Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Defenses, Demurrers & Objections, Motions to Dismiss**

In ruling on a motion for dismissal pursuant to *Fed. R. Civ. P. 12(b)(6)* the court must presume all of the well-pleaded allegations of plaintiffs' complaint to be true. In addition, the court must view those allegations in the light most favorable to the plaintiffs. Dismissal is proper only if it appears beyond doubt that the plaintiffs can prove no set of facts in support of their claim which would entitle them to relief.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Monopolies & Monopolization, Attempts to Monopolize**

No violation of the Sherman Act can be made out where a restraint upon trade or monopolization is the result of valid governmental action as opposed to private action. Moreover, the Sherman Act does not prohibit persons from associating together in an attempt to persuade a governmental entity to take particular action with respect to a law that would produce a restraint or a monopoly.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

Where an economically interested party exercises decision-making authority in formulating a product standard for a private association that comprises market participants, that party enjoys no Noerr immunity from any antitrust liability flowing from the effect the standard has of its own force in the marketplace. In contrast, where governmental imposition of a standard is the sole source of a trade restraint, those urging the governmental action enjoy absolute immunity from antitrust liability for the anticompetitive restraint.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Governments > State & Territorial Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Scope, Exemptions**

The Sherman Act was not intended to restrain a state or its officers or agents from activities directed by a state legislature. Moreover, a state supreme court, when acting in a legislative capacity, occupies the same position as that of a state legislature.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

The United States and its agencies or instrumentalities are not persons within the meaning of the Sherman Act.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Legal Ethics > Unauthorized Practice of Law

HN6[] **Equal Protection, Nature & Scope of Protection**

The distinction between lawyers and nonlawyers implicates neither a suspect classification nor a fundamental right.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Public Health & Welfare Law > Healthcare > General Overview

HN7[] **Equal Protection, Nature & Scope of Protection**

In applying the rational basis test, if this court can hypothesize plausible reasons for legislation that are within the legitimate goals of a government, nothing else is required to validate the governmental classification and it does not matter whether the reasons advanced actually motivated the legislative action.

Judges: James F. Holderman, United States District Judge.

Opinion by: HOLDERMAN

Opinion

[*290] MEMORANDUM OPINION AND ORDER

JAMES F. HOLDERMAN, UNITED STATES DISTRICT JUDGE.

I. BACKGROUND FACTS

Lawline is a non-incorporated association of lawyers, paralegals and laypersons founded in 1978 by plaintiff Thomas O'Connell Holstein, an Illinois attorney. According to plaintiffs' voluminous complaint [1] **[**2]** the purposes of Lawline are fourfold:

> (1) to use law students, paralegals, and lawyers to answer the legal questions of members of the general public over the telephone without charge and to assist them in *pro se* representation and routine quasi-administrative proceedings;
> (2) to make referrals to public and private agencies providing free legal services;
> (3) to refer members of the public with limited financial resources to young lawyers who charge reduced fees; and
> (4) to create a "prototype" legal delivery system as an alternative to legal aid which would be subsidized by referral fees.

(para. 29. [2])

In accordance with these purposes, for ten years the lawyers, paralegals, and laypersons of Lawline have answered legal questions over the telephone, have assisted litigants acting *pro se*, and have made attorney referrals. (paras. 30-32.) Although Lawline concentrates its services in Illinois, Indiana and Wisconsin, it also provides similar but more limited services on a national level through a toll free telephone number, 1-800-553-KNOW. Over 500,000 persons have been served by Lawline, which advertises extensively throughout the United States. (para. 38.)

Three individual plaintiffs bring this action: Mr. Holstein, managing director and one of the supervising attorneys for Lawline, Le Nore Nelson, officer and head paralegal for Lawline, and Joyce Novak, a layperson who received legal information over the telephone from Lawline (in this instance from Ms. Nelson) and used this information to, *pro se*, successfully obtain a discharge of her debts in bankruptcy. (paras. 1, 3-4.)

Plaintiffs bring this suit against myriad **[**3]** defendants: the American Bar Association ("ABA"), the Illinois State Bar Association ("ISBA"), the Chicago Bar Association ("CBA"), the Justices of the Illinois Supreme Court in their

---

[1] *Federal Rule of Civil Procedure 8* requires a complaint to contain a "short and plain" statement of the claim arranged in "simple, concise, and direct" averments. Plaintiffs have organized their complaint in over three hundred numbered paragraphs consuming more than one hundred pages. The complaint is often confusing, needlessly repetitious, and permeated with unnecessary evidentiary allegations. Thus, in addition to the deficiencies discussed in detail in this opinion, *Rule 8* provides an additional basis for dismissing plaintiffs' complaint. *See* *Mutuelle Generale Francaise Vie v. Life Assurance Co., 688 F. Supp. 386, 391 (N.D. Ill. 1988)*.

[2] All paragraph references are to plaintiffs' first amended complaint.

official capacities and the members of the Illinois Supreme Court Committee on Professional Responsibility (collectively "Justices"), the members of the Attorney Registration and Disciplinary Commission of the Illinois Supreme Court ("ARDC"), members of the Executive Committee of this court in their official capacities ("Executive Committee"), and M. Scott Michel, the United States Trustee for the Northern District of Illinois and his assistant Clifford L. Meacham (collectively "U.S. Trustee"). (paras. 6-15.)

Plaintiffs challenge the defendants' promulgation, adoption, and enforcement of certain portions of the ABA Model Code of Professional Responsibility ("ABA Model Code"). The ABA Model Code and ABA Model Rules prohibit lawyers from forming **[*291]** partnerships with nonlawyers if any activities of the partnership consist of the practice of law. Plaintiffs claim that this prohibition violates the Sherman Antitrust Act and plaintiffs' constitutional rights.

At the risk of overusing acronyms, the posture of **[**4]** this case is as follows: defendants ABA, ISBA, CBA, Justices, ARDC, and U.S. Trustee all have moved to dismiss plaintiffs' complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. The Executive Committee is unrepresented by counsel and has made no motions in this case. For the following reasons the defendants' motions to dismiss must be granted.

II. DISCUSSION

HN1[] In ruling on a motion for dismissal pursuant to *Federal Rule of Civil Procedure 12(b)(6)* the court must presume all of the well-pleaded allegations of plaintiffs' complaint to be true. *Miree v. DeKalb County, Georgia, 433 U.S. 25, 27 n. 2, 97 S. Ct. 2490, 2492 n. 2, 53 L. Ed. 2d 557 (1977)*. In addition, the court must view those allegations in the light most favorable to the plaintiffs. *Gomez v. Illinois State Board of Education, 811 F.2d 1030, 1039 (7th Cir. 1987)*. Dismissal is proper only if it appears "beyond doubt that the plaintiff[s] can prove no set of facts in support of [their] claim which would entitle [them] to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 102, 2 L. Ed. 2d 80 (1957)*.

A. *ABA Model Code*

Plaintiffs challenge the promulgation, adoption, and enforcement of certain provisions of the ABA Model Code.

[5]** In 1978 the Illinois Supreme Court created the Committee on Professional Responsibility to prepare a draft Code of Professional Responsibility for attorneys in Illinois. Using the ABA Model Code as a blueprint from which to work, the committee prepared a draft Code of Professional Responsibility and transmitted its proposal to the court in December of 1978.

After considering the comments of various individuals and bar associations, on June 3, 1980 the court officially adopted the Illinois Code of Professional Responsibility. (para. 73; Committee Comments, Preface, Illinois Code of Professional Responsibility, *Ill.Ann.Stat*. ch. 110A, Article VIII [Smith-Hurd 1985].) The three provisions of the Illinois Code of Professional Responsibility at issue here are identical to their ABA Model Code counterparts. *Compare* Illinois Code of Professional Responsibility Canon 3, Rule 3-101(A) and Rule 3-103 to ABA Model Code Canon 3, DR 3-101(A) and DR 3-103.

In 1982 the District Court for the Northern District of Illinois also embraced the ABA Model Code. General Rule 3.54(B) of this court states that any attorney authorized to practice before this court who fails to abide by the provisions **[**6]** of the ABA Model Code "may be disbarred from further practice before this Court." The Executive Committee has exclusive responsibility for enforcement of General Rule 3.54. General Rule 3.51.

Plaintiffs challenge the promulgation, adoption, and enforcement of certain portions of the ABA Model Code. They challenge three provisions in particular: (1) ABA Model Code Canon 3, which states that "[a] lawyer should assist in preventing the unauthorized practice of law"; (2) Disciplinary Rule 3-101(A), which states that "[a] lawyer shall not aid a nonlawyer in the unauthorized practice of law"; and (3) Disciplinary Rule 3-103 which states that "[a] lawyer shall not form a partnership with a nonlawyer if any of the activities of the partnership consist of the practice of law."

(para. 19.) Plaintiffs claim that these three provisions violate federal ***antitrust law*** and certain constitutional provisions. [3]

[7]** **[*292]** B. *Count I: Sherman Antitrust Act*

Count I of plaintiffs' complaint alleges that defendants' promulgation, adoption, and enforcement of the ABA Model Code provisions at issue violate the Sherman Act, *15 U.S.C. Sections 1* and *2*. For analytic convenience the defendants in this case can be divided into two groups: the private associations (ABA, ISBA, and CBA) and the governmental actors (the Justices, the Executive Committee, and the U.S. Trustee).

1. The Private Associations

It is undisputed that if plaintiffs are restrained from practicing law, it is because of the Illinois Supreme Court's enactment of the Illinois Code of Professional Responsibility and this court's adoption of General Rule 3.54. However, in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* the Supreme Court held that ***HN2***[] no violation of the Sherman Act can be made out where a restraint upon trade or monopolization is the result of valid governmental action as opposed to private action. *365 U.S. at 136, 81 S. Ct. at 529*. Moreover, the Sherman Act does not prohibit persons from associating together in an attempt to persuade a governmental entity to take particular **[**8]** action with respect to a law that would produce a restraint or a monopoly. *Id*.

Citing *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* plaintiffs seek to escape the effect of the *Noerr* doctrine by arguing that a private association's promulgation and adoption of particular standards do not qualify for *Noerr* immunity simply because those standards are routinely adopted by state and local governments. However, as the CBA ably notes, this case is unlike *Allied Tube*. In *Allied Tube* the anticompetitive effect at issue was caused solely by a private association's action -- in that case exclusion of plaintiff's product from the association's code. No damages were imposed for the incorporation of that code by any government. *108 S. Ct. at 1937*. The Court held:

> ***HN3***[] At least where, as here, an economically interested party exercises decision-making authority in formulating a product standard for a private association that comprises market participants, that party enjoys no *Noerr* immunity from any antitrust liability flowing from the effect the standard has *of its own force* in the marketplace.

108 S. Ct. at 1942 (emphasis **[**9]** added).

In contrast, where governmental imposition of a standard is the sole source of a trade restraint, "those urging the governmental action enjoy absolute immunity from antitrust liability for the anticompetitive restraint." *Allied Tube, 108 S. Ct. at 1936*. Thus, even if the defendant private associations in this case participated in the process that lead

---

[3] Plaintiffs also challenge "Rule 3-101(a) and 3-103(a) of the newly proposed Illinois Code." (*See, e.g.*, para. 19.)

On February 8, 1990 the Illinois Supreme Court repealed the Code of Professional Responsibility and replaced it with the Illinois Rules of Professional Conduct ("New Rules"). *See* Order entered February 8, 1990, reported in the Chicago Daily Law Bulletin, Feb. 14, 1990, at 4-6. The New Rules take effect August 1, 1990.

The Justices argue that a challenge to the New Rules is not yet ripe. However, the court need not address the ripeness issue: the substantial similarity between the New Rules and the challenged language of the ABA Model Code compels the same result in this case. *See, e.g.*, New Rule 5.4(b) ("A lawyer shall not form a partnership with a nonlawyer if any of the activities of the partnership consist of the practice of law.") and New Rule 5.5 ("A lawyer shall not . . . assist a person who is not a member of the bar in the performance of activity that constitutes the unauthorized practice of law.").

to adoption of provisions of the ABA Model Code, they are immune from antitrust liability because plaintiffs have plead no facts demonstrating that the Code has any significant effect beyond that attributable to its adoption and enforcement by the Illinois Supreme Court and this court. [4]

[10]** In addition to their participation in the process leading to the adoption of the ABA Model Rules by the Illinois Supreme Court and Executive Committee, plaintiffs allege that certain ethics opinions rendered by the private associations violate the Sherman Act. (paras. 178, 220, 249.) However, any antitrust claims based on those ethics opinions are barred by the Clayton Act's **[*293]** four-year statute of limitations. *15 U.S.C. § 15b*.

The Illinois Supreme Court and this court adopted the relevant provisions of the ABA Model Code in 1980 and 1982, respectively. [5] Moreover, these two courts exercise exclusive power to regulate and discipline attorney conduct. *See, e.g., People ex. rel. Brazen v. Finley, 119 Ill. 2d 485, 519 N.E.2d 898, 901-02, 116 Ill. Dec. 683 (1988)*; General Rule 3.51. Therefore, any ethics opinions issued by the private associations could not have had any cognizable anticompetitive effects after 1982. *Cf. In re Airport Car Rental Antitrust Litigation, 521 F. Supp. 568, 574 (N.D. Cal. 1981)*, *aff'd*, *693 F.2d 84 (9th Cir. 1982)*. Because plaintiffs filed their original complaint six years after there could have been any significant anticompetitive effect from the private **[**11]** associations' ethics opinions, plaintiffs' claims based on these opinions are time-barred.

Therefore, the *Noerr* doctrine and the statute of limitations for federal antitrust cases immunize defendants ABA, ISBA, and CBA from the antitrust liability alleged in plaintiffs' complaint.

2. The Governmental Actors

The Justices, the Executive Committee, the ARDC, and the U.S. Trustee also are immunized from antitrust liability, but for different reasons.

The Justices and the ARDC are immune from antitrust liability under the state-action doctrine of *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. In *Parker v. Brown* the Supreme Court held that ***HN4***[] the Sherman Act was not intended to restrain a state or its officers or agents from activities directed by a state legislature. *317 U.S. at 350-51, 63 S. Ct. at 313*. Moreover, a state supreme **[**12]** court, when acting in a legislative capacity, occupies the same position as that of a state legislature. *Bates v. State Bar of Arizona, 433 U.S. 350, 360, 97 S. Ct. 2691, 2697, 53 L. Ed. 2d 810 (1977)*. Therefore, the Illinois Supreme Court's adoption and enforcement of the challenged provisions of the ABA Model Code are exempt from Sherman Act liability as state action. *Hoover v. Ronwin, 466 U.S. 558, 568, 104 S. Ct. 1989, 1995, 80 L. Ed. 2d 590 (1984)*.

Moreover, the members of the ARDC serve merely as agents of the Illinois Supreme Court. *See Ill. Ann. Stat*. ch. 110A, paras. 751-753 (Smith-Hurd Supp 1989.); *In re Mitan, 75 Ill. 2d 118, 387 N.E.2d 278, 280, 25 Ill. Dec. 622 (1979)* ("The [ARDC] and its various officers, as well as the Inquiry Board, the hearing panel and the Review Board, serve only as agents of this court in administering the disciplinary functions that have been delegated to them."). Therefore, the members of the ARDC, too, are exempt from antitrust liability. *Bates, 433 U.S. at 361, 97 S. Ct. at 2691*; *Hoover, 466 U.S. at 572-73, 104 S. Ct. at 1997*.

Additionally, the Executive Committee and U.S. Trustee also are insulated from antitrust liability. ***HN5***[] The United States and its agencies or instrumentalities **[**13]** are not "person[s]" within the meaning of the Sherman Act. *Rex Systems, Inc. v. Holiday, 814 F.2d 994, 997 (4th Cir. 1987)*; *see also North Jersey Secretarial School, Inc. v. McKiernan, 713 F. Supp. 577, 584 (S.D.N.Y. 1989)* ("Antitrust lawsuits brought against United States agencies and their officials cannot be maintained."). This court's Executive Committee consists of five federal district court

---

[4] Although plaintiffs argue in their memorandum in opposition that the associations' adoption of the ABA Model Code and ABA Model Rules restrain competition "of their own force," they fail to allege any anticompetitive effects directly attributable to the associations' involvement with these codes and *not* the Illinois Supreme Court and Executive Committee's adoption thereof.

[5] According to the Office of the Clerk for the United States District Court for the Northern District of Illinois the present form of Local Rule 3.54(b) was adopted October 4, 1982.

judges charged with the responsibility of supervising and disciplining attorneys admitted to practice before this court. (para. 15; General Rule 3.51-3.56; *Brown v. McGarr, 774 F.2d 777, 782 (7th Cir. 1985)*.) Plaintiffs sue the members of the Executive Committee only in their official capacity. (para. 15.) Therefore, the actions of the members of the Executive Committee in adopting and enforcing the provisions of the ABA Model Code in question are exempt from antitrust liability. *Rex Systems, 814 F.2d at 997*.

Plaintiffs have alleged that the U.S. Trustee violated the Sherman Act by moving in the bankruptcy court for an order both requiring Lawline to disgorge a fee **[*294]** received for the unauthorized practice of law and enjoining Lawline from further bankruptcy practice. (para. **[**14]** 201 and Exhibit G attached to complaint.) Plaintiffs also complain that the U.S. Trustee reported Lawline's alleged unauthorized practice of law to the ARDC. (paras. 190-94).

The U.S. Trustee and his assistant, however, are federal executive officers appointed by the United States Attorney General. *28 U.S.C. §§ 581-82*. Among the official duties of the U.S. Trustee is the monitoring of attorney fee applications in bankruptcy cases. *28 U.S.C. § 586(a)(3)(A)*. The U.S. Trustee may raise and appear and be heard on any issue relating to his responsibilities in a bankruptcy case. Bankruptcy Rule X-1009. Challenging unwarranted fee applications is a part of the U.S. Trustee's duties. *In re Pierce, 809 F.2d 1356, 1359 n. 8 (8th Cir. 1987)*. Therefore, as a federal officer, the U.S. Trustee's alleged actions before the bankruptcy court are exempt from federal antitrust liability. *Rex Systems, 814 F.2d at 997*.

Moreover, while the U.S. Trustee's reporting of the unauthorized practice of law to the ARDC is not specifically provided for by statute, plaintiffs have presented (and this court has found) no authority for the proposition that making such a report exceeds the U.S. Trustee's official **[**15]** duties. On the contrary, the Supreme Court had stated that such free and open cooperation between federal and state officers is to be "commended and encouraged." *Elkins v. United States, 364 U.S. 206, 221, 80 S. Ct. 1437, 1446, 4 L. Ed. 2d 1669 (1960)*.

Thus, plaintiffs have alleged no facts supporting allegations that the U.S. Trustee performed anything other than official duties and acted in anything other than an official capacity in dealing with Lawline. Therefore, as federal officials the U.S. Trustee and his assistant also are not subject to federal antitrust liability in this case. *Rex Systems, 814 F.2d at 997*.

Because all of the defendants in this case are immune from federal antitrust liability, Count I must be dismissed.

C. *Count II: Section 1983 Claim*

Plaintiffs bring Count II of their complaint under *42 U.S.C. Section 1983* ("*Section 1983*"). Plaintiffs allege that defendants' promulgation, adoption, and enforcement of the portions of the ABA Model Code at issue violated the *First Amendment*, the Due Process Clause, and the *Equal Protection Clause*.

1. State Action

It is axiomatic that state action is a necessary element of *Section 1983* and *Fourteenth Amendment* claims. *National **[**16]** Collegiate Athletic Association v. Tarkanian, 488 U.S. 179, 109 S. Ct. 454, 461, 102 L. Ed. 2d 469 (1988)*. However, as the Court stated in *Tarkanian*:

> In *Bates v. State Bar of Arizona, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*, we established that the State Supreme Court's enforcement of disciplinary rules transgressed by members of its own bar was state action. Those rules had been adopted *in toto* from the American Bar Association Code of Professional Responsibility. *Id., at 360 n. 12, 97 S. Ct., at 2697 n. 12*. *It does not follow, however, that the ABA's formulation of those disciplinary rules was state action*. The State Supreme Court retained plenary power to reexamine those standards and, if necessary, to reject them and promulgate its own. See *id., at 362, 97 S. Ct., at 2698*.

109 S. Ct. at 463 (emphasis added; footnote omitted). Thus, both *Bates* and *Tarkanian* definitively resolve that the alleged action by the private associations of promulgating a disciplinary code later adopted and enforced by the Illinois Supreme Court and this court is not state action. [6] Therefore, Count II must be dismissed against the **[*295]** ABA, ISBA, and CBA for failure to state a claim **[**17]** upon which relief can be granted. [7]

2. Constitutional Provisions

Because Count II fails to state a claim against the private associations, only the Justices, the Executive Committee, the ARDC, and the U.S. Trustee remain. Plaintiffs allege that by adopting and enforcing the portions of the ABA Model Code at issue these defendants violated the First Amendment, the Due Process Clause, and the Equal Protection Clause. It is true that these state actors enjoy judicial and prosecutorial immunity from liability for money damages in this case. *See, e.g.,* Galahad v. Weinshienk, 555 F. Supp. 1201, 1204 (D. Colo. 1983); Supreme Court of Virginia v. Consumers Union, Etc., 446 U.S. 719, 731-737, 100 S. Ct. 1967, 1974-1977, 64 L. Ed. 2d 641 (1980). However, because plaintiffs also seek a declaration that the provisions of the ABA Model Code at issue are unconstitutional, this court's determination of the constitutional challenge will most efficiently resolve defendants' motions to dismiss.

a. Equal Protection and Due Process

The Justices aptly note, as they have throughout their well-reasoned memoranda, that to the extent plaintiffs have raised **[**19]** equal protection and due process challenges to the ABA Model Rules in question the standard of review is the same and thus both claims should be treated together. Sutker v. Illinois State Dental Society, 808 F.2d 632, n. 1 (7th Cir. 1986).

As noted, Disciplinary Rules 3-101(A) and 3-103 of the ABA Model Code prevent lawyers from making certain arrangements with nonlawyers involving the unauthorized practice of law. However, ***HN6***[] the distinction between lawyers and nonlawyers implicates neither a suspect classification nor a fundamental right. *Cf.* Illinois Health Care Assoc. v. Dept. of Public Health, 879 F.2d 286, 288 (7th Cir. 1989); Sutker, 808 F.2d at 634. Therefore, the lawyer/non-lawyer classification created by the ABA Model Code provisions at issue are presumed constitutional and need only be "rationally related to a legitimate state interest" to survive equal protection or due process analysis. Sutker, 808 F.2d at 634.

HN7[] In applying the rational basis test, if this court "can hypothesize plausible reasons for legislation that are within the legitimate goals of a government, nothing else is required to validate the governmental classification and it does not matter **[**20]** whether the reasons advanced actually motivated the legislative action." Illinois Health Care Assoc., 879 F.2d at 289, *quoting* Evans v. City of Chicago, 873 F.2d 1007, 1016 (7th Cir. 1989).

The Illinois Supreme Court has stated that the purpose of the attorney disciplinary process is "to safeguard the public, maintain the integrity of the profession, and protect the administration of justice from reproach." In re

---

[6] *See also,* Consumers Union of the United States, Inc. v. American Bar Association, 427 F. Supp. 506, 516 (E.D. Va. 1976) (educational programs, counselling, and the drafting of model provisions to influence a state bar without more do not constitute state action), *vacated on other grounds in light of* ***Bates, Virginia State Bar v. Consumers Union of the United States, Inc., 433 U.S. 917, 97 S. Ct. 2993, 53 L. Ed. 2d 1104 (1977)***.

[7] Plaintiffs' allegations that the private associations somehow conspired with the state actors do not save Count III. In order to sustain a Section 1983 conspiracy claim there must be some evidence of some concerted effort or plan between the private associations and the state actors to deny plaintiffs their constitutional rights. Moore v. Marketplace Restaurant, Inc., 754 F.2d 1336, 1352 (7th Cir. 1985); Mirshak v. Joyce, 652 F. Supp. 359, 369 (N.D. Ill. 1987).

Plaintiffs have alleged no such facts. On the contrary, plaintiffs incredibly state in their memorandum in response to the motions to dismiss that a more definitive statement of conspiracy facts might subject them to sanctions under Federal Rule of Civil Procedure 11. (Memorandum at 36.) However, plaintiffs cannot file a complaint merely to gain access to discovery with the hopes of later finding facts to support their otherwise insufficient allegations. Count II must be dismissed. **[**18]**

Schelly, 94 Ill. 2d 234, 446 N.E.2d 236, 239, 68 Ill. Dec. 502 (1983). Disciplinary rules preventing lawyers from aiding nonlawyers in the unauthorized practice of law and from forming partnerships with nonlawyers if any of the activities of the partnership consist of the practice of law are rationally related to those goals. [8] **[**21]** Therefore, plaintiffs' **[*296]** equal protection and due process claims must be dismissed. [9]

b. First Amendment

Plaintiffs' *First Amendment* claims also must be dismissed. In *Turner v. American Bar Association, 407 F. Supp. 451 (N.D. Tex. 1975)* plaintiffs, citing much of the same case law as the plaintiffs in this case, claimed that they had, *inter alia*, a *First Amendment* right to have unlicensed lay counsel assist them in court proceedings. The court disagreed. Said the court:

> [Freedom of association cases such as *NAACP v. Button, 371 U.S. 415, 83 S. Ct. 328, 9 L. Ed. 2d 405 (1963)]* did not involve the question of securing redress of grievances in Court **[**22]** by unlicensed counsel. Rather, they held that collective activity undertaken to obtain meaningful access to the Courts is a fundamental right within the protection of the *first Amendment*, and that a State cannot, under its unauthorized practice of law statutes or solicitation of legal business statutes, prohibit such activity. . . . This Court [is] holding that the Constitution of the United States, in particular the *First* and *Sixth Amendments*, does not grant to the Plaintiffs the right to have an unlicensed layman represent them in Court proceedings. The corollary of this holding is that unlicensed laymen cannot under the Constitution demand the right to represent other litigants.

407 F. Supp. at 478. Thus, the court in *Turner* rejected the plaintiffs' claims that allowing only licensed counsel to represent others in court violated the *First Amendment* guarantees of either free association or free speech. *Id. at 479*; *see also Lindstrom v. State of Illinois, 632 F. Supp. 1535, 1538-39 (N.D. Ill. 1986)*, *dismissed without opinion*, *828 F.2d 21 (7th Cir. 1987)*.

For the same reasons, this court holds that the ABA Model Code prohibitions on aiding nonlawyers in the unauthorized **[**23]** practice of law and on forming partnerships with nonlawyers if any of the activities of the partnership consist of the practice of law do not violate any *First Amendment* guarantees. Therefore, Count II as well must be dismissed for failure to state a claim upon which relief can be granted.

D. *Count III*

Finally, in Count III plaintiffs seek relief under the Declaratory Judgment Act, *28 U.S.C. Sections 2201-2202*. (para. 18.) However, the Declaratory Judgment Act is strictly remedial in nature and does not provide a separate basis for subject matter jurisdiction. *Skelly Oil Co. v. Phillips Petroleum Co., 339 U.S. 667, 671-72, 70 S. Ct. 876, 879, 94 L. Ed. 1194 (1950)*. Therefore, dismissal of Counts I and II of plaintiffs' complaint compels dismissal of Count III as well.

III. CONCLUSION

---

[8] *See, e.g., ABA Model Code of Professional Responsibility* EC 3-1 (1987) ("The prohibition against the practice of law by a layman is grounded in the need of the public for integrity and competence of those who undertake to render legal services. Because of the fiduciary and personal character of the lawyer-client relationship and the inherently complex nature of our legal system, the public can better be assured of the requisite responsibility and competence if the practice of law is confined to those who are subject to the requirements and regulations imposed upon members of the legal profession."); *Gassman v. State Bar, 18 Cal. 3d 125, 553 P.2d 1147, 1151, 132 Cal. Rptr. 675 (1976)* ("prohibited fee-splitting between lawyer and layman . . . poses the possibility of control by the lay person, interested in his own profit, rather than the client's fate . . . .").

[9] In their complaint plaintiffs also include language alleging that the challenged provisions of the ABA Model Code are unconstitutionally vague. Apparently plaintiffs object to the phrase "practice of law." However, it has long been settled that this language is sufficiently clear to withstand constitutional scrutiny. *Hackin v. Arizona, 102 Ariz. 218, 427 P.2d 910, 912-13 (1967)*, *appeal dismissed*, *389 U.S. 143, 19 L. Ed. 2d 347, 88 S. Ct. 325* (for want of a federal question); *see also Wright v. Lane County Dist. Court, 647 F.2d 940, 941 (9th Cir. 1981)*.

For the reasons stated in this memorandum opinion and order plaintiffs' complaint is DISMISSED under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted. This case is dismissed in its entirety.

Soap Opera Now, Inc. v. Network Pub. Corp.

United States District Court for the Southern District of New York

May 30, 1990

No. 88 Civ. 984 (RJW)

Reporter

737 F. Supp. 1338 *; 1990 U.S. Dist. LEXIS 6469 **; 1990-1 Trade Cas. (CCH) P69,041

SOAP OPERA NOW, INC., Plaintiff, v. NETWORK PUBLISHING CORPORATION d/b/a SOAP OPERA DIGEST, Defendant

Core Terms

soap opera, monopolization, advertising, relevant market, competitor, newsletter, summary judgment, monopoly power, subscribers, facilities, monopolist, viewers, leveraging, magazine, monopoly, products, attempt to monopolize, antitrust, consists, compete, parties, consumers, marketing, publish, cases, soap, antitrust claim, interchangeable, undisputed, pages

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

The standards for granting summary judgment are well established. A court may grant this extraordinary remedy only when it is clear both that no genuine issue of material fact remains to be resolved at trial and that the movant is entitled to judgment as a matter of law. In deciding the motion, the Court is not to resolve disputed issues of fact, but rather, while resolving ambiguities against the moving party, to assess whether material issues remain for the trier of fact. Only where the entire record would inevitably lead a rational trier of fact to find for the moving party is summary judgment warranted.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN2[] **Summary Judgment, Opposing Materials**

While the party seeking summary judgment bears the initial burden of demonstrating the lack of material factual issues in dispute, the non-movant, who must sustain the ultimate burden of proof, must demonstrate in opposing the summary judgment motion that there is some evidence which would create a genuine issue of material fact. Conclusory allegations will not suffice to create such a genuine issue. There must be more than a scintilla of evidence, and more than some metaphysical doubt as to the material facts.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

HN3[] **Actual Monopolization, Monopoly Power**

In the context of a claim of illegal monopolization, a refusal to deal may constitute a form of willful acquisition or maintenance of monopoly power, satisfying the second element of a monopolization claim. A refusal to deal with a competitor may also comprise an element of a claim of attempted monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Mergers & Acquisitions Law > Antitrust > Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN4[] **Scope, Monopolization Offenses**

The offense of monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, consists of two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Monopolies & Monopolization, Attempts to Monopolize**

To make out a successful claim of attempted monopolization, a plaintiff must demonstrate: (1) anti-competitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

The "essential facilities" doctrine is often treated as a distinct claim under *§ 2* of the Sherman Act, *15 U.S.C.S. §2*. However, the United States District Court for the Southern District of New York finds it analytically more helpful to conceive of the essential facilities doctrine as constituting not a distinct claim under *§ 2*, but instead either as a form of, or evidence of, a firm's willful acquisition or maintenance of monopoly power in satisfaction of the second element of a monopolization claim, or in certain situations as an element of an attempt claim.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN7[] **Monopolies & Monopolization, Attempts to Monopolize**

A refusal to deal may amount to an attempt to monopolize when a firm with monopoly power in one market attempts through the use of that power to monopolize a related or downstream market. To withstand summary judgment on a claim of attempt to monopolize a second market by leveraging a monopoly position in a first market, a plaintiff must demonstrate that the defendant: (1) intended to monopolize the second market; (2) engaged in conduct designed to carry out that intent; and (3) had a dangerous probability of success.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8[] **Regulated Practices, Monopolies & Monopolization**

The relevant market in a *§2*, *15 U.S.C.S. § 2*, consists of the geographic market -- the location in which a potential buyer may rationally seek specific goods or services -- and the product market, the boundaries of which are set by the reasonable interchangeability of use or the cross-elasticity of demand.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Relevant Market, Product Market Definition**

For antitrust purposes, a product market consists of a class of products -- either goods or services -- which are reasonably interchangeable with one another such that producers of the products have the ability to take significant amounts of business away from each other. Although it is proper to identify the ultimate consumer of the product in order to make a determination as to whether two products are reasonable substitutes for one another, and therefore are in the same product market, a definition of the market itself which consists of consumers or potential consumers may, obfuscate the issues of monopoly power and reasonable interchangeability.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN10[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

In order to make out a claim under the essential facilities doctrine, a plaintiff must demonstrate a competitor's inability practically or reasonably to duplicate the essential facility, and the denial of the use of the facility to a competitor.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

The antitrust laws protect competition, not competitors. Simply because a particular plaintiff with peculiar advertising needs decides that it cannot remain profitable without advertising in a certain publication, that publication does not automatically rise to the level of an "essential facility" in the general market unless some substantial number of market entrants or competitors would also be foreclosed.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

Business & Corporate Compliance > ... > Transportation Law > Air & Space Transportation > Antitrust

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Even if a defendant is a monopolist in its product market, unless plaintiff and defendant are in competition with one another, defendant has no duty to deal with plaintiff.

Opinion by: WARD

Opinion

[*1339] ROBERT J. WARD, UNITED STATES DISTRICT JUDGE.

In a Memorandum Decision filed May 24, 1988, this Court granted the motion of plaintiff Soap Opera Now, Inc. ("SONOW") for a preliminary injunction requiring defendant Soap Opera Digest and its publisher Network Publishing Corporation (collectively, the "Digest") to include plaintiff's advertisements in Soap Opera Digest. The parties subsequently completed discovery, and defendant now moves for summary judgment pursuant to *Rule 56, Fed. R. Civ. P.* For the reasons that follow, the Court vacates the preliminary injunction, grants defendant's motion for summary judgment with respect to plaintiff's antitrust claims, and dismisses the pendent state claim for lack of subject matter jurisdiction.

BACKGROUND

The history of the instant litigation is both varied and contentious. Soap Opera Now is a six-page, black and white weekly newsletter, published out of the home of one of plaintiff's principals, which **[**2]** focuses on daytime soap opera news, gossip and coming attractions. Its readership has ebbed and flowed from month to month since its inception in 1983, ranging during 1987, the year preceding the commencement of the instant action, from 5,209 to 6,728. Soap Opera Digest is a well-known bi-weekly, 150-page color soap opera magazine with 350,000 subscribers and a readership of 1,050,000.

From 1983 until November 1987, plaintiff advertised its newsletter in the Digest. During those years, the relationship between the parties was somewhat stormy, with the Digest from time to time threatening to terminate SONOW's ads and imposing various conditions on their continued publication. In November of 1987, the Digest cancelled plaintiff's advertisements, and thereafter, on February 16, 1988, plaintiff moved by order to show cause for a preliminary injunction requiring the Digest to publish SONOW's ads. In its complaint, SONOW alleged that the Digest was guilty of an illegal attempt to monopolize trade in violation of *§ 2* of the Sherman Antitrust Act of 1890, as amended, *15 U.S.C. § 2 (1982)*, and damages resulting therefrom. [1] In addition, the complaint alleged that the Digest, by its refusal **[**3]** to publish SONOW's ads, had breached an alleged contract between the parties.

On February 19, 1988, the Court heard oral argument on plaintiff's motion for a preliminary injunction. Finding that plaintiff **[*1340]** had adequately demonstrated irreparable injury, a balance of hardships tipping decidedly in its favor, and sufficiently serious questions going to the merits to make them a fair ground for litigation, the Court granted plaintiff's motion and directed defendant to permit SONOW to advertise in the Digest during the pendency of the action at the same rates that it charged for ads by similar publications. [2]

---

[1] SONOW later amended its complaint to add a claim of illegal monopolization.

[2] This directive alone produced a flood of letters between the parties and to the Court, with the parties unable to agree on appropriate price and payment terms for the SONOW ads. The parties ultimately entered into an escrow agreement, pursuant to which SONOW agreed to pay into an escrow account the differential between the normal rate card price and the discount price to which SONOW claimed it was entitled, pending the final outcome of the case. Subsequent allegations of late payments,

[4]** According to plaintiff, the Digest is the dominant entity in the relevant market, which it defines as "the market for the mass dissemination of soap opera news," consisting of "subscribers and potential subscribers of soap opera publications." Plaintiff's Memorandum of Law in Opposition to Defendant's Motion for Summary Judgment, filed December 8, 1988, at 9 ("Plaintiff's Opposition Brief"). Plaintiff contends that the Digest's share in this market is approximately 80 percent. Defendant, on the other hand, asserts that the relevant market should be more broadly defined to include general interest publications that regularly feature soap opera news, such as *TV Guide*. Thus, it claims, the market share of the Digest is not nearly so great as alleged by plaintiff. Further, defendant argues that plaintiff has failed to present any evidence to support its claim that it and the Digest are in the same relevant market.

Defendant has submitted evidence suggesting that no barriers exist to entry into the relevant market, even as narrowly defined by plaintiff. It is undisputed that the actual product -- soap opera news -- is readily available to potential publishers from the networks. In **[**5]** addition, in order to start a newsletter one needs only "good writers, an organization to produce and assemble it and mail it promptly and access to a place to promote it." Appendix to Defendant's Motion for Summary Judgment at 216 ("Def. App.") (Deposition of Kenneth Stein). In fact, SONOW was begun with a very small initial capital investment. It is further undisputed that several soap opera publications, in addition to the Digest, have either existed for several years or have recently been started. These publications do not advertise in the Digest. Plaintiff, however, asserts that the competing publications are either very small, very unstable, or infrequently published in comparison to the Digest.

The gravamen of plaintiff's claim is that it will be unable to compete successfully, or indeed to survive, in the relevant market unless it is able to advertise SONOW in the pages of the Digest. Thus, plaintiff argues that the Digest's advertising pages constitute an "essential facility" in the relevant market. According to plaintiff, past attempts to promote its product in other media have been unsuccessful. Although SONOW concededly places ads in some of the smaller and newer soap opera **[**6]** magazines, it claims that these are not sufficient to maintain it as a viable entity for any length of time, although it admits that ads placed in a recent market entrant, Soap Opera Update, have been profitable. SONOW has never done demographic or market studies in an attempt to discover alternate methods of reaching its target audience, which it defines as soap opera "fanatics." It is plaintiff's contention that all of these "fanatics" read the Digest, and indeed that all of its readers are also Digest readers.

Defendant insists that, even if plaintiff were able to demonstrate that the Digest has monopoly power in the relevant market, it is not an essential facility both because other competitors in the market are able to survive without advertising in the Digest, and because there exist alternative methods by which SONOW can reach its audience -- namely, those methods used by **[*1341]** the Digest itself, as well as other promotional techniques available to newsletters, including direct mailings and flyers. The Digest intimates that SONOW's out-of-hand rejection of various alternate marketing vehicles is insufficient to support the instant claims, and demonstrates only that SONOW wishes to **[**7]** take advantage of the Digest's aggressive marketing techniques by reaching its readers without investing the resources that other competitors in the market must expend.

Plaintiff's antitrust claims ultimately rest on its contention that a black and white newsletter such as SONOW, which contains no advertising pages and has a relatively tiny circulation, cannot survive as a viable entity using the same types of promotion and marketing techniques as the Digest, a "gorgeous" four-color magazine. According to plaintiff, the only way that a small newsletter such as Soap Opera Now can remain a viable competitor in the market for the mass dissemination of soap opera news is to reach its target consumers by advertising in the publication which plaintiff insists they all read -- the Digest.

DISCUSSION

I. *Summary Judgment*.

---

improper placement of the ads, and disputes over the propriety of the escrow agreement's continued application have constituted a continuing saga in the tortured history of this case.

HN1[] The standards for granting summary judgment in this Circuit are well-established. A court may grant this extraordinary remedy only when it is clear both that no genuine issue of material fact remains to be resolved at trial and that the movant is entitled to judgment as a matter of law. In deciding the motion, the Court is not to resolve disputed issues of fact, but **[**8]** rather, while resolving ambiguities against the moving party, to assess whether material issues remain for the trier of fact. *Knight v. U.S. Fire Ins. Co., 804 F.2d 9, 11 (2d Cir. 1986)*, *cert. denied*, *480 U.S. 932, 94 L. Ed. 2d 762, 107 S. Ct. 1570 (1987)* (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-50, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986))*. Only where the entire record would inevitably lead a rational trier of fact to find for the moving party is summary judgment warranted. *National Railroad Passenger Corp. v. City of New York, 882 F.2d 710 (2d Cir. 1989)*.

Although the movant faces a difficult burden to succeed, motions for summary judgment, properly employed, permit a court to terminate frivolous claims and defenses, and to concentrate its resources on meritorious litigation. *Knight v. U.S. Fire Ins. Co., supra, 804 F.2d at 12*. The motion thus:

> is properly regarded not as a disfavored procedural shortcut, but rather as an integral part of the Federal Rules as a whole, which are designed "to secure the just, speedy and inexpensive determination of every action." *Fed. Rule Civ. Proc. 1*. . . . *Rule 56* must be construed with due regard not only for the rights of persons asserting claims and defenses **[**9]** that are adequately based in fact to have those claims and defenses tried to a jury, but also for the rights of persons opposing such claims and defenses to demonstrate in the manner provided by the Rule, prior to trial, that the claims and defenses have no factual basis.

Celotex Corp. v. Catrett, 477 U.S. 317, 327, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986).

HN2[] While the party seeking summary judgment bears the initial burden of demonstrating the lack of material factual issues in dispute, *Schering Corp. v. Home Ins. Co., 712 F.2d 4, 9 (2d Cir. 1983)*, "the non-movant, . . . who must sustain the ultimate burden of proof, must demonstrate in opposing the summary judgment motion that there is some evidence which would create a genuine issue of material fact." *Delaware & Hudson Railway Co. v. Consolidated Rail Corp., 902 F.2d 174, 177-78 (2d Cir. 1990)* (citing *Celotex Corp. v. Catrett, supra, 477 U.S. at 322-23*). "Conclusory allegations will not suffice to create such a genuine issue. There must be more than a 'scintilla of evidence', *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*, and more than 'some metaphysical doubt as to the material facts.' **[**10]** *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*." **[*1342]** *Twin Laboratories, Inc. v. Weider Health & Fitness, 900 F.2d 566, 568 (2d Cir. 1990)*. With the foregoing principles in mind, the Court turns to the instant motion.

II. *The Antitrust Claims*.

Plaintiff's amended complaint contains two substantive antitrust counts, consisting of a claim of illegal monopolization and a claim of attempted monopolization, both in violation of *§ 2* of the Sherman Antitrust Act, *15 U.S.C. § 2 (1988)*. The amended complaint alleges that the Digest attempted to monopolize the market for soap opera publications by refusing to deal with plaintiff, and that the Digest illegally monopolized this market by its refusal to deal. Both of its antitrust claims thus rest entirely upon plaintiff's assertion that, because of its position in the alleged relevant market, defendant had a duty to deal with SONOW and thus that its refusal to deal constitutes anticompetitive or exclusionary conduct in violation of *section 2*. [3] Because of the confusion that often surrounds this area of law, and the consequent ease with which a "plaintiff denied access to a **[**11]** firm's goods, services or resources may characterize that which he desires as an 'essential facility' and claim that its denial violates the antitrust laws," P. Areeda & H. Hovencamp, III ***Antitrust Law*** 677 (1988 Supp.), it is instructive first to set out the basic contours of the law regarding refusals to deal.

---

[3] In its amended complaint, SONOW refers to "exclusionary and predatory conduct, including, but not limited to," defendant's refusal to deal with plaintiff. However, no other anticompetitive or predatory conduct has been either alleged or supported in any way by the facts uncovered during discovery, and therefore plaintiff's claim must be understood to rest only upon the allegedly wrongful refusal to deal.

It has been said that questions concerning the circumstances under which a single firm monopolist has a duty to deal with other firms are some of the "most unsettled and vexatious in the antitrust field." *Byars v. Bluff City News Co., Inc., 609 F.2d 843, 846 (6th Cir. 1979)*. In various cases, courts **[**12]** have found refusals to deal by single firm monopolists actionable under *§ 2*. ***HN3***[] In the context of a claim of illegal monopolization, a refusal to deal may constitute a form of "willful acquisition or maintenance of [monopoly] power," satisfying the second element of a monopolization claim. *See White Directory of Rochester, Inc. v. Rochester Telephone Corp., 714 F. Supp. 65, 69 (W.D.N.Y. 1989)*. [4] A refusal to deal with a competitor may also comprise an element of a claim of attempted monopolization under *§ 2*. *See, e.g., Twin Laboratories, Inc. v. Weider Health & Fitness, supra, 900 F.2d at 570-571*. [5] In fashioning the various doctrinal frameworks in which refusals to deal with competitors may amount to violations of *§ 2*, courts have likely been mindful of the Second Circuit's observation that:

> in passing the Sherman Act, Congress recognized that it could not enumerate all the activities that would constitute monopolization. *Section 2*, therefore, in effect conferred upon the federal courts "a new jurisdiction to a apply a 'common law' against monopolizing." 3 P. Areeda & D. Turner, ***Antitrust Law*** 40 (1978).

Berkey Photo, Inc. v. Eastman Kodak Co., ***[**13]*** *603 F.2d 263, 272 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*.

As this "common law" of monopolization has evolved, the situations in which a refusal to deal by a monopolist may violate **[**14]** *§ 2* have grouped themselves around several **[*1343]** formulae. The Sixth Circuit, in *Byars*, described the groupings of cases as follows:

> there exist two conceptually similar lines of cases which impose a duty to deal upon a monopolist. The first is a straightforward "intent" test [under which] a business is free to deal with whomever it pleases so long as it has no "purpose to create or maintain a monopoly" . . . .
>
> There also exists a second, related line of cases which has been styled as promulgating the "bottleneck [or essential facilities] theory of ***antitrust law***." Under this approach, a business or group of businesses which controls a scarce facility has an obligation to give competitors reasonable access to it.

Byars v. Bluff City News Co., Inc., supra, 609 F.2d at 856.

HN6[] The "essential facilities" doctrine described by the *Byars* court is often treated as a distinct claim under *§ 2*. In the instant case, however, plaintiff did not plead an "essential facilities" count in its complaint, but instead relies on the essential facilities doctrine as a theory supporting its monopolization and attempt to monopolize claims. Although it is clear that a separate test is applied **[**15]** in evaluating claims under the essential facilities doctrine, this Court finds it analytically more helpful to conceive of the essential facilities doctrine as constituting not a distinct claim under *§ 2*, but instead either as a form of, or evidence of, a firm's "willful acquisition or maintenance" of monopoly power in satisfaction of the second element of a monopolization claim, or in certain situations as an element of an attempt claim.

There are several reasons for this approach. As a practical matter, it is helpful for courts to keep in mind that, in evaluating any essential facilities claim involving a single firm, the possessor of the facility must first be found to be

---

[4] ***HN4***[] The offense of monopolization under *§ 2* of the Sherman Act consists of two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Delaware & Hudson Railway Co. v. Consolidated Rail Corp., supra, 902 F.2d at 178*.

[5] ***HN5***[] "To make out a successful claim of attempted monopolization, a plaintiff must demonstrate: (1) anti-competitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power." *Delaware & Hudson Railway Co. v. Consolidated Rail Corp., 902 F.2d 174 (2d Cir. 1990)*.

a monopolist. *See* *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1132-33* (7th Cir.) (first element of four part essential facilities test is "control of the essential facility by a monopolist"), *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*; *Twin Laboratories, Inc. v. Weider, supra, 900 F.2d at 569* (assuming for purposes of essential facilities discussion that defendant possessed monopoly power in relevant market). In effect, this requirement coincides with the first prong of the **[**16]** *Grinnell* test. Furthermore, although the doctrine has never been explicitly relied on by the Supreme Court, in those cases in which the Supreme Court has found a duty on the part of a single firm to share an essential product or service with its competitors, it has done so either under the rubric of the second prong of the *Grinnell* monopolization test, *see* *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)* (record supported inference that refusal to deal was "predatory," constituting willful maintenance of monopoly power as distinguished from legitimate growth or development), or as constituting an attempt to monopolize. *See* *Otter Tail Power Co. v. United States, 410 U.S. 366, 377, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)* (refusal to deal part of a scheme of use of monopoly power to destroy threatened competition, in violation of the "attempt to monopolize" clause of *§ 2*); *Lorain Journal Co. v. United States, 342 U.S. 143, 154, 96 L. Ed. 162, 72 S. Ct. 181 (1951)* (same). *See also* *United States v. Terminal Railroad Ass'n, 224 U.S. 383, 409, 56 L. Ed. 810, 32 S. Ct. 507 (1912)* (where inherent conditions of railroad market are such as to prohibit any other reasonable means of entering a city, combination of every terminal **[**17]** facility under the exclusive ownership and control of less than all of the companies under compulsion to use them is a violation of *§ 1* as well as an attempt to monopolize under *§ 2*).

HN7[] As the latter set of cases makes clear, a refusal to deal may amount to an attempt to monopolize when a firm with monopoly power in one market attempts through the use of that power to monopolize a related or downstream market. To withstand summary judgment on a claim of attempt to monopolize a second market by leveraging a monopoly position in a first market, a plaintiff must demonstrate that the defendant "(1) intended to monopolize **[*1344]** the [second] market; (2) engaged in conduct designed to carry out that intent; and (3) had a 'dangerous probability' of success." *Twin Laboratories, Inc. v. Weider Health & Fitness, supra, 900 F.2d at 570*.

Finally, some courts have suggested that the last element of the attempt test -- a dangerous probability of success -- may not have to be proven by a plaintiff under a theory of "monopoly leveraging," which is sometimes seen as a distinct *§ 2* cause of action. This theory:

> holds that it is an act of monopolization for a firm having monopoly power in one market **[**18]** to exploit that power as a 'lever' to secure competitive advantages in a second market, irrespective of the degree of market power actually achieved by the defendant within the second market.

In re Air Passenger Computer Reservations Systems Antitrust Litigation, 694 F. Supp. 1443, 1472 (C.D.Cal. 1988) (rejecting monopoly leveraging as distinct *§ 2* claim). The case most often cited as recognizing the monopoly leveraging theory is *Berkey Photo, Inc. v. Eastman Kodak Co., supra, 603 F.2d at 276*, in which the Second Circuit stated in dictum that "the use of monopoly power in one market to gain a competitive advantage in another is a violation of *Section 2*, even if there has not been an attempt to monopolize the second market." *Id*. Recently, however, the Second Circuit has called into question the applicability of this dictum to non-"tying" cases, and has reaffirmed that there remains in any case the requirement of "tangible harm to competition." *See* *Twin Laboratories, Inc. v. Weider Health & Fitness, supra, 900 F.2d at 571*.

1. the market or markets at issue --

Having set out the various doctrinal frameworks within which a firm's refusal to deal may be actionable **[**19]** under *§ 2*, the first step in the Court's analysis must be to define the relevant market or markets involved in this case. *See, e.g.,* *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391-93, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. To say that the various market formulations propounded by the parties have been confused would be kind.

HN8[] "The relevant market consists of the geographic market -- the location in which a potential buyer may rationally seek specific goods or services -- and the product market, the boundaries of which are set by the 'reasonable interchangeability of use or the cross-elasticity of demand.'" *Metropolitan Life Ins. Co. v. Adler, No. 87 Civ. 2632, 1988 U.S. Dist. LEXIS 1146 (S.D.N.Y. 1988)* (available on Lexis at *1988 U.S.Dist. LEXIS 1146*).

In the instant case, it is undisputed that the relevant geographic market is a national one. Plaintiff alleges variously that the relevant product market consists of (1) publications devoted solely to soap opera news, (2) the mass dissemination of soap opera news, and (3) subscribers or potential subscribers to soap opera publications. Defendant, too, fluctuates in its assertions of the relevant market. At times it argues that certain **[**20]** general interest publications which contain soap opera news in addition to other types of news should be included based upon the fact that these publications compete with the Digest for both advertisers and supermarket check-out space, [6] as well as the fact that they contain some soap opera news. In other instances, defendant defines the market with reference to the total number of soap opera viewers in the United States.

As noted above, both plaintiff and defendant at times describe the relevant market in terms of the "subscribers and potential subscribers of soap opera publications," *e.g.*, Plaintiff's Opposition Brief at 9, rather than the actual product. Defendant thus suggests that the entire audience of soap opera viewers, which plaintiff agrees numbers at least **[**21]** 60 million, should be counted in the relevant market in determining the Digest's market share. Such an approach is erroneous. *See* *Redmond v. Missouri Western State College, 1988 U.S. Dist. LEXIS 12230*, No. 84-6139-CV-SJ-6, **[*1345]** slip op. (W.D.Mo. November 2, 1988) (available on Lexis at *1988 U.S.Dist. LEXIS 12230*) ("An attempt to define the relevant market in terms of a certain class of prospective purchasers runs contrary to the classic tests used in a monopolization case").

HN9[] For antitrust purposes, a product market consists of a class of products -- either goods or services -- which are reasonably interchangeable with one another such that producers of the products "have the ability . . . to take significant amounts of business away from each other." *Smithkline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063* (3d Cir.), *cert. denied*, *439 U.S. 838, 99 S. Ct. 123, 58 L. Ed. 2d 134 (1978)*. Although it is proper to identify the ultimate consumer of the product in order to make a determination as to whether two products are reasonable substitutes for one another (i.e. whether two products enjoy cross-elasticity of demand), and therefore are in the same product market, *see* *Levitch v. Columbia Broadcasting System, Inc.,* ***[**22]*** *495 F. Supp. 649, 664 (S.D.N.Y. 1980)*, *aff'd*, *697 F.2d 495 (2d Cir. 1983)*, a definition of the market itself which consists of consumers or potential consumers may, as here, obfuscate the issues of monopoly power and reasonable interchangeability. [7]

[23]** In the instant case, plaintiff, having completed discovery, has utterly failed to present any evidence which demonstrates that it competes with the Digest in any relevant antitrust market. In fact, all of the evidence adduced during discovery, including the uncontradicted statements of plaintiff's president and secretary, indicates that exactly the opposite is true.

As noted above, for two products to be included in the same relevant market for antitrust purposes, they must be reasonably interchangeable in the eyes of the ultimate consumer of the product. Here, both parties have defined consumers of their respective products as subscribers or potential subscribers to publications devoted to soap opera news. The parties agree that this group consists of some or all of the millions of viewers of television soap operas. However, as discussed previously, the mere fact that two products are targeted at the same consumer group does not compel the conclusion that the products are reasonable substitutes for one another -- i.e. that they are in the same relevant antitrust market. [8] Here, the undisputed evidence suggests that although SONOW and the

---

[6] These arguments confuse the Digest's competition in the market for the service of advertisements -- a product distinct from that of soap opera magazines -- with its competition in the market in which it is alleged by plaintiff to be a monopolist.

[7] For example, it is impossible to determine whether two products are reasonably interchangeable, and therefore in the same market for antitrust purposes, when the market is defined as a group of potential purchasers rather than as a product. The confusion in this case may be related to fact that many of the witnesses and parties have advertising backgrounds, where it is customary to define a market as a group of target purchasers of the product being advertised. Thus, Kenneth Stein of SONOW notes that the "market" for SONOW consists of soap opera "fanatics." However the term "relevant market" has a very different and specific meaning in the context of antitrust analysis, as previously noted. Products targeted at the same advertising "market" may nonetheless be in entirely different antitrust markets.

Digest are both aimed at some segment of **[**24]** the soap opera viewer population, they are not reasonably interchangeable and thus are not competitors in the same relevant market.

Kenneth Stein ("Stein"), the president of plaintiff, stated in deposition testimony that it was "obvious" to him that SONOW's "readers are not the soap viewer. They are the great soap fan or even fanatic and it is obvious . . . that *every one of them* ***[**25]*** *will buy the 150-page four color gorgeous Soap Opera Digest before they will buy our six-page black and white*." Deposition of Kenneth Stein, Appendix to Defendant's Motion for Summary Judgment **[*1346]** ("App.") at 366 ("Stein Dep.") (emphasis added). At another point in his deposition testimony, Stein explained that SONOW's readers consist of soap opera viewers who "have an extra interest in the subject." Likening the situation to that of a sports "fanatic" who, in addition to reading Sports Illustrated, would look for other sources of sports news in order to supplement the news in that magazine, App. at 328-29, he stated that all of those soap viewers who are interested enough in soap operas to read a newsletter such as SONOW would "for sure" also read the Digest. App. at 166. Thus, Stein stated that SONOW "can't be first choice," because it is "a six-page black and white as opposed to a 150-page four-color magazine." App. at 329.

In another instance during Stein's deposition, which makes it all the more clear to the Court that plaintiff's monopolization claim is premised upon inconsistent and ultimately irreconcilable assertions, [9] **[**28]** Stein insisted that "if [a soap opera viewer is] not **[**26]** going to read Soap Opera Digest, they are not going to read Soap Opera Now." Stein was then asked whether he considered SONOW "the same type of publication as Soap Opera Digest," to which he replied "yes and no." In describing the differences between the two publications, he said that SONOW's news is more current than that of the Digest since it is published every week, whereas the Digest takes six to eight weeks to publish. Prompted by this answer, the attorney for defendant then initiated the following key exchange:

> Q. Why wouldn't a viewer who is interested in what is going to happen next week on their soap, who is not interested in the six-week old news that you claim is published in the Digest read your newsletter instead?
>
> . . . .
>
> MR. OCCHIPINTI (counsel for plaintiff): Objection to the form of the question. I don't know that we have established that there aren't viewers who are or aren't interested in Soap Opera Now. I don't follow the question.
>
> MS. KATZ (counsel for defendant): Mr. Stein just testified that he is basing his conclusion that all the people who watch soap operas are not potential subscribers to soap opera magazines because if they were potential subscribers, **[**27]** they would subscribe to Digest.
>
> My question to him is -- and then he claims that his news is more current. So a viewer who is interested in the most current news and doesn't find that in Digest and doesn't read or subscribe to Digest could still be interested in your newsletter; is that correct?
>
> A. No.
>
> Q. Why not?
>
> A. Because current though it may be, it is only a couple of pages and it doesn't compare to 150 pages with color photographs. It just doesn't.

---

[8] For example, a magazine devoted solely to articles and information of interest to golfers would presumably reach a consumer group consisting of golf enthusiasts. Products also bought by this group, such as golf clubs, balls, and tees, would clearly not be in the same relevant market notwithstanding their having an identical consumer. These products would not by any stretch of the imagination be reasonable substitutes for one another from the perspective of those consumers. Thus, even a monopolist golf magazine would be free to refuse to accept advertising from a golf ball producer without incurring *§ 2* liability for illegal monopolization.

[9] In support of its "essential facilities" theory, which underlies all of plaintiff's antitrust claims, plaintiff asserts that all of its readers and potential readers are also readers of the Digest. For this reason, advertisement in the Digest is obviously an extremely efficient method for SONOW to reach its targeted consumer market, and plaintiff asserts that such advertisement is in fact the only method for reaching these consumers that is not cost prohibitive for a small weekly publication such as itself. However, as noted previously, in stressing the effectiveness of the Digest in this manner, plaintiff has undermined any argument that it might have had that it is a competitor of the Digest in the sense contemplated by the Sherman Act.

Q. Is it your contention that nobody who does not read Digest reads your newsletter?

A. I believe that.

App. at 369-70. [10]

In effect, Stein thus testified that a person would not purchase SONOW *instead* of the Digest, but only *in addition* to it. Under these circumstances, it is clear that the two publications are not competitors as that term is understood in the context of the antitrust laws.

[*1347] Nor, drawing all inferences in favor of plaintiff, can SONOW reasonably be considered even a potential or future competitor of the Digest. [11] Both Stein and Michael Kape ("Kape"), Stein's partner and Secretary of plaintiff, have stated that their strategy in running plaintiff was to keep it small. Explaining the reasons for their rejection of certain marketing techniques successfully employed by other soap opera publications, such as supermarket check-out or newsstand sales, or utilization of Publishers' Clearinghouse ("PCH"), they stated that these marketing methods are not feasible for **[**29]** a small weekly newsletter, and that they did not desire that SONOW become a qualitatively different publication from what it was. [12] **[**30]** For example, Stein stated in an affidavit, filed May 21, 1990, that SONOW "must remain small to be physically able to serve our market [13] and therefore cannot be a risk to these large corporations" (i.e. "the Digest or Soap Opera Weekly"). *See, e.g.*, App. at 349-50 (Stein Dep.).

The Court's inquiry, however, does not end with its determination that the evidence in the record cannot fairly support an inference that SONOW is a competitor or potential competitor of the Digest in the market in which the Digest arguably is a monopolist -- a market consisting of soap opera magazines and products **[**31]** reasonably interchangeable with soap opera magazines. [14] A monopolist's refusal to deal with a non-competitor plaintiff in the

---

[10] *See also* App. at 46 (letter of Michael Kape) (stating that SONOW fills a gap which Digest cannot, and that SONOW "obviously" does not compete against the Digest, but only against the few other weekly newsletters being published).

[11] In its Memorandum Decision granting plaintiff's motion for a preliminary injunction, the Court noted that SONOW had raised a substantial question as to whether the Digest could be said to constitute an essential facility in part because at that preliminary stage of the proceedings "it appear[ed] that . . . without advertising in [the Digest], SONOW is unable to make its own publication into an effective substitute." *Soap Opera Now, Inc. v. Network Publishing Corp*., 88 Civ. 984, at 8. Subsequent discovery, however, has failed to support the Court's initial view that SONOW could be a potential substitute for the Digest.

[12] The Court does not mean to suggest that a small company cannot compete in the same relevant market as a large one, or that it must have a reasonable possibility of growing large in order to have a claim under *§ 2*. Indeed, such a position would be ridiculous in light of the goals and policies of the Sherman Act. In the instant case, however, plaintiff is not a small company producing the same product as a larger monopolist. Instead, it consists of a qualitatively different product which is not a reasonable substitute for defendant's product. Under these circumstances, it is necessary to ask whether, in the market in which the Digest competes, small newsletter-type products may evolve (absent illegal use of monopoly power) into substitute products, and whether plaintiff is such a potential competitor. The evidence presented on this motion for summary judgment allows no reasonable inference that the answer to these inquiries is anything other than a negative one.

[13] In the previous paragraph, Stein had explained that accurate "sneak peeks," (coming attractions) "are only possible if done by a small concern like ours" because of the very small lag time between printing and delivery. He noted that the larger publications, such as defendant, necessarily take much longer to reach the consumer. He postulated that, because SONOW is thus able to "beat them every week" with respect to this future news, these publications desire to "crush [SONOW] out of business." Stein Aff. at 5. However, as noted above, Stein also insists that plaintiff's readers read SONOW in addition to, and not instead of, the Digest. In this context, use by Stein of the term "our market" makes clear that plaintiff and defendant's publications serve different, though related, markets.

[14] The Court has serious reservations about whether plaintiff has even raised a factual question on the issue of defendant's monopoly power in the market in which it as a magazine competes. Putting aside disputes over whether other sources of "the mass dissemination of soap opera news," such as the soap opera news service in the Prodigy computer software and the local and national soap opera telephone services, are in the same relevant market as the Digest, defendant has arguably rebutted any inference of monopoly power arising from its alleged market share with substantial evidence of low or nonexistent entry barriers. Plaintiff has failed to come forward with any tangible evidence of entry barriers in this market, beyond the assertion that soap opera magazines often go out of business or are published sporadically. However, in light of the large alleged market share

monopoly market may still violate *§ 2* if the monopolist competes with the plaintiff in a second market, *see* discussion of monopoly leveraging, *supra*, or if the refusal to deal is directed at influencing the plaintiff not **[*1348]** to deal with a competitor of the defendant in some market. *E.g. Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951)* (monopolist newspaper refused to deal with advertisers who also advertised on competing radio station). The latter situation is not at issue in this case, however the leveraging question must be addressed.

[32]** 2. monopoly leveraging --

Although only alluded to by plaintiff, SONOW's antitrust claims could conceivably be based upon a theory of "monopoly leveraging," that is, that defendant by refusing to deal with plaintiff was attempting to use its alleged monopoly power in one market to gain a competitive advantage in a second market. *See, e.g., Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*. Plaintiff's president, Stein, opined as much in one of his several *ex parte* letters to the Court, in which he alleged that the Digest had begun a weekly publication, and had attempted to hire SONOW's editor to write for the new magazine. Like the solution to a Friday afternoon cliffhanger, the "reason for [defendant's] actions" was at last known to Stein.

Although there is some evidence in the record demonstrating that at one time several years ago the then publisher of the Digest considered starting a newsletter, no competing newsletter was ever started. On these undisputed facts, a claim of monopoly leveraging, even if it had been properly pleaded, would be far too speculative to survive a motion for summary judgment. **[**33]** There is clearly no question that a "dangerous probability" of monopolization of the second market has not been shown, since defendant never published any competing newsletter. *See Twin Laboratories, Inc. v. Weider Health & Fitness, supra, 900 F.2d at 570-571* (no dangerous probability as a matter of law where defendant's share of the secondary market in which it competed with plaintiff was at best 25%).

Further, even if, as discussed above, the "dangerous probability" element need not be shown in a leveraging case under *Berkey Photo*, plaintiff does need to demonstrate some "competitive advantage" gained by defendant in the second market. *Berkey Photo, Inc. v. Eastman Kodak Co., supra, 603 F.2d at 284* (improper, absent justification, for firm with monopoly power in one market to gain a competitive advantage in a second market by refusing to deal). In light of the undisputed fact that defendant in this case never began any competing publication, [15] that showing cannot be made.

[34]** 3. essential facilities --

Even assuming that the Digest possesses monopoly power in its product market, plaintiff's monopolization and attempted monopolization claims premised upon an essential facilities theory must fail. As discussed above,

---

of the Digest, the Court will assume for purposes of this Opinion that the Digest exercises monopoly power in the market including the product of soap opera magazines.

[15] During the pendency of the instant motion, the Digest was sold by defendant to News America Publishing Inc ("News America"). Subsequently, SONOW instituted an action against this new owner of the Digest, captioned *Soap Opera Now, Inc. v. News America Publishing Inc*., 90 Civ. 2631 (RJW). There is evidence in the record that the defendant in this latter action has begun a weekly soap opera magazine, which contains certain types of features, for example coming attractions, also contained in SONOW. Without the benefit of any argument or evidence on the issue, the Court is unable to determine whether there exists an issue of fact as to whether this new weekly publication competes in any relevant market with plaintiff, thus raising a possible claim of attempted monopolization under a leveraging theory. Plaintiff is, of course, free to pursue this issue in its lawsuit against News America. The Court notes in this connection, however, that in order to make out a successful leveraging claim, either under an attempt to monopolize theory or a distinct leveraging claim (if such a claim is available in this Circuit), a plaintiff must demonstrate both monopoly power in the first market, and a refusal to "sell a rival the *monopolized goods or services he needs to compete in the second market." Berkey Photo, Inc. v. Kodak Co., 603 F.2d at 284* (emphasis supplied). Therefore, plaintiff would be required to come forward with some evidence suggesting that News America monopolizes the service claimed by plaintiff to be essential for it to compete in the market.

plaintiff's attempt claim is deficient because SONOW and Digest do not compete in any market. For the same reason, any other possible claim under an **[*1349]** essential facilities theory must fail. ***HN10***[] In order to make out a claim under the essential facilities doctrine, a plaintiff must demonstrate "a *competitor's* inability practically or reasonably to duplicate the essential facility," and "the denial of the use of the facility *to a competitor." MCI Communications Corp. v. American Tel. & Tel.* *Co., supra, 708 F.2d at 1132-33* (cited in *Twin Laboratories, Inc. v. Weider Health & Fitness, supra, 900 F.2d at 568, 569* (emphasis added). Because plaintiff has not raised a factual issue as to whether the Digest denied its services "to a competitor," any claim based upon the denial of an essential facility must be dismissed.

Even if plaintiff had raised an issue as to whether it competes in the same market with the Digest, the Court would **[**35]** still find based upon the uncontroverted evidence submitted in connection with the instant motion that the advertising pages of the Digest cannot be considered an essential facility in the market for soap opera publications. In the first place, this is simply not a case in which the Digest is "effectively the only [facility] in town." *See* *Lorain Journal Co. v. United States, supra, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162*; *Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d 274 (1st Cir. 1982)*, *cert. denied*, *460 U.S. 1028, 75 L. Ed. 2d 500, 103 S. Ct. 1279 (1983)*. There are certainly a variety of advertising methods which could be used to reach a particular class of persons, and plaintiff has suggested no structural peculiarity of defendant which makes it a qualitatively different mode of advertisement than, for example, other magazines. *See, e.g.,* *Home Placement Service, Inc. v. Providence Journal Co., supra, 682 F.2d at 280* (other types of advertising shown not to be reasonable substitutes for daily newspaper rental advertising).

In addition, there is substantial uncontradicted evidence in the record that several smaller rivals exist in the market which do not advertise in the Digest. **[**36]** [16] Plaintiff's only response to this evidence is that a *newsletter* cannot promote itself by the same methods as other types of publications. However plaintiff has not addressed the evidence presented by defendant that other soap opera newsletters exist which apparently survive without advertising in the Digest.

[37]** In sum, plaintiff has not met its burden on this motion of coming forward with evidence sufficient to create a material factual dispute upon an issue on which it has the ultimate burden of proof at trial. ***HN12***[] Even assuming that defendant is a monopolist in its product market, unless plaintiff and defendant are in competition with one another, defendant has no duty to deal with plaintiff. *Official Airline Guides, Inc. v. F.T.C., 630 F.2d 920, 925-28 (2d Cir. 1980)* (monopolist publisher of airline flight schedules had no duty to deal on nondiscriminatory basis with various classes of air carriers because it did not compete with them in any market), *cert. denied*, *450 U.S. 917, 101 S. Ct. 1362, 67 L. Ed. 2d 343 (1981)*. *See also* *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*. Accordingly, summary judgment is granted in favor of defendant on plaintiff's claims under *§ 2* of the Sherman Act. [17]

[38]** III. *The Contract Claim*.

In addition to its federal claims, plaintiff asserts that defendant by refusing **[*1350]** to run SONOW's ads breached an alleged contract between the parties. In light of the dismissal of the federal claims upon which plaintiff bases

---

[16] Stein points out that many of these competitor publications either do not accept advertising, or are published less frequently than the Digest. These facts, while perhaps relevant to the question whether advertising in the Digest is essential to the plaintiff, are not at all relevant to the question whether advertising in the Digest is essential to effective competition in the market. ***HN11***[] As often stated but particularly pertinent here, the antitrust laws protect competition, not competitors. *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 344, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. Simply because a particular plaintiff with peculiar advertising needs decides that it cannot remain profitable without advertising in a certain publication, that publication does not automatically rise to the level of an "essential facility" in the general market unless some substantial number of market entrants or competitors would also be foreclosed.

[17] Because it finds that plaintiff has failed to raise a factual issue on any of its federal claims, the Court does not address defendant's argument that its refusal to deal is privileged under the *first amendment*.

jurisdiction in federal court, discretionary dismissal of the pendent state claim is appropriate. *See* *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*. No prejudice will accrue to plaintiff by such dismissal as New York Civil Practice Law and Rules § 205(a) allows plaintiff to recommence any action in state court within six months after it is dismissed by a federal court on jurisdictional grounds, if it was timely commenced in the first instance. *See* *Dunton v. County of Suffolk, 729 F.2d 903, 911 n. 8* (2d Cir.), *amended on other grounds*, *748 F.2d 69 (2d Cir. 1984)*. Therefore, the pendent state claim should be dismissed pursuant to *Rule 12(b)(1), Fed. R. Civ. P.*, for lack of subject matter jurisdiction.

CONCLUSION

For the foregoing reasons, defendant's motion for summary judgment dismissing plaintiff's antitrust claims is granted, and the remaining state claim is dismissed for lack of jurisdiction. The preliminary **[**39]** injunction is hereby vacated. The parties are directed to attempt to reach an agreement with respect to the disposition of the funds contained in the escrow account, and if they are not able to agree, to submit proposed counter-orders to the Court on or before June 15, 1990.

It is so ordered.

HN1[] **Injunctions, Grounds for Injunctions**

In the circuit in which the court is located, a party seeking a preliminary injunction must establish irreparable injury if the requested relief is not granted, and also demonstrate either that (a) it is likely to succeed on the merits or (b) the balance of hardships tip decidedly in its favor and there is a sufficiently serious question going to merits so as to make its claim a fair ground for litigation. "Irreparable injury" means injury for which a monetary award cannot be adequate compensation.

HN5[] **Defenses, Demurrers & Objections, Denial of Allegations**

A court should dismiss a complaint for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)* if it appears beyond doubt that the plaintiff can prove no set of facts supporting its claim that entitles it to relief. A court must construe the complaint's allegations in the light most favorable to the plaintiff and accept those allegations as true.

HN8[] **Administrative Law, Agency Rulemaking**

Congress, in passing the Interstate Land Sales Full Disclosure Act, *15 U.S.C.S. §§ 1701-1720* has desired to protect purchasers from unscrupulous sales of undeveloped home sites, frequently involving out-of-state sales of land purportedly suitable for development but actually under water or useful only for grazing. The Act prohibits fraud in land development enterprises. The protections afforded by the Act, which are to be construed broadly in accord with the remedial purposes of the legislation, apply to the sale or lease of any "lot" not otherwise exempted under *15 U.S.C.S. § 1702*. *15 U.S.C.S. §§ 1703(a)(1)*, *1702*. The administrative agency responsible for promulgating regulations under the Act and courts that have addressed the question agree that sales of realty in the condominium form are embraced by the term "lot."

Real Property Law > Purchase & Sale > General Overview

HN9[] **Legislation, Interpretation**

The Interstate Land Sales Full Disclosure Act, *15 U.S.C.S. §§ 1701-1720* is intended to curb abuses accompanying interstate land sales. The Act accomplishes that goal by including within it all sales of lots and then exempting a number of transaction, including sales of fully improved property. It is reasonable to conclude that the term "lot" in the Act was used to refer generally to interests in realty. The legislative history supports this construction, employing the terms "lot," "land," and "real estate" in discussing the Act. This construction is also reasonable in terms of the purpose of the statute. A fraudulent out-of-state sale of land is not rendered any less fraudulent if the condominium form of ownership is utilized.

Opinion by: SWEET

Opinion

[*202] ROBERT W. SWEET, UNITED STATES DISTRICT JUDGE

This action is before the court on the motion of plaintiff Leonard Grossman ("Grossman") for a preliminary injunction and on cross-motions to dismiss brought by defendants Harry B. and Leona M. Helmsley ("Helmsley"), Supervisory Management Corp. ("SMC"), Helmsley Enterprises, Inc., **[*203]** John J. Reynolds, Inc., Brown, Harris, Stevens, Inc., Deco Purchasing and Distributing Co., Inc. (the "Helmsley defendants"), and by Peter L. Malkin, Ralph W. Felsten, and Alvin Silverman. For the reasons discussed below, the motion for a preliminary injunction is denied, the cross-motion of the Helmsley defendants is granted, and the complaint is dismissed.

[2]** *Nature of the Action, Parties, and Prior Proceedings*

Plaintiffs own or reside as tenants in units of a massive residential complex in the Bronx known as the Parkchester. They seek damages and injunctive relief in connection with alleged fraudulent misrepresentations made in connection with the conversion and management of the southern half of the residential complex. This 135-building structure, containing 8,286 apartments, is in its present condominium form formally termed The Parkchester South Condominium, Inc. (hereinafter "Parkchester South" or the "Condominium"). Claims under RICO, the federal antitrust laws, the federal securities laws, the Interstate Land Sales Full Disclosure Act, and several state laws are asserted against the thirty-five defendants.

The original complaint was filed in September 1986 and amended in October 1986. The parties to the first amended complaint and the essential allegations set forth therein were outlined in the court's opinion of December 12, 1986 dismissing the action after finding that the federal RICO and securities causes pleaded therein (and as sought to be further amended by plaintiffs) failed to state a claim upon which relief could **[**3]** be granted. Further elucidation of the complaint is contained in the *en banc* opinion of the Court of Appeals reversing the district court dismissal on the ground that the complaint adequately pleaded RICO elements of pattern and continuity. *See* *Beauford v. Helmsley, 650 F. Supp. 548 (S.D.N.Y. 1986)*, *aff'd*, *843 F.2d 103 (2d Cir. 1988)*, *reversed upon rehearing en banc*, *865 F.2d 1386 (2d Cir. 1989)*, *vacated*, *492 U.S. 914, 109 S. Ct. 3236, 106 L. Ed. 2d 584*, *adhered to upon further consideration*, *893 F.2d 1433*, *cert. denied*, *493 U.S. 992, 110 S. Ct. 539, 107 L. Ed. 2d 537 (1989)*.

In its *en banc* ruling, the Court of Appeals "suggested that the district court allow plaintiffs an additional opportunity to file a new pleading," *id*., *865 F.2d at 1392*, in view of the appellate court's expressed doubt that the amended complaint met the requirements of *Rule 9(b)* and *Rule 8(a) of the Federal Rules of Civil Procedure*. The mandate from the Court of Appeals followed the Supreme Court's consideration of the RICO issue (resulting in an order of vacatur), and the Second Circuit's determination, nevertheless, to adhere to its prior *en banc* decision.

Following the Court of Appeals' decision, counsel for **[**4]** plaintiffs did not seek leave to amend the *Beauford* complaint, but in February 1990 filed, as a related matter, an additional, separate complaint alleging several of the same causes against several of the same defendants but in the name of a new plaintiff, Grossman, a condominium owner in Parkchester who resided in the apartment complex prior to its conversion. By the accompanying order to show cause, Grossman also sought a preliminary injunction, *inter alia*, directing Parkchester Apartments Co., the sponsor of the conversion ("Sponsor"), to pay a sum in excess of a million dollars to the Condominium and use its votes on the Board of the Condominium (the "Board") to revoke a recent increase in maintenance charges imposed on Condominium owners of approximately 35%. It was alleged that the present increases would not have been necessary if two years prior, defendants had not caused the Board to vote to abate the monthly maintenance charges for a period of one and a half months in February and March of 1988.

At the hearing on the order to show cause on February 15, 1990, counsel for plaintiff agreed to serve an amended complaint consolidating the *Grossman* action with the **[**5]** *Beauford* action. Counsel for defendants opposed the motion for preliminary relief and sought by cross-motion dismissal of the actions in their entirety. Counsel for plaintiff disclaimed the need **[*204]** for an evidentiary hearing on the request for preliminary injunctive relief.

The consolidated complaint was filed thereafter on February 23, 1990, briefs on the motions were received prior to the oral argument on March 16, and the matter was taken on submission following receipt from plaintiff's counsel of a further submission dated March 23, 1990.

The Consolidated Complaint

The consolidated complaint substitutes Grossman, a Parkchester South unit-purchaser, for former plaintiff Mr. Palmento, now deceased, who was the only condominium purchaser (as opposed to non-purchasing tenant) named in the *Beauford* action as a plaintiff. The other four named plaintiffs, all of whom are tenants at the complex who did not elect to purchase their apartments at the time of the conversion, remain unchanged from the original action. As for defendants, these remain essentially the same as in the original *Beauford* action. [1]

[6]** As in *Beauford*, the new complaint alleges violations of RICO and federal securities laws, as well as the related state law common law claims of fraud, breach of fiduciary duty and contract. New federal causes of actions arising under the antitrust laws and the Interstate Land Sales Full Disclosure Act are added to the consolidated

[1] The Sponsor of the conversion (and former owner) of the Condominium -- Parkchester Apartments Co. -- is not named as a defendant in the consolidated complaint. The partners that compose the Sponsor, which is itself a New York partnership, are. The two alleged partners are defendant Supervisory Management Corp., a corporation owned by Harry Helmsley, and defendant Joseph V. Licari. In addition, other Helmsley-related entities are named defendants, as are numerous passive investors in the partnership.

complaint, notwithstanding that these claims which were not pleaded in either the *Beauford* or *Grossman* actions and that the filing of the consolidated complaint was authorized for no purpose other than to harmonize and particularize the pleading in those two actions.

I. *The Motion for Preliminary Injunctive Relief*

The request for preliminary relief, supported by the affidavit of counsel for plaintiff, who perforce is without personal knowledge of the facts averred, is predicated on the First Claim of the Consolidated Complaint, which alleges that an abatement of maintenance charges for a month and a half in 1988 (an action sought by the Sponsor and agreed to by the Board, upon which the Sponsor has a majority of representatives by virtue of its continuing to own more than fifty percent of the units) violated *Section 515 of New York's* **[**7]** *Not-for-Profit Corporation Law*, as well as Local Law No. 70 of the City of New York for 1982.

According to the complaint and counsel for Grossman, this Board-authorized six week moratorium on maintenance charges, which was made possible by a drop in the price of oil at the time, reduced maintenance funds by $ 2.4 million in 1988. In 1990, necessary roof repairs and other maintenance needs of the Parkchester have required the Board to raise maintenance fees by 35% for five months and perhaps further into the future, and the operating budget projects a loss for the year.

On that factual basis, plaintiffs seek an order preliminarily (a) directing the Sponsor (but not the other unit owners) to pay to the Condominium a sum representing its share of maintenance charges that were not assessed upon it and all other unit holders in February and March 1988; (b) directing the Sponsor to use its votes on the Condominium Board to revoke recent increases in maintenance charges to condominium owners of approximately 35% to finance needed maintenance work, and (c) enjoining the Sponsor from any further use of its majority control of Parkchester South Condominium.

HN1[] In this circuit, a party seeking **[**8]** a preliminary injunction must establish irreparable injury if the requested relief is not granted, and also demonstrate either that (a) it is likely to succeed on the merits or (b) the balance of hardships tip decidedly in its favor and there is a sufficiently serious question going to merits so as to make its **[*205]** claim a fair ground for litigation. *E.g., Plaza Health Laboratories, Inc. v. Perales, 878 F.2d 577, 580 (2d Cir. 1989)*. Grossman has not satisfied this standard.

A. *Irreparable injury*

"It is well established that 'irreparable injury means injury for which a monetary award cannot be adequate compensation.'" *Loveridge v. Pendleton Woolen Mills, Inc., 788 F.2d 914, 917-18 (2d Cir. 1986)*, *quoting Jackson Dairy, Inc. v. Hood & Sons, Inc., 596 F.2d 70, 72 (2d Cir. 1979)*. The demand that Parkchester immediately pay its share of $ 2.4 million in maintenance charges that Grossman contends ought to have been assessed against unit holders in six weeks of 1988 is a monetizable claim, as are the economic effects of a 35% increase in current maintenance charges. Despite counsel's contention that the harm to condominium owners "goes beyond dollar payments," no case has **[**9]** been made that denial of the requested emergency relief will cause irreparable harm to Grossman.

Although Grossman alleges that there is an urgent need now for the funds that might have been assessed in March 1988, the urgency is not demonstrated by any factual showing. Instead, Grossman's counsel simply states that the present effect of going without such funds is to cause present maintenance charges against unit holders to be assessed at a level higher than they would otherwise be. Assuming it is true that funds Grossman, the Sponsor and other unit holders might have been required to contribute in March 1988 would, if collected then, have supplanted a portion of the charges being collected now, the claim, itself expressed by Grossman in monetary terms, self-evidently is compensable (if at all) in dollars.

The allegation that the increased charges are in turn threatening to cause plaintiffs to default on their purchased units might require an assessment of irreparable injury had counsel offered or presented any evidence that Grossman (who alone seeks preliminary relief) -- or any other Parkchester unit purchaser -- faces such a difficulty. Equally devoid of factual support is counsel's **[**10]** assertion that the 35% increase in maintenance charges has disrupted sales of units and lowered unit sale prices -- claims which in any event demonstrate "mere economic injury" that ordinarily "is not sufficient to warrant granting of a preliminary injunction." *Patterson v. United Federation of Teachers, 480 F. Supp. 550, 553 (S.D.N.Y. 1979)*.

Grossman also argues that irreparable injury flows from the shortage of funds that allegedly has resulted from the 1988 six-week abatement (as distinguished from the above harms caused by present efforts of the Condominium to collect additional maintenance funds): "Lack of funds means lack of proper maintenance, with loss of quality of life within the condominium."

The preliminary relief requested -- an order rescinding the 35% increase in maintenance charges -- would, however, have the likely effect of exacerbating rather than mitigating the maintenance problems assertedly caused by lack of funds, since such order, relative to the status quo, would further reduce the funds available to finance necessary maintenance. Grossman apparently desires a source of financing for necessary maintenance other than the increased monthly assessment that **[**11]** has been implemented by his Board, but that preference -- even if it should later concretize into a legal right -- does not establish a need for emergency relief predicated on injuries that can be avoided without disturbance of the status quo.

Moreover, the alleged shortage of funds for maintenance, assuming it threatens irreparable harm, neither supports the peculiar form of disturbance of the status quo sought by Grossman nor its peculiar timing. Without commenting on the disparity, Grossman seeks an order that would force the Sponsor to pay its share of the abated maintenance charges (based on its ownership of approximately 65% of the units), without a parallel requirement that Grossman and other unit purchasers who owned at the time of the six week moratorium (and who received and retained, per unit, an identical financial benefit therefrom) **[*206]** contribute their respective shares. Grossman similarly does not explain or establish why, two years after he and others were aware of the abatement, there suddenly is an urgent need to collect the abated funds in place of other maintenance charges. [2] For each of these reasons, Grossman fails to show irreparable injury warranting the emergency **[**12]** relief sought against Parkchester Management Corp.

B. *Probability of Success on the Merits*

Grossman also fails to demonstrate a likelihood of success on the merits of his claim for a preliminary injunction. Only by strained textual reading of the local and state statutes does Grossman make those laws appear to relate to the maintenance charge question presented here. The state legislation in question is *Section 515* of the Not-for-Profit Corporation Law. That provision states in pertinent part that ***HN2***[] "a corporation shall not pay dividends **[**13]** or distribute any part of its income or profit to its members, directors or officers." *N.Y. Not-for-Profit Corp. Law § 515(c)* (McKinney's 1970).

Grossman's claim is that the abatement of the collection of maintenance charges from unit holders for six weeks was, in truth, a payment of dividends to unit holders. That contention ignores the distinction drawn in the statute between "fees, dues and assessments," on the one hand, *see* NPCL *§ 507*, and dividends and distributions, on the other. *See* NPCL *§ 515*; *In re Fosdick's Trust, 4 N.Y.2d 646, 653, 176 N.Y.S.2d 966, 971, 152 N.E.2d 228 (1958)* (defining term "dividend"). *Section 507* of the Not-for-Profit Corporation Law ***HN3***[] permits corporations organized thereunder to levy fees, dues and assessment upon members, and nowhere provides, once such fees are set at a given level, that they may not subsequently be altered or eliminated, temporarily or permanently. That appears to be what the Board did, for a limited period. This law therefore does not offer support for Grossman's characterization of the six week maintenance charge moratorium as an unlawful dividend.

[2] Grossman did not seek emergency relief from the abatement at the time it was implemented in March 1988, approximately two years before this application, although presumably Grossman's formula (funds = maintenance = quality of life) was as valid then as it is now. No explanation has been offered for this delay, nor any evidence suggestive that the "quality of life within the condominium" declined suddenly prior to the filing of this application, so as to warrant preliminary relief.

The other measure relied upon is Local Law No. 70 of the City of New York (1982). That **[**14]** ordinance provides that *HN4*[] " for the preservation and improvement of . . . housing accommodations" of the condominium or cooperative form, persons sponsoring conversions of apartments to such forms must

> establish and transfer to the cooperative corporation or condominium board of managers a reserve fund to be used exclusively for making capital repairs, replacements and improvements necessary for the health and safety of the residents of such buildings. Such reserve fund shall be exclusive of any other funds required to be reserved under the plan . . . except a fund for capital repairs, replacements and improvements substantially similar in purpose . . . [and] also shall be exclusive of any working capital fund . . . .

New York City Admin. Code ch. 51, § YYYY51-3.0(a). The ordinance specifies the minimum amount that must be placed in the reserve fund and imposes reporting requirements with respect to the fund. *Id*. at § YYYY51-3.0(b), § YYYY51-4.0.

Grossman does not contend that defendants failed to establish such a reserve fund -- in fact he states that such a fund was created by the Sponsor in the amount of $ 4,668,156. He does allege, on information and belief, that the Sponsor **[**15]** has caused such fund to be dissipated for purposes other than capital repairs, replacements and improvements. Neither evidence of such dissipation, nor the basis for his belief in its occurrence, is provided, making it untenable on this record to conclude there is a reasonable likelihood that Grossman will establish the merits of this claim. The only uncontested fact presented is of the **[*207]** six week abatement, and although that presumably reduced monies available for maintaining the Condominium, the abatement was not itself an expenditure of the $ 4 million in funds that Local Law 70 required the Sponsor to deposit in the reserve fund. For these reasons, Grossman has failed to establish a likelihood of prevailing on the merits of his claims under these cited state and local laws.

C. *Balance of Hardships*

Finally, Grossman has not demonstrated that the immediate harm that he is likely to sustain from paying maintenance charges in the amount instituted by the Board or from permitting the Sponsor freely to cast its apportioned votes on the Board outweighs the hardship that would result to the Sponsor were it required to vote to revoke such increases, pay additional maintenance fees **[**16]** in disproportion to other unit holders, and in all other respects refrain from employing its votes on the Board.

As noted, Grossman has adduced no evidence establishing any specific and immediate harm to his interests apart from the easily monetizable percentage increase in his monthly maintenance charge. Moreover, granting Grossman's request to force a reduction in the maintenance fees across-the-board would impose a hardship on the Condominium and himself, since, as Grossman concedes, the maintenance fees are essential to undertaking necessary repairs of the Condominium.

The additional relief requested -- an order that the Sponsor refrain from exercising its votes on the Board "for any purpose" -- would cause serious hardships to the Sponsor and to the governance of the Condominium. The By-Laws of the Condominium contain a quorum requirement that a majority of the directors of the Board be present to conduct business. Given Grossman's allegations of Sponsor majority control, an order enjoining the Sponsor from exercising its votes on the Board would prevent achievement of the quorum necessary to Board decisionmaking as to the operation of the Condominium, to the obvious detriment **[**17]** of the Sponsor and possible detriment of the building. Even were a receiver appointed by the court (something which Grossman does not address in his papers), which would permit business to continue as usual, the Sponsor would no longer have any say in the management of a building in which it is said to own 64% of the apartments. Grossman has not established that he will sustain any injury that outweighs the immediate hardship of disenfranchisement that the Sponsor assuredly would suffer were the requested relief ordered. *Cf. Amalgamated Consultants Ltd. v. DeSavary*, No. 85 Civ. 2759 (S.D.N.Y. Oct. 22, 1985) (investor in condominium denied emergency appointment of receiver to replace sponsor's stewardship of building given lack of demonstrable hardship or injury).

II. *The Motions to Dismiss*

Two cross-motions to dismiss are before the court. The first, brought on behalf of Harry Helmsley and numerous other defendants, seeks dismissal of the plaintiffs' claims, *seriatim*, principally for the alleged failure of each cause to state grounds upon which relief may be granted. The second motion, brought on behalf of three passive investors in the Sponsor, seeks simply the dismissal **[**18]** of these particular defendants from the action. In view of the disposition of the former motion, the latter motion is not addressed.

Standards Governing Motions under 12(b)(6)

HN5[] A court should dismiss a complaint for failure to state a claim under *Rule 12(b)(6), Fed. R. Civ. P.*, if it appears beyond doubt that the plaintiff can prove no set of facts supporting its claim that entitles it to relief. *See H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 109 S. Ct. 2893, 2906, 106 L. Ed. 2d 195 (1989)*; *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*; *Dahlberg v. Becker, 748 F.2d 85, 88 (2d Cir. 1984)*, *cert. denied*, *470 U.S. 1084, 85 L. Ed. 2d 144, 105 S. Ct. 1845 (1985)*. A court must construe the complaint's allegations in the light most favorable to the plaintiff and accept those allegations as true. *See* ***[*208]*** *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*; *Dacey v. New York County Lawyers' Ass'n., 423 F.2d 188, 191 (2d Cir. 1969)*, *cert. denied*, *398 U.S. 929, 90 S. Ct. 1819, 26 L. Ed. 2d 92 (1970)*.

1. *The Antitrust Claim*

Grossman alleges that the Sponsor, in conspiracy with all of the other defendants, used its control of the condominium association and Parkchester Management Corp. to restrain trade, by compelling Parkchester South **[**19]** to effect all of its purchases through Deco Purchasing and Distributing Co., Inc. ("Deco"). Deco allegedly assesses a handling charge ranging from 5 to 20 percent of sales price on all of such purchases made by it on behalf of Parkchester South. The complaint does not allege that any of the defendants own or control Deco, or that the purchasing services Deco provides are available elsewhere on more favorable terms. It does assert that if the Management Corp. did not control the Board, Deco would not serve as exclusive purchaser.

Although the complaint does not so explicate, the allegations appear to be an effort to state a tying claim. A tying arrangement is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product." *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. This circuit has thus far declined to adopt the requirement, prevalent elsewhere, that the unlawfulness of such agreements hinge upon a showing that the tying seller has an economic interest in the tied market. *See Gonzalez v. St. Margaret's House Housing Dev. Fund Corp., 880 F.2d 1514, 1517 (2d Cir. 1989)*. *Cf. Carl Sandburg* ***[**20]*** *Village Condominium Ass'n No. 1 v. First Condominium Dev. Co., 758 F.2d 203, 207-08 (7th Cir. 1985)*; *Keener v. Sizzler Family Steak Houses, 597 F.2d 453, 456 (5th Cir. 1979)*; *Venzie Corp. v. United States Mineral Prods. Co., 521 F.2d 1309, 1317-18 (3rd Cir. 1975)* (each imposing this "economic interest" test). Thus, the absence of any allegation that Management Corp. stands to reap any economic gain from Deco's engagement as purchasing agent for Parkchester South may not condemn Grossman's anti-trust claim to dismissal.

The lack of any allegation that Parkchester South's use of Deco as a purchasing agent was, at the time of Grossman's acquisition of a unit in the Parkchester South building, made a condition of his purchase does, however, warrant dismissal. The complaint in effect pleads no preexisting "tie" between the alleged tying product (residential condominium units) and the alleged tied product (purchasing agent services), since Grossman does not contend that provision of the services of a particular purchasing agent, such as Deco, was even a contemplated subject of the offering (no less a condition of sale) when he bought his units. This lack of conditionality distinguishes **[**21]** this case from other tying cases involving purchase of real estate interests brought in this district. *See 305 East 24th Owners Corp. v. Parman Co., 714 F. Supp. 1296, 1302, 1305 (S.D.N.Y. 1989)* (requirement that purchasers of interests in cooperative also purchase leases of building's garage space and commercial space was set forth in offering plan governing conversion of building and plaintiffs testified that owner refused to sell the building without the leases); *Gonzalez v. St. Margaret's House Housing Dev. Fund Corp., 880 F.2d 1514, 1515 (2d Cir. 1989)* (all tenants in low-cost building were required by existing rule of management to subscribe to building's meal plan) (citing *Gonzalez v. St. Margaret's, 668 F. Supp. 187, 189 (S.D.N.Y. 1987))*; *Johnson v. Soundview Apts. Housing Dev. Fund Co., 588 F. Supp. 1381, 1382 (S.D.N.Y. 1984)* (same). *See generally* Hovenkamp, *Tying*

Arrangements in the Real Estate Market: Federal ***Antitrust Law*** *and Local Land Development Policy*, 33 Hast.L.J. 325 (1981) ("[a] tying arrangement is an offer or agreement to sell or lease a certain product only on the condition that the buyer agree to take a different product as well.").

Plaintiff **[**22]** with reasons cites *Mission Hills Condominium Ass'n M-1 v. Corley, 570 F. Supp. 453, 456, 460 (N.D.Ill. 1983)* as support **[*209]** for a different result. That decision, however, did not expressly consider the necessity of a conditional relationship between the purchases in the tied and tying markets, and itself relies upon a decision in which the plaintiffs *did* allege that they were required, "as a condition of purchase of their units, to 'ratify and approve' . . . a long-term management contract . . .," *Johnson v. Nationwide Industries, Inc., 450 F. Supp. 948, 950 (N.D.Ill. 1978)*. *Mission Hills* is thus less than persuasive authority for the proposition that an illegal tying arrangement exists when purchase of the allegedly tied product is not made a condition, but is only one possible consequences, of the purchase of the tying product.

In addition to the insufficiently alleged "tie," the antitrust claim does not plead that the asserted arrangement with Deco has caused Grossman any damage. Although Grossman alleges that Deco imposes a 5 to 20% charge for its purchasing services, he does not allege in the complaint that Deco's charges are excessive or that its competitors provide **[**23]** services of like quality for a lesser price. In the principal case Grossman's counsel relies on, the plaintiffs managed to do at least that much. *See* *Mission Hills, 570 F. Supp. at 456* ("they claim that but for the defendants' actions, the plaintiffs could purchase these services from various other independent and more competent concerns on more favorable terms.").

HN6[] "To prevail in a private antitrust action, a plaintiff must show . . . the plaintiff was damaged as a result" of a violation of the antitrust laws. *Volvo N.A. Corp. v. Men's Int'l Pro. Tennis Council, 687 F. Supp. 800, 806 (S.D.N.Y. 1988)* (citation omitted). It is necessary at the pleading stage, therefore, to allege at least some such damage. Grossman has not done so in his complaint and for that reason too, the antitrust claim must be dismissed.

2. *The Interstate Land Sales Full Disclosure Act Claim*

Grossman claims that the Sponsor violated the provisions of the Interstate Land Sales Full Disclosure Act ("ILSFDA" or the "Act"), *15 U.S.C. §§ 1701-1720 (1982)*, by omitting material facts concerning the condition of the condominium apartments in Parkchester South from the Sponsor-prepared property report and **[**24]** misrepresenting other facts in the report. The claims fails as a matter of law because ILSFDA ***HN7***[] exempts from its requirements sales of property upon which building development has been completed at the time of sale.

HN8[] "Congress, in passing the statute, desired to protect purchasers from unscrupulous sales of undeveloped home sites, frequently involving out-of-state sales of land purportedly suitable for development but actually under water or useful only for grazing." *Winter v. Hollingsworth Properties, Inc., 777 F.2d 1444, 1447 (11th Cir. 1985)*. *See also* *McCown v. Heidler, 527 F.2d 204 (10th Cir. 1975)* (act prohibits fraud in land development enterprises); Conf. Rep. No. 1785, 90th Cong., 2d Sess. (1968), *reprinted in* 1968 U.S.Code Cong. & Ad.News 3053, 3066. The protections afforded by the Act, which are to be construed broadly in accord with the remedial purposes of the legislation, *Timmreck v. Munn, 433 F. Supp. 396 (N.D.Ill. 1977)*, apply to the sale or lease of any "lot" not otherwise exempted under *section 1702* of the Act. *See* *15 U.S.C. §§ 1703(a)(1)*, *1702*.

The absence of any definition of the term "lot" led to litigation over whether its ambit reached the condominium **[**25]** form of real estate ownership, as it clearly did cover land sold in the more conventional forms such as the subdivision plot. The administrative agency responsible for promulgating regulations under the Act and courts that have addressed the question agree that sales of realty in the condominium form are embraced by the term "lot":

> The ILSFDA ***HN9***[] was intended to curb abuses accompanying interstate land sales. The Act accomplishes that goal by including within it all sales of lots and then exempting a number of transaction, including sales of fully improved property. It is reasonable to conclude, as HUD did, that the term "lot" was used to refer **[*210]** generally to interests in realty. The legislative history supports this construction, employing the terms "lot," "land," and "real estate" in discussing the Act. This construction is also reasonable in terms of the purpose of

> the statute. A fraudulent out-of-state sale of land is not rendered any less fraudulent if the condominium form of ownership is utilized.

Winter v. Hollingsworth, 777 F.2d at 1448 (footnote omitted) (reversing *587 F. Supp. 1289 (S.D.Fla. 1984)*. *See also* *Schatz v. Jockey Club Phase III, Ltd., 604 F. Supp. 537, 540-41 (S.D.Fla.* **[**26]** *1985)*; *Nargiz v. Henlopen Developers, 380 A.2d 1361, 1364 (Del. 1977)*.

HN10[] The HUD and judicial interpretation of the Act to include condominium ownership within the meaning of "lot" does not serve, however, to extend the coverage of the Act to sales of improved, developed realty, whether or not of condominium form. *Section 1702(a)(2)* expressly exempts sales of such improved land "on which there is a residential, commercial, condominium, or industrial building . . ." (or land upon which the seller has contracted to complete construction of such a structure within a period of two years), *15 U.S.C. § 1702(a)(2)*, and plaintiff points to no case subjecting sales of *completed* condominiums to the Act's provisions. [3] *Schatz* (a Florida District court case decided before the Eleventh Circuit opinion in *Winter*) involved merely an application of the two-year, "to be built" exemption, which it found on the facts the sale's agreement did not satisfy. *604 F. Supp. at 542*.

[27]** The case in no way supports Grossman's novel proposition that ILSFDA governs sales of fully-developed condominia, such as compose the Parkchester complex. Reliance on it (and no additional authority, legislative history, or legal reasoning) for that point is particularly incredible in view of the crystal-clear pronouncement by the Eleventh Circuit in *Winter*, issued a matter of months following the district court opinion in *Schatz*:

> We decline to depart from the plain language of the statutory exemption. ***HN12***[] If at the time the purchaser signs the contract there exists a condominium building or the seller is obligated to erect such a building within two years, the sale is exempt from the Act. If, as in this case, no building exists at the time of contracting and the contract does not contain a binding obligation to complete one within two years, compliance with the statute is required.

Winter, 777 F.2d at 1450; *see also* *Markowitz v. NortheastLand Company, 1989 U.S. Dist. LEXIS 9433 (M.D.Pa. 1989)* (dismissing ILSFDA claim based upon *section 1702(a)(2)* exemption); *Nargiz v. Henlopen Developers, 380 A.2d 1361 (Del. 1977)* (where developer and purchaser contract for sale **[**28]** of condominium which did not exist at time, sale does not satisfy statutory language exempting sale of improved property on which there is a residential building).

For the reasons indicated, Grossman's theory is inconsistent with the legislative history of ILSFDA, its construction by HUD, and the meaning assigned to the *section 1702(a)(2)* exemption by courts that have found it necessary to consider the matter. Accordingly, the ILSFDA claim is dismissed.

3. *The Securities Claim*

The court's prior opinion in this action addressed and denied the contention that Section 10(b) of the Securities and Exchange Act of 1934, *15 U.S.C. § 78j(b) (1982)*, was violated when Parkchester was converted to condominium ownership, on grounds that the condominium sales are not within the scope of the federal securities **[*211]** laws. [4]

---

[3] HUD explained the treatment of condominiums as follows: ***HN11***[] "For a condominium unit sale to be exempted from the Act, . . . either it must be completed before it is sold, or it must be sold under a contract obligating the seller to erect the unit within two years from the date the purchaser signs the contract of sale." *38 Fed.Reg. 23,866 (1973)*. *See also* 44 Fed.Reg. 24,012 (1979); *Winter v. Hollingsworth, 777 F.2d 1444, 1448-49 (11th Cir. 1985)* (Congress acted to exempt condominium sales "where the building is existing or must, by contract, be completed within two years.").

[4] Footnote One of the Opinion, in addressing the securities claim, stated:

> ***HN13***[] The sale of condominium units, even when "made in contemplation of appreciation solely through the efforts of defendants," as the complaint alleges, does not constitute a sale of securities. *See Bender [v. Continental Towers, Ltd., Partnership], supra*, *632 F. Supp. 497*. Even though the sponsor of an offering plan might influence the value of the units

That holding, which relied upon *Bender v. Continental Towers Ltd., Partnership, 632 F. Supp. 497 (S.D.N.Y. 1986)*, was not disturbed on appeal, and accordingly, is not subject to reexamination here.

[29]** Nevertheless, without seeking leave of court, counsel for plaintiffs has asserted an "investment contract" claim under Section 10(b) in the consolidated complaint. [5] Counsel's conduct in the *Bender* action, in which parties represented by the same lawyer likewise pursued a securities cause of action based on condominium sales, resulted in sanctions against him in the amount of $ 1,000 when, among other things, a claim was improperly realleged in an amended complaint. *See Bender v. Continental Towers Ltd*., No. 85 Civ. 5725 (S.D.N.Y. Aug 21, 1987). [*1987 U.S. Dist. LEXIS 7498]*. Without addressing the appropriateness of sanctions for counsel's conduct in the instant action, the securities claim herein is dismissed on the grounds previously stated, grounds which counsel failed to challenge on appeal.

The same conclusion applies to the extent the "new" claim is founded upon Section 17(a) of the Securities Act of 1933. ***HN14***[] No private right of action has been **[**30]** held to exist under that provision. *See, e.g., McCowan v. Dean Witter Reynolds, Inc*., [1989 Transfer Binder]Fed. Sec. L.Rep. (CCH) P 94, 423 at 92,724 (S.D.N.Y. Apr. 11, 1989); *The Limited Inc. v. McCrory Corp., 683 F. Supp. 387 (S.D.N.Y. 1988)*; *Ackerman v. Clinical Data, Inc*., Fed. Sec. L. Rep. (CCH) P 92,207 at 91,566 (S.D.N.Y. July 8, 1985). Accordingly, the securities cause of action is dismissed in its entirety.

4. *The RICO Claim*

Plaintiffs allege that the defendants, as a group, violated RICO by using the mails to send to tenants and other prospective purchasers Offering Plans containing deliberate misinformation concerning the conversion of Parkchester South. The Court of Appeals for the Second Circuit and the Supreme Court previously have considered the adequacy of the claim with respect to the RICO requirements that the alleged mail fraud acts constitute a "pattern" of "racketeering activity" revealing continuity. *See Beauford v. Helmsley*, 865 F.2d at 1392. Those elements are not placed again in question here.

i. Material Misrepresentations

Under *Rule 12(b)(6), Fed. R. Civ. P.*, defendants seek dismissal principally on the ground **[**31]** that Grossman's allegations of fraudulent representations in the Offering Plan are refuted by the Plan itself. *See Feinman v. Schulman Berlin & Davis, 677 F. Supp. 168, 170 n. 3 (S.D.N.Y. 1988)* (permitting consideration, on motion to dismiss, of contents of private placement memorandum which, although not attached to complaint, was mentioned therein as source of alleged misrepresentations); *see also Decker v. Massey-Ferguson Ltd., 681 F.2d 111, 113-18 (2d Cir. 1982)* (affirming dismissal of several alleged misrepresentations in company's annual report where document did not support allegations of complaint); *Crystal v. Foy, 562 F. Supp. 422 (S.D.N.Y. 1983)* (Weinfeld, J.) (dismissing complaint upon examining sources cited by plaintiff as containing misrepresentations and finding that "plaintiff's own source repels her claim . . ."); *O'Brien v. National Property Analysts Partners, 719 F. Supp. 222, 227-228 (S.D.N.Y 1989)* (same).

[*212] Although it is a close question, defendants have failed to establish that Grossman can prove no set of facts that might establish that material information was withheld from him and other purchasers of condominium units. To be sure, a facial examination **[**32]** of the offering plan indicates that it provided notice to prospective buyers that, among other things, (a) the plumbing system was aging and required repairs, (b) certain portions of the roofs had leaks and required repairs, and (c) the electrical wiring, although adequate for existing conditions, would not sustain installation of additional loads.

---

through its marketing efforts and its own buying and selling strategies, a "piece of real estate, such as a condominium, has an inherent worth not solely dependent on the efforts of the promoter." *Bender, supra, 632 F. Supp. at 501*.

Beauford, 650 F. Supp. at 550 n. 1. *See also* *Grenader v. Spitz, 537 F.2d 612, 617* (2d Cir.), *cert. denied*, *429 U.S. 1009, 50 L. Ed. 2d 619, 97 S. Ct. 541 (1976)*.

[5] The complaint fails to specify on behalf of which of the plaintiffs this securities claim is brought.

The complaint alleges, however, that the disclosures in the Offering Plan were less than complete, and the substance of the allegedly omitted information cannot be said to be immaterial to a decision whether and at what price to purchase a Parkchester South unit. According to plaintiffs, Sponsor had received reports "from its own engineers that the plumbing system was so deteriorated that it had to be completely replaced," and knew or should have known that the roofs and wiring also were so deteriorated or inadequate that they required replacement. Nevertheless, they contend the Sponsor deliberately withheld that information from the Offering Plan in order to "deceive and defraud the buyers of condominium apartments by concealing serious problems in the physical plant of Parkchester South."

It may turn out, as defendants contend, that there **[**33]** exists merely a difference of opinion between the Sponsor, Grossman and certain tenants as to the proper scope of repairs and maintenance that Parkchester South requires, and therefore, nothing approaching fraudulent conduct on any defendant's part. *Cf.* *Bender v. Continental Towers Limited Partnership, No. 85 Civ. 5725 (S.D.N.Y. 1987) [1987 U.S. Dist. LEXIS 7498]*. However, given the apparent materiality of at least some of the information that the complaint alleges was not disclosed (such as the supposed necessity of wholesale replacement of the plumbing system at considerable expense), the allegation that such information was deliberately suppressed, and the requirement at this juncture that such allegations be assumed true, defendants' contention that this is nothing more than a disagreement as to the appropriate means of maintaining a building cannot sustain an order of dismissal of this cause of action, at least to the extent the claim is maintained by Grossman alone.

ii. Lack of Injury to Non-Purchasing Plaintiffs

More persuasive is defendants' plea for dismissal of the non-purchasing tenants from the RICO claim on ground that this claim alleges no injury to non-owning non-purchasers. That is **[**34]** true. Although the claim is nominally brought on behalf of both Grossman (the purchasing/owner plaintiff) and the other, non-purchasing, plaintiffs, the paragraphs of the RICO claim that describe, and ascribe causality and injury to, the fraudulent schemes that forms its basis speak only of these schemes' effects upon "buyers and owners." *See* para. 93 ("The fraud consists, in part, of deliberate misinformation to buyers, and to owners of condominium apartments, for the purpose of defrauding said buyers and owners"); para. 94 (". . . there is no foreseeable end to the scheme to defraud the condominium owners by the defendants"); para. 98 (referring generally to "the several schemes to defraud owners and buyers of condominiums"); para. 99 ("The schemes to defraud have resulted in damages to the owners of condominiums in the hundreds of millions of dollars.").

The complaint's failure to plead any injury to non-purchasing plaintiffs under the civil RICO claim requires dismissal of the claim as to these plaintiffs, since economic injury is a necessary element of liability under such a claim. *See* *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 496-97, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)* ***HN15***[] (plaintiff "can only recover **[**35]** to the extent that [] he has been injured in his business or property by the conduct constituting the violation."); *Burdick v. American Express Co., 865 F.2d 527, 529 (2d Cir. 1989)* (plaintiff must allege non-remote economic injury arising from predicate acts); *O'Malley v. O'Neill, 887 F.2d 1557, 1561 (11th Cir. 1989)* (same).

[*213] iii. Particularity of Pleading under *Rule 9(b)*

Moreover, defendants correctly point out that the RICO claim fails to particularize the roles of the individual defendants in perpetrating the allegedly fraudulent acts, as is required by *Rule 9(b), Fed. R. Civ. P.* "When a plaintiff sues sixteen defendants, he or she has an obligation to allege specifically the fraud perpetrated by each defendant." *Natowitz v. Mehlman, 542 F. Supp. 674, 676 (S.D.N.Y. 1982)*; *accord* *Di Vittorio v. Equidyne Extractive Industries, Inc., 822 F.2d 1242, 1247 (2d Cir. 1987)* ***HN16***[] ("where multiple defendants are asked to respond to allegations of fraud, the complaint should inform each defendant of the nature of his alleged participation in the fraud."). In civil RICO actions, "the concerns that dictate that fraud be pleaded with particularity exist with even greater urgency. **[**36]** . . ." *Plount v. American Home Assur. Co., 668 F. Supp. 204, 206 (S.D.N.Y. 1987)*; *Rich-Taubman Associates v. Stamford Restaurant Operating Co., 587 F. Supp. 875, 878 (S.D.N.Y. 1984)*.

This RICO claim is brought against all of the defendants to this action but does not specify with particularity what any one of those numerous defendants did. The allegations in the complaint asserting fraudulent conduct repeatedly refer to the Sponsor as actor, yet plaintiffs do not sue the Sponsor. No specific action is attributed to any one of the thirty-five named defendants; indeed, none appears to merit mention in the paragraphs of the complaint composing the RICO cause, other than collectively, as "defendants." This sort of general pleading does not give each defendant "fair notice" of what he or she did to further the fraudulent scheme, as *Rule 9(b)* requires. *Di Vittorio v. Equidyne Extractive Indus., Inc., 822 F.2d 1242, 1247 (2d Cir. 1987)*; *see also* *Bingham v. Zolt, 683 F. Supp. 965, 973 (S.D.N.Y. 1988)*; *O'Connor & Associates v. Dean Witter Reynolds, Inc., 529 F. Supp. 1179, 1197 (S.D.N.Y. 1981)*.

Pursuant to *Rule 9(b)*, therefore, the plaintiffs' RICO claim must be dismissed. **[**37]** In view of the procedural history of this action, and, in particular, plaintiffs' failure to attend to the prior cautionary instruction delivered by the Second Circuit to them with respect to this issue, *see Beauford v. Helmsley*, 865 F.2d at 1393 ("we doubt that the complaint [meets] the requirements of *Fed. R. Civ. P. 9(b)*, which requires that fraud be pleaded with particularity"), leave is not given plaintiffs, once again, to replead with particularity the roles played by each of the individual defendants named in the complaint in the fraudulent schemes alleged therein. Should plaintiffs' counsel form a reasonable belief, after reviewing the relevant authorities and investigating the facts, that a RICO claim complying fully with *Rule 9(b)* can be executed, such a proposed amended complaint may be submitted on motion, supported by memorandum of law, within thirty days of this opinion.

5. *The State Law Claims*

In view of the absence of a valid remaining federal claim, further jurisdiction over the pendent state claims asserted by the plaintiffs is presently declined. *See* *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *Albany Ins. Co. v. Esses, 831 F.2d 41, 45* ***[**38]*** *(2d Cir. 1987)*.

Conclusion

For the reasons set forth above, the motion for a preliminary injunction is denied. Pursuant to *Rule 12(b)(6)*, the claims in the complaint arising under the federal antitrust laws, Interstate Land Sales Full Disclosure Act and federal securities laws are dismissed with prejudice. Grossman's RICO claim and the pendent state law claims set forth in the complaint are also dismissed, pursuant to *Rule 9(b)* and *Gibbs*, subject to reconsideration of dismissal upon the submission to the court, within thirty (30) days from the date of this opinion and order, of a motion seeking leave to file a proposed amended complaint containing a well-pleaded RICO claim.

It is so ordered.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Contracts Law > Contract Formation > Offers > General Overview

HN1[] **Federal & State Interrelationships, Choice of Law**

Parties' freedom to choose what jurisdiction's law will apply to their agreement cannot be unlimited. They cannot require that their contract be governed by the law of a jurisdiction which has no relation whatever to them or their agreement. And they cannot by agreement thwart or offend the public policy of the state the law of which ought otherwise to apply. So limited, party autonomy furthers the basic policy of contract law. Limited party autonomy has grown to be the modern rule in contracts conflict of laws.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Contracts Law > Contract Formation > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN2[] **Federal & State Interrelationships, Choice of Law**

The law of the state chosen by the parties to govern their contractual rights and duties will be applied, even if the particular issue is one which the parties could not have resolved by an explicit provision in their agreement directed to that issue, unless either (a) the chosen state has no substantial relationship to the parties or the transaction and there is no other reasonable basis for the parties' choice, or (b) application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue and which would be the state of the applicable law in the absence of an effective choice of law by the parties.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN3[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

An agreement not to compete is in restraint of trade and will not be enforced unless it is reasonable.

Contracts Law > Defenses > Public Policy Violations

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN4[] **Types of Contracts, Covenants**

As a general rule, unreasonable restraints of trade, including unreasonable covenants not to compete, contravene public policy.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN5[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Virtually every court that has addressed the question of whether enforcement of noncompetition agreements is a matter of fundamental or important state policy has answered affirmatively.

Contracts Law > Defenses > Public Policy Violations

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Labor & Employment Law > Employment Relationships > General Overview

HN6[] **Defenses, Public Policy Violations**

An agreement not to compete is in restraint of trade and therefore unenforceable on grounds of public policy unless it is reasonable. An agreement not to compete is not a reasonable restraint of trade unless it meets each of three criteria. First, the agreement not to compete must be ancillary to an otherwise valid transaction or relationship. Such a restraint on competition is unreasonable unless it is part of and subsidiary to an otherwise valid transaction or relationship which gives rise to an interest worthy of protection. Such transactions or relationships include the purchase and sale of a business, and employment relationships. Second, the restraint created by the agreement not to compete must not be greater than necessary to protect the promisee's legitimate interest. The extent of the agreement not to compete must accordingly be limited appropriately as to time, territory, and type of activity. An agreement not to compete which is not appropriately limited may be modified and enforced by a court of equity to the extent necessary to protect the promisee's legitimate interest, but may not be enforced by a court of law. Third, the promisee's need for the protection afforded by the agreement not to compete must not be outweighed by either the hardship to the promisor or any injury likely to the public.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN7[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Before an agreement not to compete will be enforced, its benefits must be balanced against its burdens, both to the promisor and the public. Thus, such an agreement may, in a particular case, accomplish the salutary purpose of encouraging an employer to share confidential, proprietary information with an employee in furtherance of their common purpose, but must not also take unfair advantage of the disparity of bargaining power between them or too severely impair the employee's personal freedom and economic mobility.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN8[] **Trials, Judgment as Matter of Law**

Whether an agreement not to compete is a reasonable restraint of trade is a question of law for the court.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Contracts Law > Remedies > Equitable Relief > Injunctions

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN9[] **Types of Contracts, Covenants**

An agreement not to compete, like any other contract, must be supported by consideration. Consideration may include special training or knowledge afforded the promisor, but it is not limited to such things. Also, performance of a covenant not to compete, like performance of other contractual obligations, may, in certain instances at least, be excused by the promisee's own breach. And enforcement of an agreement not to compete may not be by injunction if the party seeking enforcement is not entitled to such stable relief, as, for example, when that party has himself engaged in inequitable conduct, or when that party has failed to show that without injunctive relief he will suffer irreparable injury for which he has no adequate legal remedy.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Torts > ... > Malicious Prosecution > Elements > General Overview

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Torts > Intentional Torts > Malicious Prosecution > General Overview

HN12[] Bonds, Execution of Bonds

A person who obtains an injunction wrongfully is liable for damages caused by issuance of the injunction. There are two separate causes of action for wrongful injunction, one upon the bond ordinarily filed to obtain the injunction, and the other for malicious prosecution. The two actions differ in the kind of wrong which must be shown to establish liability and in the amount of recovery.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > Temporary Restraining Orders

HN13[] Injunctions, Grounds for Injunctions

A cause of action upon an injunction bond is predicated upon a breach of the condition of the bond. That condition, as prescribed by *Tex. R. Civ. P. 684* is that the applicant will abide the decision which may be made in the cause, and that he will pay all sums of money and costs that may be adjudged against him if the restraining order or temporary injunction shall be dissolved in whole or in part. To prevail upon this cause of action, the claimant must prove that the temporary restraining order or temporary injunction was issued or perpetuated when it should not have been, and that it was later dissolved. The claimant need not prove that the temporary restraining order or temporary injunction was obtained maliciously or without probable cause.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Torts > ... > Malicious Prosecution > Elements > General Overview

HN14[] **Injunctions, Preliminary & Temporary Injunctions**

An injunction plaintiff need not establish the correctness of his claim to obtain temporary relief, but must show only a likelihood of success on the merits. Correspondingly, an injunction defendant has a lesser burden to establish his right to recover on an injunction bond than would be required in an ordinary action for malicious prosecution.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Torts > Remedies > Damages > General Overview

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Torts > Intentional Torts > Malicious Prosecution > General Overview

Torts > ... > Malicious Prosecution > Elements > General Overview

Torts > Intentional Torts > Malicious Prosecution > Remedies

HN15[] **Injunctions, Grounds for Injunctions**

The only other cause of action for wrongful injunction is for malicious prosecution. It is established by the weight of authority that in the absence of elements of an action for malicious prosecution no action will lie by the defendant in an injunction suit, independently of a bond or undertaking, for damages for the wrongful suing out of the injunction. To prevail upon this cause of action the claimant must prove that the injunction suit was prosecuted maliciously and without probable cause, and was terminated in his favor. Once the injunction plaintiff has prevailed after full hearing of all issues, damages to the defendant result not from the reduced showing required to obtain temporary relief but from the full proof necessary to succeed on the merits, and defendant cannot recover those damages without full proof of malicious prosecution.

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

Torts > ... > Malicious Prosecution > Elements > General Overview

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN16[] **Injunctions, Permanent Injunctions**

The damages recoverable in an action on an injunction bond are, of course, limited to the amount of the bond. In an action for malicious prosecution, all actual damages may be recovered. Under either cause of action the claimant must prove that issuance of the injunction caused him damages. He cannot recover for having been prohibited from doing something which he had no right to do. Nor can he recover for having been prohibited from doing something which he agreed not to do, even if the agreement was unenforceable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN18[] Antitrust & Trade Law, Sherman Act

An agreement not to compete is a restraint on trade. However, not every contract in restraint of trade is prohibited by the Sherman Antitrust Act, *15 U.S.C.S. § 1* but only those contracts which unreasonably restrain trade. The focus of this rule of reason test is upon whether the restraint promotes competition or suppresses or destroys competition. Some restraints, because of their inherently pernicious effect upon competition, are per se unreasonable, while others are not and must be analyzed under the rule of reason. The factors important to a rule of reason analysis vary from case to case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] Per Se Rule & Rule of Reason, Per Se Violations

There can be little doubt that the Sherman Antitrust Act, *15 U.S.C.S. § 1*, applies to post-employment noncompetition agreements. Such agreements are not per se violations of the Sherman Act but must be analyzed under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN20[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To establish a violation under the rule of reason, one must prove that the agreement has an adverse effect on competition in the relevant market. This is distinguished from the effect a post-employment noncompetition agreement has on the particular employer and employee involved. Rule of reason analysis under antitrust laws must not be confused with reasonableness analysis under the common law. Rule of reason analysis tests the effect of a restraint of trade on competition. By contrast, whether a noncompetition agreement is reasonable depends upon its effect on the parties, the competitors, as it were. The two standards are not directly related. An agreement may be reasonable as between the parties and nevertheless violate antitrust laws. Conversely, an agreement may be unreasonable as between the parties and yet not violate the rule of reason test under the antitrust laws.

Opinion by: HECHT

Opinion

[*674] ON MOTION FOR REHEARING

HECHT, Justice.

On motions for rehearing, our opinion and judgment of July 13, 1988, are withdrawn, and the following is now the opinion of the Court.

This case involving a noncompetition agreement between an employer and employee presents three principal issues: first, whether the law of the state chosen by the parties to govern their agreement should be applied; second, whether the noncompetition agreement is enforceable; third, if the agreement is not enforceable, whether damages for **[**2]** its attempted enforcement are recoverable under the Texas Free Enterprise and Antitrust Act of 1983 or for wrongful injunction, fraud, or tortious interference with contract.

The trial court applied the law of the state of Florida, chosen by the parties to govern the noncompetition agreement, to hold the agreement valid but overly broad **[*675]** as to the geographical territory in which competition was restricted. Based upon a jury finding that the employee breached the agreement, the trial court enjoined any further violation of the agreement within a smaller territory, and denied the employee's claims for damages. The court of appeals affirmed. *732 S.W.2d 29*. We hold that Texas law, not Florida law, applies in this case, and that under Texas law, the noncompetition agreement is unenforceable. We further hold that the employee is not entitled to recover damages for his employer's wrongfully obtaining an injunction against him, and that the employee has failed to show fraud, tortious interference, or a violation of the Texas Free Enterprise and Antitrust Act entitling him to damages. We accordingly reverse the judgment of the court of appeals and render judgment in accordance **[**3]** with this opinion.

I

A

Edward DeSantis has been providing international and corporate security services, both in the CIA and the private sector for his entire career. In June 1981, while employed by R. J. Reynolds Industries in North Carolina, DeSantis interviewed for a position with Wackenhut Corporation. At that time, Wackenhut, which was chartered and headquartered in Florida, was the third largest company in the nation specializing in furnishing security guards for businesses throughout the country. DeSantis met with Wackenhut's president, founder, and majority stockholder, George Wackenhut, at the company's offices in Florida, and the two agreed that DeSantis would immediately assume the position of Wackenhut's Houston area manager. According to DeSantis, George Wackenhut promised him that the area manager's position was only temporary, and that he would soon be moved into a top executive position. George Wackenhut denies that he made any such promises to DeSantis, admitting only that he mentioned advancement to an executive position as a possible opportunity.

At Wackenhut's request, DeSantis signed a noncompetition agreement at the inception of his employment. The agreement **[**4]** recites that it was "made and entered into" on August 13, 1981, in Florida, although DeSantis signed it in Texas. It also recites consideration "including but not limited to the Employee's employment by the Employer". In the agreement DeSantis covenanted that as long as he was employed by Wackenhut and for two years thereafter, he would not compete in any way with Wackenhut in a forty-county area in south Texas. DeSantis expressly acknowledged that Wackenhut's client list "is a valuable, special and unique asset of [Wackenhut's] business" and agreed never to disclose it to anyone. DeSantis also agreed never to divulge any confidential or proprietary information acquired through his employment with Wackenhut. Finally, DeSantis and Wackenhut agreed "that any questions concerning interpretation or enforcement of this contract shall be governed by Florida law."

DeSantis remained manager of Wackenhut's Houston office for nearly three years, until March 1984, when he resigned under threat of termination. DeSantis contends that he was forced to quit because of disagreements with Wackenhut's senior management over the profitability of the Houston office. Wackenhut contends that DeSantis **[**5]** was asked to resign because of his unethical solicitation of business.

Following his resignation, DeSantis invested in a company which marketed security electronics. He also formed a new company, Risk Deterrence, Inc. ("RDI"), to provide security consulting services and security guards to a limited clientele. The month following termination of his employment with Wackenhut, DeSantis sent out letters announcing his new ventures to twenty or thirty businesses, about half of which were Wackenhut clients. He added a postscript to letters to Wackenhut clients in which he disclaimed any intent to interfere with their existing contracts with Wackenhut. Within six months, however, one of Wackenhut's clients, Marathon Oil Company, had terminated its contract with Wackenhut and signed a five-year contract **[*676]** with RDI, and a second Wackenhut client, TRW-Mission Drilling Products, was considering doing the same. Wackenhut claims that DeSantis was acquiring its clients in violation of the noncompetition agreement. DeSantis claims that these clients began considering other security service providers only after the quality of Wackenhut's services declined, following DeSantis' departure.

[6]** B

Wackenhut sued DeSantis and RDI in October 1984 to enjoin them from violating the noncompetition agreement, and to recover damages for breach of the agreement and for tortious interference with business relations. Wackenhut alleged that DeSantis and RDI were soliciting its clients' business using confidential client and pricing information which DeSantis obtained through his employment with Wackenhut. The trial court issued an ex parte temporary restraining order against DeSantis and RDI, and fixed the amount of the requisite bond which Wackenhut filed at $ 5,000. Following a hearing, the trial court issued a temporary injunction upon a $ 75,000 bond, which Wackenhut also filed. DeSantis and RDI counterclaimed against Wackenhut, alleging that Wackenhut had fraudulently induced DeSantis to sign the noncompetition agreement, that the agreement violated state antitrust laws, and that enforcement of the agreement by temporary injunction was wrongful and tortiously interfered with DeSantis and RDI's contract and business relationships. RDI claimed damages for loss of the Marathon contract, which Marathon terminated after the injunction issued, for loss of the TRW business, and for **[**7]** injury to its reputation. DeSantis claimed damages for lost salary, impaired reputation, and mental anguish. DeSantis and RDI both sought statutory damages under the Texas Free Enterprise and Antitrust Act, *Texas Business and Commerce Code Annotated sections 15.01-15.51* (Vernon 1987 and Supp. 1990), and exemplary damages.

The trial court granted Wackenhut's motion for summary judgment on DeSantis and RDI's claim for tortious interference, and directed a verdict against them on their fraud claim. At trial, Wackenhut withdrew its tortious interference claim. A jury found that DeSantis breached the noncompetition agreement by competing with Wackenhut, but failed to find that Wackenhut would be irreparably harmed if DeSantis were not prohibited from further breaching the agreement. [1] The jury also failed to find that Wackenhut had ever been unfair, unjust, misleading or deceptive to DeSantis so as to cause him any injury. The jury found that Wackenhut's enforcement of the noncompetition agreement had caused DeSantis no damages, but had caused RDI to lose profits from Marathon's and TRW's business in the amount of $ 9,000 in the past and a like amount in the future.

[8]** The trial court concluded that irreparable harm to Wackenhut was either presumed from DeSantis' breach of the agreement under Florida law, or established as a matter of law because of the absence of an adequate legal remedy for breach of the agreement under Texas law. Accordingly, the trial court permanently enjoined DeSantis from competing with Wackenhut, and RDI from employing DeSantis to compete with Wackenhut, for two years from the date DeSantis left Wackenhut in an area reduced by the trial court from the forty counties stated in the agreement to the thirteen counties found by the trial court to be reasonably necessary to protect Wackenhut's interest. The trial court also permanently enjoined DeSantis from divulging Wackenhut's client list or proprietary information, and RDI from using any proprietary information of Wackehhut's acquired through DeSantis. The trial court denied all relief requested by DeSantis and RDI, based upon the jury's finding that DeSantis had breached his agreement with Wackenhut. The trial court awarded Wackenhut attorney's fees and costs.

[*677] The court of appeals affirmed the judgment of the trial court in all respects.

II

We first consider **[**9]** what law is to be applied in determining whether the noncompetition agreement in this case is enforceable. Wackenhut contends that Florida law applies, as expressly agreed by the parties. DeSantis argues that Texas law applies, despite the parties' agreement.

A

This Court has not previously addressed what effect should be given to contractual choice of law provisions. We begin with what Chief Justice Marshall referred to as a principle of "universal law . . . that, in every forum, a contract is governed by the law with a view to which it was made." *Wayman v. Southard, 23 U.S. (10 Wheat.) 1, 48, 6 L.Ed. 253 (1825)*. This principle derives from the most basic policy of contract law, which is the protection of the justified expectations of the parties. *See* E. SCOLES & P. HAY, CONFLICT OF LAWS 632 (1984) ["SCOLES"]; Reese, *Choice of Law in Torts and Contracts and Directions for the Future,* 16 COLUM. J. TRANSNAT'L L. 1, 21 (1977). The parties' understanding of their respective contractual rights and obligations depends in part upon the certainty with which they may predict how the law will interpret and enforce their agreement. *Id.*

---

[1] Whether a party has been or will be irreparably harmed is not a jury issue, although factual issues to be considered by the court in making that determination may be. *See*, *State v. Texas Pet Foods, Inc., 591 S.W.2d 800, 803-804 (Tex. 1979)*.

When parties to a contract reside **[**10]** or expect to perform their respective obligations in multiple jurisdictions, they may be uncertain as to what jurisdiction's law will govern construction and enforcement of the contract. To avoid this uncertainty, they may express in their agreement their own choice that the law of a specified jurisdiction apply to their agreement. Judicial respect for their choice advances the policy of protecting their expectations. This conflict of laws concept has come to be referred to as party autonomy. *See* R. WEINTTAUB, COMMENTARY ON THE CONFLICT OF LAWS 269-271 (1971) ["WEINTTAUB"]. However, the ***HN1***[] parties' freedom to choose what jurisdiction's law will apply to their agreement cannot be unlimited. They cannot require that their contract be governed by the law of a jurisdiction which has no relation whatever to them or their agreement. And they cannot by agreement thwart or offend the public policy of the state the law of which ought otherwise to apply. So limited, party autonomy furthers the basic policy of contract law. With roots deep in two centuries of American jurisprudence, limited party autonomy has grown to be the modern rule in contracts conflict of laws. *See* SCOLES, *supra* **[**11]** at 632-652; WEINTRAUB, *supra* at 269-*275; RESTATEMENT (SECOND) OF CONFLICT OF LAWS* ["the RESTATEMENT"*] § 187* (1971).

The party autonomy rule has been recognized in this state. The Legislature has provided in the Uniform Commercial Code:

> [W]hen a transaction bears a reasonable relation to this state and also to another state or nation the parties may agree that the law either of this state or of such other state or nation shall govern their rights and duties.

TEX. BUS. & CON. CODE ANN. § 1.105(a) (Vernon Supp. 1989). In a different context, one court of appeals has elaborated further:

> [A]n express agreement of the parties that the contract is to be governed by the laws of a particular state will be given effect if the contract bears a reasonable relation to the chosen state and no countervailing public policy of the forum demands otherwise.

First Commerce Realty Investors v. K-F Land Co., 617 S.W.2d 806, 808-809 (Tex. Civ. App.--Houston [14th Dist.] 1981, writ ref'd n.r.e.) (citing, *inter alia,* the *RESTATEMENT § 187*). We believe the rule is best formulated in *section 187 of the RESTATEMENT* and will therefore look to its provisions **[**12]** in our analysis of this case.

B

Section 187 states:

> Law of the State Chosen by the Parties
>
> (1) The law of the state chosen by the parties to govern their contractual rights and duties will be applied if the particular **[*678]** issue is one which the parties could have resolved by an explicit provision in their agreement directed to that issue.
>
> (2) ***HN2***[] The law of the state chosen by the parties to govern their contractual rights and duties will be applied, even if the particular issue is one which the parties could not have resolved by an explicit provision in their agreement directed to that issue, unless either
>
> > (a) the chosen state has no substantial relationship to the parties or the transaction and there is no other reasonable basis for the parties' choice, or
> >
> > (b) application of the law of the chosen state would be contrary to a fundamental policy of a state which has a materially greater interest than the chosen state in the determination of the particular issue and which, under the rule of *§ 188*, would be the state of the applicable law in the absence of an effective choice of law by the parties.
>
> (3) In the absence of a contrary indication **[**13]** of intention, the reference is to the local law of the state of the chosen law.

The issue before us -- whether the noncompetition agreement in this case is enforceable -- is not "one which the parties could have resolved by an explicit provision in their agreement". *See* *RESTATEMENT (SECOND) OF CONFLICT OF LAWS § 187 comment d* (1971). We therefore apply *section 187(2)*.

The parties in this case chose the law of Florida to govern their contract. Florida has a substantial relationship to the parties and the transaction because Wackenhut's corporate offices are there, and some of the negotiations between DeSantis and George Wackenhut occurred there. Thus, under *section 187(2)* Florida law should apply in this case unless it falls within the exception stated in *section 187(2)(b)*. Whether that exception applies depends upon three determinations: first, whether there is a state the law of which would apply under *section 188 of the RESTATEMENT* absent an effective choice of law by the parties, or in other words, whether a state has a more significant relationship with the parties and their transaction than the state they chose; second, whether that state has a materially greater **[**14]** interest than the chosen state in deciding whether this noncompetition agreement should be enforced; and third, whether that state's fundamental policy would be contravened by the application of the law of the chosen state in this case. More particularly, we must determine: first, whether Texas has a more significant relationship to these parties and their transaction than Florida; second, whether Texas has a materially greater interest than Florida in deciding the enforceability of the noncompetition agreement in this case; and third, whether the application of Florida law in this case would be contrary to fundamental policy of Texas.

1

Section 188 of the RESTATEMENT provides that a contract is to be governed by the law of the state that "has the most significant relationship to the transaction and the parties", taking into account various contacts in light of the basic conflict of laws principles of section 6 of the RESTATEMENT. [2] **[**16]** In this case, that state is Texas.

---

[2] Section 188 of the RESTATEMENT states in full:

Law Governing in Absence of Effective Choice by the Parties

(1) The rights and duties of the parties with respect to an issue in contract are determined by the local law of the state which, with respect to that issue, has the most significant relationship to the transaction and the parties under the principles stated in § 6.

(2) In the absence of an effective choice of law by the parties (see § 187), the contacts to be taken into account in applying the principles of § 6 to determine the law applicable to an issue include:

(a) the place of contracting,

(b) the place of negotiation of the contract,

(c) the place of performance,

(d) the location of the subject matter of the contract, and

(e) the domicil, residence, nationality, place of incorporation and place of business of the parties.

These contacts are to be evaluated according to their relative importance with respect to the particular issue.

(3) If the place of negotiating the contract and the place of performance are in the same state, the local law of this state will usually be applied, except as otherwise provided in §§ 189-199 and 203.

Section 6 of the RESTATEMENT states:

Choice-of-Law Principles

(1) A court, subject to constitutional restrictions, will follow a statutory directive of its own state on choice of law.

(2) When there is no such directive, the factors relevant to the choice of the applicable rule of law include

(a) the needs of the interstate and international systems,

(b) the relevant policies of the forum,

(c) the relevant policies of other interested states and the relative interests of those states in the determination of the particular issue,

(d) the protection of justified expectations,

(e) the basic policies underlying the particular field of law,

[*679] Wackenhut hired DeSantis to manage its business in the Houston area. Although some of the negotiations between DeSantis and Wackenhut occurred in Florida, the noncompetition agreement was finally executed **[**15]** by DeSantis in Houston. [3] The place of performance for both parties was Texas, where the subject matter of the contract was located. Wackenhut may also be considered to have performed its obligations in part in Florida, from where it supervised its various operations, including its Houston office. Still, the gist of the agreement in this case was the performance of personal services in Texas. As a rule, that factor alone is conclusive in determining what state's law is to apply. *See* RESTATEMENT § 196 (1971); [4] *see also* *Schulke Radio Prod. Ltd. v. Midwestern Broadcasting Co., 6 Ohio St. 3d 436, 453 N.E.2d 683, 685-6 (1983)*; *Wood Bros. Homes, Inc. v. Walker Adjustment Bureau, 198 Colo. 444, 601 P.2d 1369, 1373 (1979)*; *Graham v. Wilkins, 145 Conn. 34, 138 A.2d 705, 708 (1958)*. In this case, the relationship of the transaction and parties to Texas was clearly more significant than their relationship to Florida.

2

Texas has a materially greater interest than does Florida in determining whether the noncompetition agreement in this case is enforceable. At stake here is whether a Texas resident can leave one Texas job to start a competing Texas business. Thus, Texas is directly interested in DeSantis as an employee in this state, in Wackenhut as a national employer **[**17]** doing business in this state, in RDI as a new competitive business being formed in the state, and in consumers of the services furnished in Texas by Wackenhut and RDI and performed by DeSantis. Texas also shares with Florida a general interest in protecting the justifiable expectations of entities doing business in several states. Florida's direct interest in the enforcement of the noncompetition agreement in this case is limited to protecting a national business headquartered in that state. Although it is always problematic for one state to balance its own interests fairly against those of another state, the circumstances of this case leave little doubt, if any, that Texas has a materially greater interest than Florida in deciding whether the noncompetition agreement in this case should be enforced.

3

Having concluded that Texas law would control the issue of enforceability of the noncompetition agreement in this case but for the parties' choice of Florida law, and that Texas' interest in deciding this issue in this case is materially greater than Florida's, we must finally determine under *section 187(2)(b) of the RESTATEMENT* whether application of Florida law to decide this issue **[**18]** would be contrary to fundamental policy of Texas. The RESTATEMENT offers little guidance in making this determination. Comment g states only that a "fundamental" **[*680]** policy is a "substantial" one, and that "[t]he forum will apply its own legal principles in determining whether a given policy is a fundamental one within the meaning of the present rule. . . ."

Comment g to section 187 does suggest that application of the law of another state is not contrary to the fundamental policy of the forum merely because it leads to a different result than would obtain under the forum's law. We agree that the result in one case cannot determine whether the issue is a matter of fundamental state policy for purposes of resolving a conflict of laws. Moreover, the fact that the law of another state is materially

---

(f) certainty, predictability and uniformity of result, and

(g) ease in the determination and application of the law to be applied.

[3] The covenant itself states that it was executed in Florida, but testimony for both parties established that DeSantis signed it last in Houston.

[4] Section 196 states:

Contracts for the Rendition of Services

The validity of a contract for the rendition of services and the rights created thereby are determined, in the absence of an effective choice of law by the parties, by the local law of the state where the contract requires that the services, or a major portion of the services, be rendered, unless, with respect to the particular issue, some other state has a more significant relationship under the principles stated in § 6 to the transaction and the parties, in which event the local law of the other state will be applied.

different from the law of this state does not itself establish that application of the other state's law would offend the fundamental policy of Texas. In analyzing whether fundamental policy is offended under *section 187(2)(b)*, the focus is on whether the law in question is a part of state policy so fundamental that the courts of the state will refuse to enforce an agreement **[**19]** contrary to that law, despite the parties' original intentions, and even though the agreement would be enforceable in another state connected with the transaction. [5]

Neither the RESTATEMENT nor the cases which have followed *section 187* have undertaken a general definition of "fundamental policy", and we need not make the attempt in this case; for whatever its parameters, enforcement of noncompetition agreements falls well within them. This Court has held that ***HN3***[] "[a]n agreement not to compete is in restraint of trade and will not be enforced unless it is reasonable." *Frankiewicz v. National* ***[**20]*** *Comp Assoc., 633 S.W.2d 505, 507 (Tex. 1982)*; *accord* *Weatherford Oil Tool Co. v. Campbell, 161 Tex. 310, 340 S.W.2d 950, 951 (1960)*. ***HN4***[] As a general rule, unreasonable restraints of trade, including unreasonable covenants not to compete, contravene public policy. *See* *Denny v. Roth, 296 S.W.2d 944, 947* (Tex. Civ. App.--Galveston 1956, writ ref'd); *RESTATEMENT (SECOND) OF CONTRACTS §§ 186-188* (1981); 14 S. WILLISTON, A TREATISE ON THE LAW OF CONTRACTS §§ 1633-1635 (3d ed. 1972). What noncompetition agreements are reasonable restraints upon employees in this state, therefore, is a matter of public policy. Moreover, that policy is fundamental in that it ensures a uniform rule for enforcement of noncompetition agreements in this state. *See* *RESTATEMENT § 187 comment g* (1971) ("a fundamental policy may be embodied in a statute which makes one or more kinds of contracts illegal or which is designed to protect a person against the oppressive use of superior bargaining power"). Absent such a policy, agreements involving residents of other states would be controlled by the law and policy of those states. An employee of one out-of-state employer might take a competing job and escape **[**21]** enforcement of a covenant not to compete because of the law of another state, while a neighbor suffered enforcement of an identical covenant because of the law of a third state. The resulting disruption of orderly employer-employee relations, as well as competition in the marketplace, would be unacceptable. Employers would be encouraged to attempt to invoke the most favorable state law available to govern their relationship with their employees in Texas or other states.

These same considerations and others have led ***HN5***[] virtually every court that has addressed the question of whether enforcement of noncompetition agreements is a matter of fundamental or important state policy to answer affirmatively. Not many of these courts have considered the matter specifically in the context of *section 187 of the RESTATEMENT,* and yet, rather remarkably, many have nevertheless expressed similar conclusions. *See* *Dresser Indus., Inc. v. Sandvick, 732 F.2d 783, 787-788 (10th Cir. 1984)* ("the tendency of the courts [is] to apply the policy of the forum state when parties are litigating covenants not to compete"); **[*681]** *Nordson Corp. v. Plasschaert, 674 F.2d 1371, 1375 (11th Cir. 1982)*; **[**22]** *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Stidham, 658 F.2d 1098, 1100 n.5 (5th Cir. 1981)*; *Davis v. Jointless Fire Brick Co., 300 F. 1, 3-4 (9th Cir. 1924)*; *Muma v. Financial Guardian, Inc., 551 F. Supp. 119, 121-123 (E.D. Mich. 1982)*; *Walling Chem. Co. v. Hart, 508 F. Supp. 338, 340 (D. Neb. 1981)*; *Fort Smith Paper Co. v. Sadler Paper Co., 482 F. Supp. 355, 357 (E.D. Ok. 1979)*; *Blalock v. Perfect Subscription Co., 458 F. Supp. 123, 127 (S.D. Ala. 1978)*, *aff'd per curiam, 599 F.2d 743 (5th Cir. 1979)*; *Associated Spring Corp. v. Roy F. Wilson & Avnet, Inc., 410 F. Supp. 967, 976-978 (D.S.C. 1976)*; *Fine v. Property Damage Appraisers, Inc., 393 F. Supp. 1304, 1310 (E.D. La. 1975)*; *Boyer v. Piper, Jaffray & Hopwood, Inc., 391 F. Supp. 471, 473 (D.S.D. 1975)*; *Forney Indus., Inc. v. Andre, 246 F. Supp. 333, 334-335 (D.N.D. 1965)*; *Nasco, Inc. v. Gimbert, 239 Ga. 675, 238 S.E.2d 368, 369 (1977)*; *Standard Register Co. v. Kerrigan, 238 S.C. 54, 119 S.E.2d 533, 541-542 (1961)*; *Temporarily* *Yours-Temporary Help Services, Inc. v. Manpower, Inc., 377 So. 2d 825, 827 (Fla. Dist. Ct. App. 1979)*; *see also* *Barnes Group, Inc.* ***[**23]*** *v. C & C Products, Inc., 716 F.2d 1023, 1031-1032 (4th Cir. 1983)*; *Bush v. National School Studios, Inc., 139 Wis.2d 635, 407 N.W.2d 883, 886-888 (1987)* (suit for unfair termination).

---

[5] The trial court apparently concluded that this noncompetition agreement is enforceable under both Texas and Florida law. The court of appeals concluded that the agreement is enforceable under Florida law and did not consider whether it is enforceable under Texas law. DeSantis appears to concede that the agreement is enforceable under Florida law. Wackenhut strongly argues that the agreement is enforceable under Texas law.

We likewise conclude that the law governing enforcement of noncompetition agreements is fundamental policy in Texas, and that to apply the law of another state to determine the enforceability of such an agreement in the circumstances of a case like this would be contrary to that policy. We therefore hold that the enforceability of the agreement in this case must be judged by Texas law, not Florida law.

III

We now consider whether the noncompetition agreement between DeSantis and Wackenhut is enforceable under Texas law. We must also consider the effect upon this case of certain legislation passed while this case has been pending before this Court.

A

The fundamental common law principles which govern the enforceability of covenants not to compete in Texas are relatively well established. ***HN6***[] An agreement not to compete is in restraint of trade and therefore unenforceable on grounds of public policy [6] unless it is reasonable. *Frankiewicz v. National Comp Assocs., 633 S.W.2d 505, 507* ***[**24]*** *(Tex. 1982)*; *Weatherford Oil Tool Co. v. Campbell, 161 Tex. 310, 340 S.W.2d 950, 951 (1960)*; *RESTATEMENT (SECOND) OF CONTRACTS § 186* (1981). An agreement not to compete is not a reasonable restraint of trade unless it meets each of three criteria. First, the agreement not to compete must be ancillary to an otherwise valid transaction or relationship. *Justin Belt Co. v. Yost, 502 S.W.2d 681, 683-684* ***[*682]*** *(Tex. 1973)*; *Potomac Fire Ins. Co. v. State, 18 S.W.2d 929, 934-935* (Tex. Civ. App.--Austin 1929, writ ref'd); *RESTATEMENT (SECOND) OF CONTRACTS § 187* (1981). Such a restraint on competition is unreasonable unless it is part of and subsidiary to an otherwise valid transaction or relationship which gives rise to an interest worthy of protection. *RESTATEMENT (SECOND) OF CONTRACTS § 187 comment b* (1981). Such transactions or relationships include the purchase and sale of a business, and employment relationships. *Restatement (Second) of Contracts § 188(2)* (1981). Second, the restraint created by the agreement not to compete must not be greater than necessary to protect the promisee's legitimate interest. *Henshaw v. Kroenecke, 656 S.W.2d 416, 418 (Tex. 1983)*; **[**25]** *Weatherford, , 340 S.W.2d at 951*; *RESTATEMENT (SECOND) OF CONTRACTS § 188(1)(a)* (1981). Examples of legitimate, protectable interests include business goodwill, trade secrets, and other confidential or proprietary information. *Restatement (Second) of Contracts § 188 comments b*, g (1981). The extent of the agreement not to compete must accordingly be limited appropriately as to time, territory, and type of activity. *RESTATEMENT (SECOND) OF CONTRACTS § 188 comment d* (1981); *see* *Frankiewicz, 633 S.W.2d at 507*; *Justin Belt, 502 S.W.2d at 685*; *Weatherford, 340 S.W.2d at 951*. An agreement not to compete which is not appropriately limited may be modified and enforced by a court of equity to the extent necessary to protect the promisee's legitimate interest, but may not be enforced by a court of law. *Weatherford, 340 S.W.2d at 952-953*. Third, the promisee's need for the protection afforded by the agreement not to compete must not be outweighed by either the hardship to the promisor or any injury likely to the public. *RESTATEMENT (SECOND) OF CONTRACTS*

---

[6] An agreement not to compete may be unenforceable for reasons other than public policy. For example, ***HN9***[] an agreement not to compete, like any other contract, must be supported by consideration. *See* *B. Cantrell Oil Co. v. Hino Gas Sales, 756 S.W.2d 781, 783* (Tex.--Corpus Christi 1988, no writ); *Travel Masters Inc. v. Star Tours, Inc., 742 S.W.2d 837, 841* (Tex. App.--Dallas 1987, writ dism'd w.o.j.); *Chenault v. Otis Eng'g Corp., 423 S.W.2d 377, 382* (Tex. Civ. App.--Corpus Christi 1967, writ ref'd n.r.e.). Consideration may include special training or knowledge afforded the promisor, but it is not limited to such things, and we specifically disapprove language to the contrary in *Bland v. Henry & Peters, 763 S.W.2d 5* (Tex. App.--Tyler 1988, writ denied). Also, performance of a covenant not to compete, like performance of other contractual obligations, may, in certain instances at least, be excused by the promisee's own breach. *See* *Langdon v. Progress Laundry & Cleaning Co., 105 S.W.2d 346, 347-348* (Tex. Civ. App.--Dallas 1937, writ ref'd); *Halbert v. Standley, 488 S.W.2d 887, 889* (Tex. Civ. App.--Waco 1972, writ ref'd n.r.e.); ***RESTATEMENT (SECOND) OF CONTRACTS §§ 237-249*** (1981). And enforcement of an agreement not to compete may not be by injunction if the party seeking enforcement is not entitled to such stable relief, as, for example, when that party has himself engaged in inequitable conduct, *see* *Vaughan v. Kizer, 400 S.W.2d 586, 589-590* (Tex. Civ. App.--Waco 1966, writ ref'd n.r.e.); *National Chemsearch Corp. v. Frazier, 488 S.W.2d 545, 548* (Tex. Civ. App.--Waco 1972, no writ); or when that party has failed to show that without injunctive relief he will suffer irreparable injury for which he has no adequate legal remedy, *see* *Parkem Indus. Services, Inc. v. Garton, 619 S.W.2d 428, 430-431* (Tex. Civ. App.--Amarillo 1981, no writ).

§ 188(1)(b) (1981); *see* *Henshaw, 656 S.W.2d at 418* (citing *Weatherford, 340 S.W.2d at 951* (agreement **[**26]** may not impose undue hardship on promisor)). ***HN7***[] Before an agreement not to compete will be enforced, its benefits must be balanced against its burdens, both to the promisor and the public. Thus, such an agreement may, in a particular case, accomplish the salutary purpose of encouraging an employer to share confidential, proprietary information with an employee in furtherance of their common purpose, but must not also take unfair advantage of the disparity of bargaining power between them or too severely impair the employee's personal freedom and economic mobility. *See RESTATEMENT (SECOND) OF CONTRACTS § 188 comments c*, g (1981). ***HN8***[] Whether an agreement not to compete is a reasonable restraint of trade is a question of law for the court. *Henshaw, 656 S.W.2d at 418*.

[27]** This Court referred to these principles in *Hill v. Mobile Auto Trim, Inc., 725 S.W.2d 168 (Tex. 1987)*. After holding the agreement not to compete in that case unreasonable and unenforceable, the Court added that agreements "which are primarily designed to limit competition or restrain the right to engage in a common calling are not enforceable." *725 S.W.2d at 172*. The Court did not define "common calling" or elaborate upon the purpose to be served by this additional requirement. The Court again referred to "common calling" in *Bergman v. Norris of Houston, 734 S.W.2d 673 (Tex. 1987)*, but did not further elucidate the phrase except to say that "[w]hether an employee is engaged in a common calling is a question of law to be decided from the facts of each individual case." *Id. at 674*. Although the Court held the covenants not to compete in *Bergman* unenforceable because the promisees were engaged in a common calling, it is apparent from the recitation of the evidence that the covenants would have fared no better under the principles we have set out above.

The references to "common calling" in *Hill* and *Bergman* have proven confusing in determining whether **[**28]** to enforce agreements not to compete. Two courts of appeals have attempted to define "common calling". *Cukjati v. Burkett, 772 S.W.2d 215, 217* (Tex. App.--Dallas 1989, no writ); *B. Cantrell Oil Co. v. Hino Gas Sales, Inc., 756 S.W.2d 781, 783* (Tex. App.--Corpus Christi 1988, no writ); *Travel Masters, Inc. v. Star Tours, Inc., 742 S.W.2d 837, 840-841* (Tex. App.--Dallas 1987, writ **[*683]** dism'd w.o.j.). Another court of appeals has attempted to apply the standard without defining it. *Hoddeson v. Conroe Ear, Nose & Throat Assocs., 751 S.W.2d 289, 290* (Tex. App.--Beaumont 1988, no writ). Other courts have acknowledged this Court's reference to "common calling" but then reached decisions regarding the enforceability of agreements not to compete in their respective cases without attempting to apply that standard. *Posey v. Monier Resources, Inc., 768 S.W.2d 915, 918* (Tex. App.--San Antonio 1989, writ denied); *French v. Community Broadcasting of Coastal Bend, Inc., 766 S.W.2d 330, 333* (Tex. App.--Corpus Christi 1989, writ dism'd w.o.j.); *Bland v. Henry & Peters, 763 S.W.2d 5, 7-8* (Tex. App.--Tyler 1988, writ denied); *M.R.S. Datascope Inc. v. Exchange* ***[**29]*** *Data Corp., 745 S.W.2d 542, 546* (Tex. App.--Houston [1st Dist.] 1988, no writ). One court has held that veterinary medicine is not a common calling. *Cukjati, 772 S.W.2d at 217*. Another has held, over a vigorous dissent, that a medical doctor certified as an ear, nose and throat specialist is engaged in a common calling. *Hoddeson, 751 S.W.2d at 290*.

In deciding whether an ancillary agreement not to compete is reasonable, the court should focus on the need to protect a legitimate interest of the promisee and the hardship of such protection on the promisor and the public. The nature of the promisor's job -- whether it is a common calling -- may sometimes factor into the determination of reasonableness, but it is not the primary focus of inquiry. The results in *Hill* and *Bergman* would have been the same irrespective of whether the promisors in those cases had been engaged in common callings. Moreover, the Legislature has now rejected common calling as a test for the reasonableness of noncompetition agreements. *See* *TEX. BUS. & COM. CODE ANN. §§ 15.50-15.51* (Vernon Supp. 1990). Accordingly, we do not apply "common calling". We hold instead that the principles **[**30]** set out above are to be applied in determining whether an agreement not to compete is reasonable.

B

There is no dispute in this case that the agreement not to compete was ancillary to an otherwise valid relationship, *viz.,* Wackenhut's employment of DeSantis. The dispute is whether the agreement was necessary to protect some legitimate interest of Wackenhut, and whether that necessity was outweighed by the hardship of enforcement. As we have noted above, these are all questions for the court.

Wackenhut claims that the business goodwill developed for it by DeSantis was an interest protectable by an agreement not to compete. The evidence that DeSantis ever developed business goodwill for Wackenhut, however, is exceedingly slight on this record, little more than testimony that DeSantis occasionally entertained representatives of Wackenhut's clients. Indeed, Wackenhut's contention that DeSantis' unethical business solicitation led it to request his resignation tends, at least, to contradict its contention that DeSantis developed goodwill among its customers. Assuming, however, that DeSantis did develop business goodwill for Wackenhut, there is no showing that he did or even could **[**31]** divert that goodwill to himself for his own benefit after leaving Wackenhut. The jury found that DeSantis competed with Wackenhut after leaving its employ, and the evidence leaves little doubt that he did; but there is no finding and almost no evidence that DeSantis was able to appropriate for his own use any business goodwill that he developed for Wackenhut. Rather, the evidence is that after announcing his departure to some ten or fifteen of Wackenhut's customers, in the following six months DeSantis received business from only one of those customers and might have received business from another. There is evidence that both were considering moving their business to DeSantis' new company, RDI, because they were dissatisfied with Wackenhut's services. There is no evidence that either customer considered replacing Wackenhut with DeSantis because of the goodwill DeSantis had developed with those customers while at Wackenhut. There is simply no showing on this record that prohibiting DeSantis from competing with Wackenhut **[*684]** after he left its employ was necessary to keep DeSantis from trading on Wackenhut's business goodwill, much less any showing that the hardship of the agreement **[**32]** on DeSantis was outweighed by the need to protect any such interest.

Wackenhut also claims that it possessed confidential information protectable by an agreement not to compete. Specifically, Wackenhut contends that during his employ, DeSantis learned the identity of Wackenhut's customers, their special needs and requirements, and Wackenhut's pricing policies, cost factors and bidding strategies. Again, while confidential information may be protected by an agreement not to compete, Wackenhut has failed to show that it needed such protection in this case. Wackenhut failed to show that its customers could not readily be identified by someone outside its employ, that such knowledge carried some competitive advantage, or that its customers' needs could not be ascertained simply by inquiry addressed to those customers themselves. Also, Wackenhut failed to show that its pricing policies and bidding strategies were uniquely developed, or that information about its prices and bids could not, again, be obtained from the customers themselves. There is no evidence that DeSantis ever took advantage of any knowledge he had of Wackenhut's cost factors in trying to outbid Wackenhut or woo away **[**33]** its customers. Wackenhut simply has not demonstrated a need to protect any confidential information by limiting DeSantis' right to compete.

Having determined that Wackenhut has not shown that DeSantis' agreement not to compete is necessary to protect any legitimate business interest, or that the necessity of such protection outweighs the hardship of that agreement on DeSantis, we conclude that the agreement is unreasonable and therefore unenforceable.

C

While this case has been pending before this Court, the Legislature has added subchapter E to the Texas Business and Commerce Code and expressly made it applicable "to a covenant entered into before, on, or after the effective date of this Act." Act of June 16, 1989, ch. 1193, 1, 1989 Tex. Gen. Laws 4852 (effective Aug. 28, 1989). [7] Thus, this Act purports to apply to **[*685]** the agreement not to compete before us in this case.

---

[7] New subchapter E added by this Act provides:

SUBCHAPTER E. COVENANTS NOT TO COMPETE

HN10[] *Sec. 15.50*. CRITERIA FOR ENFORCEABILITY OF COVENANTS NOT TO COMPETE. Notwithstanding Section 15.05 of this code, a covenant not to compete is enforceable to the extent that it:

> (1) is ancillary to an otherwise enforceable agreement but, if the covenant not to compete is executed on a date other than the date on which the underlying agreement is executed, such covenant must be supported by independent valuable consideration; and

[34]** The obvious threshold issue which this recent legislation presents is whether it may affect litigation regarding the rights of parties to an agreement not to compete which commenced before the statute was enacted. We find it unnecessary, however, to resolve this issue in this case because we conclude that the result in this case would not be affected by the statute. Under *section 15.50(2)*, "a covenant not to compete is enforceable to the extent that it . . . contains reasonable limitations . . . that do not impose a greater restraint than is necessary to protect the goodwill or other business interest of the promisee." *Section 15.51(b)* obliges the promisee, Wackenhut in this case, to establish a protectable business interest when the matter involves rendition of personal services, as this one does. Because we have held that Wackenhut has failed to make this required showing, we cannot reform the agreement to meet either the criteria of *section 15.50(2)*, or of *Weatherford* for that matter. The agreement not to compete in this case is no more enforceable under *sections 15.50* and *15.51* of the Texas Business and Commerce Code than it would be under the above-stated common law principles **[**35]** governing such agreements.

Accordingly, we leave for another day the issues of whether this recent legislation affects all covenants not to compete entered into before the effective date of the Act, and how it alters the common law principles governing such covenants.

IV

We now turn to DeSantis and RDI's contentions that they are entitled to recover on their claims against Wackenhut for wrongfully securing temporary injunctive relief, violating state antitrust laws, fraud, and tortiously interfering with contract and business relationships. We consider each of these claims in turn.

A

DeSantis and RDI claim that Wackenhut has prosecuted this action against them maliciously, that it procured the temporary restraining order and temporary injunction against them wrongfully, and that they have suffered damages as a result. DeSantis and RDI each alleged actual damages greatly in excess of the $ 5,000 temporary restraining order bond and the $ 75,000 temporary injunction bond which Wackenhut filed.

---

(2) contains reasonable limitations as to time, geographical area, and scope of activity to be restrained that do not impose a greater restraint than is necessary to protect the goodwill or other business interest of the promisee.

HN11[] *Sec. 15.51*. PROCEDURES AND REMEDIES IN ACTIONS TO ENFORCE COVENANTS NOT TO COMPETE. (a) Except as provided in Subsection (c) of this section, a court may award the promisee under a covenant not to compete damages, injunctive relief, or both damages and injunctive relief for a breach by the promisor of the covenant.

(b) If the primary purpose of the agreement to which the covenant is ancillary is to obligate the promisor to render personal services, the promisee has the burden of establishing that the covenant meets the criteria specified by *Subdivision (2) of Section 15.50* of this code. If the agreement has a different primary purpose, the promisor has the burden of establishing that the covenant does not meet those criteria. For the purposes of this subsection, the "burden of establishing" a fact means the burden of persuading the triers of fact that the existence of the fact is more probable than its nonexistence.

(c) If the covenant meets the criteria specified by *Subdivision (1) of Section 15.50* of this code but does not meet the criteria specified by *Subdivision (2) of Section 15.50*, the court, at the request of the promisee, shall reform the covenant to the extent necessary to cause the covenant to meet the criteria specified by *Subdivision (2) of Section 15.50* and enforce the covenant as reformed, except that the court may not award the promisee damages for a breach of the covenant before its reformation and the relief granted to the promisee shall be limited to injunctive relief. If the primary purpose of the agreement to which the covenant is ancillary is to obligate the promisor to render personal services, the promisor establishes that the promisee knew at the time of the execution of the agreement that the covenant did not meet the criteria specified by *Subdivision (2) of Section 15.50* and the promisee sought to enforce the covenant to a greater extent than was necessary to protect the goodwill or other business interest of the promisee, the court may award the promisor the costs, including reasonable attorney's fees, actually and reasonably incurred by the promisor in defending the action to enforce the covenant.

HN12[] A person who obtains an injunction wrongfully is liable for damages caused by issuance of the injunction. *Parks v. O'Connor, 70 Tex. 377, 8 S.W. 104, 107 (1888)*. There are two separate **[**36]** causes of action for wrongful injunction, one upon the bond ordinarily filed to obtain the injunction, and the other for malicious prosecution. *See Annot., Liability Apart from Bond and in Absence of Elements of Malicious Prosecution for Wrongfully Suing Out Injunction,* 45 A.L.R. 1517 (1926); Annot., *Proceedings for Injunction or Restraining Order as Basis of Malicious Prosecution Action,* 70 A.L.R.3d 536 (1976). The two actions differ in the kind of wrong which must be shown to establish liability and in the amount of recovery. The few Texas cases which have addressed these differences have not been entirely clear or consistent.

HN13[] A cause of action upon an injunction bond is predicated upon a breach of the condition of the bond. That condition, as prescribed by *Rule 684, Texas Rules of Civil Procedure*, is "that the applicant will abide the decision which may be made in the cause, and that he will pay all sums of money and costs that may be adjudged against him if the restraining order or temporary injunction shall be dissolved in whole or in part." To prevail upon this cause of action, the claimant must prove that the temporary restraining order or temporary injunction was **[**37]** issued or perpetuated **[*686]** when it should not have been, and that it was later dissolved. *See* *Craddock v. Overstreet, 435 S.W.2d 607, 608-609* (Tex. Civ. App.--Tyler 1968, writ ref'd n.r.e.). The claimant need not prove that the temporary restraining order or temporary injunction was obtained maliciously or without probable cause. *See* *Johnson v. McMahan, 40 S.W.2d 920, 922* (Tex. Civ. App.--Amarillo 1931, writ ref'd). The purpose of the bond is to protect the defendant from the harm he may sustain as a result of temporary relief granted upon the reduced showing required of the injunction plaintiff, pending full consideration of all issues. ***HN14***[] An injunction plaintiff need not establish the correctness of his claim to obtain temporary relief, but must show only a likelihood of success on the merits. Correspondingly, an injunction defendant has a lesser burden to establish his right to recover on an injunction bond than would be required in an ordinary action for malicious prosecution.

HN15[] The only other cause of action for wrongful injunction is for malicious prosecution. "'It is established by the weight of authority that in the absence of elements of an action for malicious **[**38]** prosecution no action will lie by the defendant in an injunction suit, independently of a bond or undertaking, for damages for the wrongful suing out of the injunction.'" *Camp v. Atlantic Refining Co., 179 S.W.2d 326, 328* (Tex. Civ. App.--Texarkana 1944, writ ref'd). To prevail upon this cause of action the claimant must prove that the injunction suit was prosecuted maliciously and without probable cause, and was terminated in his favor. *See* *James v. Brown, 637 S.W.2d 914, 918 (Tex. 1982)*. Once the injunction plaintiff has prevailed after full hearing of all issues, damages to the defendant result not from the reduced showing required to obtain temporary relief but from the full proof necessary to succeed on the merits, and defendant cannot recover those damages without full proof of malicious prosecution.

HN16[] The damages recoverable in an action on an injunction bond are, of course, limited to the amount of the bond. In an action for malicious prosecution, all actual damages may be recovered. Under either cause of action the claimant must prove that issuance of the injunction caused him damages. He cannot recover for having been prohibited from doing something which he had **[**39]** no right to do. *Parks, 8 S.W. at 107*. Nor can he recover for having been prohibited from doing something which he agreed not to do, even if the agreement was unenforceable. *Wissman v. Boucher, 150 Tex. 326, 240 S.W.2d 278, 281 (1951)*.

The temporary restraining order and temporary injunction against DeSantis and RDI were never dissolved. Consequently, under *Rule 684, Texas Rules of Civil Procedure*, DeSantis and RDI are not entitled to recover against the bond Wackenhut posted for each of these orders. DeSantis and RDI did not request jury findings on their malicious prosecution claim and therefore waived it. Moreover, there is no evidence in this record that Wackenhut acted maliciously and without probable cause in bringing suit, especially inasmuch as the trial court and court of appeals both found merit in Wackenhut's claim. Thus, DeSantis and RDI are not entitled to recover on their claim of malicious prosecution. Accordingly, DeSantis and RDI have failed to establish their right to recover damages against Wackenhut for wrongful injunction.

B

DeSantis and RDI claim that the noncompetition agreement between DeSantis and Wackenhut violates the Texas Free Enterprise and **[**40]** Antitrust Act of 1983, *Texas Business and Commerce Code Annotated sections 15.01-15.51* (Vernon 1987 and Supp. 1990), and that they are therefore entitled to recover treble damages against Wackenhut under that statute. More specifically, DeSantis and RDI assert that the noncompetition agreement is unlawful under section 15.05(a), which declares that "[e]very contract . . . in restraint of trade or commerce is unlawful." DeSantis and RDI contend that, under section 15.21(a), they are entitled to recover damages from **[*687]** Wackenhut as persons "whose business or property has been injured by reason of any conduct declared unlawful" in section 15.05(a), and that because Wackenhut's conduct was "willful or flagrant", they are entitled to have those damages trebled.

Although we have not previously had occasion to apply state antitrust statutes to noncompetition agreements between employers and employees, we do not write on a clean slate. *Section 15.04* instructs:

> ***HN17***[] The purpose of this Act is to maintain and promote economic competition in trade and commerce occurring wholly or partly within the State of Texas and to provide the benefits of that competition to consumers in the state. **[**41]** The provisions of this Act shall be construed to accomplish this purpose and shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes to the extent consistent with this purpose.

Section 15.05(a) is comparable to, and indeed taken from, *section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1 (1988)*. [8] Accordingly, we look to federal judicial interpretations of *section 1* of the Sherman Act in applying section 15.05(a) of our state ***antitrust law***.

As we have noted above, ***HN18***[] an agreement not to compete is a restraint on trade. However, not every contract in restraint of trade is prohibited by *section 1* of the Sherman Act, but only those contracts which unreasonably restrain trade. *E.g., Standard Oil Co. v. United States, 221 U.S. 1, 60, 31 S. Ct. 502, 55 L.* ***[**42]*** *Ed. 619 (1911)*; *United States v. American Tobacco Co., 221 U.S. 106, 179, 31 S.Ct. 502, 55 L. Ed. 619 (1911)*. The focus of this "rule of reason" test is upon whether the restraint promotes competition or suppresses or destroys competition. *Chicago Bd. of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L.Ed.2d 568 (1977)*; *National Soc'y of Professional Eng'rs v. United States, 435 U.S. 679, 688, 98 S. Ct. 1355, 55 L.Ed.2d 637 (1978)*. Some restraints, because of their inherently pernicious effect upon competition, are per se unreasonable, while others are not and must be analyzed under the rule of reason. *See* 2 J. VON KALINOWSKI, ANTITRUST LAWS AND TRADE REGULATION § 3.02 [6] (1989). The factors important to a rule of reason analysis vary from case to case. *See Chicago Bd. of Trade, 246 U.S. at 238*; D. ASPELUND & C. ERIKSEN, EMPLOYEE NONCOMPETITION LAW § 7.01 (1987) ["ASPELUND"]; W. LIFLAND, STATE ***ANTITRUST LAW*** § 4.02 (1987) ["LIFLAND"]; E. ROCKEFELLER, ANTITRUST QUESTIONS AND ANSWERS 16-20 (1974).

Until recently, there were few attempts **[**43]** to apply ***antitrust law*** to post-employment noncompetition agreements. *See* ASPELUND, *supra* § 7.01, at 7-1 to 7-4; Blake, *Employee Agreements Not to Compete,* 73 HARV. L. REV. 625, 628 n.8 (1960) ["Blake"]; White, *"Common Callings" and the Enforcement of Postemployment Covenants in Texas,* 19 ST. MARY'S L.J. 589, 599 (1988); Note, *The Antitrust Implications of Employee Noncompete Agreements: A Labor Market Analysis,* 66 MINN. L. REV. 519, 520 (1982) ["Note"]. ***HN19***[] There can be little doubt that the Sherman Act applies to such agreements. *See Consultants & Designers, Inc. v. Butler Serv. Group, Inc., 720 F.2d 1553, 1564 (11th Cir. 1983)*; *Aydin Corp. v. Loral Corp., 718 F.2d 897, 901-903 (9th Cir. 1983)*; *Newburger, Loeb & Co. v. Gross, 563 F.2d 1057, 1082 (2d Cir. 1977)*, *cert. denied, 434 U.S. 1035, 98 S. Ct. 769, 54 L.Ed.2d 782 (1978)*; *Golden v. Kentile Floors, Inc., 512 F.2d 838, 843-844 (5th Cir. 1975)*; *Bradford v. New York Times Co., 501 F.2d 51, 59 (2nd Cir. 1974)*; ASPELUND, *supra* § 7.01 at 7-8; A. VALIULUS, COVENANTS NOT TO COMPETE: FORMS, TACTICS, AND THE LAW 37 (1985) ["VALIULUS"]. However, it appears that no such noncompetition **[**44]** agreement has ever been held to violate the Sherman Act. *See* **[*688]** *United States*

---

[8] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. . . ."

v. Empire Gas Corp., 537 F.2d 296, 301 (8th Cir. 1976), *cert. denied, 429 U.S. 1122, 97 S.Ct. 1158, 51 L.Ed.2d 572 (1977)*; *Bradford, 501 F.2d at 59 (2nd Cir. 1974)*; *Golden, 512 F.2d at 843-844 (5th Cir. 1975)*; *Frackowiak v. Farmers Ins. Co., 411 F. Supp. 1309, 1315-1316 (D. Kan. 1976)*; ASPELUND, *supra* § 7.01 at 7-4; Blake, *supra* 628 and n.8. One explanation for this absence of precedent may be the difficulty involved in proving that a post-employment noncompetition agreement violates the Sherman Act. Such agreements are not per se violations of the Sherman Act but must be analyzed under the rule of reason. *See* *Consultants, 720 F.2d at 1560-1562*; *Aydin, 718 F.2d at 960-901*; *Golden, 512 F.2d at 843-844*; *Bradford, 501 F.2d at 59-60*; ASPELUND, supra § 7.01 at 7-11 to 7-12; *cf.* *Newburger, 563 F.2d at 1082* (not ordinarily a per se violation, but might be if served no legitimate purpose when adopted). ***HN20***[] To establish a violation under the rule of reason, one must prove that the agreement has an adverse effect on competition in the relevant market. **[**45]** *See* *Consultants, 720 F.2d at 1562*; *Aydin, 718 F.2d at 902*. This is distinguished from the effect a post-employment noncompetition agreement has on the particular employer and employee involved. *See* *Bradford, 501 F.2d at 59-60*; ASPELUND, *supra* § 7.01 at 7-14 to 7-15; Note, *supra* at 524-525 n.10.

Rule of reason analysis under antitrust laws must not be confused with reasonableness analysis under the common law. Rule of reason analysis tests the effect of a restraint of trade on *competition.* By contrast, whether a noncompetition agreement is reasonable depends upon its effect on the parties, the *competitors,* as it were. The two standards are not directly related. An agreement may be reasonable as between the parties and nevertheless violate antitrust laws. *See* *Vendo Co. v. Lektro-Vend Corp., 433 U.S. 623, 97 S. Ct. 2881, 53 L.Ed.2d 1009 (1977)* (Stevens, J., dissenting). Conversely, an agreement may be unreasonable as between the parties and yet not violate the rule of reason test under the antitrust laws.

Construing section 15.05(a) of our state ***antitrust law*** in light of these federal judicial interpretations of *section 1* the Sherman Act, as we **[**46]** are instructed to do by statute, we hold that a post-employment noncompetition agreement does not violate section 15.05(a) unless it fails the same rule of reason analysis that would be applied under federal law. [9] The anticompetitive market effect necessary to show such a violation does not appear in this case. DeSantis and RDI offered no evidence of relevant market or anticompetitive effect, and requested no fact findings by the jury on these issues. Accordingly, DeSantis and RDI have failed to establish their right to recover for violations of state ***antitrust law***.

C

DeSantis and RDI claim that Wackenhut fraudulently induced DeSantis to sign the noncompetition agreement. More specifically, DeSantis claims that he signed the agreement only because George Wackenhut misrepresented to him that **[**47]** he was being considered for an executive position. The trial court granted a directed verdict for Wackenhut on DeSantis and RDI's fraud claims, which was proper if there was no evidence to support at least one element of the cause of action. The elements of fraud are a material misrepresentation, which was false, and which was either known to be false when made or was asserted without knowledge of the truth, which was intended to be acted upon, which was relied upon, and which caused injury. *Stone v. Lawyers Title Ins. Corp., 554 S.W.2d 183, 185 (Tex. 1977)*. The only evidence of fraud at trial consisted of DeSantis' testimony that George Wackenhut told him that he wanted to surround his son with professionals to move the company into the future, that he had been told that DeSantis was one of those professionals, **[*689]** that DeSantis would be required to learn the "bread and butter" of the business and then would move to the next stage, and that DeSantis was basically being hired for an executive position. Assuming that George Wackenhut made the statements which DeSantis attributed to him, even though he denied DeSantis' account of their conversation, DeSantis produced no **[**48]** evidence that these statements were false when they were made, or that George Wackenhut knew that they were false when he made them, or that he intended by these statements to induce DeSantis to sign the noncompetition agreement. Inasmuch as DeSantis and RDI failed to produce evidence to support each element of their fraud claim, the court of appeals correctly affirmed the trial court's grant of a directed verdict on that claim.

---

[9] In view of this holding, we are not required in this case to consider the effect of the recent additions of *sections 15.50* and *15.51* to the Texas Business and Commerce Code, see note 8, *supra,* and we do not do so.

D

DeSantis and RDI claim that Wackenhut's enforcement of the noncompetition agreement tortiously interfered with their contract and business relationships. Wackenhut moved for summary judgment on this claim, based upon an affidavit which was not included in the record on appeal. The trial court granted Wackenhut's motion. To appeal this ruling, DeSantis and RDI had the burden to bring forward the record of the summary judgment hearing to prove harmful error. *Escontrias v. Apodaca, 629 S.W.2d 697, 699 (Tex. 1982)*. ***HN21***[] Absent a complete record of the summary judgment evidence, an appellate court must assume that the omitted documents support the judgment of the trial court. *Alexander v. Bank of Am. Nat'l Trust & Sav. Ass'n, 401 S.W.2d 688, 689* (Tex. **[**49]** Civ. App.--Waco 1966, writ ref'd); *Hassell v. New England Mut. Life Ins. Co., 506 S.W.2d 727* (Tex. Civ. App.--Waco 1974, writ ref'd). Without the affidavit, we are unable to review whether Wackenhut conclusively proved that it was entitled to judgment on the tortious interference claim as a matter of law. The court of appeals, therefore, correctly affirmed the trial court's award of summary judgment for Wackenhut on the tortious interference claim.

V

Inasmuch as we have held the noncompetition agreement in this case to be unreasonable and unenforceable, we reverse the judgment of the court of appeals which affirmed the permanent injunction enforcing that agreement, and vacate that injunction ordered by the trial court. We also reverse the judgment of the court of appeals which affirmed the trial court's judgment awarding Wackenhut attorney fees against DeSantis and RDI. Because we have held that DeSantis and RDI failed to establish their right to recover any damages against Wackenhut, we affirm the judgment of the court of appeals which affirmed the trial court's judgment that DeSantis and RDI take nothing against Wackenhut. Costs in the trial court, the court of appeals, and **[**50]** this Court are taxed against the party which incurred them.

Concur

CONCURRING OPINION ON MOTION FOR REHEARING

OSCAR H. MAUZY, Justice, concurring.

The Court takes pains to avoid overruling *Hill v. Mobile Auto Trim, Inc., 725 S.W.2d 168 (Tex. 1987)*, and *Bergman v. Norris of Houston, 734 S.W.2d 673 (Tex. 1987)* and I am therefore able to concur in the Court's judgment. However, by even discussing these cases, the Court reaches too far.

In Hill and Bergman, "[w]e specifically rejected from being enforceable covenants restricting the right to engage in a common calling." *Bergman, 734 S.W.2d at 674*. In the instant case, however, the noncompetition agreement is unenforceable without regard to whether it restricts the right to engage in a common calling. Thus, the Court's discussion of the common calling doctrine is unnecessary, gratuitous and ill-advised. Is this not the very definition of "judicial activism"?

I disagree, too, with the Court's conclusion that "the Legislature has now rejected common calling as a test for the reasonableness of noncompetition agreements." S.W.2d **[**51]** at The statute in question, **[*690]** *Tex. Bus. & Com. Code § 15.50*, effective in 1989, provides in part that "a covenant not to compete is enforceable to the extent that it . . . contains reasonable limitations as to time, geographical area, and scope of activity to be restrained." The "scope of activity" language, in my view, leaves adequate room for the continued vitality of the common calling doctrine. In any case, this is not a question the Court needs to decide today.

Finally, I must make two comments regarding the Court's complaint that we have not previously provided a comprehensive definition of "common calling". First, reasonably precise definitions have been formulated. See e.g., C.L. Ray & M. McKelvey, Drafting Enforceable Noncompetition Agreements in Texas, 20 Tex. Tech L. Rev. 63, 68 (1989); W. White, Common Callings and the Enforcement of Postemployment Covenants in Texas, 19 St. Mary's L. J. 589, 611 (1988). Second, it is the genius of the common law that it evolves slowly in the light of reason and experience. I am content to allow the common calling concept to be worked out on a case-by-case basis.

Spears, Justice, joins in this concurring **[**52]** opinion.

HN1[] **Exemptions & Immunities, Parker State Action Doctrine**

It is well-established that the antitrust laws do not extend to actions of agencies or instrumentalities of the federal government, even when those agencies operate in competition with and to the detriment of private enterprise. Moreover, private parties acting in compliance with clearly articulated government policies and programs are immunized from antitrust liability to the same extent as the government entity.

Opinion

[*6] MEMORANDUM OPINION

STANLEY SPORKIN, UNITED STATES DISTRICT JUDGE

In this private antitrust action plaintiff IT&E Overseas, Inc. ("IT & E") alleges that pursuant to a 1984 agreement defendant RCA Global Communications, Inc. **[*7]** ("Globcom") conspired with the Guam Telephone Authority ("GTA") to monopolize the Guam long distance telephone market. Plaintiff seeks damages for violations of *Sections 1*, *2*, and *3* of the Sherman Act. *15 U.S.C. §§ 1-3*. Currently pending before the Court are defendant's motion for summary judgment and defendant's motion for primary jurisdiction referral to the Federal Communications Commission ("FCC").

Background

Guam, an unincorporated territory of the United States, is under the general administrative supervision of the Secretary of Interior. *See* *48 U.S.C. §§ 1421-28e*. Under the Organic Act of Guam, enacted in 1950, Guam is self-governing. The government of Guam consists of a 21-member Legislature and a civilian governor charged with general supervision and control of "agencies, and other instrumentalities of the executive branch of the government of Guam." *48 U.S.C. §§ 1422*, *1423*. Laws enacted by the government of Guam must be reported to **[**2]** the Secretary of the Interior, or any other official designated by the President, and may be annulled by Congress. *48 U.S.C. § 1423i*

Prior to 1950, the United States Navy was responsible for providing public utilities on Guam, including telephone service. After the passage of the Organic Act, the Navy transferred its responsibilities for the civilian portions of the island to the Public Utility Agency of Guam, the predecessor of GTA. In 1973, the Guam Legislature created GTA, a not-for-profit public corporation, and granted it the franchise to "install, maintain, sell and supply to individuals, firms, corporations and governments, including the Government of Guam, telephone service." 12 Guam Code Ann. § 7104. GTA was also authorized to establish "reasonable rates" for telephone service and to enter "into contracts and execute all instruments necessary or convenient in the exercise of all its powers." 12 Guam Code Ann. § 7104.

The U.S. armed forces still maintain facilities on Guam and own approximately one-third of the land on the island. Telephone service in these areas is provided by the U.S. Navy Public Works Center ("PWC"). Thus, two separate local telephone systems exist on Guam: **[**3]** the GTA system serving civilian areas and the PWC system serving military areas. Neither GTA nor PWC provides long distance telephone service to residents of Guam. Rather, the residents of Guam must subscribe to a long distance carrier. However, because all Guam telephone subscribers are connected to either GTA or PWC, their facilities must be used in every long distance call to or from Guam. In effect, a long distance carrier must depend upon access to GTA's local telephone exchange in order to originate or terminate calls from civilian areas.

From 1951 to 1983, defendant Globcom was the sole provider of long distance telephone service on Guam. Globcom provided its long distance service pursuant to interconnection agreements with GTA and PWC. Under these interconnection agreements, GTA and PWC forwarded outgoing long distance calls to Globcom and completed incoming long distance calls received from Globcom for a percentage of revenues Globcom derived from the calls.

In December 1982, IT & E received authorization from the FCC to enter the long distance telephone market of Guam. In April 1983, IT & E began to offer long distance telephone service in competition with Globcom. However, **[**4]** unlike Globcom, IT & E offered "dial up" service rather than direct dial service. [1] Neither Globcom nor IT & E carries long distance calls all the way to or from their ultimate destination. Both companies have agreements with "correspondent" carriers, such as AT&T and MCI, to forward outgoing calls to and receive incoming calls from the correspondents. Globcom and IT & E compensate **[*8]** their correspondent carriers for handling outgoing calls and are paid by their correspondents for handling incoming calls.

Since January 1, 1979, Globcom has been provided with direct dial access to the local telephone exchange **[**5]** on Guam pursuant to a written traffic agreement between RCA and GTA ("Traffic Agreement"). This Traffic Agreement provided that Globcom would compensate GTA for providing local access on the basis of a division of revenues or a percentage of Globcom's Guam overseas long-distance telephone service revenues. Specifically, GTA received a percentage of Globcom's gross revenues for "paid-on-Guam" calls, increasing over the term of the Agreement from 34 to 35 percent. [2] The term of the original 1979 Traffic Agreement was for three and one-half years, until June 30, 1982, and was terminable upon 60 days notice by either party.

The 1979 Traffic Agreement has been amended three times. The *first amendment* was executed on May 23, 1979 and provided for Globcom to assume responsibility for its own billing and collection. The *second **[**6]** amendment* executed on July 1, 1981 after extensive negotiations provided, among other things, that: (1) the term of the Traffic Agreement be extended five years, until June 30, 1987; (2) termination be permitted only by mutual consent; (3) after June 30, 1984, GTA's compensation would be increased to 40 percent of Globcom's gross revenues for outgoing calls; and (4) Globcom pay GTA an "incentive fee" of $ 900,000 per year, provided GTA met certain minimal service obligations. It is the *third amendment* to the Traffic Agreement, executed on December 12, 1984, that is at the heart of the current dispute.

IT & E alleges that Globcom "secretly" [3] renegotiated its Traffic Agreement with GTA a third time in response to the initial success of IT & E following its market entry in April 1983 and to the competitive threat of GTA's prospective entry into the long distance market. [4] *See* Complaint at para. 35. This *third amendment* revised the Traffic Agreement in numerous ways. First, the amendment increased GTA's compensation to 50 percent of Globcom's revenues on outgoing and incoming calls, net of payments to correspondent. [5] **[**9]** *See* *Third Amendment* to Traffic Agreement ("Third Am.") at para. **[**7]** 1, attached as Exhibit to Defendant's Memorandum in Support of Motion for Summary Judgment ("Def. Mem."). Second, the term of the Traffic Agreement was extended seven years, until June 30, 1994. Third Am. para. 3. Third, the $ 900,00 per year incentive fee was eliminated. Third Am. para. 5. Fourth, Globcom was guaranteed "the right to interconnection services and facilities at least equal in type

---

[1] On Guam, direct dialed long distance calls are placed using a 3-digit access code. Customers of "dial up" service, on the other hand, do not use an access code to place a long distance call, but instead place a local call to their long distance carrier and then dial a Personal Identification Number ("PIN") for purposes of billing identification. Once the PIN is verified, the customer then dials the long distance call.

[2] Under the Traffic Agreement, "paid-on-Guam" calls include both calls where a GTA subscriber placed and paid for the call and where a call from overseas was placed to and paid for by a GTA subscriber.

[3] IT & E contends that Globcom and GTA endeavored to conceal the 1984 amendment to the Traffic Agreement because, in a break with previous practice, Globcom did not file the 1984 amendment with the FCC.

[4] On November 18, 1983, GTA applied to the FCC for permission to acquire facilities from Hawaiian Telephone Company for the purpose of providing long distance service between the Territory of Guam and the State of Hawaii and points beyond. Both Globcom and IT & E filed petitions to deny GTA's initial application with the FCC.

[5] IT & E asserts that it could not afford to purchase interconnections from GTA under the 50% net-revenue formula incorporated in the *third amendment* because IT & E, unlike Globcom, had very little inbound traffic and virtually no categories of exempt revenue under the formula. According to IT & E, GTA and Globcom purposely chose a revenue formula that was suited only to Globcom's particular circumstances and methods of operation because such a formula would be excessive and prohibitive for any other carrier.

and quality to those which GTA provides to any other overseas message toll telephone carrier" and, if GTA entered the long distance market or outgoing GTA traffic on Globcom's system fell to less than 300,000 minutes per month for three consecutive months, Globcom has the right to interconnection at a price "no less favorable" than any other carrier. Third Am. paras. 7, 8. Fifth, if GTA entered the long distance **[*9]** business, it would route at least 300,000 minutes per month of outgoing traffic, including all traffic to destinations where GTA did not have a correspondent carrier, on Globcom's facilities. Third Am. para. 10. Finally, only long distance companies that "interconnect with GTA in such a manner as to provide the full range of overseas toll services that [Globcom] provides" would be **[**8]** listed in GTA's telephone directory instruction section. [6] Third Am. para. 15.

In a separate letter agreement executed concurrently with the *Third Amendment*, GTA and Globcom further agreed to jointly plan for the implementation of Automatic Number Identification ("ANI") [7] and to "consult and cooperate concerning customer service, marketing and advertising, to encourage use of the services available on Guam." *See* Letter Agreement dated December 12, 1984, attached as Exhibit to Def. Mem. The letter agreement also provided that "this letter shall not be construed to limit either party's discussions, agreements or freedom of action with respect to any other communications service provider."

[10]** During 1985, GTA and Globcom each proceeded with plans to replace their existing switching facilities to obtain increased switching capacity and permit deployment of ANI. Representatives from both companies met periodically to discuss how their new switches would interconnect. Although GTA originally specified that its new switch would use the "CAMA-ANI" signaling protocol, GTA's new switch could not operate the specified protocol. On July 11, 1987, GTA's new switch was placed in operation. This new switch permitted implementation of ANI on Guam for the first time. However, GTA's new switch adversely affected IT & E's ability to interconnect with GTA's system. For a period, PWC subscribers could not place calls on IT & E and IT & E lost answer/disconnect supervision signalling. These difficulties allegedly resulted in a loss of subscribers for IT & E.

On November 13, 1987, IT & E filed suit against Globcom in this Court for violations of the federal antitrust laws. [8] **[**13]** On May 16, 1988, this Court denied both Globcom's motion to dismiss and Globcom's motion to transfer. On May 20, 1988, IT & E filed an amended complaint. [9] In its amended complaint, IT & E identifies GTA as an unnamed co-conspirator. **[**11]** para. 6. The amended complaint alleges that GTA, in furtherance of its conspiracy with Globcom, discriminated against IT & E with respect to the provision of GTA's monopoly local exchange access services. The amended complaint further alleges that GTA engaged in other discriminatory conduct against IT & E, including, but not limited to the following:

(a) GTA refused to file an access tariff in compliance with FCC regulations;

---

[6] Because IT & E did not offer operator-assisted calling as did Globcom, GTA refused to list IT & E in the instruction section or "pink pages" of the GTA telephone directory. However, after negotiations, GTA agreed to place IT & E's advertisement on the inside front cover of its directory and to refer to the advertisement in Globcom's listing in the "pink pages."

[7] In order to bill a long distance call, a carrier must identify the subscriber to be charged. ANI is a procedure that enables the local service provider's switching equipment to automatically forward the telephone number of the party to be charged to the long distance carrier. There are two other methods to identify the subscriber to be charged: Operator Number Identification ("ONI") and Personal Identification Number ("PIN"). ONI requires an operator to come on the line and request the billing information from the parties. With PIN, the billing information is recorded when a caller dials in the number of his or her personal account with the carrier. Prior to GTA's implementation of ANI, Globcom used the more cumbersome ONI procedure to identify the party to be charged.

[8] Although GTA was originally named as a defendant in the first complaint, IT & E voluntarily dismissed the complaint as to GTA without prejudice pursuant to *Rule 41(a) of the Federal Rules of Civil Procedure*.

[9] Globcom sought appellate review of the Court's denial of its motion to dismiss. On June 3, 1988, Globcom filed a petition for mandamus with the United States Court of Appeals for the District of Columbia which was denied. Globcom also filed a motion with this Court seeking certification for an interlocutory appeal pursuant to *28 U.S.C. § 1292(b)*. On July 28, 1988, this Court denied Globcom's motion for certification.

[*10] (b) GTA provided Globcom with preferable access by allowing Globcom a single three-digit access number "001" for direct-dialed calls and a single three-digit access number "002" for operator-assisted calls and refused IT & E's requests for similar three-digit access numbers unless IT & E capitulated to a 50% net revenue contribution;
(c) IT & E's requests for direct trunking between IT & E's switch and particular local exchanges were denied by GTA, notwithstanding the fact that such "premium" direct trunking was provided to Globcom, thereby resulting in the rerouting and diversion of traffic intended for IT & E to Globcom;
(d) GTA refused to provide IT & E with ANI capability as it did for Globcom, unless IT & E capitulated to a 50% net-revenue contribution;

(e) GTA **[**12]** refused to provide IT & E with "Answer/Disconnect supervision" ("ADS") capability as it did for Globcom, unless IT & E capitulated to a 50% net-revenue contribution;
(f) GTA and Globcom, pursuant to the terms of their "secret" 1984 Traffic Agreement, jointly designed and implemented new access technology, facilities, methods of interconnection, signalling, access codes, access features and equipment in a manner specifically intended to satisfy Globcom's particular requirements to the exclusion and detriment of IT & E whose interconnection requirements were purposefully impeded and frustrated in Globcom's and GTA's joint design of GTA's new exchange switches;
(g) GTA, pursuant to the terms of the "secret" 1984 Traffic Agreement, denied IT & E's requests to have an advertisement included in the "pink pages" of GTA's telephone directory;
(h) GTA deliberately engaged in a policy and practice of imposing delays on the processing and handling of IT & E's service requests.

Complaint at 21-22.

The amended complaint consists of five counts of alleged violations of *Sections 1*, *2*, and *3* of the Sherman Act, 15 U.S.C. § 1-3: (1) an unlawful combination, contract and/or conspiracy in unreasonable restraint of trade in violation of *Section 1* (Count I); (2) unlawful monopolization by Globcom in violation of *Section 2* (Count II); (3) an unlawful attempt to monopolize in violation of *Section 2* (Count III); (4) an unlawful conspiracy to monopolize in violation of *Section 2* (Count IV); and (5) an unlawful combination, contract and/or conspiracy in unreasonable restraint of trade in violation of *Section 3* (Count V).

On September 29, 1989, the Court heard argument on Globcom's motion **[**14]** for summary judgment. At the Court's request, an additional hearing on Globcom's summary judgment motion was held from November 20 to November 22, 1989. Subsequently, on November 29, 1989, Globcom filed a motion for primary jurisdiction referral to the FCC. Globcom contends that if the Court were to deny its summary judgment motion, a primary jurisdiction referral would be appropriate because the reasonableness of the *third amendment* to the Traffic Agreement -- an issue within the jurisdiction of the FCC -- would be a prerequisite to a trial on IT & E's claims. On February 1, 1990, the Court heard argument on this additional motion.

Discussion

The Court first turns to defendant's motion for summary judgment. Globcom asserts three grounds in support of its motion for summary judgment: (1) under *Sakamoto v. Duty Free Shoppers, Ltd., 613 F. Supp. 381 (D.Guam 1983)*, *aff'd*, *764 F.2d 1285 (9th Cir. 1985)*, *cert. denied*, *475 U.S. 1081, 89 L. Ed. 2d 715, 106 S. Ct. 1457 (1986)*, agreements with instrumentalities of the government of Guam are absolutely immune from federal antitrust attack; (2) Globcom's alleged efforts to persuade GTA to take the actions complained of by IT & E are protected under the *Noerr-Pennington* **[**15]** doctrine; and (3) IT & E has failed to present admissible evidence as required by *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, *cert. denied*, *481 U.S. 1029, 95 L. Ed. 2d 527, 107 S. Ct. 1955 (1987)*, to demonstrate that the alleged actions by **[*11]** GTA caused antitrust injury to IT & E and were committed in concert with Globcom. Because the Court concludes that Globcom is entitled to summary judgment on the basis of the federal instrumentality doctrine, the latter two grounds for summary judgment will not be addressed.

Federal Instrumentality Doctrine

HN1[] It is well-established that the antitrust laws do not extend to actions of agencies or instrumentalities of the federal government, even when those agencies operate in competition with and to the detriment of private enterprise. *Sea-Land Service, Inc. v. Alaska R.R., 212 U.S. App. D.C. 197, 659 F.2d 243, 247 (D.C. Cir. 1981)*, *cert. denied*, *455 U.S. 919, 71 L. Ed. 2d 459, 102 S. Ct. 1274 (1982)*. Moreover, private parties acting in compliance with clearly articulated government policies and programs are immunized from antitrust liability to the same extent as the government entity. *Southern Motor Carriers Rate Conf. v. United States, 471 U.S. 48, 56-57, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*. *See also Caribe Trailers Sys.* ***[**16]*** *v. Puerto Rico Maritime Shipping Author., 475 F. Supp. 711, 724 (D.D.C. 1979)* (when government agency is privileged to enter into agreement that might otherwise violate antitrust laws, those with whom it contracts are similarly entitled to antitrust immunity). Thus, in order for Globcom to prevail on its theory of absolute immunity, GTA must be considered a federal instrumentality for antitrust purposes.

The federal instrumentality doctrine has its genesis in the Supreme Court's decision in *United States v. Cooper, 312 U.S. 600, 606, 85 L. Ed. 1071, 61 S. Ct. 742 (1941)*, in which the Court held that the United States did not qualify as a "person" under the Sherman Act and, therefore, could not bring an action for monetary damages. [10] The Court noted that if the United States qualified as a "person" entitled to maintain a treble damage action, it would also qualify as a "person" subject to Sherman Act liability. *Id*. Congress responded to the *Cooper* decision in 1955 by amending the Clayton Act to specifically authorize the United States to sue alleged ***antitrust law*** violators for actual, but not treble, damages. *See 15 U.S.C. § 15a*. Congress did not address whether the United States would be liable **[**17]** as a defendant under the antitrust laws. However, relying on *Cooper* and the Congressional silence concerning the United States' status as a "person" for antitrust liability, courts have subsequently held that the United States and its agencies and instrumentalities are not "persons" who may be held liable under the antitrust laws. *See e.g. Sea-Land Service, Inc. v. Alaska R.R., supra*; *Jet Courier Ser. v. Federal Reserve Bank, 713 F.2d 1221, 1228 (6th Cir. 1983)*.

Globcom contends that the Ninth Circuit's decision in *Sakamoto v. Duty Free Shoppers, Ltd., 764 F.2d 1285 (9th Cir. 1985)*, compels the conclusion that GTA is a federal instrumentality. *Sakamoto* involved a challenge to the legality of an exclusive concession agreement awarded by the Guam Airport Authority. **[**18]** In that case, the plaintiffs, a business competitor of Duty Free Shoppers, Ltd., the company which won the concession, sued the parties to the concession agreement: Duty Free, the Government of Guam, the Guam Airport Authority ("GAA"), and the executive manager of GAA. The Ninth Circuit, affirming the district court's dismissal of the antitrust claims, held that "the government of Guam is an instrumentality of the federal government over which the federal government exercises plenary control . . . . There is no reason why Guam should enjoy less immunity than the federal government itself." *Id. at 1289*.

After much thought, the Court concludes that GTA must also be considered a federal instrumentality. Were this a case of first impression, the Court may well have determined that because Guam is more closely analogous to a state, GTA is not entitled to absolute immunity under the antitrust laws as Globcom contends, but rather to the qualified immunity afforded to state and **[*12]** local governments. However, this is not a case of first impression; *Sakamoto* is squarely on point. Under *Sakamoto* the actions of GTA, like those of GAA, cannot give rise to antitrust liability. GTA is indistinguishable **[**19]** from GAA: both are public corporations created by the Guam legislature and run by a Board of Directors whose members are appointed by the Governor with the advice and consent of the Legislature.

The Court is not persuaded by the arguments made by IT & E to avoid the reach of *Sakamoto*. As IT & E notes, the antitrust implications of actions undertaken by local government instrumentalities of the District of Columbia and Puerto Rico, both U.S. territories, have not been treated as actions of federal instrumentalities. [11] Nevertheless,

[10] *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, prohibit contracts, combinations, or conspiracies in restraint of trade or commerce and monopolization or attempts or conspiracies to monopolize trade or commerce by any "persons."

both the District of Columbia and Puerto Rico have different relationships with the federal government than the government of Guam.

[20]** The status of Guam and Puerto Rico cannot be equated: Puerto Rico is an incorporated territory while Guam is not. In 1952, "Puerto Rico ceased being a territory of the United States subject to the plenary powers of Congress as provided in the Federal Constitution . . . . The government of Puerto Rico is no longer a federal government agency exercising delegated power." *United States v. Quinones, 758 F.2d 40, 42 (1st Cir. 1985)*. Rather, Puerto Rico has "the degree of autonomy and independence normally associated with States of the Union." *Examining Bd. of Eng'rs, Architects & Surveyors v. Flores de Otero, 426 U.S. 572, 594, 49 L. Ed. 2d 65, 96 S. Ct. 2264 (1976)*. Thus, *Sakamoto* expressly -- and quite correctly -- distinguished Guam from incorporated territories like Puerto Rico "which are thought of as future states." *Id. at 1287*.

IT & E's attempt to analogize Guam and the District of Columbia also fails. IT & E relies heavily on the D.C. Circuit's opinion in *Hecht v. Pro Football, Inc., 144 U.S. App. D.C. 56, 444 F.2d 931 (D.C. Cir. 1971)*, *cert. denied*, *404 U.S. 1047, 92 S. Ct. 701, 30 L. Ed. 2d 736 (1972)*. *Hecht* involved an antitrust challenge to a provision of the D.C. Armory Board's thirty-year lease of Robert F. Kennedy Stadium to the Washington **[**21]** Redskins. Pursuant to its authority to legislate for the District of Columbia, Congress had provided for the construction of the stadium and created the D.C. Armory Board to operate the facility. After reviewing the history of the Armory Board's enabling legislation, which indicated that the Armory Board was meant to be treated like any private venture, the Court held that the lease was subject to the same antitrust constraints as those applied to private parties. *Id. at 939, 942-946*. Analogizing GTA to the D.C. Armory Board, IT & E argues that its antitrust immunity should be determined as if Guam were a municipality. Yet, subsequent cases in this Circuit have limited the holding of *Hecht*, demonstrating that its rationale does not apply to the circumstances of the instant case.

For example, in *Sea-Land Service, Inc. v. Alaska R.R., supra*, the D.C. Circuit applied the federal instrumentality doctrine in a suit alleging that a private corporation had conspired to monopolize Alaskan trade with the Alaska Railroad, an entity wholly owned and operated by the United States. The Court distinguished the Alaska Railroad, which it determined was a federal instrumentality, from the **[**22]** D.C. Armory Board, concluding that "while *Hecht* stands as this court's precedent regarding District of Columbia agencies such as the Armory Board, we hold that *Hecht* does not supply analysis appropriate in a case in which the activities of a United States instrumentality are at issue." *Id. at 246-47*. Similarly, in *Feldman v. Gardner, 213 U.S. App. D.C. 119, 661 F.2d 1295, 1307 (D.C. Cir. 1981)*, *vacated on other grounds*, *460 U.S. 462, 75 L. Ed. 2d 206, 103 S. Ct. 1303 (1983)*, which involved an unsuccessful antitrust challenge to the **[*13]** bar admission rules of the District of Columbia Court of Appeals, the Court distinguished *Hecht*, noting that the Armory Board "was commissioned to operate that facility as a private venture." In contrast, the instant case involves the conduct of a not-for-profit public corporation.

Equally important, the Ninth Circuit -- the Circuit that has jurisdiction over Guam -- has consistently chosen to treat Guam as a federal entity. As the Court stated in *Ngiraingas v. Sanchez, 858 F.2d 1368 (9th Cir. 1988)*, *aff'd*, *495 U.S. 182, 109 L. Ed. 2d 163, 110 S. Ct. 1737 (1990)*:

> Admittedly, the analogy between Guam and an administrative agency such as the Federal Trade Commission is counterintuitive. Guam seems more **[**23]** like a state or a municipality than a run-of-the-mill federal agency. After all, Guam elects government officials, its citizens participate politically and the territory enjoys many of the trappings of a sovereign governmental entity. *See* *48 U.S.C. §§ 1421-1424b*. But there are also very significant differences, differences we deem conclusive for the purposes of the question presented to us. Guam marches squarely to the beat of the federal drummer; the federal government bestows on Guam its powers and, unlike the states, which retain their sovereignty by virtue of the Constitution, Guam's sovereignty is entirely a creation of federal statute.

Puerto Rico Maritime Shipping Authority, 475 F. Supp. 711, 723-35 (D.D.C. 1979)*; *Star Lines, Ltd. v. Puerto Rico Maritime Shipping Authority, 451 F. Supp. 157 (S.D.N.Y. 1978)*; *Zapata Gulf Marine Corp. v. Puerto Rico Shipping Authority, 682 F. Supp. 1345 (E.D. La. 1988)*.

Id. at 1371.

The Local Government Antitrust Act of 1984

Nor is the Court persuaded by IT & E's assertion that the force of *Sakamoto* has been eviscerated by the Local Government Antitrust Act of 1984, *15 U.S.C. §§ 34-36* ("LGAA"). The LGAA eliminated the damage remedy against local governments and private persons acting at local governmental direction. H.R. Rep. No. 965, 98th Cong., 2d Sess. 2, *reprinted in* 1984 U.S. Code Cong. & Admin. News 4602, 4603. Under the LGAA, local governments are defined as a "general function governmental **[**24]** unit" or a "special function governmental unit" established by "State" law, *15 U.S.C. § 34(1)(A-B)*, and includes U.S. territories within the definition of "State," *15 U.S.C. § 34(3)*. According to IT & E, therefore, the LGAA evinces a Congressional intent to treat U.S. territories, including Guam, as "states" for the purposes of the antitrust laws.

Yet in deciding *Sakamoto*, the Ninth Circuit expressly noted enactment of the LGAA, which because it had only recently been enacted was not applicable to that case, and did not suggest that it would have compelled a different result. *764 F.2d at 1288-89*. Indeed, the Ninth Circuit has subsequently reaffirmed that *Sakamoto* remains good law. *See* *Ngiraingas v. Sanchez, 858 F.2d at 1371-72*. Furthermore, the LGAA was not intended to alter substantive ***antitrust law***. Its sole purpose was to eliminate damages as an antitrust remedy against municipalities. *See* 1984 U.S. Code Cong. & Admin. News at 4603.

GTA clearly does not fall within the definition of either a "general function governmental unit" or a "special function governmental unit." [12] GTA is not a general function governmental unit because it provides only specialized telecommunication **[**25]** services rather than the broad range of services provided by cities and other examples of general function governmental units used in the statute. *See* *15 U.S.C. § 34(1) (A)*. Nor is GTA a special function governmental unit, because such units have only limited geographic jurisdiction within states; the definition of "local government" under the LGAA "does not include States or their agencies with State-wide jurisdiction." House Report at 19, 1984 U.S.Code Cong. **[*14]** & Admin. News at 4620; *see* *15 U.S.C. § 34(1)(B)*.

[26]** Requirement of Valid Governmental Action

In a final effort to distinguish this case from *Sakamoto*, IT & E asserts that GTA is entitled to immunity as a federal instrumentality only if the challenged conduct constitutes valid governmental action. In support of its position, IT & E cites the district court's opinion in *Sakamoto. See* *Sakamoto v. Duty Free Shoppers, Ltd., 613 F. Supp. 381* (D.Guam). There, the district court noted that the federal instrumentality in question, the GAA, was acting "in accordance with the mandate of the Government of Guam when it entered into the exclusive airport merchandise concession agreement." *Id. at 387*. Accordingly, IT & E contends that GTA would not qualify for antitrust immunity under the federal instrumentality doctrine if its conduct was *ultra vires* or beyond the scope of authority conferred in its enabling legislation.

The simple answer to this argument is that the federal instrumentality doctrine provides *absolute* immunity. Thus, in *Sea-Land*, the seminal case which established the doctrine, the Court of Appeals held that "the United States, its agencies and officials, *remain outside the reach of the Sherman Act."* *Id.* **[**27]** *at 246*. *See also* *Howes Leather Co. v. Golden, 681 F. Supp. 6, 15 (D.D.C. 1987)* ("the government, its agencies, and officials, are absolutely immune from antitrust liability per se"). Furthermore, IT & E has not succeeded in demonstrating that GTA's adoption of the *third amendment* to the Traffic Agreement exceeded the scope of its legal authority. GTA's enabling legislation authorizes it to provide interconnection services, establish rates for those services, and enter into contracts. *See* 12 Guam Code Ann. § 7104. Indeed, recent legislation on Guam demonstrates that GTA has the

[12] Despite IT & E's arguments to the contrary, *Zapata Gulf Marine Corp. v. Puerto Rico Maritime Shipping Auth., 682 F. Supp. 1345 (E.D. La. 1988)* is inapposite. In *Zapata*, the Court held that the Puerto Rico Maritime Shipping authority was a "special function governmental unit" for the purposes of the LGAA and was therefore immune from antitrust damage liability. *Id. at 1352*. The federal instrumentality defense was not raised, however, and as the Court noted, "there is no dispute that Puerto Rico is a state for purposes of applying the state action doctrine." *Id. at 1348 n. 3*.

authority to enter into private agreements. [13] *See* Guam Public Law No. 20-146, § 6 (1990), attached as Exhibit C to Defendant's Supplemental Memorandum in Further Support of Summary Judgment.

[28]** The Definition of "Person" under *15 U.S.C. § 7*

Finally, the Court rejects IT & E's argument that GTA is not entitled to immunity as a federal instrumentality because as a public corporation incorporated under territorial law it is a "person" under *15 U.S.C. § 7*. [14] This argument does not survive scrutiny. In *Sakamoto*, the GAA was held to be a federal instrumentality despite the fact that it too is a public corporation incorporated under territorial law. Similarly, the Federal Reserve Bank, a public corporation with private shareholders, has also been held immune as a federal instrumentality. *Jet Courier Serv. v. Federal Reserve Bank, 713 F.2d 1221, 1228 (6th Cir. 1983)*. *See also* *City of Loudon v. TVA, 585 F. Supp. 83, 87* (E.D. Tenn.), *aff'd*, *754 F.2d 372 (6th Cir. 1984)* (TVA exempt from antitrust laws).

[29]** * * * *

The thrust of IT & E's complaint is that it was victimized by GTA actions pursuant to a conspiracy with Globcom. *See* Complaint at 21-22. But, as discussed above, the actions of GTA, a federal instrumentality, cannot give rise to antitrust liability. Therefore, Globcom is entitled to summary judgment on all claims based on the alleged combination or conspiracy between it and GTA. Accordingly, the Court finds that Globcom is entitled to judgment as a matter of law on Counts I (unlawful combination in violation of *15 U.S.C. § 1*), IV (unlawful combination in violation of *15 U.S.C. § 2*), and V (unlawful combination in violation of *15 U.S.C. § 3*) of the amended complaint.

[*15] As a final matter, the Court turns to Globcom's motion for a primary jurisdiction referral to the FCC. [15] Because the Court has determined that GTA is a federal instrumentality and that its conduct is within the scope of its territorial enabling legislation, the Court need not consider the applicability to Guam of the FCC interconnection rules. As the Court has no need to refer this issue to the FCC, the motion for primary jurisdiction referral will be denied.

[30]** A separate order accompanies this opinion.

ORDER -- June 12, 1990, Filed

Upon consideration of defendant's motion for summary judgment and defendant's motion for a primary jurisdiction referral to the Federal Communications Commission, the opposition thereto, the arguments of counsel, the entire record herein, and in accordance with the Court's opinion of this date it is hereby

ORDERED that defendant's motion for summary judgment be and hereby is granted in part; and it is further

---

[13] Section 6 of Public Law No. 20-146, enacted by the Guam Legislature in March 1990 states:

> GTA shall establish, subject to approval of the Public Utility Commission ("PUC") standard terms and conditions applicable to all agreements between GTA and companies providing long distance telecommunication services between Guam and overseas destinations.

[14] *Section 7* of the Sherman Act defines "person" to include "corporations and associations existing under or authorized by the laws of any State, or the laws of any foreign country." *15 U.S.C. § 7*.

[15] Globcom seeks to have the following two questions submitted to the FCC:

> (1) whether, in light of the D.C. Circuit's decision in *All America Cables & Radio*, the Commission's interconnection policies in Docket 88-72, in particular its interconnection charge rules, have been extended to Guam; and
>
> (2) if the FCC's interconnection rules have been extended to Guam, what price and other terms and conditions should the Guam Telephone Authority ("GTA") have established for both plaintiff IT & E Overseas, Inc. ("IT & E") and Globcom to obtain interconnections to GTA's local telephone network.

See Defendant's Motion for a Primary Jurisdiction Referral to the Federal Communications Commission.

ORDERED that judgment be and hereby is entered on behalf of the defendant on Counts I, IV, and V of the amended complaint; and it is further

ORDERED that defendant's motion for a primary jurisdiction referral to the Federal Communications Commission be and hereby is denied.

ORDER -- June 12, 1990, Filed

Upon consideration of defendant's Motion to Strike Plaintiff's Affidavits, the opposition thereto, and the entire record herein it is hereby

ORDERED that defendant's motion to strike plaintiff's affidavits be and hereby is denied.

A franchise is a contract.

Governments > Local Governments > Ordinances & Regulations

HN15[] Local Governments, Ordinances & Regulations

Idaho Code § 50-329 articulates the method by which a city may pass an ordinance granting a franchise and the franchise ordinances are presumed valid with the burden on those challenging the ordinance to prove its invalidity.

Governments > Public Improvements > General Overview

Public Contracts Law > Types of Contracts > General Overview

HN16[] Governments, Public Improvements

A franchise ordinance represents a contract between the city and its grantee.

Governments > Public Improvements > General Overview

HN17[] Governments, Public Improvements

Since a franchise is a contract between a government body and a private entity, it is binding upon the parties, enforceable and entitled to the respect a court must give all valid contracts.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Fees

Governments > Public Improvements > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN18[] Franchise Relationships, Franchise Fees

Idaho cities have the right to own and operate utilities and provide those services to their residents.

Governments > Public Improvements > General Overview

Tax Law > State & Local Taxes > Public Utility Taxes > General Overview

Tax Law > State & Local Taxes > Franchise Taxes > General Overview

HN19[] Governments, Public Improvements

The charging of a fee for the utility franchise is reasonable compensation and consideration to the cities as expressly allowed by *Idaho Const. art. XV, § 2* and *Idaho Code. § 40-2308*.

Governments > Public Improvements > General Overview

Tax Law > State & Local Taxes > Public Utility Taxes > Imposition of Tax

Tax Law > ... > Alcohol & Tobacco Products > Alcohol Taxes > Imposition of Tax

Tax Law > State & Local Taxes > Public Utility Taxes > General Overview

HN20 [] **Governments, Public Improvements**

The providing of sewer, water, electrical and other utility services to residents based on consumption of the commodity is a charge for a direct public service as compared to a tax which is a forced contribution by the public-at-large for revenue raising purposes.

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN21 [] **Remedies, Costs & Attorney Fees**

Idaho law provides for an award of attorney fees when the court finds that the case was brought, pursued or defended frivolously, unreasonably or without foundation. *Idaho Code § 12-121*; *Idaho R. Civ. P. 54(e)(1)*; *Idaho R. Civ. P. 54(e)(2)*.

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

Civil Procedure > Appeals > Standards of Review

HN22 [] **Remedies, Costs & Attorney Fees**

The award of attorney fees is within the discretion of the district court and in absence of an abuse of discretion such an award, or lack thereof, will not be disturbed on appeal.

Civil Procedure > Appeals > Frivolous Appeals

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN23 [] **Appeals, Frivolous Appeals**

Attorney fees on appeal will not be awarded where the appeal was not brought frivolously, unreasonably and without foundation.

Opinion by: BOYLE

Opinion

[*138] [300]** In this utility franchise case we are called upon to determine the authority of cities to enter into utility franchise agreements and also to determine the validity of franchise fees paid to the cities by the utilities which are eventually passed on to the consumers and ratepayers.

The cities of Boise, Meridian, Eagle, Kuna and Garden Valley (hereafter Cities) entered into various gas and water utility franchise agreements with the Boise Water Corporation, Capital Securities Water Corporation and Intermountain Gas Company (hereafter Utilities). While only the City of Boise has franchise agreements with Boise Water Corporation and Capitol Securities Water Corporation, each of the cities of Boise, Eagle, Meridian, Kuna and Garden City have franchise agreements with Intermountain Gas Company. Each of the franchise agreements is embodied in a city ordinance adopted by the respective city governments. The franchise agreements provide that as consideration the cities will not engage in the business of the utility or enter **[***3]** into competition with the utilities. The franchise agreements provide a grant of authority giving the utilities the right and authority for a specific term of years to maintain a transmission and distribution system within the public areas of the city limits. Section 1 in the franchise agreement existing between the city of Boise and Intermountain Gas Company is illustrative of grants contained in all of the franchise agreements.

> It is hereby granted to Intermountain Gas Company, a corporation, its successors (hereafter collectively referred to as "Grantee") a twenty (20) year extension to the right and authority to construct, install, maintain and operate the gas transmission and distributing system, including mains, pipes, conduits, services and other necessary structures and appliances appertaining in, under, upon, over, across and along the streets, alleys, bridges and public places within the present and future corporate limits of the City of Boise, Idaho (hereafter referred to as "City") for the furnishing, transmission, distribution and sales of gas, whether artificial, natural, mixed or otherwise, for heating, domestic, industrial and other purposes and for transmitting **[***4]** gas into, through and beyond said City.

Each of the franchise agreements provides that the utility shall pay to the city three percent of the gross annual receipts from all sales in the corporate limits as consideration for the franchise contract. The Idaho Public Utilities Commission allowed the utilities to meet their respective obligations to the cities by surcharging the utilities customers' accounts.

On March 12, 1987, appellants Kenneth Alpert and Flying H Trailer Ranch, Inc. filed a complaint in district court against the cities and also named as parties the utilities supplying gas and water service within the city boundaries. The complaint primarily alleged that the cities lacked authority to grant the franchises and impose the franchise fees. Ada County Highway District (ACHD) was allowed to intervene by order of the court. All parties subsequently **[*139] [**301]** filed motions for summary judgment. The district court heard arguments, issued a memorandum decision upholding the franchise agreements as valid and issued an order denying the motions for summary judgment by Alpert and Flying H and ACHD. The court also denied the request by Alpert and Flying H that it certify **[***5]** a class action.

ISSUES ON APPEAL

The following issues are presented: 1) whether the plaintiffs have standing to bring this action; 2) whether this action was properly brought before the district court; 3) whether an antitrust action is presented; 4) whether the cities have the power and authority to contract with utilities; 5) whether the contracts awarding franchises between the utilities and the cities are valid and whether the franchise fee is proper consideration; and, 6) whether attorney fees should be awarded on appeal.

I.

Standing

The first issue presented is whether the plaintiffs Alpert and Flying H have standing to challenge the validity of the franchise fee. We answer this question in the affirmative and hold that these plaintiffs have standing to bring this action.

In *Miles v. Idaho Power Co., 116 Idaho 635, 778 P.2d 757 (1989)*, we considered whether or not an individual ratepayer had standing to challenge an agreement entered into between the State of Idaho and Idaho Power Company. In *Miles*, the plaintiff was found to have standing as a customer and ratepayer to challenge the constitutionality of the legislation. In *Miles* **[***6]** we stated:

> *The parties allegedly injured by the agreement are the ratepayers and customers of Idaho Power*, and not the general populace of the state of Idaho. *This is more than a generalized grievance. It is a specialized and peculiar injury*, although it may affect a large class of individuals. The political process obviously will be more unkind to injured ratepayers seeking to change legislation affecting the whole state of Idaho than to injured citizens and taxpayers. ***HN1***[] When the impact of legislation is not felt by the entire populace, but only by a selected class of citizens, the standing doctrine should not be evoked to usurp the right to challenge the alleged denial of constitutional rights in a judicial forum.
>
> Nevertheless, the respondents urge us to invoke the doctrine because of the large class of Idaho Power ratepayers. They argue that Miles, as only one of thousands of customers, suffered a generalized injury, which, when compared to the benefits the compromise afforded to all of the people of Idaho is de minimis and insubstantial. This may be true, but we fail to see how this factor requires a dismissal upon lack of standing. "To deny standing to persons **[***7]** who are in fact injured simply because many others are also injured, would mean that the most injurious and widespread Government actions could be questioned by nobody." *United States v. SCRAP, 412 U.S. 669, 687-88, 93 S.Ct. 2405, 2416, 37 L.Ed.2d 254 (1973)*. This statement is particularly true here. *There is no question that the agreement impacts Idaho Power ratepayers*. The State and Idaho Power, as part of their agreement, have pledged "actively and in good faith" to recommend and support the implementing legislation. Idaho Power ratepayers are therefore the group most adverse to the agreement, not Idaho Power or the State. Because of that fact, and *the fact that Miles challenges the implementing legislation as a ratepayer, and not as a taxpayer, we hold that Miles has standing to pursue his remedy in the courts*. (Emphasis added.)

Id., 116 Idaho at 642, 778 P.2d at 764.

In the present case the plaintiffs Alpert and Flying H challenge the validity of the franchise fee characterizing it as a tax. It is undisputed that the franchise fees are ultimately paid by these plaintiffs and the other **[***8]** residents of the municipality using the utility. Although the plaintiffs are not parties to the franchise agreement, they **[*140]** **[**302]** are directly affected by the agreement imposing the three percent fee and clearly have standing to bring this action. *Miles v. Idaho Power Co., 116 Idaho 635, 778 P.2d 757 (1989)*.

II.

Jurisdiction

Several of the parties assert that only the Idaho Public Utilities Commission has jurisdiction to review and resolve the issues presented. We disagree and hold that the issues presented are best resolved by the courts rather than by an administrative agency.

HN2[] The Idaho Public Utilities Commission exercises limited jurisdiction and has no authority other than that expressly granted to it by the legislature. *Washington Water Power Co. v. Kootenai, 99 Idaho 875, 591 P.2d 122 (1979)*.

> The Idaho Public Utilities Commission has no authority other than that given to it by the legislature. It exercises a limited jurisdiction and nothing is presumed in favor of its jurisdiction. ***HN3***[] *United States v. Utah Power & Light Co., 98 Idaho 665, 570 P.2d 1353 (1977)*; *Lemhi Tel. Co. v. Mountain States Tel. & Tel. Co., 98 Idaho 692, 571 P.2d 753 (1977)*; **[***9]** *Arrow Transp. Co. v. Idaho Pub. Utils. Comm'n, 85 Idaho 307, 379 P.2d 422 (1963)*. As a general rule, administrative authorities are tribunals of limited jurisdiction and their jurisdiction is dependent entirely upon the statutes reposing power in them and they cannot confer it upon themselves, although they may determine whether they have it. If the provisions of the statutes are not met and compliance is not had with the statutes, no jurisdiction exists.

Id., 99 Idaho at 879, 591 P.2d at 126.

The public utilities law (Chapters 1-7 of Title 61, Idaho Code) establishes a comprehensive scheme for the regulation of investor-owned public utilities by the Idaho Public Utilities Commission. Idaho Code, tit. 61, chap. 5. [1]

> ***HN4***[] Administrative authorities are tribunals of limited jurisdiction. Their jurisdiction is dependent entirely upon the provisions of the statutes reposing power in them; they cannot confer it upon themselves, although they may determine whether they have it. If the provisions of the statutes are not met and complied with, they have no jurisdiction.

Arrow Transp. Co. v. Idaho Pub. Utils. Comm'n, 85 Idaho 307, 313, 379 P.2d 422, 425 (1963), **[***10]** *quoting* 42 *Am.Jur.* 440, § 109.

As this Court stated in *Washington Water Power Co. v. Kootenai Environmental Alliance*:

> There is no question that much of the work of the Commission, particularly in the **[***11]** areas of ratemaking, requires expertise, technical skill and constant attention. . . . Such was held to be a strong argument for the delegation of the legislative authority to a commission under statutes established by the legislature.

Id., 99 Idaho at 882, 591 P.2d at 129.

In the complaint filed by plaintiffs the district court was requested to determine the validity of the franchise contracts between the utilities and the cities. The district court was also requested to determine the authority of the cities to grant a utility franchise, the validity of the franchise fee and the authority of the city to impose a franchise fee.

---

[1] More specifically, the authority granted the IPUC includes the power to investigate and fix rates and regulations, *I.C. § 61-503*; determine the reasonableness of rates, *I.C. § 61-502*; investigate proposed interstate rates, *I.C. § 61-506*; determine rules and regulations affecting the performance of public utilities, *I.C. § 61-507*; order improvements to utility facilities, *I.C. § 61-508*; investigate accidents occurring on public utility property arising from its maintenance or operation, *I.C. § 61-517*; determine standards and practices for the measurement of quantity, quality or other conditions pertaining to the supply of a public utility product or service, *I.C. § 61-520*; ascertain the value of public utility property, *I.C. § 61-523*; and issue certificates of convenience and necessity, *I.C. § 61-526*.

The subject matter of the complaint filed in district court clearly raises legal issues to be resolved by the courts rather than an administrative agency. The action filed in district court does not deal with the subject **[*141]** **[**303]** matter traditionally regulated by public utility commissions and does not fall into a category of regulation which requires the technical expertise of a public utility commission. *Id.* Thus, we hold that this action was properly before the district court rather than the Idaho Public Utilities **[***12]** Commission.

III.

Antitrust Action

Appellants Alpert and Flying H argue that the agreements between the cities and the utilities constitute an unlawful and unreasonable restraint of trade and that the district court erred in dismissing the antitrust claims.

In *Denman v. Idaho Falls, 51 Idaho 118, 4 P.2d 361 (1931)*, this Court held that the Idaho antitrust laws do not apply to municipal corporations. In *Denman*, the Court was directly presented with the antitrust issue [2] and expressly held that the ***antitrust law*** did not apply to a municipal corporation. The Court stated:

> A careful examination of the act discloses that it was clearly the intention of the legislature that the use of the word "corporation" therein was to be limited to private corporations and not to include municipal corporations and numerous provisions contained therein negative the contention of appellant that it has application to and includes municipal corporations . . . . While such a statute may be applicable and enforceable against private corporations generally we know of no logical reason that could be urged sustaining the application of such a provision to a municipal **[***13]** corporation.

Id., 51 Idaho at 121-22, 4 P.2d at 362; *see also* *Wilcox v. Idaho Falls, 23 F.Supp. 626 (Idaho 1938)*.

Appellants Alpert and ACHD contend that there is no clearly expressed state policy which allows the defendant utilities and cities to engage in anticompetitive conduct. ***HN5***[] It is true that municipalities, unlike the state, are not necessarily shielded from liability under the antitrust laws unless the municipality acts pursuant to an affirmatively expressed "state policy to displace competition with regulation or monopoly public **[***14]** service." *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 38, 105 S.Ct. 1713, 1716, 85 L.Ed.2d 24 (1985)* *quoting* *Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 413 98 S.Ct. 1123, 1137, 55 L.Ed.2d 364 (1978)*; *see also* McQuillin, *Municipal Corporations* § 34.23.05. ***HN6***[] However, the state of Idaho has specifically delegated and authorized its cities to provide utility services directly to its residents or to contract with other entities to provide the necessary utility services. *Idaho Code § 50-344* grants to the cities the power to maintain and operate solid waste collection systems; *I.C. § 50-322* empowers the cities to establish, create, develop, maintain and operate domestic water systems; and *I.C. § 50-325* authorizes the cities to acquire, own, maintain and operate electric power plants. Furthermore, *I.C. §§ 50-329* and -330 confer on the cities the authority to grant franchises to provide these services and thereafter regulate the franchise holders should the cities choose not to provide their own utility services.

These Idaho statutes clearly contemplate that a city or municipality **[***15]** may engage in activities such as those under consideration in the present action. Such activity is a foreseeable result of empowering the cities to engage in the operation of their own utilities and these activities do not constitute unfair competition nor antitrust violations. The clear state policy is to displace competition in the providing of utility service with regulation of a monopoly

---

[2] In framing the antitrust question presented, the *Denman* Court stated the issue as follows:

> The chief question raised touching the insufficiency of the fifth amended complaint is: Are municipal corporations amenable to the Anti-trust Law (C.S., chap. 116, sec. 2531 et seq.) and was it the intention of the legislature to include municipal corporations therein.

51 Idaho at 120, 4 P.2d at 362.

public service. Moreover, in *Idaho Power & Light Co. v. Blomquist, 26 Idaho 222, 141 P. 1083 (1914)*, this Court held:

> ***HN7***[] There is nothing in the Constitution that prohibits the legislature from enacting **[*142]** **[**304]** laws prohibiting competition between public utility corporations, and the legislature of this state no doubt concluded that a business like that of transmitting electricity to the streets of the city and furnishing light and power to the people must be transacted by a regulated monopoly, and that free competition between as many companies or as many persons as might desire to put up wires in the streets is impractical and not for the best interest of the people.

Id., 26 Idaho at 241, 141 P. at 1088. In *Town of* **[***16]** *Hallie v. City of Eau Claire*, the United States Supreme Court held that active state supervision is not a prerequisite to exemption from the anti-trust laws where the actor is a municipality rather than a private party. Further, private public utilities in this state are heavily regulated by the Idaho Public Utilities Commission, thus showing the intent of the legislature to replace competition by regulation. *Idaho Power & Light Co. v. Blomquist, 26 Idaho 222, 141 P. 1083 (1914)*. We hold that the district court did not err in dismissing plaintiffs' antitrust claims.

IV.

Authority To Grant Franchises

A fundamental issue before this Court is what entity, *i.e.*, the municipalities or the highway district, has the power and authority to contract with and grant franchises to the various utilities. We hold that the proper party to grant franchises under the circumstances presented are the municipalities.

HN8[] Municipal corporations in Idaho may exercise only those powers granted to them by the state Constitution or the legislature. ***HN9***[] *Caesar v. State, 101 Idaho 158, 160, 610 P.2d 517, 519 (1980)*; *Washington Water Power Co. v. Kootenai, 99 Idaho 875, 591 P.2d 122 (1979)*; **[***17]** *Arrow Transp. Co. v. Idaho Pub. Utils. Comm'n, 85 Idaho 307, 379 P.2d 422 (1963)*; *Sandpoint Water & Light Co. v. City of Sandpoint, 31 Idaho 498, 173 P. 972 (1918)*.

The Idaho legislature has specifically granted franchise authority to municipal corporations. ***HN10***[] *I.C. § 50-329* states in pertinent part:

> No franchise shall be created or granted by the city council otherwise than by ordinance, and the passage of any such ordinance shall require the affirmative vote of one-half (1/2) plus one (1) of the members of the full council.

The historical legal basis of utilities receiving franchises from the municipalities has its origin in *I.C. § 40-2308* which provides:

> **40-2308. Corporations may lay tracks and water mains. --** Every gas, water, or railroad corporation has the power to lay conductors and tracks through the public ways and squares in any city with the consent of the city authorities, and under reasonable regulations and for just compensation, as the city authorities and the law prescribe.

In addition to requiring that the utilities obtain consent from the cities to operate a service utility, *I.C. § 40-2308*, **[***18]** this section allows imposition of reasonable regulations upon the utility by the cities and provides for just compensation to be paid by the utility as prescribed by the city authorities.

The right to charge a fee for a water franchise is expressly approved in *art. 15 § 2 of the Idaho Constitution* which provides:

> **Right to collect rates a franchise. --** The right to collect rates or compensation for the use of water supplied to any county, city, or town or water district, or the inhabitants thereof, is a franchise, and can not be exercised except by authority of and in the manner prescribed by law.

City franchising authority was recognized by this Court in *Jack v. Village of Grangeville, 9 Idaho 291, 74 P. 969 (1903)* wherein the Court stated:

> It is the duty of the municipality to light its public streets and to furnish its inhabitants with the means of obtaining gas at their own expense, and having the power by legislative grant to erect and maintain gasworks for that purpose, it necessarily follows that it had the implied power to **[*143]** **[**305]** contract with others to furnish it in like manner, ...

Id., 9 Idaho at 316, 74 P. at 974. **[***19]**

In *Sandpoint Water & Light Co. v. City of Sandpoint* this Court further recognized city franchising authority wherein the Court held that in granting a franchise, a municipal corporation is not exercising its own powers but is exercising only such powers as have been conferred upon it by the state.

In 1971 the Ada County Highway District (ACHD) was created and the legislature granted county-wide highway districts general supervisory control over all highways and roadways within the respective district. The legislature also conveyed ACHD title to all the streets, highways and related rights-of-way in Ada County on behalf of the public. The highway district contends that this conveyance by the legislature resulted in granting it authority to grant to utilities a franchise. The highway district contends that as *I.C. § 40-1406* states "[w]herever any provisions of the existing laws of the state of Idaho are in conflict with the provisions of this chapter, the provisions of this chapter shall control and supersede all such laws," that the authority of the cities to grant utility franchises has been superseded. We disagree and expressly hold that the highway district legislation contained **[***20]** in Title 40, chapters 13 and 14, does not supercede the well-established law vesting power to grant franchises to utilities in the cities. *Idaho Const. art. 15, § 2*; *I.C. §§ 40-2308*, *50-329*. The highway district's reliance upon *I.C. § 40-1406* as the basis for asserting that it supercedes the law controlling utility franchises is misplaced. The language of *I.C. § 40-1406* is primarily in reference to imposition of ad valorem taxes and cannot be extended to replace the constitutional and statutory provisions controlling utility franchises.

The term "franchise" has been interpreted to mean a grant of a right to use property over which the granting authority has control. 36 *Am.Jur.2d Franchises* § 1. ***HN11***[] *Idaho Code § 50-328*, which expressly addresses the regulation of utility transmission systems, gives the "city" the authority over all lands, not solely the public streets, which are owned or under control of such city. This power was recognized in *Village of Lapwai v. Alligier, 78 Idaho 124, 299 P.2d 475 (1956)* wherein the Court stated:

> [T]he legislature, in providing for the use of streets and alleys by utilities, expressly required the consent **[***21]** of the municipal authorities, and authorized the municipal authorities to impose reasonable regulations upon such use.
>
> Thus, the legislature . . . has preserved to the municipality the power to deny their use to a utility, or to impose reasonable regulations thereon, when necessary to the use of such streets and alleys by the public in the usual manner.

Id., 78 Idaho at 129, 299 P.2d at 478.

Idaho Code § 40-1406 cannot be construed to suggest that the legislature bestowed authority on the highway district to grant franchises to public utilities. Such an interpretation is clearly contrary to the grant of powers given to the highway districts by the legislature. *Idaho Code § 40-1310* expressly sets forth the specific powers and jurisdiction vested in highway commissions. The authority to grant utility franchises is certainly not among the powers enumerated as being vested in a highway district and we agree with the district court that this power belongs to the cities.

HN12[] Although highway districts have broad powers and authority over streets and highways, it must be held in balance with the statutory responsibilities of other entities. ***HN13***[] *Worley Highway Dist. v. Kootenai County, 104 Idaho 833, 663 P.2d 1135 (Ct.App.1983)*. **[***22]** The highway districts' authority does not extend to control the granting of utility franchises which have been vested in the cities.

It is undisputed that municipal corporations in Idaho have the power to operate their own utility systems and provide water, power, light, gas and other utility services within the city limits. *I.C. § 50-323*; *§ 50-325*. The constitutional and statutory grant of franchise authority to the cities in **[*144]** **[**306]** this respect is not nullified or altered by *I.C. § 40-1406*. To give the power to award franchises to ACHD would extend the powers of the highway district well beyond those intended by the legislature and would infringe upon the express authority delegated to the cities to contract with utility companies and grant franchises for utility services. We affirm the district court's ruling in this regard and hold that the power to grant franchises rests in the municipalities rather than the Ada County Highway District.

V.

Franchises Are Valid Legal Agreements

A. ***HN14***[] *Franchise is a* ***HN15***[] *Contract*. *Idaho Code § 50-329* articulates the method by which a city may pass an ordinance granting a franchise and the franchise ordinances are presumed valid with the **[***23]** burden on those challenging the ordinance to prove its invalidity. ***HN16***[] *Continental Oil Co. v. Twin Falls, 49 Idaho 89, 286 P. 353 (1930)*.

The Idaho Court of Appeals has correctly held that "[a] franchise ordinance represents a contract between the city and its grantee." ***HN17***[] *City of Hayden v. Washington Water Power, 108 Idaho 467, 468, 700 P.2d 89, 90 (Ct.App.1985)*. Courts have repeatedly recognized that since a franchise is a contract between a government body and a private entity, it is binding upon the parties, enforceable and entitled to the respect a court must give all valid contracts. *Appalachian Power Co. v. City of Huntington, 158 W.Va. 240, 210 S.E.2d 471 (1974)*; *City of W. Palm Beach v. Florida Pub. Serv. Comm'n, 224 So.2d 322 (Fla.1969)*. The franchise agreements existing in the present appeal are reasonable and necessary for the needs and convenience of the residents of the various communities and are legally binding and enforceable contracts between the parties.

B. *Franchise Fee*. The practice of charging franchise fees as consideration for the granting of **[***24]** a franchise was first noted in *Boise City v. Idaho Power Co., 37 Idaho 798, 220 P. 483 (1923)*, which involved the issue of cancellation of a franchise contract where Idaho Power had purchased two competing power plants and sought to consolidate the franchises. As consideration for the granting of the franchise, Boise City had charged a percentage of the utility's gross revenue collected from its Boise patrons. The Court held that the Commission had no authority to invalidate the franchise cancellation agreement entered into between Boise City and Idaho Power, and further held that payments from the utility to the city constituted valid consideration for a valuable property right which the city surrendered.

HN18[] It is well established that Idaho cities have the right to own and operate utilities and provide those services to their residents. The cities contend that their surrender of this right is valid consideration for the franchise fee charged to the utilities. We agree. The franchise agreements in the present case are contracts and the franchise fees are simply payments or consideration for the rights granted by the cities to the utilities. *Idaho **[***25]** Const. art. 15, § 2*; *I.C. § 40-2308*.

C. *Franchise Fee is Not a Tax*. Appellants Alpert and ACHD contend that the franchise fee is in reality a tax, and cannot legally be imposed upon the utilities' customers. The district court correctly held that the charge imposed was not a tax but was contract consideration for the franchise granted. We agree. The three percent charge is valid consideration for the cities granting the franchises and agreeing not to compete with the utilities. The incorrect reference to the franchise fee as a tax by the Idaho Public Utilities Commission does not change its legal nature. The three percent surcharge is simply a payment in consideration for the franchise to operate the utilities by the various municipalities. ***HN19***[] The charging of a fee for the utility franchise is reasonable compensation and consideration to the cities as expressly allowed by *art. 15, § 2 of the Idaho Constitution* and *I.C. § 40-2308*.

Appellants Alpert and Flying H cite *Brewster v. Pocatello, 115 Idaho 502, 768 P.2d 765 (1988)*, in support of their assertion that the franchise fee in this action is a **[*145]** **[**307]** tax. The tax imposed in *Brewster* **[***26]** is certainly distinguishable from the franchise fee being charged by the utilities and cities in this action. Although a different statute was involved in *Brewster*, the case is instructive to analyze the distinction between a fee and a tax.

> In the instant case it is clear that the revenue to be collected from Pocatello's street fee has no necessary relationship to the regulation of travel over its streets, but rather is to generate funds for the non-regulatory function of repairing and maintaining streets. The maintenance and repair of streets is a non-regulatory function as the terms apply to the facts of the instant case. We view the essence of the charge at issue here as imposed on occupants or owners of property for the privilege of having a public street abut their property. In that respect it is not dissimilar from a tax imposed for the privilege of owning property within the municipal limits of Pocatello. The privilege of having the usage of city streets which abuts one's property, is in no respect different from the privilege shared by the general public in the usage of public streets.
>
> We agree with appellants that municipalities at times provide sewer, water and **[***27]** electrical services to its residents. However, those services, in one way or another, are based on user's consumption of the particular commodity, as are fees imposed for public services such as the recording of wills or filing legal actions. In a general sense a fee is a charge for a direct public service rendered to the particular consumer, while a tax is a forced contribution by the public at large to meet public needs.
>
> While otherwise argued, we see it clear that the municipal ordinance in question is not designed for the regulation of traffic under the police power, but rather clearly a revenue raising measure.

Id., 115 Idaho at 504, 768 P.2d at 767-68.

In the instant case the legislature has given to the cities the authority to either provide the utility services directly or allow a franchisee to provide those services to its residents. Likewise, the cases, statutes and the Idaho Constitution cited herein clearly allow the charging of a reasonable fee for granting a franchise to a utility. In addition, the franchise agreements in this case provide that the municipalities or cities will not compete with the utilities in providing these **[***28]** services. The three percent franchise fee is not imposed on the residents directly by the cities, but is paid by the utilities to the cities and as a cost of business is then passed on to the consumers by the utilities. Although the users of the utility services eventually pay the three percent fee it is not a tax on the general public. *Brewster v. Pocatello, 115 Idaho 502, 768 P.2d 765 (1988)*. The water and gas services provided by the utilities in this case are based on consumption and use by the resident. ***HN20***[] As noted in *Brewster*, the providing of sewer, water, electrical and other utility services to residents based on consumption of the commodity is a charge for a direct public service as compared to a tax which is a forced contribution by the public-at-large for revenue raising purposes. As such the tax imposed in *Brewster* is clearly distinguishable from the fee charged on the accounts of the consumers of the utility service presented in this case. We hold that the three percent fee charged to the customers of the various gas and water utilities is a valid franchise fee and not a prohibited tax.

VI.

Denial Of Attorney Fees By Trial **[***29]** *Court*

Subsequent to dismissal of the plaintiffs' amended complaint and the Ada County Highway District's complaint in intervention, the district court awarded certain costs to defendant cities and utilities. The district court concluded that although plaintiffs' theories were novel and not well-founded, the action did not fall within *I.C. § 12-121* and declined to award attorney fees. ***HN21***[] Idaho law provides for an award of attorney fees when the court finds that the case was brought, pursued or defended frivolously, unreasonably or without foundation. *Idaho Code § 12-121*; *I.R.C.P.* ***[*146]*** ***[**308]*** *54(e)(1)* or *54(e)(2)*. ***HN22***[] The award of attorney fees is within the discretion of the district court and in absence of an abuse of discretion such an award, or lack thereof, will not be disturbed on appeal. *Anderson v. Ethington, 103 Idaho 658, 651 P.2d 923 (1982)*.

Upon review of the district court's award of costs and denial of attorney fees we find no abuse of discretion.

VII.

Attorney Fees On Appeal

Respondents have requested that we award attorney fees on appeal pursuant to *I.A.R. 41*. ***HN23***[] It is well established that attorney fees on appeal will not be awarded where **[***30]** the appeal was not brought frivolously, unreasonably and without foundation. *Keller v. Rogstad, 112 Idaho 484, 733 P.2d 705 (1987)*. In the present appeal we have reviewed the record and determined that legitimate issues have been presented precluding an award of attorney fees on appeal.

We affirm the decision of the trial court. Costs to respondent cities and utilities. No fees allowed.

Concur by: BISTLINE; JOHNSON (In Part)

Concur

BISTLINE, Justice, specially concurring.

I applaud the majority's decision not to award attorneys' fees in this matter, and I concur with almost all of the majority opinion. As to part V. C., 118 Idaho at 144-145, 795 P.2d at 306-307, however, I concur only in the result.

The majority's title for this section of its opinion, "Franchise Fee is Not a Tax," is misleading, and the majority has totally misunderstood the issue raised by the plaintiffs concerning the fee. The assertion that "the charge imposed was not a tax but was contract consideration for the franchise granted" is fine as far as it goes. However, the question here is not whether the municipalities and the utilities can legitimately contract for payment by **[***31]** the utilities to the cities "in consideration for the franchise to operate the utilities by the various municipalities." Rather, the question is whether that payment can legitimately be passed through to the residents of the municipalities in the form of a utility surcharge.

In response to *that* question, the recent case of *Brewster v. City of Pocatello, 115 Idaho 502, 504, 768 P.2d 765, 767 (1988)*, is informative, although it supports a conclusion exactly opposite to that for which it is cited by the majority. *Brewster* states the following:

> We view the essence of the charge at issue here as imposed on occupants or owners of property for *the privilege of having a public street abut their property*. In that respect it is not dissimilar from a tax imposed for *the privilege* of owning property within the municipal limits of Pocatello. The privilege of having the usage of city streets which abuts (sic) one's property, is in no respect different from *the privilege shared by the general public in the usage of public streets*.
>
> We agree with appellants that municipalities at times *provide* sewer, water and electrical services to [their] **[***32]** residents. However, those services, in one way or another, are based on *user's consumption of the particular commodity*, as are fees imposed for public services such as the recording of wills or filing legal actions. In a general sense *a fee is a charge for a direct public service rendered to the particular consumer, while a tax is a forced contribution by the public at large to meet public needs*.
>
> While otherwise argued, we see it clear that the municipal ordinance in question is not designed for the regulation of traffic under the police power, but rather clearly a *revenue raising measure*.

Id., 115 Idaho at 504, 768 P.2d at 767 (emphasis added).

The surcharge here at issue has far more of the characteristics of a tax than of a fee. While it is technically collected by the utilities, it passes directly through their accounts as payment to the municipalities of **[*147]** **[**309]** the franchise fee. Yet the municipalities furnish neither a service nor a commodity to the consumer who pays the surcharge. The surcharge, in essence, is imposed on residents of the municipalities for the privilege of being utility users within the city limits. Since **[***33]** the municipality furnishes no service or commodity, the surcharge is clearly a revenue raising measure.

Thus, according to the standard set forth in *Brewster*, this surcharge is a tax in sheep's clothing. Why, then, a special concurrence rather than a dissent? Simply, because the plaintiffs took action against the wrong parties on this issue. Presently it appears to me that the Public Utility Commission allowed the utilities to impose this "surcharge" on their customers. It is therefore the decision of the Commission which should have been appealed. As the plaintiffs did not take that action (at least such an action is not before us on review), I concur in the majority's affirmance of the summary judgment in favor of the utilities and the municipalities.

Dissent by: JOHNSON (In Part)

Dissent

JOHNSON, Justice, concurring and dissenting.

I concur in all of the opinion of the Court, except the portion that affirms the trial court's denial of costs to the City of Garden City for photocopying charges.

The respondent cities filed memoranda of costs with the trial court within fourteen days after entry of judgment as required by *I.R.C.P. 54(d)(5)*. The memoranda of costs listed photocopying charges **[***34]** in the following amounts:

City of Kuna	$53.46
City of Meridian	$ 421.25
City of Garden City	$ 439.90

The trial court's Order Settling Costs and Attorney Fees awarded photocopying costs to the City of Kuna and the City of Meridian. The court failed to award photocopying costs to the City of Garden City, but gave no explanation for the omission.

This issue should be remanded to the trial court which should do one of three things: (1) award photocopying costs to all three cities, (2) explain the rationale for denying Garden City its photocopying costs, or (3) deny photocopying costs to all three cities.

HN2[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Or. Rev. Stat. § 646.715(2) provides that the decisions of federal courts in construction of federal law relating to the same subject shall be persuasive authority in the construction of *Or. Rev. Stat. § 646.725*.

---

* Appeal from *Multnomah County Circuit Court, Richard L. Unis, Judge. 97 Or App 74, 775 P2d 863 (1989)*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Read literally, *Or. Rev. Stat. § 646.725* and § 1 of the Sherman Act, *15 U.S.C.S. § 1* prohibit every agreement in restraint of trade. The Supreme Court of the United States has construed the Sherman Act to prohibit only contracts in unreasonable restraint of trade. Under the rule of reason, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the per se rule of illegality adopted by the United States Supreme Court in cases under the Sherman Act, a practice that facially has the likelihood of predominantly anticompetitive effects (that is, would always or almost always restrict competition without any offsetting market efficiencies) is illegal per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A challenged practice violates *Or. Rev. Stat. § 646.725* only if the practice constitutes an unreasonable restraint of trade. The rule of reason is the appropriate analysis unless the practice is illegal per se. A per se violation is unreasonable as a matter of law. In a refusal-to-deal context, a plaintiff seeking application of the per se rule must present a threshold case that a defendant who possesses market power or unique access to a business element necessary for effective competition has refused to deal. If the plaintiff meets this threshold showing, the defendant can avoid judgment under the per se rule by establishing that the practice is justified by plausible arguments that it was intended to enhance overall efficiency and make markets more competitive.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Joint Contracts

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

HN6[] **Types of Contracts, Joint Contracts**

A joint venture is not automatically free from scrutiny under the antitrust laws. In determining whether defendants' actions have violated *Or. Rev. Stat. § 646.725*, the court looks at substance, not form.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Horizontal Refusals to Deal

A plaintiff seeking application of the per se rule to an alleged concerted refusal to deal must present a threshold case that a defendant who possesses market power or unique access to a business element necessary for effective competition has refused to deal. If the plaintiff meets this threshold showing, the defendant must establish that the practice is justified by plausible arguments that it was intended to enhance overall efficiency and make markets more competitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

There is often no bright line separating per se from Rule of Reason analysis. These two approaches, however, may be distinguished by the depth of inquiry.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In applying the rule of reason, the basic inquiry is whether the restraint in question is one that promotes competition or one that suppresses competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Under a rule of reason analysis pursuant to *Or. Rev. Stat. § 646.725*, it is a plaintiff's burden to prove that a defendant's conduct was anticompetitive.

Counsel: Michael J. Morris, of Bennett, Hartman, Tauman & Reynolds, P.C., Portland, argued the cause and filed the petition for petitioners on review.

E. Walter Van Valkenburg, of Stoel Rives Boley Jones & Grey, Portland, argued the cause and filed the response to the petition for respondents on review.

Roger Tilbury and Roch Steinbach, Portland, filed a brief on behalf of *amicus curiae* Portland Retail Druggists Association.

Opinion by: PETERSON

** Linde, J., retired January 31, 1990; Jones, J., resigned April 30, 1990.

Opinion

[*74] [429]** Plaintiffs appealed to the Court of Appeals from the trial court's denial of their request for an injunction and other equitable relief under Oregon's "Little Sherman Act," *ORS 646.725*. [1] Plaintiffs alleged that defendants conspired to refuse to deal with them, thereby denying **[***2]** them access to a market necessary for effective competition.

Defendants are Blue Cross and Blue Shield of Oregon, Inc. (BCBSO); Oregon Preferred Care Network, Inc. (OPCN); Good Samaritan Hospital and Medical Center, Inc. (Good Samaritan); and Northwest Physicians Association, Inc. (NPA). Plaintiffs are Northwest Medical Laboratories, Inc., an independent laboratory that provides testing and similar services, and East Portland X-Ray Clinic, P.C., an independent clinic that provides radiology services. After *de novo* review in equity, *ORS 19.125(3)*, *see* **[***3]** *ORS 646.770*, the Court of Appeals affirmed the judgment of the trial court. *NW Medical Lab. v. Blue Cross and Blue Shield, 97 Or App 74, 775 P2d 863 (1989)*. We in turn review *de novo, see* *ORS 19.125(4)*, and affirm the decision of the Court of Appeals.

I. FACTS

The parties "accept the statement of facts contained in the Court of Appeals' opinion." We adopt those findings on *de novo* review and begin with those facts:

> **[**430]** "The health care financing industry has changed significantly in recent decades. Under traditional 'indemnity' health insurance plans, the subscriber pays a premium to the insurer, and the insurer then indemnifies the subscriber for payments made for health care services. The subscriber is able to select any doctor or hospital that the subscriber wishes. Until recently, the only other type of medical service financing available in the Portland area was Kaiser Permanente, a **[*75]** 'closed panel' health maintenance organization (HMO), originally organized by Kaiser Industries during World War II to provide health care services to Kaiser employes. An individual covered by Kaiser usually must have medical services performed **[***4]** by the physicians of Northwest Permanente, P.C., or pay the cost himself.
> "The cost of providing health care services has risen in recent years, and so have the premiums for traditional indemnity type insurance plans. In an effort to reduce the cost of premiums to the subscriber, to reduce the cost of services and to compete with Kaiser and traditional indemnity programs, competitors have developed new concepts for the financing of health care. There are now six HMOs competing in the Portland metropolitan area, including Network Health Plan, the HMO organized by defendant OPCN.
>
> "HMOs charge a fixed sum and provide full health care services to subscribers for that fee. Typically, the HMO limits the hospitals and physicians whose services are covered by the plan. A 'staff model' HMO owns its own facilities and employs physicians on salary. A 'group model' HMO, like Kaiser, does not employ physicians, but contracts with a single group practice for medical services. A 'network model' HMO contracts with groups of doctors in multi-speciality [*sic*] groups. The most common HMO is the independent practice model, which, like OPCN, contracts with independent practice medical associations **[***5]** that, in turn, contract with independent

---

[1] ***HN1***[] *ORS 646.725* provides:

> "Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce is declared to be illegal."

Section 1 of the Sherman Antitrust Act, 26 Stat 209, *15 USC § 1 (1890)*, in part provides:

> "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal."

health care providers practicing in their own facilities. A plan that limits the providers whose services are covered is a 'closed panel' plan. [2]

"The competitive strategy of an HMO is to provide complete medical services at less cost than traditional indemnity insurance by controlling unnecessary use of services and promoting preventive medicine. HMOs do this by placing the participating providers at financial risk with respect to the overall performance of the plan, thereby providing an incentive to the providers to reduce costs and unnecessary medical services.

"In early 1984, representatives of three Portland hospitals, including defendant Good Samaritan, met with defendant BCBSO to discuss the possibility of forming an HMO to provide a plan that would compete with the existing Portland area HMOs and other health care plans. [3] **[***6]** Each hospital obtained the participation of a segment of the physicians on its staff. The physicians, in turn, organized separate independent practice associations, one of which is defendant Northwest Physicians Association, Inc.

[*76] "In June, 1984, BCBSO, the three hospitals and three independent practice associations joined together to form a new corporation, defendant OPCN. BCBSO contracted with OPCN to obtain the necessary health care services. OPCN then contracted with the individual provider members to the extent necessary to provide complete services. Each of the seven separate corporations was a member of OPCN, had a representative on its board of directors and contributed $ 15,000 toward the initial capitalization of the corporation. Later, each contributed another $ 15,000.

"OPCN developed Network Health Plan (Network). Subscribers to the plan pay a fixed fee for full health care services to be provided by the hospitals, physicians and other service providers designated as Network providers. The Network providers continued **[***7]** to sell health care services to patients not enrolled in Network. The plan is marketed by BCBSO in the Portland area only. [4]

[431]** "All Network providers are required to participate in a utilization review and quality assurance program, designed to monitor the quality of service and to eliminate the use of needless services, and thereby to control costs and to reduce the price of medical care to consumers. Providers must also accept a discounted fee for the services they render, in order to create a 'risk pool,' [5] and must agree to refer patients covered by the plan only to Network providers.

[*8]**

---

[2] "In 1973, Congress enacted the Health Maintenance Organization Act, *42 USC § 300(e)*, to facilitate the formation and operation of HMOs by making federal financial assistance available and preempting state laws that interfered with their operation. Congress specifically authorized 'closed panel' HMOs.

[3] "Plaintiffs concede that the HMO was formed in an effort to reduce premiums for prepaid health insurance and to compete with Kaiser.

[4] "In early 1986, in order to satisfy federal requirements, the owners of OPCN other than BCBSO, including Good Samaritan and Northwest Physicians Association, formed a new joint venture called Northwest Health, Inc. Defendants concede that, if Good Samaritan and Northwest Physicians Association are enjoined from participating in a closed panel HMO, they would also be barred from participation in Northwest Health, Inc.

[5] "The providers accept 80 percent of their normal fee as payment at the time of the service. The remaining 20 percent is placed in the risk pool. If the providers are successful in controlling excess utilization, all or part of the risk pool is distributed to them at the end of the fiscal year. If they are not successful, distribution is minimal or nonexistent. Under the Administrative Services Agreement between OPCN and BCBSO, BCBSO provides 'stop loss' coverage to OPCN, which is triggered when claims exceed an agreed percentage of collected premiums. For the segment of services that the stop loss covers, coverage is unlimited. Losses that the stop loss does not cover become OPCN's operating deficit. We find that, through their contribution of capital and participation in the risk pool, the providers were genuinely 'at risk.'" *97 Or App at 76-81*. (Some footnotes omitted.)

"Dr. John Santa, Medical Director of Network, testified that OPCN is a 'closed panel' HMO. Subscribers must seek services from providers in the plan, except in the case of an emergency. Agreements between physician providers and the three independent practice associations provide:

> 'If Physician determines that a Beneficiary requires services not customarily provided by Physician, including without limitation physician services, services of other health care professionals, in-patient hospital services, ancillary hospital services, and laboratory services, Physician will, to the extent possible consistent with good medical practice and patient care, refer, admit or direct the beneficiary to other Program Participants in order to maintain the integrity of the Program and further the interests of NETWORK and the Beneficiary in securing health care services for the Beneficiary in a cost-effective manner. Physician will obtain the consent of the Medical director of NETWORK prior to making any non-emergency referrals to non-Program Participants.'

"Santa testified that the reasons for limiting the number of **[*77]** providers available under the plan are to enable the HMO to control **[***9]** the quality of service, to keep the plan manageable in size and to ensure that all providers are at risk, but not at too much risk. OPCN chose to use the laboratory and radiology services of plan members Good Samaritan and Portland Adventist Hospitals. It also 'locked-in' the services of one radiologist, several anesthesiologists, mental health services, vision services and a durable medical equipment supplier.

"Clinical laboratories are regulated by ORS ch 438 and may accept referrals only from a licensed physician or other persons authorized by law. There are many independent laboratories and hospitals in the Portland metropolitan area competing for physicians' laboratory referrals. Plaintiff Northwest Medical Laboratories is located two blocks from Good Samaritan Hospital.

"Radiologists also depend on physician referrals. Clinics compete on the basis of quality of service. Local hospitals also market radiology services to physicians' offices. Plaintiff East Portland X-Ray Clinic is located six blocks from Portland Adventist Medical Center.

"Both Northwest Medical Laboratories and East Portland X-Ray sought to become providers for the plan, but OPCN rejected them because **[***10]** of its decision to rely on member hospitals for those services. Until January 1, 1986, however, OPCN reimbursed plaintiffs for services provided to Network subscribers on referrals from member doctors. After that date, it refused to reimburse them. Plaintiffs claim that they have lost significant revenue as a result of this 'lock-in' of radiological and laboratory services.

"The plan competes in at least three market categories in the Portland metropolitan area. Network physician providers make up approximately 16.5 to 18.5 percent of all physicians practicing. The hospital providers represent approximately 24 percent of the hospital market. * * * Subscribers to the plan comprise approximately 2.1 percent of the insured population of Portland and 5 percent of those participating in HMOs in that area. * * *

"Plaintiffs contend that OPCN's 'lock-in' of laboratory and radiology services violates Oregon's ***antitrust law***, specifically *ORS 646.725*, which prohibits all contracts or combinations 'in restraint of trade or commerce * * *.' Their only argument on appeal and, therefore, the **[**432]** only one that we consider, is that the arrangement constitutes a refusal to deal that falls within **[***11]** the statutory prohibition. That refusal is in restraint of trade, plaintiffs contend, because it disturbs the **[*78]** 'normal dynamics of the market' by requiring doctors who would ordinarily refer their patients to plaintiffs to refer them to plan providers only. Plaintiffs claim that they have been damaged by the loss of revenue.

"Theodore Tosterud, the president and primary shareholder of Northwest Medical Laboratories, testified:

> 'Q: * * * Can you explain to the court how your business has been threatened with injury as a result of the lock-in?
>
> 'A: If physicians in the Northwest area that we're doing business with are physicians that are involved in the Network Health Plan, and before Network Health Plan we were receiving all the physicians' work from these doctors, now we do not receive all their work. They must split it up. The portion that is Network patients goes to the Network provider and the other part of their work goes to Northwest Medical Laboratories.

'Q: All right. Now, so it's clear, you aren't claiming that all the doctors who signed up for Network were formerly your accounts?

'A: Not all of them, no.

'Q: But of the ones that were your accounts and signed **[***12]** up for Network, you have lost that portion of your business?

'A: I have lost that portion of that business that they drew with the Network Health Plan.

'Q: And those same doctors continue to send you business on your other non-Network people?

'A: That's correct.'

"Tosterud testified, additionally, that Northwest Medical Laboratories continues to receive a large number of referrals of clients insured by BCBSO under other plans, accounting for approximately 10 percent of its gross revenue. It also continues to receive a significant number of referrals of non-Network patients from doctors who are Network providers.

"Gerald Warnock testified on behalf of plaintiff East Portland X-Ray Clinic. He is on the staff of both Portland Adventist Hospital and Good Samaritan Hospital. His clinic participates in every pre-paid health care plan available to it. It applied to become a provider for Network, but OPCN rejected it. Warnock estimates that East Portland X-Ray lost gross revenue of $ 100,000 in 1986 as a result of being locked **[*79]** out of Network. That clinic's gross revenue in 1986 was approximately $ 4,000,000. It continues to receive significant revenues from BCBSO under **[***13]** its non-Network plans and participates in other closed-panel plans in which it is 'locked-in' as the provider of radiology services.

" *2 In 1973*, Congress enacted the Health Maintenance Organization Act, *42 U.S.C. § 300(e)*, to facilitate the formation and operation of HMOs by making federal financial assistance available and preempting state laws that interfered with their operation. Congress specifically authorized 'closed panel' HMOs.

"3 Plaintiffs concede that the HMO was formed in an effort to reduce premiums for prepaid health insurance and to compete with Kaiser.

"4 In early 1986, in order to satisfy federal requirements, the owners of OPCN other than BCBSO, including Good Samaritan and Northwest Physicians Association, formed a new joint venture called Northwest Health, Inc. Defendants condede that, if Good Samaritan and Northwest Physicians Association are enjoined from participating in a closed panel HMO, they would be barred from participation in Northwest Health, Inc.

"5 The providers accept 80 percent of their normal fee as payment at the time of the service. The remaining 20 percent is placed in the risl pool. If the providers are successful in controlling excess utilization, all or part of the risk pool is distributed to them at the end of the fiscal year. If they are not successful, distribution is minimal or nonexistent. Under the Administrative Services Agreement between OPCN and BCBSO, BCBSO provides 'stop loss' coverage to OPCN, which is triggered when claims exceed an agreed percentage of collected premiums. For the segment of services that the stop loss covers, coverage is unlimited. Losses that the stop loss does not cover become OPCN's operating deficit. We find that, through their contribution of capital and participation in the **[**433]** risk pool, the providers were genuinely 'at risk.'"

97 Or. App. at 76-81. (Some footnotes omitted.)

II. THE APPLICABLE RULES

In this section of the opinion we will briefly discuss the development of what has come to be known as two rules of Sherman Act antitrust federal law, the "rule of reason" and the "*per se* rule." We will then state our interpretation of the **[*80]** *per se* rule under *ORS 646.725* in a refusal-to-deal context. In parts B and C of section III, *post,* we will apply the *per se* rule and the rule of reason to the facts of this case.

There are no reported Oregon cases applying *ORS 646.725* in a context similar to the facts at issue. The reported Oregon cases interpreting *ORS 646.725* are *King City Realty v. Sunpace, 291 Or 573, 633 P2d 784 (1981)*, and *Golden West Insulation v. Stardust Investment Co., 47 Or App 493, 615 P2d 1048 (1980)*. Both cases concern "tying" arrangements.

HN2[] *ORS 646.715(2)* provides in part:

> "The decisions of federal courts in construction of federal law relating to the same subject shall be persuasive authority in the construction **[***14]** of ORS [646.725]."

HN3[] Read literally, *ORS 646.725* and section 1 of the Sherman Act prohibit every agreement in "restraint of trade." The Supreme Court of the United States recognized early that such an interpretation would overly fetter freedom of contract without resulting in more active competition in the market involved. In *Standard Oil Co. v. United States, 221 U.S. 1, 60, 31 S Ct 502, 55 L Ed 619 (1911)*, the Supreme Court advanced the rule-of-reason standard by construing the Act to prohibit only contracts in *unreasonable* restraint of trade. Under the rule of reason, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S Ct 2549, 53 L Ed 2d 568 (1977)*.

In order to simplify the process of determining whether certain practices unreasonably restrain trade, the Supreme Court developed ***HN4***[] a *per se* rule of illegality. Under this rule, a practice that facially has the likelihood of predominantly anticompetitive **[***15]** effects (that is, would always or almost always restrict competition without any offsetting market efficiencies) is illegal *per se. See Northwest Stationers v. Pacific Stationery, 472 U.S. 284, 289-90, 105 S Ct 2613, 86 L Ed 2d 202 (1985)*. The "*per se* approach permits categorical judgments with respect to certain business practices that have proved to be predominantly anticompetitive. Courts can thereby avoid the 'significant costs' in 'business certainty and litigation efficiency' that a full-fledged rule-of-reason inquiry **[*81]** entails." *Id., 472 U.S. at 289* (quoting *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 343-44, 102 S Ct 2466, 73 L Ed 2d 48 (1982))*.

In *Northwest Stationers,* the Supreme Court refined the *per se* rule as applied to a refusal to deal where the defendant expelled plaintiff from a joint buying cooperative. In that case the Court held that a plaintiff, who asserted that expulsion from a joint buying cooperative is illegal *per se,* must present a threshold case that the cooperative possesses market **[***16]** power or unique access to a business element necessary for effective competition. *472 U.S. at 298*.

In light of *ORS 646.715(2)* -- which requires that we look to federal case law -- and after reviewing federal case law, we interpret *ORS 646.725* as follows: ***HN5***[] A challenged practice violates *ORS 646.725* only if the practice constitutes an *unreasonable* restraint of trade. The rule of reason is the appropriate analysis unless the practice is illegal *per se.* A *per se* violation is unreasonable as a matter of law. In a refusal-to-deal context, a plaintiff seeking application of the *per se* rule must present a threshold case that a defendant who possesses market power or unique access to a business element necessary for effective competition has refused to deal. If the **[**434]** plaintiff meets this threshold showing, the defendant can avoid judgment under the *per se* rule by establishing that the practice is justified by plausible arguments that it was intended to enhance overall efficiency and make markets more competitive. [2]

---

[2] Then Professor and later Judge Robert Bork has commented on the procedural implications of the *per se* rule:

> "Suppose that the government brings suit charging defendants with agreeing to an illegal division of markets. The first step is to determine whether the facts and contentions of the parties properly bring the case within the ambit of the per se rule. If a per se violation seems proven either by the pleadings or at any stage during the trial, the court should announce that fact.

[*17] [*82] III. ANALYSIS**

A. The Joint Venture Issue

We first dispose of a preliminary issue. Relying on language from *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 102 S Ct 2466, 73 L Ed 2d 48 (1982)*, defendants argue that we need not engage in any antitrust analysis because they have formed a "true joint venture." They maintain that they are a single firm competing with others in the market and have complete freedom to choose those with whom they will deal.

In *Maricopa,* the State of Arizona brought an antitrust action against two foundations that had established schedules of maximum fees that participating doctors would accept as payment in full for services performed for patients insured under plans approved by the foundations. The Court held that the maximum-fee agreements were *per se* unlawful under section 1 of the Sherman Act. Defendants here rely on the following statement:

> "The foundations are not analogous to partnerships or other joint arrangements in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit. In such joint **[***18]** ventures, the partnership is regarded as a single firm competing with other sellers in the market. The agreement under attack is an agreement among hundreds of competing doctors concerning the price at which each will offer his own services to a substantial number of consumers." *457 U.S. at 356-57*.

Even if defendants have formed ***HN6***[] a "true joint venture," they do not automatically escape antitrust laws. We do not read *Maricopa* to hold that a true "joint venture is *ipso facto* free from antitrust scrutiny." [3] **[***19]** Some of the most significant **[*83]** antitrust **[**435]** cases have held joint ventures to be culpable. [4] In determining whether defendants' actions have violated *ORS 646.725*, we look at substance, not form. We turn, therefore, to a discussion of plaintiffs' claims.

> At this point the defendants could avoid judgment against themselves and obtain an opportunity to go on with the trial only by making an acceptable offer to prove that the market division was ancillary. This would require an offer to prove a contract integration (unless that were conceded) and, in any case, the statement of an economically plausible theory which, if borne out by the evidence the defendants offer to adduce, would show their agreement to have a substantial capacity for increasing the efficiency of the integration. * * * [T]he economics involved in judging the plausibility of defendants' theory, and thus the acceptability of their offer of proof, are not overly complex and are suitable for judicial use in the litigation process. Many trials will end at this point with a decision that defendants have not offered a plausible theory of efficiency." Bork, *The Rule of Reason and the Per Se Concept: Price Fixing and Market Division* (Part II), 75 Yale L J 373, 388-89 (1966).

[3] In context, the Court of Appeals correctly reasoned:

> "The language quoted from *Arizona v. Maricopa County Medical Society, supra,* addresses the question of why the Court considered the arrangement there to involve more than 'literal price fixing.' Here, there is no contention that price fixing is involved. The only claimed violation is a refusal to deal. The Court's discussion in *Maricopa,* therefore, is not directly applicable. Additionally, read in the context of the Supreme Court's entire opinion, the quoted language only suggests that, if the arrangement in *Maricopa* had involved some greater level of integration between the foundations and the insurance providers, it could have been saved from *per se* illegality. It does not suggest, and we do not read it to hold, that an arrangement that constitutes a joint venture is *ipso facto* free from antitrust scrutiny. Firms that are genuinely joined together for the accomplishment of some business purpose are capable of acting concertedly and anti-competitively through a refusal to deal. We hold that, as a general proposition, although the extent of integration among firms engaged in a common enterprise may be relevant to the question of whether the arrangement should be treated as an illegal combination *per se,* characterizing an agreement as a 'joint venture' says nothing about the effect of the arrangement on competition and does not mean that the entity is free from antitrust scrutiny." *97 Or App at 85*. (Some citations omitted.)

[4] *See, e.g., United States v. Sealy, Inc., 388 U.S. 350, 87 S Ct 1847, 18 L Ed 2d 1238 (1967)*.

B. *Per se* Analysis

Plaintiffs argue that the agreements between the Network providers to not refer laboratory and radiology services to plaintiffs constitute a group boycott (a refusal to deal) and on their face are a *per se* violation of *ORS 646.725*.

Northwest Stationers v. Pacific Stationery, 472 U.S. 284, 105 S Ct 2613, 86 L Ed 2d 202 (1985), is instructive concerning the application of the *per se* rule in a refusal-to-deal context. In that case, the defendant was a wholesale purchasing cooperative whose membership consisted of office supply retailers. The defendant expelled the plaintiff from membership. Thereafter, the plaintiff brought suit alleging that the expulsion without procedural protection was a group boycott that limited its ability to compete and should be considered *per se* violative of section 1 of the Sherman Act.

The Court stated that "'[g]roup boycotts' are often listed among **[***20]** the classes of economic activity that merit *per se* invalidation under § 1[, but] [e]xactly what types of activity fall within the forbidden category is * * * far from certain." *472 U.S. at 293-94*. (Citations omitted.) Accordingly, the Court took "[s]ome care * * * in defining the category of concerted refusals to deal that mandate *per se* condemnation." *472 U.S. at 294*. The Court summarized its treatment of refusal-to-deal cases under the *per se* rule:

> "Cases to which this Court has applied the *per se* approach have generally involved joint efforts by a firm or firms to **[*84]** disadvantage competitors by 'either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle.' In these cases, the boycott often cut off access to a supply, facility, or market necessary to enable the boycotted firm to compete, and frequently the boycotting firms possessed a dominant position in the relevant market. In addition, the practices were generally not justified by plausible arguments that they were intended to enhance **[***21]** overall efficiency and make markets more competitive. Under such circumstances the likelihood of anticompetitive effects is clear and the possibility of countervailing procompetitive effects is remote.
>
> "Although a concerted refusal to deal need not necessarily possess all of these traits to merit *per se* treatment, not every cooperative activity involving a restraint or exclusion will share with the *per se* forbidden boycotts the likelihood of predominantly anticompetitive consequences." *472 U.S. at 294-95*. (Citations omitted.)

Turning to the facts of that case, the Court identified several efficiency-enhancing characteristics of wholesale purchasing cooperatives in general and found efficiencies more directly related to the defendant's expulsion of the plaintiff from the cooperative:

> "Wholesale purchasing cooperatives such as [defendant] are not a form of concerted activity characteristically likely to result in predominantly anticompetitive effects. Rather, such cooperative arrangements would seem to be 'designed to increase economic efficiency and render markets more, rather than less, competitive.' *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., [441 U.S. 1, 20, 99 S Ct 1551, 60 L Ed 2d 1 (1979)]*. **[***22]** The arrangement permits the participating retailers to achieve economies of scale in both the purchase and warehousing of wholesale supplies, and also ensures ready access to a stock of goods that might otherwise **[**436]** be unavailable on short notice. The cost savings and order-filling guarantees enable smaller retailers to reduce prices and maintain their retail stock so as to compete more effectively with larger retailers.
>
> "[Plaintiff], of course does not object to the existence of the cooperative arrangement, but rather raises an antitrust challenge to [defendant's] decision to bar [plaintiff] from continued membership. It is therefore the action of expulsion that must be evaluated to determine whether *per se* treatment **[*85]** is appropriate. The act of expulsion from a wholesale cooperative does not necessarily imply anticompetitive animus and thereby raise a probability of anticompetitive effect. *See Broadcast Music, Inc. v. Columbia Broadcasting System, Inc.,* [*supra,* 441 U.S.] at 9. Wholesale purchasing cooperatives must establish and enforce reasonable rules in order to function efficiently. Disclosure rules, such as the **[***23]** one on which [defendant] relies, may well provide the cooperative with a needed means for monitoring the creditworthiness of its members. Nor would the expulsion characteristically be likely to result in predominantly anticompetitive effects, at least in the type of

> situation this case presents. Unless the cooperative possesses market power or exclusive access to an element essential to effective competition, the conclusion that expulsion is virtually always likely to have an anticompetitive effect is not warranted." *Northwest Stationers v. Pacific Stationery, supra, 472 U.S. at 295-96*. (Footnotes and some citations omitted.)

In holding that the defendant's expulsion of the plaintiff did not fall within the category of activity that is, as a matter of law, anticompetitive so as to mandate *per se* invalidation under section 1 of the Sherman Act, the Court stated:

> "A plaintiff seeking application of the *per se* rule must present a threshold case that the challenged activity falls into a category likely to have predominantly anticompetitive effects. The mere allegation of a concerted refusal to deal does not suffice because **[***24]** not all concerted refusals to deal are predominantly anticompetitive. When the plaintiff challenges expulsion from a joint buying cooperative, some showing must be made that the cooperative possesses market power or unique access to a business element necessary for effective competition." *472 U.S. at 298*.

We interpret *Northwest Stationers* to stand for the proposition that ***HN7***[] a plaintiff seeking application of the *per se* rule to an alleged concerted refusal to deal must present a threshold case that a defendant who possesses market power or unique access to a business element necessary for effective competition has refused to deal. The logical extension of *Northwest Stationers* is that if the plaintiff meets this threshold showing, the defendant must establish that the practice is justified by plausible arguments that it was intended to enhance overall efficiency and make markets more competitive.

[*86] We realize that the above approach may blur the distinction between the *per se* and rule-of-reason approaches. The Supreme Court of the United States, however, has recognized that "***HN8***[] there is often no bright line separating **[***25]** *per se* from Rule of Reason analysis." *NCAA v. Board of Regents of Univ. of Okla., 468 U.S. 85, 104 n 26, 104 S Ct 2948, 82 L Ed 2d 70 (1984)*. These two approaches, however, may be distinguished by the depth of inquiry. *See Polk Bros., Inc. v. Forest City Enterprises, Inc., 776 F2d 185, 189 (7th Cir 1985)*.

Turning to the facts at bar, we must first identify the relevant market. In this case, it is the laboratory and radiology markets. The relevant geographic market is the Portland metropolitan area, the only area in which BCBSO offers Network.

Plaintiffs have failed to present a threshold case that defendants possess -- through the arrangements between Network and other providers -- market power or unique access to a business element necessary for effective competition in the medical laboratory and radiology markets. **[**437]** With respect to market power, there is no evidence concerning the percentage of laboratory and radiology markets that defendants occupy. There is also no evidence by direct inference. The only available evidence is that subscribers to Network comprise only approximately 2.1 percent of the total **[***26]** market for health insurance in Portland.

Concerning unique access to a business element necessary for effective competition, the facts show that plaintiffs are effectively competing in the laboratory and radiology markets. We find that Northwest Medical Laboratories receives a large number of referrals of clients insured by BCBSO under other plans, which accounts for approximately 10 percent of its gross revenue. Furthermore, doctors who are Network providers continue to refer a significant number of non-Network patients to that laboratory. We also find that East Portland X-Ray's 1986 gross revenue was approximately $ 4,000,000, reflecting a Network lock-out loss of $ 100,000. East Portland also continues to receive significant revenues from BCBSO under non-Network plans. Additionally, East Portland is the "locked-in" provider of radiology services in other closed-panel plans. Under these facts, it is clear that plaintiffs' ability to compete is not dependent upon their ability to become Network providers.

[*87] In sum, plaintiffs have failed to make the required threshold showing that defendants' actions are illegal *per se.* We therefore turn to the generally applicable **[***27]** rule of reason.

C. Rule-of-Reason Analysis

HN9[] Application of the rule of reason to the instant facts is not a difficult task. The basic inquiry is whether the restraint in question "is one that promotes competition or one that suppresses competition." *National Soc. of Professional Engineers v. U.S., 435 U.S. 679, 691, 98 S Ct 1355, 55 L Ed 2d 637 (1978)*. Plaintiffs have failed to show that the refusal to deal has injured competition in any way. The fact that these particular plaintiffs may have lost business does not demonstrate any injury to competition.

In contrast to the absence of anticompetitive impact, there was evidence of the procompetitive impact of defendants' conduct. The evidence shows that one of the central concepts behind the formation of Network was the use of a limited panel of providers in order to control utilization while ensuring that quality remained high. As stated in the abovementioned facts, "[a]ll Network providers are required to participate in a utilization review and quality assurance program, designed to monitor the quality of service and to eliminate the use of needless services, and thereby to control **[***28]** costs and to reduce the price of medical care to consumers." Dr. John Santa, Medical Director for Network, testified about the efficiencies that result from a health plan's use of a limited panel of providers in conjunction with a risk-pool feature. Dr. Santa also testified that it was important to limit the number of providers on the panel in order to make utilization controls work. He contrasted Network with an earlier plan that had "basically taken * * * virtually all providers in the Portland Metro area and they had some very significant problems." We accept this testimony as a portrayal of accurate historical fact.

In addition, defendants' share of the health insurance market is so small that any overall anticompetitive effect is questionable.

In short, defendants have employed procompetitive concepts to create an entity that competes in the laboratory and radiology markets. *HN10*[] It was plaintiffs' burden to prove that defendants' conduct was anticompetitive, and plaintiffs have **[*88]** not done so. Accordingly, plaintiffs have failed to establish a rule-of-reason claim under *ORS 646.725*. *Cf.* *Seaboard Supply Co. v. Congoleum Corp., 770 F2d 367, 375 (3d Cir 1985)*. **[***29]** [5]

[*30]** **[**438]** The decision of the Court of Appeals and the judgment of the circuit court are affirmed.

End of Document

---

[5] In that case, plaintiff Seaboard, a long-standing wholesale distributor of Congoleum products, brought suit against Congoleum and a new commissioned sales agent alleging, *inter alia,* that defendants had conspired to boycott Seaboard. The court stated:

> "The district court also found that Seaboard had failed to present evidence which would establish anti-competitive effect and therefore could not prevail on a rule of reason analysis. Plaintiff produced evidence only of its own decrease in sales of Congoleum products. The defendants' evidence showed, however, that intrabrand competition increased and, by using a sales agent, Congoleum was able to reduce its market prices and compete more effectively with other manufacturers. In this situation we must not overlook the Supreme Court's admonition in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S Ct 690, 50 L Ed 2d 701 (1977)*, 'The antitrust laws, however, were enacted for "the protection of *competition, not competitors*."' We noted earlier the absence of evidence tending to show an anti-competitive effect. On this record, the district court did not err in finding that plaintiff had failed to present a rule of reason claim under section 1 of the Sherman Act." (Emphasis in original; footnote omitted.)

HN2[] **Robinson-Patman Act, Claims**

There may be a Robinson-Patman Act (Act), 15 U.S.C.S. § 13, violation even if favored and disfavored buyers do not compete, so long as the customers of a favored buyer compete with a disfavored buyer or its customers. A § 13(a) violation may occur if (1) a discount received is not cost-based and (2) all or a portion of it is passed on by them to customers of theirs. To hold that price discrimination between a wholesaler and a retailer could never violate the Act would leave immune from antitrust scrutiny a discriminatory pricing procedure that can effectively serve to harm competition. Such a result would be contrary to the objectives of the Act.

HN4[] Defenses, Cost Justification Defense

The Robinson-Patman Act, 15 U.S.C.S. § 13, contains no express reference to functional discounts. It does contain two affirmative defenses that provide protection for two categories of discounts, those that are justified by savings in a seller's cost of manufacture, delivery or sale, and those that represent a good faith response to equally low prices of a competitor.

HN7[] **Price Discrimination, Defenses**

A discrimination is more than a mere difference. Underlying the meaning of the word is the idea that some relationship exists between parties to the discrimination which entitles them to equal treatment, whereby the difference granted to one casts some burden or disadvantage upon the other. If two are competing in the resale of the goods concerned, that relationship exists. Where, also, a price to one is so low as to involve a sacrifice of some part of a seller's necessary costs and profit as applied to that business, it leaves that deficit inevitably to be made up in higher prices to his other customers; and there, too, a relationship may exist upon which to base the charge of discrimination. Where no such relationship exists, where goods are sold in different markets and the conditions affecting those markets set different price levels for them, a sale to different customers at those different prices would not constitute a discrimination within the meaning of *15 U.S.C.S. § 13*.

HN8[] **Robinson-Patman Act, Claims**

A price discrimination within the meaning of *15 U.S.C.S. § 13* is merely a price difference. *Section 13* itself spells out the conditions which make a price difference illegal or legal, Were a court to read other conditions into the law by means of the nondirective phrase "discriminate in price," it would derange the integrated statutory scheme. Not only would such action be contrary to the meaning of the statute, but, perhaps because of this, it would be thoroughly undesirable. Inevitably every legal controversy over any price difference would shift from the detailed governing provisions, "injury," cost justification, and "meeting competition," over into the "discrimination" concept of ad hoc resolution divorced from specifically pertinent statutory text.

HN10[] **Price Discrimination, Defenses**

Suppliers granting functional discounts either to single-function or to integrated buyers should not be held responsible for any consequences of their customers' pricing tactics. Price cutting at the resale level is not in fact, and should not be held in law, "the effect of" a differential that merely accords due recognition and reimbursement for actual marketing functions. The price cutting of a customer who receives this type of differential results from his own independent decision to lower price and operate at a lower profit margin per unit. The legality or illegality of this price cutting must be judged by the usual legal tests. In any event, consequent injury or lack of injury should not be a supplier's legal concern. On the other hand, the law should tolerate no subterfuge. A distributor should be eligible for a discount corresponding to any part of the function he actually performs on that part of the goods for which he performs it under *15 U.S.C.S. § 13*.

HN11[] **Robinson-Patman Act, Claims**

A supplier need not satisfy the rigorous requirements of a cost justification defense in order to prove that a particular functional discount is reasonable and accordingly did not cause any substantial lessening of competition between a wholesaler's customers and a supplier's direct customers. To establish the defense a seller must show that the price reductions given did not exceed actual cost savings and this requirement of exactitude is ill-suited to the defense of discounts set by reference to legitimate, but less precisely measured, market factors. Discounters will therefore likely find it more useful to defend against claims under the Robinson-Patman Act, *15 U.S.C.S. § 13*, by negating the causation element in a case against them: a legitimate functional discount will not cause any substantial lessening of competition.

HN12[] **Defenses, Cost Justification Defense**

Conceived as a vehicle for allowing differential pricing to reward distributive efficiencies among customers operating at the same level, a cost justification defense focuses on narrowly defined savings to a seller derived from the different method or quantities in which goods are sold or delivered to different buyers. Moreover, the burden of proof as to a cost justification defense is on a seller charged with violating the Robinson-Patman Act, *15 U.S.C.S. § 13*, whereas the burden of proof remains with an enforcement agency or plaintiff in circumstances involving functional discounts since functional pricing negates the probability of competitive injury, an element of a prima facie case of violation.

Antitrust & Trade Law > ... > Price Discrimination > Defenses > General Overview

HN16[] **Price Discrimination, Buyer Liability**

The competitive injury component of a Robinson-Patman Act (Act), *15 U.S.C.S. § 13*, violation is not limited to an injury to competition between a favored and a disfavored purchaser; it also encompasses an injury to competition between their customers. Act language, which specifically encompasses not only the adverse effect of price discrimination on persons who either grant or knowingly receive the benefit of such discrimination, but also on customers of either of them. Such indirect competitive effects surely may not be presumed automatically in every functional discount setting, and, indeed, one would expect that most functional discounts will be legitimate discounts which do not cause harm to competition. At the least, a functional discount that constitutes a reasonable reimbursement for purchasers' actual marketing functions will not violate the Act.

HN17[] **Robinson-Patman Act, Claims**

A plaintiff may not recover damages merely by showing a violation of the Robinson-Patman Act, *15 U.S.C.S. § 13*; rather, a plaintiff must also make some showing of actual injury attributable to something the antitrust laws were designed to prevent. However, antitrust plaintiffs are excused from an unduly rigorous standard of proving antitrust injury.

Decision

Gasoline supplier's discounts to two distributors held not legitimate functional discounts, and thus held to violate 2(a) of Clayton Act, as amended by Robinson-Patman Act (*15 USCS 13(a)*).

Summary

In general, a supplier's functional discount is said to be a discount given to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier. A particular supplier (1) sold gasoline directly to independent retailers in Spokane, Washington at the supplier's retail tank wagon prices, and (2) granted substantial discounts to two distributors which (a) engaged in retail operations as well, and (b) increased their sales volume. Several independent retailers whose sales had suffered a decline filed an action against the supplier in the United States District Court for the Eastern District of Washington and alleged that the supplier's distributor discounts violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), which makes it unlawful to discriminate in price between different purchasers, where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. The supplier, however, contended that it had granted the distributors legitimate functional discounts, which did not violate the Act. After the case had been remanded once for a new trial, the jury in the second trial returned a verdict in favor of the independent retailers. The District Court denied the supplier's motion for judgment notwithstanding the verdict and, in an opinion supplementing the court's oral ruling denying the supplier's motion for a directed verdict, expressed the view that any presumed legality of functional discounts had been rebutted by evidence that the amount of the discounts to the distributors was not related to the cost of any function that the distributors performed (*634 F Supp 34*). On appeal, the United States Court of Appeals for the Ninth Circuit, in affirming, expressed the view that the independent retailers had presented ample evidence to demonstrate that the services performed by the distributors were insubstantial and did not justify the functional discounts (initial opinion at *830 F2d 1513*, amended opinion at *842 F2d 1034*).

On certiorari, the United States Supreme Court affirmed. In an opinion by Stevens, J., joined by Rehnquist, Ch. J., and Brennan, Marshall, Blackmun, and O'Connor, JJ., it was held that, although a legitimate functional discount constituting a reasonable reimbursement for a purchaser's actual marketing functions does not violate 2(a), the record in the case at hand adequately supported a finding that the supplier's distributor discounts were not legitimate functional discounts, and thus violated 2(a), where there was evidence that (1) one distributor was separately compensated for its hauling function; (2) neither distributor maintained any significant storage facilities;

(3) both distributors received the full discount on all their purchases even though most of their volume was resold directly to consumers; (4) the extra margin on such sales enabled the distributors to price aggressively in both their retail and wholesale marketing; (5) the supplier was fully informed about the persistent and marketwide consequences of its own pricing activity; (6) the supplier's own executives recognized that the dramatic impact on the market was almost entirely attributable to the magnitude of the distributor discounts and the hauling allowance; and (7) at the same time that the supplier was affirmatively encouraging one distributor to expand its retail business and integrate downward, and was providing the distributor with a generous discount useful to such integration, the supplier was inhibiting upward integration by the independent retailers by refusing permission to two of the independent retailers to haul their own fuel using their own tank wagons.

White, J., concurring in the result, expressed the view that (1) in the absence of congressional attention to the longstanding issue as to whether legitimate functional discounts violated 2(a), he would await a case challenging a functional discount ruling by the Federal Trade Commission (FTC), at which time the Supreme Court would be reviewing a construction of the Act by the FTC and the FTC's explanation of legitimate functional discount pricing; but (2) the case at hand was a private action for treble damages in which the Supreme Court ruled against the seller-discounter, since under no definition of a legitimate functional discount did the discounts extended in the case at hand qualify as a defense to a charge of price discrimination.

Scalia, J., joined by Kennedy, J., concurring in the judgment, expressed the view that (1) while he agreed with the court that none of the arguments pressed by the supplier for removing the supplier's conduct from the coverage of the Robinson-Patman Act was persuasive, he could not adopt the court's reasoning, which seemed to create an exemption for functional discounts that are "reasonable" even though prohibited by the text of the Act; and (2) although there might be a plausible argument that a functional basis for differential pricing would negate the possibility of competitive injury in a market that was really functionally divided, the merits of that argument ought not to be decided by the Supreme Court in the first instance, as the argument (a) had not been not raised by the parties before the court or below, and (b) called forth a number of issues that would benefit from briefing and factual development.

LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]***LEdHN[1D]***[] [1D]***LEdHN[1E]***[] [1E]***LEdHN[1F]***[] [1F]***LEdHN[1G]***[] [1G]

In a suit by several independent retailers against a supplier which sold gasoline both to the independent retailers and to two distributors which engaged in retail operations as well, the record adequately supports the finding that the supplier's discounts to the distributors were not legitimate functional discounts, and thus violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*)--which makes it unlawful to discriminate in price between purchasers, where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them--where there is evidence that (1) one distributor was separately compensated for its hauling function; (2) neither distributor maintained any significant storage facilities; (3) both distributors received the full discount on all their purchases even though most of their volume was resold directly to consumers; (4) the extra margin on such sales enabled the distributors to price aggressively in both their retail and wholesale marketing; (5) the supplier was fully informed about the persistent and marketwide consequences of its own pricing activity; (6) the supplier's own executives recognized that the dramatic impact on the market was almost entirely attributable to the magnitude of the distributor discounts and the hauling allowance; and (7) at the same time that the supplier was affirmatively encouraging one distributor to expand its retail business and integrate downward, and was providing the distributor with a generous discount useful to such integration, the supplier was inhibiting upward integration by the independent retailers by refusing permission to two of the independent retailers to haul their own fuel using their own tank wagons.

APPEAL §1326 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §38 > discounts -- price discrimination -- defenses -- what reviewable -- denial of motion for judgment notwithstanding verdict -- > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]***LEdHN[2C]***[] [2C]

With respect to 2 of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13*), even though the price-discrimination prohibition in 2(a) (*15 USCS 13(a)*) contains no express reference to functional discounts, two affirmative defenses provide protection for two categories of discounts--those discounts that (1) under 2(a), are justified by savings in the supplier's cost of manufacture, delivery, or sale, or (2) under 2(b) (*15 USCS 13(b)*), represent a good-faith response to the equally low prices of a competitor; with respect to a claim by several independent retailers in a Federal District Court suit that a gasoline supplier's discounts to two distributors violated 2(a), however, neither of those two defenses is available to the supplier as the case comes to the United States Supreme Court on certiorari--even though the supplier contended in the District Court that the special prices to the distributors were justified by cost savings, were a good-faith effort to meet competition, and were "legitimate functional discounts"--where (1) the District Court withheld the cost-justification defense from the jury on the ground that the cost-justification defense was not supported by the evidence, (2) the jury rejected the other defenses, (3) the supplier's motion for a judgment notwithstanding the verdict, which motion was denied by the District Court, claimed that, as a matter of law, the supplier's functional discounts did not violate 2, and (4) the Supreme Court granted certiorari to consider the supplier's contention that legitimate functional discounts do not violate 2.

APPEAL §1457 > review of jury verdict -- conflicting evidence -- > Headnote:
LEdHN[3][] [3]

On certiorari to review a gasoline supplier's liability to several independent retailers for an alleged violation of 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), the United States Supreme Court, given the jury's general verdict in favor of the independent retailers, will resolve disputed questions of fact in the independent retailers' favor.

DAMAGES §159 > injury to business -- Robinson-Patman Act -- > Headnote:
LEdHN[4][] [4]

In a suit by several independent retailers against a gasoline supplier, which suit is based upon a claim that the supplier's discounts to two distributors constituted price discrimination in violation of 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), it is improper to award damages measured by the difference between (1) the retail tank wagon price at which the supplier sold gasoline directly to the independent retailers, and (2) the price paid by one of the distributors.

EVIDENCE §167 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > STATUTES §82 > price discrimination -- functional discounts -- assumption of legislative intent -- > Headnote:

LEdHN[5A][] [5A]**LEdHN[5B]**[] [5B]**LEdHN[5C]**[] [5C]**LEdHN[5D]**[] [5D]**LEdHN[5E]**[] [5E]**LEdHN[5F]**[] [5F]

Under a definition of a supplier's functional discount as a discount given to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier, there is no blanket exemption for such functional discounts from 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), which makes it unlawful in certain circumstances to "discriminate in price," where the claimed exemption would be based upon the comment by a sponsor of the Act--to the effect that 2(a) price discrimination requires some relationship's existing between the parties to the discrimination which entitles them to equal treatment, whereby the difference granted to one casts some burden or disadvantage upon the other--because such an exemption is foreclosed by the text of 2(a) itself, under which price discrimination is merely a price difference; it is anomalous to assume that Congress intended the term "discriminate" to have such a limited meaning, in the context of a statute that (1) reveals a concern with competitive consequences at different levels of distribution, and (2) carefully defines specific affirmative defenses; there are no overtones of business buccaneering in the 2(a) phrase "discriminate in price"; the statute itself spells out the conditions which make a price difference legal or illegal, and it would derange the statutory scheme to read other conditions into the law by means of the nondirective phrase "discriminate in price," for such action would not only be contrary to the meaning of the statute, but also have undesirable consequences.

EVIDENCE §343.5 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §38 > STATUTES §158.8 > price discrimination -- functional discounts -- presumptions -- > Headnote:
LEdHN[6A][] [6A]**LEdHN[6B]**[] [6B]**LEdHN[6C]**[] [6C]**LEdHN[6D]**[] [6D]**LEdHN[6E]**[] [6E]**LEdHN[6F]**[] [6F]**LEdHN[6G]**[] [6G]**LEdHN[6H]**[] [6H]**LEdHN[6I]**[] [6I]**LEdHN[6J]**[] [6J]**LEdHN[6K]**[] [6K]**LEdHN[6L]**[] [6L]**LEdHN[6M]**[] [6M]**LEdHN[6N]**[] [6N]

At the least--under a definition of a supplier's functional discount as a discount given to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier--a functional discount that constitutes a reasonable reimbursement for the purchaser's actual marketing functions does not violate 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), which makes it unlawful to discriminate in price between purchasers where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them; indirect competitive-injury effects may not be presumed automatically in a functional discount setting, and, when a functional discount is legitimate, an inference of injury to competition--which may otherwise be established by evidence that some purchasers had to pay their supplier substantially more for their goods than their competitors had to pay--will not arise; thus, a legitimate functional discount negates the causation element in the case against a discounter, for such a discount will not cause any substantial lessening of competition; not every functional discount is entitled to a judgment of legitimacy, however, and it will sometimes be possible to produce evidence showing that a particular functional discount caused price discrimination of the sort that 2(a) prohibits; thus, a functional discount that merely accords due recognition and reimbursement for actual marketing functions is not illegal, but 2(a) does not countenance a functional discount completely untethered to either the supplier's savings or the wholesaler's costs; such a construction of 2(a) is supported by (1) the practice of the Federal Trade Commission, which, while permitting legitimate functional discounts, has proceeded against those discounts which have appeared to be subterfuges to avoid 2(a)'s restrictions, and (2) the remarks of commentators who, while disagreeing as to the extent to which functional discounts are allowable, have agreed that, in exceptional cases, what is nominally a functional discount may be unjustifiable 2(a) price discrimination; while many cases may involve discounts made questionable because offered to complex types of distributors whose functions have become scrambled, such a general tendency does not preclude the possibility that a supplier might pursue a price-discrimination strategy despite the absence of any discrete mechanism for allocating favorable price discrepancy between secondary recipients (that is, favored and disfavored buyers) and tertiary recipients (that is, the customers of either of them). (White, Scalia, and Kennedy, JJ., dissented in part from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > STATUTES §145.6 > price discrimination -- functional discounts -- legislative history -- > Headnote:
LEdHN[7A][] [7A]***LEdHN[7B]***[] [7B]***LEdHN[7C]***[] [7C]***LEdHN[7D]***[] [7D]

With respect to a functional discount--that is, a discount given by a supplier to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier--it is appropriate to begin consideration of the legal status of such a discount, under the price-discrimination prohibition in 2 of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13*), by examining the language of 2; while 2(a) of the Act (*15 USCS 13(a)*) contains no express reference to functional discounts, and while the legislative history indicates that earlier drafts to 2 did include a proviso excepting functional discounts, the deletion of the exception (1) has ambiguous significance, and (2) in any event, in no way detracts from the blunt direction of 2(a)'s statutory text, which indicates that any price discrimination substantially lessening competition will expose the discriminator to liability, regardless of whether the discriminator attempts to characterize the pricing scheme as a functional discount.

EVIDENCE §343.5 > burden of proof -- Robinson-Patman Act -- violation -- damages -- > Headnote:
LEdHN[8A][] [8A]***LEdHN[8B]***[] [8B]***LEdHN[8C]***[] [8C]

In an action by several independent retailers against a gasoline supplier, which action is based upon the independent retailers' claim that the supplier's discounts to two distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), the independent retailers, in order to establish a violation of 2(a), have the burden of proving four facts--that (1) the supplier's sales to the distributors were made in interstate commerce, (2) the gasoline sold to the distributors was of the same grade and quantity of that sold to the independent retailers, (3) the supplier discriminated in price as between the distributors on the one hand and the independent retailers on the other, and (4) the discrimination had a prohibited effect on competition; moreover, for each such independent retailer to recover damages, the retailer has the burden of proving the extent of the retailer's actual damages; the independent retailers, however, do not need to show any benefit to the supplier from the price-discrimination scheme in order to establish a violation of 2(a).

EVIDENCE §211.3 > Robinson-Patman Act violation -- functional discounts -- burden of proof -- causation -- > Headnote:
LEdHN[9A][] [9A]***LEdHN[9B]***[] [9B]***LEdHN[9C]***[] [9C]***LEdHN[9D]***[] [9D]***LEdHN[9E]***[] [9E]

With respect to the legal status of a functional discount--that is, a discount given by a supplier to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier--under the price-discrimination prohibition in 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), while a supplier, in theory, could try to defend an allegedly legitimate functional discount by invoking 2(a)'s cost-justification defense, (1) the burden of proof with respect to the defense is on the supplier, and (2) a supplier, in order to establish the defense, must show that the price reductions given did not exceed the actual cost savings--a requirement of exactitude which is ill-suited to the defense of discounts set by reference to legitimate, but less precisely measured, market factors; however, a supplier need not satisfy the rigorous requirements of 2(a)'s cost-justification defense in order to prove that a particular functional discount is reasonable and accordingly did not cause any substantial lessening of the competition between a wholesaler's customers and the supplier's direct customers, for the concept of substantiality (1) permits the causation inquiry to accommodate a notion of economic reasonableness with respect to the pass-through effects of functional discounts, and (2) provides a latitude denied by the cost-justification defense. (White, Scalia, and Kennedy, JJ., dissented in part from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §38 > STATUTES §158.8 > price discrimination -- administrative construction -- functional discounts -- control of resale price -- > Headnote:
LEdHN[10A][] [10A]***LEdHN[10B]***[] [10B]***LEdHN[10C]***[] [10C]***LEdHN[10D]***[] [10D]***LEdHN[10E]***[] [10E]

Although the United States Supreme Court will cite from Federal Trade Commission (FTC) practice to support the Supreme Court's holding that--under a definition of a supplier's functional discount as a discount given to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier--legitimate functional discounts do not violate 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), nothing in the Supreme Court's holding is to be read to condone or approve a result which rests upon a view that, under one FTC case, a supplier is charged with legal responsibility for the middlemen's pricing tactics, and hence (1) must control their resale prices lest they undercut the supplier to the unlawful detriment of the supplier's directly purchasing retailers, or (2) alternatively, may forego operational freedom by matching the supplier's quotations to retailers with the middlemen's; similarly, nothing in the Supreme Court's holding endorses a 2(a) theory so broad as the theory drawn by a commentator from that FTC case, where the theory is based on a flawed analysis which assumed that (1) seller liability for tertiary (that is, customer) implications of wholesaler discounts must follow the logic of the FTC's complaint in the case, and (2) such logic exposed to liability any seller who fails to monitor the resale prices of its wholesaler; also, the Supreme Court will reject the 2(a) requirement of exactitude which might otherwise be inferred from the dictum in another FTC case, which dictum is to the effect that the functional discount offered to a buyer should not exceed the cost of that part of the function that the buyer actually performs on that part of the goods for which the buyer performs the function. (White, Scalia, and Kennedy, JJ., dissented in part from this holding).

APPEAL §1331.5 > what reviewable -- discounts -- > Headnote:
LEdHN[11A][] [11A]***LEdHN[11B]***[] [11B]***LEdHN[11C]***[] [11C]

On certiorari to review a verdict in favor of several independent retailers whose suit was based on a claim that a gasoline supplier's discounts to two distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), the United States Supreme Court need not address the relative merits of two Federal Trade Commission (FTC) decisions in order to resolve the case before the Supreme Court, where the FTC, in the second case, (1) expressly disavowed any dicta from the first case, which dicta suggested that functional discounts were per se legal if justified by the buyer's costs, and (2) held that such discounts were controlled instead by reasoning which referred to the value of the services to the supplier giving the discounts.

APPEAL §1662 > effect of decision on other grounds -- > Headnote:
LEdHN[12A][] [12A]***LEdHN[12B]***[] [12B]

On certiorari to review a Federal Court of Appeals' decision as to liability under 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), the United States Supreme Court need not decide whether the

Federal Government's interpretation, in an amicus brief, of the Court of Appeals' opinion is correct, where the Supreme Court affirms the Court of Appeals' judgment for reasons that do not entail the principles criticized by the Federal Government.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > price discrimination -- distribution links -- discounts -- > Headnote:
LEdHN[13A][] [13A]***LEdHN[13B]***[] [13B]

The United States Supreme Court will not construe 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*)--which makes it unlawful to discriminate in price between purchasers, where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them--in a way that would allow price discriminators to avoid the sanctions of 2(a) by the simple expedient of adding an additional link to the distribution chain; thus, for the purposes of determining, in a suit by several independent retailers against a supplier which sold gasoline both to the independent retailers and to two distributors which engaged in retail operations as well, whether the supplier's discounts to the distributors violated 2(a), the additional link in the distribution chain does not insulate the supplier from liability if the supplier's excessive discounts otherwise violated 2(a).

COURTS §93 > STATUTES §91 > faithfulness to intent -- rewriting -- > Headnote:
LEdHN[14A][] [14A]***LEdHN[14B]***[] [14B]

Unlike scholarly commentators, the United States Supreme Court has a duty to be faithful to congressional intent when interpreting a statute, and is not free to consider whether, or how, the statute should be rewritten.

COURTS §141 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §38 > price discrimination -- functional discounts -- > Headnote:
LEdHN[15A][] [15A]***LEdHN[15B]***[] [15B]

With respect to a supplier's functional discount--that is, a discount given to a purchaser based on the purchaser's role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier--although a scholarly commentator describes the status of functional discounts under 2 of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13*), with dissatisfaction, the commentator's observations about the merits of the statute and about prosecutorial discretion are irrelevant to the United States Supreme Court's inquiry as to the legal status of such functional discounts under 2.

EVIDENCE §343.5 > presumptions -- rebuttal -- Robinson-Patman Act violation -- > Headnote:
LEdHN[16][] [16]

For the purposes of determining, in a suit by several independent retailers against a supplier which sold gasoline both to the independent retailers and to two distributors which engaged in retail operations as well, whether the supplier's allegedly legitimate functional discounts to the distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*)--which makes it unlawful to discriminate in price between purchasers, where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them--a presumption of an adverse effect on competition becomes all the more appropriate to the extent that the two distributors competed with the independent retailers in the retail market; the distributors' competitive advantage in the retail market constitutes evidence tending to rebut any presumption of legality that would otherwise apply to their wholesale sales.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > STATUTES §164 > price discrimination -- > Headnote:
LEdHN[17][] [17]

The competitive-injury component of a price discrimination violation of 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), is not limited to the injury to competition between the favored and the disfavored purchaser, but also encompasses the injury to competition between their customers; such a conclusion is compelled by the statutory language, which specifically encompasses the adverse effect of price discrimination on not only persons who either grant or knowingly receive the benefit of such discrimination, but also customers of either of them.

APPEAL §1092 > what reviewable -- issue not raised -- > Headnote:
LEdHN[18A][] [18A]***LEdHN[18B]***[] [18B]

On certiorari to review several independent retailers' suit against a gasoline supplier, which suit is based on a claim that the supplier's discounts to two distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*), the United States Supreme Court need not address the question whether, under 2(a), an inference of injury to competition might be negated by evidence that disfavored buyers could make purchases at a reasonable discount from favored buyers, where the parties do not raise the question.

DAMAGES §159 > JUDGMENT §314.5 > Robinson-Patman Act violation -- excessiveness of damages -- time for which awarded -- judgment notwithstanding verdict -- > Headnote:
LEdHN[19][] [19]

With respect to the amount of damages awarded for the period 1972-1981 to several independent retailers in their suit against a supplier which sold gasoline both to the plaintiff retailers and to two distributors which engaged in retail operations as well--which suit is based upon a claim that the supplier's discounts to the two distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*)--even if one of the distributors, on whose activities the plaintiffs relied in proving damages, was not also a retailer prior to 1974, a possible flaw in the jury's calculation of the amount of damages awarded is not an appropriate basis for granting the supplier's motion for a judgment notwithstanding the verdict on the theory that the award is allegedly excessive as a matter of law, where (1) the supplier's theory improperly blurs the distinction between the liability and damages issues; (2) the plaintiffs' proof established a continuing violation of 2(a) throughout the damages period; (3) the plaintiffs' proof of the specific amount of damages, although necessarily less precise, provided a sufficient basis for an acceptable estimate of the amount of damages; and (4) the supplier did not object to the instructions to the jury on the damages issue.

EVIDENCE §652 > sufficiency -- expert testimony -- Robinson-Patman Act -- injury to business -- damages -- > Headnote: ***LEdHN[20]***[] [20]

In a suit by several independent retailers against a gasoline supplier which sold gasoline both to the independent retailers and to two distributors which engaged in retail operations as well--which suit is based upon a claim that the supplier's discounts to the two distributors violated 2(a) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(a)*)--the plaintiff retailers' proof of a continuing violation of 2(a) throughout the 9-year period of 1972-1981 is sufficient, where the plaintiffs' proof establishes that (1) the supplier's lower prices to both distributors were discriminatory throughout the entire 9-year period, (2) at least one distributor, and apparently the second distributor as well, was selling at retail during that entire period, (3) the discounts substantially affected competition throughout the entire market, and (4) the discounts injured each of the plaintiffs; under such circumstances, the plaintiffs' proof of the specific amount of their damages is necessarily less precise, and--even if the second distributor was not also a retailer prior to 1974, and even if some portion of the plaintiffs' injuries might therefore be attributable to the conduct of other independent retailers--the plaintiffs' expert testimony provides a sufficient basis, under the traditional rule excusing antitrust plaintiffs from an unduly rigorous standard of proving antitrust injury, for an acceptable estimate of the amount of damages awarded for the period 1972-1981, where (1) the plaintiffs offered no direct testimony of any diversion by the first distributor and testified that they, the plaintiffs, did not even know that the first distributor was being supplied by the supplier, (2) the plaintiffs introduced evidence describing a diversion of their customers to specific stations supplied by the second distributor, and (3) the plaintiffs' expert testimony on damages (a) focused on the diversion of trade to specific stations supplied by the second distributor, and (b) analyzed the entire damages period, including the period prior to 1974 when the second distributor was arguably not a retailer.

Syllabus

Between 1972 and 1981, petitioner Texaco sold gasoline at its retail tank wagon prices to respondent independent Texaco retailers but granted substantial discounts to distributors Gull and Dompier. Gull resold the gas under its own name; the fact that it was being supplied by Texaco was unknown to respondents. Dompier paid a higher price than Gull, and supplied its gas under the Texaco brand name to retail stations. With the encouragement of Texaco, Dompier entered the retail market directly. Both distributors picked up gas at the Texaco plant and delivered it directly to their retail outlets, and neither maintained any significant storage facilities. Unlike Gull, Dompier received an additional **[****2]** discount from Texaco for the deliveries. Texaco executives were well aware of Dompier's dramatic growth and attributed it to the magnitude of the discounts. During the relevant period, the stations supplied by the distributors increased their sales volume dramatically, while respondents' sales suffered a corresponding decline. In 1976, respondents filed suit against Texaco under the Robinson-Patman Amendments to the Clayton Act (Act), alleging that the distributor discounts violated § 2(a) of the Act, which, among other things, forbids any person to "discriminate in price" between different purchasers of commodities, where the effect of such discrimination is substantially to "injure . . . competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them." The jury awarded respondents actual damages. The District Court denied Texaco's motion for judgment notwithstanding the verdict. Texaco had claimed that, as a matter of law, its "functional discounts" -- *i. e.,* discounts that are given to a purchaser based on its role in the supplier's distributive system and reflect, at least in a generalized sense, the **[****3]** services performed by the purchaser for the supplier -- did not adversely affect competition within the meaning of the Act. The District Court rejected Texaco's argument, reasoning that the "presumed legality of functional discounts" had been rebutted by evidence that the amount of Gull's and Dompier's discounts was not reasonably related to the cost of any function they performed. The Court of Appeals affirmed.

Held:

1. Respondents have satisfied their burden of proving that Texaco violated the Act. Pp. 9-26.

(a) Texaco's argument that it did not "discriminate in price" within the meaning of § 2(a) by charging different prices is rejected in light of this Court's holding in *FTC v. Anheuser-Busch, Inc., 363 U.S. 536, 549*, that "a price discrimination within the meaning of [§ 2(a)] is merely a price difference." Texaco's argument, which would create a blanket exemption for all functional discounts, has some support in the legislative history of the Act, but is foreclosed by the text of the Act itself, which plainly reveals a concern with competitive consequences at different levels of distribution and carefully defines two specific affirmative defenses **[****4]** that are unavailable. Pp. 11-13.

(b) Also rejected is Texaco's argument that, at least to the extent that Gull and Dompier acted as wholesalers, the price differentials did not "injure . . . competition" within the meaning of the Act. It is true that a legitimate functional discount that constitutes a reasonable reimbursement for the purchaser's actual marketing functions does not violate the Act. Thus, such a discount raises no inference of injury to competition under *FTC v. Morton Salt Co., 334 U.S. 37, 46-47*. However, the Act does not tolerate a functional discount that is completely untethered either to the supplier's savings or the wholesaler's costs. This conclusion is consistent with Federal Trade Commission (FTC) practice, with *Perkins v. Standard Oil Co. of California, 395 U.S. 642*, and with the analysis of antitrust commentators. The record here adequately supports the finding that Texaco violated the Act. There was an extraordinary absence of evidence to connect Gull's and Dompier's discounts to any savings enjoyed by Texaco. Both Gull and Dompier received the full discount on all purchases even though most of their volume was resold **[****5]** directly to consumers, and the extra margin on those sales obviously enabled them to price aggressively in both their retail and wholesale marketing. The *Morton Salt* presumption of adverse effect becomes all the more appropriate to the extent they competed with respondents in the retail market. Furthermore, the evidence indicates that Texaco was encouraging Dompier to integrate downward and was fully informed about the dramatic impact of the Dompier discount on the retail market at the same time that Texaco was inhibiting upward integration by respondents. Pp. 13-26.

2. There is no merit to Texaco's contention that the damages award must be judged excessive as a matter of law. Texaco's theory improperly blurs the distinction between the liability and damages issues. There is no doubt that respondents' proof of a continuing violation as to the discounts to both distributors throughout the 9-year damages period was sufficient. Proof of the specific amount of their damages necessarily was less precise, but the expert testimony provided a sufficient basis for an acceptable estimate of the amount of damages. Cf., *e. g., J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 565-566.* **[****6]** Pp. 26-28.

Judges: STEVENS, J., delivered the opinion of the Court, in which REHNQUIST, C. J., and BRENNAN, MARSHALL, BLACKMUN, and O'CONNOR, JJ., joined. WHITE, J., filed an opinion concurring in the result. SCALIA, J., filed an opinion concurring in the judgment, in which KENNEDY, J., joined.

Opinion by: STEVENS

Opinion

[*546] [*506] [**2538]** ***LEdHN[1A]***[] [1A] ***LEdHN[2A]***[] [2A]Petitioner (Texaco) sold gasoline directly to respondents and several other retailers in Spokane, Washington, at its retail **[*547]** tank wagon prices (RTW) while it granted substantial discounts to two distributors. During the period between 1972 and 1981, the stations supplied by the two distributors increased their sales volume dramatically, while respondents' sales suffered a corresponding decline. Respondents filed an action against Texaco under the Robinson-Patman Amendment to the Clayton Act (Act), 38 Stat. 730, as amended, 49 Stat. 1526, *15 U.S.C. § 13*, alleging that the distributor discounts violated § 2(a) of the Act, *15 U.S.C. § 13* **[****7]** *(a)*. Respondents recovered treble damages, and the Court of Appeals for the Ninth Circuit affirmed the judgment. We granted certiorari, 490 U.S. (1989), to consider Texaco's contention that legitimate functional discounts do not violate the Act because a seller is not responsible for its customers' independent resale pricing decisions. While we agree with the basic thrust of Texaco's argument, we conclude that in this case it is foreclosed by the facts of record.

I

LEdHN[3][] [3]Given the jury's general verdict in favor of respondents, disputed questions of fact have been resolved in their favor. There seems, moreover, to be no serious doubt about the character of the market, Texaco's pricing practices, or the relative importance of Texaco's direct sales to retailers **[*548]** ("through put" business) and its sales to distributors. The principal disputes at trial related to questions of causation and damages.

Respondents are 12 independent Texaco retailers. They displayed the Texaco trademark, accepted Texaco credit cards, and bought their gasoline products directly from Texaco. Texaco delivered the gasoline **[****8]** to respondents' stations.

The retail gasoline market in Spokane was highly competitive throughout the damages period, which ran from 1972 to 1981. Stations marketing the nationally advertised Texaco gasoline competed with other major brands as well as with stations featuring independent brands. Moreover, although discounted prices at a nearby Texaco station would have the most obvious impact on a respondent's trade, the cross-city traffic patterns and relatively small size of Spokane produced a city-wide competitive market. See, e. g., App. 244, 283-291. Texaco's **[**2539]** through put sales in the Spokane market declined from a monthly volume of 569,269 gallons in 1970 to 389,557 gallons in 1975. Id., at 487-488. Texaco's independent retailers' share of the market for Texaco gas declined from 76% to 49%. [1] Ibid. Seven of the respondents' stations were out of business by the end of 1978. Id., at 22-23, R. 501.

[**9] [***507]** The respondents tried unsuccessfully to increase their ability to compete with lower priced stations. Some tried converting from full service to self-service stations. See, e. g., App. 55-56. Two of the respondents sought to buy their own tank trucks and haul their gasoline from Texaco's supply point, but Texaco vetoed that proposal. *Id., at 38-41, 59*.

[*549] While the independent retailers struggled, two Spokane gasoline distributors supplied by Texaco prospered. Gull Oil Company (Gull) had its headquarters in Seattle and distributed petroleum products in four western States under its own name. *Id., at 94-95*. In Spokane it purchased its gas from Texaco at prices that ranged from six to four cents below Texaco's RTW price. Id., at 31-32. Gull resold that product under its own name; the fact that it was being supplied by Texaco was not known by either the public or the respondents. See, e. g., id., at 256. In Spokane, Gull supplied about 15 stations; some were "consignment stations" and some were "commission stations." In both situations Gull retained title to the gasoline until it was pumped into a motorist's tank. In the consignment stations, the station operator **[****10]** set the retail prices, but in the commission stations Gull set the prices and paid the operator a commission. Its policy was to price its gasoline at a penny less than the prevailing price for major brands. Gull employed two truck drivers in Spokane who picked up product at Texaco's bulk plant and delivered it to the Gull stations. It also employed one supervisor in Spokane. Apart from its trucks and investment in retail facilities, Gull apparently owned no assets in that market. App. 96-109, 504-512. At least with respect to the commission stations, Gull is fairly characterized as a retailer of gasoline throughout the relevant period.

The Dompier Oil Company (Dompier) started business in 1954 selling Quaker State Motor Oil. In 1960 it became a full line distributor of Texaco products, and by the mid-1970's its sales of gasoline represented over three-quarters of its business. App. 114-115. Dompier purchased Texaco gasoline at prices of 3.95 cents to 3.65 cents below the RTW price. Dompier thus paid a higher price than Gull, but Dompier, unlike Gull, resold its gas under the Texaco brand names. Id., at 24, 29-30. It supplied about eight to ten Spokane retail stations. In the period **[****11]** prior to

---

[1] The independent retailers' share includes not only the market share for the 12 respondents, who operated a total of 13 stations, but also the share of some independent Texaco retailers who are not parties to this action. Texaco had 27 independent dealers in the Spokane market in 1970, and 19 in 1975. App. 22, 487-488.

October 1974, two of those stations were owned by the president of Dompier but the others were independently **[*550]** operated. See, e. g., *id., at 119-121, 147-148*. In the early 1970's, Texaco representatives encouraged Dompier to enter the retail business directly, and in 1974 and 1975 it acquired four stations. [2] *Id., at 114-135, 483-503*. Dompier's president estimated at trial that the share of its total gasoline sales made **[***508]** at retail during **[**2540]** the middle 1970's was "probably 84 to 90 percent." *Id., at 115*.

[**12]** Like Gull, Dompier picked up Texaco's product at the Texaco bulk plant and delivered directly to retail outlets. Unlike Gull, Dompier owned a bulk storage facility, but it was seldom used because its capacity was less than that of many retail stations. Again unlike Gull, Dompier received from Texaco the equivalent of the common carrier rate for delivering the gasoline product to the retail outlets. Thus, in addition to its discount from the RTW price, Dompier made a profit on its hauling function. [3] App. 123-131, 186-192, 411-413.

The stations supplied by Dompier regularly sold at retail at lower prices than respondents'. **[****13]** Even before Dompier directly entered the retail business in 1974, its customers were **[*551]** selling to consumers at prices barely above the RTW price. Id., at 329-338; Record 315, 1250-1251. Dompier's sales volume increased continuously and substantially throughout the relevant period. Between 1970 and 1975 its monthly sales volume increased from 155,152 gallons to 462,956 gallons; this represented an increase from 20.7% to almost 50% of Texaco's sales in Spokane. App. 487-488.

There was ample evidence that Texaco executives were well aware of Dompier's dramatic growth and believed that it was attributable to "the magnitude of the distributor discount and the hauling allowance." [4] See also, e. g., App. 213-223, 407-413. In response to complaints from individual respondents about Dompier's aggressive pricing, however, Texaco representatives professed that they "couldn't understand it." Record 401-404.

[**14]** II

LEdHN[4][] [4]Respondents filed suit against Texaco in July 1976. After a four week trial, the jury awarded damages measured by the difference between the RTW price and the price paid by Dompier. As we subsequently decided in *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557 (1981)*, this measure of damages was improper. Accordingly, although it rejected Texaco's defenses on the issue of liability, [5] the Court of Appeals for the

---

[2] "Q. Did you have any conversations with Texaco during this period of time encouraging you to -- Dompier Oil Company to change its emphasis and to move into the retail business? A. Yes, we did.

"Q. Would you tell the jury about that? [A.] Well, at various times Texaco encouraged us to begin supplying retail service stations. In the early Seventies they did that, and then as time went on, they encouraged us to own the stations that we were supplying; in other words, to try to control our own retail business. And beginning about 1974 -- we did purchase a station in '74 and some more in '75 and we began operating those as company operations with salaried company employees." App. 116-117.

[3] "Q. That would have been a rate -- that if you had hired a common carrier to haul the product for you, you would have paid them to haul it? A. That's right.

"Q. And do you understand -- to your understanding does that common carrier rate have a built-in-profit? A. I am sure it does.

"Q. Did you find it to be an advantage to you to be hauling your own product? A. Yes." *Id., at 126*.

[4] At trial one of Texaco's defenses was based on its obligation to comply with certain federal regulations during periods of shortage. In one of its communications to the Federal Government, a Texaco vice president wrote, in part:

"We believe that the dramatic shift in gasoline sales from the independent retailer classes of purchaser to the independent distributor classes of purchaser can be explained almost entirely by the magnitude of the distributor discount and the hauling allowance." App. 413.

[5] Texaco had argued that its pricing practices were mandated by federal regulations and that its sales in the Spokane market were not "in commerce" within the meaning of the Act.

Ninth Circuit remanded the case for **[*552]** a new trial. *Hasbrouck v. Texaco, Inc., 663 F.2d 930 (1981)*, cert. denied, *459 U.S. 828 (1982)*.

[*509]** ***LEdHN[2B]***[] [2B]At the second trial, Texaco contended that the special **[****15]** prices to Gull and Dompier were justified by cost savings, [6] were the product of a good faith attempt to meet competition, [7] **[****16]** and were lawful "functional discounts." The District Court withheld the cost justification **[**2541]** defense from the jury because it was not supported by the evidence and the jury rejected the other defenses. It awarded respondents actual damages of $ 449,900. [8] The jury apparently credited the testimony of respondents' expert witness who had estimated what the respondents' profits would have been if they had paid the same prices as the four stations owned by Dompier. See *634 F. Supp. 34, 43*;*842 F.2d, at 1043-1044*.

In Texaco's motion for judgment notwithstanding the verdict, it claimed as a matter of law that its functional discounts did not adversely affect competition within the meaning of the Act because any injury to respondents was attributable to decisions made independently by Dompier. The District Court denied the motion. In an opinion supplementing its oral ruling denying Texaco's motion for a directed verdict, the Court assumed, arguendo, that Dompier was entitled to a **[*553]** functional discount, even on the gas that was sold at retail, [9] **[****17]** but nevertheless concluded that the "presumed legality of functional discounts" had been rebutted by evidence that the amount of the discounts to Gull and Dompier was not reasonably related to the cost of any function that they performed. [10] *634 F. Supp., at 37-38*, and n. 4.

---

[6] Section 2(a) of the Act provides, in part:

"That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered."

[7] Section 2(b) of the Act provides, in part:

HN1[] "Provided, however, That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor."

[8] The award to each particular respondent of course differed. The awards represented an average of $ 5,486.59 per year for each of the respondents.

[9] "While there is a serious question as to whether Dompier was entitled to a 'functional discount' on the gas it resold at retail, compare *Mueller Co., 60 F.T.C. 120 (1962)*, aff'd, *323 F.2d 44 (7th Cir. 1963)*, cert. denied, ***377 U.S. 923*** . . . (1964) (entitlement to functional discount based on resale level) with *Doubleday and Co., 52 F.T.C. 169 (1955)* (entitlement to functional discount based on level of purchase), the court assumes, arguendo, that the mere fact that Dompier retailed the gas does not preclude a 'functional discount.'" *634 F. Supp. 34, 37, n. 4 (ED Wash. 1985)* (emphasis in original).

[10] "Secondly, the functional discounts negatively affected competition because they were, in part, reflected in the favored purchasers' (or their customers') retail prices. In other words, the discount was not consumed or absorbed at the level of the favored buyers; rather, the amount of the discount (or a significant portion) appeared in the favored purchasers' retail price, or in the favored purchasers' price to their customers and in their customers' retail prices. Under such circumstances, the otherwise innocuous nature and presumed legality of functional discounts is rebutted, for it is universally recognized that a functional discount remains legal only to the extent it acts as compensation for the functions performed by the favored buyer. See 3 Kintner & Bauer, Federal ***Antitrust Law*** 309-10 (1983); Rill, Availability and Functional Discounts Justifying Discriminatory Pricing, 53 Antitrust L. J. 929, 939-41 (1985). The discount must 'be reasonably related to the expenses assumed by the [favored] buyer' and the discount 'should not exceed the cost of . . . the function [the favored buyer] actually performs . . .' *Doubleday and Company, 52 F.T.C. at 209*, cited in Boise Cascade Corp., Docket No. 9133, slip op. at 117 (Feb. 14, 1984) (initial decision). If the discount exceeds such costs, it cannot be justified as a functional discount, particularly where, as here, the excess has a negative effect on competition.

[**18]**

[*510]** The Court of Appeals affirmed. It reasoned:

[*554] "As the Supreme Court long ago made clear, and recently reaffirmed, ***HN2***[] there may be a Robinson-Patman violation even if the favored and disfavored buyers do not compete, so long as the customers of the favored buyer compete with the disfavored buyer or its customers. *Morton Salt, 334 U.S. at 43-44* . . .; *Perkins v. Standard Oil Co., 395 U.S. 642, 646-47* . . . (1969); *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434-35 (1983)*. Despite the fact that Dompier and Gull, at least in their capacities as wholesalers, did not compete directly with Hasbrouck, a section 2(a) violation may **[**2542]** occur if (1) the discount they received was not cost-based and (2) all or a portion of it was passed on by them to customers of theirs who competed with Hasbrouck. Morton Salt, 384 U.S. at 43-44, . . . ; *Perkins v. Standard Oil, 395 U.S. at 648-49*, . . . ; see 3 E. Kintner & J. Bauer, supra, § 22.14.

"Hasbrouck presented ample evidence to demonstrate **[****19]** that . . . . the services performed by Gull and Dompier were insubstantial and did not justify the functional discount." *842 F.2d, at 1039*.

The Court of Appeals concluded its analysis by observing:

"To hold that price discrimination between a wholesaler and a retailer could never violate the Robinson-Patman Act would leave immune from antitrust scrutiny a discriminatory pricing procedure that can effectively serve to harm competition. We think such a result would be contrary to the objectives of the Robinson-Patman Act." *Id., at 1040* (emphasis in original).

III

LEdHN[5A][] [5A] ***LEdHN[6A]***[] [6A] ***LEdHN[7A]***[] [7A]It is appropriate to begin our consideration of the legal status of functional discounts [11] by examining the language of the Act. Section 2(a) provides in part:

[*555] ***HN3***[] "It shall be unlawful for any person engaged in commerce, in the course of such commerce, **[****20]** either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either **[***511]** or any of the purchases involved in such discrimination are in commerce, where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them . . . ." *15 U.S.C. § 13(a)*.

LEdHN[5B][] [5B] ***LEdHN[6B]***[] [6B] ***LEdHN[7B]***[] [7B]

"In this case Texaco made no serious attempt to quantitatively justify its functional discounts. While a precise accounting of the value of the performed functions is not mandated, merely identifying some of the functions is not sufficient. There is no substantial evidence to support Texaco's position that the discounts were justified." *634 F. Supp., at 38* (footnote omitted).

[11] In their brief as amici curiae, the United States and the Federal Trade Commission suggest the following definition of "functional discount," which is adequate for our discussion: " A functional discount is one given to a purchaser based on its role in the supplier's distributive system, reflecting, at least in a generalized sense, the services performed by the purchaser for the supplier." Brief for United States et al. as Amici Curiae 10 (filed Aug. 3, 1989).

[**21]** ***LEdHN[2C]***[] [2C]***LEdHN[7C]***[] [7C]***HN4***[] The Act contains no express reference to functional discounts. [12] **[****22]** It does contain two affirmative defenses that provide protection for two categories of discounts -- those that **[*556]** are justified by savings in the seller's cost of manufacture, delivery or sale, [13] and those that represent a good faith response to the equally low prices of a competitor. *Standard Oil Co. v. FTC, 340 U.S. 231, 250 (1951)*.As the case comes to us, neither of those defenses is available to Texaco.

LEdHN[7D][] [7D]

LEdHN[8A][] [8A]***HN5***[] In order to establish a violation of the Act, respondents had the burden of proving **[**2543]** four facts: (1) that Texaco's sales to Gull and Dompier were made in interstate commerce; (2) that the gasoline sold to them was of the same grade and quality as that sold to respondents; (3) that Texaco discriminated in price as between Gull and Dompier on the one hand and respondents on the other; and (4) that the discrimination had a prohibited effect on competition. *15 U.S.C. § 13(a)*. Moreover, for each respondent ***HN6***[] to recover damages, he had the burden of proving the extent of his actual injuries. *J. Truett Payne, 451 U.S., at 562*.

LEdHN[1B][] [1B]***LEdHN[5C]***[] [5C]The first two elements of respondents' case are not disputed in this Court, [14] **[****23]** and we do not understand Texaco to be challenging the sufficiency of respondents' proof of damages. Texaco does argue, however, that although it charged different prices, it did not "discriminate in price" within the meaning of the Act, and that, at least to the extent that Gull and Dompier acted as wholesalers, the price differentials **[***512]** did not injure competition. We consider the two arguments separately.

IV

LEdHN[5D][] [5D]Texaco's first argument would create a blanket exemption for all functional discounts. Indeed, carried to its logical conclusion, it would exempt all price differentials **[****24]** except those given to competing purchasers. The primary basis for **[*557]** Texaco's argument is the following comment by Congressman Utterback, an active sponsor of the Act.

"In its meaning as simple English, ***HN7***[] a discrimination is more than a mere difference. Underlying the meaning of the word is the idea that some relationship exists between the parties to the discrimination which entitles them to equal treatment, whereby the difference granted to one casts some burden or disadvantage upon the other. If the two are competing in the resale of the goods concerned, that relationship exists. Where, also, the price to one is so low as to involve a sacrifice of some part of the seller's necessary costs and profit as applied to that business, it leaves that deficit inevitably to be made up in higher prices to his other customers; and there, too, a relationship may exist upon which to base the charge of discrimination. But where no such relationship exists, where the goods are sold in different markets and the conditions affecting those markets set different price levels for them, the sale

---

[12] The legislative history indicates that earlier drafts of the Act did include such a proviso. See, e.g., Shniderman, "The Tyranny of Labels" -- A Study of Functional Discounts Under the Robinson-Patman Act, 60 Harv. L. Rev. 571, 583-586, and nn. 40-57 (1947). The deletion of this exception for functional discounts has ambiguous significance. It may be, as one commentator has suggested, that the circumstances of the Act's passage "must have conveyed to the congressional mind the realization that the judiciary and the FTC would view what had occurred as a narrowing of the gates through which the functional classification plan of a seller had to pass to come within the law." Id., at 588. In any event, the deletion in no way detracts from the blunt direction of the statutory text, which indicates that any price discrimination substantially lessening competition will expose the discriminator to liability, regardless of whether the discriminator attempts to characterize the pricing scheme as a functional discount.

[13] See n. 6, supra.

[14] Texaco has not contested here the proposition that branded gas and unbranded gas are of like grade and quality. See *FTC v. Borden Co., 383 U.S. 637, 645-646 (1966)* ("the economic factors inherent in brand names and national advertising should not be considered in the jurisdictional inquiry under the statutory 'like grade and quality' test").

to different **[****25]** customers at those different prices would not constitute a discrimination within the meaning of this bill." 80 Cong. Rec. 9416 (1936).

LEdHN[5E][] [5E]***LEdHN[6C]***[] [6C]We have previously considered this excerpt from the legislative history, and have refused to draw from it the conclusion which Texaco proposes. *FTC v. Anheuser-Busch, Inc., 363 U.S. 536, 547-551 (1960)*.Although the excerpt does support Texaco's argument, we remain persuaded that the argument is foreclosed by the text of the Act itself. In the context of a statute that plainly reveals a concern with competitive consequences at different levels of distribution, and carefully defines specific affirmative defenses, it would be anomalous to assume that the Congress intended the term "discriminate" to have such a limited meaning. In Anheuser-Busch we rejected an argument identical to Texaco's in the context of a claim that a seller's price differential had injured **[*558]** its own competitors -- a so called "primary line" claim. [15] The reasons we gave for our decision in **[**2544]** **[****26]** Anheuser-Busch apply here as well. After quoting Congressman Utterback's statement in full, we wrote:

"The trouble with respondent's arguments is not that they are necessarily irrelevant in a § 2(a) proceeding, but that they are misdirected when the issue under consideration is solely whether there has been a price discrimination. We are convinced that, whatever may be said with respect to the rest of §§ 2(a) and 2(b) -- and we **[***513]** say nothing here -- there are no overtones of business buccaneering in the § 2(a) phrase 'discriminate in price.' Rather, ***HN8***[] a price discrimination within the meaning of that provision is merely a price difference." *363 U.S., at 549*.

After noting that this view was consistent with our precedents, we added:

"the statute itself spells out the conditions which make a price difference illegal or legal, and we would derange this integrated statutory scheme were we to read other conditions into the law by means of the nondirective phrase, 'discriminate in price.' Not only would such action be contrary to what we conceive to be the meaning **[****27]** of the statute, but, perhaps because of this, it would be thoroughly undesirable. As one commentator has succinctly put it, "Inevitably every legal controversy over any price difference would shift from the detailed governing provisions -- "injury," cost justification, "meeting competition," etc. -- over into the "discrimination" concept of ad hoc resolution divorced from specifically pertinent statutory text." Rowe, Price Differentials **[*559]** and Product Differentiation: The Issues Under the Robinson-Patman Act, 66 Yale L. J. 1, 38." *363 U.S., at 550-551*.

LEdHN[6D][] [6D]

[**28]** ***LEdHN[5F]***[] [5F]Since we have already decided that a price discrimination within the meaning of § 2(a) "is merely a price difference," we must reject Texaco's first argument.

V

LEdHN[6E][] [6E]In *FTC v. Morton Salt Co., 334 U.S. 37, 46-47 (1948)*, we held that ***HN9***[] a injury to competition may be inferred from evidence that some purchasers had to pay their supplier "substantially more for their goods than their competitors had to pay." See also *Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 435-436 (1983)*. Texaco, supported by the United States and the Federal Trade Commission as amici curiae, (the Government), argues that this presumption should not apply to differences between prices charged to wholesalers and these charged to retailers. Moreover, they argue that it would be inconsistent with fundamental antitrust policies to construe the Act as requiring a seller to control his customers' resale prices. The seller **[****29]** should not be held liable for the independent pricing decisions of his customers. As the Government correctly notes, Brief for United States et. al. as Amici Curiae 21-22 (filed Aug. 3, 1989), this argument endorses the position

[15] It has proven useful in Robinson-Patman Act cases to distinguish among "the probable impact of the [price] discrimination on competitors of the seller (primary-line injury), on the favored and disfavored buyers (second-line injury), or on the customers of either of them (third-line injury)." See 3 E. Kintner & J. Bauer, Federal ***Antitrust Law*** § 20.9 p. 127 (1983).

advocated 35 years ago in the Report of the Attorney General's National Committee to Study the Antitrust Laws (1955).

After observing that suppliers ought not to be held liable for the independent pricing decisions of their buyers, [16] **[****31]** and **[*560]** that without **[***514]** functional discounts distributors might go **[**2545]** uncompensated for services they performed, [17] the Committee wrote:

"The Committee recommends, therefore, that ***HN10***[] suppliers granting functional discounts either to single-function or to integrated buyers should not be held responsible for any consequences of their customers' pricing tactics. Price cutting at the resale level is not in fact, and should not be held in law, 'the effect of' a differential that merely accords due recognition and reimbursement for actual marketing functions. The price cutting of a customer who receives this type **[****30]** of differential results from his own independent decision to lower price and operate at a lower profit margin per unit. The legality or illegality of this price cutting must be judged by the usual legal tests. In any event, consequent injury or lack of injury should not be the supplier's legal concern.

"On the other hand, the law should tolerate no subterfuge. For instance, where a wholesaler-retailer buys only part of his goods as a wholesaler, he must not claim a functional discount on all. Only to the extent that a buyer actually performs certain functions, assuming all the risk, investment, and costs involved, should he legally **[*561]** qualify for a functional discount. Hence a distributor should be eligible for a discount corresponding to any part of the function he actually performs on that part of the goods for which he performs it." *Id., at 208*.

LEdHN[1C][] [1C] ***LEdHN[6F]***[] [6F] ***LEdHN[9A]***[] [9A]We generally agree with this description of the legal status of functional discounts. **[****32]** ***HN11***[] A supplier need not satisfy the rigorous requirements of the cost justification defense in order to prove that a particular functional discount is reasonable and accordingly did not cause any substantial lessening of competition between a wholesaler's customers and the supplier's direct customers. [18] The record in this case, **[***515]** however, adequately supports the finding that Texaco violated the Act.

---

[16] "In the Committee's view, imposing on any dual supplier a legal responsibility for the resale policies and prices of his independent distributors contradicts basic antitrust policies. Resale-price fixing is incompatible with the tenets of a free and competitive economy. What is more, the arrangements necessary for policing, detecting, and reporting price cutters may be illegal even apart from the resale-price agreement itself. And even short of such arrangements, a conscious adherence in a supplier's sales to retail customers to the price quotations by independent competing distributors is hardly feasible as a matter of business operation, or safe as a matter of law." Report of the Attorney General's National Committee to Study the Antitrust Laws 206-207 (1955) (footnotes omitted).

[17] "In our view, to relate discounts or prices solely to the purchaser's resale activities without recognition of his buying functions thwarts competition and efficiency in marketing. It compels affirmative discrimination against a substantial class of distributors, and hence serves as a penalty on integration. If a businessman actually fulfills the wholesale function by relieving his suppliers of risk, storage, transportation, administration, etc., his performance, his capital investment, and the saving to his suppliers, are unaffected by whether he also performs the retailing function, or any number of other functions. A legal rule disqualifying him from discounts recognizing wholesaling functions actually performed compels him to render these functions free of charge." *Id., at 207*.

[18] In theory, a supplier could try to defend a functional discount by invoking the Act's cost justification defense, but the burden of proof with respect to the defense is upon the supplier, and interposing the defense "has proven difficult, expensive, and often unsuccessful." 3 E. Kintner & J. Bauer, Federal ***Antitrust Law***, § 23.19, pp. 366-367 (1983). Moreover, to establish the defense a "seller must show that the price reductions given did not exceed the actual cost savings," id., § 23.10, p. 345, and this requirement of exactitude is ill-suited to the defense of discounts set by reference to legitimate, but less precisely measured, market factors. Cf. Calvani, Functional Discounts Under the Robinson-Patman Act, 17 B. C. Ind. & Com. L. Rev. 543, 546, n. 16 (1976) (distinguishing functional discounts from cost-justified price differences); Report of the Attorney General's National Committee on the Antitrust Laws, at 171 ("the cost defense has proved largely illusory in practice").

Discounters will therefore likely find it more useful to defend against claims under the Act by negating the causation element in the case against them: a legitimate functional discount will not cause any substantial lessening of competition. The concept of

LEdHN[9B][] [9B] LEdHN[6G][] [6G] LEdHN[9C][] [9C]

[**33]**

[*562] LEdHN[1D][] [1D]LEdHN[6H][] [6H]The hypothetical predicate for the Committee's entire discussion of functional **[**2546]** discounts is HN13[] a price differential "that merely accords due recognition and reimbursement for actual marketing functons." Such a discount is not illegal. In this case, however, both the District Court and the Court of Appeals concluded that even without viewing the evidence in the light most favorable to the respondents, there was no substantial evidence indicating that the discounts to Gull and Dompier constituted a reasonable reimbursement for the value to Texaco of their actual marketing functions. 842 F.2d, at 1039;634 F. Supp., at 37, 38. Indeed, Dompier was separately compensated for its hauling function, and neither Gull and Dompier maintained any significant storage facilities.

Despite this extraordinary absence of evidence to connect the discount to any savings enjoyed by Texaco, Texaco contends **[****34]** that the decision of the Court of Appeals cannot be affirmed without departing "from established precedent, from practicality, and from Congressional intent." Brief for Petitioner 14. [19] This argument assumes that holding suppliers liable for a gratuitous functional discount is somehow a novel practice. That assumption is flawed.

LEdHN[6I][] [6I]LEdHN[9D][] [9D]LEdHN[10A][] [10A]LEdHN[11A][] [11A] **[****35]** LEdHN[12A][] [12A]As we have already observed, the "due recognition and reimbursement" concept endorsed in the Attorney General's **[*563]** Committee's study would not countenance a functional discount completely untethered to either the supplier's savings or the wholesaler's costs. The longstanding principle that HN14[] functional discounts provide no safe harbor from the Act is likewise evident from the practice of the Federal Trade Commission, which has, while permitting legitimate functional discounts, proceeded against those discounts which appeared to be subterfuges to avoid the Act's restrictions. See, e. g., In re Sherwin **[***516]** Williams Co., 36 F.T.C. 25, 70-71 (1943) (finding a violation of the Act by paint manufacturers who granted "functional or special discounts to some of their dealer-distributors on the purchases of such dealer-distributors which are resold by such dealer-distributors directly to the consumer through their retail departments or branch stores wholly owned by them"); In re the Ruberoid Co., 46 F.T.C. 379, 386, para. 5 (1950) **[****36]** (liability appropriate when functional designations do not always indicate accurately "the functions actually performed by such purchasers"), aff'd, 189 F.2d 893 (CA2 1951), rev'd on rehearing, 191 F.2d 294, aff'd, 343 U.S. 470 (1952). [20] **[****38]** See also, e. g., In re Doubleday & **[*564]**

---

substantiality permits the causation inquiry to accommodate a notion of economic reasonableness with respect to the pass-through effects of functional discounts, and so provides a latitude denied by the cost-justification defense. Cf. Shniderman, 60 Harv. L. Rev., at 603-604 (substantiality defense in functional discount cases). We thus find ourselves in substantial agreement with the view that:

HN12[] "Conceived as a vehicle for allowing differential pricing to reward distributive efficiencies among customers operating at the same level, the cost justification defense focuses on narrowly defined savings to the seller derived from the different method or quantities in which goods are sold or delivered to different buyers. . . . Moreover, the burden of proof as to the cost justification defense is on the seller charged with violating the Act, whereas the burden of proof remains with the enforcement agency or plaintiff in circumstances involving functional discounts since functional pricing negates the probability of competitive injury, an element of a prima facie case of violation." Rill, Availability and Functional Discounts Justifying Discriminatory Pricing, 53 Antitrust L. J. 929, 935 (1985) (footnotes omitted).

[19] Texaco continues the argument by summoning a parade of horribles whose march Texaco believes is at issue in this case; according to Texaco, the Court of Appeals' rule "would multiply distribution costs, rigidify and increase consumer prices, encourage resale price maintenance in violation of the Sherman Act, . . . , and jeopardize the businesses of wholesalers." Brief for Petitioner 14.

Co., 52 F.T.C. 169, 209 (1955) ("the Commission should tolerate no subterfuge. Only to the extent that a buyer **[**2547]** actually performs certain functions, assuming all the risks and costs involved, should he qualify for a compensating discount. The amount of the discount should be reasonably related to the expenses assumed by the buyer"); *In re General Foods Corp., 52 F.T.C. 798, 824-825 (1956)* ("a seller is not forbidden to sell at different prices to buyers in different functional classes and orders have been issued permitting lower prices to one functional class as against another, provided that injury to commerce as contemplated in the law does not result," but "to hold that the rendering of special services ipso facto [creates] a separate functional classification would be to read Section 2 (d) out of the Act"); *In re Boise Cascade Corp., 107 F.T.C. 76, 212, 214-215 (1986)* **[****37]** (regardless of whether the FTC has judged functional discounts by reference to the supplier's savings or the buyer's costs, the FTC has recognized that "functional discounts may usually be granted to customers who operate at different levels of trade, and thus do not compete with each other, without risk of secondary line competitive injury under the Act"), rev'd on other grounds, *267 U.S. App. D.C. 124, 837 F.2d 1127 (1988)*. [21] **[****39]** **[*565]** Cf. *FLM Collision* ***[***517]*** *Parts, Inc. v. Ford Motor Co., 543 F.2d 1019, 1027 (CA2 1976)* ("We do not suggest or imply that, if a manufacturer grants a price discount or allowance to its wholesalers (whether or not labelled 'incentive'), which has the purpose or effect of defeating the objectives of the Act, § 2(a)'s language may not be construed to defeat it"); C. Edwards, Price Discrimination Law 286-348 (1959) (analyzing cases). [22]

---

[20] See also, e. g., In re Whiting, 26 F.T.C. 312, 316, para. 3 (1938) (functional classification of customers involved unlawful price discrimination because of functional overlap); In re Standard Oil Co., 41 F.T.C. 263 (1945), modified and aff'd, *173 F.2d 210, 217 (CA7 1949)* ("The petitioner should be liable if it sells to a wholesaler it knows or ought to have known . . . is using or intends to use [the wholesaler's] price advantage to undersell the petitioner in its prices made to its retailers"), rev'd and remanded on other grounds, *340 U.S. 231 (1951)*.

LEdHN[10B][] [10B]

In the Standard Oil case, the FTC itself on remand dropped the part of its order prohibiting Standard Oil from giving functional discounts. See C. Edwards, Price Discrimination Law 309 (1959). The FTC's pre-remand theory in the Standard Oil case has of course been the subject of harsh criticism. See, e. g., Report of the Attorney General's National Committee to Study the Antitrust Laws, at 206. Much, if not all, of this criticism rests upon the view that, under the FTC's Standard Oil ruling, a "supplier is charged with legal responsibility for the middlemen's pricing tactics, and hence must control their resale prices lest they undercut him to the unlawful detriment of his directly purchasing retailers. Alternatively, the seller may forego his operational freedom by matching his quotations to retailers with theirs." Ibid. Nothing in our opinion today should be read to condone or approve such a result.

[21] ***LEdHN[11B]***[] [11B]

See also *In re Mueller Co., 60 F.T.C. 120, 127-128 (1962)* (refusing to make allowance for functional discounts in any way that would "add a defense to a prima facie violation of Section 2(a) which is not included in either Section 2(a) or Section 2(b)"), aff'd, *323 F.2d 44 (CA7 1963)*, cert. denied, ***377 U.S. 923 (1964)***. The FTC in Mueller expressly disavowed dicta from Doubleday suggesting that functional discounts are per se legal if justified by the buyer's costs. Mueller held that the discounts were controlled instead by the reasoning propounded in General Foods, which refers to the value of the services to the supplier giving the discount. *60 F.T.C., at 127-128*.

LEdHN[9E][] [9E] ***LEdHN[10C]***[] [10C] ***LEdHN[11C]***[] [11C]

We need not address the relative merits of Mueller and Doubleday in order to resolve the case before us. We do, however, reject the requirement of exactitude which might be inferred from Doubleday's dictum that a functional discount offered to a buyer "should not exceed the cost of that part of the function he actually performs on that part of the goods for which he performs it." *52 F.T.C., at 209*. As already noted, a causation defense in a functional discount case does not demand the rigorous accounting associated with a cost justification defense.

[22] ***LEdHN[12B]***[] [12B]

The Government's position in this case does not contradict this course of decision. The Government's amicus brief on Texaco's behalf criticizes the Court of Appeals opinion on the theory that it "would require a supplier to show that a functional discount is

[**40]** ***LEdHN[6J]***[] [6J]***LEdHN[8B]***[] [8B]Most of these cases involve discounts made questionable because offered to **[**2548]** "complex types of distributors" whose "functions became scrambled." *Doubleday & Co., 52 F.T.C., at 208*. This fact is predictable: manufacturers will more likely be able to effectuate tertiary line price discrimination through functional discounts to a secondary line buyer when **[*566]** the favored distributor is vertically integrated. Nevertheless, this general tendency does not preclude the possibility that a seller may pursue a price discrimination strategy despite the absence of any discrete mechanism for allocating the favorable price discrepancy between secondary and tertiary line recipients. [23]

[**41]**

[*518]** ***LEdHN[13A]***[] [13A]Indeed, far from constituting a novel basis for liability under the Act, the fact pattern here reflects conduct similar to that which gave rise to *Perkins v. Standard Oil Co of California, 395 U.S. 642 (1969)*. Perkins purchased gas from Standard, and was both a distributor and a retailer. He asserted that his retail business had been damaged through two violations of the Act by Standard: first, Standard had sold directly to its own retailers at a price below that charged to Perkins; and, second, Standard had sold to another distributor, Signal, which sold gas to Western Hyway, which in turn **[*567]** sold gas to Regal, a retailer in competition with Perkins. [24] **[****43]** The question presented was whether the Act -- which refers to discriminators, purchasers, and their customers -- covered injuries to competition between purchasers and the customers of customers of purchasers. *Id., at 646-647*. We held that a limitation excluding such "fourth level" competition would be "wholly an artificial one." *Id., at 647*. We reasoned that from "Perkins' point of **[****42]** view, the competitive harm done him by Standard is certainly no less because of the presence of an additional link in this particular distribution chain from

---

justified by the wholesaler's costs," and that it imposed "liability for downstream competitive effects of legitimate functional discounts." Brief for United States et al. as Amici Curiae 16, 6 (filed Aug. 3, 1989). Cf. *Boise Cascade Corp. v. FTC, 837 F.2d 1127, 1141-1143 (267 U.S. App. D.C. 124 (1988)* (summarizing debate about relevance of buyer's costs to defense of functional discounts). If the Court of Appeals were indeed to have endorsed either of these rules, it would have departed perceptibly from the mainstream of the FTC's reading of the Act. We need not decide whether the Government's interpretation of the Court of Appeals opinion is correct, for we affirm its judgment for reasons that do not entail the principles criticized by the Government.

[23] ***LEdHN[8C]***[] [8C]

The seller may be willing to accept any division of the price difference so long as some significant part is passed on to the distributor's customers. Although respondents here did not need to show any benefit to Texaco from the price discrimination scheme in order to establish a violation of the Act, one possibility is indicated by the brief filed amicus curiae by the Service Station Dealers of America (SSDA), an organization representing both stations supplied by independent jobbers and stations supplied directly by sellers. See Brief for SSDA as Amicus Curiae 1-2. SSDA suggests that an indirect price discount to competitors may be used to force directly supplied franchisees out of the market, and so to circumvent federal restrictions upon the termination of franchise agreements. See 92 Stat. 324-332, *15 U.S.C. §§ 2801-2806*.

One would expect that -- absent a safe harbor rule making functional discounts a useful means to engage in otherwise unlawful price discrimination -- excessive functional discounts of the sort in evidence here would be rare. As the Government correctly observes, "this case appears to reflect rather anomalous behavior on the part of the supplier." Brief for United States et al. as Amici Curiae 17, n. 15 (filed Aug. 3, 1989). See also Brief for United States as Amicus Curiae 15 (filed May 16, 1989) ("market forces should tend to discourage a supplier from offering independent wholesalers discounts that would allow them to undercut the supplier's own retail customers").

[24] Much of Perkins's case parallels that of respondents. "There was evidence that Signal received a lower price from Standard than did Perkins, that this price advantage was passed on, at least in part, to Regal, and that Regal was thereby able to undercut Perkins' price on gasoline. Futhermore there was evidence that Perkins repeatedly complained to Standard officials that the discriminatory price advantage given Signal was being passed down to Regal and evidence that Standard Officials were aware that Perkins' business was in danger of being destroyed by Standard's discriminatory practices. This evidence is sufficient to sustain the jury's award of damages under the Robinson-Patman Act." *395 U.S., at 649*.

the producer to the retailer." [25] The same may justly be said in this case. The additional link in the distribution chain does not **[**2549]** insulate Texaco from liability if Texaco's excessive discount otherwise violated the Act. [26]

[**44]**

[*568] ***LEdHN[6K]***[] [6K] ***LEdHN[10D]***[] [10D] ***LEdHN[14A]***[] [14A] ***LEdHN[15A]***[] [15A]Nor should any reader of the commentary on functional discounts be much surprised by today's result. Commentators have disagreed about the extent to **[***519]** which functional discounts are generally or presumptively allowable under the Robinson-Patman Act. They nevertheless tend to agree that in exceptional cases what is nominally a functional discount may be an unjustifiable price discrimination entirely within the coverage of the Act. [27] **[****46]** Others, like Frederick **[*569]** Rowe, have asserted the legitimacy of function discounts in more sweeping terms, [28] but even

---

[25] We added: "Here Standard discriminated in price between Perkins and Signal, and there was evidence from which the jury could conclude that Perkins was harmed competitively when Signal's price advantage was passed on to Perkins' retail competitor Regal. These facts are sufficient to give rise to recoverable damages under the Robinson-Patman Act." *395 U.S., at 648*.

[26] ***LEdHN[13B]***[] [13B]

In fact, the principles applied in Perkins -- that we ***HN15***[] will not construe the Robinson-Patman Act in a way that "would allow price discriminators to avoid the sanctions of the Act by the simple expedient of adding an additional link to the distribution chain," *395 U.S., at 647* -- seems capable of governing this case as well. It might be possible to view Perkins as standing for a narrower proposition, either because Signal apparently exercised majority control over the intermediary, Western Hyway, and its retailer, Regal, see *id., at 651* (MARSHALL, J., concurring in part and dissenting in part), or because Standard did not assert that its price to Signal reflected a "functional discount." However, as the Perkins dissent pointed out, ibid., the Perkins majority did not put any such limits on the principle it declared.

[27] See, *e.g.,* Celnicker & Seaman, Functional Discounts, Trade Discounts, Economic Price Discrimination and the Robinson-Patman Act, 1989 Utah L. Rev. 813, 857 (1989) (concluding that "trade discounts often are manifestations of economic price discrimination. . . . If a trade discount violates the normal competitive disadvantage criteria used under the Act, no special devices should be employed to protect it"); Rill, 53 Antitrust L.J., at 940-941 ("Although it is entirely appropriate for the FTC and the courts to insist that some substantial services be performed in order for a buyer to earn a functional discount, a requirement of precise mathematical equivalency makes no sense"); 3 E. Kintner & J. Bauer, Federal ***Antitrust Law*** 318-320, and n. 305 (1983) "Functional discounts . . . are usually deemed lawful," but this usual rule is subject to exception in cases, "arising in unusual circumstances," when the seller's "discrimination *caused"* the tertiary line injury); Calvani, 17 B. C. Ind. & Com. L. Rev., at 549, and n. 26 (1976) (discounts to wholesalers are generally held not to injure competition, but this rule is subject to qualifications, and "perhaps the most important caveat focuses on the situation where the seller sells to both resellers and the consumers and the resellers pass on to consumers all or part of the wholesaling functional discount"); C. Edwards, Price Discrimination Law 312-313 (1959) ("It is not surprising that from time to time the Commission has been unable to avoid finding injurious discrimination between direct and indirect customers nor to avoid corrective orders that sought to define the gap between prices at successive levels of distribution"); Kelley, Functional Discounts Under the Robinson-Patman Act, 40 Cal. L. Rev. 526, 556 (1952) (concluding that the "characterization of a price differential between two purchasers as a functional or trade discount accords it no cloak of immunity from the prohibitions of the Robinson-Patman Act"); Shniderman, 60 Harv. L. Rev., at 599-600 (Commission's approach to functional discounts "may have been influenced by the possibility of subtle price discriminating techniques through the employment of wholesalers receiving more than ample discount differentials").

Professor Edwards, among others, describes the status of functional discounts under the Robinson-Patman Act with clear dissatisfaction. He complains that "The failure of the Congress to cope with the problem . . . has left the Commission an impossible job in this type of case." Price Discrimination Law, at 313. He adds that the Commission's "occasional proceedings" have been attributed to the "Commission's wrong-headedness." *Id., at 312*. Professor Edward's observations about the merits of the statute and about prosecutorial discretion are obviously irrelevant to our own inquiry. Unlike scholarly commentators, we have a duty to be faithful to congressional intent when interpreting statutes, and are not free to consider whether, or how, the statute should be rewritten.

Rowe concedes the existence of an "exception to the general rule." F. Rowe, Price Discrimination Under the Robinson-Patman Act 174, n. 7 (1962); *id., at 195-205*. [29]

LEdHN[14B][] [14B] ***LEdHN[15B]***[] [15B] **[****45]**

LEdHN[6L][] [6L] ***LEdHN[10E]***[] [10E]

[**47]**

[*520] [**2550]** ***LEdHN[1E]***[] [1E] ***LEdHN[6M]***[] [6M] ***LEdHN[16]***[] [16]We conclude that the commentators' analysis, like the reasoning in Perkins and like the Federal Trade Commission's practice, renders implausible Texaco's contention that holding it liable here involves some departure from established understandings. Perhaps respondents' case against Texaco **[*570]** rests more squarely than do most functional discount cases upon direct evidence of the seller's intent to pass a price advantage through an intermediary. This difference, however, hardly cuts in Texaco's favor. In any event, the evidence produced by respondents also shows the scrambled functions which have more frequently signaled the illegitimacy under the Act of what is alleged to be a permissible functional discount. Both Gull and Dompier received the full discount on all their purchases even though most of their volume was resold directly to consumers. The extra margin on those sales obviously enabled them to price aggressively **[****48]** in both their retail and their wholesale marketing. To the extent that Dompier and Gull competed with respondents in the retail market, the presumption of adverse effect on competition recognized in the Morton Salt case becomes all the more appropriate. Their competitive advantage in that market also constitutes evidence tending to rebut any presumption of legality that would otherwise apply to their wholesale sales.

LEdHN[1F][] [1F]The evidence indicates, moreover, that Texaco affirmatively encouraged Dompier to expand its retail business and that Texaco was fully informed about the persistent and marketwide consequences of its own pricing policies. Indeed, its own executives recognized that the dramatic impact on the market was almost entirely attributable to the magnitude of the distributor discount and the hauling allowance. Yet at the same time that Texaco was encouraging Dompier to integrate downward, and supplying Dompier with a generous discount useful to such integration, Texaco was inhibiting upward integration by the respondents: two of the respondents sought permission from Texaco to haul their own fuel **[****49]** using their own tankwagons, but Texaco refused. The special facts of this case thus make it peculiarly difficult for Texaco to claim that it is being held liable for the independent pricing decisions of Gull or Dompier.

[*571] ***LEdHN[1G]***[] [1G]***LEdHN[6N]***[] [6N]***LEdHN[17]***[] [17]***LEdHN[18A]***[] [18A]As we recognized in Falls City Industries, ***HN16***[] "the competitive injury component of a Robinson-Patman Act violation is not limited to the injury to competition between the favored and the disfavored purchaser; it also encompasses the injury to competition between their customers." *460 U.S., at 436*. This conclusion is compelled by the statutory language,

---

[28] "In practice, the competitive effects requirement permits a supplier to quote different prices between different distributor classes -- so long as those who are higher up (nearer the supplier) on the distribution ladder pay *less* than those who are further down (nearer the consumer)." F. Rowe, Price Discrimination Under the Robinson-Patman Act 174 (1962) (footnote omitted); see also *id., at 178*.

[29] Rowe, writing prior to this Court's Perkins decision, describes the exception, which he identifies with the *Standard Oil* cases, as "of dubious validity today." *Id., at 196*. Rowe's analysis is flawed because he assumes that seller liability for tertiary line implications of wholesaler discounts must follow the logic of the *Standard Oil* complaint, and likewise assumes that this logic exposes to liability any seller who fails to monitor the resale prices of its wholesaler. *Id., at 204*. Indeed, Rowe's own discussion suggests one defect in his argument: legitimate wholesaler discounts will usually be insulated from liability by an absence of evidence on the causation issue. *Id., at 203-204*. In any event, nothing in our opinion today endorses a theory of liability under the Robinson-Patman Act for functional discounts so broad as the theory Rowe draws from *Standard Oil*.

which specifically encompasses not only the adverse effect of price discrimination on persons who either grant or knowingly receive the benefit of such discrimination, but also on "customers **[****50]** of either of them." Such indirect competitive effects surely may not be presumed automatically in every functional discount setting, and, indeed, **[***521]** one would expect that most functional discounts will be legitimate discounts which do not cause harm to competition. At the least, a functional discount that constitutes a reasonable reimbursement for the purchasers' actual marketing functions will not violate the Act. When a functional discount is legitimate, the inference of injury to competition recognized in the Morton Salt case will simply not arise. Yet it is also true that not every functional discount is entitled to a judgment of legitimacy, and that it will sometimes be possible to produce evidence showing that a particular functional discount caused a price discrimination of the **[**2551]** sort the Act prohibits. When such anti-competitive effects are proved -- as we believe they were in this case -- they are covered by the Act. [30]

LEdHN[18B][] [18B]

[**51]** VI

LEdHN[19][] [19] ***LEdHN[20]***[] [20]At the trial respondents introduced evidence describing the diversion of their customers to specific stations supplied by Dompier. Respondents' expert testimony on damages also focused on the diversion of trade to specific Dompier-supplied stations. The expert testimony analyzed the entire **[*572]** damages period, which ran from 1972 and 1981 and included a period prior to 1974 when Dompier did not own any retail stations (although the jury might reasonably have found that Dompier controlled the Red Carpet station from the outset of the damages period). Moreover, respondents offered no direct testimony of any diversion to Gull and testified that they did not even know that Gull was being supplied by Texaco. Texaco contends that by basing the damages award upon an extrapolation from data applicable to Dompier-supplied stations, respondents necessarily based the award upon the consequences of pricing decisions made by independent customers of Dompier. Texaco argues that the damages award must therefore be judged excessive **[****52]** as a matter of law.

Even if we were to agree with Texaco that Dompier was not a retailer throughout the damages period, we could not accept Texaco's argument. Texaco's theory improperly blurs the distinction between the liability and the damages issues. The proof established that Texaco's lower prices to Gull and Dompier were discriminatory throughout the entire nine-year period; that at least Gull, and apparently Dompier as well, was selling at retail during that entire period; that the discounts substantially affected competition throughout the entire market; and that they injured each of the respondents. There is no doubt that respondents' proof of a continuing violation of the Act throughout the nine-year period was sufficient. Proof of the specific amount of their damages was necessarily less precise. Even if some portion of some of respondents' injuries may be attributable to the conduct of independent retailers, the expert testimony nevertheless provided a sufficient basis for an acceptable estimate of the amount of damages. We have held that ***HN17***[] a plaintiff may not recover damages merely **[****53]** by showing a violation of the Act; rather, the plaintiff must also "make **[***522]** some showing of actual injury attributable to something the antitrust laws were designed to prevent. *Perkins v. Standard Oil Co., 395 U.S. 642, 648 **[*573]** (1969)* (plaintiff 'must, of course, be able to show a causal connection between the price discrimination in violation of the Act and the injury suffered')." *J. Turett Payne v. Chrysler Motors Corp., 451 U.S., at 562*. At the same time, however, we reaffirmed our "traditional rule excusing antitrust plaintiffs from an unduly rigorous standard of proving antitrust injury." *Id., at 565*. See also *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123-124 (1969)*; *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264-265 (1946)*. [31] Moreover, as we have noted, Texaco did not **[**2552]**

---

[30] The parties do not raise, and we therefore need not address, the question whether the inference of injury to competition might also be negated by evidence that disfavored buyers could make purchases at a reasonable discount from favored buyers.

[31] In J. Truett Payne, 451 U.S., at 465-566, we quoted with approval the following passage:

HN18[] "Damage issues in these cases are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts. The Court has repeatedly held that in the absence of more precise proof, the factfinder may 'conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that object to the instructions to the jury on the damages issue. A possible flaw in the jury's calculation of the amount of damages would not be an appropriate basis for granting Texaco's motion for a judgment notwithstanding the verdict.

[**54]** The judgment is affirmed.

It is so ordered.

Concur by: WHITE; SCALIA

Concur

JUSTICE WHITE, concurring in the result.

Texaco's first submission urging a blanket exemption for all functional discounts is rejected by the Court on the ground stated in *FTC v. Anheuser Busch, Inc., 363 U.S. 536, 550 (1960)*, that the "statute itself spells out the conditions which make a price difference illegal or legal, and we would derange **[*574]** this integrated statutory scheme" by providing a defense not contained in the statute. In the next section of its opinion, however, the Court not only declares that a price differential that merely accords due recognition and reimbursement for actual marketing functions not only does not trigger the presumption of an injury to competition, see *FTC v. Morton Salt Co., 334 U.S. 37, 46-47 (1948)*, but also announces that "such a discount is not illegal." Ante, at 16. There is nothing in the Act to suggest such a defense to a charge of price discrimination that "may . . . substantially . . . lessen competition . . . in any line of commerce, or to injure, destroy, or prevent competition with any person **[****55]** who either **[***523]** grants or knowingly receives the benefit of such discrimination, or with customers of either of them." *15 U.S.C. § 13(a)*. Nor is there any indication in prior cases that the Act should be so construed. The Court relies heavily on the Report of the Attorney General's National Committee to Study the Antitrust Laws (1955) and also suggests that the Federal Trade Commission permits "legitimate functional discounts" but will not countenance subterfuges. Ante, at 17.

Thus, a Texaco retailer charged a higher price than a distributor who is given what the Court would call a legitimate discount is entirely foreclosed, even though he offers to prove, and could prove, that the distributor sells to his customers at a price lower than the plaintiff retailer pays Texaco and that those customers of the distributor undersell the plaintiff and have caused plaintiff's business to fail. This kind of injury to the Texaco retailer's ability to compete is squarely covered by the language of *§ 13(a)*, which reaches not only injury to competition but injury to Texaco retail customers' ability to compete with the distributor's customers. The Court neither explains **[****56]** why this is not the case nor justifies its departure from the provisions of the Act other than by suggesting that when there is a legitimate discount, it is the distributor's decision, not the discount given by Texaco, that causes the injury, even though the latter makes possible the **[*575]** distributor's discount. Perhaps this is the case if the concept of a legitimate price discrimination other than those legitimated by the Act's provisions is to be implied. But that poses the question whether the Act is open to such a construction.

The Attorney General's Committee noted the difficulty. Under the construction of the Act that the FTC was then espousing and applying, see *Standard Oil Co. v. FTC, 173 F.2d 210 (CA7 1949)*, rev'd on other grounds, *340 U.S. 231 (1951)*, the Committee said, "[a] supplier according functional discounts to a wholesaler and other middleman while at the same time marketing directly to retailers encounters serious legal risks." Report of Attorney **[**2553]** General's National Committee, at 206. The Committee clearly differed with the FTC and called for an authoritative construction of the Act that would accommodate "functional **[****57]** discounts to the broader purposes of the Act and of antitrust policy." *Id., at 208*. At a later stage in the Standard Oil case, the FTC disavowed any purpose to

---

defendants' wrongful acts had caused damage to the plaintiffs.' Bigelow v. RKO Pictures, Inc., [327 U.S.], at 264. See also *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 377-379 (1927)*; *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 561-566 (1931)*." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S., at 123-124*.

eliminate legitimate functional pricing or to make sellers responsible for the pricing practices of its wholesalers. The reversal of its position, which the Court of Appeals for the Seventh Circuit had affirmed, was explained on the ground of "broader antitrust policies." Reply Brief for Petitioner in FTC v. Standard Oil Co., O. T. 1957, No. 24, p. 32. The FTC has also appeared as an amicus in this case urging us to recognize and define legitimate functional discounts. Its brief, however, does not spell out the types of functional discounts that the Commission considers defensible. Nor does the FTC cite any case since the filing of its reply brief in 1957 in which it has purported to describe the contours of legitimate functional pricing. Furthermore, the FTC's argument apparently does not persuade the **[***524]** Court, for the Commission recommends reversal and remand, while the Court affirms the judgment.

[*576] In the absence of Congressional attention to this long-standing issue involving antitrust policy, I doubt **[****58]** that at this late date we should attempt to set the matter right, at least not in a case that does not require us to define what a legitimate functional discount is. If the FTC now recognizes that functional discounts given by a producer who sells both to distributors and retailers are legitimate if they reflect only proper factors and are not subterfuges, I would await a case challenging such a ruling by the FTC. We would then be reviewing a construction of the Act by the FTC and its explanation of legitimate functional discount pricing.

This is obviously not such a case. This is a private action for treble damages, and the Court rules against the seller-discounter since under no definition of a legitimate functional discount do the discounts extended here qualify as a defense to a charge of price discrimination. We need do no more than the Court did in *Perkins v. Standard Oil Co. of California, 395 U.S. 642 (1969)*. This the Court plainly recognizes, and it should stop there. Hence, I concur in the result.

JUSTICE SCALIA, with whom JUSTICE KENNEDY joins, concurring in the judgment.

I agree with the Court that none of the arguments pressed by petitioner for removing **[****59]** its conduct from the coverage of the Robinson-Patman Act is persuasive. I cannot, however, adopt the Court's reasoning, which seems to create an exemption for functional discounts that are "reasonable" even though prohibited by the text of the Act.

The Act provides:

"It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent **[*577]** competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: Provided, That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered." *15 U.S.C. § 13(a)*.

As the Court notes, ante, at 10, sales of like goods in interstate **[****60]** commerce violate this provision if three conditions are met: (1) the seller discriminates in price between purchasers, (2) the effect of such discrimination **[**2554]** may be to injure competition between the victim and beneficiaries of the discrimination or their customers, and (3) the discrimination is not cost-based. Petitioner makes three arguments, one related to each of these conditions. First, petitioner argues that a price differential between purchasers at different **[***525]** levels of distribution is not discrimination in price. As the Court correctly concludes, that cannot be so. As long ago as *FTC v. Morton Salt Co., 334 U.S. 37 (1948)*, we held that the Act prohibits differentials in the prices offered to wholesalers and retailers. True, in Morton Salt the retailers were being favored over the wholesalers, the reverse of the situation here. But if that factor could make any difference, it would bear not upon whether price discrimination occurred, but upon whether it affected competition, the point I address next.

Second, petitioner argues that its practice of giving wholesalers Gull and Dompier discounts unavailable to retailer Hasbrouck could not have **[****61]** injured Hasbrouck's competition with retailers who purchased from Gull and Dompier. Any competitive advantage enjoyed by the competing retailers, petitioner asserts, was the product of independent decisions by Gull and Dompier to pass on the discounts to those retailers. This also is unpersuasive. The Act forbids price discrimination whose effect may be "to injure, destroy, or **[*578]** prevent competition with any person who . . . knowingly receives the benefit of such discrimination, or with customers of [that person]." *15 U.S.C. § 13(a)* (emphasis added). Obviously, that effect upon "competition with customers" occurs whether or not the beneficiary's choice to pass on the discount is his own. The existence of an implied "proximate cause" requirement that would cut off liability by reason of the voluntary act of pass-on is simply implausible. This field is laden with "voluntary acts" of third persons that do not relieve the violator of liability -- beginning with the act of the ultimate purchaser, who in the last analysis causes the injury to competition by "voluntarily" choosing to buy from the seller who offers the lower price that the price discrimination **[****62]** has made possible. The Act focuses not upon free will, but upon predictable commercial motivation; and it is just as predictable that a wholesaler will ordinarily increase sales (and thus profits) by passing on at least some of a price advantage, as it is that a retailer will ordinarily buy at the lower price. To say that when the Act refers to injury of competition "with customers" of the beneficiary it has in mind only those customers to whom the beneficiary is compelled to sell at the lower price is to assume that Congress focused upon the damage caused by the rare exception rather than the damage caused by the almost universal rule. The Court rightly rejects that interpretation. The independence of the pass-on decision is beside the point.

Petitioner's third point relates to the third condition of liability (i. e., lack of a cost justification for the discrimination), but does not assert that such a justification is present here. Rather, joined by the United States as amicus curiae, petitioner argues at length that even if petitioner's discounts to Gull and Dompier cannot be shown to be cost-based they should be exempted, because the "functional discount" is an efficient and legitimate **[****63]** commercial practice that is ordinarily cost-based, though it is all but impossible to establish **[*579]** cost justification in a particular case. The short answer to this argument is that it should be addressed to Congress.

The Court does not, however, provide **[***526]** that response, but accepts this last argument in somewhat modified form. Petitioner has violated the Act, it says, only because the discount it gave to Gull and Dompier was not a "reasonable reimbursement for the value to [petitioner] of their actual marketing functions." Ante, at 16; see also ante, at 25. Relying on a mass of extratextual materials, the Court concludes that the Act permits such "reasonable" functional discounts even if the supplier cannot satisfy the "rigorous **[**2555]** requirements of the cost justification defense." Id., at 15. I find this conclusion quite puzzling. The language of the Act is straightforward: any price discrimination whose effect "may be substantially . . . to injure, destroy, or prevent completion" is prohibited, unless it is immunized by the "cost justification" defense, i. e., unless it "makes only due allowance for differences in the cost of manufacture, sale, or delivery **[****64]** resulting from the differing methods or quantities in which [the] commodities are . . . sold or delivered." *15 U.S.C. § 13(a)*. There is no exception for "reasonable" functional discounts that do not meet this requirement. Indeed, I am at a loss to understand what makes a functional discount "reasonable" unless it meets this requirement. It does not have to meet it penny-for-penny, of course: The "rigorous requirements of the cost justification defense" to which the Court refers, ante, at 15, are not the rigors of mathematical precision, but the rigors of proof that the amount of the discount and the amount of the cost saving are close enough that the difference cannot produce any substantial lessening of competition. See ante, at 15, n. 18. How is one to determine that a functional discount is "reasonable" except by proving (through the normally, alas, "rigorous" means) that it meets this test? Shall we use a nationwide average?

I suppose a functional discount can be "reasonable" (in the relevant sense of being unlikely to subvert the purposes of **[*580]** the Act) if it is not commensurate with the supplier's costs saved (as the cost-justification defense **[****65]** requires), but is commensurate with the wholesaler's costs incurred in performing services for the supplier. Such a discount would not produce the proscribed effect upon competition, since if it constitutes only reimbursement for the wholesaler one would not expect him to pass it on. The relevant measure of the discount in order to determine "reasonableness" on that basis, however, is not the measure the Court applies to Texaco ("value to [the supplier] of [the distributor's] actual marketing functions," ante, at 16), but rather "cost to the distributor of the distributor's actual marketing functions" -- which is of course not necessarily the same thing. I am therefore quite unable to understand what the Court has in mind by its "reasonable" functional discount that is not cost justified.

To my mind, there is one plausible argument for the proposition that a functional basis for differential pricing ipso facto -- cost justification or not -- negates the probability of competitive injury, thus destroying an element of the plaintiff's prima facie case, see *Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434* ***[***527]*** *(1983)*: In a market that is **[****66]** really functionally divided, retailers are in competition with one another, not with wholesalers. That competition among retailers cannot be injured by the supplier's giving lower prices to wholesalers -- because if the price differential is passed on, all retailers will simply purchase from wholesalers instead of from the supplier. Or, to put it differently, when the market is functionally divided all competing retailers have the opportunity of obtaining the same price from wholesalers, and the supplier's functional price discrimination alone does not cause any injury to competition. Therefore (the argument goes), if functional division of the market is established, it should be up to the complaining retailer to show that some special factor (e. g., an agreement between the supplier and the wholesaler that the latter will not sell to the former's retailer-customers) prevents this normal market **[*581]** mechanism from operating. As the Court notes, ante, at 26, this argument was not raised by the parties here or below, and it calls forth a number of issues that would benefit from briefing and factual development. I agree that we should not decide the merit of this argument in the **[****67]** first instance.

For the foregoing reasons, I concur in the judgment.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN1[] **Purchasers, Indirect Purchasers**

Indirect purchaser actions are not available under federal ***antitrust law***. Federal law does not permit such actions because they will add whole new dimensions of complexity to treble-damages lawsuits and seriously undermine their effectiveness.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN2[] **Private Actions, Purchasers**

State law indirect purchaser actions are not preempted by federal law but such actions complicate direct purchaser actions and the state law indirect actions might best be handled separately.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN3[] Private Actions, Purchasers

Federal courts have the discretion to decline to exercise pendent jurisdiction over state indirect purchaser claims, even if those claims are brought in the first instance in federal court.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN4[] Jurisdiction, Jurisdictional Sources

Personal jurisdiction decisions require a two-step analysis. First, a court must consider whether the facts satisfy the statutory requirements of the Minnesota long-arm statute, *Minn. Stat. § 543.19* (1988). Second, a court must determine whether the defendant has sufficient "minimum contacts" with the forum state so that the court's exercise of jurisdiction will be fair and in accordance with due process. Once jurisdiction has been challenged, the plaintiff bears the burden of proving the existence of jurisdiction. The court views the facts in the light most favorable to the plaintiff, but to avoid dismissal the plaintiff must make a prima facie showing of jurisdiction.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Torts > Procedural Matters > Commencement & Prosecution > In Personam Jurisdiction

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN5[] Jurisdiction, Subject Matter Jurisdiction

Minn. Stat. § 543.19, subd. 1(b) allows for personal jurisdiction if the defendant transacts any business within Minnesota, and *Minn. Stat. § 543.19, subd. 1(d)* allows for personal jurisdiction where the defendant commits any act outside Minnesota that causes injury or property damage in Minnesota. The Minnesota long-arm statute, *Minn. Stat. § 543.19* (1988) has been construed to extend to the limits of due process.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] In Rem & Personal Jurisdiction, Constitutional Limits

A court must examine five factors to determine whether the requirements of due process are satisfied for personal jurisdiction, i.e. the nature and availability of the contacts with the forum state, the quantity of contacts with the forum state, the relation of the cause of action to the contacts, the interest of the forum state in providing a forum for its residents, and the convenience of the parties.The last two factors are of lesser importance.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN7[] Jurisdiction, Jurisdictional Sources

The mere presence of an association's members within Minnesota does not confer personal jurisdiction on the association.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN8[] In Rem & Personal Jurisdiction, In Personam Actions

Communications, such as telephone calls and promotional material mailings, alone do not confer personal jurisdiction.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Civil Procedure > ... > Summary Judgment > Appellate Review > General Overview

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN9[] Complaints, Requirements for Complaint

A court's standard of review on a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* is limited and matters outside the pleadings will not be considered. Under *Rule 12(b)(6)*, a court will not grant a dismissal unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim that will entitle him to relief. Notice pleading is all that is required for a valid antitrust complaint. Conclusory allegations that a defendant has violated the antitrust laws and that plaintiff is injured thereby will not survive a motion to dismiss if it is not supported by facts that constitute a legitimate claim for relief. However, the alleged facts need not be spelled out with exactitude, nor must recovery appear imminent. An antitrust complaint should not be dismissed unless it is found to be wholly frivolous.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN10[] Statute of Limitations, Time Limitations

The "fraudulent concealment" doctrine is adopted in the Eighth Circuit. Under this doctrine, the limitation period begins to run from the time that the plaintiff, by the exercise of reasonable diligence, discovers or should discover his cause of action. Fraudulent concealment consists of two elements, i.e. the use of fraudulent means by the defendant, and successful concealment from the injured party. "Due diligence" need not be pleaded, rather, it is an affirmative defense.

Judges: Paul A. Magnuson, United States District Judge.

Opinion by: MAGNUSON

Opinion

ORDER

This matter is before the court upon the following four motions:

1. Defendants' joint motion to dismiss the *Ogren* and *McPherson* cases;

2. Defendant The Popcorn Institute's motion to dismiss for lack of personal jurisdiction;

3. Defendant Golden Valley Microwave Foods' motion to dismiss pursuant to *Rule 12(b)(6)* or, alternatively, Rule 56; and

4. Certain defendants' motions to dismiss plaintiffs' complaints to the extent they seek relief outside the applicable statute of limitations.

For the reasons set forth below, the first two motions are granted and the second two are denied.

I. The *Ogren* and *McPherson* Complaints

The matter before the court is, for the bulk of the complaints, a putative class action brought on behalf of direct purchasers of bulk popcorn. The *Ogren* and *McPherson* complaints, however, are indirect purchaser claims brought **[*3]** pursuant to state law.

HN1[] Indirect purchaser actions are not available under federal ***antitrust law***. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 738 (1977)*. Federal law does not permit such actions because they "would add whole new dimensions of complexity to treble-damages suites and seriously undermine their effectiveness." *Id.* Such complexity arises because "potential plaintiffs at each level in the distribution chain are in a position to assert conflicting claims to a common fund -- the amount of the alleged overcharge -- by contending that the entire overcharge was absorbed at that particular level in the chain." *Id.*

In *California v. ARC America Corp., __ U.S. __ 109 S.Ct. 1661 (1989)*, the court held that ***HN2***[] state law indirect purchaser actions are not preempted by federal law but specifically noted that such actions complicate direct purchaser actions and that such actions might best be handled separately:

State indirect purchaser actions will not necessarily be brought in federal court. 817 F.2d, at 1445. Unlike the federal indirect purchaser claims asserted in *Illinois Brick,* which would have been exclusively within the jurisdiction of the federal courts, **[*4]** *15 U.S.C. §§ 15(a)*, *26*, claims under state indirect purchaser statutes could be brought in state court, separately from federal actions brought by direct purchasers. Moreover, ***HN3***[] federal courts have the discretion to decline to exercise pendent jurisdiction over state indirect purchaser claims, even if those claims are brought in the first instances in federal court. *See* *United Mine Workers of America v. Gibbs, 383 U.S. 715, 725-26, 86 S.Ct. 1130, 1138-39, 16 L.Ed.2d 218 (1966)*. Since many state indirect purchaser actions would be heard in state courts, at least when the federal courts determined that hearing those claims would be overly burdensome, any complications of federal direct purchaser actions in federal court would be minimal.

109 S.Ct at 1666.

Here the court is faced with state indirect purchaser claims pendent to federal injunctive claims made under the Clayton Act, *15 U.S.C. § 26*. The pendent state law claims for damages dwarf the injunctive claims in significance and complexity. Allowing the indirect purchaser claims to remain in this action will, assuming class certification is even appropriate for such claims, require the appointment of subclasses with competing **[*5]** interests in the defendants' funds and greatly complicate the computation of damages. The court would also have to make first impression interpretations of the various state statutes involved. The court concludes that the pending indirect purchaser will be overly burdensome and thus declines to exercise pendent jurisdiction over them.

II. The Popcorn Institute's Motion to Dismiss

Defendant The Popcorn Institute, a non-profit corporation, is organized under the laws of the state of Illinois, with its principal place of business in Chicago. It is a trade organization for the bulk popcorn industry.

The Popcorn Institute's contacts with Minnesota include two Minnesota members and a foundation in Minnesota formed to promote the sale of microwave popcorn with four Minnesota members. The Institute's president solicited the four foundation members by telephone, mail, and several personal visits to Minnesota. The Institute also paid a Minnesota researcher to study certain microwave popcorn technology. Finally, the Institute mails promotional materials to members and non-members in Minnesota both as part of national promotional campaigns and of less comprehensive promotional efforts.

The Institute **[*6]** challenges plaintiffs' assertion of personal jurisdiction in this forum, arguing that it has insufficient contacts with Minnesota. Plaintiffs contend that they have made a *prima facie* showing of personal jurisdiction by alleging that the Institute is a participant in a conspiracy which has caused damage in Minnesota and substantial contacts with Minnesota.

HN4[] Personal jurisdiction decisions require a two-step analysis. First, the court must consider whether the facts satisfy the statutory requirements of the Minnesota long-arm statute, *Minn. Stat. § 543.19* (1988). Second, the court must determine whether the defendant has sufficient "minimum contacts" with the forum state so that the court's exercise of jurisdiction would be fair and in accordance with due process. *Wines v. Lake Havasu Boat Mfg., Inc., 846 F.2d 40, 42 (8th Cir. 1988)*; *Tonka Corp. v. TMS Entertainment, Inc., 638 F. Supp. 386, 388 (D. Minn. 1985)*. "Once jurisdiction has been challenged, the plaintiff bears the burden of proving the existence of jurisdiction." *Wines, 846 F.2d at 42*. The court views the facts in the light most favorable to the plaintiff, but to avoid dismissal the plaintiff must make **[*7]** a *prima facie* showing of jurisdiction. *Aaron Ferer and Sons Co. v. Diversified Metals*

Corp., 564 F.2d 1211, 1215 (8th Cir. 1977); *Watlow Electric Mfg. Co. v. Patch Rubber Co., 838 F.2d 999, 1000 (8th Cir. 1988)*.

Under the Minnesota long-arm statute, two provisions potentially apply here: ***HN5***[] *Minn. Stat. § 543.19, subd. 1(b)*, allowing for jurisdiction if the defendant "transacts any business within the state," or subd. 1(d) where the defendant "commits any act outside Minnesota causing injury or property damage in Minnesota." The Minnesota long-arm statute has been construed to extend to the limits of due process. *Wines, 846 F.2d at 42*; *Vikes v. Flaby, 316 N.W.2d 276, 281 (Minn. 1982)*. [1]

HN6[] The court must examine five factors **[*8]** in determining whether the requirements of due process have been satisfied:

1. the nature and availability of the contacts with the forum state;

2. the quantity of contacts with the forum state;

3. the relation of the cause of action to the contacts;

4. the interest of the forum state in providing a forum for its residents; and

5. the convenience of the parties.

The last two factors are of lesser importance. *Aftanase v. Economy Baler Co., 343 F.2d 187, 197* (8th Cir. 1965.

In the instant case the court concludes that it cannot constitutionally exercise personal jurisdiction over The Popcorn Institute. First, ***HN7***[] the mere presence of Institute members does not confer jurisdiction on the trade association. *See* *Midwest Fur Producers Ass'n v. Mutation Mink Bar Ass'n, 102 F. Supp. 649 (D. Minn. 1952)*; *Donatelli v. Nat'l Hockey League, 893 F.2d 459, 469 (1st Cir. 1990)* (due process requirements not satisfied over defendant association where its only contacts with the forum were Boston Bruins advertisements and ticket sales over which defendant had no control and which were unrelated to plaintiffs' cause of action). Second, much of the connections with Minnesota concern **[*9]** telephone calls to Minnesota and the mailing of promotional material. Such ***HN8***[] communications alone do not confer jurisdiction either. *See* *Scullin Steel v. National Railway Utilization Corp., 676 F.2d 309, 312-14 (8th Cir. 1982)*; *Larson v. Association of Apartment Owners of Lahaina Shores, 606 F. Supp. 579, 583 (D. Minn. 1985)*. The president of the Institute, additionally, traveled to Minnesota to solicit membership, but such contacts were not frequent. The same can be said for the formation of the microwave popcorn and microwave technology research.

Given the relatively limited contacts the Institute has with Minnesota, a relationship ("nexus") between these contacts must exist. Plaintiffs rely on their allegation that the Institute is a member of the price-fixing conspiracy. Since the Institute's function as a trade association is related to the bulk popcorn market, according to plaintiffs, the Minnesota contacts necessarily relate to the alleged price-fixing conspiracy. The court finds this bare assertion insufficient to make a *prima facie* showing of relatedness. Plaintiffs have provided no specific assertions with resect to any of the alleged contacts -- including the **[*10]** Education Foundation -- which might allow an inference that the contacts relate to the price-fixing conspiracy. The lack of a nexus between the contacts and the litigation defeats personal jurisdiction here. *See* *Land-o-Nod v. Basset Furniture Ind., 708 F.2d 1338, 1341 (8th Cir. 1983)* (dismissing trademark infringement case where defendant regularly sold goods in Minnesota but none of the allegedly infringing goods were sold in Minnesota).

---

[1] The court does not address the issue of whether the long-arm statute allows for "general" jurisdiction as set forth in *Helicopteros Nacionales de Columbia, S.A. v. Hall, 466 U.S. 408, 414 n.8 (1984)*, because such a decision need not be made on the facts plaintiffs allege.

Plaintiffs' similar argument that antitrust co-conspirators such as the Institute are subject to personal jurisdiction wherever the antitrust violation has effect also fails. The due process contact requirements still apply. *See* *I.S. Joseph Co., Inc. v. Mannesmann Pipe and Steel Corp., 408 F. Supp. 1023 (D. Minn. 1976)*; *State of West Virginia v. Morton Int'l, Inc., 264 F. Supp. 689 (D. Minn. 1967)*. This court lacks personal jurisdiction over The Popcorn Institute.

III. Golden Valley Microwave Foods's ("GVMF") Motion to Dismiss

Plaintiff alleges that defendant GVMF was a participant in the price-fixing conspiracy. GVMF has submitted an affidavit claiming that such allegations are without merit because GVMF was never a *seller* of bulk **[*11]** popcorn and because it did not assume the liabilities of Vogel merely by purchasing its stock.

Plaintiffs respond by claiming that GVMF was a "late joiner" to the conspiracy by acquiring Vogel and that the corporate veil can be pierced to hold GVMF liable for Vogel's anti-competitive conduct.

Initially, the court determines that it will treat this motion as a motion for dismissal pursuant to *Fed. R. Civ. P. 12(b)(6)* and not a summary judgment motion as GVMF desires. [2] ***HN9***[] The court's standard of review, consequently, is limited and matters outside the pleadings will not be considered. Under *Fed. R. Civ. P. 12(b)(6)* the court will not grant dismissal "unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46 (1957)*. "It is now well accepted that notice pleading is all that is required for a valid antitrust complaint." *Quality Foods de Centro Am. v. Latin Am. Agribusiness Dev. Corp., 711 F.2d 989, 995 (11th Cir. 1983)*. "Conclusory allegations that defendant violated the antitrust laws and plaintiff was injured thereby will not survive a motion to dismiss if not supported **[*12]** by facts constituting a legitimate claim for relief . . . . However, the alleged facts need not be spelled out with exactitude, nor must recovery appear imminent." *Id.* (citations omitted) "[An antitrust] complaint should not be dismissed unless it is found to be 'wholly frivolous.'" *Id.*

Under this limited standard of review, the court concludes that plaintiffs have adequately pleaded their case against GVMF. The complaint contains a general description of the price-fixing conspiracy and specifically identifies GVMF as a participant in the conspiracy. The complaint includes specific charges against defendant Vogel's employee and draws a connection to GVMF due to its acquisition of Vogel. Such allegations sufficiently put GVMF on notice that it might potentially be held liable under the various theories plaintiffs advance in response to the dismissal motion. GVMF's dismissal motion must fail.

IV. Defendants' Statute of Limitations Motion

[*13] Finally, the court addresses defendants' joint motion to dismiss the complaint to the extent it seeks relief outside the applicable statute of limitations. Defendants maintain that plaintiffs have failed to plead the "fraudulent concealment" doctrine. The complaint alleges that plaintiffs failed to discovery the conspiracy due to the following acts of fraudulent concealment: first, secret means of communication including clandestine telephone communications and informal meetings; second, the use of "rigged bids" to give the illusion of competition; and third, meeting through a "legitimate trade association" to "cloak" their conspiracy.

HN10[] The "fraudulent concealment" doctrine was adopted in the Eighth Circuit in *Kansas City. Mo. v. Federal Pacific Electrical Co., 310 F.2d 271 (8th Cir. 1962)*, *cert. denied*, *83 S.Ct. 356 (1962)*. Under the *Federal Pacific* doctrine, the limitation period begins to run from the time that the plaintiff, by the exercise of reasonable diligence, discovers or should have discovered his cause of action. *Id.* Fraudulent concealment consists of two elements: 1) the use of fraudulent means by the defendant, and 2) successful concealment form **[*14]** the injured party. *Bruno v. United States, 547 F.2d 71, 74 (8th Cir. 1976)* (citing *Federal Pacific, supra*). "Due diligence" need not be pleaded; rather, it is an affirmative defense. *Id.*

Here plaintiffs have adequately pleaded fraudulent concealment. Plaintiffs set forth various affirmative means by which defendants kept the conspiracy secret. *See* *In re Wirebound Boxes Antitrust Litigation, 128 F.R.D. 262, 1989*

---

[2] Plaintiffs' Rule 56(f) affidavit establishes that summary judgment is premature.

U.S. Dist. LEXIS 12935, No. MDL-793 (D. Minn. May 22, 1989) (holding that plaintiffs adequately pleaded fraudulent concealment by alleging secret means of communication, rigged bids, and the use of purportedly legitimate trade association meetings). Defendants' motion to dismiss fails for this reason.

Accordingly, IT IS ORDERED That:

1. Defendants' motion to dismiss the *Ogren* and *McPherson* complaints is GRANTED in part. The indirect purchaser actions, with the exception of the federal injunctive claims, are DISMISSED.

2. The Popcorn Institute's Motion to dismiss for lack of personal jurisdiction is GRANTED and The Popcorn Institute is DISMISSED;

3. Golden Valley Microwave Foods' motion to dismiss is DENIED; and

4. Defendants' motion to dismiss plaintiffs' complaint to the extent it seeks **[*15]** relief outside the statute of limitations is DENIED.

Opinion

MEMORANDUM AND ORDER

This matter is before the court upon the motion of plaintiff International Travel Arrangers (ITA) for reconsideration of a portion of the court's Memorandum and Order dated October 5, 1989. Based on a recent Supreme Court case, *California v. American Stores Co., 110 S. Ct. 1853* (April 30, 1990), plaintiff seeks a determination that divestiture is an available remedy in this case. The court grants plaintiff's motion insofar as it applies to the Sherman Act claims in this case and to plaintiff's challenge to the acquisition of Mainline Travel, Inc. (MLT) under § 7 of the Clayton Act, but the court will not resurrect plaintiff's § 7 claim contesting the **[*2]** acquisition of Republic Airlines, Inc. (Republic), which was dismissed in the court's prior Memorandum and Order.

The October 5, 1990 Memorandum and Order set forth in detail the factual background to this litigation, and it will not be repeated here. In summary, ITA's supplemental complaint asserts seven claims for relief based on actions relating to or occurring after the acquisitions of MLT and Republic by Northwest Airlines, Inc. (Northwest). Of those seven claims, three are rooted in ***antitrust law***. First, ITA challenges the acquisition of MLT under § 7 of the Clayton Act. Second, ITA alleges that Northwest's acquisition of Republic also violated § 7 of the Clayton Act. Third, ITA contends that the defendants combined and conspired to monopolize, attempted to monopolize, and did in fact monopolize one or more lines of trade or commerce in violation of § 1 and § 2 of the Sherman Act.

On cross motions for summary judgment the court ruled, *inter alia,* that ITA's Clayton Act § 7 claim challenging the Republic acquisition was barred under the doctrine of collateral estoppel, and the court therefore dismissed plaintiff's second claim. The Memorandum and Order states:

The availability **[*3]** of remedies for post-merger anticompetitive activities insures that the parties involved will not be able to misbehave with impunity. On the other hand, the parties should not be subject to fear that DOT approval will be overturned and the acquisition undone. Out of respect for the administrative procedure described in the Federal Aviation Act and the exclusive review provisions set forth therein, this court must uphold the finality of the July 31, 1986 order.

At the same time, the court refused to dismiss ITA's other antitrust claims and did not restrict the type of remedies available should plaintiff prevail on them.

More than five months later the Supreme Court decided *American Stores.* The case stemmed from a proposed merger between two large supermarket chains in California: The Federal Trade Commission (FTC) worked out a negotiated settlement between the merger candidates, and prior to the merger the parties agreed to abide by a consent order. After the FTC approved the merger the State of California filed an antitrust action challenging the merger under § 1 of the Sherman Act and §§ 7 and 16 of the Clayton Act. In its prayer for relief, California sought, among other things, **[*4]** a preliminary injunction requiring the merging parties to hold and operate the supermarket chains separately from one another pending final adjudication and a permanent injunction ordering divestiture.

The district court granted California's motion for a temporary restraining order and later entered a preliminary injunction. On appeal the Ninth Circuit reversed, finding that the preliminary injunction had the same effect as an order of divestiture and that "divestiture is not an available remedy in private actions under § 16 of the Clayton Act." *California v. American Stores Co., 872 F.2d 837, 844 (9th Cir. 1989)*, *reversed*, *110 S. Ct. 1853 (1990)*. The Supreme Court granted certiorari to resolve a split among the circuits on this issue and, after an analysis of the text and legislative history of the Clayton Act, determined that in a private antitrust action divestiture may be an appropriate remedy. The Court drew a comparison between private actions under § 16 and government prosecutions under § 15 of the Clayton Act, in which divestiture is an accepted remedy, and found no reason to prohibit the remedy of divestiture in private actions. ***HN1***[] "Divestiture has been called the most **[*5]** important of antitrust remedies. It is simple, relatively easy to administer, and sure. It should always be in the forefront of a court's mind when a violation of § 7 has been found." *American Stores, 110 S. Ct. at 1859* (quoting *United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 329-31 (1961)* (footnotes omitted)).

The Court in *American Stores* did not address the issue of whether divestiture is available in a private action in which violations of § 1 and § 2 of the Sherman Act are alleged. The Court had no need to do so because the district court found that California had proved a prima facie violation of § 7 of the Clayton Act. This court's prior Memorandum and Order also stated no conclusions about possible remedies for Sherman Act violations. The court ruled only that plaintiff had established issues for trial regarding defendants' alleged Sherman Act violations and, on the other hand, that ITA's challenge to the Republic acquisition itself under § 7 of the Clayton Act was barred by collateral estoppel. The question remains whether ITA may seek divestiture of Republic as a remedy for any Sherman Act violations that it may prove.

ITA's claims for injunctive **[*6]** relief are rooted in § 16 of the Clayton Act, which states in part:

HN2[] Any person, firm, corporation, or association Shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. . . .

15 U.S.C. § 26. ***HN3***[] The "antitrust laws" referred to in § 16 include provisions of the Sherman Act. *See* *15 U.S.C. § 12*. The language of § 16 makes no distinction between actions alleging violations of the Sherman Act and actions challenging a merger under § 7 of the Clayton Act. Nor does § 16 place limitations on the types of injunctive relief available.

In *American Stores* the Supreme Court explained that § 16 "should be construed generously and flexibly pursuant to principles of equity." *110 S. Ct. 1866*. The Court also stated a canon of statutory construction that conforms to this perspective: ***HN4***[] "Unless a statute in so many words, or by a necessary and inescapable inference, restricts the court's **[*7]** jurisdiction in equity, the full scope of that jurisdiction is to be recognized and applied." *Id.* (quoting *Weinberger v. Romero-Barcelo, 456 U.S. 305, 313 (1982)* and *Porter v. Warner Holding Co., 328 U.S. 395, 398 (1946))*. Considering the absence of limiting language in § 16, the court concludes that divestiture of Republic is available as a remedy for plaintiff's Sherman Act claims.

This conclusion is supported by the history of the Sherman Act. In the two most famous antitrust cases prior to enactment of the Clayton Act the government sought to break up the oil trust and the tobacco trust. In *Standard Oil v. United States, 221 U.S. 1 (1911)*, the Supreme Court affirmed the trial court's finding of a Sherman Act violation and approved the injunctive relief granted by the district court, essentially ordering divestiture by Standard Oil of New Jersey of the stock that it held in a number of other Standard Oil companies. In a similar case against the American Tobacco Company the Supreme Court reversed the lower court for not granting a broad enough remedy and directed the trial court to dissolve the monopolistic combination of tobacco companies. *United States v. American* ***[*8]*** *Tobacco Co., 221 U.S. 106 (1911)*. These cases were prosecuted by the government before the

Clayton Act established a private cause of action for injunctive relief. Nevertheless, they illustrate the broad remedial power possessed by federal courts in antitrust cases.

Defendants' opposition to this motion does not address the availability of divestiture as a remedy for Sherman Act violations. Instead, defendants contend that plaintiff should not be allowed to undo a merger that was approved by the Department of Transportation. In a sense defendants are correct because plaintiff's claim challenging the Republic acquisition has been dismissed and will not be resurrected. A distinction must be made, however, between the § 7 claim precluded by collateral estoppel and the Sherman Act claims which remain. Collateral estoppel may not be used to prevent ITA from obtaining relief to which it may be entitled if ITA prevails on a valid Sherman Act claim.

Obviously, any discussion about proper remedies in this case is premature. ITA must first prove its claims. Then the court will decide the appropriate remedy using equitable principles. ***HN5***[] "Whether divesture is proper or not in any particular case **[*9]** is a matter which must depend upon a balancing of the equities in each instance." *Credit Bureau Reports, Inc. v. Retail Credit Co., 358 F. Supp. 780, 797 (S.D. Tex. 1971)*, *aff'd*, *476 F.2d 989 (5th Cir. 1973)*. Notwithstanding the teaching of *American Stores,* ***HN6***[] divestiture is a severe remedy that is to be avoided when other forms of injunctive relief can adequately protect against further anticompetitive conduct without the same degree of economic dislocation. *Id.*

Accordingly, IT IS HEREBY ORDERED that plaintiff's motion for reconsideration is GRANTED insofar as it seeks a determination that divestiture is an available remedy for plaintiff's remaining antitrust claims but DENIED to the extent that it seeks to resurrect plaintiff's challenge to the Republic acquisition under § 7 of the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN2[] **Private Actions, Purchasers**

The direct purchaser rule serves, in part, to eliminate the complications of apportioning overcharges between direct and indirect purchasers.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN3[] **Private Actions, Purchasers**

The mere fact that a price rise followed an unlawful cost increase does not show that the sufferer of the cost increase was undamaged. His customers may have been ripe for his price rise earlier; if a cost rise is merely the occasion for a price increase a businessman could have imposed absent the rise in his costs, the fact that he was earlier not enjoying the benefits of the higher price should not permit the supplier who charges an unlawful price to take those benefits from him without being liable for damages. This statement merely recognizes the usual principle that the possessor of a right can recover for its unlawful deprivation whether or not he was previously exercising it.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN4[] **Private Actions, Purchasers**

The task of disentangling overlapping damages claims is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN11[] **Clayton Act, Remedies**

Section 4C of the Clayton Act, *15 U.S.C.S. § 15*, did not establish any new substantive liability. Instead, it simply created a new procedural device -- parens patriae actions by states on behalf of their citizens -- to enforce existing rights of recovery under § 4 of the Clayton Act. Section 4 affords relief only to a person injured in his business or property by reason of anything forbidden in the antitrust laws. *15 U.S.C.S. § 15(a)*. State attorneys general may bring actions on behalf of consumers who have such an injury.

Lawyers' Edition Display

Decision

Utility alone, and not states on behalf of utility customers, held to have standing to bring antitrust suit under 4 of Clayton Act against natural gas suppliers allegedly overcharging utility.

Summary

Section 4 of the Clayton Act (*15 USCS 15*) authorizes "any person who shall be injured" by an antitrust violation to sue for treble damages, costs, and attorneys' fees; 4C(a)(1) of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (*15 USCS 15c(a)(1)*) authorizes state attorneys general to bring parens patriae actions on behalf of natural persons residing in their states to secure monetary relief for injury sustained by such persons as a result of antitrust violations. Alleging that certain natural gas producers and a gas pipeline company had conspired to inflate gas prices in violation of the federal antitrust laws, various plaintiffs--including public utility companies which purchased gas from the pipeline company in order to service customers in Kansas and Missouri, and the states of Kansas and Missouri, acting in part as parens patriae on behalf of residential consumers who purchased gas from the utilities--brought actions under 4 against the producers and the pipeline company in the United States District Court for the District of Kansas. The producers and the pipeline company asserted that the utilities lacked standing to bring such an action under 4, because they had passed all of the allegedly illegal price increase on to their customers and thus had suffered no antitrust "injury." The District Court, however, (1) interpreted United States Supreme Court precedents as holding that direct purchasers from antitrust violators suffer injury for purposes of 4 to the full extent of an alleged overcharge even if all or part of that overcharge is passed on to customers, whereas those customers, as indirect purchasers, suffer no such injury; (2) granted the plaintiff utilities' motion for partial summary judgment disallowing the "pass-on" defense; and (3) treating the utilities' motion as a motion to dismiss the states' parens patriae claims, granted that motion (*695 F Supp 1109*). On the states' interlocutory appeal, the United States Court of Appeals for the Tenth Circuit affirmed the dismissals (*866 F2d 1286*).

On certiorari, the United States Supreme Court affirmed. In an opinion by Kennedy, J., joined by Rehnquist, Ch. J., and Stevens, O'Connor, and Scalia, JJ., it was held that (1) when suppliers overcharge a regulated public utility for natural gas, in violation of the federal antitrust laws, and the utility passes on the overcharge to its customers, only the utility has a cause of action under 4, because only the utility, as a direct purchaser, has suffered injury within the meaning of 4; (2) the direct-purchaser rule's purpose of avoiding the complications of apportioning damages is applicable in a case involving a regulated utility, even though such utilities allegedly can pass on all of an overcharge to their customers, because the utility remains an injured party and must remain in the suit, given that the utility might have been able to raise its rates in the absence of increased costs and also that the pass-on process may take time; (3) an exception to the rule may be unnecessary, as state regulators might require utilities to pass on at least some of the recovery obtained in a 4 suit; (4) even though bringing all classes of purchasers together in a single lawsuit may reduce the risk of multiple recovery which the rule was intended to eliminate, this reduction comes at too great a cost in complexity of litigation; (5) an exception to the rule in utility cases would not better secure the goal of vigorous antitrust enforcement, as (a) utilities do not lack incentive to prosecute 4 actions and in fact have a record of vigorous antitrust enforcement, whereas (b) consumers may lack the ability to detect improper pricing by suppliers, and (c) state attorneys general can bring parens patriae actions on behalf of only resident natural persons and may hesitate to bring suit in cases involving smaller and speculative harm to consumers; (6) although a possible exception to the rule has been suggested if an indirect purchaser buys under a pre-existing cost-plus contract, such an exception would not apply in the case at hand, where the utility customers made no commitment to purchase any particular quantity and the utility had no guarantee of a particular profit, and the need to inquire into the precise operation of market forces would negate the simplicity and certainty that could justify a cost-plus contract exception; and (7) 4C(a)(1) does not authorize a parens patriae action in such a case, because the utility is the injured party.

White, J., joined by Brennan, Marshall, and Blackmun, JJ., dissented, expressing the view that the case at hand raises none of the concerns which underlie the direct-purchaser rule, and that the rule should not be applied so as to deny the states standing to sue, because (1) the courts below assumed that there had been a perfect and provable pass-on of the allegedly illegal overcharge, and the issue should be decided on that basis; (2) where it is clear that the entire overcharge is passed through, the extent of the injury to indirect purchasers can easily be determined by examining their utility bills; (3) the problem of separating the price increase attributable to anticompetitive conduct from the price increase attributable to legitimate factors is not peculiar to indirect-purchaser suits; (4) granting standing in the case at hand would enhance enforcement of the antitrust laws, as, given that the pass-through of the overcharge is complete and easily demonstrated, the indirect purchasers--and the states in their parens patriae capacity--can readily discover their injury, whereas, though the utility could sue to recover lost profits, it has no incentive to seek a recovery of the overcharge which it has passed on; and (5) where there is a perfect and provable pass-through, there is no danger of multiple recovery of damages for the same anticompetitive conduct.

When suppliers overcharge a regulated public utility for natural gas, in violation of the federal antitrust laws, and the utility passes on the overcharge to its customers, only the utility has a cause of action under 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--because only the utility, as a direct purchaser, has suffered injury within the meaning of 4; thus, a state may not, as parens patriae, maintain an action against the suppliers on behalf of the utility's customers, who as indirect purchasers have not suffered injury for purposes of 4. (White, Brennan, Marshall, and Blackmun, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- public utilities -- apportionment of costs -- > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]***LEdHN[2C]***[] [2C]

No exception to the rule that only a direct purchaser from an alleged antitrust violator, and not the direct purchaser's customers, suffers an injury within the meaning of 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--is warranted in cases where the direct purchasers are regulated public utilities, as the rule's purpose of avoiding the need to apportion overcharges between direct and indirect purchasers is applicable in such cases, despite the argument that a utility which passes on its costs pursuant to state regulation allegedly passes on the entire overcharge and thus allegedly obviates litigation over the apportionment of the overcharge, because (1) an overcharge may injure a utility, apart from lost business, even if the utility raises its rates to offset the increased costs, since the utility might have been able to raise its rates in the absence of increased costs but will not enjoy the benefit of a raise because of those costs; (2) the existence of state regulation does not simplify the problem of proving what the direct purchaser could have done in the absence of the overcharges, but instead adds another level of complexity, as a court examining such a question will have to determine what state regulators would allow, a case-by-case inquiry turning on the intricacies of state law; (3) the existence of such potential injury requires that the utility remain in the case, so that the addition of indirect purchasers would require the development of an apportionment formula; (4) apportionment may also be necessary because, even if a utility can pass on 100 percent of its costs at some point, the regulatory process and other factors may delay the passing-on process and force the utility to pay some of the increased costs in the interim; and (5) the regulation of utilities may make an exception to the direct-purchaser rule unnecessary, as state regulators might require utilities to pass on at least some of the recovery obtained in a 4 suit. (White, Brennan, Marshall, and Blackmun, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- public utilities -- multiple recovery -- > Headnote:
LEdHN[3A][] [3A]***LEdHN[3B]***[] [3B]***LEdHN[3C]***[] [3C]

No exception to the rule that only a direct purchaser from an alleged antitrust violator, and not the direct purchaser's customers, suffers an injury within the meaning of 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--is warranted in cases where the direct purchasers are regulated public utilities, even though bringing all classes of direct and indirect purchasers together in a single lawsuit may reduce the risk of multiple recovery which the rule is intended to eliminate, because (1) that reduction comes at too great a cost, as expansion of the case to bring all of the potential plaintiffs together risks the confusion, cost, and error inherent in complex litigation, and (2) such expansion would serve little purpose, as state regulatory law may provide appropriate relief to consumers even if they cannot sue under 4. (White, Brennan, Marshall, and Blackmun, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- public utilities -- enforcement incentives -- > Headnote:
LEdHN[4A][] [4A]***LEdHN[4B]***[] [4B]***LEdHN[4C]***[] [4C]

Although the argument for an exception, in cases involving antitrust violations against regulated public utilities, to the rule that only a direct purchaser from an alleged antitrust violator, and not the direct purchaser's customers, suffers an injury within the meaning of 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--might be stronger if it were shown that interpreting 4 so as to allow such an exception would better secure the goal of vigorous enforcement of the antitrust laws, no such exception is warranted by such utilities' supposed lack of incentive to prosecute 4 actions, even though utilities allegedly can pass on their excess costs to customers and allegedly may be required to pass on damages recovered in a 4 action, since (1) utilities may bring 4 actions in some instances for fear that regulators will not allow them to shift known and avoidable overcharges onto their customers; (2) no authority has been cited to the effect that a utility winning a 4 action would have to pay the entire exemplary portion of its treble damages award to its customers; and (3) utilities have an established record of diligent antitrust enforcement, whereas (a) consumers may lack the expertise and experience necessary for detecting improper pricing by a utility's suppliers, and (b) state attorneys general, though possessing greater expertise, may hesitate to bring parens patriae actions in cases involving smaller and more speculative harm to consumers and, in any event, can bring such actions on behalf of only resident natural persons. (White, Brennan, Marshall, and Blackmun, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- exceptions to direct-purchaser rule -- > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]***LEdHN[5C]***[] [5C]

Although the rationales underlying the rule that only a direct purchaser from an alleged antitrust violator suffers an injury within the meaning of 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--will not apply with equal force in all cases, no exceptions to the rule should be carved out for particular types of markets, since the possibility of allowing exceptions, even in meritorious cases, would undermine the rule.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- public utilities -- cost-plus contracts -- > Headnote:
LEdHN[6A][] [6A]***LEdHN[6B]***[] [6B]

Although a departure from the rule that only a direct purchaser from an alleged antitrust violator, and not the direct purchaser's customers, suffers an injury within the meaning of 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--may be necessary with regard to a case in which an indirect purchaser buys under a pre-existing cost-plus contract, where the direct purchaser will bear no portion of an overcharge and otherwise suffer no injury, such a departure does not justify an exception to the rule in a particular case where suppliers have allegedly overcharged a regulated public utility for natural gas and states seek to bring parens patriae actions on behalf of the utility's customers, since (1) the utility customers in question made no commitment to purchase any particular quantity of gas, and the utility itself had no guarantee of any particular profit; (2) even though the utility raised its prices to cover its costs, its precise injury cannot be ascertained, because it is not known what might have happened in the absence of an overcharge; and

(3) even if the utility customers have a highly inelastic demand for gas, the need to inquire into the precise operation of market forces would negate the simplicity and certainty that could justify a cost-plus contract exception.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- public utilities -- parens patriae -- > Headnote:
LEdHN[7A][] [7A]***LEdHN[7B]***[] [7B]***LEdHN[7C]***[] [7C]

State attorneys general may not maintain an action under 4 of the Clayton Act (*15 USCS 15*)--which authorizes any person injured by an antitrust violation to sue for treble damages, costs, and attorneys' fees--on behalf of public utility customers who have allegedly borne the burden of inflated natural gas prices imposed on a utility by its suppliers, even though state attorneys general are authorized under 4C(a)(1) of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (*15 USCS 15c(a)(1)*) to bring actions as parens patriae on behalf of natural persons residing in their states who have suffered antitrust injuries, and even though state attorneys general may thus bring actions on behalf of consumers who have suffered injuries within the meaning of 4, because in such a case, it is the utility that is the injured party under the antitrust laws, and the predicate for a parens patriae action has not been established. (White, Brennan, Marshall, and Blackmun, JJ., dissented in part from this holding.)

Syllabus

The respondent -- an investor-owned public utility operating in the petitioner States -- and other utilities and natural gas purchasers filed suit in the District Court against a pipeline company and five gas producers under § 4 of the Clayton Act, which authorizes any person injured by a violation of the antitrust laws to sue for treble damages. The utilities alleged that the defendants had unlawfully conspired to inflate the price of gas that they supplied to the utilities, and sought treble damages for both the amount overcharged and the decrease in sales to customers caused by the overcharge. The petitioner States filed separate § 4 actions in the District Court against the same defendants for the alleged antitrust violation, asserting, *inter alia, parens* **[****2]** *patriae* claims on behalf of all natural persons residing in the States who had purchased gas from any utility at inflated prices. The court consolidated all of the actions and granted the utilities partial summary judgment with respect to the defendants' defense that, since the utilities had passed through all of the alleged overcharge to their customers, the utilities lacked standing because they had suffered no antitrust injury as required by § 4. In light of its conclusion that, under *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224*, and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061*, the utilities had suffered antitrust injury as direct purchasers but their customers, as indirect purchasers, had not, the court dismissed the States' *parens patriae* claims. The Court of Appeals affirmed the dismissals.

Held: When suppliers violate antitrust laws by overcharging a public utility for natural gas, and the utility passes on the overcharge to its customers, only the utility has a cause of action under § 4 because it alone has suffered antitrust **[****3]** injury. Pp. 206-219.

1. Three rationales underlie the indirect purchaser rule adopted in *Hanover Shoe* and *Illinois Brick:* (1) establishing the amount of an overcharge shifted to indirect purchasers would normally prove insurmountable in light of the wide range of considerations influencing a company's pricing decisions; (2) a pass-on defense would reduce the effectiveness of § 4 actions by diminishing the recovery available to any potential plaintiff; and (3) allowing suits by indirect purchasers would risk multiple liability because the alleged antitrust violators could not use a pass-on defense in an action by the direct purchasers. Pp. 206-208.

2. The aforesaid rationales compel the conclusion that no exception to the indirect purchaser rule should be made for suits involving regulated public utilities that pass on all of their costs to their customers. Pp. 208-217.

(a) Allowing indirect suits in such cases might necessitate complex cost apportionment calculations, since a utility bears at least some portion of a passed-on overcharge to the extent that it could have sought and gained state permission to raise its rates in the absence of the overcharge, cf. **[****4]** *Hanover Shoe, supra, at 493*, and n.9, and since various factors, such as the need to seek regulatory approval, may delay the passing-on process and thereby require the utility, in the interim, to bear some of the overcharge's costs in the form of lower earnings. Here, the certified question leaves unclear whether the respondent could have raised its prices prior to the overcharge, whether it had passed on "most or all" of its costs at the time of its suit, and even the means by which the pass through occurred. Proof of these preliminary issues, which are irrelevant to the defendants' liability, would turn upon the intricacies of state law, and, if it were determined that respondent had borne some of the costs, would require the adoption of an apportionment formula, the very complexity that *Hanover Shoe* and *Illinois Brick* sought to avoid. Moreover, creating an exception in such cases would make little sense when, in light of all its difficulty, its practical significance is diminished by the fact that some States require utilities to pass on at least some of the recovery obtained in a § 4 suit to their customers. Pp. 208-212.

(b) Even if the risk of **[****5]** multiple recoveries would be eliminated by allowing the petitioners to recover only the amount of the overcharge and the respondent to recover only damages for its lost sales in a single lawsuit, the additional complexity thereby introduced into a case that already has become quite complicated argues strongly for retaining the indirect purchaser rule. See *Illinois Brick, 431 U.S. at 731, n.11*. Pp. 212-213.

(c) Allowing indirect suits by utility customers would not better promote the goal of vigorous enforcement of the antitrust laws. The petitioners' argument that utilities lack incentives to sue overcharging suppliers is unpersuasive, since utilities may bring § 4 actions in some instances for fear that regulators will not allow them to shift known and avoidable overcharges on to their customers; since there is no authority indicating that utilities, which may have to pass on § 4 damages recovered, would also have to pay the entire exemplary portion of these damages to customers; and since utilities, in fact, have an established record of diligent and successful antitrust enforcement. On the other hand, indirect purchaser actions might be ineffective because **[****6]** consumers may lack the expertise and experience necessary to detect improper pricing by a utility's suppliers, while state attorneys general may hesitate to exercise the *parens patriae* device in cases involving smaller, more speculative harm to consumers, and, in any event, may sue only on behalf of resident natural persons, leaving nonresidents and small businesses to fend for themselves. Pp. 214-216.

(d) Although the rationales of *Hanover Shoe* and *Illinois Brick* may not apply with equal force in all instances, ample justifications exist for the Court's stated decision not to carve out exceptions to the indirect purchaser rule for particular types of markets. *Illinois Brick, 431 U.S. at 744-745*. Even assuming that any economic assumptions underlying the rule might be disproved in a specific case, it would be an unwarranted and counterproductive exercise to litigate a series of exceptions. Pp. 216-217.

3. The suggestion in *Hanover Shoe, supra, at 494*, and *Illinois Brick, supra, at 736*, that a departure from the indirect purchaser rule may be necessary when such a purchaser buys under a pre-existing cost-plus **[****7]** contract does not justify an exception in this case, since the respondent did not sell gas to its customers under such a contract. Even if an exception could be created for situations that merely resemble those governed by such contracts, that exception could not be applied here, since there is no certainty that the respondent has borne no portion of the overcharge and otherwise suffered no injury. Pp. 217-218.

4. Section 4C of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 -- which authorizes States to bring *parens patriae* actions on behalf of resident natural persons to secure monetary relief for property injury sustained by reason of certain antitrust violations -- does not authorize the petitioners to sue on behalf of consumers notwithstanding the consumers' status as indirect purchasers. Section 4C did not establish any new substantive liability, but simply created a new procedural device to enforce existing rights of recovery under § 4 of the Clayton Act, *Illinois Brick, 431 U.S. at 734, n.14*, which rights belong to the respondent in this case. Pp. 218-219.

Counsel: Thomas J. Greenan argued the cause for petitioners. With him on the briefs **[****8]** were Robert T. Stephan, Attorney General of Kansas, James E. Hurt, William L. Webster, Attorney General of Missouri, Donald D. Barry, William E. Quirk, Russell S. Jones, Jr., and Thomas A. Sheehan.

Floyd R. Finch, Jr., argued the cause for respondent. With him on the brief was Sally R. Burger.

Lawrence S. Robbins argued the cause for the United States as amicus curiae urging affirmance. With him on the brief were Solicitor General Starr, Assistant Attorney General Rill, Deputy Solicitor General Roberts, Deputy Assistant Attorney General Boudin, Stephen J. Marzen, Catherine G. O'Sullivan, and Jay C. Shaffer. *

Jeffrey I. Zuckerman, Daniel J. Popeo, Paul D. Kamenar, and John C. Scully filed a brief for the Washingon Legal Foundation as amicus curiae urging affirmance.

Judges: KENNEDY, J., delivered the opinion of the Court, in which REHNQUIST, C. J., and STEVENS, O'CONNOR, and SCALIA, JJ., joined. WHITE, J., filed a dissenting opinion, in which BRENNAN, MARSHALL, and BLACKMUN, JJ., joined, post, p. 219.

Opinion by: KENNEDY

Opinion

[*203] **[***178]** **[**2810]** JUSTICE KENNEDY delivered the opinion of the Court.

LEdHN[1A][] [1A]Section 4 of the Clayton Act, 38 Stat. 731, as amended, *15 U. S. C. § 15*, authorizes any person injured by a violation of **[*204]** the antitrust laws to sue for treble damages, costs, and an attorney's fee. We must decide who may sue under § 4 when, in violation of the antitrust laws, suppliers overcharge a public utility for natural gas and the utility passes on the overcharge to its customers. Consistent with *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*, and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, we hold that only the utility has the cause of action because it alone has suffered injury **[****10]** within the meaning of § 4.

I

The respondent, UtiliCorp United Inc., an investor-owned public utility operating in Kansas and western Missouri, purchased natural gas from a pipeline company for its own use and for resale to its commercial and **[**2811]** residential customers. Together with a second utility and several other gas purchasers, the respondent sued the pipeline company and five gas production companies in the United States District Court for the District of Kansas. The utilities alleged that the defendants had conspired to inflate the price of their gas in violation of the antitrust laws. They sought treble damages, pursuant to § 4 of the Clayton Act, for both the amount overcharged by the pipeline company and the decrease in sales to their customers caused by the overcharge.

The petitioners, the States of Kansas and Missouri, initiated separate § 4 actions in the District Court against the same defendants for the alleged antitrust violation. Acting as *parens patriae*, the petitioners asserted the claims of all natural persons residing within Kansas and Missouri who had purchased gas from any utility at inflated prices. They also **[*205]** asserted claims as **[****11]** representatives of state agencies, municipalities, and other political subdivisions that had purchased gas from the defendants. The District Court consolidated all of the actions.

The defendants, in their answer, asserted that the utilities lacked standing under § 4. They alleged that, pursuant to state and municipal regulations and tariffs filed with **[***179]** state regulatory agencies, the utilities had passed through the entire wholesale cost of the natural gas to their customers. As a result, the defendants contended, the utility customers had paid 100 percent of the alleged overcharge, and the utilities had suffered no antitrust injury as required by § 4.

The utilities moved for partial summary judgment with respect to this defense, and the District Court granted their motion. The court ruled that our decisions in *Hanover Shoe* and *Illinois Brick* controlled its interpretation of § 4. It read these cases to hold that a direct purchaser from an antitrust violator suffers injury to the full extent of an illegal overcharge even if it passes on some or all of the overcharge to its customers. The District Court concluded that utilities, as direct purchasers, had suffered **[****12]** antitrust injury, but that their customers, as indirect purchasers, had not.

In light of its ruling, the District Court chose to treat the partial summary judgment motion as a motion to dismiss the petitioners' *parens patriae* claims. It then granted this motion but allowed the petitioners to take an interlocutory appeal under *28 U. S. C. § 1292(b)*. It certified the following question to the Court of Appeals:

> "In a private antitrust action under *15 U. S. C. § 15* involving claims of price fixing against the producers of natural gas, is a State a proper plaintiff as *parens patriae* for its citizens who paid inflated prices for natural gas,

> when the lawsuit already includes as plaintiffs those public utilities who paid the inflated prices upon direct purchase from the producers and who subsequently passed on most or all of the price increase to the citizens **[*206]** of the State?" *In re Wyoming Tight Sands Antitrust Cases, 695 F. Supp. 1109, 1120 (Kan. 1988)*.

The Court of Appeals answered the question in the negative. It agreed with the District Court that *Hanover Shoe* and *Illinois Brick* **[****13]** required dismissal of the *parens patriae* claims. See *In re Wyoming Tight Sands Antitrust Cases, 866 F.2d 1286, 1294 (CA10 1989)*. We granted certiorari to resolve a conflict between this decision and *Illinois ex rel. Hartigan v. Panhandle Eastern Pipe Line Co., 852 F.2d 891 (CA7 1988)* (en banc). *493 U.S. 1041 (1990)*. We now affirm.

II

Section 4 of the Clayton Act provides in full:

> ***HN1***[] "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, **[**2812]** and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U. S. C. § 15(a)*.

As noted by the District Court and the Court of Appeals, we have applied this section in two cases involving allegations that a direct purchaser had passed on an overcharge **[****14]** to its customers.

In *Hanover Shoe, Inc. v. United Shoe Machinery Corp., supra*, Hanover **[***180]** alleged that United had monopolized the shoe manufacturing machinery industry in violation of *§ 2* of the Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. § 2*. It sought treble damages under § 4 of the Clayton Act for overcharges paid in leasing certain machinery from United. United defended, in part, on the ground that Hanover had passed on the overcharge to its customers and, as a result, had suffered no injury. We rejected the defense for two reasons. First, noting that a wide range of considerations may influence a company's pricing decisions, we concluded that **[*207]** establishing the amount of an overcharge shifted to indirect purchasers "would normally prove insurmountable." *392 U.S. at 493*. Second, we reasoned that a pass-on defense would reduce the effectiveness of § 4 actions by diminishing the recovery available to any potential plaintiff. See *id., at 494*.

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, we applied these considerations **[****15]** to reach a similar result. The State of Illinois sued Illinois Brick and other concrete block manufacturers for conspiring to raise the cost of concrete blocks in violation of *§ 1* of the Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. § 1*. We ruled that the State had suffered no injury within the meaning of § 4 because Illinois Brick had not sold any concrete blocks to it. The company, instead, had sold the blocks to masonry subcontractors, who in turn had sold them to the State's general contractors. We decided that, because Illinois Brick could not use a pass-on defense in an action by direct purchasers, it would risk multiple liability to allow suits by indirect purchasers. See *431 U.S. at 730-731*. We declined to overrule *Hanover Shoe* or to create exceptions for any particular industries. See *431 U.S. at 735-736, 744-745*.

LEdHN[1B][] [1B]Like the State of Illinois in *Illinois Brick*, the consumers in this case have the status of indirect purchasers. In the distribution chain, they are not the immediate buyers from the alleged antitrust violators. They **[****16]** bought their gas from the utilities, not from the suppliers said to have conspired to fix the price of the gas. Unless we create an exception to the direct purchaser rule established in *Hanover Shoe* and *Illinois Brick*, any antitrust claim against the defendants is not for them, but for the utilities to assert.

LEdHN[2A][] [2A] ***LEdHN[3A]***[] [3A] ***LEdHN[4A]***[] [4A] ***LEdHN[5A]***[] [5A] ***LEdHN[6A]***[] [6A] ***LEdHN[7A]***[] [7A]The petitioners ask us to allow them to press the consumers' claims for three reasons. First, they assert that none of the rationales underlying *Hanover Shoe* or *Illinois Brick* exist in cases involving regulated public utilities. Second, they argue that we should apply an exception, suggested in **[*208]** *Illinois Brick*, for actions based upon cost-plus contracts. Third, they maintain that § 4C **[****17]** of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 90 Stat. 1394, as amended, *15 U. S. C. § 15c*, authorizes them to assert claims on behalf of utility customers even if the customers could not assert any claims themselves. Affirming the Court of Appeals, we reject each of these contentions in turn.

III

LEdHN[2B][] [2B] ***LEdHN[3B]***[] [3B] ***LEdHN[4B]***[] [4B] ***LEdHN[5B]***[] [5B]The petitioners assert **[***181]** that we should allow indirect purchaser suits in cases involving regulated public utilities that pass on 100 percent of their costs to their customers. They maintain that our concerns in *Hanover Shoe* and *Illinois Brick* about the difficulties of apportionment, the risk of multiple recovery, and the diminution of incentives for private antitrust enforcement would not exist in such cases. We disagree. Although the rationales **[**2813]** of *Hanover Shoe* and *Illinois Brick* may not apply with equal **[****18]** force in all instances, we find it inconsistent with precedent and imprudent in any event to create an exception for regulated public utilities.

A

LEdHN[2C][] [2C]***HN2***[] The direct purchaser rule serves, in part, to eliminate the complications of apportioning overcharges between direct and indirect purchasers. See *Hanover Shoe, 392 U.S. at 493*;*Illinois Brick, 431 U.S. at 740-742*;*Blue Shield of Va. v. McCready, 457 U.S. 465, 475, n.11, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*. The petitioners find the rule unnecessary, in this respect, when a utility passes on its costs to its customers pursuant to state regulations or tariffs filed with a utility commission. In such cases, they assert, the customers pay the entire overcharge, obviating litigation over its apportionment. They maintain that they can prove the exact injury to the residential customers whom they represent because the respondent made periodic public filings showing the volume and price of gas that it sold to these **[****19]** consumers. They ask us to allow them to sue for **[*209]** the entire amount of the overcharge and to limit the respondent's recovery to damages for its lost business.

The petitioners have oversimplified the apportionment problem in two respects. First, an overcharge may injure a utility, apart from the question of lost business, even if the utility raises its rates to offset its increased costs. As we explained in *Hanover Shoe:*

> ***HN3***[] "The mere fact that a price rise followed an unlawful cost increase does not show that the sufferer of the cost increase was undamaged. His customers may have been ripe for his price rise earlier; if a cost rise is merely the occasion for a price increase a businessman could have imposed absent the rise in his costs, the fact that he was earlier not enjoying the benefits of the higher price should not permit the supplier who charges an unlawful price to take those benefits from him without being liable for damages. This statement merely recognizes the usual principle that the possessor of a right can recover for its unlawful deprivation whether or not **[****20]** he was previously exercising it." *392 U.S. at 493, n.9*.

In other words, to show that a direct purchaser has borne no portion of an overcharge, the indirect purchaser would have to prove, among other things, that the direct purchaser could not have raised its rates prior to the overcharge.

In *Hanover Shoe*, however, we decided not to allow proof of what the direct purchaser might have done because of the "nearly insuperable difficulty" of the issue. *Id., at 493*. The petitioners assume that the presence **[***182]** of state regulation would make the proof less difficult here. We disagree. The state regulation does not simplify the problem but instead imports an additional level of complexity. To decide whether a utility has borne an overcharge, a court would have to consider not only the extent to which market conditions would have allowed the utility to raise its rates prior to the overcharge, as in the case of an unregulated business, but also what the state regulators would have allowed. In particular, **[*210]** to decide that an overcharge did not injure a utility, a court would have to determine that the State's regulatory schemes **[****21]** would have barred any rate increase except for the amount reflected by cost increases. Proof of this complex preliminary issue, one irrelevant to the liability of the defendant, would proceed on a case-by-case basis and would turn upon the intricacies of state law.

From the certified question in this case, we do not know whether the respondent could have raised its prices prior to the overcharge. Its customers may have been willing to pay a greater price, and the Kansas and Missouri regulators may have allowed a rate increase based on factors other than strict costs. See **[**2814]** *Midwest Gas Users Assn. v. State Corporation Comm'n, 5 Kan. App. 2d 653, 661, 623 P.2d 924, 931 (1981)*; *State ex rel. Associated Natural Gas Co. v. Public Service Comm'n, 706 S.W.2d 870, 879-880 (Mo. App. 1985)*. To the extent that the respondent could have sought and gained permission to raise its rates in the absence of an overcharge, at least some portion of the overcharge is being borne by it; whether by overcharge or by increased rates, consumers would have been paying more for natural gas than they had been paying in the past. Because of this potential **[****22]** injury, the respondent must remain in the suit. If we were to add indirect purchasers to the action, we would have to devise an apportionment formula. This is the very complexity that *Hanover Shoe* and *Illinois Brick* sought to avoid.

Second, difficult questions of timing might necessitate apportioning overcharges if we allowed indirect suits by utility customers. Even if, at some point, a utility can pass on 100 percent of its costs to its customers, various factors may delay the passing-on process. Some utilities must seek approval from the governing regulators prior to raising their rates. Other utilities, pursuant to purchase gas adjustment clauses (PGA's) filed with state regulators, may adjust their rates to reflect changes in their wholesale costs according to prearranged formulas without seeking regulatory approval in **[*211]** each instance. Yet, even utilities that use PGA's often encounter some delay. See Brief for State of Illinois as *Amicus Curiae* 9, n.11 (describing the various time lags under a typical PGA between the increase in a utility's wholesale costs and the rise in consumer rates). During any period in which a utility's costs rise before it may **[****23]** adjust its rates, the utility will bear the costs in the form of lower earnings. See S. Breyer, Regulation and its Reform 48-49 (1982). Even after the utility raises its rates, moreover, the pass-through process may take time to complete. During this time, the utility and its customers each would pay for some of the increased costs.

In this case, we could not deprive the respondent of its § 4 action without first determining that the passing-on **[***183]** process in fact had allowed it to shift the entire overcharge to its customers. The certified question, however, leaves unclear whether the respondent had passed on "most or all" of its costs at the time of the suit. In addition, even the means by which the passthrough occurred remain unsettled. The petitioners allege that, pursuant to formulas in PGA's filed with the Kansas Corporation Commission and the Missouri Public Service Commission, the respondent "automatically" adjusted some of its rates to reflect increases in the wholesale cost of gas. Brief for Petitioners 5, n.5. The respondent, however, maintains that PGA's did not govern all of its sales. See Brief for Respondent 17. The difficulties posed by issues of this sort **[****24]** led us to adopt the direct purchaser rule, and we must decline to create an exception that would require their litigation. As we have stated before: ***HN4***[] "The task of disentangling overlapping damages claims is not lightly to be imposed upon potential antitrust litigants, or upon the judicial system." *McCready, 457 U.S. at 475, n.11*.

In addition to these complications, the regulation of utilities itself may make an exception to *Illinois Brick* unnecessary. Our decisions in *Hanover Shoe* and *Illinois Brick* often deny relief to consumers who have paid inflated prices **[*212]** because of their status as indirect purchasers. See 2 P. Areeda & D. Turner, ***Antitrust Law*** § 337e, pp. 193-194 (1978); Harris & Sullivan, Passing on the Monopoly Overcharge: A Comprehensive Policy Analysis, 128 U. Pa. L. Rev. 269, 342 (1979). Although one might criticize *Illinois Brick* for this consequence in other circumstances, the criticism may have less validity in the context of public utilities. Both the Court of Appeals in this case and the Seventh Circuit in *Illinois ex rel. Hartigan v. Panhandle Eastern Pipe Line Co., 852 F.2d 891 (1988)*, **[****25]** have suggested that state regulators **[**2815]** would require the utilities to pass on at least some of the recovery obtained in a § 4 suit. See *Wyoming Tight Sands, 866 F.2d at 1291*; *Panhandle Eastern, supra, at 895*. State regulators have followed this approach elsewhere. See, *e. g., Louisiana Power & Light Co., Ex Parte*, Nos. U-17906, U-12636, U-17649, *1989 La. PUC LEXIS 3*, *31-*32 (Mar. 1, 1989) (requiring Louisiana Power & Light Co., which won a $ 190 million judgment against United Gas Pipe Line Co., to flow the proceeds back to ratepayers through reduced rates over a 5-year period). If Kansas and Missouri impose similar requirements, then even if the customers cannot sue the alleged antitrust violaters, they may receive some of the compensation obtained by the respondent. Creating an exception to allow apportionment in violation of *Illinois Brick* would make little sense when, in light of all its difficulty, its practical significance is so diminished.

B

LEdHN[3C][] [3C] **[****26]** **HN5**[] The *Illinois Brick* rule also serves to eliminate multiple recoveries. See *Illinois Brick, 431 U.S. at 730-731*;*McCready, supra, at 474*.The petitioners assert that no risk of multiple recovery would exist here, if we allowed them to sue, because the direct and indirect purchasers would be seeking different, not duplicative, damages; the petitioners would recover **[***184]** the amount of the overcharge and the utilities would recover damages for their lost sales. Leaving **[*213]** aside the apportionment issue, we reject the argument in this case, just as we did in *Illinois Brick*. Bringing all classes of direct and indirect purchasers together in a single lawsuit may reduce the risk of multiple recovery, but the reduction comes at too great a cost. See *Illinois Brick, supra, at 731, n.11*.

This case already has become quite complicated. It involves numerous utilities and other companies operating in several States under federal, state, and municipal regulation and, in some instances, under no rate regulation at all. Even apart from gas sold to customers, the utilities seek damages for lost sales and for gas purchased **[****27]** for their own use. The petitioners, in addition to their *parens patriae* claims, are asserting direct claims on behalf of numerous state agencies. Other direct purchasers also seek several measures of damages. Allowing the petitioners to proceed on behalf of consumers would complicate the proceedings further. Even if they could represent consumers residing in Kansas and Missouri, they could not represent industrial and commercial purchasers or consumers from other States. See *15 U. S. C. § 15c(a)(1)* (extending *parens patriae* representation only to resident natural persons). These unrepresented consumers might seek intervention and further delay the prompt determination of the suit. The expansion of the case would risk the confusion, costs, and possibility of error inherent in complex litigation. At the same time, however, it might serve little purpose because, as noted above, state regulatory law may provide appropriate relief to consumers even if they cannot sue under § 4. As in *Illinois Brick*, we continue to believe that "even if ways could be found to bring all potential plaintiffs together in one huge action, the complexity thereby introduced **[****28]** into treble-damages proceedings argues strongly for retaining the *Hanover Shoe* rule." *431 U.S. at 731, n.11*.

[*214] C

LEdHN[4C][] [4C]We have maintained, throughout our cases, that our **HN6**[] interpretation of § 4 must promote the vigorous enforcement of the antitrust laws. See *Hanover Shoe, 392 U.S. at 493*;*Illinois Brick, supra, at 746*;*McCready, 457 U.S. at 475, n.11*;*California v. ARC America Corp., 490 U.S. 93, 102, n.6, 104 L. Ed. 2d 86, 109 S. Ct. 1661* ***[**2816]*** *(1989)*. If we were convinced that indirect suits would secure this goal better in cases involving utilities, the argument to interpret § 4 to create the exception sought by the petitioners might be stronger. On balance, however, we do not believe that the petitioners can prevail in this critical part of the case. The petitioners assert that utilities, such as the respondent, lack the incentive to prosecute § 4 cases for two reasons. First, they state that utilities, **[****29]** by law, may pass on their costs to customers. Second, they surmise that utilities might have to pass on damages recovered in a § 4 action. In other words, according to the petitioners, utilities lose nothing if they do not sue and gain nothing if they do sue. In contrast, the petitioners maintain, the large aggregate claims **[***185]** of residential consumers will give state attorneys general ample motivation to sue in their capacity as *parens patriae*.

The petitioners' argument does not persuade us that utilities will lack incentives to sue overcharging suppliers. Utilities may bring § 4 actions in some instances for fear that regulators will not allow them to shift known and avoidable overcharges on to their customers. See *Kan. Stat. Ann. § 66-128a* (1985) (allowing the state commission to "review and evaluate the efficiency or prudence of any actions . . . of any public utility or common carrier for the purpose of establishing fair and reasonable rates"); *Mo. Rev. Stat. § 393.150* (1986) (interpreted in *State ex rel. Associated Natural Gas Co. v. Public Service Comm'n, 706 S.W.2d 870, 879-880 (Mo. App. 1985)*, to give regulators "considerable discretion" **[****30]** in setting gas rates). In addition, even if state law would require a utility to reimburse its customers for recovered overcharges, a utility may seek treble damages in a § 4 action.

[*215] The petitioners have cited no authority indicating that a victorious utility would have to pay the entire exemplary portion of these damages to its customers.

Utilities, moreover, have an established record of diligent antitrust enforcement, having brought highly successful § 4 actions in many instances. The well-known group of actions from the 1960's involving overcharges for electrical generating equipment provides an excellent example. In these cases, which involved "a series of horizontal price-fixing conspiracies characterized as the most shocking in the history of the Sherman Act, plaintiff utilities . . . recovered in unprecedented sums" even though some of the utilities "passed on to their own customers whatever higher costs they incurred as a consequence of the alleged conspiracies." Pollock, Standing to Sue, Remoteness of Injury, and the Passing-On Doctrine, 32 A. B. A. Antitrust L. J. 5, 10-11 (1966). The courts in these suits, even before the *Hanover Shoe* and *Illinois* **[****31]** *Brick* decisions, considered the pass-on issue and held that the causes of action were for the utilities to assert. See, *e. g., Commonwealth Edison Co. v. Allis-Chalmers Mfg. Co., 335 F.2d 203, 208 (CA7 1964)*; *Ohio Valley Electric Corp. v. General Electric Co., 244 F. Supp. 914, 949-951 (SDNY 1965)*. Various factors may have prompted these and other utility actions. For example, in addition to the reasons stated above, the respondent asserts that, like any business, an investor-owned utility has an interest in protecting its market. But whatever the motivation for their § 4 suits, this history makes us quite hesitant to take from the utilities the responsibility for enforcing the antitrust laws.

Relying on indirect purchaser actions in utility cases might fail to promote antitrust enforcement for other reasons. Consumers may lack the expertise and experience necessary for detecting improper pricing by a utility's suppliers. See Landes & Posner, The Economics of Passing On: A Reply to Harris and Sullivan, 128 U. Pa. L. Rev. 1274, 1278-1279 (1980). Although state attorneys general have greater expertise, **[*216]** they may **[****32]** hesitate to exercise the *parens patriae* device in cases involving smaller, more speculative harm to consumers. See Landes & Posner, Should Indirect Purchasers Have Standing to Sue Under the Antitrust **[***186]** Laws? An Economic **[**2817]** Analysis of the Rule of *Illinois Brick*, 46 U. Chi. L. Rev. 602, 613 (1979). See also *Illinois Brick, 431 U.S. at 745* (stating that, in indirect actions, "the uncertainty of how much of an overcharge could be established . . . [and] the uncertainty of how that overcharge would be apportioned . . . would further reduce the incentive to sue"). And even when state attorneys general decide to bring *parens patriae* actions, they may sue only on behalf of resident natural persons. See *15 U. S. C. § 15c(a)(1)*. All others, including non-residents and small businesses, might fail to enforce their claims because of the insignificance of their individual recoveries. For these reasons, we remain unconvinced that the exception sought by the petitioners would promote antitrust enforcement better than the current *Illinois Brick* rule.

D

LEdHN[5C][] [5C] **[****33]** The preceding conclusions bring us to a broader point. The rationales underlying *Hanover Shoe* and *Illinois Brick* will not apply with equal force in all cases. We nonetheless believe that ample justification exists for our stated decision not to ***HN7***[] "carve out exceptions to the [direct purchaser] rule for particular types of markets." *Illinois Brick, 431 U.S. at 744*.The possibility of allowing an exception, even in rather meritorious circumstances, would undermine the rule. As we have stated:

> ***HN8***[] "The process of classifying various market situations according to the amount of pass-on likely to be involved and its susceptibility of proof in a judicial forum would entail the very problems that the *Hanover Shoe* rule was meant to avoid. The litigation over where the line should be drawn in a particular class of cases would inject the same 'massive evidence and complicated theories' **[*217]** into treble-damages proceedings, albeit at a somewhat higher level of generality. **[****34]** " *Id., at 744-745*.

In sum, even assuming that any economic assumptions underlying the *Illinois Brick* rule might be disproved in a specific case, we think it an unwarranted and counterproductive exercise to litigate a series of exceptions. Having stated the rule in *Hanover Shoe*, and adhered to it in *Illinois Brick*, we stand by our interpretation of § 4.

IV

LEdHN[6B][] [6B]The suggestion in *Hanover Shoe* and *Illinois Brick* that a departure from the direct purchaser rule may be necessary when an indirect purchaser buys under a pre-existing cost-plus contract does not justify an exception in this case. In *Hanover Shoe*, we stated:

> "We recognize that there might be situations -- for instance, when an overcharged buyer has a pre-existing 'cost-plus' contract, thus making it easy to prove that he has not been damaged -- where the considerations requiring that the passing-on defense not be permitted in this case would not be present." *392 U.S. at 494*.

We observed further in *Illinois Brick:*

> ***HN9***[] " **[****35]** In [a cost-plus contract] situation, the [direct] purchaser is insulated from any decrease in its sales as a **[***187]** result of attempting to pass on the overcharge, because its customer is committed to buying a fixed quantity regardless of price. The effect of the overcharge is essentially determined in advance, without reference to the interaction of supply and demand that complicates the determination in the general case." *431 U.S. at 736*.

The petitioners argue that the regulations and tariffs requiring the respondent to pass on its costs to the consumers place this case within the cost-plus contract exception. We disagree.

[*218] The respondent did not sell the gas to its customers under a pre-existing cost-plus contract. Even if we were to create an exception for situations that merely resemble those governed by such a contract, we would **[**2818]** not apply the exception here. Our statements above show that we might allow indirect purchasers to sue only when, by hypothesis, the direct purchaser will bear no portion of the overcharge and otherwise suffer no injury. That certainty does not exist here.

The utility customers made no commitment **[****36]** to purchase any particular quantity of gas, and the utility itself had no guarantee of any particular profit. Even though the respondent raised its prices to cover its costs, we cannot ascertain its precise injury because, as noted above, we do not know what might have happened in the absence of an overcharge. In addition, even if the utility customers had a highly inelastic demand for natural gas, see *Panhandle Eastern, 852 F.2d at 895*, the need to inquire into the precise operation of market forces would negate the simplicity and certainty that could justify a cost-plus contract exception. See *Illinois Brick, supra, at 742*; P. Areeda & H. Hovencamp, ***Antitrust Law*** § 337.3c, pp. 323-324 (Supp. 1988). Thus, although we do not alter our observations about the possibility of an exception for cost-plus contracts, we decline to create the general exception for utilities sought by the petitioners.

V

LEdHN[7B][] [7B]The petitioners, in their final argument, contend that § 4C of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 90 Stat. 1394, as amended, *15 U. S. C. § 15c*, **[****37]** authorizes them to sue on behalf of consumers even though the consumers, as indirect purchasers, have no cause of action of their own. Section 4C(a)(1) provides in relevant part:

> ***HN10***[] "Any attorney general of a State may bring a civil action in the name of such state as parens patriae on behalf of natural persons residing in such State . . . to secure monetary relief as provided in this section for injury sustained **[*219]** by such natural persons to their property by reason of any violation of *sections 1 to 7* of this title." *15 U. S. C. § 15c(a)(1)*.

Because the Act, in their view, has the clear purpose of protecting consumers, see Kintner, Griffin, & Goldston, The Hart-Scott-Rodino Antitrust Improvements Act of 1976: An Analysis, 46 Geo. Wash. L. Rev. 1, 23 (1977), the petitioners contend that it must allow the States to sue on behalf of consumers notwithstanding their status as indirect purchasers.

[*188]** ***LEdHN[1C]***[] [1C]***LEdHN[7C]***[] [7C] **[****38]** We have rejected this argument before. We stated in *Illinois Brick* that ***HN11***[] § 4C did not establish any new substantive liability. Instead, "it simply created a new procedural device -- *parens patriae* actions by States on behalf of their citizens -- to enforce existing rights of recovery under § 4 [of the Clayton Act]." *431 U.S. at 734, n.14*. Section 4, as noted above, affords relief only to a person "injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U. S. C. § 15(a)*. State attorneys general may bring actions on behalf of consumers who have such an injury. See, *e. g., Pennsylvania v. Mid-Atlantic Toyota Distributors, Inc., 704 F.2d 125, 128 (CA4 1983)* (suit on behalf of consumers injured by an alleged conspiracy to fix the price of cars). But here the respondent is the injured party under the antitrust laws, and the predicate for a *parens patriae* action has not been established. We conclude that the petitioners may not assert any claims on behalf of the customers.

Affirmed **[****39]** .

Dissent by: WHITE

Dissent

JUSTICE WHITE, with whom JUSTICE **BRENNAN**, JUSTICE MARSHALL, and JUSTICE **BLACKMUN** join, dissenting.

I dissent from the Court's opinion and judgment because it is inappropriate for the Court to deny standing to sue under § 4 of the Clayton Act, *15 U. S. C. § 15*, to customers of a regulated utility in circumstances such as those presented in this case. By its plain language, § 4 reflects an "'expansive remedial **[*220]** purpose.'" *Blue Shield of Va. v.* ***[**2819]*** *McCready, 457 U.S. 465, 472, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)* (citation omitted). It does not distinguish between classes of customers, but rather grants a cause of action to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . ." *15 U. S. C. § 15(a)*. In enacting § 4, Congress sought to ensure that victims of anticompetitive conduct receive compensation. *Blue Shield, supra, at 472*; *Pfizer Inc. v. India, 434 U.S. 308, 314, 54 L. Ed. 2d 563, 98 S. Ct. 584 (1978)*.

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, **[****40]** we held that certain indirect purchasers of concrete block lacked standing to challenge the manufacturer's business practices under the antitrust laws because they could not be deemed to have suffered injury from the alleged illegal conduct. This suit, however, is very different from *Illinois Brick*. That case involved a competitive market where concrete block manufacturers sold to masonry contractors who in turn sold to general contractors who in turn sold to the *Illinois Brick* respondents; this case involves a highly regulated market where utilities possessing natural monopolies purchase gas from natural gas suppliers and then sell the gas to residential customers. *Illinois Brick* did not hold that, in all circumstances, indirect purchasers lack § 4 standing. Indeed, just last Term we observed that under *Illinois Brick* "indirect purchasers might be allowed to bring suit in cases in which it would be easy to prove the extent to which the overcharge was **[***189]** passed on to them." *California v. ARC America Corp., 490 U.S. 93, 102, 104 L. Ed. 2d 86, 109 S. Ct. 1661, and n.6 (1989)*. See also *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 494, 20 L. Ed. 2d 1231, 88 S. Ct. 2224 (1968)*. **[****41]**

The issue in this case is whether *Illinois Brick* bars a suit by retail customers to whom the utilities have passed on the entire cost of the gas sold to them, including any illegal overcharge. Before the District Court, the utilities moved to dismiss the States as *parens patriae*, arguing that the States lacked standing because they represented indirect purchasers. **[*221]** In response, the States contended that the indirect purchasers were proper plaintiffs because the utilities had passed through the entire overcharge to their residential customers. The District Court found it unnecessary "to wait upon evidence establishing the degree to which the utilities passed on the overcharge," *In re Wyoming Tight Sands Antitrust Cases, 695 F. Supp. 1109, 1116 (Kan. 1988)*, for even accepting the States' position that there had been a total pass-on, decisions of this Court were thought to bar the suit. Likewise, in affirming the District Court, the Court of Appeals presumed a "perfect and provable pass-on of the allegedly illegal overcharge." *In re Wyoming Tight Sands Antitrust Cases, 866 F.2d 1286, 1293 (CA10 1989)*. Indeed, the vice president **[****42]** and general counsel of one of the respondent utilities is on record as stating that the utility's customers "pay *all* of any increases in the cost of natural gas [Kansas Power & Light] must purchase to serve them." Affidavit of David S. Black, Vice President and General Counsel of the Kansas Power & Light Company, Record, Doc. No. 485, Exhibit D (emphasis in original). Rather than embarking, as the Court does, on what amounts to a factfinding mission, which the courts below eschewed, about the fact and provability of this pass-on, we should decide this case on the basis that there has been a complete passthrough of the overcharge. On that basis, it is evident that the concerns underlying the decision in *Illinois Brick* do not support the judgment below. Rather, we should follow the plain intent of § 4 that the victims of anticompetitive conduct be allowed the remedy provided by the section.

Illinois Brick barred indirect purchaser suits chiefly because we feared that permitting the use of pass-on theories under § 4 would transform these treble-damages actions into massive and inconclusive efforts **[**2820]** to apportion the recovery among all potential plaintiffs **[****43]** that could have absorbed part of the overcharge -- from direct purchasers to middlemen to ultimate consumers. *431 U.S. at 737*. As Judge Posner has **[*222]** written: "The optimal adjustment by an unregulated firm to the increased cost of the input will always be a price increase smaller than the increase in input cost, and this means that the increased cost will be divided between the two tiers, the direct and indirect purchasers -- but in what proportion will often be hard to determine, even by sophisticated techniques of economic analysis. This is a central insight of the *Illinois Brick* decision." *Illinois ex rel. Hartigan v. Panhandle Eastern Pipe Line Co., 852 F.2d 891, 894 (CA7 1988)*.

[*190]** In this case, however, it is regulation rather than market forces that determines the amount of overcharge that the utility passes through to its residential customers. The rates of utilities are determined by law and are set at a level designed to allow a fair return on a rate base that includes the cost of furnishing the service, plainly including in this case the cost of gas purchased from the pipelines and resold to customers. It is fanciful, **[****44]** at least unrealistic, to think that a utility entitled to pass on to its customers the cost of gas that it has purchased will not do so to the maximum extent permitted by law. Furthermore, petitioners assert that in this case the applicable law requires that such cost be passed on to consumers. And, as we have said, the Tenth Circuit opinion reflects the likelihood of a perfect and provable pass-on.

Of course, to recover in a case like this, the plaintiff must prove that the utility paid the pipelines an illegally high price and must demonstrate the amount of the overcharge. That amount is included in the rates charged by the utility and hence is passed through to the consumer. The result is that determining the injury inflicted on consumers involves nothing more than reading their utility bills, which reveal the amount of gas purchased by them at a price which includes the amount of the illegal overcharge passed through to them. Where it is clear that the entire overcharge is passed through, there can be no claim that indirect purchasers cannot **[*223]** prove the extent of their damage caused by a rate calculated on a rate base inflated by an illegal price paid for gas.

The **[****45]** Court contends that the apportionment problem is not so simple. It maintains that, even where a utility raises its rates to compensate for the overcharge and passes the overcharge through to the indirect purchasers, an apportionment problem still exists because "to show that a direct purchaser has borne no portion of an overcharge, the indirect purchaser would have to prove, among other things, that the direct purchaser could not have raised its rates prior to the overcharge." 497 U.S. at 209. The problem identified by the majority is not peculiar to indirect purchaser suits. In antitrust cases where suppliers increase their prices, courts frequently must separate the price increase attributable to anticompetitive conduct (*i. e.*, the "overcharge") from the price increase attributable to legitimate factors. This type of calculation "has to be done in every case where the plaintiff claims to have lost sales because of the defendant's unlawful conduct and the defendant argues that the loss was due partly or entirely to other factors." *Panhandle Eastern, supra, at 897*; see *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 90 L. Ed. 652, 66 S. Ct. 574 (1946)*. **[****46]** The problem identified in *Illinois Brick* was entirely different: There, we were concerned that it would unduly complicate litigation to require courts to separate the portion of the overcharge absorbed by the direct purchaser from the portion of the overcharge passed onto the indirect purchaser. As argued above, this difficulty is not a concern in the present case. * It is at **[***191]** least very doubtful that a utility that is

---

* The majority also suggests that "difficult questions of timing might necessitate apportioning overcharges if we allowed indirect suits by utility customers. Even if, at some point, a utility can pass on 100 percent of its costs to its customers, various factors may delay the passing-on process." 497 U.S. at 210. This suggestion, as indicated by the words "might" and "may," is quite

[*224] in position to secure a rate increase on grounds having nothing to **[**2821]** do with the price paid for its gas would fail to request a rate increase that included as well the entire amount paid for gas purchased from pipelines and sold to consumers.

[**47]** *Illinois Brick* also observed that granting standing to the indirect purchasers in that case would lead to the under-enforcement of the antitrust laws. *431 U.S. at 745-747*. In the cases where there is "a perfect and provable pass-through," however, the opposite is true for two reasons. First, because the passthrough of the overcharge is complete and easily demonstrated, the indirect purchasers -- and the States in their *parens patriae* capacity -- may readily discover their injury. Second, although the utility could sue to recover lost profits resulting from lost sales due to the illegally high price, its injury is not measured by the amount of the illegal overcharge that it has passed on, and hence the utility would have no incentive to seek such a recovery.

The majority suggests that, even where a utility passes the entire overcharge through to the indirect customers, the utility nonetheless might actively prosecute antitrust claims because the state regulatory commission may allow the utility to keep any damages that the utility recovers. But the utility commissions cannot allow an antitrust recovery forbidden by federal law. Given a passthrough, the customer, **[****48]** not the utility, suffers the antitrust injury, and it is the customer or the State on his behalf that is entitled to recover treble damages. In any event, it seems to me that the majority conjures up a very strange utility commission, the possible existence of which the court fails to document.

A third consideration prompting our decision in *Illinois Brick* was our belief that permitting indirect purchaser suits might subject antitrust defendants to multiple liability. *431 U.S. at 730-731*. Again however, where there is a "perfect and provable" passthrough, there is no danger that both the utilities and the indirect purchasers will recover damages for the same anticompetitive conduct because the utilities **[*225]** have not suffered any overcharge damage: The petitioners will sue for the amount of the overcharge, while the utilities will sue for damages resulting from their lost sales.

The majority argues that, even "leaving aside the apportionment issue" (*i. e.*, assuming that there is no apportionment difficulty as the Tenth Circuit did in affirming summary judgment), the multiple recovery problem identified in *Illinois Brick* still exists. 497 U.S. at 212-213. **[****49]** I disagree. *Illinois Brick* "focused on the risk of duplicative recovery engendered by allowing every person along a chain of distribution to claim damages arising from a single transaction that violated the antitrust laws." *Blue Shield, 457 U.S. at 474-475*. **[***192]** The danger of multiple recoveries does not exist aside from the apportionment difficulty; rather, it stems from it. If only defensive use of a pass-through defense were barred, or if it were extremely difficult to ascertain the percentage of an overcharge that the utility passed through, then the supplier of natural gas might potentially have to pay overlapping damages to successive purchasers at different levels in the distribution chain. But where there is no apportionment difficulty, there is no comparable risk.

In sum, I cannot agree with the rigid and expansive holding that in no case, even in the utility context, would it be possible to determine in a reliable way a passthrough to **[**2822]** consumers of an illegal overcharge that would measure the extent of their damage. There may be cases, as the Court speculates, where there would be insuperable difficulties. But we are to judge this **[****50]** case on the basis that the pass-through is complete and provable. There have been no findings below that this is not the fact. Instead, the decision we review is that consumers may not sue even where it is clear and provable that an illegal overcharge has been passed on to them and that they, rather than the utility, have to that extent been injured.

None of the concerns that caused us to bar the indirect purchaser's suit in *Illinois Brick* exist in this case. For that **[*226]** reason, rather than extending the *Illinois Brick* exception to § 4's grant of a cause of action to persons injured through anticompetitive conduct, I would hold that the petitioners in this case have standing to sue. This result would promote the twin antitrust goals of ensuring recompense for injured parties and encouraging the diligent prosecution of antitrust claims.

---

speculative. It is much more realistic to believe that sooner or later, the customer will foot the cost of overpriced gas. If timing was such a problem, the Tenth Circuit would not have assumed a "perfect and provable" passthrough.

HN17[] **Antitrust & Trade Law, Robinson-Patman Act**

Antitrust injury or "cognizable injury" needs for its establishment a showing that the plaintiff is injured in some measurable amount, the injury caused by an improper effect flowing from the defendant's antitrust violation. The fact of damage is made out upon proof that the plaintiff's level of profits or sales or its present value is or was less than it otherwise would have been absent some intervening cause.

* Honorable Jesse E. Eschbach, Senior U.S. Circuit Judge for the Seventh Circuit, sitting by designation.

Opinion

[*1415] Eschbach, Senior Circuit Judge.

This case concerns the propriety **[**2]** of summary judgment in an antitrust action **[*1416]** brought by a private plaintiff. The action alleges, among other things, violations of sections 2(a), 2(d), 2(e), and 2(f) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. §§ 13(a)*, *(d)*, *(e)*, and *(f)*. The court below concluded that summary judgment was appropriate. After reviewing the record we conclude otherwise, and therefore reverse.

I.

Alan's of Atlanta, Inc. ("AA") was an Atlanta-based "specialty" retailer of cameras and related equipment. It had stores in Atlanta and throughout Georgia and Florida. At the start of 1979 AA had a substantial share of the Atlanta market for Minolta-brand camera sales, about 33%, and an overwhelming share of specialty store sales, about 78%. By the end of 1985 AA's fortunes had taken a turn for the worse. Its Atlanta market share of Minolta camera sales had plummeted to about 4%. Its share of specialty store sales suffered a similar fate. During this same period AA witnessed the dramatic rise of a competing specialty camera retailer, Wolf Camera, Inc. Wolf Camera had captured the 29% of the Minolta camera market lost by AA and then some. Its share **[**3]** of that market rose from about 6% to about 41%. Even more dramatic was the rise in its share of specialty camera store sales, which rocketed from about 14% to over 65%. AA's president, Alan Goodelman, could only guess at the cause of Wolf Camera's rise and AA's fall. He surmised that AA's problems were caused by a faulty computer system, or perhaps by a bad management decision to expand in Florida.

In June of 1985 Goodelman was approached by Eugene Grabowski, a former Southeast Region sales manager for Minolta Corporation ("Minolta"). [1] Grabowski brought news that a price discrimination scheme may have led to AA's woes. He told Goodelman that Minolta had market development fund ("MDF") accounts through which benefits were disbursed by either the national director of sales or the regional sales managers. These benefits had been used prior to 1979 for the equal good of all Minolta retailers. In 1979 Robert Lathrop took over as national director of sales, however, and instituted a "key dealer" program in which the MDF benefits were to be channeled disproportionately to "key dealers" in various cities. The MDF accounts were to support a program in which these selected dealers would **[**4]** be given free cameras and camera equipment, free advertising, free promotions, and various other benefits not available to non-key dealers.

Grabowski alleged that the key dealer program was motivated by two rationales. First, Minolta promotions could be cheaper if limited to one retailer with a large-volume capacity. For example, instead of making 100 shipments of 100 cameras to 100 retailers during a promotion, Minolta could make 1 shipment of 10,000 cameras to one retailer, saving distribution costs. Although the program was not designed to put non-key dealers out of business, it was designed to concentrate the market and to create a market leader through whom the promotions could be handled efficiently. Second, the program was designed to create a *de facto* vertical integration of Minolta with selected **[**5]** retailers, at least in some respects. According to Grabowski, Lathrop believed that after helping a retailer achieve success, he could dictate to the retailer what cameras to sell and at what price.

Key dealers were usually the highest volume dealers within a defined market area. AA was the highest volume dealer in the Atlanta market at the time the key dealer program was instituted, but it was not chosen by Minolta as the Atlanta area key-dealer. Grabowski alleged that Lathrop personally disliked Goodelman, and, in any case, felt that Wolf Camera had more sales potential. Thus Wolf Camera **[*1417]** was chosen in AA's stead. [2]

---

[1] Minolta was the authorized United States distributor for and a wholly owned subsidiary of Minolta Camera Company Limited ("Minolta Japan"), a Japanese manufacturer of cameras and related equipment.

[2] Although Wolf Camera was allegedly selected as the Atlanta market key dealer, it was not the only key dealer selling Minolta cameras in Atlanta. Some national market key dealers, *e.g.*, Service Merchandise, had a substantial presence in Atlanta.

As beneficiary of the key dealer program, Wolf Camera was slated to receive over non-key dealers a price advantage on purchases. **[**6]** Grabowski alleged that Lathrop and Charles Wolf, the owner and CEO of Wolf Camera, hashed out the range of advantage. The range settled upon was four to seven percent per purchase dollar, generally, with specific instances of up to ten percent. [3] Grabowski told Goodelman of various incidents in which he furtively conferred some of this advantage to Wolf Camera by giving it free goods, advertising, and other benefits.

According to Grabowski, the key dealer participants realized that a program imbued with such favoritism bordered on illegality. To avoid legal trouble, Minolta and Lathrop purportedly instructed **[**7]** the regional managers to be familiar with three contrived explanations for their actions: (1) that the favoritism was necessary to meet competitive pricing actions within the marketplace; (2) that the favoritism was necessary to meet competitive advertising actions within the marketplace; and (3) that the favoritism was necessary to compete against grey market pricing. The latter excuse could prove particularly persuasive. In the United States there clearly were grey market [4] camera equipment sellers, the identity, prices, and practices of which were rather obfuscated.

[8]** After hearing this tale Goodelman's thinking changed about why AA had taken a bath in the marketplace. He no longer blamed the faulty computer or a bad management decision, but rather Minolta's alleged "key dealer" scheme. Goodelman immediately obtained the services of counsel. Sometime later AA cut off its relationship with Minolta and on February 18, 1986, it filed a five-count complaint in federal court against Minolta, Lathrop, Wolf Camera, and Wolf ("the Appellees").

The complaint, as amended, alleged in Count I that Minolta and Lathrop had violated section 2(a) of the Clayton Act, as amended by the Robinson-Patman Act [hereinafter referred to simply as the RPA] by engaging in a scheme of price discrimination. Section 2(a) [5] **[**10]** ***HN1***[] makes it (potentially) illegal for a seller to discriminate in price between its customers where the discrimination leads to a reasonable possibility that competition in general or competition with the favored customer specifically may be adversely affected, *Corn Prod. Ref. Co. v. FTC, 324 U.S. 726, 742, 65 S. Ct. 961, 969, 89 L. Ed. 1320 (1945)*, **[**9]** unless the discrimination is justifiable on the basis of the seller's **[*1418]** costs. *FTC v. Morton Salt Co., 334 U.S. 37, 43-44, 68 S. Ct. 822, 827, 92 L. Ed. 1196 (1948)*. The section does not ban price discrimination *per se*, but only non cost-justified price discrimination that causes the requisite injury to competition or competitors. [6]

---

[3] As Wolf Camera purchased Minolta goods in the amount of $ 12,891,883 over a period of time comparable to that in which the price discrimination was alleged to have taken place, the purported favoritism translates into the following amounts: (1) At 4%, $ 537,161 (.96X=$ 12,891,883; X=$ 13,429,044; $ 13,429,044-$ 12,891,883=$ 537,161); (2) At 5%, $ 678,520; (3) At 6%, $ 822,886; (4) At 7%, $ 970,356.

[4] The "grey market" refers to goods that were sold abroad by camera manufacturers at a price low enough to make it profitable for the foreign purchasers of those goods to export them into the United States. Once exported to the United States, the goods compete with those sold through normal, authorized, distribution channels. It is somewhat ironic that in this price discrimination case the alleged competitive threat is the grey market, which is often created by price discrimination on an international scale.

[5] Section 2(a) ***HN2***[] provides, in relevant part, as follows:

> It shall be unlawful for any person . . . to discriminate in price between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: *Provided*, That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered. . . .

15 U.S.C. § 13(a).

[6] A controversy has raged (and continues to rage) over the meaning of the word "competition" as used in the so-called "competitive injury" phrase of section 2(a). *See, e.g., Boise Cascade Corp. v. FTC, 267 U.S. App. D.C. 124, 837 F.2d 1127, 1143* (Starr, J.); *id.*, at 1148-52 (Williams, J., concurring); *id., at 1152-63* (Mikva, J., dissenting). The word "competition" as

[11]** Count V alleged that Minolta and Lathrop, through the same scheme, had violated RPA sections 2(d) and 2(e). Sections **[*1419]** 2(d) and (e) are not as generous to discriminating sellers as is section 2(a). Section 2(d) [7] **[**13]** ***HN4***[] prohibits a seller from paying a customer for "services or facilities" furnished by the customer in

---

generally used in the antitrust laws seems capable of meaning different things to different people and, according to one commentator, can be interpreted in at least five ways. *See R. Bork, The Antitrust Paradox* 58-61 (1978). To some, "competition" can only mean "any state of affairs in which consumer welfare cannot be increased by moving to an alternative state of affairs through judicial decree," *id., at 61*, and competitive injury under the antitrust laws cannot occur unless an action taken has the net effect of restricting output and raising prices, *i.e.*, lowering consumer welfare. *Id., at 122*. *See also* *Ball Memorial Hosp., Inc. v. Mutual Hosp. Ins., Inc., 784 F.2d 1325, 1334 (7th Cir. 1986)*. Under this interpretation a proven injury to competitors is irrelevant under the antitrust laws (including the RPA); the focus of inquiry is on the detrimental effects of prices on *consumers*, not the detrimental effect of prices on *competitors*, for rarely the twain shall meet.

Judicial precedent, however, suggests that in the RPA the meaning of competition is not so narrow, nor the gap between an injury to competition and an injury to competitors so wide. Indeed, many cases dealing with secondary-line price discrimination (as does this one) hold or suggest that an injury to competition is proved by showing an injury to competitors. *See, e.g.,* *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434-38, 103 S. Ct. 1282, 1288-90, 75 L. Ed. 2d 174 (1983)* (section 2(a) competitive injury shown where price charged to "competing purchasers" was different; effect on consumers not considered); *Morton Salt, 334 U.S. 37, 45-47, 49-50, 68 S. Ct. 822, 828, 830, 92 L. Ed. 1196* (section 2(a) "was intended to justify a finding of injury to competition by a showing of 'injury to the competitor victimized by the discrimination'"; proof that "the competitive opportunity of . . . merchants [was] injured" shown by fact that disfavored purchasers "had to pay [the seller] substantially more for their goods than their competitors had to pay"); *Corn Prod. Ref. Co., 324 U.S. 726, 738-39, 65 S. Ct. 961, 967, 89 L. Ed. 1320* (price differentials that divert business from one competitor to another create an effect that "may be to substantially lessen competition."); *Hasbrouck v. Texaco, Inc., 842 F.2d 1034, 1040* (9th ed. is.Cir. 1988), *cert. granted*, *490 U.S. 1105, 109 S. Ct. 3154, 104 L. Ed. 2d 1018 (1989)* (injury of harm to competitors probative of injury to competition); *Rose Confections, Inc. v. Ambrosia Chocolate Co., 816 F.2d 381, 385 (8th Cir. 1987)* (harm to competition established by showing harm to competitors); *Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 580* (5th Cir.), *cert. denied*, *459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982)* (to establish competitive injury under section 2(a) a plaintiff "must demonstrate that the likely effect of the alleged price discrimination was to allow a favored competitor to draw significant sales or profits away from him, the disfavored competitor"); *Foremost Dairies, Inc. v. FTC, 348 F.2d 674, 678* (5th Cir.), *cert. denied*, *382 U.S. 959, 86 S. Ct. 435, 15 L. Ed. 2d 362 (1965)* (recognizing that section 2(a) protects injury to competition as well as injury to competitors). *But see* *Boise Cascade, supra, at 1143* (harm to competition all that matters); *Richard Short Oil Co. v. Texaco, Inc., 799 F.2d 415, 420 (8th Cir. 1986)* (RPA refers to competition in general, not competitors). This interpretation has carried over to primary-line price discrimination as well. *See* *Utah Pie Co. v. Continental Baking Co., 386 U.S. 685, 87 S. Ct. 1326, 18 L. Ed. 2d 406 (1967)* (local market price war driving down prices injured competitor, thus it injured competition); *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396 (7th Cir. 1989)* (recognizing difference between law and economics); *McGahee v. Northern Propane Gas Co., 858 F.2d 1487 (11th Cir. 1988)*, *cert. denied*, *490 U.S. 1084, 109 S. Ct. 2110, 104 L. Ed. 2d 670 (1989)* (predatory intent to destroy competitor). *But cf.* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (allegations conflicting with economic theory are to be viewed skeptically). The gist of these cases, representing about a half-century of RPA interpretation, is that ***HN3***[] the legal focus of the competitive injury inquiry is on the competitor, not the consumer. For section 2(a) purposes, whether or not output is restricted or prices are raised simply is not dispositive.

We need not address this issue in any greater detail at this time. We address it at all only because the controversy over competitive injury may have implications for our later analysis of "antitrust injury" under Clayton Act section 4, *15 U.S.C. § 16*. For the time being we are satisfied merely to make it clear that when confronted with contemporary economic argument on the one hand and judicial precedent on the other, we feel, unlike those of a more activist bent, *see, e.g., R. Bork, supra*, at 36, that economic argument is not ultimately controlling; judicial precedent is.

[7] ***HN6***[] This section states as follows:

> It shall be unlawful for any person engaged in commerce to pay or contract for the payment of anything of value to or for the benefit of a customer of such person in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such person, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

connection with the resale of the seller's product, unless the opportunity to receive such a payment is available to all of the seller's customers on "proportionally equal terms." *See* FTC v. Fred Meyer, Inc., 390 U.S. 341, 350-53, 88 S. Ct. 904, 909-10, 19 L. Ed. 2d 1222 (1967); FTC v. Simplicity Pattern Co., Inc., 360 U.S. 55, 65, 79 S. Ct. 1005, 1011, 3 L. Ed. 2d 1079 (1959). The section has no "competitive injury" or "cost justification" escape clause like section 2(a). Great Atl. & Pac. Tea Co. v. FTC, 440 U.S. 69, 79, 99 S. Ct. 925, 932, 59 L. Ed. 2d 153 (1979); Simplicity Pattern, supra, 360 U.S. at 66, 70, 79 S. Ct. at 1012, 1014. To force all price discrimination to take a readily recognizable **[**12]** form -- from whence it can be tested under the "competitive injury" and "cost justification" guidelines of section 2(a) -- section 2(d) creates liability for certain indirect price discriminations related to resale programs upon the mere showing that the indirection *is* price discrimination, thus "nipping potentially destructive practices before they reach full bloom." Simplicity Pattern, supra, at 68, 79 S. Ct. at 1013. Section 2(e) [8] is similar in scope and language to section 2(d), *see e.g.,* Great Atl. & Pac. Tea Co., supra, 440 U.S. at 79, 99 S. Ct. at 932, except ***HN5***[] it bans a seller from furnishing to a customer a service or facility connected with the resale of the seller's product (rather than paying a customer for so furnishing), unless the opportunity to receive the seller's service or facility is available to all of the seller's customers on "proportionally equal terms." Simplicity Pattern, supra, 360 U.S. at 65, 79 S. Ct. at 1011.

Count II alleged the corollary of Counts I & V, that Wolf and Wolf Camera knowingly received discriminatory price advantages in violation of section 2(f) [9] of the RPA. The remaining counts alleged violations of state law: that the Appellees intentionally and tortiously interfered with AA's business and contractual relations (Count III) and that Minolta had breached an implied covenant of good faith and fair dealing made with AA (Count IV).

[14]** Appellees answered the complaint by asserting, among other things, a defense contained in RPA section 2(b). [10] In crafting the RPA the drafters and construers of the Act saw fit to allow a seller to breach the requirements of sections 2(a), (d), and (e) if it could prove that in so doing it was merely meeting the already prevalent **[*1420]** prices of a competitor. Standard Oil Co. v. FTC, 340 U.S. 231, 246, 71 S. Ct. 240, 248, 95 L. Ed. 239 (1951). This defense is the so-called ***HN9***[] "meeting competition" defense. It allows a seller to rebut a prima facie case of price discrimination, and therefore avoid liability, by showing that its discriminatory actions were taken in good faith to counter the actions of a competitor. *Id.* In effect, it gives a seller the right to economic "self-defense." United States v. United States Gypsum Co., 438 U.S. 422, 450-51, 98 S. Ct. 2864, 2880, 57 L. Ed. 2d 854 (1978) (quoting

---

15 U.S.C. § 13(d).

[8] Section 2(e) states:

> ***HN7***[] It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

15 U.S.C. § 13(e).

[9] Section 2(f) ***HN8***[] provides "that it shall be unlawful for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by this section." 15 U.S.C. § 13(f).

[10] Section 2(b) of the Robinson-Patman Act ***HN10***[] states in relevant part as follows:

> Upon proof being made . . . that there has been discrimination in price or services of facilities furnished, the burden of rebutting the prima facie case shall be upon the person charged . . .: *Provided, however*, That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.

15 U.S.C. § 13(b).

Standard Oil, supra, 340 U.S. at 249-50, 71 S. Ct. at 249). Appellees asserted that any price discrimination on their part was **[**15]** economic self-defense, self-defense compelled by a competitive threat from the grey market.

Discovery ensued, but not without dispute. AA uncovered Minolta accounting evidence indicating that over the years Wolf Camera received from Minolta MDF **[**16]** benefits in the form of free goods worth at least $ 271,123 and free credit offsets for advertising and promotion worth at least $ 100,911, for a total value of $ 372,034. The discovered "numbers" also indicated that Wolf Camera received a sum of non-MDF benefits from Minolta in the amount of $ 26,961. [11] On April 1, 1987, in an effort to explore more of Minolta's data, AA filed a motion to compel discovery from Minolta and Lathrop. AA sought information from certain Minolta accounts regarding discriminatory benefits provided Wolf Camera. It also sought information regarding a nationwide "key dealer" scheme and the benefits provided other "key dealers" throughout the nation. Both Minolta and Lathrop responded with motions for protective orders. They felt that discovery was better restricted to limited information regarding only AA and Wolf Camera. On October 2, 1987, the district court ruled in favor of Appellees, believing that "the information sought is irrelevant to this litigation, overly burdensome to produce, and not likely to lead to the production of admissible evidence." A later-filed motion for reconsideration on this issue was denied.

[17]** When discovery came to a standstill, the parties filed various motions. [12] In a written memorandum and order entered December 30, 1988 the district court dismissed all motions as moot save Appellees' motions for summary judgment, which it granted. The court explained that summary judgment against AA was warranted because AA had failed to show that it had been harmed by anything done by the Appellees. As with other antitrust laws, ***HN11***[] private plaintiffs derive standing to sue for violations of the RPA via Clayton Act sections 4 and 16. [13] To recover under these sections a private plaintiff must show both the occurrence of an antitrust violation and **[*1421]** the incurrence of an antitrust injury. *See, e.g.,* *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)* (*Section 16*); *Brunswick v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (Section 4). *See also* *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 101 S. Ct. 1923, 1927, 68 L. Ed. 2d 442 (1981)* **[**18]** (involving the RPA). The court found deficient AA's showing in the latter regard.

[19]** In the court's view AA had failed to produce evidence that Wolf Camera was able to draw away profits or sales from AA on account of the price advantage it received from Minolta. The evidence presented cut against AA, according to the court, showing, first, that the amount of price benefit actually received by Wolf was *de minimis* when compared to its total dollar volume of Minolta purchases. The court found that the most Wolf Camera could have been advantaged was an amount summing to $ 350,540. [14] Over the $ 12,891,883 of Wolf Camera's Minolta

---

[11] On the other hand, the accounting evidence showed that Minolta, through financial and other incentive programs, provided AA with benefits totaling $ 140,904: MDF in the amount of $ 60,458; non-MDF in the amount of $ 80,446.

[12] AA filed four motions for partial summary judgment. Those motions sought judgment (1) rejecting Appellees' "meeting competition" defense; (2) establishing the element of interstate commerce; (3) establishing that the statute of limitations on the AA's claims was tolled by fraudulent concealment; and (4) finding that Appellees had violated sections 2(d) and 2(e) of the RPA. AA also filed a motion requesting the district court to certify for appeal its denial of AA's motion to compel discovery. Appellees responded with the following motions: (1) for summary judgment against AA's RPA claims; (2) for summary judgment against AA's state law claims; and (3) for the exclusion of AA's expert opinion damage study.

[13] A private plaintiff's standing to sue for damages is authorized by section 4(a) of the Clayton Act, as amended, which states that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a)*. A private plaintiff may also avail itself of injunctive relief. Clayton Act *section 16* provides that "any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." *15 U.S.C. § 26*.

Although AA's complaint requested both damages relief and injunctive relief, AA is no longer in a position to pursue an injunction. Thus, damages via section 4 are our only concern.

purchases made during the period of price discrimination, this advantage translated to a mere $.03 on the dollar. Moreover, when consideration was given to the $ 60,458 of MDF benefits and $ 53,505 of net non-market development fund ("non-MDF") benefits Minolta gave AA over its $ 6,983,174 of purchases, this advantage deteriorated steadily "to less than one cent for every dollar [Wolf Camera] spent on Minolta goods." Second, even if the price difference was not *de minimis*, the evidence showed that price is a secondary factor in consumers' minds. The court found that price does not influence specialty camera purchasers so the pricing **[**20]** advantage afforded Wolf Camera was irrelevant. Third, even if the price did matter to specialty camera consumers, it did not influence them in this case. The price advantage given Wolf was not passed on to consumers, according to the court, but was used to increase advertising and other promotions. Fourth, AA could not suffer antitrust injury because its profit margin on Minolta products was higher than its profit margins on other products. That margin stayed high during the period of discrimination, as did AA's retail prices on Minolta goods. Fifth, the court did not think that Wolf Camera and AA were competitors in Florida, although both had stores there, yet the profit margin derived by AA on its sales of Minolta products in Florida were the same as those derived in Georgia. This showed that AA was not injured in Georgia. Sixth, Minolta products apprised only 18% of Appellants total sales, thus "minimizing" any injury AA may have suffered. Lastly, whatever loss AA suffered was due not to the price discrimination, but to other reasons, such as its faulty computer system and poor management decision to expand in Florida. All of this proved that AA had not experienced the appropriate **[**21]** injury. Summary judgment, therefore, was required.

The court did not rest its judgment solely on its antitrust injury analysis. It noted additional reasons why summary judgment against AA was proper. First, as to the sections 2(d) and 2(e) claims, the court concluded that the terms and services offered AA and Wolf Camera by Minolta were "proportionally equal" because AA had received from Minolta certain non-MDF benefits relating to extended financing and generous return policies. This finding **[**22]** mandated summary judgment. Second, as to all of the RPA claims, the court found that the Appellees had proved that the price discrimination was caused by Minolta's need to meet competition. The court found that a grey market for Minolta products existed and that Wolf Camera had made Minolta aware that it would buy from such a market. The court felt that Minolta's discriminatory program was a reasonable response to this grey market threat, and thus its discrimination was excusable **[*1422]** via RPA section 2(b). This finding also mandated summary judgment. [15]

[23]** II.

The Robinson-Patman Act was enacted into law in 1936. It amended the Clayton Act's regulation of price discrimination by making its scope more inclusive and its standards much tougher. The RPA's enactment was motivated by concerns for small, independent distributors, which in the 1930's were threatened by the arrival of chain stores. It marked "the high-water mark of the anti-chain-store movement." *R. Posner, The Robinson-Patman Act: Federal Regulation of Price Differences* 26 (1976). Although the Clayton Act had prohibited certain price discriminations, it was seen as ineffective in stopping the discriminatory prices granted chain stores by virtue of their size. *See H.R.Rep. No.* 2287, 74th Cong., 2d Sess. 7 (1936); *FTC v. Morton Salt Co., 334 U.S. 37, 43, 68 S. Ct. 822, 827, 92 L. Ed. 1196 (1948)*. So far as purchasing was concerned, this discrimination put the more normal "mom and pop" merchants of the day at a competitive disadvantage. Congress sought to alleviate the disadvantage by putting the new age retailing behemoths on a level "playing-field" with small independent merchants and businessmen. *See FTC v. Fred Meyer, Inc., 390 U.S. 341, 349, 88 S. Ct. 904, 908-09, 19 L. Ed. 2d 1222*

---

[14] Appellees "conceded" for the purposes of summary judgment AA's calculation of price discrimination (based as it was on only discovered MDF accounts). They then argued, however, that the total should sum to $ 350,540, not $ 372,034. The Appellees ignored about $ 21,500 worth of advertising benefits granted Wolf Camera that did not appear in the accounts until after April 30, 1986. They asserted that these benefits were provided Wolf Camera after the "relevant period." The district court adopted the Appellees' view.

[15] Following from the court's RPA conclusions was its grant of summary judgment against AA's state law claim of tortious interference. With no antitrust injury or RPA "wrong," the court reasoned, there could be no claim. The court also concluded that AA's other state law claim -- breach of implied covenant -- must fail as well. The court held that Georgia law does not allow a claim for breach of implied covenant, if such a claim cannot be tied to a violation of an explicit contractual provision.

(1967); **[**24]** *FTC v. Henry Broch & Co., 363 U.S. 166, 168, 80 S. Ct. 1158, 1160, 4 L. Ed. 2d 1124 (1960)*. The RPA was Congress's tool for doing so, for leveling competition between these types of competitors.

As is obvious from this brief summary of the RPA's history, "it is fairness, as Congress perceives it, that Robinson-Patman is all about." *Boise Cascade Corp. v. FTC, 267 U.S. App. D.C. 124, 837 F.2d 1127, 1146-47 (D.C.Cir. 1988)*. The Act's goal is to abolish unwarranted favoritism among all functional competitors, big or small. [16] Its objective is to assure "that businessmen at the same functional level . . . start on equal competitive footing so far as price is concerned"; *FTC v. Sun Oil Co., 371 U.S. 505, 520, 83 S. Ct. 358, 367, 9 L. Ed. 2d 466 (1963)*; "to assure that all sellers regardless of size, competing directly for the same customers . . . receive evenhanded treatment from their suppliers"; *Fred Meyer, supra, 390 U.S. at 356, 88 S. Ct. at 912*.

[25]** In this case, the evenhanded treatment sought by the RPA is missing. In fact, favoritism abounds. The facts show that in selling to AA and Wolf Camera Minolta clearly favored Wolf Camera. The facts establish price discrimination on Minolta's part, for "a price discrimination within the meaning of [the RPA] is merely a price difference," *FTC v. Anheuser-Busch, Inc., 363 U.S. 536, 549, 80 S. Ct. 1267, 1274, 4 L. Ed. 2d 1385 (1960)*, and the facts demonstrate a difference in price between what Minolta charged Wolf Camera and what Minolta charged AA. Making this clear is a comparison of ratios based on the documented benefits received from Minolta by Wolf Camera and AA in relation to their purchases. The evidence indicates that Wolf Camera received $ 372,034 of documented benefits in relation to $ 12,891,883 of purchases; thus Wolf Camera's documented benefit/purchases ratio is.029, or about $.03 on the dollar. Using the $ 350,540 figure Appellees prefer, the ratio drops to about.027. When $ 26,961 of non-MDF benefits received by Wolf Camera is added, these ratios are about.031 and.029, respectively. AA's ratio, based on MDF benefits **[*1423]** received of $ 60,458 **[**26]** and purchases of $ 6,983,174 is about.0087, or less than $.01 on the dollar. Thus, the competitors' benefit/purchases ratios are not equal. They show at the very least that Wolf Camera owned a two cent per dollar advantage in purchasing. This advantage remains even under a best-case scenario for the Appellees, when $ 80,446 of non-MDF benefits purportedly received by AA are taken into account. AA's ratio rises to about.02, still one cent per dollar behind Wolf Camera's. When the numbers are crunched using other evidence of benefits, such as the testimony of Grabowski, the price discrimination -- and Wolf Camera's purchasing advantage -- becomes embarrassingly large.

Despite this and other substantial evidence hinting of Minolta's discrimination in favor of Wolf Camera (and, consequently, against AA), the court below granted summary judgment against AA's claims. The court seemed to believe that in spite of the evidence indicating favoritism its reasons, based as they were on the "proportionally equal" test of RPA sections 2(d) and (e), the "meeting competition" defense of RPA section 2(b), and the "antitrust injury" test of Clayton Act section 4, were enough to support summary judgment. **[**27]** While in theory this certainly is true, in the reality of this case, it is not.

III.

We take the sections 2(d) and (e) issue first. The court below felt that no violation of these sections was possible because whatever Minolta provided Wolf Camera by way of benefits was available on "proportionally equal terms" to AA as well. Even though the opportunity afforded Wolf Camera to obtain certain advertising, promotional, and other benefits was not afforded AA, the court apparently felt that the two competitors had access to similar incentive programs because AA could and did participate in a Minolta program that provided AA with financial help.

Yet sections 2(d) and (e) ***HN12***[] require something more than access to different incentive programs before their "proportionally equal" standard is met. The sections' language requires that purchasers be given an equal opportunity to participate in certain types of seller programs relating to the resale of products, such as advertising and promotional programs, and that the benefits under those programs be disbursed on equal terms to purchasers

---

[16] Though the birth of the RPA was motivated by a desire to place "big" purchasers on par with "small" ones, the Act's applicability is not limited to big buyer/small buyer cases. *Boise Cascade, supra, at 1139 n. 11*. "It 'is of general applicability and prohibits discriminations generally.'" *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 436, 103 S. Ct. 1282, 1289, 75 L. Ed. 2d 174 (1983)* (quoting *FTC v. Sun Oil Co., 371 U.S. 505, 522, 83 S. Ct. 358, 368, 9 L. Ed. 2d 466 (1963))*.

in proportion **[**28]** to some objective value of their participation. *See* FTC v. Fred Meyer, Inc., 390 U.S. 341, 358-59, 88 S. Ct. 904, 913, 19 L. Ed. 2d 1222 (1967) (Fortas, J., concurring). *See also* FTC Guides for Advertising Allowances and Other Merchandising Payments and Services, 1 Trade Reg. Rep. (CCH) 6072 (1960). Such a program may be one, for example, where an advertising fund is made available by a supplier to its retail-trade customers on a basis proportional to the dollar amount of the supplier's goods purchased by each retailer, the fund's monies to be expended up to each retailer's earned limit according to the retailer's actual resale advertising. *See F. Rowe, Price Discrimination Under the Robinson-Patman Act* 407 (1962). But the disputed fact situation facing us here does not present such a program, or anything like it. The situation presented here is one in which AA's ability to partake in certain schemes involving Wolf Camera was *completely foreclosed*: AA could not participate in advertising, promotional, and other resale schemes that funneled Wolf Camera benefits of at least $ 100,911. [17] This hardly seems to fulfill the "guiding ideal" that **[**29]** motivated the RPA: "the preservation of *equality of opportunity* as far as possible to all who are usefully employed in the service of distribution and production." *H.R.Rep.* No. 2287, 74th Cong., 2d Sess. 6 (1936), *quoted in* FTC v. **[*1424]** Sun Oil Co., 371 U.S. 505, 520, 83 S. Ct. 358, 367, 9 L. Ed. 2d 466 (1963) (emphasis added). It does not fulfill the mandate of sections 2(d) and (e).

Putting this opportunity problem aside, we also find the financing program in which **[**30]** AA participated legally incomparable to the promotion programs doled out to Wolf. "Services and facilities" falling within the scope of sections 2(d) and (e) must relate to the resale of the supplier's goods. *See* Fred Meyer, supra, 390 U.S. at 355-57, 88 S. Ct. at 911-12. ***HN13***[] Generally, financing programs do not relate to the resale of the supplier's goods and therefore are not services and facilities within the meaning of sections 2(d) and (e). Bouldis v. U.S. Suzuki Motor Corp., 711 F.2d 1319, 1328 (6th Cir.1983); L & L Oil Co. v. Murphy Oil Corp., 674 F.2d 1113, 1119 & n. 7 (5th Cir. 1982); Skinner v. United States Steel Corp., 233 F.2d 762, 765 (5th Cir. 1956). Advertising and promotional programs are. *See* FTC v. Simplicity Pattern Co., Inc., 360 U.S. 55, 65, 79 S. Ct. 1005, 1011, 3 L. Ed. 2d 1079 (1959); Bouldis, supra, at 1329. Where two types of programs are segregated in law and nonequivalent in fact, comparing them to determine whether the promotional programs were available **[**31]** on "proportionally equal terms" seems nonsensical. Moreover, comparing the two types of programs would be proper only if Wolf Camera could not participate in the financing program on proportionally equal terms with AA. This is so because AA could not participate in the promotional programs on proportionally equal terms with Wolf Camera. But there is nothing to suggest that the financing programs in which AA participated were not open and available to Wolf Camera; indeed, the evidence suggests otherwise, as Minolta gave both AA and Wolf Camera non-MDF benefits.

Even if we assume that the financing and promotional programs are legally comparable, we still encounter problems. The evidence indicates that benefits under those programs were not disbursed by Minolta on proportionally equal terms. The benefits AA derived from the programs it was allowed access to were woefully short of those derived by Wolf Camera. The minimum quantified value of benefits provided AA through Minolta's programs (MDF: $ 60,458; non-MDF: $ 80,446) simply was not comparable with the minimum quantified value of benefits provided Wolf Camera (MDF: $ 372,034; non-MDF: $ 26,961). On a proportional basis, *i.e.* **[**32]** , per dollar of purchases, Wolf Camera received at least half again as much in the way of benefits as did AA.

On the sections 2(d) and (e) issue there seems to us, at the very least, "'sufficient evidence to create a jury question.'" Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 580 (5th Cir.) (quoting Malcolm v. Marathon Oil Co., 642 F.2d 845, 848 (5th Cir.), *cert. denied*, *454 U.S. 1125, 102 S. Ct. 975, 71 L. Ed. 2d 113 (1981))*, *cert. denied*, *459 U.S. 908, 103 S. Ct. 212, 74 L. Ed. 2d 169 (1982)*. The lower court's "proportionally equal terms" conclusion simply is incapable of supporting its grant of summary judgment.

That conclusion, however, was but one arrow in the court's summary judgment quiver. The district court also concluded that the Appellees had established as a matter of law the meeting competition defense of RPA section

[17] We count only those discovered MDF benefits which relate to advertising and promotion, for the $ 271,123 of MDF benefits relating to free goods are not "services or facilities" within the meaning of sections 2(d) or (e). "Services and facilities" under sections 2(d) and (e) must be related to the resale of the product in issue, and Minolta's provision of free goods was not connected with the resale of Minolta equipment. *See, e.g.,* Fred Meyer, supra, 390 U.S. at 355-57, 88 S. Ct. at 911-12.

2(b). Of course, if the Appellees merely were meeting their competition in good faith they are entitled to summary judgment, the type and amount of their price discrimination notwithstanding.

To establish that they merely were meeting the competition, Appellees **[**33]** alleged that a grey market in Minolta goods existed in Atlanta, that Wolf Camera actively and regularly purchased in this market, that Wolf Camera made known to Minolta that it would buy its Minolta cameras out of this market if Minolta did not cut it special deals, and that Minolta's action in giving Wolf Camera across-the-line discriminatory price concessions was a good faith effort to meet the grey market threat. AA disputed all of this, and hotly so. The district court chose to ignore AA's disputation; it accepted Minolta's testimony *in toto*. It then **[*1425]** opined that summary judgment was appropriate.

We cannot agree with the district court's opinion. ***HN14***[] Under summary judgment a conclusion may not be established as a matter of law unless "no genuine issue as to any material fact" exists. *Fed.R.Civ.P. 56(c)*. Yet in this case plenty of these genuine issues exist. We need not at this point lose ourselves in the facts. We merely pause to note that significant questions are present concerning, among other things, the extent and impact of the grey market for Minolta goods in **[**34]** Atlanta and elsewhere throughout the southeast, the good faith nature of the alleged investigation Minolta made into grey market conditions, *see* *FTC v. A.E. Staley Mfg. Co., 324 U.S. 746, 758-59, 65 S. Ct. 971, 976, 89 L. Ed. 1338 (1945)*; *Rose Confections, Inc. v. Ambrosia Chocolate Co., 816 F.2d 381, 392 (8th Cir. 1987)*, the propriety of its rather generalized response to the purported competition, *see* *Staley Mfg., supra, 324 U.S. at 753, 758-59, 65 S. Ct. at 975, 977*, and the actual *purpose* which lies behind its price discrimination, *see* *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 439, 103 S. Ct. 1282, 1291, 75 L. Ed. 2d 174 (1983)*.

Moreover, under summary judgment involving section 2(b) a legal conclusion that the meeting competition defense has been established is rarely, if ever, reachable. Even in the absence of "allegations to the contrary" that tend to refute the establishment of the defense, certain factors combine to force section 2(b) issues to trial. *See* *Falls City, supra, at 451, 103 S. Ct. at 1297*. First, **[**35]** ***HN15***[] the party proposing a grant of summary judgment in its favor -- here, the Appellees -- bears the initial burden of showing that the summary judgment standard is met. *Clemons v. Dougherty County, Ga., 684 F.2d 1365, 1368 (11th Cir. 1982)* (citing *Adickes v. S.H. Kress & Co., 398 U.S. 144, 157, 90 S. Ct. 1598, 1608, 26 L. Ed. 2d 142 (1970))*. In the normal course of affairs this initial burden is satisfied when the summary judgment movant points out that a claim or issue is not supported by evidence sufficient enough "to require a [factfinder] to resolve the parties' differing versions of the truth." *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 288-89, 88 S. Ct. 1575, 1592, 20 L. Ed. 2d 569 (1968)*. But in the normal course of affairs the summary judgment movant does not bear the burden of proof at trial. Here our movant does, for "the statute places the burden of establishing the defense on the [defendant] not the [plaintiff]." *Falls City, supra, 460 U.S. at 451, 103 S. Ct. at 1297*. As is well established, in a summary judgment proceeding the party against whom the burden of proof falls **[**36]** at trial faces a challenge more difficult than otherwise. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 2552, 91 L. Ed. 2d 265 (1986)*. Here the Appellees must do more than put the issue into genuine doubt; indeed, they must remove genuine doubt from the issue altogether. Second, the test for establishing the section 2(b) defense makes the removal of genuine doubt well nigh impossible. The test for establishing the defense is particularly fact-bound. *United States v. United States Gypsum Co., 438 U.S. 422, 455, 98 S. Ct. 2864, 2882, 57 L. Ed. 2d 854 (1978)*. Whether section 2(b) is met depends on "'*the facts and circumstances of the particular case*.'" *Falls City, supra, 460 U.S. at 441, 103 S. Ct. at 1292* (quoting *United States Gypsum, supra, 438 U.S. at 454, 98 S. Ct. at 2882*) (emphasis added). ***HN16***[] A seller is required to "'show the existence *of facts* which would lead a reasonable and prudent person to believe that the granting of a lower price would *in fact* meet the equally low price of a **[**37]** competitor.'" *Great Atl. & Pac. Tea Co. v. FTC, 440 U.S. 69, 82, 99 S. Ct. 925, 934, 59 L. Ed. 2d 153 (1979)* (quoting *Staley Mfg., supra, 324 U.S. at 759-60, 65 S. Ct. at 977*) (emphasis added). As the standards suggest, these facts are more attuned with a jury's discovery capabilities than a judge's, particularly so in a complex antitrust context like the present one. Furthermore, the concept of good faith lies at the core of the defense. *United States Gypsum, supra, 438 U.S. at 454, 98 S. Ct. at 2882*. Like the concept of "good faith" in other legal standards, the concept here concerns itself with the *belief* of those invoking its protection. **[*1426]** *See* *id., at 453, 98 S. Ct. at 2881*. Thus, issues of credibility are inherently bound up with a decision on the section 2(b) defense and in a summary judgment proceeding, of course, issues of credibility are beyond a judge's ken.

Altogether, these factors weigh heavily against any attempt to dispose of section 2(b) issues on summary judgment. Their weight, along with that of the disputed facts, is too much for the lower court's attempt in this case. Although **[**38]** "there is evidence in the record that might support an inference that [the section 2(b)] requirements were met, whether to draw that inference is a question for the trier of fact, not th[e] court." *Falls City, supra, 460 U.S. at 451, 103 S. Ct. at 1297*. Thus, the section 2(b) issues before us are not destined for summary disposal.

With the subsection (b), (d), and (e) issues out of the way, we are ready to address the final and main ground supporting the lower court's grant of summary judgment: that AA failed to raise a genuine issue of antitrust injury. The district court found the case devoid of any evidence showing an antitrust injury. We think such evidence exists, however, evidence creating a genuine issue of material fact about whether an antitrust injury was inflicted upon AA.

HN17[] Antitrust injury, which in this Circuit has been coined "the fact of damage," *Alabama v. Blue Bird Body Co., 573 F.2d 309, 317 (5th Cir. 1978)*, or "cognizable injury," *Terrell v. Household Goods Carriers' Bureau, 494 F.2d 16, 20* (5th Cir.), *cert.* **[**39]** *dismissed*, *419 U.S. 987, 95 S. Ct. 246, 42 L. Ed. 2d 260 (1974)*, needs for its establishment a showing that the plaintiff is injured in some measurable amount, the injury caused by an improper effect "flowing" from the defendant's antitrust violation. *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 101 S. Ct. 1923, 1927, 68 L. Ed. 2d 442 (1981)*; *Hasbrouck v. Texaco, Inc., 842 F.2d 1034, 1042 (9th Cir. 1988)*, *cert. granted*, *490 U.S. 1105, 109 S. Ct. 3154, 104 L. Ed. 2d 1018 (1989)*. As can be seen, the fact of damage and its cause are intertwined in the antitrust injury concept. The fact of damage is made out upon proof that the plaintiff's level of profits or sales or its present value is or was less than it otherwise would have been absent some intervening cause. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123-24, 89 S. Ct. 1562, 1576-77, 23 L. Ed. 2d 129 (1969)*; *Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 580*; *Hasbrouck, supra, at 1042*. Such a showing presents no problem in this case: AA lost a whole market **[**40]** in Minolta camera sales, the pecuniary effects of which were quantified by its economics expert. [18]

[41]** **[*1427]** The causation question is a little more involved. It asks for something other than an inquiry into whether an antitrust violation has put a plaintiff in a worse position than it otherwise would have been in. *See* *Brunswick v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 486, 97 S. Ct. 690, 696, 50 L. Ed. 2d 701 (1977)*. Often an antitrust-violating action has effects beneficial as well as banned. The causation question asks not whether the antitrust violation caused the plaintiff's injury, but whether the banned effects flowing from that violation -- as opposed to the beneficial ones -- led to plaintiff's harm. *Brunswick, supra, at 489, 97 S. Ct. at 697*. In many cases

[18] The lower court seemed to find that AA failed to establish injury at all, much less antitrust injury. The court found that the discriminatory benefits received by Wolf Camera were not passed on in the form of lower prices to its consumers and that AA never lowered prices to compete with Wolf Camera. Moreover, the lower court found from the evidence that AA's profit margins on Minolta products were comparable with or higher than those on its other products, and stayed that way throughout the period of discrimination. It apparently concluded from these findings that AA had suffered no loss of sales or profits and, consequently, that no damage had been sustained.

Such a conclusion is a *non sequitur*. Wolf Camera may not have passed on its discriminatory benefits in the form of lower prices, although we think the evidence on this is mixed at best. But lower resale prices are not necessary to establish injury. The evidence shows that discretionary dollars in the Atlanta specialty camera store industry were most often channelled into store-specific advertising rather than into investments in price cuts. Sales were gained not by cutting prices but by aggressive advertising or product/service enhancement. The evidence, more specifically, shows that Wolf Camera was an avid pursuer of marketing expense and enhanced service and, indeed, that it directed most of its discriminatory advantage into these areas of demand management, thereby expanding its sales at AA's expense. Although price is nice, it is this effect on sales that directs the injury inquiry. *See* *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. at 437-38, 103 S. Ct. at 1290* (speaking of diverted sales); *Rose Confections, Inc. v. Ambrosia Chocolate Co., 816 F.2d at 386-87* (speaking of injury through loss of potential customers).

That AA's product margins on Minolta goods remained comparable with those on its other goods or that AA did not lower its prices on Minolta goods (which is to say the same thing) is not critical in establishing injury, for a firm's profits are the product of an equation multiplying profit margin and dollar volume of sales. Where the dollar volume of sales drops, as it did for AA in a most dramatic fashion, a firm's amount of profit drops regardless of stability in its profit margin. And it is the firm's *profits*, not its *profit margin*, that the law is concerned with.

this distinction makes a difference. *See id.; Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. This is so because in many cases the "injury to competition" an ***antitrust law*** was established to prevent is different from an "injury to competitors" that a breach (or nonbreach) of that law may effect. *See Ball Memorial Hosp., Inc. v. Mutual Hosp. Ins., Inc., 784 F.2d 1325 (7th Cir. 1986)*. In those **[**42]** cases a competitor cannot complain if injured unless the injury flows from anti-competitive, not anti-competitor, effects.

With secondary-line RPA violations the competition/competitor distinction tends to fade. *See FTC v. Morton Salt Co., 334 U.S. 37, 49-50, 68 S. Ct. 822, 830, 92 L. Ed. 1196 (1948)* (concerning competitive injury); *Foremost Dairies, Inc. v. FTC, 348 F.2d 674, 678* (5th Cir.) (same), *cert. denied*, *382 U.S. 959, 86 S. Ct. 435, 15 L. Ed. 2d 362 (1965)*. As a price discrimination incipiency statute designed to "catch the weed in the seed," *S.Rep. No.* 1502, 74th Cong., 2d Sess. 4 (1936), the injury to secondary-line competition the RPA seeks to prevent is analogous, if not identical, to an injury to competitors of a favored buyer. *See H.R.Rep. No.* 2287, 74th Cong., 2d Sess. 8 (1936). *See also Morton Salt, supra, 334 U.S. at 46-50, 68 S. Ct. at 828-30*; *Corn Prod. Ref. Co. v. FTC, 324 U.S. 726, 738-39, 65 S. Ct. 961, 967, 89 L. Ed. 1320 (1945)*. The effects from which the RPA injury may flow, then, are the effects one would expect to injure competitors on the wrong end of a supplier's **[**43]** price discrimination scheme. These effects include a lowering of price by a favored purchaser. They also include a favored purchaser's effectuation of some other means by which it uses price discrimination benefits to lure from its rivals sales or profits or present value; for example, by increasing some expenditure that ultimately leads to a lower price, enhanced product, or extra promotion. *See World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467, 1480* (10th Cir.), *cert. denied*, *474 U.S. 823, 106 S. Ct. 77, 88 L. Ed. 2d 63 (1985)*. *Cf. Foremost Dairies, supra, at 680*.

In final form the RPA causation question asks whether some or all of the plaintiff's injury was derived from or materially furthered [19] by a competitive advantage bestowed upon a favored purchaser through its receipt of discriminatory prices. *See Lupia v. Stella D'Oro Biscuit Co., 586 F.2d 1163, 1171 (7th Cir. 1978)*, *cert. denied*, *440 U.S. 982, 99 S. Ct. 1791, 60 L. Ed. 2d 242 (1979)*. The evidence in this case is enough to put the question genuinely in dispute, especially in light of the substantial evidence of Appellees' **[**44]** wrongdoing. *See J. Truett Payne, supra, 451 U.S. at 565-67, 101 S. Ct. at 1929-30*. That evidence suggests that Minolta gave Wolf Camera a purchasing advantage over AA and that Wolf Camera channeled its purchasing advantage into a promotional advantage, unmatched by AA, in an industry where store sales are heavily influenced by promotional expense. It shows conclusively that during the time of this discrimination AA's share of the market dropped precipitously, that **[*1428]** share being absorbed by Wolf Camera. And it contains, among other things, the report of an economic expert concluding that the advantage afforded Wolf Camera by the discrimination *caused* AA injury, and in quite a substantial amount. There is enough here for a jury to find an antitrust injury caused by Appellees "'as a matter of fact and with a fair degree of certainty.'" *See Chrysler Credit Corp., supra, at 581* (quoting *Terrell, supra, at 20*). There is enough for a jury to find otherwise, too, but not so much to eliminate a triable issue. [20] At the very least the

---

[19] For damages "it is enough that the illegality is shown to be a *material cause* of the injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden." *Zenith Radio Corp., supra, 395 U.S. at 114 n. 9, 89 S. Ct. at 1571-72 n. 9*.

[20] This conclusion stands regardless of the specific concerns advanced by the lower court. The court felt that no injury could possibly arise from the amount of price discrimination involved in the case, which it called *de minimis*. But the *de minimis* doctrine, by which a price discrimination is held to be too inconsequential to have caused competitive injury under section 2(a) or actual injury under section 4, does not depend on the large or small amount of the price discrimination *per se*. It depends on the large or small *effect* that the price discrimination has on business rivalry. *See Lupia, supra, at 1171*. To illustrate, in a competitive market the smallest increment of price advantage to one competitor would theoretically allow it to capture from its rivals as much of a market share as its output allowed. The price advantage may be *de minimis*, but the effect of it is not. We are not suggesting that the market involved here is *perfectly* competitive, but it is imperfectly so, and even in such markets a little price discrimination can go a long way. *See Foremost Dairies, supra, at 679* (dairy industry); *Shreveport Macaroni Mfg. Co. v. FTC, 321 F.2d 404, 409 (5th Cir. 1963)*, *cert. denied*, ***375 U.S. 971, 84 S. Ct. 491, 11 L. Ed. 2d 418 (1964)*** (pasta industry). Indeed, AA's economic expert concluded that the competitive advantage given Wolf had a *substantial* effect on its ability to capture market share, and as far as we know the expert's conclusions constitute evidence. Thus, the lower court's *de minimis* objection cannot keep this issue from reaching the jury.

evidence gives rise to a reasonable inference that Appellees' misdeeds caused AA some harm. **[**45]** And where such a reasonable inference is raised by the evidence, summary judgment is uncalled for. *Gossett v. Du-Ra-Kel Corp., 569 F.2d 869, 871 (5th Cir. 1978)*; *Benton-Volvo-Metairie, Inc. v. Volvo S.W., Inc., 479 F.2d 135 (5th Cir. 1973)*.

[46]** IV.

We turn now to some peripheral issues. They are easily dispatched. The lower court granted Wolf and Wolf Camera's motion for summary judgment against AA's section 2(f) claim. Its reason for so doing was that no claim can lie against a buyer under section 2(f) where no claim lies against a seller under other sections of the **[*1429]** RPA. This reasoning is unassailable. *See Great Atl. & Pac. Tea Co. v. FTC, 440 U.S. 69, 76-77, 99 S. Ct. 925, 931, 59 L. Ed. 2d 153 (1979)*; *Automatic Canteen Co. v. FTC, 346 U.S. 61, 70-71, 73 S. Ct. 1017, 1022-23, 97 L. Ed. 1454 (1953)*; *Boise Cascade Corp. v. FTC, 267 U.S. App. D.C. 124, 837 F.2d 1127, 1129 (D.C.Cir. 1988)*. But our analysis has determined that the lower court was in error on issues relating to seller liability. With this prong of its argument gone, the district court's conclusion concerning section 2(f) is no longer valid. Accordingly, AA's section 2(f) count must be revived.

The same can be said of AA's state law claim for tortious interference. The court granted summary judgment on this count relying on the strength of its previous conclusions regarding the RPA and section **[**47]** 4 of the Clayton Act. Because those conclusions have been undermined, the court's summary judgment on the tortious interference count is likewise undermined.

AA's complaint also included a state law claim asserting that Minolta had an ongoing contractual relationship with AA throughout the period of the alleged price discrimination, that an implied covenant of good faith and fair dealing was part of this contract, and that Minolta's discriminatory actions breached this covenant. AA did not allege, however, that any explicit term in its contracts with Minolta was breached. Thus, AA sought to set the implied covenant up as an independent term in its contracts, subject to breach apart from any other. The district court rejected this attempt, and rightly so, for the "covenant" is not an independent contract term. *Management Assistance, Inc. v. Computer Dimensions, Inc., 546 F. Supp. 666 (N.D.Ga.1982)*, *aff'd without opinion sub nom.,*

Nor can a variation on the *de minimis* theme relied on by the court: that no antitrust injury existed because Minolta products were only one line of many that AA carried. Simply because AA's injury derived from only one line of its products does not make that injury any less real. *See FTC v. Morton Salt Co., 334 U.S. at 49, 68 S. Ct. at 829*. If this particular strain of the *de minimis* argument failed in *Morton Salt*, where a grocer's potential injury came only from price differentials affecting one product amid thousands that it carried, it surely fails here.

The court also seemed to think that AA's injury could only be caused from price-lowering actions by Wolf Camera. But sales in the specialty camera industry are affected by more than price; they are affected by promotion and product as well. The court found as a matter of fact that Wolf Camera channeled most of its advantage into advertising and promotion, and it seems that it enhanced its product (photographic equipment *and* retail service combined) too. The evidence establishes that promotion and product enhancement were the primary factors affecting camera consumers' choice of sales outlet. Thus the fact that Wolf Camera did not lower its resale prices, even if true, by no means eliminates causation from jury consideration.

The court felt too that no genuine issue existed about AA's antitrust injury, or lack thereof, because AA was the cause of its losses, not Appellees. There can be no liability "when the injury is the result of the plaintiff's own competitive shortcomings, rather than a merely coincidental discrimination in price." *Richard Short Oil Co. v. Texaco, Inc., 799 F.2d 415, 421 (8th Cir. 1986)*. And it is true that AA had competitive shortcomings, including its faulty computer system and its decision to blunder about unprofitably in Florida. These shortcomings *could* easily have been the intervening cause of all AA's sales and profit losses or some part of them, of this there is no doubt. But whether the cause of all or some of AA's problems *actually was* AA's discrimination-based competitive disadvantage, AA's computer, AA's managers, all of these things or none of them, is a matter of educated inference that must be left for the jury. If it finds that Appellees' price discrimination was the cause of *some* of AA's injury, which is certainly a reasonable inference, Appellees will be "responsible to that extent." *Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. at 437, 103 S. Ct. at 1290*.

Computer Dimensions, Inc. v. Basic Four, Inc., 747 F.2d 708 (11th Cir. 1984). It is a doctrine that modifies the meaning of all explicit terms in a contract, preventing a breach of those explicit terms *de facto* when **[**48]** performance is maintained *de jure. See Smithloff v. Benson, 173 Ga.App. 870, 328 S.E.2d 759 (1985)*; *Koets, Inc. v. Benveniste, 169 Ga.App. 352, 354, 312 S.E.2d 846 (1983) aff'd*, *252 Ga. 520, 314 S.E.2d 912 (1984)*; *Fulton Nat'l Bank v. Willis Denney Ford, Inc., 154 Ga.App. 846, 848-49, 269 S.E.2d 916 (1980)*; *Carmichael v. Gonzalez, 107 Ga.App. 746, 131 S.E.2d 149 (1963)*. But it is not an undertaking that can be breached apart from those terms. Summary judgment on this count was appropriate.

One final issue. The district court precluded AA from pursuing discovery of information concerning discriminatory benefits that Minolta afforded Wolf Camera out of certain MDF accounts and discriminatory benefits that Minolta afforded other "key dealers" throughout the nation. It did so, in part, on the theory that the information sought was irrelevant to the litigation. But the information sought is relevant. Information showing that discriminatory benefits flowed not only to Wolf Camera but to other "key dealers" throughout the nation would go far in discrediting any attempt by Minolta to assert that the **[**49]** discriminatory benefits it afforded Wolf Camera were a "good faith" effort to meet competition in the Atlanta or southeast market. And information leading to a further quantification of the amount of price discrimination involved in Minolta's scheme would tend to clarify and perhaps refute any claims Appellees might raise relating to the competitive injury requirement of section 2(a), which concerns itself with injury to competition and competitors *in general*, not just injury to AA. [21]

[50]** In blocking the discovery of information such as this, the district court abused its discretion. We are not saying that the **[*1430]** district court was wrong to be concerned about elements of vexatiousness that may be lurking in this lawsuit, nor do we think that it should have given AA *carte blanche* in pursuing discovery. We say only that its order of October 2, 1987 was in error because it did not properly take into account the type of information that has value under the "key dealer" theory AA presented.

V.

In sum, we conclude that the district court abused its discretion with respect to the discovery order of October 2, 1987. We also conclude that summary judgment was improper with respect to all issues except the one concerning the implied covenant of good faith and fair dealing. Besides that one, the issues involved in this appeal are all "genuine issues of material fact," *Fed.R.Civ.P. 56(c)*, for which a trial would serve a useful purpose. Accordingly, they must be submitted to the jury. [22]

---

[21] Even when AA's injury alone is considered, the district court's limitation on discovery was too severe. The court found that the Atlanta market was the only relevant market in this case, but this finding does not comport with the facts. AA had stores not only in Atlanta, but throughout the southeast United States and particularly in Florida. Grabowski's testimony alleged that Minolta channeled "key dealer" benefits to Florida camera stores other than AA, including Wolf Camera's Florida stores. The evidence is inconclusive with regard to the extent of competition, in Florida, between AA and the other key-dealer retailers. Thus, these benefits *may have injured* AA in Florida, or they may have been used to create a fund for injuring AA in Atlanta. Discovery should have been allowed to determine if this was the case.

Moreover, a narrow reading of AA's complaint cannot limit the relevant market in this case solely to Atlanta. Although the complaint naturally focuses on Minolta and Wolf Camera in the Atlanta market, it does not do so to the point of limiting discovery only to Wolf Camera in the Atlanta market. It seems to us that the district court's focus on the Atlanta market was too narrow. At least for the purposes of discovery, AA should have been allowed to find information on price discrimination affecting all of its stores, even those outside of Atlanta.

[22] Our analysis on summary judgment was based on a normal reading of the *Rule 56* standard. Appellees argue that our analysis should have been based on a stricter reading. They assert that the Supreme Court's decision in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* evinces a mandate for courts to use a stricter-than-normal summary judgment standard in antitrust cases, a standard that imposes extra burdens on a plaintiff, one that would lead us in this case to uphold the district court. We cannot agree with the Appellees' assertion, however, for *Matsushita* calls for no such deviation from the norm embodied in *Fed.R.Civ.P. 56*.

[51]** For the foregoing reasons, the judgment of the district court is REVERSED, and its order entered October 2, 1987 is VACATED. The case is REMANDED for further proceedings consistent with this opinion.

End of Document

In *Matsushita* the Supreme Court warned courts in summary judgment proceedings to be skeptical when presented antitrust allegations that clash with established economic theory. Such skepticism is well warranted because established economic theory indicates how rational entities generally act, and most antitrust cases involve the acts of rational entities. Generalizing, *Matsushita* warns courts to be wary of drawing irrational inferences in summary judgment proceedings, for irrational inferences fail to create genuine issues of material fact. But such a doctrine is hardly novel; and it certainly does not modify the standard for summary judgment. *Matsushita* said nothing new, it merely informed the proper *Rule 56* standard by placing it in a complex antitrust context (that of a predatory pricing conspiracy).

We did not base our conclusions on irrational inferences, of course. Thus, *Matsushita* provides Appellees with little help.

Austin v. Blue Cross & Blue Shield

United States Court of Appeals for the Eleventh Circuit

HN1[] **Antitrust & Trade Law, Sherman Act**

The question of standing to sue under the Sherman and Clayton Acts is one of law. In order to determine whether a plaintiff has standing to bring an antitrust action, a court must review the allegations contained in the complaint. More than constitutional standing must exist; the court must find a close relationship between the plaintiff's injury and the alleged antitrust violation.

HN4[] **Clayton Act, Claims**

The question of whether a plaintiff can recover for alleged antitrust injuries cannot be answered simply by reference to the broad language of § 4 of the Clayton Act, *15 U.S.C.S. § 15*. Instead the question requires the court to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them. It is clear that the judicial remedy of § 4 of the Act cannot encompass every conceivable harm that can be traced to alleged wrongdoing.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5[] **Clayton Act, Claims**

Standing to prosecute a private antitrust action under § 4 of the Clayton Act requires the plaintiff to prove that he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry. The plaintiff must be the target against which anti-competitive activity is directed. The injury must be of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' act unlawful. Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the anti-trust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN6[] **Private Actions, Standing**

Both causation and antitrust injury are essential elements of antitrust standing. In order to receive damages under the antitrust laws, a plaintiff must prove more than the fact that he was injured through conduct of the defendant. The plaintiff must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Moreover, the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The antitrust laws were enacted for the protection of competition, not competitors.

HN9[] Antitrust & Trade Law, Clayton Act

Effective employment of the antitrust remedy provided by § 4 of the Clayton Act, *15 U.S.C.S. § 15*, requires that these lawsuits not be weighed down with massive evidence and complicated theories.

Counsel: C. Knox McLaney, III, Montgomery, Alabama, Jerry R. Knight, Decatur, Alabama, for Plaintiffs-Appellants.

Lange, Simpson, Robinson & Somerville, William G. Somerville, Jr., Robert D. Eckinger, Birmingham, Alabama, for Defendant-Appellee.

Judges: Roney and Hill, Senior Circuit Judges, [*] and Marcus, [**] District Judge.

Opinion by: MARCUS

Opinion

[*1386] Marcus, District Judge.

Dennis W. Austin and Ernest D. Woodall, Jr. appeal from the June 7, 1988 district court order dismissing their Amended Complaint on the finding that Appellants lacked antitrust standing to bring this action. We find no error in the district court's determination and accordingly we affirm.

I.

This action arose out of allegations contained in Appellants' Amended Complaint filed in the United States District Court for the Middle District of Alabama. In their Amended **[**2]** Complaint, Austin and Woodall, residents of Decatur, Alabama, allege that Blue Cross and Blue Shield of Alabama ("Blue Cross") entered into contracts, combinations or conspiracies with all, or substantially all, of the hospitals in the state of Alabama for the purpose of creating or maintaining a monopoly or for the purpose of eliminating, lessening, discouraging, or impeding competition from others engaged in the health, medical and hospital insurance business. The Amended Complaint

---

[*] See Rule 34-2(b), Rules of the U.S. Court of Appeals for the Eleventh Circuit.

[**] Honorable Stanley Marcus, U.S. District Judge for the Southern District of Florida, sitting by designation.

further charges that the Defendant and the hospitals, including the Decatur General Hospital and the Huntsville Hospital, engaged in certain illegal acts and practices. The Amended Complaint claims that agreements reached between Blue Cross and the hospitals wrongfully provided for the hospitals to accept payments for services rendered from Blue Cross, on behalf of its insured, in amounts lower than charges which the hospitals assessed to patients insured by competitors of Blue Cross and patients who do not subscribe to health insurance for like services. Appellants say that the agreements between Blue Cross and the hospitals caused the hospitals to engage in a practice known as "cost shifting," a process **[**3]** whereby patients insured with other insurance companies as well as uninsured patients are assessed charges higher than they would be assessed but for the alleged preferential treatment given to Blue Cross and its insured pursuant to the alleged agreements. It is further charged that the agreements put Blue Cross in a superior competitive position by giving Blue Cross a decided actuarial advantage over its competitors. The Appellants claim that Blue Cross' actions in allegedly entering into agreements regarding price concessions with the hospitals violate both *Sections 1* and *2* of the Sherman Act, Title *15 U.S.C. §§ 1*, *2*.

Appellant Austin charges specifically that his wife and newborn child incurred substantial medical expenses at Decatur **[*1387]** General Hospital and Huntsville Hospital during the months of December 1986 and March 1987. While Dennis Austin and his dependents were covered by a health, medical and hospital insurance policy issued by Time Insurance Company -- not a party to the law suit -- Austin was responsible for certain uncovered hospital expenses as well as a twenty percent co-payment for costs which were covered under the policy. Austin **[**4]** claims that due to "cost shifting" engaged in by the hospitals as a result of agreements reached with Blue Cross, he was forced to pay inflated charges for the health care received by his wife and child.

Appellant Ernest D. Woodall, Jr. claims to have been treated at the Emergency Room of Decatur General Hospital at various times during 1985 and 1986. He charges that he was not covered by health, medical or hospital insurance during the period in which he received treatment and that he, too, incurred inflated charges for hospital services due to the "cost shifting" practices engaged in by the hospital. The Amended Complaint sought declaratory and injunctive relief as well as treble damages for the purported violations of the Sherman Act.

On March 4, 1988, Appellee moved to dismiss based on the lack of antitrust standing. Appellants responded on March 30, 1988, and on June 7, 1988 the district court granted the motion to dismiss finding that Austin and Woodall lacked "antitrust standing." This appeal ensued.

II.

HN1[] The question of standing to sue under the Sherman and Clayton Acts is one **[**5]** of law. *Midwest Communications v. Minnesota Twins, 779 F.2d 444, 449 (8th Cir. 1985)*, *cert. denied*, *476 U.S. 1163, 106 S. Ct. 2289, 90 L. Ed. 2d 730 (1986)*. In order to determine whether a plaintiff has standing to bring an antitrust action, a court must review the allegations contained in the complaint. *Pan-Islamic Trade Co. v. Exxon Corp., 632 F.2d 539, 547 (5th Cir. 1980)*, *cert. denied*, *454 U.S. 927, 102 S. Ct. 427, 70 L. Ed. 2d 236 (1981)*; *In Re Beef Industry Antitrust Litigation, 600 F.2d 1148, 1168 (5th Cir. 1979)*. More than constitutional standing must exist; "the court must find a close relationship between the plaintiff's injury and the alleged antitrust violation." *Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1493 (11th Cir. 1985)*, *cert. denied*, *476 U.S. 1153, 106 S. Ct. 2267, 90 L. Ed. 2d 712 (1986)*.

Section 4 of the Clayton Act, *15 U.S.C. § 15*, **[**6]** defines ***HN2***[] very broadly the class of persons who may bring a private damage action under the antitrust laws. That section provides:

> ***HN3***[] Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

The Supreme Court has observed that "[a] literal reading of the statute is broad enough to encompass every harm that can be attributed directly or indirectly to the consequences of an antitrust violation." Associated General Contractors v. Carpenters, 459 U.S. 519, 529, 103 S. Ct. 897, 903, 74 L. Ed. 2d 723 (1983). However, in *Associated General Contractors*, the Court rejected so expansive a reading of § 4 noting that **HN4**[] the question of whether a plaintiff can recover for alleged antitrust injuries "cannot be answered **[**7]** simply by reference to the broad language of § 4. Instead . . . the question requires us to evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." Id. at 535, 103 S. Ct. at 907. It is clear that "the judicial remedy [of § 4] cannot encompass every conceivable harm that can be traced to alleged wrongdoing" Id. at 537, 103 S. Ct. at 908. *See also* Hawaii v. Standard Oil Co., 405 U.S. 251, 263, n. 14, 92 S. Ct. 885, 891, n. 14, 31 L. Ed. 2d 184 (1972) ("The lower [federal] courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a **[*1388]** remedy in damages for all injuries that might conceivably be traced to an antitrust violation"); Southhaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1081 (6th Cir. 1983) ("Application of Section 4 has of necessity been judicially confined to limit the remedy available thereunder to particular classes of persons and for redress of particular forms of injury.")

The federal courts have long struggled to develop a precise test to determine whether a party alleged **[**8]** to have been injured by an antitrust violation may recover treble damages. This struggle has been compared with "the struggle of common-law judges to articulate a precise definition of the concept of 'proximate cause'". Associated General Contractors, 459 U.S. at 535-36, 103 S. Ct. at 907. In *Associated General Contractors*, the Supreme Court recognized the impracticality inherent in the application of a "black-letter rule" to determine whether a plaintiff has standing to recover for an antitrust violation. Id. at 536, 103 S. Ct. at 907. In doing so, the Court suggested that the use of formulations such as the "direct injury" test and the "target area" test may tend to "lead to contradictory and inconsistent results." Rather, the Court observed, "in our view, courts should analyze each situation in light of the factors set forth in the text. . . ." Id. at 536, n. 33, 103 S. Ct. at 907, n. 33.

Associated General Contractors involved a union's claim that an association of contractors coerced third parties and other members of the contractor's association into avoiding business relationships with union contractors and subcontractors. **[**9]** In determining that the union lacked standing to bring an action under the Clayton Act, the Supreme Court declined to apply a rigid test to resolve the standing issue. Instead, the Court applied the following battery of factors to reach its conclusion: 1) the existence of a causal connection between the antitrust violation and the alleged injury; 2) the nature of plaintiff's alleged injury; 3) the directness or indirectness of the asserted injury and the related inquiry of whether the damages are speculative; 4) the potential for duplicative recovery or complex apportionment of damages; and, finally, 5) the existence of a more direct victim of the alleged anti-competitive conduct. Id. at 536-45, 103 S. Ct. at 907-12. *See also* Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1494-95 (construing factors employed in *Associated General Contractors*). The Court noted that the foregoing factors are reflective of "previously decided cases [which] identify factors that circumscribe and guide the exercise of judgment in deciding whether the law affords a remedy in specific circumstances." Associated General Contractors at 536-37, 103 S. Ct. at 908. **[**10]**

Subsequent to the Supreme Court's decision in Associated General Contractors, this Court reaffirmed its employment of the target area test in determining standing under the Clayton Act. See Amey, 758 F.2d at 1496-97; Palazzo v. Gulf Oil Co., 764 F.2d 1381, 1387 (11th Cir. 1985), *cert. denied*, *474 U.S. 1058, 106 S. Ct. 799, 88 L. Ed. 2d 775 (1986)*. In National Independent Theatre Exhibitors v. Buena Vista Distribution Co., 748 F.2d 602-08 (1984), *cert. denied sub. nom., Patterson v. Buena Vista Distributing Co., 474 U.S. 1013, 106 S. Ct. 544, 88 L. Ed. 2d 473 (1985)*, this Court expounded on the requirements for standing in a private antitrust action:

> **HN5**[] Standing to prosecute a private antitrust action under section 4 of the Clayton Act requires the plaintiff to prove that "he is within that sector of the economy which is endangered by a breakdown of competitive conditions in a particular industry." Jeffrey v. Southwestern Bell, 518 F.2d 1129, 1131 (5th Cir. 1975). See Construction Aggregate Transport Inc. v. Florida Rock Industries, Inc., 710 F.2d 752, 762 (11th Cir. 1983). **[**11]** The plaintiff must be the target against which anti-competitive activity is directed. Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 710 (11th Cir. 1984); Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 546-47 (5th Cir. 1980), *cert. denied*, *454 U.S. 927, 102 S. Ct. 427, 70 L. Ed. 2d 236*

> *(1981)*. The injury must be "of the type the antitrust laws were intended to prevent and that **[*1389]** flows from that which makes defendants' act unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. "Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the anti-trust laws." *Midwestern Waffles, 734 F.2d at 710-11*. See *Jeffrey, 518 F.2d at 1131* (citing cases)

In *Amey*, this Court observed that the target area test does not produce results materially different from the results obtained by applying the factorial analysis embodied in *Associated General Contractors* **[**12]** . Indeed, the target zone test incorporates the factors delineated in *Associated General Contractors. See* *Amey, 758 F.2d at 1496-97*. Measured by any of these standards Appellants have not established antitrust standing.

III.

To begin, a review of the Amended Complaint establishes, as the district court observed, that the causal connection between Plaintiffs' injuries and Blue Cross' alleged misconduct is at best remote and tenuous. The Complaint alleges only that the hospitals and Blue Cross entered into contracts for the provision of hospital services to Blue Cross and its insured or subscribers; that as a result of these contracts, Blue Cross receives hospital services for its subscribers at rates more favorable than those received by competing health insurers and uninsured patients; that because of favorable rates given to Blue Cross, the hospitals charge competing insurers and other patients more than is paid by Blue Cross ("cost shifting"); and, finally that this practice of "cost-shifting" results in Blue Cross' competitors and uninsured patients paying more for services.

The Complaint does not allege, however, that the contracts between Blue Cross and **[**13]** the hospitals say anything at all as to the rates the hospitals charge to other purchasers. There is no claim that Blue Cross plays any role in the decisions of the hospitals to set various rates for others. Indeed, there is no claim that Blue Cross in any way coerced the hospitals to charge non-Blue Cross customers higher rates than those charged to Blue Cross customers. Nor, finally, is there any claim that Blue Cross conspired with the hospitals to engage in any predatory pricing. It is important to observe that the only allegations of "cost shifting" contained in the Complaint are limited to actions purportedly taken by the hospitals. In short, the Appellants have made no real showing of a causal connection between their injury and Blue Cross' alleged antitrust violation. The connection is indirect and collateral.

In the second place, whether measured by the factors delineated in *Associated General Contractors* or by the target area test, the plaintiffs have not alleged injuries brought about by a violation of the antitrust laws. ***HN6***[] Both causation and antitrust injury are essential elements **[**14]** of antitrust standing. In *Brunswick Co. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, the Supreme Court held that in order to receive damages under the antitrust laws, a plaintiff must prove more than the fact that he was injured through conduct of the defendant. The "plaintiff[] must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Id. at 489, 97 S. Ct. at 697* (emphasis original). Moreover, "the injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Id.* "The antitrust laws . . . were enacted for 'the protection of *competition*, not *competitors'[.]"* *Id. at 488, 97 S. Ct. at 697* (emphasis original) (citing *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 1521, 8 L. Ed. 2d 510 (1962))*.

The rationale for placing so great an emphasis on antitrust injury as the touchstone for antitrust standing has been offered in these terms:

> The antitrust injury **[**15]** concept . . . requires the private antitrust plaintiff to show **[*1390]** that his own injury coincides with the public detriment tending to result from the alleged violation. This requirement increases the likelihood that public and private enforcement of the antitrust laws will further the same goal of increased competition.

P. Areeda and H. Hovenkamp, ***Antitrust Law***, 335.1, at 261 (Supp.1987).

Accordingly, Appellants must show that the contractual agreements between Blue Cross and the hospitals as alleged are anticompetitive. Framed more precisely, at issue is whether, standing alone, Blue Cross' use of its market power to gain lower rates for its subscribers *from* hospitals violates the Sherman Act.

In *Travelers Insurance Company v. Blue Cross of Western Pennsylvania, 481 F.2d 80 (3rd Cir.1973)*, *cert. denied*, *414 U.S. 1093, 94 S. Ct. 724, 38 L. Ed. 2d 550 (1973)*, the Third Circuit was faced with a case of striking similarity to the instant one. In *Travelers*, a competing insurance company brought an action under *§ 1* of the Sherman Act alleging that Blue Cross of Pennsylvania had restrained trade and monopolized and **[**16]** attempted to monopolize the health care industry in Western Pennsylvania through the negotiation of favorable health care rates with hospitals. Travelers claimed that Blue Cross had monopoly power with some 62% of the market, and that it used that power to obtain hospital rates for approximately 14% to 15% below the rates charged to non-Blue Cross purchasers. As in the instant case, there were *no* allegations in *Travelers* that Blue Cross had attempted to influence relationships between hospitals and other health insurance companies. *Id. at 84*.

The *Travelers* Court analyzed whether the complaint alleged sufficient facts to constitute a claim for damages resulting from a violation of *§§ 1* and *2* of the Sherman Act. After assuming, *arguendo*, that Blue Cross possessed sufficient market strength to have "monopoly power," the Court observed:

> In its negotiating with hospitals, Blue Cross has done no more than conduct its business as every rational enterprise does, i.e., get the best deal possible. This pressure encourages hospitals to keep their costs down; and, for its own competitive advantage, Blue Cross passes along the saving thus realized to **[**17]** consumers. To be sure, Blue Cross' initiative makes life harder for commercial competitors such as Travelers. The antitrust laws, however, protect competition, not competitors; and stiff competition is encouraged, not condemned.

Id. The Court concluded that Blue Cross' use of market power to obtain discounts for its customers from hospital providers did not constitute a restraint of trade or the willful acquisition or maintenance of monopoly power. Efforts to obtain lower prices for subscribers are not anti-competitive. A similar conclusion was reached by the First Circuit in *Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922 (1st Cir. 1984)*, *cert. denied*, *471 U.S. 1029, 105 S. Ct. 2040, 85 L. Ed. 2d 322, 105 S. Ct. 2049 (1985)*. The *Kartell* Court found no right of action under the Sherman Act under circumstances similar to the instant case, holding that pricing agreements between an insurance company and participating physicians do not represent a restraint of trade or monopolization.

Applying these principles to the facts of the instant case yields a straightforward result. Here, the allegations fail to charge actions on the **[**18]** part of the Appellee which would constitute a violation of ***antitrust law*** if proved. The Appellants' Amended Complaint alleges that the Appellee

> entered into contracts, combinations or conspiracies with all, or substantially all, of the entities operating hospitals in the State of Alabama for the purpose of creating or maintaining a monopoly or monopoly power or for the purpose of eliminating, lessening, discouraging or impeding competition from others engaged in the health, medical and hospital insurance business.

Amended Complaint at para. 7. The Amended Complaint further alleges that

> Pursuant to the aforesaid contracts, combinations or conspiracies, the various hospitals accept from the Defendant, in behalf of its insured, in full settlement **[*1391]** and discharge of the accounts for services rendered to the Defendant's insured amounts lower than the standard charges assessed for services rendered to persons insured by insurers in competition with the Defendant and to private patients or uninsured persons[.]

Amended Complaint at para. 8(a).

An examination of these allegations reveals that the Appellants, like the plaintiffs in *Travelers* **[**19]** , have merely charged Appellee with using its market power to bargain for the lowest possible price for services provided to its customers. Again, we observe that Appellants do not allege that the Appellee in any way coerced the hospitals to charge non-Blue Cross customers higher rates than those charged to Blue Cross customers. Moreover, there is no claim that Blue Cross conspired with the hospitals to engage in predatory pricing. There is no suggestion that the hospitals priced their services below average variable cost, *see* International Air Industries, Inc. v. American Excelsior Co., 517 F.2d 714, 722 (5th Cir. 1975), *cert. denied*, *424 U.S. 943, 96 S. Ct. 1411, 47 L. Ed. 2d 349 (1976)*, or below total cost, *see* McGahee v. Northern Propane Gas Company, 858 F.2d 1487 (11th Cir. 1988), *cert. denied*, *490 U.S. 1084, 109 S. Ct. 2110, 104 L. Ed. 2d 670 (1988)*, or that any "cost-shifting" by the hospitals was either required by or approved of by the Blue Cross contracts, or, finally, that Blue Cross acted as if it were a "third force" intervening in the market place in such a way as to prevent willing buyers and sellers **[**20]** from "independently" coming together to strike bargains as to price and service. *See* Kartell, supra, 749 F.2d at 924.

In short, we can find no allegations in the Amended Complaint which support the conclusion that the agreements between Blue Cross and the hospitals amount to a restraint of trade. Rather, the agreements actually promote competition within the relevant health care market by allowing Blue Cross to charge lower rates to its subscribers resulting from a reduction in the cost of health care services which it purchases from hospitals. To the extent competitors seek to compete successfully with Blue Cross, they will be required to lower their rates or improve the benefits offered to subscribers. We are unable to see how Blue Cross' action in simply entering into agreements with hospitals to reduce costs restrained trade in violation of Section 1 of the Sherman Act. We underscore again that we are not called on to consider any allegations that the contracts either contemplated or provided for "cost-shifting," or that they in any way restrained or interfered with any other persons or insurance companies who may purchase services from the hospitals.

The **[**21]** Amended Complaint also alleges that the agreements constitute monopolization in violation of § 2 of the Sherman Act. In United States v. Grinnell Co., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 1703-04, 16 L. Ed. 2d 778 (1966), **HN7**[] the Supreme Court defined the offense of monopoly under § 2 of the Sherman Act as consisting of two elements:

> (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

In the instant case, even assuming that Blue Cross possessed monopoly power within the relevant market, we can find no violation of § 2 of the Sherman Act and no indication of antitrust injury. In light of our finding that the agreements between Blue Cross and the hospitals do not represent a restraint of trade, we have little trouble concluding likewise that Appellants have not established any antitrust injury arising from allegations of monopolization. Again, the complained of conduct **[**22]** arises from Blue Cross' ability to provide a superior product, namely health coverage at *lower* rates than its competitors. *See* Travelers, 481 F.2d at 85 (finding no violation of § 2 of the Sherman Act in the face of essentially the same allegations as the allegations contained in the Amended Complaint). In short, Appellants have not shown antitrust injury.

[*1392] In the third place, we observe that neither of the Appellants dealt directly with Blue Shield, suggesting the remoteness of Appellants injury from any purported antitrust violation. The Amended Complaint only alleges that most of Austin's medical expenses were covered through a policy issued by Time Insurance Company, notably not a party to this action. It is also claimed that Austin was required to pay some medical bills directly to the hospital. The Amended Complaint also states that Woodall was not covered by health insurance and all charges incurred for his medical treatment were owed directly to the hospital.

In Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977), the Supreme Court addressed the issue of whether plaintiffs asserting "pass-on" **[**23]** damages have standing to bring an action under § 4 of the Clayton Act. *Illinois Brick* arose out of a lawsuit brought by a large group of government entities located within the State of Illinois. Antitrust injury was premised on the contention that the Defendant brick manufacturers had conspired to engage in price-fixing, thus raising the price of cement bricks and eventually leading to inflation of the prices paid for finished buildings by the government entities. As the Court noted, the Plaintiffs were "indirect purchasers of concrete block, which passes through two separate levels in the chain of distribution before reaching [the Plaintiffs]. The block [was] purchased directly from petitioners by masonry contractors and used by them to build masonry structures; those structures [were] then incorporated into entire buildings by general contractors and sold to [the Plaintiffs]." *Id. at 726, 97 S. Ct. at 2064*. In finding that the government entities lacked standing to bring an antitrust action under § 4, the Court held that where potential plaintiffs include both direct purchasers and indirect purchasers only the direct purchasers have standing to bring **[**24]** an action under § 4. The Court concluded:

> The legislative purpose in creating a group of "private attorneys general" to enforce the antitrust laws under § 4 is better served by holding direct purchasers to be injured to the full extent of the overcharge paid by them than by attempting to apportion the overcharge among all that may have absorbed a part of it. *Id. at 746, 97 S. Ct. at 2075*. (Citation omitted)

Here, Appellants base their claims for damages upon the contention that the "cost shifting" practices of the hospitals resulted in the hospital charging them inflated prices for medical services. These claims essentially constitute pass-on claims proscribed by *Illinois Brick*. Neither Woodall nor Austin was in privity with Blue Cross. Their claims are wholly derivative in that Appellants assert their costs were inflated only as a result of the hospitals' alleged "cost shifting." The Appellants are at least one step removed from the antitrust violation.

Appellants argue, however, that *Illinois Brick* does not apply because they dealt directly with the hospitals which are alleged to be co-conspirators with Blue Cross. However in **[**25]** *In Re Beef Industry Litigation, 600 F.2d 1148, 1163 (5th Cir. 1979)*, the former Fifth Circuit found that the effect of the *Illinois Brick* prohibition of pass-on damage claims cannot be avoided by a plaintiff's assertion that it had direct dealings with an alleged co-conspirator who is not joined as a defendant in the action.

Closely related to the proscription of pass-on damages is the principle that ***HN8***[] antitrust standing is lacking under § 4 of the Clayton Act where the antitrust injury alleged is remote and highly speculative. The Supreme Court has on several occasions pointed to indirectness and speculativeness of asserted injury as indicia for finding no standing. *See, e.g., Associated General Contractors, 459 U.S. at 543-544, 103 S. Ct. at 911*; *Blue Shield of Virginia v. McCready, 457 U.S. 465, 476-477, 102 S. Ct. 2540, 2546-47, 73 L. Ed. 2d 149 (1982)*.

In the present case, the claimed antitrust injuries are extremely remote from the actions complained of. The allegations rely on a theory that the hospitals have somehow charged **[**26]** higher rates to the Appellants **[*1393]** and insurers other than Blue Cross based on price concessions to Blue Cross. Such allegations require an evaluation not only of the actions taken by Blue Cross but also an evaluation of the reaction of the hospitals, who were not joined as co-Defendants, to the price-fixing allegedly engaged in by the Appellee. The indirect nature of the Appellants' injury claims squarely "implicates the strong interest . . . in keeping the scope of complex antitrust trials within judicially manageable limits." *Associated General Contractors, 459 U.S. at 543, 103 S. Ct. at 911*. If the Appellants have standing in this case, and the Appellee was found to be liable on these claims, determination of antitrust damages would require the construction of complex and highly speculative economic models. The economic questions requiring determination would surely include, among others, the precise extent to which the hospitals charges directly billed to Austin and Woodall were increased to compensate for concessions made to Blue Cross and the degree to which the "cost shifting" derivatively effected the premiums charged by Austin's insurer. **[**27]** ***HN9***[] Effective employment of the antitrust remedy provided by § 4 of the Clayton Act requires that these law suits not be weighed down with "massive evidence and complicated theories." *See Illinois Brick, 431 U.S. at 741, 97 S. Ct. at 2072* (citing *Hanover Shoe v. United Shoe Machinery Co., 392 U.S. 481, 493, 88 S. Ct. 2224, 2231, 20 L. Ed. 2d 1231 (1968))*. The speculativeness of Appellants' claims militates still further in favor of the conclusion that Appellants lack antitrust standing.

IV.

In short, we find that Appellants lack antitrust standing to sue under § 4 of the Clayton Act because of the remote and tenuous connection between Appellants' injuries and Blue Cross' conduct, the failure to allege antitrust injury, the application of the *Illinois Brick* doctrine, and the abstract and speculative nature of Appellants' claimed injuries. Accordingly the district court's order of dismissal is AFFIRMED.

Energy Productivity Sys. v. Public Serv. Co.

United States District Court for the District of New Mexico

HN1[] **Sherman Act, Defenses**

In Parker, the United States Supreme Court held that the Sherman Act does not bar states from restricting competition in regulating domestic commerce. The "state action" defense recognizes that a state may adopt an anti-competitive policy as a state policy, and thereby authorize governmental or private parties to engage in activities which would otherwise violate the federal antitrust laws. Where this occurs, the Supreme Court has recognized that principles of federalism call for deference to the state's sovereign power to articulate anti-competitive policies, and therefore, conduct carrying out that state policy should not be subject to liability. Simply stated, a governmental or private actor should not be held liable for doing what the regulatory authority requires it to do.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2[] **Exemptions & Immunities, Parker State Action Doctrine**

In order to properly avail itself of state action immunity, a private actor must (1) be acting under a state imposed restraint which is a clearly articulated and affirmatively expressed state policy and (2), the policy must be actively supervised by the state itself.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN3[] **Antitrust & Trade Law, Exemptions & Immunities**

The mere fact that a utility is regulated by a state does not automatically exempt it from compliance with federal antitrust provisions. The state action doctrine only protects that anti-competitive behavior which is actively supervised, or mandated, by a regulatory commission. Thus, a defendant relying on the "state action" doctrine must show that the challenged conduct is sanctioned by clearly articulated and affirmatively expressed state policy, and not simply that the industry itself is regulated.

Energy & Utilities Law > Antitrust Issues > Antitrust Immunity

HN5[] **Energy & Utilities, State Regulation**

"Mere" regulation is insufficient to establish the entitlement to state action doctrine protection. All economic regulation does not necessarily suppress competition. On the contrary, public utility regulation typically assumes that the private firm is a natural monopoly and that public controls are necessary to protect the consumer from exploitation. There is no logical inconsistency between requiring a firm to meet regulatory criteria insofar as it is exercising its natural monopoly powers and also to comply with anti-trust standards to the extent that it engages in business activity in competitive areas of the economy.

Securities Law > ... > Self-Regulating Entities > National Securities Exchanges > General Overview

HN6[] **Exemptions & Immunities, Parker State Action Doctrine**

Implied repeal of antitrust laws is not favored and not casually to be allowed. Only where there is a plain repugnancy between antitrust and regulatory provisions will repeal be implied. While the pervasive nature of a regulatory scheme is a factor in determining whether an implied repeal of the antitrust laws is deemed to exist, certain activities by industries perceived to be heavily regulated have been held subject to the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN7[] **Exemptions & Immunities, Parker State Action Doctrine**

Four factors considered critical in determining whether a private actor is entitled to state action protection are: (1) the existence and nature of any relevant statutorily expressed policy; (2) the nature of the regulatory agency's interpretation and application of its enabling statute, including the accommodation of competition by the regulator; (3) the fairness of subjecting a regulated private defendant to the mandates of ***antitrust law***; and (4) the nature and extent of the state's interest in the specific subject matter of the challenged activity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN8[] **Exemptions & Immunities, Parker State Action Doctrine**

Where the federal and state policies underlying regulation are pro-competitive, a private actor who engages in monopolistic conduct may not rely on the regulations to establish the state action defense unless the regulation specifically mandates the questioned conduct.

Opinion by: John E. Conway

Opinion

MEMORANDUM OPINION AND ORDER

THIS MATTER is before the Court on the Public Service Company of New Mexico's Motion for Summary Judgment. Having reviewed the memoranda of the parties and the applicable law, and being otherwise fully advised in the premises, the Court finds that the motion is not well-taken and will be denied. In reaching this decision, this Court specifically finds that the defendant has not met the first prong of the test for state action immunity under ***California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc.,*** *445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*.

This case involves alleged violations of *§ 2* of the Sherman Act (*15 U.S.C. § 2*), § 3 of the Clayton Act (*15 U.S.C. § 15*), §§ 1 and 4 of the New Mexico Antitrust Act (*N.M. Stat. Ann. §§ 57-1-1*, *57-1-2*), and alleged violations of the New Mexico common law. The plaintiff, Energy Productivity Systems, Inc. ("EPS"), engages in **[*2]** the energy co-generation business. As part of its operations, it sells leases and services co-generation equipment, consults with actual and potential co-generators, and owns and operates co-generation systems for the production of electricity for sale to commercial and residential users. The term co-generation refers to the operation of a facility that produces both electricity and some other form of useful energy. The defendant Public Service Company of New Mexico ("PNM") is a public utility which owns, operates and services electric power generating facilities and transmission lines for both residential and commercial consumers. The New Mexico Public Service Commission ("the Commission") regulates PNM pursuant to the Commission's authority to supervise the business of public utilities under the New Mexico Public Utility Act, *N.M. Stat. Ann. § 62-13-1* ("The NMPUA").

In Count I of the Complaint, EPS alleges that "PNM has monopolized and restrained trade in the market or sub-market for generation and distribution of electric power in New Mexico and geographic sub-markets by controlling prices and eliminating competition." *Complaint,* para. 5. The Complaint then lists alleged misconduct **[*3]** by the defendant designed to monopolize the market for electric power. The alleged misconduct includes the erection of barriers to keep competitors, like EPS, from entering the energy market, wrongfully depriving EPS and other potential competitors of competitive business opportunities, attempting to eliminate EPS as a competitor, and discouraging PNM subsidiaries from selling gas to co-generators. **Id**. at paras. 10 (a), (g), 11 and 12.

EPS also alleges that PNM has dissuaded potential customers from dealing with EPS by refusing to provide access to PNM's backup power, making misrepresentations to EPS' potential customers about the efficiency of co-generation, providing EPS' potential customers with misleading projections of the future cost of PNM's power, unreasonably increasing the cost of co-generation systems, and engaging in other unspecified "unfair and misleading tactics." **Id**., pps. 10 (b) and (h). These allegations form the basis of EPS' cause of action for monopolization and violation of *§ 2* of the Sherman Act.

In Count II of the Complaint, EPS charges that PNM entered into, or attempted to enter into, exclusive dealing arrangements for the sale of electricity. **[*4]** **Id**. at pps. 15-16. The plaintiff alleges that PNM entered into contracts for the sale of electricity which purportedly contain provisions prohibiting the purchaser from using co-generation systems or dealing with any competitor of PNM. EPS' Clayton Act claim is premised on these alleged exclusive dealing arrangements.

Counts III-VI of the Complaint allege various pendent state law claims. I will defer discussion of those claims until the analysis of the federal claims is complete.

PNM has yet to file an answer in this case, choosing instead to proceed with the current summary judgment motion. Insofar as this motion does not contest the material allegations of the Complaint, namely that PNM exercised monopoly power in relevant markets in New Mexico and engaged in anti-competitive conduct in order to drive EPS from those markets, the Court will proceed on the assumption that PNM engaged in the type of monopolistic activity normally regulated by the federal anti-trust laws. ***U.A.W. v. Federal Forge, Inc.****, 583 F. Supp. 1350, 1352 (W.D. Mich. 1984)*; ***Wilkie v. Schwan Sales Enterprises, Inc.****, 541 F. Supp. 1193 (N.D. Mich. 1982)*; ***Richmond Educ. Assn. v. Crockford****, **[*5]** 55 F.R.D. 362, 364 (E.D. Va. 1972)*.

The defendant has moved for summary judgment on Counts I and II on the basis of state action immunity. PNM argues that its conduct, including all interactions with co-generators, is regulated by a program deriving its authority from the legislative command of the state. Because of the existence, and the extent, of the state imposed regulatory framework, PNM claims it is shielded by the doctrine of state action immunity under ***Parker v. Brown****, 317 U.S. 341, 350, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. The defendant also moves for dismissal of the state law claims on the grounds that, absent federal jurisdiction over the Sherman Act and Clayton Act issues, this Court should elect not to exercise its discretion to retain the state law causes of action. ***United Mine Workers v. Gibbs****, 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*.

Applicable Law:

As just noted, the defendant relies on the "state action doctrine" first articulated in **Parker**. ***HN1***[] There, the Supreme Court held that the Sherman Act does not bar states from restricting competition in regulating domestic commerce. The "state action" defense recognizes that a state **[*6]** may adopt an anti-competitive policy as a state policy, and thereby authorize governmental or private parties to engage in activities which would otherwise violate the federal antitrust laws. Where this occurs, the Supreme Court has recognized that principles of federalism call for deference to the state's sovereign power to articulate anti-competitive policies, and therefore, conduct carrying out that state policy should not be subject to liability. Simply stated, a governmental or private actor should not be held liable for doing what the regulatory authority requires it to do. **See generally**, P. Areeda & D. Turner, ***Antitrust Law****,* paras. 211, 212 (Supp. 1987).

Though the various opinions of the courts are frought with ambiguity, a consistent standard for determining whether a private actor may derive the benefits of the state action doctrine has emerged. In ***Midcal****, 445 U.S. 97, 63 L. Ed. 2d 233, 100 S. Ct. 937*, the Court held that ***HN2***[] in order to properly avail itself of state action immunity, a private actor must:

1. be acting under a state imposed restraint which is a clearly articulated and affirmatively expressed state policy; and

2. the policy must be **[*7]** actively supervised by the state itself.

445 U.S. at 105.

The ruling in **Midcal** was later clarified in ***Southern Motor Carriers Rate Conference, Inc., et al. v. United States****, 471 U.S. 48, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)* (**"SMCRC"**), where the Court added that the actions of a private party could be attributed to a clearly articulated state policy within the meaning of **Midcal** even if the complained of conduct was not compelled by the state. "As long as the state as a sovereign clearly intends to displace competition in a particular field with a regulatory structure, the first prong of the **Midcal** test is satisfied." ***Id.,*** *471 U.S. at 64*. **See also,** ***Town of Hallie v. City of Eau Claire,*** *471 U.S. 34, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)*.

In ***Lafayette v. Louisiana Power & Light Co.,*** *435 U.S. 389, 413, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*, the Court ruled that the clearly articulated state policy in question must be one that is intended to displace competition with regulation or monopoly public service. *435 U.S. at 413*.

Further insight into the **Midcal** analysis is provided in ***Lease Lights, Inc. v. Public Service [*8] Co. of Oklahoma,*** *849 F.2d 1330 (10th Cir. 1988)* and ***Consolidated Gas Co. of Florida v. City Gas Co.,*** *880 F.2d 297 (11th Cir. 1989)*, where both the Tenth and Eleventh Circuits acknowledged that ***HN3***[] the mere fact that a utility is regulated by the state does not automatically exempt it from compliance with federal antitrust provisions. Both cases stand for the proposition that the state action doctrine only protects that anti-competitive behavior which is actively supervised, or mandated, by a regulatory commission. Thus, a defendant relying on the "state action" doctrine must show that the *challenged conduct* is sanctioned by clearly articulated and affirmatively expressed state policy, and not simply that the industry itself is regulated.

Another example of the distinction between industry-wide regulation and specific conduct regulation is found in ***City of Mishawaka v. Indiana & Michigan Electric Co.***, *560 F.2d 1314 (7th Cir. 1977)*. There, the Court held that although the state utility commissions had approved retail rates charged by a power company, thereby evidencing extensive regulation of the industry, the utility was not protected from Sherman Act scrutiny by the **[*9]** state action doctrine with regard to all aspects of its conduct. That Court went on to find that the maintenance of a dual rate structure was subject to scrutiny under the antitrust laws.

Even if a state has informally allowed an anti-competitive practice to flourish, the state action doctrine may not protect a private actor from Sherman Act liability. In ***Reynolds Metals Co. v. Commonwealth Gas Services, Inc.***, *682 F. Supp. 291 (E.D. Va. 1988)*, the Court was persuaded that tacit approval of a natural gas company's transportation practices did not rise to the level of clearly articulated and affirmatively expressed state policy, so as to exempt the transportation policies from application of the federal antitrust laws, where other circumstances indicated a state policy of increased competition in transportation.

Finally, where the state policies underlying regulation are pro-competitive, the state-imposed regulation may not serve to establish a **Parker** defense to charges of monopolistic conduct. ***Sound, Inc. v. AT&T***, *631 F.2d 1324 (8th Cir. 1980)*.

As noted above, my opinion in this matter turns on the first prong of the **Midcal** test. I will therefore not address **[*10]** the second requirement under **Midcal** here.

The **Midcal** test has also been held to determine the availability of state action immunity for claims under the Clayton Act. **See, e.g.,** ***Cine 42 Street Theater Corp. v. Nederlander Organization, Inc.***, *790 F.2d 1032, 1038-41 (2d. Cir. 1986)*. Therefore, the discussion of the Sherman Act claims below should be read as a discussion of the Clayton Act claims as well.

Analysis:

Under **Midcal**, the defendant must first establish that it was following a clearly articulated and affirmatively expressed state policy designed to displace competition with regulation or monopoly public service. The defendant has correctly asserted that the NMPUA is a clear expression of the New Mexico legislature's desire to regulate public utilities. *N. M. Stat. Ann. § 62-3-1(B)*. ***HN4***[] Under the NMPUA, the Commission has the power "to regulate and supervise every public utility in respect to its rates and service regulations." **Id.** *§§ 62-5-1* and *62-6-4*. The NMPUA also imposes certain duties on public utilities. It requires that all rates made, demanded or received by any utility be just and reasonable, and that every utility furnish adequate, **[*11]** efficient and reasonable service. **Id.**

§§ 62-8-1, *62-8-2*. It compels public utilities to file rate schedules, indicate user classifications, adhere strictly to schedule rates and provide services in a non-discriminatory manner. **Id**. *§§ 62-8-3 to 62-8-6*.

The defendant relies on the existence of the NMPUA in support of the conclusion that the New Mexico legislature intends to displace unfettered competition with regulation. Defendant's Reply Brief at p. 5, n.5. In the defendant's view, the NMPUA is a clear expression "that electric utilities should operate as natural monopolies under the control of the Commission." Defendant's Brief in Support of Motion for Summary Judgment at 11. Assuming that PNM has met the burden of establishing that the state of New Mexico clearly intends to regulate public utilities, the defendant still has the burden of establishing that the regulations affirmatively express a state policy to displace the competitive marketplace.

In an effort to establish that the NMPUA regulations are indicative of a clearly articulated state policy, the defendant cites the recent case of ***Lease Lights, Inc. v. Public Service Electric & Gas Co.,*** *849 F.2d 1330* ***[*12]*** *(10th Cir. 1988)*. There the Court reversed a $ 2.5 million antitrust verdict against Public Service Company of Oklahoma ("PSO"). The plaintiffs, four electrical contractors engaged in the outdoor lighting business, claimed that PSO had attempted to put them out of business by reducing its rates for outdoor lighting services to the public and increasing electric rates. ***Id.*** *at 1332*. The utility argued on appeal that the state action doctrine immunized it from claims that it had monopolized the outdoor lighting market since the challenged conduct was required by the Oklahoma Corporation Commission.

The Tenth Circuit reviewed the **Midcal** analysis and noted that the relevant constitutional and statutory provisions clearly articulated a state policy to regulate. *849 F.2d at 1333-34*. These provisions generally empowered the Oklahoma Public Service Commission to set rates and regulate electric power companies by prescribing rules governing services, operations, and management. **Id.** The Court then ruled that under Oklahoma law the system of regulation clearly articulated and affirmatively expressed a policy to displace a competitive market, since the active regulation and **[*13]** supervision imposed by the Oklahoma Corporation Commission in mandating the rate change provided a basis for the fact that PSO's conduct was required by the state. It is important to note that Oklahoma had not legislated the challenged conduct. Instead, the Court found that the state had indicated its regulatory anti-competitive policy through the acts of the Commission.

This Court finds **Lease Lights** instructive in terms of the great deference granted state agencies when those bodies exercise their authority in furtherance of state policy in a direct and tangible fashion. This Court does not dispute that where anti-competitive conduct is attributable to a state policy, and the state regulatory Commission requires the allegedly monopolistic behavior, the private actor being regulated is entitled to **Parker** protection.

However, the **Lease Lights** decision does not address the issue of whether conduct which is not attributable to a state policy, and which is not directly mandated by the regulatory body, is protected under **Parker**.

This Court is of the opinion that the defendant overstates the holding in **Lease Lights** when it says that "a statute authorizing **[*14]** a state agency to supervise the operation of an area of commerce expresses a legislative intent to substitute state regulation for competition." Defendant's Brief in Support of Motion for Summary Judgment at 13. In fact, the latter statement is in direct conflict with dicta in **Lease Lights**, and that body of case law which holds ***HN5***[] that "mere" regulation is insufficient to establish the entitlement to state action doctrine protection. **See, e.g.** ***Lease Lights****, 849 F.2d at 1333*, c.1, lines 11-12; **SMCRC, supra**, 471 U.S. at 58; ***Consolidated Gas, supra,*** *880 F.2d 297*; ***City of Mishiwaka, supra****, 560 F.2d 1314*; and ***Cantor v. Detroit Edison,*** *428 U.S. 579, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. This rule is best expressed in **Cantor**, where the Supreme Court noted that:

> … all economic regulation does not necessarily suppress competition. On the contrary, public utility regulation typically assumes that the private firm is a natural monopoly and that public controls are necessary to protect the consumer from exploitation. There is no logical inconsistency between requiring a firm to meet regulatory criteria insofar as it is exercising its natural **[*15]** monopoly powers and also to comply with anti-trust standards to the extent that it engages in business activity in competitive areas of the economy.

Cantor, supra*, 428 U.S. at 595*.

While PNM argues that all public utility conduct is supervised pursuant to the NMPUA, it cannot point to a specific NMPUA provision addressing co-generators. Pages 14-15 of the defendant's Brief simply restate the general regulatory provisions. As such, PNM has failed to show how the NMPUA in and of itself sanctions the anti-competitive behavior at issue in this case. The mere existence of the NMPUA does not establish a state policy to displace competition with regulation insofar as the public utilities are concerned.

The defendant then suggests that this Court make the finding which the Tenth Circuit deemed crucial in **Lease Lights:** that the state has indicated its regulatory anti-competitive policy through the acts of the Commission. The argument is that the Commission controls public utility dealings with co-generators pursuant to G.O. 37 and that the extent of the regulation is evidence of an intent to replace the free market economy for electrical power with regulation.

General **[*16]** Order 37 ("G.O. 37") governing co-generation and small power production was issued by the Commission on March 27, 1981 in order to assure compliance with the Federal Energy Regulatory Commission ("FERC") requirements for state action implementing Section 210 of the Public Utility Regulatory Policy Act of 1978 ("PURPA"). The Commission has promulgated three successive revisions of the original G.O. 37. The versions of G.O. 37 in effect for the largest portion of time, relevant to the allegations of the Complaint, were First Revised G.O. 37 and Second Revised G.O. 37, which were adopted November 26, 1986 and in effect through March 10, 1988.

General Order 37 defines the policies of the Commission with regard to the relationships between New Mexico utilities and qualifying facilities. A "qualifying facility" is a co-generation facility which satisfies the operating and efficiency standards described in the federal regulations. C.F.R. 292.201, **et seq.**, (1988). General Order 37 governs the purchase and sale of power between qualifying facilities and utilities by: 1) encouraging the development of the market for the power produced; 2) establishing guidelines for the calculation of **[*17]** avoided costs; and 3) providing meaningful access to critical cost information from utilities.

The set of regulations which governs the relationship, the Commission and potential co-generators, is extensive. General Order 37 compels a utility to interconnect with co-generators in its service area meeting the criteria set out in § 2.1. The Commission entertains complaints of rejected applicants for interconnection to determine whether the application was justifiably rejected. § 2.2. A utility must also enter into a contract for interconnection in compliance with the requirements of *§ 2*, and a detailed set of standard contracting terms and conditions must be met. The Commission then referees disputes over such contracts through a complaint process. Significantly, G.O. 37 mandates that public utilities shall buy and sell energy and capacity. Section 3 states that utilities "shall purchase capacity and/or energy from a qualifying facility at rates which reflect the utility's avoided costs determined in accordance with G.O. 37."

This is not by any means a conclusive or exclusive list of the regulatory requirements. However, the scope of these regulations adequately establishes that **[*18]** the Commission has developed a significant amount of regulation as regards co-generators.

If the law simply required that a private actor show that his conduct was extensively regulated in order to establish the state action defense, then PNM would have carried that burden with its recitation of the applicable regulations under G.O. 37. However, as discussed above, the **Lease Lights** decision, and others, requires that PNM show that its particular anti-competitive conduct, with regard to co-generators, was sanctioned by the state even if not compelled by the state. **See, Discussion, supra,** at pps. 5-6.

Because PNM has not challenged the material allegations of the Complaint, this Court must assume that PNM's conduct is anti-competitive and of the type normally regulated by the federal antitrust laws. **See, Discussion, supra,** p. 3. Although PNM has clearly established that it was regulated in this area, it has not been able to point to language within G.O. 37 or a Commission requirement which mandates the alleged anti-competitive conduct.

In fact, PNM acknowledges that the Commission issued G.O. 37 in compliance with the FERC requirements for implementing Section 210 **[*19]** of PURPA. That section requires that the state regulatory agency issue regulations implementing the provisions and policies of PURPA to *promote* co-generation. Pursuant to the *Supremacy Clause*, any attempt by the Commission not to implement the PURPA policies and provisions would have been unconstitutional. ***FERC v. Mississippi**, 456 U.S. 742, 72 L. Ed. 2d 532, 102 S. Ct. 2126 (1982)*.

The plaintiff convincingly argues that Congress never intended the policies underlying PURPA to be anti-competitive, or in any way to replace the antitrust laws. "Nothing in this Act, or in any Amendment made by this Act, affects (1) the applicability of the antitrust laws to any electric utility…." *16 U.S.C. § 2603*.

The pro-competitive policies of PURPA are likewise embodied in the NMPUA and in G.O. 37. When the Commission first promulgated G.O. 37, it explained in detail the policies that animated the regulation. A review of the Commission's statement found in "Discussion of Commission Policies," attached as an exhibit to G.O. 37, indicates that the Commission intended to establish a pro-competitive policy.

An excellent discussion of the impact of pro-competitive regulatory policy on monopolistic **[*20]** conduct is contained in ***Sound, Inc., supra,** 631 F.2d 1324*. There, the Eighth Circuit Court of Appeals affirmed the district court's denial of defendant Bell Telephone's Motion for Judgment on the Pleadings, holding that the defendant's monopolistic conduct was subject to antitrust scrutiny. In that case, the Court was squarely presented with the problem of reconciling the pro-competitive policies of the federal antitrust laws with federal and state regulations protecting the public interest in the context of terminal telephone equipment.

The plaintiff in that matter, Sound Inc., brought an antitrust action against AT&T, the Bell system, and its subsidiaries, alleging violations of Sections 1, 2 and 3 of the Sherman Act and of Iowa tort law. The Bell system moved for judgment on the pleadings, contending that its conduct was immune from antitrust liability under the state action doctrine by virtue of regulations issued by the Federal Communications Commission and the Iowa State Commerce Commission. The basic allegations in that matter were that Bell engaged in a concerted effort to destroy the plaintiff's business by excluding the plaintiff from the terminal telephone equipment **[*21]** marketed through the use of predatory pricing, economic retribution to the plaintiff's customers, and threats to withhold telephone service from those purchasing or leasing the plaintiff's equipment.

In answer to the complaint, the Bell system claimed that its rate related conduct was regulated, and therefore exempt, from antitrust scrutiny. Bell also alleged that all activity undertaken by it, regarding the interconnection of privately owned terminal telephone equipment, was impliedly immune from the antitrust laws because those laws were inconsistent with the regulations.

In reaching its decision, the Court focused generally on the tension between the antitrust laws and regulatory schemes designed to protect the public interest. The analysis began with the premise that ***HN6***[] implied repeal of antitrust laws "is not favored and not casually to be allowed. Only where there is a plain repugnancy between the antitrust and regulatory provisions will repeal be implied." *631 F.2d at 1327*, quoting ***Gordon v. New York Stock Exchange,** 422 U.S. 659 at 682, 45 L. Ed. 2d 463, 95 S. Ct. 2598 (1975)*. While the pervasive nature of a regulatory scheme is a factor in determining whether an implied **[*22]** repeal of the antitrust laws is deemed to exist, the Court noted that certain activities by industries perceived to be heavily regulated have previously been held subject to the antitrust laws. ***Silver v. New York Stock Exchange, supra*, **(securities); ***Otter Tail Power Co. v. United States,** 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)* (generation and transmission of electric power); ***United States v. Philadelphia National Bank,** 374 U.S. 321, 10 L. Ed. 2d 915, 83 S. Ct. 1715* (National Banking); and ***United States v. RCA**, 358 U.S. 334, 79 S. Ct. 457, 3 L. Ed. 2d 354 (1959)* (broadcasting).

The **Sound, Inc.** Court recognized that application of the principle of mutual repugnance often resulted in a finding of implied immunity when enforcement of the antitrust laws interfered with the operation of the regulatory agency. (Interference is normally found when the antitrust laws prohibit action specifically contemplated by the regulatory statute, or when the antitrust laws prohibit conduct falling precisely within the detailed statutory scheme of enforcement, and that statutory scheme specifically requires consideration of competition. *631 F.2d at 1328*). The approach taken by the Eighth Circuit, **[*23]** therefore, was to consider both the statute under which the industry was regulated and the exercise of regulatory authority over the challenged activity pursuant to the statute. *631 F.2d at 1329*.

Analyzing the statute at issue, the **Sound, Inc.** Court found that nothing in the Communications Act established Congress' intent to displace the antitrust laws by creating a system of regulation of the telecommunications industry. Having found that no goals set forth in the statute were clearly repugnant to the antitrust laws, the Court then turned to the regulatory agency's exercise of its authority over the industry, to determine whether allowance of an antitrust suit would conflict with the operation of the regulatory scheme. The Court then found that the regulatory agency, in that case the FCC, had not exercised its supervisory authority in an effort to prevent the development of competition in the terminal equipment market; rather, the regulatory agency's rulings indicated that Bell's attempt to retain its monopoly on that market were disfavored. *631 F.2d at 1330*. In light of that simple factor, the Court found that the maintenance of an antitrust suit did not conflict with the **[*24]** operation of the regulatory scheme, but instead supplemented that scheme.

Having thereby developed the principle that when regulatory agency supervision does not conflict with federal antitrust laws, no implied exemption from the ***antitrust law*** exists, the Court turned to a discussion of the state action exemption issue. Bell contended that its rate structure and marketing practices in regard to the terminal equipment market were exempt from the antitrust laws as state action, since Iowa regulated the rates Bell charged for the installation and monthly use of its equipment. Bell specifically relied on **Parker** and **Midcal** in making this argument.

The Court found that although Bell was required to file tariffs setting forth its proposed rates, and although the Commission heard complaints or grievances regarding those rates, the existence of the regulations was not repugnant to an application of the federal antitrust laws. Moreover, the mere existence of those regulations, which were admittedly extensive, did not establish an Iowa state policy requiring anti-competitive conduct on the part of a public utility.

In reaching its decision, the Eight Circuit relied on ***HN7***[] four factors **[*25]** that it considered critical in determining whether a private actor is entitled to state action protection. They are:

1. The existence and nature of any relevant statutorily expressed policy;

2. The nature of the regulatory agency's interpretation and application of its enabling statute, including the accommodation of competition by the regulator;

3. The fairness of subjecting a regulated private defendant to the mandates of ***antitrust law***; and

4. The nature and extent of the state's interest in the specific subject matter of the challenged activity.

The lesson that emerges from **Sound, Inc.** and **Lease Lights** can be stated as a general principle, or starting point, for analyzing a state action defense under facts similar to those presented here. ***HN8***[] Where the federal and state policies underlying regulation are pro-competitive, a private actor who engages in monopolistic conduct may not rely on the regulations to establish the state action defense, *unless* the regulation specifically mandates the questioned conduct.

Because I find that the four factors test set forth in **Sound, Inc.** is helpful in analyzing the availability of the state action defense, I will use that **[*26]** pattern as a model for analyzing this case.

Regarding the first factor, there is nothing in PURPA or the NMPUA which indicates that either the United States Congress or the New Mexico legislature intended to displace the antitrust laws by establishing a system of regulation of the public utilities industry. There is no goal set forth in either statute which is clearly repugnant to the ***antitrust law***, and I can envision no way in which the allowance of an antitrust suit in this matter would conflict with the operation of the regulatory scheme. In fact, as discussed above, it is clearly New Mexico's intent to foster co-generation as an alternative energy source.

As to the second factor, whether the nature of the regulatory agency's interpretation and application of this enabling statute weighs for or against the defendant, I find nothing in the PSC's interpretation and application of its regulation which indicates a requirement of anti-competitive conduct, or the displacement of competition. Rather, the

Commission, in issuing G.O. 37, has indicated an attempt to accommodate PURPA and the advancement of competition, its underlying goal, in the market for electrical power. The better **[*27]** reasoned approach to the regulations is to read them as an effort to foster competition through certain restrictions rather than displace the free market by authorizing monopolistic conduct.

Turning to the third factor suggested in **Sound, Inc.**, there is nothing in this record to indicate that it would be unfair to subject PNM to the ***antitrust law***. PNM was not deprived of its ability to exercise independent business judgment in determining its course of conduct with co-generators, and there is nothing in the state's involvement which creates an atmosphere in which it would be unfair to hold PNM responsible for its anti-competitive behavior.

Finally, nothing in the record of this case indicates that the state of New Mexico's interest in the public utility market is realized by mandating displacement of the antitrust laws. If New Mexico had a state policy intended to clearly and completely avoid competition in the public utilities marketplace, then that state policy would be at odds with the antitrust laws and PNM might claim a state action exemption. However, no such policy exists and, as discussed above, the policy is in fact quite the opposite.

For the foregoing reasons, I **[*28]** see no basis for a finding that the state of New Mexico has a clearly articulated and affirmatively expressed policy to supplant competition with regulation or monopoly with regard to the use of cogeneration systems and public utilities. I therefore find that the defendants have failed to meet the first prong of the **Midcal** test, and in accord with that finding, determine that summary judgment is inappropriate as to Counts I and II, since the defendants are not entitled to judgment as a matter of law under *Rule 56 of the Federal Rules of Civil Procedure*.

Having thus disposed of the federal claims, I find no merit to the defendants' argument that the state claims should be dismissed for want of pendent jurisdiction. Therefore, pursuant to this Court's discretion, ***United Mine Workers v. Gibbs,*** *383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*, I will choose to exercise pendent jurisdiction and retain the pending state court claims. In accordance with the foregoing,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED that the defendants' Motion for Summary Judgment be, and the same hereby is, **denied.**

DATED this 22d day of June, 1990.

HN2[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A trial judge should not permit an inference of antitrust conspiracy from circumstantial evidence where to do so would have the effect of deterring significant pro-competitive conduct. However an antitrust defendant is not entitled to summary judgment simply by virtue of the fact that the plaintiff's inference of conspiracy would have some deterrent effects; the effects must be significant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN3[] **Monopolies & Monopolization, Conspiracy to Monopolize**

The trial court faced with allegations of illegal conspiracies must consider whether, on the evidence presented, the protection of innocent independent conduct outweighs the costs associated with the potential decrease in strict antitrust enforcement. If it does, then the plaintiff must come forward with additional, "sufficiently unambiguous" evidence that does not have these undesirable deterrent effects.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN4[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Courts should be careful not to permit inferences of antitrust conspiracy when to do so would create a significant irrational dislocation in the market or would result in significant anticompetitive effects.

HN5[] Summary Judgment, Evidentiary Considerations

Where an antitrust plaintiff relies entirely upon circumstantial evidence of conspiracy, a defendant will be entitled to summary judgment if it can be shown that (1) the defendant's conduct is consistent with other plausible explanations, and (2) permitting an inference of conspiracy would pose a significant deterrent to beneficial pro-competitive behavior. Once the defendant has made such a showing, the plaintiff must come forward with other evidence that is sufficiently unambiguous and tends to exclude the possibility that the defendant acted lawfully.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN6[] Monopolies & Monopolization, Conspiracy to Monopolize

In applying the Matsushita standard, a court must consider the nature of the evidence that the plaintiffs have offered with respect to each element of the cause of action. If the plaintiffs rely exclusively on circumstantial evidence in order to establish at least one element of their cause of action, then the court must proceed to analyze, under Matsushita, whether the inferences which the plaintiffs seek to draw from the indirect evidence are reasonable and permissible under the governing substantive law. If, however, the plaintiffs offer direct evidence to support each element, then summary judgment must be denied.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN7[] Sherman Act, Claims

Interdependent pricing to test the waters without any sort of advance commitment from competitors may often produce economic consequences that are comparable to those of classic cartels. Nonetheless, proof of such pricing, standing alone, is generally considered insufficient to establish a violation of the Sherman Act, *15 U.S.C.S. §§ 1-2*. Additional proof beyond mere parallel pricing usually is required.

Opinion

[*436] NELSON, Circuit Judge.

The States of Arizona, California, Oregon, and Washington appeal from the district court's grant of summary judgment to the defendants in these consolidated antitrust actions. For the reasons stated below, we reverse the judgment of the district court and remand for further proceedings.

I. INTRODUCTION

Between June 1975 and August 1977, the plaintiffs filed their complaints in these actions, alleging several violations of the Sherman Act, *15 U.S.C. § 1 et seq.* As developed during the subsequent pretrial proceedings, the plaintiffs' allegations fall into three categories. First, the plaintiffs allege **[**4]** that the defendant oil companies conspired to raise or stabilize prices for refined oil products in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. The plaintiffs assert that, in furtherance of this conspiracy, the defendants continually engaged in the mutual exchange of pricing and price-related information. Second, the plaintiffs allege that the defendants conspired to create, by various means, an artificial scarcity of crude oil and refined oil products in the western United States, in violation of *§§ 1* & *2* of the Sherman Act, *15 U.S.C. §§ 1* & *2*. Third, the plaintiffs allege that the defendants conspired not to compete in bidding on the plaintiffs' annual bulk sale petroleum supply contracts, in violation of *§ 1* of the Sherman Act.

After several years of extensive discovery, the plaintiffs filed in January 1983 a three volume pretrial brief ("Plaintiffs' Initial Pretrial Brief" or "PIPB"), setting out their analysis of what the evidence would prove. The PIPB was supplemented on several occasions. In July 1983, the defendants moved for summary judgment, asserting that the evidence as summarized in the PIPB failed to raise a triable **[**5]** issue of antitrust conspiracy. After three days of oral argument on the summary judgment motions, the district court took the matter under submission. On November 25, 1986, the court filed an opinion and order granting the defendants' summary judgment motion in its entirety. *In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 656 F. Supp. 1296 (C.D.Cal. 1986)* [hereinafter *Petroleum Prods.*]. The plaintiffs have timely appealed.

Before turning to an analysis of the proper summary judgment standards and their application in this case, we think it appropriate and useful first to outline certain background facts concerning the industry's structure as well as the nature of appellants' theory concerning the operation of the alleged conspiracy.

The appellees are major oil companies which, among other activities, produce crude oil, refine it into gasoline, and sell the gasoline to various distributors. During the time periods relevant to this appeal, these distributors fell into roughly four classes: (1) independent service station owners who operated franchises selling one particular brand of gasoline; (2) company-owned service stations **[**6]** run by company employees; (3) independent "jobbers" or brokers who resold gasoline to various service stations and other purchasers; and (4) governmental entities and others who purchased under bulk sales contracts. All parties agree that the lion's share of appellees' gasoline that was sold at retail was sold by independent franchised service stations.

As franchisees, these "independent" dealers were not free to purchase their supply of gasoline from any oil company at any time; as long as they remained franchisees they could only purchase from their particular franchisor. Each company sold gasoline to its franchised dealers at a price known as the "dealer tankwagon price." In actuality, the official tankwagon prices were only occasionally changed; fluctuations in the cost of gasoline to franchised dealers were more frequently reflected in **[*437]** changes to the applicable discounts from the tankwagon price. These discounts were variously known as "temporary dealer assistance," "dealer aid," or simply "discounts."

The appellants argue that, as a consequence of this market structure, each oil company was effectively able to control the retail price at which its gasoline was **[**7]** sold. That is, the appellants claim that, although individual dealers "showed varying degrees of independence," an oil company could essentially determine the retail price by setting the applicable discount from the tankwagon price at which it sold gasoline to its franchised dealers.

In the present actions, the appellants claim that the appellees have engaged in a conspiracy to raise and stabilize the retail price of gasoline at the pump. They do not claim, however, that the appellees engaged in a resale price maintenance scheme whereby each dealer was required to charge a predetermined price; indeed, they have expressly disavowed such a theory. Rather, the appellants claim that the appellees conspired to fix retail prices by coordinating dealer discounts from the tankwagon price.

The parties hotly contest on appeal whether the application of this theory is limited by the Supreme Court's decision in *Illinois Brick v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, which held that indirect purchasers of goods whose price was fixed earlier in the stream of commerce may not maintain an antitrust damages action for overcharges passed on to them by **[**8]** those who purchase directly from the pricefixers. Although the district court had earlier ruled that *Illinois Brick* limited the relief available to the plaintiffs, *see In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 497 F. Supp. 218, 225-27 (C.D.Cal. 1980)*, *aff'd on other grounds*, *691 F.2d 1335 (9th Cir. 1982)*, *cert. denied*, *464 U.S. 1068, 104 S. Ct. 972, 79 L. Ed. 2d 211 (1984)*, it nonetheless recognized that *Illinois Brick* did not completely bar recovery. Accordingly, in ruling on the summary judgment motion, the district court recognized that, despite the ruling that *Illinois Brick* limited the relief that was available, the plaintiffs would still be able to receive some relief if they could establish that the defendants conspired to fix retail prices by fixing wholesale prices. *See Petroleum Prods., 656 F. Supp. at 1299* (noting that plaintiffs' theory was that the defendants conspiratorily eliminated dealer discounts, thus "restoring" the official tankwagon prices, in order to fix retail prices). For purposes of this appeal, we operate with this same premise. Accordingly, **[**9]** we have no occasion to consider whether the district court was correct in its earlier ruling concerning the applicability of *Illinois Brick*.

II. SUMMARY JUDGMENT STANDARDS

HN1[] We review de novo the district court's grant of summary judgment to the defendants. *Richards v. Neilsen Freight Lines, 810 F.2d 898, 902 (9th Cir. 1987)*.

Determining whether the grant of summary judgment was proper in this case involves a careful application of the standards set down by the Supreme Court in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Because the parties sharply disagree over the proper interpretation of *Matsushita*, and because the issue is crucial to a proper resolution of this case, we think it appropriate to review in some detail the nature of the standards established in *Matsushita*.

A. *The Matsushita Decision*

In *Matsushita*, plaintiffs Zenith and National Union Electric Corp. ("Zenith") sued several Japanese companies that manufacture consumer electronic products. Zenith alleged **[**10]** that the Japanese companies had engaged in a predatory pricing conspiracy aimed at driving American firms from the U.S. consumer electronic products market. After several years of discovery, the defendants moved for summary judgment. The **[*438]** district court granted the defendants' motion, concluding that any inference of conspiracy was unreasonable. *Zenith Radio Corp. v. Matsushita Elec. Indus. Co., 513 F. Supp. 1100 (E.D.Pa. 1981)*. The Third Circuit reversed as to 21 of the 24 defendants, concluding that the plaintiffs had presented sufficient evidence to permit a reasonable factfinder to infer that the defendants had engaged in a predatory pricing conspiracy. *In re Japanese Elec. Prods. Antitrust Litig., 723 F.2d 238, 304-11 (3d Cir. 1983)*.

The Supreme Court reversed this decision because it concluded that the evidence proffered by the plaintiffs did not provide any basis for concluding that the alleged predatory pricing was rational; in the Court's words, the defendants simply "had no rational economic motive to conspire." *Matsushita, 475 U.S. at 596*. This fact, combined with the evidence that the defendants' conduct **[**11]** was "consistent with other, equally plausible [innocent] explanations" implied that the defendants' conduct could "not give rise to an inference of conspiracy." *Id. at 596-97*. Moreover, the Court stated that, even if the defendants had had a rational economic motive to conspire, summary judgment would still have been appropriate in light of the fact that "conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." *Id. at 597 n. 21* (citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 763-64, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984))*. In such circumstances, the plaintiff must come forward with "sufficiently unambiguous" evidence "'that tends to exclude the possibility'" that the defendants were acting lawfully. *Id. 475 U.S. at 588, 597* (quoting *Monsanto, 465 U.S. at 764*).

We do not take these latter comments as suggesting that a district court may grant summary judgment to antitrust defendants whenever the court concludes that inferences of conspiracy and inferences of innocent conduct are **[**12]** equally plausible. Allowing the district court to make that decision would lead to a dramatic judicial encroachment on the province of the jury. To read *Matsushita* as requiring judges to ask whether the circumstantial evidence is more "consistent" with the defendants' theory than with the plaintiff's theory would imply that the jury should be permitted to choose an inference of conspiracy *only* if the judge has first decided that he would himself draw that inference. This approach would essentially convert the judge into a thirteenth juror, who must be persuaded before an antitrust violation may be found.

Indeed, under this interpretation of *Matsushita*, a trial judge would not even need to evaluate whether the inference of conspiracy meets a threshold standard of reasonableness, which is the usual standard for judging inferences on summary judgment. *See* *Batchelor v. Oak Hill Medical Group, 870 F.2d 1446, 1447 (9th Cir. 1989)*. Since any inference that the trial judge thinks is more plausible than its alternatives must necessarily be a reasonable one, the trial judge would only need to ask whether he thinks the inference of conspiracy is the more plausible **[**13]** one. This cannot be what the Supreme Court meant when it stated that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita, 475 U.S. at 588*. The Court purported to *limit* the application of the traditional summary judgment rules in the antitrust context; it did not intend to abolish them and replace them with an entirely different set, one which raises troubling *seventh amendment* concerns. *Cf.* *Standard Oil v. Arizona, 738 F.2d 1021 (9th Cir. 1984)* (holding, in a prior appeal in this case, that the *seventh amendment* guarantees a right to jury trial in antitrust cases), *cert. denied*, *469 U.S. 1132, 105 S. Ct. 815, 83 L. Ed. 2d 807 (1985)*. Indeed, the Court noted that, within the limits imposed by ***antitrust law***, it remained true that "'on summary judgment the inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion.'" *Matsushita, 475 U.S. at 587-88* (quoting *United States v. Diebold, Inc., 369 U.S. 654, 655, **[*439]** 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962))*.

Nor **[**14]** do we think that *Matsushita* and *Monsanto* can be read as authorizing a court to award summary judgment to antitrust defendants whenever the evidence is plausibly consistent with both inferences of conspiracy and inferences of innocent conduct. Such an approach would imply that circumstantial evidence alone would rarely be sufficient to withstand summary judgment in an antitrust conspiracy case. After all, circumstantial evidence is nearly always evidence that is plausibly consistent with competing inferences. *See* *United States v. Henderson, 693 F.2d 1028, 1031 (11th Cir. 1982)* ("Circumstantial evidence is not testimony to the specific fact being asserted, but testimony to other facts and circumstances from which the jury may infer that the fact being asserted does or does not exist."). Thus, such an interpretation of *Matsushita* would seem to be tantamount to requiring direct evidence of conspiracy. This cannot be what the Court meant in *Matsushita*. Since direct evidence will rarely be available, such a reading would seriously undercut the effectiveness of the antitrust laws. Furthermore, *Monsanto* itself clearly indicates that circumstantial evidence **[**15]** may be sufficiently unambiguous to survive summary judgment. *Monsanto, 465 U.S. at 764* (plaintiff must "present direct or *circumstantial* evidence" that reasonably tends to prove that the defendants were engaged in a conspiracy rather than acting independently) (emphasis added); *see also* *Harkins Amusement Enterprises, Inc. v. General Cinema Corp., 850 F.2d 477, 485 (9th Cir. 1988)* (circumstantial evidence found to be sufficiently unambiguous under *Monsanto*), *cert. denied*, *488 U.S. 1019, 109 S. Ct. 817, 102 L. Ed. 2d 806 (1989)*.

We think that the key to the proper interpretation of *Matsushita* lies in the Court's emphasis on the dangers of permitting inferences from certain types of ambiguous evidence. In *Matsushita*, the Court was unwilling to permit an inference of predatory pricing in part because the Court was concerned about the inference's possible anticompetitive side-effects. The Court noted that the plaintiffs attempted to prove an antitrust conspiracy "through evidence of rebates and other price-cutting activities." *475 U.S. at 594*. However, as the Court went on to observe,

> "Cutting **[**16]** prices in order to increase business often is the very essence of competition. Thus, mistaken inferences in cases such as this one are especially costly, because they chill the very conduct the anti trust laws are designed to protect. See *Monsanto*, [465 U.S.] at 763-764. 'We must be concerned lest a rule or precedent that authorizes a search for a particular type of undesirable pricing behavior end up by discouraging legitimate price competition.'"

Id. (quoting *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 234 (1st Cir. 1983))*.

Thus, *Matsushita* establishes that ***HN2***[] a trial judge should not permit an inference of antitrust conspiracy from circumstantial evidence where to do so would have the effect of deterring significant procompetitive conduct. We emphasize, however, that an antitrust defendant is not entitled to summary judgment simply by virtue of the fact that the plaintiff's inference of conspiracy would have *some* deterrent effects; the effects must be significant. As the Court stated in *Matsushita*, the concern with avoiding deterrent **[**17]** effects "must be balanced against the desire that illegal conspiracies be identified and punished." *475 U.S. at 594*. In short, ***HN3***[] the trial court must consider whether, on the evidence presented, the protection of innocent independent conduct outweighs the costs associated with the potential decrease in strict antitrust enforcement. If it does, then the plaintiff must come forward with additional, "sufficiently unambiguous" evidence that does not have these undesirable deterrent effects. *Id. at 597-98* & n.21.

This reading of *Matsushita* is further supported by examining the Court's decision in *Monsanto Co. v. Spray-Rite Serv.* ***[*440]*** *Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*, upon which the *Matsushita* Court relied heavily. In *Monsanto*, plaintiff Spray-Rite alleged that Monsanto had illegally conspired with its other distributors in deciding to terminate Spray-Rite's distributorship. Among the items of evidence introduced in support of this claim was the fact that Monsanto terminated Spray-Rite after receiving **[**18]** complaints from its other distributors about Spray-Rite's price cutting practices. Monsanto, on the other hand, contended that it had acted independently in deciding to terminate Spray-Rite. In analyzing the proper standard of proof for such a claim, the Supreme Court began by noting that, while it is *per se* illegal for a manufacturer to get together with its distributors and agree on prices, *see Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 404-09, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*, it is nonetheless permissible for a manufacturer to announce its retail prices in advance and then to terminate those distributors who fail to comply, *see United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*. *See Monsanto, 465 U.S. at 761*. In light of these cases, the Court concluded that it could not permit an inference of conspiracy to be drawn from the mere fact that a distributor had been terminated after the manufacturer had received complaints from other distributors about price cutting. The Court reasoned that permitting such an inference would effectively preclude a manufacturer from **[**19]** exercising its independent termination rights under *Colgate* once it received any complaints from its distributors. In the Court's words:

> Permitting an agreement to be inferred merely from the existence of complaints, or even from the fact that termination came about "in response to" complaints, could deter or penalize perfectly legitimate conduct. . . . To bar a manufacturer from acting solely because the information upon which it acts originated as a price complaint would create an irrational dislocation in the market. In sum, "to permit the inference of concerted action on the basis of receiving complaints alone and thus to expose the defendant to treble damage liability would . . . inhibit management's exercise of its independent business judgment. . . ."

Monsanto, 465 U.S. at 763-64 (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 n. 2 (3d Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981))* (other citations omitted).

Monsanto thus clearly illustrates that **[**20]** ***HN4***[] courts should be careful not to permit inferences of antitrust conspiracy when to do so would create a significant irrational dislocation in the market or would result in significant anticompetitive effects. [1]

---

[1] We should note that the holding of *Monsanto* primarily applies to discussions between the manufacturer and its distributors. Under *United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*, it is clear that a manufacturer can have discretion over whom it wishes to deal with so that it can maintain order in its distribution ranks. As this court stated in *T.W. Electrical Services, Inc. v. Pacific Electrical Contractors Assoc., 809 F.2d 626, 632 n. 4 (9th Cir. 1987)*, "a manufacturer's independent refusal to deal with distributors did not violate antitrust laws." But the same rationale does not necessarily apply to relationships among competitor companies, and we note that horizontal relationships among co-competitors, such as those which exist in this case, are distinguishable from vertical relationships between a manufacturer and its distributors.

[21]** In summary, we conclude that ***HN5***[] where an antitrust plaintiff relies entirely upon circumstantial evidence of conspiracy, a defendant will be entitled to summary judgment if it can be shown that (1) the defendant's conduct is consistent with other plausible explanations, and (2) permitting an inference of conspiracy would pose a significant deterrent to beneficial procompetitive behavior. Once the defendant has made such a showing, the plaintiff must come forward with other evidence that is sufficiently unambiguous and tends to exclude the possibility that the defendant acted lawfully.

B. *Direct v. Circumstantial Evidence*

Before turning to the specific issues of this case, we must add one further comment **[*441]** with regard to the applicability of *Matsushita*. As the above analysis demonstrates, the concerns highlighted in *Matsushita* and *Monsanto* arise only in the context of whether to permit inferences from circumstantial evidence. Accordingly, the *Matsushita* standards do not apply when the plaintiff has offered direct evidence of conspiracy.

This important limitation **[**22]** on the applicability of *Matsushita* was emphasized in our decision in *McLaughlin v. Liu, 849 F.2d 1205 (9th Cir. 1988)*. In *Liu*, the Secretary of Labor argued that summary judgment was properly granted, under *Matsushita*, on the grounds that the defendant's sworn affidavit -- which, if believed, would have provided a complete defense as to part of the Secretary's claim -- was "implausible." *Id. at 1207*. We emphatically rejected this argument, noting that in *Matsushita*, "the Court was not speaking of direct evidence, but of circumstantial evidence." *Id.* We noted the important difference between circumstantial evidence, in which a party asks that certain "inferences be drawn in his favor" and direct evidence, where, in order to defeat a request for summary judgment, the nonmovant need only ask that his evidence "be taken as true." *Id. at 1208*. We emphasized that the cases of both the Supreme Court and this court "have honored the difference between weighing direct evidence and refusing to draw unreasonable inferences from circumstantial evidence." *Id.* We summarized our cases as indicating that *Matsushita* only **[**23]** applies "where the non-movant relie[s] on inferences from circumstantial evidence." *Id.* We then went on to quote extensively from *T.W. Electrical Services, Inc. v. Pacific Electrical Contractors Assoc., 809 F.2d 626 (9th Cir. 1987)*, highlighting that the *Matsushita* inquiry was appropriate only "'*where there is no direct evidence of a conspiracy.*'" *Id. at 1209* (quoting *T.W. Elec., 809 F.2d at 632*) (emphasis added by *Liu*). *See also Christofferson Dairy, Inc. v. MMM Sales, Inc., 849 F.2d 1168, 1172 n. 4 (9th Cir. 1988)* (standards spelled out in *T.W. Elec.* apply only "if there is no direct evidence of a conspiracy)".

Thus, ***HN6***[] in applying *Matsushita*, a court must consider the nature of the evidence that the plaintiffs have offered with respect to each element of the cause of action. If the plaintiffs rely exclusively on circumstantial evidence in order to establish at least one element of their cause of action, then the court must proceed to analyze, under *Matsushita*, whether the inferences which the plaintiffs seek **[**24]** to draw from the indirect evidence are reasonable and permissible under the governing substantive law. *T.W. Elec., 809 F.2d at 631*; *see also United Steelworkers of America v. Phelps Dodge Corp., 865 F.2d 1539, 1542* (9th Cir.) (en banc), *cert. denied*, *493 U.S. 809, 110 S. Ct. 51, 107 L. Ed. 2d 20 (1989)*. In the antitrust field, this inquiry will be guided by the principles outlined earlier. If, however, the plaintiffs offer direct evidence to support each element, then summary judgment must be denied.

III. APPELLANTS' PRICE-FIXING CLAIMS

In their briefs to this court, the appellants have identified three classes of evidence that they claim create a genuine issue of material fact as to whether the appellees were engaged in a conspiracy to fix or stabilize prices. For purposes of analysis, we will first examine these classes of evidence successively; having done so, we will then be in a better position to evaluate the probative value of the entirety of the appellants' evidence.

A. *Pricing Pattern Evidence*

The first set of evidence that the appellants claim indicates the existence of a conspiracy is a set of analyses **[**25]** of the appellees' pricing patterns. [2] This analysis was performed **[*442]** by appellants' expert Keith Leffler. The raw data which Mr. Leffler analyzed were derived, in large measure, from pricing information collected by Lundberg Surveys, Inc. During the period from 1968 to 1973, the Lundberg firm collected, on a weekly basis, retail price information from individual stations in 14 different cities in Arizona, California, Oregon, and Washington. Mr. Leffler analyzed this data for the largest city in each of the four states. His analysis of this weekly price data indicates that, between 1968 and August 1972, the average retail prices of stations selling appellees' gasoline in the Los Angeles, Phoenix, Portland, and Seattle markets generally followed a "sawtooth" pattern. That is, the average prices would generally decline over a period of time ranging from approximately three to eleven weeks, and then the prices would return to roughly their original, higher levels over approximately a one to four week period. Both the price increases and decreases from week to week were often quite sharp; but the increases were often especially sharp.

[26]** The parties do not seriously dispute that the sharp increases in retail prices were generally the consequence of the withdrawal of dealer discounts, thus resulting in the "restoration" of the "normal" higher dealer tankwagon prices. [3] **[**28]** Accordingly, we cannot accept the district court's conclusion that the cyclical pattern of retail prices does not suggest that wholesale prices followed a similar pattern. *See* *Petroleum Prods., 656 F. Supp. at 1300* ("the cycle of retail price changes reflected by the charts does not establish that the defendants' wholesale prices followed the same pattern"). [4] Indeed, we note that the data presented by the appellees themselves concerning their wholesale prices indicates that the pattern of these prices was a cyclical one of sharp increases followed by gradual declines. The key disagreement between the parties concerns the significance of this pattern. The appellees argue that the restorations and the sawtooth pattern of prices do not indicate conspiracy because the same pattern would be produced by individual companies each deciding to follow the others' price lead. In short, the appellees essentially assert that their pricing behavior **[**27]** was interdependent rather than conspiratorial. [5] The appellants disagree, arguing that these price cycles were not the result of any sort of independent action, but are rather an indication of collusion. The appellants assert that a conspiracy may be inferred from this pricing data because the price increases were too large and too risky to have occurred in a competitive market. According to the appellants, any company that raised its prices this sharply would so risk losing business that it would never take such a step without some advance assurance that others would follow. Therefore, argue the appellants, the fact that such price increases were made is an indication of a prior agreement to raise prices.

[*443] In applying *Matsushita*, our first task is to decide whether the appellees' claim of interdependent pricing constitutes a sufficiently plausible independent explanation for their pricing behavior. The appellants' key argument

---

[2] In first considering the parallel pricing evidence alone we do not ignore our mandate to "take special caution to give the [plaintiffs] 'the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each.'" *Wilcox v. First Interstate Bank of Oregon, N.A., 815 F.2d 522, 526 (9th Cir. 1977)* (quoting *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962))*; *see also* *City of Long Beach v. Standard Oil Co., 872 F.2d 1401, 1404-05* (9th Cir.), *amended*, *886 F.2d 246 (1989)*, *cert. denied*, ***493 U.S. 1076, 110 S. Ct. 1126, 107 L. Ed. 2d 1032 (1990)***. Thus, later in sections III-B and III-C we will consider appellants' claim that appellees exchanged various information to facilitate price coordination in the context of the parallel pricing evidence.

[3] We note, however, that the parties sharply disagree over whether this correlation indicates sufficient "control" of the dealers to avoid the holding of *Illinois Brick*. Nonetheless, as stated earlier, we do not reach this issue. In analyzing the significance of the retail pricing data, we think it sufficient to note that, regardless of the specific degree of control over individual stations, movements in the appellees' wholesale prices generally influenced the retail prices that were charged by the dealers. The parties do not dispute this latter fact.

[4] Curiously, the district court later went on to state, in apparent contradiction, that "wholesale prices play a major part in any decision to set retail prices, and we therefore can assume that the defendants' wholesale prices had a tendency to follow a similar pattern". *656 F. Supp. at 1300*. We agree with this latter statement of the district court.

[5] As used here, the term "interdependent" merely describes the phenomenon of sequential competitive pricing decisions that are each made (1) in response to the ones preceding it and (2) in hope or expectation of the ones that follow it. The legal significance of such conduct is analyzed below.

on this score is that the price increases were so risky that it is implausible to believe that any firm would have undertaken them without some advance agreement from competitors. We note that such **[**29]** an argument may often be valid when the relevant market is highly unconcentrated or where the increase cannot be reversed easily or readily without substantial loss of goodwill. *See* VI P. Areeda, ***Antitrust Law*** para. 1425d at 150-53, para. 1431a at 183-84 (1986). In a highly unconcentrated market, any firm that attempted a unilateral supracompetitive price increase would quickly lose business to its many other competitors. Interdependent pricing is not likely to occur because each firm realizes that the possibility of undetected "shading" of the interdependent price by a single firm would quickly lead to a return to the original market price. Turner, *The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal*, 75 Harv.L.Rev. 655, 659-60 (1962); *see also* VI P. Areeda, *supra*, at para. 1429a. In such a market, any single firm can increase its output without substantially affecting the market price or the market shares of its competitors. This fact substantially increases the odds that shading by an individual firm would either go undetected or be ignored, and the consequent spread of such discounting would rapidly bring **[**30]** the overall price back down. Turner, 75 Harv.L.Rev. at 660; VI P. Areeda, *supra*, at para. 1429a. Therefore, without some sort of prior agreement prohibiting such shading, the temptation for any individual firm would be almost irresistible. Turner, 75 Harv.L.Rev. at 660. Accordingly, in highly unconcentrated markets, a claim that price increases were the result of sequential interdependent price increases is often likely to prove implausible.

However, as the number of firms in a market declines, the possibilities for interdependent pricing increase substantially. In determining whether to follow a unilateral price increase by a competitor, a firm in a relatively concentrated market will recognize that, because its pricing and output decisions have an effect on market conditions and will generally be watched by its competitors, there is less likelihood that any shading would go undetected or would be ignored. The firm thus knows that if it fails to follow the price lead, the leading firm will quickly reduce its prices back to their earlier level. VI P. Areeda, *supra*, at para. 1429b. On the other hand, the firm may recognize that the higher price **[**31]** is one that would produce higher profits. It may therefore decide to follow the price increase, knowing that the other firms will likely see things the same way and that, at any rate, any subsequent downward movement in prices would likely be detected before there was any substantial loss of market share. *Id.*; Turner, 75 Harv.L.Rev. at 661-62.

There has been a considerable debate in the literature over whether interdependent pricing is an inevitable or inherent feature of certain types of concentrated markets. *Compare* VI P. Areeda, *supra*, at paras. 1430-32 (inherent); Sullivan, *The Viability of the Current Law on Horizontal Restraints*, *75 Cal.L.Rev. 835, 858-59 (1987)*; Turner, 75 Harv.L.Rev. at 665-66 *with* R. Posner, ***Antitrust Law****: An Economic Perspective* 42-47 (1976) (not inherent); Posner, *Oligopoly and the Antitrust Laws: A Suggested Approach*, 21 Stan.L.Rev. 1562, 1566-75 (1969). We need not take any side in this debate. [6] Regardless of whether such conduct is an inevitable consequence of a more concentrated market structure, we conclude that it is at least plausible to assert that such pricing **[**32]** behavior *can* occur when the number of significant rivals in a market is sufficiently small.

[*444] We do not think that the number of significant firms in the gasoline markets involved in this case is so large as to render the possibility of sequential interdependent price increases wholly implausible. Although these markets would probably not be considered highly concentrated in Herfindahl-Hirschmann terms, that does not imply that the appellees' claim of interdependent pricing is implausible. VI P. Areeda, *supra*, para. 1431a at 183 (noting that the Herfindahl-Hirschmann Index "cannot capture the full range of factors bearing upon the existence or strength of recognized **[**33]** interdependence"). As Professor Areeda has noted, "All one can say with assurance is that such interdependence and price coordination are implausible when there are 'many' 'significant' rivals (more than a dozen?) but more likely as the number of firms decreases." *Id. at 184*. The gasoline markets under discussion here appear to lie in that gray area where, although not altogether inevitable, interdependence is distinctly possible. See F. Scherer, *Industrial Market Structure and Economic Performance* 288 (2d ed. 1980) (discussing empirical evidence of interdependent pricing in the gasoline industry). Indeed, the appellants have not pointed to any evidence indicating that the number of firms in these markets is too large for interdependence to occur.

---

[6] Were it necessary to do so, we would be hard-pressed to conclude that interdependent pricing is "inevitable" or "inherent" in the gasoline markets at issue in this case. Given the generally rapid deterioration in prices that followed each restoration, any interdependence in the appellees' pricing behavior was at best imperfect.

Nonetheless, we noted earlier that, even in highly concentrated markets, a unilateral price hike might be too risky to make without advance agreement if the increase could not be readily reversed without a significant loss of goodwill. On the other hand, where a unilateral price increase can be withdrawn quickly, a firm may very well decide to test the waters without any sort of advance commitment from its competitors as to whether **[**34]** they will follow. In this regard, we note that the uncontested record evidence indicates that unilateral price increases in these markets were quickly reversible. [7] Furthermore, the evidence indicates that, although unilateral restorations could often entail significant costs if unsuccessful, the costs do not appear to have been so prohibitive as to suggest that the possibility of such unilateral action was implausible. [8]

[35]** We recognize that ***HN7***[] such interdependent pricing may often produce economic consequences that are comparable to those of classic cartels. Nonetheless, proof of such pricing, *standing alone*, is generally considered insufficient to establish a violation of the Sherman Act. *See* *Wilcox v. First Interstate Bank of Oregon, N.A., 815 F.2d 522, 526 (9th Cir. 1977)* ("The fact that competitors may see proper, in the exercise of their own judgment, to follow the prices of another manufacturer, does not establish any suppression of competition or show any sinister domination.") (quoting *United States v. International Harvester Co., 274 U.S. 693, 708-09, 71 L. Ed. 1302, 47 S. Ct. 748 (1927))*; *see also* *Clamp-All Corp. v. Cast Iron Soil Pipe Inst., 851 F.2d 478, 484 (1st Cir. 1988)*, *cert. denied*, *488 U.S. 1007, 109 S. Ct. 789, 102 L. Ed. 2d 780 (1989)*; *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253-54* (2d Cir.), *cert. denied*, *484 U.S. 977, 108 S. Ct. 489, 98 L. Ed. 2d 487 (1987)*; *E.I. DuPont de Nemours & Co. v. F.T.C., 729 F.2d 128, 139 (2d Cir. 1984)* **[**36]** ("The mere existence of an oligopolistic market structure in which a small group of manufacturers engage in consciously parallel pricing of an identical product does not violate the antitrust laws."); VI P. Areeda, *supra*, at para. 1432; Turner, 75 Harv.L.Rev. at 669-72. Additional **[*445]** proof beyond mere parallel pricing usually is required. [9]

Our discussion of *Matsushita* highlights the wisdom of this rule. In applying the second prong of the *Matsushita* test, we must ask whether, given the possibly interdependent nature of the pricing behavior observed in this case, permitting a *§ 1* violation to be found *solely* on such evidence would have the effect of deterring important legitimate conduct. We conclude that, if we were required to decide based on the price cycle evidence standing alone, we would find that it would not be enough to survive summary judgment. **[**37]** To permit an antitrust violation to be based on the sawtooth price pattern in this case, without more, would require a company making wholly independent pricing decisions to consider that the possible responses of its competitors might render it liable for treble damages. Similarly, following another company's price increase might very well provide the evidence that a disgruntled customer would need to get to a jury in a treble damage antitrust suit. It thus appears that permitting an inference of conspiracy from the parallel pricing evidence alone would result in an anticompetitive dislocation by distorting independent pricing decisions.

We also cannot agree that, without more, the conspiratorial nature of the price restorations is indicated by the fact that the price hikes were "too high." Were we to permit such a theory, few pricing decisions would be immune from antitrust scrutiny. Any unhappy buyer in a market experiencing a general increase in prices could bring an antitrust action against the sellers, arguing that the conspiratorial nature of the price increase is indicated by the fact that the increase was "too high." The court would then be required to receive evidence as **[**38]** to the wisdom of, and necessity for, the price increase, and to judge what constitutes a "fair" price. The federal courts generally are unsuited to act as rate-setting commissions. *See* VI P. Areeda para. 1432 at 203. Accordingly, the appellants must rely on additional evidence beyond mere price parallelism in order to avoid summary judgment.

---

[7] Thus, for example, the record indicates that in mid-February 1971, Union "restored" prices to its dealers in California by withdrawing dealer discounts, but when only two other companies followed suit, it reinstated dealer aid just a few days later.

[8] In reaching this conclusion, we take note of the fact that the record indicates that the appellees generally learned quite rapidly of one another's price moves by reading about them in the trade press. In section III-B, *infra*, we consider the appellants' claim that the appellees' exchange of information through the trade press is, under the circumstances of this case, probative of a conspiracy. For purposes of the present analysis, however, we take the rapid dissemination of such pricing information as a given.

[9] In some cases, when a market is highly unconcentrated, parallel pricing alone may be all the proof that is required.

B. *Price Data Dissemination Evidence*

The appellants point to two additional classes of evidence which they claim indicate the existence of a conspiracy to fix or stabilize prices. The first of these two sets consists of evidence concerning various practices whereby the appellees disseminated information concerning their wholesale and retail prices. The appellants contend that, not only were these price dissemination practices themselves conspiratorily and unlawfully adopted, but that they were adopted pursuant to an agreement or understanding to engage in concerted restorations. The appellees argue that these practices were both lawful and independently adopted and that they are not probative of a conspiracy to stabilize prices.

1. Press releases

The appellants presented evidence indicating that at various times each of the defendants **[**39]** except ARCO, Union, and Gulf engaged in the practice of publicly announcing, in press releases, their decisions to withdraw dealer assistance and to restore tankwagon prices. [10] Indeed, the evidence indicates that such price increases were sometimes announced in advance of their effective date. Thus, for example, Mobil announced on March 26, 1970 that it would withdraw dealer aid effective March 30. The appellees argue that no inference of conspiracy may be drawn from such evidence because they claim that the publication of this information was "perfectly lawful" and an "ordinary business practice." We conclude, however, that such an inference is both reasonable and permissible under *Matsushita*.

[*446] In their depositions in this case, **[**40]** several officers of the appellee oil companies were questioned concerning the business reasons for publicly announcing changes in tankwagon prices and in the levels of dealer assistance. Their virtually uniform response was that it was done for the purpose of quickly informing competitors of the price change, in the express hope that these competitors would follow the move and restore their prices.

Thus, the appellees' officers' own testimony indicates that there was essentially no purpose for publicly announcing tankwagon prices and dealer discount information other than to facilitate either interdependent or plainly collusive price coordination. Announcing such price increases publicly reduced the likelihood that the increase would fail to be detected or that it would be detected only after the price leader had been "hung out to dry" in the market for several days. Without a press release, a withdrawal of dealer support might not be readily detected because the retail prices of individual branded gas stations varied considerably. As one Standard Oil official put it: "Street pricing [was] all over the lot; so to us it was important that we set forth clearly and exactly what we **[**41]** had done so there would be no misunderstanding of it." Indeed, Arco's failure publicly to announce its restoration attempts to the trade press appears to have been responsible for the failure of its January 1970 restoration. An internal Arco memorandum explained that "the reason this partial restoration did not work is that our competitors obviously thought our dealers were merely overpricing and our constructive efforts went completely unnoticed at the market place." To avoid this problem, the memorandum recommended that if Arco decided to lead a restoration in the future, it should be "telegraphed to all news media as far as possible in advance as Legal will approve."

It was important for the appellees to reduce the uncertainties concerning restorations because the costs associated with leading a restoration were significant, and they increased with each day that a move was not detected or was not followed. An internal Arco memorandum noted that its unsuccessful restoration attempts had been "costly to us, not only in terms of volume, but more importantly in expense dollars required to recoup and serious adverse reaction with our customers and in our dealer organization." Another **[**42]** Arco document noted that "past experience has taught us how disastrous it can be for us to be the leader in an upward move." Even with public announcement, the costs of leading a restoration were substantial; Standard Oil's internal analysis of the effect of three restorations it led indicated an average drop in sales volume of over 19% within one week. The same Standard Oil document blamed, in part, the company's practice of leading restorations for causing a significant

---

[10] The record indicates that in the 1960s Exxon issued press releases concerning its withdrawal of dealer aid, but that it stopped doing so in 1969. Nonetheless, the record also indicates that Exxon continued to respond to press inquiries concerning its price moves.

decline in Standard's overall market share. An Arco document echoed this view, noting that Standard's and Shell's leading of restorations had led to their "disastrous" loss in market share.

The evidence presented by the appellants thus indicates that the publication of wholesale price increases was intended to make, and had the effect of making, restorations more effective by ensuring that competitors could quickly learn of, and respond to, any withdrawal of dealer aid. [11] **[**45]** The appellees' actions in announcing such information made the market more receptive to price coordination than it otherwise would have been. Although we concluded earlier that mere proof of interdependent pricing, standing alone, may not serve **[**43]** as proof of an antitrust violation, we believe that the evidence concerning the purpose and effect of price announcements, when considered together with the evidence concerning the parallel pattern of price restorations, is sufficient to support a reasonable and permissible inference of an agreement, whether express or tacit, to raise or **[*447]** stabilize prices. The inference is reasonable because at the very least, a jury could conclude that the appellees implicitly agreed to engage in practices that they knew and hoped would lead to greater price coordination, [12] with the result that when a price leader wished to initiate a restoration, it could effectively solicit tacit agreement. *See* *United States v. Container Corp., 393 U.S. 333, 336-37, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969)* (informal agreement to provide price information may, under appropriate market conditions, constitute circumstantial evidence of an agreement to stabilize prices); [13] *King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1152 (10th Cir. 1981)* (*Container* established that exchange of price information may serve as basis for inferring price fixing where **[**44]** effect of such exchange is to stabilize prices), *cert. denied*, *454 U.S. 1164, 71 L. Ed. 2d 320, 102 S. Ct. 1038 (1982)*; *Penne v. Greater Minneapolis Area Bd. of Realtors, 604 F.2d 1143, 1148-49 (8th Cir. 1979)* (summary judgment was erroneously granted where evidence indicated possible connection between price information exchanges and alleged conspiracy to fix brokerage fees); *see also* Posner, *Information and Antitrust: Reflections on the* Gypsum *and* Engineers *Decisions*, 67 Geo.L.J. 1187, 1199 (1979) ("If the effect of the information exchange were to raise the level [of] prices, one could infer that the motive was price fixing."); *id.* at 1203 (a jury should be allowed "to consider exchanges of information, other communications among the parties to an alleged conspiracy, and such other relevant circumstances as the effect on the price level . . ., as circumstantial evidence of alleged price fixing.").

[46]** We reject the appellees' circular argument that the publication of dealer discount and price information cannot support an inference of conspiracy because the information was "publicly available." The information was publicly available only because the appellees chose to make it so; without such dissemination, price moves were not always readily and easily detected. Furthermore, we agree with Professor (now Judge) Posner that "the *form* of the exchange -- whether through a trade association, through private exchange as in *Container*, or through public

---

[11] As noted earlier, the record indicates that price increases were occasionally announced in advance of their effective date. Such announcements are, of course, even more effective in allowing the price leader to communicate its intention and to receive reactions without having to incur substantial risk.

[12] An inference that the parallel use of the trade press was the result of at least a tacit agreement is reasonable in light of the fact that, as noted in section III-C, *infra*, the use of the trade press was arguably a substitute for the direct competitor contacts that the appellees admit occurred during the period prior to the Court's decision in *United States v. Container Corp., 393 U.S. 333, 21 L. Ed. 2d 526, 89 S. Ct. 510 (1969)*.

[13] Consistent with the limited nature of the holding in *Container*, the Court has held that ***HN8***[] agreements to exchange pricing data do not themselves constitute a *per se* violation of the Sherman Act. *United States v. United States Gypsum Co., 438 U.S. 422, 441 n. 16, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*. Accordingly, information exchanges help to establish an antitrust violation only when either (1) the exchange indicates the existence of an express or tacit agreement to fix or stabilize prices, or (2) the exchange is made pursuant to an express or tacit agreement that is itself a violation of *§ 1* under a rule of reason analysis. Given Container's conclusion that the agreement in that case fell within the *per se* ban against price fixing, *see* *393 U.S. at 337-38* & n. 4 (citing *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 220-21, 84 L. Ed. 1129, 60 S. Ct. 811 (1940))*, it seems clear that *Container* falls into the first of these two classes. *See* *Wilcox v. First Interstate Bank, 815 F.2d 522, 526 (9th Cir. 1987)* (noting that *Container* involved an agreement to fix prices); *Hanson v. Shell Oil Co., 541 F.2d 1352, 1360 (9th Cir. 1976)* (characterizing *Container* as a case in which companies exchanged price information "for the purpose of price stabilization"), *cert. denied*, *429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977)*.

announcements of price changes -- should not be determinative of its legality." R. Posner, ***Antitrust Law****: An Economic Perspective* 146 (1976). The fact that it is feasible for the appellees to communicate the necessary price information through press releases does not "immunize the exchange of price information from legal sanction [where] the conditions of the market suggest that the exchange promotes collusive rather than competitive pricing." *Id. at 147*.

We do not believe that permitting such an inference poses any problem under *Matsushita*. The district court concluded that the inference could not be permitted, **[**47]** reasoning that the hope of imitation was a **[*448]** proper business purpose for the announcements, and that the publication of such information was in the legitimate individual interest of each company. *Petroleum Prods., 656 F. Supp. at 1304-05*. We agree that it is plausible to contend that independent considerations of self-interest would have led a company to choose to publish a price increase that it had decided to make. That does not settle the inquiry, however; the question remains whether permitting an inference of conspiracy from the fact of such publication would significantly deter important legitimate conduct. Given the market conditions present in this case, we conclude that it would not.

It is important to recognize that, given the system of branded franchising, the tankwagon prices or dealer discounts are not of immediate significance to anyone other than the oil companies and their franchised dealers. Retail purchasers do not care what the dealer paid for the oil; they are concerned only with the price at the pump. Moreover, the public dissemination of information concerning dealer tankwagons and discounts could hardly be described as fostering **[**48]** the efficient or rational operation of the market inasmuch as there simply was no wholesale market to rationalize; the branded dealers were not free to shop around for their oil. Accordingly, the district court's reliance on *Maple Flooring Mfrs. Ass'n v. United States, 268 U.S. 563, 582-84, 69 L. Ed. 1093, 45 S. Ct. 578 (1925)* (noting that certain types of price information exchanges may help to "avoid the waste which inevitably attends the unintelligent conduct of economic enterprise"), *quoted in* *Petroleum Prods., 656 F. Supp. at 1304*, is wholly inapposite.

The uncontested record evidence indicates that the dealers were individually notified concerning any changes in the tankwagon price or in the level of dealer discount. In light of this fact, it appears that the public dissemination of such information served little purpose other than to facilitate interdependent or collusive price coordination. Under these circumstances, there is no significant probability that permitting the proffered inference would deter important legitimate conduct. [14] The *Matsushita* balance is particularly one-sided in this case.

[49]** Nothing in our earlier discussion concerning mere proof of parallel pricing is to the contrary. Simple interdependent pricing does not violate the Sherman Act, not because it is desirable (it is not), but because permitting proof of conspiracy solely on the basis of price parallelism *is* undesirable. The appellants, however, have offered evidence indicating that the appellees in this case did more than simply price interdependently. A jury could conclude that the oil companies agreed, either implicitly or explicitly, to create market conditions that would facilitate tacit or express price coordination. The evidence would support a conclusion that the appellees strove to make such coordination possible where it otherwise might not have been. To paraphrase Professor Areeda, "One may reluctantly tolerate interdependent pricing behavior as such and still condemn [those agreements involving] practices which unjustifiably facilitate interdependent pricing and which can be readily identified and enjoined." P. Areeda, *Antitrust Analysis* para. 325, at 381 (3d ed. 1981). We think that a jury should decide whether the appellees' actions were undertaken pursuant to an agreement or understanding **[**50]** concerning prices or whether their activities were simply noncollusive and independent. [15]

---

[14] Our conclusion would necessarily be different were the appellants' inference of a price-fixing conspiracy based on the dissemination or advertising of *retail* prices; permitting an inference of conspiracy from such evidence would make it more difficult for retail consumers to get the information they need to make efficient market decisions. In the district court, the appellants did indeed base their claims in part on the public announcement of retail prices by dealers, but they have not pressed such a theory on appeal.

[15] We also note that, as an alternative to using the price data dissemination evidence as a means of proving the existence of a *per se* illegal conspiracy to fix prices, the appellants on remand may also seek to challenge directly, under a rule of reason

[*449] 2. Posting of prices

The appellants also presented evidence indicating that several of the appellees publicly posted their dealer tankwagon prices and any applicable dealer discounts. Specifically, the appellants produced evidence indicating that Mobil, Standard Oil, and Exxon posted such information, for public inspection, at either their company headquarters, division offices, **[**51]** or bulk plants. The appellants also presented testimony from an Arco executive to the effect that Arco "probably" posted its tankwagon prices at its bulk plants. In addition, there is evidence in the record indicating that Arco, among others, checked these postings.

For reasons comparable to those discussed above, we conclude that the practices of posting and checking this detailed information supports a reasonable and permissible inference of an agreement or understanding concerning prices. The appellees' assertedly independent explanation for such posting was that, as one Standard Oil official put it:

> It was our desire to be open and straightforward in the matter of our product pricing and to make available for any customer the ability to look and see what our posted price was. . . . I guess one might say that it was for the logic of being open and aboveboard on what our prices were to our customers. We had nothing to conceal and it was just a mechanism to accomodate that openness.

Another Standard official testified that the posting was done "for the customer's benefit, to inform the customer what the applicable prices were." A Mobil official testified that **[**52]** the purpose of the posting was to allow any individual dealer to come in and check "that he wasn't being discriminated against." It is uncontested, however, that any changes in tankwagon prices or dealer discounts were directly reported to the dealers.

Other testimony indicates that the purpose and effect of the posting was to allow competitors to learn quickly of any withdrawal of dealer support. The following testimony from a Standard Oil official is illustrative:

> Q. . . . Was there any business reason why the temporary dealer assistance that was being granted in the trade zone . . . should have been published or made available to anybody other than the dealers?
> A. Yes, I think a practical business reason. If we had raised our prices to our dealers, and our dealers had raised it on the street generally, I think particularly our dealers . . . may have been as much as one, two, three, four cents -- they were all over the lot. If a competitor saw this, he might wonder, "Is this a dealer movement, or has Standard Oil Company raised their prices to cause this reaction in the marketplace?" . . .
>
> Q. . . . The reason you are giving, then, is that you wanted the competition **[**53]** to know what the price move was.
> A. Exactly.

Given that the evidence thus indicates that the purpose and effect of the public posting was the same as for the press releases, we similarly conclude that a reasonable inference of agreement may be drawn from this evidence.

We also perceive no *Matsushita* problem in permitting such an inference. To the extent that the appellees assert business motivations comparable to those discussed in Section III-B-1, our analysis is the same. Furthermore, given that the appellees' asserted purpose of assuring dealers that there was no discrimination could easily be achieved through other means, we have little difficulty concluding that permitting such an inference will not deter any significant or valuable independent conduct.

Lastly, we perceive an additional reason why the posting of this information may serve as the basis for an inference of conspiracy. The record indicates that the information posted was unusually detailed, listing tankwagons and dealer discounts **[*450]** for each individual price zone. Such detailed information would have the effect of revealing any gradual shading of wholesale prices that might occur in **[**54]** a particular zone. The record indicates that the spread of such shading was one factor that contributed to the gradual collapse of price restorations. By posting and checking such information, several of the appellees created a mechanism whereby shading might be discouraged

---

analysis, the alleged agreement to exchange price information. *See* note 13 *supra*. Given the evidence indicating a lack of a strong procompetitive purpose for such data dissemination, the appellants' evidence clearly presents a jury question under this alternative theory.

or detected. In light of the fact that disclosure of this sort of sensitive price information might be considered contrary to a firm's self-interest, a jury may reasonably conclude that it was the intention and common understanding of these companies to discourage such shading, thus facilitating and possibly lengthening restoration periods.

C. *Evidence of Competitor Contacts*

The third set of evidence which the appellants claim supports an inference of an agreement consists of evidence concerning alleged contacts between the appellees.

1. Pre-Container contacts

The appellants assert that, prior to the Supreme Court's decision in *Container*, the appellees all regularly provided one another with information concerning dealer tankwagons and discounts. The record contains evidence indicating that the appellees did in fact engage in direct communication concerning price levels and dealer support. For **[**55]** example, Agnar Nerheim, a marketing official with Standard Oil, testified that between 1956 and 1958 he telephoned competitors to determine what retail price level they were supporting in the market, and that he sometimes asked what was the specific amount of dealer assistance being given. He also testified that he received similar calls from competitors. When asked about which specific companies were involved, Nerheim testified that he had such conversations with individuals from Union, Richfield (now ARCO), Texaco, General (now Mobil) and Shell.

Nerheim testified that such price verifications continued after he was transferred to Standard's Los Angeles office. Nerheim stated that he was transfered [sic] to Los Angeles because most of the major oil companies were headquartered there, and it would therefore be easier for him to contact competitors. In addition to verifying prices, Nerheim stated that he also spoke with competitors in order to obtain "market intelligence," including information concerning wholesale and retail matters. Among the subjects discussed were the price wars that were taking place in Los Angeles. Nerheim testified that, during this time period, he had discussions **[**56]** concerning such market intelligence with officers from ARCO, Humble (now Exxon), Texaco, Mobil, and Gulf. Most of these contacts were face-to-face visits rather than phone calls. Nerheim stated that he kept no records of these competitor contacts, and that he had been specifically instructed by his superior not to put down on his expense reports the names of any competitors whom he took to lunch. Nerheim stated that such contacts continued until 1967.

Moreover, Robert Erhard, an official with the Carter Oil Company (later acquired by Humble, now Exxon) testified that, sometime between 1959 and 1961, Agnar Neirheim came to his office in Seattle and explained to him how they could converse about pricing without there being any telephone record. According to Erhard, Neirheim explained that the local Standard office in Seattle could reach him on a company WATS line, and that calls could therefore be made through the local office without appearing on company long-distance records. In light of Erhard's and Nerheim's testimony, it seems clear that the record supports an inference that Nerheim engaged in secret conversations with competitors concerning price levels during the 1960s. Other **[**57]** testimony indicates that other Standard employees engaged in similar conversations with competitors during this time period.

The appellees do not appear to contest the appellants' suggestion that such contacts took place prior to the decision in *Container*. Instead, they raise two arguments as to why the evidence should not be **[*451]** considered as supporting an inference of conspiracy. The appellees first argue that the testimony is "ancient" and is too "stale" to have any probative value. For several reasons, we must reject this contention. First, although all of this pre-Container evidence falls outside the limitations period applicable in this case, the district court dismissed this action without ruling on the plaintiffs' claim that the statute of limitations had been equitably tolled by the defendants' alleged fraudulent concealment of their activities. If the statute was tolled, then we would have little difficulty concluding that the appellants' evidence of secret direct price exchanges among the appellees supports an inference of an agreement to fix or stabilize prices. Accordingly, on remand the district court should consider whether the statute of limitations has **[**58]** been tolled; if it has, then the plaintiffs may use this evidence of competitor contacts in order to establish the existence of a conspiracy during the pre-Container period.

Second, we think that the pre-Container evidence is relevant to establishing the appellees' intent and motive in publicizing, through press releases and posting, their dealer tankwagons, dealer discounts, and supported retail prices. The appellants have produced evidence indicating that these methods of publication were generally meant to serve the same purposes as the direct competitor contacts that had preceded *Container*, and, indeed, that they were used as a substitute for such contacts in the post-Container period. Thus, for example, Nerheim testified that, by 1967 (two years before *Container*) Standard had largely abandoned the practice of verifying its prices directly to its competitors, relying instead on its system of posting such information publicly, a practice which it had begun earlier in the decade. Nerheim stated that, before he left Los Angeles in 1967, such information was publicly posted, and competitors therefore no longer needed to verify prices with him verbally; they would just check **[**59]** the listings and then drop by his office to say hello. Occasionally during this period, however, Nerheim still responded to phone calls requesting information on specific wholesale dealer allowances.

Similarly, C. R. Jones, an official with Mobil, testified that Mobil used several different methods to obtain information from competitors concerning dealer aid, but that the use of direct horizontal communications was dropped after the decision in *Container* was announced. Thereafter, Mobil relied largely on trade publications, contacts with competitive service station dealers, and checking postings in order to obtain information concerning competitors' levels of dealer aid. Although various Mobil bulk plants had been posting in various degrees for some time, after *Container* Mobil instituted a uniform practice of posting at all of its plants across the United States. As noted earlier, this uniform system of posting included publicizing Mobil's tankwagons and dealer discounts for specific trade zones. Mr. Jones specifically testified that this shift in methods did not represent a change in overall business practices:

> . . . The decisions in the *Container* case changed **[**60]** our communications. But we did not intend that it change any business procedures or practices that we had historically been operating under, that we felt were not necessary to change. We were attempting to maintain our conduct on a -- in a legal manner, and certainly not attempting to say we have to change our way of life because of a decision in a court case.

We think that this evidence concerning the shift to indirect methods of informing competitors of wholesale price levels provides some support for the appellants' claim that the post-Container price publications were made pursuant to a common understanding or agreement. The pre-Container activities, which involved verifications of dealer support levels upon personal request, fit squarely within the scope of *Container*. The appellants' evidence suggesting that the appellees shifted methods of communication, without abandoning the goal of giving and receiving such information, supports an inference that the public dissemination of dealer support information **[*452]** was undertaken pursuant to a mutual understanding. [16]

[61]** The appellees also claim that the legality of their pre-Container conduct was upheld in *Hanson v. Shell Oil Co., 541 F.2d 1352, 1359-60 (9th Cir. 1976)*, *cert. denied*, *429 U.S. 1074, 50 L. Ed. 2d 792, 97 S. Ct. 813 (1977)*, and *Gray v. Shell Oil Co., 469 F.2d 742, 746-47 (9th Cir. 1972)*, *cert. denied*, *412 U.S. 943, 37 L. Ed. 2d 403, 93 S. Ct. 2773 (1973)*. We disagree. First, we note that both of those cases arose under different procedural postures than the present case, and they involved different standards of review. *Hanson* was an appeal from a jury verdict for the defendants after a second trial. The plaintiffs contended that the granting of a new trial after the first jury had ruled in their favor was an abuse of discretion. *Hanson, 541 F.2d at 1359*. After reviewing the record, we held that the trial court did not abuse its discretion in concluding that the first jury's verdict was against the weight of the evidence. *Id. at 1359-60*. In *Gray*, the jury had rendered a verdict for the *defendant*, Shell Oil Co.; we therefore noted that, on appeal, we were required **[**62]** to view the evidence in the light most favorable to Shell. *Gray, 469 F.2d at 746*. Our standard of review in the present case is, of course, very different from that applied in *Hanson* or *Gray*. Here, the appellants contest the entry of summary judgment against them. We review the district court's decision de novo, and, within the limits established by *Matsushita*, we view the evidence in the light most favorable to the appellants. *See* *Matsushita, 475 U.S. at 587-88* (noting that, within the limits imposed by ***antitrust law***, "on summary judgment the inferences to be drawn from the underlying facts . . . must be viewed in the light most

---

[16] We disagree with the appellees' suggestion that the lack of agreement is clearly indicated by the diversity of publication practices. The fact that the appellees may have chosen different methods of publication does not imply that they did not each recognize and act upon a mutual understanding that such information would somehow be made available to competitors.

favorable to the party opposing the motion") (quoting *United States v. Diebold, Inc., 369 U.S. 654, 655, 8 L. Ed. 2d 176, 82 S. Ct. 993 (1962))*.

Furthermore, as the appellants correctly note, the claims in *Hanson* and *Gray* were quite the opposite of those alleged in this case. As required by *Container*, in both *Hanson* and *Gray* we undertook a highly fact-specific inquiry. In neither case did we broadly endorse competitor contacts for the purpose of price verification. The **[**63]** plaintiffs in *Hanson* and *Gray* sought to establish that the defendants had conspired to *create* price wars in order to drive independent marketers out of business. *Hanson, 541 F.2d at 1355*; *Gray, 469 F.2d at 746*. We noted that the exchange of wholesale price information was initiated by dealers in *Gray* and by the companies in *Hanson* in order to benefit *dealers* facing severe competition, and we concluded that on the specific facts of those two cases "such exchange of information does not rise to the level of an illegal conspiracy." *Hanson, 541 F.2d at 1360*; *Gray, 469 F.2d at 747*.

By contrast, the evidence in the present case amply supports an inference that the exchange of price information by the appellees was done with the purpose and effect of allowing greater coordination and stabilization of prices. Thus, while in *Hanson* we distinguished *Container*, noting that "the goal of either company was not shown to be price stabilization. . . ." *541 F.2d at 1360*; *see also* *Gray, 469 F.2d at 746-47* ("Here, as distinguished from *Container*, the price inquiries **[**64]** were initiated [by the dealers] and the information was sought, not for the direct benefit of Shell, but for the benefit of the dealers. . . . This is a far cry from *Container*, where the price information was sought solely for the benefit of the manufacturers. . . ."), exactly the opposite is true in this case.

In sum, we conclude that the evidence concerning the appellees' pre-Container activities is sufficient, when considered together with the evidence concerning pricing patterns, to support an inference of an agreement to stabilize prices. If anything, **[*453]** the pre-Container contacts are stronger evidence of conspiracy than the price dissemination practices discussed above in Section III-B. Accordingly, on remand the district court must consider whether the statute of limitations has been equitably tolled. Furthermore, even if the statute has not been tolled, we think that the pre-Container evidence is nonetheless relevant in helping to establish the appellees' intent and purpose in disseminating, during the post-Container period, information concerning dealer tankwagons and levels of dealer support and assistance.

Finally, as with the price dissemination practices, **[**65]** permitting an inference of conspiracy from direct competitor contacts will not have significant anticompetitive effects. Appellees have alleged no pro-competitive rationale for their behavior that easily could not be achieved through other means. *See* discussion in III-B-1 and III-B-2 *supra*. Moreover, given that appellees have largely abandoned the practice already there is no reason to believe that allowing the inference now will have any significant economic impact. Thus, we find that the inference of a conspiracy to stabilize prices is permissible under *Matsushita*.

2. Post-Container contacts

The appellants point to a number of items of evidence which they claim indicate that direct verbal contacts concerning pricing continued to occur after the decision in *Container*. In their intitial pretrial brief below, the appellants asserted that although such contacts were reduced after *Container*, they were not eliminated, and they remained an important supplement to the alternative methods of data dissemination that were "tried and perfected" in the post-Container period.

The appellants refer to several instances of direct evidence of competitors contacts after **[**66]** *Container*, some of which concededly involved discussion of price information, and others of which the appellants claim support an inference that prices were discussed. For example, the appellants point out that J. F. Rogers testified that, while he was a pricing manager with ARCO in 1971, he spoke with E. H. McGee of Mobil on a few occasions in order to confirm Mobil's dealer allowances. Rogers also stated that he called McGee on "a couple of occasions" in 1971 in order to confirm preliminary field reports he had received from ARCO employees to the effect that Mobil had withdrawn dealer support and restored its prices. The appellees attempt to belittle this evidence by suggesting that Rogers was a "low-level" employee and by pointing out that he did not report his contacts with McGee to his superior at ARCO, Mr. Douglas.

With regard to the appellees' contention that Rogers was too low-level an employee to be of significance, we see no reason for concluding that such information gathering cannot be delegated to subordinates. Accordingly, the fact that Rogers did not himself have authority to make ARCO pricing decisions is not dispositive. At any rate, an argument concerning the **[**67]** relative significance of Rogers' testimony in light of his position in ARCO's overall chain of command seems more appropriately addressed to a jury than to a summary judgment court. Furthermore, examination of Rogers' testimony indicates that although he claimed that he did not tell Douglas the source of his information concerning restorations, Rogers testified that he did convey to Douglas the substance of the information obtained:

> Q. Did you report to Mr. Douglas in these instances that you had received confirmation from McGee that Mobil had restored?
>
> A. No, sir.
>
> Q. Why not?
>
> A. Well, I -- I didn't think it was necessary for one thing. I -- I could -- I could report that Mobil had -- had restored and I -- and I'd already had a preliminary field report, so I was comfortable in reporting it to him a few hours earlier than I would have otherwise.

Rogers claimed that these contacts only shortened by "a few hours" the time in which he could report a Mobil restoration, suggesting that the significance of such contacts was of negligible importance. **[*454]** However, a memorandum written by Rogers to Douglas in late 1971 suggests that such contacts were an **[**68]** important means of verifying or ascertaining whether Mobil was restoring its prices. In the memorandum, Rogers noted that "even though Mobil announces a restoration, it is often times hard to detect because of rent considerations which are reflected in lower street prices."

The appellants also noted in their pretrial brief that McGee testified that he discussed Mobil's distributor discounts with Herbert Wetzler at some point after the early 1970s. McGee stated that he knew that Wetzler wanted such information as a pricing consultant, although he also stated that he did not know for whom Wetzler was consulting. The record indicates that Wetzler was a consultant for Union beginning in late 1971 and lasting throughout the 1970s, and that he also did some consulting work for Lerner Oil Co., Powerine Oil Co., and the Lundberg Surveys. In addition to the conversations with McGee, Wetzler testified that he spoke with Frank White of Mobil concerning general "market intelligence." Wetzler also testified that, although he did not have a specific recollection, he may have discussed some retail prices with Nerheim after *Container*. Wetzler stated that his understanding of *Container* was **[**69]** that, although he and Nerheim could not discuss their own companies' prices or future prices of any sort, they could discuss past or present prices of other competitors. Although, as the appellees note, Nerheim denied having such conversations, we are required to view the evidence in the light most favorable to the appellants.

The appellants also point to a memorandum from V. T. Chamberlain to Mr. McGee, which described the results of a Mobil survey of competitor publication practices in the Phoenix area. The memorandum states that pricing information "is available at the Texaco plant here in Phoenix." An asterisk is penciled in after the word "the" in this sentence, and the following handwritten comment appears in the margin under a corresponding asterisk: "Not Posted but available on pers. req." One could reasonably infer from this statement that Texaco continued to respond to direct personal requests for dealer price information. Indeed, the appellees' only response to this contention is to argue that any such provision of information by Texaco was innocent because the information provided was "public." For the reasons outlined in Section III-B-1, *supra*, this argument is unavailing.

[70]** Lastly, the appellees claim that these items of evidence are too "anecdotal" and fragmentary to support a broad inference of conspiracy of the sort alleged here. Were these items of evidence standing alone, we might be inclined to agree. At the very least, we note that the appellants' evidence of direct competitor contacts is substantially less impressive for the post-Container period than for the pre-Container period. Nonetheless, we conclude that, in light of the evidence concerning the appellees' shift to different methods of price data dissemination and the evidence indicating similar patterns of price restorations during the pre- and post-Container periods, this evidence supports the appellants' limited claim that direct competitor contacts remained an occasional, although less frequently employed, method of circulating information concerning dealer discounts and supported price levels. [17] **[**71]** Indeed, some of the items discussed above are examples of *direct* evidence of such contacts. As such, we are not free to discredit them on summary judgment. *McLaughlin, 849 F.2d at 1207-08*. [18]

[*455] The appellants also claim that the existence of direct verbal contacts after *Container* may be inferred from various items of evidence which they claim indicate that the appellees had advance notice of price changes. In particular, the appellants point to a log kept by W. B. Lovell, a pricing clerk for Standard. The log contains several entries indicating that on a number of occasions Lovell was aware of restoration moves in advance of their effective date. In addition, an ARCO memorandum from Rogers to Douglas indicates that ARCO had obtained advance information concerning **[**72]** Shell's dealer aid levels from "always reliable sources."

The district court considered this evidence to be of little value because it did not disclose the manner in which Standard had obtained such information. *Petroleum Prods., 656 F. Supp. at 1301*. For example, the July 26, 1971 Lovell log entry stated that "Ag Nerheim called to inform us of the possibility of Shell returning to normal effective opening of business 7-27-71. Have field watch closely and report any movement to him." The district court noted that "we do not know where Mr. Nerheim got his information concerning Shell's impending move," but, in light of the fact that Shell dealers would have been notified of the move in advance, the district court speculated that "it may be that Mr. Nerheim saw a Shell dealer changing his price posting sign." *Id.* The appellants argue that this sort of speculation defies summary judgment law by failing to view the evidence in the light most favorable to the nonmovant. The appellees contend that the district court merely recognized that, under *Matsushita*, such evidence was insufficient to support an inference of conspiracy.

We appreciate the district court's **[**73]** concern over the absence of any evidence indicating the source of this sort of advance information. As the court correctly noted, it is possible that such information might have been obtained through innocent means, such as the direct observation of retail price changes at individual competitive stations. This concern is especially appropriate where, as here, the record indicates that the appellees regularly conducted surveys of the pump prices at competitive stations. Accordingly, were such evidence standing alone, we would be inclined to agree with the district court that, under *Matsushita*, this evidence does not support an inference of conspiracy. To allow an inference of agreement from such evidence, standing alone, would have the effect of deterring competitors from obtaining information about other companies' actual retail prices, even through legitimate means. We can think of few inferences that would have a more undesirable distorting effect on market conduct. For this reason, as we found with the pricing pattern evidence, this advance notice information may not serve as proof of an antitrust violation without further evidence that is sufficiently unambiguous and tends **[**74]** to exclude the possibility that the appellees acted lawfully. In the present case appellants have proffered such evidence. Given the other items of evidence that we have already described, we perceive no *Matsushita* problem in permitting the jury to draw a reasonable inference that this advance knowledge was acquired through what are in this case less innocent data dissemination techniques, namely direct competitor contacts or public posting or advance public announcement.

3. Contacts with independent marketers

Finally, the appellants rely upon a number of items of evidence which they contend indicate that the appellees used direct contacts in order to coordinate their activities with the independent segment of the market. [19] For example, the appellants presented testimony indicating that Paul Erdos, an officer of the Serve Yourself & Multiple Pump

---

[17] As we found with the evidence of direct competitor contact in the pre-Container period, we also perceive no *Matsushita* problem in permitting an inference of conspiracy in the post-Container period for the same reasons. *See* vSection III-C-1 *supra*.

[18] We note, however, that this evidence is direct evidence only of limited competitor contacts specifically described. It requires an additional inference to conclude that the existence of such contacts indicates the existence of other, undisclosed competitor conversations. As noted above, we conclude that, considered in the context of the other evidence in this case, such evidence does at least support a permissible inference that a number of the appellees continued to engage in occasional competitor contacts.

[19] We note, however, that no independent oil company is presently a party in this action.

Association ("SYMPA"), an organization of independent gasoline dealers, had conversations with officials of a number of the appellees concerning various pricing matters. Erdos testified that, during the pre-Container period, he had conversations concerning dealer tankwagons **[*456]** and wholesale prices with employees of several **[**75]** of the appellees. Charles Temme of ARCO also testified that during the 1960s Erdos provided information concerning upcoming restoration attempts and that Erdos urged ARCO's support. The evidence also indicates that during the post-Container period Erdos continued to obtain information concerning dealer tankwagons, either from direct personal contacts, postings, or the trade press. Thus, James Carbonetti of Mobil stated that, during the second half of the 1970s, he provided Erdos with information concerning Mobil's posted tankwagon prices. [20] Erdos also contacted members of the trade press in order to confirm changes in dealer tankwagon levels. Finally, the appellants have produced evidence indicating that Erdos sometimes complained directly to oil companies concerning their dealers' pricing practices.

[76]** The most significant evidence of a connection between the major oil companies and the independents comes from the testimony of Kenneth Galligan, an official with Powerine Oil Company. Galligan testified that he and other Powerine officials had a number of conversations with Herb Wetzler of Gulf concerning the independents' pricing. For example, Galligan stated that, shortly after he joined Powerine in 1969, he and several other Powerine officials spoke with Wetzler, who told them that it would benefit everyone if the independents could be "priced and moved as a group," much as the majors had been able to coordinate their pricing.

Galligan also testified that he had other meetings with Wetzler during the period from July 1970 to September 1971. Galligan stated that the purpose of those meetings was to "gain [Wetzler's] cooperation in getting commitments from major oil companies who retailed gasoline in the markets [in which Galligan operated]," and "to arrange with [Wetzler] and establish with him the prices to which those companies would move to on specific dates prior to the time the restoration was made at service station level." Galligan testified that Wetzler told him **[**77]** that "a specific oil company would move its tank wagon price to support a retail price . . . in certain areas on certain dates." It should be noted, however, that Galligan testified on cross-examination that he had no personal knowledge concerning whom Wetzler contacted or which majors he contacted. He testified to the same effect on direct examination, stating that Wetzler refused to tell him.

Galligan also testified that he contacted Herb Wetzler, Paul Erdos, and several non-major oil company executives concerning a proposed schedule for a retail price increase in October 1970. In particular, Galligan spoke to Wetzler, who told Galligan that the majors had told Wetzler that if there were any difficulties with the price move, Galligan should wait until Wetzler had had a chance to straighten it out. The following week, Wetzler and Erdos spoke to Galligan and confirmed that the price move had been successful.

Galligan also testified concerning conversations with majors other than Gulf. For example, Galligan testified that, sometime between 1969 and July 1970, he overheard several conversations between Jack Keane of Powerine and Nerheim of Standard. Galligan testified that Keane **[**78]** and Nerheim discussed retail price hikes among independents, and Keane would ask Nerheim what he thought of a particular proposal. Nerheim would usually respond by first saying something like "As you know, Jack, we don't get into that," and then saying something that would indirectly indicate approval such as "That might be a good idea" or "The weather looks good." Galligan also stated that he overheard Keane and Nerheim discussing the schedule whereby the oil companies would restore retail prices. In one case, Standard would go first and Shell second, while in another Standard went first and Mobil second. Galligan testified that he instructed Keane to make these calls in order to confirm information he had received from Wetzler and Erdos **[*457]** concerning when Standard stations would restore their retail prices. After Keane had made one such call, Galligan and Keane discussed what had taken place during the call. Galligan stated that he and Keane concluded that "Wetzler's information that Standard was committed was true."

In addition, Galligan testified that Keane had received confirmation of Mobil's participation in a restoration directly from a Mobil marketing manager. Furthermore, **[**79]** Galligan testified that the person in charge of retail pricing in

---

[20] During this period, Erdos was paid by Mobil for conducting surveys concerning wholesale prices in the independent market.

Los Angeles for Shell Oil Company committed in advance to retail price restorations. Galligan's information on this score was based on what he was told by Erdos and Wetzler.

In addition to this testimony concerning contacts between the independents and the major oil companies, the appellants presented other evidence concerning contacts among the independents themselves. This evidence indicates that Erdos was involved in coordinating the responses of independent dealers to restoration attempts by the appellees. For example, several memoranda prepared by Newton Carey, a general manager for the independent oil company Simas Brothers, summarized a number of phone calls that Carey received and made to other independents. Several of these calls, including a number involving Erdos, concerned price changes among the independents after major oil company restorations. Many of the calls appear to have involved quite blatant price-fixing activity. Thus, Carey's October 12, 1970 memorandum to Mr. Simas states that "I phoned Mr. Erdos and asked him about getting those Douglas stations up in the El Cerrito area. He said that he would **[**80]** phone."

Furthermore, Galligan testified that, while at Powerine, he asked Erdos on numerous occasions to contact competitors, both major and independent, to see what their reaction would be to a proposed retail price restoration. Erdos would get a commitment from these competitors before the restoration took place. Galligan also stated that Powerine would never restore its prices unless it had a prior commitment from the "vast majority of major oil companies."

Other portions of Galligan's testimony are to the same effect. Galligan stated that Erdos was frequently a source of advance information concerning various companies' participation in price increases, although most of the time Galligan got this information indirectly through Keane or Wetzler. Galligan stated that Erdos' job was to "get people in line for future pricing," and after the price increase had taken effect, to threaten noncomplying dealers that they had better participate or they would face retaliation from their suppliers.

We have little difficulty concluding that, if admissible, this testimony is sufficient to permit a jury to conclude that representatives of several of the appellees were involved in activities **[**81]** designed to assure that the independent sector of the market would follow restoration attempts, and that several officials of independent companies engaged in direct price-fixing with one another in order to produce such coordination. The appellees, however, argue that there are a number of evidentiary problems in Galligan's testimony and that, without this testimony, the appellants do not have sufficient evidence to establish a link between the independent market and the appellees. For several reasons, the district court agreed with the appellees. First, the court concluded that most of Galligan's testimony was irrelevant or immaterial. Second, the court also concluded that most of the testimony was hearsay. Third, the court noted that Galligan's testimony had been challenged "by every other relevant witness" and that Galligan had been "substantially discredited." *Petroleum Prods., 656 F. Supp. at 1302-03*. In reaching these conclusions, however, the district court did not focus upon any specific portions of Galligan's testimony; the court simply rejected it in a wholesale fashion.

In light of our above discussion of certain specific portions of Galligan's deposition, **[**82]** we have little doubt that such testimony is relevant and material to the issues in this case. The hearsay issue, however, is somewhat more difficult. We note that **[*458]** much of the information provided by Galligan consists of out-of-court statements of third parties. As such, the statements initially appear to fit within the definition of hearsay specified in *Fed.R.Evid. 801(c)*. Upon closer analysis, however, we conclude that each of the statements qualifies as nonhearsay under either *Rule 801(d)(2)(D)* or *Rule 801(d)(2)(E)*.

Rule 801(d)(2)(D) ***HN9***[] provides that a statement made by a party's agent or servant may be introduced against that party if it concerns a matter within the scope of the agency or employment and was made during the existence of the relationship. We conclude that this exception applies to Wetzler's various statements that Gulf would support retail price restorations. Wetzler was Gulf's marketing director, and the statements are therefore related to a matter within Wetzler's scope of employment. We reach this conclusion despite the fact that the appellees point out that Wetzler **[**83]** testified that he did not have authority, on his own, to raise Gulf's prices whenever he wanted to do so. First, we note that Wetzler testified that he was responsible for gathering "market intelligence" for his superiors and that he acted as a liaison between top Gulf management and the field with respect to "price changes approved by top management [or] initiated in the field." In light of these duties of Wetzler, it seems clear that the statements that Galligan claims Wetzler made are related to a matter within his scope of employment. Second, in light of the fact that the Supreme Court has held that ***HN10***[] under *Fed.R.Evid. 104(a)* an out-of-court statement may be considered by the court in making the preliminary factual determinations concerning admissibility of statements under *Rule 801(d)(2)(E)*, *see* *Bourjaily v. United States, 483 U.S. 171, 177-81, 97 L. Ed. 2d 144, 107 S. Ct. 2775 (1987)*, we conclude that Wetzler's out-of-court statements may themselves be considered in determining the preliminary question, under *Rule 801(d)(2)(D)*, of the scope of Wetzler's employment duties. **[**84]** Since the statements clearly indicate an ability to communicate information on behalf of Gulf, we conclude that, considering all of the evidence, Wetzler's statements concerned a matter within the scope of his employment.

In light of this conclusion, no further showing is required to admit these statements against Gulf. *See* *United States v. Ramsey, 785 F.2d 184, 191* (7th Cir.) (***HN11***[] statements admitted under *Rule 801(d)(2)(D)* may be used to prove conspiracy without any showing that the existence of the conspiracy is corroborated by independent, nonhearsay evidence), *cert. denied*, *476 U.S. 1186, 106 S. Ct. 2924, 91 L. Ed. 2d 552 (1986)*; *see also* *United States v. Cross, 816 F.2d 297, 302 (7th Cir. 1987)* (same). Similarly, Nerheim's statement that Standard was committed to a retail restoration is admissible against Standard. None of these statements is admissible against the other defendants, however, unless they meet the requirements of *Rule 801(d)(2)(E)*, which relates to statements of a coconspirator.

[85]** *Rule 801(d)(2)(E)* ***HN12***[] provides that a statement made by a co conspirator of a party may be introduced against that party if the statement was made during the course, and in furtherance, of the conspiracy. The numerous instances wherein various third parties assertedly told Galligan that certain defendants had agreed to price restorations would appear to be prime candidates for this exception from the definition of hearsay. As noted above, Galligan's testimony included evidence of the following statements: Wetzler said Standard was committed to a particular restoration; Nerheim said that on particular occasions Shell and Mobil were committed; Erdos and Wetzler said Shell was committed to a particular increase.

HN13[] Before these statements can be admitted, however, they must meet all of the prerequisites of *Rule 801(d)(2)(E)*. Specifically, the party seeking to introduce the statement must show, by a preponderance of the evidence, that "there was a conspiracy involving the declarant and the nonoffering party, and that the statement was made 'in the **[**86]** course and in furtherance of the conspiracy.'" *Bourjaily, 483 U.S. at 175*. **[*459]** Although a judge may consider the statements themselves in deciding whether these prerequisites have been met, *see* *id. at 177-81*, the offering party must present "*some* evidence aside from the proferred co conspirator's statements [to] show that the [nonoffering party] knowingly participated in the alleged conspiracy." *United States v. Silverman, 861 F.2d 571, 577 (9th Cir. 1988)*; *see also* *United States v. Gordon, 844 F.2d 1397, 1402 & n. 2 (9th Cir. 1988)*. Moreover, in *Silverman* we defined the character of the additional evidence: "Evidence of conduct that is completely consistent with defendant's unawareness of the conspiracy" cannot serve as corroborating evidence under *Rule 801(d)(2)(E)*. *Silverman, 861 F.2d at 578*.

In the antitrust context the *Silverman* requirement can be met if the circumstantial evidence offered in addition to the co-conspirator's statements is adequate to defend against summary judgment under *Matsushita*. Under *Matsushita* in order to survive summary judgment on **[**87]** the basis of circumstantial evidence alone, a plaintiff must offer evidence that is consistent with an inference of illegal conduct and permitting that inference must not be significantly harmful. This requirement comports with the *Silverman* mandate against allowing "wholly innocuous conduct" alone to serve as proof of conspiracy. *Id.*

In the instant case, the press releases, price postings and evidence of competitor contacts previously discussed provide evidence of a conspiracy aside from Galligan's statements. Since we have concluded earlier that appellant's evidence is sufficient to survive summary judgment under *Matsushita*, the appellants have met their burden of producing *some* evidence apart from Galligan's testimony that indicates the existence of conspiracy.

The remaining question, then, is whether this evidence along with Galligan's statements are sufficient to show, by a preponderance of the evidence that there was a conspiracy. Viewing the evidence in the light most favorable to appellants, we find that there is sufficient evidence to conclude, for purposes of *Rule 801(d)(2)(E)*, that the appellees were co conspirators. [21] The statements are therefore admissible **[**88]** against all defendants under *Rule 801(d)(2)(E)*.

Finally, we reject the district court's suggestion that Galligan's testimony could be disregarded because it had been "substantially discredited." *Petroleum Prods., 656 F. Supp. at 1303*. It is well-established that ***HN14***[] "credibility determinations . . . are jury functions, not those of a judge, whether he is ruling on a motion for summary judgment or for a directed verdict." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. **[**89]** The two cases cited by the district court, *Mesirow v. Pepperidge Farm, Inc., 703 F.2d 339, 344* (9th Cir.), *cert. denied*, *464 U.S. 820, 78 L. Ed. 2d 93, 104 S. Ct. 83 (1983)*, and *Radobenko v. Automated Equip., Corp., 520 F.2d 540, 543-44 (9th Cir. 1975)*, do not support its conclusion. *Mesirow* and *Radobenko* dealt with the narrow situation where the only material issue of fact was created by a party's own directly contradictory affidavits or deposition testimony, given during the course of the same litigation. In *Mesirow* and *Radobenko*, we held that, under those narrow circumstances, the party's conflicting statements do not create a genuine issue of material fact. In the present case, by contrast, Galligan is not a party, and he has not given flatly contradictory testimony during the course of this litigation.

Since Galligan's testimony is admissible for summary judgment purposes against all of the appellees, we conclude that his testimony, considered along with the other evidence discussed in this subsection, **[*460]** is sufficient to create a jury question as to whether the appellees, as part of their efforts **[**90]** to coordinate their own prices, also sought to assure that the independent oil companies would coordinate their pricing behavior. [22]

IV. APPELLANTS' CLAIMS OF A CONSPIRACY TO RESTRICT SUPPLY

In the proceedings below, the plaintiffs also alleged that the defendants engaged in a conspiracy to restrict the supply of crude oil and refined petroleum products. The plaintiffs claimed that the defendants' efforts to restrict supply culminated in the August 1972 "restoration to end all restorations." That is, after August 1972, price cycling stopped; from that point forward the pressure created **[**91]** by supply shortages was sufficient to keep prices at their restored "normal" level, and indeed, in 1973 retail prices began a steady climb as supplies continued to prove inadequate to meet growing demand. The district court, however, concluded that the plaintiffs had failed to produce sufficient evidence to support their claims of a conspiracy to restrict supply, and it therefore granted summary judgment to the defendants.

On appeal, the appellants assert that they produced sufficient evidence to permit a jury to conclude that the appellees agreed to engage in various activities designed to reduce the domestic supply of petroleum products. They contend that, as part of this conspiracy, the appellees agreed to exchange information concerning actual production levels, expected future demand, and expected supply projections. The appellants also assert that, as part of the same plan, the appellees conspired to reduce the amount of crude oil lifted overseas and shipped into the United States. We will consider each of these contentions in turn.

A. *Domestic Activities*

The appellants have produced evidence indicating that by the early 1970s several of the appellees had come to the **[**92]** conclusion that excess production was a key factor in creating price wars. As the district court noted, "the files of several of the defendants contained in-house memoranda that expressed dissatisfaction with the practice by

---

[21] We are *not* deciding the greater question of whether there was a conspiracy to fix prices. Nor are we deciding whether Galligan's testimony should be admitted during trial. When the lower court judge makes that decision he will not be viewing appellant's evidence from the same procedural posture. We simply are deciding the very narrow issue of whether the court can consider Galligan's testimony for the purposes of summary judgment on the discrete issue of independent dealer contacts.

[22] Because there is direct evidence of defendant's efforts to coordinate pricing with the independent segment of the market, the *Matsushita* standards for summary judgment do not apply to this evidence. *McLaughlin, 849 F.2d at 1207*. We simply decide whether there is a genuine issue of material fact. *Tzung v. State Farm Fire and Casualty Co., 873 F.2d 1338, 1339-40 (9th Cir. 1989)*.

their respective employers of producing so much gasoline that they were obliged to sell the surplus to independents, who, in return, competed with the sellers at reduced prices." Petroleum Prods., 656 F. Supp. at 1307. The appellants also produced evidence indicating that several of the appellees had begun thinking that it would be better to eliminate this excess production, but that they also recognized that this could not be accomplished without some sort of joint action. For example, in commenting on the National Oil Jobbers' Council's recommendation that "excess" production be eliminated, a 1971 internal Shell memorandum remarked: "good thought -- how accomplish short of collusion." An earlier May 1971 Shell memorandum had reached a similar conclusion:

> If the wholesale price of gasoline moves up commensurate with the current and anticipated crude price increases and *refinery operations are geared to maintaining such increased wholesale* **[**93]** *prices*, then cut-price marketers will have to raise their prices proportionately. . . . [This alternative] involves one refiner after another acting in statesmanlike fashion.

(emphasis added).

The appellants contend that the appellees reached an agreement or understanding to restrict supply in this fashion in part by means of an exchange of information concerning projected supply and demand. In this regard, we note that the record indicates that several of the appellees did in fact occasionally obtain information, sometimes through direct personal contacts, concerning supply and demand forecasts and **[*461]** production levels. For example, a May 1972 Mobil memorandum summarized the aggregate crude oil demand forecasts of several competitors, including appellees Mobil, Exxon, Texaco, Gulf, and Shell. The memorandum indicated that the information had been obtained from a variety of sources, including direct competitor contacts. The memorandum noted that "in several cases we were able to get quite specific volume figures by area from direct contacts." In most of the other cases, the information had been obtained from press releases, public statements, or annual reports, **[**94]** and in many of these instances, Mobil was "able to render [the figures] more precise by checking them out with people we know inside the companies." The exchange of supply information among the appellees is further indicated by the fact that ARCO had in its files a copy of a detailed summary of supply and demand forecasts that had been prepared by Union.

In addition, the appellants produced a June 1972 Mobil memorandum reporting the results of direct competitor contacts with officials of Texaco, Exxon, and Gulf concerning sour crude production capabilities. The memorandum indicates that the competitors had provided fairly detailed information concerning refinery processing levels. Although, as the appellees note, the memorandum indicates that the information was obtained for the purpose of buying and selling crude oil, one could reasonably conclude that the detail of the information obtained exceeded that which was necessary for this purpose.

The appellants also presented evidence indicating that the appellees were able to obtain detailed competitive information concerning supply by participating as observers at meetings of the Independent Petroleum Association of America ("IPAA"). **[**95]** For example, a memorandum in Standard's files contained an IPAA chart listing the supply projections made by several different oil companies. The chart lists, for each quarter of 1970, the supply projections for several different types of petroleum products. Although the chart "anonymously" labels each company by a code letter, the Standard copy has the names of the various companies handwritten along the top of the chart. The companies listed include Union, Getty, and Shell. The record also indicates that Standard itself submitted supply projections for 1970 to the IPAA.

The record also reveals that ARCO obtained similar IPAA supply forecasts for the year 1971. ARCO's 1971 chart, like Standard's 1970 chart, contains additional notations indicating which companies made which forecasts. The cover memorandum accompanying the chart states that this information is valuable because "the exact expectations of 8 oil companies and 2 banks are revealed in detail." The memorandum also noted that, although most majors did not formally participate in IPAA activities, "most are present as observers to receive the materials and to contribute to the discussions. This includes even the usually highly **[**96]** reticent Texaco."

We also note that the appellants have produced an Exxon memorandum from August 1972 (the month that price cycling ended) indicating that Exxon had contacted a large number of oil companies in order to determine their crude oil supply situation. The memorandum contains a chart summarizing the information obtained as a result of these contacts. Among the companies whose supply information is listed are ARCO, Standard, Getty, Gulf, Mobil, and Shell. The information obtained indicates that most of these companies expected to experience supply shortages during the remainder of 1972.

In response to this evidence, the appellees raise two arguments. First, they contend that these exchanges of information were "innocuous" and that no inference of conspiracy can be drawn from them. This argument cannot be squared with the Supreme Court's holding that, under certain circumstances, the exchange of production and supply information may supply "an attractive basis for cooperative, even if unexpressed, 'harmony' with respect to future prices." *American Column & Lumber Co. v. United States, 257 U.S. 377, 398, 66 L. Ed. 284, 42 S. Ct. 114 (1921)*; *see also* **[**97]** Sullivan, *Antitrust* **[*462]** § 97 (1977) (Data as to production figures "can be used to police production quotas imposed by a cartel or, in an oligopolistic structure, can facilitate interdependent action in reducing output.") *American Column & Lumber* teaches that production and supply data dissemination cannot be treated as categorically different from price information exchanges. Accordingly, application of the principles of *Container* in the supply data context suggest that an agreement to exchange supply and production information may, under appropriate circumstances, serve as circumstantial evidence of an agreement to restrict supply and raise prices. We think that, in light of the evidence concerning the appellees' intent to stabilize the market by reducing excess capacity, *see infra*, an inference of conspiracy drawn from the appellants' evidence of supply data exchanges is plausible.

Second, the appellees argue that the shortages experienced during 1972 and 1973 were real, and that their production facilities operated at "record levels" during this period. In particular, the appellees point out that their refineries were operating at the "maximum sustainable **[**98]** rate." The appellants do not dispute this latter point; instead, they claim that the appellees deliberately chose not to expand refinery capacity and that they did so in order to create a shortage.

In support of this claim, the appellants produced evidence indicating, for example, that Standard chose not to expand refinery capacity, despite long-range forecasts of a shortage. Similarly, an Exxon employee based his conclusion that Exxon's refining capacity was sufficient on the assumption that sales of gasoline to the independents would be curtailed. A Shell official reached a similar conclusion that a "conservative" program of refinery expansion would avoid "throwing surplus products into the market place." Furthermore, as the district court noted, *see* *Petroleum Prods., 656 F. Supp. at 1307*, an Exxon study committee recommended that refining capacity not be expanded until "forecasts show large and growing shortages for at least two years prior to the onstream time of the expansion." Other items in the record further indicate the appellees' concern with the problem of spare capacity. For example, a 1971 Exxon memorandum noted that Exxon considered the "spare capacity **[**99]** problem to be the single most important problem facing the refining segment of our business over the next several years." Finally, the appellants produced evidence indicating that the resulting "lull in domestic refining capacity construction" contributed to tight supplies and upward pressure on petroleum prices. As one September 1972 Shell memorandum put it, "the current shortage being proclaimed is more apparent than real. Refining capacity has merely moved from a 'long' supply position to what could be characterized as a 'balanced' position. . . . It just feels 'tight' to some people who have been used to a 'long' situation for a number of years."

The district court, in ruling on the motion for summary judgment, simply accepted the defendants' explanations for the shortage and for the lack of refinery expansion. With respect to the failure to expand refinery capacity, the court noted that the cost of constructing refineries had gone up, that environmental litigation was a concern, that it was hard to estimate how much refinery capacity was necessary, and that price controls were a disincentive to further expansion. *Petroleum Prods., 656 F. Supp. at 1307-08*. **[**100]** With respect to the shortage, the court blamed it mostly on increasing demand. The court asserted that demand had increased due to various factors, such as more people driving and the increasing number of cars with air conditioning and power-operated features. *Id. at 1308*. The court finally concluded that the evidence showed "quite clearly" that the defendants' actions were the result of independent decisions. *Id. at 1309*.

We think that the district court misconceived the nature of its task under *Matsushita*. As noted earlier, *Matsushita* does not authorize the district court to weigh the evidence and decide which inference is the more plausible one; so long as a particular inference is plausible and permissible under *Matsushita*, it is for the jury to decide **[*463]** whether to draw it. *Matsushita, 475 U.S. at 587-88*. The district court in this case appears simply to have adopted one of two competing theories of the evidence. *Matsushita* does not authorize this sort of resolution, on summary judgment, of disputed issues of fact.

Appellants have offered a plausible conspiracy theory. The evidence supports the **[**101]** conclusions that (1) in the early 1970s several of the appellees began taking steps to reduce excess capacity; (2) they did so with the intent and effect of reducing the strength of the independent sector of the market; (3) during this period the appellees exchanged information concerning supply forecasts and production levels, and (4) the shortage of refining capacity, as well as the foreign activities of several of the appellees (discussed below), resulted in supply shortages and upward price pressure. Most significantly, however, it seems clear that these objectives could only be achieved if all others performed similar actions. A single company reducing output would lose market share and sales. Only if all the companies reduced supply would the price rise enough to increase profits. The risk involved in leading a supply reduction suggests that purely interdependent supply decisions are unlikely. Changes in refinery capacity are not readily reversible. Once a company is committed to reducing its capacity it cannot easily recover if the other companies do not follow its lead. Thus, it is unlikely that a firm would undertake a reduction in its refinery capacity without some advance **[**102]** agreement from competitors. It is in this context that the exchange of supply and demand forecasts must be considered. We think that, viewing all of this evidence, a rational jury could conclude that the appellees had agreed to exchange supply and demand forecasts in order to facilitate mutual decelerations of increases in production capacity.

This does not settle the matter, however. The question remains whether permitting an inference of conspiracy from the evidence that the appellants have produced would have the effect of deterring important independent conduct. We conclude that it would not. As we stated previously, appellants have offered evidence that the exchange of information followed by shortage was accompanied by appellees' actions to reduce excess capacity, appellees' anticompetitive intent, the actual reduction in the independent sector, and appellees' recognition of the need for parallel action. Appellants have also offered evidence of market conditions in which interdependent supply decisions are unlikely. Although an inference of conspiracy could not permissibly be drawn *solely* from the exchange of supply forecasts followed by a shortage, we can conceive of no **[**103]** significant procompetitive behavior that will be deterred by permitting an inference of conspiracy when the combination of actions and intent described above occurs. [23]

[104]** B. *Foreign Activities*

The appellants also contend that, as part of the alleged conspiracy to restrict supply, the appellees agreed to restrain Middle East production of petroleum products. In support of this contention, the appellees point to a number of items of evidence indicating that the appellees engaged in discussions about how to keep supply pressures under control. For example, in response to the problem of spare capacity in Iran, the five American majors (Exxon, Gulf, Texaco, Mobil, and Standard) who **[*464]** owned shares of the Iranian Consortium ("IOP") agreed in 1968 that in deciding upon planned capacity targets, the group should be careful not to rely simply on their own estimated needs inasmuch as this procedure might result in capacity figures being set too high. As a memorandum distributed among the five companies indicated:

---

[23] Unlike the tankwagon price information discussed earlier, petroleum supply and demand information is important to a number of actors in the economy, and courts should hesitate to permit inferences of conspiracy based on the exchange of supply information alone. Such an inference will not have a negative deterrent effect, however, when it is based on the combination of actions and intent in this case. For example, while it might have harmful anticompetitive effects to allow an inference from the exchange of supply forecasts alone, it might not be harmful to allow that inference from supply forecasts and actions to reduce capacity and evidence of anticompetitive intent. Companies who were innocently distributing supply information would be unaffected by an antitrust rule that only prohibited the exchange of supply forecasts when accompanied by actions to reduce excess capacity and evidence of anticompetitive intent. Thus, permitting the inference in this case will not have an undue deterrent effect on the proper dissemination of petroleum supply and demand information.

> Members should [review] the IOP weighted figures to be sure that growth rates in planned capacity are consistent with annual growth rates generally expected for demand, rather than relying solely on the composite of individual Member estimates for each forward year. In this regard it should be appreciated that small changes **[**105]** in growth percentages lead to plans for rather large capacity additions several years forward.

The record also indicates that the IOP members jointly agreed to resist the Shah of Iran's efforts to get IOP to increase available capacity.

The record also contains evidence indicating that the owners of Aramco (Exxon, Standard, Mobil, and Texaco) held a two day meeting aimed at arriving at a response to Saudi Arabian complaints that their oil liftings were not keeping pace with those of other countries such as Iran. During the course of these discussions, Texaco proposed that, if the other IOP owners who were also owners of Aramco would do likewise, it was willing to reduce its liftings in Iran in order to improve Aramco's relative position. Although, as the appellees note, Mobil labeled this blatant cartel allocation proposal "ridiculous," "Mobil did state, however, that if [they] had a competitive price in Aramco, they felt it would definitely hold down the growth rate in Iran." Similarly, although Exxon also rejected Texaco's proposal "legally and for other reasons," it also stated that "it would be our policy to have our Iranian liftings so that they could be defensible **[**106]** with our Aramco performance." Other evidence further indicates that the Aramco owners recognized the need to coordinate production levels among Iran and Saudi Arabia in order to alleviate Saudi pressure for increased production.

Finally, we note that the appellants produced evidence indicating that, in connection with these various activities, several of the appellees circulated amongst themselves memoranda containing specific information regarding supply and demand projections for various regions of the world.

The appellees raise a number of arguments in response to this evidence. First, they contend that, because IOP and Aramco "were created or operated with the knowledge and acquiescence of the United States Government," the actions taken by the two consortiums cannot serve as a basis of antitrust liability in this case. This argument is without merit. Even if the President had approved the cartel there is no evidence indicating that he authorized any of the appellees' alleged concerted efforts to hold down the growth of foreign production. [24]

[107]** Second, the appellees argue that each item of evidence upon which the appellants rely does not in fact support an inference of conspiracy. Indeed, they assert that the evidence indicates normal business behavior. Once again, however, we emphasize that ***HN15***[] it is not our task to decide whether we think that an inference of innocent conduct is more plausible than an inference of conspiracy. Rather, our task is to consider whether an inference of conspiracy is plausible and whether permitting such an inference would have the effect of deterring significant pro-competitive conduct. We recognize that it is possible that each IOP owner company independently resisted the increases in production requested by the Shah. However, when considered in the context of their domestic activities with regard to prices and supply, the various actions that the consortium members took in order to control the level of growth in Middle East production plausibly could be construed as part of a conspiracy to restrict supply. In addition, appellees have **[*465]** suggested no procompetitive behavior that would be deterred if plaintiffs were allowed to bring antitrust actions against defendants who undertook the **[**108]** domestic and foreign supply actions alleged in this case.

We conclude that the appellants have presented sufficient evidence concerning their allegations of a conspiracy to create a shortage to warrant submission of the issue to a jury. Accordingly, the district court erred in granting summary judgment on these claims. Furthermore, we note that since the parties agree that the shortage, however caused, led to the elimination of the competitive bidding market in bulk sales to government entities, the appellees may be held liable for this consequence if the jury concludes that they did in fact jointly act to restrict supply.

V. CALIFORNIA'S CLAIM FOR CIVIL PENALTIES

---

[24] Because there is no evidence of the President's approval of the cartel's activities at issue we need not reach the question of whether it is within the powers of the executive branch to convey antitrust immunity through its acquiescence in an overseas consortium.

The State of California also appeals the district court's January 12, 1978 order dismissing California's claim for civil penalties under *Cal.Civ.Code § 3370.1*. [25] The district court concluded that it had no jurisdiction to entertain the claim because to do so would, in its view, have violated the principle that federal courts generally do not enforce the penal laws of the states. *See Wisconsin v. Pelican Ins. Co., 127 U.S. 265, 32 L. Ed. 239, 8 S. Ct. 1370 (1888)*; *The Antelope, 23 U.S. (10 Wheat.) 66, 123, 6 L. Ed. 268 (1825)*. **[**109]**

We disagree with the district court's conclusion. The Second Circuit recently rejected a similar challenge to enforcement, in federal court, of pendent state ***antitrust law*** claims for civil penalties. *New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1086* (2d Cir.), *cert. denied*, *488 U.S. 848, 109 S. Ct. 128, 102 L. Ed. 2d 101 (1988)*. The court noted that, although the ***HN16***[] "federal courts have no jurisdiction to enforce the criminal laws of the states, they do have jurisdiction to enforce state penalties that are civil in nature." *Id.* Since California treats the penalties under *§ 3370.1* as civil in nature, *see People v. Superior Court (Kaufman), 12 Cal.3d 421, 431, 525 P.2d 716, 115 Cal.Rptr. 812, 818-19 (1974)*; *People v. E.W.A.P., Inc., 106 Cal.App.3d 315, 321, 165 Cal.Rptr. 73, 76-77 (1980)*, **[**110]** the district court was not barred from entertaining the claim. *Hendrickson Bros., 840 F.2d at 1086*. Because the district court found this case to be otherwise "ideal" for the exercise of pendent jurisdiction, we reverse its order dismissing California's claim for civil penalties.

VI. CONCLUSION

The judgment of the district court is REVERSED and the case is REMANDED.

End of Document

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > General Overview

HN1[] **Federal & State Interrelationships, State Sovereign Immunity**

The *Eleventh Amendment* long has stood for the principle that federal courts are without authority to entertain suits by private parties against a state or its agencies without the state's consent.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > Federal Judicial Limitations

Constitutional Law > State Sovereign Immunity > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > General Overview

HN2[] **State Sovereign Immunity, Federal Judicial Limitations**

The language of the *U.S. Const. amend XI* provides as follows: the judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by citizens of another state, or by citizens or subjects of any foreign state.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Constitutional Law > State Sovereign Immunity > General Overview

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > General Overview

HN3[] State Sovereign Immunity, State Immunity

The Eleventh Amendment applies to a state agency, functioning as an arm, an alter ego of the state. In determining the status of the state agency, the court must look to applicable state law.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > General Overview

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > General Overview

HN4[] Injunctions, Grounds for Injunctions

The Eleventh Amendment does not bar federal courts from issuing injunctive relief against a state based upon violations of federal law. That relief, if any, may be founded upon violations of federal constitutional or statutory law, but is limited to prospective injunctive relief.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Colleges & Universities

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

HN5[] Higher Education & Professional Associations, Colleges & Universities

States acting in their sovereign capacities are exempt from federal antitrust laws. In order to qualify for antitrust immunity, an entity must demonstrate either that it is the state acting in its sovereign capacity or that it is acting pursuant to a clearly articulated and affirmatively expressed state policy.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > State & Territorial Governments > General Overview

Torts > Public Entity Liability > Immunities > Judicial Immunity

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Colleges & Universities

HN6[] Exemptions & Immunities, Parker State Action Doctrine

It is clear under the Parker immunity doctrine that the legislative and judicial branches of state government act as the state in its sovereign capacity. The court discerns no sound reason for distinguishing state executive agencies from their legislative and judicial counterparts, regardless of whether the executive agencies' particular actions or their anticompetitive effects were contemplated by the legislature.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN7[] **Exemptions & Immunities, Parker State Action Doctrine**

Even the constitutional invalidity of the attempted state activity is not an appropriate basis for disregarding Parker state action immunity.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Colleges & Universities

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > General Overview

Governments > State & Territorial Governments > Employees & Officials

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

HN8[] **Higher Education & Professional Associations, Colleges & Universities**

The *Eleventh Amendment* prohibits the court from enjoining an instrumentality of the state based upon state law, unless the alleged conduct is ultra vires or without any authority whatever.

Business & Corporate Law > ... > Directors & Officers > Management Duties & Liabilities > General Overview

Governments > State & Territorial Governments > Employees & Officials

International Trade Law > General Overview

HN9[] **Directors & Officers, Management Duties & Liabilities**

An ultra vires claim must be founded upon an officer's lack of delegated power. A claim of error in the exercise of that power is therefore not sufficient.

Civil Rights Law > ... > Immunity From Liability > Local Officials > Customs & Policies

Governments > State & Territorial Governments > Employees & Officials

HN10[] **Local Officials, Customs & Policies**

Under Utah law, Utah Code Ann. § 63-30-4(4) (1989), an individual employee of the state may not be held personally liable for acts or omissions occurring during the performance of his duties unless it is established that he acted or failed to act due to fraud or malice.

Judges: [1]** JENKINS

Opinion by: BY THE COURT; BRUCE S. JENKINS

Opinion

[*509] MEMORANDUM OPINION AND ORDER

On September 12, 1988, plaintiff Pharmaceutical and Diagnostic Services, Inc. ("PDS") filed a complaint in this court against the University of Utah, Intermountain Radiopharmacy, the Utah State Board of Regents, and David Bragg, Chairman of the Department of Radiology of the University of Utah (the "University defendants"), [1] seeking declaratory relief and damages for alleged federal and state antitrust violations, unfair competition, and other state law violations. On February 17, 1989, PDS filed a first amended complaint, [2] **[**2]** **[*510]** seeking similar declaratory, injunctive, and monetary relief and adding as defendants additional University officials. [3]

On July 13, 1989, the University defendants filed a motion to dismiss pursuant to *Rule 12 of the Federal Rules of Civil Procedure*. Following the parties' submission of supporting, opposing, and reply memoranda, the court, on November 22, 1989, heard oral argument on the University defendants' motion to dismiss and took the motion under advisement. Having considered fully the pleadings, the parties' oral and written arguments, and the relevant **[**3]** law, the court now grants in most aspects the University defendants' motion to dismiss. PDS's remedy, if any, must be found before a state tribunal.

I. Facts

The relevant facts are straightforward. In 1973, the University of Utah Colleges of Pharmacy and Medicine jointly established a program known as Intermountain Radiopharmacy ("IRP"). The University designed IRP to promote teaching and research. IRP is operated presently as a radiopharmacy, which involves the manufacture and sale of radiopharmaceuticals used in diagnostic imaging and therapeutic application by hospitals, clinics, and other institutions. William Baker operated IRP from its inception in 1973 until 1986. In 1986, Baker left IRP to organize PDS, a Utah corporation which has operated as a privately owned radiopharmacy since January 1, 1987. Baker is now President of and a shareholder in PDS.

PDS alleges in its complaint that IRP does not function primarily as a teaching and research institution. Instead, PDS maintains that IRP operates as a commercial, profit-making enterprise, in direct competition with PDS and in violation of federal and state law and University policy. PDS further alleges that the University **[**4]** defendants compete unfairly and illegally against PDS by using state-owned equipment in furthering IRP's "business," by

---

[1] Throughout this opinion the court uses the term "University defendants" to refer to The University of Utah, Intermountain Radiopharmacy, the State Board of Regents, and all those persons (including David Bragg in his official capacity) named in PDS's first amended complaint who are affiliated with the University of Utah and who are sued in their official capacities.

[2] Throughout the remainder of this opinion, the term "the complaint" refers to PDS's first amended complaint.

[3] PDS's complaint also named as defendants the United States of America, Secretary of the Treasury Nicholas Brady, and Internal Revenue Service Commissioner Laurence Gibbs (the "federal defendants"). PDS sought to enjoin the federal defendants from continuing to grant the University of Utah tax exempt status pursuant to *26 U.S.C. § 501(c)(3)*, or in the alternative, to require the federal defendants to assess and collect taxes allegedly due as a result of the sale of radiopharmaceuticals at a profit. On September 14, 1989, the court granted the federal defendants' motion to dismiss, holding that PDS lacked standing to seek relief against the federal defendants.

refusing to deal with PDS, by offering goods and services at or below cost in violation of state and federal law, and by using illegal and void contracts to compete.

Based upon these allegations, PDS has brought federal antitrust claims against IRP under *section 1* of the Sherman Act, *15 U.S.C. § 1*, and *sections 3* and *16* of the Clayton Act, *15 U.S.C. §§ 14*, *26*. PDS has also brought claims under Utah ***antitrust law***, the Utah Administrative Code, the Utah Unfair Practices Act, and the common law of unfair competition and intentional interference with economic relations.

The University defendants have moved to dismiss PDS's claims on a number of separate grounds, including *Eleventh Amendment* immunity, the Utah Governmental Immunity Act, *Parker v. Brown* antitrust immunity, failure to exhaust administrative remedies, and failure to state a claim. In this opinion, the court grants the University defendants' motion to dismiss based on *Eleventh Amendment* immunity and on *Parker* antitrust immunity.

II. *Eleventh Amendment* Immunity

The University defendants' motion **[**5]** to dismiss hinges primarily on the *Eleventh Amendment to the United States Constitution*. [4] ***HN1***[] The *Eleventh Amendment* long has stood for the principle that federal courts are **[*511]** without authority to entertain suits by private parties against a state or its agencies without the state's consent. *See* *Ford Motor Co. v. Department of Treasury of Indiana, 323 U.S. 459, 462 (1945)*; *Hans v. Louisiana, 134 U.S. 1, 14-15 (1890)*. In their motion to dismiss, the University defendants argue that IRP, the Board of Regents, and other University officials sued in their official capacities are arms of the State of Utah and are thus immune from suit in federal court. PDS concedes the *Eleventh Amendment's* general effect, but insists that the University of Utah is not an arm of the state for purposes of *Eleventh Amendment* immunity. In the alternative, PDS argues that, before passing upon whether the University is an arm of the state, the court should allow further discovery into the nature of the relationship between the University of Utah, the Board of Regents, IRP, and the state.

[6]** As is noted above, both sides agree that the *Eleventh Amendment* generally protects a state from suit in federal court without the state's consent. [5] This court, then, must resolve the specific question whether the University of Utah is "the state" for purposes of the *Eleventh Amendment*. It is well-settled that ***HN3***[] the *Eleventh Amendment* applies to a "state agency, functioning as an arm, an alter ego of the state." *Brennan v. University of Kansas, 451 F.2d 1287, 1290 (10th Cir. 1971)* (University of Kansas is the state for purposes of *Eleventh Amendment* immunity). And in determining the status of the state agency, the court must look to applicable state law. *Id.* Thus, this court looks to Utah law and finds that the University of Utah is an arm of the state for *Eleventh Amendment* purposes.

This court's review of Utah law clearly indicates that the University of Utah **[**7]** should be considered an arm of the state. The statutory foundation upon which the University is constructed gives the state virtually exclusive control over University governance. [6] The State Board of Regents is endowed with "the power to govern the state system of higher education consistent with state law" and, to that end, "is vested with the control, management, and

---

[4] ***HN2***[] The language of the *Eleventh Amendment* provides as follows: The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by citizens of another State, or by Citizens or Subjects of any Foreign State.

U.S. Const. amend XI.

[5] There is no suggestion here that the state has consented to suit against the University of Utah by expressly waiving its immunity.

[6] In addition, the Utah Governmental Immunity Act defines the term "State" to include "any office, department, agency, authority, commission, *board,* institution, hospital, college, *university, or other instrumentality of the state."* Utah Code Ann. § 63-30-2(9) (1986 & 1988 Supp.). Hence, in denoting those entities protected by state law immunity, the Legislature specifically considered the University of Utah and Board of Regents instrumentalities of the state.

supervision of [the University of Utah]." Utah Code Ann. §§ 53B-1-101(2), -103(2) (1989). The governor of the state, with the consent of the Senate, appoints fifteen of the Board's sixteen members. Utah Code Ann. § 53B-1-104(1) (1989). The Board is required by law to account to the state by submitting "an annual report of its activities to the governor and to the Legislature." Utah Code Ann. § 53B-1-107 (1989). In addition, eight of ten members of the University of Utah's Institutional Council (and of each state institution of higher education) are appointed by the governor, and the Council is charged with fund-raising, public relations, and other administrative responsibilities. Utah Code Ann. §§ 53B-2-103, -104(1) (1989). The Institutional Council, in turn, consults with the Board of Regents before the Board takes **[**8]** action on matters pertaining to the University of Utah. Utah Code Ann. § 53B-2-105 (1989). Thus, the Utah Legislature has established the University of Utah as an institution squarely within the state's control. The University is not, as PDS suggests, akin to a municipal corporation or political subdivision of the state. *Cf.* Mount Healthy City Board of Educ. v. Doyle, 429 U.S. 274 (1977) (Ohio law provides that local Board of Education is treated as political subdivision and not as an arm of the state).

The Utah Supreme Court also **[**9]** has taken the view that the University of Utah is an institution firmly within the state's control. **[*512]** In University of Utah v. Board of Examiners, 295 P.2d 348 (Utah 1956), the Supreme Court examined the intent of the Utah Constitution's framers and reversed the district court's ruling that the Utah Constitution establishes the University as a constitutional corporation free from the Legislature's control. The Court relied upon one of its earlier opinions and reasoned that:

When all of the provisions of law, which in some way relate to and affect the government of the university are considered and construed together, it is made very clear that the corporation designated the University of Utah was created and exists for the sole purpose of more conveniently governing and conducting the educational institution called the "University." *The university is clearly a state institution,* and is so treated, since the members constituting its governing board are all appointed by the Governor with the consent of the senate, and the board regularly reports to the Governor. *Moreover, the corporation holds all the property in trust merely. In fact the property belongs* **[**10]** *to the state of Utah.*

Id. at 364 (quoting State v. Candland, 104 P. 285, 293 (Utah 1909)) (emphasis added). Thus, the state's highest court [7] **[**11]** has indicated in unequivocal terms that the University acts as a state-created, state-financed entity with a severely constricted degree of autonomy. Any judgment against the University necessarily would be satisfied, even if indirectly, from state resources. And "where the recovery sought by the parties would 'expend itself on the public treasury or domain . . .,' the action is essentially one against the State. . . ." [8] Prebble v. Brodrick, 535 F.2d 605, 610 (10th Cir. 1976) (citations omitted) (University of Wyoming is a state instrumentality for purposes of Eleventh Amendment immunity).

---

[7] PDS urges the court to adopt an opinion of the Utah Attorney General to the effect that the University is not an arm of the state for purposes of Eleventh Amendment immunity. *See* Op. Att'y Gen. No. 87-001 (May 8, 1987) at 46-47. The opinion, though informative, is not authoritative. This court is unwilling to give greater credence to the Attorney General's non-binding opinion than to Utah statutory structure and the Utah Supreme Court's construction of that structure.

[8] The court specifically rejects PDS's suggestion that a judgment against the University is not necessarily a judgment against the state. While it may be true that a significant proportion of University funding comes from non-state sources, it is a fiction to suggest that a judgment against the University will not ultimately be made up through state appropriations. Any use of non-state funds to satisfy a judgment inevitably will necessitate increased state outlays. *See* Ferguson v. Greater Pocatello Chamber of Commerce, 647 F. Supp. 190, 192 (D. Idaho 1985) (Idaho State University is immune under Eleventh Amendment since judgment would ultimately "impact" on state treasury).

Given the University's status under Utah law, [9] this court is bound by the view of the Tenth Circuit [10] and adopts the view of a majority of other courts [11] that have treated state universities as arms of the state for *Eleventh Amendment* purposes. The University of Utah partakes of *Eleventh Amendment* immunity as an instrumentality **[*513]** of the state. This court is without authority to award PDS damages against **[**12]** the University, its officers, or IRP.

[13] III. Injunctive Relief**

The court's determination that the University of Utah is an arm of the state for *Eleventh Amendment* purposes does not dispose entirely of PDS's claims. PDS has sought injunctive relief against the University defendants, specifically asking this court to order IRP to cease operations which are alleged to violate federal and state law. Thus, the court examines the availability to PDS of injunctive relief and concludes that this court may not enjoin IRP's activities based upon either federal or state law grounds.

A. Federal Law

The court turns first to the availability of injunctive relief under federal law. It is well-settled that ***HN4***[] the *Eleventh Amendment* does not bar federal courts from issuing injunctive relief against a state based upon violations of federal law. *See Ex Parte Young, 209 U.S. 123 (1908)*. That relief, if any, may be founded upon violations of federal constitutional or statutory law, but is limited to *prospective* injunctive relief. *See Edelman v. Jordan, 415 U.S. 651, 666-68 (1974)*.

In its complaint, PDS alleges that the University defendants operate IRP in violation of federal ***antitrust law***. **[**14]** PDS seeks an order from this court enjoining the University defendants from the alleged continuing violation of both the Sherman Act and the Clayton Act. PDS has raised no other federal law claim for injunctive relief. [12] The University defendants counter that they are entitled to immunity from federal antitrust laws because they are the state acting in its sovereign capacity. The University defendants rely upon the landmark case of *Parker v. Brown, 317 U.S. 341 (1943)*, and subsequent cases interpreting it. They argue that they are officers acting within the executive branch of state government, and as such, that they are acting for and on behalf of Utah in its sovereign capacity.

---

[9] PDS insists that the court should at least allow factual discovery into the relationship between IRP, the University, and the state. And indeed it is true that "each state university exists in a unique governmental context, and each must be considered on the basis of its own peculiar circumstances." *Soni v. Board of Trustees, 513 F.2d 347, 352 (6th Cir. 1975)*, *cert. denied,* ***426 U.S. 919 (1976)***. In this case, however, the court need only look to the peculiarities of Utah law. Utah law, as distinguished from any detailed factual inquiry, clearly renders the University of Utah an arm of the state. Factual discovery would in no way alter the state law basis of this court's conclusion. *See Prebble, 535 F.2d at 610* (relying on the Wyoming Constitution and statutes to hold that University of Wyoming is immune under *Eleventh Amendment*).

[10] *See Prebble, 535 F.2d at 610* (University of Wyoming); *Brennan, 451 F.2d at 1290-91* (University of Kansas).

[11] The court in *Durham v. Parks, 564 F. Supp. 244, 246 (D. Minn. 1983)*, surveyed a number of cases that dealt with the status of state universities under the *Eleventh Amendment*. The *Durham* court concluded that "the majority of courts which have considered the 'alter ego' relationship of a state university to its state have concluded that a suit against the university is a suit against the state for the purposes of the *eleventh amendment*." *Id.*

[12] Count II of PDS's complaint alleges that PDS is entitled to a declaratory judgment pursuant to *Federal Rule of Civil Procedure 57* and the federal Declaratory Judgment Act, *28 U.S.C. § 2201*. However, the declaratory judgment sought in Count II is based on state law violations, and the Declaratory Judgment Act does not extend the subject matter jurisdiction of federal courts. *See* 10A C. Wright, A. Miller & M. Kane, Federal Practice and Procedure § 2766 (2d ed. 1983) ("there must be an independent basis of [federal] jurisdiction, . . . before a federal court may entertain a declaratory judgment action"). Thus, the only alleged federal law bases for injunctive relief are the Sherman and Clayton Acts.

[15]** *Parker* and its progeny have established the general proposition that ***HN5***[] states acting in their sovereign capacities are exempt from federal antitrust laws. In order to qualify for antitrust immunity, an entity must demonstrate either that it is the state acting in its sovereign capacity or that it is acting pursuant to a "clearly articulated and affirmatively expressed state policy." *Hoover v. Ronwin, 466 U.S. 558, 568-69 (1984)*. This court does not reach the second prong of this test because it concludes that the University defendants constitute the state acting in its sovereign capacity. As such, they are entitled to *Parker* antitrust immunity.

HN6[] It is clear under the *Parker* immunity doctrine that the legislative and judicial branches of state government act as the state in its sovereign capacity. *See* *Parker, 317 U.S. at 351* (legislature acts as the state); *Bates v. State Bar of Arizona, 433 U.S. 350, 360 (1977)* (state supreme court acting in legislative capacity acts as the state). In deciding that the University defendants are acting as the state for purposes of *Parker* immunity, this court adopts the holdings **[**16]** of the Fifth and Ninth Circuits [13] that the executive **[*514]** branch of state government is no less entitled to antitrust immunity than are the legislative and judicial branches. *See* *Charley's Taxi Radio Dispatch v. SIDA of Hawaii, 810 F.2d 869, 874-76 (9th Cir. 1987)* (Hawaii Department of Transportation entitled to antitrust immunity as part of executive branch); *Deak-Perera Hawaii, Inc. v. Department of Transp., 745 F.2d 1281, 1282 (9th Cir. 1984)* (similar conclusion); *Saenz v. University Interscholastic League, 487 F.2d 1026, 1027-28 (5th Cir. 1973)* (division of University of Texas entitled to antitrust immunity). This court discerns no sound reason for distinguishing state executive agencies from their legislative and judicial counterparts -- "regardless of whether [the executive agencies'] particular actions or their anticompetitive effects were contemplated by the legislature." *Charley's Taxi, 810 F.2d at 876*. *See also* Areeda, *Antitrust Immunity for "State Action" After Lafayette,* 95 Harv. L. Rev. 435, 445 n.49 (1981) ("delegation of governmental powers necessarily includes the discretion **[**17]** to make decisions not compelled by the legislature").

Further, as was true in the *Eleventh Amendment* context, there can be little question that the University defendants act as the state in its sovereign capacity for purposes of *Parker* antitrust immunity. The Board of Regents is appointed by the governor. The Board accounts annually to the governor and the Legislature. In *Saenz, 487 F.2d at 1027-28*, the Fifth Circuit reasoned that the University Interscholastic League and its officials, as part of the Extension Division of the University of Texas, were entitled to antitrust immunity as the state acting in its sovereign capacity. Such is also true of IRP, the Board of Regents, and other University officials in this case. **[**18]** They act within the state executive branch, under statutorily mandated supervision, and thus come within the ambit of *Parker* antitrust immunity. [14]

PDS contends, finally, that even if the University defendants act as the state in the executive branch, their activities through IRP are not those of the sovereign because they exceed the authority conferred under the Utah Constitution and Utah statutes. This court does not -- and need not **[**19]** -- decide whether IRP's activities run afoul of specific provisions of Utah law. As the University defendants correctly point out, ***HN7***[] even "the constitutional invalidity of the attempted state [activity] is not an appropriate basis for disregarding *[Parker]* state action immunity." *Lease Lights, Inc. v. Public Serv. Co., 849 F.2d 1330, 1334 (10th Cir. 1988)* (citing *Llewellyn v. Crothers, 765 F.2d 769, 774 (9th Cir. 1985))*. Indeed, *Parker* immunity is based upon principles of federalism, and "'ordinary' errors or abuses in the administration of powers conferred by the state should be left for state tribunals to control." Areeda, *Antitrust Immunity for "State Action" After Lafayette,* 95 Harv. L. Rev. 435, 453 (1981). The University defendants' activities do not violate Utah law (if at all) to the degree that *Parker* immunity is defeated. This court will not enjoin the University defendants on the basis of federal ***antitrust law***.

[13] The United States Supreme Court has yet to pass upon the specific question whether state executive agencies are entitled to *Parker* antitrust immunity. *See Hoover,* 446 U.S. at 568 n.17. Neither has the Tenth Circuit treated that specific question.

[14] Again, PDS would have the court rely upon an Opinion of the Utah Attorney General, which concluded that the University of Utah was not the state acting in its sovereign capacity for purposes of *Parker* antitrust immunity. *See* Op. Att'y Gen. No. 85-002 (Oct. 21 1985). However, the court notes once again that the opinion is non-binding. The opinion does not even mention the Fifth and Ninth Circuit cases decided before it was rendered, and it could not have considered the *Charley's Taxi* decision because it was decided after the Attorney General opinion was rendered.

B. State Law

PDS also seeks prospective injunctive relief against the University defendants based upon a number of separate state law grounds, including the Utah Administrative Code, the **[**20]** Utah Unfair Practices Act, and Utah ***antitrust law***. The University defendants respond that, under the Supreme Court's holding in *Pennhurst State School & Hosp. v. Halderman, 465 U.S. 89 (1984)*, ***HN8***[] the *Eleventh Amendment* prohibits the **[*515]** court from enjoining an instrumentality of the state based upon state law, unless the alleged conduct is ultra vires or "without any authority whatever." [15] *Id. at 101 n.11*.

[21]** This court determined, *supra,* that the University is an arm of the state and thus enjoys *Eleventh Amendment* immunity. All that remains, then, is an inquiry into whether the University defendants' activities through IRP are supported by any "colorable basis" of authority. *Id.* That determination is simple. The Board of Regents is given full authority by the Legislature to decide what programs and departments will be established at the University of Utah. Accordingly, the Board has authorized the operation of IRP within the Colleges of Medicine and Pharmacy. It may be that this authorization misconstrues provisions of Utah law, or that the actual practices of IRP do not comport fully with Utah law, [16] **[**23]** but this court cannot accept PDS's contention that IRP is operated Without any "colorable basis" of authority. [17] ***HN9***[] An ultra vires claim must be founded upon an "officer's lack of

---

[15] The University defendants suggest that *Pennhurst* may have entirely eliminated the ultra vires exception. It is true that the *Pennhurst* Court did "question the continued vitality of the ultra vires doctrine in the *Eleventh Amendment* context." *465 U.S. at 114 n.25*. The Court concluded that "to the extent the [ultra vires] doctrine is consistent with the analysis of this opinion, it is a very narrow exception. . . ." *Id.*

This court need not pass upon the continued existence or nonexistence of the ultra vires doctrine because it holds that the University defendants' activities are not "without any authority whatever." *Florida Dept. of State v. Treasure Salvors, Inc., 458 U.S. 670, 697 (1982)*.

[16] At issue are the provisions of Board of Regents Rule 765-555, which PDS suggests have been incorporated into the Utah Administrative Code. Utah Code Ann. §§ 63-46a-2, -16 (1989). Rule 765-555 is entitled "Policy on Colleges and Universities Providing Facilities, Goods and Services in Competition with Private Enterprise." The Rule provides in pertinent part:

R765-555-4. Policy

* * *

4.3. An institution shall not provide services to persons other than members of the campus community unless:

4.3.1. The service offers a substantial and valuable educational or research experience for registered students and faculty;

4.3.2. The service fulfills the institution's public service mission;

4.3.3. The service is incidental to the ordinary and authorized function of a campus entity, i.e. occasional sales by bookstores, food services, etc., to campus visitors;

4.3.4. The service consists of recreational, cultural, and athletic events; health services and medical treatment; public service radio and TV broadcasting; events or functions which have as their principal purposes the improvement of relations between the institutions and the general public; and sales of contributed services, if related to fund raising activities;

4.3.5. The equivalent service is not available in the local area; or

4.3.6. The service to persons not members of the campus community has been specifically authorized by the State Board of Regents.

* * *

4.6. Exceptions to this policy may be authorized by the State Board of Regents if it determines that an exception is clearly in the best interests of the public.

[17] It is arguable whether the University defendants' activities through IRP violate Rule 765-555 or other provisions of Utah law at all. Even so, under *Pennhurst's* *Eleventh Amendment* analysis, the court does not focus on the violation or nonviolation of state

delegated power. A claim of error in the exercise of that power is therefore not sufficient." *Larson v. Domestic & Foreign Commerce Corp., 337 U.S. 682, 690 (1949)*. The University defendants may or may not have misinterpreted the breadth of their authority, but they have not acted **[**22]** here without any authority whatever. The court will not enjoin **[*516]** them based upon alleged violations of state law.

[24] IV. Relief Against Defendant Bragg in His Individual Capacity**

The court turns last to PDS's contention that this court may order relief against defendant David Bragg in his individual capacity. Bragg serves as Chairman of the University's Department of Radiology and is the only defendant sued by PDS in an individual capacity. PDS argues correctly that the *Eleventh Amendment* and state sovereignty generally provide no immunity to state officers sued in their individual capacities. *See* *Papasan v. Allain, 478 U.S. 265, 278 n.11 (1985)*. PDS also points out that this result is unchanged even if the state chooses to indemnify its officers. *See* *Schaefer v. Wilcock, 676 F. Supp. 1092, 1101 (D. Utah 1987)*.

Bragg appears to concede that he does not benefit in his individual capacity from *Eleventh Amendment* immunity. He argues, however, that ***HN10***[] under Utah law he may not be held Personally liable for "acts or omissions occurring during the performance of [his] duties . . . *unless it is established that [he] acted or failed to act due to fraud or malice."* Utah Code Ann. § 63-30-4(4) (1989) (emphasis added). Bragg's position, at least as to Utah law, **[**25]** is supported by Utah Supreme Court decisions interpreting section 63-30-4. *See* *Lancaster v. Utah State Prison, 740 P.2d 261, 262 (Utah 1987)*; *Maddocks v. Salt Lake City Corp., 740 P.2d 1337, 1339-40 (Utah 1987)*. The state law claims in PDS's complaint do not allege that Bragg acted through either fraud or malice, and there is little doubt that Bragg's "acts or omissions," if any there were, occurred during the performance of his duties as Chairman of the University's Department of Radiology. The court notes, however, that the "fraud or malice" pleading requirement does not apply to PDS's federal law claims against Bragg in his individual capacity. The parties do not advance -- nor will the court embrace -- the suggestion that Utah Code section 63-30-4 adds to ***antitrust law*** (or other federal law) a "fraud or malice" pleading requirement.

Thus, the court dismisses without prejudice PDS's state law claims against Bragg in his individual capacity and grants PDS twenty days' leave to amend its complaint to include any properly founded state law allegations of malice or fraud against Bragg. As to the federal law claims against Bragg in his individual **[**26]** capacity, the motion to dismiss is denied.

V. Conclusion

Based upon the foregoing analysis, the court holds that PDS's remedy against the University defendants, if any, must be obtained in state court. The principles of federalism, as found in the *Eleventh Amendment* and the *Parker* antitrust immunity doctrine, teach that federal courts must not intrude upon the sovereign domain of the several states. Therefore, the court hereby orders, adjudges, and decrees that PDS's claims against the University defendants in their official capacities are DISMISSED with prejudice. The court further orders, adjudges, and decrees that PDS's state law claims against defendant David Bragg in his individual capacity are DISMISSED without prejudice, and PDS is hereby granted twenty days' leave to amend its complaint to include any properly founded state law claims of fraud or malice against defendant David Bragg in his individual capacity. With respect to PDS's federal law claims against Bragg in his individual capacity, the motion to dismiss is DENIED.

IT IS SO ORDERED.

---

law. Rather, the query is whether the activities are "without any authority whatever." *Pennhurst, 465 U.S. at 101 n.11*. In this case it is clear that the University defendants' activities are not without any authority whatever.

PDS's reliance on *Miami Univ. Assoc. Student Gov't v. Shriver, 735 F.2d 201 (6th Cir. 1984)*, is unavailing. In that case, the Sixth Circuit, in dicta, merely directed the district court to consider on remand the effect of *Pennhurst* on its ability to order compliance with state law. The court hinted, without holding, that Miami University officials' attempts to enforce a student "no-car" policy off-campus may be without any authority whatever. *Id. at 204*. The court suggested that the ultra vires doctrine survived *Pennhurst,* but did not hold that the doctrine applied to the facts of the particular case. *Id.*

Dated this 25th day of June, 1990.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

In deciding a motion to dismiss, all inferences must be drawn in favor of the plaintiff, and the facts must be viewed as the plaintiff most strongly can plead them. The district court may not, then, grant a motion to dismiss for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts which would entitle him to relief. The Supreme Court has applied this standard rigorously in antitrust cases, holding that in such cases dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly.

Transportation Law > Interstate Commerce > Federal Powers

Antitrust & Trade Law > Sherman Act > General Overview

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Governments > Legislation > Enactment

HN4[] **Commerce Clause, Interstate Commerce**

The only significant distinction between the Sherman Act *§ 1*, *15 U.S.C.S. § 1* and the Sherman Act *§ 3*, *15 U.S.C.S. § 3* lies in the geographical area covered by each statute. *Section 1*, as well as *§ 2*, regulates interstate commerce, and was enacted pursuant to Congress' power under the *Commerce Clause of the Constitution*, *U.S. Const. art. I, § 8, cl. 3*. Section 3 of the Sherman Act regulates commerce in the District of Columbia, and in United States territories, and rests in part upon Congress' power to enact legislation for the District of Columbia. *Section 3* also regulates commerce between the District of Columbia and states or territories.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] Antitrust & Trade Law, Sherman Act

To state a claim under the Sherman Act *§ 1*, *15 U.S.C.S. § 1*, a plaintiff normally must allege facts supporting: (1) an agreement, conspiracy, or combination among the defendants in restraint of trade; (2) injury to the plaintiff's business and property as a direct result; and (3) damages capable of reasonable ascertainment.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

It is well settled that price-fixing constitutes restraint of trade in violation of the Sherman Act *§ 1*, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN7[] Antitrust & Trade Law, Exemptions & Immunities

To the extent that the combinations and conspiracies alleged attack vertical arrangements, the complaint in this case must overcome the hurdle presented by the Soft Drink Interbrand Competition Act (Act), *15 U.S.C.S. §§ 3501-3503*, in addition to meeting the ordinary pleading requirements for a Sherman Act *§ 1* claim, *15 U.S.C.S. § 1*. The chief effect of the Act is to shield soft drink manufacturers and bottlers from antitrust liability to which they might otherwise be subject on the grounds of their enforcement of vertically organized territorial restraints. Defendants are not entitled to the protection of the Act, however, unless their products are in substantial and effective competition with other products of the same general class in the relevant market or markets, *15 U.S.C.S. § 3501*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN8[] Price Fixing & Restraints of Trade, Vertical Restraints

The Soft Drink Interbrand Competition Act (Act), *15 U.S.C.S. § 3501 et seq.*, does not purport to grant antitrust immunities. Its protections represent a legislative response to questions over the proper application to the soft drink industry of the rule of reason approach to vertical restraints re-adopted by the Supreme Court. Under this standard, vertical restraints such as those at issue in this case do not violate the antitrust laws if the overall effect of the restraint is to promote interbrand competition. Thus, while there is no price-fixing conduct alleged against defendants, the allegations pertaining to their enforcement of vertical restraints could conceivably subject them to Sherman Act *§ 1* liability, *15 U.S.C.S. § 1*, if: (1) it is eventually established that the Act does not apply and (2) the conduct of the two manufacturers fails an independent rule-of-reason analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN9[] Price Fixing & Restraints of Trade, Vertical Restraints

Substantial and effective interbrand competition is not defined in the text of the Soft Drink Interbrand Competition Act itself, *15 U.S.C.S. § 3501 et seq.*, but a number of factors may be weighed in determining whether such competition does in fact exist: the number of brands, types, and flavors of competing products available; persistence of long-run monopoly profits; the number of retail price options available to consumers; the persistence of inefficiency and waste; the degree of service competition among vendors; ease of entry into the market; the failure of output levels to respond to consumer demands; the number and strength of competing products in the territory; and a lack of opportunity to introduce more efficient methods and products.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

***HN10*[]** **Price Fixing & Restraints of Trade, Vertical Restraints**

In weighing the factors to determine whether the Soft Drink Interbrand Competition Act, *15 U.S.C.S. § 3501 et seq.*, applies in a given case it is essential that the court consider only facts tending to demonstrate the effect on interbrand competition. Facts tending to show, for example, that there exists little or no service competition among vendors of a particular brand are irrelevant for this purpose. Even a showing that such a condition exists within the chain of distribution of every brand in the market would have no bearing on the question of interbrand competition. Such facts go only to the question of intra brand competition.

As with Sherman Act *§ 1*, *15 U.S.C.S. § 1*, Sherman Act *§ 2*, *15 U.S.C.S. § 2*, regulates interstate commerce and was enacted pursuant to Congress' power under the *Commerce Clause*. On its face *§ 2* does not purport to regulate commerce in the District of Columbia, as does *§ 3*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN13[] **Price Fixing & Restraints of Trade, Vertical Restraints**

The Supreme Court made clear that the illegal market power which is the centerpiece of a monopoly must exist with respect to the competitive market for a commodity, as distinguished from legitimate market power over a single brand. The Supreme Court emphasized in dicta that the power that, let us say, automobile or soft drink manufacturers have over their trademarked products is not the power that makes an illegal monopoly.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Sherman Act, Claims**

The Supreme Court set out the elements of a Sherman Act *§ 2* claim of actual monopolization, *15 U.S.C.S. § 2*. They are: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN16[] **Regulated Practices, Market Definition**

An attempt to allege the necessary market power by aggregating the market power of several defendants is mere tautology.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN17[] Monopolies & Monopolization, Actual Monopolization

An oligopoly, or shared monopoly, does not in itself violate Sherman Act § 2, 15 U.S.C.S. § 2. Rather, in order to sustain a charge of monopolization or attempted monopolization, a plaintiff must allege the necessary market domination of a particular defendant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN18[] Monopolies & Monopolization, Actual Monopolization

The idea that a monopoly is composed of a single economic entity is also reflected in the requirement in an actual monopolization claim that the requisite market power be held by a single defendant. This idea in no way precludes the possibility of a group of firms conspiring to monopolize, if the aim of the conspiracy is to form a single entity to possess the illegal market power. When, however, two or more competitors conspire to create a market environment in which competition and market entry is improperly restricted, but in which market power continues to be shared among these otherwise unrelated entities, the court holds that there is no conspiracy to monopolize claim stated under Sherman Act § 2, 15 U.S.C.S. § 2, and the claim must therefore be dismissed.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN19[] Monopolies & Monopolization, Attempts to Monopolize

The so-called essential facilities doctrine does not create a new species of antitrust violation. It simply addresses the narrow situation in which a firm gains monopoly power by controlling and refusing to deal in an essential facility at one stage of production, thus extending its monopoly to other stages of production, and to other markets. The elements of liability under the doctrine are: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. Failure to plead facts supporting any one of these elements is sufficient to support dismissal.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > Regulated Industries > Sports > Football

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN20[] Sherman Act, Claims

The essential facilities doctrine relates most directly to a claim of monopolization under Sherman Act *§ 2*, *15 U.S.C.S. § 2*. Nevertheless, some courts have applied the doctrine to claims under Sherman Act *§§ 1*, *3*, *15 U.S.C.S. §§ 1*, *3*, as well.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN21[] **Monopolies & Monopolization, Attempts to Monopolize**

Although the essential facilities doctrine applies to facilities which enable the monopolist to extend monopoly power from one stage of production to another, it does not apply to end products in markets containing several competing brands. A single brand cannot function as a bottleneck over such a market. By withholding access to a brand, therefore, a firm is not able to extend monopoly power through subsequent stages of production.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN22[] **Monopolies & Monopolization, Attempts to Monopolize**

Even firms that are nominally competitors, if they act as a single economic entity with respect to the facility, e.g., by sharing a single facility, may be subject to liability under the essential facilities doctrine.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN23[] **Monopolies & Monopolization, Attempts to Monopolize**

The requirement that a plaintiff not be able to practically or reasonably duplicate the purported facility is not met simply by an allegation that the plaintiff is unable to participate in the manufacture and distribution of whatever brand of a product it chooses. Assuming, arguendo, that the brand name products can be essential facilities, plaintiff cannot state a claim as long as it is able to find reasonable substitutes for these products.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN24[] **Monopolies & Monopolization, Attempts to Monopolize**

Particular brand names within a product market are not the appropriate subject matter of an essential facilities claim. Generally, the doctrine has been applied to situations in which physical conditions prohibit duplication of the facility.

Constitutional Law > Congressional Duties & Powers > District of Columbia & Federal Property

HN25[] Jurisdiction, Jurisdictional Sources

Under *28 U.S.C.S. § 1366*, laws applicable exclusively to the District of Columbia are not federal laws, though enacted by Congress; and under *28 U.S.C.S. § 1332(d)*, the District of Columbia is a state for purposes of diversity jurisdiction.

Constitutional Law > Congressional Duties & Powers > District of Columbia & Federal Property

Governments > Local Governments > Home Rule

Constitutional Law > Congressional Duties & Powers > General Overview

HN26[] Congressional Duties & Powers, District of Columbia & Federal Property

The District of Columbia's antitrust laws are set forth at *D.C. Code Ann. §§ 28-4501*- 28-4518 (1981). These statutes were adopted in 1980 by the Council of the District of Columbia, pursuant to the legislative authority granted to it by Congress in the District of Columbia Self Government and Governmental Reorganization Act of 1973, the Home Rule Act, 87 Stat. 774, Pub. L. 93-198 (1973), codified at Title 1 of the D.C. Code). That power extends to all rightful subjects of legislation within the District consistent with the Constitution of the United States and the provisions of the Act subject to all the restrictions and limitations imposed upon the states by the *U.S. Const. art. I, § 10*, D.C. Code Ann. § 1-204 (1981).

Constitutional Law > Congressional Duties & Powers > District of Columbia & Federal Property

HN27[] Congressional Duties & Powers, District of Columbia & Federal Property

Even though the District of Columbia is not a state, Congress has specifically determined that the legislative enactments of the D.C. Council are subject to the same constitutional constraints as are those of the states. Specifically, acts passed by the D.C. Council are subject to analysis under the federal preemption doctrine and the *Commerce Clause*.

Governments > Legislation > Enactment

HN28[] Congressional Duties & Powers, District of Columbia & Federal Property

The United States Constitution grants Congress the power to legislate for the District of Columbia, *U.S. Const. art. I, § 8, cl. 17*. Through the Home Rule Act, Congress has ceded some of that authority to the D.C. Council, D.C. Code Ann. §§ 1-206, 1-233 (1981). The D.C. Code provisions were enacted by the Council, subject to the congressional oversight provided for in D.C. Code Ann. § 1-233(c), and subject to the retention by Congress of the ultimate legislative authority over the nation's capital granted by *U.S. Const. art. I, § 8*, D.C. Code ann. § 1-201(a). The Supreme Court long ago determined that there is no constitutional barrier to the delegation by Congress to the District of Columbia of full legislative power.

Antitrust & Trade Law > Sherman Act > General Overview

HN29[] **Antitrust & Trade Law, Sherman Act**

D.C. Code Ann. § 28-4502 is substantively the same as the first sentence of Sherman Act *§ 3*, *15 U.S.C.S. § 3*, and is therefore akin to the first sentence of Sherman Act *§ 1*, *15 U.S.C.S. § 1*. *D.C. Code Ann. § 28-4503* prohibits the same conduct as does *§ 2* of the Sherman Act.

HN30[] **Remedies, Damages**

D.C. Code Ann. § 28-4508 provides that any person who is injured may seek monetary and/or injunctive relief. As with the Clayton Act § 4, *15 U.S.C.S. § 15*, treble damages are available, *D.C. Code Ann. § 28-4508* (1981).

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN31[] **Purchasers, Indirect Purchasers**

Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies, and that consequently federal antitrust laws do not preempt state law.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN32[] **Congressional Duties & Powers, Commerce Clause**

The *Commerce Clause, U.S. Const. art I., § 8, cl. 3*, permits only incidental regulation of interstate commerce by the states; direct regulation is prohibited.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > Restraints of Trade

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

HN33[] **Interstate Commerce, Restraints of Trade**

The D.C. Code provisions at issue purport to regulate antitrust activity throughout the District of Columbia, *D.C. Code Ann. § 28-4501* (1981), and are therefore constitutional on their face. Nevertheless, it clearly would be unconstitutional under the *Commerce Clause, U.S. Const. art. I, § 8, cl. 3*, to apply the D.C. Code to claims which, though bearing some connection to the District of Columbia, are in fact interstate in nature and are thus regulated by federal antitrust provisions.

Torts > Business Torts > Unfair Business Practices > General Overview

HN34[] **Business Torts, Unfair Business Practices**

Under Maryland law, a claim for unfair competition can encompass damaging or jeopardizing another's business by fraud, deceit, trickery or unfair methods of any sort. What constitutes unfair competition in a given case is governed by its own particular facts and circumstances.

Torts > ... > Commercial Interference > Business Relationships > General Overview

Torts > Business Torts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN35[] **Commercial Interference, Business Relationships**

Under Maryland law, the tort of interference with business relations consists of four elements: (1) intentional and wilful acts; (2) calculated to cause damage to the plaintiffs in their lawful business; (3) done with the unlawful purpose to cause such damage and loss, without right or justifiable cause on the part of the defendants, which constitutes malice; and (4) actual damage and loss resulting.

Opinion by: SMALKIN

Opinion

[*384] MEMORANDUM

FREDERIC N. SMALKIN, UNITED STATES DISTRICT JUDGE

This antitrust case is before the Court on motions of all defendants to dismiss the Amended Complaint pursuant **[**2]** to Federal Civil Procedure Rule 12(b)(6). There has been thorough briefing by all parties, and the motion will be decided without oral argument, as permitted by Local Rule 105(6), D. Md.

FACTUAL BACKGROUND

Plaintiff, Sun Dun, Inc., is in the business of marketing and servicing vending machines as a "full service vendor." [1] Defendants Coca-Cola and PepsiCo manufacture trademarked, secret formula soft drink syrup and sell it to licensed, franchised distributors, who in turn mix, package, and distribute the final products. Defendant Mid-Atlantic Coke is a licensed distributor for Coca-Cola in the Washington, D.C. metropolitan area, which includes portions of Maryland and Virginia. Defendant General Cinema, Inc., is a distributor for PepsiCo in the same region. Both General Cinema and Mid-Atlantic are also engaged **[*385]** in the full service vending machine business.

[3]** Sun Dun seeks in this action to redress alleged harm arising from its inability to obtain Coca-Cola and Pepsi-Cola products "at competitive prices" in the Washington, D.C. metropolitan area from Mid-Atlantic and General Cinema ("the bottler defendants") or from any other source. Plaintiff claims that the imposition of, and adherence to, territorial and marketing restrictions by various combinations of the defendants have prevented it from competing effectively in the market, by essentially cutting off supply of two of its major product lines. Sun Dun argues that the conduct of the defendants in creating these unfavorable conditions violates *Sections 1*, *2*, and *3* of the Sherman Act, *15 U.S.C. §§ 1-3 (1982)*, as well as the District of Columbia's antitrust laws, *D.C. Code Ann. §§ 28-4502* and -4503 (1981). Plaintiff seeks the monetary and injunctive relief available under Sections 4 and 16 of the Clayton Act, *15 U.S.C. §§ 15*, *26 (1982)*, and *D.C. Code Ann. §§ 28-4508*, -4509 (1981). Sun Dun has also set forth claims in tort for unfair competition and tortious interference with business relationships.

DISCUSSION

Standard of Review of Motions to Dismiss

HN1[] In deciding a motion to dismiss, **[**4]** all inferences must be drawn in favor of the plaintiff, and "the facts must be viewed as the plaintiff most strongly can plead them." *Coakley & Williams, Inc. v. Shatterproof Glass Corp., 706 F.2d 456, 457 (4th Cir. 1983)*, *cert. denied*, *475 U.S. 1121, 90 L. Ed. 2d 185, 106 S. Ct. 1640 (1986)*. The district court may not, then, grant a motion to dismiss for failure to state a claim "unless it appears beyond doubt that the plaintiff can prove no set of facts which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. The Supreme Court has applied this standard rigorously in antitrust cases, holding that in such cases "dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*.

The Federal Claims

[1] A "full service vendor" is one who, in addition to supplying and maintaining the machines themselves, stocks them with beverages and collects the monies. Amended Complaint, para. 7. Sun Dun's machines are capable of dispensing different drinks at different prices, and it therefore stocks its machines with a variety of products, including cans of soft drinks and fruit juices.

Standing

As a threshold issue, defendants challenge Sun Dun's standing to assert Sherman Act claims, arguing that Sun Dun has made only indirect, not direct, purchases from the defendants. Under the holding of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, ***HN2***[] federal ***antitrust law*** provides no remedy for treble damages under Section 4 of the Clayton Act, *15 **[**5]** U.S.C. § 15 (1982)*, for those who have made merely indirect purchases from defendants. The Supreme Court recently reaffirmed this interpretation of Section 4 in *Kansas v. Utilicorp United, Inc., 497 U.S. 199, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*. *See also* *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. Sun Dun, however, has asserted that, in addition to its indirect purchases, it made some direct purchases from one or more of the defendants. Amended Complaint, at paras. 22, 24, 31, 55. Although the Amended Complaint provides few details about the direct purchases, the allegations are sufficient to confer standing upon Sun Dun to assert claims for damages arising from those purchases.

Sun Dun also seeks injunctive relief under Section 16 of the Clayton Act, *15 U.S.C. § 26 (1982)*. Here, Sun Dun's status as an indirect purchaser is not a bar to standing. ***HN3***[] Following the lead of the Third and Fifth Circuits, other judges of this Court have held that a plaintiff who cannot seek damages for indirect purchases under Section 4 of the Clayton Act may nevertheless seek injunctive relief under Section 16. *National Constructors Association v. National Electrical Contractors Association,* ***[**6]*** *498 F. Supp. 510, 524 (D. Md. 1980)* (Murray, J.), *aff'd as modified*, *678 F.2d 492 (4th Cir. 1982)*, *cert. dismissed*, *463 U.S. 1234, 77 L. Ed. 2d 1449, 104 S. Ct. 26 (1983)*; *Dart Drug Corp. v. Corning Glass Works,* ***[*386]*** *480 F. Supp. 1091, 1105 (D. Md. 1979)* (Watkins, J.). *See also* *In re Beef Industry Antitrust Litigation, 600 F.2d 1148, 1167 (5th Cir. 1979)*, *cert. denied sub nom. Safeway Stores, Inc. v. Meat Price Investigators Association, 449 U.S. 905, 101 S. Ct. 280, 66 L. Ed. 2d 137 (1980)*; *Mid-West Paper Products Co. v. Continental Group, Inc., 596 F.2d 573, 590-94 (3d Cir. 1979)*. *Cf.* *Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 524 n. 5, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)* (declining to address issue of standing under Section 16); *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)* (determining that equitable relief under Section 16 requires proof of only "a significant threat of injury" from antitrust violations, not an "actual injury"). Of course, "plaintiff here must still establish, as Section 16 requires, that principles of equity entitle it to such injunctive relief." *Dart Drug, 480 F. Supp. at 1105*. *See also* *National Constructors, 498 F. Supp. at 524*. For the purposes **[**7]** of ruling on defendants' motions to dismiss, however, it is not necessary to consider the merits of plaintiff's claims. *Dart Drug, 480 F. Supp. at 1105*. It is sufficient to note that at this stage of the proceedings, Sun Dun has standing to seek injunctive relief under federal antitrust laws as both a direct and indirect purchaser.

Restraint of Trade

In Counts I, II, and III of its Amended Complaint, Sun Dun alleges unreasonable restraint of trade in violation of *Sections 1* and *3* of the Sherman Act. Because the substantive elements of a claim under *Section 3* are identical to those under *Section 1*, *see* *Association for Intercollegiate Athletics for Women v. National Collegiate Athletic Association, 236 U.S. App. D.C. 311, 735 F.2d 577, 580 n. 1 (D.C. Cir. 1984)*, the Court will deal with these claims simultaneously. [2]

---

[2] ***HN4***[] The only significant distinction between *Sections 1* and *3* lies in the geographical area covered by each statute. *Section 1* (as well as *Section 2*) regulates interstate commerce, and was enacted pursuant to Congress' power under the *Commerce Clause of the Constitution*. *U.S. Const. art. 1, § 8, cl. 3*. *Section 3* regulates commerce in the District of Columbia (and in United States territories), and rests in part upon Congress' power to enact legislation for the District of Columbia. *Id*. at cl. 17. *See* *United States v. National Association of Real Estate Boards, 339 U.S. 485, 488, 94 L. Ed. 1007, 70 S. Ct. 711 (1950)*; *Darnell v. Markwood, 95 U.S. App. D.C. 111, 220 F.2d 374, 376 (1954)*. *Section 3* also regulates commerce between the District of Columbia and states or territories. Thus, plaintiff's federal claims alleging conspiracy or restraint of trade which involve interstate conduct properly fall within *Section 1*, while those federal claims involving conduct within the District of Columbia or between the District and neighboring states fall within *Section 3*. As discussed below in connection with the pendent claims, plaintiff's Amended Complaint does not specify where the transactions at issue took place. Nevertheless, it is not necessary to determine which section applies to a particular claim, because *either* *Section 1* *or* *Section 3* will govern.

[8]** ***HN5***[]

To state a claim under *Section 1*, a plaintiff normally must allege facts supporting (1) an agreement, conspiracy, or combination among the defendants in restraint of trade; (2) injury to the plaintiff's business and property as a direct result; and (3) damages capable of reasonable ascertainment. *Wilder Enterprises, Inc. v. Allied Artists Pictures Corp., 632 F.2d 1135, 1139 n. 1 (4th Cir. 1980)*.

Count I is based on an alleged horizontal price-fixing conspiracy between General Cinema and Mid-Atlantic. In support of this Count, plaintiff has alleged facts relating to Sun Dun's own experiences in attempting to buy at competitive prices from General Cinema and Mid-Atlantic which could support an inference that the two were engaged in price-fixing. In addition, the complaint alleges that both bottler defendants pleaded guilty to informations charging price-fixing during the time period at issue in this case. ***HN6***[] It is well settled that price-fixing constitutes restraint of trade in violation of *Section 1*. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. Sun Dun has also sufficiently alleged a direct injury to its business which, if proved, could support an award of damages. **[**9]** Defendants' motions to dismiss with respect to Count I are therefore *denied*.

[*387] Count II alleges combination and conspiracy among all four defendants [3] **[**10]** to prevent "transshipment" [4] of Coca-Cola and Pepsi-Cola products in violation of *Sections 1* and *3*. Count III asserts, on the same underlying facts, that the territorial restraints imposed by the manufacturer defendants and adhered to by the bottler defendants violated *Sections 1*, *2*, and *3*. Taking the facts alleged in the complaint as true, the basis for these claims is essentially as follows.

The price-fixing conduct of the bottler defendants resulted in a price, per case, for Coca-Cola and Pepsi-Cola products in the Washington, D.C., metropolitan area that exceeded the price in surrounding areas by approximately $ 1.00. The bottler defendants then prevented Sun Dun from competing effectively with their own vending machine businesses by demanding higher prices from it than those charged other customers, and by preventing it from purchasing from any other resellers. In response, plaintiff attempted to purchase the products from local retailers. These efforts were initially successful, but were soon frustrated when the bottler defendants threatened those retailers with discontinuation of their own supply. Attempts to purchase the products from resellers outside the region also failed after defendants placed Sun Dun trucks under surveillance, traced the cans sold in Sun Dun vending machines **[**11]** to the transshipping distributors, and imposed substantial fines on those distributors. While fixing wholesale prices of the two brands and preventing transshipment, the bottler defendants operated their own retail vending machines at prices which made it impossible for Sun Dun to compete.

The Soft Drink Act

HN7[] To the extent that the combinations and conspiracies alleged attack vertical arrangements, [5] the complaint in this case must overcome the hurdle presented by the Soft Drink Interbrand Competition Act, *15 U.S.C. §§ 3501 to 3503 (1982)*, in addition to meeting the ordinary pleading requirements for a *Section 1* claim. The chief effect of

---

[3] Although Sun Dun has asserted that "all four defendants combined and conspired," Amended Complaint, at para. 57, plaintiff is in fact alleging the existence of three separate conspiracies: a vertical conspiracy between PepsiCo and General Cinema, another vertical conspiracy between Coca-Cola and Mid-Atlantic, and a horizontal conspiracy between General Cinema and Mid-Atlantic. Any doubts with regard to the more ambiguous allegations throughout this count and the rest of the complaint are resolved by Sun Dun's own memorandum in opposition to the motions to dismiss. On pages 4-5 of its Opposition, plaintiff expressly states that it does not allege a conspiracy between Coca-Cola and PepsiCo.

[4] Transshipment refers to the practice of resellers selling to other resellers outside of their territory. *Pennsylvania ex rel. Zimmerman v. PepsiCo, Inc., 836 F.2d 173, 174-75 (3d Cir. 1988)*.

[5] "Vertical arrangements" refer to agreements between the manufacturers and their respective bottler/distributors. It is through such agreements that Coca-Cola and PepsiCo are able to impose fines on distributors who overstep their territorial bounds by transshipping.

the Act is to shield soft drink manufacturers and bottlers from antitrust liability to which they might otherwise be subject on the grounds of their enforcement of vertically organized territorial restraints. [6] Defendants are not entitled to **[*388]** the protection of the Act, however, unless their products are "in *substantial and effective* competition with other products of the same general class in the relevant market or markets." *15 U.S.C. § 3501 (1982)* (emphasis added). Sun Dun alleges a lack of effective competition in the relevant market. Amended **[**12]** Complaint, para. 15. In addition, it alleges as the relevant market in this case "the manufacture, distribution, and sale of soft drinks which are to be resold to customers through soft drink vending machines in the Washington, D.C. metropolitan area, including Maryland and Virginia." Amended Complaint, paras. 10, 65.

[13]** ***HN9***[]

"Substantial and effective" interbrand competition is not defined in the text of the Act itself, but the committee reports suggest a number of factors to be weighed in determining whether such competition does in fact exist. The Senate report provides:

> The number of brands, types, and flavors of competing products available . . .; persistence of long-run monopoly profits; the number of retail price options available to consumers; the persistence of inefficiency and waste; the degree of service competition among vendors; ease of entry into the market; the failure of output levels to respond to consumer demands; the number and strength of competing products in the territory; and a lack of opportunity to introduce more efficient methods and products.

S. Rep. No. 645, 96th Cong., 2d Sess. 10-11 (1980). The House report contains a similar litany, substituting "anti-competitive" for "monopoly" profits, and adding "availability of various forms of containers or packaging." H.R. Rep. No. 1118, 96th Cong., 2d Sess. 5-6 (1980). It is evident from the reports that Congress intended to protect the enforcement **[**14]** of vertical restraints only in those markets which actually yield the benefits of competition. It is not enough that the market contain nominal competitors; basic characteristics of a healthy market such as low consumer prices, wide availability of merchandise, and high quality must be present.

HN10[] In weighing these factors to determine whether the Act applies in a given case, therefore, it is essential that the Court consider only facts tending to demonstrate the effect on *inter* brand competition. Facts tending to show, for example, that there exists little or no service competition among vendors of a particular brand are irrelevant for this purpose. Even a showing that such a condition exists within the chain of distribution of every brand in the market would have no bearing on the question of interbrand competition. Such facts go only to the question of *intra* brand competition.

Based on the facts alleged, it seems highly unlikely that there is an absence of "substantial and effective" interbrand competition in the relevant market. Even if a lack of competition could be shown to exist between Coca-Cola and Pepsi-Cola products, the Act would still apply in this case as long as those brands **[**15]** were in effective and substantial competition with the many other soft drink brands in the market. Still, for the purposes of this motion, plaintiff's allegation of a lack of effective interbrand competition must be taken as true. Of course, it might be established, through discovery, that there is no genuine dispute of material fact on this issue. But, because the Court must now assume that the Act does not apply, the allegations of restraint of trade in Count II are sufficient to

---

[6] ***HN8***[] The Act does not purport to grant antitrust immunities. *See* H.R. Rep. No. 1118, 96th Cong., 2d Sess. 2 (1980). Its protections represent a legislative response to questions over the proper application to the soft drink industry of the "rule of reason" approach to vertical restraints re-adopted by the Supreme Court in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. Under this standard, vertical restraints such as those at issue in this case do not violate the antitrust laws if the overall effect of the restraint is to promote interbrand competition. After an in-depth investigation of the industry, Congress determined that "the public policy stated in the antitrust laws would be better served by the retention of the existing competitive structure [including vertical restraints] of the soft drink industry under the standards of this bill." S. Rep. No. 645, 96th Cong., 2d Sess. 9 (1980). *See Zimmerman, 836 F.2d at 175-76*.

Thus, while there is no price-fixing conduct alleged against either Coca-Cola or PepsiCo, the allegations pertaining to their enforcement of vertical restraints could conceivably subject them to *§ 1* liability, if (1) it is eventually established that the Act does not apply *and* (2) the conduct of the two manufacturers fails an independent rule-of-reason analysis under *Sylvania*.

withstand defendants' motions to dismiss, and the motions are therefore *denied*. For the same reasons, defendants' motions with respect to the functionally equivalent claims under Sections 1 and 3 contained in Count III will also be *denied*.

The Vertical Monopoly Claim

Plaintiff also alleges in Count III that the vertical restraints discussed above violate Section 2 of the Sherman Act. **HN11**[] That statute prohibits monopolization, attempt to monopolize, and conspiracy to monopolize interstate trade or commerce. [7] *15 **[*389]** U.S.C. § 2 (1982)*. Plaintiff has simply alleged a general violation of Section 2. Because only the vertical restraints are at issue in this Count, the allegations may be viewed as two independent **[**16]** identical charges against each manufacturer/bottler combination. At the heart of the claim is the proposition that each has monopolized, attempted to monopolize, or conspired to monopolize the market for its own brands by distributing those brands in a manner that exploited market power. While it is clear that this claim would be barred if the Soft Drink Interbrand Competition Act were found applicable in the instant case, the Court concludes that it must be *dismissed* for the independent reason that "monopolization" of one's own brand is not an antitrust violation. *See International Logistics Group, Ltd. v. Chrysler Corp., 884 F.2d 904, 908 (6th Cir. 1989)*, *cert. denied*, *494 U.S. 1066, 108 L. Ed. 2d 784, 110 S. Ct. 1783 (1990)*.

[17]** In *United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*, **HN13**[] the Supreme Court made clear that the illegal market power which is the centerpiece of a monopoly must exist with respect to the competitive market for a commodity, as distinguished from legitimate market power over a single brand. *Id. at 393*. The Court emphasized in *dicta* that "the power that, let us say, automobile or soft drink manufacturers have over their trademarked products is not the power that makes an illegal monopoly." *Id*. With respect to the Section 2 claims in Count III, therefore, the defendants' motions to dismiss are *granted*.

Parallel Conscious Behavior

Count IV involves the same core facts as the prior counts, but asserts violations of Sections 1, 2, and 3 arising from the two vertical arrangements, as well as the horizontal price-fixing arrangement between the bottlers. As with the prior counts, the bottlers are essentially charged with price fixing and prevention of transshipment, while the alleged liability of the manufacturers stems from conduct associated with the enforcement of vertical territorial restraints. Here, however, plaintiff does not plead a conspiracy between **[**18]** defendants but rather "parallel conscious behavior" which resulted in the creation of an oligopoly in the soft drink market. This count further alleges that the conduct creating the oligopoly rose to the level of concerted action, which damaged Sun Dun and competition in the market generally.

HN14[] The Court agrees with plaintiff's contention that parallel concerted action may support a finding of a combination or conspiracy in violation of Section 1. *See* United States v. General Motors Corp., 384 U.S. 127, 142-43, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966) (explicit agreement not required for Section 1 conspiracy when defendants acted neither separately nor independently). General Cinema cites Universal Lite Distributors, Inc. v. Northwest Industries, Inc., 452 F. Supp. 1206, 1217 (D. Md. 1978), *aff'd in part and rev'd in part*, 602 F.2d 1173 (4th Cir. 1979), for the proposition that "conscious parallelism does not *establish* horizontal price fixing." *Id*. (emphasis added). That case does not compel dismissal here. In *Universal*, after extensive discovery, the plaintiffs had failed to produce any evidence of overt collusion, and summary judgment was granted. Here, plaintiff has alleged facts pertaining **[**19]** to overt collusion which, viewed in the light most favorable to it, are sufficient to overcome a motion to dismiss on these grounds.

---

[7] **HN12**[] As with Section 1 of the Sherman Act, Section 2 regulates interstate commerce and was enacted pursuant to Congress' power under the Commerce Clause. *See supra* note 2. On its face, Section 2 does not purport to regulate commerce in the District of Columbia, as does Section 3. Nevertheless, because all four defendants are incorporated and do business outside of the District of Columbia, the Court will assume, for purposes of ruling on these motions, that at least some of the alleged monopolization activity by the defendants was interstate in nature, and therefore would fall within Section 2. Because the Section 2 claims fail for the reasons set forth *infra*, the Court need not decide whether the statute would govern monopolization which occurred between states and the District of Columbia.

Because the facts alleged in Counts I and II parallel those alleged in Count IV, with the exception of the element of express conspiracy, the Court finds the claims under *Sections 1* and *3* sufficient to survive a 12(b)(6) motion. Also, because, for purposes of this motion, it must be assumed **[*390]** that the Soft Drink Interbrand Competition Act does not apply, it is unnecessary to rule on plaintiff's contention in this Count that *15 U.S.C. § 3502 (1982)* deprives defendants of the Act's protection.

The Horizontal Monopoly Claims

Sun Dun's claim that the allegations in Count IV establish violations of *Section 2* must be *dismissed*. First, no *Section 2* claim can be stated with respect to the vertical arrangements as alleged in this case, for the reasons discussed in connection with Count III. Second, there is no allegation of any horizontal arrangement between the two manufacturers at all. [8] The only possible *Section 2* claim remaining in Count IV, therefore, must be based on the horizontal arrangements between General Cinema and Mid-Atlantic.

[20]** In Count IV, Sun Dun alleges an oligopoly in violation of *Section 2*, and in Count VI it redepicts this state of affairs by alleging that "together they [General Cinema and Mid-Atlantic] monopolize the market." Amended Complaint, para. 80. Count V contains related allegations of a conspiracy to monopolize. The Amended Complaint does not specifically invoke the *Section 2* prohibition against *attempted* monopolization. Each of these Counts alleges facts amounting to oligopoly and then simply applies a monopoly label to those facts in an effort to state a *Section 2* claim. Oligopoly can, in some cases, violate *Sections 1* and/or *3* of the Sherman Act, but *competitors*, by conspiring to maintain or create an oligopoly, do not run afoul of the *Section 2* prohibitions against monopoly.

HN15[] The Supreme Court set out the elements of a *Section 2* claim of actual monopolization in *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. They are: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." **[**21]** *Id*. Plaintiff has sufficiently alleged facts under the second element to support its claim that some market power was willfully, as opposed to accidentally, acquired, but its conclusory allegations to the effect that defendants as a group possessed monopoly power or dominant market power do not meet the requirements of the first element. Nowhere does plaintiff allege the requisite market power on the part of any *individual* defendant.

The court held in *Consolidated Terminal Systems, Inc. v. ITT World Communications, Inc., 535 F. Supp. 225 (S.D.N.Y. 1982)*, that ***HN16***[] an attempt to allege the necessary market power by aggregating the market power of several defendants is mere tautology. *Id. at 228*. Allegations that a group of defendants together possess dominant market power may state a *Section 1* claim of oligopoly, but as the court held in *Consolidated*, ***HN17***[] "an oligopoly, or shared monopoly, does not in itself violate *Section 2* of the Sherman Act. Rather, in order to sustain a charge of monopolization or attempted monopolization, a plaintiff must allege the necessary market domination of a particular defendant." *Id. at 228-29*. In *American Telephone & Telegraph Co. v. **[**22]** Delta Communications Corp., 408 F. Supp. 1075, 1106 (S.D. Miss. 1976)*, *aff'd per curiam*, *579 F.2d 972 (5th Cir. 1978)*, *cert. denied*, *444 U.S. 926, 100 S. Ct. 265, 62 L. Ed. 2d 182 (1979)*, the court explained the dangers of such a rule: "To hold that an oligopoly violates *Section 2* amends the Act to subject to antitrust regulation businesses which lack the *Section 2* required market control and the *Section 1* conspiracy." *See also* *Crimpers Promotions, Inc. v. Home Box Office, Inc., 554 F. Supp. 838, 841 n. 2 (S.D.N.Y. 1982)*, *aff'd*, *724 F.2d 290 (2d Cir. 1983)*, *cert. denied*, *467 U.S. 1252, 82 L. Ed. 2d 841, 104 S. Ct. 3536 (1984)* ("To the extent that plaintiff is alleging that defendants as a **[*391]** group attempted to or have monopolized the cable industry, this is a claim of oligopoly, and is not cognizable under *Section 2* of the Sherman Act."). This Court declines to interpret the Sherman Act in a way which would produce such a result. The actual monopolization claims are therefore *dismissed*.

---

[8] *See supra* note 3. The only allegations in Count IV pertaining to conscious parallel behavior are directed toward the bottler defendants. The manufacturers are alleged to have participated in the maintenance of an illegal oligopoly only through their enforcement of the *vertical* restraints.

The claim that the bottlers engaged in a horizontal *conspiracy* to monopolize in violation of *Section 2* is contained in Count V, and it can also be found in a broad reading of Count IV. The question whether two completely separate entities in **[**23]** competition with one another are capable of conspiring to monopolize has been the subject of theoretical debate. *See* 3 P. Areeda & D. Turner, ***Antitrust Law*** para. 841 (1978). [9] It does not appear, however, that any federal court has specifically ruled on this issue.

In *H.L. Hayden Co. v. Siemens Medical Systems, Inc., 672 F. Supp. 724 (S.D.N.Y. 1987)*, *aff'd*, *879 F.2d 1005 (2d Cir. 1989)*, the court noted its "considerable discomfort" with the "seemingly antithetical" idea that two competitors could conspire to monopolize, but did not directly rule on the question. *Id. at 741-42*. In *American Tobacco Co. v. United States,* ***[**24]*** *328 U.S. 781, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*, the Court affirmed a conviction of horizontal competitors for conspiracy to monopolize, but the issue whether *competitors* were capable of conspiring to monopolize was neither presented nor decided. The Court limited its review to the narrow question "whether actual exclusion of competitors is necessary to the crime of monopolization under *Section 2* of the Sherman Act." *Id. at 784*. [10]

An examination of the history of the Sherman Act reveals that Congress' concept **[**25]** of "monopoly" did not include "shared monopolies" or "oligopolies" at all, but rather the complete domination of a market by a *single* economic entity. [11] For example, Senator Hoar, relating to the Senate the understanding of the committee, stated the definition of monopoly as "the sole engrossing to a man's self by means which prevent other men from engaging in fair competition with him." 21 Cong. Rec. 3152 (1890). Senator Edmunds, also reporting on the deliberations of the committee, stated that the subject "was not lightly considered by the committee," and endorsed a dictionary definition to the effect that monopoly exists when one "obtains by any means the *exclusive* right [of trading]." *Id*. (emphasis added). *See also Mobil Oil Corp. v. Blanton, 471 U.S. 1007, 1008, 85 L. Ed. 2d 166, 105 S. Ct. 1874 (1985)* (White, J., dissenting from denial of certiorari) ("*Section 1* proscribes concerted action . . . *Section 2* regulates unilateral conduct.").

[26]** ***HN18***[]

The idea that a monopoly is composed of a single economic entity is also reflected in the requirement in an actual monopolization claim that the requisite market power be held by a single defendant. This idea in no way precludes the possibility of a group of firms conspiring to monopolize, if the aim of the conspiracy is to form a single **[*392]** entity to possess the illegal market power. When, however, two or more competitors conspire to create a market environment in which competition and market entry is improperly restricted, but in which market power continues to be shared among these otherwise unrelated entities, this Court holds that there is no conspiracy to monopolize claim stated under *Section 2*, and the claim must therefore be *dismissed*.

In Count V, Sun Dun alleges that all four defendants conspired to monopolize the relevant market for soft drinks as defined in the preceding counts. While it clearly asserts that each defendant "conspired," the Amended Complaint is

---

[9] Indeed, the whole issue of the applicability of Sherman Act *§ 2* to so-called "shared monopolies" is a matter debated among the treatise writers. *Compare* 3 P. Areeda & D. Turner, *supra*, paras. 842-862 (arguing for regulation of oligopoly under *§ 2*) *with* 2 E. Kintner, *Federal* ***Antitrust Law*** § 12.1 (1980) (actual monopolization can be accomplished only by a single firm).

[10] Conversely, in its recent decision in *Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 713 F. Supp. 937*, slip op. at 18-19, (4th Cir. 1990), the Fourth Circuit affirmed the granting of defendants' motion for summary judgment on a *Section 2* claim, based on an alleged conspiracy between competitors to monopolize. The appellate court's decision, however, rested on the absence of evidence of a conspiracy; the opinion did not address the issue of whether competitors could ever conspire to monopolize in violation of *Section 2*.

[11] Horizontal conspiracies among competitors have not been contemplated as candidates for monopoly regulation in subsequent legislation either. The SDICA, for example, exempts from protection the private enforcement of vertical restrictions by means of price-fixing agreements, horizontal restraints of trade, or group boycotts. *15 U.S.C. § 3502 (1982)*. Each of these means of enforcement violates *§ 1* of the Sherman Act. Were conspiracy to monopolize among competitors possible, we would be left with the anomalous result that horizontal conspiracy to monopolize might be a *protected* means of enforcement of vertical restraints.

totally ambiguous regarding the question of which defendants conspired with which other(s). As discussed above, Sun Dun's memorandum in opposition to the motions to dismiss makes clear that it does not allege any **[**27]** conspiracy between the two manufacturers. [12] If no high-level horizontal conspiracy is alleged, it is not possible that all four defendants were joined in one comprehensive conspiracy. Thus, in order to give effect to the allegation that Coca-Cola and PepsiCo were conspirators, at least two vertical conspiracies must be inferred. The possibility of an additional claim of a low-level horizontal conspiracy between the two bottlers fails for the reasons discussed above.

If Count V is viewed as alleging twin vertical conspiracies to monopolize involving each manufacturer and its bottler, it must also be *dismissed*. The relevant market over which a monopoly exists cannot be defined as narrowly as a single brand. Indeed, plaintiff does not purport to define the relevant market as containing only the products of a single manufacturer, but rather as the more general market for soft drinks dispensed through vending machines. It is impossible for either manufacturer to conspire with its bottler **[**28]** to monopolize this market unless the conspiracy has as its *purpose* the elimination not only of other full-service vendors such as Sun Dun, but also of other soft drink brands, from this market. There are no facts alleged remotely suggesting such an objective. Further, it appears fatally inconsistent to assert that General Cinema and Mid-Atlantic each independently engaged in conspiracies to vertically monopolize (to the exclusion of one another) and at the same time conspired *with* one another to monopolize horizontally.

Essential Facilities

In Count VI, Sun Dun alleges a conspiracy to monopolize between General Cinema and Mid-Atlantic, claiming that defendants violated *Sections 2* and *3* by denying it access to "essential facilities" of its business, namely cans of Coca Cola and Pepsi-Cola products.

HN19[] The so-called "essential facilities" doctrine does not create a new species of antitrust violation. It simply addresses the narrow situation in which a firm gains monopoly power by controlling and refusing to deal in an essential facility at one stage of production, thus extending its monopoly to other stages of production, and to other markets. *MCI Communications Corp. v. American* ***[**29]*** *Telephone & Telegraph Co., 708 F.2d 1081, 1132* (7th Cir.), *cert. denied*, *464 U.S. 891, 78 L. Ed. 2d 226, 104 S. Ct. 234 (1983)*. The elements of liability under the doctrine are: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *Id. at 1132-33*. [13] Failure to plead facts supporting any one of these elements is sufficient to support dismissal. Due to the **[*393]** somewhat novel nature of the essential facilities claim here, however, the Court will discuss the deficiencies in the allegations in turn.

[30]** In support of the first element, Sun Dun alleges that "together, they [General Cinema and Mid-Atlantic] monopolize the market." Amended Complaint, para. 80. Because, as discussed above, competitors in the same market are not capable of monopolizing that market, Sun Dun is no more able to state a *Section 2* claim under the essential facilities doctrine than it was in the prior counts. Sun Dun argues, however, that cases like *Beverage Management, 653 F. Supp. at 1156*, establish the proposition that control by a group of businesses does not defeat liability under the doctrine. While it is certainly true that an essential facility need not be controlled by a single firm, [14] it does not follow that competitors, each exercising control over *separate products*, meet the requirements of the

---

[12] *See supra* notes 3 and 8.

[13] As is suggested by these elements, ***HN20***[] the essential facilities doctrine relates most directly to a claim of monopolization under *Section 2* of the Sherman Act. *See* *Hendricks Music Co. v. Steinway, Inc., 689 F. Supp. 1501, 1509 (N.D. Ill. 1988)*. Nevertheless, some courts have applied the doctrine to claims under *Sections 1* and *3* as well. *See, e.g., Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 992-93 (D.C. Cir. 1977)*, *cert. denied*, ***436 U.S. 956, 57 L. Ed. 2d 1121, 98 S. Ct. 3069 (1978)***; *Beverage Management, Inc. v. Coca-Cola Bottling Corp., 653 F. Supp. 1144, 1156 (S.D. Ohio 1986)*. Because, as discussed *infra*, Sun Dun has otherwise failed to state a claim under the essential facilities doctrine, the Court need not decide the scope of the doctrine's application.

first element. *See* *Flip Side Productions, Inc. v. Jam Productions, Ltd., 843 F.2d 1024, 1034* (7th Cir.), *cert. denied*, *488 U.S. 909, 109 S. Ct. 261, 102 L. Ed. 2d 249 (1988)*. ***HN21***[] Although the essential facilities doctrine applies to facilities which enable the monopolist to *extend* monopoly power from one stage of production to another, it does not apply to *end products* in markets containing several competing brands. **[**31]** A single brand cannot function as a bottleneck over such a market. By withholding access to a brand, therefore, a firm is not able to extend monopoly power through subsequent stages of production.

Sun Dun alleges that it is "unable to duplicate the essential facility [cans of Coca-Cola and Pepsi] since it is not a franchised, licensed bottler and must buy pre-mixed cans of Coca-Cola and Pepsi-Cola to stock its soft drink vending machines." Amended Complaint, para. 82. Sun Dun also alleges, however, that its machines sell both soft drinks and fruit juices, and that Coca-Cola and Pepsi-Cola products combined account for only 50% of its business. Amended Complaint para. 16. It is the opinion of this Court **[**32]** that plaintiff also fails to allege sufficient facts to the effect that it is practically unable to duplicate the "facility."

HN23[] The requirement that a plaintiff not be able to practically or reasonably duplicate the purported facility is not met simply by an allegation that the plaintiff is unable to participate in the manufacture and distribution of whatever brand of a product it chooses. Assuming, *arguendo*, that the brand name products can be "essential facilities," plaintiff cannot state a claim as long as it is able to find reasonable substitutes for these products. *See* *Monarch Entertainment Bureau, Inc. v. New Jersey Highway Authority, 715 F. Supp. 1290, 1300* (D.N.J.), *aff'd without op*. *893 F.2d 1331 (2d Cir. 1989)* (arena not likely to be an essential facility unless there are no other facilities which could enable some form of competition); P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 736.2b (Supp. 1988) (essential facility must be vital, not merely helpful, to the plaintiff's competitive viability). Given the allegation that plaintiff is able to find other products with which to stock its machines, the fact that it is unable to "duplicate" cans of certain soft **[**33]** drinks is insufficient to meet the requirements of the second element. After all, people still do drink RC Cola. [15]

This Court is also of the opinion that ***HN24***[] particular brand names within a product market are not the appropriate subject matter of an essential facilities claim. Generally, the doctrine has been applied to situations in which *physical conditions* prohibit duplication of the facility. *Hendricks Music Co., 689 F. Supp. at 1509*. *See, e.g.,* *Otter Tail Power Co. v. United States, 410 U.S. 366, 375, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)* (electric power lines); *Hecht, 570 F.2d at 993* (football stadium); **[*394]** *MCI Communications Corp., 708 F.2d at 1133* (telephone signal distribution facilities); *Laurel Sand & Gravel, Inc. v. CSX Transportation, Inc., 704 F. Supp. 1309, 1322 (D. Md. 1989)* (railroad tracks). No support emerges from the cases for the proposition that the legal impossibility of duplicating a trademarked product should be sufficient to satisfy **[**34]** this requirement of the doctrine. Indeed, it is not at all impossible for Sun Dun to manufacture and distribute its own soft drink products, as do many supermarket chains. It is merely impossible for Sun Dun to duplicate them in such a way as to capitalize on the brand recognition and goodwill of another firm's product. The antitrust laws protect competition; they do not compel a manufacturer to share the value of the goodwill acquired through competition. Defendants' motions to dismiss Count VI of the Amended Complaint are therefore *granted*.

The Pendent Claims

The Exercise of Pendent Jurisdiction

The Court must next consider whether to exercise pendent jurisdiction over the claims set forth by Sun Dun which arise under the D.C. Code and tort law. *Cf*. *28 U.S.C. § 1366 (1982)* ***HN25***[] ("laws applicable exclusively to the District of Columbia" are not federal laws, though enacted by Congress); *id*. *§ 1332(d)* (District of Columbia is a

---

[14] ***HN22***[] Even firms that are nominally competitors, if they act as a single economic entity with respect to the facility (e.g., by sharing a single facility), may be subject to liability under the doctrine. *See* *Turf Paradise, Inc. v. Arizona Downs, 670 F.2d 813, 822* (9th Cir.), *cert. denied*, ***456 U.S. 1011, 73 L. Ed. 2d 1308, 102 S. Ct. 2308 (1982)***.

[15] "RC Cola" is a registered trademark of the Royal Crown Cola Company.

"state" for purposes of diversity jurisdiction). The decision to exercise pendent jurisdiction lies solely within this Court's discretion. *United Mine Workers v. Gibbs, 383 U.S. 715, 726, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*; *ARC America, 109 S. Ct. at 1666*. Here, Sun **[**35]** Dun's federal claims and its claims based on tort and the D.C. Code "derive from a common nucleus of operative fact." *Gibbs, 383 U.S. at 725*. Moreover, for the reasons set forth above, the federal claims have "substance sufficient to confer subject matter jurisdiction on the court." *Id*. Finally, the Court believes that "considerations of judicial economy, convenience and fairness to [the] litigants," *id. at 726*, make it appropriate to exercise pendent jurisdiction over Sun Dun's common-law and statutory claims which do not rest on federal law. As discussed below, the D.C. Code provisions are *in pari materia* with the corresponding provisions of the Sherman Act; therefore, it is an economical use of judicial resources to resolve all claims in this proceeding. In addition, because the pendent claims might be time-barred were Sun Dun to seek to file suit in the District of Columbia or in a Maryland state court, it would be unfair for this Court to decline to exercise jurisdiction over these claims. *See* *Hector v. Weglein, 558 F. Supp. 194, 207 (D. Md. 1982)*; 13B C. Wright, A. Miller & E. Cooper, *Federal Practice & Procedure* § 3567.1, at 128-32 (1984).

Claims Based **[**36]** on the D.C. Code

In each of the counts of the Amended Complaint alleging a federal antitrust violation, Sun Dun has also invoked the parallel provisions of the D.C. Code. In considering these claims, it is necessary to address the background of the D.C. Code, the substantive interpretation of the pertinent statutes, and the applicability of the D.C. Code to the allegations set forth in the Amended Complaint.

HN26[] The District of Columbia's antitrust laws are set forth at *D.C. Code Ann. §§ 28-4501* to -4518 (1981). These statutes were adopted in 1980 by the Council of the District of Columbia, pursuant to the legislative authority granted to it by Congress in the District of Columbia Self Government and Governmental Reorganization Act of 1973 (the "Home Rule Act"), 87 Stat. 774, Pub. L. 93-198 (1973) (codified at Title 1 of the D.C. Code). [16] That power

> **[*395]** extends to all rightful subjects of legislation within the District consistent with the Constitution of the United States and the provisions of this Act subject to all the restrictions and limitations imposed upon the states by the 10th section of the 1st article of the Constitution of the United States.

D.C. Code Ann. § 1-204 (1981). **[**37]** ***HN27***[] Thus, even though the District of Columbia is not a state, Congress has specifically determined that the legislative enactments of the D.C. Council are subject to the same constitutional constraints as are those of the states. Specifically, acts passed by the D.C. Council are subject to analysis under the federal preemption doctrine and the *Commerce Clause*. *See, e.g.,* *Don't Tear It Down, Inc. v. Pennsylvania Avenue Development Corp., 206 U.S. App. D.C. 122, 642 F.2d 527, 534 n. 2 (D.C. Cir. 1980)* ("Surely the preemption doctrine effects [*sic*] District of Columbia legislation no less than state enactments."); *Quality Brands, Inc. v. Barry, 715 F. Supp. 1138, 1139 (D.D.C. 1989)*, *aff'd*, *284 U.S. App. D.C. 78, 901 F.2d 1130 (D.C. Cir. 1990)* ("[A] conventional *Commerce Clause* analysis does apply to laws passed by the D.C. government."). *Cf. John R. Thompson Co*., 346 U.S. at 107 (suggesting, in a case preceding the Home Rule Act, that District of Columbia legislation would be subject to *Commerce Clause* analysis). This is true even though the Council's enactments are subject to congressional review. *See, e.g.,* *Doe v. Stephens, 271 U.S. App. D.C. 230, 851 F.2d 1457, 1465 (D.C. Cir. 1988)* (finding that District of Columbia Mental Health Information **[**38]** Act, which was enacted after congressional review, was preempted by preexisting federal statute); *Goudreau v. Standard Federal*

---

[16] As discussed above, *see supra* note 2, ***HN28***[] the Constitution grants Congress the power to legislate for the District of Columbia. *U.S. Const. art. 1, § 8, cl. 17*. Through the Home Rule Act, Congress has ceded some of that authority to the D.C. Council. *See* D.C. Code §§ 1-206, -233 (1981) (limits on Council's legislative authority). The D.C. Code provisions at issue here were enacted by the Council, subject to the congressional oversight provided for in § 1-233(c), and "subject to the retention by Congress of the ultimate legislative authority over the nation's capital granted by article I, § 8, of the Constitution." *Id*. § 1-201(a). The Supreme Court long ago determined that "there is no constitutional barrier to the delegation by Congress to the District of Columbia of full legislative power." *District of Columbia v. John R. Thompson Co., 346 U.S. 100, 109, 97 L. Ed. 1480, 73 S. Ct. 1007 (1953)*.

Saving & Loan Association, 511 A.2d 386, 391-92 (D.C. 1986) (holding that District of Columbia statute, enacted after congressional review, was preempted by federal banking law). *Cf.* *Gary v. United States, 499 A.2d 815, 829 (D.C. 1985)*, *cert. denied*, *477 U.S. 906, 91 L. Ed. 2d 568, 106 S. Ct. 3279 (1986)* (examining legislative history of Home Rule Act and concluding that Congress did not consider oversight provisions central to the Act).

[39]** The substantive provisions of the D.C. Code upon which Sun Dun relies mirror the corresponding provisions of the Sherman Act. In fact, *Section 28-4515* declares: "It is the intent of the Council of the District of Columbia that in construing this chapter, a court of competent jurisdiction may use as a guide interpretations given by federal courts to comparable antitrust statutes." *D.C. Code Ann. § 28-4515* (1981). *Cf.* *Neugebauer v. A.S. Abell Co., 474 F. Supp. 1053, 1071 (D. Md. 1979)* (success or failure of state antitrust claims depended on that of federal claims, where state antitrust laws were patterned on federal statutes).

Specifically, *Section 28-4502 of the D.C. Code* ***HN29***[] is substantively the same as the first sentence of *Section 3* of the Sherman Act, and is therefore akin to the first sentence of *Section 1* of the federal law. *Section 28-4503* prohibits the same conduct as does *Section 2* of the Sherman Act. Thus, the discussion above concerning Sun Dun's claims under the Sherman Act pertains equally to Sun Dun's claims under the D.C. Code, and, thus, Sun Dun's claims brought under *Section 28-4502* survive the pending motions, while its claims under *Section 28-4503* must be *dismissed*.

[40]** The remaining sections of the D.C. Code which Sun Dun has invoked are remedial in nature. *Section 28-4508* ***HN30***[] provides that "any person who is injured" may seek monetary and/or injunctive relief. As with Section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*, treble damages are available. *D.C. Code Ann. § 28-4508* (1981).

Section 28-4509 defines "injured" person to include "any indirect purchaser in the chain of manufacture, production, or distribution of goods or services." *Id*. § 28-4509(a). Sun Dun has alleged in its Amended Complaint that it made both direct and indirect purchases from the defendants. As noted in the discussion above concerning Sun Dun's standing to sue under **[*396]** federal law, Section 4 of the Clayton Act does not permit claims for damages by indirect purchasers. *See* *Illinois Brick, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061*. Although the defendants argued in their motions to dismiss that the *Illinois Brick* doctrine mandated that the D.C. Code's cause of action for indirect purchasers be preempted by federal law, the Supreme Court has since answered this question squarely to the contrary in *ARC America, 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86*. In that case, several states brought class actions against various **[**41]** cement manufacturers, alleging a nationwide conspiracy to fix prices. The plaintiffs invoked both federal and state antitrust statutes; the state laws provided a cause of action for indirect purchasers. The Court pointed out that ***HN31***[] "Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies," and that consequently "federal antitrust laws do not preempt state law." *Id. at 1665*. The Court then determined that "nothing in *Illinois Brick* suggests that it would be contrary to congressional purposes for States to allow indirect purchasers to recover under their own antitrust laws." *Id. at 1666*. Consequently, Sun Dun's claims for damages as an indirect purchaser under the D.C. Code are not preempted by federal antitrust laws. Plaintiff's claims for injunctive relief survive as well, not only because the Supreme Court has held that state antitrust laws are not preempted, but also because, as noted above in the discussion of standing, federal law itself permits injunctive relief for indirect purchasers.

The final issue is whether the D.C. Code can be applied to plaintiff's claims. The defendants maintain that Sun Dun has not alleged a sufficient **[**42]** nexus to the District of Columbia for its law to apply. In fact, the defendants assert that Sun Dun has invoked the D.C. Code only because, unlike federal and Maryland antitrust statutes, it provides a remedy in damages for indirect purchasers.

Sun Dun's Amended Complaint contains few specific references to the District of Columbia itself; most of the allegations refer to the "Washington, D.C. metropolitan area," which by plaintiff's own definition includes Maryland and Virginia. Nevertheless, Sun Dun has asserted that it does much of its business in the District of Columbia, and thus it is possible that plaintiff has suffered harm there. Maryland applies the doctrine of *lex loci delecti.* *Hauch v. Connor, 295 Md. 120, 123-25, 453 A.2d 1207, 1209 (1983)*; *White v. King, 244 Md. 348, 352, 223 A.2d 763, 765*

(1966). Consequently, this Court sitting in Maryland, could apply the law of the District of Columbia to the alleged harm suffered there by plaintiff. Although the allegations in the Amended Complaint are vague in terms of the *situs* of harm, the Court believes that they are sufficient to withstand defendants' motions to dismiss the claims based on the D.C. Code.

Nevertheless, **[**43]** even if, after discovery, it becomes apparent that the alleged harm suffered by Sun Dun bears a sufficient nexus to the District of Columbia to warrant application of that jurisdiction's law, a second and more significant bar may prohibit Sun Dun from recovery under the D.C. Code. As discussed above, the *Commerce Clause of the United States Constitution* applies to the laws of the District of Columbia. It is well established that ***HN32***[] "the *Commerce Clause* . . . permits only *incidental* regulation of interstate commerce by the States; direct regulation is prohibited." *Edgar v. MITE Corp., 457 U.S. 624, 640, 73 L. Ed. 2d 269, 102 S. Ct. 2629 (1982)* (emphasis in original). *See also* *City of Philadelphia v. New Jersey, 437 U.S. 617, 624, 57 L. Ed. 2d 475, 98 S. Ct. 2531 (1978)*; *Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 25 L. Ed. 2d 174, 90 S. Ct. 844 (1970)*. ***HN33***[] The D.C. Code provisions at issue purport to regulate antitrust activity "throughout the District of Columbia," *see* *D.C. Code Ann. § 28-4501* (1981), and are therefore constitutional on their face. Nevertheless, it clearly would be unconstitutional under the *Commerce Clause* to apply the D.C. Code to claims which, though bearing some connection to the District of Columbia, are in fact interstate in nature and are **[**44]** thus regulated by federal antitrust provisions. *See* *Flood v. Kuhn, 407 U.S. 258, 284-85, **[*397]** 32 L. Ed. 2d 728, 92 S. Ct. 2099 (1972)* (interstate transactions are governed by federal, not state, antitrust laws); *Denison Mattress Factory v. Spring-Air Co., 308 F.2d 403, 413 (5th Cir. 1962)* (because defendant's activities in Texas were "occasional and isolated and that the contract in question was interstate as to execution and performance," federal rather than state antitrust laws applied); *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79, 85 (E.D.N.Y. 1980)* (state antitrust laws could not apply because defendants' activities were interstate in nature).

Thus, the only claims of Sun Dun to which the D.C. Code might possibly apply are those for direct and indirect purchases within the District of Columbia which do not involve an interstate link, and which thus do not fall within the scope of federal ***antitrust law***. Because all defendants, as well as plaintiff, are incorporated and have their principal places of business outside of the District of Columbia, it is uncertain whether Sun Dun in fact has any viable claims under the D.C. Code. *See id*. This determination, however, must await discovery and **[**45]** any motions for summary judgment which defendants choose to file.

The Common-Law Tort Claims

Sun Dun has also set forth claims for unfair competition and for tortious interference with business relations. In their motions to dismiss, the defendants have assumed that Maryland law governs these claims, and Sun Dun has not disputed the applicability of Maryland law. Thus, although the *situs* of the alleged harm is not specified in the Amended Complaint, for the purpose of deciding the pending motions, the Court will consider these claims as arising under Maryland law. [17]

Count VII of the Amended Complaint alleges that all four defendants unfairly competed with plaintiff by curtailing Sun Dun's supply of cans of Coke and Pepsi and by disparaging Sun Dun to its customers. ***HN34***[] Under Maryland law, a claim for unfair competition can encompass "damaging or jeopardizing another's business by fraud, deceit, trickery or unfair methods of any sort. . . . What constitutes unfair competition in a given case is governed by its own particular facts and circumstances." *Baltimore Bedding Corp. v. Moses, 182 Md. 229, 237, 34 A.2d 338, 59 U.S.P.Q. (BNA) 405 (1943)*. *See also* *Cavalier Mobile Homes, Inc. v. Liberty Homes, **[**46]** Inc., 53 Md. App. 379, 389, 454 A.2d 367, 374 (1983)* (quoting *Baltimore Bedding*). Sun Dun has alleged the "unfair methods" necessary

---

[17] The Court finds it interesting that Sun Dun relies on Maryland common law, but District of Columbia statutory law, for relief from various harms arising from the same conduct by the defendants. As noted above, the defendants maintain that Sun Dun has invoked the D.C. Code only because it provides relief to an indirect purchaser, which is unavailable under federal and Maryland antitrust statutes. Although Sun Dun might have suffered separate injuries in Maryland and the District of Columbia, which would allow the law of each jurisdiction to apply to the respective harms, this apparent discrepancy in Sun Dun's pleading raises further questions about whether the D.C. Code can in fact apply to any of plaintiff's alleged injuries.

to set forth a claim for unfair competition. Moreover, because a violation of antitrust laws could itself constitute unfair competition, *see id*., this count must stand so long as Sun Dun has viable antitrust claims. Consequently, defendants' motions to dismiss Count VII are *denied*.

[47]** Count VIII sets forth a claim for tortious interference with business relations against defendants PepsiCo and General Cinema, alleging that they disparaged Sun Dun to its customers and threatened suppliers who dealt with Sun Dun. ***HN35***[] Under Maryland law, this tort consists of four elements: "'(1) intentional and wilful acts; (2) calculated to cause damage to the plaintiffs in their lawful business; (3) done with the unlawful purpose to cause such damage and loss, without right or justifiable cause on the part of the defendants (which constitutes malice); and (4) actual damage and loss resulting.'" *Willner v. Silverman, 109 Md. 341, 355, 71 A. 962, 964 (1909)* (quoting *Walker v. Cronin, 107 Mass. 562 (1881))*, *quoted in* *Natural Design, Inc. v. Rouse Co., 302 Md. 47, 71, 485 A.2d 663, 675 (1984)*. Plaintiff's allegations **[*398]** in its Amended Complaint sufficiently state the elements of the tort to survive the pending motions to dismiss.

Moreover, as Chief Judge Harvey of this Court has noted, the third element of the test relating to malice "necessarily hinges on whether defendants' actions constitute a violation of federal or state antitrust laws." *Purity Products, Inc. v. Tropicana* ***[**48]*** *Products, Inc., 702 F. Supp. 564, 575 (D. Md. 1988)*, *aff'd*, *887 F.2d 1081 (4th Cir. 1989)*. For this reason, "a summary disposition in favor of the defendants [is] appropriate only in the absence of a demonstrable antitrust violation. . . . [Plaintiff's] business tort action under Maryland law stands or falls along with its federal antitrust claims." *Faulkner Advertising Associates, Inc. v. Nissan Motor Corp. in U.S.A., 905 F.2d 769, 775 (4th Cir. 1990)* (quoting *Purity Products, 702 F. Supp. at 575*, with approval and remanding state claim for consideration with federal antitrust claim). Because the Court has found that some of plaintiff's antitrust claims are sufficient to withstand defendants' motions to dismiss, the claim for tortious interference likewise must remain. Defendants' motions to dismiss Count VIII are therefore *denied*.

CONCLUSION

To summarize the Court's rulings, plaintiff Sun Dun has standing as a direct purchaser to seek damages under Section 4 of the Clayton Act for any harm suffered in that capacity as a result of defendants' alleged violations of federal ***antitrust law***. In addition, plaintiff has standing as both a direct and **[**49]** indirect purchaser to seek injunctive relief under Section 16 of the Clayton Act. The D.C. Code, under which plaintiff has set forth pendent claims, affords Sun Dun standing as both a direct and indirect purchaser for damages and injunctive relief.

Defendants' motions to dismiss plaintiff's claims under *Section 2* of the Sherman Act are *granted*, as are the motions to dismiss claims under *Section 3* which rely on the essential facilities doctrine. In all other respects, defendants' motions to dismiss plaintiff's claims under *Sections 1* and *3* of the Sherman Act are *denied*.

The Court, in its discretion, will exercise pendent jurisdiction over plaintiff's claims which rest on the D.C. Code or on Maryland tort law. Because an assessment of defendants' liability for unfair competition and tortious interference with business relations depends upon the resolution of the antitrust claims, defendants' motions to dismiss Counts VII and VIII are *denied*.

Defendants' motions to dismiss the claims brought under the District of Columbia's law are *granted* with respect to the claims arising under *D.C. Code Ann. § 28-4503* (1981), for the reasons stated in dismissing plaintiff's claims based **[**50]** on *Section 2* of the Sherman Act. In all other respects, defendants' motions to dismiss the D.C. Code claims are *denied*. The Court cautions, however, that the D.C. Code can only apply to those of plaintiff's claims which involve a sufficient nexus to the District of Columbia to warrant the application of that jurisdiction's law under the doctrine of *lex loci delecti*, and which are not so interstate in nature as to offend the *Commerce Clause*, were the D.C. Code to be applied to them.

An Order will be entered separately which embodies the above rulings.

ORDER

For the reasons set forth in the foregoing Memorandum of even date, IT IS, this 25th day of June, 1990, ORDERED:

1. That the defendants' motions to dismiss claims set forth in Counts III, IV, V, and VI of plaintiff's Amended Complaint which arise under *Section 2* of the Sherman Act BE, and the same hereby ARE, GRANTED;

2. That the defendants' motions to dismiss claims set forth in Count VI of plaintiff's Amended Complaint which arise under *Section 3* of the Sherman Act and which rest upon the "essential facilities doctrine" BE, and the same hereby ARE, GRANTED;

3. That the defendants' motions to dismiss claims set forth **[**51]** in Counts III, IV, V, **[*399]** and VI of plaintiff's Amended Complaint which are based on pendent jurisdiction and arise under *D.C. Code Ann. § 28-4503* (1981) BE, and the same hereby ARE, GRANTED;

4. That in all other respects defendants' motions to dismiss federal and pendent claims set forth in Counts I, II, III, IV, VII and VIII of plaintiff's Amended Complaint BE, and the same hereby ARE, DENIED; and

5. That the Clerk of Court mail copies of this Order and the accompanying Memorandum to counsel for the parties.

Thompson v. Metropolitan Multi-List, Inc.

United States District Court for the Northern District of Georgia, Atlanta Division

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

Summary judgment should be used sparingly in complex antitrust litigation where motive and intent play leading roles. In addition, the plaintiff carries the burden of adducing significant probative evidence of the essential elements of the asserted claims and the existence of genuine issues of fact.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN2[] Per Se Rule & Rule of Reason, Per Se Violations

A particular restraint is considered a per se violation of § 1 of the Sherman Act when the restraint is "plainly anticompetitive" and lacking of "any redeeming virtue." A practice is plainly anticompetitive and lacking in any redeeming virtue when it denies consumers the opportunity to choose among alternative offers without offering the possibility of any efficiency-producing economic activities.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] Price Fixing & Restraints of Trade, Tying Arrangements

A tying arrangement is an arrangement in which a seller agrees to sell one product, the tying product, only on the condition that the buyer also purchase a second product, the tied product. There are four basic elements in a tying claim: (1) two separate products, the tying and the tied product; (2) sufficient economic power in the tying market to coerce purchase of the tied product; (3) involvement of a not insubstantial amount of interstate commerce in the tied market; and (4) anticompetitive effects in the tied market. Tying agreements are regarded as illegal per se because they deny competitors free access to the market for the tied product not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] Price Fixing & Restraints of Trade, Tying Arrangements

An essential element of a tying claim is a finding that the defendants possess sufficient economic power to restrain free competition. The defendants possess such economic power if they have the ability to force a purchaser of multiple listing services to do something that he would not do in a competitive market and have some advantage whether legal, physical or economic, which is not shared by their competitors in the multiple listing service market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] Price Fixing & Restraints of Trade, Tying Arrangements

It is the plaintiffs' burden to demonstrate sufficient evidence from which a reasonable jury could find that the defendants possess the requisite market power, an essential element of the tying claim.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] Price Fixing & Restraints of Trade, Tying Arrangements

Unlike cases where the unique nature of the tying product gives one party an advantage over its competitors and thus creates a disincentive for competition, multiple listing services can and have been effectively duplicated.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN7[] Regulated Practices, Price Fixing & Restraints of Trade

The essential facilities doctrine provides that a monopolist's refusal to give competitors reasonable access to an essential facility is an illegal restraint of trade. Where facilities cannot practicably be duplicated by would-be competitors, those in possession of them must allow them to be shared on fair terms.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN8[] Regulated Practices, Price Fixing & Restraints of Trade

To establish liability under the essential facilities doctrine the plaintiffs must prove four elements: (1) control of the essential facility by a monopolist; (2) a competitor's inability, practically or reasonably, to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to the competitor. The plaintiffs must provide some evidence of each element in order to survive the defendants' motion for summary judgment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] Monopolies & Monopolization, Actual Monopolization

A business monopolizes in violation of antitrust laws if it deliberately follows a course of conduct through which it obtains or maintains power to control price or exclude competition in the relevant market.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] Per Se Rule Tests, Manifestly Anticompetitive Effects

A plaintiffs may prevail under the ***antitrust law*** by showing that the membership requirement in a multi-listing service, as it actually operates in the market, unreasonably restrains competition. This test, known as the "rule of reason," focuses analysis on the competitive significance of the challenged practice and requires courts to void any practice whose anticompetitive effects outweigh its contributions to competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The "rule of reason" test requires a showing that a multi-listing service has sufficient market power in the relevant market such that an exclusion from membership is not reasonably grounded in competitive needs produces competitive harm. Only if the multi-listing service possesses such market power does the inquiry turn to the issue of whether the membership requirement is justified by legitimate competitive needs and whether it is narrowly tailored to that end.

Evidence > Relevance > Preservation of Relevant Evidence > Exclusion & Preservation by Prosecutors

Real Property Law > Brokers > Fiduciary Responsibilities

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Evidence > Privileges > General Overview

HN12[] **Preservation of Relevant Evidence, Exclusion & Preservation by Prosecutors**

In determining whether a defendant has sufficient market power in the relevant market, the plaintiff need not demonstrate that the defendant has a monopoly in the market. Rather, the evidence need show only that exclusion from such privileges results in the denial of the opportunity to compete effectively on equal terms.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN15[] **Housing & Public Buildings, Fair Housing**

The unsupported allegation that black real estate brokers' memory of racism practiced by realtors discourages them from joining a board of realtors or multiple listing service is insufficient to support a Fair Housing Violation claim.

Judges: [*1] Robert L. Vining, Jr., United States District Judge.

Opinion by: VINING

Opinion

ORDER

This antitrust action is before the court on the parties' cross motions for summary judgment and the plaintiffs' motion to compel. [1] The plaintiffs, Fletcher Thompson Realty and Empire Real Estate Board ("Empire"), allege that Metropolitan Multi-List's ("Metro MLS") requirement that members of the multiple listing service also be members of a board of realtors violates *sections 1* and *2* of the Sherman Act, *15 U.S.C. § § 1*, *2*, the Fair Housing Act, *42 U.S.C. § 3604*, and *42 U.S.C. § 3606*.

Metro MLS is a real estate multiple listing service wholly owned by the co-defendant, DeKalb Board of Realtors ("DeKalb Board"). Metro MLS offers **[*2]** a shared information service through which its members advertise real property listings and offers of commission splits to assisting brokers. As a condition of membership in and access to its multiple listing services, Metro MLS requires real estate brokers to be members of a board of realtors. It is this membership requirement that the plaintiffs challenge.

Plaintiff Fletcher Thompson, a real estate broker, applied to participate in Metro MLS but was denied access to the service because he is not a member of his local board of realtors. He has never applied for a board of realtors membership. Plaintiff Empire is a professional organization predominantly made up of black real estate brokers and sales associates. Like a board of realtors, Empire has an arbitration process available for the resolution of disputes and a code of ethics. Together the parties argue that the requirement of membership in a board of realtors as a precondition to access to Metro MLS services restrains competition in the market for multiple listing services.

Because of the complexity of this action and the numerous arguments made, the court will consider the motions for summary judgment as they relate to each **[*3]** count of the amended complaint. In doing so, the court is mindful that *HN1*[] summary judgment should be used sparingly in complex antitrust litigation where motive and intent play leading roles, *Poller v. Columbia Broadcasting System, 368 U.S. 464, 82 S.Ct. 486 (1962)*, but also recognizes that the plaintiffs carry the burden of adducing significant probative evidence of the essential elements of the asserted claims and the existence of genuine issues of fact.

COUNT I

[1] Based on the court's decision as to the defendants' Motion for Summary Judgment the plaintiffs' Motion for Partial Summary Judgment and Motion to Compel are rendered moot. Also pending is a Motion for Reconsideration of the court's previous denial of a motion to intervene; for the same reasons that motion also is now moot.

Count I of the amended complaint alleges that Metro MLS's membership requirement is a per se violation of *section 1* of the Sherman Act because it is an illegal tying arrangement. ***HN2***[] A particular restraint is considered per se illegal when the restraint is "plainly anticompetitive" and lacking of "any redeeming virtue." *See Broadcast Music, Inc. v. Columbia Broadcasting Co., 441 U.S. 1, 8, 99 S.Ct. 1551, 1556 (1979)*. A practice is plainly anticompetitive and lacking in any redeeming virtue when it denies consumers the opportunity to choose among alternative offers without offering the possibility of any efficiency-producing economic activities. *Id.*

HN3[] A tying arrangement is an arrangement in which a seller agrees to sell **[*4]** one product, the tying product, only on the condition that the buyer also purchase a second product, the tied product. *Jefferson Parish Hosp. v. Hyde, 466 U.S. 2, 12, 104 S.Ct. 1551, 1558 (1984)*. There are four basic elements in a tying claim: (1) two separate products, the tying and the tied product; (2) sufficient economic power in the tying market to coerce purchase of the tied product; (3) involvement of a not insubstantial amount of interstate commerce in the tied market; and (4) anticompetitive effects in the tied market. *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 711-12 (11th Cir. 1984)*; *Driskill v. Dallas Cowboys Football Club, Inc., 498 F.2d 321 (5th Cir 1974)*. Tying agreements are regarded as illegal per se because "they deny competitors free access to the market for the tied product not because the party imposing the tying requirements has a better product or a lower price but because of his power or leverage in another market. *Northern Pac. Ry. v. United States, 356 U.S. 1, 6, 78 S.Ct. 514, 518 (1958)*.

The plaintiffs allege that participation in Metro MLS, the tying product, can be attained only through the purchase of membership in a **[*5]** board of realtors, the tied product. Thus, the relevant product market is the market for multiple listing services, and the relevant geographic market is that portion of the metropolitan Atlanta area in which the defendants operate. *See Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S.Ct. 623, 628 (1961)*.

HN4[] An essential element of a tying claim is a finding that the defendants possess sufficient economic power to restrain free competition. *Midwestern Waffles, 734 F.2d at 711-12*. The defendants possess such economic power if they have the ability to force a purchaser of multiple listing services to do something that he would not do in a competitive market and have some advantage - legal, physical or economic - not shared by their competitors in the multiple listing service market. *See United States Steel v. Fortner Enter., Inc., 429 U.S. 610, 620, 97 S.Ct. 861, 867 (1977)* (Fortner II); *Tic-X-Press v. Omni Promotions Co., 815 F.2d 1407, 1420 (11th Cir. 1987)*. The plaintiffs allege that the defendants' market power is evident in the fact that the bulk of broker assisted residential real estate business on the south side of Atlanta is conducted through Metro **[*6]** MLS. The plaintiffs further allege that the defendants have an economic advantage over would-be competitors in that Metro MLS's services cannot be effectively duplicated because of the substantial capital outlay required and the unlikelihood of penetrating the multiple listing service market.

HN5[] It is the plaintiffs' burden to demonstrate sufficient evidence from which a reasonable jury could find that the defendants possess the requisite market power, an essential element of the tying claim. The court finds, however, that the plaintiffs' evidence relating to the defendants' economic power is insufficient as a matter of law. The plaintiffs have produced no evidence of the defendants' ability to force brokers to purchase real estate board memberships other than the general allegations of one real estate broker who stated that "the bulk of broker-assisted residential real estate business on the south side of Atlanta, by any measure, is conducted through Metro MLS." Affidavit of Sid Venable at 7. The relevant geographic market is not limited to the south side of Atlanta but encompasses the area of effective competition within which the defendants operate, *see Tampa Electric Company,* ***[*7]*** *365 U.S. 320, 81 S.Ct. 623*, and there is no evidence in the record concerning the defendants' position in that market. *See Jefferson Parish Hosp., 466 U.S. at 26-27, 104 S.Ct. at 1566* (hospital with 30% share of patients in its market lacked sufficient economic power).

Moreover, there is a competitive multiple listing service, First Multiple Listing Service (FMLS), within the relevant market which does not require board of realtors membership. The plaintiffs have failed to produce any evidence that FMLS is not able to provide substantially the same services as Metro MLS within the relevant market.

Even assuming that the defendants possess the ability to force brokers to purchase board of realtors memberships, the plaintiffs have not demonstrated that the defendants have a cost advantage in operating a multiple listing service. In fact, the existence of FMLS, which operates within at least a portion of the same geographic market, proves that the services can be successfully duplicated and offered on competitive terms. That one real estate broker failed in his endeavor to start a competitive service does not dispute the fact that FMLS can provide substantially the same multiple **[*8]** listing services to its members. The plaintiffs have produced no evidence that FMLS is hindered in the operation of its business by an alleged economic advantage held by Metro MLS. ***HN6***[] Unlike cases where the unique nature of the tying product gives one party an advantage over its competitors and thus creates a disincentive for competition, *see* *Tic-X-Press, 815 F.2d 1407*, multiple listing services can and have been effectively duplicated. Furthermore, Empire's business decision not to provide its members multiple listing services is not evidence that the defendants, because they provide such services, have a cost advantage in providing these services.

The plaintiffs' tying claim fails on yet another ground. There is insufficient evidence in the record to support a finding that the defendants have an economic interest in the Atlanta Board or the membership fees collected by it. Because the plaintiffs' principal places of business are in Fulton County, Georgia, the specific tied product the plaintiffs must purchase is membership in the Atlanta Board of Realtors. The plaintiffs contend that Metro MLS possesses the necessary financial interest in the Atlanta Board because Metro MLS is a **[*9]** subsidiary of and has an interest in another realtor group, the DeKalb Board. The plaintiffs also imply that Metro MLS has a financial interest in all boards of realtors because they are financially intertwined through the payment of dues to the state and national realtor associations and the benefits conferred on Metro MLS through such associations' lobbying efforts.

The court finds these arguments unpersuasive. There is no evidence that Metro MLS receives any part of the membership fees paid to the Atlanta Board or has any other economic interest in the Atlanta Board. The fact that such a relationship may exist between Metro MLS as a wholly owned subsidiary of the DeKalb Board has no effect on the court's determination of whether Metro MLS has a financial interest in the Atlanta Board. Nor do the efforts of the state and national associations to monitor and improve the industry as a whole create an economic interest in all boards of realtors. At most, these efforts provide incidental benefits to Metro MLS. Similarly, although the Atlanta Board provides arbitration services to resolve disputes among its members and, thus, Metro MLS need not provide these services, the court finds **[*10]** that this is insufficient to establish the requisite financial interest in the Atlanta Board. The performance of some services, without charge, does not of itself create an economic interest in the Atlanta Board. *See generally* *Pullen v. Bowen, 820 F.2d 105 (4th Cir. 1987)* (radiologists' reading of x-rays without charge to hospital not evidence of economic interest).

Because the court finds insufficient evidence of the defendants' economic power in the relevant market and no evidence that Metro MLS has an economic interest in the Atlanta Board, the source of the tied product, the plaintiffs have failed to establish an essential element of their illegal tying claim. Therefore, summary judgment is GRANTED as to COUNT I.

COUNT II

The plaintiffs allege in Count II of the amended complaint that the board membership requirement is a per se violation of antitrust laws because Metro MLS is an "essential facility" which the defendants must make available to all real estate brokers and sales associates. ***HN7***[] The essential facilities doctrine provides that a monopolist's refusal to give competitors reasonable access to an essential facility is an illegal restraint of trade. *Hecht v. Pro-Football,* ***[*11]*** *Inc., 570 F.2d 982, 992 (D.C. Cir. 1977)* ("Where facilities cannot practicably be duplicated by would-be competitors, those in possession of them must allow them to be shared on fair terms.").

HN8[] To establish liability under the essential facilities doctrine the plaintiffs must prove four elements: (1) control of the essential facility by a monopolist; (2) a competitor's inability, practically or reasonably, to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to the competitor. *MCI Communications v. American Tel. & Tel. Co., 708 F.2d 1081, 1133 (7th Cir. 1983)*. The plaintiffs must provide some evidence of each element in order to survive the defendants' motion for summary judgment. The court finds that the plaintiffs have not met this burden.

First, there is insufficient evidence to support a jury finding that the defendants have monopolized the market for multiple listing service privileges in the Atlanta area. ***HN9***[] A business monopolizes in violation of antitrust laws if it deliberately follows a course of conduct through which it obtains or maintains power to control price or exclude competition **[*12]** in the relevant market. *United States v. E.I. Du Pont De Nemours & Co., 351 U.S. 377, 391, 76 S.Ct. 994, 1005 (1956)*. Although the plaintiffs assert generally that the defendants possess the power to exclude multiple listing service competitors, the existence of FMLS proves otherwise. FMLS operates in the same geographic market as Metro MLS, provides substantially the same services, and creates competition in the market for multiple listing services privileges. The fact that Metro MLS may be more efficient or more successful than its competitors in providing such services does not serve as evidence of monopolistic conduct.

Second, even if Metro MLS were a monopolist, the plaintiffs have presented insufficient evidence to prove that Metro MLS, as opposed to another multiple listing service, is essential to the business of real estate brokers and sales associates or that the services are incapable of being duplicated. As discussed above, the existence of FMLS clearly shows that the multiple listing services provided by Metro MLS can be reasonably duplicated. That the plaintiffs have chosen not to duplicate such services is a business decision and not the result of an illegal restraint **[*13]** of trade.

COUNT III

Although the court finds that the membership requirement is not a per se violation of ***antitrust law***, ***HN10***[] the plaintiffs may still prevail by showing that the requirement, as it actually operates in the market, unreasonably restrains competition. *See* *Fortner Enter. v. United States Steel, 394 U.S. 495, 499-500, 89 S.Ct. 1252, 1256-57 (1969)* (Fortner I); *United States v. Realty Multi-List, Inc., 629 F.2d 1351 (5th Cir. 1980)* (membership criteria of multiple listing service subject to rule of reason analysis). This test, known as the "rule of reason," focuses analysis on the competitive significance of the challenged practice and requires courts to void any practice whose anticompetitive effects outweigh its contributions to competition. *See* *National Society of Professional Engineers v. United States, 435 U.S. 679, 687-92, 98 S.Ct. 1355, 1363-65 (1978)*.

In Count III the plaintiffs allege that Metro MLS's membership requirement violates the rule of reason because it is unreasonable to require membership in a board of realtors when other professional organizations, such as Empire, provide the same or substantially the same arbitration services and codes of ethics **[*14]** which the defendants claim justifies the exclusion of non realtor board members. Such a limited requirement, the plaintiffs argue, is not justified by legitimate competitive goals.

The plaintiffs, however, have failed to establish an essential element of a claim under the rule of reason. ***HN11***[] The rule of reason requires a showing that Metro MLS has sufficient market power in the relevant market such that an exclusion from membership not reasonably grounded in competitive needs produces competitive harm. *See* *Realty Multi-List, 629 F.2d at 1372*. Only if Metro MLS possess such market power does the inquiry turn to the issue of whether the membership requirement is justified by legitimate competitive needs and whether it is narrowly tailored to that end. *Id. at 1374-75*.

HN12[] In determining whether Metro MLS has sufficient market power the plaintiffs need not demonstrate that Metro MLS has a monopoly in the market for multiple listing service participation privileges. Rather, the evidence need show only that exclusion from such privileges results in the denial of the opportunity to compete effectively on equal terms. *Id. at 1373*. As evidence of Metro MLS's market power the plaintiffs **[*15]** allege that the vast majority of area brokers belong to Metro MLS, the vast majority of area real estate sale parcels are listed with Metro MLS, and nearly all sales consummated in the area are of parcels listed with Metro MLS.

As discussed above, the plaintiffs have failed to establish the requisite market power in relation to the tying claim. Although the standard of market power applied to a rule of reason claim is somewhat different in that the court must determine whether the exclusion denies real estate brokers the opportunity to compete effectively, the court's findings as to the tying count also apply here.

In addition, the plaintiffs placed in the record evidence concerning the dollar volume of sales made through Metro MLS and general allegations that the vast majority of real estate business in the relevant market is conducted through Metro MLS. Conspicuously absent, however, is any affirmative evidence demonstrating what percentage of the relevant market Metro MLS's sales represent and the percentage or dollar volume of sales made by FMLS, a competitor in the same market. The plaintiffs' citation to a report which states that approximately 90% of homes sold nationally are **[*16]** sold through a multiple listing service in no way identifies the specific market power possessed by the defendants. Although the evidence that is in the record suggests that a substantial amount of sales are made through multiple listing services, there is insufficient evidence that the exclusion of brokers specifically from membership in Metro MLS denies them the opportunity to operate effectively on equal terms.

Because the plaintiffs failed to establish the requisite market power, summary judgment is appropriate as to Count III, and the court need not consider the actual competitive effects of Metro MLS's membership requirement.

COUNT IV

In Count IV of the amended complaint the plaintiffs allege a claim for conspiracy to monopolize in violation of *section 2* of the Sherman Act. ***HN13***[] A *section 2* conspiracy to monopolize claim requires proof of (1) a conspiracy; (2) a purpose to achieve monopoly power; and (3) a specific intent to injure the plaintiff and to monopolize. *Hill Aircraft & Leasing Corp. v. Fulton County, 561 F. Supp. 667, 677 (N.D.Ga. 1982)*, *aff'd. 729 F.2d 1467 (11th Cir. 1984)*. In addition, the plaintiff must submit proof of the relevant product and geographic markets. **[*17]** *Bill Beasley Farms, Inc. v. Hubbard Farms, 695 F.2d 1341, 1343 (11th Cir. 1983)*.

In support of the conspiracy claim the plaintiffs rely on evidence that Metro MLS was acquired by the DeKalb Board of Realtors only after a meeting between the local participants and the National Association of Realtors and the affidavit of Mr. Walter Scott, part-owner of the independent Metro Multiple Listing Service, in which he stated that it was his belief that if DeKalb acquired Metro MLS it would have a better chance of competing with First Multiple Listing Service. The plaintiffs also point to the affidavit of Mr. Sid Venable who testified that he attempted to start a multiple listing service on the south side of metro Atlanta but has been frustrated in his attempts by the actions of the local board of realtors and Metro MLS.

Even assuming that the meeting between the National Association of Realtors and the local board raises a question as to the existence of a conspiracy, the court finds that there is insufficient evidence to establish a prima facie case of conspiracy to monopolize. The plaintiffs have produced no evidence that the defendants specifically intended to injure the plaintiffs **[*18]** or specifically intended to monopolize. The fact that the former owner of Metro MLS believed that Metro MLS would attract more members if it were acquired by the DeKalb Board of Realtors is not evidence of a specific intent to monopolize. Even considered in the light most favorable to the plaintiffs such testimony serves only as evidence of an intent to compete with FMLS. *See Fortner I, 429 U.S at 612-13 n. 1, 97 S.Ct. at 863-64 n. 1* ***HN14***[] (increasing sales and market share without other intent to monopolize is not forbidden under the Sherman Act). Nor have the plaintiffs produced any evidence that the defendants have engaged in any conduct specifically intended to injure the plaintiffs. Even accepting as true Mr. Venable's statements that the defendants deliberately acted so as to frustrate his attempts to create an independent multiple listing service in the south metro area, Mr. Venable is not a party in this action. Therefore, any injury he may have suffered will not serve as evidence that the defendants intended to injure the plaintiffs.

Because the plaintiffs have failed to establish an essential element of the conspiracy to monopolize claim, the defendants are entitled to summary **[*19]** judgment.

COUNTS V, VI AND VII

In counts V and VI of the complaint the plaintiffs allege that the Metro MLS participation rules violate the Fair Housing Act because they discriminate against black real estate brokers and sales associates in the provision of services in connection with the sale or rental of a dwelling and discriminate against black sellers in the terms, conditions and privileges in the sale or rental of a dwelling. *42 U.S.C. 3604(b) (Supp. 1990)*. The plaintiffs further allege in Count VII that the Metro MLS participation rules in effect deny membership in Metro MLS on account of race in violation of *42 U.S.C. § 3606*.

Despite these allegations, the plaintiffs have produced no evidence that any board of realtors or any multiple listing service has discriminated against membership applicants based upon race. In fact, plaintiff Thompson admitted in his deposition that he had no evidence of such discrimination. ***HN15***[] The unsupported allegation that black real estate brokers' memory of racism practiced by realtors discourages them from joining a board of realtors or multiple listing service is insufficient to support a Fair Housing Violation claim. Similarly, there is no evidence **[*20]** in the record from which a jury could determine that the benefits of a multiple listing service are not available to black homesellers on the same terms and conditions as they are available to any other homeseller.

Based on the absence of evidence in the record and the absence of issues of material facts, the court hereby GRANTS the defendants' Motion for Summary Judgment on all counts.

SO ORDERED, this 28th day of June, 1990.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Of the antitrust suits which are summarily dismissed, several involve alleged tying violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is defined as an agreement by a party to sell one product, the tying product, but only on the condition that the buyer also purchases a different, or tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The antitrust laws do not prohibit all tying arrangements. Only those tying arrangements which are anticompetitive in defined markets are unlawful. In order to determine whether a tying arrangement is unlawful, courts rely on the per se rule and the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the per se rule, a tying arrangement is presumed unlawful without inquiry into the effects in the market if the seller has market power over the tying product. Absent a per se violation, a tying arrangement may be found unlawful under the rule of reason. The rule of reason requires proof of an actual unreasonable restraint of trade in the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to establish a tying arrangement as per se unlawful, the plaintiff must prove the following three elements: (1) the tie links two separate products with distinct markets; (2) the tie affects a not insubstantial amount of interstate commerce; and (3) the seller has market power over the tying product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The product market is defined in antitrust cases not involving tying arrangements as the "areas of effective competition" within which a seller operates. Specifically, a product market is composed of products that have reasonable interchangeability for the purposes for which they are produced: price, use and qualities considered.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN11[] **Regulated Practices, Market Definition**

For purposes of a tying violation, market power has a precise meaning. As an economic matter, market power exists whenever prices can be raised above the levels that would be charged in a competitive market. Evidence of market power may be shown by: (1) exclusive control over the market through a patent or copyright; (2) domination of the market as evidenced by a high market share; or (3) a unique product that competitors are not able to offer.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Regulated Practices, Market Definition**

For a showing of "uniqueness", the emphasis is not on whether the seller is selling a factually unique product; rather, the emphasis is on whether the seller has some advantage not shared by its competitors in the marketplace. This advantage is defined by the courts in terms of barriers to entry into the marketplace. If competitors can design and offer a package similar to defendant's product for a similar cost, there is no barrier and no market power, and hence no special advantage for purposes of establishing "'uniqueness."

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN13[] **Regulated Practices, Market Definition**

The fact that a product bears a "unique" trademark does not raise an issue of fact as to market power.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] **Price Fixing & Restraints of Trade, Tying Arrangements**

To establish a tying violation under the "rule of reason", plaintiffs have to demonstrate that the alleged tying arrangement actually forecloses competition in the market for the tied product or is anticompetitive in the tied product market.

Antitrust & Trade Law > Sherman Act > Claims

Opinion

[*355] MEMORANDUM AND ORDER

JAN E. DUBOIS, UNITED STATES DISTRICT JUDGE

Plaintiffs brought this proposed antitrust class action against the defendant, Chrysler Motors Corp. ("Chrysler"), asserting claims under *Section 1* of the Sherman Act, *15 U.S.C. § 1*, [1] and *Section 3* of the Clayton Act, *15 U.S.C. § 14*. [2] The Court has jurisdiction over the suit under *15 U.S.C. § 15* and *28 U.S.C. § 1337*.

Plaintiffs allege that Chrysler has created an unlawful tying arrangement through its sale of car radios and cassette **[**2]** players -- *i.e.* automotive sound equipment -- as a standard feature on its vehicles. Plaintiffs seek to enjoin Chrysler from continuing to make such sales and to recover damages from Chrysler as a result of past sales.

Presently before the Court is Chrysler's Motion for Summary Judgment. For the reasons set forth below, the Court will grant the Motion.

I. BACKGROUND:

Plaintiffs are four independent corporations which distribute and install automotive sound equipment. Plaintiffs sell automotive sound equipment to automobile dealers for installation either by the dealer or by the plaintiffs. Plaintiffs also sell automotive sound equipment directly to consumers through retail outlets operated by the plaintiffs and through distribution to independent retailers.

Defendant Chrysler is a corporation which manufactures and sells motor vehicles. Chrysler manufactures many of the components of its vehicles, including automotive sound equipment. Chrysler also purchases automotive sound equipment from independent suppliers. Chrysler sells its vehicles to consumers through a network of retail dealers located throughout the United States.

Chrysler does not dispute plaintiffs' allegations **[**3]** regarding Chrysler's sale of automotive sound equipment as a standard feature. [3] Between 1983 and the present, Chrysler has steadily increased the number of its vehicles sold with automotive sound equipment as a standard feature. At present, Chrysler sells approximately 97 percent of its vehicles with automotive sound equipment as a standard feature. *See* Complaint paras. 34-41

In their proposed class action, plaintiffs seek to represent all distributors and installers of automotive sound equipment who compete or have competed against Chrysler since January 1, 1984, for the sale and installation of automotive sound equipment in Chrysler vehicles. *See* Complaint paras. 8-15.

II. STANDARD FOR SUMMARY JUDGMENT:

The Federal Rules of **[**4]** Civil Procedure provide that ***HN1***[] summary judgment "shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. Rule 56 (c)*.

---

[1] *See*, note 23, *infra.*

[2] *See*, note 24, *infra.*

[3] A standard feature is a feature for which the customer cannot obtain a credit against the base price of the automobile even if the feature is not purchased. A delete option, by contrast, is a feature for which a credit is given to the customer if the feature is not purchased.

HN2[] When a motion for summary judgment is made, the adverse party "may not rest upon the mere allegations or denials of his pleading, but . . . must set forth specific facts showing that there is a genuine issue for trial." *Fed. R. Civ. P. Rule 56 (e)*. HN3[] If the adverse party fails to set forth such material facts, summary judgment shall be entered against the party. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 2553, 91 L. Ed. 2d 265 (1986)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 2510, 91 L. Ed. 2d 202 (1986)*; *Matsushita Electric Industrial Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586-87, **[*356]** 106 S. Ct. 1348, 1355, 89 L. Ed. 2d 538 (1986)*; *see also* *Equimark Comm. Fin. Co. v. C.I.T. Fin. Serv. Corp., 812 F.2d 141 (3rd Cir. 1987)*.

Plaintiffs argue that summary judgment is inappropriate in complex antitrust suits. The Court disagrees. HN4[] **[**5]** Although summary judgment should be used sparingly in complex antitrust suits, *see* *Poller v. Columbia Broadcasting Systems, Inc., 368 U.S. 464, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*, it is appropriate in such suits where trial would merely result in delay and expense. *See, e.g.,* *A.I. Root Co. v. Computer/Dynamics, Inc., 615 F. Supp. 727 (N.D. Ohio 1985)*, *aff'd* *806 F.2d 673 (6th Cir. 1986)*; *Harold Friedman, Inc. v. Kroger Co., 581 F.2d 1068, 1080 (3rd Cir. 1978)*; *Tripoli Co. v. Wella Corp., 425 F.2d 932, 935 (3rd Cir.1970)*, *cert. denied*, *400 U.S. 831, 27 L. Ed. 2d 62, 91 S. Ct. 62 (1970)* cited in *Chuy v. Philadelphia Eagles, 407 F. Supp. 717, 721 (E.D.Pa. 1976)*.

Furthermore, HN5[] of the antitrust suits which have been summarily dismissed, several involve alleged tying violations. *See, e.g.,* *Robert's Waikiki U-Drive, Inc. v. Budget Rent-A-Car Systems, Inc., 491 F. Supp. 1199 (D.Hawaii 1980)*, *aff'd* *732 F.2d 1403 (9th Cir. 1984)*; *Tominaga v. Shepherd, 682 F. Supp. 1489 (C.D.Cal. 1988)*; and *Klo-Zik Co. v. General Motors Corp., 677 F. Supp. 499 (E.D.Tex. 1987)*.

III. DISCUSSION

HN6[] A tying arrangement is defined as "an agreement by a party to sell one product [the tying product] but only on the condition that **[**6]** the buyer also purchases a different (or tied) product." *Northern Pacific R. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*. HN7[] The antitrust laws do not prohibit all tying arrangements. Only those tying arrangements which are anticompetitive in defined markets are unlawful. In order to determine whether a tying arrangement is unlawful, courts have relied on the *per se* rule and the rule of reason. *See* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* (5-4 majority reaffirmed use of both standards in tying cases). HN8[] Under the *per se* rule, a tying arrangement is presumed unlawful -- without inquiry into the effects in the market -- if the seller has market power over the tying product. Absent a *per se* violation, a tying arrangement may be found unlawful under the rule of reason. The rule of reason requires proof of an actual unreasonable restraint of trade in the market for the tied product. Accordingly, in deciding the Motion for Summary Judgment, the Court will consider Chrysler's sales practice under each of these standards.

A. *Per Se Rule*

HN9[] In order to establish a tying arrangement as *per se* unlawful, the plaintiff **[**7]** must prove the following three elements: (1) the tie links two separate products with distinct markets; (2) the tie affects a not insubstantial amount of interstate commerce; and (3) the seller has market power over the tying product. *See generally* *Jefferson Parish 466 U.S. at 13-22*; *see also* *Grappone, Inc. v. Subaru of New England, Inc., 858 F.2d 792(1st Cir. 1988)* ("Grappone") .

For purposes of this Motion, the parties agree that Chrysler is selling separate products in separate markets and that Chrysler's sale of automotive sound equipment affects a not insubstantial amount of interstate commerce. That leaves for determination the question whether there is any evidence that Chrysler has market power over the tying product. Chrysler contends that it has no such market power in any plausibly defined market, and the Court agrees.

1. The Tying Product Market

In order to determine whether Chrysler has market power over the tying product, it is essential to define the tying product market. *See, e.g.,* *Drs. Steuer & Latham, P.A. v. National Medical Enterprises 672 F. Supp. 1489 (D.S.C. 1987)*. HN10[] The product market has been defined in antitrust cases not involving tying arrangements **[**8]** as the "areas of effective competition" within which a seller operates. *Standard Oil Co. of California v. United States, 337 U.S. 293, 299 n. 5,* **[*357]** *93 L. Ed. 1371, 69 S. Ct. 1051 (1949)*. Specifically, a product market is "composed of products that have reasonable interchangeability for the purposes for which they are produced -- price, use and qualities considered." *United States v. E.I. duPont de Nemours & Co., 351 U.S. 377, 404, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*; *see also SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063* (3d Cir.), *cert. denied*, *439 U.S. 838, 58 L. Ed. 2d 134, 99 S. Ct. 123 (1978)*. These same principles of market definition have been relied on by courts when defining product markets for purposes of a tying analysis. *See, e.g., Allen-Myland, Inc. v. IBM Corp., 693 F. Supp. 262 (E.D.Pa. 1988)* (court rejected plaintiffs' proposed tying product market limited to IBM's own product line); *see also A.I. Root Co. v. Computer/Dynamics, Inc. 806 F.2d 673 (6th Cir. 1986)* (same); *Will v. Comprehensive Accounting Corp. 776 F.2d 665 (7th Cir. 1985)* (same); *Hudson's Bay Co. v. American Legend Cooperative 651 F. Supp. 819 (D.N.J. 1986)* (same).

Chrysler argues that the tying product **[**9]** market is all automobile manufacturers which compete with Chrysler for the sale of automobiles in the United States. In support of its market definition, Chrysler has provided the Court with uncontroverted affidavits demonstrating that Chrysler automobiles are reasonably interchangeable with, and compete against, the automobiles produced by other manufacturers. Chrysler's submissions on that issue are not directly addressed or contested by plaintiffs [4] and may be summarized as follows:

First, consumers perceive Chrysler automobiles as reasonably interchangeable with other automobile makes. Market studies submitted by Chrysler state that prospective new buyers commonly compare Chrysler's product offerings with the offerings of other manufactures. [5] A wide range of factors -- including price, features, aesthetic appeal, reputation, and comfort -- enter into such comparisons, and Chrysler's sales depend directly upon its ability to impress consumers favorably with respect to these factors. [6]

[10]** Second, Chrysler's advertising stresses the price and qualities of its vehicles in comparison to those of its competitors. [7] Furthermore, the automotive media -- which consumers often consult before purchasing motor vehicles -- perceive Chrylser vehicles as competing against comparable vehicles made by other manufacturers. The automotive media routinely evaluate Chrysler's vehicles in comparison to those of other manufacturers. [8]

Third, Chrysler is constrained in pricing its vehicles by the prices its competitors charge for comparable vehicles. [9] This pricing constraint reflects the cross-elasticity of demand that exists between Chrysler vehicles and the vehicles produced by its competitors. [10]

[11]** Fourth, the business and financial communities and government agencies view Chrysler as competing for sales against other automobile manufacturers. Market studies by these groups analyze the different automobile producers, including Chrysler, as competing in the same market. [11]

---

[4] *See* Section IV, *infra.*

[5] Affidavit of Jack L. Warren, para. 7.

[6] *Id*. para. 6.

[7] *Id* para. 9.

[8] *Id* para. 12.

[9] Affidavit of Franklin M. Fisher, para. 15.

[10] Two goods exist in the same market if there is a relatively high cross-elasticity of demand between the goods. Two goods have a relatively high cross-elasticity of demand if an increase in the price of one good results in an increase in consumption of the other good. *See, e.g. Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*.

[11] Affidavit of Franklin M. Fisher para. 9.

Based on the foregoing, the Court defines the tying product market as all automobile manufacturers which compete with Chrysler for the sale of automobiles in the United States.

[*358] 2. Definition of Market Power

HN11[] For purposes of a tying violation, market power has a precise meaning. In *Jefferson Parish*, the Supreme Court defines market power in a tying case as follows: "As an economic matter, market power exists whenever prices can be raised above the levels that would be charged in a competitive market." *See* *Jefferson Parish 466 U.S. at 26, n. 46*. *See also* *United States Steel Corp v. Fortner Enterprises Inc.* ***[**12]*** *429 U.S. 610, 620, n. 13, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)* (market power is defined as "power over price"). In *Jefferson Parish*, the Supreme Court also stated that evidence of market power may be shown by: (1) exclusive control over the market through a patent or copyright; (2) domination of the market as evidenced by a high market share; or (3) a unique product that competitors are not able to offer. *See* *Jefferson Parish 466 U.S. at 16-17*.

In this case, Chrysler argues that it does not have market power because Chrysler cannot raise prices above competitive levels in the automobile market and profitably sustain prices at that level. [12] Chrysler has provided the Court with uncontroverted affidavits demonstrating that Chrysler is a "price-follower" in the automobile market and plaintiffs' submissions do not directly address or contest these submissions. [13] As a "price-follower", Chrysler increases the prices of its vehicles following an increase in prices throughout the automobile industry. If Chrysler were to unilaterally raise its prices, other automobile manufacturers would not follow suit and Chrysler would lose sales. [14] Accordingly, the Court finds that Chrysler does not have "power over price" **[**13]** in the tying product market.

The Court must also address the other market conditions set forth in *Jefferson Parish* which may provide evidence of market power. A review of all submissions by the parties discloses no evidence of market power by Chrysler based on these market conditions. First, this case does not involve control over a market through a patent or copyright. Although Chrysler may have patents on individual parts of its automobiles, Chrysler does not have, and plaintiffs do not **[**14]** allege, control by Chrysler over a market through such patents.

Second, in terms of market share, Chrysler does not have the level of market share in the tying product market associated with market power. From 1983 to the present, the time period relevant to this litigation, Chrysler has sold 10 to 12 percent of the new cars sold in the United States. [15] General Motors, by contrast, has sold 35 to 45 percent of the new cars sold, and Ford has sold 17 to 20 percent of the market. Furthermore, several foreign manufacturers, Honda, Toyota, and Nissan, each have 5 to 7 percent of the market. [16]

Although there is no fixed threshold of market share required for market power and market share is but one measure of a seller's market power, Chrysler's 10 to 12 percentage share of the automobile market is considerably below the level of market share associated with market power. *See, e.g.,* *Jefferson Parish, 466 U.S. at 26-27* **[**15]** (30 percent market share insufficient for market power); *Times-Picayune Publishing Co. v. United States, 345 U.S. 594 at 611-613, 97 L. Ed. 1277, 73 S. Ct. 872* (30 to 40 percent market share insufficient for market power); *Allen-Myland 693 F. Supp. at 278* (20 to 30 percent market share insufficient for market power).

---

[12] Although not expressly stated in *Jefferson Parish*, market power exists whenever the seller can raise prices above competitive levels in the marketplace and profitably sustain prices at that level.

[13] *See* Section IV, *infra.*

[14] Affidavit of Franklin M. Fisher, para. 15 ("Chrysler's pricing is significantly constrained by its . . . competitors. The marketplace would quickly defeat any attempt by Chrysler to unilaterally raise prices to supracompetitive levels."); *see also* Affidavit of Omar Matt, para. 9.

[15] Affidavit of Franklin M. Fisher, Appendix B (*citing Ward's Automotive Yearbook 1988*, p.161).

[16] *Id*.

[*359] Furthermore, even if the Court defined a tying product market based on subsections of the automobile market, such as geographic regions or automobile types, Chrysler does not have the level of market share required for market power in any such subsection. On the contrary, Chrysler maintains a similar 10 to 12 percentage share of the automobile market across various geographic regions and vehicle lines. [17] *See also* Grappone, supra, 858 F.2d at 797.

Third, **HN12**[] for a showing of "uniqueness", the emphasis is not on whether the seller is selling a factually unique product; rather, the emphasis is on whether the seller has some advantage not shared by its competitors in the marketplace. *See* Fortner 429 U.S. at 620 **[**16]** (1977). This advantage has been defined by the courts in terms of barriers to entry into the marketplace. "If competitors can design and offer a package similar to defendant's product for a similar cost, there is no barrier and no market power, and hence no special advantage for purposes of establishing 'uniqueness.'" Allen-Myland 693 F. Supp. at 281; Will v. Comprehensive Accounting Corp. 776 F.2d 665 (7th Cir. 1985). [18]

In this case, plaintiffs do not suggest that Chrysler has market power through barriers to entry into the marketplace. Rather, plaintiffs' theory on uniqueness is that Chrysler has market power through its unique and well-known trademark. **HN13**[] The **[**17]** fact that Chrysler's vehicles bear a "unique" trademark does not raise an issue of fact as to market power. Although, at one time, some courts viewed the existence of a trademark as sufficient for market power, *see, e.g.* Warriner Hermetics v. Copeland Refrigeration Corp., 463 F.2d 1002 (5th Cir.), *cert. denied*, *409 U.S. 1086, 34 L. Ed. 2d 673, 93 S. Ct. 688 (1972)*, no cases since *Jefferson Parish* have held that a trademark alone establishes market power. *See, e.g.* Mozart Co. v. Mercedes-Benz of North America, Inc. 833 F.2d 1342, 1346 (9th Cir. 1987); Will v. Comprehensive Accounting Corp. 776 F.2d 665, 673 n. 4 (7th Cir. 1985), *cert. denied*, *475 U.S. 1129, 90 L. Ed. 2d 201, 106 S. Ct. 1659 (1986)*. Accordingly, the Court finds that Chrysler's trademark does not raise an issue of fact as to Chrysler's market power.

For all the foregoing reasons, the Court finds that Chrysler does not have market power in the tying product market. Accordingly, plaintiffs are unable to sustain their *per se* tying claim.

B. *Rule of Reason*

HN14[] To establish a tying violation under the "rule of reason", plaintiffs -- at a minimum -- have to demonstrate that the alleged tying arrangement actually forecloses competition in the market for the tied product **[**18]** or is anticompetitive in the tied product market. *See* Jefferson Parish 466 U.S. at 17-18; *see also* Grappone 858 F.2d at 799.

1. Market Effect in the Tied Product Market

The first question before the Court is to define the tied product market. In defining this market, the Court will rely on the same principles of market definition adhered to by the Court in defining the tying product market. Chrysler argues that the tied product market is all sound equipment sold in the United States for installation in automobiles. Chrysler's uncontroverted facts on that issue may be summarized as follows:

Many of the automobile manufacturers -- *e.g.* Chrysler, General Motors, and Ford -- manufacture sound equipment for installation in automobiles. Furthermore, many independent firms -- *e.g.* Sony, Pioneer, Kenwood, Audiovox -- also manufacture **[*360]** sound equipment for automobiles. [19] Chrysler's automotive sound equipment is not unique. Most of the manufacturers of automotive sound equipment produce systems that are *capable* of use in

---

[17] Affidavit of Franklin M. Fisher, para. 12, 13.

[18] "The use of barriers to entry as a proxy for market power is familiar in the law of mergers. Unless barriers to entry prevent rivals from entering the market at the same cost of production, even a very large market share does not establish market power." (citations omitted) Will v. Comprehensive Accounting Corp. 776 F.2d 665, 672, n. 3 (1985).

[19] *See* Affidavit of Joseph Clifton Mathis.

Chrysler vehicles and the vehicles of every other automobile manufacturer. Thus, systems designed by Chrysler for installation in Chrysler vehicles **[**19]** compete -- either actually or *potentially* -- against the systems manufactured by other automotive sound equipment manufacturers for installation in other vehicles. *See* SmithKline 575 F.2d at 1063 (product market defined to include all relevant sources of supply, including *potential* as well as actual rivals).

Based on the foregoing, the Court defines the tied product market as all sound equipment sold in the United States for installation in automobiles.

In the tied product market -- *i.e.* the market for automotive sound equipment -- Chrysler's share of the market is limited. There are over 70 distributors of automotive sound equipment in the United States, and most distributors, including Chrysler, have less than a 10 percent share of the automotive sound equipment market. [20] During the time period relevant to this litigation, Chrysler's share of the automotive sound equipment market has ranged from approximately 3 to 7 percent of the market. [21] Chrysler's limited share of **[**20]** the tied product market is such that Chrysler is not in a position to restrain trade or foreclose competition in the market.

Although plaintiffs offer depositions alleging that certain individual distributors of automotive sound equipment have lost sales, [22] these depositions do not demonstrate that Chrysler has either foreclosed competition or restrained trade in the market for automotive sound equipment. Under the antitrust laws, the concern is with maintaining the level of competition in the marketplace, not in ensuring that every individual competitor is protected. *See* Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977).

[21]** In the record before the Court, plaintiffs have not demonstrated an actual restraint of trade in the market for automotive sound equipment. Accordingly, without any evidence of a restraint of trade in the tied product market by Chrysler, plaintiffs are unable to sustain a tying violation under the rule of reason.

2. Market Power over Tying Product for Rule of Reason Violation

Although the majority opinion in *Jefferson Parish* states that a rule of reason violation may be established without the same "degree or kind" of market power that is required for a *per se* violation, *see* Jefferson Parish, 466 U.S. at 19, the majority opinion nowhere states or implies that market power over the tying product is not required under the rule of reason.

The requirement of market power over the tying product is consistent with the elements of a tying violation. Market power over the tying product is what makes possible an adverse effect on competition in the tied product market. Unless the seller has market power over the tying product, the seller is not able to restrain competition in the market for the tied product. Both the concurrence in *Jefferson Parish*, and decisions subsequent **[**22]** to *Jefferson Parish*, have held that market power over the tying product is a required element under either the *per se* rule or rule of reason. *See Jefferson Parish* (O'Connor, concurring); *see also* Hand v. Central Transport, Inc., 779 F.2d 8, 11 (6th Cir. 1985) (market power required under rule-of-reason tying analysis); *see also* Hudson's Bay Co. Fur Sales v. American Legend Co-Op, 651 F. Supp. 819, 841 (D.N.J. 1986) (same).

As set forth above, Chrysler does not have market power in the tying product **[*361]** market; in fact, Chrysler faces severe competition in the tying product market from several other automobile manufacturers. Thus, in addition to there being no evidence that Chrysler has restrained trade in the tied product market, there is no evidence that Chrysler has such market power over the tying product that Chrysler can actually restrain trade or foreclose competition in the market for the tied product.

C. *Plaintiffs' Tying Theories*

---

[20] Affidavit of Franklin M. Fisher (*citing* Venture Development Corporation, *Automobile Stereo Equipment III, A Strategic Analysis*, September, 1986).

[21] *Id.*

[22] Dep. Daniel M. McGrath, at p. 101.

Plaintiffs seek to redefine the elements of a tying violation, and their submissions are predicated on these theories. Plaintiffs raise the following arguments: (1) market power is not required for a tying claim under *Section **[**23]** 3* of the Clayton Act, as distinguished from *Section 1* of the Sherman Act; (2) the definition of the market and market power cannot be determined on summary judgment; and (3) Chrysler has market power in a market limited to Chrysler products. The Court rejects plaintiffs' arguments for the reasons set forth below.

1. Requirement of Market Power

Plaintiffs concede that ***HN15***[] market power over the tying product is an essential element of a tying claim under *Section 1* of the Sherman Act. ***HN16***[] [23] However, plaintiffs contend that such market power is not required for a tying claim under *Section 3* of the Clayton Act. ***HN17***[] [24] The Court disagrees.

[24]** Plaintiffs argue that, under *Section 3* of the Clayton Act, market power is not required for a tying claim and such a claim only requires proof that the tying arrangement affects a substantial volume of commerce in the market for the tied product. In making this argument, plaintiffs principally rely on the following passage from *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*:

> "When the seller enjoys a monopolistic position in the market for the tying product, or if a substantial volume of commerce in the tied product is restrained, a tying arrangement violates the narrower standards expressed in *§ 3* of the Clayton Act. . . ." *Times-Picayune at 608-609*.

Plaintiffs' reliance on *Times-Picayune* is misplaced. First, *Section 3* of the Clayton Act was not at issue in *Times-Picayue;* that case was decided under *Section 1* of the Sherman Act. Furthermore, cases subsequent to *Times-Picayune* set forth the same tying analysis whether a claim is brought under *Section 1* of the Sherman Act or *Section 3* of the Clayton Act. *See, e.g. Summerwood Corp v. CADO Systems*, No. 85-0827 **[**25]** slip op. at 5 (E.D.Pa. March 25, 1986) (Pollak, J.) ("Although tying arrangements can be challenged either under Sherman 1 or Clayton 3, it is now generally agreed that the elements relating to tying violations of either provision are identical", and market power is a required element under both provisions of the ***antitrust law***). *See Grappone 858 F.2d at 794*; *Mozart Co. v. Mercedes-Benz of North America, Inc., 833 F.2d 1342, 1352 (9th Cir. 1987)*; *Airweld Inc. v. Airco, Inc., 742 F.2d 1184, 1189 n. 2 (9th Cir. 1984)*; *Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 428 (5th Cir. 1978)*, *cert. denied 444 U.S. 831, 62 L. Ed. 2d 39, 100 S. Ct. 59 (1979)*; *Tominaga v. Shepherd, 682 F. Supp. 1489, 1493 (C.D.Cal. 1988)*; *Klo-Zik v. General Motors Corp. 677 F. Supp. 499, 505 (E.D.Tex. 1987)*. *See generally*, 4 E. Kintner, *Federal* ***Antitrust Law***, § 32.57 at 96-97 (1984).

Based on the foregoing, the Court rejects plaintiffs' argument that *Section 3* of the **[*362]** Clayton Act does not require proof of the seller's market power to sustain a tying claim.

2. Defining the Market

Plaintiffs argue that the determination of the market is a question of fact which cannot be resolved on summary judgment. The Court disagrees. ***HN18***[]

---

[23] *Section 1* of the Sherman Act, *15 U.S.C. § 1*, provides in relevant part:

> "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal. . . ."

[24] *Section 3* of the Clayton Act, *15 U.S.C. § 14*, provides in relevant part:

> "It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies, or other commodities . . . where the effect of such lease, sale or contract for sale or such condition agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce."

[26]** A court is not required to submit the determination of the market to the jury. On the contrary, a court may define the product market as a matter of law. *See, e.g.* *Mogul v. General Motors Corp., 391 F. Supp. 1305 (E.D.Pa. 1975)*, *aff'd* *527 F.2d 645 (3rd Cir. 1976)*; *Mary Ann Pensiero, Inc. v. Lingle*, No. 86-0144, slip. op. (M.D.Pa. June 5, 1986), *aff'd 810 F.2d 1163 (3d Cir. 1987)*. *See also* *Drs. Steuer & Latham, P.A. v. National Medical Enterprises, Inc., 672 F. Supp. 1489, 1504 (D.S.C. 1987)*.

Furthermore, the cases relied on by plaintiffs, *Joe Westbrook, Inc. v. Chrysler Corp. 419 F. Supp. 824 (N.D.Ga. 1976)* and *Wm. Cohen & Son v. All American Hero, Inc., 693 F. Supp. 201 (D.N.J. 1988)*, are not contrary authority. Although in each case the court chose not to define the market on summary judgment, the decisions were predicated on the evidence before the court and not, as plaintiffs argue, an opposition to a determination of the market on summary judgment.

Plaintiffs also argue that the Court should adopt a relevant market limited to Chrysler's products. Although a one-manufacturer market is possible, this is not such as case. First, plaintiffs' tying claim **[**27]** is not analogous to the so-called "franchise cases" in which courts have adopted a one-manufacturer market. *See, e.g.,* *Metrix Warehouse Inc. v. Daimler-Benz Aktiengesellschaft, 828 F.2d 1033 (4th Cir. 1987)*, *cert. denied*, *486 U.S. 1017, 108 S. Ct. 1753, 100 L. Ed. 2d 215 (1988)*; *Mozart Co. v. Mercedes-Benz of North America, Inc. 833 F.2d 1342 (9th Cir. 1987)*; *Heatransfer Corp. v. Volkswagenwerk, A.G. 553 F.2d 964 (5th Cir. 1977)*, *cert. denied*, *434 U.S. 1087, 55 L. Ed. 2d 792, 98 S. Ct. 1282 (1978)*. In such cases, courts have adopted a one-manufacturer market because of a substantial investment made by consumers which would become worthless if the consumers did not also purchase the tied product. Typically, these cases involve a franchiser requiring a franchisee to purchase an unwanted product after the franchisee has made a substantial investment in the franchise. Based on the franchisee's investment in the franchise (the tying product), courts have found that there is no "reasonable interchangeability" between the tying product and other products and have limited the market to the tying product.

In this case, Chrysler's customers are not at risk of losing any investment if they decide not to purchase Chrysler's automotive sound equipment **[**28]** (the tied product). Even if the Court assumed some Chrysler customers make a mental commitment to buying a Chrysler (and only later discover that the automotive sound equipment is standard), the mental commitment of the Chrysler customer is not comparable to an investment in a franchise and, as such, does not raise an issue of fact as to a Chrysler-only market.

Plaintiffs' reliance on *Digidyne Corp. v. Data General Corp. 734 F.2d 1336 (9th Cir. 1984)*, *cert. denied*, *473 U.S. 908, 87 L. Ed. 2d 657, 105 S. Ct. 3534 (1985)* is similarly misplaced. Plaintiffs rely on *Digidyne* for the proposition that market power may be established for a tying violation without reference to a tying product market. Although the court in *Digidyne* found market power without defining the tying product market, *Digidyne* is not persuasive authority. First, the facts of *Digidyne* are readily distinguishable from this case. In *Digidyne*, the tying product, a computer operating system, was not only copyrighted, but buyers of the system had made investments of millions of dollars which would be useless without the system. This case involves neither a copyright nor an investment.

Furthermore, the statement in *Digidyne* that a defined **[**29]** tying product market is not required to sustain a tying claim has been roundly criticized in subsequent decisions. *See, e.g.* *Allen-Myland, 693 F. Supp at 281, n. 42*; **[*363]** *Mozart Co. v. Mercedes-Benz of North America, Inc. 833 F.2d 1342, 1346, n. 4 (9th Cir. 1987)*; *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 6773 n. 4 (7th Cir. 1985)*; *Tominaga v. Shepherd, 682 F. Supp. 1489, 1495 (C.D.Cal. 1988)* (Ninth Circuit in *Mozart* "suggested that the *Digidyne* panel erred in failing to engage in market analysis").

Accordingly, the Court rejects plaintiffs' argument that market power may be inferred in a tying claim without reference to a defined tying product market.

3. Plaintiffs' Submissions

Plaintiffs offer the Court numerous submissions which are predicated on their tying theories. In many instances, plaintiffs contend that their submissions demonstrate that Chrysler has "market power" over Chrysler automobiles without reference to a defined tying product market or the proper definition of market power. Market power is not, as plaintiffs would have it, another term for the preference that *some* buyers have for the products of a particular seller.

In reviewing **[**30]** plaintiffs' submissions, the relevant issue before the Court is whether there is a genuine issue of material fact as to a market limited to Chrysler products or market power by Chrysler in a properly defined tying product market. The Court finds that plaintiffs have not raised a genuine issue of material fact as to market definition or market power.

a. *Consumer Polls*

Plaintiffs submit consumer surveys which, according to plaintiffs, demonstrate that Chrysler sells its automotive sound equipment in a "captive market". The surveys do not support plaintiffs' conclusion. At most, the surveys demonstrate that some Chrysler customers decide to buy a Chrysler vehicle before considering the type of automotive sound equipment they want. [25] The surveys do not demonstrate that Chrysler's customers commit to buying a Chrysler, even before they discover the options and prices of a Chrysler. The possibility that some Chrysler customers may tentatively select a Chrysler vehicle before focusing on the type of automotive sound equipment does not mean that they are committed to purchasing the Chrysler vehicle, if, when they eventually focus on the automotive sound equipment, they find it unsatisfactory. **[**31]** [26]

Plaintiffs' surveys do not address the relevant considerations of market definition or market power. Accordingly, the Court finds that plaintiffs' surveys do not raise an issue of fact as to a Chrysler-only market or market power by Chrysler in a properly defined tying product market.

b. *Market Research* ***[**32]*** *Studies*

Plaintiffs submit market research which compare the buying behaviors of Chrysler's customers to the buying behaviors of customers of other automobile manufacturers. [27] Plaintiffs suggest that these studies demonstrate Chrysler has a unique control over its customers. However, the studies do not support plaintiffs' conclusory allegations. In fact, the studies submitted by plaintiffs support Chrysler's contention that Chrysler competes against other automobile manufacturers. The studies show that Chrysler's potential customers will freely substitute another automobile make for a Chrysler automobile if a desired type of Chrysler vehicle is not readily available [28] **[*364]** or if they are dissatisfied with Chrysler's options. [29]

Based on the foregoing, the Court finds that the market **[**33]** research studies submitted by plaintiffs do not raise an issue of fact as to a Chrysler-only market or market power by Chrysler in a properly defined tying product market.

---

[25] Exhibit B attached to Plaintiffs' Response to Defendant's Reply Memorandum in Support of its Motion for Summary Judgment. One of the survey questions relied on by plaintiffs appears as follows:

> "Q.17 Items you decided you first wanted: First decided on make and model [before] Type of sound equipment: Chrysler 42.3 percent."

In the best light for plaintiffs, the question may be read as 42.3 percent of Chrysler's consumers decide on a Chrysler vehicle before considering the type of automotive sound equipment they wanted. The survey question addresses the order of purchase, not whether Chrysler customers will buy a Chrysler vehicle, even if the options and price of the options are undesirable.

[26] *Id.*

[27] *See* Exhibits Submitted by Plaintiffs in Opposition to Chrysler's Motion for Summary Judgment; *see, e.g.* Report of Booz, Allen & Hamilton, Inc. (September 19, 1983) (Exhibit B).

[28] ***Id. at 192-193***.

[29] *Id. at 362*.

c. *Testimony of Chrysler Personnel*

Plaintiffs argue that the testimony of Chrysler personnel support a Chrysler-only market. [30] Plaintiffs contend that Chrysler personnel have stated Chrysler competes in a "market" consisting of Chrysler products. In ordinary speech, the term "market" is used in many different ways. However, the definition of the product market is a term of art. As set forth above, the product market includes all "reasonably interchangeable" products from actual and potential sources of supply. *See, e.g. SmithKline; Allen-Myland*. Accordingly, the testimony of Chrysler's personnel is not relevant to defining a product market.

d. *Affidavit of F. Gerard Adams*

Plaintiffs offer the affidavit of F. **[**34]** Gerard Adams, Professor of Economics at the University of Pennsylvania, as support for their tying claim. Dr. Adams states that Chrysler has market power in a market limited to the installation of automotive sound equipment in new Chryslers. [31] Although Dr. Adams' statement is correct, it is of no assistance to plaintiffs. It is a given that Chrysler has complete control in a market in which Chrysler is the only seller.

Dr. Adams states that his opinion is predicated on plaintiffs' submissions -- *i.e.* the market research studies, consumer surveys, and testimony of Chrysler personnel. Dr. Adams does not offer an independent basis for his opinion. Since the Court has found that none of plaintiffs' submissions raise an issue of fact as to a Chrysler-only market or market power by Chrysler in a properly defined tying product, the Court, likewise, finds that Dr. Adams' affidavit (which is predicated on these same submissions) **[**35]** does not raise an issue of fact as to market definition or market power. *See, e.g., Mid-State Fertilizer Co. v. Exchange National Bank, 877 F.2d 1333 (7th Cir. 1989)* (expert opinion which does not establish an issue of fact does not defeat a motion for summary judgment); *Richardson v. Richardson-Merrell, Inc., 273 App. D.C. 32, 857 F.2d 823, 829-832 (D.C.Cir. 1988)* (expert's declaration, full of assertions but empty of facts and reasons, is insufficient to get a case past a motion for summary judgment).

HN19[] On a motion for summary judgment, the party seeking to avert summary judgment has to set forth specific facts showing that there is a genuine issue for trial. *See, e.g. Celotex Corp. v. Catrett, 477 U.S. at 322-323*. For the reasons set forth above, the Court finds that plaintiffs have not raised any genuine issues of material fact in support of their claim of a tying violation by Chrysler. Accordingly, the Court will grant Defendant's Motion for Summary Judgment.

An appropriate order follows.

ORDER

AND NOW, to wit, this 2nd day of July, 1990, upon consideration of the Motion of defendant, Chrysler Motors Corporation, for Summary Judgment, the Answer of plaintiffs, and the subsequent **[**36]** submissions of the parties, and good cause appearing, IT IS ORDERED that the Motion of defendant, Chrysler Motors Corporation, for Summary Judgment is granted. Judgment is entered in favor of defendant, Chrysler Motors Corporation, and against plaintiffs.

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN5[] **Antitrust & Trade Law, Clayton Act**

A transaction must be functionally viewed, in the context of its particular industry. Whether the consolidation is to take place in an industry that is fragmented rather than concentrated, that has seen a recent trend toward domination by a few leaders or has remained fairly consistent in its distribution of market shares among the participating companies, that has experienced easy access to markets by suppliers and easy access to suppliers by buyers or has witnessed foreclosure of business, that has witnessed the ready entry of new competition or the erection of barriers to prospective entrants, all were aspects, varying in importance with the merger under consideration, which would properly be taken into account. All these factors are relevant in determining whether a transaction is likely to substantially lessen competition, but none is invariably dispositive.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Evidence > Inferences & Presumptions > General Overview

HN6[] **Antitrust & Trade Law, Clayton Act**

The existence and significance of barriers to entry are frequently crucial considerations in a rebuttal analysis.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Evidence > Inferences & Presumptions > General Overview

HN7[] **Antitrust & Trade Law, Clayton Act**

That a defendant may successfully rebut a prima facie case by showing quick and effective entry does not mean that successful rebuttal requires such a showing.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Criminal Law & Procedure > Trials > Burdens of Proof > Prosecution

Evidence > Inferences & Presumptions > General Overview

HN8[] **Antitrust & Trade Law, Clayton Act**

A defendant cannot realistically be expected to prove that new competitors will "quickly" or "effectively" enter unless it produces evidence regarding specific competitors and their plans.

Antitrust & Trade Law > Clayton Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Merger Guidelines

HN9[] **Antitrust & Trade Law, Clayton Act**

In evaluating entry barriers a court should focus on whether significant entry barriers would exist after the merged firm had eliminated some of its rivals, because at that point the remaining firms would begin to charge supracompetitive prices, and the barriers that existed during competitive conditions might well prove insignificant.

Antitrust & Trade Law > Clayton Act > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Evidence > Inferences & Presumptions > General Overview

HN10[] **Antitrust & Trade Law, Clayton Act**

A defendant seeking to rebut a presumption of anticompetitive effect must show that the prima facie case inaccurately predicts the relevant transaction's probable effect on future competition. A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor.

Antitrust & Trade Law > Clayton Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Mergers & Acquisitions Law > Merger Guidelines

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN11[] **Antitrust & Trade Law, Clayton Act**

A defendant required to produce evidence "clearly" disproving future anticompetitive effects must essentially persuade the trier of fact on the ultimate issue in the case - whether a transaction is likely to substantially lessen competition. Absent express instructions to the contrary, the court is loath to depart from settled principles and impose such a heavy burden.

Counsel: David Seidman, Attorney, Department of Justice, with whom James F. Rill, Assistant Attorney General, Michael Boudin and Judy L. Whalley, Deputy Assistant Attorneys General, and Catherine G. O'Sullivan, Robert B. Nicholson and Andrea Limmer, Attorneys, Department of Justice, were on the brief, for Appellant.

David Marx, Jr., with whom Ronald A. Bloch, Lizbeth R. Levinson and Amy E. Hancock, for Oy Tampella AB and Eimco Secoma, S.A., and Randal M. Shaheen, for Baker Hughes Inc., were on the joint brief, for Appellees.

Judges: Ruth B. Ginsburg, Sentelle, and Thomas, Circuit Judges. Opinion for the Court filed by Circuit Judge Thomas.

Opinion by: THOMAS

Opinion

[*982] Appellee Oy Tampella AB, a Finnish corporation, through its subsidiary Tamrock AG, manufactures and sells hardrock hydraulic underground drilling rigs (HHUDRs) in the United States and throughout the world. Appellee Baker Hughes Inc., a corporation based in Houston, Texas, owned a French subsidiary, Eimco Secoma, S.A. (Secoma), that was similarly involved in the HHUDR industry. In 1989, Tamrock proposed **[**2]** to acquire Secoma.

The United States challenged the proposed acquisition, charging that it would substantially lessen competition in the United States HHUDR market in violation of section 7 of the Clayton Act, *15 U.S.C. § 18*. [1] In December 1989, the government sought and obtained a temporary restraining order blocking the transaction. *See* Temporary Restraining Order, *United States v. Baker Hughes Inc.*, No. 89-03333 (D.D.C. Dec. 15, 1989). In February 1990, the district court held a bench trial and issued a decision rejecting the government's request for a permanent injunction and dismissing the section 7 claim. *See* *United States v. Baker Hughes Inc., 731 F. Supp. 3 (D.D.C. 1990)*. The government immediately appealed to this court, requesting expedited proceedings and an injunction pending appeal. We granted the motion for expedited briefing and argument, but denied the motion for an injunction pending appeal. The appellees consummated the acquisition shortly thereafter.

[3]** The basic outline of a section 7 horizontal acquisition case is familiar. By showing that a transaction will lead to undue concentration in the market for a particular product in a particular geographic area, [2] the government establishes a presumption that the transaction will substantially lessen competition. *See* *United States v. Citizens & Southern Nat'l Bank, 422 U.S. 86, 120-22, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975)*; *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 363, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. The burden of producing evidence to rebut this presumption then shifts to the defendant. *See, e.g.,* *United States v. Marine Bancorporation, 418 U.S. 602, 631, 41 L. Ed. 2d 978, 94 S. Ct. 2856 (1974)*; **[*983]** *United States v. General Dynamics Corp., 415 U.S. 486, 496-504, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974)*; *Philadelphia Bank, 374 U.S. at 363*. If the defendant successfully rebuts the presumption, the burden of producing additional evidence of anticompetitive effect shifts to the government, and merges with the ultimate burden of persuasion, which remains with the government **[**4]** at all times. *See* *Kaiser Aluminum & Chem. Corp. v. FTC, 652 F.2d 1324, 1340 & n. 12 (7th Cir. 1981)*.

[5]** By presenting statistics showing that combining the market shares of Tamrock and Secoma would significantly increase concentration in the already highly concentrated United States HHUDR market, the government established a prima facie case of anticompetitive effect. [3] The district court, however, found sufficient evidence that the merger would not substantially lessen competition to conclude that the defendants had rebutted this prima facie case. The government did not produce any additional evidence showing a probability of substantially lessened competition, and thus failed to carry its ultimate burden of persuasion.

[6]** In this appeal, the government assails the court's conclusion that the defendants rebutted the prima facie case. Doubtless aware that this court will set aside the district court's findings of fact only if they are clearly erroneous, *see* *Fed.R.Civ.P. 52(a)*, the government frames the ***HN2***[] issue as a pure question of law, which we

---

[1] Section 7 ***HN1***[] prohibits mergers and acquisitions the effect of which "may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*.

[2] The parties in this case do not seriously contest the district court's definition of the relevant markets. The court defined the geographic market as the entire United States, *see* *731 F. Supp. at 5-6*, and the relevant product as three types of HHUDRS: face drills ("jumbos"), long-hole drills, and roof-bolting drills, as well as associated spare parts, components, and accessories, and used drills. *See* *id. at 4, 6-8*.

Although the appellees quibble with the court's product market definition, they conclude that "the [district] court's product market definition *presages* its finding that the extent of present competition and ease of entry preclude finding a violation of Section 7." Brief for Appellees at 10 (emphasis added). If the appellees believe that the court's product market definition contributed to their victory, we see no reason to address their halfhearted and contradictory challenges to that definition.

[3] From 1986 through 1988, Tamrock had an average 40.8% share of the United States HHUDR market, while Secoma's share averaged 17.5%. *731 F. Supp. at 6*. In 1988 alone, the two firms enjoyed a combined share of 76% of the market. (The district court inaccurately calculated this figure as 66%. *See* *id. at 10*; Brief for Appellant at 10 n. 10; Brief for Appellees att. A.) The acquisition thus has brought about a dramatic increase in the Herfindahl-Hirschman Index (HHI) -- a yardstick of concentration -- for this market. The Department of Justice's Merger Guidelines characterize as "highly concentrated" any market in which the HHI exceeds 1800. *See* United States Dep't of Justice, Merger Guidelines § 3.1 (June 14, 1984), *reprinted in* 4Trade Reg.Rep. (CCH) P. 13,103, at 20,561-64 (1988). Using the 1986-1988 figures, this acquisition has increased the HHI in this market from 2878 to 4303. Brief for Appellant at 5 n. 3, 12 (computed from *731 F. Supp. at 6*).

review de novo. The government's key contention is that the district court, which did not expressly state the legal standard that it applied in its analysis of rebuttal evidence, failed to apply a sufficiently stringent standard. The government argues that, as a matter of law, section 7 defendants can rebut a prima facie case *only by a clear showing that entry into the market by competitors would be quick and effective*. Because the district court failed to apply this standard, the government submits, the court erred in concluding that the proposed acquisition would not substantially lessen future competition in the United States HHUDR market.

We find no merit in the legal standard propounded by the government. It is devoid of support in the statute, in the case **[**7]** law, and in the government's own Merger Guidelines. Moreover, it is flawed on its merits in three fundamental respects. First, it assumes that ease of entry by competitors is the *only* consideration relevant to a section 7 defendant's rebuttal. Second, it requires that a defendant who seeks to show ease of entry bear the onerous burden of proving that entry will be "quick and effective." Finally, by stating that the defendant can rebut a prima facie case only by a *clear* showing, the standard in effect shifts the government's ultimate burden of persuasion to the defendant. Although the district court in this case did not expressly set forth a legal standard when it evaluated the defendants' rebuttal, we have carefully reviewed the court's thorough analysis of competitive conditions in the United States HHUDR market, and we are satisfied that the court effectively applied a standard faithful to section 7. [4] **[*984]** Concluding that the court applied this legal standard to factual findings that are not clearly erroneous, we affirm the court's denial of a permanent injunction and its dismissal of the government's section 7 claim.

[8]** I.

It is a foundation of section 7 doctrine, disputed by no authority cited by the government, that evidence on a variety of factors can rebut a prima facie case. These factors include, but are not limited to, the absence of significant entry barriers in the relevant market. In this appeal, however, the government inexplicably imbues the entry factor with talismanic significance. If, to successfully rebut a prima facie case, a defendant *must* show that entry by competitors will be quick and effective, then other factors bearing on future competitiveness are all but irrelevant. The district court in this case considered at least two factors in addition to entry: the misleading nature of the statistics underlying the government's prima facie case and the sophistication of HHUDR consumers. These non-entry factors provide compelling support for the court's holding that Tamrock's acquisition of Secoma was not likely to lessen competition substantially. We have concluded that the court's consideration of these factors was crucial, and that the government's fixation on ease of entry is misplaced.

Section 7 involves *probabilities*, not certainties or possibilities. [5] The Supreme **[**9]** Court has adopted a totality-of-the-circumstances approach to the statute, weighing a variety of factors to determine the effects of particular transactions on competition. That the government can establish a prima facie case through evidence on only one factor, market concentration, does not negate the breadth of this analysis. ***HN4***[] Evidence of market concentration simply provides a convenient starting point for a broader inquiry into future competitiveness; the Supreme Court has never indicated that a defendant seeking to rebut a prima facie case is restricted to producing evidence of ease of entry. Indeed, in numerous cases, defendants have relied entirely on non-entry factors in successfully rebutting a prima facie case.

---

[4] Even if we found more impressive the argument that the district court did not clearly articulate the legal standard applicable to a section 7 rebuttal, it would remain open to us to affirm that court's judgment. *Cf.* *Nelson v. United States, 267 U.S. App. D.C. 330, 838 F.2d 1280, 1285 (D.C.Cir. 1988)* ("We ***HN3***[] may affirm a trial court's decision on a basis not relied on by the district court where that ground finds support in the record.") (citation omitted).

[5] *See* *Brown Shoe Co. v. United States, 370 U.S. 294, 323, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* ("Congress used the words '*may be* substantially to lessen competition' (emphasis supplied), to indicate that its concern was with probabilities, not certainties. Statutes existed for dealing with clear-cut menaces to competition; no statute was sought for dealing with ephemeral possibilities. Mergers with a *probable* anticompetitive effect were to be proscribed by this Act.") (footnote omitted) (emphasis added).

[10]** In *United States v. General Dynamics Corp., 415 U.S. 486, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974)*, for instance, the Supreme Court rejected the government's argument that a merger between two leading coal producers would violate section 7. Although the transaction would result in the two largest firms controlling about half of all sales in an industry that was already highly concentrated because of a rapid decline in the number of competitors, the defendants produced considerable evidence that the merger would not substantially lessen competition. One of the parties to the merger owned only minimal reserves of coal, an irreplaceable raw material, and had already committed these reserves through long-term contracts. This evidence led the Court to conclude that the government's statistics regarding concentration in the wake of the merger inaccurately portrayed the post-merger company's weak competitive stature, and that the defendants had therefore rebutted the prima facie case. *Id. at 503-04*. Nowhere did the Court consider barriers to entry.

Indeed, the Court in *General Dynamics* emphasized the comprehensive nature of a section 7 inquiry, quoting **[**11]** at length from its decision a decade earlier in *Brown Shoe Co. v. United States, 370 U.S. 294, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. *See* *General Dynamics, 415 U.S. at 498*. In *Brown Shoe*, the Court applied section 7 stringently, holding that a merger that created a company with a 5% share of a highly fragmented market violated the statute. In arriving at this result, however, **[*985]** the Court stressed that ***HN5***[] a transaction must

> be functionally viewed, in the context of its particular industry. That is, whether the consolidation was to take place in an industry that was fragmented rather than concentrated, that had seen a recent trend toward domination by a few leaders or had remained fairly consistent in its distribution of market shares among the participating companies, that had experienced easy access to markets by suppliers and easy access to suppliers by buyers or had witnessed foreclosure of business, that had witnessed the ready entry of new competition or the erection of barriers to prospective entrants, all were aspects, varying in **[**12]** importance with the merger under consideration, which would properly be taken into account.

370 U.S. at 321-22 (footnote omitted). [6] All these factors are relevant in determining whether a transaction is likely to substantially lessen competition, but none is invariably dispositive. *See* Note, *Horizontal Mergers After* United States v. General Dynamics Corp., 92 Harv.L.Rev. 491, 500 (1978).

In the wake of *General Dynamics*, the Supreme Court and lower courts have found section 7 defendants to have successfully rebutted the government's prima facie case by presenting **[**13]** evidence on a variety of factors other than ease of entry. *See, e.g.,* *Citizens & Southern, 422 U.S. at 121-23* (no lessening of competition, and thus no violation of section 7, where acquired banks were already associated with acquiring bank; no discussion of ease of entry); *Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 276 (7th Cir. 1981)* (acquired company's deteriorating market position both before and after acquisition rebutted prima facie case), *cert. denied*, *455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982)*; *FTC v. National Tea Co., 603 F.2d 694, 699-700 (8th Cir. 1979)* (weak market position of acquiring company made substantial lessening of competition unlikely); *United States v. International Harvester Co., 564 F.2d 769, 773-79 (7th Cir. 1977)* (company successfully rebutted prima facie case by showing, inter alia, financial weakness of acquired company, de facto independence of acquired company from acquiring company, strong level of competition in relevant market, and tendency of the market toward even stronger levels of competition).

Indeed, that a variety of factors other than **[**14]** ease of entry can rebut a prima facie case has become hornbook law. *See, e.g.*, P. Areeda & H. Hovenkamp, ***Antitrust Law*** paras. 919', 920.1, 921', 925', 934', 935', 939', at 813-23 (Supp. 1989) (other factors include significance of market shares and concentration, likelihood of express collusion or tacit coordination, and prospect of efficiencies from merger); H. Hovenkamp, *Economics and Federal **Antitrust***

---

[6] *See also* *id. at 322 n. 38* ("Statistics reflecting the shares of the market controlled by the industry leaders and the parties to the merger are, of course, the primary index of market power; but only a further examination of the particular market -- its structure, history and probable future -- can provide the appropriate setting for judging the probable anticompetitive effect of the merger.").

Law § 11.6, at 307-11 (1985) (other factors include supply of irreplaceable raw materials, excess capacity, degree of product homogeneity, marketing and sales methods, and absence of a trend toward concentration); L. Sullivan, *Handbook of the Law of Antitrust* § 204, at 622-25 (1977) (other factors include industry structure, weakness of data underlying prima facie case, elasticity of industry demand, inter-industry cross-elasticities of demand and supply, product differentiation, and efficiency). *See generally* Antitrust Section, ABA, *Horizontal Mergers: Law and Policy* 162-75, 201-04, 219-63 (Monograph No. 12, 1986).

It is not surprising, then, that the Department of Justice's own Merger Guidelines contain a detailed discussion of non-entry factors that can **[**15]** overcome a presumption of illegality established by market share statistics. *See* United States Dep't of Justice, Merger Guidelines (June 14, 1984) [hereinafter Guidelines], *reprinted in* 4Trade Reg.Rep. (CCH) P. 13,103, at 20,561-64 (1988). According to the Guidelines, these factors include changing market **[*986]** conditions (§ 3.21), the financial condition of firms in the relevant market (§ 3.22), special factors affecting foreign firms (§ 3.23), the nature of the product and the terms of sale (§ 3.41), information about specific transactions and buyer market characteristics (§ 3.42), the conduct of firms in the market (§ 3.44), market performance (§ 3.45), and efficiencies (§ 3.5).

Given this acknowledged multiplicity of relevant factors, we are at a loss to understand on what basis the government has decided that "to rebut the government's prima facie case, the defendants were *required* to show that *entry* would be both quick and effective in preventing supracompetitive prices." Brief for Appellants at 11-12 (emphasis added). If the district court in this case had focused exclusively on entry, it might be understandable that the government would mirror **[**16]** that focus in attacking the court's conclusion. The district court, however, canvassed a number of non-entry factors that contributed to its conclusion that the defendants had rebutted the prima facie case. By ignoring these factors, the government's arguments against that conclusion fall wide of the mark.

The district court's analysis of this case is fully consonant with precedent and logic. The court reviewed the evidence proffered by the defendants as part of its overall assessment of future competitiveness in the United States HHUDR market. As noted above, the court gave particular weight to two non-entry factors: the flawed underpinnings of the government's prima facie case and the sophistication of HHUDR consumers. The court's consideration of these factors was not only appropriate, but imperative, because in this case these factors significantly affected the probability that the acquisition would have anticompetitive effects.

With respect to the first factor, the statistical basis of the prima facie case, the court accepted the defendants' argument that the government's statistics were misleading. Because the United States HHUDR market is minuscule, market share statistics **[**17]** are "volatile and shifting," *731 F. Supp. at 11*, and easily skewed. In 1986, for instance, only 22 HHUDRs were sold in the United States. In 1987, the number rose to 43, and in 1988 it fell to 38. Every HHUDR sold during this period, thus, increased the seller's market share by two to five percent. A contract to provide multiple HHUDRs could catapult a firm from last to first place. The district court found that, in this unusual market, "at any given point in time an individual seller's future competitive strength may not be accurately reflected." *Id. at 9*. While acknowledging that the HHUDR market would be highly concentrated after Tamrock acquired Secoma, the court found that such concentration in and of itself would not doom competition. High concentration has long been the norm in this market. For example, only four firms sold HHUDRs in the United States between 1986 and 1989. *Id. at 5-6*. [7] Nor is concentration surprising where, as here, a product is esoteric and its market small. Indeed, the trial judge found that "concentration has existed for some time [in the United States HHUDR market] but there is no proof of overpricing, **[**18]** excessive profit or any decline in quality, service or diminishing innovation." *Id. at 12*.

The second non-entry factor that the district court considered was the sophistication of HHUDR consumers. HHUDRs currently cost hundreds of thousands of dollars, and orders can exceed $ 1 million. *Id. at 8*. These products are hardly trinkets sold to small consumers who may possess imperfect information and limited bargaining

---

[7] *See also supra* note 3 (HHI of United States HHUDR market before merger was 2878; Department of Justice regards any market in which HHI exceeds 1800 as "highly concentrated").

power. HHUDR buyers closely examine available options and typically insist on receiving multiple, confidential bids for each order. *Id.* This sophistication, the court found, was likely to promote competition even in a highly concentrated market. *Id. at 11*.

[*987] The government has not provided us with any reason to suppose that these findings of fact **[**19]** are unsupported in the record or clearly erroneous, *see* *Fed.R.Civ.P. 52(a)*. We thus accept them as correct. These findings provide considerable support for the district court's conclusion that the defendants successfully rebutted the government's prima facie case. Because the defendants also provided compelling evidence on ease of entry into this market, we need not decide whether these findings, without more, are sufficient to rebut the government's prima facie case. The foregoing analysis of non-entry factors is intended merely to underscore that, contrary to the government's assumption, these factors are relevant, and can even be dispositive, in a section 7 rebuttal analysis.

II.

HN6[] The existence and significance of barriers to entry are frequently, of course, crucial considerations in a rebuttal analysis. In the absence of significant barriers, a company probably cannot maintain supracompetitive pricing for any length of time. *See, e.g., United States v. Falstaff Brewing Corp., 410 U.S. 526, 532-33, 35 L. Ed. 2d 475, 93 S. Ct. 1096 (1973)*; *United States v. Syufy Enters., 903 F.2d 659*, **[**20]** slip op. 4523, 4532-33 (9th Cir. 1990); *California v. American Stores Co., 872 F.2d 837, 842 (9th Cir. 1989)*, *rev'd on other grounds*, *495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*; *Ball Memorial Hosp., Inc. v. Mutual Hosp. Ins., 784 F.2d 1325, 1335-36 (7th Cir. 1986)*. The district court in this case reviewed the prospects for future entry into the United States HHUDR market and concluded that, overall, entry was likely, particularly if Tamrock's acquisition of Secoma were to lead to supracompetitive pricing. The government attacks this conclusion, asserting that, as a matter of law, the court should have required the defendants to show clearly that entry would be "quick and effective." We reject this novel and unduly onerous standard. The district court's factual findings amply support its determination that future entry into the United States HHUDR market is likely. This determination, in turn, supports the court's conclusion that the defendants successfully rebutted the government's prima facie case.

As authority for its "quick and effective" entry test, the government relies primarily on *United States v. Waste Management, Inc., 743 F.2d 976, 981-84 (2d Cir. 1984)*. **[**21]** This reliance is misplaced. Neither *Waste Management* nor any other case purports to establish a categorical "quick and effective" entry requirement. The Second Circuit in *Waste Management* simply noted that the defendant had successfully rebutted the government's prima facie case by showing that entry into the Dallas/Fort Worth trash collection market was "easy." *Id. at 983*. ***HN7***[] That a defendant *may* successfully rebut a prima facie case by showing quick and effective entry does not mean that successful rebuttal *requires* such a showing. We are at a loss to understand how the government derived from *Waste Management* (where, lest the irony be missed, the government lost) the proposition that "a defendant arguing supposed ease of entry can rebut the government's prima facie case *only* by clearly showing that entry will be both quick and effective at preventing supracompetitive pricing." Brief for Appellant at 14 (emphasis added).

That the "quick and effective" standard lacks support in precedent is not surprising, for it would require of defendants a degree **[**22]** of clairvoyance alien to section 7, which, as noted above, deals with probabilities, not certainties. Although the government disclaims any attempt to impose upon defendants the burden of proving that entry actually will occur, *see* Reply Brief for Appellant at 13 n. 13, we believe that an inflexible "quick and effective" entry requirement would tend to impose precisely such a burden. ***HN8***[] A defendant cannot realistically be expected to prove that new competitors will "quickly" or "effectively" enter unless it produces evidence regarding specific competitors and their plans. Such evidence is rarely available; potential competitors have a strong interest in downplaying the likelihood that they will enter a given market. When the government sarcastically "wonders how slow and ineffective **[*988]** entry rebuts a prima facie case," *id. at 12*, it misses a crucial point. If the totality of a defendant's evidence suggests that entry will be slow and ineffective, then the district court is unlikely to find the prima facie case rebutted. This is a far cry, however, from insisting that the defendant **[**23]** must *invariably* show that new competitors will enter quickly and effectively.

Furthermore, the supposed "quick and effective" entry requirement overlooks the point that a firm that *never* enters a given market can nevertheless exert competitive pressure on that market. If barriers to entry are insignificant, the *threat* of entry can stimulate competition in a concentrated market, regardless of whether entry ever occurs. *See* Falstaff Brewing, 410 U.S. at 532-33 (potential for defendant Falstaff to enter the market might induce brewers in the Northeast to maintain competitive prices); FTC v. Procter & Gamble Co., 386 U.S. 568, 581, 18 L. Ed. 2d 303, 87 S. Ct. 1224 (1967) ("It is clear that the existence of Procter at the edge of the industry exerted considerable influence on the market. . . . [The] industry was influenced by each firm's predictions of the market behavior of its competitors, actual *and potential*.") (emphasis added); *cf.* Byars v. Bluff City News Co., 609 F.2d 843, 851 n. 19 (6th Cir. 1979) ("If entry barriers are low, the threat of potential competition operates as a significant check on monopoly **[**24]** power since competitors will quickly enter the market if prices are raised significantly."). If a firm that *never* enters a market can keep that market competitive, a defendant seeking to rebut a prima facie case certainly need not show that any firm *will* enter the relevant market.

The final flaw in the proposed "quick and effective" standard is its manipulability. The adjectives "quick" and "effective" are hardly self-defining, and have not traditionally been used in the section 7 context. The government's Merger Guidelines do not use the words when discussing entry, noting only that

> if entry into a market is so easy that existing competitors could not succeed in raising price for any significant period of time, the Department is unlikely to challenge mergers in that market. . . . In assessing the ease of entry into a market, the Department will consider the likelihood and probable magnitude of entry in response to a "small but significant and nontransitory" increase in price.

Guidelines § 3.3, *reprinted in* 4Trade Reg.Rep. (CCH) at 20,562. In its brief, moreover, the government fails to state its own standard consistently, insisting at one point that **[**25]** a defendant show that entry will be "sure, swift, and substantial." Brief for Appellant at 16. Our uncertainty over the meaning and implications of "quick and effective" entry makes us all the more resistant to the imposition of such a requirement. Nor has the government shown that current section 7 law is so confused as to warrant the invention of a new standard.

The government's insistence on a "quick and effective" entry standard only reaffirms our doubts, raised in section I of this opinion, about the government's approach to section 7 analysis. Predicting future competitive conditions in a given market, as the statute and precedents require, calls for a comprehensive inquiry. The government's standard would improperly narrow the section 7 inquiry, channelling what should be an overall analysis of competitiveness into a determination of whether a defendant has shown particular facts.

Having rejected the "quick and effective" entry standard itself, we turn briefly to the government's more general argument that the district court's findings regarding ease of entry failed to support its conclusion that the defendants had rebutted the prima facie case. The district court in this **[**26]** case discussed a number of considerations that led it to conclude that entry barriers to the United States HHUDR market were not high enough to impede future entry should Tamrock's acquisition of Secoma lead to supracompetitive pricing. First, the court noted that at least two companies, Cannon and Ingersoll-Rand, had entered the United States HHUDR market in 1989, and were poised **[*989]** for future expansion. [8] 731 F. Supp. at 9, 10, 11. Second, the court stressed that a number of firms competing in Canada and other countries had not penetrated the United States market, but could be expected to do so if Tamrock's acquisition of Secoma led to higher prices. Id. at 10-11. [9] **[**28]** Because the market is small, "it is inexpensive to develop a separate sales and service network in the United States." Id. at 8. Third, these firms would

---

[8] As the Guidelines note, "'Entry' may occur as firms outside the market enter for the first time *or as fringe firms currently in the market greatly expand their current capacity*." Guidelines § 3.3, *reprinted in* 4Trade Reg.Rep. (CCH) at 20,562 n. 20 (emphasis added).

[9] Some of these firms have already tried, but failed, to penetrate the United States HHUDR market. As the district court correctly noted, however, failed entry in the past does not necessarily imply failed entry in the future: if prices reach supracompetitive levels, a company that has failed to enter in the past could become competitive. *See* 731 F. Supp. at 11; *cf.* Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 119, 107 S. Ct. 484, 93 L. Ed. 2d 427 n. 15 (1986) **HN9**[] ("In evaluating entry barriers . . . a court should focus on whether significant entry barriers would exist *after* the merged firm had eliminated some of its rivals, because at that point the remaining firms would begin to charge supracompetitive prices, and the barriers that existed during competitive conditions might well prove insignificant.").

exert competitive pressure on the United States HHUDR market even if they never actually entered the market. *Id. at 10-11*. Finally, the court noted that there had been tremendous turnover in the United States HHUDR market in the 1980s. Secoma, for example, did not sell a single HHUDR in **[**27]** the United States in 1983 or 1984, but then lowered its price and improved its service, becoming market leader by 1989. *Id. at 9, 10*. Secoma's growth suggests that competitors not only can, but probably will, enter or expand if this acquisition leads to higher prices. The district court, to be sure, also found some facts suggesting difficulty of entry, [10] but these findings do not negate its ultimate finding to the contrary.

In sum, we see no error -- legal or factual -- in the district court's determination that entry into the United States HHUDR market would likely avert anticompetitive effects from Tamrock's acquisition of Secoma. The court's determination on entry, considered along with the findings discussed in section I of this opinion, suffices to rebut the government's prima facie case.

III.

Finally, we consider the strength of the showing that a section 7 defendant must make to rebut a prima facie case. The district court simply reviewed the evidence that the defendants presented **[**29]** and concluded that the acquisition was not likely to substantially lessen competition. The government argues that the court erred by failing to require the defendants to make a "clear" showing. *See* Brief for Appellant at 13. The relevant precedents, however, suggest that this formulation overstates the defendants' burden. We conclude that a "clear" showing is unnecessary, and we are satisfied that the district court required the defendants to produce sufficient evidence.

The government's "clear showing" language is by no means unsupported in the case law. In the mid-1960s, the Supreme Court construed section 7 to prohibit virtually any horizontal merger or acquisition. At the time, the Court envisioned an ideal market as one composed of many small competitors, each enjoying only a small market share; the more closely a given market approximated this ideal, the more competitive it was presumed to be. *See United States v. Aluminum Co. of Am., 377 U.S. 271, 280, 84 S. Ct. 1283, 12 L. Ed. 2d 314 (1964)* ("It is the basic premise of [section 7] that competition will be most vital 'when there are many sellers, none of which has any significant market share.'") (quoting **[**30]** *United States v. Philadelphia **[*990]** Nat'l Bank, 374 U.S. 321, 363, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963))*.

This perspective animated a series of decisions in which the Court stated that a section 7 defendant's market share measures its market power, that statistics alone establish a prima facie case, and that a defendant carries a heavy burden in seeking to rebut the presumption established by such a prima facie case. The Court most clearly articulated this approach in *Philadelphia Bank*:

> Th[e] intense congressional concern with the trend toward concentration [underlying section 7] warrants dispensing, in certain cases, with elaborate proof of market structure, market behavior, or probable anticompetitive effects. Specifically, we think that a merger which produces a firm controlling an undue percentage share of the relevant market, and results in a significant increase in the concentration of firms in that market, is so inherently likely to lessen competition substantially that it must be enjoined in the absence of evidence *clearly showing* that the merger is not likely to have such anticompetitive effects.

374 U.S. at 363 **[**31]** (emphasis added). *Philadelphia Bank* involved a proposed merger that would have created a bank commanding over 30% of a highly concentrated market. While acknowledging that the banks could in

---

[10] The court, for instance, noted that HHUDRs are custom-made, and thus are not readily interchangeable or replaceable. Buyers, therefore, tend to return to sellers from whom they have purchased in the past. *731 F. Supp. at 8*. The court also found that HHUDR customers typically place great importance on assurances of product quality and reliable future service -- considerations that may handicap new entrants. *Id.* It also noted the significant economies of scale involved in manufacturing HHUDRs. *Id.*

principle rebut the government's prima facie case, the Court found unpersuasive the banks' evidence challenging the alleged anticompetitive effect of the merger. *See id. at 366-72*.

In *United States v. Von's Grocery Co., 384 U.S. 270, 16 L. Ed. 2d 555, 86 S. Ct. 1478 (1966)*, the Court further emphasized the weight of a defendant's burden. Despite evidence that a post-merger company had only a 7.5% share of the Los Angeles retail grocery market, the Court, citing anticompetitive "trends" in that market, ordered the merger undone. The Court summarily dismissed the defendants' contention that the post-merger market was highly competitive. *Id. at 277-78*. [11] Noting that the market was "marked at the same time by both a continuous decline in the number of small businesses and a large number of mergers," the *Von's Grocery* Court predicted that, if the merger were not undone, the market "would slowly but inevitably gravitate from a market of **[**32]** many small competitors to one dominated by one or a few giants, and competition would thereby be destroyed." *Id. at 278*; *see also United States v. Pabst Brewing Co., 384 U.S. 546, 550-52, 16 L. Ed. 2d 765, 86 S. Ct. 1665 (1966)* (acquisition producing brewer accounting for 4.49% of nationwide beer sales violates section 7; brewer's rebuttal evidence virtually ignored).

Although the Supreme Court has not overruled these section 7 precedents, it has cut them back sharply. In *General Dynamics, 415 U.S. at 498-504*, the Court affirmed a district court determination that, by presenting evidence that undermined the government's statistics, section 7 defendants had successfully rebutted a prima facie case. In so holding, the Court did not expressly reaffirm or disavow **[**33]** *Philadelphia* Bank's statement that a company must "clearly" show that a transaction is not likely to have substantial anticompetitive effects. The Court simply held that the district court was justified, based on all the evidence, in finding that "no substantial lessening of competition occurred or was threatened by the acquisition." *General Dynamics, 415 U.S. at 498*.

General Dynamics began a line of decisions differing markedly in emphasis from the Court's antitrust cases of the 1960s. Instead of accepting a firm's market share as virtually conclusive proof of its market power, the Court carefully analyzed defendants' rebuttal evidence. [12] These cases discarded **[*991]** *Philadelphia* Bank's insistence that a defendant "clearly" disprove anticompetitive effect, and instead described the rebuttal burden simply in terms of a "showing." *See, e.g., United States v. Marine Bancorporation, 418 U.S. 602, 631, 41 L. Ed. 2d 978, 94 S. Ct. 2856 (1974)* (after government established prima facie case, "the burden was then upon appellees *to show* that the concentration ratios, which can be unreliable indicators of actual market behavior, did **[**34]** not accurately depict the economic characteristics of the [relevant] market") (citation omitted) (emphasis added); *United States v. Citizens & Southern Nat'l Bank, 422 U.S. 86, 120, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975)* (after government established prima facie case, "it was . . . incumbent upon [the defendant] *to show* that the market-share statistics gave an inaccurate account of the acquisitions' probable effects on competition") (emphasis added). Without overruling *Philadelphia Bank*, then, the Supreme Court has at the very least lightened the evidentiary burden on a

---

[11] Justice Stewart, in dissent, emphasized the considerable amount of evidence in the record indicating the market's competitiveness. *384 U.S. at 290-301* (Stewart, J., dissenting).

[12] Judge Posner has elucidated this point:

> The most important developments that cast doubt on the continued vitality of such cases as *Brown Shoe* and *Von's* are found in other cases, where the Supreme Court, echoed by the lower courts, has said repeatedly that the economic concept of competition, rather than any desire to preserve rivals as such, is the lodestar that shall guide the contemporary application of the antitrust laws, not excluding the Clayton Act. . . . Applied to cases brought under Section 7, this principle requires the district court . . . to make a judgment whether the challenged acquisition is likely to hurt consumers, as by making it easier for the firms in the market to collude, expressly or tacitly, and thereby force price above or farther above the competitive level.

Hospital Corp. of Am. v. FTC, 807 F.2d 1381, 1386 (7th Cir. 1986), *cert. denied*, ***481 U.S. 1038, 107 S. Ct. 1975, 95 L. Ed. 2d 815 (1987)***.

section 7 defendant. *See generally* Note, 92 Harv. L. Rev. at 491 (describing impact of *General Dynamics* on section 7 jurisprudence).

[35]** In the aftermath of *General Dynamics* and its progeny, ***HN10***[] a defendant seeking to rebut a presumption of anticompetitive effect must show that the prima facie case inaccurately predicts the relevant transaction's probable effect on future competition. *See* *American Stores, 872 F.2d at 842* (defendant can rebut prima facie case "through evidence *demonstrating* that statistics on market share, market concentration, and market concentration trends portray inaccurately the merger's probable effects on competition") (emphasis added); *cf.* *Waste Management, 743 F.2d at 981* (defendant can rebut prima facie case "by *a demonstration* that the merger will not have anticompetitive effects") (emphasis added). The more compelling the prima facie case, the more evidence the defendant must present to rebut it successfully. A defendant can make the required showing by affirmatively showing why a given transaction is unlikely to substantially lessen competition, or by discrediting the data underlying the initial presumption in the government's favor.

By focusing **[**36]** on the future, section 7 gives a court the uncertain task of assessing probabilities. In this setting, allocation of the burdens of proof assumes particular importance. By shifting the burden of producing evidence, present law allows both sides to make competing predictions about a transaction's effects. If the burden of production imposed on a defendant is unduly onerous, the distinction between that burden and the ultimate burden of persuasion -- always an elusive distinction in practice -- disintegrates completely. ***HN11***[] A defendant required to produce evidence "clearly" disproving future anticompetitive effects must essentially persuade the trier of fact on the ultimate issue in the case - whether a transaction is likely to substantially lessen competition. Absent express instructions to the contrary, we are loath to depart from settled principles and impose such a heavy burden. *See* *Kaiser Aluminum & Chem. Corp. v. FTC, 652 F.2d 1324, 1340 & n. 12 (7th Cir. 1981)*; *cf.* *Texas Dep't of Community Affairs v. Burdine, 450 U.S. 248, 253-56, 67 L. Ed. 2d 207, 101 S. Ct. 1089 (1981)* **[**37]** (applying similar production-burden-shifting analysis to employment discrimination suits under title VII, and noting that "the ultimate burden of persuading the trier of fact . . . remains at all times with the plaintiff," *id. at 253*); 9 J. Wigmore, *Evidence* § 2489, at 300 (J. Chadbourn rev. 1981) (burden of persuasion "never shifts" away from plaintiff).

[*992] Imposing a heavy burden of production on a defendant would be particularly anomalous where, as here, it is easy to establish a prima facie case. The government, after all, can carry its initial burden of production simply by presenting market concentration statistics. To allow the government virtually to rest its case at that point, leaving the defendant to prove the core of the dispute, would grossly inflate the role of statistics in actions brought under section 7. The Herfindahl-Hirschman Index cannot guarantee litigation victories. [13] *Cf.* *Ball Memorial Hosp., 784 F.2d at 1336* (explaining that "market share is just a way of estimating market power, which is the ultimate consideration," and noting that "when there are better ways to estimate market power, the court should use them"). Requiring **[**38]** a "clear showing" in this setting would move far toward forcing a defendant to rebut a probability with a certainty.

[39]** * * *

The appellees in this case presented the district court with considerable evidence regarding the United States HHUDR market. The court credited the evidence concerning the sophistication of HHUDR consumers and the insignificance of entry barriers, as well as the argument that the statistics underlying the government's prima facie case were misleading. This evidence amply justified the court's conclusion that the prima facie case inaccurately

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

Proof of conspiracy requires parallel behavior plus additional facts or circumstances that raise the inference of agreement. Furthermore, to defeat a motion for summary judgment, the plaintiff must come forward with evidence that dispels the possibility that the defendants were acting for independent business reasons.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

Coincidence does not a conspiracy make.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Sherman Act, Claims**

On a claim of concerted price fixing, the antitrust plaintiff must present evidence sufficient to carry its burden of proving that there was such an agreement. The correct standard is that there must be evidence that tends to exclude the possibility of independent action by the defendants, that is, there must be direct or circumstantial evidence that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN6[] **Remedies, Damages**

To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of the Sherman Act, *15 U.S.C.S. § 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. A movant must show that the inference of conspiracy is reasonable in light of the competing inference of independent action or collusive action that could not have harmed respondents.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In antitrust cases, the analysis permits a defendant to rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Once a defendant has met this initial burden, a plaintiff must provide specific factual support for its allegations of conspiracy tending to show that the defendant was not acting independently.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

When a defendant puts forward denials of conspiracy in an antitrust action, plaintiffs must come forward with some significant probative evidence that suggests that conscious parallelism is the result of an unlawful agreement. Defendant must assert that action was against economic self-interest, and must come forward with some "plus" factor that tends to indicate the absence of independent action.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

Evidence of informal communications among several parties does not unambiguously support an inference of a conspiracy, and evidence of meetings among the defendants is ambiguous at best and does not help to exclude the possibility of independent action.

Antitrust & Trade Law > Sherman Act > General Overview

Contracts Law > Defenses > Illegal Bargains

HN10[] **Antitrust & Trade Law, Sherman Act**

If the exchange of information regarding the commissions that firms would pay is not unreasonable business behavior, then it is not an illegal agreement, and competitors may exchange price information for legitimate business reasons.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Where the evidence of the existence of a conspiracy is ambiguous, the plaintiff may survive summary judgment only by putting forth evidence that tends to exclude the possibility that the defendants were pursuing independent interests.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

A defendant is entitled to summary judgment in an antitrust action when it provides a plausible and justifiable alternative interpretation of its conduct that rebuts the alleged conspiracy.

Counsel: For Plaintiff-Appellant: Edwin J. Hughes, Stafford, Rosenbaum, Rieser & Hansen, Madison, Wisconsin.

For Defendants-Appellees: Walter F. Schmidt, Kent A. Tess-Mattner, Schmidt & Rupke, Milwaukee, Wisconsin, Marcia R. Rimai, Richard J. Sankovitz, Whyte & Hirschboeck, Milwaukee, Wisconsin, Warren S. Blumenthal, Blumenthal, Jacquart, Blumenthal & Leib, Milwaukee, Wisconsin.

Judges: Bauer, Chief Judge, and Ripple and Manion, Circuit Judges.

Opinion by: RIPPLE

Opinion

[*1168] RIPPLE, Circuit Judge.

Market Force began operations in 1986 as a real estate buyers' broker. In this case, it alleged that a group of realtors had conspired to drive it out of business in violation of Section 4 of the Clayton Act (*15 U.S.C. § 15*) and *Section 1* of the Sherman Act (*15 U.S.C. § 1*).

Market Force's motion for a preliminary injunction was denied by the district court. Subsequently, the defendants individually filed motions for summary judgment. The district court granted these motions. Market Force now **[**2]** appeals the grant of summary judgment to the defendants. For the following reasons, we affirm.

I

BACKGROUND

A. *Facts*

1. Market Force and the Real Estate Business

According to the record, residential real estate sales generally begin when a homeowner signs an exclusive marketing contract with a broker. The broker ("listing broker") then lists the property on a local "multiple listing service" (MLS). By listing on the MLS, the broker is making a general offer of subagency to any salesperson who can find a buyer to complete the sale. Other salespeople can show the house and try to arrange a sale with a prospective buyer. These individuals are called "selling brokers" or "selling agents" and, while working primarily with the buyer, are considered to be agents of the seller. In fact, their duty of loyalty lies with the seller. While commissions may vary, the traditional commission is 6% of the cost of the house, split so that the listing broker receives 60% (or 3.6% of the cost of the house) and the selling agent receives 40% (or 2.4% of the cost of the house).

Market Force began operations in 1986 as a "buyers' broker." It differed from traditional real estate firms **[**3]** in that it signed exclusive contracts with individuals seeking to purchase a house. The Market Force agent would find houses that the agent believed might interest clients, and show the houses to them. Most significantly, Market Force agents owed their duty of loyalty to the buyers. The contract between Market Force and the buyers specified that Market Force would receive a fee equal to 40% of the sales commission, or 2.4% of the selling price. The contract further anticipated that, at the time of sale, the buyer would request that the listing broker pay Market Force this commission. If the broker cooperated, the buyer would owe no further obligation to Market Force.

2. The Real Estate Community's Reaction to Market Force

For some time after Market Force began operation, other real estate firms treated Market Force in an inconsistent manner with respect to splitting commissions. Some firms paid a full 40% commission and others paid nothing. Mayfair Homes was the first real estate firm to adopt a concrete policy, deciding in September 1987 not to share any part of its sales commissions with Market Force. At the same time, Wauwatosa Realty Company (Wauwatosa), a large real estate **[**4]** firm in Milwaukee and throughout Wisconsin, occasionally split commissions and occasionally refused entirely to enter into sales contracts with Market Force buyers.

Before formulating a policy about splitting commissions with buyers' brokers, Joann Glawe, Wauwatosa's general sales manager, contacted Mayfair Homes and inquired about its policy. Wauwatosa subsequently issued its policy on October 23, 1987. Its policy was to pay a buyers' broker the same fee it paid to out-of-state or non-MLS brokers who refer a buyer to Wauwatosa. The district court noted that:

> **[*1169]** According to her affidavit, Ms. Glawe wrote the Wauwatosa policy with specific business reasons in mind: (1) Wauwatosa was paying the same 20% referral fee to out-of-state and non-MLS brokers who referred buyers to Wauwatosa; (2) Wauwatosa might have to pay a selling agent in a transaction even though a buyers' agent was involved, where, for example, a selling agent held an open house and the buyer represented by a buyers' agent toured the home; (3) Wauwatosa pays its listing agents more when a buyers' agent but not a selling agent is involved, on the theory that the listing agent must take on some of the duties **[**5]** of a selling agent, such as answering questions on behalf of the seller; and (4) buyers' agents have lower costs than selling agents because they do not list homes in the MLS.

The Market Force, Inc. v. Wauwatosa Realty Co., 706 F. Supp. 1387, 1390-91 (D.Wis. 1989). Wauwatosa mailed a sheet describing its policy to all brokers listed in the MLS book -- about 250 firms. Ms. Glawe testified at a deposition that she undertook this mailing following a conversation with Peter Shuttleworth, director of the MLS, who told her that "other brokers other than just buyer brokers were [acting as buyers' brokers] and it might be well to let everyone know." *Id.*

Coldwell Banker, which lists the second highest quantity of homes in Milwaukee after Wauwatosa, issued its policy on November 11, 1987, after reviewing Wauwatosa's policy. It set its commission rate at 20% of the total commission, a figure its chief operating officer may have believed mistakenly was the same as Wauwatosa's. [2] It also mailed its policy to all MLS brokers. In subsequent months, several other firms issued policy statements about sharing commissions with buyers' brokers. The rates were the **[**6]** same as those offered by Wauwatosa or Coldwell -- either 10% or 20% of the total sales commission. All the firms that eventually adopted commission policies for buyers' brokers together represented about 31% of the annual listings of homes for sale in the Milwaukee MLS.

Market Force had several negative experiences with other brokers. Several sales were lost due to intransigence about sharing commissions. R.52 at 2; R.54 at 7. One Market Force buyer was told not to work with Market Force and that she would not get the home she was viewing unless she worked with a sales broker instead of Market **[**7]** Force's agent. R.87 Ex. 15 (McGrew Affidavit). At one closing, an agent for Four Seasons Realty told the president of Market Force that "everyone is against you" and that Market Force should quit business. R.54 at 10.

Market Force advertised in local television and print media. In November 1986, as a result of other real estate firms' complaints, the editor of a magazine wanted to remove Market Force's advertisement. The other firms apparently threatened to remove their own advertisements from the magazine if Market Force's advertisement was not removed. R.54 at 5. [3] Several complaints also were made to the executive director of the MLS.

[8]** Market Force decided not to enforce its contracts with buyers-clients that would entitle Market Force to collect from them the difference between the amount actually paid as commissions by other brokers and 2.4% of the sale price (the amount guaranteed to Market Force in its contract with its buyers-clients). However, it paid its **[*1170]** agents the fee they would have received if Market Force had received 2.4% of the sale price. Despite the fact that Market Force absorbed this difference, all of its agents eventually left. The company ceased operations in the fall of 1988.

B. *The District Court Opinion*

Market Force sued under section 4 of the Clayton Act, which permits parties to seek redress for violations of the antitrust laws. Specifically, Market Force alleged that the defendants violated *section 1* of the Sherman Antitrust Act. *15 U.S.C. § 1*. [4]

[9]** As an initial matter, the district court noted that, ***HN2***[] in order to find antitrust liability on the part of the defendants, a jury would have to find that the defendants "'had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. . . .'" *706 F. Supp. at 1393* (quoting *American Tobacco Co. v. United States, 328 U.S. 781, 810, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946))*. ***HN3***[] Proof of conspiracy, the district court noted, "requires parallel behavior plus additional facts or circumstances that raise the inference of agreement." *Id.* Furthermore, to defeat a motion for summary judgment, the court observed, the plaintiff must come forward with evidence that dispels the possibility that the defendants were acting for independent business reasons. *Id. at 1394*.

---

[2] It appears that Coldwell Banker's chief operating officer may have attempted to set its commission to be the same as Wauwatosa's. He testified in a deposition that he thought that Wauwatosa was paying 20% of the total commission, and that he set Coldwell Banker's rate at that level. R.87 Ex. 7 at 32. In fact, Wauwatosa paid 20% of the *selling agent's* commission, which was generally 40% of the total commission.

[3] Roy Lemke, president of Market Force, stated in an affidavit that a sixty-second segment prepared by him for a local television show was moved to a less desirable position in the show because of complaints to the producer by other real estate brokers. R.54 at 6. The producer of the show denied that he had received any such complaints, and claimed that the decision to move the Market Force segment was "based on a long-standing policy of the show, which had nothing to do with the feelings of any other real estate agencies." R.63 at 2.

[4] ***HN1***[] *Section 1* provides in pertinent part: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*.

Applying these standards, the district court concluded that Market Force had not put forward evidence that would permit a jury to conclude that the defendants had engaged **[**10]** in a conspiracy in restraint of trade. The evidence of any agreement presented was circumstantial. Notably, the action of the defendants was not totally parallel [5] and involved no more than a third of all properties in the MLS computer. The district court determined that the evidence presented by Market Force of several instances of "hostility" failed to exclude the possibility that the defendants did not conspire. *Id. at 1395*. Moreover, several defendants had put forward evidence of independent business reasons for adopting a policy regarding buyers' brokers. The district court summarized its reasoning as follows:

> ***HN4***[] Simply stated, coincidence does not a conspiracy make. And even drawing the inferences in favor of Market Force, a conspiracy is not the "compelling, if not exclusive, rational inference" from the record.

Id. (quoting *Weit v. Continental Illinois Nat'l Bank & Trust Co., 641 F.2d 457, 463 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 988, 71 L. Ed. 2d 847, 102 S. Ct. 1610 (1982))*.

[11]** II

ANALYSIS

A. *Standard of Review*

Two recent pronouncements of the Supreme Court of the United States establish the applicable rule of decision in this case: *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, and *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*.

Monsanto presented the Court with a question of the sufficiency of proof of a Sherman Act *§ 1* claim. The Court expressed concern that independent action improperly may be used as evidence of a conspiracy. ***HN5***[] "On a claim of concerted price fixing, the antitrust plaintiff must present evidence sufficient to carry its burden of proving that there was such an agreement." *465 U.S. at 763*. The Court then set the evidentiary standard that a plaintiff must meet:

> The correct standard is that there must be evidence that tends to exclude the possibility of independent action by the [defendants]. That is, there must be direct **[*1171]** or circumstantial evidence **[**12]** that reasonably tends to prove that the manufacturer and others had a conscious commitment to a common scheme designed to achieve an unlawful objective.

Id. at 768. This standard was further refined in *Matsushita*, which, like the present case, involved the grant of the defendants' motion for summary judgment:

> ***HN6***[] To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of *§ 1* [of the Sherman Act] must present evidence "that tends to exclude the possibility" that the alleged conspirators acted independently. [*Monsanto*,] *465 U.S. at 764*. Respondents in this case, in other

---

[5] For example, Wauwatosa paid Market Force 0.6% of the sale price as commission, Coldwell Banker paid 1.2%, and some firms paid nothing.

> words, must show that the inference of conspiracy is reasonable in light of the competing inference of independent action or collusive action that could not have harmed respondents.

475 U.S. at 588.

These two cases suggest a two-part inquiry to determine whether summary judgment is appropriate in an antitrust conspiracy case:

> (1) is the plaintiff's evidence of conspiracy ambiguous, **[**13]** *i.e.*, is it as consistent with the defendants' permissible independent interests as with an illegal conspiracy; and, if so, (2) is there any evidence that tends to exclude the possibility that the defendants were pursuing these independent interests.

Gibson v. Greater Park City Co., 818 F.2d 722, 724 (10th Cir. 1987); *see also* *Riverview Invs., Inc. v. Ottawa Community Improvement Corp., 899 F.2d 474, 483 (6th Cir. 1990)*; *Dreiling v. Peugeot Motors of America, Inc., 850 F.2d 1373, 1380 (10th Cir. 1988)*; P. Areeda & H. Hovencamp, ***Antitrust Law*** § 316.1b, at 281-82 (1989 Supp.) (approving *Gibson* two-part inquiry). The Ninth Circuit adopted a similar two-part inquiry in *Richards v. Neilsen Freight Lines, 810 F.2d 898 (9th Cir. 1987)*:

> ***HN7***[] In antitrust cases, the analysis . . . permits a defendant to rebut an allegation of conspiracy by showing a plausible and justifiable reason for its conduct that is consistent with proper business practice. Once a defendant has met this initial burden, a plaintiff must **[**14]** provide specific factual support for its allegations of conspiracy tending to show that the defendant was not acting independently.

Id. at 902 (citations omitted). The Second Circuit has also articulated the test as a shift in burdens. When the defendants establish that their conduct is consistent with independent action, the plaintiffs are required to come forward with evidence that tends to exclude the possibility of independent action. *H.L. Hayden Co. of New York, Inc. v. Siemens Medical Sys., Inc., 879 F.2d 1005, 1014 (2nd Cir. 1989)*. This court has enunciated a similar formulation in *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 660-61* (7th Cir.), *cert. denied*, *484 U.S. 977, 98 L. Ed. 2d 486, 108 S. Ct. 488 (1987)*, in which Judge Wood, writing for the court, held that the plaintiff failed to overcome a summary judgment motion because "it has not provided evidence tending to exclude the possibility that [the defendants] acted independently, or that would show that the inference of conspiracy to fix prices is reasonable in light of the competing inference of independent action. **[**15]** " *See also* *Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 536-37 (7th Cir. 1986)*.

B. *Application of the Standard to this Case*

Following the analytical model used in *Gibson, Richards, H.L. Hayden* and *Valley Liquors*, we shall examine the evidence of record to determine if Market Force's case can survive a motion for summary judgment. Accordingly, we shall first examine Market Force's evidence of a conspiracy among the defendants. Second, we shall examine whether the defendants have offered evidence tending to show that the conduct of which Market Force complains is as compatible with the defendants' legitimate business activities as it is with illegal conspiracy. Finally, if we conclude that the foregoing analysis leaves the evidence of conspiracy ambiguous, we shall then determine whether Market Force can point to any evidence that tends to exclude the possibility **[*1172]** that the defendants were pursuing their legitimate independent interests.

1. Evidence of a Conspiracy

In its effort to establish a conspiracy, Market Force submitted evidence of a) the defendant companies' mutual awareness of each others' policies; and b) hostile **[**16]** comments allegedly made about Market Force.

a) the circulation of policy statements

Market Force submitted evidence that some defendants had circulated buyers' broker commission rates and other firms had adopted policies regarding buyers' brokers after receiving the circulations. In late October 1987, Wauwatosa mailed to all members of the Milwaukee MLS copies of its policy expressing its intention to pay 20% of the selling agent's commission to buyers' brokers. After James Bruce, Coldwell Banker's chief operating officer, received a copy of the Wauwatosa policy, Coldwell Banker issued its own policy, setting the amount given as a commission at 20% of the total commission -- half of the normal selling agent commission. [6] Other firms subsequently adopted similar policies. Equitable/Stefaniak Realty issued a policy identical to Wauwatosa's that became effective December 15, 1987. A copy of the policy was mailed to all Milwaukee MLS members. On December 16, 1987, Realty World-Bloomfield Realty mailed its policy statement. Its policy was identical to the higher Coldwell Banker rates. Copies of the policy were mailed to all MLS members.

[17]** There is evidence that these mailings prompted at least one real estate broker to adopt such a policy. Andrew Dean, president of Realty World-Dean Realty, adopted a buyers' broker policy on December 24, 1987. He testified at a deposition that he knew of no buyers' brokers operating in Milwaukee. Nevertheless, he wanted "to be one of the brokers in the area doing what everyone else is doing." R.87 Ex. 8 at 23.

Market Force characterizes Wauwatosa's circulation as "an implicit invitation to their competitors to adopt similar policies." Appellant's Br. at 32. [7] **[**18]** However, evidence that brokers were aware of other brokers' policies regarding buyers' brokers before enacting their own policy is nothing more than a restatement of conscious parallelism. Since conscious parallelism by itself is not enough to support an antitrust conspiracy case, [8] Market Force cannot rest only on examples of conscious parallelism to support its case.

[19]** **[*1173]** Moreover, ***HN9***[] it is well established that evidence of informal communications among several parties does not unambiguously support an inference of a conspiracy. *See Riverview Invs., Inc. v. Ottawa Community Improvement Corp., 899 F.2d 474, 484 (6th Cir. 1990)*; *Bolt v. Halifax Hosp. Medical Center, 891 F.2d 810, 827* (11th Cir.) ("That the defendants might have talked among themselves about [the plaintiff's business difficulties] is also insufficient to permit an inference of conspiracy."), *cert. denied*, *495 U.S. 924, 110 S. Ct. 1960,*

---

[6] *See supra* note 2.

[7] To support this argument, Market Force cites a Fourth Circuit criminal antitrust case, *United States v. Foley, 598 F.2d 1323 (4th Cir. 1979)*, *cert. denied*, ***444 U.S. 1043, 100 S. Ct. 727, 62 L. Ed. 2d 728 (1980)***. In *Foley*, a leading real estate broker had a dinner party and announced that he would raise his commissions. The other realtors soon followed suit. But the *Foley* court does not rely on the dinner party and announcement to find a conspiracy. There was other strong evidence: letters and phone calls among the realtors exhorting each other to charge the higher rate and fearing that deviation would ruin the plan. Based on *that* evidence, the court had little trouble affirming the conviction.

[8] *See Weit v. Continental Illinois Nat'l Bank & Trust Co., 641 F.2d 457, 462 (7th Cir. 1981)* ***HN8***[] (when defendant puts forward denials of conspiracy, "plaintiffs must come forward with some significant probative evidence which suggests that conscious parallelism is the result of an unlawful agreement"), *cert. denied*, ***455 U.S. 988, 71 L. Ed. 2d 847, 102 S. Ct. 1610 (1982)***; *see also Cayman Exploration Corp. v. United Gas Pipe Line, Co., 873 F.2d 1357, 1361 (10th Cir. 1989)* (plaintiff asserting conscious parallelism also needs to assert that action was against economic self-interest); *Dunnivant v. Bi-State Auto Parts, 851 F.2d 1575, 1583 (11th Cir. 1988)* (plaintiff asserting conscious parallelism must come forward with "some 'plus' factor which tends to indicate the absence of independent action"); *Royal Drug Co. v. Group Life and Health Ins. Co., 737 F.2d 1433, 1437 (5th Cir. 1984)* (in order to survive summary judgment, "significant probative evidence of conscious parallelism is required, 'with . . . some "plus" factor which tends to indicate that the asserted unilateral behavior was not such in fact. . . .'") (quoting *Paul Kadair, Inc. v. Sony Corp. of Am., 694 F.2d 1017, 1027 n. 27 (5th Cir. 1983))*, *cert. denied*, ***469 U.S. 1160, 105 S. Ct. 912, 83 L. Ed. 2d 925 (1985)***; *Kreuzer v. American Academy of Periodontology, 237 U.S. App. D.C. 43, 735 F.2d 1479, 1487 (D.C.Cir. 1984)* (proof of conspiracy requires more than parallel acts).

109 L. Ed. 2d 322 (1990); *Parkway Gallery Furniture, Inc. v. Kittinger/Pennsylvania House Group, Inc., 878 F.2d 801, 805-06 (4th Cir. 1989)* (evidence that dealers agreed with a ban on discounters not sufficient to support the inference of a conspiracy); *cf.* *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 662* (7th Cir.) (evidence of meetings among the defendants "is ambiguous at best and does not help to exclude the possibility" of independent **[**20]** action), *cert. denied*, *484 U.S. 977, 98 L. Ed. 2d 486, 108 S. Ct. 488 (1987)*.

b) hostile statements by defendants

As further evidence of conspiracy, Market Force also points to hostile statements attacking Market Force that were made by the defendants to home buyers, Market Force agents, and the MLS. The district court determined that the evidence put forward was insufficient to avoid summary judgment. We agree. The evidence before the district court suggests that there were several incidents in which harsh words were spoken. However, the incidents do not foreclose the conclusion that the competitors were not engaged in a conspiracy. The evidence of hostility appears as likely as not to be isolated incidents or merely "sales hype." [9]

[21]** 2. Legitimate Business Justification for Actions

The defendants also offered legitimate business reasons for the actions that Market Force suggested were evidence of an illegal conspiracy. Coldwell Banker submits that the reason it sent out its policy was to inform other brokers that it would pay a lower fee to buyers' brokers. R.59 at 2. Wauwatosa asserts that the executive vice-president of the MLS told Joann Glawe that firms other than Market Force were acting as buyers' brokers, and that an appropriate way to inform them was to send the policy to all brokers. R.67 at 10-11. ***HN10***[] If the exchange of information regarding the commissions that the firms would pay is not unreasonable business behavior, then it is not an illegal agreement. *Supermarket of Homes, Inc. v. San Fernando Valley Bd. of Realtors, 786 F.2d 1400, 1407 (9th Cir. 1986)*; *cf.* *City of Long Beach v. Standard Oil Co., 872 F.2d 1401, 1406 (9th Cir. 1989)* (noting that competitors may exchange price information for legitimate business reasons), *cert. denied*, *493 U.S. 1076, 110 S. Ct. 1126, 107 L. Ed. 2d 1032 (1990)*. **[**22]**

3. Evidence Tending to Exclude Possibility of Independent Action

Because the evidence of the existence of a conspiracy among the brokers in Milwaukee is ambiguous, ***HN11***[] the plaintiff may survive summary judgment only by putting forth "evidence that tends to exclude the possibility that the defendants were pursuing . . . independent interests." *Gibson v. **[*1174]** Greater Park City Co., 818 F.2d 722, 724 (10th Cir. 1987)*.

According to Market Force, "the lame nature of the excuses the companies muster for their referral policies is circumstantial evidence that the policies were adopted for other reasons. The reasonable inference is that the companies' real motivation was their predatory intent to drive buyers' brokers from the market before they could establish a foothold." Appellant's Br. at 43. However, in her affidavit, Joann Glawe of Wauwatosa enumerated several specific reasons for adopting a referral policy regarding buyers' brokers, including (1) that Wauwatosa paid the listing sales associate a greater commission in a sale involving Market Force, or allocated **[**23]** the gross commission among the listing and selling brokers and paid a referral fee to Market Force; (2) that a selling broker may still be involved in the transaction, as in the case of a sale generated from an open house; and (3) that a listing

---

[9] We do not decide that hostile actions can never make out circumstantial evidence of a conspiracy. At least two other courts have determined that such actions may constitute proof of a conspiracy. *See* *Park v. El Paso Bd. of Realtors, 764 F.2d 1053, 1059-61 (5th Cir. 1985)* (conspiracy found when hostile comments combined with predatory economic coercion and refusals to deal), *cert. denied*, ***474 U.S. 1102, 88 L. Ed. 2d 919, 106 S. Ct. 884 (1986)***; *Penne v. Greater Minneapolis Area Bd. of Realtors, 604 F.2d 1143, 1148-49 (8th Cir. 1979)* (summary judgment should not have been granted where evidence of conspiracy included allegation of hostile comments, blacklisting, and punitive commission shares). *But see* *Supermarket of Homes, Inc. v. San Fernando Valley Bd. of Realtors, 786 F.2d 1400, 1406, 1407 (9th Cir. 1986)* (confronted with evidence that real estate brokers made disparaging comments to potential home buyers about the plaintiff discount brokers, including that plaintiff was "no good, unethical, worthless and of generally bad repute," the court concluded that this conduct did not "add up to a conspiracy by the [defendants] to restrain trade").

sales associate must do more work when there is no selling broker. [10] R.67 at 4-7. The district court concluded that there were plausible reasons for the firms each to adopt a policy about buyers' brokers. The court noted that Wauwatosa and Coldwell Banker put forth "independent business reasons . . . [which were] not economically irrational." *706 F. Supp. at 1394*. We agree. Market Force has not met its burden of providing "specific factual support for its allegations of conspiracy tending to show that the defendant was not acting independently." *Richards v. Neilsen Freight Lines, 810 F.2d 898, 902 (9th Cir. 1987)*. Accordingly, we cannot say that there is any genuine issue of triable fact requiring the reversal of summary judgment.

[24]** Conclusion

The teaching of *Monsanto* and *Matsushita* is that, in order to survive a summary judgment motion, a plaintiff must put forward evidence that tends to exclude the possibility of independent action. ***HN12***[] A defendant is entitled to summary judgment when it "provides a plausible and justifiable alternative interpretation of its conduct that rebuts the alleged conspiracy." *City of Long Beach v. Standard Oil Co., 872 F.2d 1401, 1406 (9th Cir. 1989)*, *cert. denied*, *493 U.S. 1076, 110 S. Ct. 1126, 107 L. Ed. 2d 1032 (1990)*. There is no evidence suggested by the plaintiff that sufficiently refutes the possibility that each defendant, acting independently, decided that the difference in services provided by buyers' brokers required a different referral policy than for standard seller brokers. We thus conclude that the district court correctly decided that the evidence left open the possibility of independent action despite the plaintiff's assertion that the defendants did not have a rational economic reason to adopt referral policies. Accordingly, **[**25]** the judgment of the district court is affirmed.

AFFIRMED.

End of Document

---

[10] "Because the buyer's broker represents only the buyer, the listing broker or some other representative of the seller must be present to represent the seller when a buyer tours a house. The buyer's broker is unable to demonstrate the house on behalf of the seller. The buyer's broker is unable to answer, on behalf of the seller, questions the buyer may have about the condition of the property, financing concessions, closing and occupancy dates, and the like. The listing broker is unable to give a lockbox combination to a buyer's broker. The Wauwatosa Realty Company listing agent is forced to fulfill many of the functions of the traditional selling agent in such transactions." R.67 at 7 (Glawe Affidavit).

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > Preliminary Considerations > Removal > General Overview

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

HN1[] **Specific Cases Removed, Federal Questions**

Removal based on federal question jurisdiction is improper unless a federal claim appears on the face of a well-pleaded complaint. The burden of establishing jurisdiction falls on the party invoking the removal statute, 28 U.S.C.S. § 1441(a), which is strictly construed against removal.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

HN2[] **Specific Cases Removed, Federal Questions**

The party who brings a suit is master to decide what law he will rely upon, and if he can maintain his claim on both state and federal grounds, he may ignore the federal question and assert only a state law claim and defeat removal.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN3[] **Removal, Specific Cases Removed**

There are, however, certain limited situations in which a court may look beyond the face of a plaintiff's complaint. Under the "artful pleading" doctrine, which the courts have termed a narrow exception to the straightforward rules of removal jurisdiction, a court may recharacterize a plaintiff's claims as federal if the particular conduct complained of is governed exclusively by federal law. Nevertheless, this court invokes the doctrine only in exceptional circumstances, because doing so raises difficult issues of state and federal relationships and often yields unsatisfactory results.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Exclusive Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN4[] **Jurisdiction, Exclusive Jurisdiction**

The U.S. Supreme Court consistently recognizes that Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies, and the courts have observed that state antitrust laws retain vitality in dealing with matters which significantly affect local interests, even if they also have interstate aspects. Also, California courts have held that the Cartwright Act, *Cal. Bus. & Prof. Code § 16720*, applies to transactions in interstate commerce.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN5[] **Removal, Specific Cases Removed**

If a state claim is found upon removal to be an artfully pleaded federal claim which was previously before a federal court and dismissed, then res judicata is to be applied and the case dismissed again, with prejudice.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN6[] **Removal, Specific Cases Removed**

Unless applied with circumspection, the artful pleading doctrine may raise difficult issues of federal-state relations. An expansive application of the doctrine could effectively abrogate the rule that a plaintiff is master of his or her complaint.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN7[] **Removal, Specific Cases Removed**

A plaintiff's state law complaint is "artfully pleaded" when it is drafted to avoid stating allegations or claims already resolved against the plaintiff by a prior federal judgment.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Transportation Law > Interstate Commerce > Balancing Tests

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Federal Powers

HN8[] **Interstate Commerce, State Powers**

Even without implementing legislation, the *Commerce Clause of the U.S. Constitution* operates as a limitation upon the power of the states. But not every exercise of state power with some impact on interstate commerce is invalid. A state statute must be upheld if it regulates evenhandedly to effectuate a legitimate local public interest, and its effects on interstate commerce are only incidental unless the burden imposed on such commerce is clearly excessive in relation to the putative local benefits.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Regulated Industries, Sports**

The Cartwright Act, *Cal. Bus. & Prof. Code § 16720*, forbids combinations in restraint of trade and grants a cause of action to any person injured by such a combination. Thus, the federal and California antitrust laws have identical objectives and are harmonious with each other.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN10[] **Antitrust & Trade Law, Sherman Act**

The Cartwright Act, Cal. Bus. & Prof. Code § 16720, is patterned after the Sherman Act and both statutes have their roots in the common law. Consequently, federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act.

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Constitutional Law > Congressional Duties & Powers > Commerce Clause > General Overview

Transportation Law > Interstate Commerce > Federal Powers

HN11[] **Interstate Commerce, State Powers**

Absent evidence that the challenged state regulations impede the flow of interstate commerce, the courts cannot find that they impermissibly encroach on the Commerce Clause of the U.S. Constitution.

Civil Procedure > ... > Removal > Specific Cases Removed > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN12[] **Removal, Specific Cases Removed**

The well-pleaded complaint rule is well grounded in principles of federalism. It would do violence to state autonomy were defendants able to remove state claims to federal court merely because the plaintiff could have asserted a federal claim based on the same set of facts underlying his state claim.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN13[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

The parties cannot by consent, waiver or estoppel obtain federal subject matter jurisdiction.

Opinion

[*478] GOODWIN, Chief Judge.

OPINION

Redwood Theatres appeals the denial of its motion to remand this case to state court. Redwood originally filed its action in California Superior Court, alleging violations of the Cartwright Act, *Cal. Bus. & Prof. Code § 16720*. Appellees removed the case to federal district court, contending that Redwood's complaint, properly construed, advanced claims implicating federal ***antitrust law*** and that the nationwide character of its motion picture distribution system warranted review of this case in a federal forum.

Concluding that haphazard state antitrust regulation could impose an impermissible **[**2]** burden upon the national licensing practices of the movie distribution industry, the district court denied Redwood's subsequent motion to remand, citing as authority its prior decision in *TOC, Inc. v. United Artists Theatre Circuit, 631 F. Supp. 832 (N.D. Cal. 1986)*. Redwood argues in this interlocutory appeal that the district court improperly invoked the "artful pleading" doctrine to recharacterize its claims as federal in nature and, accordingly, that federal subject matter jurisdiction does not exist in this case. We agree and reverse.

Redwood Theatres is a Nevada corporation which owns and operates a seven-screen motion-picture theatre in Modesto, California, and other theatres in various northern California towns. Festival Enterprises is a California corporation which, during the period of time relevant to this appeal, owned and operated a six-screen theatre in Modesto, as well as theatres in other parts of northern California. The Redwood and Festival theatres directly compete with each other, both for the films they show on their screens and the patronage of Modesto movie-goers.

[*479] Paramount Pictures is a major distributor of motion-picture films **[**3]** in the United States. Its parent corporation, Gulf Western, acquired the Festival circuit of theatres in 1986. Also that year, Gulf Western acquired the 384 screens operated by Mann Theatres. Gulf Western subsequently placed the Festival chain under Mann's management.

Redwood contends that Paramount has entered into unwritten agreements with Festival and Festival's successors, pursuant to which substantially all of the Paramount first-run product is licensed to the Festival theatres in northern California, including Modesto. Redwood argues that these agreements effectively foreclose it from showing a significant number of the better first-run pictures, thereby threatening the viability of its business and substantial elimination of competition in the exhibition of first-run motion pictures in Modesto.

In 1985, Redwood filed a complaint against appellees in California Superior Court alleging Cartwright Act violations in connection with films licensed between 1981-85 [1] similar to those at issue here. That action was dismissed on summary judgment but reinstated on appeal by the California Court of Appeal, which held that the allegations raised in Redwood's complaint, if proved, **[**4]** presented a triable issue of an unreasonable restraint of trade under the Cartwright Act and therefore remanded the case for trial. *Redwood Theatres, Inc. v. Festival Enterprises, Inc., et al.*, ("Redwood I"), *200 Cal. App. 3d 687, 248 Cal. Rptr. 189 (1988)*. Appellees never sought removal of Redwood's first suit, but, after the decision in *Redwood I* was rendered against them, they petitioned for removal of this action to federal court.

ARTFUL PLEADING DOCTRINE

In general, ***HN1***[] removal based on federal question jurisdiction is improper unless a federal claim appears on the face of a well-pleaded complaint. *Franchise Tax Bd. v. Construction Laborers Vacation Trust, 463 U.S. 1, 10, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983)*; *Gully v. First Nat'l Bank, 299 U.S. 109, 113, 81 L. Ed. 70, 57 S. Ct. 96 (1936)*. **[**5]** "The burden of establishing jurisdiction falls on the party invoking the removal statute [*28 U.S.C. § 1441(a)*], *Hunter v. United Van Lines, 746 F.2d 635, 639 (9th Cir. 1984)*, *cert. denied*, [*474 U.S. 863,] 106 S. Ct. 180, 88 L. Ed. 2d 150 (1985)*, which is strictly construed against removal." *Sullivan v. First Affiliated Securities, 813 F.2d 1368, 1371* (9th Cir.), *cert. denied*, *484 U.S. 850, 108 S. Ct. 150, 98 L. Ed. 2d 106 (1987)*.

[1] The complaint involved in this appeal alleges Cartwright Act violations with regard to films licensed by appellees from 1985-88. Gulf Western was not a named party in *Redwood I*.

It is well established that **HN2**[] "the party who brings a suit is master to decide what law he will rely upon," *The Fair v. Kohler Die & Specialty Co., 228 U.S. 22, 25, 57 L. Ed. 716, 33 S. Ct. 410 (1913)*, and "if he can maintain his claim on both state and federal grounds, he may ignore the federal question and assert only a state law claim and defeat removal." *Sullivan, 813 F.2d at 1372* (citing, *inter alia*, 1 A.J. Moore & B. Ringle, *Moore's Federal Practice*, para. 0.160 [3.-3], at 231-32 (2d ed. 1986)).

HN3[] There are, however, certain limited situations in which a court may look beyond the face of a plaintiff's complaint. **[**6]** Under the "artful pleading" doctrine, which this court has termed "a narrow exception to the straightforward rules of removal jurisdiction," *Sullivan, 813 F.2d at 1372*, a court may recharacterize a plaintiff's claims as federal if "the particular conduct complained of [is] governed exclusively by federal law." *Hunter, 746 F.2d at 640*; *see also* *Ultramar Am. Ltd v. Dwelle, 900 F.2d 1412, 1415 (9th Cir. 1990)*. Nevertheless, this court invokes the doctrine "only in *exceptional circumstances*," because doing so "raises difficult issues of state and federal relationships and often yields unsatisfactory results." *Salveson v. Western States Bankcard Ass'n, 731 F.2d 1423, 1427 (9th Cir. 1984)* (emphasis added).

All the claims appearing on the face of Redwood's complaint involve alleged violations of California's antitrust statute, the **[*480]** Cartwright Act. While not contending that the Sherman Act preempts the Cartwright Act *in toto*, appellees argue that where an industry is primarily engaged in interstate commerce and would benefit from a national uniformity of ***antitrust law***, then restraints upon that interstate **[**7]** trade fall within the exclusive jurisdiction of the Sherman Act and federal courts. **HN4**[] The Supreme Court, however, has consistently held that "Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies," *California v. ARC Am. Corp., 490 U.S. 93, 109 S. Ct. 1661, 1665, 104 L. Ed. 2d 86 (1989)*; *Watson v. Buck, 313 U.S. 387, 403, 85 L. Ed. 1416, 61 S. Ct. 962 (1941)*, and this court has observed that "state antitrust laws retain vitality in dealing with matters which significantly affect local interests, even if they also have interstate aspects." *Salveson, 731 F.2d at 1427*. Also, notwithstanding appellees' assertions, California courts have held that the Cartwright Act applies to transactions in interstate commerce. *Id., citing* *Younger v. Jensen, 26 Cal. 3d 397, 405, 605 P.2d 813, 818, 161 Cal.Rptr. 905, 910 (1980)*.

In arguing their position, appellees cite *Federated Dept. Stores v. Moitie, 452 U.S. 394, 69 L. Ed. 2d 103, 101 S. Ct. 2424 (1981)*, and *Salveson* as authority for the exercise of federal jurisdiction over antitrust actions despite a plaintiff's **[**8]** decision to file his complaint in state court and rely wholly on state-law provisions. Both cases are distinguishable from the facts presented here.

In *Moitie*, seven private antitrust actions were brought by plaintiff retail customers charging the owners of various department stores with price-fixing. The actions were consolidated in federal district court and subsequently dismissed for failure to state a claim under the Clayton Act. Plaintiffs in two of the actions attempted to refile their complaints in state court, making allegations similar to those made in the previous cases, but invoking only state-law remedies. The department store owners promptly removed the two cases to federal court, where they were dismissed on res judicata grounds. The Supreme Court approved the district court's dismissal of the plaintiffs' refiled claims and concluded that removal was proper where it appeared that the plaintiffs had "artfully" recast their claims under state law in order to gain a second shot at recovery. *452 U.S. at 397*.

In *Salveson*, this court held that **HN5**[] if a state claim is found upon removal to be an artfully pleaded federal claim *which was previously before* **[**9]** *a federal court and dismissed*, then res judicata is to be applied and the case dismissed again, with prejudice. *731 F.2d at 1432*. Unlike the situations in *Moitie* and *Salveson*, Redwood has never previously filed an antitrust action in federal court and no res judicata defense is available to appellees.

In subsequent cases this court has emphasized that it will construe the holdings in *Moitie* and *Salveson* narrowly, out of respect for the purposes underlying the removal statute and plaintiffs' prerogatives to choose the forum and legal principles governing their complaints. *See* *Sullivan, 813 F.2d at 1376*; *see also* *United Jersey Banks v. Parell, 783 F.2d 360, 368* (3d Cir.), *cert. denied*, *476 U.S. 1170, 106 S. Ct. 2892, 90 L. Ed. 2d 979 (1986)* **HN6**[] ("unless applied with circumspection, the artful pleading doctrine may raise difficult issues of federal-state relations. An expansive application of the doctrine could effectively abrogate the rule that a plaintiff is master of his or her complaint") (citing Hunter, 746 F.2d at 640).

In *Sullivan*, for example, we interpreted *Moitie* "as **[**10]** limited to removal of state claims precluded by the res judicata effect of a federal judgment," emphasizing that such a construction "squares our decisions in *Salveson*, permitting removal in the res judicata context, with *Sugar Antitrust Litigation* [In re Sugar Antitrust Litigation, 588 F.2d 1270 (9th Cir. 1978), *cert. denied*, *441 U.S. 932, 99 S. Ct. 2052, 60 L. Ed. 2d 660 (1979)]*, denying removal in the context of parallel state and federal litigation, and comports with our policy of invoking the artful pleading doctrine 'only in exceptional circumstances.'" 813 F.2d at 1376 (quoting Salveson, 731 F.2d at 1427); *see also* Ultramar, 900 F.2d at 1415 (reiterating **[*481]** this court's interpretation of *Moitie* in *Sullivan* and *Salveson*); Ethridge v. Harbor House Restaurant, 861 F.2d 1389, 1403 (9th Cir. 1988)("we concluded in *Sullivan* that ***HN7***[] a plaintiff's state law complaint is 'artfully pleaded' when it is drafted to avoid stating allegations or claims already resolved against the plaintiff by a prior federal judgment").

Our holding in *Sullivan* controls **[**11]** the result here. As in that case the plaintiff's claims here were framed under state law, are not barred by res judicata nor preempted by federal law, and would only have been in the district court's jurisdiction if they had been joined with federal claims. 813 F.2d at 1376. [2]

[12]** *COMMERCE CLAUSE CONSIDERATIONS*

In denying Redwood's motion to remand, the district court relied upon, and appellees urge this court to follow, its prior decision in TOC, Inc. v. United Artists Theatre Circuit, 631 F. Supp. 832 (N.D. Cal. 1986). The facts in that case were substantially the same as those presented here: the plaintiff independent theatre owners brought suit under the Cartwright Act, claiming that the defendants' methods of distributing and exhibiting motion pictures amounted to an unreasonable restraint of trade, and the defendants removed the case to federal court. The district court denied TOC's motion to remand, concluding that the defendants were "unquestionably involved in interstate commerce," and that subjecting them to the possibility of non-uniform state antitrust regulations would be inconsistent with its constitutional duty to strike down impermissible burdens on interstate commerce. 631 F. Supp. at 834.

The decision in *TOC* was never appealed and appears never to have been cited in a subsequent, published case. In fact, it appears that it was the dearth of approving authority that prompted the district court's **[**13]** decision to permit Redwood's interlocutory appeal to this court.

The outcome we reach today requires us to disapprove the holding in *TOC*. The Supreme Court has made clear that, ***HN8***[] even without implementing legislation, the Commerce Clause operates as a limitation upon the power of the states. Edgar v. Mite Corp., 457 U.S. 624, 640, 73 L. Ed. 2d 269, 102 S. Ct. 2629 (1982); Great Atl. & Pac. Tea Co. v. Cottrell, 424 U.S. 366, 370-71, 96 S. Ct. 923, 47 L. Ed. 2d 55 (1976). But "not every exercise of state power with some impact on interstate commerce is invalid." Edgar, 457 U.S. at 640. "A state statute must be upheld if it 'regulates evenhandedly to effectuate a legitimate local public interest, and its effects on interstate commerce are only incidental . . . unless the burden imposed on such commerce is clearly excessive in relation to the putative local benefits.'" *Id., quoting* Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 25 L. Ed. 2d 174, 90 S. Ct. 844 (1970).

---

[2] *See also* Price v. PSA, Inc., 829 F.2d 871, 876 n. 4 (9th Cir. 1987)(describing *Sullivan* as limiting the artful pleading doctrine to cases "where a plaintiff is seeking to circumvent the res judicata impact of a federal judgment"), *cert. denied*, ***486 U.S. 1006, 108 S. Ct. 1732, 100 L. Ed. 2d 196 (1988)***. As this court's opinion in *Ultramar* points out, "in *Price* no prior federal judgment even existed, and the court only described *Sullivan* to stress that this fact rendered application of the artful pleading doctrine inappropriate." 900 F.2d at 1416 n. 7; *accord,* United Jersey Banks, 783 F.2d at 368 (case in which five state banks sought under New Jersey statutes to block merger of two nationally chartered banks. Defendants removed the case to federal court, claiming that the complaint raised questions of federal law, and the district court denied the plaintiffs' motion to remand. The Third Circuit reversed, finding that "this is not a case . . . in which the plaintiff first filed a lawsuit containing federal claims and then, after dismissal, sought to recast those claims under state law [;] here, plaintiff *has consistently sought to litigate state claims in state court*") (emphasis added).

HN9[] The Cartwright Act "forbids combinations in restraint of trade and grants a cause of action to any person injured by such a combination." *Speegle v. Board of Fire Underwriters, 29 Cal. 2d 34, 42, 172 P.2d 867, 872 (1946)*. **[**14]** Thus, as the court in *TOC* recognized, "'the federal and California antitrust laws . . . [have] identical objectives [and] are harmonious with each other.'" *631 F. Supp. at 834* (quoting *Partee v. San Diego Chargers Football Co., 34 Cal. 3d 378, 382, **[*482]** 668 P.2d 674, 194 Cal. Rptr 367 (1983))*. Appellees contend that allowing Redwood to proceed in state court raises the spectre of their being subject to differing state regulation of their licensing and exhibition practices and hurt financially by the predicted inconsistencies. We are not persuaded.

In the first place we note that Paramount's fears are belied by the decision in *Redwood I*: although the outcome was adverse to Paramount's interests, the California Court of Appeal relied primarily upon principles enunciated in *federal* antitrust cases to reverse the lower court's grant of summary judgment. [3]

[15]** Secondly, we are aware that at least one other circuit has upheld against a *commerce-clause* challenge state regulation of motion-picture licensing practices far more intrusive and idiosyncratic than the possible outcome of a California court's interpretation of the Cartwright Act, informed by federal precedents, presents here. In *Allied Artists Pictures Corp. v. Rhodes, 496 F. Supp. 408 (S.D. Ohio 1980)*, the district court rejected the plaintiff movie producers' and distributors' challenge to the constitutionality of an Ohio statute regulating the procedures by which motion pictures were to be licensed to theatre owners within the state. As is the situation here, the producers and distributors in *Allied Artists* contended that "since the motion picture industry is national in scope, its business and product are of such a nature that their regulation, if any, must be prescribed by a single [federal] authority." *496 F. Supp. at 436*. Observing that after *Exxon Corp. v. Governor of Md.* [4], "it is not open to plaintiffs to argue that simply because the economic market for motion pictures is nationwide, no state has the power to regulate that market, **[**16]** " the district court concluded that *HN11*[] "absent evidence that [the challenged regulations] . . . impede the flow of interstate commerce, this Court cannot find that [they] impermissibly encroach[] on the *Commerce Clause*." *496 F. Supp. at 437*.

The Sixth Circuit upheld the district court's finding of "no federal constitutional or statutory infirmity in [the Ohio] guidelines." *679 F.2d 656, 663 (6th Cir. 1982)*. In a passage applicable to the facts of this case, it concluded that:

> if the distributor chooses to use [the method of competitive bidding], the process should be fair, and that is what the guidelines are designed to insure. **[**17]** The . . . provisions are not burdensome and are designed to counteract deception and unfair manipulation of the bidding process.

Id. Beyond a contention of the kind disapproved by the Supreme Court in *Exxon*, appellees have failed to explain how California's application of the Cartwright Act provisions proscribing unreasonable restraints of trade threatens to impose an impermissible burden on interstate commerce, especially when such conduct is also illegal under federal law.

---

[3] *See 200 Cal. App. 3d at 694*, where the court observed that:

> '[a] long line of California cases has concluded that *HN10*[] the Cartwright Act is patterned after the Sherman Act and both statutes have their roots in the common law. Consequently, federal cases interpreting the Sherman Act are applicable to problems arising under the Cartwright Act.'

Id., quoting Marin County Bd. of Realtors v. Palsson, 16 Cal. 3d 920, 925, 130 Cal. Rptr. 1, 549 P.2d 833 (1976). Accordingly, the court stated that "since the relevant case law under the Cartwright Act is comparatively sparse, we will also rely chiefly on federal decisions" to evaluate Redwood's antitrust claims. *Id.*

[4] In *Exxon*, the Supreme Court rejected the appellant oil companies' "novel suggestion that because the economic market for petroleum products is nationwide, no State has the power to regulate the retail marketing of gas," and upheld the state regulation at issue. *437 U.S. 117, 128, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978)*.

Finally, appellees' argument neglects the point that California courts are perfectly capable of handling *commerce-clause* challenges to state antitrust laws. In fact, in one case cited approvingly in appellees' brief, the California Supreme Court reversed a treble damages award under the Cartwright Act assessed against an NFL team in a suit by one of its players, holding that the application of state ***antitrust law*** **[*483]** to the interstate activities of professional football would impermissibly burden interstate commerce. *Partee, 34 Cal. 3d at 384*; [5] *see also* *United Jersey Banks, 783 F.2d at 369* (in response to contention that New Jersey Antitrust Act **[**18]** did not extend to claim made in plaintiffs' complaint and that therefore remand after removal was improper, court concluded that "in such a case, it should be for the New Jersey courts, in the first instance, to determine whether the count alleging violation of state ***antitrust law*** is without any facial validity.")

Given the absence of a prior federal judgment and the strong bias against permitting removal where a plaintiff has chosen to proceed solely on state-law grounds, we find that the district court erred in denying Redwood's motion to remand. [6] As Justice Brennan observed in *Moitie* **[**19]** , ***HN12***[] "[the well-pleaded complaint rule] is well grounded in principles of federalism . . . It would do violence to state autonomy were defendants able to remove state claims to federal court merely because the plaintiff *could have* asserted a federal claim based on the same set of facts underlying his state claim." *452 U.S. at 407* (Brennan, J., dissenting) (emphasis in original).

REVERSED.

End of Document

[5] The result in *Partee* does not undermine the substantive analysis of appellees' *commerce-clause* claim, *supra*: the Supreme Court based its decision on the fact that the Cartwright Act previously had been held inapplicable to professional baseball and basketball and that "no case has been found applying state antitrust laws to the interstate activities of professional sports." *34 Cal. 3d at 384*.

[6] In the alternative appellees urge us to find that Redwood has acceded to federal jurisdiction. They offer no compelling reasons, however, for us to disregard "the traditional rule that ***HN13***[] the parties cannot by consent, waiver or estoppel obtain federal subject matter jurisdiction," and we therefore reject their suggestion. *Sullivan, 813 F.2d at 1374*.

New England Motor Rate Bureau v. FTC

United States Court of Appeals for the First Circuit

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN1[] **Exemptions & Immunities, Parker State Action Doctrine**

State action immunity exists if (1) the private parties' conduct was undertaken pursuant to clearly articulated and affirmatively expressed state policies to displace competition, and (2) the anticompetitive activity was actively supervised by the respective states.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN2[] **Exemptions & Immunities, Parker State Action Doctrine**

A state must engage in substantive oversight of the challenged conduct before active supervision can be found. The purpose of such review, however, is to ascertain its consistency with state policy, and not necessarily to determine the activity's anticompetitive consequences.

Opinion by: CAMPBELL

Opinion

[*1064] CAMPBELL, Chief Judge.

New England Motor Rate Bureau, Inc. ("NEMRB") petitions this court for review of a cease and desist order of the Federal Trade Commission ("FTC"). The opinion of **[*1065]** the FTC in this case appears as *New England Motor Rate Bureau, Inc.*, 112 F.T.C. __, Docket No. 9170, slip op. (Aug. 18, 1989). Our jurisdiction over this petition derives from *15 U.S.C. § 45(c)*.

At issue is whether Massachusetts' supervision of motor carrier rates is sufficiently active to immunize NEMRB -- the motor carriers' private rate-making bureau -- from the federal antitrust laws.

Massachusetts, like other states and federal agencies, regulates rates through a so-called **[**2]** negative option process, *viz.* rates are required to be formulated and published by the carriers or their agent (i.e., here, NEMRB) and filed with a regulatory agency having ultimate rate-setting powers (here, the Massachusetts Department of Public Utilities ("MDPU")). The filed rates become legally binding unless rejected or suspended within a period of time by the agency. Under Massachusetts law, motor carrier rates must be non-discriminatory and "just and reasonable," and the MDPU is charged by law with enforcing compliance with these criteria. To this end, it has extensive power to suspend, reject or modify rates using hearing, investigatory and complaint procedures. However, the MDPU has not in recent history rejected any of the rates filed by NEMRB nor held hearings or investigations. Because of this, the FTC ruled that Massachusetts failed the "active supervision" prong of the Supreme Court's two-prong test for determining whether a regulated activity qualifies for "state action" immunity. NEMRB now challenges the FTC's finding, contending that Massachusetts' comprehensive regulatory scheme and MDPU's regulatory activities meet the "active supervision" requirement.

PROCEEDINGS **[**3]** BELOW

On October 24, 1983, the FTC issued a complaint alleging that NEMRB, its members, officers, and directors, had engaged in a conspiracy to fix prices in violation of *15 U.S.C. § 45* by collectively formulating and filing rates for the transportation by motor carrier of commodities moving within the states of Massachusetts, New Hampshire, Rhode Island, and Vermont. This conspiracy and these activities were alleged to have deprived motor carriers, shippers and consumers in the four states of the benefits of free and open competition. Petitioner raised various defenses, including that its collective rate-making activity was "state action," immune from federal antitrust challenges under the state action doctrine first enunciated in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. The Administrative Law Judge (ALJ) who heard the case disallowed all defenses except the state action defense, which he held in abeyance until this court could hand down a decision in a pending appeal, *Mass. Furniture & Piano Movers Association v. FTC, 773 F.2d 391 (1st Cir. 1985)*. In *Mass. Furniture*, we ruled that because **[**4]** Mass.Gen.L. ch. 159B (1986) "clearly establishes Massachusetts' intent to countenance collective rate setting among motor carriers," the relevant carrier trade association satisfied the first prong of the test for *Parker* immunity set out in *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 105-06, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*: namely, that a private party's conduct be undertaken pursuant to "clearly articulated and affirmatively expressed" state policies to displace competition. While upholding the state action defense thus far, we noted that the Association need also meet Midcal's second prong, *viz.* "that the anticompetitive activity was 'actively supervised' by the state." *Mass. Furniture, 773 F.2d at 397*. We remanded to the FTC for findings on the active supervision requirement. *Id.*

Following the decision in *Mass. Furniture*, the ALJ in the FTC proceeding below disallowed NEMRB's defense that its collective rate filing activity in Massachusetts was state action, hence immune from the federal antitrust laws. While he accepted *Mass. Furniture's* ruling that the governing state law **[**5]** met Midcal's first prong, *supra*, he found that Massachusetts' regulation of the filed rates was, in practice, too passive to satisfy Midcal's "active supervision" requirement. The ALJ also disallowed the state action defense in New **[*1066]** Hampshire as well, finding that rate regulation by New Hampshire authorities failed both aspects of the *Midcal* test. In Rhode Island, however, the ALJ upheld NEMRB's rate-making activities as immune. He concluded that Rhode Island's regulatory supervision was active enough to make NEMRB's collective rate filings with the Rhode Island Public Utilities Commission a form of protected state action. [1] **[**6]** The FTC adopted the ALJ's findings, with one Commissioner dissenting as to the finding that NEMRB's Massachusetts rate filings were not entitled to "state action" immunity. NEMRB now seeks our review of the FTC's holding that Massachusetts state regulation is, in practice, too passive to immunize NEMRB's rate filings under the state action doctrine. [2]

FACTS

1. *The Nature and Functioning of NEMRB*

Petitioner NEMRB is a Massachusetts nonprofit organization composed of competing common (motor) carriers that service customers in New England. It develops and files collective tariffs and tariff supplements governing interstate and intrastate rates and commodity classifications within Massachusetts, New Hampshire, Rhode Island, and, formerly, Vermont. Collective tariffs are initiated and developed by NEMRB's General Rate and **[**7]** Classification Committee, consisting of officers or employees of the carrier members of NEMRB. Tariff proposals approved by the Committee are filed with the official regulatory agencies of each of the four states and sent to all members of NEMRB. [3] The carrier members of NEMRB ratify its tariff proposals at annual meetings, and formally acquiesce in such tariffs by granting to NEMRB a power of attorney with respect to such filings.

In neither Massachusetts, New Hampshire, nor Rhode Island are common carriers *required* to file joint tariffs or to cooperate in their establishment. A carrier may, if it wishes, file its own proposed rates. However, in each jurisdiction, carriers are permitted to utilize a filing agent and to **[**8]** adopt and participate in a tariff filed by an agent or another carrier. If a carrier does elect to participate in a tariff filed by another carrier or by an agent such as NEMRB, the carrier is obliged by law to adhere to the specified rates once the tariff becomes effective.

2. *The Nature and Functioning of Massachusetts' Regulatory System*

As explained in greater detail later in this opinion, Massachusetts regulates common carriers by motor vehicle, and their rates, according to a comprehensive regulatory scheme that gives to the MDPU authority, *inter alia*, to license

---

[1] After the complaint was issued, the state of Vermont deregulated the intrastate transportation of freight, and NEMRB ceased to formulate and file rates applicable to Vermont. Complaint counsel moved to dismiss the complaint with respect to NEMRB's activities in Vermont, and the Administrative Law Judge granted that motion.

[2] The decision of the FTC with regard to New Hampshire is not being appealed. The New Hampshire statute at the time of the FTC decision required carriers to file their rates; and such rates were to be nondiscriminatory, but the statute did not require that they be just and reasonable. Subsequently, the statute was amended to require the rates of motor carriers of property to be just and reasonable. The state is also now engaged in establishing policies and procedures to implement the revised statutory framework. NEMRB says that it may seek revision of the FTC order as soon as the new regulatory framework is in place.

[3] Rates are also filed with the federal Interstate Commerce Commission with respect to interstate shipments. Federal law recognizes the right of rate bureaus to formulate and file collective rates for members, exempt from antitrust laws. *49 U.S.C. § 10706(b)*.

common carriers and to prescribe and alter their rates. Carriers are required to adhere to their filed rates, which Massachusetts law provides must be nondiscriminatory, just and reasonable. The MDPU is controlled by three full-time commissioners appointed by the Governor. Mass.Gen.L. ch. 25, § 2 (1986). The Massachusetts motor carrier statute, including its rate provisions, is enforced by the MDPU's transportation division headed by a director. *Id.* § 12F.

[*1067] The following picture of the Massachusetts regulatory apparatus was provided by stipulations the ALJ accepted for purposes of this **[**9]** proceeding. The MDPU employs one rate analyst to review NEMRB rate filings. [4] The rate analyst has never requested financial information to support a tariff nor rejected a rate because it was too high or too low. However, if confronted with a tariff containing rates that in his judgment were out of line with the average rates that have been established in a particular pricing zone or seem extraordinarily high -- such as a 20 percent to 50 percent increase -- the Massachusetts rate analyst would recommend suspension and investigation of the tariff by the MDPU Commissioners. The same would hold true if the tariff appeared to contain discriminatory provisions. Moreover, the law provides for the MDPU to hold a hearing upon the complaint of any common carrier by motor vehicle or of any other person or upon the MDPU's own motion. The MDPU will investigate any complaint alleging a violation of the statute or any order, rule or regulation issued thereunder, and will take action that is warranted in response to a violation. Rates go into effect automatically 30 days after they are filed unless the rate analyst has recommended rejection or suspension before the end of the 30-day period. It **[**10]** is the stipulated opinion of the rate analyst that whenever tariffs become effective without rejection, suspension or a hearing, that action results from a determination that the proposed rates meet the regulatory criteria of the Massachusetts statute and regulations pertaining to motor carriers of property (i.e., that such rates be just and reasonable, *infra*).

In Massachusetts, NEMRB files general rate restructures, general rate increases, and supplements thereto that have been previously filed with the federal Interstate Commerce Commission (ICC). NEMRB accompanies such filings with a justification statement that has been filed with the ICC. If the ICC suspends the proposal, NEMRB requests the MDPU to postpone the effective date of the **[**11]** proposal in Massachusetts pending the outcome of the ICC investigation. At the conclusion of the ICC investigation, NEMRB requests the MDPU to take the same action with respect to the intrastate Massachusetts proposal. The ICC has traditionally regulated rates under a (now-superceded) federal statutory directive that they be "just and reasonable," 49 U.S.C. § 316 (1963) [5], language identical to that used in the Massachusetts law. *See* Mass.Gen.L. ch. 159B § 6, para. 2 (1986). Generally, the MDPU relies on the fact that the ICC has already conducted an investigation and reached a conclusion as to the justness and reasonableness of the NEMRB proposals.

[12]** Aside from its role in reviewing proposed rates, MDPU does not monitor economic conditions in the intrastate trucking industry. It has never conducted a study of the industry nor of the effects of state regulatory policy upon it, nor does anyone at the MDPU look behind the filed rates to determine whether they accurately reflect a carrier's profit and costs.

FTC HOLDING

In finding that NEMRB's collective filings in Massachusetts were not immunized from federal antitrust liability under the "state action" doctrine, the FTC majority concluded that the MDPU's past record of regulatory activity had been too passive. Thus, even though NEMRB's collective rate-setting activities on behalf of motor carriers were an authorized and accepted part of the Massachusetts scheme, the FTC concluded that they were just another instance of forbidden private, anti-competitive conduct. It reached a different result in Rhode Island, however, because it found that regulatory action in Rhode Island was somewhat more aggressive.

---

[4] MDPU also employs 12 inspectors who have police power to enforce Massachusetts' motor carrier statutes. One of their duties is to spot check carriers to investigate complaints that they are not charging the rates they have filed. Stipulation 72 of August 28, 1986.

[5] In 1978 the language of the federal statute was changed from "just and reasonable" to "reasonable" for clarity, consistency, and to conform to modern usage. *See* 49 U.S.C. § 10701(a) (1990) and accompanying "Historical and Statutory Notes." No change in the meaning of the statutory language was intended. *Id.*

[*1068] In Massachusetts, the FTC noted the absence of specific rate hearings and other active rate review proceedings conducted by the state relative to the rates filed **[**13]** by NEMRB. Only where clerical errors had been found had the MDPU actually rejected rate filings. The MDPU did not audit carriers' records or monitor economic conditions in the industry; had never requested financial data from carriers to support collectively set rates; and had never rejected a filing because of the price to be charged. The Commission concluded from this that the MPDU [sic] allowed tariffs to go into effect automatically, without inquiring into their substance, ensuring only that "the collective tariffs satisfied formalistic format requirements." 112 F.T.C. __, Docket No. 9170, slip op. at 20 (Aug. 18, 1989). Such purely "ministerial" review, the FTC found, did not amount to active supervision. Because, under the second prong of the *Midcal* test, the state action defense cannot apply in the absence of active state supervision, the FTC held that NEMRB's activities in Massachusetts, as well as in New Hampshire, were unfair methods of competition in violation of *15 U.S.C. § 45* (i.e., collective price-setting by horizontal competitors). On the basis of these findings, the FTC issued a cease and desist order.

COMMISSIONER AZCUENAGA'S **[**14]** DISSENT

The dissenting commissioner disagreed that the MDPU's regulatory activity was too slight to qualify as active state supervision. She noted that the FTC had found NEMRB rate-making activities in Rhode Island to qualify for application of the state action defense, and reasoned that similar NEMRB activities in Massachusetts should also have been found to qualify because the facts relating to active supervision were virtually identical in the two states. She saw few factual differences between the rate regulatory systems in Massachusetts and Rhode Island, and thought that the differences that did exist were not significant. One purported difference mentioned by the FTC was that the Rhode Island agency had on one occasion actually held a hearing on a proposed tariff before approving it, while Massachusetts has never held any. According to the dissent, however, the significance of the Rhode Island hearing is diminished by the fact that it took place only once and by the further fact that it took place more than two and one-half years after the FTC had first issued its complaint. Another purported difference was that in Rhode Island, tariffs go into effect only after the regulatory **[**15]** agency issues an order *approving* a proposed tariff, whereas under Massachusetts law, tariffs filed by the NEMRB go into effect automatically after 30 days have gone by, unless they are disapproved. In the view of the dissent, this difference, likewise, has no substantive importance. Further, according to the dissent, the stipulated facts show that most of the other differences in the rate review systems of the two states pointed to by the FTC majority as justifications for the different outcomes for the two states were not actual differences. For example, the stipulations show that the rate analysts in both states believe that rates allowed to become effective without challenge in fact meet the applicable statutory standards of "just and reasonable" and that this fact implies a review on the merits in both states. The dissent concludes,

> Given the stipulated record here, the only reasonable conclusion is that the degree of active supervision in Massachusetts and Rhode Island is virtually the same and that the decision concerning NEMRB's liability should be the same in both states. In both states, the record shows that the state agency reviews NEMRB's collective ratemaking **[**16]** on the merits, that is, to ascertain consistency with state policy. This review, in turn, shows that the agencies in both states engage in active supervision and, therefore, the complaint allegations of violations in Massachusetts . . . should be dismissed.

112 F.T.C. at __, slip op. at 12 (dissent).

THE ACTIVE SUPERVISION REQUIREMENT

We begin by looking briefly at the "state action" doctrine under which **[*1069]** NEMRB seeks immunity in Massachusetts from federal antitrust regulation. The doctrine first appeared in *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*. The Supreme Court held in *Parker* that the Sherman Act was not intended to prohibit the sovereign states from "acts of government" that imposed restraints on competition within their borders. A state's own "action or official action directed by a state" was declared immune from the federal antitrust laws. However, the Court made it plain that a state could not simply authorize private actors to violate the Sherman Act. *Parker, 317 U.S. at 351*.

A major issue since *Parker* has been drawing the line between state programs that fail legally **[**17]** to immunize private participants being viewed by the Court as simply forbidden attempts by a state to authorize antitrust violations and state schemes like that in *Parker* which involve enough overall state control so as to immunize private-actor participants.

In *California Retail Liquor Dealers Association v. Midcal Aluminum, Inc., 445 U.S. 97, 105-06, 63 L. Ed. 2d 233, 100 S. Ct. 937 (1980)*, the Court laid down the general test which all parties agree is the guiding standard here. Under *Midcal*, ***HN1***[] state action immunity exists if (1) the private parties' conduct was undertaken pursuant to "clearly articulated and affirmatively expressed" state policies to displace competition, and (2) the anticompetitive activity was "actively supervised" by the respective states. The Supreme Court later applied this test to a collective ratemaking arrangement much like the present, in *Southern Motor Carriers Rate Conference, Inc., et al. v. United States, 471 U.S. 48, 85 L. Ed. 2d 36, 105 S. Ct. 1721 (1985)*, [6] **[**19]** and we likewise applied it in *Mass. Furniture Piano Movers Association v. FTC, 773 F.2d 391*, **[**18]** *supra*. In *Midcal*, the Supreme Court struck down under the active supervision prong a retail price maintenance system for wine enacted into law by California. Under the scheme considered in *Midcal*, California required wholesalers to adhere to prices set by another wholesaler even though the state itself neither controlled nor reviewed the reasonableness of such prices. *445 U.S. at 100*. The Court concluded that California had simply authorized members of the industry to set prices and had then enforced the prices these private individuals had established. "The State neither (1) establishes prices nor (2) reviews the reasonableness of the price schedules; . . . . The State does not (3) monitor market conditions nor (4) engage in any 'pointed reexamination' [7] of the program." *Id. at 105-06* (numbers added). "The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement." *Id. at 106*.

The Court subsequently struck down another liquor pricing program under the active supervision prong of the *Midcal* test. *324 Liquor Corp. v. Duffy, 479 U.S. 335, 93 L. Ed. 2d 667, 107 S. Ct. 720 (1987)*. There as in *Midcal*, prices were set by private operators, without state review.

Most recently, in *Patrick v. Burget, 486 U.S. 94, 100 L. Ed. 2d 83, 108 S. Ct. 1658 (1988)*, the Supreme Court upheld the imposition of federal antitrust liability upon physicians who had terminated the hospital privileges of another physician after a purported peer review proceeding. The Court rejected the physicians' claim to state action **[**20]** immunity. While acknowledging that Oregon, by statute, required all hospitals to establish peer review procedures, the Court found there was no state agency that "reviews -- or even could review -- private [physicians'] **[*1070]** decisions regarding hospital privileges." *486 U.S. at 101*. The Court stated that "the active supervision prong of the *Midcal* test requires that state officials *have and exercise* power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." *Id. at 101* (emphasis added). "Absent such a program of supervision, there is no realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests." *Id.*

Following *Patrick's* restatement of the active supervision prong in *Midcal*, we must ask here (1) whether the MDPU "*has* power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy, and (2) whether it sufficiently *exercises* that power. We shall discuss each of these questions in turn.

1. *Whether Massachusetts* **[**21]** *Has Power to Review and Disapprove Anticompetitive Acts That Fail to Accord with State Policy*

---

[6] While the Court upheld the collective rate making arrangements in *Southern Motor Carriers*, it did not address the "active supervision" component of the *Midcal* formula, as active supervision was conceded.

[7] "Pointed re-examination of the program" is apparently derived from a statement in an opinion of the California Supreme Court in which that court referred to "'pointed re-examination' by the state to insure that the policies of the Sherman Act are not 'unnecessarily subordinated' to state policy." *Rice v. Alcoholic Beverage Control Appeals Board, 21 Cal. 3d 431, 445, 579 P.2d 476, 486, 146 Cal. Rptr. 585 (1978)*.

In sharp contrast to the relevant state law in *Patrick, Duffy* and *Midcal*, there is no doubt here that Massachusetts officials possess plenary power under state law to review and disapprove the filed rates set by carriers, and their agents like NEMRB, should they fail to accord with state policy. *Patrick, 486 U.S. at 101*. This is plainly not a situation, as was true in all three of those cases, where private individuals from an industry or profession are authorized to engage in anticompetitive actions, with little or no power vested in state authorities to oversee and regulate them.

Massachusetts has enacted into law a comprehensive regulatory scheme over common carriers by motor vehicle. Mass.Gen.L. ch. 159B, §§ 1-22 (1986 and Supp. 1988), not only gives the MDPU absolute authority to "allow or disallow any filed or existing rates" "upon complaint of any common carrier by motor vehicle or of any other person" and to "alter or prescribe the rates of common carriers . . . in accordance with the legal standards provided in this chapter," *id.* at *§ 6*, para. **[**22]** 5, but the state also has full licensing authority over both common and contract carriers, including the authority to assign routes, *id.* at §§ 3-4 and § 11, power to establish rules and regulations for the protection of shippers by motor vehicle, *id.* at § 5(c), authority to inspect cargo and papers relating to cargo, *id.* at § 14A, authority to examine accounts, reports, books and records of both carriers and brokers upon demand, *id.* at § 5(d), § 16A, and § 17, authority to enforce maximum hour limits for drivers, *id.* at § 18, and authority to enforce statutory requirements in regard to billing and credit arrangements, *id.* at § 19A. The statute sets out clearly the state policy to be achieved by the regulatory program, [8] **[**23]** *id.* at *§ 1*, and it delineates in detail the considerations to be taken into account in the process of rate review [9], the activity of greatest **[*1071]** importance for purposes of the present inquiry, *id.* at *§ 6*, para. 6.

The Massachusetts statute, thus, provides for comprehensive regulation of the operations of common carriers by motor vehicle -- from rates charged to the licensing of routes -- and, in the specific area of rate-setting, sets out clearly the considerations that must be taken into account when prescribing or disallowing rates, *see* note 8. Rates are to be reviewed, **[**24]** in a hearing, upon the complaint of any common carrier by motor vehicle or of any other person or upon the MDPU's own motion; and they may be allowed or disallowed in accordance with the legal standards provided in the statute.

The comprehensive scheme outlined in the statute, therefore, clearly gives to the MDPU the authority to "review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." Massachusetts, accordingly, meets one of Patrick's two requirements for "active supervision." We turn next to Patrick's other requirement -- a sufficient showing that the state *exercises* the power it has.

2. *Whether Massachusetts Exercises its Power*

---

[8] It is hereby declared to be the policy of the commonwealth to regulate transportation of property by motor carriers upon its ways in such manner as to recognize and preserve the inherent advantages of such transportation, and to foster sound economic conditions in such transportation and among carriers engaged therein in the public interest; and in connection therewith to: (1) Promote adequate, economical and efficient service by motor carriers, and reasonable charges therefor, without unjust discriminations undue preferences or advantages or unfair or destructive competitive practices, (2) improve the relations between, and coordinate transportation by and regulation of, motor carriers and other carriers, (3) develop and preserve a highway transportation system properly adapted to the needs of the commerce of the commonwealth, and (4) promote safety upon its ways in the interests of its citizens.

Mass.Gen.L. ch. 159B, § 1 (1986).

[9] In the exercise of the power to prescribe just and reasonable rates for the transportation of property by common carriers by motor vehicle and to disallow rates filed by any such carrier, the department *shall give due consideration*, among other factors, to the inherent advantages of transportation by such carrier, to the effect of any rates under consideration upon the movement of traffic by such carriers, to the need in the public interest of adequate and efficient transportation service by such carriers, to the cost of service and to the need of revenues sufficient to enable such carriers under honest, economical and efficient management to provide such service.

Mass.Gen.L. ch. 159B, § 6, para. 6 (1986) (emphasis added).

In stating that states must "exercise" as well as "have" power to review and disapprove anticompetitive acts of private parties, the *Patrick* Court nowhere indicated the extent to which actual exercise must be shown. *Patrick, Midcal* and *Duffy* provide little guidance as to "exercise" since none of them had to reach that question. In all three cases, the legislatures had failed to give state authorities the power, to begin with, to meet the "active supervision" standard. **[**25]** Here, however, there is no lack of power: the question is only whether Massachusetts authorities are deficient in the exercise of that power. Thus, in seeking to determine what showing of actual exercise of power is needed, both the FTC and ourselves are proceeding in uncharted waters.

In the following pages, we shall analyze the evidence of the MDPU's actual operations as well as the state mandate which it is supposed to fulfill. We conclude that, for purposes of the state action doctrine, the showing Massachusetts has made of the exercise of its regulatory power is adequate.

We believe the FTC's contrary analysis is defective in two respects. First, as Commissioner Azcuenaga points out in impressive detail in her dissent, it seems quite arbitrary: the difference between Massachusetts' showing as to regulatory action, and Rhode Island's, is trivial. Yet, the FTC would immunize NEMRB's rate-making activities in Rhode Island but not immunize essentially the same activities in Massachusetts. Second, bearing in mind that the state action doctrine involves principles of federalism and comity, we think the FTC is too demanding in the showing it would require as to the rigor and efficiency **[**26]** of a particular state's regulatory program. Where as here the state's program is in place, is staffed and funded, grants to state officials ample power and the duty to regulate pursuant to declared standards of state policy, is enforceable in the state's courts, and demonstrates some basic level of activity directed towards seeing that the private actors carry out the state's policy and not simply their own policy, more need not be established. Otherwise, the state action doctrine would be turned on its head. Instead of being a doctrine of preemption, allowing room for the state's own action, it would become a means for federal oversight of state officials and their programs.

Before proceeding, we make two further points.

We do not agree with the FTC that the question of state action is one on which this court should defer to that agency, either because of its expertise or its statutory fact-finding authority. *See* *15 U.S.C. § 45(c)* ("The findings of the Commission as to the facts, if supported by the evidence, shall be conclusive.") The FTC is not here interpreting the statute it has been charged with administering (i.e., the **[*1072]** Federal Trade **[**27]** Commission Act, 38 Stat. 717 (1914), as amended, *15 U.S.C. §§ 41-77 (1990)*) but instead is resolving a judicially-created principle of immunity that, if applicable, bars the FTC's jurisdiction. *Cf.* *Chevron U.S.A. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 842-45, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)*. The underlying facts, consisting of state statutes and the stipulations accepted by the ALJ, are not in dispute. How these facts meld into the state action concept -the issue now before us- is a legal issue which the courts have plenary authority to decide. To be sure, the FTC's experience may arguably give it some insight into the effectiveness of a state's regulatory apparatus. However, state action immunity is a threshold issue that must be decided before the FTC's own jurisdiction attaches. Rather than an outgrowth of the statute the FTC administers, the state action doctrine was developed by the Supreme Court to give expression to considerations of federalism and comity; the FTC's authoritative role commences only after it has been decided that the challenged activities are *not* immune. Thus, in determining the sufficiency **[**28]** of Massachusetts' regulatory program for purposes of the state action doctrine, the FTC is not in the same position it would occupy had it already been determined that the doctrine did not shield the activities in question from the federal antitrust laws enforced by the FTC. We see the "active supervision" issue, therefore, as one for de novo judicial determination.

Second, the very existence of a comprehensive regulatory scheme like the one we have already seen is in place in Massachusetts is some evidence that regulatory control is actually exercised. *Cf.* *Capital Telephone Co. v. New York Telephone Co., 750 F.2d 1154 (2d Cir. 1984)* (a pre-Patrick opinion holding that it would be inconsistent with the broad regulatory scheme in issue to find that the particular activities in question were subject to antitrust liability where the legislature so clearly intended to allow the Public Service Corporation to control all activities which were a reasonable part of the regulatory scheme). A far-ranging state regulatory scheme like the Massachusetts statute implies the exercise (as well as the mere existence) of power because it imposes legally enforceable duties on state **[**29]** officials -- duties which a federal court may not, under normal principles of federalism, assume they will disregard. [10] The Massachusetts statute, as noted, requires officials to maintain just and reasonable rates, to act on complaints, to correct discriminatory rates, to consider various specified factors, and so on. It is a statute which gives to Massachusetts officials, under designated standards, a duty as well as mere authority with respect to the ultimate choice and setting of the rates. Thus, in respect to *Patrick's* requirement that the state *exercise* (as well as *have*) power, the comprehensive Massachusetts statute provides, by itself, some indicia that power is being exercised.

[30]** We do not, however, rest on inferences from the statute alone, but turn to the stipulations in the record to determine current levels of regulatory activity in Massachusetts.

An initial approach is to ask to what degree the four types of regulatory oversight whose total absence was decried in *Midcal* and *Duffy* are being exercised by Massachusetts -and to compare Massachusetts' actions in this respect with Rhode Island's, which the FTC approved. The facts in the instant case are not in dispute, **[*1073]** and the stipulations by the parties establish that the first two of the four factors absent in *Midcal* and *Duffy* are clearly present in Massachusetts: (1) Massachusetts has the last word in setting the rates, which must be filed with its officials and take effect only if not suspended or rejected by them; [11] **[**31]** and (2) Massachusetts reviews the reasonableness of the rates. [12] **[**32]** The stipulations do not indicate, however, that Massachusetts (3) monitors

---

[10] Such duties are enforceable by mandamus and other legal remedies in state courts. They are not mere precatory maxims. *See* *Lutheran Serv. Ass'n of New England, Inc. v. Metropolitan Dist. Comm'n, 397 Mass. 341, 344, 491 N.E.2d 255, 257 (Mass. 1986)* ("In the absence of an alternative remedy, relief in the nature of mandamus is appropriate to compel a public official to perform an act which the official has a legal duty to perform."); *Restivo v. Town of Swansea, 398 Mass. 1002, 1003, 495 N.E.2d 838, 839 (Mass. 1986)* (quoting *Bancroft v. Building Comm'r of Boston, 257 Mass. 82, 84, 153 N.E. 319, 320 (Mass. 1926)* ("when the question is one of public right and the purpose is to procure the performance of a public duty, and no other remedy is open, a petitioner need not show that he has any special interest in the result [in order to seek relief in the nature of mandamus]: it is sufficient that as a citizen he is interested in the due execution of the laws")).

[11] Stipulation 55 of August 28, 1986 reads: "The MDPU is authorized to reject or suspend proposed rates which are not consistent with the statute or the MDPU's orders, rules and regulations." *See also* Mass.Gen.L. ch. 159B, § 6, paras. 1, 2 (1986) ("The department may reject any tariff filed with it which is not consistent with this section and with its orders, rules and regulations under this chapter.")

Stipulation 61 reads: "The MDPU, upon complaint of any motor common carrier of property or any other person, or upon its own motion, after hearing, may allow or disallow any filed or existing rates and may alter or prescribe rates in accordance with the legal standards provided." *See* Mass.Gen.L. ch. 159B, § 6, para. 5 (1986).

[12] Stipulation 51 of August 28, 1986 provides:

> A carrier has the right to seek whatever rate it desires. No one at the MDPU looks behind the filed rates to determine whether they accurately reflect a carrier's profits and costs. The rate analyst has never requested financial information to support a tariff nor has he rejected a rate because of the price to be charged. *However, if confronted with a tariff containing rates that in his judgment are out of line with the average rates that have been established in the involved pricing zone, or seem extraordinarily high, such as a 20% to 50% increase, he would recommend suspension and investigation of the tariff by the MDPU Commissioners*. (emphasis added)

Stipulation 62 of August 28, 1986 provides:

> It is the opinion of the rate analyst that whenever tariffs become effective without rejection, suspension or hearing, that action results from *a determination that the proposed rates meet the regulatory criteria of the statute, orders, rules and regulations pertaining to motor carriers of property*. (emphasis added)

There is a rate analyst and one clerk who is responsible for processing filed motor carrier rates. Stipulations 44 and 45, August 28, 1986. There are 12 field inspectors who have police power to enforce the Massachusetts motor carrier statute; among other duties they spot check for rate violations. Stipulation 72.

Stipulation 75 of August 28, 1986 provides:

market conditions, [13] or (4) has engaged in any "pointed reexamination" of the program. Nonetheless, as later discussed, we do not find the absence of these two latter factors to be fatal.

If we turn to Rhode Island, which has a regulatory scheme that the FTC found sufficient for "state action" immunity, we note that the last two factors are also absent. If there is a difference between Massachusetts and Rhode Island as to the four factors, it would be in regard to factor two, where -instead of a stipulation that the rate analyst would reject any rates he felt to be out of line with past average rates or extraordinarily high- it was affirmatively stipulated that in Rhode Island:

> The rate analyst also examines tariffs to ascertain whether the rates are within a "zone of reasonableness." The "zone of reasonableness," which is a measure developed by the rate analyst, consists of a range between the maximum and minimum industry averages of previously approved rates for each category of motor carrier. Those rates that fall within the "zone of reasonableness" are approved **[**33]** without a hearing. In determining the reasonableness of a proposed tariff, the rate analyst may also consider the percentage of the rate increase as well as the date of the carrier's last request for a price increase.

Stipulations 103-06 of August 28, 1986.

As indicated above, rates filed by NEMRB in Massachusetts go into effect automatically after a 30-day waiting period unless rejected or suspended by the MDPU, whereas in Rhode Island, rates do **[*1074]** not go into effect until an affirmative written order has been issued by the state. Whereas Massachusetts has held no public hearings during the past six years either to investigate or to suspend a motor carrier's rate, Rhode Island has had one such hearing (after the start of the FTC's investigation), at the conclusion of which it approved the proposed rates.

In the FTC's view, the contrast in these last two factors qualifies Rhode Island under the "active supervision" prong, but is fatal to Massachusetts's ability to qualify. The FTC likewise referred prominently to Massachusetts' failure, but overlooked Rhode Island's failure, to show that it engages "in a 'pointed reexamination' of rates resulting from NEMRB's **[**34]** ratemaking activities." 112 F.T.C. at __, slip op. at 17.

The FTC held that:

> the *Midcal* and *Patrick* decisions indicate that a state official or agency must engage in a substantive review of the challenged conduct before active supervision can be found. Such a review ensures that the state agency *has consciously considered the anticompetitive consequences of the activity* for which private parties seek approval. No clear inference of conscious state approval of the product of private collective ratemaking can be drawn from a state agency's passive acceptance or non-substantive review of rate filings. Thus, we hold that the active supervision requirement is satisfied only where the state agency has reviewed the proposed tariffs or rates on the merits.

112 F.T.C. at __, slip op. at 14-15 (emphasis added).

We agree with the FTC that *Midcal, 445 U.S. at 105-06*, and *Patrick, 486 U.S. at 101*, require ***HN2***[] a state to engage in substantive oversight of the challenged conduct before active supervision can be found. 112 **[**35]** F.T.C. at __, slip op. at 14-15. The purpose of such review, however, is to ascertain *its consistency with state policy, Patrick, 486 U.S. at 101*, and not necessarily to determine the activity's anticompetitive consequences. We also

---

> If a complaint alleges a violation of Chapter 159B [the motor carrier laws, including those pertaining to rates] or any order, rule or regulation adopted thereunder, it will be investigated and appropriate action taken if warranted.

Private complaints may be filed with the MDPU and are required by law to be investigated by the agency. Violations of the Massachusetts motor carrier statute are punishable by fine and may be enjoined in the Massachusetts courts at the instance of private parties as well as of the MDPU. Stipulation 76.

[13] Stipulation 78 of August 28, 1986 provides:

> Aside from its role in reviewing proposed rates, MDPU does not monitor economic conditions in the intrastate trucking industry of Massachusetts.

disagree with the conclusion of the FTC that a state need always undertake a "pointed reexamination" in which it "consciously considers the anticompetitive consequences of the activity for which private parties seek approval." 112 F.T.C. at __, slip op. at 17, 15. There is nothing in the state action doctrine, as formulated, that turns on the economic philosophy of a state's regulatory program, the mind-set of its administrators, or the degree its goals mesh with the FTC's view of good regulatory policy. Rather, state action immunity is based on the Supreme Court's determination that Congress, in enacting the federal antitrust laws, meant *not* to preempt state programs and policies that are the genuine products of state governmental action. It is immaterial whether the policies guiding the state's actions are or are not consistent with federal antitrust aims.

The Court in *Midcal* and *Duffy* did not, moreover, **[**36]** indicate that the four above-mentioned elements -- the complete absence of which it criticized in those cases -- *all* needed to coexist for active supervision to be found. It would appear that the presence of any one or two of those elements would have sufficed, depending on the facts and circumstances. Other factors not mentioned might also have tipped the scales. We think the FTC has gone well beyond anything said by the Court in suggesting that active supervision is absent unless a state agency actively monitors market conditions or pointedly reexamines anticompetitive consequences. The FTC implicitly recognized this when it found that Rhode Island engages in active supervision of the NEMRB collective rate filings, even though Rhode Island does not monitor market conditions [14] nor engage in any "pointed reexamination" of the anticompetitive consequences of its regulatory program.

[37]** **[*1075]** State authorities in Massachusetts could reasonably believe that by undertaking, as stipulated, to investigate any and all complaints; by relying on their analyst's expertise and his stipulated intention to review any extreme deviations in filed rates; and by looking at information from other sources, [15] they will meet their statutory mandate to prescribe just, reasonable, and nondiscriminatory rates. Especially is this so where the federal ICC shares oversight duties as to many of these same filed rates, and the ICC's views as to the justness and reasonableness of the rates are known to, and relied upon by, the MDPU.

The FTC's position, at bottom, seems to be that the "active supervision" prong necessitates an inquiry by the FTC into whether a **[**38]** particular state's regulatory operation demonstrates satisfactory zeal and aggressiveness. The FTC would, in effect, try the state regulator. We think this goes too far. As already noted, Massachusetts regulators are subject to a detailed set of statutory duties aimed at causing the filed rates to meet defined criteria. These duties and requirements are enforceable administratively and in the state courts, where administrative nonfeasance can be challenged and, if need be, corrected. For example, upon complaint of any person the MDPU is legally required to hold a hearing and determine the lawful rate of charge. [16] In our federal system, a state

---

[14] Stipulation 120 of August 28, 1986 reads:

> Aside from its role in reviewing proposed rates, [the Division of Public Utilities and Carriers] does not monitor economic conditions in the intrastate trucking industry of Rhode Island.

[15] For example, the MDPU receives rate justification data from NEMRB which the latter provides to the ICC. It is also advised as to the ICC's actions as to such filings, and presumably would learn of actions by regulatory agencies of other states.

[16]

> The department, upon complaint of any common carrier . . . or any other person, or upon its own motion, *after hearing*, may allow or disallow any filed or existing rates. . . . Whenever, upon complaint or in an investigation on its own initiative, the department, *after hearing*, shall be of the opinion that any rate or charge demanded, charged or collected by any common carrier by motor vehicle . . . is or will be unjust or prejudicial, it *shall* determine and prescribe the lawful rate of charge . . . thereafter to be made effective.

HN3[]

Mass.Gen.L. ch. 159B, § 6, para. 5 (1986) (emphasis added).

See also id. para. 6, quoted in note 8 *supra*, for the guidelines the MDPU must follow in the exercise of its duty to overrule unjust or prejudicial rates.

regulatory scheme like this carries with it the presumption that the relevant state officials are faithfully carrying out their duties under the state's law. Such a presumption could perhaps be rebutted by a showing of some major state default -- as might occur, for example, if the state had ceased to fund and staff the MDPU. Nothing of this type, however, has been shown here. In fact, implicit in the evidence that hearings have not been held is the recognition that there have been no complaints that would trigger such hearings. The absence **[**39]** of complaints in the face of an available procedure to resolve them supports an inference that the state is actively supervising. Moreover, there is evidence of the existence of an ongoing regulatory mechanism, and of significant activity. Stipulations 51 and 62 of August 28, 1986, [17] already discussed above, indicate that Massachusetts exercises its power to review and disapprove joint rate filings of common carriers by motor vehicle. It is stipulated that the rate analyst would suspend rates that were out of line with established rates or extraordinarily high or that appeared to contain discriminatory provisions. It is also stipulated that the rate analyst believes that failure to reject or suspend proposed rates results from a determination that the proposed **[*1076]** rates meet the regulatory criteria of the statute, orders, rules and regulations. This inference is supported by Stipulations 61 and 76, which establish that hearings are required where there is a complaint. The absence of hearings in the past years, rather than indicating that the rate analyst is not doing his job, instead indicate that the rates taking effect have been acceptable to affected third-parties, who **[**40]** need only complain to trigger a hearing.

[41]** In a similar vein, it is stipulated that if a complaint alleges a violation of the statute or any order or regulation adopted thereunder, "it will be investigated and appropriate action taken if warranted." It is also stipulated that many of the general rate structures, general rate increases, etc. filed in Massachusetts have previously been filed with and approved by the ICC, and that if the ICC suspends or rejects any rate, NEMRB requests the MDPU to take the same action with respect to the intrastate Massachusetts proposal. The stipulations establish that the MDPU generally relies on the fact that the ICC has already conducted an investigation and reached a conclusion as to the justness and reasonableness of the rates.

It follows from all of the above that NEMRB is at the far pole from the liquor dealers in *Midcal* and *Duffy*, who were allowed a free hand to set rates with no state review mechanism extant. NEMRB's proposed rates are under continuing scrutiny, with the threat of suspension and investigation if a complaint is registered or the MDPU thinks they are unreasonable or discriminatory.

The principles of federalism embodied in *Parker* dictate the sufficiency **[**42]** of a degree of scrutiny on this level. [18] It is not the province of the federal courts nor of federal regulatory agencies to sit in judgment upon the degree of

---

[17] Stipulation 51 of August 28, 1986 reads:

> If confronted with a tariff containing rates that in his judgment are out of line with the average rates that have been established in the involved pricing zone, or seem extraordinarily high, such as a 20% to 50% increase, [the rate analyst] would recommend suspension and investigation of the tariff by the MDPU Commissioners. Likewise, if a tariff appeared to contain discriminatory provisions, such as being applicable only for the account of a named shipper or shippers rather than being available to the general public, the [Commercial Motor Vehicle Division] would recommend suspension and investigation.

Stipulation 62 of August 28, 1986 reads:

> It is the opinion of the rate analyst that whenever tariffs become effective without rejection, suspension or hearing, that action results from a determination that the proposed rates meet the regulatory criteria of the statute, orders, rules and regulations pertaining to motor carriers of property.

[18] We agree with commentators who state that a court (and, by analogy, the FTC in its adjudicatory capacity) should not scrutinize the rigor with which the state supervises the challenged activity to ensure that supervision is more than pro forma. P. Areeda & D. Turner, ***Antitrust Law***, § 213c, at 75 (1978). Instead, for many of the same reasons that the Supreme Court refuses strictly to scrutinize state economic regulation under the *Fourteenth Amendment*, the antitrust adjudicatory body must accept the state's apparent supervision on its face. P. Areeda & D. Turner, ***Antitrust Law***, § 213c, at 75 (1978).

> There simply is no way to tell if the state has "looked" hard enough at the data, and there certainly are no manageable judicial standards by which a court may weigh the various elements of a "public interest" judgment in order to determine

strictness or *effectiveness* with which a state carries out its own statutes. It is sufficient that a meaningful scheme of regulation is in existence and that there are sufficient indications that active regulation under this scheme is taking place.

> A state's antitrust immunity springs from an essential principle of federalism, the necessity to respect a sovereign capacity **[*1077]** in the several states. *Hoover v. Ronwin, 466 U.S. 558, 567-68, 80 L. Ed. 2d 590, 104 S. Ct. 1989 (1984)*. Given this purpose, it follows that *actions otherwise immune should not forfeit that protection merely because the state's attempted exercise of its power is imperfect in execution under its own law.*

Llewellyn v. Crothers, 765 F.2d 769, 774 (9th Cir. 1985) (emphasis added).

[43]** In summary, the statute here clearly calls for the active supervision of the rates filed. We know, further, that a regulatory agency has been established and funded to carry out that statutory mandate, and that state officials are positioned to carry out their statutory duties. Furthermore, the stipulations in the case indicate that unreasonable rates will be rejected and that the failure to suspend or reject a rate indicates a determination that the rate has been found to meet the regulatory criteria of the statute, orders, rules, and regulations. There is an administrative mechanism in place for aggrieved parties to register their complaints and be heard. Further, the Massachusetts courts are available and are empowered to force the regulators to act at the suit of aggrieved parties. In addition, the majority of the rates in question have been previously filed with and investigated by the ICC.

We hold that a showing of this magnitude is sufficient, without more, to meet the "active supervision" prong of the *Midcal* test for qualifying to invoke the "state action" defense of *Parker*. Specifically, Massachusetts both *has* and *exercises* relevant regulatory power. **[**44]** *Patrick, 486 U.S. at 101*. The FTC commissioners erred by trying to

---

> whether the legislature or agency decision was correct. Those are political judgments and ought to be made by the legislature and its delegates.

Id.

See also *United States v. Topco Associates, 405 U.S. 596, 611-12, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)* (Brennan, J., concurring) ("To analyze, interpret, and evaluate the myriad of competing interests and the endless data that would [] be brought to bear on [] decisions" to sacrifice competition in one portion of the economy for greater competition in another portion, "and to make the delicate judgment on the relative values to society of competitive areas of the economy, the judgment of the elected representatives of the people is required." "Courts are ill-equipped and ill-situated for such decision-making."); ***Denver Rockets v. All-Pro Management, Inc., 325 F. Supp. 1049, 1063 (C.D.Cal. 1971)*** ("The primary disadvantages of the 'rule of reason' are that it requires difficult and lengthy factual inquiries and very subjective policy decisions which are in many ways essentially legislative and ill-suited to the judicial process.").

Areeda and Turner believe that "an allegation that state officials customarily 'rubber stamp' the self-interested decisions or recommendations of the private parties involved should not ordinarily oust *Parker* immunity." P. Areeda & D. Turner, § 213c, at 75 (1978).

See also *Llewellyn v. Crothers, 765 F.2d 769 (9th Cir. 1985)*:

> The availability of *Parker* immunity . . . does not depend on the subjective motivations of the individual actors, but rather on the satisfaction of the objective standards set forth in *Parker* and authorities which interpret it. This must be so if the state action exemption is to remain faithful to *its foundations in federalism and state sovereignty*.

Id. at 774 (emphasis added).

gauge in too particular a way the degree of actual effectiveness or ineffectiveness exhibited by the Massachusetts regulators.

CONCLUSION

Pursuant to our holding that Massachusetts regulatory scheme qualifies for the invocation of the *Parker* "state action" defense to antitrust liability by satisfying not only the first but also the second ("active supervision") prong of the *Midcal* test, we direct the FTC to modify its final order issued August 18, 1989, by deleting the references to Massachusetts that appear at the end of the "Provided" limiting provisos in Paragraphs I and II, and by making such further modifications, if any, as may be necessary to conform the order in all respects with this opinion. As so modified, the order is enforced.

So ordered.

HN1[] **Settlements, Consent Judgments**

The Clayton Act § 4(a), grants a private right of action to persons injured by anything forbidden by the antitrust laws. Section 1 of the Act, *15 U.S.C.S. § 12*, contains a specific definition of "antitrust laws" for purposes of § 4(a), and that definition is "exclusive." "Antitrust laws" means specific statutes listed in Clayton Act § 1. There is no support for the proposition that violation of a consent decree violates the Clayton Act § 4. Obviously, a judicial consent decree is not an "***antitrust law***." It has been specifically established that a private party cannot premise a treble damage action under § 4 upon violations of a government consent decree.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN2[] **Private Actions, Standing**

The weight of authority holds that employees do not have standing under the Clayton Act § 4.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Standing**

Only harm stemming from a reduction in competition qualifies as an injury cognizable under the antitrust laws.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN4[] **Settlements, Consent Judgments**

It is well established that a private party cannot sue as a third-party beneficiary of a government consent decree.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Contracts Law > Statute of Frauds > General Overview

HN5[] **Defenses, Demurrers & Objections, Affirmative Defenses**

Admitting that there was, indeed, a contract, a party waives any application of the statute of frauds. To waive application of the statute of frauds, the admission need not include all of the terms of the contract, but only those sufficient to conclude that an agreement existed.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Contracts Law > Statute of Frauds > General Overview

HN6[] Affirmative Defenses, Fraud & Misrepresentation

Equitable estoppel bars a party from asserting the statute of frauds when its own fraud is responsible for the absence of a written agreement. A party's alleged promise to reduce the contract to writing "as soon as possible" and his subsequent failure to do so brings the contract within the doctrine for purposes of a motion for summary judgment.

HN7[] Types of Contracts, Oral Agreements

Under Tennessee law, the rule is that an oral contract for lifetime, permanent, or indefinite employment is a hiring terminable at will when the employee furnishes no consideration other than the services required in the agreement.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Labor & Employment Law > Wrongful Termination > Remedies > General Overview

Torts > Remedies > Damages > General Overview

HN8[] Summary Judgment, Entitlement as Matter of Law

While a plaintiff need not, at the summary judgment stage, show the amount of the damages, he is obligated to show that they exist and are not entirely speculative.

Labor & Employment Law > Wrongful Termination > Whistleblower Protection Act > General Overview

Labor & Employment Law > Employment Relationships > At Will Employment > General Overview

Labor & Employment Law > Wrongful Termination > Public Policy

HN9[] Wrongful Termination, Whistleblower Protection Act

In Tennessee, an exception to the at-will termination doctrine for retaliatory discharges appears to be recognized at the present time although only with respect to certain relatively narrow situations. On the other hand, the District of Columbia does not currently recognize a public policy exception to the at-will termination doctrine.

Opinion

[*326] MEMORANDUM

HAROLD H. GREENE, UNITED STATES DISTRICT JUDGE.

Pending before the Court is the summary judgment motion of defendants NYNEX Corp. and Telco Research Corp. (a NYNEX subsidiary), seeking the dismissal of a number of antitrust, contract, and tort claims relating to plaintiff's termination as a senior vice president of Telco. Plaintiff, a lawyer who is proceeding *pro se,* asserts that he was fired as a result of inquiries he made to determine whether Telco was violating the consent decree entered in *United States v. American Tel. & Tel., 552 F. Supp. 131 (D.D.C. 1982)*, *aff'd sub nom. Maryland v. United States, 460 U.S. 1001, 75 L. Ed. 2d 472, 103 S. Ct. 1240 (1983)*. Upon its consideration of the parties' voluminous papers, the Court grants the motion in part and denies it in part.

I *Facts*

In April 1986, NYNEX acquired Telco and recruited Rafferty to serve as its second senior officer and the head of its consulting division. NYNEX is a Regional Company subject to the consent decree entered on August 24, 1982 in the *AT & T* antitrust case, which bars the Regional Companies from certain lines of business -- long distance telephone services, telecommunications manufacturing, and **[**2]** information services. [1] Telco markets telecommunications management software and consulting services.

Rafferty has alleged that Theodore Engkvist, a NYNEX executive and chairman of Telco's board, informed him that the company had obtained a waiver to perform, *inter alia,* non-software consulting, although the company had obtained only a "software waiver" to provide and market software and associated services which did not cover its non-software consulting operations. [2] Plaintiff was concerned whether the activities of his division complied with the decree, and he asked NYNEX's attorneys on October 20 and 22, 1986 to provide an opinion letter confirming

---

[1] *AT & T,* 552 F. Supp. at 226-34. Rafferty's description of the decree as purportedly restricting the Regional Companies to three lines of business (Opposition at 1) is incorrect.

[2] NYNEX disputes Rafferty's account of the scope of the waiver and of what he was told about the legality of Telco's consulting operation under the consent decree. The Court, however, must accept Rafferty's account of these events for purposes of the motion for summary judgment.

Engkvist's representations that the activities were within the scope of the waiver. [3] On November 10, 1986, Telco's management discharged Rafferty for what it asserts are legitimate **[**3]** reasons, and it closed the consulting division he had been hired to head. Eventually, plaintiff brought this action, which consists of six separate claims.

The Court analyzes below each of these claims in light of the facts and the law adduced by the parties. This task has been complicated by the fact that the plaintiff who, although a lawyer, appears to have limited familiarity with several of the legal issues and principles involved. Additionally, the basis for plaintiff's reasoning and his conclusions are not always easy to follow, *see, e.g.,* notes 6 and 9, *infra,* **[**4]** and, as the Court occasionally notes at appropriate places, he sometimes misrepresents the law, the facts, and the position of his opponents, [4] **[**5]** and he quotes statements from **[*327]** court decisions out of context. [5] Because plaintiff is proceeding *pro se,* the Court has attempted to ascertain or construct what he meant where the rationale of his assertions is confusing, and on that basis some of his claims are upheld. However, greater exactitude and less verbosity [6] will be required hereafter.

II *First Claim: Antitrust*

Plaintiff's first claim seeks redress for what he broadly describes as a violation of the antitrust laws. As best as the Court can tell, [7] Rafferty alleges that his termination for seeking legal advice [8] and for refusing to acquiesce in

---

[3] Plaintiff also asserts that on several other occasions he brought to NYNEX's attention activities involving Telco that he believed to be violative of the decree.

[4] For example, and simply for purposes of illustration of a wider phenomenon, plaintiff contends that it is defendants' claim that the Court is barred as a matter of law from allowing a jury to disbelieve his witnesses (Opposition at 11); that there is no genuine dispute as to the evidence on the wrongful hire and employment theory (Opposition at 23); that with respect to the second claim NYNEX "relies exclusively on [the] *Control Data* [case]" (Opposition at 24); and that all but one of defendants' antitrust precedents deal only with the admissibility of consent decrees at trial (Opposition at 17). None of these statements is true. *See also,* note 18, *infra,* and the litany of plaintiff's false or unsupported statements in defendants' Reply at 32-35.

Inasmuch as Rafferty is a member of the bar who apparently could afford to hire competent counsel but refuses to do so, the Court will in the future hold him to the same standard as other members of the bar. Accordingly, misrepresentations or misstatements of law or fact may, in appropriate circumstances, lead to sanctions.

[5] *See, e.g.,* p. 329, *infra.*

[6] In addition to his thirty-nine page memorandum, plaintiff has filed a "concise" statement of issues consisting of sixty-one pages. That statement fails to comply with Rule 108(h) of the Rules of this Court, in that it includes pages upon pages or facts that are entirely irrelevant to the motion for summary judgment. In part, this may be due to inexperience *(see* p. 326, *supra),* but the filing is also consistent with plaintiff's practice of sometimes inundating the Court and the opposing party with materials in large volume, some of them relevant, many of them irrelevant, and some of them relevant to other pleadings or lawsuits plaintiff may have pending, so as to lay the groundwork for later complaints that not everything had been controverted or decided. Another effect of this practice is to compel the opposing party and the Court to refine the issues on their own so as to permit them to make presentations or judgments on the question whether there are genuine issues of material fact. That is, of course, improper. *See Frito-Lay v. Willoughby, 274 U.S. App. D.C. 340, 863 F.2d 1029, 1034 (D.C.Cir. 1988). See also,* note 39, *infra.*

Nevertheless, the Court has waded through this material on this occasion (although it could have deemed defendants' proposed facts to be admitted on account of plaintiff's failure to comply with Rule 108(h)). *See Simpson v. WMATA, 688 F. Supp. 765, 768 (D.D.C. 1988)*. However, hereafter it will require this plaintiff, like all litigants, to comply with the rules of procedure. *See also,* note 4, *supra.*

[6]**

[7] Rafferty's description of his first claim is headed "Antitrust Whistleblowing" -- a non-existent legal category. His legal argument on this claim is divided into various sections that are inappropriate for a summary judgment brief.

violations of the consent decree, as well as other actions taken by Telco and NYNEX, violated the decree and therefore also Section 4 of the Clayton Act. [9] There are several flaws to this claim of a violation of Section 4.

First. ***HN1***[] Section 4(a) of the Clayton Act grants a private right of action to persons injured "by anything forbidden by the antitrust laws." Section 1 of the Act, *15 U.S.C. § 12*, contains a specific definition of "antitrust laws" for purposes of Section 4(a), and that definition is "exclusive." *Nashville Milk Co. v. Carnation Co., 355 U.S. 373, 375-76, 2 L. Ed. 2d 340, 78 S. Ct. 352 (1958)*. *See also, New Jersey Wood Finishing Co. v. Minnesota Mining & Mfg. Co., 332 F.2d 346, 350 (3rd Cir. 1964)*, *aff'd, 381 U.S. 311, 14 L. Ed. 2d 405, 85 S. Ct. 1473 (1965)* ("antitrust laws" means specific statutes listed in Clayton Act Section 1; other statutes not included). There is no support for the proposition that violation of a consent decree **[*328]** violates Section 4 of the Clayton Act. [10]

Indeed, it has been specifically established that a private party cannot premise a treble damage action under Section 4 upon violations of a government **[**8]** consent decree. *Paul M. Harrod Co. v. A.B. Dick Co., 194 F. Supp. 502, 504 (N.D. Ohio 1961)*; [11] *See also, Sound, Inc. v. American Tel. & Tel. Co.,* [1979-2] Trade Cas. para. 62,974, at 79,547-48 (S.D. Iowa 1979, *aff'd, 631 F.2d 1324 (8th Cir. 1980))*; *Cinema Service Corp. v. Twentieth Century-Fox Film Corp., 477 F. Supp. 174, 177-78 (W.D.Pa. 1979)*; *Control Data Corp. v. International Business Machines Corp., 306 F. Supp. 839, 846 (D.Minn. 1969)*, *aff'd, 430 F.2d 1277, 1278 (8th Cir. 1970)*.

[9]** Second. ***HN2***[] The weight of authority holds that employees do not have standing under Section 4. *See, e.g., Adams v. Pan American World Airways, Inc., 264 U.S. App. D.C. 174, 828 F.2d 24 (D.C.Cir. 1987)*. Plaintiff relies on *Ostrofe v. H.S. Crocker Co., 740 F.2d 739, 744 (9th Cir. 1984)*, and *Donahue v. Pendleton Woolen Mills, Inc., 633 F. Supp. 1423, 1429-30 (S.D.N.Y. 1986)*, which create an exception for "whistleblowers," but most of the courts which have considered the issue have rejected the holding of these cases. *See Fallis v. Pendleton Woolen Mills, Inc., 866 F.2d 209, 210 (6th Cir. 1989)*; *Bichan v. Chemetron Corp., 681 F.2d 514 (7th Cir. 1982)*; *Boisjoly v. Morton Thiokol, 706 F. Supp. 795, 804-05 (D.Utah 1988)*; *Thomason v. Mitsubishi Electric Sales of America, Inc., 701 F. Supp. 1563, 1570 (N.D.Ga. 1988)*; *Reitz v. Canon USA Inc., 695 F. Supp. 552, 553-54 (S.D.Fla. 1988)*, and *Haigh v. Matsushita Electric Corp., 676 F. Supp. 1332, 1346 (E.D.Va. 1987)*. [12] In any event, Rafferty has testified

---

[8] Defendants argue at length (Memorandum at 31-38) that the facts do not support plaintiff's claim that he was terminated, *inter alia,* because he sought legal advice. It is not necessary to decide the factual dispute underlying this antitrust claim, and the Court does not do so.

[9] The claim fails to provide an explanation of the statutes and theories which support it. In answers to interrogatories Rafferty asserts that Count Two refers to a violation of Section 4 of the Clayton Act, and that there is no evidence of violations of Sections 1 and 2 of the Sherman Act. Response to Interrogatories 1-3. In his Opposition to the motion for summary judgment, however, Rafferty suggests that "defendants cannot establish at summary judgment that there is no relevant violation of Sherman Sections 1 or 2." Opposition at 19 & n. 14. Even if the issue were open in view of the interrogatory answers, plaintiff could not possibly establish either market power in the consulting market or the requisite combination or conspiracy for a Sherman Act claim. *See, e.g., Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 759-77, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. Further, there are no citations to the discovery record and no explanation of the theories that lead plaintiff to his conclusion. Such unsupported and conclusory statements are insufficient to withstand a motion for summary judgment. *See Rule 56(e), Fed. R. Civ. P.*

[7]**

[10] Obviously, a judicial consent decree is not an "***antitrust law***."

[11] Plaintiff attempts to distinguish *Paul M. Harrod* by suggesting that it turns on the fact that references to the consent decree would prejudice the jury and that references to it were readily excisable. The explanation is patently false. The court in that case flatly decided that to "permit a private party to recover damages for violation of any provision of [a government antitrust decree] is so obviously beyond the scope of the term 'antitrust laws,' as used in the statute, as to require no further discussion." *194 F. Supp. at 504*. And the court went on to say that in view of its dismissal of the counts in the complaint referring to the antitrust decree that these counts would be ordered stricken.

that he is not a whistleblower. Rafferty Deposition at 1088-89. Accordingly, the Court can find no basis for extending the holding of *Ostrofe* **[**10]** and *Donahue* [13] to the circumstances here.

Third. Plaintiff asserts that he suffered the requisite "antitrust injury" because he lost his job at Telco and has not secured comparable employment. However, "only ***HN3***[] harm stemming from a reduction in competition qualifies as **[**11]** an injury cognizable under the antitrust laws." *Adams, 828 F.2d at 26*. [14] Rafferty does maintain that he was an "arguable beneficiary" of the allegedly illegal conduct while employed by Telco, Opposition at 20-21, but he does not -- indeed he cannot -- contend that his injury resulted from a reduction in competition. [15]

For these reasons, it is the Court's conclusion that Count One must be dismissed.

III *Second Claim: Third-Party Beneficiary*

Plaintiff alleges next that the consent decree is a contract binding on NYNEX, **[*329]** and that NYNEX employees are third-party beneficiaries of that contract. He further claims **[**12]** that his termination violated the decree because it resulted from his efforts to clarify and rectify NYNEX's breaches of the decree, and that as a third-party beneficiary he is entitled to recover. That claim, too, must fail.

First. Plaintiff's claims to third-party beneficiary status rest on a provision of the consent decree (Section V) requiring the Regional Companies to advise employees on their obligations under the decree. This provision is one of a number intended to ensure compliance with the decree. While it requires employees to comply with the decree, there is nothing in Section V, anywhere else in the decree, or in the Court's explanations of the decree, [16] to provide, or even to suggest, that employees of the Regional Companies were intended to benefit from it, as distinguished from being required to comply with it. [17]

Second. Even if there were some merit to the decree analysis, plaintiff could still not prevail, for ***HN4***[] it is well established that a private party cannot sue as a third-party beneficiary of a government consent decree. *Control Data Corp. v. IBM Corp., 306 F. Supp. 839, 846-48 (D.Minn. 1969)*, *aff'd sub nom.* *Data Processing Financial & General Corp. v. IBM Corp., 430 F.2d 1277, 1278 (8th Cir. 1970)*; *Cinema Service Corp. v. Twentieth Century-Fox Film Corp., 477 F. Supp. 174, 178 (W.D.Pa. 1979)*; *May Department Stores Co. v. First Hartford Corp., 435 F. Supp. 849, 852-53 (D.Conn. 1977)*; *National Union Electric v. Emerson Electric Co.,* [1981-82] Trade Cas. para. 64,274 (N.D.Ill. 1981). *See also,* *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 750, 44 L. Ed. 2d 539, 95 S. Ct. 1917 (1975)*; *Federal Trade Commission v. Owens-Corning Fiberglas, 853 F.2d 458, 464 (6th Cir. 1988)* (Clayton Act does not create a private enforcement remedy).

---

[12] Plaintiff misconstrues *Thomason* and *Haigh* by claiming that they distinguish *Ostrofe* on the facts without rejecting its holdings (Opposition at 23 n. 16). *See* *Thomason, 701 F. Supp. at 1570* ("if Thomason is correct in his allegations [that defendant fired him for refusal to engage in illegal conduct] he has suffered injury; but that harm cannot be redressed under the Sherman and Clayton Acts"); *Haigh, 676 F. Supp. at 1346* ("again, this Court must reject the *Ostrofe* analysis").

[13] In *Ostrofe,* the plaintiff was an essential participant in a scheme to fix prices and allocate customers; in *Donahue,* the plaintiff was likewise the means by which the defendant had imposed the illegal resale price maintenance scheme.

[14] The loss of employment by plaintiffs in *Adams* satisfied this standard because it was directly caused by the predatory destruction of their employer by competitors. 828 F.2d at 17.

[15] It appears to be plaintiff's theory that his termination was carried out in connection with the cessation of a business that was violating the *AT & T* decree. Even if true, that is not an "antitrust injury."

[16] *See* *552 F. Supp. at 143*.

[17] There is not the slightest support for plaintiff's flat statement that the "intent of the AT & T consent decree specifically to benefit management employees is beyond cavil" (Opposition at 24).

- - - - - - - - - - - - - - - - -End **[**13]** Footnotes- - - - - - - - - - - - - - - - -

Plaintiff's arguments to the contrary misrepresent the law and are otherwise unpersuasive. Thus, plaintiff quotes *Control Data* as declining to express an opinion on the issue of whether **[**14]** the decree conferred rights on third-party beneficiaries. Not only is the language plaintiff purports to quote (Opposition at 24) taken wholly out of context, but *Control Data* categorically rejected the third-party beneficiary theory after discussing it thoughtfully and at some length. [18]

Equally unhelpful are plaintiff's citations to third-party beneficiary cases involving consent agreements under the civil rights statutes and other areas of the law, given the ample authority in the antitrust area itself. Indeed, several of the cited cases expressly recognize the well-settled law in the antitrust area and do not contest that authority. *See, e.g., Coca-Cola Bottling Co. v. Coca-Cola Co., **[**15]** 654 F. Supp. 1419, 1437-39 (D. Del. 1987)* ("cases involving antitrust consent decrees have hewed closely to the *Blue Chip* rule barring any person not directly participating in the consent decree from suing to enforce its terms"); *Virgo v. Local Union 580, 107 F.R.D. 84, 91 (S.D.N.Y. 1985)*.

The second count will be dismissed.

IV *Third Claim: Written Employment Contract*

Plaintiff claims next that he entered an oral two-year non-cancellable employment contract with the defendants which they breached by terminating him without cause. Defendants argue that the claim should be dismissed because there is no written contract or memorandum satisfying the Statute of Frauds.

For purposes of this motion, it is undisputed that the plaintiff and James Jewett, **[*330]** president of Telco, entered an oral employment contract on April 30, 1986 that specified a $ 70,000 salary plus bonuses and required Rafferty not to compete with Telco for at least three years if he left the company. In a deposition, Jewett acknowledged that there was a contract, but he disagreed with Rafferty about its terms. Specifically, he maintained that the contract was terminable at will, [19] while Rafferty asserts that for **[**16]** the first two years he could not be terminated except for cause.

HN5[] Jewett's deposition testimony waives any application of the Statute of Frauds by admitting that there was, indeed, a contract. *Wemhoff v. Investors Management Corp., 455 A.2d 897, 899 (D.C. App. 1983)*; *Hackney v. Morelite Construction, 418 A.2d 1062 (D.C. App. 1980)*. To waive application of the Statute of Frauds, the admission need not include all of the terms of the contract, but only those sufficient to conclude that an agreement existed. *Wemhoff v. Investors Management Corp., 528 A.2d 1205, 1207-08 (D.C. App. 1987)*. [20]

[17]** Even without that admission, defendants could not assert the Statute of Frauds because of the doctrine of equitable estoppel. *Tauber v. District of Columbia, 511 A.2d 23, 27 (D.C. 1986)*. ***HN6***[] Equitable estoppel bars a party from asserting the Statute of Frauds when its own fraud is responsible for the absence of a written agreement. Jewett's alleged promise to reduce the contract to writing "as soon as possible" and his subsequent failure to do so, brings the contract within the doctrine for purposes of a motion for summary judgment. [21]

---

[18] In view of the lengthy discussion supporting the *Control Data* court's conclusion that antitrust consent decrees may not be enforced by third parties, it is difficult to ascribe Rafferty's assertion that the court declined to "express an opinion" on that issue (Opposition at 24) entirely to inexperience.

[19] Jewett Deposition at 186, 191, 202.

[20] Defendants' argument that because Jewett denied plaintiff's claim to a two-year contract, the *Wemhoff* rule does not apply (Reply at 15-16) is contradicted both by the *Wemhoff* decisions themselves and by *Hackney* which expressly states that the Statute of Frauds is waived if the defendant as much as admits to the existence of the contract. *Id. at 1067*.

[21] Whether Jewett had the intent to commit a fraud when he apparently made the promise is a matter which, of course, must be left for trial.

For these reasons, the Court will deny defendants' summary judgment motion with respect to the claim for breach of employment contract.

V *Fourth Claim: Oral Contract Modification*

Plaintiff's next claim is based upon an alleged modification of the oral contract discussed *supra.* Plaintiff alleges that Engkvist promised him in an August **[**18]** 29, 1986 telephone conversation that if his division were ever closed, he would be offered employment with another NYNEX company, but that when Telco was later closed no such offer was forthcoming.

Even if these assertions are factually correct -- which the Court will assume for purposes of the motion -- they fail to state a claim cognizable at law. Plaintiff does not contend that there was a bargained-for exchange. [22] Engkvist did not ask Rafferty to do anything in return for the promise, and Rafferty made no offer to do so. At most, Engkvist made a gratuitous promise, and it is therefore not enforceable. *See Price v. Mercury Supply Co., 682 S.W.2d 924, 932 (Tenn.App. 1984)*; *Murray v. Lichtman, 119 U.S. App. D.C. 250, 339 F.2d 749, 751-52 (D.C.Cir. 1964)*. [23] ***HN7***[] Under Tennessee law, the rule is that an oral contract for lifetime, permanent, or indefinite employment is a hiring terminable at will when the employee furnishes no consideration other than the services required in the agreement. *Savage v. Spur Distributing Co., 33 Tenn. App. 27,* ***[*331]*** *228 S.W.2d 122, 124 (1950)*. [24]

The fourth count will be dismissed.

VI *Fifth Claim: Misrepresentation*

Rafferty alleges that NYNEX and Telco made two misrepresentations to him: (1) Engkvist told him that the Department of Justice had approved and authorized the NYNEX's acquisition of Telco; and (2) Jewett told him through an executive recruiter that Telco's consulting division had revenues of $ 1 million a year. [25] The claim based on these alleged misrepresentations must likewise be dismissed.

[20]** In the first place, plaintiff's memorandum in opposition to the motion for summary judgment offers no rebuttal to defendants' assertion that the claim should be dismissed because it fails to state any legally cognizable injury. On that basis, plaintiff may be deemed to have conceded the issue, and since there was therefore a failure to assert an injury recognized by law, the claim may be deemed to be fatally defective. [26]

However, in order not to penalize plaintiff for his inexperience *(see* pp. 326-327, *supra),* the Court has examined the complaint to determine whether the claim **[**21]** could survive defendants' motion. This examination reveals that

---

[22] The complaint alleges that defendants' commitment was given "in consideration for [his] continued efforts to develop Telco consulting" (Complaint, para. 37). However, plaintiff was already obligated to advance that objective.

[23] **[**19]** Rafferty relies on *Barger v. General Electric Co., 599 F. Supp. 1154, 1161 (W.D.Va. 1984)*, for the proposition that his continued service constituted consideration. However, not only did *Barger* involve special facts (the existence and distribution of a handbook to govern layoffs) but it applied only Virginia law, recognizing that on the broad issue the jurisdictions are severely split.

[24] In his deposition testimony, plaintiff stated that he "had a commitment of employment for the indefinite future." Rafferty Deposition at 857.

[25] There is considerable dispute between the parties about exactly what was said to whom. It appears, however, that ambiguous statements were made that could have left Rafferty with the impression upon which he now relies.

[26] Both in Tennessee and in the District of Columbia, ***HN8***[] while a plaintiff need not, at this stage, show the amount of the damages, he is obligated to show that they exist and are not entirely speculative. *See, e.g., Haynes v. Cumberland Builders, Inc., 546 S.W.2d 228, 233 (Tenn. App. 1977)*; *Naartex Consulting Corp. v. Watt, 232 U.S. App. D.C. 293, 722 F.2d 779, 793 n. 22 (D.C.Cir. 1983)*; W. Prosser & W. P. Keaton, *Torts* § 110 (5th ed. 1984).

nothing in that complaint or in plaintiff's other voluminous filings supports the notion of a legally-recoverable injury. [27]

The complaint does allege that the misrepresentations exposed him to potential criminal liability, resulted in his precipitous termination, damaged his professional reputation, and violated his principles. Amended Complaint, paras. 47, 48.

The claim for exposure to criminal liability is plainly too uncertain and too speculative for recovery; Rafferty has never been charged with anything related to this case, and there is not the slightest indication that he ever will be. [28] Similarly, nothing in the record support Rafferty's claim of damage to reputation; indeed, the record refutes the assertion. [29] The claim that these misrepresentations caused his termination founders on the fact that the dismissal left Rafferty exactly where he asserts **[**22]** he would have been without the misrepresentation: without a job at Telco. Finally, as concerns the claim of injury to his principles, which plaintiff characterizes as "most important" of all, it is of course, not an injury cognizable at law.

VII *Sixth Claim: Wrongful Discharge*

Plaintiff finally asserts that NYNEX officials caused Jewett to discharge him because he sought legal advice as to the application of the decree and because they knew that he would not conduct or participate in unlawful activities for which he was an essential participant. He further maintains that the manner **[**23]** of his termination constituted retaliation for his refusal to participate in these illegal activities or to conceal them from the Department of Justice. Defendants argue that these allegations do not state a claim upon which **[*332]** relief may be granted. [30]

Wrongful discharge is an evolving tort, and the status of the law varies substantially from state to state. [31] **[**25]** ***HN9***[] In Tennessee, an exception to the at-will termination doctrine for retaliatory discharges appears to be recognized at the present time (although only with respect to certain relatively narrow situations). *Chism v. Mid-South Milling Co., 762 S.W.2d 552 (Tenn. 1988)*. *See also, Watson* ***[**24]*** *v. Cleveland Chair Co.,* *1 BNA IER CAS 1780, 122 L.R.R.M. 2076, 2078* (Tenn. App. 1985). On the other hand, "the District of Columbia does not currently recognize a public policy exception to the at-will termination doctrine." *Hall v. Ford, 272 U.S. App. D.C. 301, 856 F.2d 255, 267 (D.C. Cir. 1988)*. [32] *But see, Buttell v. American Podiatric Medical Ass'n, 700 F. Supp. 592, 600 (D.D.C. 1988)*; *Alder v. Habib, 130 U.S. App. D.C. 126, 397 F.2d 687 (D.C.Cir. 1968)*.

---

[27] It is therefore not necessary to explore defendants' several other defenses to this claim.

[28] NYNEX, on the other hand, has been indicted for alleged violations of the decree. *See United States v. NYNEX Corporation,* Criminal No. 90-0238 (D.D.C. 1990).

[29] Rafferty testified that several of Telco's customers have either recommended him for other positions or are willing to do so, Deposition at 1047, 1103-04, and that he was able to secure a comparable consulting position at the Diebold Group. *Id.* at 1501.

[30] In addition to arguing that no cause of action for wrongful discharge is recognized in either Tennessee or the District of Columbia, defendants maintain that this claim should be dismissed because plaintiff was fired for business reasons and not as a consequence of his actions under the decree. But that is an issue of fact not amenable to resolution on the instant motion.

[31] Both parties have taken positions on the law applicable to this claim that are at odds with those they have taken elsewhere in these filings. Plaintiff argues elsewhere that District of Columbia law governs this case, Opposition at 29 n. 24; but with respect to this count he suggests variously that New York, District of Columbia, and Tennessee law are applicable. Opposition at 36 n. 29. Defendants, meanwhile, have asserted elsewhere that the case is governed by Tennessee law, Motion at 52, while relying here principally upon District of Columbia law.

[32] Plaintiff distorts the *Hall* decision, claiming that it deals only with the political rights of public employees (Opposition at 35) when that was but one of the questions considered by the court. His further attempt to denigrate the Court of Appeals opinion by characterizing it as dictum and as relying on a D.C. Court of Appeals *en banc* decision without precedential value must likewise fail, for this Court is certainly bound by plain language of the U.S. Court of Appeals.

In view of the failure of the parties to take unequivocal stands on and properly to brief the choice of law issue which may govern resolution of the substantive question (which is itself not entirely clear in either of the two jurisdictions), the Court will deny the motion for summary judgment, without prejudice to its renewal on the basis of further briefing.

VIII *Punitive Damages*

The complaint asks for punitive damages [33] under the second, fifth, and sixth claims. [34] The issue needs to be considered only with respect to Count Six, the wrongful discharge claim, since the other relevant claims are being dismissed. **[**26]**

HN10[] There is no question but that punitive damages may be awarded in egregious circumstances, in cases of fraud, malice, oppression, reckless disregard for the rights of others, or indifference to the consequences, [35] **[**27]** where a contract claim merges with one for tort or violation of public policy. [36] While the Court has not rendered a final decision with respect to the wrongful discharge claim since both the proper choice of law and the appropriate substantive standard to be applied are still in doubt *(see* Part VII, *supra),* at least for present purposes it is clear that the punitive damage claim should not be dismissed.

Plaintiff has alleged that various officials connected with defendants saw to **[*333]** it that he was discharged because he would not participate in or cover-up activities which violated the *AT & T* decree or were otherwise unlawful. He also claims that retaliatory measures were taken when he would not cooperate in these unlawful activities. These steps by defendants, if they can be proved, would be sufficiently egregious as well as oppressive of the rights of others [37] that a jury might be justified in awarding punitive damages therefor.

To be sure, punitive damages are not automatically available in every wrongful discharge case, or even in every case where the discharge is effected as retaliation for the exercise of lawful activities; however, assuming that plaintiff's claims in that respect are supported by **[**28]** the facts, the Court will not rule out such damages at the summary judgment stage. [38]

Order

For the reasons stated, [39] it is hereby

---

[33] In the original complaint, the demand was for $ 1 million; that demand has now been increased, without explanation, to $ 2 million.

[34] In his opposition to the summary judgment motion, plaintiff also discusses the third and fourth claims, but that opposition cannot enlarge upon the complaint.

[35] *Nepera Chemical, Inc. v. Sea-Land Service, Inc., 253 U.S. App. D.C. 394, 794 F.2d 688 (D.C.Cir. 1986)*; *Price v. Griffin, 359 A.2d 582, 589 (D.C.App. 1976)*; *Washington Garage Co. v. Klare, 248 A.2d 681, 684 (D.C.App. 1968)*. *Irving Pulp & Paper v. Dunbar Transfer, 732 F.2d 511, 516-17 (6th Cir. 1984)*; *National Polymer Products v. Borg-Warner Corp., 660 F.2d 171, 183 (6th Cir. 1981)*; *Inland Container Corp. v. March, 529 S.W.2d 43, 44 (Tenn. 1975)*; Prosser & Keeton on Torts § 2 at 9-10 (5th ed. 1984).

[36] *Bedell v. Inver Housing, Inc., 506 A.2d 202, 206 (D.C. App.1986)*.

[37] ***Nepera Chemical, supra, 794 F.2d at 689***.

[38] NYNEX is subject to punitive damages only if its officers ordered, participated, or ratified the outrageous conduct. *See* *Hammerman v. Peacock, 607 F. Supp. 911, 919 (D.D.C. 1985)*. Decision on that issue may have to await the production at trial of plaintiff's evidence.

[29]** ORDERED that the first, second, fourth, and fifth claims be and they are hereby dismissed; and it is further

ORDERED that defendants' motion for summary judgment be and it is hereby denied with respect to the third and sixth claims; and it is further

ORDERED that defendants' request for a dismissal of the claim for punitive damages be and it is hereby denied.

[39] In line with his not unusual practice in this Court, in the Court of Appeals, and before the Magistrate, of seeking, somehow, to tie together all of his disparate disputes, claims, and procedural involvements wherever they may be pending, plaintiff attempts to reserve the right to supplement the facts for purposes of the summary judgment motion pending the resolution of such matters as disputes over discovery orders, discovery sanctions, and what are claimed to be improper *Fifth Amendment* claims by defendants' employees. Opposition at 39 n. 35. The Court denies the request insofar as it seeks a unilateral right to adduce more facts following an advisory opinion to plaintiff regarding the sufficiency of the facts he has adduced thus far. However, the Court will consider a stay of the remainder of the summary judgment issues, as well as of other proceedings, pending the resolution of discovery or other matters, should either party so request.

HN2[] **Amendment of Pleadings, Leave of Court**

Fed. R. Civ. P. 15(a) provides that a party may amend the party's pleading once as a matter of course at any time before a responsive pleading is served. Otherwise a party may amend the party's pleading only by leave of court or by written consent of the adverse party; and leave shall be freely given when justice so requires. At the same time, leave may be denied where there has been undue delay, the movant has acted in bad faith or with a dilatory motive, the opposing party would be unduly prejudiced, or the amendment would be futile. Similarly, where plaintiff has already had a sufficient opportunity to plead, leave may be denied. While a change in the governing law can justify granting leave to amend despite the passage of a significant amount of time, mere ignorance of the law cannot.

Opinion by: SAND

Opinion

[*495] LEONARD B. SAND, UNITED STATES DISTRICT JUDGE

These cases arise out of an alleged bid rigging/market allocation scheme in the New York City market for reinforced-concrete superstructure construction work. The State of New York seeks to amend its complaint to include claims for damages under New York's antitrust statute on behalf of government entities which were apparently indirect purchasers of the concrete work.

Background

In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*, the United States Supreme Court held that ***HN1***[] "indirect purchasers," downstream buyers who allege that they absorbed at least part of the "cost" of an antitrust violation, could not recover from the alleged violator under § 4 of the Clayton Act, *15 U.S.C. § 15*. The Court described its decision as one of "statutory construction," *id. at 736*, and found that:

> the legislative purpose in creating a group of "'private attorneys general'" to enforce the antitrust laws under **[**3]** § 4 . . . is better served by holding direct purchasers to be injured to the full extent of the overcharge paid by them than by attempting to apportion the overcharge among all that may have absorbed a part of it.

Id. at 746 (citation omitted).

Plaintiff, the State of New York, commenced these actions on March 20, 1985 and October 22, 1986 respectively, against more than thirty named defendants, all alleged participants in a continuing collusive bid rigging and market allocation scheme directed at the New York City market for "major reinforced-concrete superstructure construction work." *Cedar Park* Amended Complaint, Preliminary Statement. Although plaintiff sought treble damages under section 4 of the Clayton Act, *15 U.S.C. § 15*, and sections 340 and 342-b of the New York General Business Law (the "Donnelly Act") for injuries allegedly sustained by the State and its political subdivisions, the only state subdivision actually named by plaintiff in its initial complaint was the New York Convention Center Development Corporation, a subsidiary of the New York State Urban Development Corporation ("UDC"). Plaintiff also sought an injunction against further violations and the imposition **[**4]** of civil penalties under the Donnelly Act.

In 1987, various of the defendants moved to dismiss all or portions of the complaints. In *State of N.Y. v. Cedar Park Concrete Corp., 665 F. Supp. 238* (S.D.N.Y. June 25, 1987), this Court held that:

> In view of the need early in the litigation to identify State-affiliated purchasers, we believe the complaints should be dismissed insofar as they purport to state treble damages claims on behalf of unidentified state subdivisions. Accordingly, we hold that insofar as the complaints allege federal and state antitrust damages claims on behalf of State subdivisions other than the UDC, they are dismissed **[*496]** without prejudice to repleading within 60 days.

Id. at 242. Having dismissed plaintiff's claims to the extent they asserted damages claims on behalf of State entities other than the State itself and the UDC, we turned our attention to the implications of *Illinois Brick*, which we described as stating a "principle of federal ***antitrust law***." *Id.* We found that the treble damages claims asserted by the State and the UDC could withstand the motions to dismiss because the complaints contained "the required allegations of direct **[**5]** injury to both the State of New York and the UDC." *Id.* Pursuant to our opinion, the State later notified the Court and all parties that it would not assert any additional damage claims. *See* Letters of September 15 and September 22, 1987 from Alice McInerney, Assistant Attorney General. [1]

In *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86* (April 18, 1989), the Supreme Court held in a unanimous opinion joined in by seven justices that claims by indirect purchasers under state antitrust provisions providing such purchasers with a cause of action for damages were not pre-empted by § 4 of the Clayton Act. The Court stressed that it had "made clear" in *Illinois Brick* that the issue in that case was "strictly a question of statutory interpretation" and observed **[**6]** that nothing in that case "suggest[ed] that it would be contrary to congressional purposes for States to allow indirect purchasers to recover under their own antitrust laws." *Id. 109 S. Ct. at 1666*.

On October 3, 1989, plaintiff moved for "an order reconsidering the Court's earlier decision . . . and granting plaintiff the right to pursue its indirect purchaser damage claims under state ***antitrust law*** against defendants." Notice of Motion dated October 2, 1989. Plaintiff described this Court's earlier decision as "holding that it was a settled principle of ***antitrust law*** that 'only one who directly purchases products from an alleged antitrust violator may sue for treble damages'" and "effectively barr[ing] repleading state affiliated downstream purchasers" on the basis of *Illinois Brick*. Plaintiff's Memorandum in Support of Motion to Reconsider at 3. At oral argument, we denied plaintiff's motion without prejudice to the filing of a motion for leave to file an Amended Complaint. Transcript of Oral Argument dated November 16, 1989 at 29.

On December 19, 1989, plaintiff moved for an order granting it leave to file an amended complaint seeking damages on behalf of five government entities **[**7]** which were apparently indirect purchasers of major reinforced concrete superstructure work for eight construction projects. Plaintiff continued to argue that this Court had, "relying on *Illinois Brick*, effectively dismissed plaintiff's indirect damage claims, including claims based on state ***antitrust***

[1] In *State of N.Y. v. Cedar Park Concrete Corp., 684 F. Supp. 1229 (S.D.N.Y. 1988)*, we dismissed without prejudice portions of plaintiff's complaints seeking damages and penalties for claims arising after the applicable statute of limitations had run.

law." Plaintiff's Memorandum in Support of Motion to Amend Complaints at 2. At oral argument, we noted that we were having "difficulty recognizing [our earlier] opinion from the plaintiff's characterization of it." Transcript of Oral Argument dated January 18, 1990 at 5-6.

Discussion

HN2[] *Fed. R. Civ. P. 15(a)* provides that:

> A party may amend the party's pleading once as a matter of course at any time before a responsive pleading is served . . . Otherwise a party may amend the party's pleading only by leave of court or by written consent of the adverse party; and leave shall be freely given when justice so requires.

At the same time, leave may be denied where there has been undue delay, the movant has acted in bad faith or with a dilatory motive, the opposing party would be unduly prejudiced, or the amendment would be futile. *Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962)*. Similarly, **[**8]** where plaintiff has already had a sufficient opportunity to plead, leave may be denied. *Kaster v. Modification **[*497]** Sys., Inc., 731 F.2d 1014, 1018 (2d Cir. 1984)* (citing *Denny v. Barber, 576 F.2d 465, 471 (2d Cir. 1978))*. While a change in the governing law can justify granting leave to amend despite the passage of a significant amount of time, *Ellis v. Blum, 643 F.2d 68, 85 (2d Cir. 1981)*; *Boileau v. Bethlehem Steel Corp., 730 F.2d 929, 937-38* (3d Cir.), *cert. denied*, *469 U.S. 871, 83 L. Ed. 2d 150, 105 S. Ct. 221 (1984)*, mere ignorance of the law cannot. *Goss v. Revlon Inc., 548 F.2d 405, 407 (2d Cir. 1976)*.

In this case, plaintiff again seeks to assert damage claims on behalf of state subdivisions a full two years after this Court dismissed the damages claims asserted by plaintiff on behalf of all unidentified state subdivisions without prejudice to repleading within 60 days. Though plaintiff discusses *ARC America* at great length, it is not arguing that the law changed during this two year period, that the law was unsettled or uncertain, that it misunderstood the law, or even that it misconstrued this Court's earlier decision. Instead, plaintiff argues that this Court "effectively" barred **[**9]** it from asserting claims under the Donnelly Act on behalf of indirect purchasers.

In no sense can this Court's earlier decision be construed as plaintiff suggests. In *State of N.Y. v. Cedar Park Concrete Corp.*, we dismissed the claims asserted on behalf of unidentified state subdivisions because they were not identified. Under a separate section heading, we then considered the claims asserted by the State on behalf of itself and the UDC. In this section of the opinion, we first observed that *Illinois Brick* stated a "settled principle of *federal* ***antitrust law***." *665 F. Supp. at 242* (emphasis added). We then found that the complaint asserted claims on behalf of the State and the UDC as direct purchasers and thus did not dismiss the claims. We neither reached nor were asked to reach the question whether plaintiff could assert damage claims under the Donnelly Act on behalf of state subdivisions which were indirect purchasers.

The most plaintiff could argue is that it was not certain until *ARC America* that claims could be asserted on behalf of indirect purchasers under state antitrust statutes. [2] As plaintiff itself concedes, however, whether indirect purchasers could recover **[**10]** under state antitrust laws was not resolved by *Illinois Brick* and remained an open question until *ARC America. See* Transcript of Oral Argument dated November 16, 1990 at 10. At the time of our first decision, it had already been the subject of ongoing litigation, legislative activity, and academic discussion. In 1985, a New York State judge had written:

---

[2] We note in passing that it is by no means even clear that the Donnelly Act by its own terms permits claims by indirect purchasers. Unlike all but one of the statutes at issue in *ARC America*, the Donnelly Act does not "expressly allow indirect purchasers to sue." *109 S. Ct. at 1663-64 n. 3*. The only court to apparently consider the issue denied recovery to indirect purchasers under the Donnelly Act. *See* *Russo & Dubin v. Allied Maintenance Corp., 95 Misc. 2d 344, 407 N.Y.S.2d 617 (Sup. Ct. N.Y. Co. 1978)*. The Court reached its decision not upon preemption grounds but rather by citing *Illinois Brick* and analogizing the Donnelly Act to the Clayton Act. *Id. 407 N.Y.S.2d at 620*. We express no opinion as to this issue of New York ***antitrust law***.

> Clearly, Congress has not preempted the field of ***antitrust law*** by passage of the Federal antitrust statutes . . . A State remains free to regulate in the area of antitrust despite the existence of the Federal antitrust provisions, so long as the State statutes do not conflict with the Federal law. Several states have antitrust laws that provide a remedy for indirect purchasers (*see, e.g.*, *Ala.Code § 6-5-60[a]*; *Cal. Business and Professions Code § 16750*; *Hawaii Rev.Stat. § 480-14[c]*; Illinois Ann. Stat. ch. 38, § 60-7[2]; *Miss.Code Ann. § 75-21-9*; *Wis.Stat.Ann. § 133.18[1]*), but the validity of these statutes remains a matter of debate (*compare* *State of California v. California & Hawaiian Sugar Co., 9th Cir., 588 F.2d 1270, 1273*, *cert. denied 441 U.S. 932, 99 S. Ct. 2052, 60 L. Ed. 2d 660*, with *Russo & Dubin **[**11]** v. Allied Maintenance Corp., 95 Misc. 2d 344, 347, 407 N.Y.S.2d 617* *and* *Matter of Wiring Device Antitrust Litigation, 498 F. Supp. 79*; **[*498]** *see*, Note, State Indirect Purchaser Statutes: The Preemptive Power of Illinois Brick, *62 BUL Rev 1241*; Note, Indirect Purchaser Suits Under State Laws: A Detour Around the *Illinois Brick* Wall, 34 Stan L Rev 203 [1981]; Cavanagh, The *Illinois Brick* Dilemma: Is There a Legislative Solution?, 48 Alb L Rev 273, 309-310 [1984]).

Tip Top Farms, Inc. v. Dairylea Co-op, Inc., 114 A.D.2d 12, 497 N.Y.S.2d 99, 109 (2d Dep't 1985) (Lazer, J., concurring in part and dissenting in part). Thus, plaintiff must still explain why it chose not to raise the issue earlier.

[12]** At oral argument on the Reconsideration Motion, counsel for plaintiff appeared to concede that they only became aware of the issue after *ARC America* and that it was only then that they "looked extremely closely at the [Donnelly Act's] legislative history and . . . the legislative intent." Transcript of Oral Argument dated November 16, 1990 at 10. This explanation suggests that plaintiff was simply unaware of the law and does not offer a legally sufficient excuse for the delay.

Conclusion

For the reasons stated above, plaintiff's motion to amend its complaint is denied.

The parties are to inform the Court by letter of the status of these cases by August 31, 1990.

SO ORDERED.

Opinion by: CUMMINGS

Opinion

[*201] CUMMINGS, Circuit Judge.

Plaintiff Bi-Rite Oil Company ("Bi-Rite") operates seven gasoline service stations in various Indiana cities. Defendant Indiana Farm Bureau Cooperative Association, Inc. ("Farm Bureau") is owned by a number of cooperatives including defendants Decatur County Farm Bureau Cooperative Association ("Decatur") and Noble-Whitley Farm Bureau Cooperative Association ("Noble-Whitley").

Farm Bureau owns and operates a petroleum refinery in Mt. Vernon, Indiana. In 1983, the last year Farm Bureau and Bi-Rite did business **[**2]** together, Farm Bureau's refinery produced 21,600 barrels per day compared to the total refinery capacity in Indiana of 466,000 barrels per day. The principal purpose of the Farm Bureau refinery **[*202]** is to ensure a steady supply of fuel for its farmer-members. In 1981 Farm Bureau was looking for outside customers to purchase its surplus product. In July 1982 Farm Bureau agreed to sell blended gasoline, which included 10% alcohol, to Bi-Rite at a discount. Rather than giving Bi-Rite a long-term agreement, in November 1982 Farm Bureau executed a 30-day memorandum of understanding with Bi-Rite concerning price, quantity, and terms. This memorandum was extended and continued in effect until March 1983, when Bi-Rite refused to pay for $

* The Honorable Joseph T. Sneed, Senior Circuit Judge of the Ninth Circuit, is sitting by designation.

632,000 worth of gasoline that it had ordered and accepted from Farm Bureau. Shortly thereafter Farm Bureau stopped supplying gasoline to Bi-Rite. Bi-Rite admitted that the unpaid $ 632,000 was the reason for the stoppage. App. 116, 140. Nevertheless in October 1983 Bi-Rite filed a federal complaint against Farm Bureau, Decatur, and Huntington County Cooperative Association, Inc., alleging violation of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* **[**3]** and *2*, and similar Indiana law provisions and seeking damages and injunctive relief. Noble-Whitley was substituted for Huntington as a defendant in December 1983. A second amended complaint was filed in October 1987.

According to the final complaint Bi-Rite was cut off by Farm Bureau because it was a price-cutter not willing to maintain the higher consumer prices charged by Decatur and Noble-Whitley. Bi-Rite alleged that those defendants were in a conspiracy with Farm Bureau to stabilize the retail price of gasoline in violation of *Section 1* of the Sherman Act and equivalent Indiana law provisions. Bi-Rite also alleged that the defendants had conspired to monopolize the pertinent market in violation of *Section 2* of the Sherman Act and similar Indiana Code sections. Finally, Bi-Rite alleged that the defendants conspired to compel it to cease doing business in violation of *Indiana Code Section 24-1-4-1*.

The district judge handed down a well-reasoned 13-page opinion in July 1989, holding that defendants were entitled to summary judgment. *720 F. Supp. 1363 (S.D. Ind. 1989)*. We affirm because any vertical price restraint here was not *per se* illegal or in any event **[**4]** unreasonable under *Section 1* of the Sherman Act and because no violation of other statutory provisions was shown.

Price-Fixing

HN1[] Apart from a narrow band of price-fixing conduct which has been held to be *per se* illegal, in order to establish liability under *Section 1* of the Sherman Act a plaintiff must demonstrate that the defendants conspired to achieve an unlawful objective and that the resulting restraint of trade was unreasonable. *15 U.S.C. § 1*; *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464*; *Business Electronics v. Sharp Electronics, 485 U.S. 717, 723, 99 L. Ed. 2d 808, 108 S. Ct. 1515*. As to the first of these elements, Bi-Rite conceded that Farm Bureau decided to terminate its relationship with Bi-Rite because of the unpaid $ 632,000 debt and not because of a conspiracy among the defendants. Nevertheless, Judge Barker held that the plaintiff's allegations that Decatur and Noble-Whitley had complained to Farm Bureau about Bi-Rite's retail prices coupled with various other **[**5]** allegations raised sufficient evidence of concerted activity to withstand a motion for summary judgment on this element. [1] On the second element, the unreasonableness of the restraint, Judge Barker found that Bi-Rite was unable to present a genuine issue of material fact. She therefore granted summary judgment in favor of the defendants. ***HN2***[] We review this determination *de novo. McMillian v. Svetanoff, 878 F.2d 186, 188 (7th Cir. 1989)*.

The plaintiff contends on appeal that it should not be required to demonstrate the unreasonableness of the defendants' actions since the defendants allegedly engaged in a vertical price restraint that is *per se* illegal under *Section 1* of the Sherman Act. This theory was recently rejected in *Business Electronics*, where it was alleged that Sharp Electronics and its **[*203]** retail **[**6]** customer Hardwell engaged in an agreement to terminate Business Electronics in favor of another dealer because Business Electronics was a price-cutter. The Supreme Court held that such an agreement was not *per se* illegal. [2] The Court affirmed the Fifth Circuit's holding that ***HN3***[] a vertical agreement between a manufacturer and a dealer to terminate a second dealer could not be *per se* illegal "without a further agreement on the price or price levels to be charged by the remaining dealer." *Business Electronics, 485*

---

[1] The propriety of that holding is not before us and we express no opinion on it.

[2] *World of Sleep, Inc. v. La-Z-Boy Chair Co., 756 F.2d 1467 (10th Cir. 1985)*, certiorari denied, *474 U.S. 823, 88 L. Ed. 2d 63, 106 S. Ct. 77*, on which Bi-Rite heavily relies (Br. 28, 29, 31, 32; Reply Br. 10, 11, 12) antedated *Business Electronics* and is no longer followed in the Tenth Circuit in cases involving refusal to deal with a distributor. See *Westman Commission Co. v. Hobart International, Inc., 796 F.2d 1216, 1223-1224 (10th Cir. 1986)*, certiorari denied, *486 U.S. 1005, 100 L. Ed. 2d 192, 108 S. Ct. 1728*, which adopted the rule later followed in *Business Electronics*.

U.S. at 726-727. Here, as in *Business Electronics*, no evidence was adduced to show that the three defendants had agreed on the prices to be charged by Decatur and Noble-Whitley. Bi-Rite's reliance on Monsanto Co. v. Spray-Rite Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775, is misplaced since in that case there was substantial direct evidence of price agreements, id. at 765, as well as evidence that the defendants in that case had "an understanding that prices could be maintained, and that price-cutters would be **[**7]** terminated." Id. at 768 n. 13.

While Bi-Rite acknowledges that Farm Bureau did not suggest retail prices to its members, it contends that an attempt to stabilize prices violates Section 1 of the Sherman Act, and it relies on four arguments to show that Farm Bureau and its members agreed to stabilize prices. Each of these arguments was correctly **[**8]** rejected below. First, the district court found that a July 1982 telephone conversation between a representative of Farm Bureau and a representative of Bi-Rite failed to "show that [Farm Bureau] demanded that Bi-Rite charge a certain price or that [Farm Bureau] even suggested a certain price to Bi-Rite and it certainly does not reflect any agreement between [Farm Bureau] and the other defendants." 720 F. Supp. at 1374. Second, it found that member cooperatives' complaints to Farm Bureau about Bi-Rite's prices were "not indicative of an * * * agreement to set prices." *Id.* Third, the court rejected Bi-Rite's attempt to distinguish *Business Electronics*. Bi-Rite argued that the Court in *Business Electronics* was concerned to protect the ability of dealers to terminate retailers who were expected to provide services to customers but who chose to "free-ride" on the services of the dealers' other retailers to support their price cuts. Business Electronics, 485 U.S. at 728. Since Farm Bureau did not require any of its members to provide services to customers, Bi-Rite argued, the concern that led the Court to reject *per se* illegality in **[**9]** *Business Electronics* was absent. The district judge correctly noted that many legitimate factors may lead to a decision to terminate a price-cutter. 720 F. Supp. at 1374. Thus the absence of a potential free-rider problem in this case is not determinative. Finally, the court found that there was insufficient evidence to support Bi-Rite's assertion that the defendants engaged in resale price maintenance. Id. at 1374-1375.

Having rejected Bi-Rite's contention that the defendants' actions were *per se* illegal, Judge Barker applied a rule of reason analysis to determine whether the defendants' actions imposed an unreasonable restraint on competition. ***HN4***[] Under that analysis the plaintiff must show that the challenged restraint has an adverse impact on competition in the relevant market. Monsanto, 465 U.S. at 762. Bi-Rite has made no effort to satisfy the rule of reason, relying entirely on its *per se* argument. All parties agree that the relevant product market consists of petroleum products sold at the retail service station level. While **[**10]** Bi-Rite alleges that the geographic market is essentially local, the defendants have defined the geographic market as the petroleum product market of Indiana. Because of its all or **[*204]** nothing reliance on a *per se* analysis Bi-Rite has not offered any evidence that the geographic market is not statewide. Farm Bureau's refinery had a capacity of 21,670 barrels a day compared to a statewide capacity of 466,000 barrels. Its refinery was one of five in the state. Decatur sold at retail only 167 gallons per day during the July 1982-March 1983 period and Noble-Whitley even less. Accordingly, the district court correctly concluded that the defendants did not have the market power to control output, prices, or competition. 720 F. Supp. at 1376. It follows that any restraint on competition was reasonable and that summary judgment was therefore appropriate under Section 1 of the Sherman Act and the like Indiana law provisions.

Monopolization

In addition to the Sherman Act Section 1 charge, Bi-Rite has claimed that the defendants conspired to monopolize the sales of gasoline in the area in question in violation of Section 2 of the Sherman Act and the Indiana **[**11]** Code. [3] Although Bi-Rite terminated its relationship with its prior suppliers when it commenced to do business with Farm Bureau, the district court found Bi-Rite had resumed its relationship with those suppliers after the cut-off by Farm Bureau for failure to pay. Since no long-term contract existed between Farm Bureau and Bi-Rite, there was nothing illegal in Farm Bureau's refusal to continue sales to Bi-Rite after it stopped payment. The court further found that there was nothing illegitimate in Farm Bureau's obtaining a state court judgment ordering Bi-Rite to pay its overdue account to Farm Bureau. That judgment was affirmed by the Indiana Court of Appeals, with the Indiana Supreme Court declining to review it. When Farm Bureau sought execution on the judgment, Bi-Rite filed a Chapter

---

[3] Plaintiff has abandoned its charge that defendants *attempted* to monopolize the relevant market.

11 petition in bankruptcy in another state court action, where the Indiana court found there was never a long-term agreement between Bi-Rite and Farm Bureau. This judgment was also affirmed by the Indiana Court of Appeals, again showing the worthlessness of Bi-Rite's position that such an agreement had been breached for monopolistic reasons.

[12]** As the court below held, there was no evidence of defendants' intent to monopolize, nor was there evidence that the defendants' activities had a substantial effect on commerce. Bi-Rite simply failed to show that "the defendants conduct was without legitimate business justification." *720 F. Supp. at 1378*. Because the evidence did not permit an inference of an intent to monopolize, summary judgment for the defendants under *Section 2* of the Sherman Act and the corresponding portion of the Indiana Code was appropriate.

Conspiracy to Close Down Bi-Rite

In addition to the federal and state ***antitrust law*** claims discussed above, Bi-Rite also asserted that the defendants conspired to compel it to cease business in violation of *Indiana Code 24-1-4-1*. We agree with the district court that there was no evidence that the defendants conspired to compel Bi-Rite to go out of business. Indeed after Farm Bureau terminated Bi-Rite as a customer for non-payment of debt, Bi-Rite recommenced business with its former suppliers. There has been no showing that the defendants caused Bi-Rite to file for bankruptcy. As with the other alleged statutory violations, summary judgment for the **[**13]** defendants was warranted on this charge.

Judgment Affirmed.

Opinion

[*1099] ORDER

JOSEPH F. ANDERSON, JR., UNITED STATES DISTRICT JUDGE

In this case, plaintiff is a distributor of soft drinks including Buffalo Rock Gingerale, Snapple, Grapico, and Cajun Cola in seven South Carolina counties designed in the complaint as "plaintiff's distribution area". These counties include Anderson, Greenville, and the surrounding counties of Oconee, Pickens, Laurens, Abbeville and Greenwood. The defendants include the distributors of Coca-Cola and Pepsi-Cola in Anderson and Greenville, together with the Coca-Cola and Pepsi-Cola parent companies. Also included as defendants are three chain stores, Bi-Lo, Fast Fare and Pantry, selling Coke and Pepsi products in the Anderson-Greenville area.

Plaintiff filed his complaint in Greenville County Court of Common Pleas on October 4, 1989, stating two causes of action under state law. Included in the complaint were allegations of various anti-competitive marketing and distribution practices and agreements between and among the defendants which were allegedly undertaken by defendants pursuant to a conspiracy "to eliminate competition within Plaintiff's distribution area and throughout the southeastern United States." Complaint, **[**2]** para. 15. Also included were allegations of a price-fixing conspiracy within plaintiff's distribution area as evidenced by guilty pleas entered by some defendants in federal court. Complaint, para. 20.

For a first cause of action, plaintiff contends that defendants' acts constitute unfair trade practices and unfair methods of competition under the South Carolina Unfair Trade Practices Act, [S.C. Code Ann. § 39-5-10 et seq](#). (Law. Co-op. 1988) ("UTPA"). The second count of plaintiff's complaint alleges a common law civil conspiracy. No federal claim was expressly pleaded. Defendants, relying on the "artful pleading doctrine," noticed removal on the basis of federal question jurisdiction, contending that the claims asserted, although pleaded under state law, were essentially federal in nature and hence removable under *28 U.S.C. §§ 1441(a)* and *(b)*. Specifically, defendants contend that the claims asserted in the complaint, if they are legally cognizable at all, should properly be brought *only* under the federal antitrust laws and must be judged under federal antitrust standards. The matter is now before the court on plaintiff's motion to remand for lack of federal subject matter **[**3]** jurisdiction.

Although plaintiff is the moving party in this request for remand, it is elementary that defendants retain the burden of establishing that the underlying action is properly removed. 14A Wright, Miller & Cooper, Federal Practice and Procedure § 3721 (1985) (hereinafter "Wright & Miller"); *Baucom v. Pilot Life Ins. Co., 674 F. Supp. 1175 (M.D.N.C. 1987)*.

The sole basis for removal in this case is federal question jurisdiction, as there is not complete diversity between the parties. The existence of a federal question sufficient to support removal normally turns on the well-pleaded allegations of the **[*1100]** complaint. *Great Northern Railway Co. v. Alexander, 246 U.S. 276, 62 L. Ed. 713, 38 S. Ct. 237 (1918)*. Where plaintiff alleges facts that will support claims arising under both state and federal law, plaintiff normally is free to ignore the claims arising under federal law and "pitch his claim" on state grounds, thereby precluding removal on the basis of federal question jurisdiction. *Franchise Tax Board v. Construction Laborers Vacation Trust, 463 U.S. 1, 22, 77 L. Ed. 2d 420, 103 S. Ct. 2841 (1983)*. However, this "master of the complaint" rule must be balanced with the fact that courts must be cautious in denying defendants **[**4]** access to a federal forum since under *28 U.S.C. § 1447(d)*, remand orders are generally not reviewable. 14A Wright & Miller, § 3721. To this end, the "artful pleading" doctrine has developed as an exception to the rule limiting the court's examination to the face of the complaint when it appears the plaintiff seeks to conceal the federal nature of his claim by fraud or obfuscation. *Salveson v. Western States Bankcard Ass'n., 525 F. Supp. 566, 572 (N.D. Calif. 1981)*. In determining whether a complaint is "artfully pleaded," the court may look behind it, or "peek," to ascertain facts that would appear in a well-pleaded complaint. *In re Wiring Device Antitrust Litigation, 498 F. Supp. 79 (E.D.N.Y. 1980)*.

Application of the artful pleading doctrine is most appropriate in cases where federal law altogether preempts and supplants state law, but plaintiff seeks to avoid the effect of preemption by pleading only state causes of action. *See, Avco Corp. v. Aero Lodge No. 735, International Association of Machinists, 390 U.S. 557, 20 L. Ed. 2d 126, 88 S. Ct. 1235 (1968)*. In the area of antitrust and unfair trade practices, Congress has never expressed any intent to occupy the regulated area exclusively, and the courts **[**5]** have inferred none. On the contrary, the Fourth Circuit has clearly rejected the idea that federal ***antitrust law*** preempts application of the South Carolina UTPA. *Bostick Oil Co. v. Michelin Tire Corp., Com. Div., 702 F.2d 1207, 1219* (4th Cir.) *cert. denied*, *464 U.S. 894, 78 L. Ed. 2d 232, 104 S. Ct. 242 (1983)*; *Itco Corporation v. Michelin Tire Corp., Com. Div., 722 F.2d 42, 48, n. 9* (4th Cir.) *cert. denied*, *469 U.S. 1215, 84 L. Ed. 2d 337, 105 S. Ct. 1191 (1983)*. The court therefore rejects defendants' argument that the complaint's repeated use of antitrust conspiracy terminology and the fact that the practices at issue have traditionally been the subject of federal antitrust challenges reflect the essentially federal nature of plaintiff's claims. By the express terms of the statute, UTPA prohibits both unfair or deceptive acts or practices (consumer protection) *and* anticompetitive conduct (antitrust proscription). [1] The fact that antitrust elements and concepts may be involved does not necessarily make it a federal antitrust case. Federal question does not exist simply because the subject matter of the action could give rise to a federal law claims as well as a state law claim. *Salveson, supra.*

[6]** The artful pleading doctrine has also been applied in the antitrust area where plaintiff first files a lawsuit alleging federal claims and then, after dismissal, seeks to recast those claims under state law, *Federated Department Stores, Inc. v. Moitie, 452 U.S. 394, 101 S. Ct. 2424, 69 L. Ed. 2d 103 (1981)* and where plaintiff, by

---

[1] South Carolina adopted Alternative Form Number 1 of the Unfair Trade Practices and Consumer Protection Act. Day, *The South Carolina Unfair Trade Practices Act: Sleeping Giant Or Illusive Panacea*?, 33 S.C.L.Rev. 479 (1982) (hereinafter "*Panacea*"). As noted by Professor Day, comments to the model legislation explain that this alternative "enables the enforcement official to reach not only deceptive practices that prey upon consumers, but also unfair methods that injure competition. This form will reach price fixing arrangements, boycotts by suppliers, coercion of retailers, and other trade restraints which tend to create monopolies and enhance prices." (citation omitted) The other two alternatives in the model act are limited to consumer protection. *Id*., p. 480, n. 7.

failing to seek remand, has acquiesced in defendant's characterization of its claims as federal, *Three J Farms, Inc. v. Alton Box Board Co*., 1979-1 CCH Trade Cas. para. 62,423 (D.S.C. 1978), *rev'd. and remanded on other grounds*, 609 F.2d 112 (4th Cir. 1979), *cert.* **[*1101]** *denied*, *445 U.S. 911, 63 L. Ed. 2d 327, 100 S. Ct. 1090 (1980)*. In both of these instances, the claims were made federal by plaintiff's own conduct and the courts refused to allow plaintiff to escape the consequences of that conduct to defendant's prejudice. *See,* Salveson, 525 F. Supp. at 577. In the present case, plaintiff has taken no such circuitous action nor has plaintiff failed to timely move to remand his case.

More troublesome is defendants' argument that the involvement of interstate commerce in this action precludes application of the State UTPA. Defendants argue that while plaintiff's business may be intrastate in scope, the defendants' **[**7]** business operations are either regional or national in scope, and where a complaint challenges marketing practices and techniques which are utilized on a multi-state basis, it is important that federal antitrust concepts be applied to achieve uniformity, otherwise:

> differing state regulation, although not conflicting, (would require) the enterprise to comply with the strictest standard of several states, (and this) extra-territorial effect which the application of a particular state law would exact constitutes, absent a strong state interest, an impermissible burden on interstate commerce.

Flood v. Kuhn, 443 F.2d 264, 267 (2d Cir.), *aff'd*., *407 U.S. 258, 32 L. Ed. 2d 728, 92 S. Ct. 2099 (1972)*.

Defendants rely on two cases filed under South Carolina's ***antitrust law*** where the courts held that plaintiff's antitrust claims based on transactions involving interstate commerce were federal in nature. *In re Wiring Device, Three J Farms, Inc., supra*. Both of these cases are based on an earlier state case which limited the application of South Carolina's state ***antitrust law*** to solely intrastate activity. *State v. Virginia-Carolina Chemical Co., 71 S.C. 544, 51 S.E. 455, 461 (1905)* (state ***antitrust law*** **[**8]** cannot regulate imported goods). Defendants contend that the scope of UTPA should be subject to the same limitation and governed by the same rules applicable to antitrust claims.

While the court notes that a state statute may not impose an undue burden on interstate commerce, the court does not find defendants' arguments in this instance persuasive. First, these two cases, which involve the scope of state ***antitrust law*** and not the scope of state UTPA, have been criticized by at least one commentator as misreading the holding of *Virginia-Carolina Chem. Co. See, Panacea*, p. 503, fn. 159.

More on point and specifically addressing the scope of UTPA, the Fourth Circuit in *Itco* rejected defendant's suggestion that application of North Carolina's UTPA to defendant's multi-state conduct offended the *commerce clause*. [2] The *Itco* court stated:

> Absent some reason to believe that the North Carolina act is an attempt directly to regulate interstate commerce, and is not an act designed to address primarily local concerns which happens to have an occasional incidental, but not excessive effect upon interstate commerce, we perceive no cause for constitutional concern.

Itco, 722 F.2d at 48, n. 9. **[**9]** As the *Itco* court recognized, only where the burden imposed on interstate commerce is excessive in relation to the local interests served by the state will the *commerce clause* be offended. Following *Itco's* lead, a federal court in North Carolina upheld application of that state's UTPA to concerted multi-state conduct which resulted in injury to North Carolina residents. *American Rockwool, Inc. v. Owens-Corning Fiberglas, 640 F. Supp. 1411 (E.D.N.C. 1986)*. The court's reasoning bears repeating:

> Section 75-1.1 is designed, in part, to address the very real local concern that North Carolina businesses not be victimized by unfair methods of competition. When applied to concerted multi-state conduct resulting in injury to North Carolina residents, the statute may have an **[*1102]** incidental interstate effect, but that effect certainly is not excessive in light of the local interests served and its minimal burden upon other states . . . . Any time a single state's law is applied to multi-state conduct, there is *some* effect on interstate commerce in

[2] South Carolina's UTPA closely parallels North Carolina's Act and has been interpreted interchangeably by the courts.

> the broadest sense, but that effect rarely burdens interstate conduct to a constitutionally impermissible extent. In the **[**10]** instant case, § 75-1.1 only incidentally affects interstate commerce while serving substantial local interests.

Id., at 1428.

South Carolina's UTPA is not limited to in-state conduct by its own terms nor does it contain on its face any undue burdens on interstate commerce. The court believes that it's purpose and intent is to hold parties causing injury in South Carolina accountable in the courts of this state, insofar as possible. The court further determines that, under the facts of the present action, application of the state UTPA does not run afoul of the *commerce clause*.

If federal jurisdiction is in doubt, such doubt must be resolved in favor of state court jurisdiction and the case remanded. *Baucom, supra*; *Lawyers Title Insurance Corp. v. Pioneer National Title Insurance Corp., 600 F. Supp. 402 (D.S.C. 1984)*. Plaintiff has apparently chosen to forego his federal remedies to pursue **[**11]** relief in state court. He is so entitled, and the case is hereby remanded for lack of subject matter jurisdiction pursuant to *28 U.S.C. § 1447(c)*.

IT IS SO ORDERED.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN1[ ] **Preclusion of Judgments, Law of the Case**

A decision of a factual or legal issue by an appellate court establishes the law of the case and must be followed in all subsequent proceedings in the same case in the trial court or on a later appeal in the appellate court.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN2[ ] **Sherman Act, Claims**

When an antitrust plaintiff relies on circumstantial evidence of conscious parallelism to prove a claim under *§1* of the Sherman Anti-Trust Act, *15 U.S.C.S. §1*, he must first demonstrate that the defendants' actions were parallel.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

"Monopoly" is the term used to describe the situation where there is only one seller of a product, monopsony where there is only one buyer.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN4[] **Actual Monopolization, Anticompetitive & Predatory Practices**

An "oligopsony" is a market situation in which each of a limited number of buyers is strong enough to influence the market but not strong enough to ignore the reaction to such influence by his competitors. An oligopsonist is one of such dominant buyers.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN5[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Whereas a monopsonist has an incentive to limit his purchases in order to reduce his input costs and thereby increase his profits, an oligopsonist that is attempting to increase its position in the market would, like an oligopolist in a seller's market, initiate a competitive, or perhaps predatory, campaign of price and/or non-price competition. Alternatively, an oligopsonist that is satisfied with its market share could form an alliance with other oligopsonists in the relevant market and attempt to depress prices and increase profits.

Opinion

[*511] CLARK, Chief Judge

I. Introduction

Meat Price Investigators Association and several individual cattlemen **[**2]** (collectively "the cattlemen") appeal the district court's grant of summary judgment in favor of IBP, Inc. (formerly Iowa Beef Processors, Inc.), and Excel Corporation (collectively "the packers"), and the National Provisioner, Inc. (the "Yellow Sheet"). On appeal, the cattlemen assert that material questions of fact remain unresolved regarding their claims under *§§ 1* and *2* of the Sherman Anti-Trust Act, *15 U.S.C. §§ 1* and *2*. We affirm.

II. Facts

Because the history of this case has been published in part four times, *see In re Beef Industry Antitrust Litigation, 600 F.2d 1148 (5th Cir. 1979)*, *cert. denied*, *449 U.S. 905, 101 S. Ct. 280, 66 L. Ed. 2d 137, 101 S. Ct. 281 (1980) (BIAL I); In re Beef Industry Antitrust Litigation, 542 F. Supp. 1122 (N.D.Tex. 1982)* (Higginbotham, J.), *aff'd*, *710 F.2d 216 (5th Cir. 1983)*, *cert. denied*, *465 U.S. 1052, 104 S. Ct. 1326, 79 L. Ed. 2d 721 (1984) (BIAL II); In re Beef Industry Antitrust Litigation, 713 F. Supp. 971 (N.D.Tex. 1989)* (Kazen, J.), a summary of the facts is sufficient here. In 1977 this suit was filed **[**3]** by various sellers of "fed cattle" against major beef packers, beef retailers, and the publisher of a commodities price reporting service. Fed cattle are steers and heifers which are raised and prepared specially for human consumption, usually as "U.S.D.A. choice or good" beef. The cattlemen sell most of their fed cattle to packers. Most packers slaughter and fabricate the beef, while some packers buy preslaughtered beef for fabrication. The packers then sell the beef, either as entire carcasses or as "boxed beef", collections of various beef cuts, to retail marketers such as grocery **[*512]** stores and hotel chains. The suit alleges that the retailers and packers conspired in a vertical and horizontal restraint of trade which stabilized and depressed fed cattle prices.

The cattlemen allege that this restraint took the form of the following price-fixing scheme: The National Provisioner publishes a daily price for beef products and other commodities in its publication, the Yellow Sheet. The Yellow Sheet bases the price it publishes upon reports of recent commodity sales, although the published price is not strictly an average of all reported sales. The packers use the Yellow Sheet **[**4]** price to determine the price they offer the cattlemen for fed cattle. At the same time, retailers use the Yellow Sheet price to compute the price they will pay packers for fabricated beef. By common use of the Yellow Sheet price, packers are able to stabilize and depress the price of live beef while retaining a healthy profit margin because they know the retailers also use the Yellow Sheet price as a price base. In this way the depressed beef prices are actually "passed on" from the retailers to the packers to the cattlemen in a reversal of the more common situation where price increases are passed on from wholesalers to retailers to consumers. The cattlemen relied on this pass-on theory for standing to sue the retailers, with whom they had no direct business dealings. The district court, Higginbotham, J., rejected this theory, *citing Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)* and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1976)*, and entered summary judgment for the retailers. *See 542 F. Supp. 1122*. We affirmed in *BIAL II, 710 F.2d 216*. **[**5]**

This appeal involves the packer phase of the identical price-fixing allegation. The cattlemen allege that the packers violated *§ 1* of the Sherman Act by using an information exchange (the Yellow Sheet) and consciously parallel pricing to depress live cattle prices. They also allege that IBP violated *§ 2* of the Sherman Act by attempting to monopolize both the market for live cattle and the market for processed beef and that IBP and Excel conspired to monopolize the fed cattle market.

III. The *§ 1* Claim

A. The Contentions

Central to the cattlemen's *§ 1* claim is the allegation that IBP and Excel used the daily Yellow Sheet reported price as the basis for their live cattle purchasing price. The existence of the Yellow Sheet, the cattlemen contend, allows the packers to eliminate competition between themselves in buying cattle. They assert that the information exchange is illegal under *United States v. Container Corp. of America, 393 U.S. 333, 89 S. Ct. 510, 21 L. Ed. 2d*

526 (1969), and that by use of the Yellow Sheet IBP and Excel, which hold significant market shares in the cattle procurement market, are able to depress live cattle prices through tacit **[**6]** collusion.

The packers respond that, as the district court found, Container Corp. does not apply here because the information given to the Yellow Sheet was public information which could be purchased by subscription and used by cattlemen, packers, and retailers alike. They also contend that the cattlemen have offered no evidence of parallel pricing on the part of IBP and Excel which cannot be explained as independent business activity. Because the cattlemen adduced no evidence that "'tended to exclude the possibility' that the alleged conspirators acted independently," *Matsushita Electric Industrial Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 1356, 89 L. Ed. 2d 538 (1986)*, *quoting* *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 1470-71, 79 L. Ed. 2d 775 (1984)*, the packers and the National Provisioner assert that the district court properly entered summary judgment on their behalf.

B. The Law of the Case

We have stated: ***HN1***[] "a decision of a factual or legal issue by an appellate court establishes **[**7]** the 'law of the case' and must be followed in all subsequent proceedings in the same case in the trial court or on a **[*513]** later appeal in the appellate court." *Goodpasture, Inc. v. M/V Pollux, 688 F.2d 1003, 1005 (5th Cir. 1982)*, *cert. denied*, *460 U.S. 1084, 103 S. Ct. 1775, 76 L. Ed. 2d 347 (1983)*, *quoting* *White v. Murtha, 377 F.2d 428 (5th Cir. 1967)*; *see* *Lyons v. Fisher, 888 F.2d 1071, 1074 (5th Cir. 1989)*, *cert. denied*, *495 U.S. 948, 110 S. Ct. 2209, 109 L. Ed. 2d 535 (1990)*. In *BIAL II*, the appeal of the summary judgment entered on behalf of the retailers in this litigation, the use of the Yellow Sheet price by the packers was a key issue. In determining that the Yellow Sheet was only one of several factors influencing the packers' pricing activity, we stated:

> The defendant's overwhelming proof demonstrates that other factors beyond the Yellow Sheet quotations influenced the packers' pricing decision. Specifically, the proof showed that the following factors influenced packers' pricing decisions:
>
> (1) The packers' individual needs in regard to obtaining a minimum **[**8]** amount of cattle each week. This was necessitated by labor contracts which required that if the packers opened their doors on Monday, they had to pay their employees for the week, regardless of whether they worked.
> (2) Temporary local market conditions such as the weather or an over or undersupply of beef. This forced the packers to bid over or under the Yellow Sheet price.
>
> (3) Price competition among the packers.
>
> (4) The beef by-product market (i.e. the sale of hides and nonedible parts of cattle). This market was highly competitive and forced the packers to pay prices over and under the Yellow Sheet Price.

710 F.2d at 219-220. The extent of the packers' reliance on the Yellow Sheet in pricing was critical to the claim that the retailers were part of a pass-along price-fixing scheme in which the corresponding packer violations were pivotal. Likewise, proof that the Yellow Sheet has been used by the packers as a price-fixing mechanism is essential to the *§ 1* claim before us now. This is true whether the cattlemen rely on a theory of illegal information exchange or conscious parallelism in pricing, for the elements of the scheme presented in *BIAL* **[**9]** *II* are merely the vertical correspondents of the horizontal price-fixing scheme alleged here. See *713 F. Supp. at 974*. We are bound by the finding of the *BIAL II* panel that the Yellow Sheet was only one of a number of constantly varying factors used by the packers to establish their daily price for fed cattle. Standing alone, the information provided by the Yellow Sheet is not the type of determinative pricing information which enables price-fixing. *Cf.* *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)* (The prices exchanged were current actual prices offered to specific customers.); *Container Corp., 393 U.S. 333, 89 S. Ct. 510, 21 L. Ed. 2d 526 (1969)* (The prices exchanged were the latest actual prices offered.); *Maple Flooring Mfrs. Assn. v. United States, 268 U.S. 563, 45 S. Ct. 578, 69 L. Ed. 1093 (1924)* (The prices exchanged were the average costs of goods categorized by size.) Thus, to warrant a reasonable inference of tacit collusion or conscious parallelism from circumstantial evidence alone, *see* *Matsushita, 475 U.S. at 587-88, 106 S. Ct. at 1356-57*, **[**10]** it became necessary not only for the cattlemen to produce evidence that the pricing activity of the packers was consciously parallel, but also that the other pricing factors established by the *BIAL II* panel were considered in and controlled by the packers' tacit collusion. The cattlemen fail on both points.

The cattlemen presented insufficient evidence to have persuaded a reasonable jury that the common use of the Yellow Sheet caused the prices paid by IBP and Excel for fed cattle to be substantially identical. The cattlemen point us to no comparison of pricing activity which demonstrates a three-way correlation between the prices quoted by the Yellow Sheet, those paid to cattlemen by IBP, and those paid to cattlemen by Excel. Instead, they attempt to show that both packers used the Yellow Sheet price when selling beef to each other, **[*514]** for individual corporate bookkeeping purposes when making intracorporate transfers of beef from a packer's slaughtering division to its fabrication division, and for assessing the job performance of its cattle buyers. These pricing activities do not reflect the prices actually paid to cattlemen.

The cattlemen do cite a report by Dr. **[**11]** Richard Hoyt, an economic consultant, which states that the prices paid by IBP for fed cattle and the prices reported by the Yellow Sheet for choice, yield-three steers, six to seven hundred pounds, showed a 97% correlation between 1975 and 1978. This report is inconsequential for two reasons. First, the report merely shows that when IBP raised or lowered its live cattle prices, the Yellow Sheet correspondingly reported a higher or lower market price for processed beef. Only if the Yellow Sheet was incorrect in its reporting or IBP was asking a price for processed beef which was inconsistent with the market as a whole would any different situation arise. Such pricing activity is not evidence of price fixing. Rather, it shows that the pricing activity of a major packer such as IBP affected the market as one would expect. Second, the figures compared by Hoyt were weekly carcass costs for IBP and weekly averages of the Yellow Sheet prices, not individual sales records of IBP or daily Yellow Sheet prices. Such gross price averaging is not significant in a market where, as the cattlemen assert, a two cent per pound difference in price can make a large difference in profits and losses to **[**12]** both cattlemen and packers. Hoyt's method of comparison could show a strict price correlation even for weeks in which the IBP processed beef price and the Yellow Sheet price differed markedly on given days. The report, therefore, constitutes no evidence of a correlation between the Yellow Sheet quotes and IBP prices for individual transactions. The statistics in the report do not purport to consider any contemporaneous pricing activity of Excel.

The cattlemen's evidence was also insufficient to have persuaded a reasonable trier of fact that the packers' responses to additional pricing factors were ever collusive. The cattlemen present no appellate argument regarding the effects on the packers' daily pricing activity of the competitive by-product market, labor contracts, or local market conditions such as weather and accessibility.

C. Conclusion

HN2[] When an antitrust plaintiff relies on circumstantial evidence of conscious parallelism to prove a *§ 1* claim, he must first demonstrate that the defendants' actions were parallel. *See, e.g.,* *Park v. El Paso Bd. of Realtors, 764 F.2d 1053, 1060 (5th Cir. 1985)*, **[**13]** *cert. denied*, *474 U.S. 1102, 106 S. Ct. 884, 88 L. Ed. 2d 919 (1986)*. The cattlemen have not done this. Nor have they shown that the prices of IBP and Excel were identical, or nearly so, for any series of individual transactions. The failure of the cattlemen to account for the additional pricing factors in their theory of conscious parallelism is also fatal. The existence of other significant pricing factors, concerning which there is not even the contention of collusion, shows that the pricing activity of the packers was "as consistent with permissible competition as with illegal conspiracy." *Matsushita, 475 U.S. at 588, 106 S. Ct. at 1356*. Our prior decision that these factors influenced packer pricing and the cattlemen's failure to produce any different substantial evidence on these factors during the present summary judgment proceedings, *see* *Lyons, 888 F.2d at 1074*, confirm the correctness of the district court's summary judgment order in favor of all defendants as to the *§ 1* claim.

IV. The *§ 2* Claim

The cattlemen claim that IBP has illegally acquired monopoly power in the boxed beef sales market and monopsony power in **[**14]** the fed cattle procurement market. [1] Antithetically, the cattlemen also claim that **[*515]** IBP and Excel have misused their power as oligopsonists [2] in a conspiracy to control the procurement market. The contradictions of theory and proof between these claims and the lack of evidence supporting the cattlemen's allegations make all of their *§ 2* allegations untenable.

[15]** First, the cattlemen fail to recognize that IBP cannot be a monopsonist and an oligopsonist at the same time. Either IBP is the only significant buyer of fed cattle or it is not. More importantly, the cattlemen fail to account for the fact that the reactions of a monopsonist to market forces are likely to be very different from the reactions of an oligopsonist in a similar situation. ***HN5***[] Whereas a monopsonist "has an incentive to limit his purchases in order to reduce his input costs and thereby increase his profits," Posner & Easterbrook at 148, an oligopsonist that is attempting to increase its position in the market would, like an oligopolist in a seller's market, [3] initiate a competitive, or perhaps predatory, campaign of price and/or non-price competition. Alternatively, an oligopsonist that is satisfied with its market share could form an alliance with other oligopsonists in the relevant market and attempt to depress prices and increase profits. *See* R. Posner, ***Antitrust Law****: An Economic Perspective* 39-53 (1976) (afterwards "*Economic Perspective*"). *See generally* *Interstate Circuit v. United States, 306 U.S. 208, 223, 59 S. Ct. 467, 472-73, 83 L. Ed. 610 (1939)* **[**16]** (emphasizing a parallel change in the business procedure of competitors as evidence of collusion); Page, *The Chicago School and the Evolution of Antitrust: Characterization, Antitrust Injury, and Evidentiary Sufficiency*, *75 Va.L.Rev. 1221 (1989)*; Sullivan, *The Viability of the Current Law on Horizontal Restraints*, *75 Calif.L.Rev. 835 (1987)*.

Under these alternative possibilities, in order to demonstrate that IBP had obtained monopsony power or had become an oligopsonist conspiring with Excel to depress prices, the cattlemen would have had to show that IBP reduced its purchases of and its prices for fed cattle in order to take illegal advantage of this position. See **[**17]** H. Hovenkamp, *Economics and Federal* ***Antitrust Law*** 17-18 (1985); Posner & Easterbrook at 148-150. This approach would be consistent with the tack taken by the cattlemen in their *§ 1* claim. On the other hand, to demonstrate that IBP was a predatory oligopsonist seeking to increase its market share through an illegal form of competition, the cattlemen would be required to show predatory or exclusionary conduct on the part of IBP.

The cattlemen do contend that IBP attempted to drive its competitors out of the fed cattle procurement market by paying a higher price for fed cattle than the market suggested. The cattlemen cite statements by Bagley, a former assistant head cattle buyer of IBP, to the effect that IBP at one time planned to cut processing costs so that it could pay higher prices for live cattle. According to Bagley, this predatory pricing would result in IBP's domination of the cattle procurement market. The case against IBP as a predatory oligopsonist is completely undercut, however, by the cattlemen's own evidence, cited on numerous occasions, that fed cattle prices over the past ten years have remained stable at a depressed level. The cattlemen presented no evidence **[**18]** that IBP ever paid a predatory price (in this case, a price higher than that which would allow the packer to make a profit) for fed cattle. Thus, the cattlemen's allegations of predatory activity by IBP in the cattle procurement market was not supported.

[*516] The evidence that live cattle prices have remained stable at a low level does fit the cattlemen's alternative allegations that IBP either has monopsony power or is a conspiring oligopsonist seeking to depress prices and retain its current market share. But other factors make these allegations untenable. If IBP had monopsony power, it

---

[1] ***HN3***[] "Monopoly is the term used to describe the situation where there is only one seller of a product, monopsony where there is only one buyer." R. POSNER & F. EASTERBROOK, ANTITRUST: CASES, ECONOMIC NOTES AND OTHER MATERIALS 148 (2d ed. 1981) (afterwards "Posner & Easterbrook").

[2] ***HN4***[] An oligopsony is "a market situation in which each of a limited number of buyers is strong enough to influence the market but not strong enough to ignore the reaction to such influence by his competitors." An oligopsonist is one of such dominant buyers. WEBSTER'S THIRD INTERNATIONAL DICTIONARY (UNABRIDGED) 1572 (1966).

[3] An oligopoly is "a market situation in which each of a limited number of producers is strong enough to influence the market but not strong enough to disregard the reaction of his competitors." An oligopolist is one of such dominant producers. WEBSTER'S THIRD INTERNATIONAL DICTIONARY (UNABRIDGED) 1572 (1966).

would take illegal advantage of that situation by reducing its purchases of fed cattle in order to reduce its costs and make a higher profit on each head of cattle processed. See Hovenkamp at 17-18; Posner & Easterbrook at 148-49. This would especially be true if, as the cattlemen assert, IBP also held an oligopolist's position as a seller of processed beef. IBP would then have been able to compound its monopoly profits by reducing its purchases of fed cattle, and thus its procurement costs, while also reducing its output in the processed beef market. The lowered output would again decrease **[**19]** IBP's marginal cost and permit an increase in the price IBP could charge for its processed beef. The amount of any additional price IBP could charge would depend on the market share it commanded. See Hovenkamp § 4.2; Posner, *Economic Perspective* 39-77. The difficulty in proving this theory is that the cattlemen produced no evidence that IBP actually has monopsony power. Indeed, their expert, Marion, stated that the cattle procurement market is shared by four major packers. Nor have the cattlemen shown that IBP ever significantly reduced its purchases of fed cattle or its output of processed beef.

The possibility remains that IBP and Excel acted as conspiring oligopolists to stabilize and depress prices in the cattle procurement market. The cattlemen rely on their *§ 1* evidence of pricing collusion and information exchange to establish a conspiracy between IBP and Excel to monopolize (or oligopsonize) the procurement market. In our discussion of the *§ 1* claim, however, we noted that the cattlemen's evidence of pricing collusion between IBP and Excel does not carry the summary judgment burden placed on an antitrust plaintiff by *Matsushita*. Additionally, viewing the fed cattle **[**20]** procurement market as a whole, this allegation is economically unfeasible in light of Marion's statement that as of 1982 the market contained four major packers and 471 smaller packers. Any attempt at conspiracy between only two of those packers to depress fed cattle prices could not succeed, because the other packers, especially the other two major competitors, could raise their own fed cattle prices a small amount, effectively buy away the fed cattle that had previously been the source of sales to IBP and Excel, and leave IBP and Excel with a smaller market share. This would actually spur competition by forcing IBP and Excel to respond by raising their own prices for fed cattle. This occurrence would fit the standard model of cartelization and cartel cheating which apparently destroyed many cartels even before the antitrust laws were enforced. See Posner, *Economic Perspective* at 52-55; Page at 1248-49.

The cattlemen's *§ 2* claims against IBP and Excel are inconsistent and unsupported by any summary judgment evidence. Much of the evidence produced by the cattlemen to support the theory of one claim defeats their alternative claim. Based on the entire summary judgment record, **[**21]** the conduct of IBP and Excel is at least "as consistent with permissible competition as with illegal conspiracy." *Matsushita, 475 U.S. at 588, 106 S. Ct. at 1356*. The district court's grant of summary judgment as to the *§ 2* claim was proper.

V. Conclusion

Because we affirm the district court's summary judgment order, we do not reach the cattlemen's appeal of the denial of class certification.

The judgment of the district court is

AFFIRMED.

HN6[] **Intentional Interference, Elements**

To establish a cause of action for tortious interference with a contract, a plaintiff must demonstrate (1) the existence of a contract; (2) knowledge of that contract on the part of the defendant; (3) that defendant intentionally induced or caused the breach of the contract; (4) that the defendant's act were without justification; and (5) resulting damage to plaintiff.

Business & Corporate Law > Limited Partnerships > Dissolution & Winding Up

Business & Corporate Law > Limited Partnerships > General Overview

HN7[] **Limited Partnerships, Dissolution & Winding Up**

The dissolution of a limited partnership operates to terminate the partnership with respect to all transactions occurring in the future. The partnership continues to exist as to outstanding matters, however, until they are resolved. Included in this period of "winding up" are the performance of existing contracts, the collection of debts or claims due, and the payment of existing debts. A partnership may therefore sue or be sued in its own name following dissolution, but prior to termination, on claims which existed prior to dissolution.

Opinion by: O'CONNOR

Opinion

MEMORANDUM AND ORDER

In these consolidated actions, three public utilities, the Kansas Power and Light Company (KPL), the Kansas Gas and Electric Company (KGE), and Utilicorp United, Inc. (Utilicorp), along with the states of Kansas and Missouri and an industrial user of natural gas, Farmland Industries (Farmland), have filed complaints against five natural gas producers, Amoco Production Company (Amoco), Cities Service Oil and Gas Corporation (Cities), CSG Exploration Company (Exploration), The Moxa Limited Partnership (Moxa) and The Wamsutter Limited **[*4]** Partnership (Wamsutter), and one pipeline, Williams Natural Gas Company (Pipeline).

One or more plaintiffs assert claims against one or more defendants for: (1) violations of the Sherman Antitrust Act; (2) violations of the Racketeer Influenced and Corrupt Organizations Act (RICO); (3) violation of the Kansas Antitrust laws; (4) violations of the Missouri antitrust laws; (5) fraud and conspiracy to defraud; (6) breach of contact; and (7) tortious interference with contract. Now before the court are: (1) motions of KPL and Utilicorp to amend; (2)

defendants' motions for summary judgment; (3) plaintiffs' motions for partial summary judgment; and (4) defendants' motion for summary judgment dismissing the Moxa and Wamsutter limited partnerships.

The court has thoroughly considered the voluminous material submitted by both sides on each motion and is now prepared to rule. Due to the existing constraints of time, however, the court will announce its rulings only in abbreviated form. Should it ultimately become necessary, the court will follow this order with a formal opinion that will include the court's detailed reasoning and analysis on each issue.

MOTIONS TO AMEND

KPL's motion to **[*5]** amend its Third Amended Complaint to (1) include resale contracts in the breach of contract claim and (2) seek relief against all defendants on its federal and state monopolization claims is granted in its entirety. The court finds defendants have not demonstrated sufficient prejudice to preclude the amendment.

Utilicorp's motion to amend its First Amended Complaint, to seek relief against all defendants on its federal and state monopolization claims, and Utilicorp's supplemental motion to amend its First Amended Complaint and its proposed Second Amended Complaint, to delete the phrase "for power plants and other industrial purposes," are granted in their entirety. The court finds defendants have not demonstrated sufficient prejudice to preclude the amendments.

The court orders additional discovery of expert witness Jeffrey Leitzinger be allowed for the limited purpose of discovering his opinion on the section 2, Sherman Act, claims against all defendants.

DEFENDANTS' MOTION FOR SUMMARY JUDGMENT

I. Statute of Limitations

Defendants' motion for summary judgment on all plaintiffs' sections 1 and 2, Sherman Act, claims on this ground is denied in its entirety. First, the court **[*6]** finds plaintiffs have raised genuine issues of material fact regarding the tolling of the statute by defendants' alleged affirmative acts of fraudulent concealment until the facts underlying these claims were disclosed to plaintiffs KPL, Kansas, Missouri, and Farmland on or about January 1983, during the Midwest Gas Users Association proceeding, to plaintiff KG&E on or about March 1985, and to plaintiff Utilicorp on or about November 1983. Under this analysis, the court also finds KPL and KGE's claims against Cities timely. Further, plaintiffs have established triable issues regarding whether they exercised the requisite due diligence in discovering the claims. ***HN1***[] "[W]here there is a dispute as to the existence of fraudulent concealment, the question is one for the jury," *King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1156 (10th Cir.1981)*, cert. denied, *454 U.S. 1164 (1982)*.

Second, the court finds plaintiffs have raised sufficient facts with respect to the timeliness of these claims under the "revival" exception applicable to accrual of antitrust claims, because when the acts in question occurred, the plaintiffs' damages were arguably speculative or unprovable. **[*7]** See *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 339-40 (1971)*; *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 295-96 (2d Cir.1979)*, cert. denied, *444 U.S. 1093 (1980)*. See also *Kaw Valley Elec. Co-op v. Kansas Elec. Power, 872 F.2d 931, 933 n.4 (10th Cir. 1989)*. [1]

Applying the court's reasoning, with respect to the tolling of the statute of limitations because of defendants' alleged fraudulent concealment, to all other claims of plaintiffs, we rule that: Defendants' motion for summary judgment on KPL, Missouri and Utilicorp's Missouri antitrust claims is denied.

[1] The court further finds that whether plaintiff's recovery may, with respect to certain claims, be limited to acts occurring within four years of the filing of the relevant complaints cannot be decided on the record now before the court and must await elaboration at trial.

Defendants' motion for summary judgment on KPL, KG&E, Kansas, and Farmland's Kansas antitrust claims is denied.

Defendants' motion for summary **[*8]** judgment on Utilicorp's Kansas antitrust claims is granted, Utilicorp having filed more than three years after arguably discovering the cause of action.

Defendants' motion for summary judgment on Missouri's RICO claim is denied.

Defendants' motion for summary judgment on KPL and KG&E's tortious interference claim is denied.

Defendants' motion for summary judgment on Utilicorp's tortious interference claims is granted, this plaintiff having filed more than two years after arguably discovering the claim.

Defendants' motion for summary judgment on KPL and KG&E's claims for fraud and conspiracy to defraud is denied.

Defendants' motion for summary judgment on Missouri and Utilicorp's claims for fraud and conspiracy to defraud is granted, both plaintiffs having filed more than two years after arguably discovering the claim. [2]

Finally, finding that the doctrines of fraudulent concealment and equitable estoppel apply **[*9]** to claims brought pursuant to the Uniform Commercial Code, defendants' motion for summary judgment on plaintiffs' breach of contract claims is denied. See *K.S.A. 84-1-103*; K.S.A. 84-725(1), (2) and (4).

II. Jurisdictional Defenses

Defendants' motion for summary judgment based on the doctrine of exclusive jurisdiction is denied. The court, agreeing with Chief Judge Scott O. Wright of the Western District of Missouri, finds no congressional intent, express or implied, to immunize practices in the natural gas industry from antitrust scrutiny, and further finds that nothing in the FERC regulatory authority over prices creates a repugnancy to this court's authority under the antitrust laws. See *Carnation Co. v. Pacific Westbound Conference, 383 U.S. 213, 217-18 (1966)* (quoting *United States v. Philadelphia National Bank, 374 U.S. 321, 350-51* [1963]).

Defendants' motion for summary judgment and/or motion for stay based on the doctrine of primary jurisdiction is denied. The court rejects the contention that the expertise of the FERC is essential for proper resolution of these antitrust cases or that their resolution would be enhanced by agency expertise. See, e.g., *Nader **[*10]** v. Allegheny Airlines, Inc., 426 U.S. 290, 303-4 (1976)*.

Defendants' motion for summary judgment based on the filed-rate doctrine is denied. The court finds this doctrine inapplicable to the category of gas at issue in these cases. See *FERC v. Martin Exploration Management Co., 486 U.S. 204, 212 (1988)*. Finally, defendants' motion for summary judgment on plaintiffs' pendent state law claims based on the doctrine of federal preemption is denied.

III. Federal Antitrust Claims

Standards for granting summary judgment are well known and need not be repeated here. Generally, however, ***HN2***[↑] summary judgment should be used sparingly in antitrust cases. See, e.g., *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473 (1962)*. The court finds this admonition particularly apt in these cases due to the existence of factors unique to the natural gas industry in the late 1970's and early 1980's. Further, the lack of precedent bearing upon such a factual scenario makes summary judgment particularly inappropriate. Although the court is impressed with a number of defendants' arguments, the dearth of cases with economic and competitive conditions sufficiently analogous to those present **[*11]** here leads the court to the conclusion that the issues can only be resolved effectively by development at trial.

---

[2] The court rejects defendants' argument that the Missouri five-year statute of limitations applies here.

KPL, Missouri and Utilicorp have brought section 2, Sherman Act, claims against all defendants. [3] All plaintiffs have brought section 1, Sherman Act, claims against all defendants. Generally, plaintiffs allege that defendants combined and conspired to exercise monopoly power in the relevant market with intent to use Pipeline's position as a vertically integrated natural monopoly in order to (1) fix the price of gas sold to Pipeline and Pipeline's customers; (2) extract monopoly profits from Pipeline's customers; (3) suppress and/or exclude competition from non-affiliated producers for low-cost gas; and (3) evade regulatory control over affiliate transactions.

In support of these allegations, the court finds plaintiffs have established genuine issues of material fact as to whether or not from 1979 to 1982 (1) defendants Amoco, Cities and Exploration **[*12]** controlled and supplied a majority of the total gas volumes purchased by Pipeline in the relevant market; (2) defendants combined to increase their joint production of expensive Wyoming gas, to increase the price of this gas to maximum incentive levels under the NGPA, and to decrease production of cheaper Kansas Hugoton gas; (3) defendants took such action in the face of the existence of a surplus of reserves and declining resale demand in order to maximize their own joint profits; (4) defendants utilized Pipeline's market power as a vertically integrated regulated monopoly to pass on the inflated gas costs to Pipeline's locked-in customers, despite regulatory controls, thereby exacting a competitive advantage for all defendants unattainable in the absence of concerted action; and (5) defendants combined to maximize Pipeline's purchases of gas from its affiliate to the potential disadvantage of independent producers. At this stage of the litigation, the court finds these factual issues exist and are sufficient to withstand summary judgment on both the section 1 and 2 claims under the standards set forth in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574 (1986)*, **[*13]** and *Gibson v. Greater Park City Co., 818 F.2d 722 (10th Cir. 1987)*. [4]

IV. State Antitrust Claims

KPL, Utilicorp and Missouri have brought claims under the Missouri ***Antitrust Law***, *Mo. Rev. Stat. §§ 416.011-.161* (1988), which closely parallel their sections 1 and 2, Sherman Act, claims. Since ***HN3***[] Missouri requires construction of its ***antitrust law*** in accordance with federal cases interpreting sections 1 and 2 of the Sherman Act, *Missouri v. NOW, Inc., 620 F.2d 1301, 1316* (8th Cir.), cert. denied, *449 U.S. 842 (1980)*; *Stensto v. Sunset Memorial Park, Inc., 759 S.W.2d 261, 266 (Mo. Ct. App. 1988)*, defendants' motion on plaintiffs' Missouri antitrust claims is denied for the same reasons articulated in Section III above.

Kansas, KPL, KG&E, Farmland and Utilicorp have brought claims under the Kansas antitrust laws, K.S.A. 50-101-157. Defendants **[*14]** contend they are entitled to summary judgment because the Kansas antitrust laws regulate activities solely in intrastate and opposed to interstate commerce. We disagree.

First, ***HN4***[] *K.S.A. 50-112* clearly makes unlawful "all arrangements, contracts, agreements, trusts, or combinations . . . which tend to prevent full and free competition in the importation, transportation or sale of articles imported into this state. . . ." (Emphasis added.) ***HN5***[] By its clear language, the statute clearly contemplates enforcement in the interstate context. Second, the court disagrees that *State v. Phipps, 50 Kan. 609, 31 P. 1097 (1893)*, *State v. Jack, 89 Kan. 387, 78 P. 811 (1904)*, and the other early Kansas cases cited by defendants mandate a contrary result. Rather, these and subsequent cases demonstrate that when a challenged course of conduct has implicated both inter- and intrastate commerce, the courts have applied Kansas antitrust statutes. See, e.g., *United Artists Corp. v. Mills, 135 Kan. 655, 11 P.2d 1025 (1932)*. Here, plaintiffs have raised a genuine issue of material fact as to whether defendants' alleged combination produced an anticompetitive effect on intrastate commerce sufficient **[*15]** to invoke the Kansas statute. Accordingly, defendants' motion is denied.

V. RICO

Missouri alone has brought a RICO claim against all defendants pursuant to *18 U.S.C. § 1961 et seq.*, alleging violations of 1962(c) and (d). Although the court does not agree with the majority of the challenges raised by

---

[3] See the court's ruling on *Motions to Amend, supra.*

[4] Despite serious doubts as to its viability, the court reserves ruling at this time on plaintiffs' (Kansas, Missouri and Farmland) "Section 104" damage theory.

defendants to this claim, the court has serious reservations with respect to plaintiff's ability to establish for each defendant the requisite elements of a RICO claim under *Sedima S.P.R.L. v. Imrex Co., 473 U.S. 479 (1985)*. In particular, the court notes the paucity of evidence regarding the element of causation and evidence establishing that use of the mails was an integral part of defendants' fraudulent scheme. See generally the court's reasoning in *Bumgarner v. Blue Cross & Blue Shield of Kansas, 716 F.Supp. 493 (D.Kan. 1988)*.

Despite these reservations, the court declines to grant defendants' motion for summary judgment on the record presently before us. Whether or not the claim remains viable at trial is another matter.

PENDENT *CLAIMS*

I. Fraud and Conspiracy to Defraud

KG&E and KPL have brought claims for fraud against Pipeline and conspiracy to defraud **[*16]** against all defendants. [5] These plaintiffs argue that Pipeline defrauded them by affirmatively misrepresenting and actively concealing the true reasons for the increase in gas prices. Plaintiffs also assert that the rates filed with the FERC (PGA's) and the subsequent invoices sent to customers were fraudulent, because they impliedly represented that the charged prices were properly incurred.

Although the court questions plaintiffs' implied fraud theory, insofar as it relies upon the PGA filings and invoices, we conclude that sufficient evidence has been presented regarding defendant Pipeline's alleged affirmative misrepresentations and active concealment of the grounds for the price increases of gas in the relevant time period to withstand summary judgment. [6] In addition, the court finds that there is sufficient evidence to support the conspiracy to defraud claim against all defendants. **[*17]** [7]

II. Breach of Contract

All six plaintiffs have brought claims for breach of contract, contending Pipeline breached its common-law and statutory (Uniform Commercial Code) duties of good faith and fair dealing in the performance of gas purchase contracts by purchasing gas from its affiliates and Amoco on higher-than-market terms and by agreeing, on **[*18]** March 17, 1981, to amend its gas purchase contracts with Amoco and Pipeline's affiliates to increase artificially the price of natural gas already committed for sale to Pipeline. The contracts at issue were: (1) "resale" contracts in which plaintiffs KPL, Missouri and Utilicorp purchased gas from Pipeline to sell to local gas distribution systems (LDC's); (2) "direct sale" contracts between the Pipeline and all plaintiffs; and (3) Missouri's claims on behalf of its state agencies and governmental entities as a third-party beneficiary of the Pipeline - LDC contracts.

The court rejects defendants' arguments that their evidence of compliance with FERC and KCC regulatory pricing procedures supports summary judgment on this claim. Here, where it is undisputed that all the contracts at issue included the obligation to act in good faith, the court finds that plaintiffs have raised issues of genuine material fact regarding defendants' conduct sufficient to preclude summary judgment.

The court agrees with defendants, however, that summary judgment on Missouri's third-party beneficiary claim is warranted. Although Missouri might be entitled to claim incidental benefit as a downstream purchaser, **[*19]** this does not rise to the type of benefit that would entitle Missouri to enforce the contracts as a third-party beneficiary.

---

[5] The court has ruled supra that the fraud claims of Missouri and Utilicorp are barred by the applicable statute of limitations.

[6] Whether these are affirmative misstatements or acts of fraudulent concealment is here a distinction without a difference. Although there is authority for the proposition that acts of concealment of material facts may only be actionable where there is a duty to communicate the truth, see e.g. *Du Shane v. Union Nat'l Bank, 223 Kan. 755, 759, 576 P.2d 674, 678 (1978)*, here Pipeline arguably assumed that duty by voluntarily stating it would keep plaintiffs "apprised" of the factors causing the increase in gas costs.

[7] Although far from convinced with respect to the viability of plaintiffs' fraud damage theory, the court will reserve ruling on this issue.

See generally *Kansas City N.O. Nelson Co. v. Mid-Western Construction Co. of Mo., Inc., 782 S.W.2d 672 (Mo. Ct. App. 1989)*; *Fasse v . Lower Heating and Air Conditioning, Inc., 241 Kan. 387, 736 P.2d 930 (1987)*.

III. Tortious Interference with Contract

KPL and KG&E have brought claims for tortious interference with contract against all defendants except Pipeline. [8] Plaintiffs claim that defendants tortiously interfered with each of the gas purchase contracts executed by plaintiffs with Pipeline by causing Pipeline, Exploration's affiliate, to breach its duty of good faith and fair dealing by artificially increasing the price of gas.

HN6[] To establish a cause of action for tortious interference with a contract, plaintiffs must demonstrate (1) the existence of a contract; (2) knowledge of that **[*20]** contract on the part of the defendant; (3) that defendant intentionally induced or caused the breach of the contract; (4) that the defendant's act were without justification; and (5) resulting damage to plaintiffs. See e.g., *Turner v. Halliburton Co., 240 Kan. 1, 12, 722 P.2d 1106, 1115 (1986)*.

Here, plaintiffs have not presented sufficient evidence to support the allegations that Cities, Exploration and/or Amoco intentionally induced or caused Pipeline to breach its contracts with plaintiffs. Notably, plaintiffs' other claims are based on the alleged concerted action by Amoco and the Cities defendants, including Pipeline. Although plaintiffs are clearly entitled to bring claims grounded on alternate theories of recovery, the court agrees with defendants that here, plaintiffs have raised no issues of material fact which would support an inference that Pipeline was the "victim" of tortious action by the other defendants.

PLAINTIFFS' MOTION FOR PARTIAL SUMMARY JUDGMENT

I. Motion of Missouri, Kansas and Farmland

Plaintiffs Missouri, Kansas and Farmland have moved for partial summary judgment contending that (1) defendants' affirmative defense that federal regulation **[*21]** of the natural gas industry immunizes their conduct from antitrust scrutiny fails as a matter of law and (2) the antitrust agreements that are the subject of this suit are horizontal in nature (between competitors) and not vertical (between entities at different levels of distribution). Regarding the first contention, the court has already ruled, supra, that FERC regulation of tight sands pricing does not immunize defendants from antitrust scrutiny.

Regarding the plaintiffs' second argument, the court declines at this juncture to label the alleged anticompetitive combination at issue here as either horizontal or vertical. The court does, however, reject plaintiffs' argument that the Supreme Court's decision in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752 (1984)*, compels such a conclusion.

More importantly, the court finds this motion premature. The issue of whether the alleged restraints on trade in this case were horizontal or vertical, as well as the proper analysis to apply to the alleged restraint on trade, must await further development at trial of the relevant factors pertaining to the economic and competitive conditions in the industry.

II. Motion of **[*22]** KPL and KG&E

KPL and KG&E have moved for partial summary judgment urging the court to reject defendants' "contractual obligation defense," which is based on defendants' assertion that Pipeline was bound by a pre-1980 contractual obligation to pay the "maximum permissible price" allowed under the NGPA, [here, the NGPA Section 107(c)(5) tight sands prices] and, therefore, was contractually bound to execute the March 1981 amendments to the Wyoming gas purchase contracts with Amoco, Wamsutter and Moxa.

---

[8] The court has ruled supra that Utilicorp's claim is barred by the statute of limitations.

In its response, Pipeline urges the court to find that pre-1980 gas purchase contracts between Pipeline and the producers demonstrate an unequivocal intent by all parties to pay the maximum permissible or tight sands incentive price, therefore obligating Pipeline to execute the 1981 amendments.

After examining in detail the evidence submitted by both sides on this issue (including the E&D agreements, the 1974 Principals of Gas Purchase Contract, the Articles of Limited Partnership forming the Wamsutter and Moxa Limited Partnerships, the Principles of Gas Purchase Contracts governing each limited partnership, and the letter agreements as well as the deposition testimony), the court finds **[*23]** that the evidence raises a genuine issue of material fact as to the parties' intent to pay the tight sands incentive price. [9] Accordingly, at this stage of litigation, the court denies KPL and KG&E's motion on this issue and, insofar as the Pipeline's response can be considered a cross motion, it is similarly denied.

DEFENDANTS' MOTION DISMISSING THE LIMITED PARTNERSHIPS

Defendants move for summary judgment dismissing the Wyoming Moxa and Wamsutter Limited Partnerships or, in the alternative, to set aside entries of default against these partnerships. Defendants' motion is based on the contentions that the Wamsutter Partnership (formed in 1975) and the Moxa Partnership (formed in 1976) were terminated retroactive to April 3, 1983, by letter agreement entered into **[*24]** on November 16, 1983, or, at the latest, by execution of a certificate of cancellation on December 20, 1983.

It is undisputed that under general principles of partnership law, ***HN7***[] the dissolution of a limited partnership operates to terminate the partnership with respect to all transactions occurring in the future. The partnership continues to exist as to outstanding matters, however, until they are resolved. Included in this period of "winding up" are the performance of existing contracts, the collection of debts or claims due, and the payment of existing debts. A partnership may therefore sue or be sued in its own name following dissolution, but prior to termination, on claims which existed prior to dissolution. See *59A Am. Jur. 2d, Partnership, §§ 706*, *886*, 906 (1987).

Here, the court finds that since the claims in this case were brought subsequent to the filing of a certificate of cancellation of the limited partnership certificates and did not concern outstanding partnership obligations, these claims do not fall into the category of claims which could be litigated during the winding-up period.

The court also rejects plaintiffs' additional contention that Moxa and Wamsutter **[*25]** continued to exist as limited partnerships even after the letter agreements and certificate of cancellation were executed. The court has carefully examined the evidence and finds that the partnerships continued to exist solely for winding-up purposes, and that any post-cancellation business activity concerning Moxa and Wamsutter stemmed from operating agreements entered into between Amoco and Cities to run the Moxa and Wamsutter properties after the dissolution of the partnerships. Accordingly, the court grants defendants' motion to dismiss and further sets aside the court's prior entries of default against each partnership. The court notes that this ruling in no way prejudices whatever rights plaintiffs may have against the general partners who remain as parties in this lawsuit.

DAMAGES

As stated, supra, the court has reserved ruling on both plaintiffs' "Section 104" theory of antitrust damages and plaintiffs' fraud damage theory. The court plans to announce its ruling regarding the "Section 104" theory in a supplemental opinion prior to trial. No ruling on the fraud theory will be made until trial. The court wishes to emphasize that, at trial, any attempt by plaintiffs **[*26]** to recover what, in essence, are duplicative damages, will be thoroughly scrutinized.

IT IS SO ORDERED

---

[9] The court notes that even if the intent to pay the maximum permissible price had existed prior to 1980, it is not clear that this intent would have sufficed to bind the parties to pay tight sands incentive prices after the promulgation of Order No. 99.

Dated this 2nd day of August, 1990, at Kansas City, Kansas.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Remedies > General Overview

HN4[] Robinson-Patman Act, Claims

In order to establish a prima facie violation of § 2(a) of the Robinson-Patman Act (Act), *15 U.S.C.S. § 13(a)*, a plaintiff must demonstrate a reasonable possibility that a price difference may harm competition. In keeping with the Act's prophylactic purpose, which is designed to prevent the occurrence of price discrimination rather than to provide a remedy for its effects, § 2(a) does not require that the discrimination must in fact have harmed competition. Instead, a reasonable possibility of harm, often referred to as competitive injury, must be shown.

Antitrust & Trade Law > Robinson-Patman Act > Remedies > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Injunctions

HN5[] Remedies, Damages

Demonstrating competitive injury as part of a prima facie case suffices to support injunctive relief and implicates further examination of a plaintiff's entitlement to treble damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*. To recover treble damages a plaintiff must prove more than a violation of § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*; it must show the extent of actual injury attributable to the harm to competition.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

***HN6*[]** **Robinson-Patman Act, Claims**

Price discrimination within the meaning of § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, is merely a price difference.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

***HN7*[]** **Robinson-Patman Act, Claims**

Since price differences constitute only one element of a violation under § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, all price discriminations are not illegal per se. Rather, in order for a price difference to be illegal under the statute, the difference must have the proscribed anti-competitive effect.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

***HN8*[]** **Robinson-Patman Act, Claims**

Section 2(a) of the Robinson-Patman Act specifies three possible consequences of price discrimination which will satisfy its proviso that the discrimination in price had an adverse "effect" on competition. Although in § 2(a) the first two of these effects refer specifically to discriminatory practices which lessen competition or tend towards monopoly, i.e., broad competitive impacts, the third makes price discrimination illegal where it adversely affects the ability of individual companies to compete. Thus, § 2(a) makes it unlawful to discriminate in price where the effect may be to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. *15 U.S.C.S. § 13(a)*.

Business & Corporate Compliance > ... > Sales of Goods > Performance > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN9[] **Robinson-Patman Act, Claims**

The United States Supreme Court has read § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, in accordance with its language and legislative history, holding that the provision was intended to justify a finding of injury to competition by a showing of injury to a competitor victimized by the discrimination. Harm to competition may be inferred from evidence that some purchasers had to pay their supplier substantially more for their goods than their competitors had to pay.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN10[] **Price Discrimination, Competitive Injuries**

In order to establish the requisite competitive injury in a secondary line case, the plaintiffs must prove that, as a disfavored purchaser, it was engaged in actual competition with the favored purchaser(s) as of the time of the price differential. The competitive nexus requirement is satisfied where there is a showing of competitive contact between the recipients of the price differential.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN11[] **Price Discrimination, Competitive Injuries**

Injury to competition is usually shown in either of two ways: proof of lost sales or profits, or under the Morton Salt test, proof of a substantial price discrimination between competitors over time. Under this test, a showing that price discrimination influenced resale prices is itself adequate to show competitive injury.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN12[] **Robinson-Patman Act, Claims**

The presumption of the requisite adverse competitive effects contemplated by § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, is most likely to arise when the price differential is (1) substantial enough to influence a disfavored customer's resale prices; or (2) occurs in a market with low profit margins and intensive competitive conditions.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN13[] **Price Discrimination, Competitive Injuries**

In determining competitive injury at the customer level, the duration of the price discrimination is a compelling factor. Generally, the longer the duration, the more likely injury will be found.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Evidence > Burdens of Proof > Allocation

HN14[] **Clayton Act, Claims**

While injury to competition dominates concern in demonstrating a violation of § 2(a) of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, to recover damages under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, a plaintiff must prove a causal connection between the price discrimination and actual damage suffered. This actual damage requirement has been construed to impose a burden of proof greater than for a § 2 violation, since under that preventative section, evidence need only establish that injury may result. The plaintiff's proof of damages is facilitated by the rule that once the plaintiff has met its burden of proving the fact of damage, some uncertainty with respect to the amount of damages will not preclude recovery.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN15[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, provides that every contract, combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce among the several states is declared to be illegal.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Robinson-Patman Act, Claims**

For activity to be actionable under the Sherman Act it must result in the type of injury the antitrust laws were intended to prevent and must flow from that which marks the defendant's acts as unlawful. As distinguished from the Robinson-Patman Act, the target of this ***antitrust law*** is the protection of competition, not competitors.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN17[] **Sherman Act, Claims**

The following four elements are necessary to sustain a successful Sherman Act violation: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse anti-competitive effects within the relevant product and geographic markets; (3) that the objects of the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiffs were injured as a proximate result of that conspiracy.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

HN18[] **Remedies, Damages**

If the antitrust defendant's conduct is consistent both with permissible competition and illegal conspiracy, evidence of such conduct does not, standing alone, support an inference of antitrust conspiracy. In such a situation, to survive a motion for summary judgment, a plaintiff seeking damages for a violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. In other words, such a plaintiff must show that the inference of illegal conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed the plaintiff.

Opinion by: MANSMANN

Opinion

[*1526] OPINION OF THE COURT

MANSMANN, Circuit Judge.

[2]** In this antitrust matter involving the highly competitive food distribution business, we are asked to review a grant of summary judgment in favor of the defendants, a supplier and a wholesaler, and against the plaintiff wholesalers. The litigation primarily involves allegations of secondary line price discrimination in violation of sections 2(a) and 4 of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. §§ 13(a)*, *15 (1936)*. Secondary line injury cases are characterized by price discrimination by a seller in sales to competing buyers.

Also at issue are whether the plaintiffs presented sufficient and relevant material facts to defeat the entry of summary judgment on a Sherman Act claim, i.e., did a conspiracy exist between the supplier and a competing wholesaler to discriminate in price to the detriment of the plaintiff-wholesalers, and whether one of the plaintiffs had the standing to bring this lawsuit. The plaintiffs allege that the district court usurped the function of the jury by improperly resolving disputed questions of fact and by evaluating the credibility of the testimony.

On review de novo, we conclude first, with respect to the **[**3]** Robinson-Patman Act claim, that the plaintiff has presented sufficient evidence supporting its position that, over a four year period of time, the defendant supplier discriminated against it in the prices charged for portion-controlled products. Genuine issues of material fact exist concerning whether the discrimination caused competitive injury (i.e., a reasonable possibility of harm to competition) which resulted in actual damage to the plaintiff. We will, therefore, vacate the district court's grant of summary judgment on this claim and remand for trial.

As to the Sherman Act claim, the present record does not reflect sufficient evidence of either the conspiracy or arrangement to exclude the plaintiff from the food distribution market to sustain a Sherman Act violation. We are aware, however, that the district court limited discovery to the issues of competitive impact and injury in the context of the Robinson-Patman claim. Since the plaintiffs alleged, in an affidavit filed pursuant to *Fed. R. Civ. P. 56(f)*, that further discovery will uncover evidence of the conspiracy, we will vacate the dismissal of this count and remand for further discovery.

---

[*] Honorable Harold A. Ackerman of the United States District Court for the District of New Jersey, sitting by designation.

Finally, we find that the district **[**4]** court erred in deciding that Plaintiff Juniata Foods, Inc., does not have standing to proceed in the action. In conflict with other evidence, an affidavit indicates that Juniata was a wholesaler who directly purchased from Serv-A-Portion. Once again questions of material fact remain for the factfinder. Juniata, at this stage, will remain in the lawsuit.

I.

The plaintiffs, J.F. Feeser, Inc., now known as Feesers, Inc., and Juniata Foods, Inc., commonly-owned corporations, are wholesale distributors of food products and related items to institutional purchasers (e.g., schools, nursing homes, hospitals, caterers and restaurants). Defendant Weis Markets, Inc., is engaged in the business of distributing food and related products to the same type of institutional customers to whom Feeser and Juniata distribute and is, therefore, in direct competition with them. Defendant Serv-A-Portion, Inc., is a manufacturer **[*1527]** and packager of food products which it sells to distributors. Serv-A-Portion is a leading supplier of portion-controlled food products, such as individual servings of ketchup, jelly, syrup and dressings. Serv-A-Portion has sold, and its successor, DiGiorgio Foods, **[**5]** [1] has continued to sell, a variety of portion-controlled products to Feeser, Weis Markets and other competitors, including Tartan Foods and Sky Brothers, in interstate commerce. The claims against Hunt-Wesson Foods, Inc., also a manufacturer and packager of the portion-controlled products, have been settled.

[6]** It is undisputed that food distribution is a highly competitive business. Since portion-controlled products are primarily "give away" items, [2] the end user (i.e., the final institutional purchaser) is sensitive to minute price differences between the competing wholesalers. In addition, these particular products are considered "bellwether" items which are customarily utilized as a gauge by the distributor's customers to evaluate a company's overall pricing. Accordingly, it is contended by Feeser and Juniata that its inability to offer competitive prices on Serv-A-Portion products not only impacted on its overall business goodwill but also caused the loss of other business.

The impact of these price differences prompted Feeser and Juniata [3] in 1985 to file a complaint contending that Serv-A-Portion discriminated against **[**7]** them in the prices it charged for its portion-controlled products and in favor of its competitors, Weis Markets, Tartan Foods and Sky Brothers. The alleged discrimination primarily involved the manner in which Serv-A-Portion conducted its pricing policies. According to Feeser, Serv-A-Portion had two general categories of pricing: truckload and bidding. It is Serv-A-Portion's bid pricing which Feeser contends operated in a discriminatory fashion. Products purchased through Serv-A-Portion's bidding process, available at lower prices, were offered to Serv-A-Portion's customers (the wholesalers) only on a case-by-case basis after submission of a formal and specific bid and on condition that they could be resold only to certain end users. It is not contested by Serv-A-Portion that its bidding requirements were not rigidly followed nor that Weis Markets used Serv-A-Portion's failure to enforce its procedures to Weis Markets' advantage by selling products purchased by bid to *any* of its customers.

[8]** It is also contended by Feeser that Serv-A-Portion utilized other pricing mechanisms to camouflage price discrimination, such as affording special allowances and permitting deductions. Feeser claims that although Tartan

---

[1] Serv-A-Portion argues mootness by contending that the lawsuit is automatically terminated by the sale of DiGiorgio's Serv-a-Portion division on May 31, 1988. Feeser counters that the action continues under the authority of *Fed. R. Civ. P. 25(c)* which states:

> In the case of a transfer of interest, the action may be continued against the original party, unless the court upon motion directs the person to whom the interest is transferred to be substituted in the action or joined with the original party.

Although neither party has filed the appropriate motion, Feeser has made known its intention to present a *Rule 25(c)* motion to enforce its rights against Serv-A-Portion's successor. This appeal appropriately continues against Serv-A-Portion.

[2] Give-away items are provided to consumers, such as diners in restaurants, at no cost. These products thus do not yield a direct return to the institution providing the items. App. at 2759.

[3] We refer to the plaintiffs collectively as "Feeser."

Foods and Sky Brothers derived benefits from Serv-A-Portion's deviation from established business practices, it was not granted similar advantages. As a direct result, Feeser alleges that it lost sales when its customers took advantage of the more favorable prices of Serv-A-Portion products offered by Feeser's competitors, Weis Markets, Tartan Foods and Sky Brothers. Feeser claims also that its revenues declined when it was forced to reduce its margins to attempt to meet the prices offered by the favored competitors. In addition to losing sales and incurring reduced profits, Feeser's inability to match Weis Markets' prices resulted in a loss of goodwill among its customers, so that **[*1528]** Feeser was not asked to service them on other products.

Feeser requested injunctive relief and treble damages for violations of sections 2(a) and 2(f) of the Robinson-Patman Act and *section 1* of the Sherman Act. Feeser also averred that the activity engaged in by the defendants **[**9]** represented unfair competition which violates the common law of Pennsylvania.

In September of 1985, four months after the complaint was filed, Serv-A-Portion asked the district court to require Feeser to identify and document as a threshold matter all the details of Serv-A-Portion's price discrimination and to cut off all discovery requested by Feeser relating to Serv-A-Portion's sales to competitors other than Weis Markets. On April 29, 1986, the district court entered a discovery order permitting Feeser to review only certain records maintained by Hunt and Serv-A-Portion for a one-year period to be selected by Feeser; requiring that Feeser's expert provide all parties with a price comparison report, supported by documentation, of transactions between Hunt, Serv-A-Portion and Weis Markets; and mandating that Feeser's expert provide all parties with a pricing report comparing transactions between Hunt and Serv-A-Portion and their customers.

Discovery continued in this prescribed manner. Feeser's expert economist, Dr. Robert Larner, prepared a pricing analysis that, *inter alia*, compared Serv-A-Portion's sales of identical products: (a) to Feeser and Weis Markets for the period **[**10]** January 1982 through January 1986; and (b) to Feeser, Tartan Foods and Sky Brothers for the period January 1984 through December 1984 - the year for which discovery of Serv-A-Portion's sales to those competitors was permitted.

Upon presentation of this evidence by Feeser, Serv-A-Portion contended that the report prepared by Dr. Larner did not show competitive injury and requested that discovery be focused upon the elements of competitive and actual injury. The district court then limited the next phase of discovery to competition and injury and enumerated the manner and extent of such discovery.

On June 9, 1988, Serv-A-Portion filed a motion for summary judgment directed toward the issues of competitive impact and injury. For purposes of its motion, Serv-A-Portion acknowledged a slight difference between the prices charged by Serv-A-Portion to Weis Markets and Feeser. Nonetheless, referencing primarily the overall competitive health of the institutional food industry, Serv-A-Portion contended that Feeser had not suffered any injury from any of Serv-A-Portion's pricing practices.

At the outset, the district court rejected Serv-A-Portion's position, which relied upon *Boise Cascade Corp. v. FTC, 267 U.S. App. D.C. 124, 837 F.2d 1127 (D.C. Cir. 1988),* **[**11]** that, because of the overall competitive health of Feeser and of institutional food distributors generally, there can be no competitive injury for Robinson-Patman purposes. The court disregarded this view finding *Boise Cascade* to be contrary to Supreme Court authority, *see* *Utah Pie Co. v. Continental Baking Co., 386 U.S. 685, 18 L. Ed. 2d 406, 87 S. Ct. 1326 (1967)* (a competitor's sales growth does not rule out a Robinson-Patman claim), and distinguishing it factually on several important grounds.

The district court then sought to determine whether Feeser could prove a Robinson-Patman violation under the doctrine of *Falls City Industries Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983)*, by showing lost sales or profits caused by the price differential. According to the district court, establishing lost sales caused by Serv-A-Portion's pricing policies was essential in order to demonstrate actual injury entitling Feeser to treble damages under section 4 of the Clayton Act. [4]

---

[4] Section 4 of the Clayton Act, *15 U.S.C. § 15(a)* *as amended* 1980) (Supp. 1990) reads:

[12]** **[*1529]** In reviewing the record submitted in response to the summary judgment motion, the district court systematically excluded much of Feeser's evidence presented through depositions and affidavits. First, the district court denied consideration of depositions of a number of Feeser's salesmen, finding them to constitute hearsay. Other salesmen's depositions, the court decided, were "simply too vague, conclusory or incomplete for a reasonable jury to place reliance upon them." *J.F. Feeser, Inc. v. Serv-A-Portion, Inc.*, No. 85-0684; 1989 U.S. Dist. LEXIS 9098 slip op. at 10 (E.D. Pa. Aug. 4, 1989). The court found some of the depositions probative of lost sales as indicative of better prices offered to favored competitors, yet dismissed the relative worth of these depositions on the assumption that some price differentials would normally occur given the particular nature of the food distribution industry. The district court concluded that there must be more than de minimis violations, as it characterized Feeser's evidence, of the Robinson-Patman Act in both volume and price before competitive injury could be found.

The district court then examined employee **[**13]** affidavits submitted by Feeser. The court rejected the affidavits of Feeser salesmen Fuller and Andrews and Juniata's Miller, believing that the hearsay statements of certain customers who refused to buy from them contravened the provision of *Fed. R. Civ. P. 56(e)*, that affidavits must be based on personal knowledge and on facts which would be admissible at trial.

Feeser had also submitted affidavits from some of the customers themselves. In general, these affidavits indicated that these customers did not buy from Feeser, but rather purchased from Weis Markets, Tartan Foods and Sky Brothers who offered better prices. The district court did find these affidavits admissible, but once again pointed to the de minimis nature of the evidence and declared that the affidavits were not probative of injury suffered from price discrimination.

The district court then turned to the evidence presented concerning other wholesalers who purchased from Serv-A-Portion. [5] The court accepted the testimony of Joanne Straw, who testified that her company, W.R. Straw, Inc., lost sales of Serv-A-Portion products to Pennsylvania State University because the prices Weis Markets offered to Penn State were **[**14]** lower than Straw's actual cost from Serv-A-Portion. The district court did not accept a similar affidavit from Joseph Spagnola, a buyer for R & R Provision Company, which was based upon information from Spagnola's sales personnel, finding that it constituted inadmissible hearsay. The court then characterized this evidence from competitors as "completely non-probative." *Id.* at 20.

The district court next reviewed the expert report prepared for Feeser by Dr. Robert Larner in light of the Robinson-Patman test enunciated by the Supreme Court in *FTC v. Morton Salt Co., 334 U.S. 37, 92 L. Ed. 1196, 68 S. Ct. 822 (1948)*. Under the *Morton Salt* test, a plaintiff can show injury to competition by providing either proof of a substantial price discrimination between competing purchasers over time or by providing direct proof of lost sales or profits. [6]

[15]** Although rejecting Serv-A-Portion's major objection to the expert report -- that Dr. Larner did not address what Serv-A-Portion considered the relevant economic consideration -- the overall growth of competition in the food distribution industry in general and of Feeser in particular -- the district court was critical of Dr. Larner's analysis for several other reasons. First, the district court questioned Dr. Larner's use of four-year periods in his report (1978 through 1982 and 1982 through 1986). The court agreed with Serv-A-Portion that the only apparent reason for this grouping was that it achieved the results desired by Dr. Larner. The district court did not credit **[*1530]** Dr. Larner's justification that yearly figures fluctuate for various reasons and, by using four-year periods he could establish a greater track record and eliminate unusual events or their effects in one particular year. The district court found

---

> Except as provided in subsection (b) of this section, any person who shall be injured . . . by reason of anything forbidden in the antitrust laws . . . shall recover threefold the damages by him sustained. . . .

15 U.S.C. § 15(a).

[5] These distributors are not parties to the lawsuit.

[6] Appendix A to this opinion represents a summation of the Larner Report comparing prices paid by Feeser and Weis Markets, Tartan Foods and Sky Brothers for several Serv-A-Portion portion-controlled products.

objectionable Dr. Larner's failure to elucidate these reasons or unusual events and concluded that "a reasonable jury would not accept his conclusory reasoning as a valid basis for using four-year periods. . . ." *Id.* at 24.

The district court then evaluated **[**16]** with skepticism Dr. Larner's analysis of the increasing and decreasing percentages of Feeser's purchases from Serv-A-Portion and concluded that such comparisons between Feeser's total sales and its Serv-A-Portion purchases revealed nothing about competitive injury or discriminatory pricing. With respect to the figures of the lower prices which Feeser alleged were given to favored competitors, the district court examined the numbers and determined that if Serv-A-Portion had intended to win the favor of Weis Markets, "it did not do a very good job of it." *Id.* at 29.

Finally, the district court rejected Dr. Larner's calculations for the six-month period showing differences in Weis Markets' and Feeser's profit margins on the grounds that the report utilized an insufficient number of products over an insufficient period of time.

Turning to Feeser's Sherman Act claim, the district court determined that it must sustain the same fate as the Robinson-Patman allegation because Feeser had not proven any injury to itself or to competition. The district court opined that even assuming a conspiracy between Serv-A-Portion and Weis Markets to grant Weis favorable pricing, this activity, without **[**17]** proof of an arrangement to exclude others from the buyer's market, was not actionable under the Sherman Act. In effect, the district court found that since the sale of Serv-A-Portion products at discriminatory prices is not a Sherman Act violation, a conspiracy to do so is not actionable. The district court also pointed to the lack of evidence indicating any conspiracy or agreement between Weis and Serv-A-Portion to discriminate in price. After deciding that Juniata had no standing to participate in the lawsuit because of evidence that Juniata was not a direct purchaser from Serv-A-Portion, the district court granted Serv-A-Portion's motion for summary judgment.

The district court then turned to Feeser's claims against its competitor, Weis Markets, Inc. Although Weis Markets had not moved for summary judgment, [7] the court dismissed all of Feeser's claims against Weis on the ground that such claims depended upon the validity of Feeser's claims against Serv-A-Portion. The pendent state claims were dismissed without prejudice to refiling in the appropriate state court.

[18]** Feeser has appealed this final judgment and our jurisdiction is thus premised on *28 U.S.C. § 1291*.

II.

On appeal from the grant of summary judgment we review the evidence de novo and apply the same standards applicable in the district court.

The now familiar and oft-cited trilogy of Supreme Court cases, *Celotex Corp. v. Catrett, 477 U.S. 317, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986),* **[*1531]** *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)* and *Matsushita Electric Industrial, Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* refocused the burden of both the movant and the non-movant in summary judgment actions. ***HN1***[] As a general rule, if there is no genuine issue of material fact and the moving party is entitled to judgment as a matter of law, then summary judgment is appropriate. *Fed. R. Civ. P. 56(c)*; *Anderson v. Liberty Lobby, 477 U.S. at 247.* **[**19]** ***HN2***[] Although the moving party has the initial burden of identifying the evidence that demonstrates

[7] On appeal Weis Markets submitted a brief detailing generally its position that its decisions concerning Serv-A-Portion purchases were unilateral and not dictated by another competitor's activities. It averred that there is no evidence that it knowingly induced or received lower prices in violation of section 2(f) of the Robinson-Patman Act.

In this same vein, as to the Sherman Act allegation, Weis Markets disputes that there is any evidence of conspiracy between Serv-A-Portion and Weis which would support such a violation.

Feeser does not specifically respond to any of Weis Markets' evidentiary contentions, but counters that Weis lacks standing to argue any point on appeal since it did not raise such issues before the district court. Because our decision vacating the grant of summary judgment in favor of Serv-A-Portion necessarily involves the disposition previously rendered in regard to Weis Markets, we need not address the argument premised on Weis' lack of standing to proceed.

the absence of a genuine issue of material fact, the respondent (the "non-movant") must establish the existence of each element on which it bears the burden of proof. *Celotex, 477 U.S. at 323*. The non-movant is entitled to all reasonable inferences in its favor. We are keenly aware that credibility determinations are not the function of the judge; instead the non-movant's evidence must be credited at this stage. *Anderson, 477 U.S. at 249, 255*.

When summary judgment is requested in the context of antitrust litigation, adherence to this standard is appropriate. *Miller v. Indiana Hospital, 843 F.2d 139 (3d Cir. 1988)*, *citing*, *Matsushita Electric Industrial Co. v. Zenith Radio, 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

We thus turn to the substantive legal standard applicable to each count of Feeser's complaint and review the specific evidence offered by the parties in the context of the summary judgment burdens set forth by the Supreme Court.

III.

[20]** Section 2(a) of the Robinson-Patman Act, a 1936 amendment to the Clayton Act, provides, in pertinent part, as follows:

> ***HN3***[] It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination or with customers of either of them. . . .

15 U.S.C. § 13(a).

HN4[] In order to establish a *prima facie* violation of section 2(a) of the Act, a plaintiff must demonstrate a reasonable possibility that a price difference may harm competition. *Falls City Industries, 460 U.S. at 435 (1983)*, *citing* *Corn Products Refining Co. v. FTC, 324 U.S. 726, 89 L. Ed. 1320, 65 S. Ct. 961 (1945)*. "In keeping with the Act's prophylactic **[**21]** purpose, [designed to prevent the occurrence of price discrimination rather than to provide a remedy for its effects], section 2(a) does not require that the discrimination must in fact have harmed competition." *Falls City Industries*, 460 at 435, *quoting* *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. Instead, a reasonable possibility of harm, often referred to as competitive injury, must be shown. ***HN5***[] Demonstrating competitive injury as part of a *prima facie* case suffices to support injunctive relief and implicates further examination of a plaintiff's entitlement to treble damages under section 4 of the Clayton Act, *15 U.S.C. § 15*. To recover treble damages a plaintiff must prove more than a violation of section 2(a); it must show the extent of actual injury attributable to the harm to competition. *Hasbrouck v. Texaco, 496 U.S. 543, , 58 U.S.L.W. 4807, 4810, 110 L. Ed. 2d 492, 110 S. Ct. 2535 (June 14, 1990)*, *citing* *J. Truett Payne, 451 U.S. at 562.* **[**22]**

Thus, to survive Serv-A-Portion's motion for summary judgment regarding Feeser's request for injunctive relief, Feeser must establish, by competent evidence, that there is a genuine issue of material fact as to whether Serv-A-Portion engaged in pricing policies that caused competitive injury in the market in which the **[*1532]** parties participate. Then, to establish entitlement to section 4 treble damages, Feeser must demonstrate a causal connection between the competitive injury and specific damage suffered by it.

Since Feeser admits that the alleged discrimination terminated in 1987, the claim for injunctive relief is moot. What must be proven then is that Serv-A-Portion violated the Robinson-Patman Act and that Feeser was, as a consequence, injured in *its* business. After proof of these elements, Feeser must show the amount of damage it was caused to suffer because of the unlawful conduct. Since the limited scope of the discovery permitted by the district court did not extend to the extent of the damages suffered, we examine whether the present record justifies an expansion of inquiry into this area; *see* *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 75 L. Ed. 544, 51 S. Ct. 248 (1931)* **[**23]** (uncertainty with respect to quantum of damages does not preclude section 4 recovery).

We begin with the threshold question of whether section 2(a) has been violated. In *Texaco v. Hasbrouck, 58 U.S.L.W. at 4810*, the Supreme Court reaffirmed the principle enunciated in *FTC v. Anheuser-Busch, Inc., 363 U.S. 536, 4 L. Ed. 2d 1385, 80 S. Ct. 1267 (1960)*, that ***HN6***[] price discrimination within the meaning of section 2(a) is merely a price difference. Here, Serv-A-Portion has conceded, for summary judgment purposes, that a slight difference in price did exist between its products which were sold to Feeser and its products which were sold to Weis. [8]

[24]**

The existence of this price differential does not, however, end the inquiry. In *Anheuser-Busch*, the Court was careful to emphasize that ***HN7***[] since price differences constitute only one element of a section 2(a) violation, all price discriminations are not illegal per se. *363 U.S. at 553*. Rather, in order for a price difference to be illegal under the statute, the difference must have the proscribed anti-competitive effect. Accordingly, we now turn our attention to the element of competitive injury.

A.

At the outset, we are compelled to address a question which, although not emphasized by the defendants or the district court, is of significance here. This issue focuses on whether the protective concern of the Robinson-Patman Act is one directed towards competition in general or whether its goal reaches to protection of specific competitors. Once the scope of the competitive injury is resolved, we then reach the second step - the degree of certainty to which a plaintiff must prove that the requisite injury has occurred in order to establish entitlement to treble damages.

[25]** ***HN8***[] Section 2(a) specifies three possible consequences of price discrimination which will satisfy its "effects" proviso, i.e., that the discrimination in price had an adverse "effect" on competition. Although in section 2(a) the first two of these effects refer specifically to discriminatory practices which lessen competition or tend towards monopoly, i.e., *broad* competitive impacts, the third makes price discrimination illegal where it adversely affects the ability of individual companies to compete. Thus, section 2(a) makes it unlawful to discriminate in price where "the effect may be . . . to injure, destroy or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them. . . ." *15 U.S.C. § 13(a)*. The language of the statute reflects concern both for the preservation of competition and for the protection of individual competitors. E. Kintner, Federal ***Antitrust Law***, § 22.2 (1983).

The legislative history as well indicates that one of the factors leading to the 1936 amendment **[**26]** of the Clayton Act was the perception that the 1914 version, containing only the first two conditions, was concerned exclusively with injury to competition. **[*1533]** U.S. Representative Hubert Utterback, the congressman in charge of the Conference Report, explained the meaning of the amendments as follows:

> Effects nos. 1 and 2 above correspond to those required to be shown under the old section 2 of the Clayton Act. Generally speaking, they require a showing of effect upon competitive conditions generally in the line of commerce and market territory concerned, *as distinguished from the effect of the discrimination upon immediate competition with the grantor or grantee*. The difference may be illustrated where a nonresident concern opens a new branch beside a local concern, and with the use of discriminatory prices destroys and replaces the local concern as the competitor in the local field. Competition in the local field generally has not been lessened, since one competitor has been replaced by another; but competition with the grantor of the discrimination has been destroyed. *The present bill is, therefore, less rigorous in its provisions as to the effect required to* **[**27]** *be shown in order to bring a given discrimination within its prohibitions*.

80 Cong. Rec. H9417 (1936) (statement by Rep. Utterback) (emphasis added).

The Report of the Senate Judiciary Committee explained this portion of the proposed amendments as follows:

---

[8] The only evidence in the record of the amount of the difference is Dr. Larner's report, expressed in percentages. Although it does not challenge the figures, Serv-A-Portion does contend that the dollar amounts which these percentages represent are very slight.

> This clause represents a recommended addition to the bill as referred to your committee. It tends to exclude from the bill otherwise harmless violations of its letter, but accomplishes a substantial broadening of a similar clause now contained in section 2 of the Clayton Act. The latter has in practice been too restrictive, in requiring a showing of general injury to competitive conditions in the line of commerce concerned; whereas the more immediately important concern is the injury to the competitor victimized by the discrimination. Only through such injuries, in fact, can the larger general injury result, and to catch the weed in the seed will keep it from coming to flower.

FTC v. Morton Salt Co., 334 U.S. at 49-50 n. 18 *quoting*, S. Rep. No. 1502, 74th Cong., 2d Sess. 4 (1936).

This statutory language and legislative history are highly persuasive indicia of Congress' intent **[**28]** to outlaw price discrimination that tends to injure competitors, rather than competition in general, which we must follow unless the Supreme Court has construed the statute in a contrary manner.

HN9[] The Supreme Court has read § 2(a) in accordance with its language and legislative history. For example, the Court examined this precise issue in *FTC v. Morton Salt Co., 334 U.S. 37, 92 L. Ed. 1196, 68 S. Ct. 822 (1948)*. After its review of the legislative history of the Robinson-Patman Act, the Court stated that the new provision (of the Act) was intended to justify a finding of injury *to competition* by a showing of injury to a competitor victimized by the discrimination. *Id. at 47*. In so doing, the Court held that harm to competition "may be inferred from evidence that some purchasers had to pay their supplier 'substantially more for their goods than their competitors had to pay.'" *Texaco v. Hasbrouck, 58 U.S.L.W. at 4810*, *quoting* *Morton Salt, 334 U.S. at 46-47*. In *Morton Salt*, the Supreme Court also explicitly stated **[**29]** that a showing that price discrimination was sufficient in amount to influence resale prices was "in itself . . . adequate" to show competitive injury. *334 U.S. at 47*. This was because "it would greatly handicap effective enforcement of the Act to require testimony to show that which we believe to be self-evident, namely, that there is a 'reasonable possibility' that competition may be adversely affected by a practice under which manufacturers and sellers sell their goods to some customers substantially cheaper than they sell like goods to the competitors of these customers." *Id. at 50-51*.

In *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*, the Supreme Court held that a violation of section 2(a) of the Robinson-Patman **[*1534]** Act is proven upon a showing that the effect of such discrimination "*may be* substantially to lessen competition." *Id. at 561*. The Court subsequently held in *Falls City Industries, 460 U.S. at 434-35* that if a discriminatee shows "proof of substantial discrimination over time" or direct evidence of lost sales caused **[**30]** by the discrimination, then "a reasonable possibility that a price difference may harm competition exists." [9]

Subsequent **[**31]** decisions of the courts of appeals have advocated a wide breadth of protection afforded by the Act. In *Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578 (2d Cir. 1987)*, ***HN10***[] the Court of Appeals for the Second Circuit held that "in order to establish the requisite competitive injury in a secondary line case the plaintiffs must prove that, as a disfavored purchaser, it was engaged in actual competition with the favored purchaser(s) as of the time of the price differential." *Id. at 584*. Its rationale was based upon the Supreme Court's language in *FTC v. Anheuser-Busch, 363 U.S. 536, 546, 4 L. Ed. 2d 1385, 80 S. Ct. 1267 (1960)*, that "the existence of competition among buyers who are charged different prices by a seller is obviously important in terms of adverse effect upon secondary line competition." *Best Brands, 842 F.2d at 584*, *citing* 5 J.O. Von Kalinowski,

---

[9] Although earlier decisional history of the degree of certainty needed to demonstrate actionable Robinson-Patman injury runs the semantical gambit from "reasonable possibility," *see* *Corn Products Refining, 324 U.S. at 742*, to "reasonable probability," *see* *Foremost Dairies, Inc. v. F.T.C., 348 F.2d 674, 680 n. 11 (5th Cir.)*, *cert. denied*, ***382 U.S. 959, 15 L. Ed. 2d 362, 86 S. Ct. 435 (1965)***, the 1983 Supreme Court decision in *Falls City* confirms that a reasonable possibility that the price differential may harm competition is the appropriate standard. *460 U.S. at 434-35*.

To assist in determining the meaning of reasonable possibility, one commentator suggests that "while certainty is not to be required, neither can plaintiff prove its case by mere hypothesis of competitive injury." *E. Kintner*, § 22.5.

Antitrust Laws in Trade Regulation, § 30.02[1] (1987) (and cases cited therein). The Court of Appeals for the Second Circuit concluded that "the **[**32]** competitive nexus requirement is satisfied where there is a showing of competitive contact between the recipients of the price differential." *Id. at 585*.

An expanded approach to the reach of section 2(a) liability has also been adopted in a case from the Court of Appeals for the Ninth Circuit, recently affirmed by the Supreme Court. In *Hasbrouck v. Texaco, Inc., 842 F.2d 1034 (9th Cir. 1987)*, *aff'd* *496 U.S. 543, 58 U.S.L.W. 4807, 110 L. Ed. 2d 492, 110 S. Ct. 2535 (June 14, 1990)*, a case involving primarily the status of functional discounts in the context of the Robinson-Patman Act, the court of appeals found that the distinction between protecting competition and protecting competitors had been "misconstrued with some regularity." The court opined that the purpose of drawing a distinction between harm to competition and harm to competitors is to demonstrate that although not all acts that harm competitors harm competition, the converse is not true. The court reasoned:

> Injury to competition necessarily entails injury to at least some competitors. Competition does not exist in a vacuum; it consists of rivalry among competitors. **[**33]** Clearly, injury to competitors may be probative of harm to competition, although the weight to be attached to such evidence depends on its nature and on the nature of the challenged conduct.

Id. at 1040. After a discussion of the type and the extent of harm required to demonstrate a Robinson-Patman violation, the court concluded that "in order for a plaintiff to prove competitive injury under Robinson-Patman, he need only show that a substantial price discrimination existed as between himself and his competitors over a period of time." *Id. at 1041*. [10]

[34]** **[*1535]** The Court of Appeals for the First Circuit examined this issue in *Monahan's Marine, Inc. v. Boston Whaler, Inc., 866 F.2d 525 (1st Cir. 1989)*, a case brought under the Sherman Act. Although there was no allegation of a Robinson-Patman violation because of the absence of interstate dealings, the court nonetheless discussed the Act and distinguished it from the Sherman Act by stating that the Robinson-Patman Act extends its protection to competitors while the Sherman Act protects competition. It construed the Robinson-Patman Act to protect "those who compete with a favored seller, not just the overall competitive practice." *Id. at 529*. Thus, in the opinion of our sister court, the Robinson-Patman Act will forbid selective but non-predatory price competition in some circumstances. *Id.*

Therefore, we today decide that the statute and its accompanying legislative history, the Supreme Court decision in *Morton Salt* and the recent jurisprudence of Robinson-Patman secondary-line cases compel a holding that evidence of injury to a competitor may satisfy the component of competitive injury necessary to show a violation of the Robinson-Patman **[**35]** Act. We thus turn to specific evidence of this factor and ask whether the record is sufficient at the summary judgment stage to show competitive injury.

HN11[] Injury to competition is usually shown in either of two ways: proof of lost sales or profits, *Falls City Industries, supra*; *Rose Confections, Inc. v. Ambrosia Chocolate Co., 816 F.2d 381 (8th Cir. 1987)*, or under the *Morton Salt* test, proof of a substantial price discrimination between competitors over time. Under this test we keep in mind the Supreme Court's instruction that a showing that price discrimination influenced resale prices is itself adequate to show competitive injury. *334 U.S. at 47*.

B.

---

[10] Unfortunately the precise issue of the intended scope of the Act in regard to the targeted effect on competition was not before the Supreme Court on certiorari. The Court, however, did reference its prior reasoning in *Falls City, 460 U.S. at 436*, that "the competitive injury component of a Robinson-Patman violation is not limited to the injury to competition between the favored and disfavored purchaser; it also encompasses the injury to competition between their customers." *Texaco v. Hasbrouck, 58 U.S.L.W. at 4814* (quoting *Falls City, 460 U.S. at 436*). Thus by inference, a showing of price discrimination between competing purchasers can suffice to satisfy the required element of injury to competition within the meaning of the Act.

Lost Sales or Profits

It is not contested by Serv-A-Portion that there is a slight difference in prices offered to Weis, Tartan Foods and Sky Brothers than to those offered to Feeser. To demonstrate how this price differential equated to proof of lost sales or profits, Feeser first proffered excerpts from depositions of its employees. [11] Our de novo analysis of the depositions reveals **[**36]** sufficient admissible evidence of lost sales and profits to meet the burden of the non-movant in a summary judgment proceeding.

[37]** Generally, the sales people testified concerning transactions with a number of their end user customers when they either lost sales of Serv-A-Portion products to Weis **[*1536]** Markets or were forced to greatly reduce their prices of the products, because of their inability to match their competitor's prices. For instance, Paul Thuss testified that after 10 years of conducting business with a Holiday Inn, he lost Serv-A-Portion product sales to Weis Markets. The manager of the institution told Thuss that the reason he switched to Weis was that Thuss' prices were "way out of line with [Serv-A-Portion] products -- I'm buying them from your competitor."

Kevin Fox discussed transactions occurring at the Arlington Diner. He testified that for a period of time he was forced to reduce his prices on Serv-A-Portion products to compete with Weis Markets and then eventually lost the sales because of his inability to match Weis Markets' prices.

Richard Miller related in his deposition that he had problems selling portion-controlled products at the Old Maine Restaurant where Juniata and Weis Markets were the main purveyors of Serv-A-Portion goods because he "got blown out of there on **[**38]** price." Miller additionally testified that his inability to match the prices on Serv-A-Portion products resulted in the loss of his business integrity with that particular customer.

Describing his dealings with a hospital in Harrisburg concerning Serv-A-Portion products, William Monteith stated that Weis Markets "just knocked our socks off as far as price on Serv."

In addition, although the sales people could not testify to the prices paid by Weis Markets for the portion-controlled products purchased from Serv-A-Portion, on a number of occasions where they were shown Weis' invoices, the paperwork revealed that Weis Markets' prices offered to the consumer were lower than Feeser's cost from Serv-A-Portion. Although this does not constitute direct testimony from the salesmen that Serv-A-Portion's pricing policies favored Weis and were detrimental to Feeser's ability to sell Serv-A-Portion's products, this is a reasonable inference which must be drawn in Feeser's favor.

Verification of the information contained in the depositions was presented through affidavits of some of the sales people which were more specific than the depositions that the reason why Feeser either lost sales **[**39]** or

---

[11] Although the district court disallowed a considerable part of this testimony as hearsay, it acknowledged that some of the excluded depositions would be admissible under *Fed. R. Evid. 803(3)* if the customer's motive for not purchasing from Feeser was relevant to this action. Finding that motive was not germane, the district court disallowed the bulk of the depositions. The district court erred in this regard because the reason why a customer was not doing business with a particular seller is relevant in a lost profits/sales inquiry and its causal connection to the pricing practices of the alleged violator. If Feeser was losing sales or was being forced to cut its selling prices and thereby reducing its profits to meet Weis' price, this is directly related to actual injury. *See* *Herman Schwabe, Inc. v. United Shoe Machinery Corp., 297 F.2d 906, 914 (2d Cir. 1962)* ("statements of a customer as to his reasons for not dealing with a supplier are admissible for this limited purpose," *i.e.*, the purpose of proving customer motive, but not as evidence of the facts recited as furnishing the motives); *see also* *Hydrolevel Corp. v. Am. Soc. of Mech. Engineers, 635 F.2d 118, 128 (2d Cir. 1980)* (following *Schwabe*); 4 J. Weinstein & M. Berger, *Weinstein's Evidence* para. 803[03], at 803-112 (1988).

There is contrary authority. In *Reserve Supply Corp. v. Owens Corning Fiberglas, 639 F. Supp. 1457 (N.D. Ill. 1986)*, it was held that deposition testimony relating conversations in which former customers told an official of the plaintiff's company that they had been purchasing [a product] from lower priced distributors was inadmissible hearsay. The district court cited no authority nor offered any rationale for its decision and, thus, we do not consider it persuasive.

incurred reduced profits was because of the lower prices offered to customers by Weis Markets, Tartan Foods and Sky Brothers. [12]

In his affidavit, Donald Fuller averred that while attempting to sell Serv-A-Portion products at a Holiday Inn, his prices were so divergent from those of Weis Markets that, although he initially offered to reduce the price of the products, he later did not even attempt to sell the goods because of his fear of losing credibility. He testified that a similar circumstance precluded him from selling **[**40]** Serv-A-Portion products at a Quality Inn.

Robert Andrews elaborated upon deposition testimony in his affidavit and stated that he did not get the sale of Serv-A-Portion products at the Camp Streamside account because Sky Brothers offered the products to this account at extremely low prices. Furthermore, Andrews testified that whenever he did make a sale of Serv-A-Portion products at this account it was only because he reduced his margins substantially.

Andrews also discussed his transactions at Emil's Diner where he lost sales of Serv-A-Portion products to Sky Brothers despite reducing his profit margin substantially. He related that the buyer at Emil's notified him that Feeser's prices were too high even with the markdown.

Richard Miller, in an affidavit, asserted that he was told by the buyer of Fye's Frosty Cup that Fye's would not buy Serv-A-Portion products from Miller because it received a lower price from Weis Markets.

[*1537] The evidence we find most persuasive is that of the customers of Feeser, corroborating the sales personnel's testimony, that the reason Feeser lost sales was because its prices for Serv-A-Portion products were not competitive.

For example, **[**41]** one customer-owner of a restaurant, Dean Spanos, testified that prior to 1986 it was his custom to challenge Feeser's prices on Serv-A-Portion products, by informing Feeser that Weis Markets and Sky Brothers were charging much lower prices for the same products. Spanos related that despite Feeser's sales people's efforts, they were unable to match or better the prices and Spanos decided consistently then to throw his Serv-A-Portion business the way of Weis and Sky.

Feeser also presented deposition testimony from Wilbur Blew, a buyer from one of its largest customers, M. W. Wood. Blew testified that in a five-month period in 1984 Feeser's pricing on Serv-A-Portion products was consistently out of line with the prices being offered by Tartan Foods. According to Blew, Feeser eventually reduced its prices in a substantial manner to make the sale of Serv-A-Portion products. Blew indicated that if Feeser had not effectuated this reduction, all of its business with M. W. Wood would have been jeopardized.

William Kotsalos, a buyer for Bill's Restaurant, testified in his affidavit that in the overwhelming majority of instances when he wished to purchase portion-controlled products, he would **[**42]** place his order with Sky Brothers because Feeser's prices for Serv-A-Portion products were much higher.

Examining all of these submissions, we do not conclude, as Serv-A-Portion urges, that the evidence could be summed up as demonstrating de minimis violations of the Robinson-Patman Act. [13] In a similar case, Rose

[12] Again, inadmissible hearsay was the reason advanced by the district court for refusing consideration of Feeser's sales force affidavits. The basis for exclusion echoed its reasoning concerning the depositions, i.e., that the reasons enunciated by the sales people for lost sales had to do with the customers' motive in not purchasing Serv-A-Portion goods from them and were therefore not relevant. We have already expressed our opinion that the customers' motive was indeed relevant.

[13] The cases cited by the district court to lend credence to its theory that de minimis violations are not actionable are either factually or legally distinguishable.

See Rudner v. Abbott Laboratories, 664 F. Supp. 1100 (N.D. Ohio 1987) (although court recognized that there must be more than de minimis violations in both sales and volumes, record was insufficient to analyze factual question in summary judgment motion); Hanson v. Pittsburgh Plate Glass Industries, Inc., 482 F.2d 220, 224 (5th Cir. 1973), *cert. denied*, *414 U.S. 1136, 38 L. Ed. 2d 761, 94 S. Ct. 880 (1974)* (de minimis sales occurred, when as courtesy one distributor extended to another item not in

Confections, Inc. v. Ambrosia Chocolate Co., 816 F.2d 381 (8th Cir. 1987), the plaintiff company's president testified that his company had to reduce its prices in response to low price offers made by its competitors. As in the dispute before us, the plaintiff presented depositions from its sales force concerning the necessity to reduce prices. The Court of Appeals for the Eighth Circuit found that this type of evidence alone is sufficient to allow a reasonable jury to find competitive injury. Also, as stated by the Supreme Court in *Falls City*, where the defendant had argued that other factors may have impacted on lost sales, the Court said that "if some of [plaintiff's] injury was attributed to the price discrimination, [the defendant] is responsible to that extent." *460 U.S. at 437*. The depositions and affidavits submitted by Feeser, **[**43]** demonstrating actual instances of lost sales because of its inability to match its competitors' prices on Serv-A-Portion products, go well beyond the level of speculative injury unprotected by section 2(a). The record suffices to raise the inference, at this stage of the proceedings, that the price difference in the Serv-A-Portion products resulted in a reasonable possibility of harm to competition.

[44]** **[*1538]** The evidence proffered by Feeser, if believed by the trier of fact, would support a finding that competitive harm has occurred.

Price Difference Over Time

Although our conclusion concerning the sufficiency of this evidence of lost sales and profits alone necessitates remand to the district court on the Robinson-Patman claim, we nonetheless examine the report submitted by Feeser's expert, Dr. Robert Larner, in the context of whether it too could support a Robinson-Patman claim by invoking the *Morton Salt* inference of substantial price difference over a period of time.

HN12[] The presumption of the requisite adverse competitive effects contemplated by section 2(a) is most likely to arise when the price differential is (1) substantial enough to influence a disfavored customer's resale prices; *see FTC v. Morton Salt, 334 U.S. at 47*; or (2) occurs in a market with low profit margins and intensive competitive conditions; *see Standard Motor Products, Inc. v. FTC, 265 F.2d 674 (2d Cir.)*, *cert. denied*, *361 U.S. 826, 4 L. Ed. 2d 69, 80 S. Ct. 73 (1959).* **[**45]** The evidence presented by Feeser's sales personnel is probative of the fact that Feeser was forced to reduce its prices to compete with Weis. Also, the parties agree that the type of market in which it competes is characterized by "low profit margins and intensive competitive conditions." Thus, here the presumption of adverse competitive effects arises and poses a question of fact as to whether Feeser was injured by Serv-A-Portion's pricing policies.

We turn then to the amount and degree of the price discrimination - significant factors used to determine the substantiality of secondary line competitive injury. "A substantial price differential may not by itself be indicative of the requisite injury. Other factors such as the duration and type of the differentials and the nature of the industry may transform a discrimination which is substantial in amount into one which is insubstantial in effect." J.O. Von Kalinowski, 5 Antitrust Laws and Trade Regulation § 31.01[4] (1989).

Dr. Larner's report, which the district court found unpersuasive, [14] tabulated for the period 1982 through 1985 the percentage of times Feeser paid a higher price for Serv-A-Portion products than did Weis **[**46]** and the magnitude

---

stock); *Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163 (7th Cir. 1978)* (question existed whether defendant possessed valid exclusive right to compete in certain geographic area; also, plaintiff unable to identify extent of possible customer dealings or estimate sales actually lost); *Whitaker Cable Corp. v. FTC, 239 F.2d 253 (7th Cir. 1956)*, *cert. denied*, *353 U.S. 938, 1 L. Ed. 2d 761, 77 S. Ct. 813 (1957)* (manufacturer selling to 8 1/2% of participants in market and who charged different prices to its customers without justification for differential was engaging in activity violative of the Act); *Uniroyal, Inc. v. Hoff and Thames, Inc., 511 F. Supp. 1060 (S.D. Miss. 1981)* (sales, with $ 200 combined value, to three customers were de minimis); *Dairy King, Inc. v. Kraft, Inc., 645 F. Supp. 126 (D.Md. 1986)* (lower prices offered to certain purchasers were in form of discounts offered to first time customers).

[14] In most respects, the district court dismissed the opinion of the expert. Although it did not exclude Dr. Larner's report specifically, it rejected each and every one of its contentions outright. The district court erred first, as it did not make the requisite finding as to whether or not this is the sort of data relied upon experts and Dr. Larner's field in conducting pricing analyses, *see Indian Coffee Corp. v. Proctor & Gamble Co., 752 F.2d 891 (3d Cir. 1985)*, and second, because the uncontested figures actually do indicate substantial price discrimination over time. It is clear enough from recent cases that at the summary judgment

of this price difference. Appendix A of this opinion sets out Dr. Larner's analysis in full, but we note with specificity here the year 1983 in which Feeser paid 22% more for Serv-A-Portion products than did Weis Markets. When Weis paid the higher price, it paid 9% more. In the remaining years, when Feeser received the disfavored price, it paid less than when Weis received the disfavored price; yet the number of times when Weis received the favored price were far greater than those instances in which Feeser received the favored price.

[47]** The comparisons of the Serv-A-Portion transactions in 1984 between Feeser and Tartan Foods and Feeser and Sky Brothers are more dramatic. In that year Feeser paid a higher price for Serv-A-Portion products approximately 80% more often than did Tartan and approximately 75% more often than Sky. When Sky received the favored price, it was 24% lower than the price offered Feeser. In comparison, on the few occasions when Feeser received the favored price, it was only 9% lower than the disfavored prices. Similar, though not as disparate, figures characterize the magnitude of the price difference for Serv-A-Portion products between Feeser and Tartan. *See* Appendix A.

[*1539] Another compelling factor considered by courts ***HN13***[] in determining competitive injury at the customer level is the duration of the price discrimination. Generally, the longer the duration, the more likely injury will be found. *See* *Rose Confections, Inc., 816 F.2d at 385* (seller absorbed freight costs to favored customer's plant for two years); *Hasbrouck v. Texaco, 842 F.2d at 1041* **[**48]** (price differential in effect for several years). The four-year period analyzed by Dr. Larner's report establishes the requisite duration of price discrimination to support an inference of competitive injury. [15]

[49]** We conclude that Dr. Larner's report also presents a question of material fact of competitive injury to Feeser caused by Serv-A-Portion's pricing. For four years, Weis Markets received favored pricing a significant number of times and of a magnitude in a market where the parties acknowledge that customer loyalty is compromised at two cents a case. And, for the one year in which discovery was permitted in regard to Tartan Foods and Sky Brothers, the numbers demonstrate that they too were the benefactors of favorable pricing.

Thus, under both tests, proof of lost sales or profits and substantial price difference over time, the record is adequate to defeat the summary judgment motion concerning whether section 2(a) has been violated.

IV.

Because the record evidence supports the existence of a question of harm to competition under section 2(a), we direct our inquiry to the extent of actual injury incurred under section 4. *J. Truett Payne, 451 U.S. at 562*.

HN14[] While injury to competition dominates concern in demonstrating a section 2(a) violation, to recover under section **[**50]** 4 a plaintiff must prove a causal connection between the price discrimination and actual damage suffered. *Perkins v. Standard Oil Co., 395 U.S. 642, 648, 23 L. Ed. 2d 599, 89 S. Ct. 1871 (1969)*. This actual

---

stage the judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

[15] Feeser's economist, Dr. Larner, also prepared an analysis comparing the average price paid by Weis and Feeser for six key Serv-A-Portion products for a six-month time period in 1984. The products used were identified by Weis as being particularly important in the portion control market, and the time period selected was, according to Larner, a conservative one during which he believed that the extent of the price discrimination against Feeser, and in favor of Weis, was not as great as in other relevant time periods. His analysis revealed that Weis received lower prices than Feeser on five of these six key products, and that Weis' resale prices were lower on each of the five products than were Feeser's *even though Weis had a higher margin than Feeser on four of the products*. Thus, Larner's analysis is capable of supporting the inference that, for this six-month period, Weis was passing on some of the savings it received from Serv-A-Portion, savings that allowed it to charge a lower resale price than Feeser while retaining a higher profit margin. As such, this analysis, especially when coupled with evidence that Weis' cost was the basis for its selling price to customers, is highly probative of competitive injury, *see* *Morton Salt, 334 U.S. 37, 47, 92 L. Ed. 1196, 68 S. Ct. 822 (1948)* (a showing that price discrimination was sufficient in amount to influence resale prices was "in itself . . . adequate to show competitive injury"); and bolsters the evidentiary force of the testimony of Feeser's sales people, and Larner's own less detailed pricing analysis for years 1982-1985.

damage requirement has been construed to impose a burden of proof greater than for a section 2 violation, since under that preventative section, evidence need only establish that injury *may* result. J. Truett Payne, 451 U.S. at 562. The plaintiff's proof of damages is facilitated by the rule that once the plaintiff has met its burden of proving the fact of damage, some uncertainty with respect to the amount of damages will not preclude recovery. *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 75 L. Ed. 544, 51 S. Ct. 248 (1931)* (under Sherman Act). The Supreme Court's traditional rule concerning the exactitude required in proving damage is that antitrust plaintiffs are excused from "'an unduly rigorous standard of providing antitrust injury.'" *Texaco v. Hasbrouck, 58 U.S.L.W. at 4814*, *quoting* *J. Truett Payne, 451 U.S. at 565*.

The Supreme Court rejected the so-called **[**51]** automatic damage theory, that a jury could **[*1540]** be permitted to infer the requisite injury and damage under § 4 from a showing of substantial price discrimination, in *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. at 561*. While the Supreme Court has lessened the stringency of proof requirements under § 4 because of the difficulties of showing exactly what position the plaintiff would have been in absent the defendant's violations of the antitrust laws, *id. at 566-67*, at least some attempt to link the discrimination to harm to the plaintiff must be made. In *Hasbrouck*, the Court of Appeals for the Ninth Circuit held that damages may not be based on the amount of discrimination, but on estimates of plaintiffs' sales absent the discrimination. *842 F.2d at 1043* *quoting* *J. Truett Payne, 451 U.S. at 557* (damages awarded on plaintiff's estimate of possible sales minus the violation), *citing* *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 123-24, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*; [16] *see also* *Edward J. Sweeney and Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 118-119 n. 6* **[**52]** ("the amount of illegal discrimination can only be used to quantify damages if the plaintiff demonstrates that favored purchasers lowered their prices in an amount equivalent to the illegal benefit they received.").

The less than stringent proof requirements of § 4 are satisfied **[**53]** here by (a) the direct evidence of lost sales discussed *supra* (b) the evidence that the substantial price discrimination reflected in the resale prices of Feeser and the favored competitors directly resulted in Feeser losing certain sales and losing profits on other sales because it had to cut its margins and (c) Dr. Larner's expert report outlining the magnitude of the price difference. Although Dr. Larner's report did not take the next step and estimate the amount, in dollars and cents, of damages incurred as a result of the price difference, discovery was not extended to this point of calculation.

We recognize that an inference may be drawn, from the wording of the statute, that de minimis violations are *not* actionable: the effect of a price discrimination must be *substantially* to lessen competition. Feeser has, however, by the evidence proffered through the depositions and affidavits and Dr. Larner's report, met its burden of establishing a genuine issue of fact far above the de minimis level as to the existence of the element of the extent of injury caused by Serv-A-Portion's pricing policies to defeat the entry of summary judgment against it.

V.

Sherman Act

[54]** ***HN15***[] *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1914)*, provides, in pertinent part, as follows:

---

[16] To estimate its lost sales at trial, Hasbrouck's expert presented a market analysis comparing Hasbrouck's actual prices, volumes and profits to its estimated amount absent the discrimination. The expert utilized economic projections based upon various assumptions such as assuming Texaco did not offer a favored price to its competitors and assuming that Texaco lowered its price to Hasbrouck.

> On appeal, the Supreme Court decided that: even if some portion of some of the respondent's injuries may be attributable to the conduct of independent retailers, the expert testimony nevertheless provided a sufficient basis for an acceptable estimate of the amount of damages.

Hasbrouck, 58 U.S.L.W. at 4814.

> Every contract, combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce among the several States . . is declared to be illegal. . . .

15 U.S.C. § 1. As with the Robinson-Patman Act, ***HN16***[] for activity to be actionable under the Sherman Act it must result in the type of injury the antitrust laws were intended to prevent and must flow from that which marks the defendant's acts as unlawful. *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 110 S. Ct. 1884, 109 L. Ed. 2d 333, 1990 U.S. LEXIS 2543 (1990)*. [17] As distinguished **[*1541]** from the Robinson-Patman Act, the target of this ***antitrust law*** is "the protection of competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 329, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. *See* *Zoslaw v. MCA Distributing Corp., 693 F.2d 870, 887 (9th Cir. 1982)* **[**55]** ("the Supreme Court has recognized that the price discrimination that results where buyers seek competitive advantage from sellers encourages the aims of the Sherman Act, a respect in which the Sherman Act is inconsistent with the aims of the Robinson-Patman Act . . . while appellants point to injury to their particular business, they do not make the necessary showing of a substantially adverse effect on competition in the record market in general" to sustain a Sherman Act claim).

In *Tunis Brothers Co. v. Ford Motor Co., 763 F.2d 1482 (3d Cir. 1985),* **[**56]** *vacated*, *475 U.S. 1105, 106 S. Ct. 1509, 89 L. Ed. 2d 909 (1986)*, *on remand*, *823 F.2d 49 (1987)*, *cert. denied*, *484 U.S. 1060, 108 S. Ct. 1013, 98 L. Ed. 2d 979 (1988)*, we found ***HN17***[] the following four elements necessary to sustain a successful Sherman Act violation:

> (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse anti-competitive effects within the relevant product and geographic markets; (3) that the objects of the conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiffs were injured as a proximate result of that conspiracy.

Id. at 1489.

In *Tunis*, on remand from the Supreme Court, we addressed the standard to be employed by district courts on summary judgment motions in antitrust conspiracy cases in light of the Court's then recent decision in *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*. Particularly **[**57]** relevant to us in *Tunis Brothers*, and of equal importance in the matter *sub judice*, was the Court's statement in *Matsushita* that:

> ***HN18***[] If the antitrust defendant's conduct is consistent both with permissible competition and illegal conspiracy, evidence of such conduct 'does not, standing alone, support an inference of antitrust conspiracy.' 475 U.S. at , 106 S. Ct. at 1357. In such a situation, 'to survive a motion for summary judgment . . ., a plaintiff seeking damages for a violation of [Sherman Act*] § 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.' *Id.* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 1471, 79 L. Ed. 2d 775 (1984))*. In other words, such a plaintiff 'must show that the inference of [illegal] conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed [the plaintiff].'

Tunis Brothers v. Ford Motor, 823 F.2d at 50.

---

[17] The goals of the Sherman Act and the Robinson-Patman Act also do not mirror one another. In *Great Atlantic & Pacific Tea Co. v. FTC, 440 U.S. 69, 82, 83, 59 L. Ed. 2d 153, 99 S. Ct. 925 n. 16 (1979)*, the Supreme Court noted that price discrimination with advantageous results for buyers versus a competitive edge for sellers encourages the aims of the Sherman Act, and in that respect, can be viewed as inconsistent with the Robinson-Patman Act.

Thus, **[**58]** under the *Matsushita* standard, we must decide whether the record supports a reasonable inference that Serv-A-Portion's pricing policies resulted from an illegal agreement with Weis Markets rather than independent action by Weis Markets and, if so, whether this concerted activity had an adverse impact on the overall competitive process.

The portion of the record relevant to the element of conspiracy concerns Serv-A-Portion's bid pricing and the activity by Weis Markets in utilizing this system to its advantage. To render a determination as to the possible inference to be drawn from this evidence, however, whether it be consistent with independent or concerted illegal action, would constitute speculation.

The current record does not disclose the element of illegal conspiracy necessary to sustain a Sherman Act violation. We note that Feeser was instructed by the district court's order to confine its discovery request to competition and injury between itself and other food distributors. As we have recognized, proof of a Sherman Act violation requires the additional element of **[*1542]** an illegal conspiracy to exclude a competitor from the market. Feeser, to date, has not had **[**59]** an adequate opportunity to explore the possible existence of this essential element of a Sherman Act claim. [18] Discovery in this case was limited to competitive impact and injury and although we have concluded that Feeser, as the non-movant, has met its burden of producing sufficient evidence to sustain its burden of proof of these elements under the Robinson-Patman Act, we are ill-equipped to render a similar determination under the Sherman Act.

[60]** Our inquiry concerning the sufficiency of the evidence to sustain a Sherman Act violation does not end here. We must pursue the issue we found immaterial to our Robinson-Patman discussion -- has the activity under scrutiny had the requisite anti-competitive effect on the food distribution industry? In this market competition is intense and we must decide whether, within this purview, there is sufficient evidence to demonstrate a question of fact as to whether the vitality of the competition among the participants in the market has been dissipated.

The injury to Feeser has already been discussed.

In addition to the uncontested fact that Serv-A-Portion offered different prices to Feeser than it did to Weis, Tartan Foods and Sky Brothers, the record also reveals discriminatory pricing to other non-party competitors as well. Joanne Straw testified by affidavit that her company, W.R. Straw, Inc., lost sales of Serv-A-Portion products to Pennsylvania State University because Weis Markets' prices to Penn State were lower than Straw's costs from Serv-A-Portion. Joseph Spagnola, a buyer for R&R Provision Company, another participant in the relevant market, testified that he received complaints **[**61]** from his salespeople that they were losing sales of Serv-A-Portion products to Weis Markets because R& R's prices were too high. His investigation revealed that Weis' resale prices on Serv-A-Portion products were as low as R & R's costs for identical Serv-A-Portion products. We are aware that the district court rejected this testimony because it constituted hearsay based upon information from Spagnola's salespeople, but the district court erred in this regard.

In *Williams v. Borough of West Chester, 891 F.2d 458 (3d Cir. 1989)*, we noted that *Fed. R. Civ. P. 56(e)* requires the production, at the summary judgment stage, of evidence "'as would be admissible at trial' . . . and thus 'reducible to admissible evidence.'" *Id. 466 at 12*. We cited *Celotex v. Catrett*, however, in which the Supreme Court rejected the view that the non-moving party must produce evidence in a form that would be admissible at trial in order to avoid summary judgment. *477 U.S. at 324*. We thus concluded that ***HN19***[] hearsay evidence produced in an affidavit opposing summary **[**62]** judgment may be considered if the out-of-court declarant could later

---

[18] The dissent notes that the dismissal of Feeser's Sherman Act claim could be affirmed because Feeser's *Rule 56(f)* affidavit did not adequately outline the additional evidence necessary to demonstrate the presence of the conspiracy. *Diss. Op.* at 1546 n. 2. Although the dissent correctly states the law of specificity concerning *Rule 56(f)* affidavits, it is not applicable here. At Serv-A-Portion's request, the district court limited discovery to the elements of competitive injury. Serv-A-Portion's summary judgment motion was directed only to the issue of damage to competition. It would be unfair to impose upon Feeser an obligation to specify the type of evidence it needed to uncover to substantiate the conspiracy element of its Sherman Act claim when it was without notice that the district court intended to consider and resolve the entire Sherman Act claim.

present the evidence through direct testimony, i.e., in a form that "would be admissible at trial." *Williams, 891 F.2d at 465-66 n. 12*. Here, there is no indication that Spagnola's salesforce would be unavailable to testify at trial. The averments of Spagnola's affidavit are capable of proof through admissible evidence and we will consider them now on de novo review.

Reviewing these affidavits, we conclude that Feeser has presented sufficient evidence to raise the inference that competition has been harmed by Serv-A-Portion's discriminatory pricing practices. When three participants in a limited market aver that they were unable to sell their products to customers because other favored competitors **[*1543]** were offering better prices to these customers based on lower costs from Serv-A-Portion, damage to the vitality of the market has been adequately demonstrated for summary judgment purposes. Feeser's demonstration of an overall anti-competitive impact, in combination with the limited opportunity for discovery, compels us to vacate the grant of summary judgment on this Sherman Act claim and **[**63]** to remand to permit further discovery.

VI.

As described in the complaint, Juniata Foods, Inc., is a food distribution business located in Lewistown, Pennsylvania. Juniata is commonly owned with Feeser.

The district court, in a footnote, dismissed Juniata from the lawsuit because it accepted the contention of Serv-A-Portion that Juniata never purchased products directly from Serv-A-Portion. The court determined that the law of this circuit dictates that the plaintiff be a direct purchaser before it may assert a Robinson-Patman claim.

Our controlling cases on this question of standing are *Klein v. Lionel Corp., 237 F.2d 13 (3d Cir. 1956)* and *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105 (3d Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*. In *Klein*, the district court granted summary judgment in favor of the defendant on the ground that because the plaintiff retailer bought the defendant's products through wholesalers and jobbers, it had no cause of action against the defendant. We affirmed, holding that a retailer who purchased electric toy trains and accessories from a middleman **[**64]** was not a "purchaser" within the meaning of the Clayton Act. *Id.* at 15. We subsequently affirmed our holding in *Klein in Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d at 122*, when we dismissed claims for damages against the seller by companies who purchased goods only from a direct buyer of the defendant-seller and not directly from the defendant itself.

Although the district court correctly stated the law of standing, we note that the record does not resolve the question of whether Feeser was in fact an indirect purchaser. Feeser points to evidence proffered by it that Juniata had for many years acquired Serv-A-Portion products with Serv-A-Portion's full knowledge and consent by consolidating its purchases with those of its sister corporation, Feeser. Feeser characterized this aspect of its relationship with Juniata as that of a purchasing agent. Specifically, Feeser refers to the affidavit of John M. Tighe, the controller of both Feeser and Juniata. [19] Tighe avers that Feeser and Juniata are managed by an identical core of senior executives ultimately responsible to a single individual, Lester Miller, the president and sole shareholder of both **[**65]** companies. Tighe then claims that in 1975, Serv-A-Portion agreed with Feeser and Juniata that in order to maximize efficiency all shipments of Serv-A-Portion products would be delivered to Feeser in Harrisburg and all invoices would be billed through a centralized selling and shipping system. Accompanying this system, according to Tighe, was an understanding that a portion of the products sent to Feeser would be redelivered by Feeser to Juniata.

Serv-A-Portion asserts that certain invoices indicate that not only did Juniata buy Serv-A-Portion products from Feeser, but that it paid a premium price for the products acquired from Feeser. Serv-A-Portion argues **[**66]** that to credit Juniata's classification as anything other than as an indirect purchaser is legally indefensible as it would result in a spread of Robinson-Patman liability throughout the distribution chain.

---

[19] Serv-A-Portion moved to strike the Tighe affidavit. In its order granting summary judgment, the district court dismissed, save one, all of Serv-A-Portion's motions to strike as moot. In light of our decision that there exists material issues of fact, the findings of mootness concerning the evidentiary questions, newly viable, are necessarily dissolved.

A material fact here is the method by which Juniata acquires its portion-controlled products from Serv-A-Portion. Although the Tighe affidavit is persuasive, the record presents conflicting evidence. Thus, this question of Juniata's standing was improperly resolved at the summary **[*1544]** judgment stage and Juniata will be reinstated as a party plaintiff in this litigation.

VII.

Conclusion

The order of the district court granting summary judgment in favor of Serv-A-Portion will be vacated and the case remanded for further proceedings consistent with this opinion. The pendent state claims, dismissed because the federal question claims were resolved, will be reinstated.

Dissent by: STAPLETON (In Part)

Dissent

[*1545] STAPLETON, Circuit Judge, concurring and dissenting

I agree with the court that the defendants were not entitled to summary judgment on the plaintiffs' secondary-line Robinson-Patman Act claim. However, **[**67]** I respectfully dissent from the court's reversal of the summary judgment in favor of the defendants on plaintiffs' Sherman Act claim. Because Feeser has not met its burden of producing evidence tending to show that the challenged price discrimination affected competition in a relevant market as required under *§ 1* of the Sherman Act, *15 U.S.C. § 1*, I would affirm the summary judgment entered against Feeser on its second claim.

As the court finds, the language of § 2(a) of the Robinson-Patman Act, its legislative history, and Supreme Court precedent interpreting it compel the conclusion that a victim of secondary line price discrimination may show "competitive injury" regardless of the general health of the victim's business or the market in which the victim operated. Moreover, as the court's opinion also demonstrates, Feeser met its burden of producing evidence tending to show a reasonable possibility that Serv-A-Portion's discriminatory pricing practices are harmful to competition between Feeser and the beneficiaries of that discrimination. *Falls City Industries, Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 434-35, 75 L. Ed. 2d 174, 103 S. Ct. 1282 (1983).* **[**68]** It did this both by presenting direct evidence of lost sales, and by producing sufficient evidence of a substantial price discrimination between itself and its competitors over time, so as to implicate the *Morton Salt* inference. *Id.* In the latter regard it is especially significant that Feeser has produced evidence indicating that Serv-A-Portion's discriminatory pricing was passed on by its favored distributors in the form of lower resale prices. *FTC v. Morton Salt, 334 U.S. 37, 47, 92 L. Ed. 1196, 68 S. Ct. 822 (1948)* (a showing that price discrimination was sufficient in amount to influence resale prices was "in itself . . . adequate to show competitive injury"). Finally, by its evidence of lost sales alone, Feeser has produced sufficient evidence to meet its burden at the summary judgment stage of creating a genuine issue of material fact as to whether the challenged price discrimination actually injured it for purposes of § 4 of the Clayton Act. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114, 23 L. Ed. 2d 129, 89 S. Ct. 1562 n. 9 (1969)* (the "burden of proving the fact of damage under § 4 of the Clayton Act is satisfied **[**69]** by . . . proof of some damage flowing from . . . [the antitrust violation]; inquiry beyond this point goes only to the amount and not the fact of damage"); *Falls City, 460 U.S. at 437* (if some of a plaintiff's injury is attributable to price discrimination, defendant is responsible to that extent). [1] I also agree that there is a genuine dispute as to whether Juniata can be considered a "purchaser" with standing to sue under our precedent in *Klein v. Lionel Corp., 237 F.2d 13 (3d Cir. 1956)*, and *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105 (3d Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*, and that the district court therefore erred in entering summary judgment against Juniata on this ground.

[70]** I part company with the court, however, when it concludes that Feeser has tendered **[*1546]** sufficient evidence to raise a genuine issue of material fact as to whether the price discrimination at issue in this case caused an adverse, anticompetitive effect in a relevant market for purposes of *§ 1* of the Sherman Act. To the contrary, Feeser failed to make any significant response to Serv-A-Portion's summary judgment argument that Feeser was unable to show an injury to competition in a relevant market. In particular, Feeser introduced no market analysis of any kind purporting to show that Serv-A-Portion's discriminatory pricing arrangement with Weis (assuming such an agreement existed) [2] produced an adverse, anticompetitive effect within a relevant product and geographic market. This left the record silent with respect to an essential element of Feeser's *§ 1* claim.

[71]** A vertical restraint, such as an agreement between Serv-A-Portion and Weis to deal with each other on more favorable terms than Serv-A-Portion would deal with Feeser, is not a *per se* violation of *§ 1*, but must be dealt with under a rule of reason analysis. *See* *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* (vertical restraints, such as an agreement between a manufacturer and a dealer to terminate another "price cutting" dealer, are not *per se* violations of *§ 1* absent an agreement between the conspiring dealer and the manufacturer as to resale prices); *Alliance Shippers v. Southern Pacific Transportation Co., 858 F.2d 567, 570 (9th Cir. 1988)* ("vertical arrangements resulting in price discrimination are not *per se* violations of the Sherman Act"); *Seaboard Supply Co. v. Congoleum Corp., 770 F.2d 367, 375 (3d Cir. 1985)* ("that a manufacturer may give preferential pricing and delivery terms to one distributor does not establish a *per se* violation of *section 1* of the Sherman Act even though other distributors suffer losses in sales").

Under a rule of **[**72]** reason analysis, a vertical restraint violates *§ 1* only if either its purpose or its effect is to adversely affect competition in a relevant market. *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 26 (3d Cir.)* ("In the context of *§ 1*'s prohibition of conspiracies in restraint of trade, except where practices fall under a judicially created *per se* ban, a finding of illegality presupposes a determination in any

---

[1] I cannot agree with the court's suggestion that there are "*de minimis* violations" of the Robinson-Patman Act that do not count as such. I acknowledge that circumstances may exist where price differentials are so *de minimis* that they could not create a reasonable possibility that competition between the favored and disfavored purchasers would be harmed. Where, however, "'the record indicates a price differential substantial enough to cut into the purchaser's profit margin . . . [or one] that, if reflected in a resale price cut, would have a noticeable effect on the decisions of customers in the retail market, an inference of injury may be properly indulged.'" *Boise Cascade Corp. v. FTC, 267 U.S. App. D.C. 124, 837 F.2d 1127, 1153 (D.C. Cir. 1988)* (Mikva, J. dissenting) (quoting *Foremost Dairies, Inc. v. FTC, 348 F.2d 674, 680 (5th Cir. 1965))*.

[2] As was the district court, I am willing to assume, for purposes of analyzing whether Feeser has produced sufficient evidence of adverse competitive impact under *§ 1* of the Sherman Act, that the agreement alleged in Feeser's complaint existed, i.e., a conspiracy between Serv-A-Portion and Weis whereby Weis would receive more favorable prices than Feeser. However, if an independent ground for affirmance were not available, affirmance might well be appropriately based on the lack of record evidence of a conspiracy, given that discovery in this case went on for over a year prior to the order limiting discovery to issues of competitive injury, and Feeser's *Rule 56(f)* affidavit did not indicate what additional discovery it needed to uncover evidence of an illegal agreement. *See* *Dowling v. City of Philadelphia, 855 F.2d 136 (3d Cir. 1988)* ("This court has interpreted *Rule 56(f)* as imposing a requirement that a party seeking further discovery in response to a summary judgment motion submit an affidavit specifying, for example, what particular information is sought; how, if uncovered, it would preclude summary judgment; and why it has not previously been obtained."); *see also,* *Hancock Industries v. Schaeffer, 811 F.2d 225, 230 (3d Cir. 1987)*; *Koplove v. Ford Motor Co., 795 F.2d 15, 18 (3d Cir. 1986)*; *Mid-South Grizzlies v. National Football League, 720 F.2d 772, 781 (3d Cir. 1983)*, *cert. denied*, ***467 U.S. 1215, 104 S. Ct. 2657, 81 L. Ed. 2d 364 (1984)***. Feeser was thus well apprised of the need to produce adequate evidence on this element of its claim, and filed a, albeit inadequate, *Rule 56(f)* affidavit to respond to this portion of Serv-A-Portion's motion.

given case that the effect upon competition in the marketplace is substantially adverse.") (quotations omitted), *cert. denied*, *439 U.S. 876, 99 S. Ct. 214, 58 L. Ed. 2d 190 (1978)*; *accord* *Garshman v. Universal Resources Holding, Inc., 824 F.2d 223, 231 (3d Cir. 1987)*; *Tunis Bros. Co., Inc. v. Ford Motor Co., 763 F.2d 1482, 1490 (3d Cir. 1985)*, *vacated on other grounds*, *475 U.S. 1105, 106 S. Ct. 1509, 89 L. Ed. 2d 909 (1986)*; *Cernuto, Inc. v. United Cabinet Corp., 595 F.2d 164, 166 (3d Cir. 1979)*; *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1346 (3d Cir. 1975)*. Thus, unlike the Robinson-Patman Act, the Sherman Act **[**73]** protects competition in the marketplace and not individual competitors harmed by price discrimination. *Monahan's Marine, Inc. v. Boston **[*1547]** Whaler, Inc., 866 F.2d 525, 529 (1st Cir. 1989)*.

As a result, Feeser cannot defeat summary judgment by merely showing that Feeser and other disfavored distributors lost sales because Weis, Tartan and Sky were able to offer lower prices to end users of Serv-A-Portion portion control products as a result of the pricing advantage they received from Serv-A-Portion, and that Serv-A-Portion realized that this would occur. *Seaboard Supply Co., 770 F.2d at 375*; *Monahan's Marine, Inc., 866 F.2d at 525* (where favoritism in prices for certain dealers was not likely to concentrate the relevant market or drive smaller dealers out, the fact that a disfavored dealer was harmed did not render a price discrimination agreement unreasonable under *§ 1*); *Zoslaw v. MCA Distributing Corp., 693 F.2d 870, 887 (9th Cir. 1982)* (indicating "that the price discrimination which results where buyers seek competitive advantage from sellers encourages the aims of the Sherman Act, a respect in **[**74]** which the Sherman Act is inconsistent with the aims of the Robinson-Patman Act," and affirming a grant of summary judgment against a plaintiff victimized by price discrimination where plaintiff did not show an adverse effect on competition in the relevant market), *cert. denied*, *460 U.S. 1085, 76 L. Ed. 2d 349, 103 S. Ct. 1777 (1983)*. The Sherman Act is not offended by unfair subsidies to some competitors that result in a price war and diminished profits for some disfavored competitors, unless those subsidies lead to diminished price competition in the relevant market and higher prices for consumers. *AAA Liquors, Inc. v. Joseph E. Seagram & Sons, 705 F.2d 1203, 1207-08 (10th Cir. 1982)* (*section 1* allows a supplier to start a "price war," and does not require suppliers to offer the same prices to customers in a given geographical area, absent a purpose to exclude disfavored buyers from the relevant market or some adverse effect on competition in that market), *cert. denied*, *461 U.S. 919, 77 L. Ed. 2d 290, 103 S. Ct. 1903 (1983)*; *cf.* *Tunis Bros. Co., Inc. v. Ford Motor Co., 763 F.2d at 1490 n. 13* ("In addition to **[**75]** showing the existence of a conspiracy or combination, plaintiffs must show an adverse impact on competition to prove a *section 1* claim. The termination of a dealer or rejection of a dealer application, even if done unfairly, does not by itself establish injury to competition.").

Because the Sherman Act protects competition and not competitors, Feeser had to show that the complained of price discrimination had an adverse effect on competition in a relevant market defined by product and geographic scope. [3] **[**77]** On the record before us, however, it would be impossible to rationally conclude that Serv-A-Portion's pricing practices were intended to [4] **[**78]** or were **[*1548]** likely to lead to a substantial lessening of

[3] The record is unclear as to the precise geographic area allegedly affected by the unlawful agreement alleged by Feeser. Nor is it apparent whether Feeser contends that the product market is all portion control products or whether it contends that Serv-A-Portion portion control products can in themselves constitute a product market for *§ 1* purposes. *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 27 (3d Cir. 1978)*, (quoting *Brown Shoe Co., Inc. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))* ("The outerbounds of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it."). Feeser does advance the proposition that Serv-A-Portion products occupy a unique niche in the portion control market because of their combination of moderate price and good quality. This proposition suggests that if Serv-A-Portion's distributors fail to maintain their prices at a reasonable level, end users will either switch to higher quality products (made price competitive because of Serv-A-Portion's increased prices) or considerably cheaper products (the rise in Serv-A-Portion's prices not being justified by the quality difference between its products and cheaper ones).

[4] With respect to intent, Feeser's amended complaint alleges only an agreement to engage in price discrimination, and does not allege that this agreement was designed to drive it from the portion control product market altogether. Compare *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1347 (3d Cir. 1975)* ("A combination of distributors, which through unfair practices eliminates a competitor and leaves it in such a condition that it lacks the ability to continue business as an interbrand competitor, has an adverse effect on competition.").

competition in some designated market. Indeed, there is nothing in the record indicating that the complained of price discrimination did anything other than spark a vigorous round of competition in a portion control market which was already extremely competitive. Nothing in the record indicates that disfavored distributors like Feeser could not easily transfer to another manufacturer of portion control products. The only disfavored distributor that dropped Serv-A-Portion portion **[**76]** control products was R & R, and R & R did not retreat from competition with Weis in the portion control market. Instead, it began to distribute other brands of portion control products, and thus increased interbrand competition in the relevant market. The fostering of just such competition is, of course, the "primary concern of the antitrust laws." *Business Electronics Corp., 485 U.S. at 726*. [5] Nor is this a case where a plaintiff without market power was disfavored by an agreement between a supplier and a powerful distributor who forced the agreement on the supplier so as to harm the plaintiff. There is no evidence that Feeser is smaller than Weis, or has less market power than Weis. *Monahan's Marine, 866 F.2d at 529*.

Rather, the only inference that could be drawn from this record would be that the discriminatory pricing was unlikely to have an adverse effect on the portion control market (1) because disfavored distributors like Feeser could easily begin to distribute other brands of portion control **[**79]** products; (2) because Serv-A-Portion, according to Feeser, favored not one, but three distributors of its own products and both the intrabrand competition among them and the interbrand competition in the market would prevent them from exploiting their status in a way that would hurt consumers; and (3) because there are no discernible barriers to entry to this market.

I thus conclude that the present record does not reflect a material dispute of fact as to whether the alleged agreement between Serv-A-Portion and Weis had an adverse impact on competition in a relevant market. I would affirm the judgment in favor of the defendants on the Sherman Act claim.

End of Document

In its briefs to the district court and this court, Feeser has, at best, vaguely alleged that Serv-A-Portion intended to hamper Feeser's ability to compete with Weis in sales of Serv-A-Portion's portion control products. No record evidence supports this assertion, however. Further, the proposition that Serv-A-Portion would intend to do this seems facially implausible. As Judge Breyer has explained, a "supplier himself typically has an economic interest in encouraging competition among his dealers, and thus preventing the emergence of any 'dealer monopoly.' Other things being equal, a profit-maximizing dealer monopolist would set retail prices that, from the supplier's perspective, are too high and unduly restrict the product's sales." *Monahan's Marine, Inc. v. Boston Whaler, Inc., 866 F.2d 525, 526 (1st Cir. 1989)*; *see also* *Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 56, 53 L. Ed. 2d 568, 97 S. Ct. 2549 & n. 24 (1977)* (indicating that economists believe that once a manufacturer sets its own price, the manufacturer desires intrabrand competition among its distributors since this leads to lower retail prices and increased sales). Most important, as I discuss *infra*, even if Serv-A-Portion intended to give Weis an unfair advantage over Feeser, this would not violate *§ 1* unless it was part of a plan to cause some adverse effect on competition in a relevant market. The Sherman Act is not designed as a general prohibition on unfair business practices, it is designed to protect consumers and absent some purpose to harm them or some adverse effect upon their interests, the Act is not concerned with harm to a particular competitor.

[5] See also *Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. at 52 n. 19* ("Interbrand competition is the competition among the manufacturers of the same generic product . . . and is the primary concern of ***antitrust law***. . . . The degree of intrabrand competition is wholly independent of the level of intrabrand competition confronting the manufacturer. Thus, there may be fierce intrabrand competition among the distributors of a product produced by a monopolist and no intrabrand competition among the distributors of a product produced by a firm in a highly competitive industry. But when interbrand competition exists . . . it provides a significant check on the exploitation of intrabrand market power because of the ability of consumers to substitute a different brand of the same product.").

HN6[] **Federal & State Interrelationships, Federal Common Law**

The fact that a federal statute has been violated and some person harmed does not automatically give rise to a private cause of action in favor of that person. Rather, whether a private remedy should be implied is a matter of statutory construction and the principal inquiry is whether Congress intended to create the private right of action asserted.

Counsel: **[**1]** DEMPSEY & DEMPSEY (JOHN M. DEMPSEY, ESQ., of Counsel), Buffalo, New York, for Plaintiffs.

PHILLIPS, LYTLE, HITCHCOCK, BLAINE & HUBER (ALEXANDER C. CORDES, ESQ. & PAUL K. STECKER, ESQ., of Counsel), Buffalo, New York, for Defendant Genesee County.

DIEBOLD & MILLONZI (EDWARD J. WAGNER, ESQ., of Counsel), Buffalo, New York, for Defendant Prior Aviation Service, Inc.

Judges: John T. Curtin, United States District Judge.

Opinion by: CURTIN

Opinion

[*952] This action relates to the operation of the Genesee County Airport which is located near Batavia, New York, and owned by Genesee County ["County"], one of the defendants. Presently before the court for decision are the motions to dismiss for failure to state a claim brought by the County and Prior Aviation Service, Inc. ["Prior"], the other defendant. ***HN1***[] For the purposes of these motions to dismiss under *Rule 12(b)(6)*, the court must accept the plaintiffs' factual allegations as true.

The individual plaintiffs in this case, Will S. Guthrie, Walter C. Guthrie, and Walter C. Guthrie, Jr., are the sole shareholders and officers of the two corporate plaintiffs, Guthrie Aircraft, Inc. and Batavia Aviation, Inc. On or about May 28, 1977, the County terminated Batavia Aviation as **[**2]** the fixed base operator of the airport and, on July 1, 1977, entered into an agreement with the defendant Prior pursuant to which Prior became the fixed base operator at the airport. [1] The complaint alleges that the defendants have contracted, combined and conspired to restrain trade in violation of the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, with the intent to eliminate the plaintiffs as competitors in the air charter business. Plaintiffs also claim that the County has granted Prior an exclusive right to use the Genesee County Airport for air carrier activity, and has otherwise discriminated against the plaintiffs, in violation of the Federal Aviation Act ["FAA"], *49 U.S.C. §§ 1301, et seq.*, and § 1349(a) in particular.

Plaintiffs' **[**3]** complaint includes six counts, all of which contain factual allegations relating to the defendants' alleged exclusion of the plaintiffs from the Genesee County Airport. A summary of the factual situation is necessary for an understanding of defendants' motions. Sometime after the County terminated its agreement with Batavia Aviation, the County solicited bids for a contract to operate the airport, an effort which was unsuccessful. The County, however, subsequently accepted an offer by Prior to lease and operate the airport and, as noted above, Prior began its operation as fixed base operator on or about July 1, 1977. The plaintiffs allege that thereafter the County, together with Prior, forced Batavia Aviation and Guthrie Aircraft out of the airport terminal building and that the defendants have refused to allow plaintiffs to have any office space or "client information" in the terminal. It is also alleged that the County, with the knowledge and consent **[*953]** of Prior, forced plaintiffs to remove their tools from the maintenance hangar at the airport, although all other parties renting hangars at the airport were allowed to continue their use of the maintenance hangar. Moreover, the County, **[**4]** with the consent of Prior, is said to have informed the individual plaintiffs on June 27, 1977 that Aprils Instrument Service, Inc. ["Aprils"], occupying the second floor of the maintenance hangar, must vacate by June 30, 1977, ultimately resulting in the removal of Aprils and the "forced sale" of the individuals' 51% controlling interest in Aprils, at a loss of $ 25,000. Plaintiffs also claim that Prior, immediately upon entering its agreement with the County, told plaintiffs that Prior would need *all* of the space at the airport for its own operations, which is allegedly untrue.

---

[1] The district court in *Pinehurst Airlines, Inc. v. Resort Air Services, Inc., 476 F.Supp. 543, 553 (M.D.N.C. 1979)*, provided a description of a fixed base operator ["FBO"]: "An FBO provides services similar to those that a service station provides for those who operate automobiles."

In further steps to force plaintiffs out of the airport, plaintiffs allege that Prior, in concert with the County, raised the hangar rent 100% for plaintiffs only, and imposed an additional 100% surcharge upon the plaintiffs alone. This is said to have forced plaintiffs out of the Genesee County Airport. When, to avoid this higher rent and surcharge, the plaintiffs moved their airplanes to private property adjacent to airport runways, the defendants allegedly erected a snowfence; as a result plaintiffs' access to the airport was blocked and one airplane was "trapped" in a hangar and rendered useless to **[**5]** plaintiffs, who consequently had to sell the airplane at a loss.

The plaintiffs also claim that the County has refused to allow the Exxon Corporation to deliver any aircraft fuel to Batavia Aviation or to allow Batavia Aviation to deliver fuel on its own. Rather, the County has allegedly forced the plaintiffs to allow it to purchase fuel from Exxon under Batavia Aviation's name.

Finally, the plaintiffs allege that the County has received in the past federal funds to improve its airport pursuant to an agreement with the federal government wherein the County agreed not to discriminate between air carriers using the facility. Plaintiffs allege that the County and prior have conspired to violate that agreement and have, in fact, discriminated against Batavia Aviation with respect to rental and other rates at the Genesee county Airport. Indeed, plaintiffs allege that the County has entered into an agreement with Prior granting Prior an exclusive right to engage in air carrier activity at the airport, in violation of the FAA. The complaint also states that, at the time of its termination, Batavia Aviation was the only certified air carrier using the Genesee County Airport but that Prior **[**6]** is also a certified air carrier. The plaintiff's claim that the County and Prior have conspired to eliminate and prevent plaintiffs' air carrier business at the airport. [2]

[7]** The defendants have moved to dismiss plaintiffs' claim on the following grounds. First, the individual as opposed to the corporate plaintiffs are said to lack standing because the complaint fails to allege any direct injury from the alleged antitrust violation which they have suffered as a result of the defendants' actions. Second, the defendants contend that the Sherman Antitrust Act does not apply to conduct undertaken by a local government, like Genesee County, pursuant to state legislation which authorizes a restriction of competition. Prior argues additionally that the alleged conduct of the defendants does not violate the antitrust laws in any case. Third, the defendants argue that the plaintiffs have no **[*954]** standing under the FAA because no private right of action exists for the violation of the Act alleged in the complaint. Moreover, assuming that a private cause of action exists under the FAA, defendants assert that plaintiffs' claim is subject to the primary jurisdiction of the Federal Aviation Administration, and this court should decline to exercise its jurisdiction pending a determination by that agency. Finally, the defendants contend that since no valid federal claim is **[**8]** alleged, the state and common law claims should also be dismissed.

STANDING OF INDIVIDUAL PLAINTIFFS

The appropriate question to begin with is the standing of the individual plaintiffs. Where a statutory claim is alleged, the starting point in resolving such a question is the language of the statute. *See, e.g., Reiter v. Sonotone Corp., 442 U.S. 330, 337 (1979)*. ***HN2***[] Section 4 of the Clayton Anti-Trust Act provides that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States . . . ." *15 U.S.C. § 15*. For the purposes of this motion, the pertinent language is "injured in his business or property." Although the language itself provides few limitations, judicial interpretations have consistently required that ***HN3***[] a plaintiff allege an injury *directly* resulting from a violation in order to make out a claim under the anti-trust laws. *Bookout v. Schine Chain Theatres, Inc., 253 F.2d 292, 294 (2d Cir. 1958)*.

[2] The defendants have categorized the various counts in plaintiffs' complaint as setting forth only two federal claims, a Sherman Act claim in Count I and an FAA claim in Count VI, the rest being pendent state claims. Although plaintiffs' complaint could be more clearly drawn, a broad reading suggests that all of the counts are interrelated and form part of their antitrust and FAA claims. Each count clearly realleges each allegation previously made in the preceding counts. Moreover, at the very least, counts II, III, and IV elaborate and form part of the antitrust claim and Count V appears related to plaintiffs' FAA claim. To the extent that distinct state law claims are also presented *(e.g.,* defendants characterize Count V as a breach of contract claim), defendants' motion to dismiss these must fail because of the court's decision as to the antitrust claim.

Neither shareholders, whether few or many, nor officers or directors of a corporation have a cause of action where the alleged antitrust violation interferes **[**9]** with and injures solely the business conducted by that corporation. *Bookout, supra; Mendenhall v. Fleming Co., Inc., 504 F.2d 879, 881 (5th Cir. 1974)*; *Martens v. Barrett, 245 F.2d 844, 846 (5th Cir. 1957)*; *Gerli v. Silk Assoc. of America, 36 F.2d 959 (2d Cir. 1929)*; *see also Vincel v. White Motor Corp., 521 F.2d 1113, 1119 (2d Cir. 1975)*. Such an interference would be a corporate injury for which the corporation may seek redress and not the individual shareholders and officers, even though they may be the principals of the corporation and suffer an adverse economic impact. Nor may a shareholder allege as an injury that he was required to sell his corporate stock at a depressed value because of an antitrust violation, for such a loss, though a real economic harm, is indirect and is duplicative of the corporation's claim. *Bookout, supra; Mendenhall, supra; Martens, supra.* Application of these principles requires an examination of the injuries alleged in plaintiffs' complaint.

After a review of the injuries itemized in plaintiffs' complaint, I find that none alleges a direct injury to the individual plaintiffs as required by the antitrust laws. First, the forced **[**10]** sale of the plaintiffs' "majority interests in Aprils Instrument Services, Inc., at a loss of approximately 25000 dollars," para. 14(J)(a), is an injury in the form of the diminution in the value of ownership, which is not a direct injury to the individuals. Second, the plaintiffs' allegations of "defendants' failure to allow [plaintiffs] office space in the terminal facility," para. 14(J)(c); of the defendants' interference with plaintiffs' right to contract for aviation fuel with Exxon, para. 24; and of the defendants' usurpation of a gasoline contract between Exxon and Batavia Aviation, para. 27, are all interferences and injuries which may be alleged only by the corporate and not the individual plaintiffs. Third, the loss of $ 10,000 in the sale of a plane trapped in a hangar due to the conspiratorial actions of the defendants, para. 20, is similarly an injury for which only one of the companies controlled by the plaintiffs may seek redress, as the complaint reads now; there is no factual allegation that one of the individual plaintiffs owned this airplane. Finally, without reaching whether an allegation that a party has been forced to incur attorneys' fees is an injury sufficient **[**11]** to support an antitrust action, plaintiffs' allegation that they have had to incur attorneys' fees in connection with this dispute is not recognizable because it would be the claim of the corporation in any case.

[*955] Therefore, the defendants' motion to dismiss this action insofar as it is maintained by the named individuals is granted.

STATE ACTION EXEMPTION

In a series of recent decisions, the Supreme Court has considered the extent to which the federal antitrust laws are applicable to anticompetitive conduct sanctioned in some way by state authority. *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389 (1978)*; *Bates v. State Bar of Arizona, 433 U.S. 350 (1977)*; *Cantor v. Detroit Edison Co., 428 U.S. 579 (1976)*; *Goldfarb v. Virginia State Bar, 421 U.S. 773 (1975)*. These decisions have construed the earlier decision of *Parker v. Brown, 317 U.S. 341 (1943)*, in which the Supreme Court held that the antitrust laws were not intended to apply to state action. The *City of Lafayette* decision provides the most guidance in resolving whether the *Parker* doctrine of state action immunity insulates the defendants in this case.

In *City of Lafayette,* **[**12]** the Supreme Court determined that a city is not automatically entitled to the state action exemption by virtue of its status as a state governmental entity. Rather, the plurality opinion "concluded that the *Parker* doctrine exempts only anti-competitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, *pursuant to state policy to displace competition with regulation* or *monopoly public service." City of Lafayette, supra, at 413* (emphasis supplied). Further explanation was provided in the plurality opinion. In order to assert a state action defense to an antitrust suit, a municipality would not necessarily have to "be able to point to a specific, detailed legislative authorization." But,

while a subordinate governmental unit's claim to *Parker* immunity is not as readily established as the same claim by a state government sued as such, we agree with the Court of Appeals that an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found "from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind **[**13]** of action complained of." 532 F.2d, at 434.

Id., at 415.

Thus, a court must examine the state statute which purportedly contains the authorization for the anti-competitive conduct alleged. *See, e.g.,* *Kurek v. Pleasure Driveway and Park District of Peoria, 557 F.2d 580, 590 (7th Cir. 1977)*, *remanded for reconsid., 435 U.S. 992 (1977)*, *reinstated,* *583 F.2d 378 (7th Cir. 1978)*. The County and Prior point to Sections 350 and 352 of the New York General Municipal Law as providing the state authorization for their conduct necessary to invoke the state action exemption. The state legislature has authorized the local legislative body of a county to establish and operate an airport in § 350 of the General Municipal Law (Mckinney's 1974). In § 352, the legislature has delineated the powers which the County may exercise as an airport owner. The subsection pertinent to this inquiry is § 352(5) which provides in relevant part that the County may:

HN4[] Lease, or sub-lease the real property or lease, contract or otherwise agree, on an exclusive or non-exclusive basis, for the entire operation of such airport or landing field, or of any part thereof, or for the rendering of various services, **[**14]** or the conduct of business activities, on or at said airport or landing field subject to the provisions of section three hundred fifty-two-a of this chapter; provided, however, that no such lease or contract shall be made until the governing body of the municipality shall have held a public hearing in respect thereto on at least ten days notice published in two newspapers having general circulation in the municipality, and provided further that any lease of an entire or portion of an airport or landing field, together with the facilities thereon, or contract for the operation **[*956]** of an airport or landing field or portion thereof shall be for a term not exceeding forty years and shall expressly provide that the said airport or landing field shall be used only for aviation purposes and for other purposes required for or necessary to the efficient and successful operation of an airport or landing field, upon such terms as shall require the operation of the same as a public airport or landing field for the general use of the public and for the benefit of such city, county, village or town.

Section 352(5) (McKinney's 1974). This subsection does authorize subdivisions of the state to enter **[**15]** into exclusive agreements for the operation of airports, for the rendering of various services or for the conduct of business activities at the airport. The terms of such agreements, however, must provide for the operation of the airport as a *public* airport for the *general use of the public.*

The defendants have not convinced the court that the legislature "contemplated" [3] the action allegedly engaged in by the defendants, nor that the State of New York has manifested in § 352(5) a policy to displace competition with regulation or monopoly public service. [4] **[**17]** First, no state regulatory interest has been identified by the defendants, nor does it appear that the alleged actions of the County and Prior relate to any identifiable regulatory interest. *See City of Fairfax v. Fairfax Hospital Assoc., 598 F.2d 835 (4th Cir.)*, *on remand from 435 U.S. 992 (1978)*, *vacating,* for reconsideration in light of *City of Lafayette, 562 F.2d 280 (4th Cir. 1977)*. *Section 352* certainly reflects no essential state regulatory concern, and there is certainly no indication that the State is "actively

[3] "Contemplated" is not a precise word, but the Supreme Court was not explicit in defining the criteria to be employed in determining whether the challenged municipal activity came within the intent of the state legislature. Although specific articulation of legislative intent was not required to come within the *Parker* doctrine, the court was not particularly expansive in its discussion of the level or type of legislative intent which would be required. For the instruction of the Fifth Circuit in *Lafayette, see* *532 F.2d 431, 434-35*.

[4] In *Goldfarb, supra,* the Supreme Court held that "the threshold inquiry in determining if an anti-competitive activity is state action of the type the Sherman Act was not meant to proscribe is whether the activity is *required* by the State acting as sovereign." *421 U.S., at 790* (emphasis supplied). *See also* *Star Lines, Ltd. v. Puerto Rico Maritime Shipping Authority, 451 F.Supp. 157, 166 (S.D.N.Y. 1978)*. This so-called compulsion test may be more appropriate to defendants who are private parties rather than a municipality or state subdivision like the County, because there is usually some delegation of authority by the State to the municipality, however ambiguous. *See,* Note, ***Antitrust Law*** *- Municipal Immunity - Application of the State Action Doctrine to Municipalities,* 1979 Wis. L. Rev. 570, 590-92 (1979). It is apparent that the Supreme Court's approach and instruction in *City of Lafayette,* as set forth *supra,* is more appropriate in this case, given the status of the County.

supervising" any state policy as required by *California Retail Liquor Dealers Association* **[**16]** *v. Midcal Aluminum, Inc.,* 48 U.S.L.W. 4238, 4240 (Mar. 3, 1980). 5

Second, *§ 352* does not evince an unambiguous intent on the part of the state legislature to replace competition with monopolistic public service. *Section 352* reveals that the state legislature believed that subordinate governmental units should have substantial leeway in determining how to operate their airports. This delegation of authority, as set out in *§ 352(5)*, permits a governmental entity such as Genesee County to enter into certain exclusive agreements and contracts in connection with the operation of, and the providing of services at, its airport. Such a delegation of authority is no doubt important to the way in which various governmental and proprietary functions are carried out in a state **[*957]** system. 6 However, **[**18]** *§ 352(5)* expresses on its face the concern and direction of the State that any agreement or contract entered into by the County be subject to the proviso that the airport be operated as a public airport for the general use of the public. With this express proviso, *§ 352(5)* does not by itself show that the State contemplated anticompetitive conduct by a county like Genesee County. If anything, the subsection suggests that the State, after balancing the relevant factors, decided that its paramount concern was that the municipal airports of the State be open to use by the public and that it should limit a county's power to make exclusive agreements. Under these circumstances, antitrust scrutiny would appear proper and warranted. *Pinehurst Airlines, Inc. v. Resort Air Services, Inc., 476 F.Supp. 543 (M.D.N.C. 1979)*.

[19]** In *Pinehurst Airlines,* the plaintiff alleged *inter alia* that a county board of commissioners, the county's airport committee, and a private corporation had violated the federal antitrust laws by giving that private corporation a monopoly at the county airport as the only fixed base operator and by conspiring to prevent the plaintiff from obtaining fixed base operator status or, at the least, from expanding its own operations at the airport. Motions similar to those in this case were brought by the defendants, and the court refused to dismiss the federal antitrust claim on the grounds of the *Parker* doctrine. In *Pinehurst,* the language of the statute authorizing the county to contract for the provision of various services was not as broad apparently as *§ 352(5)*. However, the court focused on the proviso in the North Carolina statute, analogous to the proviso in *§ 352*, which guaranteed equal public use of the airport. *Id., at 554*. The court was persuaded, as I am in this cases that one can infer from such language that the state intended that substantial limits be placed on the County's authority to operate its airport, especially with regard to ensuring that the **[**20]** facilities of the airport be open to public use. *See, also Woolan v. Surtran Taxicabs, Inc., 461 F.Supp. 1025, 1039 (N.D.Tex. 1978)*. Therefore, defendants' argument that the state legislature, in giving the County in *§ 352(5)* the authority to operate an airport, contemplated the exclusive agreement and other anticompetitive conduct alleged in this case is not persuasive.

The defendants have relied on *E. W. Wiggins Airways, Inc. v. Massachusetts Port Authority, 362 F.2d 52 (1st Cir.)*, *cert. denied, 385 U.S. 947 (1966)*, to support their position. That decision, however, predated the recent Supreme Court cases of *Goldfarb, Bates,* and, especially, *City of Lafayette.* The decision in *E. W. Wiggins* was based on the theory that a blanket *Parker* antitrust immunity applied to any governmental action. That is simply no longer the law.

---

5 The court's most recent pronouncement in *California Retail Liquor* set forth two standards to be used in applying the *Parker* doctrine:

First, the challenged restraint must be "one clearly articulated and affirmatively expressed as state policy"; second, the policy must be "actively supervised" by the State itself.

California Retail Liquor, 48 U.S.L.W., at 4240.

6 *See City of Lafayette, supra,* at 418,421-23 (Burger, C.J., concurring). Chief Justice Burger framed the issue as "whether the Sherman Act reaches the *proprietary* enterprises of municipalities," *id., at 422* (emphasis supplied), and would hold that it does. Focusing solely on the nature of the activity, that is, whether it is governmental or proprietary, has some limitations as a tool of analysis. However, Burger's opinion is not unpersuasive insofar as it insists that a State, or municipality, be treated as any other antitrust defendant if it is engaged in an activity of a proprietary or business type nature, rather than of a regulatory governmental nature.

Even if, after a reading of § 352(5), one were to find the language of that provision to be ambiguous as to the scope of the State's authorization, the defendants have provided no explanatory legislative history which would support their interpretation of the statute. Analysis of the legislative history behind a *state* statute is difficult **[**21]** under most circumstances. In this case, where the language which purportedly authorizes the conduct complained of is subject to a limiting proviso, the failure to provide supporting legislative history is not helpful.

As noted above, the defendant Prior also urges that the alleged activity of the defendants is not a violation of the antitrust laws. At least at this stage of the litigation, this argument must fail. The court must assume that Prior has an agreement **[*958]** with the County by which it (1) has become the exclusive fixed base operator at the airport, able to allocate and price space at the facility as it wishes, and (2) has obtained the exclusive right to use the airport facilities as an air carrier. There is a tremendous potential for anticompetitive abuse with such an arrangement, *see* Pinehurst Airlines, supra, at 553, and plaintiffs' complaint alleges such abuses. Prior's argument that an exclusive lease arrangement with a governmental agency is not an antitrust violation is based largely on the *E. W. Wiggins* opinion, already distinguished by the court. The court notes as well that a conspiracy to eliminate competition in obtaining an exclusive contract may indeed be **[**22]** an antitrust violation. *See* United States v. Yellow Cab Co., 332 U.S. 218, 229 (1947). Although the facts in *Yellow Cab* are somewhat different from those revealed so far in this case, the allegations of conspiracy in plaintiffs' complaint raise the question of whether defendants have entered into an agreement with the knowledge and intent that competition be restricted at the airport, especially since, at least in their memorandum of law, plaintiffs question the competitive nature of the bidding process which resulted in Prior's contract. At least at this stage in the litigation, defendants have not shown plaintiffs' failure to state a claim under the antitrust laws.

To conclude, the connection between the legislative grant of authority to the County in § 352 and its alleged use in this case is simply too tenuous to conclude that the County's actions were within the intended scope of activity authorized by the State of New York. [7] Prior, as a private non-governmental party, has a different status than the County. However, if the County itself cannot claim to be "exempt" from the antitrust laws by virtue of its status, then *a fortiori* Prior has no greater claim to the **[**23]** state action exemption in this case, especially since it is alleged that Prior and the County have acted in concert to prevent plaintiffs from competing with Prior or, in other words, have engaged in the same activity. Therefore, defendants' motion to dismiss plaintiffs' antitrust claim is denied.

FEDERAL AVIATION ACT CLAIM

This aspect of the defendants' motions to dismiss requires the court to determine whether a private cause of action may be implied under ***HN5***[] § 308 of the Federal Aviation Act, 49 U.S.C. § 1349(a). That section provides in relevant part that "there shall be no exclusive right for the use of any landing area or air navigation facility upon **[**24]** which federal funds have been expended." The plaintiffs contend that this provision has been violated and that they have a private remedy under its terms. [8]

As in the area of the *Parker* state action exemption, the Supreme Court has recently issued a number of decisions which set forth the factors to be considered in deciding whether a private remedy should be implied when the statute is silent as to whether **[**25]** or not one exists. *See, e.g.,* Touche Ross & Co. v. Reddington, 442 U.S. 560 (1979); Cannon v. University of Chicago, 441 U.S. 677 (1979); Piper v. Chris-Craft Industries, Inc., 430 U.S. 462

[7] The very recent case of *California Retail Liquor, supra,* n.5, in no way changes my decision. If anything, it indicates a continuing trend of the Supreme Court to apply the *Parker* doctrine narrowly and, although no state subdivision was involved in that case, it reinforces my decision in this case that there should be no finding of antitrust immunity.

[8] It is not entirely clear from plaintiffs' complaint whether plaintiffs seek only injunctive relief for the alleged violation of § 1349(a), or damages as well. A review of 49 U.S.C. § 1487, the section which authorizes the government and, in a very limited situation, a private party, to seek enforcement of the Federal Aviation Act, suggests that only injunctive relief would be obtainable by the plaintiffs, assuming *arguendo* that a private remedy exists for a violation of 49 U.S.C. § 1349(a). A court appears authorized under § 1487 to direct only injunctive relief, and there is no mention of damages at all.

(1977); Cort v. Ash, 422 U.S. 66 (1975). These decisions emphasizes that **HN6**[] "the fact that a federal **[*959]** statute has been violated and some person harmed does not automatically give rise to a private cause of action in favor of that person." Cannon, supra, at 688. Rather, whether a private remedy should be implied is a matter of statutory construction and the principal inquiry is "whether Congress intended to create the private right of action asserted." Touche Ross, supra, at 568, 575; *Cannon, supra,* at 588. My review of the factors to be weighed by the court, as set forth in *Cort, supra,* indicates that no private cause of action exists under 49 U.S.C. § 1349(a).

First, there is no indication that this statutory provisions was enacted for the benefit of a special class of which the plaintiffs are members, which is the threshold question under *Cort, Cannon, supra,* at 689. In contrast to the cases in which the courts have implied a cause of action where none was expressly **[**26]** provided by statute, the language of § 1349(a) does not explicitly confer a special benefit on a class of persons in plaintiffs' position. *Compare* the language of § 1349(a) with, for example, the statutory provision at issue in Cannon, supra (§ 901(a) of Title IX of the Education Amendments of 1972, 20 U.S.C. § 1681) and in Allen v. State Board of Elections, 393 U.S. 544, 554-55 (1969) (§ 5 of the Voting Rights Act of 1965, 42 U.S.C. § 1973c). In each of those contexts, Congress identified the class which it intended to benefit by the enactment of a law creating federal rights. Section 1349(a) however, is more in the nature of a law for the protection of the general public, a provision which is part of a statutory scheme to monitor how federal funds are spent. Although § 1349 does prohibit exclusive rights to the use of airfields upon which federal monies have been spent, this does not constitute as compelling a reason to infer a private remedy as where a class of persons has been granted certain rights by statute. Cannon, supra, at 690-94.

Second, the court has been shown no legislative history evidencing any purpose to provide a private cause of action. Although, **[**27]** typically, there will not be a significant amount of legislative history where the statute does not expressly create or deny a private remedy, *id.,* supra, at 694, the plaintiffs' position is not helped by their failure. *Compare,* id., at 694-703, in which the Supreme Court analyzed in great detail the legislative history supporting implication of a private remedy in that case. Moreover, the statutory scheme of the FAA, of which § 1349(a) is a part, reveals that Congress did create a provision by which an aggrieved private party can obtain injunctive relief against a violation of § 401(a) of the FAA, 49 U.S.C. § 1371(a), which precludes air carriers from engaging in air transportation without certification. *See* 49 U.S.C. § 1487. Thus, Congress certainly knew how to provide a private remedy when it wished to do so. Touche Ross, supra, at 571-72. Given as well the extensive government enforcement scheme, the court should be slow to expand the private enforcement remedies beyond what Congress authorized. National Railroad Passenger Corp. v. National Association of Railroad Passengers, 414 U.S. 453, 458 (1974); Viking Travel, Inc. v. Air France, 462 F.Supp. 28, 37 **[**28]** (E.D.N.Y. 1978).

Where these first two factors strongly point to the lack of any Congressional intent to create a private remedy, the Supreme court has recently a suggested that the an remaining two factors of the *Cort v. Ash* analysis have little relevance to whether a court should imply such a remedy. Touche Ross, supra, at 575. Although I believe the third *Cort* factor, whether a private remedy is necessary "to effectuate the purpose of the section," *Cort, supra,* at 78, should continue to be an important inquiry in such situations, the court is not persuaded in this case that implication of a private remedy is mandated in any way by the purpose of § 1349(a). A reading of § 1349(a) in its entirety reveals that this section concerns the expenditure of federal **[*960]** funds on landing areas and the FAA's, responsibilities in determining that such landing facilities are necessary for use in commerce or in the interests of national defense. While the section also directs that no exclusive rights to use these landing areas be granted, there is no strong remedial purpose reflected in § 1349(a) analogous to, for example, enforcement of Title IX in *Cannon.* There is as well an **[**29]** extensive government enforcement scheme, *see* 49 U.S.C. § 1487, and under all these circumstances there is not any compelling need for the court to imply a remedy in this case.

Finally, the court takes note of two cases. First, the plaintiffs rely heavily on *Niswonger v. Air Aviation, Inc., 411 F.Supp. 763 (E.D.Tenn. 1975)*, *aff'd without op., 529 F.2d 526 (6th Cir. 1976)*, a case ink which the district court did find a private remedy. under § 1349(a). The relevant portion of that case, however, pre-dates *Cort v. Ash* and the more recent Supreme Court decisions as to when private remedies should be implied. It is clear that in a the *Niswonger* court did not consider whether Congress intended to provide a private remedy and the persuasiveness of *Niswonger,* therefore, is necessarily discounted. *See* Viking Travel, supra, at 35. A second case should be noted briefly. The Supreme Court has recently vacated the judgment of the United States Court of Appeals for the

Seventh Circuit in *Bratton v. Shiffrin, 585 F.2d 223 (1978)*, in which the Seventh Circuit had found that a private right of action should be implied under § 401(m)(2) of the Federal Aviation Act, 49 **[**30]** U.S.C. § 1371(n)(2). *Shiffrin v. Bratton,* 443 U.S.A 903 (1979). The Supreme Courts remanded the case for reconsideration in light of *Touche Ross, supra.* Although § 1371(n)(2) is not similar in purpose to § 1349(a), the Supreme Court's remand emphasizes that its approach in *Touche Ross* should be given careful consideration in deciding whether a private remedy should be implied under the FAA, as this court has attempted to do.

Based upon the above reasons, I find that no private remedy exists under 49 U.S.C. § 1349(a) and that defendants' motion to dismiss plaintiffs' claim under that section should be granted. Because of this decision the court will not reach the question of whether the doctrine of primary jurisdiction should apply in this case, as argued by the defendants.

CONCLUSION

The court resolves the motions to dismiss as follows:

(1) defendants' motion to dismiss the plaintiffs' claims insofar as they are brought by the individual plaintiffs, Will S. Guthrie, Walter C. Guthrie, and Walter C. Guthrie, Jr., is granted;

(2) defendants' motion to dismiss the plaintiffs' Sherman Act claims is denied; and

(3) defendants' motion to dismiss the plaintiffs' claim **[**31]** under the Federal Aviation Act is granted.

SO ORDERED.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN1[] **Motions to Dismiss, Failure to State Claim**

In assessing a dismissal for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, a court must accept the allegations of the plaintiff's complaint as true. Dismissal is not warranted unless it appears to a certainty that the plaintiff would be entitled to no relief under any state of facts which could be proven in support of its claim.

HN2[] Sherman Act, Claims

Section 1 of the Sherman Act provides in part that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. 15 U.S.C.S. § 1. In order to prevail on its § 1 claim, plaintiff must prove that the defendants' concerted action established an unreasonable restraint of trade. In so doing, the plaintiff must show: (1) that the conspiracy produced adverse, anticompetitive effects within the relevant product and geographic market; (2) that the objects and conduct pursuant to the conspiracy were illegal; and (3) that the plaintiff was injured as a proximate result of the conspiracy.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN8[] **Sherman Act, Claims**

To prevail on a monopolization claim, a plaintiff must show possession of monopoly power in a relevant market, willful acquisition or maintenance of that power in an exclusionary manner, and causal antitrust injury. To prove attempted monopolization, the plaintiff must prove a specific intent to monopolize a relevant market, predatory or anticompetitive acts, and a dangerous probability of successful monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

A firm, even one with monopoly power, is not guilty of predatory exclusionary conduct when it is simply exploiting the competitive advantages legitimately available to it.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] **Private Actions, Standing**

To allege a causal antitrust injury, a plaintiff must show a reasonably probable causal link between the antitrust violation and a business loss of the sort the antitrust laws were designed to prevent.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Sherman Act, Claims**

Assuming that monopoly leveraging constitutes a distinct *§ 2* of the Sherman Act violation, a plaintiff asserting such a claim would have to prove that the defendant possessed monopoly power, that it used that power to gain an unwarranted competitive advantage in a second distinct market, and that there was causal antitrust injury to the leveraged market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN12[] **Conspiracy to Monopolize, Sherman Act**

In order to state a claim for conspiracy to monopolize, a plaintiff must show concerted action, a specific intent to achieve an unlawful monopoly, and commission of an overt act in furtherance of the conspiracy. Unlike an attempted monopolization claim, it is not necessary that the committed acts, themselves, be predatory.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

For a defendant to be liable under the essential facilities doctrine, a plaintiff must prove the following four elements: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to competitors. As with monopoly leveraging claims, the central concern in an essential facilities claim is whether market power in one market is being used to create or further a monopoly in another market.

Antitrust & Trade Law > Clayton Act > General Overview

HN14[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 14*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN15[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

15 U.S.C.S. § 14 is interpreted to mean that exclusive dealing agreements are not per se illegal, but are prohibited only if performance of the arrangement will foreclose competition in a substantial share of the affected line of commerce. As with other antitrust causes of action, a claim advanced under § 3 of the Clayton Act must allege injury to competition, not just to one competitor.

Opinion by: WILLIAMS

Opinion

[*142] WILLIAMS, District Judge.

Advanced Health-Care Services (AHCS) appeals from the district court's dismissal of three cases it filed against several defendants. In two of these, Docket Nos. 89-2376 and 89-2377, AHCS appeals the district court's order of dismissal, pursuant to *Fed. R. Civ. P. 12(b)(6)*, and its refusal to grant leave to amend the complaint upon AHCS's motion for reconsideration. In the other, Docket No. 89-2312, AHCS appeals the district court's grant of the defendants' 12(b)(6) motion to dismiss. In all three cases, AHCS argues that it has stated actionable claims under federal ***antitrust law*** upon which relief could be granted if its allegations were proven. For the reasons discussed below, we reverse the district court's dismissal and denial of leave to file an amended complaint in Docket Nos. 89-2376 and 89-2377, and affirm in part and reverse in part its dismissal of Docket No. 89-2312. [1]

[3]** I.

Advanced Health-Care Services (AHCS), the appellant, is a supplier of durable medical equipment (DME). [2] On August 1, 1988, AHCS filed three nearly identical complaints in the United States District Court for the Western District of Virginia. In each complaint, the plaintiff alleges that an acute care hospital located in southwest Virginia is exclusively marketing a competitor's DME products to its patients in return for a financial stake in those DME sales. According to plaintiff, these arrangements have significantly diminished its DME sales in those geographic areas. AHCS asserts that the defendants' conduct supports causes of action for: (1) unreasonable restraint of trade in violation of Sherman Act *§ 1*, *15 U.S.C. § 1*; (2) monopolization, attempted monopolization, conspiracy to monopolize, and monopoly leveraging in violation of Sherman Act *§ 2*, *15 U.S.C. § 2*; (3) exclusive dealing in violation of Clayton Act § 3, *15 U.S.C. § 14*; and *(4)* tortious interference with business relationships under Virginia common law.

[4]** In Docket Nos. 89-2376 and 89-2377, AHCS alleges that Twin County Community Hospital (Twin County), which owns a 149-bed facility in Galax, Virginia, and Giles Memorial Hospital (Giles), the owner of a 65-bed short-term facility in Pearisburg, Virginia, entered into exclusive agreements under which Medserv Corporation became the sole provider of discharge services and durable medical equipment for the hospitals. [3] AHCS alleges that the hospitals have a monopoly position in the acute care market and that they serve as a funnel for all of the area's DME business. Although AHCS previously serviced a number of the discharged patients from the defendant hospitals as a result of merit-based recommendations from the hospitals' discharge personnel, the new contractual alliances with Medserv allegedly prohibit it from continuing to do so.

[5]** **[*143]** In Docket No. 89-2312, the plaintiff alleges that Radford Community Hospital (Radford), which provides acute care hospital services to approximately seventy-five percent of the residents of the greater Radford, Virginia, region, has used its monopoly status in that regional market to direct the purchase of DME exclusively in its favor. In 1985, Southwest Virginia Pharmacy & Medical Supply Co., a wholly owned subsidiary of Southwest Virginia Health Enterprises, Inc., which is a corporate affiliate of Radford, purchased a local drug store which has since become the exclusive supplier of DME and discharge services to Radford. [4] AHCS, which had been renting

---

[1] Upon agreement of counsel for all parties, these three cases were consolidated for purposes of oral argument and rendering of the Court's opinion.

[2] DME consists of wheelchairs, hospital beds, walkers, crutches, and other equipment often used by persons convalescing at home after hospitalization.

[3] The appellant also sued Health East, Inc., the manager of Giles Memorial, in Docket No. 89-2377. The contracts referred to were originally entered into with Primedica, Inc., which was the corporate predecessor to Medserv Corporation. For simplicity, this opinion refers to the company as it existed under both names as "Medserv."

[4] Radford is a wholly owned subsidiary of Southwest Virginia Health Services Corporation. Southwest Virginia Health Enterprises, Inc., is also a wholly owned subsidiary of that holding company. Southwest Virginia Pharmacy & Medical Supply Company d/b/a Community Pharmacy & Medical Supply is a wholly owned subsidiary of Southwest Virginia Health Enterprises,

and selling DME to patients discharged from Radford since 1983, contends that its DME business in the Radford area has diminished to virtually nothing since the corporate affiliates of Radford entered the DME market. AHCS complains that discharge personnel from Radford combined and conspired with its corporate affiliates to influence Radford patients not to deal with AHCS, resulting in the illegal domination of the DME market by Radford and Southwest. Specifically, AHCS claims that these discharge personnel unduly influenced **[**6]** patients to discontinue relations with AHCS, that they steered or referred patients to Southwest solely for the financial gain of Radford, and that they refused to inform patients of their right to choose alternative DME vendors.

Pursuant to *Fed. R. Civ. P. 12(b)(6)*, the defendants to all three suits, the appellees here, moved to dismiss the plaintiff's first amended complaints for failure to state any claims upon which relief could be granted. On December 29, 1988, the district **[**7]** court granted these motions. In so doing, the court found that AHCS had failed to allege the predatory or unreasonable conduct required to sustain claims under either *§ 1* or *§ 2* of the Sherman Act. [5] The court also found that the plaintiff had failed to allege the existence of exclusionary agreements which is required to state a claim under Clayton Act § 3. The district court dismissed the plaintiff's pendent tortious interference claims for lack of jurisdiction.

AHCS took no further action in the district court on the Radford case. In the Twin County and Giles cases, AHCS **[**8]** filed a motion to reconsider the dismissals pursuant to *Fed. R. Civ. P. 59(e)* and to allow a filing of amended complaints. The district court denied the motions to amend as "futile" and denied the motions to reconsider. The plaintiff now appeals all three cases.

II.

HN1[] In assessing a dismissal for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*, a court must accept the allegations of the plaintiff's complaint as true. [6] Dismissal is not warranted "unless it appears to a certainty that the plaintiff would be entitled to no relief under any state of facts which **[*144]** could be proven in support of its claim." *Johnson v. Mueller, 415 F.2d 354, 355 (4th Cir. 1969)*. In antitrust cases in particular, the Supreme Court has stated that "dismissals prior to giving the plaintiff ample opportunity for discovery should be granted very sparingly." *Hospital Bldg. Co. v. Trustees of Rex Hosp., 425 U.S. 738, 747, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*. *See generally* *Faulkner Advertising Assoc. v. Nissan Motor Corp., 905 F.2d 769*, (4th Cir. 1990) (reversing district court's 12(b)(6) dismissal in a Sherman Act tying case). We conclude **[**9]** that this rigorous standard for summary dismissal is met for only some of the instant claims.

A. Sherman Act *§ 1*

1. The Twin County and Giles Cases

The first count of the appellant's complaint **[**10]** in the Twin County and Giles cases is for unreasonable restraint of trade in violation of *§ 1* of the Sherman Act. In support of this claim, AHCS alleges that the hospitals have

---

Inc. For simplicity, this opinion uses the term "Southwest" to refer to this entire family of companies, except for Radford Community Hospital, which is referred to as "Radford."

[5] Most of the district court's opinion focused on the plaintiff's *§ 2* claims. The court reasoned that the plaintiff's claims under *§ 1* of the Sherman Act were also deficient because "those things which are condemned by *§ 2* are in large measure merely the end products of conduct which violates *§ 1*." Joint Appendix at 21 (*citing* *United States v. Griffith, 334 U.S. 100, 106, 92 L. Ed. 1236, 68 S. Ct. 941 (1948))*.

[6] In the cases involving Twin County and Giles, the Court accepts as true the allegations of the plaintiff's proposed second amended complaints for purposes of this opinion. If those allegations state claims upon which relief could be granted, the amendment of the complaints would not have been "futile" and should have been allowed by the district court. *See* *Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962)*; *Island Creek Coal Co. v. Lake Shore, Inc., 832 F.2d 274, 279 (4th Cir. 1987)*. As to the appellant's § 3 Clayton Act claims against Twin County and Giles, which were not included in its second amended complaints, the Court accepts the allegations of the plaintiff's first amended complaints as true. *See infra* note 20 and accompanying text.

directed their discharge staff to refer all DME business to Medserv and to deny AHCS any access to their patients. Further, AHCS claims that the marketing presentations made by the hospital discharge planners are biased in favor of Medserv in that they do not inform discharged patients about other potential suppliers of DME. AHCS also alleges that, on occasion, the discharge planners have ordered DME from Medserv without first consulting the patients.

The hospitals allegedly receive 65% of all revenues generated by Medserv's DME rentals to their discharged patients. Their discharge personnel are paid $ 40.00 for each patient who orders equipment from Medserv and for each outpatient they convince to switch from AHCS to Medserv. Discharge personnel who fail to switch patients to Medserv are threatened with termination, according to plaintiff.

In sum, the plaintiff alleges that the patients being discharged, who are the consumers of DME, are ignorant of the existence of other DME suppliers and are particularly **[**11]** vulnerable to manipulation by hospital personnel. AHCS asserts that these factors completely foreclose the DME business to Medserv's competitors and deny consumers the benefits of competition in the DME market. As a result, AHCS complains that it no longer receives any orders from patients being discharged from the hospitals, that Medserv now has 85% of all patient orders emanating from the hospitals, and that the appellees have succeeded in monopolizing the DME markets in their respective geographic areas.

Section 1 of the Sherman Act ***HN2***[] provides in pertinent part that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*. [7] As the parties agree, in order to prevail on its *§ 1* claim in these cases, plaintiff must prove that the defendants' concerted action established an unreasonable restraint of trade. *See* *Continental T.V. v. GTE Sylvania, 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)* (concerted action on non-price restrictions is subject to rule of reason analysis, requiring **[**12]** a showing of an adverse effect on competition in the relevant market). In so doing, the plaintiff must show:

> (1) that the conspiracy produced adverse, anticompetitive effects within the relevant product and geographic market; (2) that the objects and conduct pursuant to the conspiracy were illegal; and (3) that the plaintiff was injured as a proximate result of the conspiracy.

Terry's Floor Fashions v. Burlington Indus., 763 F.2d 604, 610 n. 10 (4th Cir. 1985). To establish these elements in these cases, the plaintiff has alleged that the defendants have successfully conspired to exclude all competition in the DME markets **[*145]** in the areas surrounding Twin County and Giles Memorial and that this exclusion is the result not of business acumen, historical accident, or merits competition, but of anti-competitive monopolistic intentions.

[13]** The district court nonetheless dismissed the plaintiff's *§ 1* Sherman Act claims because it found the acts alleged by the plaintiff to constitute normal, reasonable competitive activity. At this point, there is no record upon which to base such a finding. ***HN3***[] A determination of the reasonableness of an agreement under *§ 1* of the Sherman Act requires a market analysis of the impact the restraining activity has on competition. *See* *NCAA v. Board of Regents of the Univ. of Okla., 468 U.S. 85, 103-04, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; *Chuck's Feed & Seed Co. v. Ralston Purina Co., 810 F.2d 1289, 1294* (4th Cir.) (pro-competitive efficiencies can justify anti-competitive effects of vertical restraints on competition), *cert. denied*, *484 U.S. 827, 98 L. Ed. 2d 55, 108 S. Ct. 94*

---

[7] In *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, the Supreme Court held that a parent corporation and its wholly owned subsidiary are legally incapable of conspiring in violation of *§ 1* of the Sherman Act. *See infra* discussion pp. slip op. at 12-16. Because joint ventures consist of multiple entities, they are legally capable of violating *§ 1*. *See* *NCAA v. Board of Regents of the Univ. of Okla., 468 U.S. 85, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*.

(1987). At this point, the plaintiff's allegations of adverse effects on competition must be accepted as true, and the defendants' pro-competitive justifications considered unproven. Until some discovery is completed, there is no record upon which to assess the reasonableness of the restraints alleged by the plaintiff, so summary dismissal of the plaintiff's **[**14]** *§ 1* Sherman Act claims against Twin County and Giles was inappropriate. [8]

2. The Radford Case

As in the two companion cases, the first count in plaintiff's complaint against Radford alleges an unreasonable restraint of trade in violation of *§ 1* of the Sherman Act. [9] The gravamen of that count is that Radford and its corporate affiliates directed their discharge staff to divert all DME business to Southwest. In support of this claim, the appellant alleges that Radford's discharge **[**15]** personnel limited AHCS's access to Radford patients, exclusively recommended Southwest's products, and failed to inform patients of other available alternative suppliers of DME. As a consequence of defendants' allegedly illegal concerted activity, appellant claims that its business in that area was significantly diminished.

HN4[] The Sherman Act distinguishes between concerted and independent action. The conduct of a single firm is governed by *§ 2* alone and is unlawful only when it threatens actual monopolization. [10] In contrast, *§ 1* of the Sherman Act prohibits "unreasonable restraints of trade effected by 'contract, combination . . . or conspiracy' between *separate* entities." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. **[**16]**

The question before this Court is whether concerted action between two subsidiaries of the same parent corporation, or more precisely, between a subsidiary of one subsidiary and another subsidiary of the same parent corporation, can lead to Sherman *§ 1* liability. [11] In *Copperweld*, the Supreme Court established that ***HN6***[] a parent corporation and its wholly owned subsidiary **[*146]** are legally incapable of conspiring with each other under *§ 1* of the Sherman Act. *Id. at 771, 104 S. Ct. at 2741*. Thus, any concerted activity between Southwest Virginia Health Services Corporation and Radford or between Southwest Virginia Health Services Corporation and **[**17]** Southwest Virginia Health Enterprises, Inc., would clearly fall outside the reach of *§ 1* of the Sherman Act.

The Supreme Court in *Copperweld*, however, purposely limited its holding to the specific relationship of parent and wholly owned subsidiary. *Id. at 767*. Although the Court was unwilling to expand its holding to encompass other variations in corporate affiliations, it did discourage the resort to a rote application of the intra-enterprise conspiracy doctrine frequently identified with *United States v. Yellow Cab Co., 332 U.S. 218, 91 L. Ed. 2010, 67 S. Ct. 1560 (1947)*, **[**18]** and *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*.

---

[8] In reaching our decision on this and the other claims that we remand for further consideration, the Court expresses no opinion as to the ultimate merits of the plaintiff's case. As this Court has stated, a complaint should not be dismissed "merely because the court doubts that the plaintiff will ultimately prevail; so long as a plaintiff colorably states facts which, if proven, would entitle him to relief, the motion to dismiss should not be granted." *Adams v. Bain, 697 F.2d 1213, 1216 (4th Cir. 1982)*.

[9] It is unclear from the complaint among whom AHCS alleges the conspiracy. For purposes of this appeal, we assume that it alleges all of the possible permutations of alliances among the defendant entities named in the complaint.

[10] *Section 2* of the Sherman Act provides in part: ***HN5***[] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony." *15 U.S.C. § 2*.

[11] AHCS makes clear that it is the subsequent conduct of the affiliated corporations, not the act of affiliation itself, that it deems illegal. It has elected not to allege a claim under § 7 of the Clayton Act. Thus, the Court need not address whether Southwest's acquisition of the local drug store was an illegal combination under *§ 1*. AHCS has not alleged that an original anticompetitive purpose is evident from the affiliated corporations' subsequent conduct.

The *Copperweld* Court recommended that courts consider whether the affiliated corporate entities have a complete unity of interest rather than focus on mere corporate form. 467 U.S. at 771-72. Despite its narrow holding, the Court noted that an agreement between two subdivisions of a single corporation was not likely to be anticompetitive and that antitrust liability should not depend on whether a corporate subunit is organized as an unincorporated division or a wholly owned subsidiary. Id. at 772. The Court found support for this conclusion in its precedent, reasoning that:

> Sunkist Growers, Inc. v. Winckler & Smith Citrus Prods. Co., 370 U.S. 19, 8 L. Ed. 2d 305, 82 S. Ct. 1130 provides strong support for the notion that separate incorporation does not necessarily imply a capacity to conspire. The defendants in that case were an agricultural cooperative, its wholly owned subsidiary, and a second cooperative comprising only members of the first. The Court refused to find a § 1 or § 2 conspiracy among **[**19]** them because they were "one 'organization' or 'association' even though they formally organized themselves into three separate legal entities."

Id. at 773 n. 21 (quoting Sunkist Growers, Inc. v. Winckler & Smith Citrus Prods. Co., 370 U.S. 19, 29, 8 L. Ed. 2d 305, 82 S. Ct. 1130 (1962)).

Applying the Supreme Court's reasoning, we conclude that ***HN7***[] two subsidiaries wholly owned by the same parent corporation are legally incapable of conspiring with one another for purposes of § 1 of the Sherman Act. Although this is an issue of first impression for this Court, both the Fifth and Sixth Circuits have reached similar conclusions. *See* Directory Sales Management Corp. v. Ohio Bell Tel. Co., 833 F.2d 606, 611 (6th Cir. 1987) ("*Copperweld* precludes a finding that two wholly-owned sibling corporations can combine" in violation of § 1); Hood v. Tenneco Texas Life Ins. Co., 739 F.2d 1012, 1015 (5th Cir. 1984) (if two siblings cannot conspire with their parent in violation of § 1, they cannot conspire with each other); Century Oil Tool v. Production Specialties, 737 F.2d 1316, 1317 (5th Cir. 1984) (finding **[**20]** no relevant difference between a corporation wholly owned by another corporation and two corporations wholly owned by a third corporation); *see also* Newport Components v. NEC Home Elec., 671 F. Supp. 1525, 1544 (C.D. Cal. 1987) (manufacturer and two wholly owned subsidiaries must be viewed as a "single entity" with "complete unity of interest" for purposes of § 1); Gucci v. Gucci Shops, Inc., 651 F. Supp. 194, 197 (S.D.N.Y. 1986) (two corporations with identical owners are by definition legally incapable of conspiring with each other). [12] *But see* ***[*147]*** In re Ray Dobbins Lincoln-Mercury v. Ford Motor Co., 604 F. Supp. 203, 205 (W.D. Va. 1984) (*Copperweld* does not apply to an allegation of conspiracy between two subsidiaries of the same parent corporation), *aff'd on other issues in an unpublished opinion*, *813 F.2d 402 (4th Cir. 1985)*.

[21]** Thus, we affirm the district court's dismissal of AHCS's § 1 Sherman Act claim in the Radford case, but on different grounds than those set forth by the district court. [13] We further find that the district court's inquiry into the reasonableness of the allegedly anticompetitive activity was inappropriate.

B. Sherman Act § 2

1. The Monopolization and Attempted Monopolization Claims

---

[12] This conclusion has also received scholarly support. Professor Areeda posits that the total unity of the corporate enterprise is equally reflected in both the parent-subsidiary relationship and the relationship between sister corporations. In refusing to make corporate form determinative of liability, and in refusing to treat wholly owned corporations differently from unincorporated divisions, the *Copperweld* holding, he argues, also denies conspiratorial capacity to sister corporations' dealings with each other. VII P. Areeda, ***Antitrust Law*** § 1464f (1986).

[13] For similar reasons, we affirm the dismissal of AHCS's claim that Southwest conspired to monopolize the DME market in Radford, Virginia, in violation of § 2 of the Sherman Act. *See infra* discussion p. 150.

The appellant's complaints in all three cases include counts alleging monopolization and attempted monopolization of the relevant regional DME markets in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*. The elements of these claims are very similar. ***HN8***[] To prevail on a monopolization claim, a plaintiff must show possession of monopoly power in a relevant market, willful acquisition or **[**22]** maintenance of that power in an exclusionary manner, and causal antitrust injury. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *Catlin v. Washington Energy Co., 791 F.2d 1343, 1347 (9th Cir. 1986)*. To prove attempted monopolization, the plaintiff must prove a specific intent to monopolize a relevant market, predatory or anticompetitive acts, and a dangerous probability of successful monopolization. *See, e.g., Catlin, 791 F.2d at 1348*.

a. Monopolization of a Relevant Market

The factual allegations of the plaintiff with respect to the relevant markets and the defendants' market shares must be accepted as true at this point. *See Adams v. Bain, 697 F.2d 1213, 1216 (4th Cir. 1982)*. In its complaints, the plaintiff contends that Medserv and Southwest have a dominant share of the DME markets in their respective relevant geographic areas and that this constitutes monopoly power or a dangerous probability of actual monopolization. These allegations could, if proven, support a finding of monopolization or a dangerous probability of monopolization of the relevant **[**23]** DME markets at stake.

b. Predatory Conduct

In its complaints, the plaintiff alleges that the marketing strategies and kickback schemes described above are exclusionary and predatory acts designed to acquire and maintain a permanent monopoly in the relevant DME markets. The district court rejected this argument and dismissed all three monopolization counts in part because the plaintiff failed to allege any "predatory conduct" on the part of the defendants.

In *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*, the Supreme Court reiterated the established proposition that a plaintiff must show that the defendant's conduct was "exclusionary," "anticompetitive," or "predatory" to prevail on a *§ 2* monopolization claim. *Id. at 602*; *see also United States v. Griffith, 334 U.S. 100, 92 L. Ed. 1236, 68 S. Ct. 941 (1948)*; *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056* (3d Cir.), *cert. denied*, *439 U.S. 838, 58 L. Ed. 2d 134, 99 S. Ct. 123 (1978)*. The key to distinguishing legal exclusion from improper, or predatory, exclusion is whether **[**24]** the exclusion was based on superior efficiency. *Aspen Skiing, 472 U.S. at 602-03*. [14]

[*148] In analyzing this issue, it is appropriate to examine the economic effects of the challenged conduct on consumers, competitors, and the alleged violator itself. *See id. at 605*; *Drinkwine v. Federated Publications, Inc., 780 F.2d 735, 739-40 (9th Cir. 1985)*, *cert. denied*, *475 U.S. 1087, 89 L. Ed. 2d 727, 106 S. Ct. 1471 (1986)*. For example, if a plaintiff shows that a defendant has harmed consumers and competition by making a short-term sacrifice in order to further its exclusive, anti-competitive objectives, **[**25]** it has shown predation by that defendant. *See, e.g., SmithKline, 575 F.2d at 1065* (Eli Lilly violated antitrust laws in tying the sale of an unpatented drug to the sale of two other patented drugs, thereby losing sales of the patented drugs in order to harm a competitor selling the unpatented drug).

In finding that the plaintiff had not alleged predation in the cases before us, the district court found that the defendants "have not sacrificed the attractiveness of their hospital services but rather have made a business deal . . . that appears to have produced immediate benefits." Joint Appendix at 33. This finding is premature and shows a misunderstanding of the plaintiff's complaints. In essence, the plaintiff is alleging that the hospitals have linked the purchase of DME to the provision of their hospital services. Thus, for example, if the plaintiff can prove that the DME now provided to patients in the relevant areas is inferior in quality and/or more expensive than AHCS's, it will have shown harm to competitors, short-term sacrifices by the hospitals, and adverse effects on merits competition

[14] ***HN9***[] A firm, even one with monopoly power, is not guilty of predatory exclusionary conduct when it is simply exploiting the competitive advantages legitimately available to it. *See Berkey Photo v. Eastman Kodak, 603 F.2d 263, 276 (2d Cir. 1979)*, *cert. denied*, ***444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)***.

that injure DME consumers, all as a result of the hospitals' entry **[**26]** into the DME markets. From this, a finder of fact may be able to infer that their motives were anti-competitive (*i.e.*, that these were predatory acts stemming from an illegal specific intent to monopolize). Just as Eli Lilly sacrificed some of the monopoly profits it received in one drug market to raise its market share in another, the hospitals have allegedly used their monopoly in the inpatient acute care market to increase their share of the DME market. [15]

[27]** The appellees argue that the district court was correct in its statement that ***antitrust law*** does not impose a duty on them to refer patients to or advertise on behalf of the plaintiff. Again, this reading miscasts the plaintiff's argument. In *Aspen Skiing*, the Supreme Court upheld a jury finding of § 2 Sherman Act liability when a ski facility operator refused to continue a joint marketing arrangement with a competitor. The Court noted that "even a firm with monopoly power has no general duty to engage in a joint marketing program with a competitor" or "to cooperate with its business rivals." *Id. 472 U.S. at 600*. However, the Court found that the monopolist defendant in that case had made an important change in the distribution pattern that had begun in a competitive market and had continued pursuant to consumer demand for several years. The Court then stated:

> The absence of an unqualified duty to cooperate does not mean that every time a firm declines to participate in a particular cooperative venture, that decision may not have evidentiary significance, or that it might not give rise to liability in certain circumstances.

472 U.S. at 601. **[**28]**

If a refusal to deal with an individual competitor can give rise to antitrust liability in an appropriate case, it stands to reason that an agreement to exclude such a competitor could create liability as well. [16] **[*149]** Therefore, the question in this case is not whether the defendants have a duty to advertise on behalf of or refer patients to the plaintiff; rather, it is whether the purposeful exclusion of this competitor from gaining access to the hospital's patients constitutes the type of circumstances that can give rise to antitrust liability. *See Oahu Gas Serv. v. Pacific Resources, Inc., 838 F.2d 360, 368* (9th Cir.) (a monopolist in some instances has "affirmative duties" under antitrust laws to aid its competitors), *cert. denied*, *488 U.S. 870, 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)*. Like the plaintiffs in *Aspen Skiing*, AHCS deserves an opportunity to develop a factual record that "supports an inference that the monopolist made a deliberate effort to discourage its customers from doing business with its smaller rival." *472 U.S. at 610*.

[29]**

c. Antitrust Injury

The district court also dismissed the plaintiff's monopolization and monopoly leveraging claims for failure ***HN10***[] to allege a causal antitrust injury. To make this showing, a plaintiff must show a reasonably probable causal link between the antitrust violation and a business loss of the sort the antitrust laws were designed to prevent. *See*

---

[15] It cannot be assumed on a 12(b)(6) motion that the hospitals have not lost profits in their inpatient services as a result of their exclusive DME agreements. It may be that the plaintiff will be able to show that they are currently losing money with the expectation of recouping those losses after driving the other DME suppliers out of the market. Further, the fact that the monopoly profits gained through the exclusive dealing arrangements may have already offset the lost profits in the hospital services market would not conclusively indicate a lack of antitrust violations. These are all factual issues that cannot be resolved at this point. *Cf. Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227 (1st Cir. 1983)* (outlining conditions necessary for successful predatory pricing).

[16] The appellees may be correct in their assertion that *Aspen Skiing* only establishes duties to engage in cooperative behavior in very limited circumstances. *See Alpert's Newspaper Delivery Inc. v. The New York Times Co., 876 F.2d 266, 272 (2d Cir. 1989)*. Even if *Aspen Skiing* is so limited, it cannot be determined from the allegations of the plaintiff's complaints that such circumstances were not present in these cases.

Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986); Catlin, 791 F.2d at 1347-49. The plaintiff in these cases has made colorable allegations that it has lost income as a direct result of the defendants' anti-competitive actions and monopolization of the relevant DME markets. This states a causal antitrust injury with sufficient specificity to survive a motion to dismiss on that ground.

Thus, AHCS has stated allegations that, although skeletal, could fulfill all of the elements of claims for monopolization and attempted monopolization of the relevant DME markets in all three cases. Therefore, we reverse the district court's dismissals of the monopolization and attempted monopolization claims under § 2 of the Sherman Act.

2. Monopoly **[**30]** Leveraging

The third count of AHCS's proposed amended complaints in the Twin County and Giles cases and the fourth count of its complaint in the Radford case allege claims for monopoly leveraging in violation of § 2 of the Sherman Act. ***HN11***[] Assuming that monopoly leveraging constitutes a distinct § 2 violation, [17] a plaintiff asserting such a claim would have to prove that the defendant possessed monopoly power, that it used that power to gain an unwarranted competitive advantage in a second distinct market, and that there was causal antitrust injury to the leveraged market. *See* Berkey Photo, Inc. v. Eastman Kodak, 603 F.2d 263, 276 (2d Cir. 1979), *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*; Kerasotes Mich. Theatres v. National Amusements, Inc., 854 F.2d 135, 137 (6th Cir. 1988), *cert. dismissed*, *490 U.S. 1087, 109 S. Ct. 2461, 104 L. Ed. 2d 982 (1989)*; Grason Elec. Co. v. Sacramento Mun. Util. Dist., 571 F. Supp. 1504, 1518-19 (E.D. Cal. 1983).

[31]** The plaintiff here alleges that the hospitals have monopoly power in the market for short-term, acute care hospital services and that they have used that power, with the specific intent of foreclosing competition, to gain an unfair competitive advantage in the relevant DME markets. AHCS further alleges that the acts outlined above constitute exclusionary and predatory conduct that has artificially foreclosed it from a dominant share of those markets. These **[*150]** allegations could, if proven, support a finding of liability for monopoly leveraging under § 2 of the Sherman Act in each of these cases. The district court's dismissals of the plaintiff's monopoly leveraging claims are, therefore, reversed.

3. Conspiracy to Monopolize

AHCS also alleges in all three cases that the defendants conspired to monopolize the relevant DME markets in violation of § 2 of the Sherman Act. ***HN12***[] In order to state a claim for conspiracy to monopolize, a plaintiff must show concerted action, a specific intent to achieve an unlawful monopoly, and commission of an overt act in furtherance of the conspiracy. *See* Volvo N. Am. Corp. v. Men's Int'l Pro. Tennis Council, 857 F.2d 55, 74 (2d Cir. 1988). **[**32]** Unlike an attempted monopolization claim, it is not necessary that the committed acts, themselves, be predatory. *See* Von Kalinowski, 3 *Anti-Trust Laws and Trade Regulation*, § 9.02[2] (1985).

In the Twin County and Giles cases, AHCS has alleged concerted action (the DME agreements between the hospitals and Medserv), a specific intent to monopolize relevant markets (the DME markets for the geographic areas surrounding the hospitals), and the commission of overt acts in furtherance of that intent (the implementation of the exclusive agreements). Thus, plaintiff has stated colorable claims of illegal conspiracies to monopolize upon which relief might be granted if its allegations were proven.

---

[17] Because we address this case at an undeveloped stage, and because we find that the appellant has stated other related § 2 claims that require a remand of this case for further proceedings, we assume that monopoly leveraging is an independent § 2 violation separate from monopolization and attempted monopolization. We reserve definitive resolution of that issue for a case in which the issue is squarely presented. *See* Catlin, 791 F.2d at 1346; Association for Intercollegiate Athletics for Women v. NCAA, 236 U.S. App. D.C. 311, 735 F.2d 577, 586 n. 14 (D.C. Cir. 1984).

In the Radford case, for the reasons stated in the discussion of *§ 1* liability, we affirm the district court's dismissal of AHCS's claim that Radford and Southwest conspired to monopolize the DME market in violation of *§ 2* of the Sherman Act. [18]

4. **[**33]** The Essential Facilities Doctrine

The sixth count of AHCS's proposed amended complaint in the Twin County and Giles cases is for denial of access to an essential facility. [19] ***HN13***[] For a defendant to be liable under the essential facilities doctrine, a plaintiff must prove the following four elements:

> (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to competitors.

MCI Communications v. AT & T, 708 F.2d 1081, 1132-33 (7th Cir.) (*citing Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*), *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*. As with monopoly leveraging claims, the central concern in an essential facilities claim is whether market power in one market is being used to create or further a monopoly in another market. *Cf. Olympia Equip. Leasing Co. v. Western Union Tel. Co., 797 F.2d 370, 378 (7th Cir. 1986)* (lack of business **[**34]** justification for refusing to give a competitor access to essential facility, when combined with other evidence, may indicate probable anticompetitive effect), *cert. denied*, *480 U.S. 934, 94 L. Ed. 2d 765, 107 S. Ct. 1574 (1987)*.

Here, the plaintiff alleges that the defendants' market power over the provision of acute care hospital services is being used to further a monopoly in the retail of DME to discharged patients. AHCS contends that all DME dealers were equally able to market their services to patients, physicians, and discharge personnel before the hospitals entered into exclusive contracts with Medserv. The plaintiff alleges that now the hospitals will not give it access to their patients. This has resulted in AHCS's inability to compete in the DME market and has ultimately given Medserv complete control **[**35]** over the price and quality of DME services in the areas surrounding Twin County and Giles. AHCS argues that access to patients is an essential facility that cannot be duplicated and that the hospitals could feasibly return to their prior practice **[*151]** of providing this facility to AHCS and other DME providers.

These allegations on their face address all of the elements of a claim under the essential facilities doctrine established by *MCI* and the relevant Supreme Court precedent. Nevertheless, the district court found that the essential facilities doctrine does not apply to this case because it found no allegation that the hospitals controlling the alleged essential facility (access to patients) compete with the plaintiff in supplying DME. Joint Appendix at 35 (*citing Interface Group v. Massachusetts Port Auth., 816 F.2d 9, 12 (1st Cir. 1987)* (upholding airport authority refusal to allow plaintiff to ground facilities because not a competitor)).

As noted above, AHCS has alleged that Twin County and Giles, who control access to the alleged essential facility, now have a financial stake in the sale of DME by Medserv to their discharged patients. Whether **[**36]** this connection alone is enough to make the hospitals competitors of AHCS and whether access to hospital patients is actually an essential facility to entry into the relevant market are factual issues that cannot be resolved on a motion to dismiss. *Compare Fishman v. Estate of Wirtz, 807 F.2d 520, 539-40 (7th Cir. 1986)* (upholding liability under the essential facilities doctrine where the owner of a stadium in competition with the plaintiff to purchase basketball team refused to lease the stadium to the other bidder), *with Ferguson v. Greater Pocatello Chamber of Commerce,*

[18] *See supra* discussion pp. slip op. at 12-16.

[19] Because AHCS did not include an essential facilities claim in its complaint filed in the Radford case, this section of this opinion refers to the Twin County and Giles cases only.

848 F.2d 976, 983 (9th Cir. 1988) (no liability under essential facilities doctrine because minidome owner was not a competitor of prospective trade show producer).

Therefore, we reverse the district court's refusal to allow amendment of the plaintiff's complaints in the Twin County and Giles cases to add claims for denial of access to an essential facility.

C. Clayton Act § 3

In its first amended complaints filed in all three cases, AHCS includes a count for violation of § 3 of the Clayton Act, 15 U.S.C. § 14. [20] Section 3 of the Clayton Act provides **[**37]** in pertinent part:

> ***HN14***[] It shall be unlawful for any person engaged in commerce . . . to lease or make a sale or contract for sale of goods . . . on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods . . . of a competitor or competitors of the lessor or seller, where the effect . . may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

15 U.S.C. § 14. The Supreme Court has interpreted ***HN15***[] this statute to mean that exclusive dealing agreements are not per se illegal, but are prohibited only if performance of the arrangement will foreclose competition in a substantial share of the affected line of commerce. *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*; *see also* *Satellite Television & Assoc. Resources v. Continental Cablevision of Va., 714 F.2d 351, 354 (4th Cir. 1983)* ("Exclusive dealing contracts which might function to increase interbrand competition have never been held to be a per se violation of the antitrust laws by the Supreme Court."), *cert. denied*, *465 U.S. 1027, 79 L. Ed. 2d 688, 104 S. Ct. 1285 (1984)*. **[**38]** As with other antitrust causes of action, a claim advanced under § 3 of the Clayton Act must allege injury to competition, not just to one competitor. *See* *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. *Cf.* *Eastern Publishing & Advertising v. Chesapeake Publishing & Advertising, 831 F.2d 488, 493 (4th Cir. 1987)* (12(b)(6) dismissal upheld because plaintiff had not alleged injury to more than one competitor).

[*152] The plaintiff's complaints in all three cases allege exclusive dealing agreements in violation of § 3 as follows: [21]

> The contracts, combinations and/or **[**39]** conspiracies by and among [the defendants] whereby said parties jointly agreed or otherwise to act in concert to deal with the Hospital company to the exclusion of all other competitors in the durable medical equipment market constitute an exclusive dealing arrangement in violation of Section 3 of the Clayton Act, 15 U.S.C. § 14.

The pleadings allege that "the Hospital company," which is Medserv in the Twin County and Giles cases and Southwest in the Radford case, is the "seller" for purposes of this claim. The pleadings, however, are somewhat ambiguous as to who the relevant buyer is in each case, although they seem to indicate that the hospitals are the actual DME purchasers who are restrained from dealing with other DME suppliers. [22] **[**40]** The plaintiff now

---

[20] AHCS did not include a § 3 Clayton Act claim in the amended complaints it proposed to file against Twin County and Giles. Nevertheless, the Court considers these claims in its review of the district court's dismissal of and refusal to reconsider dismissal of the first amended complaints in the Twin County and Giles cases. *See supra* note 6.

[21] Although separate cases, the language setting forth the Clayton Act § 3 claims is identical in all three complaints.

[22] On the face of the complaints, there are no allegations that the discharged patients are the actual buyers of DME and that they entered into exclusive dealing agreements with Medserv and Southwest. Although plaintiff suggests that the alleged monopoly power of the hospitals influences patients' choice of DME, plaintiff specifically refrains from alleging that the defendants have tied access to medical services with DME selection. Accordingly, we do not address that possibility.

alleges that the relevant buyer may also be the discharged patients, but that their decisions are actually made by the hospital discharge personnel. [23]

[41]** The first possibility, that the agreements run between the hospitals and their exclusive DME suppliers, is deficient because of the respective relationships between the DME vendors and the hospitals. In the Radford case, there can be no exclusive sales arrangement as a matter of law. Although *Copperweld* has not specifically been applied to § 3 Clayton Act claims, extension of the Supreme Court's analysis is appropriate. If there can be no conspiracy or illegal agreement between Radford and Southwest, it follows, likewise, that there cannot be an illegal exclusive dealing arrangement within the corporate enterprise. *Cf.* *New Amsterdam Cheese Corp. v. Kraftco Corp., 363 F. Supp. 135, 140-41 (S.D.N.Y. 1973)* (defendant corporation and its division are not separate competitors, within meaning of Clayton Act section prohibiting sale of goods on condition that purchaser not use or deal in goods of a competitor).

With respect to Twin County and Giles, the existence of exclusive dealing agreements with Medserv appears, at first glance, improbable. While Twin County and Giles do not fall within the *Copperweld* exception, they apparently have a significant relationship **[**42]** with Medserv. The commonality of interests advanced by these relationships, on the one hand, militates against a finding of illegal exclusive agreements as contemplated by § 3 of the Clayton Act. On the other hand, these relationships may obscure a more sophisticated exclusive dealing arrangement.

Under the more prototypical § 3 claim, a seller persuades a buyer by whatever means to buy only from the seller, to the exclusion of all of the seller's competitors. In the instant cases, the buyers allegedly seek to buy only from Medserv. AHCS **[*153]** complains that this arrangement is anticompetitive because of the allegedly monopolistic power that the buyers enjoy and because of the financial benefit they directly reap from Medserv's profits.

This Court made clear in *McElhenney Co. v. Western Auto Supply Co., 269 F.2d 332 (4th Cir. 1959)*, that the Clayton Act was intended to reach specific conduct which had been held by the courts to be outside the ambit of the Sherman Act and that the "gravamen of a § 3 violation is the forbidden condition, agreement or understanding of exclusivity." *Id. at 337-38*. "It makes no difference whether this is **[**43]** voluntary or is imposed by coercion, but without such agreement, condition or understanding, there can be no statutory infraction." *Id. at 338*. In Twin County and Giles, AHCS alleges that the existence of exclusive dealing arrangements between the hospitals and Medserv has substantially lessened competition and enabled Medserv to garner monopoly power in the DME market. Although not fully developed, plaintiff's allegations are sufficient to withstand a motion to dismiss. The district court thus erred in dismissing this claim.

The plaintiff's alternate theory, that the hospital discharge personnel are the actual buyers of DME, ultimately fails and, therefore, deserves only brief attention. [24] To the extent the discharge personnel are the employees or agents of the hospitals, the hospitals are then the constructive buyers, and the analysis and conclusion of the preceding paragraph apply. To the extent the discharge personnel are employees of Medserv or the joint venture, the alleged personnel/buyers are involved in an agreement with their employers. By definition, there cannot be an exclusive dealing arrangement between an employer and its employees. *Cf.* *Schwimmer v. Sony Corp., 677 F.2d 946,*

---

[23] In support of this contention, the plaintiff has cited several cases for the proposition that the appropriate hospital personnel can be the de facto economic decision-makers in the purchasing of medical services. *See, e.g., Dos Santos v. Columbus-Cuneo-Cabrini Medical Center, 684 F.2d 1346, 1354 (7th Cir. 1982)*; *United States v. American Soc'y of Anesthesiologists, 473 F. Supp. 147, 159-60 (S.D.N.Y. 1979)*. *But see* *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 27-28* & *30 n. 50, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984)* (finding it likely that "it is the patient's doctor and not the patient who selects an anesthesiologist," but that this sort of market imperfection was irrelevant); *Key Enterprises of Del. v. Venice Hosp., 703 F. Supp. 1513 (M.D. Fla. 1989)* (rejecting the substitution of hospital discharge personnel for the patient as the consumers of DME). In any event, all of these findings were in the context of defining the relevant market for health-care specialists in Sherman Act cases, and the appellant has not cited any cases that apply this logic to purchaser-identity in exclusive dealing cases.

[24] This theory cannot be maintained in the Radford case because of the extensive corporate relationship in place. *See* discussion *supra* p. slip op. at 29.

953 **[**44]** (2d Cir.) ("collaborative action between a corporation and its employees, or among employees within a corporation, is not regarded as joint action within the meaning of *§ 1*"), *cert. denied*, *459 U.S. 1007, 74 L. Ed. 2d 398, 103 S. Ct. 362 (1982)*; *University Life Ins. Co. v. Unimarc Ltd., 699 F.2d 846, 852 (7th Cir. 1983)* (conspiracy between a corporation and its officers not actionable under *§ 1*).

In summary, the plaintiff in the case of Radford has not alleged facts that, if proven, could fulfill all of the elements of a valid cause of action under § 3, and the district court's dismissal of those counts is affirmed. In the cases of Giles and Twin County, plaintiff's allegations are sufficient to withstand a motion to dismiss.

III.

Because the district court found that plaintiff's allegations did not establish **[**45]** federal antitrust violations, it dismissed plaintiff's state tort claims for lack of jurisdiction. We find that the appellant alleged facts sufficient to state valid causes of action in all three cases currently before this Court, and therefore reverse the district court's dismissal of its state tort claims and remand them for further proceedings as well.

IV.

Based on the foregoing, in the Radford case, we affirm the district court's dismissal of the appellant's claims under *§ 1* of the Sherman Act and § 3 of the Clayton Act and its conspiracy to monopolize claim under *§ 2* of the Sherman Act, but on different grounds than those stated by the district court. We reverse the lower court's dismissal of appellant's other *§ 2* Sherman Act claims in Radford. We also reverse its dismissal of appellant's claims under *§§ 1* and *2* of the Sherman Act and § 3 of the Clayton Act in the Twin County and Giles cases. Dismissal of the state law tort claims in all three cases is also reversed. These cases are hereby remanded for further proceedings consistent with this opinion.

AFFIRMED IN PART, REVERSED IN PART AND REMANDED.

Concur by: HALL

Concur

[*154] HALL, Circuit Judge, concurring:

[46]** While I join in the majority opinion, I believe its lengthy and scholarly discussion of the elements of these various antitrust claims, and AHCS's corresponding factual allegations, may have the unintended effect of obscuring the underlying bases for our decision. Consequently, I write separately to emphasize the two points that are the essence of our holding. First, as the majority opinion persuasively demonstrates, two subsidiary corporations of the same parent corporation, as a general rule, cannot conspire to unreasonably restrain trade in violation of *§ 1* of the Sherman Act, or enter into an exclusive dealing arrangement violative of § 3 of the Clayton Act. The antitrust laws must recognize business reality and treat these corporations as a single economic entity.

Second, as to the rest of AHCS's claims, although they are tenuous at best, and most likely meritless, they are sufficient to survive a motion to dismiss. As the majority opinion states, dismissal is not proper "merely because the court doubts that the plaintiff will ultimately prevail; so long as a plaintiff colorably states facts which, if proven, would entitle him to relief, the motion to dismiss should not be **[**47]** granted." Op. p. 145, n. 8, *quoting* *Adams v. Bain, 697 F.2d 1213, 1216 (4th Cir. 1982)*. Simply put, a plaintiff must be given a chance to prove his colorable factual allegations, even if it appears unlikely that he can do so. Here, the district court slighted AHCS of this chance and jumped the gun in dismissing these claims under *Rule 12(b)(6)*. Thus, even in the face of the tenuity of these claims, reversal is appropriate.

HN3[] **Complaints, Requirements for Complaint**

A pleader is permitted to enjoy all favorable inferences from facts that have been pleaded, but he is not permitted to substitute conclusory statements for minimally-sufficient factual allegations.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN4[] **Pleadings, Rule Application & Interpretation**

In pleading predicate acts under the Racketeer Influenced and Corrupt Organizations Act, conclusory allegations that various statutory provisions have been breached are of no consequence if unsupported by proper factual allegations.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN5[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

A pattern is something that evinces a continuous and related course of conduct; a complaint asserting a pattern of racketeering activity must allege facts from which such a continuous and related course of conduct one indicating the threat of continuing criminal activity reasonably may be inferred.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN6[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Simply alleging racketeering acts is not enough to allege a Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. §§ 1961-68*, pattern.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN7[] **Racketeering, Racketeer Influenced & Corrupt Organizations Act**

Under the Racketeer Influenced and Corrupt Organizations Act, enterprises may be of two types: legal entities and extra-legal associations in fact.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN8[] Private Actions, Racketeer Influenced & Corrupt Organizations

Under the Racketeer Influenced and Corrupt Organizations Act, whether legal or extra-legal, each enterprise is an ongoing "structure" of persons associated through time, joined in purpose, and organized in a manner amenable to hierarchical or consensual decision-making.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN9[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

An enterprise is distinct, separate, and apart from a pattern of racketeering activity: although a pattern of racketeering activity may be the means through which the enterprise interacts with society, it is not itself the enterprise, for an enterprise is defined by what it is, not what it does.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN10[] Private Actions, Racketeer Influenced & Corrupt Organizations

Government offices can serve as enterprises under the Racketeer Influenced and Corrupt Organizations Act.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN11[] Private Actions, Racketeer Influenced & Corrupt Organizations

Under the Racketeer Influenced and Corrupt Organizations Act, an enterprise is something more than a conspiracy. It is something more than a group of people who get together and agree to commit a "pattern of racketeering activity," for while the hallmark of conspiracy is agreement, the central element of an enterprise is structure.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN12[] Motions to Dismiss, Failure to State Claim

Though a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief, that opinion is not a mandate to countenance balderdash.

Opinion

[*1435] ESCHBACH, Senior Circuit Judge.

Rule 8 of the Federal Rules of Civil Procedure ***HN1***[] requires a complaint to contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *FED. R. CIV. P. 8(a)(2)*. In this case, the statement in the Appellants' **[**2]** complaint is not short; rather, it is a lengthy 55 pages and 433 rhetorical paragraphs. The statement also is not plain; rather, it is prolix, disjointed, confusing, and at times unintelligible. And despite this length and complexity (or perhaps, in part, because of it), the complaint does not show that its pleaders are entitled to the relief they seek, relief for violations of the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C. §§ 1961-68*. Acting on the Appellees' Rule 12(b)(6) motion, the court below dismissed the Appellants' claims for various reasons dealing with immunity, statute of limitations, collateral estoppel, standing, and pendent jurisdiction. We affirm, but on other grounds. *See* *Box v. A & P Tea Co., 772 F.2d 1372 (7th Cir. 1985)*, *cert. denied*, *478 U.S. 1010, 92 L. Ed. 2d 724, 106 S. Ct. 3311 (1986)*; *Brown v. Brienen, 722 F.2d 360 (7th Cir. 1983)*. We have no particular objection to the district court's method of analysis. We simply find it unnecessary to examine that method in light of the evident failure of the Appellants' complaint to adequately state a claim for relief **[**3]** under RICO.

RICO is a complex statute, it is true. Thus, by necessity, most RICO complaints **[*1436]** will be somewhat complex. The necessity for complexity, however, does not give litigants license to plead by means of obfuscation. *See* *FED. R. CIV. P. 8(e)(1)*. ***HN2***[] A RICO complaint must be presented with intelligibility sufficient "for a court or opposing party to understand whether a valid claim is alleged and if so what it is." *Old Time Enter., Inc. v. International Coffee Corp., 862 F.2d 1213, 1218 (5th Cir. 1989)*. And it must be presented with clarity sufficient to avoid requiring a district court or opposing party to forever sift through its pages in search of that understanding. *See* *id. at 1219*. Regarding the Appellants' complaint, the absence of this intelligibility and clarity is notable. The complaint, indeed, is the apogee of pleading by means of obfuscation. For its complete failure to adduce an intelligent story, one that a court can follow without untoward effort, we are tempted to dismiss it. Due to the liberality with which we construe pleadings at this stage, however, we have resisted the temptation. To understand the complaint, **[**4]** we will make the untoward effort.

The gist of the Appellants' claim [1] is that Indiana chiropractors in general, and chiropractors Kaminsky and Jennings, in particular, are being "persecuted" by Indiana state law enforcement personnel who are "supported" by

[1] As always, we regard as true the complaint's *factual* allegations and we view them and the *reasonable* inferences implied by them in the light most favorable to the plaintiffs, here, the Appellants. *See* *SK Hand Tool Corp. v. Dresser Indus., Inc., 852 F.2d*

conspiratorial medical organizations. This "persecution" is evidenced by three investigations carried on by Indiana authorities, one each related to each of two Appellants -- Kaminsky, and Jennings -- and one related to a nonappealing plaintiff, P. Joseph Lisa.

[5]** Kaminsky's "persecution," apparently, began in May of 1981. Kaminsky, it seems, had purchased for $ 1,000 a "Doctor of Homeopathic Medicine" degree from an outfit in Florida and, apparently on the strength of that "degree," had advertised himself as an "M.D." and performed certain medical procedures. These actions caused some small displeasure in the medical community. Several physicians took action, notifying the Indiana Medical Licensing Board (IMLB) and the Tippecanoe County Prosecutor's Office (TCPO) of Kaminsky's deeds and various statutes that may have been infringed. This led to investigations of Kaminsky by the IMLB and the TCPO. The IMLB investigation was short and sweet: hearings were held in June; in July a decision was reached that Kaminsky had violated Indiana law; Kaminsky's license was suspended for six months (with a five year probationary period to follow) in August. [2] The TCPO's investigation was somewhat more involved. Tippecanoe County prosecutor Meyers and deputy prosecutors Beyer, Lane, and Rouch all participated. Eventually, they prosecuted. On June 23, 1982, the TCPO filed criminal charges against Kaminsky. Yet this was just the beginning. Soon, the Indiana **[**6]** Attorney General's Office (IAGO) was contacted and brought into the fray. Attorney General Pearson and deputy attorney generals Minglin, Emry, and Hendrickson all became involved in varying degrees. So too did investigators Alder and Bays-Beinhart of the Consumer Product Division of the IAGO (CPD), CPD chief **[*1437]** counsel Miller, Indiana State Police (ISP) members White, McClain and McCord, and an apparent confidential informant named Martin.

At certain times some or all of these people wrote memoranda to each other discussing the Kaminsky case, made motions and appearances in court, obtained subpoenas and affidavits, gathered evidence from insurance companies, obtained information from Indiana State Chiropractic Association peer review committee member Kelman, observed Kaminsky and his patients, ran various sting operations on Kaminsky and his health clinic, and otherwise "harassed" or "threatened" Kaminsky, his patients, his **[**7]** acquaintances, and his lawyer. This activity bore fruit: Kaminsky's license was suspended on March 22, 1984 and then revoked on June 29, 1984 by the Indiana Board of Chiropractic Examiners (IBCE). [3] In county court, a civil injunction was obtained against Kaminsky and later, on June 28, 1986, Kaminsky pled guilty to a criminal misdemeanor charge. [4]

Compared to Kaminsky's ordeal, Jennings's is refreshingly simple. Jennings and his health clinic apparently were being investigated by ISP member Buehrle. Buehrle, posing as a patient, ran a sting on Jennings's clinic. Evidence was gathered. In October, 1984, Buehrle and ISP member Sylvester entered Jennings's clinic and seized equipment and patient files. Thereafter the two **[**8]** examined the files. In November, Jennings went to court seeking a return of his equipment and files. In December "some of the confiscated items" were returned, but the investigation of Jennings continued. [5] In August, 1985, Jennings found out that the CPD was investigating him. In

---

936, 938 (7th Cir. 1988), *cert. denied*, ***492 U.S. 918, 109 S. Ct. 3241, 106 L. Ed. 2d 589 (1989)***. *See also* *Seglin v. Esau, 769 F.2d 1274, 1283 (7th Cir. 1985)* (***HN3***[] a pleader is permitted "to enjoy all favorable inferences from facts that have been pleaded," but he is not permitted to substitute "conclusory statements . . . for minimally-sufficient factual allegations"). The complaint's factual allegations, however, are at times meaningless; they float from nowhere, seemingly unconnected with any worldly experience. Because of this, we have embellished this statement of facts with background material from sources outside of the complaint, in particular two cases: *In re Kenneth C. Kern, 555 N.E.2d 479 (Ind. 1990)*, and *Kaminsky v. Medical Licensing Bd., 511 N.E.2d 492 (Ind. Ct. App. 1987)*. We have used nothing from these sources to contradict the factual allegations in the Appellants' complaint or the reasonable inferences implied by those allegations. We have used the sources merely to give insight into what the Appellants are talking about. *Cf.* *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1107 (7th Cir. 1984)*, *cert. denied*, ***470 U.S. 1054, 84 L. Ed. 2d 821, 105 S. Ct. 1758 (1985)***.

[2] The Medical Board's decision later was upheld by the Indiana courts.

[3] Instrumental in effecting this decision, which later was upheld by the Indiana courts, was IBCE member Kolanko.

[4] Despite these setbacks, Kaminsky persevered. He obtained reinstatement of his license in 1987; this, despite the contrary efforts of IBCE member Simonson and others.

October, Jasper County prosecutor Fisher told Jennings that he was being investigated by the Grand Jury of Jasper County. Eventually, however, the Grand Jury returned a "no bill." About Jennings's further trials and tribulations, nothing more is known.

Unlike Kaminsky and Jennings, P. Joseph Lisa is not a chiropractor. He is a medical researcher and author. Nonetheless, like Kaminsky and Jennings, Lisa was "persecuted" by Indiana law enforcement personnel. Kaminsky and Jennings had hired Lisa to investigate a possible medical monopoly in Indiana. Lisa went to the IAGO and the TCPO to obtain information about **[**9]** Kaminsky's case. Amazingly, in both offices he was mistaken for an investigating member of a congressman's staff and was given access to attorney work product regarding the Kaminsky investigation. Minglin of the IAGO and Beyer of the TCPO eventually became suspicious about Lisa's credentials, however, and they got in touch with ISP member White. White was asked to investigate, and did investigate, Lisa. That investigation led to Lisa's arrest for misrepresentation and theft, his prosecution by Marion County deputy prosecutors Lundy, Devine, and Newman, and his eventual plea of guilty to charges of impersonating a public servant. [6]

[10]** The Appellees assert that this story does not state a claim under any section of RICO. Their assertion is comprised of several arguments. First, the Appellees argue that allegations of a "pattern of racketeering activity" are required for all sections of RICO, and that the Appellants **[*1438]** have failed completely to allege a pattern of racketeering activity. The Appellants argue to the contrary; they point out that besides its factual allegation section, the complaint contains a 16 page section entitled "Racketeering Activity" that is devoted to showing the numerous racketeering acts of the Appellees. But a review of this section shows it to be 16 pages of waste. Most all of the purported racketeering acts listed are outside the scope of *18 U.S.C. § 1961*, which defines the crimes (called "predicate acts") constituting racketeering acts. For example, the Appellants allege that the Appellees have committed numerous violations of state and federal ***antitrust law***, yet violation of ***antitrust law*** is not a predicate act under RICO. The Appellants allege that the Appellees have committed numerous violations of civil rights and constitutional law, yet, again, **[**11]** violations of these laws are not predicate acts under RICO. Such irrelevant allegations, and others like them, [7] go on page after page. While alleging statutory violations -- indeed, while just about incorporating all of the federal and Indiana codes -- the allegations do not allege racketeering acts.

[12]** In their brief, the Appellants seem to concede the irrelevancy of most of their allegations. They do, however, point out that somewhere in the 16 pages there are a few allegations of predicate acts. In their brief, for example, the Appellants state that they alleged that in July, 1984, Buehrle violated I.C. 16-6-8-3(f)(1), which makes it unlawful for any person to obtain a legend drug [8] by fraud. [9] A look at the complaint's "racketeering activity" section shows,

---

[5] ISP member White and deputy attorney general Minglin also worked on the Jennings case, although to what extent is unknown.

[6] As part of the proceedings against Lisa, members of the Marion County Prosecutor's Office and the IAGO waged a disqualification campaign against Lisa's (and Kaminsky and Jennings's) counsel, Kenneth Kern. This campaign failed, but another was more successful. Two counts of alleged improper conduct were filed against Kern by Indiana Supreme Court Disciplinary Commission executive secretary Breskow. Minglin, Lane, Emry, Beyer, Meyers, White, Newman, and Pearson all gave deposition testimony for the disciplinary hearings, deposition testimony unfavorable to Kern. Kern was found guilty of Count II, alleging conflict of interest. He eventually was suspended from the practice of law for 60 days.

[7] Other examples of irrelevant alleged federal law violations: *18 U.S.C. § 242* (deprivation of rights under color of law); *18 U.S.C. § 2* (aiding and abetting the commission of some unknown crime); *18 U.S.C. § 1* (classification of crimes); *18 U.S.C. § 1001* (lying to the FBI). Examples of alleged state law violations: I.C. 34-1-5-1 (rules for pleading for libel and slander); I.C. 34-1-14-5 (incompetent witnesses); *I.C. 35-43-4-4(h)(3)* & *(4)* (authorizing return of property from law enforcement agency); *I.C. 35-44-2-2* (false informing); *I.C. 35-44-3-4* (obstruction of justice); *I.C. 35-44-1-2* (official misconduct); *I.C. 35-41-5-1* (attempt to restrain trade): *I.C. 35-41-5-2* (conspiracy to restrain trade); I.C. 34-41-2-4 (aiding and abetting); *I.C. 35-43-1-2* (criminal mischief); *I.C. 35-45-2-2* (harassment); *I.C. 24-1-2-5* (duties of attorney general and prosecuting attorney); I.C. 34-4-30.5-2 (action by prosecuting attorney to enjoin violation of law); I.C. 34-1-60-9 (deceit of attorney); *I.C. 35-33-5-5* (disposition of seized items); *I.C. 35-41-1-2* (repealed); etc.

[8] For a definition of "legend drug," *see* I.C. 16-6-8-2(k).

however, that the Appellants charged Buehrle with violating I.C. 16-6-8-3.5(a), which makes prescriptions for legend drugs invalid under certain circumstances, not with violating I.C. 16-6-8-3(f)(1). This discrepancy is minor, however, since ***HN4***[] in pleading predicate acts conclusory allegations that various statutory provisions have been breached are of no consequence if unsupported by proper factual allegations; *Reynolds v. East Dyer Dev. Co., 882 F.2d 1249, 1251-52 (7th Cir. 1989)*; *see also* *Jones v. Lampe, 845 F.2d 755, 758 (7th Cir. 1988)*; *Ray v. Karris, 780 F.2d 636, 645 (7th Cir. 1985)*; *Seglin v. Esau, 769 F.2d 1274, 1283 (7th Cir. 1985)*; and in this **[**13]** case neither of the conclusory allegations are supported by proper factual allegations. [10] The same holds for the Appellants' other allegations of state and federal law violations, both those "pinpointed" in their brief and otherwise: all are bare legal conclusions unsupported by sufficient factual detail. [11]

[14]** **[*1439]** Even assuming, *arguendo*, that somewhere in their complaint the Appellants hid sufficient allegations of racketeering activity, their complaint would still fail for lack of alleging a "pattern," which is "[a] crucial element of a section 1962 claim." *Triad Assoc., Inc. v. Chicago Hous. Auth., 892 F.2d 583, 594 (7th Cir. 1989)*. ***HN5***[] A pattern is something that evinces a continuous and related course of conduct; *H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 109 S. Ct. 2893, 2900, 106 L. Ed. 2d 195 (1989)*; a complaint asserting a pattern of racketeering activity must allege facts from which such a continuous and related course of conduct -- one indicating the threat of continuing criminal activity -- reasonably may be inferred. *See* *Jones, 845 F.2d at 757, 758*. *See generally* *Management Computer Serv., Inc. v. Hawkins, Ash, Baptie & Co., 883 F.2d 48, 51 (7th Cir. 1989)*; *Morgan v. Bank of Waukegan, 804 F.2d 970, 975 (7th Cir. 1986)*. The Appellants' complaint fails in this regard. In several places it boldly asserts that "each Defendant agreed to and did commit at least two racketeering **[**15]** activities" or that "at least two predicate offenses of racketeering activity were committed by each Defendant." These statements are mere conclusions, however, and will not suffice; *Jones, 845 F.2d at 758*; moreover, "merely alleging two predicate acts . . . does not satisfy the pattern requirement," *Olive Can Co. v. Martin, 906 F.2d 1147, 1150 (7th Cir. 1990)*, and that is the most that can be squeezed from these statements. In other places the complaint asserts that "each Defendant has been involved in a pattern of racketeering activity" or that "each of the Defendants has been associated with their predicate offenses"; but, again, these conclusory and indirect (involved in?; associated with?) statements will not suffice. *See* *Jones, 845 F.2d at 758*. And the statements that will suffice -- the facts alleged in the complaint -- fail adequately to allege on the part of any of the Appellees a continuous and related course of racketeering activity, a "pattern" as defined by our prior opinions. *See* *Olive Can Co., supra*; *Triad Assoc., Inc., supra*; *Management Computer Serv., Inc., supra*; *Sutherland v. O'Malley, 882 F.2d 1196 (7th Cir. 1989)*; **[**16]** *Ashland Oil, Inc. v. Arnett, 875 F.2d 1271 (7th Cir. 1989)*; *Deppe v. Tripp, 863 F.2d 1356 (7th Cir. 1988)*; *Brandt v. Schal Assoc., Inc., 854 F.2d 948 (7th Cir. 1988)*; *SK Hand Tool Corp. v. Dresser Indus., Inc., 852 F.2d 936 (7th Cir. 1988)*, *cert. denied*, *492 U.S. 918, 109 S. Ct. 3241, 106 L. Ed. 2d 589 (1989)*; *Jones, supra*; *Medical Emergency Serv. Assoc., S.C. v. Foulke, 844 F.2d 391 (7th Cir. 1988)*; *Liquid Air Corp. v. Rogers, 834 F.2d 1297 (7th Cir. 1987)*, *cert. denied*, *492 U.S. 917, 109 S. Ct. 3241, 106 L. Ed. 2d 588 (1989)*; *United States v. Horak, 833 F.2d 1235 (7th Cir. 1987)*; *Appley v. West, 832 F.2d 1021 (7th Cir. 1987)*; *Tellis v. United States Fidelity & Guar. Co., 826 F.2d 477 (7th Cir. 1986)*; *Marshall & Ilsley Trust Co. v. Pate, 819 F.2d 806 (7th Cir. 1987)*; *Skycom Corp. v. Telstar Corp., 813 F.2d 810 (7th Cir. 1987)*; *Marks v. Pannell Kerr Forster, 811 F.2d 1108 (7th Cir. 1987)*;

---

[9] We offer no opinion on whether a violation of I.C. 16-6-8-3(f)(1) constitutes a racketeering act.

[10] The factual allegation portion of the complaint alleges the following: "In July 1984, Defendant BUEHRLE after obtaining an illegal prescription of diabenzanine from a licensed pharmacist, went to the office of JENNINGS using an undercover name, Mike Peterson, and a fictitious employment." We cannot find from this allegation "facts from which the court may make . . . a determination" that the Indiana statutes were violated. *See* *Reynolds, supra, 882 F.2d 1251-52*. This is especially so in light of the complaint's presentation of Buehrle as an investigating member of the ISP.

[11] The "pinpointed" allegations include Martin's purported violation of *I.C. 35-43-1-1* (arson), Alder's purported violation of *I.C. 35-43-4-2* (theft; receiving stolen property), and Simonson's purported violation of *I.C. 35-44-1-1* (bribery). They also include a plethora of purported violations, by numerous Appellees, of *18 U.S.C. § 1951*. The factual detail supporting these purported violations is absent, however; the complaint fails adequately to allege -- in facts -- that the above mentioned crimes were committed. The same goes for all of the Appellants' other allegations, including their numerous allegations of mail and wire fraud, *18 U.S.C. §§ 1341* & *1343*.

Elliott v. Chicago Motor Club Ins., 809 F.2d 347 (7th Cir. 1986); **[**17]** *Morgan, supra*; *Lipin Enter., Inc. v. Lee, 803 F.2d 322 (7th Cir. 1986)*. True it is that the Appellants have included in their complaint a whole list of statutes they allege were breached. But "***HN6***[] simply alleging racketeering acts is not enough to allege a RICO pattern," *Lipin Enter., Inc., 803 F.2d at 324*, and simply alleging racketeering acts is all we can possibly credit the Appellants with here. [12]

The "pattern" requirement aside, the Appellees also argue that the Appellants have failed adequately to allege a RICO enterprise. Indeed they have. Regarding pleading, the first rule is that "[a] plaintiff **[*1440]** must identify the enterprise." *Otto v. Variable Annuity Life Ins. Co., 814 F.2d 1127, 1136 (7th Cir. 1986)*, *cert. denied* **[**18]** , *486 U.S. 1026, 100 L. Ed. 2d 235, 108 S. Ct. 2004 (1988)*. ***HN7***[] Enterprises may be of two types: legal entities and extra-legal "associations in fact." *United States v. Turkette, 452 U.S. 576, 101 S. Ct. 2524, 2528-29, 69 L. Ed. 2d 246 (1981)*. The Appellants have lots of entities, legal or otherwise, floating about in their complaint, but nowhere do the Appellants adequately identify the enterprise upon which our attention should be directed. [13]

Their closest attempt at identification is an allegation that each of the Appellees is "connected" **[**19]** "with various enterprises including the collective criminal enterprise," which is "an on-going criminal syndicate, the operation of which is carried out with support of the American Medical Association and its affiliated groups including the Indiana State Medical Association and the Tippecanoe County Medical Association as well as the Indiana State Police, the Office of the Attorney General of the State of Indiana and the Prosecutors' Offices for Tippecanoe, Marion and Jasper Counties." According to the Appellants, this "enterprise" is purportedly described in the complaint's factual allegation section; but we find nothing there alleging the existence of an enterprise. ***HN8***[] Whether legal or extra-legal, each enterprise is an ongoing "structure" of persons associated through time, joined in purpose, and organized in a manner amenable to hierarchial or consensual decision-making. *See Old Time Enter., Inc., 862 F.2d at 1217*; *Atlas Pile Driving Co. v. Di Con Financial Co., 886 F.2d 986, 995 (8th Cir. 1989)*. *See also Turkette, 101 S. Ct. at 2528-29*. ***HN9***[] An enterprise is distinct, separate, and apart from a pattern of racketeering activity: although **[**20]** a pattern of racketeering activity may be the means through which the enterprise interacts with society, it is not itself the enterprise, for an enterprise is defined by what it is, not what it does. *See Turkette, 101 S. Ct. at 2528-29*. The factual allegation section of the complaint alleges in great detail that various law enforcement personnel *did* certain things, *e.g.*, wrote memos, talked on the telephone, investigated people, prosecuted people, but it alleges little more than this and it completely fails to indicate that a structure existed through which the law enforcement personnel worked their purpose. Of course, an obvious inference from the factual allegation portion of the complaint is that the "structure" through which the law enforcement personnel worked was their respective government offices. And precedent teaches us that ***HN10***[] government offices can serve as RICO enterprises. *See United States v. Ambrose, 740 F.2d 505, 512 (7th Cir. 1984)*, *cert. denied*, *472 U.S. 1017, 87 L. Ed. 2d 614, 105 S. Ct. 3479 (1985)*; *United States v. Lee Stoller Enter., Inc., 652 F.2d 1313* (7th Cir.), *cert. denied*, **[**21]** *454 U.S. 1082, 102 S. Ct. 636, 70 L. Ed. 2d 615 (1981)*. But the complaint indicates that the enterprise asserted is something else, something existing with the "support" of the government offices, but not including them, [14] something that we simply cannot find.

---

[12] Assuming, *arguendo*, that some of the alleged statutory violations constitute racketeering acts, and waiving, for the moment, our plaint with the conclusory manner in which the allegations are made.

[13] The Appellants mention, among other entities, (1) the conspiracy of the "members of the Indiana State Medical Association," (2) the conspiracy of the American Medical Association, the Indiana State Medical Association, Minglin, White, and "numerous other named and unnamed people," (3) "various enterprises including [the] collective criminal enterprise," (4) "an on-going criminal syndicate," and (5) "the legitimate practice of chiropractic."

[14] Appellants' counsel's concession at oral argument that the complaint's purported enterprise is an association-in-fact of the Appellees bears this interpretation out: the government offices are not the purported enterprise, the Appellees are. As for this association-in-fact, again, there is nothing in the complaint to show that the Appellees constitute a separate and distinct enterprise: there is nothing indicating a command structure separate and distinct from the government offices; there is nothing indicating an enterprise existing apart from the Appellees' deeds.

Why not look for an enterprise in the Appellants' assertions of conspiracy? Throughout the complaint there are many pseudo-allegations of "conspiracy," including those **[**22]** of a conspiracy of the Appellees to "contain or eliminate chiropractic." Putting **[*1441]** our objections to the conclusory nature of these allegations aside, *see Otto, 814 F.2d at 1137*, do they not suffice to allege an enterprise? Alas, they do not. ***HN11***[] An enterprise is something more than a conspiracy. *United States v. Neapolitan, 791 F.2d 489, 499-500* (7th Cir.), *cert. denied*, *479 U.S. 940, 93 L. Ed. 2d 372, 107 S. Ct. 422* and *Messino v. United States, 479 U.S. 939, 93 L. Ed. 2d 371, 107 S. Ct. 421 (1986)*. It is something "more than a group of people who get together [and agree] to commit a 'pattern of racketeering activity,'" for "while the hallmark of conspiracy is agreement, the central element of an enterprise is structure." *Id.* The complaint may allege agreement; structure, however, it does not.

The Appellees raise other arguments to sink the Appellants' complaint. We feel no need to address them, just as we felt no need to address the many sound reasons relied on by the district court. The Appellants have raised claims under RICO subsections 1962(a), (b), (c), and (d). But in their attempt to allege **[**23]** everything, the Appellants have alleged nothing. "The needle in the haystack," if any, "might as well not be there." *Old Time Enter., Inc., 862 F.2d at 1220*. The claims under subsections (a) and (b) are ludicrous; those under subsections (c) and (d) deficient. Thus, when the district court dismissed the Appellants' complaint [15] it did not err. ***HN12***[] Though the Supreme Court has opined that a complaint should not be dismissed for failure to state a claim unless it appears "beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief," *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 102, 2 L. Ed. 2d 80 (1957)*, that opinion is not a mandate to countenance balderdash. As an epithet for the Appellants' complaint, "balderdash" is as good as it gets.

[24]** Below, the district court gave the Appellants leave to amend their complaint. The Appellants chose instead to stand on it and take this appeal. For that decision, they now must pay the price.

AFFIRMED.

End of Document

---

[15] In addition to claiming under the federal RICO statute, the Appellants' complaint claims under various provisions of Indiana state law. Absent the jurisdiction provided by the federal RICO count, however, the Appellants' state law claims need not be addressed. *United Mine Workers v. Gibbs, 383 U.S. 715, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*.

Opinion by: SPROUSE

Opinion

[*1847]** **[*971]** SPROUSE, Circuit Judge.

Appellants Larry Holliday and Job Reynolds appeal from a district court judgment holding them liable to appellee Lasercomb America, Inc., for copyright infringement and for fraud, based on appellants' unauthorized copying and marketing of appellee's software. We affirm in part, reverse in part, **[**2]** and remand for recomputation of damages.

I

Facts and Proceedings Below

Appellants and defendants below are Larry Holliday, president and sole shareholder of Holiday Steel Rule Die Corporation (Holiday Steel), and Job Reynolds, a computer programmer for that company. [1] Appellee is Lasercomb America, Inc. (Lasercomb), the plaintiff below. Holiday Steel and Lasercomb were competitors in the manufacture of steel rule dies that are used to cut and score paper and cardboard for folding into boxes and cartons. Lasercomb developed a software program, Interact, which is the object of the dispute between the parties. Using this program, a designer creates a template of a cardboard cutout on a computer screen and the software directs the mechanized creation of the conforming steel rule die. [2]

[3]** In 1983, before Lasercomb was ready to market its Interact program generally, it licensed four prerelease copies to Holiday Steel which paid $ 35,000 for the first copy, $ 17,500 each for the next two copies, and **[***1848]** $ 2,000 for the fourth copy. Lasercomb informed Holiday Steel that it would charge $ 2,000 for each additional copy Holiday Steel cared to purchase. Apparently ambitious to create for itself an even better deal, Holiday Steel circumvented the protective devices Lasercomb had provided with the software and made three unauthorized copies of Interact which it used on its computer systems. Perhaps buoyed by its success in copying, Holiday Steel then created a software program called "PDS-1000," which was almost entirely a direct copy of Interact, and marketed it as its own CAD/CAM die-making software. These infringing activities were accomplished by Job Reynolds at the direction of Larry Holliday.

---

[1] Holiday Steel was a defendant below but it is now bankrupt and is not a party to this appeal.

[2] This genre of software is called CAD/CAM, which stands for "computer assisted design and computer assisted manufacture."

There is no question that defendants engaged in unauthorized copying, and the purposefulness of their unlawful action is manifest from their deceptive practices. For example, Lasercomb had asked Holiday Steel to use devices called "chronoguards" to prevent unauthorized access to **[**4]** Interact. Although defendants had deduced how to circumvent the chronoguards and had removed them from their computers, they represented to Lasercomb that the chronoguards **[*972]** were in use. Another example of subterfuge is Reynolds' attempt to modify the PDS-1000 program output so it would present a different appearance than the output from Interact.

When Lasercomb discovered Holiday Steel's activities, it registered its copyright in Interact and filed this action against Holiday Steel, Holliday, and Reynolds on March 7, 1986. Lasercomb claimed copyright infringement, breach of contract, misappropriation of trade secret, false designation of origin, unfair competition, and fraud. Defendants filed a number of counterclaims. On March 24, 1986, the district court entered a preliminary injunction, enjoining defendants from marketing the PDS-1000 software.

The procedural history of this case is complex, with various claims and defenses experiencing both death and resurrection on various pretrial motions and at the bench trial itself. For purposes of this appeal it suffices to say that, ultimately, all of the counterclaims were dismissed; Lasercomb's claims of misappropriation **[**5]** of trade secret, false designation of origin, and unfair competition were dismissed as preempted by the Copyright Act; the court found the defendants liable to Lasercomb for copyright infringement, rejecting their affirmative defenses of misuse of copyright and lack of statutory copyright notice; and the court held for Lasercomb on its claims of breach of contract and fraud.

The district court awarded Lasercomb $ 105,000 in actual damages for copyright infringement and for fraud [3] -- with Holiday Steel, Holliday, and Reynolds jointly and severally liable -- plus $ 10,000 against Holliday and $ 5,000 against Reynolds as punitive damages on the fraud claim. [4] All defendants were permanently enjoined from publishing and marketing the PDS-1000 software.

[6]** Holliday and Reynolds raise several issues on appeal. They do not dispute that they copied Interact, but they contend that Lasercomb is barred from recovery for infringement by its concomitant culpability. They assert that, assuming Lasercomb had a perfected copyright, it impermissibly abused it. This assertion of the "misuse of copyright" defense is based on language in Lasercomb's standard licensing agreement, restricting licensees from creating any of their own CAD/CAM die-making software. [5] Appellants also argue that the district court's finding of fraud was erroneously based on facts not alleged in the complaint. Finally, they contend that, even if they are liable, the district court erred in the calculation of damages. We consider these issues *seriatim*.

[7]** II

Misuse of Copyright Defense

HN1[] A successful defense of misuse of copyright bars a culpable plaintiff from prevailing on an action for infringement of the misused copyright. Here, appellants claim Lasercomb has misused its copyright by including in

[3] The court found Lasercomb was damaged in the amount of $ 105,000 on the copyright infringement claim, and was damaged in the amount of $ 105,000 on the fraud claim. Because those two damages amounts arose from lost sales of the same three Interact copies, the court ruled Lasercomb could recover only once.

[4] Additional actual and punitive damages were awarded against the corporation severally. Because damages for the breach of contract were awarded against the corporation only, issues relating to that cause of action are not raised in this appeal.

[5] Appellants raise two other defenses to copyright infringement. They claim Lasercomb's recovery is barred by their failure to comply with statutory notice requirements in perfecting the copyright. Somewhat incongruously, appellants alternatively advance the defense of innocent infringement. Because of our disposition of the copyright misuse defense, we do not reach these other two defenses to infringement.

its standard licensing agreement clauses which prevent the licensee from participating in any manner in the creation of **[***1849]** computer-assisted die-making software. [6] The offending paragraphs read:

> **[*973]** D. Licensee agrees during the term of this Agreement that it will not permit or suffer its directors, officers and employees, directly or indirectly, to write, develop, produce or sell computer assisted die making software.
>
> E. Licensee agrees during the term of this Agreement and for one (1) year after the termination of this Agreement, that it will not write, develop, produce or sell or assist others in the writing, developing, producing or selling computer assisted die making software, directly or indirectly without Lasercomb's prior written consent. Any such activity undertaken without Lasercomb's written consent shall nullify **[**8]** any warranties or agreements of Lasercomb set forth herein.

The "term of this Agreement" referred to in these clauses is ninety-nine years.

Defendants were not themselves bound by the standard licensing agreement. Lasercomb had sent the agreement to Holiday Steel with a request that it be signed and returned. Larry Holliday, however, decided **[**9]** not to sign the document, and Lasercomb apparently overlooked the fact that the document had not been returned. [7] Although defendants were not party to the restrictions of which they complain, they proved at trial that at least one Interact licensee had entered into the standard agreement, including the anticompetitive language. [8]

The district court rejected the copyright misuse defense for three reasons. First, it **[**10]** noted that defendants had not explicitly agreed to the contract clauses alleged to constitute copyright misuse. Second, it found "such a clause is reasonable in light of the delicate and sensitive area of computer software." And, third, it questioned whether such a defense exists. We consider the district court's reasoning in reverse order.

A. *Does a "Misuse of Copyright" Defense Exist*?

We agree with the district court that much uncertainty engulfs the "misuse of copyright" defense. [9] We are persuaded, however, that ***HN2***[] a misuse of copyright defense is inherent in the law of copyright just as a misuse of patent defense is inherent in patent law.

[11]** The misuse of a patent is a potential defense to suit for its infringement, and both the existence and parameters of that body of law are well established. *E.g.,* United States Gypsum Co. v. National Gypsum Co., 352 U.S. 457, 465, 1 L. Ed. 2d 465, 77 S. Ct. 490 (1957); *see generally* 8 E. Lipscomb, *Lipscomb's Walker on Patents* §§ 28:32-28:36 (3d ed. 1989) [hereinafter *Walker on Patents*]; Calkins, *Patent Law: The Impact of the 1988 Patent Misuse Reform Act and Noerr-Pennington Doctrine on Misuse Defenses and Antitrust Counterclaims*, 38 Drake L.

---

[6] Appellants also claim Lasercomb has created an illegal tie-in by discounting the price of Interact to licensees who purchase steel rule dies and other goods from Lasercomb. This simply is not a tie-in. No customer is required to buy steel rule dies in order to be able to purchase the Interact software, nor must any customer buy the Interact software in order to purchase steel rule dies, nor does Lasercomb require customers to agree to not purchase any other vendor's wares in order to be able to purchase Lasercomb's software and dies. *See* Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5-6, 2 L. Ed. 2d 545, 78 S. Ct. 514 & n. 4 (1958).

[7] The district court's finding of breach of contract (not before us on appeal) was based on a letter in which Holliday admitted an oral agreement between Holiday Steel and Lasercomb was binding.

[8] At the time of trial, Lasercomb had sold approximately 40 licenses in Interact. Lasercomb's president testified that the terms of the licensing agreement, including the noncompete language, were negotiable. He stated the noncompete language had been negotiated out or modified in "several" instances, but could not specifically state the degree to which the language had been removed or altered.

[9] *See generally* 3 M. Nimmer & D. Nimmer, *Nimmer on Copyright § 13.09[A]* (1989) [hereinafter *Nimmer on Copyright*]; Gibbs, *Copyright Misuse: Thirty Years Waiting for the Other Shoe*, 23 Copyright L. Symp. (ASCAP) 31 (1977); Fine, *Misuse and Antitrust Defenses to Copyright Infringement Actions*, 17 Hastings L.J. 315 (1965).

Rev. 175 (1989) [hereinafter Calkins, *Patent Law*]. Although there is little case law on the subject, courts from time to time have intimated that the similarity of rationales underlying the law of patents and the law of copyrights argues for a defense to an infringement of copyright based on misuse **[*974]** of the copyright. *E.g., United States v. Loew's, Inc., 371 U.S. 38, 44-51, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*; *United States v. Paramount Pictures, Inc., 334 U.S. 131, 157-59, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*; *Mitchell Bros. Film Group v. Cinema Adult Theater, 604 F.2d 852, 865 & n.27 (5th Cir. 1979)*, **[**12]** *cert. denied*, *445 U.S. 917, 63 L. Ed. 2d 601, 100 S. Ct. 1277 (1980)*. The origins of patent and copyright law in England, the treatment of these two aspects of intellectual property by the framers of our Constitution, and the later statutory and judicial development of patent and **[***1850]** copyright law in this country persuade us that parallel public policies underlie the protection of both types of intellectual property rights. We think these parallel policies call for application of the misuse defense to copyright as well as patent law.

1. Overview

Because of the paucity of precedent in the copyright misuse area, some historical perspective of the elements underlying intellectual property law is helpful to our inquiry. Fortunately, respected treatise authors have captured well the essence of the relevant historical perspective.

During the sixteenth century, it became common for the English Crown to grant "letters patent" [10] which gave individuals exclusive rights to produce, import and/or sell given items within the kingdom. 1 *Walker on Patents* §§ 1:1-1:2. These monopolies were granted for such commonplace items as salt, vinegar, and calfskins, to name but a **[**13]** few. *Id.* at § 1:2. The practice of granting monopolies led to widespread abuses, such as shortages and inflated prices for items that would otherwise be easily and cheaply available. *Id.* Consequently, Parliament passed the Statute of Monopolies (1623-24), [11] prohibiting the creation of such monopolies by the Crown. *Id.* at § 1.5. An exception was made, however, to permit a patent to be granted for a period of fourteen years to the creator of a new invention. 21 Jac., ch. 3, § 6.

The rationale for allowing patents for new inventions was and is to encourage their creation for the benefit of society. 1 *Walker on Patents* § 1:6. The monopolies granted by the Crown had been odious because they restrained trade **[**14]** in articles that had previously been a part of the public domain. An invention, however, does not withdraw anything from public traffic; rather, it introduces something new. To encourage and reward inventors for increasing the inventory of useful objects, the government grants them, for a limited time, the right to exclude others from making and selling their inventions. *Id.; United States v. Dubilier Condenser Corp., 289 U.S. 178, 186, 77 L. Ed. 1114, 53 S. Ct. 554 (1933)*.

The development of copyright law in England likewise grew out of a differentiation by Parliament between a monopoly that restricts publication of works and a limited copyright that encourages the efforts of authors. In sixteenth-century England, the Crown granted to the Stationers' Company the exclusive right to publish and print all published works (apparently to enable censorship of Protestant materials). In the early 1700s, the Stationer's Company petitioned Parliament to recognize that these rights inured to it in perpetuity. Instead, Parliament passed the Statute of Anne (1709-10), [12] the first known copyright legislation. A. Latman, *The Copyright Law: Howell's Copyright Law Revised and* **[**15]** *the 1976 Act* 2-3 (5th ed. 1979) [hereinafter *Howell's Copyright Law*]; R. Bowker, *Copyright: Its History and Its Law* 21-23 (1912). That statute gave authors the sole right of publication for up to **[*975]** twenty-eight years. Thus, the English statutory treatment of copyright was similar to that of patent in that it granted the creator a monopoly for a limited time only.

---

[10] From the Latin *patentes* meaning open or accessible. Thus, letters patent were documents left open for examination by the public. 1 *Walker on Patents* § 1:1.

[11] An Act concerning Monopolies and Dispensations with Penal Laws, and the Forfeitures thereof, 21 Jac., ch. 3.

[12] An Act for the Encouragement of Learning, by vesting the Copies of printed Books in the Authors or Purchasers of such Copies, during the Times therein mentioned, 8 Anne, ch. 19.

It is significant, we think, that the framers of our Constitution continued the English development of intellectual property law and considered in tandem those property rights protectable by copyrights and those protectable by patents. In giving Congress the power to create copyright and patent laws, the framers combined the two concepts in one clause, stating a unitary purpose -- to promote progress. *Article I, section 8, clause 8 of the United* ***[**16]*** *States Constitution* provides:

> [The Congress shall have power] To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.

This clause was adopted without debate, and material explaining the intention of the framers is limited. However, a comment in *The Federalist* papers indicates the public policy behind the grant of copyright and patent powers is essentially the same:

> The utility of this power will scarcely be questioned. The copyright of authors has been solemnly adjudged, in Great Britain, to be a right of common law. The right to useful inventions seems with equal reason to belong to the inventors. The public good fully coincides in both cases with the claims of individuals.

The Federalist, No. 43 at 279 (J. Madison) (Mod. Lib. ed. 1941). [13]

[17]** Supreme Court comment has likewise equated the public policies of copyright and patent. For example, in *Mazer v. Stein, 347 U.S. 201, 219, 98 L. Ed. 630, 74 S. Ct. 460 (1953)*, the Supreme Court stated:

> The economic philosophy behind the clause empowering Congress to grant *patents and copyrights* is the conviction that encouragement of individual effort by personal gain is the best way to advance public welfare through the talents of authors and inventors in "Science and useful Arts." Sacrificial days devoted to such creative activities deserve rewards commensurate with the services rendered.

(Emphasis added.) *See also* *Loew's, 371 U.S. at 44-51*; *Paramount Pictures, 334 U.S. at 154-59*. The philosophy behind copyright, parallel to that discussed above for patent, is that the public benefits from the efforts of authors to introduce new ideas and knowledge into the public domain. To encourage such efforts, society grants authors exclusive rights in their works for a limited time.

2. The Misuse of Patent Defense

Although a patent misuse defense was recognized by the courts as early as 1917, [14] most commentators **[**18]** point to *Morton Salt Co. v. G. S. Suppiger, 314 U.S. 488, 86 L. Ed. 363, 62 S. Ct. 402 (1942)*, as the foundational patent misuse case. In that case, the plaintiff Morton Salt brought suit on the basis that the defendant had infringed Morton's patent in a salt-depositing machine. The salt tablets were not themselves a patented item, but Morton's patent license required that licensees use only salt tablets produced by Morton. Morton was thereby using its patent

---

[13] **[***1851]** The Court of Customs and Patent Appeals observed that the patent/copyright clause was unusual in stating the reason the power had been granted, and commented:

> Its inclusion doubtlessly was due to the fact that those who formulated the Constitution were familiar with the long struggle over monopolies so prominent in English history, where exclusive rights to engage even in ordinary business activities were granted so frequently by the Crown for the financial benefits accruing to the Crown only. It was desired that in this country any Government grant of a monopoly for even a limited time should be limited to those things which serve in the promotion of science and the useful arts.

In Re Shao Wen Yuan, 38 C.C.P.A. 967, 188 F.2d 377, 380 (C.C.P.A. 1951). *See also Howell's Copyright Law*, at 15.

[14] *Motion Picture Patents Co. v. Universal Film Mfg. Co., 243 U.S. 502, 61 L. Ed. 871, 37 S. Ct. 416 (1917)*. For a history of the patent misuse defense, see Calkins, *Patent Law*, at 178-92.

to restrain competition in the sale of an item which was not within the scope of the patent's privilege. The Supreme Court held that, as a court of **[*976]** equity, it would not aid Morton in protecting its patent when Morton was using that patent in a manner contrary to public policy. *Id. at 490-92*. The Court stated:

> ***HN3***[] The grant to the inventor of the special privilege of a patent monopoly carries out a public policy adopted by the Constitution and laws of the United States, "to promote the Progress of Science and useful Arts, by securing for limited Times to . . . Inventors the exclusive Right **[**19]** . . ." to their "new and useful" inventions. *United States Constitution, Art. I, § 8, cl. 8*, 35 U.S.C. § 31. But the public policy which includes inventions within the granted monopoly excludes from it all that is not embraced in the invention. It equally forbids the use of the patent to secure an exclusive right or limited monopoly not granted by the Patent Office and which it is contrary to public policy to grant.

Id. at 492. Thus, the Supreme Court endorsed "misuse of patent" as an equitable defense to a suit for infringement of that patent.

Since *Morton Salt*, the courts have recognized patent misuse as a valid defense and have applied it in a number of cases in which patent owners have attempted to use their patents for price fixing, tie-ins, **[**20]** territorial restrictions, and so forth. *See* Calkins, *Patent Law*, at 187-89 n.38, 8 *Walker on Patents* §§ 28:32-28:36; W. Holmes, *Intellectual Property and* ***Antitrust Law*** § 1.07 (1989) [hereinafter Holmes, *Intellectual Property*]. The patent misuse defense also has been acknowledged by Congress in the 1988 Patent Misuse Reform Act, Pub. L. No. 100-703, 102 Stat. 4676 (1988) (codified at *35 U.S.C. § 271(d)(4)* & *(5)*), which limited but did not eliminate the defense. [15]

3. The "Misuse of Copyright" Defense

Although the patent misuse defense has been generally recognized since *Morton Salt*, it has been much less certain whether an analogous copyright misuse defense exists. *See supra* note 9. This uncertainty persists because no United States Supreme Court decision **[**21]** has firmly established a copyright misuse defense in a manner analogous **[***1852]** to the establishment of the patent misuse defense by *Morton Salt*. The few courts considering the issue have split on whether the defense should be recognized, *see* Holmes, *Intellectual Property* § 4.09 (collecting cases), and we have discovered only one case which has actually applied copyright misuse to bar an action for infringement. *M. Witmark & Sons v. Jensen, 80 F. Supp. 843 (D. Minn. 1948)*, *appeal dismissed*, *177 F.2d 515 (8th Cir. 1949)*.

We are of the view, however, that since copyright and patent law serve parallel public interests, a "misuse" defense should apply to infringement actions brought to vindicate either right. As discussed above, the similarity of the policies underlying patent and copyright is great and historically has been consistently recognized. Both patent law and copyright law seek to increase the store of human knowledge and arts by rewarding inventors and authors with the exclusive rights to their works for a limited time. At the same time, the granted monopoly power does not extend to property not covered by the patent or copyright. **[**22]** *Morton Salt, 314 U.S. at 492*; *Paramount Pictures, 334 U.S. at 156-58*; [16] *cf.* *Baker v. Selden, 101 U.S. 99, 101-04, 25 L. Ed. 841 (1880)*.

---

[15] The primary effect of the Patent Misuse Reform Act is to eliminate the presumption that use of a patent license to create a tie-in is *per se* misuse. *See* Calkins, *Patent Law*, at 196-97.

[16] In *Paramount Pictures*, the Court in an antitrust context stated:

> Block-booking [of feature films] prevents competitors from bidding for single features on their individual merits. The District Court held it illegal for that reason and for the reason that it "adds to the monopoly of a single copyrighted picture that of another copyrighted picture which must be taken and exhibited in order to secure the first." That enlargement of the monopoly of the copyright was condemned below in reliance on the principle which forbids the owner of a patent to condition its use on the purchase or use of patented or unpatented materials. The court enjoined defendants from

[23] [*977]** Thus, we are persuaded that the rationale of *Morton Salt* in establishing the misuse defense applies to copyrights. In the passage from *Morton Salt* quoted above, the phraseology adapts easily to a copyright context:

> The grant to the [author] of the special privilege of a [copyright] carries out a public policy adopted by the Constitution and laws of the United States, "to promote the Progress of Science and useful Arts, by securing for limited Times to [Authors] . . . the exclusive Right . . ." to their ["original" works]. *United States Constitution, Art. I, § 8, cl. 8*, [*17 U.S.C.A. § 102*]. But the public policy which includes [original works] within the granted monopoly excludes from it all that is not embraced in the [original expression]. It equally forbids the use of the [copyright] to secure an exclusive right or limited monopoly not granted by the [Copyright] Office and which it is contrary to public policy to grant.

Cf. Morton Salt, 314 U.S. at 492.

Having determined that "misuse of copyright" is a valid defense, analogous to the misuse of patent defense, our next task is to **[**24]** determine whether the defense should have been applied by the district court to bar Lasercomb's infringement action against the defendants in this case.

B. *The District Court's Finding that the Anticompetitive Clauses Are Reasonable*

In declining to recognize a misuse of copyright defense, the district court found "reasonable" Lasercomb's attempt to protect its software copyright by using anticompetitive clauses in their licensing agreement. In briefly expressing its reasoning, the court referred to the "delicate and sensitive" nature of software. It also observed that Lasercomb's president had testified that the noncompete language was negotiable.

If, as it appears, the district court analogized from the "rule of reason" concept of ***antitrust law***, we think its reliance on that principle was misplaced. Such reliance is, however, understandable. Both the presentation by appellants and the literature tend to intermingle antitrust and misuse defenses. **[***1853]** [17] **[**26]** *E.g.*, Holmes, *Intellectual Property*, at § 4.09. A patent or copyright is often regarded as a limited monopoly -- an exception to the general public policy against restraints of trade. [18] Since ***antitrust law*** is the **[**25]** statutory embodiment of that public

---

> performing or entering into any license in which the right to exhibit one feature is conditioned upon the licensee's taking one or more other features.
>
> We approve that restriction.

334 U.S. at 156-58 (citations and footnote omitted). Citing *Paramount*, the Fifth Circuit has opined in dicta that "it is . . . likely that the public monopoly extension rationale of *Morton Salt* . . . is applicable to copyright." *Mitchell, 604 F.2d at 865 n. 27*.

[17] In the context of copyright, this confusion probably arises at least in part from *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. In that case, CBS brought an antitrust suit and also asked for a declaratory judgment that defendant's action constituted misuse of copyright. The Second Circuit first addressed whether there was an antitrust violation, and finding there was, "the Court of Appeals held that the challenged conduct constituted misuse of copyrights solely on the basis of its finding of unlawful price fixing." *Id. at 6 n. 9*. The Supreme Court reversed the finding of a Sherman Act violation -- on the basis that the court of appeals had used the wrong standard to evaluate the price fixing -- stating: "We reverse that judgment, and the copyright misuse judgment dependent upon it. . . ." *Id. at 24*. Standing alone, this latter sentence seems to imply that copyright misuse depends on a finding of an antitrust violation. In context, however, it is apparent that misuse was linked to antitrust in that case simply as a matter of litigation strategy. Copyright misuse was not asserted as a defense to an infringement suit, and the primary claim was an antitrust claim.

[18] For example, Calkins states, "The essence of every patent is the power to exclude, that is, monopoly power." Calkins, *Patent Law*, at 176 n. 1. But see 1 *Walker on Patents* ch. 1, which repeatedly distinguishes a monopoly, which withdraws a previously

policy, there is an understandable association of ***antitrust law*** with the misuse defense. Certainly, an entity which uses its patent as the means of violating **[*978]** ***antitrust law*** is subject to a misuse of patent defense. However, *Morton Salt* held that it is not necessary to prove an antitrust violation in order to successfully assert patent misuse:

> It is unnecessary to decide whether respondent has violated the Clayton Act, for we conclude that in any event the maintenance of the present suit to restrain petitioner's manufacture or sale of the alleged infringing machines is contrary to public policy and that the district court rightly dismissed the complaint for want of equity.

314 U.S. at 494. *See also* *Hensley Equip. Co. v. Esco Corp., 383 F.2d 252, 261* & n. 19, *amended on reh'g*, *386 F.2d 442 (5th Cir. 1967)*; 8 *Walker on Patents*, at § 28:33.

So while it is true that the attempted use of a copyright to violate ***antitrust law*** probably would give rise to a misuse of copyright defense, the converse is not necessarily true -- a misuse need not be a violation of ***antitrust law*** in order to comprise an equitable defense to an infringement action. The question is not whether the copyright is being used in a manner violative of ***antitrust law*** (such as whether the licensing agreement is "reasonable"), but whether the copyright is being used in a manner **[**27]** violative of the public policy embodied in the grant of a copyright.

Lasercomb undoubtedly has the right to protect against copying of the Interact code. Its standard licensing agreement, however, goes much further and essentially attempts to suppress any attempt by the licensee to independently implement the idea which Interact expresses. [19] The agreement forbids the licensee to develop or assist in developing *any* kind of computer-assisted die-making software. If the licensee is a business, it is to prevent all its directors, officers and employees from assisting in any manner to develop computer-assisted die-making software. Although one or another licensee might succeed in negotiating out the noncompete provisions, this does not negate the fact that Lasercomb is attempting to use its copyright in a manner adverse to the public policy embodied in copyright law, and that it has succeeded in doing so with at least one licensee. *See supra* note 8 and accompanying text. *Cf.* *Berlenbach v. Anderson & Thompson Ski Co., 329 F.2d 782, 784-85* (9th Cir.), *cert. denied*, *379 U.S. 830, 13 L. Ed. 2d 39, 85 S. Ct. 60 (1964)*.

[28]** The language employed in the Lasercomb agreement is extremely broad. Each time Lasercomb sells its Interact program to a company and obtains that company's agreement to the noncompete language, the company is required to forego utilization of the creative abilities of all its officers, directors and employees in the area of CAD/CAM die-making software. Of yet greater concern, these creative abilities are withdrawn from the public. [20] **[**29]** The period for which this anticompetitive restraint exists is ninety-nine years, which could be longer than the life of the copyright itself. [21]

---

public item from the public domain, from a patent, which protects for a limited time a new item which is then added to the public domain. *See also* *Dubilier Condenser, 289 U.S. at 186*; Holmes, *Intellectual Property*, at § 1.02.

HN4[] -

[19] A copyright, of course, protects only the expression of an idea (the Interact code), and not the idea itself (using CAD/CAM software to make steel rule dies). *17 U.S.C. § 102(b)*; *Mazer v. Stein, 347 U.S. at 217*; *M. Kramer Mfg. Co. v. Andrews, 783 F.2d 421, 434-37 (4th Cir. 1986)*.

[20] **[***1854]** *Cf.* *Twentieth Century Music Corp. v. Aiken, 422 U.S. 151, 156, 45 L. Ed. 2d 84, 95 S. Ct. 2040 (1975)*:

> The limited scope of the copyright holder's statutory monopoly, like the limited copyright duration required by the Constitution, reflects a balance of competing claims upon the public interest: Creative work is to be encouraged and rewarded, but private motivation must ultimately serve the cause of promoting broad public availability of literature, music, and the other arts. The immediate effect of our copyright law is to secure a fair return for an "author's" creative labor. But the ultimate aim is, by this incentive, to stimulate artistic creativity for the general public good.

(Footnotes omitted.) *See also* 1 *Nimmer on Copyright, at § 1.03[A]*.

We previously have considered the effect of anticompetitive language in a licensing agreement in the context of patent misuse. Compton v. Metal Products, Inc., 453 F.2d 38 (4th Cir. 1971), *cert. denied*, *406 U.S. 968, 32 L. Ed. 2d 667, 92 S. Ct. 2414 (1972)*. **[*979]** Compton had invented and patented coal auguring equipment. He granted an exclusive license in the patents to Joy Manufacturing, and the license agreement included a provision that Compton would not "engage in any business or activity relating to the manufacture or sale of equipment of the type licensed hereunder" for as long as he was due royalties under the patents. Suit for infringement of the Compton patents was brought against Metal Products, and the district court granted injunctive relief and damages. On appeal we held that relief for the infringement was barred by the misuse defense, stating:

> The need of Joy to protect its investment does not outweigh the public's **[**30]** right under our system to expect competition and the benefits which flow therefrom, and the total withdrawal of Compton from the mining machine business . . . everywhere in the world for a period of 20 years unreasonably lessens the competition which the public has a right to expect, and constitutes misuse of the patents.

Id. at 45. *Cf.* Berlenbach, supra (applying misuse doctrine where license to sell patented ski bindings prohibited licensee from manufacturing or selling any competing ski binding).

We think the anticompetitive language in Lasercomb's licensing agreement is at least as egregious as that which led us to bar the infringement action in *Compton*, and therefore amounts to misuse of its copyright. Again, the analysis necessary to a finding of misuse is similar to but separate from the analysis necessary to a finding of antitrust violation. The misuse arises from Lasercomb's attempt to use its copyright in a particular expression, the Interact software, to control competition in an area outside the copyright, *i.e.*, the idea of computer-assisted die manufacture, regardless of whether such conduct amounts to an antitrust **[**31]** violation.

C. *The Effect of Appellants Not Being Party to the Anticompetitive Contract*

In its rejection of the copyright misuse defense, the district court emphasized that Holiday Steel was not explicitly party to a licensing agreement containing the offending language. However, again analogizing to patent misuse, ***HN5***[] the defense of copyright misuse is available even if the defendants themselves have not been injured by the misuse. In *Morton Salt*, the defendant was not a party to the license requirement that only Morton-produced salt tablets be used with Morton's salt-depositing machine. Nevertheless, suit against defendant for infringement of Morton's patent was barred on public policy grounds. Similarly, in *Compton*, even though the defendant Metal Products was not a party to the license agreement that restrained competition by Compton, suit against Metal Products was barred because of the public interest in free competition. *See also* Hensley Equip. Co., 383 F.2d at 261; *cf.* Berlenbach, 329 F.2d at 784-85.

Therefore, the fact that appellants **[**32]** here were not parties to one of Lasercomb's standard license agreements is inapposite to their copyright misuse defense. The question is whether Lasercomb is using its copyright in a manner contrary to public policy, which question we have answered in the affirmative.

In sum, we find that misuse of copyright is a valid defense, that Lasercomb's anticompetitive clauses in its standard licensing agreement constitute misuse of copyright, and that the defense is available to appellants even though they were not parties to the standard licensing agreement. Holding that Lasercomb should have been barred by the defense of copyright misuse from suing for infringement of its copyright in the Interact program, we reverse the injunction and the award of damages for copyright infringement. [22]

---

[21] In general, copyrights last for the life of the author plus 50 years. 17 U.S.C. § 302(a).

[22] This holding, of course, is not an invalidation of Lasercomb's copyright. Lasercomb is free to bring a suit for infringement once it has purged itself of the misuse. *Cf.* United States Gypsum Co. v. National Gypsum Co., 352 U.S. 457, 465, 1 L. Ed. 2d 465, 77 S. Ct. 490 (1957); *Hensley Equipment Co.*, 383 F.2d at 261, 386 F.2d at 443.

[33]** **[*980]** III

Finding of Fraud

The complaint alleged that defendants committed fraud "at the time they sought to purchase a license to use the software at the Holiday plant" by representing to Lasercomb that they would preserve Lasercomb's **[***1855]** copyright and proprietary rights in Interact. The district court found Lasercomb had established fraud by showing that defendants made various false representations on which Lasercomb reasonably relied in continuing its relationship with Holiday Steel, thereby giving defendants the opportunity to make the unlawful copies. On appeal, Holliday and Reynolds contend that the district court erred in finding fraud on the basis of incidents which were not alleged in the complaint; that is, the false representations found by the court occurred after the time of the events alleged in the complaint.

Appellants point to *Rule 9(b) of the Federal Rules of Civil Procedure*, which requires that, ***HN6***[] "in all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity." Thus, a complaint which fails to specifically **[**34]** allege the time, place and nature of the fraud is subject to dismissal on a *Rule 12(b)(6)* motion. However, once the case has actually gone to trial, the issue of fraud is within the ambit of *Rule 15(b)*: "When issues not raised by the pleadings are tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings."

Appellants made no objection below to the introduction of the evidence which proved fraud at times after Interact was purchased, nor have they averred that their failure to object resulted from a reasonable belief that the evidence was introduced in support of some other issue being litigated. Therefore, the issues of fraud after the purchase of Interact were properly treated as if raised in the pleadings, and we affirm the district court's finding of fraud. *Fed. R. Civ. P. 15(b)*; *see* *Federal Mut. Ins. Co. v. Deal, 239 F. Supp. 618, 621 (S.D.W. Va. 1965)*; *Strand v. Librascope, Inc., 197 F. Supp. 743, 744 (E.D. Mich. 1961)*; 5 C. Wright & A. Miller, *Federal Practice and Procedure* § 1300 (1969); *cf.* *Consolidated Data Terminals v. Applied Digital Data Sys., 708 F.2d 385, 396 (9th Cir. 1983)* **[**35]** (even if pleadings never amended, judgment stands if issue tried by express or implied consent).

IV

Calculation of Damages

The district court calculated Lasercomb's damages on the basis of the three copies of Interact that defendants made and used without authorization and without payment to Lasercomb. [23] The district court calculated the damages based on the cost of a copy of Interact to a first-time user, *i.e.*, $ 35,000. Multiplying this amount by three, the district court arrived at actual damages of $ 105,000 assessed once for the count of copyright infringement and again for the count of fraud. The court, however, properly ruled that Lasercomb could recover the $ 105,000 only once. *See* *Clifford v. River Bend Plantation, Inc., 55 N.C. App. 514, 522, 286 S.E.2d 352, 356 (1982)*. The district court also awarded punitive damages on the fraud count against Holliday and Reynolds in the amounts of $ 10,000 and $ 5,000 respectively.

[36]** Having avoided the Charybdis of damages for copyright infringement by the misuse defense, appellants are now confronted with the Scylla of yet the same amount of damages for their fraudulent actions. This they face by challenging the **[*981]** court's calculation, claiming that, as to *them*, the cost of a copy of Interact was $ 2,000

Because of this holding, we do not reach the other defenses to copyright infringement advanced by appellants.

Although we find misuse of copyright, we reject the contention of appellants -- that they should recover attorney fees from Lasercomb under *17 U.S.C. § 505* because Lasercomb brought this action in bad faith. Given the conduct of defendants and the obscurity of their defenses, we find such a position completely untenable.

[23] Separate damages were awarded against Holiday Steel severally to account for profits realized by sale of the infringing PDS-1000 software. These damages are not at issue in this appeal.

rather than $ 35,000. We agree that the district court's approach was erroneous under the principles of North Carolina law. [24]

In North Carolina, "the goal sought in awarding damages is 'to restore the victim to his original condition, to give back to him that which was lost as far as it may be done by compensation in money.'" *Quate v. Caudle, 95 N.C. App. 80, 87, 381 S.E.2d 842, 846 (1989)* (quoting *Phillips v. Chesson, 231 N.C. 566, 571, 58 S.E.2d 343, 347 (1950))*, **[**37]** *rev. denied*, *325 N.C. 709, 388 S.E.2d 462 (1989)*. Alternatively stated, "The goal of the law of damages is to place an injured party in as nearly the same position as he would have been had he not been injured." *Cates v. Wilson, 321 N.C. 1, 7, 361 S.E.2d 734, 738 (1987)*.

The district court stated, "Plaintiff's actual damages may be measured by its lost sales." This is a generally correct statement of North Carolina law. However, by using a figure of $ 35,000, the court evidently was considering loss of sales to persons other than Holiday Steel. Due to the nature of software, however, Lasercomb could have sold copies to any other interested buyer notwithstanding defendants' copying, so it is difficult to discern how Lasercomb could have lost sales to prospective buyers -- other than Holiday Steel -- on account of the copying. Thus, **[***1856]** damages can be properly measured only by consideration of lost sales *to Holiday Steel*.

On August 2, 1983, Lasercomb sent a letter to Holiday Steel which stated that the charge for all future software licenses would be $ 2,000. [25] Appellants therefore assert that, had Holiday Steel properly purchased the three Interact **[**38]** copies rather than copying them, Lasercomb would have received $ 6,000. Lasercomb contends that "it would be a perversion of justice to allow" appellants the benefit of the "discount," given their intentional infringement and fraudulent actions. Appellants' wrongful actions, however, have bearing on the *actual* damages only if those actions induced Lasercomb to lower its price to $ 2,000; otherwise, the wrongful actions are relevant only to assessment of punitive damages.

The district court did not specifically find whether the $ 2,000 price was a product of business decisions that were unaffected by any fraudulent activity taking place, or whether (and, if so, to what extent) appellants obtained that favorable price only through its wrongful actions. Even if the price were $ 2,000 only because of fraud, however, it appears $ 35,000 per copy still would not be the proper amount of damages. Defendants submitted evidence **[**39]** that, under Lasercomb's standard discounting policy, the fifth, sixth, and seventh licenses each would have cost 25 percent of $ 35,000. We therefore vacate the judgment for $ 105,000 and remand for the district court to determine what amount Holiday Steel would have paid for the three copies of Interact, apart from fraud. [26]

AFFIRMED IN PART, REVERSED IN PART, AND REMANDED

End of Document

[24] It is undisputed that North Carolina law governs the common law claims in this case.

HN7[] -

[25] The charge also covered "programming of the chronoguard, and administrative functions."

[26] Appellants have not challenged the awards of punitive damages against them, and we do not disturb those awards.

HN1[] **Summary Judgment, Opposing Materials**

In a motion for summary judgment, the movant bears the burden of establishing that there is no genuine issue of material fact to be submitted to the trier of fact, and that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. As a general rule, all ambiguities and inferences to be drawn from the underlying facts should be resolved in favor of the party opposing the motion, and all doubts as to the existence of a genuine issue for trial should be resolved against the moving party. Under the current formulation of the standards governing summary judgment motions, the moving party does not, however, bear the burden of proving that his opponent's case is wholly frivolous. In cases where the nonmovant will bear the ultimate burden of proof at trial on an issue, the moving party's burden under *Rule 56* will be satisfied if he can point to an absence of evidence to support an essential element of the nonmoving party's claim. Thus, the evidentiary burdens that the respective parties will bear at trial guide this court in its determination of summary judgment motions.

Evidence > Weight & Sufficiency

HN2[] **Summary Judgment, Evidentiary Considerations**

In cases where a party that has filed a motion for summary judgment has attempted to demonstrate that the nonmoving party's evidence is insufficient as a matter of law to establish his claim, the burden shifts to the nonmoving party to come forward with persuasive evidence that his claim is not "implausible." The question then becomes, is there sufficient evidence to reasonably expect that a jury could return a verdict in favor of the nonmoving party. In ruling on a motion for summary judgment, the judge must view the evidence presented through the prism of the substantive evidentiary burden. No issue for trial exists unless there is sufficient evidence favoring the nonmoving party produced in opposition to the motion for a jury to return a verdict for that party. If the evidence is merely colorable or is not significantly probative summary judgment may be granted. A plaintiff opposing a fully supported motion must offer concrete evidence from which a reasonable juror could return a verdict in his favor. Then, if no such evidence is offered alluding to a genuine issue of material fact, the trial judge shall grant summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] Summary Judgment, Entitlement as Matter of Law

The substantive law will identify those facts which are to be considered as material, and only disputes over those facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment. Factual disputes that are irrelevant or unnecessary will not be counted. The United States Supreme Court explains the level of inquiry required in a summary judgment as whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN4[] Procedural Due Process, Scope of Protection

In order to establish a procedural due process violation, a plaintiff must prove that he or she was deprived of an opportunity granted at a meaningful time and in a meaningful manner for a hearing appropriate to the nature of the case.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Constitutional Limits

Constitutional Law > Substantive Due Process > Scope

Business & Corporate Compliance > ... > Real Property Law > Zoning > Ordinances

HN5[] Zoning, Constitutional Limits

In the context of a zoning dispute, to state a claim under the *Fourteenth Amendment* for deprivation of "property" without due process of law a person must establish that he had a valid "property interest" in some benefit that was protectible under the *Fourteenth Amendment* at the time he was deprived of the benefit. Property interests are not created by the United States Constitution. Instead, in order to determine whether a property interest in some benefit rises to the level of a right protectible under the *Fourteenth Amendment*, courts must look to existing rules or understandings that stem from an independent source such as state law. Those are rules or understandings that secure certain benefits and that support claims of entitlement to those benefits.

Constitutional Law > Substantive Due Process > Scope

HN6[] Constitutional Law, Substantive Due Process

The question of whether an applicant has a legitimate claim of entitlement to the issuance of a license or certificate should depend on whether, absent the alleged denial of due process, there is either a certainty or a very strong likelihood that the application would have been granted. Otherwise the application would amount to a mere unilateral expectancy not rising to the level of a property right guaranteed against deprivation by the *Fourteenth Amendment*. By that standard the United States Court of Appeals for the Second Circuit does not intend to remove from constitutional protection every application for a license or certificate that could, under any conceivable version of facts, be the subject of discretionary action, and a theoretical possibility of discretionary action does not automatically classify an application for a license or certificate as a mere unilateral hope or expectation. On the contrary, the standard is intended to be a tool capable of measuring particular applications to determine if the applicant had a legitimate claim of entitlement based on the likelihood that without the due process violation that application would have been granted.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Constitutional Limits

Constitutional Law > Substantive Due Process > Scope

HN7[] Zoning, Constitutional Limits

A zoning authority's discretion, embodied in the governing law, prevents plaintiff's expectation of success from rising to the level of certainty required to give rise to a cognizable property right.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Variances

Environmental Law > Land Use & Zoning > Conditional Use Permits & Variances

HN8[] Zoning, Variances

Where a use variance is sought, the applicant must show practical difficulties and unnecessary hardship. Before a zoning board may exercise its discretion and grant a variance, the record must show (1) that the land in question cannot yield a reasonable return if only used for a purpose allowed in that zone; (2) that the plight of the applicants was due to unique circumstances and not to the general conditions in the neighborhood; and (3) that the essential character of the neighborhood will not be altered by the use sought.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Constitutional Law > Equal Protection > General Overview

HN9[] Equal Protection, Nature & Scope of Protection

The *Equal Protection Clause* is essentially a direction that all persons similarly situated should be treated alike. To state an equal protection claim, a plaintiff must charge a governmental officer not only with deliberately interpreting a statute against the plaintiff, but also with singling him out alone for that misinterpretation.

Constitutional Law > Equal Protection > Nature & Scope of Protection

Evidence > Inferences & Presumptions > General Overview

HN10[] Equal Protection, Nature & Scope of Protection

An equal protection claim may be raised even though a plaintiff is not a member of a suspect class. It is, however, necessary for the plaintiff to set forth substantial facts supporting his allegation of discriminatory treatment, as well as facts that the alleged discrimination was purposeful or intentional.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN11[] Summary Judgment, Entitlement as Matter of Law

On a summary judgment motion all ambiguities and inferences to be drawn from the underlying facts should be resolved in the light most favorable to the nonmoving party.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN12[] Equal Protection, Nature & Scope of Protection

A *42 U.S.C.S. § 1985(3)* claim is merely a codification of a claim of conspiracy to violate the *Equal Protection Clause of the Fourteenth Amendment*. In order to make out a violation of *§ 1985(3)*, plaintiff must allege and prove four elements: (1) a conspiracy; (2) for the purpose of depriving, either directly or indirectly, any person or class of persons of the equal protection of the laws, or of equal privileges and immunities under the laws; and (3) an act in furtherance of the conspiracy; (4) whereby a person is either injured in his person or property or deprived of any right or privilege of a citizen of the United States.

Civil Rights Law > ... > Elements > Color of State Law > General Overview

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN13[] Elements, Color of State Law

Rights under the *Equal Protection Clause* itself arise only where there has been involvement of the state or of one acting under the color of its authority. The *Equal Protection Clause* does not add any thing to the rights which one citizen has under the United States Constitution against another. The *Fourteenth Amendment* protects the individual against state action, not against wrongs done by individuals.

Constitutional Law > Equal Protection > National Origin & Race

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Constitutional Law > Equal Protection > General Overview

Constitutional Law > Equal Protection > Nature & Scope of Protection

HN14[] Equal Protection, National Origin & Race

Under *42 U.S.C.S. § 1983(5)*, a conspiracy not only must have as its purpose the deprivation of equal protection of the laws, or of equal privileges and immunities under the laws, but also must be motivated by some racial, or perhaps otherwise class-based, invidiously discriminatory animus behind the conspirators' action.

Civil Rights Law > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN15[] **Civil Rights Law**

The United States Supreme Court explicitly foreclosed the possibility of a viable *42 U.S.C.S. § 1985(3)* claim where plaintiff alleges a conspiracy motivated by economic or commercial animus. The Court finds no support for the proposition that *§ 1985(3)* was intended to reach conspiracies motivated by bias towards others on account of their economic views, status, or economic activities. Economic and commercial conflicts are best dealt with by statutes, federal or state, specifically addressed to such problems.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Exemptions & Immunities, Parker State Action Doctrine**

Nothing in the language of the Sherman Act or in its history suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. This deference to the states has come to be known as the "state action" exemption to the federal antitrust laws. Under this exemption doctrine, when a state directs, or acts in, some noncompetitive activity, the state and its officers are nonetheless exempt from the operation of the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Constitutional Law > Bill of Rights > General Overview

HN17[] **Antitrust & Trade Law, Sherman Act**

Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise. They are as important to the preservation of economic freedom and our free enterprise-system as the *Bill of Rights* is to the protection of our fundamental personal freedoms. And the freedom guaranteed each and every business, no matter how small, is the freedom to compete-to assert with vigor, imagination, devotion and ingenuity whatever economic muscle it can muster.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Local Governments > Duties & Powers

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Public Improvements > General Overview

HN18[] Exemptions & Immunities, Parker State Action Doctrine

Unlike the several states, cities are not automatically within the Parker doctrine, that is, exempt from the operation of the antitrust laws. To invoke the protection afforded by the Parker doctrine, a municipality must show that its anticompetitive conduct was taken pursuant to state policy to displace competition with regulation or monopoly public service. This state policy must be one that is clearly articulated and affirmatively expressed. An additional requirement that the state policy be actively supervised also has been imposed by the United States Supreme Court.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Variances

Governments > Local Governments > Duties & Powers

Real Property Law > Zoning > Judicial Review

Administrative Law > Agency Adjudication > Review of Initial Decisions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN19[] Zoning, Variances

The authority of a city to make an initial determination as to the issuance of a use variance upon an application for such variance and to subsequently review such decision after an appeal is taken as to the denial of such variance has been expressly granted by the New York Legislature, that is, affirmatively addressed. This grant of authority, giving great deference to a city in determining whether to grant a use variance to an applicant based upon certain well-established standards, satisfies the requirement of a clearly articulated and affirmatively expressed state policy for purposes of the Parker exemption from the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN20[] Antitrust & Trade Law, Sherman Act

Section 1 of the Sherman Act prohibits every contract, combination, or conspiracy in restraint of trade. A Sherman Act, *§ 1* plaintiff must establish both elements: first, that defendant entered into a contract, combination or conspiracy; and second, that such was in restraint of trade. Although the Sherman Act speaks of restraint of trade in absolute terms, it has long been established that Sherman Act, *§ 1*, proscribes only unreasonable restraints. Therefore, the "rule of reason" has evolved as the basic test for determining the legality of a business practice which purportedly operates to restrain trade. Under this rule, the court is required to analyze the challenged restraint's impact on competitive conditions. In fact, certain business relationships are deemed unreasonable per se, due to their pernicious effect on competition and lack of any redeeming virtue.

Opinion

MEMORANDUM/DECISION/ORDER

1. Procedure

Plaintiffs have commenced an action under *42 U.S.C. §§ 1983* and *1985(3)*, and *15 U.S.C. §§ 1*, *2*, and *15* seeking damages for alleged violations of their rights to procedural and substantive due process and to equal protection and for violations of the Federal Antitrust Laws. The plaintiffs, Ronald D. Scales, Karen Scales and Schmitt Sales, Inc., alleged that they were wrongfully denied the ability to install gasoline tanks and pumps at property known as 15 Oswego Street, Camden, New York due to the alleged illegal activities of various officials of the Village of Camden, New York in denying certain building and zoning permits and applications for variance filed by plaintiffs. The plaintiffs **[*2]** are seeking damages for the period of time from September 13, 1983, the date on which the Scales were first denied a building permit to July 26, 1986, the date on which the defendants were approved for a building permit by the Village Of Camden.

The wrongful conduct which the Plaintiffs complain of is as follows:

1. A conspiracy by Defendants' to favor the interest of C & J Variety Store, the operators of 38-44 Oswego Street, and Defendants' self-interest to the detriment of Plaintiffs.

2. Preferential treatment of a similiarly situated business.

3. Alteration of an official document to correct a procedural irregularity.

4. A decision to deny Plaintiffs' request for a variance formed prior to any hearing in violation of plaintiffs' right to due process.

The defendants move to dismiss plaintiffs' complaint, or alternatively for summary judgment on the following grounds:

1. That Schmitt Sales, Inc. lacks standing to bring this action;

2. That plaintiff's Fourth and Fifth Causes of Action alleging Anti-Trust violations are without legal or factual basis and further defendants are exempt from such statutes;

3. That the majority of plaintiffs' claims are barred by the three **[*3]** year Statute of Limitations;

4. That the defendants are immune from liability;

5. The alleged acts of defendants, even if true, are not of a constitutional dimension; and

6. Plaintiffs have obtained full legal redress in State Court.

2. Facts

On June 16, 1982 the plaintiffs Ronald D. Scales and Karen M. Scales purchased real property known as The Country Store located within the Village of Camden, New York. The defendants argue, and the court agrees, that it is material that such location was within a residential neighborhood. The plaintiffs did not challenge that fact at oral argument.

On August 26, 1983 the plaintiffs entered into a Commission Marketing Agreement and Special Purpose Lease with Schmitt Sales, Inc.. Pursuant to this Agreement and Lease, Schmitt Sales agreed to supply gasoline, pumps and tanks to the Scales in exchange for one-half of all net profits from gasoline sales. At the time the Scales purchased The Country Store, it is uncontradicted that gasoline had never been sold at that location.

On or about September 14, 1983 the Scales applied for a building and zoning permit for the construction of gasoline pumps, inground tanks, and a gasoline pump island **[*4]** at their store. The building permit was denied on the basis that the sale of gasoline was not allowed in the zone in which the store was located. The Country Store had existed only as a grocery store for several years and had been granted nonconforming use status. The installation and sale of self-service gasoline was deemed an expansion of the non-conforming use and would require a variance, in accordance with Sections 30.71 and 30.86 of the Village of Camden Ordinance.

Subsequently, on October 10, 1983 the Scales filed an appeal with the Village of Camden Zoning Board of Appeals requesting a variance. On December 6, 1983 a public hearing on the Scales' variance request was conducted by the Village of Camden Zoning Board of Appeals. After a request by Scales' counsel for time to "submit additional information, the hearing was continued to April 3, 1984. The defendants allege that there had been public opposition to the sale of gasoline at The Country Store, due to public concerns about traffic hazards and the proximity of the Camden Elementary School and the detrimental effects of gasoline sales on the character of the neighborhood.

After being reconvened on April 3, 1984, the Village **[*5]** of Camden Zoning Board of Appeals determined to deny the variance on the grounds that the variance would alter the residential character of the neighborhood, create a traffic hazard for the neighboring elementary school, would adversely impact neighborly residential uses, would be contrary to spirit and intent of the zoning ordinance and further that the Scales did not sustain their burden of proof on the issue of economic hardship.

On April 30, 1984 the Scales commenced an Article 78 proceeding in New York State Supreme Court, Oneida County, seeking to reverse the decision of the Zoning Board of Appeals. The Article 78 petition was denied and the matter was remanded by the Supreme Court to the Zoning Board of Appeals for further consideration because the Zoning Board of Appeals was determined by the Court to have been improperly constituted at the time of the decision.

A further public hearing was held on November 13, 1985 and the Zoning Board of Appeals denied the Scales a variance based on various grounds including the grounds previously determined by the Board, all as more fully reflected in the Board's decision on February 12, 1986.

On March 14, 1986 the Scales commenced a second **[*6]** Article 78 proceeding seeking to reverse the determination of the Village of Camden Zoning Board of Appeals. On June 18, 1986 Justice Tenney of the Oneida County Supreme Court issued an order granting the Scales' Article 78 proceeding and directing the Village of Camden to issue a variance and building permit for the installation of gas pumps at The Country Store.

On July 26, 1986 Ronald D. and Karen M. Scales submitted a building permit for the gasoline pumps which was approved by the Village of Camden Zoning Enforcement Officer, and shortly thereafter the gasoline pumps were installed.

3. Discussion

The arguments presented by the Defendants' in their motion to dismiss, or in the alternative for summary judgment will be considered pursuant to the outline set forth in the Defendants' Memorandum. First, we will discuss the Plaintiffs' due process claims, specifically, the procedural and substantive due process arguments, including most importantly, the issue of whether the plaintiffs' mere expectation of a variance warrants protection under the Constitution as a property right. Next, we will consider the equal protection argument and antitrust claims respectively. The rationale **[*7]** for this structure is that if we find that the plaintiffs' mere expectation of a variance does not warrant protection as a Constitutionally protected property right, find no denial of equal protection under the laws of New York State and find no anti-trust violation, we need not reach the remaining motions, but instead, may simply grant the defendants' summary judgment motion.

HN1[] In a motion for summary judgment, the movant bears the burden of establishing that there is no genuine issue of material fact to be submitted to the trier of fact, and that the movant is entitled to judgment as a matter of law. *Fed.R.Civ.P. 56(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 330, 106 S.Ct. 2548, 2556, 91 L.Ed.2d 265 (1986)*(Brennan, J., dissenting); *Adickes v. S.H. Kress & Co., 398 U.S. 144, 90 S.Ct. 1598, 26 L.Ed.2d 142 (1970)*. As a general rule, all ambiguities and inferences to be drawn from the underlying facts should be resolved in favor of the party opposing the motion, and all doubts as to the existence of a genuine issue for trial should be resolved against the moving party. *Celotex, 477 U.S. at 330 n.2, 106 S.Ct. at 2556-57 n.2*; *Adickes, 398 U.S. at 158-59, 90 S.Ct. at 1609*. **[*8]**

Under the current formulation of the standards governing summary judgment motions, the moving party does not, however, bear the burden of proving that his opponent's case is wholly frivolous. See *Celotex, 477 U.S. at 323-26, 106 S.Ct. at 2553-55*; *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S.Ct. 1348, 89L*.Ed.2d 538 (1986). In Celotex, the Supreme Court made it clear that in cases where the nonmovant will bear the ultimate burden of proof at trial on an issue, the moving party's burden under *Rule 56* will be satisfied if he can point to an absence of evidence to support an essential element of the nonmoving party's claim. Thus, the evidentiary burdens that the respective parties will bear at trial guide this court in its determination of summary judgment motions.

HN2[] In cases such as this one, where the moving party has attempted to demonstrate that the nonmoving party's evidence is insufficient as a matter of law to establish his claim, the burden shifts to the nonmoving party to come foward with persuasive evidence that his claim is not "implausible." See *Matsushita Elec. Indus. Co., 475 U.S. at 587, 106 S.Ct. at 1356*. The question then becomes, **[*9]** is there sufficient evidence to reasonably expect that a jury could return a verdict in favor of the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 251, 106 S.Ct. 1505, 2510, 2512, 91 L.Ed.2d 202 (1986)*. The Supreme Court in Liberty Lobby reasoned that "in ruling on a motion for summary judgment, the judge must view the evidence presented through the prism of the substantive evidentiary burden." *Id. at 254*. Under *Liberty Lobby, supra*, no issue for trial exists unless:

. . . there is sufficient evidence favoring the nonmoving party [produced in opposition to the motion] for a jury to return a verdict for that party . . . . If the evidence is merely colorable . . . or is not significantly probative . . . summary judgment may be granted.

106 S.Ct. 2505, at 2511, 2515. The Liberty Lobby Court stressed that a plaintiff opposing a fully supported motion must offer "concrete evidence from which a reasonable juror could return a verdict in his favor." Then, if no such evidence is offered alluding to a genuine issue of material fact, the trial judge shall grant summary judgment. *Id. at 2511*.

HN3[] The substantive law will identify those facts which are to **[*10]** be considered as material, and only disputes over those facts that might affect the outcome of the suit under the governing law will properly preclude the entry of summary judgment. Factual disputes that are irrevelant or unnecessary will not be counted. See generally 10A C. Wright, A. Miller, & M. Kane, Federal Practice and Procedure § 2725, pp. 93-95 (1983).

In conclusion, the Supreme Court has explained the level of inquiry required in a summary judgment as: whether the evidence presents a sufficient disagreement to require submission to a jury or whether it is so one-sided that one party must prevail as a matter of law.

A. DUE PROCESS CLAIMS

1. Procedural Due Process Claim

Before addressing plaintiffs' substantive due process claim, we first briefly will consider plaintiffs' procedural due process claim. ***HN4***[] In order to establish a procedural due process violation, a plaintiff must prove that he or she was deprived of "'an opportunity . . . granted at a meaningful time and in a meaningful manner' for [a] hearing appropriate to the nature of the case." *Boddie v. Connecticut, 401 U.S. 371, 378, 91 S.Ct. 780, 786, 28 L.Ed. 2d 113 (1971)* (citations omitted). The plaintiffs' **[*11]** in this case do not claim that they were deprived of such due process rights, but instead, argue that the decision to deny plaintiffs' request for a variance was formed prior to any hearing, and therefore, was in violation of plaintiffs' right to due process. On the facts of this case, I must wholeheartedly disagree.

In their complaint, plaintiffs' state that the defendants' have violated their due process rights by failing to conduct fair and unbiased hearings, failing to render fair and impartial decisions, failing to empanel a proper Board of Review, altering official documents in order to defraud the plaintiffs' and acting with total disregard for plaintiffs' property and civil rights. These allegations, however, are not supported by the evidence and, therefore, the plaintiffs' first cause of action is hereby dismissed.

2. Substantive Due Process Claim

a. Does Plaintiffs' Mere Expectancy of a Variance Merit Protection as a Constitutionally Protected Property Right?

Prior to addressing the merits of appellants' substantive due process claim, we must first determine whether the property rights which the Scales assert they were deprived of could have constituted protected **[*12]** "property interests" within the meaning of the *fourteenth amendment*.

HN5[] In the context of a zoning dispute, to state a claim under the *fourteenth amendment* for deprivation of "property" without due process of law a person must establish that he had a valid "property interest" in some benefit that was protectible under the *fourteenth amendment* at the time he was deprived of the benefit. See *Board of Regents v. Roth, 408 U.S. 564, 576-77, 92 S.Ct. 2701, 2708-09, 33 L.Ed.2d 548 (1972)*; *G.T. Scott v. Greenville County, 716 F.2d 1409, 1418 (4th Cir.1983)*. In Roth, the Supreme Court pointed out that property interests are not created by the Constitution. Instead, in order to determine whether a property interest in some benefit rises to the level of a right protectible under the *fourteenth amendment*, courts must look to existing rules or understandings that stem from an independent source such as state law. Those are rules or understandings that secure certain benefits and that support claims of entitlement to those benefits. *408 U.S. at 577, 92 S.Ct. at 2709*.

In answering these questions, we can look towards the three leading decisions in this area, *Yale Auto Parts v. Johnson, **[*13]** 758 F.2d 54 (2d Cir.1985)*, *Sullivan v. Town of Salem, 805 F.2d 81 (2d Cir.1986)*, and *Dean Tarry Corp. v. Friedlander, 826 F.2d 210 (2d Cir.1987)*, in which the Second Circuit articulated the following principles:

HN6[] [T]he question of whether an applicant has a legitimate claim of entitlement to the issuance of a license or certificate should depend on whether, absent the alleged denial of due process, there is either a certainty or a very strong likelihood that the application would have been granted. Otherwise the application would amount to a mere unilateral expectancy not rising to the level of a property right guaranteed against deprivation by the *Fourteenth Amendment*. (citation omitted).

By that standard the Second Circuit did not intend to remove from constitutional protection every application for a license or certificate that could, under any conceivable version of facts, be the subject of discretionary action, and a theoretical possibility of discretionary action does not automatically classify an application for a license or certificate as a mere "unilateral hope or expectation". On the contrary, our standard [is] intended to be a tool capable of measuring particular **[*14]** applications to determine if the applicant had a legitimate claim of entitlement based on the likelihood that without the due process violation that application would have been granted. Sullivan, 805 F.2d at 85 (quoting Yale Auto Parts, 758 F.2d at 59).

In Yale Auto Parts, the Second Circuit reviewed a grant of judgment on the pleadings against a plaintiff-motor vehicle junkyard proprietor who applied to the Zoning Board of Appeals of West Haven, Connecticut, for a certificate of location approval. The Zoning Board of Appeals denied the application. The Second Circuit held that the plaintiff did not possess a cognizable property right in gaining approval of its application despite the defendants' "egregious misconduct" because the defendants possessed "wide discretion" under state law in reviewing such applications. 758 F.2d at 59. Applying the standard set forth earlier, the Second Circuit wrote:

Since plaintiffs were not entitled as a matter of right to the ZBA certificate of location approval sought by them and there is no allegation that but for the ZBA members' alleged misconduct the ZBA would have been required to award them the requested certificate, they lack any **[*15]** property interest protectible under the Due Process Clause.

Id. at 60.

In Sullivan, the Second Circuit reviewed a finding of summary judgment against a plaintiff-builder who applied for certificates of occupancy for certain newly constructed houses. 805 F.2d at 83. The building inspector of the defendant Town of Salem refused to issue the certificates despite the builder's apparent compliance with all lawfully imposed requirements. Id. at 85. The court found that if the houses complied with the applicable lawfully imposed state and municipal requirements, there was no element of discretion or judgment for the building official to exercise in determining whether or not to issue the certificates. See id. In those circumstances a denial of the certificates "would constitute a deprivation of property without due process." Id.

In Dean Tarry Corp., the Planning Board denied Dean Tarry's application in an exercise of the discretion granted to the Planning Board by the zoning ordinance. The ordinance, while later struck down as too generous in this regard, specifically permitted the Planning Board to reject applications after taking "into consideration the public health, **[*16]** safety and general welfare." 826 F.2d at 212.

The distinction should now become clear. In Sullivan, the unlawful requirement preventing approval of the builder's application came out of thin air and was not derived from an existing legislative or administrative standard. Having met all existing requirements, the Sullivan plaintiff would have had a "certainty or a very strong likelihood" of success at the time he submitted his application. Id.

In contrast, in both Yale Auto Parts, and Dean Tarry Corp., the plaintiff's application was rejected pursuant to a zoning ordinance, in existance at the time the plaintiff submitted its plan for approval, that conferred broad discretion on the Planning Board. **HN7**[] This discretion, embodied in the governing law, prevented the plaintiffs' expectation of success from rising to the level of certainty required to give rise to a cognizable property right. See Yale Auto Parts, 758 F.2d at 59-60; Dean Tarry Corp., 826 F.2d at 213.

It is relevant to note that the Second Circuit held that the state courts' decisions invalidating the zoning ordinance and the Planning Board's rejection of Dean Tarry's application did not require a **[*17]** contrary result. The Planning Board possessed wide discretion under then existing law to reject Dean Tarry's site plan on the basis of the Planning Board's assessment of the plan's effect on "the public health, safety and general welfare." Dean Tarry Corp., 826 F.2d at 213. This wide discretion prevented Dean Tarry's expectation of success from rising to the level of a property right meriting protection under the Fifth and Fourteenth Amendments. Id.; See Board of Regents v. Roth, 408 U.S. 564, 577-78, 92 S.Ct. 2701, 2709, 33 L.Ed.2d 548 (1972) ("unilateral expectation" of gaining entitlement insufficient to constitute property right; claimant must have "legitimate claim of entitlement" to the benefit); Yale Auto Parts, 758 F.2d at 58-59 (no property right where "there is no assurance that if the defendants had properly exercised their discretion they would have issued the [license]"). The Second Circuit held that the district court properly found in favor of defendants in this regard.

Based on the facts in the case at bar, a result consistant with the one in both Yale Auto Parts, and Dean Tarry Corp., is warranted here. For plaintiffs' to maintain this cause of **[*18]** action there must be proof that they were entitled to the variance as a matter of right, and but for the defendants' alleged misconduct, the defendants would have been required to award them the requested variance. See *Dean Tarry Corp., 826 F.2d at 212*. Otherwise, the plaintiffs' application is merely a unilateral expectancy not rising to the level of a property right entitled to protection against deprivation under the Constitutions' *Fourteenth Amendment*. See *Sullivan, 805 F.2d at 85*. Since the zoning ordinance in the Village of Camden conferred broad discretion on the Zoning Board, as embodied in governing law, this discretion prevents plaintiffs' expectation of success from rising to the level of certainty required to give rise to a cognizable property right.

As mentioned above, and consistant with Dean Tarry Corp., the state courts' reversal of defendants' rejection of plaintiffs' application does not require a different result. See *Dean Tarry Corp., 826 F.2d at 213*. The Zoning Board of Appeals possessed wide discretion to reject plaintiffs' application based on the variances' anticipated effect on the public health, safety and general welfare. More specifically, **[*19]** the Village of Camden Zoning Board of Appeals decided to deny the variance on the grounds that the variance would alter the residential character of the neighborhood, create a traffic hazard for the neighboring elementary school, would adversely impact neighborly residential uses and would be contrary to the intent of the zoning ordinance. In addition, the plaintiffs' were found not to have met their burden of establishing those facts required in order to receive a use variance. ***HN8***[] Where a use variance is sought, the applicant must show practical difficulties and unnecessary hardship. Huntington Town Bd. v. Zoning Bd. of Appeals, 555 N.Y.S. 425, 426 (A.D.2 Dept. 1990). Before a Zoning Board may exercise its discretion and grant a variance, the record must show (1) that the land in question cannot yield a reasonable return if only used for a purpose allowed in that zone; (2) that the plight of the applicants was due to unique circumstances and not to the general conditions in the neighborhood; and (3) that the essential character of the neighborhood will not be altered by the use sought. Id. citing *Otto v. Steinhilber, 282 N.Y. 71, 76, 24 N.E.2d 851*, rearg. denied *282* ***[*20]*** *N.Y. 681, 26 N.E.2d 811 (1939)*.

Based on the above analysis, this court holds that the plaintiffs' second cause of action: a violation of *42 U.S.C. § 1983* and the *14th amendment* based on a denial of substantive due process should be dismissed. But see *Brady v. Town of Colchester, 863 F.2d 205 (2d Cir.1988)* (the Second Circuit held that an issue of material fact existed as to whether two-story building had been zoned and used commercially prior to owners acquisition of property, precluding summary judgment as to whether owners had vested property interest in commercial use of property, for purpose of claim that conduct of town planning and zoning commission, town and town officials in denying certificate of occupancy and revoking building permit deprived owners of protected property interest in violation if substantive due process).

The plaintiffs' also allege the existence of a conspiracy by defendants' to favor the interest of C & J Variety Store, the operators of 38-44 Oswego Street, and Defendants' self-interest to the detriment of Plaintiffs. As noted in *Villanueva v. McInnis, 723 F.2d 414 (5th Cir.1984)*, a conspiracy allegation does not obviate the necessity of proving **[*21]** "an actual deprivation of a constitutional right." *Id. at 418*. As described above, the Scales did not possess a property right in being granted a variance. This does, however, lead us to the next cause of action alleged by the plaintiffs'. In their third cause of action, the plaintiffs' allege a violation of *§ 1983* and the *14th Amendment* based on a denial of equal protection. In their fourth cause of action, the plaintiffs' allege a conspiracy to violate their civil rights under the *Equal Protection Clause of the Fourteenth Amendment*.

B. EQUAL PROTECTION CLAIMS

1. Under *42 U.S.C. § 1983* and the *Fourteenth Amendment*.

HN9[] The *equal protection clause* "is essentially a direction that all persons similiarly situated should be treated alike." *City of Cleburne v. Cleburne Living Center, Inc., 473 U.S. 432, 439, 105 S.Ct. 3249, 3252, 87 L.Ed.2d 313 (1985)*. To state an equal protection claim, a plaintiff must charge a governmental officer "not only with deliberately interpreting a statute against the plaintiff, but also with singling him out alone for that misinterpretation." *Burt v. City of New York, 156 F.2d 791, 792 (2d Cir.1946)*, as cited in *Brady v. Town of Colchester, 863* ***[*22]*** *F.2d 205 (2d Cir.1988)*.

The plaintiffs' argue in their third cause of action that the defendants' violated *42 U.S.C. § 1983* and the *14th Amendment* by denying them equal protection. More specifically, the plaintiffs' claim that the defendants' have denied the plaintiffs' Equal Protection through conduct including but not limited to the granting to Chuck's R.V. Service and Convenient Mart building permits or variances to install gasoline pumps under conditions that they have alleged to be the same or at least similiar to the Plaintiffs'. In the Plaintiffs' Answers to Defendants' First Set of Interrogatories the plaintiffs' describe how, in their opinion, "Chuck's RV Service" was similiarly situated to the "Country Store." They allege that because both establishments were non-conforming uses in Residential Zones and both provided retail sales services prior to the installation of gasoline pumps, these two establishments were similiarly situated for the purposes of maintaining a cause of action for an alleged equal protection violation. In addition, in describing the nature of the allegedly illegal conduct of the defendants', the plaintiffs' state that all defendants acted in concert **[*23]** to deny Plaintiffs' a variance to install gasoline pumps. Specifically, defendant Henry Spellicy preferred the rights of Chuck's RV Services to that if the Plaintiffs', denied Plaintiffs' equal treatment and conspired to monopolize gasoline prices and restrain trade in gasoline. In addition, the Plaintiffs' argue that Defendant Davis Baker denied equal treatment to Plaintiffs', and Defendants Walton Simmons, Kevin Hannon, Timothy Berquist, and Thomas Walker denied Plaintiffs a fair hearing, equal protection, acted arbitrarily and capriciously and conspired to monopolize gasoline prices and restrain the trade of gasoline. The Plaintiffs' also argue that Defendant Thomas Walker acted without proper authority, Defendant Charlene Phinney falsified documents including the Municipal Code and Certification, and Defendant George Henry arbitrarily stopped work at Plaintiffs site and arbitrarily inspected work in progress in order to harass Plaintiffs. While it is the courts opinion that the plaintiffs' may have adequately alleged an equal protection claim, they have failed to present any evidence to support the claim.

Plaintiffs' allege that they were denied a variance that all others who applied **[*24]** for had received. In addition, the plaintiffs' claim that those who did receive such variance were basically in the same position that they were in. Under the doctrine of *Burt v. City of New York, 156 F.2d 791 (2d Cir.1946)* consistently applied by the Second Circuit, ***HN10***[] an equal protection claim may be raised even though the plaintiff is not a member of a suspect class. See *Rodrigues v. Village of Larchmont, New York, 608 F.Supp. 467, 475 (D.C.N.Y. 1985)*. It is, however, necessary for the plaintiff to set forth substantial facts supporting his allegation of discriminatory treatment, Marty's Adult World of New Britian, *Inc. v. Guida, 453 F.Supp. 810, 818 (D.Conn.1978)*, as well as facts that the alleged discrimination was purposeful or intentional. Telepromnter of Erie, *Inc. v. City of Erie, 567 F.Supp. 1277, 1293 (W.D.Pa.1983)*; see also *Burt, 156 F.2d at 792*.

Based on testimony illicited at oral argument, the court believes that the other establishments were not similiarly situated with the plaintiffs. [1] More specifically, it was pointed out that, in fact, the other establishments were either located a greater distance away from the school, [2] had gasoline **[*25]** pumps located on the premises that had been previously installed, were previously zoned to allow the sale of self-service gasoline, or a combination of the above factors.

---

[1] While this court realizes that in today's economy a store such as "The Country Store" would ordinarily need to sell gasoline at their establishment along with other traditional goods, and we acknowledge that most stores such as the one in question do, in fact, sell gasoline, these facts do not warrant consideration in an equal protection analysis.

[2] At oral argument the plaintiffs argued that the fact that the Zoning Board of Appeals considered the location of "The Country Store" to the school in question should be ignored altogether or at least discounted because the school itself dispensed gasoline to its buses. This argument is not compelling. The fact that the school dispenses gasoline for the use of its buses is distinguishable from the use that "The Country Store" had hoped to employ. The schools use was a very controlled and limited one, whereas "The Country Store" was quite the opposite, both uncontrolled and unlimited. Therefore, the Zoning Board of Appeals consideration of that fact in rendering its decision on the issue of whether to grant such establishment a use variance was warranted.

[*26] ***HN11***[] On a summary judgment motion all ambiguities and inferences to be drawn from the underlying facts should be resolved in the light most favorable to the nonmoving party. In applying this standard to the facts presented, however, this cause of action is hereby dismissed because the plaintiffs have failed to offer sufficient proof supporting their allegations.

2. Conspiracy Under 42 U.S.C. § 1985(3) and the Equal Protection Clause of the Fourteenth Amendment.

In the fourth cause of action, the plaintiffs allege a violation of *42 U.S.C. § 1985(3)* and the *Equal Protection Clause of the Fourteenth Amendment*. Although the plaintiffs' agreed at oral argument to withdraw their claim under *§ 1985(3)*, they continued to argue their claim under the *Equal Protection Clause*. This is problematic since ***HN12***[] a *§ 1985(3)* claim is merely a codification of a claim of conspiracy to violate the *equal protection clause of the Fourteenth Amendment*. Therefore, we will discuss the merits of such claim at this time. In order to make out a violation of *§ 1985(3)*, as construed in the seminal case of *Griffin v. Breckenridge,* ***[*27]*** *403 U.S. 88, 102-103, 91 S.Ct. 1790, 1798, 29 L.Ed.2d 338 (1971)*, the plaintiff must allege and prove four elements: (1) a conspiracy; (2) for the purpose of depriving, either directly or indirectly, any person or class of persons of the equal protection of the laws, or of equal privileges and immunities under the laws; and (3) an act in furtherance of the conspiracy; (4) whereby a person is either injured in his person or property or deprived of any right or privilege of a citizen of the United States.

"It is a commonplace that ***HN13***[] rights under the *Equal Protection Clause* itself arise only where there has been involvement of the State or of one acting under the color of its authority. The *Equal Protection Clause* 'does not . . . add any thing to the rights which one citizen has under the Constitution against another.' *United States v. Cruikshank, 92 U.S. 542, 554-555 [23 L.Ed. 588]*. As . . . Justice Douglas . . . put it, "The *Fourteenth Amendment* protects the individual against state action, not against wrongs done by individuals.

United States v. Williams, 341 U.S. 70, 92 [71 S. Ct. 581, 593, 95 L.Ed. 758] (dissenting opinion). This has been the view of the Court from **[*28]** the beginning. (citations omitted).

United Broth. of Carpenters & Joiners v. Scott, 463 U.S. 822, 831, 103 S.Ct. 3352, 3357, 77 L.Ed.2d 1049 (1983). The opinion for the Court characterized the *Fourteenth Amendment* rights in the same way. *United States v. Price, 383 U.S. 787, 799, 86 S.Ct. 1152, 1160, 16 L.Ed.2d 267 (1966)*.

The plaintiffs' have failed to establish or even sufficiently allege all the elements required under *§ 1983* (5) to maintain a cause of action. As to the first and fourth elements, the plaintiffs' have alleged a conspiracy to deny them of the equal protection of the laws of the Village of Camden, State of New York; and United States of America. As to the second and third elements, however, the complaint is facially insufficient to maintain a cause of action. In construing the second element, the Supreme Court in Griffin held that ***HN14***[] the conspiracy not only must have as its purpose the deprivation of "equal protection of the laws, or of equal privileges and immunities under the laws," but also must be motivated by "some racial, or perhaps otherwise class-based, invidiously discriminatory animus behind the conspirators' action." *Id., at 102, 91 S.Ct., at* ***[*29]*** *1798*. The plaintiffs have failed to meet this requirement. In addition, it is unclear exactly what act was done in furtherance of the conspiracy. If the conspiratorial goal was to deny the plaintiffs equal protection, or equal privileges and immunities under the law, then the denial of the variance permitting the sale of gasoline at the location in question was the specific act that created the equal protection violation. It is still, however, unclear exactly what act was done in furtherance of the conspiratorial goal. The plaintiffs' allege, first, that certain official documents were altered. They do not, however, explain what relation this act had on the achievement of the objectives of the conspiracy. In addition, the plaintiffs allege that the defendants discriminated against them by preferring the interests of other proprietorships over theirs. They fail to specifically allege the facts necessary to bolster such an allegation or relate it to a violation of *§ 1985(3)*. Lastly, the plaintiffs allege that the defendants acted arbitrarily and capriciously. Once again, the plaintiffs have failed to tie the alleged acts of the defendants to any violation of *§ 1985(3)*.

Even if we were **[*30]** to hold that the plaintiffs' had successfully alleged a conspiracy under *§ 1985(3)*, the allegations of plaintiffs' complaint refer to a class distinguished only by economic characteristics, i.e., proprietors wishing to sell self-service gasoline. As to this, the plaintiffs' allege only that the defendants "discriminated against plaintiffs and preferr[ed] the interests of other proprietorships without any good reason" (paragraph 47(E)). This is clearly defective. In *United Broth. of Carpenters & Joiners v. Scott, 463 U.S. 825, 103 S.Ct. 3352, 77 L.Ed.2d 1049 (1983)*, ***HN15***[] the Supreme Court explicitly foreclosed the possibility of a viable *section 1985(3)* claim where plaintiff alleges a conspiracy "motivated by economic or commercial animus." *Id., 463 U.S. at 839, 103 S.Ct. at 3361*. The Court found no support for the proposition that the provision (*section 1985(3)*) was intended to reach conspiracies motivated by bias towards others on account of their economic views, status, or economic activities." *Id., at 839, 103 S.Ct. at 3361*. Therefore, the Court concluded that "[e] conomic and commercial conflicts . . . are best dealt with by statutes, federal or state, specifically addressed **[*31]** to such problems, ..." Id.

Based on the above analysis, the plaintiffs' fourth cause of action, an alleged violation of *42 U.S.C. § 1985(3)* and the *Equal Protection Clause of the Fourteenth Amendment*, is hereby dismissed.

C. ANTI-TRUST VIOLATIONS

1. Violation of 15 U.S.C. §§ 1, 2 and the Sherman Trust Act §§ 1, 2.

In their fifth and sixth causes of action the plaintiffs allege violations of *15 U.S.C. § 1* and the Sherman Trust Act *§ 1*, and *15 U.S.C. § 2* and the Sherman Trust Act *§ 2* respectively. Specifically, the plaintiffs allege that they have a common interest in maintaining a free and unhampered market for the sale of self-service gasoline to the public, and the conduct of the trade and business of the plaintiffs in self-service gasoline wholly depends on plaintiffs' ability to install self-service gasoline pumps at plaintiffs' Scales establishment. Furthermore, the plaintiffs' allege that the acts of the defendants as members of the Village of Camden Zoning Board and of the government of the Village of Camden were undertaken as part of a conspiracy to fix and control the sale of self-service gasoline in interstate commerce, to restrain trade in interstate **[*32]** commerce for self-service gasoline and to preclude plaintiffs and other dealers marketing and distributing self-service gasoline from dealing in interstate commerce except on the terms control led by the defendants. In addition, the plaintiffs' allege that the defendants, in futherance of said conspiracy, attempted to forbid plaintiffs, by the illegal use of Village Zoning Regulations, from selling self-service gasoline and to control the market and sale of self-service gasoline to the benefit of other dealers in self-service gasoline and to the detriment of the public and plaintiffs. In addition, in their sixth cause of action, the plaintiffs' allege facts identical to those already mentioned, except they also allege that such acts were undertaken to monopolize, or attempt to monopolize the marketing and distribution of self-service gasoline among the various states and in interstate commerce.

In their answer and subsequently in their summary judgment motion, the defendants assert that plaintiff has failed to state a claim upon which relief can be granted, and regardless, defendants are immune from any liability under the "state action" exemption thereto first enunciated by the Supreme **[*33]** Court in *Parker v. Brown, 317 U.S. 341, 63 S.Ct. 307, 87 L.Ed. 315 (1943)*. We will first consider the "state action" exemption and then the Sherman Act claim itself.

While there is no doubt, in our society, of the important role played by the anti-trust laws, [3] the Supreme Court has found ***HN16***[] "nothing in the language of the Sherman Act or in its history which suggests that its purpose was to

---

[3] As the Supreme Court has said:

HN17[] Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise. They are as important to the preservation of economic freedom and our free enterprise-system as the *Bill of Rights* is to the protection of our fundamental personal freedoms. And the freedom guaranteed each and every business, no matter how small, is the freedom to compete-to assert with vigor, imagination, devotion and ingenuity whatever economic muscle it can muster.

restrain a state or its officers or agents from activities directed by its legislature." Parker v. Brown, supra, 317 U.S. at 350-351, 63 S.Ct. at 313-314. This deference to the states has come to be known as the "state action" exemption to the federal antitrust laws. Under this exemption doctrine, when a state directs, or acts in, some noncompetitive activity, the state and its officers are nonetheless exempt from the operation of the antitrust laws. See Capital Telephone Co. v. City of Schenectady, N.Y., 560 F.Supp. 207 (N.D.N.Y. 1983).

[*34] ***HN18***[] Unlike the several states, cities are not automatically within the Parker doctrine, i.e., exempt from the operation of the antitrust laws. Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S.Ct. 1123, 55 L.Ed.2d 364 (1978). To invoke the protection afforded by the Parker doctrine, a municipality must show that its anticompetitive conduct was taken "pursuant to state policy to displace competition with regulation or monopoly public service." Id. at 413, 98 S.Ct. at 1137. This state policy must be one that is "clearly articulated and affirmatively expressed." Id. at 410, 98 S.Ct. at 1135. An additional requirement that the state policy be "actively supervised" also has been imposed by the Supreme Court. The plaintiffs, however, question the application of this doctrine to municipalities and its officials in furtherance of a conspiracy with private individuals, which they argue is the case here.

Here, the action taken by the Village of Camden, through its council including the Zoning Board of Appeals, clearly was contemplated by New York's state legislature. ***HN19***[] The authority of a city to make an initial determination as to the issuance of a use variance upon an-application **[*35]** for such variance and to subsequently review such decision after an appeal is taken as to the denial of such variance has been expressly granted, (citations omitted) i.e., "affirmatively addressed". It is this courts' opinion, therefore, that this grant of authority, giving great deference to a city in determining whether to grant a use variance to an applicant based upon certain well-established standards, satisfies the requirement of a "clearly articulated and affirmatively expressed" state policy.

With respect to the additional requirement of "active supervision," whether this additional showing must be made by a municipality purporting to implement a state policy is still open to some doubt, since the Court has indicated that private parties and municipalities are not necessarily to be insulated from anti-trust laws under the same circumstances. Lafayette v. Louisiana Power & Light Co., 435 U.S. at 410, n.40, 98 S.Ct. at 1135, n.40. Assuming that such is required, it is unlikely that it exists in this case. It is the opinion of this court, however, that upon these facts and considering the broad grant of power given to a Village by the State in these matters under Article **[*36]** 7 of the CPLR, that such "active supervision" is not a necessary element to maintain a "state action" exemption. It is clear from a review of Article 7 that the State intended to give a Village very broad powers in such zoning matters in order to regulate land use (Village Law Article 7), and establish a Zoning Board of Appeals (Village Law § 7-712). And while the State takes no active supervisory role, they have created a means of review for such decisions under Article 78. It is, therefore, the decision of this court that the the "state action" exemption to the federal antitrust laws as extended to municipalities applies in this case and compels this court to grant summary judgment in favor of the defendants regarding causes of action five and six. Even if the Village of Camden was not entitled to the "state action" exemption, nor to summary judgment on those grounds, they would still be entitled to summary judgment based on a review of the Sherman Act claim on the merits.

HN20[] Section 1 of the Sherman Act prohibits every contract, combination, or conspiracy in restraint of trade. A section 1 plaintiff must establish both elements: first, that defendant entered into a contract, combination **[*37]** or conspiracy; and second, that such was in restraint of trade. Oreck Corp. v. Whirlpool Corp., 639 F.2d 78 (2d Cir.1980).

Although the Sherman Act speaks of restraint of trade in absolute terms, it has long been established that section 1 proscribes only unreasonable restraints. Standard Oil Co. v. United States, 221 U.S. 1, 31 S.Ct. 502, 55 L.Ed. 619 (1911); see also Medical Arts Pharmacy v. Blue Cross & Blue Shield, 518 F.Supp. 1100, 1105 (D.Conn.1981). Therefore, the "rule of reason" has evolved as the basic test for determining the legality of a business practice which purportedly operates to restrain trade. Under this rule, the court is required to analyze "the challenged

---

United States v. Topco Associates, Inc., 405 U.S. 596, 610, 92 S.Ct. 1126, 1135, 31 L.Ed.2d 515 (1972).

restraint's impact on competitive conditions." *National Society of Professional Engineers v. United States, 435 U.S. 679, 688, 98 S.Ct. 1355, 1363, 55 L.Ed.2d 637 (1978)*. In fact, certain business relationships are deemed unreasonable per se, due to their pernicious effect on competition and lack of any redeeming virtue." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 78 S.Ct. 514, 518, 2 L.Ed.2d 545 (1958)*. That, however, is not the case here.

Based upon a review of the **[*38]** available case law in conjunction with the facts of this case, it should become blatantly obvious that the plaintiffs' fifth and sixth causes of action are plainly frivilous. In fact, they have not even come close to alleging sufficient facts to maintain a cause of action under either Sherman Trust Act *§ 1* or *§ 2*. Therefore, regardless of whether the "state action" exemption applies, plaintiffs' fifth and sixth causes of action are hereby dismissed as a matter of law.

IT IS SO ORDERED.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN3[] **Sherman Act, Claims**

To establish a *§ 1* of the Sherman Act claim under the rule of reason approach, a plaintiff must establish: (1) that the defendants contracted, combined or conspired among each other; (2) that the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets; (3) that the objects of and conduct pursuant to that contract or conspiracy were illegal; and (4) that the plaintiff was injured as a proximate result of that conspiracy. These essential elements must be alleged in more than vague and conclusory terms to prevent the dismissal of the complaint on a defendant's *Fed. R. Civ. P. 12(b)(6)* motion.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN4[] **Regulated Practices, Market Definition**

In support of the allegation of adverse, anticompetitive effects, the antitrust plaintiff must allege and prove that the defendant enjoyed market power. Without market power, a firm cannot have an adverse effect on competition. Market power is inferred from the possession of a substantial portion of sales in a market carefully defined in terms of both product and geography. Unless an antitrust plaintiff alleges the existence of market power, the complaint may be dismissed for failure to state a claim upon which relief can be granted.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN5[] **Regulated Practices, Trade Practices & Unfair Competition**

The mere adverse effect on a firm's business is insufficient to establish an anticompetitive effect, absent proof that such adverse effect also impairs competition in the marketplace as a whole. Antitrust laws exist to protect competition, not individual competitors.

The Michigan Antitrust Reform Act, *Mich. Comp. Laws Ann. §§ 445.771-445.788* (1989), is construed in the same manner as the federal ***antitrust law***. Sections 445.772, 445.784(2).

Judges: [*1] Robert Holmes Bell, United States District Judge.

Opinion by: BELL

Opinion

OPINION OF THE COURT

Plaintiffs Health First Inc., a hospital services broker, and BCN, Great Lakes, a health maintenance organization, bring suit against defendants Bronson Methodist Hospital (hereinafter "Bronson") and James R. Ward alleging violations of *Section 1* of the Sherman Anti-Trust Act, *15 U.S.C. § 1*, (*Section 1*), the Michigan Antitrust Reform Act, *Mich. Comp. Laws Ann. §§ 445.771-445.788* (West 1989), and the Racketeer Influenced and Corrupt Organizations Act, *19 U.S.C. §§ 1961-68*.

Pending before the Court is defendants' motion to dismiss both the federal and state antitrust claims for failure to state a claim upon which relief can be granted. Subsequent to the filing of the motion, the plaintiffs filed an amended complaint as of right. Since the defendants assert that the amended complaint contains the same defects as the original complaint, the Court will address the merits of the motion to dismiss despite the filing of an amended complaint by the plaintiffs.

FACTS

In their amended complaint, the plaintiffs allege that the defendants agreed to make payments to physicians through Southwest Michigan Physician's **[*2]** Organization, P.C. (Southwest) if the physicians referred BCN subscribers to Bronson, a high-cost provider of hospital service, rather than Borgess Medical Center, (Borgess), a low-cost provider of hospital services, when patients needed hospitalization. In essence, the plaintiffs assert that the defendants, Southwest, and individual physicians conspired to "steer" patients from Borgess to Bronson.

In addition to this allegation, the amended complaint also asserts that the conduct of the defendants had an anticompetitive effect on the hospital services industry in Kalamazoo County, eastern Van Buren County and adjacent areas. It also alleges that defendant Bronson possesses sufficient market power in the relevant market to cause an anticompetitive effect. According to the plaintiffs, the alleged "steering" of patients from Borgess to Bronson had an adverse affect on competition because it tended to:

(1) increase health care costs;

(2) cause consumers to over-utilize hospital services;

(3) distort consumer demand for low-cost hospital services at Borgess in favor of high-cost-hospital services at Bronson;

(4) encourage doctors to refer consumers to Bronson for hospital services **[*3]** irrespective of the price of those services;

(5) affect the price of hospital services; and

(6) affect the financing of hospital services.

Complaint, para. 18. Finally, the plaintiffs allege that they were injured as a result of the "steering" since they either incurred excessive hospital costs or lost subscribers to their services. Id., para. 19.

ANALYSIS

1. SHERMAN ACT

HN1[] *Section 1* provides that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign states, is declared to be illegal." *15 U.S.C. § 1*. Courts have developed two methods of analysis to determine whether an agreement unreasonably restrains trade: the per se rule and the rule of reason.

After reviewing the allegations in plaintiffs' amended complaint, the court finds that they do not establish the existence of a per se violation of *Section 1*. Therefore, the Court will review the merits of the amended complaint under a rule of reason approach. The Court notes that ***HN2***[] antitrust claims, such as the one alleged by the plaintiffs, premised on some sort of business diversion, traditionally have been analyzed **[*4]** under a rule of reason approach. Dunn v. *Mavis, Inc. v. Nu-Car Driveaway, Inc., 691 F.2d 241, 245 (6th Cir. 1982)*. Even where the complaint alleges some form of illegal or criminal behavior on the part of the defendant, the rule of reason approach is still applied. E.g., *Seaboard Supply Co. v. Congoleum Corp., 770 F.2d 367 (3d Cir. 1985)*.

HN3[] To establish a *Section 1* claim under the rule of reason approach, plaintiffs must establish:

1. That the defendants contracted, combined or conspired among each other;

2. That the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets;

3. That the objects of and conduct pursuant to that contract or conspiracy were illegal; and

4. That the plaintiffs were injured as a proximate result of that conspiracy.

Davis-Watkins Co. v. Service Merchandise, 686 F.2d 1190, 1195-96 (6th Cir. 1982), cert. denied, *466 U.S. 931 (1984)*. These essential elements must be alleged in more than vague and conclusory terms to prevent the dismissal of the complaint on a defendants' *Rule 12(b)(6)* motion. *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. **[*5]** 1988)*.

The plaintiffs must plead and prove the existence of relevant product and geographic markets in order to establish a *Section 1* claim. *Service Merchandise, 686 F.2d at 1195*. Plaintiffs' amended complaint alleges that "the relevant geographic market is Kalamazoo and Eastern Van Buren counties and adjacent areas." Para. 10 Plaintiffs' Amended Complaint. This statement by the plaintiffs contains no factual allegations, such as the geographical area where most of the patients served by defendant Bronson or its competitors live, that would support the conclusion that the above-mentioned area is the relevant geographic market. This allegation is a mere conclusion and does not establish the clearly defined geographic market required by the rule of reason approach. *Manufacturers Supply Co. v. Minnesota Mining & Mfg. Co., 688 F.Supp. 303, 307 (W.D. Mich. 1988)*.

In order to establish a *Section 1* violation, plaintiff must allege that the activity of the defendant caused adverse, anticompetitive effects. ***HN4***[] In support of this allegation, the plaintiff must allege and prove that the defendant enjoyed market power. *Service Merchandise, 686 F.2d at 1202*. "Without market power, a firm **[*6]** cannot have an adverse effect on competition." Id. See also *Valley Liquors v. Renfield Importers, Ltd., 678 F.2d 742, 745* (7th cir. 1982). In most cases, market power is usually inferred from the possession of a substantial portion of sales in a market carefully defined in terms of both product and geography. *Valley Liquors, Inc. v. Renfield Importers, Inc., 822 F.2d 656, 666 (7th Cir. 1987)*; *Manufacturers Supply Co., 688 F.Supp. at 307*. Unless an antitrust plaintiff alleges the existence of market power, the complaint may be dismissed for failure to state a claim upon which relief can be granted. *Hand v. Central Transp., Inc., 779 F.2d 8, 11 (6th Cir. 1985)*.

The Court finds that plaintiffs' amended complaint does not establish the existence of market power on the part of the defendants. The plaintiffs merely allege that "defendant Bronson enjoys sufficient market power in the relevant market to injure competition in the relevant market through the conduct alleged below." Para. 11, Plaintiffs' Amended Complaint. However, the amended complaint contains no allegations that would establish the market share of Bronson or its competitors in the relevant geographical market. **[*7]** Furthermore, the plaintiffs have not alleged facts from which one could infer that Bronson has a substantial percentage of the hospital services market in a carefully defined market. Thus, this allegation on the part of the plaintiffs is a mere conclusion and is insufficient to withstand a motion to dismiss.

In addition to the above deficiencies, the defendants also maintain that plaintiffs' assertions regarding anticompetitive effect are insufficient to withstand a motion to dismiss. As stated previously by the Court, plaintiffs allege that the defendants' conduct harmed competition in the relevant product and geographic market because it tended to:

(1) increase health costs;

(2) cause consumers to over-utilize hospital services;

(3) distort consumer demand for low-cost hospital services at Borgess in favor of high-cost hospital services at Bronson;

(4) encourage doctors to refer consumers to Bronson for hospital services irrespective of the price of those services;

(5) affect the price of hospital services; and

(6) affect the financing of hospital services.

Para. 18, Plaintiffs' Amended Complaint. A defendant's conduct is adverse to competition if it has an adverse **[*8]** impact on the price, quality or quantity of the product available to consumers in the relevant geographic market. E.g., *Alex Hosiery Co. v. Leader, 310 U.S. 469 (1940)*; *Sitkin Smelting & Ref. Co. v. FMC Corp., 575 F.2d 440* (3d Cir.), cert. denied, *439 U.S. 866 (1978)*. The Court agrees with defendants that these allegations do not establish the existence of an anticompetitive effect for several reasons.

First, a number of the plaintiffs' assertions are so vague that they do not establish the existence of any effect or establish the existence of a pro-competitive effect. The fifth and sixth assertions of the plaintiffs which speak merely to an effect are insufficient to establish the existence of an adverse effect on the marketplace. Furthermore, the plaintiffs' second assertion regarding the increased utilization of hospital services seems to indicate that the alleged conduct of the defendants increased the demand for hospital services, a pro-competitive effect.

Second, the plaintiffs' third and fourth assertions regarding a shift in consumer preference from a low-cost provider to a high-cost provider of hospital services merely establish that the defendants' conduct **[*9]** adversely affected the plaintiffs' business. ***HN5***[] The mere adverse effect on a firm's business in insufficient to establish an anticompetitive effect, absent proof that such adverse effect also impairs competition in the marketplace as a whole.

Ace Beer Distrib. Inc. v. Kohn Inc., 318 F.2d 283, 287 (6th Cir.), cert. denied, *375 U.S. 922 (1963)*. Antitrust laws exist to protect competition, not individual competitors. *Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962)*. These allegations focus solely on the injury to the plaintiffs, not the market. Thus, they cannot establish that the defendants' conduct had an anticompetitive impact on the relevant market.

Finally, the only allegation made by the plaintiffs which addresses the issue of anticompetitive effect on the relevant market is the first one, which states that the defendants' conduct tended to increase health care costs. This allegation could establish that the defendants' conduct had an adverse effect. However, according to the plaintiffs, the relevant product market is hospital services, not health care costs. Para. 9, Plaintiffs' Amended Complaint. Since this allegation concerns a different product market, it **[*10]** cannot establish that the defendants' conduct had an adverse effect on competition.

Due to the failure of the plaintiffs to properly plead the existence of a relevant geographic market, market power on the part of the defendants, and that the defendants' conduct had an anticompetitive effect on the relevant market, the Court concludes that Count I of the amended complaint fails to state a claim upon which relief can be granted under the rule of reason approach. [1] Since the plaintiffs may be able to state a viable *Section 1* claim, the dismissal is without prejudice.

[*11] 2. MICHIGAN ANTITRUST CLAIM

The plaintiffs also allege that the defendants' conduct violated ***HN6***[] the Michigan Antitrust Reform Act. See *Mich. Comp. Laws Ann. §§ 445.771-445.788* (West 1989). Michigan's ***antitrust law*** is to be construed in the same manner as the federal ***antitrust law***. Id. §§ 445.772, 445.784(2). Thus, the Court dismisses Count II of the amended complaint, the state ***antitrust law*** claim, without prejudice.

An order consistent with this opinion shall issue forthwith.

ORDER OF THE COURT - August 20, 1990, Filed

In accordance with the Court's written opinion dated August 20, 1990,

IT IS HEREBY ORDERED that defendants' motion to dismiss is granted;

IT IS FURTHER ORDERED that Counts I and II of plaintiffs' First Amended Complaint are dismissed without prejudice.

IT IS SO ORDERED.

End of Document

[1] Plaintiffs' reliance upon *Michaels Building Co. v. Ameritrust Co., N.A., 848 F.2d 674 (6th Cir. 1988)* to support their argument that the amended complaint states a valid *Section 1* claim is misplaced. Michaels Building, unlike the present case, involved allegations that various lending institutions had entered into an agreement to fix the interest rates charged by them. *Id. at 681*. Such an agreement is clearly a form of horizontal price fixing, a per se violation of *Section 1*. Since a per se restraint is conclusively presumed to have an anticompetitive effect, the plaintiff does not have to make detailed allegations concerning relevant markets, market power and anticompetitive effect. See e.g., *Haveco of America, Ltd. v. Shell Oil Co., 626 F.2d 549, 555 (7th Cir. 1980)*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A so-called tying arrangement exists when a seller conditions the sale of one product or service, the tying product or service, on the buyer's purchase of another product or service, the tied product or service. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Tying Arrangements, Clayton Act**

A tying arrangement is per se unlawful under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, that is, it is proscribed without examining the actual market conditions, when the seller has such power in the tying product or service market that the existence of forcing is probable, and there is a substantial potential for impact on competition. A tying arrangement which is not per se unlawful may be invalidated under the rule of reason if the party challenging the tie demonstrates that it is an unreasonable restraint on competition in the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Tying Arrangements, Clayton Act**

In order for a tying arrangement to violate *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, the seller must exploit its market power over the tying product to force the buyer into purchasing a tied product that the buyer either did not want at all, or might have preferred to purchase from someone else. An implicit requirement to a finding that a tying arrangement violates *§ 1* is that the seller of the tying product must also profit from the sale of the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Tying Arrangements, Defenses**

The law draws a distinction between the exploitation of market power by merely enhancing the price of the tying product, on the one hand, and by attempting to impose restraints on competition in the market for a tied product, on the other. When the seller's power is just used to maximize its return in the tying product market, where presumably its product enjoys some justifiable advantage over its competitors, the competitive ideal of the Sherman Act is not necessarily compromised. But if that power is used to impair competition on the merits in another market, a potentially inferior product may be insulated from competitive pressures. This impairment can either harm existing competitors or create barriers to entry of new competitors in the market for the tied product, and can increase the social costs of market power by facilitating price discrimination, thereby increasing monopoly profits over what they would be absent the tie.

Healthcare Law > Business Administration & Organization > Covenants not to Compete > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

A plaintiff asserting the offense of monopolization must show that a defendant either unfairly attained or maintained monopoly power, which consists of the power to control prices or exclude competition. Attempted monopolization occurs when a competitor, with a dangerous probability of success, engages in anticompetitive practices the specific design of which are to build a monopoly or exclude or destroy competition.

Opinion by: RYAN

Opinion

[*139] RYAN, Circuit Judge.

This appeal from a district court's grant of summary judgment presents two issues:

> * Whether a tying arrangement, in violation of *section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*, occurs where the supplier of the alleged tying service receives no direct economic benefit from sales of the tied service; and
>
> * Whether *section 2* of the Sherman Antitrust Act, *15 U.S.C. § 2*, is violated where a hospital grants an exclusive contract for the provision **[**2]** of radiological services but does not compete in the market alleged to be monopolized, and supplies a legitimate explanation in support of its exclusive service contract.

We answer both questions in the negative and affirm the district court's summary judgment dismissing the plaintiff's claim.

I.

James B. Beard, D.O., is an osteopathic physician specializing in radiology who began working for G.S. Bucholz, Inc. on October 1, 1984. Bucholz is the exclusive provider of radiological services to Parkview Hospital, the only osteopathic hospital in Lucas County, Ohio, and serves patients from northwestern Ohio and lower southeastern Michigan. Eight allopathic hospitals also operate in Lucas County.

On June 25, 1985, Dr. Beard resigned from Bucholz, with the intention of providing radiological services himself to patients at Parkview. However, Parkview's chief operating officer, Dr. B. A. Zeiher, told Dr. Beard that Parkview had an exclusive contract with Bucholz for the provision of radiological services and that Dr. Beard would no longer be permitted to work in Parkview's radiology department. He remained a member of the hospital's staff, however.

Dr. Beard filed a complaint **[**3]** in the United States District Court for the Northern District of Ohio, Western Division, naming Parkview, Dr. Zeiher, and Bucholz, defendants. He claimed the contract between Parkview and

Bucholz was a tying arrangement violating *section 1* of the Sherman Act, *15 U.S.C. § 1*, and that the contract furthered "a monopoly or attempt to monopolize a part of the trade and commerce **[*140]** among the several states," in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*.

Parkview and Bucholz answered that their contract is consistent with a common practice among hospitals trying to remain competitive in the health care field. By contracting with a specific radiologist, hospitals ensure responsibility and accountability for their radiology departments and guarantee the availability of services when needed.

By the terms of the agreement between Bucholz and Parkview, Bucholz bills patients directly for all services it provides, and Parkview does not share in the fees Bucholz charges.

The district court granted Parkview and Bucholz's motions for summary judgment, pursuant to *Fed. R. Civ. P. 56*. It dismissed Dr. Beard's *section 1* claim **[**4]** because Parkview, the alleged tying service seller, received no direct economic benefit from the sale of the allegedly tied radiological services. It dismissed Dr. Beard's *section 2* claim against Parkview because Parkview was not a competitor in the radiological services market, and dismissed the *section 2* claim against Bucholz because Dr. Beard failed to rebut the legitimate reasons advanced by defendants for maintaining the exclusive agreement.

II.

HN1[] A motion for summary judgment in an antitrust case requires the plaintiff to show that there is "a genuine issue of material fact as to whether [the defendants] entered into an illegal conspiracy that caused [the plaintiff] to suffer a cognizable injury." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 585-86, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citations omitted). Dr. Beard's obligation to avoid summary judgment was to present "specific facts showing that there is a genuine issue for trial," *Fed. R. Civ. P. 56(e)*, as to whether Parkview and Bucholz engaged in an illegal tying arrangement or **[**5]** attempted to monopolize a segment of the radiological services market. The district court then had to determine whether Parkview, Dr. Zeiher, and Bucholz were "entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. ***HN2***[] We must now review the district court's legal determination on that question *de novo*.

A. The Tying Arrangement

HN3[] A so-called tying arrangement exists when a seller conditions the sale of one product or service, the tying product or service, on the buyer's purchase of another product or service, the tied product or service. *See Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5-6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*.

> The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms.

Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 12, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984). **[**6]**

HN4[] A tying arrangement is *per se* unlawful under *section 1* of the Sherman Act; that is, it is proscribed without examining the actual market conditions, when the seller has such power in the tying product or service market that "the existence of forcing is probable," *id. at 15*, and there is "a substantial potential for impact on competition." *Id. at 16*. A tying arrangement which is not *per se* unlawful may be invalidated under the "rule of reason" if the party challenging the tie demonstrates that it is "an unreasonable restraint on competition in the relevant market." *Id. at 18*.

As previously noted, the alleged tying arrangement challenged in this case arises from the exclusive contract Parkview entered into with Bucholz for the provision of radiological services. Consequently, under the *Jefferson Parish* analysis, we must decide whether Parkview's contract with Bucholz is illegal as forcing surgical patients at

Parkview to obtain radiological **[*141]** services from Bucholz which they might wish to obtain from another provider **[**7]** or as unreasonably restraining competition among radiologists in the Parkview area. We first examine, however, the precise reason for the district court's dismissal of Dr. Beard's *section 1* claim.

In its decision granting Parkview's motion for summary judgment, the district court said:

> ***HN5***[] In order for a tying arrangement to violate *§ 1* of the Sherman Act, the seller must exploit its market power over the tying product to force the buyer into purchasing a tied product that the buyer either did not want at all, or might have preferred to purchase from someone else. An implicit requirement to a finding that a tying arrangement violates *§ 1* is that the seller of the tying product must also profit from the sale of the tied product.

The district court went on to say that, "in all of the cases addressing this question which the Court is aware of, the courts require that the seller of the tying product must have benefited *directly* from the sale of the tied product." And, "in this case, it is clear from the evidence before the Court that none of the monies paid to Bucholz, Inc. **[**8]** reached Parkview's hands. Therefore, the Court finds defendants' motions for summary judgment as to plaintiff's *§ 1* claim well taken."

The district court's reliance on the "direct economic benefit" rule was well-grounded in ***antitrust law***.

Prior to *Jefferson Parish*, courts ordinarily tested a challenged tying arrangement for *section 1* validity by determining whether the provider of the tying product or service derived any direct economic benefit from the arrangement. An absence of direct economic benefit was taken as a determinative indicator that the provider of the tying product or service had no anti-competitive impact upon the market for the tied product or service. *See, e.g., Venzie Corp. v. United States Mineral Products Co., Inc., 521 F.2d 1309, 1317 (3d Cir. 1975)*; *Miller Motors, Inc. v. Ford Motor Co., 252 F.2d 441, 446-47 (4th Cir. 1958)*; *Keener v. Sizzler Family Steak Houses, 597 F.2d 453, 456 (5th Cir. 1979)*; *Crawford Transp. Co. v. Chrysler Corp., 338 F.2d 934, 939 (6th Cir. 1964)*, *cert. denied*, *380 U.S. 954, 85 S. Ct. 1088, 13 L. Ed. 2d 971 (1965)*; *Roberts v. Elaine Powers Figure Salons, Inc., 708 F.2d 1476, 1478-81 (9th Cir. 1983)*. **[**9]** These courts dismissed *section 1* Sherman Act claims where the seller, accused of providing an alleged tying product or service, did not derive any direct economic benefit from the sale of the product said to be tied.

Notable among these decisions is *Crawford Transp. Co.* in which this court held that Chrysler Corporation "was guilty of no tying arrangement in violation of *Section 1* of the Sherman Act" when it required its dealers to purchase new car delivery services from the company with which Chrysler had an exclusive contract along with new cars the dealers bought. *338 F.2d at 939*. This court said:

> Chrysler owned no transportation companies and had no financial interest in any of the transportation carriers to which it tendered traffic for its 1958 and subsequent models. It did not seek to invade and dominate the automobile transportation carriers' business. True, Chrysler benefited financially to the extent that it saved millions of dollars in the cost of transportation but it received no direct profits from the transportation carriers.

Id. The district court cited *Crawford Transp. Co.*, for its reliance upon the "direct economic benefit" **[**10]** rule.

On appeal, Dr. Beard concedes that the district court correctly found that Parkview derives no direct economic benefit from the radiological services provided by Bucholz. He also concedes that if *Crawford* is a correct statement of the law, his *section 1* claim fails. He contends, however, that in *Jefferson Parish* the Supreme Court overruled *sub silentio* those cases, including *Crawford Transp. Co.*, holding that the supplier of a tying product or service who receives no direct economic benefit from the sale of the tied product or service is not guilty of an illegal tying arrangement under *section 1* of the Sherman Act.

[*142] After a careful examination of *Jefferson Parish*, and a number of cases applying it, as well as the recent decision of *Gonzalez v. St. Margaret's Housing Div. Fund, 880 F.2d 1514 (2d Cir. 1989)*, which Dr. Beard cites in support of his argument, we are unpersuaded that the "direct economic benefit" requirement of *Crawford Transp. Co.* has been displaced or is otherwise inapplicable to this case.

In *Jefferson Parish*, the Supreme Court held that a contract between a hospital and a firm of anesthesiologists **[**11]** was not a *per se* violation of *section 1* of the Sherman Act merely because the agreement required patients to buy all the anethesiological services they needed from the firm. *466 U.S. at 28-29, 104 S. Ct. 1551, 80 L. Ed. 2d 2*. The Court also held that the claimant in that case failed to make a showing of adverse competitive effect resulting from the agreement sufficient to demonstrate rule of reason invalidity. *Id. at 30-31*.

To be sure, the Court in *Jefferson Parish* did not state that the seller of a tying product or service must secure a direct economic benefit from sales of a tied product or service in order to violate *section 1* of the Sherman Act. The Court's analysis turned on whether the seller of the alleged tying and tied services, namely Jefferson Parish Hospital District No. 2, used its market power "to force patients to buy [anesthesiological] services they would not otherwise purchase," *id. at 26*, and whether the effect of the exclusive contract for anesthesiological services was to unreasonably restrain competition among anesthesiologists in the hospital's market. *Id. at 29*. But, the Court's **[**12]** silence in *Jefferson Parish* on the "direct economic benefit" issue ought not be interpreted as overruling the considerable body of pre-Jefferson Parish precedent relying on the "direct economic benefit" requirement as a means of determining whether a challenged contract or agreement is an illegal tying arrangement.

The Court in *Jefferson Parish* was not required to address the "direct economic benefit" issue because there was no dispute that the hospital in that case received a direct economic benefit from each sale of anesthesiological services. The Court noted that while "the fees for anesthesiological services are billed separately . . . they are divided equally between [the anesthesiology firm] and the hospital." *Id. at 6 n. 4*.

Moreover, the "direct economic benefit" requirement is consistent with the Court's explanation of what an illegal tying arrangement is in *Jefferson Parish*:

> ***HN6***[] The law draws a distinction between the exploitation of market power by merely enhancing the price of the tying product, on the one hand, and by attempting to impose **[**13]** restraints on competition in the market for a tied product, on the other. When the seller's power is just used to maximize its return in the tying product market, where presumably its product enjoys some justifiable advantage over its competitors, the competitive ideal of the Sherman Act is not necessarily compromised. But if that power is used to impair competition on the merits in another market, a potentially inferior product may be insulated from competitive pressures. This impairment could either harm existing competitors or create barriers to entry of new competitors in the market for the tied product, and can increase the social costs of market power by facilitating price discrimination, thereby increasing monopoly profits over what they would be absent the tie.

Id. at 14-15 (citations and footnotes omitted). ***HN7***[] A seller who derives no direct economic benefit from sales of an alleged tied product or service is not attempting to invade the alleged tied product or service market in a manner proscribed by *section 1* of the Sherman Act.

Furthermore, our conclusion **[**14]** that the pre-Jefferson *Parish* cases recognizing the "direct economic benefit" requirement in illegal tying cases were not overruled by *Jefferson Parish* is supported by numerous post-Jefferson *Parish* decisions holding that the absence of a direct economic benefit to the seller from sales of an alleged tied product or service precludes a determination **[*143]** that the alleged illegal tying arrangement violates the Sherman Act under either the *per se* or rule of reason analysis. *See, e.g., White v. Rockingham Radiologists, Ltd., 820 F.2d 98, 104 (4th Cir. 1987)*; *Directory Sales Management v. Ohio Bell Tel. Co., 833 F.2d 606, 610 (6th Cir. 1987)*; *Sandburg Village Condominium Ass'n v. First Condominium Development Co., 758 F.2d 203, 209* and 210 (7th Cir. 1985); *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 712 (11th Cir. 1984)*. Notable among those cases is this court's decision in *Directory Sales*, in which we affirmed a district court's entry of summary judgment in a case alleging a illegal tying arrangement, stating, "if Ohio Bell does not receive a financial benefit from the **[**15]** tied product, case law indicates that a tying arrangement does not exist." *833 F.2d at 610* (citations omitted).

In support of his argument to the contrary, Dr. Beard cites the Second Circuit *Gonzalez* case. *880 F.2d 1514*.

In *Gonzalez*, the court of appeals remanded the appeal of a number of tenants of a non-profit housing facility who sued the facility under *section 1* of the Sherman Act. *Id. at 1520*. The tenants alleged that the facility was engaged in an illegal tying arrangement by its requiring that they purchase at least one meal, supplied by a third party, every day they stayed at the facility. *Id. at 1515-16*. The Second Circuit remanded the case so that the district court could determine whether the alleged tying arrangement impacted interstate commerce and, thus, whether the Sherman Act applied. *Id. at 1519*. But, because the district court had formerly dismissed the *Gonzalez* tenants' claim on the ground that the housing facility had no economic interest in the sale of the meals, *id. at 1515*, the court of appeals addressed the "direct economic benefit" issue. **[**16]** *Id. at 1517*. The court said, "We do not feel justified, in this situation, to choose to add a sixth requirement of 'economic interest' to our [five-part] test for proving an illegal tying claim." *Id.* [1] The court reasoned:

> The majority in *Jefferson Parish* focused primarily on the anticompetitive effect of tying arrangements and the resultant harm to consumer choice in the tied-product market. In protecting those interests, the majority in *Jefferson Parish* appeared to require a plaintiff to prove only that the tie impairs competition in the tied market and forecloses a substantial volume of commerce in that market. The majority in *Jefferson Parish* does not require any "economic interest" by the tying seller in the tied-product market.

Id. (citations omitted). The court then went on to suggest that, even if it were to adopt the "economic interest" test, it believed the housing facility received some economic benefit, albeit no profit, from the meal sales. *Id.*

[17]** While it is arguable that *Gonzalez* can be distinguished from this case as declining only in dicta to adopt the "direct economic benefit" requirement, we shall assume instead that *Gonzalez* is directly contrary to our holding in *Crawford Transp. Co.* and the line of cases previously cited that require a provider of the alleged tying product or service to derive a direct economic benefit from sales of the alleged tied product or service in order for an illegal tying arrangement to be found. We believe the rule of *Crawford Transp. Co.* to be the better reasoned rule; one consistent with the fundamental antitrust policy opposing the use of market power in one part of the economy to acquire power in another part and one to which we are bound as the rule of this circuit. [2]

[18]** **[*144]** For the foregoing reasons, we hold, as a matter of law, that because Parkview received no direct economic benefit from the radiological services provided to its patients by Bucholz, it engaged in no unlawful tying arrangement, under either the *per se* or the rule of reason approaches, by entering into an exclusive contract for radiological services with Bucholz. The district court did not err in dismissing Dr. Beard's *section 1* claim on this basis.

B. Monopoly

---

[1] The Second Circuit's five elements for finding an illegal tying arrangement are:

> First, a tying and a tied product; second, evidence of actual coercion by the seller that forced the buyer to accept the tied product; third, sufficient economic power in the tying product market to coerce purchaser acceptance of the tied product; fourth, anticompetitive effects in the tied market; and fifth, the involvement of a "not insubstantial" amount of interstate commerce in the "tied" market.

Gonzalez, 880 F.2d at 1516-17 (citing *Yentsch v. Texaco, Inc., 630 F.2d 46, 56-57 (2d Cir. 1980))*.

[2] We can only note as a curiosity the *Gonzalez* court's unwillingness to "add" a sixth, "economic interest" requirement to its list of five elements for an illegal tying arrangement on the ground that the Supreme Court in *Jefferson* focused only on "the anticompetitive effect of tying arrangements and the resultant harm to consumer choice in the tied product market." It would appear that the five elements for evaluating an alleged illegal tying arrangement were not intended by the court in *Yentsch*, upon which the *Gonzalez* court relied, to comprise an exhaustive list. The *Yentsch* court recognized "considerable logic for using [the 'direct economic benefit'] criterion" even though it did not have occasion to adopt the requirement in that case. *630 F.2d at 57 n. 15*.

Dr. Beard also claims that the Parkview/Bucholz exclusive services contract violated section 2 of the Sherman Act. He claims that by their agreement, Parkview, and its chief operating officer Dr. Zeiher, and Bucholz were monopolizing or attempting to monopolize the osteopathic radiological services market for northwestern Ohio and southeastern Michigan.

HN8[] An unlawful monopoly consists of:

> (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, **[**19]** or historic accident.

United States v. Grinnell, 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). HN9[] A plaintiff asserting the offense of monopolization must show, "that a defendant either unfairly attained or maintained monopoly power . . . [which] consists of 'the power to control prices or exclude competition.'" Smith v. Northern Michigan Hospitals, Inc., 703 F.2d 942, 954 (6th Cir. 1983) (citations omitted). Attempted monopolization "occurs when a competitor, with a 'dangerous probability of success,' engages in anticompetitive practices the specific design of which are, to build a monopoly or exclude or destroy competition." *Id.* (citations omitted).

1. Parkview and Dr. Zeiher

In *Smith v. Northern Michigan Hospitals*, a group of independent doctors on staff at Northern Michigan Hospitals, Inc. ("NMH"), which resulted from the merger of two Petoskey, Michigan hospitals, alleged that NMH's exclusive contract with Burns Clinic Medical Center, P.C. for the provision of emergency room care was part of "a conspiracy designed **[**20]** to monopolize acute care medicine in the Petoskey market in violation of section 2 [of the Sherman Act]." Id. at 946. This court affirmed the summary dismissal of a section 2 action against NMH because, "it is beyond question that NMH does not compete in any fashion with the appellants." Id. at 955. That is, NMH neither enjoyed nor attempted to enjoy monopoly power in the acute care medicine market in Petoskey.

In the same way, Parkview does not compete with Dr. Beard or Bucholz as a provider of osteopathic radiological services in northwestern Ohio and southeastern Michigan. We do not decide whether "osteopathic radiology" is a unique service for antitrust purposes. But, even assuming, *arguendo*, that it is, Parkview and Dr. Zeiher are entitled to judgment as a matter of law because they neither enjoyed nor were attempting to enjoy monopoly power in the Ohio and Michigan radiological services market.

2. Bucholz

In *Smith v. Northern Michigan Hospitals*, this court refused to dismiss the independent physicians' monopoly claim against Burns Clinic because "there is . . . no evidence provided by the present record to contradict the appellants' **[**21]** allegations that competition exists between appellants and the Burns Clinic for referral patients from the NMH emergency room." 703 F.2d at 955. **[*145]** After the case was remanded for further proceedings as to Burns Clinic, the district court dismissed the remaining portion of the complaint against Burns Clinic by granting its motion for summary judgment. This court affirmed the dismissal because, among other reasons, "the plaintiffs submitted no evidence from which the court could infer the defendant's general intent to monopolize. Nor did the plaintiffs submit evidence to rebut the defendant's explanations for the small number of post-merger referrals received by the plaintiffs." Smith v. Burns Clinic Medical Center, 779 F.2d 1173, 1176 (6th Cir. 1985). Thus, the case was dismissed because the doctors did not, as they were required, "rebut the defendant's legitimate explanations for the alleged anticompetitive conduct with 'significant probative evidence tending to support the complaint.'" Id. at 1176 (quoting First Nat'l Bank of Arizona v. Cities Serv. Co., 391 U.S. 253, 290, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)). **[**22]**

Likewise, in this case, Dr. Beard has failed to rebut Bucholz's legitimate explanation for its "anticompetitive" exclusive agreement with Parkview. Parkview and Bucholz explained that their contract is necessary to enhance the quality of care its patients receive as well as improve the efficiency of the hospital. Through use of the exclusive contract, Parkview is able to monitor the radiologists to whom it grants staff privileges, negotiating on behalf of its patients the best available radiological care upon the expiration of each contract's term.

Dr. Beard has provided no "significant probative evidence" to rebut Bucholz's legitimate explanation for its agreement with Parkview. Dr. Beard questions only whether the contract was formally executed as of 1984, when he joined Bucholz, or whether it was signed in response to his filing this lawsuit in 1985. Assuming it was the latter, as Dr. Beard claims, the legitimate explanation Parkview and Bucholz provide for the contract remains unrebutted. The district court properly granted summary judgment in favor of Bucholz on the *section 2* claim because Dr. Beard "failed to submit probative evidence which would 'require a judge or jury **[**23]** to resolve the parties' differing versions of the truth at trial.'" *Id.* (citations omitted).

III.

For the foregoing reasons, the judgment of the district court dismissing the plaintiff's *sections 1* and *2* Sherman Act claims is AFFIRMED.

Patent Law > ... > Defenses > Patent Invalidity > General Overview

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN1[] **Burdens of Proof, Clear & Convincing Proof**

A patent is presumed valid as to each claim under *35 U.S.C.S. § 282*. The presumption of validity is not absolute but can be rebutted. The burden of proof is on the party challenging validity to prove the facts establishing invalidity by clear and convincing evidence. The presumption is affected by several factors. For instance, if the most pertinent prior art was before the Patent and Trademark Office Examiner, the presumption is bolstered. However, if there is evidence of more pertinent prior art which was not presented to the examiner, such evidence would weigh heavily in overcoming the presumption.

Patent Law > Anticipation & Novelty > Fact & Law Issues

Patent Law > Anticipation & Novelty > General Overview

HN2[] **Anticipation & Novelty, Fact & Law Issues**

Under *35 U.S.C.S. § 102*, anticipation requires that each and every element of the claimed invention be disclosed in a prior art reference. In addition, the prior art reference must be enabling, thus placing the allegedly disclosed matter in the possession of the public. A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference. Anticipation is a factual determination.

Patent Law > ... > Specifications > Enablement Requirement > General Overview

Patent Law > Nonobviousness > Elements & Tests > Ordinary Skill Standard

Patent Law > Nonobviousness > Elements & Tests > Prior Art

HN3[] **Elements & Tests, Claimed Invention as a Whole**

A patent may not be obtained if the differences in the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patent Law > Nonobviousness > Evidence > Fact & Law Issues

Patent Law > Nonobviousness > Elements & Tests > General Overview

Patent Law > ... > Specifications > Enablement Requirement > General Overview

Patent Law > Nonobviousness > Elements & Tests > Claimed Invention as a Whole

Patent Law > Nonobviousness > Elements & Tests > Ordinary Skill Standard

Patent Law > Nonobviousness > Elements & Tests > Prior Art

Patent Law > ... > Elements & Tests > Graham Test > Secondary Considerations

Patent Law > Nonobviousness > Evidence > General Overview

Patent Law > Nonobviousness > Evidence > Inferences & Presumptions

HN4[] **Evidence, Fact & Law Issues**

To be obvious, the claimed invention as a whole must have been obvious to one of ordinary skill in the art at the time of the invention. Obviousness is a question of law based on factual inquiries into: (1) the scope and content of the prior art, (2) the level of ordinary skill in the art, (3) differences between the claimed invention and the prior art, and (4) objective evidence of nonobviousness such as long-felt need, unexpected results, failure of others, commercial success, and copying. The court must look at the invention at the time it was made from the perspective of the hypothetical person and in light of the prior art to determine if the patent would have been obvious to such person.

Patent Law > ... > Specifications > Enablement Requirement > General Overview

HN5[] **Nonobviousness, Elements & Tests**

The factors a court considers in determining the level of ordinary skill in the art are (1) the educational level of the inventor, (2) the type of problems encountered in the art, (3) prior art solutions to these problems, (4) the rapidity with which inventions were made, (5) the sophistication of the technology, and (6) the educational level of active workers in the field.

Patent Law > Nonobviousness > Elements & Tests > General Overview

HN6[] **Nonobviousness, Elements & Tests**

A court may look to several secondary considerations in its determination of obviousness such as long felt but unsolved need, failed attempts by others, initial skepticism, subsequent praise, commercial success, and copying by others.

Patent Law > ... > Specifications > Definiteness > General Overview

HN7[] **Specifications, Definiteness**

Inventions are required to be sufficiently described in a patent such that one skilled in the art could practice the invention.

Patent Law > ... > Specifications > Description Requirement > General Overview

Patent Law > ... > Specifications > Definiteness > General Overview

HN8[] **Specifications, Description Requirement**

See *35 U.S.C.S. § 112*.

Patent Law > US Patent & Trademark Office Proceedings > Examinations > Amendments & New Matter

Patent Law > US Patent & Trademark Office Proceedings > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Reissue Proceedings > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Filing Requirements > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Reissue Proceedings > Requirements

Patent Law > US Patent & Trademark Office Proceedings > Filing Requirements > Drawings

HN9[] **Examinations, Amendments & New Matter**

Whenever any patent is, through error without any deceptive intention, deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less than he had a right to claim in the patent, the Commissioner shall, on the surrender of such patent and the payment of the fee required by law, reissue the patent for the invention disclosed in the original patent, and in accordance with a new and amended application, for the unexpired part of the term of the original patent. No new matter shall be introduced into the application for reissue.

Patent Law > US Patent & Trademark Office Proceedings > Filing Requirements > Drawings

Patent Law > US Patent & Trademark Office Proceedings > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Reissue Proceedings > General Overview

Patent Law > US Patent & Trademark Office Proceedings > Reissue Proceedings > Requirements

Patent Law > US Patent & Trademark Office Proceedings > Filing Requirements > Oaths

HN10[] **Filing Requirements, Drawings**

There are two distinct statutory requirements that a reissue oath or declaration must satisfy. First, it must state that the patent is defective or partly inoperative or invalid because of defects in the specification or drawing, or because the patentee has claimed more or less than he is entitled to. Second, the applicant must allege that the defective, inoperative, or invalid patent arose through error without deceptive intent.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Effect of Inequitable Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Evidence > Burdens of Proof > Clear & Convincing Proof

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > ... > Inequitable Conduct > Effect, Materiality & Scienter > General Overview

HN11[] **Inequitable Conduct, Effect of Inequitable Conduct**

To establish inequitable conduct before the United States Patent and Trademark Office, and thus render a patent unenforceable, the defendant must establish by clear and convincing evidence (1) a material misrepresentation or omission of information, and (2) a threshold level of intent on the part of the applicant. A determination as to each element must be made separately. The standard for materiality is whether a reasonable patent examiner would consider the omitted material pertinent in making a decision on whether to issue a patent.

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN12[] **Inequitable Conduct, Burdens of Proof**

The following three-step test for analyzing patent misuse in a tying context is appropriate. First, determine whether there are two things tied, i.e., whether there are separable or inseparable items; if so, determine whether the thing which is assertedly tied to the patented item is a staple or non-staple item in commerce; if it is a staple, determine whether in fact they are tied.

Patent Law > Infringement Actions > Infringing Acts > General Overview

HN13[] **Infringement Actions, Infringing Acts**

A product is a nonstaple if it constitutes a material part of the invention, not a staple article or commodity of commerce suitable for substantial noninfringing use. *35 U.S.C.S. § 271(c)*.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN14[] **Antitrust & Trade Law, Sherman Act**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act, *15 U.S.C.S. § 1 et seq.*, is violated.

Opinion

[1366]** MEMORANDUM OPINION AND ORDER

INTRODUCTION

This action came on for trial before the Court, the Honorable Eldon B. Mahon, United States District Judge, presiding. This opinion shall constitute the Court's findings of fact and conclusions of law.

A. Jurisdiction

The Court has jurisdiction over this action under *28 U.S.C. § 1338(a)*, and venue is proper under *28 U.S.C. § 1400(b)*.

B. The Parties

The plaintiff, Alcon Laboratories, Inc., is incorporated under the laws of Delaware and has its principal place of business in Fort Worth, Texas. Defendant, Allergan, Inc., is also incorporated under the laws of Delaware and has its principal place of business in Irvine, California.

C. The Claims

This action involves the validity and enforceability of United States Patent No. Re. 32,672 (hereinafter "the '672 patent") entitled "Method for Simultaneously Cleaning and Disinfecting Contact Lenses Using a Mixture of Peroxide and Proteolytic Enzyme." The '672 patent was issued on May 24, 1988 to the defendant, Allergan, Inc., as assignee of the inventors of the patent. [1] Accordingly, Allergan is the owner of the '672 patent. The '672 patent **[*2]** is a reissue patent based on U.S. Patent No. 4,670,178 issued on June 2, 1987 (hereinafter "the '178 patent").

This action was originally filed on June 3, 1988 by Alcon for declaratory judgment, urging the Court to declare that the patent was invalid, unenforceable and not infringed. Alcon also sought damages for violations of the Antitrust laws, *15 U.S.C. §§ 1*, *2*, and *15*; violation of *Texas Business & Commerce Code, § 15.05*; and requested treble damages, exemplary damages, attorneys' fees, and an accounting to determine damages. Allergan had filed a suit the preceding day in the United States District Court for the District of Delaware. [2] The Delaware suit was subsequently transferred to this Court and consolidated with the instant action. Allergan's action was for patent infringement, alleging that Alcon had directly infringed and induced others to infringe upon claims 1, 2, 3, 6, 10, 13, and 14 of the '672 patent in violation of *35 U.S.C. §§ **[*3]** 271(a)* and *(b)*. [3]

---

[1] The inventors are Stanley W. Huth, Sam W. Lam, and Richard M. Kiral.

[2] Allergan, Inc. v. Alcon Laboratories, Inc., CA 4-88-279.

[3] The claims of the patent are as follows:

Claim 1. A method for the simultaneous cleaning and disinfecting of contact lenses which method comprises contacting the lenses with a solution comprised of a disinfecting amount of peroxide and an effective amount of peroxide-active proteolytic enzyme for a time sufficient to remove substantially all protein accretions and to disinfect the lenses.

Claim 2. The method of claim 1 wherein the solution is prepared by combining the enzyme and peroxide at the time the lenses are contacted with the solution.

Claim 3. The method of claim 2 wherein the enzyme is in a powder or tablet form and is dissolved in the peroxide solution.

Claim 4. The method of claim 1 wherein the solution is prepared by dissolving a dry peroxide and dry enzyme in an aqueous solution.

Claim 5. The method of claim 4 wherein both components are combined in powder or tablet form.

Claim 6. The method of claim 2 wherein the enzyme is present in an amount between 0.001 and 5 Anson units, and the peroxide is hydrogen peroxide and is present in an amount between 0.02 and 10% by weight/volume.

Claim 7. A method, according to claim 6, where the proteolytic enzyme is subtilisin.

Claim 8. The method of claim 7 wherein the peroxide is hydrogen peroxide, sodium perborate, potassiumpersulfate, sodium percarbonate, diperisophthalic acid, peroxydiphosphate salts or sodium aluminum aminohydroperoxide.

Claim 9. The method of claim 8 where the [aqueous composition] solution comprises 3% hydrogen peroxide and 0.30% subtilisin A by weight/volume.

Claim 10. The method of claim 1 wherein said contact lenses have a hydrophilic surface.

[1367]** **[*4]** Prior to trial, the parties entered into a stipulation concerning the infringement and damage claims which are no longer issues in this suit. [4]

BACKGROUND

The patent in suit is a method patent involving the simultaneous cleansing and disinfecting of daily wear soft, or hydrophilic, contact lenses by combining a mixture of peroxide and a proteolytic enzyme. The peroxide is **[*5]** the disinfecting ingredient and the enzyme is the protein cleansing ingredient. Allergan has received FDA approval [5] for labeling of its enzymatic cleaning product, Ultrazyme. [6] Ultrazyme itself is not a patented product. However, the labeling on the Ultrazyme packaging allows the purchaser to practice the patent in suit. Ultrazyme is a tablet. The tablet is dissolved in hydrogen peroxide, and the lens is then soaked in the solution for a period of time for simultaneous cleaning and disinfecting.

[*6] A background of the purpose and function of the patented process is helpful for a clear understanding of the patent. Wearers of soft contact lenses perform a maintenance regimen in caring for their lenses. Soft contact lenses require both daily disinfection and weekly cleaning of protein accretions which form deposits on the lenses. Failure to comply with the care regimen is considered a significant problem in the industry. Noncompliance could result in severe consequences from irritation and discomfort to disease, infection, and even eye loss. Patient compliance is therefore a goal of practitioners and of manufacturers of lens care products. The consensus in the industry is that the simpler the lens care regimen, the greater the patient compliance.

Daily care requires (1) cleansing with a surfactant-based cleaner to remove foreign materials and (2) disinfection. In addition, contact wearers must clean protein deposits from the lenses weekly. Allergan discovered a method for removing protein deposits on the lenses with a proteolytic enzyme. This discovery was claimed in United States Patent No. 3,910,296 **[*7]** (hereinafter "the Karageozian patent") issued on October 7, 1975, and entitled "Method of Removing Proteinaceous Deposits from Contact Lenses." Alcon has entered into a licensing agreement with Allergan under its Karageozian patent. Alcon sells a proteolytic enzyme containing contact lens cleaning product, Opti-Zyme. Alcon has received FDA approval of the use of Opti-Zyme in hydrogen peroxide. Alcon concedes that, if

---

Claim 11. The method of claim 10 wherein said peroxide-active proteolytic enzyme is a sutilisin enzyme.

Claim 12. The method of claim 11 wherein said subtilisin enzyme is subtilisin A.

Claim 13. The method of claim 10 wherein said peroxide is hydrogen peroxide in an amount between 0.02 and 10% by weight/volume.

Claim 14. The method of claim 13 wherein said hydrogen peroxide is present in an amount of about 3% by weight/volume.

Claim 15. The method of claim 10 wherein said peroxide-active proteolytic enzyme is subtilisin A and said peroxide is hydrogen peroxide.

[4] Alcon has a product -- Opti-Zyme -- which is similar to Allergan's Ultrazyme product. The Opti-Zyme tablet contains a proteolytic enzyme which is the active protein removing ingredient. The combination of Opti-Zyme with hydrogen peroxide would also facilitate a one-step solution for simultaneous cleaning and disinfecting contact lenses. Alcon has conceded that if FDA approval is received for promoting the use of Opti-Zyme with hydrogen peroxide, that such acts will constitute inducement of infringement of claims 1, 2, 3, 6, 10, 13, and 14 of the '672 patent.

[5] Approval from the Food and Drug Administration is required before a product can be commercialized. The FDA tests for safety to insure that no adverse consequences result from the use of the product and for efficacy to insure that the product performs as it claims on its labeling.

[6] Ultrazyme was introduced commercially in the United States in 1987. The Ultrazyme tablet contains the enzyme subtilisin A, which is a proteolytic enzyme and the active protein removing ingredient. Other ingredients include sorbitol, N-acetylcysteine, sodium carbonate, polyethylene glycol 3350, and tartaric acid.

Alcon promotes Opti-Zyme for use in hydrogen peroxide, such acts will constitute inducement of infringement of the '672 patent.

The typical regimen for weekly enzymatic cleaning of lenses is a two-step method. In the first step, the lens is soaked in a solution of an enzyme tablet dissolved in saline for cleaning. Disinfection does not occur in the first step. In the second step, the lens is soaked in a disinfectant. Practitioners and lens care manufacturers recognized a need in the market for a one-step cleaning and disinfecting product in order to enhance patient compliance. Patients were frequently skipping one of the steps, more frequently the disinfecting step. Alcon has been working on a one-step system since at least early 1979. **[**1368]**

Although enzymatic cleaners have **[*8]** been used since 1975 to clean protein deposits from contact lenses, and hydrogen peroxide has been used to disinfect soft contact lenses since 1970, the two were used in the two-step method and had not been combined in a one-step method. The key difference in the two methods is that in the two-step method, the enzyme tablet is dissolved in saline, whereas, in the one-step method, the enzyme tablet is dissolved directly into the hydrogen peroxide. The patent in suit (the '672 patent) is a one-step method patent involving the combination of a mixture of peroxide and a proteolytic enzyme.

DISCUSSION

I. PATENT VALIDITY

HN1[] A patent is presumed valid as to each claim. *35 U.S.C. § 282*. The presumption of validity is not absolute but can be rebutted. The burden of proof is on the party challenging validity to prove the facts establishing invalidity by clear and convincing evidence. *American Hoist & Derrick Co. v. Sowa & Sons, Inc., 725 F.2d 1350, 1360 (Fed. Cir.)*, cert. denied, *469 U.S. 821 (1984)*. The presumption is affected by several factors. For instance, if the most pertinent prior art was before the Patent and Trademark Office ("PTO") Examiner, the presumption is bolstered. **[*9]** However, if there is evidence of more pertinent prior art which was not presented to the examiner, such evidence would weigh heavily in overcomimg the presumption. *W.L. Gore & Assoc. v. Garlock, Inc., 721 F.2d 1540 (Fed. Cir. 1983)*, cert. denied, *469 U.S. 851 (1984)*.

Alcon has cited several pieces of prior art which it deems to have been more pertinent than the art before the examiner, including the Randeri patent (PX 286), the Boghosian patent (PX 287), another Boghosian patent (PX 288), the Ogunbiyi patent (PX 68), the Blomeyer patent (PX 23), the Fu patent (PX 406), Allergans' Japanese enzyme/disinfection patent publication (PX 359A), and the Hira Japanese article (PX 346A).

A. Anticipation

Defendant argues that claims 1, 2, 3, 4, 5, 6, 7, and 8 of the '672 patent were anticipated by the prior art and therefore not patentable under *35 U.S.C. § 102*. Particularly, Alcon argues that the '672 patent is not novel because the Lo article suggested the claims of the '672 patent to those skilled in the art.

HN2[] "Under *35 U.S.C. § 102*, anticipation requires that each and every element of the claimed invention be disclosed in a prior art reference. In addition, the prior art reference **[*10]** must be enabling, thus placing the allegedly disclosed matter in the possession of the public." *Akzo N.V. v. U.S. Int'l Trade Comm., 808 F.2d 1471, 1479 (Fed. Cir. 1986)*, cert. denied, *482 U.S. 909 (1987)* (citations omitted). "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." *Verdegaal Bros., Inc. v. Union Oil Co., 814 F.2d 628 (Fed. Cir.)* cert. denied, *484 U.S. 827 (1987)*. Anticipation is a factual determination. *Lindemann Machinenfabrik GMBH v. American Hoist & Derrick Co., 730 F.2d 1452, 1458 (Fed. Cir. 1984)*. To anticipate, Lo's experiment must have disclosed the process of the patent, although he need not have appreciated the effect of his experiment. *General Electric Co. v. Jewel Incandescent Lamp Co., 326 U.S. 242 (1945)*. The '672 patent is anticipated if the Lo article disclosed each and every element as set forth in the claims of the '672 patent.

The Lo article, entitled "Studies on Cleaning Solutions for Contact Lenses," was published in the Journal of the American optometric Association in November of 1969. The Lo article contained **[*11]** a cleaning study of contact lenses using twelve commercial contact lens cleaning solutions, four experimental cleaning solutions, and four enzyme-containing laundry detergents. The focus with respect to this litigation is on the experiments with enzyme-containing laundry detergents, particularly with the detergent BIZ, a patented laundry detergent product under U.S. patent 3,353,139 issued January 5, 1971 to Procter and Gamble as assignee of Charles Bruce McCarty.

The Lo article described cleaning proteins from contact lenses with an enzyme containing solution, BIZ. BIZ contained the enzyme subtilisin and also sodium perborate, a peroxide. Alcon argues that the process anticipated the patent in suit because it cleaned the lenses with the enzyme and inherently, simultaneously disinfected the lenses due to the presence of sodium perborate (a peroxide). The act of soaking contact lenses in BIZ, Alcon contends, necessarily disinfected the lenses. Hence, the Lo reference anticipates and thereby invalidates claims 1, 2, 3, 4, 5, 6, 7, and 8 of the '672 patent. **[**1369]**

However, Allergan argues that the use of the detergent BIZ in the experiment reported in the Lo article did not satisfy each **[*12]** and every element of the claims because the BIZ experiment did not remove substantially all protein accretions, employ a "disinfecting amount of peroxide," or disinfect the contact lenses.

The Lo article describes cleaning contact lenses in the laundry detergent BIZ. BIZ contains sodium perborate and an enzyme stain remover. The experiment included smearing blood serum (a protein) and "Magic Marker" onto a hard contact lens. The lens was then soaked in a 2% BIZ solution with a pH level of 9.8 for 33 minutes. The result was a 50% cleaning rate of the contact lens.

Although Alcon presents many arguments in support of its claim of anticipation, it primarily relies on the experiments of Mrs. Ruth Ann Rosenthal. [7] Before trial, Rosenthal, an Alcon employee, attempted to duplicate the Lo experiment. However, Rosenthal's experiment differed in several respects. While Lo's experiment involved a 2% solution, Rosenthal's experiment involved a 1% solution because she could not obtain the 2% solution. [8] Rosenthal's experiment involved a soak time of 3 hours compared to 33 minutes by Lo. Other factors also differed. Rosenthal performed her test at room temperature, in sterile distilled water. **[*13]** However, these conditions are unknown for Lo's experiment. Although the pH level in Lo's experiment is known to be 9.8%, Rosenthal does not know the pH level of her experiment.

Although Rosenthal testified that the organisms were reduced by 1 log in 3 hours (the same rate as defined in the patent), she also testified that the tests she performed do not prove **[*14]** disinfection. Rosenthal ran D-value tests which measure antimicrobial activity. D-value tests do not necessarily measure disinfection. ("A D-value test will not prove that it will disinfect." TR. 6:38). Rosenthal never ran a separate disinfection test on BIZ and therefore never tested its disinfecting abilities. Alcon asserts that Lo's experiment inherently disinfected, thereby disclosing the same process as in the '672 patent. However, based on all the evidence, the Court finds that Alcon has fallen short of its burden to prove that disinfection actually occurred in the Lo experiment.

Based on the evidence presented at trial, the Court finds that the Lo article did not expressly or inherently disinfect the lenses. Claim 1 defines a solution of a disinfecting amount of peroxide and proteolytic enzyme for a time sufficient to disinfect. The Court cannot conclude that the BIZ experiment by Lo disinfected the contact lenses. Because the Lo article does not suggest every element of Claim 1, it cannot anticipate such claim.

Furthermore, the Court finds that the Lo experiment did not remove "substantially all" of the protein accretions. Lo's results show that he removed only 50% of the **[*15]** protein (in the form of blood serum) smeared on the lenses.

---

[7] Alcon also presented the affidavit of Bruce McCarty, the inventor of the BIZ '139 patent. Dr. McCarty concludes that Lo's experiment would meet all claims of the patent. However, his opinions are based on recollection, and he has performed no tests to verify such conclusions. The Court has considered Dr. McCarty's opinions and has concluded that they are not persuasive, and they have not been given significant weight.

[8] Rosenthal was unable to obtain the same solution as Lo. This indicates that, although the BIZ used by Rosenthal had the same McCarty patent number on the box, the formulation was not necessarily the same as the formulation of BIZ in 1969.

One of the elements of Claim 1 of the '672 patent is that the method "removes substantially all protein accretions." Lo shows that he removed 50% of the protein accretions in his experiment. To anticipate the '672 patent, Lo must have removed "substantially all" of the protein.

In order to resolve the issue, the Court must interpret "substantially all" used in Claim 1. First, the words must be given their "ordinary and accustomed meaning" unless it appears that the inventor used them differently. *Universal Oil Products Co. v. Globe Oil & Refining Co., 137 F.2d 3 (7th Cir. 1943)*, aff'd, *322 U.S. 471 (1944)*. Webster's New World Dictionary (1972) defines substantial as "of or having substance; considerable, ample, large." Substance, in turn, is defined as "the real or essential part of anything." Webster's dictionary defines "all" as "the whole extent; the entire number of; every one of; every." Given its ordinary and accustomed meaning, substantially all means a large or considerable amount of the whole; not everything, but almost everything. It does not mean "some" or "half" or even " a majority." Indeed, Dr. Quintana **[*16]** and Mr. Burton, both of Alcon, agreed that, in the ordinary usage of the term, 50% is not "substantially all." This ordinary meaning is not inconsistent with its use in the inventor's use in the patent. [9]

[1370]** Because the remaining claims are dependent on Claim 1, the Court further concludes that claims 2, 3, 4, 5, 6, 7, and 8 were not anticipated by the Lo article. Moreover, Lo did not anticipate other elements of claim 3. Lo used BIZ with the perborate and the enzyme both in a dry form and mixed it with **[*17]** water. Claim 3 describes dissolving the enzyme in powder or tablet form into a peroxide solution.

Based on all the evidence presented, the Court determines that Alcon has failed to sustain its burden of proving that the Lo article "anticipated" the '672 patent.

B. Obviousness

Alcon claims that the '672 patent is invalid because it was obvious at the time of the invention. *Section 103* provides in part:

HN3[] A patent may not be obtained . . . if the differences in the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

35 U.S.C. § 103.

Alcon has the burden of proving obviousness by clear and convincing evidence. [10] ***HN4***[] To be obvious, the claimed invention as a whole must have been obvious to one of ordinary skill in the art at the time of the invention. Obviousness is a question of law [11] based on factual inquiries into: (1) the scope and content of the prior art, (2) the level of ordinary skill in the art, (3) differences between the claimed invention and the prior art, and (4) objective evidence **[*18]** of nonobviousness such as long-felt need, unexpected results, failure of others, commercial success, and copying. *Graham v. John Deere Co., 383 U.S. 1, 17 (1966)*; *Atlas Powder Co. v. E.I. Du Font de Nemours, 750 F.2d 1569 (Fed. Cir. 1984)*. The Court must look at the invention at the time it was made from the perspective of the hypothetical person and in light of the prior art to determine if the patent would have been obvious to such person.

[9] Alcon points out that Lo's 50% level of cleaning is comparable to the cleaning in Example 1 and better than the results of the second Example 7 of the patent in suit. The Court must define the scope of the patent from the claims; the examples are merely illustrative. Alcon would have the Court isolate the examples showing 30% and 50% cleaning and ignore the more numerous examples showing 60%-90% cleaning. Example 1 showed 50% to 70% cleaning; second Example 7 showed 30% cleaning and Example 2 showed 80%-90% cleaning.

[10] *Perkin-Elmer Corp. v. Computervision Corp., 732 F.2d 888 (Fed. Cir.)*, cert. denied, ***469 U.S. 857 (1984)***; *American Hoist, 725 F.2d at 1358-59*.

[11] *Akzo, 808 F.2d at 1480*.

Additionally, Alcon suggests that the presumption of validity is weakened because the most pertinent art was not before the PTO Examiner during the prosecution of the patent. *W.L. Gore, 721 F.2d 1540*.

1. Scope and Content of the Prior Art

The Court will consider the relevant prior art in existence before December 10, 1984, the record date of the invention. Based on the **[*19]** evidence presented at trial, the Court determines that the related art includes art in the fields of protein chemistry, enzymology, contact lens cleaning and disinfecting, dental, and laundry detergent art.

Alcon has asserted that the prior art made the patent in suit obvious to one of ordinary skill in the art. Alcon supports its contention with the argument that the concept of enzymatic cleaning, hydrogen peroxide disinfection and one-step methods of cleaning and disinfecting were all well known at the time of the patent, thereby making the invention obvious. In the following section, the Court will discuss the related art which Alcon suggests makes the patent obvious.

2. Differences Between the Claimed Invention and the Prior Art

The Court will now discuss the prior art in the related fields. The art relied upon by Alcon includes the art presented to the PTO and art which was not presented to the PTO.

The Lo Article. The Lo article has been thoroughly discussed above. Lo attempted to clean hard contact lenses with a 1% solution of BIZ laundry detergent which contains enzymes and sodium perborate. The article showed only 50% cleaning and does not mention disinfection.

[*20] The Randeri '696 Patent. The Randeri patent describes a method of cleaning and sterilizing soft contact lenses with an oxidative system. The method involved an aqueous, isotonic solution containing oxygen releasing salt, such as potassium peroxymonosulfate. Alcon describes the Randeri patent as a one-step cleaning and disinfecting system. However, Randeri differs from the '672 patent in that it does not involve enzymatic cleaning. Furthermore, the Randeri patent cannot actually be used to clean and disinfect contact lenses in a useful manner because oxone cannot be used for that purpose. The Randeri '696 patent was not disclosed to PTO during issue or reissue of the patent in suit. **[**1371]**

The Boghosian '965 Patent. The Boghosian '965 patent also describes a one-step method of cleaning and disinfecting contact lenses. However, the '965 does not involve the use of enzymes or peroxides. The Boghosian '965 patent was not before the PTO during the issue or the reissue of the patent in suit.

The Boghosian '782 Patent. The Boghosian '782 also describes a method for one-step cleaning and disinfecting of soft contact lenses. The patent involves the use of a solution of chlorhexidine, **[*21]** polyvinylpyrrolidone, and polyhydroxyethylmethacrylate. The Boghosian '782 does not mention the use of an enzyme or a peroxide in the process. The Boghosian '782 patent was not before the PTO during the issue or the reissue of the patent in suit.

The Ogunbiyi '549 Patent. Ogunbiyi teaches one-step cleaning and disinfection using an enzyme with thermal disinfection. This patent differs in that it involves thermal disinfection, not a peroxide or other chemical type of disinfection. One of the enzymes suggested by Ogunbiyi for use in the invention is papain. Papain will not work in the patent in suit because it is inactivated too quickly. The Oginbiyi patent process tends to have a discoloring effect on lenses and it cannot be used on certain types of high water content lenses.

The Fu '127 Patent. The Fu '127 patent involves cleaning contact lenses with a peroxide, transition metal salts, and a surfactant. The Fu patent does not mention disinfection or the use of enzymes. The Fu patent was not before the PTO.

The Blomeyer '379 Patent. The Blomeyer '379 patent comes from the laundry detergent art. It describes a method for soaking and laundering in a solution of a proteolytic **[*22]** enzyme and a peroxy compound along with an organic detergent and an alkaline builder to achieve superior stain removal. The patent describes superior cleaning from combining a proteolytic enzyme with an oxygen bleach compound than cleaning with only one of these. Although the patent refers to cleaning and bleaching, it makes no reference to disinfection. The Blomeyer '379 patent was not before the PTO during the issue or the reissue of the patent in suit.

The Rosenbaum Patent. This patent comes from the dental art and describes combining a peroxide compound with a peroxidase to kill bacteria to alleviate gingival disease and periodontal disease. However, Rosenbaum uses a peroxidase enzyme which cannot clean protein accretions.

The Japanese Boghosian Publication. The Japanese Boghosian publication, entitled "Method of Cleaning and Sterilizing Contact Lenses," dated April 20, 1974, teaches a method of simultaneous cleaning and disinfecting soft contact lenses with a proteolytic enzyme -- papa in -- and a non-peroxide chemical disinfectant -- Hydrocare. [12] "The resulting solution possesses excellent antimicrobial activity as well as cleaning ability." The preferred proteolytic **[*23]** enzyme is papain in the amount of about 0.5 to 1 percent. The preferred non-toxic sterilizing compound is alkyl (tallow) triethanol ammonium chloride in an amount from about 0.03 to 0.1 percent (w/v).

Alcon argues that the only difference between Allergan's Japanese enzyme/disinfectant patent publication and the patent-in-suit is the use of a non-peroxide chemical disinfectant rather than a peroxide chemical disinfectant. The Court agrees with Alcon with two distinguishing qualifications. First, although papain is a proteolytic enzyme, it does not work in the patent in suit because it does not produce the cleaning activity in the presence of a peroxide. Second, as Alcon has pointed out, this publication further differs from the patent in suit because it uses a different kind of disinfection -- a non-peroxide. This patent publication was not before the PTO.

The McCarty '139 Patent. The McCarty patent comes from the **[*24]** laundry detergent art and is the patent listed on the BIZ laundry detergent box. The patent describes the combination of a detergent, an enzyme, a peroxide compound, and builder salts. The patent discusses cleaning but does not mention disinfection.

The Hira Japanese Article. The Hira article is entitled "Study of the Removal of Protein Stains with Enzymes (I) -- Comparison of the Effects of Different Enzymes and Treatment Conditions." Hira reported cleaning results from soaking stained cloth samples in different enzyme-containing solutions and reported a synergistic effect on cleaning when hydrogen peroxide was added to the enzyme solution. However, the article also showed reduced activity of the enzyme as the amount of hydrogen peroxide in the solution was increased. The Hira article does not mention disinfection. This article was not before the PTO.

The Stauffer and Etson Article. This article, entitled "The Effect of Subtilisin Activity of Oxidizing a Methionine Residue," was **[**1372]** published in the Journal of Biological Chemistry in October, 1969. The authors tested "the effects of hydrogen peroxide on a bacterial serene protease, subtilisin Carlsberg (EC 3.4.4.16)." The result **[*25]** was that the enzyme had been "crippled" but not rendered totally inactive. The enzymatic activity of subtilisin was reduced by approximately 90% in the presence of hydrogen peroxide. This article mentions nothing of disinfection.

The Kaplan '868 Patent. This patent comes from the dental art and was cited in the application as "related art." It describes a water soluble effervescent denture cleanser tablet containing an enzyme and an active oxygen compound. The patent suggests sequential cleaning; first by the enzyme, "before the dissolution of the active oxygen compound reaches a level which would totally inactivate the enzyme," [13] and then from the active oxygen compound such as sodium perborate. There is no mention of disinfection. This patent was before the PTO.

Information Bulletin from NOVO. This bulletin appeared in a brochure of NOVO Industries of Copenhagen, Denmark, one of the biggest suppliers of enzymes, in March of 1987. The brochure describes **[*26]** the properties of subtilisin A. This brochure was also before the PTO examiner.

3. Level of Ordinary Skill in the Art

[12] Hydrocare is the commercial name of the chemical disinfectant used in the Japanese publication.

[13] Column 2, lines 63-68 of the Kaplan '868 patent.

The Court must now determine the level of ordinary skill in the art. This is accomplished by constructing a hypothetical person -- sometimes described as a "ghost" [14] -- from whose perspective the Court will determine obviousness. The Court must consider several factors when constructing this "ghost." ***HN5***[] The factors include (1) the educational level of the inventor, (2) the type of problems encountered in the art, (3) prior art solutions to these problems, (4) the rapidity with which inventions were made, (5) the sophistication of the technology, and (6) the educational level of active workers in the field. *Environmental Designs v. Union Oil Co. of Cal., 713 F.2d 693, 696 (Fed. Cir. 1983)*, cert. denied, *464 U.S. 1043 (1984)*.

Based on the evidence presented at trial, the Court determines **[*27]** that a person of ordinary skill in the art at the time of the invention would have one of a variety of educational backgrounds with hands-on experience in the contact lens care industry. The person would have at least a bachelor's degree in a field of natural science such as chemistry, organic chemistry (the most typical training in the field), biology, microbiology, pharmacy, optometry and ophthalmology. Many skilled in the field also have postgraduate degrees.

4. Secondary Considerations

HN6[] The Court may look to several secondary considerations in its determination of obviousness such as long felt but unsolved need, failed attempts by others, initial skepticism, subsequent praise, commercial success, and copying by others. *Graham v. John Deere Co., 383 U.S. 1 (1966)*.

The evidence showed that since the early 1970's, competitors in the contact lens cleaning field felt a need to develop a method of one-step cleaning and disinfecting of soft contact lenses. As discussed above, patient compliance with the two-step method was more susceptible to failure, creating the risks associated with noncompliance. Those in the contact lens care field made efforts to develop one-step methods. **[*28]** Many attempts were made to develop such a system without success. Bausch & Lomb's Renu product -- involving a thermal disinfection -- from the Ogunbiyi '549 patent was introduced commercially in December 1986. The invention of the patent in suit was in December of 1984. In addition, when the invention was introduced, it was met with great skepticism from those skilled in the art. This skepticism stems from the prior art which taught that enzymes and peroxides were incompatible. Since the invention, Allergan's competitors (Bausch & Lomb, Barnes Hind, and Alcon) have filed applications for FDA approval for enzyme products which can be used in the patented process. Moreover, Ultrazyme has been commercially successful in both domestic and international markets.

5. Conclusion as to Obviousness

Alcon supports its contention of obviousness with several known facts at the time of the invention:

(1) the use of enzymes to clean contact lenses,

(2) the use of hydrogen peroxide as a disinfectant for contact lenses, and

(3) the use of one-step cleaning and disinfecting of contact lenses with enzyme cleaners **[**1373]** and chemical disinfectants. [15]

---

[14] *Panduit Corp. v. Dennison Mfg. Co., 810 F.2d 1561 (Fed. Cir.)*, cert. denied, ***481 U.S. 1052 (1987)***.

[15] Alcon has also urged that Allergan must show a synergistic result from combining the two known ingredients, each to be used for their intended purpose. Allergan presented evidence -- much of it from Alcon's own experiments -- which showed findings of synergism. However, after review of all the evidence, the Court determines that such enhancement was not attributable to the combination of enzymes and hydrogen peroxide alone. Rather, enhanced disinfection is related to pH level. The Court has reviewed the briefs, evidence, and applicable law and determines that a showing of synergism is not required in this case. Allergan is not distinguishing the patent in suit from the prior art on the basis of unexpected synergism alone. Hence, a lack of synergy does not render the patent obvious. See, *Merck & Co. v. Biocraft Laboratories, Inc., 874 F. 2d 804 (Fed. Cir.)*, cert. denied, ***U.S. , 110 S.Ct. 498 (1989)***; *Gardner v. TEC Systems, Inc., 725 F.2d 1338 (Fed. Cir.)* (in banc), cert. denied, ***469 U.S. 830 (1984)***.

[*29] Alcon ties these rather broadly stated facts together to conclude that, because each element performs its known function, and because it was known that ingredients could be combined to achieve one step cleaning and disinfection, the process was obvious as "a logical path in the art to combine enzyme cleaners (known) with peroxide disinfectants (known) to achieve one-step cleaning and disinfecting (known)." However, Alcon grossly oversimplifies its argument and ignores the evidence which permeated the trial. That is, that each and every piece of prior art differs from the patent in suit in at least one material way. For instance, one piece of prior art might include the use of a proteolytic enzyme for cleaning, yet mention nothing of disinfection, whatsoever. A piece of art might describe the use of a proteolytic enzyme for cleaning, but the enzyme may be of the type which is susceptible to oxidation or which does not clean protein accretions. Yet another piece of art may address nonperoxide chemical disinfection or thermal disinfection, or no disinfection at all. Still others do not even mention the use of an enzyme or peroxide. Although some of the art taught methods of simultaneous **[*30]** cleaning and disinfecting, the methods did not combine proteolytic enzymes and hydrogen peroxide.

The prior art taught away from combining enzymes and disinfectants because the two had a detrimental effect on each other -- each inactivated the other. This incompatibility formed a consensus with those skilled in the art. The art taught that some proteins inactivate some disinfectants. An enzyme is a protein which can reduce the antimicrobial activity of peroxide. The art also taught that peroxides could inactivate enzymes. For example the Berg reference teaches that hydrogen peroxide has a negative impact on proteolytic enzymes (such as subtilisin A) by reducing the enzyme activity. The Hira and the Stauffer and Etson articles also showed decreased activity of the enzyme in the presence of hydrogen peroxide. Such prior art would have created skepticism toward the patent in suit to those skilled in the art. Although some enzymes, such as subtilisin A, are less susceptible to oxidation than others, this fact was not well known to those skilled in the art.

Hence, after consideration of the prior art as a whole, viewed by those with ordinary skill in the art at the time of the invention **[*31]** -- and taking into account the secondary considerations -- the Court determines that the evidence fails to show the invention was obvious. The Court further finds that there has been no showing of more pertinent prior art than that which was before the PTO.

C. Specificity

HN7[] Inventions are required to be sufficiently described in a patent such that one skilled in the art could practice the invention. *Allen Archery, Inc. v. Browning Mfg. Co., 819 F.2d 1087, 1092 (Fed. Cir. 1987)*. *Section 112* provides, in pertinent part:

HN8[] The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

* * *

An element in a claim for a combination may be expressed as a means or step for performing a **[*32]** specified function without the recital of structure, material, or acts in support thereof, and such claim shall be construed to cover the corresponding structure, material, or acts described in the specification and equivalents thereof.

35 U.S.C. § 112.

Alcon contends that the patent does not specifically describe the method such that **[**1374]** one skilled in the art could practice the patent. Lack of factors such as osmolality, protein denaturing agents such as N-acetylcysteine, diffusion, surface accessibility, tablet formulation ingredients, and pH level, Alcon contends, would require undue experimentation, thereby rendering the claims invalid under *§ 112*. *In re Lundak, 773 F.2d 1216, 1220 (Fed. Cir.*

1985). However, Allergan asserts that what is claimed is sufficiently understandable to those skilled in the art in light of the specifications. See, *Orthokinetics, Inc. v. Safety Travel Chairs, Inc., 806 F.2d 1565 (Fed. Cir. 1986)*.

The evidence presented at trial showed that the claims are not indefinite or ambiguous and that those skilled in the art could understand what was claimed without undue experimentation. For instance, it was well known that pH affects enzyme activity. The **[*33]** patent calls for an "effective amount of proteolytic enzyme." The patent explains that enzyme activity is pH dependent, "So for any given enzyme, there will be a particular pH range in which that enzyme will function best." Those with ordinary skill in the art could ascertain the effectiveness of an enzyme without the patent including all possible levels of pH for each and every enzyme. The other factors are likewise unnecessary for one skilled in the art to understand the claims.

After thorough review of the claims in light of the specifications, the Court determines that Alcon has failed to prove by clear and convincing evidence that the patent violates *§ 112*.

D. Reissue Oath

Allergan submitted a reissue application to the PTO pursuant to *35 U.S.C. § 251*, which provides in pertinent part:

HN9[] Whenever any patent is, through error without any deceptive intention, deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less than he had a right to claim in the patent, the Commissioner shall, on the surrender of such patent and the payment of the fee required by law, reissue the patent for the invention **[*34]** disclosed in the original patent, and in accordance with a new and amended application, for the unexpired part of the term of the original patent. No new matter shall be introduced into the application for reissue.

In In re Wilder, [16] the Federal Circuit succinctly described the requirements of *§ 251*.

HN10[] There are two distinct statutory requirements that a reissue oath or declaration must satisfy. First, it must state that the patent is defective or partly inoperative or invalid because of defects in the specification or drawing, or because the patentee has claimed more or less than he is entitled to. Second, the applicant must allege that the defective, inoperative, or invalid patent arose through error without deceptive intent.

Id. at 1518. In other words, the applicant must show (1) error in the patent and (2) error in conduct. *Hewlett-Packard Co. v. Bausch & Lomb Inc., 882 F.2d 1556 (Fed. Cir. 1989)*. When Allergan submitted its application for reissuance, it included a reissue declaration signed by Stanley Huth, Sam Wah Lam and Richard Kiral, the inventors of the original patent, pursuant to *37 C.F.R. § 1.175*. [17] The reissue declaration was prepared by Mr. Fuchs, **[*35]**

[16] *736 F.2d 1516 (Fed. Cir. 1984)*, cert. denied, ***469 U.S. 1209 (1985)***.

[17] The regulation provides, as it did in 1987:

(a) Applicants for reissue, in addition to complying with the requirements of § 1.63, must also file with their applications a statement under oath or declaration as follows:

(1) When the applicant verily believes the original patent to be wholly or partly inoperative or invalid, stating such belief and the reasons why.

(2) When it is claimed that such patent is so inoperative or invalid "by reason of a defective specification or drawing," particularly specifying such defects.

(3) When it is claimed that such patent is inoperative or invalid "by reason of the patentee claiming more or less than he had the right to claim in the patent," distinctly specifying the excess or insufficiency in the claims.

(4) [Reserved]

(5) Particularly specifying the errors relied upon, and how they arose or occurred.

(6) Stating that said errors arose "without any deceptive intention" on the part of the applicant.

outside counsel to Allergan. Mr. Kanagy, the patent attorney for Allergan who prosecuted the original patent, presented **[**1375]** each of the inventors with the reissue declaration, informed them that the errors were his and asked them to sign the declaration if they felt comfortable with the information contained in it. Each of the inventors, without further investigation, signed the declaration. Alcon contends that the declaration is insufficient under *§ 251* as expanded by the regulation, thereby invalidating Clams 9-15 as a matter of law. The burden is on Alcon to show by clear and convincing evidence that the reissue declaration is inadequate.

[*36] 1. Error in the Patent

In the reissue declaration, the inventors claimed that the original patent was partly inoperative because of two errors. First, Claim 9 was defective because it used the language "aqueous composition" and there was no antecedent basis for such language in the claims from which Claim 9 depends. The claim could be corrected by using the term "solution" which could be referred back to the term "solution" in claim 1. second, the inventors maintained that the patent was partly inoperative because the original patent claims were less than the inventors had a right to claim in the patent. They sought to add claims 10-15 -- all of which are dependent on Claim 1 -- which describe the use of the patent with hydrophilic contact lenses. Claims 10-15 do not broaden the scope of the claims contained in the original patent. Claims 10-15 are simply additional dependent claims. The Federal Circuit has recognized its tacit approval of allowing reissue for the purpose of including such claims. *Hewlett Packard, 882 F.2d at 1565*. Accordingly, the Court finds that the first prong of the *§ 251* **[*37]** requirements -- error in the patent -- has been satisfied.

2. Error in Conduct

In the reissue declaration, the inventors claimed that both of the errors "occurred as a result of oversight in the preparation and review of the patent application. These errors arose inadvertently without any deceptive intention on my part."

The evidence at trial showed that the errors were made through oversight in drafting by Mr. Kanagy, the patent attorney for Allergan who prosecuted the original patent. As mentioned above, Mr. Kanagy informed the inventors of his errors and asked them to sign the reissue declaration if they felt comfortable with the information contained in the declaration.

The issue before the Court is whether the declaration was sufficient under *§ 251* as expanded by regulation *§ 1.175*. As stated above, Alcon has the burden to prove by clear and convincing evidence that the declaration is inadequate under the regulation. Alcon has satisfied that burden by showing that the declaration, on its face, is inadequate for the examiner to determine reissuable error. The regulation requires an explanation particularly specifying the errors and how they arose. As the Federal circuit **[*38]** explained in Hewlett-Packard,

the statutory provision has been implemented and expanded by the PTO regulations . . . which require an oath or declaration with respect to both aspects of error under *section 251* and further require an explanation as to how and when the error in conduct arose and how and when it was discovered.

Id. at 1565.

The declaration in this case fails to make such a showing. The mere conclusion that the error was made through oversight in drafting by the patent attorney, without more, falls short of what the regulation requires. Because the affidavit is insufficient evidence of reissuable error, the examiner was wrong in reissuing the patent. If Allergan

---

(7) Acknowledging a duty to disclose information applicant is aware of which is material to the examination of the application.

(b) Corroborating affidavits or declarations of others may be filed and the examiner may, in any case, require additional information or affidavits or declarations concerning the application for reissue and its object.

37 C.F.R. § 1.175.

could show reissuable error by some other evidence before the examiner, the newly added claims could be saved. However, Allergan has not made such a showing.

Accordingly, the Court declares claims 9-15 of the '672 patent to be invalid for failure to comply with *35 U.S.C. § 251* and *37 C.F.R. § 1.175*.

II. ENFORCEABILITY

A. Inequitable Conduct

HN11[] To establish inequitable conduct before the PTO, and thus render a patent unenforceable, the defendant must establish by clear and convincing evidence **[*39]** (1) a material misrepresentation or omission of information, and (2) a threshold level of intent on the part of the applicant. *J.P. Stevens & Co. v. Lex Tex Ltd., 747 F.2d 1553 (Fed. Cir. 1984)*, cert. denied, *474 U.S. 822 (1985)*. A determination as to each element must be made separately. The standard for materiality is whether a reasonable patent examiner would consider the omitted material pertinent in making a decision on whether to issue a patent. [18]

[1376]** Alcon bases its inequitable conduct argument on several grounds; withholding material inconsistent test data, withholding **[*40]** material prior art, misleading the PTO and inequitable conduct based on the reissue application. Inequitable conduct requires an intent to mislead or deceive. Intent must usually be proven by circumstantial evidence.

Alcon has alleged that Allergan intentionally withheld data from the PTO which was inconsistent with the data supplied. In particular, Alcon argues that Allergan had conducted studies which showed substantially greater cleaning with subtilisin and saline than tests disclosed to the PTO. However, based on the evidence presented at trial, the Court determines that Alcon has failed to prove by clear and convincing evidence that data not before the examiner was material. That is, Alcon did not prove a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent. Moreover, the evidence showed that there are many variables which effect the results of the tests -- pH and tonicity level, presence or absence of N-acetylcysteine and time of soaking. Looking to results alone, without looking at the parameters of the tests, for comparison purposes is a faulty technique. Furthermore, inconsistent test **[*41]** results is not per se material. Alcon would have the Court conclude from the results alone that the data is inconsistent with the data in the patent in spite of the evidence presented at trial which showed differently. The Court further determines that Alcon has failed to prove that Allergan acted with the requisite culpability in not submitting the data.

The evidence relating to Alcon's other arguments is insufficient as well. The Court has thoroughly reviewed the prior art and has determined that Allergan did not withhold more pertinent prior art. Furthermore, Alcon has failed to prove that the submission of such art would have been pertinent to a reasonable patent examiner in making a decision on whether to issue a patent. Alcon also asserts that Allergan mislead the PTO with respect to Lo, McCarty, and Stauffer and Etson. However, all of these were before the examiner, who could interpret the information on its face. The Court finds no material misrepresentation or requisite intent. The allegation that the reissue application was submitted for an improper purpose, which stems from the withholding of material information, is likewise unsupported by the evidence. Alcon asserts that **[*42]** Allergan had an ulterior motive for submitting the reissue application [19] which was contrary to its stated reason of claiming less than they had a right to

---

[18] The regulations of the Patent and Trademark Office describe the duty of good faith and candor toward the PTO. The duty includes the duty to disclose all known information which is material to the examination of the application. "Such information is material where there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent."

37 C.F.R. § 1.56(a).

[19] That is, to "whitewash the prior art and the withheld, contradictory cleaning study, and to insert fallback position claims to help distinguish Lo."

claim. [20] This argument is unsupported by the evidence. Furthermore, of all the evidence cited by Allergan in support of its claim, none has been proven to be material.

Accordingly, the Court determines that Alcon has failed to prove by clear and convincing evidence that Allergan is guilty of inequitable conduct before the PTO.

B. Misuse

Alcon has asserted a misuse defense to Allergan's claims of infringement. *Carbice Corp. v. American Patents and Development Corp., 283 U.S. 27 (1931)*. Alcon alleges **[*43]** that Allergan has illegally extended the scope of its monopoly in the method patent by "tying" it to an unpatented, nonstaple product. [21] That is, by selling Ultrazyme and licensing the patent to its users in a single transaction.

In *Senza-Gel Corp. v. Seiffhart, 803 F.2d 661 (Fed. Cir. 1986)*, the Federal Circuit has approved ***HN12***[] the following three-step test for analyzing patent misuse in a tying context.

First: Determine whether there are two things tied, i.e., whether there are separable or inseparable items; if so

Second: Determine whether the "thing" which is assertedly tied to the patented item is a staple or non-staple item in commerce; if staple

Third: Determine **[*44]** whether in fact they are tied. **[**1377]**

Id. at 664.

The Court determines that the product Ultrazyme is clearly separable from the method patent. Allergan argues that they are indistinguishable because Ultrazyme is offered for use only in the patented method. However, the focus is not on the relation of the products, but "on the character of the demand for the two items." *Jefferson Parish Hosp. v. Hyde, 466 U.S. 2, 19 (1984)*. In other words, there must be two distinct product markets. Ultrazyme competes with many other products in the weekly enzymatic cleaner market. There is a sufficient demand for weekly enzymatic cleaners to distinguish the market. The Court determines that there are two distinguishable product markets from the perspective of the buyer.

Alcon seems to misunderstand the test for determining whether a product is a nonstaple. The focus is not on the market; rather, the focus is on the conduct of the patentee. [22] **[*46]** ***HN13***[] A product is a nonstaple if it constitutes a "material part of the invention . . . not a staple article or commodity of commerce suitable for substantial noninfringing use." *§ 271(c)*. In other words, Ultrazyme must have an actual and substantial noninfringing **[*45]** use; a theoretical capability does not suffice. *Fromberg, Inc. v. Thornhill, 315 F.2d 407 (5th Cir. 1963)*. The Court determines that Ultrazyme is a nonstaple product. Its use is a material and substantial part of the invention. At the time of trial, Ultrazyme was the only FDA approved product for use in combination with hydrogen peroxide. The labeling and instructions in Ultrazyme direct that it be used in the patented process, granting an implied license to the purchaser. In sum, Ultrazyme can only be used in the patented process. Although Allergan has received FDA approval to use a tablet with the Ultrazyme formulation in combination with saline, [23] Allergan has never promoted its use and does not intend to promote such use in the future. The Court agrees with Allergan

---

[20] Although Alcon argues that the addition of dependent claims was improper, the case law supports the submission of reissue applications for such a purpose. See, *Hewlett-Packard, 882 F.2d at 1565*.

[21] Alcon further supports its allegations of misuse with the argument that, as a matter of Allergan policy, it will not grant licenses under the patented method. The Court finds this argument irrelevant to the issue of patent misuse, as did the Supreme Court in *Dawson Chemical v. Rohm & Haas Co., 448 U.S. 176, at 202* and 214-215 (1980).

[22] *Dawson Chemical 448 U.S. at 192*.

[23] The trade name of the tablet is Hydrozyme Enzymatic Cleaner.

that, unless Ultrazyme is allowed to be used for such purpose, the defendant's defense of misuse is premature. Furthermore, the Court finds *§ 271(d)* applicable in this case. As the supreme Court held in Dawson Chemical, under *§ 271(d)*, "a patentee may make and sell nonstaple goods used in connection with his invention." *Id. at 201*. Accordingly, defendant's defense of patent misuse is hereby DENIED.

III. ANTITRUST VIOLATIONS

Alcon has also alleged that Allergan has violated *§§ 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, and under the parallel Texas statutes. *Tex. Bus. & Comm. Code § 15.04*. The relevant product market is weekly enzymatic contact lens cleaners. The relevant geographic market is the United States.

A. *Section 1*

Alcon asserts that Allergan imposed a tie-in restriction on its customers in restraint of trade, creating a per se violation. To prove a violation of *§ 1*, Alcon must show (1) two separable products, (2) market power, and (3) an effect on a not insubstantial amount of interstate commerce in the tied market. The Court has previously determined that two separable products exist. However, where Alcon has failed in its proof is on the second requirement of market power. As the Supreme Court explained in Jefferson Parish,

Our cases have concluded that ***HN14***[] the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product **[*47]** to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to 'purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

466 U.S. at 12.

Assuming, arguendo, that there is a tying arrangement, Alcon has made no showing of anticompetitive effect of such an arrangement. Alcon relies only on its argument that there is a per se violation because one of the items is a patented item. This is insufficient proof and cannot support Alcon's contentions. In order to prove a per se violation, Alcon must show that the tying arrangement involves the use of market power to force buyers to make purchases which they would not otherwise have made. Accordingly, Alcon's allegations of a *§ 1* violation are denied.

B. *Section 2*

Alcon also alleges that Allergan has a monopoly in the enzymatic cleaner market because of its predatory conduct and under **[**1378]** Walker Process. [24] The predatory conduct listed by Alcon includes (1) Allergan has over 50% of the market, (2) there are only two other competitors in the market **[*48]** (Alcon and Bausch & Lomb), and (3) Allergan has absolute control over market entry through its Karageozian patent. However, these actions, taken at face value, do not establish an antitrust violation. There must be a showing of an anticompetitive effect in the tied market. [25] There has been no evidence of any conduct which would coerce or force buyers into purchasing the allegedly tied product, Ultrazyme. Rather, the evidence clearly showed that the other weekly enzymatic cleaners in the market, including Alcon's Opti-Zyme, are competitive with Ultrazyme. Hence, an essential element of an antitrust violation -- anticompetitive effect -- is blatantly missing from Alcon's evidence at trial. Because the Court finds no antitrust injury, it need not consider the other elements.

Under Walker Process, the enforcement of a patent obtained by fraud **[*49]** on the PTO may be the basis of an action under *§ 2*. However, the other elements of a *§ 2* violation must also be shown. As the Court has already determined, Alcon has failed to prove anticompetitive effect. Furthermore, under Walker Process, Alcon must show

---

[24] *Walker Process Equip., Inc. v. Food Machinery and Chem. Corp., 382 U.S. 172 (1965)*.

[25] *Driskill v. Dallas Cowboys Football Club, 498 F.2d 321 (5th Cir. 1974)*.

willful and deliberate fraud on the PTO. There has been no showing of intentional fraud. Accordingly, Alcon's *§ 2* claim is hereby denied.

C. *Texas Business and Commerce Code § 15.04*

For the foregoing reasons, Alcon's state law claim under *§ 15.04* is hereby denied.

IV. ATTORNEY'S FEES

The Court determines that this is not an exceptional case under *35 U.S.C. § 285*, and that Alcon's request for attorneys' fees should therefore be denied.

V. INJUNCTION

On June 20, 1989, the parties filed a joint stipulation with the Court. [26] Accordingly, the issues of infringement and damages have been eliminated by agreement of the parties. However, the Court determines that an injunction is proper. Accordingly, the Court hereby enjoins Alcon, from using or promoting the use of Opti-Zyme or Improved Opti-Zyme in combination with hydrogen peroxide for one-step cleaning and disinfecting as embodied in claims 1 through 9 the '672 patent. **[*50]** *35 U.S.C. § 283*. This injunction is in effect until the expiration of the '672 patent.

[*51] CONCLUSION

The '672 patent was not anticipated or obvious under *35 U.S.C. §§ 102* and *103*, respectively. The patent is sufficiently described per *§ 112*. However, claims 9-15 of the patent are invalid for failure to comply with *35 U.S.C. § 251* and C.F.R. *§ 1.175*. Alcon failed to prove that Allergan engaged in inequitable conduct or misuse of the patent. Finally, Alcon failed to prove an Antitrust violation under any of its asserted theories. Accordingly, the Court hereby declares claims 9-15 of the patent invalid and claims 1-8 of the patent valid and enforceable. Alcon is enjoined from infringing acts until the expiration of the patent.

A judgment consistent with this order will be rendered herewith.

Signed this 27th day of August, 1990

JUDGMENT - August 28, 1990, Filed

This case came on for trial before the Court without a jury, Honorable Eldon B. Mahon, U. S. District Judge, presiding, and the issues having been duly considered, and **[**1379]** an opinion having been rendered, it is ORDERED, ADJUDGED, and DECREED that:

---

[26] The stipulation provides as follows:

The parties hereby stipulate to the following terms regarding the issues of infringement, attorneys' fees and costs:

(1) Allergan shall forego any claim for damages, willful and deliberate infringement, and attorneys' fees. This would not, however, preclude Allergan from arguing that Alcon copied the invention or the like.

(2) Alcon shall not rely upon *35 U.S.C. § 271(e)* to exempt alleged infringements proved by Allergan and shall agree to refrain from filing any motions for dismissal, summary judgment, judgment, or directed verdict with respect to noninfringement based on the *Eli Lilly and Co. v. Medtronic, Inc., 10 U.S.P.Q. 2d 1304 (Fed. Cir. 1989)* decision. However, this would not preclude Alcon from urging that it has not copied the invention or that its application to the FDA for approval of Opti-Zyme in combination with peroxide and its conduct in support of that application is not evidence of an intent to copy the invention or the like.

(3) Alcon and Allergan shall both forego any claim for costs.

(4) Neither party shall file a motion to dismiss based on lack of subject matter jurisdiction or a lack of a case or controversy.

1. Defendant Allergan, Inc. is the lawful owner of the right, title, and interest in U. S. Patent No. Re. 32,672 which issued on May 24, 1988.

2. Claims 1-8 of U. **[*52]** S. Patent No. Re. 32,672 are valid and enforceable.

3. Claims 9-15 of U. S. Patent No. Re. 32,672 are invalid.

4. Plaintiff Alcon Laboratories, Inc. is enjoined from using or promoting the use of Opti-Zyme or Improved Opti-Zyme in an infringing manner with respect to claims 1-8 of the patent until the expiration of the patent.

5. Each party shall bear its own costs of action.

Signed this 27th day of August, 1990.

ORDER - September 5, 1990, Filed

Having considered Allergan's Motion to Correct Clerical Errors, it is hereby ordered that the Motion is granted, that the two errors will be corrected, and that substitute pages will be filed with the Court.

September 4, 1990

Liggett Group, Inc. v. Brown & Williamson Tobacco Corp.

United States District Court for the Middle District of North Carolina, Durham Division

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN4[] Judgment as Matter of Law, Judgment Notwithstanding Verdict

A motion for judgment notwithstanding the verdict (JNOV) may be granted only if, taking all the evidence in the light most favorable to the prevailing party, there is no substantial evidence to support the jury's verdict. Evidence is substantial if it is of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment could reasonably return a verdict for the nonmoving party. However, a mere scintilla of evidence is insufficient to sustain a verdict. Therefore, in order to warrant JNOV, the movant must show that the prevailing party failed to prove an essential element of its claim.

HN5[] Robinson-Patman Act, Claims

Despite the connotations of the term "discrimination" in the Robinson-Patman Act, *15 U.S.C.S. §13(a)*, there is nothing illegal per se about a company discriminating in price. Price discrimination means price difference and nothing more.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN8[] Robinson-Patman Act, Claims

The competitive injury requirement of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, in the context of a primary-line, non-geographic claim is not fundamentally different from an attempted monopolization claim under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*. Of course, the standards to evaluate competitive injury are different. The Robinson-Patman Act requires a showing of reasonable possibility of injury to competition while the Sherman Act requires a dangerous probability that the attempt to monopolize will be successful. However, this difference affects only the quantum of proof needed to satisfy the respective statute's competitive injury requirements and not the type of evidence which furnishes that proof.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN9[] **Robinson-Patman Act, Claims**

In a primary-line, non-geographic case under the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, the competitive injury evidence must consist of predatory pricing practices indicating a reasonable possibility of injury to competition and consumer welfare rather than evidence merely of injury to a competitor combined with bad intent. Absent some objective economic ability to injure competition conduct cannot be illegal no matter what the intent.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN10[] **Price Discrimination, Competitive Injuries**

The success of any predatory scheme depends on maintaining monopoly power for long enough both to recoup the predator's losses and to harvest some additional gain.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN11[] **Price Discrimination, Competitive Injuries**

Market power is the ability to raise prices above levels that would exist in a perfectly competitive market.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN12[] **Robinson-Patman Act, Claims**

Documentary evidence alone is not substantial evidence sufficient to satisfy the competitive injury requirement of the Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, absent some showing of market power and the possibility of recoupment.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN13[] Robinson-Patman Act, Claims

The Robinson-Patman Act, 15 U.S.C.S. § 13(a), is aimed only at price discrimination. A plaintiff must prove that the reasonable possibility of injury to competition was the effect of price discrimination, in order to establish the necessary causal relationship between the difference in prices and the alleged competitive injury.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN14[] Price Discrimination, Competitive Injuries

A plaintiff in a non-geographic antitrust suit cannot meet its burden of causation where low prices, not price discrimination, provide the only possible linkage to competitive injury.

Antitrust & Trade Law > Robinson-Patman Act > Remedies > Damages

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN15[] Robinson-Patman Act, Claims

In a private treble damage action brought under § 4 of the Clayton Act, 15 U.S.C.S. § 15(a), there is an additional causation requirement -- antitrust injury. Not only must a plaintiff prove that a defendant's price discrimination had a reasonable possibility of injuring competition, it also must prove that the price discrimination caused its complained-of damages. A private plaintiff may not recover damages simply by showing injury causally linked to an illegal presence in the market. Instead, it must prove it was injured by conduct violating the Robinson-Patman Act, 15 U.S.C.S. § 13(a). That is, the plaintiff must prove the existence of antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN16[] **Antitrust & Trade Law, Clayton Act**

Antitrust injury does not arise for purposes of § 4 of the Clayton Act, *15 U.S.C.S. § 15(a)*, until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct; in the context of pricing practices, only predatory pricing has the requisite anticompetitive effect. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN17[] **Robinson-Patman Act, Claims**

The Robinson-Patman Act, *15 U.S.C.S. § 13(a)*, should be conformed if at all possible to the standards governing the other antitrust laws.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN18[] **Price Discrimination, Competitive Injuries**

Predatory pricing may be defined as pricing below an appropriate measure of cost for the purpose of eliminating competitors in the short run and reducing competition in the long run.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN19[] **Price Discrimination, Competitive Injuries**

Cross-elasticity of demand is the extent to which products are reasonably interchangeable by consumers for the same purposes. Cross-elasticity of supply is the capability of other production facilities to be converted to produce a substitutable product.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN20[] **Price Discrimination, Competitive Injuries**

Where there is nothing economically distinct about a particular product line, the average variable cost test should not be applied to it.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN21[] Price Discrimination, Competitive Injuries

An examination of price-cost relationships should be made only in reference to the dangers posed by predatory pricing.

Civil Procedure > ... > Jury Trials > Jurors > Misconduct

Evidence > Weight & Sufficiency

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > Judgment Notwithstanding Verdict

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

HN22[] Jurors, Misconduct

A motion for a new trial is governed by a different standard than a motion for judgment notwithstanding the verdict. Under *Fed. R. Civ. P. 59*, a trial judge may weigh the evidence and consider the credibility of the witnesses and, if he finds the verdict is against the clear weight of the evidence, is based on false evidence or will result in a miscarriage of justice, he must set aside the verdict, even if supported by substantial evidence, and grant a new trial. A new trial may also be granted if the court believes it has erred in the admission or rejection of evidence, or improperly instructed the jury.

Opinion

[*347] MEMORANDUM OPINION

FRANK W. BULLOCK, JR., UNITED STATES DISTRICT JUDGE

Liggett Group, Inc., ("Liggett") brought this private antitrust suit to recover treble damages against Brown & Williamson Tobacco Corporation ("B & W") alleging predatory price discrimination in violation of *Section 2(a)* of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(a)*. [1] Liggett also charged that B & W

---

[1] *HN1*[] The Robinson-Patman Act states in pertinent part:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce, . . . and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

[*348] violated the unfair **[**2]** competition section of the Lanham Act, *15 U.S.C. § 1125(a)*, [2] **[**3]** as well as various state common law and statutory unfair trade practices. [3]

After a lengthy trial, [4] the jury returned a verdict in favor of Liggett on the Robinson-Patman Act claim in the amount of $ 49,600,000.00. When trebled pursuant to *15 U.S.C. § 15(a)*, Liggett's award totals $ 148,800,000.00, excluding post-judgment interest and attorneys' fees. The jury found that Brown & Williamson was not liable to Liggett on the trademark and unfair competition claims.

[4]** B & W has moved for judgment notwithstanding the verdict (JNOV) under *Federal Rule of Civil Procedure 50(b)* and, alternatively, for a new trial under *Federal Rule of Civil Procedure 59* on the antitrust portion of the case. [5] Liggett has moved for a new trial under *Federal Rule of Civil Procedure 59* on its trademark and unfair competition claims. After careful consideration, the court will set aside the antitrust verdict and grant B & W's motion for judgment notwithstanding the verdict. The court will deny B & W's alternative motion for a new trial. [6] Liggett's motion for a **[*349]** new trial on the trademark and unfair competition claims will be denied.

---

[2] ***HN2***[] *Section 1125(a)* states in relevant part:

> Any person who shall affix, apply, or annex, or use in connection with any goods or services, or any container or containers for goods, a false designation of origin, or any false description or representation, including words or other symbols tending falsely to describe or represent the same, and shall cause such goods or services to enter into commerce, and any person who shall with knowledge of the falsity of such designation of origin or description or representation cause or procure the same to be transported or used in commerce or deliver the same to any carrier to be transported or used, shall be liable to a civil action by any person doing business in the locality falsely indicated as that of origin or in the region in which said locality is situated, or by any person who believes that he is or is likely to be damaged by the use of any such false description or representation.

[3] Liggett's complaint alleges a statutory claim under the North Carolina unfair trade practices statute, *N.C.Gen.Stat. § 75-1 et seq*., and state common law claims under the North Carolina common law of trademarks and the North Carolina common law of unfair competition. All these claims stem from B & W's alleged infringement of Liggett's quality seal ("Q-seal") closure by B & W's oval closure seal.

[4] The jury heard evidence and arguments for 115 days, and considered 2,884 exhibits, 85 deposition excerpts, and testimony from 23 live witnesses. The verdict was returned after nine days of deliberations. The court's instructions to the jury on the antitrust claim were generally consistent with the legal position and theory espoused by Liggett. Some of the same issues and contentions had been considered by the court at summary judgment and/or the directed verdict stage of the trial, and resolved in Liggett's favor. In a complex case such as this, however, development of a complete record is sometimes necessary in order for the court to have a thorough understanding of the issues and facts in controversy. An ever expanding court docket does not always provide an atmosphere conducive to pre-trial analysis of complex economic and legal issues.

[5] A different standard applies to a JNOV motion pursuant to *Fed. R. Civ. P. 50(b)*, *see infra* [slip op.] at p. 8, than to a motion for a new trial pursuant to *Fed. R. Civ. P. 59*, *see infra* [slip op.] at p. 44.

[6] ***HN3***[] A court may in its discretion grant a JNOV motion and deny an alternative motion for a new trial. *See* *Fed. R. Civ. P. 50(c)(1)*; *Stone v. First Wyoming Bank, 625 F.2d 332, 349-50 (10th Cir. 1980)*; *Reagin v. Terry, 675 F. Supp. 297, 304-05 (M.D.N.C. 1986)*, *aff'd*, ***829 F.2d 36 (4th Cir. 1987)***. The court's JNOV rulings on competitive injury, causation, and antitrust injury are based upon interpretations of the applicable law. If these interpretations are found to be erroneous and an appellate court applies legal standards more favorable to Liggett, this court does not believe that an examination of the weight of the evidence, the credibility of witnesses, and any alleged errors in the admission or rejection of evidence or instructions to the jury would justify granting B & W a new trial. The only remaining significant issue concerns the sufficiency of Liggett's damage evidence. If antitrust injury is proven, courts are lenient in assessing the proof required to support a damage award. *See* *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 265-66, 90 L. Ed. 652, 66 S. Ct. 574 (1946)*; *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563-64, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*. Liggett presented two damage theories and extensive evidence from the testimony of two experts and other witnesses. The court believes there was sufficient evidence to support the jury's damage award.

[5]** I. FACTS

The cigarette industry in the United States during the mid-1980's provides the setting for this dispute. Six major manufacturers form this industry. [7] Philip Morris and R. J. Reynolds Tobacco Corp. ("RJR") are the industry giants. The other cigarette manufacturers hold substantially smaller market shares. Liggett and B & W compete for wholesale and retail customers across the United States. Both companies sell branded [8] **[**6]** and generic [9] cigarettes. At year-end 1985, B & W's total cigarette sales in the United States were about double Liggett's, although Liggett still sold more generic cigarettes than B & W.

The market shares of both companies have declined in recent years. Since 1975 when its market share was nearly seventeen per cent (17%), B & W's sales have steadily declined. Liggett has had even less success. Years ago, Liggett was a major force in the cigarette industry, enjoying market shares exceeding twenty per **[**7]** cent (20%). However, Liggett's sales declined precipitously for many years. By 1980, Liggett's market share stood at 2.33%, and the company was close to going out of business. Out of desperation, Liggett became the first major cigarette manufacturer to sell generic cigarettes. [10] Liggett encouraged its customers to buy large quantities of generic cigarettes by offering volume rebates so that the more a customer bought the less that customer paid on a per carton basis.

Generic cigarettes were an unqualified success for Liggett. The segment grew steadily, and by mid-1984 generic sales accounted for 4.1% of the total United States cigarette business **[**8]** with Liggett holding ninety-seven per cent (97%) of the segment. The popularity of generic cigarettes attracted other major cigarette manufacturers. In 1983, both RJR and B & W introduced "25's" in response to the success of generic cigarettes. [11] **[**9]** In May 1984, RJR also introduced "branded generics." [12] Later that month, B & W announced it would start selling black and white cigarettes positioned to compete directly with Liggett. B & W offered prospective customers volume rebates similar to Liggett's, only higher. Liggett responded by increasing its volume rebates. The rebate war between **[*350]** the companies continued for several more rounds. When the dust settled, B & W's published volume rebates were greater than Liggett's published volume rebates. [13] This rebate activity took place before B &

---

[7] The six major cigarette manufacturers are Philip Morris, Inc., R. J. Reynolds Tobacco Corp., B & W, Lorillard, Inc., American Tobacco Co., and Liggett. A few other domestic and foreign firms have sold cigarettes in the United States during the 1980's, but none has attained any significance in the marketplace.

[8] The term "branded cigarettes" describes full-price cigarettes targeted to the image-conscious cigarette consumer. Branded cigarettes are advertised heavily and packaged in containers with distinctive designs. Well-known branded cigarettes include Newport, Pall Mall, Kool, Winston, and, of course, Marlboro -- America's most popular branded cigarette by a wide margin.

[9] The term "generic cigarettes" refers to a catch-all category of cigarettes priced significantly lower than branded cigarettes. Within this category, sometimes called the price-value category, there are different types of generic cigarettes. This dispute centers around one such type -- black and white cigarettes. Black and white cigarettes are sold in plain-looking white packages with black lettering indicating the nature of the product contained within (*e.g.*, "Filter Cigarettes"). These packages look like other generic products on the grocery shelf so that consumers can quickly identify them as lower-priced cigarettes. Another category of generic cigarettes is "branded generics." Branded generics are cigarettes in branded packaging but priced in the black and white cigarette range.

[10] Liggett was not the first cigarette company to sell generic cigarettes. Both U.S. Tobacco Co. and G. A. George Georgopulo & Co., smaller cigarette manufacturers with no significant market share, sold generic cigarettes prior to Liggett. However, once Liggett entered the generic category it became the dominant player and was responsible for the segment's initial growth.

[11] "Twenty-five's" ("25's") are cigarettes priced and packaged like branded cigarettes but with twenty-five cigarettes contained in each package instead of the standard twenty. RJR introduced Century and B & W introduced Richland as entries in the "25's" category.

[12] RJR repositioned Doral, a brand which had previously been unsuccessful competing with other branded cigarettes, by lowering the price to generic levels. Since May 1984, Doral's market share has grown considerably.

W sold its first generic cigarette. B & W began selling generic cigarettes in July 1984, giving rise to this lawsuit in which Liggett alleges that, until the end of 1985, B & W engaged in a predatory pricing campaign designed to "kill" the generic cigarette category.

Today generic cigarettes are a fixture in the cigarette market. Five of the six major cigarette companies have significant entries in the category [14] and growth has been steady. The growth of generic cigarettes has encouraged additional competition, primarily in the form of couponing and stickering, **[**10]** [15] on branded cigarettes.

II. THE ANTITRUST ISSUES

HN4[] B & W's JNOV motion may be granted only if, taking all the evidence in the light most favorable to Liggett, there is no substantial evidence to support the jury's verdict. *Evington v. Forbes, 742 F.2d 834, 835 (4th Cir. 1984)*. Evidence is substantial if it is "of such quality and weight that reasonable and fair-minded men in the exercise of impartial **[**11]** judgment could reasonably return a verdict for the nonmoving party." *Wyatt v. Interstate & Ocean Transp. Co., 623 F.2d 888, 891 (4th Cir. 1980)*. However, a mere scintilla of evidence is insufficient to sustain a verdict. *Austin v. Torrington Co., 810 F.2d 416, 420* (4th Cir.), *cert. denied*, *484 U.S. 977, 98 L. Ed. 2d 487, 108 S. Ct. 489 (1987)*. Therefore, in order to warrant JNOV, B & W must show that Liggett has failed to prove an essential element of its claim.
