioner's argument that the appropriate question was whether the liquidation of an insolvent insurance company is part of the "business of insurance." By interpreting the statute as not merely ranking creditor priority in bankruptcy, but as affecting the actual performance of the insurance contract, the Supreme Court established that even under *Pireno* the statute was one "enacted . . . for the purpose of regulating the business of insurance." Thus the Supreme Court defeated the petitioner's argument on its own ground. Understanding the Court's Pireno analysis in this context, we conclude that the *Pireno* analysis is not a necessary part of determining whether a statute is "enacted . . . for the purpose of regulating the business of insurance." This understanding comports with the *Fabe* Court's statement that:

> Both *Royal Drug* and *Pireno* . . . involved the scope of the antitrust immunity located in the second clause of § 2(b). We deal here with the first clause, which is not so narrowly circumscribed. The language of § 2(b) is unambiguous: The first clause commits laws "enacted . . . for the purpose of regulating the business of insurance" to the States, while the second clause exempts only "the business of insurance" itself from the antitrust laws. To equate laws "enacted . . . for the purpose of regulating the business of insurance" with the "business of insurance" itself, as petitioner urges us to do, would be to read words out of the statute. This we refuse to do.

Fabe, 508 U.S. at 504. Additionally, the *Pireno* criteria focus on the activity regulated by the statute. Since we have previously determined that our focus is not on the activity itself, the *Pireno* factors provide too narrow a test. *Accord* Ambrose, 891 F. Supp. at 1160-61 & n.5 ("To the extent that Pireno and Royal Drug consider whether the practice being regulated is itself the business of insurance, their analysis is inapplicable in a case controlled by the broader first clause of Section 2(b).").

regulating any aspect of premium financing would be immune from federal preemption because premium financing is "the business of insurance."

We hold that ***HN13***[] a statute enacted to regulate disclosure and delivery requirements in premium financing agreements is not the kind of statute rightfully protected from federal preemption under the McCarran Act. To the extent that our approach to this question and our holding departs from our prior decision in Lowe, we overrule our decision in *Lowe*.

For the forgoing reasons, we Reverse the district court's dismissal of Autry's TILA and state law claims **[**25]** and Remand for proceedings consistent with this opinion.

HN13[] **Business Torts, Unfair Business Practices**

La. Rev. Stat. Ann. § 51:1409 confers a right of private action on any person who suffers any ascertainable loss of money or movable property, corporeal or incorporeal from unlawful trade practices. This language has been held to confer the private right of action on both consumers and business competitors, such as the plaintiff dealers in this case.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > General Overview

HN14[] **Trade Practices & Unfair Competition, State Regulation**

The Louisiana Unfair Trade Practices Law (LUPTA), codified at *La. Rev. Stat. Ann. §. 51:1401, et seq.*, provides a cause of action both for trade practices which are "unfair" and those which are "deceptive." An act is not required to be both unfair and deceptive. A practice is unfair when it offends established public policy and when the practice is unethical, oppressive, unscrupulous, or substantially injurious. A trade practice is "deceptive" for purposes of LUTPA when it amounts to fraud, deceit or misrepresentation.

Opinion

Pg 1

[*787] This case comes before this Court on Chevron U.S.A.'s motion for summary judgment. Chevron has devolutively appealed from the trial court's denial of its motion for summary judgment as to plaintiffs' antitrust claims and has filed an application for supervisory writs from the ruling of the trial court on plaintiffs' non-antitrust claims. Although the trial court rendered judgment in plaintiffs' **[**2]** favor, plaintiffs answered defendant's appeal on the basis of statements made in the trial court's reasons for judgment. On joint motion of the parties, this Court consolidated the writ application with the present appeal.

For the reasons stated more fully herein, we affirm the trial court's judgment denying defendant's motion for summary judgment as to plaintiffs' antitrust claims. As to the trial court's ruling on plaintiffs' non-antitrust claims, we grant defendant's application for supervisory writs, vacate the ruling of the trial court and remand for further proceedings.

PROCEDURAL HISTORY

In March of 1994, the plaintiffs brought the present suit for damages against Chevron U.S.A. ("defendant") and three of Chevron's wholesale distributors. Plaintiffs alleged violations of the Louisiana Anti-Trust statute, *LSA-R.S. 51:121, et seq.*, and violations of the Louisiana Unfair Trade Practices Act, *LSA-R.S. 51:1401, et seq.* Plaintiffs further asserted claims against defendant for other violations of state law, including breach of contract, abuse of rights, intentional interference with business relationship, misrepresentation and unjust enrichment.

[Pg 2] Defendant answered **[**3]** plaintiffs' petition, and subsequently brought a motion for summary judgment. Following a hearing, the trial court denied defendant's motion and issued written reasons for judgment.

This devolutive appeal followed. While the usual procedural vehicle for seeking review of a denial of a motion for summary judgment would have been by supervisory writ, defendants were afforded an expedited right of appeal from the trial court's ruling pursuant to *LSA-R.S. 51:135*, a special provision for review of antitrust actions. However, the appellate jurisdiction conferred by *LSA-R.S. 51:135* applies specifically to antitrust claims, and, absent irreparable injury, defendant has no right to appeal the denial of the summary judgment as to plaintiffs' non-antitrust claims. *La. Code Civ. Proc. art. 2083*; *Orleans Parish School Bd. v. Scheyd, Inc., 95-2653 (La. App. 4 Cir. 4/24/96), 673 So. 2d 274*. Accordingly, defendant sought supervisory writs of review of these issues, and this Court has consolidated this writ application with the present appeal. Thus, both the antitrust claims and the non-antitrust claims will be considered at this time, albeit through separate procedural vehicles.

FACTS

[4]** The following statement of facts is taken from plaintiffs' petition and from the documents submitted at the motion for summary judgment.

The plaintiffs in this case are current or former Chevron service station dealers in the Greater New Orleans area. Defendant Chevron U.S.A. refines, produces and manufactures various petroleum products and motor fuels, including gasoline and diesel fuels, and markets these products in three ways. First, it sells gasoline to branded independent dealers, such as plaintiffs, who also generally lease their service station outlets from Chevron. Second, Chevron sells gasoline to wholesalers and unbranded retailers, commonly referred to as "jobbers." Jobbers sell the gasoline to "jobber-supplied" stations under the Chevron insignia [Pg 3] and trademark. Further, jobbers provide their own transportation for the delivery of motor fuels. Third, Chevron sells gasoline directly through Chevron-owned service stations operated by Chevron employees, or "co-op" stations.

The plaintiffs in this case represent the first level in Chevron's distribution system. Each of the plaintiffs in this case entered into Dealer Supply Contracts ("contracts") with Chevron that obligate **[**5]** them to buy all of their Chevron branded gasoline directly from **[*788]** Chevron, and to pay "Company's [Chevron's] prices to Dealer in effect at the time and place of delivery for the particular product, grade, quantity and type of delivery involved, as established by Company from time to time." (Dealer Supply Contract, paragraph 3(b)). All but two of the plaintiff dealers also lease their stations from Chevron pursuant to a Lease Agreement containing a variable monthly rent computed partly on the basis of the number of gallons of Chevron fuel that the plaintiffs have sold each month. Chevron contends that it has a substantial financial investment in the acquisition, remodeling and maintenance of the leased stations and further maintains the environmental responsibility for the fuel purchased by the independent dealers.

Defendants Val J. Dauterive & Sons, Inc., Dade Vincent, Inc. d/b/a Metro Oil & Gas, and Huber Oil Company, Inc. are Chevron "jobbers" who purchase gasolines and diesel fuels from Chevron for resale, and who distribute those products to independent stations and retailers not bearing the Chevron trademark. By the terms of the contracts, Chevron prohibits the plaintiff dealers **[**6]** from purchasing Chevron motor fuels from Chevron's jobbers, and Chevron prohibits the jobbers from selling Chevron motor fuels to the plaintiff dealers. By this lawsuit, plaintiffs seek a declaratory judgment and injunctive relief prohibiting the defendant jobbers from refusing to sell fuel to plaintiffs. These defendants did not participate in the motion for summary judgment brought in the trial court by [Pg 4] defendant Chevron, and plaintiffs' claims against these defendants are not part of this appeal.

The basis of plaintiffs' claims against Chevron is that Chevron arbitrarily manipulates the price of the fuel it sells to the independent dealers and unreasonably prohibits plaintiffs from purchasing the fuel at lower prices from the jobbers. The price the plaintiff dealers pay to Chevron for gasolines and diesel fuels is called the "dealer tank wagon," or "DTW" price. Based on the DTW price in effect, the plaintiffs set the price to the public or "street price." The price the jobbers pay for their wholesale supplies of motor fuels purchased from Chevron is referred to as the "rack" price, and the jobber-supplied stations set their street price accordingly. At the co-op stations, Chevron **[**7]** retains title to the fuel until it is sold to the public at the pump, and Chevron sets the street price for the gasoline.

Chevron periodically adjusts the prices for its fuels based on a zone pricing mechanism. Chevron has established price zones, which it refers to as "price reference areas," and Chevron makes "temporary competitive adjustments" based on the prices of the competition in the particular area. Plaintiffs allege that Chevron enhances the competitive advantage of its company-operated stations by dictating the DTW and the subsequent retail price charged by the plaintiff dealers.

Plaintiffs allege in their petition that Chevron's DTW prices to the plaintiff dealers have been unreasonably higher than Chevron's rack price to the defendant jobbers. Plaintiffs contend that the rack prices to the jobbers have been so much lower than the DTW prices that the jobbers have been able to resell to independent stations and retailers at prices much lower than the DTW prices the plaintiff dealers are forced to pay to Chevron. Plaintiffs contend that the differential is greater than the cost of transportation or other costs incurred by the jobbers. Plaintiffs argue that the differential **[**8]** between DTW and rack prices has damaged [Pg 5] the ability of the plaintiff dealers to compete effectively with jobbers who resell unbranded Chevron motor fuels at significantly lower prices, and has also damaged the ability of the plaintiff to compete with Chevron's own co-op stations.

Further, plaintiffs allege that Chevron improperly administered the variable rent program to increase Chevron's rental revenue whenever the effects of their pricing manipulation reduced the volume of fuel plaintiffs could sell.

Plaintiffs allege that for the purposes of the antitrust violations, the relevant geographic market involved is the Greater New Orleans area, including the Parishes of Orleans, Jefferson, St. Bernard and Plaquemines. Plaintiffs allege that the relevant product market is Chevron motor fuels (gasoline and diesel fuels).

[*789] SUMMARY JUDGMENT STANDARDS

The standard for summary judgments under Louisiana law has been recently modified by legislative revision of *Article 966 of the Code of Civil Procedure.* ***HN1***[] Summary judgments are now favored, and the rules regarding such should be liberally applied. *La. Code Civ. Proc. art. 966A(2)*; *Oakley v. Thebault, 96-0937, (La. App. 4 Cir. 11/13/96),* ***[**9]*** *684 So. 2d 488, 490*. ***HN2***[] Appellate courts review summary judgments de novo. ***HN3***[] A motion for summary judgment which shows that there is no genuine issue of material fact and that the mover is entitled to judgment as a matter of law shall be granted. *La. Code Civ. Proc. art. 966* C(1); *Smith v. Our Lady of the Lake Hosp. Inc., 93-2512 (La. 7/5/94), 639 So. 2d 730, 751*.

Further, Louisiana law now authorizes a partial summary judgment. By Acts 1997, No. 483, effective July 1, 1997, the legislature revised *La Code of Civ. Proc. art. 966(E)*, which now provides as follows:

> ***HN4***[] A summary judgment may be rendered dispositive of a particular issue, theory of recovery, cause of action, or defense, in favor of one or more parties, even though the granting of the summary judgment does not dispose of the entire case.

We will consider the motion now before us with these standards in mind.

[Pg 6] LOUISIANA ANTITRUST STATUTE

The plaintiffs allege violations by the defendant of *LSA-R.S. 51:122*, which provides:

> ***HN5***[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce in this state is illegal.

LSA-R.S. 51:122 is virtually identical **[**10]** to *Sec. 1, et seq.* of the Sherman Act (*15 U.S.C. § 1 et seq.*), and in reviewing allegations of violations of the Sherman Act, federal courts have applied the Rule of Reason to determine which contracts or combinations constitute an unreasonable restraint of trade. *Continental T.V. Inc. v. GTE Sylvania Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Although Louisiana's ***antitrust law*** is not as well developed as the federal law, our courts have nonetheless recognized that the broad language of Louisiana's prohibition against every contract, combination, or conspiracy in restraint of trade should not be taken literally, but must be interpreted to reach only those combinations or contracts which are "unlawful." See, *Louisiana Power & Light Co. v. United Gas Pipe Line Co., 518 So. 2d 1050, 1053 (La. App. 4 Cir. 1987)*, writ denied, *523 So. 2d 232 (La. 1988)* and cases cited therein. ***HN6***[] To state a claim under *LSA-R.S. 51:122*, the plaintiff is required to allege that the defendant is a party to a contract which results in an **unreasonable** restraint of trade. *Reppond v. City of Denham Springs, 572 So. 2d 224, 230 (La. App. 1 Cir. 1990)*. (Emphasis added.)

[11]** Plaintiffs allege that Chevron has contracted in a manner so as to exclude plaintiffs from purchasing fuels at competitive prices. Plaintiffs allege that by continually refusing to allow them to purchase gasoline at lower prices from the wholesalers/jobbers, Chevron is unreasonably restraining trade. Defendant contends that there is a reasonable basis for its refusal to allow plaintiffs to [Pg 7] purchase fuel from the jobbers: the jobbers are a "different class of trade," and defendant has a substantial investment in the leased stations which is not present with the fuel sold to the jobbers, thereby justifying the price differential.

Plaintiffs' claims against Chevron also rest on the theory that defendant's actions constitute monopolized trade in violation of *LSA-R.S. 51:123*, which provides:

> ***HN7***[]
>
> No person shall monopolize, or attempt to monopolize, or combine, or conspire with any other person to monopolize any part of the trade or commerce within this state.
>
> ***HN8***[]
>
> In order to recover under *LSA-R.S. 51:123*, the plaintiff is required to prove that defendant either attempted to monopolize or conspired to monopolize any part of the trade or commerce within this state. Monopoly **[**12]** power is defined as the ability to control prices or to exclude competition from the market. *U. S. v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391-92, 76 S. Ct. 994, 1005-06, 100 L. Ed. 1264 (1956)*; *Louisiana Power & Light Co. v. United Gas Pipe Line Co., 493 So. 2d 1149, 1161, n. 31 (La. 1986)*. To determine the existence of monopoly **[*790]** power, it is necessary to define the market within which that power is allegedly exercised. *Louisiana Power & Light Co. v. United Gas Pipe Line Co., 478 So. 2d 1240, 1248 (La. App. 4th Cir. 1985)*, writ granted, *484 So. 2d 130 (La. 1986)*, affirmed in part, reversed in part, *493 So. 2d 1149 (La. 1986)*.
> The trial court denied defendant's motion for summary judgment on these antitrust claims on the basis that there exist material issues of disputed facts. In its reasons for judgment, the trial court stated:
>
> > The Court finds that plaintiffs claims under *La Rev. State. 51:122* and *51:123* present issues of material fact which cannot be determined on a Motion for Summary Judgment. Plaintiffs' [sic] allege that Chevron and its jobbers have contracted in a manner so as to exclude the plaintiffs from purchasing fuels at competitive wholesale **[**13]** [Pg 8] prices, thereby benefitting Chevron's co-op stations and the stations supplied by jobbers. Defendant asserts that it has not violated Louisiana ***antitrust law*** because it does not

> control the "relevant market." Chevron asserts that the relevant market in New Orleans is comprised of all gasoline. Plaintiffs argue that the relevant market for antitrust purposes is Chevron motor fuel products sold in the Greater New Orleans area. These arguments only highlight the material facts in dispute involving the antitrust claims.

On appeal from this ruling, defendants contend that plaintiffs' antitrust claims must fail as a matter of law because Chevron lacks power in the relevant market to commit the alleged violations. In support of this argument, defendant submitted the affidavit of David Kaplan, an economic consultant with experience in antitrust cases. Kaplan reviewed plaintiffs' antitrust claims and opined that the marketing of gasoline in the New Orleans area is intensely competitive and that Chevron's relatively small market presence prevents it from engaging in uncompetitive conduct. Chevron argues therefore that the prices to dealer supply stations must be considered fair because **[**14]** Chevron is in line with the prices of its competitors.

However, the parties disagree as to how to define the relevant market. Plaintiffs contend that the relevant market is Chevron branded gasoline, and they submit affidavits which state that they must compete with other Chevron stations which are able to sell the gas at a lower price based on Chevron's pricing mechanisms. In support of this position, plaintiffs rely on the case of *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*, which holds that antitrust claims can be based on a singlebrand market power.

Defendants contend that the relevant market includes all products reasonably interchangeable with defendant's product, and therefore the relevant market is not just defendant's particular brand, but is all gasoline being sold in the relevant [Pg 9] geographic area. Defendant contends that there is no dispute that Chevron has only a 12% share of the gasoline market in New Orleans, and that share is insufficient, as a matter of law, to empower Chevron to impose an unreasonable restraint of trade or to possess monopoly power. In support of this position, defendant cites to **[**15]** several cases from other jurisdictions that hold that a single gasoline manufacturer and distributor does not have sufficient market power in the relevant retail gasoline market to obtain a monopoly or restrain trade.
However, the cases cited by defendants are unpersuasive as the holdings in those cases are based on other state statutes which are not applicable in this case. Our review of the record indicates that by prohibiting the plaintiff dealers from purchasing fuel from the jobbers, Chevron is restraining trade. Whether this restraint is unreasonable is a question of fact. Plaintiffs have alleged that they are unable to compete in the relevant market based on Chevron's DTW prices and plaintiffs' inability to purchase fuel at a lower price from the jobbers. These are likewise factual issues which must be reserved for a trial on the merits.

Further, we agree with the trial court that the definition of the relevant market is a triable issue on the question of monopoly power and the reasonableness of restraint. We find that whether the product is "all gas" or "Chevron gas" is a question of fact which **[*791]** remains in dispute. Although plaintiffs admit that they compete with stations **[**16]** selling other brands of gasoline, plaintiffs also allege that they compete in the Chevron gasoline market against jobber-supplied stations and co-ops. Thus, there is a question of fact as to whether the relevant market is wholesale Chevron products or the entire retail gasoline market in the New Orleans area. We conclude therefore that it is premature to draw conclusions as a matter of law at this point in the case, and the trial court correctly denied defendant's motion for summary judgment as to these antitrust issues.
[Pg 10] LOUISIANA PRICE DISCRIMINATION STATUTE

Plaintiffs also assert a claim that defendant's conduct constitutes unfair price discrimination in violation of *LSA-R.S. 51:331*, which provides as follows:

> ***HN9***[] No person, doing business in Louisiana, and engaged in the production, manufacture, or distribution of any commodity in general use, who shall, intentionally, for the purpose of injuring or destroying the business of a competitor in any locality, discriminate between different sections, communities, cities, or localities in the state by selling such commodity at a lower rate in one section, community, city, or locality, than is charged for the commodity by such **[**17]** person in another section,

> community, city, or locality, after making due allowance for the difference if any, in the grade or quality of the commodity and in the actual cost of transportation of the commodity from the point of production, if a raw product, or from the point of manufacture, if a manufactured product. All sales so made shall be prima facie evidence of unfair discrimination.

Defendant first contends that plaintiffs do not have a private right of action under the price discrimination statute. Defendant relies on *LSA-R.S. 51:334*, which provides that the Attorney General examines complaints against corporations and determines whether to institute proceedings against that corporation.

However, ***HN10***[] Louisiana courts have held in tradtional tort cases that private rights of action exist for violation of a statute. *Regional Transit Authority v. Lemoine, 93-1896, 93-1897 (La. App. 4 Cir. 11/16/95), 664 So. 2d 1303, 1309*, writ denied, 96-0412 (La. 3/29/96), *670 So. 2d 1234*. We find that this rule of law is also applicable in the present antitrust suit. Although the penalties applicable to violations of this statute which are contained in *LSA-R.S. 51:332* may not be **[**18]** imposed absent proceedings filed by the Attorney General, the plaintiffs in this case may assert a claim that Chevron violated the price discrimination statute in its attempt to prove that Chevron's contracts are unlawful under Louisiana law. Moreover, ***HN11***[] *LSA-R.S. 51:333* provides that all contracts made in violation of LSA-R.S. [Pg 11] 51:331 are void, and plaintiffs assert a claim for damages based on contracts which they allege are unlawful and void.
In its reasons for judgment, the trial court did not specifically address plaintiffs' claims of violation of the price discrimination statute. Nevertheless, we have reviewed the record before us and have determined that summary judgment as to these claims is not appropriate.
It is undisputed in the present case that Chevron has sold motor fuels to the defendant jobbers at prices below those charged to the plaintiffs under their supply contracts. Those jobbers, in turn, sell fuel to retail stations that compete with plaintiffs, but at much lower prices than those charged to plaintiffs by Chevron. Chevron also sells fuels directly to the public through its company operated stations which also compete with plaintiffs.

Defendant argues that it **[**19]** is not prohibited by this statute from charging wholesalers different prices than retailers. Further, defendant contends that the statute only prohibits discrimination in prices based on geographic locations.

However, the Louisiana statute provides that it shall be unlawful to "discriminate between different sections, communities, cities, or localities in the state by selling such commodity at a lower rate than is charged for the commodity in another section, community, **[*792]** city, or locality. . ." Plaintiffs allege in this case that Chevron has established "price reference areas," and the prices of fuel to the dealers in these areas are different. We find the price discrimination statute to be applicable in this case, and we find that there are disputed issues of fact as to whether defendant has violated this statute to defeat summary judgment.

Further, although Chevron is entitled to charge wholesalers different prices than retailers, there must be a justification for the difference set forth by the supplier. See, *Texaco, Inc. v. Hasbrouck, 496 U.S. 543, 110 S. Ct. 2535, 110 L. Ed. 2d 492 (1990)*. In the Hasbrouck case, several independent retailers sued [Pg 12] Texaco under the Robinson-Patman **[**20]** Act amendment to the Clayton Act [1] for refusing to sell gasoline to them at the same prices at which it sold to its jobbers. Texaco argued that the price given to its jobbers was a "functional discount." However, the Supreme Court ruled that discounts available to some, but not all persons in a motor fuel distribution chain are discriminatory and illegal. The Court further found that to pass scrutiny under the federal Act, the discount must be related to either the supplier's savings or the wholesaler's costs.

In the present case, defendant contends that the price difference is based on the cost of transportation; however, plaintiffs have alleged that the wholesalers/jobbers could sell the fuel to them at a lower price than Chevron charges, notwithstanding their costs of transportation. Defendant also contends that it has a substantial investment in the leased stations, and therefore the DTW price compensates Chevron **[**21]** for these investments. However, two of the plaintiffs in this case do not occupy a leased station but nevertheless

[1] The Louisiana statute is closely analogous to this federal statute. See, *15 U.S.C. § 13*.

pay Chevron the higher DTW price for its fuel. We find that Chevron failed to offer sufficient evidence to carry its burden on summary judgment that there is some permissible basis for the disparity between the prices Chevron charges to plaintiff and those it charges to the jobbers. Thus, there remain disputed issues of fact as to whether Chevron's price differentials constitute illegal price discrimination under *LSA-R.S. 51:331*. These issues must be resolved following a trial on the merits.
LOUISIANA UNFAIR TRADE PRACTICES ACT

Plaintiffs further contend that defendant's actions are in violation of the Louisiana Unfair Trade Practices Law, *LSA-R.S. 51:1401, et seq.* ("LUTPA").

HN12[] *LSA-R.S. 51:1405(A)* provides in part:

> Unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce are hereby declared unlawful.

[Pg 13] Further, ***HN13***[] *LSA-R.S. 51:1409* confers a right of private action on "any person who suffers any ascertainable loss of money or movable property, corporeal or incorporeal" from unlawful trade practices. **[**22]** This language has been held to confer the private right of action on both consumers and business competitors, such as the plaintiff dealers in this case. *Morris v. Rental Tools, Inc., 435 So. 2d 528, 532 (La. App. 5th Cir. 1983)*.

HN14[] LUTPA provides a cause of action both for trade practices which are "unfair" and those which are "deceptive." An act is not required to be both unfair and deceptive. What constitutes unfair and/or deceptive practices is not specifically defined, but is determined on a case by case basis. Wyatt v. PO2, *Inc., 26,675 (La. App. 2 Cir. 3/1/95), 651 So. 2d 359*, writ denied, 95-0822 (La. 5/5/95), *654 So. 2d 331*.

The statutory definition of an "unfair" practice is broad and subjectively stated and does not specify particular violations. *Jarrell v. Carter, 577 So. 2d 120, 123 (La. App. 1st Cir. 1991)*, writ denied *582 So. 2d 1311 (La. 1991)*. A practice is unfair when it offends established public policy and when the practice is unethical, oppressive, unscrupulous, or substantially injurious. *Jarrell v. Carter, 577 So. 2d at 123*. What constitutes an unfair trade practice is to be determined on a case-by-case basis. Monroe Medical Clinic, **[**23]** *Inc. v. Hospital Corp. of America, 522 So. 2d 1362, 1365 (La. App. 2nd Cir. 1988)*.

[*793] A trade practice is "deceptive" for purposes of LUTPA when it amounts to fraud, deceit or misrepresentation. *United Group of Nat. Paper Distributors, Inc. v. Vinson, 27,739 (La. App. 2 Cir. 1/25/96), 666 So. 2d 1338, 1346*, writ denied, 96-0714 (La. 9/27/96), *679 So. 2d 1358*.
Plaintiffs contend that Chevron's conduct in discriminatorily charging plaintiffs unreasonably high prices for the gasoline sold them pursuant to the supply contracts is unfair and violative of LUTPA because it offends established [Pg 14] public policy, and is unethical, oppressive, unscrupulous, and caused them substantial injury. Plaintiffs further contend that defendant's practices in setting prices and in preventing them from buying fuel at competitive prices from the jobbers is deceptive and done with the intent to drive them out of business. In fact, plaintiffs show that several of the original named plaintiffs in this case have relinquished their stations to Chevron, allegedly due to Chevron's pricing practices.

Chevron claims that its actions are ordinary business activities, permitted by its contracts with plaintiffs, **[**24]** and that these actions are not violative of LUTPA because Chevron conducts its business with the intent of maximizing its profits and has no intent to put plaintiffs, who are selling Chevron gasoline, out of business.
On these allegations, we hold that plaintiffs are entitled to a trial to determine whether defendant's actions are unfair or deceptive in violation of LUTPA, or whether said actions are simply an exercise of justified business activities. Based on the record before us, we cannot say as a matter of law that Chevron's actions do not constitute unfair trade practices.
OTHER STATE LAW CLAIMS
These claims come before this Court on application of supervisory writ from the trial court's denial of defendant's summary judgment. The trial court stated in its reasons for judgment:

> The Court would be inclined to grant defendant's Motion for Summary Judgment, as it relates to the breach of contract and abuse of rights claims. However, summary judgment may not be used merely to decide an issue. A summary judgment may be partial, but it must grant at least some of the relief prayed for. Partial summary judgments which attack theories of recovery without dismissing a party or **[**25]** granting all or part of the relief sought are improperly granted. *Williams v. Trapolin Law Firm, 641 So. 2d 673 at 676 (La. App. 4th Cir. 1994)*.

[Pg 15] As previously stated herein, the summary judgment law has been recently amended and now provides for the granting of a partial summary judgment. As stated by the trial court, this Court has previously held that a partial summary judgment may not be utilized to dispose of theories of recovery. *Williams v. Trapolin Law Firm, 93-0877 (La. App. 4 Cir. 7/27/94), 641 So. 2d 673, 676*. However, the Williams case was decided prior to the 1997 amendments to *La. C.C.P. art. 966(E)*, and partial summary judgments are now permissible to dispose of a theory of recovery. Thus, the trial court erred in relying on this Court's decision in Williams in light of the recent amendments to the summary judgment article.

Plaintiffs' non-antitrust claims against defendant include breach of contract, abuse of rights, intentional interference with a business relationship, unjust enrichment and misrepresentation. In its reasons for judgment, although the trial court denied the summary judgment, the court addressed the merits of plaintiffs' claims for **[**26]** breach of contract and abuse of rights, but did not address plaintiffs' other state law claims. Plaintiffs answered defendant's appeal based on the statements made in the trial court's reasons for judgment which are in error.

We recognize that reasons for judgment set forth the basis for the court's holding and are not binding. *Melton v. General Electric Co., 625 So. 2d 265, 268 (La. App. 4th Cir. 1993)*. In this case, the trial court found defendant's argument to have merit, but declined to dismiss plaintiffs' claims on the motion for summary judgment based on an erroneous statement of the law. Plaintiffs are correct in their answer to this appeal that the reasons for judgment are not controlling. **[*794]** We find that the trial court's judgment is erroneous, and we are not bound by the trial court's statements in its reasons for judgment regarding the merits of plaintiffs' claims.

[Pg 16] As we have concluded that the trial court erred in failing to apply the new summary judgment law to the facts of the present case, we grant defendant's application for supervisory writs and vacate the ruling of the trial court denying defendant's motion for summary judgment on plaintiffs' non-antitrust claims. **[**27]** Although this Court may conduct its own de novo review of defendant's motion, we find it more appropriate to remand the case for reconsideration under the new law. On remand, the trial court will have an opportunity to consider defendant's motion in light of the amended article. See, *Kaufmann v. Fleet Tire Service of Louisiana, 97-1428, 699 So. 2d 75* (La. 9/5/97); *Young v. Dupre Transport Co., 97-0591 (La. App. 4 Cir. 10/1/97), 700 So. 2d 1156*.

CONCLUSION

Accordingly, for the reasons assigned herein, the judgment of the trial court denying defendant's motion for summary judgment as to plaintiffs' antitrust claims is affirmed. We grant defendant's application for supervisory writs, and vacate the ruling of the trial court denying defendant's motion for summary judgment as to plaintiffs' non-antitrust claims. This case is remanded to the trial court for reconsideration in light of Act 483 of 1997. Each party is to bear its own costs of this appeal.

HN1[] **Summary Judgment, Evidentiary Considerations**

Summary judgment is appropriate where admissible evidence fails to demonstrate a genuine issue of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. If the nonmoving party bears the burden of persuasion at trial, the moving party must show that the nonmoving party's evidence is insufficient to carry that burden. The nonmoving party can create a genuine issue of material fact by pointing to evidence in the record sufficient to support a jury verdict in its favor at trial. Alternatively, the burden on the moving party may be discharged by showing that there is an absence of evidence to support the nonmoving party's case. Since a complete failure of proof concerning an essential element, on which a party bears the burden of proof at trial establishes that the moving party is entitled to a judgment as a matter of law, the nonmoving party must establish the existence of every element essential to its case. Such evidence must be significantly probative and more than merely colorable.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN2[] **Summary Judgment, Entitlement as Matter of Law**

The party opposing a motion for summary judgment is afforded the benefit of all reasonable inferences drawn from the record.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[] **Summary Judgment, Opposing Materials**

On a motion for summary judgment, once the moving party has satisfied its burden, the nonmoving party is required by *Fed. R. Civ. P. 56(e)* to establish that there remains a genuine issue of material fact. The nonmovant may not rest upon mere allegation or denials of his pleadings, but must set forth specific facts showing that there is a genuine issue for trial. A fact is material if it might affect the outcome of the suit under the governing law and is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. In determining whether a nonmovant has established the existence of a genuine issue of material fact requiring a jury trial, the evidence of the nonmovant must be believed and all justifiable inferences are to be drawn in its favor. An inference based upon conjecture does not create a material factual dispute sufficient to defeat summary judgment. Likewise, simply showing that there is some metaphysical doubt as to the material facts does not establish a genuine issue for trial.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] **Private Actions, Standing**

The analysis of whether a party has standing to bring an antitrust action is broken down into two parts: first, whether the plaintiff has suffered an antitrust injury; and second, whether he is the most effective party or efficient enforcer of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN5[] **Private Actions, Remedies**

Antitrust injury is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Because ***antitrust law*** aims to protect competition, not competitors, a court must analyze the antitrust injury question from the viewpoint of the consumer. An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services, not just his own welfare.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Sherman Act, Claims**

To make out a violation of § 1 of the Sherman Act, the plaintiff must establish: (1) a contract, combination or conspiracy; (2) a restraint of trade; and (3) an effect on interstate commerce.

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Sherman Act, Claims**

To prevail on a claim alleging a violation of § of the Sherman Act, the plaintiff must prove concerted action--an agreement--on the part of the defendants. Unilateral action, no matter what its motivation, cannot violate § 1. Moreover, evidence of conduct which is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy, and there must be evidence that tends to exclude the possibility of independent action. Finally, the plaintiff must show that the motive for the alleged conspiracy is a reasonable one that would inure to the defendants' economic benefit. It is not necessary, however, that all of the co-conspirators share the same motive.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Regulated Practices, Market Definition**

To sustain a claim under § 1 of the Sherman Act, the plaintiff is required to prove what market he contends was restrained and that the defendants played enough of a significant role in the relevant market to impair competition generally. The relevant market is further broken down into product and geographic components.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Medical antitrust claims are generally reviewed under a rule of reason analysis. Under this mode of analysis, the plaintiff bears the burden of proving that any concerted action taking place caused an anti-trust injury by imposing an unreasonable restraint on trade; the defendants are not required to prove that the practices are reasonable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Monopolies & Monopolization, Attempts to Monopolize**

Section 2 of the Sherman Act proscribes monopolization of a market.

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Contracts Law > Contract Interpretation > General Overview

Contracts Law > Contract Interpretation > Intent

HN11[] **Defenses, Ambiguities & Mistakes**

The interpretation of a contract presents a legal issue to be resolved by the court. The court's task is to give effect to the intentions of the contracting parties, as those intentions are manifested reasonably in the text of the writing. When the words of that writing are unambiguous, the interpretation of the contract must proceed solely from the writing's text. Of course, the mere fact that the parties dispute how their contract should be interpreted does not make the writing ambiguous.

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > Output, Exclusive & Requirements Agreements

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Output & Requirements Contracts

HN12[] **Sales of Goods, Output, Exclusive & Requirements Agreements**

A requirements contract does not impose upon a buyer the necessity to order that any work be done. The buyer has no duty to have a requirement. The seller assumes the risk of all variations in the buyer's requirements, even if the buyer decides to discontinue the business.

Contracts Law > Contract Interpretation > Parol Evidence > General Overview

HN13[] **Contract Interpretation, Parol Evidence**

Course of performance is always relevant in interpreting a writing, even an unambiguous one. The parties to an agreement know best what they meant, and their action under it is often the strongest evidence of their meaning. Although course of performance is to be given great weight in the interpretation of the agreement, it is merely a guide in the process of interpretation and is used in determining what meanings are reasonably possible as well as in choosing among possible meanings. Conduct, however, must still be weighed in the light of the terms of the agreement itself.

Torts > ... > Commercial Interference > Contracts > General Overview

HN14[] Commercial Interference, Contracts

One who intentionally and improperly interferes with the performance of a contract between another and a third person by inducing or otherwise causing the third person not to perform the contract, is subject to liability to the other for the pecuniary loss resulting to the other from the failure of the third person to perform the contract.

Torts > ... > Contracts > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Contracts > Intentional Interference > Elements

HN15[] Intentional Interference, Defenses

To prevail on a claim of intentional interference with existing contractual relations, a plaintiff must prove: (1) the existence of a contractual relationship; (2) an intent on the part of the defendant to harm the plaintiff by interfering with that contractual relationship; (3) the absence of a privilege or justification for such interference; and (4) damages resulting from the defendant's conduct.

Torts > ... > Prospective Advantage > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN16[] Intentional Interference, Defenses

The four elements of the tort of intentional interference with prospective contractual relations are: (1) a prospective contractual relation; (2) the purpose or intent to harm the plaintiff by preventing the relation from occurring; (3) the absence of privilege or justification on the part of the defendant; and (4) the occasioning of actual damage resulting from the defendant's conduct.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Commercial Interference > Contracts > General Overview

HN17[] Intentional Interference, Elements

The element of intent for the tort of intentional interference with contractual relations is closely related to the element of privilege or justification and the propriety of the defendant's actions. The propriety of the defendant's actions may be determined by focusing upon the following factors: (a) The nature of the actor's conduct, (b) The actor's motive, (c) The interests of the other with which the actor's conduct interferes, (d) The interests sought to be advanced by the actor, (e) The proximity or remoteness of the actor's conduct to the interference and (f) The relations between the parties.

Torts > ... > Commercial Interference > Contracts > General Overview

HN18[] **Commercial Interference, Contracts**

By definition, there must be at least three parties for a claim of tortious interference with an existing contract to lie.

Torts > Intentional Torts > Defamation > General Overview

HN19[] **Intentional Torts, Defamation**

To sustain a cause of action for defamation, plaintiff must prove: (1) the defamatory character of the communication; (2) publication by the defendant; (3) its application to the plaintiff; (4) understanding by the recipient of its defamatory meaning; (5) understanding by the recipient of it as intended to be applied to the plaintiff; and (7) abuse of a conditionally privileged occasion.

Torts > ... > Defenses > Privileges > Qualified Privileges

Torts > ... > Defenses > Privileges > General Overview

HN20[] **Privileges, Qualified Privileges**

The conditionally privileged nature of a statement may be lost if the plaintiff proves that it has been abused. Whether or not the privilege has been abused is an issue of fact. Abuse occurs when the publication is actuated by malice or negligence, is made for a purpose other than that for which the privilege is given, or to a person not reasonably believed to be necessary for the accomplishment of the purpose of the privilege, or includes defamatory matter not reasonably believed to be necessary for the accomplishment of the privilege.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN21[] **Civil Procedure, Discovery & Disclosure**

Fed. R. Civ. P. 11(b) provides, in pertinent part: By presenting to the court (whether by signing, filing, submitting or later advocating) a pleading, written motion, or other paper, an attorney or unrepresented party is certifying that to the best of the person's knowledge, information, and belief, formed after an inquiry reasonable under the circumstances that the allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Torts > ... > Contracts > Intentional Interference > Elements

Civil Procedure > Sanctions > Baseless Filings > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN22[] Summary Judgment, Opposing Materials

Under *Fed. R. Civ. P. 11*, the court determines the reasonableness of an inquiry by applying an objective standard. The court, however, must avoid drawing on the wisdom of hindsight by finding a claim frivolous merely because the plaintiff ultimately did not prevail.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

Civil Procedure > Sanctions > Baseless Filings > General Overview

HN23[] Pleadings, Amendment of Pleadings

Under *Fed. R. Civ. P. 11*, a litigant's obligations are not measured solely as of the time they are filed or submitted to the court, but include reaffirming to the court and advocating positions contained in the pleadings and motions after learning that they cease to have any merit. Moreover, if evidentiary support is not obtained after a reasonable opportunity for further investigation or discovery, the party has a duty under the rule not to persist with that contention. The does not require a formal amendment to pleadings for which evidentiary support is not obtained, but rather calls upon a litigant not thereafter to advocate such claims or defenses.

Opinion

MEMORANDUM OPINION AND ORDER

D. BROOKS SMITH, District Judge.

This is a suit brought by a neurologist against a hospital at which he holds staff privileges, several doctors affiliated with that hospital, and a group of physical **[*2]** therapists. It centers around a 1992 contract in which plaintiff was granted exclusive rights to interpret certain electrodiagnostic tests performed at the hospital. Plaintiff has alleged that the defendants have restrained trade and attempted to create a monopoly in violation of the Sherman Act, breached his contract, tortiously interfered with his contractual relations and defamed him. Before the court are the motions of all defendants for summary judgment. For the reasons that follow, I will grant summary judgment in favor of all defendants.

I. FACTS and PROCEDURE

Defendant Somerset Hospital is a community hospital located in Somerset, Pennsylvania, a small community in Southwestern Pennsylvania. There are no other hospitals in Somerset or the county within which it is located, and the nearest such facilities are located in Johnstown and Greensburg, Pennsylvania. Between 1977 and 1992, the hospital did not have a neurologist on staff who resided in Somerset. As a result, certain electrodiagnostic tests, most notably electromyograms ("EMGs"), were performed by Martin, McGough & Eddy, Inc. ("MM&E"), a group of physical therapists under contract to the hospital. Eddy dep. **[*3]** 13-15. The therapists' written "impressions" of these diagnostic procedures were furnished to patients' attending physicians without the opinion or interpretation of a medically trained neurologist. If the physician desired such an interpretation, he or she would have to arrange a consultation with a neurologist outside the Somerset area. Under state law, it is unlawful for a physical therapist to render a medical diagnosis. Eddy dep. 42-45; *see* 63 Pa. C.S.A. § 1309 (physical therapist "shall not treat human ailments. . . or practice any branch of the healing arts" except by referral of a licensed physician).

To rectify this situation and improve the level of patient care, the hospital decided to recruit a neurologist to live and practice in Somerset. It ultimately attracted plaintiff Anthony J. Giampolo, M.D., a newly minted neurologist just completing his residency at the University of Pittsburgh Medical Center. The parties entered into a contract on May 27, 1992, two principal provisions of which are significant to this case. *See* dkt. no. 30, exh. A.

First, as a means of facilitating Giampolo's transition into solo private practice, he was provided with a one-year income **[*4]** guarantee of $ 240,000. *Id.* § 2.02. If his practice earned less than this amount, the hospital would make up the difference, but if he made more than $ 240,000, Giampolo was required to turn the excess over to the hospital. This income guarantee provision was automatically renewable in one-year terms, unless notice of termination was given at least ninety days before its scheduled expiration. *Id.* § 4.02. Ultimately, of course, it would be reasonable to conclude that, like any specialist, Giampolo would eventually develop a lucrative practice of treating patients referred by other doctors and would no longer need a subsidy.

Second, Giampolo was granted the exclusive right to interpret electroencephalography ("EEG"), EMG and "Evoked Potential" procedures for a period of five years after the termination of the income guarantee provision. *Id.* § 2.01. The hospital accordingly ceased using the services of MM&E and told its principal, John G. Eddy, that he would have to negotiate with Giampolo if he wished to continue performing the physical procedures themselves (as distinguished from their interpretation) at Somerset Hospital. Although Giampolo initially declined to use **[*5]** Eddy's services, the two eventually struck a bargain and Eddy began performing EMGs on Giampolo's premises and billing him for the service. Eddy dep. 20-22.

Giampolo had some difficulty making the transition to a profitable private practice. Nine months into his tenure at the hospital, his practice was operating at a deficit, requiring a large subsidy from the hospital to meet his income guarantee. There were also indications that other physicians on the staff, although they believed Giampolo to be an excellent neurologist and clinician, had problems with his overall attitude and other non-medical facets of his services. Michael Farrell, the CEO of Somerset Hospital, met with Park, the hospital's chief financial officer, to determine what was to be done, as Giampolo's income guarantee was up for renewal. Park developed four options: (1) terminate the contract and provide no neurology services; (2) terminate the contract and pursue other options for the provision of neurology services; (3) renew the contract with new terms and conditions; and (4) renew the contract under its current terms. Dkt. no. 142, exh. 9. Park preferred option two, and considered option four to be out of the **[*6]** question. *Id.* The hospital ultimately declined to review the income guarantee contract for a second year.

In addition, at some point in his first year of practice, Giampolo began to notice that he was treating a fairly high percentage of indigent patients in his office. Giampolo dep. 29. Apparently, other physicians were referring these, as well as paying, patients to him to have EMGs performed and interpreted. [1] Giampolo approached the hospital and proposed that he be given a stipend to subsidize these patients. He was advised by Farrell that he could limit the number of indigents he treated to a specified percentage of patient base. Giampolo aff. P 7. Under this plan, Giampolo would still see all referral patients but would not treat "self-referred" patients without first receiving payment. *See* Farrell dep. 29, 75; Giampolo dep. 789-92. Giampolo, however, instituted a policy whereby he demanded payment of his customary fee in advance and refused to examine any patient who did not pay. *See* Giampolo dep. 59-64, 69-70, 92-94. [2] Farrell believed this policy hurt Giampolo's referral practice, in that other physicians were not likely to be eager to refer only their paying **[*7]** patients to him while they sent their other patients elsewhere. Farrell dep. 289-90.

Giampolo's decision placed the hospital in a difficult bind. It could either refer the EMGs of only paying patients to Giampolo for interpretation, thus offering two standards of care which varied with ability to pay, or it could cease offering EMG interpretations as a hospital service altogether, leaving the question of whether to obtain **[*8]** an interpretation in the hands of each attending physician. The hospital chose the latter course, essentially reverting to its practice before Giampolo was recruited. By 1995, the hospital was providing EMG services solely through MM&E, which provided its impressions directly to the attending physician with no interpretation by Giampolo. *See* Farrell dep. 160-62.

As a result, even though Giampolo retained the exclusive right to interpret the EMG and other procedures, he soon found that his referral business for such services was drying up. Giampolo dep. at 123-28. Most doctors were not ordering interpretations, even for their paying patients, and Dr. Catalano, a neurologist from Greensburg, was being given referrals for other matters, as well as the occasional interpretation when Giampolo was not available. Eventually Catalano, who had begun practicing in Somerset back in 1990, opened a satellite office there, staffed primarily by his associate, Dr. Felix Brizuela. Giampolo continues, however, to practice neurology in Somerset, sees a few patients at the hospital, Giampolo dep. 7-12, and still receives some referrals from local physicians. *Id.* at 17.

In May 1995, Giampolo **[*9]** filed the instant suit against the hospital and its medical officers, the MM&E group and Dr. Catalano, alleging violations of the state and federal antitrust laws, breach of contract, and tortious interference with contractual relations. Dkt. no. 1. Plaintiff at that time was represented by Attorneys Irving Portnoy and Stan Twardy. The defendants filed motions to dismiss, in response to which plaintiff amended his complaint in October 1995. Dkt. no. 30. This new complaint added claims for defamation and "False Presences" [sic]. In April 1996, after a renewed round of motions to dismiss, I dismissed Giampolo's breach of contract claims against MM&E and Catalano, as well as his claim for false pretenses, but denied the motions as to all other counts and defendants. Dkt. no. 60, at 18-19.

In October 1996, I held a case management conference, dkt. no. 70, and issued an order closing discovery on April 21, 1997, dkt. no. 71. On April 16, Attorneys Portnoy and Twardy filed a motion to withdraw as counsel, dkt. no. 73, which I granted, dkt. no. 75. On May 30, Attorneys David Hughes Harris and Michael J. Beautyman entered an appearance on Giampolo's behalf, dkt. no. 83, and I extended the **[*10]** time for discovery by six months. Dkt. no. 82. At a September 9 hearing on a discovery dispute, dkt. no. 103, it surfaced that Giampolo had allegedly made tapes of his various telephone conversations with other physicians, without their knowledge or consent. Dkt. no 139, at 80. The allegedly surreptitious nature of these recordings apparently caught plaintiff's counsel by surprise, resulting in an off-the-record discussion and a promise to locate and review the tapes, which I ordered

---

[1] Although Giampolo believes that he was receiving a disproportionately high percentage of indigent patients because his medical colleagues were referring those with insurance to another facility, he has adduced no evidence to support his subjective impression, except for a letter he himself wrote to the hospital's Board of Directors. *See* dkt. no. 143, exh. 7 to exh. C. That letter cites nothing in support of its assertion.

[2] Giampolo brought his attorney to an October 1993 meeting of the Medical Executive Committee to explain his position, *id.* at 115-16, 119-20, 541-44, 738-39.

accomplished within thirty days. *Id.* at 80-84. Two weeks later, Giampolo's second counsel moved to withdraw, citing undisclosable "professional considerations [under] RPC 1.16 captioned 'Mandatory Withdrawal' . . . ." Dkt. no. 104, at 1-2. I granted that motion. Dkt. no. 106. To date, the tapes still have not been provided.

Plaintiff is now represented by his third set of counsel, Attorneys Jeffrey S. Jacobovitz and Robert S. Canterman. Before me now are the motions of all defendants for summary judgment, dkt. nos. 115, 126, 135, and for sanctions under *Fed. R. Civ. P. 11*, dkt. nos. 113, 124, 137. Also pending are the hospital defendants' motion for sanctions arising from plaintiff's failure to **[*11]** produce the tapes, dkt. no 131, [3] plaintiff's motion to strike supplemental exhibit, dkt. no. 157, and plaintiff's motion to supplement the record, dkt. no. 159.

II. SUMMARY JUDGMENT STANDARD

HN1[] Summary judgment is appropriate where admissible evidence fails to demonstrate a genuine **[*12]** issue of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. If the nonmoving party bears the burden of persuasion at trial, the moving party must show that the nonmoving party's evidence is insufficient to carry that burden. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. The nonmoving party can create a genuine issue of material fact by pointing to evidence in the record sufficient to support a jury verdict in its favor at trial. *Brewer v. Quaker State Oil Refining Corp., 72 F.3d 326, 330 (3d Cir. 1995)*. Alternatively, "the burden on the moving party may be discharged by showing . . . that there is an absence of evidence to support the nonmoving party's case." *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)* (internal quotation marks omitted). "Since a complete failure of proof concerning an essential element," *id. at 323-24*, on which a party bears the burden of proof at trial establishes that the moving party is "entitled to a judgment as a matter of law," the nonmoving party must establish the existence of every element essential to its **[*13]** case. *Id.* Such evidence must be significantly probative and more than "merely colorable." *Armbruster v. Unisys Corp., 32 F.3d 768, 777 (3d Cir. 1994)*. ***HN2***[] The nonmoving party is afforded the benefit of all reasonable inferences drawn from the record. *Id.*

HN3[] Once the moving party has satisfied its burden, the nonmoving party is required by *Fed. R. Civ. P. 56(e)* to establish that there remains a genuine issue of material fact. *Clark v. Clabaugh, 20 F.3d 1290, 1294 (3d Cir. 1994)*. The nonmovant "may not rest upon mere allegation or denials of his pleadings, but must set forth specific facts showing that there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. A fact is material if it "might affect the outcome of the suit under the governing law. . ." *id. at 248*, and is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id. at 248, 257*.

In determining whether a nonmovant has established the existence of a genuine issue of material fact requiring a jury trial, the evidence of the nonmovant must "be believed and all justifiable inferences **[*14]** are to be drawn in [its] favor." *Id. at 255*. Whether an inference is justifiable, however, depends on the evidence adduced. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 595-96, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. An inference based upon speculation or conjecture does not create a material factual dispute sufficient to defeat summary judgment. *Robertson v. Allied Signal, Inc., 914 F.2d 360, 382 n.12 (3d Cir. 1990)*. Likewise, "simply showing that there is some metaphysical doubt as to the material facts" does not establish a genuine issue for trial. *Matsushita, 475 U.S. at 586*.

---

[3] I will deny the motion for discovery sanctions as moot. Defendants have sought only two forms of relief, both in the form of proposed jury instructions: (1) that making surreptitious tape recordings is a felony under the Pennsylvania Wiretapping and Electronic Surveillance Control Act, *18 Pa. C.S.A. § 5701 et seq.*; and (2) that the trier of fact may infer that, had those recordings been produced, they would have been unfavorable to plaintiff. Dkt. no. 131, at 5-6. While it is inexcusable that Giampolo has failed to obey this court's order and produce either the tapes or a satisfactory explanation of what happened to them, my dismissal of this case on motions for summary judgment makes defendant's proposed relief moot.

III. ANTITRUST CLAIMS

A. STANDING

As a threshold matter, I must determine whether Giampolo has standing to bring his antitrust claims. *Baglio v. Baska, 940 F. Supp. 819, 828 (W.D. Pa. 1996)* (citing *Associated General Contractors v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983))*. ***HN4***[] This analysis is broken down into two parts: first, whether the plaintiff has suffered an antitrust injury; and second, whether he is the most effective party or efficient enforcer of the antitrust laws. *See Alberta* **[*15]** *Gas Chemicals Ltd. v. E.I. duPont de Nemours & Co., 826 F.2d 1235, 1240 (3d Cir. 1987)*; *Baglio, 940 F. Supp. at 828*.

HN5[] Antitrust injury is "an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Mathews v. Lancaster General Hosp., 87 F.3d 624, 641 (3d Cir. 1996)* (citations omitted). As the Third Circuit has said,

> because ***antitrust law*** aims to protect competition, not competitors, a court must analyze the antitrust injury question from the viewpoint of the consumer. An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services, not just his own welfare.

Id. (citations and internal quotation marks omitted). Here, plaintiff alleges that he was damaged when defendants conspired to curtail the referrals he received. Dkt. no. 30 PP 16-44. He alleges the following as his theory of competitive harm:

> Defendant Hospital[,] acting through its administrator, Michael J. Farrell, and with the connivance and in concert with Defendant Louis Catalano[, M.D.] and the individual defendants, embarked on a campaign to *control, monopolize* **[*16]** *and illicitly exploit the practice of neurology* in Somerset County and the adjoining areas.

Dkt. no *30 P 16* (emphasis added); *accord id. PP 17, 24, 28, 30, 33*(c), 34(f), 38, 42, 46(f).

It is important to recognize that this is not the typical "staff privileges" case in which a physician unsuccessfully seeks to "break into" or is driven out of a local market for a particular specialty. *See, e.g., Mathews, 87 F.3d at 628-31*; *Fuentes v. South Hills Cardiology, 946 F.2d 196, 197-98 (3d Cir. 1991)*; *Weiss v. York Hosp., 745 F.2d 786, 791 (3d Cir. 1984)*; *Huhta v. Children's Hosp., 1994 U.S. Dist. LEXIS 7327*, *No. 93-2765, 1994-1 Trade Cas. (CCH) P70,619, 1994 WL 245454* (E.D. Pa. May 31, 1994), *aff'd mem.*, *52 F.3d 315 (3d Cir. 1995)*. In cases of that type, the denial of privileges or a conspiracy not to refer patients to the new doctor could readily have a significant anticompetitive purpose and effect. Here, in contrast, Giampolo was recruited and given a limited monopoly within the hospital specifically because there were no neurologists with office practices in Somerset. Thus, the staff privileges cases have only limited application here.

Giampolo contends that, after the hospital **[*17]** recruited him, it and the other defendants deliberately injured him in his practice by relying on MM&E's "impressions" instead of his EMG interpretations (thus eviscerating the pecuniary value of his monopoly over those interpretations) and by seeing to it that referrals were funneled to other neurologists, namely Drs. Catalano and Brizuela. *See* dkt. no. 30 PP 19, 22-24; Giampolo dep. 250-53. This theory is flawed, for several reasons.

First, it must be noted that the hospital changed its policy regarding interpretations only after Giampolo refused to treat indigent patients in his office practice and placed the hospital in a moral (if not legal) dilemma. Thus, the record suggests that Giampolo's plight arose as an adverse consequence of his own business decision, and not because of any anticompetitive motive of the defendants.

More fundamentally, however, Giampolo ignores the fact that, as a result of the events of which he complains, the availability of neurological services has increased, not lessened. Drs. Catalano and Brizuela have made additional inroads into the practice of neurology in Somerset since Giampolo's fateful decision, while Giampolo continues to practice neurology **[*18]** there. Whatever the defendants may have done--and however negatively it may have affected Giampolo's income--the fact remains that competition in the neurology profession has intensified, and consumers now have more choices than they had previously. This is not the type of harm the antitrust laws were designed to prevent. *See* *Mathews, 87 F.3d at 641* (where denial of surgical staff privileges at one of several hospitals had no material impact on the "large and ever-increasing number of providers[,]" injury was personal to physician and not to competition generally); *Baglio, 940 F. Supp. at 829* (where harm accrued only to individual physician without decrease in available services, there was no antitrust injury); *Huhta*, 1994 WL 245454 (similar, lost referral income from denial of privileges states personal, not antitrust, injury).

Giampolo seeks to escape this conclusion by arguing that the defendants' actions reduced the *quality*, rather than the availability or price, of care at Somerset Hospital. His contention is that when the hospital stopped ordering his medical interpretation of each EMG and began relying only on MM&E's impressions, there occurred "a qualitative **[*19]** decrease in the level of services provided by Somerset Hospital in the relevant market area." Dkt. no. 142, at 39-40. In addition to being totally at variance with the theory advanced in Giampolo's complaint--that defendants monopolized the practice of neurology--Giampolo's theory improperly conflates supply with demand.

It is questionable, as an initial matter, whether the hospital's decision reduced the quality of available care at all. Indigent patients, at least after Giampolo's policy was implemented, stood little opportunity of seeing a neurologist whether or not the hospital made routine referrals to Giampolo. For a paying or insured patient, Giampolo was ready and willing to consult, if his or her attending physician thought it medically indicated.

Yet, even if the hospital's decision did reduce the overall level of care, it did so in a way that did not implicate antitrust concerns. When the hospital recruited Giampolo, granted him exclusive interpretation rights and referred every EMG study to him for interpretation, it simultaneously increased the supply of neurological services and created a larger demand for EMG interpretations. The hospital's subsequent policy change **[*20]** only reduced the *demand* for neurology services in Somerset, in that the interpretation was no longer being bundled in with the EMG procedure itself. Untying the provision of the interpretation and leaving the issue of whether to obtain one to the discretion of each attending physician had no effect on the supply of those services, however, as stated *supra*, and certainly did not reduce the professional competence of either Giampolo or his two competitors. By Giampolo's reasoning, a health insurer could injure competition simply by declining, for reasons of cost control, to reimburse for any given medical procedure. Simply put, a reduction in supply which diminishes competition implicates antitrust policy; a reduction in demand which puts downward pressure on physicians' incomes does not. Thus, Giampolo has not suffered an antitrust injury and hence lacks standing. [4]

[*21] B. SECTION 1 OF THE SHERMAN ACT

Even if Giampolo had antitrust standing, I would still be constrained to hold that he has not demonstrated a violation of § 1 of the Sherman Act. ***HN6***[] To make out a violation of that section, he must establish: (1) a contract, combination or conspiracy; (2) a restraint of trade; and (3) an effect on interstate commerce. *Nanavati v. Burdette Tomlin Mem. Hosp., 857 F.2d 96, 117 (3d Cir. 1988)*. Because interstate commerce is not contested, I will analyze the first two elements *seriatim*.

---

[4] I therefore need not decide whether plaintiff is the most "efficient enforcer" of the antitrust laws, which deals with the situation in which "[a] party may have suffered antitrust injury yet not be considered a proper plaintiff for other reasons." *Alberta Gas*, 826 F.2d at 1240. In the cases cited by defendants, efficient enforcer status was denied because other parties, such as health insurers, were better positioned to assert that costs had increased and caused them damage, even though the physician-plaintiff also suffered loss. *See* *Baglio, 940 F. Supp. at 830* (citing *Huhta*, 1994 WL 245454 at *2; *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1455 (11th Cir.1991)*. Here, defendants' policy of no longer referring all EMGs to Giampolo for an interpretation, if anything, reduced costs to patients and the payor community. Because these groups would have no incentive to file an antitrust suit, it appears that plaintiff would be the most efficient enforcer of the antitrust laws. The fact that only Giampolo suffered a pecuniary injury, however, further underscores the conclusion that that injury was to him alone, and not to competition.

1. CONTRACT, COMBINATION OR CONSPIRACY

HN7[] To prevail in a § 1 case, the plaintiff must prove concerted action--an agreement--on the part of the defendants. *Mathews, 87 F.3d at 639*. "Unilateral action, no matter what its motivation, cannot violate section 1." *Id.* (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 110 (3d Cir. 1980))*. Moreover, "evidence of conduct[] which is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy[,]" *id.* (quoting *Matsushita, 475 U.S. at 597 n.21*), and "there must be evidence that tends to exclude the possibility **[*22]** of independent action." *Id.* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984))*. Finally, plaintiff must show that the motive for the alleged conspiracy is a reasonable "one that would inure to the defendants' economic benefit." *Bolt v. Halifax Hosp. Med. Ctr., 891 F.2d 810, 819 (11th Cir. 1990)* (citing *Matsushita, 475 U.S. at 596-97*); *Kerth v. Hamot Health Found., 989 F. Supp. 691, 698 (W.D. Pa. 1997)*. It is not necessary, however, that all of the co-conspirators share the same motive. *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1243 (3d Cir. 1993)*.

Instantly, there is no evidence that any of the defendants conspired to drive Giampolo out of his neurology practice or curtail his referrals. Indeed, Giampolo's "proof" is pure post hoc reasoning: he claims that he lost referrals because of a conspiracy and then attempts to use the loss of referrals to prove the existence of that conspiracy, i.e., he lost referral patients so there must have been a conspiracy against him. *See* Giampolo dep. 250-53.

To the contrary, the undisputed evidence indicates that Farrell, the hospital's **[*23]** CEO, had no control over the referral patterns of physicians and did not discuss neurology referrals with any physician or other member of the hospital staff. Farrell dep at 263, 265. Further, each physician defendant testified that he was not involved in any discussions to boycott or get rid of Giampolo. Nair. dep. 11; Trenton dep. 40; deVries dep. 70. There is thus no evidence that tends to exclude the possibility of independent action. [5]

[*24] In an attempt to dispute this, Giampolo cites to a statement made by Farrell to Giampolo's then-attorney after the October 1993 meeting of the Medical Executive Committee to the effect that he had won the battle but lost the war, and that no physician at that meeting would ever refer patients to him again. Farrell dep. 86-87, 289-90. That statement, however, proves nothing; read in context, Farrell merely stated that Giampolo had taken a course that would, for wholly lawful reasons, hurt his practice:

> I said that you have won the battle and lost the war, that you have been successful in alienating everyone [sic] of the private practicing physicians that sat on the medical executive committee, all of which are key referral

[5] Giampolo cites to Eddy's testimony, in which he states that he heard that there was some kind of boycott going on against Giampolo:

> Q. Did you have a conversation with [Giampolo's secretary] where you indicated that Dr. Giampolo was being boycotted?
>
> A. Yes.
>
> Q. Could you tell us about that discussion?
>
> A. Again, it goes back to the information I had given you before about in conversations with other physicians, them relaying to me some of their concerns about him and his practice, and the discussion with [Giampolo's secretary] specifically had to do with the fact that her numbers were starting to drop off.
>
> Q. Did you use the term boycott?
>
> A. I can't tell you if I used that word or not. All I know is that the physicians were sending neurological patients outside of this area.

Eddy dep. 109-10. Eddy does not attribute these statements to any of the defendants under which they could be admitted as the admission of a party opponent under *Fed R. Evid. 801(d)(2)(A)*, or as the statement of a coconspirator of a party during the course and in furtherance of the conspiracy under *Fed. R. Evid. 801(d)(2)(E)*. Accordingly, the statements are hearsay not within any exception, and are hence inadmissible evidence. *Kerth, 989 F. Supp. at 704* (citing *Hlinka v. Bethlehem Steel Corp., 863 F.2d 279, 282 (3d Cir. 1988))*.

> sources to Dr. Giampolo. You have told those gentlemen that Dr. Giampolo will not accept low-pay and no-pay patients in his office. Those physicians which are all key referral sources look for consultations and referral sources that accept all patients. It makes no sense for them to refer paying patients to one consulting physician and nonpaying patients to another consulting physician. So I think personally you have alienated every physician on that committee.

[*25] Farrell dep. 289-90. Nothing in this testimony is probative of any present or prospective combination or conspiracy to boycott or otherwise injure Giampolo. [6]

Moreover, none of the physician defendants, with the exception of Dr. Catalano, are neurologists. Thus, they do not compete with Giampolo for business. The hospital, likewise, has no incentive to harm Giampolo's practice, because it cannot bill the patient or insurer for the costs of the interpretation that Giampolo would have provided. *See* Park aff.; Farrell dep. 224-25, 233; *Betkerur v. Aultman* ***[*26]*** *Hosp. Ass'n, 78 F.3d 1079, 1090 (6th Cir. 1996)* (decision of physicians to refer patients to plaintiff's competitor not an actionable boycott where, *inter alia*, those physicians "stood to gain nothing financially by driving [plaintiff] out of her practice[]"); *see generally Matsushita, 475 U.S. at 587, 593* (summary judgment granted where economic factors gave defendant no motive to engage in antitrust conspiracy and made plaintiff's claim implausible); *Kerth, 989 F. Supp. at 700* (under *Matsushita*, where conspiracy theory is economically implausible, plaintiff must adduce "sufficient evidence that reasonably supports the inference that a defendant acted contrary to rational economic self interest" (discussing *Petruzzi's IGA, 998 F.2d at 1232*)).

Defendant MM&E performs the "technical" component of the EMG test, but the evidence is undisputed that Giampolo himself used these physical therapists before the hospital changed its policy and the hospital continued to use them after the change. Because MM&E would have the same business under either alternative, it too would seem to have little incentive to undermine Giampolo in Somerset. In any event, MM&E, as a group **[*27]** of physical therapists, is barred by law from offering medical diagnoses in competition with Giampolo. Eddy dep. 42-45; *see* 63 Pa. C.S.A. § 1309.

As for Dr. Catalano, against whom Giampolo has dropped his antitrust claim in any event, he cannot conspire with himself. Thus, the lack of evidence of his co-defendants' involvement in any conspiracy makes his unilateral motive, whatever it was, [7] irrelevant to the resolution of the antitrust claims against the remaining defendants.

This combination of lack of discussion and lack of motive leads inexorably to the conclusion that, at best, the defendants' actions were as consistent with lawful motives as they were with unlawful conspiracy. Accordingly, Giampolo's antitrust conspiracy claim fails for lack of evidence. [8] *See Friedman* ***[*28]*** *v. Delaware County Mem.*

---

[6] Giampolo also cites evidence that his patient referral practices were a topic of discussion among the medical staff, Eddy dep. 51-52, that some physicians were referring their patients outside the county, *id. at 108-10*, and that Dr. Trenton was aware that certain physicians, such as Dr. deVries, chose not to give referrals to Giampolo, Trenton dep. 56-57. None of this evidence points to the existence of any concerted action by the defendants.

[7] By this, I do not imply in any way that his motive was less than proper. Indeed, the record indicates that he was practicing neurology in Somerset, albeit on a part-time basis, before Giampolo was recruited. Catalano dep. 9-10.

[8] Giampolo has moved to supplement the record with the recently taken affidavit of Grace Walsh, one of his patients. *See* dkt. no. 159. Ms. Walsh states that on or about July 1, 1996 she was examined by Dr. Jawad Salameh, a new general practitioner in Somerset. When she mentioned that she was also treating with Giampolo, Salameh told her that he would not continue to be her doctor unless she ended her patient-physician relationship with Giampolo. I will deny the motion. First of all, contrary to the representation made in the motion, *id.* P 5, plaintiff did not "only recently become aware that Ms. Walsh possessed the information set forth in her March 10, 1998 affidavit." Rather, Giampolo's own deposition of January 21, 1997, indicates his full knowledge of this incident at that time. *See* dkt. no. 160, exh. A. Thus, this matter could have been raised in Giampolo's brief in opposition to the motions for summary judgment. In response, Giampolo makes the frivolous argument that, while the nature of Ms. Walsh's testimony was known earlier, the *affidavit* only came into existence in March 1998; thus, the affidavit is newly discovered evidence. *See* dkt. no. *161 P 3*. That simply proves too much: any party could wait until after summary judgment motions are filed and supplement the record on that rationale.

Hosp., 672 F. Supp. 171, 191 (E.D. Pa. 1987) (where physicians were not competitors and never conferred, except in a peer review capacity as agents of the defendant hospital, no conspiracy existed), *aff'd mem.*, *849 F.2d 600, 849 F.2d 603 (3d Cir. 1988)*.

[*29] 2. RESTRAINT OF TRADE

Additionally, ***HN8***[] plaintiff is required to "prove what market he contends was restrained and that the defendants played enough of a significant role in the relevant market to impair competition generally." *Miller v. Indiana Hosp., 814 F. Supp. 1254, 1260* (W.D. Pa.) (citing *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*; *Oskanen v. Page Mem. Hosp., 945 F.2d 696, 709 (4th Cir. 1991))*, *aff'd mem.*, *975 F.2d 1550 (3d Cir. 1992)*. The relevant market is further broken down into product and geographic components. *Miller, 814 F. Supp. at 1260*. Plaintiff alleges that the relevant product market is "the practice of neurology," Dkt. no. *30 P 38*, a contention which is not the subject of significant dispute. He further avers two conflicting definitions of the relevant geographic market, a matter that is contested.

Giampolo first defines the relevant geographic market as Somerset County, which he alleges "includes the immediate community within reasonable commuting distances and the large rural area surrounding the town of Somerset and a relatively large county." *Id. P39*. Later in the complaint, he accuses **[*30]** the defendants of conspiring to gain a monopoly "in the relevant markets which include substantial regions of the State of Pennsylvania." *Id. P 46*(f). I will assume that he is pursuing the former definition, as that is consistent with the affidavit of his expert's report. *See* dkt. no. 143, exh. A(2) P 19-20.

HN9[] Medical antitrust claims of the sort raised by physicians such as Giampolo are generally reviewed under a "rule of reason analysis." *Betkerur, 78 F.3d at 1093* & n.9 (citing cases); *Miller, 814 F. Supp. at 1259* & n.3. Under this mode of analysis, "plaintiff bears the burden of proving that any concerted action taking place caused an anti-trust injury by imposing an unreasonable restraint on trade; the defendants are not required to prove that the practices are reasonable." *Miller, 814 F. Supp. at 1259-60*.

Unfortunately for Giampolo, he has adduced no evidence whatsoever that defendants even restrained trade, much less that the restraint was unreasonable. First, there has been an increase, not a decrease, in the availability of neurological services in Somerset. Giampolo continues in practice, and Drs. Catalano and Brizuela have increased their presence there. **[*31]** *See* *Betkerur, 78 F.3d at 1091, 1093-94* (where plaintiff continued to practice her specialty and consumer choice was increased by defendants' actions, no antitrust violation under rule of reason, even if a conspiracy and boycott did exist). Second, Giampolo has not shown that the price of those services has increased, nor does it appear that such a showing could be made, given the increase in competition. Finally, Giampolo has produced no evidence of a decline in the quality of the services provided by the neurologists, including himself, who practice in Somerset. For these reasons, I conclude that the defendants simply did not restrain trade.

Accordingly, I will dismiss Giampolo's claim under § 1 of the Sherman Act with prejudice. [9]

[*32] C. SECTION 2 OF THE SHERMAN ACT

In any event, Ms. Walsh's affidavit proves nothing. Dr. Salameh is not a defendant in this case, and there is no evidence that suggests that any defendant induced him to malign Giampolo or that Salameh's actions were anything other than unilateral. Indeed, Giampolo testified that Ms. Walsh told him only that Dr. Salameh disagreed with Giampolo's medical diagnosis of her condition, and that Ms. Walsh continues to be Giampolo's patient. Dkt. no. 160, Exh. A.

[9] Giampolo also asserts a cause of action under state ***antitrust law***. It is not clear from the complaint, however, precisely what relief he seeks or where he demands it. In any event, his sole argument in opposition to summary judgment is that, if the federal antitrust claim survives, the state claim does as well. Dkt. no. 142, at 46. Because I am dismissing Giampolo's federal claims, I will also dismiss his state antitrust cause of action, with prejudice.

Giampolo also alleges that defendants have violated **HN10**[] § 2 of the Sherman Act, which proscribes monopolization of a market. Defendants have moved for summary judgment on this claim, and although he has not explicitly conceded the point, Giampolo offers no argument in response. Hence, I deem the issue waived and will dismiss this claim with prejudice. [10]

[*33] ***IV. CONTRACT CLAIMS***

Giampolo alleges that the hospital breached the contract giving him the exclusive right to interpret EMG procedures by "allowing and encouraging Defendant John G. Eddy, a physical therapist, and his company, [MM&E], to substitute their 'impressions' from neurological tests for Plaintiff's professional medical neurological diagnosis and interpretation." Dkt. no. *30 P 35*. Essentially, Giampolo contends that the hospital ceased routinely sending EMGs to him for interpretation and relied instead on Eddy's impressions, thus eviscerating the exclusive EMG interpretation right for which he bargained. The contract between Giampolo and the hospital recites, in pertinent part:

> 2.01 Exclusive Agreement: During the term of this Agreement and for a period of five years thereafter ("Exclusivity Period"). [sic] Hospital agrees to grant Physician or physicians employed by Physician the exclusive right to *interpret* all [EEGs, EMGs] and all Evoked potential [sic] procedures. During Exclusivity period, no *Neurologist* other than the physicians employed by or under contract to Physician, [sic] shall be granted the right to interpret these identified **[*34]** procedures. . . .

Id. exh. A (emphasis added).

HN11[] The interpretation of a contract presents a legal issue to be resolved by the court. *Katzeff v. Fazio, 427 Pa. Super. 55, 628 A.2d 425, 428 (Pa. Super. 1993)*. My task is to give effect to the intentions of the contracting parties, as those intentions are manifested reasonably in the text of the writing. *Halpin v. La Salle Univ., 432 Pa. Super. 476, 639 A.2d 37, 39 (Pa. Super. 1994)*. When the words of that writing are unambiguous, the interpretation of the contract must proceed solely from the writing's text. *Id.* Of course, the mere fact that, as here, the parties dispute how their contract should be interpreted does not make the writing ambiguous. *Katzeff, 628 A.2d at 430*.

Giampolo argues that the contractual term "interpret" is ambiguous and could reasonably mean either strictly a medical diagnosis or, more broadly, any sort of impressions or findings from the raw EMG data. [11] Thus, he asserts that parol evidence should be admitted to clarify the ambiguity, *see Langer v. Monarch Life Ins. Co., 879 F.2d 75, 81 (3d Cir. 1989)*, evidence he contends raises a disputed issue of material fact sufficient to avoid summary judgment. **[*35]** I will assume, without deciding, that Giampolo's claim of ambiguity is correct as to the first sentence of section 2.01.

Any ambiguity, however, is quickly resolved by reference to the very next sentence of the provision, which recites that "no *Neurologist* other than the physicians employed by or under contract to Physician, [sic] shall be granted the right to interpret these identified procedures." (Emphasis added.) *See Restatement (Second) of Contracts § 202* (1981) ("A writing is interpreted as a whole. . . ."); *id.* comment d. Significantly, the parties did not specify that "no person" could provide EMG interpretations, but chose instead to limit the exclusivity to a particular class of *physicians*, specifically Giampolo and those employed by him. Accordingly, the only reasonable interpretation of the

---

[10] Giampolo's § 2 claim lacks merit in any event. He simply has not shown that the hospital or the physician defendants, singly or in combination, possess any significant market power over neurology services in Somerset. *See, e.g., Pontius v. Children's Hosp., 552 F. Supp. 1352, 1376-77 (W.D. Pa. 1982)* (market power required to make out § 2 claim) (citing cases). None of these defendants competes with Giampolo, and the hospital has done nothing to restrict staff privileges or otherwise limit the number of neurologists who can practice in that region (with the possible exception of the exclusivity agreement which benefitted only Giampolo). Thus, it cannot seriously be maintained that defendants monopolized, or attempted to monopolize, the market.

[11] His position, of course, is that the latter definition should prevail, as this would forbid the hospital from obtaining Eddy's impressions instead of Giampolo's medical interpretations.

exclusivity **[*36]** provision is simply that if a neurological interpretation is ordered for a patient's EMG test, Giampolo must be consulted to provide it. This contractual language will not bear Giampolo's construction that anytime an EMG is performed a full neurological interpretation by Giampolo *must* be ordered.

At best, then, Giampolo is a party to a requirements contract, under which the hospital has agreed to have all neurological interpretations of EMGs done by him. ***HN12***[] Such a contract "does not impose upon a buyer the necessity to order that any work be done. The buyer has no duty to have a requirement." *Welded Tube Co. v. Phoenix Steel Corp., 377 F. Supp. 74, 79 (E.D. Pa. 1974)*, *aff'd in relevant part*, *512 F.2d 342 (3d Cir. 1975)*. The seller, in this case Giampolo, assumes the risk of all variations in the buyer's requirements, even if the buyer decides to discontinue the business. [12] **[*38]** *Id.* (citing *HML Corp. v. General Foods Corp., 365 F.2d 77 (3d Cir. 1966)*. Thus, in the absence of bad faith, *see, e.g., Advent Sys., Ltd. v. Unisys Corp., 925 F.2d 670, 678 (3d Cir. 1991)*, something not present on this record, [13] the hospital was fully within its rights when it decided to **[*37]** stop ordering a neurological interpretation with every EMG.

Giampolo argues, nevertheless, that the parties' course of performance is admissible and indicates that the hospital believed that it was required to submit all EMGs to Giampolo for interpretation. Thus, he asserts, trial is warranted to determine the actual intent of the parties. I reject this contention.

It is true that ***HN13***[] "course of performance is always relevant in interpreting a writing." *Atlantic Richfield Co. v. Razumic, 480 Pa. 366, 390 A.2d 736, 741 n.6 (1978)*, even an unambiguous one, *id.; Langer, 879 F.2d at 81*. As the *Razumic* court stated, "the parties to an agreement know best what they **[*39]** meant, and their action under it is often the strongest evidence of their meaning." *390 A.2d at 741 n.6* (quoting *Restatement (Second) of Contracts § [202*] comment g [1981]).

Giampolo argues that the hospital's initial policy, in effect before the controversy over his treatment of indigent patients, of submitting all EMGs to him for interpretation indicates that the hospital believed it was obligated under the contract to do that. What Giampolo ignores, however, is that the hospital's change of policy came about only after he decided he would no longer see indigent patients in his office. While it is true that no express term in the contract required Giampolo to treat the indigent, the fact that the hospital stopped submitting all EMGs for neurological interpretation in response to Giampolo's decision tends to indicate, not a sudden breach of an acknowledged obligation, but a legitimate change in requirements based on the actions of the "seller." Inasmuch as the hospital did not desire to have two standards of care, one for paying patients and another for the indigent, its decision to stop *offering* routine neurological interpretations after initially providing them does not **[*40]** tend to prove that it believed it was contractually *bound* to order them for every patient. [14]

---

[12] Giampolo contends, however, that this interpretation should be rejected because it renders the contract illusory or meaningless, relying on *Jamison v. Concepts Plus, Inc., 380 Pa. Super. 431, 552 A.2d 265 (Pa. Super. 1988)*. This reliance is misplaced. Jamison involved, not a requirements contract, but a contract for the sale of land under which the buyer was responsible for obtaining permits to subdivide it. *552 A.2d at 266*. If approval could not be obtained, the down payment was to be returned with interest. *Id.* The buyer, however, failed to pursue the subdivision application with diligence and sued to recover his money. *Id. at 266-67*. The court, to avoid a situation in which the entire contract would fail for want of consideration because the buyer obligated himself to nothing, interpreted the contract to require return of the down payment only if it was objectively impossible to obtain approval of the subdivision plan and ruled for the defendant. The *Jamison* court did not hold that a requirements contract like this one fails for lack of mutuality.

[13] Giampolo asserts that bad faith can be found from the fact that "the Hospital has not simply 'refrained' from requiring all EMGs to be interpreted: it has *prohibited* physicians practicing at Somerset Hospital from directing that EMG results be provided to Dr. Giampolo. . . ." Dkt. no.142, at 15 (emphasis added). No citation to the record accompanies this allegation, nor does my review of the record support it. Hence, I will ignore it as an unsubstantiated, self-serving assertion.

[14] Even if I accepted this argument, Giampolo might quickly find himself hoisted by his own petard. Giampolo, after all, performed EMG interpretations for indigent patients for some period of time; thus, it could well be argued that he believed that treating the indigent was one of *his* contractual obligations, which he breached when he began demanding payment in advance. Given that a

Although course of performance is to be given "great weight in the interpretation of the agreement[,]" *see Restatement (Second) of Contracts § 202(4)* (1981), it is "merely [a] guide[] in the process of interpretation[,]" *id.* comment a, and is "used in determining what meanings are reasonably possible as well as in choosing among possible **[*41]** meanings." *Id.* Conduct, however, must still be weighed in the light of the terms of the agreement itself. *Id.* comment g. Where, as here, nothing about the defendant hospital's conduct is inconsistent with the requirements contract unambiguously set forth in the text of the writing, plaintiff's attempt to prove a contrary course of performance must fail. Accordingly, I will dismiss Giampolo's contract claim with prejudice.

V. TORTIOUS INTERFERENCE

Giampolo has alleged that defendants have tortiously interfered with his "contractual and business rights." Dkt. no. 30, count three. In his First Amended Complaint, he alleged that they "knowingly and intentionally interfered with existing patient referral patterns with the specific purpose of adversely affecting Plaintiff's business. . . ." *Id. P 56*. He further averred that his professional reputation and economic status "have been and will continue to be damaged as a result of the defendants' interference with plaintiff's business and contractual relations with patients and interference with prospective patients." *Id. P 58*. Consequently, Giampolo has asserted claims for the intentional interference of both existing **[*42]** contractual relations and prospective contractual relations. These two claims have been asserted against all of the "defendants."

Giampolo's opposition to the defendants' motions for summary judgment fails to pursue his theory that the defendants interfered with the existing contractual relations he has with his patients. Now, having shifted ground, he theorizes that the defendants have tortiously facilitated the *hospital's* breach of his exclusivity agreement and that the defendants have caused him to lose prospective patients. [15]

In *Birl v. Philadelphia Electric Co., 402 Pa. 297, 167 A.2d 472 (Pa. 1961)*, the Pennsylvania **[*43]** Supreme Court "adopted Section 766 of Restatement of Torts and its definition of the right of action for intentional interference with existing contractual relations." *Adler, Barish v. Epstein, 482 Pa. 416, 393 A.2d 1175, 1181-82 (Pa. 1978)* (citing *Birl*). Subsequently, in *Adler, Barish*, the Court embraced the analysis "fashioned by the Restatement (Second)." *393 A.2d at 1183*. *Section 766 of the Restatement (Second) of Torts* provides:

> **HN14**[] One who intentionally and improperly interferes with the performance of a contract . . . between another and a third person by inducing or otherwise causing the third person not to perform the contract, is subject to liability to the other for the pecuniary loss resulting to the other from the failure of the third person to perform the contract.

HN15[] To prevail on a claim of intentional interference with existing contractual relations, a plaintiff must prove: "(1) the existence of a contractual relationship; (2) an intent on the part of the defendant to harm the plaintiff by interfering with that contractual relationship; (3) the absence of a privilege or justification for such interference; and (4) damages resulting from the defendant's **[*44]** conduct." *Triffin v. Janssen, 426 Pa. Super. 57, 626 A.2d 571, 574 (Pa.Super. 1993)*; *see also* *Nathanson v. Medical College of Pennsylvania, 926 F.2d 1368, 1387-88 (3d Cir. 1991)*; *Silver v. Mendel, 894 F.2d 598, 604-05 (3d Cir. 1990)*.

HN16[] The four elements of the tort of intentional interference with prospective contractual relations are: "(1) a prospective contractual relation; (2) the purpose or intent to harm the plaintiff by preventing the relation from

---

significant portion of the hospital's patients are indigent, Giampolo's "breach" would likely be deemed material, excusing the hospital from the exclusivity provision entirely.

[15] As a means of avoiding summary judgment, this is a questionable tactic. *See* *Fort Washington Resources, Inc. v. Tannen, 846 F. Supp. 354, 364 (E.D. Pa. 1994)* ("Plaintiff cannot now expand its claim beyond its pleadings simply to avoid a motion for summary judgment."). Nevertheless, I will analyze plaintiff's argument on the existing contractual relations claim on the merits.

occurring; (3) the absence of privilege or justification on the part of the defendant; and (4) the occasioning of actual damage resulting from the defendant's conduct." *Thompson Coal Co. v. Pike Coal Co., 488 Pa. 198, 412 A.2d 466, 471 (Pa. 1979)* (citing *Glenn v. Point Park College, 441 Pa. 474, 272 A.2d 895 (Pa. 1958))*.

HN17[] The element of intent for both torts is closely related to the element of privilege or justification and the propriety of the defendant's actions. *Glenn, 272 A.2d at 899*. The propriety of the defendant's actions may be determined by focusing upon the following factors:

> (a) The nature of the actor's conduct, (b) The actor's motive, (c) The interests of the other with which the actor's **[*45]** conduct interferes, (d) The interests sought to be advanced by the actor, (e) The proximity or remoteness of the actor's conduct to the interference and (f) The relations between the parties.

Adler, Barish, 393 A.2d at 1184 (quoting Restatement (Second of Tort's § 767 (1979)).

To the extent Giampolo argues that he has a viable claim for the intentional interference with his exclusivity agreement against Somerset Hospital, that claim must fall as a matter of law. ***HN18***[] By definition, there must be at least three parties for a claim of tortious interference with an existing contract to lie. *Daniel Adams Assocs. v. Rimbach Publ. Co., 360 Pa. Super. 72, 519 A.2d 997, 1000 (Pa.Super. 1987)*.

Giampolo's claims against defendants Farrell, Nair, Trenton, and DeVries must also fail. As the party with the burden of proof, Giampolo is obligated to produce evidence of every element of his claim to defeat summary judgment. *Celotex, 477 U.S. at 324*. Because Giampolo has failed to adduce any evidence that these individual defendants interfered in any manner with his exclusivity agreement, summary judgment must be granted in their favor.

Giampolo claims that the fact that Eddy continued **[*46]** to perform neurological testing and to render his impressions, is evidence that he interfered with Giampolo's exclusivity agreement. Such conduct, however, as I concluded *supra*, did not infringe upon Giampolo's exclusive right to interpret the electrodiagnostic testing performed at the hospital. *See supra*, § IV. As a result, Giampolo has failed to produce any evidence of interference and his claim cannot survive.

Giampolo has also adduced evidence that Dr. Catalano performed EEG interpretations on a few hospital patients in violation of the exclusivity agreement. Specifically, Catalano or his associate, Dr. Rastogr, saw Rosemary Harmon on Monday, April 14, 1997, and Eugene Fitzgerald on Saturday, April 12 of that year. [16] *See* dkt. no. 143, exh. 7. This was a time period, however, when Giampolo was unavailable to review the EEGs, and the interpretation was necessary "so that the patient's management and anticipated discharge could proceed without further delay. [17] **[*48]** Giampolo, for his part, has stated his belief that another physician may interpret tests under such circumstances without it being professionally wrongful or inappropriate. Giampolo dep. 115-21. Accordingly, **[*47]**

---

[16] Interestingly, these events allegedly occurred almost eighteen months after the First Amended complaint was filed.

[17] *See* dkt. no. 146, at 5 & n. 2. Dr. Catalano initially made this representation in his reply brief, unaccompanied by a citation to the record or an affidavit. He promised that a corresponding affidavit would be filed "shortly after Dr. Catalano's return from vacation[,]" *id.*, and indeed, that affidavit was filed on January 26, 1998. Giampolo does not dispute in his surreply brief that he was unavailable on these dates, *see* dkt. no. 149, choosing instead to move that the affidavit be stricken as untimely, or, in the alternative, to redepose Dr. Catalano. *See* dkt. no. 157. I will deny that motion. Giampolo raised these allegations against Dr. Catalano for the first time in his brief in opposition to summary judgment. It is only equitable to permit Dr. Catalano to submit an affidavit refuting Giampolo's newly raised theory of liability. Nor does Giampolo have a legitimate need to redepose Dr. Catalano, as he had every opportunity to ask the doctor earlier whether he had performed any interpretive procedures at the hospital or, alternatively, to move to re-open deposition discovery at the time he first became aware of the medical records of these patients.

there is no evidence that Dr. Catalano ever performed an interpretation which would have interfered with Giampolo's exclusivity contract, and this claim against Catalano must fail. [18]

Giampolo's attempt to escape summary judgment on his claim for intentional interference with prospective contractual relations fares no better. Once again Giampolo contends that the defendants, without specification as to which ones, have caused him to lose prospective patients. His entire argument on this point consists of the following:

> Dr. Giampolo has shown that his referrals have declined precipitously over the course of the last four years. The defendants' actions clearly deprived Dr. **[*49]** Giampolo of obtaining patients through the network of referral and/or consultation patterns at the hospital. *See Restatement (Second) of Torts § 766B, comment c* (included is interference with a continuing business or other customary relationship not amounting to a formal contract"). Since questions of fact exist concerning the reasonableness of plaintiff's expectation of gaining prospective patients through referrals from other physicians at Somerset, defendants' motion on this issue should be denied. *Posner v. Lankenau Hospital, 645 F. Supp. 1102 (E.D.Pa. 1986)*.

Dkt.no. 142, at 46.

In *Posner*, the principal case on which Giampolo relies, a physician's staff privileges were terminated and he alleged that various physicians on the medical staff caused him to lose prospective patients, business he would have received through the network of referrals and consultations. *645 F. Supp. at 1111-12*. The court denied a defense motion for summary judgment because questions of fact remained regarding the referral and consultation patterns. The court cautioned that the plaintiff would have to prove at trial the existence of "specific patients which other doctors would have **[*50]** referred to him if he had remained at Lankenau. A bare assertion that, but for defendants' actions, Posner would have been able to obtain more patients is an insufficient basis [to support the] claim." *Id.* n. 6.

Here, Giampolo has not identified a single patient who would have been referred to him absent the conduct of the defendants, let alone developed any evidence of any referral and/or consultation patterns at Somerset. Instead, in tautological fashion, he attempts to use the loss in referral business as evidence that there must have been tortious interference. That is insufficient and I must reject Giampolo's claim for tortious interference with prospective relations.

VI. DEFAMATION

In his complaint, Giampolo averred that the defendants, with the exception of Dr. Catalano, falsely represented "that he was a non-caring physician, insensitive to the needs of indigent patients." Dkt. no. *30 P 61*. In response to the defendants' motions for summary judgment on his defamation claim, Giampolo does not even attempt to argue that Mr. Eddy, Dr. Nair, Dr. Trenton, Mr. Farrell or the hospital defamed him. Accordingly, I deem these claims waived and abandoned. [19]

---

[18] Giampolo contended that Catalano also interpreted a third electrodiagnostic test in violation of the exclusivity agreement. The evidence in support of that contention, however, consists of several pre-printed forms captioned "SOMERSET HOSPITAL PHYSICIAN'S ORDERS" which include a directive by an attending physician whose name is illegible that a patient was to make an appointment to be seen by Dr. Catalano. This evidence fails to establish that Dr. Catalano either saw this patient, a fact he denies, or interpreted any electrodiagnostic test performed on this patient. *See* dkt. no. 143, n. 16

[19] Those claims lack merit in any event. Giampolo *admitted* that he ceased treating indigent patients in his office, Giampolo dep. 82, making any statement to that effect true and nondefamatory as a matter of law. *See Badami v. Dimson, 226 Pa. Super. 75, 310 A.2d 298, 299-300 (Pa. Super. 1973)*. At his deposition, Giampolo further identified alleged defamatory remarks made by Doctors Nair and Trenton. These remarks, however, expressed professional differences of opinion regarding patient treatment and hospital policy. They did not imply that Giampolo was not a competent physician, but only that these defendants had different philosophies regarding what type of information should appear on a neurologist's medical report, what procedures were

[*51] What Giampolo's response does assert is that Dr. deVries defamed him in a single letter dated January 11, 1994. This correspondence, addressed to Giampolo but copied to Drs. Trenton and Brennan as well as the patient's chart, expressed dismay that Giampolo first was unavailable to see an indigent patient in the hospital, then essentially refused to see the patient at his office because he could not pay the examination fee. Dkt. no. 143, exh. 17. Three days later, Dr. deVries apologized to Giampolo in another letter copied to the same recipients. Dr. deVries admitted that Giampolo had in fact seen the patient in the hospital, although the patient declined to make a follow-up office appointment for financial reasons. *Id.* exh. 18.

HN19[] To sustain a cause of action for defamation, plaintiff must prove: "(1) the defamatory character of the communication; (2) publication by the defendant; (3) its application to the plaintiff; (4) understanding by the recipient of its defamatory meaning; (5) understanding by the recipient of it as intended to be applied to the plaintiff; and (7) abuse of a conditionally privileged occasion." *Maier v. Maretti, 448 Pa. Super. 276, 671 A.2d 701, 704 (Pa.* ***[*52]*** *Super. 1995)*. Here, defendant argues that the first letter is not actionable because it was made subject to a conditional privilege, specifically Dr. deVries legitimate professional concern about a matter of patient care. Dkt. no. 116, at 65; *see* *Miketic v. Baron, 450 Pa. Super. 91, 675 A.2d 324, 329 (Pa. Super. 1996)* (conditional privilege exists when some legitimate interest of the defendant, the recipient or the public is involved).

Giampolo does not dispute the applicability of the conditional privilege, but argues instead that it was lost because deVries abused it. Dkt. no. 142, at 48. As Giampolo puts it, "Dr. deVries had no privilege to publicize statements about Dr. Giampolo that had no basis in fact and could only harm his reputation as a physician. Regardless of whether Dr. deVries is entitled to claim any privilege, the question of his abuse of privilege is a question of fact for the jury." *Id.*

HN20[] The conditionally privileged nature of a statement may be lost if the plaintiff proves that it has been abused. *42 Pa. C.S.A § 8343(7)* (burden is on plaintiff); *Miketic, 675 A.2d at 329*; *see Agriss v. Roadway Express, Inc., 334 Pa. Super. 295, 483 A.2d 456, 463* ***[*53]*** *(Pa. Super. 1984)* (absolute privilege may be lost if publisher exceeds its scope). Whether or not the privilege has been abused is an issue of fact. *Agriss, 483 A.2d at 463*. Abuse occurs when

> the publication is actuated by malice or negligence, is made for a purpose other than that for which the privilege is given, or to a person not reasonably believed to be necessary for the accomplishment of the purpose of the privilege, or includes defamatory matter not reasonably believed to be necessary for the accomplishment of the privilege.

Miketic, 675 A.2d at 329 (quoting *Beckman v. Dunn, 276 Pa. Super. 527, 419 A.2d 583, 588 (Pa.Super. 1980)* (citations omitted)).

Here, Giampolo argues only that the statements were (1) false and (2) damaging, but fails to address any of the indicia of abuse set forth in *Miketic*. In other words, he asserts that because the letter contained incorrect and unfavorable information about him, its publisher must have abused the conditional privilege. This conclusory argument, if accepted, would essentially reduce the doctrine of conditional privilege to nought, because the gravamen of *every* defamation claim is the publication **[*54]** of damaging falsehoods. In the absence of any evidence that the conditional privilege was abused, I will dismiss Giampolo's defamation claims with prejudice.

VII. RULE 11 SANCTIONS

All defendants have filed motions for sanctions under *Fed. R. Civ. P. 11*, arguing that the factual basis for this lawsuit was virtually nonexistent, that a proper investigation would have revealed this deficiency and that plaintiff's

---

appropriate to perform at Somerset Hospital, and whether certain patients actually suffered from the conditions that Giampolo diagnosed. As statements of opinion, they were not defamatory as a matter of law. *See* *Parano v. O'Connor, 433 Pa. Super. 570, 641 A.2d 607, 609 (Pa. Super. 1994)*; *Gordon v. Lancaster Osteopathic Hosp., 340 Pa. Super. 253, 489 A.2d 1364, 1369 (Pa. Super. 1985)*.

counsel failed to undertake an adequate investigation, or, alternatively, failed to dismiss the claims after discovery showed them to be baseless. ***HN21***[] *Rule 11 (b)* provides, in pertinent part:

> By presenting to the court (whether by signing, filing, submitting or later advocating) a pleading, written motion, or other paper, an attorney or unrepresented party is certifying that to the best of the person's knowledge, information, and belief, formed after an inquiry reasonable under the circumstances,--… (3) the allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery[.]

HN22[] Under *Rule 11*, "the court determines **[*55]** the reasonableness of an inquiry by applying an objective standard." *Garr v. U.S. Healthcare, Inc., 22 F.3d 1274, 1278*. The court, however, must "avoid drawing on the wisdom of hindsight" by finding a claim frivolous merely because the plaintiff ultimately did not prevail. *Id. at 1279*. Here, I decline to find Giampolo's antitrust, contract or tortious interference claims frivolous. Although none of those claims survives summary judgment, the factual record Giampolo adduced was sufficient to raise substantial legal issues which required careful consideration and analysis of both plaintiffs and defendants arguments.

Giampolo's defamation claims stand on a different footing, however. Although he sued every defendant for defamation, Giampolo utterly failed at his deposition to come up with any reasonably coherent theory of how he was defamed, and by whom. What little he did present out of his own mouth consisted of professional disagreements which were nondefamatory expressions of opinion, statements that were protected by privilege, or truthful statements to the effect that he refused to see indigent patients in his office. None of these were even remotely actionable, as should **[*56]** have been obvious from a very early stage of this litigation. Significantly, Giampolo does not even attempt to argue in his brief in opposition to summary judgment that he was defamed by any of these individuals, although he does not explicitly concede the claims, either. Yet he never dismissed his defamation claims against these defendants, despite their warnings that they intended to file *Rule 11* motions.

I recognize that it may have been consistent with current legal practice to name as defendants in an initial complaint parties against whom Giampolo then had no evidence. Nevertheless, when it became apparent that no defamatory statements were made by any of them, it was incumbent on Giampolo to acknowledge that fact and cease pursuing these claims against them:

> ***HN23***[] [A] litigant's obligations . . . are not measured solely as of the time they are filed or submitted to the court, but include reaffirming to the court and advocating positions contained in [the] pleadings and motions after learning that they cease to have any merit. . . . Moreover, if evidentiary support is not obtained after a reasonable opportunity for further investigation or discovery, the party has a duty **[*57]** under the rule not to persist with that contention. [This rule] does not require a formal amendment to pleadings for which evidentiary support is not obtained, but rather calls upon a litigant not thereafter to advocate such claims or defenses.

Fed. R. Civ. P. 11, Advisory Committee Notes, 1993 Amendments.

In *Zuk v. EPPI of the Med. Coll. of Pennsylvania, 103 F.3d 294*, plaintiff's counsel failed to conduct an adequate factual investigation into the time period during which defendant was renting out plaintiff's films. *Id. at 298*. Had a proper investigation been undertaken, it would have quickly revealed that none of the allegedly illegal rentals took place within the statute of limitations. *Id.* Nevertheless, plaintiff advocated his claims all the way to resolution on their merits. The court held that, under these circumstances, the lack of a sufficient investigation by counsel was sanctionable under *Rule 11*. *Id.*

The conduct in the case at bar falls very close to being sanctionable. Rather than dismiss the claims against these four defendants when it became evident they had not defamed Giampolo, plaintiff took no action whatsoever. Thus, Messrs. Eddy and Farrell, **[*58]** as well as Drs. Nair and Trenton, were forced to endure the financial costs and psychological stress of defending claims that never had merit. Nevertheless, Giampolo did not affirmatively continue to advocate his defamation case against them in arguments to this court. Accordingly, his tactics, however questionable, appear not to fall directly within *Rule 11*'s ambit. I will therefore deny defendants' motions for *Rule 11* sanctions.

VIII. CONCLUSION

For the reasons discussed *supra*, I will grant all defendants' motions for summary judgment in their entirety, dismiss Giampolo's complaint with prejudice, and deny all defendants' motions for sanctions. An appropriate order follows.

ORDER

AND NOW, this 29th day of May 1998, upon consideration of the defendants' motions for summary judgment, dkt. nos. 115, 126, 135, plaintiff's motion to strike supplemental exhibit, dkt. no. 157, plaintiff's motion to supplement the record, dkt. no. 159, defendants' motions for sanctions, dkt. nos. 113, 124, 131, 137, and the arguments relative thereto, it is hereby ORDERED and DIRECTED that:

1. the motion of the Hospital Defendants for summary judgment, dkt. no. 115, is GRANTED;

[*59] 2. the motion of the Eddy Defendants for summary judgment, dkt. no. 126, is GRANTED;

3. the motion of Dr. Louis Catalano for summary judgment, dkt. no. 135, is GRANTED;

4. plaintiff's complaint is DISMISSED WITH PREJUDICE;

5. plaintiff's motion to strike supplemental exhibit, dkt. no. 157, is DENIED;

6. plaintiff's motion to supplement the record, dkt. no. 159, is DENIED;

7. the hospital defendants' motion for discovery sanctions, dkt. no. 131, is DENIED AS MOOT;

8. defendants' motions for *Rule 11* sanctions, dkt.nos. 113, 124, 137, are DENIED; and

9. the Clerk of Court shall mark the above-captioned case CLOSED.

BY THE COURT,

D. Brooks Smith

United States District Judge

Porous Media Corp. v. Pall Corp.

United States District Court for the District of Minnesota, Fourth Division

June 3, 1998, Decided

Civ. No. 97-880 (ADM/AJB); Civ. No. 97-2084 (ADM/AJB)

Opinion

MEMORANDUM OPINION AND ORDER

INTRODUCTION

The above-entitled matters came on for hearing on March 23, 1998, pursuant to Defendant's motion for judgment on the pleadings in one action (Civ. No. 97-880) and Plaintiff's motion for recusal, Defendant's motion to dismiss, and Defendant's motion for sanctions in another, related action (Civ. No. 97-2084). Because the cases are related, the Court will address all of the motions in this combined Order.

BACKGROUND

The parties are both manufacturers of industrial filters for use in various industries including the oil and gas markets, the paper and power markets, and certain applications in **[*2]** the medical market. The parties have a long history of rancorous conflict including at least five lawsuits since 1990. In 1990, Plaintiff Porous Media Corporation ("Porous") initiated a lawsuit *(Porous I)* against Defendant Pall Corporation ("Pall") alleging, *inter alia,* violation of the Lanham Act, *15 U.S.C. § 1125(a)*. Pall subsequently filed counterclaims against Porous alleging trade dress and trademark infringement. In 1995, *Porous I* resulted in a jury verdict in favor of Porous and against Pall on each of its counterclaims. In one of the instant cases, (Civ. No. 97-880), [1] Porous alleges that Pall engaged in malicious prosecution by asserting those counterclaims.

In a second lawsuit, *Porous II,* Porous obtained a jury verdict against Pall in 1997. As **[*3]** in *Porous I,* Pall asserted counterclaims against Porous and lost on the counterclaims at trial. Porous now alleges that Pall's assertion of the counterclaims in *Porous II* constituted malicious prosecution. Porous' second malicious prosecution claim, which arose from *Porous II,* prompted Pall's motion to dismiss in the other case at hand, (Civ. No. 97-2084).

In relation to the two pending cases, Civ. No. 97-880 and Civ. No. 97-2084; Porous filed a motion seeking recusal of the undersigned United States District Judge. For reasons stated on the record, the Court denied this motion. In response to Porous' motion for recusal, Pall filed a motion for Rule 11 sanctions.

DISCUSSION

I. Standard for Judgment on the Pleadings

Rule 12(c) of the Federal Rules of Civil Procedure provides, "After the pleadings are closed but within such time as not to delay the trial, any party may move for judgment on the pleadings." *Fed. R. Civ. P. 12(c)*: Judgment on the pleadings is proper "if the moving party clearly establishes that there are no material issues of fact and that he is entitled to judgment as a matter of law." *Lion Oil Co., Inc. v. Tosco Corp., 90 F.3d 268, 270 (8th Cir. 1996)* (citing *National Car Rental Sys., Inc. v. Computer Assocs. Int'l, Inc., 991 F.2d 426, 428 (8th Cir.)*, **[*4]** cert. denied, *510 U.S. 861, 114 S. Ct. 176, 126 L. Ed. 2d 136 (1993))*. In analyzing the pleadings under this standard, a court must accept as true all facts pled by the non-moving party and draw all reasonable inferences in favor of that party. Id.

On a motion for judgment on the pleadings, a court generally must not examine extra-pleading material submitted by the parties unless the material is referred to in the Complaint or "necessarily embraced by the pleadings." *Piper Jaffray Companies, Inc. v. National Union Fire Ins. Co. of Pittsburgh, P.A., 967 F.Supp. 1148, 1152 (D.Minn. 1997)*; *Vizenor v. Babbitt, 927 F. Supp. 1193, 1197 (D.Minn. 1996)*. In the instant case, the Court may therefore consider extra-pleading material which is necessarily embraced by the pleadings such as transcripts of the underlying proceedings and other matters of public record.

II. Malicious Prosecution -- *Porous I*

Porous' Complaint alleges that "Pall's counterclaims . . . were all made without probable cause, and were made maliciously and as a sham, in order to injure Porous and benefit Pall in its trade war that it has conducted against Porous through unfair competition and through sham litigation." To state a claim for malicious **[*5]** prosecution, a

[1] Although Defendant refers to one of the instant cases, Civ. No. 97-880, as *Porous IV,* Plaintiff appears to refer to Civ. No. 97-880 as *Porous III.* Plaintiff adds to the confusion by referring to *Porous III* as Civ. No. 97-800. Similarly, Defendant refers to Civ. No. 97-2084 as *Porous V,* and Plaintiff refers to that case as *Porous IV.* To avoid further confusion, the Court will refer to the pending cases by the appropriate docket number.

plaintiff must satisfy the following three elements: (1) the suit must be brought without probable cause and with no reasonable ground on which to base a belief that the plaintiff would ultimately prevail on the merits; (2) the suit must be instituted and prosecuted with malicious intent; and (3) the suit must ultimately terminate in favor of the defendant. *First Nat'l Bank of Omaha v. Marquette Nat'l Bank of Minneapolis, 482 F.Supp. 514, 522-23 (D.Minn. 1979)*.

The *first amendment* protects the right to bring suit in state and federal courts, and the act of filing a lawsuit is generally immune from tort liability, under the Noerr-Pennington doctrine. *Surgidev Corp. v. Eye Technology, Inc., 625 F.Supp. 800, 803 (D.Minn. 1986)* (citing *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S.Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S.Ct. 1585, 14 L. Ed. 2d 626 (1965))*. Although it originated in the context of ***antitrust law***, courts have often extended the Noerr-Pennington doctrine to other substantive areas such as torts in a business context. See e.g., *Hufsmith v. Weaver, 817 F.2d 455, 458 (8th Cir. 1987)* ("Although the Supreme **[*6]** Court has never decided whether the Noerr-Pennington doctrine is applicable outside the antitrust area, . . . this court has long indicated that the doctrine may be so extended").

The one well-recognized exception to the Noerr-Pennington doctrine of immunity is for "sham" litigation. In characterizing the "sham" exception, the Eighth Circuit Court of Appeals observed, "It is only where a defendant's resort to the courts is accompanied or characterized by illegal and reprehensible practices such as perjury, fraud, conspiracy with or bribery of government decision makers, or misrepresentation, or is so clearly baseless as to amount to an abuse of process, that the Noerr-Pennington cloak of immunity provides no protection." *Razorback Ready Mix Concrete Co., Inc. v. Weaver, 761 F.2d 484, 487 (8th Cir. 1985)*. More recently the Supreme Court has articulated a two-part test for the sham exception to the Noerr-Pennington doctrine. The sham exception requires proof that the underlying lawsuit is: (1) "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits;" and (2) subjectively motivated by bad faith. **[*7]** *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 113 S.Ct. 1920, 1928-29, 123 L. Ed. 2d 611 (1993)* (addressing Noerr-Pennington immunity in the antitrust context). A court may not examine the subjective motivation of the litigant unless it first concludes that the relevant claims are objectively baseless. Id.

Pall filed counterclaims in *Porous I* alleging trade dress and trademark infringement. Porous moved for a directed verdict at the end of the case-in-chief. Boyd Aff., Ex. A. After hearing counsel's arguments in favor of a directed verdict on the counterclaims, Judge Davis denied the motion but invited counsel to renew the motion at the conclusion of the case. Counsel for Porous failed to renew the motion at the end of the trial, and the case was submitted to the jury. The jury awarded Porous $ 7 million in compensatory damages, and Pall lost on each of its counterclaims.

Rule 50 (a) of the Federal Rules of Civil Procedure provides, "If during a trial by jury a party has been fully heard on an issue and there is no legally sufficient evidentiary basis for a reasonable jury to find for that party on that issue, the court may determine the issue against that party and may grant a motion for judgment as a matter of law." *Fed. R. Civ. P. 50(a)*. In denying **[*8]** Porous' *Rule 50(a)* motion for judgment as a matter of law, Judge Davis implicitly determined that there was a "legally sufficient evidentiary basis for a reasonable jury to find for [Pall] on [its counterclaims]." Id. Porous subsequently failed to renew its motion. In light of Judge Davis' denial of its motion for judgment as a matter of law, Porous' allegation that the counterclaims were "objectively baseless" is without merit. [2] If the claims were "objectively baseless," Judge Davis would have granted Porous' motion for judgment as a matter of law.

Moreover, even if the Noerr-Pennington doctrine did not apply to the instant case, Pall's motion for judgment on the pleadings would be granted. **[*9]** Porous cannot, as a matter of law, establish that Pall lacked probable cause in

---

[2] Porous also argues that Judge Davis' denial of Pall's post trial motions indicates that the counterclaims were baseless. The mere fact that Judge Davis found there was insufficient evidence to grant Pall's post-trial *Rule 50(a)* motions, does not suggest that the counterclaims were meritless and should not have been brought. As Pall argues, however, Judge Davis' denial of Porous' motion for judgment as a matter of law does indicate that there was sufficient evidence for those claims to go to the jury.

asserting its counterclaims. Because the absence of probable cause is an essential element of a malicious prosecution claim, Pall's motion for judgment on the pleadings will be granted.

Where there is no factual dispute involving the underlying legal proceeding, the issue of probable cause is a matter of law for the court to decide. *First Nat'l Bank of Omaha, 482 F.Supp. at 522* (citing *Eastman v. Leiser Co., 148 Minn. 96, 181 N.W. 109 (1921))*. Probable cause consists of "such facts and circumstances as will warrant a cautious, reasonable and prudent person in the honest belief that his action and the means taken in prosecution of it are just, legal and proper." Id. (citation omitted). The Supreme Court has more recently articulated the standard for probable cause in the context of civil proceedings: "Probable cause to institute civil proceedings requires no more than a 'reasonabl[e] belie[f] that there is a chance that [a] claim may be held valid upon adjudication.'" *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 62-63, 113 S. Ct. 1920, 1929, 123 L. Ed. 2d 611 (1993)* (internal citations **[*10]** omitted).

In the instant case, Pall had a reasonable belief that there was a chance that its claims would be validated at trial. Indeed, in denying Porous' motion for judgment as a matter of law on Pall's counterclaims, Judge Davis indicated that there was sufficient evidence to allow the claim to go to the factfinder. In so doing, Judge Davis reaffirmed that Pall had a reasonable belief that it might succeed on those claims. Porous cites several cases in support of the proposition that a directed verdict motion is irrelevant to the determination of probable cause. The cases cited by Porous, however, are distinguishable from the instant case. [3] In *Bredehorst v. Robson Fuel Co., 195 Minn. 595, 263 N.W. 609 (Minn. 1935)*, for example, the court held that "the termination of the case [by directed verdict] in plaintiff's favor does not make but a prima facie case of want of probable cause." *Id. at 609*. This conclusion is quite different from the one advocated by Pall; Pall contends that because it presented sufficient evidence to defeat Porous' motion for a directed verdict, there can be no conclusion that Pall lacked a reasonable belief in a chance of success at trial. This Court agrees. As such, Pall's **[*11]** motion for judgment on the pleadings will be granted.

III. Malicious Prosecution -- *Porous II*

In the second of the two instant cases (Civ. No. 97-2084), Porous also alleges that the counterclaims asserted by Pall in *Porous II* (Civ. No. 4-95-740) constitute malicious prosecution. Porous contends that Pall's counterclaims in *Porous II* were asserted "without probable cause and were made maliciously and as a sham . . . ." Porous also alleges that the press releases issued by Pall after the *Porous II* verdict violate the Lanham Act, *15 U.S.C. § 1125(a)*, and the Minnesota Deceptive Trade Practices Act ("MDTPA"), *Minn. Stat. § 325D.44, et seq.* The jury in *Porous II* returned a verdict in favor of Porous on its claims of libel and violations of the Lanham Act and awarded Porous $ 1.72 million in damages. Pall voluntarily dismissed its trademark infringement counterclaim for tactical reasons prior to submission to the jury, and the jury rejected Pall's counterclaim for trade dress infringement.

This Court addressed **[*12]** the sufficiency of Pall's counterclaims for trademark and trade dress infringement in its January 31, 1997 Order. The Court held that "[g]enuine issues of fact regarding a likelihood of confusion preclude summary judgment on Pall's trademark and trade dress claims." Memorandum Opinion and Order, January 31, 1997, at 22. Although Pall withdrew its trademark infringement claim, this Court also denied Porous' motion for a directed verdict on Pall's trade dress infringement claim.

While continuing to fight an acrimonious court battle, the parties engaged in a media fracas in the summer of 1997. On July 30, 1997, prior to entry of judgment in *Porous II,* Porous fired the first volley by issuing a press release alleging that certain divisions within Pall "did not tell the truth about Porous and the performance of its products." Pall responded in a press release issued on August 1, 1997, in which Pall asserted that: "the jury rejected the vast majority of Porous Media's claims;" "[t]he jury completely absolved Pall of disparaging Porous Media's products;" and the Swalgen letter was sent "without any involvement of Pall management or Pall's SLS Laboratory." Porous, in turn, purchased a half-page **[*13]** advertisement in the *Wall Street Journal* on August 18, 1997, in an effort to counter Pall's assertions. Two days later, Pall issued another press release responding to Porous' paid advertisement. This August 20, 1997, press release stated, *inter alia,* that "the jury in *Porous I* was prevented from

---

[3] Among the cases cited by Porous, one case involves Rule 11 sanctions, which makes it distinguishable from the case at hand. Other cases involve lower court opinions in other jurisdictions.

seeing data and testimony for procedural reasons;" and that Porous' continued litigation against Pall was "an abomination."

Porous' Complaint alleges that Pall's *Porous II* counterclaims constitute malicious prosecution and that Pall's August 1, 1997 press release and its August 20, 1997 press release violated the Lanham Act and the Minnesota Deceptive Trade Practices Act. Pall now seeks dismissal of these claims under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief may be granted.

IV. Standard for a *Rule 12(b)(6)* Motion to Dismiss

In considering a motion to dismiss, the pleadings are construed in a light most favorable to the nonmovant, and the facts alleged in the complaint must be taken as true. *Hamm v. Groose, 15 F.3d 110, 112 (8th Cir. 1994)*; *Ossman v. Diana Corp., 825 F.Supp. 870, 879-80 (D. Minn. 1993)*. Any ambiguities concerning the sufficiency of **[*14]** the claims must be resolved in favor of the nonmovant. *Ossman, 825 F.Supp. at 880*. A complaint should be dismissed "only if it is clear that no relief can be granted under any set of facts that could be proved consistent with the allegations." *Frey v. City of Herculaneum, 44 F.3d 667, 671 (8th Cir. 1995)* (citations omitted); *Hafley v. Lohman, 90 F.3d 264, 266 (8th Cir. 1996)*. "A motion to dismiss should be granted as a practical matter . . . only in the unusual case in which the nonmovant includes allegations that show on the face of the complaint that there is some insuperable bar to relief." *Frey, 44 F.3d at 671*.

V. Porous' Claim for Malicious Prosecution

In its January 31, 1997 Order, this Court held that Pall's counterclaims were sufficiently viable to survive Porous' motion for summary judgment. The Court held that genuine issues of material fact remained to be determined at trial. Implicit in such a ruling is the determination that the claims are not "objectively baseless" or "without probable cause." Based upon the analysis articulated above in connection with the counterclaims in *Porous I* and the case law cited therein, this Court finds, as a matter of law, that Porous cannot **[*15]** satisfy an essential element of its malicious prosecution claim. As such, that claim is dismissed with prejudice.

VI. Press Releases

Porous alleges that Pall's press releases violated the Lanham Act and the MDTPA. Pall counters that the Noerr-Pennington doctrine immunizes not only Pall's counterclaims in *Porous II* but also Pall's press releases. In support of this proposition, Pall cites *Coastal States Marketing, Inc. v. Hunt, 694 F.2d 1358 (5th Cir. 1983)*, in which the Fifth Circuit Court of Appeals stated: "Given that petitioning immunity protects joint litigation, it would be absurd to hold that it does not protect those acts reasonably and normally attendant upon effective litigation. The litigator should not be protected only when he strikes without warning." *Id. at 1367*. Coastal States Marketing involved an antitrust action initiated against former Libyan oil concession owners and counterclaims for conversion of oil asserted by the owners. The court held that the former Libyan oil concession owners' publicity and threats of litigation concerning title to the oil were protected under the Noerr-Pennington doctrine. The activity in question included a "well-publicized threat to litigate **[*16]** wherever and whenever necessary to assert their claim to [oil]. . . ." Id. For example, one notice, which was sent to hundreds of crude oil users, explained that the author of the notice owned legal title to the oil and would assert his legal rights against "those who would infringe them." *Id. at 1360 n.6*. The "worldwide campaign" was intended to prevent infringement of property rights and was directly related to potential litigation which would stem from such infringement.

In contrast, the instant case involves two press releases that were designed to impact public perceptions about the outcome of the litigation. Although the content of the press releases focused on litigation between the parties, the intent of the press releases was not to provide notice of potential litigation. The releases were superfluous and do not constitute acts "reasonably and normally attendant upon effective litigation." See *Id. at 1367*.

Similarly, Pall cites Supervalu, Inc. v. Stowe, Civ. No. 3-93-55, Slip Op. at 6-7 (D.Minn. May 6, 1994), in support of the proposition that Noerr-Pennington immunity should extend to Pall's press releases. In Supervalu, the plaintiff's attorney wrote a letter to the owner **[*17]** of several grocery stores threatening that "Supervalu would sue to enforce its contractual rights unless the parties resolved the dispute within two weeks." Id. at 3. The court held that the pre-litigation "threatening" letters were "reasonably and normally attendant upon effective litigation" and, as such, were protected under Noerr-Pennington. The press releases in this case, however, cannot be characterized as providing any notice or performing any function that is "reasonably and normally attendant upon effective litigation." Accordingly, the Noerr-Pennington doctrine provides no protection for Pall's press releases.

Pall contends that the Court must nevertheless dismiss Porous' Lanham Act claim because the press releases are outside the purview of the Lanham Act. The Lanham Act provides:

> (1) Any person who, on or in connection with any goods or services, uses in commerce any . . . false or misleading description of fact, or false or misleading representation of fact, which --
>
> * * *
>
> (b) In commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities
>
> shall be **[*18]** liable in a civil action by any person who believes that he or she is likely to be damaged by such act.

15 U.S.C. § 1125(a). Pall contends that the press releases were not issued "in connection with any goods or services" and do not constitute "commercial advertising or promotion." Although the press releases do not overtly mention Porous' or Pall's products, they were issued "in connection with" the goods or products produced by these companies. The connection between the press releases and the competitive products of Porous and Pall is palpable.

The question whether the press releases amount to "commercial advertising or promotion" requires closer examination. The terms "advertising" and "promotion" are not defined in the Act, and the legislative history offers little guidance on this issue. *Seven-Up Co. v. Coca-Cola Co., 86 F.3d 1379, 1383 (5th Cir. 1996)*. Pall relies on *Gordon and Breach Science Publishers v. American Institute of Physics, 859 F.Supp. 1521 (S.D.N.Y. 1994)*, in support of the proposition that the press releases do not constitute commercial advertising or promotion. In Gordon and Breach, the court concluded that an article in a journal operated by the non-profit defendant **[*19]** that disparaged the journal operated by the for-profit plaintiff was not commercial advertising or promotion. Id. The court expressly limited its holding, however, stating "we do not consider whether we would reach a different result if the articles in question were authored by a commercial entity . . . or if they were published in the trade journal of a commercial enterprise or industry." Id; at 1542. In the instant case, the press releases were issued by a commercial entity engaged in vigorous competition with the subject entity. Neither party purports to offer controlling authority in this circuit that specifically addresses this issue.

Most courts that have examined the issue have concluded that the Act's reach is broader than the "classic advertising campaign" and have identified the following four factors to be considered in determining whether a communication constitutes "commercial advertising or promotion:" (1) the representations must be commercial speech; (2) they must be made by a defendant who is in commercial competition with the plaintiff; (3) they must be made for the purpose of influencing consumers to buy defendant's goods or services; and (4) they must be disseminated **[*20]** sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry. See e.g., *Gordon and Breach Science Publishers, 859 F.Supp. at 1534-36*; *Medical Graphics Corp. v. Sensormedics Corp., 872 F.Supp. 643, 650 (D.Minn. 1994)*; *Seven-Up Co., 86 F.3d at 1384*.

The Supreme Court has recognized "the difficulty of drawing bright lines that will clearly cabin commercial speech in a distinct category." *City of Cincinnati v. Discovery Network, Inc., 507 U.S. 410, 417, 113 S. Ct. 1505, 1511, 123 L. Ed. 2d 99 (1993)*. At a minimum, commercial speech is speech "proposing a commercial transaction." *Virginia State Bd. of Pharmacy v. Virginia Citizens Consumer Council, Inc., 425 U.S. 748, 760, 96 S.Ct. 1817, 1825, 48 L. Ed. 2d 346 (1976)*. In *Bolger v. Youngs Drug Prods. Corp., 463 U.S. 60, 103 S.Ct. 2875, 77 L. Ed. 2d 469 (1983)*, however, the Court recognized that such a rigid definition is often too narrow to embrace the entire universe of "commercial speech." Id. (articulating a more fluid definition of commercial speech that takes into account, *inter alia,* the motive behind the speech); see also *Central Hudson Gas & Elec. Corp. v. Public Serv. Comm'n, 447 U.S. 557, 561, 100 S. Ct. 2343, 2348, 65 L. Ed. 2d 341 (1980)* (defining commercial **[*21]** speech as "expression solely related to the economic interests of the speaker and its audience"). Pall's motive in issuing the press releases may have been, in part, to influence the public's perception about the outcome of litigation, but this perception is inextricably linked to Pall's business reputation and, concomitantly, its ability to sell its products. Accordingly, the press releases fall within the category of commercial speech.

Under the four factor test articulated in *Gordon and Breach*, however, the representations must be disseminated sufficiently to the relevant purchasing public to constitute "advertising" or "promotion" within that industry. Examination of the scope of the press releases, however, would require this Court to look beyond the pleadings and could involve disputed factual issues. The inquiry is more appropriate on a motion for summary judgment. Similarly, Pall asks this Court to determine, on its motion to dismiss, whether the relevant statements are nonactionable statements of opinion or are indisputably true. Because the Court may be required to determine whether the statements are true, false, or misleading, the question is more appropriately discussed **[*22]** in the summary judgment context. Accordingly, Pall's motion to dismiss the Lanham Act and MDTPA [4] claims will be denied.

VII. Pall's Motion for Sanctions

Pall requests that the Court impose Rule 11 sanctions on Porous for asserting a motion for recusal. Pall contends, and this Court agrees, that the recusal motion was a baseless, improper attempt to manipulate the judicial process. After a careful review of *Rule 11*, the affidavit detailing fees charged by Pall's counsel, and the relevant case law, this Court concludes that sanctions are appropriate. Accordingly, Porous and attorney Alfred Edwall are hereby ordered to pay Pall's costs and attorney's fees in connection with their efforts to defend the recusal motion and assert the motion for sanctions.

CONCLUSION

Based on the foregoing, and all of the files, records and proceedings herein **IT IS HEREBY ORDERED** that:

1. Defendant's motion for judgment on the **[*23]** pleadings in Civ. No. 97-880 is **GRANTED;**

2. Defendant's motion to dismiss in Civ. No. 97-2084 is **GRANTED IN PART AND DENIED IN PART.** Defendant's motion to dismiss is granted as to Plaintiff's malicious prosecution claim but denied as to the Lanham Act and MDTPA claims.

3. Plaintiff's motion for recusal is **DENIED;**

4. Defendant's motion for Rule 11 sanctions is **GRANTED.** Porous and attorney Edwall are required to pay $ 10,167.00 for fees incurred in responding to Porous' recusal motion and $ 3,570.00 in fees for filing the related motion for sanctions.

LET JUDGMENT BE ENTERED ACCORDINGLY IN CIV. NO. 97-880.

HN2[] **Standing, Clayton Act**

Section 4 of the Clayton Act, specifically *15 U.S.C.S. § 15*, grants a private cause of action for damages to any person injured in business or property by reason of anything forbidden in the antitrust laws. An injured person may sue and recover treble damages and the costs of the suit, including reasonable attorney's fees. Notwithstanding the broad language of the statute, however, Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. The idea that any person whose injury was causally related to an antitrust violation has standing is incorrect; indeed, only certain classes of plaintiffs may arrogate to themselves the enforcement powers once reserved for the Attorney General.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3[] **Clayton Act, Claims**

Plaintiffs bringing suit under the Clayton Act must meet certain standing requirements, including: (1) the causal connection between the alleged antitrust violation and harm to the plaintiff; (2) an improper motive; (3) the nature of the plaintiffs alleged injury and whether the injury was of a type that Congress sought to redress with the antitrust laws (antitrust injury); (4) the directness with which the alleged market restraint caused the asserted injury; (5) the speculative nature of the damages, and (6) the risk of duplicative recovery and complex apportionment of damages. There is also a streamlined three-part standing inquiry focused on i) antitrust injury, ii) the directness of injury and causal nexus, and iii) the speculative nature of damages, duplicative recovery and complex apportionment of damages.

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN4[] **Regulated Practices, Private Actions**

In order to prevail under the Sherman Act, a plaintiff must show actual injury, "caused" by the antitrust violation. Simply asserting a place on the chain of causation, or losses owing to a merger, is not enough; the plaintiff's injury must amount to a restraint on trade in the relevant market. In other words, a plaintiff must prove he or she is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry and be the target against which anticompetitive activity is directed.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Regulated Practices, Private Actions**

There is a pecking order of plaintiffs under the Sherman Act, favoring "competitors" and "consumers" as the preferred, though not exclusive, plaintiffs to allege antitrust injury.Cases brought by distributors, suppliers and commercial intermediaries are presumptively disfavored because such parties are held not to have suffered directly because of the lessening of competition.

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

Clearly lacking antitrust injury, and thus having no standing, is the firm whose injury is caused merely by the efficiency effects of a vertical merger. For example, once a firm has integrated vertically into distribution by acquiring one or more existing distributors, it may reduce costs by dealing only with its wholly-owned distributors. A distributor terminated for this reason might certainly suffer injury-in-fact, but it would not suffer antitrust injury as long as there were alternative sources of the product.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN7[] **Private Actions, Standing**

An intermediary distributor may only bring antitrust claims when it: i) is injured by the direct antitrust violation of a rival; ii) suffers directly as a result of illegal distribution restraints or, iii) qualifies as an exception.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN8[] **Private Actions, Standing**

The mere fact that a plaintiff's rivals merge to the detriment of a competitor does not alone grant the competitor standing. While a merger that actually causes prices to rise along a given distribution chain may occasionally confer standing on those in the chain, the distributor's injuries are usually secondary to those of customers, who have suffered directly from the threat posed by increased prices or reduced selection.

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > Remedies > General Overview

Business & Corporate Law > ... > Remedies > Equitable Relief > Injunctions

HN9[] **Distributorships & Franchises, Termination**

A distributor may have standing to sue a manufacturer in the context of illegal distribution restraints. Distribution restraints directly limit the freedom of dealers to choose their own resale prices, territories, or customers, and may involve forcing intermediaries to participate in illegal conduct. A dealer terminated for failing to comply with the illegal restraint has standing to seek an injunction against the restraint or damages. Within this category, only those distributors whose prices are actually restrained have standing to sue.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN10[] **Private Actions, Standing**

In certain circumstances, the elimination of an intermediary effectively destroys competition. In such cases, the distributor's knowledge or authority makes it an integral part of the competitive structure and its injury is heavily intertwined with the core injury perpetrated by antitrust violators. To deny standing to the intermediary is to sanction the diminution of competition where it matters the most.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Private Actions, Standing**

The private plaintiff must show that the injury is not unduly remote from the violation, or duplicative of injury suffered by another. The "remoteness" of one plaintiff suggests the existence of a "superior" plaintiff for whom the antitrust injury was more direct. The principle is simple: if the superior plaintiff has sued, additional suit by the remote plaintiff may be unnecessary, duplicative, or "excessive." If the "superior" plaintiff has not sued, one may doubt the existence of any antitrust violation at all. Even if a distributor would otherwise qualify as a plaintiff under an exception, it will be denied standing when and if a preferred plaintiff is available to enforce the principles behind the Sherman Act.

Opinion

[*148] ***MEMORANDUM AND ORDER***

June 10, 1998

I. ***INTRODUCTION***

Plaintiff Serpa Corporation ("Serpa") brings this action against defendant corporations McWane ("McWane"), Anaco ("Anaco") and Tyler ("Tyler") alleging antitrust violations and injury stemming from the consolidation of several piping companies. The complaint charges the defendants with: violations **[*149]** of *15 U.S.C. § 15*, *Section 7* of the Clayton Act (Count One); violations of Section Two of the Sherman Act (Count Two); tortious interference with business advantage (Count Three); breach **[**2]** of the implied covenant of good faith and fair dealing (Count Four); tortious interference with contracts (Count Five); violations of M.G.L. ch. 93A (Count Six); and, breach of contract (Count Seven). Defendants have moved this court to dismiss Counts One through Six. Defendants' motion to dismiss is **ALLOWED** as to Counts One and Two and **DENIED** as to counts Three, Four, Five and Six.

II. ***FACTS***

Serpa is a manufacturer's representative for plumbing supplies. Between 1976 and 1996, Serpa was the exclusive distributor for certain Anaco plumbing supplies in New England. Anaco is a manufacturer of cast iron soil pipes ("CISP") and stainless steel no-hub joints known as "Fittings" and "Couplings." In combination, the products are used to transport human waste from buildings to sewer lines. Sales of the products were once made through exclusive sales representative firms, like Serpa. Sales representatives then sold the products to plumbing supply wholesalers.

Defendant Tyler was a former competitor of Anaco's in the CISP, Couplings and Fittings business. As both parties have noted, CISP, Couplings and Fittings are made to industry specifications and are virtually **[**3]** identical across companies; building supply wholesalers therefore select the piping products almost entirely on the basis of price. Serpa sold Anaco Couplings and Fittings and used its position as a regional representative to offer discounts to wholesalers within guidelines set by Anaco.

Serpa's complaint alleges that between November 1995 and August 1996, McWane acquired both its competitor, Tyler, and its supplier, Anaco. [1] McWane subsequently placed the marketing of Anaco products under the management of Tyler; on October 30, 1996, Anaco terminated Serpa as its New England sales representative. The plaintiff now argues that by terminating Serpa, defendants eliminated price competition in the Couplings and Fittings market and positioned themselves to raise prices in violation of state and federal laws designed to ensure competitive pricing and fair business practices. Defendants respond by arguing that Serpa lacks standing to assert federal antitrust protection and that further, plaintiff's state law claims should fail because they pivot on the federal antitrust action.

[4] III. *MOTION TO DISMISS STANDARD***

HN1[] In considering a motion to dismiss, this Court must accept the well-pleaded factual averments and allegations of the non-moving party as true. *Fleming v. Lind-Waldock & Co., 922 F.2d 20, 23 (1st Cir. 1990)*. All reasonable inferences are made in favor of the non-moving party. *Washington Legal Foundation v. Massachusetts Bar Foundation, 993 F.2d 962, 971 (1st Cir. 1993)*.

IV. *ANTITRUST STANDING DISCUSSION*

HN2[] Section 4 of the Clayton Act, *15 U.S.C. § 15*, grants a private cause of action for damages to "any person . . . injured in business or property by reason of anything forbidden in the antitrust laws." An injured person may sue and recover treble damages and the costs of the suit, including reasonable attorney's fees. Notwithstanding the broad language of the statute, however, "the lower courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Hawaii v. Standard Oil Co. of California, 405 U.S. 251, 31 L. Ed. 2d 184, 92 S. Ct. 885 (1972)*. The Supreme Court has rejected **[**5]** the idea that any person whose injury was causally related to an antitrust violation has standing; indeed, only certain classes of plaintiffs may arrogate to themselves the enforcement powers once reserved for the Attorney General. *See* Julian O. von Kalinowski, *Antitrust Laws* **[*150]** *and Trade Regulation*, § 160.02, 2d ed., (1997).

HN3[] Plaintiffs bringing suit under the Clayton Act must meet the standing requirements announced in *Associated General Contractors of Cal., Inc. v. California State Council of Carpenters, 459 U.S. 519, 535 n.31, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* and *Sullivan v. Tagliabue, 25 F.3d 43, 45 (1st Cir. 1994)*. The enumerated requirements include: (1) the causal connection between the alleged antitrust violation and harm to the plaintiff; (2) an improper motive; (3) the nature of the plaintiffs alleged injury and whether the injury was of a type that Congress sought to redress with the antitrust laws ("antitrust injury"); (4) the directness with which the alleged market restraint caused the asserted injury; (5) the speculative nature of the damages, and (6) the risk of duplicative recovery and complex apportionment of damages. *Sullivan, 25 F.3d at* ***[**6]*** *46*, *citing* *Associated General, 459 U.S. at 537-45*. The *Associated General* factors were further defined in *Gallant v. BOC Group Inc., 886 F. Supp. 202 (D.Mass. 1995)* which adopted a streamlined three-part standing inquiry focused on i) antitrust injury, ii) the directness of injury and causal nexus, and iii) the speculative nature of damages, duplicative recovery and complex

[1] According to the defendants' answer, McWane is itself the majority shareholder of Ransom Industries, Inc. ("Ransom"). Tyler pipe is an unincorporated division of Ransom which owns certain assets of Tyler and 100% of the stock of Anaco.

apportionment of damages. [2] In this case, the plaintiff has failed to meet both the first and second factors, obviating the need to discuss the third prong of antitrust standing inquiry.

1. *Antitrust Injury*

HN4[] In order to prevail under the Sherman Act, a plaintiff must show actual injury, "caused" by the antitrust violation. Simply asserting a place on the chain of causation -- or losses owing to a merger -- is not enough; the plaintiff's injury must amount to a restraint on trade in the relevant market. "In other words, a plaintiff must prove **[**7]** he [or she] is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry and be the target against which anticompetitive activity is directed." *Florida Seed Company, Inc. v. Monsanto Company, 915 F. Supp. 1167 (M.D. Ala. 1995)* (internal citations omitted).

In addition, the case law indicates ***HN5***[] a pecking order of plaintiffs, favoring "competitors" and "consumers" as the preferred, though not exclusive, plaintiffs to allege antitrust injury. *See* *SAS of Puerto Rico, Inc. v. Puerto Rico Telephone Co., 48 F.3d 39, 45*. Cases brought by distributors, suppliers and commercial intermediaries (collectively referred to as "distributors") are presumptively disfavored because such parties are held not to have suffered directly because of the lessening of competition. *Id. at 44*. A leading treatise on the subject notes:

> ***HN6***[] Clearly lacking antitrust injury, and thus having no standing, is the firm whose injury is caused merely by the efficiency effects of a vertical merger. For example, once a firm has integrated vertically into distribution by acquiring one or more existing distributors, it may reduce costs by dealing **[**8]** only with its wholly-owned distributors. A distributor terminated for this reason might certainly suffer injury-in-fact, but it would not suffer antitrust injury as long as there were alternative sources of the product.

Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** 432-33 (1997 Supp.), *citing* *Alberta Gas Chems. V. E.I. Dupont, 826 F.2d 1235, 1244-1246 (3d Cir. 1987)*, *cert. denied*, *486 U.S. 1059, 100 L. Ed. 2d 930, 108 S. Ct. 2830 (1988)*; *Bayou Bottling v. Dr. Pepper, 543 F. Supp. 1255 (W.D. La. 1982)*, *aff'd*, *725 F.2d 300 (5th Cir. 1984)* (plaintiff soft drink distributor did not suffer antitrust injury when it was prevented from acquiring a franchise due to defendant distributor's acquisition of franchise from defendant manufacturer); *Florida Seed, 915 F. Supp. 1167* (plaintiff distributor of lawn and garden products did not have standing to sue manufacturer who acquired plaintiff's competitor and subsequently terminated plaintiff as distributor).

HN7[] An intermediary distributor may only bring antitrust claims when it: i) is injured by the direct antitrust violation of a rival; ii) suffers directly as a result of illegal distribution restraints or, **[**9]** iii) qualifies as an exception.

[*151] a. *Direct antitrust violation of a rival*

The paradigmatic case of distributor standing is that of a plaintiff-distributor who operates at the same level of production as the defendant and is injured by a boycott or discriminatory pricing program aimed at driving the plaintiff out of the market, such as a car dealer denied parts by a parent or co-dealer. *See generally,* *Jay Edwards Inc. v. New England Toyota Distributor, Inc., 708 F.2d 814 (1st Cir. 1983)*, *cert. denied*, *464 U.S. 894, 78 L. Ed. 2d 231, 104 S. Ct. 241 (1983)*. [3] **[**10]** ***HN8***[] The mere fact that a plaintiff's rivals merge to the detriment of a competitor does not alone grant the competitor standing. *Cargill v. Monfort of Colo., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. [4] **[**11]** While a merger that actually causes prices to rise along a given distribution

---

[2] The same tripartite analysis is applied in *Sullivan, 25 F.3d at 47-51*.

[3] In the automobile industry, such practices are regrettably so common that they have led to the Automobile Dealers' Day in Court Act, *15 U.S.C.A. § 1222*.

[4] As some commentators have remarked, however, "standing should generally be denied when the plaintiff does not operate at the same level as the defendant unless (i) their interests are very proximate, as demonstrated by the necessity of a market response by the plaintiff to the defendant's violation, (ii) the plaintiff is the injured party whose interest will most likely lead to a vindication of the public interest, and (iii) duplicative recoveries can be avoided." Phillip E. Areeda & Herbert Hovenkamp,

chain may occasionally confer standing on those in the chain, see infra section 1(c), the distributor's injuries are usually secondary to those of customers, who have suffered directly from the threat posed by increased prices or reduced selection. [5]

b. *Illegal Distribution Restraints*

HN9[] A distributor may also have standing to sue a manufacturer in the context of illegal distribution restraints. Distribution restraints directly limit the freedom of dealers to choose their own resale prices, territories, or customers, and may involve forcing intermediaries to participate in illegal conduct. A dealer terminated for failing to comply with the illegal restraint has standing to seek an injunction against the restraint or damages. *See Caribe BMW, Inc. v. BMW Aktiengesellschaft, 19 F.3d 745 (1st Cir. 1994)* (car retailer's lost profits resulting from a maximum price fixing agreement between the retailer and its supplier constituted antitrust injury and provided the retailer with the requisite standing). Significantly, **[**12]** within this category, only those distributors whose prices are actually restrained have standing to sue. [6]

c. *McCready*

A final exception to the bar against distributor standing may be available under *Blue* **[*152]** *Shield of Virginia v. McCready, 457 U.S.* ***[**13]*** *465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. There, a health plan subscriber who was denied psychotherapy benefits provided by psychologists sued her insurer alleging a conspiracy to restrain competition in the psychotherapy market. Prior to McCready's challenge, it was the policy of Blue Shield of Virginia to refuse reimbursement of psychotherapy services provided by a psychologist while covering similar services offered by psychiatrists and physicians. McCready claimed that she had "been the victim of a concerted refusal to pay on the part of Blue Shield, motivated by a desire to deprive psychologists of the patronage of Blue Shield subscribers." *McCready, 457 U.S. at 479*. The Court eschewed the defendant's claim that standing should be limited to psychologists, the targets of the alleged conspiracy. Instead, the Court held that the plaintiff had standing because denying reimbursement for the costs of the treatment was "the very means by which it is alleged that Blue Shield sought to achieve its illegal ends." *Id.*

Antitrust Law, (Volume II), P 360h(2), 207 (1995). *See e.g., Fischer v. NWA, Inc., 883 F.2d 594 (8th Cir. 1989)*, *cert. denied*, ***495 U.S. 947, 109 L. Ed. 2d 531, 110 S. Ct. 2205 (1990)*** (regional airline, which had an exclusive regional service agreement with a commercial airline, did not suffer antitrust injury when terminated because commercial airline acquired another airline and no longer needed regional airline's services); *Alberta Gas, 826 F.2d 1235*, (methanol producer had not suffered antitrust injury when a competitor acquired another corporation); *John Lenore v. Olympia Brewing Co., 550 F.2d 495 (9th Cir. 1977)* (beer distributor did not have standing to sue after the acquisition of one brewer by another, and the subsequent termination by the latter of the distributor; *G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762 (2d Cir. 1995)*, *cert. denied*, ***516 U.S. 944, 133 L. Ed. 2d 304, 116 S. Ct. 381 (1995)*** (plaintiff soft drink distributor did not suffer antitrust injury when its contract with bottler was terminated because bottler was driven out of business by defendant soft drink manufacturer).

[5] *See Brian Clewer v. Pan Am. World Airways, 674 F. Supp. 782 (C.D.Cal. 1986)*, aff'd ***811 F.2d 1507*** (9th Cir.), *cert. denied*, ***484 U.S. 925, 98 L. Ed. 2d 248, 108 S. Ct. 288 (1987)*** (where an airline was ruined by an alleged predatory pricing scheme, ticketing suppliers to the victim do not have standing to sue the predators).

[6] *See Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (denying standing to distributor that challenged a maximum resale price maintenance scheme that ARCO imposed on its dealers because the distributor was not a dealer whole prices were restrained). As the First Circuit recognized in *SAS*:

> . . . there are patterns in the antitrust standing cases that offer considerable guidance. In general, such a supplier (including an employee who supplies labor) is held not to have suffered "antitrust injury"; while there may be a violation and causal harm to the supplier, the failed business is the immediate victim and the preferred plaintiff. *SAS, 48 F.3d at 44* (internal citations omitted).

McCready recognized that ***HN10***[] in certain circumstances, the elimination of an intermediary effectively destroys competition. In such cases, the distributor's **[**14]** knowledge or authority makes it an integral part of the competitive structure and its injury is heavily intertwined with the core injury perpetrated by antitrust violators. To deny standing to the intermediary is to sanction the diminution of competition where it matters the most.

The Court in *McCready* acknowledged that if an end-user is not the best protector of choice and price in the relevant market, competition may be effectively preserved by another kind of plaintiff. As the Court observed in *SAS*, "The most obvious reason for conferring standing on a second-best plaintiff is that, in some general category of cases, there may be no first best with the incentive or ability to sue." *SAS of Puerto Rico, 48 F.3d at 45*, *citing Associated General, 459 U.S. at 542*.

Whether or not *McCready* created a bona fide test of standing is the subject of some debate, *see Gallant, 886 F. Supp. at 208*, but it is largely irrelevant. *McCready*-like standing only applies when the flash point of competition lies outside of the customer or consumer. *McCready*, as well as the other vertical distributor exceptions, affirm that the intermediary must either be a damaged participant **[**15]** in the very market in which competition is diminished (that is, it must share characteristics of parties injured by horizontal conspiracies) or stand in the shoes of end-users who cannot or will not sue.

2. *Remoteness of Injury and Causal Nexus*

HN11[] The private plaintiff must also show that the injury is not unduly remote from the violation, or duplicative of injury suffered by another. The "remoteness" of one plaintiff suggests the existence of a "superior" plaintiff for whom the antitrust injury was more direct. The principle is simple: "If the superior plaintiff has sued, additional suit by the remote plaintiff may be unnecessary, duplicative, or "excessive." If the "superior" plaintiff has not sued, one may doubt the existence of any antitrust violation at all." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, (Volume II), P 360c(3), 196 (1995). Even if a distributor would otherwise qualify as a plaintiff under an exception, it will be denied standing when and if a preferred plaintiff is available to enforce the principles behind the Sherman Act.

V. *APPLICATION TO SERPA*

The crux of the plaintiff's complaint is that its termination, as well as the **[**16]** merger of Anaco and Tyler, enabled defendants to set anticompetitive prices for Couplings and Fittings.

Ultimately, there is no dispute that the defendants' merger effectively reorganized Serpa out of the Couplings and Fittings market. Serpa was a classic distributor within a two company market that has been made redundant by McWane's restructuring. [7] As **[*153]** a consequence, Serpa's business has been diminished or eliminated because of the defendants' decision. The only question is how to characterize the role Serpa played as a distributor and the significance of its termination in order to determine whether it has standing.

I find that Serpa's alleged injuries are not antitrust injuries within the meaning of the phrase and are too remote to allow it to pursue its claims.

First, Serpa is plainly a "downsized" distributor. It is not challenging the practices of a rival, but rather the actions of an entity **[**17]** at a different level in the distribution chain in merging with another manufacturer and Serpa's competitor distributor.

Second, apart from the vague allegation of price increases, Serpa alleges no specific illegal restraint of trade.

Third, no exception applies. Nothing in the consolidation of Tyler and Anaco's piping distributors suggests that Serpa's termination was integrally related to an antitrust violation. Despite the fact that Serpa's business is threatened, its elimination was not a necessary instrument to effectuate the alleged conspiracy. [8] *McCready*

---

[7] The streamlining of the two-party New England piping trade is not, of itself, a violation of the Sherman Act.

exception is only available where the distributor is the flashpoint of competition and does not apply here because the plaintiff had only marginal pricing discretion prior to its elimination.

[18]** Finally, and most importantly, to the extent Serpa alleges an antitrust conspiracy exists resulting in higher prices, [9] the injured parties -- those paying higher prices for standard piping products -- can themselves sue to enforce the statute. Here, piping wholesalers have both the incentive and the opportunity to bring their own antitrust claims. If prices have in fact risen due to monopolistic practices in this market, we may expect relevant consumers to seek the protection of the statute by bringing their own suit.

Defendants' motion with respect to Count I is **ALLOWED**. Serpa's allegation of a "conspiracy" under Section 2 of the Sherman Act also fails because nothing in the record before **[**19]** me points to the existence of an illegal reorganization in violation of antitrust laws. Accordingly, defendants' motion with respect to Count II is **ALLOWED**.

Defendants have not met their burden on a motion to dismiss with respect to the state law claims. Plaintiff's complaint survives a motion to dismiss because it has sufficiently alleged each of the requisite elements of the state law cause of actions for tortious interference with business advantage, breach of the implied covenant of good faith and fair dealing, tortious interference with contracts and violations of Mass. General Law 93A. Since there is complete diversity among the parties and in light of the amount in controversy, Counts Three, Four, Five and Six are **DENIED**.

A status conference will be held on the remaining claims on Tuesday, June 9, 1998, at 3:30 p.m. in courtroom 4 on the 12th floor.

SO ORDERED.

Dated: June 10, 1998

NANCY GERTNER, U.S.D.J.

---

[8] Plaintiff points to *Engine Specialties, Inc. v. Bombardier Limited, 605 F.2d 1 (1st Cir. 1979)* (Italian minicycle manufacture had standing to assert that anticompetitive scheme between world's largest minicycle maker and a local distributor violated plaintiffs rights) to suggest that exclusive distributors have standing to sue under Section 4 of the Clayton Act. I find, however, that the plaintiff has misconstrued *Bombadier* which provides that sub-distributors lack standing. In the instant case, Serpa's place on a vertical chain makes it more akin to a sub-distributor than a competitor.

[9] Even accepting plaintiff's allegation that prices for Couplings have risen 7% (see *Plaintiff's Memorandum of Law in Support of Its Opposition to Defendants' Motion to Dismiss* at 3), the price change amounts to a de minimus increase and is not evidence of above-market pricing sufficient to show antitrust injury.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > Utility Companies

Energy & Utilities Law > Regulators > Public Utility Commissions > General Overview

Energy & Utilities Law > Utility Companies > General Overview

HN4[] **Energy & Utilities, State Regulation**

In Pennsylvania, the regulation of electric service distribution traditionally affords utility companies natural monopolies. The industry operates in a comprehensive regulatory structure supervised by the Pennsylvania Public Utility Commission (PUC), which is an independent administrative agency authorized by the state to regulate public utility companies doing business in Pennsylvania. *66 Pa. Cons. Stat. Ann. §§ 301* and *501*.

Energy & Utilities Law > Utility Companies > Contracts for Service

Energy & Utilities Law > Utility Companies > General Overview

Transportation Law > Carrier Duties & Liabilities > Certificates of Public Convenience > General Overview

Transportation Law > Carrier Duties & Liabilities > Certificates of Public Convenience > Issuance

HN5[] **Utility Companies, Contracts for Service**

The Pennsylvania Public Utility Code gives the Public Utility Commission (PUC) broad power to "supervise and regulate" public utilities. *66 Pa. Cons. Stat. Ann. § 501(b)*. The PUC is mandated to act in the public interest in overseeing public utilities. A utility company must obtain a certificate of public convenience from the PUC in order to provide retail electric service to a particular area. *66 Pa. Cons. Stat. Ann. § 1101*. Each certificate describes the geographic territory in which the holder is permitted to supply electric service. A certificate may be amended only with permission from the PUC, pursuant to *66 Pa. Cons. Stat. Ann. § 1102*. A utility is able to enter another's service area only if it demonstrates that the area's certificated utility is providing inadequate service in the proposed new territory. Generally, the retail rates that a utility charges must be approved by the PUC. *66 Pa. Cons. Stat. Ann. § 1303*. Further, the PUC reviews all proposed utility mergers. *66 Pa. Cons. Stat. Ann. §§ 1102* and *2811*.

Energy & Utilities Law > Utility Companies > Contracts for Service

HN6[] **Utility Companies, Contracts for Service**

A certificate of public convenience makes it lawful for a public utility to provide service within a defined territory, and imposes on the public utility an obligation to provide service in that territory.

HN13[] **Justiciability, Standing**

The question of standing is a threshold inquiry in all actions. However, the constitutional and prudential requirements of standing take on particular significance in the context of the antitrust laws, where a balance must be struck between encouraging private actions and deterring legitimate competitive activity through overly vigorous enforcement. Thus, in undertaking this standing analysis, the court must remain mindful of the purposes and goals of the antitrust laws -- to preserve and promote competition. The constitutional standing inquiry -- namely, whether there is a "case" or "controversy" within the meaning of *U.S. Const. art. III, § 2* -- is augmented by consideration of prudential limitations. Without these prudential considerations, the courts would be called upon to decide abstract questions of wide public significance even though other governmental institutions may be more competent and judicial intervention may be unnecessary to protect individual rights.

Civil Procedure > ... > Justiciability > Standing > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN14[] **Standing, Requirements**

The Supreme Court outlines the factors that courts should consider when determining whether a party has standing to bring a private action under the antitrust laws. The factors the courts are to examine are (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; (3) the directness of the injury, which addresses the concerns that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN15[] **Clayton Act, Claims**

The antitrust standing inquiry is essentially the same under both §§ 4 and 7 of the Clayton Act, codified at 5 U.S.C.S. §§ 15 and 18, except that when seeking injunctive relief, the complainant need only demonstrate a significant threat of injury from an impending violation of the antitrust laws. Furthermore, this court has emphasized that the antitrust standing inquiry is not a black-letter rule, but rather, is essentially a balancing test comprised of many constant and variable factors.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] **Private Actions, Standing**

A showing of antitrust injury is a necessary but insufficient condition of antitrust standing. The district court should first address the issue of whether the plaintiff suffered an antitrust injury. If antitrust injury is not found, further inquiry is unnecessary. Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN17[] **Private Actions, Remedies**

The question of whether the plaintiff has experienced antitrust injury depends in part on its source -- did the injury flow from that which makes the defined acts unlawful. To answer this question, the court must examine the causal connection between the purportedly unlawful conduct and the injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN18[] **Private Actions, Remedies**

Without demonstrating that there was competition, a plaintiff cannot show that the defendants' actions have had or will have anticompetitive effects.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

HN19[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act prohibits contracts, combinations or conspiracies "in restraint of trade." *15 U.S.C.S. § 1*. Under the Sherman Act agreements can only restrain that which has occurred, is occurring, or is reasonably likely to occur.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN21[] **Remedies, Damages**

Section 16 of the Clayton Act, codified at *15 U.S.C.S. § 26*, does permit injunctive relief against threatened loss or damage.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN22[] **Private Actions, Remedies**

Antitrust injury must be caused by the antitrust violation -- not a mere causal link, but a direct effect.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN23[] **Private Actions, Remedies**

A plaintiff cannot be injured in fact by private conduct excluding him from the market when a statute prevents him from entering that market in any event.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN24[] Clayton Act, Claims

The plaintiff in an action under § 4 of the Clayton Act, codified at 5 U.S.C.S. § 15, must establish that he actually "sustained" injury-in-fact to "business or property," and the "by reason of"' language of § 15 insists that such injury be caused by the violation. The requirements for injunctive relief are similar except that the statutory language of Section 16 of the Clayton Act, codified at 5 U.S.C.S. § 26, permits relief upon a showing of "threatened loss." However, the plaintiff must still demonstrate that this threatened injury would be caused by the alleged antitrust violation.

Opinion by: RENDELL

Opinion

[*258] OPINION OF THE COURT

RENDELL, Circuit Judge.

Appellant, the City of Pittsburgh, filed this antitrust action **[**2]** against West Penn Power Company, d/b/a Allegheny Power, and Duquesne Light Company alleging that the two companies entered into a pre-merger agreement in restraint of trade and that their proposed merger would substantially lessen competition or tend to create a monopoly. The City claims that an agreement between Allegheny Power and Duquesne Light to withdraw Allegheny Power's application before the Public Utility Commission to provide electric service to two Redevelopment Zones within the City violated *Section 1* of the Sherman Act. [1] The City also seeks injunctive relief against the proposed merger between the two utilities arguing that it violates *Section 7* of the Clayton Act. [2]

[3] [*259]** The district court granted the utility companies' motions to dismiss, finding that given the allegations of the complaint, the City lacked standing because it had not experienced an antitrust injury. Because we agree that the City has failed to allege that it meets the prudential requirements of antitrust standing, we will affirm the decision of the district court.

I.

FACTUAL BACKGROUND AND ALLEGATIONS

As an initial matter, we must determine the extent of our consideration of the materials submitted by the parties. ***HN3***[] When deciding a motion to dismiss, it is the usual practice for a court to consider only the allegations contained in the complaint, exhibits attached to the complaint and matters of public record. See 5A Charles Alan Wright & Arthur R. Miller, Federal Practice and Procedure § 1357 (2d ed. 1990). However, the parties here have provided the court with numerous documents pertaining to the regulatory proceedings that are at the heart of the instant controversy. We note -- as did the district court -- that it can be, and is in this instance, proper to consider these documents in reviewing a motion to dismiss. See *Pension Benefit Guar. Corp. v. White Consol.* ***[**4]*** *Indus., 998 F.2d 1192, 1196 (3d Cir. 1993)* (finding that "a court may consider an undisputedly authentic document that a defendant attaches as an exhibit to a motion to dismiss if the plaintiff 's claims are based on the document. Otherwise, a plaintiff with a legally deficient claim could survive a motion to dismiss simply by failing to attach a dispositive document on which it relied."). Our recounting of the averments of the complaint, therefore, is informed

* The Honorable Gerald W. Heaney, Senior United States Circuit Judge for the Eighth Circuit sitting by designation.

[1] ***HN1***[] *Section 1* of the Sherman Act provides, in relevant part: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*.

[2] ***HN2***[] *Section 7* of the Clayton Act, *15 U.S.C. § 18*, states the following:

> No person engaged in commerce or in any activity affecting commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no person subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another person engaged also in commerce or in any activity affecting commerce, where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly.

by the context provided by these documents and other public records of which we can take judicial notice. [3] Our factual recitation will also include a short discussion of the nature of the utility industry in Pennsylvania which provides the regulatory context of this case.

The City of Pittsburgh, located in Allegheny County, is currently embarking on a plan to revitalize several urban areas, called the Redevelopment ***[**5]*** Zones, which were formerly industrial sites. [4] According to the City's plans, these currently vacant sites will eventually be home to industrial, commercial and residential activity. Compl. PP 12, 13. The City believes that competition for retail electric service would facilitate economic development in these areas. Id. P 14. This desire for competition comes at a time when the regulatory landscape for utilities in Pennsylvania is undergoing significant change. ***HN4***[] In Pennsylvania, the regulation of electric service distribution has traditionally afforded utility companies natural monopolies. See *Barasch v. Pennsylvania Pub. Util. Comm'n, 119 Pa. Commw. 81, 546 A.2d 1296, 1298 (Pa. Commw. Ct. 1988)*. The industry operates in a comprehesive regulatory structure supervised by the Pennsylvania Public Utility Commission ("PUC"), which is an independent administrative agency authorized by the state to regulate public utility companies doing business in Pennsylvania. *66 Pa. C.S.A. §§ 301*, *501*. ***HN5***[] The Pennsylvania Public Utility Code gives the PUC broad power to "supervise and regulate" public utilities. Id. *§ 501(b)*. The PUC is mandated to act in the public interest in overseeing public ***[**6]*** utilities. A utility company must obtain a certificate of public convenience from the PUC in order to provide retail electric service to a particular area. Id. *§ 1101*. [5] Each certificate describes the geographic territory in which the holder is permitted to supply electric service. Id. A **[*260]** certificate may be amended only with permission from the PUC, pursuant to *66 Pa.C.S.A. § 1102*. Historically, a utility is able to enter another's service area only if it demonstrates that the area's certificated utility is providing inadequate service to customers in the proposed new territory. See *Lansberry, Inc. v. Pennsylvania Pub. Util. Comm'n, 66 Pa. Commw. 381, 444 A.2d 832, 834-35 (Pa. Commw. Ct. 1982)* (discussing requirement of demonstrating inadequacy of service in context of PUC certificate to transport). In addition, generally, the retail rates that a utility charges must be approved by the PUC. *66 Pa. C.S.A. § 1303*. For example, the rates of both Allegheny Power and Duquesne Light are now, and have always been, subject to regulatory approval by the PUC. Further, the PUC reviews all proposed utility mergers. Id. *§§ 1102*, *2811*. [6]

[**7]

Recently, the Pennsylvania legislature passed the Electricity Generation Customer Choice and Competition Act. Id. *§ 2801 et seq*. The Competition Act sets forth a plan that will gradually introduce competition within the retail generation function of the electric utility industry. [7] This legislation envisions a transition from an industry which is largely regulated to one where there is a competitive market. This statute recognizes continued PUC oversight of electricity ***[**8]*** generation during the "transition" period from January 1, 1997 to January 1, 2001. Id. §§ 2804, 2806. While the Competition Act will introduce some competition among electric service providers in Pennsylvania,

[3] Neither party contests the authenticity of these documents and all were submitted by the parties as the joint appendix in this case.

[4] The two areas to be redeveloped are the 123 acre "South Side Works" and the 233 acre "Nine Mile Run." Compl. P 12.

[5] ***HN6***[] A certificate of public convenience "makes it lawful for [a] public utility to provide service within a defined territory, and imposes on the public utility an obligation to provide service in that territory." *Lukens Steel Co. v. Pennsylvania Pub. Util. Comm'n, 92 Pa. Commw. 530, 499 A.2d 1134, 1136 n.1 (Pa. Commw. Ct. 1985)*.

[6] During the pendency of this litigation, the Allegheny Power and Duquesne Light merger was conditionally approved by the PUC. See 66 U.S.L.W. 2689, 2696-97 (U.S. May 19, 1998) (discussing PUC decision In Re Joint Application of DQE Inc., Pa. P.U.C., No. A-110150F.0015, 4/30/98).

[7] In its plans for the restructuring of the electric utility industry in Pennsylvania, the legislature distinguishes between the functions of generation, transmission, and distribution of electricity. Under the new statutory provisions, the transmission and distribution of electricity will continue to be treated as a natural monopoly and will still be subject to the supervision of the PUC. *66 Pa. C.S.A. § 2801 et seq*.

it does not entirely displace the regulatory function of the PUC. Because the Competition Act did not alter the statutory requirement that Allegheny Power petition the PUC to amend its certificate, that Act's passage does not alter our analysis of this case. At all times relevant to the events recounted in the City's complaint, Allegheny Power and Duquesne Light were operating under the regulated industry conditions. [8]

[**9]

In the summer of 1996, Allegheny Power and Duquesne Light were the only electric utilities possessing certificates of public convenience from the PUC to provide electric service in Allegheny County. Compl. P 17. It is uncontested that Allegheny Power's certificate does not permit it to provide electric service to the area of the City in which the Redevelopment Zones are located. JA at 197 (P 11). Duquesne Light is the only utility with a certificate to provide electric service to this area of the City. JA at 195 (P 1). Duquesne Light claims that its certificate grants it the exclusive right to provide power to the Redevelopment Zones. Compl. P 28. Because of its belief that competition for retail electric power was "essential" to the success of this redevelopment effort, and because Allegheny Power's tariff rates are substantially lower than those of Duquesne Light, the City entered into discussions with Allegheny Power regarding the possibility of having Allegheny Power submit a proposal to provide electric service to the Redevelopment Zones. Id. PP 18, 20, 26. In furtherance of its goal of obtaining competitive utilities for the area, the City filed a "Petition in Support of ***[**10]*** Choice for Retail Electric Service Within Certain Redevelopment Zones Within the City of Pittsburgh" with the PUC in September of 1996. Id. P 22. Allegheny Power intervened in support of this petition and also filed a separate application with the PUC for permission to supply electrical service to the Redevelopment Zones. Id. PP 24, 30. Duquesne Light opposed both of these petitions. Id. PP 27, 32.

In their petitions before the PUC both the City and Allegheny Power contested Duquesne **[*261]** Light's assertion of exclusive rights. A review of the applications made to the PUC is useful to clarify exactly what the City and Allegheny Power were seeking with respect to Allegheny Power's ability to offer electric service in the Redevelopment Zones. In its filing, the City requested that the PUC "take actions necessary to allow choice and competition for retail electric service in two discrete areas in the City undergoing redevelopment . . . wherein Duquesne Light Company .. . and [Allegheny Power Company] . . . would compete for new customers and new electric load." JA at 194 (emphasis added). Further, the City stated in this petition that "to the best of the City's knowledge, ***[**11]*** Duquesne is at the present the only electric utility possessing a certificate of public convenience ("certificate") from the Commission to serve the City and its citizens." JA at 195 (P 1). In its reply to Duquesne Light's Answer to the City's Petition, the City states that it is requesting that the "two utilities, Duquesne and [Allegheny Power], upon the latter's application and grant therefor, hold overlapping certificates to provide retail electric service in the two discrete Redevelopment Zones . . ." JA at 223 (P 24).

In its filing to intervene in support of the City's petition, Allegheny Power asserted that it would "apply for authority to provide retail electric service in the Redevelopment Areas and that subject to approval of the Commission, [Allegheny Power] will provide retail electric service to the Redevelopment Areas pursuant to [Allegheny Power's] tariff rates and terms." JA at 200 (P 3). In its own application to the PUC, Allegheny Power requested approval for the utility "to begin to offer, render, furnish or supply electric service in two specific additional territories within the boundaries of the City of Pittsburgh." JA at 235 (emphasis added). These ***[**12]*** documents make clear that both the City and Allegheny Power were applying to the PUC so that Allegheny Power would be given the regulatory permission to begin to supply electric power in the area of the Redevelopment Zones.

In November of 1996, the Urban Redevelopment Authority of Pittsburgh [9] issued a Request for Proposals ("RFP") soliciting bids for the provision of the "electric utility infrastructure development" of the Redevelopment Zones. Compl. P 33. Both Allegheny Power and Duquesne Light responded to the RFP with significantly different bids,

---

[8] While the statute authorizes the initiation of "pilot programs" in 1997, the parties in the present case have not contended that they were participants in this program. *66 Pa. C.S.A. § 2806 et seq*.

[9] According to the City, the Redevelopment Authority "works closely with the City to implement redevelopment plans that support and are consistent with the City's economic development objectives." Compl. P 33.

Allegheny Power's being the lower of the two. Id. P 35. On February 25, 1997, an Administrative Law Judge ("ALJ") held a prehearing conference on Allegheny Power's PUC application. At this hearing the ALJ set a schedule for the submission of testimony regarding Allegheny Power's application and scheduled further hearings for the week of June 9, 1997. Id. P 39. In March of 1997, the PUC consolidated the proceedings involving the City's petition with those of Allegheny Power's application. Id. P 40.

[**13]

On April 7, 1997, Duquesne Light and Allegheny Power announced their intention to merge. Id. P 42. The City alleges that under the terms of the premerger agreement, the two utilities agreed that they would not file any applications with the government without prior consultation and would not make any changes with respect to rates without first consulting each other. Id. P 45. The City avers that these agreements constitute impermissible premerger coordination. Id. P 46. Later in April, Duquesne Light requested a stay of the PUC proceedings before the ALJ, which was denied. Id. P 48, 50. On June 6, 1997, Allegheny Power filed a petition to withdraw its PUC application and to withdraw as an intervenor in the City's pending PUC petition. Id. P 52. The ALJ granted these petitions. Id. P 54. After filing this complaint in federal court, the City petitioned the PUC for a stay of the regulatory proceedings. JA at 445. When this petition was denied, the City withdrew its petition seeking choice for retail electric service. JA at 523-28. Because the City's petition and Allegheny Power's application were withdrawn, the PUC never made a determination as to whether Duquesne ***[**14]*** Light's certificate gave it exclusive rights to serve the Redevelopment Zones or whether **[*262]** the Commission could or would amend Allegheny Power's certificate in order to permit it to provide electric service in these areas.

In its complaint, the City contends that the actions of Allegheny Power and Duquesne Light violated *15 U.S.C. § 1* ("the Sherman Act") and *15 U.S.C. § 18* ("the Clayton Act"). The City asserts that it has suffered the following damage as a result of the alleged Sherman Act violations: "expending significant efforts to bring competition to the Redevelopment Zones; paying higher, non-competitive rates for electric utility service generally; and losing the opportunity to have lower electric service charges .. . ." Compl. P 59. The City seeks treble damages for the alleged Sherman Act violation. [10] The City further argues that a merger between the two utility companies violates the Clayton Act in that it would have anticompetitive effects, and thus seeks injunctive relief to prevent the proposed merger. [11] Id. P 66. The City also raises the related state law claims of restraint of trade, civil conspiracy, breach of contract, tortious interference, breach of good ***[**15]*** faith and fair dealing, and detrimental reliance.

[**16]

Allegheny Power and Duquesne Light each moved to dismiss the City's complaint pursuant to *Fed. R. Civ. P. 12(b)(6)*. This motion was referred to a Magistrate Judge who issued a report recommending that the motions be granted. On January 6, 1998, the district court adopted this report thereby granting defendants' motions to dismiss

---

[10] ***HN7***[] Section 4 of the Clayton Act, which provides for treble damages based on antitrust violations, states as follows:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15.

[11] ***HN8***[] Section 16, which provides for injunctive relief, states, in pertinent part:

Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity . . . . *15 U.S.C. § 26*.

and declining to exercise jurisdiction over the City's state law claims. The City filed this timely appeal. Our jurisdiction is founded on *28 U.S.C. § 1291*. [12]

II.

THE DISTRICT COURT'S RULING

The district ***[**17]*** court granted the defendants' motions to dismiss because the City lacked standing to bring an antitrust claim. It reasoned that there had been no antitrust injury to the City for two reasons:

First, since Allegheny Power and Duquesne Light had not engaged in competition in light of their regulated provision of services, the agreement between Duquesne Light and Allegheny Power to withdraw Allegheny Power's bid, as well as the proposed merger, did not lessen competition. *City of Pittsburgh v. West Penn Power Co., 993 F. Supp. 332, 1998 WL 64074*, at *4 (W.D. Pa. 1998). As to the City's claim that the proposed merger would eliminate prospective competition, the court found this claim to be too speculative to be actionable. Id.

Second, the court found that the City was denied an opportunity that was contingent on the decision of the PUC and thus, the fact that no competition existed was the result of the regulatory structure. Id. at *5. The district court found that as the City's alleged damages were not the result of harm to competition, they did not constitute the type of injury the antitrust laws were intended to prevent. Id. at *4-5. The district court ***[**18]*** therefore concluded that, because any injury that was **[*263]** experienced or threatened was not an antitrust injury, the City lacked standing to pursue its claims under the Sherman and Clayton Acts. Id. at *5.

III.

ISSUES ON APPEAL

The City contests the district court's conclusion, arguing that the allegations of the complaint regarding the loss of competition are sufficient to allege the type of injury the antitrust laws are designed to prevent. It contends that the district court's ruling that the City did not have standing due to lack of antitrust injury fails to properly consider not only its allegations but also the applicable law regarding antitrust injury. We review plaintiff 's complaint not to determine whether the City has averred harm to competition -- which it has -- but, rather, to determine whether the injury the City alleges can legally form the basis for relief under the antitrust laws.

The City contends that the district court ignored the allegations of the elimination of competition, arguing that the court should have taken the allegations of its complaint at face value. Yet ***HN10***[] our courts have an obligation in matters before them to view the complaint as a whole ***[**19]*** and to base rulings not upon the presence of mere words but, rather, upon the presence of a factual situation which is or is not justiciable. We do draw on the allegations of the complaint, but in a realistic, rather than a slavish, manner. [13] In scrutinizing plaintiff's claim in this way at the outset, we are mindful of the balance that must be struck in assessing antitrust claims. As the Supreme Court stated, referring to standing in the context of § 4 of the Clayton Act:

> Neither the statutory language nor the legislative history of § 4 offers any focused guidance on the question of which injuries are too remote from the violation and the purposes of the antitrust laws to form the predicate for a suit under § 4; indeed, the unrestrictive language of the section, and the avowed breadth of the congressional

[12] ***HN9***[] We exercise plenary review over the district court's grant of defendants' motions to dismiss. *Jeremy H. v. Mount Lebanon Sch. Dist., 95 F.3d 272, 277 (3d Cir. 1996)*. In so doing, we accept as true all factual allegations in the complaint and will not affirm the motion to dismiss "unless it is certain that no relief can be granted under any set of facts which could be proved." *Fuentes v. South Hills Cardiology, 946 F.2d 196, 201 (3d Cir. 1991)* (citation omitted).

[13] For example, we need not accept as true "unsupported conclusions and unwarranted inferences." *Schuylkill Energy Resources, Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405, 417* (3d Cir.), cert. denied, ***139 L. Ed. 2d 335, 118 S. Ct. 435 (1997)***. Nor can we "assume that the [plaintiff] can prove facts that it has not alleged . . . ." *Associated Gen. Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*.

> purpose, cautions us not to cabin § 4 in ways that will defeat its broad remedial objective. But the potency of the remedy implies the need for some care in its application.

Blue Shield of Virginia v. McCready, 457 U.S. 465, 477, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982).

[**20]

Regulatory Framework

The present case arises in a factual context which is substantially different from that of most antitrust cases. The plaintiff has alleged anticompetitive behavior in an industry which is highly regulated: those who wish to compete to provide their services must obtain a certificate from the PUC to do so. As the First Circuit has explained, ***HN11***[] "full price regulation dramatically alters the calculus of antitrust harms and benefits." *Town of Concord, Mass. v. Boston Edison Co., 915 F.2d 17, 25 (1st Cir. 1990)* (holding that alleged price squeeze did not violate Sherman Act because utility's rates were regulated). Similarly, here, the regulation which frames the issue is the statutory requirement that a utility obtain permission from the PUC, in the form of a certificate, in order to provide electric service to a particular geographic region.

The Supreme Court has made clear that ***HN12***[] regulated industries -- even those that historically have been treated as natural monopolies -- are not exempt from the antitrust laws. See *Otter Tail Power Co. v. United States , 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*. However, in this case, the comprehensive ***[**21]*** regulatory framework significantly restricts the nature of the competition which is permitted. While it is true that the regulatory landscape of the electric power industry is in the process of changing, even the Competition Act does not anticipate a completely **[*264]** "free market" for electric services. Rather, the changes will result in a form of regulated competition. Further, in the words of the Schuylkill Energy court, "We will not attempt to predict the future of competitive retail access in Pennsylvania." *Schuylkill Energy Resources, Inc. v. Pennsylvania Power & Light Co., 113 F.3d 405, 416* (3d Cir.), cert. denied, *139 L. Ed. 2d 335, 118 S. Ct. 435 (1997)*. We cannot know whether these two utilities will ever be permitted to compete for retail customers in a particular geographic region.

Antitrust Standing

HN13[] The question of standing is a threshold inquiry in all actions. However, the constitutional and prudential requirements of standing take on particular significance in the context of the antitrust laws, where a balance must be struck between encouraging private actions and deterring legitimate competitive activity through overly vigorous enforcement. See, ***[**22]*** e.g., *Capital Imaging Assoc. v. Mohawk Valley Med. Assoc., 996 F.2d 537, 539 (2d Cir. 1993)* (cautioning that were the "heavy power [of ***antitrust law***] brought into play too readily it would not safeguard competition, but destroy it"). Thus, in undertaking this standing analysis, we must remain mindful of the purposes and goals of the antitrust laws at issue -- to preserve and promote competition.

The constitutional standing inquiry -- namely, whether there is a "case" or "controversy" within the meaning of Article III, § 2 of the Constitution -- is augmented by consideration of prudential limitations. Without these prudential considerations, "the courts would be called upon to decide abstract questions of wide public significance even though other governmental institutions may be more competent . . . and judicial intervention may be unnecessary to protect individual rights." *Warth v. Seldin, 422 U.S. 490, 500, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975)*.

Thus, the crux of the issue in this case is whether the City satisfies the "prudential" requirements of standing; that is, does the City have "antitrust standing," and is the plaintiff a proper party to bring a private ***[**23]*** antitrust action? In Associated General, ***HN14***[] the Supreme Court outlined the factors that courts should consider when determining whether a party has standing to bring a private action under the antitrust laws. *Associated Gen. Contractors of California v. California State Council of Carpenters, 459 U.S. 519, 537-45, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. Its approach to the standing inquiry has been interpreted as requiring a narrowing view, as opposed to the broad remedial purpose approach of cases that preceded it. See *Barton & Pittinos, Inc. v. SmithKline Beecham Corp., 118 F.3d 178, 181 (3d Cir. 1997)*. The Associated General test has been regularly and consistently applied as the passageway through which antitrust plaintiffs must advance, and we have recently restated the factors we are to examine:

> (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm, with neither factor alone conferring standing; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to provide redress; [14] (3) the directness of the injury, which addresses the concerns ***[**24]*** that liberal application of standing principles might produce speculative claims; (4) the existence of more direct victims of the alleged antitrust violations; and (5) the potential for duplicative recovery or complex apportionment of damages.

Barton & Pittinos, 118 F.3d at 181 (citing *In re Lower Lake Erie Iron Ore Antitrust Litig., 998 F.2d 1144, 1165-66 (3d Cir. 1993))*. ***HN15***[] The antitrust standing inquiry is essentially the same under both § 4 and *§ 7* of the Clayton Act, except that when seeking injunctive relief, "the complainant need only demonstrate a significant threat of injury from an impending violation of the antitrust laws." *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 591 (3d Cir. 1979)* (quotation omitted); see also *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 111-112, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. Furthermore, this court has emphasized that the antitrust standing inquiry **[*265]** is not a black-letter rule, but rather, is "essentially a balancing test comprised of many constant and variable factors . . . ." *Merican, Inc. v. Caterpillar Tractor Co., 713 F.2d 958, 964-65 (3d Cir. 1983)* (citing *Bravman* ***[**25]*** *v. Bassett Furniture Indus., 552 F.2d 90, 99 (3d Cir. 1977))*.

We conclude that, balancing all of the relevant facts in the instant case, the City's claims fail to meet the standing requirements we have set forth, due to the lack of causal connection between the defendants' actions and the alleged harm and because of the absence of antitrust injury. We will combine our discussion of causation and injury as the two issues are inextricable in this case. Further, we find that because there is no causal connection and no antitrust injury, we need not examine the other Associated General standing factors.

IV.

CAUSAL CONNECTION AND ANTITRUST INJURY

In evaluating the factors necessary for standing, we have stated that ***HN16***[] a showing of "antitrust injury is a necessary but insufficient condition of antitrust standing." *Barton & Pittinos, 118 F.3d at 182*. By this we mean that the district court should first address the issue of ***[**26]*** whether the plaintiff suffered an antitrust injury. If antitrust injury is not found, further inquiry is unnecessary.

In explaining its reasoning, the district court cited the following passage from Brunswick, which defines "antitrust injury":

> Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetive acts made possible by the violation.

Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). From the Court's description of antitrust injury, we learn that ***HN17***[] the question of whether the plaintiff has experienced antitrust injury depends in part on its source -- did the injury flow from that which makes the defined acts unlawful. To answer this question, we must examine the causal connection between the purportedly unlawful conduct and the injury. [15] In this case, we find that determining whether antitrust injury is present necessarily involves examining whether there is a causal connection between ***[**27]*** the violation alleged and the injury.

---

[14] This element of the standing test is the "antitrust injury" requirement.

[15] As many commentators and courts have noted, the questions of antitrust injury and antitrust standing are difficult to disentangle. We believe that, similarly, in the present case, there is no bright line distinction between the two concepts. See, e.g., *Greater Rockford Energy & Tech. Corp. v. Shell Oil Co., 998 F.2d 391, 394-95 (7th Cir. 1993)*; *Triple M Roofing Corp. v. Tremco, Inc., 753 F.2d 242, 247 (2d Cir. 1985)*; see also Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 360(e), at

Accordingly, rather than trying ***[**28]*** to separate these two factors of causation and injury, we will treat them together. The facts which form the basis for the district court's conclusion, and ours as well, are central to both tests. These facts include the following: Allegheny Power and Duquesne Light were never competitors; the regulatory scheme mandated that they not compete; attempts by the City and Allegheny Power to bring about competition were no more than attempts, with no assurance that competition would be permitted; and any injury suffered by the City did not flow from the defendants' conduct, but, rather, from the realities of the regulated environment in which all three were actors. Here, both the lack of any antitrust injury -- in the sense of its total absence as defined by the district court -- and the attenuated nature of the causation, defeat the City's standing.

We should note at the outset that we disagree with the City's argument that Brunswick and the other cases discussing antitrust injury cited by the district court are inapposite **[*266]** because they involved suits by competitors, not by consumers. [16] The City urges that as long as the City is a consumer -- as it contends it is -- harm to it constitutes ***[**29]*** antitrust injury. [17] However, we do not find the City's status as a consumer to be dispositive. We read the cited passage from Brunswick, and the opinion itself, to have broader application. Brunswick tells us to intensify our focus and consider not only the fact that there may be an agreement which is harming others in the marketplace, but to also ask first whether the alleged injury is really of the type that the antitrust laws were intended to prevent, and, as part of that assessment, whether the injury flows from that which makes defendants' acts unlawful.

[**30]

The key sentence in Brunswick, cited above, is the last: "The injury should reflect the . . . anticompetitive acts made possible by the violation." *429 U.S. at 489*. It directs us to look back from the vantagepoint of the injury to test the nature of the cause, rather than to presume antitrust injury wherever there is an agreement or merger that results in harm. This inquiry led to a conclusion of that the plaintiff lacked standing in Brunswick. Although the analysis is slightly different, the same result follows on the facts of this case. The purported lessening of competition was not caused by the premerger agreement and proposed merger between Allegheny Power and Duquesne Light. The City's inability to choose to buy from either Allegheny Power or Duquesne Light for the Redevelopment Zones is an injury visited upon it by the regulated nature of utility services, not caused by an agreement between Duquesne Light and Allegheny Power to withdraw Allegheny Power's application to be able to compete.

The City's position that it has suffered an antitrust injury is an attempt to equate the submission of bids and filing of petitions with actual competition. The City's complaint states ***[**31]*** that the City engaged in "negotiations with Allegheny Power for the provision of electric utility service to the Redevelopment Zones, subject to Allegheny Power obtaining a certificate from the PUC." Compl. P 41. The City acknowledges that competition was not possible without PUC approval when it requested that the PUC "take actions necessary to allow choice and competition for retail electric service" in the Redevelopment Zones. JA at 194. Thus, we need not resolve the issue of whether Duquesne Light's certificate to provide electricity to the Redevelopment Zones was exclusive. Rather, it is sufficient that we can determine from the face of the complaint that Allegheny Power never had the certificate from the PUC necessary to permit it to provide power in the Redevelopment Zones. It never did compete, and, therefore, any

---

200 (1995); William Page, The Scope of Liability for Antitrust Violations, *37 Stan. L. Rev. 1445, 1484-85 (1985)*; Nat Stern & Kevin Getzendanner, Comment, Gauging the Impact of Associated General Contractors on Antitrust Standing Under Section 4 of the Clayton Act, 20 U.C. Davis L. Rev. 159, 175-179 (1986); Daniel Richman, Note, Antitrust Standing, Antitrust Injury, and the Per Se Standard, *93 Yale L.J. 1309 (1984)*.

[16] In Brunswick, several smaller operators of bowling alleys sued a larger operator who was also a bowling equipment manufacturer. According to the plaintiffs, Brunswick's activity of acquiring failing alleys and providing cash to keep them afloat violated *Section 7* of the Clayton Act. They argued this continued competition reduced their profits. Using the test set forth above, the Supreme Court held these lost profits did not constitute "antitrust injury." *Brunswick, 429 U.S. at 489*.

[17] In its complaint, the City alleged that it was bringing this action "on its own behalf as a purchaser of electric utility service" and "on behalf of its citizens and to protect the economy of Pittsburgh." Compl. P 4. Defendants contest the City's ability to bring this action on behalf of its citizens. It is, however, uncontested that the City will be a purchaser of electricity -- for streets, public works, and other infrastructure -- in the Redevelopment Zones though it is not now a purchaser in these areas.

injury to the City did not result from a lessening of competition. In fact, as the district court correctly points out, the actions of the utilities merely maintained the status quo. Thus, the utilities' purported antitrust violation can only be said to have been competition-neutral and as such, is not actionable. See *Atlantic Richfield Co. v. USA Petroleum Co.* ***[**32]*** *, 495 U.S. 328, 344, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)* (stating that "the antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior").

The district court concluded that because neither the agreement nor the proposed merger had brought about the lessening of competition in a "marketplace" where there was no competition, there was no antitrust **[*267]** injury. We find this conclusion of the district court to be well founded, notwithstanding the City's bold averments as to loss of competition. ***HN18***[] Without demonstrating that there was competition, a plaintiff cannot show that the defendants' actions have had or will have anticompetitive effects. See, e.g., *Continental Cablevision of Ohio, Inc. v. American Elec. Power Co., 715 F.2d 1115, 1119-20 (6th Cir. 1983)* (finding that without competition, there can be no injury to competition).

It is telling that nowhere in the complaint does the City directly aver that there had ever been competition between Duquesne Light and Allegheny Power. [18] The City argues that it is the competitive process that antitrust laws are designed ***[**33]*** to protect -- and that the submission of bids in response to the RFP constitutes a "competitive process." However, this argument does little to further the City's position because, in the present case, the competitive process does not even exist because of regulatory restraints.

The City's first claim is brought under ***HN19***[] the Sherman Act, which prohibits contracts, combinations or conspiracies "in restraint of trade." *15 U.S.C. § 1*. However, under the Sherman Act agreements can only restrain that which has occurred, is occurring, or is reasonably likely to occur. Since the realization of competition is in the hands of regulators there is no way that the City can show that competition would have occurred absent the concerted activity ***[**34]*** between the two utilities. The City's Clayton Act claim fails under a similar analysis. ***HN20***[] *Section 7* of the Clayton Act prohibits all mergers "where in any line of commerce, or in any activity affecting commerce in any section of the country, the effect may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*. The complaint avers that the relevant "line of commerce" for the Clayton Act claim is the "provision of retail electric utility service in the Redevelopment Zones." Compl. P 62. The City argues that the proposed merger will lessen competition by "eliminating actual and prospective competition between Allegheny Power and Duquesne Light in the relevant line of commerce . . ." *Id. P 66*(a). The only "actual competition" that the City alleges in its complaint is the competition to be able to provide electric power to the Redevelopment Zones, which does not constitute actual competition.

HN21[] Section 16 of the Clayton Act does permit injunctive relief "against threatened loss or damage." *15 U.S.C. § 26*; see *Mid-West Paper Products Co., 596 F.2d at 590-91*. [19] The City argues that the fact that the proposed merger will lessen "prospective competition" ***[**35]*** should be sufficient to state a claim. However, we agree with the reasoning of the district court that the threatened loss "is contingent on the PUC permitting competition within the City in the first instance." Thus, with respect to the "prospective injury" argument, the issue turns not on whether Allegheny Power and Duquesne Light did compete -- but whether they were going to compete for the ability to provide power in the Redevelopment Zones. Allegheny Power was not legally able to provide power in the Redevelopment Zones and we do not know whether the PUC would ever have granted the permission for it to do so. Thus, as a matter of law, the court cannot conclude that the loss of potential competition was causally related to

[18] Paragraphs 9 & 10 of the City's complaint contain nearly identical statements regarding the business of each utility, but contains no averment that the two companies compete. Elsewhere in the complaint, harm to competition is averred in broad, conclusory terms. See Compl. P 66.

[19] The City has not explicitly argued this case under a "potential competition" theory and therefore we will not address that issue here. We do note, however, that the cases articulating this theory would be of doubtful support to the City. See, e.g. , *United States v. El Paso Natural Gas Co., 376 U.S. 651, 12 L. Ed. 2d 12, 84 S. Ct. 1044 (1964)*; *United States v. Falstaff Brewing Corp., 410 U.S. 526, 35 L. Ed. 2d 475, 93 S. Ct. 1096 (1973)*.

the decision of the two power companies to merge. The City is really claiming that it would have benefited from competition it hoped would occur. However, the appellants cannot foist their version of what might have been on the court under the rubric of antitrust injury. The presence of the regulatory scheme and need for approval in connection with the choice of utilities to **[*268]** serve the Redevelopment Zones cuts the causal chain and converts what might have ***[**36]*** been deemed antitrust injury in a free market into only a speculative exercise.

There are no facts averred in the complaint which even permit us to speculate as to the likelihood of the PUC granting certification to Allegheny Power. Further, the City does not allege, and there is nothing in the record to indicate, that any parties considered these applications to be mere administrative formalities. To the contrary, the PUC applications filed by the City and Allegheny Power -- and the responses to them by Duquesne Light -- make clear that PUC proceedings ***[**37]*** to amend Allegheny Power's certificate were already being vigorously contested. See, e.g., JA at 267-287. Thus, we simply cannot know whether there is any causal connection between the harm which has arguably been suffered by the City and the alleged Sherman Act violation.

As the Supreme Court stated in Brunswick, ***HN22***[] antitrust injury must be caused by the antitrust violation-- not a mere causal link, but a direct effect. *429 U.S. at 489*. Here, the interposition of the regulatory scheme and actions of the parties -- both defendants and plaintiff -- interferes with the chain of causation. The statutory scheme precluded competition without the requisite regulatory permission. As Professors Areeda & Hovenkamp describe, ***HN23***[] "a plaintiff cannot be injured in fact by private conduct excluding him from the market when a statute prevents him from entering that market in any event." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 363(b), at 222 (1995) (citing *Axis S.p.A. v. Micafil, Inc., 870 F.2d 1105 (6th Cir. 1989))*.

As Areeda & Hovenkamp explain, ***HN24***[] the Section 4 plaintiff "must establish that he actually 'sustained' injury-in-fact to 'business or property,' and the ***[**38]*** 'by reason of ' language [of § 4] insists that such injury be caused by the violation." *Id. P 360, at 192*. The requirements for injunctive relief are similar except that the statutory language of Section 16 permits relief upon a showing of "threatened loss." However, the plaintiff must still demonstrate that this "threatened injury would be caused by the alleged antitrust violation . . . ." *Id. P 360*(b), at 193 (emphasis added). Thus, the City will never be able to prove a direct link between the alleged antitrust violation and their purported injury. The absence of antitrust injury and causal connection clearly defeat the City's standing.

The lack of causal connection between the violation alleged and the City's injuries is further demonstrated when we examine the damages alleged by the City. The injury is not only "speculative" because it is difficult to measure; rather, it is speculative because the injury claimed may never occur. An examination of the following damages listed in the City's complaint reveals no direct link between the purported antitrust violations and the harm alleged to have been suffered by the City: "expending significant efforts to bring competition ***[**39]*** to the Redevelopment Zones; paying higher, non-competitive rates for electric utility service generally; and losing the opportunity to have lower electric service charges in the Redevelopment Zones necessary to attract the maximum intended economic development to the Zones and foster full economic growth." Compl. P 59. The City has failed to offer any support for the proposition that the first alleged harm -- the fact that the City spent money to bring competition to the Redevelopment Zones -- is a cognizable antitrust injury. [20] The other damages are precisely the **[*269]** type which cannot be directly connected to the alleged agreement. There is no way to determine whether the rates the City will pay for electric service are or will be affected by the alleged actions of Allegheny Power and Duquesne Light. ***HN25***[

---

[20] ***HN26***[] The proper measure of damages for a price-fixing violation under the Sherman Act is the difference between the prices actually paid and those that would have been paid absent the conspiracy. See, e.g., *State of N.Y. v. Hendrickson Bros., Inc., 840 F.2d 1065, 1077 (2d Cir. 1988)*; see also Robert Blair & William Page, "Speculative" Antitrust Damages, *70 Wash. L. Rev. 423, 426 (1995)* (Plaintiff must project a "hypothetical or 'but-for' condition that excludes only the effects of the defendant's illegal conduct." Damages are measured by "the difference between that projected condition and the plaintiff's actual condition."). The injury alleged by the City here is purportedly separate from the injury of having to pay higher prices for electric service. In fact, the language of this claim merely underscores the fact that no competition existed between the two utilities. When a market participant expends resources to encourage competition, the participant risks that such expenditure will not result in lower prices. Despite this risk, the City chose to pursue its "efforts" with Allegheny Power.

] A consumer alleging antitrust violations "cannot obtain damages without showing that he actually paid more than he would have paid in the absence of the violation." Areeda & Hovenkamp, supra, P 370, at 253.

[**40]

In its complaint, the City alleges a violation of *Section 1* of the Sherman Act and requests that "defendants be ordered to pay the City damages sustained by it and the citizens it represents, trebled . . ." Compl. P 93. However, there is no way for the court to determine what "damages" were sustained. We cannot assume the existence of a PUC certificate for the purposes of assessing damages. Thus, the damages alleged by the City are not simply difficult to measure, but their occurrence would, in fact, be impossible to prove. The injury averred by the City is simply too speculative to permit relief under the antitrust laws.

With respect to injunctive relief, the City cannot show a significant threat of injury from an impending antitrust violation. The City cannot prove that harm is threatened because it cannot demonstrate that it has lost anything -- namely, competition among electric utilities -- that would have existed but for the actions of the defendants. Further, now that all parties, including the City, have withdrawn from the regulatory proceedings, an injunction would not alter the City's current situation. That is, the question of whether the PUC would amend Allegheny Power's ***[**41]*** certificate and permit it to provide electric service to the Redevelopment Zones would remain unresolved.

We affirm the district court's conclusion that because there had previously been no competition in the market for electricity, "neither the proposed merger nor the withdrawal of Allegheny Power's application has lessened the competition within the City or the choices of utility companies available to the City." *City of Pittsburgh, 993 F. Supp. 332, 1998 WL 64074*, at *4. Thus, as the district court notes, it is the structure of the regulated industry, not the defendants' conduct, which creates the lack of competition -- and under these facts -- the lack of antitrust standing. That does not mean that utilities are immune from antitrust liability. [21] However, in the present case, the remedy that appellant seeks would require this court to assume the existence of a competitive situation. This we cannot do.

[**42]

The City argues that if the antitrust laws are not diligently enforced during the transition to deregulation under the Competition Act, there is a risk that regulated electric utility monopolies will simply be replaced by unregulated ones who would also enjoy immunity from the antitrust laws. We make clear that this ruling is fact-specific to the current climate in which the instant facts developed, namely, in the era of "regulated electric utility monopolies" as the City terms it. The very essence of our ruling is that the advent of deregulation will likely remove the break in the causal chain so that future utility arrangements in the free market atmosphere may well pass muster for purposes of standing under the antitrust laws. Had the ability of the utilities to serve various customers in various regions not been subject to approval of the PUC, our standing analysis would be radically different.

In conclusion, because we believe that the City cannot establish the necessary antitrust injury and causal connection between the alleged antitrust violation and its injury, we will affirm the district court's grant of defendants' motions to dismiss.

Dissent by: GERALD W. HEANEY

Dissent

HEANEY, **[**43]** Senior Circuit Judge, dissenting.

---

[21] Further, this decision does not affect the City's ability to proceed in state court on its state law claims for restraint of trade, civil conspiracy, breach of contract, tortious interference, breach of good faith and fair dealing, and detrimental reliance.

I cannot agree with the majority that there is no antitrust injury or no causal connection between the City's injury and the defendants' conduct. The defendants conspired to deprive the City of the opportunity to obtain less expensive electricity to assist in bringing new jobs to the City. In my view, the majority **[*270]** opinion opens the door for similar anti-competitive practices to go unpunished.

I accept the statement of facts set forth by the majority, but supplement it in order to underscore the bad faith exhibited by Allegheny Power and Duquesne Light Company. [1] Attempting to create new jobs in the Redevelopment Zones, the City recognized that high-cost electricity was a detriment to attracting new businesses. Estimating that the Redevelopment Zones would support up to 7,300 new jobs and approximately 1,400 new residences, the City began negotiating with Allegheny Power to provide less expensive electricity.

[44]** The City and Allegheny Power negotiated for several months and Allegheny Power assured the City that it would provide less expensive electricity than Duquesne Light Company to the Redevelopment Zones. Both Allegheny Power and the City knew that the permission of the PUC was required before Allegheny Power could furnish electricity. In July 1996, both the City and Allegheny Power agreed to apply to the PUC for the latter to provide electricity to the Redevelopment Zones. On September 4, 1996, the City filed a petition supporting Allegheny Power's provision of electricity to the Redevelopment Zones. On September 9, 1996, Allegheny Power filed its own petition in this matter and represented to the PUC that an "alternative electric supply would attract economic development to the Redevelopment Areas and would foster economic growth[.]" (J.A. at 6.)

Claiming that it had the exclusive right to provide electricity to the City, Duquesne Light Company intervened on September 27, 1996, opposing the petitions filed by the City and Allegheny Power. On October 21, 1996, Allegheny Power filed an answer, claiming that it also had the right to provide electricity to the Redevelopment Zones. After **[**45]** these preliminary matters had been addressed, on October 28, 1996, Allegheny Power formally applied for a certificate of need, which would enable it to provide electricity to the Redevelopment Zones. In its application, Allegheny Power claimed that its prices would be substantially lower than Duquesne Light Company's, stating: "It is certain that the potential for developing new, incremental electrical load in the Redevelopment Zones will be enhanced substantially if electricity prices therein are as low as possible." (Id.)

On November 18, 1996, the City solicited bids from Allegheny Power and Duquesne Light Company to provide power to the Redevelopment Zones. As the majority points out, Allegheny Power significantly under-bid Duquesne Light Company. While the ALJ received testimony on the application in late March 1997, further hearings were scheduled for June 9, 1997.

Less than two weeks later, on April 7, 1997, Duquesne Light Company and Allegheny Power announced that they had agreed to merge. Two days earlier, on April 5, 1997, Allegheny Power and Duquesne Light Company agreed not to make any filings with governmental entities until they consulted with each other; not to **[**46]** change their regulated charges or rates without first discussing it with each other; and not to make any agreement or filing with respect to a rate change or charge without first consulting each other.

After deciding to merge, on April 28, 1997, Allegheny Power and Duquesne Light Company requested a stay of the proceedings on Allegheny Power's application for a certificate of need. The ALJ denied the stay, noting the need for an expeditious decision. On June 6, 1997, Allegheny Power petitioned the ALJ for leave to withdraw its application. The ALJ granted the petition on June 24, 1997. The City then commenced this action alleging, in substance, that Allegheny Power and Duquesne Light Company conspired to deprive the City of the opportunity to obtain less expensive electricity in violation of *Section 1* of the Sherman Act and *Section 7* of the Clayton Act.

The facts alleged by the City are sufficient to show that Allegheny Power and Duquesne Light Company conspired to deprive the City of an opportunity to obtain less expensive electricity. In my view, this conspiracy violated both the Sherman and Clayton Acts. **[*271]** Unlike the majority, I am not persuaded that the PUC's failure to act

---

[1] We accept all of the City's allegations as true in reviewing the motion to dismiss. *Fuentes v. South Hills Cardiology, 946 F.2d 196, 201 (3d Cir. 1991)* (citation omitted).

on **[**47]** Allegheny Power's application immunizes these conspirators from antitrust liability. After all, the conspiracy deprived the PUC of an opportunity to review the application. [2] As the Seventh Circuit aptly pointed out, "we know of no rule that states that the parties must be in head-to-head competition in the relevant market (as opposed to head-to-head competition for the relevant market) before the antitrust laws will apply." *Fishman v. Estate of Wirtz, 807 F.2d 520, 531 (7th Cir. 1986)* (emphasis in original).

[48]** The Clayton Act prohibits mergers that substantially lessen competition or tend to create monopolies in any line of commerce in any section of the country. There can be no doubt that the proposed merger in this case violates the Clayton Act. Allegheny Power and Duquesne Light Company are the only utility companies that could feasibly provide electricity to the Redevelopment Zones. Consequently, the proposed merger substantially lessens competition and creates a monopoly in the relevant market.

The Sherman Act addresses agreements in restraint of trade. In this case, there was such a restraint. The merger agreement destroyed the City's opportunity to obtain less expensive electricity. In this case, the City's allegations support the view that there was such a restraint. According to these allegations, the merger agreement destroyed the opportunity to obtain less expensive electricity. A factfinder might well determine that this opportunity was more than speculative; it was real enough to cause Allegheny Power to file its application; it was real enough to cause Duquesne Light Company to oppose the application; and it was real enough to convince Allegheny Power and Duquesne Light **[**49]** Company that a merger was the most effective way of avoiding cost competition. [3] In short, "the injury alleged by [the City] was precisely the type of loss that the claimed violations of the antitrust laws would be likely to cause." *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*.

I am concerned that today's decision sends the wrong message that similarly situated conspirators will not be held accountable for their anti-competitive activities. After submitting bids, both Allegheny Power and Duquesne Light Company knew the price at which each company would provide electricity to the City. When Allegheny Power withdrew its bid, Duquesne Light Company was assured that competition would **[**50]** be lessened and that its higher price would prevail.

In my view, the majority does not sufficiently distinguish between the City's § 4 and § 16 claims under the Clayton Act. Even if one concedes that the claim for monetary damages under the Clayton and Sherman Acts presents a close question, there can be no doubt that the City has standing to pursue its requested injunctive relief under § 16 of the Clayton Act. It is well settled in the Third Circuit that, unlike a claim under § 4 of the Clayton Act for monetary damages, "a claim for injunctive relief does not present the countervailing considerations--such as the risk of duplicative or ruinous recoveries and the spectre of a trial burdened with **[*272]** complex and conjectural economic analyses--that the Supreme Court emphasized when limiting the availability of treble damages" in a § 4 Clayton Act claim. *Mid-West Paper Prods. Co. v. Continental Group, 596 F.2d 573, 591 (3d Cir. 1979)*. Consequently,

---

[2] The majority, however, argues "now that all parties, including the City, have withdrawn from the regulatory proceedings, an injunction would not alter the City's current situation." In essence, the majority argues that because the City withdrew from the PUC proceedings, the issue is moot as to whether an injunction should be granted. However, once Allegheny withdrew its application, there was no point for the City to continue with its application. As the appellees point out themselves, Allegheny had to obtain approval from the PUC to enlarge its certificate of convenience. See *Makovsky Bros., Inc. v. Pennsylvania Public Utility Comm., 55 Pa. Commw. 435, 423 A.2d 1089, 1092 (Pa. Commw. 1980)*. The City alone, as the consumer, could not petition the PUC to obtain lower utility prices. *Lukens Steel Co. v. Pennsylvania Public Utility Comm., 92 Pa. Commw. 530, 499 A.2d 1134, 1140 (Pa. Commw. 1985)*. Thus, once Allegheny withdrew, under Pennsylvania law, there was no point for the City to continue with its application. Instead, the City filed suit in federal district court. Although the law is changing in Pennsylvania as utility competition becomes a reality, there is no indication that the City could have proceeded ex parte before the PUC to ensure that Allegheny provide lower electricity rates.

[3] Certainly the amount of damages that the City might recover may be limited by the fact that the PUC would not have approved the application, but this fact goes to the amount of damages that can be recovered rather than whether an antitrust violation has been committed.

> In contradistinction to § 4, § 16 does not ground injunctive relief upon a showing that "injury" has been already sustained, but instead makes it available "against threatened loss or damage." Furthermore, § 16 does not **[**51]** state that the threat must be to the plaintiff's "business or property," and courts accordingly have held that non-commercial interests are also protected. . . . Courts have held that for purposes of § 16 the complainant "need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur," and that a person may have standing to obtain injunctive relief even when he is denied standing to sue for treble damages. Indeed, the test for standing under § 16 has been framed in terms of a proximate cause standard that is "less constrained" than that under § 4 and which might in fact be no more rigorous than the general rule of standing.

Mid-West Paper Prod. Co. v. Continental Group, 596 F.2d 573, 591-92 (3d Cir. 1979) (emphasis in original) (footnotes omitted). Therefore, the district court can still fashion injunctive relief that will bar the merger, require Allegheny Power to reinstate its application to the PUC to furnish power to the City's Redevelopment Zones, even if the merger is permitted to go through, [4] or alternatively, to give such other relief as will ensure that the **[**52]** City obtains the advantage of competitive pricing.

For the reasons stated above, I respectfully dissent.

End of Document

---

[4] In an October 17, 1997 letter from Allegheny Power's president, Alan Noia, to Pittsburgh Mayor Thomas Murphy, Noia states: "I am, therefore, committing to you that, if the . . . PUC grants the City's request . . . to allow utilities other than Duquesne Light Company to provide electric service to the two economic development zones, subject to PUC approval, . . . [Allegheny Power] will expand its service territory to include the economic development zones." (J.A. at 499a.) This letter was sent **after** the proposed merger.

United States v. Tucor Int'l, Inc.

Criminal Law & Procedure > ... > Standards of Review > Plain Error > General Overview

HN1[] **Summary Judgment, Evidentiary Considerations**

Under *Fed. R. Crim. P. 12(b)*, any defense, objection or request which is capable of determination without the trial of the general issue may be raised before trial by a motion. In considering a pretrial motion to dismiss an indictment, the court must presume the truth of the allegations in the charging instrument. The court should not consider evidence that does not appear on the face of the indictment. To grant a motion to dismiss based on evidence outside the indictment would be tantamount to granting summary judgment for a criminal defendant. Unlike in civil cases, there is no such summary judgment procedure in a criminal case.

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

HN2[] **Postconviction Proceedings, Coram Nobis**

The writ of error coram nobis affords a remedy to attack a conviction when the defendant has served his sentence and is no longer in custody. Specifically, the writ provides a remedy for those suffering from the lingering collateral consequences of an unconstitutional or unlawful conviction based on errors of fact and egregious legal errors.

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

Criminal Law & Procedure > Sentencing > Corrections, Modifications & Reductions > General Overview

Criminal Law & Procedure > Postconviction Proceedings > Motions to Set Aside Sentence

HN3[] **Postconviction Proceedings, Coram Nobis**

A convicted defendant in federal custody may petition to have a sentence of conviction vacated, set aside or corrected under the federal habeas corpus statute. *28 U.S.C.S. § 2255*. If, however, the sentence has been served, there is no statutory basis to remedy the lingering collateral consequences of the unlawful conviction. Recognizing this gap, the Supreme Court has held that the common law petition for writ of error coram nobis is available in such situations, even though the procedure authorizing the issuance of the writ was abolished in civil cases by *Fed. R. Civ. P. 60(b)*. District courts are therefore authorized to issue the writ in federal criminal matters pursuant to the All Writs Act, *28 U.S.C.S. § 1651(a)*, but may not entertain a petition for the writ with respect to challenges to state convictions.

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

HN4[] **Postconviction Proceedings, Coram Nobis**

A request for a writ of error coram nobis should be filed as a motion in the criminal case, rather than as a separate case. It is a step in the criminal case and not, like habeas corpus where relief is sought in a separate case and record, the beginning of a separate civil proceeding.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

HN5[] **Justiciability, Case & Controversy Requirements**

To qualify for coram nobis relief, four requirements must be satisfied: (1) a more usual remedy is not available; (2) valid reasons exist for not attacking the conviction earlier; (3) adverse consequences exist from the conviction sufficient to satisfy the case and controversy requirement of Article III; and (4) the error is of the most fundamental character.

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

Criminal Law & Procedure > ... > Custody Requirement > Noncustody Determinations > General Overview

HN6[] **Postconviction Proceedings, Coram Nobis**

Coram nobis relief is not limited to individuals. A corporation, not in custody and thus without access to *28 U.S.C.S. § 2255* relief, can use the writ to attack an unconstitutional conviction.

HN7[] **Regulations & Statutes, Shipping Act**

Section 7(a)(4) of the Shipping Act of 1984, 46 U.S.C.S. app. § 1706(a)(4), provides that the antitrust laws do not apply to any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade.

Governments > Legislation > Interpretation

Governments > Legislation > Interpretation > Rule of Lenity

HN8[] **Legislation, Interpretation**

When interpreting a statute, the court must look first to the plain meaning of the statute's language. If the plain language appears to settle the question, the court looks to legislative history only to determine whether there is clearly expressed legislative intent that is contrary to the plain language. Only in rare or exceptional circumstances will the plain language not control if the statute is unambiguous. If the plain language does not settle the question, then the Court looks to other sources, such as the legislative history, to decipher the meaning of the ambiguous language. In a criminal case, ambiguous language must be interpreted in defendant's favor under the rule of lenity.

Governments > Legislation > Interpretation

HN9[] **Legislation, Interpretation**

The plain meaning to be discerned is not the plain meaning of an isolated provision, but instead the plain meaning of the whole statute.

HN12[] **Regulations & Statutes, Shipping Act**

Section 7 of the Shipping Act of 1984, 46 U.S.C.S. app. § 1706, provides six exemptions from antitrust liability. The antitrust laws do not apply to(4) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade; (5) any agreement or activity to provide or furnish wharfage, dock, warehouse, or other terminal facilities outside the United States; or (6) subject to § 1719(e)(2) of the act, any agreement, modification, or cancellation approved by the Commission before the effective date of this chapter under 46 U.S.C.S.C app. § 814, or permitted under 46 U.S.C.S.C app. § 813a, and any properly published tariff, rate, fare, or charge, classification, rule or regulation explanatory thereof implementing that agreement, modification or cancellation. 46 U.S.C.S. app. § 1706.

HN14[] **Admiralty & Maritime Law, Practice & Procedure**

Ocean carriers who operate between foreign ports do not fall within the Shipping Act of 1984's definition of "ocean common carrier" and can not benefit from 46 U.S.C.S. app. § 1706(a)(1) immunity by filing their foreign-to-foreign agreements with the Federal Maritime Commission. A carrier is an "ocean common carrier" within the meaning of the Act only to the extent that it holds itself out to provide transportation between the United States and a foreign country.

HN16[] Regulations & Statutes, Shipping Act

Section 7(a)(4) of the Shipping Act of 1984, 46 U.S.C.S. app. § 1706(a)(4), is not limited to agreements involving ocean common carriers. The statutory immunity is available for agreements among non-ocean common carriers so long as those agreements concern the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade. 46 U.S.C.S. app. § 1706(a)(4).

Admiralty & Maritime Law > Shipping > Regulations & Statutes > Shipping Act

Transportation Law > Carrier Duties & Liabilities > Through Rates

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > Rates & Tariffs

Transportation Law > Carrier Duties & Liabilities > Freight Brokers & Forwarders

HN17[] Regulations & Statutes, Shipping Act

The Shipping Act of 1984 defines "through transportation" as continuous transportation between origin and destination for which a through rate is assessed and which is offered or performed by one or more carriers, at least one of which is a common carrier, between a United States point or port and a foreign point or point. 46 U.S.C.S. app. § 1702(26). The Act defines "through rate" as the single amount charged by a common carrier in connection with through transportation. 46 U.S.C.S. app. § 1702(25).

Transportation Law > Carrier Duties & Liabilities > Freight Brokers & Forwarders

Transportation Law > Carrier Duties & Liabilities > General Overview

Transportation Law > Carrier Duties & Liabilities > Through Rates

Transportation Law > Water Transportation > General Overview

HN18[] Regulations & Statutes, Shipping Act

Section 1702(17) of the Shipping Act of 1984 provides that "non-vessel-operating common carrier" means a common carrier that does not operate the vessels by which the ocean transportation is provided, and is a shipper in its relationship with an ocean common carrier. 46 U.S.C.S. app. § 1702(7).

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Governments > Legislation > Interpretation

Governments > Legislation > Interpretation > Rule of Lenity

HN19[] Defenses, Ambiguities & Mistakes

In criminal prosecutions the rule of lenity requires that ambiguities in the statute be resolved in the defendant's favor. Where a criminal law is ambiguous, courts are wary of imposing criminal liability for conduct that the law does not clearly prohibit. The fact that the ambiguity is contained in a statutory exemption, rather than the statutory definition of the criminal conduct, does not preclude application of this rule.

Criminal Law & Procedure > Postconviction Proceedings > Coram Nobis

Criminal Law & Procedure > ... > Entry of Pleas > Guilty Pleas > General Overview

Criminal Law & Procedure > Sentencing > Fines

HN20[] Postconviction Proceedings, Coram Nobis

A corporation that has been sentenced only to a fine can employ a writ of error coram nobis to attack an unconstitutional conviction.

Business & Corporate Compliance > ... > Transportation Law > Water Transportation > Rates & Tariffs

Criminal Law & Procedure > ... > Accusatory Instruments > Indictments > General Overview

HN21[] Water Transportation, Rates & Tariffs

While an indictment must ordinarily charge every essential element of an offense, it need not negate every applicable statutory exception.

Criminal Law & Procedure > ... > Entry of Pleas > Types of Pleas > General Overview

Criminal Law & Procedure > ... > Accusatory Instruments > Indictments > General Overview

Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > General Overview

Criminal Law & Procedure > ... > Entry of Pleas > Guilty Pleas > General Overview

Criminal Law & Procedure > ... > Guilty Pleas > Allocution & Colloquy > Waiver of Defenses

HN22[] Entry of Pleas, Types of Pleas

A defendant may attack a guilty plea by asserting jurisdictional claims that the applicable statute is unconstitutional or that the indictment fails to state an offense. Although a guilty plea generally waives all claims of constitutional violation occurring before the plea, jurisdictional claims are an exception to this rule. Although the dividing line between constitutional claims waived by a plea of guilty and those that survive the plea is not always clear, claims that the applicable statute is unconstitutional or that the indictment fails to state an offense are jurisdictional claims not waived by the guilty plea.

Criminal Law & Procedure > ... > Accusatory Instruments > Indictments > General Overview

Criminal Law & Procedure > ... > Entry of Pleas > Guilty Pleas > General Overview

Criminal Law & Procedure > ... > Guilty Pleas > Allocution & Colloquy > Waiver of Defenses

HN23[] **Accusatory Instruments, Indictments**

By pleading guilty, a defendant waives its right to contest the facts to which it admits. However, the defendant does not waive its right to assert that the conduct alleged in the indictment, accepted as true, does not constitute a crime.

Criminal Law & Procedure > ... > Discovery & Inspection > Brady Materials > Brady Claims

Criminal Law & Procedure > ... > Discovery & Inspection > Brady Materials > General Overview

Criminal Law & Procedure > Preliminary Proceedings > Pretrial Motions & Procedures > Suppression of Evidence

HN24[] **Brady Materials, Brady Claims**

Suppression by the prosecution of evidence favorable to an accused upon request violates due process where the evidence is material to guilt or to punishment, irrespective of good faith or bad faith of the prosecution. This obligation by its own terms reaches evidence. The focus of the obligation is on providing defendants access to exculpatory evidence to which they otherwise would not have access. This logic does not apply to published legal authority, particularly where defendant is represented by counsel who undoubtedly has access to the materials in question.

Criminal Law & Procedure > Preliminary Proceedings > Entry of Pleas > Role of Court

Legal Ethics > Professional Conduct > Tribunals

HN25[] **Entry of Pleas, Role of Court**

Attorneys have a continuing duty to inform the court of any development which may conceivably affect the outcome of the litigation. Furthermore, an United States Attorney has an even greater obligation than a private litigant to see that justice is done.

Criminal Law & Procedure > Defenses > Selective Prosecution

Criminal Law & Procedure > ... > Entry of Pleas > Guilty Pleas > General Overview

Criminal Law & Procedure > ... > Guilty Pleas > Allocution & Colloquy > Waiver of Defenses

Criminal Law & Procedure > Defenses > General Overview

HN26[] **Defenses, Selective Prosecution**

A selective prosecution claim is foreclosed once a defendant pleads guilty.

Counsel: For United States, Plaintiff: Reginald K. Tom, Esq., Roger W. Fones, Esq., Department of Justice, Washington, D.C.

For Luzon Moving and Storage, Philippine-American Moving and Storage, George Schulze, Sr., George Schulze, Jr., Defendants: Warren L. Dean, Jr., Esq., DYER ELLIS & JOSEPH, Washington, D.C.

For Tucor Industries, Defendant: James R. Wyrsch, Esq., Charles M. Rogers, Esq., HOBBS MARAKIAN & LEE, Kansas City, Missouri.

For Tucor Industries, Defendant: Phillip Torres, Esq., GAYLE & TEKER, Agana Guam.

For Tucor Industries, Defendant: Jerrold M. Ladar, Esq., LADAR & LADAR, San Francisco, CA.

Judges: D. Lowell Jensen, United States District Judge.

Opinion by: D. Lowell Jensen

Opinion

[*1175] ORDER

On December 3, 1997, the Court heard argument on defendant Tucor Industries' petition for a writ of error coram nobis and the Luzon defendant's motion to dismiss the indictment. Reginald K. Tom and Roger W. Fones appeared on behalf of the United States; Warren L. Dean, Jr. appeared for Luzon **[**2]** Moving and Storage Corporation, Philippine-American Moving and Storage Corporation, George Schulze, Sr., and George Schulze, Jr.; James R. Wyrsch, Charles M. Rogers, Phillip Torres and Jerrold M. Ladar appeared for Tucor Industries, Inc. Having considered the arguments of counsel, the papers submitted, the applicable law, and the record in this case, the Court hereby GRANTS the Luzon defendants' motion to dismiss the indictment and GRANTS Tucor Industries's petition for a writ of error coram nobis.

I. BACKGROUND

A. *Factual Background and Procedural History*

Defendants are corporations and individuals engaged in the business of transporting goods to and from United States military bases in the Philippines. Defendants were indicted on September 9, 1992 for violating *Section 1* of the Sherman Act, *15 U.S.C. § 1*. The indictment charges that defendants [1] conspired "to suppress competition by fixing prices for moving services supplied in connection with the transportation of military shipments of household goods between the Philippines and the United States." Indictment P 2. Defendants contend that because they provided transportation services solely within the Philippines, **[**3]** any price fixing activity was not unlawful pursuant to the Shipping Act of 1984, § 7(a)(4), 46 U.S.C. App. § 1706(a)(4).

1. *The Tucor Defendants*

Tucor Industries, Inc. is a Philippine company that is affiliated with and partly owned by Tucor International, Inc. Defendants Patrick B. Boll and Dale C. Bailey were corporate officers of defendant Tucor Industries. The indictment charged defendants Tucor International, Tucor Industries, Boll and Bailey ("the Tucor defendants") with one count of conspiring to fix prices in violation of the Sherman Act, *15 U.S.C. § 1*.

---

[1] The original indictment was brought against Tucor International, Inc.; Tucor Industries, Inc. d/b/a Tucor Moving and Storage; Philippine-American Moving & Storage Corp.; Luzon Moving & Storage Corp.; D.M. Nazareno & Sons, Inc.; Apex Moving & Storage Corp.; Jose C. Singson, Jr.; George Schulze, Sr.; George Schulze, Jr.; Arturo G. Nazareno; Patrick B. Boll; and Dale C. Bailey.

At their arraignment following the return of the indictment, the Tucor **[**4]** defendants entered pleas of not guilty. On November 18, 1992, the Tucor defendants filed various pre-trial motions, including two motions challenging the jurisdiction of the Court. In one of these motions, defendants sought "dismissal of indictment on the grounds of primary jurisdiction, implied immunity, § 6A, and vagueness." In the other, defendants moved "to dismiss the indictment on grounds of jurisdiction and comity." The United States filed memoranda in opposition to these pre-trial motions. The Court conducted a hearing on defendants' motions on December 2, 1992.

While the Tucor defendants' motions to dismiss were under submission, the parties filed a plea agreement with the Court. The Court held a plea hearing on June 16, 1993. [2] **[**5]** **[*1176]** During the hearing, the Court accepted Tucor Industry's guilty plea and imposed a sentence of a $ 121,800 fine and a $ 200 special assessment. Pursuant to the plea agreement, the United States moved to dismiss he charges against defendants Tucor International and Bailey. [3] Judgment was entered against Tucor Industries on June 22, 1993. *See* June 22, 1993 Judgment, as amended on June 25, 1993.

On August 15, 1997, defendant Tucor Industries ("Tucor") filed a petition for a writ of error coram nobis. Tucor argues that the Shipping Act of 1984 exempted it from criminal liability for price fixing and hence the conduct charged in the indictment could not constitute a crime. Tucor seeks to set aside its June 16, 1993 guilty plea.

The government filed its opposition to defendant's petition on September 10, 1997. Defendant filed its reply on September 22, 1997. At an October 8, 1997 hearing on the matter, the Court ordered the United States to provide further briefing regarding the applicability of the Shipping Act immunities to the conduct charged in the indictment. On November 7, 1997, the United States filed a supplemental memorandum in opposition to Tucor's petition to which Tucor filed a reply on November 10, 1997.

2. *The Luzon Defendants*

Defendants Luzon Moving & Storage Corp. ("Luzon"), Philippine-American Moving & Storage Corp. ("PAMSC"), George Schulze, Sr. and George Schulze, Jr. were charged **[**6]** with one count of conspiring to fix prices in violation of the Sherman Act, *15 U.S.C. § 1*. Luzon and PAMSC claim to be corporations organized under Philippine law with their principle and sole place of business in the Philippines. Defendants George Schulze, Sr. and George Schulze, Jr. claim to be Philippine citizens who reside in the Philippines and are officers and sole shareholders of defendants Luzon and PAMSC. These defendants have not appeared before this Court for arraignment.

On August 15, 1997, defendants Luzon, PAMSC, Schulze, Sr., and Schulze, Jr. ("the Luzon defendants"), filed a motion for leave to make a special appearance for the limited purpose of filing a motion to dismiss the indictment. On the same date, defendants also filed their motion to dismiss the indictment. The Luzon defendants contend that the Shipping Act of 1984, § 7(a)(4), 46 U.S.C. App. § 1706(a)(4), immunizes them from liability for antitrust violations and, as a result, the indictment should be dismissed. On September 10, 1997, the government filed its opposition to defendants' motion for leave to make a special appearance. The government did not, however, file an opposition to defendants' motion **[**7]** to dismiss the indictment.

In an order dated October 20, 1997, the Court granted the Luzon defendants motion for leave to make a special appearance to file their motion to dismiss the indictment. Pursuant to the Court's order at the October 8, 1997 hearing, the United States filed a memorandum on November 7, 1997 in opposition to defendants' motion to dismiss the indictment. The Luzon defendants filed a reply on November 19, 1997. The matter has now been fully briefed and is properly before the Court. [4]

---

[2] At the hearing, defendants were represented by Phillip Torres and Jerrold Ladar, both of whom remain as current counsel for Tucor Industries in this matter.

[3] Defendant Boll died on April 16, 1993 and thus was not part of the plea agreement.

[4] Following the December 3, 1997 hearing on the Luzon defendants' motion and Tucor's petition, the Court received a number of submissions from the parties. *See* Government's Letter Briefs, received December 18, 1997 and January 23, 1998; Defendants' Letter Briefs, received December 23, 1997 and February 9, 1998 (responding to government's Letter Briefs).

B. *Legal Standards*

1. *Dismissal of Indictment*

HN1[] Under *Federal Rule of Criminal Procedure 12(b)*, "any defense, objection or request which is **[**8]** capable of determination without the trial of the general issue may be raised before trial by a motion." *Fed. R. Crim. P. 12(b)*. In considering a pretrial motion to dismiss an indictment, the court "must presume the truth of the allegations in the charging instrument." *United States v. Jensen, 93 F.3d 667, 669 (9th Cir. 1996)*. The court should not consider evidence that does not appear on the face of the indictment. *Id; see also* *United States v. Chant, 1997 U.S. Dist. LEXIS 4714, 1997 WL 231105*, *4 (N.D.Cal. 1997). To grant a motion **[*1177]** to dismiss based on evidence outside the indictment would be tantamount to granting summary judgment for a criminal defendant. *See* *Jensen, 93 F.3d at 669*. Unlike in civil cases, there is no such summary judgment procedure in a criminal case. *Id.*

2. *Writ of Error Coram Nobis*

HN2[] The writ of error coram nobis affords a remedy to attack a conviction when the defendant has served his sentence and is no longer in custody. *Telink, Inc. v. United States, 24 F.3d 42, 45 (9th Cir. 1994)*; *United States v. Walgren, 885 F.2d 1417, 1420 (9th Cir. 1989)*. Specifically, the "writ provides a remedy for those suffering from the 'lingering collateral consequences of an unconstitutional **[**9]** or unlawful conviction based on errors of fact' and 'egregious legal errors.'" *Walgren, 885 F.2d at 1420* (quoting *Yasui v. United States, 772 F.2d 1496, 1498, 1499* & n.2 (9th Cir. 1985)).

The writ fills a very precise gap in federal criminal procedure. **HN3**[] A convicted defendant in federal custody may petition to have a sentence of conviction vacated, set aside or corrected under the federal habeas corpus statute, *28 U.S.C. § 2255*. *United States v. Hayman, 342 U.S. 205, 207, 96 L. Ed. 232, 72 S. Ct. 263 (1952)*. If, however, the sentence has been served, there is no statutory basis to remedy the "lingering collateral consequences" of the unlawful conviction. *Yasui, 772 F.2d at 1498*. Recognizing this gap, the Supreme Court has held that the common law petition for writ of error coram nobis is available in such situations, even though the procedure authorizing the issuance of the writ was abolished in civil cases by *Federal Rule of Civil Procedure 60(b)*. *United States v. Morgan, 346 U.S. 502, 505 n.4, 98 L. Ed. 248, 74 S. Ct. 247 (1954)*. District courts are therefore authorized to issue the writ in federal criminal matters pursuant to the All Writs Act, *28 U.S.C. § 1651(a)*, **[**10]** *id. at 506*, *Walgren, 885 F.2d at 1420*, but may not entertain a petition for the writ with respect to challenges to state convictions, *Sinclair v. Louisiana, 679 F.2d 513, 513-15 (5th Cir. 1982)*; *see also* *Madigan v. Wells, 224 F.2d 577, 578 n.2 (9th Cir. 1955)* (writ of error coram nobis can only issue to aid jurisdiction of court in which conviction was had), *cert. denied*, *351 U.S. 911, 100 L. Ed. 1446, 76 S. Ct. 700 (1956)*. [5]

HN5[] To qualify for coram nobis relief, four requirements must be satisfied: (1) a more usual remedy is not available; (2) valid reasons exist for not attacking the conviction earlier; (3) adverse consequences exist from the conviction sufficient **[**11]** to satisfy the case and controversy requirement of Article III; and (4) the error is of the most fundamental character. *Estate of McKinney v. United States, 71 F.3d 779, 781-782 (9th Cir. 1995)* (citation omitted).

HN6[] Coram nobis relief is not limited to individuals. A corporation, not in custody and thus without access to § 22554 relief, can use the writ to attack an unconstitutional conviction. *United States v. Mett, 65 F.3d 1531 (9th Cir. 1995)*; *see also* *United States v. Rad-O-Lite of Philadelphia, Inc., 612 F.2d 740, 744 (3d Cir. 1979)* ("courts regularly have allowed corporations to petition for coram nobis").

II. ARGUMENTS

---

[5] **HN4**[] A request for a writ of error coram nobis should be filed as a motion in the criminal case, rather than as a separate case. It "is a step in the criminal case and not, like habeas corpus where relief is sought in a separate case and record, the beginning of a separate civil proceeding." *United States v. Morgan, 346 U.S. at 505 n.4*.

Tucor has petitioned for a writ of error coram nobis to set aside its guilty plea. The Luzon defendants argue that the indictment against them should be dismissed. Both motions are founded upon defendants' contention that the conduct alleged in the indictment was immunized by the Shipping Act of 1984.

A. *Shipping Act of 1984*

The parties dispute the scope of an exemption from antitrust liability found in ***HN7***[] Section 7(a)(4) of the Shipping Act of 1984, 46 U.S.C. App. § 1706(a)(4). Specifically, that section provides:

> The antitrust **[**12]** laws do not apply to . . . any agreement or activity concerning the foreign inland segment of through transportation **[*1178]** that is part of transportation provided in a United States import or export trade.

46 U.S.C. App. § 1706(a)(4). According to the government, this section grants immunity only to ocean common carriers. Defendants, on the other hand, contend that the language, structure and purpose of the Shipping Act do not support the government's narrow construction of this exception.

1. *Statutory Interpretation*

HN8[] When interpreting a statute, this Court must look first to the plain meaning of the statute's language. *United States v. Neal, 976 F.2d 601, 602 (9th Cir. 1992)*. If the plain language appears to settle the question, the Court looks to legislative history only to determine whether there is clearly expressed legislative intent that is contrary to the plain language. *Id.* Only in rare or exceptional circumstances will the plain language not control if the statute is unambiguous. *United States v. LeCoe, 936 F.2d 398, 402 (9th Cir. 1991)*. If the plain language does not settle the question, then the Court looks to other sources, such as the legislative history, **[**13]** to decipher the meaning of the ambiguous language. In a criminal case, ambiguous language must be interpreted in defendant's favor under the rule of lenity. *See* *Bifulco v. United States, 447 U.S. 381, 387, 65 L. Ed. 2d 205, 100 S. Ct. 2247 (1980)*; *United States v. Carpenter, 933 F.2d 748, 751 (9th Cir. 1991)*; *United States v. Plaza Health Laboratories, Inc., 3 F.3d 643, 649 (2d Cir. 1993)*.

a. *Plain Meaning of the Statute*

As noted above, Section 7(a)(4) of the Shipping Act of 1984 provides that "the antitrust laws do not apply to . . . any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade." 46 U.S.C. App. § 1706(a)(4). On its face, this immunity does not appear to be limited to agreements by or among ocean carriers as suggested by the government. Instead, it appears that the immunity would apply to an agreement between companies providing foreign inland moving services so long as the services were part of "through transportation."

The government correctly points out that ***HN9***[] the plain meaning to be discerned is not the plain meaning of an isolated provision, **[**14]** but instead the plain meaning of the whole statute. Gov't Supp. Mem. at 6:4-14 (citing *Beecham v. United States, 511 U.S. 368, 372, 128 L. Ed. 2d 383, 114 S. Ct. 1669 (1994)*; *John Hancock Mut. Ins. Co. v. Harris Trust & Sav. Bank, 510 U.S. 86, 94, 126 L. Ed. 2d 524, 114 S. Ct. 517 (1993))*. According to the government, looking at the Section 7 immunities in light of Section 4 of the Act makes clear that defendants' interpretation of Section 7 is inconsistent with the plain meaning of the statute.

Entitled "Agreements Within Scope of Act," ***HN10***[] Section 4 states that the Act applies to certain agreements "by or among ocean common carriers," and "among marine terminal operators and among one or more marine terminal operators and one or more ocean common carriers." *See* 46 U.S.C. App. § 1702(a) (ocean common carriers), § 1702(b) (marine terminal operators). No other agreements are mentioned in that section. According to the government, agreements among foreign motor carriers do not fall within Section 4 and are therefore outside the scope of the Act.

Defendants contend that the government is, in effect, reading the word "only" into Section 4. Section 4(a) states that "this chapter **[**15]** applies to agreements by or among ocean common carriers . . . ." It does not state that this chapter "only" applies to those agreements. Rather than limit the Section 7 exemptions, defendants argue, Section

4 merely defines the types of agreements for which a filing must be made under Section 5 [6] and for which immunity under Section 7(a)(1) and 7(a)(2) will apply.

i. *Section 7(a) Exemptions*

HN11[] Section 7 of the Act provides six exemptions from antitrust liability:

> The antitrust laws do not apply to--
>
> **[*1179]** (1) any agreement that has been filed under section 1704 of this title and is effective under section 1704(d) or section 1705 of this title, or is exempt under section 1715 of this title from any requirement of this **[**16]** chapter;
> (2) any activity or agreement within the scope of this chapter, whether permitted under or prohibited by this chapter, undertaken or entered into with a reasonable basis to conclude that (A) it is pursuant to an agreement on file with the Commission and in effect when the activity took place, or (B) it is exempt under section 1715 of this title from any filing requirement of this chapter;
>
> (3) any agreement or activity that relates to transportation services within or between foreign countries, whether or not via the United States, unless that agreement or activity has a direct, substantial, and reasonably foreseeable effect on the commerce of the United States;***HN12***[]
> (4) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade;
> (5) any agreement or activity to provide or furnish wharfage, dock, warehouse, or other terminal facilities outside the United States; or
>
> (6) subject to section 1719(e)(2) of this title, any agreement, modification, or cancellation approved by the Commission before the effective date of this chapter under section 814 of this title, or permitted **[**17]** under section 813a of this title, and any properly published tariff, rate, fare, or charge, classification, rule or regulation explanatory thereof implementing that agreement, modification or cancellation.

46 U.S.C. App. § 1706. The government takes the position that each of these exemptions only reaches agreements of or between ocean common carriers. If any one of these provisions grants immunity to an agreement not involving an ocean common carrier, then the government's argument -- that Section 4 limits the scope of the Act to agreements with ocean common carriers -- must fail.

The government's position is that exemptions (1) and (2) apply to agreements filed under the Act, while (3) through (5) apply to ocean common carrier agreements that are described in Section 4, but exempted from filing under Section 5(a). ***HN13***[] Section 5(a) exempts from the filing requirements

> agreements related to transportation to be performed within or between foreign countries and agreements among common carriers to establish, operate, or maintain a marine terminal in the United States.

46 U.S.C. App. § 1704(a). In essence, the government argues that exemptions (3) through (5) are **[**18]** gap-fillers that provide immunity for certain unfiled ocean common carrier agreements, but do not extend immunity to non-ocean common carrier agreements.

Under the government's theory, exemptions (3) and (4) provide immunity for agreements related to transportation to be performed within or between foreign countries, since such agreements need not be filed under the Act. *See* 46 U.S.C. App. § 1704(a). The government explains that exemptions (3) and (4) are not redundant, although they do overlap. According to the government, exemption (3) provides immunity only for an agreement of an ocean common carrier relating to transportation within or between foreign countries where the agreement does not have a direct, substantial, and reasonably foreseeable effect on United States commerce. Exemption (4), on the other hand, supplements exemption (3) by immunizing agreements of ocean carriers relating to the foreign inland

[6] Section 5(a), 46 U.S.C. App. 1704(a), requires the filing of a conference agreement with the FMC. Section 5(b), 46 U.S.C. App. 1704(b), sets forth the requisite contents of any filed conference agreement, and section 6, 46 U.S.C. App. § 1705, governs the disposition of filed agreements.

segment of "through transportation," which by its nature has an effect on United States commerce. Thus, the government argues that exemption (4) has independent significance even if both (3) and (4) are limited to the agreements of ocean common carriers.

Defendants identify **[**19]** several problems with the government's interpretation of these exemptions. First, defendants argue that Section 7(a)(3) can only be interpreted as applying to persons *other than* "ocean common carriers" in light of the Ninth Circuit's opinion in *Transpacific Westbound Rate Agreement v. Federal Maritime Commission, 951 F.2d 950 (9th Cir. 1991)*. In *Transpacific*, the Ninth Circuit upheld the FMC's determination that ***HN14***[] ocean carriers who operated between foreign ports did not fall within the **[*1180]** Act's definition of "ocean common carrier" and could not benefit from Section 7(a)(1) immunity by filing their foreign-to-foreign agreements with the FMC. *Id. at 953*. The Court approved the FMC's finding that a carrier is an "ocean common carrier" within the meaning of the Act, "only to the extent that it holds itself out to provide transportation between the United States and a foreign [country] . . . ." *Id.* Defendants point out that exemption (3) by its terms does not involve ocean transportation between the United States and a foreign country. Instead, the provision exempts agreements concerning services between foreign countries. Such agreements, under *Transpacific*, do not **[**20]** appear to be agreements involving "ocean common carriers."

Second, defendants contend that the government's "gap filling" theory misinterprets the "gap" created by Section 5(a) of the Act. Section 5(a) exempts from FMC filing "agreements related to transportation to be performed within or between foreign countries . . . ." 46 U.S.C. App. § 1704(a). It is the government's position that the activities described in exemptions (3) and (4), when performed by ocean common carriers, would not be filed under Section 5(a) or immunized under Section 7(a)(1) or 7(a)(2). Exemptions (3) and (4) would provide immunity to these agreements not otherwise covered.

The government's argument ignores the fundamental distinction between "transportation to be performed within or between foreign countries" and "the inland segment of through transportation." Exemption (3) deals with the former and could arguably fill a gap created by Section 5(a). Exemption (4), on the other hand, deals with through transportation, a term of art under the Act, and Section 5(a) in no way exempts ocean carriers from filing agreements relating to the foreign inland segment of through transportation.

ii. *Section 7(b)*

[21]** Section 7(b) states the types of agreements to which the Act does not extend antitrust immunity. Defendants look to Section 7(b)(1) for support of their position that the Section 7(a)(4) exemption is not limited to ocean common carriers. ***HN15***[] Section 7(b)(1) provides:

> This chapter does not extend antitrust immunity to any agreement with or among air carriers, rail carriers, motor carriers, or common carriers by water not subject to this chapter with respect to transportation within the United States.

46 U.S.C. App. § 1706(b)(1). Defendants contend that if Section 7(a)'s antitrust immunities apply only to agreements of ocean common carriers, as the government contends, then Section 7(b)(1)'s preservation of antitrust liability for agreements among motor carriers would be superfluous.

In response to this argument, the government asserts that defendants ignore the fact that 7(b)(1) speaks of agreements *with and among* motor carriers. According to the government, 7(b)(1) reflects a legislative compromise designed to allow ocean carriers to agree on overall through rates, but not to enter into agreements with domestic inland carriers. Yet the government fails to explain **[**22]** why 7(b)(1) refers to agreements "among" motor carriers. If only agreements "with" ocean common carriers were entitled to immunity under the act, there would be no need to reserve liability for agreements "among" domestic carriers. The presence of such a provision strongly supports defendants' position that the immunity under the Act reaches beyond agreements of ocean common carriers.

iii. *Conclusion: Plain Meaning*

This Court concludes that the Section 7(a)(4) immunity means what it says, and is not limited by Section 4. The government's attempt to limit the scope of the immunity by reading "only" into Section 4 of the Act is unconvincing for several reasons. First, the interpretation of Section 7(a)(3) offered by the government is undermined by the Ninth Circuit's decision in *Transpacific*. Second, the government's interpretation of Section 7(a)(4) fails to recognize the ocean common carrier's obligation to file agreements relating to the foreign inland segment of through transportation. Third, the language of Section 7(b)(1) suggests that Congress understood the grant of immunity to extend to agreements among motor carriers unless explicitly withdrawn as in that section. **[**23]** Thus, the Court concludes that the plain meaning **[*1181]** of the statute does not support limiting the scope of the Section 7(a)(4) immunity to agreements of ocean common carriers.

b. *Legislative History*

Since the plain language appears to settle the question, the Court looks to legislative history only to determine whether there is clearly expressed legislative intent that is contrary to the plain language. *United States v. Neal, 976 F.2d 601, 602 (9th Cir. 1992)*. Only in rare or exceptional circumstances will the plain language not control if the statute is unambiguous. *United States v. LeCoe, 936 F.2d 398, 402 (9th Cir. 1991)*. The Court will now review the legislative history in order to determine whether the interpretation urged by the government is compelled by clearly expressed legislative intent.

The government points to legislative history that could arguably support its position that Section 4 was intended to limit the scope of the Section 7 immunities. In the 97th Congress, the Senate Judiciary Committee amended Section 4 of H.R. 4374, the proposed "Shipping Act of 1982". The committee changed the title of the section from "Authorized Activities" to "Agreements Within **[**24]** Scope of the Act." A similar change was made in the introductory sentence of Section 4(a) which was amended to state that "This act applies to agreements among ocean carriers . . . ." H.R. Rep. No. 97-611, Pt. 2 at 3 (1982). The Committee explained that

> through these changes, the Committee makes clear that this section is not intended to define what conduct is or is not authorized under the Act, but rather to indicate the scope of the Act for purposes of defining the breadth of the antitrust exemption set forth in Section 7 of the bill.

H.R. Rep. No. 97-611, Pt. 2 at 31 (1982). In the following Congress when the Shipping Act was passed, the House Merchant Marine and Fisheries Committee said of Section 4 that "This section states the coverage of the bill. It lists the type of agreements to which the bill applies. When read in connection with sections 4 and 7, the effect is to remove the listed agreements from the reach of the antitrust laws as defined in the bill." H.R. Rep. No. 98-53, Pt. 1 at 29 (1983).

Defendants contend that the above quoted references to "Section 7" are really only references to the first exemption found in Section 7. Defendants point out that **[**25]** at when the Judiciary Committee amended Section 4 as described above, the Committee also made significant changes to Section 7 of the Act. In explaining the changes to the Section 7(a)(1) exemption, the Committee stated that the 7(a)(1) provision "defines the scope of the full antitrust immunity conferred by the bill." H.R. Rep. No. 97-611, pt. 2 at 32-33 (1982). Under these circumstances, defendants argue that the description of Section 4 as indicating "the scope of the act for purposes of defining the breadth of the antitrust exemption" can only be read as a reference to Section 7(a)(1).

For affirmative support of their position that Section 7(a)(4) is not limited to agreements with or among ocean common carriers, defendants point to the influence of the Council of European and Japanese National Shipowners Association (CENSA) on the development of an earlier version of the legislation. CENSA proposed an amendment to the 1981 Senate bill, S. 1593, that would have added the following category to the list of agreements granted antitrust immunity:

> any agreement that concerns or involves joint or through intermodal transportation, or other transportation and related services **[**26]** between or within any foreign country or place . . . .

In commenting on the antitrust immunities of the bill, CENSA's representative testified as follows:

> The word "solely" in Section 8(a)(3) could be construed, for example, as excluding from the intended ***antitrust law*** exemption arrangements by conferences or ocean carriers for inland *foreign* motor, rail or air transportation in connection with intermodal routes and services. Also to be kept in mind is the fact that other countries take strong issue with the application of the antitrust laws as well as the Shipping Act to transportation

> arrangements and activities performed within their jurisdictions. Our suggested amendment to Section 8(a) would implement the policy objective of harmonizing U.S. practices with those of its trading partners and would reduce jurisdictional friction and confrontations.
>
> **[*1182]** Surely, applications of the antitrust laws to consolidating and forwarding arrangements and services in other countries as envisaged in the present wording of Section 8(a)(5) would wrongfully invade the jurisdictions of trading partner sovereigns.

Def. Exh. 24, *1981 Shipping Act: Hearing Before Subcommittee* **[**27]** *or Merchant Marine of the Senate Committee on Commerce, Science and Transportation*, 97th Cong. 208 (1981) (statement of Dr. Henry De La Trobe, Vice Chairman, CENSA).

Although the Senate Report on S. 1593 did not refer to the CENSA testimony, the reported bill did contain changes which appear to have addressed CENSA's concern. As introduced, the bill would have provided antitrust immunity to

> . . .
> (3) any agreement or activity that relates solely to transportation services between foreign countries;
> (4) any agreement or activity that relates to shippers' councils operating exclusively outside the United States;" and
> (5) any agreement or activity to provide or furnish warfage, dock, warehouse, or other terminal facilities exclusively outside the United States.

S. 1593, 97th Cong., 1st Sess., §§ 8(a) at 15 (1991). The reported bill, on the other hand, contained the following exemptions: "any agreement or activity that relates solely to ocean or through transportation services within or between foreign countries whether or not via the United States" and "any agreement or activity concerning the inland portion of any intermodal movement occurring outside the **[**28]** United States, through part of transportation in a United States import or export trade." S. 1593, 97th Cong., 2d Sess., § 8(a)(4) and (a)(5) at 56 (1982). To the extent that CESNA's input had an effect on a precursor provision to Section 7(a)(4), this tends to support defendants' position that the immunity was designed to cover agreements among foreign motor carriers.

The strongest support for defendants' position is found in the Report accompanying the final version of S. 1593. First, the Report states that the exemption section "extends a 'blanket' antitrust immunity to agreements of ocean common carriers, to agreements of marine terminal operators, to shippers' councils, to loyalty contracts, and to other activities regulated under the provisions of the bill." S. Rep. No. 97-414, 97th Cong., at 34 (1982). Then, after describing in detail the activities regulated under the bill that would receive antitrust immunity, the Report shifts to activities that, at least implicitly, were not regulated by the bill but would nonetheless receive immunity from antitrust prosecution:

> In addition, transportation service within or between foreign countries, terminal services in foreign **[**29]** countries, as well as the activities of foreign shippers' councils are exempted from the antitrust laws. This is done in furtherance of the policy objective of the bill to harmonize U.S. shipping regulation more closely with that of our trading partners.

Id. This language appears to recognize immunities outside the scope of conduct otherwise regulated by the filing requirements of the Act. Moreover, defendants point out that the exclusion from antitrust liability of agreements among domestic inland carriers first appeared in the reported version of S. 1593. Defendants argue that the recognition in the Senate Report of immunity for non-ocean carrier agreements coupled with the explicit denial in S. 1593 of immunity for domestic motor carrier agreements together compel the conclusion that agreements of foreign inland carriers were intended to be immunized by the proposed Act.

The legislative history appears to favor defendant's position, although it does not conclusively resolve the issue at hand. Most notably, there is no discussion in the 98th Congress of the scope of the foreign inland segment immunity. Accordingly, the Court is left to draw inferences from earlier legislative **[**30]** history on previous unenacted versions of the bill. Certainly these inferences, even if on balance they favored the government's position, which they do not, would be insufficient to overcome the plain meaning of the Act.

c. *Conclusion: Scope of Section 7(a)(4)*

Section 7(a)(4) is not limited to agreements involving ocean common carriers. To hold otherwise would be to adopt a statutory interpretation that renders other provisions of **[*1183]** the Act meaningless. Most notably, Section 7(b)(1) which preserves antitrust liability for agreements among domestic motor carriers would have been entirely unnecessary if the Act's scope was limited to ocean carriers by Section 4. Furthermore, although the legislative history does not conclusively resolve the issue, it does tend to support the defendants' view that, in an effort to harmonize United States' practices with those of our trading partners, the Act provided immunities beyond those provided for under the regulatory filing scheme set up by the statute. The legislative history certainly does not provide a basis for reaching a result contrary to the plain meaning of the Act.

For the foregoing reasons, the Court holds that ***HN16***[] Section 7(a)(4) is **[**31]** not limited to agreements involving ocean common carriers. The statutory immunity is available for agreements among non-ocean common carriers so long as those agreements concern "the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade." 46 U.S.C. App. § 1706(a)(4).

B. *The Luzon Defendants' Motion to Dismiss*

The Luzon defendants seek dismissal of the indictment on the basis that the conduct charged in the indictment falls within Section 7(a)(4), and therefore cannot constitute a violation of ***antitrust law***. The government counters that, even if Section 7(a)(4) applies to non-ocean carriers, it is not clear from the face of the indictment that the conduct alleged would fall within that exemption. As noted above, the Court may not consider evidence outside the face of the indictment in resolving defendants' motion. *See* United States v. Jensen, 93 F.3d 667, 669 (9th Cir. 1996).

1. *Conduct Described in the Indictment*

Defendants contend that the conduct alleged in the indictment relates exclusively to the "foreign inland segment of through transportation," and, as such, falls squarely within **[**32]** the Section 7(a)(4) exemption from United States antitrust laws. The indictment alleges that

> each corporate defendant engaged in the business of providing moving services in connection with the transportation of military shipments of household goods between the Philippines and the United States.

Indictment at 5:7-11. It further alleges that

> the defendants and others entered into and engaged in a combination and conspiracy to suppress competition by fixing prices for moving services supplied in connection with the transportation of military shipments of household good between the Philippines and the United States.

Id. at 2:9-14. The indictment explains how transportation services were provided and alleges that the activities described in the indictment had a substantial effect on United States trade and commerce. *Id.* at 6:12 - 8:18. In explaining the jurisdictional nexus of the alleged offenses, the indictment describes the activities of "agents" as follows:

> For outbound shipments to the United States, the agents accepted bookings on behalf of the U.S. freight forwarders they represented from U.S. military installations in the Philippines, **[**33]** packed the shipments, and transported the shipments by motor van to a port in the Philippines for transfer to an overseas carrier. For inbound shipments, the agents picked up the shipments at the port, transported the shipments by motor van to the final destination, and unloaded and unpacked the shipments.

Id. at 6:19 - 7:2. Thus, it appears from the face of the indictment that the conduct alleged -- providing moving services between Philippine ports and military bases in the Philippines -- occurred exclusively within the Philippines.

The government contends that the transportation described in the indictment is not necessarily "through transportation" within the meaning of the Act. ***HN17***[] The Act defines "through transportation" as

> continuous transportation between origin and destination for which a through rate is assessed and which is offered or performed by one or more carriers, at least one of which is a common carrier, between a United States point or port and a foreign point or point.

[*1184] 46 U.S.C. App. § 1702(26). The Act defines "through rate" as "the single amount charged by a common carrier in connection with through transportation." 46 U.S.C. App. § **[**34]** 1702(25).

The government relies primarily on the language of Paragraph 2 of the indictment for its position that the indictment on its face is not limited to agreements concerning the foreign inland segment of through transportation.

Paragraph 2 charges that

> the defendants and others entered into and engaged in a combination and conspiracy to suppress competition by fixing prices for moving services supplied in connection with the transportation of military shipments of household goods between the Philippines and the United States.

According to the government, this broad language could encompass agreements unrelated to through transportation.

Specifically, the government identifies two types of movements that would not constitute "continuous transportation" as required in the definition of "through transportation." First, the government presents the hypothetical situation in which United States freight forwarders arrange for the inland transportation in the United States and the Philippines, but the Department of Defense arranges separately and in its own name for the ocean segment of the transportation. Gov't Opp. at 17-18. According to the government, the indictment **[**35]** could be construed to include such an arrangement, and this arrangement could not be characterized as "through transportation."

The arrangement described in the indictment itself undermines the government's argument. According to indictment, the "Department of Defense contracts with U.S. freight forwarders for the transportation of military shipments of household goods between the Philippines and the United States." Indictment at P13. The indictment repeatedly alleges that the moving services provided by defendants were part of a "continuous and uninterrupted flow of United States foreign commerce." Indictment at PP15, 16, 17, 18, 19. Furthermore, the indictment defines "military shipments of household goods" as "any shipment of furniture, personal effects or unaccompanied baggage owned by U.S. Department of Defense military or civilian employees and their families *that is transported between the Philippines and the United States under a Government Bill of Lading*." Indictment at P7 (emphasis added). This reference to the International Through Government Bill of Lading (ITGBL) program establishes that the hypothetical arrangement in which the Department of Defense separately contracted **[**36]** for ocean carriage could not be encompassed by the indictment. *See* Def. Exh. 1, Decl. of Francis Galuzzo of DOD's Military Traffic Management Command (program is shipment to/from overseas under single Bill of Lading, and freight forwarders submit single bid which includes foreign inland carriers' rate). The repeated references to continuous and uninterrupted transportation as well as the obvious references to the ITGBL program compel the conclusion that the indictment alleges conduct that is part of "through transportation."

Second, the government argues that if the U.S. freight forwarder dealt with defendants as shippers rather than as connecting carriers, the transportation would not constitute "through transportation." The government relies on the definition provided in 46 U.S.C. App. § 1702(17) for the proposition that the freight forwarders may have dealt with defendants as shippers. ***HN18***[] Section 1702(17) provides that "non-vessel-operating common carrier" means "a common carrier that does not operate the vessels by which the ocean transportation is provided, and is a shipper *in its relationship with an ocean common carrier*." 46 U.S.C. App. § 1702(7) (emphasis added). This **[**37]** provision does not support the government's position. While a non-vessel-operating common carrier (NVOCC) may be a shipper in relation to the actual ocean common carrier, the freight forwarder remains a common carrier in its relationship to the Department of Defense. *See* 46 U.S.C. App. § 1702(6) (defining common carrier). There is simply no basis for reading into Section 1702(17) an assertion that the connecting carrier chain is broken simply because the freight forwarder is not the actual ocean carrier.

[*1185] 2. *Conclusion: Dismissal of Indictment*

The Court has concluded that Section 7(a)(4) exempts agreements among foreign motor carriers relating to the foreign inland segment of through transportation. The present indictment on its face alleges conduct occurring entirely within the Philippines and in relation to through transportation of military household goods under a single Bill of Lading. Because the indictment alleges conduct for which defendants are immune from criminal liability, the Court must grant defendants' motion to dismiss. [7]

[38]** Even if the Court were unable to conclude whether Section 7(a)(4) exempted the type of agreements at issue in this case, the Court would still be required to grant defendants' motion. ***HN19***[] "In criminal prosecutions the rule of lenity requires that ambiguities in the statute be resolved in the defendant's favor." *United States v. Plaza Health Laboratories, Inc., 3 F.3d 643, 649 (2d Cir. 1993)*. "Where a criminal law is ambiguous," courts "are wary of imposing criminal liability for conduct that the law does not clearly prohibit." *United States v. Foster, 133 F.3d 704, 708 (9th Cir. 1998)* (citing *Bifulco v. United States, 447 U.S. 381, 387, 65 L. Ed. 2d 205, 100 S. Ct. 2247 (1980)*. The fact that the ambiguity is contained in a statutory exemption, rather than the statutory definition of the criminal conduct, does not preclude application of this rule. *See* *United States v. Sheek, 990 F.2d 150 (4th Cir. 1993)* (applying rule of lenity in interpretation of the term "parent" in a statutory exemption to Federal Kidnapping Act). Thus, even if the Court had found that the Shipping Act exemption was ambiguous, the Court would resolve the ambiguity in defendants' favor and grant defendants' **[**39]** motion to dismiss the indictment.

C. *Tucor's Petition for Writ of Error Coram Nobis*

Tucor seeks a writ of error coram nobis to set aside its June 16, 1993 guilty plea. ***HN20***[] A corporation that has been sentenced only to a fine can employ a writ of error coram nobis to attack an unconstitutional conviction. *United States v. Mett, 65 F.3d 1531, 1534 (9th Cir. 1995)*. Although no longer operating as a corporation, Tucor remains a corporate entity with standing to pursue a writ of error coram nobis because it has not undergone corporate dissolution. *See* *Telink, Inc. v. United States, 24 F.3d 42, 44-45 (9th Cir. 1994)*. The government does not dispute that Tucor has standing to bring this petition.

Tucor attacks its conviction on several bases. First, Tucor argues that the indictment was defective because, in light of the Shipping Act exemption, the indictment failed to state an offense. Second, Tucor argues that its due process rights were violated by the government's failure to disclose the Shipping Act exemption to Tucor or to the Court. Third, Tucor argues that the government violated its *Fifth Amendment* rights by selectively prosecuting Tucor, but dismissing charges against **[**40]** Greek companies that had, according to Tucor, engaged in nearly identical conduct.

1. *Sufficiency of the Indictment*

Tucor argues that the indictment was deficient because it failed to raise the Shipping Act exemption and because the conduct alleged in the indictment does not amount to a crime.

a. *Omission of Exemption*

The indictment contained no reference to the Shipping Act exemption which Tucor claims immunizes it from Sherman Act liability. "***HN21***[] While an indictment must ordinarily charge every essential element of an offense, it need not negate every applicable statutory exception." *Echavarria-Olarte v. Reno, 35 F.3d 395, 399 (9th Cir. 1994)*, *cert. denied*, *514 U.S. 1090, 131 L. Ed. 2d 736, 115 S. Ct. 1812 (1995)*; *see also* *United States v. Green, 962 F.2d 938, 941 (9th Cir. 1992)* (government need not allege exception in the indictment); *United States v. Hester, 719 F.2d 1041, 1042 (9th Cir. 1983)* (government not required to allege defendant's non-Indian status in indictment under the Federal Enclaves **[*1186]** Act); *McKelvey, et al v. United States, 260 U.S. 353, 357, 67 L. Ed. 301, 43 S. Ct. 132 (1922)* ("By repeated decisions it has come to be a settled rule in **[**41]** this jurisdiction that an indictment . . . founded on a general provision defining the elements of an offense . . . need not negative the matter of an exception made by a proviso or other distinct clause, whether in the same section or elsewhere, and that it is

[7] Because the Court grants defendants' motion to dismiss the indictment on the basis that the indictment alleges conduct that falls within the relevant Shipping Act exemption, it is not necessary to reach defendants' alternative argument that bilateral treaties between the United States and the Philippines also require dismissal of the indictment.

incumbent on one who relies on such an exception to set it up and establish it."). Therefore, the Court concludes that the Tucor indictment did not fail to state an offense simply because it did not raise and negate a potentially relevant statutory exemption to antitrust liability. [8]

[42]** b. *Failure to State an Offense*

The Court has already concluded that the conduct alleged in the indictment does not amount to a crime. Nonetheless, the government argues that Tucor's guilty plea precludes Tucor from raising this attack on its conviction.

HN22[] A defendant may attack a guilty plea by asserting jurisdictional claims that "the applicable statute is unconstitutional or that the indictment fails to state an offense." *United States v. Caperell, 938 F.2d 975, 977 (9th Cir. 1991)* (quoting *United States v. Montilla, 870 F.2d 549, 552 (9th Cir. 1989)*. In *Caperell*, the Ninth Circuit stated that:

> Although a guilty plea generally waives all claims of constitutional violation occurring before the plea, "jurisdictional" claims are an exception to this rule. In *Montilla*, we stated that, although the dividing line between constitutional claims waived by a plea of guilty and those that survive the plea is not always clear, "claims that 'the applicable statute is unconstitutional or that the indictment fails to state an offense' are jurisdictional claims not waived by the guilty plea."

Caperell, 938 F.2d at 977 (citations omitted). "[A] plea of guilty **[**43]** to a charge does not waive a claim that -- judged on its face -- the charge is one which the state may not constitutionally prosecute." *United States v. Broce, 488 U.S. 563, 575-76, 102 L. Ed. 2d 927, 109 S. Ct. 757 (1989)*. If the unconstitutionality is evident from the indictment and the record at the time of the guilty plea, then defendant may be entitled to attack the plea. *See* *United States v. Broce, 488 U.S. 563, 575, 102 L. Ed. 2d 927, 109 S. Ct. 757 (1989)*.

United States v. Caperell, 938 F.2d 975 (9th Cir. 1991), forecloses the argument that Tucor has waived its right to assert the insufficiency of the indictment. In *Caperell*, defendant pleaded guilty to engaging in a criminal enterprise relating to the manufacture, sale and possession of methamphetamine. *Id. at 976*. On appeal, defendant argued that the indictment failed to state an offense because methamphetamine was unlawfully included on the schedules of controlled substances. *Id. at 977*. The government argued that defendant had waived this defense by pleading guilty. The Ninth Circuit rejected the government's argument. The court emphasized that defendant's claim was "jurisdictional," and therefore **[**44]** reviewable, because it was capable of resolution by examining the indictment and the relevant statute. *Id. at 977-78*.

In the instant case, as in *Caperell*, defendant's attack on the sufficiency of the indictment can be resolved by reference to the indictment and relevant statutes. ***HN23***[] By pleading guilty, Tucor waived its right to contest the facts to which it admitted. *See* *United States v. Mathews, 833 F.2d 161 (9th Cir. 1987)*. However, Tucor did not waive its **[*1187]** right to assert that the conduct alleged in the indictment, accepted as true, does not constitute a crime. Since Tucor's claim can be resolved by reference to the face of the indictment and the applicable statute, Tucor can attack its conviction despite its guilty plea.

---

[8] *United States v. King, 587 F.2d 956 (9th Cir. 1978)*, relied on by Tucor, does not compel a different conclusion. In *King*, a doctor was charged as a co-defendant in a conspiracy to possess cocaine with the intent to distribute. The indictment identified the doctor as a physician but did not allege that he distributed cocaine without a legitimate medical purpose. *Id. at 963*. The court held that the indictment failed to state an element of the offense and was therefore deficient. *Id.* The *King* decision was premised on the Ninth Circuit's earlier conclusion in *United States v. Black, 512 F.2d 864 (9th Cir. 1975)*, that the lack of authorization to dispense a controlled substance was an element of the crime charged. *King, 587 F.2d at 963*. In contrast, there is no support for the view that the inapplicability of the subject Shipping Act exemption is an element of the charges against Tucor that must appear in the indictment. Accordingly, the Court rejects Tucor's argument that *King* requires that the indictment raise and negate the relevant Shipping Act exemption.

As discussed above, the Shipping Act exemption noted by Tucor removes Tucor's conduct from application of the antitrust laws of the United States. Thus, Tucor pleaded guilty to an indictment that did not allege criminal conduct. Had the Court been aware of this exemption at the time of Tucor's change of plea hearing, the Court would certainly not have accepted a guilty plea. Having now become aware of this exemption, the Court must allow Tucor to attack **[**45]** its conviction. Because Tucor is not in custody, it properly petitions for a writ of error coram nobis as the vehicle for obtaining relief. For the foregoing reasons, the Court will grant Tucor's petition.

2. *Failure to Disclose*

Tucor sets forth compelling evidence that counsel for the government knew of the statutory exemption when it entered into the plea agreement with Tucor. According to Tucor, at the time of the indictment in the instant case, the government was investigating similar conduct by companies involved in the transportation of military household goods from bases in Greece. On February 9, 1993, the attorney for Interdean, one of the Greek moving companies under suspicion, met with counsel for the government, including Reginald Tom, concerning the Grand Jury proceedings in that matter. Defendant's Exh. 1, Decl. of Warren L. Dean, Jr. at P 2. At this meeting, Interdean's attorney, Warren Dean, alerted counsel for the government that Interdean considered itself immune from antitrust liability by virtue of Section 7 of the Shipping Act of 1994. *Id.* at P 3. The government attorneys at the meeting allegedly asked Dean to provide a written analysis of the applicability **[**46]** of the Shipping Act's antitrust immunity provisions. *Id.* at P 5. Dean provided this written analysis to Tom, counsel for the government, on February 17, 1993. Thus, counsel for the government was aware of the Shipping Act exemptions in February, 1993, approximately four months before Tucor entered into the subject plea agreement. Nonetheless, counsel for the government did not disclose to the defendant or the Court that there was a potentially relevant exemption from antitrust liability in the Shipping Act of 1984.

Tucor argues that by this omission, the government violated its *Brady* obligations and violated its duty of candor to the Court. In *Brady v. State of Maryland, 373 U.S. 83, 10 L. Ed. 2d 215, 83 S. Ct. 1194 (1963)*, the Supreme Court held that "***HN24***[] suppression by the prosecution of evidence favorable to an accused upon request violates due process where the evidence is material to guilt or to punishment, irrespective of good faith or bad faith of the prosecution." This obligation by its own terms reaches "evidence." The focus of the obligation is on providing defendants access to exculpatory evidence to which they otherwise would not have access. *See generally United* **[**47]** *States v. Bracy, 67 F.3d 1421, 1428-29 (9th Cir. 1995)*. This logic does not apply to published legal authority, particularly where defendant is represented by counsel who undoubtedly had access to the materials in question. Accordingly, the Court finds that Tucor's *Brady* claim is without merit.

Tucor also contends that the government breached its duty of candor to the Court by not raising the exemption issue during the June 16, 1993 plea hearing. As pointed out by Tucor, ***HN25***[] attorneys have a "continuing duty to inform the court of any development which may conceivably affect the outcome of the litigation." *Tiberton Bd. of License Commissioners v. Pastore, 469 U.S. 238, 240, 83 L. Ed. 2d 618, 105 S. Ct. 685 (1985)* (quoting *Fusari v. Steinberg, 419 U.S. 379, 391, 42 L. Ed. 2d 521, 95 S. Ct. 533 (1975)* (Burger, C.J., concurring)). Furthermore, an United States Attorney has an even greater obligation than a private litigant to see that justice is done. *See Berger v. United States, 295 U.S. 78, 88, 79 L. Ed. 1314, 55 S. Ct. 629 (1935)*.

The government denies that it had concluded prior to entering into the plea agreement that Section 7(a)(4) immunized Tucor's conduct. **[**48]** *See* Opp. at 12:24-26; *See also* Decl. of Reginald K. Tom (Department at no time concluded exemption applied to defendant). **[*1188]** The government's supplemental briefing contains a defensible, although, in the Court's opinion, incorrect, interpretation of the scope of the Shipping Act immunities. Under these circumstances, the Court finds that the government has rebutted Tucor's contention that the government considered Tucor's conduct immunized when it entered into the plea agreement.

The fact that the government had not concluded at the time of Tucor's plea that Section 7(a)(4) immunized Tucor from prosecution does not mean that the government fulfilled its duty of candor to the Court. Rather than bring to the attention of the Court a statutory provision that, on its face, appeared to immunize Tucor from prosecution, the government, by its silence in the plea proceedings, prevented this issue from being resolved prior to the Court's acceptance of the plea and imposition of sanctions. Even if the government's interpretation of the statute were correct, the government's failure to bring this potentially applicable immunity to the attention of the Court is hard to understand, particularly **[**49]** in light of the Court's conclusion in this case that the conduct at issue does not violate federal law, and, in the Court's view, represents a far too restrictive view of prosecutorial obligations.

3. *Selective Prosecution*

As a final basis for setting aside its guilty plea, Tucor argues that the government selectively prosecuted the defendants in this case. Tucor notes that the government decided not to prosecute the Greek defendants after learning of the statutory exemption, but continued to prosecute the Philippine defendants. According to Tucor, its nationality was the only possible basis for the government's decision, since there was "no factual distinction" between the acts of the Greek companies and those of Tucor and its co-defendants. Def. Pet. at 21.

Tucor cannot maintain ***HN26***[] a selective prosecution claim because any such claim was foreclosed once Tucor plead guilty. *See* *United States v. Aguilar, 883 F.2d 662, 705 n. 44 (9th Cir. 1989)* (defense of selective prosecution is deemed waived if not raised prior to trial); *United States v. Oaks, 508 F.2d 1403, 1404 (9th Cir. 1974)*. Tucor argues that the selective prosecution claim did not ripen until after defendant had **[**50]** entered its plea. Specifically, Tucor learned of the decision not to prosecute the Greek defendants on December 1, 1993, over five months after judgment was entered pursuant to the plea agreement. While these facts may suggest that there was no "waiver" of the selective prosecution in a technical sense, Tucor's guilty plea still forecloses independent inquiry into its selective prosecution claim. *See* *Broce, 488 U.S. at 573* (conscious waiver not necessary with respect to each potential defense relinquished by a guilty plea); *Cf.* *Tollett v. Henderson, 411 U.S. 258, 266, 36 L. Ed. 2d 235, 93 S. Ct. 1602 (1973)* (guilty plea foreclosed defendant's challenge to selection of Grand Jury even though technically no "waiver" because defendant had not known of discriminatory jury selection until after plea).

Even if Tucor's selective prosecution claim could survive its guilty plea, Tucor's evidence would be insufficient to support such a claim. To establish a claim of selective prosecution, the defendant must show that the prosecution "had a discriminatory effect and that it was motivated by a discriminatory purpose." *Wayte v. United States, 470 U.S. 598, 608, 84 L. Ed. 2d 547, 105* ***[**51]*** *S. Ct. 1524 (1985)*. A defendant must show not only that similarly situated defendants were not prosecuted, but also that the prosecution was deliberately based on classifications protected under the *Equal Protection Clause*. *Id. at 608-10*. Other than conclusorily asserting that the government based its prosecutorial decision on nationality, Tucor has failed to make a showing that the government's decision to prosecute Philippine, but not Greek, moving companies was impermissible. Any number of factors could have been involved in the government's decision not to prosecute the Greek companies that were under investigation.

4. *Conclusion: Coram Nobis Relief*

Tucor has set forth a number of arguments in support of its petition for a writ of error coram nobis. The Court will grant Tucor's petition because the conduct alleged in the indictment to which Tucor pleaded guilty does not amount to a criminal offense.

[*1189] III. CONCLUSION

For the foregoing reasons, the Court hereby:

(1) GRANTS defendant Tucor's petition for a writ of error coram nobis;

(2) VACATES the Judgment entered on June 22, 1993, and amended on June 25, 1993; and

(3) GRANTS the Luzon defendants' motion to dismiss **[**52]** the indictment.

IT IS SO ORDERED.

Dated: June 15, 1998.

HN1[ ] **Entitlement as Matter of Law, Appropriateness**

Summary judgment can be granted only if there is no genuine issue of material fact. When the record as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue of material fact for trial. Defendant bears the initial burden of informing the district court of the basis for its motion and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN2[] **Regulated Practices, Private Actions**

In opposing a motion for summary judgment in an antitrust case, the non-moving party must do more than simply show that there is some metaphysical doubt as to the material facts. The burden shifts to plaintiff to go beyond the pleadings and present specific facts showing that, despite defendants' contentions, there is a genuine issue of fact which requires a trial. The evidence presented must be viewed in a light most favorable to plaintiff to determine whether genuine issues of material fact exist. If the pleadings, affidavits and other material present no genuine issues of material fact, defendant is entitled to judgment.

HN3[] **Anticompetitive & Predatory Practices, Predatory Pricing**

A monopoly claim, the Sherman Act, *15 U.S.C.S. § 2*, based on predatory pricing requires the plaintiff to show that the defendant possesses, or is likely to possess, monopoly power in a relevant market. Monopoly power may be shown by direct evidence of defendant's restriction of services or charging of supra-competitive prices. In absence of direct evidence of market power, plaintiff may use circumstantial evidence to show that defendant possesses monopoly power or is likely to possess it. Showing monopoly power by circumstantial evidence requires plaintiff to define the relevant market, show that defendant controls a dominant share of that market, and show that there are significant barriers to the entry of new competitors or to the expansion of existing competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Sherman Act, Claims**

To establish a claim for attempted monopoly, *15 U.S.C.S. § 2*, a plaintiff must show four basic elements: 1) specific intent to control prices or destroy competition; 2) predatory or anti-competitive conduct directed at accomplishing that purpose; 3) a dangerous probability of achieving monopoly power; and 4) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN5[] **Monopolies & Monopolization, Attempts to Monopolize**

It is not possible to analyze the alleged monopoly impact of conduct under the Sherman Act, *15 U.S.C.S. § 2* without first defining the relevant market which such conduct is allegedly monopolizing. A relevant market is generally defined as a pool of services that are reasonably interchangeable and are therefore economic substitutes for one another. Without the definition of an appropriate relevant market, it is not possible to determine the impact of a defendant's conduct upon the competition in the market. A plaintiff has the burden of proving the scope of the relevant market, which typically is defined by the relevant product market and the relevant geographical market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

The determination of whether a service is reasonably interchangeable requires consideration of the cross-elasticity of demand.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] **Entitlement as Matter of Law, Genuine Disputes**

On summary judgment, a court is not to weigh the credibility of the evidence presented, but rather decide whether the evidence presents a genuine issue of fact. But assertions in expert declarations do not automatically create genuine issues of fact. When expert opinions are not supported by sufficient facts, or when the indisputable record contradicts or otherwise renders the opinions unreasonable, they cannot be relied upon. Expert opinion evidence has little probative value in comparison with the economic factors that may dictate a particular conclusion. Expert declarations may be useful as a guide in interpreting market facts, but they are not a substitute for competent economic evidence.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The showing of a defendant's significant market share is essential to proving a predatory pricing claim, because it relates to the power to charge supra-competitive prices in the market. And a showing of market share is one of the requirements for a circumstantial showing of market power. Market share data must reflect the actual circumstances in a relevant market and must not be extrapolated from separate or parallel markets.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN9[] **Estoppel, Collateral Estoppel**

Facts established by stipulations or concessions arguendo, rather than by judicial resolution, are not fully litigated and do not have collateral estoppel effect.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN10[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A plaintiff in a predatory pricing claim must show that new rivals are barred from entering the market. A barrier to entry is an obstacle that is capable of constraining the normal operation of the market to the extent that the problem is unlikely to be self-correcting. The Ninth Circuit has recognized five types of entry barriers: (1) legal license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) considerations imposing higher capital costs on new entrants; and (5) in some situations, economies of scale.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN11[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The mere fact that entry would require a large absolute expenditure of funds does not constitute a barrier to entry in the sense of being a predatory practice; a new entrant is disadvantaged only to the extent that he must pay more to attract those funds than would an established firm.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN12[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A showing that there are barriers to the expansion of existing competitors in a predatory pricing claim is relevant to prove market power.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN13[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Predatory pricing is generally thought to occur in two stages. First, the alleged predator prices its goods or services below its marginal cost for those goods or services. It hopes that, in the long run, such a price war will drive competitors from the market and thereby increase both its market share and market power. In the short term, the alleged predator, and any competitor that matches its predatory prices, suffers losses. However, because consumers get the benefit of the lower prices, there is no actionable harm to competition and no actionable antitrust violation in that first step.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN14[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In stage two of predatory pricing, the alleged predator seeks to recoup the losses that it suffered during stage one by charging supra-competitive prices, i.e. prices above competitive levels. At the time the predator implements stage two, it must possess enough market power so that by restricting its own output, it can restrict the supply to the market. Supply restrictions artificially increase demand and thus allows the predator to maintain its supra-competitive prices. However, without market power, the predator's recoupment will be thwarted by competitors who will offer their services at prices below the predator's supra-competitive prices. And unless the predator is capable of recoupment, predatory pricing does not hurt consumers.

Opinion

[*1053] *OPINION AND ORDER ON MOTION FOR SUMMARY JUDGMENT*

Defendants have moved for summary judgment. The motion was opposed, briefed, argued and submitted for decision. The court has reviewed the moving and opposing papers, the records submitted by both sides in connection with the motion, the record of the case, the applicable legal authorities and the arguments of counsel.

I.

Since this is a motion for summary judgment, this court is governed by the standards of *Rule 56 of the Federal **[**2]** Rules of Civil Procedure*. That is, ***HN1***[] summary judgment can be granted only if there is no genuine issue of material fact. When the record as a whole could not lead a rational trier of fact to find for the non-moving party, here the plaintiff, there is no genuine issue of material fact for trial. *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986)*; *In re Super Premium Ice Cream Distribution Antitrust Litigation, 691 F. Supp. 1262, 1265 (N.D.Cal. 1988)*, *aff'd sub nom. Haagen-Dazs Co., Inc. v. Double Rainbow Gourmet Ice Creams, Inc., 895 F.2d 1417 (9th Cir. 1990)*.

Defendant bears the initial burden of "informing the district court of the basis for its motion and identifying those portions of 'the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1986)*.

"***HN2***[] In opposing a motion for summary judgment in an antitrust case, the non-moving party 'must do more than simply show that there **[**3]** is some metaphysical doubt as to the material facts.'" *Sicor Ltd. v. Cetus Corp., 51 F.3d 848, 853 (9th Cir. 1995)*, *quoting* *Matsushita, 475 U.S. 574 at 586, 106 S. Ct. 1348 at 1356, 89 L. Ed. 2d 538*. The burden shifts to plaintiff to go beyond the pleadings and present *specific facts* showing that, despite defendants' contentions, there is a genuine issue of fact which requires a trial. *Sicor, 51 F.3d at 853*, *citing* *Celotex, 477 U.S. at 324, 106 S. Ct. at 2553*. The evidence presented must be viewed in a light most **[*1054]** favorable to plaintiff to determine whether genuine issues of material fact exist. *See Thurman Industries, Inc. v. Pay ' N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. If the pleadings, affidavits and other material present no genuine issues of material fact, defendant is entitled to judgment. *Sicor, 51 F.3d at 853*.

The same summary judgment standards apply in an antitrust case such as this. The facts stated in this opinion and order are found to be facts by a measure of no genuine issue of material fact.

II.

Plaintiff Western Parcel Express ("WPX") alleges that since 1994 the United Parcel Service defendants (collectively "UPS") have violated the federal antitrust **[**4]** laws and California state law in competing with WPX in the regional, business-to-business, small package delivery market in the western United States. As a result of motions to dismiss (Order of December 3, 1996), certain of WPX's claims were dismissed, leaving three federal antitrust claims.

WPX's federal claims accuse UPS of violating both Sections One and Two of the Sherman Act. *15 U.S.C. §§ 1* and *2*. WPX makes two claims under Section Two, alleging that UPS monopolized and attempted to monopolize, by predatory pricing of its delivery services, the intrastate small package delivery market in which WPX operates. WPX's Section One claim alleges that UPS used exclusive-dealing contracts to offer below-cost prices, and thereby illegally restrained competition in WPX's market area.

In May 1997, the parties stipulated to and the court ordered a bifurcation of the discovery. The subject of the first discovery was what the parties termed the "Market Power Issues." The Market Power Issues were defined as (1) the definition of the relevant market, (2) the division of market shares in the relevant market, and (3) the existence of any barriers to entry or expansion in the relevant market.

[5]** After the discovery on the Market Power Issues was completed, UPS filed this motion for summary judgment. UPS argues that because WPX does not and cannot define a relevant market, and cannot show that UPS possesses sufficient market power to recoup an investment in below-cost pricing, UPS is entitled to summary judgment on both of WPX's Section two claims. UPS similarly argues that because WPX cannot show that it experienced any causal anti-trust injury, or that UPS's contracts are exclusive dealing, UPS is also entitled to summary judgment on WPX's Section One claim.

After WPX filed its opposition and UPS replied, the court heard oral argument. At the hearing WPX requested leave to file a supplemental brief to supply the court with additional legal authority and additional evidence in support of its opposition. After the parties filed their supplemental briefing, the court took the motion under submission.

III.

Because of the nature of these anti-trust claims, some discussion is necessary of the industry in which these parties and others operate. The following facts are either admitted or are demonstrated with no genuine issue.

The package delivery industry is a multi-billion **[**6]** dollar, international industry. In the United States more than 70% of all deliveries are accomplished by ground transportation, primarily through intra- and inter-state trucking. So called "small" parcels are packages of limited dimensions weighing up to 150 pounds. And so called "regional" or "intrastate" shipping describes deliveries going to destinations within 450-500 miles of their origin. Regional services are typically provided to customers with large and consistent volumes of shipping through contractual arrangements ("contract carrier service"). The same services are provided to the smaller customers with intermittent shipping **[*1055]** needs through standard terms ("common carrier service").

Prior to nationwide deregulation of intrastate trucking in 1995, the regional markets were dominated by small regional carriers, with some competition from regional less-then-truckload carriers ("LTLs"). For a variety of reasons, the larger national carriers did not compete with the regional carriers. Local delivery carriers were also ineffective competition to the regional carriers due to their limited local service areas. National LTLs did not effectively compete in the regional markets for **[**7]** a variety of reasons.

The Federal Aviation Administration Authorization Act of 1994 ("FAAAA"), implemented in January 1995, marked the culmination of nearly two decades of Congressional effort to deregulate competition in the trucking industry. *See* 49 U.S.C. § 41713(b)(4). The most important impact of the FAAAA on the intrastate trucking business was to eliminate extensive and costly federal regulatory requirements, which previously served as a barrier to new entries into the market. Those regulations controlled pricing and limited the routes of carriers. Congress envisioned that without such regulations, market forces would dictate pricing and routing in the most efficient manner and would open the intrastate trucking markets to more competition.

At the same time, technological innovations in Logistical Information Services ("LIS") allow customers to become more precise in scheduling their shipping needs. Customers desire "just in time" delivery service in order to reduce their inventory costs. As a result of deregulation and LIS, carriers have diversified their shipping services. Numerous "deferred" services, such as second-day and third-day delivery options, were added to **[**8]** the basic services previously provided. These additional services have resulted in a continuum of shipping options available to customers. The options also make it economically beneficial for some customers to use only one carrier to handle all of their shipping needs, regional and otherwise ("single sourcing").

The result has been a substantial increase in competition for regional small package delivery business. Both large and small carriers have restructured their operations to reach customers they were previously unable to serve. Customers, having shipping options and LIS systems, can now compare carrier options and prices to meet their needs. The competition for their business is intense and customer "churning," *i.e*. repeated carrier switching by the customers, is common. But so is single sourcing. WPX and UPS compete for the regional small package shipping business of customers in the western United States.

Plaintiff WPX specializes in the regional ground-based delivery of small packages. From a small beginning in 1978, it has grown significantly and now has 700 employees, serves 15,000 customers, and earns $ 100 million in revenues annually. In 1996, WPX handled more than **[**9]** six million packages. Part of WPX's growth came from its acquisition of other regional, local, and LTL carriers. It now provides intrastate shipping services in ten western and mountain states.

Prior to 1994, governmental regulation of the intrastate trucking industry by the State of California provided WPX with some protection against new entrants into the California market, which was a significant portion of WPX's market. However, in 1994 California deregulated pricing, routing, and service offerings in the small-package carrier industry in California. *See In the Matter of United Parcel Service, Inc.*, No. 92-02-026, *1996 Cal. PUC LEXIS 1221*, at *3 n.1 (Dec. 20, 1996). UPS was one, but only one, of the national shippers to enter the California market after California deregulation went into effect.

Since deregulation in California in 1994, WPX's profit margins have decreased. The implementation of the FAAAA in 1995 also negatively impacted WPX's profit **[*1056]** margins. Nonetheless, WPX reported its pre-tax profit margins as almost 20% for the years 1994 through 1996. WPX blames the decrease in its profit margins almost exclusively upon UPS's entry into the intrastate market. However, **[**10]** while WPX's profit margins may have shrunk, WPX's revenues have grown from $ 29.4 million in 1994 to $ 47 million in 1997.

Defendant UPS provides local, regional, national, and international shipping services. UPS's 1996 financial statements indicate that it handled over 12 million packages for 1.4 million customers, generating an after-tax profit of approximately $ 1.1 billion dollars. It employs over 330,000 employees at approximately 1,500 operating facilities. The statements suggest that over 90% of UPS's revenue is from ground based deliveries for both residential and business customers.

In 1994, UPS began to compete with WPX and other regional carriers. At first that competition was limited to California. But once the FAAAA was implemented in 1995, UPS entered the regional shipping markets in most of the other western states. UPS documents show that by 1996 UPS was promoting itself as a single sourcing option for customers, and was offering volume discounts as incentives for customers to use UPS for the majority of their shipping needs. By 1997, more than 20 of WPX's past customers had switched to UPS, some on the basis of the single sourcing option available from UPS.

WPX **[**11]** and UPS are not the only carriers providing shipping services in the western United States. There are many national, regional, and local carriers providing a variety of services. The large national carriers include RPS, Federal Express ("Fedex"), and the United States Postal Service ("USPS").

RPS focuses on business-to-business small package delivery. Its 1996 annual revenue exceeded $ 1.3 billion. Through September 1997, RPS's revenue year-to-date was $ 1.1 billion, up 19% from the same period in 1996. Until 1995, RPS provided only long-haul business-to-business services. However with deregulation of the industry in 1995, RPS entered the regional market. RPS provides regional service throughout large portions of five western states.

Fedex competes for time-sensitive delivery of packages throughout the nation. It offers a variety of delivery options for business-to-business delivery of small packages. In 1995, shipping industry analysts viewed Fedex's expansion into the ground delivery business as part of an industry trend to compete with regional carriers like WPX. Fedex's 1996 Annual Report highlighted its commitment to serve the ground-based time-sensitive regional delivery market. **[**12]** In October 1997, Fedex announced it intended to acquire the corporate parent of RPS and Viking Freight.

USPS competes in the delivery of smaller packages, up to 70 pounds, offering its services throughout the nation. In 1997 USPS announced a major initiative to update its tracking technology, with specific mention of improving its overnight and deferred services. WPX's expert notes that USPS's successful response to the 1997 Teamster/UPS strike established USPS as an acceptable alternative for business-to-business package delivery.

Of the regional carriers operating in the west, WPX is the largest. However, there are several others. They include California Overnight and Golden State Overnight. In 1995 WPX merged with Air Data Express, a regional carrier serving the Pacific Northwest. In 1996, WPX acquired two more regional carriers in Oregon and Texas.

National and regional LTL carriers are also active in the west. LTL carriers sell excess space on trucks already scheduled for long-haul or multistate shipping routes. Industry analysts note that the shift to options like just-in-time delivery have made LTLs available regional alternatives for some customers.

[*1057] Local carriers also **[**13]** provide delivery of small packages and some LTL services, within limited geographic areas. Most are small, privately held companies, more like local couriers than large shipping companies. There are at least seventy such companies operating in California. While these carriers provide basic delivery options for customers with local needs, some provide alternative regional delivery services.

A final option are the private delivery fleets operated by customers themselves. Many companies choose to have their own fleets to accomplish their distribution needs. Although there is little industry analysis of the impact of these private fleets on the intrastate trucking market, private fleets are another option for customers.

The record demonstrates that the market for the regional delivery of small packages is competitive. Customers have a wide continuum of choices of services and carriers. The deregulation legislation is apparently having its over-all intended effect. The question in this case is whether defendant UPS has nevertheless acquired and exercised monopoly power in a relevant sector of the market, and has engaged in predatory pricing.

IV.

WPX alleges that since May 1994 UPS has **[**14]** used monopoly power to predatorially price its regional shipping services to eliminate WPX as a competitor in the regional market in the western United States. WPX contends that UPS dominates the regional market and that WPX is UPS's only significant competition.

HN3[] A Section Two monopoly claim based on predatory pricing requires the plaintiff to show that the defendant possesses, or is likely to possess, monopoly power in a relevant market. *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*. Monopoly power may be shown by direct evidence of defendant's restriction of services or charging of supra-competitive prices. *See* *Forsyth v. Humana, Inc., 114 F.3d 1467, 1475 (9th Cir. 1997)*, *citing* *Rebel Oil, 51 F.3d at 1434*. In absence of direct evidence of market power, plaintiff may use circumstantial evidence to show that defendant possesses monopoly power or is likely to possess it. *Forsyth. 114 F.3d at 1475*. Showing monopoly power by circumstantial evidence requires plaintiff to define the relevant market, show that defendant controls a dominant share of that market, and show that there are significant barriers to the entry of new competitors **[**15]** or to the expansion of existing competitors. *I.d*. at 1476.

WPX also claims that UPS's predatory pricing violates the "attempt to monopolize" language of Section Two. WPX alleges the same facts as in its monopoly claim, with the one difference that UPS intends to, but has not yet, monopolized the relevant market. ***HN4***[] To establish a Section Two claim for attempted monopoly WPX must show four basic elements: 1) specific intent to control prices or destroy competition; 2) predatory or anti-competitive conduct directed at accomplishing that purpose; 3) a dangerous probability of achieving monopoly power; and 4) causal antitrust injury. *McGlinchy v. Shell Chem. Co., 845 F.2d 802, 811 (9th Cir. 1988)*. Because the discovery leading to this motion was limited to the Market Power Issues stated above, only consideration of the last two elements is possible upon the evidence presented.

To show that UPS has a "dangerous probability of achieving monopoly power" in the relevant market, WPX must provide evidence that UPS's pricing will likely help it achieve a dominant share of the relevant market such that UPS can later recoup the losses it sustains by below-cost pricing.

Therefore, the same **[**16]** Market Power Issues are important to an analysis of both the monopoly and attempted monopoly claims.

[*1058] V.

Central to plaintiff's claims of monopoly and attempted monopoly is the necessity to define a relevant ***HN5***[] market. It is not possible to analyze the alleged monopoly impact of UPS's conduct without first defining the relevant market which such conduct is allegedly monopolizing. *See* *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 455-56, 113 S. Ct. 884, 890, 122 L. Ed. 2d 247 (1993)*; *Thurman*, 875 F.2d at 1373 ("defining the relevant market is indispensable to" Section Two monopolization claims).

A relevant market is generally defined as a pool of services that are reasonably interchangeable and are therefore economic substitutes for one another. *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1489 (9th Cir. 1991)*. Without the definition of an appropriate relevant market, it is not possible to determine the impact of a defendant's conduct upon the competition in the market. *Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 890, 122 L. Ed. 2d 247 (1993)*; *Rebel Oil Company, Inc. v. Atlantic Richfield Company, 51 F.3d at 1434*. Plaintiff **[**17]** has the burden of proving the scope of the relevant market, which typically is defined by the relevant product market and the relevant geographical market. *See, e.g., United States v. Grinnell, 384 U.S. 563, 575-76, 86 S. Ct. 1698, 1706, 16 L. Ed. 2d 778 (1966)*; *Morgan, 924 F.2d at 1489-90*.

"Defining the product market involves identification of the field of competition: the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business," while "a geographic market is 'an area of effective competition' where buyers can turn for alternate sources of supply." *Morgan, 924 F.2d at 1489-90*. In practice, economists provide the court with expert testimony to explain the relevant market and to measure the impact of the allegedly illegal conduct. *See, e.g., U.S. Healthcare, Inc. v. Healthsource, Inc., 986 F.2d 589, 599 (1st Cir. 1993)*.

WPX argues that the definition of the relevant market is an issue for the jury, and thus it is not appropriate for the court to rule on the relevant market in this motion. *See Image Tech. Services, Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1203 (9th Cir. 1997)*("Ultimately **[**18]** what constitutes a relevant market is a factual determination for the jury"). However, as with any issue of fact, if no genuine issue exists, or if plaintiff has failed to carry its burden of going forward with the evidence, summary judgment is appropriate. *See Morgan, 924 F.2d at 1489-90*; *In re Super Premium Ice Cream, 691 F. Supp. at 1268*. It is therefore proper for this court to examine the record and the law, to decide if there are genuine fact issues concerning the relevant market.

In its complaint, WPX defined the relevant market as "the time sensitive transportation by ground based delivery from one place of business to another place of business of small packages or parcels, generally weighing between one pound and one hundred and fifty pounds, in intrastate and interstate commerce within the Western United States." WPX then further described the relevant market by delineating the product and geographic components. The relevant product market was defined as the time sensitive delivery of small parcels over variable distances, but most commonly consisting of delivery within 150 miles in two days. The relevant geographic market was described as California, Arizona, Nevada, **[**19]** Oregon, Washington, Idaho, Montana, Utah, and Alaska.

UPS argues that this definition is so broad that the shipping services of all carriers must be considered in order to analyze that market and the impact of UPS's conduct in that market. UPS has provided factual evidence and the opinion of an expert with significant experience in antitrust and economic issues in the package delivery industry. The conclusion from that record is that after deregulation and LIS, customers view the shipping market as a continuum of all shipping services, **[*1059]** which are interchangeable depending upon need and price. The services need not be identical to be considered reasonably interchangeable. ***HN6***[] The determination of whether a service is reasonably interchangeable requires consideration of the cross-elasticity of demand. *United States v. E.I. du Pont de Nemours and Co., 351 U.S. 377, 394, 76 S. Ct. 994, 1007, 100 L. Ed. 1264 (1956)*. If customers respond to a small price change in a service by changing to another provider, there is a high cross-elasticity of demand between the services. In such a case, the services are reasonably interchangeable and therefore compete in the same market. UPS argues that based on the record **[**20]** it could not attain market power because so many alternatives exist for customers that any attempt to charge high prices would open the door for competitors.

WPX then proposed a different relevant market. Its amended definition was the market for regional time-definite, ground-based delivery of small parcels in California, Arizona, Nevada, and in portions of Utah. WPX argues that in this narrower market, WPX and UPS are the only carriers competing for regional contract carrier services, and that since UPS has underbid and thereby obtained some of WPX's customers in this market, UPS now possesses an illegal monopoly. WPX provides certain evidence in support of its arguments. And WPX includes numerical calculations intended to show that UPS is predatorially pricing its regional small parcel delivery service in the market as WPX defines it. WPX did not, however, answer the thrust of UPS's arguments or evidence.

UPS in reply again submitted a report from its expert, in which the expert stressed several weakness in WPX's theories, highlighted evidence that WPX excluded or failed to answer, and explained that even if WPX's new market definition were correct, WPX could still not show that **[**21]** UPS possessed market power.

In WPX's supplemental brief, it again changed its definition of the relevant market. It has narrowed the definition to include only the overnight, ground-based regional small package delivery service to wholesale distributors who need to ship products within approximately 500 miles of their strategically located warehouses. UPS replies that even this narrower definition does not represent the realities of a market, could not be a relevant market for antitrust purposes, and does not rebut the evidence UPS previously presented. UPS again argues that because WPX has not responded to the evidence UPS presented concerning the relevant market, summary judgment is appropriate.

WPX's efforts to redefine and narrow its alleged relevant market may be procedurally improper. *See* *International Telephone & Telegraph Corp. v. General Telephone & Elec. Corp., 518 F.2d 913, 934 (9th Cir. 1975)*(plaintiff's failure, in its pleadings, to include certain products in its definition of the relevant product market was binding); *Continental Trend Resources, Inc. v. OXY USA Inc., 44 F.3d 1465, 1481 n.19 (10th Cir. 1995)*(preventing plaintiff who pleaded broad, multi-state **[**22]** relevant market from revising the definition during the course of the litigation to narrow it). But even if some narrower definition were legally appropriate, it is not supported by the record here. The parties have developed the record through lengthy discovery on the issue. And the record does not support, factually or legally, plaintiff's claimed market.

WPX attempts to narrow the defined market in order to identify a small market in which UPS might have monopoly power. WPX's attempt to define the market on the basis of price or product variances is contrary to case law holding that "such distinctions are economically meaningless where the differences are actually part of a *spectrum* of price and [product options]." *In re Super Premium Ice Cream, 691 F. Supp. at 1268* (emphasis in original). *See also* *Brown Shoe Co. v. United States, 370 U.S. 294, 326, 82 S. Ct. 1502, 1524-25, 8 L. Ed. 2d 510 (1962)*. (explaining that pricing in a wide market does not provide a **[*1060]** rational way to subdivide a market into antitrust relevant markets). And the record here shows both a spectrum of consumer choices, and active competition for those choices. Both UPS's and WPX's expert reports **[**23]** describe the shipping options available to consumers in the so-called regional shipping market. UPS's expert explained, and WPX's experts confirmed, that deregulation and advanced LIS technology have significantly increased the diversity of this spectrum.

WPX attempts to establish its relevant market position by the reports of two experts. However, neither has a background in antitrust economics, both disclaimed expertise in ***antitrust law*** in their depositions, and neither has offered an opinion on the definition of relevant markets in antitrust litigation. And neither has responded to UPS's evidence or expert's report.

HN7[] On summary judgment, this court is not to weigh the credibility of the evidence presented, but rather decide whether the evidence presents a genuine issue of fact. But assertions in expert declarations do not automatically create genuine issues of fact. *Rebel Oil, 51 F.3d at 1440*. When expert opinions are not supported by sufficient facts, or when the indisputable record contradicts or otherwise renders the opinions unreasonable, they cannot be relied upon. *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 2598, 125 **[**24]** L. Ed. 2d 168*. "Expert opinion evidence … has little probative value in comparison with the economic factors" that may dictate a particular conclusion. *Matsushita, 475 U.S. at 594 n.19, 106 S. Ct. at 1360 n.19*. Expert declarations may be useful as a guide in interpreting market facts, but they are not a substitute for competent economic evidence. *Brooke Group, 509 U.S. at 242, 113 S. Ct. at 2598*. The opinion of WPX's experts do not create genuine fact issues about the definition of the relevant market.

Plaintiff's citation to *Forsyth v. Humana, 114 F.3d 1467*, is pertinent to the definition of a relevant product market in a Section Two case. But plaintiff cannot use that authority to define a relevant market as narrow as it contends. Plaintiff argues from *Forsyth* that price differentials alone may serve to create different relevant markets. To the extent that *Forsyth* so indicates, it was where the demand for one product showed no relationship to the price for the other. But plaintiff's evidence here does not establish such a factual predicate. As stated, the customers in this industry view shipping services as a continuum of shipping options and prices. While **[**25]** *Forsyth* is properly cited for the proposition that direct evidence of market power can defeat the need to provide circumstantial evidence of market power, the evidence here does not support the argument which plaintiff makes about pricing in this industry.

By a standard of no genuine issue of material fact, this court therefore determines that plaintiffs' attempted definition of a relevant market, even in its most narrow form, is not acceptable either legally or factually. At the very least, plaintiff has failed to meet its burden of going forward with the evidence on this issue under the standards of *Celotex* and *Matsushita*.

VI.

The lack of a defined relevant market might eliminate the necessity for this court to examine any further questions about UPS's alleged market power. However, it is apparent from the record that under any definition of a relevant market, UPS does not have the necessary market power for purposes of the anti-trust laws. Since the parties have conducted extensive discovery on this issue and have discussed it in their briefs, some consideration by the court is therefore appropriate.

HN8[] The showing of a defendant's significant market share is essential **[**26]** to proving a predatory pricing claim, because it relates to the power to charge supra-competitive prices in the market. And a showing of market share is one of the requirements **[*1061]** for a circumstantial showing of market power. *Rebel Oil, 51 F.3d at 1434*. Market share data must reflect the actual circumstances in a relevant market and must not be extrapolated from separate or parallel markets. *See, e.g., Morgan, 924 F.2d at 1491*; *Ideal Dairy Farms, Inc. v. John Labatt, Ltd., 90 F.3d 737, 749 (3rd Cir. 1996)*; *Bell v. Dow Chem. Co., 847 F.2d 1179, 1184 (5th Cir. 1988)*.

UPS argues that even if WPX's definition of a relevant market were proper, WPX has not presented adequate evidence of UPS's market.

WPX argues that UPS possesses an 83% share of the relevant market. However, the 83% number was taken from a 1994 UPS business plan for its West Los Angeles District, and it represents UPS's market share of *all* ground shipping, not just time-sensitive, and only in West Los Angeles. WPX cannot extrapolate this number to represent UPS's market share of the entire claimed relevant market. *See, Morgan, 924 F.2d at 1491*. WPX's expert reports and WPX's other evidence do not provide **[**27]** a reasonable estimate of UPS's market share of any market, be it the relevant market defined in the complaint or the narrower market WPX now proposes.

WPX argues that the market share figure presented by UPS's expert, 20-25%, is imprecise and based on faulty assumptions. It is indeed imprecise. However, the argument is insufficient for two reasons.

First, UPS's expert disclaimed that his market share estimation was precise. He stated that the statistics needed to prepare an accurate market share estimate are simply not in existence. He explained that the reason no such statistics exist is because neither industry analysts nor shipping companies collect data on a market defined by overnight, ground-based business-to-business delivery of small parcels. He also explained that he had to base his estimate on market statistics that do not separate business from residential delivery.

Second, and more important, UPS does not have the burden of proving its market share. Rather, UPS's burden is to make a *prima facie* showing that WPX does not present sufficient evidence to show that UPS has a significant market share in a relevant market. UPS did that by showing that because WPX's market **[**28]** definition was erroneous WPX could never show UPS's market share. WPX's burden was then to show sufficient evidence of UPS's market share in a relevant market to create a genuine issue. It has not done so.

WPX argues that it need not provide market share data because UPS conceded market power in another antitrust case involving regional shipping. *See General Parcel Service, Inc. v. United Parcel Service of America, Inc.*, Civ. Action No. 1:95-CV-0320-RCF, Slip Op. at 5 (N.D. Ga. Aug. 30, 1996). However, the court in the *GPS* case noted that UPS's concession was not binding outside the consideration of that motion. UPS made the concession of market power in order to expedite the resolution of that predatory pricing case, because GPS could not show that UPS's prices were predatory regardless of the market power issues. ***HN9***[] Facts established by stipulations or concessions *arguendo*, rather than by judicial resolution, are not fully litigated and do not have collateral estoppel effect. *See* *Sekaquaptewa v. MacDonald, 575 F.2d 239, 247 (9th Cir. 1978)*.

Given the lack of an adequately defined relevant market, WPX does not present adequate evidence of UPS's market share. Even assuming **[**29]** that WPX's redefinition of the relevant market is accurate, it does not offer adequate evidence on the market share issue. The court therefore concludes that WPX has failed to provide sufficient evidence to create a genuine issue of fact concerning UPS's market share in a relevant market.

VII.

Another step in the analysis of the market power issue is to examine whether **[*1062]** there are barriers to the entry of new competitors, or barriers to the expansion of existing competitors, in the market.

HN10[] A plaintiff in a predatory pricing claim "must show that new rivals are barred from entering the market . . . ." *Rebel Oil, 51 F.3d at 1439*. A barrier to entry is an obstacle that is "capable of constraining the normal operation of the market to the extent that the problem is unlikely to be self-correcting." Areeda & Turner, ***Antitrust Law***, P 727d. The Ninth Circuit has recognized five types of entry barriers: (1) legal license requirements; (2) control of an essential or superior resource; (3) entrenched buyer preferences for established brands; (4) considerations imposing higher capital costs on new entrants; and (5) in some situations, economies of scale. *Rebel Oil, 51 F.3d at 1439*. **[**30]**

WPX argues that large capital costs associated with entrance into the regional shipping market is a significant barrier to entry. It further argues that the need for a regional carrier to maintain high delivery density is also a barrier to entry. Delivery density refers to the ability of a carrier to make multiple deliveries to each individual location served, thereby maximizing the revenue per stop. WPX argues that delivery density is essential to the success of any regional carrier. UPS counters that simply because setup and maintenance costs are high does not mean that entrance of new competitors is precluded. Further, UPS attacks the delivery density argument as being illogical; that is, if delivery density were a pre-requisite to entry, then no new regional carrier could ever successfully start operations.

WPX highlights its capital costs during its recent expansion, noting that it had to borrow to finance the expansion of its business by the acquisition of other regional carriers. Borrowing money to *expand* a market is not really relevant as a barrier to entry. But even if this evidence were relevant, "***HN11***[] the mere fact that entry [would require] a large absolute expenditure **[**31]** of funds does not constitute a 'barrier to entry;' a new entrant is disadvantaged only to the extent that he must pay more to attract those funds than would an established firm." *Los Angeles Land Co. v. Brunswick Corp., 6 F.3d 1422, 1428 (9th Cir. 1993)* *quoting* 2 Areeda & Turner, ***Antitrust Law*** P 409e at 303. WPX's argument is also answered by the fact that WPX was successful in obtaining the money and in expanding.

WPX's argument about delivery density is also unsupported by the record. First, if delivery density were a significant barrier, neither WPX nor RPS could have attained the success they have. Both started small and expanded with or without delivery density. Additionally, if the court were to assume that WPX's narrow market definition is a true relevant market, UPS's entrance into the market in California in 1994 also answers WPX's density argument. The delivery density argument is really an explanation of price/volume discounting, and is not an explanation of a barrier to entry. It merely explains that delivery density lowers costs, and that lower costs obviously help a carrier maintain profitability. WPX's ability to develop delivery density is perhaps partially **[**32]** responsible for the profit margins WPX enjoyed prior to deregulation. However, no evidence presented by WPX explains how delivery density is a barrier to entry. And WPX offers no evidence to contradict UPS's evidence that delivery density, while perhaps forcing a new entrant to focus on a smaller piece of the market before expanding into the whole market, is not a barrier to entry.

Therefore, the court must conclude that WPX has not presented sufficient evidence to create a genuine fact issue on the existence of barriers to entry.

HN12[] A showing that there are barriers to the expansion of existing competitors is also relevant to prove market power. *Rebel Oil, 51 F.3d at 1439*. WPX does not discuss this issue in its opposition to UPS's motion. Moreover, in both 1995 and 1996, WPX successfully expanded by acquiring at least two regional carriers in the geographic **[*1063]** market it defined in its complaint. But more important in a summary judgment motion, WPX does not contest UPS's evidence or legal authority on the issue. WPX has thus failed to carry its burden to show that their are genuine issues of fact concerning barriers to expansion.

Finally, as discussed above in section III, numerous **[**33]** competitors to both WPX and UPS have in fact entered and are serving the market. This record shows that there are not material barriers to entry and expansion, and that the market is competitive.

VIII.

Plaintiff's allegations of predatory pricing by UPS are also interwoven with the issues of monopoly, attempted monopoly, and whether there has been an anti-trust injury.

HN13[] Predatory pricing is generally thought to occur in two stages. *Rebel Oil, 51 F.3d at 1433*. First, the alleged predator prices its goods or services below its marginal cost for those goods or services. *Id*. It hopes that, in the long run, such a price war will drive competitors from the market and thereby increase both its market share and market power. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 117-18, 107 S. Ct. 484, 493, 93 L. Ed. 2d 427 (1986)*. In the short term, the alleged predator, and any competitor that matches its predatory prices, suffers losses. However, because consumers get the benefit of the lower prices, there is no actionable harm to competition and no actionable antitrust violation in that first step. *Brooke Group, 509 U.S. at 224*, *quoting* *Brown Shoe v. United States,* ***[**34]*** *370 U.S. at 320* ("it is axiomatic that the antitrust laws protect competition not competitors").

HN14[] In stage two, the alleged predator seeks to recoup the losses that it suffered during stage one by charging supra-competitive prices, *i.e*. prices above competitive levels. *Rebel Oil, 51 F.3d at 1434*. At the time the predator implements stage two, it must possess enough market power so that by restricting its own output, it can restrict the supply to the market. Supply restrictions artificially increase demand and thus allows the predator to maintain its supra-competitive prices. *See* Areeda & Turner, ***Antitrust Law*** P501, at 322. However, without market power, the predator's recoupment will be thwarted by competitors who will offer their services at prices below the predator's supra-competitive prices. And unless the predator is capable of recoupment, predatory pricing does not hurt consumers. *Brooke Group, 509 U.S. at 224-25*.

WPX has not presented adequate evidence about UPS's pricing under that analysis. This prevents WPX from establishing causal antitrust injury, the type of injury the antitrust laws were designed to prevent. Predatory pricing is only harmful when the **[**35]** predator succeeds in recouping the losses it suffered by its earlier below-cost pricing. Even if the allegations of below-cost pricing were true, WPX provides no market evidence that suggests UPS is likely to gain such monopoly pricing power.

WPX relies on *Marsann Co. v. Brammall, Inc., 788 F.2d 611 (9th Cir. 1986)*, for the proposition that where proof of harm to competition is apparent, failed or impossible market analysis should not cause a case to be dismissed. In *Marsann* the district court granted summary judgment on the ground that the plaintiff could not show with precision that predatory prices were charged. *Id. at 613*. The Ninth Circuit reversed, suggesting that absolute precision was not required in calculating the predatory price figures. *Id. at 615*. *Marsann* was fact-specific and is not helpful to plaintiff here because of the absence of evidence on the market and on the other market power issues. No trier of fact could assess the impact of anti-competitive pricing on a relevant market when that relevant market is undefined. And even if the relevant market were defined, without specific evidence indicating market shares **[*1064]** or entry or expansion barriers, **[**36]** no analysis of causal antitrust injury is appropriate.

Plaintiff must show not just an injury to itself as UPS's competitor. Rather, its burden is to show an injury to competition. There is no genuine issue of fact that competition has in fact increased, offering the benefits of the competition to customers. There is therefore no evidence showing a present or likely causal anti-trust injury.

IX.

The court therefore concludes that plaintiff has not demonstrated a genuine issue of material fact on its causes of action based on monopoly or attempted monopoly. It has not carried its burden of showing a genuine issue on the relevant market. Nor has it presented sufficient evidence to show a genuine issue on defendant's market power in that relevant market. And it is has not shown anti-trust injury. Defendant's motion for summary judgment on plaintiff's Section Two claims must therefore be granted.

X.

WPX's remaining claim alleges that UPS's shipping contracts ("CCAs"), are contracts that unreasonably restrain trade in violation of Section One of the Sherman Act, by requiring shippers to use UPS exclusively for their regional shipping needs. Specifically, WPX contends that these contracts **[**37]** contain terms that prevent customers from using other carriers. WPX also alleges that other contract terms prevent the customers from easily terminating the contracts, and require the customers to use UPS exclusively in order to secure promised discounts. Finally, WPX claims that UPS's use of these "exclusive dealing" contracts injures competition and causes WPX to suffer economic injury of the type the antitrust laws were designed to prevent.

UPS does not dispute the existence of CCAs with many of WPX's former customers. However, it disputes that the contracts are exclusive. The contracts (1) are terminable at will by either party on between 7 to 30 days notice; (2) do not require the customers to use UPS exclusively; and (3) do not base any discount to the customers upon the exclusive use of UPS.

To establish a claim under Section One, WPX must show that the CCAs unreasonably restrained trade under a rule of reason analysis. *See* *Bhan, 929 F.2d 1404, 1410 (9th Cir. 1987)* (citing *T.W. Elec. Serv. v. Pacific Elec. Contrs. Ass'n., 809 F.2d 626, 632-33 (9th Cir.1987))*; *McDaniel v. Appraisal Inst., 117 F.3d 421, 422-23 (9th Cir. 1997)*, *cert. denied*, *140 L. Ed. 2d 470,* ***[**38]*** *118 S. Ct. 1305 (1998)*. To apply a rule of reason analysis the court must look for the actual effects of the CCAs on competition in the market. In order for the CCAs to be illegal restraints, WPX must show that the probable effect of the CCAs is to foreclose competition in a substantial portion of the market. *Cf.* *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997)*. In addition, WPX must show that it suffered "antitrust injury" - i.e. an injury resulting from the anti-competitive effects of UPS's contracts. *Rebel Oil, 51 F.3d at 1443-44*.

The foreclosure effect of the CCAs is related to the issue of market share. *See* *Omega, 127 F.3d at 1162-63*. But as discussed above WPX has not shown a relevant market and has not delineated UPS's market share of any market.

Further, WPX has not provided adequate evidence that the CCAs are in fact exclusive. All of the contracts in evidence have termination clauses that allow either party to terminate for any reason as long as 7, 10, or 30 days notice, (depending on the specific contract) is given. Nearly all of the contracts have relatively short durations, ranging from 30 days to 3 years. (Only one contract, that **[**39]** with American Greetings, falls outside this range of duration. However, the American Greetings' CCA was entered into in 1993, prior to deregulation and UPS's entrance into the regional contract carrier market in the **[*1065]** west). Most important, none of the contracts contain terms requiring a customer to give all of its shipping business to UPS. The contracts often require the customer to maintain certain levels of volume in order to receive agreed pricing discounts. And some of the contracts state that the customer will make UPS the preferred carrier for the customer's regional shipping needs. But that is not a *requirement* that the customer can use only UPS.

The duration and termination terms of the CCAs do not support WPX's contentions that they are exclusive dealing contracts in violation of Section One. *Cf.* *Omega, 127 F.3d at 1163-64*. A competitor could obtain one of UPS's customers by offering better prices or services and having the customer provide UPS with the contractually stated notice. The termination provisions diminish the competitive advantage that such contracts create. *Id. at 1164*.

WPX's evidence on the exclusivity of the contracts is only the testimony of James **[**40]** Gordon, Traffic Manager at Henry Schein. Prior to 1995, when Schein entered into a CCA with UPS, it used WPX for its regional shipping needs. Mr. Gordon stated in his deposition that he never thought that UPS's CCA with Schein was exclusive. He always believed that he could terminate the contract at any time for any reason. Mr. Gordon never believed that all of Schein's business would have to go through UPS, and he indicated that Schein's commitment to ship 53,000 packages a week through UPS did not amount to that company's total weekly shipping volume.

Even if WPX could show exclusivity, the fact that other shippers have recently entered the market also indicates that competition exists and that the market is not foreclosed.

Even if the CCAs could be cast as unreasonable restraints, WPX cannot show that it has suffered antitrust ***HN15***[] injury. The failure to show antitrust injury, even with proof of an illegal restraint, is fatal to a Section One claim. *See McDaniel, 117 F.3d 421 at 423*. Despite WPX's arguments, it has not been effectively eliminated from the market. Rather, it experienced a 60% increase in sales, generating over $ 100 million in revenues last year, the third year of UPS's **[**41]** alleged anti-competitive actions. WPX's claimed reduction of its higher profit margins does not equate to antitrust injury. *See id*. ("It is not enough for [the plaintiff] to show that a competitor, himself, was injured").

Plaintiff has not produced sufficient evidence to show that the contracts are exclusive dealing contracts, has not shown that the alleged restraints on the customers are unreasonable, and has not shown anti-trust injury. Plaintiff's evidence is insufficient to create a genuine issue of material fact on these issues. Summary judgment must therefore be granted to defendant on plaintiff's Section One claims.

Dated: June *15*, 1998.

CHARLES A. LEGGE

UNITED STATES DISTRICT JUDGE

JUDGMENT

For the reasons set forth in this court's order of August 13, 1996, this court's order of December 3, 1996, and the Opinion and Order signed and filed this date, judgment is hereby entered in favor of defendants and against plaintiff.

Dated: June *15*, 1998.

CHARLES A. LEGGE

UNITED STATES DISTRICT JUDGE

Hickory Specialties, Inc. v. Forest Flavors Int'l, Inc.

United States District Court for the Middle District of Tennessee, Northeastern Division

June 18, 1998, Entered on the Docket

No. 2:97-0008

Reporter
12 F. Supp. 2d 760 *; 1998 U.S. Dist. LEXIS 9926 **; 48 U.S.P.Q.2D (BNA) 1493

HICKORY SPECIALTIES, INC. v. FOREST FLAVORS INT'L, INC. and SAMUEL D. CRACE.

Disposition: **[**1]** Defendant's motion for summary judgment on Count V GRANTED, and the defendants' motion for summary judgment on the three remaining counts DENIED.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate only when there is no genuine issue of material fact and when the moving party is entitled to judgment as a matter of law. The party seeking summary judgment bears the initial burden of showing the absence of a genuine issue of material fact. In responding to a motion for summary judgment, the nonmoving party cannot rest on its pleadings, but must present some specific facts showing that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Summary Judgment, Evidentiary Considerations**

A dispute about a material fact is "genuine" within the meaning of *Fed. R. Civ. P. 56* only if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. The mere existence of a scintilla of evidence in support of the nonmoving party's position will be insufficient. The court is to construe the evidence and all inferences to be drawn from it in the light most favorable to the nonmoving party.

Torts > Business Torts > Unfair Business Practices > Elements

Torts > Business Torts > Unfair Business Practices > General Overview

HN3[] **False Designation of Origin, Elements of False Designation of Origin**

Under Tennessee law the tort of unfair competition is composed of three elements, focusing on the action of "passing off" a product. A plaintiff must prove that: (1) the defendant engaged in conduct which "passed off" its organization or services as that of the plaintiff; (2) in engaging in such conduct, the defendant acted with an intent to deceive the public as to the source of services offered or authority of its organization; and (3) the public was actually confused or deceived as to the source of the services offered or authority of its organization.

Torts > Business Torts > Unfair Business Practices > General Overview

HN4[] **Business Torts, Unfair Business Practices**

The term "passing off" is synonymous with "palming off." Both refer to false representation tending to induce buyers to believe that the defendant's product is that of the plaintiff.

Opinion

[*761] MEMORANDUM

The Court previously dismissed the plaintiff's non-compete claims, finding as a matter of law that any non-compete obligations expired in 1992. See Mem. Op., Aug. 20, 1997 (Doc. 37, at 5-7, **[**2]** 7 n.2, 11-12). The defendants now move for summary judgment on the four remaining claims: (1) Count II, Violation of Non-Disclosure Agreements; (2) Count III, Breach of Fiduciary Duty of Loyalty; (3) Count IV, Usurpation and Disclosure of Trade Secrets; and (4) Count V, Unfair Competition. The Court GRANTS the defendants' motion for summary judgment on Count V. The Court DENIES the defendants' motion for summary judgment on the three remaining counts, finding that a question of material fact exists as to whether an exception to the general rule of patent preemption should apply.

I. Relevant Background

As explained in this Court's memorandum opinion dated August 20, 1997, (Doc. 37), Hickory Specialties, Inc. ["HSI"] produces liquid smoke, a by-product of the controlled **[*762]** burning of wood that is used to flavor meat. HSI was founded in the early 1970's by the Crace brothers, R. Joseph and Don, each of whom owned fifty percent of the company stock. In 1982, Don Crace sold his stock in HSI to his brother, R. Joseph, for $ 4.2 million.

Defendant Sam Crace is Don Crace's son. He grew up working at HSI, and possessed enough knowledge of the liquid smoke process that HSI required him to **[**3]** sign both a ten year non-compete covenant and an agreement to never compete with HSI. Sam Crace quit working at HSI in 1989, and in 1994 he formed Forest Flavors, Inc. ["FFI"], a competing liquid-smoke business, and one of the defendants in this action.

On August 1, 1978, HSI and then-co-plaintiff Griffin Laboratories, Inc., brought suit in the Chancery Court for Cumberland County, Tennessee, for injunctive relief and damages alleging misappropriation and infringement of trade secrets against B & L Laboratories and former employee Charles Ledford. See Defs.' Notice of Filing (Doc. 19, ex. J, at 1-2). The Chancellor dismissed the case, but on July 6, 1979 the Tennessee Court of Appeals reversed, finding that HSI and Griffin's liquid smoke process was a trade secret. *Hickory Specialties, Inc. v. B & L Lab., Inc., 592 S.W.2d 583, 587 (Tenn. Ct. App. 1979)*. The Court of Appeals ordered the chancellor to issue an injunction "enjoining the defendants . . . from divulging or using any trade secrets of plaintiffs relating to the manufacture or manufacturing process, distribution or sale of liquid smoke . . ." *Id. at 588*.

On November 1, 1979 and before the chancellor had responded **[**4]** to the mandate above, HSI applied for a temporary restraining order. See HSI's Mem. in Supp. of App. for TRO, Nov. 1, 1979 (Doc. 60, ex. 2, at 4). Due to a procedural shuffle, HSI filed its petition for a TRO in the Tennessee Supreme Court. [1] **[**5]** HSI's petition for a TRO asserted that Mr. Ledford's sale, production, manufacture, advertising, and distribution of liquid smoke was imminent. Id. HSI may have asserted also that Mr. Ledford disclosed HSI's trade secrets. See Aff. of R. Joseph Crace, filed in Supp. of 1979 TRO (Doc. 60, ex. 3). [2] The Tennessee Supreme Court granted the 1979 TRO for fear that HSI might suffer irreparable harm if the Court refused to grant it. See Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. (Tenn. Nov. 8, 1979) (Doc. 28, ex. 2). The TRO enjoined Mr. Ledford and B & L from divulging or using any trade secrets of HSI. Id.

[6]** On February 11, 1980, the chancellor responded to the mandate from the Tennessee Court of Appeals, and issued a permanent injunction against Ledford and B&L. Hickory Specialties, Inc. v. B&L Labs., Inc., No. 4228, slip op. (Ch. Cumberland County Feb. 11, 1980) (doc. 28, ex. 4). Among other instructions, the injunction "permanently enjoined [the defendants] from divulging or using any trade secrets of [the plaintiffs]." Id.

On some date between February 11 and April 3, 1980 [3], HSI asked the Chancery **[*763]** Court for Cumberland County to hold Mr. Ledford and B & L in contempt of the permanent injunction. See HSI's Pet. for Civ. Contempt (__, 1980) (Doc. 60, ex. 6). In that petition, HSI alleged that Mr. Ledford and B & L had violated the injunction entered by

---

[1] According to HSI, the chancery court and the court of appeals lacked jurisdiction when HSI sought permission to appeal the court of appeals' decision. Because the court of appeals had not issued an enforceable order yet, HSI's only option was to seek relief in the Tennessee Supreme Court.

[2] In its present pleadings, HSI claims that it never asserted in 1979 that Mr. Ledford had disclosed HSI trade secrets. HSI's 1998 Mem. in Resp. to Defs'. M. for Sum. J. (doc. 63, at 3). However, according to defendants FFI and Sam Crace, R. Joseph Crace's 1979 affidavit indicates that HSI *did* assert in 1979 that Mr. Ledford had disclosed HSI trade secrets. In the seventh paragraph of his affidavit, R. Joseph Crace states that if Baltimore Spice representatives came to B&L Laboratories to "observe the manufacturing process and to offer technical assistance," the trade secrets of HSI would be revealed and their value would be "diminished beyond calculation." Id. at P 7. What HSI fails to point out, but what FFI catches, is that R. Joseph Crace stated in the third paragraph of that same affidavit that Baltimore Spice representatives *did* recently visit the B&L Laboratories to offer technical assistance. Id. at P 3. Reading paragraphs seven and three together, one could conclude that HSI's trade secrets were rendered valueless when the Baltimore Spice representatives came to offer technical assistance at B&L Labs, contrary to the assertion of HSI in its pleadings before this Court.

[3] HSI's petition for contempt is undated, except to show that the year was 1980. We know, however, that HSI must have filed its petition prior to April 3, 1980 since that is the day the chancellor issued his order on that matter.

the Tennessee Court of Appeals by using HSI's trade secrets. See id. at PP 7-8. Specifically, HSI alleged that Ledford and B&L were using HSI's trade secrets to make liquid smoke and then selling that liquid smoke at a lower price than HSI so that customers were refusing to purchase HSI's liquid smoke. See id. at P 10. Although the crux of HSI's petition focused on the illegal use of its trade secrets, **[**7]** HSI also asserted generally that Ledford was in the process of divulging its trade secrets: "It is imperative that an immediate hearing be held, as to the amount of damages Plaintiffs are entitled, as each day that Plaintiffs' trade secrets are divulged and used dilutes their value." Id. at P 17.

The chancellor held Mr. Ledford and B & L in contempt of the permanent injunction. Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. at 1-2 (Ch. Cumberland County, Apr. 3, 1980) (Doc. 60, ex. 7). The chancellor focused primarily on the defendants' illegal use of the trade secret, and ordered them to cease manufacturing liquid smoke and to destroy any equipment similar to HSI's that the defendants used to make liquid smoke. Nowhere in his order did the chancellor make **[**8]** specific findings that the defendants divulged HSI's trade secrets. Nevertheless, the chancellor ordered the clerk and master, "to assess the amount of damages to which Plaintiffs are entitled for the divulging by the Defendants of their trade secrets." Id. at 1-2.

Pursuant to the chancellor's direction, the clerk and master determined the fair market value of HSI's and then-co-plaintiff Griffith's trade secrets to be $ 2,751,000. Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. (Clerk and Master, Cumberland County Sept. 5, 1980) (doc. 60, ex. 8). However, he found that HSI and Griffith showed no damages "in the nature of lost profit or loss of business," and awarded zero damages. Id.

HSI objected to the clerk and master's report, and urged the chancellor to award it $ 2,751,000 in damages. See HSI's Obj. to Master's Rep., Sept. 9, 1980 (Doc. 28, ex. 9). HSI stated that, "plaintiffs submit that the correct measure of damages in this cause for wrongful divulging by the Defendants of Plaintiffs' trade secrets is the fair market value of those trade secrets . . . ." Id. at 2.

Before the chancellor ruled on the objections to the clerk and master's **[**9]** report, HSI and Ledford entered into settlement agreements. Ledford admitted that he had divulged trade secrets of HSI to B&L, Jay Olson, and Glen Fisher -- who were apparently employees at B&L. See Settlement Agreement of Sept. 29, 1981 (doc. 60, ex. 9). But, as FFI points out, Ledford's settlement agreement admitted that he had disclosed the secrets to other unnamed people besides Olson, Fisher, and B&L. He stated:

> Ledford has knowingly used and divulged, among other things, the following information that he now recognizes to constitute the trade secrets of [HSI] and that he recognizes to be confidential and proprietary to it, to, among others, B&L . . ., Jay Olson and Glen Fisher.

Id. (emphasis added). Also in that agreement, Ledford promised to never divulge HSI's trade secrets to anyone again. Id.

Eventually, the chancellor reviewed the parties' objections to the clerk and master's report and found that the plaintiffs should have been awarded damages in the amount of the fair market value of their trade secrets. See Hickory Specialties, Inc. v. B&L Labs., Inc., No. 4228, slip. op at 1-2 (Ch. Cumberland County June 6, 1983) (doc. 28, ex. 11). **[**10]** The chancellor wrote that, "The Master was directed 'to assess the measure of damages to which the plaintiffs (plaintiff now) are entitled for divulging by the defendants of their trade secrets.['] What the master was to determine differs from what he did determine." Id. at 1.

On November 3, 1981, the United States Patent Office granted Mr. Ledford a patent for liquid smoke. (Doc. 28, ex. 13.) He filed his application for a patent on May 8, 1980, and assigned the patent to The Baltimore **[*764]** Spice Company. Id. HSI thereafter purchased the patent from Baltimore Spice. See Aff. of R. Joseph Crace (doc. 26, P 2).

In 1986, R. Joseph Crace retired from HSI. Id. at P 1. Until then, he served as either the president and CEO or the chairman of the board since HSI's founding. Id.

On January 29, 1997, HSI filed a complaint in this Court naming Sam Crace and FFI as defendants. (Doc. 1.) The complaint listed six separate counts: (1) breach of a covenant not to compete; (2) breach of a non-disclosure agreement; (3) breach of fiduciary duty; (4) trade secret violations; (5) unfair competition; and (6) misrepresentation and promissory fraud. The defendants answered and counterclaimed **[**11]** on February 24, 1997, alleging that HSI had violated *15 U.S.C. §§ 1-2*, and asserting damages under *15 U.S.C. § 15*. (Doc. 5.) The plaintiff answered the counterclaim on March 17, 1997, at which point HSI demanded a jury. (Doc. 11.)

On August 20, 1997, this Court granted in part the defendants' motion for summary judgment, dismissing the first and sixth claims (both regarding non-compete agreements), and finding as a matter of law that any non-compete obligations expired in 1992. See Mem. Op., Aug. 20, 1997, at 5-7, 7 n.2, 11-12. The defendants had argued that summary judgment was appropriate on the trade secret claims based on two theories. First, the defendants argued that the plaintiffs waived or lost their trade secret on liquid smoke because the records to the B & L case were not sealed. The Court denied the motion on that theory, finding that questions of material fact existed as to whether the records were easily ascertainable. Second, the defendants argued that the fact the plaintiff's liquid smoke is patented (the "Ledford" patent) preempts it from protection as a trade secret. The Court found that misappropriation of trade secrets is governed by state law, and that **[**12]** a question of material fact existed as to whether the Ledford patent is a product or a process patent.

The defendants now move for summary judgment on grounds of judicial estoppel and, again, patent preemption -- this time citing new authority.

II. Law and Analysis

A. Summary Judgment

HN1[] Summary judgment is appropriate only when there is no genuine issue of material fact and when the moving party is entitled to judgment as a matter of law. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Street v. J.C. Bradford & Co., 886 F.2d 1472, 1476-80 (6th Cir. 1989)*. The party seeking summary judgment bears the initial burden of showing the absence of a genuine issue of material fact. *Celotex, 477 U.S. at 323*. In responding to a motion for summary judgment, the nonmoving party cannot rest on its pleadings, but must present some "specific facts showing that there is a genuine issue for trial." Id.

The Supreme Court concluded in *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*, that ***HN2***[] a dispute about a material fact is "genuine" within the meaning of *Rule 56 of the Federal Rules of Civil Procedure* **[**13]** only if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id. at 248*. "The mere existence of a scintilla of evidence in support of the [nonmoving party's] position will be insufficient." *Id. at 252*. Of course, the Court is to construe the evidence and all inferences to be drawn from it in the light most favorable to the nonmoving party. *Id. at 255*.

B. All Four Remaining Claims are Properly Classified as One Trade Secret Claim

According to the defendants, HSI's complaint shows that HSI's "allegations that defendants have stolen Hickory's trade secrets are at the very heart of each of Hickory's remaining claims." See Defs.' Reply Mem. (Doc. 66, at 9). The plaintiffs disagree. See Pl.'s Resp. Mem. (Doc. 63, at 12). HSI's four remaining counts are predicated on finding parts of HSI's liquid smoke are viable trade secrets. Therefore, unless HSI can prove that parts of its liquid smoke qualify for trade secret protection, the four remaining counts will fail.

[*765] 1. Count II (violation of non-disclosure agreement)

In its complaint, HSI stated that:

> Defendant Sam Crace has breached the Non-Disclosure Agreements into which **[**14]** he entered by disclosing Hickory Specialties' confidential information to Defendant Forest Flavors and otherwise.
>
> These breaches and threatened breaches have harmed and threaten further and irreparable harm to Hickory Specialties. These defendants have stated that they may use the same processes and techniques which Hickory Specialties employs, as well as other information belonging to Hickory Specialties which they have contractually agreed not to do.

> The use and disclosure of Hickory Specialties' confidential information and know-how, in violation of the several contractual agreements that he [defendant] would not do so, will result in damages to Plaintiff.

See Compl. (Doc. 1, at PP 24-26) (emphasis added). The language of Count II shows HSI must succeed on its argument that its information is a protectable trade secret in order to succeed in arguing that the defendants violated its non-disclosure agreements. The heart of paragraphs 24-26 hinge on proving that the defendants divulged the plaintiff's trade secrets. As the defendants assert, without a valid trade secret to disclose, there is no way for the defendants to have violated a non-disclosure **[**15]** agreement. See Defs.' Reply Mem. (Doc. 66, at 9).

2. Count III (breach of fiduciary duty of loyalty)

In its complaint, HSI stated that:

> While he was an employee of [HSI] and its agent, and solely because of that relationship, [HSI] disclosed to [defendant] Sam Crace, and he was given access to, all of its trade secrets, confidential information, confidential manufacturing techniques, processes and formulae. In addition, he learned of the equipment necessary to manufacture liquid smoke and was involved in the refinement and improvement of the equipment and the manufacturing techniques. He learned the identity of customers, suppliers, and all relevant pricing information, as well as the costs of manufacture.
>
> Because Sam Crace gained access to, assisted in the development of, and learned this information during his employment at [HSI] and because of his agency relationship with it, he is imbued with a fiduciary duty of loyalty to [HSI] and is bound not to use or disclose that information or otherwise use it or take advantage of it to the detriment of [HSI]. This information is an asset of [HSI] which it is entitled to protect from wrongful use or disclosure **[**16]** by Sam Crace.
>
> If the information is used or disclosed as the Defendant has threatened, [HSI] is damaged irreparably. It is entitled to injunctive relief.

See Compl. (Doc. 1, at PP 28-30) (emphasis added). Again, the defendants assert that it is impossible to violate a duty of loyalty when one imparts information that has already been disclosed, as established in the Chancellor's 1980 findings. See Defs.' Reply Mem. (Doc. 66, at 9). Additionally, the defendants refer the Court to a Tennessee Court of Appeals decision which found that former employees do not violate any "duty of loyalty" by competing with former employers, absent a non-compete covenant, even when the employees learned allegedly "confidential" information in their prior jobs. See id. (citing *Data Processing Equipment Corp. v. Martin, 1987 Tenn. App. LEXIS 3150*, No. 87-230- *II, 1987 WL 30155*, slip op. at *6 (Tenn. Ct. App. Dec. 30, 1987)). The Court already found that the plaintiff's non-compete covenants were invalid. See Mem. Op., Aug. 20, 1997 (Doc. 37, at 6-7). This authority is persuasive, and lends support to the conclusion that the defendants could not have violated a duty of loyalty if there were no trade **[**17]** secrets to protect. The Court finds that Count III, like Count II, will fail if the plaintiff cannot prove it deserves trade secret protection.

3. Count IV (usurpation and disclosure of trade secrets)

In its complaint, HSI states:

> **[*766]** [HSI] is the owner of several trade secrets. In 1979, the Tennessee Court of Appeals adjudicated many of [HSI's] manufacturing processes, techniques and equipment to be trade secrets. That ruling operates as collateral estoppel upon these Defendants.
> Although stating that he will use new technology to manufacture liquid smoke, . . . Defendants Sam Crace and Forest Flavors, on information and belief, intend to use many of the processes, formulae, manufacturing techniques and equipment which have been found to be trade secrets of [HSI]. Moreover, they surreptitiously ordered equipment and materials in an effort to avoid detection by Plaintiff of their plans, operations and activities to enter the liquid smoke business and use and divulge HSI's trade secrets.

> The Defendants learned of HSI's trade secrets only through Defendant Crace's employment at [HSI] and the wrongful disclosure by Sam Crace to Defendant Forest Flavors. These Defendants **[**18]** are not entitled to use or disclose them.

See Compl. (Doc. 1, at PP 31-33) (emphasis added). As with Counts II and III, Count IV of the plaintiff's complaint is not actionable unless the Court finds that HSI's information qualifies as a trade secret. See *Arco Indus. Corp. v. Chemcast, 633 F.2d 435, 441-43 (6th Cir. 1980)* (reversing the district court's ruling that the defendants misappropriated the plaintiff's trade secret where none of the plaintiff's information could be labeled as a trade secret).

4. Count V (Unfair Competition)

In its complaint, HSI states:

> The Defendants' breaches of their duties of loyalty, breaches of the contractual and common law non-disclosure obligation and the wrongful use of HSI's manufacturing techniques, know-how, knowledge, and equipment, as well as their customer information, pricing information and other confidential information constitutes unfair competition. In addition, the Defendants have surreptitiously ordered material and supplies in an effort to keep their plans to compete unfairly with HSI's secret.

See Compl. (Doc. 1, at PP 35). Although neither party has referred to it, the Sixth Circuit's opinion in **[**19]** *Sovereign Order of Saint John of Jerusalem, Inc. v. Grady, 119 F.3d 1236, 1243 (6th Cir. 1997)*, gives the Court no option but to rule against the plaintiff on Count V. [4] In Grady, the Sixth Circuit explained that ***HN3***[] the tort of unfair competition is composed of three elements under Tennessee law, focusing on the action of "passing off" [5] a product. Id.

> Although Tennessee law regarding unfair competition is not well developed, it appears that there are three elements to this tort. A plaintiff must prove that: (1) the defendant engaged in conduct which "passed off" its organization or services as that of the plaintiff; (2) in engaging in such conduct, the defendant acted with an intent to deceive the public as to the source of services offered or authority of its organization; and (3) the public was actually confused or deceived as to the source of the services offered or authority of its organization.

Id. The plaintiff in the instant case bases its claim for unfair competition on the three grounds listed as Counts II, III, and IV: (1) breach of the duty of loyalty; (2) breach of non-disclosure obligations; (3) and misappropriation/ disclosure of trade secrets. **[**20]** Because the plaintiff has not alleged that the defendants "passed off" the defendants' liquid smoke as that of the plaintiff, the Court GRANTS summary judgment to the defendants on Count V, based on this rationale alone. Id.

Because the Court GRANTS the defendants motion for summary judgment as to **[*767]** the plaintiff's Count V, only three of the plaintiff's claims now remain. In sum, all three **[**21]** of plaintiff's remaining claims depend on a conclusion that HSI's information qualifies as a trade secret.

C. Patent Preemption

---

[4] Both the case cited by the plaintiff, *Johns-Manville Corp. v. Guardian Indus. Corp., 586 F. Supp. 1034, 1041 (E.D. Mich. 1983)*, and the case cited by the defendants, *Arco Indus. Corp. v. Chemcast, 633 F.2d 435, 441-43 (6th Cir. 1980)*, rely on Michigan law rather than Tennessee law and are therefore merely persuasive.

[5] ***HN4***[] The term "passing off" is synonymous with "palming off." Both refer to "false representation tending to induce buyers to believe that the defendant's product is that of the plaintiff . . . ." See W. Page Keeton et al., Prosser & Keeton on the Law of Torts § 130, at 1015 (5th ed. 1984).

HN5[] An application for a patent requires disclosure in exchange for the exclusive right to use the patented invention for a given term. See *Scharmer v. Carrollton Mfg. Co., 525 F.2d 95, 99 (6th Cir. 1974)*. An application for a patent must:

> *HN6*[] contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and [must] set forth the best mode contemplated by the inventor of carrying out his inventions.

35 U.S.C.A. § 112 (1984) (emphasis added).

It is generally accepted that once information is patented, it can no longer be a trade secret. "Whether secrecy is lost through seepage in conduct of business, sale or exposition of a product embodying the secret, disclosure of the idea through a trade or technical publication, or by way of patent . . . the principle remains: a secret on the wing cannot be recalled." 1 Roger **[**22]** M. Milgrim, Milgrim on Trade Secrets § 1.03, at 1-98 (1997). "In general, both a patent and a trade secret in the same subject matter cannot coexist. . . . When an inventor decides that [information] is patentable, disclosure of that [information] in a patent immediately voids any trade secrets in it." Robert C. Scheinfeld & Gary M. Butter, Using Trade Secret Law to Protect Computer Software, 17 Rutgers Computer & Tech L.J. 381, 399 (1991). "Patent and trade secret protection are typically mutually exclusive." Id. at 408. "A manufacturer who has developed a process which is potentially a trade secret must . . . choose whether he will protect his process through trade secrecy or through patent law." George J. Alexander, Commercial Torts § 3.1, at 90 (2d ed. 1988). "Information that may have been subject to trade secret protection prior to the patent grant is actually deemed disclosed to the extent that it is described in the patent." *Id., at 100*.

HN7[] The rule in the Sixth Circuit is that, "if a trade secret is patented there is no further right to secrecy. The patent is a legal disclosure with the right to a limited, temporary monopoly granted as the reward for **[**23]** disclosure." *Scharmer, 525 F.2d at 99* (finding that "when the patent was granted, the plaintiff's property right in the trade secret ceased prospectively. Thus, he had no right of action for misuse of a trade secret subsequent to that date."). In establishing this rule for our circuit, the Sixth Circuit looked to other circuits rather than to law from a specific state. Nevertheless, caselaw from Tennessee courts implies the same result. [6]

[24]** In *Hickory Specialties, Inc. v. B & L Lab., Inc., 592 S.W.2d 583, 587 (Tenn. Ct. App. 1979)*, the Court of Appeals held that, *HN8*[] "the subject matter of a trade secret must be secret. Matters of public knowledge or general knowledge in the industry or ideas which are well known or easily ascertainable, cannot be trade secrets." Id., cited in *Heyer-Jordan & Assocs. v. Jordan, 801 S.W.2d 814, 821 (Tenn. Ct. App. 1990)*. Since the B & L Court was not faced with the question before this Court, it does not state explicitly that patent protection preempts trade secret protection. However, patented information fits the definition from B & L of what constitutes a non-trade secret: by their essence patents describe information which is both a "matter[] of public knowledge" and "easily ascertainable." **[*768]** E.g., id.; see e.g., *35 U.S.C.A. § 112* (requiring patent applicants to fully describe the information so that members of the public can create the same process or product).

When Mr. Ledford patented HSI's liquid smoke process in 1981, he divulged the trade secrets that HSI possessed regarding liquid smoke at that point in time. See Depo. of R. J. Crace (Doc. 18, ex. A, at **[**25]** 87-90). HSI now

---

[6] In the Court's August, 1997 Memorandum Opinion, (doc. 37), the Court denied the defendants' motion for summary judgment. The defendants based their motion in part on the theory of patent preemption. At that point, the Court found that a question of material fact existed as to whether HSI's patent was a product patent or a process patent. As authority on that point, the Court cited *Arco Indus. Corp. v. Chemcast Corp., 633 F.2d 435, 443 (6th Cir. 1980)*. Arco was an appeal from a federal district court sitting in Michigan, applying Michigan law. Upon further examination, the Court finds that Arco is not controlling in the instant case on the issue of patent preemption. No other Sixth Circuit case analyzes this issue (process versus product patent) and, more importantly, nor does any Tennessee court. Additionally, neither party in the instant suit has raised the issue of the product/process patent difference.

owns the "Ledford patent." See id. at 88-90. In a deposition taken on March 26, 1997, R. Joseph Crace testified for HSI as a Rule 30(b)(6) designee. He stated:

Q: And he [Ledford] basically patented the Hickory process.

A: Right.

Q: And these parameters you're talking about, the temperatures, the sawdust, the process without forced air, he tried -- he [Ledford] actually did put all those in the patent, didn't he?

A: Yes.

. . .

Q: You would agree with me that [the Ledford] patent itself talks about -- which [HSI], you said owns now, that patent talks about, basically the [HSI] process.

A: Yes.

Id. at 88-90. Later in the same deposition, R. Joseph Crace identified a document from HSI's files, dated July 6, 1987. See Doc. 18, ex. A, att. 6. The defendants' attorney asked R. JOSEPH Crace about the document:

Q: [The July 6, 1987 document] says that the product and the process that's described in the Ledford patent are virtually identical to those used by [HSI]. You would agree that says that.

A: Yes.

Q: You would agree with that statement.

A: Yes.

Q: And then it goes on and lists 12 areas of particulars.

A: Yes.

[26]** *Id. at 100-01*. These admissions by HSI's Rule 30(b)(6) witness indicate that HSI disclosed the trade secrets surrounding its liquid smoke when it patented its liquid smoke. The Court finds that under the general rule of patent preemption, HSI would be preempted from arguing now that its process is still a valuable secret. However, as discussed below, this Court believes that an exception to the general rule exists when a party subsequently refines its patented information/technology. Because a question of material fact exists as to whether HSI's trade secrets are refinements -- or mere clarifications -- of the patent, the Court must DENY summary judgment on the three remaining counts.

HSI argues that the Court should apply an exception to the general patent preemption rule. HSI argued in its pleadings and at the hearing on the instant motion that the facts of this case are similar to those of *Johns-Manville Corp. v. Guardian Indus. Corp. 586 F. Supp. 1034 (E.D. Mich 1983)*, in that the information in the patent is merely the "tip of the iceberg," and that the trade secrets lurk underneath that tip. In Johns-Manville, the plaintiff brought suit against the defendant **[**27]** corporation and defendant former employees for patent infringement, misappropriation of trade secrets, and violation of employment fiduciary duty. As discussed below, the Johns-Manville Court held that the plaintiff could own a patent on certain information, and simultaneously receive trade secret protection for refinements made to that same information. HSI cites Johns-Manville as authority for the proposition that a party can obtain patent protection and trade secret protection simultaneously. Impliedly, HSI asserts that Johns-Manville gives this Court permission to find that the refinements to HSI's liquid smoke deserve trade secret protection even though HSI's liquid smoke is already patented.

In Johns-Manville, the District Court in Michigan found that the defendants both infringed the patent and misappropriated trade secrets. *Id. at 1042, 1076*. Although the Johns-Manville Court published the conclusion of its opinion, it placed much of its analysis under seal. See *Id. at 1048* (removing pages 28-35 of its opinion discussing the development of the plaintiff's trade secrets); 1072 (removing pages 114-127 of the opinion discussing the propriety of enjoining **[**28]** the defendants from misappropriating the trade secrets). **[*769]** The plaintiff in Johns-Manville asserted that the defendants misappropriated nine alleged trade secrets. *Id. at 1069*. The court found that four items were protected as trade secrets, while five items were not. *Id. at 1076*. [7]

---

[7] In concluding that the defendants infringed the plaintiff's patent, the Johns-Manville Court noted the infringement of two specific parts of the technology: the *Heated Spinner Ambient, and the Air Ring. 586 F. Supp. 1034 at 1067-69*. (As to the heated spinner

[29]** Nowhere in the published parts of the Johns-Manville opinion does the court discuss how it came to the conclusion that information can be protected simultaneously as a patent and as a trade secret. Nowhere does it discuss whether a patent precludes trade secret protection when a patent, by its nature, discloses the secret. Nowhere does it discuss HSI's theory that improvements to patents can receive trade mark protection, although it does acknowledge that disclosure of the secret renders information unprotectable as a trade secret. *Id. at 1071-73*.

As to the issue of disclosure/non-disclosure, the Johns-Manville Court raised only the following points. First, the court addressed the plaintiff's maintenance of tight security around the plant where the plaintiff developed the technology, and plaintiff's policies regarding secrecy. *Id. at 1071-72*. Next, the court addressed the publication of a book by employees of the defendant (who used to be employees of the plaintiff) which contained only general descriptions of the technology. *Id. at 1072*. Finally, the court addressed the rule in Michigan that information must not be readily ascertainable to the general public **[**30]** without hardship or difficulty, *Id. at 1073*, similar to the rule in Tennessee. For authority on that rule, the court cited *Hayes-Albion Corp. v. Kuberski, 108 Mich. App. 642, 311 N.W.2d 122 (Mich. Ct. App. 1981)*. Kuberski is completely irrelevant to the instant case since the plaintiffs in that case chose to not patent their technology. *Hayes-Albion Corp. v. Kuberski, 421 Mich. 170, 364 N.W.2d 609, 612 (Mich. 1984)* (affirming in part and reversing in part). In that regard, the Kuberski court could not have been confronted with the issue of patent preemption. Also, in discussing Kuberski, the Johns-Manville court never mentioned the concept of patent preemption. *586 F. Supp. at 1073*. Finally, the Johns-Manville court focused its attention on the difference between product and process patents, id., which appears to be a debate that varies from state to state. As discussed above, although Michigan law differentiates between product and process patents, this Court has been unable to find any case in Tennessee that addresses the issue.

This Court finds that it cannot rely on Johns-Manville to preclude it from finding patent preemption, even though **[**31]** the Johns-Manville Court apparently reached the opposite result. Unfortunately, the Johns-Manville opinion neither discusses any of that court's thinking on this issue, nor does it cite any authority for its conclusion, at least in the published parts of its opinion.

Nevertheless, it is possible that the Sixth Circuit has contemplated the possibility of an exception to the general rule of patent preemption where a party refines information or technology which the party has previously patented. In dicta, the Sixth Circuit stated that, "Certainly it is possible that a new combination of known steps or processes can be entitled to trade secret protection." *Arco Indus. Corp. v. Chemcast Corp., 633 F.2d 435, 442 (6th Cir. 1980)* (reversing a finding of trade secret misappropriation and patent infringement on grounds separate from the refinement exception). This Court holds that ***HN9***[] post-patent refinements qualify for trade secret protection as an exception to the **[*770]** general patent preemption rule. In the instant case, a question of material fact exists as to whether this refinement exception should, or should not, apply.

Evidence in the record indicates that HSI's patent on liquid **[**32]** smoke reveals material which would preclude HSI from receiving trade secret protection, due to the general patent preemption rule. As discussed above, R. Joseph Crace acknowledged in a deposition that the product and process that are described in the Ledford patent are virtually identical to those used by HSI. See Depo. of R. Joseph Crace (Doc. 18, ex. A, at 87-90, 100-01). This evidence implies that presently HSI merely may be clarifying information found in the patent and labeling it a trade secret. Unlike post-patent refinements, clarification of a patent would not be new information subject to trade secret protection. Since applications for patents must set forth the "full, clear, concise, and exact terms as to enable any person skilled in the art . . to make and use the same, and must set forth the best mode contemplated by the

---

ambient, the court found that while a certain element of the spinner was an improvement to the patent, the defendants "ignored the file wrapper history, and read J-M's claims too narrowly." *Id. at 1067*. Neither party in the instant case has raised the issue of file wrapper estoppel.)

The Johns-Manville Court then addressed the trade secret issues, and noted the nine trade secrets that the plaintiff claimed the defendants misappropriated. *Id. at 1069*. The Court sealed part of its discussion on this issue, see *id. at 1073* (sealing pages 114-27 of the opinion), and then concluded that the defendants had misappropriated the Air Ring (along with three other trade secrets), while also concluding that the defendants had not misappropriated the Heated Spinner Ambient. *Id. at 1076*. Therefore, it is unclear how the Johns-Manville Court reached this conclusion.

inventor of carrying out his inventions," *35 U.S.C.A. § 112 (1984)*, clarifications would set forth only what was already required to be disclosed when the patent was sought. While HSI may argue that the Ledford patent is invalid for failing to fully disclose information necessary for others to make the same liquid smoke as HSI, this argument has no **[**33]** bearing on the fact that mere clarification of the patent's contents would be preempted. See *Scharmer v. Carrollton Mfg. Co., 525 F.2d 95, 99 (6th Cir. 1974)* ("The fact that the patent was subsequently declared invalid negates only the inventor's right to a limited monopoly and not the public disclosure which attends issuance of the patent.").

The record also contains evidence to the contrary, indicating that HSI may have made refinements to its patent. For instance, on June 16, 1986 Sam Crace sent a letter to Joe Crace identifying several pieces of information and technology that HSI may have been interested in patenting. (Doc. 60, ex. 17.) Since the Ledford patent was issued in 1981, this letter from 1986 indicates that HSI identified steps which may be post-patent refinements to its liquid smoke. E.g., *Arco, 633 F.2d at 442*. It is unclear whether these steps are mere clarifications of the patent that should have been disclosed at the time the patent was sought, or whether these steps are refinements that HSI made subsequent to issuance of the patent.

Because a genuine issue of material fact exists as to whether HSI's information qualifies for trade secret protection through **[**34]** the patent preemption refinement exception, the Court cannot grant summary judgment on the plaintiff's three remaining claims.

D. Submission of Evidence After the Close of Discovery

HSI seeks to introduce a late-filed list of 36 newly identified trade secrets through its expert witness, Byron D. Taylor, (doc. 61), when it originally submitted a list of only 31 trade secrets in its response to interrogatories in February, 1997. (Doc. 18, ex. F, no. 1). HSI filed Byron Taylor's affidavit three days after the close of discovery. [8] HSI attempts to introduce this post-discovery filing by classifying it as a supplementation pursuant to Local Rule 9(a)(3) and *Rule 26(e) of the Federal Rules of Civil Procedure*.

The defendants direct **[**35]** the Court to two highly persuasive decisions from neighboring courts. First, according to *Haun v. Humana, Inc., 651 F. Supp. 120, 122 (W.D. Ky 1986)*, "Matters inconsistent with admissions conclusively established under Rule 36 cannot be considered by the Court in ruling upon Defendant's Motion for Summary Judgment." According to Haun, the Court should not allow HSI to file a post-discovery affidavit that is inconsistent with HSI's 14 month old interrogatory answer. Second, *Minnkota Power Co-Op., Inc. v. Manitowoc Co., Inc., 669 F.2d 525, 528-29 (8th Cir. 1982)*, explains how it is proper for a court to exclude a party's expert testimony where the party possessed information to answer the expert interrogatory long before discovery closed, and yet failed to do so. Based on these principles, the Court finds that the **[*771]** plaintiff is estopped from introducing contradictory post-discovery proof in the form of Byron Taylor's April 13, 1998 affidavit.

E. Judicial Estoppel

HN10[] Judicial estoppel forbids a party from taking a position "inconsistent with one successfully and unequivocally asserted by the same party in a prior proceeding." *Griffith v. Wal-Mart Stores, Inc., 135 F.3d* ***[**36]*** *376, 380 (6th Cir. 1998)* (quotations and citations omitted); see also *Warda v. C.I.R., 15 F.3d 533, 538-39* (6th Cir.), cert. denied, *513 U.S. 808, 115 S. Ct. 55, 130 L. Ed. 2d 14 (1994)* (taxpayer who inherited land as a result of state court decree adopting her position that will was invalid may not avoid paying tax by claiming in later case that she was not entitled to inherit land). The purpose of judicial estoppel is to "preserve the integrity of the courts by preventing a party from abusing the judicial process through cynical gamesmanship, achieving success on one position, then arguing the opposing to suit an exigency of the moment." Id.

---

[8] Discovery closed on April 10, 1998 (per the Court's Order of January 6, 1998), except that, at HSI's request, the defendants agreed to extend the date for any expert deposition and agreed to a future supplemental deposition of Sam Crace. See Mar. 27, 1998 Agreed Order (doc. 59).

> Ambitious or greedy litigants who have discovered the financial rewards of successful litigation may not be satisfied with a single victory. Instead, they may try to maximize their financial and nonfinancial successes by litigating a case as many times as possible, sometimes flagrantly reversing earlier positions. . . . . The doctrine [of judicial estoppel] empowers courts to preserve the sanctity of litigants' oaths, to avoid inconsistent judgments, to constrain litigants' manipulations of the judicial process, and to conserve judicial resources by throwing **[**37]** out inconsistent claims.

Ashley S. Deeks, Comment, Raising the Cost of Lying: Rethinking Erie for Judicial Estoppel, *64 U. Chi. L. Rev. 873, 873, 885 (1997)* (urging federal courts sitting in diversity to apply the most aggressive version of judicial estoppel available to it between federal and state law, and noting that the Sixth Circuit applies its own version of judicial estoppel). Further, "when a litigant asserts a position in federal court that is inconsistent with one she took in state court, she puts at risk the integrity of both the federal and the state courts." Id. at 888.

The doctrine of judicial estoppel raises questions of whether it is best classified as substantive or procedural and, hence, whether a federal court sitting in diversity should apply state or federal law. See id. at 884. Without addressing the nature of the doctrine -- whether it is a substantive or a procedural doctrine -- the Sixth Circuit has determined that the doctrine raises primarily federal interests, and that federal law should therefore control. See *Edwards v. Aetna Life Ins., Co., 690 F.2d 595, 598 n.4 (6th Cir. 1982)* (noting that "federal courts must be free to develop **[**38]** principles that most adequately serve their institutional interests").

HN11[] The Sixth Circuit has identified three burdens which a party must meet to show that its opponent should be judicially estopped: (1) that the opponent took a contrary position; (2) that the contrary position was under oath in a prior proceeding; and (3) that the prior position was accepted by the court. See *Griffith, 135 F.3d at 380*.

In the instant case, the third requirement of Griffith is not met. First, and most importantly, the chancellor issued a permanent injunction at the direction of the Tennessee Court of Appeals which permanently enjoined Mr. Ledford and B & L from divulging or using any trade secrets of HSI. Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. (Ch. Cumberland County Feb. 11, 1980) (doc. 28, ex. 4). Presumably, that injunction is still in force. When the chancellor later held Mr. Ledford and B & L in contempt of the permanent injunction, Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. at 1-2 (Ch. Cumberland County Apr. 3, 1980) (doc. 28, ex. 6) (focusing primarily on the illegal use of HSI's trade secrets), he demonstrated that the injunction **[**39]** was still in force. When the chancellor ordered Mr. Ledford and B & L to pay HSI over two million dollars in damages, he did not find that HSI's trade secrets were rendered valueless. Hickory Specialties, Inc. v. B & L Labs., Inc., No. 4228, slip op. at 1-2 (Ch. Cumberland County June 6, 1983) (doc. 28, ex. 11). Finally, Mr. Ledford promised in a settlement agreement with HSI that he never would divulge HSI's trade **[*772]** secrets to anyone again. See Settlement Agreement of Sept. 29, 1981 (doc. 60, ex. 9).

Even if HSI asserted (1) that Mr. Ledford and B & L divulged HSI's trade secrets, (2) that HSI's trade secrets were rendered valueless, and (3) that judgment for the full value of the trade secrets was rendered, and even if that position is contrary to the position taken in the instant litigation -- that HSI's liquid smoke is still a secret and has value -- the instant defendants have failed to show that any previous court accepted the position that HSI's trade secrets were divulged to the point that HSI's liquid smoke no longer contained any trade secrets. Because a permanent injunction remains in effect, the defendants cannot overcome the third requirement of Griffith. Therefore, **[**40]** the Court refuses to grant summary judgment on the grounds of judicial estoppel.

III. Conclusion

For the foregoing reasons, the Court DENIES the defendants' motion for summary judgment.

An appropriate order will enter.

Thomas A. Wiseman, Jr.

Senior United States District Judge

ORDER

For the reasons stated in the accompanying memorandum, the Court GRANTS the defendants' motion for summary judgment on Count V, and DENIES the defendants' motion for summary judgment on the three remaining counts, finding that a question of material fact exists as to whether an exception to the general rule of patent preemption should apply.

It is so ORDERED.

Thomas A. Wiseman, Jr.

Senior United States District Judge

Kottle v. Northwest Kidney Ctrs.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Political Speech

Governments > State & Territorial Governments > General Overview

HN7[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr-Pennington doctrine is implicated by both state and federal antitrust claims that allege anticompetitive activity in the form of lobbying or advocacy before any branch of either federal or state government.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > Bill of Rights > Fundamental Freedoms > General Overview

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Political Speech

HN8[] Exemptions & Immunities, Noerr-Pennington Doctrine

Since the Petition Clause mentions only the right to petition the government for a redress of grievances, *U.S. Const. amend. I*, cl. 6, the Noerr-Pennington doctrine does not protect lobbying efforts directed at private organizations.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN9[] Exemptions & Immunities, Noerr-Pennington Doctrine

The "sham" exception to Noerr encompasses situations in which persons use the governmental process - as opposed to the outcome of that process - as an anticompetitive weapon. A "sham" situation involves a defendant whose activities are not genuinely aimed a procuring favorable government action at all, not one who genuinely seeks to achieve his governmental result, but does so through improper means.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN10[] Noerr-Pennington Doctrine, Sham Exception

The scope of the sham exception depends on the type of governmental entity involved. When the branch of government involved is a court of law, there are three circumstances in which an antitrust defendant's activities might fall into the sham exception. First, if the alleged anticompetitive behavior consists of bringing a single sham lawsuit, antitrust plaintiff must demonstrate that the lawsuit was (1) objectively baseless, and (2) a concealed attempt to interfere with plaintiff's business relationships. Second, if the alleged anticompetitive behavior is the filing of a series of lawsuits, the question is whether they are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival. Finally, if the alleged anticompetitive behavior consists of making intentional misrepresentations to the court, litigation can be deemed a sham if a party's knowing fraud upon, or its intentional misrepresentations to, the court deprive the litigation of its legitimacy.

HN11[] **Motions to Dismiss, Failure to State Claim**

In reviewing a dismissal for failure to state a claim, the appellate court considers whether the plaintiff could prove any set of facts that would entitle him to relief.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Constitutional Law > Bill of Rights > Fundamental Freedoms > General Overview

HN12[] **Pleadings, Heightened Pleading Requirements**

When a plaintiff seeks damages for conduct which is prima facie protected by *U.S. Const. amend. I*, the danger that the mere pendency of the action will chill the exercise of *first amendment* rights requires more specific allegations than would otherwise be required. In such cases, the court employs a heightened pleading standard, and that standard.

Counsel: Mark G. Olson, Everett, Washington, for the plaintiff-appellant.

Douglas C. Ross, Davis Wright Tremaine, LLP, Seattle, Washington, for the defendant-appellee.

Judges: Before: David R. Thompson and A. Wallace Tashima, Circuit Judges, and Tom Stagg, District Judge. [*] Opinion by Judge Tashima.

Opinion by: A. WALLACE TASHIMA

Opinion

[*1058] OPINION

TASHIMA, Circuit Judge:

In this case we apply the *Noerr-Pennington* doctrine in the context of an administrative proceeding. Specifically, we must determine whether the scope of the "sham" exception is different in an administrative proceeding than in litigation.

I. Background [1]

---

[*] The Honorable Tom Stagg, Senior United States District Judge for the Western District of Louisiana, sitting by designation.

[1] Because this is an appeal from a dismissal for failure to state a claim, we take Kottle's factual allegations as true. *Federation of African American Contractors v. City of Oakland, 96 F.3d 1204, 1207 (9th Cir. 1996)*.

[2]** In 1979, the State of Washington enacted the Health Planning and Resource Development Act (the "Act"). RCW 70.38. The Act declares that it is the "public policy of this state" to engage in health planning and encourage both consumers and providers throughout the state to be involved so as to control "excessive increases in costs." RCW 70.38.015(1). **HN1**[] The Act authorizes the Department of Health (the "Department") to administer a Certificate of Need ("CON") program to allocate health care resources. RCW 70.38.105(1). Under the CON program, the establishment of a new health care facility is subject to approval by the Department. RCW 70.38.105(4)(a). A kidney dialysis treatment center is such a health care facility subject to approval. WAC 246-310-010(18).

HN2[] After receiving a CON application, the Department may conduct a public hearing. RCW 70.38.115(9). At the hearing, any person may appear and be represented by counsel and may present oral and written argument and evidence. An "affected" person may also appear and "conduct reasonable questioning of persons who make relevant factual allegations." WAC 246-310-180(5). Any health care facility that provides services similar to those sought **[**3]** to be provided by the applicant is considered an "affected person." WAC 246-310-010(2)(b). Following the hearing, the Department must issue written findings. WAC 246-310-490(1). **HN3**[] An applicant who has been denied a CON has the right to appeal the Department's decision to an adjudicative proceeding governed by the Washington Administrative Procedure Act ("APA"). RCW 70.38.115(10); WAC 246-310-610.

Plaintiff-appellant Sheldon P. Kottle is a physician specializing in nephrology and transplant medicine. Kottle is the sole officer and shareholder of King County Kidney Center ("KCKC"). In 1991, Kottle filed CON applications with the Department seeking approval to build two kidney dialysis centers under the name KCKC. At that time, defendant Northwest Kidney Centers ("NWK") was the only provider of kidney dialysis services in King County. Perceiving Kottle to be a threat to its monopoly, NWK began a hostile campaign to prevent Kottle from establishing KCKC within NWK's market. NWK undermined Kottle's business negotiations and aggressively opposed Kottle's CON applications using methods and means which were improper and unlawful. NWK made false statements of fact and misrepresentations about **[**4]** Kottle and KCKC and encouraged others to do so. NWK's false statements and misrepresentations included the need for kidney dialysis services in King County. Influenced by NWK's statements, the Department rejected Kottle's CON applications on March 30, 1992. [2] At all times, NWK acted with the intent of eliminating competition and preserving its monopoly in the kidney dialysis market in King County. In 1995, NWK filed its own CON application for a similar dialysis facility at the same location. Contrary to its own statements opposing Kottle's CON application in 1992, the data presented by NWK in 1995 show that it knew of the need for kidney dialysis services in King County over the past 15 years.

In this action, Kottle alleged that NWK has unreasonably restrained trade and attempted to monopolize the market for kidney dialysis services in violation of §§ 1 and 2 of the Sherman Act, **[**5]** 15 U.S.C. §§ 1, 2. The complaint also alleged supplemental state law claims for violation of Washington's ***antitrust law***, RCW 19.86.030 et seq. The district court dismissed the action for failure to state **[*1059]** a claim upon which relief can be granted. It held that NWK's activities were protected by the *Noerr-Pennington* doctrine. Kottle appeals, and we affirm.

II. The Noerr-Pennington Doctrine

HN4[] The First Amendment to the United States Constitution guarantees the right "to petition the Government for a redress of grievances." U.S. Const. amend. I, cl. 6. The Supreme Court has long recognized that for the Petition Clause to be a meaningful protection of the democratic process, citizens must be immune from some forms of liability for their efforts to persuade government officials to adopt policy or perform their functions in a certain way. In Eastern RR Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961), the Court rejected antitrust liability stemming from an aggressive lobbying campaign by railroads to persuade states to adopt legislation that would severely limit competition from truckers. The Court explained that "in a **[**6]** representative democracy such as this . . . the whole concept of representation depends upon the ability of the people to make their wishes known to their representatives." Id. at 137. The Court then concluded that the

[2] The record does not indicate whether Kottle exercised his right to appeal the Department's decision to an adjudicatory hearing.

Sherman Act did not apply to the railroads' advocacy of legislative action, notwithstanding their anticompetitive intent. *Id. at 138*.

The Court subsequently expanded the holding of *Noerr* to include activities aimed at the executive and judicial branches of government. *United Mine Workers v. Pennington, 381 U.S. 657, 669-70, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)* (executive); *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)* (judicial). The Court explained that "***HN5***[] the right to petition extends to all departments of the Government," and therefore, "the same philosophy governs the approach of citizens or groups of them to administrative agencies (which are both creatures of the legislature, and arms of the executive) and to courts, the third branch of Government." *California Motor Transp.,* 404 U.S. at 612-13.

This circuit has clarified that ***HN6***[] the *Noerr-Pennington* doctrine is not merely **[**7]** a narrow interpretation of the Sherman Act in order to avoid a statutory clash with *First Amendment* "values." Rather, the doctrine is a direct application of the Petition Clause, and we have used it to set aside antitrust actions premised on state law, as well as those based on federal law. *E.g., Amarel v. Connell, 102 F.3d 1494, 1524 (9th Cir. 1996)*. Thus, ***HN7***[] the *Noerr-Pennington* doctrine sweeps broadly and is implicated by both state and federal antitrust claims that allege anticompetitive activity in the form of lobbying or advocacy before any branch of either federal or state government. [3]

[8]** Given the sweep of the *Noerr-Pennington* doctrine, we have no difficulty in joining our sister circuits to conclude that a lobbying effort designed to influence a state administrative agency's decision to issue a CON is within the ambit of the doctrine. *See Tarabishi v. McAlester Regional Hosp., 951 F.2d 1558, 1570 n.17 (10th Cir. 1991)*; *St. Joseph's Hosp. v. Hospital Corp. of America, 795 F.2d 948, 955 (11th Cir. 1986)*. Indeed, in *Boulware v. State of Nev. Dep't of Human Resources, 960 F.2d 793 (9th Cir. 1992)*, we applied the *Noerr-Pennington* doctrine in the context of a state lawsuit that invoked a CON program in an attempt to quash competition. *See also Potters Med. Ctr. v. City Hosp. Ass'n, 800 F.2d 568, 577-78 (6th Cir. 1986)* (same). The only difference between *Boulware* and this case is that the advocacy **[*1060]** here occurred before an administrative agency rather than a court. But since *Noerr-Pennington* protects advocacy before all branches of government, *California Motor Transp., 404 U.S. at 510*, this is a distinction without a difference. [4] Accordingly, NWK's activities in this case implicate the *Noerr-Pennington* doctrine.

[9]** *III. The Sham Exception*

The more difficult question is whether NWK's activities fall within the "sham" exception to the *Noerr-Pennington* doctrine. In *Noerr,* the Court acknowledged that "there may be situations in which a publicity campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere with the business relationships of a competitor, and the application of the Sherman Act would be justified." *365 U.S. at 144*. In *City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 113 L. Ed. 2d 382, 111 S. Ct. 1344 (1991)*, the Court explained:

---

[3] Of course, ***HN8***[] since the Petition Clause mentions only the right "to petition the *Government* for a redress of grievances," *U.S. Const. amend. I*, cl. 6 (emphasis added), the *Noerr-Pennington* doctrine does not protect lobbying efforts directed at private organizations. *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499-500, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*. Kottle reads into *Allied Tube* a distinction between "political" and "economic" lobbying activity, from which he argues that the *Noerr-Pennington* doctrine does not apply in this case because NWK's activities were designed only to promote NWK's own economic gain. Such a distinction would render the doctrine a nullity since it is doubtful that an antitrust defendant exists that was not motivated by economic gain. We read *Allied Tube* more narrowly, as merely recognizing the public/private distinction recognized in the Petition Clause itself.

[4] The present case is also analogous to *Assigned Container Ship Claims, Inc. v. American President Lines, Ltd., 784 F.2d 1420 (9th Cir. 1986)*, in which we extended *Noerr-Pennington* immunity to petitions before the Federal Maritime Administration concerning the need for additional American flag ocean carrier service. *Id. at 1422*.

> HN9[] The "sham" exception to *Noerr* encompasses situations in which persons use the governmental process - as opposed to the outcome of that process - as an anticompetitive weapon. A classic example is the filing of frivolous objections to the license application of a competitor, with no expectation of achieving denial of the license but simply in order to impose expense and delay. A "sham" situation involves a defendant whose activities are not genuinely aimed a procuring favorable government action at all, not one who genuinely **[**10]** seeks to achieve his governmental result, but does so through improper means.

Id. at 380 (citations and quotation marks omitted).

Although the *Noerr-Pennington* doctrine applies to activities directed at any branch of government, HN10[] the scope of the sham exception depends on the type of governmental entity involved. *See California Motor Transp., 404 U.S. at 513* ("Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process."); *Boone v. Redevelopment Agency, 841 F.2d 886, 896 (9th Cir. 1988)*. When the branch of government involved is a court of law, this circuit recognizes three circumstances in which an antitrust defendant's activities might fall into the sham exception. First, if the alleged anticompetitive behavior consists of bringing a single sham lawsuit (or a small number of such suits), the antitrust plaintiff must demonstrate that the lawsuit was (1) objectively baseless, and (2) a concealed attempt to interfere with the plaintiff's business relationships. *Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 123 L. Ed. 2d 611, 113 S. Ct. 1920 (1993)*; *Amarel, **[**11]** 102 F.3d at 1518-19*; *USS-POSCO Indus. v. Contra Costa County Bldg. & Constr. Trades Council, 31 F.3d 800, 810-11 (9th Cir. 1994)*.

Second, if the alleged anticompetitive behavior is the filing of a series of lawsuits, "the question is not whether any one of them has merit - some may turn out to, just as a matter of chance - but whether they are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival." *31 F.3d at 811* (citing *California Motor Transp., 404 U.S. 508 at 512)*; *Oregon Natural Resources Council v. Mohla, 944 F.2d 531, 534 (9th Cir. 1991)*.

Finally, in the context of a judicial proceeding, if the alleged anticompetitive behavior consists of making intentional misrepresentations to the court, litigation can be deemed a sham if "a party's knowing fraud upon, or its intentional misrepresentations to, the court deprive the litigation of its legitimacy." *Liberty Lake Inv., Inc. v. Magnuson, 12 F.3d 155, 158 (9th Cir. 1993)*; *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1260 (9th Cir. 1980)*.

[*1061] It is obvious that these three ways in which litigation might be **[**12]** a sham do not necessarily extend beyond the litigation context. For instance, if the alleged anticompetitive behavior consisted of lobbying a state legislature (as in *Noerr*), rather than filing a suit in state court, it would seem quite pointless to ask whether the lobbying effort was "objectively baseless." To decide objective baselessness, we would need objective standards, of which there are few, if any, in the political realm of legislation, against which to measure the defendant's conduct.

Similarly, the second and third variants of the litigation sham exception do not make sense in the legislative realm. Subjecting a defendant to antitrust liability because it pursued a pattern of baseless legal claims does not generate the same collateral consequences as subjecting the same defendant to antitrust liability because it engaged in numerous unsuccessful attempts to lobby a state legislature - the latter would eviscerate the Petition Clause. And the sham exception for intentional fraud on a court cannot lightly be taken to apply in a legislative context because, as the Supreme Court has observed, the political arena has a higher tolerance for outright lies than the judicial **[**13]** arena does. *California Motor Transp., 404 U.S. at 512-13*.

Thus, the scope of the sham exception to the *Noerr-Pennington* doctrine depends on the branch of government involved. If it is the legislature, the sham exception is extraordinarily narrow. But if it is the judicial branch, this circuit recognizes three categories of anticompetitive behavior that can amount to a sham and, therefore, outside the protection of the *Noerr-Pennington* doctrine.

The present case, however, involves neither a court nor a legislature. Here we deal with asserted anticompetitive behavior directed at an administrative agency, and the question we must decide is what the scope of the sham exception is when the executive branch of the government is involved. Complicating our inquiry is the fact that the executive branch is radically diverse. At the federal level, it encompasses everything from formal hearings before independent administrative agencies, which are bound, both procedurally and substantively, by statutes and regulations, to the unapologetically political decisions of trade negotiators and other Presidential advisers. At the state level, executive officials can likewise be elected or **[**14]** appointed, and they also have greatly varying levels of discretion and independence.

It seems clear that for some kinds of executive entities, the sham exception to the *Noerr-Pennington* doctrine should be the same as it is for judicial bodies, [5] but for others such a sham exception would be far too broad. In recognition of the vastly different types of executive entities that exist, this circuit has generally shaped the sham exception according to our estimation of whether the executive entity in question more resembled a judicial body, or more resembled a political entity. In *Amarel,* for example, we analyzed the putatively sham litigation under the "objectively baseless" inquiry established by *Professional Real Estate*. 102 F.3d at 1519-20. We then lumped the petitioning of State Department officials and Korean government officials alongside the lobbying efforts directed at members of Congress, and brusquely held these petitioning efforts shielded by *Noerr-Pennington*. *Id. at 1520*. Similarly, in *Boone,* we noted that the administrative agency in question made decisions virtually unguided by enforceable standards and that these decisions could be appealed only **[**15]** to a legislative body. *841 F.2d at 896*. We concluded that the agency was essentially a political body, and we refused to apply the broader sham exception that exists for judicial entities. *Id.* Our holding in *Boone* followed from a prior holding in *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Bd. of* ***[*1062]*** *Culinary Workers, 542 F.2d 1076 (9th Cir. 1976)*, that rejected the judicial sham exception for proceedings before the San Francisco Board of Permit Appeals, after concluding that the Board was essentially a political body. *Id. at 1079*.

[16]** By contrast, we have applied the judicial sham exception to proceedings before the Federal Maritime Administration, *Assigned Container, 784 F.2d 1420 at 1423*, and the Interstate Commerce Commission, *Clipper Exxpress, 690 F.2d 1240 at 1262*. We have suggested that the sham exception is narrower in communications with the police than it is in the legislative realm. *Forro Precision, Inc. v. IBM, 673 F.2d 1045, 1060 (9th Cir. 1982)*. We have also discussed the sham exception as it applies to activities directed at a state attorney general, *Harman v. Valley Nat'l Bank, 339 F.2d 564, 566 (9th Cir. 1964)*, and public airport officials, *In re Airport Car Rental Antitrust Litig., 693 F.2d 84, 86 (9th Cir. 1982)*, without clearly resolving the scope of the sham exception in those cases.

If the exact scope of the sham exception to the *Noerr-Pennington* doctrine has not always been clear in the administrative context, our cases at least stand for the general proposition that "the scope of immunity depends on the degree of political discretion exercised by the government agency." *Forro Precision, 673 F.2d at 1060 n.10*. *See also Boone, 841 F.2d at 896* ("If the agency and the council **[**17]** were acting as adjudicative bodies, the range of lobbying activities immunized by *Noerr-Pennington* would be much narrower.") Recent cases by the Supreme Court and this circuit (*e.g., Professional Real Estate, Amarel, USS-POSCO,* and *Liberty Lake*) have clarified the scope of the sham exception in judicial proceedings, but they do not alter this court's previous understanding that for purposes of the sham exception, executive entities are treated like judicial entities only to the extent that their actions are guided by enforceable standards subject to review. Only when administrative officials must follow rules is it meaningful to ask whether a petition before an agency was "objectively baseless," or whether there has been a pattern of petitioning without regard to the "merit" of the petitions. Similarly, our concern about intentional misrepresentation to government officials is much greater outside of the political realm.

---

[5] The Supreme Court suggested as much in *California Motor Transp.* when it lumped together courts and certain administrative agencies, and referred to them collectively as "adjudicatory tribunals" for purposes of the sham exception. *404 U.S. at 512*. As should be clear from our opinion, this circuit does not read *California Motor Transp.* to say that *all* administrative entities are equivalent to judicial ones for purposes of *Noerr-Pennington*. Rather, *California Motor Transp.* suggests that an administrative sgency should be treated like a judicial one only if the former is, in fact, acting in an "adjudicatory" capacity.

IV. Kottle's Case

With this framework in mind, we now apply the sham exception to Kottle's case. The anticompetitive behavior that Kottle alleges consists of NWK's lobbying the Department against issuing a CON for KCKC's kidney dialysis center. Allegedly, **[**18]** NWK made numerous intentional misrepresentations to the Department and it engaged in improper and unlawful lobbying efforts.

If we thought that the Department was an essentially political entity, like the San Francisco Board of Permit Appeals, *see* *Franchise Realty, 542 F.2d at 1079*, Kottle's suit would have absolutely no merit at all. Misrepresentations are a fact of life in politics, *California Motor Transp., 404 U.S. at 512*, and lobbying is the sine qua non of democracy. *Id. at 510-11*.

We conclude, however, that the Department exercises a sufficiently circumscribed form of administrative authority that it is appropriate to apply the same sham exception here that we do in the litigation context. Heeding our own observation that executive entities come in many shapes and sizes, we will not list any single factor, or combination of factors, as decisive in determining whether the Department operates in a sufficiently non-political way to warrant application of the judicial sham exception. Rather, we look to the totality of the circumstances.

The CON determination by the Department bears many indicia of a true adjudicatory proceeding. The Department conducts public hearings, **[**19]** accepts written and oral arguments, permits representation by counsel, and allows affected persons to question witnesses. The Department must issue written findings after its hearing. Its decision is appealable, and that appeal is governed by APA procedures and statutory standards. In all, we believe that this combination of facts makes the application of the judicial sham exception appropriate in this case.

Thus, Kottle can get around the *Noerr-Pennington* doctrine only if his allegations **[*1063]** show one of three things: (1) NWK's advocacy before the Department was objectively baseless and merely an attempt to stifle competition; (2) NWK engaged in a pattern of petitions before the Department without regard to the merit of the petitions; or (3) NWK's misrepresentations before the Department deprived the entire CON proceeding of its legitimacy. We can easily dispense with the second of these grounds because Kottle's complaint alleges interference with only two CON applications. *See* *Amarel, 102 F.3d at 1519* (holding that a handful of legal proceedings does not amount to a "pattern" of baseless claims).

We can also dispense with the first of these grounds. NWK's advocacy before the **[**20]** Department was not objectively baseless because NWK prevailed. In the litigation context, the Supreme Court has reminded us that a winning lawsuit is, by definition, not objectively baseless. *Professional Real Estate, 508 U.S. at 61 n.5*. Because we view the CON hearing as analogous to litigation, we must conclude that a victory before the Department necessarily indicates that NWK's position was not objectively baseless. *See* *Franchise Realty, 542 F.2d at 1079* ("We find it particularly hard to accept the characterization as 'baseless' or 'frivolous' of opposition which is entirely successful in obtaining the governmental action sought, as apparently was the case here.") We note that Kottle did have the right to appeal the Department's decision, and had he obtained a reversal of the Department's denial of the CON, then NWK's initial victory before the Department would not necessarily indicate that NWK's position was not objectively baseless. *Hydranautics v. Filmtec Corp., 70 F.3d 533, 538 (9th Cir. 1995)*. A winning lawsuit that is overturned on appeal, after all, is not a winning lawsuit, and the same logic applies to an administrative ruling. As far as the record discloses, **[**21]** however, Kottle did not appeal the Department's ruling. Therefore, the success of NWK's opposition to Kottle's CON applications conclusively demonstrates that the opposition was not objectively baseless.

This leaves Kottle with only the third of the sham exception possibilities. Notwithstanding *Noerr-Pennington,* Kottle can overcome a 12(b)(6) motion if his allegations demonstrate that NWK so misrepresented the truth to the Department that the entire CON proceeding was deprived of its legitimacy. Kottle's complaint, however, falls far short of adequately alleging this variant of the sham exception. He alleges in very general terms that NWK engaged in a hostile campaign to oppose the CON applications; that it used "means which were improper and/or unlawful"; that it conspired with other unnamed entities to oppose Kottle's CON applications; that it made misrepresentations about Kottle and the need for a kidney dialysis center, and encouraged others to do so; and that these statements influenced the Department's decision.

From Kottle's complaint, we do not know exactly what representations NWK made, or to whom; with whom NWK conspired; what exactly its "improper and/or unlawful" **[**22]** methods of advocacy were; or what other testimony the Department may have had that could have influenced its decision to deny Kottle's CON application. Normally, we would be willing to give Kottle the benefit of the doubt, because ***HN11***[] in reviewing a dismissal for failure to state a claim, we usually ask ourselves whether the plaintiff could prove *any* set of facts that would entitle him to relief. [6] *Franchise Realty, 542 F.2d at 1082*. This case is different, however, because ***HN12***[] when "a plaintiff seeks damages . . . for conduct which is prima facie protected by the *First Amendment*, the danger that the mere pendency of the action will chill the exercise of *First Amendment* rights requires more specific allegations than would otherwise be required." *Id. at 1083*.

In such cases, we employ a heightened pleading standard, and that standard "would have no force if in order to satisfy **[**23]** it, a party could simply recast disputed issues from the underlying litigation as 'misrepresentations' by the other party." *Mohla, 944 F.2d at 536* (citing *Omni Resource Dev. Corp. v. Conoco, Inc., 739 F.2d 1412, 1414 (9th Cir. 1984))*.

[*1064] We conclude, that Kottle's vague allegations of misrepresentation "are therefore insufficient to overcome *Noerr-Pennington* protection." *Id.* [7]

[24]** *AFFIRMED.*

End of Document

[6] It also appears that Kottle has taken his "best shot." The record does not disclose that he requested leave to amend his complaint.

[7] In addition to his challenge to NWK's *Noerr-Pennington* immunity, Kottle contends that the district court erred in not striking an affidavit attached to NWK's reply memorandum in support of its motion to dismiss. The affidavit's sole purpose was to put before the court certain public records of the Department. We agree with the district court that these records were properly the subject of judicial notice; therefore, reliance on them did not convert the motion to dismiss into a summary judgment motion. *Barron v. Reich, 13 F.3d 1370, 1377 (9th Cir. 1994)*.

Civil Procedure > Appeals > Standards of Review > General Overview

HN1[] **Appeals, Standards of Review**

A trial court determination of whether a specific set of facts gives rise to reasonable suspicion is a determination of law and is reviewable nondeferentially for correctness. Nevertheless, because the legal standard for "reasonable suspicion" and "probable cause" is highly fact dependent, courts have afforded a measure of discretion to such determinations. Therefore, courts will review the district court's decision for correctness while affording a measure of discretion to that court in the application of the correctness standard to a given set of facts.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN2[] **Public Enforcement, State Civil Actions**

The Utah Antitrust Act authorizes the attorney general to issue civil investigative demands (CID) when the attorney general has reasonable cause to believe that any person may be in possession, custody or control of any information relevant to a civil antitrust investigation. Utah Code Ann. § 76-10-917(1) (1995). If the CID recipient fails to comply with the demand, the attorney general may file a petition for an order compelling compliance with the demand. Utah Code Ann. § 76-10-917(7)(a) (1995). Thereafter, the court must hold a hearing at which the attorney general has the burden of establishing that the demand is proper, that there is reasonable cause to believe that there has been a violation of this act, and that the information sought or document or object demanded is relevant to the violation. Utah Code Ann. § 76-10-917(7)(b)(ii) (1995).

Civil Procedure > Judgments > Entry of Judgments > General Overview

HN3[] Judgments, Entry of Judgments

Regardless of the language used during the hearing, the language in the court's final written order controls, and an appellate court will presume the order is correct unless affirmatively shown otherwise. Copies of the proposed findings, judgments, and orders shall be served upon opposing counsel before being presented to the court for signature unless the court otherwise orders. Notice of objections shall be submitted to the court and counsel within five days after service. Utah Code of Judicial Admin. R4-504(2).

Antitrust & Trade Law > Public Enforcement > US Department of Justice Actions > Investigations

Criminal Law & Procedure > ... > Miranda Rights > Self-Incrimination Privilege > Right to Counsel During Questioning

HN4[] US Department of Justice Actions, Investigations

Federal ***antitrust law*** authorizes the issuance of civil investigative demands whenever the Attorney General, or the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice, has reason to believe that any person may be in possession, custody, or control of any documentary material, or may have any information, relevant to a civil antitrust investigation. *15 U.S.C.S. § 1312(a)*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] Public Enforcement, State Civil Actions

There is a test to determine whether the attorney general had shown reasonable cause: The decision is relatively uncomplicated, as it does not involve extensive weighing or testing of evidence or any resolution of conflicts on the evidence. The question at hearing is not whether the state's information is true or uncontradicted, but whether, assuming its accuracy, the state has in its possession sufficient information to satisfy a judge that it is reasonable to believe that there has been a violation of the act.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] Public Enforcement, State Civil Actions

See Utah Code Ann. § 76-10-915(1)(a) (1995).

Governments > Legislation > Interpretation

HN7[] **Legislation, Interpretation**

When the court interprets statutes, its primary goal is to give effect to the legislature's intent in light of the purpose the statute was meant to achieve. The court therefore looks first to the statute's plain language. The court need not look beyond its plain language unless it finds some ambiguity in it. Statutory language is ambiguous if it can reasonably be understood to have more than one meaning. However, if the court finds a provision ambiguous, which causes doubt or uncertainty as to its meaning or application, the court must analyze the act in its entirety and harmonize its provisions in accordance with the legislative intent and purpose.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN8[] **Public Enforcement, State Civil Actions**

See Utah Code Ann. § 76-10-912 (1995).

Governments > Legislation > Interpretation

HN9[] **Legislation, Interpretation**

Antitrust laws should be construed broadly and exemptions should be construed narrowly so as to give effect to their purposes.

Opinion by: RUSSON

Opinion

[*178] *RUSSON, Justice*:

INTRODUCTION

The State appeals a district court order granting petitions to quash antitrust civil investigative demands the State issued to Joseph Evans, Steven Evans, Evans Broadcasting, Inc., and Country Gold Broadcasting, Inc. The State sought information relating to possible antitrust violations between radio stations in the Uintah Basin; however, the district court ruled that the State had not met its burden under Utah Code Ann. § 76-10-917(7)(b)(ii) to maintain an investigation and that the radio stations **[**2]** were exempt from investigation under section 76-10-915(1)(a). We reverse and remand.

BACKGROUND

In 1996, a merchant in the Uintah Basin contacted the Antitrust Division of the Utah **[*179]** Attorney General's office ("Division") and complained of possible collusion in the pricing of radio station advertising in the Vernal and Roosevelt radio markets. The merchant had compared advertising rates in the area and informed the Division that the rates charged by the radio stations in Vernal were identical to those in Roosevelt. The merchant also reported that he had been offered a discount on advertising rates if he would advertise on radio stations in both cities.

The Division conducted a preliminary investigation into the merchant's allegations and found that there are only four radio stations in the Uintah Basin--two stations are located in Roosevelt, and two are located in Vernal. The two radio stations in Roosevelt, KNEU and KFIX, are both owned by Evans Broadcasting, Inc., and Country Gold Broadcasting, Inc. Joseph Evans, the owner of these corporations, manages KNEU and KFIX. The radio stations in Vernal, KVEL and KLCY, are owned by Ashley Communications, Inc., which is owned by James Davis. **[**3]** [1] Joseph Evans' son, Steven Evans, is the general manager of KVEL and KLCY. The real estate and buildings where the Vernal radio stations are located are owned by DEE Properties, L.L.C., a limited liability corporation with six members: James Davis, Steven Evans, Joseph Evans, and their wives.

The four radio stations operate under licenses granted by the Federal Communications Commission (FCC) as required by the FCC for lawful operation. The FCC does not actively regulate prices charged by radio stations for advertising.

In December 1996, pursuant to Utah Code Ann. § 76-10-917, the Division issued civil investigative demands (CIDs) to Steven Evans, Joseph Evans, Evans Broadcasting, Inc., and Country Gold Broadcasting, Inc. The CIDs requested testimony and documents related to the advertising prices and collusion among the four radio stations.

Plaintiffs filed separate petitions to quash the CIDs, and the district court consolidated **[**4]** the petitions at a hearing on February 14, 1997. In granting the petitions, the court concluded that (1) the State failed to meet its burden to show that it had "reasonable cause" to believe a violation had occurred under Utah Code Ann. § 76-10-917(7)(b)(ii), and (2) the radio stations were exempt from investigation under Utah Code Ann. § 76-10-915(1)(a) because they are "subject to regulation" by the FCC.

On appeal, the State raises the following two arguments: first, the court incorrectly applied a "probable cause" standard and therefore incorrectly ruled that the State had not met its statutory burden, and second, the court erred in finding that plaintiffs' activities are exempt from the Act.

STANDARD OF REVIEW

We are asked to review whether the district court erred in ruling that the State had not met its statutory burden of showing "reasonable cause" to believe a civil antitrust violation had occurred. This is a question of first impression. However, we believe the standard of review is similar to the standard we apply in the area of criminal law regarding similar questions.

We have stated that ***HN1***[] "'a trial court determination of whether a specific set of facts gives rise to **[**5]** reasonable suspicion is a determination of law and is reviewable nondeferentially for correctness.'" *State v. Hodson, 907 P.2d 1155, 1157 (Utah 1995)* (quoting *State v. Pena, 869 P.2d 932, 939 (Utah 1994))*. Nevertheless, because the legal standard for "reasonable suspicion" and "probable cause" is highly fact dependent, we have afforded a "measure of discretion" to such determinations. *Id.*; *State v. Poole, 871 P.2d 531, 533 (Utah 1994)*. Therefore, we will review the district court's decision for correctness while affording a "measure of discretion" to that court in our application of the correctness standard to a given set of facts. *Id.*

However, the court's ruling that plaintiffs' activities are exempt from the Act is a matter of statutory interpretation, which involves a question of law. We will therefore review that ruling for correctness without deference. *S.H. v. Bistryski, 923 P.2d 1376, 1379 (Utah 1996)*.

---

[1] Ashley Communications and James Davis were not plaintiffs in the action below.

[*180] ANALYSIS

I. THE "REASONABLE CAUSE" STANDARD UNDER

UTAH CODE ANN. § 76-10-917

The first issue we must decide is whether the district court correctly determined that the State had not met its burden of showing that it was justified in issuing the CIDs. ***HN2***[] **[**6]** The Utah Antitrust Act authorizes the attorney general to issue CIDs "when the attorney general has *reasonable cause* to believe that any person may be in possession, custody or control of any information relevant to a civil antitrust investigation." Utah Code Ann. § 76-10-917(1) (1995) (emphasis added). If the CID recipient fails to comply with the demand, the attorney general may file a petition for an order compelling compliance with the demand. *Id.* § 76-10-917(7)(a). Thereafter, the court must hold a hearing at which the attorney general has the burden of establishing "that the demand is proper, that there is *reasonable cause to believe that there has been a violation of this act*, and that the information sought or document or object demanded is relevant to the violation." *Id.* § 76-10-917(7)(b)(ii) (emphasis added).

Initially, the State asserts that the court incorrectly relied on a "probable cause" standard rather than on the significantly lower "reasonable cause" standard and therefore erred in ruling that the State had not met its statutory burden. To support its claim, the State relies on the record from the hearing, in which the court made repeated references **[**7]** to probable cause.

For example, during the hearing the judge asked whether it is true that "you have got to show, before you can issue a civil investigative demand, some *probable cause* to believe, that there is a violation, and that *probable cause* rises to the level of, let's say, just short of the evidence that would be required in a preliminary hearing." (Emphasis added.) Thereafter, at counsel's request, the court explained its ruling from the bench, stating, "In relation to the issue of *probable cause*, I don't find adequate information in the affidavit to support the notion that there was an agreement [between plaintiffs]." (Emphasis added.)

Although the court referred to probable cause several times during the hearing, in its written order the district court concluded, "The State failed to meet its burden to show that *reasonable cause* existed to warrant investigation of the activities described in the Civil Investigative Demands." (Emphasis added.) The State's ultimate concern is that while the court used "reasonable cause" in its written order, what it really meant was "probable cause."

HN3[] Regardless of the language used during the hearing, the language in the **[**8]** court's final written order controls, and we will presume the order is correct unless affirmatively shown otherwise. *See Pena, 869 P.2d at 935-36*. However, the State does not assert, nor does the record indicate, that the State objected in a timely manner to the written order's use of "reasonable cause." [2] Rule 4-504(2) of the Utah Rules of Judicial Administration provides: "Copies of the proposed findings, judgments, and orders shall be served upon opposing counsel before being presented to the court for signature unless the court otherwise orders. Notice of objections shall be submitted to the court and counsel within five days after service." Utah Code of Judicial Admin. R4-504(2). Whether the district court erroneously referred to "probable cause" during the hearing is immaterial, because the State accepted the court's use of "reasonable cause" in the written order. Having failed to properly object, the State waived its right to challenge the order in this regard on appeal. We therefore hold that the trial court used the correct "reasonable cause" standard in its final written order.

[9]** While the district court used the correct statutory standard, we must still determine whether it correctly applied that standard to the facts in this case. This court has **[*181]** never expressly defined "reasonable cause" as that term is used in the Act. According to the Act, "the legislature intends that the courts, in construing this act, will be guided by interpretation given by the federal courts to comparable federal antitrust statutes and by other

[2] While the State filed an objection to the proposed order, prepared by Steven Evans' counsel, it apparently objected only to the order's conclusion that plaintiffs' conduct was exempt. The State proposed an order without a finding on the exemption issue; however, the court signed the order and denied the State's objection.

state courts to comparable state antitrust statutes." Utah Code Ann. § 76-10-926. Therefore, we will look to federal and state courts for guidance as to the proper definition of "reasonable cause" in the context of ***antitrust law***.

HN4[] Federal ***antitrust law*** authorizes the issuance of CIDs "whenever the Attorney General, or the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice, has *reason to believe* that any person may be in possession, custody, or control of any documentary material, or may have any information, relevant to a civil antitrust investigation." *15 U.S.C. § 1312(a)* (emphasis added). The parties did not cite, nor has our research uncovered, any federal cases that explicitly define the "reason **[**10]** to believe" standard. However, the federal courts' application of that standard indicates that the burden is easily satisfied. *See, e.g.*, *Associated Container Transp. (Australia) Ltd. v. United States, 705 F.2d 53, 58 (2d Cir. 1983)*; *Finnell v. United States Dep't of Justice, 535 F. Supp. 410, 415 (D. Kan. 1982)*; *Blue Cross & Blue Shield v. Bingaman*, No. 1:94- CV2297, *1996 U.S. Dist. LEXIS 17091*, at *14 (N.D. Ohio June 24, 1996) (upholding CID because it was reasonably related to legitimate investigation). Specifically, in *Blue Cross* the court stated, "A court should not set aside a CID unless it would quash the same request contained in a subpoena or subpoena duces tecum issued by a district court in aid of a grand jury investigation." *Blue Cross, 1996 U.S. Dist. LEXIS 17091*, at *3. Moreover, federal courts have stated that the reason to believe standard is satisfied where the CID was issued merely for the purpose of ascertaining whether the antitrust laws have been violated. *See* *Associated Container Transp., 705 F.2d at 58*.

The notion that the reason to believe standard is a relatively low burden is further supported by the purposes behind the federal **[**11]** antitrust investigative provisions. One federal court has noted that such purposes are twofold: "(1) to enable the Attorney General to determine whether there has been a violation of the antitrust laws, and if so (2) to enable the Attorney General to allege properly the violations in a civil complaint." *Petition of Gold Bond Stamp Co., 221 F. Supp. 391, 397 (D. Minn. 1963)*. Thus, CIDs simply facilitate the attorney general's investigations into antitrust violations and enable the attorney general to gather enough information to initiate a proper civil action. Likewise, the CIDs issued by the Utah Attorney General assist that agency in gathering enough information to make a proper determination as to whether a civil antitrust action should be initiated.

Turning to state courts' treatment of "reasonable cause," the State has cited to ten states that have antitrust laws requiring reasonable cause to issue CIDs. [3] **[**12]** While the State asserts that only five of those states' appellate courts have examined their statutes regarding the issuance of CIDs, only one state, Arizona, has given a meaningful review of the reasonable cause standard that can be applied to the case at bar. [4]

In *Babbitt v. Herndon, 119 Ariz. 454, 581 P.2d 688 (Ariz. 1978)*, the Arizona attorney general initiated an investigation to determine whether the sales and advertising practices of a business violated the Arizona Consumer Fraud Act. [5] In response to the investigation, **[*182]** the business argued that there was no reasonable cause to

[3] *See* *Ariz. Rev. Stat. Ann. § 44-1406* (1994); *Iowa Code § 553.9* (1997); *Mass. Gen. L. ch. 93, § 8* (1994); Mich. Comp. Laws § 28.70(6) (1990); *Nev. Rev. Stat. § 598A.100* (1994); *N.M. Stat. Ann. § 57-1-5* (1995); N.D. Cent. Code § 51-08-1.06 (1989); *Ohio Rev. Code § 1331.16* (Supp. 1996); *R.I. Gen. Laws § 6-36-9* (1992); *S.D. Codified Laws § 37-1-11.1* (1994).

[4] The state appellate court decisions cited by the State are *Babbitt v. Herndon, 119 Ariz. 454, 581 P.2d 688 (Ariz. 1978)*, *Wilson Corp. v. State, 1996 NMCA 49, 916 P.2d 1344, 121 N.M. 677 (N.M. Ct. App. 1996)*, *Ida County Courier & Reminder v. Attorney General, 316 N.W.2d 846 (Iowa 1982)*, *Borden, Inc. v. State, 65 Ohio App. 2d 1, 413 N.E.2d 848 (Ohio Ct. App. 1979)*, and *Office of Attorney General v. M.J.D., 396 N.W.2d 757 (S.D. 1986)*.

[5] The Arizona Consumer Fraud Act, *Ariz. Rev. Stat. §§ 44-1521* to -1534, and the Arizona Uniform State Antitrust Act, *Ariz. Rev. Stat. §§ 44-1401* to -1416, are both codified under title 44, chapter 10 of the Arizona Revised Statutes, which governs competition and competitive practices in trade and commerce. The provisions of each Act governing the Arizona attorney general's power to investigate violations thereunder are substantially similar. *Compare id.* *§ 44-1406(B)* ("If the court finds that the demand is proper, that there is reasonable cause to believe there may have been a violation of this article and that the information sought or document or object demanded is relevant to the violation, it shall order the person to comply with the demand.") *with id.* § 44-1527(B) ("If the court determines that the attorney general has reasonable cause to believe that the

believe there had been a violation of the Act. In addressing the merits of the arguments, the court first discussed the policy considerations underlying a civil investigation by the state. In doing so, it reasoned that the reasonable cause standard operated to (1) impose an additional substantive limitation on **[**13]** the attorney general's power to engage in precomplaint discovery and (2) prevent abuses or excesses which might result from unlimited powers of investigation. *Babbitt, 581 P.2d at 690*. The court then established the following ***HN5***[] test to determine whether the attorney general had shown reasonable cause:

[14]** The decision is relatively uncomplicated, as it does not involve extensive weighing or testing of evidence or any resolution of conflicts on the evidence. *The question at hearing is not whether the state's information is true or uncontradicted, but whether, assuming its accuracy, the state has in its possession sufficient information to satisfy a judge that it is reasonable to believe that there has been a violation of the act*.

581 P.2d at 692 (emphasis added). We agree with the sound reasoning and the sensible definition of "reasonable cause" elucidated by the *Babbitt* court, which provide a workable framework in addressing challenges to CIDs issued under Utah's Antitrust Act.

Before turning to our application, we address the parties' arguments relating to the burden of proof required by the reasonable cause standard in relation to other standards. As the State asserts, "proof beyond a reasonable doubt" is the highest standard, while "reasonable cause" is the lowest, and the "clear and convincing," "preponderance of the evidence," and "probable cause" standards are somewhere in between. Plaintiffs agree that reasonable cause is lower than probable cause for preliminary **[**15]** hearings, which requires only "'a quantum of evidence sufficient to warrant submission of the case to the trier of fact.'" *State v. Pledger, 896 P.2d 1226, 1229 (Utah 1995)* (quoting *State v. Anderson, 612 P.2d 778, 783 (Utah 1980))*. [6] As one can reasonably infer from *Pledger*, the evidence required for binding a defendant over to district court is relatively low because the assumption is that the prosecution's case will only get stronger as the investigation continues. *Id.* Hence, the evidence fails to meet the probable cause standard only when it is "wholly lacking and incapable of reasonable inference to prove some issue which supports the [prosecution's] claim." *Id.*

[16]** Reason dictates that an investigation based on the reasonable cause standard requires less evidence than the "quantum of evidence sufficient to warrant submission of the case to the trier of fact" required by the probable cause standard. Moreover, the reasonable cause standard would seem to allow an investigation to go forward on the assumption that the attorney general's case will only get stronger as the investigation proceeds.

Plaintiffs argue that the reasonable cause standard requires some showing of objective **[*183]** evidence that there was an illegal agreement or other antitrust violation. Requiring less, they assert, could lead to abuses in the investigative process and would allow the State to engage in "fishing expeditions."

We agree that the State must have some objective evidence that there has been a violation of the antitrust laws. However, as previously mentioned, the purpose of the investigative power is to aid the State in determining whether an enforcement action should even be initiated. The higher protections afforded by higher standards are not necessary because CIDs are part of an investigation rather than an enforcement action. Assuming that the investigation **[**17]** uncovers evidence, the State would initiate a civil action which would require the State to satisfy the higher standards before any sanctions are imposed. The statute therefore gives the State broad

---

respondent has engaged in, is engaging in or is about to engage in any act . . . which is in violation of this article . . . the court shall grant the appropriate relief."). Therefore, we believe that the Arizona Supreme Court's discussion of the reasonable cause standard under the Consumer Fraud Act is applicable to the reasonable cause standard under the Uniform State Antitrust Act.

[6] Compare "probable cause" with our definition of "reasonable cause" in the context of warrantless arrests: "The requirement, as in so many areas of the law, is one of reason: that it be shown that under the facts and circumstances known to the officer, a reasonable and prudent man in his position would be justified in believing that the suspect had committed the offense." *State v. Lopez, 22 Utah 2d 257, 451 P.2d 772, 775 (1969)*.

discretion to investigate possible antitrust violations while at the same time protecting citizens from investigations not supported by reasonable cause.

In light of the aforementioned, the district court clearly erred in concluding that the State failed to meet its burden of showing that reasonable cause existed to warrant investigation of the activities described in the CIDs. The State set forth ample evidence at the hearing to satisfy the reasonable cause standard. To illustrate, the State submitted a certified copy of the articles of organization of DEE Properties, L.L.C. The articles describe the purpose of the company as follows: "To acquire, hold, develop, manage, operate and dispose of interests in real and personal property." Moreover, article IV expressly permits conflict of interest transactions between DEE and any company in which DEE's members have an interest. [7] As the State notes in its brief, the articles would seem to facilitate collusive agreements, and such provisions **[**18]** may have been necessary in light of DEE's influence over a radio station that competed against one of DEE's members.

In addition to the articles of organization, the State submitted the affidavit of an investigator for the Attorney General's office whose factual findings are undisputed and have been set forth earlier in this opinion. In the affidavit, the investigator stated:

As a result of this preliminary investigation, I concluded that having only two stations that run local advertising, and having a father own the station in one town and **[**19]** having the son working as the general manager of the other station *created a potential for anticompetitive conduct*. Given that we had received a complaint, with specific allegations of improper conduct, I concluded--based on my experience as an antitrust investigator--that further investigation was warranted.

(Emphasis added.) The investigator further concluded that joint ownership and management of the only two local radio stations in the broadcast area of Vernal and Roosevelt by Joseph Evans and his son Steve Evans, creates the potential for anticompetitive conduct. Further it appears the association between Joseph Evans and Steve Evans, and their radio stations, has resulted in collusion in the form of illegal price fixing and illegal tying arrangements whereby the purchase of one product (advertising on one station) is tied to the purchase of another product (advertising on the other station).

The affidavit and the DEE articles of organization provide specific evidence that the only two competitors in a well-defined geographic market (1) were owned or managed by father and son, (2) had identical prices, (3) offered discounts for merchants who were willing to advertise **[**20]** on the stations in both towns, and (4) joined in common ownership of land and buildings belonging to two of the radio stations.

[*184] Plaintiffs argue that each one of these facts alone is not sufficient to meet the reasonable cause standard. However, reasonable cause is determined by combining all of the evidence and then determining whether, taken as a whole, there is reasonable cause to believe that the Utah Antitrust Act has been violated. Considering the above evidence as a whole, we hold that the district court clearly erred in concluding that the State failed to show that there was reasonable cause to believe an antitrust violation had occurred.

II. THE EXEMPTION PROVISION--UTAH CODE ANN. § 76-10-915

We turn next to the second issue--whether the district court erred in concluding that plaintiffs' activities are exempt from investigation under Utah Code Ann. § 76-10-915(1)(a). The Act exempts certain activities from investigation if the activities are "subject to regulation" by the FCC:

HN6[] (1) No provision of this act shall be construed to prohibit:

---

[7] Article IV provides in part:

No contract or other transaction between the Company and any firm or corporation shall be affected by the fact that a member or manager of the Company has an interest in, or is a director or officer of, such other firm or corporation. Any member or manager, individually or with others, may be a party to, or may have an interest in, any transaction of the Company or any transaction in which the Company is a party or has an interest.

(a) The activities of any public utility to the extent that those activities are *subject to regulation* by the Public **[**21]** Service Commission, the state or federal Department of Transportation, the Federal Energy Regulatory Commission, the *Federal Communications Commission*, the Interstate Commerce Commission, or successor agencies[.]

Utah Code Ann. § 76-10-915(1)(a) (emphasis added).

The State argues that the "subject to" language includes only those activities that are actively regulated by the FCC. Because the FCC does not actively regulate pricing for commercial radio advertising, the State argues, plaintiffs' activities are not exempt from the Act. Plaintiffs, on the other hand, assert that the "subject to" language means that any activity that could at some point be regulated by the FCC is exempt from the Act.

Initially, we note that we have serious questions as to whether plaintiffs' radio stations are "public utilities." Neither the State nor plaintiffs briefed the issue, the district court did not make a finding in this regard, the Utah Antitrust Act does not define the term, and the Code's general definition of "public utilities" does not include radio stations. [8] If the radio stations are not public utilities, section 76-10-915 would not apply to the case at bar. Nevertheless, **[**22]** because the issue was neither raised below nor briefed on appeal, we will not make that determination sua sponte. Therefore, while we address the merits of the parties' arguments, we emphasize that we do so without deciding whether plaintiffs' radio stations are public utilities.

HN7[] When we interpret statutes, our primary goal is to give effect to the legislature's intent in light of the purpose the statute was meant to achieve. *Sullivan v. Scoular Grain Co. of Utah, 853 P.2d 877, 880 (Utah 1993)*. We therefore look first to the statute's plain language. *State v. Hunt, 906 P.2d 311, 312 (Utah 1995)* ("'The best evidence of the true intent and purpose of the Legislature in enacting **[**23]** the Act is the plain language of the Act.'" (citation omitted)); *CIG Exploration, Inc. v. State Tax Comm'n, 897 P.2d 1214, 1216 (Utah 1995)*. We need not look beyond its plain language unless we find some ambiguity in it. *Schurtz v. BMW of N. Am., Inc., 814 P.2d 1108, 1112 (Utah 1991)*. Statutory language is ambiguous if it can reasonably be understood to have more than one meaning. *Miller Welding Supply, Inc. v. State Tax Comm'n, 860 P.2d 361, 362 (Ct. App. 1993)*, *cert. denied*, *870 P.2d 957 (Utah 1994)*. However, if we find a provision ambiguous, which causes doubt or uncertainty as to its meaning or application, we must analyze the act in its entirety and "'harmonize its provisions in accordance with the legislative intent and purpose.'" *Beynon v. St. George-Dixie Lodge # 1743*, *854 P.2d 513, 518 (Utah 1993)* (quoting *Osuala v. Aetna Life & Casualty, 608 P.2d 242, 243 (Utah 1980))*.

[*185] Looking at the statute's language, we find that the term "subject to regulation" is ambiguous. Construed broadly, the term could encompass any activity over which the FCC has power to regulate, even though at present the FCC has chosen not to regulate the activity. Construed narrowly, **[**24]** the term should include only those activities that the FCC in fact regulates. Because "subject to regulation" carries several plausible connotations, we turn to the legislature's intent and purpose, which it clearly expressed within the Act itself. ***HN8***[] Section 76-10-912 provides as follows:

The Legislature finds and determines that competition is fundamental to the free market system and that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress, while at the same time providing an environment conducive to the preservation of our democratic, political and social institutions.

---

[8] The Code defines "public utilities" to include "every railroad corporation, gas corporation, electrical corporation, wholesale electrical cooperative, telephone corporation, telegraph corporation, water corporation, sewerage corporation, heat corporation, and independent energy producer." *Utah Code Ann. § 54-2-1* (Supp. 1997).

The purpose of this act is, therefore, to encourage free and open competition in the interest of the general welfare and economy of this state by prohibiting monopolistic and unfair trade practices, combinations and conspiracies in restraint of trade or commerce and by providing adequate penalties for the enforcement of its provisions.

Utah Code Ann. § 76-10-912 (emphasis added).

In light of the Act's clear purpose, we cannot accept plaintiffs' broad construction of **[**25]** the "subject to regulation" language in the exemption provision. Were we to do so, the exemption would effectively vitiate the State's ability to punish anticompetitive behavior in the radio broadcasting business. Stated another way, plaintiffs' interpretation would exempt the entire industry from the Utah Antitrust Act, thereby defeating the Act's purpose as it relates to public utilities.

Moreover, we are guided by the widely accepted principle that ***HN9***[] antitrust laws should be construed broadly and exemptions should be construed narrowly so as to give effect to their purposes. *See Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 231, 59 L. Ed. 2d 261, 99 S. Ct. 1067 (1979)* ("It is well settled that exemptions from the antitrust laws are to be narrowly construed."); *State v. Scioscia, 200 N.J. Super. 28, 490 A.2d 327, 333 (N.J. Super. Ct. App. Div. 1985)* (stating that purpose of "public utility" exemption is to prevent business entities from being subjected to conflicting sets of governmental regulations); *Minnesota-Iowa Television Co. v. Watonwan T.V. Improvement Ass'n, 294 N.W.2d 297, 305 (Minn. 1980)* ("Since antitrust laws should be broadly construed to effectuate **[**26]** their purpose, such exceptions should be narrowly construed." (citing *Abbott Laboratories v. Portland Druggists Assoc. Inc., 425 U.S. 1, 11, 47 L. Ed. 2d 537, 96 S. Ct. 1305 (1976))*); Alter S. Fogel, Comment, *The 'Superstation,' the NBA, and Antitrust: An Analysis of Chicago Professional Sports Limited Partnership v. National Basketball Association*, *47 Rutgers L. Rev. 1195, 1226 (1995)* ("Courts have consistently acknowledged that antitrust exemptions should be construed narrowly.").

While the Act does not specify the reasoning behind exempting certain activities from antitrust laws, such reasons are obvious. For example, public utilities are often state or federally sanctioned monopolies. Hence, those anticompetitive activities that have been approved by the state or federal government should not be punished by the Act. Moreover, public utilities are highly regulated by both state and federal agencies. Exempting those activities that are regulated by state agencies avoids conflicts between different governmental bodies. Exempting those activities that are regulated by federal agencies avoids preemption issues. However, "concurrent regulation of the same subject matter is an **[**27]** acceptable arrangement where no conflict [between state and federal regulation] exists." *Sutherland's Statutory Construction*, § 36.08 (5th ed. 1993).

The notion that the exemption should be narrowly construed finds further support in the context of other provisions of the Code. For example, the chapter known as "Public **[*186]** Telecommunications Utility Law" [9] includes corporations operating radio stations in its definition of "telecommunications corporation." Such a corporation means "any corporation or person . . . owning, controlling, operating, managing, or reselling a public telecommunications service." *Utah Code Ann. § 54-8b-2(7)*. The chapter further defines "public telecommunications service" to mean "the transmission of signs, signals, writing, images, sounds, messages, data, or other information of any nature by wire, *radio*, lightwaves, or other electromagnetic means offered to the public generally." *Id. § 54-8b-2(6)* (emphasis added). However, the chapter expressly states, "Nothing in this chapter shall in any way preempt, modify, exempt, abrogate, or otherwise affect any right, cause of action, liability, duty, or obligation arising from any federal, state, **[**28]** or local law governing unfair business practices or antitrust, restraint of trade, or other anti-competitive activity." *Id.* § 54-8b-8.

This chapter clearly indicates the legislature's intent that corporations and persons operating radio stations must comply with the Utah Antitrust Act. If the legislature did not intend to exempt the entire radio broadcasting industry from the Act, the exemption obviously must be construed narrowly to exempt only those activities that are, in fact, regulated by the FCC. Hence, as the State points out in its brief, activities involving political campaign advertising rates arguably would be exempt from the Act, because they are regulated by the FCC. *See 47 U.S.C.S. § 315*

[9] *See Utah Code Ann. §§ 54-8b-1 to -13*.

(1995); *47 C.F.R. § 73.1942 (1996)* (requiring that political campaign advertising rates not exceed rates charged to commercial advertisers of radio station). However, given the language of section 54-8b-8, the legislature clearly intended that radio stations **[**29]** comply fully with the Act. Therefore, the State may enforce antitrust violations under the Utah Antitrust Act to the extent that no conflict exists between state and federal law and to the extent that the State is not preempted from doing so by the federal government.

In light of the foregoing, we hold that the district court erred in concluding that plaintiffs' radio stations were exempt from investigation by virtue of section 76-10-915(1)(a). We therefore reverse and remand for proceedings consistent with this opinion.

Chief Justice Howe, Associate Chief Justice Durham, Justice Stewart, and Justice Zimmerman concur in Justice Russon's opinion.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN2[] **Antitrust & Trade Law, Exemptions & Immunities**

Private parties are immune from antitrust liability under the "state action doctrine" if their conduct satisfies two conditions. First, they must act pursuant to a "clearly articulated" and "affirmatively expressed" state policy to displace competition. Second, the policy must be "actively supervised" by the state itself.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > State Regulation

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

Governments > Local Governments > Administrative Boards

Energy & Utilities Law > Utility Companies > Buying & Selling of Power

HN3[] **Energy & Utilities, State Regulation**

Iowa has clearly articulated a state policy to prevent electricity suppliers from competing for retail customers. Other courts have held that statutory schemes less restrictive than Iowa's evince clear policies to displace competition. Iowa law confers on the Iowa Utilities Board (IUB) broad general powers to effect the purposes of this chapter notwithstanding the fact that certain specific powers are hereinafter set forth. *Iowa Code § 476.2(1)*. The IUB and its predecessor, the Iowa State Commerce Commission, have actively implemented the governmental policy that mandates exclusive service territories, including the assignment of exclusive service territories. They have adjudicated many cases applying and enforcing the policy of exclusive service territories. The IUB interprets "electric service" to mean the generated electricity as well as the maintenance of wires and poles that carry the commodity.

Opinion by: CHARLES R. WOLLE

Opinion

Order Granting Summary Judgment in Favor of Defendants

Plaintiff North Star Steel Company (North Star) operates a steel mill near Wilton, Iowa. It is a customer of defendant MidAmerican Energy Company (MidAmerican), a power company that generates, transmits, and sells **[*2]** electric power and energy. Defendant MidAmerican Energy Holdings Company is a public utility holding company and parent of defendant MidAmerican. The court will refer to both defendants collectively as MidAmerican. North Star seeks to purchase from MidAmerican transmission service of electric power from power sources other than MidAmerican. It asserts in this action for declaratory and injunctive relief that MidAmerican monopolizes trade in violation of federal ***antitrust law***. Defendants contend they are immune from liability under the "state action doctrine."

On January 20, 1998, defendants filed a motion to dismiss that plaintiff subsequently resisted. The court held a hearing on the motion on March 13, 1998. The court then granted the parties additional time to file briefs addressing the applicability of the abstention doctrine. The court also granted the parties additional time to supplement the record and file supporting briefs on the pending motion, now deemed a summary judgment motion. The parties presented further argument on the motion on June 9, 1998. The matter is now deemed submitted for ruling.

I. *Abstention.* Following the hearing in March, the court invited the parties **[*3]** to address whether this is a case to which the doctrine of abstention should be applied. Plaintiff contends this case is not one that is appropriate for abstention. Amicus Iowa Utilities Board (IUB) supports abstention. On April 3, 1998, defendant MidAmerican alerted the court that it had filed with the IUB on April 1, 1998 a petition for declaratory ruling on issues stemming from this case. MidAmerican asked the court to stay proceedings in this case pending a Board ruling. But on May 29, 1998, the Board issued a declaratory ruling in response to the petition. The ruling is now part of this record. The federal antitrust issues presented in this case are not now pending before any state agency. The court does not abstain from deciding them.

II. *Summary Judgment Standard.* ***HN1***[] Summary judgment is appropriate only when a party has demonstrated that it is entitled to judgment as a matter of law, with no genuine issues of material fact remaining for trial. *Fed.R.Civ.P. 56*. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249-51, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*; **[*4]** *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 587-88, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. Once the movant has demonstrated that no genuine factual dispute stands in the way of a judgment entry, the burden shifts to the resisting party to present specific admissible evidence showing a genuine dispute on that issue, precluding judgment. *City of Mount Pleasant v. Associated Electric Cooperative, 838 F.2d 268, 273-74 (8th Cir. 1988)*.

III. *Facts.* Plaintiff has not pointed to a single genuine fact dispute or issue in this record. The Iowa General Assembly has enacted legislation authorizing the establishment of exclusive service territories in the provision of retail electric service. *Iowa Code §§ 476.22-476.26*. North Star's Wilton, Iowa facility is located within the exclusive service territory assigned to MidAmerican. MidAmerican owns and operates the only high voltage transmission lines capable of servicing North Star's plant. North Star seeks high voltage transmission wheeling of generated electric power that it will purchase from a third party. "Wheeling" refers to the transportation of bulk electric power produced **[*5]** by one party over the transmission facilities of another party for the benefit of the first party or a third party.

IV. *The applicable law.* The United States Supreme Court has established that ***HN2***[] private parties are immune from antitrust liability under the "state action doctrine" if their conduct satisfies two conditions. *Southern Motor Carriers Rate Conf. v. United States, 471 U.S. 48, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*. First, they must act pursuant to a "clearly articulated" and "affirmatively expressed" state policy to displace competition. Second, the policy must be "actively supervised" by the state itself. *California Liquor Dealers v. Midcal Aluminum, 445 U.S. 97, 63 L. Ed. 2d 233, 243, 100 S. Ct. 937 (1980)*.

HN3[] Iowa has clearly articulated a state policy to prevent electricity suppliers from competing for retail customers. *See* *Iowa Code § 476.22-.26* (assigned service territories) and § 476.25 (exclusive provision of electric service). Other courts have held that statutory schemes less restrictive than Iowa's evince clear policies to displace competition. *Municipal Utilities Board v. Alabama Power Co., 934 F.2d 1493 (11th Cir. 1991)* **[*6]** (statute permitted some competition for large industrial customers), *Fuchs v. Rural Elec. Convenience Co-op, Inc., 858 F.2d 1210 (7th Cir. 1988)*(statute similar to Iowa's except utilities authorized to determine exclusive service areas by agreement).

Iowa law confers on the IUB "broad general powers to effect the purposes of this chapter notwithstanding the fact that certain specific powers are hereinafter set forth". *Iowa Code § 476.2(1)*. The IUB and its predecessor, the Iowa State Commerce Commission, have actively implemented the governmental policy that mandates exclusive service territories, including the assignment of exclusive service territories. They have adjudicated many cases applying and enforcing the policy of exclusive service territories. The IUB interprets "electric service" to mean the generated electricity as well as the maintenance of wires and poles that carry the commodity. *See In re MidAmerican Energy Co.*, docket no. DRU-98-1, (IUB, May 29, 1998)(no statutory language limits the definition to transmission and generation only, statutory language means "something more").

Defendants have satisfied both prongs of the *Midcal* test; they are **[*7]** therefore immune under the "state action doctrine" from plaintiff's claims asserted in this lawsuit. The motion for summary judgment is granted. The clerk of court shall enter summary judgment in favor of defendants and against plaintiff, with costs assessed to plaintiff.

IT IS SO ORDERED.

Dated this 23d day of June, 1998.

CHARLES R. WOLLE, JUDGE

UNITED STATES DISTRICT COURT

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN5[] **Robinson-Patman Act, Claims**

The Robinson-Patman Act, *15 U.S.C.S. § 13(a)* prohibits "primary-line" price discrimination, when the seller charges predatory, below-cost prices in one geographical market to eliminate competitors there, but charges supracompetitive prices in another market.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN6[] **Price Discrimination, Competitive Injuries**

To prove primary-line price discrimination, a competitor must prove two things: that the prices complained of are below an appropriate measure of its rival's costs and that the competitor had a reasonable prospect of recouping its investment in below-cost prices.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN7[] **Price Discrimination, Competitive Injuries**

Only below-cost prices suffice for recovery for price discrimination, and the court rejects the notion that above-cost prices that are below general market levels or the costs of a firm's competitors inflict injury to competition cognizable under the antitrust laws. As a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price-cutting.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Price Discrimination, Competitive Injuries**

Prices are not predatory unless they are below a "relevant measure of cost."

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN9[] **Price Discrimination, Competitive Injuries**

It is generally agreed that the relation between the cost of producing a product and the price charged for it is the criterion for determining whether the price is predatory.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN10[] **Price Discrimination, Competitive Injuries**

Economists measure a firm's costs in a number of ways. Costs are divided into fixed costs (those that do not vary with changes in output) and variable costs (which do so vary). Total cost is the sum of fixed and variable costs. Marginal cost is the increment to total cost that results from producing an additional unit of output. Average cost, or average total cost, is obtained by dividing total cost by output. Likewise, average variable cost is the sum of all variable costs divided by output. Average cost is thus higher than average variable cost for all output levels.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN11[] **Price Discrimination, Competitive Injuries**

Marginal-cost pricing is the economically sound division between acceptable competitive behavior and unlawful, 'below-cost' predation," but because marginal costs are usually difficult to measure, average variable cost may be a substitute test.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN12[] **Preclusion of Judgments, Law of the Case**

Under the doctrine of "law of the case," a court is generally precluded from reconsidering an issue that has already been decided by the same court, or a higher court in the identical case. The doctrine is not a limitation of a tribunal's power, but rather a guide to discretion. A court may have discretion to depart from the law of the case where the evidence on remand is substantially different. Failure to apply the doctrine of the law of the case absent one of the requisite conditions constitutes an abuse of discretion.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN13[] **Preclusion of Judgments, Law of the Case**

For the law of the case doctrine to apply, the issue in question must have been decided explicitly or by necessary implication in the previous disposition. A significant corollary to the doctrine is that dicta have no preclusive effect.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Energy & Utilities Law > Oil, Gas & Mineral Interests > Purchase Contracts > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Processing & Refining > General Overview

HN14[] **Robinson-Patman Act, Claims**

A swap of like products is not a "sale" for the purposes of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN15[] **Transportation, Common Carriers**

The use of the concept of opportunity costs to show predatory pricing is improper as a matter of law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

Evidence > ... > Testimony > Expert Witnesses > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN16[] **Entitlement as Matter of Law, Materiality of Facts**

Where the expert offers an opinion that courts have rejected as a matter of law, that opinion is not enough to create an issue of material fact that survives summary judgment.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN17[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In the context of ***antitrust law***, if there are undisputed facts about the structure of the market that render the inference to be drawn from expert affidavits economically unreasonable, the expert opinion is insufficient to support a jury verdict. Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN18[] **Robinson-Patman Act, Claims**

If entities are considered a combined unit, then the appropriate consideration is the costs of the combined group to determine if the combined group sold below its costs, and 100 per cent ownership makes a firm and its subsidiary a single person under the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN19[] **Price Discrimination, Competitive Injuries**

Although conventional business records do provide information to use in calculating costs, the inclusion of other nonvariable costs in conventional records, such as depreciation, taxes, and licenses, means that a firm's marginal costs cannot be ascertained from conventional business records.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN20[] **Expert Witnesses, Daubert Standard**

The test for the admission of expert testimony under Daubert is not the correctness of an expert's conclusions but the soundness of his methodology.

Opinion

[*1089] OPINION

BOOCHEVER, Circuit Judge:

Rebel Oil Company appeals from the district court's grant of summary judgment in favor of Atlantic Richfield Corporation, after this court remanded Rebel's antitrust action against ARCO. We affirm.

FACTS

The following statement of facts is taken in part from this court's decision in *Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421* (9th Cir.), *cert. denied, 516 U.S. 987, 133 L. Ed. 2d 424, 116 S. Ct. 515 (1995)*, and from **[*1090]** the district court opinion that is the subject of this appeal, *Rebel Oil Co. v. Atlantic Richfield Co., 957 F. Supp. 1184 (D. Nev. 1997)*.

Gasoline sold in the Las Vegas, Nevada area is first produced from crude oil in refineries **[**2]** in Los Angeles, California. Wholesale marketers then pump the gasoline to Las Vegas over a pipeline operated by the Cal-Nev Pipeline Co., which transports ninety-five percent of Las Vegas' gasoline. Wholesale marketers then sell the gasoline to Las Vegas retail marketers, who then sell the gasoline to consumers.

Rebel Oil Company, Inc. and Auto Flite Oil Company, Inc. (collectively "Rebel") are retail marketers of gasoline in Las Vegas, selling only self-serve, cash-only gasoline. Rebel has 16 retail stations. In addition to its retail sales, Rebel is also a wholesaler who ships gasoline refined in Los Angeles over the Cal-Nev pipeline, to be sold to retail marketers in Las Vegas. Atlantic Richfield Corporation ("ARCO") is both a wholesale and a retail marketer of gasoline in Las Vegas, and also drills and refines crude oil into gasoline. ARCO supplies gasoline to 53 retail stations in Las Vegas under the "ARCO" name, all of which sell only self-serve, cash-only gasoline. A subsidiary of ARCO, Prestige Stations ("PSI"), operates 15 of those 53 stations. The remaining 38 stations operating under the ARCO name are owned and operated by independent dealers.

Rebel and other discount **[**3]** marketers of gasoline saw their business grow in the 1970s, as cost-conscious motorists driving low-mileage vehicles saved money by buying self-serve, cash-only gasoline rather than visiting full-service stations. In 1982, ARCO adopted a nationwide strategy to respond to this change in the gasoline market. The strategy called for the elimination of full-serve and credit-card sales and offered dealers incentives for matching the prices of the discount independent stations. ARCO's strategy increased its sales and market share nationwide.

PROCEDURE

In 1990, Rebel filed an antitrust suit for damages against ARCO under Section 4 of the Clayton Act. Rebel alleged that between 1985 and 1989, ARCO charged predatory prices in an attempt to take away market shares from its competitors, with the goal of monopolizing the gasoline market in Las Vegas. Rebel claimed that the predatory pricing scheme forced competitors out of the Las Vegas market, and that Rebel lost sales as a result and had to concentrate on the wholesale market. Rebel also claimed that when ARCO's predation ended, ARCO had fifty-four percent of the market for self-serve, cash-only gasoline, and that ARCO then engaged in price **[**4]** gouging, charging prices in Las Vegas that were higher than Los Angeles prices to recoup its losses resulting from the previous low predatory prices.

The district court limited Rebel's discovery solely to the "more discrete" issues of ARCO's market share and the entry barriers in the relevant market, which would determine whether ARCO had sufficient market power to charge prices above competitive levels ("supracompetitive prices"). *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 133 F.R.D. 41, 45 (D. Nev. 1990)*. The court reserved discovery on the issue whether ARCO had engaged in predatory pricing until after Rebel made an adequate showing of market power, because "proving that a defendant has engaged in pricing below cost entails extensive discovery regarding virtually all aspects of a company's business." *Id.*

In the fall of 1992, both parties filed motions for summary judgment and the district court granted summary judgment for ARCO on all three antitrust claims. *Rebel Oil Co. v. Atlantic Richfield Co., 808 F. Supp. 1464 (D. Nev. 1992)*. The court concluded that ARCO's market share of the retail gasoline market in Las Vegas was insufficient as a matter of law to establish **[**5]** market power; that Rebel failed to show that barriers to entry prevented other retailers from entering the retail market; and that as a result of the lack of market share and entry barriers, ARCO lacked the power to charge supracompetitive prices to recoup any losses from predatory pricing.

Rebel appealed, and this court affirmed in part and reversed in part in *Rebel Oil Co., Inc. v. Atlantic Richfield Co., 51 F.3d 1421* (9th Cir.), *cert. denied, 516 U.S. 987, 116 S. Ct. 515, 133 L. Ed. 2d 424 (1995)* ("*Rebel I*"). *Rebel I* affirmed the district court's **[*1091]** summary judgment in favor of ARCO on the claims of attempted monopolization, because Rebel had not established the existence of a genuine issue of material fact whether ARCO had the market power required to support an attempted monopolization claim. *51 F.3d at 1443*.

Rebel I reversed the grant of summary judgment dismissing Rebel's claim that ARCO had practiced "primary line" price discrimination, by "charging predatory, below-cost prices in one [geographical] market in an attempt to eliminate competitors there, and charging supracompetitive prices in another market." *Id. at 1445*. Because a lesser showing of market **[**6]** power was required for a claim of price discrimination than for a claim of attempted monopolization, *id. at 1447*, the court concluded that Rebel had produced sufficient evidence to create a disputed question of material fact whether ARCO had enough market power to enforce supracompetitive pricing. *Id. at 1448*. Although Rebel had not shown that ARCO had sufficient market power for an attempted monopolization claim, for price discrimination Rebel needed only to prove that ARCO possessed a level of market power to threaten oligopolization. ***HN1***[] An oligopoly is "[a] market condition in which sellers are so few that the actions of any one of them will materially affect price and hence have a measurable impact upon competitors." American Heritage Dictionary of the English Language 916 (1970).

The economic forces at work in an oligopoly are very different than in a monopoly. A predator is able to establish and maintain supracompetitive prices in an oligopoly by making it too painful for its existing competitors to challenge its prices, and thus, 'disciplining' them. . . . Read in the most favorable light, Rebel's evidence tends to indicate that no new competition can enter the market **[**7]** to challenge ARCO, and that the existing competition, while it may be *able* to challenge ARCO, lacks the will to do so. *Rebel I, 51 F.3d at 1448*. The court remanded to the district court for further proceedings on the price discrimination claim. *Id. at 1448*.

On remand, the parties conducted discovery on the issue of predatory pricing. ARCO then moved for summary judgment. ARCO simultaneously filed a motion in limine to exclude Rebel's expert testimony under *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*, which the district court granted in part. [ER p. 281]

The district court also granted ARCO's motion for summary judgment. *Rebel Oil Co. v. Atlantic Richfield Co., 957 F. Supp. 1184, 1196-1204 (D. Nev. 1997)* ("*Rebel II*"). The court rejected Rebel's contention that, under the law of the case doctrine, our decision in *Rebel I* compelled a finding that Rebel had offered sufficient evidence to preclude summary judgment on its price discrimination claim. *957 F. Supp. at 1194-95*. The court acknowledged that *Rebel I* determined that material questions of fact existed regarding both ARCO's ability to recoup any losses **[**8]** from predatory pricing and Rebel's damages. The court concluded, however, that none of Rebel's measures of ARCO's costs was legally adequate to create an issue of material fact regarding whether ARCO priced its gasoline below its costs. *Id. at 1200-03*. The court also determined that Rebel had failed to present clear and convincing evidence of ARCO's predatory intent. *Id. at 1204*.

ANALYSIS

HN2[] This court reviews a grant of summary judgment de novo, evaluating the evidence in the light most favorable to the nonmoving party. *Rebel I, 51 F.3d at 1432*. Summary judgment is appropriate only when the pleadings, affidavits, and other materials in evidence present no genuine issue of material fact. *Id.*

HN3[] Section 2(a) of the Clayton Act, as amended by the Robinson-Patman Act, prohibits price discrimination:

> HN4[] It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, **[**9]** destroy, or prevent competition with any person who either grants or knowingly **[*1092]** receives the benefit of such discrimination, or with customers of either of them . . . .

15 U.S.C. § 13(a). HN5[] The statute prohibits "primary-line" price discrimination, when the seller charges predatory, below-cost prices in one geographical market to eliminate competitors there, but charges supracompetitive prices in another market. *Rebel I, 51 F.3d at 1445*. Rebel alleges primary-line price discrimination, contending that between 1985 and 1989, ARCO charged below-cost prices in the Las Vegas market to eliminate competition there, while charging higher prices in the Los Angeles market.

HN6[] To prove primary-line price discrimination, Rebel must prove two things: "that the prices complained of are below an appropriate measure of its rival's costs . . . .[and] that the competitor had a reasonable prospect . . . of recouping its investment in below-cost prices." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-24, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*; *USA Petroleum Co. v. Atlantic Richfield Co., 13 F.3d 1276, 1277 (9th Cir. 1994)*; *Rebel I, 51 F.3d at 1445*.

I. **[**10]** *Below-Cost Pricing*

Rebel presented expert testimony of below-cost pricing, using three different measures of ARCO's cost in Las Vegas: an exchange agreement between ARCO and Tosco Corporation; the Los Angeles "rack price" for gasoline, adjusted for transportation costs; and profit-and-loss statements from Prestige Stations, Inc. ("PSI"), a wholly-owned subsidiary of ARCO. The parties' central dispute on appeal is whether Rebel's evidence established a question of fact whether ARCO priced its Las Vegas gasoline below its costs.

HN7[] Only below-cost prices should suffice [for recovery for price discrimination], and we have rejected . . . the notion that above-cost prices that are below general market levels or the costs of a firm's competitors inflict injury to competition cognizable under the antitrust laws. . . . As a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price-cutting.

Brooke Group, 509 U.S. at 223; **[**11]** *see* *USA Petroleum, 13 F.3d at 1285* ("above cost below-market level pricing even when coupled with a structural showing such as recoupment, cannot constitute predatory pricing.").

Rebel and ARCO agree that HN8[] prices are not predatory unless they are below a "relevant measure of cost," but they disagree on whether, as a matter of law, Rebel presented a relevant measure of cost.

Neither the Supreme Court nor this circuit has concluded what would be the appropriate measure of cost in a predatory pricing case. *See* *Brooke Group, 509 U.S. at 222 n.1* ("Because the parties in this case agree that the relevant measure of cost is average variable cost, however, we again decline to resolve the conflict among the lower courts over the appropriate measure of cost."); *see* *Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal and Prof'l Publications, Inc., 63 F.3d 1540, 1549 n.5 (10th Cir. 1995)* ("Unfortunately for litigants, neither the Supreme Court nor we have taken a position on which of various cost measures is the definitive one, although we have spoken of marginal and average variable costs as being relevant."), *cert. denied, 516 U.S. 1044, 116 S. Ct. 702, 133 L.* ***[**12]*** *Ed. 2d 659 (1996)*. ***HN9***[] It is generally agreed that "the relation between the cost of producing a product and the price charged for it is the criterion for determining whether the price is predatory," *Transamerica Computer Co., Inc. v. International Bus. Machs. Corp., 698 F.2d 1377, 1384* (9th Cir.), *cert. denied, 464 U.S. 955, 78 L. Ed. 2d 329, 104 S. Ct. 370 (1983)*.

HN10[] Economists, however, measure a firm's costs in a number of ways . . . . Costs are divided into fixed costs (those that do not vary with changes in output) and variable costs (which do so vary). Total cost is the sum of fixed and variable costs. Marginal cost is the increment to total cost that results from producing an additional unit of output. Average cost, or average total cost, is obtained by dividing total cost by output. Likewise, average variable cost is **[*1093]** the sum of all variable costs divided by output. Average cost is thus higher than average variable cost for all output levels.

698 F.2d at 1384-85; *see Vollrath Co. v. Sammi Corp., 9 F.3d 1455, 1461 (9th Cir. 1993)* (plaintiff used average variable cost to argue that prices were predatory), *cert. denied, 511 U.S. 1142, 128 L. Ed. 2d 886, 114 S. Ct. 2163* ***[**13]*** *(1994)*; 3 P. Areeda & H. Hovenkamp, ***Antitrust Law*** §§ 739-40 (1996) ("***HN11***[] marginal-cost pricing is the economically sound division between acceptable competitive behavior and unlawful, 'below-cost' predation," but because marginal costs are usually difficult to measure, average variable cost may be a substitute test).

We must determine whether Rebel presented evidence of *any* of these cost measures that creates a question of material fact on its predatory pricing claim.

A. *Law of the Case*

Rebel's first argument is that this panel does not even need to decide the cost issue, because it was decided by the panel in *Rebel I,* and the law of the case governs all further proceedings. *Rebel I* described expert testimony offered by Rebel: "The expert concluded that ARCO's retail prices in Las Vegas were consistently below the wholesale prices of all other wholesale suppliers in Las Vegas, and at times were 10 cents or more per gallon below ARCO's marginal cost." *Rebel I, 51 F.3d at 1431*. Rebel points to footnote 1 of *Rebel I,* which immediately follows the foregoing quotation, and states:

> Marginal cost is the cost that a firm incurs in the production of one additional **[**14]** unit of output. Herbert Hovenkamp, Economics and Federal ***Antitrust Law*** 10 (1985). Rebel measured ARCO's marginal cost based upon an agreement that ARCO signed with Tosco Corp. to purchase incremental supplies of gasoline. Rebel claims that ARCO bought the additional supplies of gasoline from Tosco because it was expanding output but was unable to obtain the additional output from its own refineries. *The cost of this "last barrel" of gasoline represents ARCO's marginal cost for gasoline.*

Id. at 1431 n.1 (emphasis added). Rebel claims that this footnote and the highlighted sentence conclusively establish that the Tosco agreement presents a material issue of fact regarding below-cost pricing. Rebel also points to the following statement in *Rebel I* as establishing that another potential measure of marginal cost (the "rack price") presented a material question of fact:

> Rebel's claim alleged primary-line discrimination. As proof, Rebel's expert relied on pricing data showing that for four years, between 1985 and 1989, ARCO charged predatory prices in Las Vegas that, when adjusted for transportation costs, were 6 to 14 cents below those charged in Los Angeles.

[15]** *Id. at 1445*.

HN12[] Under the doctrine of "law of the case,"

> a court is generally precluded from reconsidering an issue that has already been decided by the same court, or a higher court in the identical case. The doctrine is not a limitation of a tribunal's power, but rather a guide to

> discretion. A court may have discretion to depart from the law of the case where . . . the evidence on remand is substantially different . . . . Failure to apply the doctrine of the law of the case absent one of the requisite conditions constitutes an abuse of discretion.

United States v. Alexander, 106 F.3d 874, 876 (9th Cir. 1997) (citations and quotations omitted). "***HN13***[] For the doctrine to apply, the issue in question must have been decided explicitly or by necessary implication in [the] previous disposition. A significant corollary to the doctrine is that dicta have no preclusive effect." *Milgard Tempering, Inc. v. Selas Corp., 902 F.2d 703, 715 (9th Cir. 1990)* (citations and quotations omitted).

We conclude that the two sections of *Rebel I* cited as establishing the law of the case were not explicit decisions on below-cost pricing, and therefore do not constitute a **[**16]** basis for the application of the law of the case doctrine. First, as the district court noted in *Rebel II,* "below cost pricing was not an issue before the Ninth Circuit Court of Appeals in *Rebel I*." *Rebel II, 957 F. Supp. 1184 at 1196 n.7*. The district court had bifurcated discovery, and "there was no discovery on predatory pricing, intent and collusion." **[*1094]** *Rebel I, 51 F.3d at 1432*. *Rebel I* reviewed a district court decision regarding market power. That decision did not evaluate Rebel's proposed measures of ARCO's costs, which related not to market power but to whether ARCO's prices were predatory. Second, as discussed below, the issue of the appropriate measure of cost is a thorny one, and the two brief references in *Rebel I* to the Tosco agreement and to "rack price" in Los Angeles hardly "decided explicitly" that either measure was sufficient to withstand ARCO's motion for summary judgment. Both statements are better read as descriptions rather than dispositions of Rebel's claims. "As the issue of below cost pricing was not before the court in *Rebel I,* any dicta addressing cost measurements is not law of the case or binding upon this Court." *Rebel II, 957* ***[**17]*** *F. Supp. at 1201*. [1]

[18]** B. *The Tosco Agreement*

As evidence to show that "the prices complained of [were] below an appropriate measure of [ARCO's] costs," *Brooke Group, 509 U.S. at 210*, Rebel presented a 1986 "Exchange Agreement" between ARCO and Tosco Corporation. [SER pp. 555-84] Because "ARCO is willing to exchange ANS [Alaska North Slope Crude Oil] for gasoline; and . . . Tosco is willing to exchange gasoline for ANS," the parties entered into a "buy/sell exchange of ANS for gasoline," [SER p. 555], providing that ARCO would deliver ANS to Tosco, and Tosco would deliver gasoline to ARCO. The quantities to be exchanged were established by a formula set forth in the agreement. The agreement also provided for cash payments by ARCO to Tosco and by Tosco to ARCO when crude oil or gasoline was delivered, and "the dollar amounts paid by each party will equal those paid by the other." [SER p. 567] The cash payments were tied to the market price of ANS. [SER pp. 563, 584]

Rebel argues there is at least a question of material fact whether the agreement is not an exchange but an agreement to purchase, and thus is a direct measure of ARCO's marginal cost of producing an additional unit

---

[1] In *Areeda and Hovenkamp's, **Antitrust Law**, supra,* § 740, the authors describe footnote 1 of *Rebel I* (which stated "The cost of this 'last barrel' of gasoline [in the Tosco agreement, discussed supra] represents ARCO's marginal cost for gasoline.") as follows:

> In the Ninth Circuit's *Rebel Oil* case *the plaintiff alleged* that the defendant was unable to supply gasoline at the predatory price from its own refineries, so it contracted to purchase more from an independent supplier, and paid more than it charged upon resale. *If so,* the resulting price was clearly below marginal cost. Further, as the court noted, that would be true of *all* sales made at that price, not only for the sales of the gasoline bought at a high price. "Marginal" cost does not look at the average cost, but the incremental cost of the last unit produced, which in this case was the higher cost units procured from the independent supplier.

Id. at p. 378 (emphases added) (footnotes omitted). Rebel claims that this shows that footnote 1 established the law of the case. We disagree. Rebel's selection from ***Antitrust Law*** states only what Rebel *alleged*: that the Tosco agreement represented a "purchase" for which ARCO "paid," and that "if so," the agreement would serve as a measure of marginal cost.

of **[**19]** gasoline. This circuit has concluded that ***HN14***[] a swap of like products is not a "sale" for the purposes of the Robinson-Patman Act. *Airweld, Inc. v. Airco, Inc., 742 F.2d 1184, 1191 (9th Cir. 1984)*, *cert. denied, 469 U.S. 1213, 84 L. Ed. 2d 331, 105 S. Ct. 1184 (1985)*; *see* *American Oil Co. v. McMullin, 508 F.2d 1345, 1353 (10th Cir. 1975)* (where oil company supplies petroleum products from its refinery in Salt Lake City to other oil companies, in return for petroleum products from the other companies' refineries in other areas, "the record does not show that these transactions are actually sales."). Because crude oil and gasoline, although related products, are not "fungible," the Tosco Agreement does not document an "exchange of the same product" or "like types of gasoline." *Airweld, 742 F.2d at 1192*. The agreement is therefore not a "swap," and we must examine ARCO's marginal cost.

ARCO submitted a declaration stating:

> The Exchange Agreement provided for cash payments by Tosco to ARCO, when crude was delivered, and by ARCO to Tosco, when gasoline was accepted, but those payments were security arrangements, and were in equal amounts. In substance, the Agreement **[**20]** was an in-kind transaction in which crude oil was exchanged for gasoline.

[*1095] [SER p. 455 n.7] ARCO's declaration also stated: "ARCO's cost for the gasoline delivered by Tosco was equal to ARCO's cost to produce and deliver the crude oil to Tosco since there were no net cash payments." [SER p. 455]

Rebel's expert witness, Dr. Keith Leffler, testified that In my Report I state that "the gasoline received by ARCO from Tosco represents an increment to the supply of ARCO gasoline. The effective economic costs of the gasoline to ARCO thus indicates the marginal cost of ARCO gasoline." The calculation of the "economic cost" in what is effectively a barter situation of course requires determination of the value of what ARCO gives up. Regardless of whether ARCO bought the crude oil, produced the crude oil or was given the crude oil, the marginal costs to ARCO of obtaining the additional gasoline from Tosco is given by the value of that crude oil that they gave up. [ER p. 194]. Leffler's statement echoes ARCO's labelling of the agreement as an in-kind transaction, but his cost measurement is different. ARCO states that the cost to it was the cost of producing and delivering the crude **[**21]** oil; Leffler states that the cost is instead the market price of the crude oil, i.e. what ARCO would have received for the crude oil if ARCO had sold it rather than traded it to Tosco.

The measure of cost proposed by Rebel - the market price of the crude oil - is problematic for two reasons. First, the market price for crude oil is not what ARCO spent in obtaining the crude oil: ARCO produced the crude oil, and did not purchase the crude oil on the market. Second, the market price represents only what ARCO *would have received* had ARCO sold the crude oil in the market rather than trading it to Tosco for gasoline. The measure of marginal cost proposed by Rebel is thus really the opportunity cost to ARCO of choosing to enter into the exchange agreement rather than selling the crude oil elsewhere. Opportunity costs are vastly different from ARCO's marginal or variable costs, and we agree that "***HN15***[] the use of the concept of opportunity costs [to show predatory pricing] must be held improper as a matter of law." *In re IBM Peripheral EDP Devices Antitrust Litig., 459 F. Supp. 626, 631 (N.D. Cal. 1978)*; *Continental Airlines, Inc. v. American Airlines, Inc., 824 F. Supp. 689, 701* ***[**22]*** *(S.D. Tex. 1993)* (opportunity cost is not one of the costs of implementing a particular business choice, and cannot be included in considering average variable price).

Rebel's expert, Dr. Leffler, admitted that "it's accepted that ARCO was a low cost producer of crude in this era so, if anything, I would expect it to have lower cost than what was reflected in the market value of that barrel." [SER p. 202] Aside from this admission that ARCO's cost of producing the crude oil was low, Rebel presented no evidence of the actual costs of production. Nevertheless, Leffler argued for the use of market price as a measure of ARCO's cost, taking strong issue with the "courts' language in rejecting . . . the economic concept of opportunity costs for measuring below cost sales in predatory pricing cases." [ER p. 193 n.5] Because Rebel offered "evidence" (Leffler's expert opinion) in its opposition to ARCO's summary judgment motion, and ARCO did not offer conflicting expert opinion, Rebel argues that "the district court acted as a finder of fact," impermissibly weighing Rebel's evidence and effectively conducting a bench trial. ***HN16***[] But where, as here, the expert offers an opinion that courts have **[**23]** rejected as a matter of law, that opinion is not enough to create an issue of material fact that survives summary judgment. "***HN17***[] In the context of ***antitrust law***, if there are undisputed facts about the structure of the market that render the inference [to be drawn from expert affidavits] economically unreasonable, the expert opinion is insufficient to support a jury verdict." *Rebel I, 51 F.3d at 1435-36* (citing *Eastman Kodak Co. v. Image Technical Serv., Inc., 504 U.S. 451, 468-69, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*). "Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them." *Brooke Group, 509 U.S. at 242*; *Wallace v. Bank of Bartlett, 55 F.3d 1166, 1170 (6th Cir. 1995)*, *cert. denied, 516 U.S. 1047, 133 L. Ed. 2d 664, 116 S. Ct. 709 (1996)*.

We conclude that using the Tosco agreement as a measure of ARCO's cost in the **[*1096]** way urged by Rebel would require equating ARCO's cost of the crude oil to market price, which is counter to legal definitions of cost. Therefore, the agreement cannot provide a legally sufficient measure of ARCO's cost.

C. *The Los Angeles "Rack Price"*

Rebel alleges that ARCO's wholesale prices **[**24]** in Las Vegas were below the wholesale "rack price" in Los Angeles, and were therefore predatory.

"Rack prices" are the prices charged by marketers for gasoline deliveries "at the rack," sales in small tanker-truck quantities at loading-rack distribution points. Leffler acknowledged that "ARCO doesn't post a rack price or make sales at a rack price," [SER p. 219] but stated that the cost of buying gasoline at the Los Angeles rack plus transportation costs (over the Cal-Nev pipeline) equalled the cost an efficient seller would face in Las Vegas. Rebel contends that this rack price is an adequate proxy for ARCO's marginal cost, and because ARCO sold wholesale gasoline in Las Vegas below that price/cost, ARCO's price was predatory.

The district court concluded that Rebel's comparison of wholesale prices in Las Vegas and Los Angeles showed only that ARCO charged a lower price in Las Vegas. Because "Rebel has made no showing of ARCO's actual costs of producing gasoline," however, Rebel still had not created a factual issue regarding whether the Las Vegas price was below ARCO's costs. *Rebel II, 957 F. Supp. at 1203-04*.

Using the rack price as a measure of cost would substitute a market **[**25]** price for ARCO's actual costs. We affirm the district court's conclusion that the evidence of rack price was insufficient to create a material question of fact whether ARCO's Las Vegas prices were predatory.

D. *Losses at PSI Outlets*

Another Rebel witness, Harry Holcombe, reviewed the income statements of ARCO's PSI stations and concluded that almost all the stations lost money during the alleged predatory period. Because ARCO sold PSI wholesale gas and PSI stations lost money, Holcombe stated that this demonstrated that ARCO was willing to lose money by pricing gas at its PSI outlets below the outlets' cost of obtaining the gas.

There are a number of reasons why this does not present a triable issue. First, the district court *excluded* Holcombe's testimony regarding "economic measurements and concepts such as the measurement of below marginal or average variable cost selling, recoupment, and data supporting price discrimination." [ER p. 274] His testimony was restricted to general industry practices. Nevertheless, the district court in *Rebel II* chose to address his testimony so as to address the PSI method of determining cost. *Rebel II, 957 F. Supp. at 1203 n.20*. **[**26]**

Second, PSI is a wholly-owned subsidiary of ARCO, and Holcombe stated that PSI had no independent existence. Under these circumstances, the price paid by PSI to ARCO is a transfer price, not a sale. *Brown v. Hansen Publications, Inc., 556 F.2d 969, 971 (9th Cir. 1977)*. If PSI and ARCO are a combined unit, the costs of ARCO and PSI together must be considered, not simply PSI's costs versus its sales. *Vollrath, 9 F.3d at 1460-61* (***HN18***[] if entities are considered a combined unit, "then the appropriate consideration is the costs of the combined group to determine if the combined group sold below its costs"); *Caribe BMW, Inc. v. Bayerische Motoren Werke Aktiengesellschaft, 19 F.3d 745, 749 (1st Cir. 1994)* (100% ownership makes firm and subsidiary single person under Robinson-Patman Act). Finally, income statements such as those analyzed by Holcombe may show that PSI stations lost money, but such statements alone are not sufficient to show that below-cost sales were made. *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 858 (9th Cir. 1978)* (as amended), *cert. denied, 439 U.S. 829,* *58 L. Ed. 2d 122, 99 S. Ct. 103 (1978)* (***HN19***[⬆] although conventional business records do **[**27]** provide information to use in calculating costs, the inclusion of other nonvariable costs in conventional records, such as depreciation, taxes, and licenses, means that "a firm's marginal costs cannot be ascertained from conventional business records").

II. *Daubert Ruling*

In its ruling on Rebel's expert witness testimony, a week before its summary **[*1097]** judgment ruling, the district court held that Leffler's opinions were admissible under *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*. Rebel contends that the later grant of summary judgment in ARCO's favor and the district court's rejection of Leffler's conclusions is irreconcilable with the admission of Leffler's testimony.

"***HN20***[⬆] The test [for the admission of expert testimony] under *Daubert* is not the correctness of the expert's conclusions but the soundness of his methodology." *Daubert v. Merrell Dow Pharms., Inc., 43 F.3d 1311, 1318* (9th Cir.), *cert. denied, 516 U.S. 869, 133 L. Ed. 2d 126, 116 S. Ct. 189 (1995)* (on remand from *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993))*. As the district court's *Daubert* order **[**28]** explicitly stated, "***HN21***[⬆] Whether Leffler's cost analysis is an economically valid method is [a] different question from whether it is legally sufficient to support a price discrimination claim." [ER p. 275] The district court's conclusion at summary judgment that Leffler's testimony was not legally sufficient evidence to create a question of material fact regarding whether ARCO priced its gasoline below its costs is not inconsistent with its conclusion following the *Daubert* hearing that Leffler's methodology was sound. ***HN22***[⬆] An expert witness may be qualified to testify even though the expert's conclusions are legally incorrect. *See General Elec. Co. v. Joiner, 139 L. Ed. 2d 508, 118 S. Ct. 512, 519 (1997)* (district courts may reject expert testimony that is based on sound methodology when "there is simply too great an analytical gap between the data and the opinion proffered").

The *Daubert* ruling did not require the district court to deny ARCO's motion for summary judgment.

III. *Predatory Intent*

Rebel complains that the district court *sua sponte* raised the issue whether ARCO had predatory intent and then decided that Rebel had not produced evidence that would allow **[**29]** a jury to find "clear and convincing evidence" of that intent. *See Rebel II, 957 F. Supp. at 1203-04*. Rebel claims this was improper because it had no notice that intent was in issue because ARCO did not address intent in its motion, and Rebel therefore had no opportunity to address the issue. Because we conclude that a showing of predatory intent is not sufficient in the absence of below-cost pricing to establish an antitrust violation, we do not decide this issue.

In *Brooke Group,* the Supreme Court made it clear that ***HN23***[⬆] predatory intent alone, no matter how clear and convincing the evidence, cannot substitute for a plaintiff's failure to demonstrate a reasonable prospect of recoupment. *See 509 U.S. 209 at 222-23, 113 S. Ct. 2578, 125 L. Ed. 2d 168* (below-cost pricing and reasonable prospect of recoupment required). In reviewing the sufficiency of the evidence, the Court stated:

> the record contains sufficient evidence from which a reasonable jury could conclude that Brown & Williamson envisioned or intended this anticompetitive course of events. There is also sufficient evidence in the record from which a reasonable jury could conclude that for a period of approximately 18 months, Brown & Williamson's **[**30]** prices on its generic cigarettes were below its costs, and that this below-cost pricing imposed losses on Liggett . . . . Liggett has failed to demonstrate . . . that in pursuing this scheme, Brown & Williamson had a reasonable prospect of recovering its losses from below-cost pricing through slowing the growth of generics. . . .
>
> No inference of recoupment is sustainable on this record, because no evidence suggests that Brown & Williamson - *whatever its intent in introducing black-and-whites [generics] may have been* - was likely to obtain the power to raise the prices for generic cigarettes above a competitive level.

Id. at 231-32 (citations and quotations omitted) (emphasis added).

If intent cannot substitute for the required element of recoupment, it likewise cannot establish an antitrust violation in the absence of evidence of below-cost pricing. Rebel did not establish a question of material fact regarding ARCO's below-cost pricing. The district court's discussion of intent was therefore **[*1098]** unnecessary, and we need not discuss whether it was erroneous. [2]

[31]** *AFFIRMED.*

End of Document

---

[2] Because we affirm the grant of summary judgment on below-cost pricing, we do not address ARCO's challenge to the district court's decision on recoupment, nor do we address Rebel's argument regarding the measure of its damages.

United States v. Microsoft Corp.

United States Court of Appeals for the District of Columbia Circuit

April 21, 1998, Argued ; June 23, 1998, Decided

No. 97-5343 Consolidated with 98-5012

Reporter
147 F.3d 935 *; 1998 U.S. App. LEXIS 13242 **; 331 U.S. App. D.C. 121; 1998-1 Trade Cas. (CCH) P72,188; 41 Fed. R. Serv. 3d (Callaghan) 216

UNITED STATES OF AMERICA, APPELLEE v. MICROSOFT CORPORATION, APPELLANT

Subsequent History: **[**1]** As Amended July 7, 1998.

Prior History: Appeals from the United States District Court for the District of Columbia. (No. 94cv01564).

Disposition: Reversed and remanded. The reference to the master was in effect the imposition on the parties of a surrogate judge and either a clear abuse of discretion or an exercise of wholly non-existent discretion. Granted mandamus to vacate the reference.

LexisNexis® Headnotes

Civil Procedure > Judgments > Entry of Judgments > Compelling Specific Acts

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN1[] **Entry of Judgments, Compelling Specific Acts**

A party seeking to hold another in contempt faces a heavy burden, needing to show by "clear and convincing evidence" that the alleged contemnor has violated a "clear and unambiguous" provision of a consent decree.

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[] **Entry of Judgments, Consent Decrees**

The a clarification of a consent decree may properly take the form of an injunction. As a consent decree contains an injunction already, a clarification naturally acquires the same character. If the supplementary language goes beyond the consent decree, it is a modification rather than a clarification, and is governed by different standards.

Civil Procedure > Remedies > Injunctions > Contempt

Civil Procedure > Remedies > Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Injunctions, Contempt**

Fed. R. Civ. P. 65(a)(1) provides that no preliminary injunction shall be issued without notice to the adverse party.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] **Injunctions, Grounds for Injunctions**

For a preliminary injunction, equitable standards would require the government to show substantial likelihood of success on the merits, plus risk of irreparable injury, lack of substantial injury to the opposing party, and consistency with the public interest.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN5[] **Injunctions, Grounds for Injunctions**

If a statute confers a right to an injunction once a certain showing is made, no plaintiff need show more than the statute specifies.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

HN6[] **Injunctions, Grounds for Injunctions**

When a governmental entity sues to enforce a statute, irreparable injury is presumed to flow from the violation itself.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN7[] **Injunctions, Grounds for Injunctions**

The purpose of *Fed. R. Civ. P. 65(a)(1)*'s notice requirement is to allow the opposing party a fair opportunity to oppose the preliminary injunction, and compliance is mandatory. Preliminary injunctions entered without notice to the opposing party are generally dissolved. Appellate courts have, however, on occasion allowed a procedurally flawed injunction to remain in place pending a proper hearing on remand if the equities support such a disposition.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN8[] **Settlements, Consent Judgments**

The court's review of a district court's interpretation of a consent decree is de novo.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

HN9[] **Settlements, Consent Judgments**

Consent decrees are generally interpreted as contracts. Interpretation of an ambiguous contract term on the basis of extrinsic evidence is generally treated as a question of fact, and the district court's findings as to the parties' intent are reviewed deferentially. This court, however, has regularly engaged in de novo review of district court interpretations of concededly ambiguous provisions which the parties sought to clarify with evidence from outside the decree itself.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Criminal Law & Procedure > ... > Standards of Review > De Novo Review > General Overview

HN10[] **Standards of Review, De Novo Review**

De novo review of legal analysis is in principle compatible with deference to factual findings.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN11[] **Settlements, Consent Judgments**

An antitrust consent decree cannot be read as though its animating spirit were solely the antitrust laws. The decree itself cannot be said to have a purpose; rather the parties have purposes, generally opposed to each other, and the resultant decree embodies as much of those opposing purposes as the respective parties have the bargaining power and skill to achieve. A court's task, then, is to discern the bargain that the parties struck; this is the sense behind the proposition that consent decrees are to be interpreted as contracts. To find the meaning of an ambiguous provision a court looks for the intent of the parties, just as it would with a contract. In that quest we may rely on the same aids to construction as a court would when interpreting an ambiguous contract, including the circumstances surrounding the formation of the consent order.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Tying Arrangements, Defenses**

Integration may be considered genuine if it is beneficial when compared to a purchaser combination. It is not proposed that in making this inquiry a court should embark on product design assessment. In ***antitrust law***, the courts have recognized the limits of their institutional competence and have on that ground rejected theories of "technological tying." A court's evaluation of a claim of integration must be narrow and deferential. Such a violation must be limited to those instances where the technological factor tying the hardware to the software has been designed for the purpose of tying the products, rather than to achieve some technologically beneficial result. Any other conclusion would enmesh the courts in a technical inquiry into the justifiability of product innovations.

Civil Procedure > ... > Justiciability > Mootness > General Overview

Constitutional Law > ... > Case or Controversy > Mootness > General Overview

Civil Procedure > Judicial Officers > Masters > General Overview

Civil Procedure > Judicial Officers > References

HN13[] **Justiciability, Mootness**

Fed. R. Civ. P. 53(b) provides in part that a reference to a master shall be the exception and not the rule. In actions to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it.

Civil Procedure > Remedies > Writs > General Overview

HN14[] **Remedies, Writs**

Adequacy of remedy defeats mandamus.

Civil Procedure > Trials > Bench Trials

Civil Procedure > Judicial Officers > Masters > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

HN15[] **Trials, Bench Trials**

Fed. R. Civ. P. 52(e)(2) instructs that in non-jury trials, the court shall accept the master's findings of fact unless clearly erroneous.

Counsel: Richard J. Urowsky argued the cause for appellant. With him on the brief were John L. Warden, Steven L. Holley, Richard C. Pepperman, II, Andrew C. Hruska, James R. Weiss, William H. Neukom and David A. Heiner, Jr.

A. Douglas Melamed, Deputy Assistant Attorney General, U.S. Department of Justice, argued the cause for appellee. With him on the briefs were Joel I. Klein, Assistant Attorney General, Catherine G. O'Sullivan and Mark S. Popofsky, Attorneys.

Daniel E. Lungren, Attorney General of California, James E. Ryan, Attorney General of Illinois, Carla J. Stovall, Attorney General of Kansas, J. Joseph Curran, Jr., Attorney General of Maryland, Scott Harshbarger, Attorney General for the Commonwealth of Massachusetts, Jeremiah W. (Jay) Nixon, Attorney General of Missouri, Joseph P. Mazurek, Attorney General of Montana, Frankie Sue **[**2]** Del Papa, Attorney General of Nevada, Tom Udall, Attorney General of New Mexico, and W.A. Drew Edmondson, Attorney General of Oklahoma, members of the Bar of this Court, were on the brief of certain States as amici curiae, with whom appeared the various other Attorneys General of the participating States.

Judges: Before: WALD, WILLIAMS and RANDOLPH, Circuit Judges. Opinion for the Court filed by Circuit Judge WILLIAMS. Opinion concurring in part and dissenting in part filed by Circuit Judge WALD.

Opinion by: WILLIAMS

Opinion

[*938] WILLIAMS, *Circuit Judge*: The district court entered a preliminary injunction prohibiting Microsoft Corporation from requiring computer manufacturers who license its operating system software to license its internet browser as well. In granting the preliminary injunction the court also referred the government's motion for a permanent injunction to a special master. Microsoft appeals the preliminary injunction and applies for a writ of mandamus revoking the reference to a master. We find that the district court erred procedurally in entering a preliminary injunction without notice to Microsoft and substantively in its implicit construction of the consent decree on which **[**3]** the preliminary injunction rested. We also grant the petition for mandamus and direct the district court to revoke or revise its reference.

I.

This case arises from Microsoft's practices in marketing its Windows 95 operating system. An operating system is, so to speak, the central nervous system of the computer, controlling the computer's interaction with peripherals such as keyboards and printers. Windows 95 is an operating system that integrates a DOS shell with a graphical user interface, i.e., a technology by which the operator performs functions not by typing at the keyboard but by clicks of his mouse. Operating systems also serve as "platforms" for application software such as word processors. As the word "platform" suggests, the operating system provides a basic support structure for an application via "application programming interfaces" ("APIs"), **[*939]** which provide general functions on which applications can rely. Each operating system's APIs are unique; hence applications tend to be written for particular operating systems. The primary market for operating systems consists of original equipment manufacturers ("OEMs"), which make computers, install operating systems and other **[**4]** software that they have licensed from vendors such as Microsoft, and sell the package to end users. These may be either individual consumers or businesses.

In an earlier opinion, also arising from litigation generated by the Justice Department's 1994 antitrust suit against Microsoft, we briefly described Microsoft's role in the software industry and some of the industry's economics. *United States v. Microsoft Corp., 312 U.S. App. D.C. 378, 56 F.3d 1448, 1451-52 (D.C. Cir. 1995)*. Because IBM chose to install Microsoft's operating system on its personal computers, Microsoft acquired an "installed base" on millions of IBM and IBM-compatible PCs. That base constituted an exceptional advantage, and created exceptional risks of monopoly, because of two characteristics of the software industry--increasing returns to scale and network externalities. First, because most of the costs of software lie in the design, marginal production costs are negligible. Production of additional units appears likely to lower average costs indefinitely. (I.e., the average cost curve never turns upward.) Second, an increase in the number of users of a particular item of software increases the number of other **[**5]** people with whom any user can share work. As a result, Microsoft's large installed base increases the incentive for independent software vendors to write compatible applications and thereby increases the value of its operating system to consumers.

The Department's 1994 complaint alleged a variety of anticompetitive practices, chiefly in Microsoft's licensing agreements with OEMs. Along with it, the Department filed a proposed consent decree limiting Microsoft's behavior, the product of negotiations between Microsoft, the Department and European competition authorities. Most relevant here is § IV(E) of the decree:

> Microsoft shall not enter into any License Agreement in which the terms of that agreement are expressly or impliedly conditioned upon:
>
>> (i) the licensing of any other Covered Product, Operating System Software product or other product (provided, however, that this provision in and of itself shall not be construed to prohibit Microsoft from developing integrated products); or
>>
>> (ii) the OEM not licensing, purchasing, using or distributing any non-Microsoft product.

The Department sees a violation of § IV(E)(i) in Microsoft's marketing of Windows 95 and its **[**6]** web browser, Internet Explorer ("IE").

The Internet is a global network that links smaller networks of computers. The World Wide Web ("the Web") is the fastest-growing part of the Internet, composed of multimedia "pages" written in Hypertext Markup Language ("HTML") and connected to other pages by hypertext links. Browsers enable users to navigate the Web and to access information.

Most browsers are designed according to a "multiplatform" approach, with different versions for each of a variety of different operating systems. Joint Appendix ("J.A.") 81. Browsers also have the potential to serve as user interfaces and as platforms for applications (which could then be written for the APIs of a particular browser rather than of a particular operating system [1]), providing some of the traditional functions of an operating system. Widespread use of multi-platform browsers as user interfaces has some potential to reduce any monopoly-increasing effects of network externalities in the operating system market. Browsers can enable the user to access applications stored on the **[*940]** Internet or local networks, or to operate applications that are independent of the operating system. J.A. 103-05.

[7]** Microsoft has developed successive versions of IE, the first of which was initially released with Windows 95 in July 1995. Microsoft's Windows 95 license agreements have required OEMs to accept and install the software package as sent to them by Microsoft, including IE, and have prohibited OEMs from removing any features or functionality, i.e., capacity to perform functions such as browsing. J.A. 86-89.

The first three versions of IE were actually included on the Windows 95 "master" disk supplied to OEMs. Department Br. at 4; J.A. 1277-78. IE 4.0, by contrast, was initially distributed on a separate CD-ROM and OEMs were not required to install it. Microsoft intended to start requiring OEMs to preinstall IE 4.0 as part of Windows 95

---

[1] Similarly, Sun Microsystems's "Java" programming language allows programmers to write applications that will run on any computer, regardless of the operating system, as long as certain Java-related software (a Java "virtual machine" and Java "class libraries") is present. Internet browsers incorporate the necessary Java-related software, and hence allow Java programs to live up to their "write once, run anywhere" billing.

in February 1998. On learning of Microsoft's plans, the Department became concerned that this practice violated § IV(E)(i) by effectively conditioning the license for Windows 95 on the license for IE 4.0, creating (in its view) what ***antitrust law*** terms a "tie-in" between the operating system and the browser. [2] (It is not clear why extension of Microsoft's established IE policy to IE 4.0 aroused the Department's concern.) It filed a petition seeking to **[**8]** hold Microsoft in civil contempt for its practices with respect to IE 3.0, and requesting "further" that the court explicitly order Microsoft not to employ similar agreements with respect to any version of IE.

HN1[] A party seeking to hold another in contempt faces a heavy burden, needing to show by "clear and convincing evidence" that the alleged contemnor has violated **[**9]** a "clear and unambiguous" provision of the consent decree. *Armstrong v. Executive Office of the President, 303 U.S. App. D.C. 107, 1 F.3d 1274, 1289 (D.C. Cir. 1993)*. Finding § IV(E)(i) ambiguous, the district court denied the Department's contempt petition. But that left open the possibility that Microsoft's practices might in fact violate the consent decree (though not so clearly as to justify contempt), and the district court continued the proceedings in order to answer that question, appointing a special master not only to oversee discovery but also to propose findings of fact and conclusions of law. For the meantime, the court entered a preliminary injunction forbidding Microsoft

> from the practice of licensing the use of any Microsoft personal computer operating system software (including Windows 95 or any successor version thereof) on the condition, express or implied, that the licensee also license and preinstall any Microsoft Internet browser software (including Internet Explorer 3.0, 4.0, or any successor versions thereof).

J.A. 1300.

A detour is necessary to explore what this injunction meant. In some of its papers before the court the Department had **[**10]** argued for an order barring Microsoft from "forcing OEMs to accept and preinstall the software code" that it separately distributes at retail as IE 3.0. J.A. 996. Microsoft had responded that a Windows 95 operating system without IE software code simply would not function. The government characterized that assertion as "greatly overblown." J.A. 1237. The district court, in its justifying memorandum, referred to the injunction as barring Microsoft from "forcing OEMs to accept and preinstall the software code" separately distributed as IE 3.0, J.A. 1296-97; i.e., it employed the Department's exact words on the subject. After the injunction was issued, Microsoft and the Department had further consultations, at the end of which they entered a stipulation that Microsoft would be in compliance with the injunction if it extended to OEMs the options of (1) running the Add/Remove Programs utility with respect to IE 3.x and (2) removing the IE icon from the desktop and from the **[*941]** Programs list in the Start menu and marking the file IEXPLORE.EXE "hidden." J.A. 1780-81. It appears not to be disputed that these alternate modes of compliance do *not* remove the IE software code, which indeed continues **[**11]** to play a role in providing non-browser functionality for Windows. In fact, browser functionality *itself* persists, and can be summoned up either by entering four lines of code or by running any application (such as Quicken) that contains the code necessary to invoke the functionality. J.A. 1649-55. The agreed-upon means of compliance simply enable the OEMs to make user access to IE more difficult. [3]

Microsoft appealed, as authorized by *28 U.S.C. § 1292(a)(1)*, and also sought mandamus directing the district court to revoke the reference to the special master.

II.

---

[2] The Department's language suggests that two products, and indeed, two license agreements are at issue. See, e.g., the Department Br. at 4 ("Microsoft conditioned its OEM licenses to Windows 95 on OEMs' licensing Internet Explorer.") It is undisputed that OEMs enter into only one license agreement, which covers IE as part of Windows 95. J.A. 1274. Microsoft's central argument, of course, is that there is only one product. The terminology used in our introductory recitation of facts is of course not intended to resolve, or to reflect any resolution of, contested issues, and no inference as to those issues should be drawn from the wording of this section.

[3] Additionally, by allowing OEMs to conceal IE, rather than to refuse it, the remedy fits poorly with the Department's tying theory. A tie-in is not affected by the purchaser's ability to discard the tied good.

Microsoft claims at the outset that the district court, after finding no contempt, should simply have dismissed the Department's petition. But although the petition was styled simply as one for an order to show cause "Why Respondent Microsoft **[**12]** Corporation Should Not Be Held in Civil Contempt," its prayer for relief sought not only pure contempt remedies (such as the attention-grabbing request for $ 1,000,000 a day in damages), but also an order directing Microsoft to cease and desist from requiring "OEMs to license any version of Internet Explorer as an express or implied condition of licensing Windows 95." J.A. 41. This was plainly a request for clarification of the consent decree, pinning down its application to the browser issue. ***HN2***[] Such a clarification may properly take the form of an injunction. See *Brewster v. Dukakis, 675 F.2d 1, 3-4 (1st Cir. 1982)*. Indeed, as a consent decree contains an injunction already, a clarification naturally acquires the same character. (Of course, if the supplementary language goes beyond the consent decree, it is a modification rather than a clarification, and is governed by different standards. See, e.g., *United States v. Western Elec. Co., 282 U.S. App. D.C. 271, 894 F.2d 430, 435 (D.C. Cir. 1990)* ("*Manufacturing Appeal*").) Although the framing of this request as part of a *remedy* for contempt may have been odd, Microsoft does not contest that the proceeding put in controversy **[**13]** the meaning of § IV(E)(i) as applied to its browser technology.

This government request for clarification appeared in its petition shortly after its primary request--that the court adjudge Microsoft to be in contempt--and the word "further." Following "further" are a raft of requests for orders, this being just one. Microsoft says this clearly shows that the request was contingent on a finding of contempt. It further (here, in the sense of "additionally") presses on us some lines from a colloquy between the district court and a Department lawyer during the final hearing (December 5, 1997) before the court made its decision to issue a preliminary injunction:

> THE COURT: All right. Let me go to the relief that you have requested here. Your petition is in terms phrased only as a petition for a finding of contempt.
> MR. MALONE: That's correct, Your Honor.
> THE COURT: We've have [sic] gone beyond the show cause [stage]. They have shown cause, and we're now at the contempt stage.
> Is that the only relief that you're looking for, or am I
> to read the petition as what I am inclined to read it as, and that is a petition for specific enforcement?
>
> MR. MALONE: I think that is exactly **[**14]** how the Court should read it, Your Honor. I think we have said, very clearly, in arguing since the beginning that we want the Court--we believe the Court can find Microsoft in contempt and can impose this specific relief to remedy the contempt, and should quickly.
> Microsoft has opposed that on merits grounds, but I don't think Microsoft has come along and said, "You can't do that. This is just an order to show cause or something else."
>
> **[*942]** The merits are very much before the Court, and what we're asking is for the specific relief that we requested in the petition.
> That really boils down to, Your Honor, simply an order telling Microsoft, "You may no longer force OEMs to take Internet Explorer as a condition of getting your Windows 95 license."

J.A. 1235-36.

In fact we think this dialogue suggests either that the Department's request was always in the alternative or that it modified the request to make it such. "I think that is exactly how the Court should read it" comes in response to a suggestion that the petition be read as a request for specific enforcement, and the interest in clarification is presented as the Department's central concern. J.A. 1295. Given the district **[**15]** court's participation in the colloquy, we might be inclined, if necessary, to defer to its understanding of the Department's prayer for relief.

Even if we found that the Department's request was in fact contingent on a finding of contempt, however, we do not think the district court would have erred in clarifying the decree *sua sponte* as an incident to its denial of the contempt petition. Contempt motions are often accompanied by requests for clarification in the alternative. But they also often elicit declaratory clarifications, and sometimes even amendments, as accompaniments to denials even without (so far as appears) explicit alternative requests for clarification. See, e.g., *Wilder v. Bernstein, 49 F.3d 69, 71-72 (2d Cir. 1995)*; *Thermice Corp. v. Vistron Corp., 832 F.2d 248, 250-51 (3d Cir. 1987)*; *Gov't of the Virgin Islands v. Sun Island Car Rentals, Inc., 819 F.2d 430, 431 (3d Cir. 1987)*; *Movie Systems, Inc. v. MAD Minneapolis*

Audio Distributors, Inc., 717 F.2d 427, 429-30 (8th Cir. 1983); Vertex Distributing, Inc. v. Falcon Foam Plastics, Inc., 689 F.2d 885, 888 n.2, 892 (9th Cir. 1982); Stolberg v. Board of Trustees for State Colleges, 541 F.2d **[**16]** 890, 892 (2d Cir. 1976); Red Ball Int. Demolition Corp. v. Palmadessa, 947 F. Supp. 116, 121 (S.D.N.Y. 1996); Johnson v. Heckler, 604 F. Supp. 1070, 1075-76 (N.D. Ill. 1985).

We are aware of no case raising doubts about the propriety of clarification incident to the denial of a contempt petition. Indeed, at oral argument Microsoft conceded "in principle" the court's authority to continue the proceeding in order to clarify the decree. Transcript at 11. [4] Of course, the above cases characteristically did not explicitly affirm the district court's authority, although one did just that. See Vertex, 689 F.2d at 892 ("The district court could properly clarify that ambiguous language, and this it did, requiring defendants to change their future advertising to comply with the consent judgment, as clarified.").

[17]** Microsoft points out that the question of district court authority is jurisdictional, so that mere practice may not be enough. But much repeated practice illumines the generally understood meaning of petitions for contempt citations. A court granting a clarification that the parties have not explicitly requested has at most construed the petition to contain an implicit request for declaratory relief. This construction seems altogether reasonable where, as here, the petition clearly puts the meaning of the consent decree in issue and the petition makes the standard request (in the rather typical words of this petition) for "such further orders as the nature of the case may require and as the Court may deem just and proper to compel obedience to and compliance with the orders and decrees of this Court." J.A. 43. Cf. Johnson, 604 F. Supp. at 1075-76 (denying contempt petition but clarifying decree in response to request for further relief under 28 U.S.C. § 2202).

Because it was not error for the court to address the issue of clarification, we must decide whether the preliminary injunction was correctly granted.

[*943] III.

Microsoft argues that the district court failed to comply with **[**18]** ***HN3***[] Federal Rule of Civil Procedure 65(a)(1)'s command, "No preliminary injunction shall be issued without notice to the adverse party." We agree. Obviously the Department's request for a contempt citation provided no such notice, for the governing criteria are completely different. To defeat the contempt petition, all Microsoft had to do was to show that the Department failed to meet its burden of showing that the consent decree unambiguously barred its conduct. ***HN4***[] For a preliminary injunction, by contrast, traditional equitable standards would require the government to show substantial likelihood of success on the merits (here, that the decree, properly construed, barred the conduct), *plus* risk of irreparable injury, lack of substantial injury to the opposing party, and consistency with the public interest. See CityFed Financial Corp. v. Office of Thrift Supervision, 313 U.S. App. D.C. 178, 58 F.3d 738, 746 (D.C. Cir. 1995). The contempt petition did not alert Microsoft to contest these factors.

Nor could the Department's request for a *permanent* injunction serve as notice--even putting aside Microsoft's argument that the request was contingent on a situation that never arose **[**19]** (see section II). The request for a permanent injunction amounted to no more than a request for a clarification, and thus would require only a showing that the Department's reading of the consent decree was correct. It did not put into play the equitable factors of interim irreparable injury to the requester, harm to the party to be enjoined, and effects on the public interest. But resolution of these is essential in granting a *preliminary* injunction; the proponent must make a showing about the interim risks precisely in order to counterbalance the lack of any final ruling in its favor on the merits.

At oral argument the Department claimed that when the government seeks a preliminary injunction under a statute, its showing of a likelihood of success on the merits supplants the normal need for assessment of the interim risks.

[4] Microsoft then grounded its objection on the fact that the Department had urged the court "not to permit discovery, not to conduct an evidentiary hearing and to decide the matter on the papers before the District Court." Id. at 12. These objections, however valid, are completely independent of the theory we address here. As we find the preliminary injunction procedurally defective on other grounds, we need not reach them.

This is true under some circumstances. First, it is clear that **HN5**[] if a statute confers a *right* to an injunction once a certain showing is made, no plaintiff--neither governmental agencies nor private parties--need show more than the statute specifies. See, e.g., *Illinois Bell Telephone Co. v. Illinois Commerce Comm'n, 740 F.2d 566, 571 (7th Cir. 1984)* **[**20]** (irreparable injury not required for preliminary injunction under *47 U.S.C. § 401(b)*, which provides that court "shall enforce" FCC order upon showing of disobedience). The statutory specification displaces the traditional equitable standards, but this displacement is "not lightly assumed." *Weinberger v. Romero-Barcelo, 456 U.S. 305, 312, 72 L. Ed. 2d 91, 102 S. Ct. 1798 (1982)*. Plaintiffs must show that Congress intended to "intervene and guide or control the exercise of the courts' discretion." *Id. at 313*. See also *Amoco Production Co. v. Village of Gambell, 480 U.S. 531, 541-45, 94 L. Ed. 2d 542, 107 S. Ct. 1396 (1987)*.

Second, and not entirely distinct in the cases, lurks the proposition that **HN6**[] when a governmental entity sues to enforce a statute, irreparable injury is presumed to flow from the violation itself. See, e.g., *United States v. Diapulse, 457 F.2d 25, 27-28 (2d Cir. 1972)* ("The passage of the statute is, in a sense, an implied finding that violations will harm the public and ought, if necessary, [to] be restrained."). It is unclear, however, whether such decisions actually turn on the identity of the plaintiff, or whether they are simply instances **[**21]** where the court read the statute as providing for injunction on a reduced showing and mentioned the enforcing agency because it happened to be the plaintiff before the court. As the cases did not purport to apply the doctrine to all statutes under which a government agency might seek relief, but limited it, for example, to "remedial" ones, [5] **[*944]** see, e.g., *Commodity Futures Trading Comm'n v. Muller, 570 F.2d 1296, 1300 (5th Cir. 1978)*, the latter seems more probable.

Some cases antedating *Romero-Barcelo* took the view **[**22]** that mere statutory authorization of injunctive relief displaced equitable standards, see, e.g., *Atchison, Topeka & Santa Fe Railway Co. v. Lennen, 640 F.2d 255, 259 (10th Cir. 1981)* (citing cases). Under this view *§ 4* of the Sherman Act, *15 U.S.C. § 4*, authorizing such temporary injunctive relief "as shall be deemed just," but setting no standards for its award, would evidently be enough. But such cases seem outmoded by *Romero-Barcelo*'s view that displacement of the usual equitable standards requires a "clear and valid legislative command." *456 U.S. at 313*, quoting *Porter v. Warner Holding Co., 328 U.S. 395, 398, 90 L. Ed. 1332, 66 S. Ct. 1086 (1946)*. In fact, even before *Romero-Barcelo* the Court construed *§ 4*'s grant as controlled by the ordinary principles of equity courts. *De Beers Consol. Mines v. United States, 325 U.S. 212, 218-19, 89 L. Ed. 1566, 65 S. Ct. 1130 (1945)*.

In any event, the Department's suggestion is irrelevant. The preliminary injunction was entered in a suit to enforce a consent decree, not a statute. As the settlement of a litigation, the decree may require less than the statute under which the suit was brought, or more, *United States* ***[**23]*** *v. Armour & Co., 402 U.S. 673, 681-82, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)*; *Ass'n for Retarded Citizens v. Thorne, 30 F.3d 367, 369 (2d Cir. 1994)*, so the violation of one is not necessarily a violation of the other. Thus a finding of probable violation of the consent decree could not support a presumption of irreparable harm even under the most extravagant version of the doctrine the government invokes.

So the district court did need to find irreparable injury before granting the preliminary injunction. The absence of notice had the effect of precluding the introduction of evidence and argument on this requirement, and the omission was far from trivial. At oral argument the Department conceded that it had offered no evidence on the subject, and Microsoft suggested that it could have forcefully contested anything the Department might have offered, alluding to information--obviously not in the record--that no OEM had, since entry of the preliminary injunction, sought to take advantage of its terms. Transcript at 10, 61. [6]

---

[5] We have noted recently, and more than once, that the concept of a "remedial" statute is unhelpful. All statutes, unless purely declaratory, seek to "remedy" something about the pre-existing state of affairs. The cases seem bereft of references to "destructive" statutes. See *East Bay Municipal Utility Dist. v. United States Dep't of Commerce, 142 F.3d 479, 1998 U.S. App. LEXIS 8346, 1998 WL 210612* *5-*6 (D.C. Cir. 1998); *Ober United Travel Agency, Inc. v. United States Dep't of Labor, 328 U.S. App. D.C. 410, 135 F.3d 822, 825 (D.C. Cir. 1998)*.

[6] The district court mentioned irreparable harm, but not in any terms suggesting focus on the relevant concern--whether denial of relief would result in harm to the competitive interests asserted by the government. It said that the Department is threatened with

[24]** ***HN7***[]

The purpose of *Rule 65(a)(1)*'s notice requirement is to allow the opposing party a fair opportunity to oppose the preliminary injunction, see *Weitzman v. Stein, 897 F.2d 653, 657 (2d Cir. 1990)*, and compliance is mandatory, *Parker v. Ryan, 960 F.2d 543, 544 (5th Cir. 1992)*. Preliminary injunctions entered without notice to the opposing party are generally dissolved. See, e.g., *Williams v. McKeithen, 939 F.2d 1100, 1105-06 (5th Cir. 1991)*; *Weitzman, 897 F.2d at 657-68*; *Phillips v. Chas. Schreiner Bank, 894 F.2d 127, 130-31 (5th Cir. 1990)*. Appellate courts have, however, on occasion allowed a procedurally flawed injunction to remain in place pending a proper hearing on remand if the equities support such a disposition. See, e.g., *Rosen v. Siegel, 106 F.3d 28, 33 (2d Cir. 1997)*.

The Department urges us to do so here. Evaluating such a request requires the court to consider the traditional equitable factors as apparent on the existing record. See, e.g., *Inverness Corp. v. Whitehall Laboratories, 819 F.2d 48, 51 (2d Cir. 1987)*. We do not believe that a reviewing court *must* entertain such a request; if the record were so deficient as to make effective **[**25]** evaluation of the equities impossible, a court might do better simply to vacate the injunction as a matter of course--especially where, as here, the injunction was sought only rather obliquely. As later sections will show, however, the record here is enough for us at least to make a reasonable appraisal of the Department's eventual likelihood of success on the merits, and this factor proves dispositive. Silence at this stage would risk considerable **[*945]** waste of litigative resources. "When the district court's estimate of the probability of success depends on an incorrect or mistakenly applied legal premise, 'the appellate court furthers the interest of justice by providing a ruling on the merits to the extent that the matter is ripe, though technically the case is only at the stage of application for preliminary injunction.' " *Air Line Pilots Ass'n Int'l v. Eastern Air Lines, Inc., 274 U.S. App. D.C. 202, 863 F.2d 891, 895 (D.C. Cir. 1988)* (quoting *Natural Resources Defense Council, Inc. v. Morton, 148 U.S. App. D.C. 5, 458 F.2d 827, 832 (D.C. Cir. 1972)*. When reviewing preliminary injunctions we have generally not been hesitant to offer interpretation and guidance on the substantive **[**26]** legal issues. See, e.g., *Defenders of Wildlife v. Andrus, 201 U.S. App. D.C. 252, 627 F.2d 1238, 1243 (D.C. Cir. 1980)*; *Energy Action Educational Found'n v. Andrus, 203 U.S. App. D.C. 169, 631 F.2d 751, 761 (D.C. Cir. 1979)*; *Maryland-National Capital Park & Planning Comm'n v. U.S. Postal Service, 159 U.S. App. D.C. 158, 487 F.2d 1029, 1041 (D.C. Cir. 1973)*. We thus turn to the interpretation of § IV(E)(i), on which the merits of the Department's case depend. ***HN8***[] Our review of a district court's interpretation of a consent decree is de novo. [7] See, e.g., *Richardson v. Edwards, 326 U.S. App. D.C. 429, 127 F.3d 97, 101 (D.C. Cir. 1997)*; *United States v. Western Elec. Co., 304 U.S. App. D.C. 199, 12 F.3d 225, 229 (D.C. Cir. 1993)*; *United States v. Western Elec. Co., 283 U.S. App. D.C. 299, 900 F.2d 283, 293 (D.C. Cir. 1990)* ("*Triennial Review* ").

---

irreparable harm because "the cost of a compulsory unbundling of Windows 95 and IE in the future could be prohibitive," J.A. 1297, which seems rather more like a risk to Microsoft if it continues its current practice and ultimately loses in court.

[7] We agree with Judge Wald's suggestion, see Sep. Op. at 13-14, that there is something unusual about de novo review of a district court interpretation of an ambiguous provision of a consent decree. ***HN9***[] Consent decrees are generally interpreted as contracts. See *United States v. ITT Continental Baking Co., 420 U.S. 223, 236-37, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975)*. Interpretation of an ambiguous contract term on the basis of extrinsic evidence is generally treated as a question of fact, and the district court's findings as to the parties' intent are reviewed deferentially, i.e., reversed only for clear error. See, e.g., *NRM Corp. v. Hercules, 244 U.S. App. D.C. 356, 758 F.2d 676, 682 (D.C. Cir. 1985)*. This court, however, has regularly engaged in de novo review of district court interpretations of concededly ambiguous provisions which the parties sought to clarify with evidence from outside the decree itself. See, e.g., *United States v. Western Electric Co., 304 U.S. App. D.C. 199, 12 F.3d 225, 229, 231 (D.C. Cir. 1993)* (announcing de novo review despite admitted ambiguity); *United States v. Western Electric Co., 283 U.S. App. D.C. 299, 900 F.2d 283, 293, 296 (D.C. Cir. 1990)* ("*Triennial Review*") (same); see also *900 F.2d at 294* (characterizing issue as "pure question of law"). Nor does the Supreme Court's opinion in *ITT,* which relies on the presence of ambiguity to distinguish *Armour,* see *ITT, 420 U.S. at 238* & n.11, give any indication of deference. Of course, ***HN10***[] de novo review of legal analysis is in principle compatible with deference to factual findings. See *Triennial Review,* 900 F.2d at 293-94 (explaining that "aside from fact-finding, we owe no deference to the district court's decisions"); *North Shore Laboratories Corp. v. Cohen, 721 F.2d 514, 518-19 (5th Cir. 1983)* (reviewing de novo while also noting deference to factual findings of parties' intent). This mixed approach may be the correct one, although the centrality of intent would often make the deference swallow the de novo review, a result our cases do not seem to contemplate. But here it would amount to de novo review anyway, as the district court made no findings of fact as to intent to which we could defer.

[27]** IV.

Section IV(E) arose from a 1993 complaint filed with the Directorate General IV of the European Union ("DG IV") (the principal competition authority in Europe). Novell, a rival software vendor, alleged that Microsoft was tying its MS-DOS operating system to the graphical user interface provided by Windows 3.11. Before the introduction of Windows 95, which integrated the two, Microsoft marketed the DOS component and the Windows component of the operating system separately, and Windows 3.11 could be operated with other DOS products. But Novell, which marketed a competing DOS product, DR-DOS, complained that by means of specific marketing practices--particularly "per processor and per system licenses," J.A. 754--Microsoft was creating economic incentives for OEMs to preinstall MS-DOS as well as Windows 3.11, thereby using its power in the market for DOS-compatible graphical user interfaces (where it commanded a near 100% market share) to affect OEM choice in the DOS market. [8] J.A. 839-48.

[28]** During June 1994 negotiations with the Department, Microsoft proposed the possibility of a joint settlement, and representatives **[*946]** of DG IV participated in meetings in Brussels and later in Washington, D.C. On July 15, 1994, the three sides reached agreement and Microsoft and the Department signed a stipulation agreeing to entry of the consent decree, including § IV(E). Both Microsoft and the Department characterize § IV(E) as an "anti-tying" provision.

Microsoft and the Department engage in a brief battle over the extent to which ***antitrust law*** may be relevant to this dispute. Without wasting time on the parties' somewhat exaggerated positions, we can simply say that Microsoft is clearly right that the decree does not embody either the entirety of the Sherman Act or even all "tying" law under the Act, and the Department is equally right to point out that the consent decree emerged from antitrust claims, unresolved though they were, so that we must keep procompetitive goals in mind in the interpretive task.

As *Armour* makes clear, however, ***HN11***[] an antitrust consent decree cannot be read as though its animating spirit were solely the antitrust laws. "The decree itself cannot be said **[**29]** to have a purpose; rather the parties have purposes, generally opposed to each other, and the resultant decree embodies as much of those opposing purposes as the respective parties have the bargaining power and skill to achieve." *402 U.S. at 681-82*.

The court's task, then, is to discern the bargain that the parties struck; this is the sense behind the proposition that consent decrees are to be interpreted as contracts. See, e.g., *ITT Continental Baking Co., 420 U.S. at 236-37*; *Richardson, 127 F.3d at 101*; *Western Elec., 282 U.S. App. D.C. 347, 894 F.2d 1387 at 1390*. To find the meaning of an ambiguous provision we look for the intent of the parties, just as we would with a contract. See *Western Elec. Co., 12 F.3d at 231-32* (reading ambiguous provision of consent decree "in light of the parties' *jointly intended* purpose" (internal quotation omitted)); *NRM Corp. v. Hercules, Inc., 244 U.S. App. D.C. 356, 758 F.2d 676, 681-82 (D.C. Cir. 1985)* (contract interpretation). In that quest we may rely on the same aids to construction as we would when interpreting an ambiguous contract, including "the circumstances surrounding the formation of the consent order." See *ITT, 420 U.S. at **[**30]** 238*.

Section IV(E)(i) represented the parties' agreed "solution" to the problem posed by the Novell complaint. The practices complained of there, coupled with the decree's explicit acceptance of Windows 95, establish the competing models that guide our resolution of the present dispute. Whatever else § IV(E)(i) does, it must forbid a tie-in between Windows 3.11 and MS-DOS, and it must permit Windows 95. Thus if the relation between Windows 95 and IE is similar to the relation between Windows 3.11 and MS-DOS, the link is presumably barred by § IV(E)(i). On the other hand, a counter-analogy is Windows 95 itself, which the decree explicitly recognizes as a single "product" (it defines it as a "Covered Product," § II(1)(v)), even though, as we have said, Windows 95 combines the functionalities of a graphical interface and an operating system. If the Windows 95/IE combination is like the MS-DOS/graphical interface combination that comprises Windows 95 itself, then it must be permissible.

---

[8] The indirect nature of the alleged tie may explain why § IV(E)(i) bars an agreement whose terms are "expressly or *impliedly* conditioned upon … the licensing of any other Covered Product."

The parties offer us little help in picking the correct analogy. Both propose readings of § IV(E)(i) that fail to reconcile its language with the facts of the Novell complaint and the later permissible **[**31]** release of Windows 95. The Department claims that § IV(E)(i) prohibits Microsoft from bundling together a Covered Product and anything that "Microsoft simultaneously treats" and "***antitrust law*** regards" as "a distinct commercial product." Department Br. at 37-38. It says that the browser-Windows pair is caught in the first filter (Microsoft's treatment of IE as a separate product) because Microsoft provides it separately to end users, sells versions of IE 4 for different operating systems, advertises IE 4, tracks its performance in a "browser market," and distributes it on a separate CD-ROM. J.A. 32-37. For antitrust criteria, the Department draws on *Jefferson Parish Hosp. District No. 2 v. Hyde, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)*, for the proposition that products are distinct for tying purposes if consumer demand exists for each separately. (The Department notes correctly that this does not require demand **[*947]** for one product without the other but simply demand for the two products from different sellers. See *id. at 19* & n.30.)

We are not convinced that these indicia necessarily point to separateness, especially those that depend on Microsoft's treatment. Microsoft **[**32]** plausibly characterizes the IE that it provides to end users as an operating system upgrade, as does its rival Netscape, J.A. 589, and the Department offers no means of distinguishing an upgrade from a separate product. Versions developed for different operating systems may be better understood as different products altogether; hence, their relevance to separateness is obscure. Distribution of software code on a separate CD-ROM shows nothing at all about whether the code is integrated into an operating system (software for an operating system that is clearly a single product may take up many disks).

The Department's interpretation of the "integrated products" proviso does nothing to remedy its reading of the body of § IV(e)(i). On the Department's account, the proviso allows Microsoft to incorporate new features into an operating system and offer the package to OEMs--as long as it and ***antitrust law*** do not simultaneously treat those features as "a distinct commercial product." Department Br. at 37-38. But these are just the criteria deployed to argue that IE is an "other product"; if the proviso merely reiterates them (to say that what is not an "other product" is "integrated"), it **[**33]** does nothing. And while the Department says that the proviso would protect Microsoft from a charge that it had violated the decree by adopting a technology incompatible with other firms' products, Department Br. at 37 n.17, it is not apparent how § IV(E)(i)'s ban might prohibit such conduct nor how, if it did, the proviso on integration would help it. In short, the Department effectively reads the proviso out of § IV(e)(i).

But the most immediate problem with this reading is that it produces the wrong result on the Novell allegations. In its attempts to define the "product" IE, the Department consistently invokes the concept of "browser functionality." Department Br. at 10; Department Motion for Contempt, J.A. 1317-19; Department Reply Memorandum in Support of Motion for Contempt, J.A. 1424, 1429. But if functionality is the criterion of identity (which the Department asserts so as to claim that the "browser functionality" in Windows 95 is the same product as IE 4 for other operating systems), Windows 95 looks like a tie-in of two products (MS-DOS and Windows 3.11) that were sold separately in the market: it contains the functionalities of both. On the Department's reading, it should **[**34]** thus be prohibited unless Microsoft refrains from marketing MS-DOS separately. There is some suggestion that Microsoft has in fact continued to license MS-DOS separately, at least to end users. Microsoft Reply Br. at 1516. More significantly, the consent decree does not condition its approval of Windows 95 on Microsoft's marketing behavior with respect to MS-DOS. The failure to produce the right result when applied to Windows 95, one of the situations clearly resolved by the decree, is a fatal flaw. [9]

[35]** The interpretation that Microsoft advances most strongly suffers mirror-image defects: it lacks much logical sense and it fails to fit the decree's setting, the disposition of the Novell complaint. Microsoft stresses § IV(E)(i)'s

---

[9] In rejecting the Department's use of functionality here we do not mean to suggest that it is never an appropriate criterion of identity. In some contexts it may be appropriate to treat as equivalent two products that supply the same functionality, if they meet the same demand. Computer programs written for different operating systems, however, do not seem to meet the same demand, so that acceptance of functionality as a sufficient criterion of identity would lead to odd results. Here, of course, the decree's acceptance of Windows 95 as *a* "product" rebuts the Department's view of what is forbidden; one possible explanation might be that functionality works as an initial screen for defining products, but one that is trumped by the "integrated products" proviso.

"integrated products" proviso, saying that the addition of any feature to an operating system, as by simply putting the disk containing a compatible application in the same box with the operating system disk and requiring an OEM to install both, creates an integrated product--unless Microsoft **[*948]** also licenses the feature on a stand-alone basis "in the OEM channel."

This interpretation neatly matches the failure of the Department's theory to account for the permissibility of Windows 95: Microsoft's reading would provide zero relief to Novell, for it would allow Microsoft to bundle MS-DOS with Windows 3.11 as long as it did not license MS-DOS separately to OEMs. In short, the Department's reading does not permit Windows 95, and Microsoft's does not prohibit a bundle of Windows 3.11 and MS-DOS. Neither can be the correct interpretation of a provision that was intended to do both.

Curiously, in both parties' readings Microsoft's behavior determines the permissibility **[**36]** of conditioned licensing. This would be no defect if the behavior were in some way relevant to the economic principles of tie-ins. But it is not. The Department offers no theory as to how a seller's abstaining from separate marketing of the tied good might blunt the possible anticompetitive effects of bundling. [10] It seems especially beside the point where the goods are complements used in fixed proportions. A monopolist who ties two such goods has no obvious reason to market the tied good separately: since all buyers of the tying good will also take the tied good, the residual market for the tied good will be minimal. If the concern is that the tie-in makes it more difficult for competitors to enter the market for the *tying* good (because they must also offer the tied good), see *Grappone, Inc. v. Subaru of New England, 858 F.2d 792, 795-96 (1st Cir. 1988)* (Breyer, J.), separate marketing of the tied good actually mitigates the posited harm by facilitating new entry into the market for the tying good. Thus both readings allow legitimation by behavior that is either irrelevant or actively harmful.

[37]** We think it quite possible, however, to find a construction of § IV(E)(i) that is consistent with the antitrust laws and accomplishes the parties' evident desires on entering the decree. The Department and DG IV were concerned with the alleged anticompetitive effects of tie-ins. Microsoft's goal was to preserve its freedom to design products that consumers would like. Antitrust scholars have long recognized the undesirability of having courts oversee product design, and any dampening of technological innovation would be at crosspurposes with ***antitrust law***. Thus, a simple way to harmonize the parties' desires is to read the integration proviso of § IV(E)(i) as permitting any genuine technological integration, regardless of whether elements of the integrated package are marketed separately.

This reading requires us, of course, to give substantive content to the concept of integration. We think that an "integrated product" is most reasonably understood as a product that combines functionalities (which may also be marketed separately and operated together) in a way that offers advantages unavailable if the functionalities are bought separately and combined by the purchaser.

The point **[**38]** of the test is twofold and may be illustrated by its application to the paradigm case of the Novell complaint and the subsequent release of Windows 95. First, "integration" suggests a degree of unity, something beyond merely placing disks in the same box. If an OEM or end user (referred to generally as "the purchaser") could buy separate products and combine them himself to produce the "integrated product," then the integration looks like a sham. If Microsoft had simply placed the disks for Windows 3.11 and MS-DOS in one package and covered it with a single license agreement, it would have offered purchasers nothing they could not get by buying the separate products and combining them on their own. [11]

---

[10] The hospital in *Jefferson Parish* surely did not offer the tied good (anesthesia) separately from the tying good (surgery), but this fact played no role in the Court's decision.

[11] The same analysis would apply to peripherals. If, for example, Microsoft tried to bundle its mouse with the operating system, it would have to show that the mouse/operating system package worked better if combined by Microsoft than it would if combined by OEMs. This is quite different from showing that the mouse works better with the operating system than other mice do. Compare Sep. Op. at 1-2. See X Areeda, Elhauge & Hovenkamp, ***Antitrust Law*** P 1746b. Problems seem unlikely to arise with peripherals, because their physical existence makes it easier to identify the act of combination. It seems unlikely that a plausible

[39]** **[*949]** Windows 95, by contrast, unites the two functionalities in a way that purchasers could not; it is not simply a graphical user interface running on top of MS-DOS. Windows 95 is integrated in the sense that the two functionalities--DOS and graphical interface--do not exist separately: the code that is required to produce one also produces the other. Of course one can imagine that code being sold on two different disks, one containing all the code necessary for an operating system, the other with all the code necessary for a graphical interface. But as the code in the two would largely overlap, it would be odd to speak of either containing a discrete functionality. Rather, each would represent a disabled version of Windows 95. The customer could then "repair" each by installing them both on a single computer, but in such a case it would not be meaningful to speak of the customer "combining" two products. Windows 95 is an example of what Professor Areeda calls "physical or technological interlinkage that the customer cannot perform." X Areeda, Elhauge & Hovenkamp, ***Antitrust Law*** § 1746b at 227, 228 (1996).

So the combination offered by the manufacturer must be different from what the purchaser could **[**40]** create from the separate products on his own. The second point is that it must also be better in some respect; there should be some technological value to integration. Manufacturers can stick products together in ways that purchasers cannot without the link serving any purpose but an anticompetitive one. The concept of integration should exclude a case where the manufacturer has done nothing more than to metaphorically "bolt" two products together, as would be true if Windows 95 were artificially rigged to crash if IEXPLORE.EXE were deleted. Cf. *ILC Peripherals Leasing Corp. v. International Business Machines Corp., 448 F. Supp. 228, 233 (N.D. Cal. 1978)* ("If IBM had simply bolted a disk pack or data module into a drive and sold the two items as a unit for a single price, the 'aggregation' would clearly have been an illegal tying arrangement.") *aff'd per curiam sub nom.* *Memorex Corp. v. International Business Machines Corp., 636 F.2d 1188 (9th Cir. 1980)*; X Areeda, Elhauge & Hovenkamp, ***Antitrust Law*** P 1746 at 227 (discussing literal bolting). Thus if there is no suggestion that the product is superior to the purchaser's combination in some respect, it cannot be deemed integrated. [12]

[41]** It might seem difficult to put the two elements discussed above together. If purchasers cannot combine the two functionalities to make Windows 95, it might seem that there is nothing to test Windows 95 against in search of the required superiority. But purchasers can combine the functionalities in their stand-alone incarnations. They can install MS-DOS and Windows 3.11. The test for the integration of Windows 95 then comes down to the question of whether its integrated design offers benefits when compared to a purchaser's combination of corresponding stand-alone functionalities. The decree's evident embrace of Windows 95 as a permissible single product can be taken as manifesting the parties' agreement that it met this test.

The short answer is thus that ***HN12***[] integration may be considered genuine if it is beneficial when compared to a purchaser combination. But we do not propose that in making this inquiry the court should embark on product design assessment. In ***antitrust law***, from which this whole proceeding springs, the courts have recognized the limits of their institutional competence and have on that ground rejected theories of "technological tying." A court's evaluation of a claim **[**42]** of integration **[*950]** must be narrow and deferential. [13] As the Fifth Circuit put it, "Such a violation must be limited to those instances where the technological factor tying the hardware to the software has been designed for the purpose of tying the products, rather than to achieve some technologically beneficial result. Any other conclusion would enmesh the courts in a technical inquiry into the justifiability of product innovations." *Response of Carolina, Inc. v. Leasco Response, Inc., 537 F.2d 1307, 1330 (5th Cir. 1976)*.

claim could be made that a mouse and an operating system were integrated in the sense that neither could be said to exist separately. An operating system used with a different mouse does not seem like a different product. But Windows 95 without IE's code will not boot, J.A. 1623, and adding a rival browser will not fix this. If the add/remove utility is run to hide the IE 4 technologies, Windows 95 reverts to an earlier version, OEM service release ("OSR") 2.0. J.A. 1660-61.

[12] Thus of course we agree with the separate opinion that "commingling of code … alone is not sufficient evidence of true integration." Sep. Op. at 4. Commingling for an anticompetitive purpose (or for no purpose at all) is what we refer to as "bolting."

[13] The separate opinion seems to take this reluctance to engage in the evaluation of product design as deference to Microsoft's interpretation of the consent decree. See Sep. Op. at 2-3. It is nothing of the sort. We defer to neither party in interpreting the consent decree; in fact, we reject both parties' readings. We suggest here only that the limited competence of courts to evaluate high-tech product designs and the high cost of error should make them wary of second-guessing the claimed benefits of a particular design decision.

[43]** In fact, Microsoft did, in negotiations, suggest such an understanding of "integrated." In response to the Department and DG IV's statement of concern about tying, it asserted its right to "continue to develop integrated products like [Windows 95] *that provide technological benefits to end users.*" J.A. 756 (emphasis added). Microsoft later withdrew this qualifying phrase, J.A. 760, in order, it claims, to avoid the application of "vague or subjective criteria"--though why the absence of criteria should cure a vagueness problem is unclear. But we do not think that removing the phrase can drain the word "integrated" of all meaning, and we do not accept the suggestion that the Department and DG IV bargained for an "integrated products" proviso so boundless as to swallow § IV(E)(i). Significantly, Microsoft assured the Department and DG IV that the elimination of the qualifying phrase "did not represent a substantive change." J.A. 761.

We believe this understanding is consistent with tying law. The Court in *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*, for example, found parts and service separate products because sufficient **[**44]** consumer demand existed to make separate provision efficient. See *id. at 462*. But we doubt that it would have subjected a self-repairing copier to the same analysis; i.e., the separate markets for parts and service would not suggest that such an innovation was really a tie-in. (The separate opinion, we take it, makes roughly the same point by its observation about digital cameras. See Sep. Op. at 3-4.) Similarly, Professor Areeda argues that new products integrating functionalities in a useful way should be considered single products regardless of market structure. See X Areeda, Elhauge & Hovenkamp, ***Antitrust Law*** P 1746b. [14]

We emphasize that this analysis does not require a court to find that an integrated product is superior to its stand-alone rivals. See *ILC Peripherals Leasing Corp. v. International Business Machines Corp., 458 F. Supp. 423, 439 (N.D. Cal. 1978)* ("Where there **[**45]** is a difference of opinion as to the advantages of two alternatives which can both be defended from an engineering standpoint, the court will not allow itself to be enmeshed 'in a technical inquiry into the justifiability of product innovations.'") (quoting *Leasco, 537 F.2d at 1330*), *aff'd per curiam sub nom. Memorex Corp. v. IBM Corp., 636 F.2d 1188 (9th Cir. 1980)*. We do not read § IV(E)(i) to "put[] judges and juries in the unwelcome position of designing computers." IX Areeda, ***Antitrust Law*** P 1700j at 15 (1991). The question is not whether the integration is a *net* plus but merely whether there is a plausible claim that it brings some advantage. Whether or not this is the appropriate test for ***antitrust law*** generally, we believe it is the only sensible reading of § IV(E)(i).

On the facts before us, Microsoft has clearly met the burden of ascribing facially plausible benefits to its integrated design as compared to an operating system combined with a stand-alone browser such as Netscape's Navigator. [15] **[**47]** Incorporating browsing **[*951]** functionality into the operating system allows applications to avail themselves of that functionality without starting up a separate browser **[**46]** application. J.A. 944, 965. [16] Further,

---

[14] The antitrust question is of course distinct. The parties agree that the consent decree does not bar a challenge under the Sherman Act.

[15] This issue is peripheral on the Department's interpretation of § IV(E)(i), and the Department may not have contested it as vigorously as it might. The guidance this opinion seeks to provide is limited to setting out the legal framework for analysis. The ultimate sorting out of any factual disputes is a different question, and one we of course cannot resolve on the limited record before us.

[16] It is possible, of course, for applications vendors to bring about this Microsoft-created integration by distributing IE with their applications, which is apparently a relatively common practice. See J.A. 953, 966. Distribution by application vendors does not affect the conclusion that the integrated *design* brings benefits, nor does it suggest that IE has an existence apart from Windows 95. The consequence of this practice is simply that such applications upgrade the purchaser's operating system to the Windows 95/IE level. The customer's act of installing the application implements Microsoft's prior integration of IE into Windows 95.

The record also suggests that there are some inefficiencies associated with application vendors' redistribution of IE code. Application vendors' affidavits assert that if the browser is installed in computers before sale, "installation of our product is faster, we have reduced product support issues, the perceived footprint (memory use) of our product is smaller, and in general customer perception of our product is better." J.A. 953, 966. Although the drawbacks of installation by applications vendors can be alleviated by OEMs' preinstalling an integrated operating system containing IE technologies, the drawbacks are not necessary consequences of a standalone design, but rather incidental costs of a particular method of bringing about the benefits components of IE 3.0 and even more IE 4-especially the HTML reader--provide system services not directly related to Web browsing, enhancing the functionality of a wide variety of applications. J.A. 607-22, 1646-48. Finally, IE 4 technologies are used to upgrade some aspects of the operating system unrelated to Web browsing. For example, they are used to let users customize their "Start" menus, making favored applications more readily available. J.A. 490-95; 1662-64. They also make possible "thumbnail" previews of files on the computer's hard drive, using the HTML reader to display a richer view of the files' contents. J.A. 1664-69. Even the Department apparently concedes that integration of functionality into the operating system can bring benefits; responding to a comment on the proposed 1994 consent decree (which the Department published in the Federal Register as required by the Tunney Act), it stated that "a broad injunction against such behavior generally would not be consistent with the public interest." *59 Fed. Reg. 59426, 59428* (Nov. 17, 1994).

[48]** The conclusion that integration brings benefits does not end the inquiry we have traced out. It is also necessary that there be some reason Microsoft, rather than the OEMs or end users, must bring the functionalities together. See X Areeda, Elhauge & Hovenkamp, ***Antitrust Law*** P 1746b at 227; P 1747 at 229. Some more subtleties emerge at this stage, parallel to those encountered in determining the integrated status of Windows 95. Microsoft provides OEMs with IE 4 on a separate CD-ROM (a fact to which the Department attaches great significance). It might seem, superficially, that the OEM is just as capable as Microsoft of combining the browser and the operating system.

But the issue is not which firm's employees should run particular disks or CD-ROMs. A program may be provided on three disks--Windows 95 certainly could be--but it is not therefore three programs which the user combines. Software code by its nature is susceptible to division and combination in a way that physical products are not; if the feasibility of installation from multiple disks meant that the customer was doing the combination, no software product could ever count as integrated. The idea that in installing IE 4 an OEM is combining **[**49]** two stand-alone products is defective in the same way that it would be nonsensical to say that an OEM installing Windows 95 is itself "combining" DOS functionality and a graphical interface. As the discussion above indicates, IE 3 and IE 4 add to the operating system features that cannot be included without also including browsing functionality. See J.A. 1661-68. Thus, as was the case with Windows 95, the products--the full functionality of the operating system when upgraded by IE 4 and the "browser functionality" of IE **[*952]** 4-do not exist separately. [17] **[**50]** This strikes us as an essential point. If the products have no separate existence, it is incorrect to speak of the purchaser combining them. Purchasers who end up with the Windows 95/IE package may have installed code from more than one disk; they may have taken the browser out of hiding; [18] they may have upgraded their operating system--indeed, Netscape characterizes the installation of IE 4 as "really an OS [operating system] upgrade." J.A. 589. But they have not combined two distinct products.

What, then, counts as the combination that brings together the two functionalities? Since neither fully exists separately, we think the only sensible answer is that the act of combination is the creation of the design that knits the two together. OEMs *cannot* do this: if Microsoft presented them with an operating system and a stand-alone browser application, rather than with the interpenetrating design of Windows 95 and IE 4, the OEMs could **[**51]**

---

of integration, namely, distribution of code by applications vendors. Thus they are not relevant to our comparison of the stand-alone and integrated designs.

[17] Our colleague's separate opinion suggests that IE may be separated from Windows 95 by treating some or all of the code that supplies operating system functionality as part of the operating system. Sep. Op. at 15. But apart from that code, there is nothing more to IE than the four lines of programming required to summon browsing functionality from code that also supplies operating system functionality. J.A. 1654. Those four lines look more like a key to opening IE than anything that could plausibly be considered IE itself.

[18] The preliminary injunction, as construed by the parties' later stipulation, treats Microsoft as in compliance if it allows the options of (1) running the Add/Remove Programs utility with respect to IE 3.x and (2) removing the IE icon from the desktop and from the Programs list in the Start menu and marking the file IEXPLORE.EXE "hidden." See above at p. 7. The injunction's evidently unique status as a remedy for a "tying" complaint, requiring the defendant merely to allow an intermediary to hide the allegedly tied product, suggests the oddity of treating as separate products functionalities that are integrated in the way that Windows 95 and IE are.

not combine them in the way in which Microsoft has integrated IE 4 into Windows 95. They could not, for example, make the operating system use the browser's HTML reader to provide a richer view of information on the computer's hard drive, J.A. 1665--not without changing the code to create an integrated browser. This reprogramming would be absurdly inefficient. Consequently, it seems clear that there is a reason why the integration must take place at Microsoft's level. This analysis essentially replays our comparison of Windows 95 to a bundle of MS-DOS and Windows 3.11 and concludes that the Windows 95/IE package more closely resembles Windows 95 than it does the bundle. The factual conclusion is, of course, subject to reexamination on a more complete record. On the facts before us, however, we are inclined to conclude that the Windows 95/IE package is a genuine integration; consequently, § IV(E)(i) does not bar Microsoft from offering it as one product.

* * *

A few words with respect to our colleague's separate opinion may clarify our position. Judge Wald suggests that "the prohibition and the proviso could reasonably be construed to state that Microsoft may offer an 'integrated' **[**52]** product to OEMs under one license only if the integrated product achieves synergies great enough to justify Microsoft's extension of its monopoly to an otherwise distinct market." Sep. Op. at 3. We are at a loss to understand how a section that (1) articulates a prohibition and (2) sets a limit on the reach of the prohibition [19] can be read to state a balancing test. Apart from the lack of textual support, we think that a balancing test that requires courts to weigh the "synergies" of an integrated product against the "evidence of distinct markets," Sep. Op. at 5, is not feasible in any predictable or useful way. Courts are ill equipped to evaluate the benefits of high-tech product design, [20] and even could they place **[*953]** such an evaluation on one side of the balance, the strength of the "evidence of distinct markets," proposed for the other side of the scale, seems quite incommensurable. Both *Jefferson Parish* and *Eastman Kodak* use their "distinct markets" analysis in a binary fashion: markets are distinct or they are not. See *466 U.S. at 21-22*; *504 U.S. 451 at 462*. If, as the record suggests, Microsoft proposed modification of the integration proviso because of concern about "vague **[**53]** or subjective criteria," J.A. 760, an interpretation requiring courts to weigh evidence that establishes distinctness (or does not) against a sliding scale of net synergistic value looks like the most total transvaluation one can imagine.

Institutional **[**54]** competence may not have been foremost in the parties' minds in drafting the consent decree, and judicial inability to apply a test does not ipso facto mean that the parties did not intend it. But if they did intend a balancing test, they kept that intent well hidden. Nothing in their contemporaneous conduct (or in the conduct of anyone, at any time) suggests that they contemplated a balancing inquiry. Windows 95 was not subjected to any such analysis, though the markets it unified were substantial and obviously distinct. J.A. 790-96. Indeed, one might think that an especially compelling case would be required to "justify Microsoft's extension of its monopoly," Sep. Op. at 3, via Windows 95. Windows 95 leveraged Microsoft's Windows 3.11 market power into the operating system market, where network externalities are most apparent. See *Microsoft, 56 F.3d at 1451*. According to the separate opinion, Windows 95 should have required the utmost justification. But nothing suggests that it was analyzed that way, and it seems more likely that it passed muster not because the synergies of its integration outweighed the evidence of distinct markets but because it was, simply, integrated.

The **[**55]** view expressed in the separate opinion seems sure to thwart Microsoft's legitimate desire to continue to integrate products that had been separate--and hence necessarily would have been provided in distinct markets. By its very nature "integration" represents a change from a state of affairs in which products were separate, to one in which they are no longer. By focusing on the historical fact of separate provision, the separate opinion puts a thumb on the scale and requires Microsoft to counterbalance with evidence courts are not equipped to evaluate. We do not

[19] The proviso may be read to do this either by clarifying the concepts of "Covered Product" and an "other product" to prevent an "integrated" product from constituting a forbidden duo, or by carving out an exception for integrated products even if they otherwise represent such a duo. We do not believe that the choice of approach makes a substantive difference.

[20] Our colleague seems to hint that one way to perform this evaluation is to examine whether the integrated product "overwhelms" the separate market. Sep. Op. at 10. But data on market performance will obviously not be available when the new product is introduced, and in any case, the overwhelming of the separate market is precisely what is feared and may simply indicate anticompetitive practices.

think that this makes sense in terms of the text of the consent decree, the evidence of the parties' intents, the values the decree was presumably intended to promote, or the competence of the judiciary.

* * *

At this stage, then, the Department has not shown a reasonable probability of success on the merits. Given this failure, there is no reason to allow the preliminary injunction to remain in effect pending a proper hearing, and we reverse the district court's grant.

V.

Though the proceedings below may continue, they must do so without the preliminary injunction. With respect to the continuation, Microsoft argues that **[**56]** the "blanket" reference to a special master violates Article III, and, in the alternative, that the case does not present the exceptional circumstances required under ***HN13***[] *Federal Rule of Civil Procedure 53(b)* [21] and *La Buy v. Howes Leather Co., 352 U.S. 249, 1 L. Ed. 2d 290, 77 S. Ct. 309 (1957)*, to justify a nonconsensual reference. Future developments may moot this problem. In view of our interpretation of the consent decree, tentative though it be, see *University of Texas v. Camenisch, 451 U.S. 390, 395, 68 L. Ed. 2d 175, 101 S. Ct. 1830 (1981)*; *Taylor v. FDIC, 328 U.S. App. D.C. 52, 132 F.3d 753, 766 (D.C. Cir. 1997)*, the Department may well regard further pursuit of the case as unpromising, especially given the alternate avenues **[*954]** developing in its recently launched separate attacks on Microsoft's practices, Nos. 98-1232 and 98-1233. But no such mooting has yet occurred. Accordingly, we address the questions of whether mandamus is available to correct the asserted illegality in the reference and, if so, whether it should issue in this case. We answer yes to both.

[57]** The Department claims that mandamus jurisdiction is lacking. Its primary theory is evidently that an unlawful reference can be reached by mandamus only if it is so outrageous as to fail to "comport[] with Article III." Supplemental Br. of United States 9. But *La Buy,* the Supreme Court's authoritative pass at the use of mandamus to correct illegal references, rests simply on the presence of "an abuse of [the judge's] power under *Rule 53(b)*," *352 U.S. at 256*, and on that abuse being "clear," *id. at 257*. To be sure, *La Buy* observed that the court of appeals there confronted a district court "practice" of freewheeling references to masters: "There is an end of patience." *Id. at 258*. But we have explicitly rejected the idea that mandamus is available only to correct "persistent disregard" of the limits on references. *In re Bituminous Coal Operators' Ass'n, 292 U.S. App. D.C. 309, 949 F.2d 1165, 1168 n.4 (D.C. Cir. 1991)*.

Of course it may be that the boundaries of *Rule 53(b)* and Article III are close, so that the *La Buy* Court, in addressing the *Rule 53* "exceptional conditions" criterion, was actually finding unconstitutional conduct. If true, this helps the **[**58]** Department not at all. If mandamus is available only to correct unconstitutional abdications of Article III power, but a clear abuse of discretion under *Rule 53* amounts to such an abdication, we may properly exercise mandamus jurisdiction if we find the same sort of clear abuse of discretion that the *La Buy* Court found.

It is objected that a challenge at the end of the proceeding provides ample remedy, and black-letter mandamus law tells us that such ***HN14***[] adequacy of remedy defeats mandamus. *In re Minister Papandreou, 139 F.3d 247, 1998 WL 163561* at *1 (D.C. Cir. 1998) (discussing mandamus criteria). See also *Stauble v. Warrob, Inc., 977 F.2d 690, 693 & n.4 (1st Cir. 1992)* (dictum to effect that "improvident" reference presents no danger of irreparable harm); *In re Thornburgh, 276 U.S. App. D.C. 184, 869 F.2d 1503, 1508 (D.C. Cir. 1989)* (reference to a master for purposes of determining relief is not an "abdication of the total judicial power" such as to justify mandamus). But the Court's action in *La Buy* appears necessarily to depend on the view that, at least at some point, even the temporary subjection of a party to a Potemkin jurisdiction so mocks the party's rights as to render **[**59]** end-of-the-line correction inadequate.

---

[21] The rule provides in relevant part: "A reference to a master shall be the exception and not the rule. In actions … to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it."

On the merits, the Department defends the reference on three grounds. First, it asserts that it falls within the wellrecognized category of references for purely remedial determinations, such as the accountings and computations of damages, which Rule 53(b) expressly permits. Second, it claims that the technological complexity of the case and need for speed constitute "exceptional conditions" under the Rule. And third, it says that the order contains an implicit reservation by the district court of a power of *de novo* review, and that that unstated reservation saves the order.

In saying that the reference was merely for purposes of supervising remediation the Department invokes the wellestablished tradition allowing use of special masters to oversee compliance. See generally *Apex Fountain Sales, Inc. v. Kleinfeld, 818 F.2d 1089, 1097 (3d Cir. 1987)* (citing cases). But this is not such a situation. The issue here is interpretation, not compliance; the parties' rights must be determined, not merely enforced. The matters referred to the master are no more "remedial" than would be those of any total referral of a contract case. The concern **[**60]** about nonconsensual references turns on the determination of rights, not on a formalistic division of the juridical universe into pre-trial, trial and post-trial. It is for this reason that special masters may not decide dispositive pretrial motions. See *In re United States, 816 F.2d 1083, 1090 (6th Cir. 1987)*.

The Department also proposes that this is a case of such technological complexity as to be "exceptional." So far as the *meaning* of the consent decree is concerned, that **[*955]** is clearly false; the words are in plain English, and if their meaning is not clear it is not because of some deep technological issue but because of uncertainties in the purposes of the parties that drafted the decree, the sort of uncertainties that pervade contract actions. As for *application* of that meaning, we have just stated our interpretation, an interpretation that we regard as grounded, as are the related antitrust doctrines, in a realistic assessment of the institutional limits of the judiciary. Application of our reading of § IV(E)(i) does not require a software expert; it precludes Microsoft from any purely artificial "bolting" of functionalities but is otherwise deferential to entrepreneurs' **[**61]** product design choices. [22]

More broadly, if *La Buy* was not complex, with its six defendants and nearly 100 plaintiffs (87 in one suit, six in another), 27 pages of docket entries in one of the cases for preliminary pleas and motions, over 50 depositions, and intricate charges of monopolization and Robinson-Patman violations, *352 U.S. at 251-52*, we see no reason to think of this case as especially complicated. In fact, it is very doubtful that complexity tends to legitimate references to a master at all. *La Buy* noted that the complexity of an antitrust **[**62]** case, rather than justifying a reference, "is an impelling reason for trial before a regular, experienced trial judge rather than before a temporary substitute appointed on an *ad hoc* basis and ordinarily not experienced in judicial work." *Id. at 259*.

Thus the only remaining question is whether some implicit district court reservation of a power of *de novo* review of the special master's report, as to both fact and law, could save the reference. First, we find no such implied reservation. The order itself recites that "the Special Master shall receive evidence and legal authority presented by the parties at such times and places, and in such manner as he shall prescribe, and shall *propose* findings of fact and conclusions of law for consideration by the Court on the issues raised by this case." J.A. 1301 (emphasis added). The Department suggests that the use of "propose" is somehow helpful, and distinguishes the reference from that in *Bituminous Coal,* which invited "*recommended* findings of fact and conclusions of law." *949 F.2d at 1166* (emphasis added). The difference in wording is immaterial, and in any event a special master's findings and conclusions are **[**63]** *always* advisory. Thus, even if we thought that a reservation of *de novo* review could save the reference we would have to vacate it, subject to possible re-issuance with an unequivocal commitment to non-deferential review. But we think, in fact, that no such rescue mechanism is available.

Microsoft notes ***HN15***[↑] *Rule 53(e)(2)*'s instruction that in non-jury trials, "the court *shall* accept the master's findings of fact unless clearly erroneous." (emphasis added). It reads this, as have courts and commentators, as making deferential review mandatory. See, e.g., *Williams v. Lane, 851 F.2d 867, 884 (7th Cir. 1988)*; *Apex*

---

[22] To the extent that adjudication may lead the court into deep technological mysteries, we note the court's power under Rule of Evidence 706 to appoint expert witnesses. Whether such an expert is appointed by agreement of the parties or not, the expert's exposure to cross-examination by both sides, see Rule 706(a), makes the device a far more apt way of drawing on expert resources than the district court's unilateral, unnoticed deputization of a vice-judge.

Fountain, 818 F.2d at 1097; *In re Crystal Palace Gambling Hall, 817 F.2d 1361, 1364 (9th Cir. 1987)*; *In re United States, 816 F.2d at 1087, 1088*; 9A Charles A. Wright & Arthur R. Miller, *Federal Practice & Procedure* § 2605 at 670 (1995).

The Department counters with a footnote from *Stauble* to the effect that a district court may refer fundamental issues of liability if he affords *de novo* review. *977 F.2d at 698 n.13*. But compare *id. at 698 n.12* (explaining that, because the parties have agreed that if the reference were constitutionally **[**64]** deficient the remedy would be remand for a full trial before the district court, the court will leave for "another day" the possibility that a master's findings on liability might "perhaps be salvaged, even after appeal, by having the district court conduct a deeper, more participatory sort of review."). At most, however, the thought reflected in the *Stauble* footnote might save a reference from invalidation under the *Constitution;* **[*956]** that possibility would do little to make it any less the sort of clear abuse of discretion that is fatal under *La Buy.* The same is equally true of the observation in *United States v. Raddatz, 447 U.S. 667, 683 n.11, 65 L. Ed. 2d 424, 100 S. Ct. 2406 (1980)*, saying that the Court itself, in the exercise of its original Article III jurisdiction, acts on the basis of special masters' reports. Clearly that practice tells us nothing about the presence of a clear abuse of discretion under *Rule 53(b)*.

We note some ambiguity on this point in our decision in *Bituminous Coal.* Our concluding directive told the judge to "revise his order of reference … and to decide *de novo,* without deferring to a special master, all potentially dispositive **[**65]** questions of fact or law." *949 F.2d at 1169*. The Department thinks that this implicitly endorsed the possibility of a non-deferential reference. We think not. In *Bituminous Coal* we rejected the coal operators' suggestion that "*any* unconsented-to reference would constitute an abuse of judicial power," *id.* (emphasis added), but our rejection of that broad claim was based *not* on variations in scope of district court review but on our endorsement of the established and legitimate practice of using unconsented-to references for pretrial preparation or for implementation of remedies, *id.* And in the introductory summary of our disposition we said that the judge must "revise the order of reference to reserve for himself, and not delegate to the special master, the core function of making dispositive rulings, including findings of fact and conclusions of law on issues of liability." *Id. at 1166*. In short, when we said in *Bituminous Coal* that we were granting the writ "not because the district judge simply abused his discretion, but because he has no discretion to impose on parties against their will 'a surrogate judge,' " *id. at 1168* (citations omitted), we effectively **[**66]** ruled out nonconsensual references in nonjury cases except as to peripheral issues such as discovery and remedy. Compare *In re Armco, Inc., 770 F.2d 103, 105 (8th Cir. 1985)* ("Beyond matters of account, difficult computation of damages, and unusual discovery, it is difficult to conceive of a reference of a nonjury case that will meet the rigid standards of the *La Buy* decision.") (internal quotations omitted).

In short, finding the case devoid of anything remotely "exceptional" within the meaning of *Rule 53(b)*, we believe the reference to a master must be vacated. We do not, accordingly, reach Microsoft's claims that the specific referee is biased or has conducted the proceedings on referral improperly.

VI.

The preliminary injunction was issued without adequate notice and on an erroneous reading of § IV(E)(i) of the consent decree. We accordingly reverse and remand. The reference to the master was in effect the imposition on the parties of a surrogate judge and either a clear abuse of discretion or an exercise of wholly non-existent discretion. We grant mandamus to vacate the reference.

So ordered.

Concur by: WALD (In Part)

Dissent by: WALD (In Part)

Dissent

WALD, Circuit Judge, **[**67]** concurring in part and dissenting in part: I depart from my colleagues only as to their interpretation of the consent decree, which I believe unnecessarily narrows the scope of the inquiry that the district court may conduct on remand. First, the majority opinion appears to decide that there is only one reasonable interpretation of section IV(E)(i), notwithstanding the fact that we are remanding for further factual development that may well be relevant to the most faithful interpretation of the section. Second, although the majority claims to have rooted its interpretation in ***antitrust law*** in accordance with the intent of the parties, it interprets section IV(E)(i) in a way that is, in fact, inconsistent with at least some governing precedent. For these reasons, I write separately to suggest that there may be an interpretation of section IV(E)(i) more consonant with the intent of the drafters and the weight of ***antitrust law***. If facts are found on remand to support such an alternative interpretation, it should not be foreclosed by the majority opinion.

Under the majority's interpretation, the proviso of section IV(E)(i), which says that **[*957]** section IV(E)(i) "in and of itself shall not **[**68]** be construed to prohibit Microsoft from developing integrated products," is too safe a harbor with too easily navigable an entrance: So long as Microsoft has created a design to combine functionalities in a way that offers the ultimate user some "plausible" advantage otherwise unavailable, Microsoft may require OEMs to install the resulting creation in its entirety, without fear of running aground on the main prohibition of section IV(E)(i) (which prohibits Microsoft from entering into any license agreement "in which the terms of that agreement are expressly or impliedly conditioned upon" the licensing of any "other product"). To my mind, this reading does not impose nearly enough scrutiny on "integration" and renders the central prohibition of section IV(E)(i) largely useless. *Cf.* *Beal Mortgage, Inc. v. FDIC, 328 U.S. App. D.C. 30, 132 F.3d 85, 88 (D.C. Cir. 1998)* (noting the "cardinal interpretive principle that we read a contract to give meaning to all of its provisions and to render them consistent with each other") (internal quotation omitted). The majority's interpretation would not, for example, appear to prevent Microsoft from requiring OEMs to license the right to sell computer peripherals (**[**69]** *e.g.,* mice) as a condition of licensing Windows 95 so long as Microsoft had the prescience to include code in Windows 95 that made the cursor more responsive to the enduser's touch than it would be with other mice. I think the majority would agree, however, that under any reasonable reading of section IV(E)(i), the tying of mice to Windows 95 would clearly be prohibited. [1] I fail to see why the analysis should be so different for software than for peripherals or why our "evaluation of a claim of integration must be [any more] narrow and deferential," Maj. Op. at 25, for software than for other computer-related products. *See, e.g., Firestone Tire & Rubber Co. v. Bruch, 489 U.S. 101, 112, 103 L. Ed. 2d 80, 109 S. Ct. 948 (1989)* (courts construe contractual provisions "without deferring to either party's interpretation"). Our role, after all, is to interpret the consent decree as we would a contract: in a manner that is "grounded in the text of the agreement and contemporaneous understandings of its purposes, not in our own conception of wise policy." *United States v. Western Elec. Co., Inc., 269 U.S. App. D.C. 436, 846 F.2d 1422, 1427 (D.C. Cir. 1988)*.

---

[1] The majority asserts that if Microsoft tried to bundle its mouse with the operating system, "it would have to show that the mouse/operating system package worked better if combined by Microsoft than it would if combined by OEMs," a test that is "different from showing that the mouse works better with the operating system than other mice do." Majority Opinion ("Maj. Op.") at 23 n.11. But this seems to me to misstate the majority's own test, which asserts that "the act of combination is the creation of the design that knits the two together" and not which firm's employees effect the physical combination. *Id. at 28-30*. If this is the case, then the majority's test would consider whether the design that "knits together" Microsoft's mouse and the operating system offers advantages unavailable through the combination of a competitor's mouse and the operating system. This is, I think, a standard easily met. For instance, Microsoft could develop a mouse with a patented, modestly useful feature, design its operating system to work best when used with a mouse that had this feature, and then require OEMs to buy the two products together. The mouse and the operating system would qualify as integrated under the majority's test. The majority says that IE 4.0 and Windows 95 are integrated because the "full functionality of the operating system when upgraded by IE 4 and the 'browser functionality' of IE 4 … do not exist separately." *Id. at 29*. Likewise, the full functionality of the patented mouse and Microsoft's mouse-friendly operating system would not exist separately; the two would be designed for each other, and their full functionality would only exist when combined. Thus, under the majority's test, Microsoft would have avoided the effect of section IV(E)(i) altogether, even if its patented mouse was of little extra value to the user. I would not think that the proviso was intended to swallow the consent decree in this way.

[70]** Another--some might say more--reasonable reading of section IV(E)(i) would give much greater weight to the main prohibition of the section. On its face, that prohibition forbids Microsoft from requiring OEMs to accept under one agreement any offering that is in reality two products: a "Covered Product" and, for purposes of this case, an "other product." The proviso, on the other hand, permits Microsoft to develop and license "integrated" products. [2] Read together, I think the prohibition and the proviso **[*958]** could reasonably be construed to state that Microsoft may offer an "integrated" product to OEMs under one license only if the integrated product achieves synergies great enough to justify Microsoft's extension of its monopoly to an otherwise distinct market.

As I explain below, and as I read the majority opinion to agree, the consent **[**71]** decree was drafted against a backdrop of ***antitrust law***. Under ***antitrust law***, two products are considered distinct if there exists "sufficient consumer demand so that it is efficient for a firm to provide [the first product] separately from [the second]." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 462, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. The difficulty in this case is that technological evolution can change the boundaries of what is "efficient." For example, *Eastman Kodak* cites cameras and film as examples of two functionally linked products for which there exist separate markets. *See* *id. at 463*. But ***antitrust law*** presumably would not bar the development of digital cameras, which do not require film in any conventional sense.

Thus, ***antitrust law*** cannot avoid determining whether a particular technological development has occurred because it is efficient or merely because it permits a monopolist to extend its monopoly to a new market. Software code is a particularly stark example of why such analysis is essential if antitrust concepts are to survive at all. Here, the majority effectively exempts software products from antitrust analysis by **[**72]** stating that "software code by its nature is susceptible to division and combination in a way that physical products are not." Maj. Op. at 28. But this to me is an argument for closer, rather than more relaxed, scrutiny of Microsoft's claims of integration. An operating-system designer who wished to turn two products into one could easily commingle the code of two formerly separate products, arranging it so that "Windows 95 without IE's code will not boot," *id. at 23 n.11*, so that Windows 95 without Internet Explorer would "represent a disabled version of Windows 95," *id. at 23*, and so that Internet Explorer instructs the Add/Remove function to leave so much of that program in place that "four lines of programming" will suffice to activate it, *see* *id. at 29 n.17*. This is not to say that commingling of code is *per se* pernicious or even suspicious. Rather, the point is that commingling alone is not sufficient evidence of true integration; the courts must consider whether the resulting product confers benefits on the consumer that justify a product's bridging of two formerly separate markets.

Although this task is difficult, it is by no means the impossible project that **[**73]** the majority suggests. As I explain below, traditional antitrust analysis, and the usual methods of the law, provide the courts with a range of ways to address the ultimate question of efficiency. *See, e.g., PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811, 817 (6th Cir. 1997)*, *cert. denied*, *138 L. Ed. 2d 195, 117 S. Ct. 2434 (1997)* (citation omitted) ("While we are mindful of the various efficiency gains that can accrue to both suppliers and consumers from bundling certain products together, we are confident that the antitrust laws provide the tools to distinguish between meritorious and non-meritorious claims."). As I see it, the efficiency calculus takes two factors into account. The first is evidence that there are real benefits to the consumer associated with integrating two software products; I call these benefits "synergies." [3] The second is independent evidence, of the type that is usually employed in antitrust analysis, that a genuine market exists for the two products provided separately. For example, Windows 95 includes a **[*959]** built-

[2] The proviso states only that Microsoft is permitted to "develop" integrated products, but the parties agree that "develop" should not be limited to mere research and development.

[3] The majority questions the institutional competence of the courts to judge the level of synergy provided by an "integrated" product. *See* Maj. Op. at 25. By no means do I endorse routine judicial intervention in the details of product design. But I also do not endorse (as the majority comes close to doing) judicial abdication in the face of complexity. The courts are certainly capable of determining whether a particular integration offers any synergistic benefits at all and whether these benefits are minimal, significant, or great. As this is a factual determination, they may be guided in this effort by, for example, affidavits, consumer surveys, and other evidence presented by the parties as well as testimony from experts selected by the parties or by the court. Certainly this approach is preferable to the majority's proposal, under which ***antitrust law*** surrenders to any bona fide assertion of a "plausible" benefit of integration.

in calculator program with relatively few functions. Although there may be few synergies associated with building this program into **[**74]** the operating system, there is also not likely to be much of a market for this program provided separately, and this factor must be taken into account. Market evidence of demand for independent products will spare the courts from the need to speculate in the abstract about considerations of efficiency.

[75]** Taken together, then, these two factors generate a balancing test. The greater the evidence of distinct markets, the more of a showing of synergy Microsoft must make in order to justify incorporating what would otherwise be an "other" product into an "integrated" whole. If the evidence of distinct markets is weak, then Microsoft can get by with a fairly modest showing (although perhaps not the minimal showing required by the majority). But if there are clearly two distinct markets, then Microsoft would need to demonstrate substantial synergies in order to compel OEMs to accept a new "integrated" product that bridges those markets. In other words, the decree does not purport to chill Microsoft's technological development of its products by prohibiting a product outright merely because it incorporates new features--the proviso makes clear that Microsoft is free to design such products and to market their benefits to OEMs such that OEMs overwhelmingly choose the new product over a competitor's product. [4] **[**76]** The proviso thus becomes a safe harbor only for those integrations in which the "other product" has been (legitimately) technologically subsumed in a greater whole. [5]

[77]** Thus, the real question for purposes of determining if a violation of the degree has taken place is whether a new combination of formerly separate functionalities still contains an "other product" or if the two functionalities have been legitimately blended, or "integrated," and so have lost their former identities and become one product to which the prohibition no longer applies. (This, of course, is a factual question to be explored on remand.) As I have already suggested, and as the majority agrees, given the context in which section IV(E)(i) arose, it is appropriate to look to ***antitrust law*** as a guide to determining when such integration occurs. Although the majority opinion claims that its construction is consistent with ***antitrust law***, *see* Maj. Op. at 22, it does not, in my view, give due weight to the Supreme Court's holding in *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80* ***[*960]*** *L. Ed. 2d 2 (1984)*, the leading guide to the separate product determination. [6] In *Jefferson Parish,* the Court

---

[4] During his tenure as special master in this case, Lawrence Lessig offered a similar, although not identical, interpretation of section IV(E)(i) in a letter that has been made part of the record in this appeal. *See* Letter from Lessig to Malone *et al.,* January 19, 1998 (asserting that the prohibition of section IV(E)(i) forbids only tying through contract; it does not, as the proviso makes clear, forbid tying through technological efforts). The fact that Professor Lessig has proposed this quite plausible alternate interpretation of section IV(E)(i) does not, of course, suggest that his interpretation is the only acceptable one--that is a matter for the proceedings on remand to determine.

[5] The majority expresses puzzlement as to how a section "that (1) articulates a prohibition and (2) sets a limit on the reach of the prohibition" can be read to state a balancing test. Maj. op. at 31. As I read section IV(E)(i), its application turns on distinguishing two products from a single, integrated product. The section surely requires that the product be *legitimately* integrated; otherwise, section IV(E)(i) would have no force. One plausible interpretation of the decree is that it refers the court to ***antitrust law*** to decide whether a product is legitimately integrated; in these circumstances, the antitrust analysis requires balancing. For my part, I am at a loss to understand how a consent decree that is clearly intended to limit Microsoft's conduct could be read to impose so little scrutiny of that conduct.

One might ask why, under my proposed reading, section IV(E)(i) contains a proviso at all. I think it possible that the proviso was intended, "in the intensely lawyered atmosphere surrounding this decree, to make assurance doubly sure," *United States v. Western Elec. Co., Inc., 304 U.S. App. D.C. 199, 12 F.3d 225, 238 (D.C. Cir. 1993)* (Williams, J., dissenting)--in other words, that it was a lawyerly redundancy. I do not think, however, that it is necessary to read the proviso as serving so limited a function. Under my reading, the proviso serves to clarify that the prohibition of section IV(E)(i) is not boundless--that a product is not barred simply because it contains new combinations of previously existing functionalities. The proviso thus functions to eliminate one possible reading of section IV(E)(i). Given that the proviso is cast in terms of interpretation-it says that section IV(E)(i) "shall not be construed" to bar integrated products--it is appropriate to accord it this limited, interpretive function.

[6] The majority rejects DOJ's contention that a product is separate if Microsoft so treats it, *see* Maj. Op. at 19-20, but it does not address the government's associated contention that a product is separate if ***antitrust law*** so treats it, *see* *id. at 19* (noting DOJ's citation of *Jefferson Parish*).

considered whether anesthesiological services, which a hospital had required patients to take only from certain anesthesiologists, were in fact separate **[**78]** products from the other services provided by the hospital or, rather, were part of what the hospital claimed was a "functionally integrated package of services." *Id. at 19*. In rejecting the hospital's argument that such a package did not involve a tying arrangement, the Court held that "the answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items." *Id.* Thus, the fact that the hospital provided "the space, equipment, maintenance, and other supporting services necessary to operate the anesthesiology department," purchased the necessary drugs and supplies, and furnished the required nursing personnel, *id. at 6*, did not prevent a finding of separateness, nor did the district court's conclusion that the hospital believed that a "closed system" anesthesiology department "resulted in the best quality of patient care." *Hyde v. Jefferson Parish Hosp. Dist. No. 2, 513 F. Supp. 532, 540 (E.D. La. 1981)*. In other words, despite the overlap between the services provided by the hospital and those provided by the anesthesiologist, and despite the claimed benefits **[**79]** of an "integrated" relationship, the Court held that the proper focus of analysis was whether the arrangement tied two distinct markets for products that are separate from the buyer's perspective. *See* *Jefferson Parish, 466 U.S. at 19-20* (citing *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*, and *Fortner Enters. v. United States Steel Corp., 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969))*. It is not clear to me why this analysis should be markedly less applicable in the technological context; indeed, the post-*Jefferson Parish* trend is to apply its test even in the technological realm. *See, e.g.,* *Allen-Myland, Inc. v. International Bus. Machs. Corp., 33 F.3d 194, 211-12 (3d Cir. 1994)* (computer parts and installation); *Service & Training, Inc. v. Data Gen. Corp., 963 F.2d 680, 684 (4th Cir. 1992)* (diagnostic software and maintenance/repair service); *Digidyne Corp. v. Data Gen. Corp., 734 F.2d 1336, 1339 (9th Cir. 1984)* (central processing units and operating system); *cf.* *Jefferson Parish, 466 U.S. at 25 n.42* ("In the past, we have refused to tolerate manifestly anticompetitive conduct simply because **[**80]** the health care industry is involved.").

The tying analysis is, of course, a pragmatic one. For example, no one would claim that tying law was violated by the practice of selling shoes in pairs despite the possible existence of some market for only left shoes (among those with only one foot, for example, or with differently sized feet). Likewise, it is in all likelihood not a tying violation for *Jefferson Parish*'s hospital to require that patients accept the hospital's receptionists (instead of bringing their own) and accept the cleaning services and meals provided in their rooms (instead of making other arrangements) and to charge patients for these services. This is so even though there might be a **[**81]** limited group of patients who would prefer to make their own arrangements for receptionists, cleaning, and meals. *Cf.* *Jefferson Parish., 466 U.S. at 22 n.36* (noting that the antitrust analysis might differ for "radiologists, pathologists, and other types of hospital-based physicians"); *see also* *Jack Walters & Sons Corp. v. Morton Bldg., Inc., 737 F.2d 698, 703 (7th Cir. 1984)* (noting that "the practice has been to classify a product as a single product if there are rather obvious economies of joint provision"). In the case of the shoes, the receptionist, and the cleaning, a judgment is made that the benefits of joint provision clearly predominate over what is undoubtedly a minimal separate market (if one can be said to exist at all). In the case of the anesthesiologist, by contrast, the Court found that the claimed benefits--24-hour anesthesiology coverage, **[*961]** flexible scheduling, and facilitation of work routine, professional standards, and equipment maintenance--were not sufficient to justify joint provision because there was a very substantial market for anesthesiologists' services and because these benefits could be achieved without the forced tie (by, for example, promoting **[**82]** the benefits of the hospital's anesthesiologists to patients and setting standards of compatibility). *See* *Jefferson Parish, 466 U.S. at 25 n.42*. Under this doctrine, then, an "integrated" product cannot simply be one where *some* benefit exists as a result of joint provision, since the hospital easily met this standard. Rather, "integration" must mean something more: a combination of functionalities in which the synergies created predominate over the existence of a separate market--in other words, where the benefits of the combination dissuade consumers from seeking and suppliers from providing the alleged "tied" product. [7]

---

[7] As to the majority's observation that a product is not "integrated" if OEMs could perform the integration equally well on their own, my only comment is that this is an obvious point, and I am unclear what it adds to the analysis. A synergy should only count as such if it has benefits that the purchaser could not achieve equally well on his own. For example, there are synergistic benefits to combining cookies and milk, but a consumer can achieve them perfectly well at home. Thus, a supermarket could not ordinarily invoke this synergy as a justification for requiring cookies and milk to be bought together.

[83]** This alternative interpretation of section IV(E)(i) also accommodates the majority's "paradigm" case. The mere provision of Windows 3.11 and DOS 6.22 as a single product may have created some benefits--reduction of transaction costs, guaranteed compatibility, and a single source of customer support services, for example. These benefits were not, however, enough to overwhelm the existence of a separate operating system market--indeed, the very presence of Novell's product as an operating system to be used with Windows 3.11 suggests the existence of such a market. *See, e.g.,* J.A. 845 (DG IV Statement of Objections) ("Such tying affects the competitive freedom of the licensee to find a better substitute or obtain better terms for the operating system to be used with Windows."). Windows 95, however, is a different matter. In that case, the whole is clearly greater than the sum of its parts--as the majority notes, "it is not simply a graphical user interface running on top of MS-DOS." Maj. Op. at 23. And it is clear on the present record that Microsoft, at least, understood Windows 95 to provide such benefits. *See, e.g.* J.A. 1101 (Microsoft's "Windows 95 Feature Review") ("When **[**84]** you first boot Windows 95 it is immediately apparent that the old world of Windows running on top of MS-DOS is no more."). Thus, the synergistic benefits appear to have been large enough so that it would have been reasonable for DOJ to agree to treat Windows 95 as an integrated product. [8]

The majority's interpretation, however, departs from this precedent by accepting any "plausible claim" that the combination (*i.e.,* the design) offers "some advantage." Maj. Op. at 26-27. Of course, both the majority's interpretation and my alternative proposal would discredit any specious claims of integration--Microsoft's **[**85]** claim that it could simply put two disks in the same box and claim integration, for example, *see* *id. at 21*, would hardly merit a second thought. But the majority's considerable deference to Microsoft's plausible claims of advantage, coupled with Microsoft's privileged knowledge of the inner workings of its operating system, barely raises the bar of section IV(E)(i) above ground level. It is difficult to imagine how Microsoft could not conjure up *some* technological advantage for any currently separate software product it wished to "integrate" into the operating system. [9] And for **[*962]** the majority, the chase ends there: Internet Explorer, it contends, shares code with the operating system in a way that other browsers do not, and therefore it is integrated. But the fact that parts of Internet Explorer share code with the operating system and thus with other applications should not end the analysis any more than did the fact that the anesthesiologists in *Jefferson Parish* shared hospital equipment and personnel with the hospital and its staff (or that the hospital could identify some minor practical benefits to requiring the use of only certain anesthesiologists). The analysis **[**86]** must also consider whether Internet Explorer is a separate product under ***antitrust law***, that is, whether "consumers differentiate between [Internet Explorer] and [Windows 95]" such that consumers desire to purchase--and hence that manufacturers desire to supply--a substitute for Internet Explorer from another manufacturer; in other words, whether there is "a distinct product market in which it is efficient to offer [the tied product] separately from [the tying product]." *Jefferson Parish, 466 U.S. at 22*; *see also* *Digidyne, 734 F.2d at 1339* ("the undisputed facts summarized in the district court's opinion establish that a demand existed for NOVA instruction set CPUs [central processing units] separate from defendant's RDOS [operating system], and that each element of the NOVA computer system could have been provided separately and selected separately by customers if defendant had not compelled purchasers to take both"). Whether such a market exists, and whether it is significant enough to outweigh the particular synergies associated with integrating IE 3.0 and/or IE

[8] The majority objects that there is no evidence that Microsoft and DOJ subjected Windows 95 to a balancing analysis. Maj. Op. at 31-32. Because of the procedural posture of this case, however, there is little evidence of any kind in the record as to what the parties to the consent decree intended. There is certainly no indication that Microsoft and DOJ subjected Windows 95 to the majority's minimal test.

[9] The majority's test would seem to permit Microsoft to "integrate" word-processing programs, spreadsheets, financialmanagement software, and virtually any other now-separate software product into its operating system by identifying some minimal synergy associated with such "integration." In effect, the majority has fashioned a broad exemption from the antitrust laws for operating system design, apparently because an operating system is not like a peripheral, whose "physical existence makes it easier to identify the act of combination." Maj. Op. at 23 n.11. Surely, however, physical existence cannot serve as a limitation to the application of ***antitrust law***--the provision of services, for example, is a mutable "product" without tangible existence and yet has often been the subject of antitrust analysis. *See, e.g.,* *Jefferson Parish, 466 U.S. 2, 80 L. Ed. 2d 2, 104 S. Ct. 1551* (anesthesiological services); *Allen-Myland, 33 F.3d 194* (installation of computer parts); *Service & Training, 963 F.2d 680* (computer maintenance and repair services).

4.0 into Windows 95, is, of course, a factual determination within the province of the district court. **[**87]** Relevant indicators in the market analysis, however, would surely include (1) whether manufacturers of other operating systems require OEMs to include a particular browser, *see, e.g., Jefferson Parish, 466 U.S. at 23 n.39* (noting that "other hospitals often permit anesthesiological services to be purchased separately"); X AREEDA, ***ANTITRUST LAW*** P 1746, at 225 (1996) (suggesting comparison of alleged tie with practices in analogous competitive markets); (2) whether Microsoft's own actions reflect a perception of a competitive market for "Internet Explorer" separate from the market for Windows 95, *see, e.g., AllenMyland, 33 F.3d at 208-09* (noting probative value of internal reports in determining distinct product markets); and even (3) the very existence of competitor browser manufacturers, *see, e.g., Eastman Kodak, 504 U.S. at 462* (noting that "the development of the entire high-technology service industry is evidence of the efficiency of a separate market for service"). The majority opinion, however, relies on none of these considerations. By discounting the relevance of such analysis, the majority in fact shorts traditional ***antitrust law***.

[88]** Despite the plausibility of this alternative interpretation, the extent to which ***antitrust law*** was intended to inform the interpretation of the decree--specifically the interpretation of the terms "integrated product" and "other product"--is another question best left open to the district court on remand. Everyone agrees, I believe, that section IV(E)(i) of the decree is ambiguous--indeed, had it been unambiguous, the district court could have fished or cut bait, *i.e.,* it could have determined either that Microsoft's actions constituted contempt or that they did not violate the decree at all. Thus, I do not read the majority opinion to say at any point that there is a plain meaning of section IV(E)(i) that can be located in the text alone. To the contrary, we are relegated to ordinary principles of contract law: searching for the parties' intent and guided in that adventure by "conventional 'aids to construction,' including **[*963]** the 'circumstances surrounding the formation of the consent order, any technical meaning words used may have had to the parties, and any other documents expressly incorporated in the decree.' " *United States v. Western Elec. Co., 282 U.S. App. D.C. 271,* ***[**89]*** *894 F.2d 430, 434 (D.C. Cir. 1990)* (quoting *United States v. ITT Continental Baking Co., 420 U.S. 223, 238, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975))*. Under these principles, the interpretation of an ambiguous contract involves factual findings as to the parties' intent. *See, e.g., Bennett Enters., Inc. v. Domino's Pizza, Inc., 310 U.S. App. D.C. 192, 45 F.3d 493, 497 (D.C. Cir. 1995)*; *Carey Canada, Inc. v. Columbia Cas. Co., 291 U.S. App. D.C. 284, 940 F.2d 1548, 1553-54 (D.C. Cir. 1991)*. In non-plain meaning cases such as this one, appellate courts generally decline to embark on their own factfinding mission, deferring to the district court's role as the primary factfinder and reviewing its findings only for clear error. *See, e.g., United States v. Insurance Co. of N. Am., 327 U.S. App. D.C. 383, 131 F.3d 1037, 1042-43 (D.C. Cir. 1997)* (declining to determine intent of parties to contract on the basis of incomplete record and remanding for further findings). While the district court below did conclude that "reading [section] IV(E)(i) in light of its avowed purpose raises a logical inference that the parties anticipated the use of [tying law] antitrust precedents **[**90]** in determining the application of [section IV(E)(i)] to the conduct the government challenges here," *United States v. Microsoft Corp., 980 F. Supp. 537, 542 (D.D.C. 1997)*--a conclusion that suggests that *Jefferson Parish,* decided well before the parties' agreement, is indeed relevant to the construction of the decree--it is not inconceivable that, given notice and an adequate opportunity to present evidence and arguments, the parties will succeed in persuading the district court otherwise. [10] The majority opinion, however, leaves little room for such efforts--its interpretation seems clearly meant to be the last word. [11]

[91]** Finally, and relatedly, I note that when the parties' contemporaneous understanding of section IV(E)(i) is ultimately revealed, there is further work to be done on *how* the parties intended that understanding to be applied. Should the district court conclude that whether something is an "other product" depends on the existence of a separate market for that product, it must still determine how that "something" is defined--in this case, "Internet Explorer." Here, again, the majority relies heavily on a presumption that "Internet Explorer" contains code that upgrades the operating system as well as code that enables end-users to access the Internet and therefore

[10] Indeed, the district court acknowledged that "disputed issues of technological fact, as well as contract interpretation, abound as the record presently stands." *Microsoft, 980 F. Supp. at 543*.

[11] The majority's assertion that "the district court made no findings of fact as to intent to which we could defer," Maj. Op. at 15 n.7, makes restraint particularly appropriate.

concludes that there is no "separate" product for any tie-in analysis. *See* Maj. Op. at 29. [12] The validity of that perception is not so evident to me. The fact that the supplies and equipment that made the anesthesiologist's job possible in *Jefferson Parish* remained at the hospital--that, in a manner of speaking, the anesthesiologist was something of an interface between the end-user patient and the hospital's "operating system"--did not prevent the Court from concluding that his portion of the service constituted **[**92]** a separate product. Unfortunately, perhaps due to the irregular nature of the preliminary injunction proceedings, the district court made little in the way of findings concerning what the linchpin product "Internet Explorer" is intended to encompass. [13] **[**94]** It would not be unreasonable, **[*964]** as the prior discussion suggests, to approach the problem from the perspective of a typical end-user, who most likely regards "Internet Explorer" as a particular vehicle for accessing information on the Internet, regardless of the underlying code associated with that process. The fact that, as the majority suggests, *see* Maj. Op. at 29-30, "Internet Explorer" distributes certain code to the operating system may simply suggest that some or all of this code should not be considered part of "Internet Explorer" at all but part of the operating system. Or perhaps the work that this code does could be done equally well by similar code written by Netscape or some other competitor, in which case the code's function is not necessarily an operating system function at all. [14] Which approach to the meaning of "product" was the contemporaneous understanding of the parties to the decree, however, remains to be determined. **[**93]**

Furthermore, the record suggests that many of the benefits that the majority asserts for the incorporation of Internet Explorer into Windows 95, including customizing of "Start" menus and "thumbnail" previews, *see* *id. at 27-28*, are provided only by Internet Explorer 4.0 and not by Internet Explorer 3.0. *See, e.g.,* J.A. 490-95, 1664-69. The majority seems to conclude that IE 3.0 and Windows 95 are "integrated" on the basis of little or no evidence. Should more evidence on this point come to light, the district court thus cannot be bound by the **[**95]** majority's conclusions. As to IE 4.0, the district court's preliminary conclusions seemed to hinge on the fact that Microsoft had offered the program only on a separate disk and not on the technology involved, *see* *Microsoft, 980 F. Supp. at 544*, thus suggesting that more factfinding also needs to be done as to IE 4.0.

Because I believe there is significant further factfinding as to intent and operation to be accomplished by the district court on remand, I would not rule out its authority to reissue a preliminary injunction. [15] That is why I am troubled by

[12] Notably, the majority's assertion to this effect relies on testimony presented by Microsoft during hearings on whether Microsoft had failed to comply with the preliminary injunction, testimony that was challenged by the government. *See* Maj. Op. at 29 (citing, *e.g.,* J.A. 1661-68). The parties' eventual settlement of this dispute, *see* J.A. 1780 (Stipulation and Order), obviated any need for factual findings on this issue by the district court. Given that much of the testimony involved in-court demonstrations, *see, e.g.,* J.A. 1661-72, I believe that it would be premature for this court to weigh in with its own resolution of this factual dispute.

[13] The district court's opinion does refer to one unit of analysis as "the software code that Microsoft itself now separately distributes at retail as 'Internet Explorer 3.0,' " *Microsoft, 980 F. Supp. at 544*, but the usefulness of this description was called into question in subsequent proceedings. *See* J.A. 1619 (assertion by Microsoft executive that it distributed no product at retail titled "Internet Explorer 3.0"); J.A. 1780 (agreement by DOJ and Microsoft that removal of only certain files would comply with preliminary injunction).

[14] A word-processing program, for example, may contain a dictionary feature as well as update certain operating-system code once installed. The fact that other applications may call on the dictionary files, or that if the word-processing program were removed in its entirety, certain operating-system files would be "degraded," does not necessarily mean that the word-processing program is integrated with the operating system. It may be that only part of the program is so integrated, or it may be that none of it performs an operating-system function.

[15] In this respect, I note that this court has rejected the notion that the requirement that the government show a "substantial likelihood of success" means "to a certainty" or even "to 51 percent." *See* *Washington Metro. Area Transit Comm'n v. Holiday Tours, Inc., 182 U.S. App. D.C. 220, 559 F.2d 841, 844 (D.C. Cir. 1977)*. Rather, because the district court is to assess the propriety of a preliminary injunction in light of the relative strengths of all four factors (likelihood of success on the merits, irreparable injury, harm to other parties, and furtherance of the public interest), "the necessary 'level' or 'degree' of possibility of success will vary according to the court's assessment of the other factors." *559 F.2d at 843*.

the seemingly authoritative nature of the interpretation of section IV(E)(i) in the majority opinion, which would appear to foreclose any other interpretation of the section and proviso that might evolve in further proceedings and justify either a preliminary or a permanent injunction. To that extent, I respectfully dissent from the majority opinion.

[96]**

George Haug Co. v. Rolls Royce Motor Cars

United States Court of Appeals for the Second Circuit

May 27, 1998, Argued ; June 24, 1998, Decided

Docket No. 97-9238

Reporter

148 F.3d 136 *; 1998 U.S. App. LEXIS 13467 **; 1998-1 Trade Cas. (CCH) P72,191

GEORGE HAUG CO., INC., Plaintiff-Appellant, v. ROLLS ROYCE MOTOR CARS INC., Defendant-Appellee.

Prior History: [1]** Appeal from judgment of the United States District Court, Southern District of New York, entered on an Order granting a motion pursuant to *Federal Rule of Civil Procedure 12(b)(6)* dismissing the amended complaint for failure to state a cognizable claim under the Sherman Act *§ 1*, Sherman Act *§ 2*, and of the Robinson-Patman Act *§§ 2(a)*, *(d)* and *(e)*, and consequently dismissing pendent state law claims for violation of *N.Y. General Business Law § 340* and breach of contract.

Disposition: Affirmed in part and remanded with instructions to reinstate the claim under the Robinson-Patman Act and the pendent state law claims.

Core Terms

price discrimination, amended complaint, Robinson-Patman Act, purchasers, customers, allegations, secondary-line, Sherman Act, antitrust, commerce, differential, primary-line, competitor, commodity, cases, discounts, terms, anti trust law, Clayton Act, discriminate, competed, competitive injury, prohibitions, dealerships, facilities, pricing, repair

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a district court's decision to dismiss an amended complaint under *Fed. R. Civ. P. 12(b)(6)*. Dismissal of a complaint should not be upheld unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim that would entitle him to relief. When a federal court reviews the sufficiency of a complaint, before the reception of any evidence, its task is necessarily a limited one. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims. In antitrust cases in particular, dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly. Nonetheless, it is not proper to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged.

HN2[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. *15 U.S.C.S. § 1*. *Section 2* of the Sherman Act provides that every person who shall monopolize, or attempt to monopolize, or combine or conspire with any person or persons, to monopolize any part of the trade or commerce among the several states shall be deemed guilty of a felony. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

A private plaintiff seeking to state a claim for violation of *§§ 1* or *2* of the Sherman Act, *15 U.S.C.S. §§ 1*, *2*, must allege that it has suffered antitrust injury. The antitrust injury requirement obligates a plaintiff to demonstrate, as a threshold matter, that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. The antitrust laws have been enacted for the protection of competition, not competitors.

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Damages

HN6[] **Defenses, Cost Justification Defense**

In order to establish secondary-line price discrimination under § 2(a) of the Robinson-Patman Act, 15 U.S.C.S. § 13(a), a plaintiff has the burden of establishing four facts: (1) that seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition. A private plaintiff who has proved a violation of § 2(a) must, in order to recover damages under § 4 of the Clayton Act, demonstrate that it suffered actual injury to its business or property as a result of the price discrimination. Moreover, § 2(a) affords defendants two defenses based on certain cost justifications and/or changing conditions, respectively.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN7[] **Robinson-Patman Act, Claims**

Price discrimination claims under *§ 2(a)* of the Robinson-Patman Act, *15 U.S.C.S. § 2(a)*, generally fall into three categories. The first, primary line price discrimination, occurs when a seller's price discrimination harms competition with the seller's competitors. The second, secondary-line price discrimination, occurs when a seller's discrimination impacts competition among the seller's customers; i.e. the favored purchasers and disfavored purchasers. The third, tertiary-line violation, occurs when the seller's price discrimination harms competition between customers of the favored and disfavored purchasers, even though the favored and disfavored purchasers do not compete directly against another.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

HN8[] **Robinson-Patman Act, Claims**

The language in *§ 2(a)* of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, relating to injury to competition is the key to the legality of most differential pricing practices and has engendered significant legal uncertainty as courts have struggled to determine what degree and type of market consequences will constitute the proscribed statutory effect on competition in various commercial situations. As a prerequisite to establishing competitive injury in a secondary line price discrimination case, a plaintiff must prove that it was engaged in actual competition with the favored purchasers as of the time of the price differential.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN9[] **Price Discrimination, Competitive Injuries**

Determining the presence or absence of functional competition between purchasers of a commodity is simply a factual process which focuses on whether these purchasers were directly competing for resales among the same group of customers.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > Robinson-Patman Act Exemptions

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] Price Discrimination, Defenses

Section 2(a) of the Robinson-Patman Act, 15 U.S.C.S. § 13(a), does not categorically exempt price discrimination between parties competing at different functional levels. To satisfy this competitive nexus requirement, it must be shown that, as of the time the price differential was imposed, the favored and disfavored purchasers competed at the same functional level, i.e., all wholesalers or all retailers, and within the same geographic market. The hypothetical predicate for allowing functional discounts is that price differential merely accords due recognition and reimbursement for actual marketing functions.

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN12[] Robinson-Patman Act, Claims

Once the existence of a competitive relationship has been established, the plaintiff must demonstrate a reasonable possibility that competition has been harmed as a result of the price differential. The Robinson-Patman Act (Act) is especially concerned with protecting small businesses, and therefore § 2(a) of the Act, 15 U.S.C.S. § 13(a) is intended to justify a finding of injury to competition by a showing of injury to the competitor victimized by the discrimination. Competitive injury may be inferred from evidence demonstrating injury to an individual competitor.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN13[] Robinson-Patman Act, Claims

The Robinson-Patman Act should be reconciled with other antitrust laws.

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN15[] **Robinson-Patman Act, Claims**

The statutory structure under the Robinson-Patman Act that prohibits primary-line price discrimination stands on an entirely different footing than the statutory scheme that proscribes secondary-line discrimination. Primary-primary discrimination is prohibited under the Clayton Act of 1914, which originally condemned discrimination that might substantially lessen competition or tend to create a monopoly in any line of commerce. The statutory intent is to prevent large corporations from invading markets of small firms and charging predatory prices for the purpose of destroying market wide competition, and thus specifically applied only to primary-line injury.

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN16[] Robinson-Patman Act, Coverage

Secondary-line discrimination is forbidden by the Robinson-Patman Act, *15 U.S.C.S. §§ 13-13b* and *21a*, which amends the original Clayton Act of 1914's price discrimination proscriptions. Congress has clearly intended the Robinson-Patman Act's provision to apply only to secondary-line cases, not to primary-line cases. In contrast to the Sherman Act and the Clayton Act, which are intended to proscribe only conduct that threatens consumer welfare, the Robinson-Patman Act's framers have intended to punish perceived economic evils not necessarily threatening to consumer welfare per se. In particular, the Robinson-Patman Act's amendments to the Clayton Act stem from dissatisfaction with the original Clayton Act's inability to prevent large retail chains from obtaining volume discounts from big suppliers, at the disadvantage of small retailers who competed with the chains.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN17[] Robinson-Patman Act, Remedies

While the Clayton Act of 1914 only proscribes conduct that may substantially lessen competition or tend to create a monopoly, the Robinson-Patman Act adds the following passage: or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. The purpose of this passage is to relieve secondary-line plaintiffs, small retailers who are disfavored by discriminating suppliers, from having to prove harm to competition market wide, allowing them instead to impose liability simply by proving effects on individual competitors.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN18[] Antitrust & Trade Law, Robinson-Patman Act

Antitrust & Trade Law > Robinson-Patman Act > Coverage > Commerce Requirement

HN20[] Price Discrimination, Competitive Injuries

Some of the substantive elements of §§ 2(d) and 2(e) of the Robinson-Patman Act (Act), 15 U.S.C.S. §§ 13(d), 13(e), mirror those of § 2(a) of the Act, 15 U.S.C.S. § 13(a). Courts have read in the in commerce requirement into both §§ 2(d) and (e). The plaintiff must demonstrate that the goods or commodity apply only to offers to customers competing in the same geographic area and reselling at the same functional level. In addition, the plaintiff must demonstrate actual injury. Sections 2(d) and 2(e) differ from § 2(a) in that no injury to competition need be demonstrated. In addition, neither §§ 2(d) or 2(e) has any built-in defensive matter, as does § 2(a). the only escape Congress has provided for discriminations in services or facilities is the permission to meet competition as found in the § 2(b) of the Act, 15 U.S.C.S. § 13(b), proviso.

[***] Pursuant to 28 U.S.C. § 46(b) and an order of the chief judge of this Court certifying a judicial emergency, this case was heard by an emergency panel consisting of one judge from this court and two judges of the United States District Court sitting by designation.

Opinion

[*138] Milton Pollack, *Senior District Judge*

From 1967 until November 10, 1995, plaintiff ("Haug") was an authorized parts and service dealer of Rolls Royce automobiles in New York County. The defendant, Rolls Royce Motorcars, Inc. ("Rolls Royce") is an importer and wholesaler of Rolls Royce automobiles and parts and is the distributor thereof. Rolls Royce controlled the market for parts with respect to its automobiles known as the "after market parts". This action was commenced on August 16, 1996. The amended complaint alleged that at the instigation of a competitor of plaintiff, namely Carriage House, Rolls Royce conspired and agreed to drive plaintiff out of the business of repairing and servicing Rolls Royce automobiles as an authorized service center, to restrain trade and monopolize trade for parts and services, and to discriminate against plaintiff so as to prevent **[**3]** plaintiff from competing effectively. The amended complaint asserts that Rolls Royce officials were paid commercial bribes to do so. In furtherance of the conspiracy, the amended complaint further asserts that preferences were given by Rolls Royce to Carriage House consisting of more favorable credit and price terms to Carriage House with respect to parts; payment of the rent of Carriage House; allowing Carriage House a price differential and allowing Carriage House a more favorable basis for reimbursements for warranty work; and also enabling Carriage House to offer customers free work paid for by Rolls Royce while requiring Haug to charge similarly situated customers. The amended complaint alleges that during the four years prior to termination, the plaintiff was injured to a substantial monetary degree.

None of the allegations of the amended complaint were disputed by defendant. No depositions were taken, no discovery was had, and no supporting affidavits were filed by defendant; the motions were decided solely on the allegations of the amended complaint and the notice of the claims appearing from the pleading.

The District Court ruled that the amended complaint was insufficient **[**4]** as a claim for violation of the Sherman Act on the grounds that it did not allege "antitrust injury." Further, the District Court rejected Haug's attempt to assert Sherman Act claims on behalf of Rolls Royce dealerships due to lack of standing because Haug did not deal in new cars.

[*139] As to the Robinson-Patman claim, the District Court found that Haug failed to invoke any of the prohibitions contained in the statute therein. The District Court ruled that the amended complaint's allegation that Haug was harmed by price differentials given to Carriage House was insufficient in law as basis under *Section 2(a)* for a Robinson-Patman claim in the absence of some allegation of a threat thereby to competition as a whole. Haug's claim under *Section 2(d)* and *(e)* of the Act were dismissed for failure to plead that Haug is "functionally equivalent" to Carriage House. Supplemental jurisdiction over the additional State law claims was declined in the absence of a federal claim.

DISCUSSION

We first address Haug's argument that the District Court improperly dismissed its Sherman Act claims. We hold that the District Court properly dismissed these claims because the amended complaint **[**5]** does not sufficiently allege "antitrust injury." Next, we address Haug's contention that the District Court erred in dismissing its Robinson-Patman Act claim. We hold that the amended complaint adequately asserts causes of action under *Sections 2(a)* and *2(d)* of the Robinson-Patman Act.

A. Standard of Review

HN1[] This Court reviews *de novo* the District Court's decision to dismiss Haug's amended complaint under *Fed. R. Civ. P. 12(b)(6)*. *Electronics Communications Corp. v. Toshiba America Consumer Products, Inc., 129 F.3d 240, 242 (2d Cir. 1997)*. Dismissal of a complaint should not be upheld "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim that would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. "When a federal court reviews the sufficiency of a complaint, before the reception of any evidence. . ., its task is necessarily a limited one. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. In antitrust **[**6]** cases in particular, the Supreme Court has stated that "dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Building Co. v. Trustees of Rex Hosp., 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*. Nonetheless, "it is not. . .proper to assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated the antitrust laws in ways that have not been alleged." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 526, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*.

B. Sherman Act

HN2[] *Section 1* of the Sherman Act prohibits "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. . . ." *15 U.S.C. § 1*. *Section 2* of the Sherman Act provides that "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any person or persons, to monopolize any part of the trade or commerce among the several States. . .shall be deemed guilty of a felony." *15 U.S.C. § 2*.

HN3[] A private plaintiff seeking to state a claim for violation **[**7]** of *sections 1* or *2* of the Sherman Act must allege that it has suffered "antitrust injury." See *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990)*; *G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762, 766 (2d Cir. 1995)*. The antitrust injury requirement obligates a plaintiff to demonstrate, as a threshold matter, "that the challenged action has had an *actual* adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice." *Capital Imaging v. Mohawk Valley Med. Assoc., 996 F.2d 537, 543 (2d Cir. 1993)*. "The antitrust laws. . .were enacted for 'the protection of competition, not competitors.'" *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502* [1962]).

[*140] Haug's amended complaint alleges that "[Haug] and Carriage House accounted for 80% of all repairs of Rolls Royce automobiles when both were in existence in New York County, New York." Haug further alleges that as a result of its *de facto* termination, **[**8]** "competition [was] eliminated for the repair and servicing of Rolls Royce automobiles for 80% of the market in New York City."

The District Court concluded that the amended complaint did not sufficiently allege "antitrust injury":

> Plaintiff has failed to plead its own market share [for the repair and servicing of Rolls Royce automobiles in New York County] or the market share purportedly absorbed by Carriage House as a result of plaintiff's "*de facto* termination." . . .Thus, plaintiff has alleged no facts from which I could conclude that plaintiff's elimination from the marketplace resulted in a decrease of Roll Royce service outlets. [1]

[9]**

---

[1] Note, we need not at this time advert to the District Court's discussion of exclusive distributorships in which the court found that "exclusive distributorships are perfectly legal under the Sherman Act." *George Haug Co. Inc. v. Rolls Royce Motor Cars Inc., 1997 U.S. Dist. LEXIS 13650*, No. 96 Civ. 3140,1997 WL 563806 at *3 (S.D.N.Y. Sept. 10, 1997). Exclusive distributorships are not per se authorized under the Sherman Act. Instead, we have heretofore held that an exclusive distributorship agreement, standing alone, is not illegal. See *Electronics Communications Corp. v. Toshiba America Consumer Products, Inc., 129 F.3d 240, 245 (2d Cir. 1997)*; *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 133 (2d Cir. 1978)*. In order to succeed, a plaintiff must demonstrate that the exclusive distributorship had an "actual adverse effect on competition market-wide. . . ." *Electronics Communications Corp. at 244*. That is, the focus remains on market effect. Haug has not alleged the existence of an exclusive distributorship, and we are not assured that had it done so, it would not have alleged that the exclusive distributorship resulted in antitrust injury.

In addition, the amended complaint asserts antitrust injury on behalf of authorized Rolls Royce dealerships. Specifically, Haug alleges that its elimination as a service outlet makes it less likely that consumers who are current or prospective owners of Rolls Royce automobiles living in New York County will purchase a Rolls Royce automobile from a dealer other than the Carriage House. Haug bases this allegation on the premise that these customers "would believe that they would have to go to Carriage House for warranty work and would probably not receive good treatment if they bought their Rolls Royce automobiles from a dealer other than Carriage House." Haug does not contend that it was a Rolls Royce dealership at any time during its existence. We agree with the District Court's determination that under applicable Supreme Court precedent, Haug does not have standing to assert any antitrust injury suffered by Rolls Royce dealerships. See *Associated General Contractors of California, Inc. V. California State Council of Carpenters, 459 U.S. 519, 539, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (dismissing claim of a plaintiff because plaintiff "was neither a consumer nor a competitor **[**10]** in the market in which trade was restrained").
In short, plaintiff had failed to satisfy the pleading requirements for a claim under the Sherman Act, and these claims were properly dismissed.

C. Robinson-Patman Act

It is hornbook law as cited hereinafter that ***HN4***[] anti-competitive injury need not be alleged to sustain a claim for violation of the Robinson-Patman Act; a price differential, direct or indirect, between secondary-line competitors is enough. The Act requires that each purchaser be given an "equal opportunity" by the seller to receive the benefit of higher or lower prices.
The amended complaint includes allegations which invoke three of the five basic prohibitions contained in the Robinson-Patman Act. Each of these prohibitions are discussed separately below.

1. Section 2(a)

HN5[] *Section 2(a)* of the Robinson-Patman Act provides, in pertinent part, as follows:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade **[*141]** and quality. . .where the effect of such discrimination may be substantially to lessen competition **[**11]** or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. . . .

15 U.S.C. § 13(a).

HN6[] In order to establish secondary-line price discrimination [2] under *section 2(a)*, a plaintiff has the burden of establishing four facts: (1) that seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition. See *Texaco, Inc. v. Hasbrouck, 496 U.S. 543, 556, 110 L. Ed. 2d 492, 110 S. Ct. 2535 (1990)*. A private plaintiff who has proved a violation of *section 2(a)* must, in order to recover damages under § 4 of the Clayton Act, demonstrate that it suffered actual injury to its business or property as a result of the price

[2] ***HN7***[] Price discrimination claims generally fall into three categories. The first, primary line price discrimination, occurs when a seller's price discrimination harms competition with the seller's competitors. See, e.g., *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*. The second, secondary-line price discrimination, occurs when a seller's discrimination impacts competition among the seller's customers; i.e. the favored purchasers and disfavored purchasers. See, e.g., *F.T.C. v. Sun Oil Co., 371 U.S. 505, 9 L. Ed. 2d 466, 83 S. Ct. 358 (1963)*. The third, tertiary-line violation, occurs when the seller's price discrimination harms competition between customers of the favored and disfavored purchasers, even though the favored and disfavored purchasers do not compete directly against another. See, e.g., *Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 436, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983)*.

discrimination. *J. Truett Payne, Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. Moreover, *section 2(a)* affords defendants **[**12]** two defenses based on certain cost justifications and/or changing conditions, respectively. See *15 U.S.C. § 13(a)*.

[13]**
Haug alleges that Rolls Royce discriminated against it "by in effect selling parts for Rolls Royce automobiles at a lower price to Carriage House"; and "by giving Carriage House more favorable credit terms on parts than given to plaintiff." The competitive injury alleged was that "the discrimination in price and services made plaintiff unable to compete in that it allowed Carriage House to offer customers items and benefits which plaintiff could not afford. As a result, [Haug] has been injured by such discrimination in the amount of approximately $ 13,844,911." The District Court determined that these allegations do not adequately assert that the alleged price discrimination had an effect on competition.

HN8[] The language in *Section 2(a)* relating to injury to competition is the key to the legality of most differential pricing practices and has engendered significant legal uncertainty as courts have struggled to determine what degree and type of market consequences will constitute the proscribed statutory effect on competition in various commercial situations. We note initially that as a prerequisite to establishing competitive injury in a secondary line price discrimination case, a **[**14]** plaintiff must prove that "it was engaged in actual competition with the favored purchaser(s) as of the time of the price differential." *Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578, 584 (2d Cir. 1987)*. The District Court did not specifically address whether Haug's amended complaint sufficiently alleges that it was in competition with Carriage House for the purposes of *Section 2(a)*. However, the District Court, in its discussion of Haug's claims under *sections 2(d)* and *(e)*, found that Haug was not "functionally equivalent" to Carriage House because Carriage House was an authorized Rolls Royce dealership in addition to being an authorized parts and service provider.

Based on the pleadings, we believe that the amended complaint sufficiently alleges that Haug and Carriage House competed in the relevant market_parts used for repairing and servicing Rolls Royce automobiles. ***HN9***[] Determining the presence or absence of functional competition between purchasers **[*142]** of a commodity is simply a factual process which focuses on whether these purchasers were directly competing for resales among the same group of customers. See *FTC v. Fred Meyer, Inc., 390 U.S. 341, **[**15]** 349, 19 L. Ed. 2d 1222, 88 S. Ct. 904 (1968)* (*Section 2(d)* "reaches only discrimination between customers competing for resales at the same functional level. . . .").

Moreover, even if we were to assume that the parties were not in actual competition in the relevant market, ***HN10***[] *Section 2(a)* does not categorically exempt price discrimination between parties competing at different functional levels. Previously, we have held that to satisfy this "competitive nexus" requirement, "it must. . .be shown that, as of the time the price differential was imposed, the favored and disfavored purchasers competed at the same functional level, i.e., all wholesalers or all retailers, and within the same geographic market." *Best Brands Beverage, Inc., 842 F.2d at 585*. The hypothetical predicate for allowing functional discounts is that price differential "merely accords due recognition and reimbursement for actual marketing functions." *Texaco, Inc. v. Hasbrouck, 496 U.S. 543, 562, 110 L. Ed. 2d 492, 110 S. Ct. 2535* (quoting Report of the Attorney General's National Committee to Study the Antitrust Laws 208 (1955)).

However, in Hasbrouck, the Supreme Court rejected the proposition that ***HN11***[] *section **[**16]** 2(a)* provides a safe harbor for any and all functional discounts. *496 U.S. at 563*. While the Court acknowledged that it "generally agreed" with the notion that functional discounts are permissible under the Robinson-Patman Act, the Court found that defendant was liable under *section 2(a)* because the trial record demonstrated that the functional discounts were "untethered to supplier's savings or the wholesaler's costs." *496 U.S. at 562-63*. Thus, even if Haug and Carriage House did compete on different functional levels, there exists a factual question whether "functional discounts" offered to the latter were in fact legitimate functional discounts or subterfuges to avoid *section 2(a)*'s restrictions.

HN12[] Once the existence of a competitive relationship has been established, the plaintiff must demonstrate a reasonable possibility that competition has been harmed as a result of the price differential. *Falls City Industries v. Vanco Beverage, Inc., 460 U.S. 428, 434-435, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1988)* (citing *Corn Products Refining Co. v. FTC, 324 U.S. 726, 742, 89 L. Ed. 1320, 65 S. Ct. 961 (1945))*. In *FTC v. Morton Salt Co., 334 U.S. 37, 49, 92 L. Ed. 1196, 68 S. Ct.* **[**17]** *822 (1948)*, a secondary-line price discrimination case, the Supreme Court determined that the Robinson-Patman Act was "especially concerned with protecting small businesses" and that therefore *section 2(a)* "was intended to justify a finding of injury to competition by a showing of 'injury to the competitor victimized by the discrimination.'"(quoting S. Rep. No. 1502, 74th Cong., 2d Sess 4). Accordingly, the Court held that competitive injury may be inferred from evidence demonstrating injury to an individual competitor. *334 U.S. at 46-47*. More specifically, Morton Salt permits an inference of injury to competition from evidence of a substantial price difference over time, because such a price difference may harm the competitive opportunities of purchasers, and thus create a "reasonable possibility" that competition itself may be harmed.

That competitive injury may be satisfied in this manner appears at odds with other statements made by the Supreme Court whereby the Court has indicated that interpretations of *HN13*[] the Robinson-Patman Act should be reconciled with other antitrust laws. See, e.g., *Great Atlantic & Pacific Tea Co., Inc. v. Federal Trade Commission, 440 U.S.* **[**18]** *69, 80 n.13, 59 L. Ed. 2d 153, 99 S. Ct. 925 (1979)* (Interpretations of the Robinson-Patman Act "should be construed consistently with broader policies of the antitrust laws."). Nevertheless, the Supreme Court has repeatedly upheld the Morton Salt inference. See *Hasbrouck, 496 U.S. at 559*; *Falls City Industries, 460 U.S. at 435-36*.

In *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*, a primary-line price discrimination case, the Supreme Court reviewed its prior case law and addressed anew the elements of a claim under **[*143]** *Section 2(a)*. In so doing, the Court acknowledged that its jurisprudence indicated that *HN14*[] price discrimination within the meaning of *section 2(a)* is "merely a price difference." *509 U.S. at 220*. The Court, however, emphasized that in primary-line cases the language of the provision as well as the underlying Congressional intent led to the conclusion that "by its terms, the Robinson-Patman Act condemns price discrimination only to the extent that it threatens to injure competition."

The District Court, in dismissing Haug's complaint under *Section 2(a)* for failure to assert "antitrust injury", **[**19]** did not advert to an important legal issue which has not been squarely addressed by this Circuit; namely, in secondary-line cases, whether after Brooke Group the same sort of antitrust injury which is a prerequisite under the Sherman Act must be shown under *section 2(a)* of the Robinson-Patman Act. Three Circuits addressing this issue have already determined that the answer is "no." In *Stelwagon Mfg. Co. v. Tarmac Roofing, 63 F.3d 1267, 1272 (3rd Cir. 1995)*, the Third Circuit, citing Morton Salt, found that a claim in a secondary-line price discrimination case under the Robinson-Patman Act is supportable upon proof of a substantial price discrimination between competitors over time; no reference was made to Brooke Group.

In another secondary-line case, *Coastal Fuels of Puerto Rico, Inc. v. Caribbean Petroleum Co., 79 F.3d 182 (1st Cir. 1996)*, the First Circuit directly took on the question of whether Brooke Group overruled Morton Salt. The First Circuit concluded that Morton Salt remained good law for three reasons:

> First, *HN15*[] the statutory structure that prohibits primary-line price discrimination "stands on an entirely different footing" than the **[**20]** statutory scheme that proscribes secondary-line discrimination. Congress first forbade primary-line price discrimination with the Clayton Act of 1914, which originally condemned discrimination that might "substantially . . . lessen competition or tend to create a monopoly in any line of commerce." The statute was intended to prevent large corporations from invading markets of small firms and charging predatory prices for the purpose of destroying market wide competition, and thus specifically applied only to primary-line injury.
>
> By contrast, *HN16*[] secondary-line discrimination is forbidden by the Robinson-Patman Act, 49 Stat. 1526 (1936), *15 U.S.C. §§ 13-13b*, *21a (1988)*, which amended the original Clayton Act's price discrimination proscriptions. Congress clearly intended the Robinson-Patman Act's provision to apply only

> to secondary-line cases, not to primary-line cases. In contrast to the Sherman Act and the Clayton Act, which were intended to proscribe only conduct that threatens consumer welfare, the Robinson-Patman Act's framers "intended to punish perceived economic evils not necessarily threatening to consumer welfare per se." In particular, the Robinson-Patman Act's amendments to **[**21]** the Clayton Act stemmed from dissatisfaction with the original Clayton Act's inability to prevent large retail chains from obtaining volume discounts from big suppliers, at the disadvantage of small retailers who competed with the chains.
>
> Second, we are persuaded by the reasoning of the Ninth Circuit's opinion in [*Rebel Oil Co. v. Atlantic Richfield Co., 51 F.3d 1421 (9th Cir. 1995)]* that the amendment to the Clayton Act effected by the Robinson-Patman Act supports the continued vitality of the Morton Salt rule, even in the face of Brooke Group's alteration of standards for primary-line price discrimination. ***HN17***[] While the Clayton Act only proscribed conduct that may "substantially lessen competition or tend to create a monopoly[,]" the new law added the following passage: "or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them." The purpose of this passage was to relieve secondary-line plaintiffs -- small retailers who are disfavored by discriminating suppliers -- from having to prove harm to competition market wide, allowing them instead to impose liability **[**22]** simply by proving effects on individual competitors. Such legislative intent directly supports **[*144]** maintaining the Morton Salt rule, which puts into practice Congress' concern with placing the same burden on secondary- line plaintiffs that other antitrust plaintiffs face. Thus, the comparison that the Supreme Court drew between primary-line price discrimination and predatory pricing in Brooke Group stands on a different, and stronger, footing than any comparison that could be made between secondary-line price discrimination and other area of ***antitrust law***, including, but not only, predatory pricing.
>
> Third, and finally, the holding of the Brooke Group opinion on its face applies only to primary-line cases, not secondary-line cases. As a result, given the legislative history and statutory language distinctions, we will not presume, without more guidance, that the Supreme Court intended in Brooke Group to alter the well-established rule that it adopted in Morton Salt.

79 F.3d at 192-193 (citations omitted).

Most recently, in *Chroma Lighting v. GTE Products Corp., 111 F.3d 653, 658 (9th Cir. 1997)*, the Ninth Circuit expressly adopted the First Circuit's conclusion **[**23]** that the Morton Salt inference is applicable in secondary-line price discrimination cases even after Brooke Group. We now adopt the First Circuit's view in Coastal Fuels of Puerto Rico, Inc., thereon.

The appropriate question before this Court, therefore, is whether Haug's amended complaint can be read to allege a substantial and sustained price differential in the distribution of parts from Rolls Royce in order permit discovery in this matter. We find that the allegations in Haug's amended complaint sufficiently state claims under *section 2(a)* of the Robinson-Patman Act. Although Haug does not detail the amount and degree of the price discrimination, it does allege that it was injured "during the 4 years prior to its termination," which is adequate to withstand *Fed. R. Civ. P. 12(b)(6)* dismissal. See, e.g., *J.F. Feeser, Inc. v. Serv-a-Portion, Inc., 909 F.2d 1524, 1539 (3d Cir. 1990)* ("The four-year period analyzed. . . establishes the requisite duration of price discrimination to support an inference of competitive injury.").

2. Sections (d) and (e)

HN18[] *Sections 2(d)* and *(e)* of the Robinson-Patman Act provide as follows:

> (d) It shall be unlawful **[**24]** for any person engaged in commerce to pay or contract for the payment of anything of value to or for the benefit of a customer of such person in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such person, unless such payment or consideration is available

on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

(e) It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

15 U.S.C. § 13(d) and *(e)*.

HN19[↑] These provisions were designed to prohibit indirect price discrimination in the form of advertising **[**25]** and other promotional allowances made available to purchasers on disproportionate terms. See *FTC v. Fred Meyer, Inc., 390 U.S. 341, 350-51, 19 L. Ed. 2d 1222, 88 S. Ct. 904 (1968)*. *Section 2(d)* and *Section 2(e)* differ in that in the former, the purchaser supplies the services or facilities and the supplier repays the purchaser; in the latter, the seller supplies the services and facilities for use of the customer in facilitating resales. See *Exquisite Form Brassiere, Inc. v. FTC, 112 U.S. App. D.C. 175, 301 F.2d 499, 500 (D.C. Cir. 1961)*.

HN20[↑] Some of the substantive elements of *sections 2(d)* and *(e)* mirror those of *section 2(a)*. Courts have read in the "in commerce" requirement into both *sections 2(d)* and *(e)*. **[*145]** See *Zoslaw v. MCA Distrib. Corp., 693 F.2d 870, 881-882 (9th Cir. 1982)*. The plaintiff must demonstrate that the goods or commodity apply only to offers to customers competing in the same geographic area, see, e.g., *Eastern Auto Distributors, Inc. v. Peugeot Motors of America, Inc., 795 F.2d 329, 335-336 (4th Cir. 1986)*, and reselling at the same functional level. *Fred Meyer, Inc., 390 U.S. at 348-49*. In addition, the plaintiff must demonstrate "actual **[**26]** injury." *Interstate Cigar Co., Inc. v. Sterling Drug Inc., 655 F.2d 29, 31 (2d Cir. 1981)*.

Section 2(d) and *(e)* differ from 2(a) in that no injury to competition need be demonstrated. See *FTC v. Simplicity Pattern Co., 360 U.S. 55, 65, 3 L. Ed. 2d 1079, 79 S. Ct. 1005 (1959)*. In addition, neither 2(d) or (e) "has any built-in defensive matter, as does *§ 2(a)*. . . . The only escape Congress has provided for discriminations in services or facilities is the permission to meet competition as found in the *§ 2(b)* proviso." *360 U.S. at 65-67*.

Haug's amended complaint alleged that Rolls Royce "paid or caused to be paid through affiliates of [Rolls Royce] the rent for Carriage House of approximately. . .$ 60,000 to $ 90,000 per month, but did not pay such costs to plaintiffs;" and "allowed Carriage House to offer customers free work paid for by Rolls Royce while requiring plaintiff to charge similarly situated customers." These payments are best construed as allegations of *Section 2(d)*. Cf. *Sun Cosmetic Shoppe v. Elizabeth Arden Sales Corp., 178 F.2d 150, 152-53 (2d Cir. 1949)* (finding that subsidizing demonstrators' salaries was covered by *§ 2(d)*, and providing demonstrators **[**27]** was covered by *§ 2[e]*).

The District Court dismissed these allegations on the grounds that Haug is not "functionally equivalent" to Carriage House. However, we believe that the amended complaint does sufficiently allege that Haug competed at the same functional level with Carriage House in the relevant market.

CONCLUSION

The dismissal of Haug's claims under *Sections 1* and *2* of the Sherman Act is affirmed. The dismissal of Haug's claims under the Robinson-Patman Act is reversed and remanded for further proceedings and Haug's supplemental state law claims are reinstated.

Civil Procedure > Pretrial Matters > Conferences > Pretrial Orders

HN1[] **Standards of Review, Abuse of Discretion**

The court reviews a trial court's decision to exclude expert witnesses as a means of enforcing a pretrial order under the abuse of discretion standard. In so doing, the court considers: (1) the explanation for the failure to identify the witness; (2) the importance of the testimony; (3) potential prejudice in allowing the testimony; and (4) the availability of a continuance to cure such prejudice.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN2[] **Discovery, Methods of Discovery**

The court reviews a grant of summary judgment de novo. Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.

Antitrust & Trade Law > Sherman Act > Claims

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN3[] **Conspiracy to Monopolize, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, expressly requires that there be a "contract, combination or conspiracy" between the manufacturer and other distributors in order to establish a violation. Independent action is not proscribed. Even where a single firm's restraints directly affect prices and have the same economic effect as concerted action might have, there can be no liability under *§ 1* in the absence of a combination or agreement. *15 U.S.C.S. § 1*. Thus, the distinction between independent action and joint action is fundamental in antitrust jurisprudence, and a claim will not exist in the absence of the latter.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > Buyer Liability

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN4[] **Price Discrimination, Buyer Liability**

Section 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, provides that it is unlawful for a seller either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality. The "functional availability theory "is a judicial graft on § 2(a) and is not explicitly embodied in the text of the statute. The theory is that a price discount equally available to all purchasers for the same customer and product is not price discrimination.

HN6[] **Specific Cases Removed, Federal Questions**

When an action is brought to federal court through the *28 U.S.C.S. § 1441* mechanism for both removal and original jurisdiction, the federal question must be presented by plaintiff's complaint as it stands at the time the petition for removal is filed and the case seeks entry into the federal system. It is insufficient that a federal question has been raised as a matter of defense or as a counterclaim. Similarly, a defendant's third-party claim alleging a federal question does not come within the purview of *§ 1441* removability. A third-party claim, like a defense or counterclaim, is a pleading by the defendant. The third-party claim does not change the character of the plaintiff's complaint any more than does the defendant's other pleadings. Thus, a federal question alleged in the defendant's third-party claim will not, in and of itself, confer jurisdiction upon the federal court.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

For FORD MOTOR COMPANY, Defendant - Appellee: Kenneth Raymond Valka, Houston, TX. Billy M. Donley, Baker & Hostetler, Houston, TX. John Mark Thomas, Ford Motor Company, Dearborn, MI.

Judges: Before POLITZ, Chief Judge, REYNALDO G. GARZA and DENNIS, Circuit Judges.

Opinion by: POLITZ

Opinion

[*322] POLITZ, Chief Judge:

Metro Ford Truck Sales, Inc. appeals an adverse summary judgment on its federal antitrust claims. [1] Ford Motor Company, Eric Magnus, Mike Steckler, and Duane Kupper appeal the remand of their third-party claim against Daniel H. Foley, Jr. under the Racketeer Influenced and Corrupt Organizations Act. [2] For the reasons assigned, we affirm.

[2] BACKGROUND**

Ford is engaged in the manufacture of various types of vehicles, including heavy, medium, and light duty trucks. At all pertinent times, Metro was a motor vehicle dealership licensed to sell and service Ford trucks, and Foley was the dealer-principal. The relationship between Ford and Metro **[*323]** was governed by Ford Truck and Ford Heavy Duty Truck Sales and Service Agreements.

The focus of this action is a pricing program implemented by Ford, known as Competitive Price Assistance. This program was used to reduce the wholesale price of a truck to authorized Ford medium and heavy duty truck dealers. During the 1990-94 period at issue, all Ford medium and heavy truck dealerships were eligible to receive, on every truck, a base level of CPA called "Sales Advantage." Sales Advantage CPA was obtained by calling Ford's CPA Hotline, and giving the operator basic information about the sale, including the customer's name, the vehicle specifications, and the vehicle options.

In situations where the sales advantage CPA was insufficient, further procedures permitted a dealer to request additional price reductions, known as "Appeal CPA." The appeal process was initiated when a dealer **[**3]** submitted a CPA appeal form by facsimile to Ford's CPA Central. To justify the need for an Appeal CPA, a dealer had to provide information about the competitive situation surrounding the particular transaction at stake. Ford then evaluated the appeal, along with any additional information it had about the customer, to ensure that all Ford dealers bidding the same customer received an equal CPA, and that all Ford dealers could meet the competition from other original equipment manufacturers. Ford thereafter advised the dealer about the amount of additional CPA, if any, that would be allowed.

Specialized CPA also existed for large volume purchasers. This CPA usually was at a predetermined amount and could be obtained simply by calling the CPA Hotline and providing the customer's name and commitment number. Because these customers attracted so much competition, and ordered such a large volume of trucks, the amount of CPA was made readily available, alleviating the need for the dealer to demonstrate individually a competitive situation or to initiate a CPA appeal.

In response to complaints by another dealer that Metro was obtaining more CPA on bids to the same customer, Ford conducted **[**4]** an audit of certain sales Metro made using the CPA program. Ford concluded that Metro had been applying for CPA in the name of one customer, while actually selling the trucks to someone else; thus receiving more CPA than that to which it was entitled. Metro conceded that it sometimes misrepresented customers when claiming CPA, but alleged that Ford representatives instructed it to claim CPA in the name of its large volume purchasers when the situation warranted CPA beyond Sales Advantage CPA. Ford employees, not surprisingly, denied that Metro was so instructed or that they had knowledge of Metro's practice prior to the audit. Accordingly,

[1] Sherman Act, *15 U.S.C. § 1*, and Robinson-Patman Act, *15 U.S.C. § 13(a)*.

[2] *18 U.S.C. §§ 1961-1968*.

Ford determined to charge back the amount of CPA obtained by Metro on the misrepresented transactions, and to pursue termination of Metro's franchise agreements.

To prevent the threatened charge back or terminations, Metro filed the instant action in state court, seeking injunctive relief and asserting various state law claims against Ford and Ford employees Kupper, Magnus, and Steckler (hereinafter collectively referred to as "Ford"). Ford filed counterclaims against Metro and a third-party petition against Foley, alleging several causes of action **[**5]** under state law. Thereafter Metro filed an amended petition, which included a claim against Ford for price discrimination under the Texas Antitrust Act, and Foley filed a counterclaim against Ford for intentional infliction of emotional distress.

Ford removed the action to federal court on the basis that the Texas Antitrust Act does not prohibit price discrimination and, therefore, Metro's antitrust claim for price discrimination could arise, if at all, only under the federal Robinson-Patman Act, conferring federal question jurisdiction. The district court agreed with the basis for removal and denied Metro's motion to remand. Metro thereafter amended its complaint to assert specific claims for price discrimination under § 2(a) of the Robinson-Patman Act and for vertical price fixing under *§ 1* of the Sherman Act, and Ford amended its third-party complaint against Foley to include a RICO claim.

[*324] All parties subsequently moved for summary judgment. The district court granted Ford's motion for summary judgment on Metro's federal antitrust claims. Finding that state law predominated and a substantial overlap existed, the district court remanded the remaining state law claims, as well **[**6]** as the third-party RICO claim, to state court. Both Metro and Ford timely appealed.

ANALYSIS

Metro contends that the district court erred in (1) denying leave to designate experts and file expert reports beyond the scheduling order deadline; and (2) granting summary judgment in favor of Ford on its Sherman Act and Robinson-Patman Act claims. In its cross-appeal, Ford contends that the district court erred in remanding its third-party RICO claim, as well as the pendent state law claims.

Metro's first argument on appeal is that the district court erred in denying its motion for leave to designate experts and file expert reports out-of-time, or to recognize its supplemental disclosures. ***HN1***[] We review a trial court's decision to exclude expert witnesses as a means of enforcing a pretrial order under the abuse of discretion standard. [3] **[**7]** In so doing, we consider: "(1) the explanation for the failure to identify the witness; (2) the importance of the testimony; (3) potential prejudice in allowing the testimony; and (4) the availability of a continuance to cure such prejudice." [4]

As a preliminary matter, we note that it is only the ruling on one expert, Dr. Keith Leffler, that is at issue. Absent from Metro's trial motion and its argument on appeal, is sufficient justification for the late designation of this expert witness. Metro essentially complains that Ford failed to provide supplemental discovery. Although this case had been pending for well over two years, and the scheduling order deadlines had been extended previously, Metro did not timely raise this issue in the trial court.

Nonetheless, Metro contends that the mere one week delay in designating this expert was nominal and resulted in no prejudice, mandating the grant of its motion. Metro fails, however, to note the lack of an accompanying written report, as required by the scheduling order and Rule 26(a)(2)(B), which results, necessarily, in the conclusion that the expert designation deadline was not merely one week late as it contends. Instead, Metro urges this court to recognize the filing of Dr. Leffler's report as timely under the supplemental disclosure deadline some three months later. **[**8]** We decline to do so. The purpose of supplementary disclosures is just that -- to supplement. Such

---

[3] *Geiserman v. MacDonald, 893 F.2d 787 (5th Cir. 1990)*.

[4] ***Id.*** *at 791*.

disclosures are not intended to provide an extension of the expert designation and report production deadline. [5] We therefore hold that the district court did not abuse its discretion in refusing to modify the scheduling order and in enforcing the time deadlines. [6]

In its remaining **[**9]** arguments on appeal, Metro contends that the district court erred in granting summary judgment in favor of Ford on its federal antitrust claims. ***HN2***[] We review a grant of summary judgment *de novo*. [7] Summary judgment is appropriate "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment **[*325]** as a matter of law." [8]

Metro contends that Ford's CPA program constitutes vertical price fixing in violation of the Sherman Act. The district court found the lack of evidence of an agreement fatal to Metro's Sherman Act claim. Metro contends that the district court erred in this regard because the existence of a contract or agreement is not required for a vertical price fixing claim. Metro maintains that Ford's independent and unilateral actions **[**10]** are sufficient to support its claim. We do not find these contentions persuasive.

HN3[] *Section 1* of the Sherman Act expressly requires that there be a "contract, combination … or conspiracy" between the manufacturer and other distributors in order to establish a violation. [9] **[**11]** "Independent action is not proscribed." [10] Even where a single firm's restraints directly affect prices and have the same economic effect as concerted action might have, there can be no liability under *§ 1* in the absence of a combination or agreement. [11] Thus, the distinction between independent action and joint action is fundamental in antitrust jurisprudence, and a claim will not exist in the absence of the latter. [12] Accordingly, we find and conclude that the district court was

---

[5] ***Sierra Club v. Cedar Point Oil Co.****, 73 F.3d 546 (5th Cir. 1996)*.

[6] We note that Metro appears to be urging this issue only in anticipation of reversal of the grant of summary judgment. Metro argued below that the need for experts could not be determined until after the district court ruled on the pending summary judgment motions. Because Metro is not claiming that this issue impacted its summary judgment positions, and in light of our decision affirming the grant of same, *infra*, we perceive no prejudice to Metro as to this claim. **See** ***Liquid Drill, Inc. v. U.S. Turnkey Exploration, Inc.****, 48 F.3d 927 (5th Cir. 1995)*.

[7] ***Martin v. Memorial Hosp. at Gulfport****, 130 F.3d 1143 (5th Cir. 1997)*.

[8] ***Fed. R. Civ. P.*** *56(c)*.

[9] *15 U.S.C. § 1*. Purely unilateral behavior is illegal under § 2 of the Sherman Act, but only when it threatens actual monopolization. Metro does not allege or offer evidence of monopolization; instead claiming restraint of trade, which is governed by *section 1*.

[10] ***Monsanto Co. v. Spray-Rite Service Corp.****, 465 U.S. 752, 760, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*.

[11] **Id.**

[12] **See id.**; ***United States v. Colgate & Co.****, 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*; ***Business Electronics Corp. v. Sharp Electronics Corp.****, 485 U.S. 717, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*.

Metro contends nevertheless that Ford's unilateral actions are *per se* illegal without evidence of a contract under ***Dr. Miles Medical Company v. John D. Park & Sons Company****, 220 U.S. 373, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*. The flaw in Metro's reasoning is its failure to recognize the existence, and corresponding significance, of the systems of contracts involved in that case. The plaintiff, Dr. Miles Medical Company, had devised a system of contracts with its customers to maintain minimum resale prices at which its proprietary medicine products would be sold. The defendant, John D. Park & Sons, was a wholesale drug company which refused to enter into such a contract. The plaintiff charged that the defendant, "in combination and conspiracy with a number of wholesale and retail dealers in drugs and proprietary medicines," procured its medicines by inducing the violation of the contracts. *31 S. Ct. at 381-82*.

correct in determining that the lack of a "contract, combination … or conspiracy" precludes Metro's Sherman Act claim.

[12]** Metro also contends that Ford's implementation of the CPA program resulted in price discrimination in violation of the Robinson-Patman Act. The district court found that Metro failed to demonstrate that the same level of CPA was not functionally available to all dealers and, thus, no evidence of price discrimination exists. Metro insists that summary judgment on this basis was erroneous because whether or not the discounts were equal, no such defense exists unless the discounts were cost justified or offered in good faith to meet competition. Again, Metro's contentions are not persuasive.

HN4[] Section 2(a) of the Robinson-Patman Act provides that it is unlawful for a seller "either directly or indirectly, to discriminate in price between different purchasers of commodities **[*326]** of like grade and quality." [13] For its claim under § 2(a) of the Robinson-Patman Act to succeed, Metro must adduce evidence of an actual instance of price discrimination, i.e. a difference in price charged to different purchasers or customers of the discriminating seller for products of like grade or quality. [14] If the challenged lower price was in fact -- and not merely theoretically -- made available to the allegedly **[**13]** disfavored purchasers, the seller cannot be held liable under section 2(a). [15]

This "functional availability" theory "is a judicial graft on § 2(a) and is not explicitly embodied in the text of the statute." [16] Nevertheless, the theory is clear and coincides with the purpose of the Act in that a price discount equally available to all purchasers for the same customer and product is not price discrimination. [17] As found by the district court, the record reflects that Metro was treated the same as all other Ford dealers with respect to CPA for the same customer, and products of like grade and quality. The record further establishes that the CPA program functioned to ensure that all Ford dealers issuing **[**14]** bids to the same customer received equal CPA, and that all Ford dealers could meet the competition from other original equipment manufacturers. Metro concedes that the discounts were available to it on an equal basis with other Ford dealers. We therefore must find and conclude that price discrimination did not exist, and that no violation of the Robinson-Patman Act occurred.

The plaintiff's right to relief depended on the validity of the restrictive contracts, making it the central issue before the Court. The Court found, however, that the contracts constituted unlawful resale price maintenance by restricting "the freedom of trade on the part of dealers who own what they sell." This finding that resale price maintenance is *per se* illegal under *§ 1* has been reaffirmed by the Court. **See** ***United States v. Parke, Davis & Co.****, 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*; ***California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc.****, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*; ***Monsanto Co.****, 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464*. In **Business Electronics Corporation**, however, the Court made it clear that vertical price restraints require an agreement or concerted action, and not just an effect on resale prices, to be *per se* unlawful. *485 U.S. 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808*. We thus focus on whether the restraint is unilateral or concerted for all aspects of a *section 1* claim.

[13] *15 U.S.C. § 13(a)*.

[14] ***FTC v. Anheuser-Busch, Inc.****, 363 U.S. 536, 4 L. Ed. 2d 1385, 80 S. Ct. 1267 (1960)*.

[15] **See, e.g.,** ***FTC v. Morton Salt****, 334 U.S. 37, 92 L. Ed. 1196, 68 S. Ct. 822 (1948)*; ***Capital Ford Truck Sales, Inc. v. Ford Motor Co.****, 819 F. Supp. 1555 (N.D. Ga. 1992)*.

[16] ***Precision Printing Co. v. Unisource Worldwide, Inc.****, 993 F. Supp. 338, 350 (W.D. Pa. 1998)*.

[17] **See** ***Morton Salt****, 334 U.S. 37, 92 L. Ed. 1196, 68 S. Ct. 822*. While some functional discounts may be covered by the cost justification defense or the meeting competition defense, these defenses present no bar to the use of the functional availability theory to demonstrate the lack of an essential element of the case (price discrimination), as alleged by Metro. **See** Kintner & Bauer, 3 Federal ***Antitrust Law***, § 25.7, (1983) ("availability" is technically not an affirmative defense, but the negation of an element of the plaintiff's case).

[15]** Having found the grant of summary judgment in favor of Ford on Metro's federal antitrust claims to be appropriate, we turn to Ford's cross-appeal wherein it challenges the remand of its third-party RICO claim and the pendent state law claims. [17] **[**16]** Ford contends that the district court had no legal authority to remand its RICO claim to state court because the claim arose under federal law and was filed in federal court. Ford further contends that because the RICO and state law claims are interrelated, the factors of judicial economy, convenience, fairness, and comity require that all the claims be tried in the same court, making the remand of the pendent state law claims improper. ***HN5***[] We review *de novo* whether the legal authority to remand existed and, further, review the decision to remand for an abuse of discretion. [18]

The essential concept governing in this appeal, perhaps overlooked by Ford, is that the district court's jurisdiction was derived from a *§ 1441* removal. [19] ***HN6***[] When an action is brought to federal court through the *§ 1441* mechanism, "for both removal and original jurisdiction, the federal question must be presented by plaintiff's complaint as it stands at the time the petition for removal is filed and the case seeks entry into the federal system. It is insufficient that a federal **[*327]** question has been raised as a matter of defense or as a counterclaim." [20] Similarly, the defendant's third-party claim alleging a federal question does not come within the purview of *§ 1441* removability. [21] The third-party claim, like a defense or counterclaim, is a pleading by the defendant. The third-party claim does not change the character of the plaintiff's complaint any more than does the defendant's **[**17]** other pleadings. Thus, the federal question alleged in the defendant's third-party claim does not, in and of itself, confer jurisdiction upon the federal court.

The initiation of Ford's third-party claim in federal court, as opposed to that in state court prior to removal, does not change its status. Such a result would be contrary to the rule that removal jurisdiction must be disclosed on the face of the plaintiff's complaint, [22] and that the basis to determine removal jurisdiction so continues throughout the litigation. [23] To hold otherwise would unduly **[**18]** grant a defendant the power to manipulate removal jurisdiction once in federal court, despite overwhelming authority proscribing same.

---

[17] As an initial matter, we note that Metro contends that this issue was mooted by the state court's dismissal of Ford's RICO claim. Ford challenges this contention, and also submits that the remand of the state law claims remains at issue. Although we earlier were advised that the state law claims were scheduled to be tried in state court beginning in April 1998, we have received no additional information. Nevertheless, given our conclusion herein, *infra*, we need not resolve this dispute.

[18] ***Eastus v. Blue Bell Creameries, L.P.****, 97 F.3d 100 (5th Cir. 1996)*. The remand order was based on the district court's discretionary power under *§ 1441(c)* and, thus, § 1447(d) does not bar review. **Id.**

[19] *28 U.S.C. § 1441*.

[20] 14A Wright, Miller & Cooper, Federal Practice and Procedure: Jurisdiction 2d § 3722, at 255-60. **See** ***Gully v. First Nat'l Bank****, 299 U.S. 109, 81 L. Ed. 70, 57 S. Ct. 96 (1936)*.

[21] While a third-party defendant may remove a case to federal court based on the third-party claim, a defendant/third-party plaintiff may not. **See** ***Carl Heck Engineers, Inc. v. Lafourche Parish Police Jury****, 622 F.2d 133 (5th Cir. 1980)*.

[22] ***Great Northern Ry. Co. v. Alexander****, 246 U.S. 276, 281, 62 L. Ed. 713, 38 S. Ct. 237 (1918)* ("It is also settled that a case, arising under the laws of the United States, nonremovable on the complaint, when commenced, cannot be converted into a removable one by evidence of the defendant …, but that such conversion can only be accomplished by the voluntary amendment of his pleading by the plaintiff….").

[23] ***Id.*** *at 282* ("the plaintiff may by the allegations of his complaint determine the status with respect to removability of a case, arising under a law of the United States, when it is commenced, and [] this power to determine the removability of his case continues with the plaintiff throughout the litigation, so that whether such a case nonremovable when commenced shall afterwards become removable depends not upon what the defendant may allege or prove …, but solely upon the form which the plaintiff by his voluntary action shall give to the pleadings in the case as it progresses towards a conclusion.").

[19]** Having determined that Ford's filing of its third-party RICO claim in federal court after removal does not impact the court's removal jurisdiction and its corresponding remand authority, we turn to the remand decision. [24] After dismissing the federal antitrust claims, the court determined that state law predominated over the remaining claims, and that the interests of judicial economy, convenience, fairness, and comity warranted remand under *§ 1441(c)*.

Section 1441(c) provides:

> ***HN8***[] Whenever a separate and independent claim or cause of action within the jurisdiction conferred by section 1331 of this title is joined with one or more **[**20]** otherwise non-removable claims or causes of action, the entire case may be removed and the district court may determine all issues therein, or, in its discretion, may remand all matters in which State law predominates.

Thus, ***HN9***[] for remand to be proper, the claim remanded must be "(1) a separate and independent claim or cause of action; (2) joined with a federal question; (3) otherwise non-removable; and (4) a matter in which state law predominates." [25]

As an initial matter, we consider Ford's contention that district courts have no authority to remand federal claims. Although RICO is a federal cause of action, state courts have concurrent jurisdiction to adjudicate civil claims arising thereunder. [26] Thus, any attempt to equate "original jurisdiction" with "exclusive jurisdiction" in this **[*328]** instance would be error. [27] The cases relied on by Ford are distinguishable because therein the court sought to remand federal claims which would have been otherwise removable. [28] **[**22]** As **[**21]** discussed *supra*, Ford's third-party RICO claim could not, and did not, confer removal jurisdiction in this instance. In addition, we have since noted that the new *§ 1441(c)* permits courts to remand an entire action, or distinct claims, both state and federal, if state law predominates. [29] We thus must find no merit in Ford's contentions.

In the case at bar, the federal antitrust claims constituted the basis of the court's removal jurisdiction, and were joined with Ford's third-party RICO claim. Because the third-party RICO claim could not provide removal jurisdiction, it qualifies as an "otherwise non-removable" claim. Thus, only the first and fourth elements of the *§ 1441(c)* analysis can be disputed. [30]

---

[24] Once the claims on which removal jurisdiction was based were dismissed, the district court rightfully reevaluated its jurisdiction and the position of the action. **See** ***Menchaca v. Chrysler Credit Corp.****, 613 F.2d 507, 511 (5th Cir. 1980)* ("It is axiomatic that ***HN7***[] a district court may inquire into the basis of its subject matter jurisdiction at any stage of the proceedings.").

[25] ***Eastus****, 97 F.3d at 104*.

[26] ***Tafflin v. Levitt****, 493 U.S. 455, 107 L. Ed. 2d 887, 110 S. Ct. 792 (1990)*.

[27] If the federal claim in this case fell within the court's exclusive jurisdiction, rather than concurrent, remand of the claim would be improper because the state court would be unable to hear the federal claim. Accordingly, a federal claim within the court's exclusive jurisdiction would not implicate *§ 1441* removal jurisdiction because the state court would have no jurisdiction at the outset. **See** ***Arizona v. Manypenny****, 451 U.S. 232, 68 L. Ed. 2d 58, 101 S. Ct. 1657 (1981)*.

[28] ***Buchner v. FDIC****, 981 F.2d 816 (5th Cir. 1993)* (plaintiff's complaint conferred removal jurisdiction over claim sought to be remanded); ***In re Wilson Industries, Inc.****, 886 F.2d 93 (5th Cir. 1989)* (same); ***Burks v. Amerada Hess Corp.****, 8 F.3d 301 (5th Cir. 1993)* (same); ***Smith v. Texas Children's Hosp.****, 84 F.3d 152 (5th Cir. 1996)* (same).

[29] ***Eastus****, 97 F.3d 100* (and cases cited therein). **See also** 14A Wright, Miller & Cooper, Federal Practice and Procedure: Jurisdiction 2d § 3724 (Supp. 1997) (and cases cited therein).

[30] We note that Ford misapplies the *§ 1441(c)* analysis by assuming that the RICO claim forms the basis of jurisdiction and must be considered in relation to the state law claims. As discussed *supra*, this is error.

The first element requires independence as well as separateness. "Where there is a single wrong to [the] plaintiff, for which relief is sought, **[**23]** arising from an interlocked series of transactions, there is no separate and independent claim or cause of action under *§ 1441(c)*." [31] "If one claim depends on establishing liability under the other, the two cannot be found to be independent." [32]

We find that, in this case, the federal antitrust claims and the RICO claim are separate and independent. Metro sought relief from Ford based on its implementation of the CPA program, alleging price fixing and discrimination under the federal antitrust laws. In its third-party RICO action, Ford sought relief from Foley for alleged fraud and misrepresentation in the operation of the Metro dealership. Although the CPA program was involved in both the antitrust and RICO actions, the claims rely on different supporting facts and clearly seek separate relief for distinct wrongs.

Ford concedes that the RICO claim and the pendent **[**24]** state law claims are substantially related, calling for litigation in one forum. In fact, the RICO claim is so intertwined with the state law claims as to be difficult to treat separately. We perceive no incompatibility between state court jurisdiction and federal interests [33] and, thus, find that state law predominates. Accordingly, we find and conclude that *§ 1441(c)* authorized remand of the third-party RICO claim, and we affirm that portion of the order. In light of this conclusion, and considering the interests of judicial economy, convenience, fairness, and comity, we must conclude that the district court did not abuse its discretion in correspondingly remanding the pendent state law claims. [34]

The judgment appealed is AFFIRMED.

HN1[] **Discovery, Methods of Discovery**

Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The initial burden is on the moving party to show that there is an absence of evidence to support the non-moving party's case.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN2[] Summary Judgment, Entitlement as Matter of Law

Once the initial showing has been made, the burden shifts to the non-moving party to designate specific facts showing there is a genuine issue for trial. A party may not rely on the allegations of its pleadings but must establish the existence of a genuine issue of material fact through admissible evidence. When determining whether there is a material issue of fact, the nonmoving party's evidence is to be believed; all justifiable inferences are to be drawn in its favor; and its nonconclusory version of any disputed issue of fact is assumed to be correct.

Transportation Law > Air & Space Transportation > Aviation Certificates > General Overview

Transportation Law > Air & Space Transportation > Maintenance & Safety

HN3[] Air & Space Transportation, Aviation Certificates

Under Federal Aviation Regulations, for a manufacturer to obtain a Type Certificate from the Federal Administration, it must first submit a type design, which includes the drawings and specifications necessary to define the configuration and design features of the aircraft, and information on the dimensions, materials and processes necessary to define its structural strength.

Transportation Law > ... > US Federal Aviation Administration > Notices & Orders > Judicial Review

Transportation Law > Air & Space Transportation > Maintenance & Safety

HN4[] Notices & Orders, Judicial Review

A Supplemental Type Certificate is issued by the Federal Aviation administration to someone other than an original manufacturer of an airplane to certify that a modification to the original type design complies with the regulations applicable to the modification.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Antitrust & Trade Law, Sherman Act

The offense of monopoly under *§ 2* of the Sherman Act, *15 U.S.C.S. § 1*, has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Tying Arrangements, Clayton Act

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different, or tied, product, or at least agrees that he will not purchase that product from any other supplier. Such an arrangement violates *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, if the seller has appreciable economic power in the tying product market and if the arrangement affects a substantial volume of commerce in the tied market.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN7[] **Clayton Act, Claims**

The Clayton Act authorizes private actions to enforce the antitrust laws. *15 U.S.C.S. §§ 15* and *26*. To establish standing to bring an enforcement action seeking injunctive relief under *15 U.S.C.S. § 26*, a plaintiff must show (1) an antitrust injury; and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws.

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] **Antitrust & Trade Law, Clayton Act**

To show an antitrust injury, a plaintiff must show an injury of the type which the antitrust laws are intended to prevent and which flow from the reason that the defendant's conduct is prohibited. To meet the second prong of the test, the plaintiff must show the injury resulted directly from the defendant's violation. There are six factors to be considered when evaluating antitrust standing: (1) the causal connection between the alleged antitrust violation and the harm; (2) improper motive or intent of defendants; (3) whether the claimed injury is one sought to be redressed by antitrust damages; (4) the directness between the injury and the market restraint resulting from the alleged violation; (5) the speculative nature of the damages claimed; and (6) the risk of duplicative recoveries or complex damage apportionment.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Regulated Practices, Market Definition**

It is not necessary for a plaintiff to establish market power where a plaintiff directly shows anti-competitive effects, such as control over output or price.

Opinion by: J. THOMAS MARTEN

Opinion

[*1186] *MEMORANDUM ORDER*

Timothy Mellon sued Cessna Aircraft Company, alleging Cessna's policy of refusing to service Cessna manufactured aircraft with modifications unapproved by Cessna violates *Sections 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*. Mellon also asserts a promissory estoppel claim under state law.

Mellon moved for summary judgment on the promissory estoppel claim. Cessna moved for summary judgment on all claims. On May 18, 1998, the court denied the parties' cross motions for summary judgment on the estoppel **[**2]** claim. Cessna's motion for summary judgment on the antitrust claims was taken under advisement. The court is now prepared to rule.

I. Summary Judgment Standard.

HN1[] Summary judgment is appropriate if the pleadings, depositions, answers to interrogatories and admissions on file, together with affidavits, show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed.R.Civ.P. 56(c)*. The initial burden is on the moving party to show that there is an absence of evidence to support the non-moving party's case. *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*.

HN2[] Once the initial showing has been made, the burden shifts to the non-moving party to designate specific facts showing there is a genuine issue for trial. *Celotex, 477 U.S. at 324*. A party may not rely on the allegations of its pleadings but must establish the existence of a genuine issue of material fact through admissible evidence. *Panis v. Mission Hills Bank, N.A., 60 F.3d 1486, 1490 (10th Cir. 1995)*, *cert. denied*, *516 U.S. 1160, 116 S. Ct. 1045, 134 L. Ed. 2d 192 (1996)*. When determining whether there is **[**3]** a material issue of fact, the nonmoving party's evidence is to be believed; all justifiable inferences are to be drawn in its favor; and **[*1187]** its nonconclusory version of any disputed issue of fact is assumed to be correct. *Multistate Legal Studies, Inc. v. Harcourt Brace Publ., Inc., 63 F.3d 1540, 1545 (10th Cir. 1995)*, *cert. denied*, *516 U.S. 1044, 116 S. Ct. 702, 133 L. Ed. 2d 659 (1996)*.

II. Facts.

The following factual scenario is based on the relevant factual assertions of the parties, where supported by citations to admissible evidence and with all reasonable inferences drawn in Mellon's favor. [1]

---

[1] Cessna's statement of facts contains interpretations of governmental regulations. However, Mellon does not dispute Cessna's interpretations, so the court treats these interpretations as accurate for summary judgment purposes.

[4]** A. Mellon's Purchase of the Plane and the Service Letter.

Cessna has manufactured a variety of business jet aircraft, including the Model 501SP "Citation I" owned by Mellon, as well as the model 525 "CitationJet." Mellon purchased his jet in May 1989, for $ 1,333,500.

A major reason Mellon decided to purchase the Cessna was that it was a jet with single-pilot capability. Mellon refused to consider a Falcon 10 as it was not capable of single-pilot flight without a modification and Mellon thought the modification was not feasible. Mellon refused to consider non-jet aircraft.

Another factor in Mellon's decision to purchase the plane was the availability of service and inspections at Cessna-owned Citation service centers. [2] The pre-purchase inspection of the plane was conducted at Cessna's Citation service center in Orlando. From the time he purchased the plane until September 1995, Mellon regularly brought the plane to Cessna's company-owned Citation service center in Newburgh, New York, particularly for major maintenance and "phase inspections" required by the Federal Aviation Administration (FAA).

[5]** Before Mellon purchased the plane, it had been serviced by providers other than Cessna. Prior to September 1995, Mellon also had the plane serviced by other service providers and on one occasion by a Cessna-authorized service center in Germany.

In the Spring of 1992, Mellon began to consider having his citation modified by installing an Eagle 400 modification manufactured by Sierra Industries, Inc. Before deciding whether to purchase the Eagle 400 modification, Mellon asked Charles Knapp, the acting general manager of Cessna's Newburgh service center, if Cessna would continue to perform major maintenance and phase inspections on the aircraft if Mellon had the plane equipped with the Eagle 400 modification. [3]

Knapp told Mellon he would check **[**6]** with Cessna management in Wichita and get back to him. Knapp asked one or more Cessna employees in Wichita or elsewhere whether Cessna would continue to service Mellon's plane if the Eagle 400 modification was installed. Knapp reported back to Mellon that he had consulted with Cessna management in Wichita and Cessna would continue to service the plane if Mellon had the Eagle 400 modification installed. Mellon purchased the modification from Sierra Industries and it was installed by Sierra in Texas.

Cessna issued Service Letter SL500-03-01 on September 22, 1995. The text of the letter provides:

> **[*1188]** This service letter transmits information to owners/operators regarding the Supplemental Type Certificate (STC) process affecting Cessna Citation aircraft. The STC is an FAA approved change to aircraft within FAA jurisdiction. STCs that are developed by Cessna, or that are purchased and installed by Cessna, are covered by Cessna warranty and will be supported by Cessna.
>
> STCs that are developed without Cessna involvement and engineering approval will not be supported by Cessna. The STC holder for the particular installation is expected to accept responsibility for the warranty and

---

In its reply brief, Cessna objects to Mellon's practice of stating the fact which he wishes to infer from the evidence, then identifying the evidence which he claims supports the inference. Cessna argues this practice violates D.Kan.R. 56.1 and asks the court to disregard all such inferences. The court does not consider Mellon's practice to be in violation of the local rule. Where the cited facts reasonably support the inference, the court presumes, as it must in the summary judgment stage, that Mellon's inference is true. Mellon's approach actually makes it easier for the court to evaluate the significance of the cited facts and the reasonableness of the inference. The court notes that Cessna followed a similar practice. *See e.g.*, Cessna's Statement of Undisputed Facts PP 48, 49, 104.

[2] Cessna cites other factors Mellon considered, as well as other planes. This does not mean that Mellon did not consider the availability of Cessna service as a factor.

[3] Cessna purports to contradict this assertion, but instead makes other factual assertions which do not contradict Mellon's assertion that he asked Knapp whether Cessna would continue to perform major maintenance and phase inspections on the plane if he had it modified.

> product **[**7]** support for the installation on Citation aircraft. It is recommended that operators who are contemplating an STC installation, address the support issue directly with the STC holder prior to installation.
> Citation aircraft that have installed STCs that permit performance and/or alter limitations outside the Cessna FAA Approved Flight Manual may be refused service at Cessna service centers.
> Cessna-owned service centers will not provide support in the way of installation, spare parts, repair, inspection or warranty for STCs not approved by Cessna.

When Cessna issued the Service Letter, it issued similar letters on all other models of jet aircraft it manufactures.

HN3[] Under Federal Aviation Regulations (FARs), for a manufacturer to obtain a Type Certificate (TC) from the Federal Administration (FAA), it must first submit a type design, which includes the drawings and specifications necessary to define the configuration and design features of the aircraft, and information on the dimensions, materials and processes necessary to define its structural strength.

HN4[] A Supplemental Type Certificate (STC) is issued by the FAA to someone other than an original manufacturer of an airplane to certify **[**8]** that a modification to the original type design complies with the regulations applicable to the modification. Mellon's Citation I is equipped with two STCs: the Eagle and the Eagle 400.

James E. Morgan, Cessna's Vice President for Service Facilities, testified that he believes over 100 Cessna 500/501 series Citations are equipped with Eagle or Eagle 400 modifications. Prior to the issuance of the Service Letter, Cessna serviced between 5 and 10 of these planes.

Mellon's expert testified a plane comparable to Mellon's is worth about $ 50,000 less than it would otherwise be worth if all phase inspections and major maintenance had been performed at a Cessna-owned service center. Mellon and prior owners had the plane serviced at non-Cessna-owned service facilities. However, Cessna does not allege that prior to the issuance of the Service Letter, phase inspections or major maintenance were performed at non-Cessna-owned service facilities.

Upon issuance of the Service Letter, Cessna-owned service centers initially refused to provide any service to modified Citations. [4] When Mellon complained about the Service Letter, Cessna offered to arrange for service at Cessna-authorized service **[**9]** centers.

In June 1997, after Mellon filed this lawsuit, Cessna issued a policy revision indicating that modified Citations were no longer "totally excluded" from Cessna-owned service centers.

Since the Service Letter was issued, Mellon has had his plane serviced as much as possible by Cessna. Sierra has serviced his plane and both Cessna and Sierra have performed phase inspections. Mellon also has obtained service at other non-Cessna service centers.

B. The Market.

The parties agree that the geographical market for new and used business jets is worldwide. Mellon defines the relevant antitrust market for aircraft as business jets, new and used, that can be flown by a single pilot. Cessna admits its Models 500 and 501, including those with STC modifications, are part of the competition in Cessna's efforts to sell the CitationJet. **[**10]** Sales of the CitationJet **[*1189]** increased after the Service Letter was issued.

Cessna disputes Mellon's market definition, and relying on testimony from Cessna officials and retained experts, contends the following planes are competitors of the CitationJet:

(1) Cessna Models 500, 501SP, 525, 550, S-550, 551 and 560, which are jet aircraft which can be flown by a single pilot crew.

---

[4] Cessna disputes this fact, but Mellon has cited admissible evidence from which it is reasonable to conclude that Cessna initially refused to provide any service to modified aircraft.

(2) The Lear 31 and the Beech Jet 400-A, which are jets but cannot be flown by a single pilot.

(3) King Air 90s, King Air 200s, King Air 300s and the Beech Starship, which can be flown by a single pilot, but are turbo props.

When attempting to sell CitationJets, Cessna targets owners of turboprops, Citation Models 500, 501, and 525, and Lear Models 23 and 24. Cessna is the only manufacturer of business jets that, as built by the manufacturer, can be certified by the FAA to be flown by a single pilot. Other manufacturers have such planes under development. Raytheon is taking orders aggressively for the single-pilot business jet it is developing, the Premier I.

Cessna's market surveys indicate that most of the competition for the sale of the Citation Jet comes from used Citations. The surveys also indicate that **[**11]** single-pilot capability was listed as an important factor for purchasers of the CitationJet, ranging from a low of 12% in 1991 to a high of 48% in 1996. Cessna also conducted a survey which showed less than 10% of the Cessna fleet was flown single pilot.

Mellon's expert witness testified that there is a discrete market for single-pilot jet aircraft. He testified that he had 33 years experience in the aircraft industry and had been involved in more than 1000 aircraft sales transactions. Cessna objects to the report's conclusions because it contains no analysis of reasonable substitution or interchangeability. Cessna's damages expert testified that, in his experience, 5 to 7 percent of aircraft purchasers are only interested in single-pilot jet aircraft.

Cessna sells approximately 60 CitationJets each year. About 10 used CitationJets are sold each year. About three Citations with Eagle modifications are sold each year. About nine Citations are equipped with Sierra modifications each year. In the absence of the Service Letter, the president of Sierra Industries believes his sales would have been greater. He testified that prior to the issuance of the Service Letter, he had a healthy **[**12]** backlog of orders. At the time of his deposition, he had only two long-wing modifications pending, and no Eagle or Eagle 400 orders.

Cessna service for major maintenance and phase inspections costs substantially more than such service from other providers.

The original developer of the Sierra Modification STC went bankrupt. A subsequent owner of the rights to the STC went out of business. Sierra Industries is the present owner of the rights to the STC.

The FAA has not issued any Air Worthiness Directives (AWDs) or taken any other action indicating that Citations equipped with Sierra Modifications are unsafe or have long-term safety problems. Cessna's expert witness testified that he saw no safety-related issues involved in servicing modified aircraft and that his own service center continues to service such aircraft. Sierra Industries offered to provide Cessna with the technical specifications of the modified aircraft and, prior to the issuance of the Service Letter, worked closely with Cessna when technical questions arose.

Prior to the issuance of the Service Letter, some Cessna employees felt comfortable servicing modified Citations and were willing to continue servicing the **[**13]** modified aircraft. Also prior to the issuance of the Service Letter, the manager of Cessna's Newburg facility asked the sales and marketing manager to determine how much income the center would lose if it stopped servicing modified Citations. After the Service Letter was issued, Cessna employees provided different justifications for the Service Letter. Cessna refuses to certify the airworthiness of modified aircraft and will not accept modified aircraft as a trade-in when purchasing a new CitationJet.

III. Analysis.

Mellon claims that Cessna violated *Section 2* of the Sherman Act by monopolizing or **[*1190]** attempting to monopolize the market for single-pilot business jets. He argues Cessna violated *Section 1* of the Sherman Act by tying Cessna service to the purchase of non-modified Cessna aircraft.

HN5[] The offense of monopoly under *Section 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

*Eastman Kodak Co. v. Image Technical Services, 504 U.S. 451, 481, [**14] 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

HN6[] A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different, or tied, product, or at least agrees that he will not purchase that product from any other supplier. Such an arrangement violates *Section 1* of the Sherman Act if the seller has appreciable economic power in the tying product market and if the arrangement affects a substantial volume of commerce in the tied market. *Kodak, 504 U.S. at 461-62*.

Cessna first argues both of Mellon's antitrust claims fail because he lacks standing to assert them. Cessna then argues Mellon's *Section 2* monopoly claim fails because he cannot show the existence of a legally cognizable and relevant market for jet aircraft in which Cessna possesses monopoly power. Next, Cessna argues Mellon cannot establish that its conduct was intended to preserve or create monopoly power in a relevant market, thus Mellon's *Section 2* claim fails. Cessna argues Mellon's *Section 1* tying claim fails because he cannot show Cessna possesses market power in the tying market, service for Cessna Citations, sufficient to impact the tied market. Finally, **[**15]** Cessna argues injunctive relief is inappropriate under the facts of this case, and since Mellon does not seek monetary damages in his antitrust claims, Cessna is entitled to summary judgment. Each argument will be addressed in turn.

A. Standing.

Cessna first argues that Mellon lacks standing to bring his antitrust claims. **HN7**[] The Clayton Act authorizes private actions to enforce the antitrust laws. *15 U.S.C. §§ 15* and *26*. To establish standing to bring an enforcement action seeking injunctive relief under *Section 26*, a plaintiff must show (1) an antitrust injury; and (2) a direct causal connection between that injury and a defendant's violation of the antitrust laws. *Reibert v. Atlantic Richfield Co., 471 F.2d 727, 730-31* (10th Cir.) (applying test to claims brought under *Sections 15* and *26*), *cert. denied*, *411 U.S. 938, 36 L. Ed. 2d 399, 93 S. Ct. 1900 (1973)*. *See also* *Sports Racing Services, Inc. v. Sports Car Club of America, Inc., 131 F.3d 874, 882 (10th Cir. 1997)* (applying test to claim for treble damages under *Section 15*).

Sports Racing explained how the two factors are evaluated. **HN8**[] To show an antitrust injury, a plaintiff must show an injury of the type which **[**16]** the antitrust laws were intended to prevent and which flow from the reason that the defendant's conduct is prohibited. *131 F.3d at 882*. To meet the second prong of the test, the plaintiff must show the injury resulted directly from the defendant's violation. *Id. Sports Racing* identified six factors to be considered when evaluating antitrust standing:

> (1) the causal connection between the alleged antitrust violation and the harm; (2) improper motive or intent of defendants; (3) whether the claimed injury is one sought to be redressed by antitrust damages; (4) the directness between the injury and the market restraint resulting from the alleged violation; (5) the speculative nature of the damages claimed; and (6) the risk of duplicative recoveries or complex damage apportionment.

Sports Racing, 131 F.3d at 882 (quoting *City of Chanute, Kan. v. Williams Natural Gas Co., 955 F.2d 641, 652 n.14* (10th Cir.), *cert. denied*, *506 U.S. 831, 121 L. Ed. 2d 57, 113 S. Ct. 96 (1992)*, *overruled in part on other grounds,* *Systemcare, Inc. v. Wang Lab. Corp., 117 F.3d 1137 (10th Cir. 1997)*(en banc)). *Sports Racing* recognized that standing analysis must take into **[**17]** account the type of antitrust claim being asserted. *131 F.3d at 882*.

[*1191] Cessna sets forth all of the factors listed by the Tenth Circuit and cites a number of cases where a plaintiff was found not to have standing to assert an antitrust claim. However, Cessna presents only two arguments, both of which address the fourth factor listed by the Tenth Circuit: whether Mellon can establish damages related to Cessna's allegedly illegal conduct.

Cessna first argues Mellon cannot show an injury as a result of Cessna's conduct because his plane was serviced by providers other than Cessna prior to the issuance of the Service Letter. Cessna cites Mellon's expert's testimony that an owner voluntarily having major maintenance or phase inspections performed by another provider would suffer the same damages. Cessna ignores the fact that Mellon's expert clearly emphasized the importance of major maintenance and phase inspections, as opposed to routine maintenance. Cessna cites no evidence, and does not even argue, that Mellon's plane received either major maintenance or phase inspections from other providers prior to the issuance of the Service Letter. Cessna's arguments therefore go to the amount of **[**18]** damages Mellon suffered as a result of Cessna's conduct, rather than the existence of such damages. For summary judgment purposes, Mellon can establish that he suffered damages related to Cessna's conduct.

Cessna next argues Mellon is an inappropriate plaintiff because he regularly flies his plane internationally. Cessna has no company-owned service centers outside the United States. Cessna argues this would regularly place Mellon in a position where he would have to use non-Cessna service. While Cessna cites some instances where Mellon's plane received service outside the United States, Cessna does not cite any instances where Mellon's plane received major maintenance or phase inspections outside the United States. Cessna does not argue that Mellon would have to schedule major maintenance or phase inspections outside the United States. At the summary judgment stage all reasonable inferences must be drawn in Mellon's favor. In the absence of evidence to the contrary, it is reasonable to assume Mellon could schedule all major maintenance and phase inspections to occur while his plane was in the United States. Thus, the fact that Mellon flies his plane internationally does not mean **[**19]** that he would be unable to show damages.

The court finds it unnecessary to address the other five factors of *Sports Racing*, where Cessna does not even argue that any of the other factors weigh against conferring standing under the facts of this case. Cessna has the burden of establishing that it is entitled to summary judgment and the court will not construct arguments on its behalf. This would be unfair to Mellon, who would have no opportunity to respond to such arguments. Accordingly, Mellon has standing to assert his antitrust claims.

B. Relevant Market for Jet Aircraft.

Mellon argues the relevant market for his *Section 2* claim is business jets that can be flown by a single pilot and that Cessna possesses monopoly power in that market. Cessna argues (1) Mellon has defined the market too narrowly, and (2) Mellon cannot show Cessna has monopoly power in the relevant market, regardless of which definition is used. Cessna argues that Mellon has the burden of establishing the relevant market and that Cessna has market power in that market.

The purpose in ***antitrust law*** of market definition is to illuminate a practice's effect on competition, rather than as an end unto itself. **[**20]** *Law v. National Collegiate Athletic Assoc., 134 F.3d 1010, 1020 (10th Cir. 1998)*. *Accord, Allen-Myland, Inc. v. International Business Machines Corp., 33 F.3d 194, 209* (3rd Cir.)("Market share is just a way of estimating market power, which is the ultimate consideration. When there are better ways to estimate market power, the court should use them.") (citations omitted), *cert. denied*, *513 U.S. 1066 (1994)*. What Mellon must actually do is present a reasonable economic theory with citations to evidence indicating the theory accurately reflects the market. *Kodak, 504 U.S. at 468-69*. If Mellon cites evidence of anti-competitive effects, to obtain summary judgment Cessna has the burden of showing that an inference **[*1192]** of market power is unreasonable. *Id., 504 U.S. at 468-69, 471*.

Law held that ***HN9***[] it is not necessary for a plaintiff to establish market power where a plaintiff directly shows anti-competitive effects, such as control over output or price. *Law, 134 F.3d at 1019-21*. In *Law*, the Tenth Circuit found evidence that the NCAA imposed a cap on salaries for certain assistant coaches at member schools was sufficient to show anti-competitive effects. It was **[**21]** not necessary for the plaintiffs to present an elaborate demonstration of the relevant market. *Id.* As discussed below, for summary judgment purposes Mellon has established a relevant product market and produced direct evidence of anti-competitive effects. While Mellon's evidence of anti-competitive effects is not as direct as that presented in *Law, Law* is important because it illustrates the perspective from which the definition of relevant market must be established.

In *Kodak*, the defendant was a manufacturer of complex business machines and also serviced the machines. Other manufacturers of similar machines existed. However, parts for the machines were not interchangeable. The plaintiff cited evidence that the defendant restricted access to parts for other service providers, that customers switched to the defendant's service, and that some service providers went out of business as a result. The Supreme Court held this was sufficient evidence to raise a material question of fact for the jury. *Kodak, 504 U.S. at 469*.

Here, Mellon cited evidence that Cessna recognizes sales of used Citations, particularly those with performance modifications, as the major competition **[**22]** for sales of new CitationJets. He cited evidence of increased sales of CitationJets after the Service Letter was issued. He cited evidence of decreased sales of modifications to existing Citations. Finally, he cited evidence that the market value for modified used Citations decreased as a result of Cessna's refusal to provide service and support for modified aircraft. Mellon has cited evidence of anti-competitive effects. Accordingly, to obtain summary judgment Cessna must show that an inference of market power is unreasonable.

Cessna argues that Mellon has failed to take into account reasonable interchangeability of use and the cross elasticity of demand between CitationJets and alternative aircraft, citing *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*; *TV Communications Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022* (10th Cir.), *cert. denied*, *506 U.S. 999, 121 L. Ed. 2d 537, 113 S. Ct. 601 (1992)*; *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3rd Cir. 1997)*, *cert. denied*, *118 S. Ct. 1385 (1998)*; *Allen-Myland, supra*; *Tower Air, Inc. v. Federal Exp. Corp., 956 F. Supp. 270 (E.D.N.Y.* ***[**23]*** *1996)*; and *B.V. Optische Industrie De Oude Delft v. Hologic, Inc., 909 F. Supp. 162 (S.D.N.Y. 1995)*. Cessna claims that the market, as defined by Mellon, is tailored to his own personal preferences.

Cessna argues a number of single-pilot aircraft, as well as non-single pilot aircraft, compete with the Cessna Citation and should be included in the market definition, including turbo-prop aircraft, modified multi-pilot business jets, multi-pilot business jets, and single-pilot jet aircraft in design by other manufacturers. Cessna cites evidence supporting this argument. Cessna claims that when these other aircraft are considered, Cessna has less than 48% of the market. However, Cessna merely raises a question of material fact. Mellon's personal preferences happen to coincide with what Cessna's own marketing materials indicate are the characteristics of the CitationJet's major competition. Cessna has not established that Mellon's suggested market definition is unreasonable as a matter of law. Under Mellon's definition of the relevant market, Cessna controls approximately 73% of the market. This is sufficient to show market power for summary judgment purposes. *See* *Kodak, 504 U.S.* ***[**24]*** *at 481* (citing cases). The cases Cessna cites are distinguishable and do not support Cessna's position.

In *Brown Shoe*, the government sought to block a merger between two shoe companies under *15 U.S.C. § 18*. The Supreme Court reasoned that the proper way to define the relevant markets was with regard to the **[*1193]** facts of the actual market. The district court made factual findings and divided the market into three lines of shoes: men's, women's, and children's shoes. The Supreme Court rejected attempts by the shoe companies to further subdivide the market before considering whether the proposed merger would substantially impact competition. *Brown Shoe, 370 U.S. at 323-28*. The Court held that because there was no difference in the competitive effects of the merger when so subdivided, further subdivision was impractical and unwarranted. *Id., 370 U.S. at 327-28*.

Here, Mellon's action is brought pursuant to *15 U.S.C. § 2* and the motion is one for summary judgment rather than a review of rulings based on findings of fact. Furthermore, here there is evidence the competitive effects are different if the market is subdivided.

In *TV Communications*, a cable TV operator sued a **[**25]** cable television source provider. The operator alleged the provider had a monopoly over a single cable television station. The district court granted a motion to dismiss. The Tenth Circuit held an antitrust claim could not be based on a natural monopoly a company holds over its own product. *964 F.2d at 1022*. To the extent that Cessna argues *TV Communications* stands for the proposition that a single brand of a product or service can never define a relevant market, *Kodak* explicitly rejected this position. *Kodak, 504 U.S. at 481-82*. Furthermore, the *TV Communications*' court noted that it could not consider whether the defendant had a monopoly in broader markets, such as subscription television programming or sports programming, but was limited to considering the allegations of the complaint. Here, Mellon does not allege that Cessna monopolized or was trying to monopolize the market in CitationJets. He alleges Cessna was trying to monopolize the market in single-pilot jet aircraft.

In *Queen City*, Domino's Pizza and its franchisees entered into a contract agreement. The franchisees alleged that Domino's Pizza was using contract provisions to force the franchisees to **[**26]** purchase supplies from it at supracompetitive prices. The franchisees sought to limit the market to supplies for Domino's franchisees. The Third Circuit rejected this approach, holding that the relevant market must include supplies for all pizza shops because such supplies were interchangeable. The court emphasized that a supplier's exercise of contractual restraints is not necessarily equivalent to the exercise of monopoly power. *Queen City, 124 F.3d at 436-39*. The court distinguished *Kodak* because the franchisees failed to allege that the supplies at issue were unique. *Id. 124 F.3d at 439*. Here, as discussed above, Cessna has merely raised a material question of fact as to whether a single-pilot jet aircraft forms a unique market.

In *Allen-Myland*, the plaintiff, AMI, reconfigured IBM mainframe computers by installing module upgrades which increased the processing power of the computers. The modules were purchased directly from IBM or from customers who had purchased upgrades from AMI. IBM instituted a policy bundling installation with the price of the modules and requiring that replaced modules be returned to IBM.

AMI sought to define the relevant market as large-scale **[**27]** mainframe computers. Alternatively, AMI sought to limit the market to parts and services for upgrading IBM mainframes or all manufacturer's mainframes. Instead, the district court expanded the relevant market to include various substitutes that it believed shared cross-elasticity of demand with large-scale mainframe computers.

The Third Circuit rejected a number of the additions because they amounted to double counting. It rejected the addition of used IBM equipment because IBM had too much control over that market. It rejected the addition of memory and other internal upgrades because they were not reasonably interchangeable with processor upgrades. The Third Circuit then vacated factual findings that small computers, peripheral devices and software upgrades competed with processor upgrades. On remand, the district court was referred to *Kodak* and directed to consider evidence that high switch-over costs might effectively prevent small computers from competing with mainframe upgrades. With regard to peripheral devices and software, the Third Circuit found the evidence on which the district court relied was insufficient **[*1194]** to support its findings, but noted that the district court **[**28]** was free to consider additional evidence on remand. Finally, the Third Circuit found there was sufficient evidence to support the district court's rejection of AMI's proposed submarkets. *Allen-Myland, 33 F.3d at 201-209*.

Allen-Myland does not support Cessna's position. The thrust of the decision is that a detailed factual inquiry must be conducted. Similarly, *Tower Air* found that summary judgment was inappropriate where a definition of the relevant market could not be made based solely upon the undisputed facts. *Tower Air, 956 F. Supp. at 281-282*.

In *B.V. Optische*, the plaintiff failed to plead that the market for certain chest X-ray equipment was not interchangeable with the general market for X-ray equipment. *B.V. Optische, 909 F. Supp. at 171-172*. Here, Mellon has plead and cited evidence in support of his argument that the single-pilot jet aircraft market is the relevant market.

A material question of fact exists as to the relevant product market and Cessna's power in that market. Accordingly, Cessna is not entitled to summary judgment on Mellon's *Section 2* antitrust claim.

C. Intent to Preserve Monopoly Power.

Cessna argues that Mellon's *Section **[**29]** 2* claim fails because he cannot show that Cessna issued the Service Letter with the intent to preserve monopoly power in the market for single-pilot jet aircraft.

Cessna first argues that Mellon cannot point to any "smoking-gun" statements from Cessna executives, thus he cannot establish intent to monopolize. However, intent may be established by circumstantial evidence, including evidence of a negative impact on competition. *See* *Kodak, 504 U.S. at 483* (where plaintiff presented evidence that Kodak took actions to preserve its monopoly, liability will turn on whether legitimate business reasons can explain Kodak's actions). Cessna also points to the self-serving statements of its officials that they were not concerned with sales of modified aircraft and had a neutral position on modifications. It is reasonable to infer from Cessna's marketing reports that Cessna did consider used Citations, including modified Citations, as competition. It also is reasonable to infer from the decision not to service modified aircraft that Cessna was not neutral on the issue of whether the aircraft should be modified.

Mellon has presented circumstantial evidence from which it is reasonable to infer **[**30]** that Cessna was motivated by an intent to eliminate modified aircraft as competition to the CitationJet. He cited evidence that various Cessna officials offered different justifications for the Service Letter. Cessna explains this away by arguing that all of the stated reasons were factors in issuing the Service Letter. This may well be true, but a reasonable fact finder could conclude otherwise. Mellon cited evidence from which it is reasonable to infer that no legitimate safety concerns exist, thus negating the main reason proffered for the issuance of the Service Letter.

Cessna then argues that Mellon's theory is economically unfeasible because Cessna would forego sales opportunities by turning away service customers. Cessna cites no evidence indicating the impact of its decision on sales, or on the amount of sales that occur as a result of maintenance service. Mellon cites evidence that Cessna's sales of the CitationJet increased and that the value of used-modified Citations decreased after the Service Letter was issued. This suggests that Mellon's theory is economically reasonable.

Cessna next argues that legitimate business concerns -- customer safety and product integrity **[**31]** -- prompted the Service Letter. As previously noted, Mellon has cited evidence that there are no legitimate safety concerns, including evidence that Sierra Industries cooperated with Cessna by providing technical data and assistance. With regard to product integrity, Mellon cited evidence that before the Service Letter was issued, Cessna had serviced modified aircraft for more than a decade.

Cessna next argues that its lack of market power in the service market means that it cannot have intended to restrict competition in the sales market. This argument fails because Mellon's monopoly claim is not based solely on the tying arrangement. Mellon also argues, and cites evidence in support, **[*1195]** that Cessna's decision not to service modified Citations sends a significant message to purchasers of single-pilot jet aircraft, i.e. that Cessna considers modified Citations unsafe.

Cessna next cites evidence of problems with modified Citations, including fuel leaks in Mellon's plane and difficulty obtaining technical information. Cessna also cites evidence that it issued similar service letters on other modified aircraft. This is evidence that Cessna may have been motivated by safety concerns. However, **[**32]** it merely indicates that a material question of fact exists.

Cessna next asserts that the court should consider the pro-competitive effects the Service Letter had on the service market. While pro-competitive effects may exist, Cessna cites no evidence from which the court can find, as a matter of law, that the pro-competitive effects outweigh the anti-competitive effects of the Service Letter. [5]

Finally, Cessna argues that Mellon's theory is irrational because the difference in price for a new CitationJet over a used Citation with modifications is so large that the lack of Cessna service is insufficient by itself to induce any rational buyer to spend the extra money on the CitationJet. This argument **[**33]** fails because Cessna's own marketing documents indicate that Cessna considers used Citations as the primary competition for the CitationJet. If the planes are in competition, then differences in service policies could indeed induce a potential buyer to purchase a CitationJet, rather than purchasing a used Citation with modifications or purchasing a modification for an existing Citation. This is especially true when Cessna's policy of refusing to accept modified aircraft for trade-in on a new CitationJet is considered.

Mellon has raised a material question of fact as to whether Cessna issued the Service Letter with an intent to preserve a monopoly on single-pilot jet business aircraft.

D. Market Power in the Tying Market.

---

[5] Presumably, Cessna is arguing that the pro-competitive effects in the service area mean that Cessna cannot have intended to monopolize the sales area. Cessna does not even argue that the lost profit in the service area exceeds the profit gained from the alleged increase in sales attributable to the Service Letter.

As previously noted, to establish a claim for tying in violation of *Section 1* of the Sherman Act, Mellon must show Cessna has appreciable economic power in the tying product market, in this case the service market, and the arrangement affects a substantial volume of commerce in the tied market, in this case the market for single-pilot jet business aircraft. *Kodak, 504 U.S. at 461-62*. Cessna argues that Mellon cannot show it has appreciable power in the service **[**34]** market.

As previously discussed, Mellon need only present a reasonable economic theory with citations to evidence indicating the theory accurately reflects the market. *Kodak, 504 U.S. at 468-69*. If Mellon cites evidence of anti-competitive effects, to obtain summary judgment Cessna has the burden of showing that an inference of market power is unreasonable. *Id., 504 U.S. at 468-69, 471*. This applies to the tying market as well as the tied market. *See Kodak, 504 U.S. at 481* (noting that the burden of showing market power is lower in a *Section 1* claim).

Cessna first argues that because Mellon claims Cessna has a monopoly in the tied market, he cannot show that any tying by Cessna had a substantial impact in the tied market. Cessna cites *Boddicker v. Arizona State Dental Association, 680 F.2d 66, 67* (9th Cir.), *cert. denied*, *459 U.S. 837, 74 L. Ed. 2d 79, 103 S. Ct. 83 (1992)*, as well as a number of other cases in support of this proposition. There are two problems with this argument. First, Cessna misstates the holding of *Boddicker* and the other published cases, which actually held that where there was no competition at all in the tied market, a tying claim **[**35]** was not viable. The court declines to consider the unpublished cases, where Cessna failed to provide copies. Furthermore, there are cases which have allowed both monopoly and tying claims to go to the fact finder. *See e.g.* *Kodak, supra.* Cessna's argument is not well taken.

Second, Mellon presents his tying claim in the alternative to his monopoly claim. Cessna vigorously argues that it does not have a monopoly in the tied market. If Cessna **[*1196]** prevails on this issue at trial, Mellon's tying claim would not be barred by a monopoly in the tied market, even if the court were to accept Cessna's argument as valid.

Cessna next argues that because other companies service modified Cessnas, Cessna cannot be said to possess sufficient market power in the service market to impact the sales market. As discussed above, Mellon has cited evidence of anti-competitive effects in the tied market. Accordingly, Cessna must show Mellon's theory is unreasonable as a matter of law.

Cessna argues that because it controls less than 7% of the market for servicing Citations, it does not possess market power in the tying market. Mellon does not dispute that Cessna controls less than 7% of the general service **[**36]** market. He argues that Cessna factory service must be considered a separate sub-market -- a market where Cessna has a complete monopoly. Mellon cites evidence that Cessna charges substantially more for phase inspections and other maintenance than other service providers and that owners are willing to pay this difference. Cessna's own economic expert testified that Cessna service is not the same as service obtained elsewhere. Mellon also cited evidence of the impact Cessna's refusal to service modified aircraft had on the value of such aircraft. The court cannot conclude as a matter of law that Cessna lacked market power in the tying market.

E. Appropriateness of Injunctive Relief.

Cessna argues injunctive relief is inappropriate because Mellon has not alleged any damages that can be avoided through injunctive relief and because Cessna has legitimate safety concerns. The court has previously held that material questions of fact exist as to the amount of Mellon's damages and the safety justifications for Cessna's actions.

Mellon argues, and the court agrees, that it is reasonable to assume that a plane partially serviced by Cessna would suffer less loss in value than one receiving **[**37]** all its service elsewhere. Thus, it is possible that Mellon could obtain some actual relief through an injunction.

In addition, the court may find that Cessna has no legitimate safety concerns. If that turns out to be the case, the court may find injunctive relief appropriate. Accordingly, Cessna is not entitled to summary judgment because Mellon seeks only injunctive relief on his antitrust claims.

IT IS ACCORDINGLY ORDERED this *1st* day of July, 1998, that defendant Cessna's motion for summary judgment is denied.

J. THOMAS MARTEN, JUDGE

Rockholt Furniture, Inc. v. Kincaid Furniture Co.

United States District Court for the Eastern District of Tennessee

July 6, 1998, Filed

No. 1:96-CV-588

Reporter
1998 U.S. Dist. LEXIS 24255 *

ROCKHOLT FURNITURE, INC., Plaintiff, v. KINCAID FURNITURE COMPANY, INC. and RHODES FURNITURE COMPANY, Defendants.

Subsequent History: Affirmed by *Rockholt Furniture, Inc. v. Kincaid Furniture Co., 1999 U.S. App. LEXIS 22436 (6th Cir. Tenn., Sept. 10, 1999)*

Core Terms

Furniture, summary judgment, manufacturer, terminate, distributors, gallery, Sherman Act, customer, concerted action, prices, sufficient evidence, set price, complaints, products, display, breach of contract, antitrust, nonmoving party, Deposition, Memorandum, dealer, margin, accomplish, conspiracy, inducement, concerted, reasons

Judges: CURTIS L. COLLIER, UNITED STATES DISTRICT JUDGE.

Opinion by: CURTIS L. COLLIER

Opinion

MEMORANDUM

Before the Court are Defendants Kincaid Furniture Company, Inc.'s ("Kincaid") and Rhodes Furniture Company's ("Rhodes") Motions for Summary Judgment (Court File Nos. 28 and 31). Plaintiff Rockholt Furniture, Inc. ("Rockholt") responded (Court File No. 37) and Kincaid and Rhodes replied (Court File Nos. 40 and 41). For the following reasons, the Court will **GRANT** Kincaid's and Rhodes's motions. There being no other issues, the Court will **[*2]** **ORDER** the case **DISMISSED**.

I. RELEVANT FACTS

Kincaid manufactures solid wood furniture. Kincaid sells this furniture to retail establishments throughout the county. Some of the retailers Kincaid sells to maintain a special independent dealer arrangement known as a Kincaid gallery. In a Kincaid gallery, the retailer divides the store's showroom into room-like sections to display the furniture as if it were arranged in a home. It was Kincaid's experience that a gallery type display yielded two and a half to three times the volume yielded by an independent dealer not maintained as a gallery (Dennis Kincaid Deposition, p. 30, Supplemental File to Court File No. 29).

From 1985 until May 1996, Rockholt purchased furniture from Kincaid and sold that furniture at its Decatur, Tennessee store. Rockholt did not maintain a Kincaid gallery. Rockholt contends there was a verbal contract between it and Kincaid for Rockholt to remain a dealer of Kincaid products as long as Rockholt paid for the furniture it ordered (Rockholt's Response to the Motions for Summary Judgment, p. 2, Court File No. 37). Calvin Rockholt, owner of the Rockholt store, testified as follows regarding the contract:

> Q: Well, taking **[*3]** that it may or may not be in their best interest, if they felt it was in their best interest to have Rockholt Furniture and you didn't want to carry their line, you don't have any kind of written agreement or any kind of understand that you're going to continue handling it; is that correct?
> A: That's correct.
> Q: And is it your understanding that that's the typical arrangement between -- you're talking about the typical arrangement between a dealer and furniture supplier in the industry, that is, generally, if the dealer, for whatever reason that is acceptable to him, decides it's not in his best interest to carry a line, he can just not order any more furniture from that manufacturer; is that correct?
> A: Yes.

. . . .

> Q: Is the understanding that you consider that you had with Kincaid that you described the same with all of the manufacturers that you carry in your store, that is, you have a partnership arrangement?
> A: Yes.
> Q: And as long as you are doing your end of the bargain, then they should continue selling to you indefinitely?
> A: Yes.
> Q: Have you ever had anyone ask you to sign a contract or request that you sign a contract?
> A: No.

(Calvin Rockholt Deposition, pp. 29-30, Supplemental File **[*4]** to Court File No. 29, Exh. D ("Depo Excerpts I")).

In a later portion of his deposition, Calvin Rockholt again testified about the contract between Kincaid and Rockholt:

> Q: Can you tell me if you have any comment in this letter[1] regarding your contract with Kincaid or your agreement with Kincaid?
> A: The only tiling would be where Dennis -- where I say in the second paragraph ten years ago Dennis called on me to put Kincaid into our store. At that time Dennis was trying to sell us the Kincaid product and I bought it at that time. A verbal agreement to buy the product. Dennis approached me about putting it in the most prominent part of the store, and we did that. It had the best area of our store with the best lighting and the best display area that we had at that time. And I fulfilled that agreement with Dennis.
> Q: But you didn't feel the need to call to Mr. Steve Kincaid's attention anything about a contract or agreement in that letter; is that correct?
> A: Well, there was not a written contract. That was what I was referring to in the second paragraph when I said ten years ago when Dennis called on me. And I go on to refer to things that I did.

---

[1] The parties are referring to a letter Calvin Rockholt sent to Steve Kincaid, president of Kincaid, after Mr. Rockholt learned Kincaid was not going to continue to sell furniture to Rockholt.

(Calvin Rockholt Deposition, pp. 74-75, Court **[*5]** File No. 37, Exh. A ("Depo. Excerpts II")). Mr. Rockholt's best description of the contract was, "It was always just terminology, even within the industry, if you pay your bills and do a decent job of representing the product, people would continue to sell to you" (Calvin Rockholt Depo. Excerpts I, p. 56; *See also id.* at p. 57).

In November 1993, Rhodes opened a retail furniture store in Chattanooga, Tennessee. Rhodes's store was located approximately 40 to 50 miles from the Rockholt store and also sold Kincaid furniture. Rhodes was Kincaid's largest customer and the Chattanooga store maintained a Kincaid gallery.

In March of 1994, Stan Lowenstein, manager of Rhodes's Chattanooga store, complained to Robert Lemons, National Accounts Representative for Kincaid, about a customer who had visited the Rhodes store. The customer asked Rhodes to beat a price offered by Rockholt on a certain piece of Kincaid furniture. Rhodes offered to beat the price by $100, but the customer did not purchase the item. Instead, she returned to the Rockholt store seeking an even better deal. Rhodes refused to make another offer to the customer *(See* D. Kincaid Depo., pp. 34-35, Supplemental File to Court File No. 29, Exh. **[*6]** C; Exhibit 4 to Robert A. Lemons Deposition, Court File No. 37, Exh. E ("Lemons Depo. Excerpts I")).

The essence of Lowenstein's complaint was he believed Rockholt maintained only a limited inventory of Kincaid furniture. Lowenstein believed when a Rockholt customer wanted to view items not earned by Rockholt, Rockholt sent those customers to Rhodes. Once the customer located the items they wanted at Rhodes, Rockholt then special ordered the furniture for the customers. Rhodes felt this practice, if true, permitted Rockholt to receive the benefit of Rhodes's large inventory and gallery display without the costs associated with maintaining such a large display *(See* Stan Lowenstein Affidavit, ¶ 4, Supplemental File to Court File No. 29, Exh. E).

Lemons instructed Dennis Kincaid, Kincaid's marketing representative for the area, to investigate Lowenstein's complaint (D. Kincaid Depo., p. 35). Dennis Kincaid spoke with both Calvin Rockholt and Stan Lowenstein about the customer shopping incident. After Dennis Kincaid's conversation with Lowenstein, he faxed the following synopsis of the conversation to Lemons:

> I called Stan to express support and concern about competitive discounting, etc. **[*7]** He was respectable but harsh and not receptive to my review of the shopping incident. He told me his version and indicated that Rockholt had lied to me, says Rockholt habitually sends customers to shop his store on all shared lines, indicating he will special order and beat prices.
> Rhodes made the sale in question at 28% margin. Stan feels that competitors should not have access to anything he carries unless they are an AUTH. "K" gallery [authorized Kincaid gallery].
> He did not believe my report on Rockholt display, stocking of Kincaid. He agreed to send shoppers to Rockholt to verify pricing, display, etc.
> He confirmed that Rockholt advertising was institutional-no product identity.
> He has no problem with Rockholt's access to line as long as they don't drastically cut prices. I will try to influence Rockholt not to do so.

(Exhibit 5 to Lemons Depo. Excerpts I)

With respect to the relationship between Rockholt, Kincaid, and Rhodes, Calvin Rockholt also testified, "After Rhodes entered the Chattanooga market, Dennis Kincaid pressured Rockholt to establish a 42% profit margin. According to Dennis Kincaid, this was the margin Rhodes and Kincaid desired that we establish. This pressure to establish **[*8]** a specific profit margin came from Dennis Kincaid and it continued from the time that Rhodes entered the Chattanooga market until Rockholt was terminated as a distributor of Kincaid products" (Calvin Rockholt Affidavit, ¶¶ 6-7, Court File No. 39).[2]

[2] Calvin Rockholt's deposition testimony did not indicate Rhodes also desired Rockholt to set it prices at a 42% profit margin (Calvin Rockholt Depo. Excerpts II, pp. 34-35). Furthermore, while Mr. Rockholt's testimony regarding his conversation with Dennis Kincaid *could possibly* be admissible against Kincaid as an admission by a party opponent, this evidence is likely

Kincaid also sold its furniture to another area store, Morgan Furniture. Prior to 1992, Morgan Furniture maintained stores in Morristown and Dayton, Tennessee. Since the Dayton, Tennessee store was only eleven miles from Rockholt's store, Kincaid initially protected Rockholt's distribution area by permitting Morgan Furniture to only sell Kincaid products at its Morristown store (D. Kincaid Depo., pp. 99-100). However, in 1992 or 1993, Morgan Furniture closed it Morristown store and asked to sell Kincaid furniture in its Dayton store.

Kincaid discussed Morgan Furniture's request with Rockholt who had no objection. The Tennessee River separated Morgan Furniture from Rockholt and the only mode of transportation between the stores was by ferry. This was thought to be an effective competition deterrent and Kincaid permitted Morgan Furniture to sell Kincaid products in its Dayton store (*Id.* at 100).

In February of 1996, Morgan Furniture became **[*9]** a Kincaid gallery and began to display Kincaid products in a home like arrangement (Robert A. Lemons Deposition, p. 17, Supplemental File to Court File No. 29, Exh. F ("Lemons Depo. Excerpts II")). That same year, the State of Tennessee also began to build a bridge across the Tennessee River. This meant customers would have easier access to both the Rockholt and Morgan Furniture stores (*Id.* at 59-60).

On May 14, 1996, Kincaid sent Rockholt a letter terminating Kincaid's relationship with Rockholt. The letter stated:

> We have determined that we can best increase the sale of Kincaid products in your area through fewer dealers, therefore, this is notification from this date forward, we will not accept any new orders for stock merchandise....
>
> Thank you for the orders which you have sent us in the past. If our market plans or philosophy changes in the future, we hope that we may be able to renew our relationship.

(Exhibit 2 to Calvin Rockholt Depo. Excerpts II).

Calvin Rockholt also had a discussion with Dennis Kincaid about the termination of the relationship between Rockholt and Kincaid. In his affidavit, Calvin Rockholt described this conversation as follows:

> At the time Dennis Kincaid informed me of Kincaid's **[*10]** decision to terminate Rockholt as a distributor of Kincaid products, he did not mention either the construction of a new bridge between Dayton and Decatur or the establishment of Morgan Furniture as a Kincaid gallery as a factor in Kincaid's decision.
>
> During this conversation, Dennis Kincaid told me that our termination was as a result of Kincaid's agreement with Rhodes to terminate me. He told me that the decision "ain't right," that Kincaid was showing "great disloyalty" to Rockholt, and that Rhodes finally got me because I would not raise my prices to the level requested by Rhodes and Kincaid.
>
> Dennis Kincaid also told me that his superiors could not give him much information on why Rockholt was being terminated, but that he thought that it was a "shitty decision," and "it was a shame to take a line work your ass off and build it up for ten years just to have it taken away from you."

(Calvin Rockholt aff., ¶¶ 8-10).

On December 6, 1996, Rockholt filed suit against Kincaid and Rhodes alleging violations of the Sherman Act, *15 U.S.C. § 1*; and Tennessee State ***Antitrust law***, *Tenn. Code Ann. §§ 47-25-101* and *-102*; and for claims for breach of contract; unlawful inducement of breach of contract, *Tenn. Code Ann. 47-50-109*; tortious interference with a prospective **[*11]** business advantage; and conspiracy.[3] Kincaid's and Rhodes's Motions for Summary Judgment challenge Rockholt's proof on all of these claims. The motions are now ripe for the Court's adjudication.

II. STANDARD OF REVIEW

Under *Fed R. Civ. P. 56(c)*, the Court will render summary judgment if there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. The burden is on the moving party to

---

inadmissible hearsay with respect to Rhodes. However, as discussed in Section III(A) of this Memorandum, even if the Court accepts this evidence, there is insufficient proof of a violation of *Section 1* of the Sherman Act.

[3] Rockholt did not assert some of these claims until its amended complaint filed on May 8, 1997 (Court File No. 16).

conclusively show no genuine issue of material fact exists, Lansing Dairy, Inc. v. Espy, 39 F.3d 1339, 1347 (6th Cir. 1994); Kentucky Div., Horsemen's Benev. & Prot. Assoc, Inc. v. Turfway Park Racing Assoc, Inc., 20 F.3d 1406, 1411 (6th Cir. 1994), and the Court must view the facts and all inferences drawn therefrom in the light most favorable to the nonmoving party. Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986); Oakland Gin Co., Inc. v. Marlow, 44 F.3d 426, 429 (6th Cir. 1995); City Management Corp. v. U.S. Chemical Co., Inc., 43 F.3d 244, 250 (6th Cir. 1994).

Once the moving party presents evidence sufficient to support a motion under Rule 56, the nonmoving party is not entitled to a trial merely on the basis of allegations. The nonmoving party may not rest on its pleadings, but must come forward with some significant probative evidence to support its claim. Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986); Lansing Dairy, 39 F.3d at 1347; Horsemen's Benev., 20 F.3d at 1411; .see *also* Guarino v. Brookfield Township Trustees, 980 F.2d 399, 404-06 (6th Cir. 1992) (holding courts do not have the responsibility to search *sua sponte* the record for genuine issues of material fact). If the nonmoving party fails to make a sufficient showing on an essential element of its case with respect to which it has the burden of proof, the moving party **[*12]** is entitled to summary judgment. Celotex, 477 U.S. at 323.

The Court determines whether sufficient evidence has been presented to make the issue of fact a proper jury question, but does not weigh the evidence, judge the credibility of witnesses, or determine the truth of the matter. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986); 60 Ivy Street Corp. v. Alexander, 822 F.2d 1432, 1435-36 (6th Cir. 1987). The standard for summary judgment mirrors the standard for directed verdict. The Court must decide "whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law." Anderson, 477 U.S. at 251-52. There must be some probative evidence from which the jury could reasonably find for the nonmoving party. If the Court concludes a fair-minded jury could not return a verdict in favor of the nonmoving party based on the evidence presented, it may enter a summary judgment. *Id.;* Lansing Dairy, 39 F.3d at 1347; Horsemen's Benev., 20 F.3d at 1411.

III. DISCUSSION

The Court will address in turn each of Rockholt's claims.

A. Sherman Act, 15 U.S.C. § 1

"Section 1 of the Sherman Act requires that there be a 'contract, combination ... or conspiracy' between the manufacturer and other distributors in order to establish a violation." Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 760, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984). All parties agree the Supreme Court's analysis in Monsanto controls this Court's decision regarding whether there is sufficient **[*13]** evidence of a Sherman Act violation.

In *Monsanto*, the Supreme Court explained there are two important distinctions at the center of every distributor-termination case under Section 1 of the Sherman Act. Id. at 760-761. "First, there is the basic distinction between concerted and independent action .... Independent action is not proscribed." Id. at 761. "The second important distinction in distributor-termination cases is that between concerted action to set prices and concerted action on nonprice restrictions. The former hav[ing] been *per se* illegal since the early years of national antitrust enforcement. The latter [being] judged under the rule of reason, which requires a weighing of the relevant circumstances of a case to decide whether a restrictive practice constitutes an unreasonable restraint on competition." *Id.* (citations omitted).

Rockholt alleges Kincaid's and Rhode's activities were a *per se* violation of Section 1 of the Sherman Act. In light of the two basic distinctions in a distributor-termination case, this means the Court must find evidence of a concerted action to set prices.

In evaluating whether there is sufficient evidence of a concerted action to set prices, the Supreme Court has said "the fact that a manufacturer **[*14]** and its distributors are in constant communication about prices and marketing strategy does not alone show that the distributors are not making independent pricing decisions." *Id. at 762*. The Court explained, "A manufacturer and its distributors have legitimate reasons to exchange information about the prices and the reception of their products in the market." The Court also cautioned against inferring the parties have entered into a concerted agreement to set prices "merely from the existence of complaints, or even from the fact that termination came about '*in response to*' complaints." *Id. at 763* (emphasis added). As the Court explained, to infer an agreement based merely on evidence of this type "could deter or penalize perfectly legitimate conduct." *Id.* The Court stated,

> . . . complaints about price cutters "are natural-and from the manufacturer's perspective, unavoidable--reactions by distributors to the activities of their rivals." Such complaints, particularly where the manufacturer has imposed a costly set of nonprice restrictions, "arise in the normal course of business and do not indicate illegal concerted action." Moreover, distributors are an important source of information for manufacturers. **[*15]** In order to assure an efficient distribution system, manufacturers and distributors constantly must coordinate their activities to assure that their product will reach the consumer persuasively and efficiently. To bar a manufacturer from acting solely because the information upon which it acts originated as a price complaint would create an irrational dislocation in the market.

Id. at 763-764 (internal citations omitted).

The Supreme Court concluded, for there to be sufficient evidence of a concerted agreement to set prices, "something more than evidence of complaints is needed." *Id. at 764*. That something more "must be evidence that tends to exclude the possibility that the manufacturer and nonterminated distributors were acting independently. . . . [T]he antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Id.* (citation omitted).

Rockholt contends there is sufficient evidence to meet the "something more" standard delineated by the Supreme Court. Rockholt contends the following provide sufficient evidence of a concerted action to set prices: **[*16]**

- Rhodes's complaints to Kincaid about Rockholt's prices;
- Kincaid relayed these complaints to Rockholt to encourage Rockholt to raise its prices to a 42% margin--the specific profit margin Rhodes desired;[4]
- Dennis Kincaid never told Calvin Rockholt that the reason he was terminated as a Kincaid distributor was because of the construction of the bridge between Decatur and Dayton and the establishment of a Kincaid gallery at Morgan Furniture;
- Sam Morgan, owner of Morgan Furniture, testifies Kincaid never informed him the establishment of a Kincaid gallery at his store would impact upon Rockholt; and
- Kincaid cannot agree upon who made the decision to terminate Rockholt as a distributor.[5]

(Rockliolt's Response to the Motions for Summary Judgment, p. 10).

Even if the Court assumes, *arguendo*, there is sufficient evidence to support Rockholt's contentions,[6] this evidence does not lead to the inference there has been a violation of *Section 1* of the Sherman Act. Rockholt has not cited,

[4] *See* footnote number 2.

[5] Rockholt alleges Robert Lemons testified Dennis Kincaid made the decision to terminate Rockholt. Rockholt contends this testimony is inconsistent with Dennis Kincaid's testimony that "[He] could not veto the decision" (Rockholt's Response to the Motions for Summary Judgment, pp. 10-11). However, a review of the deposition excerpts reveals Roberts Lemons actually testified that Mr. Kincaid initiated the decision to terminate Rockholt and Lemons approved the decision (Lemons Depo. Excerpts I, p. 57). This testimony is consistent with Mr. Kincaid's description of the termination decision (D. Kincaid Depo., pp. 110-111). Thus, Rockholt's contention is not supported by die evidence.

[6] *See* footnote numbers 2 and 5.

nor is the Court aware of, any authority which requires Kincaid to inform Rockholt or even a different distributor, such as Morgan Furniture, of its specific reasons for a termination. Furthermore, this failure, if true, **[*17]** is not circumstantial evidence "that reasonably tends to prove that the manufacturer *and others* 'had a conscious commitment to a unlawful objective'" as is required by the Supreme Court's decision in *Monsanto*. The Supreme Court was clear in stating, *Section 1* of the Sherman Act does not proscribe independent action. *Monsanto, 465 U.S. at 761*. To prove a violation, the Court must be presented with evidence of some *concerted* action by Rhodes and Kincaid and Rockholt has not met this burden. The Court reaches the same conclusion with respect to Rockholt's contention that Kincaid cannot agree on who made the decision to terminate Rockholt.[7]

This means the only evidence Rockholt has to support concerted action by Kincaid and Rhodes to set prices is Rockholt's contention Rhodes complained about Rockholt's prices and, in response to those complaints, Kincaid attempted to encourage Rockholt to raise its prices to the 42% profit margin desired by Rhodes. However, the *Monsanto* decision makes clear "something more" than evidence of this type is necessary to establish a *Section 1* violation of the Sherman Act. Accordingly, the Court will **GRANT** Kincaid's and Rhodes's Motions for Summary Judgment on this issue.

B. Tennessee State *Antitrust* [*18] *Law*, *Tenn. Code Ann. §§ 47-25-101* and -102

"The State [of Tennessee] anti-trust statute passed in 1891 is quite similar to the Sherman Anti-Trust Act passed by Congress in 1890. Authorities which define the character of private damage suits under the federal anti-trust statutes, particularly the Sherman Act, are most persuasive." *Slate of Tennessee v. Levi Strauss & Co.*, 1980 WL 4696 at n.2 (Tenn. Ch. Ct. Sept. 25, 1980) (internal citation omitted). In Section III(A) of this Memorandum, the Court concluded Rockholt has not presented sufficient evidence to support its claim of a Sherman Act violation. For the same reasons, the Court concludes Rockholt's evidence fails with respect to any claim under the state ***antitrust law***.[8] *See also Bailey's Inc. v. Windsor America, Inc., 948 F.2d 1018,1032 (6th Cir. 1991)*.[9] Accordingly, the Court will GRANT Kincaid's and Rhodes's Motions for Summary Judgment with respect to this issue.

C. Breach of Contract

For the Court to find there has been a breach of contract, the Court must first find there was a contract between Rockholt and Kincaid.[10] As detailed in Section II of this Memorandum, Calvin Rockholt testified the contract was oral and the terms were essentially "if you pay your bills and do a decent job of representing the product, people would continue to sell to you" (Calvin Rockholt Depo. Exceipts I, p. 56). With respect to **[*19]** any assent to the contract by Kincaid, Calvin Rockholt testified as follows:

---

[7] *See* footnote number 5.

[8] "Rockholt relies on the same evidence to support both its federal and state antitrust claims (Rockholt's Response to the Motions for Summary Judgment, p. 9).

[9] In *Bailey's*, the plaintiff opposed summary judgment as to its contract, federal antitrust, and state antitrust claims. The plaintiff's brief in opposition to the motion for summary judgment, however, "was devoted almost exclusively to [the] contract and federal antitrust issues." *Bailey's, 948 F.2d at 1032*. With respect to the Tennessee state antitrust claim, the plaintiff merely quoted the statute and stated, "The comments made above concerning the federal antitrust laws are also applicable to the Tennessee antitrust laws." *Id.*

The district court found the plaintiff had failed to present sufficient evidence of a Sherman Act violation. The district court then also granted summary judgment on plaintiff's state antitrust claims "indicating that the plaintiff has no case under the state statutes for reasons similar to those given for the conclusion that the plaintiff has no case under federal ***antitrust law***." *Id.* The Sixth Circuit affirmed both these rulings.

[10] Rockholt does not allege Rhodes was a party to any contract. Thus, Rhodes would be entitled to summary judgment on this issue.

> Q: Okay. Well, tell me as near as you can exactly what it was that Dennis Kincaid said to you that you base this allegation that you have an agreement with Kincaid on.
> A: When Dennis and I would work together, obviously he wanted me to buy more product and expand it within my store. And we were adding more product line, continually. And Dennis had even made the comment about, you know, that we paid our bills good and everything. And that was --
> Q: He made what comment, now?
> A: Well, that we paid our bills good and we were never late. And so we took that to the agreement [sic].
> Q: I mean what did Dennis say? Did he say we will agree that we will not -- that we'll continue to sell you Kincaid for an indefinitie period of time if you pay your bill on time?
> A: No, Dennis didn't say that. That's a mutual understanding within the industry.

Id. at p. 57.

"In order to enforce a contract in Tennessee, the contract must result from a meeting of the minds, must be based upon sufficient consideration, and must be sufficiently definite to be enforced." *Peoples Bank of Elk Valley v. ConAgra Poultry, 832 S.W.2d 550, 553 (Term. Ct. App. 1991)*. Calvin Rockholt's testimony establishes there was not a meeting of the minds with respect **[*20]** to this alleged contract.

Rockholt's claim of a contract with Kincaid also fails because the contract, as described by Calvin Rockholt, permitted Mr. Rockholt to terminate performance at any time and for any reason yet Kincaid's would have had to perform for a potentially indefinite period. Finally, any alleged contract would likely run afoul of the statute of frauds.[11] Since the contract appears to involve the sale of goods over $500, the Uniform Commercial Code states the contract is not enforceable "unless there is some writing or record sufficient to indicate that a contract for sale has been made between the parties . . . ." *Tenn. Code Ann. § 47-2-201*.[12] The parties did not sign a written contract and there has not been sufficient evidence of a "record" of a contract between Rockholt and Kincaid. Accordingly, the Court will GRANT Kincaid's and Rhodes's Motions for Summary Judgment on this issue.[13]

D. Unlawful Inducement of Breach of Contract, *Tenn. Code Ann. § 47-50-109*

In order to establish a cause of action for unlawful inducement of breach of contract under *Tenn. Code. Ann. § 47-50-109*, "a plaintiff must prove that there was a legal contract, of which the wrongdoer was aware, that the wrongdoer maliciously intended to induce a breach, and **[*21]** that as a proximate result of the wrongdoer's actions, a breach occurred that resulted in damages to the plaintiff." *Quality Auto Parts v. Bluff City Buick, 876 S.W.2d 818, 822 (Tenn. 1994)*. In Section III(C) of this Memorandum, the Court concluded there was insufficient evidence to establish a contract between Rockholt and Kincaid and consequently, there was insufficient evidence of any breach of contract. Furthermore, even if the Court assumes, *arguendo*, there was a contract and a breach, Rockholt has failed to present any evidence Rhodes was even aware of any such contract (*See* Calvin Rockholt Depo. Excerpts I, p. 140 (Mr. Rockholt testified he did not have any indication Rhodes was aware of any contract between Rockholt and Kincaid); Stan Lowenstein Affidavit, ¶ 6, Supplemental File to Court File No. 29, Exh. E (Lowenstein was the manager of Rhodes from November, 1993 to October, 1994 and was not aware of any such contract); David Wallace Affidavit, ¶ 5, Supplemental File to Court File No. 29, Exh. G (Wallace was the manager of Rhodes from October, 1994 to February, 1996 and was not aware of any such contract)). Accordingly, the Court will **GRANT** Kincaid's and Rhodes's Motions for Summary Judgment on this issue.[14]

---

[11] Rockholt did not address Defendants' arguments regarding the statute of frauds.

[12] In 1997, the Tennessee legislature modified *§ 47-2-201* to state there must be either a writing or *record* of a contract for the contract to be enforceable.

[13] *See* footnote number 10.

[14] Under *§ 47-50-109*, "[a] party to a contract cannot be held liable for procuring the breach of that contract." *Purisch v. Tennessee Technological University, 76 F.3d 1414, 1420 (6th Cir. 1996)* (*citing* *Ladd v. Roane Hosiery, Inc., 556 S.W.2d 758,*

E. Tortious Interference with Prospective [*22] Business Advantage

Tennessee does not recognize a cause of action for interference with a prospective business advantage. *Nelson v. Martin, 958 S.W.2d 643, 646 (Tenn. 1997)*.[15] Accordingly, the Court will **GRANT** Kincaid's and Rhodes's Motions for Summary Judgment with respect to this issue.

F. Conspiracy

"A civil conspiracy is a combination between two or more persons to accomplish by concert an unlawful purpose, or to accomplish a purpose not in itself unlawful by unlawful means. The requisite elements of the cause of action are common design, concert of action, and an overt act. Injury to person or property, resulting in attendant damage, must also exist." *Menuskin v. Williams, 145 F.3d 755, 770, 1998 WL 238625, at *13-14 (6th Cir. 1998)* (*citing* *Braswell v. Carothers, 863 S.W.2d 722, 727 (Tenn. Ct. App. 1993)*. Rockholt's entire argument with respect to this claim is as follows:

> It is unlawful for the Defendants to agree to accomplish unlawful purposes. As demonstrated above, the termination of Rockholt under these circumstances is an unlawful purpose, which has been accomplished by the concerted action of Rhodes and Kincaid.

(Rockholt's Response to the Motions for Summary Judgment, p. 12).

In Section III(A) of this Memorandum, the Court found insufficient evidence of a concerted action by Rhodes and Kincaid to set prices. In Sections III(B)-(E), the Court found insufficient evidence **[*23]** to establish any of Rockholt's other claims. Thus, there is no evidence of concerted action to accomplish *any* unlawful purpose. Accordingly, the Court will **GRANT** Kincaid's and Rhodes's Motions for Summary Judgment with respect to this issue.

IV. CONCLUSION

The Court concludes Rockholt has failed to present sufficient evidence to support its claims under *Section 1* of the Sherman Act and the Tennessee State ***Antitrust Law***. The Court also finds Rockholt has failed to present sufficient evidence to supports it claims for breach of contract, unlawful inducement of breach of contract, tortious interference with prospective business advantage, and conspiracy. For these reasons, the Court will **GRANT** Kincaid's and Rhodes's Motions for Summary Judgment. There being no other issues, the Court will also **ORDER** the case **DISMISSED**.

An Order shall enter.

/s/ Curtis L. Collier

CURTIS L. COLLIER

UNITED STATES DISTRICT JUDGE

ORDER

---

760 (Tenn. 1977). Since Rockholt's claim under *§ 47-50-109* is based on an alleged contract between Rockholt and Kincaid, Kincaid could not be liable for a violation of *§ 47-50-109* and would also be entitled to summary judgment.

[15] Rockholt did not address this issue in its Response to the Motions for Summary Judgment.

In accordance with the accompanying memorandum, Kincaid's and Rhodes's Motions for Summary Judgment (Court File Nos. 28 and 31) are **GRANTED.** There being no other issues, the Court **ORDERS** the case **DISMISSED**.

SO ORDERED.

HN1[] **Antitrust Actions, Facilities**

It is well-settled that states enjoy immunity from federal antitrust lawsuits that stem from their actions as sovereign. As currently applied, the doctrine may be invoked not only by states themselves, but also by states' political subdivisions, including municipal corporations. Moreover, state action immunity has also been extended to hospital authorities established under state statutes, and to physicians at such hospitals who participate as official members of peer-review committees.

HN2[] **Entitlement as Matter of Law, Appropriateness**

Fed. R. Civ. P. 56(c) provides that summary judgment is appropriate where there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. Once the party seeking summary judgment has informed the court of the basis for its motion, the burden shifts to the non-moving party to demonstrate why summary judgment would be inappropriate. In making its determination, the court must view all evidence and any factual inferences in the light most favorable to the nonmoving party.

HN3[] **Federal Regulations, Antitrust Regulations**

In applying the antitrust laws, courts have come to recognize two distinct types of causation questions, the first of which is essentially identical to that typically posed in the tort context, and the second of which is unique to antitrust cases.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN4[] **Private Actions, Remedies**

Courts have long recognized that antitrust claims are tortious in nature, and that common-law principles governing tort claims are equally applicable to antitrust claims.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Regulated Industries > General Overview

Torts > ... > Elements > Causation > General Overview

HN5[] **Private Actions, Remedies**

Among the common-law principles governing tort claims that are applicable in the antitrust context is the requirement that the plaintiff demonstrate that the defendant actually caused the alleged injury.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN6[] **Private Actions, Standing**

The second causation question that courts have come to recognize, which is unique to antitrust cases, is often examined in connection with the determination of whether a plaintiff enjoys antitrust standing. In essence, this question involves an assessment of whether the defendants caused a plaintiff what has come to be known as an "antitrust injury"--that is, an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN7[] **Antitrust & Trade Law, Sherman Act**

The court recognizes that under certain circumstances a plaintiff may succeed in making out a claim under *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, by demonstrating that a hospital and members of its medical staff conspired to restrain trade.

HN11[] **Attempts to Monopolize, Elements**

Section 4 of the Clayton Act, *15 U.S.C.A. § 15*, provides: Any person who shall be injured in his business of property by anything forbidden in the antitrust laws may sue therefore in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee. To sustain such a cause of action, a plaintiff must show: (1) that the defendants' attempted monopolization constitutes a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*; (2) an injury to his business or property; and (3) a causal relationship between the antitrust violation and the injury. Moreover, the last two elements require the valuation of the plaintiff's injury in terms of money damages with some degree of certainty.

For EDWARD PLANZ, M.D., SOUTHEASTERN CARDIOVASCULAR ASSOCIATES, P.C., defendants: Michael Baird Beers, Winston Whitehead Edwards, Beers, Anderson, Jacksonn, Hughes & Patty, PC, Joseph C. Espy, III, A. Lester (Les) Hayes, III, Melton, Espy, Williams & Hayes, P.C., Montgomery, AL.

For EDWARD PLANZ, M.D., defendant: Paul G. Smith, Matthew C. Williams, Smith, Spires & Peddy, Birmingham, AL.

Judges: Myron H. Thompson, UNITED STATES DISTRICT JUDGE.

Opinion by: [2]** Myron H. Thompson

Opinion

[*1233] *ORDER*

Plaintiff William G. Marshall, Jr., M.D., brings this lawsuit against defendants Edward Planz, M.D. (his former business partner) and Southeastern Cardiovascular Associates, P.C. ("SCA") (a corporation of which Planz is currently, and Marshall was formerly, a shareholder and employee) alleging claims grounded on *§§ 1* and *2* of the Sherman Antitrust Act, *15 U.S.C.A. §§ 1* and *2*, and *§ 4* of the Clayton Act, *15 U.S.C.A. § 15*, as well as numerous state-law claims, namely tortious interference with business and contractual relations, defamation, breach of contract, monopolization, and civil conspiracy. All of Marshall's claims stem from Planz's termination of their business relationship, and events surrounding Marshall's loss of surgical privileges at two hospitals in Dothan, Alabama, where the two physicians conducted their surgical practices. This court has federal-question jurisdiction over this lawsuit pursuant to *28 U.S.C.A. §§ 1331* and *1337*, and supplemental jurisdiction over Marshall's state-law claims pursuant to *28 U.S.C.A. § 1367(a)*.

Pending before the court is the motion for summary judgment filed by the defendants as to Marshall's federal **[**3]** and state antitrust claims. [1] The defendants' motion raises a difficult question concerning the so-called state-action immunity doctrine that is applicable in antitrust actions. Specifically, ***HN1***[] it is well-settled that states enjoy immunity from federal antitrust lawsuits that stem from their actions as sovereign. *See Parker v. Brown, 317 U.S. 341, 351-53, 63 S. Ct. 307, 314, 87 L. Ed. 315 (1943)*; *Crosby v. Hospital Auth. of Valdosta and Lowndes County, 93 F.3d 1515, 1521 (11th Cir. 1996)*, *cert. denied*, *520 U.S. 1116, 137 L. Ed. 2d 328, 117 S. Ct. 1246 (1997)*. As currently applied, the doctrine may be invoked not only by states themselves, but also by states' political subdivisions, including municipal corporations. *See City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 412, 98 S. Ct. 1123, 1137, 55 L. Ed. 2d 364 (1978)* (Brennan, J., plurality opinion); *See also Town of Hallie v. City of Eau Claire, 471 U.S. 34, 38-39, 105 S. Ct. 1713, 1716, 85 L. Ed. 2d 24 (1985)*. Moreover, state action immunity

[1] In their motion for summary judgment, the defendants also seek summary judgment on the remainder of Marshall's state-law claims, with the exception of the breach-of-contract claim. This order, however, addresses only the federal and state antitrust claims.

has also been extended to hospital authorities established under state statutes, *see* Crosby, 93 F.3d at 1522-26 (holding that a Georgia hospital is a political subdivision **[**4]** of the state, because the nexus between the hospital and the state is sufficiently close); Askew v. DCH Reg. Health Care Auth., 995 F.2d 1033, 1037-38 (11th Cir. 1993) (holding that hospital authorities created under the Alabama Health Care Authorities Act are political subdivisions of the State of Alabama), and to physicians at such hospitals who participate as official members of peer-review committees. *See* Crosby, 93 F.3d at 1530. The difficult question presented here is whether state-action immunity should be further extended to individual physicians who do not serve as official members of a hospital's peer-review committees, but who initiate proceedings against fellow physicians before the committees or furnish information to them. As explained below, however, the court does not need to address this question in view of its conclusion that the defendants' **[*1234]** motion is due to be granted as to all of Marshall's antitrust claims because he has failed to establish that the defendants' actions actually caused his alleged antitrust injuries.

[5]** I. BACKGROUND

The pertinent facts of this lawsuit, viewed in the light most favorable to Marshall, who is the non-movant with respect to the defendants' motion for summary judgment concerning the federal and state antitrust claims, are as follows.

. In 1992, Marshall joined SCA, a professional corporation in which he and Planz were the sole shareholders and employees. The focus of both physicians' practices was cardiovascular surgery, although they also performed other surgical techniques. Both physicians maintained surgical privileges at Southeast Alabama Medical Center ("SAMC"), a hospital owned and operated by the Houston County Health Care Authority, and Flowers Hospital, the two primary care hospitals located in Dothan, Alabama. In 1988, SAMC had been reincorporated under the Alabama Health Care Authorities Act of 1982, 1975 Ala. Code §§ 22-21-310 through 22-21-344 (Michie 1997).

. In 1994, Marshall and Planz executed a shareholders and deferred compensation agreement, pursuant to which they became equal financial partners in SCA, dividing all revenues from their practices equally after expenses. Under the agreement, Planz retained authority to sever the partnership **[**6]** without cause. The agreement was silent, however, as to whether Marshall could continue to practice medicine independently in Dothan should the partnership be dissolved.

. In July 1996, Dr. Steven Johnson, a third cardiovascular surgeon, joined SCA.

. On July 23, 1996, Marshall and Planz were informed by letter that the Quality Risk Management Committee ("Quality Committee") had established an ad hoc committee to investigate the circumstances surrounding the unexpected deaths of five of Marshall's cardiovascular patients in the preceding two months.

. The Quality Committee's investigation into Marshall's performance at SAMC was not the first instance in which a hospital committee had responded to concerns and complaints regarding Marshall. Starting in 1993, both SAMC's Executive and Credentials Committee ("E&C Committee") and its Peer Review Committee met on numerous occasions to take up complaints about Marshall's "unacceptable" and "inappropriate" behavior toward hospital personnel, as well as concerns about Marshall's mortality statistics. On at least three occasions, in April and December 1994, and July 1995, the E&C Committee had voted to defer elevating Marshall's **[**7]** privileges from associate staff status to active staff status, citing Marshall's unacceptable conduct toward others at the hospital.

. In the summer of 1996, Planz attended a conference where he learned about expected changes in Medicare reimbursement for cardiac services, and he subsequently expressed concern to both Marshall and Johnson that the proposed decreases in reimbursement would adversely affect SCA's revenues and their individual incomes.

. Shortly after attending the summer conference, in August 1996, Planz informed James Blackmon, then Chief Executive Officer of SAMC, that he planned to terminate his partnership with Marshall. [2] **[**17]** Planz had not yet informed Marshall of his intentions. In his conversation with Blackmon, Planz sought assurances that SAMC would support Planz in his efforts to sever his relationship with Marshall. **[*1235]** Planz and Blackmon also discussed the fact that the dissolution of the partnership would have repercussions for Marshall's privileges at SAMC. This aspect of the discussion appears to have focused on an exclusive contract that Planz purportedly signed with the hospital. [3]

. At some point during the Quality Committee's deliberations, **[**8]** Dr. George Veale, who headed the committee, informed Fred Pelle, who was then SAMC's Chief Operating Officer, that it would not be in the latter's "best interest to work against what the committee was trying to do and against what Dr. Planz wanted."

. On August 13, 1996, the E&C Committee, based upon the report prepared by the Quality Committee concerning the unexpected deaths of five of Marshall's cardiovascular patients, voted to request an independent clinical review of the hospital's provision of cardiovascular care. The American Medico-Legal Foundation was enlisted to conduct the review, which, though nominally directed to "Cardiac Surgery and Anesthesia Services" at SAMC, in fact focused primarily on Marshall's performance at the hospital.

. After completing its review, which included interviews with hospital staff, the foundation prepared a report, which stated that Marshall's practice demonstrated "an unacceptably high mortality rate and complication rate," perhaps due to his surgical techniques. The report also recommended that Marshall be subjected to a number of additional evaluations, including a medical evaluation of a cervical disc problem that he had suffered, **[**9]** drug testing, and a "preceptorship" at a major cardiac center for at least a month. The report advised that Marshall be suspended pending completion of these processes. Marshall raises numerous objections to the methodology employed in the preparation of this report, and contests its conclusions and recommendations.

. In mid-November 1996, Planz informed Marshall that he had decided to terminate their partnership pursuant to the terms of their shareholder agreement.

. On a Friday in late November, 1996, Planz expressed his concern to Dr. James York, an anesthesiologist at SAMC who was scheduled to operate with Marshall on the following Monday, that because of his cervical disk problem Marshall was suffering from back pain and numbness that could impair his ability to perform surgery. At some point in the course of the ensuing conversations among Drs. Planz, York, Veale, Dr. Wayne Hannah (SAMC's Medical Director), and Dr. Ross Clifton (Marshall's treating physician), Planz stated to Clifton that Marshall had been suspended by the hospital's E&C Committee, a statement which Marshall alleges to have been untrue. Because of the concern over his ability to operate, Marshall voluntarily **[**10]** removed himself from the surgical roster.

. In December 1996, Planz informed Pelle, who had by then succeeded Blackmon as Chief Executive Officer of SAMC, that he would sue the hospital, based upon the purported exclusive contract between the hospital and Planz, if it continued to work with, or financially support, Marshall despite the dissolution of the Planz-Marshall partnership. Pelle perceived Planz's statements to him as indicating that he would be unhappy with Pelle and the hospital if the assurances that Blackmon had initially provided to Planz would not be honored.

---

[2] It should be noted that the defendants challenge on hearsay grounds the admissibility of Marshall's evidence regarding this, and various other, conversations that Marshall alleges to have taken place. However, as explained more fully below, the court concludes that Marshall's antitrust claims cannot withstand summary judgment even if all of the alleged conversations did in fact occur and the participants actually said what Marshall alleges them to have said. Consequently, the court will proceed on the assumption that the statements are admissible without addressing the merits of the defendants' challenge.

[3] The uncontradicted record shows that no such exclusive contract ever existed. However, Marshall has proffered evidence suggesting that Blackmon and Planz contemplated executing such a contract in the wake of the dissolution of the Marshall-Planz partnership, or, alternatively, that an already existing, but unsigned, exclusive contract between Planz and SAMC would be executed.

. Also in December 1996, Marshall discussed with Pelle the possibility of Marshall's establishing an independent practice at SAMC, and Pelle assured Marshall that as long as Marshall remained at the hospital Pelle wanted to ensure that Marshall would be treated fairly.

. **[*1236]** On January 3, 1997, Planz and Clifton met with Hannah, SAMC's Medical Director, to express their concerns regarding Marshall's treatment of patients, patient safety issues, and his relationship with the nursing staff. During this meeting, Planz told Hannah that "something had to be done" about Marshall, because patients were being **[**11]** harmed. Planz's concern stemmed from two of Marshall's patients who had suffered postoperative strokes, and a patient in the intensive care unit for whom Marshall had ordered what Planz and others deemed to have been an ill-advised procedure, which required immediate reversal upon its completion to save the patient's life. In the course of the discussion, Clifton agreed to ask Marshall to discontinue voluntarily his surgical practice. Subsequently, Hannah contacted all available members of the E&C Committee, and each stated that he or she would cast a vote to summarily suspend Marshall should he refuse to voluntarily stop operating on patients. Later that day, because Clifton had been unable to reach Marshall, the E&C Committee unanimously suspended Marshall's surgical privileges until concerns about the quality of care his patients received could be further reviewed at a meeting scheduled for January 14, 1998. At that meeting, the E&C Committee reviewed the report of the American Medico-Legal Foundation and decided to leave in place the suspension of Marshall's surgical privileges.

. The E&C Committee subsequently held a series of hearings concerning the status of Marshall's **[**12]** surgical privileges at SAMC, pursuant to the hospital's peer review process. Numerous witnesses presented testimony regarding Marshall's performance at the hospital, and the evidence heard by the committee included Marshall's operative mortality rate and his relations with the nursing staff and fellow physicians.

. At an informal hearing convened by the E&C Committee on January 30, 1997, Marshall, represented by his attorney, challenged the statistical data regarding his operative outcomes that the committee had relied upon in maintaining its suspension against him. Marshall also proposed a number of solutions to the problem that would permit him to regain his privileges, and his attorney warned the committee that the hospital could be exposing itself to legal liability, especially if the call for Marshall's suspension was originated by Planz. The committee decided to maintain the suspension and continue to proceed with the correction plan outlined in SAMC's bylaws.

. The following day, January 31, 1997, a surgical ad hoc committee charged with investigating the allegations against Marshall held an informal hearing at which Marshall and his attorney were afforded an opportunity **[**13]** to respond to the allegations. After hearing Marshall's rebuttal testimony regarding the allegations of inadequate care and disruptive behavior, including his assertion that the mortality data developed by the outside reviewers distorted his record because he operated on higher risk patients than did Planz and other surgeons, the committee held deliberations and concluded that the external review indicated a quality-of-care problem and that Marshall's admittedly disruptive actions could not be justified. The committee prepared a report summarizing these conclusions and forwarded it to the E&C Committee.

. After receiving the surgical ad hoc committee's report, the E&C Committee voted unanimously to terminate Marshall's privileges at SAMC.

. In February and March 1997, an SAMC hearing committee consisting of three physicians held a formal hearing regarding Marshall's status at the hospital. Testimony was taken regarding the quality of patient care rendered by Marshall, as well as his relations with hospital staff. On April 9, 1997, the hearing committee unanimously recommended that the E&C Committee's decision be upheld "on the basis of disruptive and abusive behavior associated **[**14]** with personnel involved in patient care with implications **[*1237]** of adverse effect on the quality of patient care." The hearing committee rejected the possibility of rehabilitation in Marshall's case.

. Next, the Houston County Health Care Authority Board, which served as SAMC's board of directors, empaneled an appellate review committee, comprising four Board members, to review the prior proceedings related to the proposed revocation of Marshall's privileges. The appellate review committee conducted a hearing on the matter, at which Marshall and his counsel were present, and subsequently recommended that the Board uphold the E&C Committee's decision to revoke Marshall's privileges.

. After considering the appellate review committee's recommendation, the Board voted unanimously to approve the termination of Marshall's surgical privileges at SAMC. Shortly thereafter, Flowers Hospital followed suit and summarily suspended Marshall's privileges based upon the action taken by SAMC.

. During the course of his business relationship with Marshall, Planz had expressed his opinion to Marshall that the presence of a competing cardiovascular surgery group in Dothan would be unwelcome **[**15]** because it could generate competitive bidding for contracts with managed care organizations, and thus decrease SCA's revenues. Planz illustrated his concerns by pointing to the experiences of two medical specialties in which competing groups had merged to prevent managed care organizations or health maintenance organizations from decreasing compensation rates.

. Marshall alleges, and the court assumes as true for purposes of deciding the defendants' motion for summary judgment, that Planz engaged in a systematic campaign to impugn Marshall's personal and professional integrity, as part of Planz's effort to persuade SAMC to strip Marshall of his surgical privileges, and to make it impossible for Marshall to practice cardiovascular surgery in Dothan. Among the defamatory statements that Planz is alleged to have made are: (1) statements to various physicians that Marshall's severe back problems prevented him from operating safely; (2) statements that Marshall was suicidal and mentally unstable; (3) statements associated with the quality-of-care complaint Planz made to SAMC's E&C Committee; (4) statements to various individuals at SAMC that Marshall had abandoned patients; (5) statements **[**16]** to SAMC staff that Marshall "killed" patients; (6) statements to individuals in SAMC's cardiovascular surgery intensive care unit that Marshall's surgical privileges had been terminated and that his orders were to be disregarded; (7) statements to patients and others in Dothan that Marshall had left town and no longer practiced medicine in Dothan; and (8) statements to an outside physician reviewer that Marshall had been suspended from his residency for six months.

. At the time Marshall's ties to SCA were severed, and at all times thereafter, SCA was the sole provider of cardiovascular surgery services in Dothan, Alabama, and a surrounding eleven county region. Since Marshall and SCA parted ways, he has not established an independent cardiovascular surgery practice in this region, although he intended to before he lost his surgical privileges at SAMC and Flowers Hospital.

. After Marshall's departure from SCA, Planz replaced him with a lower-paid physician-associate, resulting in an increase in Planz's income despite a decrease in his caseload.

II. MOTION FOR SUMMARY JUDGMENT STANDARD

HN2[] *Rule 56(c) of the Federal Rules of Civil Procedure* provides that summary judgment is appropriate where "there is no genuine issue as to any material fact and ... the moving party is entitled to a judgment as a matter of law." Once the party seeking summary judgment has informed the court of the basis for its motion, the burden shifts to the non-moving party to demonstrate why summary judgment would be inappropriate. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1986)*; *see also* *Fitzpatrick v. City of Atlanta, 2 F.3d 1112, 1115-17* ***[*1238]*** *(11th Cir. 1993)* (discussing how the responsibilities of the movant and the nonmovant vary depending on **[**18]** whether the legal issues, as to which the facts in question pertain, are ones on which the movant or nonmovant bears the burden of proof at trial). In making its determination, the court must view all evidence and any factual inferences in the light most favorable to the nonmoving party. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986)*.

III. FEDERAL ANTITRUST CLAIMS

In their motion for summary judgment, the defendants contend that the court should dismiss Marshall's antitrust claims without reaching their merits, on two alternative grounds: (1) because Marshall lacks standing to bring antitrust claims against them, and (2) because the defendants enjoy immunity against Marshall's antitrust claims. In addition, the defendants assert that the claims should be dismissed on their merits even if Marshall clears the standing and immunity hurdles, for a multitude of reasons.

As is true of virtually every issue that arises in the antitrust context, the standing and immunity challenges raised by the defendants present myriad thorny analytical questions for the court. However, the court does not need to decide either issue **[**19]** here because, as explained below, Marshall is unable to satisfy a basic prerequisite for establishing liability under the antitrust laws, namely that the actions of the defendants actually caused his alleged antitrust injuries. [4]

A. Causation in Antitrust Cases

Causation in the antitrust context, especially where a physician challenges a hospital's credentialing decision, is a somewhat elusive concept. ***HN3***[] In applying the antitrust laws, courts have come to recognize two distinct types of causation questions, the first of which is essentially identical to that typically posed in the tort context, and the second of which is unique to antitrust **[**20]** cases. As explained below, it is the first, tort-based causation requirement that presents an insurmountable barrier to Marshall's antitrust claims in this lawsuit.

HN4[] Courts have long recognized that antitrust claims are tortious in nature, and that common-law principles governing tort claims are equally applicable to antitrust claims. *See Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 532-33, 103 S. Ct. 897, 905-06, 74 L. Ed. 2d 723 (1983)* (proximate causation and other common-law limitations on damages are applicable in antitrust context); *DeLong Equip. Co. v. Washington Mills Abrasive Co., 840 F.2d 843, 848 (11th Cir. 1988)* (citing *Myers v. American Dental Ass'n, 695 F.2d 716, 723 (3rd Cir. 1982)* (antitrust claims are, in essence, "forms of torts alleging business injury")); *Solomon v. Houston Corrugated Box Co., 526 F.2d 389, 392 n.4 (5th Cir. 1976)*.

HN5[] Among the common-law principles governing tort claims that are applicable in the antitrust context is the requirement that the plaintiff demonstrate that the defendant actually caused the alleged injury. *See Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1459, 1462 (11th **[**21]** Cir. 1991)* (noting that "A private party seeking to invoke the antitrust laws must show that the defendants caused the alleged injury…. As with other causes of action that are tortious in nature, failing to show causation is fatal to a *section 1* [of the Sherman Act] claim"; also applying this requirement to the plaintiff's *§ 2* claims) (internal citations omitted); *Cable Holdings of Ga., Inc. v. Home Video, Inc., 825 F.2d 1559, 1561-62 (11th Cir. 1987)* ("To recover under the antitrust laws, a plaintiff must prove that a defendant's illegal conduct materially contributed to his injury. Proof of a violation of the Sherman Act standing alone does not establish civil liability"). Thus, to survive the defendants' motion for summary judgment Marshall must proffer sufficient evidence to permit a fact-finder reasonably to infer that Planz's actions actually caused the injuries that Marshall alleges in support of his antitrust claims.

[*1239] ***HN6***[] The second causation question that courts have come to recognize, which is unique to antitrust cases, is often examined in connection with the determination of whether a plaintiff enjoys antitrust standing. In essence, this question involves an assessment **[**22]** of whether the defendants caused a plaintiff what has come to be known as an 'antitrust injury'--that is, an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. As the Eleventh Circuit has explained, this second causation question

> "asks for something other than an inquiry into whether an antitrust violation has put a plaintiff in a worse position than it otherwise would have been in. Often an antitrust violation has effects beneficial as well as banned. The causation question asks not whether the antitrust violation caused the plaintiff's injury, but whether the banned effects flowing from that violation--as opposed to the beneficial ones--led to the plaintiff's harm. In many cases this distinction makes a difference. This is so because in many cases the 'injury to competition' an ***antitrust law*** was established to prevent is different from an 'injury to competitors' that a breach (or nonbreach) of that law may effect. In those cases a competitor cannot complain if injured unless the injury **[**23]** flows from anti-competitive, not anti-competitor, effects."

---

[4] In deciding this case on the merits without reaching the standing question, the court adheres to the standard set by the Eleventh Circuit in *Levine v. Central Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1545 (11th Cir. 1996)* (decision on the merits without addressing standing is appropriate where a court concludes that the plaintiff has not made out an antitrust violation).

Alan's of Atlanta, Inc. v. Minolta Corp., 903 F.2d 1414, 1427 (11th Cir. 1990) (citations omitted).

Typically, in antitrust actions brought by physicians based upon the credentialing decisions of hospitals, courts are confronted with the difficult question of whether the plaintiff, who plainly suffered some sort of injury as a result of the alleged monopolists' conduct, suffered the type of injury that is compensable under the antitrust laws. Thus, in these cases the first question discussed above, whether the defendants actually caused the plaintiffs' injuries, is rarely at issue; instead, causation is firmly established, but the courts must examine the record for evidence that the plaintiff suffered the ever-elusive 'antitrust injury' described above. For instance, in *Todorov* the Eleventh Circuit denied antitrust standing to a physician who challenged a hospital's rejection of his application for privileges because it found that the physician had only shown that he had been deprived of "the profits he would have garnered had he been able to share a part of the [other physicians'] supercompetitive, or monopoly, **[**24]** profits." *921 F.2d at 1453-54*. The court observed that such an injury clearly is not an antitrust injury, as defined above, because "the antitrust laws were not enacted to permit one person to profit from the anticompetitive behavior of another person." *Id. at 1454*; *see also* *Oksanen v. Page Memorial Hosp., 945 F.2d 696, 709 (4th Cir. 1991)* (noting that "the aphorism that 'the antitrust laws were enacted for the "protection of *competition*, not *competitors*,"' rings true" where the physician-plaintiff had not demonstrated harms to competition in the relevant market); *Robles v. Humana Hosp. Cartersville, 785 F. Supp. 989, 998-99 (N.D. Ga. 1992)* (finding no antitrust injury because complaint alleged only "harm to the individual doctor and not to competition within the marketplace").

Here, by contrast, the injuries that Marshall alleges to have suffered--namely, the loss of his practice in Dothan and his inability to reestablish it due to the revocation of his surgical privileges at the only two hospitals in Dothan at which cardiac surgery is performed--appear to fit snugly within the parameters of 'antitrust injury,' for he complains that Planz's challenged actions were **[**25]** calculated to create and/or maintain his monopoly over cardiac-surgery services in the relevant market by ensuring that Marshall, a potential provider of these services who would increase competition and lower prices, could not practice medicine in the market. [5] **[*1240]** *See* *Boczar v. Manatee Hosps. & Health Systems, Inc., 993 F.2d 1514, 1519 (11th Cir. 1993)* (holding that sufficient evidence existed to support a finding that a physician suffered antitrust injury where her loss of privileges ended her ability to compete in the relevant market and burdened her ability to compete generally). However, Marshall's antitrust claims founder on the first, tortbased, causation requirement discussed above because he has not mustered the evidence necessary to establish that the *defendants*' actions actually caused his alleged antitrust injuries. Instead, as explained more fully below, it is beyond legitimate dispute that any antitrust injuries suffered by Marshall were solely caused by the unilateral decision of SAMC's board of directors to revoke Marshall's surgical privileges after the completion of the peer review proceedings regarding his performance at the hospital, and by the subsequent **[**26]** decision by Flowers Hospital to follow suit based upon SAMC's decision.

B. The Actions Marshall Alleges to Have Caused Him Antitrust Injury

To explain the basis for its finding that Marshall has failed to establish causation, the court will first examine more closely the conduct of Planz that Marshall challenges as unlawful under *§§ 1* and *2* of the Sherman Act. For reasons that will become clear when it discusses the relative roles of Planz and SAMC's board of directors in the decision to revoke Marshall's **[**27]** surgical privileges, the court will classify Planz's challenged conduct as falling within one or both of two distinct categories: conduct associated with the peer review proceedings at the hospital, and conduct that was wholly separate from that process.

Drawing upon the pretrial order entered in this case, in which Marshall provides a concise summary of Planz's allegedly anticompetitive conduct, the court observes that Marshall challenges three broad classes of Planz's activities. First, Marshall alleges that "Before and during the peer review [process at SAMC], Dr. Planz maliciously

---

[5] The court emphasizes that it has not fully considered the question of whether Marshall has established the requisite antitrust injury, which requires a complicated analysis of whether the harms he complains of truly flow from any harms to competition worked by the revocation of his surgical privileges in Dothan. However, because Marshall has not satisfied the tort-based causation requirement for the reasons explained in the text of this order, the court is not called upon to decide the antitrust-injury question.

spread false and defamatory statements to SAMC officials, physicians, and others." [6] **[**28]** Second, Marshall contends that Planz threatened SAMC and individuals with lawsuits or other adverse consequences if they sided with Marshall and supported him in establishing an independent practice in Dothan. [7] Third, Marshall alleges that Planz exerted "pressure on SAMC officials to do something' about Dr. Marshall" and instigated the peer review process that led to the revocation of Marshall's privileges by demanding that the hospital suspend his privileges "for a confused litany of reasons." [8]

Most of these allegedly unlawful activities and statements fall within the first category described above, that is, conduct associated with SAMC's peer review process. Some of these are essentially inseparable from that process, including his alleged exhortations that the hospital "do something" about Marshall, his instigation of the peer review process by lodging a complaint about Marshall's performance, his alleged statements to hospital personnel that Marshall was suicidal and that his back problems impeded his ability to perform surgery, and, finally, Planz's alleged statement to the outside reviewers from the American Medico-Legal Foundation that Marshall had been suspended from his residency for six months. Other challenged statements allegedly made by Planz, while less closely tied to the peer review process, were nonetheless obviously calculated to, as Marshall puts it in his allegations in the pretrial order, "poison[] the medical staff's perceptions of Dr. Marshall's personal and professional character," **[**29]** so that it became "a **[*1241]** virtual certainty that Marshall would be terminated based upon any excuse." [9] Thus, these alleged remarks, which include the statement that Marshall killed his patients, that he abandoned his patients, and that his privileges had been terminated rather than suspended, also fall within the category of statements that are associated with the peer review proceedings.

This leaves only three challenged actions that arguably occurred outside the peer review process: (1) Planz's alleged threat to sue SAMC if it chose to support Marshall's independent practice after the partnership between the two physicians was severed; (2) Planz's alleged threat to prevent the hospital's perfusionists from providing Marshall with necessary services after dissolution of the partnership; and (3) Planz's alleged remarks to individuals in Dothan that Marshall had left town and no longer intended to practice medicine in Dothan.

C. Did the Challenged Actions **[**30]** of Planz Cause Marshall's Alleged Antitrust Injuries?

The next step for the court is to determine whether any of the foregoing actions or statements ascribed to Planz, either individually or collectively, actually caused the antitrust injuries that Marshall alleges. For the following reasons, the court finds that Marshall has failed to demonstrate the requisite causation.

The court readily concludes that the actions and statements falling within the first category described above, conduct associated with the peer review process, did not actually cause Marshall's alleged antitrust injuries. The court arrives at this conclusion chiefly because the ultimate, allegedly trade-restraining, outcome of this challenged conduct was the revocation of Marshall's surgical privileges by SAMC's board. In other words, the individual actions themselves, on their own or collectively, did not, and indeed could not, amount to an unlawful restraint on Marshall's ability to compete against the defendants. Instead, the revocation of Marshall's privileges, first by SAMC and immediately thereafter by Flowers Hospital, was the sole action that could have--by barring him from establishing a viable medical **[**31]** practice in Dothan--caused the alleged antitrust injuries. In fact, Marshall himself concedes as

---

[6] Order on pretrial hearing, entered on June 18, 1998, at 4. Within this broad category Marshall points to six specific statements he attributes to Planz: (1) that Marshall routinely killed patients; (2) that he had a personality disorder and was suicidal; (3) that he abandoned his patients; (4) that he was suspended from his residency for six months; (5) that his privileges had been revoked, when in fact they had only been suspended at the time; and (6) that he was a danger to patients because he had cervical disc disease and other medical problems. *See id*. at 4-5. In his complaint. Marshall also alleges that Planz told "patients and others" in Dothan that Marshall had left town and would not resume practicing medicine in Dothan, which was untrue at the time. *See* Plaintiff's second amended compl., filed on Oct. 23, 1997, at P 33.

[7] Order on pretrial hearing, entered on June 18, 1998, at 2, 3.

[8] *Id*. at 5.

[9] Order on pretrial hearing, entered on June 18, 1998, at 5.

much in his contentions in the pretrial order entered in this lawsuit, where he states that "Dr. Planz could not prevent Dr. Marshall from establishing a competing cardiac surgery practice unless Dr. Marshall's privileges were suspended and/or revoked at SAMC and Flowers. Therefore, he undertook a campaign to destroy any chance for Dr. Marshall to conduct an independent practice of cardiac surgery in Dothan." [10]

Moreover, the court reaches the same conclusion regarding the alleged acts that occurred *outside* the peer review context. The court agrees with Marshall that these statements and threats arguably were not calculated to, and in fact did not, influence the peer review process. However, nothing in the record persuades the court that this alleged conduct, even if it did indeed occur, resulted in Marshall's alleged antitrust injuries. While Marshall points **[**32]** to a significant body of evidence indicating that he suffered damages as a result of the revocation of his privileges at the two Dothan hospitals, he has not proffered any evidence to establish that Planz's conduct outside the peer review process could have--absent the hospitals' decisions to revoke privileges--caused him antitrust injury. [11]

[33]** **[*1242]** In summary, then, it is evident that any antitrust injury that Marshall could conceivably prove would have stemmed from the revocation of his surgical privileges at the two hospitals, and Planz's allegedly unlawful activity that lead up to or was associated with that decision, standing alone, was merely ancillary to the true source of Marshall's alleged injuries and the action that actually animates this lawsuit--in Marshall's own words, the "unwarranted revocation of Dr. Marshall's privileges at the Medical Center." [12]

Furthermore, it is beyond legitimate dispute that Planz's challenged conduct did not actually cause the revocation of Marshall's privileges. Instead, that action was taken exclusively and independently by SAMC's board of directors itself. The record establishes incontrovertibly that the board retained the ultimate and exclusive decisionmaking power over the revocation decision, and that it did not merely rubberstamp the **[**34]** recommendations of its peer review committees or any individual physicians, including Planz. In so doing, the hospital acted in accordance with *§ 22-21-318* of the Alabama Health Care Authorities Act of 1982, under which it had been reincorporated in 1988, *see* 1975 *Ala. Code § 22-21-318(a)(12)* (authorizing hospital authorities organized under the Act "To select and appoint medical and dental staff members and others licensed to practice the healing arts and to delineate and define the privileges granted to each such individual"); *Todorov, 921 F.2d at 1461* (observing that the Act specifically authorizes hospitals "to make decisions concerning the granting of privileges"), as well as the by-laws governing the medical staff at SAMC. [13] Marshall does not dispute these facts, nor does he offer any evidence that the board reached its decision without conducting its own, independent review. Moreover, the court's own examination of the record reveals no suggestion that board ceded control over the ultimate decision to any hospital committee or individual staff members. Thus, there is no question that the ultimate decision to terminate Marshall's surgical privileges was not the final **[**35]** result of a scheme to restrain trade hatched by Planz alone or with the participation of others at SAMC. Under these circumstances, the court concludes that Marshall has failed to establish, as he must to maintain his antitrust claims, that the defendants actually caused his alleged antitrust injuries.

---

[10] Pretrial order, entered on June 18, 1998, at 3.

[11] Of course, once the decision to revoke Marshall's privileges was made, Planz's actions outside of the peer-review context were rendered wholly superfluous, and could not have further hindered Marshall's ability to compete in Dothan. For instance, the two alleged threats made by Planz to SAMC officials appear to have been calculated to persuade the hospital to impede Marshall's ability to compete against Planz by withdrawing necessary support for Marshall's practice, while the alleged remark to individuals in Dothan appears to have been aimed at interfering with his practice by discouraging patients from seeking his services. However, once SAMC and Flowers Hospital revoked Marshall's surgical privileges, he was no longer in a position to pursue a competing practice in Dothan because he could not perform surgery at either hospital. Thus, in reality it was the revocation of Marshall's privileges, if anything, that caused his alleged antitrust injuries.

[12] Plaintiff's second amended compl., filed on Oct. 23, 1997, at P 83.

[13] *See* defendants' exhibit no. 97, SAMC medical staff bylaws, at 22-23 (providing that the board makes the final decision regarding staff privileges).

In *Todorov*, the Eleventh Circuit reached the same conclusion on closely analogous facts, ruling that a physician's failure to establish that the defendant physicians caused his alleged antitrust injuries was fatal to his claims under §§ 1 and 2 of the Sherman Act. As previously stated, the *Todorov* court had found that the plaintiff lacked standing because he did not allege the requisite antitrust injury. *See* 921 F.2d at 1453-54. The court went on, however, to explain that the plaintiff's claims against three radiologists at the hospital--who had **[**36]** allegedly conspired among themselves to monopolize the relevant market and had enlisted the hospital board's aid by convincing it to deny the plaintiff's request for privileges--would not survive even if the plaintiff enjoyed antitrust standing because the hospital had acted *unilaterally* in denying the application for privileges. *See* id. at 1459. The court concluded that "the radiologists, regardless of their desires, were not causally responsible for" the decision to deny privileges, and therefore that the plaintiff could not maintain an action under either § 1 or § 2 of the Sherman act, because he was unable to prove that the defendant radiologists caused his injury. Id. at 1459, 1462.

To be sure, **HN7**[] the court recognizes that under certain circumstances a plaintiff may succeed in making out a claim under § 1 of the Sherman Act by demonstrating that a hospital and members of its medical staff conspired to restrain trade. *See* Todorov, 921 F.2d at 1455; Bolt v. Halifax Hosp. Med. Ctr., 891 F.2d 810, 819 (11th Cir. 1990); *see also* Crosby v. Hospital Auth. of Valdosta and Lowndes County, 93 F.3d 1515, 1521 (11th Cir. 1996) (noting that while other aspects **[*1243]** of the **[**37]** *Bolt* decision had been implicitly overruled by the Supreme Court, this holding remained the law of the circuit), *cert. denied*, *520 U.S. 1116, 117 S. Ct. 1246, 137 L. Ed. 2d 328 (1997)*. Thus, Marshall may survive summary judgment on his § 1 claim if he can establish that the revocation of privileges stemmed from a concerted action by Planz and the hospital.

However, to prevail on such a claim, Marshall must "demonstrate 'a unity of purpose or a common design and understanding, or a meeting of the minds in an unlawful arrangement.'" Todorov, 921 F.2d at 1455-56 (quoting American Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 1139, 90 L. Ed. 1575 (1946)). **HN8**[] Where a plaintiff cannot point to an explicit agreement among the alleged conspirators, as is the case here, he or she may resort to circumstantial evidence. Under such circumstances, "the plaintiff, to survive a motion for summary judgment, must present evidence that reasonably 'tends to exclude the possibility' that the alleged conspirators acted independently." Todorov, 921 F.2d at 1456 (quoting Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 1471, 79 L. Ed. 2d 775 (1984)). **[**38]** As the Eleventh Circuit has explained:

> "This means that 'conduct as consistent with permissible [activity] as with illegal conspiracy does not, standing alone, permit the inference of conspiracy. Thus, when the defendant puts forth a plausible, procompetitive explanation for his actions, we will not be quick to infer, from circumstantial evidence, that a violation of the antitrust laws has occurred; the plaintiff must produce more probative evidence that the law has been violated."

Todorov, 921 F.2d at 1456 (internal citations omitted).

Here, the defendants have proffered as procompetitive reasons for the termination of Marshall's privileges the hospital's concerns about patient safety and staff morale, in view of the lengthy record of complaints against Marshall, as well as the evidence of inadequate care and disruptive behavior uncovered during the peer-review process. **HN9**[] Many courts have recognized that by imposing sanctions on physicians who do not satisfy their patient-care requirements hospitals do indeed take steps to enhance, rather than restrict, competition. *See* Mathews v. Lancaster General Hosp., 87 F.3d 624, 640 (3rd Cir. 1996) (noting that "peer **[**39]** review actions, when properly conducted, generally enhance competition and improve the quality of medical care"); Weiss v. York Hosp., 745 F.2d 786, 821 n.60 (3d Cir. 1984) ("It seems obvious that by restricting staff privileges to doctors who have achieved a predetermined level of medical competence, a hospital will enhance its reputation and the quality of medical care it delivers. Thus such action is pro-competitive."); Oksanen v. Page Memorial Hosp., 945 F.2d 696, 709 (4th Cir. 1991) (noting that "the peer review process, by policing competence and conduct of doctors, can enhance competition"). That is not to say, though, that Marshall cannot overcome this asserted procompetitive explanation by demonstrating that it is merely a pretext masking a conspiracy between Planz and the SAMC board to restrain trade unlawfully by stripping Marshall of his surgical privileges.

However, the record establishes that Marshall has failed to make a factual showing sufficient to overcome the defendants' asserted procompetitive explanation. Considered in the light most favorable to Marshall, his circumstantial evidence amounts to the following. First, Planz had an economic, anticompetitive **[**40]** incentive to exclude Marshall from the cardiac surgery market in Dothan and its environs. Second, the most effective, and perhaps exclusive, means of ensuring that Marshall could not compete would be to secure the revocation of his surgical privileges at the only two hospitals in the area that supported cardiac surgery, and to do so Planz would need to enlist the aid of officials at SAMC, with whom he had a close association and over whom he could perhaps wield some influence. Third, Planz in fact communicated his desire to exclude Marshall from the market to several individuals associated with SAMC, by seeking assurances from the hospital's then-current chief executive officer that it would support Planz rather than Marshall, and by threatening other hospital officials with adverse consequences should they chose to support Marshall in an independent practice. Fourth, the peer review process contained several deficiencies, including errors in data collection and analysis. Fifth, **[*1244]** and finally, the hospital itself had several economic incentives to side with Planz and strip Marshall of his privileges. [14]

[41]** The court finds that this evidence, while it may contain the whisper of a suggestion that SAMC's board conspired with Planz to restrain trade unlawfully by revoking Marshall's privileges, does not even remotely exclude the possibility that the board acted unilaterally and procompetitively in reaching its decision. Most importantly, there is no indication in the record that Planz conspired *with SAMC's board of directors* to secure the revocation of Marshall's privileges. While Planz's meetings with former SAMC chief executive officer James Blackmon may provide, when all inferences are drawn in Marshall's favor, a hint of a conspiracy between Planz and an SAMC official, the record shows that Blackmon was no longer the hospital's CEO when the board decided to revoke Marshall's privileges, and there is no indication that he could have influenced the board's deliberations. Nor does the record reveal any instances in which Planz communicated to hospital board members his desire that Marshall's privileges be revoked or that Marshall be disciplined in any way. [15]

[42]** Additionally, even if a conspiracy could be established by showing that Planz conspired with other physicians at SAMC, including those on the peer-review committees, and those physicians in turn conspired with the board to revoke Marshall's privileges, there is no factual support for such a finding. Once again, Marshall can point to no evidence that suggests that the board merely rubberstamped the peer-review committees' recommendation that Marshall lose his privileges, and thus ceded its authority under state law and the hospital's by-laws to decide independently questions of staff privileges.

Thus, the court finds that Marshall has failed to muster sufficient evidence to demonstrate a genuine issue of material fact regarding the existence of a conspiracy between Planz and the hospital board. He has presented no evidence that reasonably tends to exclude the possibility that the board acted independently when it revoked Marshall's surgical privileges. Consequently, Marshall cannot maintain his conspiracy claim under *§ 1* of the Sherman Act. [16]

[43]** Moreover, the court notes that a different outcome could very well be warranted if Planz's alleged misdeeds had so infected the peer-review process and the board of directors' final decision that it was in reality Planz who,

---

[14] These economic incentives include, according to Marshall's antitrust expert, a desire to (1) avoid unwanted price competition imposed by managed health care plans should Marshall establish a competing practice at Flowers hospital, and (2) avert the flight of Planz's practice to Flowers should SAMC side with Marshall and thus alienate Planz. *See* Plaintiff's exhibit no. 1 in opposition to defendants' motion for summary judgment, expert report of David M. Eisenstadt, Ph.D., at 29-30.

[15] Moreover, 13 of the 14 members of the board that revoked Marshall's privileges have testified during depositions or have stated in affidavits that Planz did not influence their decision to revoke Marshall's privileges. *See* defendants' memorandum in support of motion for summary judgment, filed on March 18, 1998, at 39-41.

[16] The court reaches this same conclusion regarding Marshall's *§ 2* monopolization claim, to the extent he alleges that Planz and the SAMC board conspired to create or maintain a monopoly over cardiac-surgery services. *See* *Todorov, 921 F.2d at 1460 n.35* (observing that *§ 1* and *§ 2* conspiracy claims require the same threshold showing of the existence of an agreement to restrain trade, and noting that the court need not address the specific intent element of the *§ 2* claim where the plaintiff fails to demonstrate a genuine issue of material fact as to the existence of a conspiracy between the defendant physicians and hospital authority).

wielding undue power over the board, revoked Marshall's surgical privileges. At a hearing held by the court concerning the defendants' summary judgment motion on June 17, 1998, counsel for Marshall colorfully, but aptly, portrayed such a scenario as "Planz putting a gun to the head of the board of the medical center" and forcing the revocation of Marshall's privileges. While the court of course recognizes that the private actor need not actually threaten physical violence to call into question whether the hospital board indeed acted unilaterally, but that raising the specter of severe economic consequences may constitute a sufficient threat, Marshall has not proffered any evidence that would support a reasonable inference that Planz's threats actually subverted the board's independent decision-making process and **[*1245]** that it, in effect, shirked its responsibility and acquiesced to Planz's demands for fear of economic retribution or other undesirable consequences.

[44]** D. Attempted Monopolization Under *§ 2* of the Sherman Act

Marshall maintains that even if the revocation of his surgical privileges was the sole cause of his antitrust injuries, the defendants may nonetheless be liable under *§ 2* of the Sherman Act for attempted monopolization, because he would have suffered a diminution in his practice due to the defendants' anticompetitive conduct even absent the revocation of his privileges. Specifically, Marshall contends that even if he had not been stripped of his privileges there would have been a period of time after the dissolution of his partnership with Planz during which the defendants would have enjoyed a 'short-term monopoly' because Planz had so maligned Marshall at the hospital that it would have taken him some time, perhaps a year or two, to reestablish his goodwill among referring physicians and to rebuild his practice. Marshall asserts that the defendants should be held responsible for the damages he would have sustained during that interim period, because it was Planz's anticompetitive conduct and his attempt to monopolize the provision of cardiac-surgery services that would have caused those damages.

This effort to salvage Marshall's **[**45]** antitrust lawsuit by resort to the theory of attempted monopoly falters, however, because regardless of whether or not Planz's actions amount to an attempt to monopolize the market in the absence of the revocation of Marshall's privileges, Marshall cannot demonstrate that he suffered any actual injury or damages as a consequence of those actions. As the Eleventh Circuit has explained, ***HN10***[] there are three essential elements of an attempted monopolization claim under *§ 2* of the Sherman Act: (1) the defendant must have the specific intent to achieve monopoly power by predatory or exclusionary conduct; (2) the defendant must in fact commit such anticompetitive conduct; and (3) there must have existed a dangerous probability that the defendant might have succeeded in its attempt to achieve monopoly power. *See* *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F.3d 986, 993 (11th Cir. 1993)*. However, in seeking damages for attempted monopolization, Marshall relies upon ***HN11***[] *§ 4* of the Clayton Act, *15 U.S.C.A. § 15*, which provides: "Any person who shall be injured in his business of property by anything forbidden in the antitrust laws may sue therefore in any district court of the United States **[**46]** in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." To sustain such a cause of action, Marshall must show: (1) that the defendants' attempted monopolization constitutes a violation of *§ 2* of the Sherman Act; (2) an injury to his business or property; and (3) a causal relationship between the antitrust violation and the injury. *See* *National Ind. Theatre v. Buena Vista Distribution, 748 F.2d 602, 607 (11th Cir. 1984)*. Moreover, "the last two elements require the valuation of the plaintiff's injury in terms of money damages with some degree of certainty." *Id*.

Thus, to prevail on his attempted-monopolization claim, Marshall must demonstrate that Planz's allegedly anticompetitive conduct resulted in an actual injury to his business, and, further, he must proffer evidence that permits the valuation of his injury with some degree of certainty. He fails on both counts. Marshall can point to no concrete injury that he suffered as a consequence of Planz's alleged misconduct, because even if Planz **[**47]** took steps to sabotage any attempt by Marshall to establish an independent practice after dissolution of the partnership between the two physicians, these actions were swiftly rendered superfluous, in view of the fact that Marshall's privileges at SAMC were suspended, and eventually revoked, almost immediately after the partnership ended. Thus, Marshall never had any real opportunity to strike out on his own after he and Planz parted ways, because SAMC's revocation of his privileges, which prompted Flowers Hospital to follow suit, spelled the end of his hopes of practicing cardiac surgery in Dothan.

Therefore, Marshall is unable to demonstrate that he suffered any injury to his business at the hands of the defendants for **[*1246]** the hypothetical interim period that would have existed, absent the loss of his surgical privileges, between the termination of his relationship with SCA and the reestablishment of his medical practice in Dothan. As a consequence, Marshall cannot satisfy the second and third elements of a claim for damages under *§ 4* of the Clayton Act, and his claim grounded on the defendants' attempted monopolization is due to be dismissed along with his other antitrust claims. **[**48]** [17]

IV. STATE ANTITRUST CLAIM

Marshall also brings a claim against the defendants grounded on state ***antitrust law***. Specifically, he charges them with having violated 1975 *Ala. Code § 6-5-60*. [18] Alabama courts interpret this provision in accordance with federal ***antitrust law***. *See* *Ex parte Rice, 259 Ala. 570, 67 So. 2d 825, 829 (1953)* (per curiam) ("The federal statutes … prescribe the terms of unlawful monopolies and restraints of trade as they should also be administered in Alabama"); *see also* *Avery Freight Lines, Inc. v. Alabama Pub. Serv. Comm'n, 267 Ala. 646, 104 So. 2d 705, **[**49]** 709 (1958)* ("In construing the terms and provisions of Alabama statutes derived from federal statutes, such terms and provisions will usually be considered as having the meaning given by the federal courts"). For the reasons given above regarding the claims for relief under *§§ 1* and *2* of the Sherman Act, the court concludes that summary judgment should also be granted as to Marshall's claim under 1975 *Ala. Code § 6-5-60*.

V. CONCLUSION

Because the court finds that Marshall has failed to establish that the allegedly unlawful acts he ascribes to Planz actually caused him any antitrust injury, the court will grant summary judgment as to all of his federal and state antitrust claims, which are brought pursuant to *§§ 1* and *2* of the Sherman Act, and 1975 *Ala. Code § 6-5-60*.

Accordingly, it is ORDERED that the motion for summary judgment, filed by defendants Edward Planz, M.D., and Southeastern Cardiovascular Associates, P.C. on March **[**50]** 18, 1998, is granted as to all federal and state antitrust claims asserted by plaintiff William G. Marshall, Jr.

DONE, this the *8th* day of July, 1998.

Myron H. Thompson

UNITED STATES DISTRICT JUDGE

End of Document

[17] If Marshall were seeking injunctive relief due to the existence of an ongoing or recurring threat of monopoly posed by the defendants' actions, a different analysis would apply. However, because Marshall is now precluded from resuming his practice in Dothan because he does not possess the requisite staff privileges, the defendants no longer pose any threat to his economic interests, and injunctive relief is unavailable.

[18] *See* plaintiff's second amended compl., filed on Oct. 23, 1997, at PP 74-78.

Seafarers Welfare Plan v. Philip Morris

United States District Court for the District of Maryland

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

The court must deny a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The question is whether in the light most favorable to the plaintiff, and with every doubt resolved in his behalf, the complaint states any valid claim for relief. The court, when deciding a motion to dismiss, must consider well-pled allegations in a complaint as true and must construe those allegations in favor of the plaintiff.

Healthcare Law > ... > Health Insurance > Reimbursement > General Overview

Torts > Negligence

HN2[] **Health Insurance, Reimbursement**

The longstanding common law rule is that one who pays medical expenses on behalf of an injured third party does not have a direct action against the tortfeasor who caused the injury.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN3[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Under the Racketeer Influenced and Corrupt Organizations Act, any person injured in his business or property by reason of a violation of *§ 1962* of this chapter may sue therefor. *18 U.S.C.S. § 1964(c)*.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN4[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Under *18 U.S.C.S. § 1964(c)* of the Racketeer Influenced and Corrupt Organizations Act (RICO), a plaintiff must prove that the defendant's acts were a proximate cause, in addition to being a "but for" cause, of the plaintiff's injury. In order to satisfy RICO's proximate cause requirement, there must be some direct relation between the injury asserted the injurious conduct alleged. Thus, a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts was generally said to stand at too remote a distance to recover.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN5[] **Private Actions, Remedies**

Antitrust injury has been defined as injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The damages sought must flow from that conduct which is proscribed by the antitrust laws. Because the antitrust laws are intended to protect competition only injury caused by damage to the competitive process may form the basis of an antitrust claim.

Antitrust & Trade Law > Consumer Protection > General Overview

HN6[] **Antitrust & Trade Law, Consumer Protection**

Under the Maryland Consumer Protection Act (Act), any person may bring an action to recover for injury or loss sustained by him as the result of a practice prohibited by the Act. *Md. Code Ann., Com. Law II § 13-408*.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN7[] **Types of Contracts, Quasi Contracts**

The elements of a claim for unjust enrichment are first, a benefit conferred on the defendant by the plaintiff; two, an an appreciation or knowledge by the defendant of the benefit; and three, the acceptance or retention by the defendant of the benefit under such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value.

Opinion by: Marvin J. Garbis

Opinion

[*625] *MEMORANDUM AND ORDER*

The Court has before it the motions entitled "Certain Defendants' Motion to Dismiss the First Amended Complaint" and "Certain Defendants' Alternative Motion to Dismiss for Failure to Join Necessary Parties." These motions have been adopted by all Defendants. [1] The Court also has before it the materials submitted by the parties relating to the motions. The Court finds that a hearing is unnecessary.

[3]** As discussed herein, the Court concludes that the motions to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* should be granted. Accordingly, it is unnecessary to consider the alternative motion to dismiss under *Federal Rule of Civil Procedure 12(b)(7)*.

[*626] I. *BACKGROUND*

---

[1] The Moving Defendants are: Philip Morris, Inc., R.J. Reynolds Tobacco Company, Brown & Williamson Tobacco Corp., Lorillard Tobacco Company, The American Tobacco Company, The Council for Tobacco Research -- USA, Inc., The Tobacco Institute, Inc., Hill & Knowlton, Inc., and United States Tobacco Company. B.A.T. Industries, P.L.C. and Smokeless Tobacco Council have indicated that they join in the instant motion, without prejudice to and without waiving their defenses of lack of personal jurisdiction, as per stipulations entered into by the parties and approved by the Court. Liggett Group, Inc. has also indicated to the Court by letter that it joins in the instant motion.

The Plaintiffs in this case are five non-profit labor-management trust funds operating in the State of Maryland (collectively referred to as "Plaintiffs" or "the Funds"). [2] The Funds are established through collective bargaining and pursuant to the Labor-Management ("Taft-Hartley") Act. They are also employee benefit plans and multi-employer plans within the meaning of the Employee Retirement Income Security Act of 1974, *29 U.S.C. § 1001 et seq.* ("ERISA").

The Funds provide health care benefits to union workers, their **[**4]** families, and retirees (referred to as "participants" and "beneficiaries"). The Funds are financed through contributions from the employers of covered workers, the amounts of which are negotiated in collective bargaining between the workers' unions and the employers. The Funds are governed by boards of trustees and are legal entities under ERISA. *29 U.S.C. § 1132(d)*. As such, the Funds hold the Funds' assets in trust for the purpose of providing benefits to participants and their beneficiaries.

The Defendants are this country's leading tobacco companies [3] and their lobbying and public relations agents. [4]

The Funds bring this suit on their **[**5]** own behalf and on behalf of a proposed class of similarly situated funds. As described by the Plaintiffs, "this is an action to recover funds expended by the Plaintiff Funds to provide medical treatment and other benefits and services to their participants and beneficiaries suffering from smoking-related illnesses and to seek appropriate injunctive relief against the Defendants' continuing illegal and outrageous conduct." Complaint P 5. In essence, Plaintiffs allege that, for many years, the Defendants have misrepresented the dangers of smoking cigarettes and the addictiveness of nicotine. They further allege that the Defendants have purposefully inhibited the development of safer tobacco products. As a result, a great many smokers have suffered a variety of serious health problems allegedly stemming from tobacco use.

In their highly detailed and lengthy seventeen [5] count Complaint, which purports to catalogue, among other things, virtually the entire history of the marketing of cigarettes in this country, Plaintiffs assert claims under the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. § 1962* ("RICO"), federal and Maryland antitrust statutes, the Maryland Consumer **[**6]** Protection Act [6], and under Maryland common law for unjust enrichment, breach of voluntarily undertaken duty, fraud, negligent misrepresentation, and conspiracy. [7]

Plaintiffs do not seek to bring subrogation claims for the medical expenses of individual smokers which the Funds paid. Rather, they assert "independent" or "direct" claims to recover such expenses. Defendants now move to dismiss Plaintiffs' entire Complaint for failure to state a claim upon which relief may be granted.

II. *LEGAL STANDARD*

HN1[] The Court must deny a motion to dismiss **[**7]** under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* unless it "appears beyond doubt that the Plaintiff can prove no set of facts in support of his claim which would **[*627]** entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. "The question is whether in the light most favorable to the Plaintiff, and with every doubt resolved in his behalf, the

---

[2] The Plaintiffs are: Seafarers Welfare Plan, United Industrial Workers Welfare Plan, Construction Workers' Trust Fund, Cabinetmakers' Local No. 974 and Carpenters' Local No. 1110 Health and Welfare Fund.

[3] Philip Morris, Inc., R.J. Reynolds Tobacco Company, Brown & Williamson Tobacco Corp., B.A.T. Industries, P.L.C., Lorillard Tobacco Company, Liggett Group, Inc., The American Tobacco Company, and United States Tobacco Company.

[4] The Council for Tobacco Research -- U.S.A., Inc., Smokeless Tobacco Council, Inc., The Tobacco Institute, and Hill & Knowlton, Inc.

[5] The Court notes that the Complaint skips Count XIII when reciting Counts numbered I through XVII.

[6] This claim was previously dismissed without prejudice. However, the Plaintiffs have reinstated it with the consent of the Defendants.

[7] Plaintiffs originally also asserted claims for breach of express warranty, breach of implied warranty, negligence, and strict liability. These claims have been dismissed without prejudice by the Plaintiffs.

Complaint states any valid claim for relief." 5A Charles A. Wright & Arthur R. Miller, *Federal Practice and Procedure 2d* § 1357 (1990). The Court, when deciding a motion to dismiss, must consider well-pled allegations in a complaint as true and must construe those allegations in favor of the plaintiff. *See* *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Jenkins v. McKeithen, 395 U.S. 411, 421-22, 23 L. Ed. 2d 404, 89 S. Ct. 1843 (1969)*. Further, the Court must disregard the contrary allegations of the opposing party. *See* *A.S. Abell Co. v. Chell, 412 F.2d 712, 715 (4th Cir. 1969)*.

III. *DISCUSSION*

In this Court's view, Plaintiffs' entire Complaint suffers from the fundamental flaw that the Funds themselves, as opposed to their participants **[**8]** or the pertinent employers, have not suffered any cognizable damages.

As the Plaintiffs point out, the Funds are established and maintained as nonprofit, tax-exempt trusts. The Funds' assets are held in trust "for the exclusive purpose of providing benefits to participants in the [trust] and their beneficiaries." *29 U.S.C. § 1101(c)(1)*. The Funds are financed by contributions from the Funds' members' employers which are negotiated through the collective bargaining process.

Plaintiffs contend that although the payments to the Funds are deemed employer contributions for tax purposes, the reality is that these monies are substitute wages for the covered workers. As stated by Plaintiffs, "Instead of receiving these monies in their paychecks, the workers, through their unions, negotiate to have their employers contribute to the Funds to finance health coverage for themselves and their families." Plaintiffs' Opposition at 9. It is from these monies that the medical bills of Fund participants are paid. In addition, to the extent a fund chooses to provide benefits through the purchase of insurance, the premiums on the insurance which covers the workers are also paid from these contributions.

[9]** This Court agrees with the view expressed by Judge Fullam of the United States District Court for the Eastern District of Pennsylvania in *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 5951*, No. 97-5344, 1998 WL 212846 (E.D. Pa. Apr. 22, 1998) that the Plaintiff Funds themselves have not suffered any cognizable damages. As Judge Fullam held,

> Whether the contributions are properly attributed to the employer or the participating workers, it is clear that plaintiffs' [the Funds'] own economic interests were not affected by the payments. The fact that the medical costs paid out of these funds increased because of defendants' wrongdoing caused no harm to plaintiffs [the Funds]; it merely meant that the unions negotiated a greater level of contributions from the employers.

Steamfitters, 1998 WL 212846 at *2. Furthermore, "if the Fund[s] recover[] in this lawsuit, [they] would not reimburse contributing employers for their overpayments because [they are] statutorily prohibited from doing so." *Southeast Florida Laborers Dist. Heath and Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440*, *6, No. 97-8715- CIV, 1998 WL 186878 at *1 (S.D. Fla. Apr. 13, 1998) **[**10]** (citing *29 U.S.C. § 1103(c)(1)*). As Judge Fullam noted, unlike the various suits now pending brought by state attorneys general or other governmental entities, the Plaintiffs in the instant case are not the entities which actually paid the increased medical costs from their own assets. Rather, in the instant case, "plaintiffs are merely handling the payments with money provided by others, and have no genuine stake in the matter." *Steamfitters,* 1998 WL 212846 at *2. Finally, Judge Fullam "noted that a reduction of the medical costs payable by plaintiffs [the Funds] would not inure to plaintiffs' [the Funds'] benefit. The money in their hands can only be used to pay benefits on behalf of others, and, since all are non-profit entities, plaintiffs [the Funds] cannot claim to have suffered any economic loss **[*628]** in the form of lost profits." [8] *Id.* at *3.

---

[8] Furthermore, even if they were to prevail in the instant suit, the Funds "could not unilaterally reduce the employers' contributions because these contributions are determined in a collective bargaining agreement to which the Fund[s are] not a party." *Southeast Florida Laborers Dist. Heath and Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440*, at *6, No. 97-8715- CIV, 1998 WL 186878 at *1 (S.D. Fla. Apr. 13, 1998).

[11]** In addition to money damages, Plaintiffs in the instant case also seek injunctive and declaratory relief requiring Defendants to, *inter alia,* publish all of their research pertaining to issues of smoking and health, fund a corrective education campaign designed to reduce smoking among Plaintiffs' participants, cease advertising to minors, and fund smoking cessation programs. As Judge Fullam held, "While plaintiffs' apparent desire to be helpful to its members and to society in general is commendable, plaintiffs [for the reasons heretofore discussed] simply do not have legal standing to advance such claims, which really belong to the individuals affected." *Id.* at *3.

This Court agrees with the foregoing reasoning of Judge Fullam, and, for the reasons stated, concludes that Plaintiffs' entire Complaint must be dismissed.

Alternatively, even if the Funds have suffered injury, each of the Plaintiffs' claims is subject to dismissal for other reasons. As discussed herein, the Court concludes that Plaintiffs' injuries are too remotely caused by the Defendants to satisfy the requirements of proximate cause, Plaintiffs lack "antitrust standing," and Plaintiffs have failed to state **[**12]** a claim for unjust enrichment. [9]

A. *Common Law Tort Claims*

Assuming that the Funds have suffered damages, the Court concludes that any damages suffered by them were too remotely caused by the Defendants. Accordingly, while the Defendants may have been a cause in fact of Plaintiffs' damages, Plaintiffs' damages are too indirectly related to Defendants' actions to satisfy the requirements of proximate causation.

With regard to Plaintiffs' common law tort claims, this Court is mindful of a relatively recent decision by the Circuit Court for Baltimore City addressing Maryland's common law proximate cause requirements in the context of the State of Maryland's suit against the tobacco industry. In *State of Maryland v. Philip Morris, Inc.,* No. 96122017, CL211487, 1997 WL 540913 (Md. Cir. Ct. for Balt. City May 21, 1997), the Circuit Court for Baltimore City was presented with **[**13]** the issue of whether the State of Maryland could state a claim, in its own name, under Maryland common law to recover monies expended by the State through its medicaid program to treat smoking related illnesses of Maryland citizens. The circuit court began its extensive discussion of this issue by noting that "at common law a plaintiff had no right to recover damages from a defendant tortfeasor as a result of the defendant's injuries, harm, or lack of care to a third person, regardless of the fact that the defendant's actions may have put the plaintiff to what otherwise would have been unnecessary or increased expense." *Id.* at *9.

The circuit court then discussed the classic case of *Anthony v. Slaid, 53 Mass. (11 Met.) 290 (1846)*, in which the plaintiff had agreed to provide and pay for the medical expenses of all of the poor people in a small town. The defendant's wife committed a battery on one of town's poor people, which led to the plaintiff incurring additional medical expenses for the pauper. The *Anthony* court did not allow the plaintiff's claim, holding that the damages which plaintiff suffered as a result of the defendant's tort was "too remote and indirect." **[**14]** *State of Maryland,* 1998 WL 540913 at *10 (quoting *Anthony, 53 Mass. at 291*). As summarized by the circuit court, the "plaintiff was not permitted to maintain a cause of action against a defendant tortfeasor as a result of the tortfeasor putting plaintiff to increased medical expenses resulting from the tortfeasor's injuries to a third party." *Id.*

After discussing several more cases illustrative of this principle, [10] the circuit court **[*629]** concluded that "the State of Maryland in the present action had no right at common law, and consequently has no right now, to assert claims in its own name against Defendants as alleged tortfeasors for the harm Defendants allegedly caused (whether intentional or not) to third party smokers." [11] *Id.* at *12. The court held that "in the absence of some special statute

---

[9] Thus, it is unnecessary to reach the myriad of other arguments advanced by the Defendants against Plaintiffs' individual counts.

[10] Including one from the United States Supreme Court, *Holmes v. Security Investor Protection Corp., 503 U.S. 258, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)* (discussing the remoteness principle in the RICO context). *Holmes* will be discussed *infra* with regard to Plaintiffs' RICO claims.

[11] Thus, contrary to Plaintiffs' contention, the remoteness principle applies equally to both negligent and intentional torts.

allowing recovery, the damages are deemed under the proximate cause analysis to be too remote and indirect for plaintiffs to recover." [12] *Id.* at *14. However, the court held that while the State could not bring direct common law claims in its own name against the Defendants, the State was entitled to bring such claims in the name of each individually injured medicaid recipient **[**15]** under the equitable doctrine of subrogation. *Id.* at *13. Furthermore, the State had a subrogation remedy against the Defendants as provided by *Md. Code Ann. Health-Gen. § 15-120*. *Id.* at *3.

[16]** Plaintiffs in the instant case attempt to distinguish their claims from the State's claims which were rejected in *State of Maryland.* They argue that rather than seeking to recoup the medical expenses which they paid on behalf of injured smokers, they instead seek to recover for their "increased cost of doing business." [13] In essence, Plaintiffs contend that by concealing and misrepresenting the "truth" [14] about tobacco's harmful effects, the Defendants prevented the Plaintiffs "from taking action to reduce or eliminate their cost burdens from tobacco-related disease." Plaintiffs' Opposition at 10. As stated by the Plaintiffs,

> Had Defendants disclosed the truth about the addictive qualities of nicotine and the disease-causing effects of smoking, the Funds' trustees could have taken action to protect the Funds from the financial burdens of tobacco-related disease by, among other things: limiting coverage of smoking-related disease, imposing cost-sharing requirements *(e.g.* deductibles and/or co-payments) on participants who smoke; requiring smokers to participate in cessation programs; or requiring participants at risk for smoking to participate in smoking prevention **[**17]** programs.

Id. at 10-11. Plaintiffs also contend that had the Defendants not suppressed the manufacture and sale of safer cigarettes, they could have encouraged their participants to smoke the safer cigarettes, presumably thereby reducing the health costs that the smokers would have incurred.

The Defendants contend that the State of Maryland made this identical argument before the Circuit Court for Baltimore City, and that that court rejected it vis-a-vis the State's claims. [15] This Court does not have before it the pleadings that were submitted to the circuit court. To the extent that the Defendants' characterization of what transpired in **[**18]** that case is accurate, this Court **[*630]** agrees with the result reached by the circuit court. Even if the Defendants' characterization of the circuit court's ruling were wrong, however, this Court nonetheless finds that, although the question is a close one, Plaintiffs' attempt to recharacterize their injuries as "direct" fail as a matter of law.

The Defendants have stated that, in total, **[**19]** there are approximately 40 union health and welfare fund lawsuits pending against the tobacco industry in federal courts around the country. The parties have made the Court aware of three recent decisions from federal district courts addressing the issues currently under discussion in the context

---

[12] The circuit court noted that its holding "does not mean that the Court is unmindful of the dilemma faced by the State and the magnitude of the harm which may have been caused by the defendants. Assuming the truth of all relevant facts as argued by the Plaintiff, it is clear that the State of Maryland has borne the tremendous burden of this health care crisis, in both lives and financial resources. Unfortunately, . . . without proper legal remedy, there exists no claim upon which relief can be granted." *State of Maryland v. Philip Morris, Inc.,* No. 96122017, CL211487, 1997 WL 540913 at *14 (Md. Cir. Ct. for Balt. City May 21, 1997).

[13] Plaintiffs disavow any intention to bring subrogation claims, presumably, among other reasons, to avoid having to identify and prove the multitude of individual cases involved.

[14] As the Plaintiffs view such "truth." The Court is expressing no opinion as to whether, on the merits, the Defendants are guilty of such concealment or misrepresentation.

[15] Defendants contend that "What the Funds fail to acknowledge is that the very same attempt to re-package the State's derivative injury claim as a claim for 'direct' harm was made by the State and rejected by the court in *State of Maryland;* both the complaint and the briefs submitted by the State contended that the State itself had 'detrimentally relied' upon defendants' supposed fraud and concealment. The *State of Maryland* court saw through that verbal charade and recognized that -- as here -- all of the claimed injuries to the State flowed from the injuries allegedly inflicted upon smokers." Defendants' Reply at 4-5.

of similar 12(b)(6) motions filed by the tobacco defendants in cigarette "cost recovery" lawsuits brought by health and welfare trusts funds. Each of those courts has considered plaintiff funds' attempts to articulate a direct injury entitling them to direct common law claims, as opposed to being limited to subrogation claims. The Court finds the analyses in those cases to be instructive. [16]

[20]** While the question is a close one, this Court finds itself in agreement with the views expressed by Judge Ryskamp of the Southern District of Florida in rejecting a plaintiff fund's attempt to recharacterize its injury more directly. Although the plaintiff fund attempted to characterize its damages as being for its increased cost of doing business, Judge Ryskamp held that "the Fund cannot escape the fact that any economic injuries which it incurred are purely derivative of the physical injuries which its participants suffered. The Fund cannot, as a matter of law, sustain a claim against the defendants without a closer connection to the defendants." *Southeast Fla. Laborers Dist. Health and Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440*, No. 97-8715- CIV, 1998 WL 186878 at *4 (S.D. Fla. Apr. 13, 1998).

Boiled down to their essence, Plaintiffs' claims are that had they known the truth about smoking, they would have been able to pay fewer medical expenses for their participants who smoked. Plaintiffs' damages would thus be the difference between the health care costs which they actually paid on behalf of injured smokers minus the amount that they otherwise would have paid absent Defendants' **[**21]** alleged misconduct. As discussed in *State of Maryland,* ***HN2***[] the longstanding common law rule is that one who pays medical expenses on behalf of an injured third party does not have a direct action against the tortfeasor who caused the injury. [17] That longstanding rule bars the Plaintiffs' claims in this case, notwithstanding Plaintiffs' artful recharacterization of them. *Cf. Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 5951*, No. 97-5344, 1998 WL 212846 at *2 (E.D. Pa. Apr. 22, 1998) (stating that the Court was not persuaded that the Plaintiffs had satisfied the element of proximate cause). *But see Laborers Local 17 Health & Benefit Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 3578*, No. 97-4550, 1998 WL 146217 at *4-5 (S.D.N.Y. Mar. 25, 1998) (Scheindlin, J.) (holding that the plaintiff funds had sufficiently alleged direct economic injury such that the requirements of proximate cause were satisfied).

[22]** Accordingly, the Court concludes that Plaintiffs' common law tort claims are too remote as a matter of law to satisfy the requirements of proximate causation. [18]

[23]** **[*631]** B. *RICO Claims*

The same principles of proximate causation which animated the Court's discussion of Plaintiffs' common law tort claims serve to bar Plaintiffs' RICO claims.

---

[16] In addition, the parties have cited to numerous decisions issued in cases brought by state attorneys general or other governmental entities making similar allegations against the tobacco industry. While these decisions certainly are relevant to the instant discussion, the Plaintiff Funds stand in a somewhat different position than the states, which are sovereign entities. By contrast, the three recent federal district court decisions addressing claims brought by ERISA funds are directly on point. The Court therefore considers them to be most persuasive.

[17] Certainly the wealthy benefactor in *Anthony v. Slaid* would have paid fewer medical expenses on behalf of the town's paupers had the defendant's wife not committed a battery against one of them. Still, his claim to recoup the additional medical expenses that he was forced to pay was barred as too remote.

[18] The Court rejects Plaintiffs' contention that unlike a typical insurer, they have a "special relationship" with their participants which gives them some direct injury. As stated by the Minnesota Supreme Court in rejecting a similar argument by Blue Cross and Blue Shield of Minnesota, "It is true that Blue Cross occupies a different niche in the complex web of health care institutions than that of indemnity or insurance companies; however, these differences in legal relationship to providers and patients do not, in our view, overcome the need for a closer connection between the injury and alleged tortfeasor." *State of Minnesota v. Philip Morris, Inc., 551 N.W.2d 490, 495 (Minn. 1996)*. As Judge Ryskamp held, "This 'special relationship' fails to show that the [Plaintiff Funds have] suffered direct harm." *Southeast Fla.,* 1998 WL 186878 at *4.

In Counts I and II, Plaintiffs allege a variety of practices which they contend constitute RICO violations. ***HN3***[] Under RICO, "any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor . . . ." *18 U.S.C. § 1964(c)*. In Counts I and II, Plaintiffs allege violations of *§§ 1962(a)*, *(c)*, and *(d)*. [19]

The Supreme Court has held that ***HN4***[] under *§ 1964(c)*, a plaintiff must prove that the defendant's acts were a proximate cause, in addition to being a "but for" cause, of the plaintiff's injury. [20] *Holmes v. Securities Investor Protection Corp., 503 U.S.* ***[**24]*** *258, 268, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. In order to satisfy RICO's proximate cause requirement, there must be "some direct relation between the injury asserted the injurious conduct alleged. Thus, a plaintiff who complained of harm flowing merely from the misfortunes visited upon a third person by the defendant's acts was generally said to stand at too remote a distance to recover." *Id. at 268-69*.

As discussed above with regard to Plaintiffs' common law tort claims, **[**25]** the Court finds that the Plaintiffs' claims are too remote to satisfy the requirements of proximate cause. This Court agrees with the views expressed by Judge Ryskamp in *Southeast Florida:*

> Inspection of the Fund[s'] claims reveal that the alleged harm does not affect the Fund[s] directly, but only affects the Fund[s'] participants. . . . The Fund[s are] not suing to recover damages which the defendants caused to [them] directly, but [are] attempting to recover economic damages which [they] incurred by virtue of [their] contractual relationship with third parties who were allegedly harmed by the defendants. The "direct relation" between the Fund[s'] alleged injury and the defendants' conduct is absent.

Southeast Fla. Laborers Dist. Health and Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440, No. 97-8715- CIV, 1998 WL 186878 at *5 (S.D. Fla. Apr. 13, 1998).

Similarly, in *City and County of San Francisco v. Philip Morris, Inc., 957 F. Supp. 1130 (N.D. Cal. 1997)*, the court was faced with a suit by several cities and counties against cigarette manufacturers and their trade associations to recover the smoking-related health costs that they were forced to pay **[**26]** out on behalf of their residents. As in the instant case, the plaintiffs alleged that the defendants engaged in a conspiracy to mislead the plaintiffs and their residents about the dangers of smoking and the addictiveness of nicotine. *Id. at 1134*.

The defendants in *San Francisco* argued, as they do in the instant case, that the plaintiffs' damages were too remote to satisfy RICO's proximate cause requirement. As in the instant case, the Plaintiffs contended that "their harm does not flow merely from the acts of defendants toward third parties, but from the alleged misrepresentations, concealment of information, and breach of affirmative duties directed toward the plaintiffs themselves." *Id. at 1137*. Notwithstanding the plaintiffs' attempt to recharacterize their theory of recovery, Judge Jensen of the Northern District of California held that any alleged RICO violations by the defendants **[*632]** were not directly linked to the plaintiffs' increased health care expenses. *Id.*

The Supreme Court in *Holmes* listed three policy reasons for limiting recovery under RICO to direct victims. First, the Court was concerned that "the less direct an injury is, the more difficult it becomes **[**27]** to ascertain the amount of a plaintiff's damages attributable to the violation, as distinct from other independent factors." *Holmes, 503 U.S. at 269*. Second, there is a need to avoid the risk of multiple recoveries. *Id.* Third, courts must take into account the fact that directly injured victims can generally be counted on to "vindicate the law as private attorneys general," thereby satisfying the deterrence purposes of RICO. *Id.*

---

[19] Count I alleges violation of *§§ 1962(c)* and *(d)* by all Defendants except the Council for Tobacco Research, the Tobacco Institute, and Hill & Knowlton, Inc. Count II alleges violation of *§§ 1962(a)* and *(d)* by all Defendants.

[20] As the Supreme Court noted, "In a philosophical sense, the consequences of an act go forward to eternity, and the causes of an event go back to the dawn of human events, and beyond. But any attempt to impose responsibility upon such a basis would result in infinite liability for all wrongful acts, and would 'set society on edge and fill the courts with endless litigation.'" *Holmes, 503 U.S. at 266 n.10* (quoting W. Keeton, D. Dobbs, R. Keeton, & D. Owen, *Prosser and Keeton on Law of Torts* § 41, p. 264 (5th ed. 1984)).

Analysis of the *Holmes* factors supports the Court's conclusion that Plaintiffs' claims are too remote. First, and perhaps most importantly, under Plaintiffs' theory, it would be extremely difficult, if not impossible, to determine the amount of damages attributable to the Defendants' conduct given the multitude of other factors that could affect Plaintiffs' smoking related damages. For instance, it would be extremely difficult, if not impossible, to determine whether, and the extent to which, any of the Funds' participants had other health problems which may have exacerbated the costs of health care for that smoker. *See San Francisco, 957 F. Supp. at 1138*. Furthermore, taking as a given Plaintiffs' theory that they would have taken steps **[**28]** to discourage their participants from smoking, thereby reducing the Funds' outlay of smoking related medical expenses, it would be necessary to determine what impact the Funds' hypothetical steps would have had on the smoking habits of their participants, had they been hypothetically implemented, in order to determine the extent of Plaintiffs' damages.

Second, there is a definite risk of multiple recoveries in this case if Plaintiffs are allowed to proceed. The Court has been informed that there is currently pending in the Circuit Court for Baltimore County a certified class action [21] **[**29]** of all allegedly injured Maryland smokers. This plaintiff class presumably includes most, if not all, of the Funds' participants and presumably seeks to recover the same medical expenses which the Funds' seek in the instant case. [22] *Cf. Southeast Florida,* 1998 WL at *5 Furthermore, if Plaintiffs' theory were accepted, the Court sees no logical reason which would prevent the employers from attempting to recover the same monies that they paid into the Funds.

Third, the pendency of the class action in the Circuit Court for Baltimore County shows that there are ample "private attorneys general" available to vindicate the Defendants' alleged wrongs. *See id*.

In sum, the Court concludes that Plaintiffs have failed to satisfy RICO's proximate cause requirements. Accordingly, Counts I and II must be dismissed. [23]

[30]** C. *Antitrust Claims*

In Counts III, V, VI, and VII, Plaintiffs assert claims under the federal and Maryland antitrust acts. They allege, *inter alia,* that the Defendants unlawfully restrained the dissemination of information regarding the safety and addictiveness of cigarettes, thereby eliminating alternative products from the market and causing smokers to suffer smoking-related illnesses. **[*633]** Furthermore, Defendants claim that the Defendants' conspiracy in restraint of trade

> has had the purpose and effect of restraining competition in the market for cigarettes and tobacco products . . ., of artificially inflating the price of and demand for Defendants' cigarettes and tobacco products, of erecting barriers to competition and entry into the market and protecting the structure of the market, of causing the suppression of information that would otherwise have affected consumer and regulatory behavior, and of causing millions of persons to purchase cigarettes and tobacco products when they otherwise would not have done so. The natural effect of the conspiracy has been to raise and stabilize prices, wrongfully increase

---

[21] *Richardson v. Philip Morris, Inc.,* No. 96145050/CE212596 (Cir. Ct. Balt. Cty.).

[22] In light of the general principles of the collateral source rule, the Court fails to see why the Plaintiffs' injured participants could not recover these same medical expenses. This is particularly so given Plaintiffs' insistence that the employer contributions to the Funds are in fact substitute wages for the employees, i.e., that it is truly the employees' own funds being contributed.

[23] Plaintiffs' reliance on *State of Florida v. American Tobacco Co.,* No. CL 95-1466 AH, 1996 WL 788371 (Fla. Cir. Ct. Dec. 13, 1996) is misplaced. *State of Florida* was based upon Florida's RICO act, not the federal statute, and on the court's conclusion that the State, as opposed to a private litigant, did not have to meet the requirements of proximate cause. *See Southeast Florida,* 1998 WL at *5 n.5 (discussing *State of Florida)*. Furthermore, to the extent that other courts have allowed federal RICO claims to go forward in cigarette cost recovery cases, this Court notes a respectful disagreement with those decisions for the reasons stated above.

> Defendants' profits, restrain and suppress competition **[**31]** in the research, development, production, and sale of alternative products, and standardize the tobacco products manufactured and sold in the United States. The contract, combination, or conspiracy also increased smoking-related illnesses and associated health care costs and artificially suppressed research and treatment of smoking-related illnesses.

Complaint P 267-68. These practices have allegedly injured the Plaintiffs' business and property by causing "a substantial increase in the cost of medical care for their participants and beneficiaries." [24] *Id. P 270*.

[32]** The same "remoteness" principle which animated the Court's discussion of Plaintiffs' common law and RICO claims is dispositive of their antitrust claims. Absent some direct relation between the injury asserted and the allegedly unlawful conduct, the requirements of proximate cause are not satisfied. [25] *See* *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 540-41, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. Indeed, the *Holmes* court, in articulating the proximate cause requirements under RICO adopted and applied the reasoning of *Associated General Contractors* from the antitrust context. [26] **[**34]** *Holmes, 503 U.S. at 268*. As described by the *Holmes* court, *Associated General Contractors* stands for the proposition that directness of relationship between the defendant's conduct and the plaintiff's injury is a "central element" of causation under the Clayton Act. *Id. at 269*; *cf.* *Pocahontas Supreme Coal Co., Inc. v. Bethlehem Steel Corp., 828 F.2d 211, 219-20 (4th Cir. 1987)* (holding that plaintiff could not state an antitrust claim under the Clayton Act for either damages or injunctive relief because the causal **[**33]** relation between the alleged illegal conduct and the harm suffered was remote rather than direct). Accordingly, for the reasons stated above, Plaintiffs' antitrust claims must be dismissed. [27]

[*634] Furthermore, this Court agrees with the conclusions of Judges Scheindlin, Ryskamp, and Fullam [28] that the Plaintiff Funds lack "antitrust standing." *Laborers Local* *17 Health & Benefit Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 3578*, No. 97 Civ. 4550 (SAS), 1998 WL 146217 at *10 (S.D.N.Y. Mar. 25, 1998); *Southeast Fla. Laborers Dist. Health* **[**35]** *and* *Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440*, No. 97-8715-

---

[24] The claims brought under the Maryland Antitrust Act assert essentially the same antitrust violations. The Maryland General Assembly has declared that courts construing that Act should be guided by the interpretations given to the federal antitrust acts. *Md. Code Ann. Com. Law II § 11-202*; *Cities Serv. Oil Co. v. Burch,29 Md. App. 430, 349 A.2d 279, 283 (Md. Ct. Spec. App. 1975)*. Thus, the parties agree that the Court's inquiry is the same under both the federal and Maryland statutes. *See* Plaintiffs' Opposition at 32.

[25] Although § 4 of the Clayton Act states that "any person who shall be injured . . . by reason of anything forbidden in the antitrust laws may sue," federal courts have not interpreted this section as broadly as its literal language could suggest. As stated by the Supreme Court, "It is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535, 74 L. Ed. 2d 723, 103 S. Ct. 897* (quoting *Blue Shield of Virginia v. McCready, 457 U.S. 465, 477, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*.

[26] The *Associated General Contractors* court stated that Congress intended that antitrust litigation "would be subject to constraints comparable to well-accepted common-law rules applied in comparable litigation", including the requirements of proximate cause. *Associated General Contractors, 459 U.S. at 533*.

[27] The fact that the Circuit Court for Baltimore City allowed the State of Maryland to pursue its claim under the Maryland Antitrust Act does not help the Plaintiff Funds. The circuit court based its decision on a provision of the Maryland statute which it felt made "it absolutely clear that the Maryland legislature intended for the State to pursue causes of action against potential antitrust violators regardless of whether injuries sustained by the state were remote and regardless of whether or not the State dealt directly with the alleged violator." *State of Maryland v. Philip Morris, Inc.,* No. 96122017, CL211487, 1997 WL 540913 at *20 (Md. Cir. Ct. for Balt. City May 21, 1997). There is no such statutory provision for private plaintiffs like the Plaintiff Funds.

[28] The three judges who, to date, have issued decisions in cigarette cost recovery suits brought by ERISA funds against the tobacco industry.

CIV, 1998 WL 186878 at *6 (S.D. Fla. Apr. 13, 1998); *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 5951*, No. 97-5344, 1998 WL 212846 at *3 (E.D. Pa. Apr. 22, 1998).

HN5[] Antitrust injury has been defined as "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. As stated by the United States Court of Appeals for the Fourth Circuit, "the damages sought must flow from that conduct which is proscribed by the antitrust laws. Because the antitrust laws are intended to protect competition . **[**36]** . . only injury caused by damage to the competitive process may form the basis of an antitrust claim." *Thompson Everett, Inc. v. National Cable Advertising, L.P., 57 F.3d 1317, 1324 (4th Cir. 1995)* (citations omitted).

In the context of this case, as aptly stated by Judge Ryskamp,

> The gravamen of the Fund[s'] complaint is that health care prices soared as a result of the defendants' concealment of information. Because many of the Fund[s'] participants were addicted to cigarettes, the Fund[s'] health care costs increased. This injury is simply not the type of injury that the antitrust laws were intended to prevent. *See Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (antitrust injury consists of injury caused by higher prices, reduced output, or damage to a competitor's business). Furthermore, the claim is wholly derivative and thus not cognizable as an antitrust injury.

Southeast Florida, 1998 WL 186878 at *6 (final citation omitted).

Accordingly, the Court concludes that Plaintiffs' antitrust claims must be dismissed. [29]

[37]** D. *Consumer Protection Act Claim*

In Count IV, Plaintiffs assert a claim under the Maryland Consumer Protection Act. ***HN6***[] Under the statute, "any person may bring an action to recover for injury or loss sustained by him *as the result* of a practice prohibited by" the Act. *Md. Code Ann. Com. Law II § 13-408* (emphasis added). Plaintiffs' theory appears to be that (1) the Defendants engaged in an unfair or deceptive trade practice by misrepresenting the harmful effects of smoking and the addictive properties of nicotine, (2) individual smokers were misled, **[*635]** (3) smokers continued to smoke cigarettes, (4) smokers contracted smoking-related illnesses and incurred medical costs, and (5) the Plaintiffs therefore paid more for tobacco-related medical expenses of their participants and beneficiaries than they otherwise would have.

For the reasons stated above with regard to Plaintiffs' other claims, the Court concludes that the causal connection between the Defendants' alleged unlawful trade practices and the Plaintiffs' alleged injury is too tenuous to fall within the Consumer Protection Act. Any injuries sustained by the Plaintiff Funds were not "as the result of a

---

[29] Plaintiffs' reliance on *Blue Shield of Va. v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* is misplaced. In *McCready,* the plaintiff was a subscriber in Blue Shield. She alleged an antitrust conspiracy between Blue Shield and an organization of psychiatrists to exclude psychologists from receiving compensation from Blue Shield. Thus, the plaintiff could not receive reimbursement for the mental health treatment she received from a psychologist, although she could have been reimbursed if she had visited a psychiatrist instead. The Supreme Court held that she had standing because she was a consumer of psychotherapy services who was injured by the alleged conspiracy to prevent psychologists from serving Blue Shield subscribers. Thus, "*Blue Shield* did not involve a derivative claim. On the contrary, it involved a purchaser's claim against an antitrust offender. In this case, the Fund[s have] not purchased any products from the defendants. Thus, [their] claim is wholly derivative." *Southeast Florida,* 1998 WL 186878 at *6 n.7. The Plaintiff Funds are not in an analogous position to the plaintiff in *McCready.* On the allegations of the instant case, if anyone other than a competitor had standing to assert an antitrust injury stemming from the Defendants' alleged conspiracy to stifle information about safer cigarettes and the health consequences of tobacco, by the reasoning of *McCready,* it would be individual smokers, as they were the consumers of tobacco products.

practice prohibited **[**38]** by" the Act. *Cf.* Sacks v. Philip Morris, Inc., 1996 U.S. Dist. LEXIS 15184, No. Civ. A. WMN-95-1840, 1996 WL 780311 at *2 (D. Md. Sept. 19, 1996) (holding that the causal connection between defendant's misrepresentations about the technical feasibility of making a "fire-safe" cigarette and a fire, which was begun when a burning cigarette ignited a sofa, was too tenuous to fall within the Act). [30] **[**39]** Accordingly, Plaintiffs' Consumer Protection Act claim must be dismissed. [31]

E. *Unjust Enrichment*

In Count VIII, Plaintiffs assert a claim for unjust enrichment. ***HN7***[] The elements of a claim for unjust enrichment are

> 1. A benefit conferred on the defendant by the plaintiff; 2. An appreciation or knowledge by the defendant of the benefit; and 3. The acceptance or retention by the defendant of the benefit under such circumstances as to make it inequitable for the defendant to retain the benefit without payment of its value.

Richard F. Kline, Inc. v. Signet Bank/Maryland, 102 Md. App. 727, 651 A.2d 442, 444 (Md. Ct. Spec. App. 1995) (quoting Yost v. Early, 87 Md. App. 364, 589 A.2d 1291 (Md. Ct. Spec. App. 1991)).

In essence, Plaintiffs **[**40]** allege that they have unjustly enriched the Defendants by paying the medical expenses of tobacco users who were injured by the Defendants' allegedly unlawful conduct. Plaintiffs contend that by paying medical expenses arising out of tobacco-related illnesses, they relieved the Defendants of their obligation to pay such medical costs, thereby unjustly enriching the Defendants. The Court concludes that Plaintiffs have failed to state a claim.

A necessary element of a claim of unjust enrichment is that the plaintiff conferred a benefit on the defendant. The Plaintiffs paid the smoking-related medical costs of their participants because they were legally obligated by contract to do so. Thus, the expenses that they incurred were at the behest of their participants. The Plaintiff Funds did not confer a benefit on the Defendants. [32] *Laborers Local* 17 Health & Benefit Fund v. Philip Morris, Inc., 1998 U.S. Dist. LEXIS 3578, No. 97 Civ. 4550(SAS), 1998 WL 146217 at *14 (S.D.N.Y. Mar. 26, 1998); *see also* Southeast Florida Laborers Dist. Health and Welfare Trust Fund v. Philip Morris, 1998 U.S. Dist. LEXIS 5440, No. 97-8715- CIV, 1998 WL 186878 at *4 (S.D. Fla. Apr. 13, 1998) **[*636]** ("The Fund has not cited, nor has the Court located, any Florida **[**41]** case employing an unjust enrichment theory to obligate a defendant to provide medical care to smokers where the plaintiff is legally obligated to do so."). [33] Accordingly, Plaintiffs' unjust enrichment claim must be dismissed. [34]

---

[30] The parties dispute whether, under the CPA, the Plaintiffs must be "consumers" of cigarettes in order to state a claim. In *State of Maryland,* relying on the statutory language that "any person" may bring a CPA claim, the Circuit Court for Baltimore City allowed the State's Consumer Protection Act claim to go forward, finding that "neither the State nor any other plaintiff is required to be a consumer in order to assert a cause of action for damages under the CPA." *State of Maryland v. Philip Morris, Inc.,* No. 96122017, CL211487, 1997 WL 540913 at *18 (Md. Cir. Ct. for Balt. City May 21, 1997). Other courts have stated, in a variety of contexts, that the CPA only provides a cause of action for consumers. *See, e.g.,* Scotch Whisky Ass'n v. Majestic Distilling Co., Inc., 958 F.2d 594, 597 n.9 (4th Cir. 1992) (citing Layton v. AAMCO Transmissions, Inc., 717 F. Supp. 368, 371 (D. Md. 1989)). In light of the Court's conclusion that the causal connection between the alleged CPA violation and Plaintiffs' injuries is too tenuous, it is unnecessary to decide this issue.

[31] Although the *State of Maryland* court allowed the State's CPA claim to go forward, it did not separately address the causation issue discussed above. It is not clear whether such a challenge was made by the defendants in that case. In any event, irrespective of what the *State of Maryland* court may or may not have been presented with, this Court concludes that Plaintiffs have failed to state a claim.

[32] Indeed, the Court fails to see how the Plaintiffs "discharged" or "satisfied" any obligation which the Defendants had to pay the medical expenses of individual smokers. Given the collateral source rule, the Court assumes that the Defendants are still potentially liable to individual smokers for such damages.

[33] The Court does not reach the Defendants' contention that this claim must be dismissed because the Plaintiffs have an adequate remedy at law.

[42]** IV. *CONCLUSION*

For the foregoing reasons,

1. Certain Defendants' Motion to Dismiss the First Amended Complaint is GRANTED.

2. Certain Defendants' Alternative Motion to Dismiss for Failure to Join Necessary parties is DENIED AS MOOT.

3. Judgment shall be entered by separate Order.

SO ORDERED this *13th* day of July, 1998.

Marvin J. Garbis

United States District Judge

JUDGMENT ORDER

By separate Order issued this date, the Court has granted the motion entitled "Certain Defendants' Motion to Dismiss the First Amended Complaint" which was adopted by all Defendants.

Accordingly, Judgment is hereby entered in favor of Defendants Philip Morris, Inc., R.J. Reynolds Tobacco Company, Brown & Williamson Tobacco Corporation, B.A.T. Industries P.L.C., Lorillard Tobacco Company, Liggett Group, Inc., The American Tobacco Company, The Council for Tobacco Research -- U.S.A., Inc., The Tobacco Institute, Inc., Smokeless Tobacco Council, Inc., Hill & Knowlton, Inc., and United States Tobacco Company and against Plaintiffs Seafarers Welfare Plan, United Industrial Workers Welfare Plan, Construction Workers' Trust Fund, and Cabinetmakers' Local No. 974 and Carpenters' Local No. **[**43]** 1110 Health and Welfare Fund:

1. Dismissing Plaintiffs' claims with prejudice and

2. Awarding the Defendants their assessable costs.

3. This Order shall be deemed to be a final judgment within the meaning of *Rule 58 of the Federal Rules of Civil Procedure*.

SO ORDERED this *13th* day of July, 1998.

Marvin J. Garbis

United States District Judge

End of Document

---

[34] As noted in a recent decision in *Rossello v. Brown & Williamson Tobacco Corp.,* No. CIV. 97-1910(JAF), 1998 WL 313365 (D.P.R. June 2, 1998), if anyone, "it is not Defendants who have received a benefit from [Puerto Rico's] medical care expenditures, but rather the individual smokers. Plaintiffs' claim that they have spared Defendants the liability and litigation expenses is too speculative and remote to constitute a benefit." *Id.* at *16.

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN1[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, broadly prohibits every contract, combination or conspiracy, in restraint of trade or commerce among the several states.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

The true test of legality is whether the restraint imposed is such as merely regulates and thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

Isolated statements from customers of preference for the product and service of the excluded competitor are not a sufficient empirical demonstration concerning the adverse effect of the defendants' arrangement on price or quality.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

Only if a plaintiff succeeds in establishing the actual adverse effects of an alleged restraint does the burden shift to the defendant to establish its procompetitive virtues.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

Intent is relevant to the reasonableness inquiry, but only to help courts interpret the effects of defendants' actions. Anticompetitive intent is not by itself sufficient to meet the adverse-effect requirement.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

Antitrust liability cannot be established on a mere showing that an organization has applied its rule-making and enforcing authority in an arbitrary or unreasonable manner.

Opinion

Memorandum Opinion and Order on Motions for Summary Judgment

Introduction

Gail Brookins is the sole proprietor of "Ernie Glide Transmissions," a business that produces "Ernie Glide" and "Ernie Slide" transmissions. Both the Glide and the Slide transmissions were developed and patented by Ernie Brookins, who is Gail's husband and an employee of Ernie Glide Transmissions.

The Glide and Slide were designed to be used in races sponsored by the International Motor Contest Association ("IMCA"), a for-profit Iowa corporation that serves as a sanctioning and rule-making authority for stock and modified stock car racing. The Glide transmission has been used in IMCA races since early in this decade. In 1993, however, more racers began to use the Glide transmission, and in 1994 the Glide transmission carried Mark Noble to the championship of the modified nationals in Boone, Iowa.

The Brookinses claim that, after 1994, the IMCA and Kathy Root, its president, conspired with Bushore Racing Enterprises ("Bushore") and **[*3]** other manufacturers of transmissions to prevent the use of the Glide or Slide in IMCA-approved events. IMCA prevented the use of the Glide or Slide by continually amending its rules so as to outlaw transmission features or configurations that only the Glide or Slide possessed. For example, a draft of the IMCA's 1997 rules allowed the use of a "working disc type or approved coupler type clutch." The Slide may have been legal for use in IMCA races under the "approved coupler type clutch" language, and so the IMCA quickly revised its rules to require the use of a "working disc type or approved *cone* type clutch." Since the Slide, alone among transmissions, used neither a disc type nor a cone type clutch, the revision rendered the Slide illegal.

The Brookinses claim that this conspiracy to keep the Glide and Slide out of IMCA-sponsored races violated section one of the Sherman Act, *15 U.S.C. § 1 et seq.*, and also constituted intentional interference with existing and prospective business advantage. Accordingly, they filed this suit under this Court's federal question jurisdiction, *28 U.S.C. § 1331*, and supplemental jurisdiction, *28 U.S.C. § 1367*, seeking damages and an injunction. **[*4]** The IMCA filed state-law counterclaims, alleging that the Brookinses interfered with IMCA's existing and prospective business advantage.

IMCA has moved for summary judgment, arguing that the Brookinses cannot show the existence of an agreement or that the agreement was an unreasonable restraint of trade. In particular, IMCA argues that the Brookinses have failed to show that it or its alleged conspirators possess market power in the "oval track racing transmission market," the product market alleged in the Brookinses second amended complaint. *See Doc. # 50,* P 64. IMCA also argues that the Brookinses' state law claims fail for various reasons. The Brookinses have resisted that motion.

II. Discussion

A. The Antitrust Claim

HN1[] Section One of the Sherman Act, *15 U.S.C. § 1 et seq.*, broadly prohibits "every contract, combination … or conspiracy, in restraint of trade or commerce among the several States[.]" The Supreme Court held early on that *§ 1* does not prohibit "every" agreement in restraint of trade - an interpretation that would have "made eternal the bellum omnium contra omnes and disintegrated society so far as it could into individual atoms," *Northern Securities* **[*5]** *Co. v. U.S., 193 U.S. 197, 411, 48 L. Ed. 679, 24 S. Ct. 436 (1904)* (Holmes, J, dissenting) - holding instead that *§ 1* prohibits only agreements that unreasonably restrain trade. *See, e.g., U.S. v. Joint-Traffic Ass'n, 171 U.S. 505, 19 S. Ct. 25, 43 L. Ed. 259 (1898)*; *Board of Trade of City of Chicago v. U.S., 246 U.S. 231, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*. In *Board of Trade,* Justice Brandeis offered what the Supreme Court in *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 343 n. 13, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)* called the "classic statement" of this reasonableness approach to *§ 1*:

> **HN2**[] The true test of legality is whether the restraint imposed is such as merely regulates and thereby promotes competition or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the facts peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is **[*6]** not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of intent may help the court to interpret facts and to predict consequences.

246 U.S. at 238; *see also* *State Oil Co. v. Khan, 522 U.S. 3, 139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)* ("The finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.").

There are some restraints that "are so inherently anticompetitive that they are illegal *per se,* without inquiry into the reasonableness of the restraint or the harm caused." *Double D Spotting Service, Inc. v. Supervalu, Inc., 136 F.3d 554, 558 (8th Cir. 1998)*. As the Supreme Court has explained, restraints are condemned *per se* when "experience with a particular kind of restraint enables the Court to predict with confidence that the rule of reason will condemn it." *State Oil, 118 S. Ct. at 279* (quotation and citation omitted). The category of restraints **[*7]** condemned *per se* is narrow, *see All* *Care Nursing Service, Inc. v. High Tech Staffing Services, Inc., 135 F.3d 740, 746 (11th Cir. 1998)*, and the Brookinses do not contend that the alleged restraint in this case should be condemned *per se.* Accordingly, in order to show a violation of *§ 1*, the Brookinses must show that the restraint at issue here "imposes an unreasonable restraint on competition." *Double D, 136 F.3d at 558*.

The Eighth Circuit has held that whether a restraint is unreasonable generally depends upon the outcome of "an inquiry into the market structure and the defendant's market power[.]" *Double D, 136 F.3d at 558*. Such an inquiry is necessary only if the plaintiff cannot show actual detrimental effects on competition. As the Supreme Court has explained, "Since the purpose of the inquiries into market definition and market power is to determine whether an arrangement has the potential for genuine adverse effects on competition, proof of actual detrimental effects … can obviate the need for an inquiry into market power, which is but a surrogate for detrimental effects." *FTC v. Indiana Federation of Dentists, 476 U.S. 447, 460-61, 90 L. Ed.* ***[*8]*** *2d 445, 106 S. Ct. 2009 (1986)* (quotations and citation omitted). Accordingly, a plaintiff can show a violation of *§ 1* by showing "actual detrimental effects" on competition attributable to the challenged restraint, or by showing that the "market structure and the defendant's market power" are such that the challenged restraint is likely to injure competition. (Whether the plaintiff may recover for the *§ 1* violation depends in part on a further showing that the challenged restraint has caused the plaintiff antitrust injury.) In this case, the Brookinses rely on both purported "actual detrimental effects" and on market analysis to show that competition may be harmed by the challenged restraint. The Court will consider first the adequacy of the Brookinses' market analysis.

The Brookinses have not provided the Court with any means to conduct "the inquiry into the market structure and the defendant's market power" required by the Eighth Circuit. *Double D, 136 F.3d at 558*. The Brookinses have not identified how much of the market for oval track racing transmissions is accessible only with the IMCA's approval, aside from assertions that "over 45% of all sanctioned tracks in **[*9]** the country are run under an IMCA banner" and that IMCA "has more members than other sanctioning body [sic] such as CART, USAC, and NASCAR and has the largest fan base." *See Doc. # 82, PP 3 - 4.* These assertions are not helpful to the task at hand; the relevant question is how many racers (the customers for the Brookinses' transmissions) compete under the IMCA banner and will only buy transmissions that are approved by IMCA. That number cannot be drawn from the information provided by the Brookinses. Forty-five percent of the country's "sanctioned tracks" might host only ten or twenty percent of the country's racers. IMCA might have more members than CART alone, or USAC alone, or NASCAR alone; but it seems doubtful that IMCA has more members than all of those organizations combined. *See* *Koszela v. NASCAR, 646 F.2d 749, 750 (2nd Cir. 1981)*. In any event, the fact that IMCA has more members than some other sanctioning body reveals nothing at all about what part of the market for oval track racing transmissions is accessible only with the IMCA's approval. Even assuming that market share alone can serve as a proxy for anticompetitive effects, *see* K.M.B., 61 F.3d 123, 129, IMCA's **[*10]** market share is neither revealed by direct evidence nor reasonably inferred from the evidence offered by the Brookinses.

The Brookinses seem to rely solely on IMCA's unspecified market share to demonstrate the anticompetitive effects of the challenged restraint. The Brookinses offer no evidence that the market structure of the oval track racing transmission market gives IMCA any power to raise prices, reduce output, or exclude competition in the oval track racing transmission market. The Brookinses do not explain how the IMCA could force IMCA racers to use transmissions that are more dangerous, *see Doc. # 82, P 73,* heavier, *id., P 72,* less reliable, *id., PP 73, 74,* and no cheaper, *id., P 71,* than the Ernie Slide without causing racers to switch to races sanctioned by CART or NASCAR or USCA. *See also id., PP 13, 15* (noting alleged cost, efficiency, and safety advantages of Ernie Glide); *Affidavit of Lonnie Hoover, P 11* (asserting that Slide transmission poses less risk of "catastrophic fragmentation or explosion" than other transmissions). Without such an explanation any agreement between the IMCA and certain oval track racing transmission manufacturers is not **[*11]** of concern to the antitrust laws. *See, e.g.,* *SCFC ILC, Inc. v. Visa USA, Inc., 36 F.3d 958, 965 (10th Cir. 1994)* ("If the structure of the market is such that there is little potential for consumers to be harmed, we need not be especially concerned with how firms behave because the presence of effective competition will provide a powerful antidote to any effort to exploit consumers."), *quoting* Hay, *Market Power in Antitrust,* 60 Antitrust L.J. 807, 808 (1992). If IMCA truly is forcing its racers to use more expensive, less reliable, and more dangerous transmissions, it can expect to lose racers to sanctioning bodies that do not impose such burdens. In short, the Brookinses have failed to meet their burden of showing that a reasonable jury could conclude, after "an inquiry into the market structure and the defendant's market power," *136 F.3d at 558*, that the challenged restraint is likely to have anticompetitive effects.

The Brookinses also rely, however, on a showing of actual injury to competition in the oval track racing transmission market. The injuries identified by the Brookinses are that the reasonably priced Glide and Slide are not available for purchase and that **[*12]** technological development in the oval track racing transmission market is stifled by IMCA's rule-making. *See Doc. # 81, at 15 - 16.* However, neither of these alleged injuries reveals an actual adverse effect on competition.

As far as the exclusion of the competitively priced Glide and Slide is concerned, nothing in the record indicates that exclusion has had an adverse effect on competition in the oval track racing transmission market. There has been no showing that the output of "oval track racing transmissions" has fallen below the level it would reach under competitive conditions. There has been no showing that the price of oval track racing transmissions has gone up because of the attempted exclusion of the Glide and Slide. All the Brookinses have shown is that their products may be unavailable to racers who compete in IMCA-sanctioned events, but the effects of that unavailability on the market as a whole are entirely unexplained. If a plaintiff could generate a jury question on injury to competition simply by asserting that his less expensive or superior product was excluded from the market, the distinction between injury to a competitor and injury to competition would be **[*13]** lost. For that reason, the courts have held that the mere fact that a certain supplier is prevented from participating in the market does not of itself show an actual adverse effect. *See, e.g.,* *K.M.B. Warehouse Distributors, Inc. v. Walker Manufacturing Co., 61 F.3d 123, 128 (2nd Cir. 1995)* ***HN3***[] ("Isolated statements [from customers] of preference [for the product and service of the excluded competitior] are not a sufficient empirical demonstration concerning the adverse effect of the defendants' arrangement on price or quality.") (citation and internal quotation omitted); *Capital Imaging Associates, P.C. v. Mohawk Valley Medical Associates, Inc., 996 F.2d 537, 546 (2nd Cir. 1993)*.

As far as technological development is concerned, there is nothing in the record to indicate that the exclusion of the Glide or Slide has hampered technological development of oval track racing transmissions. The record citation offered by the Brookinses to support the theory of injury to technological advancement is inapposite, since technological development is not mentioned there. *See Doc. # 82, P 124.* The cited portion of the record does express concern that "if the transmission manufacturers **[*14]** don't start designing something knew [sic], utilizing something that's available on the market today, it's going to be where we won't have transmissions for racing." *Doc. # 24, p. 162, lines 19 - 23.* Nothing indicates that the presence of the Glide or Slide on the market would prompt the development of "something [new]." Indeed, one would think that the prospect of "[getting] to [] where we won't have transmissions for racing" would be the most effective spur for racing transmission manufacturers to develop "something new" in order to avoid going out of business.

The lack of market analysis by the plaintiffs may arise from a belief that simply showing a lack of justification for the challenged restraint is enough to make out a *§ 1* case. *See Doc. # 81, at 12 - 14; id., at 14* ("The fact of the matter is that defendants were not acting against the Ernie Slide and Ernie Glide to promote any legitimate goal of rule making [sic].") This is a misconception. Section One does not require a defendant to justify a challenged restraint unless and until the plaintiff has shown that the restraint poses some real and substantial threat to competition. As the Second Circuit has **[*15]** explained, ***HN4***[] "Only if a plaintiff succeeds in establishing the actual adverse effects of an alleged restraint does the burden shift to the defendant to establish its procompetitive virtues." *Clorox Co. v. Sterling Winthrop, Inc. 117 F.3d 50, 59 (2nd Cir. 1997)*, *citing K.M.B. Warehouse, 61 F.3d at 127*; *see also* Areeda, ***Antitrust Law***, P 1503 p. 372 (1986 ed.) ("Every antitrust suit should begin by identifying the ways in which a challenged restraint might possibly impair competition.").

It may be that the Brookinses suppose that the lack of procompetitive justifications for IMCA's rule-making reveals an anticompetitive intent on the part of IMCA, and that anticompetitive intent alone suffices to make out a *§ 1* case. *See Doc. # 81, at 11.* This too is a misconception. As the Supreme Court noted in *Board of Trade,* an antitrust defendant's intent may help the court decide in doubtful cases whether a challenged restraint is likely to injure competition, but the Court was careful to note that "a good intention will [not] save an otherwise objectionable regulation or the reverse[.]" *246 U.S. at 238*. As the Second Circuit has held, ***HN5***[] "Intent is relevant to the **[*16]** reasonableness inquiry, but only to help courts interpret the effects of defendants' actions….Anticompetitive intent is not by itself sufficient to meet the adverse-effect requirement." *K.M.B. Warehouse, 61 F.3d at 130*; *see also SCFC ILC, 36 F.3d at 970* (holding that if conduct is "not objectively anticompetitive the fact that it was motivated by hostility to competitors … is irrelevant.") (citation and internal quotation omitted). The same might be said of the Brookinses' argument that IMCA applied its rule-making and enforcing authority arbitrarily against the Brookinses. At least since the Supreme Court's decision in *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)*, it has been clear that ***HN6***[] antitrust liability cannot be established on a mere showing that an organization has applied its rule-making and enforcing authority in an arbitrary or unreasonable manner. *See, e.g., Moore v. Boating Industry Ass'n, 819 F.2d 693 (7th Cir. 1987)*; *Carleton v. Vermont Dairy Herd Improvement Ass'n, Inc., 782 F. Supp. 926, 932 (D. Vt. 1991)*; *Consolidated Metal Products, Inc. v. American Petroleum* ***[*17]*** *Institute, 846 F.2d 284, 291 n. 20 (5th Cir. 1988)*.

In summary, the Brookinses have failed to adduce facts from which a reasonable jury could conclude that the challenged restraint in this case poses a threat to competition in the oval track racing transmission market. The Brookinses have offered no market analysis to support such a conclusion and have identified no actual adverse effects on competition. Accordingly, IMCA's motion for summary judgment on the *§ 1* claim must be granted.

B. State Law Claims

The Brookinses have also brought state-law claims against the defendants. Although the usual practice is to dismiss pendent state-law claims when the federal claims have been disposed of, *see Ivy v. Kimbrough, 115 F.3d 550, 552 (8th Cir. 1997)*, in this case the Court will continue to exercise jurisdiction over those claims in the interest of judicial economy.

The Brookinses have asserted the state-law claims of intentional interference with existing contracts and intentional interference with prospective business advantage. These claims are brought only against IMCA and Kathy Root. Although the elements of those claims differ slightly, both require the plaintiff to prove **[*18]** that the defendant acted with the predominant purpose of financially injuring or destroying the plaintiff. *See Rail Intermodal Specialists, Inc. v. General Electric Capital Corp., 103 F.3d 627, 631 (8th Cir. 1996)*; *see also Berger v. Cas' Feed Store, Inc., 543 N.W.2d 597, 599 (Iowa 1996)* (reversing jury award of damages for intentional interference with a contract when there was "no evidence of a predominant purpose of causing injury to the plaintiffs[.]"); *Wilkin Elevator v. Bennett State Bank, 522 N.W.2d 57, 62 (Iowa 1994)*. The prospect of financially injuring or destroying the plaintiff must be the animating principle of the defendant's conduct; financial injury or destruction caused by the defendant's pursuit of some other goal does not satisfy this requirement. *See Willey v. Riley, 541 N.W.2d 521, 526-27 (Iowa*

1995) ("Intentional interference with a prospective business contract is an intentional tort which requires a showing that the sole or predominant purpose of the actor's conduct was to financially injure or destroy the plaintiff."); Wilkin, 522 N.W.2d at 62 (no liability for interference when defendant acted to "protect its own financial interests"); **[*19]** Berger, 543 N.W.2d at 599 (same). If a defendant acted "for two or more purposes, his improper purpose must predominate in order to create liability." Wllley, 541 N.W.2d at 527.

The depositions, affidavits, and other evidence on file in this case shows that there is a genuine issue of material fact as to the defendant's motivation in connection with the rule making authority in this case. Taking the evidence in the light most favorable to the plaintiffs, there is considerable evidence to show that the predominant purpose of many of the rules enacted by the IMCA were done with the intent to prevent the plaintiffs from being able to sell their transmission to participants in races sponsored by the IMCA.

There is considerable evidence that rules were enacted in this case as the result of complaints by the plaintiffs' competitors. There is also evidence that those competitors were consulted about plaintiffs' transmissions. Kathy Root conceded as much in her deposition. See, Root deposition, p.87.

There are also a number of inconsistencies in the preliminary injunction hearing transcript, depositions, and other documents in this case about the purpose of the rules. There is considerable **[*20]** dispute about whether safety was a factor in the exercise of the rule making authority. There is also a dispute as to whether the safety concerns, if any, were directed exclusively at the plaintiffs. As an example, there is evidence that IMCA put into effect a rule that required that the bellhousing on IMCA approved transmissions have SFI approval. The plaintiffs promptly sought and obtained such approval at some expense to the plaintiffs. Whether it became clear, however, that a number of the other manufacturers would find it difficult, if not impossible, to also obtain SFI approval, the rule was quickly dropped.

Bill Zwanziger testified at p.195 of his deposition that the sole purpose of the "disk type or cone type" rule was to outlaw the Ernie Glide Transmission for 1997. There is significant evidence that every time the plaintiffs attempted to modify their transmissions to meet the most recent rule change by the IMCA, that the IMCA would then change the rule or create new rules that would impede the ability of the plaintiffs to market their transmissions.

In summary, there is a significant factual dispute as to the motivation of IMCA and Kathy Root in connection with the rule **[*21]** making process in this case. There are also factual disputes as to the defendants' knowledge as to the effects the rule changes would have on plaintiffs' business. There is ample evidence in the record to show that the defendants were well aware of the fact that the outlawing of the plaintiffs' transmissions for IMCA sanctioned races would have a devastating impact upon the plaintiffs' business.

Accordingly, summary judgment will be denied on plaintiffs' state law claims of intentional interference with the contractual relationship (second claim for relief) and intentional interference with the prospective business advantage (third claim for relief).

C. Summary

In summary, defendants' motion for summary judgment is granted as to plaintiffs' first cause of action, the antitrust claim in this case. This results in the dismissal of all claims as against Billy Joe Bushore, d/b/a Bushore Racing Enterprises.

Summary judgment is denied as to the second and third causes of action. These causes of action are asserted only against IMCA, an Iowa corporation, and Kathy Root.

The Court will retain its supplemental jurisdiction over the remaining state law claims pursuant to 28 U.S.C. § 1367(a). **[*22]** The reason the Court has elected to exercise its supplemental jurisdiction is the fact that this case has been on file in this Court for over two years, the undersigned issued the injunction which is at issue in this case, any damages which may arise out of the issuance of that injunction should be handled by the undersigned in the event it is determined that the plaintiffs ultimately prevail, and finally, this case is within four months of the trial date in this Court.

IT IS THEREFORE ORDERED that summary judgment is granted as to plaintiffs' first cause of action. That cause of action is dismissed. Defendant Billy Joe Bushore, d/b/a Bushore Racing Enterprises is dismissed as a defendant.

IT IS FURTHER ORDERED that summary judgment is denied as to plaintiffs' second and third causes of action. The Court will continue to exercise jurisdiction over plaintiffs' second and third causes of action.

Done and So Ordered this 15th day of July, 1998.

Michael J. Melloy, Chief Judge

LexisNexis® Headnotes

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Injunctions, Preliminary & Temporary Injunctions**

A preliminary injunction is a remedy that should not be granted unless the movant, by a clear showing, carries the burden of persuasion. In order to prevail on a motion for a preliminary injunction, the movant must demonstrate (1) some likelihood, a better than negligible chance, of success on the merits, and (2) an inadequate remedy at law and irreparable harm if preliminary relief is denied. If the court finds either of these facts absent, then the court's analysis ends and the preliminary injunction should not be issued. On the other hand, if the movant demonstrates these elements, then the court considers the irreparable harm to the non-movant if preliminary relief is granted as balanced against the irreparable harm to the movant if preliminary relief is denied, and the public interests involved. The court uses a sliding scale approach to this balancing test; that is, the more likely it is that the movant will succeed on the merits, the less the balance of the irreparable harms need weigh toward its side.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN2[] **Federal & State Interrelationships, Erie Doctrine**

Illinois law provides that its courts should use the construction of federal ***antitrust law*** by federal courts as a guide in the interpretation of statutes that are substantially similar to federal ***antitrust law***.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Per Se Rule & Rule of Reason, Per Se Violations

Under Section 1 of the Sherman Act, codified at 15 U.S.C.S. § 1, courts determine based on the nature of the restraint whether a per se violation exists or whether the "Rule of Reason" should apply. The per se rule applies when the practice facially appears to be one that will always or will almost always tend to restrict competition and decrease output. Restraints that are per se unreasonable include agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry or restraint is needed to establish their illegality, horizontal price fixing conspiracies, certain attempts at market allocation, and group boycotts if used to enforce a rule or policy or practice that is itself illegal per se.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] Antitrust & Trade Law, Sherman Act

Most antitrust claims under *Section 1* of the Sherman Act, codified at *15 U.S.C.S. § 1*, are subject to the Rule of Reason. The rule of reason category includes agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business involved, the particular restraints history, and the reasons it is imposed. The test of legality under the rule of reason is whether the challenged conduct promotes or suppresses competition.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

International Trade Law > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] Higher Education & Professional Associations, Professional Associations

A trade association's decision to expel one of its members is more properly described as a concerted refusal to deal or group boycott. Under the Illinois Antitrust Act, codified at Ill. Comp. Stat. 10/3, that conduct is subject to the Rule of Reason.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Colleges & Universities

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] Higher Education & Professional Associations, Colleges & Universities

The threshold issue in any rule of reason case is market power. Without proof of market power to restrain competition substantially, any case under the Rule of Reason collapses. Market power entails cutting back output in the market and thus driving up prices to consumers. Market power can be evident where the defendant has unique access to a business element necessary for effective competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A trade association is not by its nature a walking conspiracy, and the antitrust laws are not panaceas for all business affronts which seem to fit nowhere else. Animosity, even if rephrased as "anticompetitive effect," is not illegal without illegal anticompetitive effects. It is injury to the market, not injury to an individual competitor, that violates the antitrust laws.

Opinion

[*1035] ***OPINION AND ORDER***

CHARLES R. NORGLE, SR., District Judge:

Before the court is Plaintiff's Motion for a Preliminary Injunction (Doc. No. 5). For the following reasons, Plaintiff's Motion is denied.

I. BACKGROUND

On March 27, 1998, International Test and Balance, Inc. ("International"), an Illinois corporation, filed a three-count complaint against its former trade association, Associated Air Balance Council ("AABC"), and certain unknown members of AABC, in the Circuit Court of Cook County, Illinois. Counts I and II allege conspiracy in restraint of trade and an unlawful monopoly, respectively, in violation **[**2]** of *Section 10/3* of the Illinois Antitrust Act. *See 740 ILCS 10/3*. Count III alleges common law intentional interference with contract.

On April 27, 1998, AABC, a California corporation with its principal place of business in Washington, D.C., removed the case to federal court, claiming diversity of citizenship. [1] International has since amended **[*1036]** its complaint

[1] Because "federal courts are courts of limited jurisdiction," *Matter of County Collector, 96 F.3d 890, 895 (7th Cir. 1996)*, the court has a "nondelegable duty to police the limits of federal jurisdiction with meticulous care." *Market Street Assocs. Ltd v. Frey, 941 F.2d 588, 590 (7th Cir. 1991)*; *see also Krueger v. Cartwright, 996 F.2d 928, 930 (7th Cir. 1993)*; *Fed. R. Civ. P. 12(h)(3)*. It does not escape the court's attention that there are jurisdictional issues in this case. First, because International's complaint

to include a claim of "wrongful expulsion," and now moves for a preliminary injunction that would reinstate its membership in AABC pending a full-trial on the merits. At trial, International would seek a permanent injunction that would prevent AABC from unlawfully excluding International from membership in AABC. The relevant facts follow.

[3]** International provides testing and balancing services of heat, vent and air conditioning ("HVAC") equipment to mechanical contractors and others in the construction industry. Testing and balancing is the process of measuring, regulating and adjusting the HVAC system of a building to insure that it complies with performance specifications. In the course of balancing, International utilizes instruments to take readings of the air and water flow through the HVAC system. International also notes the settings of the mechanical devices, makes necessary adjustments and recommendations, and documents its findings in a balancing report to the client.

Up until its expulsion on May 1, 1998, International was a member of AABC. AABC is a non-profit trade association composed of 85 independent firms that provide testing and balancing services of HVAC systems throughout the United States. Membership in the AABC is allegedly desirable because firms must meet certain requirements evidencing competence, and because it enables firms to issue a "National Project Certification Performance Guaranty" ("Guaranty"). Issuance of the Guaranty indicates that the HVAC equipment installed during a project meets **[**4]** engineering expectations and is balanced in accordance with accepted trade practice and the AABC National Standards.

Additionally, the Guaranty enables a party who uses the services of a AABC member, *e.g.*, a contractor or engineer, to file a complaint with AABC if the services performed by the member fail to meet quality specifications, are inadequate, or otherwise insufficient. AABC then initiates an investigation into the allegations of the complaint and agrees to supervise any remaining work. That turn of events is what happened here, and is what led to the eventual expulsion of International from AABC.

In 1995, International entered into a contract with Western Sheet Metal, Inc. ("Western") to provide test and balancing services at the Copper Hills School Project ("Project") for the Jordan School District in Salt Lake City, Utah. In early 1997, Olsen & Peterson ("O&P"), a mechanical engineering consulting firm working on the Project, filed two successive complaints with AABC regarding International's performance. [2] In the first complaint, dated March 25, 1997, O&P wrote a letter to AABC's executive director, Kenneth Sufka ("Sufka"), alleging that International was failing **[**5]** to complete its work on the Project. (*See* Def.'s Mem. in Opp'n, Ex. 3.) The letter also strongly expressed O&P's dissatisfaction with International and questioned how International qualified for membership in the AABC. In accordance with AABC's policies and procedures, Sufka notified International of O&P's complaint and provided International 14 days to respond. (*See id.*, Ex. 4.) In a letter to Sufka dated April 14,

---

includes allegations against "unknown members" of AABC, the citizenship of those members is unknown. Nonetheless, "naming a John Doe defendant will not defeat the named defendants' right to remove a diversity case if their citizenship is diverse from that of the plaintiffs." *Howell v. Tribune Entertain. Co., 106 F.3d 215, 218 (7th Cir. 1997)*; *see also* *Salzstein v. Bekins Van Lines, Inc., 747 F. Supp. 1281, 1283 n.4 (N.D. Ill. 1990)*. The named party here, AABC, is, standing alone, of diverse citizenship. However, certain membership organizations "take the citizenship of each member." *Indiana Gas Co., Inc., v. Home Ins. Co., 141 F.3d 314, 316 (7th Cir. 1998)*; *Nat'l Assoc. of Realtors v. Nat'l Real Estate Assoc., 894 F.2d 937, 940 (7th Cir. 1990)* (citizenship of incorporated trade association was that of its members because the members were the real parties in interest); *Nat' Assoc. of Realtors, 699 F. Supp. 678, 679 n. 3 (N.D. Ill. 1988)*. On the other hand, "for purposes of diversity jurisdiction[,] a corporation is a corporation is a corporation." *Cote v. Wadel, 796 F.2d 981, 983 (7th Cir. 1986)*. If AABC assumes the citizenship of its members, then jurisdiction may be absent because AABC has admitted in its later pleadings that it has one member in Illinois (citizenship unknown) (*see* Def.'s Mem. in Opp'n at 7.), the state where International is a citizen. With an abundance of caution, the court proceeds under *Cote*, and concludes that diversity jurisdiction exists because the citizenship of International is diverse from the citizenship of AABC. *See* *Nat'l Assoc. of Realtors, 894 F.2d at 939-40* (concluding that for diversity purposes, the inquiry into the relevant citizenship of an incorporated trade association depends upon whether the members or the association are the real parties in interest).

[2] In at least one part of the record, there is a reference to an additional complaint filed against International prior to the complaints filed in early 1997. (See Def.'s Mem. in Opp'n at Ex. 4.). That complaint, lodged by Western in October 1996, accused International of failing to complete its work. Because neither party provides further elaboration on that complaint, the court will not deem it relevant for purposes of this discussion.

1997, International denied O&P's allegations and cited the inability **[*1037]** of the mechanical contractor on the project to complete its own work as the reason for the subsequent delay in performance by International. (*See id.*, Ex. 5.)

[6]** On April 22, 1997, O&P sent a second letter of complaint to AABC. (*See id.*, Ex. 6.) In that letter, O&P alleged that a report issued by International in April 1996 was "totally unacceptable" and "in substantial noncompliance with the contract documents." (*Id.*) Sufka in turn notified International of the second complaint and directed International to send AABC a copy of the final balancing report and a copy of the drawings for the Project. (*See id.*, Ex. 7.) On May 22, 1997, International sent the relevant documents to AABC. (*See id.*, Ex. 8.) AABC then initiated an investigation into the complaints against International.

On May 30, 1997, AABC held a meeting in Salt Lake City to address O&P's complaints against International. A vice-president of AABC, Robert Conboy ("Conboy"), along with representatives of International, O&P, and other contractors on the Project, attended. After reviewing the allegations against International, the attendees (except those from O&P) conducted a walk-through at the site of the Project. Upon completion of the walk-through, it was agreed that 18 of the 25 deficiencies that International had previously claimed as stumbling blocks were no longer **[**7]** at issue. For the remaining seven deficiencies, however, the parties agreed to coordinate their efforts to allow prompt completion. (*See id.*, E's. 9, 10.)

In early August 1997, Conboy and another AABC vice-president, Mike Young ("Young"), visited the site of the Project in connection with the ongoing investigation of International's performance. The purpose of the visit was to determine the accuracy of International's most-recent report on the Project. Upon completion of the visit, Conboy issued a report criticizing the accuracy of International's report and expressing doubt on the latest deficiencies that International claimed was preventing it from completing its work. (*See id.*, E's. 11, 12.)

Based on the findings and conclusions in Conboy's report, the AABC Board of Directors concluded that International had failed to comply with AABC policies and standards, a condition of membership. Accordingly, on November 5, 1997, the Board voted to place International on probation. (*See id.*, E's. 20, 27.) International then petitioned AABC to reconsider its decision. (*See id.*, Ex. 15.)

While International's appeal was pending, O&P and other contractors visited the site of **[**8]** the Project to verify the results of International's latest report. O&P determined that the air system on the Project was still not properly balanced. O&P advised International of its conclusion and stated that the Jordan School District did not want International to return to the site. O&P later persuaded the school district to allow International to return and complete its work. (*See id.*, E's. 16-18.)

On February 13, 1998, the Board issued a written opinion detailing the results of its investigation and rejecting International's appeal. (*See id.*, Ex. 20.) The Board also took issue with International's challenge of the investigation results. Most notably, the Board emphasized that it was International personnel, rather than AABC representatives, who performed the investigation's test readings that indicated prior inaccuracies. "AABC representatives merely observed the procedure and compared the information obtained with the information contained in [International's] report." (*Id.* at p. 5.) Finally, the Board outlined the conditions of International's probation:

> 1) That International be placed on probation for a period of two years, beginning on January 31, 1998;
>
> 2) **[**9]** That International comply with the terms and conditions of the probation as described in the AABC Policies and Procedures;
> 3) That International pay the costs ($ 4,728) for the AABC investigation of the Project as required by the AABC Policies and Procedures on or before March 1, 1998;
> 4) That International provide a written statement concerning its views on AABC independence, the National Performance Guaranty, and the AABC Policies and Procedures no later than March 1, 1998;
>
> **[*1038]** 5) That International return to the Project to complete the balancing in accordance with AABC standards.

(*Id.* at p. 6.)

The terms of the probation also meant that, pursuant to the Guaranty, International became subject to the supervision of AABC for its remaining work on the Project. (*See id.*, Ex. 21) The Board assigned AABC's Executive Vice-President, Rick Cox ("Cox"), and another AABC representative, Herb Crask ("Crask"), to supervise International's completion of the Project. (*See id.*, E's. 22, 23.) In addition to his position as Executive Vice-President of AABC, Cox was employed by one of AABC's members, Technical Air Balance, Inc. ("Technical").

At a March 2, 1998, meeting of all **[**10]** relevant contractors on the Project, Cox iterated AABC's supervisory role, and later performed an on-site inspection with the group. Once on-site, Cox and Crask determined that nothing was preventing International from completing its balancing of the system. Gary Tarazzi ("Tarazzi"), International's President, immediately disputed that conclusion, and claimed that International had already balanced the system. As such, Tarazzi hinted that International would not be willing to complete the job. Cox then ended the meeting and stated that he would send his findings to the Board. Before leaving, however, Cox provided representatives of two contractors on the Project with the business card of Technical. (*See id.*)

In a letter dated March 25, 1998, the Board informed International of its intent to expel the company from its membership. (*See id.*, Ex. 27.) The Board cited International's failure to complete its duties on the Project and its failure to comply with most, if not all, the conditions of probation. The Board invited International to present reasons against expulsion at its next meeting scheduled for April 17, 1998.

On April 17, 1998, Tarazzi appeared before the Board and **[**11]** asserted International's position. Finding those reasons unacceptable, the Board expelled International. As grounds for expulsion, the Board cited International's alleged inadequate performance on the Project and International's to comply with the terms of its probation. The Board also noted that the school district had ordered International off the site of the Project. Consequently, AABC assumed responsibility for the completion of the Project. (*See id.*)

According to International, its expulsion ran afoul of the Illinois Antitrust Act. *See* 740 ILCS 10/3. International alleges that "Unnamed Defendants and AABC, acting in concert, combined, contracted, and conspired horizontally to exclude [International] from the relevant service and geographic markets . . . ." (Compl. at P 26.) International seeks reinstatement in AABC, arguing that its expulsion constitutes an unlawful restraint of trade because "membership in the AABC is a highly advantageous, and in some instances, a necessary credential in the marketplace for test & balance services." (Pl.'s Mem. in Supp. at 1.) Furthermore, International avers, "removal of [International] from the AABC group will significantly reduce **[**12]** competition . . . ." (*Id.* at 2.)

II. DISCUSSION

At the outset, the court notes that neither party addresses whether AABC is exempt from liability under the Illinois Antitrust Act. The Illinois Antitrust Act "was intended to apply only to conduct relating to for-profit enterprises." O'Regan v. Arbitration Forums, Inc., 121 F.3d 1060, 1065 (7th Cir. 1997) (*citing* 740 ILCS 10/2). Although this appears to be a crucial, and perhaps dispositive issue, "'it is not the role of [the] court to research and construct the legal arguments open to parties, especially when they are represented by counsel.'" Doherty v. City of Chicago, 75 F.3d 318, 324 (7th Cir. 1996) (*quoting* Sanchez v. Miller, 792 F.2d 694, 703 (7th Cir. 1986)). Therefore, the court will leave that issue for another day and address the merits of International's motion for a preliminary injunction.

HN1[] "A preliminary injunction is an extraordinary and drastic remedy, one that should not be granted unless the movant, by a clear showing, carries the burden of persuasion." Boucher v. School Bd. of Greenfield, 134 F.3d 821, 823 (7th Cir. 1998) (citations and internal quotation marks omitted.). In order to prevail **[**13]** on a motion for a preliminary **[*1039]** injunction, the movant must demonstrate (1) some likelihood, *i.e.*, a better than negligible chance, of success on the merits, see Meridian Mut. Ins. Co. v. Meridian Ins. Group, Inc., 128 F.3d 1111, 1114-15 (7th Cir. 1997) and (2) "'an inadequate remedy at law and irreparable harm if preliminary relief is denied.'" *Brownsburg Area Patrons Affecting Change v. Baldwin*, 137 F.3d 503, 507 (7th Cir. 1998) (*quoting* TMT North America, Inc. v. Magic Touch GmbH, 124 F.3d 876, 881 (7th Cir. 1997)); *see also* Wisc. Music Network, Inc. v. Muzak Limited P'Ship, 5 F.3d 218, 221 (7th Cir. 1993). If the court finds either of these facts absent, then the court's analysis "ends and the preliminary injunction should not be issued." Adams v. City of Chicago, 135 F.3d 1150, 1154 (7th Cir. 1998); *see also* Abbott Lab. v. Mead Johnson & Co., 971 F.2d 6, 11-12 (7th Cir. 1992); Illinois Council on

Long Term Care v. Bradley, 957 F.2d 305, 307 (7th Cir. 1992). On the other hand, if the movant demonstrates these elements, "then the court considers the irreparable harm to the [non-movant] if preliminary relief is granted as balanced against the irreparable **[**14]** harm to [the movant] if preliminary relief is denied, and the public interests involved." *Baldwin*, 137 F.3d at 507 (citations omitted.); *see also* Boucher, 134 F.3d at 824. The court uses a sliding "scale approach" to this balancing test; that is, "the more likely it is that [the movant] will succeed on the merits, the less the balance of the irreparable harms need weigh toward its side . . . ." Abbott Lab., 971 F.2d at 12; *cf.* General Leaseways, Inc. v. Nat'l. Truck Leasing Assoc., 744 F.2d 588, 590-91 (7th Cir. 1984).

Before addressing the necessary elements for a preliminary injunction to issue, the court notes that International's memorandum of law is inadequate. Rather than focus on those elements, International engages in a discussion of three leading antitrust cases that it argues control here: (1) Radiant Burners, Inc. v. Peoples Gas Light and Coke Co., 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. 365 (1961); (2) Indian Head, Inc. v. Allied Tube & Conduit Corp., 817 F.2d 938 (2d Cir. 1988) [3]; (3) American Society of Mech. Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982). While those cases may be relevant, **[**15]** International only belatedly addresses the prerequisites for a preliminary injunction. Even then, however, International's discussion is sparse, consisting of about one page. This lack of analysis certainly detracts from International's attempt to meet its burden and obtain this extraordinary remedy.

In its opening memorandum, International argues that it is likely to succeed on the merits because:

> Ejection of this company flies in the face of thousands of successful jobs, all tested & balanced to the complete satisfaction of owners, engineers and building contractors across America. The test & balance personnel employed by [International] were and are among the finest in the land. [International] was and **[**16]** is in full compliance with the AABC rules and regulations. Expulsion of this proud and hard working company was merely part of a plan fomented by certain directors of AABC, to manipulate the marketplace and reduce competition among the remaining AABC companies. . . . [International] will plead and prove that Messrs. Cox, Sufka and other unknown confederates conspired to reduce competition within AABC and the test and balance industry.

(Pl.'s Mem. in Supp. at 10-11.) Accordingly, International rests on its alleged ability to prevail on Count I of its complaint, *i.e.*, to show that its expulsion was an unlawful restraint of trade in violation of the Illinois Antitrust Act, 720 ILCS 10/3. International does not submit any arguments with respect to Counts II through IV. *Cf.* Doe, By and Through G.S. v. Johnson, 52 F.3d 1448, 1457 (7th Cir. 1995) (stating that "a litigant who fails to press a point by supporting it with pertinent authority, or by showing why it is sound despite a lack of supporting authority, forfeits the point.").

Before delving into the merits of International's antitrust claim, a point of clarification is necessary. International chose to **[*1040]** bring its suit **[**17]** under the antitrust laws of the state of Illinois, rather than under federal law. Nonetheless, ***HN2***[] "Illinois law provides that its courts should use the construction of federal ***antitrust law*** by federal courts as a guide in the interpretation of statutes that are substantially similar to federal ***antitrust law***." Sportmart, Inc., v. No Fear, Inc., 1996 U.S. Dist. LEXIS 7606, 94 C 4890, 1996 WL 296643, at *17 (N.D. Ill. June 3, 1996) (*citing* State of Illinois ex rel. Burris v. Panhandle Eastern Pipeline Co., 935 F.2d 1469, 1479-80 (7th Cir. 1991)); *see also* 740 ILCS 10/11 (1997) ("When the wording of [the Illinois Antitrust Act] is identical or similar to that of federal ***antitrust law***, the courts of this State shall use the construction of the federal law by the federal courts as a guide . . . ."); Gilbert's Ethan Allen Gallery v. Ethan Allen, Inc., 162 Ill. 2d 99, 642 N.E.2d 470, 472, 204 Ill. Dec. 769 (Ill. 1994) (noting this principle, but also emphasizing that "the Federal decisions are not binding on [Illinois courts]."); Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F.2d 185, 188 (7th Cir. 1985); Collins v. Assoc. Pathologists, Ltd., 676 F. Supp. 1388, 1407 (C.D. Ill. 1987). **[**18]**

---

[3] In Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988), the Supreme Court affirmed the Second Circuit's decision. International fails to cite the Supreme Court's decision and instead limits its discussion to the Second Circuit's opinion.

Here, the Illinois Antitrust Act's prohibition of conspiracies in restraint of trade, *740 ILCS 10/3(1)* & *(2)*, was intentionally based on *Section 1* of the Sherman Act, *15 U.S.C. § 1*. *See* *Laughlin v. Evanston Hosp., 133 Ill. 2d 374, 550 N.E.2d 986, 991 (Ill. 1990)*; *People ex rel. Scott v. College Hills Corp., 91 Ill. 2d 138, 435 N.E.2d 463, 469-71, 61 Ill. Dec. 766 (Ill. 1982)*; *Blake v. H-F Group Multiple Listing Service, 36 Ill. App. 3d 730, 345 N.E.2d 18, 24 (Ill. App. Ct. 1976)*. *Section 10/3* of the Illinois Antitrust Act provides, in relevant part:

> ***HN3***[] Every person shall be deemed to have committed a violation of this Act who shall:
>
> (1) Make any contract with, or engage in any combination or conspiracy with, any person who is, or but for a prior arrangement would be, a competitor of such person:
>
> (a) [to price fix]; (b) [to manipulate supplies, sales or production for the purposes of price fixing];
>
> (c) allocating or dividing customers territories, supplies, sales, or markets, functional, or geographical, for any commodity or service; or
>
> (2) By contract, combination, or conspiracy with one or more other persons unreasonably restrain trade or commerce . . . **[**19]** .

740 ILCS 10/3 (1998).

Similarly, albeit less verbose, *Section 1* of the Sherman Act forbids "every contract, combination . . . or conspiracy, in restraint of trade or commerce among the states." *15 U.S.C. § 1*. Although the terms of *Section 1* of the Sherman Act "prohibit every agreement in 'restraint of trade,'" [the Supreme Court] has long recognized that Congress intended to outlaw only unreasonable restraints." *State Oil Co. v. Khan, 139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)* (citations omitted).

One significant difference between the Illinois Antitrust Act and *Section 1* of the Sherman Act is that the Illinois statute codifies what restraints are illegal "per se," *740 ILCS 10/3(1)(a)-(c)*, versus restraints that should be analyzed under the "Rule of Reason," *740 ILCS 10/3(2)*. *See Sportmart, Inc.*, 1996 WL 296643, at *17 (*citing* *740 ILCS 10/3* Bar Committee Comments - 1967 (1993)); *Blake, 345 N.E.2d at 25-26*; *see generally* *Ethan Allen, Inc., 642 N.E.2d at 472* (noting the differences between *section 10/3(3)* of the Illinois Antitrust Act and *Section 2* of the Sherman Act). ***HN4***[] Under *Section 1* of the Sherman Act, by contrast, courts determine, "based on the **[**20]** nature of the restraint," whether a per se violation exists or whether the "Rule of Reason" should apply. *Denny's Marina, Inc. v. Renfro Productions, Inc., 8 F.3d 1217, 1220 (7th Cir. 1993)*.

In cases involving *Section 1* of the Sherman Act, courts "apply the per se rule when 'the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output.'" *General Leaseways, Inc. v. Nat'l. Truck Leasing Assoc., 744 F.2d 588, 595 (7th Cir. 1984)* (*quoting* *Broadcast Music, Inc., v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979))*. "Restraints that are per se unreasonable include agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry or restraint is needed to establish their illegality." *Wilk v. American Medical Association, 895 F.2d 352, 358* ***[*1041]*** *(7th Cir. 1990)* (*citing* *Nat'l Society of Professional Engineers v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978))*. Examples of per se rule offenses under *Section 1* of the Sherman Act include: (1) horizontal price fixing conspiracies, see *Arizona v. Maricopa* ***[**21]*** *County Medical Society, 457 U.S. 332, 348, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; (2) certain attempts at market allocation, see *Blackburn v. Sweeney, 53 F.3d 825, 827 (7th Cir. 1995)* and *General Leaseways, 744 F.2d at 595*; and (3) group boycotts, "if used to enforce a rule or policy or practice that is itself illegal per se [*e.g.*, illegal price-fixing], *Vogel v. American Society of Appraisers, 744 F.2d 598, 600 (7th Cir. 1984)*. The Supreme Court recently reiterated its disfavor of applying the per se rule to "'restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious.'" Khan, 118 S. Ct. at 279 (*quoting* FTC v. Indiana Federation of Dentists, 476 U.S. 447, 458-59, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)).

Because of the limited instances where the per se rule is applied, **HN5**[] most antitrust claims under Section 1 of the Sherman Act are subject to the Rule of Reason. *See* Khan, 118 S. Ct. at 279; *see also* Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Advert. Assoc., Inc., 672 F.2d 1280, 1284 (7th Cir. 1982). "The rule of reason category includes agreements whose **[**22]** competitive effect can only be evaluated by analyzing the facts peculiar to the business involved, the particular restraints history, and the reasons it was imposed." Wilk, 895 F.2d at 358 (*citing* Nat'l Society of Professional Engineers, 435 U.S. at 692); *see also* Khan, 118 S. Ct. at 279; Wisc. Music Network, Inc. v. Muzak Limited P'Ship, 5 F.3d 218, 222 (7th Cir. 1993). "The test of legality under the rule of reason is whether the challenged conduct promotes or suppresses competition." *Id.*

In this case, International alleges that its expulsion was "unlawful per se as restraints of trade by means of horizontal market allocation or division, all within the meaning of 740 ILCS 10/3." (Compl. at P 28.) Alternatively, International alleges that its expulsion "unreasonably restrain[s] trade, by means of horizontal market allocation or division, all within the meaning of 740 ILCS 10/3." (Id. at P 29.) In other words, International's alternative claim seeks to invoke the Rule of Reason if the per se rule does not apply. In light of the facts supporting International's allegations, the court finds that the Rule of Reason should apply, but not based on the theory that **[**23]** International espouses.

Market allocation is indeed per se illegal under the Illinois Antitrust Act. *See* 740 ILCS 10/3(1)(c). The facts that International presents here, however, do not suggest market allocation. *Cf.* Blake, 345 N.E.2d at 27-28. Rather, **HN6**[] a trade association's decision to expel one of its members is more properly described as a "concerted refusal to deal" or "group boycott." *See* Northwest Wholesale Stationers, Inc. v. Pacific Stationery and Printing Co., 472 U.S. 284, 290, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985). Under the Illinois Antitrust Act, that conduct is subject to the Rule of Reason. *See* 740 ILCS 10/3 Bar Committee Comments - 1967 [4]; *see also* Blake, 345 N.E.2d at 27-28 (noting that those agreements not specifically listed under Section 10/3(1), including concerted refusals to deal, are subject to the rule of reason).

[24]** In general, courts addressing facts similar to those at bar under Section 1 of the Sherman Act share this view. *See* Northwest Wholesalers, 472 U.S. 284, 105 S. Ct. 2613, 86 L. Ed. 2d 202; *see also* Phil Tolkan Datsun, Inc., 672 F.2d at 1285 ("Membership arrangements in trade associations form an exception to the general rule that group boycotts constitute per se antitrust violations."); United States Trotting Assoc. v. Chicago Downs Assoc., Inc., 665 F.2d 781, 789-90 (7th Cir. 1981); Martin v. American Kennel Co., 697 F. Supp. 997, 1000 (N.D. Ill. 1988); Carleton v. Vermont Dairy Herd Improv. Assoc., 782 F. Supp. 926, 932-33 (D. Vermont 1991). Notably, none of International's arguments attempt in any way to show market allocation. For these reasons, the court will apply the Rule of Reason in **[*1042]** determining whether International has a "better than negligible" chance of showing that its expulsion was an unreasonable restraint of trade.

"The Illinois Supreme Court has indicated that the rule of reason should be applied similarly under Illinois law, as it is under the Sherman Act." *Sportmart*, 1996 WL 296643, at *18 (*citing* College Hills Corp., 435 N.E.2d at 471-72. **HN7**[] "The threshold issue in any **[**25]** rule of reason case is market power." Wilk, 895 F.2d at 359. Without proof of market power to restrain competition substantially, "any case under the Rule of Reason collapses . . . ." L.A.P.D., Inc. v. General Elect. Corp., 132 F.3d 402, 405 (7th Cir. 1997); *see also* Ehredt Underground, Inc. v. Comm. Edison Co., 90 F.3d 238, 239 (7th Cir. 1996). Market power "entails cutting back output in the market and thus driving up prices to consumers." Sanjuan v. American Bd. of Psychiatry and Neurology, Inc., 40 F.3d 247, 251 (7th Cir. 1994). Market power can be evident where the defendant has "unique access to a business element necessary for effective competition." Northwest Wholesale Stationers, Inc., 472 U.S. at 298.

---

[4] "Illinois courts have endorsed the Bar Committee's interpretation of the [Illinois Antitrust Act]." *Sportmart*, 1996 WL 296643, at *17 (*citing* Ethan Allen, Inc., 642 N.E.2d at 474).

In this case, International has not shown that AABC membership allows the exercise of market power or that it provides exclusive access to a necessary business element. *See* *Vogel, 744 F.2d at 604* (To succeed at trial, plaintiff would have to show that association's "members as a group have a substantial share of the market . . . ."). While International claims that membership is "highly advantageous," it concedes that membership is necessary only "in **[**26]** some instances." (Pl.'s Mem. in Supp. at 1.) Even those allegations are devoid of any support in the record, however. In fact, AABC points out that there are approximately 500 independent testing and balancing firms in the United States; only 85 of these firms are members of AABC. Furthermore, while there are approximately 12 independent testing and balance firms in the Chicago area, only one is a member of AABC. International did not even attempt to define the relevant market. *See* *Vogel, 744 F.2d at 604* (stating that a plaintiff must establish the relevant market to prevail under *Section 1* of the Sherman Act). Therefore, with no indication to the contrary, it is clear that a testing and balancing firm can effectively compete without being a member of AABC. Put another way, the exclusion of International from AABC will not cause a decrease in output of testing and balancing services. *See* *Sanjuan, 40 F.3d at 251* (association's refusal to certify plaintiffs did not "remove their output from the market and therefore [did] not raise prices to consumers."); *see also* *In re Circuit Breaker Litigation, 984 F. Supp. 1267, 1281 (C.D. Calif. 1997)* (refusal of certification had no **[**27]** effect on the market).

The court also finds that the three cases that International cites in support of its motion (*Radiant Burners; Indian Head*; and *Hydrolevel*) are distinguishable to the case at bar. In general, these cases address the potential of a standard-making organization to abuse its power where "it is used to exclude competitors from a market by denying them the needed stamp of approval." *See* *ECOS Electronics Corp. v. Underwriters Laboratories, 743 F.2d 498, 502 (7th Cir. 1984)* (discussing *Radiant Burners* and *Hydrolevel*). International argues that membership in AABC and the accompanying Guaranty are comparable necessities in the testing and balancing industry. The current record, however, does not support that conclusion. Nevertheless, the court will examine each of the cases that International cites in turn.

1. *Radiant Burners*

In *Radiant Burners*, the American Gas Association ("AGA"), a standard-making organization within the gas industry, twice refused to provide its "seal of approval" on plaintiff's gas burners. *364 U.S. at 658*. Because the plaintiff's gas burners did not receive the AGA's seal of approval, gas utilities refused to supply **[**28]** gas for use in the plaintiff's gas burners. *See id.* The gas burners were therefore unmarketable. See id. The plaintiff filed suit against the AGA and the gas utilities, alleging that their refusal to supply gas based on the absence of AGA approval was an unlawful restraint of trade under *Section 1* of the Sherman Act. *See* *id. at 658-59*. The plaintiff also alleged that the AGA's approval process was **[*1043]** unduly influenced by its gas utility members because some of them were in competition with the plaintiff. *See id.* Reversing a lower court's dismissal of the complaint, the Supreme Court held that such allegations state a claim under *Section 1* of the Sherman Act because "the alleged conspiratorial refusal to provide gas for use in [the plaintiff's gas burners] interferes with the natural flow of interstate commerce and clearly has, by its 'nature' and 'character', a 'monopolistic tendency.'" *Id. at 660*.

International argues that the facts of *Radiant Burners* are analogous to the case at bar because, in the testing and balancing industry, "membership in AABC is desirable and sometimes even a requirement," and because the Guaranty provides "an important advantage over non-members." **[**29]** (Pl.'s Mem. in Supp. at 7.) Furthermore, International claims that its poor evaluations on the Project were actually the result of a conspiracy because competitors sat on AABC's Board and investigated O&P's complaints. (*Id.*) Accordingly, International contends that under *Radiant Burners*, the facts at bar are "sufficient to state a claim for relief under *section 1* of the Sherman Act." (Pl.'s Mem. in Supp. at 7-8.)

International's reliance on *Radiant Burners* is misplaced. The Court in *Radiant Burners* simply held that the plaintiff's allegations survived a motion to dismiss. *364 U.S. at 660*. Under federal notice pleading standards, a motion to dismiss should not be granted "unless it is impossible [for the plaintiff] to prevail under any set of facts that could be proved consistent with his allegations." *Albiero v. City of Kankakee, 122 F.3d 417, 419 (7th Cir. 1997)*; the burden is on the defendant to persuade the court that the plaintiff's allegations are wanting. Here, by contrast, the motion before the court is a motion for a preliminary injunction. Therefore, the burden was on International to show that it has "a better than negligible chance" of success on the **[**30]** merits. *See Meridian Mut. Ins. Co., 128 F.3d at 1114-15*; *see also Boucher, 134 F.3d at 823*. As explained above, International has not done so, to any degree. *Cf. McDaniel v. Appraisal Institute, 117 F.3d 421, 423 (9th Cir. 1997)* (emphasizing the difference between a *Rule 12(b)(6)* motion and a motion for summary judgment, where "it was incumbent on the plaintiff to present evidence.").

2. *Indian Head*

International also relies on the Second Circuit's opinion in *Indian Head, 817 F.2d 938 (2nd Cir. 1987)*. In that case, Indian Head sued a competitor, Allied Tube & Conduit, Corp. ("Allied") under *Section 1* of the Sherman Act after Allied unduly prevented Indian Head's product from being approved by the National Fire Protection Association ("NFPA"), the publisher of the industry's model code. *817 F.2d at 939*. The model code, which established product standards within the industry, was "the most widely disseminated and adopted model code in the world. . . . [A] substantial number of state and local governments adopt the [model code] as law in whole or in part." *Id.*

Allied was eligible to vote on whether Indian Head's product would receive model code approval. **[**31]** *See id. at 940*. Prior to the NFPA's annual meeting where the vote would be held, Allied formulated a plan to insure that Indian's product would not receive the required number of votes for approval. *See id.* Implementing campaign tactics that would make some precinct captains blush, Allied

> arranged for 155 persons -- including employees, sales agents, the agents' employees, company executives, employees of two of Allied divisions, and the wife of the national sales director -- to join the NFPA, to register as voting members, and to attend the annual meeting to vote against [approval of the plaintiff's product]. [The defendant] also paid over $ 100,000 for the membership, registration, and attendance expenses of these voters. . . . At the annual meeting, [the defendant] instructed its personnel where to sit, based upon a detailed seating chart, and appointed group leaders to instruct voters how the discussion is progressing and how to vote. Boxed lunches were provided and the voters were told to stay nailed to their seats until the end . . . . Group leaders used walkie-talkies and hand signals to facilitate communication.

[*1044] *Id. at 940-41*. Not surprisingly **[**32]** then, the die was cast, and when the vote was taken, Allied's confederates were responsible for the NFPA's refusal to approve Indian Head's product. *See id.*

At trial, the jury entered judgment in favor of Indian Head. *See id.* The trial court, however, granted Allied's motion for a judgment notwithstanding the verdict, holding that the Noerr-Pennington doctrine [5] required that the jury's verdict be set aside. *See id. at 942*. On appeal, the Second Circuit vacated the trial court's decision, holding that Noerr-Pennington immunity should not be extended "to lobbying activities directed toward a 'quasi-legislative' body such as the NFPA." *See id.* The court of appeals also rejected Allied's cross appeal which sought a declaration that its activities were not a restraint of trade as a matter of law. *See id. at 946-47*. The Second Circuit held that although Allied tactics were in literal compliance with the NFPA's rules, "Allied violated the integrity of the NFPA's procedures . . . for the sole purpose of achieving an anticompetitive result -- the exclusion of [Indian Head's product] from the market place." *See id.*

[33]** International argues that *Indian Head* controls here because the AABC Board "was packed with competitors of International, who stood to benefit personally from [its] expulsion" and because Cox, another alleged competitor of International, participated in AABC's investigation. (Pl.'s Mem. in Supp. at 8.) International's argument, based solely on conclusory allegations, is not persuasive. International has failed to show that its expulsion was the result

---

[5] The Noerr-Pennington Doctrine is not at issue here. Roughly speaking, the doctrine defines the boundary between an industry's concerted governmental lobbying efforts, which are legal, and "abuses of administrative or judicial processes that may result in antitrust violations." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 500, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*; *see also Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*; *United Mine Workers of America v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*; *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*.

of egregious conduct comparable to the facts in *Indian Head*. First, there is no evidence that AABC's Board was "packed" with competitors. With no indication to the contrary, it appears that the Board members were duly elected in compliance with AABC's bylaws and with no ulterior motives to exclude competition. International fails to even identify specific Board members and their alleged affiliation with firms that compete in International's market. Moreover, International concedes that Sufka, the Executive Director of AABC who initiated and oversaw the investigation of International, had no affiliation with any competitor. (Pl.'s Mem. in Supp. at 7.) In sum, there is no indication that International's expulsion was the result **[**34]** of anticompetitive bias on the part AABC's Board. Instead, it appears that International's expulsion occurred in compliance with AABC's bylaws and, more importantly, only in response to International's unreasonable conduct, both on the Project and in response to AABC's legitimate inquiries. *See* *Pretz v. Holstein Friesian Assoc. of America, 698 F. Supp. 1531, 1540 (D. Kansas 1988)* (noting that procedural safeguards, though not determinative, suggest reasonableness of a defendant's restraint). International may have the opportunity to show otherwise at trial, but for now, the record does not support International's assertions.

And while the action of Cox, an alleged competitor, to distribute business cards at a meeting raises questions, that alone, especially in light of International's flouting of AABC's bylaws, is not enough to show that AABC's expulsion was tainted or violated the antitrust laws. *See* *Havoco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 558 (7th Cir. 1980)* ("a loss by the plaintiff of a single contract with a single purchaser is simply not equivalent to a deleterious effect on the market."). The court also notes that Cox swears that his firm does not directly **[**35]** compete with International (Def.'s Mem. in Opp'n, at Ex. 23); International's failure to even attempt to define the relevant market allows the court to not question Cox's averment. Finally, the court again emphasizes that International has failed to show that membership in AABC is essential to compete, unlike the model code approval sought in *Indian Head*.

[*1045] 3. *Hydrolevel*

The third case that International relies upon is *Hydrolevel, 456 U.S. at 579, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)*, a case with facts similar to those in *Indian Head*. In *Hydrolevel*, the plaintiff, Hydrolevel, Inc. ("Hydrolevel"), developed an improved fuel cutoff device for use in boilers. *See* *id. at 559*. Based on the improved device, Hydrolevel received business from a client that had previously purchased the product of the dominant competitor in the market, McDonnell & Miller ("M&M").

M&M was a member of the American Society of Mechanical Engineers ("ASME"), which published the industry's highly-influential model code. *See* *id. at 559-60*. The model code was adopted by federal regulations, 46 states, and all but one of the Canadian provinces. *See* *id. at 559*. An executive of M&M **[**36]** sat as vice-chairman of the ASME subcommittee that wrote the segment of the model code governing fuel cutoff devices. *See id.* Sensing that Hydrolevel's device would intrude into M&M's market share, the M&M executive, in his capacity as vice-chairman of the subcommittee, participated in the drafting of an unsupported and inconsistent statement that condemned Hydrolevel's device as unsafe under ASME's standards. *See* *id. at 561-62*. Based on that statement, M&M orchestrated an effective publicity campaign that said Hydrolevel's device violated ASME's model code; consequently, Hydrolevel's business suffered. *See* *id. at 563*. In response to Hydrolevel's ensuing complaints, ASME initiated an investigation which ultimately concluded that no wrongdoing had occurred. *See* *id. at 563-64*. Hydrolevel then filed suit against M&M and ASME, alleging violations of *Sections 1* and *2* of the Sherman Act. *See* *id. at 564*. After M&M settled the suit with Hydrolevel, the case went to trial against ASME. The jury returned a verdict in favor of Hydrolevel, which the Second Circuit subsequently affirmed. *See* *id. at 565*.

On a writ of certiorari, the issue before the Supreme Court was whether **[**37]** ASME could be held liable "under the antitrust laws for the acts of its agents performed with apparent authority." *See* *id. at 559*. The Court answered in the affirmative, concluding that "ASME's liability under a theory of apparent authority is consistent with the intent behind the antitrust laws." *See* *id. at 570-71*. The Court reasoned that ASME's agents had the power to restrain competition because ASME was considered to be "an extra-governmental agency" based on the tremendous influence of its model code. *See id.* The Court also recognized that "a standard-setting organization like ASME can be rife with opportunity for anticompetitive activity" because many of ASME's officials were affiliated with members in competition. *See* id. at 571. Moreover, the Court determined that whether ASME's agents intended to benefit ASME was irrelevant because they had the ability to "exercise economic power." *See* id. at 573-74.

International argues that the facts in *Hydrolevel* are analogous to the facts at bar. Specifically, International asserts that one report which contributed to its eventual expulsion was inconsistent and generated by a competitor. (Pl.'s Mem. in Supp. at **[**38]** 9.) Initially, the court notes that Hydrolevel was primarily a case addressing the scope of agency under the Sherman Act. In any event, International's allegations are unsupported and insufficient in light of the substantial contravening evidence that suggests that International's overall performance received numerous complaints. International ignores those parts of the record and instead concludes that the problems incurred on the Project were all caused by conspirators seeking to eliminate competition. In fact, however, the record indicates that AABC repeatedly intervened on International's behalf in an effort to allow it to complete the Project. AABC's directive on the Project appeared to be three-fold: (1) to respond to O&P's complaints pursuant to the Guaranty; (2) to reach a resolution with O&P while acting in International's interests; and (3) to preserve the integrity of AABC. None of these aims are anticompetitive and there is no indication of covert activity by AABC in its investigation. Unlike the facts in *Hydrolevel*, there are no facts here suggesting: (1) that a competitor subverted any AABC procedure; or (2) that the act of expulsion by AABC **[*1046]** would effectively paralyze **[**39]** International's ability to compete or frustrate overall competition.

Based on the series of Supreme Court cases involving alleged antitrust violations by trade and professional associations, it is clear that the conduct of those organizations "has some potential to violate the antitrust laws." *See* Sanjuan, 40 F.3d at 251 (collecting cases). On that same note, however, "***HN8***[] a trade association is not by its nature a 'walking conspiracy,'" *Greater Rockford Energy and Tech. Group v. Shell Oil Co., 998 F.2d 391, 397 (7th Cir. 1993)* (citations and internal quotation marks omitted.), and "the antitrust laws are not 'panacea[s] for all business affronts which seem to fit nowhere else.'" *ECOS Electronics Corp. v. Underwriters Laboratories, 743 F.2d 498, 501 (7th Cir. 1984)* (*quoting* *Scranton Construction Co. v. Litton Industries Leasing Corp., 494 F.2d 778, 783 (5th Cir. 1974))*. "Animosity, even if rephrased as 'anticompetitive effect,' is not illegal without illegal anticompetitive effects." *Schachar v. American Academy of Ophthalmology, Inc., 870 F.2d 397, 400 (7th Cir. 1989)*. It is injury to the market, not injury to an individual competitor, that violates the antitrust laws. **[**40]** *See* *Wigod v. Chicago Merc. Exchange, 981 F.2d 1510, 1515 (7th Cir. 1992)*; *see also* *Martin, 697 F. Supp. 997, 1003*; *Consolidated Metal Products, Inc. v. American Petroleum Institute, 846 F.2d 284, 293 (5th Cir. 1988)*.

International has not shown that its expulsion had an adverse impact on competition in the testing and balancing industry. *See* *Martin, 697 F. Supp. at 1004-05*. The expulsion of a noncomplying member is "the normal method by which a private association enforces its rules." *Vogel, 744 F.2d at 600*; *see also* Northwest Wholesale, 472 U.S. at 296 (An association "must establish and enforce reasonable rules in order to function effectively."). By preventing AABC from enforcing its bylaws, an injunction would only encourage members to ignore the association's standards. *See* *Gen'l Leaseways, 744 F.2d at 597*. The integrity of AABC would consequently suffer. *See* *Martin, 697 F. Supp. at 1004-05*. "It has long been recognized that the establishment and monitoring of trade standards is a legitimate and beneficial function of trade associations." *Consolidated Metal Products, Inc., 846 F.2d at 294*. In light of these considerations, International has **[**41]** not shown the unreasonableness of AABC's action; it may yet be able to do so at trial. *See* *Vogel, 744 F.2d at 604* (emphasizing that the denial of a preliminary injunction does not serve to "prejudge the trial."). For now, however, the court concludes that International has not met its burden to show that it will likely succeed on the merits. Accordingly, the court need not reach the remaining elements necessary for a preliminary injunction to issue. *See* *Green River Bottling Co. v. Green River Corp., 997 F.2d 359, 361 (7th Cir. 1993)*. International's motion for a preliminary injunction is hence denied.

III. CONCLUSION

For the foregoing reasons, International's motion for a preliminary injunction is denied.

IT IS SO ORDERED.

HN1[] Entitlement as Matter of Law, Appropriateness

Summary judgment is appropriate when the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact, and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. The party seeking summary judgment bears the initial burden of demonstrating that there is an absence of evidence to support the non-moving party's case. The burden then shifts to the non-moving party to establish the existence of an essential element to the claims on which they bear the burden of proof at trial. To satisfy this burden, the non-moving party cannot rest on the pleadings, but must by affidavit or other appropriate means, set forth specific facts showing there is a genuine issue for trial. *Fed. R. Civ. P. 56(e)*. The mere existence of a scintilla of evidence in support of the non-moving party's case is insufficient; there must be evidence on which the jury could reasonably find for the non-movant. In making this determination, the court must examine the pleadings, affidavits and other evidence in the record in the light most favorable to the non-moving party.

Antitrust & Trade Law > Sherman Act > General Overview

Commercial Law (UCC) > Sales (Article 2) > Form, Formation & Readjustment > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN2[] Antitrust & Trade Law, Sherman Act

The Sherman Act prohibits every contract, combination, or conspiracy, in restraint of trade or commerce. *15 U.S.C.S. § 1*. Whether an action violates *§ 1* of the Sherman Act depends on whether it is adjudged an unreasonable restraint. The U.S. Supreme Court has developed two methods of analysis for determining whether a concerted action is an unreasonable restraint of trade: Ordinarily, whether particular concerted action violates *§ 1* of the Sherman Act is determined through case by case application of the so-called Rule of Reason--that is, the fact finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. Certain categories of agreements, however, have been held to be per se illegal, dispensing with the need for case-by-case evaluation. Per se rules are appropriate only for conduct that is manifestly anticompetitive, that is, conduct that would always or almost always tend to restrict competition and decrease output.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Tying Arrangements, Defenses

The per se and the Rule of Reason analyses both examine whether the conduct alleged is an unreasonable restraint of trade, but the analyses carry different presumptions. The application of the per se rule is reserved for situations where the conduct almost always has an anticompetitive effect and virtually never has a procompetitive effect. If conduct falls into a per se category, the conduct is presumed illegal. For example, price-fixing, horizontal divisions of markets, bid rigging, tying arrangements, and horizontal refusals to deal have earned the per se label because experience has shown that these arrangements are almost always anticompetitive and rarely have any procompetitive justification. The per se analysis applies because the conduct is so certain to unreasonably displace the competitive process that it is presumed illegal.On the other hand, the Rule of Reason presumes that the conduct is legal, but the plaintiff may show that under all the relevant factors, the alleged conduct is illegal because it has unreasonably displaced the competitive process. The Rule of Reason applies unless the plaintiffs demonstrate that the conduct falls into one of the per se categories.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Healthcare Law > Healthcare Litigation > Actions Against Healthcare Workers > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Recent cases decided by the United States Supreme Court caution against the expansion of the "group boycott label" and the imposition of per se liability. The Supreme Court has explicitly stated that unless the conspirators possess market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted. Finally, the Supreme Court has noted that in determining whether the per se rule applies, courts may look beyond the challenged conduct to the surrounding circumstances: There is often no bright line separating per se from Rule of Reason analysis. Per se rules may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In sum, the per se rule requires a historically focused inquiry directed at ascertaining whether the behavior complained of is of the type that regularly poses anticompetitive consequences. Where prior cases have shown that a certain practice is of this type, a deleterious effect on the market will be presumed and no detailed market analysis is required. Where the anticompetitive effect of a practice is not historically clear, the practice may still be per se violative of antitrust laws if a preliminary examination of market conditions surrounding the alleged restraint at issue reveals such an impact absent any procompetitive justification.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The boycott cases that have merited per se review in the past deal with markets that were open and competitive until the concerted action closed off part of the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Healthcare Law > Healthcare Litigation > Antitrust Actions > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Per Se Rule & Rule of Reason, Per Se Violations**

The United States Supreme Court has cautioned that it is only after considerable experience with certain business relationships that courts classify them as per se violations.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > Preliminary Proceedings > Preliminary Hearings > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

The United States Supreme Court has stated that per se treatment may be merited where the plaintiffs have shown that the defendants hold market power or unique access to a business element necessary for effective competition. As the Eleventh Circuit noted, the practice may still be per se violative of antitrust laws if a preliminary examination of market conditions surrounding the alleged restraint at issue reveals such an impact absent any procompetitive justification. While not mandated, a preliminary examination of market conditions is acceptable under a per se analysis.

Opinion

[*1139] MEMORANDUM DECISION AND ORDER

This case arises out of a dispute between anesthesiologists at Cottonwood Hospital in Murray, Utah. The plaintiffs are three anesthesiologists, Drs. Anthony Diaz, Paul Diehl, and Allan Kaminsky, who have staff privileges at the Hospital. The individual defendants are three anesthesiologists, Drs. Michael Farley, Morris Matthews, and Joan Abele, also with staff privileges at Cottonwood Hospital. Also named as defendants are two entities, Cottonwood Obstetrics and Gynecology ("Cottonwood Ob/Gyn") and Old Farm Obstetrics **[**2]** and Gynecology ("Old Farm Ob/Gyn"), both of which are groups of Obstetricians/Gynecologists who regularly deliver babies in Cottonwood Hospital's Labor and Delivery room.

In February, 1994, one of the defendants, Dr. Matthews, entered into a contract with each of the two obstetric/gynecology entities. The contracts obligated Dr. Matthews himself or another anesthesiologist selected solely by him to provide anesthesiology services for the patients of these two entities who are admitted to Cottonwood Hospital's Labor and Delivery room. After the contracts were signed, with minor exceptions, the plaintiffs were not selected by Dr. Matthews to perform these anesthesiology services. The plaintiffs complain in this lawsuit that Dr. Matthews' contracts with the entities are part of a combination or conspiracy by the defendants in restraint of trade in violation of Section One of the Sherman Antitrust Act. The plaintiffs contend that the conduct of the individual anesthesiologist defendants amounts to a horizontal group boycott and therefore a *per se* violation of Section One. The defendants argue that their conduct is not in violation of the Sherman Act in any respect, and in any event, **[**3]** should be subject to a Rule of Reason, rather than a *per se*, analysis.

This case came on for hearing before the court on March 26, 1998 on the individual anesthesiologist defendants' motion for summary judgment. The plaintiffs were represented by Peggy Tomsic and Eliot M. Cohen. Defendants were represented by George A. Hunt, Randy T. Austin, Stephen Marshall, R. Brent Stephens, Kenneth W. Yeates, and Steven K. Gordon.

BACKGROUND FACTS

A. Cottonwood Hospital and the Anesthesia Department

Cottonwood Hospital is owned by a subsidiary of Intermountain Health Care ("IHC") which also owns two other hospitals in the same area. Cottonwood operates under an "open staff" policy which means that any medical practitioner may apply for staff privileges at the hospital. Staff privileges are defined as the permission granted to a medical practitioner to provide patient care at the hospital and includes access to hospital resources that are necessary to effectively provide that care.

Anesthesiology services at Cottonwood Hospital are provided by the members of the Department of Anesthesiology, all of whom are licensed anesthesiologists who practice medicine independently of each other. **[**4]** They are not considered employees of the hospital. The department's purpose is to schedule anesthesiologists to cover the hospital's needs. **[*1140]** Cottonwood Hospital requires anesthesiologists to cover four areas in the hospital: (1) the operating room ("OR"), (2) the orthopedic specialty hospital ("TOSH"), (3) the surgical center, and (4) the labor and delivery room. Each area requires a certain number of anesthesiologists each day. For example, prior to November of 1993, the labor and delivery needs were met by scheduling one anesthesiologist for a 24 hour shift beginning at 6 p.m. and running until 6 p.m. the next evening.

Historically, anesthesiologists regularly working in one of these four divisions have not been regularly scheduled in another division. The OR and labor and delivery (or "obstetric") divisions have each had a certain number of "slots," or physicians, who rotate in the schedule. Generally speaking, a new physician has been added to the rotation of either OR or obstetric anesthesia only when another physician left.

Until November, 1993, anesthesiology scheduling was done by two anesthesiologists in the department. After November, 1993, a single anesthesiologist has **[**5]** been selected as scheduler by a two-thirds majority vote of the Department members. Since November, 1993, defendant Dr. Farley has been the elected scheduler. As the scheduler, Dr. Farley is responsible for making certain that a sufficient number of anesthesiologists are assigned to cover labor and delivery, the OR, the surgical center, and TOSH at all times.

B. The Plaintiffs

Plaintiff Anthony Diaz became an active member of Cottonwood Hospital's Department of Anesthesiology in 1980. He practiced general anesthesiology, including obstetric ("ob/gyn") anesthesiology, at Cottonwood between 1980 and 1982. In 1982, Dr. Diaz left Cottonwood and practiced medicine in Alaska. In 1990 he returned to Utah and resumed working at Cottonwood. From 1990 to 1992, Dr. Diaz did some "fill in" anesthesiology work on the labor and delivery schedule at the rate of approximately two shifts per month. In 1993, Dr. Diaz requested significant additional labor and delivery shifts.

Plaintiff Paul Diehl joined Cottonwood's Anesthesiology Department in 1981, performing ob/gyn anesthesia there until 1985. In 1985, Dr. Diehl decided he no longer wanted to do ob/gyn anesthesia and voluntarily traded his **[**6]** labor and delivery shifts for shifts in the OR. In 1993, Dr. Diehl requested to again receive significant work in labor and delivery.

Plaintiff Allan Kaminsky joined Cottonwood's Anesthesiology Department in 1980 where he performed ob/gyn anesthesiology until 1983. In 1983, Dr. Kaminsky voluntarily traded his obstetric shifts at Cottonwood for shifts in the OR division. In 1993, Dr. Kaminsky asked to be included again in the labor and delivery schedule.

C. The Defendants

Defendants Michael Farley, Morris Matthews, and Joan Abele are all licensed anesthesiologists who hold active staff privileges at Cottonwood Hospital. Dr. Farley has been a member of Cottonwood's Anesthesia Department since 1986; Dr. Matthews has been a member since 1983; and Dr. Abele was a member from 1983 to 1996. All three individual defendants were part of a five physician rotation that regularly performed anesthesiology in labor and delivery for many years prior to 1993 when plaintiffs began demanding significant shifts in labor and delivery. In addition, as stated above, Dr. Farley has been the scheduler for the Anesthesia Department since November, 1993.

D. The Dispute Over Scheduling

As explained **[**7]** above, by late 1993, the three plaintiffs and at least one additional doctor, Dr. Welling, were requesting additional shifts in labor and delivery. [1] Although the record is not totally clear, it appears that prior to the plaintiffs' requests, five doctors, including **[*1141]** all three of the defendant doctors, were regularly rotating in the labor and delivery schedule. About the time plaintiffs began requesting labor and delivery shifts, one ob/gyn anesthesiologist left, creating one open slot in the rotation.

The defendants were wary about plaintiffs' sudden demands to return to labor and delivery and they have offered several reasons **[**8]** why they were hesitant to fully embrace the plaintiffs' requested return. First, the defendants were concerned that plaintiffs' ob/gyn anesthesiology skills had diminished during their extended absences from ob/gyn anesthesia. Second, the defendants were concerned that plaintiffs' entry into the labor and delivery schedule would disrupt the smoothly running ob/gyn system. The labor and delivery schedule had been separate from the OR schedule for approximately ten years and neither the OR nor the labor and delivery schedule had accepted new doctors unless a slot was open or the need required more doctors. The defendants also had their own interests at heart. Introducing the plaintiffs into the schedule would necessarily decrease the defendants' total number of shifts.

The friction between members of the Anesthesiology Department over scheduling led the members of the department to discuss the issue at a meeting on November 23, 1993. The record shows that at the meeting the members concluded that the plaintiffs would be scheduled for "some" labor and delivery shifts. Additionally, the minutes of the meeting indicate that plaintiff Diehl revealed to the other members of the department **[**9]** that he had retained legal counsel for the purpose of receiving privileges in ob/gyn and cardiovascular anesthesia.

The November meeting did not completely resolve the scheduling issue among the anesthesiologists. On December 6, 1993, the members of the Anesthesia Department met again to discuss whether the three plaintiffs should be given new "slots" so that eight doctors would work equally on the labor and delivery schedule or whether the three plaintiffs should be given one slot to share among the three of them. The minutes indicate the department members decided the ob/gyn anesthesiologists would meet separately to discuss the issue. The record does not indicate whether the ob/gyn anesthesiologists actually met on a later occasion. Apparently, the plaintiffs continued to work to some extent in labor and delivery, but with no definite resolution of the scheduling issue.

After the December 6 meeting, tension was running fairly high in the Anesthesia Department. As noted above, Dr. Diehl had retained legal counsel. Defendant Matthews wrote in his journal: "We have some problems in the department. About half of the people are easy to get along with and all the surgeons will work **[**10]** with them. The others have personality quirks or are slow, and some surgeons request not to have them." Morris Matthews' Journal, Dec. 18, 1993.). At some point, defendant Abele reportedly told another doctor that Dr. Diaz was slow, Dr. Kaminsky was hated, and that co-workers "had issues" with them. Like Dr. Diehl, Dr. Abele also contacted legal counsel for advice about privileges in anesthesia.

The disarray in the Anesthesia Department came to the attention of the ob/gyn physicians who worked with the anesthesiologists. This was especially apparent in January, 1994, when Dr. Ron Larkin of defendant Cottonwood Obstetrics and Gynecology asked IHC legal counsel if he and the other physicians in his medical group were free to work only with the anesthesiologists who met the quality, service availability and patient satisfaction standards Cottonwood Ob/Gyn desired. Dr. Larkin testified that he was concerned about the addition of the plaintiffs to the labor and delivery schedule because he had worked with all three plaintiffs previously when they were on the labor and delivery schedule in the 1980's. Dr. Larkin stated that he "did not want them taking care of our patients" because the **[**11]** plaintiffs had not performed to his satisfaction in the past. Deposition of Dr. Ronald M. Larkin at 34 and 31-35. On February 4, 1994, the physicians at Cottonwood Ob/Gyn requested that another anesthesiologist be scheduled for their patients whenever Dr. Kaminsky was on call.

E. The Agreement

---

[1] It is uncertain why the plaintiffs so vigorously demanded to rejoin the labor and delivery schedule. Although the record is not clear whether labor and delivery shifts became more financially lucrative in 1993, the record does state that labor and delivery shifts are presently more lucrative than the OR shifts. Plaintiffs' Memorandum in Opposition to Summary Judgment at Iiv, P 173.

Soon after Cottonwood Ob/Gyn's request regarding Dr. Kaminsky, Cottonwood Ob/Gyn **[*1142]** and defendant Dr. Matthews reached an agreement. The agreement obligated Dr. Matthews to personally provide anesthesiology services to Cottonwood Ob/Gyn's patients admitted to Cottonwood Hospital's labor and delivery room, or to select another physician of his choosing to perform such services. The contract was signed on February 7, 1994. It provided that Dr. Matthews "shall have exclusive authority and control over all anesthesia services provided to patients of Cottonwood obstetrics for labor, cesarean section and D&C's performed in the labor suite at Cottonwood Hospital."

Upon being advised of this agreement between Dr. Matthews and Cottonwood Ob/Gyn, Dr. Farley, as anesthesiology scheduler for the hospital, accommodated the new arrangement by scheduling an additional anesthesiologist to be on call whenever **[**12]** an anesthesiologist not approved by Dr. Matthews was on call in the labor and delivery room. Dr. Farley acquiesced to this demand to honor the ob/gyn physicians' requests.

After the agreement was made, Dr. Matthews informed Dr. Kaminsky that he would be double covered, meaning that when Dr. Kaminsky was on the labor and delivery schedule, there would be another anesthesiologist (as selected by Dr. Matthews) scheduled for the purpose of providing anesthesiology services to the patients of Cottonwood Ob/Gyn. Dr. Matthews offered Dr. Diehl and Dr. Diaz two non double-covered shifts a month with a possibility for increased work for Cottonwood Ob/Gyn's patients in the future if their ob/gyn skills were deemed acceptable. Dr. Diaz accepted this offer, but Dr. Diehl declined. A short time after performing under this procedure, the Cottonwood Ob/Gyn physicians informed Dr. Matthews that Dr. Diaz's performance was poor and unacceptable to them. Since the beginning of the Matthews/Cottonwood Ob/Gyn agreement, Drs. Kaminsky and Diehl have not requested positions on the labor and delivery schedule.

After Dr. Matthews and Cottonwood Ob/Gyn entered into their agreement, Dr. Matthews entered into **[**13]** a similar agreement with defendant Old Farm Ob/Gyn.

Because of the agreements between Dr. Matthews and the two physician groups, the plaintiffs contend they have been limited in their ability to utilize their obstetrical anesthesiology skills. Specifically, the plaintiffs argue that they are excluded from treating certain patients in Cottonwood Hospital's labor and delivery suite.

F. The Suit

The plaintiffs brought suit under Section One of the Sherman Antitrust Act, alleging that the agreements between Dr. Matthews and Cottonwood Ob/Gyn and Old Farm Ob/Gyn and the conduct by the individual defendants constituted a combination that unreasonably restrained trade. The plaintiffs allege that individual defendants' conduct merits *per se* condemnation because the alleged conduct amounts to a horizontal group boycott involving a conspiracy between and among the three individual defendants. The plaintiffs contend that the only issue for a jury of this court to decide is whether the individual defendants actually conspired or combined to achieve this result. The plaintiffs acknowledge that their claim fails if the Rule of Reason applies to the agreements. The plaintiffs also bring **[**14]** pendent state claims under the Utah Antitrust Act with the same rationale as the Sherman Antitrust Act. The plaintiffs also state a claim for defamation based on Dr. Abele's alleged comments, and for tortious interference with economic relations based on the defendants' decisions regarding labor and delivery scheduling. The individual defendants now move for summary judgment on all the claims.

DISCUSSION

I. Summary Judgment

HN1[] Summary judgment is appropriate when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact, and that the moving party is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*.

The party seeking summary judgment bears the initial burden of demonstrating **[*1143]** that there is an absence of evidence to support the non-moving party's case. *Celotex Corp. v. Catrett, 477 U.S. 317, 325, 91 L. Ed. 2d 265,* 106 S. Ct. 2548 (1986). The burden then shifts to the non-moving party to establish the existence of an essential element to the claims on which they bear the burden of proof at trial. *Id.* To satisfy this burden, the non-moving **[**15]** party cannot rest on the pleadings, but must by affidavit or other appropriate means, set forth specific facts showing there is a genuine issue for trial. Fed. R. Civ. P. 56(e). The mere existence of a scintilla of evidence in support of the non-moving party's case is insufficient; there must be evidence on which the jury could reasonably find for the non-movant. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986). In making this determination, the court must examine the pleadings, affidavits and other evidence in the record in the light most favorable to the non-moving party. Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986).

II. The Sherman Act Section One Claims

The individual defendants argue that they are entitled to summary judgment because their conduct as alleged by the plaintiffs and based on an undisputed factual record does not amount to a *per se* violation of the Sherman Act.

A. *Per Se* Versus Rule of Reason Analysis

HN2[] The Sherman Act prohibits "every contract, combination . . . or conspiracy, in restraint of trade or commerce . . .." 15 U.S.C. § 1. "Whether **[**16]** an action violates § 1 of the Sherman Act depends on whether it is adjudged an *unreasonable* restraint." Northwest Wholesale Stationers v. Pacific Stationery & Printing Co., 472 U.S. 284, 289, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985). The Supreme Court has developed two methods of analysis for determining whether a concerted action is an unreasonable restraint of trade:

> Ordinarily, whether particular concerted action violates § 1 of the Sherman Act is determined through case by case application of the so-called Rule of Reason--that is, "the fact finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 2557, 53 L. Ed. 2d 568 (1977). Certain categories of agreements, however, have been held to be *per se* illegal, dispensing with the need for case-by-case evaluation. We have said that *per se* rules are appropriate only for "conduct that is manifestly anticompetitive," id., at 50, 97 S. Ct. at 2557, that is, conduct "'that would always or almost always tend to restrict **[**17]** competition and decrease output,'" Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 289-290, 105 S. Ct. 2613, 2617, 86 L. Ed. 2d 202 (1985), quoting Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20, 99 S. Ct. 1551, 1562, 60 L. Ed. 2d 1 (1979).

Business Elec. Corp. v. Sharp Elec. Corp., 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988).

HN3[] The *per se* and the Rule of Reason analyses both examine whether the conduct alleged is an unreasonable restraint of trade, but the analyses carry different presumptions. [2] The application of the *per se* rule is reserved for situations where the conduct **[*1144]** almost always has an anticompetitive effect and virtually never has a procompetitive effect. If conduct falls into a *per se* category, the conduct is presumed illegal. For example, price-fixing, horizontal divisions of markets, bid rigging, tying arrangements, and horizontal refusals to deal have earned the *per se* label because experience has shown that these arrangements are almost always anticompetitive

---

[2] *See*, John J. Flynn, *Rethinking Sherman Act* Section 1 *Analysis: Three Proposals for Reducing the Chaos*, 49 ***Antitrust Law*** Journal 1593, 1613 (1980) ("From the history of Sherman Act litigation, it is apparent that reliance upon a presumption of illegality is likely to arise where the facts induce a conclusion that joint action is directly displacing the competitive process or some central goal of the competitive process. The more central the goal being displaced, (price competition as the mechanism for establishing price and allocating resources) the more likely a presumption of illegality and the more conclusive the presumption. The less clear the goals of antitrust policy involved or the more confused anticompetitive effects become with procompetitive effects as a result of the practice (vertical territorial restrains), the less conclusive the presumption allocating burdens of proof. Where no immediate impact on the goals of antitrust policy is perceived, no presumptions are created; and, a plaintiff must show under all the circumstances that there is a restraint which unreasonably displaces the competitive process as the rule of trade.")

and rarely have any procompetitive justification. The *per se* analysis applies because **[**18]** the conduct is so certain to unreasonably displace the competitive process that it is presumed illegal.

[19]** On the other hand, the Rule of Reason presumes that the conduct is legal, but the plaintiff may show that under all the relevant factors, the alleged conduct is illegal because it has unreasonably displaced the competitive process. The Rule of Reason applies unless the plaintiffs demonstrate that the conduct falls into one of the *per se* categories.

Plaintiffs contend that *per se* treatment is appropriate for conduct of the individual defendants because their conduct constitutes a concerted horizontal refusal to deal. The plaintiffs argue that all horizontal group boycotts are *per se* illegal and that this court need only find that a horizontal agreement existed among the individual defendants in order to condemn it as *per se* illegal. *See, Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)*.

Plaintiffs' proposition overstates the applicable legal rule. ***HN4***[] Recent cases decided by the United States Supreme Court caution against the expansion of the "group boycott label" and the imposition of *per se* liability. *F.T.C. v. Indiana Fed'n. of Dentists, 476 U.S. 447, 457-58, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* ("We have **[**20]** been slow . . . to extend *per se* analysis to restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious . . .."), *see also, State Oil Co. v. Khan, __ U.S. __, 139 L. Ed. 2d 199, 118 S. Ct. 275, 279 (1997)* (overruling *per se* analysis for vertical maximum price fixing and expressing reluctance to impose *per se* rule). The Supreme Court has explicitly stated that unless the conspirators possess "market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted." *Northwest Wholesale Stationers, 472 U.S. at 296*. Finally, the Supreme Court has noted that in determining whether the *per se* rule applies, courts may look beyond the challenged conduct to the surrounding circumstances: "There is often no bright line separating *per se* from Rule of Reason analysis. *Per se* rules may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct." *N.C.A.A. v. Bd. of Regents of Univ. of Okl., **[**21]** 468 U.S. 85, 104 n.26, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*.

The Eleventh Circuit recently addressed the applicability of the *per se* and Rule of Reason tests in a health care context and came to the following common sense rule:

> ***HN5***[] In sum, the *per se* rule requires a historically focused inquiry directed at ascertaining whether the behavior complained of is of the type that regularly poses anticompetitive consequences. Where prior cases have shown that a certain practice is of this type, a deleterious effect on the market will be presumed and no detailed market analysis is required. Where the anticompetitive effect of a practice is not historically clear, the practice may still be *per se* violative of antitrust laws if a preliminary examination of market conditions surrounding the alleged restraint at issue reveals such an impact absent any procompetitive justification.

Retina Assoc. v. So. Baptist Hosp. of Florida, 105 F.3d 1376, 1381 (11th Cir. 1997). In *Retina*, the plaintiff was a corporation of retinal ophthalmologists who alleged that the defendant hospital and individual ophthalmologists engaged in a concerted refusal to deal with the plaintiff. The defendants had formed a center **[**22]** for ophthalmological services with several non-specialized ophthalmologists, a few retina specialists, and a major local hospital. After the defendants had formed this center, the non-specialized ophthalmologists who had joined the center **[*1145]** discontinued referring their cases to the plaintiffs and instead referred them to the retina specialist located in the center. *Id. at 1379-80*. The plaintiffs argued that the situation merited *per se* treatment because the conduct was a horizontal group boycott. The Eleventh Circuit disagreed and found that the boycott alleged did not merit *per se* treatment because it was not the type of behavior that had been historically shown to adversely affect competition. *Id. at 1381*. The court found that it was not unusual for a multi-provider network such as the one formed by the defendants to affiliate with only one specialist group. Furthermore, the court found that the anticompetitive effect was not "immediately obvious." *Id. at 1382*. The court further noted that the anticompetitive effect of defendants' alleged refusal to refer patients to the plaintiffs was not fully understood and therefore should not be condemned out of hand by the **[**23]** *per se* rule. *Id.*

This court finds the recent pronouncements of the United States Supreme Court and the Eleventh Circuit's opinion instructive. This court is also faced with an allegation of a *per se* violation in circumstances that do not appear to reflect the concerns of *per se* treatment in traditional horizontal boycott cases. Although the present situation is different than the circumstances in *Retina*, the same reasoning applies. This court finds that *per se* treatment of any agreement between Dr. Matthews and the other individual defendants is inappropriate for three reasons: 1) The boycott alleged here is not the type that has been historically shown to always or almost always negatively affect competition; 2) a preliminary examination of market conditions does not reveal any anticompetitive impact; and 3) the defendants have offered procompetitive justifications for their actions.

1. The Historic *Per Se* Boycotts

A United States Supreme Court opinion frequently cited to explain and support a *per se* analysis for an alleged group boycott is *Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 3 L. Ed. 2d 741, 79 S. Ct. 705 (1959)*. In *Klor's*, **[**24]** the plaintiff San Francisco appliance store claimed that the defendant prohibited ten national appliance manufacturers and distributors from selling appliances to the plaintiff. The defendants did not deny or offer any justifications for their actions, but argued that there had been no effect on competition. *Id. at 209*. The district court granted summary judgment in favor of the defendants finding that the injury was not the "public wrong" that the antitrust laws had been enacted to protect. The Court of Appeals affirmed this decision. The Supreme Court found that the plaintiffs had alleged enough to maintain a cause of action under the antitrust laws because "group boycotts, or concerted refusals by traders to deal with other traders, have long been held to be in the forbidden category." *Id. at 212*. The Court found there were sufficient allegations in the complaint to support a boycott proscribed by the antitrust laws:

> This combination takes from Klor's its freedom to buy appliances in an open competitive market and drives it out of business as a dealer in the defendants' products. It deprives the manufacturers and distributors of their freedom to sell to Klor's at **[**25]** the same prices and conditions made available to Broadway-Hale and in some instances forbids them from selling to it on any terms whatsoever. It interferes with the natural flow of interstate commerce. It clearly has, by its "nature" and "character," a "monopolistic tendency."

Id. at 213. The Court found that the plaintiff was entitled to prove its case of conspiracy and remanded the case to the District Court for trial.

More recently, in a case relied on by the plaintiffs, the Court held that a group boycott fell into the *per se* category. In *F.T.C. v. Superior Court Trial Lawyers Assn., 493 U.S. 411, 107 L. Ed. 2d 851, 110 S. Ct. 768*, (1990), the Court found that the *per se* rule applied when the defendant organization staged a boycott for the purposes of raising the prices of court-appointed counsel for indigent defendants. The Court disregarded the defendant's claims that the boycott was justified because it was in the public's interest to obtain better legal representation. The Court held that the boycott had the anticompetitive **[*1146]** effect the antitrust laws were intended to protect against. *Id. at 424*. The Court described the situation:

> Prior **[**26]** to the boycott CJA lawyers were in competition with one another, each deciding independently whether and how often to offer to provide services to the District at CJA rates. The agreement among the CJA lawyers was designed to obtain higher prices for their services and was implemented by a concerted refusal to serve an important customer in the market for legal services, and indeed, the only customer in the market for the particular services that CJA regulars offered.

Id. at 422-423. The Court also found that the "undenied objective of their boycott was an economic advantage for those who agreed to participate." *Id. at 426*. The Court therefore found that despite the defendants' justifications, the boycott was "unquestionably a 'naked restraint' on price and output" and condemned it as *per se* illegal. *Id. at 423*.

HN6[] The boycott cases that have merited *per se* review in the past deal with markets that were open and competitive until the concerted action closed off part of the market. *Klor's, 359 U.S. at 213*. *See also, United States v. Topco Assoc., Inc., 405 U.S. 596, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)* (food cooperative divided markets among its **[**27]** members); *United States v. Gen. Motors, 384 U.S. 127, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1965)* (General Motors prohibited its dealers from selling through discounters); *Radiant Burners, Inc. v. Peoples Gas Light & Coke Co., 364 U.S. 656, 5 L. Ed. 2d 358, 81 S. Ct. 365 (1961)* (gas association refused to approve defendant's product resulting in inability to supply gas for product); *Silver v. New York Stock Exch., 373 U.S. 341, 10 L. Ed. 2d 389, 83 S. Ct. 1246 (1963)* (stock exchange refused to provide information access to nonmembers); *Associated Press v. United States Tribune, 326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 (1944)* (newspaper group denied information and membership to non-member newspapers). In other words, *per se* review was required when the defendants' joint action by its very nature unreasonably displaced the competitive process. The cases also demonstrate that *per se* analysis is appropriate when the boycott's only apparent purpose is to facilitate collusion. *F.T.C. v. Superior Court Trial Lawyers Assn., 493 U.S. 411, 107 L. Ed. 2d 851, 110 S. Ct. 768 (1990)*. On the other hand, the Supreme Court has refused to apply the *per se* rule in a **[**28]** wide variety of settings where the Court could not determine whether the action displaced the competitive process. *F.T.C. v. Indiana Fedn. of Dentists, 476 U.S. 447, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)* (dentists withheld x-rays from insurance companies); *Northwest Wholesale Stationers, Inc. v. Pacific Stationery & Printing Co., 472 U.S. 284, 86 L. Ed. 2d 202, 105 S. Ct. 2613 (1985)* (expulsion of member from cooperative buying arrangement); *N.C.A.A. v. Bd. of Regents of Univ. of Oklahoma, 468 U.S. 85 (1984)* (limiting number of televised college football games to NCAA members). *See also, All Care Nursing Service, Inc. v. High Tech Staffing Serv., Inc., 135 F.3d 740 (11th Cir. 1998)* (holding that preferred provider program was not *per se* illegal group boycott of non preferred agencies); *Betkurer v. Aultman Hosp. Ass'n., 78 F.3d 1079 (6th Cir. 1996)* (holding that decision of ob/gyn's to refer to plaintiff's neonatologist competitor did not merit *per se* review); *Balaklaw v. Lovell, 14 F.3d 793 (2d Cir. 1994)* (holding that exclusive contract between hospital and anesthesiologist group should not be considered *per se* illegal and confer standing on plaintiff); *BCB Anesthesia Care* ***[**29]*** *v. Passavant Mem'l. Hosp., 36 F.3d 664 (7th Cir. 1994)* (declining to apply *per se* rule to hospital staffing decision); *Bhan v. NME Hospitals, Inc., 929 F.2d 1404 (9th Cir. 1991)* (holding that agreement between physicians and hospital to allow only physicians to offer services in particular area was not *per se* violation).

The present situation is quite different from the Supreme Court cases meriting *per se* review. The structure of the anesthesia system at Cottonwood Hospital before 1994 as presented in the instant case is not the type of open or competitive market contemplated and sought to be protected by *per se* application of the Sherman Act. One staff anesthesiologist was scheduled for each 24 hour shift in the ob/gyn rotation. The anesthesiologist **[*1147]** on call was not chosen by the ob/gyn physicians or the ob/gyn patients. The only requirements for the anesthesiologist to be placed in the call rotation was that the anesthesiologist possess staff privileges at Cottonwood Hospital and be scheduled by the Anesthesiology Department's scheduler.

Such a system was not driven by price or consumer choice. Unlike the situation where a patient chooses an ob/gyn physician **[**30]** by shopping around for the best doctor, the ob/gyn doctor or patient had no realistic choice but to use the anesthesiologist on call when an obstetric case presented itself. [3] The ob/gyn doctor's lack of choice was limited by a number of logistic and economic factors. The ob/gyn must deliver babies or perform surgeries at a hospital, usually whenever the baby in question chooses to be delivered, and there was great pressure for a doctor practicing at the hospital to use the system in place. It would be logistically difficult for an ob/gyn to use the anesthesiologist of his or her choice every time the ob/gyn had a case come in or whenever the ob/gyn had some reservations about the anesthesiologist on call. Furthermore, it would likely be too expensive for ob/gyn patients to pay for the services of an anesthesiologist that would work solely for one ob/gyn doctor.

[31]** The "on call" system appears to have been established to address basic quality and staffing concerns. The hospital used the call system to make sure it approves of the doctors who perform anesthesia there through its privileging system. The call system also insures the availability of an anesthesiologist to assist the hospital's patients.

---

[3] Plaintiffs acknowledge that this was the situation: "Prior to February 1994, Cottonwood OBGYN had used whichever anesthesiologist was on the OB schedule." Plaintiffs' Memorandum in Opposition at xxvii, P 78.

The agreement between Dr. Matthews and Cottonwood Ob/Gyn changed the call system somewhat, giving certain ob/gyn physicians a choice of anesthesiologist. The agreement allowed the Cottonwood Ob/Gyn physicians to designate which anesthesiologists they desired to work with. In this respect, the agreement may not have disrupted, but rather supplemented, the call system, as well as competition. No anesthesiologist lost a position on the call roster. The agreement also overcame the logistic and economic problems that prevented ob/gyn physicians from arranging for their own anesthesiologists. The agreement simply designated an agent who would organize the anesthesiologists of choice to cover all shifts. Finally, the agreement maintained the quality assurances built in by the privileging process.

The agreement between Dr. Matthews and Cottonwood Ob/Gyn **[**32]** is unlike any where boycotts have traditionally been accorded *per se* treatment. The call system is entirely different from appliance distributors who sell to a national market, or a defense attorney program that can hire any licensed attorney in the District of Columbia. In the cases that have merited *per se* treatment, the consumer or distributor had a great deal of choice on where to buy or with whom to distribute until the horizontal agreement among the defendants in those cases prevented or severely hampered that choice. In those cases, the defendants' joint action more clearly unreasonably displaced the competitive process. The Matthews' agreement is also unlike the cases where boycotts were accorded *per se* treatment because the agreement did not serve to increase the price of the anesthesiologist's services.

Furthermore, this case deals with a call system that appears to be common throughout the health care industry. The unique nature of the call system and the relative inexperience [4] of the courts in understanding and regulating internal hospital scheduling practices make it wholly inappropriate to justify condemning one type of scheduling practice as *per se* **[**33]** violative of the Sherman Act. ***HN7***[] The United States Supreme Court has cautioned that "It is only after considerable experience with certain business relationships that courts classify them as *per se* violations." *Broadcast Music, Inc. v. Columbia Broad Sys., Inc., 441 U.S. 1, 9,* ***[*1148]*** *60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. It may be that this type of scheduling practice actually involved a combination or concerted action by the defendants and that it is anticompetitive, but such a conclusion should only be reached after an analysis of all relevant factors under the Rule of Reason. In sum, defendants' alleged practice is not the type that regularly poses anticompetitive consequences. Consequently, *per se* analysis is not appropriate.

2. A Preliminary Examination of the Market

[34]** The court's inquiry does not end with the historical analysis. Other factors may require *per se* review. ***HN8***[] The Supreme Court has stated that *per se* treatment may be merited where the plaintiffs have shown that the defendants hold "market power or unique access to a business element necessary for effective competition." *Northwest Wholesale Stationers, 472 U.S. at 298*. As the Eleventh Circuit noted, "the practice may still be *per se* violative of antitrust laws if a preliminary examination of market conditions surrounding the alleged restraint at issue reveals such an impact absent any procompetitive justification." *Retina Assoc., 105 F.3d at 1381*. While not mandated, a preliminary examination of market conditions is acceptable under a *per se* analysis. *See, N.C.A.A. v. Bd. of Regents of Univ. of Okl., 468 U.S. 85, 104 n.26 (1984)* ("There is often no bright line separating *per se* from Rule of Reason analysis. *Per se* rules may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct.")

In this case, the plaintiffs have not alleged market power on the part of the defendants. Indeed, the plaintiffs **[**35]** have not defined any relevant market. Accordingly, the court has no basis on which to determine the size of Cottonwood Ob/Gyn's and Old Farm Ob/Gyn's practices at Cottonwood Hospital compared to other ob/gyn groups or how significantly the agreement between Dr. Matthews and Cottonwood Ob/Gyn and Old Farm Ob/Gyn affects the plaintiffs' or other anesthesiologists' ability to practice ob/gyn anesthesia at Cottonwood Hospital or any other relevant geographic market.

[4] This court could only find one case that addressed on call scheduling in an antitrust context. The district court there applied the Rule of Reason. *Anesthesia Advantage, Inc. v. The Metz Group, 759 F. Supp. 638 (D. Colo. 1991)*.

In this connection, the plaintiffs also fail to allege or demonstrate that the defendants hold unique access to a business element necessary for effective competition. Again there is no evidence as to the relative size of Cottonwood Ob/Gyn's and Old Farm Ob/Gyn's practices at Cottonwood Hospital, the percentage of plaintiffs' anesthesiology work performed at Cottonwood Hospital, or any of the other factors relative to market power or unique access.

Because the plaintiffs have failed to show the defendants hold market power or unique access to a business element necessary for effective competition, plaintiffs' claim does not merit *per se* review based on market conditions.

3. Defendants' Procompetitive Justifications

[36]** Even if the plaintiffs had presented evidence to meet the threshold showing necessary for *per se* treatment, the defendants offer several procompetitive justifications for the agreement. The first is that the agreement actually enhances competition by creating a choice for the purchaser of anesthesia services. The agreement enables the patient or ob/gyn doctor performing a procedure to choose which anesthesiologist he or she will use rather than requiring the doctor to use whichever anesthesiologist happens to be on call.

The second justification offered by the defendants is the unique nature of the health care industry. While the health care industry is not awarded any special treatment under the antitrust laws, the nature of the industry is a consideration in determining whether a *per se* violation has occurred. As discussed previously in Section II.A.1, the unique nature of this industry is a persuasive factor for applying the Rule of Reason.

The third justification the defendants offer is that they were legitimately concerned about the level of the plaintiffs ob/gyn anesthesia skills. The defendants cite several cases that acknowledge that excluding doctors on the basis **[**37]** of professional competence does not violate the antitrust laws. Defendant **[*1149]** Matthews' Memorandum in Support of Summary Judgment at 17. [5] Although most of the cases the defendants cite discuss the peer review process, a procedure not at issue in this case, the reasoning carries some weight in this context. Plaintiffs vigorously dispute that defendants are concerned about the plaintiffs' professional competency. Plaintiffs contend that defendants only seek to protect their clientele bases. This court cannot determine which desire primarily motivated the agreement between Matthews and Cottonwood Ob/Gyn. However, this court is not prepared to hold that it is a *per se* violation of the antitrust laws when ob/gyn physicians allegedly decline to work with certain anesthesiologists based at least in part on professional competency issues. The issue of professional competency is yet another factor that a jury should be allowed to hear in deciding whether the agreement was primarily motivated by anticompetitive illegal intent or legitimate concerns.

[38]** B. The Plaintiff's Argument

The plaintiffs contend that Tenth Circuit law as expressed in *Tarabishi v. McAlester Hospital, 951 F.2d 1558 (10th Cir. 1991)*, mandates the application of a *per se* analysis. [6] In *Tarabishi*, the plaintiff was an ear, nose and throat physician who practiced at the defendant hospital. The plaintiff left the hospital's clinic to start his own practice, but retained privileges at the hospital. After the plaintiff had established a successful practice, the plaintiff began planning an outpatient surgical clinic. *Id. at 1561*. At first, the hospital did not have a response to plaintiff's plans.

---

[5] The defendants cite to the following cases: *Tarabishi v. McAlester Reg. Hosp., 951 F.2d 1558, 1570 n.18 (10th Cir. 1991)*; *Weiss v. York Hosp., 745 F.2d 786, n.60 (3rd Cir. 1984)*; *Cogan v. Harford Memorial Hosp., 843 F. Supp. 1013, 1019 (D.Md. 1994)*; *Pontius v. Children's Hosp., 552 F. Supp. 1352, 1369-70 (W.D. Pa. 1982)*.

[6] The plaintiffs also cite *Brown v. Presbyterian Healthcare Services, 101 F.3d 1324 (10th Cir. 1996)*, and *Coffey v. HealthTrust, 955 F.2d 1388 (10th Cir. 1992)* as requiring a *per se* analysis. However, these two cases are largely irrelevant, and generally unhelpful, to the issue before the court. *Brown* does not discuss whether the court applied the *per se* or Rule of Reason analysis. *Coffey* is limited to the issue of conspiracy or combined action.

After a short time, however, the hospital decided to build its own outpatient surgical center and it began opposing the plaintiff's efforts to build his center. During this same time frame, the hospital initiated an investigation into alleged improper and inappropriate behavior by the plaintiff. This investigation resulted in the hospital's revoking the plaintiff's surgical and emergency room privileges. *Id. at 1562*.

[39]** Both outpatient centers eventually opened, but the plaintiff's center folded within a year. The plaintiff argued that the hospital's revocation of his privileges made it impossible for his clinic to be successful because he needed to have access to the hospital's emergency care facilities. The hospital contended that the center failed because the economic structure of the clinic was flawed from the beginning. *Id. 951 F.2d at 1562-63*.

The plaintiff sued the hospital, charging, among other things, that the defendants had conspired to boycott him and to stabilize prices. The plaintiff argued that *per se* analysis should apply, but the district court found the Rule of Reason was more appropriate. The Tenth Circuit upheld the district court's determination, stating: "Denying staff privileges to a physician through peer review on the basis that the physician's conduct is unprofessional and inappropriate is not an activity 'likely to have predominately anticompetitive effects' such that *per se* treatment is necessary." *Id. at 1571*. The plaintiffs contend *Tarabishi* stands for the proposition that "the Tenth Circuit in effect held conversely, that in the absence of a lack of professional **[**40]** competence or unprofessional conduct, the defendants' actions conduct would be judged by a *per se* analysis." Plaintiffs' Memorandum in Opposition to Summary Judgment at 5.

While it may be true that the defendants' alleged concern about the quality of the plaintiffs' anesthesiology services did not involve peer review proceedings, their concerns at least appear to raise genuine issues of material fact that are relevant to a full rule of reason analysis. Furthermore, while **[*1150]** plaintiffs make much of the fact that they have not been the subject of any official disciplinary proceedings, they fail to acknowledge that their ability to practice anesthesia, and even ob/gyn anesthesia, has not been hampered by the defendants' actions except with regard to the patients of two groups of ob/gyn practitioners at one local hospital. The plaintiffs may still be scheduled on the labor and delivery rotation and in other areas of the hospital their privileges have not been limited. This court is aware of no provision in the antitrust laws of this country that mandates on-call rotations at a given hospital for anesthesiologists, without first subjecting such an inquiry to a Rule of Reason analysis.

[41]** Based on the historical inquiry, the limited review of the market and surrounding circumstances, and the applicable case law, this court finds that the defendants' joint action should be reviewed under the Rule of Reason. Because the plaintiffs have conceded that they cannot support their case under the Rule of Reason, the plaintiffs' Sherman Antitrust Act claim is dismissed against defendants Matthews, Farley, and Abele. The Utah Antitrust claims are also dismissed for the same reasons because the Utah Antitrust statute follows the same analysis as the federal statute.

III. The Defamation and Tortious Interference with Economic Relations Claims

Defendants also move for summary judgment on plaintiffs' defamation and tortious interference with economic relations claims. ***HN9***[] Under *28 U.S.C. § 1367(c)(3)* this court may decline to exercise supplemental jurisdiction when it has "dismissed all claims over which it has original jurisdiction." The court has dismissed all of plaintiffs' claims over which it has original jurisdiction by dismissing plaintiffs' Sherman Act claims. The only remaining claims are plaintiffs' pendent state law defamation and tortious interference with economic relations **[**42]** claims. Because these claims deal solely with state law, they are better left to the jurisdiction of the state courts. Therefore, the court declines to exercise supplemental jurisdiction over these claims. These claims are dismissed without prejudice.

IV. Summary and Conclusion

For the reasons set forth, this court finds that the Rule of Reason must be applied to defendants' alleged agreement. Because the plaintiffs have conceded that their claim fails under the Rule of Reason, plaintiffs first and second causes of action are DISMISSED with prejudice and Defendants' motion for summary judgment is GRANTED on plaintiffs' first and second claims. Because this court declines to exercise supplemental jurisdiction over the defamation and tortious interference with economic relations claims, the defendants' motion for summary judgment with respect to those claims is DENIED and those claims are DISMISSED without prejudice.

DATED this 16th day of July, 1998.

BY THE COURT:

Dee Benson

United States District Judge

Caribbean Broad. Sys., v. Cable & Wireless PLC

United States Court of Appeals for the District of Columbia Circuit

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Defenses, Demurrers & Objections, Defects of Form**

Under *Fed. R. Civ. P. 8*, all that is required is a short and plain statement of the claim that will give the defendant fair notice of the plaintiff's claim and the grounds upon which it rests. A complaint satisfies this criterion if it is not so vague or ambiguous that a party cannot reasonably be expected to frame a responsive pleading. *Fed. R. Civ. P. 12(e)*. In other words, a plaintiff need not allege all the facts necessary to prove its claim so long as it provides enough factual information to make clear the substance of that claim.

Civil Procedure > Appeals > Dismissal of Appeals > Involuntary Dismissals

HN4[] **Motions to Dismiss, Failure to State Claim**

Because a plaintiff is not required to plead facts sufficient to prove its allegations, a federal court should not dismiss a complaint either for lack of subject matter jurisdiction or for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. After all, the issue presented by a motion to dismiss is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Sherman Act, Claims**

A would-be monopolist or member of a conspiracy to monopolize comes within the condemnation of the Sherman Act, specifically *15 U.S.C.S. §§ 1-2*, when it engages in anticompetitive conduct. Anticompetitive conduct can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN6[] **Monopolies & Monopolization, Attempts to Monopolize**

A monopolist has no general duty to share his essential facility, although there are certain circumstances in which he must do so. In the special circumstances where there may be such an obligation, the elements of an antitrust claim for denial of access to an essential facility are (1) a monopolist who competes with the plaintiff controls an essential facility, (2) the plaintiff cannot duplicate that facility, (3) the monopolist denied the plaintiffs use of the facility, and (4) the monopolist could feasibly have granted the plaintiff use of the facility.

Mergers & Acquisitions Law > Merger Guidelines

HN7[] **Mergers & Acquisitions Law, Merger Guidelines**

One company's minority ownership interest in another company is not sufficient by itself to make the owner a competitor, for purposes of the antitrust laws, of the subsidiary's rivals. To be a competitor at the level of the subsidiary, the parent must have substantial control over the affairs and policies of the subsidiary.

Opinion by: GINSBURG

Opinion

[*1082] GINSBURG, *Circuit Judge*: Caribbean Broadcasting System appeals the judgment of the district court dismissing its antitrust complaint against Cable & Wireless, Cable & Wireless (West Indies), and Caribbean Communications Company. We reverse in part and affirm in part.

I. Background

Plaintiff CBS and defendant CCC own competing FM radio stations located in the Eastern Caribbean, which includes Puerto Rico and the Virgin Islands. Defendant C&W and its subsidiary C&W (West Indies), hereinafter jointly C&W, operate a worldwide telecommunications system and publish **[**2]** the local telephone directory in the Caribbean. During the mid-1980s C&W and CCC entered into a joint venture in which CCC was to develop a Caribbean-wide FM broadcasting system that C&W would then use to offer an FM paging service.

Beginning in 1984 CBS tried without success to sell advertising on its nascent FM broadcast station based in the British Virgin Islands. Attributing its failure to deception practiced by CCC and C&W as part of an attempt to gain and keep a monopoly for CCC's "Radio GEM," CBS sued them both in Florida state court. The defendants removed the case to a federal court, which dismissed it without prejudice; CBS appealed to the Eleventh Circuit, but later voluntarily dismissed the appeal and refiled its complaint in the United States District Court for the District of Columbia. CBS later sought and was granted leave to file a First Amended Complaint in order to correct a technical error in its description of the ownership of CBS.

The eleven counts of CBS's complaint fall into three basic categories. First, it charged that CCC, by falsely claiming that Radio GEM's signal reached the entire Eastern Caribbean, had led advertisers to believe they could fulfill their **[**3]** advertising needs by dealing only with Radio GEM, in violation of the prohibition of attempted and actual monopolization in the Sherman Act, *see* *15 U.S.C. §§ 1-2*, and the prohibition of false representations in the Lanham Act, *see* *15 U.S.C. § 1125(a)*. Second, CBS charged that CCC had conspired with C&W to maintain CCC's monopoly over radio broadcast in the Eastern Caribbean, in violation of the Sherman Act. In furtherance of the conspiracy (still according to CBS), C&W had filed sham objections to CBS's application for a broadcast license, thereby delaying CBS's entry into broadcasting for more than two years. Third, CBS charged that C&W had violated the Sherman Act by denying it access to essential facilities; specifically, CBS alleged that C&W had persistently published an incorrect telephone listing for CBS and denied CBS access to its microwave transmitters in order to prevent CBS from reaching the entire Eastern Caribbean.

[*1083] The district court dismissed the complaint in two stages. In its first opinion, dealing only with the claims against C&W, the court held that (1) it lacked subject matter jurisdiction over **[**4]** the claims of monopolization (in counts II-X) because "plaintiffs [did] not allege[] necessary facts to substantiate a claim of adverse effect on U.S. commerce arising out of Defendants' alleged misconduct"; and (2) CBS failed (in Count XI) to state a claim upon which relief could be granted because it did not "allege sufficient facts to establish that Defendants denied [CBS] use of an essential facility." *See* *Caribbean Broadcast System Ltd. v. Cable & Wireless Plc, 1995 U.S. Dist. LEXIS 19225, 1995 WL 767164 (D.D.C. 1995)*. The court explained that the complaint "never identifies any facility to which CBS was denied access nor a single instance in which access to a facility was actually requested or denied," and fails to establish that C&W had ever been a competitor of CBS. CBS sought reconsideration or, in the alternative, leave to file a second amended complaint. The district court denied reconsideration, clarified that its dismissal of Counts II-XI was with prejudice, and denied as both "untimely" and "futile" CBS's request to file a second amended complaint.

In its second opinion the district court dismissed the Lanham Act claim (in Count I) for lack of **[**5]** personal jurisdiction over CCC. The court stated that because CBS

> fails to allege any connection whatsoever between CCC and the District of Columbia.... [it appears that] CCC does not possess sufficient, minimum contacts with [the District] to satisfy the due process requirements of the Constitution and comport with 'traditional notions of fair play and substantial justice.'

Caribbean Broadcast System v. Cable and Wireless PLC, C.A. No. 93-2050, slip op. at 4-5 (D.D.C. Oct. 17, 1996). The district court also denied CBS's request for jurisdictional discovery, for three reasons: CBS had "not offered a scintilla of evidence to suggest that CCC has even the slightest connection with the District of Columbia"; CBS "well knew that CCC has contacts with, and therefore could appropriately be sued in ... Wisconsin or the Virgin Islands"; and "it is simply too late ... in the history of this litigation ... to now allow Plaintiff to conduct the investigation."

CBS now argues that the district court erred in dismissing its complaint for lack of subject matter jurisdiction and failure to state a claim, in denying jurisdictional discovery against CCC, and in dismissing its **[**6]** Lanham Act claim against CCC with, rather than without, prejudice.

II. Discussion

We hold first that the district court erred in denying CBS leave to file its proposed Second Amended Complaint, which properly alleged subject matter jurisdiction over the claims of monopolization. We agree with the district court, however, that CBS's complaint failed to allege that CCC and C&W had denied CBS the use of an essential facility. Finally, we hold that the district court did not abuse its discretion in denying jurisdictional discovery and did not dismiss the complaint against CCC with prejudice.

A. Denial of Leave to Amend the Complaint

As noted, the district court early on granted CBS leave to file a First Amended Complaint correcting the description of CBS's ownership. After the district court dismissed Counts II-XI for lack of subject matter jurisdiction, CBS sought to make a *second amendment*--in order to clarify the jurisdictional allegations in its complaint--but the district court denied leave to amend on the grounds that such an amendment would be both untimely and futile. CBS contests both points. For its part, C&W argues that the district court ruled correctly because **[**7]** CBS had already failed "in five attempts encompassing this case and others" to file a proper complaint.

HN1[] *Federal Rule of Civil Procedure 15(a)* provides that a party may amend its pleading once as a matter of course and thereafter by leave of court, which "leave shall be freely given when justice so requires." We have recently had occasion to point out that "it is an abuse of discretion to deny leave to amend [without giving a] sufficient reason." *Firestone v. Firestone, 316 U.S. App. D.C. 152, 76 F.3d 1205, 1208 (1996)* **[*1084]** (citing *Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962))*; *see also* *Bank v. Pitt, 928 F.2d 1108, 1112 (11th Cir. 1991)* (noting that district court's discretion to dismiss without leave to amend is "severely restricted" by command of *Rule 15(a)* that such leave be "freely given"). In this case we conclude that neither of the reasons given by the district court is sufficient.

First, the amendment would not have been "futile" because, as explained below, the allegations of the second amended complaint support subject matter jurisdiction. Second, there is no indication that the amendment **[**8]** was in any cognizable way "untimely." The statute of limitations had not run, nor was there any prejudice to the defendants by reason of the timing. *See, e.g., Confederate* *Memorial Ass'n v. Hines, 301 U.S. App. D.C. 395, 995 F.2d 295, 299 (D.C. Cir. 1993)* (noting that *Fed.R.Civ.P. 15(a)* gives court power to grant leave to amend complaint even after case is dismissed); Wright & Miller, Federal Practice & Procedure: Civil 2d § 1488, at 652, 659, 662-69 (1990 & Supp. 1997) ("*Rule 15(a)* does not prescribe any time limit within which a party may apply to the court for leave to amend?. In most cases delay alone is not a sufficient reason for denying leave…. If no prejudice [to the non-moving party] is found, the amendment will be allowed").

C&W makes much of the district court's statement that it was denying CBS leave to amend in view of the "entire lengthy record herein," but C&W's argument is not entirely clear. C&W could be arguing that the district court's mention of having considered the "entire lengthy record" indicates that the court, in concluding that amendment would be both untimely and futile, relied in part upon the overall history of the dispute, **[**9]** including the case CBS had previously initiated in Florida. Whether the court meant to encompass that history within the reason for its decision is not clear, however; the "lengthy record" in question may well refer only to the present litigation, which alone had been going on for more than three years at the time. In either event, the district court erred; the prolonged nature of a case does not itself affect whether the plaintiff may amend its complaint. *See, e.g.,* *Security Ins. Co. of Hartford v. Kevin Tucker & Assoc., Inc., 64 F.3d 1001 (6th Cir. 1995)* (holding district court abused discretion in denying leave to amend complaint to add claim when party opposing motion made no showing of prejudice from delay); *Buder v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 644 F.2d 690 (8th Cir. 1981)* (holding district court abused discretion in denying leave to amend complaint to add count when no prejudice resulted from two and one-half year delay and facts underlying new and old counts were similar). The length of a litigation is relevant only insofar as it suggests either bad faith on the part of the moving party or potential prejudice to the non-moving **[**10]** party should an amendment be allowed, *see* Wright & Miller, § 1487 (1990 & Supp. 1997); here the district court never intimated a concern either with bad faith or with prejudice.

Alternatively, C&W might be arguing that the district court's reference to the "entire lengthy record" is an allusion to our suggestion in *Firestone,* following *Foman, 371 U.S. at 182*, that a plaintiff's failure to cure a defect in its complaint after repeated amendments is at some point sufficient to warrant denying it leave to amend yet again. But we will not infer such an acute point from such an oblique reference--if it is a reference at all--particularly in light of the policy in favor of hearing cases on their merits. *See, e.g., Poloron Prods., Inc. v. Lybrand Ross Bros. & Montgomery, 72 F.R.D. 556, 561 (S.D.N.Y. 1976)* (holding plaintiff's five previous attempts to state cognizable claim did not preclude amendment, because Federal Rules suggest "artless drafting of a complaint should not allow for the artful dodging of a claim"); *Rosen v. TRW, Inc., 979 F.2d 191, 194 (11th Cir. 1992)* (citing doctrine that "leave to amend is particularly appropriate **[**11]** following dismissal of a complaint for failure to state a claim"); *see also Conley v. Gibson, 355 U.S. 41, 48, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)* ("The Federal Rules … accept the principle that the purpose of pleading is to facilitate a proper decision on the merits").

[*1085] Because the reasons given by the district court did not justify denying the plaintiff leave to amend its complaint, we reverse the district court. To remand this case for the district court to consider the Second Amended Complaint would be a waste of judicial resources, however. In deciding that to amend the complaint would be futile, the district court acted in the belief that the fault it found with the First Amended Complaint--namely, that it did not allege an adverse effect upon the commerce of the United States sufficient to support subject matter jurisdiction over Counts II-XI [see JA at 129-131]--was not addressed by anything in the Second Amended Complaint, which more clearly alleged an effect upon U.S. commerce. In effect, then, the district court has already expressed its view that the Second Amended Complaint fails to show that it has subject matter jurisdiction (although **[**12]** it erred in so doing, as the next section explains).

B. Subject Matter Jurisdiction over Counts II-XI

With the Second Amended Complaint before us, then, we turn to CBS's argument that it made allegations sufficient to support subject matter jurisdiction. C&W argues in response that the complaint does not adequately allege either a harmful effect upon U.S. commerce or a relevant market, and that in any event it does not provide facts to support the allegations made. In our review of the complaint, which is *de novo,* we assume the truth of the allegations made and construe them favorably to the plaintiff. *See Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*.

CBS asserts that the district court has jurisdiction under the Sherman Act, *see* 15 U.S.C. § 1-2, and the Foreign Trade Antitrust Improvements Act of 1982, *see 15 U.S.C. § 6a*. Although the Sherman Act prohibits monopolization and attempted monopolization of any line of interstate or foreign commerce, ***HN2***[] *section 1* of the FTAIA makes the Sherman Act inapplicable to

> conduct involving trade or commerce (other than **[**13]** import trade or import commerce) with foreign nations unless--
> (1) such conduct has a direct, substantial, and reasonably foreseeable effect--
> > (A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or
> > (B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States.

15 U.S.C. § 6a. A proviso establishes that if the FTAIA applies to conduct involving foreign trade based solely upon clause (B) quoted above, then the offender is subject to the Sherman Act "only for injury to export business in the United States." *Id.*

When a plaintiff brings a claim of attempted monopolization or conspiracy to monopolize in a market involving foreign trade, therefore, a court has subject matter jurisdiction only to the extent that the complaint alleges that the challenged conduct had a " 'direct, substantial, and reasonably foreseeable effect' on domestic or import commerce, or the export opportunities of a domestic person" (as required by the FTAIA). H.R. Rep. No. 97-686, at 3 (1982). The precise effect **[**14]** of the FTAIA is yet to be determined. See *Hartford Fire Insurance Co. v. California, 509 U.S. 764, 797* & n.23, *125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* (It is "unclear … whether the [FTAIA's] 'direct, substantial, and reasonably foreseeable effect' standard amends … or merely codifies … [caselaw holding that the Sherman Act] applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States"). It does seem clear, however, that we should use the standard set forth in the FTAIA to analyze whether conduct related to international trade has had an effect of the nature and magnitude necessary to provide us with subject matter jurisdiction. *See* H.R. Rep. No. 97-686, at 5. The complaint meets this standard.

For convenience we discuss first C&W's argument that CBS failed to allege specific facts to support the court's jurisdiction over CBS's claims. In the notice pleading system established by ***HN3***[] *Federal Rule of **[*1086]** Civil Procedure 8*, all that is required is a " 'short and plain statement of the claim' that will give the defendant fair notice of the plaintiff's claim and the grounds upon which it rests. **[**15]** " *Sinclair v. Kleindienst, 229 U.S. App. D.C. 13, 711 F.2d 291, 293 (D.C. Cir. 1983)*. A complaint satisfies this criterion if it is not "so vague or ambiguous that a party cannot reasonably be expected to frame a responsive pleading." *F.R.Civ.P. 12(e)*. In other words, a plaintiff need not allege all the facts necessary to prove its claim so long as it provides enough factual information to make clear the substance of that claim. *See* *Atchinson v. District of Columbia, 315 U.S. App. D.C. 318, 73 F.3d 418, 421-22 (1996)*.

HN4[] Because a plaintiff is not required to plead facts sufficient to prove its allegations, a federal court should not dismiss a complaint either for lack of subject matter jurisdiction or for failure to state a claim "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Kleindienst, 711 F.2d at 293* (quoting *Conley v. Gibson, 355 U.S. at 45-46*). After all, the issue presented by a motion to dismiss is "not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims. **[**16]** " *Scheuer v. Rhodes, 416 U.S. at 236*.

The complaint filed by CBS is sufficient to survive a motion to dismiss, therefore, so long as it makes allegations that, if proven, would show that the challenged conduct had a "direct, substantial, and reasonably foreseeable effect" upon an aspect of commerce to which the Sherman Act, as qualified by the FTAIA, applies. The complaint does make such allegations. First, CBS alleges (PP 9-14) that there is a significant market for the sale of English-language radio advertising in the Eastern Caribbean, which includes Puerto Rico and the U.S. Virgin Islands. CBS also alleges (PP 9, 15-19, 48A) that many companies based in the United States are customers, and that CCC and CBS are competing sellers, in that market. Finally, CBS alleges (PP 20-26) that there are substantial barriers to entry into the market: both a broadcast license and a large capital investment are necessary; in addition, CCC has "locked up" the available advertising contracts. Under the circumstances it is quite plausible that the plaintiffs' alleged conduct would have a significant effect upon U.S. commerce.

CCC argues that because CBS is "merely [a] foreign **[**17]** supplier[]" it cannot establish the court's jurisdiction by " 'piggy-backing' on the alleged injury to U.S. purchasers of media advertising." CCC relies upon a district court holding that a foreign company had to show injury within the United States before the court would have subject matter jurisdiction under the Sherman Act, and that such a company could not do so merely by showing injury to an unrelated American firm. *See The 'In'* *Porters, S.A. v. Hanes Printables, Inc., 663 F. Supp. 494 (M.D.N.C. 1987)*. Even if we were bound by that court's holding, we would not think the case pertinent here because the foreign firm in that case did not sell to American consumers; rather, it attempted to show that the injury it incurred abroad ultimately injured American exporters, from which it purchased fewer goods for resale overseas. The district court held that, because the plaintiff's claimed injury was not an "injury to export business in the United States" within the meaning of the proviso to the FTAIA, the foreign firm did not have standing. Here, however, the alleged injury is to advertisers in the United States. Consequently, clause 1(A) rather than clause **[**18]** 1(B) of the FTAIA governs, and the location of the suppliers is not relevant to whether the plaintiff has alleged an effect upon U.S. domestic or import commerce. *See* Hartford, 509 U.S. at 796 (holding court had subject matter jurisdiction where plaintiff alleged conspiracy among foreign reinsurance companies had affected U.S. purchasers of reinsurance).

We now turn to C&W's primary argument, namely, that the complaint fails to allege either harm to U.S. commerce or a relevant market. We find neither part of this argument persuasive. The complaint both describes a relevant market--the market for English-language radio broadcast advertising in the Eastern Caribbean--and alleges that CCC and C&W engaged in intentional conduct that gave them "monopoly **[*1087]** power" and injured consumers in this market. (PP 12-14) According to CBS, CCC and C&W misrepresented to advertisers that they could reach the "entire Caribbean" over CCC's station--which in fact reached only a fraction of that area--and therefore that they did not need to advertise with CBS as well. (PP 30-34) The complaint also alleges that CCC and C&W made sham technical objections to CBS's application for **[**19]** a broadcast license for the purpose of defeating that application and thereby ensuring that CCC would continue to enjoy a monopoly. (PP 35-40)

Contrary to the arguments of C&W, such allegations do support the district court's subject matter jurisdiction. ***HN5***[] A would-be monopolist or member of a conspiracy to monopolize comes within the condemnation of the Sherman Act when it engages in "anticompetitive conduct." *See, e.g.,* *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)* (holding elements of attempted monopolization claim under § 2 of Sherman Act are intent, anticompetitive conduct, and dangerous probability of success in a relevant market). "Anticompetitive conduct" can come in too many different forms, and is too dependent upon context, for any court or commentator ever to have enumerated all the varieties. It is a fair inference from the case law, however, that the allegations made here--namely, that the defendants made fraudulent misrepresentations to advertisers and sham objections to a government licensing agency in order to protect their monopoly--bring the defendants' conduct well within that concept. *See,* **[**20]** *e.g.,* *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)* (holding that complaint alleging conspiracy to misuse state legal and regulatory processes in order to deprive competitors of meaningful access stated claim under Clayton Act); *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 15 L. Ed. 2d 247, 86 S. Ct. 347*, (1965) (holding that complaint alleging defendant attempted to monopolize by threatening to and pursuing legal enforcement of patent procured by fraud on Patent Office stated claim under § 2 of Sherman Act).

Moreover, the complaint alleges specifically that U.S. customers in the relevant market suffered antitrust injury, to wit, they paid excessive prices for advertising because of the unlawful actions of CCC and C&W. (P 48A) It also alleges that CBS was and remains foreclosed from selling advertising to many of those U.S. companies that had purchased advertising time from CCC. (P 47)

Paying higher prices is certainly a direct harm to customers. The allegations that CBS was delayed in obtaining its broadcast license and was foreclosed from soliciting **[**21]** many potential advertisers also describe actual, albeit indirect, harms to customers. In this context it appears that antitrust injury to CBS is ultimately a harm to U.S. purchasers of radio advertising. By keeping CBS out of the market, CCC and C&W denied such purchasers the benefit of competition.

Construing the complaint liberally, then, we understand it to say that CCC and C&W intentionally and successfully, by means of fraud and deceit, secured monopoly power in the relevant market, used this power to raise prices, and thereby hurt U.S. advertisers. Indeed, C&W virtually admits that CBS's complaint alleges antitrust injury when it argues that "CBS described markets so narrowly configured that any commercial harm to CBS [is], *ipso facto,* harm to competition" in those markets and hence has a substantial effect upon U.S. commerce. Be that as it may, we hold that CBS made sufficient allegations to support the subject matter jurisdiction of the district court.

C. The Essential Facilities Claim: Count XI

C&W owned microwave facilities described by CBS as "unique" in the Eastern Caribbean (P 42) and published the only telephone directory in the British Virgin Islands. **[**22]** (P 41) C&W also owned a 27% stake in CCC's radio station and was planning a joint venture with CCC to provide paging services. CBS alleged that C & W denied CBS access to its microwave facilities and directory, and that both such facilities were essential for it to compete with CCC's Radio GEM.

[*1088] ***HN6***[] A monopolist has no general duty to share his essential facility, although there are certain circumstances in which he must do so. *See* Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** 815-864 (1992 Supp.) (proposing narrow interpretation of essential facilities doctrine). In the special circumstances where there may be such an obligation, the elements of an antitrust claim for denial of access to an essential facility are (1) a monopolist who competes with the plaintiff controls an essential facility, (2) the plaintiff cannot duplicate that facility, (3) the monopolist denied the plaintiffs use of the facility, and (4) the monopolist could feasibly have granted the plaintiff use of the facility. *See* *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1132-33 (7th Cir. 1983)*; Philip Areeda, *Essential Facilities: An Epithet in Need of Limiting Principles,* **[**23]** 58 Antitrust L.J. 841, 853 n.21 (1989) (noting that "*MCI Communications* … is probably correct [in holding that] a monopolist must, when feasible, make its essential facility available to a competitor who is unable to duplicate it"). Because the appellees have not argued to the contrary, we assume that the essential facilities doctrine is applicable to their circumstances.

The district court held that CBS had failed adequately to allege an essential facilities claim for two reasons: first, CBS did not allege that it competed with C&W, and second, CBS did not allege any specific instance in which C&W had denied CBS access to a particular facility. We uphold the district court on the former ground and therefore do not reach the latter.

CCC does not dispute that it competed with CBS, but because--as the district court held and we affirm--the court does not have personal jurisdiction over CCC, *see* Part II.D below, the allegations against that company cannot support the essential facilities claim. As for C&W, the district court held that its 27% ownership interest in CCC did not make C&W itself a competitor of CBS. CBS argues that whether the parties are "in **[**24]** fact" competitors should not have been resolved on a motion to dismiss the complaint, which "alleged that C&W acted for the benefit of CCC in denying plaintiffs access to their microwave and long-distance facilities." According to CBS, "C&W's equity interest in CCC and its corresponding financial stake in the exclusive provision of broadcasting services by CCC …. raise a factual issue as to whether C&W and plaintiffs [are] competitors." C&W counters that CBS alleges no facts even hinting that C&W might itself be a competitor of CBS except for C&W's 27% investment in CCC, and that as a matter of law such an investment alone cannot vicariously make C&W a competitor of CBS's.

As the district court recognized, ***HN7***[] one company's minority ownership interest in another company is not sufficient by itself to make the owner a competitor, for purposes of the antitrust laws, of the subsidiary's rivals. To be a competitor at the level of the subsidiary, the parent must have substantial control over the affairs and policies of the subsidiary. *See, e.g.,* *Kennecott Copper Corp. v. Curtiss-Wright Corp., 584 F.2d 1195, 1205 (2d Cir. 1978)* (finding no violation of *§ 8* of Clayton **[**25]** Act where interlocked parent corporations had competing subsidiaries, but reserving issue whether statute would cover "parent corporation that closely controls and dictates the policies of its subsidiary"); *Phoenix Canada Oil Co. Ltd. v. Texaco, Inc., 658 F. Supp. 1061, 1084-85 (D.Del. 1987)* (holding that parent is liable for acts of subsidiary under agency theory only if parent "dominates" subsidiary; parent of wholly-owned subsidiary that had seats on board, took part in financing, and approved major policy decisions was not liable because parent did not have day-to-day control); *J.E. Rhoads & Sons, Inc. v. Ammeraal, Inc., 1988 Del. Super. LEXIS 116, 1988 WL 32012 (Del. Super. 1988)* (citing cases holding day-to-day control required before court will pierce corporate veil or find parent liable); *Outokumpu Engineering Enterprises, Inc. v. Kvaerner Enviropower, Inc., 685 A.2d 724, 729 n.21 (Del. Super. 1996)* (noting test for parent's liability for act of subsidiary is whether parent had "exclusive domination and control to the point that the subsidiary no longer has legal or independent significance of its own"); *cf.* *Tiger Trash v. Browning Ferris Indus., Inc., 560 F.2d 818 (7th Cir. 1977)* **[**26]** (holding that in order to prevent parent from carrying out anticompetitive activity through subsidiary, test for venue is **[*1089]** whether parent's control over subsidiary caused parent to "transact business" in state within venue provision of Clayton Act); *Phone Directories Co. v. Contel Corp., 786 F. Supp. 930 (D.Utah 1992)* (test for venue under Clayton Act is whether parent had sufficient control to influence and control acts of subsidiary of type that might violate antitrust laws); *cf. also* *United States v. USX Corp., 68 F.3d 811, 823 n.23 (3d Cir. 1995)* (citing cases holding, variously, that parent is liable under CERCLA for actions of a subsidiary or controlled company when parent has actual and pervasive control or, at least, authority to control subsidiary's decisions leading to CERCLA violation.)

CBS does not allege that C&W had such control. The complaint states only that C&W and CCC were involved in a "joint project"; they had "engaged in discussions and negotiations regarding their planned relationship"; and "a C&W representative was a member of CCC's Board of Directors." (P 44) Only the last point indicates that C&W had any influence **[**27]** in the affairs of CCC, and even it does not suggest the type of day-to-day control we think necessary to identify an investor so closely with the company in which it has invested as to make it a competitor of that company's rivals.

In sum, CBS does not allege that C&W had substantial control over CCC. Therefore, Count XI of the complaint fails to state a claim against C&W for denial of access to an essential facility.

D. Jurisdictional Discovery and Dismissal with Prejudice

CBS's last two points on appeal go to rulings of the district court relevant only to CBS's action against CCC. CBS asserts that the district court erroneously denied CBS's request for jurisdictional discovery and dismissed its claim with rather than without prejudice.

1. Jurisdictional discovery

CBS argues that the district court abused its discretion in dismissing its case against CCC for lack of personal jurisdiction without giving CBS an opportunity to discover evidence that would support such jurisdiction. *See, e.g.,* *El-Fadl v. Central Bank of Jordan, 316 U.S. App. D.C. 86, 75 F.3d 668, 675-76 (D.C. Cir. 1996)*. CCC defends the district court's denial of discovery on the **[**28]** ground that CBS had failed to dispute CCC's affidavit that it did not solicit business in the District of Columbia and had never made any telephone calls into the District. Because there was no indication before the court that CCC had any contacts at all with the District of Columbia, let alone the minimum contacts necessary for the court, consonant with due process, to exercise personal jurisdiction over it, CCC argues that any discovery would have been inappropriate.

We hold that the district court did not abuse its discretion in denying CBS jurisdictional discovery. The District's longarm statute is as far-reaching as due process allows, *see* *Hummel v. Koehler, 458 A.2d 1187, 1190 (D.C. App. 1983)*, meaning that only minimum contacts with the District are necessary to sustain jurisdiction here. *See* *International Shoe Co. v. State of Washington, 326 U.S. 310, 90 L. Ed. 95, 66 S. Ct. 154 (1945)*; Wright & Miller, § 1067-1067.1 (1988 & Supp. 1997). CBS, however, has alleged absolutely nothing, upon either information or belief, to indicate that a court in the District of Columbia might constitutionally assert jurisdiction over CCC, which is incorporated **[**29]** in Montserrat, British West Indies, and has its U.S. operations in Wisconsin. The closest the complaint comes is to say that "CCC sells … advertising time, primarily to U.S. companies," and that CCC "made sales calls to U.S. companies nationally" and "disseminated … brochures by hand and by the U.S. mail." (PP 8, 33) At the oral argument of this appeal counsel for CBS represented that CCC sold advertising to more than 500 companies and argued that the odds were therefore good that it had solicited at least one company located in the District; but CBS did not make even this cursory (and by no means self-evident) allegation before the district court. These statements are too bare to support even the inference that CCC solicited any companies located in the District of Columbia, much less that it actually did any business in the District--and minimal solicitation does not **[*1090]** generally support jurisdiction anyway. *See Volkswagen de Mexico v. Germanischer Lloyd, 768 F. Supp. 1023 (S.D.N.Y. 1991)* (solicitation of business through advertisements in publications distributed in district does not support jurisdiction under N.Y. long-arm statute); *see also* **[**30]** *Gatewood v. Fiat, S.p.A., 199 U.S. App. D.C. 238, 617 F.2d 820 (D.C. Cir. 1980)* (solicitation of business must be "regular" in order to support jurisdiction); *McFarlane v. Esquire Magazine, 316 U.S. App. D.C. 35, 74 F.3d 1296 (D.C. Cir. 1996)* (writing article for national publication obtainable in D.C. did not subject writer to personal jurisdiction in District). *But see* *United States Golf Ass'n v. U.S. Amateur Golf Ass'n, 690 F. Supp. 317 (D.C.N.J. 1988)* (direct mail solicitation in New Jersey confers personal jurisdiction). In light of CCC's uncontested affidavit, therefore, the court was justified in denying further discovery.

CBS argues that it could not have made more specific allegations without jurisdictional discovery and that it never had the opportunity to take such discovery. Further, CBS points to cases in this circuit suggesting that a district court abuses its discretion when it dismisses a case for lack of personal jurisdiction before the plaintiff has had an opportunity for jurisdictional discovery. *See, e.g.,* Edmond v. United States Postal Serv. Gen. Counsel, 292 U.S. App. D.C. 240, 949 F.2d 415 (D.C. Cir. 1991). **[**31]** As CCC rejoins, however, in order to get jurisdictional discovery a plaintiff must have at least a good faith belief that such discovery will enable it to show that the court has personal jurisdiction over the defendant. *See, e.g.,* Hansen v. Neumueller GmbH, 163 F.R.D. 471, 476 (D.Del. 1995) (concluding, after analysis of Rules 26 and 8, that plaintiff who responded to defendant's affidavit with "a complete absence of jurisdictional facts" had not made threshold showing necessary to get jurisdictional discovery); *Poe v. Babcock Int'l, plc,* 662 F. Supp. 4, 7 (M.D. Pa. 1985) (holding that because "plaintiff has met defendants' affidavit evidence with mere speculation, plaintiff's request for … [jurisdictional] discovery … must be denied"); *see also* Ellis v. Fortune Seas, Ltd, 175 F.R.D. 308, 312 (S.D. Ind. 1997) (citing cases and holding "it is reasonable for a court … to expect the plaintiff to show a colorable basis for jurisdiction before subjecting the defendant to intrusive and burdensome discovery"); International Terminal Operating Co., Inc., v. Skibs A/S Hidlefjord, 63 F.R.D. 85 (S.D.N.Y. 1973) **[**32]** (holding jurisdictional discovery not appropriate when plaintiff merely hopes to find statements in defendant's affidavit not accurate but has not made counter-allegations in its own affidavit).

To be sure, CBS had no obligation to make specific allegations relevant to personal jurisdiction in its complaint because lack of personal jurisdiction is an affirmative defense and so must be raised by the defendant. *See* Insurance Corp. of Ireland, Ltd. v. Compagnie des Bauxites de Guinee, 456 U.S. 694, 704, 72 L. Ed. 2d 492, 102 S. Ct. 2099 (1982); Fed. R. Civ. P. 12(b)(2). CBS's obligation to make some allegations relating to personal jurisdiction arose, therefore, only after CCC had filed its motion to dismiss and supporting affidavit. Even in its response to that motion, however, CBS did not allege any facts remotely suggesting that CCC had any connection to the District of Columbia.

On appeal CBS belatedly offers two facts that it claims support the inference that the district court has personal jurisdiction over the defendant: CCC advertises in *Caribbean Week,* "a publication which has Washington, D.C. subscribers," and maintains a Web site accessible to residents **[**33]** of the District (as well as the rest of the world, we assume). Although these facts were not timely pled, CBS argues that the court should take cognizance of them precisely because CBS did not have the benefit of jurisdictional discovery. To do so, however, would be to retry the case upon appeal and then to fault the district court for reaching a different result based upon the different allegations before it. Good order and common sense protest. Therefore, without intimating anything about the legal significance, if any, of CBS's belated factual proffer, we conclude that the district court did not abuse its discretion when it dismissed CBS's claim against CCC without first granting CBS's request for jurisdictional discovery.

2. Dismissal of Count I with prejudice

Although the district court did not state whether its dismissal of Count I (for **[*1091]** lack of personal jurisdiction over CCC) was with or without prejudice, both parties assume on appeal that, like the court's earlier dismissal of Counts II-XI, it was with prejudice. CBS sees this as an abuse of discretion; CCC denies the same. Neither party is correct because their shared assumption is mistaken.

While **[**34]** an involuntary dismissal ordinarily "operates as an adjudication upon the merits" unless the court "otherwise specifies," a dismissal for lack of jurisdiction is specifically exempted from this general rule. Fed.R.Civ.P. 41(b); *see also* Wright & Miller, § 2373 at 406 (1995) (noting that "dismissals that do not reach the merits because of a lack of jurisdiction … must be considered to be without prejudice"); Costello v. United States, 365 U.S. 265, 285, 5 L. Ed. 2d 551, 81 S. Ct. 534 (1961) (noting that Rule 41(b) provides that dismissal is adjudication on merits unless for lack of personal jurisdiction, among other reasons). In rare circumstances, a district court may use its inherent power to dismiss with prejudice (as a sanction for misconduct) even a case over which it lacks jurisdiction, and its decision to do so is reviewed for abuse of discretion. *See* Wright & Miller, § 2369 (1995 & Supp. 1997). We cannot infer from the district court's mere silence, however, that it intended to impose such a drastic sanction; nor did the district court advert to any misconduct for which it might have intended such a sanction. We therefore conclude that dismissal **[**35]** of Count I of the complaint was without prejudice.

III. Conclusion

The district court erred in dismissing Counts II-XI (the attempted monopolization claims) for lack of subject matter jurisdiction, but correctly dismissed Count XI (the essential facilities claim) for failure to state a claim and Count I (the Lanham Act claim) for lack of personal jurisdiction over CCC. The district court did not abuse its discretion in denying jurisdictional discovery before dismissing Count I, which it did without prejudice. The case is remanded to the district court for further proceedings consistent with this opinion.

So ordered.

Opinion by: DOROTHY W. NELSON

Opinion

D.W. NELSON, Circuit Judge:

To resolve the instant appeal, we must determine whether the Federal Trade Commission ("FTC") is a "person" entitled to enforce liability on a surety bond. We conclude that it is.

FACTUAL AND PROCEDURAL BACKGROUND

This case calls upon us to interpret Article 1.4 of California's Telephone Sellers Act ("Act"), which regulates the practices of telephone solicitors. *Cal. Bus. & Prof. Code §§ 17511-17511.12.* The Act provides:

> It is the intent of the Legislature in enacting this article to (1) provide each prospective telephonic sales purchaser with information necessary to make an intelligent decision regarding the offer made, (2) safeguard the public against deceit and financial hardship, (3) insure, foster, and encourage competition and fair dealings among telephonic sellers by requiring adequate disclosure, and (4) prohibit representations that tend to mislead. This article shall be construed liberally in order to achieve these purposes.

§ 17511(b).

The Act requires all telephonic sellers to maintain a surety bond in the amount of $ 100,000 "for the benefit of any person suffering pecuniary loss in a transaction commenced during the period of bond coverage with a telephonic seller who violated" the Act. *§ 17511.12(a)*. The bond is to "include coverage for the payment of the portion of any judgment, including a judgment entered pursuant to *Section 17203* or *17535*, that provides for restitution to any person suffering pecuniary **[**2]** loss, notwithstanding whether the surety is joined or served in the action or proceeding." Id.

As telephonic sellers engaged in telemarketing in California MTK Marketing, Inc. ("MTK") and Copy Resource Center, Inc. ("CRC") were required to post a bond pursuant to *section 17511.12*. On November 13, 1992, Defendant Erick Graziano purchased from the Ranger Insurance Company a $ 50,000 bond, which was later increased to $ 100,000. Frontier substituted as surety on November 14, 1994, and the bond was amended on July 3, 1995, to cover Graziano, CRC, and MTK (collectively, "bondholders").

The FTC initiated the underlying action on March 7, 1996, by filing a complaint seeking injunctive relief and redress for consumers against seven corporate defendants and eight individual defendants (collectively, "defendants"), including the bondholders. The complaint alleged that the defendants had been involved in a variety of unfair and deceptive acts and practices in violation of Section 5 of the FTC Act, *15 U.S.C. § 45*, in connection with efforts to sell photocopier toner to the customers of other suppliers. The FTC submitted evidence showing that defendants had defrauded consumers **[**3]** of millions of dollars.

On August 5, 1996, the court entered stipulated final judgments against all eight individual defendants and against one corporate defendant, Intel Marketing of California. The court granted injunctive relief, and the defendants agreed to pay consumer redress. On September 18, 1996, a default judgment was entered against the remaining six corporate defendants, who were permanently enjoined from engaging in any telemarketing activities. In addition, MTK was ordered to pay consumer redress in the amount of $ 1,335,093. The remaining five corporations also were required to pay redress, totaling over $ 13 million.

Because the FTC had obtained a judgment in the underlying action for approximately $ 1.8 million, and because CRC and MTK had assets amounting to less than $ 131,000, the FTC filed a motion to enforce liability on the bond. Frontier opposed the FTC's motion on a variety of grounds. On December 6, 1996, the district court entered a minute order holding that, because the FTC was not a "person" under the Act, it could not enforce liability on the bond. The district court denied the FTC's motion "without prejudice to a proper party bringing a separate action **[**4]** in a court with proper jurisdiction." The FTC timely appeals. We have jurisdiction pursuant to *28 U.S.C. § 1291*, and we reverse and remand.

STANDARD OF REVIEW

The district court's decision involves the interpretation of state law, which we review de novo. *Mastro v. Witt, 39 F.3d 238, 241 (9th Cir. 1994)*.

DISCUSSION

I. The FTC is a proper party to enforce liability on the bond.

HN1[] The Act provides that bonds may be enforced by "the Attorney General, district attorney, city attorney, or any other person who obtained a judgment for restitution against the seller . . . ." *§ 17511.12(c)(2)*. The FTC argues that the definition of "person" should be read expansively, thereby conferring standing upon the FTC to enforce liability. Based upon our review of the applicable case law, statutory language, and legislative history, we agree.

[*1039] *A. Case law*

Supreme Court precedent does not support the notion that a governmental agency can never be a "person." In *United States v. Cooper Corp., 312 U.S. 600, 85 L. Ed. 1071, 61 S. Ct. 742 (1941)*, the Supreme Court was called upon to interpret the meaning of **[**5]** "person" under the Sherman Act, which defined "person" to include corporations and associations. To resolve the issue, the Court considered "the purpose, the subject matter, the context, the legislative history, and the executive interpretation of the statute." *Id. at 605*. The Court concluded that under ***antitrust law***, a federal governmental agency could not qualify as a "person" entitled to treble damages. *Id. at 606*. The very next year, however, the Court applied the same analytical framework to hold that a state could constitute a "person" entitled to collect treble damages under the Sherman Act. *See Georgia v. Evans, 316 U.S. 159, 162, 86 L. Ed. 1346, 62 S. Ct. 972 (1942)*. More recently, in *Pfizer, Inc. v. Government of India, 434 U.S. 308, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*, the Court noted that the definition of "person" was "inclusive rather than exclusive," *id. at 312 n.9*, and concluded that the State of India was a person under the Clayton Act, *id. at 313*.

Applying the analysis outlined in *Cooper,* we have held that under *section 1755 of the California Unemployment* ***[**6]*** *Insurance Code*, the postal service is a "person," on whom the Employment Development Department could serve a notice of levy, despite the fact that section 1758 of the insurance code defines "person" to "include[] this State and any county, city and county, municipality, district or other political subdivision thereof." *Employment Develop. Dep't. v. United States Postal Serv., 698 F.2d 1029, 1032-33 (9th Cir. 1983)* (per curiam) *rev'd on other grounds in Franchise Tax Bd. v. United States Postal Serv., 467 U.S. 512, 81 L. Ed. 2d 446, 104 S. Ct. 2549 (1984)*. We reasoned that because there was no requirement that the statute explicitly include the United States or its agencies within the definition of "person," we should not interpret the statute in a manner that treated the federal government differently from the state government absent some indication of legislative intent. *Id.*; *see also People v. Crow, 6 Cal. 4th 952, 864 P.2d 80, 84-85 (Cal. 1993)* (holding that defrauded state government agency was a "person" entitled to seek restitution from wrongdoer); *City of Los Angeles v. City of San Fernando, 14*

Cal. 3d 199, 537 P.2d 1250, 1306-07, 123 Cal. Rptr. 1 (Cal. 1975) **[**7]** (holding that statute prohibiting possession of city property "by any person, firm or corporation" could preclude possession by a government agency); *Flournoy v. State, 57 Cal. 2d 497, 370 P.2d 331, 332, 20 Cal. Rptr. 627 (Cal. 1962)* (applying to a state government a wrongful death statute attaching liability to any 'person' responsible for another's death); *Gomes v. County of Mendocino, 37 Cal. App. 4th 977, 44 Cal. Rptr. 2d 93, 96 (Cal. Ct. App. 1995)* (statute covering "a person, firm, corporation, partnership or association" included federal government). Thus, although the case at bar presents an issue of first impression, ample precedent supports the position that the term "person" may include a governmental agency.

B. Statutory Language

The Act states explicitly that "It is the intent of the Legislature in enacting this article to . . . safeguard the public against deceit . . . This article shall be construed liberally in order to achieve [this] purpose[]." *§ 17511(b)*. We conclude that treating the FTC as a person would be consistent with the Act's purpose by furthering the goal of consumer redress. Indeed, if the FTC were not **[**8]** able to enforce liability, it is unclear whether the bond would serve its intended purpose of consumer protection: Neither the State of California nor any individual consumer has sought enforcement. As such, an interpretation of "person" precluding FTC enforcement would provide Frontier with a windfall and undermine the purpose of the Act. Moreover, evidence in the record indicates that the Attorney General of California believes that FTC enforcement would serve the Act's purpose; his interpretation is entitled to deference. *See Chevron, U.S.A., Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 844-45, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)* (holding that considerable weight should be accorded executive department's **[*1040]** construction of statutory scheme it is entrusted to administer).

Frontier does not dispute that the Act was intended to protect consumers. Rather, it argues that the Act was intended to benefit only the citizens of California and, consequently, may not be enforced by the federal government to provide redress for out-of-state residents. Frontier's position is not persuasive. Although the bond must be written "in favor of the **[**9]** State of California," *see § 17511.12(a)*, this drafting requirement does not restrict who may enforce the bond. Rather, the bond exists "for the benefit of *any* person suffering pecuniary loss in a transaction commenced during the period of bond coverage with a telephonic seller who violated" the Act. *§ 17511.12(a)* (emphasis added). Accordingly, we reject Frontier's *ejusdem generis* argument, because it is settled law that ***HN2***[] the doctrine of *ejusdem generis* should not be applied to defeat legislative intent. *See, e.g., Leslie Salt Co. v. United States, 896 F.2d 354, 359 (9th Cir. 1990)*; *Walker v. Meehan, 194 Cal. App. 3d 1290, 240 Cal. Rptr. 171, 175 (Cal. Ct. App. 1987)*.

Frontier insists that *section 17511.2(d)* explicitly limits the parties who may enforce liability on the bond. It is true that section *17511.2(d)* provides that "'Person' includes an individual, firm, association, corporation, partnership, joint venture, or any other business entity." Nonetheless, Frontier's argument is without merit because "in terms of statutory construction, use of the word 'includes' does not connote limitation. In definitive provisions of statutes **[**10]** and other writings, 'include' is frequently, if not generally used as a word of extension or enlargement rather than as one of limitation or enumeration." *In re Yochum, 89 F.3d 661, 668 (9th Cir. 1996)* (citations and internal quotations omitted). As such, the Act merely provides examples of who may enforce the bond.

C. Legislative history

Legislative history also supports the position that the FTC may enforce liability on the bond. Prior to 1993, telephonic sellers were required to post a $ 50,000 bond, which could be enforced only by the Attorney General, a district attorney, or a city attorney. In 1993, the Act was amended to increase the bond requirement to $ 100,000 and to permit enforcement actions by "any other person who obtained a judgment for restitution against the seller." The Legislature indicated that the change was intended to "expand the situations under which, the parties to whom and the procedures whereby, the bond may be reached for payment of consumer losses or for violations of the law's requirements." Senate Rules Committee Report for California Assembly Bill No. 1421 (1993). We conclude that permitting the FTC to enforce the bond will **[**11]** expand opportunities for redress, as well as the group of people entitled to benefit from the bond.

II. Allowing the FTC to enforce the bond would not violate the Tenth Amendment.

Frontier argues that allowing the federal government to use legislation enacted by the State of California to accomplish its goals violates the *Tenth Amendment*. Frontier cites two cases; neither supports its argument, as both cases involve whether treating a governmental entity as a person would diminish its own sovereignty. See *Community Memorial Hosp. of San Buena Ventura v. County of Ventura, 49 Cal. App. 4th 527, 56 Cal. Rptr. 2d 732, 739 (Cal. Ct. App. 1996)* (allowing county to be sued would infringe on county's sovereignty); *Churchill v. Parnell, 170 Cal. App. 3d 1094, 216 Cal. Rptr. 876, 878-79 (Cal. Ct. App. 1985)* (including state in definition of person would infringe on state's sovereignty by restricting its ability to protect fish and wildlife). Here, allowing FTC enforcement would not compromise the State of California's sovereignty in any way. In fact, FTC enforcement would assist the State of California in furthering the policy interests the Act was **[**12]** designed to serve. Moreover, although the *Tenth Amendment* precludes the federal government from commandeering a state by forcing it to enact or enforce a federal regulatory program, *New York v. United States, 505 U.S. 144, 161, 120 L. Ed. 2d 120, 112 S. Ct. 2408 (1992)*, no such conduct occurred here.

[*1041] *III. The FTC has the necessary statutory authority to seek enforcement of the judgment.*

Finally, Frontier suggests that the FTC can take action to collect a judgment only if the authority is specifically provided by statute. This argument is without merit. The Ninth Circuit has held that "the authority granted by [the Act] is not limited to the power to issue an injunction; rather, it includes the authority to grant any ancillary relief necessary to accomplish complete justice," including the power to "order restitution." *FTC v. Pantron I, Corp., 33 F.3d 1088, 1102 (9th Cir. 1994)* (citations and internal quotations omitted). We see no reason why the FTC should not be permitted to grant ancillary relief by enforcing liability on the bond.

CONCLUSION

For the reasons stated above, we find that the FTC is a "person" within the **[**13]** meaning of the Act.

REVERSED AND REMANDED.

Blue Cross & Blue Shield United v. Marshfield Clinic

United States Court of Appeals for the Seventh Circuit

June 5, 1998, Argued ; July 30, 1998, Decided

Nos. 97-3219, 97-3847

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN1[] **Remedies, Damages**

Inadequacy of a plaintiff's remedy at law, that is, his damages remedy, is normally a prerequisite to the entry of an injunction. And a common reason why the damages remedy is inadequate is that the plaintiff is unable to quantify the harm that the defendant's practice has inflicted or will inflict on him.

HN2[] **Remedies, Damages**

A private suit under the antitrust laws is a suit seeking relief against a statutory tort, and the principle that there is no tort without an injury is applicable to it. Clayton Act, *15 U.S.C.S. § 15(a)*. But all that this implies, so far as equitable relief is concerned, is that a plaintiff has to prove that he is likely to be harmed by the defendant's wrongful conduct unless that conduct is enjoined. This is clear from the text of the Clayton Act, which, evoking traditional principles of equity, requires proof only of threatened loss or damage. Clayton Act, *15 U.S.C.S. § 26*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

Statistical studies that fail to correct for salient factors, not attributable to the defendant's misconduct, that may have caused the harm of which the plaintiff is complaining do not provide a rational basis for a judgment.

Civil Procedure > Appeals > Record on Appeal

HN4[] **Appeals, Record on Appeal**

The omission to cite a specific item of evidence to an appellate court is ordinarily not a waiver of anything; parties have no obligation to bombard the appellate court with record citations. But it is not clear that a party's approach to calculating damages should be treated as evidence, rather than as theory or argument and hence as waived unless mentioned. And in any event silence about a critical piece of evidence can be and here is eloquent.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN5[] **Summary Judgment, Supporting Materials**

A party can, in resisting summary judgment, rely on his opponent's evidence, theories, or arguments.

Opinion by: POSNER

Opinion

[*590] Posner, *Chief Judge.* This is the second round of appeals in an antitrust case brought by a health insurer against a medical clinic. See *65 F.3d 1406 (7th Cir. 1995)*. The defendant, the Marshfield Clinic in rural Wisconsin, is the dominant provider of medical services in the north-central part of that **[**3]** state; indeed, despite its remote location, it is one of the largest medical clinics in the nation, comparable in size to the Mayo and Cleveland clinics. Blue Cross of Wisconsin (together with its HMO) sued the Marshfield Clinic (and its HMO), alleging a variety of antitrust violations centered on the contention that the Clinic had illegally monopolized the provision of certain medical services in its region, enabling it to jack up its prices for those services above competitive levels to the detriment of Blue Cross, which pays the Clinic to treat patients insured by Blue Cross. The plaintiffs won a $ 20 million damages judgment (most of it in favor of Blue Cross's HMO rather than Blue Cross itself) and an injunction. The Clinic appealed, and we threw out all but one of the charges. That was the charge that the Clinic had divided markets with some of its competitors, that is, had agreed with them to keep out of each other's service areas. *Id. at 1415-16*. The **[*591]** evidence in support of this charge was sufficient for us to "conclude that the jury verdict on liability must stand insofar as the charge of a division of markets is concerned," to direct that the **[**4]** district court revise the injunction to confine it to that practice, and to order "a new trial limited to damages for dividing markets." *Id. at 1416. (Neither HMO is involved in the division of markets charge, so we shall not refer to them any more.)* We explained that at the new trial the "burden will be on Blue Cross to show how much less it would have paid the Clinic had the Clinic refrained from that illegal practice." *Id.*

On remand, following additional discovery, the district judge granted summary judgment for the Clinic on the ground that Blue Cross had produced no evidence that it had suffered any injury as a result of the division of markets. *980 F. Supp. 1298 (W.D. Wis. 1997)*. In the same order she ruled that Blue Cross was not entitled to an award of attorneys' fees, since it was not the prevailing party; and later she awarded the Clinic its court costs of some $ 220,000. So this time Blue Cross has appealed. It argues that it is entitled to an injunction even if it cannot prove damages; that it can prove damages; and that it should be adjudged a prevailing plaintiff and hence awarded a reasonable attorney's fee and court costs (see **[**5]** Clayton Act, § 4, *15 U.S.C. § 15(a)*) and not have to pay its opponent's costs.

Blue Cross is clearly right with regard to the injunction. We held when this case was last before us that the jury's finding on liability for dividing up the market with its competitors must be upheld and that Blue Cross was entitled to an injunction against that practice. This holding established the law of the case, binding the district judge on remand and us on this subsequent appeal unless we have good reasons to depart from the previous decision. *Agostini v. Felton, 521 U.S. 203, 138 L. Ed. 2d 391, 117 S. Ct. 1997, 2017 (1997)*; *Messenger v. Anderson, 225 U.S. 436, 444, 56 L. Ed. 1152, 32 S. Ct. 739 (1912)* (Holmes, J.); *Best v. Shell Oil Co., 107 F.3d 544, 546 (7th Cir. 1997)*. We don't. Even though, as we shall see, the district judge was correct that Blue Cross has failed to come up with evidence that would authorize an award of damages for the division of markets, this does not justify withholding an injunction--rather the contrary. ***HN1***[] Inadequacy of a plaintiff's remedy at law, that is, his damages remedy, is normally (and **[**6]** so under section 16 of the Clayton Act, see *15 U.S.C. § 26*, which authorizes an injunction in a private antitrust suit "when and under the same conditions" in which it would be granted by "courts of equity") a prerequisite to the entry of an injunction. *Walgreen Co. v. Sara Creek Property Co., 966 F.2d 273, 274 (7th Cir. 1992)*. And a common reason why the damages remedy is inadequate is that the plaintiff is unable to quantify the harm that the defendant's practice has inflicted or will inflict on him. *Miller v. LeSea Broadcasting, Inc., 87 F.3d 224, 230 (7th Cir. 1996)*; *Roland Machinery Co. v. Dresser Industries, Inc., 749 F.2d 380, 383 (7th Cir. 1984)*.

The jury found on sufficient evidence that the Marshfield Clinic entered into agreements with competitors to stay out of each other's territories. The purpose was to enable each of the firms, prominently including the Clinic, to charge higher prices to its customers. It is true that a by-product of such an agreement might be to reduce the advertising and other marketing expenses of the conspirators, and the reduction might even be so great that the optimal **[**7]** monopoly price of each of the noncompetitors would be lower than the former competitive price, since a monopolist will charge a lower price the lower his costs are. The agreement would still be illegal; divisions of markets are per se illegal, just like price-fixing agreements, *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)*; but as it would be harmless, there would be no basis for a consumer's seeking an injunction. Indeed, a rational consumer would not seek an injunction that would lead to his having to pay *higher* prices.

Blue Cross was not, however, required to negate the remote possibility that the division of markets was a form of benign cartel (especially since the point was not argued by the defendant). And if this possibility is therefore set to one side, we have a major customer of the Clinic that is likely to **[*592]** have to pay higher prices unless the division of markets is enjoined. It is also possible, of course, that the defendant has abandoned the unlawful practice, perhaps induced to do so by the filing of the lawsuit; and in that event Blue Cross wouldn't need an injunction. But this possibility **[**8]** would not justify the withholding of the injunction without a degree of proof (of abandonment with no likelihood of resumption), see, e.g., *United States v. Oregon State Medical Society, 343 U.S. 326, 333, 96 L. Ed. 978, 72 S. Ct. 690 (1952)*; *Wilk v. American Medical Ass'n, 895 F.2d 352, 367 (7th Cir. 1990)*, that the Clinic has not attempted.

What is true and misled the district judge is the principle that there is no tort without an injury. E.g., *Janmark, Inc. v. Reidy, 132 F.3d 1200, 1202 (7th Cir. 1997)*; *Rozenfeld v. Medical Protective Co., 73 F.3d 154, 156 (7th Cir. 1996)*. ***HN2***[] A private suit under the antitrust laws is a suit seeking relief against a statutory tort, and the principle that there is no tort without an injury is applicable to it. See Clayton Act, § 4, *15 U.S.C. § 15(a)*. But all that this implies, so far as equitable relief is concerned, is that a plaintiff has to prove that he is likely to be harmed by the defendant's wrongful conduct unless that conduct is enjoined. This is clear from the text of the Clayton Act, which, evoking traditional principles of equity, *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*, **[**9]** requires proof only of "threatened loss or damage." Clayton Act, § 16, *15*

U.S.C. § 26 (emphasis added); see California v. American Stores Co., 495 U.S. 271, 282 n. 8, 109 L. Ed. 2d 240, 110 S. Ct. 1853 (1990); Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 844 (7th Cir. 1978). There is sufficient evidence of that here. Blue Cross bought services from a seller that had agreed with other sellers to refrain from competing for customers, and it is likely, whether or not provable with the degree of precision required to ground an award of damages, that unless the defendant is enjoined Blue Cross will have to pay Marshfield Clinic more than if the Clinic were not a member of an anticompetitive conspiracy directed in part against the plaintiff, the conspiracy that the suit seeks to destroy.

A more difficult question is whether the judge was right to conclude that Blue Cross could not prove what damages it had sustained as a result of the division of markets. The usual way to measure damages in such a case would be to compare the prices that the Marshfield Clinic charged Blue Cross before and during the conspiracy, or **[**10]** inside and outside the region covered by the conspiracy, or during the conspiracy and after it ended (if it has ended--the injunction issued by the district court before the first appeal was in effect for less than six weeks before we stayed it pending the appeal), correcting by various statistical techniques for any nonconspiratorial factors that might have caused the prices that are being compared to be different from each other. See Isaksen v. Vermont Castings, Inc., 825 F.2d 1158, 1165 (7th Cir. 1987); New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1078 (2d Cir. 1988); Home Placement Service, Inc. v. Providence Journal Co., 819 F.2d 1199, 1205 n. 7 (1st Cir. 1987); Phillips v. Crown Central Petroleum Corp., 602 F.2d 616, 632 (4th Cir. 1979); 1 American Bar Association Section of ***Antitrust Law***, ***Antitrust Law*** *Developments (Fourth)* 787 (4th ed. 1997). This method or congeries of methods was unavailable to Blue Cross, however, because the division of markets embraced the entire period and region in which the necessary data are obtainable; at least Blue Cross made no effort to show otherwise. Instead it **[**11]** compared the Marshfield Clinic's prices for medical services between 1988 and 1995 with the prices charged by other providers of medical care for the same services during the same period elsewhere in Wisconsin, on the theory that those other prices, properly adjusted, are what Blue Cross would have had to pay the Clinic and the Clinic's competitors had it not been for the conspiracy.

This--the so-called "yardstick" method of computing antitrust damages--was not improper. In re Nasdaq Market-Makers Antitrust Litigation, 169 F.R.D. 493, 521 (S.D.N.Y. 1996). But the qualification "properly adjusted" is at least as vital as when the plaintiff is trying to prove damages by comparing the defendant's prices at one period **[*593]** or in one area with its prices in another period or another area rather than (as under the yardstick approach) comparing the defendant's prices with the prices of other sellers. See, e.g., Package Shop, Inc. v. Anheuser-Busch, Inc., 675 F. Supp. 894, 947-52 (D.N.J. 1987). Any nonconspiratorial factors likely to have made the prices charged by the Marshfield Clinic higher than the prices charged by other health-care providers **[**12]** had to be taken into account in order to make a responsible estimate of the prices that Blue Cross would have paid had it not been for the conspiracy. Isaksen v. Vermont Castings, Inc., supra, 825 F.2d at 1165.

The most important factors were the amount and quality of the Marshfield Clinic's service and its market share. The significance of market share is that even though the Marshfield Clinic was not proved to have monopoly power, it does have a large market share throughout north-central Wisconsin, which might confer enough market power on it to enable it all by itself, without dividing markets with its competitors, to charge a price somewhat above the average for the state. The larger a firm's market share is, the larger is the percentage increase that the other firms in the market must make in their output in order to offset the effect of the firm's curtailing its output in order to drive the market price above the competitive level. For example, if a firm has 50 percent of the market and as a corollary to jacking its price above the existing, competitive level reduces its output by 20 percent (say from 1,000 to 800 units), the other firms will have to increase **[**13]** their output by an average of 20 percent (from 1,000 to 1,200 units) in order to offset completely the reduction in the output of the dominant firm. This may be difficult for them to do, at least in the near term, and so the dominant firm, though not a monopolist, will be able to get away, at least for a time, with its price hike. See George J. Stigler, "The Dominant Firm and the Inverted Umbrella," in Stigler, *The Organization of Industry* 108 (1968). That may have been the situation of the Marshfield Clinic.

To make the necessary corrections and thus establish that there was enough evidence to enable a jury to make a responsible estimate of damages, Blue Cross submitted to the district court multiple reports by two economic experts, John Beyer and Thomas McGuire. Beyer's two reports, which compute a range of damages exceeding $ 7 million from the division of markets, are worthless. They attribute the entire difference between the prices of the Marshfield Clinic and the prices of other Wisconsin providers of medical services to the division of markets, with no correction for any other factor except differences in the treatment mix. ***HN3***[] Statistical studies that fail to correct for **[**14]** salient factors, not attributable to the defendant's misconduct, that may have caused the harm of which the plaintiff is complaining do not provide a rational basis for a judgment. *Milwaukee Branch of NAACP v. Thompson, 116 F.3d 1194, 1198 (7th Cir. 1997)*; *Kuhn v. Ball State University, 78 F.3d 330, 332-33 (7th Cir. 1996)*; *Schiller & Schmidt, Inc. v. Nordisco Corp., 969 F.2d 410, 415-16 (7th Cir. 1992)*; *Tagatz v. Marquette University, 861 F.2d 1040, 1044-45 (7th Cir. 1988)*; *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1164-65 (7th Cir. 1983)*; cf. *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)*; *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 563-67, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*; *Navarro v. Fuji Heavy Industries, Ltd., 117 F.3d 1027, 1031 (7th Cir. 1997)*.

McGuire's reports are more promising, though as his bottom line is a damages figure only $ 11,000 below the lower of Beyer's highest two estimates, it is a little hard to take **[**15]** seriously. For how is it that after making the subtractions that Beyer failed to make, McGuire came up with essentially the same figure? And is it purely a coincidence that this number, after trebling, would give Blue Cross the same $ 20 million judgment (actually a little more) that it won in the first trial, even though the division of markets was among the least important of the many antitrust violations charged in this suit? Of course it is possible that the alleged violations were redundant; like the assassins of Rasputin, who drowned him after poisoning him in order to make sure he was really dead, the Marshfield Clinic may **[*594]** have stacked the division of markets on top of other practices any one of which would have had the same effect on its customers' prices. But this observation cannot help Blue Cross. For only one of the practices was illegal, the division of markets. If it added nothing to the price effects of the legal practices, it did not cause Blue Cross any harm.

The main reason that McGuire came up with such a high estimate of his client's damages from the division of markets is that he compared the prices charged by the Marshfield Clinic with the prices **[**16]** charged by other providers on the basis of price per patient (correcting for differences in the treatment mix), rather than price per service. The result of this procedure was that if Marshfield Clinic provided on average more treatment per patient than other providers, the difference was attributed to the division of markets. This is a strange inversion of the usual logic of cartelization, which is that cartelists drive up the market price by (or with the effect of) restricting their output, as in our numerical example. In defense of his procedure, McGuire pointed out that one way in which the Marshfield Clinic may be exploiting market power conferred upon it by the conspiratorial division of markets is by inducing patients to undergo unnecessary procedures paid for by Blue Cross. This is a possibility, but there is no evidence of it, and so it cannot provide the basis for calculating the damages due to the division of markets. To see this, imagine that in a suit for the breach of a building contract the plaintiff proved that the defendant had substituted an inferior grade of roofing. The plaintiff could not obtain damages for the defendant's having installed an inferior grade of **[**17]** plumbing, on the ground that the defendant *might* have done that as well. The plaintiff would have to present evidence that the defendant *did* do it. It is not as if fraud were a conventional method of exploiting monopoly power and so could be presumed; and if Blue Cross's real gripe is that the Marshfield Clinic defrauded it, why isn't there a fraud count in the complaint?

McGuire did try to correct for differences in the quality of the services rendered by the Marshfield Clinic compared to the statewide average; but quality and quantity are not the same. If the Clinic because of its reputation (emphasized by Blue Cross itself) for high quality gets referred to it patients who are sicker than average and so require longer treatment, the average price per patient will be higher simply as a function of the more extensive or protracted care required on average by a sicker patient. As far as the record discloses, this is all there is to the higher average price per patient charged by the Marshfield Clinic. McGuire also failed to correct for the effect of market share on the Clinic's prices. In sum, no reasonable jury could estimate the plaintiff's damages from the reports of the **[**18]** plaintiff's experts.

In addition to those reports, there is some nonexpert evidence of damages, consisting of discounts of 15 or 20 percent that the Clinic gave to some of its coconspirators. But this evidence would not enable a reasonable jury to estimate the plaintiff's damages either. The discounts were given in exchange for bulk referrals, and there is no evidence that customers of the Marshfield Clinic, even so large a customer as Blue Cross, would have gotten equivalent discounts had the clinic been competing rather than conspiring. They might have, but no evidence was presented that they probably would have.

We are not saying that Blue Cross did not in fact lose any money as a result of the division of markets. It may well have, as we suggested in discussing the issue of the injunction. (But remember that there is a difference between an actual and a threatened harm. And there is also, and here critically, a difference between an actual and a quantifiable harm and also between a quantifiable and a quantified harm--and only the last supports an award of damages.) The Clinic's own economic experts estimated that the division of markets may have caused the Clinic's prices to **[**19]** be between .4 and .9 percent higher than they would otherwise have been. Blue Cross, however, did not cite that estimate in its briefs to us, and this raises an interesting question of waiver or forfeiture.

HN4[] The omission to cite a specific item of evidence to an appellate court is ordinarily not a waiver of anything; parties have no **[*595]** obligation to bombard us with record citations. But it is not clear that a party's approach to calculating damages should be treated as evidence, rather than as theory or argument and hence as waived unless mentioned. And in any event silence about a critical piece of evidence can be and here is eloquent. Blue Cross vigorously defends its own experts. It does not say or imply that if the judge was right to throw out their reports (a possibility it seems to think unthinkable), it is nevertheless entitled to go to trial on the basis of the methodology used and results produced by its opponent's experts. ***HN5***[] A party can, in resisting summary judgment, rely on his opponent's evidence, theories, or arguments. The question is whether Blue Cross wants to. Apparently it does not; it is represented by sophisticated lawyers who would not keep mum if they **[**20]** thought the Clinic's own method of computing damages gave their client a fair shot at substantial damages. The bottom of the .4 to .9 percent range computes to less than $ 200,000. Maybe Blue Cross doesn't think this amount is worth further litigation, despite the prospect of trebling. Maybe it doesn't want to have a modest fallback position, but would rather go for broke. Maybe it thinks that to acknowledge any merit in its opponent's experts would fatally undermine the credibility of its own experts, of whom the Clinic's were, naturally, critical. And bear in mind that while we have been treating the defendants' experts' reports as if they were evidence, they are not. They are merely discovery materials. See *Kirk v. Raymark Industries, Inc., 61 F.3d 147, 164 (3d Cir. 1995)*; *Bryan v. John Bean Division of FMC Corp., 566 F.2d 541, 544-47 (5th Cir. 1978)*. To get them into evidence, Blue Cross would probably have to subpoena the experts (though conceivably the reports could come into evidence directly under the catch-all exception to the hearsay rule, *Fed. R. Evid. 807*). It could subpoena these experts, *Kaufman v. Edelstein, 539 F.2d 811, 821 (2d Cir. 1976)* **[**21]** (Friendly, J.), but of course they might be reluctant to testify in a way damaging to their client and might be able to squirm out of doing so. Their depositions, as distinct from their reports, do not acknowledge that Blue Cross sustained damages from the division of markets.

All this is speculation; for whatever reason, Blue Cross has waived the right to seek damages on the basis of its opponent's expert reports. And the clincher is what its lawyer told the district judge: that those reports had found "that the market shares of the coconspirators did *not* affect the price charged" (emphasis added). This was a misinterpretation; but by telling the judge not to rely on the defendant's experts for evidence concerning Blue Cross's damages, the plaintiff waived reliance on such evidence should its own evidence fail, as it has done.

So the district judge was right to throw out the damages claim on summary judgment but wrong to throw out the injunction as well and therefore premature in pronouncing the defendant the winner of this lawsuit. The plaintiff has prevailed on a part, although only a small part, of its claim, and this gives it a prima facie entitlement to an award of some **[**22]** of the attorneys' fees and court costs that it incurred, *Ohio-Sealy Mattress Mfg. Co. v. Sealy Inc., 776 F.2d 646, 650-53 (7th Cir. 1985)*; *Sciambra v. Graham News, 892 F.2d 411, 415 (5th Cir. 1990)*; *Royal Crown Cola Co. v. Coca-Cola Co., 887 F.2d 1480, 1485-86 (11th Cir. 1989)*; *United States Football League v. National Football League, 887 F.2d 408, 411-12 (2d Cir. 1989)*; *Home Placement Service, Inc. v. Providence Journal Co., supra, 819 F.2d at 1209-12*. The contrary suggestion in *In re Multidistrict Vehicle Air Pollution, 481 F.2d 122, 130 n. 12 (9th Cir. 1973)*, is not persuasive. For it makes no difference that the only relief that Blue Cross has obtained is equitable; the statute is explicit in allowing for an award of attorney's fees when only injunctive relief is sought or awarded. Clayton Act, § 16, *15 U.S.C. § 26*; *Home Placement Service, Inc. v. Providence Journal Co., supra, 819 F.2d at 1210*. Blue Cross is not, however, entitled to fees and costs allocable to claims and theories that neither succeeded, nor contributed to the **[**23]** limited victory that it has obtained. *Ohio-Sealy Mattress Mfg. Co. v. Sealy Inc., supra, 776 F.2d at 652-53*; *H.J., Inc. v. Flygt Corp., 925 F.2d 257, 260-61 (8th Cir. 1991)*; see also *Reazin v. Blue Cross & Blue Shield of Kansas, 899 F.2d 951, 980 (10th Cir. 1990)*. That would be unreasonable, **[*596]** and ***HN6***[] the Clayton Act entitles a prevailing plaintiff only to "a reasonable attorney's fee." Clayton Act, §§ 4, 16, *15 U.S.C. §§ 15(a)*, *26*; cf. *Hensley v. Eckerhart, 461 U.S. 424, 76 L. Ed. 2d 40, 103 S. Ct. 1933 (1983)*.

We vacate the district court's decision relating to attorneys' fees and to costs, as well as its denial of injunctive relief, but we affirm the denial of damages, and we remand the case to the district court for further proceedings consistent with this opinion.

Affirmed in Part, Vacated in Part, and Remanded.

Opinion

[*166] ***MEMORANDUM AND ORDER***

July 30, 1998

HARRINGTON, D.J.

Plaintiff SMS Systems Maintenance Services, Inc. ("SMS") has charged Defendant **[*167]** Digital Equipment Company ("Digital") with attempting to monopolize the market for repair and maintenance of Digital computers, in violation of the Sherman Act, *15 U.S.C. § 2*. SMS has also alleged state law claims for Tortious Interference with Prospective **[**2]** Contractual Relations (Count II), Tortious Interference with Contractual Relations (Count III), Unfair and Deceptive Trade Practices in violation of *Mass.Gen.L. ch. 93A, § 11* (Count IV), and Injunctive Relief (Count Five).

The case arises out of Defendant Digital's decision to offer extended warranties covering maintenance and service on certain lines of Digital computers. Digital manufactures and sells a variety of computer lines and computer products. Digital also provides maintenance and service on its computer products. Prior to 1994, Digital provided many customers with maintenance service under an optional one-year warranty offered with the computer products it sold. In 1994, Digital amended its warranty policy on certain computers. In order to promote sales of its new Alpha computers, Digital offered an extended three-year warranty on those computers. Digital embedded the costs associated with the warranty into the price of the Alpha computers. Digital also made the three-year warranty mandatory, refusing to offer a reduction in price to customers who asked to purchase the computer equipment without the extended warranty. In 1995, Digital broadened the extended warranty program **[**3]** by offering a mandatory three-year warranty on certain VAX computer products.

Plaintiff SMS is an independent service organization which specializes in the repair and maintenance of Digital computers. SMS provides maintenance and service to corporations and agencies that own Digital computers. SMS contends that Digital's new mandatory extended warranty violates federal ***antitrust law*** by making it difficult for SMS and other independent service organizations to compete with Digital in the market for service and maintenance of Digital computers.

SMS' theory of liability on its antitrust claim is that Digital violated *Section 2* of the Sherman Act, *15 U.S.C. § 2*, by attempting to monopolize the market for servicing and maintaining Digital computers. ***HN1***[] The elements of monopolization under *Section 2* are well settled:

> The offense of monopoly under *§ 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power.

Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 480, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992).

The key issue in dispute in this case is the definition **[**4]** of the relevant market. SMS asserts that the relevant market is the derivative aftermarket for servicing and maintaining Digital computers. Digital has approximately 91 percent of this narrow service market. If this service market is the relevant market, SMS will have satisfied the "monopoly power" element of its *Section 2* claim. In support of its position that the aftermarket is the relevant market, SMS relies on the Supreme Court decision in *Kodak. Id*. In *Kodak*, the Supreme Court held that, in certain circumstances, the derivative aftermarket for services could be the relevant market for antitrust purposes. *Id. at 476-477*.

Defendant Digital opposes this narrow definition of the relevant market. Digital argues that, as a matter of law, the relevant market for antitrust purposes is the primary market for the sale of computer equipment. Digital accounts for less than 30 percent of the computer equipment market. If the computer equipment market is determined to be the relevant market, SMS has conceded that it will be unable to satisfy the monopoly power requirement for a claim under *Section 2*. [1] In support of its position that the primary equipment market is the relevant **[**5]** market, **[*168]** Digital distinguishes *Kodak* from the case at bar and cites a number of circuit court decisions which have rejected attempts by plaintiffs "to shoehorn their allegations into [the] *Kodak* 'derivative aftermarket' model." *Lee v. Life Ins. Co. of North America, 23 F.3d 14, 18 (1st Cir. 1994)*. The Court is persuaded by the defendant's argument.

Kodak is distinguishable from the case at bar because in *Kodak* the manufacturer announced a restrictive change in its replacement parts policy which had a direct impact on "locked in" customers who had already purchased Kodak copiers. *Kodak, 504 U.S. at 476-477*. **[**6]** Kodak's changed policy was to limit the availability of replacement parts for copiers by selling replacement parts "only to buyers of Kodak equipment who use Kodak service or repair on their machines." *Id. at 458*. This new policy effectively limited the service and maintenance options available to customers who had purchased Kodak copiers in the past. The instant case is inapposite. Digital's new extended warranty did not limit the options available to customers who had purchased Digital computers in the past. In fact, the new warranty had no direct impact upon Digital's relationship with customers who had purchased Digital computer equipment prior to the implementation of the new warranty policy. Since Digital's new warranty policy affected only future customers, there is no Kodak-type "lock-in" in this case.

Moreover, in *Kodak*, the Supreme Court itself acknowledged that the bundling of products and services promotes competition and does not violate the antitrust laws. [2] In particular, the court stated that:

> It is undisputed that competition is enhanced when a firm is able to offer various marketing options, including bundling of support and maintenance service with **[**7]** the sale of equipment. Nor do such actions run afoul of the antitrust laws.

Kodak, 504 U.S. at 478-479 (*citing* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984))*.

---

[1] "Thirty percent of the computer market is not enough to confer substantial market power unless there are high barriers to competition. Rapid and continuing entry into the computer business, and the ease with which existing firms increase output, dispel any concerns about barriers to entry." *Digital Equipment Corp. v. Uniq Digital Technologies, Inc., 73 F.3d 756, 761 (7th Cir. 1996)*.

[2] In 1992, both Compaq and IBM, two of Digital's competitors in the market for the sale of computer equipment, began to offer three-year warranties on certain computers. Compaq's warranty was mandatory and the costs associated with the warranty were included in the price of the computer equipment.

All of the circuit courts which have addressed the issue agree with this language in *Kodak*. In *Lee v. Life Ins. Co. of North America, 23 F.3d 14 (1st Cir. 1994)*, the Court of Appeals for the First Circuit rejected plaintiffs' attempt to assert that the relevant market for an antitrust claim was the narrow aftermarket for health care services for undergraduate students enrolled at the University of Rhode Island. Instead, the Court ruled that the relevant market for antitrust purposes **[**8]** was the primary (university education) market. *Id. at 20*. The critical question according to the Court was whether the relevant policy and pricing information was available to customers before they made the initial purchase. In *Lee*, the Court of Appeals analyzed *Kodak* and noted that:

> Had previous customers known, at the time they bought their Kodak copiers, that Kodak would implement its restrictive parts-servicing policy, Kodak's "market power," i.e. its leverage to induce customers to purchase Kodak servicing could only have been as significant as its AEP [appreciable economic power] in the copier market.

Id.

The determinative factor for the Court of Appeals in *Lee* was that, unlike the customers in *Kodak*, all of the potential customers in *Lee* knew in advance about the allegedly restrictive health care services policy prior to purchasing the primary product; university education. The Court of Appeals stated:

> In the instant case, however, students know before their matriculation that they are buying a URI 'package' that includes at least two 'tied' products -- a URI education and on-campus health care service and insurances. As **[**9]** appellant failed to assert a colorable claim that URI had [market power] in the primary (university education) market, no Kodak-type 'lock-in' **[*169]** could have occurred in subsequent semesters.

Id.

The Court of Appeals for the Seventh Circuit used the same reasoning in affirming summary judgment for Digital which defended an antitrust counterclaim in *Digital Equipment Corporation v. Uniq Digital Technologies, 73 F.3d 756 (7th Cir. 1996)*. In that case, Uniq's counterclaim alleged that Digital was attempting to monopolize the market for the sale of operating systems used with Digital computers by bundling its operating system with all Digital computers it sold. The Court of Appeals for the Seventh Circuit held that since purchasers knew in advance about the bundling, the relevant market for antitrust purposes was the primary equipment market, not the derivative aftermarket. *Id. at 761-763*. Interestingly, in dicta, the *Digital* Court directly addressed the issue faced by the Court in this case:

> Suppose DEC [Digital] includes extensive manuals, or "free" support services, or operating systems, that consumers do not want . . . "Free" tech support is not free; customers **[**10]** pay for it in the price of the product, and a marginal cost of zero for calling means that it will be overused, and hence can add quite a bit to the price of a computer or a software package. Instead of paying DEC for something they do not want, customers will turn elsewhere - for other firms can increase their profit by satisfying users' demands . . . In a competitive market, pig-headed refusal to satisfy customers' preferences, or an attempt to charge for unwanted items, does not lead to monopoly prices; instead it leads to ruin as rivals step in to take the business. Preserving that market process, rather than regulating through the judicial system, is the objective of the antitrust laws.

Id. at 762.

The Court of Appeals for the Sixth Circuit agrees with this reasoning. In *PSI Repair Services, Inc. v. Honeywell, 104 F.3d 811 (6th Cir. 1997)*, the Court of Appeals ruled that a manufacturer was free to bundle products and service so long as the relevant pricing information was available to customers prior to the sale. *Id*. At 820. The Court specifically held that an antitrust plaintiff cannot succeed on a Kodak-type theory when the defendant has been otherwise forthcoming **[**11]** about its pricing structure and service policies and has not changed its policies so as to affect the service options available to prior purchasers. *Id*. The Court of Appeals ruled, as a matter of law, that where the allegedly restrictive policy did not affect customers who had already purchased the primary product, the relevant market was the primary equipment market, not the derivative aftermarket. *Id*. The Third Circuit and Fifth

Circuit have also accepted this interpretation of *Kodak. See* *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430 (3d Cir. 1997)*; *United Farmers Agents Ass'n v. Farmers Ins. Exch., 89 F.3d 233 (5th Cir. 1996)*.

The Court is persuaded by this great weight of authority. Since Digital's warranty policy was prospective and since information about Digital's mandatory three-year warranty has always been available to potential customers in advance, there is no Kodak-type lock-in in this case. The relevant market for antitrust purposes is the primary equipment market not the derivative aftermarket for service and maintenance of Digital computers. Since Digital does not have monopoly power in the market for sale of computer equipment, SMS has **[**12]** failed to meet an essential element of its *Section 2* antitrust claim.

The Court's determination that SMS has failed to meet its burden under *Section 2* of the Sherman Act is not necessarily dispositive. During oral argument, the plaintiff articulated for the first time a supplemental tying theory of liability, alleging that the mandatory nature of the extended warranty constituted an illegal tying. Although plaintiff claimed that it had not filed and was not making a typing claim, the issue was raised at oral argument. Therefore, the Court will address the tying issue.

HN2[] "A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product." *Kodak, 504 U.S. at 461*. Such an arrangement is violative of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, if the seller has **[*170]** appreciable economic power in the tying market and if the arrangement affects a substantial volume of commerce in the tied market. *Id*.

In the instant case, there has been no illegal tying. The tying market in these circumstances is the computer equipment market. As noted above, Digital does not have appreciable economic power in that **[**13]** market. Hence, Digital's policy of tying a mandatory warranty with its equipment cannot be found in violation of *Section 1* of the Sherman Act.

For the foregoing reasons, the Court grants summary judgment for the defendant on the plaintiff's federal antitrust claim.

In the absence of any federal question, this Court declines to exercise supplemental jurisdiction over the remaining state law claims involving two Massachusetts corporations. All state law claims are dismissed without prejudice.

SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

An *FRCP 12(b)(6)* motion to dismiss tests the legal sufficiency of the claim or claims stated in the complaint. The complaint must be construed in the light most favorable to plaintiff. The court must accept as true all material allegations in the complaint, as well as all reasonable inferences to be drawn from these facts. Material allegations must be accepted as true no matter how improbable they may seem and without regard to any potential difficulties in proof. The court need not, however, accept as true allegations that contradict matters properly subject to judicial notice, that are conclusory or mere legal conclusions, that are unwarranted deductions of fact or unreasonable inferences, or that are contradicted by exhibits to the complaint.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] **Defenses, Demurrers & Objections, Motions to Dismiss**

An *FRCP 12(b)(6)* motion to dismiss may not be granted unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN3[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

In considering a motion to dismiss for lack of subject matter jurisdiction under *FRCP 12(b)(1)*, a court will ordinarily address the jurisdictional issues prior to considering other claims. The party asserting subject matter jurisdiction in federal court bears the burden of establishing that jurisdiction.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Evidence > Burdens of Proof > Allocation

HN4[] **Regulated Practices, Market Definition**

Because lack of antitrust injury or the failure to plead relevant market will defeat the court's subject matter jurisdiction, plaintiff bears the burden of demonstrating such injury and pleading an appropriate relevant market. Although plaintiff is indulged all favorable inferences on a motion under *FRCP 12(b)(6)*, such inferences do not extend to certain allegations in a complaint alleging violations of the antitrust statutes.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Sherman Act, Claims**

Mere conclusory allegations couched in factual allegations are not sufficient to state a cause of action, particularly in complex litigation such as alleged violations of the Sherman Act. Conclusory allegations which merely recite the litany of antitrust will not suffice.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Sherman Act, Claims**

An antitrust complaint must allege a relevant market in which the anticompetitive effect of a challenged activity can be assessed. The relevant product market includes all products reasonably interchangeable, the determination of which requires consideration of the cross-elasticity of demand. he outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] **Sherman Act, Claims**

An antitrust plaintiff is not precluded from arguing that a particular product is unique. In some instances one brand of a product can constitute a separate market. Of course, a plaintiff cannot survive a motion to dismiss simply by baldly asserting that a particular product is unique. Rather, the complaint in an antitrust case must explain why the market it alleges is the relevant, economically significant product market.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] **Sherman Act, Claims**

A plaintiff must allege antitrust injury, or injury to competition, before proceeding with an antitrust claim under either § 1 or 2 of the Sherman Act. Antitrust injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful.

Antitrust & Trade Law > Sherman Act > Claims

HN9[] **Sherman Act, Claims**

In determining whether a plaintiff was injured by an anticompetitive aspect or effect of a defendant's behavior, care must be taken in defining competition. Although competition that eliminates rivals reduces competition, exclusion of a competitor is not a sufficient condition for finding antitrust injury because reduction of competition does not invoke the Sherman Act until it harms consumer welfare. he antitrust laws were enacted for the protection of competition, not competitors.

Antitrust & Trade Law > Sherman Act > Claims

HN10[] **Sherman Act, Claims**

An act is deemed anticompetitive under the Sherman Act only if it harms both allocative efficiency and raises the prices of goods above competitive levels or diminishes their quality. Injury to competition requires showing proof of actual detrimental competitive effects such as output decreases or price increases even on a motion to dismiss.

Antitrust & Trade Law > Sherman Act > Claims

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN11[] **Sherman Act, Claims**

Removal of one or a few competitors need not equate with injury to competition. This privilege applies with equal force to claims for interference with prospective economic advantage.

Torts > ... > Contracts > Intentional Interference > Defenses

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN12[] **Intentional Interference, Defenses**

If a defendant has a present, existing economic interest to protect, such as a prior contract of his own, he is privileged to prevent performance of the contract of another which threatens it. Once plaintiff establishes an intent to interfere, defendant may prevail by proving the affirmative defense of privilege or justification to secure business for himself.

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN13[] **Commercial Interference, Contracts**

Alleged losses of speculative business opportunities do not make out claims for interference with contractual relations or prospective economic advantage.

Opinion by: VAUGHN R. WALKER

Opinion

ORDER

Since its inception in 1979, plaintiff Theme Co-op Promotions ("Theme") has provided its customers, **[*2]** packaged goods companies, with advertising, promotional and trade support services aimed at securing more in-store ads through so-called "related item merchandising." Related item merchandising offers consumers a coupon for the purchase of two or more "related" products, e.g., diet soda with low-calorie frozen entrees. See Amended Compl at P 11. Theme's FSI Plus program includes securing the tie-in partners, creating a joint coupon offer and using free standing inserts, in-store instant redeemable coupons, other in-store materials, retailer taggable television and radio ads and other performance incentives. See Amended Compl at P 5. An important, and Theme argues, a unique part of the promotional program that Theme offers its clients is the purchase of space in cooperative free standing inserts ("FSI"). An FSI is a multi-color advertising booklet inserted into Sunday newspapers; such newspapers account for 85% of all coupons distributed. FSIs are deemed "cooperative" if more than one packaged goods manufacturer advertises in the booklet and "solo" if the entire booklet is devoted to one product or advertiser.

According to Theme, standard industry practice calls for an FSI publisher **[*3]** to refrain from running competing products in the same FSI. This practice is known as "category exclusivity." See Amended Compl at P 8. Frequently, packaged goods companies will enter into long term exclusive contracts with one of the two FSI publishing companies. Id at P 10.

When a packaged goods company employs Theme to promote it and use related item advertisements, these exclusivity contracts have the potential to create problems if the related products have such contracts with different publishers. According to Theme, FSI publishers have historically allowed Theme to place its related item advertisements irrespective of the contractual arrangements that Theme's clients have with the FSI publishers.

In June 1995, Theme entered into a "right of first refusal" contract concerning its related item advertising business with defendant News America FSI, Inc ("News America"), a print media company involved in sales promotion and advertising primarily through the publication and distribution of coupons in FSIs. See Amended Compl at P 12. In early 1996, a dispute arose between plaintiff and defendant over the conditions of that contract. Theme contends that this dispute led News America **[*4]** to declare the contract null and void. Because the contract had been voided and Theme had pressing business needs, it entered into a "right of first refusal" contract with the other FSI publisher, Valassis Communications, Inc. On October 31, 1996, News America filed suit in San Francisco superior court against Theme and Valassis for intentional interference with contractual relations.

News America took the position that any related item advertising involving a packaged goods company with an exclusive contract with it had to be placed with News America. Theme maintains that News America stated that it no longer wished to do business with Theme; thus, while News America allows other Valassis clients to advertise with it if Valassis cannot provide them space, News America does not afford the same consideration to Valassis clients who also employ Theme. News America also allegedly disparages Theme within the industry by spreading rumors that Theme does not pay its bills and cannot otherwise be trusted.

Theme contends that News America's actions have interfered with its commitment contracts with packaged goods companies such as Benevia, Van DeKamps and Smuckers by forcing Theme to allow **[*5]** the packaged goods companies to purchase their own FSI space directly from News America instead of buying that space through Theme. See Amended Compl at P 33. Theme also asserts that News America's actions have interfered with its prospective business relationships with companies such as Benevia [1] and Gillette because these companies have refrained from doing business with Theme as a result of News America's policy. See id.

On December 18, 1997, Theme filed the instant action alleging that News America's conduct: (1) violates federal and state antitrust laws as well as the common law which prohibits unfair competition; (2) amounts to false advertising under the Lanham **[*6]** Act; (3) is an unfair business practice; (4) constitutes intentional interference with contractual relations as well as intentional and negligent interference with prospective economic advantage;' and (5) states a cause of action for trade libel.

---

[1] The court notes that it is impossible for Theme to claim that News America has disrupted both Benevia's contract with Theme and those parties' prospective economic relationship. Either Theme has a contract with Benevia or it has an economic relationship with Benevia that purportedly failed to flourish due to News America's actions toward Theme.

On May 29, 1998, the court issued an order that dismissed all of Theme's claims without prejudice save its claims for negligent interference with prospective economic advantage and trade libel. In finding that Theme's antitrust claims must be dismissed for failure to plead a relevant market, the court stated that because it appeared that coupons, television and radio ads could be substituted for FSIs, Theme would have to take account of those apparent substitutes in defining its relevant market. See May 29, 1998, order at 8-9. In its amended complaint, however, Theme alleges that "there are no meaningful substitutes, other promotional vehicles and/or general advertising tools such as television and radio advertising" which are "reasonably interchangeable alternatives to FSI couponing." Amended Compl at P 6. According to Theme, FSIs "enhance product sales through the use of discount coupons which a consumer can use to obtain discounts on the **[*7]** purchase of packaged goods * * *." See id.

Arguing that Theme's definition of the relevant market is once again inadequate, News America moves to dismiss the antitrust claims in the first amended complaint; News America also moves to dismiss Theme's claims for interference with prospective economic advantage and for intentional interference with contractual relations.
