HN2[] **Ownership, Employee Inventions & Shop Rights**

The doctrine of shop rights has its origins in equity. A shop right is an employer's nonexclusive right to use an employee's patented process or invention that was developed during the employee's hours of employment. The right is based on the employer's presumed contribution to the invention through materials, time, and equipment.

Judges: Herbert Y. C. Choy, William C. Canby, Jr., and William A. Norris, Circuit Judges.

Opinion by: CANBY

Opinion

[*401] CANBY, Circuit Judge:

Harry Gould appeals the decisions in two cases that have been consolidated on appeal. In the first case, the district court held that California Eastern Laboratories (CEL) has a shop right in a patent owned by Gould. In the second, the court dismissed counts in Gould's complaint which charged CEL with violations of the antitrust laws, *15 U.S.C. §§ 1* and *2* and *Ariz.Rev.Stat. §§ 44-1402* and 1403. Gould also seeks attorneys' fees pursuant to *35 U.S.C. § 285*. We affirm the decisions of the lower court in both actions and deny attorneys' fees.

FACTUAL BACKGROUND

These disputes arose out of a series of contracts entered into by Gould with a number of companies that now are **[**2]** owned in whole or part by CEL. In April 1982, Gould entered into a contract with Neil Smith, who was doing business as Phoenix Microwave, to design a low noise amplifier module (LNA), a device which is useful in Television Receive Only amplifiers (TVRO's). In July 1982, Gould entered into a contract with CEL to do further work and testing to ready the LNA for market. Several days later, on July 21, 1982, CEL purchased all of the business and assets of Phoenix Microwave, including the Gould LNA design.

Two months later, Gould filed an application for a patent covering the improvements he had developed while designing LNA's. The patent, U.S. Patent No. 4,480,240 (240), issued in October 1984. On July 20, 1984, an application for the second patent in suit, covering additional improvements in LNA's, was filed. The application **[*402]** bore Gould's name, but was prepared by a CEL subsidiary. That patent, U.S. Patent No. 4,631,494 (494), issued in December 1986.

The cases represented by these appeals began with an action brought by CEL to settle ownership of the two patents at issue. **[***1985]** In that case (No. 85-251), the district court ruled on cross-motions for summary judgment that Gould **[**3]** was the proper owner of both patents but that CEL retained a "shop right" in each.

Following the summary judgment order, Gould sought to assert a counterclaim against CEL for violations of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* & *2*, seeking treble damages under section 4 of the Clayton Act, *15 U.S.C. § 15*. He also sought to assert comparable claims under state law. The district court denied Gould leave to file his counterclaim. Gould subsequently brought the same claims in the form of a new and separate action (No. 87-1162) against CEL and its subsidiary Microwave Systems Engineering, Inc. (MSE). CEL and MSE immediately responded by moving to dismiss Gould's complaint pursuant to *Fed.R.Civ.P. 12(b)(6)*. The district court granted the motion with leave to amend. Gould thereafter filed his First Amended Complaint, which CEL and MSE again moved to dismiss. The district court dismissed counts 2 and 3 without leave to amend. After the district court certified that its order was final pursuant to *Fed.R.Civ.P. 54(b)*, Gould filed his appeal.

Gould initially filed an appeal of the partial summary judgment ruling in case No. 85-251 in **[**4]** the Court of Appeals for the Federal Circuit. The Federal Circuit transferred the appeal to this court to consolidate the shop right issue with those issues raised in the appeal of the dismissal of Gould's claims in No. 87-1162.

ANALYSIS

A. *Shop Rights to Patents Nos. 240 and 494*

HN1[] This court reviews a grant of summary judgment *de novo.* *Ashton v. Cory, 780 F.2d 816, 818 (9th Cir. 1986)*. We can affirm the trial court's finding that CEL has a shop right in Gould's patents only if, viewing the evidence in the light most favorable to Gould, we conclude that there are no genuine issues of material fact. *Id.*

HN2[] The doctrine of shop rights has its origins in equity. A shop right is an employer's nonexclusive right to use an employee's patented process or invention that was developed during the employee's hours of employment. The right is based on the employer's presumed contribution to the invention through materials, time, and equipment. *See* *U.S. v. Dubilier Condenser Corp., 289 U.S. 178, 188-89, 77 L. Ed. 1114, 53 S. Ct. 554 (1933)*. **[**5]**

Gould concedes that Phoenix Microwave obtained shop rights to both patents through Gould's work under contract in 1982. Those rights passed to CEL when it purchased the entire business and assets of Phoenix Microwave in July 1982. *See* *PPG Industries, Inc. v. Guardian Industries Corp., 597 F.2d 1090, 1094* (6th Cir.), *cert. denied*, *444*

U.S. 930, 62 L. Ed. 2d 187, 100 S. Ct. 272 (1979); *Neon Signal Devices v. Alpha-Claude Neon Corp., 54 F.2d 793, 796 (D.C.Pa. 1931)*; *Gate-Way, Inc. v. Hillgren et al., 82 F. Supp. 546, 555 (S.D.Cal. 1949)*, *aff'd per curiam*, *181 F.2d 1010 (9th Cir. 1950)*.

Gould presented no evidence in the record to show that CEL did not purchase all of Phoenix Microwave. He argues simply that CEL did not continue the Phoenix Microwave business because it distributed the assets to various existing subsidiaries. This argument attempts to make from the formalities of modern business organization a distinction that is unsuited to the equitable origins of the shop right concept. Gould presents no authority suggesting that the particular form of incorporating the purchased company into **[**6]** the CEL structure is germane.

> Unassignable licenses may sometimes be invoked by persons who are not exactly identical with the licensees. A railroad company which was formed by the consolidation of prior railroad companies, may invoke the licenses which were given **[*403]** to either of its constituent corporations. . . .

Gate-Way, Inc. v. Hillgren, 82 F. Supp. at 554-55 (quoting 1 *Walker on Patents*, 437 (6th ed.)).

Gould also attempts to invalidate CEL's shop right by arguing that CEL was involved in a fraudulent application for the second patent, No. 494, and thus has "unclean hands." Gould has offered no authority to support his claim that fraud in a later patent application invalidates a pre-existing shop right. The fact that fraud could invalidate the later patent itself is of no assistance to Gould. He owns the patent. To the extent that fraud may vitiate the patents, it would also make shop rights unnecessary. CEL could manufacture at will.

B. *Gould's Antitrust Claim*

Gould argues that the district court erred in dismissing his antitrust complaint for failure to state a claim under *Rule 12(b)(6)*. **[**7]** ***HN3***[] We review de novo a district court's dismissal pursuant to *Rule 12(b)(6)*. *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 732 (9th Cir. 1987)*. **[***1986]**

Gould relies on *Walker Process Equipment Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*, to establish his antitrust claim. In *Walker Process* the Supreme Court held that "the enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present." *Id. at 174*. Gould's attempt to fit this case into a *Walker Process* action fails. *Walker Process* was an infringement action based on a claim that the defendants had sought to enforce the patent as a means to restrain competition. This case, on the other hand, began as a declaratory judgment action to determine actual ownership of the patent. This is not the kind of anticompetitive enforcement at which the antitrust laws are aimed. Gould has not alleged that CEL actually attempted to enforce the patents. Moreover, since the district court **[**8]** determined that the patents belong to Gould, CEL cannot enforce them. Without some effort at enforcement, the patent cannot serve as the foundation of a monopolization case. Gould has offered no other sufficient basis for his antitrust claim on this appeal. We accordingly conclude that the district court was correct in granting CEL's motion to dismiss Gould's antitrust claims.

HN4[] Arizona ***antitrust law*** is interpreted in accordance with federal law. *See* *Ariz.Rev.Stat.Ann. § 44-1412*; *Johnson v. Pacific Lighting Land Co., 817 F.2d 601, 604 (9th Cir. 1987)*, *cert. denied*, *484 U.S. 1062, 108 S. Ct. 1020, 98 L. Ed. 2d 985 (1988)*. Therefore, for the reasons stated above, we also uphold the district court's dismissal of Gould's state claims.

C. *Attorneys' Fees*

35 U.S.C. § 285 ***HN5***[] authorizes the court to award reasonable attorneys' fees in an "exceptional case." Gould has not prevailed on any issue entitling him to fees. *Section 285*, moreover, applies **[**9]** only to infringement actions. The alleged fraud here is unconnected to any infringement claim. Gould's request for fees is denied.

CONCLUSION

The judgments of the district court are AFFIRMED.

Judges: Richard A. Gadbois, Jr., United States District Judge.

Opinion by: GADBOIS, JR.

Opinion

[*934] AMENDED MEMORANDUM OPINION AND ORDER RICHARD A. GADBOIS, JR., UNITED STATES DISTRICT JUDGE

Plaintiff George M. Austin, M.D. ("Dr. Austin"), is a neurosurgeon and brings this action alleging violations of the Sherman Antitrust Act, *15 U.S.C.A. §§ 1*, *2 (1982)*, and pendent state business tort claims against five individual physicians and the Santa Barbara Cottage Hospital ("Cottage Hospital"). Plaintiff's claims arise out **[**2]** of the alleged conspiracy and concerted actions of the individual Defendant physicians to shut down Dr. Austin's neurosurgery practice in Santa Barbara by having his staff privileges suspended at Cottage Hospital.

The three Motions for Summary Judgment pursuant to *F.R.Civ.P. 56* brought by the various Defendants came on regularly for hearing before this Court on October 30, 1989. Defendant Cottage Hospital brings the "main" Summary Judgment Motion, asserting that it is immune from federal antitrust liability by virtue of the provisions of the Health Care Quality Improvement Act of 1986 ("HCQIA"), *42 U.S.C.A. §§ 11101 et seq. (West Supp. 1989)*. Alternatively, Defendant Cottage Hospital **[*935]** argues that summary judgment is appropriate since Plaintiff Dr. Austin is unable to invoke Sherman Act jurisdiction on the facts of his case.

All five individual Defendant physicians join in Cottage Hospital's Motion for Summary Judgment. Defendants Dr. Jones and Dr. St. John each bring their own Motions for Summary Judgment on grounds very similar to those asserted by Defendant Cottage Hospital. Finally, Defendant Dr. Jones joins in Defendant Dr. St. John's Summary Judgment Motion.

Having carefully **[**3]** considered the voluminous moving papers, opposition papers, declarations, exhibits, and the oral arguments of counsel, the Court grants the Summary Judgment Motions of the Defendants Cottage Hospital, Dr. Jones, and Dr. St. John for the reasons enumerated below.

FACTUAL BACKGROUND

Plaintiff Dr. Austin spent the first 30 years of his medical career in academia as an instructor and professor of neurosurgery at the Universities of Pennsylvania, Oregon, Southern California, and at Loma Linda University School of Medicine. Upon retiring at the age of 65 from the chairmanship of the Loma Linda Neurosurgery Department, Dr. Austin moved to Santa Barbara, California in 1981 to establish a private practice for the first time since becoming a board-certified neurosurgeon back in 1952.

When Plaintiff arrived in Santa Barbara in 1981, there were only three other practicing neurosurgeons in the area, Defendants Dr. Brown, Dr. St. John, and Dr. Schweinfurth. The patient-to-neurosurgeon ratio in Santa Barbara was already close to saturation when Plaintiff arrived to set up shop. Defendant Dr. Jones came to Santa Barbara a few months after the Plaintiff and established his own neurosurgery practice.

[4]** Plaintiff Dr. Austin held staff privileges at a number of local hospitals, among them, Defendant Cottage Hospital. Cottage Hospital is the best-equipped hospital in the Santa Barbara area for neurosurgery. All five of the individual doctor Defendants were on staff at Cottage Hospital during the relevant time period. The Plaintiff's claims for violations of the Sherman Act, intentional interference with prospective business advantage, and conspiracy to commit these acts are based on the following factual allegations:

Dr. Austin alleges in his Complaint that although the Defendant neurosurgeons often "covered" patients for each other, shortly after his arrival, all of them refused to "cover" for the Plaintiff. In his deposition, however, Dr. Austin admits that Defendants Dr. Brown, Dr. Jones, and Dr. Schweinfurth did in fact "cover" for him, but only a few times over a seven-year period. Defendant Dr. St. John is the only one who has refused to "cover" for the Plaintiff from the outset and has never done so. In October of 1986, Dr. Brown sent the Plaintiff a letter confirming that he would never "cover" for Dr. Austin again.

The Plaintiff admits that "covering" patients for other physicians **[**5]** is merely professional courtesy and that there is no legal or ethical obligation to do so. With the exception of Dr. St. John, the other Defendant neurosurgeons testified in their depositions that they "covered" for the Plaintiff when their schedules allowed them to, and attributed any refusals to scheduling conflicts or last-minute notice. Plaintiff Dr. Austin admits that he has refused to "cover" or assist the various Defendant neurosurgeons on occasion due to scheduling conflicts.

As additional evidence of the conspiracy against him, Plaintiff alleges that Defendants Dr. Jones and Dr. St. John "openly demeaned [his] work to nurses on staff at Cottage Hospital in order to develop animosity over [sic] him." Dr. Austin also contends that the Defendant neurosurgeons would "aggressively attack" his judgment at various monthly Cottage Hospital neurosurgical group meetings. The Defendant neurosurgeons counter that there were legitimate concerns with the Plaintiff's treatment of patients at Cottage Hospital.

[*936] On January 1, 1986, Defendant Dr. McNamara, an internal medicine specialist, became Chief of Staff at Cottage Hospital and Defendant Dr. Brown became the Chief of Surgery. Plaintiff **[**6]** alleges that this turn of events, in addition to the fact that Defendant Dr. St. John's wife sat on Cottage Hospital's Board of Directors, gave the Defendants the power and ability "to expedite the process of excluding [him] from the practice of neurosurgery in Santa Barbara."

On January 29, 1986, Defendant Dr. McNamara, as Chief of Staff, informed Plaintiff that an internal evaluation of his cases would take place. This was done in response to concerns expressed by the nursing and technical staffs, as well as Dr. Austin's colleagues, about the quality of care some of the Plaintiff's patients were receiving. Defendant Dr. McNamara instructed his Chief of Surgery, Defendant Dr. Brown, to review all of the Plaintiff's cases in 1985.

On April 24, 1986, Defendant Dr. Brown presented his findings to Cottage Hospital's Surgical Audit Committee ("SAC"). Defendant Dr. Schweinfurth sat as a member of the SAC. In his presentation, Dr. Brown outlined what he perceived to be deficiencies in 26 out of the 30 cases handled by the Plaintiff in 1985. Dr. Brown also presented three additional "problematic" cases from 1986 to the SAC. The SAC voted to have an outside reviewer further evaluate Dr. Austin's **[**7]** charts and to continue monitoring his work.

On June 10, 1986, Chief of Staff Dr. McNamara requested Cottage Hospital's Medical Executive Committee ("MEC") to establish an *Ad Hoc* Committee ("AHC") of five doctors to investigate concerns voiced by the staff that Plaintiff Dr. Austin was providing substandard care to his patients at the Hospital. Defendant Dr. Jones served on the AHC which met four times between June 25, 1986 and August 15, 1986 to discuss the possible revocation of Plaintiff's staff privileges at Cottage Hospital.

In addition to the internal investigation by the AHC, Defendant Dr. McNamara also had an external, independent review conducted by Dr. Sidney Tolchin and Dr. David G. Sheetz, two neurosurgeons appointed by the California Medical Association. Dr. Tolchin and Dr. Sheetz spent a day at Cottage Hospital talking to various staff members and reviewing Dr. Austin's charts. The outside reviewers also spent an hour and a half interviewing Dr. Austin himself. Both Dr. Tolchin and Dr. Sheetz gave the Plaintiff a generally favorable evaluation, but both expressed serious concerns in some areas and recommended further monitoring. [1]

---

[1] Plaintiff also asserts that the outside reviewers may have been part of the alleged conspiracy against him based solely on the fact that he was not present when Dr. Tolchin and Dr. Sheetz met with Defendants Dr. McNamara, Dr. Brown, and Dr. Jones at the beginning of their day-long review.

[8]** On August 15, 1986, after considering the findings of the independent reviewers, the *Ad Hoc* Committee voted to establish a six-month period of monitoring of the Plaintiff's cases by the Surgical Audit Committee. As a member of the AHC, Defendant Dr. Jones recommended and voted for the continued monitoring. From August 15, 1986 to November 16, 1986, five of the Plaintiff's cases were reviewed by the SAC. Defendant Dr. St. John reviewed three cases and Defendants Dr. Brown and Dr. Jones reviewed one each.

On November 17, 1986, Defendant Dr. McNamara, as Chief of Staff, informed Plaintiff that his staff privileges at Cottage Hospital were summarily suspended. This action was taken after Dr. McNamara had presented certain cases handled by Dr. Austin to the Medical Executive Committee. These cases had been monitored by members of the SAC since early October of 1986. On November 19, 1986, Plaintiff appeared before the MEC to defend his actions in the three cases that Defendant Dr. St. John had reviewed and found substandard, as well as the case of patient C.P. that Defendant Dr. Jones declared substandard. Following the discussion, the MEC passed a motion recommending to the Board of **[**9]** **[*937]** Directors corrective action to revoke the clinical privileges of Dr. Austin. Chief of Staff Dr. McNamara notified Plaintiff of this action by a letter dated November 20, 1986.

In a letter dated December 3, 1986 ("December 3rd Letter"), Dr. Robert A. Reid, Vice President of the Medical Staff, advised Plaintiff that the reason for the recommendation was that his professional conduct was lower than the applicable standard of practice. The December 3rd Letter set out 14 specific categories of allegedly substandard practice with patient chart numbers designated as to each specification. The December 3rd Letter alleges 103 instances of substandard professional conduct on the part of Dr. Austin.

California Business & Professions Code § 805 requires any disciplinary action affecting a physician practicing in the state be reported to the California Board of Medical Quality Assurance ("BMQA"). Defendant Cottage Hospital complied with this requirement on January 13, 1987 by sending a "Health Facility Reporting Form 805" containing the Plaintiff's name, a description of the reasons for the summary suspension, and other appropriate information to the BMQA.

Plaintiff Dr. Austin's suspension from **[**10]** Cottage Hospital lasted approximately seven months, from November 19, 1986 to June 3, 1987. During this time, Plaintiff continued to enjoy staff privileges at several other local hospitals including St. Francis, Goleta Valley, Santa Ynez, Lompoc, and Ojai. Plaintiff continued to see patients during this time period and performed neurosurgery at St. Francis Hospital while suspended from Cottage Hospital.

Plaintiff requested and received a hearing before the Judicial Review Committee ("JRC") to appeal the revocation of his staff privileges. The JRC was comprised of six impartial doctors and the Honorable William Reppy, retired Justice of the California Appeals Court presided over the hearings. Plaintiff admits that he was given adequate time to prepare and present all the witnesses and evidence he desired.

Both sides were represented by counsel at the JRC hearings which began on March 16, 1987. Defendants Dr. Brown, Dr. Jones, and Dr. Schweinfurth all testified before the JRC panel. By the time the hearings concluded on May 14, 1987, the JRC had heard over 70 hours of testimony requiring 12 volumes of transcripts and exhibits. The panel had approximately one week to individually review **[**11]** the transcripts, exhibits, and final written arguments for both sides. The panel reconvened on June 23, 1987 and deliberated from 8 p.m. until a final decision was reached around midnight.

The JRC issued its final report and recommendations on June 30, 1987. The JRC found that the MEC's decision to revoke the Plaintiff's staff privileges "was unreasonable" and reinstated Dr. Austin to the Cottage Hospital medical staff. The JRC's findings, however, were far short of complete vindication for the Plaintiff. The JRC found Dr. Austin's treatment of patient C.P. to be "below the applicable standard" and expressed concern in several other areas. [2]

---

[2] "In the case of patient C.P., the Committee feels that Dr. Austin's failure to ascertain and to respond to the change in the patient's state of consciousness after admission to the Intensive Care Unit and failure to examine the patient resulted in loss of a valuable opportunity to diagnose a possibly reversible post-operative bleeding complication and that in this respect the

[12]** In reinstating the Plaintiff, the JRC concluded "that the totality of problems reasonably warrants some appropriate conditions **[*938]** on the continued exercise of clinical privileges by Dr. Austin." JRC Final Report, at 3. Specifically, the JRC recommended to the Board of Directors of Cottage Hospital:

> that the continued exercise of clinical privileges by Dr. Austin be conditioned in two respects:
>
> 1) for assurance of proper patient management, that Dr. Austin obtain Internal Medicine, Pathology and Radiological procedural consultations;
>
> 2) that there be periodical outside independent neurosurgical case review. The Committee feels that it has been demonstrated that objective monitoring by the neurosurgeons of Cottage Hospital could not be done.

JRC Final Report, at 4. While the Plaintiff attempts to gloss over these conditions on his staff privileges in his papers, there is no question that these are significant restrictions that are out of the ordinary for a surgeon of Plaintiff's experience.

On October 2, 1987, Defendant Dr. McNamara sent the BMQA a revised "Health Facility Reporting Form 805" to reflect Dr. Austin's conditional reinstatement. California law provides a process **[**13]** by which an individual in Dr. Austin's position can appeal the findings of quasi-judicial body, such as the JRC, to the state courts. *Cal.Civ.Proc.Code § 1094.5* (West Supp. 1990). Plaintiff has accepted the findings of the JRC and has made no attempt to overturn the restrictions placed on his staff privileges.

CONCLUSIONS OF LAW

The Court finds no genuine issue of material fact precluding the application of the Health Care Quality Improvement Act of 1986 ("HCQIA"), *42 U.S.C.A. §§ 11101 et seq.*, to this action. As a matter of law, the Court holds that all five of the individual doctor Defendants, as well as Defendant Cottage Hospital, qualify for immunity from federal antitrust liability pursuant to the provisions of the HCQIA. The Court therefore grants the three Defendants' Motions for Summary Judgment because "***HN1***[] under *Rule 56(c)*, summary judgment is proper 'if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law.'" *Celotex Corp. v. Catrett, 477 U.S. 317, 106 S. Ct. 2548, 2552-53, 91 L. Ed. 2d 265 **[**14]** (1986)*.

I. *Immunity under the Health Care Quality Improvement Act*

This appears to be a case of first impression in which the Defendants in a federal antitrust action seek summary judgment by asserting immunity under the provisions of the HCQIA. "Neither the Act nor its legislative history indicates at which point in the litigation the court should determine whether the defendants qualify for protection." Note, *Physician Staff Privilege Cases: Antitrust Liability and the Health Care Quality Improvement Act*, 29 W & M L.Rev. 609, 628 (1988) (authored by John Neff). The only commentator so far on the HCQIA suggests that "the most effective point at which to decide [whether there is immunity] is prior to full trial on the antitrust issues," *Id*., which happens to be the current procedural posture of this action.

In passing the HCQIA in 1986, the United States Congress made the following findings:

> (1) The increasing occurrence of medical malpractice and the need to improve the quality of medical care have become nationwide problems that warrant greater efforts than those that can be undertaken by any individual State.
>
> (2) There is a national need to restrict the ability **[**15]** of incompetent physicians to move from State to State without disclosure or discovery of the physician's previous damaging or incompetent performance.
>
> (3) This nationwide problem can be remedied through effective professional peer review.

---

professional conduct of Dr. Austin was below the applicable standard. * * * In the case of patient P.H., the Committee feels that the failure of Dr. Austin to obtain an adequate biopsy resulted in excess morbidity. * * * In the case of patient C.C., the Committee feels that a more careful management process, including an evaluation of abnormal laboratory findings, was in order. * * * In the case of patient E.H., there was extensive discussion and concern by the Committee. * * * In the case of patient C.H., the failure of Dr. Austin to obtain informed consent and his failure to document pre-operatively the "promise not to injure" were cause for concern for the Committee." *Report and Recommendation of the Judicial Review Committee of Santa Barbara Cottage Hospital Medical Staff in the Matter of George M. Austin, M.D.* ("JRC Final Report"), at 3.

(4) The threat of private money damage liability under Federal laws, including treble damage liability under Federal ***antitrust law***, unreasonably discourages **[*939]** physicians from participating in effective professional peer review.
(5) There is an overriding national need to provide incentive and protection for physicians engaging in effective professional peer review.

42 U.S.C.A. § 11101.

HN2[] The "incentive and protection for physicians engaging in effective professional peer review" comes in the form of immunity from damages under federal and state law for qualifying review bodies and individuals associated with, or assisting, the professional review action. *42 U.S.C.A. § 11111(a)(1)*. [3] The Court must first determine that the professional review action itself complies with the due process requirements outlined in *§ 11112(a)* before the review body and the individuals assisting in the process can be granted the immunity from federal antitrust liability **[**16]** that *§ 11111(a)(1)* promises.

The Court finds that there are two separate professional review actions at issue in this case. The first one being the meeting of Cottage Hospital's Medical Executive Committee on November 19, 1986 ("November 19th MEC Meeting"), where the MEC passed a motion to recommend to Cottage Hospital's Board of Directors that Plaintiff's staff privileges be revoked. The November 19th MEC Meeting is a "professional review **[**17]** action" as defined in *§ 11151(9)*. [4] The series of Judicial Review Committee hearings ("JRC Hearings"), that ran from March 16, 1987 through May 14, 1987 and resulted in the conditional reinstatement of Plaintiff's staff privileges constitutes the second "professional review action" as defined in *§ 11151(9)*.

II. *Requirements to Qualify for Immunity Under the HCQIA*

The Defendants can qualify for immunity under the HCQIA if they can demonstrate that:

A) the professional review actions complied with the standards set forth in *42 U.S.C.A. § 11112*;

B) the results of the professional review **[**18]** actions were properly reported to the State authorities in compliance with *42 U.S.C.A. §§ 11131(c)(1)*, *11151(2)*;
C) the professional review actions occurred on, or after November 14, 1986, the effective date of the HCQIA.

As detailed below, the Defendants have successfully shown that both professional review actions have complied with each of these three requirements.

---

[3] *Section 11111* provides in pertinent part: "(a) In general (1) Limitation on damages for professional review actions

If a professional review action (as defined in *section 11151(9)* of this title) of a professional review body meets all the standards specified in *section 11112(a)* of this title, except as provided in subsection (b) of this section --

(A) the professional review body,

(B) any person acting as a member or staff to the body,

(C) any person under a contract or other formal agreement with the body, and

(D) any person who participates with or assists the body with respect to the action,

shall not be liable in damages under any law of the United States or of any State (or political subdivision thereof) with respect to the action.

[4] Section ***HN3***[] 11151(9) provides in pertinent part: "The term 'professional review action' means an action or recommendation of a professional review body which is taken or made in the conduct of professional review activity, which is based on the competence or professional conduct of an individual physician (which conduct affects or could affect adversely the health or welfare of a patient or patients), and which affects (or may affect) adversely the clinical privileges . . . of a physician. Such a term includes . . . professional review activities relating to a professional review action."

A. Standards for Professional Review Actions

1. Section 11112(a)(1) *Analysis*

HN4[] In order to satisfy the due process requirements as outlined in 42 U.S.C.A. § 11112(a)(1)-(4), [5] the Defendants must **[*940]** first show that the professional review actions were taken "in the reasonable belief that the action was in the furtherance of quality health care." § 11112(a)(1). The legislative history indicates that this standard was not intended to test "the subjective state of mind of the physicians conducting the professional review." H.R.Rep. No. 903, 99th Cong., 2d Sess. 10, *reprinted in* 1986 U.S.Code Cong. & Admin.News 6384, 6392-93. This "more objective 'reasonable belief' standard . . . will be satisfied if the reviewers, with the information available to them at the time of the professional review action, would reasonably **[**19]** have concluded that their action would restrict incompetent behavior or would protect patients." *Id.*, at 6393.

With regards to the November 19th MEC Meeting, the Court is satisfied that the MEC voted to revoke the Plaintiff's staff privileges in the interest of furthering quality health care at Cottage Hospital. The Defendant doctors came to believe that the Plaintiff's treatment in various cases was below the acceptable standard of care at Cottage Hospital through their own observations and from **[**20]** concerns voiced by the nursing and technical staffs. This concern for patient safety prompted nearly ten months' worth of both internal and external evaluations and monitoring of the Plaintiff's cases conducted by the Defendant neurosurgeons and other members of Cottage Hospital's Surgical Audit Committee and *Ad Hoc* Committee, as well as the two neurosurgeons appointed by the California Medical Association who had no connection to Cottage Hospital. All of the findings from these numerous evaluations and periods of monitoring were considered before the MEC voted to revoke the Plaintiff's staff privileges.

The Court also finds that the JRC Hearings were conducted "in the reasonable belief that the action was in furtherance of quality health care." § 11112(a)(1). After hearing over 70 hours of testimony at the JRC Hearings that extended from March 16, 1987 to May 14, 1987, the independent panel of five voting (six physicians sat on the panel during the hearings) physicians concluded that "the totality of problems reasonably warrants some appropriate conditions on the continued exercise of clinical privileges by Dr. Austin." JRC Final Report, at 3. The nature of the conditions placed **[**21]** on Plaintiff's reinstatement, that he obtain consultations in internal medicine, pathology, and radiology, and that his cases be periodically monitored by outside independent neurosurgeons, demonstrates that it was the JRC's intent to "restrict incompetent behavior" and "protect patients" through their recommendations.

2. Section 11112(a)(2) *Analysis*

HN5[] The Defendants must next demonstrate that there was a "reasonable effort to obtain the facts of the matter" before the professional review actions were undertaken. § 11112(a)(2). As more fully detailed in the Factual Background section, the November 19th MEC Meeting was the culmination of nearly ten months' worth of evaluations and monitoring of the Plaintiff's work. These reviews were conducted internally by the Defendant

---

[5] Section 11112(a) provides in pertinent part:

"(a) In General

For purposes of the protection set forth in section 11111(a) of this title, a professional review action must be taken --

(1) in the reasonable belief that the action was in the furtherance of quality health care,

(2) after a reasonable effort to obtain the facts of the matter,

(3) after adequate notice and hearing procedures are afforded to the physician involved or after such other procedures as are fair to the physician under the circumstances,

(4) in the reasonable belief that the action was warranted by the facts known after such reasonable effort to obtain facts and after meeting the requirement of paragraph (3)."

neurosurgeons as well as the other physicians on Cottage Hospital's Surgical Audit Committee and *Ad Hoc* Committee.

A comprehensive, external review of the Plaintiff's work was conducted by Dr. Tolchin and Dr. Sheetz, two independent neurosurgeons appointed by the California Medical Association. These outside reviewers spent an entire day at Cottage Hospital reviewing the Plaintiff's charts as well as interviewing **[**22]** officials of the hospital staff and Dr. Austin himself. With regards to the JRC Hearings, Dr. Austin admits that he was allowed adequate time to prepare and was able to present all of the witnesses and evidence he desired to the panel. The Court concludes that both the November 19th MEC Meeting and the JRC Hearings were preceded by very diligent efforts to gather the relevant facts in compliance with *Section 11112(a)(2)*.

[*941] 3. *Section 11112(a)(3) Analysis*

HN6[] *Section 11112(a)(3)* requires that the professional review actions comply with the due process requirements of "adequate notice and hearing" in order to merit immunity. [6] The notice procedures outlined in *§ 11112(b)(1)-(2)* contemplate the professional review action being initiated by the health care entity, thereby necessitating adequate notice to the targeted physician. The facts of this case however, are somewhat unique in that Plaintiff requested a second professional review action, the JRC Hearings, to appeal the outcome of an earlier professional review action, the November 19th MEC Meeting.

While the legislative history indicates that "the due process requirement can always be met by the procedures specified in *[§ 11112(b)]*," **[**23]** 1986 U.S.Code Cong. & Admin.News, at 6393, both the text of *§ 11112(b)* and the legislative history agree that these procedures need not be followed to the letter in order to satisfy the due process requirement. [7] Taking into consideration the factual twist in this case, the Court concludes that under these circumstances, the closing paragraph of the December 3rd Letter gave Plaintiff sufficient notice of the JRC Hearings. [8]

[24]** The Court further finds that the JRC Hearings were conducted in compliance with the procedures outlined in *§ 11112(b)(3)(A)-(D)*, thereby satisfying the "adequate hearing" requirement of subsection (a)(3). First off, Plaintiff admits that he was afforded a "fair and impartial hearing." The JRC Hearings were held before a panel of six impartial, independent physicians appointed by the Cottage Hospital, none of whom were in direct economic competition with the Plaintiff. *§ 11112(b)(3)(A)(iii)*.

Dr. Austin was represented throughout the hearings by counsel and all of the proceedings were recorded by court reporters and 12 volumes of transcripts were produced. *§ 11112(b)(3)(C)(i)*, *(ii)*. Plaintiff admits that he was given the opportunity to call witnesses and to present all of the evidence he desired. *§ 11112(b)(3)(C)(iii)*, *(iv)*. Plaintiff submitted a written statement at the close of the hearings on June 15, 1987, and the JRC issued its final report and recommendations along with the underlying reasoning on June 30, 1987. *§§ 11112(b)(3)(C)(v)*, *11112(b)(3)(D)(i)*.

---

[6] *Section 11112(a)(3)* provides that in order for a professional review action to merit immunity, it must be taken: "(3) after adequate notice and hearing procedures are afforded to the physician involved or after such other procedures as are fair to the physician under the circumstances, ..."

[7] *Section 11112(b)* provides: "A professional review body's failure to meet the conditions described in this subsection shall not, in itself, constitute failure to meet the standards of *[§ 11112(a)(3)]*." The legislative history concurs, noting: "If other procedures are followed, but are not precisely of the character spelled out in *[§ 11112(b)]*, the test of 'adequacy' may still be met under other prevailing law." 1986 U.S.Code Cong. & Admin.News, at 6393.

[8] The December 3rd Letter provides in pertinent part: "As requested, a judicial review committee will be appointed by the Chief of Staff and approved by the Executive Committee at its December 16, 1986 meeting. A hearing date will be set and you will be notified as provided in the bylaws." The December 3rd Letter, addressed to the Plaintiff from Dr. Reid, Vice President of the Medical Staff, outlines the reasons for the revocation of the Plaintiff's staff privileges at the November 19th MEC Meeting.

The Court finds that the initial professional review action, the November 19th MEC Meeting, satisfies the subsection (a)(3) due **[**25]** process requirement by virtue of *§ 11112(c)(2)*, which allows "an immediate suspension or restriction of clinical privileges, subject to subsequent notice and hearing . . . where the failure to take such an action may result in imminent danger to the health of an individual." The legislative history reveals that "the Committee felt strongly that it was necessary to establish these exceptions . . . to allow quick action where it would be reasonable to conclude that someone's health might otherwise suffer." 1986 U.S.Code Cong. & Admin.News, at 6394.

While the Court acknowledges that the JRC eventually found the revocation of Plaintiff's staff privileges to be "unreasonable," it must be noted that the JRC reached this conclusion only after considering **[*942]** over 70 hours of testimony in a series of hearings that lasted two months. The Court is convinced that based on the information available at the time of the special meeting on November 19, 1986, it was reasonable for the MEC to conclude that the health of Dr. Austin's patients "might otherwise suffer" unless immediate action was taken. This conclusion finds support in the fact that the JRC found Dr. Austin's treatment of patient C.P. **[**26]** to be substandard, expressed concerns regarding the treatment of other patients, [9] and placed significant restrictions on Plaintiff's continued exercise of clinical privileges at Cottage Hospital. The Court further finds that the December 3rd Letter and the JRC Hearings satisfy the "subsequent notice and hearing" component of *§ 11112(c)(2)*.

4. *Section 11112(a)(4) Analysis*

Lastly, ***HN7***[] in order to merit immunity, the professional review actions "must be taken . . . in the reasonable belief that the action was warranted by the facts known after such reasonable effort to obtain facts and after meeting the [due process requirements]. . . ." *§ 11112(a)(4)*. Having already concluded that both professional review actions satisfy the requirements of due process [*§ 11112(a)(3)*] and reasonable efforts at fact-gathering [*§ 11112(a)(2)*], the Court finds that both the November 19th MEC Meeting and the JRC Hearings were reasonably warranted based on the facts available at the respective times. The Court comes to this conclusion for the reasons previously discussed in the *Section 11112(a)(1)* analysis.

5. *Plaintiff's Inability to Rebut the Presumption* ***[**27]*** *of Immunity Created by Section 11112(a)*

As outlined above, the Defendants have successfully demonstrated that both professional review actions at issue in this case warrant immunity under the HCQIA because both have satisfied the standards set forth in *Section 11112(a)(1)-(4)*. The burden is now on the Plaintiff to rebut this showing, as Section ***HN8***[] 11112(a) declares that "A professional review action shall be presumed to have met the preceding standards necessary for the protection set out in *section 11111(a)* of this title unless the presumption is rebutted by a preponderance of the evidence."

The Plaintiff has failed to even address, much less rebut, the Defendants' evidentiary showing. Despite the fact that all three Defendants seeking summary judgment argue for immunity under the HCQIA in their moving papers, the Plaintiff's consolidated opposition papers makes no mention of the statute. The Plaintiff does not attempt to refute or contest any of the Defendants' efforts to apply the immunity provisions of the HCQIA to the facts of this case. The Court finds the Plaintiff's naked allegations of a conspiracy against him, based largely on the Defendant neurosurgeons' refusals to cover **[**28]** for him and unsubstantiated hearsay, insufficient to rebut the presumption of immunity conferred on the professional review actions.

B. Compliance with the HCQIA's Reporting Requirements

HN9[] The immunity provided by *§ 11111(a)(1)* can be forfeited if the health care entity fails to report any disciplinary action taken against a physician resulting from a professional review action. *§ 11111(b)*. [10] ***HN10***[]

---

[9] JRC Final Report, at 3, *supra* note 2.

[10] *Section 11111(b)* provides: "If the Secretary has reason to believe that a health care entity has failed to report information in accordance with *section 11133(a)* of this title, the Secretary shall conduct an investigation. If, after providing notice of

The details of any "professional review action that adversely affects the clinical privileges of a physician for a period of longer than 30 days" must be reported to the Board of Medical Examiners. §§ 11133(a)(1)(A); **[*943]** 11133(a)(3)(A)-(C) (detailing the information required); 11134(a) (outlining the proper timing and form of reporting).

[29]** Plaintiff's clinical privileges at Cottage Hospital were "adversely" affected following both of the professional review actions at issue. In the context of the HCQIA's reporting requirements, the term "adversely affecting" is defined to include both the revocation and restriction of a physician's clinical privileges. § 11151(1). The November 19th MEC Meeting resulted in the revocation of the Plaintiff's clinical privileges and although they were reinstated as a result of the JRC Hearings, the panel concluded "that the totality of problems reasonably warrants some appropriate conditions on the continued exercise of clinical privileges by Dr. Austin." JRC Final Report, at 3. These conditions, mandatory consultations and periodic monitoring, are a definite restriction on Dr. Austin's privileges.

The Defendants have sufficiently shown, and Plaintiff admits, that the HCQIA's reporting requirements have been satisfied. On January 13, 1987, Defendant Cottage Hospital sent a "Health Facility Reporting Form 805" to the California Board of Medical Quality Assurance ("BMQA") containing Dr. Austin's name, a description of the reasons for the revocation of his privileges as of the November 19th **[**30]** MEC Meeting, and other appropriate information. Following Dr. Austin's conditional reinstatement as a result of the JRC Hearings, Defendant Cottage Hospital sent an amended "805 Form" to the BMQA on October 2, 1987. The contents of the "805 Form" satisfy the requirements of § 11133(a)(3) and the BMQA is the appropriate state authority. [11]

C. Occurrence of the Professional Review Actions After the Effective Date of the HCQIA

The Court finds that both professional review actions occurred after **[**31]** November 14, 1986, the effective date of the HCQIA. The immunity provided under § 11111(a) "shall apply to professional review actions commenced on or after the date of the enactment of this Act [November 14, 1986]." The Health Care Quality Improvement Act of 1986, Pub.L. No. 99-660, § 416, 42 U.S.C.A. §§ 11101 et seq. (West Supp. 1989). The first professional review action occurred on November 19, 1986 at the special meeting of the Cottage Hospital Medical Executive Committee, and the second review action, the JRC Hearings, commenced on March 16, 1987 with the final report issuing on June 30, 1987.

III. *Conclusion*

With the satisfaction of the final requirement above, the Court concludes that both professional review actions merit immunity from federal antitrust liability pursuant to § 11111(a)(1). This immunity extends to the five Defendant physicians because "any person who participates with, or assists the body with respect to the [professional review] action" is also shielded from federal antitrust liability by § 11111(a)(1)(D). Defendant Cottage Hospital, and its

---

noncompliance, an opportunity to correct the noncompliance, and an opportunity for a hearing, the Secretary determines that a health care entity has failed substantially to report information in accordance with section 11133(a) of this title, the Secretary shall publish the name of the entity in the Federal Register. The protections of subsection (a)(1) of this section shall not apply to an entity the name of which is published in the Federal Register under the previous sentence with respect to professional review actions of the entity commenced during the 3-year period beginning 30 days after the date of publication of the name."

[11] Section 11133(a)(3) provides in pertinent part:

"(3) Information to be reported

The information to be reported under this subsection is --

(A) the name of the physician or practitioner involved,

(B) a description of the acts or omissions or other reasons for the action or, if known, for the surrender, and

(C) such other information respecting the circumstances of the action or surrender as the Secretary deems appropriate."

The term "Board of Medical Examiners" is defined in § 11151(2) to include "a Board as determined by the State with responsibility for the licensing of physicians. . . ." The Board so designated by the State of California is the Board of Medical Quality Assurance.

various committees involved in the review process -- the Surgical Audit Committee, the *Ad Hoc* Committee, **[**32]** the Medical Executive Committee, and the Judicial Review Committee -- all fall within the *§ 11151(11)* definition [12] of a "professional **[*944]** review body" that is entitled to immunity under *§ 11111(a)(1)(A)*.

Accordingly, IT IS HEREBY ORDERED that the Summary Judgment Motions of Defendants Santa Barbara Cottage Hospital, Thomas Jones, M.D., and James R. Saint John, M.D. be GRANTED. Since all of the Defendants are immune from federal antitrust liability by virtue of *§ 11111(a)* of the Health Care Quality Improvement Act of 1986, only the pendent state tort claims for Intentional Interference with Prospective Business Advantage and Conspiracy remain as viable causes of action.

IT IS FURTHER ORDERED that these pendent state claims are DISMISSED WITH PREJUDICE for lack of subject matter jurisdiction. *United Mine Workers v. Gibbs, 383 U.S. 715, 726-27, 16 L. Ed. 2d 218, 86 S. Ct. 1130* ***[**33]*** *(1966)*.

End of Document

[12] *Section 11151(11)* provides: "The term 'professional review body' means a health care entity and the governing body or any committee of a health care entity which conducts professional review activity, and includes any committee of the medical staff of such an entity when assisting the governing body in a professional review activity."

Opinion

[*1044] ORDER ON DEFENDANTS' MOTION TO DISMISS AND MOTION TO STRIKE

ELIZABETH A. KOVACHEVICH, UNITED STATES DISTRICT JUDGE

This cause is before the Court on Defendants' motion to dismiss and motion to strike filed May 3, 1989. Responses thereto were filed May 24, 1989.

HN1[] A complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts that would entitle him to relief. *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d*

80, 78 S. Ct. 99 (1957). A trial court, in ruling on a motion to dismiss, is required to view the complaint in the light most favorable to the plaintiff. Scheuer v. Rhodes, 416 U.S. 232, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1947).

The amended complaint contains the following counts: 1) violation of 42 U.S.C. 1983, 2) violation of § 1 of the Sherman Antitrust Act, 3) violation of § 2 of the Sherman Antitrust Act, 4) violation of the Racketeer Influenced Corrupt Organization Act, 5) sex discrimination in violation of Title VII of the Civil Rights Act of 1964, 6) violation of § 542.18 of Florida's Antitrust **[**2]** Act, 7) violation of § 542.19 of Florida's ***Antitrust Law***, 8) violation of Florida Statute Section 772.104, 9) violation of Florida Statute Section 772.11, 10) tortious interference with a business relationship, and 11) breach of contract.

Defendants move to dismiss Counts 1, 2, 3, 4, and 5 for failure to state a claim and to dismiss the remaining pendent state law claims for lack of federal court jurisdiction. Defendants further assert the entire Complaint fails to state a claim since suits against a hospital, its peer review panel, medical staff, employees and witnesses arising out of medical peer review are precluded by the peer review immunity provisions of Florida Statutes § 766.101 and Chapter 395 (1989) and the Federal Health Care Quality Improvement Act of 1986, 42 U.S.C. § 11111-11152, absent an allegation of fraud.

[*1045] COUNT I

VIOLATION OF 42 U.S.C. 1983

HN2[] Section 1983 grants an individual a private cause of action when his federal rights are infringed by state statute, state officials, or persons acting under color of state law. A Defendant's alleged infringement of federal rights must be "fairly attributable to the state." *Lugar v. Edmondson Oil Co., 457 U.S. 922,* ***[**3]*** *937, 73 L. Ed. 2d 482, 102 S. Ct. 2744 (1982)*. "[A] sufficiently close nexus (must exist) between the State and the challenged action of the regulated entity so that the action of the latter may be fairly treated as that of the State itself." *Blum v. Yaretsky, 457 U.S. 991, 1004, 73 L. Ed. 2d 534, 102 S. Ct. 2777 (1982)*.

This standard insures the state is "responsible for the *specific* conduct [constituting the alleged infringement]." *Id. at 1004* (emphasis added). ***HN3***[] State regulation, substantial state funding, or a contractual relationship with a state government do not provide a sufficient nexus for state action. *Jackson v. Metro. Edison Co., 419 U.S. 345, 350, 95 S. Ct. 449, 42 L. Ed. 2d 477 (1975)*; *Rendell-Baker v. Kohn, 457 U.S. 830, 73 L. Ed. 2d 418, 102 S. Ct. 2764 (1982)*; *Blum, 457 U.S. 991, 73 L. Ed. 2d 534, 102 S. Ct. 2777 (1982)*; *Crowder v. Conlan, 740 F.2d 447, 451 (6th Cir. 1984)*; *Seng v. Cibola General Hospital, 706 F.2d 306 (10th Cir. 1983)*. The state must exercise such "coercive power" or "[provide] such significant encouragement, either overt or covert, that the choice must in law be deemed to be that of the state." *Id. 457 U.S. at 1004*.

Though Defendants are private parties, Plaintiffs assert that Defendants acted under color of state law because the alleged infringement of federal rights, the decision to suspend Plaintiffs' **[**4]** hospital privileges, arose out of a statutorily mandated medical peer review. Plaintiffs' state action allegations also claim that Defendants acted under color of state law because defendant hospital, a privately owned non-profit organization, receives the majority of its revenue from state and federal funds and contracts with the county to provide medical services for the indigent.

Plaintiffs do not allege that the state coerced or significantly encouraged Defendants' decision to summarily suspend Plaintiffs' hospital privileges. The complaint shows the decision made by the medical peer review committee was made by private parties, was not based on medical standards established by the state, nor dictated by a state regulatory rule. Nor did the complaint show that the state is involved in the daily operation of the hospital. Therefore, the Court finds that state regulation of Manatee Hospital through statutorily required peer medical review, receipt by Manatee Hospital of state funds, and Manatee Hospital's contract with the county to provide indigent care do not create a sufficient nexus between the Defendants' decision to suspend the Plaintiffs' hospital privileges and the state **[**5]** to constitute state action for purposes of 1983 liability.

COUNTS II and III

VIOLATION OF THE SHERMAN ANTITRUST ACT

Standard for Antitrust Pleadings

HN4[] To satisfy the requirements of notice pleading in an antitrust complaint, "enough data must be pleaded so that each element of the alleged antitrust violation can be properly identified." *Quality Foods v. Latin American Agribusiness Development Corp., 711 F.2d 989, 995 (11th Cir. 1983)*. "Conclusory allegations that Defendant violated the antitrust laws and Plaintiff was injured thereby will not survive a motion to dismiss if not supported by facts constituting a legitimate claim for relief." *Id.; Lombard's Inc. v. Prince Mfg., Inc., 753 F.2d 974, 975 (11th Cir. 1985)*.

Section 1 Claim

The purpose of the Sherman Antitrust Act is to protect competition, not individual competitors. *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. ***HN5***[] The elements **[*1046]** of a *§ 1* claim under the Sherman Act are 1) a conspiracy exists between two or more entities and 2) the conspiracy unreasonably restrains trade. *Aviation Spec., Inc. v. United Technologies Corp., 568 F.2d 1186, 1191 (5th Cir. 1978)*.

Two different methods **[**6]** of analyses are used to determine whether conduct violates the second element: the rule of reason and the *per se* rule. *Goss v. Memorial Hosp. System, 789 F.2d 353, 354 (5th Cir. 1986)*. If the suspect conduct constitutes *per se* an unreasonable restraint on trade, element 2 is satisfied. Otherwise, the rule of reason analysis is used. *Id*. In this case, since Defendants' conduct, summary suspension of Plaintiff's hospital privileges, is not *per se* an unreasonable restraint of trade, the rule of reason analysis applies.

Using the rule of reason analysis, Plaintiffs must allege that Defendants' conduct had an "impact upon competition in his particular . . . profession, and not just upon [his] business." *Feldman v. Jackson Memorial Hospital, 571 F. Supp. 1000, 1008* (S.D.Fla. 1983, *affirmed*, *752 F.2d 647 (11th Cir. 1983))*. ***HN6***[] A plaintiff fails "to state a *section 1* offense by failing to allege 'that the alleged restraint on trade tends or is reasonably calculated to prejudice the public interest.'" *Quality Foods v. Latin Am. Agribusiness Devel., 711 F.2d 989 (11th Cir. 1983)* (*quoting Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 273 (5th Cir. 1979))*. **[**7]**

Plaintiffs allege damage to their business, property, and ability to compete in Manatee County. Plaintiffs also allege that prior to their final suspensions they voluntarily discontinued delivering patients at Manatee Memorial Hospital because of a purported inability of the hospital to provide timely anesthesia services. The Complaint further states that Dr. Boczar resigned from the hospital before her privileges were suspended for the second time.

The Court finds Plaintiffs' complaint deficient for failure to allege an injury to competition within the relevant medical market caused by the Defendants' conduct, the summary suspensions. Further, since Plaintiffs had voluntarily stopped admitting patients to Manatee Hospital prior to being suspended, the complaint does not demonstrate an injury to competition inflicted by Plaintiffs' summary suspensions. Therefore, Plaintiffs' conclusory allegation of a conspiracy to drive them out of the Manatee market will not survive a motion to dismiss since it is not supported by facts constituting a legitimate claim for relief.

Section 2 Claim

HN7[] In a conspiracy to monopolize claim under *§ 2* of the Sherman Act, the plaintiff must allege 1) an **[**8]** agreement or understanding between two or more economic entities, 2) a specific intent to monopolize, and 3) overt acts in furtherance of the alleged conspiracy. *Feldman, 571 F. Supp. at 1011* (*citing Robinson v. Magovern, 521 F.Supp 842, 892 (W.D.Pa. 1981))*. ***HN8***[] A monopoly is "the power to control prices or exclude competition." *Feldman, 571 F. Supp. at 1010* (*citing United States v. E.I. Dupont de Nemours & Co., 351 U.S. 377, 76 S. Ct. 994,* 100 L. Ed. 1264 (1965)). A plaintiff must define the relevant product and geographic market the alleged conspiracy to monopolize attempted to control. *Id*. **HN9**[] The relevant geographic market is the area in which the defendant competes with other like businesses. Feldman, 571 F. Supp. at 1010 (*citing* Morton Buildings of Nebraska, Inc. v. Morton Buildings, Inc., 531 F.2d 910 (8th Cir. 1976)).

Plaintiffs' complaint is contradictory. Plaintiffs allege that Manatee Hospital provided the only obstetrical beds in Manatee County at the time Plaintiffs' hospital privileges were suspended. Assuming the relevant product is obstetrical beds, Plaintiffs' allegation does not demonstrate an actual monopoly since Plaintiffs affirmatively allege they were taking patients to Sarasota **[**9]** Hospital for delivery and Plaintiffs' complaint repeatedly refers to competition or fear of competition between Sarasota Hospital and Manatee Hospital. Therefore, Plaintiffs' complaint demonstrates that Manatee Hospital does not actually monopolize the relevant geographic market. Plaintiffs do not allege what portion **[*1047]** of the market Manatee Hospital occupies.

Alternatively, assuming that the relevant product is obstetrical services, Manatee Hospital is not the Plaintiffs' competitor since the hospital does not perform obstetrical services. Also, since the allegations show that none of the defendant doctors practice obstetrics, they are incapable of monopolizing the obstetrical market or conspiring with the hospital to monopolize the obstetrical market since they too are not competitors within the market. *See* Feldman, 571 F. Supp. at 1010. Because Plaintiffs' do not allege the product or geographic market, the Court finds Plaintiffs' complaint does not give adequate notice to Defendants of the claim against them in accordance with Fed.R.Civ.P. 8(a)(2).

Since Plaintiffs' complaint does not state a claim under the Sherman Antitrust Act, this Court need not address whether participants **[**10]** in medical review committees are immune from federal antitrust suits due to the state action exemption.

COUNT IV

VIOLATION OF THE RACKETEER INFLUENCED CORRUPT ORGANIZATION ACT

The United States Supreme Court has defined compensable injury under 18 U.S.C. § 1964(c) to be the harm caused by the predicate acts. "[A] plaintiff has standing to sue only 'to the extent that, he has been injured . . . by the conduct constituting the violation.'" Morast v. Lance, 807 F.2d 926, 933 (11th Cir. 1987) (*quoting Sedima*, 473 U.S. at 479). "Any recoverable damages . . . will flow from the commission of the predicate acts." *Sedima*, 473 U.S. at 479.

HN10[] A claim of civil RICO under 18 U.S.C. § 1964(c) necessarily alleges a violation of § 1962. Sedima S.P.R.L. v. Imrex Co., 473 U.S. 479, 495, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985); Outlet Communications v. King World Productions, 685 F. Supp. 1570 (M.D.Fla. 1988). "Section 1962 . . . makes it unlawful for 'any person' . . . to use money derived from a pattern of racketeering activity to . . . conduct an enterprise through a pattern of racketeering activity." Sedima, 473 U.S at 495. The existence of an enterprise, defined in § 1961(4), must be alleged **[**11]** and proved. United States v. Turkette, 452 U.S. 576, 583, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981); Outlet, 685 F. Supp. at 1579.

HN11[] A "pattern of racketeering" is defined as "at least two acts of racketeering activity" occurring within a specified time. Outlet, 685 F. Supp. at 1580. "The target of [RICO] is thus not sporadic activity. The infiltration of legitimate business normally requires more than one 'racketeering activity' and the threat of continuing activity to be effective. It is this factor of continuity plus relationship which combines to produce a pattern." Sedima, 473 U.S. at 496 n. 14. In the Eleventh Circuit, Plaintiff must "allege definitively an enterprise as well as to state a 'threat of continuing activity' necessary to allege a pattern of racketeering activity. . . ." Outlet, 685 F. Supp. at 1581.

Plaintiffs allege injury to reputation and loss of business due to their summary suspensions but do not allege any facts demonstrating injury flowing from the commission of the predicate acts, mail fraud and extortion. Therefore, Plaintiffs' allegations are not sufficient to confer standing under Rico.

Further, Plaintiffs have not alleged facts demonstrating a threat of continuing mail fraud **[**12]** and extortion necessary to constitute a pattern of racketeering activity. Finally, Plaintiffs have not definitively alleged an enterprise. Therefore, the Court finds Plaintiffs' complaint does not state a claim for relief under *18 U.S.C. § 1964(c)*.

COUNT V

VIOLATION OF TITLE VII OF THE CIVIL RIGHTS ACT OF 1964

The purpose of Title VII is "to achieve equality of employment opportunities" and "to provide equal access to job markets for both men and women." *Sibley Memorial **[*1048]** Hospital v. Wilson, 160 U.S. App. D.C. 14, 488 F.2d 1338 (D.C.Cir. 1973)* (*quoting* *Griggs v. Duke Power Co., 401 U.S. 424, 426, 28 L. Ed. 2d 158, 91 S. Ct. 849 (1971))*. ***HN12***[] Claims for relief under Title VII must allege either a hostile work environment or constructive discharge caused by sex discrimination.

HN13[] In order to establish a hostile work environment claim under Title VII, a plaintiff must plead the following elements: 1) the employee belongs to a protected group, 2) the employee was subject to unwelcome sexual harassment, 3) the harassment complained of was based upon sex, 4) the harassment complained of affected a "term, condition, or privilege of employment", and 5) respondeat superior. To establish a constructive discharge claim, except for the fourth **[**13]** element, the complaint is the same. The fourth element is satisfied by showing that the employee's reaction to harassment affected tangible aspects of the employee's compensation, terms, conditions, or privileges of employment. *Henson v. City of Dundee, 682 F.2d 897 (11th Cir. 1982)*. An individual need not be an "employee" as defined in § 2000e-2(a)(1) to bring a claim under Title VII since the purpose of the act was to protect employment opportunities. *Id.; Doe on behalf of* *Doe v. St. Joseph Hospital, 788 F.2d 411 (7th Cir. 1986)*.

Dr. Boczar alleges that Dr. Derespino has a history of harassing women and Manatee Hospital employs no other female obstetrician/gynecologist. Although Dr. Boczar did not receive her privileges immediately, she affirmatively alleges that this was due to an attempt to prevent competition. Further, Dr. Boczar alleges that she resigned because of her dissatisfaction with medical care provided at Manatee Hospital. Therefore, since Dr. Boczar did not allege facts to show a hostile work environment or that her resignation was due to a hostile work environment, the Court finds that Plaintiffs' complaint does not state a claim for relief under Title VII.

[14]** Plaintiffs' pendent state claims are dismissed for lack of jurisdiction. Defendants' motion to strike is now moot.

ORDERED that the motion to dismiss of Defendants Manatee Hospitals & Health Systems, et al., be GRANTED in accordance with the preceding paragraphs. Plaintiffs shall file an amended complaint within fifteen (15) days of the date of this Order. If no amended complaint is filed within that time, the Clerk of District Court shall enter a final judgment of dismissal. It is further

ORDERED that Plaintiffs' pendent state claims are dismissed for lack of jurisdiction, and Defendants' motion to strike is denied as moot.

DONE AND ORDERED. in Chambers, in Tampa, Florida, this 21st day of of February, 1990.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN1[] **Purchasers, Direct Purchasers**

Indirect-purchaser antitrust actions under state law are not preempted by the limitation of federal antitrust actions to direct purchasers.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN2[] **Prerequisites for Class Action, Adequacy of Representation**

Adequate representation is required to support preclusion by judgment in a class action. One major requirement of representation draws from the due process perception that absent persons cannot be represented by parties who have fundamentally divergent interest in the subject of the representation.

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN3[] **Special Proceedings, Class Actions**

The reasons for limiting preclusion to the subject of the class action are even stronger than the reasons for imposing similar limits on preclusion by other representative litigation. These limitations on preclusion by a class judgment are wrapped up with the general proposition that the court conducting the action cannot predetermine the preclusive effect of the judgment.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN4[] **Private Actions, Purchasers**

The Supreme Court recognizes the substantial divergence of interest between direct and indirect purchasers in a class action.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN5[] **Preclusion of Judgments, Res Judicata**

There are three elements to the res judicata doctrine: 1) the prior judgment must be rendered by a court of competent jurisdiction; 2) the prior judgment must be a final judgment on the merits; and 3) the same cause of action and the parties were involved in both cases.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

HN6[] **Preclusion of Judgments, Res Judicata**

Whether two claims are the same for res judicata purposes depends on whether the claims arise out of the same nucleus of operative fact or are based on the same factual predicate.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN7[] Private Actions, Purchasers

The "cost plus" exception allows recovery for indirect purchasers where there is a pre-existing, fixed-quantity, cost-plus contract between the direct purchaser and its customer, as well as between all other parties in other parties in the distribution chain.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN8[] Federal & State Interrelationships, Erie Doctrine

In applying state law, federal courts are bound by the decisions of the state's highest court. When state law is unclear or unsettled, it is the duty of a federal court to apply the rule it believes that state supreme court would follow. In making this determination, a decision of the state's intermediate appellate court is a datum for ascertaining state law which is not to be disregarded by a federal court unless it is convinced by other persuasive data that the highest court of the state would decide otherwise.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN9[] Public Enforcement, State Civil Actions

The Minnesota antitrust statute applies to the following: a) any contract, combination, or conspiracy when any part thereof was created, formed or entered into in this state; and b) any contract, combination or conspiracy whenever any of the foregoing affects the trade or commerce of this state.

Civil Procedure > Special Proceedings > Class Actions > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

International Trade Law > International Commerce & Trade > Exports & Imports > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN10[] Special Proceedings, Class Actions

A court must conduct a two-step analysis in determining whether to apply state law to a foreign class member. First, the court must determine whether one state's law is in conflict with that of any other jurisdiction connected to the suit. Second, if there is a conflict of law, the court must determine whether the state's law has a significant contact or significant aggregation of contacts to the claims asserted by each member of the plaintiff class. This analysis is required even in a nationwide class action which can serve the important goal of providing an efficient resolution or large numbers of claims which might otherwise not be asserted.

Opinion

MEMORANDUM AND ORDER

This matter is before the court upon defendants' motions for: 1) judgment on the pleadings; 2) dismissal for lack of subject matter jurisdiction; and 3) to limit the class action complaint. For the reasons set forth below, defendants' motions for judgment on the pleadings and dismissal are denied, and the motion to limit the complaint is granted.

FACTS

This class-action antitrust case owes its existence to the Supreme Court's recent decision in *California v. ARC America Corp., U.S. , 109 S.Ct. 1661 (1989)*, which held that ***HN1***[] indirect-purchaser antitrust actions under state law are not preempted by the Illinois Brick rule's limitation of federal antitrust actions to direct purchasers. Plaintiff, the City of St. Paul, brings this action as an indirect purchaser of chlorine and caustic soda products, alleging that the defendants, all chlorine and caustic soda producers, have engaged in price-fixing conduct for these products in violation of both **[*4]** the Sherman Act and Minnesota's antitrust statute. The procedural history of prior antitrust litigation between these same parties, as well as the changes in ***antitrust law*** noted above, constitute much of the relevant background for the instant motions. On June 17, 1986, St. Paul brought a class action against defendants in this court alleging essentially the same antitrust violations alleged in this case. St. Paul sought to represent a nation-wide class of municipalities and other public entities under both Minnesota law and under Section 1 of the Sherman Act Law, then amended the complaint by alleging a class of Minnesota public entities and dropping the Minnesota antitrust claims. In its second amended complaint St. Paul reinstated the allegations as they were in the original complaint. St. Paul does not deny that it brought this action as both a direct and an indirect purchaser of chlorine and caustic soda from defendants.

On December 2, 1986, the city of Philadelphia brought a class-action antitrust claim against a group of defendants including all of the defendants in this case alleging price-fixing for chlorine and caustic soda products in violation of Section 1 of the Sherman **[*5]** Act. The class consisted of all public entities -- nationwide -- which purchased chlorine and caustic soda directly from the named defendants. Meanwhile, in May, 1987, the 9th Circuit Court of Appeals held several state antitrust statutes, to the extent they provided actions for indirect purchasers, preempted by Federal ***Antitrust law***. *In re Cement and Concrete Antitrust Litigation, 817 F.2d 1435 (9th Cir. 1987)*. The Cement and Concrete court relied heavily on the Supreme Court's decision in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S.Ct. 2061 (1977)*, which held that Section 4 of the Clayton Act does not provide a cause of action to indirect purchasers. *817 F.2d at 1445*.

Subsequent to the Philadelphia complaint and the Cement and Concrete decision, on May 31, 1988, St. Paul entered into a stipulation of dismissal with defendants. Regarding indirect-purchaser claims, the stipulation states that "this dismissal is without prejudice to all [public entities], . . . located within the State of Minnesota . . . that purchased chlorine or caustic soda indirectly from any of the above-named defendants" (emphasis added). These claims were further subject to the follow **[*6]** proviso:

No such claims may be brought against the above-named defendants by the indirect purchasers unless and until a final decision is rendered in the matter of In re Cement and Concrete Antitrust Litigation, docket nos. 84-2865, 85-1670, and 85-1722 to 85-1724, by the Supreme Court and the Ninth Circuit Court of Appeals reversing the Ninth Circuit's ruling that section 325D.57 of the Minnesota Antitrust Statute, to the extent it purports to permit recovery by indirect purchasers, is preempted by operation of *Article VI, clause 2 of the United States Constitution*; provided further that no such claims shall be brought if the Supreme Court or the Ninth circuit rules, for any other reason, that indirect purchasers may not bring suit under the Minnesota Antitrust Statute.

The stipulation stated the following regarding direct purchasers: "All [public entities] located within the State of Minnesota that purchased chlorine or caustic soda directly from any of the defendants . . . are deemed members of the class certified in [the Philadelphia litigation] . . . unless . . . such direct purchasers out-out [sic] of the class certified by that court."

St. Paul does not dispute **[*7]** that it subsequently received proper class notice and an opportunity to opt out of the Philadelphia litigation. The notice unequivocally presented class members with the choice of opting out or remaining and being bound by the ultimate resolution, as well as defining the class as direct purchasers. Several settlement agreements eventually resolved the Philadelphia litigation as to all defendants. The settlements released the class members' claims according to the following language:

"Upon the Court's approval of this Agreement and the settlement set forth herein pursuant to Rule 23, a final judgment . . . shall be entered which shall forever discharge [each settling defendant] from any and all claims, demands, causes of action, obligations, damages and liabilities and all other claims of any kind, . . . of every member of the Class who did not timely request exclusion in the manner provided for in the pertinent notice to the Class (including all of each Class member's parents, subsidiaries, affiliates, predecessors and successors) under the antitrust laws of the United States, or the antitrust or similar laws regulating competition of any State thereof or of any other jurisdiction **[*8]** to the date hereof based upon, arising out of, or having connection in any way whatsoever with any act, omission, cause or matter that is in whole or in part the subject of or asserted in or any claims that could have been asserted under the antitrust laws of the United States or the antitrust or similar laws regulating competition of any State thereof or of any other jurisdiction, as well as any other claims based on the allegations asserted in, the Consolidated Amended Class Action Complaint or any of the complaints filed in the cases enumerated in Exhibit A hereto."

(emphasis added). The supplemental notice clearly stated that the class consisted of direct purchasers whose recovery would be apportioned pro rata according to the amount of their direct purchases. The claim forms sent to class members in this direct-purchaser action provided a column for the entry of direct purchases. No column was provided for indirect purchases, i.e. purchases from non-defendants.

Following the Supreme Court's decision in ARC America, St. Paul filed its complaint in the instant case, seeking recovery as an indirect purchaser under Minnesota law for what is conceded to be the defendants' **[*9]** same anticompetitive acts. The complaint further alleges that some of the purchases were "on a basis equatable to a cost plus basis." The putative class is nation-wide. Defendants now move for judgment on the pleadings based on the doctrines of claim preclusion or res judicata (part I); dismissal for lack of subject matter Jurisdiction (part II); and an order limiting the class (part III).

DISCUSSION

I.

CLAIM PRECLUSION AND RES JUDICATA

Defendants first argue that St. Paul, as a direct-purchaser member of the Philadelphia direct purchaser class, is precluded from bringing this action based on the judgments in that case. Similarly, defendants argue that St. Paul is precluded under the doctrine of res judicata. The court will discuss these issues separately although it reaches the same conclusions on both issues.

A. Claim Preclusion in Class Actions

This issue requires the court to determine the effect of the Philadelphia litigation settlements upon St. Paul, which by the May 1988 stipulation of dismissal deemed itself a member of the Philadelphia class. The stipulation clearly preserved indirect-purchaser claims for indirect purchasers. The stipulation also clearly subjected direct **[*10]** purchasers to the results of the Philadelphia litigation. The problem is that the stipulation does not specifically address how parties with both indirect and direct purchasers - like St. Paulare to be treated. Defendants correctly observe that nothing in the stipulation gave St. Paul the right to remain in the Philadelphia direct-purchaser action and later bring an indirect purchaser action. The converse, however, is also true.

Because the stipulation is silent the next step is to analyze the extent of the Philadelphia class-action's preclusive effect. St. Paul argues that its interests as an indirect purchaser were not the subject of the Philadelphia litigation and consequently were not adequately represented. Because the indirect claims were not represented, St. Paul further argues, they cannot be precluded.

HN2[] "Adequate representation is required to support preclusion by judgment in a class action. One major requirement of representation draws from the due process perception that absent persons cannot be represented by parties who have fundamentally divergent interest in the subject of the representation." Wright, Miller, and Cooper, Federal Practice and Procedure, § 4455 at **[*11]** 477 (West 1981) (citing *Hansberry v. Lee, 311 U.S. 32 (1946))*. ***HN3***[] "The reasons for limiting preclusion to the subject of the class action are even stronger than the reasons for imposing similar limits on preclusion by other representative litigation. Id. at 484. "These limitations on preclusion by a class judgment are wrapped up with the general proposition that 'the court conducting the action cannot predetermine the [preclusive] effect of the judgment.'" Id. at 485 (quoting *Gonzales v. Cassidy, 474 F.2d 67, 74 (5th Cir. 1973))*.

In the instant case the court concludes that the Philadelphia litigation does not preclude St. Paul from collaterally pursuing its indirect claims in this action. This conclusion is compelled by the divergence of interests between a direct-purchaser representative and an indirect-purchaser claimant. The class certified was of direct purchasers, the settlements were distributed pro rata according to direct purchases, and the class representative was a direct purchaser. *HN4*[] The Supreme Court in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 738 (1977)*, recognized the substantial divergence of interest between direct and indirect purchasers:

Permitting **[*12]** the use of pass-on theories under § 4 essentially would transform treble-damages actions into massive efforts to apportion the recovery among all potential plaintiffs that could have absorbed part of the overcharge -- from direct purchasers to middlemen to ultimate consumers. However appealing this attempt to allocate the overcharge might seem in theory, it would add whole new dimensions of complexity to treble-damages suits and seriously undermine their effectiveness.

As we have indicated, potential plaintiffs at each level in the distribution chain are in a position to assert conflicting claims to a common fund -- the amount of the alleged overcharge -- by contending that the entire overcharge was absorbed at that particular level in the chain.

The Illinois Brick court, in discussing its rationale for limiting private federal antitrust actions to direct purchasers, also anticipated the need for different classes with their own representatives should indirect-purchaser claims be allowed:

But allowing indirect purchasers to recover using pass-on theories, even under the optimistic assumption that joinder of potential plaintiffs will deal satisfactorily with problems of multiple **[*13]** litigation and liability, would transform treble-damages actions into massive multiparty litigations involving many levels of distribution and including large classes of ultimate consumers remote from the defendant. In treble-damages actions by ultimate consumers, the overcharge would have to be apportioned among the relevant wholesalers, retailers, and other middlemen, whose representatives presumably should be joined. And in suits by direct purchasers or middlemen, the interests of ultimate consumers are similarly implicated.

431 U.S. at 740-41 (emphasis added). This divergence of interest between direct and indirect purchasers is still recognized despite the court's decision in ARC America. In holding that state indirect-purchaser actions do not interfere with the policies underlying federal law and thus are not preempted -- an analysis focusing on how best to effectuate the goals of compensating of antitrust victims and deterring anticompetitive conduct rather than how to preserve adequate representation for particular classes of purchasers -- the court cost great doubt on the wisdom of including pendent indirect claims in federal antitrust actions:

First, the Court **[*14]** of Appeals concluded that state indirect purchaser statutes interfere with the congressional purpose of avoiding unnecessarily complicated proceedings on federal antitrust claims. But these state statutes cannot and do not purport to affect remedies available under federal law. Furthermore, state indirect purchaser actions will not necessarily be brought in federal court. *817 F.2d, at 1445*. Unlike the federal indirect purchaser claims asserted in Illinois Brick, which would have been exclusively within the jurisdiction of the federal courts, *15 U.S.C. §§ 15(a)*, *26*, claims under state indirect purchaser statutes could be brought in state court, separately from federal actions brought by direct purchasers. Moreover, federal courts have the discretion to decline to exercise pendent jurisdiction over state indirect purchaser claims, even if those claims are brought in the first instance in federal court. See *United Mine Workers of America v. Gibbs, 383 U.S. 715, 725-726, 86 S.Ct. 1130, 1138-39, 16 L.Ed.2d 218 (1966)*. Since many state indirect purchaser actions would be heard in state courts, at least when the federal courts determined that hearing those claims would be overly **[*15]** burdensome, any complication of federal direct purchaser actions in federal court would be minimal.

109 S.Ct. at 1666. In discussing the diluted recovery problem, moreover, the court noted "that direct purchasers may have to share with indirect purchasers is a function of the fact and form of settlement rather than the impermissible operation of state indirect purchaser statutes" *109 S.Ct. at 1667* (emphasis added).

Here, as noted above, the fact and form of the settlement was determined by a direct purchaser on behalf of direct purchasers resulting in a pro rata distributions according to each member's direct purchases. Considering the divergent interests noted above, the court concludes that the Philadelphia class representative had no interest in pursuing indirect claims for those members who were both indirect and direct purchasers, thus diluting its own recovery. Defendants rely heavily on *TBK Partners, Ltd. v. Western Union Corp., 675 F.2d 456 (2d Cir. 1982)*, which involved the settlement of a shareholder derivative class action "involving a dispute over a century-old lease." *675 F.2d at 457*. The court affirmed the approval or the settlement over the objections of certain **[*16]** minority shareholders to the settlement's preclusion of "all claims that might be asserted in connection with the action . . . including [an] appraisal proceeding that had been dismissed without prejudice by the state court." *675 F.2d at 459*. The court approved the settlement because the state-law claim was "based on the identical factual predicate as that underlying the claims in the settled class action." *675 F.2d at 460*. The instant case is distinguishable. Unlike TBK, this case involves a class representative with no interest in the pursuit of indirect claims. This divergence of interest is based on the lack of an identical factual predicate. The anticompetitive conduct alleged is identical, but the indirect claims arise out of additional purchases of chlorine and caustic soda further along the distribution chain. As the TBK court recognized, "special care must be taken to ensure that the release of a claim not asserted within a class action or not shared alike by all class members does not represent 'an advantage to the class . . . by the uncompensated sacrifice of claims of members, whether few or many.'" *675 F.2d at 461* (quoting *National Super Spuds, Inc. v. New **[*17]** York Mercantile Exchange, 660 F.2d 9, 19 (2d Cir. 1981))*. Super Spuds, contrary to defendants' assertions, is the persuasive authority here. In Super Spuds the court refused to approve a class settlement on behalf of all those who purchased liquidated potato futures contracts to the extent it precluded separate state-court class actions by members who also had unliquidated potato future contracts, 660 F.2d at 919. The additional contracts prevented factual identity between the state and federal claims, resulting in a divergence of interest between the class representative and those with state claims and, in turn, resulting in inadequate representation. Claim preclusion was thus inappropriate. Id. Based on similar concerns the court must rule that the settlements in the Philadelphia litigation do not preclude St. Paul's collateral pursuit of this indirect-purchaser state action.

Defendants' res judicata arguments suffer the same fate for similar reasons. ***HN5***[] There are three elements to the res judicata doctrine: 1) the prior judgment must be rendered by a court of competent jurisdiction; 2) the prior judgment must be a final judgment on the merits; and the same cause of action **[*18]** and the parties were involved in both cases. *Murphy v. Jones, 877 F.2d 682, 684 (8th Cir. 1989)*. "Put another way, ***HN6***[] whether two claims are the same for res judicata purposes depends on whether the claims arise out of the same nucleus of operative fact or are based on the same factual predicate." *Murphy, 877 F.2d at 684-85*. Here, again, the two cases involve different facts -- different contracts leading to different damages. That the anticompetitive conduct was the same in both cases does not end the inquiry. Defendants correctly observe that, despite the Cement and Concrete holding, indirect-purchaser claims under state law were, at the time of the Philadelphia litigation, at least colorable. See *Crown Oil Corp. v. Superior Court, 223 Cal. Rptr. 164, 177 Cal. App. 3d 604 (1986)* (holding that indirect claims under state law were not preempted). The question here, however, is not whether colorable claims for state indirect-purchaser actions existed at that time; rather, the question is whether such claims had to be pursued in the Philadelphia litigation. The answer is no. Because the indirect claims are not based on the same factual predicate as the federal direct claims, **[*19]** res judicata does not apply here. Cases on which defendants rely, for this reason, have no weight in the instant case. See *Nash County Bd. of Ed. v. Biltmore Co., Co., 640 F.2d 484* (4th cir. 1981) (holding res judicata applicable where antitrust factual predicates -- including evidence and damages -- were identical and the only difference between the first state-court action and the second federal-court action was the allegation of an interstate commerce nexus); *Engelhardt v. Bell & Howell Co., 327 F.2d 30 (8th Cir. 1964)* (holding res judicata applicable where, as above, the only difference between the first and second antitrust actions was the allegation of an interstate-commerce nexus). Res judicata, in sum, does not apply here because the Philadelphia litigation was based on a materially different factual predicate.

II.

SUBJECT MATTER JURISDICTION

Defendants assert, in a second motion, that this court lacks subject-matter jurisdiction because plaintiffs have failed to state a federal claim proving pendent jurisdiction for the indirect-purchaser claims. The court concludes that St.

Paul has properly asserted a federal claim. Pendent jurisdiction over the state indirect-purchaser **[*20]** claim is consequently appropriate.

Defendants contend that St. Paul has failed to properly plead a federal cause of action under the ***HN7***[] "cost plus" exception to Illinois Brick. This exception allows recovery for indirect purchasers "where there is a pre-existing, fixed-quantity, cost-plus contract between the direct purchaser and its customer, as well as between all other parties in other parties in the distribution chain[.]" *Mid-West Paper Products Co. v. Continental Group, 596 F.2d 573, 577 (3d Cir. 1979)* (citing *Illinois Brick, 431 U.S. at 736*). St. Paul's complaint alleges that it made indirect purchases of chlorine and caustic soda on a "basis equitable to a cost-plus basis." Defendants claim this allegation fails to state a federal cause of action, relying on cases granting summary Judgment for failure to put forth evidence of cost-plus contracts. *In re Wyoming Tight Sands Cases, 866 F.2d 1286 (10th Cir. 1989)*; *In re Midwest Milk Monopolization, 529 F.Supp. 1326 (W.D. Mo. 1982)*. These summary judgment holdings have little relevance here, given the great difference in the requirements of notice pleading under *Fed. R. Civ. P. 8* and the requirement of providing **[*21]** evidence to avoid summary judgment. Although the court has serious doubts as to whether any such cost-plus contracts can be proven, it does not regard dismissal as appropriate. Pendent jurisdiction over the state indirect-purchaser statutes, in any event, exists because St. Paul has also made a claim for injunctive relief under the Clayton Act, *15 U.S.C. § 26*. Such relief is available to both indirect and direct purchasers. See, e.g., *Reiter v. Sonotone Corp., 486 F.Supp. 115, 121 (D. Minn. 1980)*. Because St. Paul has properly pleaded a federal claim, the court has pendent jurisdiction over the state indirect-purchaser action.

II.

MOTION TO LIMIT THE COMPLAINT

Defendants seek to limit the class action complaint to claims arising after August 1, 1984, the effective date of the amendment of Minnesota's antitrust statute to allow indirect purchaser actions. See *Minn. Stat. § 325D.54*. St. Paul counters by arguing that the amendment merely clarified existing law to explicitly allow indirect actions in light of Illinois Brick. The Minnesota Court of Appeals addressed the very same argument in *Keating v. Philip Morris, Inc., 417 N.W.2d 132, 136 (Minn. Ct. App. 1007)*, **[*22]** and rejected it. Noting that Minnesota ***antitrust law*** is to be construed consistently with federal ***antitrust law*** and that Minnesota laws are not to be applied retroactively unless "clearly and manifestly so intended by the legislature," the Keating court concluded pre-amendment indirect claims are not provided for under the Minnesota statute. Id. The Minnesota Supreme Court, however, has not addressed this issue, which raises a question of whether the court of appeals case accurately set forth Minnesota law. ***HN8***[] In applying state law, federal courts are bound by the decisions of the state's highest court. *Kifer v. Liberty Mutual Ins. Co., 777 F.2d 1325, 1329 (8th Cir. 1985)*. When state law is unclear or unsettled, "it is the duty of a federal court to apply the rule it believes that state supreme court would follow." *Gearhart v. Uniden Corp. of America, 781 F.2d 147, 149 (8th Cir. 1986)*. In making this determination, a decision of the state's intermediate appellate court is "a datum for ascertaining state law which is not to be disregarded by a federal court unless it is convinced by other persuasive data that the highest court of the state would decide otherwise." *Commissioner **[*23]** v. Estate of Bosch, 387 U.S. 456, 465 (1967)* (quoting *West v. Amer. Tel. and Tel. Co., 311 U.S. 223, 237 (1940))*. The court finds the Keating case persuasive here, particularly because Minnesota ***antitrust law*** is to be interpreted consistently with federal law. The court finds, moreover, no persuasive datum to the contrary. Accordingly, the complaint must be limited to post-August 1, 1984 purchases.

Defendants also seek to limit the complaint to purchasers within the State of Minnesota, advancing two arguments. First, they argue that the Minnesota antitrust statute applies only to Minnesota purchasers. ***HN9***[] The statute applies to the following:

a) any contract, combination, or conspiracy when any part thereof was created, formed or entered into in this state; and

(b) any contract, combination or conspiracy. . .whenever any of the foregoing affects the trade or commerce of this state.

Here, subdivision (a) clearly does not apply as all of the defendants are from foreign jurisdictions. Subdivision (b) clearly applies to purchases made by Minnesota municipal entities, but reading this provision to apply to foreign purchases is far more troublesome. In a nationwide market, such **[*24]** purchases might be seen to "affect the trade or commerce" of Minnesota by affecting the price Minnesota governmental entities pay for chlorine and caustic soda. On the other hand, the statute might be read to require a tighter nexus between the anticompetitive activity and these Minnesota purchases given the explicit purpose of protecting the trade or commerce of Minnesota. The latter interpretation strikes the court as more reasonable.

In any event, interpreting the statute to apply only to purchasers within Minnesota is compelled by defendants' second argument, that application of Minnesota law to a nationwide class is unconstitutional. Under *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 105 S.Ct. 2965 (1985)*, ***HN10***[] the court must conduct a two-step analysis in determining whether to apply state law to a foreign class member. First, the court must determine whether Minnesota law is "in conflict with that of any other jurisdiction connected to this suit." *105 S.Ct. at 2976*. Second, if there is a conflict of law, the court must determine whether Minnesota has a "significant contact or significant aggregation of contacts to the claims asserted by each member of the plaintiff class." **[*25]** *105 S.Ct. at 2979*. This analysis is required "even in a nationwide class action" which can serve the important goal of providing an efficient resolution or large numbers of claims which might otherwise not be asserted. *105 S.Ct. at 2980*. Here, the claims of foreign purchasers against foreign defendants simply have no meaningful contact with Minnesota. The conflicts analysis is thus determinative of the issue's outcome. The court concludes that Minnesota ***antitrust law*** is in conflict with other states' antitrust laws. The key is the availability of the private treble damage remedy to indirect purchasers. The following brief discussion, although in no way an exhaustive or detailed discussion of state antitrust laws throughout the nation, provides sufficient illustration of the antitrust conflicts involved several states do not provide antitrust damages actions. Other states do not allow treble damages, and several more require participation by the state attorney general. Most importantly, only fifteen jurisdictions allow indirect purchaser suits, four of them requiring that class actions asserting such claims be brought by the state attorney general. Case law in three states, moreover, **[*26]** does not allow indirect-purchaser recovery. The remaining states are silent on the indirect purchaser issue. St. Paul glibly asserts that this court should interpret these states' laws consistently with Minnesota law. This task would not only lead to the possibility of later inconsistencies; it would require a burdensome attempt to predict such states' laws. These concerns also support a final reason to limit the class to Minnesota purchasers. In applying Minnesota law, the court would have to perform a choice of law analysis for each state under Minnesota's elaborate multiple factor Milkovitsch test. See *In re Control Data Corp. Securities Litigation, 116 F.R.D. 216, 223 (D. Minn. 1986)*. Given the burdensome nature of such a task, "the court does not consider performing a Milkovitsch choice of law analysis as a viable alternative to applying MInnesota law to all claims or allowing the class members to individually control the prosecution of their state claims." Id. (denying certification for foreign fraud claims under Minnesota common law -- despite the satisfaction of constitutional requirements). St. Paul relies on authorities from other jurisdictions which **[*27]** do not apply Minnesota conflicts law, do not involve analysis of every state's antitrust laws, and involve claims connected to the forum. These authorities provide no guidance in this case. See *In re Seagate Technologies Securities Litigation, 115 F.R.D. 264 (N.D. Cal. 1987)* (applying California choice of law principles where all fraud claims had a connection to California); *Sollenbarger v. Mountain States Tel. and Tel. Co., 121 F.R.D. 417 (D. N.M. 1988)* (analyzing potential conflicts in the contract law of seven states); *In re ORFA Securities Litigation, 634 F.Supp. 1449 (D. N.J. 1987)* (all pendent fraud claims had connection to the forum); *Kleiner v. First Nat'l. Bank of Atlanta, 97 F.R.D. 683 (N.D. Ga. 1983)* (analyzing potential conflicts in the contract law of five states). The court, in sum, concludes that this class should be limited to Minnesota governmental entities.

III.

CONCLUSION

Accordingly, IT IS ORDERED that:

1. Defendant's motion for judgment on the pleadings is DENIED;

2. Defendant's motion to dismiss for lack of subject matter jurisdiction is DENIED; and

3. The class is hereby limited to Minnesota governmental entities for purchases made after August **[*28]** 1, 1984.

HN1[] **Motions to Dismiss, Failure to State Claim**

In order to have a claim dismissed under *Fed. R. Civ. P. 12(b)(6)*, the moving party must meet a high standard. Under the simplified notice pleading of the Federal Rules of Civil Procedure, the allegations of a complaint should be construed liberally and the complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. Generally, mere vagueness or lack of detail does not constitute sufficient grounds for a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

When considering a defendant's motion to dismiss the court must view the complaint's allegations in the light most favorable to the plaintiff. All well-pleaded facts and allegations in the plaintiff's complaint must be taken as true, and the plaintiff is entitled to all reasonable inferences that can be drawn therefrom. Furthermore, a complaint is not required to allege all, or any, of the facts logically entailed by the claim. A complaint does not fail to state a claim merely because it does not set forth a complete and convincing picture of the alleged wrongdoing.

Copyright Law > ... > Formalities > Notice > Omissions

HN15[] Scope of Copyright Protection, Publication

Under the Copyright Act of 1909, determining whether the number of published copies from which notice was omitted was sufficiently small as to constitute "a particular copy or copies" turns on the relation of such number to the total number of copies published. The question of what constitutes a de minimis number is an issue of fact which must be dealt with on a case-by-case basis.

Opinion by: [*1] KOCORAS

Opinion

[2038]** *MEMORANDUM OPINION*

CHARLES P. KOCORAS, UNITED STATES DISTRICT JUDGE

This matter comes before the Court on plaintiffs-counterdefendants' motion to dismiss the six counterclaims of defendants-counterplaintiffs. For the reasons set forth below, the plaintiffs-counterdefendants' motion is denied.

Background

This case arises out of the break-up of a family publication business. On the death of Thomas Kelly, Sr., a heated dispute arose between the son, defendant-counterplaintiff Thomas E. Kelly, his half sister, plaintiff-counterdefendant Anamarie Kelly Stoppa and his stepmother, plaintiff-counterdefendant Grace Kelly over ownership of the family companies. Anamarie Kelly Stoppa and Grace Kelly maintain that they obtained complete ownership of the family company by virtue of inheritance through Thomas Kelly Sr.'s will. Thomas E. Kelly claims that he owns a portion of the stock and thus because Thomas Sr. did not own the entire company, he could not have devised ownership of the entire company. This particular dispute is currently being litigated in the probate division of the Circuit Court of Cook County.

Claiming ownership in the family business, Anamarie Kelly Stoppa **[*2]** and her husband Alberto Stoppa, discharged the defendants Thomas E. Kelly and James Flanagan shortly after the death of Thomas Sr. After their discharge, Flanagan, with Kelly's financial backing, established a competing company. Both companies publish daily racing forms available for purchase at race tracks. The plaintiffs' forms are entitled the "Red Sheet" and the "Green Sheet." Defendants use the trademarks "Blue Streak" and "Red Streak" on their racing forms.

Shortly after defendants established their company, plaintiffs initiate this federal court suit. Plaintiffs' complaint sets forth claims for copyright and trademark infringement, unfair competition, and breach of duty of loyalty. After filing suit, the plaintiffs sought and obtained a temporary restraining order prohibiting defendants from distributing their racing forms. The temporary restraining order was based on the ground that the defendants' forms were substantially similar to those of the plaintiffs. The court, however, rejected plaintiffs' request for a preliminary injunction, but also denied defendants' motion for summary judgment on the copyright claims. Nonetheless, defendants have removed their racing forms from **[*3]** the market.

On April 21, 1989, defendants filed their answer and counterclaims. Defendants set forth six counterclaims, most of which are based on allegations that plaintiffs initiated this federal court suit merely to harass defendants and force them out of business. Count I is a claim under the Sherman Act's monopolization provision. *15 U.S.C. § 2 (1988)*. Essentially, defendants claim that until their entry into the market, plaintiffs enjoyed a monopoly in the publication of daily racing forms. Defendants contend that plaintiffs have committed a variety of acts which violate the Sherman Act in an attempt to maintain their monopoly. These acts of monopolization include initiating this law suit and threatening race track officials with adverse consequences should they continue to sell defendants' racing forms. Count II is based on the same factual allegations and asserts a cause of action under the monopolization provision of the Illinois Antitrust Act. Ill. Rev. Stat. ch. 38, para. 60-1-60-11 (1987).

Defendants' Count V sets forth a claim for abuse of process. The factual allegations which form the basis of this count are essentially the same facts which provide the basis for the **[*4]** antitrust claims. Defendants assert that plaintiffs filed this suit merely to harass and intimidate defendants thereby driving defendants out of business. Moreover, defendants claim that plaintiffs are using this action to gain a tactical advantage in the state court proceedings.

Counts III and IV attack the validity of plaintiffs' asserted trademarks and copyright. Count III challenges the plaintiffs' trademarks of "Red Sheet" and "Green Sheet" on the ground that the trademarks have become generic. In Count IV, defendants allege that plaintiffs published a number of their racing forms without providing a copyright notice and, consequently, the copyright is invalid.

Defendants' final count, Count VI, is a request for forfeiture of the injunction bond, posted by plaintiffs upon the imposition of the temporary restraining order. The defendants contend that the temporary restraining order would never have been granted had plaintiffs truthfully advised the Court of the facts. Accordingly, because the temporary restraining order was wrongfully granted, defendants claim they are entitled to enforcement of the bond to cover the losses defendants incurred during the period of the temporary **[*5]** restraining order. **[**2039]**

Plaintiffs challenge each of defendants' counterclaims under *Federal Rule of Civil Procedure 12(b)(6)*. Plaintiffs maintain that defendant has failed to plead facts sufficient to state a cause of action under any one of the counts.

Procedure

A. Motion to Dismiss

HN1[] In order to have a claim dismissed under *Rule 12(b)(6)*, the moving party must meet a high standard. The purpose of a motion to dismiss is to test the sufficiency of the complaint, not to decide the merits of the case. Under the "simplified notice pleading" of the Federal Rules of Civil Procedure, the allegations of a complaint should be construed liberally and "the complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 46, 78 S.Ct. 99, 102 L.Ed.2d 80 (1957)*; see also *Lewis v. Local Union No. 199 of Laborers' Intern. Union of North America, AFL-CIO, 750 F.2d 1368 (7th Cir. 1984)*. Generally, "mere vagueness or lack of detail does not constitute sufficient grounds for a motion to dismiss." *Strauss v. City of Chicago, 760* ***[*6]*** *F.2d 765 (7th Cir. 1985)*.

HN2[] When considering a defendant's motion to dismiss the Court must view the complaint's allegations in the light most favorable to the plaintiff. *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S.Ct. 1683, 1686, 40 L.Ed.2d 90 (1974)*; *Conley, 355 U.S. at 45, 78 S.Ct. at 102*. All well-pleaded facts and allegations in the plaintiff's complaint must be taken as true, *Ed Miniat, Inc. v. Globe Life Ins. Group, Inc., 805 F.2d 732, 733 (7th Cir. 1986)*, and the plaintiff is entitled to all reasonable inferences that can be drawn therefrom. "Furthermore, a complaint is not required to allege all, or any, of the facts logically entailed by the claim. . . . [A] complaint does not fail to state a claim merely because it does not set forth a complete and convincing picture of the alleged wrongdoing." *American Nurses Ass'n v. State of Illinois, 783 F.2d 716, 727 (7th Cir. 1986)*.

Discussion

A. Sherman Act and Illinois Antitrust Act

Counts I and II of defendants' counterclaim assert causes of action for antitrust violations under *section 2* of the Sherman Act, *15 U.S.C. § 2*, and under the Illinois Antitrust Act's monopolization provision. Ill. Rev. Stat. ch. 38, **[*7]** § 60-1-60-11. Defendants contend that certain conduct of the plaintiffs, including initiating this federal court action, constitutes acts of monopolization in the market of racing form publications. Plaintiffs do not challenge defendants' claim on its face, but instead assert a defense.

Plaintiffs contend that they cannot be held liable under either the Sherman Act or the Illinois Antitrust Act because filing this lawsuit is a legitimate attempt to seek redress through the courts and is therefore protected under the Noerr-Pennington doctrine. In response, defendants argue that the plaintiffs' acts are actually an attempt to interfere with a competitor's business and thus, fall within the "sham" exception to Noerr-Pennington protection. Defendants claim they have pled sufficient facts to survive a motion to dismiss, particularly because whether a party's conduct is a good-faith use of the courts to seek legal redress or instead an attempt to interfere with competition is a fact-specific question.

HN3[] The Noerr-Pennington doctrine provides immunity from antitrust liability for bona fide efforts to obtain or influence legislative, executive, judicial or administrative action. 7 von Kalinowski, **[*8]** Antitrust Laws and Trade Regulation § 46.04 (1989). The doctrine traces its roots to the case of *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127 (1961)*, in which a campaign by the defendant railroad designed to influence the passage and enforcement of laws which would hurt the trucking business was found to be immune from the antitrust laws. *Noerr, 365 U.S. at 135*. The doctrine was expanded in *United Mine Workers v. Pennington, 381 U.S. 657 (1965)*, to efforts to influence administrative agencies, and in *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508 (1972)*, to attempts to influence adjudicatory bodies.

The source of the doctrine is two-fold. The Noerr court held that activity which could legitimately fall within the Sherman Act's parameters was not covered by the statute when such activity was directed at the political branches. The holding was based in part on the original purposes of the Sherman Act which did not include regulating political activity. *Noerr, 365 U.S. at 135-36*. Additionally, the Court reasoned that prohibiting such conduct could very well violate the *First Amendment*. Id. However, as **[*9]** the Noerr court hinted, *Noerr, 365 U.S. at 144* ("[t]here may be situations in which a publicity **[**2040]** campaign, ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and the application of the Sherman Act would be justified."), and the California Motor court elaborated that ***HN4***[] litigation brought not in an effort legitimately to obtain redress or influence an adjudicatory or other political body but instead to interfere with a competitor is not protected under the Noerr-Pennington doctrine. California Motor, 404 U.S. at 661-62. Such activity is not protected by the *First Amendment* and falls under the "sham" exception to the Noerr-Pennington doctrine.

Thus, ***HN5***[] judicial proceedings instituted without probable cause, and regardless of merit, are not protected from antitrust scrutiny by Noerr-Pennington. *California Motor, 404 U.S. at 513*. This Circuit has expanded the "sham" exception and found that the institution of meritorious proceedings can also fall under the "sham" exception. The Seventh Circuit has stated that ***HN6***[] a single suit brought **[*10]** only because of the costs litigation imposes on the other party may also fall within the "sham" exception. *Grip-Pak Inc. v. Illinois Tool Works Inc., 694 F.2d 466 (7th Cir. 1982)* ("many claims not wholly groundless would never be sued on for their own sake; the stakes discounted by the probability of winning, would be too low to repay the investment in litigation"), cert. denied, *461 U.S. 958 (1983)*.

In light of the Seventh Circuit's Grip-Pak decision, we find that defendants have alleged a set of facts which would entitle them to relief. Although plaintiffs insist that their claims are not baseless, this is not enough to earn Noerr-Pennington protection as a matter of law. Defendants may demonstrate that even though plaintiffs' claims were viable, the benefits plaintiffs hoped to reap were so minimal that the true purpose of instituting litigation could only be to suppress competition. Moreover, ***HN7***[] whether conduct is a genuine attempt to influence government action or avail oneself of judicial process or instead is merely a sham, is a question of fact. *Clipper Express v. Rocky Mountain Motor Tariff, 690 F.2d 1240* (9th Cir), cert. denied *459 U.S. 1227 (1982)*. **[*11]** Thus, this is a particularly inappropriate challenge on a motion to dismiss.

Additionally, even were this Court to find plaintiffs' litigation activities protected, a question potentially resolvable on summary judgment, this would not entirely dispose of defendants' antitrust count. Defendant makes a number of other allegations to support their monopolization claim. Thus, while the harassing litigation allegation seems most significant, plaintiffs' conduct in allegedly threatening the racetracks which carried both plaintiffs' and defendants' racing forms must also be addressed to undermine the monopolization claim.

Finally, although neither party addresses this issue, it is necessary to determine whether the Noerr-Pennington doctrine applies to the Illinois Antitrust Act. Ill. Rev. Stat. ch. 38, para. 60-1-60-11 (1987). The parties apparently assume the doctrine applies to limit the Illinois Act's scope.

As discussed previously, the Noerr-Pennington doctrine finds its source in both the *First Amendment* and the purpose underlying the Sherman Act. Clearly, to the extent the Noerr-Pennington doctrine is grounded in the *First Amendment*, it also applies to immune from Illinois' **[*12]** ***antitrust law*** that activity which implicates the *First Amendment* right to influence governmental action.

Similarly, the Illinois Act instructs that it is to be construed in a manner consistent with federal antitrust laws when the statutory language of the two antitrust schemes are the same or similar. Ill. Rev. Stat. ch. 38, para. 60-11. Thus, to the extent the Noerr-Pennington doctrine limits a federal antitrust statute, it would appear also to limit an Illinois provision embodying similar language and purpose. Consequently, since the monopolization provision is nearly identical to the Sherman Act's *section 2*, the Noerr-Pennington doctrine would apply to the extent the doctrine relies for justification on the language and purpose of the Sherman Act. P. Tone & J. Stifter, Historical & Practice Notes Ill. Rev. Stat. ch 38, § 60-1 (3) (1987) (scope of Illinois monopolization provision essentially same as Sherman Act *§ 2*; only difference is that Illinois does not incorporate structural theory, i.e., there is no liability in Illinois for mere existence of monopoly plus intent to exercise power, liability in Illinois turns on abuse of monopoly power). It follows then that the "sham" **[*13]** exception is applicable as well.

Consequently, the previous discussion applies to Count II of defendants' counterclaim as well as Count I. We find, therefore, that defendant has pled facts sufficient to state a claim for monopolization under the Illinois Antitrust Act.

B. Abuse of Process

Count V of defendants' counterclaim sets forth the allegations defendants believe support a cause of action for abuse of process. **[**2041]** While the gist of the count is that this suit was filed with malice and for the purpose of harassing defendants, the defendants also rely on the plaintiffs' acquisition of a temporary restraining order to support their claim. Plaintiffs challenge this count on the ground that defendants have failed to plead one of the elements of the tort of abuse of process. Specifically, plaintiffs contend defendants have failed to plead any improper act in the plaintiffs' use of process. We disagree.

HN8[] Two elements are required to plead a cause of action for abuse of process: (1) the existence of an ulterior purpose or motive for the use of regular court process; and (2) an act in the use of process not proper in the regular prosecution of a suit. *McGrew v. Heinhold Commodities,* ***[*14]*** *Inc., 147 Ill. App.3d 104, 497 N.E.2d 424, 429 (1st Dist. 1986)*. The second element is most critical, and "[t]he test for sufficiency of the allegation pertaining to the second element is whether process has been used to accomplish some result which is beyond the purview of the process." *Doyle v. Schlensky, 120 Ill. App.3d 807, 816, 458 N.E.2d 1120, 1128 (1st Dist. 1983)*. ***HN9***[] "Process" is "any means used by the Court to acquire or exercise jurisdiction over a person or over specific property." *Holiday Magic, Inc. v. Scott, 4 Ill. App.3d 962, 282 N.E.2d 452 (1st Dist. 1972)*. "Process" is action that emanates from the court and must therefore be distinguished from pleadings which are created and filed by the litigants. *Holiday Magic, 282 N.E.2d at 456*. Accordingly, the mere institution of a proceeding, even a proceeding that has no foundation in law or fact, and brought merely to harass, does not constitute abuse of process. *Doyle, 458 N.E.2d at 1128*. The gist of the tort is the abuse of the court's power or "process" in conjunction with the action. Id.

Defendants' Count V states a claim for abuse of process. Contrary to plaintiffs' characterization, this count does **[*15]** not rely solely on allegations that plaintiffs instituted this suit out of malice. Indeed, defendants' paragraph 44 sets forth an allegation that plaintiffs invoked the Court's powers by seeking and obtaining a temporary restraining order. Defendants assert that plaintiffs sought this order not for the purpose for which it was created, but instead to cause defendants severe economic hardship, thereby eliminating defendants as competitors. We find, therefore, that defendants have sufficiently pled an act which constitutes an abuse of process.

Plaintiffs reliance on the case of *Alberto-Culver Co. v. Andrea Dumon, Inc. 295 F. Supp. 1155 (N.D. Ill. 1969)* is misplaced. In Alberto-Culver, as here, the defendant brought a counterclaim on an abuse of process theory. However, unlike this case, the Alberto-Culver defendant alleged that the institution of proceedings constituted the act of abuse. The Alberto-Culver court held that ***HN10***[] plaintiffs' mere initiation of suit, even if done without probable cause, did not constitute an abuse of process. *Alberto-Culver, 295 F. Supp. at 1160*.

C. Injunction Bond

Plaintiffs challenge defendants' final count in which defendants seek **[*16]** recovery on the injunction bond provided by plaintiff as a condition of obtaining the temporary restraining order. Defendants' count sets forth allegations that the temporary restraining order was improperly granted due to plaintiffs' misrepresentations to the Court. Consequently, defendants assert they are entitled to forfeiture of the bond to cover damages incurred during the pendency of the temporary restraining order. Plaintiffs contend that the Court's refusal to extend the preliminary injunction does not support a finding that the temporary restraining order was wrongly granted and that such a finding must await resolution of the merits. Accordingly, plaintiffs view this claim as premature. Additionally, plaintiffs assert, without elaboration, that this claim does not state a cause of action.

Federal Rule of Civil Procedure 65 sets out the general guidelines for obtaining temporary and permanent injunctive relief in the federal courts. *Fed. R. Civ. P. 65*. Relevant to this inquiry is *Rule 65(c)*, which states that "no ***HN11***[] restraining order or preliminary injunction shall issue except upon the giving of security by the applicant . . . ." *Fed. R. Civ. P. 65(c)*. The purpose of the provision **[*17]** is to enable the enjoined party to secure indemnification for injury which may accrue during the pendency of a wrongfully issued equitable order. 11 Wright & Miller, Federal Practice and Procedure § 2954 (1986). Here, defendants claim that the temporary restraining order was wrongfully issued and seek redress through forfeiture of the bond.

Rule 65's counterpart, *Rule 65.1* was added in 1966 and sets forth the procedures for obtaining relief through enforcement of a bond required or permitted by the Federal Rules of Civil Procedure. *Fed. R. Civ. P. 65.1*. *Rule 65.1* provides two methods of enforcement. First, the party wrongfully restrained or enjoined is entitled to bring an independent action against the surety. Alternatively, **[**2042]** the rule provides for enforcement through a motion procedure. *Fed. R. Civ. P. 65.1*. The motion procedure was designed to allow a claim to be made against the surety without resort to an independent action. 11 Wright & Miller, Federal Practice and Procedure § 2972 (1986).

The language of *Rule 65.1* addresses only judgments against surety, nonetheless, the summary motion procedure has been found applicable to the principal as well. *Coyne-Delany v. Capital Dev. **[*18]** Bd. of State of Ill., 717 F.2d 385 (7th Cir. 1983)*. Thus, as the summary procedure is applicable to both principal and surety, it follows that an independent action may be initiated against either party. Accordingly, defendants' counterclaim to enforce the injunction bond states a valid cause of action. [1]

D. Trademark and Copyright

In Counts III and IV of their counterclaim, defendants request cancellation of both plaintiffs' trademark and copyright registrations. Before analyzing the substance of these claims, we note that neither count asserts a proper counterclaim. Plaintiffs **[*19]** state causes of action for trademark and copyright infringement and therefore defendants' challenges to their validity would be more properly asserted as affirmative defenses. Defendants do not seek independent relief but instead seek to negate liability.

---

[1] Defendants are entitled to seek relief through *Rule 65.1*'s summary procedure. However, a motion under *Rule 65.1* cannot precede a final determination on the merits. 11 Wright & Miller, Federal Practice and Procedure § 2972 (1986). Where an injunction bond is at issue, such a final determination occurs when it is finally determined that plaintiff was not entitled to the restraining order or upon dissolution of the injunction or failure to carry the burden of proof at the hearing on the preliminary injunction. See *Rocky Mountain Timber Corp. v. Federal Ins. Co., 502 F. Supp. 433, 435 (D.C. Or. 1980)*.

As ***HN12***[] affirmative defenses, these counts are subject to a motion to strike as opposed to a motion to dismiss. *Fed. R. Civ. P. 12(f)*. Motions under *Rule 12(f)* are viewed with disfavor and infrequently granted. *Garza v. Chicago Health Club, Inc., 347 F. Supp. 955, 962 (N.D. Ill. 1972)*. To succeed on a motion to strike, it must be shown that the "allegations being challenged are so unrelated to plaintiff's claims as to be unworthy of any consideration as a defense." 5 Wright & Miller, Federal Practice and Procedure § 1380 (1986). However, we find defendants' claims of copyright and trademark invalidity withstand scrutiny under the standards applicable to both motions to strike and motions to dismiss.

1. Trademark

Count III seeks cancellation of plaintiffs' trademark registration on two alternative grounds. First, defendants claim that the plaintiffs' marks are generic. Alternatively, defendants contend that plaintiffs' marks represent **[*20]** the common descriptive names of the racing forms. Plaintiffs take issue with the wording of defendants' counterclaim, directing the Court's attention to the allegation stating that:

The Red Sheet and the Green Sheet have been used by W&B and the public as the common descriptive names of their handicapping periodicals for so long, that in the minds of the purchasing public interested in such documents, the names . . . mean the products themselves.

Plaintiffs contend that the underlined reference suggests that plaintiffs' trademarks have come to be identified specifically with the plaintiffs' products and thus have developed secondary meaning. Secondary meaning, of course, is indicative of a particularly strong mark. We disagree with plaintiffs' interpretation of this count.

Plaintiffs pull the phrase on which they focus out of its context. It is clear upon a complete reading of the count that defendants are asserting that plaintiffs' marks have become generic. Indeed, the defendants contend that "in the minds of the purchasing public interested in such documents," plaintiffs' trademarks "mean the products themselves." This is precisely what the term "generic" means as used **[*21]** in the Lanham Act. See *Liquid Controls Corp. v. Liquid Control Corp., 902 F.2d 934 (7th Cir. 1986)* (a "generic" term is one commonly used as the name of a kind of good; unlike trademark which identifies source, generic term specifies genus of which particular product is species). Accordingly, we find that defendants have set forth an appropriate affirmative defense.

In their opposition to this motion, defendants state that they also challenge plaintiffs' trademarks on the ground that the marks are "merely descriptive." While this is a valid ground for challenging a trademark, defendants' counterclaim does not embody this challenge. Although defendants use the terms "common descriptive name" to describe plaintiffs' trademark, it is clear from the context that defendants use the phrase to **[**2043]** allege that the marks have become generic. A "merely descriptive" mark is something entirely different. ***HN13***[] A descriptive mark, as the term indicates, is one that describes certain essential characteristics of the product. 3 Callman on Unfair Competition, Trademark & Monopolies § 18.01 (4th ed. 1989). A descriptive mark cannot be a valid trademark because instead of identifying "source," it identifies **[*22]** product. Id. § 17.02. Consequently, it would be unfair to pull such terms from the public domain and prohibit their use by competitors because the term is likely to most accurately communicate the nature of the product and its qualities to consumers. Id. § 18.01. Defendants' count does not implicate this defense but instead discusses the flaw in plaintiffs' mark as a problem that has developed over time, through use of the mark. A descriptive term, in contrast, is invalid at its conception. Thus, if defendants intend to challenge plaintiffs' marks as "merely descriptive" they must amend their counterclaim.

2. Copyright

Defendants attack on plaintiffs' copyright is straightforward. Plaintiffs published a number of their handicapping periodicals without copyright notices and thus defendants assert that plaintiffs have forfeited copyright protection. Plaintiffs counter by using as a shield this Court's denial of defendants' motion for summary judgment on the copyright issue. Defendants' motion for summary judgment challenged the validity of plaintiffs' copyright on the same ground that defendants now assert as an affirmative defense. Plaintiffs apparently interpret the Court's **[*23]** ruling on summary judgment as settling the issue.

As determined in this Courts ruling on defendants' motion for summary judgment, this copyright action falls under the purview of the Copyright Act of 1909. Memorandum Opinion and Order, Wabash Publishing Co. v. Flanagan, No. 89 C 1923 slip op. at 3 (N.D. Ill. May 17, 1989). Accordingly, whether defendants' defense is viable is governed by section 21 of that Act. Section 21 of the 1909 Act provides:

HN14[] Where the copyright proprietor has sought to comply with the provisions of this title with respect to notice, the omission by accident or mistake of prescribed notice from a particular copy or copies shall not invalidate the copyright. . . .

The dispositive issue in applying this section is what constitutes "a particular copy or copies."

HN15[] Under the 1909 Act, determining whether the number of published copies from which notice was omitted was sufficiently small as to constitute "a particular copy or copies" turned on the relation of such number to the total number of copies published. J. *Nimmer on Copyright § 7.13[A]*. For example, in *United Merchants & Mfrs. Inc. v. Sarne Co., 278 F. Supp. 162 (S.D.N.Y. 1967)*, the court declined **[*24]** to find forfeiture because defendant was able to show that the copyright notice was missing from between 42 and 500 yards out of 325,000 yards of fabric. The court held that such a minor omission did not work a forfeiture.

The question of what constitutes a de minimis number is an issue of fact which must be dealt with on a case-by-case basis. Indeed, our denial of defendants' motion for summary judgment was based on our inability to find that the number of copies published by plaintiffs without notice was de minimis as a matter of law. Accordingly, in contrast to plaintiffs' interpretation of this holding, defendants' challenge was not found to be without merit. We simply found that a factual dispute existed as to the relevancy of the number of plaintiffs' unmarked copies.

It is clear then that defendants' defense survived the motion for summary judgment. It is also clear that defendants have asserted a defense which survives this motion. It is still possible that the number of copies plaintiffs published could have the effect of invalidating plaintiffs' copyright. Defendant is entitled to the opportunity to demonstrate that the omission had this effect.

Conclusions

For the reasons **[*25]** cited above, we deny plaintiffs' motion to dismiss and uphold each of defendants' counterclaims and affirmative defenses. We note that while plaintiffs have not presented an argument on this point, we cannot conclude that defendants' affirmative defense challenging the validity of plaintiffs' trademark asserts "descriptiveness" as a ground for attack. Thus, without amendment, defendants' pleading limits them to challenging the mark as "generic."

Py Small Boats, Inc. v. International Marine Marketing Corp.

United States District Court for the District of Rhode Island

March 2, 1990, Decided

C.A. No. 89-0317B

Reporter
1990 U.S. Dist. LEXIS 3906 *; 16 Fed. R. Serv. 3d (Callaghan) 452

PY SMALL BOATS, INC. v. INTERNATIONAL MARINE MARKETING CORP. and BILL HUFF AND ASSOCIATES, INC.

Core Terms

trademark, motion to dismiss, counterclaims, logo, sailboat, contacts, personal jurisdiction, deposit, RECOMMENDATION, license, trademark infringement, accessories, purported, royalty

Counsel: **[*1]** BARBERA S. COHEN, (LOCAL COUNSEL).

MATTHEW MEDEIROS, (LOCAL COUNSEL).

Opinion by: HAGOPIAN, Magistrate

Opinion

REPORT AND RECOMMENDATION

JACOB HAGOPIAN, UNITED STATES MAGISTRATE.

The instant matters have been referred to the United States Magistrate for Report and Recommendation pursuant to *28 U.S.C. Section 636*. Before the Court are three motions: (1) the motion to dismiss for lack of personal jurisdiction and improper venue filed by defendant Bill Huff and Associates, Inc. (Huff) pursuant to *Fed.R.Civ.P. 12(b)(2)* and *12(b)(3)*; (2) the motion pursuant to *Fed.R.Civ.P. 67* by plaintiff PY Small Boats, Inc. (PY) to deposit a check in the Court; and (3) plaintiff PY's motion to dismiss defendant International Marine Marketing Corp.'s (IMMC) counterclaims pursuant to *Fed.R.Civ.P. 12(b)(6)*.

STATEMENT OF FACTS

Plaintiff PY's complaint avers the following. PY, a Rhode Island corporation, is a manufacturer and distributor of sailboats and sailboat parts and accessories. Defendant IMMC, an Indiana corporation, distributes sailboat parts and accessories. Defendant Huff, an Indiana corporation, distributes sailboats and sailboats parts and accessories. IMMC and Huff allegedly have sufficient contacts with **[*2]** Rhode Island to subject them to suit in this Court. Plaintiff asserts jurisdiction pursuant to *28 U.S.C. Sections 1331*, *1332* and *1338* and *15 U.S.C. Section 1121*. Pendent jurisdiction over a state law claim is further asserted.

A certain trademark (the name "Laser") was registered on April 20, 1976. The trademark and a logo are associates with a certain type of sailboat. There was a succession of ownership of the trademark and logo, through merger, assignment and name change, by six different corporate entities from 1976-1989. Plaintiff Py alleges that on March 31, 1989, Metcalfe Realty Company Limited (Metcalfe) assigned to PY all right, title and interest in and to the trademark and logo.

Laser International Holdings (1983) Limited (LIH) was one of the corporate entities in the succession of ownership of the trademark and logo. On January 5, 1987, LIH entered into a purchase and sale agreement for the sale of certain physical assets to Laser International Composites, Inc. (LIC). The agreement also provided that, upon meeting certain conditions, LIC would be licensed by LIH to use the trademark and logo. LIC was permitted by LIH to use the trademark and logo pending their meeting **[*3]** of the conditions. Allegedly, LIC never satisfied the conditions, the proposed license was never executed, and in February 1989, the permission given to LIC to use the trademark was terminated and withdrawn.

On or about September 28, 1988, LIC purported to enter into an "Exclusive Trademark and Tradename Licensing Agreement" with defendant IMMC; That agreement purported to grant IMMC an exclusive right to use the trademark.

Plaintiff alleges that defendants IMMC and Huff are currently using the trademark and logo without the permission or authority of PY or its predecessors in interest. Plaintiff has filed claims for trademark infringement (*15 U.S.C. Section 1114*) (Count I), false designation of origin and false description or representation (*15 U.S.C. Section 1125(a)*) (Count II), a state law claim for unfair competition (Count III) and declaratory relief (Count IV). Pursuant to *Fed.R.Civ.P. 67*, plaintiff has moved to deposit with the court a purported royalty check from IMMC.

Defendant IMMC has filed nine counterclaims for trademark infringement, false designation of origin and false descriptions, state trademark infringement, state unfair competition, various antitrust violations **[*4]** under the Sherman Act and state ***antitrust law***, state tortious interference and breach of contract. Defendant Huff has filed a motion to dismiss for lack of personal jurisdiction and improper venue.

DISCUSSION

Plaintiff's Motion Pursuant to Fed.R.Civ.P. 67.

Plaintiff PY, pursuant to *Fed.R.Civ.P. 67*, seeks to deposit in court a purported royalty check from defendant IMMC. Plaintiff claims that defendant IMMC holds no license, thus plaintiff has no right to receive royalty payments. Plaintiff, in its prayer for relief, does seek an accounting of and payment for all sales and profits derived by defendant IMMC from its alleged infringement. Defendant objects to the deposit sought by plaintiff.

Fed.R.Civ.P. 67 provides that in an action in which judgment for a sum of money is sought, a party may, by leave of court, deposit all or any part of such sum with the court. Plaintiff here seeks judgment for all sales and profits wrongfully derived by defendant IMMC.

[T]here are situations in which a litigant may wish to be relieved of responsibility for a sum or thing, but continue to claim an interest in all or part of it. In these cases the deposit-in-court procedure should be available. **[*5]** *Fed.R.Civ.P. 67*, Notes of Advisory Committee on 1983 Amendments to Rules.

Plaintiff PY asserts the right to all sales and profits, or alternatively, if defendant IMMC is found to hold a license, the right to royalty payments. Defendant IMMC asserts a right to damages if it prevails in this action. I find that deposit in court of the purported royalty check pursuant to *Fed.R.Civ.P. 67* is appropriate in the instant action. Plaintiff is "relieved of responsibility" for the check, yet continues to claim an interest in it. Defendant IMMC suffers no prejudice thereby. Therefore, plaintiff's motion pursuant to *Fed.R.Civ.P. 67* should be granted.

Plaintiff's Fed.R.Civ.P. 12(b)(6) Motion to Dismiss Defendant IMMC's Counterclaims

Plaintiff PY urges in argument that counterclaims I-VII of defendant IMMC's nine counterclaims must be dismissed for failure to state a claim upon which relief can be granted. Plaintiff's extensive memorandum sets forth numerous well-argued grounds in support of its motion to dismiss. Defendant IMMC, however, denies that PY exclusively holds all rights in and to the trademark and logo. This factual averment is central to the instant action and provides the foundation **[*6]** for defendants counterclaims.

Fed.R.Civ.P. 12(b)(6) is unequivocal. In considering a motion to dismiss under *Fed.R.Civ.P. 12(b)(6)*, the pleadings must be viewed in the light most favorable to the non-moving party, here defendant IMMC. The burden is upon the moving party, here the plaintiff, to establish that defendant can prove no possible set of facts in support of its claim that would entitle it to relief. *Conley v. Gibson, 355 U.S. 41 (1957)*; *Harper v. Cserr, 544 F.2d 1121 (1st Cir. 1976)*.

Dispositive of plaintiff's urgings, without articulating each and every one, I find that plaintiff cannot satisfy its burden under *Fed.R.Civ.P. 12(b)(6)*. The factual issue concerning exclusivity of trademark rights is the key ingredient for success on the merits for either party. Also, in an action for trademark infringement or unfair competition, the crucial issue is the likelihood of confusion of purchases. *Universal City Studios, Inc. v. Ninetendo Co., Ltd., 746 F.2d 112, 115 (2d Cir. 1984)* (citations omitted). "The solution of this problem . . . depends upon a consideration of the facts and circumstances in each case." *Plus Products v. Plus Discount Foods Inc., 722 F.2d 999,* ***[*7]*** *1003 (2d Cir. 1983)*. Thus, dismissal pursuant to *Fed.R.Civ.P. 12(b)(6)* is rarely appropriate, since likelihood of confusion is generally a question of fact. *Eagle's Eye, Inc. v. Ambler Fashion Shop, Inc., 627 F. Supp. 856 (E.D.Pa. 1985)*. Additionally, counterclaims of antitrust violations are a direct defense to a trademark enforcement action. *15 U.S.C. Section 1115 (b)(7)*; *Minnetonka Inc. v. Sani-Fresh Int'l., Inc., 103 F.R.D. 377 (D. Minn. 1984)*.

I find that defendant's counterclaims are arguable, though I recognize that several factual averments are not plead with particularity, but are instead made "upon information and belief." Plaintiff cannot demonstrate that defendant can prove no set of facts upon which relief can be granted. Moreover, it is virtually impossible to fully appraise defendant's counterclaims from the record now before the Court. Therefore, trial on the merits of defendant's counterclaims is necessary.

Defendant Huff's Motion to Dismiss Pursuant to Fed.R.Civ.P. 12(b)(2) and *12(b)(3).*

Defendant Huff has filed a motion to dismiss for lack of personal jurisdiction and improper venue. Defendant argues that it has had no contact with Rhode Island after **[*8]** March 31, 1989 when plaintiff allegedly obtained the trademark rights sued upon in this action. Prior to that date, defendant concedes that it ran ads in a nationally circulated magazine and took purchase orders from Rhode Island buyers. Plaintiff avers that Huff is "using the Trademark and the Logo in connection with advertising, offering for sale, selling, and distributing sailboat parts and accessories throughout the United States, including the State of Rhode Island." Plaintiff's Complaint, Paragraph 33. Allegedly, Huff has sufficient contacts with Rhode Island to be subjected to suit in this Court.

This action arises from alleged trademark infringement by two corporate defendants. Defendant Huff urges dismissal for lack of personal jurisdiction. The initial inquiry is whether the Court had specific or general jurisdiction over defendant Huff. "Where plaintiff's claims 'arise out of' or are 'directly related' to defendant's contacts with the forum state, a court exercises specific jurisdiction." *Dupont Tire Service Center, Inc. v. North Stonington Auto-Truck Plaza, Inc., 659 F. Supp. 861, 863 (D.R.I. 1987)*, citing *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466* ***[*9]*** *U.S. 408, 414 n. 8 (1984)*. A court exercises general jurisdiction where plaintiff's claims do not so arise or relate. *Id*., citing *Helicopteros, supra at 414 n. 9*. General jurisdiction requires "continuous and systematic general business contacts." *Helicopteros, supra at 416*.

The sufficiency of minimum contacts is grounded in fact and thus can only be decided on a case by case basis. *E. F. Hutton & Co. v. Tourism and Development Corp., 455 F. Supp. 981, 984 (D.R.I. 1978)*. Defendant Huff's business involves sailboats and sailboat parts and accessories. Huff advertised in a nationally circulated magazine, and took purchase orders from Rhode Island buyers as sales representative for a Canadian boat manufacturer. Huff asserts, however, that it never shipped any goods into Rhode Island. Defendant Huff states that it has not taken any orders for goods from persons in Rhode Island after March 31, 1989, when plaintiff alleges it acquired the trademark rights sued upon in this action.

I find that defendant Huff's business contacts with the Rhode Island forum are sufficient for this Court to exercise specific personal jurisdiction. Huff advertised in Rhode Island and took **[*10]** orders from Rhode Island buyers. It is uncontradicted that Huff's business contacts with the Rhode Island forum involved the Laser trademark and logo which is the subject matter of the instant action. Huff argues that its activities were authorized by LIC, which, as discussed earlier, was allegedly licensed to use the trademark and logo until sometime during February, 1989. After February 1989, Huff asserts that it "continued to perform duties as a Laser sales representative, this time under the direct authority of G. Gordon Clayton, PY's President." Defendant Huff's Reply Memorandum in Support of its Motion to Dismiss, p.3. I find that these facts demonstrate the requisite contacts necessary for this Court to exercise specific personal jurisdiction over defendant Huff. Further, venue in this Court is proper, given my finding of personal jurisdiction over defendant Huff. *28 U.S.C. Section 1391(b)* and *(c)*.

A Magistrate's Report and Recommendation is filed herewith pursuant to Title *28 U.S.C. Section 636(b)(1)*B. Any objection to this Report must be specific and must be filed with the Clerk of Court within ten (10) days of the receipt of the Report. Rule 32, Local Rules of Court, *Rule **[*11]** 72(b), Fed.R.Civ.P.* Failure to timely file specific objections to the Magistrate's Report, findings, or recommendations is a waiver of the right to review by the District Court. *Park Motor Mart Inc. v. Ford Motor Co., 616 F.2d 603 (1st Cir. 1980)*; *U.S. v. Valencia-Copete, 792 F.2d 4 (1st Cir. 1986)*.

A review of the Magistrate's Report by a District Judge does not necessarily confer entitlement as of right to a *de novo* hearing and does not permit consideration of issues not raised before the magistrate. *Paterson-Leitch v. Massachusetts Elec., 840 F.2d 985 (1st Cir. 1988)*.

The party seeking review must arrange for a transcript of the record forthwith.

RECOMMENDATION

Plaintiff's *Fed.R.Civ.P. 67* motion for deposit with the Court should be granted. Plaintiff's *Fed.R.Civ.P. 12(b)(6)* motion to dismiss defendant IMMC's counterclaims should be denied. Defendant Huff's motion to dismiss pursuant to *Fed.R.Civ.P. 12(b)(2)* and *12(b)(3)* should be denied. I so recommend to the Court.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Governments > Courts > Judicial Precedent

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN1[] **Standards of Review, Abuse of Discretion**

The decision to grant or deny a preliminary injunction is within the sound discretion of the district court. The appellate court may reverse the district court's decision only if the district court has committed an abuse of discretion, if the decision is based upon an error of law or if the court misapplied the law to particular facts. When the questions on appeal involve law and precedent on subjects not exclusively assigned to the Federal Circuit, the court applies the law which would be applied by the regional circuit.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Evidence > Inferences & Presumptions > General Overview

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN2[] **Injunctions, Preliminary & Temporary Injunctions**

In order to obtain a preliminary injunction, a movant must show: (1) a strong likelihood of success on the merits, (2) the possibility of irreparable injury to the plaintiff if the preliminary relief is not granted, (3) the balance of hardships favoring the plaintiff, and (4) advancement of the public interest. A party may meet the burden of establishing a need for a preliminary injunction under these four factors by demonstrating either: (1) a combination of probable success on the merits and the possibility of irreparable injury, or (2) that serious questions of law are raised and the balance of hardships tips sharply in its favor.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Injunctions, Preliminary & Temporary Injunctions**

A preliminary injunction should not issue on the basis of affidavits alone. Moreover, a district court should be wary of issuing an injunction based solely upon allegations and conclusory affidavits submitted by plaintiff.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] **Injunctions, Preliminary & Temporary Injunctions**

When granting an injunction, *Fed. R. Civ. P. 52(a)* requires that a court set forth the findings of fact and conclusions of law which are the basis of its decision. The district court need not make binding findings of fact, but at the very least, must find probabilities that the necessary facts can be proved.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Governments > State & Territorial Governments > Boundaries

Patent Law > Ownership > Patents as Property

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN5[] **Intellectual Property, Ownership & Transfer of Rights**

A patent owner may not take the property right granted by a patent and use it to extend his power in the marketplace improperly, that is, beyond the limits of what Congress intended to give in the patent laws. The fact that a patent is obtained does not wholly insulate the patent owner from the antitrust laws.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN6[] **Bad Faith, Fraud & Nonuse, Fraud**

When a patent owner uses his patent rights not only as a shield to protect his invention, but as a sword to eviscerate competition unfairly, that owner may be found to have abused the grant and may become liable for antitrust violations when sufficient power in the relevant market is present. Therefore, patent owners may incur antitrust liability for enforcement of a patent known to be obtained through fraud or known to be invalid, where license of a patent compels the purchase of unpatented goods, or where there is an overall scheme to use the patent to violate antitrust laws.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Patent Law > Remedies > Equitable Relief > Injunctions

HN7[] **Injunctions, Preliminary & Temporary Injunctions**

A preliminary injunction entered without a sufficient factual basis and findings, though intended to maintain the status quo, can offend the public policies embodied in both the patent and antitrust laws.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Patent Law > Remedies > Equitable Relief > Injunctions

HN8[] **Injunctions, Preliminary & Temporary Injunctions**

A "serious question" is characterized as one where the movant seeking an injunction has a fair chance of success on the merits.

Patent Law > US Patent & Trademark Office Proceedings > Continuation Applications > General Overview

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN9[] **US Patent & Trademark Office Proceedings, Continuation Applications**

As patents are cloaked in a presumption of validity, a patent infringement suit is presumed to be brought in good faith.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Nonprice vertical restrictions on the location of resale of products are not per se violations, but are to be judged according to the "rule of reason", wherein all circumstances are weighed in deciding whether a restrictive practice is an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

License restrictions on the foreign export of a patented product do not violate antitrust laws. Neither does limiting the number of patented products which can be distributed constitute a per se violation.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN12[] **Injunctions, Preliminary & Temporary Injunctions**

The granting of a preliminary injunction is an extraordinary remedy. The appellate court must examine carefully extraordinary relief which precludes the filing of civil lawsuits for an indeterminate period of time. A preliminary injunction must be supported by sufficient factual evidence and a sufficient basis must be articulated by the district court in the order granting the injunction.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > General Overview

HN13[] **Injunctions, Preliminary & Temporary Injunctions**

A preliminary injunction issued without notice, motion, hearing or evidence should be vacated.

Counsel: Morgan Chu, Richard C. P. De Bodo, and Dorette S. Feit, Irell & Manella, of Los Angeles, California, argued for Plaintiffs/Cross-Appellants. Robert Steinberg, Irell & Manella, of Los Angeles, California, of counsel.

Thomas G. Gallatin, Jr., Mudge, Rose, Guthrie, Alexander and Ferdon, of New York, New York, argued for Defendants-Appellants. With him on the brief was John J. Kirby, Jr. Also on the brief were George A. Cumming, Jr., Jeffrey S. Kingston and Thomas M. Kingston, Brobeck, Phleger & Harrison, of San Francisco, California.

Opinion by: NORGLE

Opinion

[*1035]** **[*1574]** Norgle, District Judge.

Atari Games Corporation, (Atari) and its wholly owned subsidiary, Tengen Inc. (Tengen), have brought suit **[**2]** against Nintendo of America, Inc. and Nintendo Co., Ltd., (collectively Nintendo) for unfair competition and violations of *section 2* of the Sherman Anti-Trust Act, *15 U.S.C. § 2 (1988)*, based upon alleged monopolization and attempted monopolization of the markets for home video game machines and home video games and game cartridges playable on the Nintendo Entertainment System. Nintendo has also brought suit against Atari and Tengen for alleged patent infringement, Lanham Trademark Act and RICO violations, breach of contract, unfair competition and tortious interference with contract. Atari and Tengen sought a preliminary injunction enjoining Nintendo from filing lawsuits for contributory infringement against customers of Atari. The district court granted the motion but also enjoined Atari and Tengen from filing suit against Nintendo customers. Both parties have appealed. For the following reasons, the court vacates the preliminary injunction and remands this action to the district court for disposition consistent with this opinion.

BACKGROUND

Nintendo manufactures the Nintendo Entertainment System (NES). The NES has met with enormous success and Nintendo now **[**3]** is the undisputed industry leader in home video game entertainment, occupying an 80% share of the market for home video games. The NES includes a base console which allows the playing of various video games on a television screen and cartridges containing those games for use in the console. The NES contains a security system, which consists of a master computer chip in the base console and a slave computer chip in the cartridge. Atari says the security system renders it impossible to play a video game cartridge on the NES unless both chips are present. On January 24, 1989, Nintendo obtained a patent on the security system encompassing both the master chip and the slave chip described in the patent as necessary for a game cartridge to be played on the NES.

Tengen obtained a license from Nintendo, the patent owner, for the development and distribution of game software for the NES. Under the licensing agreement, Tengen was to create video games for use on the NES. Nintendo reserved the right to approve the game and manufacture the game cartridge. Nintendo would then sell the completed cartridges to Tengen for distribution. Tengen developed three games for Nintendo: "Pac-Man", "Gauntlet" **[**4]** and "RBI Baseball".

In December 1988, Atari, without obtaining a license from Nintendo, began to manufacture and sell its own Nintendo compatible cartridges which were able to circumvent the NES security system. On December 12, 1988, Atari filed this suit against Nintendo. Atari has asserted that Nintendo is improperly using its patent and greater market share to monopolize the home video game market. Specifically, Atari asserts that, once Nintendo received a patent **[*1575]** on its security **[***1036]** system, Nintendo sent letters to retailers of Nintendo and Atari game cartridges, such as Toys "R" Us and Bradlees, threatening suit for patent infringement against any retailer who continued to sell unauthorized NES compatible game cartridges. Nintendo then filed suit against Atari, alleging among other things patent infringement and Lanham Act and RICO violations.

District Court Proceedings

* The Honorable Charles R. Norgle, United States District Court for the Northern District of Illinois, Eastern Division, sitting by designation.

The suits were consolidated and Atari sought a Preliminary injunction preventing Nintendo from suing retailers of Atari's NES compatible cartridges. The district court granted the preliminary injunction, concluding that the practices alleged by Atari "raised serious questions going to the merits" of **[**5]** Atari's antitrust claims. The court further determined that the balance of hardships and public interest favored imposition of an injunction restraining Nintendo from filing lawsuits against customers, retailers, distributors and dealers of Atari game cartridges. However, the court went further than Atari asked, making the injunction reciprocally binding on Atari and Tengen as well. Both parties then appealed that decision to this court.

OPINION

HN1[] The decision to grant or deny a preliminary injunction is within the sound discretion of the district court. *Xeta, Inc. v. Atex, Inc., 852 F.2d 1280, 1282, 7 U.S.P.Q.2d (BNA) 1471, 1473 (Fed.Cir. 1988)*. This court may reverse the district court's decision only if the district court has committed an abuse of discretion, if the decision is based upon an error of law or if the court misapplied the law to particular facts. *Xeta, 852 F.2d at 1282, 7 USPQ2d at 1473*. When the questions on appeal involve law and precedent on subjects not exclusively assigned to the Federal Circuit, the court applies the law which would **[**6]** be applied by the regional circuit. *Panduit Corp. v. All States Plastic Mfg. Co., 744 F.2d 1564, 1575, 223 U.S.P.Q. (BNA) 465, 472 (Fed.Cir. 1984)*. In this action, the applicable law is that of the Ninth Circuit.

The Ninth Circuit has long held that, ***HN2***[] in order to obtain a preliminary injunction, a movant must show: 1) a strong likelihood of success on the merits, 2) the possibility of irreparable injury to the plaintiff if the preliminary relief is not granted, 3) the balance of hardships favoring the plaintiff, and 4) advancement of the public interest. *Los Angeles Memorial Coliseum Comm. v. National Football League, 634 F.2d 1197, 1200 (9th Cir. 1980)*; *William Inglis & Sons Baking v. ITT Continental Baking Co. Inc., 526 F.2d 86, 87 (9th Cir. 1975)*. A party may meet the burden under these four factors by demonstrating either: 1) a combination of probable success on the merits and the possibility of irreparable injury, or 2) that serious questions **[**7]** of law are raised and the balance of hardships tips sharply in its favor. *Fong v. Lawn, 851 F.2d 1559, 1561 (9th Cir. 1988)*; *L.A. Memorial Coliseum, 634 F.2d at 1197*; *Inglis, 526 F.2d at 88*.

As a general rule, ***HN3***[] a preliminary injunction should not issue on the basis of affidavits alone. *People ex rel. Hartigan v. Peters, 871 F.2d 1336 (7th Cir. 1989)*; *Medeco Sec. Locks, Inc. v. Swiderek, 680 F.2d 37, 216 U.S.P.Q. (BNA) 577 (7th Cir. 1981)*; *Carter-Wallace, Inc. v. Davis-Edwards Pharmacal Corp., 443 F.2d 867, 169 U.S.P.Q. (BNA) 625 (2d Cir. 1971)*. Moreover, a district court should be wary of issuing an injunction based solely upon allegations and conclusory affidavits submitted by plaintiff. *See* *American Passage Media Corp. v. Cass Communications, 750 F.2d 1470 (9th Cir. 1985)* (reversing grant of preliminary injunction of alleged antitrust violations based on conclusory affidavits); *Oakland Tribune, Inc. v. Chronicle Publishing Co., 762 F.2d 1374 (9th Cir. 1985)* **[**8]** (denying preliminary injunction of alleged antitrust violations supported by only two affidavits). ***HN4***[] When granting an injunction, *Rule 52(a)* requires that a court set forth the findings of fact and conclusions of law which are the basis of its decision. *Fed.R.Civ.P. 52(a)*. The district court need not make binding findings of fact, but at the very least, must find probabilities that the necessary facts can be proved. *Sierra On-Line, **[*1576]** Inc. v. Phoenix Software, Inc., 739 F.2d 1415, 223 U.S.P.Q. (BNA) 227 (9th Cir. 1984)*.

A preliminary injunction takes on special significance when the injunction involves patent rights and antitrust allegations. The patent laws were enacted by Congress pursuant to *Article I, section 8 of the United States Constitution*. [1] Congress gave inventors the right to obtain patents on their inventions and thereby gain the right to exclude others from making, using or selling the invention, without the consent of the patent owner, for a period of seventeen **[**9]** years. *35 U.S.C. § 154 (1982)*. Moreover, Congress has specifically granted **[***1037]** patent owners the right to commence a civil suit in order to protect their inventions. *35 U.S.C. § 281 (1982)*; 7 J. Von Kalinowski, *Antitrust Laws and Trade Regulation* at 59-15 (1989). As stated by the Ninth Circuit, "patentees must be

[1] "The Congress shall have Power . . . . To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries . . . ." *U.S. Const. Art. I, § 8*.

permitted to test the validity of their patents in court through actions against alleged infringers." *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 993, 202 U.S.P.Q. (BNA) 342, 348 (9th Cir. 1979)*, *cert. den., 444 U.S. 1025, 100 S. Ct. 688, 62 L. Ed. 2d 659 (1980)*; *see also,* 7 J. Von Kalinowski, *Antitrust Laws and Trade Regulation,* at 59-111 (infringement suits, in and of themselves, do not violate antitrust laws).

[10]** When the patented product is merely one of many products that actively compete on the market, few problems arise between the property rights of a patent owner and the antitrust laws. *SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1203, 209 U.S.P.Q. (BNA) 889, 899 (2d Cir. 1981)*. However, when the patented product is so successful that it creates its own economic market or consumes a large section of an existing market, the aims and objectives of patent and antitrust laws may seem, at first glance, wholly at odds. However, the two bodies of law are actually complementary, as both are aimed at encouraging innovation, industry and competition. *Loctite Corp. v. Ultraseal Ltd., 781 F.2d 861, 876-77, 228 U.S.P.Q. (BNA) 90, 100-101 (Fed.Cir. 1985)*.

There may on occasion exist, therefore, a fine line between actions protecting the legitimate interests of a patent owner and ***antitrust law*** violations. On the one hand, the patent owner must be allowed to protect the property right given to him under the patent laws.

On the other hand, **[**11]** ***HN5***[] a patent owner may not take the property right granted by a patent and use it to extend his power in the marketplace improperly, i.e. beyond the limits of what Congress intended to give in the patent laws. The fact that a patent is obtained does not wholly insulate the patent owner from the antitrust laws. *United States v. Line Material Co., 333 U.S. 287, 308, 76 U.S.P.Q. (BNA) 399, 409, 92 L. Ed. 701, 68 S. Ct. 550 (1948)*; *Miller Insituform v. Insituform of N.A., 830 F.2d 606, 608, 4 U.S.P.Q.2d (BNA) 1463, 1464 (6th Cir. 1987)*, *cert. den., 484 U.S. 1064, 98 L. Ed. 2d 988, 108 S. Ct. 1023 (1988)*; *United States v. Westinghouse Elec. Corp., 648 F.2d 642, 647 (9th Cir. 1981)*. ***HN6***[] When a patent owner uses his patent rights not only as a shield to protect his invention, but as a sword to eviscerate competition unfairly, that owner may be found to have abused the grant and may become liable for antitrust violations when sufficient power in the relevant market is present. Therefore, **[**12]** patent owners may incur antitrust liability for enforcement of a patent known to be obtained through fraud [2] or known to be invalid, [3] where license of a patent compels the purchase of unpatented goods, [4] or where there is an overall scheme to use the patent to **[*1577]** violate antitrust laws. [5]

The danger of disturbing the complementary balance struck **[**13]** by Congress is great when a court is asked to preliminarily enjoin conduct affecting patent and antitrust rights. ***HN7***[] A preliminary injunction entered without a sufficient factual basis and findings, though intended to maintain the status quo, can offend the public policies embodied in both the patent and antitrust laws.

The district court based its grant of the preliminary injunction on the second alternative announced in *Los Angeles Memorial Coliseum and Inglis,* namely that "serious questions" existed and the balance of harms tipped sharply in favor of Atari. ***HN8***[] A "serious question" has been characterized as one where the movant has a fair chance of success on the merits. *Sierra On-Line, Inc., 739 F.2d at 1421*; *Benda v. Grand Lodge of Int'l Ass'n. of Machinists and Aerospace Workers, 584 F.2d 308, 315* (9th Cir.), *cert. dismissed, 441 U.S. 937, 99 S. Ct. 2065, 60 L. Ed. 2d 667 (1978)*. In determining the existence of "serious questions", the **[**14]** district court relied solely upon allegations made by Atari:

---

[2] *Walker Process Equip., Inc. v. Food Mach. and Chem. Corp., 382 U.S. 172, 177, 147 U.S.P.Q. (BNA) 404, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965)*.

[3] *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 202 U.S.P.Q. (BNA) 342 (9th Cir. 1979)*, *cert. denied,* ***444 U.S. 1025, 62 L. Ed. 2d 659, 100 S. Ct. 688 (1980)***.

[4] *Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 86 L. Ed. 363, 62 S. Ct. 402 (1942)*.

[5] *Kobe v. Dempsey Pump Co., 198 F.2d 416, 94 U.S.P.Q. (BNA) 43* (10th Cir.), *cert. denied,* ***344 U.S. 837, 97 L. Ed. 651, 73 S. Ct. 46 (1952)***.

> Atari alleges that Nintendo has engaged in monopolistic practices through its licensing agreements. Specifically, Atari notes that Nintendo, through its licensing agreements: 1) prohibits a licensee from selling Nintendo approved cartridges outside the United States; 2) prohibits a licensee from producing any Nintendo approved games for use on any other home system; 3) requires the licensee to buy Nintendo approved games from Nintendo; 4) limits the number of games which Nintendo will approve of for distribution in the United States. These allegations are supported by the documents submitted, and are not substantially disputed by Nintendo. These allegations, in the Court's view, raise serious questions going to the merits of the case. Although the Court, at **[***1038]** this juncture, is unwilling to make a finding of bad faith prosecution by Nintendo, the allegations, if proved, could result in antitrust liability for Nintendo . . . . Accordingly, the Court finds that this prong of the formulation has been satisfied by Atari.

District Court opinion, p. 3-4 (Citations omitted). This paragraph constitutes the entire basis **[**15]** articulated by the district court for its finding of "serious questions" necessary for the granting of a preliminary injunction.

After examination of the district court's opinion and the record below, this court cannot find a factual basis sufficient to support the findings necessary to grant a preliminary injunction. On the basis of the sparse record before the court, we hold that the granting of a preliminary injunction here to be an abuse of discretion. The district court made no findings of fact, save for the lone finding that "these allegations are supported by the documents submitted, and are not substantially disputed by Nintendo." Nowhere does the district court make a finding that Atari could probably prove its allegations. The district court has not referred to a factual basis for its granting of the preliminary injunction against Nintendo and this court cannot find one. [6] Also absent from its opinion and the record is the district court's basis for expanding the injunction to make it binding on Atari and Tengen.

[16]** Moreover, ***HN9***[] as patents are cloaked in a presumption of validity, a patent infringement suit is presumed to be brought in good faith. *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 996, 202 U.S.P.Q. (BNA) 342, 351 (9th Cir. 1979)*, *cert. denied, 444 U.S. 1025, 62 L. Ed. 2d 659, 100 S. Ct. 688 (1980)*. Yet, the record fails to reflect that Atari came forth with any evidence sufficient to show it had a fair chance of success in overcoming **[*1578]** this presumption of validity and to prove that Nintendo was enforcing its patent in bad faith or expanding its patent rights beyond their proper scope. On the contrary, the district court specifically refused to find that Nintendo was proceeding in bad faith with its patent enforcement. Again, the lone general finding made by the district court is clearly not sufficient to support a finding of a fair chance of success and warrant the imposition of a preliminary injunction.

It also appears from the opinion below that the district court assumes the truth of Atari's antitrust allegations. However, this court cannot **[**17]** find, either in the district court's opinion or anywhere in the record, specific factual findings or the basis for any findings concerning Nintendo's licensing agreement running afoul of the antitrust laws. Many of the restrictions Nintendo places on its licensees are not, as a matter of law, antitrust violations. For example, Atari claims that the clause restricting the sale of game cartridges outside the United States violates antitrust laws. However, the Supreme Court has held that ***HN10***[] nonprice vertical restrictions on the location of resale of products are not per se violations, but are to be judged according to the "rule of reason", wherein all circumstances are weighed in deciding whether a restrictive practice is an unreasonable restraint on competition. *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 57-58, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. In addition, the Ninth Circuit has specifically held that ***HN11***[] license restrictions on the foreign export of a patented **[**18]** product do not violate antitrust laws. *Brownell v. Ketcham Wire & Mfg. Co., 211 F.2d 121, 100 U.S.P.Q. (BNA) 338 (9th Cir. 1954)*. Neither does limiting the number of game cartridges which can be distributed constitute a *per se* violation. *E.I. Du Pont de Nemours & Co., 118 F. Supp. 41, 99 USPQ 402 (D. Del. 1953)*, *aff'd on other grounds, 351 U.S. 377, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *United States v. Parker-Rust-Proofing Co., 61 F. Supp. 805, 65 U.S.P.Q. (BNA) 563 (E.D.Mich. 1945)*; *Aspinwall Mfg. Co. v. Gill, 32 F. 697 (C.C.D.N.J. 1887)*; *see also, Q-Tips v. Johnson & Johnson, 109 F. Supp. 657, 95 USPQ (BNA) 258 (D.N.J. 1951)*. The district court's

[6] Under certain circumstances, a preliminary injunction can issue on the basis of affidavits alone. *International Molders' & Allied Workers' Local Union No. 164 v. Nelson, 799 F.2d 547 (9th Cir. 1986)*. However, due to the competing interests here, reliance solely on plaintiff's allegations and supporting affidavits is an abuse of discretion.

reliance solely on these allegations as a basis for granting the injunction does not meet the requirements for a preliminary injunction and is an abuse of discretion.

The court wishes to stress that, in reversing the district court, it makes no determination of whether an injunction will ultimately be warranted. ***HN12***[] The granting of a **[**19]** preliminary injunction is an extraordinary remedy. *Shelton v. National Collegiate Athletic Ass'n, 539 F.2d 1197 (9th Cir. 1976)*. The court must examine carefully extraordinary relief which precludes the filing of civil lawsuits for an indeterminate period of time. A preliminary injunction must be supported by sufficient factual evidence and a sufficient basis must be articulated by the court in the order granting the injunction. Accordingly, the preliminary injunction is vacated and this **[***1039]** action is remanded to the district court for disposition consistent with this opinion. [7]

[20]** COSTS

Each party to bear its own costs.

VACATED AND REMANDED

End of Document

[7] The district court's injunction order grants a preliminary injunction as to Nintendo, Atari and Tengen. The district court seemed to make the injunction binding on the plaintiffs as a matter of equity. ***HN13***[] A preliminary injunction issued without notice, motion, hearing or evidence should be vacated. *Fed.R.Civ.P. 65*, *Digital Equip. Corp. v. Emulex Corp., 805 F.2d 380, 231 U.S.P.Q. (BNA) 779 (Fed.Cir. 1986)*. In both its brief and oral argument, Nintendo has shown little opposition to vacating the injunction as to Atari and Tengen.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Regulated Practices, Private Actions**

Although use of summary procedures is not prohibited in antitrust cases, summary judgment motions are disfavored in such litigation. Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1* provides that every contract, combination or conspiracy, in restraint of trade or commerce among the several States is declared to be illegal.

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Sherman Act, Claims

To establish a Section 1 of the Sherman Act, 15 U.S.C.S. § 1 claim, a plaintiff must prove the following essential elements: (1) That the defendants entered into a contract, combination, or conspiracy; (2) That this contract, combination, or conspiracy affected interstate commerce; and (3) That this contract, combination, or conspiracy unreasonably restrained such commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In determining whether a restraint on trade unreasonably restricts competition, two different methods of analysis are used, the "per se rule" and the "rule of reason." In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality, they are illegal per se. In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN8[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

There is a general presumption in favor of applying the rule of reason analysis except in those cases where the alleged agreement is manifestly anticompetitive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN9[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Horizontal conspiracies involve agreements among competitors at the same level of competition to restrain trade, such as agreements among manufacturers to fix prices for a given product and geographic market, or among distributors to fix prices for a given market. Vertical conspiracies, on the other hand, involve agreements between competitors at different levels of competition to restrain trade, such as agreements between a manufacturer and its distributors to exclude another distributor from a given product and geographic market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN10[] Price Fixing & Restraints of Trade, Vertical Restraints

A dual distributorship involves a business structure in which one party operates a branch of dealership on the same market level as one or more of its customers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN11[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

A restraint is horizontal not because it has horizontal effects, but because it is the product of a horizontal agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] Price Fixing & Restraints of Trade, Vertical Restraints

Dual distributorship situations are analyzed under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Regulated Practices, Price Fixing & Restraints of Trade

If the factual context renders a plaintiff's claim implausible, if the claim is one that simply makes no economic sense, the plaintiff must come forward with more persuasive evidence to support the claim than would otherwise be necessary.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > Causes of Action > General Overview

HN14[] Price Fixing & Restraints of Trade, Vertical Restraints

Absent an allegation of anti-competitive purpose or effect at the interbrand level, the substitution of one distributor for another does not violate the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

A complaint charging restraint of trade based on a manufacturer's substitution of one distributor for another must allege anticompetitive effect at the interbrand level to survive a *Fed. R. Civ. P. 12(b)(6)* motion for failure to state a violation of *Section 1* of the Sherman Anti-Trust Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN16[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

There is a presumption in favor of the rule of reason standard. Departure from that standard must be justified by demonstrable economic effect, and interbrand competition is the primary concern of the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN17[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Per se rules are appropriate only for conduct that is manifestly anticompetitive, that is, conduct that would always or almost always tend to restrict competition and decrease output. Especially in the vertical restraint context, departure from the rule-of-reason standard must be based on demonstrable economic effect rather than upon formalistic line drawing. A rule of per se illegality for vertical nonprice restraints is not needed or effective to protect intrabrand competition.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN18[] **Regulated Practices, Price Fixing & Restraints of Trade**

Market power is normally inferred from the possession of a substantial percentage of the sales in a market carefully defined in terms of both product and geography.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Monopolies & Monopolization, Attempts to Monopolize**

Interbrand competition is the primary concern of ***antitrust law***. Intrabrand competition is of some concern as well. Inquiries into the scope of competition under *section 1* and *section 2* of the Sherman Act, *15 U.S.C.S. § 1* and *2*, are not precisely the same; stifling intrabrand competition may violate *section 1*, while obtaining a "monopoly" over a given brand would clearly not run afoul of *section 2*.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN20[] **Antitrust & Trade Law, Sherman Act**

The wording of *Mich. Comp. Laws Ann. § 445.772* is virtually identical to that of *section 1* of the Sherman Act, *15 U.S.C.S. § 1*, and therefore, federal precedents interpreting the Sherman Act are considered authoritative in Michigan courts.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN21[] **Public Enforcement, State Civil Actions**

Mich. Comp. Laws Ann. § 445.772 provides that a contract, combination, or conspiracy between two or more persons in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Procedural Matters > Statute of Limitations > General Overview

HN22[] **Statute of Limitations, Time Limitations**

The limitations period applicable to a claim for loss of financial expectancy is the three year limitations period set forth in *Mich. Comp. Laws Ann. § 600.5805(8)*. Such a claim is most similar to a claim for tortious interference with prospective economic relations, to which *Mich. Comp. Laws Ann. § 600.5805(8)* is applied.

Governments > Legislation > Statute of Limitations > Time Limitations

HN23[] Statute of Limitations, Time Limitations

Mich. Comp. Laws Ann. § 600.5805(8) provides that the period of limitations is three years after the time of the death or injury for all other actions to recover damages for the death of a person, or for injury to a person or property.

Governments > Legislation > Statute of Limitations > Time Limitations

HN24[] Statute of Limitations, Time Limitations

Mich. Comp. Laws Ann. § 600.5813 provides that all other personal actions shall be commenced within the period of six years after the claims accrue and not afterwards unless a different period is stated in the statutes.

Opinion

[*516] OPINION ON DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT

WENDELL A. MILES, SENIOR UNITED STATES DISTRICT JUDGE

Now before the Court are the motions of the defendants, The Garrett Corporation and The Cessna Aircraft Company, for summary judgment on plaintiff General Aviation, Inc.'s three-count amended complaint. This action asserts violations of *Section 1* of the Sherman Act, *15 U.S.C. Section 1*, and the Michigan Antitrust Reform Act, *Mich. Comp. Laws Ann. section 445.772*, against both defendants. In addition, the plaintiff asserts a tortious interference claim (labelled "loss of financial expectancy" in the first amended complaint) against Cessna.

FACTUAL BACKGROUND

The Garrett Corporation ("Garrett") is a manufacturer of turboprop and turbofan (jet) engines. Garrett sells these engines to airplane manufacturers, including The Cessna Aircraft Company ("Cessna"). More specifically, Garrett supplied Cessna with an engine known as a "TPE 331-8," which Cessna installed in its "Conquest II," a small turboprop airplane.

Garrett also manufactures replacement parts for its engines. These parts reach consumers through a number of sources. First, Garrett sells the parts directly **[**2]** to consumers at "list price" through its six company-owned service centers in the United States. Garrett also sells TPE 331-8 replacement parts to Cessna at a deep discount, pursuant to a non-exclusive 1977 agreement between the two entities. (Cessna, in turn, sells the parts to Cessna Conquest II dealers at a price still less than Garrett's list price.) In addition, Garrett sells the parts at a discount to independently owned fixed base operators ("FBO's") which Garrett has authorized to perform maintenance and service on its engines ("service centers"). Finally, Garrett sells parts to independent FBO's (not authorized as service centers) at list price. [1]

General Aviation, Inc. ("General") is an FBO headquartered in Lansing, Michigan which services, charters, and sells airplanes. General was a Cessna Conquest dealer from 1977 until 1984, when Cessna refused to renew its franchise. [2] This relationship between Cessna and General, while it lasted, was non-exclusive. As a Cessna Conquest dealer, General could acquire Garrett replacement parts either from Garrett itself at list price, or from Cessna **[**3]** at a lesser price.

From approximately 1980 until 1984, General sought to become a Garrett service center. Becoming a service center would have authorized General to perform certain service functions on TPE 331-8 engines, and would have rendered General eligible for a discount on TPE 331-8 parts purchased **[*517]** directly from Garrett. [3] General was qualified to become a service center. However, upon deciding that it needed a TPE-331-8 service center in western

---

[1] Used Garrett parts are also available to consumers through parts refurbishers.

[2] General brought a previous action against Cessna in this district, No. G85-890-CA5. The Honorable Robert Holmes Bell granted summary judgment to Cessna in that action on December 16, 1988. Cessna advised the court at oral argument on the present motions that an appeal of Judge Bell's order is pending.

[3] As a Cessna Conquest dealer, General was already authorized to perform some services on TPE 331 engines. However, without service center status, any parts which General purchased directly from Garrett would be at list price.

Michigan, Garrett appointed Kal Aero, a Kalamazoo, Michigan FBO which was not a dealer for any airplane manufacturer. [4]

[4]** General alleges that it did not receive the service center appointment because Garrett had earlier agreed with Cessna not to appoint Cessna dealers as service centers without Cessna's approval. According to General, this informal agreement lasted from 1981 through the "spring or summer of 1984." Also, according to General, the agreement was made upon the insistence of Cessna, which became concerned that its dealers would no longer purchase TPE 331-8 replacement parts from Cessna, but would buy them from Garrett at the discounted prices which it offered its service centers. Cessna, fearful of losing these revenues, and Garrett, fearful of losing a major engine customer, allegedly struck the subject agreement, which resulted in General's nonappointment as a service center.

STANDARD FOR DECISION

HN1[] Under *Fed. R. Civ. P. 56(c)*, a motion for summary judgment is proper only if "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." ***HN2***[] The party seeking summary judgment bears the initial burden of **[**5]** identifying those portions of "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any," which demonstrate the absence of a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. ***HN3***[] When a motion for summary judgment is made and properly supported, the opposing party must set forth specific facts showing that there is a genuine issue for trial. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 250, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

HN4[] Although use of summary procedures is certainly not prohibited in antitrust cases, summary judgment motions have traditionally been disfavored in such litigation. *Bender v. Southland Corp., 749 F.2d 1205, 1210 (6th Cir. 1984)*; *Smith v. Northern Michigan Hospitals, Inc., 703 F.2d 942, 947 (6th Cir. 1983)*. As the Supreme Court has stated,

> Summary procedures should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot.

Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962). Accordingly, this court must strictly apply **[**6]** the general rule as stated in the paragraph above, and require a *conclusive* showing that no genuine issue of material fact remains to be tried. *Bender, 749 F.2d at 1210*. The evidence must be viewed in a light most favorable to the nonmoving party. *Id.*

DISCUSSION

COUNT I -- FEDERAL ANTITRUST CLAIM

15 U.S.C. SECTION 1

General claims that the alleged agreement between Garrett and Cessna enabled them to "divide the market" for the sale of TPE 331 engine replacement parts and components, allocating to Cessna all sales to Cessna dealers and resulting in "artificially inflated prices" to Cessna dealers.

HN5[] *Section 1* of the Sherman Act provides that "every contract, combination . . . or conspiracy, in restraint of trade or commerce **[*518]** among the several States . . . is declared to be illegal." ***HN6***[] To establish a *Section 1* claim, a plaintiff must prove the following essential elements:

---

[4] Other Cessna dealers also sought Garrett service center appointments during the same time frame that General did. None were appointed by Garrett from 1981 to 1984.

(1) That the defendants entered into a contract, combination, or conspiracy;

(2) That this contract, combination, or conspiracy affected interstate commerce; and

(3) That this contract, combination, or conspiracy unreasonably restrained such commerce.

White & White, Inc. v. American Hospital ***[**7]*** *Supply Corp., 723 F.2d 495, 504 (6th Cir. 1983)*; *Continental Cablevision of Ohio, Inc. v. American Electric Power Co., 715 F.2d 1115, 1118 (6th Cir. 1983)*.

Garrett has not contested, for the purposes of this motion only, that it had an "informal agreement" with Cessna not to appoint Cessna dealers as Garrett service centers without Cessna's approval. Cessna disputes the existence of such an agreement; however, Cessna has not identified any factual materials in support of its motion which tend to negate the existence of the agreement. In contrast, General has identified a substantial amount of circumstantial evidence from which a jury could reasonably conclude that Garrett did not act independently in imposing its restriction on the appointment of service centers. *See* Plaintiff's Brief in Opposition to Motion for Summary Judgment at pp. 12-24. However, even assuming that General can establish the existence of the alleged agreement, that fact alone does not conclude the Court's analysis.

HN7[] In determining whether a restraint on trade unreasonably restricts competition, courts have traditionally used two different methods of analysis -- the "*per se* rule" and the "rule of reason." **[**8]** *United States v. Cooperative Theatres of Ohio, Inc., 845 F.2d 1367, 1370 (6th Cir. 1988)*:

> There are, thus, two complementary categories of antitrust analysis. In the first category are agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality -- they are 'illegal *per se.*' In the second category are agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed.

(quoting *National Society of Professional Engineers v. United States, 435 U.S. 679, 692, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978))*. ***HN8***[] There is a general presumption in favor of applying the rule of reason analysis except in those cases where the alleged agreement is "'manifestly anticompetitive.'" *Id.* (quoting *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49-50, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. For example, practices generally found to be illegal *per se* are price-fixing agreements, horizontal market allocations, and tying arrangements. *Davis-Watkins Co. v. Service Merchandise, 686 F.2d 1190, 1196 (6th Cir. 1982)*, *cert. denied, 466 U.S. 931, 80 L. Ed. 2d 190, 104 S. Ct. 1718 (1984)*. **[**9]**

In their motions for summary judgment, Garrett and Cessna argue that the alleged agreement is a vertical nonprice restraint subject to rule of reason analysis under *GTE Sylvania, 433 U.S. at 58-59*; they argue that the restraint is not a *per se* violation of the Sherman Act. The defendants are correct that the alleged restraint contains no price agreement, and is therefore, obviously, a nonprice restraint. *See* *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 735-36, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)* (vertical restraint is not illegal *per se* unless it includes some agreement on price or price levels). Indeed, General, in its complaint, contends only that the alleged agreement enabled Garrett and Cessna to divide the market for TPE 331 parts and "*resulted in* artificially inflated prices to Cessna dealers." [5] General does not contend that Garrett and Cessna jointly set prices.

[*519] The more complex question to be resolved is **[**10]** whether the alleged agreement is vertical or horizontal. The Sixth Circuit has distinguished these two types of conspiracies:

---

[5] General's own expert has admitted that alleged agreement between Garrett and Cessna was not a price-fixing agreement. He stated that the agreement "allow[ed] Cessna to price *independently* . . . ." Affidavit of Peter Max, Paragraph 23 (emphasis added).

> HN9[] Horizontal conspiracies involve agreements among competitors at the same level of competition to restrain trade, such as agreements among manufacturers to fix prices for a given product and geographic market, or among distributors to fix prices for a given market. Vertical conspiracies, on the other hand, involve agreements between competitors at different levels of competition to restrain trade, such as agreements between a manufacturer and its distributors to exclude another distributor from a given product and geographic market.

Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir. 1988). It is undisputed that Garrett manufactures and sells aircraft engines to a variety of aircraft manufacturers including Cessna. Garrett also manufactures replacement parts for its engines, and sells these parts to aircraft manufacturers, FBO's (including some Cessna dealers), and directly to consumers. Because Garrett sells replacement parts to Cessna dealers, as does its customer Cessna, Garrett operates at both the manufacturing level and **[**11]** at the distributorship level. Thus, this case involves a "dual distributorship." [6] However, it also involves a relationship between Garrett and Cessna which is neither purely vertical nor purely horizontal; Garrett is a supplier of Cessna, but the two are also competitors in the market for the sale of replacement parts and components.

General argues that summary judgment may not be granted because a genuine issue of material fact remains as to whether the alleged agreement is a horizontal market allocation between competitors (thus subject to the *per se* rule) or a vertical restraint (thus subject to rule of reason analysis). General alleges that the focus of the Court's inquiry must be must be upon the purpose and effect of the restraint. However, the Supreme Court has recently stated that

> . . . HN11[] a restraint is horizontal not because it has horizontal effects, but because it is the product of a horizontal agreement.

Business Electronics, 485 U.S. at 730 n. 4. **[**12]** Garrett and Cessna have a supplier/customer relationship, and the restriction imposed by Garrett was a vertical restriction imposed upon its independent service center network. The mere fact that Garrett and Cessna also happen to compete in the sale of TPE 331 replacement parts does not rebut the presumption that a rule of reason analysis is to be applied.

Given the dual distributorship situation present in this case, this Court is of the belief that application of a *per se* analysis would be inappropriate as a matter of law. HN12[] Dual distributorship situations have, by and large since the Supreme Court's ruling in *GTE Sylvania,* been analyzed by courts under the rule of reason. *See* *Dimidowich v. Bell & Howell, 803 F.2d 1473 (9th Cir. 1986)*, *modified,* *810 F.2d 1517 (1987)* ("hybrid" arrangement, composed of both a dual distributorship and horizontal competitor relationship, should be analyzed under the rule of reason); *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705 (11th Cir. 1984)* (applying rule of reason analysis to dual distributorship, on motion for summary judgment); *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348 (9th Cir. 1982)* (dual distribution **[**13]** system analyzed under rule of reason standard, on Rule 41(b) motion to dismiss); *Copy-Data Systems, Inc. v. Toshiba America, Inc., 663 F.2d 405 (2d Cir. 1981)*, *cert. denied, 474 U.S. 825, 88 L. Ed. 2d 66, 106 S. Ct. 80 (1985)* (district court's application of *per se* rule to dual distributor restraints reversed); *Abadir & Co. v. First Mississippi Corp., 651 F.2d 422 (5th Cir. 1981)* (reversing application of *per se* rule to vertical market-dividing agreement, where defendant, who competed with its distributor, attempted to impose territorial restriction on distributor); **[*520]** *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001 (5th Cir. 1981)*, *cert. denied, 454 U.S. 827, 70 L. Ed. 2d 102, 102 S. Ct. 119 (1981)* (applying rule of reason to alleged agreement between manufacturer and distributors to maintain territorial and customer restrictions, even though manufacturer also sold products directly to users); *Manufacturers Supply Co. v. Minnesota Mining and Mfg. Co., 688 F. Supp. 303 (W.D. Mich. 1988)* (3M distributed its products through combination of its own salespeople and independent distributors; the court analyzed a restraint prohibiting distributors from reselling products to certain

---

[6] *See* *Davis-Watkins, 686 F.2d at 1201 n. 14*:

> HN10[] "A dual distributorship involves a business structure in which one party operates a branch of dealership on the same market level as one or more of its customers."

customers or outside certain geographical **[**14]** territories as a vertical restraint, on motion to dismiss). The Sixth Circuit's recent opinion in *International Logistics Group, Ltd. v. Chrysler Corp., 884 F.2d 904 (6th Cir. 1989)* suggests that it believes this to be the correct approach. In that case, the Court of Appeals refused to apply a *per se* analysis to an alleged restraint imposed in a dual distribution context. Chrysler, a supplier and distributor of its own replacement parts to domestic dealers, together with one of its divisions which marketed Chrysler Power Master engines internationally at reduced prices, cancelled all Power Master orders from corporations which refused to desist from reselling the cheaper export units to Chrysler's domestic dealers. The Sixth Circuit found that such action did not even amount to a conspiracy, and certainly could not be characterized as a *per se* violation of the Sherman Act:

> Although some minimal horizontal competitive effects may have resulted, the marketing policies concerning the Power Master engine were not directed toward or designed to impose restraints upon parties at the same competitive level even though Chrysler, the manufacturer, was also a distributor.

[15]** *Id. at 906*.

Furthermore, the mere fact that Cessna -- the distributor -- may have initiated the agreement does not render the agreement horizontal, nor does it justify application of the *per se* approach. In *Business Electronics,* the respondent Sharp eliminated the petitioner Business Electronics as a retailer of its products upon the insistence of a second retailer, who complained about Business' price-cutting. *485 U.S. at 721*. Still, the Supreme Court held that such a vertical nonprice restraint was to be analyzed under the rule of reason. Indeed, the fact that Cessna initiated and demanded the agreement militates against application of the *per se* rule, particularly inasmuch as General itself concedes that the agreement was contrary to Garrett's own economic interests and marketing strategy. [7] In *Balmoral Cinema, Inc. v. Allied Artists Pictures Corp., 885 F.2d 313 (6th Cir. 1989)*, the plaintiff-film exhibitor alleged that a film distributor's participation in a "split" agreement with exhibitors constituted a "group boycott" subject to *per se* liability. A "split" arrangement is one in which two or more distributors in a given market agree not to compete against each **[**16]** other in the licensing of films from distributors. The Sixth Circuit declined to apply a *per se* rule:

> . . . we are hard pressed to apply a *per se* standard to an alleged conspiracy which may be of little or no benefit to those accused of conspiring -- namely the defendant distributors. Decreased competition in bidding among exhibitors as purchasers **[*521]** of film, on the surface at least, would seem to produce lower licensing fees and, therefore, decreased profitability to distributors rather than, as Balmoral alleges, higher prices. Thus we cannot say that the conduct of the distributors in tacitly consenting to split agreements by purchasers of films was *per se* anti-competitive or harmful to consumers.

Id. at 317. For the same reasons, this Court is hard pressed to conclude that the alleged agreement between Garrett and Cessna is *per se* anti-competitive.

[17]** In an attempt to establish that the alleged agreement had anti-competitive effects which would justify application of the *per se* rule, General argues that the agreement "completely eliminated" *intra*brand competition

---

[7] General's admission that the alleged agreement was contrary to Garrett's interests is supported by the conclusions of the defendants' expert:

> Garrett's incentive is to keep distributor margins as small as possible, consistent with its need to maintain viable, efficient distributors. To the extent that Garrett's actions increase distributor margins, the price Garrett can charge for its parts at wholesale is diminished. *Artificially* higher distributor margins -- margins raised without some compensating efficiency benefits that increase Garrett sales -- are thus directly contrary to Garrett's interest. Hence the complaint fails a basic test for antitrust matters: ***HN13***[] 'If the factual context renders respondents' claim implausible -- if the claim is one that simply makes no economic sense -- respondents must come forward with more persuasive evidence to support their claim than would otherwise be necessary.'

Affidavit of Howard Marvel, Sept. 22, 1989, pp. 12-13 (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986))*.

(competition in the sale of *Garrett* parts) because Garrett parts "are not interchangeable with the parts of other engine manufacturers." Plaintiff's Brief at 57-58. General alleges that Cessna and Garrett are the only distributors of new TPE 331-8 parts. General's claim that intrabrand competition was completely eliminated is unsupported by the facts and by the law. First, Garrett has set forth facts, which have not been contested by General, showing that used Garrett parts are available through parts refurbishers. Secondly, General has not identified any "competitors" who have been "eliminated" pursuant to the agreement. [8] **[**18]** ***HN14***[] Absent an allegation of anti-competitive purpose or effect at the *inter*brand level, the substitution of one distributor for another does not violate the antitrust laws. *E.g., Crane & Shovel, 854 F.2d at 810*. General has alleged no anticompetitive effects whatsoever at the interbrand level. [9]

The Court is convinced that the *per se* rule can not as a matter of law be applied to the particular restraint alleged in this case. Keeping in mind the Supreme Court's recent reassertion in *Business Electronics* that ***HN16***[] there is a presumption in favor of the rule of reason standard, that departure from that standard must be justified by "demonstrable economic **[**19]** effect," and that "interbrand competition is the primary concern of the antitrust laws," *485 U.S. at 726*, this Court is not convinced that the activity of which General complains is the type of "manifestly anticompetitive" arrangement which justifies application of a *per se* analysis:

> We have said that ***HN17***[] *per se* rules are appropriate only for 'conduct that is manifestly anticompetitive,' . . . that is, conduct 'that would always or almost always tend to restrict competition and decrease output[.]' . . .
>
> . . . In [*GTE Sylvania*], we refused to extend *per se* illegality to vertical nonprice restraints, specifically to a manufacturer's **[*522]** termination of one dealer pursuant to an exclusive territory agreement with another. We noted that especially in the vertical restraint context 'departure from the rule-of-reason standard must be based on demonstrable economic effect rather than . . . upon formalistic line drawing.' . . . Moreover, we observed that a rule of *per se* illegality for vertical nonprice restraints was not needed or effective to protect *intrabrand* competition.

Business Electronics, 485 U.S. at 723-25 (citations omitted).

Ordinarily, upon concluding that this **[**20]** case is not an appropriate one for application of *per se* illegality, this Court would apply a rule of reason analysis to determine whether any genuine issues of material fact remain.

---

[8] General's expert states that

> The effect of the agreement was to give Cessna all sales of Garrett TPE 331-8 parts to Cessna Conquest dealers. The anticompetitive nature of the agreement was that it eliminated a competitor from the market, protecting Cessna from price competition, allowing Cessna to price independently, and increasing Cessna's control of the market.

Affidavit of Peter Max, October 30, 1989, Paragraph 23. Mr. Max does not say which "competitor" was eliminated, but he appears to be referring to the elimination of Garrett as a competitor of Cessna. However, the facts are undisputed that Cessna dealers could continue to purchase TPE 331 replacement parts either from Garrett itself or from Cessna even after the two entities entered into the alleged agreement. Those Cessna dealers not authorized as Garrett service centers would simply have to pay Garrett's list price (which was higher than Cessna's price to its dealers) if they purchased from Garrett.

[9] The Sixth Circuit has stated that

> . . . ***HN15***[] a complaint charging restraint of trade based on a manufacturer's substitution of one distributor for another must allege anticompetitive effect at the interbrand level to survive a *Rule 12(b)(6)* motion for failure to state a violation of *Section 1* of the Sherman Anti-Trust Act.

Crane & Shovel, 854 F.2d at 807.

As the defendants' expert points out, the alleged agreement in this case may have even served to increase competition by improving service ability; had General been appointed as a Garrett service center, Cessna Conquest owners would have had only one authorized service option in Michigan -- General. The appointment of Kal Aero -- which was not affiliated with any aircraft manufacturers -- gave Conquest owners an additional authorized option. Marvel Affidavit, page 9.

However, General has chosen not to pursue its claims under the rule of reason. [10] **[**22]** Indeed, even construing the first amended complaint in a most liberal fashion, the Court cannot conclude that General has pleaded a rule of reason case. In order to show that the alleged restraint is unreasonable, General would be required to establish that the agreement produced anti-competitive effects within the relevant product and geographic markets, that the objects of and conduct pursuant to the agreement were illegal, and that the plaintiff was injured as a proximate result of that conspiracy. *Crane & Shovel, 854 F.2d at 805*; *Davis-Watkins, 686 F.2d at 1195-96*. Cessna argues that General has not pleaded, nor can it prove, that either Cessna or Garrett has sufficient market power in a relevant market to restrict competition. ***HN18***[] Market power is "'normally inferred from the possession of a substantial percentage of the sales in a market carefully defined in terms of both product and geography.'" *Manufacturers [**21] Supply, 688 F. Supp. at 307* (quoting *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 666 (7th Cir. 1987))*. General has alleged in its complaint only that the agreement between Garrett and Cessna "restrained and eliminated competition in the sale of replacement parts and components for the TPE 331 engine in the United States[.]" First Amended Complaint, Paragraphs 21 and 24. General has produced evidence in response to the defendants' present motions showing that Garrett was the only manufacturer of new TPE 331 parts, that these parts were not interchangeable with parts of other manufacturers, and that Garrett and Cessna were the only source of new replacement parts. However, because General has not set forth any facts suggesting effects on an interbrand market, [11] the Court believes that General has not set forth facts sufficient to preclude a grant of summary judgment in favor of the defendants. Therefore, summary judgment will be granted in their favor as to count I.

COUNT II -- STATE LAW ANTITRUST CLAIM

MICH.COMP.LAWS ANN. SECTION 445.772

Count II of the first amended complaint asserts a state law claim against both defendants **[*523]** under *Mich.Comp.Laws Ann. section 445.772*, the Michigan Antitrust Reform Act. This claim mirrors General's Sherman Act claim contained in count I. ***HN20***[] The wording of *Mich.Comp.Laws Ann. section [**23] 445.772* is virtually identical to that of *section 1* of the Sherman Act, and therefore, federal precedents interpreting the Sherman Act are considered authoritative in Michigan courts. [12] Thus, for the reasons stated above, summary judgment will be granted in favor of the defendants upon this state law claim. [13]

---

[10] In its response to Garrett's requests for admissions, General admitted that it is "not pursuing any antitrust claims that will be evaluated under the rule of reason." Plaintiff General Aviation Inc.'s Response to the Garrett Corp.'s Request for Admissions, No. 12. Lest there be any doubt regarding the import of this admission, Garrett has alleged that General has refused to respond to discovery requests relevant to determining alleged harm to competition, which is required to establish liability on a rule of reason claim. Defendant The Garrett Corp.'s Brief in Support of Motion for Summary Judgment at 23.

[11] ***HN19***[] Interbrand competition is the "primary concern of ***antitrust law***." *GTE Sylvania, 433 U.S. at 52*. Intrabrand competition is of some concern as well. As one Circuit has stated, inquiries into the scope of competition under *section 1* and *section 2* of the Sherman Act are not precisely the same; stifling intrabrand competition may violate *section 1*, while obtaining a "monopoly" over a given brand would clearly not run afoul of *section 2*. *Columbia Metal Culvert Co., Inc. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 27 n. 11 (3d Cir. 1978)*, *cert. denied,* ***439 U.S. 876, 58 L. Ed. 2d 190, 99 S. Ct. 214 (1978)***. However, General has not set forth facts showing that intrabrand competition was "stifled" in any sense of the word, having presented no evidence that consumers have any fewer sources available for purchase of Garrett replacement parts.

[12] ***HN21***[] *Mich.Comp.Laws Ann. section 445.772* provides as follows:

> A contract, combination, or conspiracy between 2 or more persons in restraint of, or to monopolize, trade or commerce in a relevant market is unlawful.

This statute is modelled after the Uniform State Antitrust Act. The comment to the Uniform Act section above states that

> The adoption of Sherman Act language establishes its general standards of legality, provides needed flexibility, and makes available to state courts the relevant body of federal precedent.

[24]** COUNT III -- "LOSS OF FINANCIAL EXPECTANCY"

Count III of General's first amended complaint is a state law claim against Cessna labelled "loss of financial expectancy." General alleges that Cessna agreed not to prevent General from affiliating with other equipment manufacturers, but that Cessna nonetheless prevented General from being appointed as a Garrett service center, causing General to lose this "financial expectancy." In its motion for summary judgment, Cessna argues that this claim is barred by the statute of limitations.

In support of its motion for summary judgment, Cessna identifies facts showing that General's request for appointment as a Garrett line service center was denied in March 1984. *See* Deposition of Maynard McAdams, at p. 223 (showing denial prior to March 29, 1984). In response to Cessna's motion, General has not set forth any specific facts which create a genuine factual issue as to the date its claim arose, nor has it set forth any facts which would support the tolling of the limitations period. Thus, any "loss" suffered by Cessna occurred prior to that date, and it therefore follows that General's cause of action accrued no later than March 29, 1984.

General **[**25]** filed its initial complaint in this action on July 24, 1987. This initial complaint did not contain a claim for loss of financial expectancy. The first amended complaint was filed on August 7, 1989. [14] However, even assuming that the addition of Count III relates back to the filing of the initial complaint, General is time-barred from pursuing this particular claim.

HN22[] The limitations period applicable to General's claim for loss of financial expectancy is the three year limitations period set forth in *Mich.Comp.Laws Ann. section 600.5805(8)*. General's claim is most similar to a claim for tortious interference with prospective economic relations, to which Michigan courts have consistently applied *Mich. Comp. Laws Ann. section 600.5805(8)*. [15] *James v. Logee, 150 Mich. App. 35, 388 N.W.2d 294, 296 (1986)*; *Joba Construction Co., Inc. v. Burns and Roe, Inc., 121 Mich. App. 615,* ***[*524]*** *329 N.W.2d 760, 766 (1982)*; *Meyer v. Hubbell, 117 Mich. App. 699, 324 N.W.2d 139, 144 (1982)*; *Wilkerson* ***[**26]*** *v. Carlo, 101 Mich. App. 629, 300 N.W.2d 658, 660*, *appeal denied, 411 Mich. 984, 311 N.W. 2d 702 (1981)*.

General attempts to circumvent this three year limitations period by arguing that its claim is governed by the six year period contained in *Mich. Comp. Laws Ann. section 600.5813* [16] or, in the alternative, the six year period contained in *Mich.Comp.Laws Ann. section 600.5807(8)*. [17] The Court finds both of these arguments to be without

---

[13] The Court notes that *Mich.Comp.Laws Ann. section 445.772* did not go into effect until March 29, 1985. General's first amended complaint alleges that the agreement between the defendants continued until "at least the spring/summer of 1984." Therefore, on its face, the first amended complaint does not state a violation of *section 445.772*.

Even if General had instead stated a claim for violation of the predecessor to *section 445.772* -- the now-repealed section 445.701 -- the same analysis would apply and summary judgment in favor of the defendants would be in order. Prior to its repeal, Michigan courts had held that section 445.702 was likewise patterned after the Sherman Act, and that federal court interpretations were persuasive authority as to section 445.701's meaning. *Goldman v. Loubella Extendables, 91 Mich. App. 212, 219, 283 N.W.2d 695, 699 (1979)*.

[14] In its order granting General permission to file the first amended complaint, the Court indicated that Cessna's right to assert a statute of limitations defense would not be prejudiced.

[15] ***HN23***[] *Mich.Comp.Laws Ann. section 600.5805(8)* provides as follows:

> The period of limitations is 3 years after the time of the death or injury *for all other actions to recover damages* for the death of a person, or *for injury to* a person or *property*.

(emphasis added).

[16] ***HN24***[] *Mich. Comp. Laws Ann. section 600.5813* provides as follows:

> All other personal actions shall be commenced within the period of 6 years after the claims accrue and not afterwards unless a different period is stated in the statutes.

merit. General has cited no case in which Michigan courts have applied *Mich.Comp.Laws Ann. section 600.5813* (applicable to "all other personal actions") to a tortious interference claim. As in *Logee, 388 N.W.2d at 296*, the plaintiff in this case has, in its complaint, set forth the essential elements of a tortious interference claim, to which the three year limitations period applies. *Id.* General's attempt to label its claim otherwise is not controlling. [18] *Huhtala* ***[**27]*** *v. Travelers Ins. Co., 401 Mich. 118, 257 N.W.2d 640, 649 (1977)*.

Likewise, General's argument that *Mich. Comp. Laws Ann. section 600.5807(8)* (applicable to actions for breach of contract) applies must also fail. General concedes that it has not stated a claim against Cessna for breach of contract, but instead a claim "for loss of financial expectancy which is based upon a contractual obligation. . . ." (Plaintiff's Brief in Opposition to Motion for Summary Judgment, at 63) ***HN26***[] The gravamen of an action is determined by reading the claim as a whole. *Adkins v. Annapolis Hospital, 116 Mich. App. 558,* ***[**28]*** *323 N.W.2d 482, 485 (1982)*, *aff'd,* *420 Mich. 87, 360 N.W.2d 150 (1984)*. The gravamen of General's claim as stated in the first amended complaint is Cessna's alleged interference with a potential profitable relationship with Garrett, not breach of contract. Indeed, the unambiguous [19] language of the contract between General and Cessna does not support a conclusion that Cessna assumed a contractual obligation to refrain from interfering with General's carrying of other product lines:

> Subject to the other terms and conditions of and for the term of this Agreement, Cessna appoints Dealer as a dealer for Cessna Conquest aircraft and parts and accessories therefor sold by Cessna granting to Dealer the non-exclusive privilege to sell such products.

(Paragraph A.1, Cessna Conquest Sales and Service Agreement dated October 27, 1983). If Cessna had a duty to refrain from interference, this duty was created by law and not by its contract with General, and the three year limitations period applies. *See* *Continental Casualty Co. v. Huron Valley Nat'l Bank, 85 Mich. App. 319, 271 N.W.2d 218, 221 (1978)* (where there is no express contract or express promise and defendant's liability is implied **[**29]** by law an action for injury to persons or property is controlled by the three year statute regardless of whether the action is labeled as one in tort or implied contract). Count III is therefore dismissed as being time-barred.

CONCLUSION

For the reasons stated above, the defendants' motions for summary judgment will be granted. The Court will enter an order in accordance with this opinion.

Dated: March 19, 1990

JUDGMENT IN A CIVIL CASE - March 22, 1990, Filed

Decision by Court. This action came to trial or hearing before the Court. The issues have been tried or heard and a decision has been rendered.

IT IS ORDERED AND ADJUDGED

In accordance with the opinion of this Court rendered on March 19, 1990,

[30]** Defendants' motions for summary judgment are GRANTED and the case is DISMISSED.

---

[17] ***HN25***[] Mich.Comp.Laws Ann. section 5807(8) provides as follows:

> The period of limitations is 6 years for all other actions to recover damages or sums due for breach of contract.

[18] If the label alone were controlling, General would have stated no claim at all; this Court has never heard of a cause of action for "loss of financial expectancy."

[19] ***HN27***[] Whether the terms of a contract are ambiguous is a question of law for the court to determine. *Steinmetz Elec. Contractors Ass'n. v. Local Union No. 58, 517 F. Supp. 428, 432 (E.D.Mich. 1981)*.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Summary Judgment, Burdens of Proof**

The consideration of material beyond that contained in the pleadings does not convert a motion under *Fed. R. Civ. P. 12(b)(2)* into a motion for summary judgment. Generally, a court may properly rely on affidavits and depositions to establish jurisdictional facts in determining whether the plaintiff has sustained its burden on a jurisdictional question.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN2[] **In Rem & Personal Jurisdiction, In Personam Actions**

Personal jurisdiction is a composite notion of two separate ideas: amenability to jurisdiction, or predicate, and notice to the defendant through valid service of process.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN3[] **Federal & State Interrelationships, Erie Doctrine**

The applicable law of jurisdiction in a diversity action is the law of the state in which the district court sits.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN4[] **Jurisdiction, Jurisdictional Sources**

Pursuant to New York law, a court is permitted to exercise jurisdiction over a corporate entity on the basis of a single purposeful transaction of business conducted by it in New York. *N.Y. C.P.L.R. § 302(a)(1)* (1990).

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

International Law > Authority to Regulate > General Overview

HN5[] **In Rem & Personal Jurisdiction, In Personam Actions**

Merely entering products into the stream of commerce is an insufficient jurisdictional predicate.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] **In Rem & Personal Jurisdiction, In Personam Actions**

Only where a parent corporation asserts such extensive control over its subsidiary as to be deemed the subsidiary's alter-ego, can the parent-subsidiary relationship be a sufficient jurisdictional predicate. Parent corporations that observe "a strict formal separation" from their subsidiaries and that derive no direct benefit therefrom are not subject to in personam jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN7[] **In Rem & Personal Jurisdiction, In Personam Actions**

Marketing products and establishing channels for providing advice in the forum state, in addition to placing product in the stream of commerce, indicate acts of the defendant purposefully directed toward the forum state such that jurisdiction may be conferred.

Civil Procedure > ... > Service of Process > Service of Summons > Content & Form

Civil Procedure > ... > Pleadings > Service of Process > General Overview

Civil Procedure > ... > Service of Process > Methods of Service > General Overview

Civil Procedure > ... > Service of Process > Methods of Service > Service on Corporations

HN8[] **Service of Summons, Content & Form**

Fed. R. Civ. P. 4(e) requires that service be made under the circumstances and in the manner prescribed by the law of the state in which the forum court is located. In New York, service of process on a corporation requires that an officer or director of the corporation be present in the forum to accept service of summons on its behalf. *N.Y. C.P.L.R. §§ 308*, *318* (1990).

Business & Corporate Law > Foreign Corporations > General Overview

Civil Procedure > ... > Service of Process > Methods of Service > Service on Corporations

International Law > Dispute Resolution > Service of Process

Civil Procedure > ... > Service of Process > Methods of Service > General Overview

Civil Procedure > ... > Service of Process > Methods of Service > Foreign Service

Civil Procedure > ... > Service of Process > Proof of Service > General Overview

HN9[] **Business & Corporate Law, Foreign Corporations**

Absent domiciliary agents in the forum, leave of court is mandated in order to use substituted service. *N.Y. C.P.L.R. §§ 308*, *318* (1990). Indiscriminate use of the mails to effect service abroad does not assure either receipt or sufficient notice of a pending action comporting with fairness and due process. Furthermore, service effected outside the United States on a foreign corporation demands proper service under the constraints of the foreign domiciliary's law, unless that law is inconsistent with requirements of the Hague Convention Treaty. Convention on Service Abroad of Judicial and Extrajudicial Documents in Civil and Commercial Matters, Nov. 15, 1965, art. 163, 20 U.S.T. 361, T.I.A.S. No. 6638.

Civil Procedure > Discovery & Disclosure > General Overview

HN10[] **Civil Procedure, Discovery & Disclosure**

Discovery procedures are appropriate only when there is at least some slight factual indication that a basis for jurisdiction exists. The discovery rules are not a hunting license to conjure up a claim that does not exist.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN12[] **Monopolies & Monopolization, Actual Monopolization**

Antitrust claims are comprised of three elements: (1) possession of a monopoly in the relevant market; (2) willful maintenance of power over the product; and (3) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN13[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Conspiracy to monopolize a market requires a finding of specific intent to monopolize.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Trade Secrets Law > Federal Versus State Law > ***Antitrust Law***

HN14[] **Monopolies & Monopolization, Actual Monopolization**

Owning the exclusive recipe for a product, albeit monopolistic, is not necessarily violative of the antitrust laws, especially where the parties formally agreed to maintain the integrity of the trade secret formula.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > Clayton Act > General Overview

HN15[] **Tying Arrangements, Clayton Act**

Tying arrangements involve a seller's coercion of a buyer to purchase two distinct products, whereby the buyer seeking to purchase one product is forced by the seller to purchase a second distinct product. *15 U.S.C.S. § 14*.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN16[] **Public Enforcement, State Civil Actions**

To sustain an action under the New York Donnelly Act, elements similar to a federal antitrust cause of action must be pleaded.

Opinion

[*786] MEMORANDUM & ORDER

KEVIN THOMAS DUFFY, UNITED STATES DISTRICT JUDGE.

Plaintiff Perfumer's Workshop, Ltd. ("Perfumer's"), seeks compensatory and punitive damages for alleged violations of various federal and state antitrust laws, and for state breach of contract, common law fraud, and negligence claims. Defendants Roure Bertrand du Pont, Inc. ("Roure"), Roure Bertrand du Pont, S.A. ("Roure-France"), [1] **[**2]** and F. Hoffman-La Roche & Co. Limited Company ("Hoffman-La Roche") move pursuant to *Fed. R. Civ. P. 12(b)(2-5)* [2] to dismiss for lack of personal jurisdiction, improper service of process, and improper venue. Alternatively, defendants move, under *Fed. R. Civ. P. 12(b)(6)*, to dismiss the federal and state antitrust and fraud causes of action. Roure is the only defendant that concedes jurisdiction. Subject matter jurisdiction rests on federal antitrust claims, pendent and diversity jurisdiction.

FACTS

Perfumer's, a New York corporation, sells and produces perfume fragrances and related products. Amended Complaint para. 4. Roure, a New Jersey corporation, is a perfume house, supplying and manufacturing concentrates, essential oils, and other chemicals for perfumes and cosmetics. Amended Complaint para. 5. Roure-France is a French corporation that, together with Roure, participates in developing and producing prestige perfume products marketed world-wide. Amended Complaint para. 5. Hoffman-La Roche, the Swiss parent corporation of Roure and Roure-France, is engaged in the manufacture and sale of, among other things, pharmaceuticals, vitamins, **[**3]** **[*787]** fragrance products, and chemicals used in perfume production. Amended Complaint paras. 6-7.

It is uncontested that a perfume house that creates or develops a perfume fragrance formula owns it as a trade secret according to industry custom. Amended Complaint para. 14. In April 1985, Roure developed a perfume fragrance for Perfumer's under the code name and number "Neroli Nights R6068," which Roure protected as a trade secret. Amended Complaint paras. 38-40. Pursuant to agreement Perfumer's purchased and distributed 1,200 one-ounce samples of the secret formula for test marketing in December 1985. By late winter 1986, Perfumer's purchased the fragrance in varying concentrations to create cologne, eau de toilette, and eau de parfum. Touted as a "major new prestige fine fragrance," the fragrance was to be sold under Perfumer's trademark SAMBA. Amended Complaint paras. 39-40. By spring 1987, Perfumer's undertook a major marketing and advertising campaign for the SAMBA fragrance both domestically and abroad. Amended Complaint paras. 46-48.

---

[1] Defendant's responsive pleadings refer to Roure Bertrand DuPont, S.A. as "Roure S.A."

[2] ***HN1***[] The consideration of material beyond that contained in the pleadings does not convert a motion under *Fed. R. Civ. P. 12 (b) (2)* into a motion for summary judgment. *Attwell v. LaSalle National Bank, 607 F.2d 1157 (5th Cir. 1979)*, *cert. denied*, ***445 U.S. 954, 100 S. Ct. 1607, 63 L. Ed. 2d 791 (1980)***. Generally, a court may properly rely on affidavits and depositions to establish jurisdictional facts in determining whether the plaintiff has sustained its burden on a jurisdictional question. *Marine Midland Bank v. Miller, 664 F.2d 899, 904 (2d Cir. 1981)*.

Perfumer's allegedly detected an "off odor" in the SAMBA fragrance in post-promotional shipments of the product. In addition, Perfumer's determined that **[**4]** the scent's endurance on the skin of the 18% solution eau de toilette pre-production samples was inadequate. Roure proposed increasing the eau de toilette solution from 18% to 22% and Perfumer's agreed; Roure supposedly made no offer to remedy the "off odor." Amended Complaint para. 59.

Perfumer's claims, inter alia, that Roure breached its obligations under the supply agreement because all post-promotional shipments of the SAMBA fragrance failed to contain the preservative, BHT, at the agreed upon level of 0.05% of the essential oil. Perfumer's objected to the use of the preservative DL-alpha tocopherol in lieu of BHT, which it claimed to be the cause of the fragrance's premature destabilization, resulting in the drastic and unpleasant change in the scent. In addition, Perfumer's claims that the raw materials utilized were not of like grade and quality as the raw materials used in the "Neroli Nights" formula, test marketed in 1985. After refusing to pay Roure under the supply agreement, Perfumer's rejected all post-promotional SAMBA shipments. Perfumer's then engaged Roure-France's expertise to try and remedy SAMBA's "off odor." Nonetheless, as a result of Perfumer's failure to tender **[**5]** payment to Roure, Roure filed an action in New Jersey state court. That action has since been removed to New Jersey's Federal District Court and this court has not been advised as to the status of that action. Roure's Memorandum of Law in Support of Motion To Dismiss, at 3.

DISCUSSION

I. *In Personam Jurisdiction*

Both Hoffman-La Roche and Roure-France contest the assertion of jurisdiction over them in this forum. ***HN2***[] Personal jurisdiction "is a composite notion of two separate ideas: amenability to jurisdiction, or predicate, and notice to the defendant through valid service of process." *Soltex Polymer Corp. v. Fortex Industries, Inc., 590 F. Supp. 1453, 1456 (E.D.N.Y. 1984)*, *aff'd*, *832 F.2d 1325 (2d Cir. 1987)*.

A. Hoffman-La Roche

HN3[] The applicable law of jurisdiction in a diversity action is the law of the state in which the district court sits. *CutCo Industries, Inc. v. Naughton, 806 F.2d 361, 365 (2d Cir. 1986)*. Whether this court may assert jurisdiction over Hoffman-La Roche as Roure's foreign parent turns on whether a prima facie showing is made that Hoffman-La Roche had sufficient contacts with New York such that traditional notions of fair play are not offended. **[**6]** *International Shoe Co. v. Washington, 326 U.S. 310, 90 L. Ed. 95, 66 S. Ct. 154 (1945)*; *Marine Midland, N.A. v. Miller, 664 F.2d 899, 904 (2d Cir. 1981)*. ***HN4***[] Pursuant to New York law, a court is permitted to exercise jurisdiction over a corporate entity on the basis of a single purposeful transaction of business conducted by it in New York. *N.Y. Civ. Prac. L. & R. § 302(a)(1)* (McKinney 1983 & Supp. 1990). Thus, if jurisdiction is predicated **[*788]** upon a New York-based business transaction, an articulable nexus must exist between business transacted by Hoffman-La Roche in-state and the cause of action sued upon here. *Alexander & Alexander v. Donald F. Muldoon & Co., 685 F. Supp. 346 (S.D.N.Y. 1986)*.

As a threshold matter, nothing in the record before me indicates that Hoffman-La Roche has either conducted business in New York or facilitated any transaction between Perfumer's and Roure in-state. Moreover, the nexus that Perfumer's draws upon in their pleadings and supportive documentation is a tenuous one, reliant on magazine articles and broadly ambiguous statements which suggest only that Hoffman-La Roche conducts business worldwide. The Supreme Court has held that ***HN5***[] merely entering products into the stream **[**7]** of commerce is an insufficient jurisdictional predicate. *Asahi Metal Industry Co. v. Superior Court, 480 U.S. 102, 110, 94 L. Ed. 2d 92, 107 S. Ct. 1026 (1987)* (citing *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 62 L. Ed. 2d 490, 100 S. Ct. 559 (1980))*. Although Hoffman-La Roche has many subsidiaries and its name is world renowned for such items as cosmetics and perfumes, business activity of this sort is nonetheless insufficient evidence of purposeful contacts with New York for the purposes of this action.

Nor can this court assert jurisdiction over Hoffman-La Roche simply because it is the parent of a United States subsidiary. ***HN6***[] Only where a parent corporation asserts such extensive control over its subsidiary as to be deemed the subsidiary's alter-ego, can the parent-subsidiary relationship be a sufficient jurisdictional predicate. *See* *Volkswagenwerk Atkengesellschaft v. Beech Aircraft Corp., 751 F.2d 117, 120 (2d Cir. 1984)* ("identical ownership interests must exist before one corporation can be considered a department of another corporation for jurisdictional purposes"). Parent corporations that observe "a strict formal separation" from their subsidiaries and that derive no direct benefit therefrom are not subject to in personam **[**8]** jurisdiction. *Bulova Watch Co., Inc. v. K.* Hattori & Co., Ltd., 508 F. Supp. 1322, 1342 (E.D.N.Y. 1981) (Weinstein, J.). Because Hoffman-La Roche neither supplied ingredients for the SAMBA perfume nor asserted control over or derived financial benefit with regard to SAMBA from Roure or Roure-France, no viable jurisdictional predicate exists over Hoffman-La Roche. *Id*.

Alternatively, Perfumer's contends that Hoffman-La Roche is subject to New York's longarm jurisdiction based on its allegedly tortious behavior occurring outside New York that caused Perfumer's harm in New York. N.Y. Civ. Pract. L. & R. § 302(a)(3) (McKinney's 1983 & Supp. 1990). Perfumer's, however, fails to show either that Hoffman-La Roche had purposeful contacts within New York or was a party to the SAMBA deal such that any torts arising therefrom could be traced to Hoffman-La Roche. Any purported tort or fraud arising from Perfumer's contract with Roure therefore remains wholly unrelated to Hoffman-La Roche and cannot form the basis of longarm jurisdiction. *Cf.* Cleopatra Kohlique, Inc. v. New High Glass, Inc., 652 F. Supp. 1254 (E.D.N.Y. 1987) (independent tort committed outside New York which causes **[**9]** and can be traced to a harm in New York is a sufficient predicate for longarm jurisdiction.); Mayer v. Josiah Wedgwood & Sons, Ltd., 601 F. Supp. 1523 (S.D.N.Y. 1985). Thus, no jurisdiction can be exercised over Hoffman-La Roche based upon the tort theory of longarm jurisdiction.

B. Roure-France

It is uncontested that Perfumer's engaged the assistance of Roure-France in order to remedy problems with the SAMBA fragrance after "off odors" were detected, and that subsequent meetings between Perfumer's and Roure-France were conducted in France. Amended Complaint paras. 92-105. ***HN7***[] Marketing products and establishing channels for providing advice in the forum state, in addition to placing product in the stream of commerce, have been held to indicate "acts of the defendant purposefully directed toward the forum State" such that jurisdiction may be conferred. *Asahi Industry Co., 480 U.S. at 113*. **[*789]** In addition to acting in an advisory capacity to Perfumer's, Roure-France co-developed the original "Neroli Nights" prototype for SAMBA, which was destined to be developed for production and distribution in the United States by Roure. These are sufficient purposeful acts in New York to confer **[**10]** personal jurisdiction over Roure-France, presuming that sufficient notice and service were made upon Roure-France.

II. *Service of Process*

Rule 4(e) of the Federal Rules of Civil Procedure ***HN8***[] requires that service be made "under the circumstances and in the manner prescribed" by the law of the state in which the forum court is located. *Davis v. Musler, 713 F.2d 907, 914 (2d Cir. 1983)*. In New York, service of process on a corporation requires that an officer or director of the corporation be present in the forum to accept service of summons on its behalf. *N.Y. Civ. Prac. L. & R. §§ 308*, *318* (McKinney's 1983 & Supp. 1990). Here, Perfumer's merely mailed a certified copy of the summons overseas expecting Roure-France to acknowledge receipt without objection.

Roure-France avers that it does not maintain an office or agents in New York state, and no affidavits of service upon the Secretary of State in Albany appear in Perfumer's papers. And although Roure-France met with and advised Perfumer's after the prototype fragrance was developed, such meetings were conducted in France. Therefore, for the purposes of determining the service issue, Roure-France never voluntarily availed itself **[**11]** of or entered New York in order to accept service as required by New York law. Nor could Roure have properly accepted service on Roure-France's behalf because they were not held out as agents of one another.

HN9[] Absent domiciliary agents in the forum, leave of court is mandated in order to use substituted service. *N.Y. Civ. Prac. L. & R. §§ 308*, *313* (McKinney's 1983 & Supp. 1990). Perfumer's failed to seek court assistance in serving process. Indiscriminate use of the mails to effect service abroad does not assure either receipt or sufficient notice of a pending action comporting with fairness and due process. Furthermore, service effected outside the United States on a foreign corporation demands proper service under the constraints of the foreign domiciliary's law, unless that law is inconsistent with requirements of the Hague Convention Treaty. *See* Hague Convention on the Service Abroad of Judicial and Extrajudicial Documents in Civil or Commercial Matters, *opened for signature* Nov. 15, 1965, 20 U.S.T. 361, T.I.A.S. No. 6638, 658, 658 U.N.T.S. 163 ("Hague Convention").

France and the United States are participants and signatories of the Hague Convention. The Hague Convention, **[**12]** which takes precedence over inconsistent foreign law, mandates that where service is not or cannot be properly effected on a foreign corporation in accordance with its forum's law, an agent of the state shall be designated by the corporation to receive service of documents. French law requires that service be made by the applicable central authority designated by the French government, or, alternatively, by an authorized bailiff or huissier. Weymuller Affid. para. 8. Perfumer's failed to properly serve Roure-France either by French or International law.

As such, I therefore find that service was improper. Because Roure-France correctly preserved its jurisdictional objection, service of summons and complaint on Roure-France is quashed as fatally deficient. *See* *Volkswagenwerk Aktiengesellschaft v. Schlunk, 486 U.S. 694, 108 S. Ct. 2104, 100 L. Ed. 2d 722*, slip op. at 3 (1988).

Finally, Perfumer's requests additional discovery regarding the jurisdiction questions. However, ***HN10***[] discovery procedures are appropriate only when there is at least some slight factual indication that a basis for jurisdiction exists." *Ronar, Inc. v. Wallace, 649 F. Supp. 310, 317-18 (S.D.N.Y. 1986)*. The discovery rules "are **[**13]** not a hunting license to conjure up a claim that does not exist." *Samuels v. Eleonora Beheer, B.V., 500 F. Supp. 1357, 1362 (S.D.N.Y. 1980)* (Weinfeld, J.), *aff'd*, *661 F.2d 907 (2d* ***[*790]*** *Cir. 1981)*. The request is therefore denied. [3]

III. *Substantive Claims*

Because personal jurisdiction cannot be asserted over Hoffman-La Roche and Roure-France, Perfumer's substantive claims relate only to the agreement between Perfumer's and Roure. Perfumer's alleges several claims sounding in federal and state antitrust, conspiracy, fraud, and breach of contract based on Roure's wrongful use of DL-alpha tocopherol, the perfume's malodorous preservative ingredient, rather than BHT.

Perfumer's federal conspiracy and fraud claims are grounded on allegations that Roure, with others, monopolized the use of certain preservatives in the fragrance market in violation of *§ 2* of the Sherman Act. The Act, in pertinent part, states:

> ***HN11***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, **[**14]** to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony. . . .

15 U.S.C. § 2 (1980).

Ultimately, to find a *§ 2* violation it must be determined either that Roure intended to monopolize the DL-alpha tocopherol market or that Roure's acts asserted such sufficient control over DL-alpha tocopherol as to affect its price and/or unreasonably restrict competition in the marketplace for that product. *See* *Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919 (9th Cir. 1980)*, *cert. denied*, *450 U.S. 921, 101 S. Ct. 1369, 67 L. Ed. 2d 348 (1981)* (***HN12***[] antitrust claims are comprised of three elements: (1) possession of a monopoly in the relevant market; (2) willful maintenance of power over the product; and (3) causal antitrust injury); *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 380, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*.

Perfumer's pleadings in support of its antitrust claims against Roure are sparse. Perfumer's asserting bald allegations that Roure monopolized the preservative market in the perfume industry in fact present no more than a simple breach of contract claim. Specifically, Perfumer's maintains that Roure was motivated to use DL-alpha tocopherol because **[**15]** of an otherwise unexplained market-share or stake that Roure maintained over that

---

[3] The issue of improper venue over Roure-France and Hoffman-La Roche is mooted because there is no *in personam* jurisdiction over either entity.

product. As such, Perfumer's argues that Roure secretly changed SAMBA's ingredients, instead of using the recipe upon which Perfumer's and Roure had originally agreed, in furtherance of this control over a nebulously defined DL-alpha tocopherol market. *See* Amended Complaint para. 21. The pleadings do not indicate, however, that there is a distinct DL-alpha tocopherol market, or that the market price for and availability of DL-alpha tocopherol was adversely affected by Roure's allegedly controlling market share.

Perfumer's further maintains that Roure conspired with its corporate affiliates, Hoffman-La Roche and Roure-France, to monopolize the market for that chemical stabilizer. Amended Complaint para. 95. ***HN13***[] Conspiracy to monopolize a market requires a finding of specific intent to monopolize. *International Railways of Central America v. United Brands Co., 532 F.2d 231* (2d Cir.), *cert. denied 429 U.S. 835, 97 S. Ct. 101, 50 L. Ed. 2d 100(1976)*. Secretly changing the preservative is insufficient proof that Roure had the requisite intent to take over a significant market share of the DL-alpha tocopherol market.

Perfumer's also **[**16]** claims that because of Roure's monopoly power over the trade secret formula, Perfumer's was not able to purchase products derived from the SAMBA standard formula from alternate suppliers. Amended Complaint para. 96. However, because Perfumer's accepted that "SAMBA" would be produced by a secret and protected formula, it is precluded from asserting that as a basis to allege violative monopoly power, regardless of whether it was unable to obtain like perfume oils elsewhere. ***HN14***[] Owning the exclusive recipe for a product, albeit monopolistic, is not necessarily **[*791]** violative of the antitrust laws, especially where the parties formally agreed to maintain the integrity of the trade secret formula. *See, e.g., United States v. E.I. du Pont de Nemours & Co., 351 U.S. at 382*.

Moreover, that a specific choice of ingredients was made exclusively by Roure is inconclusive that such conduct rises to the "predatory" level which threatens the marketplace as a whole. *See Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. Perfumer's argues that it is a violation of the antitrust laws for Roure, as Hoffman-La Roche's subsidiary, to buy raw materials from Hoffman-La Roche and incorporate **[**17]** them into an end product, without resultant antitrust implications. More must be alleged to show some detriment to the marketplace; Perfumer's fails to plead a prima facie case of Sherman Act violations to withstand this motion to dismiss.

Additionally, Perfumer's alleges violations of § 3 of the Clayton Act, namely, that Roure had unlawfully tied the SAMBA fragrance with DL-alpha tocopherol preservative. ***HN15***[] Tying arrangements involve a seller's coercion of a buyer to purchase two distinct products, whereby the buyer seeking to purchase one product is forced by the seller to purchase a second distinct product. *15 U.S.C. § 14 (1980)*; *Times Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*; *Unijax, Inc. v. Champion Intern, Inc., 683 F.2d 678, 684-85 (2d Cir. 1982)*. Because the amended complaint fails to allege the existence of any coercive tactics perpetrated by Roure, and considering that preservatives are a necessary and integral ingredient of the final perfume product, Perfumer's fails to state a Clayton Act cause of action.

Similarly, Perfumer's claim under New York's Donnelly Act, *N.Y. Gen. Bus. L. § 340* (McKinney's 1988), must also fall. ***HN16***[] To sustain an action under **[**18]** the Donnelly Act, elements similar to a federal antitrust cause of action must be pleaded. For the same reasons that Perfumer's fails to state a federal antitrust claim, its Donnelly Act claims must fall as well. *Id*.

Additionally, Perfumer's fails to state a claim sufficient to invoke New York's consumer protection laws. *N.Y. Gen. Bus. L. § 349* (McKinney's 1988). New York's Consumer Protection Act is intended as "a strong deterrent against deceptive business practices" which directly affect the consuming public. *See N.Y. Gen. Bus. L. § 349(a)*. Although Perfumer's avers that some courts have allowed a private right of action under that statute for corporate claims, such right arises only if the movant demonstrates an injury to the public interest. *See Azby Brokerage v. Allstate Insur. Co., 681 F. Supp. 1084 (S.D.N.Y. 1988)*. Perfumer's has not alleged such injury nor do its pleadings demonstrate the requisite impact on consumers. Therefore, Perfumer's Consumer Protection Act claims are dismissed.

Perfumer's also alleges a fraud claim based on Roure's failure to tell Perfumer's of its decision to use DL-alpha tocopherol instead of BHT. *Rule 9(b) of the Federal Rules of Civil* ***[**19]*** *Procedure* ***HN17***[] provides that a complaint charging fraud or mistake must state the circumstances constituting fraud or mistake with particularity. *Luce v. Edelstein, 802 F.2d 49, 54-55 (2d Cir. 1986)*. The complaint fails to meet this requirement. Even if it did, New York courts have consistently held that a cause of action for fraud cannot be the outgrowth of simple breach of contract claims. *Metropolitan Transportation Auth. v. Triumph Advertising Prod., Inc., 116 A.D.2d 526, 497 N.Y.S.2d 673, 675* (1st Dep't 1986). Here, the only alleged misrepresentations involve Roure's failure to produce the SAMBA fragrance in accordance with the original "Neroli Nights" formula. Perfumer's thus cloaks a simple breach of contract claim in broad allegations of fraud. Accordingly, Perfumer's fraud claims are dismissed. [4]

Although the allegations of the complaint must be accepted as true on a *Rule 12(b)(6)* motion to dismiss, Perfumer's pleadings present only a dispute between **[**20]** a supplier and a purchaser regarding the **[*792]** merchantibility of the "SAMBA" fragrance as it was developed pursuant to contract. As such, the only claims that survive this motion to dismiss are negligence, common law and UCC breach of contract claims, and implied warranty of merchantibility claims as alleged against Roure.

For the foregoing reasons, the motion to dismiss is granted as to defendants Hoffman-La Roche and Roure-France and the complaint is dismissed in its entirety as against both. The complaint survives as to counts five, six, seven, nine, ten, twelve, thirteen and fourteen as against Roure only.

SO ORDERED.

DATED: New York, New York

March 19, 1990

End of Document

[4] Although Perfumer's alleges entitlement to punitive damages, all of the claims which would have otherwise supported punitive damages have been dismissed. Accordingly, Perfumer's claims for punitive damages are dismissed as well.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN1[] **Class Actions, Certification of Classes**

Plaintiffs' motion for class certification must be considered in light of the well established principles of *Fed. R. Civ. P. 23*. Plaintiffs must first satisfy the four requirements of *Fed. R. Civ. P. 23(a)*: 1) the class is so numerous that joinder of all members is impracticable; 2) there are questions of law or fact common to the class; 3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and 4) the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)(1)-(4)*. These are commonly referred to as the tests of numerosity, commonality, typicality, and adequacy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] **Class Actions, Prerequisites for Class Action**

In addition, plaintiffs must demonstrate that their action is encompassed within one of the three categories listed in *Fed. R. Civ. P. 23(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3[] **Class Actions, Prerequisites for Class Action**

Before addressing any of the *Fed. R. Civ. P. 23* criteria, however, the court must find that a precisely defined class exists and that the class representatives fall within this class. This test is an implicit requirement of *Rule 23*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] **Class Actions, Certification of Classes**

Plaintiffs carry the burden of proof regarding *Fed. R. Civ. P. 23*'s requirements. The court may only certify the class if it is satisfied after a rigorous analysis that all of the prerequisites are met. Approval or denial of certification, however, ultimately is vested in the discretion of the court.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN5[] **Class Actions, Prerequisites for Class Action**

In considering each requirement of *Fed. R. Civ. P. Rule 23*, the court is mindful of the accepted rationale underlying class actions. It is a necessary vehicle for the vindication of small claims, particularly when those claims involve complex litigation. *Rule 23* is an instrument of convenience, but should not put an unjustified burden upon judicial resources. When there is a question as to whether certification is appropriate, the court should give the benefit of the doubt to approving the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Workers' Compensation & SSDI > Coverage > Employment Status > Employers

HN6[] **Class Actions, Prerequisites for Class Action**

The implicit criterion, subsumed within *Fed. R. Civ. P. 23*, is the existence of a defined class of which the named representatives are a part.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > Special Proceedings > Class Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN7[] Prerequisites for Class Action, Numerosity

Fed. R. Civ. P. 23(a)(1) precludes any class action unless the class is so numerous that joinder of all members is impracticable. There is, however, no absolute number that satisfies the numerosity requirement. The Eighth Circuit has not established any rigid rules regarding the necessary size of a class. Beyond mere numbers, a court may look to the type of action, the size of individual claims, the inconvenience of conducting individual lawsuits, and any other factors pertaining to the propriety of joining all proposed class members. Courts have approved classes as small as 250-300, and as large as a nationwide class. If class treatment is found to be inappropriate, the court can invoke its management discretion pursuant to *Rule 23(c)(1)*, *(c)(4)*, and *(d)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN8[] Class Actions, Prerequisites for Class Action

Fed. R. Civ. P. 23(a)(2) requires that plaintiffs show there are questions of law or fact common to the class. Yet, not every question of law or fact must be common to every member of the class. The requirement is met if the questions linking the class members are substantially related to the resolution of the litigation even though the individuals are not identically situated. Identical questions are not necessary and factual discrepancies are not fatal to certification. *Rule 23(a)(2)* may be satisfied if common questions of liability are present despite individual differences in damages.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN9[] Private Actions, Remedies

To prevail on their claims, plaintiffs must prove a violation of the antitrust laws, direct injury resulting from the violation (impact), and damages. Antitrust, price-fixing conspiracy cases, by their nature, deal with common legal and factual questions about the existence, scope and effect of the alleged conspiracy. Numerous courts have approved class treatment where the putative class alleges a price fixing conspiracy. If there be no proof of a conspiracy, no plaintiffs recover under any theory of the pleadings.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN10[] Prerequisites for Class Action, Typicality

Fed. R. Civ. P. 23(a)(3) requires the claims or defenses of the representative parties be typical of the claims or defenses of the class. Typicality has independent significance: it requires a demonstration that members of the class have the same or similar grievances as plaintiffs. The typicality requirement is satisfied when the claims of the named plaintiffs emanate from the same event or are based on the same legal theory as the claims of the class members. Plaintiffs' liability theory and type of relief must be co-extensive with those of the class members. As such, the representatives' claims must adequately protect the interests of the class and there must be no antagonistic interests between the representatives and the class. Perfect identity of claims, however, is not required, and factual differences between plaintiffs are not fatal.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN11[] **Class Actions, Prerequisites for Class Action**

An antitrust price fixing case generally will involve claims sufficiently similar to satisfy *Fed. R. Civ. P. 23(a)(3)*. If the representatives must prove a conspiracy, its effectuation, and damages therefrom -- precisely what the absentees must prove to recover -- the representative claims can hardly be considered atypical.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN12[] **Class Actions, Prerequisites for Class Action**

The fact that the purchases were not made from all of the defendants, or that all of the methods through which the conspiracy was allegedly effected were not utilized against the named plaintiffs, is not dispositive of their ability to represent the class. Nor will differing damages, resulting from varied methods of procuring and purchasing the product, defeat satisfaction of *Fed. R. Civ. P. 23(a)(3)*.

Civil Procedure > ... > Class Actions > Class Members > Named Members

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN13[] **Class Members, Named Members**

The mere fact that all of the methods through which the alleged conspiracy was effected were not used with respect to the named representatives, or the fact that they did not purchase from all defendants, does not determine that the claim of the named plaintiffs lack typicality under *Fed. R. Civ. P. 23(a)(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Criminal Law & Procedure > Criminal Offenses > Weapons Offenses > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN14[] **Prerequisites for Class Action, Adequacy of Representation**

Fed. R. Civ. P. 23(a)(4) demands that the representative parties will fairly and adequately protect the interests of the class. Adequate representation is measured by two factors: (1) plaintiffs' counsel must be competent to pursue this action, and (2) the representatives must not have interests which are antagonistic to those of the class. *Rule 23(a)(4)* asks whether the class representatives will vigorously prosecute the interests of the class. *Rule 23(a)(4)* also requires that the representative display some minimal level of interest in the action, familiarity with the practices challenged, and ability to assist in decision making as to the conduct of the litigation. The question is: Will the representative parties put up a genuine fight?

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN15[] **Prerequisites for Class Action, Typicality**

The second of *Fed. R. Civ. P. 23(a)(4)*'s requirements -- lack of antagonism -- is similar to *Rule 23(a)(3)*'s typicality test. In an antitrust action, therefore, the plaintiffs need not have purchased from all of the defendants or have been adversely affected by all of the means and methods by which the alleged conspiracy was implemented. Moreover, the fact that some representatives face additional defenses does not defeat their ability adequately to represent the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN16[] **Class Actions, Prerequisites for Class Action**

An additional factor considered by some courts is the financial wherewithal available to, and provided by, the class representatives. Consideration of this factor, however, should be limited. The focus of the financial issue should be on the class representatives' ability to finance the cost of notice to absent class members and to retain vigorous and effective counsel.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Class Actions, Prerequisites for Class Action**

Naked allegations of antagonism are insufficient to undermine certification pursuant to *Fed. R. Civ. P. 23(a)(4)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN18[] **Class Actions, Prerequisites for Class Action**

The representative need not have, and often in an anti-trust action will not have, personal knowledge of the facts needed to make out a prima facie case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Prerequisites for Class Action, Predominance**

Fed. R. Civ. P. 23(b)(3) requires that questions of law or fact predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Trials > Separate Trials

HN20[] **Class Actions, Prerequisites for Class Action**

There are no bright lines for determining whether common questions predominate. An issue will meet the predominance standard when there exists generalized evidence that proves or disproves an element on a simultaneous, class-wide basis. Such proof obviates the need to examine each class member's individual position. The total amount of time spent on a common issue compared to time spent on individual issues is immaterial. The mere existence of individual questions such as damages does not automatically preclude satisfaction of the predominance requirement, so long as there is some common proof to adequately demonstrate some damage to each plaintiff. Individualized, separate trials -- mini-trials -- on individual issues of fact are not a bar to the use of the class action procedure.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN21[] **Private Actions, Remedies**

The common principles have been applied with particular force in the antitrust setting. Plaintiffs must prove three elements to succeed: (1) violation of the ***antitrust law***; (2) direct injury (or impact) from the violation; and (3) damages suffered by the plaintiffs. Non-uniformity of the prices at which plaintiffs purchased their goods is not fatal to certification. As long as the existence of a conspiracy is the overriding question, then the class has met its predominance requirement. To prove injury, plaintiffs need only demonstrate they have suffered some damage from the unlawful conspiracy. Such a showing may be made on a class basis if the evidence demonstrates that the conspiracy succeeded in increasing prices above the competitive level.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN22[] **Private Actions, Remedies**

Common proof of impact is possible even though prices are individually negotiated. Proof of impact typically follows proof of a price-fixing conspiracy where the defendants are shown to have sufficient market power. Although damage amounts may vary among plaintiffs, this fact alone, particularly in antitrust actions, will not defeat certification.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN23[] **Private Actions, Remedies**

Individual questions of damages are often a problem encountered in an antitrust action and are rarely a barrier to certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN24[] **Class Actions, Prerequisites for Class Action**

In considering whether a class action is the superior method of proceeding, a court should consider: (A) the interest of members of the class in individually controlling the prosecution for defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action. *Fed. R. Civ. P. 23(b)(3)(A)-(D)*. Manageability is a real issue.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

HN25[] **Class Actions, Prerequisites for Class Action**

The court is mindful that dismissal for management reasons is never favored. The vehicle of class action is meant to permit plaintiffs with small claims and little money to pursue a claim otherwise unavailable. A contrary rule would essentially preclude class treatment whenever separate issues had to be tried.

Opinion

[*101] ORDER

JAMES M. ROSENBAUM, UNITED STATES DISTRICT JUDGE.

Plaintiffs move for class certification pursuant to *Rule 23, Federal Rules of Civil Procedure* (Fed.R.Civ.P.). Plaintiffs seek to certify a class of:

> All employers (excluding defendants and co-conspirators, including any subsidiary or affiliate thereof) with places of business within the State of Minnesota required by Minnesota law to carry workers' compensation insurance coverage, who between June 8, 1979, and April 25, 1983 purchased policies of workers compensation insurance from one or more of the named defendants, including any subsidiary or affiliate thereof, or from one or more other member insurance companies of the Workers Compensation Insurers' Rating Association **[**3]** of Minnesota.

For the reasons set forth herein, plaintiffs' motion is granted.

I. *Background*

The facts of this case, at this pretrial stage, were set out by this Court and the court of appeals. They are reported in this Court's order, dated July 28, 1987, and at *867 F.2d 1552*, respectively. A very brief review is warranted, however, for purposes of this motion.

Prior to June 7, 1979, *Minnesota Statutes, § 79.21*, required that the rates for Minnesota's workers' compensation insurance be approved by the Insurance Commission of Minnesota. On June 7, 1979, Minnesota's legislature amended *§ 79.21* to permit insurers to "write insurance at rates that are lower than the rates approved by the commissioner . . . .." *Minnesota Statutes, § 79.21*. Plaintiffs argue that, notwithstanding the statutory amendment, defendants conspired, through the Workers' Compensation Insurance Rating Association of Minnesota (WCIRAM), to continue to charge inflated rates by price fixing and enforced their agreement through a group boycott from June 7, 1979, to and until April 25, 1983.

The putative plaintiffs purchased workers' compensation insurance from the named defendants and approximately 250 other insurers **[**4]** between June 7, 1979, and April 25, 1983. Plaintiffs instituted this action in 1983, alleging price fixing and boycott in violation of the Sherman Act, *15 U.S.C. § 1*, and the Minnesota ***Antitrust Law*** of 1971, *Minnesota Statutes, §§ 325D.49-.66*. This Court granted summary judgment in defendants' favor on plaintiffs' federal claims on July 28, 1987, and declined to accept the remainder of the case under pendent jurisdiction. *In re* ***[*102]*** *Workers' Compensation Insurance Antitrust Litigation,* Civil No. 4-85-1166, mem. op. at 23 (July 28, 1987).

This Court's order was reversed by the United States Court of Appeals for the Eighth Circuit. The Eighth Circuit held that the evidence offered in opposition to the motion for summary judgment "support[ed] an inference of an agreement to boycott, coerce or intimidate companies into adherence to a fixed price." *In re Workers' Compensation Insurance Antitrust Litigation, 867 F.2d 1552, 1566* (8th Cir), *cert. denied, 492 U.S. 920, 109 S. Ct. 3247, 106 L. Ed. 2d 593 (1989)*. The court of appeals then directed this Court to maintain pendent jurisdiction over plaintiffs' state law claims. *Id., at 1567-68*. And so the matter is before this Court.

[5]** In reply to plaintiffs' present motion for class certification, defendants zealously urge that a class action is a most undesirable, unmanageable, and particularly unjust method of resolving these issues. They claim each plaintiff is so unique that no commonality of interest or claims is possible. Defendants then argue the incomprehensibly complex nature of the insurance business, lecturing the Court regarding the intricacies of insurers' risks and resulting decision-making policies.

Defendants highlight three factors which they allege distinguish this antitrust certification motion from the myriad others with which courts have somehow managed. First, defendants assert plaintiffs will have to prove that each of the 250 insurance companies joined in and adhered to the conspiratorial boycott, thus creating numerous individual questions of impact and injury, none of which predominate.

Second, defendants contend the method of calculating insurance prices is not conducive to class action treatment because the allegedly fixed rates constitute only one of a number of factors utilized to set insurance prices. Defendants argue each defendant will have calculated prices in a different manner **[**6]** using the challenged rate in varying degrees. Defendants, here, emphasize the complexity of computing workers' compensation insurance rates. Defendants allege pricing policies vary so widely from employer to employer that no consistent method could possibly be derived by which all of the defendants' actions could be judged in a class proceeding.

Third, defendants note that differences between the various plaintiffs are also incorporated into insurance prices. This, defendants argue, destroys any typicality among the plaintiffs. In this regard, they note that employers are big and small and their employees either do, or do not, engage in high risk activities. Further, defendants suggest the existence of an incredible variety of workers' compensation plans, including some to employers which were so small that they did not purchase insurance under the rates specified by the Commissioner and others which purchased under an assigned risk program rather than the rate statute. Defendants finally, but emphatically, suggest that some employers purchased policies whose premiums were not impacted by any allegedly illegal activity. Defendants ask the Court to consider:

> 1) employers who purchased **[**7]** multi-state and multi-line policies the premiums for which were not calculated using the Commissioner's rate;
> 2) employers who purchase policies based upon individual loss characteristics including retrospective rating plans as well as employers who were simply bad risks;
>
> 3) employers who purchased policies reflecting anticipated changes by the Minnesota legislature on *Minnesota Statutes, § 79.23*; and
> 4) employers who purchased policies in which they received other options which lowered their premiums.

These considerable discrepancies, argue defendants, make class certification under *Rule 23* an unavailable option. In view of all of these concerns, defendants presumably suggest the courts would be best served by several hundred individual lawsuits against each of 250 or so putative defendants.

[*103] II. *Analysis*

HN1[] Plaintiffs' motion for class certification must be considered in light of the well established principles of *Rule 23, Fed.R.Civ.P.* Plaintiffs must first satisfy the four requirements of *Rule 23(a)*:

> 1) the class is so numerous that joinder of all members is impracticable;
>
> 2) there are questions of law or fact common to the class;
>
> 3) the claims or defenses of the representative **[**8]** parties are typical of the claims or defenses of the class; and
>
> 4) the representative parties will fairly and adequately protect the interests of the class.

Rule 23(a)(1)-(4), Fed.R.Civ.P.; *Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 162, 94 S. Ct. 2140, 2145, 40 L. Ed. 2d 732 (1974)*. These are commonly referred to as the tests of "numerosity, commonality, typicality, and adequacy."

HN2[] In addition, plaintiffs must demonstrate that their action is encompassed within one of the three categories listed in *Rule 23(b)*. *Eisen, 417 U.S. at 162, 94 S. Ct. at 2145*. Plaintiffs must demonstrate that:

> (1) the prosecution of separate actions by or against individual members of the class would create a risk of

(A) inconsistent or varying adjudications with respect to individual members of the class which would establish incompatible standards of conduct for the party opposing the class; or

(B) adjudications with respect to individual members of the class which would as a practical matter be dispositive of the interest of the other members not parties to the adjudications or substantially impair or impede their ability to protect their interest; or

(2) the party opposing the class **[**9]** has acted or refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole; or

(3) the court finds that the questions of law or fact common to the members of the class predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy.

Rule 23(b)(1)-(3), Fed.R.Civ.P. It is apparent that plaintiffs' claims fall most naturally within the ambit of subsection 23(b)(3) which requires that common questions predominate and that the class action format be superior to other means of adjudication.

HN3[] Before addressing any of the *Rule 23* criteria, however, the Court must find that a precisely defined class exists and that the class representatives fall within this class. *John Does 1-100 v. Boyd, 613 F. Supp. 1514, 1527 (D.Minn. 1985)*; *Dirks v. Clayton Brokerage Co. of St. Louis, Inc., 105 F.R.D. 125, 130-31 (D.Minn. 1985)*. This test is an implicit requirement of *Rule 23*. *Dirks, 105 F.R.D. at 130*.

HN4[] Plaintiffs carry the burden of proof regarding **[**10]** *Rule 23*'s requirements. *Smith v. Merchants & Farmers Bank, 574 F.2d 982, 983 (8th Cir. 1978)*; *Kassover v. Computer Depot, Inc., 691 F. Supp. 1205, 1213 (D.Minn. 1987)*. The Court may only certify the class if it is satisfied after a rigorous analysis that all of the prerequisites are met. *Bishop v. Committee on Professional Ethics, 686 F.2d 1278, 1287 (8th Cir. 1982)*. Approval or denial of certification, however, ultimately is vested in the discretion of the Court. *Gilbert v. City of Little Rock, Arkansas, 722 F.2d 1390, 1399 (8th Cir. 1983)*, *cert. denied, 466 U.S. 972, 104 S. Ct. 2347, 80 L. Ed. 2d 820 (1984)*; *In re Control Data Corp. Securities Litigation, 116 F.R.D. 216, 219 (D.Minn. 1986)*.

HN5[] In considering each requirement of *Rule 23*, the Court is mindful of the accepted rationale underlying class actions. It is a necessary vehicle for the vindication of small claims, particularly when those claims involve complex litigation. *Kassover, 691 F. Supp. at 1213*. *Rule 23* is an "instrument of convenience," but should not put an "unjustified burden upon judicial resources." *Id.* When there is a question as to whether certification is appropriate, the Court should **[**11]** give the benefit of the doubt to approving the class. *In re Control Data Corp., 116 F.R.D. at 219*.

[*104] Having set forth these implicit and explicit criteria, the Court considers each of the *Rule 23* requirements. [1]

A. *Implicit Criteria -- Defined Class*

HN6[] The implicit criterion, subsumed within *Rule 23*, is the existence of a defined class of which the named representatives are a part. *John Does 1-100, 613 F. Supp. at 1527*. The Court holds that such a class is sufficiently defined in this case. Class members will include only those employers who purchased workers' compensation insurance -- a fact easily determined. According to their pleadings, the named representatives fall within this class, and each purchased workers' compensation insurance between 1979 and 1983 from one of the defendants. This

[1] The Court considers plaintiffs' federal and state antitrust claims together for purposes of this motion. *See generally Midwest Communications, Inc. v. Minnesota Twins, 779 F.2d 444, 452-53 (8th Cir. 1985)*, *cert. denied, **476 U.S. 1163, 106 S. Ct. 2289, 90 L. Ed. 2d 730 (1986)***; *Hoffman v. Delta Dental Plan of Minnesota, 517 F. Supp. 564, 573 (D.Minn. 1981)*.

implicit requirement **[**12]** is satisfied. The Court then turns to the requirements of Rule 23(a), all of which must be met.

B. Rule 23(a) *Requirements*

1. Rule 23(a)(1) -- *Numerosity*

HN7[] Rule 23(a)(1) precludes any class action unless "the class is so numerous that joinder of all members is impracticable." There is, however, no absolute number which satisfies the "numerosity" requirement. The Eighth Circuit has not established any rigid rules regarding the necessary size of a class. *Boyd v. Ozark Airlines, Inc., 568 F.2d 50, 54 (8th Cir. 1977)*. Beyond mere numbers, a court may look to the type of action, the size of individual claims, the inconvenience of conducting individual lawsuits, and any other factors pertaining to the propriety of joining all proposed class members. *Paxton v. Union National Bank, 688 F.2d 552, 559-60 (8th Cir. 1982)*. Courts have approved classes as small as 250-300, *Bowman v. National Football League, 402 F. Supp. 754, 756 (D.Minn. 1975)*, and as large as a nationwide class. *Califano v. Yamasaki, 442 U.S. 682, 703, 99 S. Ct. 2545, 2558, 61 L. Ed. 2d 176 (1979)*. If class treatment is found to be inappropriate, the Court can invoke its management discretion pursuant to **[**13]** Rule 23(c)(1), (c)(4), and (d). *General Telephone Co. v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 2372, 72 L. Ed. 2d 740 (1982)*; *State of Minnesota v. United States Steel Corp., 44 F.R.D. 559, 566 (D.Minn. 1968)*.

Plaintiffs have asserted no specific numbers, but contemplate a plaintiff class in excess of 10,000. Defendants do not seriously challenge this figure or that it would satisfy this requirement. The Court, therefore, concludes defendants have met their burden of establishing numerosity pursuant to Rule 23(a)(1).

2. Rule 23(a)(2) -- *Commonality*

HN8[] Rule 23(a)(2) requires that plaintiffs show "there are questions of law or fact common to the class." Yet, not every question of law or fact must be common to every member of the class. *Paxton, 688 F.2d at 561*; *Mosley v. General Motors Corp., 497 F.2d 1330, 1334 (8th Cir. 1974)*. The requirement is met if the questions linking the class members are "substantially related to the resolution of the litigation even though the individuals are not identically situated." *Paxton, 688 F.2d at 561* (quoting *American Finance Sys., Inc. v. Harlow, 65 F.R.D. 94, 107 (D.Md. 1974)*). Identical questions are not necessary **[**14]** and factual discrepancies are not fatal to certification. *Dirks, 105 F.R.D. at 131*. Rule 23(a)(2) may be satisfied if common questions of liability are present despite individual differences in damages. [2] *Jenson v. Continental Financial Corp., 404 F. Supp. 806, 810 (D.Minn. 1975)*. *See* *Gentry v. C & D Oil Co., 102 F.R.D. 490, 493 (W.D.Ark. 1984)*.

HN9[] To prevail on their claims, plaintiffs must prove a violation of the antitrust laws, direct **[*105]** injury resulting from the violation (impact), and damages. *Windham v. American Brands, Inc., 565 F.2d 59, 65 (4th Cir. 1977)*, *cert. denied, 435 U.S. 968, 98 S. Ct. 1605, 56 L. Ed. 2d 58 (1978)*; *In re Wirebound Boxes Antitrust Litigation, 128 F.R.D. 268, 271 (D.Minn. 1989)*. " Antitrust, price-fixing conspiracy cases, by their nature, deal with common legal and factual questions about **[**15]** the existence, scope and effect of the alleged conspiracy." *In re Sugar Industry Antitrust Litigation, 73 F.R.D. 322, 335 (E.D.Pa. 1976)*. *See* *Fisher Bros. v. Mueller Brass Co., 102 F.R.D. 570, 574-75 (E.D.Pa. 1984)*; *In re Alcoholic Beverages Litigation, 95 F.R.D. 321, 324 (E.D.N.Y. 1982)*. Numerous courts have approved class treatment where the putative class alleges a price fixing conspiracy. [3] *See* *Rios v. Marshall, 100 F.R.D. 395, 405 (S.D.N.Y. 1983)*; *United Nat'l Records, Inc. v. MCA, Inc., 99 F.R.D. 178, 180*

---

[2] Rule 23(a)(2) is not the same requirement as that contemplated in Rule 23(b)(3) which requires that common questions predominate. For purposes of Rule 23(a)(2), plaintiffs need only show that common questions exist. *See* *In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407, 415 (M.D.La. 1980)*.

[3] Generally, the "tactical problems inherent in arriving at a satisfactory calculation of damages must be considered, and given their appropriate weight, elsewhere in Rule 23." *PDQ of Miami v. Nissan Motor Corp. in USA, 61 F.R.D. 372, 375 (S.D.Fla. 1973)*, *aff'd,* *577 F.2d 910 (5th Cir. 1978)*, *cert. denied,* ***439 U.S. 1072, 99 S. Ct. 843, 59 L. Ed. 2d 38 (1979)***.

(N.D.Ill. 1983); Davis v. Northside Realty Assoc. Inc., 95 F.R.D. 39, 43 (N.D.Ga. 1982); In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407, 415 (M.D.La. 1980); In re Sugar Industry, 73 F.R.D. at 335-36; PDQ of Miami v. Nissan Motor Corp. in U.S.A., 61 F.R.D. 372, 375 (S.D.Fla. 1973), *aff'd*, 577 F.2d 910 (5th Cir. 1978), *cert. denied, 439 U.S. 1072, 99 S. Ct. 843, 59 L. Ed. 2d 38 (1979)*; State of Minnesota, 44 F.R.D. 559 at 566. "If there be no proof of a conspiracy," no plaintiffs recover under any theory of the pleadings. State of Minnesota, 44 F.R.D. 559 at 566.

[16]** Plaintiffs correctly note that both this Court and the court of appeals have treated plaintiffs' claims and the insurance companies' defenses identically to this point. The question of liability, moreover, turns on the existence or non-existence of a conspiracy to boycott. While there are certainly factual differences among plaintiffs' claims, the allegations need not be identical to comport with Rule 23(a)(2). The law requires only that there be questions common to the class.

Again, defendants only indirectly dispute the existence of common questions of law and fact. Instead, they focus on whether these common questions predominate within the contemplation of Rule 23(b)(3). The Court, therefore, concludes plaintiffs have met their burden pursuant to Rule 23(a)(2).

3. Rule 23(a)(3) -- *Typicality*

HN10[] Rule 23(a)(3) requires "the claims or defenses of the representative parties . . . . [be] typical of the claims or defenses of the class." Typicality has independent significance: it requires a demonstration that members of the class have the same or similar grievances as plaintiffs. Tate v. Weyerhaeuser Co., 723 F.2d 598, 608 (8th Cir. 1983), *cert. denied, 469 U.S. 847,* ***[**17]*** *105 S. Ct. 160, 83 L. Ed. 2d 97 (1984)*. The typicality requirement is satisfied "when the claims of the named plaintiffs emanate from the same event or are based on the same legal theory as the claims of the class members." Dirks, 105 F.R.D. at 132-33 *(citing* Paxton, 688 F.2d at 561-62). Plaintiffs' liability theory and type of relief must be co-extensive with those of the class members. In re Wirebound Boxes, 128 F.R.D. at 270; In re South Central States Bakery Products, 86 F.R.D. at 415; State of Minnesota, 44 F.R.D. 559 at 566. As such, the representatives' claims must adequately protect the interests of the class and there must be no antagonistic interests between the representatives and the class. [4] In re Wirebound Boxes, 128 F.R.D. at 270; **[*106]** In re Control Data Corp., 116 F.R.D. 216 at 220. Perfect identity of claims, however, is not required, In re Wirebound Boxes, 128 F.R.D. at 270; In re South Central States Bakery Products, 86 F.R.D. at 415, and factual differences between plaintiffs are not fatal. *See e.g.* Donaldson v. Pillsbury Co., 554 F.2d 825, 831 (8th Cir.), *cert. denied, 434 U.S. 856, 98 S. Ct. 177, 54 L. Ed. 2d 128 (1977)*.

[18]** ***HN11***[] An antitrust price fixing case generally will involve claims sufficiently similar to satisfy Rule 23(a)(3). If the representatives must prove "a conspiracy, its effectuation, and damages therefrom -- precisely what the absentees must prove to recover -- the representative claims can hardly be considered atypical." State of Minnesota, 44 F.R.D. 559 at 567. *See* In re Wirebound Boxes, 128 F.R.D. at 270; Butt v. Allegheny Pepsi-Cola Bottling Co., 116 F.R.D. 486, 488 (E.D.Va. 1987).

> ***HN12***[] The fact that the purchases were not made from all of the defendants, or that all of the methods through which the conspiracy was allegedly effected were not utilized against the named plaintiffs, is not dispositive of their ability to represent the class.

---

[4] Rule 23(a)(3) has been interpreted to mean the representative's allegation must be "squarely aligned in interest" with the purported class, Harriss v. Pan American World Airways, Inc., 74 F.R.D. 24, 42 (N.D.Cal. 1977), and that the representative's interest must be "sufficiently parallel to the interests of the other class members to assure a vigorous representation of the class." Donaldson v. Pillsbury Co., 554 F.2d 825, 831 (8th Cir.), *cert. denied,* ***434 U.S. 856, 98 S. Ct. 177, 54 L. Ed. 2d 128 (1977)***. Put another way, "in the course of proving [their] own claim [the representatives] must also prove the claims of the other members of the class." Amswiss Int'l Corp. v. Heublein, Inc., 69 F.R.D. 663, 667 (N.D.Ga. 1975).

Shelter Realty Corp. v. Allied Maintenance Corp., 75 F.R.D. 34, 39 (S.D.N.Y. 1977), *appeal dismissed, 574 F.2d 656 (2d Cir. 1978)*. Nor will differing damages, resulting from varied methods of procuring and purchasing the product, defeat satisfaction of *Rule 23(a)(3)*.

Defendants argue plaintiffs have failed on typicality. They contend the six named plaintiffs' insurance plans differ in form and their contacts with defendants are so varied **[**19]** that they cannot be considered typical. Defendants stress that the Court must examine the factual circumstances of each employer. Defendants ultimately claim that the impact of any alleged conspiracy on the named representatives is too speculative. The upshot of their argument is that if any conspiracy had existed its effect would be unique to each plaintiff.

The Court disagrees. It is true that the six putative class plaintiffs differ in their present makeup and their past transactions. And the types of insurance they purchased were admittedly varied. But in its essence, plaintiffs claim that the insurance companies combined to fix prices of workers' compensation insurance rates at a rate higher than would have existed in the absence of the illegal conspiracy. The elements of these claims are similar to those of any other price fixing cases: proof of the existence, scope, and effect of the alleged conspiracy. Those same elements would have to be shown by any party so aggrieved, even if each plaintiff's claim were taken individually.

> This Court has spoken on this very issue: Defendants argue that the plaintiffs' claims are neither typical nor co-extensive in that all plaintiffs **[**20]** have sustained substantially different damages requiring extensive proof because of diverse methods of procuring and purchasing fabricated steel products. But all claims in the classes herein will require proof of a conspiracy, plus a showing of price fixing, allocation of business or other non-competitive activity, as well as evidence of purchases at allegedly inflated prices. Although each plaintiff will have to prove a precise purchase or purchases to show damages, the former two elements of proof will redound to the benefit of the entire class of claimants, and the court therefore is disposed to reject the defendants' theory. While a disparity of damages may be argued to go to the question of "predominance," such disparate proof fails to make the representatives' claims atypical . . . .. Since the representative parties need prove a conspiracy, its effectuation, and damages therefrom -- precisely what the absentees must prove to recover -- the representative claims can hardly be considered atypical. Moreover, if the "typical" requirement of 23(a)(3) is thought to mean only a lack of adversity between the representatives and the absentee plaintiffs, there is no showing of adverse **[**21]** interests in these actions which would militate against class action treatment.

State of Minnesota, 44 F.R.D. at 566-67 (footnotes and citations omitted). As such:

> ***HN13***[] **[*107]** the mere fact that all of the methods through which the alleged conspiracy was effected were not used with respect to [the named representatives], or the fact that [they] did not purchase from all defendants, does not determine that the claim of [the named plaintiffs] lack[] typicality under *Rule 23(a)(3)*.

In re South Central States Bakery Products, 86 F.R.D. at 417.

4. *Rule 23(a)(4)* -- *Adequacy*

HN14[] *Rule 23(a)(4)* demands that "the representative parties will fairly and adequately protect the interests of the class." Adequate representation is measured by two factors: (1) plaintiffs' counsel must be competent to pursue this action, and (2) the representatives must not have interests which are antagonistic to those of the class. *Jenson, 404 F. Supp. at 811*. *Rule 23(a)(4)* asks whether the class representatives will vigorously prosecute the interests of the class. [5] *Paxton, 688 F.2d at 562-63*; *Dirks, 105 F.R.D. at 133*. *Rule 23(a)(4)* also requires that:

[5] This factor is of "critical importance." *Bishop v. Committee on Professional Ethics, 686 F.2d 1278, 1288 (8th Cir. 1982)*.

> the representative display some minimal **[**22]** level of interest in the action, familiarity with the practices challenged, and ability to assist in decision making as to the conduct of the litigation.

Gentry, 102 F.R.D. at 494-95. The question is: Will the representative parties put up a genuine fight? *In re Endotronics, 1989 U.S. Dist. LEXIS 1141*, Civil No. 4-87-130, mem. op. at 11 (D.Minn. Jan. 28, 1988).

HN15[] The second of *Rule 23(a)(4)*'s requirements -- lack of antagonism -- is similar to *Rule 23(a)(3)*'s typicality test. *In re Wirebound Boxes, 128 F.R.D. 268, 271*. In an antitrust action, therefore, the plaintiffs need not "have purchased from all of the defendants or . . . . have been adversely affected by all of the means and methods by which the alleged conspiracy was implemented." *In re South Central Bakery Products, 86 F.R.D. at 418*. Moreover, the "fact that some representatives face additional defenses does not defeat their ability adequately to represent the class." *In re Wirebound Boxes, 128 F.R.D. at 271*.

HN16[] An additional factor considered by some courts is the financial wherewithal available to, and provided **[**23]** by, the class representatives. *See e.g. In re South Central Bakery Products, 86 F.R.D. at 418-419*. Consideration of this factor, however, should be limited. *See Dirks, 105 F.R.D. at 134*. The focus of the financial issue should be on the class representatives' ability to finance the "cost of notice to absent class members and to retain vigorous and effective counsel." *In re South Central Bakery Products, 86 F.R.D. at 418*; *Butt, 116 F.R.D. at 489*.

Defendants suggest that plaintiffs fail to satisfy *Rule 23(a)(4)* in three ways. First, defendants claim the interests of the named plaintiffs are co-extensive neither among themselves nor with those of the proposed class respecting particular plan purchases and the unique characteristics of each insured. Second, defendants contend the named plaintiffs lack the financial strength to insure fair and adequate representation. Third, defendants claim that discovery has revealed that at least three of the named plaintiffs have no knowledge of the facts upon which this litigation is based beyond any explanations given to them by counsel. [6]

[24]** The Court rejects defendants' first argument that the putative plaintiffs' interests are not aligned with those of the class. Earlier in this opinion, the Court held that the claims of the named plaintiffs and the proposed class satisfied *Rule 23(a)(3)* in that the plaintiffs' claims were typical. As noted, *Rule 23(a)(4)* is related to *Rule 23(a)(3)*. The Court notes the class representatives here are a "'part of the class and possess the same interest and [have] suffer[ed] the same injury as the class members.'" *Bishop, 686 F.2d at 1289 (quoting East Texas Motor Freight System,* ***[*108]*** *Inc. v. Rodriguez, 431 U.S. 395, 403, 97 S. Ct. 1891, 1896, 52 L. Ed. 2d 453 (1977))*. The Court further finds that there has been no showing whatsoever that plaintiffs' individual interests are antagonistic to one another. [7] As a general rule, "only a conflict which goes to the very subject matter of the litigation will defeat a party's claim to representative status." *Jenson, 404 F. Supp. at 811*. No such conflict exists here. Defendants' argument regarding the different types of purchases and insurance policies goes to typicality -- which the Court has held satisfied -- and the predominance of common questions **[**25]** of law and fact pursuant to *Rule 23(b)(3)*. It is not sufficient to disqualify the class representatives pursuant to *Rule 23(a)(4)*.

Defendants' second argument, touching the named plaintiffs' knowledge, is also unpersuasive. ***HN18***[] "The representative need not have, and often in an anti-trust action will not have, personal knowledge of the facts needed to make out a prima facie case." *Gentry, 102 F.R.D. at 495*. As such, the depth of a named representative's knowledge is irrelevant. *See e.g. Surowitz v. Hilton Hotels Corp., 383 U.S. 363, 371-74, 86 S. Ct. 845, 850-51, 15 L. Ed. 2d 807 (1966)*. As a practical matter, the named plaintiffs surely are aware of the factual and procedural circumstances of their case. The case has been hard litigated, for nearly seven years, both in this Court and in the

---

[6] As a preliminary matter, no challenge has been raised regarding the competency or expertise of plaintiffs' counsel. Their expertise and competence in class action representation is not in question.

[7] ***HN17***[] Naked allegations of antagonism are insufficient to undermine certification pursuant to *Rule 23(a)(4)*. *In re South Central States Bakery Products Antitrust Litigation, 86 F.R.D. 407, 418 (M.D.La. 1980)*.

Eighth Circuit. The Court finds that, for purposes of this motion, plaintiffs are sufficiently aware of the status of the litigation. *See* Gentry, 102 F.R.D. at 495.

Defendants' **[**26]** final argument questioning plaintiffs' financial resources is baseless. Plaintiffs' counsel have found the means to prosecute this case for seven years. Plaintiffs' counsel's assurances satisfy the Court that the financial requirements which may be imposed upon the class representatives will be satisfied adequately. The Court finds this sufficient to meet the requisites of 23(a)(4).

C. Rule 23(b) *Requirements*

HN19[] Rule 23(b)(3) requires that "questions of law or fact predominate over any questions affecting only individual members, and that a class action is superior to other available methods for the fair and efficient adjudication of the controversy."

1. *Predominance*

HN20[] There are no bright lines for determining whether common questions predominate. *Dirks, 105 F.R.D. at 132, 136*. An issue will meet the predominance "standard when there exists generalized evidence that proves or disproves [an] element on a simultaneous, class-wide basis. Such proof obviates the need to examine each class member's individual position." *In re Industrial Gas, 100 F.R.D. 280, 288 (N.D.Ill. 1983)*. The total amount of time spent on a common issue compared to time spent on individual issues is immaterial. *State **[**27]** of Minnesota, 44 F.R.D. at 568*. The mere existence of individual questions such as damages does not automatically preclude satisfaction of the predominance requirement, *Rios, 100 F.R.D. at 408*; *In re Alcoholic Beverages, 95 F.R.D. at 327*; *Davis, 95 F.R.D. at 48*; *In re South Central States Bakery Products, 86 F.R.D. at 419*, so long as there is some common proof to adequately demonstrate some damage to each plaintiff. *In re Wirebound Boxes, 128 F.R.D. 268, 272*; *In re South Central Bakery Products, 86 F.R.D. at 421*. Individualized, separate trials -- mini-trials -- on individual issues of fact are not a bar to the use of the class action procedure. *In re Industrial Gas, 100 F.R.D. at 290*.

HN21[] These common principles have been applied with particular force in the antitrust setting. As discussed, plaintiffs must prove three elements to succeed: (1) violation of the ***antitrust law***; (2) direct injury (or impact) from the violation; and (3) damages suffered by the plaintiffs. *In re Wirebound Boxes, 128 F.R.D. 268, 271*; *In re Industrial Gas, 100 F.R.D. at 288*; *In re South Central States Bakery Products, 86 F.R.D. at 419*. Non-uniformity of the **[*109]** prices at which plaintiffs **[**28]** purchased their goods is not fatal to certification. *In re South Central Bakery Products, 86 F.R.D. at 421*. As long as the existence of a conspiracy is the overriding question, then the class has met its predominance requirement. *In re Wirebound Boxes, at 271*; *Gentry, 102 F.R.D. at 495*; *In re Alcoholic Beverages, 95 F.R.D. at 326*; *In re South Central States Bakery Products, 86 F.R.D. at 419-22*; *State of Minnesota, 44 F.R.D. at 568, 571*. To prove injury, plaintiffs need only demonstrate they have suffered some damage from the unlawful conspiracy. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 89 S. Ct. 1562, 1571 n. 9, 23 L. Ed. 2d 129 n. 9 (1969)*. Such a showing may be made on a class basis if the evidence demonstrates that the conspiracy succeeded in increasing prices above the competitive level. *In re Wirebound Boxes, at 271*.

Defendants steadfastly assert that common questions do not predominate. They first suggest that plaintiffs must present individualized proof regarding an "agreement to boycott" by all insurers of WCIRAM, including those not named as defendants. They next claim that each individual plaintiff must **[**29]** prove that the boycott caused its own insurance company to use the highest allowable rate. Defendants would analogize this case to those involving dealers who claim vertical price-fixing by their manufacturer. Defendants cite a number of cases for the proposition that class certification should be denied under these circumstances. *See e.g. Mekani v. Miller Brewing Co., 93 F.R.D. 506, 513 (E.D.Mich. 1982)*. Defendants summarize their argument as follows:

> In short, this case will necessarily require a factual inquiry concerning whether (and when) each of the 250-plus insurers licensed to write workers' compensation insurance in Minnesota between 1979 and 1983 succumbed to the alleged agreement to boycott, and whether (and when) each of these insurers otherwise joined the alleged conspiracy to fix rates. Demonstrating that Insurer A succumbed or otherwise participated in the

> alleged price-fixing conspiracy does not show that Insurer B -- or any of the 250-plus other insurers -- did so. Therefore an employer customer of Insurer B cannot recover without showing that Insurer B succumbed to the group boycott or otherwise participated in the alleged price-fixing conspiracy.

Defendants' **[**30]** Memorandum in Opposition to Plaintiffs' Motion for Summary Judgment, p. 30 (footnote omitted).

Defendants then focus upon the individual employers and their separate insurance purchases. They state that the degree of each insurer's reliance on the claimed conspiracy and the various types of policies sold affect individual damages. Defendants suggest this case is similar to class actions involving "goods or services that are not homogenous or fungible and are priced in a variety of ways."

As is expected, defendants reject plaintiffs' assurances that a statistical formula exists to determine individual impact and damages. Instead, defendants argue no such formula has been proffered and none can be created under these circumstances.

Defendants' first response ultimately suggests that the case is too complex, involving as it does some 250 insurers. Their argument proves too little. Complexity does not mean the issue of conspiracy does not predominate. Defendants' argument, on analysis, simply goes to the issue of manageability, which will be considered below. The existence of agreements among individual defendants and difficulties in proof will not defeat predominance.

The differences **[**31]** between individual plaintiffs, however, pose more subtle problems. First, defendants contend not all of the insurers supplying workers' compensation insurance used the rate set by the Commissioner. Second, even in cases where the rate was utilized, the rate may have been only one of numerous factors constituting the ultimate premium. These questions ultimately ask, "Who was a member of the conspiracy?" Plaintiffs, of course, bear the burden of demonstrating participation in the conspiracy to boycott. But proof of **[*110]** which insurers sold boycott rate based insurance does not strike the Court as dauntingly difficult. If "yes," the insurer is in; if "no," it will be dismissed, as would any non-liable party.

The multiple factors which affect rates may cause difficulties, but are equally unavailing to defendants. As discussed, the defendants will be only those insurers who sold rate based insurance and joined the conspiracy. This argument actually relates to damages rather than impact or injury. *In re Wirebound Boxes, 128 F.R.D. at 271*. ***HN22***[🡅] "Common proof of impact is possible even though prices" are individually negotiated. *Id.* "Proof of impact typically follows proof of a price-fixing conspiracy **[**32]** where the defendants are shown to have sufficient market power." *Id.* 128 F.R.D. 271-272; *Gentry, 102 F.R.D. at 495*. Although damage amounts may vary among plaintiffs, this fact alone, particularly in antitrust actions, will not defeat certification.

Plaintiffs offer expert affidavits suggesting ease of calculation. At this chronologically late, but litigation-early stage, the Court suggests that such a calculation is probably not as simple as plaintiffs claim. On the other hand this determination does not seem as incomprehensibly difficult as defendants threaten. ***HN23***[🡅] Individual questions of damages are often a problem encountered in an antitrust action and are rarely a barrier to certification. *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 456 (3d Cir. 1977)*.

Separate mini-trials, a special master, later stratification of the class, or a magistrate may be available to resolve such issues. In this action plaintiffs must demonstrate a conspiracy and its impact, not necessarily on an individual basis; those questions predominate over any secondary and individual questions of damages.

2. *Superiority*

HN24[🡅] In considering whether a class action is the superior method of proceeding, a court should **[**33]** consider:

> (A) the interest of members of the class in individually controlling the prosecution for defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Rule 23(b)(3)(A)-(D), Fed.R.Civ.P. Manageability is a real issue.

But defendants' parade of horrors is chimerical. They know, as does this Court, that this case can be managed. It does not take a battalion of rocket scientists to handle a large case -- although each side clearly have talented and competent counsel. If the plaintiffs' claims are substantiated, a question as to which the Court presently has no opinion, the class action mechanism is clearly the most efficient means of resolving the many claims which may be asserted. The Court is confident that stated classes or subclasses will make the case comfortably -- if not easily -- manageable. If the case were not handled as a class, thousands of small claims would be either brought or unjustly **[**34]** abandoned. The first possibility would be a flood of cases, the second would involve individual claims abandoned because of cost.

HN25[] The Court is mindful that dismissal for management reasons is never favored. *In re South Central States Bakery Products, 86 F.R.D. at 423*. The vehicle of class action is meant to permit plaintiffs with small claims and little money to pursue a claim otherwise unavailable. *In re Endotronics,* mem. op. at 16; *State of Minnesota, 44 F.R.D. at 570*. A contrary rule would "essentially preclude class treatment whenever separate issues had to be tried." *Simer v. Rios, 661 F.2d 655, 672 n. 29 (7th Cir. 1981)*, *cert. denied, 456 U.S. 917, 102 S. Ct. 1773, 72 L. Ed. 2d 177 (1982)*. If, as this case develops, class treatment proves to be inappropriate, the Court may exercise its discretionary powers pursuant to *Rule 23(c)* and adjust the action accordingly.

Based on the files, records, and proceedings herein, and for the reasons set forth above, IT IS ORDERED that:

Plaintiffs' motion for class certification of a class consisting of:

> **[*111]** all employers (excluding defendants and co-conspirators, including any subsidiary or affiliate thereof) with places of business **[**35]** within the State of Minnesota required by Minnesota law to carry workers' compensation insurance coverage, who between June 8, 1979, and April 25, 1983, purchased policies of workers compensation insurance from one or more of the named defendants, including any subsidiary or affiliate thereof, or from one or more other member insurance companies of the Workers Compensation Insurers' Rating Association of Minnesota

is granted.

Judges: Heffernan, Chief Justice.

Opinion by: HEFFERNAN

Opinion

[*138] **[**576]** This is a review of a decision of the court of appeals [1] that affirmed the order of the circuit court for Milwaukee county, Lee E. Wells, Circuit Judge, dismissing the complaint of the plaintiffs against the City of Milwaukee (City) and four private ambulance service providers for alleged violations of the Wisconsin ***antitrust law***, *sec. 133.03*, Stats. We reverse the decision of the court of appeals and remand to the circuit court for further proceedings, because we conclude that the city of Milwaukee is not immune from antitrust liability under the alleged circumstances, and because we conclude that the individual ambulance companies who are defendants, under the allegations of the complaint, participated with the city of Milwaukee in an unlawful conspiracy to restrain trade.

[*3]** The plaintiffs in this case are three private companies legally certified to do business in the city of Milwaukee. They are American Medical Transport of Wisconsin, Inc., Lifeline Ambulance Service, Inc., and Cross **[*139]** Ambulance Service, Inc. The plaintiffs have alleged that the city of Milwaukee's adoption of a city-wide emergency ambulance service system pursuant to an ordinance and the defendant ambulance companies' participation in the system violate Wisconsin's ***antitrust law***.

Under the system, the City requires the certification of private ambulance companies as a prerequisite to providing service in the City. All fees and rates for service are set by the City. The Milwaukee Fire Department was designated as the central dispatcher. It receives and allocates all calls for emergency service assistance in the City of Milwaukee. If the emergency is deemed life-threatening, fire department personnel respond to the call, for only the **[**577]** fire department has paramedic personnel. If the emergency is deemed not life-threatening, the fire department dispatcher assigns one of the private ambulance companies to respond.

The City divided the Milwaukee area into four sections **[***4]** designated as service areas. By a process not stated in the complaint, a private ambulance company is assigned primary responsibility for each service area. Thus, only four of seven legally certified ambulance companies were assigned a service area. These four companies, together with the City, are the defendants in this action. The three certified ambulance companies which were not assigned to a designated service area are the plaintiffs.

In the event a non-life-threatening emergency call is received and the designated service company is not able to respond, the fire department dispatcher then assigns one of the three non-designated companies to respond. They are called only as back-up where the designated providers cannot respond. The back-up or support status to which the plaintiffs are relegated is defined by Milwaukee Ordinance sec. 75-15(a) as "[a] status whereby a **[*140]**

[1] *American Medical Transport et al. v. Curtis-Universal, Inc., the City of Milwaukee, et al., 148 Wis. 2d 294, 435 N.W.2d 286 (Ct. App. 1988)*.

certified provider, in lieu of being assigned a service area, receives dispatch calls to which the designated provider within the assigned service area cannot promptly respond." [2]

[*5]** The plaintiffs, the back-up providers, allege that, by enacting and implementing the ordinance, the defendant city has chosen "to eliminate competition in the emergency ambulance services market," because the arrangement adopted results in almost all calls going to the favored four designated providers.

The plaintiffs allege that, by allocating markets and relegating them to a back-up status, they are deprived of their market share and have sustained, and continue to sustain, economic damages, despite the fact that they are certified ambulance service providers. The plaintiffs allege that the defendants, *i.e.*, City and the favored four providers, "By jointly creating the Section 75-15 system . . . have contracted, combined or conspired to restrain trade in ambulance services in the City of Milwaukee," in violation of *sec. 133.03(1)*, Stats. [3] They also allege **[*141]** that the City, by its conduct, has allocated monopoly power to itself.

[*6]** An additional count -- that the City and the four providers conspired to publish notices, rates, and schedules which falsely represented that ambulance calls could only be placed through the fire department telephone dispatcher -- was dismissed by the circuit court. The court of appeals reversed that determination, stating that there were issues of fact that must be determined. The court of appeals remanded on that count for further consideration, and we denied defendants' cross-petition for review of that issue. Accordingly, that allegation of conspiracy to make fraudulent representations is not before us.

In the circuit court each of the defendants brought a motion to dismiss under sec. 802.06(2), Stats., that the complaint failed to state a claim under *sec. 133.01, et* ***[**578]*** *seq.*, upon which relief could be granted. The circuit court granted those motions and dismissed the complaint. It concluded that the City was authorized to implement the anticompetitive ordinance under the home-rule authority granted by *sec. 62.11(5)*, Stats., and the rationale of *Town of Hallie v. City of Chippewa Falls, 105 Wis. 2d 533, 314 N.W.2d 321 (1982)*. **[***7]** The judge acknowledged that, under the facts, there appeared to be a *per se* restraint of trade but it was not unlawful, because the restraint by the City of Milwaukee was authorized by the home-rule statute. He exonerated the four ambulance companies, because he believed they did nothing more than apply for the designation as providers **[*142]** as set forth in the ordinance, which the judge had already concluded did not provide for an illegal restraint of trade. [4] He decided that, despite sufficient allegations of a combination in restraint of trade, the defendants were "protected" as a matter of law.

---

[2] Milwaukee Ordinance 75-15(a) became effective on December 23, 1983.

[3] ***HN1***[] **133.03 Unlawful contracts; conspiracies. (1)** Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is illegal. Every person who makes any contract or engages in any combination or conspiracy in restraint of trade or commerce may be fined not more than $ 100,000 if a corporation, or, if any other person, $ 50,000, or be imprisoned for not more than 5 years, or both.

> **(2)** Every person who monopolizes, or attempts to monopolize, or combines or conspires with any other person or persons to monopolize any part of trade or commerce may be fined not more than $ 100,000 if a corporation, or, if any other person, $ 50,000, or be imprisoned for not more than 5 years, or both.
>
> **(3)** As an alternative to the criminal penalties for violation of this section, the department of justice or district attorney may bring an action for a civil forfeiture. In an action for a civil forfeiture under this subsection a corporation may be required to forfeit not more than $ 100,000 and any other person may be required to forfeit not more than $ 50,000.

It is interesting to note that nowhere in the complaint is *sec. 133.03*, Stats., cited. All the parties assume, however, that the complaint purports to invoke the provisions of that statute.

[4] He also alluded in passing to the plaintiffs' failure to allege in their complaint a combination between the four defendants and the City. This point was not commented upon by the court of appeals. We discuss this issue *infra*, majority opinion at 154.

The plaintiffs appealed to the court of appeals, which unanimously affirmed the circuit court's order of dismissal. Like the circuit court, the court of **[***8]** appeals concluded, stating that it used the reasoning of *Town of Hallie*, that the home-rule statute in itself provided the necessary legislation to justify the restraint of trade. It concluded that, because no specific statute limited its broad home-rule powers, the City of Milwaukee had the authority to implement the ambulance system despite its anticompetitive effect.

The court of appeals also gave weight to *secs. 59.07(41)* and *60.565*, Stats., applicable to counties and towns, respectively, authorizing them to contract for ambulance services, stating, "[T]he legislature has recognized the importance of permitting local units of government to provide for ambulance service within their areas." *148 Wis. 2d at 304*. Thus, although without explication, the court of appeals concluded that these statutes impliedly permitted the City of Milwaukee to enter into anticompetitive contracts. No support was offered for that conclusion. The theory was that the specific statute would have allowed counties and towns to enter into a similar anticompetitive ambulance system. A further assumption was that only because counties and towns did not have home-rule powers **[***9]** was there special legislation necessary in respect to them. But similar authorization **[*143]** was not required for cities and villages with home-rule powers. [5]

[*10]** Because the court of appeals held that the general scheme adopted by the City of Milwaukee was within its home-rule powers, it did not find it necessary to discuss the separate liability of the four favored defendants other than holding as a matter of law that, because the ordinance passed home-rule muster and therefore constituted legislatively authorized conduct, the private defendants could not be liable. The court stated, "Actions by the defendant ambulance companies that are necessary for the regulatory scheme [i.e., anticompetitive] established by the ordinance to work must be similarly protected." *148 Wis. 2d at 307*. It had no reason to discuss **[**579]** the *Noerr-Pennington* doctrine. [6] *148 Wis. 2d at 307,* ***[*144]*** *n.4*.

[*11]** On this review of the decision of the court of appeals, we confront the question of that court's correctness in affirming the circuit court's dismissal of the complaint. "In testing the sufficiency of the complaint the facts pleaded by the plaintiff, and all reasonable inferences therefrom, are accepted as true." *Prah v. Maretti, 108 Wis. 2d 223, 229, 321 N.W.2d 182 (1982)*. ***HN2***[] A complaint should be dismissed as legally insufficient "only if 'it is quite clear that under no conditions can the plaintiff recover.'" *Evans v. Cameron, 121 Wis. 2d 421, 426, 360 N.W.2d 25 (1985)*. The court of appeals correctly stated:

> We may not affirm that dismissal unless, looking at the allegations in a light most favorable to the plaintiffs, "it appears to a certainty that no relief can be granted under any set of facts that [they] can prove in support of [the plaintiffs'] allegations."

148 Wis. 2d at 299-300.

---

[5] The court of appeals recognized that the City of Milwaukee had attempted to make sure of the legality of its proposed ambulance system by seeking legislation that would specifically validate its anticompetitive ordinance, and that legislation, even in a watered-down version, never became law because of a governor's veto. The court of appeals properly, we conclude, gave little weight to this legislation that did not pass even though this bit of legislative history reveals that the City of Milwaukee's legal department was worried that the ordinance violated the state's ***antitrust law***. We do not believe, however, that the subjective belief of the Milwaukee City Attorney's office in respect to this law is significant. Nor can we conclude that the failure of the bill to pass was because it was the legislative intent to demonstrate that the Milwaukee ambulance ordinance violated antitrust laws. We reach this conclusion even though the governor's veto message stated as one reason for vetoing the bill that this law might have anticompetitive effects. We consider this bit of legislative history to be substantially neutral on the question.

[6] Private ambulance company defendants argued that they were protected by the *Noerr-Pennington* doctrine, *i.e.*, that there could be no liability in circumstances where persons obtained a competitive advantage by exercise of their free-speech prerogative to petition the legislature for special status. *See, Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657 (1965)*.

"The purpose of the motion to dismiss for failure to state a claim is to test the legal sufficiency of the complaint." *Evans, supra at 426*.

The question is whether, **[***12]** as a matter of law, giving the facts a liberal interpretation in favor of the plaintiffs, the City and the four favored ambulance companies are, as a matter of law, immune from state antitrust liability.

The court of appeals correctly stated the standard for review, but we conclude it erred as a matter of law by misinterpreting what is clearly the controlling opinion: **[*145]** *Town of Hallie v. City of Chippewa Falls, 105 Wis. 2d 533, 314 N.W.2d 321 (1982)*.

It should be noted that *Town of Hallie* relied entirely upon state law. While that decision recognized that *sec. 133.03*, Stats., is Wisconsin's version of the Sherman Act in defining and prohibiting unlawful restraints on trade, and that federal law is persuasive in that respect, the particular defense asserted in *Town of Hallie*, the *Parker v. Brown* [7] or "state action" defense under federal law was held to be inapplicable. The City in *Town of Hallie* argued that the state-action immunity under the federal law was analogous to the claimed immunity from state ***antitrust law*** because the city's conduct was the result of its legislative action. The court pointed out that "state action" **[***13]** was immune from federal ***antitrust law***, because of the general principles of federalism that control the relationship of the government of the United States with the sovereign states, and "on the specific constitutional limits on federal power contained in the tenth and eleventh amendments," citing Note, "*Parker v. Brown* Revisited: The State Action Doctrine After *Goldfarb, Cantor* and *Bates*," 77 Columbia Law Review 898, 899 n. 6 (1977). *105 Wis. 2d at 537*.

The *Town of Hallie* court said it was not the intent of the federal government to control state public policy through the federal antitrust laws. Hence, under *Parker v. Brown, supra*, if a municipality were acting under state authority, its action would be state action and not subject to federal ***antitrust law***.

Chief Justice Beilfuss, writing for a unanimous court in *Town of Hallie*, carefully pointed out that there is no independent sovereignty in respect to the **[***14]** relations of a municipality and the state. "Cities are creatures of **[*146]** the state, derive their power from it, and are not recognized as independent sovereigns." *105 Wis. 2d at 539*. Although the *Town of Hallie* court distinguished the defense offered by the city from the *Parker v. Brown* defense, it acknowledged a similarity in basic rationale.

[580]** *Town of Hallie* adopted the language of Milton Handler, [8] and stated that "the overriding issue in cases like *[Town of Hallie]* is 'the reconciliation of two ostensibly conflicting enactments of a *single* sovereign . . . . The job quite simply is to ascertain, as best as can be, the intent of the legislators.'" *105 Wis. 2d at 538*.

Town of Hallie adopted the methodology to be utilized where municipal corporations are involved: "When dealing with actions by municipalities, we hold that the test as to the applicability **[***15]** of the state ***antitrust law*** is whether the legislature intended to allow municipalities to undertake such actions." *105 Wis. 2d at 539*.

Thus, we confront a question of statutory interpretation. We follow the methodology set forth in *Town of Hallie*, taking into consideration "the home rule powers of cities, the type of conduct undertaken . . . and the general statutory framework set up by the legislature in the particular field." *105 Wis. 2d at 539*.

HN3[] The Wisconsin home rule amendment to the constitution, art. XI, sec. 3(1), provides:

> **(1)** Cities and villages organized pursuant to state law may determine their local affairs and government, subject only to this constitution and to such enactments of the legislature of statewide concern as with uniformity shall affect every city or every village. The method of such determination shall be prescribed by the legislature.

---

[7] *317 U.S. 341 (1943)*.

[8] Handler, "Antitrust -- 1978," Columbia Law Review 1363, 1378 (1978).

[*147] ***HN4***[] *Section 62.11(5)*, Stats., the statutory home rule statute, provides:

> **(5)** Powers. Except as elsewhere in the statutes specifically provided, the council shall have the management and control of the city property, finances, highways, navigable **[***16]** waters, and the public service, and shall have power to act for the government and good order of the city, for its commercial benefit, and for the health, safety, and welfare of the public, and may carry out its powers by license, regulation, suppression, borrowing of money, tax levy, appropriation, fine, imprisonment, confiscation, and other necessary or convenient means. The powers hereby conferred shall be in addition to all other grants, and shall be limited only by express language.

It is apparent the powers of a municipality to determine its local affairs are broad indeed; but, as the constitution makes clear, the broad grant of constitutional authority is subject to "enactments of the legislature of statewide concern as with uniformity shall affect every city or every village."

The court of appeals in the instant case appeared to consider that some actions of a city "might . . . be sufficiently within an area of local concern to be immune from antitrust regulation." *148 Wis. 2d at 304*. We think this improperly emphasizes the primacy of local concern. A plain reading of the constitutional provision reveals that it is precisely the areas of local **[***17]** affairs that will be superseded by legislation of statewide concern. Only if there is no legislation of statewide concern on the particular subject is the city afforded primacy to manage its local affairs in that respect.

As *Town of Hallie* points out, we look to the legislation that is of statewide concern; and unless there is **[*148]** evidence that it was the legislative intent to make that legislation not applicable to localities by authorizing contrary or inconsistent conduct by the city, the statewide law controls as a matter of legislative intent.

Town of Hallie makes clear, and we reaffirm that holding, that *sec. 133.03 et seq.*, the Wisconsin ***antitrust law***, is legislation of statewide concern that with uniformity affects every city and village. Accordingly, unless it can be said that the legislative scheme is at least impliedly of a nature to authorize the anticompetitive conduct of the city, the City of Milwaukee has, if the factual allegations are proved, violated the Wisconsin ***antitrust law***. The ***antitrust law*** manifestly indicates a legislative **[**581]** intent to subordinate the city's home-rule authority to its provisions.

The additional question is whether **[***18]** the legislature has impliedly authorized an exception from the antitrust laws in respect to certain types of conduct. Although Milwaukee ordinance sec. 75-15 is within the home-rule powers conferred by *sec. 62.11(5)*, Stats., the exercise of that power by an admittedly anticompetitive ordinance, contrary to the conclusion of the court of appeals, is in direct conflict with a law of statewide concern, unless there are implied exceptions that may insulate the conduct of the City. The question is whether there is any evidence extraneous to the antitrust statutes that indicates the legislature did not intend their application.

In *Town of Hallie*, this court looked to other statutory enactments to conclude that the legislature did not intend to curtail the City of Chippewa Falls' ability to tie in the grant of sewer services, when obliged to provide such services, with a proceeding to annex to the city the areas to be served. *See Town of Hallie, 105 Wis. 2d at 541*.

[*149] Following that same methodology, we examine some of the legislation extraneous to the antitrust statute that might guide us in determining legislative intent. Is there evidence **[***19]** that can reasonably lead to the conclusion that the legislature would consider an anticompetitive ordinance such as sec. 75-15 reasonable and not violative of the antitrust statutes?

With this purpose in mind, we look to other statutes to determine whether the legislature contemplated the type of anticompetitive activity engaged in by the City of Milwaukee. In addition to their home-rule power pursuant to *art. XI, sec. 3(1), of the Wisconsin Constitution* and *sec. 62.11(5)*, Stats., defendants rely on a number of statutes which they claim show the legislative authorization for their ambulance service system. ***HN5***[] They cite *secs. 59.07(41)* and *60.565*, Stats., which authorize counties and towns (which do not have home-rule authority) to operate emergency medical services:

> Section 59.07 General powers of [county] board. **(41)** Ambulances. Purchase, equip, operate and maintain ambulances and *contract for* ambulance service for conveyance of the sick or injured and make reasonable charges for the use thereof. [Emphasis supplied.]

> Section 60.565 Ambulance service. The town board shall *contract for* or operate and maintain ambulance services unless such services are provided by **[***20]** another person. The town board may purchase equipment for medical and other emergency calls. [Emphasis supplied.]

The City argues that the reason the legislature passed these statutes was to grant the authority to counties and towns which had already been granted to cities through their home-rule powers. Defendants add that it would be absurd to allow counties and towns to contract **[*150]** for ambulance service systems while prohibiting cities from doing the same thing. In addition, the City relies on secs. 146.35(3) and 146.50(9), Stats., which contemplate operation of emergency medical services by a municipality. [9] The city also points to sec. 146.70 which authorizes municipalities to create a **[**582]** centralized emergency telephone system or "911" system, which may also have anticompetitive effects on the provision of emergency services.

[*21]** The court of appeals was persuaded that secs. 59.07(41) and 60.565, Stats., showed that the legislature contemplated the type of anticompetitive ambulance service system developed by the City. 148 Wis. 2d at 304. The court of appeals relied on the "contract for" language of these statutes. While these statutes clearly **[*151]** authorize local government units to contract for ambulance service in the manner therein specified, we cannot conclude that these statutes authorize the anticompetitive, monopolistic regulation adopted by the City of Milwaukee. Although municipalities have the authority to provide ambulance services to its citizens, they are still required to do so in the most competitive manner feasible. The importance of competition in a free society was well stated in the opinion of the United States Supreme Court in *City of LaFayette v. Louisiana Power & Light Co, 435 U.S. 389, 398, n.16 (1978)*: "Antitrust laws in general, and the Sherman Act in particular, are the Magna Carta of free enterprise." In an equally emphatic statement, our Wisconsin legislature has required us to interpret the antitrust laws in a manner that **[***22]** will promote a maximum level of competition:

> ***HN6***[] **133.01 Legislative intent.** The intent of this chapter is to safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition by prohibiting unfair and discriminatory business practices which destroy or hamper competition. It is the intent of the legislature that this chapter be interpreted in a manner which gives the most liberal construction to achieve the aim of competition. It is the intent of the legislature to make competition the fundamental economic policy of this state and, to that end, state regulatory agencies shall regard the public interest as requiring the preservation and promotion of the maximum level of competition in any regulated industry consistent with the other public interest goals established by the legislature.

Thus, as a matter of general state policy, explicitly declared by the legislature, we should not lightly reach the conclusion that monopoly or restraint of trade is **[*152]** authorized by extraneous statutes that do not quite clearly

---

[9] Section 146.35(3), Stats., provides:

> **(3)** Emergency medical services programs. Any county, municipality, hospital or combination thereof may, after submission of a plan approved by the department, conduct a program utilizing emergency medical technicians -- advanced (paramedics) for the delivery of emergency medical care to the sick and injured at the scene of an emergency and during transport to a hospital, while in the hospital emergency department, and until care responsibility is assumed by the regular hospital staff. Nothing in this section shall be construed to prohibit the operation of fire department, police department or other emergency vehicles utilizing the services of emergency medical technicians -- advanced (paramedics) in conjunction with a program approved by the department. Hospitals which offer approved training courses for emergency medical technicians -- advanced (paramedics) should, if feasible, serve as the base of operation for approved programs utilizing emergency medical technicians -- advanced (paramedics).

Section 146.50(9), Stats., provides for free training by the Department for any person who holds an ambulance attendant license or an ambulance service provider license and who is an employee of a county, city, village, or town.

indicate that intent -- an intent made clear by the statutes relied upon in *Town of Hallie. See,* Town of Hallie, 105 Wis. 2d 541, n.5 and n.6. **[***23]**

In the first place, we cannot reasonably conclude that the authority of towns and counties to "contract for" ambulance services evinces a legislative intent to contract in a way that leads to monopoly or restraint of trade. The defendants, without justification, would have us adopt the predicate that the legislation in respect to towns and counties authorizes governments of those classifications to legally engage in the same type of regulation and restraint as practiced by the City of Milwaukee. We do not in this case have reason to examine whether ambulance service contracts entered into by towns and counties are violative of antitrust statutes. However, we cannot assume, in the present posture of this case, that sec. 59.07(41) and sec. 60.565, Stats., permit those governmental entities to contract for ambulance services in an anticompetitive manner. Thus, even if the legislature passed these statutes to fill the void in the powers of towns and counties, because they did not otherwise have authority to enter into ambulance service contracts, we cannot conclude that anticompetitive practices were validated by the legislature and, by *ipse dixit*, conclude the same anticompetitive **[***24]** practices are appropriate for cities under their home-rule power.

While we decide the question of the City's liability or immunity from the Wisconsin ***antitrust law*** on the basis of Wisconsin law alone, federal antitrust cases may, however, in many cases, be instructive and persuasive. Gold Cross Ambulance and Transfer v. City of Kansas City, 705 F.2d 1005 (8th Cir. 1983), involved a question of immunity under the doctrine of *Parker v. Brown, supra*. The federal court looked **[**583]** to the enabling legislation **[*153]** to determine whether it was the legislative intent that state action displace competition. It found that explicit state policy by language in the statute, "to contract with *one* or more" (emphasis supplied) ambulance company operators. 705 F.2d at 1011. Because there was specific legislative authority to contract with *one* operator, the federal court considered this to be action of a sovereign state to validate a monopoly. The statutes posed by the defendants in this case which they assert authorize anticompetitive practices lack the specificity of the Missouri statute and, hence, under the general policy provisions **[***25]** of sec. 133.01, Stats., favoring competition, we cannot reasonably construe these statutes as displacing competition sought to be assured by the legislative guarantees of the antitrust statute. Our examination of the opinion of the court of appeals leads us to conclude the court of appeals did not give due weight to the strong procompetitive admonitions of sec. 133.01 in evaluating the effect of these statutes. [10]

We conclude that the plaintiffs have stated a claim upon which relief can be granted. The conduct alleged to have been engaged in by the City is anticompetitive and, if the facts **[***26]** alleged can be proved, relief may follow. The arguments made by the defendant City that the anticompetitive conduct was contemplated and approved by the legislature and, hence, was not violative of the Wisconsin ***antitrust law*** cannot be supported after **[*154]** an analysis of the legislative pronouncements that the City insists validates its action. The decision of the court of appeals affirming the dismissal of the complaint against the City, therefore, must be reversed.

The dismissal of the claim against the favored four ambulance companies presents a different question. The court of appeals was able to facilely affirm the dismissal of the complaint against the private defendants because its analysis led to the conclusion that they were not participants in a combination or conspiracy in restraint of trade -- that the conduct of the City and those who participated in that conduct were acting in accordance with the intent of the legislature and, hence, were immune from sanctions.

Because we hold that a claim of an antitrust violation was stated against the City, we cannot dispose of the claims against the individual ambulance service companies in that way.

---

[10] We also question the court of appeals assertion, p. 302, n.1, that cities have more leeway for anticompetitive conduct under state law than under federal law. The strong statement of Wisconsin legislative policy in favor of competition in sec. 133.01, Stats., tends to lead to the opposite conclusion. *See*, Comment, "Municipal Antitrust Liability After *Town of Hallie v. Eau Claire*," 1986 Wisconsin Law Rev. 1039, 1058.

The posture in respect **[***27]** to them is that they participated with the City in illegal conduct. It is, however, asserted that they are protected by what the federal courts refer to as the *Noerr-Pennington* doctrine derived from *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657 (1965)*. See n.6, *supra*. Essentially, these cases protect the right of free speech and, particularly, the right to petition government -- even to petition government to enact anticompetitive legislation that will benefit the petitioner. While the doctrine arose in a federal context, the constitutional concerns and right to petition government are equally applicable under state law.

The court of appeals correctly stated the applicable law when it said that the "*Noerr-Pennington* doctrine **[*155]** . . . protects advocacy and not participation." *148 Wis. 2d 294, 307, n.4*.

Airport Car Rental Antitrust Litigation, 521 F. Supp. 568, 584 (N.D. Cal. 1981), *aff'd* *693 F.2d 84 (9th Cir. 1982)*, capsulized the limits of the *Noerr-Pennington* **[***28]** doctrine when it stated:

> Private parties attempting to influence public officials to engage in commercial activities which may later be found to violate the ***antitrust law*** do not thereby become themselves liable. For liability **[**584]** to be imposed upon them, they must be *participants* in the scheme. [Emphasis supplied.]

Thus, it is clear that, ***HN7***[] if a scheme or enterprise that has been merely petitioned or lobbied for by private persons is found to violate antitrust laws, liability will not be imposed on those private persons for that conduct alone. *See*, P. Areeda, H. Hovenkamp, ***Antitrust Law***, para. 201, p. 21 (Supp. 1989).

There have been no cases brought to our attention or which we have discovered in the course of this court's research where a private party who has participated in an anticompetitive scheme is exonerated by *Noerr-Pennington*. This absence of authority fully accords with the basic premise of *Noerr-Pennington* -- to protect the citizens' right to free speech and to petition government. It goes no further than that.

Accordingly, if we can conclude that the allegations of the complaint may be construed to allege participation in an illegal restraint **[***29]** of trade, a cause of action is spelled out against the ambulance company defendants.

Paragraph 18 of the complaint alleges:

> By jointly creating the Section 75-15 system . . . the Defendants have contracted, combined or **[*156]** conspired to restrain trade in ambulance services in the City of Milwaukee.

As pointed out earlier in this opinion, all reasonable inferences that can be drawn from the words of the complaint may be used by a court in determining whether a claim has been stated upon which relief can be granted. Dismissal cannot be affirmed unless, looking at the allegations in a light most favorable to the plaintiffs, "it appears to a certainty that no relief can be granted under any set of facts that [they] can prove in support of [their] allegations." *Morgan v. Pennsylvania General Ins. Co., 87 Wis. 2d 723, 732, 275 N.W.2d 660 (1979)*.

We conclude that a reasonable inference to be drawn from the allegations of Paragraph 18 is that the defendant ambulance companies did more than petition government. They participated in an illegal restraint of trade. Whether such allegations can be proved must abide the trial of this case, but we conclude **[***30]** that a reasonable inference from the complaint is that the individual ambulance provider defendants cannot, at this juncture, claim exoneration because their only conduct was to exercise their right of free speech. There may, of course, come a time that, under the facts, the state equivalent of the *Noerr-Pennington* doctrine may be reasserted, but the complaint -- as we conclude a reasonable interpretation requires -- forecloses that defense as a matter of law at this juncture. Accordingly, we reverse the decision of the court of appeals which affirmed the circuit court's dismissal against the defendant private ambulance providers.

[*157] *By the Court*. -- Decision of the court of appeals in respect to the matters reviewed is reversed and the cause is remanded to the circuit court for trial.

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN2[] **Standards of Review, De Novo Review**

An appellate court reviews summary judgments de novo. The parties remain free to press their admissibility arguments on appeal, the same as they did in the trial court. Identifying particular flaws in the lower court's reasoning has no value because summary judgment must be upheld if correct on any ground--regardless of wrong reasons which may have guided the court. More generally, it is presumed on appeal that a judge has not relied on irrelevant or incompetent evidence.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN3[] **Summary Judgment, Supporting Materials**

Summary judgment is a drastic measure which should be used with caution so that it does not become a substitute for trial. Affidavits of the moving party are strictly construed and those of the opponent liberally construed, with doubts as to the propriety of granting the motion resolved in favor of the opposing party.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Standards of Review, De Novo Review**

Summary judgment raises only questions of law, which are reviewed independently. An appellate court's review tracks the same, three-step process used by the trial court. First, the court identifies the issues framed by the pleadings. Second, the court determines whether the moving party has established facts sufficient to negate the opponent's claim. Third, if that burden is met, the court examines whether the opposing party's showing discloses that triable issues of material fact exist.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

In antitrust actions brought under the Cartwright Act, *Cal. Bus. & Prof. Code § 16700 et seq.*, California courts look to interpretations of its federal law counterpart, the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*, for guidance because the federal act was a model for the California statute in most respects.

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN13[] **Regulated Practices, Trade Practices & Unfair Competition**

Trade association activities tend to promote competition and are lawful. Gathering and compiling industry information and disseminating it among members does not offend antitrust policy, even though to do so naturally tends to stabilize that trade or business and to produce uniformity of price and trade practice. Competition does not become less free merely because the conduct of commercial operations becomes more intelligent through the free distribution of knowledge of all the essential factors entering into the commercial transaction. Members do not become conspirators merely because they gather and disseminate information bearing on the business in which they are engaged and make use of it in the management and control of their individual businesses. Only when they take concerted action to restrain trade based on such information do they act illegally.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

Commercial borrowers brought an action against banks and bank trade associations under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) and unfair competition laws (*Bus. & Prof. Code, § 17200 et seq.*) for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers. The trial court granted summary adjudication of issues for defendants as to the borrowers' first three causes of action (Cartwright Act violation and two unfair competition theories). Since these were the only causes of action affecting the associations, their motion for summary judgment was granted. One bank and its holding company were also granted summary judgment after they prevailed on their motion for summary adjudication as to the only other cause of action affecting them. (Superior Court of the City and County of San Francisco, Nos. 824289 and 829062, Lucy Kelly McCabe and Stuart R. Pollak, Judges.)

The Court of Appeal affirmed. It held that the bank and its holding company had satisfied their burden, in moving for summary adjudication of issues, of negating the borrowers' causes of action alleging unfair competition and Cartwright Act violations, since the bank's declarants, who were solely responsible for determining its loan rates, denied receiving or sharing competitive information with other banks or giving notice of rate changes to others in advance of making them known to the general public, and the bank holding company submitted declarations showing that it was not a bank and did not have a prime rate or participate in setting commercial rates. The court held that the bank's and its holding company's motions for summary adjudication of issues were properly granted. The borrowers were relying on a theory that the conspiracy was not to fix prices but to fix a new system that resulted in noncompetitive high rates for middle market borrowers. However, the court held, the only logical inference was that the movement from a fixed prime to individually set primes was due to market forces, since it was undisputed that the changes were industry-wide and evolved over almost 10 years, with different banks trying and ultimately abandoning many alternatives during that time. Finally, the court held, the trial court properly granted summary adjudication of issues for the trade associations as well, since the associations offered the same evidence as did the banks and more in order to carry their burden of negating the conspiracy claim. (Opinion by Smith, J., with Benson, J., concurring. Separate concurring opinion by Kline, P. J.)

Headnotes

CA(1)[] **(1)**

Summary Judgment § 19—Evidence—Rulings on Objections.

--In an action by commercial borrowers against banks and bank trade associations for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers, in which action defendants moved for summary adjudication of issues and the borrowers filed voluminous evidentiary objections and a request that the court give written rulings on all objections, the trial court did not commit reversible error in declining to render formal rulings on the objections, explaining that it would disregard all inadmissible or incompetent evidence in ruling. A written or other formal ruling for the record is not required under *Code Civ. Proc., § 437c, subd. (d)*, nor under Cal. Rules of Court, rules 343, 345. Express rulings were not needed for appellate review, since summary judgments are reviewed de novo. Further, being able to identify particular flaws in the trial court's reasoning would have no value, since summary judgment must be upheld if correct on any ground.

CA(2)[] **(2)**

Summary Judgment § 25—Appellate Review—Abandonment of Theory on Appeal.

--On appeal of a summary judgment in favor of defendants in an action by commercial borrowers against banks and bank trade associations for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers, the borrowers' failure to discuss on appeal their theory that there was a conspiracy to reduce competition by having eastern banks announce rate changes, disseminate that information to western banks early in the day, and in that way produce simultaneous rate increases within a single business day, constituted an abandonment of the theory.

CA(3)[] **(3)**

Summary Judgment § 8—Affidavits—Construction.

--Summary judgment is a drastic measure that should be used with caution so that it does not become a substitute for trial. Affidavits of the moving party are strictly construed and those of the opponent liberally construed, with doubts as to the propriety of granting the motion resolved in favor of the opposing party.

CA(4)[] **(4)**

Summary Judgment § 26—Appellate Review—Scope of Review.

--Summary judgment raises only questions of law, which are reviewed independently. The appellate court's review tracks the same three-step process used by the trial court: the court identifies the issues framed by the pleadings; it determines whether the moving party has established facts sufficient to negate the opponent's claims; and if that burden is met, the court examines whether the opposing party's showing discloses that triable issues of material fact exist.

CA(5)[] **(5)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Role of Federal Law.

--In reviewing a judgment in an antitrust action brought under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), the court looks to interpretations of its federal law counterpart, the Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*), for guidance, since the federal act was a model for the state act in most respects.

CA(6)[] **(6)**

Summary Judgment § 19—Evidence—Moving Party's Burden as Affected by Burden of Proof at Trial—Difference From Federal Rule.

--The federal rule that a party moving for summary judgment need not produce competent admissible evidence to negate elements of a claim on which the nonmoving party would bear the burden of proof at trial, and that the moving party satisfies its burden by showing--that is, pointing out to the district court--that there is an absence of evidence to support the nonmoving party's case, is incompatible with California law interpreting *Code Civ. Proc., § 437c*. There is nothing in that statute that lessens the burden of the moving party simply because at the trial the resisting party would have the burden of proof on the issue on which the summary judgment is sought to be predicated. In such a case, on the motion for summary judgment, the moving party must generally negative the matters that the resisting party would have to prove at the trial. In short, the placement of the burden of proof at trial does not affect the showing required for a summary judgment.

CA(7a)[] **(7a)** *CA(7b)*[] **(7b)**

Monopolies and Restraints of Trade § 10—Under Cartwright Act—Remedies of Individuals—Commercial Loan Rates.

--In an action by commercial borrowers against banks and bank trade associations for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers, the trial court, in granting a summary adjudication of issues to defendants, did not err in finding that a bank and its bank holding company had satisfied their burden, in moving for summary adjudication of issues, of negating the borrowers' causes of action alleging unfair competition (*Bus. & Prof. Code, § 17200*) and a violation of *Bus. & Prof. Code, § 16720* (defining trusts). The heart of both causes of action was conspiracy. Concerted activity is essential to a claim under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), since that act prohibits only contracts, combinations, or conspiracies in restraint of trade. Defendants' declarants denied receiving or sharing competitive information with other banks or giving notice of rate changes to others in advance of making them known to the general public. The declarants, having established that they alone were responsible for determining rates, were competent to testify how rates and policy were set. Further, the bank holding company submitted declarations showing that it was not a bank and did not have a prime rate or participate in setting commercial rates.

Appellate Review § 109—Briefs—Form and Requisites—Argument and Authority—Reference to Papers Filed Below.

--An appellant must fully present all arguments in briefs rather than incorporate them by reference from papers filed below.

CA(9)[] **(9)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Price Fixing—Federal Sherman Act and State Standards for Lawful Conduct.

--Both the Sherman Act (*15 U.S.C. § 1 et seq.*) and the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) proscribe price fixing--the standard for lawful competitive conduct is identical under both state and federal law.

CA(10a)[] **(10a)** ***CA(10b)***[] **(10b)** ***CA(10c)***[] **(10c)** ***CA(10d)***[] **(10d)**

Monopolies and Restraints of Trade § 10—Under Cartwright Act—Remedies of Individuals—Bank's Commercial Loan Rates—Evidence of Conspiracy.

--In an action by commercial borrowers against banks and bank trade associations for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers, the trial court did not err in granting a bank's and its holding company's motions for summary adjudication of issues as to the borrowers' causes of action alleging unfair competition (*Bus. & Prof. Code, § 17200*) and a violation of *Bus. & Prof. Code, § 16720* (defining trusts), where the borrowers relied on a theory that the conspiracy was not to fix prices but to fix a new system that resulted in more or less even loan pricing. The only logical inference was that the movement from a fixed prime to individually set primes was due to market forces, since it was undisputed that the changes were industry-wide and evolved over almost 10 years, with different banks trying and ultimately abandoning many alternatives during that time. The borrowers offered no direct evidence of conspiracy. There was evidence of discussions of loan pricing and interest rates at trade association meetings, but such activity is condoned under antitrust policy, and no inference of conspiracy could be drawn from it absent proof of agreement or concerted action to manipulate the loan market.

CA(11)[] **(11)**

Monopolies and Restraints of Trade § 4—Sherman Act—Individual Conduct.

--*Section 1* of the Sherman Act (*15 U.S.C. § 1 et seq.*) is not concerned with individual conduct, no matter how competitive.

CA(12a)[] **(12a)** ***CA(12b)***[] **(12b)**

Monopolies and Restraints of Trade § 3—Trade Association Activities.

--In general, trade association activities tend to promote competition and are lawful. Gathering and compiling industry information and disseminating it among members does not offend antitrust policy, even though to do so naturally tends to stabilize that trade or business and to produce uniformity of price and trade practice. It is only where members take concerted action to restrain trade based on such information that the law is violated.

CA(13)[] **(13)**

Monopolies and Restraints of Trade § 10—Under Cartwright Act—Remedies of Individuals—Bank's Commercial Loan Rates—Role of Industry Trade Associations.

--In an action by commercial borrowers against banks and bank trade associations for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers, the trial court did not err in granting summary adjudication of issues as to the trade associations' causes of action alleging unfair competition (*Bus. & Prof. Code, § 17200*) and a violation of *Bus. & Prof. Code, § 16720* (defining trusts). The court properly granted the summary adjudication motions of the banks, and the associations offered the same evidence as did the banks and more in order to carry their burden of negating the conspiracy claim. They submitted declarations showing that they were not banks and did not lend money, charge, have or set prime rates, did not participate in setting members' rates, and existed as industry organizations fostering education, legislation, and the dissemination of economic and regulatory information. Since these were the only causes of action affecting the associations, summary judgment was properly granted to them as well.

Opinion by: SMITH

Opinion

[*1415] **[**821]** In consolidated appeals, we review summary judgment granted in favor of defendant banks and bank trade associations in actions brought by commercial borrowers, under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.* [all further section references in this opinion are to that code unless otherwise specified]) and unfair competition laws (*§ 17200 et seq.*), for conspiracy to set and manipulate variable interest rates on loans made to "middle market" commercial borrowers.

We will affirm.

[*1416] Background

Plaintiffs in these actions are BILJAC Associates, a California partnership involved in real estate investments, and Erwin C. Nielsen and Bonnie Nielsen, a married couple operating a cattle ranch. Each allegedly took out commercial loans from one or more of the various defendant banks named below and paid prime-rate-based interest on those loans. BILJAC Associates filed its first complaint in May 1984 (No. 824289), and the Nielsens filed theirs in September 1984 (No. 829062).

The cases were inspired by the initial success of consolidated federal district court actions in *Wilcox Development v. First Interstate Bank of Or. (D.Ore. 1985) 605 F.Supp. 592* **[***3]** (*Wilcox I*), where a jury found in favor of plaintiffs alleging federal ***antitrust law*** violations by various banking institutions based on conspiracy to raise, fix and maintain "prime" interest rates at artificial and anticompetitive levels. Plaintiffs here relied heavily at first on the record developed in the *Wilcox* litigation. The victory in *Wilcox* was short lived, however, for the defendants were granted judgment notwithstanding the verdict (*id., at pp. 593-594, 597)*, and that ruling was upheld in April 1987 by the Ninth Circuit Court of Appeals in *Wilcox v. First Interstate Bank of Oregon, N.A. (9th Cir. 1987) 815 F.2d 522* (*Wilcox II*).

Meanwhile, after four amendments to the individual complaints, the cases below were consolidated, and a consolidated amended complaint was filed in December 1985. Named as defendants were six New York- and Chicago-based banking institutions and eight based in California or Oregon. Western defendants include First Interstate Bank of Oregon, N.A. (FIOR), and its holding company, First Interstate Bancorp (Bancorp), two of the respondents here. [1] The other respondents are banking **[**822]** industry **[***4]** trade association defendants: the American Bankers Association (ABA), Association of Reserve City Bankers (ARCB) and Robert Morris Associates (RMA). The parties inform us that the New York and Chicago banks settled after the judgments under review here were granted. Summary judgment was not granted as to the California banks due to other claims pending against them.

These appeals concern summary judgments granted in favor of respondents on the first, second, third and eighth causes of action of the consolidated **[*1417]** amended complaint, which alleged conspiracy violations against all defendants **[***5]** based on the following core set of alleged facts: From the 1930's into the 1970's, the term "prime rate" was understood to be the rate which banks charged to their most creditworthy corporate commercial borrowers. It was a fairly stable rate. Then, beginning in the 1970's, major commercial banks in the United States moved from this preferred borrowing rate to the concept of a "base" or "reference" rate, one which each bank publicly announced from time to time yet continued to disseminate to the borrowing public as a "prime interest rate."

The crux of the conspiracy alleged in the first two counts as unfair competition and violating the Cartwright Act is that defendants conspired over time, through an exchange of information and ideas, to move from the traditional prime rate to the new, more volatile base rate, which the banks themselves controlled. They agreed to fix, raise, maintain and stabilize that rate, using it as a "benchmark" for commercial loans to so-called "middle-market" borrowers, and thereby suppress or eliminate competition between themselves. Forecasting the onset of worldwide inflation and rises in commercial interest rates, which might depress their profits, **[***6]** they conspired to raise and standardize the spread (points charged above the new base rate) for commercial borrowers, to move away from fixed-rate loans toward "floating" (variable-rate) loans referenced to the new "prime," and to base those rates on fluctuations in short-term commercial paper rates. This reduced bank competition and led to noncompetitive, high

[1] The New York and Chicago defendants are Citibank, NA, Morgan Guarantee Trust Company, Bankers Trust Company, Chase Manhattan Bank, Manufacturer Hanover Trust Company and First National Bank of Chicago. California defendants besides FIOR and Bancorp are Bank of America NT&SA, First Interstate Bank of California (also a Bancorp subsidiary), Wells Fargo Bank, Crocker National Bank, Security Pacific National Bank and Union Bank.

rates for middle-market borrowers while allowing banks to make below-"prime" loans to their preferred, multinational corporate borrowers and thus prevent those larger borrowers from entering the commercial paper market themselves. The conspiracy was furthered in part through meetings held under the auspices of industry trade associations.

The third cause of action alleges unfair competition in that defendants conspired to reduce borrowing alternatives by choreographing simultaneous rises in rates. Eastern banks announce upward rate changes before business hours on the east coast, transmit that information to banks in more western time zones (who announce almost identical rises) and thereby prevent borrowers from shopping for lower rates. Again, because larger borrowers borrow at below-"prime" rates, this harms only smaller **[***7]** commercial borrowers, for whom interest rates are maintained at "supra-competitive" levels.

The eighth cause of action charges unfair competition against the bank defendants only, alleging that they stand in a superior bargaining position to commercial borrowers, exact the disclosure of "intimate financial and personal information" in the loan application process, offer "adhesion **[*1418]** contracts" which leave borrowers no alternative but to accede to "unreasonable, oppressive and unconscionable" rates referenced to a controlled "prime rate," and do so without disclosing anticipated rising or falling rates during the loan term.

The bank defendants had jointly moved for summary adjudication of the antitrust and related conspiracy issues some months prior to the consolidated amended complaint being filed. Plaintiffs were granted several continuances, before and after the new pleading, to conduct further discovery. To organize the pending motion and related evidence, the court (Hon. Stuart R. Pollak) denied the motion without prejudice in February 1987, deemed the matter resubmitted, ordered that separate motions and supporting **[**823]** papers be filed, and set a hearing for May 7.

Judge **[***8]** Pollak heard the motions as scheduled, took them under submission and, in an order of June 30, 1987, granted them on the first three causes of action. Bank defendants then moved for summary judgment and/or summary adjudication of issues on various other causes of action, of which only the eighth affected FIOR and Bancorp.

At about the same time, trade association defendants moved for summary judgment on the first three causes of action, the only ones affecting them. The court (Hon. Lucy Kelly McCabe) granted the motions and entered judgment in their favor on January 11, 1988. Plaintiffs filed a timely notice of appeal the next day, and that appeal is No. A041024 in our docket.

By an order of March 14, 1988, Judge McCabe granted the bank defendants' motions for summary adjudication on the eighth cause of action and, there being no further causes of action against FIOR and Bancorp, ruled them entitled to summary judgment. Judgment in their favor was entered August 9, 1988. Plaintiffs prematurely appealed from the March 14 order (as to FIOR and Bancorp), but we construe the notice of appeal as applying to the later judgment (*Cal. Rules of Court, rule 2(c)*).

Discussion

I [*]

[*9]** . . .

[*1419] II

HN1[] Under our summary judgment statute, supporting and opposing affidavits or declarations "shall be made . . . on personal knowledge, shall set forth admissible evidence, and shall show affirmatively that the affiant is competent to testify to the matters stated therein." (*Code Civ. Proc., § 437c, subd. (d)*). Evidentiary objections "not

---

[*] See footnote, *ante*, page 1410.

made either in writing or orally at the hearing" are deemed waived (*Code Civ. Proc., § 437c, subd. (b)*), and the court, in ruling on summary judgment, may not consider matters "to which objections have been made and sustained by the court" (*Code Civ. Proc., § 437c, subd. (c)*). (See also Cal. Rules of Court, rules 343 and 345, requiring page-and-line citations to objectionable matters and that specific grounds for the objections be stated.)

CA(1)[] **(1)** Plaintiffs filed voluminous evidentiary objections and a request that the court give written rulings on all objections. Judge Pollak declined, however, explaining that while he found merit to some of the objections on both sides and would be disregarding all inadmissible or incompetent evidence in ruling, he saw little purpose in rendering formal rulings. [3] Plaintiffs contend that this was reversible **[***10]** error. We disagree.

Nothing in the statute or rules requires a written or other formal ruling for the record, and the single case which plaintiffs cite for that proposition has no bearing on it.

Plaintiffs urge that express rulings are needed for appellate review so that they, and we, can know what **[***11]** evidence was considered. However, there is no use in such a procedure. ***HN2***[] We review summary judgments de novo (*AARTS Productions, Inc. v. Crocker National Bank (1986) 179 Cal.App.3d 1061, 1064-1065 [225 Cal.Rptr. 203]*), and the parties remain free to press their admissibility arguments on appeal, the same as they did in the trial court. Also, being able to identify particular flaws in the lower court's reasoning has no value because, as appellants themselves note, summary judgment must be upheld if correct **[**824]** on any ground -- regardless of wrong "reasons" which may have guided the court. (*Barbary Coast Furniture Co. v. Sjolie* ***[*1420]*** *(1985) 167 Cal.App.3d 319, 331 [213 Cal.Rptr. 168]*.) More generally, it is presumed on appeal that a judge has not relied on irrelevant or incompetent evidence. (*Monogram Industries, Inc. v. Sar Industries (1976) 64 Cal.App.3d 692, 704 [134 Cal.Rptr. 714]*.) No error occurred.

III

We first examine the summary adjudication granted to FIOR and Bancorp on the first three causes of action. We do so on the assumption that plaintiffs have abandoned **[***12]** the third cause of action, which alleged a conspiracy to reduce competition by having eastern banks announce rate changes, disseminate that information to western banks early in the day, and in that way produce simultaneous rate increases within a single business day. This appears to be a variant of what plaintiffs call the "straw-man, parallel-pricing theory" which they abandoned below. ***CA(2)***[] **(2)** In any event, their failure to discuss the theory *on appeal* constitutes abandonment. (*Conner v. Dart Transportation Service (1976) 65 Cal.App.3d 320, 323 [135 Cal.Rptr. 259]*; *Jacobs v. Retail Clerks Union, Local 1222 (1975) 49 Cal.App.3d 959, 966 [123 Cal.Rptr. 309]*; see also fn. 6, *post*.)

CA(3)[] **(3)** ***HN3***[] Summary judgment is a drastic measure which should be used with caution so that it does not become a substitute for trial. Affidavits of the moving party are strictly construed and those of the opponent liberally construed, with doubts as to the propriety of granting the motion resolved in favor of the opposing party. (*Molko v. Holy Spirit Assn. (1988) 46 Cal.3d 1092, 1107 [252 Cal.Rptr. 122, 762 P.2d 46]*, **[***13]** cert. den. *(1989) 490 U.S. 1084 [104 L.Ed.2d 670, 109 S.Ct. 2110]*.) ***CA(4)***[] **(4)** ***HN4***[] Summary judgment raises only questions of law, which are reviewed independently. Our review tracks the same, three-step process used by the trial court: First, we identify the issues framed by the pleadings. Second, we determine whether the moving party has established facts sufficient to negate the opponent's claim. Third, if that burden is met, we examine whether the opposing party's showing discloses that triable issues of material fact exist. (*AARTS Productions, Inc. v. Crocker National Bank, supra, 179 Cal.App.3d 1061, 1064-1065*.)

---

[3] "[W]ith respect to . . . objections that have been made by both sides to evidentiary materials submitted by the other, I do not propose to rule individually on each exception to each piece of evidence. It would be a horrendous, incredibly time-consuming task that I think would serve very little useful purpose.

"I have noted the objections, and in part on both sides the objections are well taken. . . . I am going to disregard all those portions of the evidence that I consider to be incompetent and inadmissible." Judge Pollak restated his intentions at the close of the hearing and again in his written order.

Judge McCabe similarly did not give evidentiary rulings for the record when ruling on the eighth cause of action.

CA(5)[] **(5)** ***HN5***[] In antitrust actions brought under the Cartwright Act, we look to interpretations of its federal law counterpart, the Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*), for guidance since the federal act was a model for our own in most respects. (*State of California* ex rel. *Van de Kamp v. Texaco, Inc. (1988) 46 Cal.3d 1147, 1153-1164 [252 Cal.Rptr. 221, 762 P.2d 385]* [noting that our act is in some ways more closely modeled after Michigan and Texas acts in **[***14]** force when the federal act was enacted]; see generally *Mailand v. Burckle (1978) 20 Cal.3d 367, 376-377 [143 Cal.Rptr. 1, 572 P.2d 1142]*; *Bert G. Gianelli Distributing Co. v. Beck & Co. (1985) 172 Cal.App.3d 1020, 1042* ***[*1421]*** *[219 Cal.Rptr. 203]*; *Truta v. Avis Rent A Car System, Inc. (1987) 193 Cal.App.3d 802, 822 [238 Cal.Rptr. 806]*.) Comparative sparsity of state-court precedent often means that we must rely heavily on federal cases. (*Redwood Theatres, Inc. v. Festival Enterprises, Inc. (1988) 200 Cal.App.3d 687, 694 [248 Cal.Rptr. 189]*.)

Defendants' burden

Judge Pollak concluded initially, at the hearing, that all bank defendants had met their burdens of negating the first three causes of action *except for* FIOR and Bancorp. He deemed their showing lacking in detail and too conclusory but allowed them to file supplementary declarations and was then satisfied.

We pause to consider something which Judge Pollak noted below but which the parties do not address here, namely, that recent developments in federal summary **[***15]** judgment law make reliance on subsequent federal cases hazardous when deciding whether a moving party has met its burden of negating an opponent's claims. ***CA(6)***[] **(6)** Interpreting *rule 56 of the Federal Rules of Civil Procedure* (28 U.S.C.), the United **[**825]** States Supreme Court held in *Celotex* *Corp. v. Catrett (1986) 477 U.S. 317 [91 L.Ed.2d 265, 106 S.Ct. 2548]* (*Celotex*), that a moving party need not produce competent admissible evidence to negate elements of a claim on which the nonmoving party would bear the burden of proof at trial. In that situation, the moving party satisfies its burden under *rule 56* "by 'showing' -- that is, pointing out to the district court -- that there is an absence of evidence to support the nonmoving party's case." (*Id., at p. 325 [91 L.Ed.2d at p. 275*]; see also *id., at pp. 322-325 [91 L.Ed.2d at pp. 273-275*].)

That is incompatible with California law interpreting *Code of Civil Procedure section 437c*: ***HN6***[] "There is nothing in the statute which lessens the burden of the moving party simply because at the trial the resisting party would **[***16]** have the burden of proof on the issue on which the summary judgment is sought to be predicated. In such a case, on the motion for summary judgment, the moving party must generally negative the matters which the resisting party would have to prove at the trial. [Citations.]" (*Barnes v. Blue Haven Pools (1969) 1 Cal.App.3d 123, 127 [81 Cal.Rptr. 444]*; *Pena v. W. H. Douthitt Steel & Supply Co. (1986) 179 Cal.App.3d 924, 929 [225 Cal.Rptr. 76]*; *Security Pac. Nat. Bank v. Associated Motor Sales (1980) 106 Cal.App.3d 171, 179 [165 Cal.Rptr. 38]* [even where the moving party enjoys a presumption affecting the burden of proof].) In short, "[t]he placement of the burden of proof at trial does not affect the showing required for a summary judgment" in California. (*Lee v. Electric Motor Division (1985) 169 Cal.App.3d 375, 382 [215 Cal.Rptr. 195]*.)

[*1422] Judge Pollak expressly declined to apply *Celotex*. So do we. It represents a rule of federal civil procedure that is not binding on state courts and which conflicts with current California **[***17]** law.

CA(7a)[] **(7a)** Returning to the briefs, plaintiffs urge that the court erroneously found defendants' burden satisfied. We disagree.

To begin with, the argument is inadequately presented. In their opening brief, plaintiffs recite boilerplate rules on hearsay, opinions, conclusions, ultimate facts, etc. They give undifferentiated citations to hundreds of objections filed below and then abruptly conclude, *without analyzing any part of the declarations*, that defendants "offered no admissible evidence . . . ." ***CA(8)***[] **(8)** This violates the rule that ***HN7***[] an appellant must fully present all arguments in briefs rather than incorporate them by reference from papers filed below. (*Balesteri v. Holler (1978) 87 Cal.App.3d 717, 720 [151 Cal.Rptr. 229]*.) Belatedly, in a closing brief, plaintiffs do specifically relate some of their objections to the evidence. We address only those objections that are briefed.

The first two causes of action allege unfair competition (*§ 17200*) and a Cartwright Act violation (*§ 16720*). [4] The heart of both actions is a conspiracy by banks, when lending to middle-market borrowers, to abandon the traditional prime-based, fixed-rate loans in favor **[***18]** of "floating" or variable rate loans. The banks allegedly agreed to link interest rates to a new, fluctuating "prime rate" controlled by the banks themselves. The result, it is alleged, increased interest rates and reduced inter-bank competition for middle-market borrowers. [5]

Defendants' motions for summary adjudication, while directed against some of the complaint's assumed *economic* facts, focused on the crucial element of *conspiracy* **[***19]** . While it is not generally necessary to show a trust or conspiracy in an unfair competition claim (*§ 17200*) as opposed to one brought under the Cartwright Act or federal Sherman Antitrust Act, the allegations in this case clearly require a conspiracy. Plaintiffs do not allege in their unfair **[**826]** competition (first) cause of action that a bank which carries out the alleged interest rate practices *on its own* violates *section 17200*.

In fact, plaintiffs do not cite *any* unfair-competition-law authority as to these causes of action. We could deem this an abandonment of the first **[*1423]** cause of action. (*Conner v. Dart Transportation Service, supra, 65 Cal.App.3d 320, 323*; *Jacobs* v. *Retail Clerks Union, Local 1222, supra, 49 Cal.App.3d 959, 966*.) [6] Instead, however, since remedies under *section 17200* are cumulative to those provided by other laws (*People v. McKale (1979) 25 Cal.3d 626, 632 [159 Cal.Rptr. 811, 602 P.2d 731]*; § 17205), we will take their lack of separate analysis to mean that the alleged acts are "unlawful" under that section (see fn. 4, *ante* **[***20]**) only to the extent that they violate the Cartwright Act (*§ 16720*). (See *Blank v. Kirwan (1985) 39 Cal.3d 311, 329 [216 Cal.Rptr. 718, 703 P.2d 58]*.) Accordingly, we analyze the alleged conspiracy, as the parties do, only under cases interpreting the Cartwright Act and Sherman Antitrust Act.

CA(7b)[] **(7b)** ***HN10***[] Concerted activity is essential to a Cartwright Act or Sherman Antitrust Act claim because those acts prohibit only **[***21]** *contracts, combinations or conspiracies* in restraint of trade. (*Truta v. Avis Rent A Car System, Inc., supra, 193 Cal.App.3d 802, 822*; *Wilcox II, supra, 815 F.2d 522, 525*.) Summary adjudication was based on defendants having negated this element.

Defendant banks presented declarations and, after the hearing, supplementary declarations (*Johnson v. Banducci (1963) 212 Cal.App.2d 254, 260 [27 Cal.Rptr. 764]*) from the officers and employees charged over the years in question with setting, changing and publicizing information on their prime rates. FIOR and Bancorp relied on their own declarations as well as evidence from others.

FIOR's declarations were typical. An unbroken chain of officers whose principal responsibility it was to determine the bank's prime rate and commercial loan pricing policies from 1970 into 1986 detailed the criteria they used, the risk factors used to tailor rates for individual borrowers, the reasons for moving from fixed rates to floating rates and the reasons for changing rate criteria over the years. Each denied receiving or sharing competitive information with **[***22]** other banks (except for cooperative efforts such as "participation," "interbank" or "correspondent" lending), or giving notice of rate changes to others in advance of making them known to the general public. Their

---

[4] *Section 16720* provides in broad terms that: ***HN8***[] "A trust is a combination of capital, skill or acts by two or more persons for any of the following purposes: [para.] (a) To create or carry out restrictions in trade or commerce."

Section 17200 states in part: ***HN9***[] "As used in this chapter [ch. 5, *§ 17200 et seq.*], unfair competition shall mean and include unlawful, unfair or fraudulent business practice . . . ."

[5] Plaintiffs defined the "middle-market" for purposes of this litigation as comprised of commercial borrowers having annual sales between several million and 250 million dollars.

[6] Plaintiffs consistently refer to the first three causes of action as involving "antitrust" issues and only the eighth cause of action (*§ 17200*) as raising "non-antitrust" issues. This also shows abandonment since, as has been observed, the unfair competition law, despite its historical emphasis on protecting "competition," is more akin to a consumer-protection law than an "***antitrust" law***. (*Committee on Children's Television, Inc. v. General Foods Corp. (1983) 35 Cal.3d 197, 209-210 [197 Cal.Rptr. 783, 673 P.2d 660]*.)

declarations explained how market forces influenced rates and the importance of making changes as other banks announced changes in order to compete. In addition, employees responsible for making **[*1424]** rate changes public during those years detailed standard procedures used to do this and how the information was received from corporate higher-ups.

Renewing objections raised below, plaintiffs urge that declarations such as one from Ralph J. Voss -- the chairman and chief executive officer of FIOR (known as First National Bank of Oregon until July 1981) who determined rates from 1970 to 1974 -- contain only opinions, legal conclusions and facts not within personal knowledge. However, discounting objectionable parts, including some that appear speculative and beyond personal knowledge (e.g., "nor, insofar as I am aware, has any other employee of FIOR . . ."), the declarations contain abundant competent and admissible evidence. Voss and other FIOR declarants, having **[***23]** established that they alone were responsible for determining rates and that they followed and implemented certain criteria during certain years, were competent to testify how rates and policy were **[**827]** set (cf. *Vesely v. Sager (1971) 5 Cal.3d 153, 167, 169 [95 Cal.Rptr. 623, 486 P.2d 151]*; *Zuckerman v. Pacific Savings Bank (1986) 187 Cal.App.3d 1394, 1404 [232 Cal.Rptr. 458]*; *Chatman v. Alameda County Flood Control etc. Dist. (1986) 183 Cal.App.3d 424, 429 [228 Cal.Rptr. 257]*; *Kiernan v. Union Bank (1976) 55 Cal.App.3d 111, 116 [127 Cal.Rptr. 441]*) and obviously could say whether they had exchanged or agreed to exchange competitive information with other banks. They set out their objectives in attending trade association meetings and denied having agreed with other participants to take collective action or exchange confidential information on commercial rates.

Bancorp submitted declarations from its chief executive officer and its executive vice-president for finance. They show that Bancorp is a bank holding company, not a bank, and **[***24]** does not have a prime rate or participate in setting commercial rates of its subsidiaries (FIOR or First Interstate Bank of California).

Finally, as background and to corroborate that FIOR's conduct was consistent with independent economic activity, FIOR and Bancorp relied on declarations from several experts, including two declarations submitted by plaintiffs.

This combined evidence was enough to carry defendants' burden, under California law, of negating conspiracy. (Compare federal precedent holding conspiracy allegations rebutted by showing justifiable reasons for practices that are consistent with independent business practice, *Richards v. Neilsen Freight Lines (9th Cir. 1987) 810 F.2d 898, 902*; *O.S.C. Corp. v. Apple Computer, Inc. (9th Cir. 1986) 792 F.2d 1464, 1468*; *Barnes v. Arden Mayfair, Inc. (9th Cir. 1985) 759 F.2d 676, 680*.)

[*1425] *Plaintiffs' burden*

Plaintiffs had to offer admissible evidence that would raise a reasonable inference of conspiracy. The California and federal high courts have urged restraint in granting defendants summary judgment "'in complex antitrust litigation where motive **[***25]** and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. . . .'" (*Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal.3d 842, 852 [94 Cal.Rptr. 785, 484 P.2d 953]*, quoting *Poller v. Columbia Broadcasting (1962) 368 U.S. 464, 473 [7 L.Ed.2d 458, 464, 82 S.Ct. 486]*.)

A. *Monsanto/Matsushita*

That settled expression of deference to antitrust plaintiffs has been partly undermined in two relatively recent decisions of the United States Supreme Court interpreting the Sherman Antitrust Act. In light of the policy of ***antitrust law*** to promote procompetitive, independent business judgment and to penalize only activity which is anticompetitive and concerted, the federal high court has announced *limits* on the range of inferences that may be drawn from ambiguous evidence of conspiracy and has made it clear that those limits apply at the summary **[***26]** judgment stage. "'[On] summary judgment the inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion.' . . . But ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a [Sherman Antitrust Act*] § 1* case. Thus, in *Monsanto Co. v.*

Spray-Rite Service Corp., 465 U.S. 752 (1984), we held that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Id., at 764. . . . To survive a motion for summary judgment . . . , a plaintiff seeking damages for a violation of § 1 must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently. 465 U.S., at 764. [Plaintiffs], in other words, must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive **[**828]** action that could not have harmed [them]. . . ." (Matsushita Elec. Industrial Co. v. Zenith Radio (1986) 475 U.S. 574, 587-588 [89 L.Ed.2d 538, 553, 106 S.Ct. 1348] **[***27]** (*Matsushita*), some citations omitted.) Put another way, "the antitrust plaintiff should present direct or circumstantial evidence that reasonably tends to prove that the [defendant] and others 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.' [Citations.]" (Monsanto Co. v. Spray-Rite **[*1426]** Service Corp. (1984) 465 U.S. 752, 764 [79 L.Ed.2d 775, 785-786, 104 S.Ct. 1464] (*Monsanto*).)

Our state Supreme Court has not had occasion yet to endorse, in the context of the Cartwright Act, the policy limits of *Monsanto* and *Matsushita*, and the parties here differ on how and whether those limits apply in this case. An argument can be made that the limits should govern Cartwright Act cases. The same solicitude for lawful, independent business activity undergirds state law policy. **CA(9)**[] **(9)** As this court has noted, "'Both the Sherman Act and the Cartwright Act proscribe price fixing -- *the standard for lawful competitive conduct is identical* under both state and federal law.'" (Crown Oil Corp. v. Superior Court (1986) 177 Cal.App.3d 604, 611 [223 Cal.Rptr. 164], **[***28]** quoting Alton Box Bd. Co. v. Esprit de Corp. (9th Cir. 1982) 682 F.2d 1267, 1274, fn. 11, italics ours.) On the other hand, as our concurring colleague notes, an argument can be made that the limits are procedural ones tied to federal summary judgment law rather than purely substantive ones flowing from ***antitrust law*** policy.

Even accepting the limits as substantive, however, leaves considerable room for argument on how they should apply in this case. Plaintiffs, for example, while not claiming that state and federal policy diverge in this context, argue that *Monsanto* and *Matsushita* apply only where *vertical* restraints of trade are involved and, therefore, cannot apply here, where the alleged restraint is *horizontal*. The argument has some appeal in that the limitation announced in *Monsanto* grew at least in part out of concern that a manufacturer in a vertical-restraint context remains free to terminate a price-cutting distributor -- even in response to complaints from other distributors -- so long as the decision is made independently and based on the manufacturer's legitimate marketing plans. (See analysis in Helicopter Support Systems v. Hughes Helicopter (11th Cir. 1987) 818 F.2d 1530, 1533.) **[***29]** On the other hand, no case called to our attention has found that distinction determinative, and we have found cases applying the *Monsanto/Matsushita* limits in horizontal contexts. (E.g., City of Long Beach v. Standard Oil Co. of California (9th Cir. 1989) 872 F.2d 1401, 1404-1407, mod. 886 F.2d 246; Richards v. Nielsen Freight Lines, supra, 810 F.2d 898, 903-904.) Most notably, the Ninth Circuit applied them in *Wilcox II*, the very litigation which spawned the cases before us now. (Wilcox II, supra, 815 F.2d 522, 525-526.)

Another way of interpreting *Monsanto* and *Matsushita* is one developed by the Ninth Circuit. Emphasizing that *Monsanto* only limits conspiratorial inferences to be drawn from *ambiguous* evidence, that court distinguishes between cases resting solely on *circumstantial* evidence and those in which there is at least some *direct* evidence of conspiracy, strictly applying the **[*1427]** limitations only in the former cases. (See, e.g., T.W. Elec. Service v. Pacific Elec. Contractors (9th Cir. 1987) 809 F.2d 626, 632; McLaughlin v. Liu (9th Cir. 1988) 849 F.2d 1205, 1207-1209; **[***30]** City of Long Beach v. Standard Oil Co. of California, supra, 872 F.2d 1401, 1404-1407.) In *Wilcox II*, for example, the Ninth Circuit stressed that the plaintiffs had relied solely on circumstantial evidence. (Wilcox II, supra, 815 F.2d 522, 525.)

We will not attempt to resolve those uncertainties in this case. It is not clear, first of all, that the court below employed the *Monsanto/Matsushita* limitation in finding that no supportable inference of conspiracy was raised. Second, we will hold that summary judgment was properly granted under standards traditionally applied in this state. (Corwin v. Los Angeles Newspaper **[**829]** Service Bureau, Inc., supra, 4 Cal.3d 842, 842.)

B. *Wilcox*

Wilcox is the best starting point for approaching the enormous record in this case since plaintiffs incorporated much of the *Wilcox* record below. Plaintiffs do espouse a different theory. A straightforward interest-rate-fixing conspiracy was alleged in *Wilcox*, based on parallel rate movement plus other evidence. Here, plaintiffs allege a much broader conspiracy, embracing an underlying movement **[***31]** from fixed to floating rates, the emergence of prime rates tied to factors within the banks' control, the tendency of floating rates to move upward quickly while "lagging" in downward movement, an increased "spread" between floating rates and banks' cost of funds, banks' use of the increased spread to offset "below-prime" loans made to more powerful, "Fortune 500" companies that might otherwise be lost to other funding sources, and a resulting harm to middle-market commercial borrowers that lack similar alternatives. The effect of this shift is to abandon any claim of actual rate fixing and to claim instead, in the words of one of plaintiffs' experts, that "the major banks have now somehow managed to put together a system that provides incentives to go along with increases in the prime and incentives not to go along with the decreases, *even without communication among the banks regarding individual decisions*." (Italics added.) This is a different theory than the one alleged in *Wilcox*.

Nevertheless, much of the same conspiratorial activity is alleged here, particularly the exchange of ideas at meetings of defendant trade associations. Thus the *Wilcox* cases remain highly **[***32]** relevant as background, and plaintiffs do not dispute the results reached there.

All evidence of conspiracy in the *Wilcox* cases was circumstantial (*Wilcox II, supra, 815 F.2d 522, 525)* and, in the end, was found wanting not **[*1428]** only under *Monsanto* and *Matsushita*, but also under Ninth Circuit authority predating those cases. *Parallel movement of prime rates was not enough by itself*. As the court found on virtually the same evidence produced here, "Reliance on other banks' prime rate changes is a convenient and accurate way for FIOR to maintain its prime rate at the level set by the national market." (*Id., at p. 526*.) The fact that FIOR was the only Bancorp subsidiary to use a "'count-to-four'" rule for rate changes (i.e., raising or lowering them whenever four out of seven major West Coast competitors did so) further "indicate[d] independent action." (*Ibid*.) Using other banks' rate changes is not illegal. The information is public and disseminated over wire services, and the prime rate is just one factor affecting commercial interest rates: "The prime rate is more indicative of an average cost because most loans **[***33]** are negotiated at interest rates either a certain percentage above or below prime. Thus disclosure of the prime rate does not enable competitors to conspire to fix prices . . . . An exchange of price information which constitutes reasonable business behavior is not an illegal agreement." (*Id., at pp. 526-527*, citations omitted.) Here, as was true in *Wilcox II*, FIOR's cooperative exchange of interest rate information in negotiating "participation loans" is "a necessary incident" to that task. (*Id., at p. 527* & fn. 4.)

Finally, the Ninth Circuit found nothing collusive in what plaintiffs here offer as convincing "evidence" of illegal motive -- that a two-tier system was developed whereby larger, more creditworthy borrowers were able to obtain below-prime rates while middle-market borrowers could not. Rejecting the notion that this showed a motive "to stabilize profits by avoiding competitive forces that could bring interest rates down," the court observed: "Near uniformity in prime interest rates reflects a competitive market for funds. Prime rates will arguably be nearly identical when each bank pursues its individual self-interest because **[***34]** failure to follow national prime rates could cause either losses or severe liquidity problems. FIOR presented credible, rebutting evidence that sub-prime loans and prime based loans are offered to different classes of borrowers and that both markets are highly competitive; that middle-market **[**830]** customers are not strong or secure enough to enter the sub-prime market; and that the prime based loans carry higher risks and are influenced by the national prime rate which theoretically reflects all relevant business conditions influencing the cost of funds. [para.] . . . A two tier pricing system is not inherently non-competitive unless it can be shown to be related to an anti-competitive agreement. [Citation.] There has been no such showing here. The actions alleged to constitute a conspiracy are precisely those that could be motivated by independent self-interest." (*815 F.2d at p. 528*.)

Sustaining a grant of judgment notwithstanding the verdict, the court held that the plaintiffs had not "carried their burden of proving that an **[*1429]** inference of conspiracy was more probable than an inference of concerted action . . . ." (*815 F.2d at p. 528*.) The Ninth **[***35]** Circuit's application of *Monsanto* and *Matsushita* does not concern us here since plaintiffs in this case insist that they abandoned the pure parallel price-fixing theory of *Wilcox* in the court below and, therefore, do not challenge the Ninth Circuit's result.

C. *New theory and the evidence*

Plaintiffs' theory is conceptually at odds with the one presented in *Wilcox*. Here, rather than conspiring to fix rates, the defendants are seen as conspiring to set in place a *system* by which they act independently, in the sense that each has and periodically adjusts its own prime rate more or less in accord with other banks' rate changes, but with the net effect being an assertedly anticompetitive control over rates. In other words, the conspiracy is not to fix prices but to fix a new system which *results* in more or less even loan pricing.

This conceptual difference brings even more difficult problems of proof than those encountered in *Wilcox*. ***CA(10a)***[] **(10a)** Here, as there, no one disputes that middle-market borrowing did change over time, more or less as alleged. The ultimate question is whether it did so as a result of conspiracy or, instead, as the result of independent business **[***36]** judgment in response to market forces. ***CA(11)***[] **(11)** ***HN11***[] "*Section 1* of the Sherman Act is not concerned with individual conduct, no matter how anticompetitive." (*Overseas Motors, Inc. v. Import Motors Limited, Inc. (E.D.Mich. 1974) 375 F.Supp. 499, 531*, affd. (6th Cir. 1975) *519 F.2d 119*, cert. den., *423 U.S. 987 [46 L.Ed.2d 304, 96 S.Ct. 395]*; *Fisher v. Berkeley (1986) 475 U.S. 260, 266 [89 L.Ed.2d 206, 106 S.Ct. 1045]*.)

The court in *Wilcox II* saw that market forces were *as likely as not* the reason for the complained-of parallel prices, meaning that inferences *preponderated* in favor of independent rather than concerted action. ***CA(10b)***[] **(10b)** Here, the *only* logical inference is that the movement from a fixed prime to individually set "primes" was due to market forces. It is undisputed that these changes were industry-wide and evolved over almost 10 years, with different banks (conspirators in plaintiffs' view) trying and ultimately abandoning many alternatives during that time. (See discussion in text, *post*.) Even plaintiffs' experts in this case, economists who felt **[***37]** that some of those practices were anticompetitive, agreed that they were consistent with prevailing economic pressures and independent business judgment. (See also *Wilcox I, supra, 605 F.Supp. 592, 595*.) It is almost a contradiction in terms to say that defendants could "conspire" to achieve a uniform result and yet take 10 years (with independent, halting attempts to arrive at the right system) to accomplish that conspiracy.

[*1430] Also, as in *Wilcox*, these plaintiffs offer no *direct* evidence of conspiracy. ***HN12***[] "'[D]irect evidence' means evidence that directly proves a fact, without an inference or presumption, and which in itself, if true, conclusively establishes that fact." (*Evid. Code, § 410*.) The closest they come is some direct evidence that floating rates, interest rates and interest-rate pricing were topics of *discussion*, usually at trade association meetings. It requires further inferences, however, to conclude that any *agreement* or *consensus* came out of those discussions.

CA(12a)[] **(12a)** In general, ***HN13***[] trade association activities tend to promote competition and are lawful. **[**831]** Gathering and compiling industry information and disseminating it among **[***38]** members does not offend antitrust policy, even though to do so naturally "tends to stabilize that trade or business and to produce uniformity of price and trade practice." (*Maple Flooring Assn. v. United States (1925) 268 U.S. 563, 582 [69 L.Ed. 1093, 1102, 45 S.Ct. 578]*.) "Competition does not become less free merely because the conduct of commercial operations becomes more intelligent through the free distribution of knowledge of all the essential factors entering into the commercial transaction." (*Id*., at p. 583 [69 L.Ed.2d at p. 1102], fn. omitted.) Individuals engaged in trade association activities, including the exchange of information on market prices, "are not engaged in unlawful conspiracies in restraint of trade merely because the ultimate result of their efforts may be to stabilize prices or limit production through a better understanding of economic laws and a more general ability to conform to them, for the simple reason that the Sherman Law neither repeals economic laws nor prohibits the gathering and dissemination of information." (*Id*., at p. 584 [69 L.Ed.2d at p. 1103].) **[***39]** Members do not "become . . . conspirators merely because they gather and disseminate information . . . bearing on the business in which they are engaged *and make use of it in the management and control of their individual businesses . . . ." (Ibid*., italics added.) Only when they take *concerted action to restrain trade* based on such information do they act illegally. (*Id*., at p. 584 [69 L.Ed.2d at p. 1103].)

CA(10c)[] **(10c)** Plaintiffs set the stage for their allegations with evidence that loan pricing and interest rates were the subject of trade association panel discussions, publications, meetings, symposia and the like in the 1970's, when the shift to floating rates and other developments of which they complain occurred. It is not disputed that those topics were discussed. However, such activity is condoned under antitrust policy, and thus no inference of conspiracy may be drawn from it without proof of agreement or concerted action to manipulate the commercial loan market with such information. There is also undisputed evidence that market forces, including the onset of unprecedented high inflation and interest rate instability made those **[***40]** topics timely and natural ones within the industry.

[*1431] As proof of agreement, plaintiffs point to evidence which corroborates the fact of those discussions, but without disclosing any agreement or even, in some instances, whether any named defendants were participants. That evidence does not bear further discussion.

There is evidence that discussions of floating rates during the early 1970's turned to the question of what indices could be used as references and that some banks (not including FIOR) instituted formulas for tying their primes in varying ways to market indices, such as short-term commercial paper rates or certificate of deposit rates. However, as defendants point out, those formulas differed from one another, were often revised or suspended, and received widespread publicity in the popular and trade press. Of the three banks in this case that experimented with them, two abandoned formulas in the early 1970's while one (Citibank) did not do so until 1981. This hardly connotes a conscious commitment to a *common* scheme (*Monsanto, supra, 465 U.S. 752, 764 [79 L.Ed.2d 775, 784])*, and there was undisputed testimony **[***41]** that those defendants using the formulas set them independently. Since there is no reasonable basis for inferring concerted action in instituting these formula rates, there can be no merit to the argument by plaintiffs that there was concerted action in abandoning them and ultimately adopting criteria (differing from bank to bank) over which banks had more control.

To show motive and a conspiracy to raise interest rates, plaintiffs rely on some extremely vague evidence, such as a program (from ARCB's 1972 annual meeting) on which Richard Cooley, then-president of Wells Fargo Bank, wrote: "Bankers Trust -- predicts prime rate 6-6 1/2% by yr. end if floating rate allows normal upward movement. Need other b[an]ks to make idea stick." Not only is this vague on its **[**832]** face but Cooley explained in deposition that the note was a reminder to himself that the forecast rise depended on other banks adopting *formula rates*. As just noted, that "conspiracy" went nowhere.

Some communications which plaintiffs cite for motive and conspiracy involve discussions of risk-analysis factors. However, the record shows that those factors determine rate distinctions not only between larger borrowers and **[***42]** the middle market, but also between borrowers *within* the middle market. This does not show collusion any more than the "two-tier" system noted by the Ninth Circuit in *Wilcox*. (*Wilcox II, supra, 815 F.2d 522, 528*.)

Plaintiffs lay special emphasis on the activities of Richard L. Thomas. They first point to remarks that he gave, as president of First National Bank of Chicago, at a 1975 RMA panel discussion on future lending needs and priorities. Underlining every reference to "pricing" in the remarks, plaintiffs **[*1432]** urge that these *public* and *published* remarks set the tone for later, *private* talks on raising rates for middle-market borrowers. Defendants correctly note, however, that this distorts the message. In context, he was urging that despite a severe capital shortage on the horizon, banks should allocate more capital to growing ("deserving") small and medium sized companies while making rate distinctions between seasonal and "permanent" loans. The fact that these were only part of his remarks, and that he was just one of four speakers (others spoke for legislative, regulatory and commercial customer sectors), further attenuates **[***43]** the inferences urged by plaintiffs.

Thomas went on to serve as chairman of ARCB's Committee on Bank Credit Policies (CBCP) for the following fiscal year, 1976-1977. Plaintiffs cite letters from that period, most of them to and from other committee members. The letters explore "appropriate pricing policies," "differential pricing," credit trends, the future of commercial lending and like subjects, as possible topics for inclusion on the agendas for a January 1977 CBCP meeting on bank practices and an April 1977 CBCP panel discussion on "Trends in Commercial Bank Credit" (part of ARCB's annual meeting in Phoenix), both of which Thomas moderated. [7]

---

[7] For example, a fellow committee member wrote to Thomas just a week before the January meeting: "With reference to Point #2 of your letter of January 7, and as I view sagging domestic loan demand and an anything but ebullient near-term loan forecast, I wonder if the pricing section of our agenda could be amplified to include some discussion relating to differential pricing. With so many of our higher quality relationships covering what modest short-term requirements they may have in the commercial paper

[*44]** Plaintiffs confront serious obstacles in trying to weave a thread of conspiracy through Thomas's activities with ARCB. ***CA(12b)***[] **(12b)** First is the strong policy that disseminating competitive information, even pricing information, through trade association activities is condoned by ***antitrust law***. **[*1433]** Members may use that information in the management and control of their individual businesses. It is only where they **[**833]** take concerted action to restrain trade based on such information that the law is violated. (*Maple Flooring Assn. v. United States, supra, 268 U.S. 563, 585 [268 U.S. 563, 1103]*.) Thus, plaintiffs must show conspiracy with something beyond the ARCB's activities. Second, while bits and pieces of committee members' letters might connote advocacy of a sort in the area of commercial credit policy (see fn. 7, *ante*), we must distinguish between those private communications (the letters) and the way that such information actually came out in panel discussions. The public discussions themselves, according to the record we have, lacked the degree of innuendo found in the letters. Third, the panel discussions covered a wide array **[***45]** of topics, only a small part of which concerned commercial loan pricing, which makes the potential for conspiracy more remote.

Plaintiffs depend on the coincidence of certain topics having been discussed and the concurrent or later development of consistent trends in the marketplace. Analogizing the case to one where several people enter a room together, hear an idea and then, the next day, all begin acting in accord with that idea, plaintiffs urge that there *must* be a conspiracy. However, the analogy proves too facile. This was not a room full of people; the conspiracy as envisioned by this lawsuit was nationwide, involving virtually every commercial bank, coast to coast. The "concert of action" was not evidenced overnight; it took years to develop. ***CA(10d)***[] **(10d)** To the extent that we can attribute the evolution in middle-market lending to trade association activities, the facts are overwhelmingly consistent with the legitimate dissemination and use of information, not conspiracy in the antitrust sense. Plaintiffs' showing fails to bridge the gap.

We have examined plaintiffs' remaining evidence and find it no more probative, even in the aggregate.

We hold, as the court below did, that **[***46]** plaintiffs failed to raise a triable issue of fact on the issue of antitrust conspiracy. (*Corwin v. Los Angeles Newspaper Service Bureau, Inc., supra, 4 Cal.3d 842, 842*; *AARTS Productions, Inc. v. Crocker National Bank, supra, 179 Cal.App.3d 1061, 1064-1065*.) Failure to raise a triable issue of antitrust conspiracy (and the derivative unfair competition claim) (*§§ 16720*, *17200*) means that the court properly granted summary adjudication.

IV

CA(13)[] **(13)** It follows from our analysis in part III that summary adjudication was also properly granted to the trade association defendants to the extent **[*1434]** that they and plaintiffs relied on the same evidentiary materials. In fact, the trade associations offered that evidence *and more* to carry their burden of negating the conspiracy claim. They submitted declarations showing that they are not banks, do not lend money, charge, have or set prime rates, do not participate in setting members' rates, and exist as banking industry organizations that foster education,

---

market, I think that the industry needs to develop a way in which these borrowers can be brought back to the banking system, but at the same time without jeop[a]rdizing the spreads on existing credits that merit higher interest rates. It is a difficult area, but I do think our industry needs to develop a more sophisticated approach to the pricing of our credit-related products."

Another letter, from Thomas to CBCP members a month before the April meeting, reads in part: "[M]y thinking is that we can divide the panel into four sections. As moderator, I thought I might open the session by giving a brief overview of the role of commercial bank credit in our economy, perhaps dating back to the end of World War II, but with greater emphasis on the past five years. Reuben Richards has then agreed to talk for seven or eight minutes on current activities in the marketplace, and Harry Meily has then agreed to discuss the likely course of commercial bank lending in the future. Finally, Charlie Pistor will discuss the personnel implications of current practices and anticipated developments in commercial bank lending."

At the April panel, Thomas prefaced his remarks as follows: "Our basic concern today . . . is whether or not there has been a *fundamental* change in demand for commercial loans. Frankly, we don't know for sure, but we hope that our discussion today will shed some light on the issues involved. We do believe that the answer to that question will have important implications for the way we will be doing business in the next several years."

legislation, and the dissemination of economic and regulatory information among their members, regulators **[***47]** and the public through a range of forums, including regular meetings and publications. [8]

Plaintiffs, for their part, relied on essentially the same evidence as presented against the bank defendants' motions. Our previous discussion thus suffices here as well.

Plaintiffs ask us to draw inferences in their favor based on assertions that trade association defendants destroyed documentary evidence and offered only "obfuscation" and "double talk" in depositions. They cite no authority, however, and thus waive the claim. (*Strutt v. Ontario Sav. & Loan Assn. (1972) 28 Cal.App.3d 866, 873 [105 Cal.Rptr. 395]*.) In any event, the "destroyed" evidence of which **[***48]** they speak **[**834]** includes committee meeting minutes which defendant ARCB explained, by affidavits filed below, *were never kept during the years in question* and a calendar page which, while lost during discovery, was described by an employee who had seen it. Also, a Citibank officer whose calendar for 1971 could not be produced explained in deposition what steps he had taken to locate it and that he could not find it. The "double talk" to which plaintiffs allude amounts to deponents admitting being at certain meetings (based on calendar notations) but being unable to recall details of those meetings. This was hardly surprising since the meetings were held many years past. Nothing in this "destruction" of evidence would raise inferences of conspiracy.

For reasons already stated in part III, we deem the third cause of action abandoned, view the first cause of action (unfair competition) as depending entirely on the second (Cartwright Act), and reject the idea that the court (this time Judge McCabe) had to give formal rulings on evidentiary objections. Plaintiffs again urge that inadmissible evidence was presented, but our analysis in part III coupled with plaintiffs' failure to brief **[***49]** particular deficiencies in any detail, makes an elaborate response unnecessary. We simply note that enough competent, admissible evidence was presented to negate the conspiracy allegations, ignoring those parts of the declarations **[*1435]** which truly were too conclusionary. In general, the declarants established that they were in positions to know from personal knowledge whether there was collusive agreement by the trade associations.

Turning to plaintiffs' responsive showing, we have already determined that insufficient evidence was presented to draw a reasonable inference of conspiracy among the *bank* defendants, and the trade association defendants presented undisputed evidence that they did not have or set interest rates. Since liability can only be predicated on fostering and encouraging a bank conspiracy for which no reasonable inference was raised, Judge McCabe properly granted summary adjudication. Because only the first three causes of action affected the trade associations, she also correctly granted them summary judgment.

V [*]

[*50]** . . .

The judgments are affirmed.

Concur

KLINE, P. J., Concurring.

---

[8] Defendant ABA is a national trade association whose members include over 11,000 commercial banks. ARCB, founded in 1912, is an association of individual bankers from commercial banks. RMA is an association of 3,100 institutions comprised mostly of commercial banks but including some savings banks and savings and loan associations.

[*] See footnote, *ante*, page 1410.

In agreement with my colleagues that summary judgment was properly granted, I write separately to more fully address respondents' claim that, in the context of a motion for summary judgment, the proper standard to be applied in determining whether the evidence will support an inference of concerted action in a Cartwright Act case ought to be that prescribed by the United States Supreme Court in *Matsushita Elec. Industrial Co. v. Zenith Radio (1986) 475 U.S. 574 [89 L.Ed.2d 538, 106 S.Ct. 1348]* (*Matsushita*).

Relying upon *Matsushita*, respondent banks vigorously contend that "it is not enough for plaintiffs to point to evidence that is as consistent with lawful independent action as with unlawful concerted action." According to the banks, "[s]uch evidence is insufficient as a matter of law to establish an unlawful antitrust conspiracy and hence cannot give rise to a triable issue of material fact." These "*Matsushita* principles" apply to proof of price fixing conspiracies under the Cartwright Act, the banks maintain, because the California Supreme Court has **[***51]** repeatedly held that federal cases interpreting **[*1436]** *section 1* of the Sherman Act are persuasive in cases filed in state court under the Cartwright Act.

It is, of course, true that "[i]n interpreting the Cartwright Act, we properly look to the Sherman Act and cases construing it: 'the Cartwright Act is patterned after the Sherman Act and both statutes have their roots in the common law.'" (*Blank v. Kirwan (1985) 39 Cal.3d 311, 320 [216 Cal.Rptr. 718, 703 P.2d 58]*, **[**835]** quoting *Marin County Bd. of Realtors, Inc. v. Palsson (1976) 16 Cal.3d 920, 925 [130 Cal.Rptr. 1, 549 P.2d 833]*.) This familiar principle does not mean, however, that interpretations of the federal rule pertaining to summary judgment (*Fed. Rules Civ. Proc., rule 56*, 28 U.S.C.) controls application of the California summary judgment statute (*Code Civ. Proc., § 437c*) in Cartwright Act cases. *Matsushita* cannot be reconciled with the California statute and case law pertaining to summary judgment and therefore cannot be followed by the courts of this State.

I.

Matsushita is among a trio of cases interpreting *rule 56* **[***52]** *of the Federal Rules of Civil Procedure*, all decided in 1986 by sharply divided courts, that collectively mark a major change in the United States Supreme Court's attitude about summary judgment. (Childress, *A New Era for Summary Judgments: Recent Shifts at the Supreme Court (1987) 116 F.R.D. 183*.) Though *Matsushita* involves application of the Sherman Act it is primarily significant for what it has to say about the burden of proof and the burden of persuasion in connection with summary judgment motions. Because it is so inextricably a part of a new federal judicial view of summary judgment, *Matsushita* is best understood in the context of the two other summary judgment cases decided the same term: *Celotex Corp. v. Catrett (1986) 477 U.S. 317 [91 L.Ed.2d 265, 106 S.Ct. 2548]*, and *Anderson v. Liberty Lobby, Inc. (1986) 477 U.S. 242 [91 L.Ed.2d 202, 106 S.Ct. 2505]*.

Celotex was an asbestos products liability suit in which the defendant sought summary judgment on the ground that there was no evidence connecting the decedent with its asbestos and that the plaintiff **[***53]** had failed to identify any witness who could establish such a connection. The Court of Appeals reversed the grant of summary judgment, declaring that *rule 56* imposed upon the defendant movant the "burden of coming forward with proof of the absence of any genuine issues of material fact." (*Catrett v. Johns Manville Sales Corp. (D.C. Cir. 1985) 756 F.2d 181, 184 [244 App.D.C. 160]*, fn. omitted.) Summary judgment should have been denied, the Court of Appeals reasoned, because the defendant had offered no evidence. The Supreme Court reversed, ruling that a defendant seeking summary judgment, who does not bear the ultimate burden of proof, may rely **[*1437]** on the record to show the absence of a genuine dispute about a material fact. "In our view, the plain language of *rule 56(c)* mandates the entry of summary judgment . . . against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the ultimate burden of proof at trial." (*Celotex Corp. v. Catrett, supra, 477 U.S. at p. 322 [91 L.Ed.2d at p. 273*].) **[***54]**

Anderson v. Liberty Lobby, Inc., supra, 477 U.S. 242, decided the same day as *Celotex*, was a libel suit against the publisher and editor of a magazine. The defendants moved for summary judgment on the theory that the essential element of "actual malice" was absent as a matter of law. In support of the motion the author of the article submitted an affidavit specifying his sources, describing the extent of his considerable research and stating his belief that the article was truthful and accurate. Concluding that the district court properly granted the defendants' motion for summary judgment, the Supreme Court held that, as in the case of a motion for directed verdict, a court ruling on a motion for summary judgment "must be guided by the substantive evidentiary standards that apply to the case." (*Id., at p. 255 [91 L.Ed.2d at p. 216*].) In determining whether a dispute is "genuine" within the meaning of *rule 56*, the trial judge must inquire whether a "reasonable" jury could find for the nonmoving party. A "genuine" dispute is one that is not "one-sided" and one which could reasonably **[***55]** be resolved by a "fair-minded" jury in favor of either party. (*Id., at pp. 251-252 [91 L.Ed.2d at pp. 213-214*].) [1]

[*56]** **[**836]** As will be seen, *Matsushita* is of a piece with *Celotex* and *Anderson* in that it permits a defendant seeking summary judgment in federal court to shift a greater evidentiary burden to the nonmoving plaintiff than is permitted under the California summary judgment statute.

[*1438] *Matsushita* was a highly unusual antitrust case. [2] The plaintiffs, a group of American electronics manufacturers, claimed that the 21 defendants, Japanese television manufacturers and their affiliated trading companies, conspired to fix artificially high prices in Japan and artificially low prices in the United States. By boosting the prices of Japanese goods in Japan the defendants allegedly subsidized the artificially low priced sales of their products in the United States. By minimizing competition in the United States between Japanese manufacturers, it was claimed, the defendants facilitated predation against their American competitors.

[*57]** The Supreme Court clearly believed this scenario preposterous. "[P]redatory pricing schemes are rarely tried, and even more rarely successful." (*Matsushita, supra, 475 U.S. at p. 589 [89 L.Ed.2d at p. 554*].) Moreover, a scheme involving 21 conspirators "is incalculably more difficult to execute than an analogous plan executed by a single predator." (*Id. at p. 590 [89 L.Ed.2d at p. 554*].) "Finally," the court observed, "if predatory pricing conspiracies are generally unlikely to occur, they are especially so where, as here, the prospects of attaining monopoly power seem slight. In order to recoup their losses, petitioners must obtain enough market power to set higher than competitive prices, and then must sustain those prices long enough to earn in excess profits what they earlier gave up in below-cost prices." (*Id., at pp. 590-591 [89 L.Ed.2d at p. 555*].) Data in the record strongly suggested that the goals of the alleged scheme had not been achieved. The two largest shares of the retail market in television sets was held by American, not Japanese **[***58]** manufacturers. Moreover, those shares did not decline appreciably during the two decades after the conspiracy were alleged to have commenced. (*475 U.S. at p. 591 [89 L.Ed.2d at p. 555*].) After further analysis the court concluded that "petitioners had no motive to enter into the alleged conspiracy. To the contrary, as presumably rational businesses, petitioners had every incentive *not* to engage in the conduct with which they are charged, for its likely effect would be to generate losses **[**837]** for petitioners with no corresponding gains." (*Id., at p. 595 [89 L.Ed.2d at p. 558*], italics in original.)

---

[1] In his dissent in *Anderson*, Justice Brennan contended that the majority, "while instructing the trial judge to 'consider' heightened evidentiary standards, fails to explain what that means. In other words, how does a judge assess how one-sided evidence is, or what a 'fairminded' jury could 'reasonably' decide?" (*Id., at p. 265 [91 L.Ed.2d at p. 222*].) Because the majority opinion "could surely be understood as an invitation -- if not an instruction -- to trial courts to assess and weigh evidence much as a juror would" (*id., at p. 266 [91 L.Ed.2d at p. 223*]), Justice Brennan feared it "may erode the constitutionally enshrined role of the jury." (*Id., at p. 268 [91 L.Ed.2d at p. 224*].) Justice Rehnquist who in an opinion joined by Chief Justice Burger also dissented in *Anderson*, claimed that the "substantive standard" which the majority decided must be applied by trial courts in deciding a motion for summary judgment "is actually a procedural requirement engrafted onto *Rule 56*." (*Id., at pp. 268-269 [91 L.Ed.2d at p. 225*].) "The Court's decision to engraft the standard of proof applicable to a factfinder onto the law governing the procedural motion for a summary judgment (a motion that has always been regarded as raising a question of law rather than a question of fact [citation]), will do great mischief with little corresponding benefit." (*Id., at p. 272 [91 L.Ed.2d at p. 227*].)

[2] "*Matsushita* was the quintessential overblown antitrust case. The published opinions of the trial court 'would fill an entire volume of the *Federal Supplement*.' By the time the court granted summary judgment for defendants in 1981, the record had ballooned so that the 'essence of the evidence' filled forty volumes. Judge Becker, who ruled much of the evidence inadmissible and granted summary judgment, said the 'enormous record . . . may be the largest summary judgment record ever developed.' To manage this record he required plaintiffs to file a 'final pretrial statement' detailing every fact they hoped to prove at trial, and all evidence that would be offered to prove these facts. The final pretrial statement was to have preclusive effect: except for good cause, no other facts or evidence could be offered at trial. Plaintiffs' final pretrial statement totaled 11,500 pages, not counting a 6,000 page appendix that cross-referenced 250,000 pages of documents." (Calkins, *Summary Judgment, Motions to Dismiss, and Other Examples of Equilibrating Tendencies in the Antitrust System* (1986) *74 Geo.L.J. 1065, 1123*.)

[*1439] After establishing the implausibility of the plaintiffs' claim, and inquiring whether the record taken as a whole could lead a rational trier of fact to find for the nonmoving party, the court had little trouble concluding that there was no "genuine issue for trial" within the meaning of *rule 56(e)*.) (*475 U.S. at p. 598 [89 L.Ed.2d at p. 559*].) To survive a defendant's motion for summary judgment in a Sherman Act case, the court declared, a plaintiff "must **[***59]** present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently." (*Id., at p. 588 [89 L.Ed.2d at p. 553*].) This "tends to exclude" standard requires a plaintiff to produce considerably more evidence of agreement than does the reasonableness standard that was previously applied. [3] "While it does not technically require a specific determination by the judge that the existence of an agreement is more probable than not, as a practical matter it amounts to the same thing." (Shores, *Narrowing the Sherman Act Through an Extension of Colgate: The Matsushita Case* (1988) *55 Tenn.L.Rev. 261, 298-299*.)

[*60]** One of the most notable aspects of *Matsushita* is its adoption of the rationale of *Monsanto Co. v. Spray-Rite Service Corp. (1984) 465 U.S. 752 [79 L.Ed.2d 775, 785-786, 104 S.Ct. 1464]*. In a footnote, the *Matsushita* court stated that "[w]e do not imply that, if petitioners had a plausible reason to conspire, ambiguous conduct could suffice to create a triable issue of conspiracy. Our decision in *Monsanto Co.* v. *Spray-Rite Service Corp*., . . . establishes that conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." (*Matsushita, supra, 475 U.S. at p. 597, fn. 21 [89 L.Ed.2d at p. 559*].) Unlike *Matsushita, Monsanto* was a vertical case. Before *Matsushita* it was generally understood that the evidentiary standard for inferring an agreement was much higher in the vertical context than the horizontal. [4] *Monsanto*, **[**838]** which reinforced the early decision in *United States **[*1440]** v. Colgate & Co. (1919) 250 U.S. 300 [63 L.Ed. 992, 39 S.Ct. 465, 7 A.L.R. 443]*, **[***61]** was taken by the lower federal courts to mean that they should apply a "lesser standard" for plaintiffs to meet in establishing a horizontal combination than a vertical agreement. (See, e.g., *Filco v. Amana Refrigeration, Inc. (9th Cir. 1983) 709 F.2d 1257, 1266*.) Moreover, the *Monsanto* principles were originally fashioned for use in vertical cases *after trial on the merits*, not in connection with summary proceedings prior to trial.

---

[3] It is true that in the very next sentence after the one in which the court articulates the "tends to exclude" standard the court states as follows: "Respondents . . . , in other words, must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed respondents." (*475 U.S. at p. 588 [89 L.Ed.2d at p. 553*].). Taken at face value, this sentence creates an ambiguity, because it is inconsistent with the preceding statement that the plaintiff must present "evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently." However, other language in *Matsushita* makes it very clear that "tends to exclude" standard prevails; particularly the statement that "conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." (*Id., at p. 597, fn. 21 [89 L.Ed.2d at p. 559*].)

[4] The *Monsanto* court emphasized that distributor termination are different from horizontal cases in several ways. "For example, the fact that a manufacturer and its distributors are in constant communication about prices and market strategy does not alone show that the distributors are not making independent pricing decisions." (*Id., at p. 762 [79 L.Ed.2d at p. 784*].) Moreover, complaints from rival distributors are natural and unavoidable and "'do not indicate illegal concerted action.'" (*Monsanto, supra, 465 U.S. at p. 763 [79 L.Ed.2d at p. 785*], quoting *Roesch, Inc. v. Star Cooler Corp. (8th Cir. 1982) 671 F.2d 1168, 1172*.) Thus, it is precisely because "[a] manufacturer and its distributors have legitimate reasons to exchange information about the prices and the reception of their products in the market" (*id., at p. 762 [79 L.Ed.2d at p. 784*]), that the inference of concerted action cannot be drawn in vertical price-fixing conspiracy cases only from proof of termination following competitor complaints. Because of the "important distinctions" that are at the center of distributor-termination cases, the plaintiff must provide additional evidence "that tends to exclude the possibility of independent action by the manufacturer and distributor." (*Id., at p. 768 [79 L.Ed.2d at p. 788*].) Thus, the innocence in distributor termination cases of facts that in other antitrust contexts might appear incriminating -- e.g., the sharing of information and complaints from rival distributors -- in effect renders a claim in such a vertical case "implausible" if it is not supported by additional evidence.

Because *Monsanto* relates to concerns peculiar to vertical cases never thought to be relevant to horizontal cases, it has been said that *Matsushita's* reliance on *Monsanto* is "unfair." (Calkins, *Summary Judgment, Motions to Dismiss, and Other Examples of Equilibrating Tendencies in the Antitrust System, supra*, 74 Geo.L.J. at p. 1125 and fn. 456.)

[*62]** By using *Monsanto* to redefine the substantive law, *Matsushita* alters the procedural rules and the evidentiary standard applicable in connection with motions for summary judgment in antitrust cases. *Matsushita* is in this respect analogous to *Anderson v. Liberty Lobby, supra, 477 U.S. 242*; both decisions mean that a plaintiff cannot at the summary judgment stage rely on undisputed evidence where under the applicable substantive law his right to a jury verdict would turn on a mixed question of fact and law. Whereas summary judgment was previously denied whenever competing inferences could reasonably be drawn, it is in the federal courts now proper to grant the motion in such circumstances. Moreover, once the moving defendant has shown that competing inferences may reasonably be drawn, which may not prove difficult, the nonmoving plaintiff must satisfy a much more daunting evidentiary requirement. This evidentiary requirement also vests the judge with powers that federal courts previously reserved to the jury. As Justice White pointed out in his dissent in *Matsushita*, which was joined by three of his colleagues, the **[***63]** majority's reference to *Monsanto* "suggests that a judge hearing a defendant's motion for summary judgment in an antitrust case should go beyond the traditional summary judgment inquiry and decide for himself whether the weight of the evidence favors the plaintiff. [The cases relied upon, *Monsanto* and *First Nat. Bank v. Cities Service (1968) 391 U.S. 253 (20 L.Ed.2d 569, 88 S.Ct. 1575)*)], do not stand for any such proposition. Each of those cases simply held that a particular piece of evidence standing alone was insufficiently probative to justify sending a case **[*1441]** to the jury. These holdings in no way undermine the doctrine that all evidence must be construed in the light most favorable to the party opposing summary judgment." (*Matsushita, supra, 475 U.S. at pp. 600-601 [89 L.Ed.2d at p. 561*], dis. opn. of White, J., fn. omitted.)

As a result of *Matsushita, Anderson* and *Celotex* the Supreme Court "has shifted its focus away from legal cognizability and more to actual disposition of *factual* issues. The result is that summary judgment can be less of a pretrial dismissal **[***64]** motion and more of a kind of trial itself, a bench trial on paper." (Childress, *A New Era for Summary Judgments: Recent Shifts at the Supreme Court, supra, 116 F.R.D. at p. 184*, italics in original.) [5]

[*65]** II.

The new federal view of summary judgment has not been adopted by the courts of this state. For one thing, the California summary judgment statute is in certain important respects different from *rule 56(e) of the Federal Rules of Civil Procedure*. The first sentence of the statute provides that a party may move for summary judgment only when "it is contended that the action has no merit or that there is no defense thereto" (*Code of Civ. Proc.,* ***[**839]*** *§ 437c, subd. (a)*), a provision that has no counterpart in the federal rule. Our statute also specifically provides, as federal *rule 56* does not, that summary judgment "shall not be granted . . . based on inferences reasonably deducible from the evidence, if contradicted by other inferences or evidence, which raises a triable issue as to any material fact." (*Code of Civ. Proc., § 437c, subd. (c)*.) As a result of these provisions, the rule has evolved that "[w]here, as here, the moving party is a *defendant* he must either negate a necessary element of the plaintiff's case or state a complete defense. [Citation.]" (*Parsons Manufacturing Corp. v. Superior Court (1984) 156 Cal.App.3d 1151, 1157 [203 Cal.Rptr. 419]*, **[***66]** italics added, citing *LaRosa v. Superior Court (1981) 122 Cal.App.3d 741, 744-745 [176 Cal.Rptr. 224]*; accord *Pultz v. Holgerson (1986) 184 Cal.App.3d 1110, 1115 [229 Cal.Rptr. 531]*; *Frazier, Dame, Doherty, Parrish & Hanawalt v. Boccardo, Blum, Lull, Niland, Teerlink & Bell (1977) 70 Cal.App.3d 331, 338 [138 Cal.Rptr. 670]*; **[*1442]** *Smith v. Southern Pacific Co. (1963) 222 Cal.App.2d 728, 733 [35 Cal.Rptr. 575]*; *Security First Nat. Bank v. Ross (1963) 214 Cal.App.2d 424, 432 [29 Cal.Rptr. 538]*.)

---

[5] It has been suggested that this new attitude is more related to a desire of overburdened courts to increase the quantity of dispositions than the quality of adjudications. (See, e.g., Brunet, *The Use and Misuse of Expert Testimony in Summary Judgment* (1988) 22 U.C. Davis L.Rev 93, 94 ["Today's courts, facing more complex cases and an increasing caseload, are simply more receptive to docket clearing devices such as summary judgment"]; Miner, *Federal Courts at the Crossroads* (1987) 4 Const. Commentary 251, 255 ["courts are beginning to relax the standards for summary judgment, and I do not believe that this development is unrelated to the caseload crunch"], and Comment, *Federal Summary Judgment: The "New" Workhorse for an Overburdened Federal System* (1987) 20 U.C. Davis L.Rev. 955, 978 ["Considering the high litigation costs and crowded dockets in federal courts today, the future of summary judgment seems secure"].)

Under the California case law it is difficult for a defendant moving for summary judgment to shift the burden of proof or of persuasion to the plaintiff. "The statute requires the trial court to consider all inferences reasonably deducible from the evidence; hence, the fact that [plaintiffs'] attorney did not urge the trial court at the original hearing on the motion to draw certain specific inferences of negligence does not relieve the trial court or this [appellate] court from a duty to take those inferences **[***67]** into account." (*Maxwell v. Colburn (1980) 105 Cal.App.3d 180, 185 [163 Cal.Rptr. 912]*; accord *Hepp v. Lockheed-California Co. (1978) 86 Cal.App.3d 714, 719 [150 Cal.Rptr. 408]*.)

Though the Supreme Court was more explicit on the point in *Celotex* and *Anderson, Matsushita* also suggests that the burdens of coming forward and of persuasion may justifiably be shifted to a plaintiff resisting summary judgment because the latter must ultimately bear those burdens at trial. As pointed out by the trial judge and in the lead opinion, such a rationale is incompatible with California law on the subject. In California, "[t]he placement of the burden of proof at trial does not affect the showing required for a summary judgment. (*Security Pac. Nat. Bank v. Associated Motor Sales (1980) 106 Cal.App.3d 171, 179* . . . .) 'There is nothing in the [summary judgment] statute which lessens the burden of the moving party simply because at the trial the resisting party would have the burden of proof on the issue[s] on which the summary judgment is sought to be predicated. In such a case, **[***68]** on the motion for summary judgment, the moving party must generally [negate] the matters which the resisting party would have to prove at the trial.' (*Barnes v. Blue Haven Pools (1969) 1 Cal.App.3d 123, 127* . . . .)" (*Lee v. Electric Motor Division (1985) 169 Cal.App.3d 375, 382 [215 Cal.Rptr. 195]*.) Stated differently, the burdens substantive ***antitrust law*** imposes upon a plaintiff at trial do not in state court serve to diminish the burdens on a defendant moving for summary judgment. The similarities between the state and federal antitrust statutes cannot be permitted to obscure the significant differences between state and federal summary judgment practices, which on the state side is governed by statute.

The reluctance of California courts to ease the burdens on parties seeking summary judgment is pronounced in cases involving the existence of an agreement. (6 Witkin, Cal. Procedure (3d ed. 1985) Proceedings Without Trial, § 308, p. 601.) Often, the surrounding circumstances are thought to give meaning to the terms of an understanding, thus presenting a question of fact. (See, e.g., *Mason v. Superior Court (1985) 163 Cal.App.3d 989, 999* ***[*1443]*** *[210 Cal.Rptr. 63]*.) **[***69]** This judicial attitude is particularly evident in antitrust cases. As stated in *Sherman v. Mertz Enterprises (1974) 42 Cal.App.3d 769 [117 Cal.Rptr. 188]*, "[s]ummary judgment, by its nature, should be sparingly granted in cases alleging antitrust activities by defendant. **[**840]** The plaintiff in such a case finds himself outside a door of information that can be opened only by obtaining the key from the defendants. Unless plaintiff is allowed to probe into the secrecy of defendants, he would forever be foreclosed from finding facts to support his contention." (*Id., at p. 774*.)

The California Supreme Court has adopted this view. In *Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal.3d 842 [94 Cal.Rptr. 785, 484 P.2d 95]* the court reversed a grant of summary judgment for the defendant in a Cartwright Act case primarily on the basis of several "well-established rules" governing the meaning of *Code of Civil Procedure section 437c* (*id., at p. 851*), such as the rule that the affidavits in support of the moving party must **[***70]** in and of themselves be sufficient to sustain a judgment in his favor (*ibid*.), and the rule that "the affidavits of the moving party are strictly construed and those of his opponent liberally construed, and doubts as to the propriety of granting the motion should be resolved in favor of the party opposing the motion." (*Id., at pp. 851-852*.) Rules such as these, the court indicated, are necessary to insure that the "drastic" remedy of summary judgment is "'used with caution so that it does not become a substitute for the open trial method of determining facts.'" (*Id., at p. 852*, quoting *Stationers Corp. v. Dun & Bradstreet, Inc. (1965) 62 Cal.2d 412, 417 [42 Cal.Rptr. 449, 398 P.2d 785]*.)

The *Corwin* court also relied on language in *Poller v. Columbia Broadcasting (1962) 368 U.S. 464 [7 L.Ed.2d 458, 82 S.Ct. 486]*, that reflects a judicial sensibility hard to square with the theme of *Celotex, Anderson* and, particularly *Matsushita*: "We believe that summary procedures should be used sparingly **[***71]** in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. Trial by affidavit is no substitute for trial by jury which so long has been the hallmark of 'even handed justice.'" (Poller, supra, 368 U.S. at p. 473 [7 L.Ed.2d at p. 464]; quoted in Corwin, supra, 4 Cal.3d at p. 852.)

III.

The trial judge in this case, who understood the difference between summary judgment procedures in federal and state courts, observed on the record that "the California courts have not yet adopted *Celotex* standards **[*1444]** for ruling on motions for summary judgment." For this reason, he concluded, defendant banks and trade associations, the moving parties, "have got the burden of coming forward with evidence that is fully competent to negate the allegations made against them in the complaint." It was only because he believed the defendants **[***72]** sustained the burden of presenting sufficient evidence negating the allegations of the complaint that the trial judge shifted to the nonmoving plaintiff the burden of establishing the existence of a triable issue of material fact. [6] The rationale of the trial judge's refusal to utilize "*Celotex* standards" applies with equal force to the *Matsushita* standards, which the judge never indicated he was even considering. As has been shown, the *Matsushita* standards are closely related to those set forth in *Celotex* and are just as difficult **[**841]** to reconcile with the California summary judgment statute. As has also been shown, the *Matsushita* standards represent a policy inconsistent with that adhered to by the courts of this state.

[*73]** Finally, there remains some doubt whether even the federal courts would apply the *Matsushita* standard to the present case. First of all, the Cartwright Act claim in this case is not as facially implausible as the Sherman Act claims in *Matsushita* and *Monsanto* because there *is* an economic incentive to engage in the conduct charged and the alleged conspiracy is not practically infeasible. Nor would denial of summary judgment in this case "deter pro-competitive conduct," as the *Matsushita* and *Monsanto* courts both feared due to circumstances not present in this case. [7] (Matsushita, supra, 475 U.S. at p. 593 [89 L.Ed.2d at 556]; Monsanto, supra, 465 U.S. at pp. 762-764 [79 L.Ed.2d at pp. 784-785].) Moreover, the omission in the *Matsushita* opinion of any reference to the Supreme Court's earlier opinion in *Poller* v. *Columbia Broadcasting, supra*, 368 U.S. 454, which emphasizes very different policy considerations, suggests the possibility that *Poller* continues to apply in cases such as this one, in which the defendant's motive is a central issue **[***74]** or element of the claim. (See First Natl. Bank v. Cities Service, supra, 391 U.S. 253, 285 [20 L.Ed.2d 569, 590]; White Motor Co. v. United States (1963) 372 U.S. 253, 259 [9 L.Ed.2d 738, 744, 83 S.Ct. 696]; see also 2 Areeda & Turner, ***Antitrust Law*** (1978) § 316(b).)

[*1445] In any event, because *Matsushita* is predicated on rule 56 of the Federal Rules of Civil Procedure and conflicts with the California summary judgment statute (Code Civ. Proc., § 437c) and cases interpreting that statute, the opinion in that case is not binding on California courts.

End of Document

[6] The standard applied by the trial court in this case was precisely that adopted by the Court of Appeals in *Celotex* and rejected by the Supreme Court. As stated in the Supreme Court opinion, the majority of the Court of Appeals concluded that " Rule 56(e) of the Federal Rules of Civil Procedure, and this Court's decision in Adickes v. S. H. Kress & Co., 398 U.S. 144, 159 (1970), establish that 'the party opposing the motion for summary judgment bears the burden of responding *only after* the moving party has met its burden of coming forward with proof of the absence of any genuine issues of material fact.' 244 U.S.App.D.C., at 163, 756 F.2d, at 184 (italics in original; footnote omitted)." (Celotex, supra, 477 U.S. at pp. 321-322 [91 L.Ed.2d at pp. 272-273], fn. omitted.)

[7] Conducting trade association meetings does not constitute "procompetitive behavior" within the meaning of *Matsushita* and *Monsanto*.

HN1[] **In Rem & Personal Jurisdiction, In Personam Actions**

Ordinarily, a court considers the question of personal jurisdiction before considering the issue of proper venue. However, when there is sound prudential justification for doing so, a court may reverse the normal order of its consideration and address venue before personal jurisdiction.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN2[] **Venue, Individual Defendants**

When the court's jurisdiction is not founded solely on the diversity of citizenship, venue is proper only in the judicial district where all defendants reside or in which the claim arose, except as otherwise provided by law. *28 U.S.C.S. § 1391(b)*.

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN3[] **Venue, Multiparty Litigation**

28 U.S.C.S. § 1391(b) provides: A civil action wherein jurisdiction is not founded solely on diversity of citizenship may be brought only in the judicial district where all defendants reside, or in which the claim arose, except as otherwise provided by law.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN4[] **Venue, Individual Defendants**

In the usual case, a claim arises in only one specific district. In determining where "the claim arose," a court should be guided by a review of events having operative significance in the case, and a commonsense appraisal of the implications of those events for accessibility to witnesses and records. Additionally, venue is conferred on a district where a substantial portion of the acts or omissions giving rise to the actions occurred, notwithstanding that venue might also lie in other districts. The substantiality of the operative events must be determined by assessment of their ramifications for efficient conduct of the suit. Venue must be established independently as to each defendant and as to each cause of action.

Torts > Procedural Matters > Commencement & Prosecution > Venue

Civil Procedure > Preliminary Considerations > Venue > Agents

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

Civil Procedure > Preliminary Considerations > Venue > Special Venue

HN5[] **Preliminary Considerations, Venue**

The special venue provisions of the antitrust laws are *15 U.S.C.S. §§ 15*, *22*. *Section 22* permits service of process in a non-forum district as long as the venue provision is met. *Section 15* provides that suit may be brought by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws in the district in which the defendant resides or is found or has an agent. *15 U.S.C.S. § 15*. *Section 22* provides: Any suit, action or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business. Venue under *15 U.S.C.S. §§ 15*, *22* must be properly established as to each defendant, and cannot be based upon allegations that the defendant's co-conspirators were found there, or transacted business there, or that all the conspirators are agents for each other.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > General Overview

Civil Procedure > Preliminary Considerations > Venue > Agents

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN6[] **Racketeer Influenced & Corrupt Organizations, Claims**

The Racketeer Influenced and Corrupt Organization (RICO) Act venue provision is 28 U.S.C.S. § 1965. 28 U.S.C.S. § 1965(a) provides: Any civil action or proceeding under RICO against any person may be instituted in the district court of the United States for any district in which such person resides, is found has an agent, or transacts his affairs.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Antitrust & Trade Law > Clayton Act > General Overview

HN7[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The Racketeer Influenced and Corrupt Organizations (RICO) statute was patterned after the Clayton Act. Accordingly, the analysis the court conducts with regard to whether each of the defendants "is found," "has an agent," or "transacts business" in the district for the purposes of the antitrust laws, will be adopted for the purposes of RICO. The "transacts his affairs" language of the RICO statute has been interpreted to mean the same thing as the "transacts business" language of the antitrust statute.

Business & Corporate Law > ... > Corporate Formation > Place of Incorporation > Principal Office

Civil Procedure > Preliminary Considerations > Venue > Corporations

Governments > State & Territorial Governments > Licenses

HN8[] **Place of Incorporation, Principal Office**

A corporation "resides" in a district where it is incorporated or licensed to do business, is actually doing business in that state or has its principal place of business there.

Civil Procedure > Preliminary Considerations > Venue > Corporations

HN9[] **Venue, Corporations**

A corporation is said to be an inhabitant of the state of its incorporation.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN10[] Antitrust & Trade Law, Clayton Act

The "transacts business" provision does not appear in *15 U.S.C.S. § 15*. It does, however, appear in *15 U.S.C.S. § 22*, which applies solely to corporations.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

HN11[] Antitrust & Trade Law, Clayton Act

A corporation transacts business in a district for purposes of the antitrust statute if in fact, in the ordinary and usual sense, it "transacts business" therein of any substantial character.

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

Civil Procedure > ... > Service of Process > Methods of Service > Service on Corporations

HN12[] Venue, Corporations

An alien corporation may be sued in any district under the general venue statute. *28 U.S.C.S. § 1391(d)*. However, the alien venue provision does not establish personal jurisdiction in any federal district court. Instead, alien corporations may be sued in any district where valid service of process can be made against the alien corporation.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

HN13[] Private Actions, Racketeer Influenced & Corrupt Organizations

Attendance at an occasional trade fair is insufficient to be "transacting business" in the District of Columbia for the purposes of *18 U.S.C.S. § 1965(a)*.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN14[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Venue under the "transacts his affairs" provision of *18 U.S.C.S. § 1965(a)* connotes the same type of substantiality and regular contact required for the "transacts business" prong of *15 U.S.C.S. § 22*. Under *18 U.S.C.S. § 1965(a)*, a person transacts his affairs within a particular district when he regularly conducts business of a substantial character within that district.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN15[] **Antitrust & Trade Law, Clayton Act**

In order to be "found" within a district, for the purposes of *15 U.S.C.S. §§ 15*, *22*, a corporation must engage in greater activities than required to be "transacting business" there. A corporation is found in a district where it has presence and continuous local activities.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN16[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

18 U.S.C.S. § 1965(b) provides: In any action under *28 U.S.C.S. § 1964* ("Civil Remedies"), in any district court of the United States in which it is shown that the ends of justice require that other parties residing in any other district be brought before the court, the court may cause such parties to be summoned, and process for that purpose may be served in any judicial district of the United States by the marshal thereof.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN17[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

28 U.S.C.S. § 1965(b) operates as a waiver of applicable venue requirements if the "ends of justice" so require.

Civil Procedure > ... > Venue > Federal Venue Transfers > Improper Venue Transfers

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > ... > Venue > Federal Venue Transfers > General Overview

HN18[] **Federal Venue Transfers, Improper Venue Transfers**

28 U.S.C.S. § 1406(a) provides: The district court of a district in which is filed a case laying venue in the wrong division or district shall dismiss, or if it be in the interest of justice, transfer such case to any district or division in which it could have been brought.

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN19[] **Venue, Multiparty Litigation**

The convenience of the plaintiff is not a factor in determining proper venue.

Opinion by: [*1] HOGAN

Opinion

MEMORANDUM OPINION

THOMAS F. HOGAN, UNITED STATES DISTRICT JUDGE

This case is before the Court on the motions by defendants Akzo, N.V., Azeem, Matkari, Par Pharmaceuticals, Inc., Patel, Pharmaceutical Basics, Inc., Shah, and Vegesna to dismiss for lack of personal jurisdiction and improper venue, pursuant to *Federal Rules of Civil Procedure 12(b)(2)* and *12(b)(3)*. In consideration of the motions, the numerous pleadings, [1] the entire record of the case, the arguments made at the hearing, and for the reasons stated below, the Court shall transfer this case to the United States District Court for the District of Maryland in the interest of justice, pursuant to *28 U.S.C. § 1406(a)*. The Court finds it unnecessary to rule upon the motions to dismiss for lack of personal jurisdiction. [2]

[*2] *BACKGROUND*

Plaintiff Mylan Laboratories, Inc. ("Mylan") filed this complaint for damages for violations of the federal anti-trust laws, *15 U.S.C. § § 1 et seq.*, violations of and conspiracy to violate the federal Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. § § 1961 et seq.*, and unfair competition and tortious interference with prospective

[1] The Court notes that there were at least 21 pleadings filed on the issues of personal jurisdiction and venue.

[2] Additionally, the Court shall not reach the following motions filed by the defendants: any motions to dismiss based on insufficiency of process or insufficiency of service of process; any motions to dismiss for failure to plead fraud with particularity; any motions to strike portions of the complaint; or, any motions to dismiss for failure to state a cause of action.

business relations against the following defendants: Akzo, N.V. ("Akzo"); Pharmaceutical Basics, Inc. ("Pharmaceutical Basics" or "PBI"); Par Pharmaceuticals, Inc. ("Par"); Quad Pharmaceuticals, Inc. ("Quad"); American Therapeutics, Inc. ("ATI"); Vitarine Pharmaceuticals, Inc. ("Vitarine"); Raj Matkari ("Matkari"); Ashok Patel ("Patel"); Dilip Shah ("Shah"); Raju Vegesna ("Vegesna"); Mohammed Azeem ("Azeem"); Charles Chang ("Chang"); and David Brancato ("Brancato"). The factual basis of this civil suit stems from the on-going criminal prosecutions and investigations by the United States Attorney for the District of Maryland of persons allegedly participating in the bribery of officials employed by the Federal Drug Administration, headquartered in Maryland. The bribery scheme allegedly was centered around the application **[*3]** approval process of the Division of Generic Drugs, which was administered at the FDA in Maryland. All of the defendants are allegedly involved, in one way or another, in the generic prescription drug industry.

Cutting away the complaint to its core, a difficult task given its voluminous nature, [3] Mylan alleges that there was a conspiracy between the defendants to bribe officials of the FDA, which caused Mylan's drugs to be approved more slowly than drugs of companies on whose behalf bribes had been paid. This conspiracy allegedly damaged Mylan because it suffered a competitive disadvantage in the marketplace.

ANALYSIS

HN1[] Ordinarily, a Court considers the question of personal jurisdiction before considering the issue of proper venue. However, when there is sound prudential justification for doing so, a Court may reverse the normal order of its consideration and address venue before personal jurisdiction. *Leroy v. Great Western United Corp., 443 U.S. 173, 180 (1978)*. In this case, involving thirteen defendants, eight of whom have filed both motions to dismiss for lack of personal jurisdiction and for improper venue, the Court would have **[*4]** to undertake a lengthy and difficult analysis to reach a decision on personal jurisdiction. Were the Court to embark on such an analysis of personal jurisdiction and find that personal jurisdiction existed, the Court would still be obligated to address the venue challenges it decides today. The Court finds it unnecessary and inappropriate to engage in such an analysis regarding personal jurisdiction when it is so clear that venue is improper in the District of Columbia.

Mylan has suggested that "[t]his Court should cut through the smoke screen of meritless legal technicalities which these corporate defendants have raised and hold them fully responsible for their conduct." Mylan's Opposition to the Motions of Par and PBI at 1. The Court, while not condoning the alleged actions of the defendants, views the venue provisions as more than "meritless legal technicalities," and will proceed to examine defendants' objections to District of Columbia venue.

Mylan asserts that venue is proper in the District of Columbia based on three provisions: the general venue statute, *28 U.S.C. § 1391(b)*; the venue provisions of the Clayton Act, *15 U.S.C. § § 15* and *22*; and the venue provision of the RICO **[*5]** Act, *18 U.S.C. § 1965*. Since the legal analysis for each provision rests upon factual allegations, the Court will outline the factual allegations here, and analyze them in due course.

Parties

Plaintiff Mylan is a Pennsylvania corporation, with its principal place of business in West Virginia. Mylan is engaged in the development, manufacture, sale, and distribution of generic prescription drugs.

Akzo is a Netherlands corporation, with its principal place of business in the Netherlands. Akzo allegedly conducts business in the United States and is the parent company of defendant Pharmaceutical Basics.

Pharmaceutical Basics is a Delaware corporation, with its principal place of business in Illinois. Prior to 1986, PBI's principal place of business was in Colorado. in 1986, defendant Akzo allegedly acquired PBI.

---

[3] The complaint numbers 213 pages.

Par is a New Jersey corporation, with its principal place of business in New York. Par is allegedly the parent company of defendant Quad. On July 19, 1989, Par pleaded guilty in the United States District Court for the District of Maryland to paying an illegal gratuity to defendant Chang.

Quad is an Indiana corporation, with its principal place of business in Indiana. On July **[*6]** 19, 1989, Quad pleaded guilty in the United States District Court for the District of Maryland to paying an illegal gratuity to defendant Chang.

American Therapeutics is a Delaware corporation, with its principal place of business in New York.

Vitarine is a Delaware corporation, with its principal place of business in New York.

Raj Matkari is an individual who resides in Colorado. He was a vice president for regulatory affairs and product development for PBI. Matkari has entered a plea of guilty in the United States District Court for the District of Maryland for paying an illegal gratuity to defendant Chang, in violation of *18 U.S.C. § 201(c)(1)(A)*.

Ashok Patel is an individual who resides in New York. He was a senior vice president of Par. On July 17, 1989, Patel entered a guilty plea in the United States District Court for the District of Maryland to paying an illegal gratuity to Charles Chang "[o]n or about September 15, 1987, in the State and District of Maryland," in violation of *18 U.S.C. § 201(c)(1)(A)*. *See* Information, Exhibit 2 to Patel's Motion to Dismiss. Patel states that he has never lived, worked, maintained a place of business, or owned real estate or other property **[*7]** in the District of Columbia.

Dilip Shah is an individual who resides in Indiana. He was president and chief executive officer of Quad. On July 18, 1989, Shah entered a guilty plea in the United States District Court for the District of Maryland to paying an illegal gratuity to Charles Chang "[o]n or about September 15, 1987, in the State and District of Maryland," in violation of *18 U.S.C. § 201(c)(1)(A)*. *See* Information, exhibit 2 to Shah's Motion to Dismiss.

Raju Vegesna is an individual who resides in New York. He was president and a chief executive officer of ATI.

Mohammed Azeem is an individual who resides in New York. For a time, he was a consultant to defendant ATI.

Charles Chang is an individual who resides in Maryland. He is a former FDA employee, who was a supervisory chemist in the Generic Drug Division of the FDA, located in Maryland.

David Brancato is an individual who resides in Maryland. He is a former chemist in the Generic Drug Division of the FDA, located in Maryland. On May 17, 1989, Brancato pleaded guilty in the United States Court for the District of Maryland to accepting a series of illegal cash payments from defendants Patel and Shah.

Alleged Conspiracy

[*8] The factual basis of plaintiff's claim was not significantly developed when Mylan filed the complaint, or when it responded to the numerous motions to dismiss. The complaint and rests primarily on facts gleaned from press releases of and prosecutions by the United States Attorneys Office for the District of Maryland, and various affidavits filed with the Court. In its Opposition to Defendant Matkari's Motion to Dismiss, Mylan asserted that it based its claims of conspiracy on "admissions of wrongdoing by both Matkari and other co-defendants in this case such as Brancato and Chang." Mylan's Opposition to Matkari's Motion to Dismiss at 2 n.1. [4] Mylan has attached copies of various Press Releases from the United States Attorney for the District of Maryland to its pleadings as exhibits. [5] The press releases, obviously not prepared in preparation for the motions now pending before this Court, are not always specific with regard to the location of various criminal conduct, some of it admitted, some of it alleged, of the defendants now before this Court. The only specific locations of activity by any of the defendants are

[4] All of the admissions of wrongdoing involve actions in Maryland. Although Mylan filed this brief on July 11, 1989, it referred to this description of its factual basis for its claims in a brief filed as late as October 13, 1989, just prior to the hearing on the Motions to Dismiss.

[5] *See,* e.g., Exhibits A, B, C, D, E, F to Mylan's Opposition to Matkari's Motion to Dismiss.

in Maryland. The press releases identify numerous meals attended **[*9]** by only a few of the defendants before this Court at restaurants in Maryland. [6] Additionally, significant conduct allegedly occurred at the FDA in Maryland, including the review, recommendation for approval, and approval of drug applications submitted by the corporate defendants to the FDA, located in Maryland. This activity at the FDA was conducted by defendants Chang and Brancato, who are both residents of the state of Maryland.

[*10] Mylan alleges that while Vegesna was serving as President and Chief Executive Officer of defendant ATI, he took Chang, an FDA branch chief, on an all-expenses-paid trip around the world in the summer of 1987. There is no indication that this trip included a visit to the District of Columbia. This trip was allegedly paid for by defendants ATI, Vegesna, and Azeem, who was serving as a consultant to ATI. Mylan alleges that Azeem flew from New York to Hong Kong and back to New York, paid for $ 3,1721.57 in airline tickets and for a hotel room at the direction of defendant Vegesna. Complaint para. 94(A)(1). Vegesna also allegedly purchased a series of gifts, including furniture and computers, for Chang. Mylan's Opposition to Vegesna' Motion to Dismiss at 2 n.1, citing Complaint at paras. 17, 94(a)(1), (2). These purchases occurred in Maryland and New York. There is no indication that any purchases were made in the District. *See* Exhibit D to Mylan's Opposition to Matkari's Motion to Dismiss.

Based on the press releases, and the information contained in the complaint, a substantial number of bribes were paid in the course of meals eaten at various restaurants located in the Bethesda **[*11]** and Rockville areas Of Maryland. In September, 1986, Chang, Brancato, Shah, and Patel allegedly ate dinner in a restaurant in Bethesda, Maryland. During this dinner, Shah allegedly handed Brancato an envelope containing approximately $ 3,000. On one occasion, during November, 1987, Chang allegedly invited Brancato to Chang's home in Maryland, to meet with Vegesna and Azeem. Brancato Affidavit, Exhibit A to Mylan's Opposition to Vegesna's Motion to Dismiss ("Brancato affidavit"). [7] Following the meeting, Vegesna, Azeem, and Chang had dinner in a restaurant located in Rockville, Maryland, at which Vegesna allegedly slipped $ 5,000 to Brancato. Azeem allegedly picked up the dinner tab. Second Brancato Affidavit, February 16, 1990.

In its complaint, Mylan does not identify a single overt act which occurred in the District of Columbia. The only two allegations of overt activity in the District of Columbia are contained in two affidavits of David Brancato, one of the defendants in this action. The first affidavit was filed **[*12]** fortuitously just four days before the hearing scheduled on these motions. [8] The second affidavit was filed after the hearing, when the Court allowed supplemental evidence to be filed. The October 13, 1989 affidavit of defendant Brancato asserted that during June, 1987, he ate dinner with defendants Patel, and Shah at Mr. K's restaurant in Washington, D.C. Brancato asserts that during the dinner, Shah dropped an envelope containing between $ 1,000 and $ 2,000 in cash into his briefcase. At the conclusion of the dinner, Brancato alleges that either Patel or Shah paid the dinner check. Affidavit of David J. Brancato, Exhibit A to Mylan's Opposition to Vegesna's Motion to Dismiss. In a later affidavit, filed on February 16, 1990, Brancato

---

[6] Meals attended by defendants Chang, Brancato, Patel and Shah, at which illegal gratuities were paid, occurred "at restaurants in the Rockville [located in Maryland] area." Matkari and Chang had a meeting "at the Bethesda Marriott Hotel in Bethesda, Maryland where [Matkari] gave Mr. Chang an envelope containing $ 2,000 in currency." No mention is made of any payments in the District of Columbia at all. *See* Press Release From the United States Attorney for the District of Maryland, May 17, 1989, Exhibit C to Mylan's Opposition to Matkari's Motion to Dismiss.

[7] Brancato suggests that this meeting was in response to Chang's statement to him that Vegesna wanted to "do something for [him]." Brancato Affidavit at para. 9.

[8] The first Brancato affidavit was filed in response to affidavits filed by defendants Patel and Shah.

Defendant Patel asserted in his affidavit that "I have never travelled to the District of Columbia to transact business with FDA officials or employees either as an individual or as a representative of Par. . . . All of my business with representatives of the FDA, including Charles Chang and David Brancato, was conducted in the State of Maryland. No business was conducted with FDA officials within the District of Columbia." Affidavit of Ashok Patel in Support of Motion to Dismiss at para. 6.

Defendant Shah asserted in his affidavit that "I never have given either Chang or Brancato anything of value in the District of Columbia." Affidavit of Dilip Shah in Support of his Motion to Dismiss at para. 9.

asserts that he ate dinner with Shah and Patel in Washington, D.C. During this dinner, Shah allegedly gave Brancato approximately $ 2,000, and paid for the dinner.

[*13] The other alleged District of Columbia activities focus on the alleged sale of drugs in the District of Columbia by the corporate defendants in this action. Mylan's primary factual basis for the structure and extent of defendants' drug sales is obtained from information from the defendants themselves, and an affidavit submitted by Roderick P. Jackson, the Vice President of Marketing and Sales for Mylan. Mylan's Opposition to Matkari's Motion to Dismiss, Exhibit G. The Court finds that the Jackson affidavit contains no information or assertions which could lead the Court to find venue in the District for any of the defendants who currently have filed motions to dismiss for lack of venue. [9] The Jackson affidavit, referred to throughout Mylan's filings in opposition to the Motions to Dismiss, primarily contains information regarding *Mylan's* drug sales, not any of the sales of the defendants. To the extent it contains information regarding the drug sales of Akzo, PBI, or Par, the affidavit contains only vague and insubstantial allegations regarding defendants' alleged indirect drug sales in the District of Columbia. [10] The affidavit contains no specific names of companies, drugs, **[*14]** or quantities of sales. The assertions regarding the defendants are replete with disclaimers such as "to the best of my knowledge and belief," and the connections between the defendants and any of their drugs finding their way to the District are through numerous unnamed intermediaries. The Court finds it inappropriate to rely on Jackson's vague assertions to find venue proper for any of the defendants under any of the venue provisions by virtue of these alleged "indirect" drug sales in the District of Columbia.

[*15] *The General Venue Statute, 28 U.S.C. 1391(b)*

---

[9] Mr. Jackson states that "[t]he purpose of this affidavit is to establish that the products of Mylan . . . as well as those defendants in this action -- . . . [Akzo, PBI, Par, Quad, ATI, and Vitarine] are sold in the District of Columbia." para. 2.

[10] Mr. Jackson asserts that there are three ways that "Mylan, as well as other generic drug companies" market their drugs, each of which allegedly leads to sales of drugs in the District. These three ways are: one, by selling to national or regional distributors who in turn sell drugs primarily to independent pharmacies or small chains; two, by selling to local wholesalers which in turn sell to chain or independent drug stores which do not maintain their own drug warehouses; and three, by selling drugs directly to drug store chains which maintain their own warehouses. para. 4.

In category one, Jackson's assertion regarding the defendants is "[t]o the best of my knowledge and belief, in addition to the drugs that defendants . . . sell through Mason [a national distributor which buys from Mylan], some or all of them also sell quantities of drugs to many, if not all, of the national distributors listed in para. 8 [none of which are defendants], as well as other national and regional distributors.

To the best of my knowledge and belief, each of the national distributors listed in para. 8, as well as other national and regional distributors, sells drugs to retailers for ultimate resale in the District of Columbia. To the best of my knowledge and belief, some or all of the defendants . . . have sold drugs to the companies listed in para. 8, as well as other national and regional distributors, for ultimate resale within the District of Columbia. *See* paras. 11, 12.

In category two, Jackson's assertions regarding the defendants' sale of drugs is limited to the following general, vague information: "[t]o the best of my knowledge and belief, some or all of the defendants . . . presently sell drugs through District Wholesale. To the best of my knowledge and belief, similar sales occurred during all of the years relevant to the complaint. To the best of my knowledge and belief, a portion of these drugs were resold in the District of Columbia. . . . To the best of my knowledge and belief, the sales . . . include sales of some of the drugs listed [in the complaint] . . . as well as numerous other drugs." paras. 20, 21.

In category three, Jackson's assertions regarding defendants' drug sales in the District of Columbia are similarly vague and insubstantial: "[t]o the best of my knowledge and belief, some or all of the defendants . . . have sold drugs to the companies listed in para. 24 [three companies to which *Mylan* sells] for ultimate resale within the District of Columbia. . . To the best of my knowledge and belief, the sales . . . include sales of some of the drugs listed in [the complaint] . . . as well as numerous other drugs." paras. 28, 29.

In this case, **HN2**[] the Court's jurisdiction is not founded solely on the diversity of citizenship. Accordingly, venue is proper "only in the judicial district where all defendants reside or in which the claim arose, except as otherwise provided by law." *28 U.S.C. § 1391(b)*. [11] Since there is no district where all the defendants reside, the Court must determine whether. or not plaintiff's claim arose in the District of Columbia.

HN4[] In the usual case, a claim arises in only one specific district. *Leroy v. Great Western United Corp., 443 U.S. 173, 185 (1978)*. In determining where "the claim arose," a Court should be guided by a review of "events having operative significance in the case, and a commonsense appraisal of the implications of those events for accessibility to witnesses and records." Additionally, venue is conferred on a district "where a substantial portion of the acts **[*16]** or omissions giving rise to the actions occurred, notwithstanding that venue might also lie in other districts." The substantiality of the operative events must be determined by assessment of their ramifications for efficient conduct of the suit. *Lamont,* 590 F.2d at 1134-1135. Venue must be established independently as to each defendant and as to each cause of action. *Lamont v. Haig, 590 F.2d 1124, 1135 (D.C. Cir. 1978)*. [12]

Two meals between some of the defendants in the District of Columbia and the weak allegations of drug sales of some of the corporate defendants do not rise to the level of substantiality required by the holdings of *Leroy, 443 U.S. 173 (1978)*, *Naartex Consulting Corn. v. Watt, 722 F.2d 779 (D.C. Cir. 1983)*, or *Lamont, 590 F. 2d 1124 (D.C. Cir. 1978)*. Further, there is no basis for a finding by this Court that maintaining this suit in the District of Columbia would contribute to the "efficient **[*17]** conduct of [this] suit." The great weight of significant events relating to this action occurred in Maryland: the FDA is located in Maryland, the application and approval processes for the drugs at issue in this case occurred in Maryland, and almost all of the alleged payments of gratuities took place in Maryland. All of the criminal indictments arising out of defendants' actions have been brought in the United States District Court for the District of Maryland, and are based on actions by defendants in Maryland. None of the parties to this action reside in the District of Columbia. *See* *Naartex, 722 F.2d 779, 789 n.17 (D.C. Cir. 1983)*.

Because the Court finds that the claim did not arise in the District of Columbia, venue is not proper in the District of Columbia under *28 U.S.C. § 1391*.

The Antitrust Venue Provisions, 15 U.S.C. § § 15 and 22 and The RICO Venue Provision, 18 U.S.C. § § 1965(a) and (b)

HN5[] The special venue provisions of the antitrust laws are *15 U.S.C. § § 15* and *22*. [13] *Section 22* permits service of process in a non-forum district as long as the venue provision is met. *Chrysler Corp. v. General Motors Corp., 589 F. Supp. 1182, 1195 (D.D.C. 1984)*, *citing Frederick* **[*18]** *Cinema Crop. v. Interstate Theatres Corp., 413 F. Supp. 840, 841-42 n.1 (D.D.C. 1976)*. *Section 15* provides that suit may be brought "by any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . in the district in which the defendant resides or is found or has an agent . . . ." *15 U.S.C. § 15*. *Section 22* provides:

Any suit, action or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business.

---

[11] **HN3**[] *28 U.S.C. § 1391(b)* provides:

A civil action wherein jurisdiction is not founded solely on diversity of citizenship may be brought only in the judicial district where all defendants reside, or in which the claim arose, except as otherwise provided by law.

[12] Since the Court has determined that the claim did not arise in the District of Columbia for purposes of *28 U.S.C. § 1391(b)*, it is not necessary for it to consider whether venue is proper as to each defendant under the general venue provisions.

[13] Congress' intent in enacting *15 U.S.C. § 22* was to expand the jurisdiction of the District Courts in antitrust suits beyond previous bounds of *15 U.S.C. § 15*. *Austad v. United States Steel Corp., 141 F. Supp. 437, 440 (D.Cal. 1956)*, citing *Eastman Kodak Co. v. Southern Photo Material Co., 273 U.S. 359 (1927)*.

Venue under 15 U.S.C. § § 15 and 22 must be properly established as to each defendant, and cannot be based upon allegations that the defendant's co-conspirators were found there, or transacted business there, or that all the conspirators are agents for each other. *See* Caribe Trailer Systems v. Puerto Rico Maritime Shipping Auth., 475 F. Supp. 711 (D.D.C. 1979). *See also* Piedmont Label Co. v. Sun Garden Packing Co., 589 F.2d 491 (9th Cir. 1979) (and cases cited therein).

[*19] The venue and jurisdiction provisions of RICO overlap, much in the same way as the antitrust provisions. ***HN6***[] The RICO venue provision is 28 U.S.C. § 1965. Subsection (a) provides:

(a) Any civil action or proceeding under [the RICO statute] against any person may be instituted in the district court of the United States for any district in which such person resides, is found has an agent, or transacts his affairs.

HN7[] The RICO statute was patterned after the Clayton Act. *See* Agency Holding Corp. v. Malley-Duff & Assocs., 483 U.S. 143 (1987) (RICO was modeled on the Clayton Act). Accordingly, the analysis the Court conducts with regard to whether each of the defendants "is found," "has an agent," or "transacts business" in the District of Columbia for the purposes of the antitrust laws, will be adopted for the purposes of RICO. The "transacts his affairs" language of the RICO statute has been interpreted to mean the same thing as the "transacts business" language of the antitrust statute. *Abeloff v. Barth, 119 F.R.D. 315, 326 (D. Mass. 1988)*.

Since none of the defendants resides [14] in or is an inhabitant [15] of the District, the Court must examine whether any of the defendants "is **[*20]** found," "has an agent," "transacts business," or "transacts his affairs" in the District.

Transacts Business and Transacts his Affairs

HN10[] The "transacts business" provision does not appear in 15 U.S.C. § 15. It does, however, appear in 15 U.S.C. § 22, which applies solely to corporations. Accordingly, 15 U.S.C. § 22 cannot be used to confer venue in the District for any of the individual defendants, and the Court will consider it only as it applies to defendants Akzo, PBI, and Par. [16]

[*21] ***HN11***[] A corporation transacts business in a district for purposes of the antitrust statute "if in fact, in the ordinary and usual sense, it 'transacts business' therein of any *substantial* character." Chrysler Corporation v. General Motors Corp., 589 F. Supp. 1182 (D.D.C. 1984), quoting Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 373 (1927).

PBI asserts that it is not licensed to do business in the District, does not own, rent or lease any offices, production facilities or warehouses within the District. PBI states it has no officers, directors, employees or agents within the District, and does not have any bank accounts or telephone listings within the District. PBI's salespeople do not visit customers within the District, and PBI does not have any suppliers within the District. Affidavit of Daryl Johnson, Exhibit C to PBI's Motion to Dismiss, at paras. 4-5.

---

[14] ***HN8***[] A corporation "resides" in a district where it is incorporated or licensed to do business, is actually doing business in that state or has its principal place of business there. *Caribe Trailer Systems v. Puerto Rico Maritime, 475 F. Supp. at 716* (citation omitted).

[15] ***HN9***[] A corporation is said to be an inhabitant of the state of its incorporation. *Caribe Trailer Systems v. Puerto Rico Maritime, 475 F. Supp. 711, 716 (D.D.C. 1979)*.

[16] *15 U.S.C. § 22* cannot be used to confer venue in the District over defendants Matkari, Patel, Shah, Vegesna, Azeem, Chang, or Brancato, who are individuals. Additionally, the Court only considers *§ 22* as it applies to defendants Akzo, PBI, and Par, since they are the corporate defendants that have filed motions to dismiss based on improper venue.

PBI states that it is aware of only one PBI customer that is located in the District. Its sales to that customer amount to a total of about $ 7,000, or less than .0089% of PBI's sales for the period 1986-1988. PBI asserts that its sales of the drug Oxybutynin (the only drug named in Mylan's complaint **[*22]** that this District customer has purchased from FBI) amounted to $ 232 in 1988 and $ 110 from January to August, 1989. These sales of Oxybutynin apparently represent .0005% of PBI's 1988 revenues and .00027 of PBI's 1989 revenues. *Id.* at paras. 5 and 6. [17]

The Court finds that these FBI drug sales in the District do not rise to the level of substantiality required for venue to be proper as to PBI under the "transacts business" prong of *15 U.S.C. § 22*. [18]

[*23] Mylan asserts that venue is proper in the District of Columbia over Akzo, based on the actions of Akzo's subsidiary, PBI. [19] The Court has found that there is no basis for venue in the District of Columbia under the "transacts business" clause of *15 U.S.C. § 22* for defendant PBI. Thus, Mylan's assertion that venue is proper in the District of Columbia as to Akzo must fail. [20]

[*24] Par pleaded guilty to paying an illegal gratuity to defendant Chang, for acts in Maryland. These Maryland acts cannot be the basis for proper venue in the District of Columbia. Par asserts that it has never had any office, production facilities, warehouse, or other premises in the District of Columbia, has never rented or leased, any real property within the District, and does not have any personal property in the District. Par claims that it does not pay, and has never paid, any income taxes, franchise taxes, or other local taxes to the District of Columbia, that it has never been licensed to do business in the District, and has no registered agent for service of process in the District. Par further contends that it does not maintain any bank accounts, or telephone listings in the District, and that it has never solicited business in, or conducted advertising in, the District. Affidavit of Richard J. Nadler, Exhibit A to Par's Motion to Dismiss at paras. 3-8.

---

[17] FBI asserts that it sold its products to three drugstore chains outside the District. FBI believes that these chains operate drugstores within the District, in addition to other states. FBI contends that it does not have knowledge of or control over where the drugstore chains sell the products they purchase from FBI. *Id.,* at para. 7.

[18] The Court has already rejected reliance on Mylan's arguments regarding the "indirect" sales of drugs of defendants which were averred to in the affidavit submitted by Roderick P. Jackson. Accordingly, the Court will limit its analyses of the defendants' business transactions in the District to their direct sales.

The Court also finds unpersuasive Mylan's other arguments regarding this Court's proper venue. In particular, the Court rejects the following vague assertion: "[i]n a July 11, 1989 hearing before the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce, Dr. Marvin Seife, the Director of FDA's Division of Generic Drugs, testified under oath that he had received information that defendant Chang had met with an executive of defendant . . . ATI within the District under circumstances strongly suggesting that the meeting was part of the conspiracy alleged in the Complaint." Mylan's Opposition to Par and PBI at 8.

[19] Mylan also argues that venue is proper in the District of Columbia for Akzo based on Akzo's own actions. However, all of the actions of Akzo to which Mylan points refer to business activities in the United States and North America. (*See*, e.g. "During 1988, Akzo had approximately $ 1.35 billion in sales and employed 8900 people in North America." "In 1988 alone, Akzo invested an additional $ 125 million . . . in North America." Akzo has begun work on, opened or taken over at least three new plants in the United States [in California and Michigan]." Mylan's Opposition to Akzo's Motion to Dismiss at 7-9. Actions which are identified as taking place in North America or the United States cannot be the basis for proper venue in the District of Columbia.

[20] The Court realizes that Akzo has substantial arguments regarding any Court's jurisdictional over Akzo by virtue of its subsidiary PBI. Since Akzo is ***HN12***[] an alien corporation, it may be sued in any district under the general venue statute. *28 U.S.C. § 1391(d)*. However, the alien venue provision does not establish personal jurisdiction in any Federal District Court. Instead, alien corporations may be sued in any district where valid service of process can be made against the alien corporation. *Weinstein v. Norman M. Morris Corporation, 432 F. Supp. 337 (E.D. Mich. 1977)*.

However, this Court will leave resolution of these arguments to the District Court for the District of Maryland. For now, this Court merely holds that since venue is improper as to PBI, there can be no basis for venue in the District of Columbia as to its parent company, Akzo, given that the only asserted basis for venue over Akzo was through PBI.

In the last six years, Par states that it sold approximately $ 23,000 worth of pharmaceutical products to purchasers located in the District. [21] Par's total sales in the past six years amounted to $ 231,000,000. Thus, according **[*25]** to Par, its sales in the District from 1984 to 1989 amounted to less than 0.01% of Par's total sales during these years. *Id.,* at 9-12. The Court finds Par's business transactions in the District of Columbia to be insubstantial. Thus, venue is improper under *15 U.S.C. § 22* in the District as to defendant Par.

The only analysis not already conducted under the venue provisions of the ***antitrust law*** is whether any of the individual defendants who have filed motions to dismiss for improper venue, that is, defendants Azeem, Matkari, Vegesna, and Shah, "transacted his affairs" in the District of Columbia for purposes of *18 U.S.C. § 1965*.

Azeem is a resident of New York, and for a time was a consultant to ATI, a Delaware Corporation with its principal place of business in New York. Azeem states that he does not have an agent in the District, nor does he transact any business here. Azeem states that he does not contract to supply services in the District of Columbia, does not engage in any persistent course of conduct in the District, and does not derive substantial revenue from goods consumed in **[*26]** the District. Azeem's Motion to Dismiss at 8-9.

Mylan's assertions of District of Columbia venue over defendant Azeem rely almost exclusively on a co-conspirator theory of venue ("defendants Patel, Shah, and Azeem have transacted, and continue to transact business, in the District through their multiple co-conspirator theory." Mylan's Opposition to Azeem, Patel and Shah at 8. This Court has rejected this theory, relying on *Caribe.* Mylan's briefs are often so rambling, the Court has found it difficult to find exactly on what other facts Mylan bases its arguments of proper venue as to Azeem. [22] In fact, in the section of its opposition to the motion to dismiss by Azeem on the RICO and Antitrust statutes, there is not a single specific reference to Azeem. In other sections of Mylan's opposition, Mylan refers to the around the world trip of Chang, paid by Azeem, ATI and Vegesna. There is no allegation that this trip included a stop in Washington, D.C., or that it was paid for in the District of Columbia. Based on the foregoing, the Court finds that defendant Azeem does not transact his affairs in the District of Columbia for the purposes of the RICO venue provision, *18 U.S.C. § 1965(a)*. **[*27]**

Matkari is a an individual who resides in Colorado. He was a Vice President for Regulatory Affairs and Product Development for PBI, a Delaware corporation with its principal place of business in Illinois. Matkari pleaded guilty to paying an illegal gratuity to defendant Chang in the state of Maryland. Mylan's assertions with regard to venue as to defendant Matkari are as vague and insubstantial as those regarding defendant Azeem, and rely on the alleged contacts with the District by Matkari's alleged co-conspirators ("defendant Matkari has transacted and continues to transact business in the District through his multiple coconspirator agents." Mylan's Opposition to Matkari at 6). [23] The Court rejects this theory of proper venue. Thus, the Court finds that there is no basis for finding that defendant Matkari "transacted his affairs" in the District for the purposes of *18 U.S.C. § 1965(a)*.

[*28] Defendant Vegesna is an individual who resides in New York. He was a chief executive officer of ATI, a Delaware corporation with its principal place of business in New York. Putting aside Mylan's co-conspirator basis for proper venue in the District, Mylan puts forth three specific bases for proper venue in which defendant Vegesna

---

[21] Only a portion of these sales were of Par products identified in Mylan's complaint.

[22] Mylan chose to respond to Azeem's motion to dismiss for lack of jurisdiction and improper venue along with its opposition to similar motions by defendants Patel and Shah.

[23] Mylan puts forth several other weak arguments, including:

"[t]he illegal activity which Matkari has already admitted occurred in nearby Bethesda, Maryland. It is likely that defendant Matkari, who traveled from Colorado to pay the cash to defendant Chang, traveled through or stayed in the District during that trip." Mylan's Opposition to Matkari at 12. The Court will not rely on such hypothetical assertions to find venue proper in the District.

Mylan also asserted the interesting theory that "Matkari corrupted a federal government process, the ultimate control over which lay in the District." Mylan's Opposition to Matkari at 18. As defendant Matkari so aptly responded, "[n]ot surprisingly, no authority is cited for this unusual theory." Matkari's Reply at 17. As far as the Court is aware, there is none.

was directly involved: his involvement in paying for an around-the-world trip for Chang (which was not paid for in and did not include a trip to the District of Columbia); his purchase of furniture and other gifts for defendant Chang in New York and Maryland; and Vegesna's payment of $ 5,000 to defendant Brancato in the state of Maryland. Mylan's Opposition to Vegesna's Motion to Dismiss at 2 n.1. None of these establishes that Vegesna "transacted his affairs" in the District of Columbia for the purposes of *18 U.S.C. § 1965(a)*.

Defendant Patel is a resident of New Jersey, and was a Vice President of Par Pharmaceutical, Inc., a New Jersey corporation with its principal place of business in New York. Patel has never lived or worked in the District, does not own real estate or other property in the District, and has never maintained a place of business, office, **[*29]** street address, post office box, telephone listing or telephone number in the District. Affidavit of Ashok Patel, Exhibit A to Patel's Motion to Dismiss at paras. 1-5. Patel pleaded guilty to one count of violating *18 U.S.C. § 201(c)(1)(A)* in the District of Maryland.

Patel states that he occasionally attended some trade association conventions and FDA seminars in the District of Columbia, and these events may have included defendants Chang and Brancato. Id., at para. 7. However, ***HN13***[] attendance at an occasional trade fair is insufficient to be "transacting business" in the District of Columbia for the purposes of *18 U.S.C. § 1965(a)*. *Sunray Enterprises Inc. v. David C. Bouza & Assoc., 606 F. Supp. 116, 119 (S.D.N.Y. 1984)*.

The only activity which connects Patel to the District of Columbia was his attendance at two dinners with defendants Shah and Brancato. However, the Court finds these two dinners insubstantial, particularly when compared to the numerous other actions which Patel undertook in Maryland. ***HN14***[] Venue under the "transacts his affairs" provision of *18 U.S.C. § 1965(a)* connotes the same type of substantiality and regular contact required for the "transacts business" prong of **[*30]** *15 U.S.C. § 22*. [24] Under *18 U.S.C. § 1965(a)*, a person transacts his affairs within a particular district "when he *regularly* conducts business of a *substantial character* within that district." *Dody v. Brown, 659 F. Supp. 541, 545 (W.D. Mo. 1987)* (citations omitted, emphasis in the original). No such substantiality or regularity can be found based on just two dinners in the District of Columbia. Indeed, Patel states that he met with Chang and Brancato on several occasions in Maryland, both at restaurants and at the FDA, located in Maryland. Thus, the Court finds no basis for venue in the District of Columbia for defendant Patel under *18 U.S.C. § 1965(a)*.

[*31] Defendant Shah is a resident of Indiana, and was President and Chief Executive Officer of Quad, an Indiana corporation with its principal place of business in Indiana. Defendant Shah has never resided in the District, has never been employed here, and has never maintained a place of business in the District. Shah pleaded guilty to giving an illegal gratuity to an official of the FDA in the District of Maryland. Defendant Shah states that he regularly traveled to Rockville, Maryland to the FDA, when he was employed by Quad. Shah states that he traveled through the District on his way to the FDA in Rockville, and slept at hotels in the District. On two occasions, Shah joined Patel and Brancato for dinner in the District of Columbia, at which allegedly a bribe was paid. As was the case with Patel, the Court finds that these District of Columbia activities do not rise to the level of continuity and substantiality required to establish that Shah "transacted his affairs" in the District of Columbia.

Found

HN15[] In order to be "found" within the District, for the purposes of *15 U.S.C. § § 15* and *22*, a corporation must engage in greater activities than required to be "transacting business" **[*32]** there. *Chrysler Corn. v. General*

---

[24] The Court notes, without deciding on this basis, that several courts have questioned whether or not the contacts by a particular defendant with a district can be based on anything other than the defendant's personal affairs, not the affairs transacted on behalf of his employer. *See*, e.g. *Anchor Glass Container Corn v. Stand Energy Corp., 711 F. Supp. 325, 329 (S.D. Miss. 1989)* and *Bulk Oil (USA), Inc. v. Sun Oil Trading Co., 584 F. Supp. 36, 39 (S.D.N.Y. 1983)*. *But see* *Miller Brewing Co. v. Landau, 616 F. Supp. 1285, 1289 (D.C. Wisc. 1985)*.

Motors Corp., 589 F. Supp. 1182 (D.D.C. 1984) (citation omitted). A corporation is found in a district where it has presence and continuous local activities. Caribe Trailer Systems v. Puerto Rico Maritime, 475 F. Supp. 711 (D.D.C. 1979) (citation omitted). The Court has already found that there is no basis for venue in the District of Columbia over corporate defendants PBI, Akzo, or Par under the "transacts business" prong of 15 U.S.C. § 22 since none of these defendants transacted business in the District of a "substantial character." The Court has also found that venue is improper under the "transacts his affairs" prong of 18 U.S.C. § 1965(a). For the same reasons, the Court finds that defendants PBI, Akzo, Par, Azeem, Vegesna, Matkari, Patel, and Shah are not "found" in the District of Columbia for purposes of 15 U.S.C. § § 15 and 22. None of these defendants maintains a presence in the District of Columbia, nor do they have continuous local activities in the District of Columbia.

Agent

There is no basis for venue in the District of Columbia under the "agency" clauses of 15 U.S.C. § § 15 and 22 or 18 U.S.C. § 1965(a). Mylan's agency arguments **[*33]** rest on the theory that as co-conspirators, the defendants are agents of each other. The Court has repeatedly stated that it does not accept this theory for finding venue proper in the District of Columbia.

The RICO venue provision, 18 U.S.C. 1965(b)

The Court further finds that the ends of justice do not require that all of these defendants should be brought before this Court. **HN16**[] 18 U.S.C. § 1965(b) provides:

In any action under section 1964 of this chapter [28 U.S.C. § 1964, "Civil Remedies"] in any district court of the United States in which it is shown that the ends of justice require that other parties residing in any other district be brought before the court, the court may cause such parties to be summoned, and process for that purpose may be served in any judicial district of the United States by the marshal thereof.

HN17[] Section 1965(b) operates as a waiver of applicable venue requirements if the "ends of justice" so require. Anchor Glass Container Corp., 711 F. Supp. 325, 331 (S.D. Miss. 1989). The Court has found that venue is improper in the District of Columbia as to the eight defendants who filed a motion to dismiss based on improper venue. Given the absence of contacts **[*34]** with the District of Columbia by so many of the defendants and the absence of any need to litigate the case in the District of Columbia, the Court can think of no reason that the "ends of justice" would *require,* or even suggest, that the Court keep this action in the District of Columbia. Accordingly, the Court will decline plaintiff's invitation to find venue proper in the District based on 18 U.S.C. § 1965(b).

Transferring this Action to Maryland

Even though this Court has found that venue is improper in the District of Columbia, [25] it may transfer this case to the United States District Court for the District of Maryland, pursuant to **HN18**[] 28 U.S.C. § 1406(a), which provides:

The district court of a district in which is filed a case laying venue in the wrong division or district shall dismiss, or if it be in the interest of justice, transfer such case to any district or division in which it could have been brought.

[25] Even had this Court found that venue in the District of Columbia was proper as to some of the defendants, the Court would still exercise its discretion and transfer this case to the United States District Court for the District of Maryland, pursuant to 28 U.S.C. § 1404(a).

[*35] The Court is at a loss to discern why this case was brought in the District of Columbia, except, perhaps, for the fact that plaintiff's attorneys are located here. [26] Mylan's assertion that "[t]he District of Columbia is at the center of the controversy upon which this civil action is based" [27] is close to misleading. Mylan's argument for keeping this action in the District focuses primarily on the fact that the congressional subcommittee which is investigating corruption in the approval of generic drugs controls many of the relevant documents. However, if congressional investigation into the subject matter of a lawsuit could be the basis for maintaining an action in the District of Columbia, this Court would be inundated with law suits.

Instead, this Court finds persuasive the fact that all of the criminal proceedings involving the alleged bribery of FDA officials have taken place in the United States District Court for the District of Maryland. FDA is located in Maryland, and is the location of **[*36]** the application and approval process which Mylan complains was corrupted by the alleged conspiracy. The two former FDA officials who have been sued in this lawsuit reside in Maryland. The claims arose in Maryland. Most of the documentary evidence is located at the FDA, in Maryland. Although plaintiff argues that witnesses are "likely" to reside in the District of Columbia, the Court notes that they are just as "likely" to reside in Maryland, and potential FDA witnesses certainly work in Maryland. Not a single defendant named in this action resides in the District.

Further, this Court will not ignore state boundaries in deciding where a claim arose. [28] **[*37]** Merely because parties or witnesses may be closer to the United States District Court for the District of Columbia than to the United States District Court for the District of Maryland, located in Baltimore, Maryland, is not enough to keep this case in this Court. *Reuber v. United States, 750 F.2d 1039, 1053 (D.C. Cir. 1984)*. [29]

For the foregoing reasons, this entire case shall be transferred to the United States District Court for the District of Maryland in the interest of justice, pursuant to *28 U.S.C. § 1406(a)*. Although the complaint was hastily drafted, serious allegations against the defendants are raised. This case is only at its preliminary stages, even though it was filed in June, 1989, almost nine months ago. Despite the preliminary stage of litigation, numerous pleadings have been filed, and the case is progressing. The resources of the parties and the judiciary would be wasted were this action to be dismissed, with the need to have it refiled in Maryland.

CONCLUSION

For the foregoing reasons, the Court finds that venue is improper in the District of Columbia as to defendants Akzo, Azeem, Matkari, Par, Patel, PBI, Shah and Vegesna. In the interest of justice, the Court shall transfer this case to the United States District Court for the District of Maryland. An order accompanying **[*38]** this memorandum opinion is issued herewith.

Date: *26th March 1990*

ORDER - March 27, 1990, Filed

In accordance with the memorandum opinion issued herewith, and for the reasons stated therein, it is this *26th* day of March, 1990,

---

[26] ***HN19***[↑] The convenience of the plaintiff is not a factor in determining proper venue. *Leroy, 443 U.S. at 185*.

[27] *See* Mylan's Opposition to Matkari's Motion to Dismiss at 4.

[28] Mylan asserts that "[i]t is difficult to see why the ends of justice would require the empty *formality* of moving this proceeding such a short distance [to Maryland]." Mylan's Opposition to the Motions of Patel, Shah and Azeem to Dismiss at 18 (emphasis supplied). The Court rejects Mylan's characterization of moving this case to the District of Maryland as an "empty formality."

[29] The Court also notes that the United States District Court for the District of Maryland in Baltimore will consider sitting in Prince George's County or Montgomery County for the convenience of the parties.

ORDERED that this case shall be transferred to the United States District Court for the District of Maryland.

Opinion

DECISION AND ORDER

This non-jury antitrust matter arises out of a suit by numerous plaintiffs seeking a preliminary injunction barring a proposed acquisition by the owners of defendant Dunkin' Donuts, Inc. of 100% of the stock of defendant Mister Donut of America, Inc. Plaintiffs claim that this is a merger which violates *Sections 1* and *2* of the Sherman Act, *15 U.S.C.A. §§ 1*, *2*, and *Section 7* of the Clayton Act, *15 U.S.C.A. § 7*, and that it is contrary to state law. Suit is based upon the jurisdiction of this court, under *28 U.S.C.A. § 1331* and *28 U.S.C.A. § 1337*, and based upon the pendent jurisdiction this court may exercise over state law claims. The court entered an ex parte temporary restraining order late on Tuesday, February 13, 1990, and scheduled an immediate hearing on Thursday, February **[*2]** 15, 1990, to determine if the temporary restraining order should be continued and to provide evidence for any preliminary injunction that the court might later issue. After hearings on Thursday, February 15, 1990, and Friday, February 16, 1990, all counsel agreed to continue the temporary restraining order in full effect until an extended hearing on a preliminary injunction could be held starting on Monday, March 5, 1990. The court later extended the temporary restraining order until the date of this decision and ordered plaintiffs to post a $ 100,000.00 bond which they have done. The court ordered expedited discovery from February 16, 1990 to March 5, 1990, and conducted telephone conferences with counsel when necessary. Supplemental orders were issued on February 27, 1990 to clarify discovery matters and formalize the continuance of the temporary restraining order. Defendants have also filed a pretrial motion to dismiss claiming that the plaintiffs lack antitrust standing. We have deferred ruling on this motion until the writing of this decision. From the court hearings on February 15, 1990, February 16, 1990, and March 5, 1990 through March 16, 1990, as well as certain designated **[*3]** depositions, we make the following findings of fact and state conclusions of law pursuant to *Fed.R.Civ.P. 52(a)*:

FINDINGS OF FACT

1. This action is brought by 102 plaintiffs who are for the most part donut shop franchisees of Mister Donut of America, Inc. Plaintiffs are domiciled in the following states: Connecticut, Delaware, Florida, Indiana, Maryland, Massachusetts, Minnesota, Michigan, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, South Carolina, Texas, West Virginia and Wisconsin.

2. Defendant Dunkin' Donuts, Inc. ("Dunkin Donuts") is a Delaware corporation with its principal place of business in Randolph, Massachusetts. Dunkin' Donuts is a wholly owned subsidiary of defendant Allied-Lyons, PLC ("Allied-Lyons") which is a publically traded United Kingdon corporation.

3. Defendant Mister Donut of America, Inc. ("Mr. Donut") is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. Mr. Donut is is a wholly owned subsidiary of defendant International Multifoods Corp. ("International Multifoods") which is a Delaware corporation with its principal place of business in Minneapolis, Minnesota.

4. One of plaintiffs' **[*4]** first and principal witnesses, James W. Bower, Sr. ("Bower") of Waynesport, Pennsylvania, was a Mr. Donut franchisee from 1965 until the 1980s when he sold his Mr. Donut franchise to his sons. He currently operates Christy Associates, which is a buying group that provides flour, shortening and other supplies to some 300 to 350 Mr. Donut franchisees. Bower also owns stock in a construction business which builds and remodels fast-food shops. Plaintiffs' counsel offered Bower as an expert witness regarding donut marketing. Defense counsel had no objection but noted that Bower is an interested witness.

5. In his Christy Associates supply business, Bower testified that he covers the Northeastern states to as far south as Florida and west to the Mississippi. He said he must remain current with the donut shop markets and their operating conditions. He strictly supplies the Mr. Donut system.

6. Bower testified that Dunkin' Donuts was the first to start a buying group for its franchisees and that this enabled them to lower prices. In the mid-1980s, Mr. Donut followed suit and started its own buying group, which Bower runs. Bower says that Christy Associates does pass its savings **[*5]** along to its franchisee-customers, but that Mr. Donut's buying group does not have the size or the full company support that the Dunkin' Donuts group has.

7. Bower testified as to the importance, to a donut shop, of fresh donuts and fresh coffee. Donut shops have their own bakery on the premises and, in his view, they should produce fresh donuts every four hours.

8. Bower testified that he had attended meetings between Dunkin' Donuts' officials and Mr. Donut franchisees. At these meetings, he said, Dunkin' Donuts informed the Mr. Donut franchisees about their intent regarding their system. Plaintiffs' Exhibits 1, 2, 3 were documents which Bower received at these meetings.

9. In his testimony, Bower discussed the differences in the Dunkin' Donuts and Mr. Donut franchise systems. He said that the Dunkin' Donuts system was "tighter" and that the Mr. Donut system was more "entrepreneurial". Both chains collect a percentage of their franchisees' income to finance advertising campaigns, but the percentage collected by Mr. Donut is lower. Also, the initial fee to start up a Mr. Donut franchise is much lower than the initial fee needed to set up a Dunkin' Donuts franchise. Dunkin' **[*6]** Donuts' contracts also provide for periodic costly remodelings. Mr. Donut's contracts do not so provide. Mr. Donut also provides its franchisees with "area protection" of a one-mile radius. Dunkin' Donuts tends to own the real estate upon which the shops are located and leases it to the franchisee; Mr. Donut does not.

10. Bower testified that some Mr. Donut franchisees had borrowed money to buy real estate upon which to locate their shops. This would create a problem for them if they were unable to convert their shops into Dunkin' Donuts shops. Bower estimated that a typical Mr. Donut shop, without the real estate, would cost approximately $ 75,000.00. With real estate, the total cost could run between $ 250,000.00 to as much as $ 750,000.00.

11. Bower testified that at meetings between Dunkin' Donuts' officials and Mr. Donut franchisees, he learned that Dunkin' Donuts would want remodeling done, e.g., replacing old-fashioned "W" roofs on Mr. Donut shops. He estimated the average remodeling cost to be about $ 50,000.00. He said that the remodeling costs could work great hardship on some Mr. Donut franchisees. He testified that Dunkin' Donuts did say that it would **[*7]** make money available (1 1/2% above cost) for remodeling of Mr. Donut shops.

12. Bower then testified as to the types of enterprises that might be considered competitors of Mr. Donut. He said that, in his opinion, convenience stores could not be considered true competitors because of the inferior quality of their coffee. Donut shops offer quality coffee from 6:00 to 11:00 A.M. and coffee sales represent from 35 to 55% of their business. Donut shops specialize in donuts and "line extensions" such as muffins. "Ancillary products" like soups and sandwiches have not worked as well in expanding business. Such ancillary products are usually sold at lunch time - after the 6:00 to 11:00 A.M. "peak" period.

13. Bower said that some convenience stores offer donuts from local bakeries but there is really no comparison, even though convenience stores have wanted to break into the breakfast market. Dunkin' Donuts also supplies some convenience stores with donuts, but the price is controlled by the supplying franchisee, so in his opinion this makes the convenience store little more then just another "outlet" for Dunkin' Donuts rather than a true competitor.

14. Bower told the court that **[*8]** fast-food chains are not competitors, either. McDonald's does a breakfast business, but it is not a coffee and donuts-type of breakfast business. He said that McDonald's breakfast items do not diminish donut sales. He also said that in what is overall a generally shrinking donut sales market, donut shops' sales volumes have actually gone up.

15. Bower also discounted supermarkets as competition. Since the most donut sales made by donut shops are between 6:00 and 11:00 A.M., very few customers would opt to stand in supermarket lines to buy donuts then. Also, supermarkets do not stock the same quality of donuts.

16. Bower said that Mr. Donut's major competitor is Dunkin' Donuts. He said that the goegraphic locations where head-on competition between the two chains exists are: New England, Pittsburgh, almost all major Northeastern cities, Providence, Rhode Island and Cleveland. Some smaller chains exist in these locales, but Bower said that it is almost impossible for a chain to break into the market. In the past, larger chains, such as Amy Joy, Donuts Galore and Spudnuts had existed, but these no longer exist. Winchell's is a Western donut chain with about 9% of the **[*9]** United States market, he said.

17. Bower expressed an opinion that, if the planned acquisition is consummated, Dunkin' Donuts will put Mr. Donut out of business, will add money to its advertising budget, will increase its franchisees' advertising fee, and will overwhelm the areas in which they are located. No one else will be able to get into that market, he said.

18. Bower stated that he had received a copy of Plaintiffs' Exhibit 4, a letter of January 29, 1990 from Ralph Gabellieri of Dunkin' Donuts, to all Mr. Donut distributors and suppliers. After receiving this letter, Bower said that he thought that it would just be a matter of time before there was no need for him or for his business.

19. Bower testified that some of his suppliers were concerned about the pending acquisition. Distributors have also called him about the situation and he promised to keep them apprised of developments.

20. In January, 1990, Dunkin' Donuts' officers (Robert Rosenberg, Tom Schwarz and Ralph Gabellieri) met with Mr. Donut franchisees at a meeting in Florida. In February, 1990, Dunkin' Donuts' officers also met with Mr. Donut franchisees, this time in Massachusetts. At the Florida meeting, **[*10]** according to Bower, the Dunkin' Donuts officers said that they would not grant new Mr. Donut franchises unless they were obligated to do so by contract, and that they wished to convert Mr. Donut shops to Dunkin' Donuts shops over a five-year period. Also, a 5% minimum advertising fee was mentioned. According to Bower, the Dunkin' Donuts officer did not answer the problems posed by closing Mr. Donut franchises, other than saying that the franchisees could always sell. At the subsequent Boston meeting, more particulars were discussed.

21. Bower expressed an opinion that the Dunkin' Donuts' policies enunciated in Florida and Boston would make the Mr. Donut chain, as we now know it, disappear in a short period of time, say five years. Some franchisees would be able to convert to Dunkin' Donuts shops, but others would go out of business. He estimated that there were 105 Mr. Donut shops, located in close proximity (within 2 miles) to Dunkin' Donuts shops, who would not be able to convert. Some thirty-seven Dunkin' Donuts shops are within one mile of a Mr. Donut shop. The heaviest concentration of shops is found in the Northeastern United States.

22. Bower expressed an opinion **[*11]** that most of the remaining Mr. Donut shops will try to convert, but some will be reluctant to do so since they have already paid for a Mr. Donut franchise. He also opined that customers and other donut shops will be affected. Dunkin' Donuts will come to dominate the market, especially in the East, since there will be no real competition. Prices will be affected as will variety of products. Bower also said that many franchisees had received letters from consumers praising the quality of Mr. Donut's products over those of Dunkin' Donuts.

23. Bower expressed an opinion that the management of a corporate parent is very important to a business. He said there would only be a skeleton force of Mr. Donut personnel, if the planned acquisition goes through.

24. Bower said that Mr. Donut possesses proprietary information from its franchisees, e.g., sales volume information. There are also provisions to protect the confidentiality of manuals. Mr. Donut's system is itself a proprietary system.

25. Bower stated that the value of the Mr. Donut trademark, prior to the planned acquisition, was $ 25,000,000.00. He had learned of that figure when he was at a meeting in Minnesota, where **[*12]** he learned that Mr. Donut was up for sale. Twenty-five Million Dollars is what they thought they could get. Bower himself tried to put together a financial package to buy Mr. Donut, but he could not raise a sufficient pool of money.

26. Plaintiffs' witness Albert Richmond ("Richmond") of Attleboro, Massachusetts, is a Mr. Donut franchisee and a bakery division manager at Perkins Paper which is a supplier to the Mr. Donut chain. (Perkins Paper serves primarily all of New England). Since he is also a Mr. Donut franchisee, Mr. Donut is his account at Perkins Paper. Richmond testified that Mr. Donut constitutes a large part of Perkins' business ($ 5,000,000.00 out of $ 12,000,000.00). This large volume of Mr. Donut business enables Perkins Paper to buy goods by the truckload and thus to save money; Perkins Paper is then able to pass its savings along to its customers. Richmond testified that if the Mr. Donut business were lost, Perkins Paper would lose this economic advantage and prices would increase for its customers.

27. Richmond also testified as to other stores which he services for Perkins Paper. There are eighteen Donut-Makers' stores and 33 Honey-Do stores. Prices **[*13]** in these small chains are slightly lower ($ .10 to $ .30 lower) than those found at Mr. Donut or Dunkin' Donuts but this does not give him concern. He said that if Mr. Donut

disappeared and Perkins Papers' prices went up, these stores would be hard pressed to compete with Dunkin' Donuts.

28. Richmond identified a map which he had prepared with a William Donovan. The map had colored pins which stood for Mr. Donut (blue) and Dunkin' Donuts (green) shops in Massachusetts. Mr. Donovan had ascertained the Dunkin' Donuts locations from a booklet (Plaintiffs' Exh. 2) listing all the Dunkin' Donuts shops in eleven state regions.

29. Richmond stated that in his Mr. Donut shop in Massachusetts, he sells 65% coffee, 30% donuts and 5% croissants, juice, sandwiches, etc. In his view, he does not compete with any convenience stores, supermarkets or fast food stores. The nearest Dunkin' Donuts to his shop is two miles away. He and his staff check Dunkin' Donuts' prices one to two times a month. In his supply job, he is able to check the prices at Donut-Makers and Honey-Do. He never checks prices at McDonald's.

30. Plaintiffs' witness Jeffrey Lipe ("Lipe") of Brodheadsville, Pennsylvania, **[*14]** operates two Mr. Donut shops: one is a donut producer shop and the other is a "satellite" shop. They are located in Stroudsburg and East Stroudsburg, Pennsylvania, respectively. Lipe described his initial contact with Mr. Donut as a baker. Lipe always wanted to have a donut shop and as a young man tried to obtain a Dunkin' Donuts franchise, but he was turned down because of his immaturity. In December, 1986, he obtained his original Mr. Donut shop from the prior owner. In September, 1987, he opened the satellite store with money borrowed from a bank. His first shop had cost him $ 115,000.00; his second had cost him $ 23,000.00. He put in $ 25,000.00 of his own money. He said that he now owes the bank $ 121,000.00. Both shops have recently been renovated. It would cost $ 35,000.00 to $ 40,000.00 more to remodel further. He does not know if he could afford to convert to a Dunkin' Donuts store. There is already a Dunkin' Donuts near him in East Stroudsburg. He does not wish to increase his debt. Were he to become a Dunkin' Donuts store, it would wipe out his and his wife's paychecks from the business.

31. Lipe and his wife operate the donut business. He is a named plaintiff **[*15]** in this action. He has incorporated as "L.J.D., Inc." He is the President of the corporation and he and his wife own all shares. Their business dictates their salaries. At present, he and his wife each make $ 350.00 per week salary. He also said that he and his wife are personally liable on the bank loans they have taken out. He is aware of the differences between the Mr. Donut and the Dunkin' Donuts contracts, e.g., that Mr. Donut charges its franchisees a lower percentage for advertising.

32. Lipe stated that he does not believe he competes with local supermarkets and their frozen donuts. There are McDonald's places in his area which sell coffee. He does not know their prices as opposed to his own. He does have a drive-by window and has noticed that some persons will buy coffee from him after buying breakfast at McDonald's. He said that he does watch Dunkin' Donuts' prices.

33. Lipe said that he sells about 60-70% coffee and 30-40% donuts from 6:00 to 11:00 A.M. His "satellite" store had been called "Micky's Donuts" and this was a store that had failed. Since East Stroudsburg is a tourist area, the "Mr. Donut" name has value to tourists. Lipe stated that Mr. **[*16]** Donut gets his weekly sales reports and 4.9% for the franchise and 0.5% for the advertising.

34. Lipe said that he had heard Bower's testimony regarding Dunkin' Donuts' offer to extend financing, but he has not asked for any. Lipe said that Dunkin' Donuts' cost for advertising was higher than that of Mr. Donut, but he did not know of the sales figure produced by the Dunkin' Donuts' advertising. He did not think that, in his case, the advertising distinction would make much difference. His store in East Stroudsburg and the Dunkin' Donuts store are in "close proximity" in sales. He estimated that the Dunkin' Donuts store probably does not make 20-25% above his.

35. Plaintiffs' witness Paul Sattler ("Sattler") of Pittsburgh, Pennsylvania, operates a Mr. Donut shop in Carnegie, Pennsylvania. Prior to this, he had worked for five and a half years as a Mr. Donut District Manager in charge of 35 to 37 stores in an area bounded by Pittsburgh, Erie, and Cleveland. When he was laid off from this job a year ago, he advised a Mr. Donut franchise for eight months. In November, 1989, he purchased this franchise himself. He did so, unaware of Mr. Donut's intention to sell itself to Dunkin' **[*17]** Donuts, even though there had been a public announcement of the sale. He said that he had seen no such information published in the newspaper.

36. Sattler said that as a District Manager, he visited Mr. Donut stores and Dunkin' Donuts stores. He did not visit McDonald's places or WaWa's, Seven-Eleven's, or Wendy's. He never went to supermarkets, either. He does not regard a local convenience store, which is trying to sell cheaper coffee, as a competitor. Such coffee has had no effect on his business. He does, however, watch the prices at the Dunkin' Donuts stores in his area. He regards Dunkin' Donuts as the predominant competitor. There are two Dunkin' Donuts stores near his store: one is four miles away and the other, three miles away. He said that his store has higher sales.

37. Sattler said he regularly submits confidential material, such as sales data, to Mr. Donut. Sattler said that he is a plaintiff in this section and he is not withholding any franchise fees to Mr. Donut since the planned acquisition. Richmond and Lipe were recalled to the stand and also testified that they were not withholding any franchise fees.

38. Plaintiffs' witness William Donovan **[*18]** ("Donovan"), is a plaintiff in this action who, with his brother, under the name "Donovan Services, Inc.", owns four Mr. Donut shops in the Boston area. He and his family are involved in operating these stores.

39. Donovan testified that he attended the Boston meeting with Dunkin' Donuts' officials. He acknowledged speaking at this meeting, but denied threatening to take any certain course of action. He said that, at that meeting, he had received the book marked as Plaintiffs' Exhibit 2 which he had used to advise Richmond as to the Dunkin' Donuts' locations in Massachusetts and Rhode Island. He also used Plaintiffs' Exhibit 10 for Mr. Donut franchisees in helping Richmond make the map.

40. Donovan also said that he had attended the recent meeting with Dunkin' Donuts' officials in Florida. Donovan stated that while it was possible he might make more money as a Dunkin' Donuts store, he anticipated problems if he should want to convert his stores into Dunkin' Donuts stores. He foresaw problems with interlocking restrictive covenants and obtaining money for conversions. He said that his stores are located a quarter-mile from Dunkin' Donuts' headquarters and 1/8 mile from their **[*19]** training school.

41. Donovan's other stores are within two miles of a Dunkin' Donuts store. He also said that Dunkin' Donuts had stated that a franchisee could not operate a Mr. Donut store and a Dunkin' Donuts store at the same time. For him and his brother, this would mean a simultaneous costly conversion of all four stores.

42. Donovan said that he believes that he would not be able to convert his stores because of the close proximity of existing Dunkin' Donuts stores to his. Donovan said that his bank debt is now between $ 600,000.00 and $ 700,000.00. Donovan testified that he has not stopped paying his franchise fees since the planned acquisition.

43. Plaintiffs' witness Sean Patrick O'Hanlon ("O'Hanlon"), is a plaintiff in this action, and operates five Mr. Donut shops in the State of Delaware. He produced a map showing the location of Mr. Donut stores and Dunkin' Donuts stores with appropriately colored dots. (Plaintiffs' Exh. 11). Three of his stores are located within one mile of a Dunkin' Donuts store; one is located within one and one-quarter mile from a Dunkin' Donuts store; and one is located ten miles from a Dunkin' Donuts store. A nearby previous competitor, **[*20]** Donuts Galore, went out of business less than two years ago.

44. O'Hanlon said that nearby McDonald's places offer breakfast specials, but he did not think that they were a big competitor in the way Dunkin' Donuts is. On cross-examination, however, he said that McDonald's pre-lunch food services market has influenced his products with consumers. He has had to react to McDonald's presence. McDonald's customers come to him for their coffee. He also said that he did not think that the WaWa convenience store's coffee sales affected his, either. To some extent, he thought that convenience stores who aggressively marketed coffee might have tapped into the Mr. Donut market. He said that it is Dunkin' Donuts which competes with him on the price of donuts and coffee and variety of products.

45. O'Hanlon estimated that he sells 70% coffee, 25% donuts and 5% "auxiliary" products. He believes that the "Mr. Donut" trademark is important to his business. In the late 1970s, when his profitability was sinking, he could only increase prices to some extent. To continue to increase them would risk losing customers. Dunkin' Donuts was present in the market then.

46. O'Hanlon said that **[*21]** at least 60% of his business is done by 11:00 A.M. He does not have a very strong donut sales base; 95% of his customers buy a cup of coffee. He serves freshly ground and brewed coffee in a china mug or take-out cup. Acmes do not have drive-by windows, places to sit, or china mugs. He also said that when McDonald's went into the breakfast business, he did not lose any of his donut and coffee business.

47. O'Hanlon said that local Acme supermarkets do have fresh bakeries. There is such an Acme within two miles of each of his locations. Such supermarket bakeries do offer donuts. He said, though, that one was unlikely to find anyone in an Acme at 10:00 A.M. buying coffee. He does not keep watch over Acme prices.

48. O'Hanlon said that when Acmes and convenience stores pursued the market, his sales did not go down. He added that he has not withheld any franchise fees since the planned acquisition. He does not think his store would be more profitable were it converted to a Dunkin' Donuts store. He already has a higher sales volume than Dunkin' Donuts. He also appreciates the Mr. Donut policy of allowing him to advertise locally. He thinks it gives him an advantage over **[*22]** competing Dunkin' Donuts.

49. Plaintiffs' witness Roche C. Burgio ("Burgio") of Bethlehem, Pennsylvania, owns a Mr. Donut shop in Easton, Pennsylvania. He is not a plaintiff in this action. He testified that he had gotten a Mr. Donut franchise in 1981 because it was a relatively inexpensive investment as compared with other franchises and he wished to create a business opportunity for his two sons. He has not been active in the running of the store since this January because of a heart ailment.

50. Burgio testified that he has a second business on his property, a miniature golf course, "Mr. Golf", which is located behind the Mr. Donut store. He said there are two Dunkin' Donuts stores located near his with whom he competes. A Dunkin' Donuts operator has expressed interest in buying his business and real estate, but he does not wish to sell the real estate. The real estate agents of Burgio and of this operator are currently talking about this matter. Burgio's asking price is $ 169,900.00.

51. Burgio said that he sometimes devises original donut varieties for his store. Dunkin' Donuts stores do not, he said. He estimated that 60% of his sales were for coffee and 40% for **[*23]** donuts, baked goods, soda and a breakfast "sandwich". He sells 80 to 90 dozen boxes of donuts a day. He has a drive-by window and does much business through it in the morning. Burgio estimated that he has a $ 290,000.00 investment in his Mr. Donut franchise at this time.

52. Plaintiffs' witness Thomas S. Muth ("Muth") of Wescosville, Pennsylvania, operates a Mr. Donut shop in Allentown, Pennsylvania. It is an older establishment with a "W" roof. He entered the donut business as a baker in 1976. He bought out the former owner's franchise for $ 100,000.00 and, by arranging financing with the former owner and by borrowing $ 25,000.00 from the bank, Muth said that he would not have the money to renovate his store in the future. He has not discussed financing for renovations with Dunkin' Donuts.

53. Muth is a plaintiff in this action. He said that if he were to add more debt and if his advertising fee were to increase, he could not afford to continue in business. He did not think that increased advertising would benefit him because his shop is located in a residential area. He said that he has not withheld any franchise fees since the planned acquisition.

54. Plaintiffs' **[*24]** witness Shirley First ("First") of West Chester, Pennsylvania, operates a Mr. Donut shop in that town. She is a plaintiff in this action. Four and a half years ago, she bought a Mr. Donut shop to run with her son. She borrowed $ 160,000.00 to do so; she owes $ 155,000.00 for the acquisition and remodeling of the shop. She also invested $ 20,000.00 of her own money. She has increased sales in her store by 32-33% since she took over.

55. First testified that the nearest Dunkin' Donuts store is nine-tenths of a mile away. She said that her store is better run and stocked with better donuts than her Dunkin' Donuts competitor. She estimated that she sold 50% coffee and 50% donuts. Although she has many fast food places near her, she does not check their coffee prices. She does, however, check the Dunkin' Donuts coffee prices. She has paid her most recent franchise fee.

56. First said that she had recently remodeled her shop. Based upon her understanding of Bower's testimony, her fear is that Dunkin' Donuts would require further costly ($ 70,000.00 to $ 80,000.00) renovations to conform to their specifications. Although she could raise capital to convert her store, she does **[*25]** not wish to remodel; she wishes to sell the shop and retire in the future. She also said that her loans are all personally guaranteed.

57. Upon cross-examination, First said that she was not aware that she would never be required to convert her store to a Dunkin' Donuts should the planned acquisition take place. Defense counsel referred her attention to a Dunkin' Donuts letter of January 18, 1990 to First. (Plaintiffs' Exh. 17). Defense counsel referred to the part of the letter in which Dunkin' Donuts promised to honor its contractual commitments to holders of options for Mr. Donut shops. First expressed some skepticism over this part of the letter; her contract with Mr. Donut would run out in six years. She wondered if honoring her contract would also entail honoring its renewal clause. She believed that it would be difficult to sell a non-renewable franchise. She also questioned the part of Dunkin' Donuts' letter which said that Mr. Donut would be run as a separate chain. That letter also stated that no new Mr. Donut franchisees would be solicited.

58. First said that she believed that, as a Mr. Donut franchisee acquired by Dunkin' Donuts, she would be part of a "dying **[*26]** chain". She would also lose out on the advantages of group buying opportunities. She also said that she no longer had plans for buying a Mr. Donut satellite store. She believed that Dunkin' Donuts' "no new franchise" policy for Mr. Donut would prevent this.

59. First identified Plaintiffs' Exh. 18, a letter signed by the Vice President and General Counsel of Dunkin' Donuts and by a signatory, Ms. Burns, of Mr. Donut, to Mr. Donut franchisees and option holders. That letter, dated January 16, 1990, said that Dunkin' Donuts "does not intend to actively solicit the sale of additional Mr. Donut franchises following consummation of the sale." First said that this phrase was one reason why she believed that further "franchises" as opposed to "franchisees" would not be permitted. Ralph Gabellieri of Dunkin'Donuts was given as the "contact person" for questions in the letter. First said that she did not pose any questions to Mr. Gabellieri because, at the time, he was the president of the chief competitor of Mr. Donut.

60. Plaintiffs' witness John G. Jones, Jr. ("Jones") of Allison Park, Pennsylvania, owns a Mr. Donut shop north of Pittsburgh. He belongs to a group of 22 stores **[*27]** in the area who pool their advertising dollars for the Pittsburgh market. In that area, Mr. Donut has a higher volume of sales than Dunkin' Donuts.

61. Jones said that, on January 11, 1990, he and other Pittsburgh area franchisees had attended a meeting with Dunkin' Donuts' officials, Steve Russo, Vice President of Development Operations, and District Manager, Cary Brown, in Pittsburgh. According to Jones, Mr. Russo said that Dunkin' Donuts, as the number one chain, wanted to combine that with the number two chain and have a chain of 2400 or 2500 stores, or whatever the number was at that time.

62. Jones said that his store makes $ 6,500.00 to $ 6,600.00 per week. He learned at the meeting referred to above that the average Dunkin' Donuts store makes $ 6,100.00 per week. Jones said that he has three Dunkin' Donuts stores within his immediate market area. The food costs of both chains were said to be 26%. He also noted that Dunkin' Donuts was the No. 2 donut business in Pittsburgh. Jones estimated that he spent 90% of his energies making donuts and coffee.

63. Dr. Gary L. French ("Dr. French") was called by the plaintiffs to testify as an expert witness. Dr. French holds **[*28]** a Ph.D. in economics and is currently employed as a Senior Consultant at Nathan Associates, Inc., an economic and management consulting firm in Washington, D.C. He specializes in the field of economics known as Industrial Organization Economics and he is also an Industrial Organization Associate Member of the American Bar Association. He said that Industrial Organization is the field of economics that is concerned with the study of individual business firms and the structure and organization of industries and markets and the whole realm of antitrust economics. He was first contacted with regard to this case by the plaintiffs approximately a week before his first appearance in court on February 16, 1990.

64. Dr. French stated that he had been requested by the plaintiffs to examine the data and information on donut shops and to determine the shares of the relevant sellers in the donut shop market. Marked as Plaintiffs' Exhibit 22 was a chart prepared by Dr. French and his assistants, entitled "Selected Information on Donut Shop Chains - 1988." It was created from information found in the 1989 Directory of Chain Restaurant Operators, published by Lebhar-Friedman, Inc. Dr. French **[*29]** stated that the only thing he would now alter about the chart is the sales and units of Dunkin' Donuts and Mr. Donut that are overseas. Mr. Donut had sold off its foreign operations after the Directory was compiled. Dr. French said that in the case of Mr. Donut, this alteration would reduce its shares by about 5 to 10%; in the case of Dunkin' Donuts, it would reduce its shares of units or sales around 5 or 6%.

65. Dr. French explained what the "Herfindahl-Hirschman Index ("HHI")" is. He described it as the sum of the squares of the market shares of each participant in the market. For example, if one company has ten percent of the market, squaring that yields the figure "one hundred". The HHI is preferable to the older method of comparing straight market shares in that it can tell the reader information about the overall diversity in the market and can provide an idea of how equally sized the different competitors are. The HHI attempts to look at the concentration in the hands of one or a few sellers better than just looking at the raw shares themselves, Dr. French said. The HHI is used by the Department of Justice and the Federal Trade Commission to divine concentration and **[*30]** the likely indications of concentration for competition in markets.

66. Dr. French referred to U.S. Department of Justice guidelines using the HHI which the department uses in reviewing potential mergers. Dr. French said that if the index is over 1800, then the Justice Department or the Federal Trade Commission would become greatly concerned about concentration.

67. Dr. French said that in the chart, the pre-merger HHI in units is 2969; the post-merger HHI in units is 4761 - an increase of some 1700 to 1800 points. The pre-merger HHI in sales is 3763 and the post-merger HHI in sales is 5955. This, too, is more than the 100-point increase which Dr. French said would attract the attention of antitrust enforcement officials. Allowing for the elimination of the foreign sales, Dr. French estimated that these figures would be 2900 to 3000 instead of 3763 in pre-merger sales, and 4700 instead of 5955 in post-merger sales - still, he said, a significant figure that represents a high degree of concentration.

68. Dr. French said that the chart was prepared upon plaintiffs' counsel's assumption that there is a "donut shop market." The chart also represents nationwide shares. He said **[*31]** that all 21 chains on the chart do not compete in all markets; in most markets, just Mr. Donut and Dunkin' Donuts are competing.

69. Under cross-examination, Dr. French explained why he had listed only 21 chains on the chart. He had chosen those - and not other places, such as Acme supermarkets - because those sold premium quality coffee and donuts. This list, he said, is comprised of donut shops "as traditionally thought of."

70. Dr. French, upon cross-examination, spoke of some of the factors used to determine the existence of a relevant market. He said that in the trade literature and the way data and information are kept, donut shops are reported on as a separate category and there is a separate Standard Industrial Classification (SIC) code for them. The Department of Commerce collects sales and other information on donut shops separately from others. This, he said, suggests that there is something which they have in common which they do not have in common with any other category. Another important factor, said Dr. French, is the economic substitution that would go on between the products of donut shops and the products of any other retailers. He said that he had not **[*32]** yet carried out research on economic substitution.

71. On cross-examination, Dr. French said that there are many relevant geographic donut shop markets and these would tend to be of a local nature. He stated that the nationwide HHI is only an indication of what the local market ones would be. He said that, most likely, HHI's computed in the local markets would even be higher than nationwide HHI's.

72. On cross-examination, Dr. French stated that he had not included "Mom and Pop" stores in his list of 21 chains. In addition to the Directory already referred to, he also based his list on other documents, Entrepreneur Magazine, Franchising Handbook, lists kept by the U.S. Department of Commerce.

73. Dr. French, upon cross-examination, said that he had not yet computed HHI's for any local markets. On cross-examination, Dr. French stated that he did not personally create the chart, nor had he had time to review the chart in comparison with the Directory upon which it was based. He said that he had directed two staff members and had told them what to look for in composing the chart.

74. On cross-examination, Dr. French said that in the chart, the sales of the franchisees **[*33]** had been aggregated for the purpose of doing an HHI study, to get an indication of the market power of the Mr. Donut and Dunkin' Donuts' branded products. "Market power", he said, was the seller's ability to raise prices.

75. On cross-examination, Dr. French said that he has not yet done an HHI for the following: the sale of donut shop franchises of national donut chains in the United States as a whole; the sale of donuts, coffee and related limited menu products through franchised national donut chain donut shops in the United States as a whole; the sale of donut shop franchises in the United States as a whole; the sale of donuts, coffee and related limited menu products through franchised donut shops in the United States as a whole; and the sale of donuts, coffee and related limited menu products to the donut shops in the United States as a whole.

76. Upon cross-examination regarding the Directory used to compile the chart, defense counsel challenged Dr. French's selection of only 21 chains for the chart when there were 83 companies in the Directory's index under "Donut". Also, under "fast food" in that index, there were 1,000 companies, according to defense counsel, including **[*34]** both Dunkin' Donuts and Mr. Donut. Dr. French replied that he had taken the section with the subheading regarding donuts, donut chains in composing the chart. He stated also that any entry that looked as though it were primarily a hamburger shop that sold donuts in addition to hamburgers was excluded. When questioned as to whether Dunkin' Donuts and Mr. Donut could be categorized as "fast food", he said that since the Directory lists the donuts' sub-heading under the broader heading "fast food", the Directory could arguably designate them as both.

77. Upon cross-examination, Dr. French said, with regard to consulting the Directory in order to compose the chart, that he was interested in a "donut shop market", so he wanted donut shops as normally thought of, of the type like Mr. Donut and Dunkin' Donuts. To do so, he looked at a list of companies under the subheading "Donuts".

78. Upon cross-examination, Dr. French was asked why he listed 21 companies when there were 83 companies in the Directory offering fast food donuts. Dr. French explained that those other companies were excluded when the more specific information on the company indicated that, while donuts were in their **[*35]** menus, they were obviously a much more full menu fast food operator than a donut company. Also, the companies were excluded if they appeared to be a franchise of one of the chains. Then, only the franchisor was counted.

79. Upon cross-examination, Dr. French explained that he had not listed individual states in the chart for Dunkin' Donuts and Mr. Donut because there were so many states that those two chains were in. Instead, he created verbal descriptions of areas.

80. Upon cross-examination, Dr. French, when asked if there might be a market called fast food service, said that there might be. Dr. French explained that even though there might be 1,718 companies categorized as fast food service, he did not include these on the chart because they were not donut shops and he was assuming a donut shop market when the chart was prepared. He stated that the chart is only relevant if there is a donut shop market. He also said that he has only just begun to do research on the concept of a "donut shop market."

81. Upon cross-examination, Dr. French stated that, were the number of traditionally defined donut shops 8500, instead of 3900, then he would not want to rely upon the chart.

[*36] 82. When asked by the court whether he had an opinion on the relevant market as to whether or not the donut shop market is the correct market, Dr. French stated that he had a preliminary opinion. He said that there probably is a product market, that is, the products of coffee and donuts or donut shops. He has not yet examined the relevant geographic markets. Upon cross-examination, he refined that statement, to say that the product market is a group of products that basically is the premium donuts and premium coffee sold by donut shops. His professional opinion regarding convenience shops was that they sell a lower quality coffee and donuts at prices so different from donut shops that they are not likely in the same market.

83. Upon further cross-examination, Dr. French said that other types of retailers who sell coffee or donuts to consumers compete with donut shops in a fringe sort of way. The real question, he said, was whether there was economic substitution, i.e., if donut shops raise their prices would they lose significant volumes of sales to these retailers. He has not yet finished his analysis on this question.

84. Plaintiffs' witness Beverly Heimberger ("Heimberger") **[*37]** of Saltsburg, Pennsylvania, has been a franchisee of Mr. Donut since 1978. She presently operates two Mr. Donut shops; one in Kittanning and the other in South Greensburg, Pennsylvania. In order to enter this business, she borrowed money from a bank; at present, she owes $ 281,000.00. She has not withheld any franchise fees to Mr. Donut.

85. Heimberger said that a Dunkin' Donuts shop is located approximately two and a quarter miles away from her Greensburg store. At her shops, she sells 62% donuts and 31% coffee and other drinks. "Other drinks" would comprise only 4 1/2%. She also sells about a dozen breakfast sandwiches a day.

86. Heimberger said that she attended the recent Florida meeting held with Dunkin' Donuts officials. While there, she took notes which were introduced as Plaintiffs' Exhibit 23. These notes were taken as the officials were speaking. Dunkin' Donuts' Chief Executive Officer ("CEO") Robert Rosenberg, Dunkin' Donuts' President Thomas Schwarz, and Dunkin' Donuts' Vice President of Operations and Development Ralph Gabellieri all spoke at this meeting.

87. According to Heimberger's notes, Mr. Gabellieri was quoted as saying that Dunkin' Donuts wanted **[*38]** to convert all the Mr. Donut shops; if someone did not want to convert, he could sell.

88. When asked by plaintiffs' counsel whether Rosenberg had made any comments on the advantages to size of the business, Heimberger said that Rosenberg had said at the meeting that bigger is better.

89. Heimberger said that, at the meeting, Gabellieri said that there was a seven-year plan for conversions. He said that Dunkin' Donuts hoped to convert thirty to forty Mr. Donut shops to Dunkin' Donuts shops the first year and fifty the second year and so on.

90. Heimberger stated that, at the meeting, Schwarz had said that Dunkin' Donuts had wanted to acquire Mr. Donut to add more muscle to the chain and to keep Japanese investors from acquiring Mr. Donut.

91. Heimberger said that, at the meeting, there were said to be fifteen percent of Mr. Donut shops within a one mile radius of a Dunkin' Donuts store. Thirty-seven stores were said to be in exclusive territory of the other.

92. Heimberger stated that, at the meeting, it was said that, after the acquisition, holders of Mr. Donut options would be able to put in Mr. Donut stores. Options were described as documents negotiated with Mr. Donut **[*39]** for a territory in which to locate a Mr. Donut store.

93. Heimberger testified that she had such an option to develop a site for a third store. She has expended $ 50,000.00 to develop this additional site in the Greensburg area. Initially, she had been slowed down in her aims by a sewage problem at the site. Heimberger also said that, in October, 1989, Mr. Donut intended to withdraw the site. After negotiations, however, Mr. Donut offered assistance in developing the site in late November or early December. Then, in mid to late December, Mr. Donut indicated to her that the site would not be developed and that she could make a minimal claim ($ 1,000.00) for her expenses and to inform Mr. Donut of her expenses. This lack of approval is what now prevents her from developing the site.

94. Heimberger said, at the meeting, Rosenberg had said that the number one competition in the donut business is supermarkets, number two is convenience stores and number three is fast food breakfast places. She believes, however, that her competitor in the donut business is other donut stores. She has no desire to become Dunkin' Donuts stores and her customers have often expressed to her their **[*40]** preference for Mr. Donut products.

95. Upon cross-examination, Heimberger said that, at the meeting, she had heard Rosenberg say that Dunkin' Donuts would honor all contractual obligations, that it would keep its word, and that no one would be forced to do anything. She also said that, at the meeting, Schwarz had said that financing would be provided in connection with any conversions and that Dunkin' Donuts would keep an "open mind" regarding conversions. She also said that she had heard that options would be honored.

96. Upon redirect examination, Heimberger stated that she would not make business decisions based upon Messrs. Rosenberg's and Schwarz's assurances in light of the comments, also made at the meeting, by Gabellieri.

97. Heimberger testified that she had received written assurances that Dunkin' Donuts would honor all existing contractual obligations of Mr. Donut in Plaintiffs'' Exhibits 17 and 18. Heimberger said she was concerned about the validity of these assurances when compared with the intention of Dunkin' Donuts to convert the stores acquired into Dunkin' Donuts within seven years.

98. Defendants' witness Susan Burns ("Burns") is currently Vice President **[*41]** of Operations, Franchised Operations, for Mr. Donut of America. She said that since January, 1990, she has seen approximately $ 18,000.00 to $ 20,000.00 per day in reduced cash coming into the corporation from the franchise network. She said that, as a result of this shortfall, Mr. Donut had had to borrow money from International Multifoods to pay for their expenses. She said that they were continuing to "grow" an intercompany account with a debt increasing $ 18,000.00 to $ 20,000.00 per day. Such account, as a result of the pending acquisition, has a "ceiling" on it, she said. She explained that Dunkin' Donuts has agreed to buy the stock of Mr. Donut for a certain price and to reimburse International Multifoods for the intercompany debt owed it - but not exceeding a certain "ceiling". If Mr. Donut's debt exceeds that ceiling, it will not recover those monies, she said.

99. Burns also testified that other monetary injury existed to International Multifoods from delay in consummating the sale: the inability to redeploy the purchase price in other parts of the company's business. She also said that delay in closing the deal was hurting the people she worked with. She also **[*42]** expressed concern that Dunkin' Donuts might renounce the sale, pursuant to a "walk away" clause in the contract, if the sale is not consummated by March 31, 1990.

100. Burns stated that, according to the last report she had seen, there were 8700 donut shops in the United States. Of these, approximately 500 of them are Mr. Donut shops. Burns said that she had been impressed with the number of years' experience amassed by Dunkin' Donuts' senior officers and other management people. She thought that such experience would benefit the franchisees of Mr. Donut.

101. Burns, when handed her letter of January 16, 1990 marked Plaintiffs' Exhibit 18, said that she believed that Dunkin' Donuts would honor all existing contractual obligations of Mr. Donut. Dunkin' Donuts, she said, had told her that they were going to provide the financial support and the technical expertise to continue to grow the business for the franchisee. She said that she believed that many Mr. Donut franchisees had received a great deal of misinformation which, she hoped, would be resolved by closer exposure of the franchisees to the Dunkin' Donuts organization.

102. On cross-examination, Burns said that, after **[*43]** the acquisition, she would remain an employee of International Multifoods in another area. The majority of the fifty-five persons she worked with had all accepted or been offered employment with Dunkin' Donuts. Persons who worked in the Mr. Donut Minneapolis headquarters office would either be placed within International Multifoods or assisted with out placement.

103. Upon cross-examination, Burns stated that Gabellieri had not told her specifically what he was going to do with those thirty-seven Mr. Donut franchisees who are within exclusive areas already granted to Dunkin' Donuts' franchisees and the 15% who are within one mile of Dunkin' Donuts. Nor had he ever told her that he would reduce the advertising allowances required on the Dunkin' Donuts' contracts should any Mr. Donut convert to a Dunkin' Donuts.

104. On cross-examination, Burns also said that Mr. Donut had, over the last few years, been consistent in its position that its competition is supermarkets, in-store bakeries, convenience stores and retail bakeries. This is a

universe of 80,000 convenience stores, 20,000 in-store bakeries, and the 8700 retail donut shops in the United States. She said that she had **[*44]** not heard that competition recognized by the plaintiffs' witnesses she had heard.

105. Burns said, upon cross-examination, that she was aware of a decline in the donut consumption market, but not of the percentage. She said that during that period there were increases in sales in both the Dunkin' Donuts chain and the Mr. Donut chain.

106. Upon cross-examination, Burns said that sales of Mr. Donut's ancillary products (croissants, brownies, cookies, etc.) total or average approximately 12-15% of the sales on a consolidated basis for the Mid-Atlantic, New England and Southeast regions.

107. Burns, upon cross-examination, said that in the last couple of years Mr. Donut had maintained a flat store count, if not a deteriorating store count. She said that the Mr. Donut system was performing very well this year. She acknowledged that it is important to continue expansion for the benefits that the franchisees reap from group buying power, advertising, etc., but she added that the franchisees who converted to Dunkin' Donuts would have a bigger universe and would benefit from those numbers. She said that the approximately 230 stores in the large buying co-op contribute probably 35 **[*45]** to 40% of sales in the chain.

108. Upon cross-examination, Burns stated that the "ceiling" on the intercompany account is approximately $ 3,000,000.00. She said that she first began to notice the cash flow problems in December, 1989 and January, 1990, continuing into February. Routine collection practices are in place at the moment. She said that she had had no franchisee write to her to tell her that he or she was withholding any payment because of the pending acquisition.

109. Upon cross-examination, Burns said that, as of that day, the intercompany account balance was estimated to be between $ 2.6 million and $ 2.7 million. She admitted that as to this first $ 2.7 million, none of it could be attributable to the entry of the current TRO. She also said that this trend in negative cash flow began appearing before the sale to Dunkin' Donuts was even publicly announced. She added that the deterioration came about when a potential for a sale was announced, not specifically a sale to Dunkin' Donuts.

110. Upon cross-examination, Burns said that she had found the 8700 donut shop figures in the CREST Research Reports. She does not know on a firsthand basis how many of these **[*46]** are comparable to the Mr. Donut or Dunkin' Donuts shops, which are of very high quality. She said that while major donut shop chains have continued to grow, the independents, the single store operators, have shrunk or disappeared. Even the Winchell's Company store chain on the West coast has fared rather poorly.

111. Burns, on cross-examination, said that International Multifoods was a Fortune 500 Company, one of the biggest food conglomerates in the world. It did not surprise her to hear that the last FTC report listed it as having $ 30,000,000.00 cash on hand.

112. Defendants' witness, F. Ralph Gabellieri (Gabellieri"), is presently Senior Vice President at Dunkin' Donuts. He said that, today, Dunkin' Donuts competes with 80,000 convenience stores and 20,000 fresh supermarket bakeries. They are also competing with fast food places like McDonald's and Wendy's. He also said that Dunkin' Donuts' menu has become more diverse to compete in this changed marketplace. Products such as muffins, cookies, soups, sandwiches on croissants and other baked goods now account for 25-30% of Dunkin' Donuts' business.

113. Gabellieri stated that he will be responsible for the implementation **[*47]** of the acquisition of Mr. Donut by Dunkin' Donuts. He would become the President of Mr. Donut and, he said, he would tend to the concerns of the Mr. Donut franchisees and try to do all he can to ensure success with their businesses. He said that Dunkin' Donuts was very willing to honor the contracts that exist between Mr. Donut and its franchisees.

114. Gabellieri stated that, contrary to First's concerns regarding being unable to open up a "satellite store", Dunkin' Donuts is rapidly developing new satellite stores. He also said, with regard to Muth's concerns regarding his "W" roof, that Dunkin' Donuts had not yet decided whether they would have to be changed. He stated, too, that remodeling converted stores would probably focus on the consumer areas and not the kitchens, and that any

remodeling costs would vary between $ 10,000.00 to $ 100,000.00, depending upon the age of the last remodeling effort. He also said that Dunkin' Donuts' advertising money is largely spent in local markets.

115. Gabellieri testified that all conversions would be done on a voluntary basis. He said that Dunkin' Donuts wanted, first, to "test" the concept of conversion with approximately forty **[*48]** shops over a broad geographic area. This will probably take six months to inaugurate. Then, once the test is in effect for six months, they will evaluate the sales results. Those sales, plus the return on investment made by those franchisees who had converted, would then determine the fate of future conversions. Past conversions of twenty-one to twenty-two independent donut shops, he said, have resulted in a greater than 50% increase in sales.

116. Gabellieri said that his letter of January, 1990 marked as Plaintiffs' Exhibit 17, was correct when it said that Mr. Donut would be run as a separate chain in the indefinite future. He said that he feared that the longer the period of uncertainty exists, the greater the danger to the Mr. Donut franchise.

117. On cross-examination, Gabellieri said that Dunkin' Donuts has very high quality specifications for its coffee and a requirement that fresh donuts be sold. He said that Dunkin' Donuts allowed its franchisees the opportunity to exercise ingenuity in creating a new variety of donut. An innovations program, in which Dunkin' Donuts reimburses a franchisee if his innovation fails, is also available.

118. Upon cross-examination, **[*49]** Gabellieri said that Allied-Lyons had paid $ 33,000,000.00 to purchase Dunkin' Donuts. Gabellieri said that, at the Florida meeting, he had said that it would take approximately five to seven years to complete a conversion, assuming that the "test" proved successful.

119. Upon cross-examination, Gabellieri said that as the President of Mr. Donut, he would be paid through the Mr. Donut subsidiary of Allied-Lyons. He said that the new Mr. Donut offices will possibly be in the same building in Randolph, Massachusetts, as the Dunkin' Donuts' headquarters. He said that he had not decided what he would do in seven years, if a successful conversion plan had been achieved.

120. Upon cross-examination, Gabellieri said that they would maintain two separate and distinct organizations between Dunkin' Donuts and Mr. Donut. But, he reiterated that conversion over a seven year period would take place only with those shops that agree to be converted and only after the conversion concept has been proven a success.

121. Upon cross-examination, Gabellieri said that decisions regarding those Mr. Donut stores located either in exclusive territories of Dunkin' Donuts or within close proximity **[*50]** of them would be made on an individual basis. He suggested that some Dunkin' Donuts' franchisees and Mr. Donut franchisees could buy one another out or that territories could be altered. Also, exclusive contracts are generally for a five-year period.

122. Upon cross-examination, Gabellieri said that he did not know what would happen if the conversion plan were not successful. Continuing to grow the Mr. Donut chain was one alternative, he said.

123. Upon cross-examination, Gabellieri said that the goal was to integrate the two firms. Gabellieri said that he might learn some proprietary information as head of Mr. Donut, but he also said that he had known much of it already.

124. Upon cross-examination, Gabellieri said that Hardee's purchase of Burger Chef was an example of a franchise chain that bought out a direct competitor. He said that most Burger Chef's did convert to Hardee's and those that did not may have vanished.

125. Upon cross-examination, Gabellieri said that if receivables continued to mount, Dunkin' Donuts might have to take a different look and approach to the transaction. He had first learned of the negative cash flow, referred to by Burns, about two weeks **[*51]** before.

126. When asked by the court about the fate of the one hundred or so Mr. Donut shops within a mile of an existing Dunkin' Donuts shop, he repeated that each one would be analyzed on an individual basis. Dunkin' Donuts already has many shops that are within a mile of each other.

127. Upon cross-examination, Gabellieri said that Allied-Lyons bought Mr. Donut on behalf of Dunkin' Donuts. Mr. Donut will be a subsidiary of Dunkin' Donuts. As President of Mr. Donut, Gabellieri will report to a corporate superior at Dunkin' Donuts.

128. Plaintiffs' witness Gregory L. Tingley ("Tingley"), is the co-owner of a supermarket, Riverside Market, in Williamsport, Pennsylvania. His supermarket sells fresh-baked donuts. These come to him in a frozen state and he fries them. This is done once a day. He offers about a dozen varieties and on an average day sells about 20 to 25 dozen donuts. He sells no fresh brewed coffee, because he does not feel a need to sell such coffee in his business. Everything in his store must be paid for first at the check-out line.

129. Tingley's supermarket sells the donuts packaged, off a table, in half-dozen amounts. His busiest times are from **[*52]** 3:00 to 7:00 P.M. The Riverside Cooperative Group is a group of seventy-seven franchisees of whom four are located in the Williamsport area. They combine to run ads; two to three times a month they run a donut "special" of a half-dozen for $ .99. Tingley said that he never checks donut shop prices.

130. Tingley testified that an extremely small percentage of his baked goods sales are donuts. He sells mostly cakes. In September, 1988, a donut shop located one mile south of his supermarket closed. Tingley said that its closing had no effect on the sales of baked goods in his supermarket. Although his records for the six months before and after the closing of this donut shop was not broken down in such a way as to reveal on their face what donut sales did, Tingley could recall independently of these documents that he had noticed no significant increase in the number of donuts baked or sold in his supermarket.

131. Tingley said that there are no donut shops, convenience stores, fast food places or bakeries near his supermarket. Tingley said he is acquainted with James W. Bower, Jr., whose family owns some Mr. Donut shops in the Williamsport area.

132. Plaintiffs' witness, **[*53]** James W. Bower, Jr. ("Bower, Jr."), is the son of the first plaintiffs' witness in this action. Bower, Jr. owns three Mr. Donut stores; two in Williamsport, Pennsylvania, and one in Danville, Pennsylvania. Bower, Jr. is the past recipient of many of Mr. Donut's top awards. He has not withheld any franchise fees because of the planned acquisition.

133. Bower, Jr. owned the donut shop located near Tingley's supermarket, which closed in September, 1988. He said that when that store closed, it had last done $ 324,000.00 worth of business. Its closing increased sales "dramatically" at his other Williamsport store, (the "Newberry store").

134. Bower, Jr.'s ledger for sales from July, 1987 to January, 1990, were brought with him to court. He took figures for eleven months prior to and after the closing of his store near Tingley's supermarket. He prepared a chart which showed an increase in sales in the Newberry store.

135. Bower, Jr. testified that, although Weiss and Riverside Supermarkets sell donuts individually and per dozen cheaper than his, he would not think to lower his prices. Although he believes that the supermarket donuts are baked there, he does not believe **[*54]** that they are a product comparable to his.

136. Bower, Jr. testified regarding video ads shown for Mr. Donut on T.V. These were furnished to him by Mr. Donut and he added the tag line at the end. (The attorneys stipulated that a discounted price was mentioned at the end of the ads - the first and last ones on the tape were introduced into evidence). Such promotions are done during January and February, he said. He also added that the discounts here were for four years ago. He has also used coupons to generate sales during slow periods and estimated that he spends 3% of his income on various sorts of advertising, e.g., radio, television, etc.

137. Bower, Jr. stated that he does not view convenience stores, supermarkets or fast food places as competition. The quality of his coffee is superior, he said, to a McDonald's.

138. Bower, Jr. estimated that items like sausage and cheese, soup, chili, biscuits make up only 1-3% of his sales; muffins make up 5-8% of his sales. Bower, Jr. testified that it takes about six months to train a baker to make a good donut consistently. This plays a part in being able to tell when it is time to take donuts off the shelf and bake some **[*55]** more.

139. Upon cross-examination, Bower, Jr. denied competing with offerors of non-donut items, such as soups, oat bran muffins, and egg, ham & cheese combinations. He said that in the case of the latter, his product is different from that produced by McDonald's because it is baked with a donut dough. He maintained that, even though Dunkin' Donuts does not have any shops in his community, he still competes with them because they have a desire to expand their presence. He also said that he does not compete with other food entities in his community, because they do not do the same thing that he does.

140. Bower, Jr. said that yogurt, a relatively new product, makes up 6-8% of sales in one of his stores. He said that he does not compete with yogurt sold in supermarkets. Nor does he compete with yogurt sold in the TCBY yogurt chain; theirs is higher cost and there is no such store near him. He said that with Mr. Donut, one has to consider what it stands for, coffee, donuts and other little things used to build up overall service. Upon cross-examination, when told that he had stated in answers to interrogatories that non-donut items made up 25% of his sales, he said that such **[*56]** a percentage is made up of many little parts.

141. Bower, Jr. stated that he initiated a kind of "fast feeder" concept when he adopted service to customers over a counter in front of display cases. He still has a sit-down counter, however.

142. Bower, Jr. said that he and the other plaintiffs are more financially interested in the outcome of his litigation than his father is. His father runs the Mr. Donut buying group, referred to above, and also owns stock in a construction company. This company, Keystone Construction, remodeled Bower, Jr.'s store. Bower, Sr.'s income was suggested by defense counsel to be $ 150,000.00 to $ 200,000.00 a year.

143. Bower, Jr. said that he closed his other donut store because of water and sewage problems, growth away from it and a disadvantageous beltway location. He had highly paid bakers who baked four times a day. He closed the store because, in order to cope with all this, he would have had to lower some of his standards, he said.

144. Bower, Jr. stated that fresh-baked donuts, even if sold in a convenience store owned by Sheetz, a Mr. Donut franchisee himself, would not constitute competition for him because such donuts are not baked **[*57]** four times a day and are not rotated. He said that, in his store, donuts could sit out as long as eight hours, as long as they were still fresh.

145. Bower, Jr. estimated that 1 to 1 1/2% of his sales at the Danville store were of Delaware donuts, a donut pastry/egg/bacon, etc. creation. He had confined selling it to one store because preparing it for immediate sale slowed down service to other customers. He sells about 10-30 Delaware donuts a day as opposed to 140-310 dozen donuts a day.

146. Bower, Jr. estimated that 1/4% of his sales were of chili. Its sales have not done too well, although it has been offered for seven years. He estimated that chili, soup, and Delaware donuts would account for approximately 3% of his sales. Seventy-five percent of his sales are of donuts and coffee. Twenty-two percent, he said, consists of various other drinks, yogurt, etc. He said that he works off the reputation of his donuts and he has to maintain that reputation.

147. Bower, Jr. testified that his father would not worry about his livelihood, whether the planned acquisition took place or not. He is in the construction business and there was the potential for remodeling jobs. **[*58]** Other plaintiffs' livelihoods do depend, he said, on whether the transaction goes through.

148. Plaintiffs' witness Joseph Hodin ("Hodin"), of Scranton, Pennsylvania, operates seven Giant Supermarkets. He is President of Giant Markets, Inc. One store has a bakery and it makes donuts for three other stores that do not. These donuts are made from scratch - a procedure atypical of supermarkets. Usually, Hodin said, supermarkets buy donuts in a frozen unfried or a frozen fried state and then prepare them. He said he sells 12-15 varieties of donuts. He does not sell fresh coffee or coffee for take-out.

149. Hodin said that in four stores, 2 to 4 1/2% of sales are of fresh bakery goods. Of that percentage, 5 to 7% are donuts. In the store closest to Mr. Donut, 4 1/2% would be sales of fresh bakery goods.

150. Hodin said, that while an operator of the Giant Supermarket with the bakery, he sold land to a Mr. Donut franchisee for a Mr. Donut shop one block from the supermarket. He said he did not fear loss of any donut sales.

151. Hodin stated that when the nearby Mr. Donut ran a donut "special", this did not make his sales decline. He also stated that he accepts ads for **[*59]** donut shops on the back of his register tapes from an advertising company because he does not regard donut shops as competitors.

152. Hodin testified that 50% of his customers frequent his store from 11:00 A.M. to 4:00 P.M.; 15% come in from 8:00 to 11:00 A.M. and 35% come in from 4:00 to 9:00 P.M. While 3% would be the average sales of fresh bakery products in his stores, 5-6% is the total bakery products (fresh-baked plus commercially baked from an outside source, especially commercial breads). Muffins make up 1/2% of his sales. A customer could come in and buy a few donuts or muffins and nothing else, but that would be unusual, he said. He said that one could not buy donuts and eat them there in his store. When his store ran a donut special, it did so to compete with other supermarkets and not with Mr. Donut. His stores do not accept Mr. Donut coupons.

153. When questioned by the court as to why his stores did not try to sell donuts like Mr. Donut does with eat-in and counter service, Hodin explained that this would require special equipment, would take up space and increase labor costs. Supermarkets often have unionized workforces and the responsibility of employee benefit **[*60]** plans that would increase labor costs. Plaintiffs' law firm has represented Hodin on two prior occasions.

154. Plaintiffs' witness Bruce Frey ("Frey"), of Harborcreek, Pennsylvania, works for Target Marketing Co., a firm that solicits ads from advertisers and that solicits the right to run these ads on the back of supermarkets' cash register tapes. The supermarkets decide which ads will be run. Giant, IGA, and Acme in Northeastern Pennsylvania are some of his customers. Most of these stores (over half) have in-store bakeries and sell fresh and packaged donuts. Donut shops are among those businesses whom he solicits for ads, e.g., Dunkin' Donuts, Mr. Donut, Donuts Delight. None of these ads were ever rejected by a supermarket. Supermarkets, he said, generally prohibit him from offering ads from those whom they regard as competitors.

155. Plaintiffs' witness Arthur H. Griffiths ("Griffiths"), of Dallas, Texas, is presently the Vice President of Development for Pier One Imports. In the past, Griffiths has held positions as a site selector for several fast food chains, including Burger King, Scott's Fried Chicken, and Pizza Hut. He also worked in this area for TGI Friday's, **[*61]** a more "upscale" casual restaurant focused primarily on the lunch and dinner business. He holds memberships in the National Association of Corporation Real Estate Executives (NACR) and the International Counsel of Shopping Centers (ICSC). Griffiths was offered by the plaintiffs as an expert in the area of fast food restaurants, retailing and locations. The court permitted him to testify in his area of expertise - site selection - but did not permit him to testify as to future economic consequences.

156. Griffiths stated that he knew of unsuccessful recent attempts by Burger King and McDonald's to sell donuts from bakeries and donut shops. Such attempts were unsuccessful because of lack of variety, display problems, and problems with the perception of "freshness". He said that he believed that these two chains did not enter the breakfast trade to obtain the donut and coffee customer. He stated that the cost of these items would not have justified the investment in labor and other costs. He said that the two chains had not entered the breakfast trade before the 1970s because of their fear that customers would patronize a fast food restaurant only once, and they would thus lose **[*62]** some of their more lucrative lunch business.

157. Griffiths cited the Dairy Queen chain as an example of a business that had originated as an ice cream store that later branched out into the hamburger offerings. To do so, however, they had to divide their store space into separate ice cream and hamburger service areas.

158. Griffiths said that in his work as a site selector, he had never included a donut shop in his competition analysis. He said that he had recently conducted a "cannibalization" study for a Burger King lawsuit. A "cannibalization" study involves determining how much business will be taken away from existing stores in a chain by the addition of a new one in the chain. In doing his recent study for Burger King, he did not consider any donut shops. Burger King's "presentation packet" does not list donut shops as competition.

159. Griffiths said that there were many differences between fast food places and donut shops from a real estate point of view. Fast food places have larger lots, more square footage, and more parking. Donut shops are smaller, offer less seating, and are less costly. Griffiths expressed an opinion regarding whether fast food restaurants **[*63]** and donut shops are in the same market. He said that he does not believe that they are competing for the same properties. He, therefore, does not believe that they are in the same marketplace. He does not believe that they are competing for the same customers.

160. Griffiths testified that impersonal contact, and a segmented assembly-line preparation of the product are some things that separate a fast food place from a donut shop. For a donut shop to enter the fast food business, it would need further equipment, which would be quite expensive, and a larger building with more seats. He thought it difficult to retrofit existing buildings in order to do this. He also said that the names of donut chains would undercut their ability to move into the afternoon meal segment. Furthermore, given the heavy advertising expenditures of a McDonald's or a Burger King, donut shop chains could not compete in advertising.

161. When asked whether he thought that donut shop chains could enter the fast food market, Griffiths opined that, to do so, they would have to have larger properties and far more advertising. He did not think that Dairy Queen was a very successful hamburger entity. **[*64]** It is not perceived, he said, as one of the benchmarks to follow in the fast food industry.

162. Griffiths said that certain factors would militate against Burger King or McDonald's putting in a line of donuts. There are existing space constraints. Donuts would require the installation of donut-making equipment and displays. Stores would have to be enlarged. Maintaining freshness would be a problem, as would offering enough variety to satisfy customers. At present, he said, McDonald's and Burger King require that a new product must do at least 3% of sales in order to survive. Also, now, these chains try to add products that can be prepared in the store with existing equipment, as best they can.

163. Griffiths said that many factors would make it difficult for some new chain to enter the donut field in a large regional or national basis. He based his opinion on this in his experience in helping a prior employer, TGI Friday's, in its decision regarding the possibility of opening a new fast food restaurant concept called "Stripes". Also, before testifying, he had reviewed a Goldman Sachs offering from Dunkin' Donuts, a study of the donut industry prepared by a research company, **[*65]** and the offering statements of Dunkin' Donuts and Mr. Donut. He said that a new donut chain would have to contend with the market price for a large number of locations, competition with the advertising of the "established players" in the industry, and convincing the public on the idea that it is offering something new or proprietary.

164. Griffiths further stated that the costs of a fast food restaurant were far more than those for a donut shop. Burger King or McDonald's would require $ 250,000.00 to $ 300,000.00 worth of equipment versus a donut shop chain's $ 75,000.00 to $ 100,000.00 worth. Also, a Burger King or a McDonald's would require liquid cash of $ 300,000.00, while a donut shop chain would require $ 50,000.00 to $ 100,000.00. Also, since more employees are needed for a Burger King or a McDonald's, training is longer and labor costs are higher. Upon cross-examination, he said that he had no knowledge of the liquid assets of any plaintiff or of any Mr. Donut or Dunkin' Donuts franchisee and no knowledge of how many Dunkin' Donuts or Mr. Donut franchisees own more than one shop. He said that if a person had enough money to qualify for a Burger King franchise, it would **[*66]** not matter if an applicant had multiple donut shops or not.

165. Griffiths stated that there are many advantages to a franchisee in the expansion of a franchise chain. A larger chain generates more money, which can be tapped for advertising, and it also generates increased buying power for the group. Based on his experience in chain store development, Griffiths had an opinion regarding whether Mr. Donut franchisees would be injured as a result of an acquisition by Dunkin' Donuts. That opinion was, over a period of years, Mr. Donut stores would become Dunkin' Donut stores with the consequent public perception that something was wrong with Mr. Donut. This would work to the disadvantage to the existing Mr. Donut stores that remained. A smaller advertising budget would also result and there would be a potential for buying power to diminish. Furthermore, conversion of stores would cause a disruption in business. Certain brand-loyal customers might also stop patronizing a converted store.

166. Griffiths again explained what "cannibalization" studies are. He said that one almost never sees two McDonald's on the same street because that entity would be sharing the same customer. **[*67]** Griffiths said that a Mr. Donut converted to a Dunkin' donuts would have no guarantee that it would suddenly do the average business of another store's name. One must consider the individual store in an individual trade area for that store.

167. Griffiths stated that McDonald's buys its danish pastries from outside sources.

168. Griffiths said that a donut organization would regard McDonald's as substantial competition for the breakfast dollar, but not necessarily in the things that the donut shop would sell.

169. Griffiths stated that the increase in the number of stores in a franchise chain might be a detriment if most of them were in close proximity to the existing franchise organization. He did say, however, that if the Dunkin' Donuts franchise chain were to increase by approximately 350 units, it could be an advantage to Dunkin' Donuts franchisees. He also said that, depending on their costs of conversion, it could be an advantage to 350 Mr. Donut franchisees to convert to Dunkin' Donuts. There would be a detriment, however, in the loss of advertising dollars to the remaining Mr. Donut stores. On redirect examination, he said that if a Mr. Donut store were doing more **[*68]** sales at present than a Dunkin' Donuts store, conversion would not help them.

170. On cross-examination, Griffiths stated that although he had referred to diminished buying power previously, he had not had the opportunity to look at the actual prices the franchisees received. He also said that he had no idea whether remodeling would be done all at once or in stages during a conversion and that a customer's rapport with store personnel might be a factor in the continuation of that customer's patronage.

171. On cross-examination, Griffiths mentioned various places, e.g., fast-food restaurants, cookie shops, delicatessens, convenience stores to which he might go for items like sandwiches, croissants, soups, assorted beverages, bagels, cookies, chili, etc. Some of these items, he said, are also offered by Dunkin' Donuts. He said that, in the broad sense, Dunkin' Donuts is competing with Burger King, delicatessens, and Jack-in-the-Box places for ham and cheese on a roll. He also said that some people might go to Dunkin' Donuts for cookies rather than to a cookie store, or grocery and, thus, Dunkin' Donuts would be in competition with these thousands of stores. He was also **[*69]** questioned in the same vein regarding oat bran muffins, seafood salad, and brownies. He said that franchisees periodically expand product lines mainly to increase sales dollars. He also stated that when they go into a new product line, they are competing with anyone who sells that product line. He agreed with the statement that when Dunkin' Donuts goes into a hot sandwich, hot soup, cold beverage campaign, it is competing with those who sell lunch. He also agreed that when Dunkin' Donuts or Mr. Donut sells croissants, bagels, cookies, brownies, coffee, etc., it is fair to say that they are competing with sellers of that product.

172. Griffiths said that he knew that CREST (Consumer Restaurant Eating Share Trends) reports were a publication well-subscribed to in the restaurant industry. These reports concern segments of the consumer population who buy different products. He said that he did not consult any CREST work for his testimony.

173. Griffiths, on cross-examination, was cited to parts of a 1987 market study of the retail donut market prepared by a group from Washington, D.C., for Dunkin' Donuts. This document was one which he reviewed prior to testifying. He said **[*70]** that he had read these two sentences found in the study: "The effect of fast food chains offering breakfast has also negatively affected growth in the doughnut market" and "The source at Mister Donut

noted that the entrance of fast food chains into the breakfast food market has contributed to market saturation. Ten years ago, doughnut shops owned the breakfast business. Now, however, we need to be more aggressive marketers since fast food chains such as McDonald's have entered the breakfast market."

174. Plaintiffs' witness James W. Meinecke, Jr. ("Meinecke"), of Johnstown, Pennsylvania, has owned a Mr. Donut shop since November, 1987. The shop is located in Somerset, Pennsylvania. Prior to running the shop, Meinecke was a District Manager (Maryland, Virginia, District of Columbia and Northeastern Pennsylvania), a Regional Finance Manager (Maryland to Florida, Puerto Rico to Indiana), and a Regional Director of Development for Mr. Donut. He said that he has not paid franchise fees to Mr. Donut for almost a year. Sales are low in his store, in part because the intersection in front of his store has been closed in connection with road construction. He anticipates a brighter **[*71]** future when a nearby shopping mall opens in April, 1990.

175. As part of his duties as Regional Director of Development, Meinecke came into contact with persons who expressed a desire to become a Mr. Donut franchisee. He said that most of these persons had investigated Dunkin' Donuts and Mr. Donut franchises, but he did not recall anyone saying to him that he was looking at any other kind of franchise opportunity. He said that of seventy persons with whom he might have spoken regarding Mr. Donut franchises, perhaps ten or eleven actually bought franchise options. Not all of these may have become franchisees. He knew of two such persons who had opened franchises.

176. Meinecke identified several in-house documents and memoranda from Mr. Donut, which he had received as a Regional Director. These documents contained information referring to Dunkin' Donuts. Meinecke testified that he had not seen similar market analyses or annual reports of supermarkets, convenience store chains, or any fast food restaurant franchisor.

177. While employed by Mr. Donut, Meinecke occasionally filled out analyses of new locations. In small towns, he was instructed to include as "competition", **[*72]** convenience stores or supermarkets, i.e., anyone nearby who sold a donut. Personally, he did not believe that these were competition. In the larger market, such entities were not customarily included in that category, he said. He testified that while he priced Dunkin' Donuts stores, he did not price supermarkets.

178. Upon cross-examination, Meinecke read into the record sentences from various documents he had received. One was a "Mister Donut Focus Group Study, Pittsburgh Marketplace, April, 1980, reprinted for use Pittsburgh ADI Meeting, January 9th, 1985." (An ADI is an "area of dominant influence." An ADI group meets to discuss advertising plans). From that document, Meinecke read this sentence: "The qualitative research was designed to, number two, determine the image of various fast food restaurants, including McDonald's, Burger King, Taco Bell, Dairy Queen, Arthur Treacher's, Mister Donut, Dunkin' Donuts and Independent Bakeries." Also, the existence of this sentence was acknowledged by Meinecke: "Doughnut shops are frequented less often than other fast food establishments." Upon redirect examination, however, Meinecke read what was underneath that sentence: "Approximately **[*73]** five percent of time spent in fast food establishments is spent in a donut shop. This is because it is a specialty shop or a dessert shop, according to the panelist. Complete meals are not available." On re-cross examination, Meinecke acknowledged that this group study was prepared ten years ago.

179. Upon cross-examination, Meinecke acknowledged that a document regarding customer profile and site selections prepared by Melaniphy and Associates included "McDonald's" in the answer to this question: "Where else items similar to those bought at Mister Donut (Washington) are bought?" This was also a document Meinecke received at the ADI meeting referred to above. Upon redirect examination, Meinecke was asked to read from this document the percentage of people who answered "Nowhere else" to this question. That figure was 48.1%. Only 4.6% had answered "McDonald's". On recross-examination, however, Meinecke said that this study was approximately eight years old and that the marketplace for quick service restaurants had changed significantly.

180. Upon cross-examination, Meinecke acknowledged that he had written in the Store Visitation report for Charles Sheetz's Mr. Donut store **[*74]** in Punxsutawney, Pennsylvania, that a new supermarket with a full bakery had hurt his Mr. Donut shop.

181. Plaintiffs' witness, Morton Levin ("Levin"), of Northwood Manor, New York, is the retired President of Tempty Donuts, a wholesale donut bakery in Brooklyn, New York. He sold donuts to distributors in New Jersey, Connecticut and Pennsylvania. They, in turn, sold the product to restaurants, luncheonettes and lunch trucks. These donuts were somewhat larger and took 18 to 24 hours to reach the consumer. They were made from scratch, by machine, in fifteen varieties. In the heyday of the 1980s, he made 8,000 fresh donuts a day.

182. Levin stated that a retail donut was of better quality. Also, a frozen dough donut is inferior to a donut made from scratch at a donut store, he said. He never perceived himself as competing with donut shops and had never received a customer's request that he lower his prices in order to enable them to compete against retail donut shops.

183. Plaintiffs' witness, Charles H. Sheetz ("Sheetz"), was presented by videotaped deposition played to the court on March 6, 1990. Sheetz is the Real Estate representative and Director of Restaurant Operations **[*75]** for Sheetz, Inc., which runs six to seven restaurants and approximately 158 Sheetz convenience stores in Pennsylvania, Maryland and West Virginia. The Sheetz stores also own two Mr. Donut stores, one in Punxsutawney, Pennsylvania, and the other in Wilkinsburg, Pennsylvania. Currently they are seeking to sell the Mr. Donut shops in order to concentrate on their convenience stores. Sheetz was called by the plaintiffs to testify as to the differences between convenience stores and donut shops. Sheetz said that at the Sheetz convenience stores, he sells 1.8% in donuts and 2.5% in coffee. About 1/3 of his convenience stores offer donuts supplied in a branded display case, by a program with Dunkin' Donuts; the other 2/3 of the stores offer donuts supplied by a neighboring bakery or donut shop. Sheetz said that, several years ago, certain Sheetz stores sold Mr. Donut donuts. Sales of donuts went up with these; when the Mr. Donut donuts were discontinued, donut sales fell back. Sheetz also two locations, Wilkinsburg and Tyrone, Sheetz stores were located right next door to the Mr. Donut shops. In neither Sheetz store did the sales of donuts ever increase and he noticed no "cannibalization" **[*76]** of business between the Sheetz store and the Mr. Donut shop.

188. Sheetz said that Sheetz, Inc. also owns three "Sandwich Saloons" and one "Chicken Charlie's." These shops sell sandwiches, beer, and hoagies. They also sell a muffin, egg, ham combination for breakfast, plus coffee. Their Mr. Donut stores sell the Delaware donut, plus muffins, cookies, brownies and croissants. He did not think that the Mr. Donut shops were in competition with these sandwich shops. He said that he offered non-donut items in the Mr. Donut stores to help increase sales.

189. There are no on-premises bakeries at the Sheetz stores or at these sandwich shops, Sheetz said. At one time in 1984, Chicken Charlie's had sold fresh-baked goods, but that practice was discontinued.

190. Sheetz was shown Market Data Surveys and Store Evaluation reports for some of the Mr. Donut stores. While "competition" in these documents listed supermarket in store bakeries, Sheetz said that he would disagree with that. Nor does he perceive Burger King or Uni-Mart convenience stores to be donut shop competition either. He also said that he would not accede to the accuracy of this statement on his Punxsutawney Mr. Donut **[*77]** store Visitation Report: "New supermarket with full bakery has hurt sales. Also, right behind the shop there's a Riverside with full bakery and the Comet Market with a full bakery." The supermarket bakeries mentioned sell cake and not yeast donuts, he said. He added that since people do buy donuts in supermarkets, as well as donut shops, he would guess that is competition.

191. Sheetz said that once his company had briefly owned a Haagen Daz ice cream store. When they were considering buying a Mr. Donut franchise, he said that they had considered a Dunkin' Donuts franchise but no other franchises. He said that the motivation behind acquiring the Mr. Donut stores was extra space on land that Sheetz, Inc. already had.

192. Sheetz estimated that the Mr. Donut shops have about 1% sales in Delaware donuts. He also said that Mr. Donut sales broke down this way: one-third coffee, one-third donuts, and one-third baked goods. He said that baked goods are on the increase. He testified that there would be no room in the Sheetz stores to install on-premises bakeries. Also, increasing square footage and labor would not comport with the principles of a convenience store.

193. Sheetz **[*78]** testified that he did not believe that Mr. Donut stores in any way cannibalize the Sheetz stores' business. As regards individual bakeries near the Wilkinsburg Mr. Donut, Sheetz said that, although these bakeries' prices were cheaper, the Mr. Donut stores were still able to sell dozens and dozens.

194. Plaintiffs' witness Gary Oden ("Oden"), of Lewistown, Pennsylvania, owns three Mr. Donut stores, for which he has won several Mr. Donut awards. He has also been active in the Mr. Donut Advisory Council, has been a past president of the Mr. Donut National Dealers' Association which helped found The Buyers' Cooperative, and he has also devised a computerized program for Mr. Donut operators. He said that there is no Dunkin' Donuts store in Lewistown. According to his business records for the Lewistown store from 1977 to 1989, when Donuts & More, a store selling strictly coffee and donuts, moved in two and one-half miles away from him, his sales dropped. While that store was in existence from 1983 to May, 1985, his sales declined. Upon its closing, however, he said his sales had increased.

195. Oden stated that in 1980 a Weis supermarket opened near him in Lewistown. That supermarket **[*79]** had a full-line bakery, but it did not have any affect on his sales, he said. He also said that when a Weis supermarket opened in 1987 with a full-line bakery and donuts in showcases near his Lock Haven store, his sales did not decline, but increased.

196. Oden said that he had once been part of an experimental Mr. Donut program that sold sandwiches. After trying the program for nine months to a year, he discontinued it for lack of sales. The same was true, he said, of his efforts to sell Delaware donuts.

197. Oden testified as to his Lemoyne store, located in the Harrisburg area, which opened in 1988 and which lost money in the first two years of operation. It is earning money this year, however. Oden said that there are five Dunkin' Donuts stores already in the Harrisburg area and is the only other major chain. He would like to open another store in the Harrisburg area, but fears that that would not work because, even if he converted to a Dunkin' Donuts, the other Dunkin' Donuts would be in too close proximity to him.

198. Oden testified that Mr. Donut allows him to spend 2% annually on advertising for a store. An extra 1/2% goes to Mr. Donut itself. He appreciates **[*80]** the flexibility given him by Mr. Donut as to choice of media. Dunkin' Donuts, he says, requires its franchisees to "pool" their advertising.

199. Oden, upon cross-examination, said that 5-6% of his sales were of yogurt in the Harrisburg store, 4 1/2-5% in his northern store, and 1.7% in his Lewistown store. The Lewistown store had competition in the form of Dairy Queen and "Mom and Pop" shops.

200. Oden said that he, too, had received Gabellieri's letter promising to respect Mr. Donut's contractual commitments.

201. Oden stated, upon cross-examination, the entities near his Lewistown shop that either had fresh bakeries or serve quick service breakfast products. These included Sheetz convenience stores, Rubel's donut shop, McDonald's, Kentucky Fried Chicken, Wendy's, Hardee's, Arby's, Mini-Mart, Giant and Weis supermarkets. Near his Lock Haven store are McDonald's, Burger King and a Weis supermarket with a bakery. In the same town as his Lemoyne store are a Giant supermarket with a bakery, several McDonald's, a Hardee's, a Carne's supermarket with a bakery, Handi-Marts, Uni-Marts, a Pennsylvania bakery and three Dunkin' Donuts within two and one-half miles of his store and **[*81]** two Dunkin' Donuts stores on the other side of town.

202. Oden said that, in 1977, he had inquired about a Dunkin' Donuts franchise, when he was first thinking of his own business. He also said that he had considered going into the chair manufacturing business.

203. On cross-examination, Oden was presented with various store evaluation reports prepared by district sales managers. A 1989 report listed as yogurt competition for the Lock Haven store: TCBY, Baskins, and Dairy Queen. A 1986 evaluation report for the Lemoyne store said that the closing of a nearby Wendy's for breakfast helped to increase the Lemoyne store's sales. Oden said that he did not agree with that statement. A store report regarding the Lock Haven store, which has a Weis supermarket behind it, stated that sales had dropped "drastically" after

Weis opened a new bakery in 1985. Oden said that, to his recollection, sales did not do so. He said that was also the year when Piper Aircraft closed down.

204. An evaluation report for his Lewistown store had contained a remark regarding a steady decline in sales. Oden said that different times of the year prompt concerns about business. He followed a suggestion **[*82]** that his store stay open longer hours. He also said that he might have gone with a Mr. Donut representative to price the fresh-baked product in Giant and Weis supermarkets. He said that it would constitute competition if Weis and Giant sold donuts at $ 1.49 and he at $ 1.99. On redirect examination, he said that he does not regularly check the price of supermarket donuts and that his sales for the Lewistown store had gone up since 1985.

205. Oden said that the proposed acquisition would have a detrimental effect on him whether he remained a Mr. Donut store or converted to a Dunkin' Donuts store. He foresaw diminished buying power, sales and image, if he remained a Mr. Donut shop. He also thought he would lose out, should he convert. On cross-examination, he was read a sentence from a letter he had written to his own employees. This letter had said that the acquisition would not affect the stores at all, that Dunkin' Donuts would honor all contractual commitments and that everything should remain the same. Oden explained that he had written the letter to calm the upheaval among his employees and to forestall the resignation of his Lemoyne store's manager. The letter was **[*83]** also published in the Lewistown Sentinel, as a result of a brief telephone conversation Oden had with a reporter. Oden stated that this letter had been written after the Florida meeting of Mr. Donut franchisees with Dunkin' Donuts' officials. Other franchisees had told him about the Dunkin' Donuts plans for Mr. Donut mentioned at that meeting.

206. Oden was shown Market Data Surveys for his three stores. Although the price of donuts was cheaper in supermarkets, he said he did not price his donuts against theirs and did fear he would lose customers to the supermarkets. Although he ran coupon specials from time to time, he estimated that his coupon sales were only 7-9% of his business.

207. Plaintiffs' witness, Jerome B. Ruenheck ("Ruenheck"), testified via videotaped deposition shown to the court on March 7, 1990. At present, Ruenheck is a franchisee, under various corporate names, of multiple Burger King stores in Florida and the Pacific Northwest. He described Burger King as an entity that offered an array of fast food service items, primarily hamburgers, but including chicken, fish, fries, pie, drinks, coffee and breakfast (eggs, bacon, sausage). He had begun his **[*84]** association with Burger King in the late 1960s as a franchisee. He occupied various positions with Burger King, the most significant being: Division Manager, Company Stores Division (1970-1973); Vice President and Division Manager -- Division III (1973-1977); Group Vice President, Restaurant Operations; Executive Vice President, Restaurant Operations; President, Burger King, U.S.A. (1980-1982); and President and Chief Operating Officer, Burger King Corporation (1982-1985). Upon leaving the last-named position, he began his association with the multiple franchises mentioned above.

208. Ruenheck stated that, while employed in operating positions at Burger King, he had been involved with formulating marketing plans, developing advertising concepts, formulating menu strategy, selecting sites, reviewing competitor's activities, reviewing franchise packages offered to potential franchisees and monitoring those of others.

209. The court accepted Ruenheck as a fact witness and as an expert in the fast food business.

210. Ruenheck stated that there had been changes in the fast food industry within the past five years, e.g., the proliferation of various kinds of competition like **[*85]** pure drive-through places and regional chains going national. He characterized Burger King as a "fast food restaurant", but would not so characterize Dunkin' Donuts or Mr. Donut. He said that he and current Burger King executives, such as President Ron Petty, do not consider donut shops direct competition. He said that donut shops do not appeal to the same customer base that fast food restaurants appeal to. Burger King, he said, does not monitor donut shops.

211. Ruenheck said that he does not personally know the menu at a donut shop, although he assumes it would offer donuts, coffee and juice. He does not know the donut shops in his area, nor does he visit them. He monitors prices in places like McDonald's, Wendy's, etc., but not in donut shops.

212. Ruenheck said that in both his experience as a Burger King executive and as a franchisee, advertising would be monitored for fast food places like McDonald's or Hardee's, but not for Dunkin' Donuts, Mr. Donut or any other donut shop.

213. Ruenheck discussed factors involved in site selection. It would be advantageous for a Burger King to be located near a McDonald's, he said. In making site selections for his current business, **[*86]** he never considers Dunkin' Donuts or Mr. Donut locations because he does not worry about their impact on his business because they do not appeal to the same customer.

214. Ruenheck stated that when Burger King inaugurated its breakfast menu in 1977, they considered primarily what McDonald's was offering. To his knowledge, no one at Burger King considered what donut shops were offering. Burger King wanted to attract customers for a full-line breakfast, e.g., bacon, eggs, hash brown potatoes, toast, pancakes, etc. He said that, since he had not been in a Dunkin' Donuts store, he really did not know if there were a similarity between their offerings and Burger King's breakfast. To the best of his knowledge, neither he nor any other Burger King executive had to ascertain what would attract customers of donut and coffee shops to Burger King for breakfast.

215. Ruenheck said that in his Florida Burger King franchises, he does 12-14% of his business in breakfast; 60-65% in lunch, and the rest in dinner. His average breakfast ticket is $ 2.60 and breakfast business runs from 7:00 to 10:30 A.M.

216. Ruenheck stated that there has never been an attempt by Burger King to make **[*87]** donuts a national entree offering even on a test basis. He said that he does not see that adding or subtracting donuts would add another customer to the bottom line.

217. Ruenheck said that Burger King does not serve fresh ground coffee. A Yuban "test" did not generate sufficient sales to justify its cost and so that brand was not continued.

218. Ruenheck was asked this question: based on his experience in the hamburger and fast food industry, would it be realistically feasible for a donut and coffee chain to enter the fast food market in the same sense that a Burger King is a fast food restaurant? He said that such entry would be extremely difficult and listed such obstacles as the existence of good competition; need for larger lots, kitchens and dining rooms; need for more equipment and for retraining management and crews; the need for massive marketing; and the need for more parking spaces.

219. Ruenheck also opined that for donut shops to offer a full-line breakfast, it would still be a challenge. Kitchen space and equipment would be a problem. More training would be necessary, as would more marketing against McDonald's and Burger King. He said that a company needs **[*88]** to find a "hook" to give it a leg up over the established competition. Not even Burger King has been able to knock out McDonald's for breakfast.

220. Ruenheck said that it would not be economically feasible for a company like Burger King to introduce the concept of fresh-baked donuts. Donut shops have quality, he said. He said that his franchises were not planning to offer fresh-baked donuts in the next two or three years. Burger King, he said, was not focusing on "ancillary" breakfast products, including fresh-baked donuts, for the next two or three years, either. Making donuts would require floor space most restaurants do not have. There would also be a need for costly equipment like a new venting and hood system, as well as refrigerated storage and new display cases. Training would also be involved. The cost could run to $ 25,000.00, he said. Moreover, Burger King does not have a consumer image as a source of fresh-baked donuts and premium coffee.

221. Ruenheck defined a franchise as a license to operate under a specific trademark within the parameters of the franchise agreement. A franchisee buys someone else's expertise, marketing and system. He said that a Burger **[*89]** King franchisee needs a one to one and-a-half debt equity ratio exclusive to real estate. The land and building could run about $ 650,000.00 to $ 725,000.00. The equipment package could cost $ 215,000.00 to $ 240,000.00. Burger King would choose a site for a new franchisee. He and his Burger King colleagues reviewed other fast food franchise package offerings, but none for Dunkin' Donuts, Mr. Donut or other donut and coffee shop chains.

222. Ruenheck said that there were differences between the type of candidate attracted to a fast food franchise like Burger King and a Dunkin' Donuts or Mr. Donut franchise. Burger King demands greater net worth. With the donut shop franchise, the property is smaller, the equipment less expensive and the labor, training, and marketing less intensive. A Burger King would demand more complicated managerial skills.

223. Ruenheck stated that he could think of only a couple of persons who had expressed an interest in a donut shop franchise as well as a Burger King. Burger King, he said, would regard as comparable franchises Hardee's, Denny's, Sambo's and fast food franchises offering hamburgers, chicken or fish. He said that Burger King does **[*90]** have franchisees who have also had some donut chain franchises at the same time; Burger King did not consider these a same or similar business. Burger King, he said, thinks it competes in the franchise category with the fast food hamburger chains.

224. Ruenheck listed the various breakfast items at Burger King. Bagels, danish and croissants were among them. Pancakes have been offered from time to time and donuts have been test marketed. Ham has also been offered. He estimated his gross breakfast sales to be about $ 110,000.00.

225. Ruenheck agreed that who his competitors are may vary according to the parts of the day. He also said that, as a franchise owner, he looks at local and national markets.

226. Ruenheck was cited to certain parts of a recent CREST Report. He said that he would not change his opinion regarding donut shops as not part of his competition even though a 1989 CREST report had said that donut shops have lost ground in the breakfast market since 1985, in particular, to hamburger and convenience stores. He said that he would have to lose customers to the donut shops to consider them his competition and that lost business would have to include gross volume. **[*91]** He said that his customers generally do not come in just for a danish or donut and a coffee. Donut shop and fast food customers want different things.

227. Ruenheck said that a 1989 CREST report statement that Burger King had a larger share of that breakfast market than Mr. Donut did would not change his opinion as to not knowing whether or not donut shops consider Burger King as competition.

228. Ruenheck testified that a 1989 CREST Report statement that consumption of donuts and sweet rolls went up in 1989, but these gains were primarily realized by hamburger shops and not donut shops, would not change his opinion that he does not compete with donut shops.

229. When asked to name franchises less costly than a Burger King, Ruenheck mentioned no dining room, double drive through fast food restaurants like Checkers, a Kentucky Fried Chicken, an Arthur Treacher's, or a Long John Silver.

230. Plaintiffs' witness Henry W. Roever ("Roever"), of Scranton, Pennsylvania, operates three Mr. Donut stores. One of them was sold to him by witness Hodin, who operates a supermarket on block away. Roever stated, that when Hodin ran a donut special in January, 1990, that did not affect **[*92]** his donut sales. Roever also said that he puts Mr. Donut ads on the back of supermarket cash register tapes, even where the supermarkets have bakeries that sell donuts. He stated that he does not survey donut prices in supermarkets or convenience stores nor does he survey coffee prices in convenience stores or fast food places. He checks prices at Dunkin' Donuts and Donut Delight once a year or so. He said that when Donut Delight first opened, he noted a drop in sales. Roever stated that he has had a recent test program for croissant sandwiches. Initially, he sold fifteen per week per store; sales are lower now.

231. The areas explored in Roever's direct and cross-examinations were similar to those explored with other witnesses who were owners of Mr. Donut stores. He was questioned from the Market Data Surveys for his stores. He testified as to the generally lower supermarket prices for donuts and lower convenience store prices for coffee and lack of customer complaints about his somewhat higher prices. He also testified that he sells other baked items in addition to donuts and listed them, such as pie squares, cheese cake, muffins, etc. He estimated that he makes about **[*93]** 58% of his sales in coffee, about 18% in donuts and about 15% in other pastry products and about 10% in juice and sodas.

232. Roever said that there is one Dunkin' Donuts and five Donut Delights in the Scranton area. He defined a competitor as someone who was a seller of coffee and donuts for about 24 hours a day. He said he would view McDonald's as a competitor if they started selling fresh-baked donuts. He said that there would probably be a problem in freshness if such donuts were transported and then stocked in McDonald's display cases.

233. Roever acknowledged making this remark: "I understand fully that sales have been dropping and can assure you that I am as concerned as you because I believe 100 percent, the times are changing and we must offer a full line of quality baked goods along with doughnuts in order to assure our place in the market." He explained that "market" meant his community.

234. Roever stated that his egg and meat combination on a roll would compete with similar products sold by others in the community. When asked by the court how he prepared the Delaware donuts he used to sell, Roever replied that it was done in the oven. He also stated, in response **[*94]** to a question by the court, that this aroma would affect the "smell" of a donut shop. The court inquired whether he could prepare burgers for breakfast. He answered that since he had no grills, he would have to install a lot of equipment.

235. Plaintiffs' witness Richard J. Haefner ("Haefner"), of Cape May Courthouse, New Jersey, owns a Mr. Donut shop there. Haefner testified that many of his customers had expressed concern to him regarding the proposed sale of Mr. Donut to Dunkin' Donuts. He also said that he, too, offers a broad product line in his store.

236. Plaintiffs' witness O'Hanlon was recalled to the stand. He is the inventor of the Delaware donut. He described to the court how he invented it, how it takes four hours to make, and how it is a more labor intensive and complicated product. He estimated that his stores sell 3-6% in Delaware donuts. He testified that the opening of nearby supermarkets with fresh bakeries did not hurt his sales. When Dunkin' Donuts stores opened, however, he lost sales. Customers tender Dunkin' Donuts coupons to him but not fast food or convenience store coupons.

237. O'Hanlon estimated that he made only 5% profit on Delaware donuts **[*95]** as opposed to a 15 to 18% profit margin with donuts. He acknowledged that in deposition testimony he had said that supermarkets sell the same type of muffins as he does. He also testified that he would not introduce hamburgers into his store because that would take his store out of the realm of the basic coffee and donut business. He said that the Delaware donut, although comprised of meat, did not really have an overwhelming smell in a donut shop.

238. Plaintiffs' expert witness, Dr. French, resumed the stand on March 8, 1990, and plaintiffs moved to quality Dr. French as an expert in the field of economics and antitrust analysis in the field of acquisitions and mergers and as an expert in the field of survey research. (A separate plaintiffs' expert was to be heard as to the admissibility of the survey work French did for the instant case). Defendants did not object to his qualification as an expert with respect to the field of economics. Dr. French's testimony was accompanied by Plaintiffs' Exhibits 300 to 346.

239. Dr. French discussed the research he had done in preparation for this litigation. In addition to discussions with some of the plaintiff franchisees, reviewing **[*96]** documents provided by the defendants, and interviewing other parties, including six or eight donut shop franchisors other than the defendants, Dr. French conducted field research in two Pittsburgh areas and one Allentown area. He collected information on donut shops, convenience stores, supermarkets, bakeries, and other retailers. He also designed and collected -- with the assistance of four associates from his firm -- a donut shop store survey of donut shop customers at three Mr. Donut shops in the same communities where he did other field research. The three shops he chose belonged to plaintiff-franchisee Jones, plaintiff-franchisee Muth, and a non-plaintiff named Berardi. The survey was intended to study the attitudes and behavior of donut shop customers. He said that there were no significant differences in the results from the three shops.

240. This survey, Dr. French said, was mainly conducted by four associates. All of them had college degrees and some had post-graduate degrees; none of them had had very much experience in conducting surveys, however. On cross-examination, Dr. French acknowledged that these associates were aware that this survey was connected to the **[*97]** instant case. While in the field, Dr. French discovered an error in one of the skip pattern instructions and endeavored to correct it. He corrected some and his associates corrected the rest. He told the interviewers to make

sure that the change was made before they used the instrument. The erroneous skip instruction occurred between numbers 8 and 9 of the survey and originally read: "If No or Don't Know, Go to No. 10"; it should have read: "If Yes, Go to No. 10."

241. Dr. French said that the survey had been started at 6:00 or 6:30 A.M. on February 22 and had been concluded on the morning of February 24, 1990. Copies of the 366 completed survey questionnaires were produced to the court.

242. On cross-examination, Dr. French acknowledged that there were some 560 Mr. Donut shops, but he had chosen three of these. He said that time was limited for a survey. He was cited to a remark in a deposition of another professional, Dr. Myron Glassman, who had said that according to accepted survey techniques, it would be preferable to avoid taking a survey at the store of a franchisee-litigant whose customers had already expressed their support for him. Dr. French stated that he had **[*98]** chosen the shops he did for reasons of time and practicality. He had asked plaintiff Jones to select two stores in Pittsburgh; plaintiff Muth he had spoken to himself. He estimated that there were eight to nine thousand donut shops in the United States. He said that even without the survey, he would still have reached his conclusions.

243. On cross-examination, Dr. French said that he would not want it to happen that the erroneous skip instruction should not be changed. He was, however, confronted with numerous errors found among the survey questionnaires. In 135, the skip instruction between questions 8 and 9 was either not corrected or erroneously corrected. A few other questionnaires also contained other errors. Dr. French said that he had not personally reviewed each questionnaire. He and Marilyn Hand, a research associate at his firm, did a summary of the survey data. He did not personally check the data entry and coding into the computer.

244. Dr. French stated that he had subcontracted the interview process to professionals in a survey done in a Michigan case for Pop-Eye's Fried Chicken. He said that he has never given testimony before any court regarding a face-to-face **[*99]** field interview for which he was responsible. He would not sell himself as an expert in sample design, like Dr. Glassman, he said, but he does create sampling results in his work. Dr. French said that he has never held himself out for hire solely as a market research surveyor. He was never hired, he said, just to conduct a public consumer survey. This is the first time he has done an on-premises, public face-to-face consumer survey. Dr. French stated that, while it is not perfectly done, he believes that that does not mean that it does not have meaningful results. He said that, to the extent that Mr. Donut customers are typical of other doughnut shop customers, it is fairly representative.

245. On redirect examination, Dr. French stated that, during a break given for that purpose, he had reviewed the questionnaires with the erroneously corrected skip instruction and had concluded that in all but four instances, the instructions were followed regardless of this. On a later redirect examination, Dr. French said that he had had the chance to review the vast bulk of the questionnaires and caught perhaps five or six more errors. So, he said, there were now ten to fifteen errors **[*100]** out of the total 3000 possible responses.

246. The court, despite some concerns over the survey, permitted Dr. French to testify and to rely upon the poll.

247. Dr. French summarized for the court his conclusions concerning the relevant markets in the instant case. His conclusions addressed the end product market and the franchise market. He said that the end product market for donut shop products is the cluster of products and services typically provided by donut shops, the most important of which are donuts and coffee. He went on to say, that while he has not focused as much on the franchise market as he has on the end product market, he had concluded that there is a market for low cost, highly specialized menu, prepared food franchises.

248. Dr. French stated that the geographic dimensions of the end product markets are quite localized, including many markets within one metropolitan area. He said that he had not been able to ascertain the geographic dimension of the franchise market. He concluded nonetheless that there would be an effect on competition on these two markets by the proposed acquisition. He said there would be quite harmful competition that would be

sustained **[*101]** for an intolerably long time on the end product market if the acquisition goes through. He also stated that there might well be an adverse effect on competition in the franchise market as well.

249. Dr. French explained the nature of the donut shop business. He said that donut shops sell mostly coffee and donuts. From a Mr. Donut Market Data Survey, it is clear, he said, that over 80% of their sales are strictly coffee and donuts. Adding in other beverages like milk, fruit juices, etc. - items which he characterized as part of the classical components of what a donut shop sells - would boost the percentage to 88.2% products that the donut shops have always sold before the trend toward menu diversification had begun. He characterized muffins, brownies, cookies, and croissants as products "complimentary" to the traditional donut and coffee products. Adding their sales would come to 92.7%. Finally, he said that adding in categories of products that might be considered as consumable for lunch or dinner, such as Delaware donuts and biscuits with sausage, would add only 1%, and soup and chili only less than 1%. This brings the computation up to 94%, he said. All other products **[*102]** would equal only 5.7%. He also remarked that from the Dunkin' Donuts data he had received these results were similar.

250. Dr. French stated that the Mr. Donut chain does 55% of their sales between 6:00 A.M. and noon, and he found this point significant. He said that the fact that they sell coffee, donuts and complimentary products in the early morning hours before most other potential competitors would even be open has a great deal to do with his conclusions about there being a separate donut shop market. He also said that the aspects of quality and freshness, the service offered in a donut shop, the display cases and even the aroma constitutes a particular kind of franchise concept, a particular mix of products and services that is unique and that no one else duplicates except in another donut shop. This also plays a part, he says, in his finding that there is a separate market.

251. Dr. French stated that in both the Mr. Donut chain and the Dunkin' Donuts chain there are a high percentage of regular customers.

252. Dr. French testified that there were a total of 8557 donut shops in the United States. In his prior appearance before the court he had presented a chart with **[*103]** the total of approximately 4000 such shops; he now corrected this figure. He said, though, that 3121 of the 8557 were mostly single store operators in one local market. Chains like Winchell's and Daylight have no stores east of the Mississippi River. He said that in the eastern part of the United States, there are only Dunkin' Donuts and Mr. Donut that are really competing head-to-head. Other larger chains tend to be only regional ones. The really small chains, he said, are likely to compete only in one or a few states.

253. Dr. French stated that Dunkin' Donuts is the only really nationwide chain. Since many chains are quite local or regional, they are not all competing against each other, so the 8500 units around the country is not meaningful for existing competition, he said.

254. Dr. French stated that the competitive effects of this proposed acquisition would be felt most heavily in the eastern part of the United States, since both Dunkin' Donuts and Mr. Donut have a disproportionate share of their total number of units in the east and they have, separately and together, larger shares of the number in sales of donut shops in the east. He said that although Dunkin' **[*104]** Donuts has only 20% of the donut shops (1700), it has 33% of the nationwide sales. Mr. Donut has 5% of such sales. He said that Dunkin' Donuts is in a better position in the industry than any other chain.

255. Dr. French testified that Dunkin' Donuts had a 25% share of the number of donut shops in Mr. Donut's six census region areas in 1988; Mr. Donut had a 10.7% share. This indicated to him that Mr. Donut is a stronger competitor, at least in terms of numbers, against Dunkin' Donuts in the east, in the regions of the country where it operates, than it is all across the country.

256. Dr. French also stated that, from examining donut shop "occasions", i.e., payments of checks, Dunkin' Donuts had 57% of them and Mr. Donut, 5.2% of them in the Northeast. Thus, their total share in this part of the country would be 62%. For other regions, it was: 63% for Dunkin' Donuts and 7% for Mr. Donut for 70% in the Mid-Atlantic region; 26.3% for Dunkin' Donuts and 13.6% for Mr. Donut for 30.9% in the East North Central region; and 47.6%

for Dunkin' Donuts and 19.8% for Mr. Donut for 67.4% in the South Atlantic. Dr. French further stated that, when one limits "occasions" to one category **[*105]** like donut shops, occasions are a very close approximation of sales.

257. Dr. French was asked to describe to the court what a relevant product market is. He said that such a phrase as "competing for the breakfast dollar" would not be the term used by an economist. What was important, he said, was trying to determine what would happen if one type of seller raised its prices. To whom would that seller lose customers? He tried to see if donut shops would lose sales to fast food restaurants, mid-scale restaurants, convenience stores or supermarkets, and any other entity selling coffee and donuts, if donut shops raised prices. The idea, he said, is to find all available evidence of what the substitutability would be in response to a relative price change. Once that is determined, one can define the relevant markets. He said that there is not a separate market that could be defined as all eating establishments that sell breakfast.

258. Dr. French testified that all fresh donuts sold by all retailers are not in the same relative market. The question, he said, is whether these other sellers of fresh donuts would be able to restrain prices. He stated that he did not think that **[*106]** if donut shops as a group raise their prices to some degree, that they would dramatically lose sales to other fresh donut retailers. A "small" price change might be 5%, he said, but that figure could vary according to the particular industry's custom. Dr. French further remarked that the "uniqueness" of a donut shop with its particular cluster of products and services might in and of itself insulate them from competing with some other entities.

259. Dr. French discussed his visits to convenience stores, fast food places, diners, restaurants and supermarkets near donut shops in the Pittsburgh and Allentown areas to see on what basis they sold donuts and coffee. He wished to see whether they could compete with donut shops if these donut shops raised their prices. The data on this issue was collected by him and three associates. He found the coffee inferior in quality and freshness at convenience stores; their donuts lacked volume, many varieties and frequent delivery. Supermarkets did not offer fresh-brewed coffee and their unpackaged donuts were limited in variety. The hours of supermarkets were also important. Many opened only at 7:00 or 8:30 A.M. He concluded that convenience **[*107]** stores and supermarkets do not sell donuts or coffee in a way that is likely to restrain the prices of a donut shop.

260. Dr. French testified that convenience stores lack volume in donuts and would have to change the way they currently operate to offer more. They would also need extra labor to keep the coffee freshly brewed. With supermarkets, a customer could not sit down to relax and eat a donut. They could only compete for the carry-out business and the sales in dozens rather than singles. The "image" of a donut shop is the sale of fresh donuts and very high quality, fresh coffee.

261. Dr. French stated that he had visited some fast food restaurants and diners. The former offered some danish pastries, but no donuts. Coffee was brewed, but not freshly ground; he could not judge its freshness in the fast food places. Diners also had brewed coffee and carried a limited number of donuts. Dr. French said that he did not see how these entities could restrain donut shop prices without drastic changes in their product mix and method of operation. He said they certainly could not do this quickly enough to offset the kind of competitive harm he believes this acquisition would **[*108]** cause.

262. Dr. French had also done price comparisons for donuts and coffee in the Pittsburgh and Allentown areas. Supermarkets offered fresh donuts at lower prices. This indicated to him that they and donut shops were not in competition. Were that so, he said, customers would be going to supermarkets for their fresh donuts now. He said that the qualitative difference of a donut shop plus its cluster of products draws customers in. He said that supermarkets are not price-competing and would be unlikely to restrain donut shop prices. He also found that fast food places do not stress coffee in their franchise concept and offer it as a complimentary product. He said that the same might be said at diners. He believed that neither fast food places nor diners could restrain donut shop coffee prices. He also added that convenience stores might have higher prices, but then they primarily sell "convenience". He said that price comparisons also led him to believe that there is a separate donut shop market. None of these entities, he said, would restrain donut shop prices.

263. Dr. French testified that another indication that consumers would not view fast food products as substitution **[*109]** for donut shop products lies in the higher price differential of the average fast food ticket as opposed to the donut shop ticket.

264. In 1987, Dunkin' Donuts had authorized an attitude and usage survey. Dr. French referred to this study which inquired as to why consumers bought donuts from donut shops and why they bought them from supermarkets. This study indicated that the vast majority bought donut shop donuts for quality (84%) rather than convenience (20%). Supermarket donuts were rated lower on quality (14%) but higher on convenience (82.8%). This indicated to Dr. French that the public might perceive supermarket donuts as not as good as their donut shop counterpart. It also indicated to him that people bought donuts in supermarkets because they were already there. He believed that this, too, indicated that supermarkets would be unlikely to restrain donut shop prices.

265. Dr. French had categorized the responses he had received from his survey questionnaires into tables. He summarized for the court what his respondents had conveyed regarding their purchases at the Mr. Donut shops, their reasons for going there, and their likelihood of continuing to patronize the **[*110]** shops, were prices to increase, and certain other matters. Dr. French said that his survey indicated that coffee and donuts were the products most often purchased. Since this result was close to data compiled by Mr. Donut and Dunkin' Donuts themselves, he thought that his respondents were pretty typical of donut shop customers. His respondents were also found to be frequent patrons. Dunkin' Donuts attitude and usage survey also found frequency of patronage in their shops. Most respondents were aware that they could buy donut shop products cheaper at a McDonald's or a supermarket, but they said they would buy the donut shop products mostly for qualitative reasons and occasionally for convenience. This was akin to the results in the Dunkin' Donuts attitude and usage survey that the public believes in the superior quality of their product. When asked if they ever go to a convenience store, supermarket or McDonald's for coffee, donuts or another donut shop product, 60% said that they never go. This indicated to Dr. French that there is a large core of donut shop customers who would not make a special trip to another type of retailer just to buy these. It also indicates, he said, **[*111]** that there is a core of customers who perceive donut shops as quite different from other eating establishments. Seventy-six percent of the respondents said "less often" when asked the frequency of their purchasing donut shop products at McDonald's, supermarkets or convenience stores vis-a-vis Mr. Donut. Also, 87% said that they would still buy coffee and donuts at slightly higher prices ($ .05 to $ .10 for coffee; $ .05/each and $ .25/dozen for donuts). Of these, 87.2% said they would still buy as much or come as often. This indicated to Dr. French that there is brand loyalty to the products or the concept of the donut shop and to a Mr. Donut shop, in particular. Dr. French said that this survey reveals a very strong price insensitivity and loyalty to the brand and to the shop. He thought this true of Dunkin' Donuts' customers and those of other donut shops, as well. He said that all of this indicated that donut shops could raise their prices without a tremendous shift of customers to fast food places, supermarkets or convenience stores.

266. Dr. French testified that other testimony buttressed his conclusion that there is a relevant product market in the donut shop concept. **[*112]** He mentioned the prior testimony of witnesses from supermarkets, convenience stores and Burger King. While the trade literature indicates that donut shop franchisors think that they do compete with these entities, he believes that this might only be true in a very broad sense of competing for "the breakfast dollar", he does not think it true in the economic sense. Donut shops compete with other donut shops. Over a very long period of time, supermarkets and other entities might offer the same thing as a donut shop, but until that occurred, he believed that donut shops could keep prices high enough for a long enough period to extract monopoly profits from the public.

267. For the end product market, Dr. French defined the geographic market for each donut shop as its local trading area. In the survey, he had inquired as to how far the respondent drove to get there. From the results, he concluded that the primary trading area would be within three miles of the donut shop and the secondary trading area would be within five miles of it. In researching trading areas, he also chose the Pittsburgh and Allentown areas for his field work on existing donut shops: Mr. Donut, Dunkin' Donuts **[*113]** and independent donut shops. To assist the court, Dr. French had prepared maps of these areas with varied colored pins to indicate the locations of Dunkin' Donuts (red), Mr. Donut (green) and independent (yellow) donut shops. Dr. French also prepared charts of distances between these various shops and estimates of the impact of the proposed acquisition on competition and the

number of shops. (See e.g., Plaintiffs' Exh. 340). Dr. French stated that what the chart indicated was that competition would be eliminated or reduced in a number of trading areas. He added that this would assume that the Mr. Donut brand is eliminated or converted to a Dunkin' Donuts and that some other brand is not replacing Mr. Donut in the same trading area.

268. Dr. French was asked about the possibility of entry into trading areas by other donut shop operators, either chains or independent shops. He thought this unlikely to happen, especially in the eastern markets where Dunkin' Donuts and Mr. Donut are already concentrated. He thought it critical that these are the two largest donut shop chains with the most markets and most mature franchise system in the industry who are merging. Potential **[*114]** competition from these two into any existing markets is much greater than from other chains. He said it was unlikely that a smaller existing chain in another part of the country could jump to the eastern half of the country and enter all of these different local markets that will be affected by the merger. Some of the difficulties that regional chains would face involve management, distance, product distribution, advertising, and the need for a large number of shops to achieve economies in purchasing power. Even if such chains could penetrate these five hundred odd trading areas affected by the acquisition over time, they could not do so quickly enough to eliminate the possibility of monopoly profits for a period unsatisfactory to economists.

269. Dr. French stated that he did not think that independent donut shops could replace or restore the competition represented by Mr. Donut, since these shops often already find their situations difficult. They lack economies of advertising, purchasing and distribution. He also said that convenience stores and supermarkets would have to change radically to replace the type of donut shop concept of a Mr. Donut. Even if they decided to **[*115]** do so, implementation would not occur overnight. Nor could McDonald's or another fast food restaurant step in successfully. He cited need for more space, equipment, and advertising.

270. When queried as to whether McDonald's or another corporation could develop a separate donut shop chain of its own, Dr. French said that it would take years and considerable investment in real estate and product development to do so. Usually, he said, an entrepreneur and not a corporation develops such a concept. He also said that it would not be possible to recoup the investment if the project failed.

271. Dr. French thought the barriers to entry very significant. In many markets, there will be a reduction in the number of brands because Mr. Donut will not exist there. If it is not replaced by another important strong competitor, there will be a reduction in competition in many local markets. Any restored competition would take years to accomplish and, in the meantime, Dunkin' Donuts would likely have a monopoly, he said.

272. When asked to address the franchise market issue, Dr. French said that buyers for low cost franchises would be a different group from buyers of full-line menu franchises. **[*116]** He thought that the number of sellers in the low-cost franchise group was likely to remain static. He compared the costs of certain low-cost franchises like Mr. Donut, Dunkin' Donuts and Baskin-Robbins with those of fast food restaurant franchises like McDonald's. The former were far less costly than the latter. In terms of affordability, he said, many potential franchisees could not buy the fast food franchises. He acknowledged that Mr. Donut, Dunkin' Donuts and Baskin-Robbins were just representative of low-cost franchises and that there were a lot of other low-cost franchise concepts. A low-cost franchise is also less labor intensive and is often family run. He admitted that he had been unable to test this low cost, limited menu item franchise market in the way he had tested his belief in the end product market. Time constraints prevented him from so doing, he said. On cross-examination, he said that his conclusions regarding a separate low-cost prepared food retailing franchise were fraught with concerns.

273. Dr. French testified that, if this acquisition went through, defendant Allied-Lyons would have 5500 outstanding franchises in the low-cost franchise market. **[*117]** He, therefore, said that there was a potential for some lessening of competition in this market, too. Allied-Lyons currently owns Dunkin' Donuts and Baskin-Robbins. French said that he thought that the acquisition of Mr. Donut would have an impact on the franchise market in that, Allied-Lyons, with three of the top chains in the low-cost franchise market under its control, might have a chance to exercise some degree of market power.

274. Dr. French had prepared a chart for "Net Profit Margins of Restaurant Franchisors in the Value Line." He noted the very high net profit margin of Dunkin' Donuts. He said that if a company is exercising any degree of monopoly power, the ability to charge higher than competitive prices in any fashion, it will tend to earn higher profits in more competitive enterprises. Dr. French said that the high figure for Dunkin' Donuts made him wary of allowing it to acquire its second largest competitor when it is making a very high return compared to other franchisors in the industry.

275. On cross-examination, Dr. French agreed with the Department of Justice criteria that a price increase could be made unprofitable by any of four types of demand or supply **[*118]** response: consumers' switching to other products; consumers' switching to the same product made by firms in other areas; producers of other products switching existing facilities to the production of the product; and producers entering into the production of the product by substantially modifying existing facilities or by constructing new facilities. He added that there would have to be enough significant substitution to bring the price back down.

276. On cross-examination, Dr. French was asked whether the complaint contends that the franchise markets are somewhat different from the way that Dr. French defined them. Counsel for plaintiffs agreed that insofar as the complaint alleges franchise markets different from those testified to, the complaint shall be amended accordingly.

277. On cross-examination, Dr. French was asked about expanding his list of firms in the franchise market. He was read a number of food chains that comprised 7336 outlets. He agreed that Domino's Pizza, with its 4738 outlets, should certainly have been on his list. He explained that his chart was just intended to show the court that there are a sizeable number of these low-cost, prepared food franchise **[*119]** systems, but there are a more limited number of sizeable ones with any kind of distribution and regional or nationwide brand awareness. He added that there may be 25,000 to 35,000 franchises from different chains that are not on his list. He said that perhaps his concern is not as serious as he first thought in the franchise market.

278. Dr. French said, on cross-examination, that it is also possible to buy an existing franchise from a franchisee. Also, one could buy an independent business. The latter, however, lacked the continuing support and other long-term advantages of the franchise system. He agreed that the ability of the consumer to switch to non-franchise powers of non-franchise products could make unprofitable any exercise of a franchisor's market power. He agreed that established franchise chains are expanding and new chains are formed every year.

279. On cross-examination, Dr. French was presented with a chart he had prepared for a previous case in Detroit for Pop-Eye's Fried Chicken. In that chart, he had included other fast food restaurant franchises that were twice as costly as Pop-Eye's. He said that he did not include entities twice as costly as donut **[*120]** shops with donut shops, because he believed that the typical buyer would be a "Mom and Pop" type of buyer.

280. On cross-examination, Dr. French was asked which factor he thought was restraining any increase in Muth's donut prices in Allentown. He replied: the possibility that someone might try to enter that area. Dr. French was also questioned as to the number of convenience stores, bakeries, supermarkets, etc. he chose when investigating their capacity to restrain Muth's prices. He said he only visited a "representative" group. He narrowed down retail bakeries and convenience stores because of their great number in the telephone directory. He acknowledged to counsel that he did not purport this to be a scientific sampling. In Allentown, he went into perhaps 10% of the outlets in the area.

281. On cross-examination, Dr. French was asked a hypothetical regarding convenience store's offering quality coffee and donuts and its effect on restraining Muth's prices. He replied that only if that concept multiplied would it restrain prices. He did not believe this would occur because of barriers he had already discussed.

282. Dr. French was asked by the court about an HHI and **[*121]** the geographic markets. Dr. French replied that the real geographic markets are the little local trading areas. He did not calculate an HHI because he did not have the individual sales data for each year in an HHI. He said that if there are only six sellers with equal market shares, the 1800 threshold is reached. In almost all of these trading areas, he said, there are fewer than six with probably unequal sales, so it would be hard to imagine that there would be many, if any, that would not exceed the 1800

threshold. He did not think it necessary to try to calculate it. Moreover, he said, he could not literally calculate it because he did not have the individual store sales figures. Upon cross-examination as to the figure "six", he said that there might be some other sellers similar enough to a donut shop that perhaps could have been included in the analysis.

283. Upon cross-examination, Dr. French discussed the trading area and its five mile radius which he acknowledged could be rather large (75 miles). Dr. French reiterated that from the entities he had studied in the area of Muth's donut shop in Allentown, he did not think that they influenced Muth's prices to the degree **[*122]** necessary to restrain them. If coffee prices were similar at local convenience stores, quality was a factor that had to be considered.

284. On cross-examination, Dr. French was asked many questions regarding how one ascertains how consumers view other products as close substitutes for donut shop products. Dr. French agreed that if consumers view other products as close substitutes for donut shop products, those other products should be included in the relevant product market if that means that they would react significantly to a change in the relative prices between donut shop offerings and other sellers. He was asked about McDonald's danish pastry. He said that if there were significant switches to this, when a donut shop changed its prices, that could constitute economic substitution and then it would be in the relevant market. He said it would not hurt to see if there is some substitution going on between donuts and danish pastry in response to the relative prices.

285. On cross-examination, questions addressed to Dr. French focused on the issue of what products, like danish, would be substitutes for donuts. Dr. French said that convenience stores and supermarkets could **[*123]** not stock sufficient volume and the coffee and danish offered by McDonald's was unlikely to attract the donut shop customer because the quality was not the same.

286. Upon cross-examination, Dr. French agreed that if donut shops had lost business to McDonald's that that would be an indication that they are competing for the breakfast dollar. He added that he could not conclude from that alone that this would restrain prices. He would say that donut shops and McDonald's are in the same market only in a very general kind of way, competing for the total breakfast morning occasion market.

287. Upon cross-examination, Dr. French was presented with a copy of an affidavit which he had submitted in connection with a case in Detroit for Pop-Eye's Fried Chicken and with a copy of a trial transcript of his testimony for Pop-Eye's Fried Chicken in a case in the Eastern District of Pennsylvania. Defense counsel pointed out inconsistencies between his prior opinions for Pop-Eye's and the opinions he had given in the instant case. In one part of the affidavit, he acknowledged that he had included donut shops in all "fast food" because they happened to be in CREST data which he had utilized. **[*124]** Dr. French agreed that, had he to do that part of the affidavit over again, he would have excised the category of data containing donut shops and recompute the percentage. In the trial transcript, he had also concluded for Pop-Eye's that all fast foods, all brands, all types of fast food sales, are in one market. In the affidavit, he had also defined the franchise market more broadly than he did in the case at bar. He had opined in the Pop-Eye's case that Pop-Eye's could not exercise economic and monopoly power in the market for fast food franchises, "in view of the large number of fast food franchisors and Pop-Eye's tiny share of the market for fast food franchisors." In the trial transcript, he had stated that results of his study showed that all fast food were considered alternatives or competing goods or substitute goods among the buying public.

288. Cross-examination of Dr. French yielded certain information about his survey questionnaire for the instant case. It did not make any effort to ascertain whether there were any products other than coffee and donuts which the customers regarded as alternatives. The wording of the questionnaire was phrased to exclude all people **[*125]** who bought anything at a supermarket in addition to donuts. If respondents did not go, for example, to the supermarket, just to buy donut shop products, it excluded them. In this respect, the survey results did not parallel those of the CREST data upon which he relied in the Pop-Eye's litigation. The questionnaire's question regarding paying a higher price was left open to interpretation as to whether other outlets were also charging higher prices. The question regarding distance driven to reach the shop could have been replaced with the more precise method of having the respondent locate his trip on a map. The determination regarding the radius of trading areas was reached, in part, by combining information from the two Pittsburgh areas and the one Allentown area, although

driving distances for customers in Pittsburgh were longer than those for customers of Muth's store in Allentown. Dr. French said that the trading area may be smaller than three to five miles.

289. Defendants' witness, Malcolm M. Knapp ("Knapp"), is the head of Malcolm M. Knapp, Inc., Marketing Research and Analysis. For the past twenty years, he has done estimates and forecasts for the size and scope of **[*126]** the food service industry for the National Restaurant Association, among other clients. He has also been an advisor to the U.S. Department of Census on the definitions to be used in the restaurant field. He said that he is responsible for the definition of a restaurant as opposed to a fast food restaurant. His data has been included in the Statistical Abstract of the United States, published by the U.S. Department of Commerce, Bureau of Census. His published material is also in the National Restaurant Association, America's large trade organization relating to the food services industry. He testified that his census estimates of eating places is generally regarded as highly accurate. Knapp was qualified to the court as an expert in the food services industry. He was presented by the defendants to give expert testimony on the effect on competition in the food services industry of the consummation of the proposed acquisition.

290. Knapp opined that, in his professional opinion, the effect of the proposed acquisition, if any, would be to increase competition in the food services industry. He said that "food service" is viewed as all food consumed on premises for immediate consumption **[*127]** or consumed or bought and carried out for immediate consumption. He described how there was a phenomenal growth in the food services industry beginning in the 1970s, fueled by the entry of working wives into the workforce. Today, he said, that growth is slowing down and the industry is maturing.

291. Knapp stated that the food services industry now breaks down into four "day" segments: breakfast, lunch, dinner and snack times. McDonald's had successfully broken into the breakfast segment when only coffee shops and hotels were offering breakfast. They did it by heavy advertising of a basically good product. McDonald's now does 18-20% of its business in breakfast. He said that Dunkin' Donuts currently has a breakfast half of business and has lunch as another "day" part plus an afternoon snack market. When asked to express an opinion as to the extent, scope and vigor of the competition in the United States in the breakfast segment, Knapp replied that it is becoming an extremely competitive segment. Since it has peaked and stopped growing, competition gets much more intense and there is a fight for market share.

292. Knapp explained why he thought that the proposed acquisition **[*128]** would enhance competition in the breakfast day part of the marketplace. He said that being large was an important component of being able to survive and to be successful. It increased the ability to do more advertising and to increase distribution outlets. He said that the strategy of the major fast food players has been to try to dominate markets so that they can increase advertising. In effect, he said, the proposed acquisition will increase competition because the increased dollar volume will increase advertising and expand distribution.

293. Knapp testified that Winchell's, a donut shop chain on the West Coast, was having financial difficulties and had sold off certain units to Pizza Hut. Winchell's, because of an absence of Mr. Donut or Dunkin' Donuts, had the donut shop market largely to itself and still they could not succeed. He said that they were competing with all the fast food and coffee shop businesses.

294. Knapp testified as to the issue of the lunch trade. He said that Dunkin' Donuts was going through a menu and product proliferation to try to get more out of its investment base. He said that, for the most part, fast food and sandwich places were Dunkin' **[*129]** Donuts' competitors for the lunch trade. He also said that the theory that customers would only eat once in a fast food restaurant was not really true; they do come more than once a day.

295. Knapp described the snack times of the day as 10:30 to 11:30 A.M., late afternoons, and 9:30 to 11:00 P.M. Competitors in this market are ice cream and yogurt places, donut shops, cinnamon bun shops, convenience stores and grocery stores and supermarkets with snack bars. Pizza would also be included.

296. On cross-examination, Knapp was read the definition of a fast food restaurant found in the census bureau definition and the SIC codes. In his prior deposition, Knapp had said that the Dunkin' Donuts restaurant was

something unique in that it did not fall neatly in any one definition; it straddles both the fast food and restaurant definitions because of the existence of some sit-down counter service. When asked about the inclusion of donut shops in the SIC code for bakeries, Knapp stated that the retail chief of the census bureau had recently told him that donut shops would fall into the restaurant rather than the bakery category. Knapp, on redirect examination, said that in the restaurant **[*130]** classification they compete with all other providers of meals and snacks in the day parts, i.e., breakfast and lunch.

297. On cross-examination, Knapp agreed that a donut shop shares certain attributes of a fast food restaurant, of a restaurant, and of a bake shop.

298. On cross-examination, Knapp was asked if Dunkin' Donuts competed with places like Denny's and Friendly's Ice Cream for the "mid-scale market" given their average ticket price. Knapp said they did in the breakfast and snack segments.

299. On cross-examination, Knapp stated that he had not made an analysis of the effect of the proposed acquisition on the price of fresh donuts to customers of donut shops. He also said that if the acquisition does not take place, it is not necessarily true that competition will decrease; it might stay the same. He had not studied the issue as to who else could buy Mr. Donut with a resulting increase in competition.

300. Defendants' witness, George Rice ("Rice"), is a founder of the CREST Report. Prior to his association with CREST, he had been employed by other companies, including Dunkin' Donuts in the 1960s, and had reached the rank of Regional Vice President for the **[*131]** Midwest Region. CREST is an acronym for "Consumer Reports on Eating Share Trends". He described the CREST Report as an authoritative source designed to track all away-from-home consumer purchase behavior with regard to foods prepared away from home and consumed either in restaurants or outside of restaurants. Virtually every major food chain is a subscriber to it, he said. So, too, are food service manufacturers. Currently, he is Chairman and Chief Executive Officer of GDR Enterprises, a marketing consulting company specializing in consulting to the restaurant industry. One of his clients is CREST, to whom he provides product development, marketing and public relations services.

301. Rice explained what the CREST data bank is. CREST uses the "diary panel" in its research. CREST has 17,000 households that have been preselected as part of this panel. Care is taken to achieve a geographic and demographic balancing. By tracking this group's particular purchasing behavior, it becomes an effective projection device to indicate what the 94 million households in the United States would be doing. Data is collected from these households eight weeks a year. He said that there are **[*132]** over 400,000 "occasions" of dining, i.e., customer visits, for an annualized period within this data base. He also said that the data base would have over one million food and beverage items reported. He stated that no other data base in the country has the size and comprehensiveness that CREST does.

302. Rice stated that the major chains in the restaurant industry use CREST data, as do major food service suppliers. Rice described the CREST data as an industry service.

303. Rice was introduced by the defendants to provide expert testimony in the following areas: (1) the evolution of the restaurant industry in the United States from 1970 to the present; (2) the competitive environment in the restaurant industry in the United States during the period; (3) the quick service or fast food restaurant community as relevant to the businesses of Mr. Donut and Dunkin' Donuts; (4) the market relevant to competition in which Mr. Donut and Dunkin' Donuts exist; and (5) proper survey techniques in conducting face-to-face intercept interviews in the field.

304. Rice stated that the restaurant industry is broken into three major segments: quick service, midscale, and upscale. Mr. Donut **[*133]** and Dunkin' Donuts would belong in the quick service category, he said. He stated that it is important to remember that in the restaurant business, one is running a series of businesses, a series of segments that add up to the total business, rather than one business that is comprised of many segments. He said that there are four segments: breakfast (including the morning snack); lunch; dinner; the afternoon or evening

snack. One must also consider whether food is consumed on or off-premises and whether it is consumed on the weekday or the weekend.

305. Rice testified that he had prepared, in 1987, a "Mr. Donut Consumer Opportunity Analysis, July 17th, 1987" ("1987 Analysis") (Defense Exh. 19). Excerpts of his conclusions were read to the court. The document had said that hamburger restaurants filled a convenience weekday need that was previously being filled by donut shops in the quick service restaurant (QSR) segment. It also stated that donut category companies had let this critically important meal segment escape by not reacting to the potential consumer need for a convenience breakfast. Competition encroachment had victimized the carry-out donut category. This analysis **[*134]** also found the overall industry in disarray since 1983. It said that industry saturation in most areas had been reached, leaving the assessment and strategy development at the unit trade area level to become far more critical. Furthermore, this analysis stated that this was a market share environment and that market penetration and dominance will make the big become bigger and drive out all other players.

306. Further excerpts were read from this 1987 Analysis, which had found that sales in the donut category from 1983 had lagged behind the QSR segment. This document said that numerous chain companies were emerging within individual regions and would represent significant direct competitive threats against which marketing strategies should be planned. It found the Mr. Donut donut category to be very reliant on the breakfast-morning snack meal period. The analysis also concluded that the competitive encroachment had not come so much from direct competitors as from indirect fast food competitors in the hamburger sandwich categories.

307. This 1987 Analysis declared that the donut category had not kept pace with the rest of the food service industry and that Mr. Donut was faced **[*135]** with some difficult marketing decisions. The changing marketplace and competitive saturation were the likely cause of a steady loss of market. In varying degrees, all donut category concepts have to compete with a limited and narrow product line which is not the focal point for the primary business segments in which they have high market share needs and where increasing costs of market expansion make the realization of acceptable margins extremely difficult. Donuts, it said, are questionable as a means of independently supporting an entire retail positioning effort.

308. The 1987 Analysis further remarked that competition, while coming from product line competitors, also comes from indirect business segment competitors like fast food, hamburger and convenience stores that satisfy weekday need and midscale varied-menu places that satisfy weekend need. This competition, with its much broader business base, has major resources to improve consumer awareness.

309. The 1987 Analysis listed under "Competitive Environment" food service industry companies, bakery companies and retail supermarkets. Also, competition was found in fast food retail outlets who specialize in breakfast **[*136]** along with other meal occasions.

310. According to the 1987 Analysis, in 1983, and in 1987, McDonald's sold more donuts or sweet rolls than Mr. Donut did. McDonald's, in a five year period, sold seven to eight times the amount of coffee sold by Dunkin' Donuts and Mr. Donut together. McDonald's domestic outlets numbered 7500; Dunkin' Donuts and Mr. Donut combined numbered about 2000. Rice said that simply having more stores would not account for McDonald's selling seven to eight times the amount of coffee.

311. Rice identified the "Mister Donut Consumer Opportunity Analysis, May 18, 1988" ("1988 Analysis" found at Defense Exh. 20) as a report he had prepared for Mr. Donut in 1988. Excerpts were once again read from this document. Many of the same ideas about competition were expressed here and the late afternoon/late evening snack segment was also found to be subject to major share gains by hamburger and retail categories. The 1988 Analysis did not find Mr. Donut well-positioned for the 1990s. It concluded that the product line was too narrow and that reliance on breakfast created a vulnerability. It stated that the donut category's only real strategic point of difference **[*137]** is questionable freshness of a higher quality product that can be bought from non-donut specialty retailers. The 1988 Analysis recommended either expanding in a retail environment by repositioning or, if not so inclined, the development of a divestment plan.

312. According to the 1988 Analysis, in the 1983-1988 period, McDonald's sold more donuts or sweet rolls than Mr. Donut. McDonald's, Hardee's and other fast food restaurants sold more coffee than did Mr. Donut during this period. Forty percent of cakes, pastry and tortes are sold through quick service restaurants and, of that 40%, 8 1/2% are sold through hamburger category chains, and 9.3% are sold through convenience stores and supermarket food service outlets. Donut shops did not make the chart because their volume did not warrant it.

313. According to the 1988 Analysis, 64% of cookie servings are done through quick service restaurants; of that 64%, 21% are in the hamburger chains. Donut shops, once again, were not listed because their volume did not warrant it. Nor were they listed for the same reason when it came to soft-serve ice cream. Eighty-two percent of that is sold through quick serve restaurants. Forty-eight **[*138]** percent of croissants are sold through quick service restaurants; 17% of that figure is sold through hamburger chains. Donut shops sell only 7.4%.

314. Rice identified for the court "Mister Donut Consumer Opportunity Analysis, June 1989" ("1989 Analysis", found at Defense Exh. 24), a document he prepared for Mr. Donut in 1989. He had also made a verbal presentation to Mr. Donut regarding this report. Rice had told Mr. Donut in 1989 that while the quick service restaurant category, as a whole, increased during the period 1985-1989, the donut segment suffered a decline. The increase was attributable to increases in the hamburger chains and the retail or convenience store segments.

315. According to the 1989 Analysis, again McDonald's sold more donuts or sweet rolls than Mr. Donut. Dunkin' Donuts' share had declined while that of McDonald's and Hardee's had gone up. Also, McDonald's, Hardee's and other fast food restaurants all served more coffee than Mr. Donut and Dunkin' Donuts combined. The results for sales of cakes, pastries, tortes, cookies, soft ice cream, and croissants were the same as for the other prior analyses: donut shops' percentage of sales were either insufficient **[*139]** to be on the chart or were always much smaller. The analysis concluded that a significant restructuring of the restaurant industry was taking place with many of the old trends and correlations changing. Rice said that he still held that opinion today.

316. Rice described to the court how, in recent years, the quick service restaurant industry, in which Mr. Donut and Dunkin' Donuts operate, has changed. Before 1979, the industry was categorized by the primary products it sold. Demand far outstripped supply. In the 1979-1983 period, supply and demand started to catch up. Customers became more sophisticated. The industry first started to lose customers and had to make modifications. From 1984 to the present, there has been a battle for the market share. Today, the market is in competition with itself. The year 1989 showed a growth of only .5%, while units grew at around 5%. Costs, meanwhile, have increased. Rice said that today growth lies in off-premise consumption. The traditional on-premise restaurant has declined every year since 1984, he said. Recently, too, supermarkets have posed a challenge. Some chains are beginning to enter the food service business. He cited **[*140]** to partially baked products that can be finished at home. He said that supermarkets had an impact on businesses that focus on bakery products because supermarkets provide an opportunity for a fresh-made product of a much wider variety sold to a consumer while they are doing something else they have to do. They do not need to go to a Dunkin' Donuts or a Mr. Donut shop. He foresaw future competition by supermarkets. He thought it important to realize that the consumer has a choice of a variety of products and marketing must take that into account.

317. Rice was asked what effect the proposed acquisition would have on competition in this market. He believed that it would create a much stronger chain by combining together Mr. Donut and Dunkin' Donuts. The ability to create a larger penetration of restaurants within particular markets allows every dollar spent to build consumer awareness and preference for particular products. He did not think that the proposed acquisition would have any effect on the price of donuts.

318. Rice was asked questions about Dr. French's face-to-face survey of customers at three Mr. Donut stores. He thought it preferable to hire independent professionals **[*141]** for such a task and also thought taking a survey at Muth's store too fraught with concerns about bias to provide reliable data.

319. On cross-examination, Rice was asked if he knew any Dunkin' Donuts persons because of his prior employment with that company many years ago. He said that he had an acquaintanceship with Tom Schwarz and

Robert Rosenberg. He had reported to Schwarz while he was at Dunkin' Donuts. He is also acquainted with Fred Huggins, until recently the President of Mr. Donut.

320. On cross-examination, Rice said that he had not done a customer sharing analysis for the instant case. Such a study takes the buyers of a particular chain and determines their purchase behavior when they are not there.

321. On cross-examination, Rice was asked by plaintiff's counsel what would happen in his prior analyses, if coffee servings at places like Pop-Eye's or Kentucky Fried Chicken were taken out. He said that it would create a data base that was left strictly with direct competitors to Dunkin' Donuts and Mr. Donut, which would make the situation look even worse. He did say that coffee sales at dinner in such places as Burger King, Denny's, etc. were included in his **[*142]** analyses.

322. On cross-examination, Rice stated that his reports do not indicate at what level of price a customer would shift from a donut shop to another purveyor. Rice also said that quick service restaurants have had a significantly negative impact on the donut category, a segment that is now declining, not growing.

323. On cross-examination, Rice was asked questions from figures on his 1989 Analysis about the percentages of breakfast, lunch, dinner and evening snacks served at Mr. Donut and at quick service restaurants. Eighty-five percent of Mr. Donut's business was in breakfasts, as opposed to 11% for quick service restaurants. Mr. Donut did 5% lunch business and quick service restaurants did 37%. Mr. Donut did 10% afternoon, dinner and evening snacks and quick service restaurants did 53%. He also added that Mr. Donut had virtually no dinner business. He said that some coffee and cake sales in his chart would be made in the dinner meal figure in his chart, but he saw no reason to exclude these from his charts.

324. On cross-examination, Rice's attention was directed to a chart following his 1989 Analysis dealing with "Meal Occasions" and distribution of customer **[*143]** traffic. This chart showed an increase in the Breakfast/AM snack percentage from 1984 to 1989, while the lunch percentage remained the same and the afternoon-evening snack percentage declined.

325. On cross-examination, plaintiffs' counsel pointed out to Rice that his charts for the 1989 Analysis indicated that the vast majority of Mr. Donut and Dunkin' Donuts' customers were buying donuts and sweet rolls (mostly donuts) and that the figures in sales stayed roughly the same in the period covered by the Analysis. The 1989 Analysis also showed that a third of the time a customer walked into a Mr. Donut store he purchased a cup of coffee. The figures also indicated that very few customers would walk into a Mr. Donut or a Dunkin' Donuts for a breakfast sandwich. He agreed that there are a significant number of people who go to donut shops to buy coffee and donuts. Rice added, though, that other entities who had entered the breakfast market were costing donut shops a market share because some customers would be satisfied with a breakfast sandwich, coffee and juice where previously they would have gone to a donut shop.

326. On cross-examination, Rice stated that he had not previously **[*144]** done a review of the average check size of McDonald's or Burger King.

327. On cross-examination, Rice stated that there were six census regions where Mr. Donut has significant unit distribution and the New England, Mid and South Atlantic states were three major regions.

328. On cross-examination, Rice's attention was directed to the "Strategic Options" part of his 1988 Analysis for Mr. Donut. Among the options were: concentrate expansion efforts in highly penetrated markets with best ratios of consumer demand against supply/competition and support stronger marketing programs and the existing franchisee base; acquisition of existing regional donut shop competitors to replace market share rather than development of new franchises to "steal" market share; sell the Mr. Donut chain to a breakfast/snack marketer. This part also said that, given the fragmented nature of the competitive marketplace, Mr. Donut could quite readily become the dominant marketer in this donut shop category.

329. On cross-examination regarding these "Strategic Options", Rice's attention was also directed to the statement that Mr. Donut had great potential strength in the product, financial and information **[*145]** resources of

International Multifoods. He acknowledged that although the "Strategic Options" section mentioned doing a series of consumer and concept exploration research efforts regarding the "repositioning" of the current concept of Mr. Donut, Mr. Donut had not asked him to do so. Nor had they asked him to do a study regarding expanding to a broad-based bakery-type concept, another possibility found in "Strategic Options". The same was said of the "Strategic Options"' concept of identifying current consumer perceptions, awareness and reasons/use of donut and other compatible bakery and snack products by consumer type within alternate competitive retail areas. Nor was he asked to estimate the type, size, cost, etc. of potential retail options which might emerge from further study. He acknowledged that Mr. Donut had also not asked him to do a comparison between supermarkets, convenience stores and donut shops in terms of consumer preference, but he added that Mr. Donut already had amassed a variety of information on its own.

330. On cross-examination, Rice's attention was directed to more sanguine excerpts from his 1989 Analysis in the "Competitive Environment" section, e.g. **[*146]** , improvement in donut category performance in 1989 over that of 1988, with Mr. Donut's performance exceeding the donut category with significant gains in both sales and traffic, a 3.6% increase in the number of commercial donut shops in the United States in 1988; and a significant increase in average check eater which enabled the donut category to rebound from the prior year with an overall 6.4% gain.

331. On cross-examination, Rice's attention was directed to a statement from the Offering Memorandum on Mr. Donut Business in United States and Canada, October, 1989, which reported an increase of 5% in the same store sales over the previous year. His attention was also directed to the 1989 Goldman Sachs & Co. Offering Circular prepared for Dunkin' Donuts with its summary of systemwide sales. Rice said, though, that any increase would reflect increases in whatever new units were added each year.

332. On redirect examination, Rice was asked to name the competitors of Mr. Donut and Dunkin' Donuts in each of the day parts for which he compiles data. He said that, in the breakfast day part, for in-store or on-premise consumption, it would be a range of sandwich or hamburger shops **[*147]** in particular and convenience stores. For the off-premise breakfast, it would be, in large part, all other retail bakeries, all supermarkets, and again all quick service entities such as the hamburger and sandwich category outlets. In the afternoon and evening snack, which is the second largest part, it would be a considerably different group of competitors. It would be everyone who really sold a snack product. It would include a Mrs. Field's cookie; it would include everyone who is in the bakery business. It would include Dairy Queen's selling ice cream products. It would also include a wide range of snack items, which would be alternatives to eating a donut. As to the lunch business, Dunkin' Donuts and Mr. Donut's business is considerably smaller. Both have made a concerted effort to get into this business. It provides them an opportunity to utilize a facility in a fixed cost investment.

333. The court inquired of Rice what advice he would give to the president of Dunkin' Donuts or Mr. Donut or some other donut chain regarding the handling of their stores in the future and any prospective diversification in products. Rice replied that, in the case of Mr. Donut, his feeling **[*148]** was that, with the resource offered by International Multifoods, the appropriate course of action would be to broaden the base to more of a bakery-type of environment and possibly to add on certain types of products, such as cold sandwiches, salads, and a variety of similar items. Given Multifoods' understanding of the bakery marketplace, they could probably bring to the table a product development capability that would be rather unique. They could get Mr. Donut up and operating with a line of products, because they, as a food conglomerate, make all these products for other competitors in the marketplace, a line of products that would give them a much more defendable base. Of the three options, this was the one which he had strongly encouraged them to follow.

334. Dr. French resumed the stand for continuation of his cross-examination after the appearance of witness Rice. Dr. French said that, in examining the competitive effects of the proposed acquisition, International Multifoods' role as a supplier to donut shops and other food retail organizations might be relevant. It might also be relevant, he said, to examine whether International Multifoods might have sold the stock **[*149]** of Mr. Donut to someone other than Allied-Lyons.

335. Dr. French, on cross-examination, reiterated his views on the following: no "national" markets for the sale of donut shop products; local markets with a three to five mile radius; the importance, in this case, of the "cluster" of

products sold by a donut shop with regard to the relevant market; the donut shop "image"; the considerable probability that this proposed acquisition has for causing donut shops (Dunkin' Donuts, Mr. Donut, and independents) to raise coffee and donut prices; unlikelihood that other business entities, e.g., convenience stores, would restrain these prices; factors, like quality, which explain a customer's purchase of Mr. Donut coffee, even if it is higher than coffee at a convenience store; that only intense competition from other donut shops now restrains prices; his refusal to "unbundle" a donut shop's products in assessing competition in this case; his conclusion that donuts and coffee are free from that effective competition other than from other coffee shops in general.

336. On cross-examination, Dr. French said that he had seen trade literature expressing the view that the entry of the fast **[*150]** food chains into the breakfast sector and the proliferation of bakery deli sections exposed donut operations to increased competition. He said that he had not seen any trade literature expressing a view one way or another as to whether donut shops are not constrained by the prices of other entities.

337. On cross-examination, Dr. French reiterated his views that convenience stores would be unlikely to compete as sellers of donuts, either branded or unbranded, although he acknowledged that he was aware that some convenience stores have gotten into the baking business in a "big" way.

338. On redirect examination, Dr. French stated that even if Muth initially lost customers after he converted to a Dunkin' Donuts, after a transition period he could probably regain most of them. He also said, in response to a hypothetical, that Muth might be charging less for his coffee than Dunkin' Donuts does because he fears competition from Dunkin' Donuts.

339. On redirect examination, Dr. French said that, after hearing Rice and Knapp, he does not feel less strongly about his description of the relevant market in this case. He said that he believes that at some point in the future donut shops **[*151]** will evolve into something quite different than what has heretofore been known and that other fast food restaurants may also change their format substantially. He added, though, that he does not think this affects the relevant market in this case, since these changes take a long time to come about. During that time, he said, the remaining donut chain would have the potential to exercise market power. He did not believe that there was any imminent danger that donut shops would disappear in the immediate future.

340. On redirect examination, French stated that the relative market share data would not be an accurate indication of whether donut shops were losing out in the battle for market share, because there is a separate market for donut shops which is different from the overall market for QSR occasions presented by Rice.

341. On redirect examination, Dr. French's attention was directed to certain trade magazines. In Restaurant Business, reference was made to the donut category. French said that the literature had been affected by Rice and his definitions. He has a donut category and others tend to use his data and thus adopt that category. Quotes were read from Baking **[*152]** Magazine regarding the expensive equipment convenience stores would have to buy to bake their own donuts and the prospect that this would not earn back enough profit to be feasible. Dr. French said that this was consistent with the views he had previously expressed.

342. On redirect examination, Dr. French's attention was referred to Sheetz's videotaped deposition and his testimony that his removal of Mr. Donut donuts from his convenience store caused sales to fall back down. Dr. French stated that this was an indication that the buying public would prefer branded products.

343. On redirect examination, Dr. French testified that the fact that one can quickly and easily buy donuts in a carry-out style from a donut shop has an effect on the substitutability of donuts sold at supermarkets. If supermarkets are considered "convenient", he said, that would only be in the situation where the customer was already in the supermarket to begin with.

344. On redirect examination, Dr. French testified that the proposed acquisition would have a broader effect than just the effect on local markets. Since Dunkin' Donuts and Mr. Donut are the two biggest donut shop chains, the proposed **[*153]** acquisition would cut from two to one the number of potential entrants into new markets.

345. On redirect examination, Dr. French said that there was a possibility that the proposed acquisition could have an effect on competition from regional chains, "Mom and Pop" stores and small donut chains in that suppliers might choose to sell to the big chain over them.

346. On redirect examination, Dr. French said that an important consideration from a Justice Department or judicial point of view as to whether the proposed acquisition should take place is whether there are other large potential purchasers who could sustain the Mr. Donut chain through investment.

347. On redirect examination, Dr. French expressed some reservations about Rice's option for Mr. Donut in purchasing regional chains, but agreed that, with International Multifoods' bakery products experience, it was possible that Mr. Donut could grow and become a significant challenger for the top spot in the donut business.

348. On redirect examination, Dr. French stated that he had viewed danish prices in the area around the courthouse to see how McDonald's and other fast food danish prices compared with donut prices of **[*154]** Dunkin' Donuts. The former were about $ .20 higher than the latter and that indicated to him that danish is not competing with the donuts. On cross-examination, he said that such a review was not a scientific survey, but only his observations.

349. On redirect examination, Dr. French stated that even if Dunkin' Donuts ran Mr. Donut as a separate trademark or company, he did not expect the same kind of intensive competitive rivalry to be maintained. Dr. French also explained that including every possible fast food outlet in the Pop-Eye's litigation in describing the relevant market was done because Pop-Eye's share would be smaller, the greater the number of restaurants included.

350. On redirect examination, Dr. French was asked a question regarding the "others" category, in a table in his "Pop-Eye's Share of Fast Food Franchises" affidavit, in the Pop-Eye's litigation. He said he did not include any donut shop or any ice cream shop or other very limited menu snack type place in there unless he had reason to believe that they also served a wider range of products and one could buy a meal there.

351. On recross-examination, Dr. French was asked regarding a chart he had prepared **[*155]** for Reasons for Purchasing Donuts at Dunkin' Donuts and Supermarkets (found at Plaintiffs' Exh. 323). He acknowledged that the source of this chart was American Consulting Corporation, Dunkin' Donuts Attitude and Usage Survey, February 1988, as reported in a memorandum of August 27, 1987 to Sid Feltenstein from Kim Lopdrup. Defense counsel quoted from that memorandum to the effect that "Supermarkets are our leading competitor for donut sales." The memorandum then cited percentages: 29.7% of respondents who purchased donuts from Dunkin' Donuts in the past year said they would have gone to supermarkets if Dunkin' Donuts were closed; 29.1% would have gone to other donut shops and much less would have gone to other competitors. Respondents who purchased a dozen or more donuts on their last purchase named supermarkets by 35.9% to 29.6% over donut shops, thus indicating that supermarkets are especially strong competitors for large quantity purchases. Females named supermarkets over donut shops by 35% to 24.5%. Dr. French explained that these percentages assume the hypothetical that Dunkin' Donuts is closed, not that it raises its prices. He is, thus, not sure how meaningful these **[*156]** results are for substitution in relation to relative prices. He also found the response card to be somewhat leading. He said, though, that he had not ignored these responses in his analysis. On redirect examination, French stated that in many trading areas, a supermarket may be the only alternative source for donuts.

352. On recross-examination, Dr. French was again cited to a section of the August 27, 1988 memorandum that expressed the conclusion that supermarkets were Dunkin' Donuts major competitor and that this role would likely grow due to the rapid growth of supermarket in-store bakeries. Dr. French stated that this conclusion by Dunkin' Donuts would come from their looking at competition for the breakfast dollar rather than what an economist looks at in defining relative markets.

353. On recross-examination, Dr. French acknowledged that he looks at competition more in the terms of franchisee Muth than in the terms of Rice, Knapp, Mr. Donut or Dunkin' Donuts. He would not, however, embrace Muth's narrow definition of competition as persons who do "exactly the same" as he.

354. On recross-examination, Dr. French agreed that if two entities compete with one other, they **[*157]** belong in the same market.

355. On recross-examination, Dr. French said that he might still choose Muth's store to include in his survey, had he to do it over again. He is not sure how many of Muth's customers even know about the merger, let alone have strong feelings about it.

356. On redirect examination, Dr. French testified that from the quarterly marketing reports he had seen from Dunkin' Donuts, the relationship between the price of supermarket donuts and donut shop donuts supports his conclusion as to whether supermarkets are competitors, or are viewed as competitors, by Dunkin' Donuts in the way they undertake pricing of donuts.

357. Defendants' witness, Dr. J. Walker Smith ("Dr. Smith"), holds a doctorate in mass communications research from the University of North Carolina at Chapel Hill. He is presently a Vice President and Chief Operating Officer for Marketing Spectrum, which is a full-service customer research firm in the marketing research industry. This work includes interviews with consumers and the design of customized research to address marketing and, sometimes, research and development issues of their clients. About half of their business has been with **[*158]** food service clients, largely fast food and midscale restaurants. He is also Vice President Elect of the Marketing Research Division of the American Marketing Association.

358. Dr. Smith was retained by the defendants to examine and to review the consumer field study conducted by Dr. French. He was offered to the court as an expert in the field of consumer field survey market research, for this limited purpose of commenting upon Dr. French's survey.

359. Dr. Smith first discussed generally accepted survey principles. Dr. Smith then testified that he had assessed Dr. French's survey as to design and implementation. He concluded that the data are not of the sort that would allow one to draw reliable conclusions from that information. He found the following fatal flaws: no scientific sampling procedure, e.g., choice of interviewees at stores where the managers and customers were interested in the litigation; the choice of inexperienced interviewers from Dr. French's own staff who had some knowledge of this litigation; lack of care with which the field work was supervised; some leading questions included in the survey questionnaire; construction of the questionnaire in such **[*159]** a way that it is likely to generate data that is not objective and neutral with respect to issues in this case; and failure to utilize the types of measures that would have ensured reliable predictions about consumer behavior.

360. Dr. Smith said that, given these flaws, the Dr. French survey provided no basis upon which to make generalizations of these particular interviews back to the population of donut shop customers in the United States.

361. Dr. Smith testified as to the flaws he found in the survey questionnaire's questions. These flaws included: failure to make question one's response categories mirror the menu board; no instruction to the interviewers regarding recording the amount of an item purchased; failure to use a map with interviewees when asking the distance driven in order to ascertain a "density plot" to determine a trading area; failure to include on the questionnaire instructions to the interviewers; and errors in interviews conducted by Dr. French himself, e.g., failure to initial changes, an error in following a skip instruction on three sheets, a failure to correct a skip instruction, a failure to record interviewees' names for later verification, **[*160]** and inconsistent behavior in recording answers from interview to interview.

362. Dr. Smith stated that he did not think it appropriate to conduct interviews at stores operated by plaintiffs in the litigation. The purpose of the sample was to further testimony on behalf of the plaintiffs in this litigation.

363. Dr. Smith also testified that the "Do you know. . ." questions on the questionnaire would pressure an interviewee towards a certain response, in violation of generally accepted survey principles. He also found the order of the questions created a pressure in favor of one set of data. He found certain questions to put the interviewee on the defensive.

364. Dr. Smith testified that he had reviewed the survey questionnaires themselves and had found around 15% of them to contain errors. This, he said, was not an acceptable figure and constituted a "red flag" as to the ability of the particular interviewer to collect data appropriately.

365. Dr. Smith said that the 15% of the questionnaires he found containing errors were not simply due to the failure to correct the erroneous skip instruction. That failure, he said, was not really fatal; the interviewers might have gotten **[*161]** it right, even though they did not instruct themselves properly.

366. Dr. Smith's attention was directed to sections of a deposition taken of a Dr. Myron Glassman, a Marketing Professor at Old Dominion University and a survey expert retained by the plaintiffs to comment on Dr. French's survey. he agreed with Dr. Glassman's statements that interviewers who are ill-trained could produce unreliable results, and that a store like Muth's is one he would try to avoid for interviews.

367. Dr. Smith said it was possible to find companies and individuals to whom one could contract out interview work. He said it was possible to do a valid, reliable survey in a very short period of time.

368. Dr. Smith opined that the results of Dr. French's survey are of such a highly questionable nature that one would be very hard pressed to draw any reliable conclusions based upon these data.

369. On cross-examination, Dr. Smith said he had not done a marketing survey to test whether Dr. French's data was accurately done. He would not choose that approach; he would recommend a survey to find out what people's opinions are. He did say, also, that Dr. French should have conducted a telephone survey **[*162]** rather than an in-store survey. Such a telephone survey could be done through random-digit dialing procedures.

370. On cross-examination, Dr. Smith's attention was directed to excerpts from Dr. Glassman's deposition which approved of the questions found on Dr. French's survey and the choice of stores in the survey. Dr. Smith continued to adhere to his previous opinion about the methodology and accuracy of Dr. French's survey.

371. Defendants' witness, Robert Rosenberg ("Rosenberg"), is the Chairman of the Board of Dunkin' Donuts. He estimated the current sales of that company to be One Billion Dollars.

372. Rosenberg was shown by defense counsel the annual report filed by Dunkin' Donuts with the Securities and Exchange Commission on Form 10-K. That report stated that Dunkin' Donuts competes with national, regional and local firms offering similar products and services, as well as with supermarkets and convenience stores. When asked to identify these, Rosenberg said that Dunkin' Donuts competes against other fast food feeders, convenience stores, bakeries, supermarkets, other kinds of restaurants and coffee shops. He mentioned that supermarkets are viewed as one of their **[*163]** primary competitors.

373. Rosenberg said that he believed that Dunkin' Donuts competed against the fast feeders for customers who buy coffee or a portable product "to go". It competed against bakeries, donut shops and supermarkets for customers who buy dozens of donuts.

374. Rosenberg testified that he had recommended the proposed acquisition of Mr. Donut to his management and to his stockholders. He thought such a move the true answer to future survival to build market strength through advertising and distribution. The combining of Mr. Donut and Dunkin' Donuts will create a system that will be stronger for both parties, with greater profitability to the company and to the franchisees, and greater benefit to the consumer. Failure to take this step, he said, involved the possibility of having their enterprise eliminated by the stiff competition coming from supermarkets and fast feeders.

375. Rosenberg said that, before any conversion of Mr. Donut to Dunkin' Donuts would take place, the concept would first have to be tested. He foresaw benefits for the Mr. Donut franchisee in the proposed acquisition, e.g., increased sales, enhanced value of the franchise, increased resources **[*164]** for advertising to be able to compete with places like McDonald's, better training and research, and development activities.

376. Rosenberg said that conversion would be done on a case-by-case basis. For any remodeling, Dunkin' Donuts intended to provide a financing package and other assistance.

377. Rosenberg testified as to the dramatic changes he had seen in the marketplace in the past twenty-seven years. He cited the increased involvement of fast food places in the breakfast trade, bakery, and supermarket donut offerings, the growth of convenience stores. Keeping the donut business vital, he says, is essential.

378. Rosenberg stated that Dunkin' Donuts is committed to ensuring the preservation and maintenance of the contractual rights that all Mr. Donut franchisees had bargained for with International Multifoods. Dunkin' Donuts, he said, was committed to the success of the Mr. Donut stores, irrespective of conversion.

379. By stipulation of counsel before the court on March 15, 1990, it was agreed that there were other substantial bidders for Mr. Donut.

380. On cross-examination, Rosenberg testified that since Dunkin' Donuts' acquisition by Allied-Lyons last year, **[*165]** the operation of the company had basically remained unchanged. He said that Allied-Lyons had a long tradition in the food business and the food service business and the franchising business.

381. On cross-examination, Rosenberg testified that Allied-Lyons also owns a company called DCA. DCA is sometimes a bidder for Dunkin' Donuts' business for fillings, mixes and sugars. He said that Dunkin' Donuts had made it clear to Allied-Lyons that its purchasing system was a cooperative one owned by its franchise owners and that it saw no change in this system at all. He also said that Allied-Lyons had been given to understand that Dunkin' Donuts does business on a competitive bid basis.

382. On cross-examination, Rosenberg stated that if Mr. Donut had not been for sale, Dunkin' Donuts would have tried to continue to grow and to buy other companies.

383. On cross-examination, Rosenberg's attention was directed to sections of the Goldman Sachs & Co. offering prepared for Dunkin' Donuts. Rosenberg acknowledged that one paragraph spoke of growth during the past fourteen years, but he said that the following paragraph spoke of changing conditions and the need for a change in strategy. **[*166]** He said that the rate of growth in "same store sales" had fallen, over the past five years, from 6% to 2 or 3%.

384. On cross-examination, Rosenberg agreed that Dunkin' Donuts' revenues for 1988 were approximately $ 112 Million, which was an increase over the $ 105 Million of the preceding year. Although he acknowledged that only .5% of this was spent on research and development, he said that redesigning Dunkin' Donuts took more than just that, but also involved distribution development, price and marketing and other factors. If research and development is reduced in the future, he says, that is because Dunkin' Donuts has a large backlog of new product development. He added that expanded distribution was also considered the best way to improve franchise owner profitability.

385. On cross-examination, Rosenberg said that Dunkin' Donuts sales were $ 850 Million and Mr. Donut's $ 168 Million.

386. On cross-examination, Rosenberg testified that he thought that, after the conversion "test", most Mr. Donut franchisees would convert to Dunkin' Donuts. Dunkin' Donuts would not allow any Mr. Donut franchisees to abrogate the restrictive covenant in their contracts that prohibits **[*167]** them from opening independent donut shops within a certain area of their stores following the termination of their contracts.

387. Upon cross-examination, Rosenberg's attention was directed to the stock purchase agreement for Mr. Donut which contains "non-compete" covenants imposed upon the "seller", Damca International Corporation, and upon International Multifoods. Non-competition was demanded in the "doughnut/coffee shop retail franchise" business and in the "donut/coffee shop retail business". Rosenberg said that he was not personally familiar with these provisions and believed that this document had been inspired by tax considerations.

388. On cross-examination, Rosenberg was asked about convenience stores as competitors. He said that even though a prior memorandum (found at Plaintiffs' Exh. 104) had reported no "cannibalization" when Dunkin' Donuts' franchisees provided convenience stores with their product, it was important to remember that there is a broad array of customers and many potential customers are driven by convenience. The convenience store often offers, for many people, a more convenient way to get a breakfast or a morning snack than does going to a donut **[*168]** shop. It, therefore, makes sense, he said, for Dunkin' Donuts to stock their product in convenience stores rather than to lose customers.

389. Upon cross-examination, Rosenberg said that Dunkin' Donuts' franchisees provide the donuts to the convenience stores. He was asked if prices ran higher in the convenience stores intentionally. He said that it is important to remember that Dunkin' Donuts cannot dictate prices to their franchisees; all they can do is to suggest a pricing. The franchisees, themselves, he said, set the prices for donuts, coffee, sandwiches and all the other products sold in Dunkin' Donuts stores.

390. Upon cross-examination, Rosenberg was asked Dunkin' Donuts' intentions regarding those thirty-three Mr. Donut shops that fall within the exclusive development territories already granted to Dunkin' Donuts shops. Rosenberg replied that this depended upon the success of the conversion "test". He added that this "exclusivity" ran only for a limited time. At maximum, it would be for five years. Most of these exclusive development territories have already run for several years and should be expiring in a short period of time. He described the situation as **[*169]** being highly fluid and flexible. He said that the existence of these exclusivity provisions in no way precludes conversion.

391. On cross-examination, Rosenberg was asked about the one hundred and three Mr. Donut stores within a one mile or a half-mile area of a Dunkin' Donuts store. He said that Dunkin' Donuts currently has two hundred fifty shops within a mile of existing stores. Since the franchisee owners themselves set the prices in their stores, two closely situated stores could be competing with each other.

392. On cross-examination, Rosenberg was asked about any future increase in sales of Mr. Donut shops that were already doing better sales than Dunkin' Donuts shops. Rosenberg said he believed that such increases would occur, should they convert to Dunkin' Donuts.

393. On cross-examination, Rosenberg was asked about the Mr. Donut franchisees who also have their own exclusive development area options. Rosenberg said that they would honor these, but the franchisees would have to review these with Ralph Gabellieri on a case-by-case basis. There was also some question as to how many of these were set to expire in the near future.

394. Upon cross-examination, Rosenberg **[*170]** was asked about conversion costs. He said that $ 50,000.00 was a hypothetical number. He said one would have to look at conversions on a case-by-case basis. He was shown a Dunkin' Donuts document entitled "Estimated Cost to Retrofit Mister Donut Shops" (found at Plaintiffs' Exh. 133). This document estimated costs for a new shop at $ 51,000.00, for a remodeled shop at $ 75,000.00 and for an old shop at $ 146,000.00. Rosenberg said that this was only a very early study. He added that one could not assume that remodeling costs would not have to be spent by Mr. Donut franchisees even if Dunkin' Donuts were not buying Mr. Donut.

395. Upon cross-examination, Rosenberg testified that Gabellieri was allaying any fears expressed to him by some Dunkin' Donuts franchisees about possible "cannibalization" of their business by any nearby Mr. Donut shops that would be acquired.

396. Upon cross-examination, Rosenberg stated that, at the moment, the plan is to keep the areas where they compete directly, such as the operations, marketing and research departments of Mr. Donut and Dunkin' Donuts separate. Certain administrative tasks such as accounting and records would be combined for greater **[*171]** efficiency.

397. On cross-examination, Rosenberg said that if the conversion "test" does not work out, Gabellieri's responsibility, as head of Mr. Donut, will be to maximize return for the company and the franchisees by running Mr.

Donut as well and as profitably as he can. He agreed that, if the test fails, Gabellieri's experience and expertise with Dunkin' Donuts would be able to be used competitively against Dunkin' Donuts.

398. Upon cross-examination, Rosenberg was challenged as to the number of breakfast sandwiches sold by Dunkin' Donuts in relation to such sandwiches sold by Hardee's, McDonald's, etc. Rosenberg said that their Dunkin' Donuts number had risen from .4% to 1.7% in the 1984-1989 period; it had, thus, quadrupled and become a $ 16 Million product.

399. On cross-examination, Rosenberg said that, despite the difficulties, Dunkin' Donuts was committed to building up the day-part of its business, to establish in the consumer's mind that Dunkin' Donuts is the place to come for sandwiches, soup and a light snack.

400. On redirect examination, Rosenberg testified that Mr. Donut's research and development was only approximately one-tenth that of Dunkin' Donuts. **[*172]** He added that Dunkin' Donuts' advertising expenditures are also ten times larger than those of Mr. Donut. Such size would benefit Mr. Donut franchisees, he said.

401. On redirect examination, Rosenberg was asked whether he agreed with the testimony of certain plaintiffs that they did not compete with supermarkets, convenience stores, and fast food chains. He said that he very much disagreed with this. He also disagreed with the plaintiffs and Dr. French who had said that the cluster of products sold in a donut shop competes only with donut shops and not with any other kind of retail establishment.

402. On redirect examination, Rosenberg stated that he was aware that Mr. Donut had closed more stores than it had opened within the past four or five years. Mr. Donut, he said, has also been selling off its international operations.

403. On recross-examination, Rosenberg said that advertising was one part of the marketing "mix" and that McDonald's and some other fast food chains, with their heavy advertising budgets, would enjoy an advantage in that regard.

404. On recross-examination, Rosenberg testified that a Mr. Donut franchisee who became a Dunkin' Donuts franchisee could **[*173]** not take his share of the collective advertising dollar for his own advertising, but could spend additional dollars, if he chose to.

405. Defendants' witness, Dr. Bruce R. Snapp ("Dr. Snapp"), holds a doctorate in economics from the University of Michigan. Following his graduate studies, he was employed at the Economic Policy Office of the Antitrust Division at the U.S. Department of Justice, chiefly as a senior economist. He said that the Economic Policy Office is responsible for the economic analysis of virtually all of the antitrust matters that come before the Antitrust Division. He was, for one year, Acting Chief Economist and Assistant Director of the Economic Policy Office. Where mergers were concerned, it would be the responsibility of economists at the Antitrust Division to analyze relevant economic markets and to prepare an analysis of other issues and to make recommendations as to whether or not suit should be brought. As a senior economist with the Economic Policy Office, he participated in investigations of proposed mergers. Dr. Snapp said that he was with the Antitrust Division for ten and a half years. During that time, he was involved with some merger investigations **[*174]** of a consumer good: beer.

406. After leaving the Antitrust Division in 1984, Dr. Snapp entered the private sector where he was also involved in analyzing mergers. Presently, he is employed by Economists, Incorporated, where his duties also involve merger investigations. Dr. Snapp was proffered by the defense as an expert witness in the field of antitrust economics.

407. Dr. Snapp testified that, although his early job experience was with the Antitrust Division of the Justice Department, he said that he was familiar with the procedures used by the Federal Trade Commission (FTC) because the Antitrust Division and the FTC overlap in their area of responsibility and because of his contact with members of his present firm who have worked for the FTC.

408. Dr. Snapp described the sources he had relied upon for his testimony in the instant case. He relied upon publicly available materials, books, the trade press, interviews with executives at International Multifoods, Mr. Donut, and Dunkin' Donuts, and documents generated in discovery (found in Defendants' Exh. 128).

409. Dr. Snapp summarized the conclusions he had reached from his research. He said that the proposed acquisition **[*175]** will not reduce competition in any relevant market, either for franchises or for the products produced by the franchisees. With regard to the market for franchises, he found that market a very broad one, including a broad variety of franchise opportunities. He found that Dr. French had focused on a relatively narrow set, based upon the characteristics of the businesses involved and on the capital requirements. This restricts the number of suppliers in the market and this, he thought, was not economically appropriate to do. He also said that the proposed acquisition would not have an impact on the market for the products sold by the franchisees because, following this transaction, the number of independent decision makers in that market is going to remain the same. He explained that the purpose of the antitrust laws is to prevent mergers that might create or enhance the exercise of market power by reducing the number of independent suppliers in the market where concentration is high. In this market, he said, the independent decision makers are not the franchisors, but the independent business men. They are the ones who set the prices and, after the proposed acquisition, there **[*176]** will still be the same number of these.

410. Dr. Snapp defined market power as the ability of firms to raise and to sustain prices for a significant period of time, usually one to two years. Market power may be impossible for one of these reasons, he said: ability of consumers to turn to products they view as close substitutes; the ability of consumers to turn to other firms in other areas to get the same product; and the existence of firms producing related products or who are capable of supplying the product in a relatively short period of time.

411. Dr. Snapp explained that it is important to define the relevant product market and the relevant geographic market. An improper definition of either, he said, can cause erroneous results regarding the lawfulness of the transaction. It is also vital to identify what firms should be included in the market, i.e., other suppliers of the product, suppliers of close substitutes, suppliers who could quickly enter the market, although they are not now producing the goods. Next, one would have to measure the market share; in consumer goods that are branded or differentiated, one uses sales to measure market sale. For a particular **[*177]** firm, one takes its sales and divides it by the sales of all the firms identified in the relevant market. The next step would be to calculate concentration using the HHI. Dr. Snapp explained what the HHI and how the various levels, e.g., under 1000, between 1000 and 1800, or over 1800, trigger or do not trigger antitrust concerns.

412. Dr. Snapp testified that even an HHI of between 1000 and 1800, which is considered moderately concentrated, would only prompt the Antitrust Division to investigate further. Other factors, such as an industry with rapidly changing technology, might mitigate market power, he said.

413. Dr. Snapp testified that he disagreed with Dr. French's market definition for the product sold by the franchisees. First, Dr. French did not consider whether related products sold in these franchisees' stores might also be in the relevant product market or might be considered substitutes by consumers, e.g., cinnamon rolls or pastries. Second, Dr. French posited a very limited view of suppliers of very similar products; he excluded supermarkets, retail bakeries, convenience stores and other types of quick service restaurants. Dr. French had restricted suppliers **[*178]** to donut shops. Third, Dr. French had failed to take into account the possibility of supply substitution. Fourth, Dr. French addressed the issue, using a "cluster" approach. He said that these products are not packaged in bundles, but priced and offered for sale individually. Also, Dr. Snapp testified that Dr. French was trying to leverage such aspects of product differentiation as quality and image into a market definition, when that is inappropriate.

414. Dr. Snapp said that products that are differentiated may properly be included in the same relevant product market. He also agreed that the fact that one supplier of a product may offer a different mix of products than another supplier will not necessarily put their comparable products in different relevant markets.

415. Dr. Snapp testified that a too narrow definition of the relevant product or geographic market can cause the erroneous conclusion that concentration is too high and that firms could raise prices.

416. Dr. Snapp discussed how he had arrived at his conclusion that Dr. French had excluded relevant product market suppliers from his analysis. Dr. Snapp said that he has found that company documents are the **[*179]** best source of information about the issues relevant to product market and the impact on competition. Businessmen must find out who it is they compete with, what their customers want, and who is selling substitutes.

417. Dr. Snapp referred to several of these documents in his testimony. A 1981 "Supermarket Competition" study (found at Defendants' Exh. 128) reveals, he said, that the market for retail donut sales is viewed as including food service, retail bakeries, and supermarkets. A "1983 Doughnut Industry Study" prepared for Dunkin' Donuts, listed donut shops, retail bakeries, food service and grocery markets as part of their market. It also referred to the expansion of Entenmann's, which is a wholesale bakery producer of packaged donuts. Other studies also included in-store bakeries in either convenience stores or supermarkets. Another source indicated that the Great Atlantic and Pacific Tea Company (A&P) believes it competes directly against Dunkin' Donuts and other donut shops. The Huntley-Jiffy convenience stores also identify supermarket bakeries and donut shops as their primary competition. Huntley-Jiffy operates bakeries in ninety-six convenience store locations. **[*180]** Co-Go's Food Stores of Pittsburgh also identified Mr. Donut as a real competitor with an impact on its donut sales. From all of this, Dr. Snapp concluded that there are a large number of entities supplying donuts in competition with donut shops.

418. Another company document, Dr. Snapp said, identified big fast food chains as awesome competition with a huge advertising budget to spend against the breakfast segment. Competition from convenience stores with deli counters and ovens was also mentioned. Another company document referred to donut price checking at supermarkets.

419. Dr. Snapp testified that the companies view themselves in a bifurcated market: in the morning, competing for the breakfast customer, they compete with other quick service restaurants; in the rest of the day, they compete in the sale of sweet goods in a bakery market where the principal competition comes from retail and in-store bakeries.

420. Dr. Snapp also found significant Dunkin' Donuts' internal memoranda regarding the percentage of customers who said they would turn to supermarkets if the Dunkin' Donuts were closed. This study also indicated that supermarkets were particularly strong competitors **[*181]** for large quantity purchases. In 1987, a Dunkin' Donuts' document sent to its franchisees urged them, before making pricing decisions, to visit every food service outlet and supermarket with which they compete before deciding prices.

421. Dr. Snapp also referred to Dunkin' Donuts' quarterly marketing reports which track advertising and other competitive actions by Mcdonald's, Burger King and other fast food restaurants. He also mentioned the trade press's references to the competitive climate as including a far wider market. There was one prediction about the rapid expansion of the sale of bakery products in convenience stores.

422. After discussing these company documents, reports, studies, etc., Dr. Snapp said that, what all of this reveals is that the companies' perception and the consumers' perception is that the products sold in donut stores face competition from a broad range of suppliers who are, in some cases, selling virtually identical products. Were donut shops to increase their prices, consumers could very easily substitute and find a new source of supply at a lower price.

423. Dr. Snapp was asked to comment upon Dr. French's approximation of the relevant geographic **[*182]** market as being within a radius of five miles or less around each store. Dr. Snapp said that it would be preferable to plot out where the customers for the shops of the merging firms actually come from and then attempt to see to which suppliers these customers could then turn.

424. Dr. Snapp was asked how to obtain information regarding various markets, e.g., the "United States", Boston, Cleveland and Providence. He agreed with Dr. French's assessment that there is not a national geographic market. He decided first to look at the number of different types of establishments that do or could sell donuts. He consulted the Boston, Massachusetts Metropolitan Area Yellow Pages and identified the number of firms under the heading

"Doughnuts" and found fifty-eight different firms with 124 different stores. Under "Bakers - Retail" were 257 firms with a total of 304 stores. (He noted that Dunkin' Donuts and Mr. Donut and some other apparent donut shops listed themselves under this heading, as well as under "Doughnut"). He continued in this vein for Cleveland, Pittsburgh, and Providence. The Snow White Donut Company, Inc. appeared to be the largest donut chain in Cleveland. Also, **[*183]** he consulted the 1987 Census of Retail Trade, which includes grocery stores, convenience stores and other eating places. He concluded that in most neighborhoods one would find entities offering some form of donut, pastry or muffin and a cup of coffee. Even if entities near a donut shop did not offer close substitutes now, they could do so within a year.

425. Dr. Snapp disagreed with Dr. French's opinion that the proposed acquisition would probably result in donut shops' raising their prices of coffee and/or donuts. He said that the product market is not just limited to individual products like donuts, but would include other products like pastries, bagels, cinnamon rolls. Also, there appear to be a large variety of alternative outlets selling donuts and donut shop products. Also, it is possible for convenience stores and other competing entities to upgrade the quality of their products, expand supply, or increase advertising. To the extent that consumers view them as substitutes, they will be motivated to make the shift. Consumers can also view similar sorts of products as viable substitutes, e.g., the consumer who chooses a danish and coffee at McDonald's.

426. Dr. **[*184]** Snapp testified that he thought it possible for convenience stores to offer donuts successfully. In many instances, they already have display cases that would ensure freshness and prominent display. Display cases cost anywhere from $ 100.00 to $ 1,600.00, he said. It is even possible that wholesale or retail bakeries would split the cost in order to get a new sales outlet for their products.

427. Dr. Snapp spoke of the existence of independent donut shops. In a particular region, one might find regional chains or local chains or even independent entrepreneurs who could start up their own donut shop. In some parts of the country, it is not unusual for wholesale bakeries to have donut shops as a retail outlet, he said.

428. Dr. Snapp testified that, at the moment, in-store bakeries are one of the fastest growing segments within grocery stores. The number of in-store bakeries being put in has been increasing at a much faster rate than the growth of either donut shops or retail bakeries, approximately 10% a year. In 1986, their sales increased 22%. In remodeling stores, in-store bakeries and larger bakery sections are often included.

429. Dr. Snapp stated that this proposed **[*185]** acquisition would not reduce competition in any market in which the franchisees compete. He said that it was probably potentially pro-competitive to the extent it allows both Dunkin' Donuts franchisees and any converted Mr. Donut franchisees to realize cost savings, to spread out certain fixed costs in advertising and promotion and to be more effective competitors against these other sources of supply.

430. On cross-examination, Dr. Snapp acknowledged that this is the first matter he has worked on specifically focused on franchising issues.

431. On cross-examination, Dr. Snapp testified that he had not gone into the marketplace and talked directly to people who eat donuts because his experience has taught him that dealing with consumers in this particular type of context is not an especially enlightening source of information. He was especially critical of Dr. French's survey questionnaire regarding the hypothetical increase in the cost of donuts. Dr. French had neglected to include a context where prices elsewhere stayed the same. He was not quite sure that Dr. French's hypothetical accurately measured the way consumers think about relatively low priced products.

432. On **[*186]** cross-examination, Dr. Snapp testified that profitability is what would influence firms to enter the market.

433. On cross-examination, Dr. Snapp was presented with a document, Mister Donut Fiscal Year 1991 and 1995 Phase One Plan (found at Defendants' Exh. 128). Plaintiffs' counsel said that, according to that document, donut sales of in-store bakeries were declining and, as of 1988 data, donut sales accounted only for 12% of the average in-store bakery sales. Dr. Snapp replied that the percentage could be declining even though the absolute amount is

increasing. This figure, he said, tells the reader nothing about the absolute amounts. He added that the important question is what would happen to donuts and their sale if donut shops were to raise their prices.

434. On cross-examination, Dr. Snapp's attention was directed to the Dunkin' Donuts attitude and usage survey which indicated what percentage of customers would turn to supermarkets for donuts if Dunkin' Donuts were closed. Dr. Snapp's attention was directed to the part which said that only 6.4% of the respondents cited price as a reason for buying from supermarkets. Approximately 10% of the respondents cited price **[*187]** as a reason for buying donuts at Dunkin' Donuts. Dr. Snapp said that these data only reflected current market realities. What is important, he said, is how consumers would react if one group changed its prices relative to everyone else.

435. The court inquired of Dr. Snapp if he would accept Dr. French's figure of a 5% increase in prices as significant. Dr. Snapp replied that what is important is how big the price is relative to the profit margin. The chief consideration was really whether these sellers could profitably raise prices without consumer substituting and new entry moving in.

436. On cross-examination, Dr. Snapp said that if prices were raised, the donut shops might not lose their cadre of loyal customers, but would lose their marginal ones. He said that even Dr. French's survey that showed a 13% loss in customers was of interest. He said that Dr. French did not present any evidence as to whether the store could afford to lose 13% of its customers. Dr. French's study also revealed that another 11% said they would come less often or buy less in response to increased prices. Even at 5% of such customers, he said, this would mean an 18% loss and prices would have **[*188]** to be raised a great deal to make up for that lost profit.

437. On cross-examination, Dr. Snapp testified that he had spoken to Dunkin' Donuts' Feltenstein about such a loss. Feltenstein had said that no donut shop could afford to lose 13% of its customers. A sustained increase could lose even more customers over time, Feltenstein had said. Even a later reduction would win customers back only a long time later.

438. On cross-examination, Dr. Snapp's attention was directed to an article from Business Week in 1982. The article concerned the breakfast market of McDonald's, Burger King, and Wendy's and then stated: "But these new competitors expanded the breakfast market dramatically creating a wave of new business that actually boosted Dunkin's result. For the year ended October 31st, 1981, Dunkin' and its franchisees posted record worldwide sales of 390 million dollars, up 21 percent over 1980." Dr. Snapp replied to this that, although donut shop sales have, in fact, increased over time, the relative market share is falling. He posited the question of how big would the donut shops' share of the breakfast market have been, if it were not for these alternative sources of **[*189]** supply.

439. On cross-examination, Dr. Snapp testified that donut shops expand their product lines to bring in customers who are not interested in donuts and to offer their loyal customers something like a sandwich at lunch to prevent their going to McDonald's where they might also learn about McDonald's coffee and danish.

440. On cross-examination, Dr. Snapp was asked about the entry of other possible suppliers. He reiterated his opinion that convenience stores might see an opportunity if donut shops raised their prices. If the convenience store operator were already thinking of remodeling, he might decide to remodel so as to offer fresh donuts, either by installing a bakery or by increasing display capacity and getting donuts from a wholesale or retail bakery. The same could be said of supermarkets.

441. On cross-examination, Snapp was asked about the prospect of fast food places baking donuts on the premises. He said that they might not have to, given substitutes like their danish. Also, it would not be difficult for them to find a nearby retail or wholesale bakery who would supply them with fresh-baked, quality donuts.

442. On cross-examination, Dr. Snapp was asked **[*190]** about the existence of intrabrand competition if all the donut shops became Dunkin' Donuts shops. Dr. Snapp said that in most cases a company tries to make sure that it locates its franchises in such a way as to avoid cannibalizing each other's sales. He agreed that it would be a problem if Dunkin' Donuts' franchises were put too close by one another.

443. On cross-examination, Dr. Snapp acknowledged that he had not actually examined the competitive health or vigor of any of the regional chains in any of the markets he had testified about.

444. On cross-examination, Dr. Snapp testified that he thought it possible that one wholesale bakery could be the start of a new retail chain over a long period of time. It would take a much shorter time, though, for many wholesale bakeries to put in one store a piece, he said.

445. On cross-examination, Dr. Snapp was asked about Dr. French's concept of the cluster of goods and services. He agreed that such a concept was a part of the body of ***antitrust law***. On direct examination, he had said that there could not be a cluster unless the products and services were tied together in some way. Dr. Snapp said that he did not dispute that complementarity **[*191]** of demand, i.e., purchase of donuts and coffee, exists or that it is not relevant. But, he said that the important question is: who is the supplier in that market.

446. On cross-examination, Dr. Snapp's attention was directed to selections from various judicial opinions and questions were extracted from these selections. He said that what consumers view as substitutes is what is most important. Although he had not spoken personally to consumers of donuts, he had tracked consumers' perceptions as reflected in companies' documents. In answers to other questions, based on case law, Dr. Snapp basically reiterated replies he had given before.

447. Upon cross-examination, Dr. Snapp was asked a number of questions challenging the accuracy of the Dunkin' Donuts Attitude and Usage study (found at Plaintiffs' Exh. 348) and other company documents and studies upon which he had relied. Dr. Snapp explained that smaller chains might perceive competition differently and might perceive a chain like Dunkin' Donuts as their major competition. He said that the question remains who does Dunkin' Donuts consider as its competitors and whom do they take into account when they set their prices. **[*192]** If other donut shops follow Dunkin' Donuts, then it does not matter whether they themselves review prices in grocery stores.

448. Upon cross-examination, Dr. Snapp's attention was directed to a Retail Doughnut Market Survey by the Research Council of Washington, Inc., November 24, 1987 (found at Plaintiffs' Exh. 105). He said that a Mr. Donut interview which estimated the breakdown of the market to be 85% retail donut shops, 10% convenience stores and 5% supermarkets appeared to contradict other estimates he had seen. This interview also spoke of market saturation, the need for operators to be better off financially to open a franchise, and the repositioning of the same products rather than new product introductions.

449. On cross-examination, Dr. Snapp's attention was again directed to the same Retail Doughnut Market Survey and information from interviews with supermarkets, such as Giant, was read to Dr. Snapp by plaintiffs' counsel. These excerpts dealt with the perception held by these supermarkets of the identity of their competition. While Giant said that it competed with other supermarkets for the in-store bakery market, it also said it modeled its in-store bakeries **[*193]** after retail donut shops and that it kept Dunkin' Donuts in mind when it did pricing, as well as other supermarkets. Certain supermarkets did not mention retail donut shops as competitors. Super Value Stores, Inc., of Atlanta, Georgia, stated that retail donut shops did not compete with them because they each attracted different types of customers. Dr. Snapp did say that the report itself seemed to think that supermarkets and donut shops did compete. Dr. Snapp maintained his conclusion that there is a market for donuts that includes supermarkets, as well as donut shops and many other sources.

450. On cross-examination, Dr. Snapp was questioned about Dunkin' Donuts' own studies of the difference between prices in supermarkets and prices in their own stores. His attention was directed to Dunkin' Donuts' Mid-Atlantic Quarterly Marketing Reports for 1986, 1988, 1990 (found at Plaintiffs' Exhs. 254,266,272). Dunkin' Donuts' prices were said to be higher than those of supermarkets and coffee shops. Dr. Snapp found such pricing consistent with pricing in a price-sensitive market. Even though the 1988 and 1990 Reports said that Dunkin' Donuts price in the Mid-Atlantic market was **[*194]** not competitive with donut/coffee shops or supermarkets, Dr. Snapp said why would Dunkin' Donuts monitor supermarket prices, if these entities were not competitors. Dr. Snapp also said that a higher price may merely reflect Dunkin' Donuts' particular competitive niche. If they go too

high, he said, they will lose business. Dr. Snapp also pointed to language in the 1988 Report that listed supermarket, convenience stores, fast food places, etc. as the competition.

451. On redirect examination, Dr. Snapp reiterated that the franchisors might give some advice about pricing, but they have no control over the prices set in the stores.

452. On the last day of the proceedings, Dr. French was recalled by plaintiffs' counsel to testify as to the results of his survey, recomputed so as to exclude errors in the questionnaire, such as failure to initial corrections, to include respondents' names or phone numbers, or to correct skip instructions properly. Dr. French testified that, even with this exclusion, there was no difference in the results.

453. On the final day of the proceedings, excerpts of depositions from the following individuals were read to the court: Lipe, Roever, O'Hanlon, **[*195]** Richmond, Sattler and Muth. Plaintiffs' counsel supplied counter-designations to these excerpts and added excerpts from First's deposition, as well. These excerpts provided material already amply supplied to the court during twelve days of testimony. Of note, however, was the testimony of Lipe, Roever, O'Hanlon and First as to doing their own pricing and Muth's testimony as to making fresh coffee every 15 to 20 minutes and throwing out donuts twice a day.

454. Defendants' witness, Sidney J. Feltenstein ("Feltenstein"), is the Senior Vice President for Marketing at Dunkin' Donuts of America. He has held this position for the past eleven years. He said that for 1990, Dunkin' Donuts had a $ 32 Million advertising budget, of which 50% will be allocated to donuts, and 35% to sandwiches and new sandwich extensions in order to build that business further. The balance will be allocated to muffins, coffee, cookies, brownies and other ancillary products.

455. Feltenstein testified that, since the early 1980s, Dunkin' Donuts had been acutely aware of the increasing competition from supermarkets, with their in-store bakeries, convenience stores, fast food places and producers like Sara **[*196]** Lee. He said that he views these entities, as well as other donut shops, as Dunkin' Donuts' competitors. A new threat, he added, is coming from take-home foods that can be microwaved. This segment has grown 140% in the past year. Also, from the early 1980s onward, he said, Dunkin' Donuts saw the necessity for an expansion of its product line, for example, a line of croissant sandwiches, in order to keep old customers and add new ones.

456. Feltenstein stated that, around 1987 or 1988, Dunkin' Donuts perceived that it was in the middle of a fierce market share battle. Dunkin' Donuts, therefore, introduced a sandwich line, started offering donut sales through convenience stores, and began to focus advertising and promotion against supermarkets.

457. Feltenstein testified that he knew of two donut sales "tests" made fairly recently by Burger King and McDonald's. The Burger King cake donut was made on premises and sold for $ .35 each or $ 2.79 a dozen. These were tested in the Youngstown market up to 6 or 8 months ago and sold 15 to 20 dozen a day. Both Burger King and McDonald's had discontinued their tests, but Feltenstein expressed great concern that this did not necessarily **[*197]** mean that this idea had been abandoned and that, in the future, these chains could introduce this product into their stores. On cross-examination, he said that Ruenheck's opinion that adding donuts at Burger King would not attract customers did not assuage his fears; he said that he doubted that Ruenheck was privy to all information at Burger King.

458. Feltenstein also testified that there are 21,250 retail bakeries and 22,288 in-store supermarket bakeries as opposed to approximately 1700 Dunkin' Donuts shops in the United States. He said that he was aware of 72,000 convenience stores, as well. Feltenstein said that Dunkin' Donuts recognized that it could only advise its franchisees regarding pricing and that pricing decisions were really the franchisees' to make.

459. Feltenstein testified as to the activities of fast food restaurants to enter the breakfast segment or to improve their performance in it. He cited Burger King's intention to introduce mini-muffins.

460. Feltenstein testified that Dunkin' Donuts, working with its advertising agency, had to face the changed competitive environment in the advertising arena. Various ads of Dunkin' Donuts and of such competitors **[*198]** as

McDonald's, Burger King, Hardee's, Cumberland Farms, Winchell's, Mr. Donut, and Sara Lee were played to the court to demonstrate the level of competition. McDonald's, he said, would spend $ 150 Million this year promoting and advertising their breakfast business. Dunkin' Donuts' advertising budget is $ 32 Million, he said.

461. On cross-examination, Feltenstein said that, even at 4% of sales, sandwiches represented a significantly welcome dollar volume to Dunkin' Donuts' shops.

462. On cross-examination, Feltenstein testified that in-store physical barriers to tapping into the lunch sandwich market were not insurmountable. He said that about 60% of the stores in the Dunkin' Donuts chain is now configured to a more traditional hamburger store configuration with a counter to place an order and seating to consume it. Also, he said that about 600 to 700 Dunkin' Donuts stores have drive-through windows - a critical addition to compete with fast food chains, convenience stores, supermarkets and other donut shops.

463. Feltenstein was asked by the court his idea as to what Dunkin' Donuts would do if the conversion "test" did not work out. He said that there was considerable **[*199]** confidence that it would work out. He did not know of any contingency plan.

DISCUSSION

Introduction

The defendants in this matter, Dunkin' Donuts and Mr. Donut, each operate chains of franchise donut stores. Defendant Dunkin' Donuts has approximately 1370 stores in the United States while defendant Mr. Donut has approximately 540 stores in the United States. The defendants have reached an agreement under which Allied-Lyons, the owner of Dunkin' Donuts, will acquire 100% of the stock of the Mr. Donut chain from International Multifoods making Mr. Donut a wholly owned subsidiary. This agreement provides that it must be consummated by no later than March 31, 1990. After that date, each party is free to go its own way. Plaintiffs are more than one hundred Mr. Donut franchisees and a franchisee supplier who seek a preliminary injunction preventing the consummation of this agreement on the grounds that the proposed merger will directly injure them and restrain trade in violation of federal antitrust laws.

We begin by noting that it has been exactly one hundred years since the post Civil War enactment of the Sherman Act, 26 Stat. 209 (1890), as amended, *15 U.S.C.A. §§ 1-7* ***[*200]*** *(1990)*. *Section 1* of the Sherman Act provides that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . is declared to be illegal." *Section 2* of the Sherman Act makes it unlawful to "attempt to monopolize". Section 4 of the Sherman Act provides that "The several district courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act . . . ."

HN1[] To establish a violation of *Section 1* of the Sherman Act, plaintiffs must prove that (1) defendants contracted, combined or conspired among each other; (2) the combination or conspiracy produced adverse, anticompetitive effects within relevant product and geographic markets; (3) the objects of the conduct pursuant to that contract or conspiracy were illegal; and (4) they are injured as a result of that conspiracy. *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81-82 (3rd Cir. 1977)*. ***HN2***[] To establish a violation of *Section 2* of the Sherman Act, plaintiffs must prove "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as **[*201]** distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71 (1966)*.

In the early part of the 20th Century, a perceived need for more detailed and effective legislation led to the enactment of the Clayton Act, 38 Stat. 730 (1914), as amended, *15 U.S.C.A. §§ 12-27 (1990)*. ***HN3***[] *Section 7* of the present Clayton Act provides that:

> No person [1] engaged in commerce . . . shall acquire, directly or indirectly, the whole or any part of the stock or other share capital . . . of another person engaged also in commerce . . . where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition or . . . create a monopoly. (Emphasis supplied).

The words "may be substantially" indicate a concern with "probabilities" not certainties. *Brown Shoe Co.* ***[*202]*** *v. United States, 370 U.S. 294, 323 (1962)*. ***HN4***[] A plaintiff must prove a probability of success and irreparable harm to obtain injunctive relief under the Clayton Act. *United States v. E. I. du Pont de Nemours & Co., 353 U.S. 586, 597 (1957)*; *Tasty Baking Co. v. Ralston Purina, Inc., 653 F.Supp. 1250, 1257 (E.D. Pa. 1987)*; *15 U.S.C.A. § 16*.

Section 7A of the Clayton Act was enacted in 1976 and requires that before acquisitions of certain sizes take place a notification shall be filed with the Federal Trade Commission [2] and Department of Justice. Following the filing, the acquisition is placed on hold during a waiting period which is usually thirty days (15 days for cash tender offers) unless extended. The defendants in the matter before us have complied with said notice requirement and the time period passed on February 16, 1990, without any governmental action to preclude the merger from taking place. [3]

[*203] ***HN5***[]

Section 15 of the Clayton Act, *15 U.S.C.A. § 15*, provides that "The several district courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this Act . . . ." and, ***HN6***[] *Section 16* of the Clayton Act, *15 U.S.C.A. § 16*, provides that "Any person, firm, corporation, or association shall be entitled to sue and have injunctive relief, in any court of the United States having jurisdiction over the parties, as against threatened loss or damage by a violation of the antitrust laws, [4] including sections two, three, seven, and eight of this Act, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity . . . and upon the execution of proper bond . . . and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue . . . ."

As already noted, **[*204]** plaintiffs are proceeding under only two statutes: *28 U.S.C.A. § 1331*, which provides that, "The district courts shall have original jurisdiction of all civil actions arising under the constitution, laws, or treaties of the United States", and under *28 U.S.C.A. § 1337(a)*, which provides, in relevant part that, "The district courts shall have original jurisdiction of any civil action or proceeding arising under any act of congress regulating commerce or protecting trade and commerce against restraints and monopolies . . . ." Furthermore, there can be no diversity claims if the citizenship of the parties prevents the diversity from being complete. This appears to be the case in the instant matter. [5] Accordingly, the state law claims are all pendent in nature and can only exist in this

---

[1] *Section 1* of the Clayton Act deems the word "person" to include corporations.

[2] In 1914, the same year the original Clayton Act was enacted, Congress also passed the Federal Trade Commission Act, 38 Stat. 717 (1914), as amended, *15 U.S.C.A. §§ 41-58 (1990)*, which prohibits "unfair methods of competition . . . and unfair or deceptive acts or practices", and creates the Federal Trade Commission to prevent such acts and practices. See *15 U.S.C.A. § 5(a)*.

[3] FTC review provides no immunity from private suit and is of no moment whatsoever in a subsequent private civil action. See *R.C. Bigelow v. Unilever, 867 F.2d 102, 104 (2d Cir. 1989)* (staying acquisition); *State of California v. American Stores, 872 F.2d 837, 843 (9th Cir. 1989)*; ***Consolidated Gold Fields v. Anglo American Corp., 713 F.Supp. 1457, 1460 (S.D. N.Y. 1989)***.

[4] The term "antitrust laws" as defined in *Section 1* of the Clayton Act includes the Sherman Act.

court if plaintiffs establish valid and substantial federal causes of action. *United Mine Workers v. Gibbs, 383 U.S. 715, 725 (1966)*; *Tully v. Mott Supermarkets, Inc., 540 F.2d 187, 196 (3d Cir. 1976)*. Nevertheless, at this preliminary stage, plaintiffs have asked us to examine their right to injunctive relief under state law claims even if no federal cause gives rise to a right to injunctive **[*205]** relief. Absent a dismissal at this point, we must do so, but we shall examine plaintiffs' federal claims first.

For a further understanding of the broad pronouncements of the Clayton Act, we must turn to the ample decisional law which attends this statute. As Chief Justice Warren said in *Brown Shoe Co. v. United States, at page 334*:

> An economic arrangement between companies performing similar functions in the production or sale of comparable goods or services is characterized as "horizontal". The effect on competition of such an arrangement depends, of course, upon its character and scope. . . . Where the arrangement effects a horizontal merger between companies occupying the same product **[*206]** and geographic market, whatever competition previously may have existed in that market between the parties to the merger is eliminated. *Section 7* of the Clayton Act, prior to its amendment, focused upon this aspect of horizontal combinations by proscribing acquisitions which might result in a lessening of competition between the acquiring and the acquired companies. The 1950 amendments made plain Congress' intent that the validity of such combinations was to be gauged on a broader scale: their effect on competition generally in an economically significant market.
> Thus, again, the proper definition of the market is a "necessary predicate" to an examination of the competition that may be affected by the horizontal aspects of the merger . . . ."

Although *Section 7* of the Clayton Act does not use the word market, it is clear that "line of commerce" signifies a product market and "section of the country" refers to a geographic market. *United States v. Bethlehem Steel Co., 168 F.Supp. 576, 588 (S.D. N.Y. 1958)*. With regard to a product market, consisting of relevant lines of commerce, the court, in Brown, stated, at page 325:

> The outer boundaries of a product **[*207]** market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. *United States v. E. I. du Pont de Nemours & Co., 353 U.S. 586, 593-595*. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. *n.*43 Because *§ 7* of the Clayton Act prohibits any merger which may substantially lessen competition "in any line of commerce" (emphasis supplied), it is necessary to examine the effects of a merger in each such economically significant submarket to determine if there is a reasonable probability that the merger will substantially lessen competition. If such a probability is found to exist, the merger is proscribed. *n.*44

*n.*43 See generally Bock, Mergers and Markets, An Economic Analysis **[*208]** of Case Law 25-35 (1960).

[5] We say appears because plaintiffs have alleged domicile rather than citizenship as required by *28 U.S.C. § 1332*. Nevertheless, three corporate defendants are incorporated in Delaware and have principal places of business in Massachusetts and Minnesota, and there are plaintiffs domiciled in each of these states.

*n.*44 *United States v. E. I. du Pont de Nemours & Co., 353 U.S. 586, 592, 595*; *A. G. Spalding & Bros. v. Federal Trade Comm'n, 301 F.2d 585, 603* (C. A. 3d Cir.); *American Crystal Sugar Co. v. Cuban-American Sugar Co., 259 F.2d 524, 527* (C. A. 2d Cir.); *United States v. Bethlehem Steel Corp., 168 F.Supp. 576, 603* (D.C. S. D. N. Y.).

The Third Circuit cited the foregoing language with approval in *American Bearing Co., Inc. v. Litton Industries, 729 F.2d 943, 949 (3d Cir. 1984)* cert. denied *469 U.S. 854 (1986)*. With regard to a geographic market, the court, in Brown, stated, at page 336:

Congress prescribed a pragmatic actual approach to the definition of the relevant market and not a formal legislative one. The geographic market selected must, therefore, both "correspond to the commercial realities" of the industry and be economically significant. Thus, although the geographic market in some instances may encompass the entire nation, under other circumstances it may be as small as a single metropolitan area. *United States v. Columbia Pictures Corp., 189 F.Supp. 153, 193-194* (D.C. S.D. N.Y.); *United States* ***[*209]*** *v. Maryland & Virginia Milk Producers Ass'n, 167 F.Supp. 799* (D.C. D.C.), affirmed *362 U.S. 458*. The fact that two merging firms have competed directly on the horizontal level in but a fraction of the geographic markets in which either has operated, does not, in itself, place the merger outside the scope of *§ 7* of the Clayton Act. That section speaks of "any . . . section of the country" and if anti-competitive effects of a merger are probable in "any" significant market, the merger - at least to that extent - is proscribed.

HN7[] Plaintiffs have the burden to allege and prove both the relevant product and geographic markets as essential elements of their antitrust claims. *United States v. Marine Bancorporation, Inc. 418 U.S. 602, 618 (1974)*; Thurman Industries, Inc. v. Pay ' *N Pak Stores, Inc., 875 F.2d 1369, 1373 (9th Cir. 1989)*. "The outer boundaries of a product market are determined by the reasonable interchangeability of use between the product itself and substitutes for it." *American Bearing Co. v. Litton Industries, supra, at 949*. As the Court of Appeals said in *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 713 (11th Cir. 1984)*:

[*210]

> In United States v. E.I. DuPont de Nemours & Company, the Supreme Court considered whether DuPont was guilty of a monopoly because it controlled the cellophane market. The Court found that the relevant product market was the market for flexible packaging materials and not for cellophane alone because other flexible packaging materials are reasonably interchangeable with cellophane for the purposes for which cellophane is produced, taking price, use, and qualities into consideration. Similarly, this court finds that the relevant product market for determining whether Waffle House is engaged in a monopoly is restaurants similar to Waffle Houses -- those with similar menus, similar hours, and similar service. The court does not find that the relevant product market is all restaurants of every type, but it does find that there are other restaurants in the market available to consumers as reasonable substitutes for Waffle Houses. It is these restaurants which, along with Waffle Houses, constitute the relevant product market

In the recent case of *Dunafon v. Delaware McDonald's Corp., 691 F.Supp. 1232, 1241 (W.D. Mo. 1988)*, the court found the relevant geographic **[*211]** market to be the general vicinity of the mall where the McDonald's store was located, and found the relevant product market to be the inexpensive food products usually served for breakfast, lunch and dinner and snacks which were reasonable substitutes for McDonald's menu items. See also *Philadelphia Fast Foods, Inc. v. Popeyes Famous Fried Chicken, Inc., 647 F. Supp. 216 (E.D. Pa. 1986)*.

With the foregoing broad principles in mind, we shall examine representative portions of our detailed findings of fact.

Donut Shop Characteristics

Both sides agree that there are a total of more than 8500 donut shops in the United States (Finding of Fact [hereinafter "FF"] 100,104,110,252), along with 80,000 convenience stores and 20,000 in-store bakeries (FF104,112; Defendants' Exh. 90). There are seventeen franchised chains that operate forty or more shops, and 154 other chains that operate at least three shops (Plaintiffs' Exh. 305). In 1988, the sales of donuts in donut shops alone was approximately Seven Hundred Million Dollars (Defendants' Exh. 83). Moreover, the sale of donuts through donut shops accounts for only 18% of all donut sales (Defendants' Exh. 83). Donuts **[*212]** are sold at donut shops for both on-premise and off-premise consumption. This can take the form of dozens or half-dozens (Plaintiffs' Exhs. 52 at 5 and 199 at 76,122). Plaintiffs' Exhibit 305 reads as follows:

Number and Size of Donut Shops in the

United States, 1988

Largest Chains:	**Number of Shops:**
Dunkin' Donuts	1,374
Winchell's	766
Mister Donut	540
Daylight	429

Source: 1989 Directory of Chain Store Operators; Franchise Opportunities Handbook, January 1987; and Research Counsel of Washington, Inc. Retail Doughnut Market Study, November 24, 1987.

Bower testified that fresh donuts and fresh coffee were very important (FF7) and that 35-55% of all donut store sales are of coffee (FF12). Richmond said that in his Mr. Donut store in Massachusetts sales are 65% coffee, 30% donuts and 5% croissants, juice, sandwiches, etc. (FF29). Lipe said his two Mr. Donut stores in Pennsylvania sell 60 to 70% coffee and 30 to 40% donuts (FF33), and O'Hanlon said his five Mr. Donut stores in Delaware sell 70% coffee, 25% donuts and 5% auxiliary products (FF45). O'Hanlon later said that Delaware donuts (a donut sort of sandwich) were 3-6% of his business, but he did not think a donut shop could sell hamburgers (FF237). Roever agreed that a donut shop would have to put in a lot of equipment and retrain people to sell hamburgers. He was also concerned about possible odor problems (FF234). O'Hanlon also noted that 95% of his customers buy a cup of coffee (FF46).

Burgio said that **[*214]** his Mr. Donut store in Pennsylvania sells 60% coffee and 40% donuts (FF51), First said that in her Mr. Donut store in Pennsylvania she sold 50% coffee and 50% donuts (FF55), and Jones said that in his Mr. Donut store in Pennsylvania he spent 90% of his time in his store making coffee and donuts (FF62). Heimberger testified that she sells 62% donuts and 31% coffee and other drinks (FF85) at her three stores in Pennsylvania. Bower, Jr. also has three stores in Pennsylvania and said 75% of his sales are donuts and coffee (FF146) and that other products sold were Delaware donuts, 1 to 1 1/2% (FF145), muffins, 5-8%, and sausage, cheese, soup, chili, and biscuits, 1-3% (FF138).

Sheetz, a large convenience store executive with 158 stores in Pennsylvania, Maryland and West Virginia, estimated that his Mr. Donut shops sell 33 1/3% coffee, 33 1/3% donuts, and 33 1/3% other brand goods (FF192). Oden noted a lack of success in his three Mr. Donut stores in Pennsylvania in selling sandwiches and Delaware donuts (FF196). He put his yogurt sales at 1.7% to 6%, depending on the store (FF199). Roever said that in his three donut stores in Scranton, Pennsylvania, approximately 58% of his sales **[*215]** are coffee, 18% of his sales are donuts, about 15% is pastry and 10% is juice or sodas (FF231).

Ideally, donuts should be made fresh every four hours from scratch (FF7); however, several franchisees said they baked only twice a day and that is the frequency of resupply of many satellite donut stores. Muth testified at his deposition that he throws out donuts twice a day and muffins once a day. Coffee is brewed fresh every 15 to 20 minutes (FF453). While the donuts are undoubtedly of good quality, volume and variety, the four hour freshness standard appears to be an exaggeration. Examining the range given by Mr. Donut franchisees and others for coffee and donuts, we obtain approximately:

Store Owner	Coffee	Donuts
Bower	55%	--
Richmond	65%	30%
Lipe	65%	35%
O'Hanlon	70%	25%
Burgio	60%	40%
First	50%	50%
Heimberger	31%	62%
Sheetz	33%	33%
Roever	58%	18%
Unweighted Average	54%	37%

Obviously, coffee and donuts are presently major Mr. Donut products, with coffee clearly predominating. This is consistent with the testimony of plaintiffs' expert, Dr. French (FF249,260), and defendants' expert, Rice (FF306), discussed later in this decision. It would **[*216]** not seem difficult for virtually any convenience store, restaurant or fast food store to supply excellent fresh coffee if they wanted to. Fresh donuts would obviously require more equipment and training; however, they could be supplied from a central location twice a day as is done in a number of donut satellite stores.

Mr. Donut and Dunkin' Donuts shops do not sell only coffee and donuts. Many of them also sell muffins, cinnamon rolls, cookies, brownies, bagels, bread products, pies, cakes, pastries, croissants, various sandwiches (made of various bakery-product carriers with combinations of egg, cheese, bacon, sausage, ham, chicken, tuna and beef), soup, chili, yogurt, soft drinks, hot chocolate and tea (Plaintiffs' Exh. 105; Defendants' Exhs. 1-8). In fact, Dunkin' Donuts says its franchisees realize $ 225 Million annually in sales of non-donut, non-coffee food products that account for approximately 25-30% of their revenues (FF106,112). Mr. Donut has apparently been less successful with menu diversification, but non-donut and non-coffee sales appear to be about 10% of sales for the typical Mr. Donut franchise according to our calculations.

In terms of dayshare or the time **[*217]** of day products are sold, the morning breakfast hours appear to predominate (FF7). Bower put the peak period at 6:00 to 11:00 A.M., during which few ancillary products (soups and sandwiches) are sold (FF12,15). Lipe said he sells his donuts and coffee during a similar period (FF33), as did O'Hanlon, who does 60% of his business prior to 11:00 A.M. (FF46). Dr. French said that the Mr. Donut chain does 55% of its business from 6:00 A.M. to 12:00 noon (FF250). He also said that Mr. Donut shops attract a core group of regular customers (FF251). Donut shops appear to do most of their business when they serve breakfast, or a snack which is eaten in addition to breakfast. Obviously a lot of places other than donut stores also serve breakfast as well as lunch and dinner.

According to Dunkin' Donuts Zone Quarterly Marketing Reports for 1986, donut shop prices are close to each other (Plaintiffs' Exhs. 252,253,272,273). However, pricing evidence varied (FF231,450). Dunkin' Donuts' June, 1989 Quarterly Report showed prices at parity with supermarkets on dozens while, at the same time, the report concluded, "The Retail Price Analysis reflects that Dunkin' Donuts in the Mid-Atlantic is **[*218]** not competitive with supermarkets but are competitive with other donuts coffee shops" (Plaintiffs' Exh. 271).

Neither Dunkin' Donuts nor Mr. Donut establish prices for the products sold by the independent franchisees (Plaintiffs' Exh. 1 at 41; Plaintiffs' Exh. 40). Both sides agree that prices are set by the franchisees themselves. Bower stated this (FF13), as did Lipe, Roever, O'Hanlon, First, and Senior Vice President Feltenstein of Dunkin' Donuts (March 16, 1990, afternoon transcript pp. 163,165,166,167,289,292). Thus, in any given geographic market, these franchisees compete with each other and with the rest of the marketplace in setting their prices. Under such circumstances, it is difficult to see how a merger between two chains would make it possible to fix prices when each chain could not fix prices before. Even if donut stores only competed with each other, there would still be approximately the same number of stores to compete with each other.

The Proposed Merger

Following a bidding process with other substantial bidders (FF379) on January 10 and 12, 1990, International Multifoods entered into Stock Purchase Agreements to (1) sell the stock of Mr. Donut **[*219]** to Dunkin' Donuts, a subsidiary of Allied-Lyons, and (2) sell the stock of its Canadian Mr. Donut subsidiaries to Canadian subsidiaries of Allied-Lyons. The aggregate purchase price is comprised of $ 23,825,000.00 for the United States subsidiary (Defendants' Exh. 123), $ 4,800,000.00 for the Canadian subsidiary (Defendants' Exh. 124), and up to $ 3,000,000.00 for reimbursement of certain intercompany accounts (Defendants' Exhs. 123 & 124). The Canadian aspect of this transaction is not challenged by plaintiffs. It is, however, conditioned on closure of the United States portion of the agreement. As noted, the agreement calls for consummation by March 31, 1990.

Plaintiffs, who constitute less than twenty percent of Mr. Donut's United States franchisees, mobilized to block the sale. Plaintiffs petitioned their elected officials and together with their counsel visited the Antitrust Division of the Department of Justice and the Federal Trade Commission, submitting to each agency detailed written objections to the proposed merger (Defendants' Exh. 10). They also expressed several concerns in open court.

Haefner noted that many of his donut shop customers in Cape May Courthouse, **[*220]** New Jersey, are concerned about the merger (FF235). The customers of one donut shop presented the owner with a sign indicating that they did not want the merger to take place (Plaintiffs' Exh. 70A). Furthermore, like Dunkin' Donuts, Mr. Donut's advertising is financed by collecting a percentage from each franchisee, but Mr. Donut is less restrictive and collects a lower amount (FF9). The Dunkin' Donuts fee was put at 5% by Bower (FF20), which he thinks will give Dunkin' Donuts overwhelming advertising power (FF17) if the merger is consummated. Lipe testified that any increased costs will pose a problem for him (FF30), and that increased advertising expenditures will be of little assistance and the increased advertising charges of Dunkin' Donuts will be a problem (FF30,34).

O'Hanlon said his five stores already have higher sales than Dunkin' Donuts and that increased expenditures for advertising will assist him very little (FF48). Muth said the increased Dunkin' Donuts advertising fee would put him out of business (FF53). Jones noted that the twenty-two Mr. Donut stores in Pittsburgh pool their advertising and out sell Dunkin' Donuts (FF60). Bower, Jr. estimated he spends 3% **[*221]** of his income on Mr. Donut advertising on radio, television, etc. (FF136). Oden testified that Mr. Donut is flexible and allows him to spend 2% annually on advertising, with an extra 1/2% going direct to the franchisor, Mr. Donut (FF198).

The court viewed advertisements of both Mr. Donut and Dunkin' Donuts and while both were acceptable and effective, the Dunkin' Donuts ads appeared to be more sophisticated. The Dunkin' Donuts chain has current sales of approximately One Billion Dollars (FF371). The well-known sleepy little man who says "Time to make the donuts" is a Dunkin' Donuts advertisement which has been placed in the advertising hall of fame (Defendants' Exh. 117). There is also an increasing emphasis on selling products other than donuts.

In addition to advertising costs, Mr. Donut franchisees are also worried about the need to make expensive alterations if they convert to Dunkin' Donuts. Dunkin' Donuts would want the old-fashioned "W" shaped roofs still on some of the Mr. Donut stores replaced at an average cost of $ 50,000.00 (FF11). Dunkin' Donuts did say it would make money available for renovations at 1 1/2% above cost (FF11). Lipe said conversion costs would **[*222]** wipe out all his income from his two stores (FF30). Donovan saw problems for his four stores which have a high bank debt (FF40,42). Muth has one shop with a "W" roof and insufficient funds to make renovations (FF52). First recently remodeled her shop and although she could raise capital to meet her estimate of $ 70,000.00 to $ 80,000.00 for conversion renovations, she would rather sell the shop and retire (FF56). She admitted on cross-examination that Dunkin' Donuts had said they would honor all of Mr. Donut's contractual commitments (FF57). Vice President Burns of Mr. Donut confirmed this (FF101), as did Senior Vice President F. Ralph Gabellieri of Dunkin' Donuts (FF113) and Chairman of the Board Rosenberg (FF378).

Mr. Donut franchisees also are concerned about whether it is possible to convert those Mr. Donut stores which fall within Dunkin' Donuts exclusive franchise areas. Bower said that Mr. Donut provides its franchisees with a one mile radius area of protection (FF9). Bower also said that one hundred five Mr. Donut shops were within two miles of a Dunkin' Donuts shop and thirty-seven were within one mile (FF21). Donovan said he had stores within two miles of a Dunkin' **[*223]** Donuts store (FF41) and feels he would not be able to convert his four stores for this reason (FF42). Heimberger noted a plan to convert most stores in seven years (FF89) and reiterated that thirty-seven stores were within one mile of existing Dunkin' Donuts stores (FF91). Vice President Burns of Mr. Donut confirmed that no firm decision has been reached as to what to do with these thirty-seven stores (FF103). Senior Vice President Gabellieri of Dunkin' Donuts said this would be handled on a case-by-case basis and that the so-called exclusive areas were only granted for a limited time, which will soon expire (FF121).

Vice President Gabellieri said that after the stock acquisition, Mr. Donut would be run by him as a separate business organization (FF116). Conversion of "W" roofs has not been decided upon (FF114), and any conversion which does take place will be voluntary with a test being run on approximately forty shops (FF115). Dunkin' Donuts Chairman of the Board Rosenberg confirmed this test and a case-by-case approach (FF375,376). This should increase sales (FF115). Vice President Gabellieri said he does not know what they will do if the conversion test does not work (FF122,463).

[*224] Defendants initially claimed that in response to the proposed merger plaintiffs are intentionally withholding their franchise fees (FF98,109,125). However, all plaintiff owners who took the stand denied any such withholding of franchise fees (FF37,42,48,55,84,132). Meinecke has been doing so for one year, but only because of poor financial conditions in his store (FF174). Accordingly, there is no reason to deny relief on these grounds.

Donut Shop Competition

Bower said that convenience stores wanted to break the breakfast market by offering donuts from local bakeries, but that there is no comparison between their donut and a donut shop donut (FF13). He said Dunkin' Donuts supplies some convenience stores with donuts, but the supplying franchisee sets the price (FF13). Bower said fast food chains are not competitors for donut shops because although McDonald's does a breakfast-type business, it is not a coffee and donuts type business (FF14). He acknowledged that the donut market is shrinking (FF14) and that larger chains such as Amy Joy, Donuts Galore and Spudnuts no longer exist (FF16).

Bower said Mr. Donut's major competitor is Dunkin' Donuts, particularly in **[*225]** New England, Providence, Pittsburgh, Cleveland and almost all Northeast cities, and that it is almost impossible for a new chain to break into this market (FF16). Winchell's is a western donut chain with about 9% of the market there (FF16), while Dunkin' Donuts is dominant in the eastern market (FF22).

Richmond monitors prices at a nearby donut shop, but not at McDonald's. In his view, he does not compete with any convenience stores, supermarkets, or fast food stores (FF29). Lipe also checks prices at Dunkin' Donuts, but not at McDonald's which does sell coffee (FF32). In his opinion, he does not compete with local supermarkets (FF32). Sattler said, that as a former District Manager for Mr. Donut, he used to check prices for Dunkin' Donuts and Mr. Donut, but that he did not check McDonald's, WaWa, Seven-Eleven, Wendy's or supermarkets for their prices and that he does not regard them as competitors (FF36). O'Hanlon said he does not watch Acme prices although there is one with a fresh bakery within two miles of each of his five stores (FF47), and that when these stores and convenience stores pursued the donut market, his sales did not go down (FF48). First says she checks prices **[*226]** at a Dunkin' Donuts less than a mile away, but not at nearby fast food places (FF55). Heimberger disagreed with a statement by the Chairman of Dunkin' Donuts that the number one competition in the donut business is supermarkets, number two is convenience stores, and number three is fast food places (FF94). Roever testified that he does not check prices in supermarkets, convenience stores, or fast food places and that his sales were not affected by a recent supermarket sale on donuts (FF230). He does check prices once a year at local donut stores (FF230). Roever noted that supermarket donut prices are lower than his prices (FF231).

Tingley is a supermarket owner in Williamsport, Pennsylvania, and testified that he sells fresh-baked packaged donuts, but no fresh brewed coffee (FF128). His busiest hours are from 3:00 to 7:00 P.M. and he says he does not check prices at the local donut shop (FF129). Donuts are an extremely small part of his sales and the closing of a donut shop one mile away had no measurable effect on Tingley's sales (FF130). There are no convenience stores, fast food places or bakeries near Tingley's supermarket (FF131).

Bower, Jr. testified that he owned the **[*227]** donut store near Tingley's supermarket which closed in 1988 and that this dramatically increased sales at his other Mr. Donut store (FF133,134). Bower, Jr. does not consider fresh-baked supermarket donuts to be comparable to his, although they are cheaper (FF135), and does not view convenience stores, fast food places or supermarkets as competition (FF137). Hodin operates seven Giant supermarkets in Scranton, Pennsylvania; one store has a bakery where fresh donuts are made from scratch, although most supermarkets make fresh donuts from frozen materials (FF148). Hodin said that while operating this market, he sold land to a donut store only one block away without fearing any loss of donut sales (FF150). Hodin said that specials at the donut shop do not affect his sales and since he does not regard donut shops as competitors, he allows their advertising coupons on the back of his register tapes (FF151). His hours break down as follows: 8:00 to 11:00 A.M., 15% of customers; 11:00 A.M. to 4:00 P.M., 50% of customers; and 4:00 to 9:00 P.M., 35% of customers (FF152). He does not accept Mr. Donut coupons and does not sell donuts to be eaten in the store (FF152) because this would require **[*228]** special equipment and increase the labor costs in his union workers (FF153). Frey, who sells cash register tapes with ads on them, noted that supermarkets such as Giant, IGA, and Acme in Northeastern Pennsylvania, all permit donut ad coupons on their cash register tapes (FF154).

Levin, the former owner of Tempty Donuts, a major wholesale bakery in Brooklyn, New York, which sells to New Jersey, Connecticut and Pennsylvania, stated that his donuts are larger than donut shop donuts and that he never perceived himself as competing with donut shops (FF181,182). His donuts are sold in restaurants, diners, and the like (FF181) and usually reach the customer within 24 hours.

Sheetz said that, in his opinion, neither his convenience stores nor stores like Burger King compete with donut shops (FF190,193). Oden stated that the opening and closing of Weis supermarkets near his donut shops did not affect his sales, but that the opening and closing of another donut shop did (FF194,195).

In Clause 6.06 of the Merger Agreement (Defendants' Exh. 123), there is a non-competition provision which prevents International Multifoods from opening "any doughnut-coffee shop retail franchise business **[*229]** . . . similar to the business being conducted by [Mr.] Donut." Plaintiffs argue that this shows that defendants think of the market as being composed only of donut stores. The agreement was reached at arms length and we feel certain that International Multifoods had a vested interest in keeping definitions reasonably narrow. Other evidence discussed below confirms that this is not the product market as the defendants see it.

Ruenheck, the former President of Burger King, does not consider donut shops or fast food restaurants as direct competition (FF210), and does not monitor their prices or advertising (FF211,212). He said donut shops have no effect on his new shop site selection decisions (FF214) and that Burger King wanted to offer a full line type of breakfast and was not concerned about what donut shops were doing (FF214). He sees serious obstacles to donut shops entering the full fast food market such as lot size, store size, and the need for new equipment and training (FF218). In similar fashion, he sees similar problems with Burger King entering the fresh on-site cooked-from-scratch donut market (FF220). We do not doubt that entities as large as Burger King and McDonald's **[*230]** have traditionally not been too concerned about donut shop competition, however, this does not mean that the reverse is true.

In reviewing the foregoing, we are compelled to find that the fact testimony was mixed, at best, with witnesses often taking restrictive views of the meaning of the word competition or giving inconsistent answers. Sattler said his Mr. Donut store in Carnegie, Pennsylvania, makes more money than the two nearby Dunkin' Donuts stores (FF36). However, Donovan acknowledged that if he converts to Dunkin' Donuts he might make more money (FF40). Bower said conversion would put him out of business (FF18), although his son said just the opposite (FF147). This had to raise obvious questions about the credibility of both witnesses and further questions about Bower's motivation in bringing this suit since he was previously unsuccessful in buying the Mr. Donut chain (FF25). O'Hanlon testified that McDonald's prelunch food services have influenced him and he has had to react to their presence (FF44). To some extent, convenience stores might have also tapped this market (FF44). He feels constraints on his ability to increase prices (FF45).

Oden disputed a report that **[*231]** his sales dropped drastically when a new supermarket opened (FF203) and admitted that he might have checked prices in a supermarket (FF204). Oden also wrote a letter to his employees and told the local newspaper he was not concerned and that the merger would not affect his stores in any way. He later denied this was so (FF205) and said he only did this to calm any fears, his employees or the public might have.

Meinecke admitted that when he was a Mr. Donut District Manager, he was instructed to include convenience stores and supermarkets as competition although he now says he does not believe they are competition (FF177,178). Roever said he only competed with other donut shops (FF232), but confirmed that sales are dropping and that donut shops must now offer a full line to maintain their place in the community (FF233). He also agreed that his egg and meat products would compete with similar products in the community (FF234).

Knapp is a well known authority on food service and the head of a leading marketing research firm. He testified for the defense and was qualified as an expert on the effect that the proposed merger would have on food service competition (FF289). In his **[*232]** opinion, consummation of the merger could only increase competition (FF290), or at the least, keep competition the same (FF299). Knapp testified that the increased advertising and number of store outlets would help the resulting donut chain compete with the major players in the food service industry (FF292). Small donut chains are having a hard time surviving and Winchell's, on the West Coast, had to sell off some of its assets (FF293). Breakfast, for instance, has become very competitive in the food service industry and McDonald's now does 18 to 20% of its business at breakfast. In addition to this competition at lunch time, donut stores compete with sandwich and fast food places (FF294). There is also competition for snacks from 10:30 to 11:30 A.M., and from 9:30 to 11:00 P.M. (FF295). Major competitors for the snack market are places selling ice cream, yogurt, donuts, cinnamon buns; groceries and pizza; as well as convenience stores and supermarkets (FF295).

Defendants also called Rice, who was a founder of the well known consumer reports on eating share trends (CREST) (FF300). Rice was qualified as an expert in several areas (FF303) and testified that the restaurant industry **[*233]** is broken into three major segments: quick service, midscale and upscale (FF304). There are four daily segments: breakfast and morning snacks, lunch, dinner, and afternoon or evening snacks (FF304). A 1987 report prepared by Rice for Mr. Donut found the overall food industry in disarray since 1983 with saturation having been reached (FF305). The report said that hamburger restaurants filled a convenience weekday need that was previously filled by donut shops in the quick service industry segment (FF305,308). This has caused a decline in the donut shop segment of the fast food industry (FF314).

The 1987 report said that selling donuts alone is now questionable, and the donut category has not kept pace with the rest of the food service industry (FF307). The report listed donut shop competition as bakery companies, retail supermarkets, fast food places serving breakfast and other food service industry companies (FF309). McDonald's has 7500 outlets and in 1983 and 1987 sold more donuts and sweet rolls than Mr. Donut did, and over a five year period, constantly sold seven or eight times more coffee than Dunkin' Donuts and Mr. Donut could combined with about 2000 stores (FF310). **[*234]** Similar information was found in a 1988 report Rice prepared for Mr. Donut (FF311). Four percent of all cakes, pastry and tortes, and 64% of all cookie servings are sold through fast food restaurants (FF312,313). Twenty-one percent of the cookies were sold in hamburger chains, as was 8 1/2% of the cakes, pastry and tortes (FF312,313). Donut shops sold so little of these by comparison they didn't even make the list (FF312,313).

In the increased competition, supermarkets also offer a challenge (FF316). In Rice's opinion, the proposed merger would only serve to create a stronger chain and would not affect donut prices (FF317). While Rice obviously did his work for Mr. Donut, and knew people there and at Dunkin' Donuts (FF319), we found his testimony to be both consistent on cross-examination and credible (FF320-333).

Robert Rosenberg, Chairman of the Board of Dunkin' Donuts, testified that the annual report filed by Dunkin' Donuts with the Securities and Exchange Commission lists supermarkets, convenience stores, and national, regional and local firms offering similar products and services as its competitors (FF372). This also included fast food feeders, bakeries, other kinds **[*235]** of restaurants and coffee shops (FF372,373). He favored the merger to help both chains meet the growing stiff competition (FF374,377). Sidney Feltenstein of Dunkin' Donuts also testified about the growing threat to donut stores from supermarkets, fast food stores, convenience stores, other donut shops and microwave take-home food (FF454-463). He noted that both Burger King and McDonald's have tried selling donuts from their stores in a limited test (FF457). He said this concerns the donut store industry greatly, although others testified earlier in the trial that the tests were not very successful (FF156,216).

Expert Economic Testimony

Plaintiffs' expert, Dr. French, holds a Ph.D. in Economics (FF63) and testified first on February 16, 1990. On short notice, he prepared a chart (Plaintiffs' Exh. 22) which purported to show the market share of both Dunkin' Donuts and Mr. Donut in terms of the number of stores and sales (FF64). On the basis of this chart, he attempted to calculate a Herfindahl-Hirschman Index (HHI) by the usual method of squaring market shares (FF65). He attempted this although he did not know for certain at that time what the product and geographic **[*236]** markets were. The chart represented nationwide shares and assumed a "donut shop" market (FF68). The chart did not include supermarkets (FF69), "Mom and Pop" stores (FF72), fast food places (FF80), or convenience stores (FF82). Dr. French testified that the chart gave only an indication of what a local HHI would be (FF71,73) and that he would not rely on the chart if the total number of donut shops was 8500 rather than the much lower number he had assumed (FF81). In later testimony, Dr. French admitted that his lower number was incorrect and that there were, in fact, 8557 donut stores in the United States (FF252).

Dr. French stated that the real test of a relevant product market was whether or not there was economic substitution such that if donut shops raised their prices they would lose significant volumes of sales to others (FF70,83). He had only just begun his research on a product market when he first testified (FF80). Nevertheless, he was of the opinion that the geographical market was local in nature (FF71), although he had not fully examined this market either (FF82).

Dr. French testified again on March 8, 1990, after having reviewed considerable literature, interviewing **[*237]** plaintiffs, listening to testimony and conducting a limited survey (FF239). The survey was of 366 customers at two donut shops in Pittsburgh, Pennsylvania, and one in Allentown, Pennsylvania (FF239). The Allentown shop is owned by a plaintiff in this action and for this reason, the study method was criticized by defendants' expert, Dr. Smith (FF359-370). It was also criticized by Rice (FF318). It was noted that there was an error in the survey form instructions (FF240). However, this was negated when Dr. French analyzed the survey forms and found, at most, fifteen errors out of some three thousand questions (FF245). Criticism was also directed to Survey Question No. 3 which was somewhat leading. Dr. French felt that he could rely on the survey in part and that it was still meaningful (FF244). Although he did not consider himself an expert in conducting polls, Dr. French did regularly use polls in his work (FF244). The court noted the time constraints imposed by the March 31st deadline in the merger agreement, as well as the ten day time limit contemplated by *Fed.R.Civ.P. 65*. The court fully analyzed the survey in light of the criteria set forth by the Third Circuit in **[*238]** *Pittsburgh Press Club v. United States, 579 F.2d 751, 755-760 (3d Cir. 1978)*, and found that the requirements were sufficiently met to allow admission of the survey (FF246). The survey was not hearsay and probed a state of mind (FF239). Those conducting the survey were college graduates (FF240). The court noted that the results of all three studies were basically similar and the data was recomputed which lessened concerns about the inclusion of Allentown in the survey (FF239). The study was for limited purposes being only partly the basis for some of Dr. French's opinions. The survey found that donuts and coffee are more than 80% of donut shop sales (FF249), which confirmed fact testimony previously discussed in this decision. According to Dr. French, the study also showed that people were willing to pay more for donut shop donuts even though they knew cheaper donuts were available elsewhere (FF265).

At the same time, one survey undertaken for Dunkin' Donuts indicates that, among respondents who had purchased donuts from Dunkin' Donuts in the past year, 29.7% said they would have gone to a supermarket if Dunkin' Donuts was closed, and 29.1% said they would go to another **[*239]** donut shop, and others mentioned other types of competitors (Defendants' Exh. 53A). For respondents who purchased a dozen or more donuts, 35.9% named a supermarket as an alternative to Dunkin' Donuts (Defendants' Exh. 53A).

On the basis of the testimony and visits to a representative group of convenience stores, fast food stores, diners, restaurants and supermarkets in Pittsburgh and Allentown, Dr. French concluded that because of differences in hours, variety, quality, freshness, and volume, these establishments do not compete with donut stores (FF259-263). He also relied on a 1987 Dunkin' Donuts study which emphasized donut store quality (FF264). The representative group of stores he visited was selected from a telephone directory and in Allentown represented only some 10% of the establishments in the area (FF280). As a matter of common sense, we find it difficult to believe that other establishments could not, at the very least, compete with high quality coffee -- the major donut shop product -- if they wanted to.

Dr. French identified two relevant product markets in the instant case (FF247). This narrowed the initial three product markets which had been alleged in paragraph **[*240]** nine of the complaint. The first was the end product market for donut shop products consisting of a cluster of products and services typically provided by donut shops, the most important of which are donuts and coffee. He also attempted to identify an end product market for low-cost highly specialized prepared food franchises (FF247). This narrowed the two franchise markets alleged in paragraph nine of the complaint.

With regard to the geographic market, it was Dr. French's opinion that the end donut shop product markets were quite localized, including many markets within one metropolitan area (FF248). Dr. French referred to several large maps and further defined the geographic market for each donut shop as its local trading area with a primary trading area within three miles of a donut shop and a secondary trading area within five miles of it (FF267). There is no national market for donut shop products according to Dr. French (FF335). Dr. French has not been able to ascertain any geographic market for the so-called franchise market (FF248). He was of the opinion that there would be harmful competition sustained for an intolerably long time in the end product market if the **[*241]** merger goes through (FF248). This would be felt most heavily in the eastern part of the United States (FF254) where Mr. Donut and Dunkin' Donuts are the major big competitors (FF252). Dr. French thought it was unlikely that a smaller chain could enter this market (FF268), or that smaller independent stores could effectively compete (FF269,270).

Dr. French repeated his tests for a relevant product market, which involved an analysis of who donut shop operators would lose customers to (FF257). The idea, he said, is to find all available evidence of what the substitutability would be in response to a relevant price change (FF257). The question, he said, is whether other sellers of fresh donuts would be able to restrain prices at the donut shops. He said his opinion was based upon his view of what a customary 5% price increase would produce. He could not calculate an HHI because he did not have any local sales data but he estimated that if there were only six sellers in each local geographic area, the 1800 threshold would be reached (FF282). He admitted on cross-examination that a five mile radius trading area could be as big as 75 square miles depending on local geography (FF283). **[*242]** Dr. French also admitted, on cross-examination, that it would not hurt to see if products such as a McDonald's pastry could substitute for donuts (FF284), although he thought that convenience stores could not stock sufficient volumes and that other vendors' coffee quality would prevent economic substitution (FF285,286). He also admitted seeing trade literature expressing the view that the entry of fast food stores into the breakfast market had increased competition with donut stores (FF336).

Dr. French agreed with the standard Department of Justice criteria that a price increase for a particular product could be made unprofitable by any of four types of demand or supply response: (a) consumers switching to other products; (b) consumers switching to other suppliers of the particular product; (c) suppliers switching existing production facilities from other products to the production of the particular product; and (d) suppliers constructing new or substantially modifying existing facilities to produce the particular product (FF275).

With regard to the so-called franchise product market, Dr. French acknowledged that there were many types of low-cost franchises and that he had been **[*243]** unable to fully test his theories of a limited menu item franchise market (FF273). With the exception of a few people like Lipe, who said they were only interested in obtaining a donut shop franchise (FF30), there was no testimony concerning franchises which was sufficient to allow us to infer the existence of a franchise product market. There are, of course, differences in things such as working conditions and initial cash outlays, nevertheless, we feel that most people go into business to make money and would usually pick the type of franchise which gave them the best return for their money. As already noted, a geographic market could not be identified. We, therefore, must reject the so-called franchise market at this time because plaintiffs have not proven a sufficient basis for any finding of a probability of success.

Furthermore, attempts at narrow limitations on the market for the sale of franchises are usually rejected. See *Twin City Sportservices, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1273 (9th Cir. 1975)* (finding "a high degree of substitutability" in the market for the sale of franchises, and that no market exists limited to concession franchises for **[*244]** major league baseball teams); *Midwestern Waffles, Inc. v. Waffle House, Inc., supra, 734 F.2d at 713 (11th Cir. 1984)* (participants in relevant product market to evaluate alleged monopolization by franchisor must include all restaurants with similar menus, similar hours, similar service which all are reasonable substitutes); *Raceway Properties, Inc. v. Emprise Corp., 613 F.2d 656, 658*, (6th Cir. 1980) (relevant market for concession franchise owner at a race track was all concession franchises in stadia, arenas and airports); *Philadelphia Fast Foods, Inc. v. Popeyes Famous Fried Chicken, Inc., supra, 647 F.Supp. at 229* (market cannot be limited only to Popeyes' franchises).

We were more than mildly surprised to find that, according to the published opinion, plaintiffs' expert had testified in *Popeyes Famous Fried Chicken, supra*, as follows:

> In direct contrast to Dr. Shepherds testimony, the testimony of Gary French, an expert witness for Popeyes, on the relevant product market is well documented. Mr. French testified that the relevant product market was "fast foods at either the retail or franchisor level." Testimony of Gary French, May 6 Tr. **[*245]** at 82. Mr. French based his conclusion on an extensive independent study conducted by himself and his staff. *Id. at 88-102*. Specifically, Mr. French testified that Popeyes faces competition from all fast food outlets and that there are low barriers to entry and a high degree of cross elasticity of demand in the fast food market. He also stated that there was no product market in Popeyes' franchises, and if the market were to be defined in terms of franchises, it would have to include all fast food franchises.

Id. at 229. In Popeyes, Dr. French had included donut shops in the product market along with all other fast food establishments (FF287). Based upon this, the problems with the survey, the mixed nature of the fact testimony, and the nature of Dr. French's expert testimony, we feel we must have doubts about the reliability of Dr. French's opinions in this case. Furthermore, Dr. French has attempted to define a product market for plaintiffs consisting of "the cluster of products and services typically provided by donut shops . . . the most important of which are donuts and coffee" (FF247). This definition cannot withstand legal scrutiny under the facts **[*246]** in this case.

As a matter of law, clustering is appropriate only if the cluster is sufficiently inclusive to be meaningful in terms of trade realities. E.g., *United States v. Philadelphia National Bank, 374 U.S. 321, 356-57 (1963)*. There is no law requiring people to eat donuts or restricting the number of donut stores. Nor can donuts be called a necessity or a product for which there are no substitutes. As stated in 3 J. Von Kalinowski, Antitrust Laws and Trade Regulations, § 18.02[3], at 18-86 (1989):

> The courts have recognized that where one or more of the products or services included within the cluster do face effective competition from available substitutes, the cluster will be inappropriate because under-inclusive.

See also Thurman Industries, Inc. v. Pay ' N Pak Stores, Inc., supra, 875 F.2d at 1377 (rejecting "clustering" theory applied to home improvement stores where evidence showed that for any given product sold at such stores, identical or functionally equivalent products were available elsewhere); American MediCorp, Inc. v. Humana, Inc., 445 F.Supp. 589, 603 (E.D. Pa. 1977) ("[o]f the services enumerated by plaintiff [to **[*247]** be included in the cluster of services market], we find that the record to date establishes that all of these services are available from other sources").

The defense expert, Dr. Bruce Snapp, testified toward the end of the trial. Although he agreed that the geographic market was a local one, his testimony on the product market was opposite to that of Dr. French. Dr. Snapp holds a Ph.D. in economics from the University of Michigan and formerly worked as a Senior Economist in the Office of the Antitrust Division of the U.S. Department of Justice (FF405). Since leaving, he works in the private sector where he is also involved in analyzing mergers (FF406). He is also familiar with the policies of the FTC (FF407). He reviewed a number of materials to prepare for the instant case, including publically available trade publications and documents produced in discovery (FF416,417,418). He also interviewed executives of International Multifoods and Mr. Donut (FF408).

In Dr. Snapp's opinion, the proposed merger will not reduce competition in any relevant market for donut shop products (FF409). He said the same with regard to the so-called franchise market, which he feels is a very broad **[*248]** market (FF409). He also noted, as we did earlier, that prices are set by the individual franchisees, and said that the proposed merger could not impact the market in which donut shop products are sold because following the merger, the number of independent decision makers who set prices will still be the same (FF409). Dr. Snapp defined market power as the ability to raise and to sustain prices for a significant period -- usually one or two years (FF410). He agreed that market power can be rendered impossible for the traditional reasons considered by the U.S. Department of Justice (FF410). These were also agreed to by Dr. French (FF275). He reiterated the importance of defining both a relevant product and geographic market before attempting to calculate the HHI (FF411,415).

Dr. Snapp disagreed with Dr. French's product market definition because French failed to consider whether related products like rolls and pastry sold in the donut stores were also in the market, or might be substitutes for donuts (FF413). He said Dr. French took too limited a view of suppliers and excluded supermarkets, retail bakeries, convenience stores, and other quick service restaurants (FF413). **[*249]** He also said Dr. French did not take supply substitution into account and was incorrect in postulating a cluster approach because the products are sold individually (FF413). As we have already noted, we believe this position is legally correct.

Dr. Snapp reviewed in-house documents and testified that donut companies view themselves as being in a bifurcated market. In the morning breakfast market, they compete with quick service fast food restaurants (FF418,419). The rest of the day they compete in a bakery market where the principal competition comes from retail and in-store bakeries (FF419). He found significant a Dunkin' Donuts internal memorandum which indicated that customers would turn to supermarkets if Dunkin' Donuts ever closed (FF420).

Dr. Snapp agreed with Dr. French's assessment that for donut shop products there is not a national geographic market (FF424). He looked up the number of establishments that sell donuts in the Boston, Massachusetts Metropolitan Area Yellow Pages under "Doughnuts" and found 58 different firms with 124 different stores (FF424). Under "Bakers -- Retail", there were 257 firms with a total of 304 stores. He also did this for Cleveland, Pittsburgh, **[*250]** and Providence. Dr. Snapp concluded that in most neighborhoods one would find entities offering some form of donut, pastry or muffin, and a cup of coffee. Even if entities near a donut shop did not offer close substitutes now, they could do so within a year (FF424). He also felt that convenience stores could put in donut display cases for less than $ 1,600.00 (FF426). He noted that in-store bakeries are increasing at the rate of 10% a year, which is more than donut shops (FF428).

Dr. Snapp admitted on cross-examination that he has not conducted a survey of people who eat donuts (FF431). He was shown a Dunkin' Donuts survey in which only 6.4% of those surveyed said price was the reason they bought at supermarkets and only 10% said price was why they bought at a donut shop. Dr. Snapp felt that this was not important, but how they would react to a change in price was (FF434). He also said that even Dr. French's survey showed that even a 13% loss of customers was of interest to donut shops (FF436). He said that Dunkin' Donuts' President had told him that no donut shop could afford a 13% loss in customers (FF437). Although he was cross-examined at length, Dr. Snapp did not change **[*251]** his basic opinions (FF430-450).

The Preliminary Injunction

Taking an overview of all the facts, we are compelled to find, from the facts alone, that plaintiffs have not proven a product market, much less a probability of success as required by *Brown supra.* The fact testimony was mixed, at best, and the expert economic testimony clearly pointed to the broad product market proposed by defendants.

Plaintiffs, for various reasons, do not want the proposed merger to take place and they have tried to define a relevant product market in which Mr. Donut and Dunkin' Donuts were the principal participants and in which the proposed merger would seem, therefore, to eliminate substantial competition. We are not unsympathetic to their concerns, but a federal antitrust action is not the appropriate vehicle in which to air them. The federal courts have on many occasions rejected self-serving efforts to define away competition with proffered market definitions that resemble the proverbial "strange red-haired, bearded, one-eyed man-with-a-limp." *Belfiore v. New York Times Co., 654 F.Supp. 842, 846 (D. Conn. 1986)* (quoting *City of Detroit v. Grinnell Corp., 495 F.2d 448, 457* **[*252]** *n.4 (2d Cir. 1974)*, aff'd, *826 F.2d 177 (2d Cir. 1987)*, cert. denied, *484 U.S. 1067 (1988)*.

HN8[] Alleged market definitions that ignore obvious substitute products and suppliers are invalid. Thurman Industries, Inc. v. Pay ' *N Pak Stores, Inc., supra, 875 F.2d at 1375-77* (home specialty stores not a market where identical products available at other retail establishments); Belfiore v. New York Times Co., supra, 826 F.2d at 180 (affirming grant of summary judgment for defendant; rejecting market defined as "general interest daily newspapers directed primarily to upscale readers", because it was "implausible as a theoretical matter"); *G. Heileman Brewing Co. v. Anheuser-Busch, Inc., 676 F.Supp. 1436, 1463 (E.D. Wis. 1987)*, aff'd, *873 F.2d 985 (7th Cir. 1989)* (rejecting low alcohol beer submarket); *Shaw v. Rolex Watch, U.S.A., Inc., 673 F.Supp. 674, 679 (S.D.N.Y. 1987)* ("Court does not need protracted discovery to state with confidence that Rolex watches are reasonably interchangeable with other high quality timepieces"); *Frito-Lay, Inc. v. Bachman Co., 659 F.Supp. 1129, 1137-1138 (S.D.N.Y. 1986)* (market is salted snack foods, not merely corn chips). **[*253]**

Market distinctions based solely on "price/quality" have routinely been rejected as "unrealistic" and "economically meaningless", particularly if the differences "are actually a spectrum of price and quality differences." *Murrow Furniture v. Thomasville Furniture Industries, Inc., 889 F.2d 524, 528 (4th Cir. 1989)* (emphasis in original). See also *Brown Shoe, supra, 370 U.S. at 326*; *Nifty Foods Corp. v. Great Atlantic & Pac. Tea Co., 614 F.2d 832, 840 & n.13 (2d Cir. 1980)* (collecting cases rejecting price/quality distinctions); *Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376, 1379-80 (9th Cir. 1981)* (holding Fiat brand competes with other automobiles); *Liggett & Myers, Inc. v. FTC, 567 F.2d 1273, 1274-1275 (4th Cir. 1977)* (premium and economy dog food compete in the same product market); Super Premium Ice Cream Distribution, supra, 691 F.Supp. at 1268 ("gradations among various qualities of ice cream are not sufficient to establish separate relevant markets for the purposes of determining market power"); *Mogul v. General Motors Corp., 391 F.Supp. 1305, 1313 (E.D. Pa. 1975)*, aff'd, *527 F.2d 645 (3d Cir. 1976)* (Cadillac **[*254]** brand is "interchangeable with other luxury automobiles" and "it competes with even the less expensive models of automobiles").

The cases relied upon by plaintiffs are not to the contrary. Thus, *Tasty Baking Co. v. Ralston Purina, Inc., supra, 653 F.Supp. at 1260*, the opinion of our Chief Judge most heavily relied on by plaintiffs, questioned the "premium" distinction in defining the market. Beatrice Foods Co. v. FTC, supra, also relied on by plaintiffs, emphasizes that "premium price" distinctions are an element of plaintiff's proof when the proof includes, rather than a spectrum of prices, "clearly separate price groupings that have little or no price sensitivity between them" and price distinctions "clearly indicative of such quality distinctions" that the products are no longer reasonably interchangeable. 540 F.2d at 309-310. See also *Columbia Metal Culvert Co., Inc. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 30* (3d Cir.) (price distinction significant only if accompanied by distinct use, physical properties and production methods), cert. denied, *439 U.S. 876 (1978)*. Plaintiffs rely on numerous cases, but they have offered no appropriate **[*255]** evidence to support those cases. Their case is heavy on legal theories and light on facts.

Accordingly, their request for a preliminary injunction must be denied, because plaintiffs have not met their burden of proof on their antitrust claims. The discovery was expedited, but it was also extensive, numbering in the hundreds of exhibits, and in spite of this, plaintiffs have been unable to produce factual evidence which would entitle them to relief. We have done everything in our power to be fair. We have supervised discovery when necessary, sat for extended hours and changed our entire court schedule. We have analyzed the testimony in great detail. Nevertheless, plaintiffs have been unable to prove their case and we think it is unlikely that they will ever be able to do so.

Motion to Dismiss

We have deferred until now our consideration of defendants' pretrial motion to dismiss plaintiffs' complaint, because plaintiffs' lack antitrust standing. Simply put, defendants claim that plaintiffs have not proven their standing, because they are not the Mr. Donut company or even its stockholders, but rather, they are almost all third party franchisees who could only stand to **[*256]** benefit if all franchise donut shops began charging higher prices. Bower, Sr. is, of course, not a franchisee, but a supplier to franchisees.

We agree with defendants that the federal antitrust laws impose additional standing requirements beyond those required by Article III of the Constitution. *Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 535 n.31 (1983)*. The law is clear that ***HN9***[] a private plaintiff must demonstrate "antitrust injury" in order to have standing under the Clayton Act to challenge a merger. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 (1977)*, reversing, *523 F.2d 262 (3d Cir. 1975)*; *Alberta Gas Chemicals Ltd. v. E. I . Du Pont de Nemours & Co., 826 F.2d 1235, 1239-40 (3d Cir. 1987)*, cert. denied, *486 U.S. 1059 (1988)*; *Treasurer, Inc. v. Philadelphia National Bank, 682 F.Supp. 269, 273-75* (D. N.J.), aff'd w/o opinion, *853 F.2d 921 (3d Cir. 1988)*.

At the same time, several cases have held that a target of a hostile takeover or acquisition or a competitor has standing to allege antitrust injury and to seek an injunction under *Section 16* of the Clayton Act in circumstances **[*257]** similar to the one sub judice. See *Consolidated Gold Fields, PLC v. Minorco, S.A., 871 F.2d 252 (2d Cir. 1989)*; *R. C. Bigelow v. Unilever N.V., 867 F.2d 102 (2d Cir. 1988)*, cert. denied, *110 S.Ct. 64 (1989)*; *Grumman Corp. v. LTV Corp., 665 F.2d 10 (2d Cir. 1981)*; *Marathon v. Mobil Oil, 669 F.2d 378 (6th Cir. 1981)* cert. denied, *455 U.S. 982 (1982)*; *Remington Products, Inc. v. North American Phillips Corp., 717 F.Supp. 36 (D. Conn. 1989)*; *Copeland v. Guste, 1989-2 CCH Trade Cases P68,712 (E.D. La. 1988)*. See also *Gearhart Industries, Inc. v. Smith Intern, 592 F.Supp. 203, 211*, Fn.1 (N.D. Tex. 1984)5 (citing cases); *Laidlaw Acquisition Corp. v. Mayflower Group, 636 F.Supp. 1513 (S.D. Ind. 1986)*. In particular, we note that Chief Judge Fullam rejected similar arguments to those advanced by defendants in *Tasty Baking Co. v. Ralston Purina, Inc., supra, 653 F.Supp. at 1255*, and in fairness, we take a similar approach and decline to dismiss plaintiffs' complaint at this point in time, although, as we have noted, we have serious doubts about plaintiffs' ability to prevail.

State Law Claims

Plaintiffs would have us enjoin **[*258]** the proposed merger on the basis of their alleged pendent state law claims for breach of contract and tortious interference with business relations. We do not believe that we may properly do so. As we have already noted, without a federal cause of action plaintiffs' state law claims must also fail. Our lack of confidence in plaintiffs' success on the federal antitrust claims causes us to have similar doubts that the pendent claims will survive. Our concerns, however, go well beyond that. The standard for injunctive relief in non-antitrust claims is basically the same as that for antitrust claims. *15 U.S.C.A. § 26*; *Tasty Baking, supra, 653 F.Supp. at 1276*. Injunctive relief is an "extraordinary remedy . . . which would be granted only in limited circumstances." *Frank's GMC Truck Center, Inc. v. General Motors Corp., 847 F.2d 100, 102 (3d Cir. 1988)*.

HN10[] To obtain injunctive relief, plaintiffs must establish and the court must conclude that: "(1) plaintiffs are likely to succeed on the merits; (2) plaintiffs are subject to irreparable harm pendente lite; (3) defendants will not suffer substantial harm from the grant of an injunction; and (4) the public interest requires **[*259]** that plaintiffs be accorded relief." *Sullivan v. City of Pittsburgh, 811 F.2d 171, 181* (3d Cir.), cert. denied, *484 U.S. 849 (1987)*.

Accord *Continental Group, Inc. v. Amoco Chemicals Corp., 614 F.2d 351, 356-57 (3d Cir. 1980)*. Plaintiffs' evidence fails to meet these standards.

We can find nothing in the plaintiffs' franchise agreements which prevents Mr. Donut from selling its stock (Plaintiffs' Exh. 12). Moreover, the facts give us a clear picture of defendants, who have said over and over again, that they will honor all contractual commitments of Mr. Donut (FF101,113,178). Beyond speculation, we have seen no proof that they will not and believe that if any violations ever do actually occur, they could be adequately handled in an action at law. In short, we find no breach, anticipatory or otherwise, or evidence of a lack of good faith or fair dealing.

According to their complaint, plaintiffs also claim tortious interference with their franchise agreements claiming first that the merger will result in Mr. Donut's contractual duties to its franchisees being assigned or delegated to Dunkin' Donuts, and secondly, that Dunkin' Donuts' intentions will interfere **[*260]** with these duties. Plaintiffs' first claim is against International Multifoods and Dunkin' Donuts. International Multifoods is a guarantor of the Mr. Donut franchise agreements and Dunkin' Donuts will be a successor to the contract. It is hornbook law that a party or successor party to a contract cannot tortiously interfere with its own contracts. *Peoples v. Pennsylvania Power & Light Co., 638 F.Supp. 402, 407 n.5 (M.D. Pa. 1985)*; *C&C Security Specialists, Inc. v. GTI-Superior, Inc., No. 86-1096, 1986 WL 7573, at 2-3* (E.D. Pa. July 1, 1986) ("basic principle that one cannot tortiously interfere with his own contract"); *Daniel Adams Assoc. v. Rimbach Publishing, Inc., 360 Pa.Super. 72, 519 A.2d 997, 1000*, app. dismissed, *517 Pa. 597, 535 A.2d 1056 (1987)* (tortious interference "necessarily involves three parties"); *Restatement (Second) of Torts § 766* (1979) (cause of action requires a third person).

Plaintiffs' second state tort claim against Dunkin' Donuts alone also fails because a claim for tortious interference requires that a defendant "induce[e] or otherwise cause[] [a] third person not to perform the contract" in issue. *Restatement (Second) of* ***[*261]*** *Torts § 766*. See also Koppers Co. v. Krupp-Koppers GmbH, 517 F.Supp. at 836, 851 (1981). That is, defendants must intend to prevent the completion of a contract, thereby harming plaintiffs and, as we have noted, they have not yet done so and say they never will.

CONCLUSIONS OF LAW

1. Under the facts and law, plaintiffs have not proven a product market for the sale of franchises.

2. Under the facts, plaintiffs have not proven a geographic market for the sale of franchises.

3. Under the facts and law, plaintiffs have not proven a product market for donut shop products as a cluster or otherwise.

4. Under the facts, plaintiffs have generally identified a geographic market for donut shop products, but under the facts and law, they have not proven the required specifics about said geographic market.

5. Under the facts and law, plaintiffs have not proven a probability of success and irreparable harm for their federal antitrust claims.

6. Under the facts and law, plaintiffs have not proven that with regard to their state law claims they are likely to succeed on the merits, that they will suffer irreparable harm, that the defendants will not suffer substantial harm, **[*262]** and that the public interest requires that plaintiffs receive injunctive relief.

7. Plaintiffs are not entitled to a preliminary injunction.

8. Plaintiffs are no longer entitled to a temporary restraining order.

9. Defendants are not entitled to a dismissal of the case at this point.

An appropriate order follows.

ORDER

AND NOW, this 27th day of March, 1990, the court having considered the motion of defendants Dunkin' Donuts, Inc., Allied-Lyons, PLC, International Multifoods Corporation, and Mister Donut of America, Inc. (collectively "defendants") for an order dismissing plaintiffs' complaint; and plaintiffs' motion for a preliminary injunction; and upon considering the parties' respective arguments in respect thereof, it is hereby ORDERED that plaintiffs' motion for a preliminary injunction be and hereby is DENIED; and it is FURTHER ORDERED that the ex parte temporary restraining order entered by the court on February 13, 1990, be and hereby is DISSOLVED AND VACATED; and it is FURTHER ORDERED that defendants' motion to dismiss plaintiffs' complaint be and hereby is DENIED WITHOUT PREJUDICE.

Berman v. Riverbay Corp.

United States District Court for the Southern District of New York

March 29, 1990, Decided and Filed

No. 89 Civ. 5538 (WK)

Reporter

1990 U.S. Dist. LEXIS 3372 *; 1990-2 Trade Cas. (CCH) P69,103

Opinion

MEMORANDUM & ORDER

WHITMAN KNAPP, UNITED STATES DISTRICT JUDGE

Defendant moves to dismiss. For reasons which follow, its motion is denied.

BACKGROUND

Plaintiff Bronx Lifestyles Publishing Corporation ("Bronx Lifestyles") publishes *smartshopper,* a weekly newspaper that is delivered free of charge to the residents of Co-op City, a cooperative high-rise housing complex located in the Bronx. Plaintiff Alan Rivlin d/b/a Co-op Newspaper Delivery Service is a resident of Co-op City and distributes *smartshopper.* The remaining plaintiffs, who sue individually and as representative of a class of Co-op City residents, are all readers of *smartshopper.*

Defendant Riverbay Corporation ("Riverbay") operates Co-op City. [1] Approximately 60,000 people live in Co-op City, which is designed to be a self-contained community with its own cooperatively-operated supermarkets, shopping centers, credit union, pharmacies, optical center, nurseries, centers for the elderly, power plant, post **[*2]** offices, garages and auditoriums. Riverbay employs its own maintenance crew and approximately 100 security guards who are registered with New York State as police officers and special patrolmen.

Riverbay distributes to the doorsteps of all residents a weekly newspaper called *The Co-op City Times,* the subscription price of which each resident is assessed as part of his or her monthly maintenance charges. *Smartshopper,* which is also delivered to residents' doorsteps, is free of charge. Both *The Co-op City Times* and *smartshopper* are delivered by Co-op City residents. Residents also receive *City News* free of charge, but through the mail. This difference is significant; because it relies on the postal system for distribution, *City News* goes to press earlier than *The Co-op City Times* and *smartshopper* and thus cannot compete for last-minute advertisements. Unlike **[*3]** such publications as *The New York Times, The New York Post, The Daily News, El Diario, The Amsterdam News* and *Jewish Week,* which have a general circulation, *The Co-op City Times, smartshopper* and *City News* are distributed exclusively to Co-op City residents, report news of particular interest to Co-op residents and carry the advertisements of local merchants seeking to win the residents' business.

The complaint alleges that, in March 1989, in response to competition from a predecessor to *smartshopper* that had also been published by Bronx Lifestyles, the Riverbay board of directors enacted a resolution punishing residents who delivered "advertising material" with a $ 50.00 fine for the first offense, a $ 100.00 fine for each subsequent offense, and possible eviction for multiple offenses. In July 1989, the complaint further alleges, Riverbay responded

---

[1] The United Foundation, a non-profit organization empowered by the federal Mitchell-Lama Act, created Riverbay. In the 1960's, Riverbay, funded by the investments of thousands of moderate-income residents-to-be and a mortgage backed by bonds raised by the State of New York, built Co-op City.

to *smartshopper's* success in luring local advertisers away from *The Co-op City Times* by directing Bronx Lifestyles to desist from distributing *smartshopper.* At or about the same time, Riverbay wrote to *smartshopper's* advertisers and directed them to desist from advertising in publications that Riverbay **[*4]** did not authorize. In August 1989, the complaint maintains, Riverbay directed its security officers continuously to watch Bronx Lifestyle's offices and delivery personnel. On August 4 and 11, Riverbay personnel removed all publications of any sort except *The Co-op City Times* from residents' doorsteps. On August 12, a Riverbay security guard arrested a person who was delivering *smartshopper.*

DISCUSSION

Plaintiffs allege that Riverbay's actions give rise to claims under Section 2 of the Sherman Act, *15 U.S.C. § 15*; New York's Donnelly Act, G.B.L. *§ 340*; and *42 U.S.C. § 1983*. They seek treble damages; attorney's fees and costs; declaratory relief; and an injunction forbidding Riverbay to enforce its regulation, in a way so as to interfere with Bronx Lifestyles' relationship with advertisers, or otherwise to seek to restrain competition between *smartshopper* and *The Co-op City Times.*

A. *Antitrust Claims*

First, we turn to the claim under the Sherman Act. ***HN1***[] A monopolization claim under § 2 of the Sherman Act consists of three elements:

(1) possession of monopoly power in the relevant product and geographic market;

(2) wilful acquisition or maintenance of that power; and

[*5] (3) causal "antitrust injury." *Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc. (9th Cir.) 627 F.2d 919*, *cert. denied, (1980) 450 U.S. 921*.

Plaintiffs' allegations, if proved, could support a claim of monopolization. The relevant product and geographic market could be defined as newspapers that are distributed to the doorsteps of Co-op City residents and derive income from the advertising dollars of local merchants. [2] **[*6]** Certainly, in having at least the apparent authority to regulate such deliveries, Riverbay could be found to possess the power to exclude competitors and, based on the above-discussed allegations, could be found to have used such power to *smartshopper's* detriment. [3] We deny the motion to dismiss the Sherman Act claim.

Plaintiffs' second claim is lodged under the Donnelly Act, which is often known as New York's "mini Sherman Act." The Act generally has been interpreted with reference to federal ***antitrust law***. Unlike the § 2 monopolization and attempted monopolization claim discussed above, however, ***HN2***[] a claim under the Donnelly Act requires a showing of an "arrangement" to monopolize. An "arrangement" has been defined as "a reciprocal relationship of commitment between two or more legal or economic entities similar to but not embraced within the more exacting term, 'contract,' 'combination' or 'conspiracy.'" *State v. Mobil Oil Corp. (1976) 38 N.Y.2d 460, 464, 381 N.Y.S.2d 426, 428*.

---

[2] The complaint makes contradictory allegations regarding the relevant market. In paragraph 31, it asserts that the market is "businesses which utilize advertising and marketing services and goods in order to sell their goods and services specifically to residents of Co-op City." In paragraph 42, it states that Riverbay's actions "constitute an attempt to monopolize the distribution of news and advertising directly" to Co-op City residents. We see no point, however, in asking plaintiffs to go through the formality of amending the complaint so as to bring it in line with the arguments that have been developed during the arguments on this motion.

[3] In the alternative, but for essentially the same reasons, plaintiff's allegations could also support a claim of attempted monopolization under § 2. *See* *National Ass'n of Pharmaceutical Manufacturers v. Ayerst Laboratories (2d Cir. 1988) 850 F.2d 904, 915*; *International Distribution Centers v. Walsh Trucking Co. (2d Cir.) 812 F.2d 786*, *cert. denied,* ***(1987) 482 U.S. 915***.

Plaintiffs attempt to locate such an arrangement in Riverbay's relationship with advertisers and with its security officers. Given **[*7]** our definition of the relevant market-- that of newspapers that are distributed to the doorsteps of Co-op City residents and derive income from the advertising dollars of local merchants-- we cannot see that Riverbay's actions, which were allegedly designed to shut out competition for revenues from local advertisers, constitute an arrangement with those very same advertisers. Nor do we see an arrangement in Riverbay's alleged directions to its own employees, the security guards. [4] We therefore grant the motion to dismiss the Donnelly Act claim.

B. *Section 1983 Claims*

Plaintiffs allege that Riverbay, acting under the color of state law, has sought to deprive the resident plaintiffs of the right to read *smartshopper* and plaintiffs Bronx Lifestyles and Alan Rivlin of the right to distribute *smartshopper* in violation of the **[*8]** *First* and *Fourteenth Amendment*. Riverbay's motion to dismiss is predicated on its contention that plaintiff has failed to allege state action. *See Meyers v. Berman,* No. 82 Civ. 4525 (CSH), *aff'd without opinion* (2d Cir. 1983) *759 F.2d 1443*. [5]

We need not discuss the *§ 1983* claims in detail since practically the same discovery will be required to establish them as will be required to establish the antitrust claim and the issue of Riverbay's status as a state actor should await a full record. We note, however, that plaintiffs may be able to establish that Co-op City is the functional equivalent of the company town in *Marsh v. Alabama (1946) 326 U.S. 501, 66 S.Ct. 276* or otherwise to distinguish *Meyers.* We deny the motion to dismiss the *§ 1983* claims without prejudice to renewal at the close of discovery.

CONCLUSION

We dismiss the Donnelly Act claim (the fourth claim), but otherwise deny defendant's motion.

SO ORDERED.

HN6[] **Evidence, Inferences & Presumptions**

To obtain exemption from antitrust liability, municipalities must demonstrate that their anticompetitive activities were authorized by a state pursuant to a state policy to displace competition with regulation or monopoly public service. The municipality need not point to a specific, detailed legislative authorization, but must show that it acted in accordance with a clearly articulated and affirmatively expressed state policy to displace competition with regulation. A state policy is considered clearly articulated and affirmatively expressed if the statutory provision empowering a municipality's action plainly shows that a legislature contemplated the kind of action complained of.

Colorado recognizes that the acquisition of property for the planned elimination of urban blight constitutes a public purpose.

Counsel: James A. Clark of Baker & Hostetler (Bruce D. Pringle and Theodore Shih of Baker & Hostetler; Kenneth L. Starr and Michael Touff of Holmes & Starr, with him on the briefs), Denver, Colorado, for Plaintiffs-Appellants.

David R. Hammond of Davis, Graham & Stubbs (Dale R. Harris and Neil Peck of Davis, Graham & Stubbs; Stephen H. Kaplan, City Attorney; Robert M. Kelly, Donald E. Wilson, and Karen A. Aviles, Assistant City Attorneys; Marlin D. Opperman, William M. Schell and Linda A. Surbaugh of Opperman & Associates, P.C., with him on the briefs), Denver, Colorado, for Defendants-Appellees.

Judges: McKay, Moore, and Anderson, Circuit Judges.

Opinion by: MOORE

Opinion

[*1436] MOORE, Circuit Judge.

Plaintiffs-appellants appeal a summary judgment order which dismissed with prejudice all of their antitrust and civil rights claims against the defendants. We conclude that the district court properly found that there was no genuine issue of material fact in dispute. Because that court correctly applied the substantive law, we affirm.

I.

This case arises from the **[**2]** proposed Centerstone redevelopment project in downtown Denver. The plaintiffs-appellants, the Oberndorf family and Block 173 Associates (landowners), opposed the project which would have been constructed in part on their land. [1] The landowners also objected to the corresponding urban renewal plan adopted by the Denver Urban Renewal Authority (DURA) and the Denver City Council from which the Centerstone project emanates. The defendants-appellees are the City and County of Denver (the City), the City Council, Federico Pena, the Mayor of the City and County of Denver, Colorado, DURA, (collectively the Municipal defendants); and BCE Development Properties, Inc. (BCED). Seeking injunctive relief, a declaratory judgment, and damages, landowners claim alleged antitrust violations based on *§§ 1* and *2* of the Sherman Anti-Trust Act, *15 U.S.C. §§ 1* and *2* and alleged civil rights claims under *42 U.S.C. § 1983*. The district court's thorough recitation of the facts of this case obviates further recitation here. *See* *Oberndorf v. City and County of Denver, 696 F. Supp. 552, 554-56 (D.Colo. 1988)*. Therefore, we set out only those facts **[**3]** which are essential for this opinion.

In early 1983, the City and the Denver Partnership, Inc. (DPI), a non-profit civic and downtown business organization, began courting national retail developers and department stores in an effort to revitalize downtown Denver. City officials and DPI determined that some sort of public/private partnership with substantial public financing would be necessary to create a multiblock retail project on the Sixteenth Street Mall. In the summer of 1983, DPI formed the Sixteenth Street Retail Development Task Force to assist in forming such a partnership. Although the City and DPI contacted several potential developers, only BCED demonstrated sufficient interest and capacity to develop such a project. BCED proposed a two or three-block project to be constructed on Blocks 196, 173, and 206, including the block on which an existing department **[**4]** store is now located.

Following a December 1984 announcement by Mayor Pena and BCED about the proposed Centerstone project, discussions **[*1437]** among the City, BCED and others continued, focusing on available forms of public financing. It was determined that the best method was "tax increment financing," a form of public funding that allows sale of municipal bonds to raise money for public improvements. ***HN1***[] Under Colorado law, this funding vehicle is available only as part of an urban renewal plan. *See* *Urban Renewal Auth. v. Byrne, 618 P.2d 1374 (Colo. 1980)*. The City began taking actions to adopt an urban renewal plan as set forth at *Colo.Rev.Stat. §§ 31-25-101-115* (1986).

---

[1] Subsequent events call into question whether the project will be completed, but neither party has suggested this case is consequently moot.

Critical to the entire project are the provisions of ***HN2***[] *Section 31-25-107(1)* that no urban renewal plan shall be undertaken unless the appropriate authority, here the City Council, determines that the area is blighted. In December 1985, the City Council passed a resolution ordering DURA to begin preparing an urban **[**5]** renewal plan and conducting a blight study to analyze a fifteen-block area in downtown Denver. In March 1986, the study concluded, finding numerous blight factors existed in the defined space. DURA also prepared a proposed urban renewal plan for the fifteen-block area.

In May 1986, the City Council considered the proposed urban renewal plan at a public meeting. Landowners and their representatives appeared and opposed the plan, disputing the existence of blight in the area. Enacting Ordinance 309, the City Council approved the plan.

In August 1987, DURA issued an Offering Prospectus and solicited proposals from prospective developers for redevelopment of all or part of the fifteen-block urban renewal area. Four prospective developers submitted proposals, but only those of BCED concerned the blocks on which BCED hoped to build the Centerstone project. DURA selected BCED and Centerstone for Phase I of the urban renewal plan.

Landowners then began this action, claiming the defendants illegally conspired to misrepresent the three-block area as blighted so that the property could be condemned under the Colorado Urban Renewal Law. They further claimed the urban renewal plan eliminated **[**6]** competition among buyers and developers in the three-block real estate market and thus amounted to a restraint of trade in violation of *§§ 1* and *2* of the Sherman Anti-Trust Act. Landowners also asserted claims under *42 U.S.C. § 1983* that the plan was a regulatory taking of property in violation of the due process and *equal protection clauses of the Constitution*.

Following discovery, all defendants filed summary judgment motions which the district court granted, dismissing all of the landowners' claims with prejudice. *Oberndorf, 696 F. Supp. at 561*. Shortly thereafter, the district court granted defendant DURA's motion to dismiss its counterclaims, and final judgment was entered for the defendants and against landowners. The landowners appeal the summary judgment order.

II.

HN3[] This court reviews a summary judgment order ***HN4***[] *de novo. Burnette v. Dow Chemical Co., 849 F.2d 1269, 1273 (10th Cir. 1988)*. We review the record in the light most favorable **[**7]** to the non-moving party to determine if a genuine issue of material fact was in dispute; if not, we must determine if the substantive law was correctly applied. *Osgood v. State Farm Mut. Auto. Ins. Co., 848 F.2d 141, 143 (10th Cir. 1988)*.

A. STATE ACTION IMMUNITY UNDER ANTITRUST LAWS

In ***HN5***[] *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*, the Supreme Court held that the Sherman Act did not apply to the anticompetitive conduct of a state acting through its legislature. Subsequently, the Court rejected the proposition that municipalities are similarly immune from antitrust liability simply by their status as subdivisions of the state. *City of Lafayette, La. v. Louisiana Power & Light Co., 435 U.S. 389, 55 L. Ed. 2d 364, 98 S. Ct. 1123 (1978)*. Rather, ***HN6***[] to obtain exemption, municipalities must demonstrate that their anticompetitive activities were **[*1438]** authorized by the state "pursuant to a state policy to displace competition **[**8]** with regulation or monopoly public service." *Id. at 413*. The municipality need not point to a specific, detailed legislative authorization, but must show that it acted in accordance with a "clearly articulated and affirmatively expressed . . . state policy" to displace competition with regulation. *Id. at 410, 415*. *See also Community Communications Co. v. City of Boulder, Colo., 455 U.S. 40, 51-52, 70 L. Ed. 2d 810, 102 S. Ct. 835 (1982)*. "A state policy is considered clearly articulated and affirmatively expressed if the statutory provision empowering the municipality's action plainly shows that 'the legislature contemplated the kind of action complained of.'" *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 44, 85 L. Ed. 2d 24, 105 S. Ct. 1713 (1985)* (quoting *City of Lafayette, La., 435 U.S. at 415*).

The district court found the cited actions of the defendants complied with the requirements of the Colorado Urban Renewal Law and were undertaken pursuant to a clearly articulated and affirmatively expressed state policy as embodied in that law. Therefore, the district court held that the defendants **[**9]** were immune from liability and granted summary judgment. In addition, the court found that the evidence of conspiracy produced by the landowners did not reach the required threshold level and that the undisputed evidence indicated that the defendants' actions were consistent with their permissible independent interests in pursuing the Centerstone project as an effort to revitalize the Denver economy.

Arguing that the district court refused to consider evidence that the legislative record was a sham, landowners contend that the district court applied the wrong legal standard by limiting consideration to a facial review of the legislative record made by the City Council and DURA. We conclude that the district court adequately considered all of the evidence and affirm the district court's holding that state action immunity protects the Municipal defendants and BCED.

Under the tests pronounced in *City of Lafayette* and *Boulder, supra*, we must consider two prerequisites to proper application of the state action exception to municipal action. We must first determine whether the Colorado General Assembly, through the Colorado Urban Renewal Law, authorized the challenged **[**10]** actions of the defendants. In addition, we must determine whether the legislature intended to displace competition with regulation. *See* P. Areeda & H. Hovencamp, ***Antitrust Law*** para. 212.3a (Supp. 1988). In this case, it is undisputed that the Colorado Urban Renewal Law represents a clearly articulated and expressly stated policy to displace competition. *See, e.g., Rabinoff v. District Court In and For City and County of Denver, 145 Colo. 225, 234, 360 P.2d 114, 119 (1961)* (describing how the Colorado Urban Renewal Law operates by condemnation of private property for public use or transfer to private ownership to be used for public purposes); *c.f. Scott v. City of Sioux City, Iowa, 736 F.2d 1207, 1213 (8th Cir. 1984)* (discussing how Iowa legislation contemplated that competition would be displaced by the operation of the Iowa urban renewal law), *cert. denied*, *471 U.S. 1003, 85 L. Ed. 2d 158, 105 S. Ct. 1864 (1985)*. Therefore, the focus of the inquiry is whether the City's actions were authorized by the Colorado Urban Renewal Law.

To support their contention that the City acted beyond the scope of the statute, landowners **[**11]** claim that defendants were not attempting to eliminate blight as required by the Colorado Urban Renewal Law. Specifically, landowners point out that no blight was found on the three downtown blocks which would compose Centerstone. They allege that defendants expanded the target area to fifteen blocks to compensate for the lack of blight in Blocks 173, 208 and 196. Landowners claim that the larger area was needed to generate tax increment financing funds necessary to deliver the approximately $ 60 to $ 80 million subsidy to BCED. In addition, landowners contend the Centerstone committee chose the larger area to avoid anticipated adverse changes to the tax-exempt status of bonds brought **[*1439]** about by the 1986 Tax Reform Act. Landowners allege the Centerstone committee was counseled that a smaller district, directed only at Centerstone, might be declared illegal; hence, it chose to expand the area to be developed. After reviewing the record, we conclude that the lack of blight on the Centerstone blocks and the landowners' asserted reasons defendants created the fifteen-block area are not sufficient to prove the blight study was a sham. We agree with the district court that the **[**12]** blight study comported with the statutory definition of "blighted area" as set forth in *Colo.Rev.Stat. § 31-25-103(2)* (1986). As the district court explained, blight need not exist on every block of the area examined. As interpreted by the Colorado Court of Appeals, ***HN7***[] the statutory definition of blight "is broad and encompasses not only those areas containing properties so dilapidated as to justify condemnation as nuisances, but also envisions the prevention of deterioration." *Tracy v. City of Boulder, 635 P.2d 907, 909 (Colo.App. 1981)*.

Claiming that BCED was selected as the developer of Centerstone long before the use of urban renewal was even contemplated, the landowners contend the selection procedure illustrates how the use of urban renewal was a sham. Landowners argue that the usual process of urban renewal requires that a developer be selected after council adoption of a plan and through a competitive bidding process.

Rejecting this contention, the district court held the fact that "defendant BCED may have been identified as the 'first choice' developer of the Centerstone **[**13]** Project before the financing method was selected and before the blight study was conducted, does not violate any statutory provision with respect to implementation of an urban renewal plan under Colorado law." *Oberndorf, 696 F. Supp. at 559*. We agree. Following the adoption of the urban renewal plan according to the procedures of *Colo.Rev.Stat. § 31-25-107*, DURA sent out a prospectus and conducted a competitive bidding process as described in *Colo.Rev.Stat. § 31-25-106(2)* (1986). DURA's selection of BCED does not by itself show that the process was a sham. Furthermore, ***HN8***[] the realities of the urban renewal process require early developer involvement to determine whether a public/private partnership is feasible. Consultation with BCED and other developers before the adoption of the urban plan merely gave the City information whether urban renewal and tax increment financing were appropriate mechanisms for revitalizing this section of downtown Denver.

Finally, landowners allege other indications that the Centerstone committee accomplished its goals in a dishonest manner. They **[**14]** suggest that at least one council member may have received financial gain from BCED. In addition, they contend that BCED "misrepresented" to the council its plans for condemnation and misled the public by the $ 60 to $ 80 million figures identified as the City's commitment when, in fact, the subsidy could be as much as $ 216.8 million of revenues otherwise available to the City. However, these allegations are not supported by sufficient evidence nor do landowners show how these instances of misrepresentation relate to their claims that the urban renewal plan was not authorized by state law. We agree with the district court that the Colorado Urban Renewal Law grants municipal officials authority to combat blight and authorizes DURA to facilitate redevelopment through urban renewal plans.

Because we affirm the district court's finding that the Municipal defendants were authorized by and acted in accordance with this affirmatively expressed state policy, we affirm the district court's conclusion that state action immunity applies.

B. *NOERR-PENNINGTON DOCTRINE*

Even assuming that the landowners have shown evidence of conspiracy and antitrust injury, the *Noerr-Pennington* doctrine **[**15]** provides immunity to BCED in this case. ***HN9***[] Based upon the protections of the *First Amendment*, the *Noerr-Pennington* doctrine exempts from antitrust liability any legitimate use of the political process by private individuals, even if their intent is to eliminate competition. *United Mine Workers* ***[*1440]*** *of Am. v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*; *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*. In its summary judgment order, the district court implicitly held that BCED's activities were "mere solicitation of government action" protected by the *Noerr-Pennington* doctrine. We agree.

Immunity under the *Noerr-Pennington* doctrine is designed to protect the right to petition and engage in political activity. ***HN10***[] *Instructional Systems Dev. Corp. v. Aetna Cas. & Sur. Co., 817 F.2d 639, 650 (10th Cir. 1987)*. *Noerr-Pennington* protects rights **[**16]** of association and petition, which would be denied if groups with common interests could not, without violating the antitrust laws, use the channels and procedures of government agencies to advocate their causes and points of view respecting resolution of their business and economic interests *vis-a-vis* their competitors. *California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510-11, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*.

In this case, the actions of BCED fall squarely within the doctrine. When BCED participated in the Centerstone committee and met with City Council members, BCED merely represented its own business and economic interests in the proposed revitalization of downtown Denver. BCED's project proposals, models of Centerstone, comments on tax increment financing, and meetings with city officials were a legitimate use of the political process and the very kind of speech protected by *Noerr-Pennington*.

In *Boone v. Redevelopment Agency of San Jose, 841 F.2d 886* (9th Cir.), *cert. denied*, *488 U.S. 965, 109 S. Ct. 489, 102 L. Ed. 2d 526 (1988)*, the Ninth Circuit considered similar antitrust allegations **[**17]** that a developer and city officials had shadowy secret meetings and covert agreements in connection with the amendment of an urban renewal plan. The Ninth Circuit held that the conduct was protected by *Noerr-Pennington*, explaining that ***HN11***[] "the redevelopment process by its very nature, allows for ex parte deliberations between decisionmakers and advocates of a particular view." *Id. at 895*.

We reject landowners' contentions that BCED's conduct falls within two exceptions to *Noerr-Pennington immunity*.

1. Co-conspirator exception

Landowners argue that this court should adopt a "co-conspirator" exception to *Noerr-Pennington* and deny private participants protection where government officials or entities are co-conspirators in a scheme violative of the antitrust laws. *See Affiliated Capital Corp. v. City of Houston, 735 F.2d 1555, 1566 (5th Cir. 1984)*, *cert. denied*, *474 U.S. 1053, 88 L. Ed. 2d 766, 106 S. Ct. 788 (1986)*, and *Duke & Co., Inc. v. Foerster, 521 F.2d 1277, 1281-82 (3d Cir. 1975)*. However, **[**18]** *Noerr-Pennington* cannot be circumvented by merely alleging that a government official was involved in the alleged conspiracy. *Boone, 841 F.2d at 897*. We agree with the district court's conclusion that the landowners have not submitted any evidence indicating that any "deal" was made, bribe taken, or illegal conspiracy formed between the Municipal defendants and BCED. The landowners' allegations of secret meetings and covert agreements between the City and BCED are not supported by sufficient evidence of a conspiracy such that a possible co-conspirator exception be considered. Therefore, we need not address whether to adopt a "co-conspirator" exception to *Noerr-Pennington*.

2. "Illegal Activity" exception

In addition, landowners argue that *Noerr-Pennington* immunity should not be extended because BCED engaged in illegal or fraudulent activities separate and apart from any lobbying activities. ***HN12***[] *Noerr-Pennington* does not provide immunity where legitimate lobbying efforts are accompanied by illegal or fraudulent actions. *See Westborough Mall, Inc. v. City of Cape Girardeau, Mo., 693 F.2d 733, 746 (8th Cir. 1982)*, **[**19]** *cert. denied*, *461 U.S. 945, 77 L. Ed. 2d 1303, 103 S. Ct. 2122 (1983)*. **[*1441]** Landowners allege that BCED entered into covert agreements with the City which were unlawful and an abuse of the power delegated to the City under the Urban Renewal Law. Therefore, they contend that BCED cannot take advantage of *Noerr-Pennington*.

The district court correctly held that the state legislature authorized defendants' actions, and, consequently, there was no illegal activity. Moreover, alleged violation or misuse of an urban renewal law does not constitute the kind of illegal activity which can deprive a private party of *Noerr-Pennington* protection. *See Boone, 841 F.2d at 891, 893-97* (affirming dismissal based on *Noerr-Pennington* doctrine despite allegations that the redevelopment law was illegally used to redevelop non-blighted area). Although bribery, or misuse or corruption of governmental processes are outside the protection of the *Noerr-Pennington* doctrine, *Instructional Systems Dev. Corp. v. Aetna Cas. and Sur. Co., 817 F.2d at 650*, landowners do not allege any of these illegal activities.

C. CIVIL RIGHTS CLAIMS

[20]** The district court granted summary judgment in favor of defendants on landowners' civil rights claims, finding that there was not enough evidence to support their claim for a violation of civil rights and that the City's condemnation of plaintiffs' property was rationally related to a public purpose. Relying upon *Berman v. Parker, 348 U.S. 26, 99 L. Ed. 27, 75 S. Ct. 98 (1954)*, the district court concluded the adoption of an urban renewal plan was a legislative act and that in order to establish an unconstitutional "taking," the landowners had to establish that no public purpose existed for the proposed urban renewal project. Because the district court found that the urban renewal plan was rationally related to the economic revitalization of downtown Denver, the district court held that no unconstitutional "taking" of landowners' property occurred.

Landowners appeal this ruling, arguing that the proper inquiry was whether the urban renewal plan sought to accomplish the purpose authorized by the Colorado Urban Renewal Law. Claiming that the district court's ruling ignored legal distinctions between states and municipalities, landowners contend that state authorization **[**21]** is an essential issue because cities are not entitled to the same deference as states.

We reject these arguments. The district court applied the proper standard when it inquired whether a proper purpose existed for the urban renewal plan, which was created by the legislative acts of DURA and the City Council. Whether the action was authorized by state law is a separate issue and is not part of the inquiry before the court when it looks for a rational relationship to a legitimate public purpose.

HN13[] The Supreme Court has held that the adoption of an urban renewal plan is a legislative act which must be upheld if there is any public purpose underlying it: "But the means of executing the project are for [the legislature and the legislature] alone to determine, once the public purpose has been found." *Berman v. Parker, 348 U.S. at*

33. In Rosenthal & Rosenthal Inc. v. New York State Urban Dev. Corp., 771 F.2d 44 (2d Cir. 1985), *cert. denied*, *475 U.S. 1018, 89 L. Ed. 2d 317, 106 S. Ct. 1204 (1986)*, the Second Circuit affirmed the dismissal **[**22]** of a civil rights suit that sought to enjoin the condemnation of plaintiffs' land under an urban renewal plan. Claiming that their property was in no way blighted, these plaintiffs alleged that a private real estate developer, an urban renewal agency, and various city officials violated plaintiffs' civil rights by wrongfully including plaintiffs' land in an urban renewal plan. The Second Circuit affirmed the dismissal of the complaint, holding that ***HN14***[] so long as the urban renewal legislation was "rationally related to a conceivable public purpose," the plan was valid and did not violate plaintiffs' civil rights. Rosenthal & Rosenthal Inc., 771 F.2d at 46. The Ninth Circuit reached the same conclusion in *Boone v. Redevelopment Agency of San Jose, 841 F.2d at 892-93*, rejecting equal protection and due process challenges to an urban renewal plan:

> **[*1442]** [Plaintiffs] have not alleged that the interest of the city and agency in urban redevelopment is illegitimate. Such a claim would be patently frivolous. Moreover, the municipality's regulation **[**23]** of parking is facially "rationally related" to the ends of urban renewal. Thus we find no violation of the [plaintiffs'] equal protection or substantive due process rights.

Accord Scott v. City of Sioux City, Iowa, 736 F.2d at 1216 (affirming summary judgment on substantive due process and equal protection claims because there was a public purpose for the challenged urban renewal ordinance).

The district court also properly concluded that elimination of urban blight and economic revitalization of Denver were legitimate public purposes underlying the plan. ***HN15***[] In reviewing whether legislative power is exercised for a public purpose, this court exercises narrow authority. "It is not for the court to oversee the choice of the boundary line nor to sit in review on the size of a particular project area." ***HN16***[] Berman, supra, 348 U.S. at 35-36. Colorado has long recognized that the acquisition of property for the planned elimination of urban blight constitutes **[**24]** a public purpose. Rabinoff v. District Court, 145 Colo. at 234, 360 P.2d at 119. Similarly, in Thornton Development Authority v. Upah, 640 F. Supp. 1071 (D.Colo. 1986), the court upheld the condemnation of the plaintiff's land for urban renewal because statutorily recognized public purposes were the stated basis for the Thornton Development Authority's action. The court explained, "In this case such public purposes as increasing revenues, sales, commerce and employment cannot be gainsaid. The wisdom of decisions made in effectuating such purposes is not a matter given to the courts in our system to consider." 640 F. Supp. at 1081.

Landowners also argue that the district court improperly concluded that the landowners' claims that the defendants violated the Colorado Urban Renewal Law belong in state court and not in federal court. The district court ruled that whether defendants' actions complied with every detailed provision of the Urban Renewal Law in this instance was not properly before it in the context of the federal claims asserted. We agree with the district court that the violation of state law, if any, does not necessarily **[**25]** constitute a violation of the plaintiffs' constitutional claims. *Rosenthal & Rosenthal Inc.*, 605 F. Supp. at 618 (S.D.N.Y.), *aff'd*, 771 F.2d 44 (2d Cir. 1985), *cert. denied*, *475 U.S. 1018, 89 L. Ed. 2d 317, 106 S. Ct. 1204 (1986)*. Similarly, we agree that the defendants "do not forfeit their immunity [under antitrust laws] merely because their execution of the powers granted to them under the redevelopment act may have been imperfect in operation." *Boone, 841 F.2d at 892*; *see also* P. Areeda & H. Hovencamp, *supra*, at para. 212.3b.

Although landowners allege that the public purposes set forth for the plan are fraudulent and that the Plan favored BCED, we do not find sufficient evidence in the record to support the landowners' claim for a violation of civil rights or their claim of conspiracy. The district court's order granting summary judgment is AFFIRMED.

Reazin v. Blue Cross & Blue Shield, Inc.

United States Court of Appeals for the Tenth Circuit

March 29, 1990

No. 87-1823

Reporter

899 F.2d 951 *; 1990 U.S. App. LEXIS 4565 **; 1990-1 Trade Cas. (CCH) P68,970

Civil Procedure > Trials > Bench Trials

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN4[] **Trials, Bench Trials**

An appellate court may reverse the denial of motions for a directed verdict and for judgment notwithstanding the verdict only if the evidence points but one way and is susceptible to no reasonable inferences supporting the nonmoving party. An appellate court must construe the evidence and inferences most favorably to the nonmoving party. An appellate court may not weigh the evidence or pass upon the witnesses' credibility, or substitute its judgment for that of a jury. Thus, if reasonable minds could differ over a verdict, the motion for judgment notwithstanding the verdict is properly denied.

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN11[] **Clayton Act, Claims**

Standing and antitrust injury are essential elements in a private antitrust damages action brought under § 4 of the Clayton Act, *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN12[] **Private Actions, Standing**

The following factors are to be considered in determining antitrust standing: the causal connection between antitrust violations and plaintiff's injury; defendant's intent; the nature of plaintiff's injury; the directness or indirectness of the connection between plaintiff's injury and the allegedly unlawful market restraint; the speculativeness of plaintiff's damages; and the risk of duplicative recoveries or the danger of complex apportionment of damages.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Private Actions, Remedies**

An antitrust injury is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes a defendant's acts unlawful.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Private Actions, Remedies**

Where the injury alleged is an integral aspect of the conspiracy alleged, there can be no question but that the loss is precisely the type of loss that a claimed violation would be likely to cause.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Evidence > Inferences & Presumptions > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

HN15[] **Private Actions, Remedies**

An antitrust plaintiff need not necessarily be a competitor or consumer. Where a plaintiff's injury is "inextricably intertwined" or so integral an aspect of the conspiracy alleged, plaintiff has established an antitrust injury.

HN16[] Monopolies & Monopolization, Actual Monopolization

15 U.S.C.S. §1 requires the existence of an agreement between allegedly conspiring parties.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] Regulated Practices, Price Fixing & Restraints of Trade

A business retains the right under 15 U.S.C.S. §1 to unilaterally announce the terms on which it will deal and refuse to deal with those who will not comply.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Evidence > Inferences & Presumptions > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

HN18[] Monopolies & Monopolization, Conspiracy to Monopolize

The challenged agreement need not be in writing or even be explicit. Conspiratorial conduct may be established by circumstantial evidence.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] Private Actions, Remedies

Where evidence of a conspiracy is ambiguous, to survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of 15 U.S.C.S. § 1 must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] Sherman Act, Claims

An additional essential element in a claim under *15 U.S.C.S. § 1* is the existence of an unreasonable restraint of trade.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN21[] Regulated Practices, Market Definition

To demonstrate "market power," a plaintiff may show evidence of either power to control prices or the power to exclude competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN22[] Regulated Practices, Market Definition

Market power is to be distinguished from monopoly power, which requires proof of both power to control prices and power to exclude competition. Market and monopoly power only differ in degree. Monopoly power is commonly thought of as "substantial" market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Civil Procedure > Trials > Bench Trials

Evidence > Inferences & Presumptions > General Overview

HN23[] Monopolies & Monopolization, Actual Monopolization

Power over price and power over competition may, in turn, depend on various market characteristics, including the existence and intensity of entry barriers, elasticity of supply and demand, the number of firms in the market, and market trends.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN24[] Regulated Practices, Market Definition

Market share is relevant to the determination of the existence of market or monopoly power, but market share alone is insufficient to establish market power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN25[] Regulated Practices, Market Definition

Courts have not completely agreed on whether a particular market share should be given conclusive or merely presumptive effect in determining market or monopoly power, or whether market share is only a starting point in the inquiry into market or monopoly power.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN26[] Regulated Practices, Market Definition

While the Supreme Court has refused to specify a minimum market share necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share of between 70 percent and 80 percent.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN31[] **Monopolies & Monopolization, Actual Monopolization**

The elements of monopolization under *15 U.S.C.S. § 2* are the possession of monopoly power in the relevant market and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN32[] **Monopolies & Monopolization, Actual Monopolization**

The fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for a private litigant to recover on a claim of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

Evidence > Inferences & Presumptions > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN33[] **Monopolies & Monopolization, Actual Monopolization**

While a "specific intent" to monopolize is necessary to establish an attempt to monopolize claim, general intent is all that is required to support a monopolization claim.

Civil Procedure > Trials > Bench Trials

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > Appeals > Standards of Review

HN34[] **Trials, Bench Trials**

When examining a challenge to jury instruction, an appellate court reviews the record as a whole to determine whether the instructions state the law which governs and provided a jury with an ample understanding of the issues and the standards applicable.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Trials > Bench Trials

Antitrust & Trade Law > Sherman Act > General Overview

HN35[] **Regulated Practices, Market Definition**

Courts must view entry barriers in terms of their relevance to the antitrust laws.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Trials > Bench Trials

Antitrust & Trade Law > Sherman Act > General Overview

HN36[] **Regulated Practices, Market Definition**

Market definition is a question of fact.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > Trials > Bench Trials

Antitrust & Trade Law > Sherman Act > General Overview

HN37[] Regulated Practices, Market Definition

Definition of the relevant market requires first a determination of the product market. This inquiry necessitates an examination of which commodities are reasonably interchangeable for consumers for the same purposes. The relevant geographic market must also be determined.

28 U.S.C.S. § 1821 defines the witness fees specified in *§ 1920(3)*. In addition to an attendance fee of $ 30 per day, *§ 1821* also permits a witness to recover for travel expenses to and from trial and provides a subsistence allowance if a witness must stay overnight to attend trial.

HN52[] **Costs & Attorney Fees, Clayton Act**

The Supreme Court holds that absent explicit statutory or contractual authorization for the taxation of the expenses of a litigant's witnesses as costs, federal courts are bound by the limitations set out in *28 U.S.C.S. § 1821* and *§ 1920*. Specifically, the Supreme Court holds that *Fed. R. Civ. P. 54(d)* does not permit an award of expert witness fees in excess of the limits contained in *§ 1821*.

HN54[] **Private Actions, Costs & Attorney Fees**

The benchmark for awards under nearly all of the statutes awarding fees is that attorney's fee must be "reasonable." To determine what is a "reasonable" fee, a court must determine reasonable hours and reasonable rates for work done.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN55[] **Private Actions, Costs & Attorney Fees**

The first step in setting a rate of compensation for the hours reasonably expended is to determine what lawyers of comparable skill and experience practicing in the area in which litigation occurs would charge for their time.

Opinion by: ANDERSON

Opinion

[*954] ANDERSON, Circuit Judge.

Blue Cross and Blue Shield of Kansas, Inc. ("Blue Cross") appeals an adverse verdict entered in an antitrust and state law tortious interference case. Both the antitrust and state law claims arose out of the same set of facts.

The parties have attempted to make this case very complex, but the antitrust issues are relatively straightforward. Plaintiffs' theory was that Blue Cross, alarmed by a **[**2]** perceived competitive threat from Hospital Corporation of America ("HCA") through its acquisitions of a major Wichita hospital now called HCA Health Services of Kansas, Inc. d/b/a Wesley Medical Center ("Wesley"), Health Care Plus, Inc. ("HCP"), and New Century Life Insurance Co. ("New Century"), determined to "hurt" Wesley and thereby send a message to other hospitals not to do business with entities Blue Cross believed were competitors. It did this by agreeing with Wesley's competitors, St. Joseph Hospital and St. Francis Hospital ("the Saints"), to terminate Wesley's contracting provider agreement and to reduce the maximum allowable payments it would make to the Saints, thereby increasing Wesley's costs of doing **[*955]** business and causing a shift of Blue Cross patients from Wesley to the Saints. The threatened termination of Wesley because of its affiliation with a Blue Cross competitor made other hospitals less willing to affiliate with, or enter into relationships with, Blue Cross competitors. The result was that Kansas health care consumers were restricted in their access to and benefits from health care financing arrangements involving entities other than Blue Cross, and **[**3]** were deprived of the benefits of competition in that arena. The jury agreed with plaintiffs and found multiple antitrust violations by Blue Cross.

Given our standard of review, we uphold the jury's verdict because we find sufficient evidence supports it. In so holding, we reach the following specific conclusions: (1) Wesley has standing to assert its antitrust claims and proved an antitrust injury; (2) Blue Cross entered into an agreement with the Saints which restrained trade in the market of health care financing; (3) Blue Cross had market and monopoly power and it willfully maintained its monopoly power; (4) Wesley adequately proved its damages; (5) the court properly instructed the jury on the various antitrust claims involved; (6) the court properly instructed the jury on plaintiffs' state law claims and sufficient evidence supports the jury's verdict on those claims; (7) Blue Cross suffered no prejudice from the court's supplemental "*Allen*" charges or any communications with the jury during deliberations; (8) the court properly granted plaintiffs' motion for summary judgment on the counterclaim; and (9) the award of attorneys' fees and costs is affirmed in all respects **[**4]** except we remand for a recalculation of the expert witness fees awarded.

PROCEDURAL HISTORY

Plaintiffs Walter L. Reazin, M.D., Wesley, HCP, and New Century brought this antitrust action against Blue Cross. Plaintiffs alleged violations of *sections 1* and *2* of the Sherman Antitrust Act, *15 U.S.C. §§ 1* and *2*, as well as violations of state law, arising out of Blue Cross' threatened termination of its contracting provider agreement with Wesley. They sought damages and other relief. [1] Blue Cross and its wholly-owned subsidiary, HMO Kansas, Inc. ("HMOK"), counterclaimed against plaintiffs as well as HCA, alleging: that HCA's acquisitions of Wesley, HCP, and New Century violated the antitrust laws; that HMOK's failure in Wichita was the result of an unlawful boycott and concerted refusal to deal or an unreasonable restraint of trade; that plaintiffs had monopolized, attempted to monopolize, and/or conspired to monopolize the market for health care financing and health care services; and, asserting tortious interference with prospective advantage, in violation of Kansas law. They sought damages and other relief.

[5]** Pursuant to plaintiffs' motion, the district court separated the trials of the complaint and the counterclaim. After a six-week jury trial on plaintiffs' complaint, and four weeks of deliberation, the jury returned a verdict in favor of Wesley, finding that Blue Cross had violated *section 1* of the Sherman Act by engaging in a conspiratorial restraint of trade, had violated *section 2* by monopolizing the relevant market, and had tortiously interfered with Wesley's present and prospective business relations in violation of Kansas law. It awarded Wesley $ 1,542,980 in actual damages for the antitrust violations and $ 1.00 in actual nominal damages and $ 750,000 in punitive damages for the tortious interference **[*956]** claim. [2]

[6]** Numerous post-trial motions followed. Ultimately, in a 124-page written opinion, the district court denied Blue Cross' motions to set aside the verdict and dismiss the case for lack of jurisdiction, for a directed verdict, and for judgment n.o.v. or for a new trial. *Reazin v. Blue Cross & Blue Shield, Inc., 663 F. Supp. 1360 (D.Kan. 1987)* ("*Reazin II*"). [3] It also denied plaintiffs' motion for injunctive relief against Blue Cross under Section 16 of the

---

[1] As provided in section 4 of the Clayton Act:

> ***HN1***[] "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which defendant resides . . . without respect to the amount in controversy, and shall recover threefold the damages sustained, and the cost of the suit, including a reasonable attorney's fee."

15 U.S.C. § 15. Section 16 of the Clayton Act provides as follows:

> ***HN2***[] "Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws. . . ."

15 U.S.C. § 26.

[2] The jury found that HCP had suffered no injury as a result of the antitrust violations and concluded that HCP had failed to establish all the elements of tortious interference. The district court had earlier concluded that plaintiffs Reazin and New Century lacked standing to seek damages. *See* note 3, *infra*.

[3] In an earlier written opinion, the district court had granted in part and denied in part defendant's motion for summary judgment on plaintiffs' entire complaint. *Reazin v. Blue Cross & Blue Shield, Inc., 635 F. Supp. 1287 (D. Kan. 1986)* ("*Reazin I*"). The district court held that plaintiffs Reazin and New Century lacked standing to bring a private damage antitrust action under Section 4 of the Clayton Act, *15 U.S.C. § 15*. To that extent, the court granted defendant's motion for summary judgment. In all other respects, that motion was denied.

Clayton Act, *15 U.S.C. § 26*. After trebling the actual damages awarded Wesley, the court entered judgment in the amount of $ 5,378,941.00, plus interest. It awarded plaintiffs their requested sum of $ 2,176,983.75 in attorney's fees, and a total of $ 246,844.99 in other fees and costs. Finally, it granted plaintiffs' motion for summary judgment on the counterclaim. Blue Cross appeals essentially all of the district court's rulings, and is joined by HMOK with respect to the grant of summary judgment on the counterclaim.

[7]** FACTS

The complex facts and history of this case have been thoroughly recounted in the two district court opinions. *See* *Reazin I, 635 F. Supp. 1287*, and *Reazin II, 663 F. Supp. 1360*. We recite here only the basic undisputed facts relevant to this appeal.

Blue Cross, a non-profit company formed in 1983 by combining Blue Cross of Kansas, Inc. and Blue Shield of Kansas, Inc., is the largest private health care financing organization in Kansas. [4] It is chartered under a special enabling act. It is approximately fifteen times bigger than the next largest private health care financing organization, in terms of percent of earned health insurance premiums. Pl.'s Ex. 508K, Addendum to Answer Brief of Appellees Vol. I.

> "In 1985, all hospitals and approximately 90% of all physicians in [the Blue Cross] service area [which includes the entire state except for Johnson and Wyandotte Counties] were under contract with [Blue Cross] as providers of medical services to the company's subscribers. No other health insurance company has contracts with all of the hospitals in [Blue Cross'] service area. [Blue Cross] is also the federal Medicare **[**8]** intermediary in Kansas, administering the Medicare program throughout the company's service area; as well, it is one of the larger third-party administrators of self-insured programs in the state."

Reazin II, 663 F. Supp. at 1372 (citations to record omitted). Blue Cross is required under its enabling legislation to pursue cost containment as its primary goal.

Wesley is the largest, and "by far the strongest," hospital in Wichita. *Reazin I, 635 F. Supp. at 1297*. It is a major teaching hospital, as well as a provider of clinical services, medical research, and outreach care programs. There was testimony that Wesley is considered one of the premier hospitals in Kansas and has historically been a low-cost provider of quality health care. Wesley's competitors in Wichita are the Saints and Riverside Hospital.

HCP is a health maintenance organization ("HMO") founded in 1981, **[**9]** which provides private health care financing to businesses and individuals in Kansas, including Sedgwick County and Wichita. [5]

[10]** **[*957]** HCA, based in Nashville, Tennessee, "through its subsidiary corporations, is engaged in the business of providing health care services, private health care financing and hospital management services." *Reazin II, 663 F. Supp. at 1373*. In terms of the number of hospitals owned or managed, HCA is the largest for-profit hospital company in the United States. However, Dr. Thomas Frist, the chairman and chief executive officer of HCA, testified that HCA "[represents] less than three percent . . . of the hospital sector in this country [and] . . .

---

[4] Blue Cross of Kansas, Inc. was formed in 1941 pursuant to special enabling legislation.

[5] HMOs and preferred provider organizations ("PPO"s) are so-called "alternative delivery systems" which have emerged as cost-effective alternatives to traditional indemnity insurance. HMOs and PPOs are prospective reimbursement arrangements, in which a member or subscriber pays a monthly amount to medical care providers who then oversee all the health care needs of the member. In an HMO or PPO, the member typically pays less for health care coverage than under a traditional indemnity insurance plan, but is limited in his or her choice of medical care providers. The district court, in its two opinions, described the trends and developments in the field of medical care which led to criticism of traditional indemnity insurance and to the development of alternative delivery systems and which provide the background to this case. *See* *Reazin I, 635 F. Supp. at 1297-99*; *Reazin II, 663 F. Supp. at 1372-75*.

close to fifty percent of [HCA's] revenues come through third-party insurers, of which Blue Cross is a large percentage." R. Vol. 32 at 3187-88.

New Century is a California corporation with its principal executive offices in Nashville. Its activities include the provision of private health care financing. In June 1983, it received its certificate of authority to do business in Kansas. [6]

[11]** The parties stipulated to the following additional and relevant facts:

> "On April 25, 1985, HCA consummated the acquisition of New Century Life Insurance Company.
> On July 11, 1985, HCA acquired Wesley Medical Center. The acquisition was effected through HCA Health Services of Kansas, Inc., a wholly-owned subsidiary of HCA.
> On August 14, 1985, HCA acquired Health Care Plus. The acquisition was effected through Health Care Plus of America, Inc., a wholly-owned subsidiary of HCA. Since its acquisition, Health Care Plus has continued to develop, market and sell health care financing products in competition with Blue Cross.
>
> On August 29, 1985, at a special meeting, the Executive Committee of the Blue Cross Board of Directors voted to terminate the existing contracting provider agreement between Blue Cross and Wesley, effective December 31, 1985. [7] **[**15]**
>
> **[*958]** On or about August 29, 1985, Blue Cross formally advised Wesley by letter of the decision of its Executive Committee to terminate Wesley's contracting provider agreement. On that same date, Blue Cross released details of the termination to the local media in Wichita. In an August 29 news release, Blue Cross

---

[6] While New Century was determined on Blue Cross' motion for summary judgment to lack standing to seek damages, HCA's acquisition of New Century remained relevant to Blue Cross' Rule of Reason defense and to Blue Cross' counterclaim.

[7] The contracting provider agreement between Wesley and Blue Cross was part of a new agreement, the "Contracting Provider Agreement (Hospital) of the Competitive Allowance Program ('CAP')," which Blue Cross instituted in early 1984. The district court described CAP as follows:

> "The CAP program established the maximum amount [Blue Cross] would reimburse a medical provider for services within [a] particular diagnostic related group. Providers contracting with [Blue Cross] under the CAP program commit themselves to a maximum allowable payment ('MAP') for each service provided to the subscribers. The MAPs are based on uniform diagnostic-related groupings (DRGs) of medical services. . . . The 'hold harmless' provision ensures subscribers will not receive bills for covered medical expenses in excess of the contract amount [Blue Cross] pays a participating provider."

Reazin II, 663 F. Supp. at 1375 (citations to record omitted). The CAP contracting provider agreements also contained a "most favored nations" clause, pursuant to which participating providers agreed to promptly inform Blue Cross of, and make available to Blue Cross, any lower rates it charged to competing insurance companies. Thus, Blue Cross was assured of receiving the lowest rates its participating hospitals charged. Wesley had been a contracting provider with Blue Cross since the 1940s. In early July 1985, approximately two months before Blue Cross decided to terminate Wesley's contracting provider agreement, Blue Cross had renewed the agreement.

There was considerable testimony about the significant advantages in being a contracting provider hospital and the considerable disadvantages to not having that status. *See also* *Reazin I, 635 F. Supp. at 1295-96*. From the perspective of Blue Cross subscribers, Wesley's loss of its contracting provider status would mean that those subscribers using Wesley (1) would not have the same assurance of predictability of health care costs which the maximum allowable payment concept guarantees; (2) would not get the benefit of the "hold harmless" clause limiting their liability; and (3) would not have access to direct payment of claims from Blue Cross to the hospital.

The contracting provider agreement with Wesley was never, in fact, terminated because, pending resolution of this suit, the parties agreed to maintain Wesley's contracting provider status. The maximum allowable payments were, however, reduced for all hospitals, and Wesley agreed to accept those reduced payments. In 1986, before the trial in this case, HCA informed Blue Cross that it was withdrawing from the health care financing field and divesting HCP. Blue Cross thereafter signed a new contracting provider agreement with Wesley.

indicated **[**12]** that subsequent to the effective date of Wesley's termination as a participating hospital, Blue Cross payments would be sent directly to the subscriber and could not be assigned to Wesley.

On September 5, 1985, G. Wayne Johnston, President of Blue Cross, met privately with A.B. Davis, Jr., Chairman and Chief Executive Officer of Wesley, and Mr. Robert J. O'Brien, Wesley's executive Vice President -- Corporate Development, to discuss Wesley's termination. Also in attendance at the September 5 meeting was Marlon R. Dauner, Senior Vice President of Blue Cross.

On September 9, 1985, Mr. Johnston spoke with Mr. Davis.

On September 10, 1985, David G. Williamson, Vice Chairman of HCA, telephoned Mr. Johnston to discuss Blue Cross' decision to terminate Wesley.

On September 10, 1985, Blue Cross ran a full-page ad in the Wichita Eagle Beacon announcing that Wesley would be a noncontracting hospital effective January 1, 1986.

On or about September 10, 1985, Blue Cross issued a publication entitled "Health Plan" to certain subscribers in Kansas.

At a meeting of the Blue Cross Executive Committee held on September 19, 1985, Wesley sought reconsideration of Blue Cross' termination decision. **[**13]** Blue Cross has refused to reverse its decision to terminate Wesley's contracting provider agreement. At the September 19, 1985 meeting, Blue Cross' Executive Committee approved a reduction in the Peer Group V MAPs for all covered services. The reduction affects only Wichita hospitals in Peer Group V. The MAPs for other peer groups in Kansas remain unchanged.

By letter dated September 25, 1985, Donald A. Wilson, President of the Kansas Hospital Association, asked Blue Cross to comment on its termination of Wesley. Blue Cross issued a reply dated October 3, 1985, to all Kansas hospitals. [8]

By letter dated October 15, 1985, Administrative Services of Kansas, Inc., a subsidiary of Blue Cross, advised Wesley that effective January 1, 1986, said subsidiary would terminate its lease agreement with Wesley for electronic data processing equipment transmitting inquiries via telecommunication lines to said subsidiary. The lease agreement enabled Wesley to obtain prompt benefits verification. The lease agreement was being terminated because of the termination of **[*959]** Wesley's contracting provider agreement with Blue Cross. [9]

Blue Cross does not honor or recognize the assignment **[**14]** of benefits by subscribers to noncontracting hospitals under the terms of the subscriber agreements.

Part V.f. of the standard Blue Cross subscriber agreement provides that insurance proceeds will be paid directly by Blue Cross to participating hospitals, but that proceeds for medical services performed by nonparticipating hospitals will be paid directly to the subscriber and cannot be assigned to any other person or entity."

R. Vol. III, Tab 207 at Instruction 15 (paragraph letters omitted).

[16]** ANTITRUST ISSUES

---

[8] The letter included, in pertinent part:

> "*We cannot stand idly by and watch insurance-hospital corporations, such as HCA, monopolize the delivery and financing of care by seeking to enroll Blue Cross and Blue Shield subscribers in their insurance programs*. Vertical integration is a strategy some hospitals may feel to be in their best interest. However, *if hospitals decide to compete with Blue Cross and Blue Shield in the manner that HCA is competing, Blue Cross and Blue Shield must make a business decision about its future relationship with these entities. Hospitals that wish to continue their current relationship with Blue Cross and Blue Shield, that do not seek to enroll subscribers in other programs, and that wish to cooperate with Blue Cross and Blue Shield as a major marketing arm of the hospital, will experience no change* in the contractual relationship that has historically served Kansans well."

Plaintiff's Ex. 468C, Addendum to Answer Brief of Appellees Vol. I (emphasis added).

[9] In fact, the lease agreement also was never actually terminated.

Blue Cross filed a motion under *Fed.R.Civ.P. 12(b)* to set aside the verdict and dismiss the case for lack of jurisdiction, asserting that its challenged conduct is exempt from the application of the antitrust laws under the McCarran-Ferguson Act, *15 U.S.C. §§ 1011-1015*. The district court disagreed, holding that no McCarran-Ferguson exemption applied and that it had jurisdiction. We affirm for the reasons set forth in the district court's discussion of this issue. *Reazin II, 663 F. Supp. at 1401-09*.

The district court denied Blue Cross' motions for a directed verdict, for a judgment n.o.v., or alternatively for a new trial. *Reazin II, 663 F. Supp. 1360*. ***HN3***[] "'Motions for a directed verdict and for judgment n.o.v. are considered under the same standard.'" *Zimmerman v. First Fed. Sav. & Loan Ass'n, 848 F.2d 1047, 1051 (10th Cir. 1988)* (quoting *Hurd v. American Hoist & Derrick Co., 734 F.2d 495, 498 (10th Cir. 1984))*. **[**17]** ***HN4***[] We may reverse the denial of such motions "only if the evidence points but one way and is susceptible to no reasonable inferences supporting the [plaintiffs]; we must construe the evidence and inferences most favorably to the nonmoving party [plaintiffs]." *Zimmerman, 848 F.2d at 1051*. We "may not weigh the evidence or pass upon the witnesses' credibility, or substitute [our] judgment for that of the jury." *Hurd v. American Hoist & Derrick Co., 734 F.2d 495, 498 (10th Cir. 1984)*. Thus, if reasonable minds could differ over the verdict, the motion for judgment n.o.v. was properly denied. ***HN5***[] We review the denial of Blue Cross' motion for a new trial under an abuse of discretion standard. *Patty Precision Prods., Co. v. Brown & Sharpe Mfg. Co., 846 F.2d 1247, 1251 (10th Cir. 1988)*; *Brown v. McGraw-Edison Co., 736 F.2d 609, 616 (10th Cir. 1984)*.

A. *Section 1*

Section 1 of the Sherman Act ***HN6***[] prohibits "every contract, combination **[**18]** . . . or conspiracy, in restraint of trade or commerce. . . ." *15 U.S.C. § 1*. This has been interpreted to prohibit only "unreasonable" restraints. *Business Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 108 S. Ct. 1515, 1519, 99 L. Ed. 2d 808 (1988)*; *Arizona v. Maricopa County Medical Soc'y, 457 U.S. 332, 342-43, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*; *Drury Inn-Colorado Springs v. Olive Co., 878 F.2d 340, 342 (10th Cir. 1989)*. ***HN7***[] To affirm the district court's denial of Blue Cross' motions for judgment n.o.v. or for a new trial on the *section 1* claim, there must be sufficient evidence supporting the jury's finding of an agreement which unreasonably restrained trade in the relevant market -- private health care financing. [10]

[19]** **[*960]** The district court submitted plaintiffs' *section 1* claim to the jury under the Rule of Reason. "As stated by the Supreme Court, ***HN8***[] 'the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition.'" *Smith Mach. Co. v. Hesston Corp., 878 F.2d 1290, 1298 (10th Cir. 1989)* (quoting *National Soc'y of Professional Eng'rs v. United States, 435 U.S. 679, 691, 55 L. Ed. 2d 637, 98 S. Ct. 1355 (1978))*, *cert. denied*, *493 U.S. 1073, 110 S. Ct. 1119, 107 L. Ed. 2d 1026, 58 U.S.L.W. 3526 (1990)*. ***HN9***[] The factfinder must "decide whether under all the circumstances of the case the restrictive practice imposes an unreasonable restraint on competition." *Maricopa County Medical Soc'y, 457 U.S. at 343*. In making that decision "a variety of actual market factors" must be examined. *Smith Mach. Co., 878 F.2d at 1298* (citing *Chicago Bd. of Trade v. United States, 246 U.S. 231, 238, 62 L. Ed. 683, 38 S. Ct. 242 (1918))*. **[**20]** The plaintiff bears the burden of proving the "'adverse effect on competition.'" *Smith Mach. Co., 878 F.2d at 1298* (quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 31, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984))*. As the above statements indicate, the adverse impact must be on *competition*, not on any individual competitor or on plaintiff's business. *See Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*, *cert. denied*, *486 U.S. 1005, 100 L. Ed. 2d 192, 108 S. Ct. 1728 (1988)*; *Christofferson Dairy v. MMM Sales, 849 F.2d 1168, 1172 (9th Cir. 1988)*. Additionally, "we must bear in mind that the purpose of the antitrust laws is the

---

[10] The district court instructed the jury that "the relevant product market in this case is private health care financing." R. Vol. III, Tab 207 at Instruction 37. In denying Blue Cross' McCarran-Ferguson Act exemption claim, the court stated that "this case proceeded under all parties' agreement [that] 'private health care financing' includes 'self-insurance and self-insured administration' products." *Reazin II, 663 F. Supp. at 1403*. Additionally, the court noted that "the market for private health care financing embraces defendant's activities with and through its subsidiary, [HMOK]." *Id.* As discussed more fully, *infra*, Blue Cross argues that the court should have instructed the jury to make findings as to the products constituting the market of private health care financing.

promotion of consumer welfare. . . . HN10[] We consider [defendant's] refusal to deal in light of its effect on consumers, not on competitors." Westman Comm'n Co., 796 F.2d at 1220 (citations omitted).

The jury found that Blue Cross had engaged in a contract, combination, or conspiracy with St. Francis and/or St. Joseph **[**21]** Hospitals, encompassing within its terms the termination of Wesley as a contracting provider, and the reduction of the maximum allowable payments for the remaining Peer Group V hospitals. [11] *See* Reazin II, 663 F. Supp. at 1398. Blue Cross argues on appeal that the district court erred in denying its motions for judgment n.o.v. or for a new trial on the section 1 claim, asserting that (1) it engaged in independent, as opposed to concerted, activity when it terminated Wesley; (2) it did not unreasonably restrain trade in the health care financing market, and (3) it lacked market power. [12] It also argues that Wesley failed to establish antitrust injury, standing, or recoverable damages. We take up standing and antitrust injury first.

[22]** (i) Standing and Injury

Blue Cross argues that Wesley failed to establish antitrust injury and standing. HN11[] Standing and antitrust injury are essential elements in a private antitrust damages action brought under section 4 of the Clayton Act. *See* Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 110, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986); Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983); Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1523 (10th Cir. 1984), *aff'd*, 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985); Central Nat'l Bank v. Rainbolt, 720 F.2d 1183, 1187 (10th Cir. 1983). They are related, although they are often treated **[*961]** separately by courts. *See* Alberta Gas Chems., Ltd. v. E.I. Du Pont de Nemours & Co., 826 F.2d 1235, 1240 (3d Cir. 1987) ("It has been suggested that although standing is closely related to antitrust injury, the two concepts are distinct. Once **[**23]** antitrust injury has been demonstrated by a causal relationship between the harm and the challenged aspect of the alleged violation, standing analysis is employed to search for the most effective plaintiff from among those who have suffered loss."), *cert. denied*, *486 U.S. 1059, 100 L. Ed. 2d 930, 108 S. Ct. 2830 (1988)*. *See generally* Page, *The Scope of Liability for Antitrust Violations*, 37 Stan.L.Rev. 1445, 1483-85 (1985). The close connection between them has, however, been underscored recently. *See* Areeda & Turner, ***Antitrust Law***, para. 334.1 (Supp. 1989) (Recent Supreme Court cases "closely link standing to a showing of 'antitrust injury.'"); Bell v. Dow Chem. Co., 847 F.2d 1179, 1182 (5th Cir. 1988) ("Antitrust injury is a component of the standing inquiry, not a separate qualification.").

Plaintiffs argue Blue Cross has waived the right to object to Wesley's standing or the existence of compensable injury because it failed to so object in its motion for a directed verdict. [13] **[**25]** In denying Blue Cross' motion for

---

[11] Peer Group V includes the four Wichita hospitals and "is one of two geographically determined peer groups in the state." Reazin I, 635 F. Supp. at 1294.

[12] In Westman Comm'n Co., 796 F.2d at 1229, this court stated that "section one of the Sherman Act does not proscribe refusals to deal absent a showing of monopoly or market power on the part of the manufacturer." Thus, Blue Cross argues that, absent proof of at least market power, its refusal to deal with Wesley does not violate section 1. *See also* Schachar v. Am. Academy of Opthalmology, Inc., 870 F.2d 397 (7th Cir. 1989) ("the first question in any rule of reason case is market power."); Ball Memorial Hosp., Inc. v. Mutual Hosp. Ins., Inc., 784 F.2d 1325, 1334 (7th Cir. 1986) ("Market power is a necessary ingredient in every case under the Rule of Reason."). In certain circumstances, it may be that a detailed market analysis is not required. *See note* 24, *infra*.

[13] Blue Cross did not challenge Wesley's standing in either its motion for summary judgment or the pretrial order. *See* Motion of Blue Cross and Blue Shield of Kansas, Inc. for Summary Judgment, R.Vol. I, Tab 50 at p. 2; Pretrial Conference Order, R.Vol. II, Tab 76. The district court noted that Blue Cross failed to challenge Wesley's standing in its motion for directed verdict. Blue Cross finally challenged Wesley's standing in its Alternative Motion for Judgment Notwithstanding the Verdict or New Trial. Defendants' Alternative Motion for Judgment Notwithstanding the Verdict or New Trial, R.Vol. IV, Tab 246 at 2.

Plaintiffs do not appear to object to the district court's rulings that plaintiffs New Century and Reazin lacked standing to pursue damages but had standing to seek injunctive relief. *See* Reazin I, 635 F. Supp. at 1309-20.

judgment n.o.v. or for a new trial, the district court concluded that Blue Cross was barred from challenging **[**24]** Wesley's standing under *section 1*:

> "Throughout this litigation, defendant has never challenged Wesley's standing under *§ 1*, and it may not do so now. Indeed, defendant's position at the summary judgment stage was that Dr. Reazin, New Century, and HCP lacked standing because Wesley was the *only* plaintiff with appropriate standing under *§ 1*. *Failing to raise this issue, either at summary judgment or on its motion for directed verdict, defendant is now barred from pursuing this contention on a motion for JNOV or new trial*."

Reazin II, 663 F. Supp. at 1425 (emphasis original in part, added in part) (citation omitted). [14]

Courts do not agree on whether antitrust standing can be waived. *Compare* *NCAA v. Bd. of Regents, 468 U.S. 85, 97 n.14, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)* (Court did not address antitrust injury issue not raised by the parties); *General Inv. Co. v. New York Cent. R.R. Co., 271 U.S. 228, 230-31, 70 L. Ed. 920, 46 S. Ct. 496 (1926)*; *R.C. Dick Geothermal Corp. v. Thermogenics, Inc., 890 F.2d 139, 154 (9th Cir. 1989)* (en banc) (Norris, J., dissenting); *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 303 (2d Cir. 1979)* (standing issue not raised below waived on appeal), *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*, *with* *R.C. Dick Geothermal Corp., 890 F.2d at 145* (majority opinion noted that standing **[**26]** is "not a jurisdictional question but one properly raised at any stage of the litigation"); *Pinney Dock & Transp. Co. v. Penn Cent. Corp., 838 F.2d 1445, 1461 (6th Cir. 1988)* (court addressed antitrust standing issue not raised below, as a matter of its discretion "'to be exercised on the facts of individual cases'") (quoting *Singleton v. Wulff, 428 U.S. 106, 121, 49 L. Ed. 2d 826, 96 S. Ct. 2868 (1976))*, *cert. denied*, *488 U.S. 880, 109 S. Ct. 196, 102 L. Ed. 2d 166 (1988)*.

[*962] We need not decide whether Blue Cross can now properly challenge Wesley's standing and the existence of antitrust injury because, applying the Supreme Court's guidelines set forth in *Cargill, Inc. v. Monfort, Inc., 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1987)*, *Associated General Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*, *Blue Shield v. McCready, 457 U.S. 465, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*, and *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, **[**27]** we conclude Wesley had standing and demonstrated the requisite injury. [15]

[28]** Wesley introduced evidence at trial that, because of Blue Cross' announced termination of Wesley as a contracting provider hospital, it (1) spent money on advertisements to reassure patients that Blue Cross subscribers were still welcome at Wesley, (2) reduced its prices in order to retain its market share, and (3) lost patients. Blue Cross responds that "none of these claimed injuries flowed from the exclusion of competition from the health care financing market, or from an increase in prices for consumers of health insurance." Brief of Appellants at 34. Blue Cross thus argues that, for example, Wesley's alleged injury resulting from its reduction of its maximum allowable payments in order to retain its market share is an injury resulting from increased competition and from action benefiting consumers and therefore is not antitrust injury.

---

[14] While the district court did not specifically address antitrust injury, implicit in its discussion was its rejection of the combined argument Blue Cross made in its motion for judgment n.o.v. that Wesley failed to prove antitrust injury and lacked standing.

[15] Taken together, those cases reveal ***HN12***[] the following factors to be considered in determining antitrust standing: the causal connection between the antitrust violations and plaintiff's injury; the defendant's intent; the nature of the plaintiff's injury; the directness or indirectness of the connection between the plaintiff's injury and the allegedly unlawful market restraint; the speculativeness of the plaintiff's damages; and the "risk of duplicative recoveries . . . or the danger of complex apportionment of damages." *Associated Gen. Contractors, 459 U.S. at 544*.

The nature of the plaintiff's injury factor is designed to implement the requirement that only *antitrust* injuries are redressable under section 4. ***HN13***[] An antitrust injury is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp., 429 U.S. at 489*. An injury which is merely causally linked in some way to an alleged antitrust violation is insufficient. *Cargill, Inc., 479 U.S. at 109*; *Brunswick Corp., 429 U.S. at 489*.

The Supreme Court has suggested that *Brunswick* should not be read overly narrowly -- "while an increase in price resulting from a dampening of competitive market forces is assuredly one type of injury for which § 4 potentially offers redress, . . . that is not the only form of injury remediable under § 4." McCready, 457 U.S. at 482-83 **[**29]** (citation omitted). The Supreme Court specifically noted that "'the statute does not confine its protection to consumers, or to purchasers, or to competitors . . .'" Id. at 472 (quoting Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 236, 92 L. Ed. 1328, 68 S. Ct. 996 (1948)). [16] **HN14**[] "Where the injury alleged is so integral an aspect of the conspiracy alleged, there can be no question but that the loss was precisely 'the type of loss that the claimed violations . . . would be likely to cause.'" McCready, 457 U.S. at 479 (quoting Brunswick Corp., 429 U.S. at 489); *cf.* Associated Gen. Contractors, 459 U.S. at 537-45 (union denied standing to argue that multiemployer association and its members coerced certain third parties and some of the multiemployer association's members to enter into business relationships with nonunion firms, thereby restraining the union's business activities.).

[30]** Blue Cross challenges Wesley's standing on the ground that it "was not in the relevant market selected by the court, health care financing, either as a consumer or as a competitor." Brief of Appellants at 33. While it is true that Wesley was not itself a direct participant in the provision of health care financing, it was, by virtue of **[*963]** its affiliation with HCA and HCP, a perceived competitor of Blue Cross. Indeed, as the district court stated, "that is the precise reason [Blue Cross] undertook the conduct at issue in this case." Reazin II, 663 F. Supp. at 1426 n.17. In any event, as the Supreme Court has specifically held, **HN15**[] an antitrust plaintiff need not necessarily be a competitor or consumer. *See* McCready, 457 U.S. at 472. Where the plaintiff's injury is "inextricably intertwined" or "so integral an aspect of the conspiracy alleged" plaintiff has established an antitrust injury. Id. at 484, 479. Here, Wesley's claimed injuries were an "integral aspect" of the conspiracy to restrain trade in the health care financing **[**31]** market. Indeed, Wesley was the direct victim of Blue Cross' actions. *See* Associated Gen. Contractors, 459 U.S. at 529-30 n.19. There was also evidence that Blue Cross specifically intended to harm Wesley.

(ii) Agreement

HN16[] Section 1 requires the existence of an agreement between the allegedly conspiring parties. *See* Fisher v. City of Berkeley, 475 U.S. 260, 266, 89 L. Ed. 2d 206, 106 S. Ct. 1045 (1986); Smith Mach. Co., 878 F.2d at 1294; McKenzie v. Mercy Hosp., 854 F.2d 365 (10th Cir. 1988). We are well aware, as Blue Cross urges on us, that **HN17**[] a business retains the right under section 1 to *unilaterally* announce the terms on which it will deal and refuse to deal with those who will not comply. Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984); United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919); **[**32]** Motive Parts Warehouse v. Facet Enterps., 774 F.2d 380, 386 (10th Cir. 1985).

HN18[] The challenged agreement need not be in writing or even be explicit. "Conspiratorial conduct may be established by circumstantial evidence." Cayman Explor. Corp. v. United Gas Pipe Line, 873 F.2d 1357, 1361 (10th Cir. 1989) (citing Loew's, Inc. v. Cinema Amusements, Inc., 210 F.2d 86, 93 (10th Cir.), *cert. denied*, *347 U.S. 976, 98 L. Ed. 1115, 74 S. Ct. 787 (1954)*); *see also* Monument Builders, Inc. v. American Cemetery Ass'n., 891 F.2d 1473 (10th Cir. 1989). **HN19**[] Where evidence of a conspiracy is ambiguous, the Supreme Court has stated, "to survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of § 1 must present evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986) (quoting Monsanto Co., 465 U.S. at 764); **[**33]** *see also* Monument Builders, 891 F.2d at 1481 n.8 ("The [Supreme] Court [in *Matsushita* and *Monsanto Co.*] did not intend to end reliance on circumstantial proof of conspiracy, but rather to avoid reliance exclusively on evidence which is 'as consistent with permissible competition as with illegal conspiracy.'") (quoting Matsushita, 475 U.S. at 588). Blue Cross argues that the evidence failed to establish the existence of an agreement.

---

[16] We are also aware that the Supreme Court may be concerned about reading section 4 of the Clayton Act too broadly. *See* Associated Gen. Contractors, 459 U.S. at 529-530 & n.19. We do not believe we have done so in this case.

We agree with the district court that sufficient circumstantial evidence supports the jury's finding of an agreement. *See* Reazin II, 663 F. Supp. at 1421-24. The evidence and testimony concerning the precise circumstances under which the Saints accepted the reduced maximum allowable payments and learned of the proposed Wesley termination were conflicting. However, the series of meetings between Blue Cross and the Saints during the spring and summer of 1985 concerning a new HMO program "established an existing forum" within which discussions relating to Wesley's termination and the maximum allowable payments reduction could, and eventually did, take place. Reazin II, 663 F. Supp. at 1422. **[**34]** John Knack, the vice-president of Blue Cross who was intimately involved in the proposed Wesley termination, testified in his deposition (read into the record at trial) that "right from the first meeting [the Saints] indicated they would consider a discount." R.Vol. 28 at 2602. Marlon Dauner, the senior vice-president of Blue Cross, also intimately involved in the entire Wesley termination decision, testified at trial that the three decisions -- **[*964]** to cancel Wesley's contracting provider agreement, to abandon the Choice Care program, and to seek reduced MAPs -- were "related." R.Vol. 19 at 970. [17]

[35]** The chief financial officer of St. Francis, Stephen Harris, prepared a memorandum dated September 3 to Sister Sylvia Egan, the chief executive officer of St. Francis, which stated in pertinent part:

> "When you left for Wisconsin [on August 16], we were working with Blue Cross on various options that would allow Blue Cross to cancel Wesley's Blue Cross contract. At that time, Blue Cross felt they needed a 25% discount from the 1986 MAPs in order to offer a large enough discount [to] the 'employer' so that the program would be supported and the 'Wesley Boycott' would work. After a lot of discussion involving several different scenario [sic], we agreed on a straight 20% discount from the 1986 MAPs."

Plaintiffs' Ex. 4, Addendum to Answer Brief of Appellees Vol. I.

St. Joseph's vice-president of administration, Edward Sullivan, wrote a memorandum to his superior, William Leeker, after this lawsuit was filed, in which he stated that "implementation of [the] *new* 1986 MAPs would be delayed if the HCA suit is successful in gaining a temporary injunction. In that case the *original* 1986 MAPs would be used." Plaintiffs' Ex. 5, *Id.* (emphasis original). **[**36]** In fact, the new reduced MAPs *were* implemented, even though Robert Pearcy, Blue Cross' former director of institutional relations, testified in his deposition, which was read into the record at trial, that there had been an agreement after this lawsuit was filed to utilize the original 1986 maximum allowable payments. Plaintiffs' Ex. 551 at p.64, Addendum to Answer Brief of Appellees Vol. II. Thus, there was ample evidence that the decision to terminate Wesley and the decision to reduce the maximum allowable payments were interrelated and part of a common design to increase Wesley's costs of doing business and to drain patients from Wesley to the Saints, thereby harming Wesley. [18]

Viewing the evidence in the light most favorable to plaintiffs, **[**37]** as we must, we affirm the district court's conclusion that sufficient evidence supports a finding of "'a conscious commitment to a common scheme,'" Monsanto Co., 465 U.S. at 764 (quoting Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 (3d Cir. 1980), *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981))*, sufficient to satisfy section 1's requirement of an agreement. [19]

---

[17] Choice Care was a PPO which Blue Cross attempted to introduce into Wichita in 1985, after ceasing to market HMOK. Blue Cross solicited competitive bids from all Wichita hospitals for participation in the Choice Care program. Wesley and St. Francis were initially selected as the successful bidders. After Blue Cross altered some of the provisions of the proposed Choice Care program, Wesley was unhappy with its submitted bid. During June and July of 1985, Wesley and Blue Cross officials met in an effort to resolve these problems. Wesley wanted to submit a new bid but was not permitted to. On July 31, 1985, Wesley received the proposed Choice Care contract from Blue Cross. Blue Cross decided in August to abandon the Choice Care program in Wichita.

[18] Indeed, there was abundant evidence that the only reason the Saints agreed to the reduced maximum allowable payments was because they anticipated a shift of patients from Wesley to the Saints as a result of the termination of Wesley's contracting provider agreement.

[19] We likewise affirm the district court's rejection of Blue Cross' argument that there could be no agreement because the only Blue Cross agents with the authority to terminate the Wesley contract, the executive committee, had no knowledge of the alleged conspiracy in which Blue Cross' senior management staff may have participated.

(iii) Unreasonable Restraint of Trade

HN20[] An additional essential element in a *section 1* claim is the existence of an unreasonable **[**38]** restraint of trade. *See Dreiling v. Peugeot Motors of America, Inc., 850 F.2d 1373, 1381 (10th Cir. 1988)*; *Christofferson Dairy, 849 F.2d at 1172*.

The jury found an unreasonable restraint of trade in the private health care financing market. The district court concluded that **[*965]** ample evidence supported the jury's findings. It summarized the evidence as follows:

> "The market restraint alleged in this case is within private health care financing. [Blue Cross'] abandonment of its indemnity insurance in favor of a 'new PPO', under which it will contract only with providers not aligned with competing insurance companies, injects a market distortion. . . . [Blue Cross] discriminated against a particular class of medical provider, and there was abundant evidence from which the jury could have found defendant's conduct was undertaken with the intent and effect of preventing providers from contracting with other insurance companies. At issue in this case is not a pristine 'agreement to purchase services from certain sellers, and not from another.' Rather, substantial evidence demonstrated, and the jury apparently found, [Blue Cross'] **[**39]** conduct restricted the ability of other buyers (competing health care financing organizations) to purchase hospital services on a competitive basis through alternative delivery systems, thereby restraining competition in the health care financing market. . . ."

Reazin II, 663 F. Supp. at 1412-13. The court also emphasized the fact that there was "conduct involving at least in part a horizontal conspiracy between competing providers." *Id. at 1414*. It was further influenced by evidence that Blue Cross' motive for undertaking the conduct it did was anticompetitive.

Blue Cross argues there was no unreasonable restraint of trade in the private health care financing market because (1) Wesley, the only party the jury found to have been injured, was not in the health care *financing* market, but only in the health care *services* market; (2) no evidence demonstrated that the announced termination of Wesley's contract prevented hospitals from vertically integrating into health care financing or prevented health care financing businesses from contracting with hospitals; and (3) the effects in the health care financing market were procompetitive **[**40]** and proconsumer, in that insurer premiums for Blue Cross subscribers were reduced, new opportunities for Blue Cross competitors were created, and no consumers were restricted in their health care options.

We agree with the district court that sufficient evidence supports the jury's finding of an unreasonable restraint of trade in the market for private health care financing. It is not dispositive to us that Wesley was in the health care services market and not itself in the health care financing market. As plaintiffs argue and the district court noted, Wesley was, by virtue of its affiliation with HCA and HCP, a perceived competitor of Blue Cross. Indeed, in the Blue Cross Executive Committee meeting August 29, 1985, when the formal decision to terminate Wesley was made, Blue Cross' President Wayne Johnston specifically asked the Committee whether Blue Cross "[wished] to continue to do business with entities that openly desire to compete with the organization and enroll Blue Cross . . . subscribers in their programs." Plaintiffs' Ex. 10, Addendum to Brief of Appellants Vol. I. Further, Wesley *was* a competitor of Blue Cross' co-conspirators, the Saints. Thus, this case does **[**41]** not involve only, as defendants argue, the termination of a vertical relationship, akin to a dealer termination. Rather, this case also involves a horizontal conspiracy among competitors to harm another competitor. *See* *Business Elecs. Corp., 108 S. Ct. at 1525*.

Blue Cross argues that the jury specifically found that HCP, the only plaintiff in the relevant market of health care financing, had suffered no injury. According to Blue Cross, this establishes that no unreasonable restraint of trade occurred in the relevant market. The finding of no injury to HCP does not alter our conclusion that competition in the health care financing market was adversely affected. As the district court noted, HCP specifically made no effort to quantify its damages. The peculiar posture of this case, with the parties having voluntarily agreed to maintain the status quo and to delay actual termination of Wesley's contracting provider **[*966]** agreement pending resolution of this suit, may indeed explain why HCP continued to contract with other Wichita hospitals, including the Saints, after the threatened termination. [20]

[42]** We further disagree with Blue Cross' assertion that no evidence demonstrated that the announced termination of Wesley's contract prevented hospitals from vertically integrating into health care financing or prevented health care financing businesses from contracting with other hospitals. Indeed, several hospital administrators testified that Blue Cross' threatened termination of Wesley gravely concerned them and affected their involvement in private health care financing. [21] *Cf.* *R.C. Dick Geothermal Corp., 890 F.2d at 152* ("Dick Geothermal failed to provide testimony from a single other developer that the developer's investment decisions were in any way influenced by the defendants' level of production . . .").

[43]** Finally, we reject Blue Cross' argument that the evidence established that the effects of Blue Cross' conduct were procompetitive and proconsumer. While there was testimony that premiums for some subscribers were reduced following the threatened termination of Wesley and the implementation of the reduced maximum allowable payments, that does not convince us that Blue Cross' challenged actions were procompetitive and proconsumer. Indeed, two of plaintiffs' experts, William Guy and Dr. George Hay, plainly testified that Blue Cross' actions would, in the long run, harm consumers because they would slow down or inhibit the development of alternative delivery systems, thereby reducing the options available to consumers. They further testified that such systems would cause health care costs to decrease, thereby benefiting consumers. [22] Thus, sufficient evidence supports the jury's conclusion that Blue Cross' actions resulted in an unreasonable restraint of trade.

[44]** (iv) Market and Monopoly Power

Blue Cross argues that, absent a showing of market power, plaintiffs' *section 1* claim fails. Plaintiffs evidently assumed they must establish market power, as they presented considerable evidence relating to that issue. Thus, we review the evidence of Blue Cross' market power, noting that the Supreme Court has suggested that there may be situations in which a specific and detailed showing of market power may not be necessary in a *section 1* Rule of Reason case. *See* note 24, *infra*.

HN21[] "To demonstrate 'market power,' a plaintiff may show evidence of *either* 'power to control prices' *or* 'the power to exclude competition.'" *Westman Comm'n Co., 796 F.2d at 1225 n.3* (emphasis original). ***HN22***[] Market power is to be distinguished **[*967]** from monopoly power, which in this circuit requires proof of *both* power to control prices and power to exclude competition. *See* *Bright v. Moss Ambulance Serv., Inc., 824 F.2d 819, 824 (10th Cir. 1987)*; **[**45]** *Shoppin' Bag, Inc. v. Dillon Cos., 783 F.2d 159, 163 (10th Cir. 1986)*. Market and monopoly

---

[20] One hospital administrator, however, testified that, after the threatened termination, his hospital proceeded with a proposed contract with HCP only because the contract contained a termination clause permitting the hospital to terminate the contract on six months' notice.

[21] Lynne Jeane, the executive director of Humana Hospital in Dodge City, Kansas, testified that Blue Cross' letter to all Kansas hospitals "confirmed what we understood was a threat. The announcement of the cancellation of Wesley's policy confirmed that they would carry out the threat. . . . We have taken a position that we will wait and see what the outcome of this situation is before we attempt to provide any product." R.Vol. 28 at 2547. Ingo Angermeier, the associate administrator of Asbury Hospital in Salina, Kansas, testified that he told Blue Cross' Marlon Dauner that he "was concerned that [his] right as a provider to compete was being threatened." R.Vol. 20 at 1248. He further testified that his hospital had "substantially slowed down [its] discussion about a PPO," as a result of the threatened Wesley termination and the letter to all Kansas hospitals from Blue Cross President Wayne Johnston letter. *Id. at 1292*. Dale Martin, the Administrator and Chief Executive Officer of Graham County Hospital in Hill City, Kansas, testified that his hospital "[has] not had any more discussions with anybody concerning HMOs or PPOs since [he] received [the Johnston] letter." R.Vol. 28 at 2645.

[22] In response to Blue Cross' argument that its actions only benefited consumers, we note that there was evidence that Wesley had historically been not only the largest, but also the premier and one of the most cost-effective hospitals in Wichita. In view of Blue Cross' mandate to pursue cost containment, we view with some suspicion the argument that the termination of the largest and one of the most cost-effective hospitals promotes cost containment and thereby benefits consumers, either in the short run or over the long run.

power only differ in degree -- monopoly power is commonly thought of as "substantial" market power. *See* Areeda & Turner, ***Antitrust Law***, para. 801 (1978). We discuss the two concepts together here, since the same evidence relates to each.

HN23[] Power over price and power over competition may, in turn, depend on various market characteristics, including the existence and intensity of entry barriers, elasticity of supply and demand, the number of firms in the market, and market trends. *See* *Shoppin' Bag, 783 F.2d at 162* (in evaluating market power, "many cases . . . look at market trends, number and strength of other competitors, and entry barriers"). [23]

[46]** ***HN24***[] Market share is relevant to the determination of the existence of market or monopoly power, but "market share alone is insufficient to establish market power." *Bright, 824 F.2d at 824*; *see also* *Colorado Interstate Gas Co. v. Natural Gas Pipeline Co., 885 F.2d 683, 695 (10th Cir. 1989)*; *Shoppin' Bag, 783 F.2d at 162*; Landes & Posner, *Market Power in Antitrust Cases*, 94 Harv.L.Rev. 937, 947 (1981). It may or may not reflect *actual* power to control price or exclude competition. *See generally* *Ball Memorial Hosp., 784 F.2d at 1335*. ***HN25***[] Courts have not completely agreed on whether a particular market share should be given conclusive or merely presumptive effect in determining market or monopoly power, or whether market share is only a starting point in the inquiry into market or monopoly power. *Compare* *Valley Liquors, Inc. v. Renfield Importers, Ltd., 822 F.2d 656, 667* (7th Cir.) ("Without a showing of special market conditions or other compelling evidence of market power, the lowest possible market share legally sufficient to sustain a finding of monopolization is between 17% and **[**47]** 25%."), *cert. denied*, *484 U.S. 977, 98 L. Ed. 2d 486, 108 S. Ct. 488 (1987)*, *and* *Dimmitt Agri Indus., Inc. v. CPC Int'l, Inc., 679 F.2d 516, 529 (5th Cir. 1982)* ("market shares in the range of 16 to 25 percent, such as those held by [defendant] are insufficient -- at least absent other compelling structural evidence -- as a matter of law to support monopolization"), *cert. denied*, *460 U.S. 1082, 103 S. Ct. 1770, 76 L. Ed. 2d 344 (1983)*, *with* *Hayden Publishing Co. v. Cox Broadcasting Corp., 730 F.2d 64, 69 n.7 (2d Cir. 1984)* ("a party may have monopoly power in a particular market, even though its market share is less than 50%") *and* *Broadway Delivery Corp. v. United Parcel Serv. of America, 651 F.2d 122, 128* (2d Cir.) ("The trend of guidance from the Supreme Court and the practice of most courts endeavoring to follow that guidance has been to give only weight and not conclusiveness to market share evidence."), *cert. denied*, *454 U.S. 968, 70 L. Ed. 2d 384, 102 S. Ct. 512 (1981)*. *See also* Areeda & Turner, ***Antitrust Law***, para. 518.3c ("there is a substantial merit in a **[**48]** *presumption* that market shares below 50 or 60 percent do not constitute monopoly power.") (emphasis added). This court recently stated in dicta:

> ***HN26***[] "While the Supreme Court has refused to specify a minimum market share necessary to indicate a defendant has monopoly power, lower courts generally require a minimum market share of between 70% and 80%."

Colorado Interstate Gas Co., 885 F.2d at 694 n.18 (citing 2 E. Kintner, *Federal* ***Antitrust Law***, § 12.6 (1980); Areeda & Turner, ***Antitrust Law***, para. 803). We do not **[*968]** view *Colorado Interstate Gas* as establishing a firm market share percentage required before a finding of monopoly power can ever be sustained. We prefer the view that market share percentages may give rise to presumptions, but will rarely conclusively establish or eliminate market or monopoly power.

---

[23] In *Shoppin' Bag, 783 F.2d at 162*, we approved the following instructions on determining market strength:

> "Market strength is often indicated by market share. Market share alone, however, is not enough to determine a firm's capacity to achieve monopoly.
>
> Other factors you should consider include the number and strength of the defendant's competitors, the difficulty or ease of entry into the market by new competitors, consumer sensitivity to change in prices, innovations or developments in the market, whether the defendant is a multimarket firm, as well as other evidence presented to you that you may deem persuasive regarding defendant's market strength."

As indicated, ***HN27***[] entry barriers are relevant to the analysis of market or monopoly power. Entry barriers are particular characteristics of a market which impede entry by new firms into that market. Entry barriers may include **[**49]** high capital costs or regulatory or legal requirements such as patents or licenses. *See generally* *Colorado Interstate Gas Co., 885 F.2d at 695-96 n.21*; *Westman Comm'n Co., 796 F.2d at 1225-26 n.3*; L. Sullivan, ***Antitrust Law***, para. 23 (1977); Areeda & Turner, ***Antitrust Law***, para. 409 (1978) ("The principal sources [of entry barriers] are (1) legal license . . .; (2) control over an essential or superior resource . . .; (3) entrenched buyer preferences . . .; and (4) capital market evaluations imposing higher capital costs on new entrants. . . ."). As leading commentators have noted, "substantial market power can persist only if there are significant and continuing barriers to entry." Areeda & Turner, ***Antitrust Law***, para. 505; *accord* *Cargill, 479 U.S. at 119-20 n.15*.

The foregoing discussion illustrates that market power, to be meaningful for antitrust purposes, must be durable. *See* Areeda & Turner, ***Antitrust Law***, para. 505 ***HN28***[] ("the significance of market power depends not only on its degree but also on its durability. **[**50]** "). *See generally* *Colorado Interstate Gas Co., 885 F.2d at 695-96* & n.21; L. Sullivan, ***Antitrust Law***, paras. 22-32. The jury found that Blue Cross possessed both market power and monopoly power in the relevant market. The district court refused to disturb those findings. It concluded plaintiffs presented sufficient evidence that Blue Cross had both power over competition and power over price. [24]

[51]** Blue Cross argues on appeal that the jury and the district court erred in finding market or monopoly power for the following reasons: (1) plaintiffs' expert erroneously equated power to exclude competition with power over prices, in contravention to this court's analysis in *Shoppin' Bag, 783 F.2d at 163-64*; [25] (2) there was no evidence **[*969]** of Blue Cross' pricing power, and Blue Cross could have no such power in view of the fact that its rates were subject to approval and regulation by the Kansas Commissioner of Insurance; (3) entry barriers were nonexistent; and (4) Blue Cross' market share was insufficient to permit the inference of market power and, furthermore, it was declining.

---

[24] The district court "[agreed] with plaintiffs' suggestion the finding of market power may well be unnecessary given the jury's findings of actual anticompetitive restraint of trade." *Reazin II, 663 F. Supp. at 1416*. The district court relied on *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 90 L. Ed. 2d 445, 106 S. Ct. 2009 (1986)*, in reaching that conclusion. The Supreme Court in *Indiana Fed'n of Dentists* suggested two situations where an elaborate analysis of market power may be unnecessary. First, "'the absence of proof of market power does not justify a naked restriction on price or output.'" *Id. at 460* (quoting *NCAA v. Bd. of Regents, 468 U.S. 85, 109-10, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984))*. Such a restriction "'requires some competitive justification.'" *Indiana Fed'n of Dentists, 476 U.S. at 460* (quoting *NCAA v. Bd. of Regents, 468 U.S. at 110*). Second, even where a restraint is not sufficiently "naked," "'proof of actual detrimental effects, such as a reduction of output' can obviate the need for an inquiry into market power, which is but a 'surrogate for detrimental effects.'" *Indiana Fed'n of Dentists, 476 U.S. at 460-61* (quoting Areeda & Turner, ***Antitrust Law***, para. 1511 (1986)).

Indiana Fed'n of Dentists involved a horizontal agreement among Federation members to withhold dental X-rays from patients' insurance companies. Such an agreement could either be viewed as a "naked restraint" on output, or as resulting in such actual detrimental effects that, absent any procompetitive justification, it could be condemned without proof of market power. The Court agreed that ample evidence supported the finding that actual detrimental effects had been proven, because "in two localities . . . Federation dentists constituted heavy majorities of the practicing dentists and . . . as a result of the efforts of the Federation, insurers in those areas were, over a period of years, *actually unable* to obtain compliance with their requests for submission of x rays." *Indiana Fed'n of Dentists, 476 U.S. at 460* (emphasis added). We need not decide whether the restraint in this case is of such a nature or resulted in such effects as to obviate the need for detailed proof of market power, because plaintiffs *did* present detailed evidence as to Blue Cross' market power. We further express no opinion on the situations where such proof may be foregone.

[25] In *Shoppin' Bag, 783 F.2d at 164*, this court noted:

> "We believe that both elements have been necessary since the test's initial inception. While the concepts of price and competition are closely connected, it is conceivable that if a company has obtained control over prices that it still may not have the power to exclude other competitors from the market. . . . The differences between the elements will vary according to the factual scenarios which arise. Thus, easy distinctions between the concepts will not always be possible. It seems that in most instances a true evaluation of market power will not ultimately be possible without substantial data presented on both elements."

[52]** Noting once again our standard of review, we hold that sufficient evidence supports the jury's findings of market and monopoly power. Estimates of Blue Cross' market share varied. An internal memorandum prepared by a Blue Cross employee estimated that "60% of all medically insured Kansans are insured with Blue Cross and Blue Shield of Kansas." Plaintiffs' Ex. 41, Addendum to Brief of Appellants Vol. I. One of plaintiffs' experts, William Guy, testified that, based on his own calculations, Blue Cross' percentage of all medically insured Kansans, including self-insureds, was, "[conservatively]," forty-seven percent. R.Vol. 34 at 3393-94. Another of plaintiffs' experts, Professor Raymond Davis, testified that Blue Cross receives sixty-two percent of the insurance premiums in its service area compared to less than five percent for its next largest rival. Dr. George Hay testified that Blue Cross' market share was "somewhere between forty-seven and sixty-two percent." R. Vol. 35 at 3529. However measured, Blue Cross is by far the largest private source of health care financing in its service area. [26] **[**54]** By virtue of its size, Blue Cross has economic leverage over hospitals. As Blue Cross' **[**53]** president, Wayne Johnson, conceded, Blue Cross' membership base gives Blue Cross "clout" over hospitals. R. Vol. 18 at 780-81. While Blue Cross argues vigorously that self-insureds should be included in any estimates of Blue Cross' market share, and that inclusion of self-insurance lowers Blue Cross' market share from sixty percent to forty-five percent, inclusion of self-insurance would not significantly alter Blue Cross' relative dominance of the market. [27]

[55]** **[*970]** Blue Cross' market share is such that there could be at most a presumption of a lack of monopoly or market power. We disagree with Blue Cross that such a market share *prohibits*, as a matter of law, a conclusion of market or monopoly power. The fact that the share may have declined somewhat does not persuade us to the contrary. *See* *Oahu Gas Serv. v. Pacific Resources, Inc., 838 F.2d 360, 366-67* (9th Cir.) ("'A declining market share may reflect an absence of market power, but it does not foreclose a finding of such power.'") (quoting *Greyhound Computer Corp. v. IBM, 559 F.2d 488, 496 n.18 (9th Cir. 1977)*, *cert. denied*, *434 U.S. 1040, 54 L. Ed. 2d 790, 98 S. Ct. 782 (1978))*, *cert. denied*, *488 U.S. 870, 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)*. We turn, therefore, to other characteristics of the private health care financing market at issue and to more specific evidence of Blue Cross' power over price and competition.

---

[26] In addition to receiving some 62% of all earned health insurance premiums in its service area, compared to less than 5% for other insurance companies, Blue Cross was the largest non-federal source of revenue for hospitals. For example, there was testimony that Blue Cross accounted for 16% of St. Francis' revenues, compared to less than 5% from Blue Cross' next largest competitor. Wesley's chairman and chief executive officer, Jack Davis, testified that Blue Cross accounted for approximately 18% of Wesley's revenues. R. Vol. 14 at 71. The same held true for hospitals outside Wichita. The associate administrator of Asbury Hospital testified that approximately 19% of Asbury's revenues came from Blue Cross, while the next largest insurance company accounted for at most 5%. R. Vol. 20 at 1231.

[27] "Self-insurance" refers to the situation where an employer, typically a large employer, itself performs the function of insurer for its employees. The employer often hires a third party, such as Blue Cross, to administer the program. In the testimony from various witnesses concerning Blue Cross' market share, substantial time was devoted to whether self-insurance and self-insureds should be included within the market of private health care financing, the market within which Blue Cross' market share was relevant.

Blue Cross' argument to this court is that the jury, as a result of the district court's failure to instruct on the make-up of the market, must have ignored self-insurance, because inclusion of self-insurance in the relevant market necessarily lowers Blue Cross' market share below that which could sustain a finding of market or monopoly power. We disagree. There was conflicting testimony on the proportion of all insureds who participate in a self-insurance program in Kansas. Plaintiffs' expert, Raymond Davis, testified that he was unable to obtain hard data on that question either from Blue Cross or from the Kansas Insurance Commissioner. There was testimony that on a national basis 39% of those insured were self-insured, but there was also testimony as to why that figure might not be an accurate reflection of the self-insurance situation in Kansas.

Thus, the jury heard substantial, and conflicting, evidence both as to the percentage of the total insurance market that self-insurance represented as well as the propriety of including self-insurance when measuring Blue Cross' market share. We cannot say that the jury could not have found market or monopoly power from the evidence presented.

Certain historical advantages contributed to Blue Cross' dominant position in Kansas. Blue Cross was the first health care insurance company in Kansas. It is chartered under special **[**56]** enabling legislation. [28] Until 1985, Blue Cross was the only insurance company with the ability to contract directly with hospitals, which gave it the unique ability to negotiate price, to establish maximum allowable payments, to impose a hold harmless clause, and to utilize its most favored nations clause. Until 1970, it had certain tax advantages not available to other insurance companies, R. Vol. 22 at 1487-90, which, while arguably not relevant as entry barriers to competition now, may have contributed to Blue Cross' initial dominance in Kansas. Blue Cross is also the only Medicare intermediary, and Medicare accounts for a substantial portion of each hospital's revenues. Plaintiffs' experts testified as to why Blue Cross had achieved its position of dominance and why it was unlikely that Blue Cross' dominant position in the market in this case would be eroded soon.

[57]** Plaintiffs' experts also testified as to Blue Cross' power over price and power to exclude competition. William Guy testified that alternative delivery systems were "the first real challenge to our traditional system of delivering financing of care." R. Vol. 34 at 3375. He testified that Blue Cross' most favored nations clause hindered the development of alternative delivery systems, thereby interfering with the introduction of competition. R. Vol. 34 at 3404. He further testified that, despite Blue Cross' average annual rate increase of 23.75% from 1980 through 1983, Blue Cross still maintained its dominance. The jury could reasonably infer from that testimony that Blue Cross had power over price.

Another of plaintiffs' experts, Dr. George Hay, similarly testified that Blue Cross' only real competition would come from alternative delivery systems. Blue Cross faced little challenge from other traditional indemnity insurance companies. Because Blue Cross was in a position to use its leverage over hospitals to exclude or slow down the development of alternative delivery systems, it thereby had power to exclude competition. He further opined that the power to exclude such alternative **[**58]** delivery systems gave Blue Cross power over price. [29]

[59]** **[*971]** Further, there was testimony that Blue Cross' threatened termination of Wesley in fact *did* exclude competition, in that it inhibited hospitals from pursuing alternative delivery systems. There was also considerable testimony on the effect of Blue Cross' most favored nations clause, and the jury could reasonably have concluded

---

[28] The district court described that as "legislation giving it [Blue Cross] the state's imprimatur." *Reazin II, 663 F. Supp. at 1417*. There was also testimony that being a contracting provider with Blue Cross was viewed as the "Good Housekeeping" seal of approval.

[29] Dr. Hay testified:

> "These new forms of competition [alternative delivery systems], that's where the downward pressure on price is going to come from. That's what is going to cause health care costs to Kansas consumers to be lower, all right. If Blue Cross can stop that, can suppress it or can slow it down, that means that the cost of health care financing in Kansas is going to be higher than it otherwise would and that means that because Blue Cross has the power to do that, the power to stop it or slow it down, in a very real sense Blue Cross has the power over price, the power to prevent those price pressures, all right, from coming about to the advantage of Kansas consumers."

R.Vol. 35 at 3538-39. Blue Cross argues that Dr. Hay erroneously equated power over competition with power over price, in contravention of *Shoppin' Bag, 783 F.2d at 164*. However, in *Shoppin' Bag*, we specifically noted that the "concepts of price and competition are closely connected" and that "easy distinctions between the concepts will not always be possible." *Id.* Further, in *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 392, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*, the case relied on in *Shoppin' Bag* in its discussion of monopoly power, the Court specifically stated:

> "Price and competition are so intimately entwined that any discussion of theory must treat them as one. It is inconceivable that price could be controlled without power over competition or vice versa."

Thus, we perceive no error in Dr. Hay's linkage of power over competition to power over price. Moreover, as we discuss further, plaintiffs introduced evidence of both Blue Cross' power over price and its power to exclude competition.

that that clause contributed to Blue Cross' power over price. [30] **[**60]** We reject Blue Cross' argument that Blue Cross could have no power over price because its rates were subject to approval and regulation by the Kansas Commissioner of Insurance. [31]

[61]** We further disagree with Blue Cross' argument that entry barriers in the relevant market were non-existent and that the existence of some 200 insurance companies operating in Kansas demonstrates that fact. While it is true that only capital and licensing were necessary to initially enter the health care financing market, the fact remains that no other entrant remotely approached Blue Cross' domination of the market. That evidence cuts against the argument that entry barriers were insubstantial. *See* *Oahu Gas Services, 838 F.2d at 367* ("The second entrant, Aloha Gas, did win some accounts, but the evidence that that firm remained very small could reasonably preclude a decision that Aloha's entry reflected a breakdown of barriers to entry."). Further, other peculiar characteristics of the health care financing market **[*972]** in Kansas, such as Blue Cross' unique ability, until 1985, to contract directly with hospitals, and the widespread impression that Blue Cross alone had the Kansas legislature's special imprimatur made it more difficult for other insurance companies to compete with Blue Cross. [32]

---

[30] The fact that the First Circuit has recently concluded that, as a matter of law, a "Prudent Buyer" policy utilized by Blue Cross and Blue Shield of Rhode Island, essentially identical to the most favored nations clause in this case, did not constitute monopolization in violation of *section 2* does not alter our conclusion on the existence of Blue Cross' monopoly power here. *See* *Ocean State Physicians Health Plan, Inc. v. Blue Cross & Blue Shield, 883 F.2d 1101 (1st Cir. 1989)*. In *Ocean State*, Blue Cross conceded its monopoly power. *Id. at 1110*. The only question was whether Blue Cross violated *section 2*. By contrast, the most favored nations clause here is not itself challenged as unlawful monopolization. Rather, it is only considered as evidence of, or as contributing to, Blue Cross' market or monopoly power. We need not reach the question addressed in *Ocean State* of whether use of the most favored nations clause could itself violate *section 2*.

[31] The district court rejected this argument. The court opined that Blue Cross had waived that argument because, while asserted in Blue Cross' answer as a defense, it was abandoned in Blue Cross' motion for summary judgment and in the pre-trial order. Even if not waived, the district court concluded the argument was meritless under the immunity test of *Parker v. Brown, 317 U.S. 341, 87 L. Ed. 315, 63 S. Ct. 307 (1943)*.

Blue Cross does not make any broad immunity argument on appeal. It does, in passing, reassert the argument that, because Blue Cross' rates were subject to approval and regulation by the Kansas Commissioner of Insurance, Blue Cross could not control prices and therefore lacked monopoly, and possibly market, power. The district court rejected that specific argument, stating:

> "The factual predicate for such an argument is simply absent in this case. Defendant's own economic expert, Peter Hamilton, was specifically asked at his deposition two weeks prior to trial: 'What role, if any, does the fact that Blue Cross is regulated by the Insurance Commissioner of Kansas play in your opinions?' His unequivocal answer: 'None at this time.' (Hamilton Depo., p. 57). At trial, [Blue Cross] called Dr. Hamilton to present its best defense to market and monopoly power, Dr. Hamilton's testimony was utterly bereft of any reference whatsoever to state rate regulation."

Reazin II, 663 F. Supp. at 1419.

We agree with the district court that Blue Cross effectively abandoned this argument. Furthermore, Blue Cross does not direct us to any materials indicating the nature of the regulation at issue and has thus failed to prove that the Insurance Commissioner engages in the kind of regulation which might indicate that Blue Cross lacks any control over price. Finally, not only did Blue Cross' expert, Dr. Hamilton, fail to mention state regulation in his discussion of Blue Cross' monopoly and market power, but a number of Blue Cross employees, as well, testified about Blue Cross' pricing policies without mention of state regulation.

[32] We thus agree with the district court that *Ball Memorial Hosp., Inc. v. Mutual Hosp. Ins., 784 F.2d 1325 (7th Cir. 1986)*, a case on which Blue Cross heavily relies, is distinguishable. In *Ball Memorial*, Blue Cross' market share was smaller (27% of all patients in Indiana) and the health insurance market was evidently more competitive, with some 1000 firms licensed to do business in Indiana, and more than 500 selling insurance at the time of the decision. To the extent that the *Ball Memorial* court opined that entry barriers in the health care financing market are *always* low, in any health care financing market in the country, we respectfully disagree. *See also* *Reazin II, 663 F. Supp. at 1420 n.16*; *Reazin I, 635 F. Supp. at 1328-31*.

[62]** In sum, bearing in mind our standard of review in this case, we conclude that sufficient evidence supports the jury's findings of monopoly and market power and we find no legal error in those findings.

(v) Damages

Blue Cross argues the damages award to Wesley should be set aside because Wesley's evidence of lost profits resulting from the loss of patients following Blue Cross' threatened termination of Wesley was speculative and unsubstantiated. [33]

"The Supreme Court has recognized that an antitrust plaintiff is rarely able to prove its damages with mathematical precision." *Aspen Highlands, 738 F.2d at 1525*. ***HN29***[] While an antitrust damages award may not be the result of mere "'speculation or conjecture,'" it may be the result **[**63]** of "'a just and reasonable estimate of the damage based on relevant data.'" *Id. at 1526* (quoting *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946))*.

Blue Cross specifically challenges the damages award for lost profits because it argues that Wesley's chief operating officer, Donald Stewart, presented "unsupported speculation" that Wesley's declining percentage of Blue Cross subscribers resulted from the announced termination. Blue Cross claims the evidence demonstrates merely a small decline in Wesley's market share which was simply coincidental with the announced termination. In other words, Blue Cross appears to argue insufficient evidence supported the necessary causal link between Blue Cross' challenged activities and Wesley's claimed damage. We disagree. We have carefully reviewed the damages evidence presented in this case and find that Wesley's claimed damages were supported by sufficient evidence.

Blue Cross makes only a passing reference in its appellate briefs to an argument it made strenuously below, that any damage award in this case would be speculative because the contracting provider agreement **[**64]** with Wesley was never terminated. [34] As did the district court, we note that the unique posture of this case necessarily altered plaintiffs' evidence of damages. Nonetheless, Wesley adequately documented the damages it actually sustained by virtue of the threatened termination of its contracting provider agreement.

[65]** B. *Section 2*

Section 2 of the Sherman Act provides:

> ***HN30***[] "Every person who shall monopolize, or attempt to monopolize, or combine or **[*973]** conspire with any other person or persons, to monopolize any part of the trade or commerce . . . shall be deemed guilty of a felony . . ."

15 U.S.C. § 2. The jury was instructed on the elements of attempted monopolization, conspiracy to monopolize, and the completed offense of monopolization. It found Blue Cross guilty of the offense of monopolization.

---

[33] Blue Cross does not appear to challenge on appeal the award of punitive damages under the state law tortious interference claim. Accordingly, we do not address it.

[34] As the district court noted in *Reazin I*:

> "The case is presently before the Court in a unique posture because of the parties' voluntary agreement to preserve the status quo, continuing to abide by the terms of the Wesley/[Blue Cross] contracting provider agreement pending the outcome of this suit. The Court perceives the case as primarily a declaratory judgment action which will be tried to the jury to determine whether what is now the proposed termination of Wesley's contract, along with the formation and effect of the revised [Blue Cross] contracting provider agreements with the remaining Wichita hospitals, would violate the antitrust laws if carried out."

Reazin I, 635 F. Supp. at 1316.

> HN31[] "The elements of monopolization under Section 2 are 'the possession of monopoly power in the relevant market' and 'the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'"

Bright v. Moss Ambulance Serv., 824 F.2d 819, 823 (10th Cir. 1987) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)); **[**66]** *see also* Aspen Highlands Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 596 n.19, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985). "Of course, HN32[] the fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for a private litigant to recover on a claim of monopolization." Aspen Highlands, 738 F.2d at 1519 n.12. HN33[] While a "specific intent" to monopolize is necessary to establish an attempt to monopolize claim, "general intent is all that is required to support a monopolization claim." Id. at 1521 n.16.

We have already held that sufficient evidence supports the jury's finding of monopoly power. We have also already concluded that Wesley had standing and proved antitrust injury and damages. We turn, therefore, to whether sufficient evidence supports the finding that Blue Cross willfully acquired or maintained that power "as distinguished from growth or development as a consequence of a superior product, **[**67]** business acumen, or historic accident." Bright, 824 F.2d at 823 (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)). We have little difficulty concluding that Blue Cross' total conduct in this case -- threatening to terminate Wesley's contracting provider agreement and reducing the maximum allowable payments for the remaining Peer Group V hospitals, thereby coercing other hospitals into not doing business with Blue Cross competitors -- constituted willful maintenance of its monopoly power. A general intent to do so is amply supported by the record.

C. *Jury Instructions*

Blue Cross argues that the court erroneously instructed the jury on certain of the elements necessary under sections 1 and 2.

> HN34[] "When examining a challenge to jury instruction, we review the record as a whole to determine whether the instructions 'state the law which governs and provided the jury with an ample understanding of the issues and the standards applicable.'"

Big Horn Coal Co. v. Commonwealth Edison Co., 852 F.2d 1259, 1271 (10th Cir. 1988) **[**68]** (quoting Ramsey v. Culpepper, 738 F.2d 1092, 1098 (10th Cir. 1984)). We address each alleged error in turn.

During jury deliberations, the jury asked whether it could consider "the public interest" if it found the procompetitive and anticompetitive effects of Blue Cross' conduct "[balanced] out against each other." The court responded "yes," over Blue Cross' objection. Blue Cross argues the "court's answer impermissibly allowed the jury to consider matters other than market effects, and to find a violation where anticompetitive effects did not outweigh procompetitive effects." Brief of Appellants at 27.

This interchange between jury and court must be viewed in context. Instruction 46, to which Blue Cross did not object, stated in part:

> "To determine whether there was an unreasonable restraint, you need not find a specific injury, but must find conduct which appears to be reasonably calculated to, or tends to, prejudice the public interest. That public interest is that competition be open and unrestrained."

R. Vol. III, Tab 207 at Instruction 46. The jury's question was as follows:

> **[*974]** "If the jury finds, (in accordance with **[**69]** Instructions 47 through 52) that the reasonable and unreasonable (pro versus anti-competitive) effects in the market balance out against each other, is the fact that

> there did exist conduct [as per Instruction 46] which appeared to be reasonably calculated, or tended to prejudice the public interest, to be given any weight in deciding the question of unreasonable restraint?"

R. Vol. III at Tab 211.

We find no reversible error in the court's response. Instructions 46 through 52 made abundantly clear to the jury that they were to find an unreasonable restraint of trade only if they found an adverse impact on competition. The "public interest" referred to in Instruction 46 was specifically defined as "open and unrestrained competition." Thus, we do not view the court's response as inviting the jury to consider matters other than the effects of the alleged restraint on competition, nor as allowing a finding of an unreasonable restraint where the anticompetitive effects did not outweigh the procompetitive effects.

Again during deliberations, the jury inquired whether entry barriers encompassed simply "gaining a share of the market or does this refer to a new product simply **[**70]** being licensed into Kansas." R. Vol. III at Tab 211. The court responded:

> "Instruction 43 contains certain factors you may consider in determining Blue Cross' market power or monopoly power, if any. Factor 5 of that instruction inquires of you as to the ease with which new firms may enter the industry, and in the Court's view, is self-explanatory.
> In the interest of clarity, however, 'barriers to entry' fairly implies or assumes the ability to become a meaningful competitor."

Id. Blue Cross argues the court's answer was wrong because entry barriers only contemplate the prerequisites to entry and the concept does not require that a new entrant be able to compete meaningfully.

While we agree with Blue Cross that the antitrust laws do not guarantee any competitor the right to be a meaningful or significant competitor, ***HN35***[] we also must view entry barriers in terms of their relevance to the antitrust laws. Entry barriers are relevant to the inquiry into a defendant's market power. If entry barriers are substantial, a market participant may be able to achieve or maintain market **[**71]** or monopoly power and use that power anticompetitively because its actions can go unchecked by new competitors. Thus, the relevance of entry barriers stems from their impact on *competition* in a given market. *See United States v. Waste Management, Inc., 743 F.2d 976, 983 (2d Cir. 1984)* (in finding low entry barriers, court noted that new entrants could "compete successfully" with other companies). Where the particular "entry barrier" in question, such as regulatory approval, means no more than that a new entrant has a "ticket" or "pass" to enter the market, but where other substantial entry barriers prohibit the new entrant from ever gaining a sufficient share of the market to discipline anticompetitive action by other market participants, then the first kind of "entry barrier" is not meaningful in antitrust terms. Thus, we agree with the district court that it properly focused the jury's attention on barriers to meaningful competition -- competition which could inhibit anticompetitive conduct. *See Reazin II, 663 F. Supp. at 1435-37*.

Blue Cross makes two challenges to Instruction 18. First, Blue Cross argues that the court's instruction, over **[**72]** objection, that the issue was "whether Blue Cross' termination of Wesley and related actions and communications are likely to have a future anticompetitive effect in any relevant market," was wrong because the Sherman Act only prohibits past or existing restraints of trade, not future ones. Second, Blue Cross argues the court wrongly limited the jury's use of evidence of HCA's allegedly anticompetitive conduct by the following language:

> "I hereby instruct you that the evidence concerning HMO Kansas and surrounding circumstances in 1983 and 1984 was admitted for the limited purpose of allowing Blue Cross to set forth historical **[*975]** information about Wichita and the health care financing market. I further instruct you that this evidence is relevant only for that limited purpose and should not be considered for any other purpose. I further instruct you that it should be considered by you, if at all, only if you believe it helps you decide what will the likely future competitive impact of the Blue Cross conduct at issue in this case -- Blue Cross' announced termination of Wesley Medical Center and its related actions and communications."

R. Vol. III, Tab 207 **[**73]** at Instruction 18. Blue Cross argues that limiting instruction inhibited its legitimate Rule of Reason defense.

We find no error in Instruction 18. The peculiar posture of this case requires a finding of no error in the phrase concerning the "likely future competitive impact of the Blue Cross conduct." We likewise reject the argument that the instruction inhibited Blue Cross' legitimate Rule of Reason defense. As the district court noted, it had struggled throughout this case to walk the fine line between permitting Blue Cross to present its Rule of Reason defense, and thereby present evidence as to general market conditions, and yet not permitting a full trial of Blue Cross' counterclaim. We view the challenged instruction as simply reminding the jury of that distinction and properly channeling their attention toward the permitted use of the evidence of general market conditions -- Blue Cross' Rule of Reason defense.

Blue Cross also objects to the court's instruction on the product market in this case. The court instructed the jury that the relevant product market was "private health care financing." R. Vol. III, Tab 211 at Instruction 37. Blue Cross argues the court should have **[**74]** instructed the jury to make findings as to the products constituting the relevant market. In particular, Blue Cross' concern is whether the jury included self-insurance in the relevant market.

HN36[] Market definition is a question of fact. *Westman Comm'n Co. v. Hobart Int'l, Inc., 796 F.2d 1216, 1220 (10th Cir. 1986)*. ***HN37***[] Definition of the relevant market requires first "a determination of the product market." *Id. at 1221*. "This inquiry necessitates an examination of which commodities are 'reasonably interchangeable for consumers for the same purposes.'" *Id.* (quoting *United States v. E.I. duPont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*. The relevant geographic market must also be determined. *Westman Comm'n Co., 796 F.2d at 1222*. The jury defined the geographic market in this case as the State of Kansas, excluding Johnson and Wyandotte Counties.

We find no error in the district court's refusal **[**75]** to specifically direct the jury to make findings as to the products constituting the relevant market. The jury heard ample, and conflicting, evidence as to the propriety of including self-insurance in the relevant market, the percentage of Kansans insured through self-insurance, and the effect that inclusion of self-insurance in the relevant market would have on the issues in this case. Thus, the issue of what "products" constitute the market of private health care financing was fairly before the jury.

In its instructions on unreasonable restraints of trade, the court stated, "if you find defendant possessed market power in the market, then any action taken by it with the actual or probable effect of foreclosing competition, *gaining a competitive advantage*, or destroying a competitor would be an unreasonable restraint of trade." R.Vol. III, Tab 207 at Instruction 47. Blue Cross objects to the highlighted portion of the instruction on the ground that it impermissibly allowed the jury to find an antitrust violation from the legitimate activity of seeking to gain a competitive advantage. Viewed in the context of all the instructions given the jury, we perceive no error. The jury **[**76]** was instructed on several occasions that the antitrust laws do not prohibit vigorous and successful competition and that merely attempting to succeed in business through vigorous competition is not unlawful. *See id.* at Instructions 12, 51. We are therefore unpersuaded **[*976]** that the jury would have taken that single challenged phrase and penalized Blue Cross for engaging in legitimate competitive activity.

Blue Cross further objects to the court's instruction that HCA's actions were "in and of themselves . . . not illegal or violative of the antitrust laws." *Id.* at Instruction 19. Blue Cross argues that instruction was not necessary and only served to prejudice Blue Cross. We disagree. While the legality of HCA's actions was an issue in the counterclaim, plaintiffs' complaint addressed only the legality of Blue Cross' actions, to which the legality of HCA's actions was irrelevant. The sentence preceding the challenged sentence correctly reminded the jury that "vertical integration . . . in and of itself is not violative of any law, including antitrust laws." *Id.* Viewed in context, this instruction simply reminded the jury that it could not consider any illegality **[**77]** by HCA as a defense to charges of anticompetitive conduct by Blue Cross.

Finally, Blue Cross charges that the court "repeatedly commented to the jury adversely concerning the evidence Blue Cross offered in support of its defense." Brief of Appellants at 31. It further charges that the court compounded the prejudice by refusing to instruct the jury that the court's comments were not evidence. After carefully reviewing the entire record in this case, we find no prejudice to Blue Cross resulting from any allegedly unfavorable comments by the district court to the jury concerning Blue Cross' evidence. Nor do we find any error in the district court's exclusion of evidence relating to HCA's activities in other parts of the country.

We therefore affirm the district court's denial of Blue Cross' motions for judgment n.o.v. or for a new trial on the antitrust claims.

STATE LAW CLAIMS

Plaintiffs also charged that Blue Cross' conduct in this case amounted to tortious interference with Wesley's present and future relations with Blue Cross subscribers, in violation of Kansas law. [35] The jury found for Wesley on its claim of tortious interference and awarded actual damages of $ 1.00 and **[**78]** punitive damages of $ 750,000. [36] The district court denied Blue Cross' motion for judgment n.o.v. or a new trial on that claim. Blue Cross appeals, arguing that the court erroneously instructed the jury on the elements of tortious interference and that the evidence fails to support the jury's verdict.

[79]** The district court instructed the jury as follows:

> "To find for plaintiff Wesley Medical Center on its claim of tortious interference by Blue Cross, Wesley must prove and you must find:
>
> 1. That there existed a present business relationship and/or the expectancy of a future relationship with economic benefits between Wesley and Blue Cross' subscribers;
> 2. That Blue Cross actually knew of this present business relationship and/or expectancy of future relationship;
> 3. That, but for Blue Cross' deliberate use of the media and other efforts to discourage its subscribers from using Wesley, plaintiff Wesley was reasonably certain to have continued in the existing relationship or realized future expectancies;
> 4. That Blue Cross undertook this conduct with the wrongful intent of injuring or destroying Wesley's business;
>
> **[*977]** 5. That Wesley suffered injury, loss or damages to its business relations as a direct or proximate result of Blue Cross' misconduct."

R.Vol. III, Tab 207 at Instruction 84. Blue Cross argues that that instruction permitted the jury to find tortious interference without finding that Blue Cross had engaged in misconduct.

[80]** ***HN38***[] The elements of tortious interference under Kansas law are:

> "(1) the existence of a business relationship or expectancy with the probability of future economic benefit to the plaintiff; (2) knowledge of the relationship or expectancy by the defendant; (3) that, except for the conduct of the defendant, plaintiff was reasonably certain to have continued the relationship or realized the expectancy; (4) intentional misconduct by defendant; and (5) damages suffered by plaintiff as a direct or proximate cause of defendant's misconduct."

Turner v. Halliburton Co., 240 Kan. 1, 722 P.2d 1106, 1115 (1986) (citing *Maxwell v. Southwest Nat'l Bank, 593 F. Supp. 250, 253 (D.Kan. 1984))*. Thus, improper conduct is a requirement. However, as the Kansas Supreme Court noted in *Turner*, ***HN39***[] "[a] person may be privileged or justified to interfere with contractual relations in certain situations." *Turner, 722 P.2d at 1115*. Or, put another way, defendant's conduct may not be improper. **[**81]** [37]

---

[35] Plaintiffs initially argued Blue Cross' actions also interfered with Wesley's present and future business relations with patients, doctors, nurses, other medical personnel, administrators and staff, as well as with HCP's and New Century's present and future business relations with hospitals and other providers of health care services. The jury was only presented with a special interrogatory relating to Wesley's relationship with Blue Cross subscribers.

[36] The jury found that one of the elements of plaintiff HCP's tortious interference claim was not established. That element was the requirement that Blue Cross have undertaken its allegedly unlawful conduct "with the wrongful intent of injuring or destroying the business of" HCP.

The court in *Turner* required the plaintiff to prove "actual malice" to overcome the qualified privilege recognized there.

[82]** We conclude the jury instructions did not misstate Kansas law and permit the jury to find tortious interference without a finding of misconduct by Blue Cross. Instruction 84 itself includes the word "misconduct." Instruction 87 specifically states, "in order to find that Blue Cross tortiously interfered with the business relations of plaintiffs, you must find that the alleged interference was *both wrongful and intentional*." R. Vol. III, Tab 207 at Instruction 87 (emphasis added). That sufficiently informed the jury of the need to find misconduct by Blue Cross.

Blue Cross also argues the court "improperly permitted the jury to find liability based solely upon 'deliberate use of the media' even though all of the alleged statements of Blue Cross were factually true and not defamatory." Brief of Appellant at 36. Blue Cross argues its media communications were privileged under the *First Amendment* unless Wesley proved actual malice or knowledge of falsity.

The court's instruction No. 88, concerning competitive privilege, stated:

> "This competitive privilege is a qualified privilege, and if you find Blue Cross' conduct is motivated primarily by malicious, anticompetitive **[**83]** or predatory purposes, rather than legal, fair and reasonable competition, you must conclude defendant's conduct falls outside this qualified privilege, and is not justified."

R.Vol. III, Tab 207 at Instruction 88. We agree with the district court that the instruction "adequately informed the jury of the degree of motive it must find before it could impose liability upon defendant." *Reazin II, 663 F. Supp. at 1430*. Inasmuch as the jury found several antitrust violations by Blue Cross, which we have upheld in this appeal, sufficient evidence supports the jury's verdict of tortious interference.

"ALLEN" CHARGES AND COMMUNICATIONS WITH JURY

Finally, Blue Cross argues that the district court's supplemental *Allen* instructions, [38] **[*978]** given to the jury on the tenth and fourteenth days of deliberation, coerced the jury into reaching its verdict, thereby impermissibly prejudicing Blue Cross. We disagree.

---

[37] The Kansas Supreme Court referred to the *Restatement (Second) of Torts § 767* (1979), which discusses whether conduct is proper or improper:

> ***HN40***[] "'In determining whether an actor's conduct in intentionally interfering with a contract or a prospective contractual relations of another is improper or not, consideration is given to the following factors:
>
> (a) the nature of the actor's conduct,
>
> (b) the actor's motive,
>
> (c) the interests of the other with which the actor's conduct interferes,
>
> (d) the interests sought to be advanced by the actor,
>
> (e) the social interests in protecting the freedom of action of the actor and the contractual interests of the other,
>
> (f) the proximity or remoteness of the actor's conduct to the interference, and
>
> (g) the relations between the parties.'"

Turner, 722 P.2d at 1116-17.

[38] "An *Allen* charge derives its name from jury instructions approved by the Supreme Court in *Allen v. United States, 164 U.S. 492, 501-02, 17 S. Ct. 154, 157-58, 41 L. Ed. 528 (1896)*." *United States v. Porter, 881 F.2d 878, 888 n.9* (10th Cir.), *cert. denied*, ***493 U.S. 944, 110 S. Ct. 348, 107 L. Ed. 2d 336 (1989)***.

[84]** Blue Cross asserts that the supplemental *Allen* charges, given during jury deliberations, contravened *United States v. Blandin, 784 F.2d 1048 (10th Cir. 1986)*, in which this court, in dicta, stated, "If the *Allen* instruction is given at all, it should be incorporated into the body of the court's original instructions to the jury. It should not be given during the course of deliberations." *Id. at 1050*. As we have subsequently made clear, "*Blandin* did not adopt a *per se* rule prohibiting an *Allen* instruction once a jury commenced deliberations." *United States v. Mobile Materials, Inc., 881 F.2d 866, 878 (10th Cir. 1989)* (per curiam), *cert. denied*, *493 U.S. 1043, 110 S. Ct. 837, 107 L. Ed. 2d 833 (1990)*; *see also* *United States v. McKinney, 822 F.2d 946, 951 (10th Cir. 1987)* ***HN41***[] ("Although it is a preferred rule of procedure that an *Allen* instruction be given the jury at the same time as other instructions, it is *not* a *per se* rule") (emphasis original). Rather, "Allen-type cases **[**85]** must be reviewed on a case-by-case basis to determine the coercive effect of the instruction." *McKinney, 822 F.2d at 951*; *see also* *Mobile Materials, 881 F.2d at 878*.

After reviewing the facts of this case, we conclude that the *Allen* charges given in this case were not coercive and do not merit reversal of the jury's verdict. The language used by the district court is substantially the same as language this court has found to be non-coercive. *See, e.g.,* *United States v. Dyba, 554 F.2d 417, 420-21* (10th Cir.), *cert. denied*, *434 U.S. 830, 54 L. Ed. 2d 89, 98 S. Ct. 111 (1977)*; *Munroe v. United States, 424 F.2d 243, 245-46 (10th Cir. 1970)*; *United States v. Wynn, 415 F.2d 135, 137 (10th Cir. 1969)*, *cert. denied*, *397 U.S. 994, 25 L. Ed. 2d 402, 90 S. Ct. 1133 (1970)*. Any differences between the *Allen* charges given in those cases and the *Allen* charges given in this case do not alter our conclusion.

While the district court did remind the jury that plaintiffs labored under the preponderance of the evidence standard rather than the higher beyond a reasonable **[**86]** doubt standard, the court also directed the jurors to review carefully the court's original instructions, which set forth all the elements of plaintiffs' case. The court also reminded the jurors, as it did in its original instructions, that "no juror is expected to yield a conscientious conviction that he or she may have as to the weight or the effect of the evidence." R. Vol. III, Tab 207 at Instruction 97. In sum, while we continue to urge caution in the use of *Allen* instructions, we do not find, under the particular facts of this case, that the given instructions coerced the jury and prejudiced Blue Cross. [39]

[87]** Blue Cross also argues that the district court "erred in permitting private communications between its law clerks and the jury." Brief of Appellants at 17. We find no error. The court's communications with the jury all related to the progress the jury was making towards reaching a verdict and occurred after the jury had been deliberating for a considerable period of time. The record confirms the district court's conclusion that "nothing was done without the prior knowledge and approval, or at least acquiescence, of counsel. . . ." *Reazin II,* ***[*979]*** *663 F. Supp. at 1442*. [40]

COUNTERCLAIM

In their counterclaim, Blue Cross, along with HMOK, [41] charged that plaintiffs and HCA (1) engaged in a group **[**88]** boycott and concerted refusal to deal, *per se* in violation of *section 1*; (2) restrained trade in violation

---

[39] Some three-and-one-half months after the verdict was returned, a juror submitted a letter to the court in which the juror claimed her verdict was coerced. *See* *Reazin II, 663 F. Supp. at 1443 n.20*. The court denied Blue Cross' motion for a hearing into the letter. Blue Cross argues that denial was error. We disagree. We regard this as a classic example of a juror attempting to impeach her own verdict, which we will not permit in this case. *See* *Tanner v. United States, 483 U.S. 107, 97 L. Ed. 2d 90, 107 S. Ct. 2739 (1987)*; *United States v. Miller, 806 F.2d 223, 225 n.2 (10th Cir. 1986)*; ***Holden v. Porter, 405 F.2d 878, 879 (10th Cir. 1969)***.

[40] Blue Cross made several motions for a mistrial during the jury's deliberations. In its third such motion, made four days before the jury returned its verdict, Blue Cross did not even raise the court's communications with the jury as a ground for the motion. *See* R. Vol. 44 at 85-86.

[41] HMOK was an HMO which Blue Cross attempted to introduce into Wichita in 1984. Ultimately, in 1985, Blue Cross withdrew HMOK from Wichita. The counterclaim largely revolves around the reasons for HMOK's lack of success in the Wichita market. The district court thoroughly explored the evidence relating to HMOK's failure in its two opinions. *See* *Reazin I, 635 F. Supp. at 1300-01*; *Reazin II, 663 F. Supp. at 1376-1377, 1465-68*.

of the Rule of Reason under *section 1*; (3) monopolized, attempted to monopolize, and/or conspired to monopolize the health care financing and health care services market in violation of *section 2*; (4) violated section 7 of the Clayton Act, *15 U.S.C. § 18*; [42] and *(5)* interfered with prospective advantage in violation of Kansas law. [43] **[**90]** As the district court noted, "with the exception of the § 7 claim, all of the claims in the counterclaim are based in whole or in part on the allegation HCA, HCP and physicians in Wichita conspired to boycott HMOK 'as a condition and in connection with [the] negotiation and sale of Health Care Plus to HCA.'" *Reazin II, 663 F. Supp. at 1460* (quoting R.Vol. I, Tab 25, Answer & Counterclaim at 20-21). [44] The district court granted plaintiffs' motion for summary judgment on the entire counterclaim. In so doing, it characterized the counterclaim as "a defensive ploy, a maneuver, probably suggested and instigated by defense counsel, to divert attention from plaintiffs' complaint." *Reazin II*, 663 F. Supp. at 1461. **[**89]** It further observed that it addressed the motion for summary judgment "in the extraordinary posture of having received the documentary evidence and having heard, firsthand, the live testimony of the witnesses." *Id. at 1462*.

HN42[] Pursuant to *Fed.R.Civ.P. 56(c)*, summary judgment is appropriate when "there is no genuine issue of material fact and . . . the moving party is entitled to judgment as a matter of law." Under the Supreme Court's recent guidelines for the granting of summary judgment, ***HN43***[] summary judgment must be granted against a party "who fails to . . . establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." **[**91]** *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. ***HN44***[] For a plaintiff to avoid summary judgment, there must be sufficient evidence from which a jury could find for the plaintiff. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*. A mere "scintilla" of evidence is insufficient. ***HN45***[] We must, of course, construe the evidence and draw all inferences in a light most favorable to the nonmoving party. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*; *McKenzie v. Mercy Hosp., 854 F.2d 365, 367 (10th Cir. 1988)*; *Key Fin. Planning Corp. v. ITT Life Ins. Corp., 828 F.2d 635, 638 (10th Cir. 1987)*.

After carefully considering all of the evidence in the light most favorable to Blue Cross and HMOK, we affirm the grant of summary judgment in favor of plaintiffs **[*980]** for substantially the reasons set forth in the district court's thorough treatment of the counterclaim. *See* **[**92]** *Reazin II, 663 F. Supp. at 1459-83*.

ATTORNEY'S FEES AND COSTS

Neither Blue Cross nor plaintiffs devote more than one and one-half pages of their respective 50-page briefs to the issue of attorneys' fees. Blue Cross' challenges to the award of attorneys' fees and costs are therefore somewhat conclusory.

Blue Cross argues (1) the district court erred in awarding "all expenses claimed by plaintiffs (*e.g.*, expert witness fees), regardless of whether the expenses were allowable under *28 U.S.C. §§ 1821* and *1920*;" (2) the fee award improperly included fees to plaintiffs who were not prevailing parties; (3) plaintiffs failed to apportion their time among claims on which they prevailed and claims on which they did not or between prosecuting the main claim and defending the counterclaim; and (4) the fees were excessive for the work done.

HN46[] "An attorneys' fee award by the district court will be upset on appeal only if it represents an abuse of discretion." *Mares v. Credit Bureau of Raton, 801 F.2d 1197, 1201 (10th Cir. 1986)*; *see also* **[**93]** *Pennsylvania*

[42] Section 7 of the Clayton Act, *15 U.S.C. § 18*, prohibits acquisitions the effect of which "may be substantially to lessen competition, or to tend to create a monopoly."

[43] While Blue Cross listed it as an issue in its docketing statement, it does not brief the district court's grant of summary judgment on the interference with prospective advantage claim. We consider it abandoned.

[44] Blue Cross also argues the acquisitions violate *sections 1* and *2*, although the counterclaim itself was not completely clear on that point. Additionally, in the pretrial order, Blue Cross agreed that a remaining legal issue was "whether HCA acquired Wesley, Health Care Plus, and New Century in violation of section 7 of the Clayton Act." No mention was made of *sections 1* and *2*.

v. Delaware Valley Citizens' Council for Clean Air, 478 U.S. 546, 561, 92 L. Ed. 2d 439, 106 S. Ct. 3088 (1986). **HN47**[] "Findings on underlying questions of fact are subject to the clearly erroneous standard of review." Mares, 801 F.2d at 1201. Certain of Blue Cross' arguments are easily dismissed. Plaintiffs' Memorandum in Support of Plaintiffs' Application for Attorneys' Fees and Bill Costs, and supporting affidavits, specifically state that hours attributed to defense of the counterclaim were excluded. *See* Memorandum, R.Vol. 4, Tab 258 at 15; Affidavit of Joe Sims at 3; Affidavit of Donald R. Newkirk at 3. Furthermore, we see no need for Wesley specifically to apportion its time between claims on which it prevailed and on those on which it did not because Wesley was clearly a prevailing party under Supreme Court guidelines. *See* Texas State Teachers' Ass'n v. Garland Indep. School Dist., 489 U.S. 782, 109 S. Ct. 1486, 1492, 103 L. Ed. 2d 866 (1989) **[**94]** **HN48**[] ("A prevailing party must be one who has succeeded on any significant claim affording it some of the relief sought . . ."). It does not matter that Wesley did not prevail on every issue or every claim brought. *See id.; see also* Ramos v. Lamm, 713 F.2d 546, 556 (10th Cir. 1983) **HN49**[] ("If the plaintiff has obtained 'excellent results,' the attorney's fees should encompass all hours reasonably expended; no reduction should be made because the plaintiff failed to prevail on every contention: 'the result is what matters.'") (quoting Hensley v. Eckerhart, 461 U.S. 424, 435, 76 L. Ed. 2d 40, 103 S. Ct. 1933 (1983)). All of Wesley's claims arose out of a common core of facts. The relief sought by Wesley was to have Blue Cross' anticompetitive actions stopped and to recover damages suffered because of such actions. On that it succeeded.

Blue Cross argues the fee award improperly included fees for certain plaintiffs (i.e. New Century, Reazin and HCP) who were not "prevailing" parties. We reject this argument for the reasons set forth in the district court opinion. **[**95]** *See* Reazin II, 663 F. Supp. at 1455.

Blue Cross' argument about expert witness fees allowed as costs is somewhat conclusory. We assume Blue Cross argues that the total amount awarded, $ 168,227.25, must exceed the $ 30.00 per-day limit set forth in 28 U.S.C. § 1821(b). [45] **[**96]** That, Blue Cross argues, contravenes Crawford Fitting Co. v. J.T. Gibbons, Inc., 482 U.S. 437, 96 L. Ed. 2d 385, 107 S. Ct. 2494 (1987). [46]

[*981] The district court stated as follows **[**97]** concerning the expert witness fees:

> "Reasonable expert witness fees may be awarded if that expert testimony was reasonably necessary. Ramos, 713 F.2d at 559. Plaintiffs seek to recover $ 168,227.25 as expert witness fees paid to Dr. George Hay, Dr. Ray Davis, and William Guy. Each of these expert witnesses' testimony was indispensable for plaintiffs' recovery. These witnesses provided crucial testimony concerning central issues such as market definition, market power, and defendant's business practices and position in the market. They also provided invaluable foundation testimony regarding the nature of the health care industry and health care financing mechanisms. Their appearance and testimony was reasonably necessary; recovery of those fees is therefore granted."

---

[45] ***28 U.S.C. § 1920*** **HN50**[] provides that a federal court may tax as costs against the losing party certain items, including "fees and disbursements for . . . witnesses." ***28 U.S.C. § 1920(3)***. 28 U.S.C. § 1821 **HN51**[] defines the witness fees specified in ***section 1920(3)***. In addition to an attendance fee of $ 30.00 per day, section 1821 also permits a witness to recover for travel expenses to and from trial and provides a subsistence allowance if the witness must stay overnight to attend trial.

[46] In *Crawford Fitting*, **HN52**[] the Supreme Court held that "absent explicit statutory or contractual authorization for the taxation of the expenses of a litigant's witnesses as costs, federal courts are bound by the limitations set out in 28 U.S.C. § 1821 and ***§ 1920***." Id. at 445. Specifically, the Court held that Fed.R.Civ.P. 54(d) did not permit an award of expert witness fees in excess of the limits contained in 28 U.S.C. § 1821. Blue Cross argues that same rule applies to 15 U.S.C. § 15(a) permitting a prevailing antitrust plaintiff to recover "the cost of suit." Thus, section 15(a) cannot permit costs beyond those expressly permitted in 28 U.S.C. § 1821.

Plaintiffs respond that *Crawford Fitting* is limited to cases where a court invokes Rule 54(d). It says nothing about awards of costs under 15 U.S.C. § 15.

Reazin II, 663 F. Supp. at 1457. The district court thus appeared to award the fees as part of the award of attorneys' fees under section 4 of the Clayton Act, *15 U.S.C. § 15*. In *Ramos*, the case relied on by the district court, we specifically awarded, as part of an award of attorneys' fees under *42 U.S.C. § 1988*, **[**98]** "reasonable expert witness fees" if the witness' testimony was "reasonably necessary." *713 F.2d at 559*.

Crawford Fitting has, however, caused many courts to reconsider the propriety of taxing expert witness fees against the losing party. As indicated, the Court in *Crawford Fitting* specifically addressed only the authority of a federal court under *Rule 54(d)* to tax expert witness fees beyond the statutory limits contained in *28 U.S.C. §§ 1920* and *1821*. Nonetheless the Court employed broad language. "We will not lightly infer that Congress has repealed *§§ 1920* and *1821*, either through *Rule 54(d) or any other provision not referring explicitly to witness fees." Crawford Fitting, 482 U.S. at 445* (emphasis added). This circuit has noted, even after *Crawford Fitting*, that "in the appropriate case, expert witness fees may be reimbursed as part of an attorneys' fee award." *Furr v. AT&T Technologies, Inc., 824 F.2d 1537, 1550 (10th Cir. 1987)*. [47]

[99]** The narrower question before us in this case, however, is whether the expert witness fees were properly allowed in full as part of "the cost of suit, including a reasonable attorney's fee" under section 4 of the Clayton Act, *15 U.S.C. § 15*. This court has not specifically addressed that issue, either before or after *Crawford Fitting*. Among those courts which have addressed the question, it appears the majority do not allow such fees in excess of the amount allowed by *28 U.S.C. § 1821*. *See, e.g., Barber & Ross Co. v. Lifetime Doors, Inc., 810 F.2d 1276, 1282* (4th Cir.) ("we agree with the prevailing view that 'costs of suit' under § 4 [*15 U.S.C. § 15*] does not include expert expenses except in cases of exceptional circumstances"), *cert. denied*, *484 U.S. 823, 98 L. Ed. 2d 48, 108 S. Ct. 86 (1987)*; *Illinois v. Sangamo Constr. Co., 657 F.2d 855, 866 (7th Cir. 1981)* ("recovery of specific expenses pursuant to Section 4 of the Clayton Act [*15 U.S.C. § 15*] is governed by the recovery of costs under *Rule 54(d)* and *28 U.S.C. § 1920* **[**100]** "); *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 309 n.75 (2d Cir. 1979)* ("the only costs recoverable by a successful plaintiff in a private antitrust action suit are those normally **[*982]** allowable under *28 U.S.C. § 1920* and *Fed.R.Civ.P. 54(d)*."), *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*; *Ott v. Speedwriting Publishing Co., 518 F.2d 1143, 1149 (6th Cir. 1975)* ("the fees of expert witnesses are not included in the recoverable costs in an antitrust action"); *Seven Gables Corp. v. Sterling Recreation Org., 686 F. Supp. 1418, 1421 (W.D.Wash. 1988)* ("The court does not interpret the provision of the Clayton Act providing for recovery of attorney's fees as explicit statutory authorization for compensating plaintiffs for fees paid to experts beyond that authorized by the cost statutes"); *Arthur S. Langenderfer, Inc. v. S.E. Johnson, Co., 684 F. Supp. 953, 960 (N.D.Ohio 1988)* ***HN53***[] ("The costs recoverable under Section 4 of the Clayton Act are **[**101]** limited to those costs recoverable under *Fed.R.Civ.P. 54(b)* and *28 U.S.C. § 1920*"); *Int'l Wood Processors v. Power Dry, Inc., 598 F. Supp. 299 (D.S.C. 1984)*, *aff'd*, *792 F.2d 416 (4th Cir. 1986)*; *Beech Cinema, Inc. v. Twentieth Century Fox Film Corp., 480 F. Supp. 1195, 1198 (S.D.N.Y. 1979)*, *aff'd*, *622 F.2d 1106 (2d Cir. 1980)*; *see also Int'l Woodworkers v. Champion Int'l Corp., 790 F.2d 1174, 1180 (5th Cir. 1986)* ("a statute which provides only for an award of 'costs' or 'attorneys' fees' but which fails to address expert witness' fees will not be construed to authorize the taxing of expert witness fees in excess of the *§ 1821* amount"), *aff'd sub nom Crawford Fitting Co. v. J.T. Gibbons, Inc., 482 U.S. 437, 96 L. Ed. 2d 385, 107 S. Ct. 2494 (1987)*; *but see Hasbrouck v. Texaco, Inc., 631 F. Supp. 258 (E.D.Wash. 1986)* (allowing expert witness fees as costs in antitrust case), *aff'd in part and rev'd in part*, *879 F.2d 632 (9th Cir. 1989)*. We see no reason to depart from that prevailing view, and we find support for that **[**102]** view in *Crawford Fitting*. [48] Because we cannot tell from the record before us what proportion of the

[47] In several diversity cases, however, we have stated that "absent express statutory or contractual authorization for the taxation as costs the fees of a party's expert witness, federal courts are bound by the limitations set out in *28 U.S.C. §§ 1821* and ***1920***." *Miller v. Cudahy Co., 858 F.2d 1449, 1461 (10th Cir. 1988)* (citing *Crawford Fitting*), *cert. denied*, ***492 U.S. 926, 109 S. Ct. 3265, 106 L. Ed. 2d 610 (1989)***; *see also Chaparral Resources, Inc. v. Monsanto Co., 849 F.2d 1286 (10th Cir. 1988)*; *Cleverock Energy Corp. v. Trepel, 609 F.2d 1358, 1363 (10th Cir. 1979)*, *cert. denied*, ***446 U.S. 909, 64 L. Ed. 2d 261, 100 S. Ct. 1836 (1980)***.

[48] In reaching this conclusion, we are aware that the question of whether expert witness fees should be viewed as "costs" or as expenses of litigation recoverable as attorneys' fees has engendered some disagreement among courts. And, particularly in view of *Crawford Fitting*, we are aware of the hotly contested issue of whether expert witness fees are recoverable as part of the

expert witness fees awarded in this case exceeded the statutory limits of *28 U.S.C. §§ 1920* and *1821*, we remand to the district court for a recalculation of the expert witness fees taxable against Blue Cross.

[103]** Finally, Blue Cross argues the attorneys' fees awarded are "excessive." It asserts that (1) the district court erroneously awarded as reasonable "whatever fees HCA paid to plaintiffs' counsel," allegedly contrary to *Pennsylvania v. Delaware Valley Citizens' Council for Clean Air, 478 U.S. 546, 92 L. Ed. 2d 439, 106 S. Ct. 3088 (1986)*; (2) the fees awarded were four times the fees charged to Blue Cross; and (3) the hourly rates permitted greatly exceeded the hourly rates charged by counsel in the community for comparable work.

HN54[] "The benchmark for the awards under nearly all of . . . [the statutes awarding fees] is that the attorney's fee must be 'reasonable.'" *Id. at 562*; *Mares, 801 F.2d at 1201*. To determine what is a "reasonable" fee, the court must determine reasonable hours and reasonable rates for the work done. The district court carefully reviewed the hours spent on this case and determined that they were reasonable. We find no error in that determination.

The court then considered a reasonable rate for the hours spent. **[**104]** ***HN55***[] "The first step in setting a rate of compensation for the hours reasonably expended is to determine what lawyers of comparable skill and experience practicing in the area in which the litigation occurs would charge for their time." *Ramos, 713 F.2d at 555*; *see also* *Blum v. Stenson, 465 U.S. 886, 895, 79 L. Ed. 2d 891, 104* ***[*983]*** *S. Ct. 1541 (1984)*. [49] As the district court noted, the hourly rates requested and awarded to some of plaintiffs' attorneys "represent the actual current billing rates for the Jones, Day attorneys who represented them." *Reazin II, 663 F. Supp. at 1453*. Local Wichita counsel sought and received lower hourly rates than their normal billing rates. *Id.*

[105]** A lawyer's customary billing rate is not a conclusive factor. *See* *Spulak v. K Mart Corp., 894 F.2d 1150, 1990 U.S. App. LEXIS 581 (10th Cir. 1990)*; *Ramos, 713 F.2d at 555*. The district court specifically found that:

> "There is abundant evidence from which I find Wichita attorneys do occasionally charge $ 200.00 an hour or more for complex litigation. With all my respect and endearment for Wichita attorneys and law firms, it remains true there is neither a lawyer nor a firm in this town which could have devoted to this case the timely expertise, experience, and manpower put forth by Jones, Day."

Reazin II, 663 F. Supp. at 1454. We decline to disturb those findings. We therefore affirm the determination of hourly rates awarded to plaintiffs' attorneys.

Having concluded that the district court properly determined that both the number of hours requested and the hourly rates were reasonable, and finding no other reason to disturb the district court's award, we affirm the award of attorneys' fees, with the exception that we remand to the district court to recalculate the expert witness fees awarded.

CONCLUSION

[106]** We have carefully considered the multitude of arguments made by the parties in this appeal, addressing those we deemed appropriate. For the reasons stated in this opinion, we affirm the judgment of the district court in its entirety, with the sole exception that we remand the award of expert witness fees for further findings.

---

attorneys' fees a prevailing party may recover under *42 U.S.C. § 1988*. *Compare* *Friedrich v. City of Chicago, 888 F.2d 511 (7th Cir. 1989)* *with* *West Virginia Univ. Hosps., Inc. v. Casey, 885 F.2d 11 (3d Cir. 1989)*, *cert. granted*, 494, ***110 S. Ct. 1294, 108 L. Ed. 2d 472 58 U.S.L.W. 3545 (1990)***. Although this circuit has held that such expert witness fees can be included in an award of attorneys' fees under *42 U.S.C. § 1988*, we decline in this case to extend that reasoning to section 4 of the Clayton Act.

[49] In *Ramos*, we further stated that "absent more unusual circumstances than we see in this case, the fee rates of the local area should be applied even when the lawyers seeking fees are from another area." *713 F.2d at 555*. We thus contemplated the possibility that "unusual circumstances" might warrant a departure from local hourly rates. The district court in this case found such "unusual circumstances."

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN1[] **Jurisdiction, In Rem & Personal Jurisdiction**

Where the necessary parties are before a court of equity, it is immaterial that the res of the controversy, whether it be real or personal property, is beyond the territorial jurisdiction of the tribunal. It has the power to compel the defendant to do all things necessary which he could do voluntarily, to give full effect to the decree against him. Further, a U.S. court has the ability to order an individual over whom it has personal jurisdiction to do an act, or refrain from doing an act, abroad; and such an order does not involve a per se invasion of the sovereignty of the foreign country.

Trademark Law > ... > Infringement Actions > Jurisdiction > General Overview

Trademark Law > ... > Remedies > Equitable Relief > General Overview

HN2[] **Infringement Actions, Jurisdiction**

The Lanham Act (Act) confers broad jurisdictional powers upon courts of the United States. The district courts of the United States are granted jurisdiction over all actions arising under the Act, § 39, *15 U.S.C.S. § 1121*, and can award relief which may include injunctions, according to the principles of equity, to prevent the violation of any registrant's rights.

Civil Procedure > Judgments > Relief From Judgments > General Overview

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Jurisdiction

HN3[] **Jurisdiction, Jurisdictional Sources**

Generally, in determining whether extraterritorial jurisdiction should be exercised, multi-step analysis has been devised. Courts consider the following factors: (1) Degree of conflict with foreign law or policy; (2) Nationality of the parties; (3) Relative importance of alleged violation of conduct here compared to that abroad; (4) Availability of remedy abroad and pendency of litigation there; (5) Existence of intent to harm or affect American commerce and its foreseeability; (6) Possible effect upon foreign relations if court exercises jurisdiction and grants relief. (7) If relief is granted, whether party will be placed in position of being forced to perform an act illegal in either country or be under conflicting requirements by both countries; (8) Whether court can make its order effective; (9) Whether order for relief would be acceptable in this country if made by foreign nation under similar circumstances; and (10) Whether treaty with affected nations has addressed issue.

Contracts Law > Contract Interpretation > General Overview

HN4[] **Contracts Law, Contract Interpretation**

Where all parties adopt and act on a certain construction of a contract, there is no better extrinsic evidence of their intention.

Trademark Law > ... > Factors for Determining Confusion > Similarity of Marks > General Overview

HN5[] **Factors for Determining Confusion, Similarity of Marks**

See *15 U.S.C.S. § 1114(1)*.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN13[] **Sherman Act, Claims**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, provides that every contract, combination in the form of trust, or otherwise, or conspiracy, in restraint of trade of commerce among the several states, or with foreign nations, is declared to be illegal. To establish a violation of the Sherman Act (the Act) *§ 1*, a party bringing the claim must show: (1) the existence of a conspiracy or concerted action; (2) that the conspiracy resulted in adverse, anti-competitive effects within the relevant product and geographic market; (3) that the objects of and conduct pursuant to the conspiracy were illegal; and (4) that the party bringing the claim must have been injured as a result of the conspiracy. Concerted action is the essence of a *Section 1* claim.

Antitrust & Trade Law > Sherman Act > Claims

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Sherman Act, Claims**

Mere speculation as to the existence of a conspiracy, without more, is not sufficient to establish a violation of the Sherman Act (Act) *§ 1*, *15 U.S.C.S. § 1*. Further, it is well-settled that *section 1* of the Act does not proscribe independent action but only concerted action.

Antitrust & Trade Law > Sherman Act > General Overview

Trademark Law > ... > Infringement Actions > Defenses > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN15[] **Antitrust & Trade Law, Sherman Act**

A plaintiff has a right to protect its marks and not face the charge of antitrust violations. Good faith efforts to enforce trademark rights do not violate the Sherman Act, *15 U.S.C.S. § 1*. Indeed, vigorous enforcement of trademark rights is exactly the sort of aggressive competition and promotion that ***antitrust law*** seeks to protect.

Opinion

[*702] MEMORANDUM OPINION

JAMES C. CACHERIS, UNITED STATES DISTRICT JUDGE.

* Counsel of Record.

Plaintiff Blue Cross and Blue Shield Association ("Association") filed this action on July 7, 1989 against the defendant Group Hospitalization and Medical Services, Inc. ("D.C. Plan") seeking a Declaratory Judgment and injunctive relief under the Lanham Trade-Mark Act, as amended, *15 U.S.C.* **[**2]** *§ 1114 et seq.*

Defendant D.C. Plan has denied plaintiff's allegations and has raised affirmative defenses of laches, estoppel, selected enforcement and waiver. In addition, in its Answer the D.C. Plan has asserted a counterclaim which alleges tortious interference with contractual relations and prospective **[*703]** business relations as well as a violation of the Sherman Act, *15 U.S.C. § 1*.

For reasons set forth below, Judgment is entered in favor of the Association on its Complaint for Declaratory Injunctive Relief. Judgment is also entered in favor of the Association on the counterclaims brought against it by the D.C. Plan.

I. *Findings of Fact*

After reviewing the pleadings, authorities, and arguments of counsel, the court finds the facts to be as follows:

The court adopts the corrected Stipulation of Uncontested Facts.

Plaintiff Blue Cross and Blue Shield Association ("Association") is a not-for-profit membership corporation organized and existing under the laws of the State of Illinois with its principal place of business in Chicago, Illinois. The Association was formed in 1982, through the merger with the former Blue Cross Association and Blue Shield Association. (Uncontested Fact **[**3]** para. 1)

The purposes of the Association are, *inter alia,* to promote the betterment of public health and security, to secure the widest public acceptance of the principles of voluntary nonprofit prepayment of health services, to protect the Blue Cross and Blue Shield names and symbols, and to develop and maintain membership standards for the corporation. (Plaintiff's Ex. 5).

Bernard R. Tresnowski is President and Chief Executive Officer of the Association. (Trial Transcript ("Tr.") Tr. 77).

The Association is not a health underwriter and does not sell health insurance products or services. Rather, the Association provides a variety of support programs and services to Member Plans which, in turn, sell prepaid health care financing insurance services. (Tr. 83, 85).

The support programs and services provided by the Association include lobbying and the operation of the Inter-Plan Services Benefit Bank. [1] Pursuant to the provider contract, the host Plan submits a claim to the Inter-Plan Bank, which operates as a clearing house; the home Plan is ultimately responsible for reimbursing the host Plan through the Bank. (Tr. 113).

[4]** The Association has eighty-six Regular, Associate, and Affiliate Members. Each member is a not-for-profit hospital and/or medical surgical benefits plan that offers health care financing and related services to the public. There are seventy-four Regular Members of the Association located in the U.S. and Puerto Rico. Two Associate Members are located in Canada and Jamaica. Three Affiliated Members are located in Australia, Canada and the United Kingdom. (Plaintiff's Ex. 7).

The Blue Cross and Blue Shield word and design marks are federally registered in the Association's name with the United States Patent and Trademark Office. (Stipulation No. 4, Tr. 90-91).

Defendant Group Hospitalization and Medical Services, Inc. ("D.C. Plan") is a not-for-profit corporation established by an act of Congress, with its principal place of business in the District of Columbia. The D.C. Plan was formed in

---

[1] The Inter-Plan Bank allows a subscriber of one Plan to travel anywhere in the U.S. and receive covered services from another plan. The Association, through the Inter-Plan Bank, facilitates payment between the two plans. (Tr. 84).

1985 through the merger of Group Hospitalization, Inc. and Medical Services of the District of Columbia. (Uncontested Facts para. 2; Defendant's Ex. 1410).

The D.C. Plan is a Member Plan of the Association. (Uncontested Facts para. 3).

Joseph P. Gamble is the President and Chief Executive Officer **[**5]** of the D.C. Plan. (Tr. 663).

The parties have been involved in previous litigation. There was a lawsuit in this court styled *Group Hospitalization and Medical Services, Inc. v. Blue Cross and Blue Shield of Virginia,* CA No. 85-1123-A (E.D. Va. April 8, 1986). Proceedings here before Judge Bryan resulted in an Order which defined the geographic scope of the D.C. Plan's license to use the Blue Cross and Blue Shield Marks.

A. *Origin and History of the Blue Cross and Blue Shield Marks*

The first prepaid hospital plan, which eventually developed into a Blue Cross Plan, began at Baylor University in 1929.

[*704] The American Hospital Association ("AHA") sponsored this Plan and other subsequent Plans, operating as a clearing-house and trade association for the Plans. (Plaintiff's Ex. 3; Tresnowski, p. 92).

The "Blue Cross" was adopted in 1939 as the official emblem of those Plans that conformed to the AHA's approval standards. (Plaintiff's Ex. 3).

On March 1, 1954, the AHA and approved individual Plans entered into an Agreement for use of the Blue Cross name and design ("the Mark"). Pursuant to this Agreement, the Plans assigned their rights in the Blue Cross Mark to the AHA. The stated **[**6]** purpose of this Agreement was to create a single owner of all rights in the Blue Cross Mark for the benefit and protection of all the Plans. The Agreement provided as follows:

> [AHA] and the Plans recognize that there should be a sole, exclusive ownership and control of all rights, as hereinafter set forth, to the words Blue Cross and the design of a blue cross, in order that the words Blue Cross and/or the design of the blue cross may not be used in such a manner as to deceive the public, but to maintain and protect, on behalf of all parties hereto, the good will symbolized by the words Blue Cross and the design of a blue cross."
>
> The Plans further provided:
>
> "The words Blue Cross and the design of a Blue Cross are known and recognized in the United States and in foreign countries as designating plans for prepayment of hospital care and related services, sponsored and approved by [AHA] under an approval program."
>
> The Agreement also provided:
>
> "All right, title and interest in and to the words Blue Cross and the design of a blue cross, as service marks, for a prepayment plan for hospital care and related services, and the words Blue Cross in and as a part of the trade name **[**7]** and/or corporate title of said Plans . . . ."

The Agreement further provided that the rights assigned to AHA included the right to hold the registered trade name and service mark.

The Member Plans acknowledged that the Agreement applied to all ownership rights when they agreed that:

> [AHS] shall hold and exercise any and all rights of ownership in and to the words Blue Cross and/or a design of a blue cross, as service marks, whether or not derived from this agreement . . . ."

The Agreement provided that the transfer of the Blue Cross name was in trust to AHA. (Plaintiff's Ex. 3).

On June 30, 1972, pursuant to the Blue Cross Ownership Agreement, the AHA assigned all of its rights in the Blue Cross Mark to the Blue Cross Association ("BCA"). The Agreement confirms that, as between the contracting parties, Blue Cross Association owns all the rights in the Mark. In this Agreement, the Member Plans explicitly affirmed the assignment of rights made in the March 1, 1954 Agreement. (Plaintiff's Ex. 4, para. 1). The AHA, with the express consent of the Plans, then assigned all of these rights, without geographic limitation, to the Blue Cross Association. (Plaintiff's Ex. 4, para. 2).

Also on **[**8]** June 30, 1972, each Member Plan entered into a License Agreement with the BCA, which granted exclusive rights to each Member Plan to operate within its own defined geographical area. The rights of the BCA in the Blue Cross Mark were transferred to the Association upon the merger of Blue Cross Association and Blue Shield Association in 1982. (Defendant's Ex. 946).

The origin and history of the "Blue Shield" name and mark parallel that of the "Blue Cross." On December 1, 1952, pursuant to the Agreement Relating To The Collective Service Mark "Blue Shield," all of the Blue Shield Plans, including the predecessor to what is now the D.C. Plan, transferred their rights in the Blue Shield name and mark to the Blue Shield Medical Care Plans, a predecessor to the Association. (Plaintiff's Ex. 2). The ownership rights in the Blue Shield name and Mark passed to Blue Shield Association ("BSA") in 1977 and then to the Association upon **[*705]** the merger of Blue Cross and Blue Shield in 1982.

The Association owns twenty-three United States registrations for the Blue Cross and Blue Shield names and symbols ("the Marks"). The D.C. Plan has admitted that the Association owns these U.S. registrations for the **[**9]** Marks. (Plaintiff's Ex. 8; Answer).

B. *History and Current Status of the Association's Foreign Registration Efforts*

After the assignment of rights to the American Hospital Association pursuant to the 1954 Agreement, the AHA filed applications to register the Marks in foreign countries. (Plaintiff's Ex. 728, 869).

In the 1950's, 1960's and early 1970's, AHA registered the Blue Cross Mark throughout Latin America, the Caribbean and Europe. By June 30, 1972, AHA held thirty-two registrations in twenty-five countries. (Plaintiff's Ex. 10A).

Pursuant to the 1972 Ownership Agreement, the AHA, with the approval of the Member Plans, assigned these foreign registrations to BCA. The BCA continued to register the Blue Cross Mark abroad. Following the merger of BCA and BSA, the Association has continued these foreign registration efforts. (Plaintiff's Ex. 1104, 1108).

As of January 19, 1990, the Association held 192 registrations in fifty-one foreign countries. [2] (Plaintiff's Ex. 10B). In addition, as of January 19, 1990, the Association has 241 applications pending in another 48 foreign countries. (Plaintiff's Ex. 10).

[10]** The Association's foreign registration and application efforts have been known and, with the exception of the D.C. Plan, supported by the Member Plans. (Plaintiff's Ex. 13, 14).

From the mid-fifties to the present, the Association and its predecessors have protected the Mark against third-party infringers operating in foreign countries. For example, the Association obtained preliminary injunctive relief against a clinic, located in India, from operating under the name Blue Cross and using the Blue Cross symbol. (Plaintiff's Ex. 565). The Association has also pursued infringements in Australia, Guatemala, and Hong Kong. (Plaintiff's Ex. 182, 187, 190).

C. *The Association's Direct Involvement with the D.C. Plan: The Federal Employee Program*

Since 1960, the Association has operated a government-wide service benefit plan for federal employees (the "FEP") pursuant to a contract with the United States Civil Service Commission. Since the creation of the FEP, the

---

[2] These include Algeria, Argentina, Australia, the Bahamas, Belgium, Bermuda, Bolivia, Brazil, Burundi, Chile, Columbia, Costa Rica, Cuba, the Dominican Republic, El Salvador, Ethiopia, France, Guam, Guatemala, Guinea, Honduras, Hong Kong, Italy, Jamaica, Japan, Jordan, Kenya, South Korea, Liberia, Liechtenstein, Luxembourg, Malawi, Mexico, Morocco, the Netherlands, the Netherlands Antilles, Norway, Cameroon, Panama, Paraguay, Peru, the Philippines, Poland, Portugal, Puerto Rico, Rwanda, the Seychelles, South Africa, Southwest Africa (Namibia), Switzerland, Transkei, Tunisia, Turkey, Uruguay, U.S.S.R., Zaire, and Zimbabwe. (Plaintiff's Ex. 10B).

Association has subcontracted (through a Plan Participation Agreement) with the D.C. Plan to underwrite and service the FEP for federal employees working in the District of Columbia and abroad. (Plaintiff's Ex. 17).

The Association **[**11]** and the D.C. Plan have also entered into an Operations Center Agreement which requires the D.C. Plan to act as a processing facility for the Plans that participate in the FEP. The Operation Center Agreement provides that

> All responsibility and authority for establishing and changing policies, practices and procedures for the administration of the Program other than practices and procedures relating to the internal operations of GHI [the D.C. Plan] reside in the Associations or their delegate, the Board.

(Plaintiff's Ex. 18).

The Association distributes a variety of materials overseas to promote the FEP. These materials display the Blue Cross and **[*706]** Blue Shield Marks, with the explicit legend "Registered Marks Blue Cross and Blue Shield Association." (Plaintiff's Ex. 204-31).

The Association also publishes newsletters providing information regarding the FEP. The newsletters have been sent to FEP subscribers living abroad since 1981. The newsletters bear the Blue Cross and Blue Shield Marks with either the name "Blue Cross and Blue Shield Association," or "Reg. Marks of the Blue Cross and Blue Shield Association." (Plaintiff's Ex. 235, 303, 532). In addition, since 1982 the Association **[**12]** has sent a package of materials to all new FEP subscribers which includes a "welcome letter," brochure and pamphlet. The materials bear the Marks and name "Blue Cross and Blue Shield Association." (Plaintiff's Ex. 232, 233, 236).

The D.C. Plan also distributes materials bearing the Marks to FEP subscribers in foreign countries, including:

(i) Identification cards bearing the Blue Cross and Blue Shield names and symbols and the Association's name to all new federal employees. (Plaintiff's Ex. 242-46);

(ii) FEP Overseas Claims Forms and checks in payment of FEP overseas claims, both bearing the Blue Cross and Blue Shield Marks. (Plaintiff's Ex. 237-40, 241);

(iii) A brochure entitled "A Guide to Your Explanation of Benefits." This brochure displays the Blue Cross and Blue Shield names and symbols and the legend "Registered Marks Blue Cross and Blue Shield Assn." (Plaintiff's Ex. 234).

The D.C. Plan has admitted that these foreign uses of the Marks in connection with the FEP inure to the benefit of the Association. (Gamble Dep. at 189-90).

D. *Foreign Involvement of the Association and Foreign Recognition of the Marks*

The Association and its predecessors have used the Marks in a **[**13]** variety of ads appearing in foreign publications, such as *Business Insurance, The International Herald Tribune, Fortune Magazine,* and *Forbes* magazine. (Plaintiff's Ex. 128, 144, 136, 142).

The Association sponsored the 1988 U.S. Olympic Team and used the Blue Cross and Blue Shield Marks to advertise its sponsorship. (Plaintiff's Ex. 145-49).

A variety of publications have published articles that discuss the Association, such as *The International Herald Tribune, Financial Times, The Guardian, The Economist,* and *Facts on File.* (Plaintiff's Ex. 150-57).

The Association has, since August 1983, published a quarterly journal, *Inquiry,* which is distributed throughout the world. (Plaintiff's Ex. 106-10, 181).

The Association is a member of the International Federation of Voluntary Health Service Funds ("IFVHSF") which is comprised of 160 independent non-profit, prepaid health plans from around the world. (Plaintiff's Ex. 50, 1110). Representatives of the Association and its Member Plans have attended each of IFVHSF's biennial meetings. (Plaintiff's Ex. 54-65).

The IFVHSF has distributed several publications that contribute to the goodwill and international fame of the **[**14]** Marks of the Association. For example, in June 1976, IFVHSF began to distribute a publication called *"Bulletin"* which contained articles about the Association and its Member Plans. (Plaintiff's Ex. 96-99).

IFVHSF also publishes a regular newsletter which often contains articles describing recent activities of the Association. Within these articles are references to the Association's ownership and use of the Marks. (Plaintiff's Ex. 71-91).

IFVHSF members from around the world have traveled to the U.S. to attend the Association's training programs. (Plaintiff's Ex. 72).

E. *The D.C. Plan's Foreign Registration Strategy*

In 1985, the D.C. Plan decided to secretly register the Marks for its own benefit and use in foreign countries. On October 1, 1985, Richard Groppe ("Groppe") was employed by the defendant in its International **[*707]** Division. He assumed responsibility for secretly registering the Blue Cross and Blue Shield Marks in foreign countries. (Plaintiff's Ex. 271).

On October 15, 1985, the D.C. Plan filed its first application in Barbados and, on October 28, 1985, filed additional applications in Spain and the United Kingdom. (D.C. Plan's Answer to 3rd Set of Interrogatories **[**15]** # 1; Plaintiff's Ex. 30, 31).

By the end of 1985, the D.C. Plan had filed ten applications to register the Marks in ten countries, and, by the first half of 1986, the D.C. Plan had filed another fifteen applications to register the Marks. (Plaintiff's Ex. 30, 31).

On August 4, 1986, Groppe sent a memorandum to Gamble on the status of the D.C. Plan's secret registration strategy. The memo stated that the D.C. Plan would inform the Association of its foreign registration efforts after they had been completed. However, the memorandum also indicated Groppe's belief that the D.C. Plan's secret strategy would be discovered by the Association before the foreign registrations were achieved. On this point the memorandum stated, "Before GHMSI can secure all trademark registrations we want worldwide, BSBSA will discover our activity." (Plaintiff's Ex. 35).

On June 21, 1985, in a letter to all Member Plans and the Association describing his overseas plans, Gamble gave no indication that the D.C. Plan was planning to register the Marks in its own name in foreign countries. (Plaintiff's Ex. 309).

In the spring and summer of 1986, the D.C. Plan sent a series of letters to the other Member Plans, encouraging **[**16]** their participation in the D.C. Plan's international hospital network and claims center. In these letters, the D.C. Plan never suggested that it was registering the Marks in its own name in foreign countries. Quite to the contrary, the D.C. Plan enclosed materials with these letters which acknowledged the Association as the owner of the Marks. (Plaintiff's Ex. 310, 292, 291).

In the August 4, 1986 memo, Groppe discussed the possibility that the Association would form a task force to study the international protection of the Marks and suggested that the D.C. Plan employ a strategy to block the formation of such a task force or at least neutralize its impact. (Plaintiff's Ex. 35).

In response to a request from the Association for additional information on the nature of the D.C. Plan's foreign programs, Gamble sent a letter on October 7, 1986 to Tresnowski failing to disclose that the D.C. Plan had filed applications to register the Marks abroad. (Plaintiff's Ex. 315). Gamble enclosed brochures that the D.C. Plan used to promote its international activities. The brochures identify the Association as the owner of the Marks. (Plaintiff's Ex. 291-92). Each of these brochures explicitly bore **[**17]** the legend, "Reg. Marks of the Blue Cross and Blue Shield Association." This was obviously an attempt by the D.C. Plan to conceal its foreign registration efforts from the Association.

The Association was unaware in 1985 and in the first part of 1986 that the D.C. Plan had undertaken a program to register the Blue Cross Blue Shield Marks, on its own, outside the United States. (Tr. 210).

In late 1986, after unsuccessfully attempting to register the Marks in the United Kingdom, the Association learned that the reason for the rejected application was because the D.C. Plan had already filed an application for the Marks in the United Kingdom in its own name. (Plaintiff's Ex. 318).

The D.C. Plan ignored the Association's numerous requests to withdraw its United Kingdom application and assign it to the Association. (Plaintiff's Ex. 319-321, Gamble Dep. at 573-74).

Thereafter, the Association took prompt steps to oppose the D.C. Plan's unilateral foreign registration efforts whenever they came to light and formed an International Service Mark Task Force to develop a program to protect all the Plans. (Plaintiff's Ex. 330).

In October 1986, the Association discovered that the D.C. Plan had **[**18]** also filed applications to register the Marks in Spain. The D.C. Plan failed to provide any information **[*708]** in response to questions from the Association concerning the Spanish registration efforts. (Plaintiff's Ex. 330).

On November 9, 1987, Tresnowski wrote Gamble regarding the Association's applications in Europe, Latin America, and elsewhere, as well as the D.C. Plan's own registration efforts in Bolivia, Benelux, Chile, Colombia, Denmark, Haiti, Italy, Paraguay, Spain, the United Kingdom, Uruguay, and Venezuela. In the letter, Tresnowski advised Gamble that the D.C. Plan's attempt to register the Marks in its name was a violation of the Ownership and Licensing Agreement. (Plaintiff's Ex. 322). The D.C. Plan never responded to this letter.

In 1987, the Association learned of the use of the Marks by the D.C. Plan in connection with the offering of a health benefits plan in Latin America, pursuant to an arrangement with Universal Insurance Broker, Corp. (Plaintiff's Ex. 324, 380).

The D.C. Plan's arrangement with Universal Insurance Broker, Corp. ("Universal") was evidenced by a brochure which espoused the benefits of this health care program. One of the major advantages to this Program, **[**19]** according to the brochure, was access to the "Recognized Blue Cross and Blue Shield ID card." In this vein, the brochure continued by stating that "a Blue Cross and Blue Shield Card helps you gain access to over 7,000 hospitals in the U.S. and around the world that participate in the Blue Cross and Blue Shield system." The brochure, however, did not mention that the Association and the Member Plans opposed this entire arrangement. (Plaintiff's Ex. 324).

The Association objected to the D.C. Plan's use of the Marks in connection with the arrangement with Universal, In response, the D.C. Plan attempted to conceal its activities and sought to delay the Associations investigation. (Plaintiff's Ex. 323, 324, 325).

On July 10, 1987, the Association reiterated its position to Universal that the Association owns the Marks worldwide and that the D.C. Plan was not authorized to use the Marks outside the U.S. (Plaintiff's Ex. 326).

Universal forwarded the Association's July 10, 1987 letter to the D.C. Plan. In an internal memorandum from Kathleen Flynn (head of the D.C. Plan's Latin American efforts) to Groppe, Flynn relayed the suggested strategy of Jackie Saue, D.C. Plans legal counsel. The **[**20]** memorandum stated

> "She [Saue] would like [Universal] to send another 'innocent' letter requesting additional information regarding Treaty of Paris and the Nat'l Assn's trademark filings in *specific* countries in Latin America. She feels that it would (1) buy us some time and (2) perhaps help [the D.C. Plan] find out more about where Nat'l Ass'n has filed for trademark."

(Plaintiff's Ex. 327). (Emphasis in original).

In January 1988, Universal asked the D.C. Plan whether Universal could publicize its relationship with the D.C. Plan in the Miami, Florida area. (Plaintiff's Ex. 328). The D.C. Plan responded that it would not be acceptable to publicize within the U.S. because the Association was monitoring the D.C. Plan. The letter stated:

> As you are aware, the Blue Cross and Blue Shield National Association is monitoring our relationship with you. We do not want to create any situations which would allow them to take legal action against either Universal Insurance Broker (UIB) or BCBSNCA in the State of Florida or anywhere else in the continental United States.

(Plaintiff's Ex. 329).

In October 1988, the D.C. Plan considered opening up a subsidiary to operate as a direct insurance **[**21]** company in Barbados. The D.C. Plan wished to conceal the Barbados initiative from the Association because the Barbados subsidiary would be a for-profit company and would use the Marks. (Plaintiff's Ex. 521).

In March 1987, the D.C. Plan entered into an agreement with a Venezuelan insurance group, Grupo Consolidado. The Grupo Consolidado program provided for the distribution of identification cards bearing the Blue Cross and Blue Shield Marks to **[*709]** Venezuelan subscribers. Pursuant to a marketing survey seeking to determine Venezuelan familiarity with the Blue Cross and Blue Shield Marks, Grupo Consolidado found that Blue Cross and Blue Shield ". . . . is widely known from an advertising standpoint. Most of the group believe it is a large insurance company operating in the USA." (Plaintiff's Ex. 161).

In 1987, the D.C. Plan entered into an agreement with a Mexican company, Grupo Nacional Provencial ("GNP"), to offer health insurance in Mexico under the Blue Cross and Blue Shield Marks. This program included the use of Blue Cross and Blue Shield identification cards that could be brought to the U.S. to present to hospitals anywhere in the country. During negotiations with GNP, the D.C. Plan **[**22]** clearly represented itself as authorized by the Association to enter into such an agreement. For example, in a "pitch" letter from Groppe to GNP, it was stated that

> the Blue Cross and Blue Shield system is the largest provider of health care insurance in the United States. Nearly one half of the U.S. population receives its health care coverage through Blue Cross and Blue Shield. We believe these services offer unique advantages to our members and allow us to operate as a very successful insurance company in the American and international marketplace.

(Plaintiff's Ex. 444).

In May 1988, the D.C. Plan entered into an agreement with a French health care provider, Federation Nationale de la Mutualite Francaise ("FNMF"). In a press release issued in the U.S., both the D.C. Plan and FNMF indicated that the purpose of their agreement was to issue Blue Cross and Blue Shield identification cards to members of the FNMF in France, allowing French vacationers "to use America's Blue Cross and Blue Shield card to pay for hospital care when they need it." (Plaintiff's Ex. 426). FNMF stated in a press release, "Our subscribers will be able to access the Blue Cross and Blue Shield participating **[**23]** hospitals worldwide." (Plaintiff's Ex. 426).

In 1989, the D.C. Plan began two new programs in France through a French insurance company, GAN. The programs were called "Plan Sante" and "Remy Martin." Both plans included the issuance of Blue Cross and Blue Shield identification cards which could be used in the U.S. (Plaintiff's Ex. 344, 389). A brochure issued by these plans indicated that "Today, Blue Cross and Blue Shield is the most important private provider on a worldwide scale for health related risks: 34% of the American market, 110 million members world-wide." The brochure also indicated that the organization has the status of a mutual insurance company, operating as a federation of 76 Blue Cross and Blue Shield companies across the U.S. -- all of which may be accessed via a single common card. (Plaintiff's Ex. 395).

In September 1988, the D.C. Plan entered into a contract with a Japanese insurance company, Yasuda Fire and Marine Insurance Company ("Yasuda"). (Plaintiff's Ex. 365). Under the terms of the contract, the D.C. Plan would provide services for the Yasuda subscribers throughout the entire U.S. The contract also provided that an identification card bearing the Blue **[**24]** Cross and Blue Shield Marks would be issued to Yasuda subscribers for use in the United States. (Plaintiff's Ex. 365).

Yasuda thought it was dealing with the Blue Cross and Blue Shield Association, and not merely one of its Member Plans. For example, the President of Yasuda, in remarks made at a "signing ceremony," stated, "It is [with] great pleasure for me to see [that] our business tie-up with Blue Cross Blue Shield, the largest medical treatment supply organization in the U.S.A., has been realized. (Plaintiff's Ex. 440).

This belief of Yasuda was not unfounded -- indeed it was purposefully cultivated by the D.C. Plan. For example, after being asked numerous questions by Yasuda concerning the D.C. Plan's relationship with the Association, Gregory Kryza (the D.C. Plan's Regional Director for the Pacific Rim) ("Kryza") wrote in an internal memorandum:

> Rather than become involved in this kind of quizzing, I decided to finesse them and **[*710]** gave them a 10 minute briefing on Blue Cross and Blue Shield with particular emphasis on the high technology that is used in claims adjudication, the state of the art techniques that are used for cost containment and the hospital network both inside **[**25]** and outside the United States. (Plaintiff's Ex. 435).

The D.C. Plan also wished to conceal from other Member Plans and the Association its deal with Yasuda. For example, a November 1988 memorandum to Kryza from Sudhir Vasudeva of the D.C. Plan discussed whether to inform other Member Plans and the Association of the D.C. Plan's agreement with Yasuda. Vasudeva advised against such notification, citing the need to maintain low advertising levels. (Plaintiff's Ex. 334).

On October 20, 1989, the Association wrote Yasuda indicating that the D.C. Plan was illegally operating in Japan and elsewhere. (Plaintiff's Ex. 500).

In February of 1989, the D.C. Plan entered into a program with a British company, Western Provident Association ("WPA"). A brochure touting this venture declared that subscribers would have access to "over 90% of all hospitals in the U.S. and Canada, and hospitals and clinics in cities and towns in over 40 other countries." (Plaintiff's Ex. 446).

Following the consummation of the WPA-D.C. Plan joint venture, a February 25, 1989 article in the *London Times* stated that the WPA "has teamed up with the U.S. Blue Cross and Blue Shield schemes to cover 90 percent of U.S. **[**26]** and Canadian hospitals." (Plaintiff's Ex. 448).

On March 15, 1989 the Association, through British counsel, wrote to WPA indicating its opposition to this "unauthorized" initiative and requesting that it be ceased within seven days of the date of the letter. This letter was also sent to Gamble at the D.C. Plan. No response was ever received by the Association from either party. (Plaintiff's Ex. 496).

Effective January 8, 1988, the D.C. Plan entered into a contract with the Kupat Holim Health Insurance Institution of Israel ("Kupat Holim"). (Defendant's Ex. 728; Gamble at 725). Under the terms of the Agreement, the Kupat Holim hospitals would become members of the D.C. Plan's International Hospital Network.

On February 18, 1988, a Chicago newspaper contained an article announcing an agreement between Blue Cross/Blue Shield and two Israeli hospitals. No mention was made of the D.C. Plan in the article. (Plaintiff's Ex. 423).

On August 2, 1989, the Association, through local counsel in Tel Aviv, Israel, wrote to Kupat Holim requesting that they cease the unauthorized use of the Marks. (Plaintiff's Ex. 449). No response was received by the Association to this letter.

F. *Efforts By* ***[**27]*** *The Association To Protect The Marks Abroad*

The Association has filed 103 oppositions or cancellations in twenty-two countries to combat the D.C. Plan's secret registration program. The Association has obtained favorable rulings in four countries. (Plaintiff's Ex. 330).

The Association formed the International Service Mark Task Force ("Task Force") in April of 1987 to develop a comprehensive program to facilitate the use of the Marks abroad as well as to protect the Marks for all Plans. In June 1987, Tresnowsky sent a letter to all Plan CEO's regarding the development of a procedure which will provide protection of "our names and Marks if and when they are used in foreign countries." (Plaintiff's Ex. 20; Tr. 226-27).

The Task Force sent Gamble three direct invitations, including a request to fill out a Plan Survey, soliciting his input as to foreign registration efforts. (Plaintiff's Ex. 22, 24, 26.) Gamble did not participate in or respond to these inquiries. (Tr. 234-36).

To provide prompt protection, the Task Force began implementing a program involving the issuance of interim foreign licenses. This would provide non-exclusive foreign licenses to interested Plans for a set period **[**28]** of time, pending the issuance of permanent licenses. (Tr. 236-37).

[*711] On December 9, 1988, Roger G. Wilson, General Counsel of the Association ("Wilson"), sent a letter to Gamble soliciting his views on the proposed interim licensing program. (Plaintiff's Ex. 560).

On December 28, 1989, Wilson sent an application to all Plan CEO's for an interim foreign license. The letter accompanying the application provided:

> If your Plan is using the service marks to operate in any way in foreign countries and if it has developed plans or proposals to commence operations overseas using the service marks, the attached application for an interim license should be completed and returned by February 1, 1989.

(Plaintiff's Ex. 28).

The D.C. Plan never applied for any interim foreign licenses. Indeed, the D.C. Plan not only continued to file -- in its own name -- registrations for ownership of the Marks abroad, it also continued to oppose any foreign registration efforts by the Association. (Tr. 239).

Several of the Plans applied for interim foreign licenses. For example, as of December 28, 1988, the Delaware, South Carolina and Arizona Plans filed applications for interim foreign license agreements. **[**29]** (Plaintiff's Ex. 27, 337, 563, 341). The three Plans applied for, and were granted, licenses in eighty-one countries. (Plaintiff's Exh. 29, 338, 564).

G. *Attempts At Reconciliation*

On January 20, 1989, Tresnowsky and Gamble discussed the issue of foreign registrations, and Gamble requested the opportunity to appear before the Board of Directors of the Association ("the Board"). (Tr. at 250; Gamble at 1201-02).

On March 30, 1989, Gamble presented to the Board his position as to ownership of the Marks abroad. The Board did not agree with Gamble's position. In fact, the Board conditioned the D.C. Plan's continued status as a Member Plan on submitting foreign ownership disputes to mediation. Ultimately, mediation was invoked, but it proved unsuccessful. (Tr. 250-53; Plaintiff's Ex. 477).

II. *Jurisdiction*

The D.C. Plan has challenged this court's jurisdiction to decide this case. Plaintiff's (the Association's) Complaint has sought declaratory relief pursuant to Count I and injunctive relief under Count II, pursuant to the Lanham Act. In Count I, the Association has claimed that the D.C. Plan has breached its agreements concerning the Blue Cross and Blue Shield Marks. The D.C. **[**30]** Plan, in entering the licensing and ownership agreements, acknowledged that the Association is the owner of the Marks and that use of the Marks inures to the Association's benefit. Also pursuant to these agreements, the D.C. Plan recognized that it has the right to use the Marks only in the Metropolitan D.C. area.

The first question for the court concerns the interpretation of the licensing and ownership agreements. Specifically, the crucial question is the scope of these agreements. The D.C. Plan argues that the agreements only create U.S. rights for the Association and are silent as to foreign use. Thus, the D.C. Plan contends it has the right to use the Marks overseas and will be granted such rights on a country by country basis. Based on the alleged non-extraterritorial scope of the agreements, the D.C. Plan argues that this court lacks jurisdiction to enjoin it from using the Marks overseas.

U.S. courts have interpreted and enforced contracts between American citizens which involve property and actions in foreign countries. The Supreme Court has stated:

> ***HN1***[] Where the necessary parties are before a court of equity, it is immaterial that the res of the controversy, whether it be real **[**31]** or personal property, is beyond the territorial jurisdiction of the tribunal. It has the power to compel the defendant to do all things necessary . . . . which he could do voluntarily, to give full effect to the decree against him.

Phelps v. McDonald, 99 U.S. 298, 308, 25 L. Ed. 473 (1879); *see also,* *Nordson Corp. v. Plasschaert, 674 F.2d 1371, 1377 (11th Cir. 1982)*.

[*712] Further, a U.S. court has the ability to order an individual over whom it has personal jurisdiction to do an act, or refrain from doing an act, abroad; and such an order does not involve a *per se* invasion of the sovereignty of the foreign country. For example, in *United States v. Ross, 302 F.2d 831 (2nd Cir. 1962)*, the Court affirmed the district court's order requiring a U.S. citizen to turn over stock certificates. The defendant was to comply with the court's order regardless of whether the property was located within or without the limits of the court's territorial jurisdiction. The Court further held, "The action of the district court awarding appellant over whom it has jurisdiction to do an act in a foreign country does not *per se* involve any invasion of the sovereignty of that country." *Ross, 302 F.2d at 834*; **[**32]** *see also,* *Columbia Nastri & Carte Carbone, S/P/A v. Columbia Ribbon & Carbon Mfg. Co., 147 U.S.P.Q. (BNA) 204 (S.D.N.Y. 1965)*, *aff'd,* *367 F.2d 308 (2d Cir. 1966)*.

In *Velsicol Chemical Corp. v. Hooker Chemical Corp., 230 F. Supp. 998 (N.D. Ill. 1964)*, the court confronted the question of whether declaratory relief was appropriate in resolving a dispute between a patent licensor and a licensee alleged to have violated a patent licensing agreement through unauthorized foreign activities. The court stated:

> Defendant apparently considers that plaintiff is seeking a determination by this court that defendant has infringed certain of plaintiff's foreign patents. The question, however, is not one of infringement, but rather is whether or not defendant retained a license to sell under [plaintiff's] foreign . . . . patents by virtue of [a provision] of the contract. This question, it seems to me, is precisely the kind of issue that the Declaratory Judgment Act was designed to resolve.

Vellsicol, 230 F. Supp. at 1016-17. Thus the court in *Velsicol* found that it had jurisdiction to decide the dispute -- despite the fact that the exercise of the court's jurisdiction would **[**33]** have an extraterritorial effect.
Therefore, as to Count I of plaintiff's complaint seeking declaratory relief, the court finds that it has jurisdiction to decide whether defendant D.C. Plan has breached the licensing agreement. [3]

The jurisdictional inquiry now turns to whether the court has jurisdiction to decide whether defendant D.C. Plan has violated the Lanham Trademark Act, *15 U.S.C. § 1114(1)*. In the seminal case of *Steele v. Bulova Watch Co., 344 U.S. 280, 97 L. Ed. 319, 73 S. Ct. 252 (1952)*, the Supreme Court stated that ***HN2***[] the Lanham Act "confers broad jurisdictional powers upon courts of the United States . . . . The district courts of the United States are granted jurisdiction over all actions 'arising under' the Act, § 39, *15 U.S.C. § 1121*, *15 U.S.C.A. § 1121*, and can award relief which may include injunctions, 'according to the principles of equity,' to prevent **[**34]** the violation of any registrant's rights." *Steele, 344 U.S. at 283-284*. (statutory citations omitted).

HN3[] Generally, in determining whether extraterritorial jurisdiction should be exercised, a multi-step analysis has been devised. In the case of *Mannington Mills, Inc. v. Congoleum Corp., 595 F.2d 1287 (3d Cir. 1979)*, the Court enunciated the factors to be considered:

> 1. Degree of conflict with foreign law or policy;
> 2. Nationality of the parties;
> 3. Relative importance of the alleged violation of conduct here compared to that abroad;
> 4. Availability of a remedy abroad and the pendency of litigation there;
> 5. Existence of intent to harm or affect American commerce and its foreseeability;
> 6. Possible effect upon foreign relations if the court exercises jurisdiction and grants relief.
>
> 7. If relief is granted, whether a party will be placed in the position of being forced to perform an act illegal in either country or be under conflicting **[*713]** requirements by both countries;
> 8. Whether the court can make its order effective;
> 9. Whether an order for relief would be acceptable in this country if made by the foreign nation under similar circumstances; and
>
> 10. Whether a treaty with the **[**35]** affected nations has addressed the issue.

Mannington Mills, 595 F.2d at 1297, 1298.
Turning to the first factor -- conflict with foreign law or policy -- the D.C. Plan has not demonstrated that the exercise of extraterritorial jurisdiction will conflict with foreign law. Indeed, the D.C. Plan's own expert witness in the field of foreign trademark law, Jeremiah McAuliffe, testified at trial that he "assumed that there would not be" any conflict with foreign law if the court exercises extraterritorial jurisdiction in this case. (Tr. 966-67).
As to the nationality of the parties, both the Association and the D.C. Plan are U.S. corporations with their principal places of business in Chicago, Illinois and Washington, D.C. respectively.

---

[3] It is interesting to note that defendant D.C. Plan, in its counterclaim, also seeks declaratory relief and that such relief, if granted, would have an extraterritorial effect.

Regarding the extent to which enforcement can achieve compliance, the D.C. Plan and its employees are American citizens and thus subject to personal jurisdiction.

As to the relative importance of the alleged violation of conduct here compared to that abroad, declaratory and injunctive relief would prevent confusion over the Marks abroad as well as in the U.S.

Concerning the D.C. Plan's intent to affect U.S. commerce, the D.C. Plan has admitted that it **[**36]** intends to provide foreign subscribers visiting the U.S. with the ability to present Blue Cross and Blue Shield identification cards to hospitals with which the D.C. Plan has no contact.

No treaty between the U.S. and the affected nations addresses these issues.

Finally, the D.C. Plan's expert, Mr. McAuliff, testified that a U.S. court would have jurisdiction to prevent an unfair trade practice by a U.S. company in foreign commerce which causes confusion in the U.S. -- even if some of the acts were done outside the U.S. (Tr. 964).

Accordingly, the court concludes that it has jurisdiction to decide the issues raised in the Complaint.

III. *Ownership of the Marks* [4]

[37]** The agreements confer ownership of the Marks on the Association.

In 1952, the Association's predecessor acquired all the rights in the Blue Shield Marks pursuant to the Blue Shield Agreement to which the D.C. Plan was a party. (Plaintiff's Ex. 2).

In 1954, all of the Blue Cross Plans -- including the D.C. Plan -- assigned all of their rights in the Blue Cross Marks to the American Hospital Association. (Plaintiff's Ex. 3).

The Blue Cross Plans vested exclusive ownership and control of the Blue Cross Marks in the American Hospital Association. The 1954 Agreement provided, in pertinent part:

> American [Hospital Association] shall hold and exercise *any and all rights of ownership* in and to the words Blue Cross and/or a design of a blue cross, as service marks, whether or not derived from this agreement, exclusively for prepayment plans for hospitals care and related services . . . .

(Plaintiff's Ex. 3) (emphasis added).

Further, the 1954 Agreement provided that

> Any and all applications for the registration of the words Blue Cross and/or a **[*714]** design of a blue cross, as service marks and trade-marks, and any registrations granted *or to be granted hereafter* for said service marks **[**38]** and trade-marks, shall be solely in the name of American [Hospital Association] for the life of this agreement.

(Id.) (emphasis added).

The 1954 Agreement established that "the words Blue Cross and the design of a Blue Cross are known and recognized . . . . in foreign countries." *(Id.)*

The foregoing language substantiates that the American Hospital Association was vested with world-wide ownership in the Blue Cross Marks.

On June 30, 1972, the American Hospital Association transferred ownership of the Blue Cross Marks to the Blue Cross Association. The Member Plans consented to and entered into agreements regarding ownership of the Marks. In the 1972 Blue Cross Ownership Agreement (Plaintiff's Ex. 4), the American Hospital Association assigned to the Blue Cross Association all of its rights, both foreign and domestic, in the Marks. In the

---

[4] Pursuant to Virginia choice of law rules, the validity, interpretation and construction of agreements are governed by the laws of the state where the contracts were made. [Crosson v. Conlee, 745 F.2d 896, 902 (4th Cir. 1984)](), *cert. denied,* ***470 U.S. 1054, 84 L. Ed. 2d 822, 105 S. Ct. 1759 (1985)***. A contract is "made" where the final act necessary to make the contract binding is done. *See* *Chesapeake Supply & Equipment Co. v. J. I. Case Co., 700 F. Supp. 1415, 1417 (E.D. Va. 1988)*. All of the agreements in this case ultimately became effective by vote of the Association's Board of Directors in Illinois. Thus, because the agreements were made in Illinois, Virginia choice of law rules require that Illinois law governs the validity, interpretation and construction of the agreements.

Ownership Agreement, the Member Plans -- including the D.C. Plans' predecessor -- consented to the assignment. (Plaintiff's Ex. 4).

The Plans also explicitly affirmed the assignment of rights made in the 1954 Blue Cross Agreement. *(Id.)*

The Blue Cross License Agreement, executed along with the 1972 Blue Cross Ownership Agreement, confirms **[**39]** that the Association is the owner of the term "Blue Cross" and the design of a blue cross as service marks for prepayment plans for hospital care and related services. (Plaintiff's Ex. 1).

In return for the grant of a license to use the Marks in the D.C. area, the D.C. Plan promised it would not "during the term of the License Agreement, attack the title of the Blue Cross Association in and to the License Marks or Licensed Name or attack the validity of this license." (Plaintiff's Ex. 1).

The D.C. Plan also agreed that "all use by it of the Licensed Marks and Licensed Name hereunder shall inure to the benefit of BCA [predecessor to the Association]." *(Id.).* The D.C. Plan further agreed that "rights in the Licensed Marks and Licensed Name other than those specifically granted herein are reserved by BCA for its own use." *(Id.)*

In addition to the language of the ownership and licensing agreements, for over thirty years the conduct of the D.C. Plan has indicated its recognition that the Association owns the Marks. For example, since 1960 the D.C. Plan has contracted with the Association to underwrite and administer the federal employees program to approximately 12,000 Americans **[**40]** living abroad. (Plaintiff's Ex. 17). In 1983, the D.C. Plan formed World Access, Inc. ("World Access"), a travel-assistance program which provides U.S. travelers abroad with access to English-speaking doctors and makes hospital arrangements. The D.C. Plan distributes identification cards in conjunction with World Access, but these cards do not carry the Blue Cross and Blue Shield Marks nor has World Access ever promoted itself or its products as being affiliated in any way with the Blue Cross and Blue Shield Association.

In 1985, as an adjunct to World Access, the D.C. Plan developed an international hospital network consisting of a group of foreign hospitals which agreed to treat subscribers of World Access, the Federal Employees Program, and U.S. Member Plans. Materials sent by the D.C. Plan to hospitals within this network expressly acknowledged that the Association owned the Marks via a legend on these materials indicating the Association as owner of the Marks. (Plaintiff's Ex. 609).

There have also been instances where unauthorized use of the Marks by the D.C. Plan has been discovered by the Association and quickly rectified by the D.C. Plan. For example, in 1985 a D.C. Plan **[**41]** subsidiary, Access America, complied with the Association's request to cease using the Marks in connection with its foreign travel services. (Plaintiff's Ex. 282; Defendant's Ex. 1259).

[*715] All other Member Plans have interpreted the Association's ownership rights under the agreements as extending to foreign countries. *See* *American National Bank & Trust Co. v. Lembessis, 116 Ill. App. 2d 5, 253 N.E.2d 126, 130 (1st Dist. Ill. 1969)* ***HN4***[] ("where all parties adopt and act on a certain construction of a contract, there is no better extrinsic evidence of their intention"). Further, no other Member Plan has challenged the Association's ownership of the Marks -- in the United States or abroad.

In preparing to challenge the Association's foreign ownership of the Marks, the D.C. Plan devised a strategy for initiating foreign registration. This was a clandestine strategy, planned and executed without the knowledge of the Association or any of the Member Plans. Particularly egregious is the memorandum from Groppe to Gamble of August 4, 1986 (Plaintiff's Ex. 35) wherein Groppe discusses foreign registrations and how to approach the Association. Groppe's plan provided that:

> 1. Before GHMSI can secure all the trademark **[**42]** registrations we want worldwide, BCBSA will discovery our activity.
> 2. This discovery is likely to come through the Kilmer [law] firm when it starts to do title searches and discovers our activities.
> 3. We expect this discovery to take place in the next 3 to 9 months . . . .

> The best case scenario is that we are able to negotiate an arrangement with BCBSA directly to use the name and mark exclusively in those countries in which we want to do business. The worst case scenario is that BCBSA moves to try to limit, restrict or remove our ability to do business and use the name and trademark internationally. It is clear in its worst case scenario that BCBSA has enough clout to make life difficult for us on the domestic side even if we were to successfully defend against their restricting our use of trademark overseas.

(Plaintiff's Ex. 35).

Obviously, the D.C. Plan was attempting a surreptitious end-run around the Agreements. The D.C. Plan was attempting to gain leverage on the Association by registering the Marks in foreign countries before the Association discovered its activities. These activities were a clear violation of the Agreements.

Accordingly, the court concludes that the D.C. **[**43]** Plan has breached its License Agreement by registering the Marks in foreign countries in its own name for its exclusive benefit. *See* *B.V.D. Licensing Corp. v. Maro Hosiery Corp., 688 F. Supp. 961, 962-64 (S.D.N.Y. 1988)*.

IV. *The Lanham Act*

> The Lanham Act, *15 U.S.C. § 1114(1)*, provides, in pertinent part, that
>
> ***HN5***[] Any person who shall, without consent of the registrant --
> (a) use in commerce any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive . . . . shall be liable in a civil action by the registrant . . . .

The Fourth Circuit in *Pizzeria Uno Corp. v. Temple, 747 F.2d 1522, 1527 (4th Cir. 1984)*, set forth ***HN6***[] a number of factors to be considered in determining the likelihood of confusion:

1. the strength or distinctiveness of the marks;
2. the similarity of the marks;
3. the similarity of the goods/services the marks identify;
4. the similarity of the facilities the two parties use in their business;
5. the similarity of the advertising used by the **[**44]** parties;
6. the defendant's intent; and
7. actual confusion.

It is without peradventure that the Blue Cross and Blue Shield Marks are distinctive. The Blue Cross and Blue Shield Marks are strong Marks within the U.S. *See* *Central Benefits Mutual Ins. Co. v. Blue Cross and Blue Shield Association, 711 F. Supp. 1423, 1433 (S.D. Ohio 1989)*; *Blue Cross and Blue Shield Association **[*716]** v. Blue Cross Mutual Clinic, Inc., 612 F. Supp. 41, 44 (S.D. Fla. 1985)*; *National Association of Blue Shield Plans v. Lovelace, 435 F. Supp. 115, 117 (N.D. Cal. 1977)*.

The Marks are used abroad in targeted countries where the Blue Cross and Blue Shield name and symbols have immediate recognition among major foreign insurance companies.

The Marks used by the D.C. Plan are identical to those used by the Association. The manner of the D.C. Plan's use of the Marks in foreign promotional materials demonstrates its intention to mislead its foreign joint venture partners into believing that they are receiving the benefits of the Blue Cross and Blue Shield Marks in the United States. For example, the D.C. Plan distributed brochures in Latin America which indicated that the Blue Cross and Blue Shield cards **[**45]** help foreign subscribers gain access to several thousand U.S. hospitals when traveling to the United States -- although such access was never authorized by the Association or any of the Member Plans. (Plaintiff's Ex. 380). In addition, the D.C. Plan attempted to hide from Yasuda, its Japanese joint venture partner, the fact that Yasuda was dealing with the D.C. Plan and not the Association. (Plaintiff's Ex. 435). This effort at deception was apparently successful, for Yasuda was clearly confused, believing that it was dealing with the Blue Cross and Blue Shield Association and not merely one of its Plans. (Plaintiff's Ex. 436). It is beyond cavil that there has been actual confusion and such confusion was intentional. *See Frisch's Restaurants, Inc. v. Elby's Big Boy, 670 F.2d 642, 648 (6th Cir. 1982)*.

In addition, the sales and advertising methods used by the D.C. Plan in its foreign business efforts are similar to those used by the Association and other Plans.

Accordingly, the court finds that the D.C. Plan has violated the Lanham Act.

V. *Affirmative Defenses and Counterclaims*

The D.C. Plan has raised an affirmative defense of laches and has brought a counterclaim alleging **[**46]** tortious interference with contractual and prospective business relations, as well as alleging a violation of the federal antitrust laws.

A. Laches

HN7[] The determination as to whether a claim is barred by laches is committed to the sound discretion of the trial court. *Murphy v. Holland, 237 Va. 212, 377 S.E.2d 363, 365 (1989)*. [5] In order for laches to bar an action, there must be a delay accompanied by facts indicating an intention to abandon the claim, and the delay must be unreasonable and injurious to the party asserting the laches defense. *Murphy, 377 S.E.2d at 365*.

As to the Association's claim for declaratory relief, the court finds that any delay **[**47]** by the Association in bringing this action was not made with the intention to abandon any of its rights in the Marks. When first learning of the D.C. Plan's foreign initiatives, the Association was under the belief that these efforts were being done on behalf of the Association and all the Member Plans -- not solely a unilateral move on the part of the D.C. Plan. Later, upon discovering that the D.C. Plan sought to gain foreign rights only for itself, the Association sought, through the establishment of the International Trade Mark Task Force, a means by which Member Plans could acquire licenses to establish business abroad. The D.C. Plan, however, declined to participate in this program. Finally, the Association invoked mediation proceedings to attempt to solve the impasse with the D.C. Plan. Clearly, any delay on the part of the Association was not done with the intention to abandon its rights in the Marks. Further, the D.C. Plan prompted some of the delay by devising its clandestine strategy to register the Marks abroad. (Plaintiff's Ex. 35). Based on these circumstances, **[*717]** it cannot be said that any delay by the Association was unreasonable or injurious to the D.C. Plan.

In addition, **[**48]** the Association's claim for declaratory relief is not barred by the relevant statute of limitations. As previously indicated, the contract at issue in this case provides that Illinois law governs. The applicable Illinois statute provides a five year limitations period. *Virginia Code Section 8.01-247* provides that:

> **HN8**[] No action shall be maintained on any contract which is governed by the law of another state or country if the right of action thereon is barred either by the laws of such state or country or of this commonwealth.

See Virginia Code Section 8.01-230; *Goodell v. Rehrig Int'l, Inc., 683 F. Supp. 1051, 1056 (E.D. Va. 1988)*, *aff'd 865 F.2d 1257 (4th Cir. 1989)*.

Plaintiff's action was filed on July 7, 1989, and as indicated in the court's Findings of Fact, the Association was not aware of the D.C. Plan's foreign registration program in 1986. (Tr. 2101). The court finds Mr. Tresnowsky's testimony on this point to be believable. Further, Mr. Gamble testified that he told Marvin C. Reiter (Vice President and Deputy General Counsel of the Association) about the D.C. Plan's foreign registration efforts in

[5] Federal courts hearing a state law claim must apply the procedural rules of the forum state, including its choice of law rules. *Zukowski v. Dunton, 650 F.2d 30, 34, n. 3 (4th Cir. 1981)*. Under Virginia law, questions regarding the timeliness of an action are determined by reference to forum law. *Hospelhorn v. Corbin, 179 Va. 348, 19 S.E.2d 72 (1942)*.

November 1985. (Tr. 749-750). However, Reiter testified that **[**49]** he and Gamble only had a general discussion in which Gamble said the D.C. Plan was looking at overseas initiatives. As to this dispute of fact, the court credits Reiter's testimony. (Dep. of Reiter, p.24). The court believes that Gamble mentioned overseas initiatives with Reiter but did not discuss specifics regarding registering the Marks overseas.
Therefore, as to plaintiff's action for declaratory relief as to the ownership of the Marks, the court finds this Count to have been timely brought.

HN9[] A defense of laches to a claim for injunctive relief under the Lanham Act requires "plaintiff's knowledge of defendant's use of the mark; plaintiff's inexcusable delay in taking action; and the prejudice that will accrue if plaintiff is allowed to assert its right at this time." *Perini Corp. v. Perini Construction, Inc., 715 F. Supp. 719, 723 (D. Md. 1989)*. As indicated above, the true nature of the D.C. Plan's foreign registration strategy -- that all foreign rights to the Marks would inure only to the D.C. Plan -- was hidden from the Association. Also, once known, the Association initially believed that the D.C. Plan's foreign efforts were taken on behalf of the Association and all the **[**50]** Member Plans. Once the Association became aware of the reality of the situation, it sought to protect its rights in the Marks -- first through the interim licensing mechanism, then through arbitration, and ultimately through the bringing of this action.

The Association has not inexcusably delayed in asserting its rights. As to any prejudice that will accrue to the D.C. Plan if the Association is allowed to assert its rights to the Marks at this time, "It is only . . . . where the delay is so prolonged and inexcusable that it amounts to a virtual abandonment of the right by the plaintiff for a long period of time that the balance of equities would favor the knowing infringer." *Perini, 715 F. Supp. at 725* *quoting* *Tisch Hotels, Inc. v. Americana Inn, Inc., 350 F.2d 609, 614-15 (7th Cir. 1965)*. In light of the fact that a portion of any delay was precipitated by the D.C. Plan's own covert strategy, the court does not find any prejudice to the D.C. Plan caused by the Association now asserting its rights in the Marks.

Also, because the D.C. Plan's conduct is continuing, the statute of limitations does not bar the Lanham Act claim. *See* *Valmor Products Co. v. Standard Products, 464 F.2d 200, 204 **[**51]** (4th Cir. 1972)*; *Brunswick Corp. v. Spinit Reel Co., 832 F.2d 513, 526 (10th Cir. 1987)*; *James Burrough, Ltd. v. Sign of the Beefeater, Inc., 572 F.2d 574, 578 (7th Cir. 1978)*. [6]

[*718] Accordingly, plaintiff's complaint is not barred by laches or any statutes of limitations.
B. Intentional Interference with Contractual Relations and Prospective Business Rights

Counts 2 and 3 of the D.C. Plan's Counterclaim seeks damages for intentional interference of contractual relationships, particularly those it has established with the WPA, Federal National De la Mutulite Francaise, (FNMF), Israel's **[**52]** Kupat Holim and with the Yasuda Fire and Marine Insurance Co. in Japan. The D.C. Plan contends that under the contracts with each of these parties extensive business dealings were contemplated for the future.

HN10[] A federal court sitting in diversity is bound to apply the conflict of laws of the forum state. *See* *Klaxon Co. v. Stentor Elec. Mfg. Co., Inc., 313 U.S. 487, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*. Pursuant to Virginia's conflict of laws rules, the rule of *lex loci delecti* is to be applied. In other words, the place of the wrong determines the right to recover. *See* *McMillian v. McMillian, 219 Va. 1127, 253 S.E.2d 662 (1979)*. Here, the place of the alleged wrong is the District of Columbia, the D.C. Plan's principal place of business. Thus, as to the state law aspects of the counterclaim, D.C. law applies. ***HN11***[] Under D.C. law, the elements for intentional interference with third-party contracts are as follows: (1) the existence of a contract; (2) knowledge of the contract; (3) intentional procurement of its breach by the defendant; and (4) damages resulting from the breach. *Tuxedo Contractors, Inc. v. Swindell-Dressler, 198 U.S. App. D.C. 426, 613 F.2d 1159, 1162 (D.C. Cir.*

[6] The D.C. Plan's counterclaim also includes a claim for selective enforcement, although this claim was not argued during the course of the trial. In any event, the court finds that the D.C. Plan has failed to show selective enforcement. *See* *United States Jaycees v. Philadelphia Jaycees, 639 F.2d 134 (3d Cir. 1981)*. In addition, D.C. Plan has failed to establish that the Association has waived any of its rights.

1979). Further, "a party may lawfully engage in conduct **[**53]** which may interfere with a contract or contractual relations if it 'asserts in good faith a legally protected interest of his own or threatens in good faith to protect the interest . . . . if the actor believes that his interest may otherwise be impaired or destroyed by the performance of the contract or transaction.'" *In re Ashby Enterprises, Ltd.,* 47 Bankr. 394, 397 (D.D.C. 1985) *(quoting* Restatement (Second) of Torts § 773).

In regard to the alleged intentional interference with FNMF, Tresnowski's December 29, 1988 letter to Renee Teulade, chairman of FNMF, was rather straight-forward. The letter informed Teulade that the Association owned the Marks, that the D.C. Plan was a licensee, and that the Association had undertaken legal action to keep the D.C. Plan from registering the Marks in its own name. Furthermore, Tresnowski indicated in his letter that the Association did not object to FNMF entering into the relationship with the D.C. Plan as long as it did not involve any use of the Marks. (Plaintiff's Ex. 47). FNMF proceeded with its arrangement with the D.C. Plan without using the Blue Cross and Blue Shield Marks. (Plaintiff's Ex. 493).

In March of 1989, the Association **[**54]** sent a letter to WPA indicating the likelihood of confusion that has and will obtain if the WPA continues to be party to the use of the Marks. The letter only requested that WPA cease using the Marks in conjunction with its arrangement with the D.C. Plan. (Plaintiff's Ex. 496).

In regards to Kupat Holim, the Association became aware of the Blue Cross and Blue Shield Marks appearing without authorization on the letterhead of Kupat Holim. (Plaintiff's Exh. 499). On August 2, the attorney for the Association, Roger Wilson wrote Kupat Holim concerning unauthorized use of the Blue Cross and Blue Shield Marks. The letter clearly indicated that the Association only objected to the unauthorized use of the Marks and not to the hospital engaging in business with the D.C. Plan.

It is significant that Kupat Holim has not terminated its arrangement with the D.C. Plan, but has informed the Association that it intends to continue its arrangement with the D.C. Plan, save for use of the Marks. **[*719]** (Dep. of Gamble, p. 1150; Plaintiff's Ex. 1103).

By letter dated October 20, 1989, Roger Wilson, Association General Counsel of the Association, wrote to Yasuda regarding use of the Marks. His letter indicated **[**55]** that the D.C. Plan was not authorized to use the Marks in Japan. Wilson's letter made clear that the Association did not object to Yasuda entering into other business relationships with the D.C. Plan not involving the Marks. (Plaintiff's Ex. 500).

The letters sent by the Association have not procured the breach of any of the contracts the D.C. Plan has with any foreign entity. Indeed, these letters do not intimate any intentional interference but merely seek to protect rights the Association, in good faith, believes it has in the Marks.

HN12[] With regard to the D.C. Plan's claim for interference with prospective business relations, this action applies only to expectancies which have not yet been reduced to contract. *Carr v. Brown, 395 A.2d 79, 84 (D.C. App. 1978)*. In this case, the D.C. Plan alleges interference with existing contracts. Thus, the interference with prospective business relations claim is without merit.

Accordingly, the D.C. Plan's counterclaim for intentional interference affecting contractual rights and prospective business relationships, Counts II and III of the Counterclaim, have not been proven and must be dismissed.

VI. *Antitrust Claim*

In its Counterclaim, the **[**56]** D.C. Plan also alleges a violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, ***HN13***[] which provides, in pertinent part:

> Every contract, combination in the form of trust, or otherwise, or conspiracy, in restraint of trade of commerce among the several States, or with foreign nations, is declared to be illegal . . . .

To establish a violation of *Section 1* of the Sherman Act ("the Act"), the D.C. Plan must show: (1) the existence of a conspiracy or concerted action; (2) that the conspiracy resulted in adverse, anti-competitive effects within the relevant product and geographic market; (3) that the objects of and conduct pursuant to the conspiracy were illegal; and (4) that the party bringing the claim must have been injured as a result of the conspiracy.

Terry's Floor Fashions v. Burlington Industries, Inc., 763 F.2d 604, 610, n. 10 (4th Cir. 1985). "Concerted action is the essence of a *Section 1* claim." *Id.*

Applying these elements to the facts of this case, it is clear that the D.C. Plan's antitrust claim fails. First, the D.C. Plan has not established the penultimate requirement of a conspiracy or concerted action. Mr. Gamble's testimony failed to identify any alleged co-conspirators. **[**57]** *See Lombard's Inc. v. Prince Manufacturing, Inc., 753 F.2d 974, 975 (11th Cir. 1985), cert. denied, 474 U.S. 1082, 88 L. Ed. 2d 892, 106 S. Ct. 851 (1986)* (failure of complaint to identify co-conspirators provides grounds for granting motion to dismiss). ***HN14***[] Mere speculation as to the existence of a conspiracy, without more, is not sufficient to establish a violation of *Section 1* of the Act. *Terry's Floor Fashions, 763 F.2d at 611*. Further, it is well-settled that *Section 1* of the Act "does not proscribe independent action" but only concerted action. *Terry's Floor Fashions, 763 F.2d at 610*; *see also, Monsanto Co. v. Spray-Rite Corp., 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*.

The Association ***HN15***[] has a right to protect its Marks and not face the charge of antitrust violations. Good faith efforts to enforce trademark rights do not violate the Sherman Act. Indeed, vigorous enforcement of trademark rights is exactly the "sort of aggressive competition and promotion that ***antitrust law*** seeks to protect." *Drop Dead Co. v. S.C. Johnson & Son, Inc., 326 F.2d 87, 96 (9th Cir. 1963), cert. denied 377 U.S. 907, 84 S. Ct. 1167, 12 L. Ed. 2d 177, 141 U.S.P.Q. (BNA) 949 (1964)*. Further, the *Noerr-Pennington Doctrine* confers absolute immunity on the Association **[**58]** for its actions.

The D.C. Plan has failed to show that the Association's actions unreasonably restrained trade. The D.C. Plan has also failed to show that the Association's efforts **[*720]** in protecting its Marks have restrained competition in the relevant product or geographic market. *See Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*; *Military Services Realty, Inc. v. Realty Consultants of Virginia, 823 F.2d 829, 832 (4th Cir. 1987)*. [7]

[59]** VII. *Conclusions of Law*

(1) The court concludes as a matter of law that it has jurisdiction;

(2) Under the license and ownership agreements, as between the Association and the D.C. Plan, the Association is the owner of any and all rights in the Marks;

(3) Any use of the Marks by the D.C. Plan, including use in foreign countries, has inured and continues to inure to the benefit of the Association;

(4) All rights, if any, that may have been created by the D.C. Plan's use of the Marks in foreign countries are the property of the Association and are held in trust by the D.C. Plan for the Association;

(5) That the defendant has breached the Licensing Agreement with plaintiff by attempting to register and own the Marks, in its own name, in foreign countries;

(6) That the defendant has violated the Lanham Act;

(7) That the defendant has failed to prove its claim of laches;

(8) That the defendant has failed to prove its claim for tortious interference with contractual rights and prospective business relations; and

(9) That the defendant has failed to prove its claim for violation of the Sherman Antitrust Act.

Accordingly, an appropriate Order shall issue.

---

[7] The D.C. Plan relies heavily on *U.S. v. Sealy, 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*. *Sealy* involved an antitrust action brought by the government against a licensor of mattresses and bedding products. The complained of conduct consisted of the licensor conspiring with its licensees to allocate mutually-exclusive territories among the licensees. The licensor essentially promised the licensees not to grant any additional licenses to others seeking to operate in the same geographic area as the licensees. The facts of *Sealy* are clearly distinguishable to those in this case. The anticompetitive conduct in *Sealy* affected those who sought to sell Sealy products in an area already granted to a designated licensee. The arrangement between Sealy and its licensees completely foreclosed others from selling Sealy products in a particular area. In this case, the Association, in seeking to protect its rights in the Marks, has not completely foreclosed the D.C. Plan from engaging in foreign business. The Association has indeed encouraged such business, provided that the Marks are not used without its consent and authorization.

ORDER

In accordance with the **[**60]** accompanying Memorandum Opinion, it is accordingly ORDERED:

(1) that Judgment be, and it hereby is, ENTERED in favor of the plaintiff and against the defendant upon plaintiff's Complaint, Count I, Breach of Contract and Count II, Violation of the Lanham Act;

(2) that Judgment be, and it hereby is, ENTERED in favor of the plaintiff/counter-defendant and against the defendant and counter-plaintiff on the Counterclaim brought by the defendant and counter-plaintiff. The Counterclaim is DISMISSED with prejudice;

(3) that the defendant and its officers, agents, and employees and those persons in active concert or participation with them who receive notice of this Order are hereby ENJOINED and RESTRAINED from:

a. breaching the Blue Cross and Blue Shield License and Ownership Agreements;

b. taking any further action to register the Marks in the name of the D.C. Plan in foreign countries or to cancel or depose any registration of the Marks by the Association in foreign countries;

c. claiming ownership of the Marks or challenging the Association's ownership of or title of the Marks in any foreign countries;

d. using the Marks in connection with the sales promotion of health care financing services **[**61]** or any other product service in foreign countries without license or authorization from the Association;

[*721] (3) that the defendant is ORDERED to assign to the plaintiff all registration, applications, petitions and any other rights defendant may have or claim of the Marks in foreign countries, and dismiss any opposition, petitions or cancellations, or any other actions currently pending against the Association in foreign countries, or challenging plaintiff's ownership of the Marks in those countries;

(4) that the defendant is ORDERED to notify its foreign joint venture partners, foreign subscribers and the foreign hospitals with which it has agreements, that as between the plaintiff and defendant, the plaintiff is the owner of the Marks and any registrations and applications therefore;

(5) that the defendant, its officers, agents, employees and those persons in active concert or participation with them will receive notice of this Order hereby enjoining and restraining from:

a. using the Marks on material distributed in foreign countries without the express authorization of the Association;

b. distributing material not authorized by the Association, which bears the Marks in foreign countries **[**62]** with the intent, instructions, advice or understanding that said material may be brought into the United States;

c. using the Marks in connection with the sale of health care financial products and services or other products, where such use is likely to create the impression that:

(1) the defendant is the plaintiff or the Blue Cross and Blue Shield System;

(2) the defendant or its foreign partners are authorized or approved by the plaintiff or the Blue Cross and Blue Shield System to sell Blue Cross and Blue Shield insurance in foreign countries; or

(3) the defendant can make available to foreign subscribers the benefits of the Blue Cross and Blue Shield System in the U.S., when such representations have not been authorized by the Association;

(6) that within fifteen (15) days of this Order, defendant shall provide a copy of the Order to each of defendant's officers, employees, brokers, and joint venture partners who are engaged in the sale or promotion of its products and services in foreign countries using the Marks. Accompanying the Order shall be a cover letter: (a) explaining that the defendant does not sell insurance in foreign countries that has been sponsored or approved by **[**63]** the Association or the Blue Cross and Blue Shield System; and (b) recalling all material which violates paragraph 5 above. Defendant shall collect all such material and shall deliver them to the U.S. Marshal for destruction. Copies of these letters shall be submitted to the court and counsel for the Association;

(7) that within thirty (30) days of this Order, the defendant shall mail a letter to each person who has purchased an insurance product from the defendant or its joint venture partners, which letter shall advise the recipients that the defendant does not sell insurance in foreign counties that has not been sponsored or approved by the Association or the Blue Cross and Blue Shield System and that cards with the Marks on them may not be presented to, or accepted by, accepted hospitals in the United States for prepaid services. Copies of these letters shall be submitted to the court and counsel for the Association;

(8) that within fifteen (15) days of this Order, the plaintiff shall FILE its brief in support of its Petition for Attorney's Fees, and within thirty (30) days of this Order, the defendant shall file an Opposition to plaintiff's request for attorney's fees. Should **[**64]** the court grant plaintiff's request for attorney's fees, the court will then place parties on a briefing schedule as to the reasonableness of fees requested;

(9) that the court retains jurisdiction of this action for the purpose of granting any further and necessary relief.

(10) that the Clerk shall forward copies of this Order to all counsel of record.

Mergers & Acquisitions Law > Antitrust > Regulated Industry Mergers

HN5[] **Clayton Act, Jurisdiction**

The force of the assets-acquisition provision in § 7 of the Clayton Act is merely to exempt mergers in the regulated industries enumerated in § 11 of the Act. Those industries do not include the hospital industry. The Act evinces a purpose of limiting the Federal Trade Commission's jurisdiction vis-a'-vis that of other federal agencies charged with enforcing the Act in the industries that they regulate, but it evinces no purpose of exempting nonprofit firms in industries within the domain that the Act bestows on the Commission ("all other character of commerce").

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN6[] **Reviewability of Lower Court Decisions, Preservation for Review**

An appellate court can affirm a decision by a district court on an alternative ground that has not been waived.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

A transaction violates *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, if it restrains trade; it violates § 7 of the Clayton Act, *15 U.S.C.S. § 18*, if its effect may be substantially to lessen competition. But both statutory formulas require, and have received, judicial interpretation; and the interpretations have, after three quarters of a century, converged.

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN8[] **Antitrust & Trade Law, Clayton Act**

Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, forbids mergers that are likely to hurt consumers, as by making it easier for the firms in the market to collude, expressly or tacitly, and thereby force price above or farther above the competitive level. A merger with such effects would also violate *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Mergers & Acquisitions Law > Antitrust > General Overview

HN9[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

The suggestion that horizontal mergers are unlawful without regard to competitive effects has been rejected.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Regulated Practices, Market Definition**

The market is the denominator of the fraction the numerator of which is the output of the defendants or some other select group of firms; the denominator is given by the output of the suppliers to which a group of customers can turn for their requirements of a particular product. Market share is the fraction of that output that is controlled by a particular supplier or particular suppliers whose market power the court wishes to assess. The higher the aggregate market share of a small number of suppliers, the easier it is for them to increase price above the competitive level without losing so much business to other suppliers as to make the price increase unprofitable; this is the power the court calls market power.

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Insurance Law > Industry Practices > General Overview

HN11[] **Antitrust Actions, Facilities**

Regulatory limitations on entry into the hospital industry increase the propensity to collude by preventing (or at least delaying and increasing the cost of) entry by new competitors to take advantage of an increase in prices. And neither generally nor in this instance does the existence of regulation work an implied repeal of the antitrust laws. The excess capacity that is part of the motivation for the regulatory limitations is itself an incentive to collude, although excess capacity in the competitive fringe reduces the feasibility of collusion. The urgencies of medical care and the prevalence of third-party (insurance or governmental) payment no doubt dilute price sensitivity, but that this weakens - rather than strengthens - the importance of encouraging competition is far from obvious.

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

Evidence > Burdens of Proof > General Overview

HN12[] **Standards of Review, Substantial Evidence**

The principles of civil procedure do not require that the plaintiff make an airtight case, only that his case satisfy some minimum threshold of persuasiveness and be better than the defendant's case.

Judges: Posner and Flaum, Circuit Judges, and Dumbauld, Senior District Judge. *

Opinion by: POSNER

Opinion

[*1280] POSNER, Circuit Judge.

The United States brought suit under section **[**2]** 7 of the Clayton Act and *section 1* of the Sherman Act (*15 U.S.C. §§ 18*, *1*) to enjoin a merger of the two largest hospitals -- both nonprofits -- in Rockford, Illinois, a city of 140,000 people. The district judge held that the merger violated section 7, and issued the injunction; he did not reach the *section 1* charge. *717 F. Supp. 1251*.

The defendants appeal, arguing first that section 7 does not apply to a merger between nonprofit enterprises. Surprisingly, this is an issue of first impression at the appellate level, with the exception of an unpublished opinion by the Fourth Circuit, of which more later. Section 7 provides that ***HN1***[] "[1] no person . . . shall acquire . . . the whole or any part of the *stock or other share capital* and [2] no person *subject to the jurisdiction of the Federal Trade Commission* shall acquire the whole or any part of the *assets* of another person," where the effect may be substantially to lessen competition, or to tend to create a monopoly. (Emphasis added.) **[**3]** ***HN2***[] Illinois law forbids a nonprofit corporation to have, and these hospitals do not have, stock or share capital. Ill.Rev.Stat. ch. 32, para. 106.05. So the clause we have labeled [1] would seem not to apply. And, the defendants argue, the FTC has no jurisdiction over a nonprofit corporation -- so that the merger is not covered by the clause referring to asset acquisitions, clause [2], either -- because section 4 of the Federal Trade Commission Act confines the Commission's jurisdiction under the Act to a "company . . . or association, incorporated or unincorporated, which is organized to carry on business for its own profit or that of its members." *15 U.S.C. § 44*.

The first argument, knocking out clause [1], is strong. The second argument, however, in assuming that the reference in section 7 to "person[s] subject to the jurisdiction of the Federal Trade Commission" is to the Federal Trade Commission Act, overlooks the possibility that the reference is actually to the provision in the Clayton Act itself concerning the jurisdiction of the FTC -- namely section 11, *15 U.S.C. § 21*. **[**4]** Section 11 ***HN3***[] vests authority to enforce the prohibitions of the Clayton Act in five agencies. These are the Interstate Commerce Commission, with respect to the common carriers regulated by that Commission; the Federal Communications Commission, with respect to the common carriers regulated by it; ditto for the Civil Aeronautics Board (now defunct); the Federal Reserve Board, for banks; and, for everyone else, the FTC: ***HN4***[] "Authority to enforce compliance with sections 2, 3, 7, and 8 of this Act by the persons respectively subject thereto is hereby vested in . . . the Federal Trade Commission where applicable to all other character of commerce." Section 11 goes on to prescribe the procedure to be followed by these commissions and boards that have been given jurisdiction to enforce the Act. The procedure is self-contained and does not depend on particular provisions in the agencies' organic statutes, so that when in 1950 Congress amended section 7 to broaden its reach, it amended section 11 as well. We believe that ***HN5***[] the force of the assets-acquisition provision in section 7 is, therefore, merely to exempt **[**5]** mergers in the regulated industries enumerated in section 11. Areeda & Turner, ***Antitrust Law*** para. 906, at p. 797 n. 2 (1989 Supp.). Those industries do not include the hospital industry. The Clayton Act evinces a purpose of limiting the Federal Trade Commission's jurisdiction vis-a'-vis that of other federal agencies charged with enforcing the Act in the industries that they regulate, but it evinces no purpose of exempting nonprofit firms in industries within **[*1281]** the domain that the Act bestows on the Commission ("all other character of commerce").

* Hon. Edward Dumbauld, of the Western District of Pennsylvania, sitting by designation.

The government amazingly has failed to make this argument (thus waiving it), substituting an unnecessarily venturesome argument that the acquisition of control of a nonprofit corporation is the acquisition of that corporation's stock or share capital within the meaning of section 7 (and hence comes within clause [1]), even though a nonprofit corporation does not have any stock or share capital and could not under relevant state law. The government points out that in *United States v. Philadelphia National Bank, 374 U.S. 321, 335-49, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*, the Supreme Court held that a bank **[**6]** merger was a stock acquisition for purposes of section 7, though in corporate law it is an asset acquisition. There was no indication, the Court pointed out, that Congress had by its references to the FTC in sections 7 and 11 intended to exempt mergers by regulated firms; and while the acquiring firm in a merger does not actually acquire the stock of the acquired firm -- it acquires the assets, in exchange either for stock of the acquiring firm or, in the case of a consolidation (the actual transaction in that case), for new stock -- the effect is the same. *Id. at 336-38*.

The approach to statutory interpretation that informs *Philadelphia National Bank* is controversial, but it is neither indefensible nor irrelevant to the interpretive question in the present case. The approach, premised on recognition that legislative draftsmanship is often a rushed and clumsy process, deficient in foresight, tries to carry out the purposes of the statute insofar as these can be inferred, even if the result is a wide departure from literal meaning. But whatever its merits, it is not an approach in vogue in the Supreme Court at the moment and we hesitate to push it further than **[**7]** it was pushed in *Philadelphia National Bank*. We would be pushing it further if we read the words "stock" and "share capital" in section 7 as if they were synonyms for "control" (which is what would be acquired by this merger), although there are passages in the *Philadelphia Bank* opinion that can be quoted in support of the extension. E.g., *id. at 338*.

We are especially reluctant to test the elasticity of our interpretive powers without good reason, the only reason here being that the government overlooked a solid argument, based on section 11 of the Clayton Act, which would eliminate the loophole that the government rather desperately asks us to fill by a far-out interpretation of section 7. We decline the invitation, and conclude that *as the parties have framed the issues* the merger is not subject to section 7. The qualification is important, for we believe (contrary to *United States v. Carilion Health System, 707 F. Supp. 840, 841 n. 1* (W.D.Va.), aff'd without opinion, *892 F.2d 1042 (4th Cir. 1989))* that the merger *is* subject to section 7, once the reference in that section to the jurisdiction of the FTC is understood, **[**8]** as we think it should be understood, to refer to section 11 of the Clayton Act rather than to section 4 of the FTC Act.

The government has a fallback position, however: the merger violates *section 1* of the Sherman Act, as charged alternatively in the complaint. Although the district judge did not find it necessary to reach the issue, we can do so, without impropriety, since the subordinate findings that the judge made demonstrate a *section 1* violation. ***HN6***[] We can affirm a decision by a district court on an alternative ground that has not been waived, *Martinez v. United Automobile Workers, 772 F.2d 348, 353 (7th Cir. 1985)*; *LaSalle National Bank v. General Mills Restaurant Group, Inc., 854 F.2d 1050, 1052 (7th Cir. 1988)*, and this ground has not been; it has been briefed and argued by both sides.

We doubt whether there is a substantive difference today between the standard for judging the lawfulness of a merger challenged under *section 1* of the Sherman Act and the standard for judging the same merger challenged under section 7 of the Clayton Act. It is true **[**9]** that the operative language of the two provisions is different **[*1282]** and that some of the old decisions (old by antitrust standards anyway) speak as if that should make a difference. E.g., *Minnesota Mining & Mfg. Co. v. New Jersey Wood Finishing Co., 381 U.S. 311, 323, 14 L. Ed. 2d 405, 85 S. Ct. 1473 (1965)*; *United States v. Penn-Olin Chemical Co., 378 U.S. 158, 170-71, 12 L. Ed. 2d 775, 84 S. Ct. 1710 (1964)*. ***HN7***[] A transaction violates *section 1* of the Sherman Act if it restrains trade; it violates the Clayton Act if its effect may be substantially to lessen competition. But both statutory formulas require, and have received, judicial interpretation; and the interpretations have, after three quarters of a century, converged. 2 Areeda & Turner, ***Antitrust Law***, para. 304 (1978); 4 *id.*, para. 906, at p. 22.

We must recall some history. The Clayton Act was passed in 1914 against a background of disappointment with the Supreme Court's interpretation of the Sherman Act. Although the Court had held railroad cartels and the oil and tobacco trusts illegal **[**10]** under that Act, language in the Court's opinions, particularly Chief Justice White's opinion in *Standard Oil Co. v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*, aroused anxiety that it was too difficult to prove a violation. The response of the draftsmen of the Clayton Act was to identify particular anticompetitive practices and forbid them upon a showing not that they would, but merely that they might, lessen competition substantially. Among these practices was the acquisition of the stock of a competitor; such acquisitions, particularly when secret, were thought to be among the methods that trusts used to acquire market dominance and intimidate rivals. *Brown Shoe Co. v. United States, 370 U.S. 294, 314, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*.

Although the Clayton Act gave the Department of Justice jurisdiction concurrent with the Federal Trade Commission to enforce its provisions, *15 U.S.C. §§ 21*, *25*, only the FTC seemed interested in enforcing section 7 and its ability to do so against mergers as distinct from pure stock acquisitions was crippled by a series of decisions narrowly interpreting the Commission's **[**11]** powers under section 11. (The story is told in *United States v. Philadelphia National Bank, supra, 374 U.S. at 338-40*.) In addition, when the Department of Justice brought suit under *section 1* of the Sherman Act against a substantial asset acquisition in *United States v. Columbia Steel Corp., 334 U.S. 495, 92 L. Ed. 1533, 68 S. Ct. 1107 (1948)*, it was rebuffed in an opinion widely regarded as imposing -- once again -- an undue burden on the antitrust plaintiff.

It was against this background that Congress in 1950 amended section 7 to plug the asset-acquisition loophole and by doing so to bring mergers and other asset acquisitions under the less demanding standard of the Clayton Act. *United States v. Philadelphia National Bank, supra, 374 U.S. at 341-42*. But it was less demanding only in relation to the interpretation of *section 1* in *Columbia Steel*, and that interpretation was to change. In *United States v. First National Bank & Trust Co. of Lexington, 376 U.S. 665, 12 L. Ed. 2d 1, 84 S. Ct. 1033 (1964)*, the Supreme Court invalidated under *section 1* a merger which had joined two banks that between them had **[**12]** from 52 to 54 percent of the commercial banking business of their market and from 80 to 95 percent of the trust business. The ground was the elimination of competition between the merging firms, and implied -- since every merger eliminates competition between the parties to the merger -- that any very large horizontal merger violated the statute. There was still a gap between the statutory standards, for in the period in which *Lexington Bank* was decided the Supreme Court was holding mergers in single digits unlawful under section 7, a trend that culminated in *United States v. Von's Grocery Co., 384 U.S. 270, 16 L. Ed. 2d 555, 86 S. Ct. 1478 (1966)*. In recent years, however, a more moderate interpretation of section 7 has prevailed. As we noted recently in another (and very similar) hospital-merger case, *Hospital Corporation of America v. FTC, 807 F.2d 1381, 1386 (7th Cir. 1986)*, the current understanding of section 7 is that ***HN8***[] it forbids mergers that are likely to "hurt consumers, as by making it easier for the **[*1283]** firms in the market to collude, **[**13]** expressly or tacitly, and thereby force price above or farther above the competitive level."

A merger with such effects would also violate *section 1*. The defendants' argument that section 7 prevents *probable* restraints and *section 1* *actual* ones is word play. Both statutes as currently understood prevent transactions likely to reduce competition substantially. Insofar as the *Lexington Bank* case implies that any large horizontal merger violates *section 1* whether or not it is likely to reduce competition, it has been superseded by more recent decisions construing *section 1*, such as *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 23, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*, and *Copperweld Corp. v. Independence Tube Co., 467 U.S. 752, 768, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*, which reject ***HN9***[] the suggestion that horizontal mergers are unlawful without regard to competitive effects. In noting as if it supported their position that there can be no finding under these decisions of a Sherman Act violation without proof of market power, *Ball Memorial Hospital, Inc. v. Mutual Hospital Ins. Inc., 784 F.2d 1325, 1334-37 (7th Cir. 1986)*, **[**14]** the defendants fail to see that this requirement would be superfluous if the Act punished only actual restraints. It is *because* the transactions punished under the Sherman Act, like those punished under the Clayton Act, are ambiguous in their competitive consequences that the courts insist on proof of market power.

Even if we are wrong that the standards under *section 1* of the Sherman Act and section 7 of the Clayton Act have converged, and even if we are right that the teaching of *Lexington Bank* that a large horizontal merger (we mean of course large relative to its market) violates *section 1* has been superseded, and even if the consequence of all this is that the old *Columbia Steel* decision remains canonical for mergers challenged under *section 1*, the defendants are still in deep trouble. The Court in *Columbia Steel* thought that a merger which created a 24 percent firm was not anticompetitive in the unusual conditions of the industry, *334 U.S. at 529*; here we have a far larger merger and, as we shall see, such unusual conditions as may be present in the hospital industry reinforce rather than undermine the inference naturally to be drawn from the defendants' **[**15]** combined market share.

But all this is provided the district court's market definition is accepted. ***HN10***[] The "market" is the denominator of the fraction the numerator of which is the output of the defendants or some other select group of firms; the denominator is given by the output of the suppliers to which a group of customers can turn for their requirements of a particular product. *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*. Market share is the fraction of that output that is controlled by a particular supplier or particular suppliers whose market power we wish to assess. The higher the aggregate market share of a small number of suppliers, the easier it is for them to increase price above the competitive level without losing so much business to other suppliers as to make the price increase unprofitable; this is the power we call market power.

The district judge estimated the combined market share of the parties to the merger (hospitals of roughly equal size -- the two largest in Rockford) at between 64 and 72 percent, **[**16]** depending on whether beds, admissions, or patient days are used as the measure of output. And he estimated the combined market share of the three largest hospitals in Rockford after the merger at 90 percent. Three firms having 90 percent of the market can raise prices with relatively little fear that the fringe of competitors will be able to defeat the attempt by expanding their own output to serve customers of the three large firms. An example will show why. To take away 10 percent of the customers of the three large firms in our hypothetical case, thus reducing those firms' aggregate market share from 90 percent to 81 percent, the fringe firms would have to increase their own output by 90 percent (from 10 to 19 percent of the market). This would take a while, surely, and would force up their costs, perhaps steeply -- the fact they are so **[*1284]** small suggests that they would incur sharply rising costs in trying almost to double their output, and that it is this prospect which keeps them small. So the three large firms could collude to raise price (within limits of course) above the competitive level without incurring the additional transaction costs and risk of exposure that **[**17]** would result from their trying to coordinate their actions with that of their small competitors.

This analysis, however, collapses if customers can turn to suppliers who (or products that) have been excluded from the market. The market defined by the district judge consists of the provision of inpatient services by acute-care hospitals in Rockford and its hinterland. The defendants point out correctly that a growing number of services provided by acute-care hospitals are also available from nonhospital providers. But the force of the point eludes us. If a firm has a monopoly of product X, the fact that it produces another product, Y, for which the firm faces competition is irrelevant to its monopoly unless the prices of X and Y are linked. For many services provided by acute-care hospitals, there is no competition from other sorts of provider. If you need a kidney transplant, or a mastectomy, or if you have a stroke or a heart attack or a gunshot wound, you will go (or be taken) to an acute-care hospital for inpatient treatment. The fact that for other services you have a choice between inpatient care at such a hospital and outpatient care elsewhere places no check on the prices **[**18]** of the services we have listed, for their prices are not linked to the prices of services that are not substitutes or complements. If you need your hip replaced, you can't decide to have chemotherapy instead because it's available on an outpatient basis at a lower price. Nor are the prices of hip replacement and chemotherapy linked. The defendants' counsel correctly noted that diet soft drinks sold to diabetics are not a relevant product market, but that is because the manufacturers cannot separate their diabetic customers from their other customers and charge the former a higher price. Hospitals can and do distinguish between the patient who wants a coronary bypass and the patient who wants a wart removed from his foot; these services are not in the same product market merely because they have a common provider. The defendants do not argue for the broader market on the basis of substitutability in supply -- that is, the ability of a provider of outpatient services to switch to inpatient services should the price of the latter rise as a result of collusive pricing, making such services more profitable.

The more difficult issue is the geographical market. The defendants offered evidence, **[**19]** which the judge accepted, that their service area is a ten-county area of northern Illinois and southern Wisconsin centered on Rockford. Medicare records the address of all hospital patients, so it was possible to determine the zip codes from which the defendants draw their patients. The district judge noticed that 87 percent of the defendants' patients come from an area surrounding Rockford and consisting of the rest of Winnebago County (the county in which

Rockford is located) and pieces of several other counties; the remaining patients are widely scattered. The defendants accept the area picked out by the district judge as a reasonable approximation of their service area (though not of the relevant market). There are four other acute-care hospitals in that area. Their output (as measured, we said, by beds, admissions, or patient days, all of which are highly correlated) plus that of the defendants is the market that the judge used to estimate the defendants' market share.

The defendants point out correctly that the hospitals in the defendants' service area may not exhaust the alternatives open to the residents of that area. Maybe a lot of people who live in Rockford, or if not **[**20]** in Rockford then at the edge of the Rockford hospitals' service area at the farthest possible distance from Rockford that is still within that area, use hospitals outside the area. Maybe -- but the record shows that the six hospitals in the defendants' service area, plus a hospital in Beloit just north of the service area, account for 83 percent of the hospitalizations of residents of the service area, and that 90 percent of Rockford residents who are hospitalized are hospitalized in Rockford itself. For highly exotic **[*1285]** or highly elective hospital treatment, patients will sometimes travel long distances, of course. But for the most part hospital services are local. People want to be hospitalized near their families and homes, in hospitals in which their own -- local -- doctors have hospital privileges. There are good hospitals in Rockford, and they succeed in attracting most of the hospital patients not only from Rockford itself but from the surrounding area delineated by the district judge. The exclusion of the Beloit hospital from the market was not adequately explained, but apparently does not affect the figures materially.

It is always possible to take pot shots at **[**21]** a market definition (we have just taken one), and the defendants do so with vigor and panache. Their own proposal, however, is ridiculous -- a ten-county area in which it is assumed (without any evidence and contrary to common sense) that Rockford residents, or third-party payors, will be searching out small, obscure hospitals in remote rural areas if the prices charged by the hospitals in Rockford rise above competitive levels. Forced to choose between two imperfect market definitions, the defendants' and the district judge's (the latter a considerable expansion of the government's tiny proposed market), and bound to review the judge's determination under the deferential "clearly erroneous" standard, we choose the less imperfect, the district judge's.

The defendants' immense shares in a reasonably defined market create a presumption of illegality. Of course many factors other than the number and size distribution of firms affect the propensity to collude, but here as in *Hospital Corporation of America*, a factually similar case, most of them strengthen rather than weaken the inference of market power from market shares. *807 F.2d at 1387-92*. ***HN11***[] Regulatory limitations **[**22]** on entry into the hospital industry increase the propensity to collude by preventing (or at least delaying and increasing the cost of) entry by new competitors to take advantage of an increase in prices. And neither generally nor in this instance does the existence of regulation work an implied repeal of the antitrust laws. *National Gerimedical Hospital & Gerontology Center v. Blue Cross of Kansas City, 452 U.S. 378, 69 L. Ed. 2d 89, 101 S. Ct. 2415 (1980)*. The excess capacity that is part of the motivation for the regulatory limitations is itself an incentive to collude, although excess capacity in the competitive fringe reduces the feasibility of collusion -- but concerning *that* excess capacity there is no evidence in the record. The urgencies of medical care and the prevalence of third-party (insurance or governmental) payment no doubt dilute price sensitivity, but that this weakens -- rather than strengthens -- the importance of encouraging competition is far from obvious.

We would not repeat any more of what we said in *Hospital Corporation* but for the emphasis that the defendants place on their status as nonprofit corporations. This status, they argue, **[**23]** removes any ground for concern that they might seek to maximize profits through avoidance of price or service competition. If this is correct, the Supreme Court was wrong in *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 100 n. 22, 82 L. Ed. 2d 70, 104 S. Ct. 2948 (1984)*, to reject an implicit exemption of nonprofit enterprises from the antitrust laws. We are aware of no evidence -- and the defendants present none, only argument -- that nonprofit suppliers of goods or services are more likely to compete vigorously than profit-making suppliers. Most people do not like to compete, and will seek ways of avoiding competition by agreement tacit or explicit, depending of course on the costs of agreeing. The ideology of nonprofit enterprise is cooperative rather than competitive. If the managers of nonprofit enterprises are less likely to strain after that last penny of profit, they may be less prone to engage in profit-maximizing collusion but by the same token less prone to engage in profit-maximizing competition. *Hospital Corporation of America v. FTC, supra, 807 F.2d at 1390-91*.

The question cannot be resolved a priori, and **[**24]** once the government showed that the merger would create a firm having a market share approaching, perhaps exceeding, a common threshold of monopoly power -- two-thirds (*United States v. Aluminum Co. of America, 148 F.2d 416, 424, 65 U.S.P.Q. (BNA) 6 (2d **[*1286]** Cir. 1945)* (L. Hand, J.)) -- it behooved the defendants to present evidence that the normal inference to be drawn from such a market share would mislead.

It is regrettable that antitrust cases are decided on the basis of theoretical guesses as to what particular market-structure characteristics portend for competition, but to place on the government an insuperable burden of proof is not the answer. We would like to see more effort put into studying the actual effect of concentration on price in the hospital industry as in other industries. If the government is right in these cases, then, other things being equal, hospital prices should be higher in markets with fewer hospitals. This is a studiable hypothesis, by modern methods of multivariate statistical analysis, and some studies have been conducted correlating prices and concentration in the hospital industry. Kopit & McCann, *Toward a Definitive* **[**25]** *Antitrust Standard for Nonprofit Hospital Mergers*, 13 Journal of Health Politics, Policy & Law 635, 645-46 and n. 30 (1988) (discussing studies); Blackstone & Fuhr, *Hospital Mergers and Antitrust: An Economic Analysis*, 14 *id. at 383 (1989)*; Dranove, Shanley & Simon, *Is Health Care Competition Wasteful? No!* (U.Chi.Grad.Sch.Bus., March 1, 1990). Unfortunately, this literature is at an early and inconclusive stage, and the government is not required to await the maturation of the relevant scholarship in order to establish a prima facie case. Cf. *Allen v. Seidman, 881 F.2d 375, 378-80 (7th Cir. 1989)*. ***HN12***[] The principles of civil procedure do not require that the plaintiff make an airtight case, only that his case satisfy some minimum threshold of persuasiveness and be better than the defendant's case. The government showed large market shares in a plausibly defined market in an industry more prone than many to collusion. The defendants responded with conjectures about the motives of nonprofits, and other will o' the wisps, that the district judge was free to reject, **[**26]** and did. The judge's findings establish a violation of *section 1* under the standards of *Columbia Steel*, and the judgment must therefore be affirmed without our needing to decide whether the district judge was correct in holding that section 7 does reach mergers between nonprofit corporations.

The defendants press upon us a recent, not-to-be published (and therefore nonprecedential) opinion by the Fourth Circuit, *United States v. Carilion Health System, 892 F.2d 1042 (4th Cir. 1989)*, affirming a decision in favor of the defendants in a hospital-merger case much like this one. *707 F. Supp. 840 (W.D.Va. 1989)*. The discussion in the Fourth Circuit's opinion is brief, indeed perfunctory, consisting as it does very largely of a conclusion that the district court's findings were not clearly erroneous; in any event the court did not want its decision to have a precedential effect. As for the discussion by the district court in *Carilion*, we find it unpersuasive as well as inconsistent with our analysis in *Hospital Corporation of America* -- a case cited by neither the district court nor the court of appeals in *Carilion*.

AFFIRMED.

End of Document

United States v. Western Elec. Co.

United States Court of Appeals for the District of Columbia Circuit

December 6, 1989, Argued ; April 3, 1990, Decided

LexisNexis® Headnotes

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN1[] **Entry of Judgments, Consent Decrees**

The construction of a consent decree is subject to de novo appellate review.

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN2[] **Entry of Judgments, Consent Decrees**

While the meaning of a consent decree's terms must be discerned within its four corners, the court's inquiry is guided by conventional aids to construction, including the circumstances surrounding the formation of the consent order and any technical meaning words used may have had to the parties.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

Civil Procedure > Appeals > Standards of Review > General Overview

Contracts Law > Defenses > Ambiguities & Mistakes > General Overview

Administrative Law > Judicial Review > Standards of Review > General Overview

HN3[] **Standards of Review, Deference to Agency Statutory Interpretation**

Appellate courts do not normally defer to anyone else's non-contemporaneous interpretations of the Constitution, statutes, cases, or contracts -- whether or not the interpreter was also the drafter of the language at issue. When the court defers to agency interpretations of their own ambiguous statutes, it does so on the assumption that Congress delegated to departments or agencies the reconciliation of agency policies implicated in that function -- institutional concerns not present when reviewing district court opinions.

Administrative Law > Judicial Review > Standards of Review > General Overview

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Appeals > Standards of Review > General Overview

HN4[] **Judicial Review, Standards of Review**

The Justice Department's interpretation of the law is not normally given deference in a civil or criminal case; in federal courts, departments' and agencies' legal views are deferred to only when they make a determination, either quasi-legislative or quasi-judicial, that has independent legal significance -- as opposed to when they act in a prosecutorial role.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Antitrust & Trade Law > ... > Settlements > Consent Judgments > Modification & Termination

Civil Procedure > Appeals > Standards of Review > General Overview

HN5[] **Settlements, Consent Judgments**

A less demanding standard of review applies to an uncontested motion to modify a consent decree than applies to a contested one. Unless the parties have expressly agreed otherwise, an antitrust defendant can prevail on a contested motion to reduce or eliminate its obligations only if it can make a clear showing of grievous wrong evoked by new and unforeseen conditions. But when all parties to a decree assent to a particular modification, the relevant inquiry for the court is whether the resulting array of rights and liabilities comports with the public interest.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

HN6[] **Settlements, Consent Judgments**

An important general rule of decree construction is the presumption that the parties, absent any expressly stated intention to the contrary, intended to adopt the ordinary substantive standards that attend decree modification.

Civil Procedure > Appeals > Standards of Review > General Overview

HN7[] **Appeals, Standards of Review**

Resolving the disputed factual issues would be wholly inconsistent with the function of an appellate court.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Civil Procedure > Appeals > Standards of Review > General Overview

HN8[] **Settlements, Consent Judgments**

Considering the flexibility of the public interest inquiry, the court's function is not to determine whether the resulting array of rights and liabilities is the one that will best serve society, but only to confirm that the resulting settlement is within the reaches of the public interest.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Adverse Determinations

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN9[] Reviewability of Lower Court Decisions, Adverse Determinations

In order to have standing, a party must demonstrate an injury in fact fairly traceable to the conduct it is challenging and likely to be redressed by the relief it has requested. While the necessary injury is not susceptible to precise definition, it must be distinct and palpable, and not merely hypothetical, abstract, or conjectural.

Counsel: Stephen M. Shapiro, with whom R. Frost Branon, Jr. for BellSouth Corporation; Richard W. Odgers, Margaret deB. Brown and Stanley J. Moore for Pacific Telesis Group; James D. Ellis and James S. Golden for Southwestern Bell Corporation; Robert A. Levetown and John Thorne for Bell Atlantic Corporation; Raymond F. Burke and Gerald E. Murray for NYNEX Corporation; Jeffrey S. Bork for US West, Inc., C. Douglas Floyd and Frank Cicero, Jr., were on the joint brief, for the Regional Telephone Company Appellants. Abbott B. Lipsky, Jr. for Bell South Corporation; Liam S. Coonan and Paul G. Lane for Southwestern Bell Corporation; Mark J. Mathis, James R. Young, John M. Goodman and Michael D. Lowe for Bell Atlantic Corporation; Robert V. R. Dalenberg and Martin Silverman for NYNEX Corporation, also entered appearances for the Regional Telephone Companies.

Laurence H. Tribe, with whom R. Frost Branon, Jr. for BellSouth Corporation; Richard W. Odgers and Margaret deB. Brown for Pacific Telesis Group; James D. Ellis and James S. Golden for Southwestern **[**2]** Bell Corporation; Robert A. Levetown and JohnThorne for Bell Atlantic Corporation; Raymond F. Burke and Gerald E. Murray for NYNEX Corporation; Jeffrey S. Bork for US West, Inc., Stephen M. Shapiro, Floyd Abrams, Abbott B. Lipsky, Jr., C. Douglas Floyd and Frank Cicero, Jr., were on the joint brief for the Regional Telephone Company Appellants Regarding Information Services. Liam S. Coonan and Paul G. Lane for Southwestern Bell Corporation; Mark J. Mathis, James R. Young, John M. Goodman and Michael D. Lowe for Bell Atlantic Corporation; Robert V. R. Dalenberg and Martin Silverman for NYNEX Corporation, also entered appearances for the Regional Telephone Companies.

Alison Leigh Smith, Attorney, Department of Justice, for Appellants United States of America. James F. Rill, Assistant Attorney General, Catherine G. O'Sullivan, Barry Grossman, Nancy C. Garrison and Andrea Limmer, Attorneys, Department of Justice, were on the brief, for Appellants United States of America.

Gretchen T. Dumas for Appellants The People of the State of California and the Public Utilities Commission of the State of California. Janice E. Kerr and J. Calvin Simpson also entered appearances for The people of **[**3]** the State of California and the Public Utilities Commission of the State of California.

John E. Ingle, Deputy Associate General Counsel, Federal Communications Commission, with whom Diane S. Killory, General Counsel, Daniel M. Armstrong, Associate General Counsel, and Linda L. Oliver, Counsel, Federal Communications Commission, were on the brief for Amicus Curiae urging remand.

Howard C. Davenport, with whom Gilbert E. Hardy, Mary J. Sisak and Peter G. Wolfe were on the brief, for Appellant Public Service Commission of the District of Columbia. Charles A. Tievsky also entered an appearance for Public Service Commission of the District of Columbia.

Howard J. Trienens, with whom David W. Carpenter, Francine J. Berry and Mark C. Rosenblum were on the brief, for Appellee AT & T. Jonathan S. Hoak also entered an appearance for AT & T.

Thomas S. Martin, Chester T. Kamin, Michael H. Salsbury, Anthony C. Epstein, Carl S. Nadler and John R. Worthington for MCI Communications Corporation; Kenneth E. Hardman for Comcast Cellular Communications, Inc. (f/k/a American Cellular Network Corporation); Peter A. Rohrbach and Anthony S. Harrington for National Telecommunications Network; Leon **[**4]** M. Kestenbaum, Michael B. Fingerhut and Philip M. Walker for US Sprint Communications Company Limited Partnership; Katherine M. Holden, Richard E. Wiley and R. Michael Senkowski for McCaw Communications Companies, Inc.; W. Theodore Pierson, Jr., Richard M. Singer and James W. Smith for Competitive Telecommunications Association; Raymond G. Bender, Jr. and Laura H. Phillips for Cybertel Corporation, were on the joint brief, for the Non-AT & T Interexchange and Mobil Services.

Robert F. Aldrich, with whom Albert Kramer for North American Telecommunications Association; Herbert E. Marks and James L. Casserly for Independent Data Communications Manufacturers Association; John W. Pettit and

Thomas K. Crowe for Tandy Corporation; Sue D. Blumenfeld and John L. McGrew for Telecommunications Industry Association, were on the joint brief of the Manufacturing Appellees.

Gene Kimmelman, with whom James S. Blaszak and Charles C. Hunter for Ad Hoc Telecommunications Users Committee; Bruce J. Weston and Margaret Ann Samuels for Ohio Consumers' Counsel; Gary L. Lieber, E. Jay Finkel and John M. Glynn for Maryland People's Counsel; Ian D. Volner and Mark L. Pelesh for Direct Marketing Association, **[**5]** were on the joint brief of the Telephone Consumers.

E. Barrett Prettyman, Jr., with whom John G. Roberts, Jr., Richard E. Wiley, Michael Yourshaw, Katherine M. Holden, William B. Baker and W. Terry Maguire for American Newspaper Publishers Association; Werner K. Hartenberger and Laura H. Phillips for Cox Enterprises, Inc.; Frank W. Lloyd and Diane B. Burstein for Leghorn Telepublishing Company; Brenda L. Fox, H. Bartow Farr, III, Joel I. Klein and Robert H. Tiller for National Cable Television Association, Inc.; John W. Pettit and Thomas K. Crowe for Phone Programs, Inc.; Richard E. Wiley and Robert J. Butler for Information Industry Association; Randolph J. May for CompuServe, Inc.; Sue D.Blumenfeld and John L. McGrew for The Dun and Bradstreet Corporation; Henry L. Baumann and Robert E. Branson for National Association of Broadcasters, were on the joint brief for Electronic Publishing Participants.

Joseph P. Markoski for ADAPSO; Howard D. Polsky for Alarm Industry Communications Committee; Stephen R. Bell for Tymnet-McDonnell Douglas Network Systems Company; Simon Lazarus, III for the Computer and Business Equipment Manufacturers Association; Phillip M. Walker and Donald E. Ward **[**6]** for Telenet Communications Corporation, were on the joint brief Regarding Information Services. Ann J. LaFrance also entered an appearance for Tymnet McDonnell Douglas Network Systems Company.

Laurence H. Tribe, with whom R. Frost Branon, Jr. for BellSouth Corporation; Richard W. Odgers and Margaret deB. Brown for Pacific Telesis Group; James D. Ellis, Liam S. Coonan and Paul G. Lane for Southwestern Bell Corporation; Robert A. Levetown, John Thorne and Michael D. Lowe for Bell Atlantic Corporation; Raymond F. Burke, Gerald E. Murray and Mary McDermott for NYNEX Corporation; Jeffrey S. Bork for US West, Inc., Stephen M. Shapiro, Kenneth J. Chesebro, Abbott B. Lipsky, Jr. and C. Douglas Floyd, were on the brief, of the Regional Telephone Companies Supporting the Decisions on Information Transmission and Storage Services and Non-Telecommunications Businesses. Mark J. Mathis, James R. Young, John M. Goodman and Michael D. Lowe for Bell Atlantic Corporation; Robert V. R. Dalenberg and Martin Silverman for NYNEX Corporation, also entered appearances for the Regional Telephone Companies.

Martin T. McCue and Rodney L. Joyce were on the brief for Intervenor United States Telephone Association.

[7]** Samuel A. Simon for Black Citizens for a Fair Media, et al.; Phillip D. Mink for Citizens for a Sound Economy Foundation; Henry Geller and Donna Lampert for Henry Geller, et al., were on the joint brief for Intervenors and amici, urging reversal. Harry M. Shooshan, III also entered an appearance for Henry Geller, et al.

L. Andrew Tollin was on the brief for Intervenor The Media Institute.

Thomas S. Martin, with whom John R. Worthington, Chester T. Kamin, Michael H. Salsbury and Anthony C. Epstein for MCI Communications Corporation; Frank W. Lloyd and Diane B. Burstein for Leghorn Telepublishing Company; Ian D. Volner and Mark L. Pelesh for Direct Marketing Association; Bruce J. Weston and Margaret Ann Samuels for Ohio Consumers' Counsel; Howard D. Polsky for Alarm Industry Communications Committee; Randolph J. May for CompuServe, Inc.; R. Michael Senkowski and Katherine Holden for McCaw Cellular Communications, Inc.; Werner K. Hartenberger and Laura H. Phillips for Cox Enterprises, Inc.; Charles H. Helein and Laura H. Phillips for Enhanced Services Council; Peter A. Rohrbach for National Telecommunications Network; Brenda L. Fox and Joel I. Klein for National Cable Television **[**8]** Association, Inc.; Leon M. Kestenbaum and Michael B. Fingerhut for US Sprint Communications Company Limited Partnership; Herbert E. Marks and James L. Casserly for Independent Data Communications Manufacturers Association, Inc.; John W. Pettit and Thomas K. Crowe for Tandy Corporation; John M. Glynn, Gary L. Lieber and E. Jay Finkel for Maryland People's Counsel; Kenneth E. Hardman for Comcast Cellular Communications, Inc.; Raymond G. Bender, Jr. and Laura H. Phillips for Cybertel Corporation; James S. Blaszak and Charles C. Hunter for Ad Hoc Telecommunications Users Committee; Sue D. Blumenfeld and John L. McGrew for The Dun and Bradstreet Corporation and Telecommunications Industry Association; Paul

H. Vishny for Telecommunications Industry Association; Henry L. Baumann and Robert E. Branson for National Association of Broadcasters; Gene Kimmelman for Consumer Federation of America; Joseph P. Markoski for ADAPSO; Albert H. Kramer and Robert F. Aldrich for North American Telecommunications Association; W. Terry Maguire and Claudia M. James for American Newspaper Publishers Association; Richard E. Wiley, Michael Yourshaw, Katherine M. Holden and William B. Baker for American Newspaper **[**9]** Publishers Association; Ashton R. Hardy for Radiofone, Inc.; Stephen R. Bell for Tymnet-McDonnell Douglas Network Systems Company; W. Theodore Pierson, Jr. and James M. Smith for Competitive Telecommunications Association, were on the joint brief for Appellees and Intervenors supporting the line of business restrictions.

Alexander P. Humphrey and Frank W. Krogh entered appearances for Appellee General Electric Communications and Services; Joseph P. Markoski and Herbert E. Marks entered appearances for Appellee Association of Data Processing Service Organization, Richard E. Wiley, R. Michael Senkowski and Robert J. Butler also entered appearances for Appellees Telocator Network of America, Association of Telemessaging Services, Int'l, Martin Marietta Corporation, Digital Equipment Corporation, Trintex, Tele-Communications Association, and Information Industry Association.

John L. Bartlett and Robert J. Butler entered appearances for Appellee Aeronautical Radio, Inc.

Genevieve Morelli entered an appearance for Appellee ALC Communications Corporation.

Michael Yourshaw and Katherine M. Holden also entered appearances for Appellee Teleport Communications.

Henry D. Levine and Brant **[**10]** S. Karstetter entered appearances for Appellee California Bankers Clearing House, et al.

Arnold J. Barer entered an appearance for Appellees Phonequest, Inc., et al.

Alfred Winchell Whittaker entered an appearance for Appellee American Information Technologies Corporation.

Lawrence R. Fullerton and Simon Lazarus, III entered appearances for Appellee Hayes Microcomputer Products, Inc.

Norman P. Leventhal and Steven N. Muchnick entered appearances for Appellee Digital Directory Assistance, Inc.

Andrew G. Mulitz entered an appearance for Appellee Organization for the Protection and Advancement of Small Telephone Companies (OPASTCO).

John H. Chapman entered an appearance for Appellee Computer and Communications Industry Association.

Andrew D. Lipman and Russell M. Blau entered appearances for Appellee David Systems, Inc.

Paul Rodgers, Charles D. Gray and Lisa M. Zaina entered appearances for Appellee National Association of Regulatory Utility Commission.

Milton J. Grossman, Richard Juhnke and Arthur Simms entered appearances for Appellee The Western Union Telegraph Company.

Charles D. Ferris and Howard J. Symons entered appearances for Appellee Telocator Network of **[**11]** America.

Opinion by: PER CURIAM

Opinion

[*289] Opinion for the Court filed PER CURIAM.

As part of the 1982 consent decree that severed the seven Regional Bell Operating Companies ("BOCs") **[**12]** from AT & T, the parties agreed that the BOCs, which inherited AT & T's local exchange monopoly, would be prohibited from providing interexchange (long distance) or information services, manufacturing telephone equipment, and participating in any non-telecommunications industry. The district judge retained jurisdiction over the case, and the Department of Justice ("DOJ") pledged to report to the court every three years as to the continuing need for these "line of business" restrictions. In the first such "Triennial Review," after considering the DOJ's report, as well as the comments of the other parties and dozens of other individuals and organizations, the district judge issued two opinions lifting the restriction against BOC participation in non-telecommunication businesses, modifying the restriction against their entering the information services market, and leaving intact the interexchange and manufacturing restrictions. *See United States v. Western Elec. Co., 673 F. Supp. 525 (D.D.C. 1987)*; *United States v. Western Elec. Co., 714 F. Supp. 1 (D.D.C. 1988)*. With the exception of the district judge's ruling dealing with information services -- **[**13]** which we reverse and remand -- we affirm.

I.

A. *The 1982 Consent Decree*

In 1974, the DOJ filed this antitrust suit against AT & T. After seven years of pretrial proceedings, the case was tried in district court for eleven months but did not culminate in a verdict. Instead, the parties submitted a proposed consent decree to the court for review according to the "public interest" standard prescribed by the Antitrust Procedures and Penalties Act, *15 U.S.C. § 16(b)-(h)* ("Tunney Act"). After extensive Tunney Act proceedings, and after the parties agreed to certain modifications added by the district judge, the district court approved the decree.[1] **[**14]** *See United States v. American Tel. & Tel. Co., 552 F. Supp. 131 (D.D.C. 1982)*, *aff'd sub nom. Maryland v. United States, 460 U.S. 1001, 75 L. Ed. 2d 472, 103 S. Ct. 1240 (1983)*.[2]

Although the district court made no explicit findings of liability in the course of the Tunney Act proceedings, it did examine whether the evidence was sufficient to warrant antitrust relief. *See 552 F. Supp. at 161*. The evidence indicated that AT & T or the "Bell System" was, at the time of the trial, a massive, vertically-integrated enterprise which enjoyed a monopoly in local exchange services, provided long distance service, designed and developed telephone equipment (through Bell Laboratories), and manufactured that equipment at its wholly-owned subsidiary, Western Electric. AT & T used its local exchange monopoly -- the so-called "bottleneck" -- in a number of ways to promote its own affiliated operations in the long distance and equipment fields. In the interexchange field, other **[**15]** providers such as MCI were dependent on AT & T's local exchange facilities since there was no other

---

[1] Although the district court never determined whether the Tunney Act was technically applicable to this case, the parties consented to have the Tunney Act procedures applied. *See AT & T*, 552 F. Supp. at 145.

[2] Justice Rehnquist, joined by two other justices, dissented from the Supreme Court's summary affirmance because they questioned whether the application of an undefined "public interest" standard falls within the judicial power under Article III. *See 460 U.S. at 1001-06*.

way to reach the ultimate consumer. AT & T therefore had a strong incentive to provide **[*290]** more expensive or inferior quality local exchange access to its long distance competitors than it provided to itself. According to the DOJ, despite vigilant FCC attempts to prevent it, AT & T was able to discriminate against its interexchange competitors and, in that way, to stave off significant interexchange competition. *See* 552 F. Supp. at 160-63.

In the equipment market, the BOCs purchased over eighty percent of the nation's central office switches and transmission equipment and nearly always purchased that equipment from AT & T's Western Electric affiliate, even when those products were more expensive or of lesser quality than equipment available from competing vendors. The BOCs and Bell Labs also preferred Western Electric over competitors by granting it early and otherwise advantageous access to technical data and other information about the BOCs' equipment requirements. Finally, there was evidence that AT & T cross-subsidized its equipment prices offered by its **[**16]** Western Electric affiliate using its monopoly revenues from local exchange services, thereby enabling Western Electric to undersell its competitors while telephone consumers were effectively overcharged for their local telephone service. Again, all of this was apparently carried out notwithstanding the FCC's best efforts to stop it. *See* 552 F. Supp. at 190-92.

Under the consent decree, AT & T retained its long distance and equipment manufacturing operations but agreed to divest itself of its local exchange monopoly, transferring those operations to the BOCs [3] which were to become totally separate from AT & T. In turn, the BOCs were to be limited to the provision of local exchange services and precluded from participating in the markets for interexchange (long distance) services, [4] **[**18]** equipment manufacturing, information services, [5] and all other non-telecommunications businesses. *See* 552 F. Supp. at 227-28. The BOCs were, however, permitted to provide -- but not manufacture -- customer premises equipment and also to produce, publish, and distribute "Yellow Pages" directories. *See* 552 F. Supp. at 231. These line of business restrictions **[**17]** were premised on the notion that, because the BOCs still controlled the local exchange bottlenecks, there was a risk that they would engage in the same sort of anticompetitive abuses that AT & T had. *See* 552 F. Supp. at 187-191.

Before approving the restrictions, the district judge scrutinized them carefully to ensure "that they will not actually limit competition by unnecessarily barring a competitor from a market." 552 F. Supp. at 186. He rejected as overly simplistic the DOJ's equation of the post-divestiture BOCs with the pre-divestiture Bell System based simply on the proposition that they both possessed a monopoly in local telecommunications. The separated BOCs, the district judge recognized, would be far more manageable monopolists for regulators to oversee than AT & T had been because they would **[**19]** be regional rather than national in scope, they would not be vertically integrated, and, if permitted to enter competitive **[*291]** markets, they would face "the most potent conceivable competitor: AT & T itself." 552 F. Supp. at 187. He therefore ruled that the Tunney Act's public interest standard would permit banning the BOCs from a market only if there was a substantial possibility that the BOCs would use monopoly power to

---

[3] Under the reorganization plan submitted by AT & T and approved by the court, the 22 BOCs were consolidated into seven Regional Holding Companies. *See* United States v. Western Elec. Co., 282 U.S. App. D.C. 347, 569 F. Supp. 1057 (D.D.C.), *aff'd sub nom.* ***California v. United States, 464 U.S. 1013, 78 L. Ed. 2d 719, 104 S. Ct. 542 (1983)***. For simplicity, we continue to refer to these Regional Holding Companies as the "BOCs."

[4] According to section IV(K) of the decree, "'interexchange telecommunications' means telecommunications between a point or points located in one exchange telecommunications area and a point or points located in one or more other exchange areas or a point outside an exchange area." 552 F. Supp. at 229. "Exchange areas" are geographic areas of jurisdiction established by the BOCs according to criteria set out in the decree. *See id*.

[5] Section IV(J) of the decree defines "information services" as:

> the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information which may be conveyed via telecommunications, except that such service does not include any use of any such capability for the management, control, or operation of a telecommunications system or the management of a telecommunications service.

552 F. Supp. at 229.

impede competition in that market. *552 F. Supp. at 187*. As part of that "public interest" analysis, the district judge undertook a two-part inquiry to determine for each market barred to the BOCs whether (1) the BOCs would actually have the incentive and opportunity to act anticompetitively and (2) whether the participation of the BOCs would contribute to the creation of a competitive market. *See* *552 F. Supp. at 187, 188-94*. In addition, the district judge examined the effect of the restrictions on "important public policies." *552 F. Supp. at 187*. The district judge ultimately determined that the proposed restrictions were indeed warranted.

The line of business restrictions were not meant necessarily **[**20]** to be permanent, however. The district judge retained jurisdiction [6] and insisted that a mechanism be inserted into the decree for removing them at a later date. Rejecting the DOJ's view that mere monopoly power in local exchange services warranted the restrictions, the district judge thought that removal of the restrictions should be governed by a standard that allows a petitioning BOC to prove that there is no substantial possibility that the BOC could use its monopoly power to impede competition in the relevant market. *See* *552 F. Supp. at 195*. The district judge therefore drafted, and the parties agreed to, section VIII(C) of the decree, which reads:

> The restrictions imposed upon the separated BOCs by virtue of section II(D) [the line of business restrictions] shall be removed upon a showing by the petitioning BOC that there is no substantial possibility that it could use its monopoly power to impede competition in the market it seeks to enter.

552 F. Supp. at 231. This removal standard was intended to supplant the "test usually applied to a contested modification of a consent decree," set out in *United States v. Swift &* **[**21]** *Co.* that asks whether "'unforeseen conditions'" make modification appropriate. *See* *552 F. Supp. at 195 n. 266* (quoting *United States v. Swift & Co., 286 U.S. 106, 119, 76 L. Ed. 999, 52 S. Ct. 460 (1932))*. Whether section VIII(C) would also apply to *uncontested* modifications is a question upon which the district court was silent in 1982.

[22]** B. *The Triennial Review*

When the decree was entered, the DOJ pledged to report to the court on the third anniversary of divestiture and every three years thereafter on the continuing need for the line of business restrictions. Since divestiture was not actually accomplished until 1984, the first such Triennial Review was held in 1987. The DOJ hired an independent consultant, Peter Huber, to conduct in-depth research on the telecommunications industry as a whole as well as on each of the relevant sub-markets. The *Huber Report* provided the factual basis for the DOJ's preliminary submission, filed with the district court in February 1987, in which it recommended the complete removal of the manufacturing, non-telecommunications, and information restrictions as well as the modification of the interexchange restriction. Quite clearly, the DOJ's position -- which conceded the continued existence of the BOCs' local exchange monopoly -- represented a significant change from its position when the decree was entered that mere monopoly power in local exchange services necessitated the restrictions.

[*292] After studying the comments of the parties and intervenors on its **[**23]** recommendations, the DOJ formally moved the court -- apparently under section VIII(C) of the decree -- for the removal of all the line of business restrictions, with the exception of the interexchange restriction. The DOJ was evidently persuaded to alter its position on interexchange services, and it instead asked the court to leave the restriction intact but to grant waivers as soon as local regulation in a given area is lifted. The Department believes that the BOCs' bottleneck

---

[6] Section VII of the decree is entitled "Retention of Jurisdiction" and reads:

> Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Modification of Final Judgment, or, after the reorganization specified in section I, a BOC to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Modification of Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of any violation hereof.

552 F. Supp. at 231.

monopolies persist primarily because of local regulation which, if removed, would allow potentially competitive access alternatives to be made available by new technology. The seven BOCs also filed motions under section VIII(C) of the decree asking for complete removal of all the line of business restrictions.

The district court held proceedings in which interested persons were invited to comment and respond to the report and the motions. With respect to the non-telecommunications and information services restrictions, all of the parties to the original decree -- AT & T, the BOCs, and the DOJ -- as well as the FCC agreed that the restrictions should be removed. [7] AT & T opposed any modification of the other **[**24]** restrictions, thus making those BOC motions undeniably "contested." Not surprisingly, numerous existing participants in the markets that the BOCs sought to enter intervened and vigorously opposed each of the proposed modifications. And, as noted above, the DOJ opposed the complete removal of the interexchange restriction.

After discussing the standard for removal of restrictions under section VIII(C) of the decree, the district judge determined that the BOCs still possessed a bottleneck monopoly over local exchange service. *See 673 F. Supp. at 536-40*. The court then analyzed each line of business restriction to decide whether the BOCs had nevertheless met their burden under section VIII(C) to warrant removal. In reviewing the restriction concerning nontelecommunications businesses, **[**25]** the court noted that it had routinely reviewed and granted requests to waive this restriction since the decree became operational in 1984. Despite losing the safeguards that the waiver process afforded by virtue of the conditions imposed whenever a waiver was granted, [8] the district court removed the restriction entirely because potential competitors did not actively oppose the removal and because cross-subsidization is more difficult in enterprises unrelated to telecommunications. *See 673 F. Supp. at 599*. In addition, the court asserted that lifting the restriction would eliminate a significant burden on BOCs' business planning and free the court from unnecessary and detailed oversight of BOC decisions. *See id.*

[26]** The district judge left largely intact the decree's so-called "core" restrictions -- those regarding interexchange services, manufacturing, and information services. The manufacturing and interexchange restrictions remained completely unchanged since the district court rejected arguments that circumstances had changed since the issuance of the decree so as to justify the BOCs' entrance into those markets under the standard imposed by section VIII(C). The district judge did grant partial relief to the BOCs on the information services provision but rejected the request of the DOJ and the BOCs to remove the restriction entirely for much the same reasons as he left the manufacturing and interexchange restrictions in place. The court asserted that information services are vulnerable even to slight manipulation and discrimination in access or transmission quality, **[*293]** thereby making it especially easy for the BOCs to use their bottleneck monopolies anticompetitively if they entered the market. *See 673 F. Supp. at 566*. Nevertheless, the information restriction was lifted insofar as it prevented the BOCs from providing transmission of information services generated **[**27]** by others. *See 673 F. Supp. at 587-97*. The district judge described the economic and social advantages of making information services more widely available and noted that the telephone system was perhaps the only means of accomplishing that goal, because it uniquely offers providers a means "to reach large, dispersed audiences over reasonably priced, interactive facilities." *673 F. Supp. at 564*. So long as the BOCs do not compete with the companies that *generate* the information services, the district judge reasoned, they would have an incentive to afford the widest, fastest, and highest quality access and transmission to all information providers, thereby maximizing their own revenues. This determination was further explained and substantially reaffirmed by the district judge following a separate proceeding held to work out the details of the information services restriction. *See 714 F. Supp. at 1*. All of these rulings have been appealed.

II.

---

[7] AT & T stated that it did not oppose information services relief for the BOCs but argued that any modification of that restriction should be made pursuant to section VII of the decree, not under section VIII(C).

[8] The court normally required the BOCs to operate the competitive business through a separate subsidiary that would obtain its own debt financing. Furthermore, the total net revenues for all non-telecommunications activities engaged in by a single BOC were limited to ten percent of that company's total net revenues. These conditions were designed to minimize the risk of cross-subsidization and to guarantee that the BOCs would not neglect their primary responsibility of providing local telephone service. *See* ***673 F. Supp. at 598***.

A. *Standard of Review*

HN1[] We have repeatedly held that the construction of a consent decree **[**28]** (indeed of this particular consent decree) is subject to *de novo* appellate review. *See United States v. Western Elec. Co., 282 U.S. App. D.C. 347, 894 F.2d 1387, 1390 (D.C.Cir. 1990)*; *United States v. Western Elec. Co., 269 App. D.C. 436, 846 F.2d 1422, 1427* (D.C.Cir.), *cert. denied*, *488 U.S. 924, 109 S. Ct. 306, 102 L. Ed. 2d 325 (1988)*; *United States v. Western Elec. Co., 254 App. D.C. 415, 797 F.2d 1082, 1089 (D.C.Cir. 1986)*, *cert. denied*, *480 U.S. 922, 94 L. Ed. 2d 698, 107 S. Ct. 1384 (1987)*; *see also United States v. Armour & Co., 402 U.S. 673, 681-82, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)*. "We read the Decree essentially as we would a contract. *See United States v. ITT Continental Baking Co., 420 U.S. 223, 236-37, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975)*; *United States v. Western Elec. Co., 254 App. D.C. 415, 797 F.2d 1082, 1089 (D.C. Cir. 1986)* ("*Western Elec. II"), cert. denied*, *480 U.S. 922, 107 S. Ct. 1384, 94 L. Ed. 2d 698 (1987)*. **[**29]** Thus, ***HN2***[] while the meaning of the Decree's terms 'must be discerned within its four corners,' *United States v. Armour & Co., 402 U.S. 673, 682, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)*, our inquiry is guided by conventional 'aids to construction,' including 'the circumstances surrounding the formation of the consent order [and] any technical meaning words used may have had to the parties . . .' *ITT Continental Baking Co., 420 U.S. at 238*." *United States v. Western Elec. Co., 894 F.2d at 1390*.

Appellees nevertheless urge us to employ an "abuse of discretion" standard of review, arguing that what we are reviewing here is the district judge's decision not to modify the consent decree -- subject to review only for abuse of discretion, *see System Fed'n No. 91 v. Wright, 364 U.S. 642, 647-48, 5 L. Ed. 2d 349, 81 S. Ct. 368 (1961)* -- rather than his interpretation of the decree. We think that is an inaccurate description of this proceeding. At least insofar as the district court was faced with motions brought under section VIII(C), it was not asked by any appellant to modify the decree; it was asked to apply it. To the **[**30]** limited extent that that process might require the district judge to find facts (for instance, to determine whether the BOCs still possess monopoly power over local exchange services), we would review under a clearly erroneous standard. *Cf. City of Las Vegas v. Lujan, 282 U.S. App. D.C. 57, 891 F.2d 927, 931 (D.C.Cir. 1989)*. But the legal standard for lifting the line of business restrictions pursuant to a BOC motion is explicitly provided by section VIII(C) of the decree and therefore the district judge need not "balance [any] imponderables," *Wright, 364 U.S. at 648*, in deciding whether to remove them as he might in a case seeking modification. Indeed, the district court enjoys no equitable discretion at all in applying section VIII(C); if the petitioning BOC makes the required showing, the district court "shall" remove the restriction. Therefore, aside from fact-finding, **[*294]** we owe no deference to the district court's decisions under section VIII(C). And to the extent that we review the district court's conclusions about the scope of the applicability of section VIII(C) (as opposed to section VII) for modifications, that is clearly a **[**31]** pure question of law subject to plenary review. [9]

Further, we reject the suggestion -- apparently embraced by other circuits, *see, e.g., Keith v. Volpe, 784 F.2d 1457, 1461 (9th Cir. 1986)* -- that this particular district judge's interpretations should be afforded some "special" deference because he drafted the pivotal provision of the decree, section VIII(C), and because he has had enormous experience overseeing the case and the decree since its inception. In addition to our discomfort with the concept that the degree of deference we afford should depend even in part on the identity of a **[**32]** district judge hearing the case below, we also note that ***HN3***[] appellate courts do not normally defer to anyone else's non-contemporaneous interpretations of the Constitution, statutes, cases, or contracts -- whether or not the interpreter was also the drafter of the language at issue. When we defer to agency interpretations of their own ambiguous statutes, *Chevron U.S.A. Inc. v. NRDC, 467 U.S. 837, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984)*, or of contracts, *National Fuel Gas Supply Corp. v. FERC, 258 App. D.C. 374, 811 F.2d 1563* (D.C.Cir.), *cert. denied*, *484 U.S. 869, 98 L. Ed. 2d 151, 108 S. Ct. 200 (1987)*, we do so on the assumption that Congress delegated to departments or

---

[9] We need not decide here whether "abuse of discretion" is the proper standard for reviewing the district court's decisions concerning modification under section VII -- where the district judge is apparently called upon to apply a public interest standard. *But cf. Maryland v. United States, 460 U.S. 1001, 1001-06, 75 L. Ed. 2d 472, 103 S. Ct. 1240 (1983)* (Rehnquist, J., dissenting).

agencies the reconciliation of agency policies implicated in that function -- institutional concerns not present when we review district court opinions. [10]

[33]** B. *Applicability of Section VIII(C)*

Except for some BOC petitions regarding information services, the BOCs and the DOJ brought, and the district court analyzed, all of the motions to lift the line of business restriction under the standard set out in section VIII(C) of the decree. It is unclear to us, however, that section VIII(C) applies at all to some of those motions. In the first place, section VIII(C) refers to "a showing by the *petitioning BOC*," and thus on its face contemplates only petitions brought by BOCs. The DOJ's hard-line position in favor of the restrictions in 1982 further indicates that when the parties agreed to the decree, none of them contemplated that the DOJ would seek to invoke section VIII(C). We do not see, therefore, how the DOJ can petition for removal of restrictions under section VIII(C). [11] That is not to suggest that if section VIII(C) is not available to the DOJ no avenue for requesting modification would be open to it. Section VII explicitly provides for modifications of the decree, and the district court would possess equitable power to modify the decree even if section VII were not included, *see* United States v. Swift & Co., 286 U.S. 106, 114-15, 76 L. Ed. 999, 52 S. Ct. 460 (1932). **[**34]** [12] **[*295]** Furthermore, as a party to the decree, the DOJ's position on any BOC petition would be considered by the district court in much the same way as is an intervenor's views -- whether it supports or opposes the petition. Strictly speaking, however, only the BOCs can be petitioners under section VIII(C).

[35]** We also believe that section VIII(C) does not apply to proposed modifications that are agreed to by all the parties to the decree, such as the motions for removal of the restrictions on BOC entry into the information services field. Section VIII(C) speaks of a "*showing* by the *petitioning* BOC," thereby indicating that it applies only to contested motions for removal -- and this reading comports with the intent of the parties as expressed to the district court in 1982. *See infra* Part III.C.1. As we explain more fully in Part III of this opinion, uncontested motions for modification -- those involving the information services and non-telecommunications businesses restrictions -- should be treated by the district judge under section VII of the decree, and should be approved so long as the modifications satisfy the "public interest" standard embodied in the Tunney Act. Thus, while both the district judge and the parties treated the removal of the line of business restrictions as though it were governed entirely by section VIII(C), that section was really the appropriate standard only for the BOC petitions for removal of the manufacturing and interexchange restrictions -- the **[**36]** former opposed by AT & T and the latter by both AT & T and the DOJ.

C. *The VIII(C) Standard*

The proper construction and application of section VIII(C) is nonetheless critical in reviewing the district court's decision not to remove the manufacturing and interexchange restrictions. There is no dispute, at least not on appeal, that the BOCs still possess their bottleneck monopolies in local exchange services. Despite certain technological innovations, only a minute percentage of telephone users can bypass the local exchange carriers for

---

[10] In interpreting the decree, we do, however, take careful account of the explanatory opinion issued by the district judge at the time the decree was entered, *see* 552 F. Supp. at 131, although we are, of course, not bound by it, *see* United States v. Western Elec. Co., 846 F.2d at 1429.

[11] When pressed at oral argument about the applicability of section VIII(C) to DOJ motions, counsel for the Department stated, surprisingly, that the Government had "no position" on the matter, noting that the Court had "not asked [the Department] to argue" that issue.

[12] The Government *opposed* the modification sought in *Swift*, and therefore it is not at all clear to us that the stringent, so-called "unforeseen conditions" test of *Swift* would apply to motions brought by the *DOJ* under section VII. Since the DOJ is, as plaintiff, the "Prime Mover" of this case, it may well be that modifications it seeks should be evaluated under a standard somewhat more akin to the "public interest" test of the Tunney Act. Still, it is true that the line of business restrictions were part of what AT & T bargained for in the original decree, therefore suggesting that the modification requests that AT & T opposes should perhaps be viewed differently from those that all the parties agree to. We need not pass judgment on this issue here since the DOJ brought no motion under section VII.

any of their calls. *See 673 F. Supp. at 536-40*. The question under VIII(C), then, is whether any petitioning BOC has made a showing "that there is no substantial possibility that it could use its monopoly power to impede competition in the market it seeks to enter." Given the enormous legal resources expended on the issue, it is hardly surprising that the parties hotly dispute the meaning of the quoted phrase and the proper scope of the district judge's inquiry in deciding whether the standard has been met. According to both the DOJ and the BOCs, the district court's analysis suffered from several flaws: (1) misconstruing **[**37]** the actual terms of section VIII(C) quoted above; (2) failing to accord deference to the recommendations and opinions of the DOJ and FCC; and (3) taking into account allegedly irrelevant factors while ignoring or discounting critical changes in the industry since the decree.

We begin with a close parsing of section VIII(C)'s terms. Section VIII(C) requires a BOC to show that there is no "*substantial* possibility that it could use its monopoly power to impede competition." According to the DOJ and the BOCs, the district court altered the decree by implicitly equating the phrase "substantial possibility" with a mere theoretical possibility. Since the BOCs concede that they could always theoretically use their local exchange monopolies to impede competition, they claim that this putative misreading was tantamount to a ruling that retention of the local exchange monopolies precludes relief from the interexchange and manufacturing restrictions under section VIII(C). They base this argument on the district court's statements to the effect that the local monopolies "continue to provide the same basis for anticompetitive activity as they did prior to the Bell System break-up." *673 F. Supp. at 543*. **[**38]** While we do not read the district court's opinion, as appellants do, to have amended the decree, *see, e.g.*, *673 F. Supp. at 536 n. 42* (explicitly rejecting the contention that "the restrictions are justified by the mere fact that a monopoly exists in an area"), the importance of the word "substantial" should not **[*296]** be minimized. The ultimate burden under section VIII(C) remains on the petitioning BOC, [13] but the requirement that the possibility of using its monopoly power to impede competition be "substantial" relieves the BOC of the essentially impossible task of proving that there is absolutely no way for it to use its monopoly power to impede competition. For example, the district judge's speculation that the BOCs could impede competition by way of illegal (and perhaps criminal) collusion to divide markets among them according to territory, *see 673 F. Supp. at 558*, would, in the absence of supporting evidence, seem to qualify only as a theoretical possibility.

[39]** The parties also differ markedly concerning what precisely is meant by section VIII(C)'s ambiguous phrase "*impede competition* in the market it seeks to enter." According to the DOJ, a BOC cannot impede competition in a given market unless it has market power -- the ability to restrict output and/or raise prices. AT & T argues that the district court's 1982 opinion equated impeding competition with "leveraging" monopoly power, something that AT & T claims a BOC can do so long as its local exchange monopoly is also an "essential facility" for the market it seeks to enter. Whatever it means to "leverage" one's monopoly power, the DOJ is surely correct that no damage to competition -- through "leverage" or otherwise -- can occur unless the BOCs can exercise market power. *Cf. General Leaseways, Inc. v. National Truck Leasing Ass'n., 744 F.2d 588, 596 (7th Cir. 1984)*. To be sure, it may be difficult to decide whether the BOCs would have such power if they were allowed to enter a market. Moreover, it may be necessary to refine the analysis to deal with markets in which self-dealing bias is a risk, such as the production of central office switches and transmission **[**40]** equipment. In those markets, a BOC might be able effectively to raise prices (disguised as costs in the local exchange market) or restrict output -- thereby impeding competition -- in the segment it controls or forecloses. *See infra* Part III.B. The district court, however, was apparently concerned with the possibility that BOC entry into new markets would disadvantage or destroy small and innovative firms in those markets. *See, e.g.*, *673 F. Supp. at 561* (castigating the DOJ for its indifference to the possible destruction of "many high-quality firms producing high-quality goods that have emerged since divestiture"). New entry or increased competition in any market typically hurts and sometimes even destroys existing competitors. A court's solicitude for those firms -- ostensibly in an effort to foster competition -- may well come at the expense of competition. *Cf. Cargill, Inc. v. Monfort, 479 U.S. 104, 115, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*.

---

[13] We do not agree with the district judge, however, that the BOCs' burden is "particularly heavy" because of the litigants' and the public's interest in the finality of judgments or because would -- be competitors of the BOCs invested "billions of dollars" in reliance on the line of business restrictions. *See* ***673 F. Supp. at 533 n. 25***. Any enterprise that read the decree and the district court's 1982 opinion could not reasonably have relied on the perpetual enforcement of the line of business restrictions in light of the inclusion of section VIII(C) and the explicit pledge to review the continuing need for the restrictions every three years. And any interest that any party conceivably has in the "finality" of this judgment is necessarily tempered by the same factors.

Accordingly, unless the entering BOC will have the ability to raise prices or restrict output in the market it seeks to enter, there can be no substantial possibility that it could use its monopoly **[**41]** power to "impede competition."

And while there may be some complexities in defining precise boundaries of the relevant market, one thing that is clear from section VIII(C) is that it is the "market [the BOC] seeks to enter" that matters, and *not* the local exchange market. For the most part, then, the district court should decide motions under section VIII(C) without regard to the effect BOC entry into new markets will have on local service ratepayers. Concern for the ratepayers' welfare is primarily the responsibility of the FCC and state regulators, not the district court. Appellees make much of DOJ's prior position before the district **[*297]** court when the decree was entered when the Department urged the court to consider the interests of ratepayers in its evaluation and implementation of the decree. The DOJ concedes the shift, and the only explanation we are given is its statements in two footnotes of its brief that it now believes, contrary to its stance in 1982, that line of business restrictions should not be used -- indeed, cannot be used under section VIII(C) -- to protect ratepayers of local exchange services rather than solely to protect competition in unregulated **[**42]** markets. While this may have been the DOJ's contention at the time, we see no clear evidence that ratepayer protection was part of the "contemporaneous understandings of [the decree's] purposes," *846 F.2d at 1427*. And, in any event, we believe the text of the decree generally forecloses the goal of ratepayer protection by the use of the words "the market [the BOC] seeks to enter."

In that regard, to the extent that the district court's consideration of cross-subsidization focused on the danger that the BOCs would overcharge local ratepayers, it was misconceived. *See, e.g.*, *673 F. Supp. at 557, 572*. Cross-subsidization is relevant under VIII(C) insofar as it may be used to price below cost in the competitive market, and thereby unfairly to acquire power and impede competition in that market. Still, the impact on the local exchange market of allowing BOC entry into a new market might well be relevant under section VIII(C) if the BOC is likely to be its own primary customer in the entered market, as with production of central office switches and transmission equipment. In that case, cross-subsidization or cost misallocation that allowed a BOC to **[**43]** pass on its (inflated) equipment costs to the local ratepayers would likely be the primary manifestation of market power and might constitute an impeding of competition *in the entered market. Cf.* 3 P. AREEDA & D. TURNER, ***ANTITRUST LAW***, para. 726 (1978).

Appellants also fault the district court for failing to give deference to the views of the FCC and the Justice Department with respect to the BOC petitions under section VIII(C). ***HN4***[] The Justice Department's interpretation of the law is not normally given deference in a civil or criminal case; in federal courts, departments' and agencies' legal views are deferred to only when they make a determination (either quasi-legislative or quasi-judicial) that has independent legal significance -- as opposed to when they act in a prosecutorial role. *See Michigan Citizens for an Indep. Press v. Thornburgh, 276 App. D.C. 130, 868 F.2d 1285* (D.C.Cir.), *aff'd by an equally divided Court, 493 U.S. 38, 107 L. Ed. 2d 277, 110 S. Ct. 398 (1989)*. Still it must not be forgotten that the Justice Department has the "principal **[**44]** responsibility for enforcing the Sherman Act." *Broadcast Music, Inc. v. Columbia Broadcasting Sys., Inc., 441 U.S. 1, 14, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. Therefore, although we see no doctrinal basis for the district court to defer to the DOJ's interpretation of the decree or its views about ***antitrust law***, it is to be expected that the district court would seriously consider the Department's economic analysis and predictions of market behavior. Indeed, it would seem that that is precisely why the district judge required the Department to report to the court every three years concerning the continuing need for the restrictions imposed by the decree. *See* *552 F. Supp. at 195*.

Economic analysis and market predictions are not an exact science. Antitrust scholars and courts have changed their views somewhat over the last fifty years concerning the interrelationship of the antitrust laws and market behavior. *Compare, e.g., United States v. Arnold, Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967) with Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)* **[**45]** (overruling *Schwinn* after determining that its *per se* rule against vertical nonprice restraints was not economically sound). *Also compare* Sullivan, *Economics and More Humanistic Disciplines: What are the Sources of Wisdom for Antitrust*?, 125 U.PA.L.REV. 1214 (1977) (arguing that economic efficiency is not the sole goal of the antitrust laws) *with* 1 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** paras. 103-113 **[*298]** (1978) *and* R. BORK, THE ANTITRUST PARADOX 50-89 (1978) (agreeing that courts should treat antitrust laws as designed solely to advance consumer welfare and efficiency). Consequently, we recognize that the DOJ may change its views -- to incorporate different policy concerns -- over time. That is not to say that we do not have any sympathy for the district court's attitude toward the DOJ's position changes in this Triennial Review. As we noted above, the DOJ in 1982 wanted the line of business restrictions to remain in place unless and until the BOCs lost their local exchange monopolies. With little warning or explanation, the DOJ completely altered its stance and is now generally hostile toward the restrictions. In the absence of a complete **[**46]** explanation of how and why the DOJ's position had changed, the district judge was understandably uneasy about relying on the DOJ in this first Triennial Review since to do so would be to undo much of the decree after only three years' time.

The FCC's claim to deference is perhaps even more puzzling to analyze. The FCC argues that the district court acted improperly when it evaluated the effectiveness of the FCC's regulatory scheme since that is solely the function of a court of appeals pursuant to direct review as provided by the Communications Act. The problem with this argument is that a court of appeals reviews FCC regulations only if they are challenged and only to ensure that they are not arbitrary and capricious. The district court below, however, was *obliged* to determine ultimately whether the FCC's regulations would effectively prevent the BOCs from using their monopoly power to impede competition in the markets they sought to enter. *Cf.* 846 F.2d at 1433. The very premise of this case was that the FCC could not effectively control AT & T. We think it would therefore have been an abdication of judicial responsibility for the district court to assume that **[**47]** the FCC's regulations would be effective merely because they had not been found to be arbitrary and capricious.

On the other hand, we recognize the institutional anomaly presented by a district judge placed in the position of evaluating the effectiveness of a federal agency's regulatory program. The DOJ, which brought this action based on its view that the FCC was incapable of preventing AT & T's abuse of monopoly power, would appear to be in a better position, both institutionally and practically, to evaluate the FCC's regulatory effectiveness. And, therefore, we would expect the district court to consider the Department's comparative advantage in performing that task. However, two of the principal FCC regulations that bear on this appeal, the *Joint Cost* and the *Computer III* rules, had not been finally implemented at the time this case was submitted to the district court. Thus the DOJ's assessments of those regulations that are in the record of this appeal are necessarily speculative. *See, e.g., infra* notes 16, 17, 21. Rather than hazard our own, necessarily under-informed, appraisal of how these rules have performed in the three years since this case was presented to **[**48]** the district court, we think it is more prudent to await the DOJ's assessment in subsequent Triennial Reviews. [14]

Appellants further argue that the district court erred in its application of section VIII(C) by considering factors it should have ignored while ignoring some that it should have considered. Most importantly, appellants take issue with the minimal significance that the district court placed on the break-up of AT & T's local exchange monopoly into seven separate BOCs in deciding whether to lift the line of business restrictions. The decree was premised on the notion that the BOCs would have both the incentive and the ability to use their local exchange monopoly to impede competition in these markets, therefore necessitating **[**49]** the line of business restrictions. *See* 552 F. Supp. at 187. Under section VIII(C), therefore, the BOCs must establish that something is different now from the time **[*299]** when the decree was entered so that they can no longer use their monopoly power to impede competition. Obviously, if all conditions and assumptions remain the same now as when the decree was entered, no relief can be due under section VIII(C).

While we reject the BOCs overly loose reading of the restrictions under section VIII(C), we also reject the appellees' overly rigid interpretation of those restrictions. The appellees appear to insist that the standard under section VIII(C) requires a finding of some *unforeseen* changed circumstances as an ingredient of the petitioners' showing necessary to justify removal of a line-of-business restriction. This construction finds no support in the language of the decree. Rather, the decree provides that a petitioning BOC is entitled to relief under section VIII(C) so long as it can prove that its ability to impede competition is no longer present. It would make no difference whether the

---

[14] Assuming after remand the BOCs are permitted entry into the information services market, we would also expect the DOJ's reports concerning BOC behavior in that market as well as the effectiveness of applicable FCC regulation to be critical in subsequent Triennial Reviews.

circumstances leading to that conclusion were entirely foreseen **[**50]** or even if they could not be discretely identified. Indeed, even if the economic assumptions or market predictions which governed the decree turned out to be in part wrong, the BOCs might thereby be entitled to relief under section VIII(C).

To be sure, as the district court noted, the mere existence of seven BOCs in place of the prior unified Bell System is not by itself a significant factor. Not only was it the very product of the decree, the seven continue to exercise monopoly power in the local exchange market. However, the other conditions in the various telecommunications markets wrought by divestiture and the behavior of the BOCs since divestiture are appropriately considered under section VIII(C), even if they were foreseen by the parties or incorporated into the fabric of the decree. These are not limited to obvious changes such as new competitors that did not exist or were not stable at the time of the decree. The court also may properly consider the manner in which the seven BOCs behave competitively against each other, AT & T, and other firms, as well as the way in which the various markets have evolved since the decree. It was feared, for instance, at the time the decree **[**51]** was entered that the BOCs would favor one another and AT & T over unrelated firms, a concern that now appears unfounded. Also appropriately considered in the section VIII(C) calculus is the asserted existence of "benchmarks" for comparing BOC performance. According to appellants and the FCC, these benchmarks would make it far easier to regulate the BOCs than the old Bell System if the BOCs were permitted to enter other markets. That the "possibility of the existence of benchmarks was necessarily included in the decree assumption which imposed the restrictions," *673 F. Supp. at 547*, makes them no less significant under section VIII(C). Indeed, the greater ease with which the FCC can regulate the BOCs merely because they have a monopoly in only one geographic portion of one of the markets controlled by AT & T prior to the decree -- although clearly contemplated (and therefore foreseen) at the time of the decree, *see [552 F. Supp. at 187](#)* -- is properly considered under section VIII(C). Of course, the district court still legitimately imposes on the petitioning BOCs the burden of making the requisite showing.

Finally, we consider appellants' claim that **[**52]** the district court strayed beyond the competitive analysis mandated by section VIII(C) when it considered the impact of removing the restrictions on various public policies, including the welfare of local ratepayers, innovation in the manufacturing market, the goal of universal telephone service, *[first amendment](#)* values, and the United States' position in international trade. The district court explained its discussion of these factors by noting that "the same standards may be applied in proceedings addressing continued viability of the restrictions as were used in determining whether the restrictions were to be imposed in the first place." *673 F. Supp. at 583*. We disagree. When the district court entered the decree in 1982, it decided -- as it was required to do under the Tunney Act -- whether the decree was in the public interest. Whatever the substance of the "public interest" standard, it is surely more far-ranging than the section VIII(C) standard. **[*300]** When a BOC petitions under section VIII(C) for the removal of a line of business restriction, section VIII(C) itself defines the limits of the district judge's inquiry. If a BOC makes the showing called for **[**53]** by section VIII(C), the district judge may not, for example, deny the motion because of the possible impact on the United States' balance of trade, or for any other reason not related to the antitrust laws. [15]

III.

We turn next to the district judge's rulings on the BOC motions to remove the interexchange and manufacturing restrictions. As we noted above, the BOC motions to remove these two restrictions were the only motions properly analyzed under section VIII(C) of the decree. We therefore need not separately consider the DOJ's motions, which were brought explicitly pursuant to section VIII(C), to the extent that those **[**54]** motions are different in substance from the BOC motions.

Despite our disagreements with the district judge concerning the matters described above, we agree that the BOCs did not satisfy their burden in this Triennial Review of showing that there was no substantial possibility that they could use their monopoly power to impede competition in these markets. On appeal, the DOJ and the BOCs focus their criticism on the district court's analysis and the standard it applied. As such, they ask us to remand for

---

[15] The district judge explicitly stated that his considerations of some of the public policies mentioned above "d[id] not have an actual impact on the Court's decisions." ***673 F. Supp. at 580***. While that disclaimer makes it somewhat unusual that he would include the sections of his opinion expressly dealing with those public policies, we take the district judge at his word.

reconsideration under the "legally correct VIII(C) standard." Since we conclude that the district court reached the correct results on the motions properly considered under VIII(C), there obviously is no reason to remand those motions to the district court.

A. *Interexchange Services*

The BOCs, supported by the FCC but not the DOJ, argue that the interexchange restriction should be removed in spite of the conceded persistence of their local exchange monopoly -- upon which interexchange carriers rely for access to ultimate consumers -- because changed circumstances since the decree would prevent them from impeding competition if they were permitted to enter the market. The DOJ **[**55]** opposes the BOCs' petition.

The district court noted that the interexchange market is currently competitive. Even though AT & T still retains a lion's share of the market, there are hundreds of long-distance carriers in the United States, eight of them serving twenty-five or more states. *See 673 F. Supp. at 550*. This apparently undisputed fact leads the district court to the curious observation that "the entry of the [BOCs] into that market is not necessary to give it vitality." *Id.* Section VIII(C) does not put the BOCs in the "Catch-22" that the district judge seems to imply by that statement -- that the restriction will not be lifted if the market to be entered is not competitive because the BOC will grab and wield market power nor will it be lifted if the market to be entered is highly competitive because the BOCs' presence is not "necessary." If the market to be entered is sluggish or concentrated, that might be an argument in favor of allowing BOC entry, although it might also make it easier for a BOC to acquire market power. But if the BOC wants to enter a *competitive* market, that is a powerful reason to grant the section VIII(C) petition since there **[**56]** is less of a danger that the BOC will be able to seize and wield market power.

Nevertheless, we agree with the district court's conclusion regarding the changes in the interexchange market. The crux of the BOCs' argument is that equal access for all interexchange carriers has been achieved and cross-subsidization eliminated, thus closing off the primary way for the BOCs to acquire market power anticompetitively. This has allegedly come about primarily through FCC regulation that was made more effective by the fragmentation of the Bell System's local exchange monopoly into **[*301]** seven BOCs. As we indicated above, even though the mere existence of the seven BOCs is not a significant consideration under section VIII(C), the break-up is critically important insofar as the FCC has been able to adapt its regulations to the more manageable task of overseeing seven regional monopolies instead of one national, vertically-integrated one. *See* *552 F. Supp. at 187*. On this point, we think the DOJ's assessment of the FCC's regulations is entitled to significant weight. According to the DOJ, those regulations, combined with the BOCs' own equal access plans have "eliminated **[**57]** most of the anticompetitive advantages AT & T formerly enjoyed." At the time this case was before the district court, however, the DOJ asserted that "the FCC's equal access rules are based on the assumption that the BOCs will not provide interexchange services. Thus the FCC has not yet developed rules that would apply the nondiscrimination and cost separation principles of the *Computer III* [16] and *Joint Cost* [17] proceedings to BOC provision of interexchange services." And until those regulations are adjusted to take account of BOC entry into the interexchange market -- entry which would, of course, provide an incentive to deny equal access and to cross-subsidize if possible -- the DOJ represents that equal access and proper cost allocation cannot be assured.

[58]** The DOJ also points out that violations of the equal access policy are extremely difficult to detect and remedy, *see* *846 F.2d at 1424-25*, thereby underscoring the danger of allowing entry before the FCC's regulations are designed to deal with the problem. Finally, the DOJ warns that the BOCs will have an easier time acquiring market power in the interexchange market than in other markets because many of the firms that began providing interexchange services after the decree have not yet become stable in the highly capital-intensive field. Since the BOCs raise no serious opposition on appeal to any of these points made by the DOJ and since we have no other

[16] *104 F.C.C.2d 958 (1986)*, *on reconsideration*, *2 FCC Rcd 3035 (1987), 3 FCC Rcd 1135 (1988)*, *appeal docketed sub nom. California v. FCC*, No. 87-7320 (9th Cir. May 28, 1987).

[17] *2 FCC Rcd 1298*, *on reconsideration*, *2 FCC Rcd 6283 (1987)*, *on further reconsideration*, *3 FCC Rcd 6701 (1988)*, *petition for review denied sub nom.* *Southwestern Bell Corp. v. FCC, 283 U.S. App. D.C. 80, 896 F.2d 1378 (D.C.Cir. 1990)*.

reason to doubt the DOJ's assessments, we affirm the district judge's conclusion that the BOCs failed to show that there was no substantial possibility that they could use their monopoly power to impede competition in the interexchange market. [18]

[59]** B. *Manufacturing*

The "manufacturing restriction," imposed by section II(D)(2) of the decree and amended by section VIII(A) is really more properly conceived of as two restrictions. First, it forbids the BOCs from manufacturing (but permits them to provide) customer premises equipment ("CPE"), which "includes equipment employed on the premises of anyone other than a carrier that is utilized to originate, route, or terminate telecommunications." *673 F. Supp. at 552 n. 116*. Second, it prohibits the BOCs from manufacturing or providing telecommunications equipment, that is, equipment other than CPE used by a carrier to provide telecommunications services. *See id.* The BOCs petitioned, with DOJ support, for the complete removal of the manufacturing restriction, and the district court left the restriction intact.

1. *Telecommunications Equipment*

The BOCs and the DOJ argue that market changes since the decree and regulatory adaptations to the post-divestiture **[*302]** market warrant removal of the telecommunications equipment restriction. The Justice Department further divides the telecommunications equipment market into separate markets for central **[**60]** office switches and for transmission equipment (primarily metal cable). The DOJ makes the significant concession that any BOC that chooses to manufacture central office switches, either unilaterally or through a joint venture, will buy all (or nearly all) of its requirements from the affiliated producer -- thereby foreclosing a certain portion of the market, whether or not there are economies to be gained from such integration. [19] Nevertheless, the BOCs will not impede competition (although competitors will surely be hurt) in the switch market, it is argued, because large economies of scale would prevent any BOC from remaining in the market solely to sell to itself. Even the largest BOC buyer of switches in 1985 purchased only 1.4 million lines of new switching capacity, about 17 percent of the U.S. market. Only two other BOCs purchased over one million switches and two BOCs bought less than 500,000. *Huber Report* at 14.8. The *Huber Report* estimates that switch producers must sell upwards of 1.5 million switches per year to survive and many more to be profitable. *Huber Report* at 14.15-14.16. Of the three major U.S. switch producers, two (AT & T and Northern Telecom) sold **[**61]** over 4.5 million switches in the U.S. in 1985, and perhaps twice that many worldwide. The third (GTE) sold only about 1.5 million switches in 1985 and is losing money in its equipment businesses. *Huber Report*, 14.8, 14.14-14.15. Assuming that there are no joint ventures among BOCs (which the DOJ admits would alter its assessment), the DOJ argues that only a few BOCs would enter the switch market and those that did could not afford to produce idiosyncratic (or overpriced) switches since they would have to attract at least some significant number of nonaffiliated buyers who, of course, can choose among many producers.

The DOJ further concedes, **[**62]** however, that the image they convey of the efficient BOC producer of switches is somewhat clouded by the danger of anticompetitive interconnection discrimination and of cross-subsidization. The risk of interconnection discrimination, by which a BOC would design its switches in a way that would favor the BOC's self-produced equipment over rival manufacturers, has allegedly been "substantially decreased" by more effective regulatory control -- especially the availability of benchmark comparisons among the BOCs. [20] Cross-

---

[18] The BOCs pressed the argument below that the interexchange restriction should be removed because the Justice Department agreed to, and the district court accepted, a consent decree in an antitrust action against GTE that did not include line of business restrictions. *See* *United States v. GTE Corp., 603 F. Supp. 730 (D.D.C. 1984)*. This claim was not raised on appeal and so we do not discuss it. We also have no occasion to discuss the suggestion made by the DOJ below, but dropped on appeal, that the restriction should be lifted with respect to cellular radio, paging, and other mobile interexchange services.

[19] This latter admission moots any suggestion that the district court should have balanced the asserted economies of vertical integration against the anticompetitive danger of BOC entry into the market. We express no opinion as to whether such a balance would be the proper subject of litigation in future Triennial Reviews. *Cf.* ***673 F. Supp. at 560***.

subsidization is a "plausible concern" in the switch market, the DOJ tells us, because of the need to attract a large market share, the extensive shared costs with local exchange services (especially research and development) ("R & D"), and traditional difficulty encountered by regulators in discovering cost misallocations. Indeed, according to the DOJ, a BOC "might not have to produce efficiently to attract its own operating companies as buyers if regulators did not prevent recovery of excessive switch costs." And while the risk of cross-subsidization cannot be eliminated completely, FCC regulation -- especially the availability of benchmarks to enforce effective accounting **[**63]** rules -- would "significantly mitigate" it. [21] Finally, the **[*303]** DOJ maintains that a small amount of cross-subsidization would not impede competition in the entered market; rather its primary effect would be to raise the price of local exchange service, a problem that the DOJ suggests is to be handled by regulators and is irrelevant to this proceeding.

[64]** The DOJ's assessment of the transmission equipment market is substantially similar to that for central office switches. In the transmission equipment market, as was true of central office switches, any BOC would purchase all or most of its own equipment from its own manufacturing affiliate; not all BOCs would manufacture every type of transmission equipment. There is some danger of discrimination and of cross-subsidization, but, due in large part to the availability of benchmark comparisons, that risk is substantially less than it was prior to divestiture. Among the salient differences is that the market has supported competition even though the BOCs have already been allowed to provide transmission equipment in the form of CPE, and therefore already possesses an incentive to discriminate in interconnection. In addition, cross-subsidization is allegedly less probable than in the switch market because R & D costs, normally the prime source of cross-subsidization, are so low. [22]

[65]** Even if we did accept the DOJ's market forecasts and regulatory assessments wholesale, it would not suffice to compel removal of the telecommunications equipment restriction under the section VIII(C) standard. As we discussed above in Part II(C), the possibility of self-dealing bias in the telecommunications equipment market poses dangers to competition that do not exist in the other markets the BOCs seek to enter. The DOJ's submissions provide little solace against those dangers. As we noted above, the DOJ "assumes that any BOC that manufactures equipment would purchase substantially all of its requirement from its affiliate," presumably regardless of price or quality. While the BOCs and the DOJ contend that not all BOCs will produce each type of equipment and therefore dispute the district judge's conclusion that the BOCs would foreclose 70% of the telecommunications equipment market, there seems to be no dispute that some substantial portion (5-15%) of the equipment market will be foreclosed.

Such foreclosure, if combined with cross-subsidization, would appear to allow the BOCs, in effect, to raise prices (and therefore exercise a form of market power) in the foreclosed sectors **[**66]** of the equipment market by

---

[20] The DOJ also noted that the so-called "Open Architecture" or ONA requirements, an integral part of the FCC's *Computer III* rules, might provide another obstacle to a BOC's ability to discriminate. When the case was presented to the district court, however, the DOJ represented that "it is unclear just what the impact of ONA on the potential for discrimination will be and how those effects will vary from market to market." For that reason, we do not understand how a court could be expected to rely at all in this Triennial Review on the asserted efficacy of the FCC's *Computer III* rules.

[21] The DOJ also pointed to the FCC's *Joint Cost* proceeding which, it argues, will give the BOCs the incentive to develop accounting rules that are acceptable to the FCC in order to escape from the separate subsidiary requirements for BOC provision of enhanced (information) services and CPE. Whatever merit there might be in this argument -- and we note that the district judge thought there was very little -- we need not even consider it in this Triennial Review since the *Joint Cost* rules had not been implemented at the time this case was brought. *See* ***673 F. Supp. at 572***. Furthermore, we note with some discomfort that at least some of the BOCs were petitioning this court to strike down as arbitrary and capricious one of the central aspects of the *Joint Cost* rules designed to deal with the cross-subsidization problem while simultaneously pointing to the *Joint Cost* rules in this appeal as effectively ending the cross-subsidization danger. *See* *Southwestern Bell Corp. v. FCC, 896 F.2d 1378 (D.C.Cir. 1990)*.

[22] Conversely, R & D costs are quite high in the fiber-optics sector of the transmission equipment market. Still, the DOJ submits that cross-subsidization is not a primary concern since the BOCs' competitors in that sector could respond in kind to cross-subsidization without suffering any competitive disadvantage.

disguising inflated equipment prices as costs in the local exchange market. *See supra* Part II.C. To be sure, the DOJ advised the district court that FCC regulation would substantially reduce the risk of cross-subsidization. In its own reports on the two principal telecommunications equipment submarkets, the DOJ nevertheless concedes that the BOCs would possess both the incentive *and the ability* to cross-subsidize, at least somewhat. The DOJ and the BOCs nowhere explain, however, why any significant amount of cross-subsidization that, in practical terms, enables the BOCs to charge higher prices for the equipment it produces would not be akin to an exercise of market power that would impede competition in the telecommunications equipment market. At least in this first Triennial Review, it is not enough for the BOCs (independently or through the DOJ) to show that a significant number of stable competitors will be able to survive BOC entry. We think that the BOCs cannot meet their burden under section VIII(C) **[*304]** without also explaining why foreclosure combined with cross-subsidization does not *itself* pose a "substantial possibility that the **[**67]** BOC could use its monopoly power" in the telecommunications equipment market.

2. *Customer Premises Equipment*

The DOJ subdivides the CPE market into the private branch exchange ("PBX") market and the terminal equipment market. While it analyzed those submarkets separately, the DOJ believes -- for reasons similar to those offered for the telecommunications equipment market -- that BOC entry into both would not threaten competition. The PBX market is described as "moderately concentrated" -- with three major and many minor producers -- but nevertheless competitive. The DOJ points out that the BOCs have been permitted to *provide* PBXs (as well as all other forms of CPE) since the decree, and that they therefore have always had the incentive to provide discriminatory interconnection. If allowed to produce PBXs, that discrimination could manifest itself through BOC manipulation of its local network or through discriminatory dissemination of network information. We are assured, however, that the BOCs' *ability* to discriminate will be blocked, as it has been until now, by numerous obstacles, especially FCC regulation. [23] Similarly, any danger of cross-subsidization in the PBX **[**68]** market is dismissed by the DOJ as negligible.

The DOJ's argument with respect to the terminal equipment market is based again on the premise that no BOC could successfully discriminate against its rivals, either by way of interconnection or by failing to provide critical network information. Their ability to discriminate is asserted to be undercut somewhat by the advent of PBX use, as well as cellular and paging systems for which the BOCs do not even provide the interconnection with the terminal equipment and which all contribute to the prevalent use of standards in interconnection. Residual risk of discrimination, as well as the risk of cross-subsidization, are adequately prevented by FCC regulation.

While we certainly have some reservations concerning the DOJ's assessment of the CPE market, [24] we are inclined **[**69]** to think that the question is much closer than it was for telecommunications equipment. Since the BOCs purchase only a minute percentage of the nation's CPE output, there is no risk of the combined cross-subsidization and foreclosure that is so crucial to our decision on telecommunications equipment. Indeed, on appeal, the BOCs and the DOJ complain primarily that when the district judge discussed foreclosure, he did not differentiate between CPE and the various types of telecommunications equipment that the BOCs do purchase themselves in great quantity. While we agree that different competitive concerns should motivate decisions regarding CPE than those regarding telecommunications equipment, we do not perceive that as a reason to upset the district court's decision as it applies to CPE manufacturing. The burden under section VIII(C) is not on the district judge; it is on the petitioning BOCs to show that they can enter certain markets without raising a substantial possibility that they could use their monopoly power to impede competition in those markets. In this Triennial Review, the BOCs petitioned for *complete* removal of the manufacturing restriction, and the DOJ explicitly **[**70]**

---

[23] Among the regulations relied upon, however, were the new *Computer III* and *Joint Cost* rules which were not fully implemented at the time this case was submitted to the district court.

[24] For instance, we question the DOJ's reliance on not-yet-final regulations as well as its apparent equation of FCC success in regulating CPE *provision* by the BOCs with its ability to regulate their CPE manufacturing. It would seem that manufacturing offers far greater opportunities for discrimination in interconnection.

urged the district judge *not* to distinguish between the two types of equipment in making his decision, because line-drawing between them is so difficult. Given the risks to competition we identified in the telecommunications equipment market, the district court understandably did not allow the entire manufacturing restriction to be removed **[*305]** in this first Triennial Review, and the motions were properly denied.

C. *Information Services*

The BOCs and the DOJ also appeal from the district court's decision not to lift the restriction on "information services" under section II(D)(1), as that restriction is applied to the *generation* of information. [25] The district **[**71]** court found that there had "been no significant, relevant change in" market conditions justifying removal of this restraint under section VIII(C). *673 F. Supp. at 564*. Noting that neither the DOJ nor AT & T opposed lifting the information services ban, the BOCs contend that the district court should have reviewed this question under a more flexible "public interest" standard pursuant to section VII. *See supra* note 6. We agree, and hold that the district court erred in applying section VIII(C) to the uncontested motion to remove the line-of-business restriction on information services. And because we are unable to say that the district court would have reached the same result had it applied the proper legal standard, we are constrained to remand the case for further consideration of the BOCs' motion to remove the information services ban in its entirety.

[72]** 1. *The Applicability of Section VII to Uncontested Motions to Modify a Line-of-Business Restriction Under the Decree*

It is well established that ***HN5***[] a less demanding standard of review applies to an uncontested motion to modify a consent decree than applies to a contested one. *See generally* Note, *Modifications of Antitrust Consent Decrees: Over a Double Barrel*, *84 MICH.L.REV. 134, 135 (1985)*. As we have explained, unless the parties have expressly agreed otherwise, an antitrust defendant can prevail on a contested motion to reduce or eliminate its obligations only if it can make "a clear showing of grievous wrong evoked by new and unforeseen conditions." *United States v. Swift & Co., 286 U.S. 106, 119, 76 L. Ed. 999, 52 S. Ct. 460 (1932)*. But when all parties to a decree assent to a particular modification, the relevant inquiry for the court is whether the resulting array of rights and liabilities comports with the "public interest." *See, e.g., United States v. American Cyanamid Co., 719 F.2d 558, 565 (2d Cir. 1983)*, *cert. denied* **[**73]** , *465 U.S. 1101, 80 L. Ed. 2d 127, 104 S. Ct. 1596 (1984)*; *United States v. National Finance Adjusters, Inc.*, 1985-2 Trade Cas. (CCH) para. 66,856, at 64,248 (E.D.Mich. 1985).

Through section VIII(C), the parties expressly altered this "common law" approach to decree modification. The question is *how much* they altered it. According to the BOCs, Section VIII(C) was intended merely to supplant Swift's "grievous wrong" standard for *contested* modifications of the decree's line-of-business restrictions; *uncontested* motions to lift these restrictions, the BOCs argue, remain subject to the ordinary public interest standard as incorporated in section VII's general provision for modification of the decree. [26] Because neither AT & T nor the DOJ opposed the BOCs' motion to remove section II(D)(1)'s information service restriction, [27] the BOCs

---

[25] Under the Decree,

> "Information service" means the offering of a capability for generating, acquiring, storing, transforming, processing, retrieving, utilizing, or making available information which may be conveyed via telecommunications, except that such service does not include any use of any such capability for the management, control, or operation of a telecommunications service.

Decree § IV(J), *reprinted in* *552 F. Supp. at 229*.

[26] The DOJ, in contrast, premises its challenge to the district court's information-services ruling solely on the ground that the court misapplied *section VIII(C)*.

[27] Although the appellees suggest that AT & T did not *consent* to removal of the Decree's information-services restriction, it is clear from the record that AT & T did not *object* to such a modification of the Decree. *See* Joint Appendix 2695-96; *see also* *id. 1402*. The district court did not suggest otherwise. *See* ***673 F. Supp. 534*** & n. 33 (characterizing AT & T's position as

conclude that the district **[*306]** court should have reviewed their motion under a public interest test rather than under section VIII(C)'s "no-substantial-possibility" test. The appellees reply that section VIII(C) furnishes the exclusive mechanism for modifying the decree's line-of-business restrictions. **[**74]**

Whether section VII or section VIII(C) governs an uncontested motion to modify section II(D) is not a mere academic question. By focusing on whether a particular uncontested modification is in **[**75]** the public interest, section VII allows the district court to approve an uncontested modification even without a showing of a "change" of any kind so long as the resulting array of rights and obligations is "'within the reaches of the public interest'" today. *United States v. Bechtel Corp., 648 F.2d 660, 666* (9th Cir.) (quoting *United States v. Gillette Co., 406 F. Supp. 713, 716 (D.Mass. 1975))*, *cert. denied*, *454 U.S. 1083, 70 L. Ed. 2d 617, 102 S. Ct. 638 (1981)*.

To determine whether the parties intended section VII or section VIII(C) to apply to uncontested motions to modify the decree's line-of-business restrictions, we must look first to the text of the decree, and then, if the question remains subject to doubt, to "'contemporaneous statements of [the decree's] objectives.'" *United States v. Western Elec. Co., 282 U.S. App. D.C. 271, 894 F.2d 1387, 1390-91 (D.C.Cir. 1990)* (quoting *United States v. Western Elec. Co., 269 App. D.C. 436, 846 F.2d 1422, 1427* (D.C.Cir.), *cert. denied*, *488 U.S. 924, 109 S. Ct. 306, 102 L. Ed. 2d 325 (1988))*. This inquiry convinces us that **[**76]** uncontested motions to modify line-of-business restrictions should be resolved pursuant to a public interest standard under section VII.

Contrary to the contentions of the appellees, the applicability of section VIII(C) is not dictated by the plain meaning of its terms. Section VIII(C) does not purport to be the *exclusive* standard for reviewing motions to modify restrictions imposed by section II(D). Indeed, as we have noted above, insofar as section VIII(C) makes removal of a restriction contingent "upon a *showing* by the *petitioning* BOC," *552 F. Supp. at 231* (emphasis added), this provision appears to contemplate adversarial testing of the relevant issues. At best, section VIII(C) must be deemed to be silent on the question of what standard applies to uncontested motions to remove the decree's line-of-business restrictions.

The circumstances surrounding the formation of the decree, however, leave little question that the parties expected uncontested motions to be governed by common law principles pursuant to section VII. When the parties initially submitted the decree to the district court, the only provision for modification was section VII. In explaining **[**77]** their understanding of that section, both parties stated that "in the event that the parties agree to an amendment of the modification to remove [a line-of-business] restriction, the standard for such removal would be whether it is in the public interest." Brief of the United States in Response to the Court's Memorandum of May 25, 1982 at 32, *reprinted in* J.A. 882; *see* AT & T Brief in Response to the Court's Memorandum of May 25, 1982 at 17-18, *reprinted in* J.A. 849-50 (stating same view).

The addition of section VIII(C) cannot be viewed as altering this understanding. The district court conditioned approval of the decree on adoption of section VIII(C) in order to alter the parties' stated intention that *contested* motions to remove a line-of-business restriction be granted merely upon a finding "that 'the rationale for [the restriction] is outmoded by technical developments.'" *552 F. Supp. at 195* (quoting Brief of the United States in Response to the Court's Memorandum of May 25, 1982 at 32-33, *reprinted in* J.A. 882-83); *see also* AT & T Brief in Response to the Court's Memorandum of May 25, 1982 at 18, *reprinted in* J.A. 850 (expressing **[**78]** same standard). The trial court expressly noted that the standard in section VIII(C) would supplant "the test usually applied to a *contested* modification . . . [as] set forth in *United States v. Swift & Co.*" *552 F. Supp. at 195 n. 266* (emphasis added) (citation omitted). Nothing in the court's opinion suggests that section VIII(C) was designed in addition to displace the parties' agreement that a public interest standard would **[*307]** apply to *uncontested* motions to modify section II(D).

This reading of the decree is further supported by ***HN6***[] an important general rule of decree construction, namely, the presumption that the parties, "absen[t] any expressly stated intention to the contrary," intended to adopt "the ordinary substantive . . . standards that attend decree modification." *United States v. Western Elec. Co., 282*

"suggest[ions]" as to alternative "routes with respect to the information services restriction"). For purposes of identifying the proper standard of review, the critical point is that neither AT & T nor the DOJ *opposed* the BOCs' motion.

U.S. App. D.C. 271, 894 F.2d 430, 436 (D.C.Cir. 1990). As we have explained, the only *express* intention relating to section VIII(C) was that it would displace the *Swift* test for reviewing contested modifications. **[**79]**

2. *Application of the Public Interest Test to the Motion to Remove the Restriction on Information Services*

Having determined that section VII's public interest test governs uncontested proposals to modify the decree's line-of-business restrictions, we must next examine whether the district court's erroneous reliance on section VIII(C) affected the court's decision to deny the BOCs' unopposed motion to remove the decree's restriction on information services. We conclude that it did, and, consequently, we reverse.

As we have indicated, section VII and section VIII(C) involve different inquiries. Section VII's public interest test directs the district court to approve an uncontested modification so long as the resulting array of rights and obligations is within the *zone of settlements* consonant with the public interest *today. Cf.* Bechtel Corp., 648 F.2d at 666. Section VIII(C) requires the district court to determine whether the petitioning BOC has shown that it could not impede competition in the relevant market as it was believed it could *when the decree was approved*; applying this standard, Judge Greene denied the BOCs' motion to remove the information-services **[**80]** restriction because he found that "there has been no change whatever in" the information services market. *673 F. Supp. at 565*.

Under only two circumstances could we discount the possibility that the district court would have reached a different result had it applied section VII rather than section VIII(C). The first would be if the inclusion of the information services restriction was mandatory, not merely permissible, at the time that the decree was adopted. If market conditions or assumptions in 1982 so constrained the range of permissible settlements that *only* a decree incorporating this restriction could have been approved as consistent with the public interest *then*, it would follow that the parties would need to show that those conditions had abated before the court could approve removal of the restriction *today*.

We cannot say, on the record before us at least, that this condition is met. The Government's case in the *AT & T* antitrust litigation centered exclusively on AT & T's activities in the interexchange-service and equipment-manufacturing markets. *See, e.g.*, COMPETITIVE IMPACT STATEMENT IN CONNECTION WITH PROPOSED MODIFICATION OF FINAL **[**81]** JUDGMENT, 47 Fed.Reg. 7172 (1982). Indeed, because the 1956 consent decree enjoined AT & T "from engaging . . . in any business other than the furnishing of common carrier communications services," *United States v. Western Elec. Co.*, 1956 Trade Cas. (CCH) para. 68,246, at 71,138 (D.N.J. 1956), and because relatively few information services were provided to the public before the DOJ moved to reopen that decree in 1974, there really was no record to speak of concerning AT & T's activities in the information services market. The parties agreed to the information services restriction as a precautionary measure in light of uncertainty about how divestiture of AT & T would affect the development of this embryonic market. Under these circumstances, it would not have been legal error for the district court to approve the decree had the parties *not* agreed on their own to include the restriction on information services. Consequently, the district court's bare finding that the BOCs failed to show a *change* in market conditions does not suffice to show that the decree, absent the information services restriction, would no longer be "'within the reaches of **[**82]** the public interest.'" Bechtel Corp., 648 F.2d at 666 **[*308]** (quoting Gillette Co., 406 F. Supp. at 716).

The second condition under which we could disregard the district court's reliance on section VIII(C) would be if the record conclusively showed that, regardless of whether the parties were *obliged* to include the information services restriction in 1982, removing it would be against the public interest now. Because the "public interest" test must take its meaning from the nation's antitrust laws, *see* American Cyanamid Co., 719 F.2d at 565, the appropriate question under section VII is whether the proposed modification would be certain to lessen competition in the relevant market. *See generally* 2 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** para. 330, at 141-42 (1978) ("To remain consistent with antitrust policy, the court should revise the decree that is shown to lessen competition substantially in present circumstances."). Purporting to find that the BOCs would have both the incentive and the ability to cross-subsidize the information-service operations of unregulated affiliates and to discriminate against information-service **[**83]** competitors, the district court concluded that removal of section II(D)(1)'s restriction on information services would be *anticompetitive* under current market conditions. *673 F. Supp. at 565-67*.

But because we cannot be certain that these findings were not infected by the court's legal error concerning the proper standard of review, we may not rely on them to support the district court's denial of the BOCs' motion. *See* Pullman-Standard v. Swint, 456 U.S. 273, 292, 72 L. Ed. 2d 66, 102 S. Ct. 1781 (1982). The district court's analysis of the contemporary risk of anticompetitive behavior repeatedly incorporates the failure of the BOCs to show a change in market conditions from those existing when the decree became effective:

> There still has been no *significant, relevant change* in the situation.

673 F. Supp. at 564 (emphasis added).

> It is necessary next to determine whether, with respect to the provision of information services, the incentive and ability of the Regional Companies to engage in anticompetitive conduct *remains the same* as it was when the decree was entered. The answer is plain. **[**84]** *There has been no change whatever* in this respect since 1984. . . .

Id. at 565 (emphasis added).

> In short, the reasons cited by the Court in 1982 and in 1984 *are as valid today as they were then*.

$ *Id. at 567* (emphasis added). Consequently, we cannot be sure whether the district court's findings of anticompetitive risk stemmed from its *de novo* assessment of the evidence.

Nor can we say that "the record permits only one resolution of the factual issue[s]" pertinent to determining whether lifting the information-services prohibition would be pro- or anticompetitive. Pullman-Standard, 456 U.S. at 292. To be sure, the district court had before it evidence to support its findings on the risk of discrimination and cross-subsidization. But the record also contains considerable evidence cutting the other way. The *Huber Report*, in particular, discounts the prospect of anticompetitive behavior, citing the ability of competing information-service providers to bypass the BOCs' local-exchange networks, *see Huber Report* at 6.8, 6.17-6.21, the existence of nontelecommunications substitutes for **[**85]** information services, *see id.* at 6.21-6.23, and the lack of common costs between local-exchange services and *the generation of information, see id.* at 6.35. [28] Because ***HN7***[] resolving these disputed factual issues "would be wholly inconsistent with the function of an appellate court," Southern Pacific Communications Co. v. American Tel. & Tel. Co., 238 App. D.C. 309, 740 F.2d 980, 984 (D.C Cir. 1984), *cert. denied*, **[*309]** *470 U.S. 1005, 84 L. Ed. 2d 380, 105 S. Ct. 1359 (1985)*, we are constrained to remand the case for further factfinding, pursuant to the proper legal standard. *See* Pullman-Standard, 456 U.S. at 292.

[86]** In sum, we find that the district court erred in applying section VIII(C) rather than section VII's public interest standard to the BOCs' unopposed motion to lift the decree's information-services restriction in its entirety. And because we are unable to say that the district court would have reached the same result had it applied the proper legal standard, we reverse the court's decision and remand the case for further proceedings. In reconsidering the BOCs' motion, the district court should determine whether removal of the information-services restriction as applied to the generation of information would be anticompetitive under *present* market conditions. [29] The court should also

---

[28] As Dr. Huber notes:

> The preparation of the information content itself is one activity that [the BOCs] would have notably little opportunity to cross-subsidize. Running a local telephone exchange does not require reporters, copy editors, joke writers, financial analysts, astrologists, or other information-content providers.

Id. at 6.35 (footnote omitted).

[29] We are also concerned with the practical difficulty of enforcing a merely *partial* repeal of the information-services ban; as the trial court recognized, significant disputes can be expected to arise concerning whether the BOCs are using their right to transmit

bear in mind ***HN8***[] the *flexibility* of the public interest inquiry: the court's function is not to determine whether the resulting array of rights and liabilities "is the one that will *best* serve society," but only to confirm that the resulting "settlement is 'within the *reaches* of the public interest.'" *Bechtel Corp., 648 F.2d at 666* (quoting *Gillette Co., 406 F. Supp. at 716*) (emphasis added).

[87]** IV.

The Public Service Commission of the District of Columbia ("DC-PSC") is the only party that appeals the district court's decision to allow the BOCs to participate in non-telecommunications markets and limited information transmission and storage activities.

The BOCs assert that in the absence of some actual or threatened injury to DC-PSC or some congressional enactment conferring standing, DC-PSC has no right to appeal the district court's decision. DC-PSC responds that it was granted the status of a limited intervenor in the district court proceedings and that it has the right to appeal the district court's judgment. DC-PSC bases this claim on an unclear combination of the following reasons: the district court granted the right to appeal its decision to all limited intervenors; the district court's decision to lift the restrictions at issue will cause DC-PSC to suffer specific injury as consumer and regulator; the law of standing applies only to plaintiffs and not to intervenors; an agency may intervene in an appeal from proceedings that may affect its ability to carry out its statutory functions; and DC-PSC may represent the interests of District of Columbia residents on **[**88]** appeal in a *parens patriae* capacity.

As a preliminary matter, despite the BOCs' assertions to the contrary, DC-PSC was a limited intervenor in both district court decisions under review. By its order dated March 9, 1987, the district court granted DC-PSC's motion for leave to intervene. On October 14, 1988, the district court ordered that all those parties that had been granted limited intervenor status on February 26, 1987 in the proceedings that culminated in the issuance of the September 10, 1987 decision were to be considered limited intervenors for purposes of the decision issued on March 7, 1988. Because DC-PSC's motion to intervene was filed out of time and was granted on March 9 instead of on February 26, the BOCs assert that DC-PSC is not a limited intervenor with respect to the March 7 decision. Although the BOCs may be technically correct, it would be unduly formalistic for this court to convert an obvious oversight of the district court into an independent basis for barring appeal.

DC-PSC's status as an intervenor does not, however, guarantee that it has standing **[*310]** to appeal the district court's decisions. DC-PSC seems to be under the impression that the **[**89]** district court, by conferring the status of limited intervenor in the proceedings below, can confer standing on DC-PSC in this court to appeal the district court's decisions. The Supreme Court has stated, however, that

> although intervenors are considered parties entitled, among other things, to seek review by this Court, *Mine Workers v. Eagle-Picher Mining & Smelting Co., 325 U.S. 335, 338, 89 L. Ed. 1649, 65 S. Ct. 1166 (1945)*, an intervenor's right to continue a suit in the absence of the party on whose side intervention was permitted is contingent upon a showing by the intervenor that he fulfills the requirements of Art. III.

Diamond v. Charles, 476 U.S. 54, 68, 90 L. Ed. 2d 48, 106 S. Ct. 1697 (1986). Thus, because DC-PSC alone challenges the district court's decision to lift the restrictions at issue, this court must determine whether DC-PSC independently satisfies the article III requisites for standing to appeal.

---

the information of others as a cover for generating their own. *See* ***673 F. Supp. at 596***. Because it is clearly in the public interest to minimize the district court's oversight responsibilities under the decree, *see* ***id. at 599***, the district court on remand should also consider whether the residual anticompetitive risks associated with lifting the restriction on generation of information are sufficiently great to outweigh the administrative burdens on the court of policing this limited prohibition.

The Supreme Court has held that ***HN9***[] in order to have standing, a party must demonstrate an injury in fact fairly traceable **[**90]** to the conduct it is challenging and likely to be redressed by the relief it has requested. *Allen v. Wright, 468 U.S. 737, 751, 82 L. Ed. 2d 556, 104 S. Ct. 3315 (1984)*. While the necessary "injury" is not susceptible to precise definition, it must be "distinct and palpable," *Warth v. Seldin, 422 U.S. 490, 501, 45 L. Ed. 2d 343, 95 S. Ct. 2197 (1975)*, and not merely hypothetical, abstract, or conjectural. *Los Angeles v. Lyons, 461 U.S. 95, 101-02, 75 L. Ed. 2d 675, 103 S. Ct. 1660 (1983)*. As noted above, DC-PSC claims to be constitutionally "injured" both as consumer and regulator. We disagree.

DC-PSC's argument that it has standing as a consumer, if accepted, would mean that any consumer of telecommunications service in the country would have standing to challenge the consent decree. This is far too broad; it approaches the kind of diffuse and unparticularized "taxpayer" standing that the Supreme Court consistently has rejected. *See* *Valley Forge Christian College v. Americans United for Separation of Church and State, Inc., 454 U.S. 464, 476-82, 70 L. Ed. 2d 700, 102 S. Ct. 752 (1982)*.

DC-PSC's claim that **[**91]** it has standing because its regulatory function could be impaired by the removal of the restrictions at issue is equally unpersuasive. It is hard to see exactly how DC-PSC's ability to regulate could be harmed by the district court's judgment. Even though DC-PSC has no power to regulate Bell Atlantic, it does regulate Bell Atlantic's subsidiary, Chesapeake and Potomac Telephone Company ("C & P"). The fact that Bell Atlantic might inappropriately cross-subsidize other businesses by drawing funds from C & P -- and thereby reduce the quality or increase the cost of service to C & P's customers--does not impede DC-PSC's power to require C & P to provide reasonably safe and adequate service at just and reasonable rates to its customers. DC-PSC may claim injury as a regulator only if it can demonstrate that cross-subsidization would prevent it from *regulating* C & P; it has not done so.

Finally, we reject DC-PSC's contentions that it can bring this appeal in a *parens patriae* capacity. *Section 15c of Title 15 of the United States Code* provides that any attorney general of a state may bring a civil action in a *parens patriae* capacity to secure relief from antitrust violations. **[**92]** "State attorney general" is defined as

> the chief legal officer of a State, or any other person authorized by State law to bring actions under *section 15c* of this title, and includes the Corporation Counsel of the District of Columbia. . . .

15 U.S.C. § 15g(1). The BOCs argue that this language means that only the Corporation Counsel is authorized to bring such actions. DC-PSC argues that the grant is not exclusive, because DC-PSC's General Counsel is implicitly authorized to bring *§ 15c* actions by D.C.Code § 43-405, which authorizes the General Counsel "to commence and prosecute all actions and proceedings directed or authorized by the Commission." On balance, we conclude that the general grant of power in § 43-405 is insufficient to authorize *§ 15c* suits by DC-PSC's General Counsel in the **[*311]** absence of some more explicit authorization by Congress or the District of Columbia Council.

V.

With the exception of the district judge's ruling dealing with information services -- which we reverse and remand -- we affirm.

So ordered.

HN1[] **Monopolies & Monopolization, Actual Monopolization**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN2[] **Monopolies & Monopolization, Actual Monopolization**

To prove monopolization, plaintiff must show: (1) that defendant has possession of monopoly power in the relevant market; and (2) that defendant willfully engaged in conduct designed to acquire, maintain or enhance its monopoly power. To establish a claim of attempted monopolization, plaintiff must show: (1) a specific intent by defendant to monopolize a relevant market; (2) predatory or anticompetitive conduct by defendant; and (3) a dangerous probability of success. In addition, the fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown. An attempted monopolization claim requires evidence of a specific intent to monopolize. Specific intent may be established by direct proof, or it may be inferred from predatory conduct, i.e., conduct that is in itself an independent violation of the antitrust laws or that has no legitimate business justification other than to destroy or damage competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN3[] **Regulated Practices, Market Definition**

Monopoly power is the power to dominate or control a market. If monopoly power exists, it must be found to exist within an economically meaningful market, or what is called a relevant market. There are two aspects to be considered in defining the relevant market: the relevant product market and the relevant geographic market. The determination of relevant market is essentially a question of fact. The burden of establishing the relevant product and geographic market falls upon plaintiff.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

The relevant product market consists of those products which are reasonable substitutes from a buyer's point of view.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

The relevant geographic market is the area in which defendant faces competition from suppliers of competing products that are in the relevant product market, and to which a buyer can practically turn for the product. The commercial realities of the industry are the major factors in determining the relevant geographic market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

Monopoly power is the power to control prices and to exclude competition in the relevant market. Monopoly power may be shown through market share, i.e., percentage of the relevant market.. The existence of monopoly power will ordinarily be inferred when a defendant has a predominant share of the market. Market share alone, however, does not establish monopoly power. Other factors should also be considered, including the number and strength of the defendant's competitors, the difficulty or ease of entry into the market by new competitors, and consumer sensitivity to change in prices.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Willfulness

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN7[] **Actual Monopolization, Claims**

The existence of monopoly power in the relevant market does not by itself prove the offenses of actual monopolization or attempted monopolization. A monopolist's behavior is not unlawful unless the monopolist has engaged in the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Torts > Transportation Torts > Rail Transportation > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

Ordinarily, a business has no legal obligation to deal with its competitors. There are situations, however, in which the federal courts find a duty under *section 2* of the Sherman Act, *15 U.S.C.S. § 2*, for a monopolist to trade with all on nondiscriminatory terms. One of these instances is where the monopolist controls an "essential facility." The "essential facilities" doctrine imposes on the owner of a facility that cannot be reasonably duplicated and which is essential to competition in a given market a duty to make that facility available to its competitors on a nondiscriminatory basis. There are four elements necessary to establish liability under the doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability to duplicate the facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

A monopolist's facility is essential to rivals only where vital to their competitive viability. The defendant's resource is not vital if an equivalent is available from other sources. The question of equivalence can cover a wide range since everything that is legal and possible is available at some price. A facility is not essential unless the plaintiff shows his inability practically or reasonably to duplicate it. An inquiry into the practicality of duplicating the facility should include economic, regulatory and other concerns. It is insufficient for plaintiff to show that access to the facility is merely more economical than other alternatives.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

In addition to the cases finding liability for a refusal to deal when an essential service is involved, there are cases which find liability when a monopolist's refusal to deal with a competitor is shown to be evidence of an illegal intent to destroy competition. These cases focus on the intent and competitive effect of the refusal to deal; not on whether the facility itself is "essential." The theoretical distinction between the intent theory and the essential facilities doctrine is that the former focuses on the monopolist's state of mind while the latter examines the detrimental effect on competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

Ordinarily, a company may deal or refuse to deal with whomever it pleases, as long as it acts independently. Even a company with monopoly power in a relevant market has no general duty to cooperate with its business rivals and may refuse to deal with them if valid business reasons exist for such refusal. It is unlawful, however, for a monopolist to engage in conduct, including refusals to deal, that unnecessarily excludes or handicaps competitors in order to maintain its monopoly into another relevant market. Exclusionary conduct is conduct that does not benefit consumers by making better products or services available, by increasing efficiency, or in other ways, but instead has the effect of impairing competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN12[] **Private Actions, Remedies**

Injury is an essential element that a plaintiff must prove to recover under the antitrust laws. Plaintiff must prove antitrust injury reflecting the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. Proving causation does not require plaintiff to prove the value of its injury. It requires only that plaintiff prove that it was in fact injured by defendant's alleged antitrust violation. If plaintiff was in fact injured, then the court must consider the amount of plaintiff's damages.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

The trier of fact in an antitrust action can determine the amount of damages from a just and reasonable estimate of the damage based on relevant data. The damage award, however, may not be based on speculation or conjecture.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN14[] **Remedies, Damages**

Injunctive relief under § 16 of the Clayton Act, *15 U.S.C.S. § 26*, is granted for the purpose of preventing threatened loss or damage by reason of a violation of the federal antitrust laws. In the framing of equitable decrees, the district courts are clothed with broad discretion to model their judgments to fit the exigencies of the particular case.

Judges: Richard D. Rogers, United States District Judge.

Opinion by: ROGERS

Opinion

[*611] MEMORANDUM AND ORDER

RICHARD D. ROGERS, UNITED STATES DISTRICT JUDGE.

This is an antitrust action brought by way of a counterclaim. Feist Publications, **[*612]** Inc.(FP) contends that Rural Telephone Service Company, Inc.'s (RTSC) refusal to license white page telephone listings to it is an antitrust violation under the "essential facility" theory and/or "intent to monopolize" theory of *section 2* of the Sherman Antitrust Act, *15 U.S.C. § 2*. A trial to the court has been concluded. The court is now prepared to issue findings of fact and conclusions of law.

FINDINGS OF FACT

1. RTSC is a cooperative telephone company providing service to various communities in northwest Kansas. All of the telephone subscribers in the RTSC service area are member owners. RTSC is a nonprofit business with all revenues exceeding the cost of doing business returned to members under a refund plan called capital credits. RTSC is a certified public utility and, as such, is regulated by the Kansas Corporation Commission (KCC) The service area of RTSC consists of the area colored in yellow on the map attached to this memorandum and order as Attachment No. 1. RTSC has approximately 4,700 telephone **[**2]** subscribers.

2. In the course of its business, RTSC compiles, publishes and distributes telephone directories covering the geographical area in which it provides telephone service. The KCC requires all telephone companies operating in Kansas to issue at least annually a dated telephone directory. The telephone directories published by RTSC contain white pages and yellow pages. The white pages list in alphabetical order the names, addresses and telephone numbers of RTSC's telephone subscribers. The yellow pages list RTSC's business subscribers alphabetically under the appropriate business classifications and contain classified advertisements of various sizes purchased by RTSC's business subscribers.

3. On August 1, 1974, RTSC entered into a "Telephone Directory Publishing Contract" with Leland Mast Directory Company to publish its annual telephone directory until December 31, 1985. Pursuant to the contract, RTSC granted Leland Mast Directory Company the exclusive rights to compile, print and sell advertising in RTSC's annual telephone directory during that period of time. On July 29, 1985, RTSC entered into an agreement with the Gronseth Directory Service Corporation to publish its **[**3]** annual telephone directory until October 31, 1990.

4. FP is a Kansas corporation that publishes and distributes telephone directories in Kansas and other states. FP publishes and distributes regional telephone directories. These directories are designed to cover certain trade areas

and to allow telephone subscribers to have access to telephone numbers in nearby communities. FP first produced a directory for southwest Kansas in 1977. FP produced a directory for northwest Kansas in 1978. The northwest directory covered fifteen counties. The directories produced by FP contained the same white pages and yellow pages similar to the RTSC directory. The advertising contained in the directories, especially the advertising contained in the yellow pages, provides the revenue for FP.

5. The inclusion of white pages listings is necessary for the production of a successful independent telephone directory. Independent directories containing only yellow pages have not been successful. In order to obtain the white pages listings for its directory, FP contacted the telephone companies providing service in the areas of its regional directory. FP sought to obtain the white pages listings by paying the **[**4]** telephone companies for the listings. Some of the companies refused to license their white pages listings initially, but ultimately most have agreed to license the listings. All of the telephone companies in northwest Kansas agreed to provide the listings except RTSC. Each agreement also provides that the telephone company will provide FP with updated listings. The cost for the listings ranged from $.01 to $.49 for each listing.

6. Tom Feist of FP contacted Henry Austerman, the manager for RTSC, in 1978 about obtaining the white pages listings. Austerman invited Feist to appear at the next board meeting and make a presentation to the RTSC board of directors. Feist agreed and made a presentation at the **[*613]** April 28, 1978 meeting of the RTSC board of directors. Feist offered to pay $.10 for each of RTSC's listings. The issue was left unresolved at that meeting. The minutes from the meeting reflect the following:

> Representative from area-wide telephone directory was admitted to the meeting at this time, a Mr. Tom Feist from Spearville, Kansas. His main objective was to purchase from us our directory listings so as to establish a wide area directory for western Kansas. After much discussion **[**5]** on this request the board, upon a motion duly made, seconded, and unanimously approved, voted to table the request indefinitely.

7. Feist eventually learned that it was unlikely that FP would receive the listings from RTSC. RTSC refused to provide the white pages listings to FP in order to extend its monopoly in telephone service into yellow pages advertising. The refusal to deal was not motivated by a legitimate business reason, but by an intent to exclude competition in the yellow pages advertising market in the RTSC service area. Feist made no further direct efforts to obtain the listings from the RTSC, but he did make several indirect attempts through other individuals. These efforts were unsuccessful.

8. RTSC later licensed its white pages listings to other telephone companies for inclusion in their directories. RTSC provided its listings from Olmitz, Kansas to H & B Communications, Inc. and the Wilson Telephone Company for its 1986-1987 and 1987-1988 telephone directories. These telephone companies did not sell yellow pages advertising in the RTSC service area. RTSC was paid $.50 per listing for the Olmitz listings.

9. The directory produced by RTSC in 1977-1978 contained only **[**6]** white pages listings for the communities within its service area. In the following year, RTSC expanded its directory to include listings for towns outside its service area. In order to include white pages listings from communities outside its service area, RTSC licensed these listings from the local telephone companies. RTSC paid from $.01 to $.49 for these listings. RTSC also sold yellow pages advertising in areas outside of its service area. RTSC, however, did not distribute its directory outside of its service area. RTSC continued these practices in subsequent years.

10. The 1978 northwest Kansas directory produced by FP did include the RTSC white pages listings. FP obtained a copy of the RTSC directory and used the listings without RTSC's knowledge. FP hired verifiers to confirm as many names and telephone numbers as possible. FP did not include any RTSC subscriber in its directory that was not independently verified. This policy meant that many of the RTSC subscribers would not be included in the FP directory because of the problems of verification. FP continued the practice of using the RTSC directory through 1983 for each of its annual northwest Kansas directories. Feist **[**7]** believed that it was necessary to include the communities in the RTSC service area because such an omission would have created "enormous holes" in the FP northwest directory. Feist thought that a lack of complete coverage would have rendered the FP directory

ineffective. During the period from 1978 to 1983, FP continued to pay for listings from the other telephone companies in the northwest Kansas area.

11. In 1983, RTSC filed the instant action for copyright infringement after finding fictitious listings in FP's directory. RTSC alleged that FP had infringed the copyright on RTSC's 1982-1983 telephone directory. FP responded with the instant counterclaims. FP alleged that its yellow pages advertising had declined because it had incomplete RTSC white pages listings due to RTSC's refusal to enter into a license agreement with FP.

12. On January 5, 1987, the court granted summary judgment to RTSC in its copyright infringement claim. *663 F. Supp. 214*. The court subsequently awarded damages to RTSC in the amount of $ 6,000. The court also awarded attorney's fees to RTSC. These decisions were affirmed by the Tenth Circuit Court of Appeals on March 9, 1990.

[*614] 13. Each telephone company publishes its directory **[**8]** at a different time of the year. RTSC has generally published its directory in October of each year. FP has generally published its northwest directory in January of each year.

14. The white pages listings in a telephone directory change substantially each year. Feist estimated that the listings change 30 to 35 percent every year.

15. Due to RTSC's failure to license its white pages listings, the FP northwest directory over the years was only 70 percent complete in the RTSC service area. The FP northwest directory, however, also had listings that were not in the RTSC directory. This was apparently due to FP's later publication date and to FP's verification process.

16. FP was unable to identify anyone who had refused to purchase yellow pages advertising in its directory because the FP northwest directory did not contain complete listings from the RTSC service area. FP was also unable to identify anyone who had complained that the FP northwest directory was incomplete.

17. The financial success of any telephone directory is dependent upon advertisers and potential advertisers perceiving that the directory is used by the consumers to whom it is distributed. Customer usage depends on **[**9]** the accuracy, completeness and timeliness of the information contained in the directory. However, information in any telephone directory becomes increasingly inaccurate with the passage of time. This is the reason that the directories are published on an annual basis.

18. In 1987, the advertising revenues and respective market shares for the competitors in the RTSC service area were as follows:

Directory	**Advertising revenues (]**	**Market Share (%)**
Rural Telephone	56,010.60	75.8
Feist Publications	14,705.50	19.9
Phillipsburg	954.00	1.3

[11]** **[*615]** 20. For the period from 1977 to 1987, RTSC has had an annual rate increase of 11.9 percent. During the period from 1979 to 1987, FP has had an annual rate increase of 6.2 percent. The average rate of increase for all directories in Kansas from 1977 to 1987 was 8.3 percent. The average rate of increase for telephone companies that refused to license white pages listings, including RTSC, was 14.2 percent. The average rate of increase for all directories in the United States between 1977 and 1987 was 6.6 percent. The average rate in the United States in 1987 for a quarter column advertisement in directories falling into the distribution size category of the RTSC directory (10,000-24,000) was $ 283.64 while the RTSC rate was $ 333.60. The average rate in the United States in 1987 for a quarter column advertisement in directories falling into the distribution size of the FP northwest directory (50,000-99,000) was $ 386.97 while the FP rate was $ 324.00.

CONCLUSIONS OF LAW

Monopolization and Attempted Monopolization

FP alleges that the RTSC has violated *§ 2* of the Sherman Act by attempting to monopolize and monopolizing the yellow pages advertising market by refusing to **[**12]** license the white pages listings. ***HN1***[] *Section 2* of the Sherman Act provides that:

> every person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several states . . . guilty of a misdemeanor.

15 U.S.C. § 2.

HN2[] To prove monopolization, FP must show: (1) that RTSC has possession of monopoly power in the relevant market; and (2) that RTSC willfully engaged in conduct designed to acquire, maintain or enhance its monopoly power. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 595, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. To establish a claim of attempted monopolization, FP must show: (1) a specific intent by RTSC to monopolize a relevant market; (2) predatory or anticompetitive conduct by RTSC; and (3) a dangerous probability of success. *Shoppin' Bag of Pueblo, Inc. v. Dillon Companies, Inc., 783 F.2d 159, 161 (10th Cir. 1986)*. In addition, the fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for FP to prevail on its claims. *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1519 n. 12 (10th Cir. 1984)*, *aff'd on other grounds*, *472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. An attempted monopolization claim **[**13]** requires evidence of a specific intent to monopolize. *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1984)*. The mere intention to exclude competition and to expand one's own business is not sufficient to prove a specific intent to monopolize. *See Pacific Engineering & Production Co. v. Kerr-McGee Corp., 551 F.2d 790, 795 (10th Cir. 1977)*, *cert. denied*, *434 U.S. 879, 54 L. Ed. 2d 160, 98 S. Ct. 234 (1977)*. Specific intent may be established by direct proof, or it may be inferred from predatory conduct, i.e., conduct that is in itself an independent violation of the antitrust laws or that has no legitimate business justification other than to destroy or damage competition. *Great Escape, Inc. v. Union City Body* ***[*616]*** *Co., Inc., 791 F.2d 532, 541 (7th Cir. 1986)*. Evidence of intent in a monopolization claim is merely relevant to the question whether the challenged conduct is fairly characterized as exclusionary or anticompetitive. *Aspen Skiing Co., 472 U.S. at 602*.

Relevant Market

HN3[] Monopoly power is the power to dominate or control a market. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. If monopoly power exists, it must be found to exist within **[**14]** an economically meaningful market, or what is called a relevant market. There are two aspects to be considered in defining the relevant market: the relevant product market and the relevant geographic market. *Los Angeles Memorial Coliseum Commission v. National Football League, 726 F.2d 1381, 1392 (9th Cir. 1984)*, *cert. denied*, *469 U.S. 990, 83 L. Ed. 2d 331, 105 S. Ct. 397 (1984)*. The determination of relevant market is essentially a question of fact. *Aspen Highlands Skiing Corp., 738 F.2d at 1514 n. 4*. The burden of establishing the relevant product and geographic market falls upon FP. *See Gough v. Rossmoor Corp., 585 F.2d 381, 389 (9th Cir. 1978)*.

Product Market

HN4[] The relevant product market consists of those products which are reasonable substitutes from a buyer's point of view. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)*. In this case, FP claims that the relevant product market is yellow pages advertising. RTSC does not disagree on this contention. The evidence further supports this stipulation since yellow pages advertising is a unique form of advertising which has no substitute.

Geographic Market

HN5[] The relevant geographic market is the area in which RTSC faces competition **[**15]** from suppliers of competing products that are in the relevant product market, and to which a buyer can practically turn for the product. *See* *Otter Tail Power Co. v. United States, 410 U.S. 366, 369 n. 1, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*; *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327-28, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961)*. The commercial realities of the industry are the major factors in determining the relevant geographic market. *Ralph C. Wilson Industries v. Chronicle Broadcasting Co., 794 F.2d 1359, 1383 (9th Cir. 1986)*. FP contends that the relevant geographic market in this case is the RTSC service area, and their evidence is designed to show monopoly power in that particular area. This area is identified as the yellow area on Attachment No. 1. RTSC contends that the relevant geographic market in this case extends beyond the expanse of its service area and includes, *inter alia*, the trade centers of Colby, Hays and Phillipsburg, and that there was no evidence that RTSC exercised monopoly powers in this broadened geographic market. This area consists of the yellow, light blue, red, purple, green, blue, dark brown and brown (only that area between the light blue and yellow) on Attachment No. 1.

The court **[**16]** finds that the evidence establishes that the RTSC service area is the relevant geographic area in this case. This is the area where RTSC and FP effectively compete. It is in this area that the consumer has two choices for purchasing yellow pages advertising that reaches the local community and the regional communities. The area suggested by RTSC is not the area of effective competition. It is true that RTSC and FP do compete in those areas. The RTSC directory, however, is not a legitimate substitute for the FP directory in areas outside the RTSC service area because the RTSC directory is not distributed in those areas. Thus, an advertiser in the areas outside the RTSC service area does not view the RTSC directory and FP directory as substitutes for each other because the RTSC directory is not useful in that advertiser's local community. This advertiser has three choices: the FP directory, the RTSC directory, and his local telephone company directory, which may or may not be a regional directory. For purposes of advertising his business locally and to other areas, the advertiser is restricted **[*617]** to advertising in the FP directory and his local telephone company directory, if it is also **[**17]** a regional directory. The RTSC directory is not a valid substitute for either of these directories because the advertising will not be seen by the local community since the directory is not distributed there. Accordingly, the only area of effective competition here is the RTSC service area. This is the area where advertisers have choices of two similar products.

Monopoly Power

Having identified and defined the relevant market, we turn to the question of whether RTSC has monopoly power in that market. **HN6**[] Monopoly power is the power to control prices *and* to exclude competition in the relevant market. *Shoppin' Bag, Inc., 783 F.2d at 164*. Monopoly power may be shown through market share, i.e., percentage of the relevant market. *Id. at 161*. The existence of monopoly power will ordinarily be inferred when a defendant has a predominant share of the market. *United States v. Grinnell Corp., 384 U.S. 563, 571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. Market share alone, however, does not establish monopoly power. *Bright v. Moss Ambulance Service, Inc., 824 F.2d 819, 824 (10th Cir. 1987)*. Other factors should also be considered, including the number and strength of the defendant's competitors, the difficulty **[**18]** or ease of entry into the market by new competitors, and consumer sensitivity to change in prices. *Shoppin' Bag, Inc., 783 F.2d at 162*.

The court finds sufficient evidence of monopoly power here. RTSC had a market share of 75.8% in 1987. A strong inference of monopoly power is raised by this fact alone. Moreover, other factors suggest that RTSC has monopoly power. The evidence before the court shows that RTSC has been able to raise prices over the years without suffering any loss in market share. From 1977 to 1987, RTSC had a higher average annual rate of increase than other telephone companies in Kansas; yet, in 1987, RTSC maintained a higher market share than the average market share of the other telephone companies in Kansas. In addition, RTSC has been able to charge a higher advertising rate than other telephone directories of its size on a national basis. Finally, we note that entry into the relevant market would be difficult for any competitor to RTSC because of time and money factors. In sum, RTSC had monopoly power in the relevant market.

Willful Maintenance of Monopoly Power: Refusal to Deal

HN7[] The existence of monopoly power in the relevant market, however, does not **[**19]** by itself prove the offenses of actual monopolization or attempted monopolization. A monopolist's behavior is not unlawful unless the monopolist has engaged in the "willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Grinnell, 384 U.S. at 570-71*. FP contends that RTSC's refusal to license the white pages listings amounts to an illegal refusal to deal in violation of *§ 2* of the Sherman Act. There are two distinct lines of cases which have imposed a duty to deal upon a monopolist -- the "essential facilities" doctrine, or "bottleneck" theory, and the "intent" test. *Aspen Highlands Skiing Corp., 738 F.2d at 1519*. In *Aspen Highlands Skiing Corp*., the Tenth Circuit made the following comments about these two theories:

> We recognize that the cases do not fit neatly into these two categories. There is a significant amount of overlap between them. Nevertheless the dichotomy, though in part illusory, is a useful analytical tool. (Footnotes omitted.)

Id. at 1519-20.

Essential Facilities (or bottleneck)

FP has alleged as part of its monopolization claim **[**20]** that RTSC refused to deal with FP and thereby denied FP access to a facility essential to competition in the marketplace. FP alleges that RTSC denied it access to the white pages listings without a valid business reason.

HN8[] Ordinarily, a business has no legal obligation to deal with its competitors. *Aspen Skiing Co., 472 U.S. at 600*. There are situations, however, in **[*618]** which the federal courts have found a duty under *§ 2* of the Sherman Act for a monopolist to trade with all on nondiscriminatory terms. One of these instances is where the monopolist controls an "essential facility." The "essential facilities" doctrine imposes on the owner of a facility that cannot be reasonably duplicated and which is essential to competition in a given market a duty to make that facility available to its competitors on a nondiscriminatory basis. *McKenzie v. Mercy Hospital of Independence, Kansas, 854 F.2d 365 (10th Cir. 1988)*. The doctrine was established in § 1 cases. *See* *United States v. Terminal Railroad Association, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912)* (consortium of railroads owning a terminal facility that was only feasible facility when coming to city from east must make facility available to other railroads); **[**21]** *Associated Press v. United States, 326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 (1945)* (Associated Press enjoined from continuing its practice of refusing to furnish its service to its members' competitors). In *Otter Tail*, the Supreme Court employed the essential facilities doctrine, although not referring to it by name, to conclude in a *§ 2* case that a regulated electric utility had used its monopoly power unlawfully to eliminate competition in the retail sale of electric power. In recent times, the federal courts of appeals, including the Tenth Circuit, have adopted standards to determine whether a monopolist's refusal to deal constitutes a violation of the essential facility doctrine under *§ 2*. In *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 738 F.2d 1509 (10th Cir. 1984)*, *aff'd on other grounds*, *472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*, the Tenth Circuit, relying on *MCI Communications Corp. v. American Telephone and Telegraph Co., 708 F.2d 1081 (7th Cir. 1983)*, *cert. denied*, *464 U.S. 891, 78 L. Ed. 2d 226, 104 S. Ct. 234 (1983)*, determined that four elements were necessary to establish liability under the doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability to duplicate the facility; (3) denial **[**22]** of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *738 F.2d at 1520*.

Three of the elements of the doctrine are not in dispute here. There is no question that RTSC has control over the white pages listings; that RTSC denied FP use of the listings; and that RTSC could easily provide the listings to FP. The only issue in dispute is the essentiality of the white pages listings, i.e., FP's ability to duplicate them.

HN9[] A monopolist's facility is essential to rivals only where vital to their competitive viability. Areeda & Hovenkamp, *1989 Supplement to* ***Antitrust Law*** 723 (1989). The defendant's resource is not vital if an equivalent is available from other sources. *See* *McKenzie v. Mercy Hospital of Independence, Kansas, supra* (hospital emergency room and obstetrical care unit not essential facility for plaintiff who performed same services in his own private office); *Ferguson v. Greater Pocatello Chamber of Commerce, 848 F.2d 976 (9th Cir. 1988)* (minidome was not essential facility because plaintiff failed to offer sufficient evidence that monopolist's competitor could not construct another equally adequate facility in the area); *Flip* **[**23]** *Side Productions v. Jam Productions, 843 F.2d 1024 (7th Cir. 1988)*, *cert. denied*, *488 U.S. 909, 109 S. Ct. 261, 102 L. Ed. 2d 249 (1988)* rock concert arena not essential facility where several alternatives available); *Florida Fuels, Inc. v. Belcher Oil Co., 717 F. Supp. 1528 (S.D.Fla. 1989)* (competitor's fuel storage tanks at port were not essential facility which could not be duplicated for providing bunkers to cruise ships where plaintiff fuel oil company made no showing why other sites were unsuitable); *Driscoll v. City of New York, 650 F. Supp. 1522 (S.D.N.Y. 1987)* (municipal pier was not essential facility where there were privately owned alternatives); *Robinson v. Magovern, 521 F. Supp. 842 (W.D.Pa. 1981)*, *aff'd*, *688 F.2d 824 (3d Cir. 1982)* (hospital was not an essential facility for physician with staff privileges at other hospitals in area). The question of equivalence can cover a wide range since everything that is legal and possible is available at some price. A facility **[*619]** is not essential unless the plaintiff shows his "inability practically or reasonably to duplicate" it. *MCI Communications, 708 F.2d at 1132*. "An inquiry into the practicality of duplicating the facility should include **[**24]** economic, regulatory and other concerns." *Florida Fuels, 717 F. Supp. at 1533*. It is insufficient for plaintiff to show that access to the facility is merely "more economical" than other alternatives. *Florida Cities v. Florida Power & Light, 525 F. Supp. 1000, 1007 (S.D.Fla. 1981)*.

Circumstances similar to those in this case have arisen in other cases. In *Bellsouth Advertising & Publishing Corp. v. Donnelley Information Publishing, Inc., 719 F. Supp. 1151 (S.D.Fla. 1988)*, plaintiff, an independent telephone directory publisher, filed an antitrust action against the telephone company alleging that the telephone company had maintained monopoly power by not providing it with information such as business classifications and updates. The court held that the plaintiff could apply the essential facility doctrine to this information to prove intent to monopolize. 719 F.2d at 1566. The court, however, determined that factual disputes were present as to the essentiality of the information and the availability of the information from alternative sources. *Id*.

In *Directory Sales Management Corp. v. Ohio Bell Telephone Co., 833 F.2d 606 (6th Cir. 1987)*, the Sixth Circuit held, **[**25]** based on uncontroverted evidence, that the service of providing business classifications was not an essential facility because such information was unreliable and thus had to be duplicated in any event by a competitor. *Id. at 613*. The Sixth Circuit further held that the telephone company did not control essential facilities in the form of simultaneous delivery of its white pages and the yellow pages published by a sister subsidiary and the billing of yellow pages listings and advertisements in telephone bills. *Id*. The evidence had shown that the competing producers of yellow pages could provide simultaneous delivery and that the telephone company charged its sister subsidiary a fee far in excess of its costs for the dual billing. *Id*.

In *White Directory of Rochester, Inc. v. Rochester Telephone Corp., 714 F. Supp. 65 (W.D.N.Y. 1989)*, the court held, based on the evidence presented, that the telephone company need not share its white pages listings with a rival independent telephone directory publisher. *Id. at 70*. Judge Michael A. Telesca determined that the listing information was not an essential facility. *Id*.

FP has taken the position that the duplication of **[**26]** the white pages listings would be difficult and economically impractical. RTSC has contended that the information contained in the white pages listings could be reproduced either through a house-to-house survey or through a telephone survey using digit sheets. RTSC has also pointed out that the courts in the copyright field have recognized that this information could be obtained through independent means.

The evidence concerning the essentiality of the white pages listings was not extensive. Tom Feist, the owner of FP, testified that it would not be economically feasible to reproduce the white pages listings through other means. He stated that he had no idea what it would cost to produce the white pages listings by a house-to-house survey. He further indicated that a telephone survey using digit sheets would be possible, but not practical. Fred Smykla, the executive director of the National Yellow Pages Service Association, testified that the white pages listings could not be economically generated from scratch. Dave Grandell, who has been involved in the business of producing independent telephone directories for over ten years, testified that he had attempted to compile white pages **[**27]** listings from scratch using digit sheets from 1978 through 1982 or 1983. He noted that he had problems finding someone to make the phone calls and getting it completed in a timely manner. He concluded that it was not economically feasible to obtain the white pages listings without access to the telephone company's listings. This constituted the sum of the evidence on the subject of the essentiality of the white pages listings.

[*620] The cases noted by RTSC from copyright law are helpful in considering this issue. In considering whether independent telephone directory publishers could use a copyrighted telephone directory produced by the telephone company, courts have indicated that the independent publisher can make fair use of the telephone company's directory if he first makes an honest, independent canvass and then merely compares and checks his own directory with that of the copyrighted publication and publishes the result after verifying the additional items derived from the copyrighted publication. *United Telephone Co. of Missouri v. Johnson Publishing Co., 671 F. Supp.1514, 1522 (W.D.Mo. 1987)*, aff'd, *855 F.2d 604 (8th Cir. 1988)*; *Central Telephone Co. of Virginia v. Johnson* ***[**28]*** *Publishing Co., 526 F. Supp.838, 843 (D.Colo. 1981)*; *Northwestern Bell Telephone Co. v. Bedco of Minnesota, Inc., 501 F. Supp. 299, 302 (D.Minn. 1980)*; *Southwestern Bell Telephone Co. v. Nationwide Independent Directory Service, Inc., 371 F. Supp. 900, 906 (W.D.Ark. 1974)*. These courts have all recognized that the independent telephone directory publisher can obtain the information contained in the white pages listings through independent research.

The court is not convinced, based on the present record, that the white pages listings are an "essential facility." The information contained in the white pages listings can be independently obtained from other sources. FP was unable to point to any regulatory restrictions in obtaining the information. In addition, FP did not persuade the court that acquiring this information was either impossible or economically impractical. The evidence did demonstrate that it would require some effort and some cost. However, the evidence fell far short of that adduced in other essential facility cases. *See, e.g., Fishman v. Estate of Wirtz, 807 F.2d 520 (7th Cir. 1984)*; *Hecht v. Pro-Football Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 992 (D.C.Cir. 1977)*, **[**29]** *cert. denied*, *436 U.S. 956, 57 L. Ed. 2d 1121, 98 S. Ct. 3069 (1978)*. The evidence did show that one other independent telephone directory publisher had made use of digit sheets when the local telephone company refused access to the white pages listings. We further note that the copyright laws do not totally preclude the independent telephone directory publisher from using the local telephone company directory. The copyright laws require only that the independent publisher make an honest, good faith effort at obtaining the information contained in the telephone company directory prior to using that directory. This requirement, as the court views it, does not mean that the independent publisher must contact every telephone subscriber prior to using the telephone company directory. The independent publisher need only make an honest effort. The court cannot establish in this opinion what constitutes such an effort, but we can say that the requirement is not nearly as constrictive as FP would suggest. Once the independent publisher has made an honest effort at procuring this information, then he can use the telephone company directory. With the use of the telephone company directory, the independent publisher has access **[**30]** to the desired facility. Accordingly, we do not find that FP has sustained its burden of proof on this theory of its refusal of deal claim.

Intent

A second and independent basis for imposing *§ 2* antitrust liability upon RTSC for its refusal to deal would be a determination that RTSC's actions constituted sufficient evidence of an intent to monopolize. "In ***HN10***[] addition to the cases finding liability for a refusal to deal when an essential service is involved, there are cases which find liability when a monopolist's refusal to deal with a competitor is shown to be evidence of an illegal intent to destroy competition. These cases focus on the intent and competitive effect of the refusal to deal; not on whether the facility itself is 'essential.'" *MCI Communications Corp., 708 F.2d at 1148* (citations omitted). The theoretical distinction between the intent theory and the essential facilities doctrine is that the former focuses on the monopolist's state of mind while the latter examines the detrimental effect on competitors. *Byars v. Bluff City News Co., 609 F.2d 843, 856* ***[*621]*** *(6th Cir. 1979)*. However, as recognized by the Tenth Circuit in *Aspen Highlands Skiing Corp*., there are **[**31]** many overlapping considerations in practice.

HN11[] Once again, ordinarily, a company may deal or refuse to deal with whomever it pleases, as long as it acts independently. Aspen Skiing Co., 472 U.S. at 600. Even a company with monopoly power in a relevant market has no general duty to cooperate with its business rivals and may refuse to deal with them if valid business reasons exist for such refusal. Id. at 604. It is unlawful, however, for a monopolist to engage in conduct, including refusals to deal, that unnecessarily excludes or handicaps competitors in order to maintain its monopoly into another relevant market. Exclusionary conduct is conduct that does not benefit consumers by making better products or services available, by increasing efficiency, or in other ways, but instead has the effect of impairing competition. Id. at 605.

Having carefully reviewed the sum of the evidence, we find an intent by RTSC to exclude FP in order to extend its monopoly into another relevant market. In reaching this conclusion, the court has carefully weighed the evidence presented to the court. We believe that the intent of RTSC was honestly reflected during discovery in this case. FP propounded **[**32]** an interrogatory to RTSC asking for the reason for RTSC's refusal to license the white pages listings to FP. RTSC responded as follows: "Compilation of white page listings is an ongoing year 'round effort of [RTSC] to be provided to its subscribers. Costs are recovered from the subscribers and revenues derived from Yellow Page ads. Any profits realized from the directory are used to keep rates down. Furnishing these listings to anyone would be defeating one of the purposes of the co-op." In addition, the following occurred during a deposition of Merlin Dennis, a member of the board of directors of RTSC, after the interrogatory had been answered:

Q: You don't recall why you refused to license listings to [FP]?

A: No, not absolutely. I know it was the motion of the board to do that and I don't recall any particular discussion, no.

Q: Do you still refuse to license listings to [FP]?

A: Speaking for the board, that's their feeling. You are asking me as a spokesman for the board. Is that correct?

Q: Either that or as president of the corporation.

A: At this point we have not changed our decision.

* * * *

Q: You have answered the interrogatory, the corporation has, stating the reason **[**33]** you refused to license listings to [FP] is because it would defeat your purpose. You state that your costs of compilation are recovered from subscribers and revenues derived from Yellow Page ads. What I am asking is what's the recovery of cost from the Yellow Page ads have to do with your purpose?

A: Any income that comes to the organization will affect the rates that the subscribers pay.

Q: What does that have to do with licensing the listings to [FP]?

A: Anything that will affect the operation of our Yellow Pages.

* * * *

Q: Okay, that's the total extent of your answer, is that it is a business decision. No matter how much I ask you, you are never going to say anything about reasons, is that right?

A: Never is a long time.

Q: Would you like to have [FP] out of the area?

A: I am not going to answer that.

Q: Why don't you answer that?

A: I think the reason, the answer is obvious why I do not answer.

The aforementioned responses suggest quite clearly that RTSC did not want any competition in the yellow pages advertising market. Although the testimony at trial differed from the record established during discovery, we were not persuaded by it. **[*622]** Merlin Dennis testified at trial, and his **[**34]** memory was much clearer. He testified that he had refreshed his recollection and he now clearly remembered that RTSC had refused to license the white pages listings to FP because the RTSC board believed that its subscribers were suspicious of a new independent telephone directory and was concerned that the licensing of the white pages listing might violate the contract that RTSC had with its directory publisher. The court did not find Mr. Dennis' trial testimony credible in light of the evidence adduced during discovery. The discovery materials strongly suggest that RTSC's intent was to destroy competition. The conduct of RTSC impaired the opportunities of FP and did not further competition on the merits. RTSC's refusal to deal was exclusionary conduct, not competitive conduct. The suggestion that the RTSC board was unwilling to license the white pages listings because subscribers were leery of an independent telephone directory was unsupported. In addition, the contention that the licensing of the white page listings to FP might have violated the contract with RTSC's directory publisher also lacks credence. A quick review of the contract would have settled this concern. The overriding **[**35]** interest of the RTSC board was the damage that the FP directory would do to RTSC.

This finding is further supported by the evidence indicating that RTSC was willing to license its white pages listings to noncompetitors. RTSC had no problem in licensing its listings to telephone companies that did not sell advertising in the RTSC service area. This sort of discriminatory refusal to deal is unlawful. *See Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951)*

Accordingly, although RTSC generally may be free to deal with whomever it pleases, we find based on a review of the evidence that its real purpose was to extend its monopoly in telephone service to a monopoly in yellow pages advertising unlawfully, and conclude that its behavior constitutes an illegal refusal to deal under *§ 2* of the Sherman Act.

Injury

The court shall next **[**36]** turn to the issue of injury and damages. RTSC argues that, even assuming it abused its monopoly power, FP cannot recover because it has failed to establish that RTSC's unlawful conduct caused FP injury and damages to its business.

HN12[] Injury is an essential element that a plaintiff must prove to recover under the antitrust laws. *Aspen Highlands Skiing Corp., 738 F.2d at 1523*. FP must prove antitrust injury "reflecting the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Matic, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Proving causation does not require plaintiff to prove the value of its injury. It requires only that plaintiff prove that it was in fact injured by defendant's alleged antitrust violation. If plaintiff was in fact injured, then we must consider the amount of plaintiff's damages. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1969)*; *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*.

The court is satisfied that FP offered evidence which established as a matter of fact and with a fair degree of certainty that RTSC's illegal conduct **[**37]** was a material cause of FP's injury. FP demonstrated that RTSC's refusal to license the white pages listings had an impact on its market share and its advertising rate. The evidence revealed that FP's directory was incomplete and inaccurate because of RTSC's refusal to license its white pages listings. The evidence further revealed that FP's market share in areas where the local telephone company licensed its white pages listings was significantly higher than its market share in the RTSC service area. In sum, the requirement of proof of injury as an element of plaintiff's case was met.

Damages

The standards involved in proving damages in antitrust cases were set forth **[*623]** in *Aspen Highlands Skiing Corp*. as follows:

> The Supreme Court has recognized that an antitrust plaintiff is rarely able to prove its damages with mathematical precision. *See e.g., J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566, 101 S. Ct. 1923, 1929, 68 L. Ed. 2d 442 (1981)* ("The vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of defendant's antitrust violation."); *Zenith Corp. v. Hazeltine, 395 U.S. 100, 123,* ***[**38]*** *89 S. Ct. 1562, 1576, 23 L. Ed. 2d 129 (1969)* ("damages issue in [cases where plaintiff was partially or totally excluded from a market] are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts"); *see also King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1158 (10th Cir. 1981)*, *cert. denied*, *454 U.S. 1164, 102 S. Ct. 1038, 71 L. Ed. 2d 320 (1982)*; *Cackling Acres, Inc. v. Olson Farms, Inc., 541 F.2d 242, 246 (10th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572 (1977)*. The Court has emphasized that ***HN13***[] the trier of fact can determine the amount of damages from "a just and reasonable estimate of the damage based on relevant data." *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 66 S. Ct. 574, 580, 90 L. Ed. 652 (1946)*. The damage award, however, may not be based on "speculation or conjecture." *Id*.

738 F.2d at 1525-26.

FP presented the testimony of Charles P. Goldfarb, an economist with an extensive background in antitrust matters. Mr. Goldfarb determined that the range of damages suffered by FP over the ten-year period between 1978 to 1988 was $ 33,000 to $ 58,000. Mr. Goldfarb **[**39]** arrived at this figure using several assumptions and several calculations. Mr. Goldfarb's calculations were performed only for the year 1987. He first assumed that FP would have gained as much of the market in the RTSC service area as it had in other areas where it had been able to license the white pages listings. This meant that FP's market share would have increased 9%. This 9% increase would have boosted earnings by $ 6,600. Mr. Goldfarb called this calculation a "conservative estimate." This was deemed a conservative estimate because Mr. Goldfarb assumed that the total sales in the RTSC service area would not have increased even if FP had been able to license the white pages listings. Mr. Goldfarb noted that advertisers in the RTSC service area might have purchased more advertising if they believed that the FP was producing a better product. He noted further that it assumes that FP was not harmed outside the RTSC service area as a result of the incomplete listings in the RTSC service area. He believed that the incomplete listings in the RTSC service area might have had an impact on FP's ability to sell outside the RTSC service area. He also performed a less conservative estimate **[**40]** which showed a gain of revenues of $ 11,600. This calculation reflected an increase in FP's percentage of RTSC's revenues to the percentage that FP had achieved in comparison to other local telephone companies. Mr. Goldfarb then divided these figures in half and multiplied them by five. He divided them in half and only multiplied them by five rather than ten in order to be "very conservative" in his damages estimate. He did not figure the cost of licensing the white pages listings because he noted that the cost of verification is the same or higher than the cost of the listings.

The court has carefully considered all of the testimony offered at trial as it related to the issue of damages. Having carefully reviewed that testimony, the court concludes that FP suffered damages in the amount of $ 33,000. We believe that this amount is a conservative one, but an appropriate one. The court found no merit to RTSC's efforts to attack Mr. Goldfarb's testimony as insufficient, incomplete or inaccurate. In reaching this conclusion, we note that once a plaintiff has proved the fact of injury, it is allowed considerable latitude in proving the amount of damages resulting from that injury. No mechanical **[**41]** test or formula requires that damage proof **[*624]** conform to a particular theory or model. An antitrust plaintiff has a lesser burden of proof as to damages than do plaintiffs in other types of civil actions. *See Zenith Radio Corp., 395 U.S. at 123*. RTSC sought to point out that Mr. Goldfarb used only the figures from 1987 in arriving at his damages figure. RTSC contended that FP should have produced figures for each of the ten years for which it sought damages. The court was convinced that the year 1987 was a representative year and could be used to estimate the total amount of FP's damages. Mr. Goldfarb's subsequent calculations suggested that a very conservative methodology. Thus, we are unable to conclude that his final figures were based on speculation or conjecture. We note that RTSC could have made the necessary calculations if it believed that the numbers used by Mr. Goldfarb were inaccurate or not representative. RTSC also pointed out that it was a co-op company and that the market shares it obtained may have been due to loyalty by its telephone subscribers and/or the economic interests of its telephone subscribers. Mr. Goldfarb discounted this contention, and we agree with his **[**42]** analysis. In sum, we are convinced that the figure of $ 33,000 is the proper amount of FP's damages. This amount shall be trebled for a total award of $ 99,000.

Injunctive Relief

The court shall also grant the injunctive relief sought by FP. ***HN14***[] Injunctive relief under § 16 of the Clayton Act, *15 U.S.C. § 26*, is granted for the purpose of preventing threatened loss or damage by reason of a violation of the federal antitrust laws. *Helfenbein v. International Industries Inc., 438 F.2d 1068, 1071 (8th Cir. 1971)*, *cert. denied*, *404 U.S. 872, 92 S. Ct. 63, 30 L. Ed. 2d 115 (1971)*. In the framing of equitable decrees, the district courts are clothed with broad discretion to model their judgments to fit the exigencies of the particular case. *See Allis-Chalmers Manufacturing Co. v. White Consolidated Industries Inc., 414 F.2d 506, 525 n. 32 (3d Cir. 1969)*, *cert. denied*, *396 U.S. 1009, 90 S. Ct. 567, 24 L. Ed. 2d 501 (1970)*. The court shall enjoin RTSC from refusing to license its white pages listings at a reasonable rate. The court shall provide the parties the opportunity to reach an agreement on this rate. This agreement should be reached within thirty days of the date of this order. This matter shall be resubmitted to the court if **[**43]** the parties fail to reach an agreement.

Attorney's Fees

Finally, the court shall also award attorney's fees to FP. *15 U.S.C. §§ 15* and *26*. The parties should make some effort to resolve this aspect of the case pursuant to the guidelines established in Local Rule 220. The issue of the amount of attorney's fees should be submitted to the court if no agreement is reached by the parties.

IT IS THEREFORE ORDERED that judgment hereby be entered in favor of Feist Publications, Inc. in the amount of $ 99,000.00.

IT IS FURTHER ORDERED that Rural Telephone Service Company, Inc. be hereby enjoined from refusing to license the white pages listings to Feist Publications, Inc. at a reasonable rate. The parties shall attempt to resolve the amount of this rate within thirty days of the date of this order. If no agreement is reached, the court shall determine the appropriate rate.

IT IS FURTHER ORDERED that Feist Publications, Inc. be hereby awarded its attorney's fees in litigating this action. The parties should make some effort to resolve this issue in accordance with Local Rule 220. The issue should be submitted to the court if no agreement is reached by the parties.

IT IS SO ORDERED.

HN1[] **Summary Judgment, Opposing Materials**

On an appeal from a summary judgment, a court reviews the record de novo to determine whether there are genuine issues of material fact. *Fed. R. Civ. P. 56(c)*. The court assesses the record in the light most favorable to the non-movant and draw all reasonable inferences in its favor. A non-movant who bears the ultimate burden of proof, however, must demonstrate in opposing a summary judgment motion that there is some evidence which would create a genuine issue of material fact. Conclusory allegations will not suffice to create such a genuine issue. There must be more than a scintilla of evidence, and more than some metaphysical doubt as to the material facts.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Burdens of Proof > General Overview

HN2[] **Monopolies & Monopolization, Actual Monopolization**

To establish that a defendant denied an essential facility, a plaintiff must demonstrate that duplication of the facility would be economically infeasible and that denial of its use inflicts a severe handicap on potential or current market entrants. The four-part test for finding essential facilities liability is (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Burdens of Proof > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

A successful "essential facilities" plaintiff must prove that denial of access has caused it "severe handicap." As the word "essential" indicates, a plaintiff must show more than inconvenience, or even some economic loss; he must show that an alternative to the facility is not feasible.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Evidence > Burdens of Proof > General Overview

HN4[] **Monopolies & Monopolization, Attempts to Monopolize**

To succeed on a claim of attempted monopolization, a plaintiff is required to demonstrate that defendant (1) intended to monopolize the pertinent market; (2) engaged in conduct designed to carry out that intent; and (3) had a "dangerous probability" of success.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Monopolies & Monopolization, Attempts to Monopolize**

A threshold showing for a successful attempted monopolization claim is sufficient market share by the defendant.

Civil Procedure > Remedies > Damages > Special Damages

Torts > Intentional Torts > Prima Facie Tort > Elements

Torts > Intentional Torts > Prima Facie Tort > General Overview

HN6[] **Damages, Special Damages**

The elements for prima facie tort under New York law are (1) intentional infliction of harm; (2) resulting in special damages; (3) without excuse or justification; (4) by an act that would otherwise be lawful. The touchstone is "disinterested malevolence," meaning that the plaintiff cannot recover unless the defendant's conduct was not only harmful, but done with the sole intent to harm. Motives other than disinterested malevolence, such as profit, self-interest, or business advantage will not suffice under the doctrine of prima facie tort.

Counsel: David M. Malone, Uniondale, New York (David E. Steckler, Lawrence B. Bernard, and Rivkin, Radler, Dunne & Bayh, Uniondale, New York, on the brief) for Appellant Twin Laboratories, Inc.

Albert, and Arent, Fox, Kintner, Plotkin & Kahn, Washington, District of Columbia; Anthony L. Tersigni, and Meyers, Tersigni, Lurie, Feldman & Gray, New York, New York, on the brief), for Appellees Weider Health & Fitness and I, Brute Enterprises, Inc.

Judges: Timbers, Meskill, and Altimari, Circuit Judge.

Opinion by: TIMBERS

Opinion

[*567] TIMBERS, Circuit Judge:

Appellant Twin Laboratories, Inc. ("Twinlab") appeals from a summary judgment entered August 30, 1989 in the Southern District of New York, Michael B. Mukasey, District Judge, in favor of appellees Weider Health & Fitness ("Weider") and I., Brute Enterprises, Inc. ("Brute").

The final judgment entered August 30, 1989 was **[**2]** based on two prior orders. The first, dated July 21, 1989, granted appellees' motion for summary judgment on all of Twinlab's antitrust claims. The second, dated August 25, 1989, *720 F. Supp. 31 (S.D.N.Y. 1989)*, denied Twinlab's motion for reconsideration of the "essential facilities" antitrust count and granted appellees' motion for summary judgment on Twinlab's pendent claim of prima facie tort under New York law.

On appeal, Twinlab presses claims of error on two antitrust counts -- essential facilities and attempted monopolization -- and on the prima facie tort count. It asserts that the court misconstrued the applicable law and, in violation of its duty at the summary judgment stage, failed to draw proper factual inferences in its favor.

For the reasons which follow, we affirm the judgment of the district court.

I.

We summarize only those facts and prior proceedings believed necessary to an understanding of the issues raised on appeal. Since we are reviewing a summary judgment in favor of appellees, we view the evidence in the light most favorable to Twinlab.

Twinlab and Weider produce competing nutritional supplements for bodybuilders. According to the **[**3]** testimony of Twinlab's expert witness, Dr. Thomas Overstreet, Weider's supplements comprised 10-25% of the market, depending on the market definition, and Twinlab's share of the same market was 5-12%.

Weider, through its wholly-owned subsidiary, Brute, publishes what are universally acknowledged to be the two leading magazines in the bodybuilding field: *Muscle & Fitness* and *Flex*. Twinlab owns *Muscular Development*, a competing magazine, but Twinlab's magazine has a far smaller circulation -- less than 10% of the combined circulation of Weider's magazines. For several years, Twinlab used *Muscle & Fitness* and *Flex* as the primary advertising vehicles for its nutritional supplements. In late 1988, however, Weider gave Twinlab notice that it would accept no more advertising for Twinlab's products. From the January 1989 issues through the present, no Twinlab advertising has appeared in either magazine.

Based on Weider's refusal to accept its ads, Twinlab commenced the instant action **[*568]** in February 1989 by filing a five-count complaint. Three counts were based on *§ 2* of the Sherman Act, *15 U.S.C. § 2 (1988)*. They were: (1) monopolization; **[**4]** (2) denial of essential facilities; and (3) attempted monopolization. The complaint also alleged two counts of actionable conduct under New York State law -- intentional interference with business relations and prospective economic advantage; and prima facie tort. By its opinion and order dated July 21, 1989, the court granted Weider's motion for summary judgment on all counts except the prima facie tort count. Weider renewed its summary judgment motion on the latter count, and Twinlab cross-moved for reconsideration of the essential facilities count. By its opinion and order dated August 25, 1989, the court granted Weider's motion and denied Twinlab's cross-motion. The judgment dismissing Twinlab's complaint in its entirety was entered August 30.

There followed this appeal during which Twinlab has dropped the counts alleging monopolization and intentional interference with business relations and prospective economic advantage.

II.

HN1[] On an appeal from a summary judgment, we review the record de novo to determine whether there are genuine issues of material fact. *Fed.R.Civ.P. 56(c)*. We assess **[**5]** the record in the light most favorable to the non-movant and draw all reasonable inferences in its favor. *Ramseur v. Chase Manhattan Bank, 865 F.2d 460, 465* (2 Cir. 1989). A non-movant who bears the ultimate burden of proof, however, must demonstrate in opposing a summary judgment motion that there is some evidence which would create a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. Conclusory allegations will not suffice to create such a genuine issue. There must be more than a "scintilla of evidence", *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*, and more than "some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*.

III.

Turning first to Twinlab's essential facilities count, it asserts that *§ 2* of the Sherman Act imposes a duty on Weider to make available advertising space in *Muscle & Fitness* and *Flex*. This is so, it claims, because the magazines are facilities essential **[**6]** to competition in the nutritional supplement business; that is, one cannot effectively compete without advertising in these magazines. The policy behind prohibiting denial of an essential facility to a competitor, at least in part, is to prevent a monopolist in a given market (here, bodybuilding magazines) from using its power to inhibit competition in another market (here, nutritional supplements for bodybuilders). *E.g., Flip Side Productions, Inc. v. Jam Productions, Ltd., 843 F.2d 1024, 1033* (7 Cir.), *cert. denied*, *488 U.S. 909, 109 S. Ct. 261, 102 L. Ed. 2d 249 (1988)*; Areeda & Hovenkamp, ***Antitrust Law*** para. 736.1, at 655 (1988 supp.).

Antitrust law, however, does not require one competitor to give another a break just because failing to do so offends notions of fair play. *Cf. Olympia Equipment Leasing Co. v. Western Union Telegraph Co., 797 F.2d 370, 375-76* (7 Cir. 1986), *cert. denied*, *480 U.S. 934, 94 L. Ed. 2d 765, 107 S. Ct. 1574 (1987)*. "A particular plaintiff's plight is relevant only as it bears on market effects." Areeda & Hovenkamp, *supra*, P. 736.2, at 676. The existence of a facility, even **[**7]** if essential in a technical sense, does not constitute an antitrust violation if the plaintiff cannot allege harm to competition. *E.g., McKenzie v. Mercy Hospital, 854 F.2d 365, 370* (10 Cir. 1988); *Colonial Penn Group, Inc. v. American Ass'n of Retired Persons, 698 F. Supp. 69, 73 (E.D.Pa. 1988)*.

At the very least, ***HN2***[] a plaintiff must demonstrate that "duplication of the facility would be economically infeasible" and that "denial of its use inflicts a *severe handicap* on potential [or current] market entrants." *Hecht v.*

Pro-Football, Inc., 187 App. D.C. 73, 570 F.2d 982, 992 (D.C.Cir. 1977) (emphasis added), *cert. denied*, *436 U.S. 956, 57 L. Ed. 2d 1121, 98 S. Ct. 3069 (1978)*; *see also* *MCI Communications Corp. v. American Tel. &* **[*569]** *Tel. Co., 708 F.2d 1081, 1132-33* (7 Cir.) (four-part test for finding essential facilities liability: "(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial **[**8]** of the use of the facility to a competitor; and (4) the feasibility of providing the facility."), *cert. denied*, *464 U.S. 891, 78 L. Ed. 2d 226, 104 S. Ct. 234 (1983)*.

A leading antitrust commentator would limit the analysis to "facilities that are a natural monopoly, facilities whose duplication is forbidden by law, and perhaps those that are publicly subsidized and thus could not practicably be built privately." Areeda & Hovenkamp, *supra*, P. 736.2, at 680-81. Most of the successful essential facility claims fall within the categories stated by this commentator. *E.g.,* *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)* (electric power lines); *Fishman v. Estate of Wirtz, 807 F.2d 520* (7 Cir. 1987) (basketball arena); *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509* (10 Cir. 1984) (mountain), *aff'd on other grounds*, *472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*; *Hecht, supra, 570 F.2d 982* (football stadium). In cases finding liability in other categories, however, the facility in question was more than dominant; **[**9]** it was effectively the only one in town. *E.g.,* *Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951)* (ads in monopolist newspaper); *Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d 274* (1 Cir. 1982) (newspaper's classified listings), *cert. denied*, *460 U.S. 1028, 75 L. Ed. 2d 500, 103 S. Ct. 1279 (1983)*.

Twinlab asserts that sales of Weider's magazines account for 66% of all bodybuilding magazine sales. The district court assumed without deciding that Weider had monopoly power in the magazine market. We also accept that assumption. We nevertheless conclude that Weider's conduct did not constitute an antitrust violation.

We reach that conclusion despite our acceptance of Twinlab's assertion that the district court failed to draw certain factual inferences in its favor. Specifically, the court held that *Muscle & Fitness* and *Flex* could not be essential facilities primarily because Twinlab had the means to turn *Muscular Development* into a strong competitor and had promised to do so in its promotional literature designed to attract advertisers. The court practically transformed **[**10]** those promotional phrases into judicial admissions, and relied on them despite substantial evidence that *Muscular Development* would not compete effectively with Weider's magazines any time in the foreseeable future. Weider itself regards *Muscular Development* as being non-competitive with its magazines. *Muscular Development* apparently has lost money and has not met its circulation goals. If resolution of the essential facilities claim turned solely on whether Twinlab's magazine could compete with Weider's in the foreseeable future, the proper result here would be to remand for trial.

While the question of *Muscular Development's* competitiveness may genuinely be in dispute, its resolution is not material. ***HN3***[] A successful "essential facilities" plaintiff must prove that denial of access has caused it "severe handicap." *Hecht, supra, 570 F.2d at 992*; *Driscoll v. City of New York, 650 F. Supp. 1522, 1529 (S.D.N.Y. 1987)*. At the summary judgment stage, of course, Twinlab need only show that there is a triable question of severe handicap. *Liberty Lobby, supra, 477 U.S. at 251*. **[**11]**

We hold that Twinlab has failed to make such a showing. Its own expert, Dr. Overstreet, stated that, six months after Weider's advertising ban, Twinlab's nutritional supplements were not only continuing to grow more profitable but were continuing to increase their market share relative to Weider's products. While Dr. Overstreet stated that in his opinion Twinlab's growth would have been even more rapid but for the advertising ban, this hardly constitutes a showing of severe handicap.

The testimony of several other witnesses supports our conclusion. Twinlab's president indicated that he expected 1989 to be even better for the company than 1988, which was, in his words, a "banner year". The anticipated expansion was so great

[*570] that Twinlab expected to increase its production facilities.

Moreover, an executive of General Nutrition Corp., the largest retailer in the market, predicted that in 1989 Twinlab's sales would overtake Weider's sales in his stores for the first time. He did not indicate that Weider's refusal to accept advertising from Twinlab affected that trend in the first half of 1989.

Our conclusion also is bolstered by an exhibit introduced by Twinlab which **[**12]** shows that only five of the top ten sellers of nutritional supplements advertise in *Muscle & Fitness* and *Flex*. Of the five that do, only Weider itself relies on the magazines for over 50% of its advertising. Twinlab now attempts to discredit that evidence by stating that the survey covered only one month; it fails to state specific facts that demonstrate why the one-month sample is inaccurate.

As the word "essential" indicates, a plaintiff must show more than inconvenience, or even some economic loss; he must show that an alternative to the facility is not feasible. *E.g., McKenzie, supra, 854 F.2d at 370*; *Driscoll, supra, 650 F. Supp. at 1530*; Areeda & Hovenkamp, *supra*, P. 736.2, at 678-80.

Since Twinlab has failed to make such a showing, we hold that its essential facilities claim fails.

IV.

We turn next to Twinlab's claim of attempted monopolization. ***HN4***[] To succeed on this claim, Twinlab was required to demonstrate that there were triable issues of fact as to whether Weider: (1) intended to monopolize the nutrition supplement market; (2) **[**13]** engaged in conduct designed to carry out that intent; and (3) had a "dangerous probability" of success. *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*; *Lorain Journal, supra, 342 U.S. at 153-55*; *Kelco Disposal, Inc. v. Browning-Ferris Indus., Inc., 845 F.2d 404, 407* (2 Cir. 1988), *aff'd*, *492 U.S. 257, 109 S. Ct. 2909, 106 L. Ed. 2d 219 (1989)*. We need address only the third factor.

HN5[] A threshold showing for a successful attempted monopolization claim is sufficient market share by the defendant. Twinlab's most favorable evidence established that Weider at best had 25% of the relevant market and probably much closer to 10%. We have held that a 33% market share does not even approach the level required for dangerous probability of success. *Nifty Foods Corp. v. Great Atl. & Pac. Tea Co., 614 F.2d 832, 841* (2 Cir. 1980). The probability of success is reduced even further where, as here, the remainder of the market is divided among dozens of competitors.

[14]** Market share is the primary indicator of the existence of a dangerous probability of success, but not the sole one. *E.g., International Distrib. Centers, Inc. v. Walsh Trucking Co., 812 F.2d 786, 792* (2 Cir.), *cert. denied*, *482 U.S. 915, 96 L. Ed. 2d 676, 107 S. Ct. 3188 (1987)*; *Broadway Delivery Corp. v. United Parcel Service of Am., Inc., 651 F.2d 122, 128* (2 Cir.), *cert. denied*, *454 U.S. 968, 70 L. Ed. 2d 384, 102 S. Ct. 512 (1981)*. Twinlab points to *Muscle & Fitness* and *Flex* as the requisite special factors. According to Twinlab, these demonstrate that Weider is dangerously likely to succeed in its attempt to monopolize the supplements market by leveraging its position with the magazines. To raise the point here, however, is merely to rehash the essential facilities argument referred to above. The magazines may give Weider a leg up in the nutritional supplements competition, but they do not create a dangerous probability that Weider will gain a monopoly.

Twinlab's reliance on *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263* (2 Cir. 1979), *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*, **[**15]** is misplaced. As Twinlab points out, we did state in *Berkey Photo* that "it is improper, in the absence of a valid business policy, for a firm with monopoly power in one market to gain a competitive advantage in another by refusing to sell a rival the monopolized goods or services he needs to compete effectively in the second market." *Id. at 284*. Aside from the fact that this statement was dictum (since the plaintiff in *Berkey Photo* failed to allege an applicable violation) and that *Berkey Photo* involved a "tying" claim rather than **[*571]** one alleging denial of essential facilities, our discussion above precludes application of the cited principle. We found that Twinlab has remained an effective competitor with Weider despite the latter's refusal to accept Twinlab's ads. The quoted passage from *Berkey Photo* requires tangible harm to competition.

We hold that Twinlab's claim of attempted monopolization is without merit.

V.

This brings us to Twinlab's claim of prima facie tort. It alleges that Weider's refusal to accept its ads rendered Weider liable for prima facie tort under New York law. **[**16]** ***HN6***[] The elements for such a tort are: (1) intentional infliction of harm; (2) resulting in special damages; (3) without excuse or justification; (4) by an act that would otherwise be lawful. *E.g., Burns Jackson Miller Summit & Spitzer v. Lindner, 59 N.Y.2d 314, 332, 451 N.E.2d 459, 467, 464 N.Y.S.2d 712, 720 (1983)*. The touchstone is "disinterested malevolence", meaning that the plaintiff cannot recover unless the defendant's conduct was not only harmful, but done with the sole intent to harm. *Id. at 333, 451 N.E.2d at 467-68, 464 N.Y.S.2d at 721*. We have held that motives other than disinterested malevolence, "such as profit, self-interest, or business advantage" will not suffice under the doctrine of prima facie tort. *Marcella v. ARP Films, Inc., 778 F.2d 112, 119* (2 Cir. 1985) (citing *Squire Records, Inc. v. Vanguard Recording Society, Inc., 25 A.D.2d 190, 191-92, 268 N.Y.S.2d 251, 253-54* (1st Dep't 1966), *aff'd*, *19 N.Y.2d 797, 226 N.E.2d 542, 279 N.Y.S.2d 737 (1967))*.

We emphasize this principle because there is some dispute over Weider's true motive for rejecting the ads. A Weider executive **[**17]** stated in a deposition that Twinlab's ads were rejected because they were misleading. Twinlab countered that there was substantial evidence indicating that the proffered justification was mere pretext. We agree. Twinlab, however, does not, and could not, suggest that Weider's primary motive was not based on self-interest.

We hold that Twinlab's contention that Weider is liable for prima facie tort is without merit.

VI.

To summarize:

We hold that Twinlab's antitrust claims, which alleged denial of essential facilities and attempted monopolization, were properly disposed of by summary judgment in favor of appellees. We further hold that Twinlab's claim of prima facie tort under New York law is without merit. Twinlab is not a 90-pound weakling in whose face Weider has kicked sand. Rather, Twinlab is a muscular competitor who is complaining about the competitive process. We affirm the summary judgment in favor of appellees.

Affirmed.

HN1[] **Venue, Corporations**

In a civil action where jurisdiction is not founded solely on diversity, venue will generally be proper only in the judicial district where all defendants reside or in which the claim arose. *28 U.S.C.S. § 1391(b)*. Residence of individual defendants is determined by their place of domicile. Corporate defendants are deemed to reside in any judicial district in which they are subject to personal jurisdiction at the time the action is commenced. *28 U.S.C.S. § 1391(c)*.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN2[] Venue, Individual Defendants

As for the "claim arose" prong of 28 U.S.C.S. § 1391(b), there is a "weight of the contacts" test, whereby the court weighs the connections between the claim and particular districts proposed as proper venue sites, and determines in which district the events having operative significance for plaintiff's claim arose, or, in other words, in which district the defendant's contacts have been most significant. In making this calculation, the court must consider the availability of witnesses, the accessibility of other relevant evidence, and the convenience of the defendant (but not of the plaintiff). The court must bear in mind that the venue statute is designed primarily to protect the defendant against the risk that a plaintiff will select an unfair or inconvenient place of trial, and that the "claim arose" language is inserted in § 1391(b) not to provide plaintiffs with an unfettered choice among a host of different districts, but simply to ensure that plaintiffs would be able to sue somewhere if defendants reside in different districts. Where defendants all do reside in the same district, the "claim arose" language should not even be considered.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN3[] In Personam Actions, Doing Business

While a defendant's contacts with the forum state might be relevant in a personal jurisdiction inquiry, they are not relevant to the "weight of contacts" analysis applied to determine proper venue. The contacts to be weighed are those between the claim and the jurisdiction, not those generally between a defendant and the jurisdiction.

Civil Procedure > Preliminary Considerations > Venue > Agents

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

Civil Procedure > Preliminary Considerations > Venue > Special Venue

HN4[] Venue, Agents

The Racketeer Influenced and Corrupt Organization Act (RICO) provides that, as to any given defendant, any civil action or proceeding under the chapter may be instituted in the district court of the United States for any district in which such person resides, is found, has an agent, or transacts his affairs. 18 U.S.C.S. § 1965(a). A corporate defendant is "found" in a district for the purposes of RICO if its officers or agents regularly carry on the business of the corporation there. The "transacts affairs" prong of the RICO statute has been interpreted to require the regular conduct of business of a substantial and continuous character within the district. Occasional acts such as telephoning or mailing letters into the district, or attending trade fairs there at which goods may be sold, have been held to be insufficient to meet this test.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN5[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

As for individual defendants in an action brought under the Racketeer Influenced and Corrupt Organizations Act, the "transacts affairs" prong for venue requires evidence of personal affairs of the defendant within the state, not simply affairs he may have transacted on behalf of his employer.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN6[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

There are seven factors to determine venue for a corporation in an action brought under the Racketeer Influenced and Corrupt Organizations Act. They include whether the corporation has within the district a place to do business, people to carry on the business, or tangible property; whether the corporation is subject to regulation in the district; and whether it has business operations there, manifestations of doing business, or good will activities.

Opinion by: [*1] LEVAL

Opinion

MEMORANDUM AND ORDER

PIERRE N. LEVAL, UNITED STATES DISTRICT JUDGE

Defendants HPT Plastics, Henry Trounstine, Gregg Fous, Donald Lipka and Lipka Products move to dismiss for improper venue or, alternatively, to transfer the action to the United States District Court for the Southern District of Ohio.

Background

Plaintiff, a corporation based in Massachusetts and incorporated under Massachusetts law, is engaged in the business of purchasing plastic packaging materials and reselling them to wholesalers and manufacturers. Defendants HPT Plastics and Lipka Products, Inc. are Ohio corporations which have their principal and sole place of business in Cincinnati. Defendants Trounstine and Fous, both citizens and residents of Ohio, are respectively president and "a principal" of HPT. Defendant Lipka, also an Ohio citizen and resident, is the president of Lipka Products. The complaint alleges that defendants conspired to solicit plaintiff's customers and sources of supply, in violation of a 1987 agreement between the Now Plastics and HPT, [1] and that this solicitation has induced some of plaintiff's customers to breach their contracts with plaintiff. Defendants contend that **[*2]** the contract between Now and HPT was based in large part on plaintiff's false representations that it had an exclusive relationship with three of the suppliers, and that defendants were justified in contacting plaintiff's customers when the representations proved to have been false. Federal jurisdiction is based both on diversity of citizenship and on federal questions arising out of a RICO claim. Plaintiff also alleges breach of contract, fraud, appropriation of trade secrets, and intentional interference with a business relationship.

[*3] In response to defendants' motion, plaintiff defends the venue under both *28 U.S.C. § 1391*, the general venue statute for civil cases, and *18 U.S.C. § 1965(a)*, the special venue provision of RICO.

Discussion

A. *Venue Under § 1391*

HN1[] In a civil action where jurisdiction is not founded solely on diversity, venue will generally be proper "only in the judicial district where all defendants reside or in which the claim arose." *28 U.S.C. § 1391(b)*. Residence of individual defendants is determined by their place of domicile. Corporate defendants are deemed to reside "in any judicial district in which [they are] subject to personal jurisdiction at the time the action is commenced." *28 U.S.C. § 1391(c)*.

HN2[] As for the "claim arose" prong of *§ 1391(b)*, there has been longstanding debate about the method by which courts should determine the district in which a given claim arose, even after the Supreme Court's attempt to clarify this issue in *Leroy v. Great Western United Corp., 443 U.S. 173 (1979)*. In this Circuit, *Leroy* has been interpreted as calling for a "weight of the contacts" test, whereby the court weighs the connections between the claim and particular districts proposed **[*4]** as proper venue sites, and determines in which district the "events having operative significance" for plaintiff's claim arose, *see Kupcho v. Steele, 651 F. Supp. 797 (S.D.N.Y. 1980)*, or in other words, in which district the defendant's contacts "have been most significant." *See Catsimadis v. Innovative Travel Group, 650 F. Supp. 748, 752 (S.D.N.Y. 1986)*; *Andrew H. by Irene H. v. Ambach, 579 F. Supp. 85, 88 (S.D.N.Y. 1984)*; *Canaday v. Koch, 598 F. Supp. 1139, 1147 (E.D.N.Y. 1984)*; *Cheeseman v. Carey, 485 F. Supp. 203, 213 (S.D.N.Y. 1980)*, *rev'd on other grounds*, *623 F.2d 1387 (2d. Cir. 1980)*. [2] In making this calculation, the court must consider the "availability of witnesses, the accessibility of other relevant evidence, and the convenience of the defendant (but not of the plaintiff)." *Leroy, 443 U.S. at 185*. *Leroy* directs the court to bear in mind that the venue statute is designed primarily to protect the *"defendant* against the risk that a plaintiff will select an unfair or

---

[1] According to the complaint, the December 11, 1987, agreement provided that HPT would act as a commission agent for NOW Plastics in the marketing of polyester film and other film products for two years. Now Plastics also made HPT its exclusive sales representative for all polyester film sold to the film coating and metallizing industry, and HPT agreed not to offer any competing polyester film to the industry which was not supplied by NOW Plastics. The Agreement also provided that for two years after the termination of the Agreement, but in any event until November 1, 1991, HPT would not market, directly or indirectly, any products from plaintiff's suppliers, Kolon Industries, Sam Young, and Unitika, nor contact any of the suppliers, without plaintiff's prior written consent. Plaintiffs allege that HPT terminated the Agreement in January 1989, and notified plaintiff of the termination in April 1989.

Defendant Lipka is alleged to have acted as a commission agent for HPT, and to have conspired with HPT and its principals, through Lipka Products, to solicit and deal with plaintiff's customers in breach of the agreement between plaintiff and HPT.

[2] For venue to be proper in cases involving multiple claims, each of the claims joined must have individually arisen in that district. It is not sufficient that one or several of the claims arose there. *See* C. Wright & A. Miller, *Fed. Practice & Procedure*, § 3808 at 81.

inconvenient place of trial," *id. at 185* (emphasis in original), and that the "claim arose" language was inserted in *§ 1391(b)* "not to provide plaintiffs with an "unfettered **[*5]** choice among a host of different districts," *id. at 184*, but simply to ensure that plaintiffs would be able to sue *somewhere* if defendants reside in different districts. Where defendants all do reside in the same district, there is support for the proposition that the "claim arose" language should not even be considered. *See* *Canaday v. Koch, 598 F. Supp. 1139, 1148 (E.D.N.Y. 1984)*, tranf. *608 F. Supp. 1460 (S.D.N.Y. 1985)*, aff'd *768 F.2d 501 (2d Cir. 1985)*.

In this case, it is clear that venue in the Southern District of New York cannot be based on the "all defendants reside" clause of *§ 1391(b)*. Whether or not the corporate defendants might be subject to personal jurisdiction in this district, the three individual defendants are clearly domiciled in Ohio, not in New York. As for the "claim arose" prong, I agree with the court in *Canaday* that this test is inappropriate where, as here, defendants **[*6]** all reside in a single district. This seems more consistent with the Supreme Court's insistence in *Leroy* that the venue statute is designed to protect the defendants' convenience, not to enlarge the plaintiff's range of choices. According to the Supreme Court's reasoning, the function of the "claim arose" language is to close a "gap" previously created by the venue statute, offering plaintiff a possible forum to join all defendants in cases where defendants did not all reside in one state -- not to give plaintiffs an automatic venue alternative where suit could be brought in the district in which all defendants reside. *See* *Sunray Enterprises v. Bouza, 606 F. Supp. 116, 118 (S.D.N.Y. 1984)*; *Seabrook Foods Inc. v. Seabrook Bros., 495 F. Supp. 792 (S.D.N.Y. 1980)*.

However, I need not rely on this restrictive statutory interpretation. Even if the "claim arose" standard were to be applied, there is little basis for finding that the "weight of the contacts" lies in the Southern District of New York. The contract at the heart of this dispute was offered by letter from Massachusetts and accepted in Ohio. [3] **[*8]** The parties all reside in either Massachusetts or Ohio. As for the defendants' **[*7]** actions which are asserted as breaches of plaintiff's rights, all were done by defendants in Ohio, and only a very limited number involved any connection with New York. The complaint does allege that defendant Lipka arranged a single shipment of Kolon polyester film to the Brewster, New York plant of the Camvac Corporation, one of plaintiff's customers. Camvac is headquartered in Connecticut; the goods were shipped to its New York plant at the buyer's request. The affidavits of the parties subsequent to the complaint establish that HPT had limited other dealings with Camvac at its Brewster plant, relating to Azotherm PVC film, which the defendants argue was neither covered by the contract nor alleged as a breach in the plaintiff's complaint. Finally, the affidavits indicate that HPT solicited a single order for a trial roll of Kolon film from Stanpat Products, then based in Port Washington, New York (which is in the Eastern District of New York), but the product in that case was shipped to a New Jersey plant, and according to defendants resulted in no further orders. [4]

I find that these sporadic contacts with New York are not sufficient to make this district the locus of the claim under *§ 1391(b)*, particularly as defendants' conduct at issue occurred in Ohio and as the vast majority of other transactions at the heart of the action had no connection with New York. [5] *See* *Sunray Enterprises v. David C.*

---

[3] Plaintiffs contend that the contract was negotiated in part during a meeting in New York in February of 1987 between representatives of plaintiff and HPT, and that the parties held a second meeting in New York in 1988 to discuss problems arising out of their contractual relationship. It does not appear, however, that New York was chosen as the site of these meetings for any substantive reason. The February 1987 meeting apparently occurred during a trade show attended by the parties, and the 1988 meeting occurred at a New York airport, at the request of plaintiff's principal, who was passing through New York en route to another destination. That meeting, in any event, was in the Eastern, not the Southern, District of New York.

[4] Plaintiff attempts to portray defendants' contacts with New York as more substantial by referring to other business dealings of defendants with New York companies long before the contract between these parties was signed or the breach arguably occurred. Thus, it claims that defendant HPT was doing business with a company in Newburgh, New York from 1983-1985. ***HN3***[] While these contacts with New York might be relevant in a personal jurisdiction inquiry, they are not relevant to the "weight of contacts" analysis conducted here. The contacts to be weighed are those between *the claim* and the jurisdiction, not those generally between a defendant and the jurisdiction.

Bouza & Assoc., 606 F. Supp. 116, 118 (S.D.N.Y. 1984) (holding that "mere impact or occasional solicitation" of sales orders in New York are not sufficient to establish venue) ; *Seabrook* **[*9]** *Foods Inc. v. Seabrook Bros., 495 F. Supp. 792, 793-94 (S.D.N.Y. 1980)* (noting that the "claim arose" language in *§ 1391(b)* was not meant to permit suit in "every district in which defendant sells its products").

[*10] B. *Venue Under RICO*

If venue in the Southern District is improper under the general provisions of *§ 1391(b)*, it is all the more improper under the special venue provisions of RICO. ***HN4***[] The RICO statute provides that, as to any given defendant, [6] **[*12]** "any civil action or proceeding under this chapter . . . may be instituted in the district court of the United States for any district in which such person resides, is found, has an agent, or transacts his affairs." *18 U.S.C. § 1965(a)*. A corporate defendant is "found" in a district for the purposes of this statute if its officers or agents regularly carry on the business of the corporation there. *See* *Van Shaick v. Church of Scientology, 535 F. Supp. 1125 (D.C. Mass. 1982)*. The "transacts affairs" prong of the RICO statute has been interpreted to require the regular conduct of business of a substantial and continuous character within the district. *See* *Soltron, Inc. v. McAngus, No. 86-486, 1987 U.S. Dist. LEXIS 4905 (S.D.N.Y. 1987)*; *Abeloff v. Barth, 119 F.R.D. 315*. 326 (D. Mass. 1988); *Dody v. Brown, 659 F. Supp. 541, 544-45 (W.D. Mo. 1987)*; *Miller Brewing Co. v. Landau, 616 F. Supp. 1285, 1288 (E.D. Wis. 1985)*; *Hodgdon* ***[*11]*** *v. Needham-Skyles Oil Co., 556 F. Supp. 75, 78 (D.D.C. 1982)*. [7] Occasional acts such as telephoning or mailing letters into the district, or attending trade fairs there at which goods may be sold, have been held to be insufficient to meet this test. *See, e.g.,* *Dody, 659 F. Supp. at 545-46* (phone and mail communications insufficient to establish venue, as is shipment of sample product to jurisdiction); *Sunray Enterprises v. Bouza, 606 F. Supp. 116, 119 (S.D.N.Y. 1984)* (attending trade shows in jurisdiction is insufficient). *Cf.* *Rolls-Royce Motors v. Charles Schmitt & Co., 657 F. Supp. 1040, 1058 (S.D.N.Y. 1987)* (monthly business visits to jurisdiction coupled with frequent transactions there *is* sufficient). [8]

---

[5] Plaintiff lists fourteen companies with which defendants allegedly had dealings, and whose representatives therefore are likely to be called as witnesses at trial. Only two of these companies, Camvac and Stanpat, have any relation to New York. The other fourteen are located in New Jersey, Connecticut and Pennsylvania. *See* Plaintiff's Affidavit in Opposition, Exhibit L. Plaintiff contends that New York is still a far more convenient forum than Ohio in terms of securing the presence of these third-party witnesses. However, plaintiff has made no showing that the third-party witnesses whom they wish to call will decline to testify in Ohio. Moreover, defendants have listed sixteen companies whose representatives they intend to call as witnesses, and for these witnesses Ohio appears to be the most convenient forum. *See* Affidavit of Defendants in Reply, Exhibit P. *See* *Georgia Boot Div. v. Georgia Footwear Corp., 579 F. Supp. 1037, 1038-39 (S.D.N.Y. 1984)* (finding venue in district which is more convenient for defendants' witnesses, where plaintiff has made no assertion that third-party witnesses would decline to testify there).

[6] If the venue provisions are satisfied as to some but not all of the defendants, plaintiffs of course have the option of maintaining their action here as to those defendants, and commencing a separate action in another district as to the remaining defendants. However, splitting the action in this way creates inefficiencies and multiplies the burdens on witnesses. It might well justify transfer for the purpose of consolidation under *28 U.S.C. § 1404(a)*.

[7] ***HN5***[] As for individual defendants, the "transacts affairs" prong has been held to require evidence of personal affairs of the defendant within the state, not simply affairs he may have transacted on behalf of his employer. *See* *Bulk Oil v. Sun Oil Trading Co., 584 F. Supp. 36, 39-40 (S.D.N.Y. 1983)*. Of course, in situations in which the employer is essentially a vehicle for the activities of the individual, such as a "one man firm," it may be possible to "pierce the corporate veil" and attribute the individual's activity on behalf of his company to him personally. In this case, I need not determine whether such piercing is justified for HPT or Lipka Products, because I find that neither transacted sufficiently substantial and continuous affairs here as to justify venue for *either* the corporation or its principals.

[8] *Cf.* *Agra Chem. Dist. Co. v Marion Laboratories, Inc., 523 F. Supp. 699, 702 (W.D.N.Y. 1981)* (listing seven factors to be considered in determining whether a corporation is "transacting business" under the analogous venue provisions of federal ***antitrust law***). ***HN6***[] These factors include whether the corporation has within the district a place to do business, people to carry on the business, or tangible property; whether the corporation is subject to regulation in the district; and whether it has business operations there, manifestations of doing business, or good will activities. None of these seven factors is clearly met in the case of defendants HPT, Lipka Products, or their principals.

[*13] Defendants have neither office, agents, bank accounts nor property in New York; their only recurring business contacts with New York have been a few phone or mail communications and a limited number of shipments of goods here at the request of companies headquartered elsewhere. I cannot find that the requirement of regular, substantial and continuous activity has been met. By contrast, defendants' contacts with the Southern District of Ohio have been substantial and continuous, and the bulk of defendants' documentary evidence and their witnesses are located there.

Conclusion

For the reasons stated above, I find that venue in the Southern District of New York is not proper. Pursuant to *18 U.S.C. § 1406(a)*, this action is therefore transferred to the Southern District of Ohio. The Clerk of the Court shall transmit the file.

Opinion by: WINTER

Opinion

[*268] WINTER, Circuit Judge:

This antitrust action pits developers who are seeking permits necessary to begin construction of a new shopping mall against the owners of an existing mall who possess permits allowing them to double its size. The novel aspect of this not-unusual scenario is that the existing mall is accusing its as-yet non-existent competitor of monopolistic practices.

Two New York partnerships that wish to expand their shopping mall in Rutland, Vermont have sued the City of Rutland and several prospective developers of a new shopping center in the Rutland area, claiming that the City and the developers have conspired to restrain trade and to monopolize the market of leasing space in violation of federal antitrust laws, *see* *15 U.S.C. §§ 1*, *2*, *15*, *26 (1988)*; that they have tortiously interfered with the plaintiffs' business relationships; and that they have deprived plaintiffs of property interests without due process in violation of *42 U.S.C. § 1983 (1982)* ("*Section 1983*"). Chief Judge Billings granted judgment on the pleadings and dismissed the complaint. Because the complaint fails to allege **[**3]** antitrust injuries and because the defendants are immune from antitrust liability under the *Noerr-Pennington* doctrine, we affirm.

BACKGROUND

Plaintiff Juster Associates, a New York limited partnership, owns the Rutland Mall in the Town of Rutland, Vermont ("Town of Rutland" or "the Town"). Plaintiff Juster Development Company ("JDC"), a New York general partnership, proposes to develop an extension of the Rutland Mall with Juster Associates on JDC's adjoining land. Juster

---

[*] The Honorable Charles S. Haight, Jr., United States District Judge for the Southern District of New York, sitting by designation.

Associates and JDC (collectively "Juster") possess the licenses and permits necessary to expand the mall to double its current size.

Defendant City of Rutland ("City of Rutland" or "the City") is a municipal corporation. Defendant Finard-Zamias Associates ("FZA") is a developer that has applied for a land-use permit under Vermont law, *Vt. Stat. Ann. tit. 10, §§ 6001-6092* (1984) ("Act 250"), regarding its proposed development of a regional shopping center in the Town of Rutland adjacent to the City of Rutland. Defendants William Finard, Damian Zamias, and Steven Mosites are partners in FZA (collectively "the Developers").

Act 250 requires, inter alia, that shopping center developers obtain approval for **[**4]** their projects from the state-appointed District Environmental Commission ("Commission"). *Vt. Stat. Ann. tit. 10, § 6086* (1984 & Supp. 1989). That the Commission takes into account the views of major municipalities in granting or denying approval to projects is not seriously disputed by the parties. There is also no question that the City of Rutland has played an active role with regard to the Juster and FZA developments in an effort to protect what it perceives as its interests. In fact, the City of Rutland was granted party status before the Commission in proceedings concerning both Juster's and FZA's applications.

On September 27, 1988, the City of Rutland and the Developers, acting through their Vermont corporation Finard-Zamias Rutland Development Company ("FZR"), entered into an agreement regarding the Developers' proposed new regional shopping center. The agreement noted the Developers' need for the cooperation and assistance of the City to satisfy various permit requirements of Act 250 and provided for the payment of direct and indirect impact fees by FZR to the City. In particular, FZR agreed to offset any adverse impact on the City's municipal services or tax base through **[**5]** one of three means: (1) payment of impact fees, (2) investment of at least $ 10 million in non-residential real estate in the City, or (3) adoption, with legislative approval, of a gross-receipts user fee. FZR also agreed to provide other long-term support to the Rutland community, **[*269]** including housing assistance, public transportation, regional promotional activities, and cultural and social activities. In return, FZR gained access to the City's water supply and sewage facilities at most-favored customer rates, obtained assurances that the City would improve transportation routes and traffic control around the development, and won the active support of the City in FZA's Act 250 permit proceedings. Finally, FZR agreed to refrain either from actively recruiting tenants for the regional shopping center from the City's central business district or from actively promoting relocation of existing businesses from within the City limits.

Meanwhile, the City had unsuccessfully opposed Juster in Act 250 proceedings regarding Juster's proposed expansion of the Rutland Mall. Juster, which is thus now armed with the necessary permits to expand its mall, filed this complaint on January 23, 1989. On **[**6]** April 17, 1989, the City filed a motion for judgment on the pleadings under *Fed.R.Civ. P. 12(c)*, and the other defendants filed a motion for dismissal under *Fed.R.Civ.P. 12(b)(6)*. The district court granted both motions. Juster appeals.

DISCUSSION

We affirm the judgment for two reasons. First, with regard to the claims under *Sections 1* and *2* of the Sherman Act, the complaint's allegations that Juster has suffered damage because the City of Rutland has subsidized or otherwise aided the Developers in their attempt to build their shopping center do not constitute an antitrust injury. Second, assuming *arguendo* that the agreement between the City and the Developers restricts competition, they are immune from liability under the antitrust laws.

HN1[] We apply the usual standard of review that, for purposes of *Rule 12(b)(6)*, we view all facts and allegations in the complaint in the light most favorable to Juster. *See* *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683 (1974)*. The standard for *Rule 12(c)* is essentially the same for purposes of the present complaint: **[**7]** the City is entitled to judgment on the pleadings only if it has established "that no material issue of fact remains to be resolved and that [it] is entitled to judgment as a matter of law." 5 C. Wright & A. Miller, *Federal Practice and Procedure* § 1368, at 690 (1969); *see also* *MacDonald v. Du Maurier, 144 F.2d 696, 700-01 (2d Cir. 1944)* (stating that plaintiff's allegations must be accepted despite the answer's denial of their veracity).

We turn first to Juster's claims under ***HN2***[] *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2 (1988)*. To prevail on such claims, Juster must assert "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. Juster has not alleged such an injury.

As we stated in *R.C. Bigelow, Inc. v. Unilever N.V., 867 F.2d 102, 109* (2d Cir.), *cert. denied*, *493 U.S. 815, 110 S. Ct. 64, 107 L. Ed. 2d 31 (1989)*, **[**8]** ***HN3***[] the mere fact of increased competition and reduced profits resulting from an agreement between other parties does not constitute an antitrust injury to a plaintiff. *See also* *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 116, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. Juster may thus well be "in a worse position than [it] would have been" had the challenged agreement not been executed, *Brunswick, 429 U.S. at 486*, but that fact does not by itself establish an antitrust injury. To hold otherwise would be to "divorce[] antitrust recovery from the purposes of the antitrust laws," *id. at 487*, which were "enacted for 'the protection of *competition*, not *competitors*,'" *id. at 488* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* (emphasis in original)).

We have applied these principles to a claim similar to Juster's and have found no antitrust injury. In *Eastway Constr. Corp. v. City of New York, 762 F.2d 243 (2d Cir. 1985)*, **[**9]** *cert. denied*, *484 U.S. 918,* ***[*270]*** *98 L. Ed. 2d 226, 108 S. Ct. 269 (1987)*, we upheld against an antitrust challenge an agreement between New York City and a private consortium of banks that denied the plaintiff construction company access to low-cost mortgage lending. Stating that the plaintiff had failed even to allege, much less to show, any anticompetitive effects on consumers from its exclusion from the lending market by contract between New York and the consortium, we affirmed the district court's grant of summary judgment to the defendants. *See id. at 251*.

The agreement in this case presents even less of an arguable antitrust injury than did the agreement in *Eastway*. Here, the agreement between the City and the Developers provided for payment of impact fees by the Developers to the City and support by the Developers for various public projects in the City. This portion of the agreement raises the Developers' costs and in no way injures competition. In fact, it doesn't even injure Juster. In exchange, the Developers gained access, at most-favored customer rates, to the water and sewage facilities of the City, as well as a promise **[**10]** of improvements in transportation routes to the regional shopping center. Although access to these municipal facilities and the promise of improvements no doubt aid the Developers, they do so by making their project more attractive to consumers than it would otherwise be. This is not an injury to competition, no matter how injurious it may be to Juster as a competitor.

Finally, the City pledged its support for the Developers in the Act 250 permit proceedings. This support is no more than part of a not-unusual bargain struck between a municipality and a developer for the purpose of controlled growth of commercial real estate. The Developers have no market share whatsoever at present, and the alternative to negotiating with the City is to attempt to obtain a permit without the City's support. Without that support, of course, they might fail, a result beneficial to Juster as a competitor but hardly in the interests of consumers. The agreement attacked by Juster is thus a vehicle by which competitors can challenge existing firms. Were courts to strike down such agreements, potential new entrants to a market would find entry more difficult, and consumers would suffer. Juster's claim is **[**11]** thus designed to enhance barriers to entry of new competitors, a result that would stand ***antitrust law*** on its head.

Even if one reads the complaint to allege that Juster is at a disadvantage because the City of Rutland is subsidizing the new mall, still no antitrust harm has been alleged. Such a disadvantage would derive solely from the fact that subsidization reduces the costs and increases the attractiveness of the new mall, therefore allowing it to compete more effectively with Juster. Although Juster's concern is understandable, we perceive no harm to consumers in the decision of the City's taxpayers to subsidize more attractive shopping conditions or lower prices to shoppers at the Developers' mall in order to ameliorate the taxpayers' concerns about the impact of new development on their municipality.

Having held that the City of Rutland's support for the Developers' proposed regional shopping center does not create any antitrust injury, we also address the City's and Developers' claim that they are immune from liability under the antitrust laws. We reach the issue of immunity because the district court based its rulings partially on the fact that the Developers have not **[**12]** yet entered the market and expressly left open the possibility that Juster may bring another antitrust suit once the Developers enter the market and gain some market power. The Developers are apprehensive that further litigation concerning their agreement with the City will occur when they enter the market. To foreclose a further challenge to that agreement, we address the Developers' claim of immunity. [1]

[13]** **[*271]** In *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 5 L. Ed. 2d 464, 81 S. Ct. 523 (1961)*, ***HN5***[] the Supreme Court held that the Sherman Act did not apply to lobbying "to seek action on laws in the hope that [the lobbying parties] may bring about an advantage to themselves and a disadvantage to their competitors," *id. at 139*, regardless of "any anticompetitive purpose it may have had," *id. at 140*. In doing so, the Court recognized that attempts to influence legislation were an inherent part of the political process protected by the *First Amendment*. *Id. at 137-38, 145*. Four years later, in *United Mine Workers of America v. Pennington, 381 U.S. 657, 14 L. Ed. 2d 626, 85 S. Ct. 1585 (1965)*, the Court extended this immunity to attempts to influence administrative processes, again "regardless of intent or purpose," *id. at 670*. The Court in *Pennington* thus held that "efforts to influence public officials do not violate the antitrust laws even though **[**14]** intended to eliminate competition." *Id.* Of course, ***HN6***[] to be immune, participation in administrative or judicial processes must be for the purpose of asserting colorable claims within the jurisdiction of the particular tribunal. Where administrative or judicial processes are invoked for the purpose of causing collateral effects such as delaying entry by competitors, *see California Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 30 L. Ed. 2d 642, 92 S. Ct. 609 (1972)*, or where those processes are invoked by means that violate ethical standards applicable to adjudicative tribunals, *see Landmarks Holding Corp. v. Bermant, 664 F.2d 891 (2d Cir. 1981)*, the *Noerr-Pennington* immunity is not available.

Central to the agreement between the Developers and the City was the Developers' desire for the City's support in the Act 250 proceedings regarding their application. The City's views were important to the Commission, and it was formally a party to the FZA Act 250 proceedings. Whether gaining support from the City was essential or merely helpful, seeking **[**15]** it was within the realm of conduct protected by the *First Amendment* and thus immunized by the *Noerr-Pennington* doctrine. We believe, therefore, that the activities of the Developers and the City in negotiating their agreement are immunized from antitrust liability.

The Supreme Court's decision in *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 100 L. Ed. 2d 497, 108 S. Ct. 1931 (1988)*, in which it distinguished "anticompetitive political activity that is immunized despite its commercial impact from anticompetitive commercial activity that is unprotected despite its political impact," *id. at 507-08 n. 10*, does not preclude application of the *Noerr-Pennington* doctrine in the instant matter. In *Allied Tube*, members of the steel industry packed an annual meeting of the National Fire Protection Association with new members solely to vote against a new type of electrical conduit that posed an economic threat to steel conduit. *See id. at 495-97*. The Supreme Court, in holding that this action was not immune under *Noerr-Pennington*, stated that "this is itself a case close to the line" **[**16]** ***HN7***[] between anticompetitive political activity and anticompetitive commercial activity, and it cautioned that its decision "depends on the context and nature of the activity." *See id. at 508 n.10*. If the activity in *Allied Tube*, which involved influencing a private organization's position on a potentially public issue, was close to the line, then the activities of the Developers and the City in this case, which involved the City's direct support as a party to the Act 250 proceedings, falls on the side of the line protected by *Noerr-Pennington* immunity.

The Supreme Court's recent decision in *Federal Trade Comm'n v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*, also does not alter this conclusion. In *Superior Court*, the Court held that a boycott by **[*272]** trial lawyers in private practice who acted as court-appointed counsel for indigent defendants was not immune from antitrust liability. In doing so, the Court reviewed its decisions in *Noerr* and *Allied*

[1] The City is immune from antitrust liability for damages under the Local Government Antitrust Act, *15 U.S.C. §§ 34-36 (1988)* ("LGAA"). The LGAA provides that ***HN4***[] "no damages, interest on damages, costs, or attorney's fees may be recovered under [the antitrust laws] from any local government, or official or employee thereof acting in an official capacity." *15 U.S.C. § 35(a)*. Because "local government" includes "a city," *15 U.S.C. § 34(1)(A)*, Rutland is obviously immune from suit for damages.

Tube, distinguishing the former from *Superior Court* on the grounds that the **[**17]** restraint of trade effected by the boycott in *Superior Court* "was the *means* by which respondents sought to obtain favorable legislation." *Superior Court, 110 S. Ct. at 776* (emphasis in original). By contrast, the Court noted, the restraint of trade in *Noerr* "was the intended *consequence* of public action." *Id.* (emphasis in original). The activity at issue in this case is within the ambit of the protection afforded by *Noerr* because, like *Noerr*, the claimed restraint of trade is the consequence of the governmental action.

Juster's remaining arguments are wholly without merit. The *Section 1983* claim was properly dismissed because it failed to state any deprivation of a constitutionally protected property interest. As Chief Judge Billings held, Juster has failed to identify contractually established business relationships that will be disrupted as a result of defendants' conduct. Juster's interests in possible future relationships with tenants at the Rutland Mall do not constitute property interests of the sort protected by the Constitution, for Juster cannot claim to have "a legitimate claim of entitlement" to these benefits. *Board of Regents v. Roth, 408 U.S. 564, 577, 33 L. Ed. 2d 548, 92 S. Ct. 2701 (1972)*. **[**18]**

Finally, Juster's state-law claim of tortious interference with business relationships was properly dismissed because Juster failed to allege more than the possibility that it may face legitimate competition. *See* *Giroux v. Lussier, 126 Vt. 555, 561, 238 A.2d 63, 67 (1967)*. The actions it complains of in this claim are virtually identical to the conduct made the basis of its antitrust claims, discussed *supra*. There is nothing tortious about competition.

Affirmed.

Primo Construction, Inc., Respondent, v. Swig Weiler & Arnow Management Co., Inc., Appellant

Prior History: **[***1]** Supreme Court, New York County (David H. Edwards, Jr., J.), July 5, 1989.

Disposition: Order entered, which denied defendant's motion to dismiss the complaint, pursuant to *CPLR Rule 3211*, is unanimously reversed, on the law, and, on the facts, motion granted, and, complaint dismissed, with costs.

Core Terms

contractors, cause of action, premises, business relationship, contractual right, approve, tenants, leases, tortious interference, defense motion, Donnelly Act, landlord, deleted

LexisNexis® Headnotes

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN1[] **Public Enforcement, State Civil Actions**

A plaintiff has not set forth a cause of action under the Donnelly Act, *N.Y. Gen. Bus. Law § 340*, which is the New York ***Antitrust Law***, when the plaintiff, inter alia, has failed to identify a relevant product market, describe the nature and effects of an alleged conspiracy, and indicate how a defendant's exercise of a conceded contractual right has had an anticompetitive impact on the market.

Counsel: G.T. King, for Plaintiff-Respondent.

L.J. Wachtler, for Defendant-Appellant.

Judges: Concur -- Kupferman, J. P., Ross, Kassal and Rubin, JJ.

Opinion

[*379] **[**425]** Order, Supreme Court, New York County (David H. Edwards, Jr., J.), entered July 5, 1989, which denied defendant's motion to dismiss the complaint, pursuant to *CPLR 3211*, is unanimously reversed, on the law and on the facts, motion granted, and complaint dismissed, with costs.

Swig Weiler & Arnow Management Co. (Swig) is the owner and managing agent of various commercial buildings (premises) which are located in New York City. Pursuant to the terms of the tenants' leases, the landlord must give its written approval before a tenant can employ a contractor to perform alterations. In accordance with that lease term, Swig maintained a list of contractors which it had preapproved to perform work for the tenants.

During **[***2]** the summer of 1987, Swig became aware that Primo Construction, Inc. (Primo) had participated with a former employee of Swig and others in a bribery and fraud scheme which resulted in the embezzlement of over $ 1,000,000 from Swig. Further, as part of that criminal scheme, Primo submitted invoices to Swig and the tenants of the premises, which billed them in excess of the reasonable value of goods delivered and services rendered. Based upon Primo's alleged misconduct and the landlord's contractual right to approve contractors, Swig deleted Primo's name from the list of approved contractors and denied Primo access to the premises.

Thereafter, on or about December 28, 1988, Primo commenced an action against Swig (defendant) for damages in the Supreme Court, New York County. The complaint alleges defendant is guilty of tortious interference with plaintiff's business relations (causes of action Nos. one to six) and of violation of *General Business Law § 340* ([Donnelly Act] cause of action No. seven).

[*380] [426]** Prior to the joinder of issue, defendant moved to dismiss the complaint pursuant to *CPLR 3211*. Plaintiff opposed. Trial Term denied that motion. Defendant **[***3]** appeals.

After our review of the record, we find that plaintiff has failed to allege facts which are sufficient to establish that defendant's actions, in deleting plaintiff's name from the contractors' list and denying same access to the premises, set forth a cause of action for tortious interference with plaintiff's business relations *(Alexander & Alexander v Fritzen, 68 NY2d 968* [1986]; *Guard-Life Corp. v Parker Hardware Mfg. Corp., 50 NY2d 183* [1980]; *Felsen v Sol Cafe Mfg. Corp., 24 NY2d 682* [1969]; *Stratford Materials Corp. v Jones, 118 AD2d 559* [1986], *lv denied 70 NY2d 608* [1987]). We base our finding upon the fact that plaintiff concedes that defendant had an absolute right, pursuant to the terms of the leases, to approve contractors, and plaintiff does not allege that defendant, outside of exercising that contractual right, ever attempted to interfere with any other business relations of plaintiff.

Further, based on our examination of the record, we find that ***HN1***[] plaintiff has not set forth a cause of action under the Donnelly Act, which is the New York ***Antitrust Law***, since plaintiff, *inter alia*, has failed to identify the relevant product **[***4]** market, describe the nature and effects of the alleged conspiracy, and indicate how defendant's exercise of its conceded contractual right to approve contractors has had an anticompetitive impact on the market *(Creative Trading Co. v Larkin-Pluznick-Larkin, Inc., 136 AD2d 461* [1st Dept 1988]).

Based upon our analysis *supra*, we find that Trial Term erred in denying defendant's motion to dismiss the complaint.

Accordingly, we reverse, grant the motion, and dismiss the complaint.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN4[] **Actual Monopolization, Anticompetitive & Predatory Practices**

As sections *Cal. Bus. & Prof. Code §§ 17026* and *17029* define cost to include all variable and fixed costs, it appears the Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000 et seq.* employs a fully allocated cost or fully distributed cost standard to determine whether a sale has violated *Cal. Bus. & Prof. Code § 17043*. Variable costs are costs that vary with changes in output, while fixed costs are those that do not vary with changes in output. The concept of fully allocated cost has been equated with average total cost, which reflects that portion of the firm's total costs -- both fixed and variable -- attributable on an average basis to each unit of output.

HN7[] **Public Enforcement, State Civil Actions**

Any difficulty in computing costs pursuant to the California Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000 et seq.*, is a factual one, and statutes are not to be declared invalid because in their application factual difficulties may arise.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Governments > Legislation > Interpretation

HN8[] **Public Enforcement, State Civil Actions**

The use of the fully allocated cost method, when viewed in conjunction with the injurious intent requirement of *Cal. Bus. & Prof. Code § 17043*, is rationally related to the valid legislative purpose enunciated in *Cal. Bus. & Prof. Code § 17001* as it assists in preventing the creation or perpetuation of monopolies.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN9[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To be legally acceptable, the allocation of indirect or fixed overhead costs to a particular product or service must be reasonably related to the burden such product or service imposes on the overall cost of doing business. Moreover, a defendant is free to demonstrate to the trier of fact that its fully allocated cost, using another reasonable allocation method other than that used by the plaintiff, is actually lower than the plaintiff alleges and lower than defendant's sales or bid price.

Constitutional Law > Congressional Duties & Powers > General Overview

Governments > Federal Government > US Congress

Constitutional Law > Supremacy Clause > General Overview

HN10[] **Constitutional Law, Congressional Duties & Powers**

It is well established that within constitutional limits Congress may pre-empt state authority by so stating in express terms. Absent exclusive pre-emptive language, Congress' intent to supersede state law altogether may be found from a scheme of federal regulation so pervasive as to make reasonable the inference that Congress left no room for the states to supplement it. Even where Congress has not entirely displaced state regulation in a specific area, state law is pre-empted to the extent that it actually conflicts with federal law. Such a conflict arises when compliance with both federal and state regulations is a physical impossibility, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.

Antitrust & Trade Law > Sherman Act > General Overview

Constitutional Law > Supremacy Clause > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN11[ ] Antitrust & Trade Law, Sherman Act

The history of the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*, makes it clear that the Congress did not intend that the federal legislation preempt parallel state efforts to control unfair competitive practices.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN12[ ] Actual Monopolization, Anticompetitive & Predatory Practices

Absent a determination by the United States Supreme Court regarding what formula or cost method should be used in determining whether pricing is predatory, there is no clear federal standard with which the Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000 et seq.*, may be said to conflict.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Constitutional Law > Supremacy Clause > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[ ] Sherman Act, Scope

The mere fact that the Unfair Practices Act, *Cal. Bus. & Prof. Code § 17000 et seq.*, proscribes conduct that might, according to some federal courts, be permitted under federal law is insufficient to demonstrate that the Unfair Practices Act is preempted by the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*.

Torts > ... > Types of Damages > Punitive Damages > General Overview

Torts > ... > Punitive Damages > Measurement of Damages > Statutory Requirements

Torts > ... > Types of Damages > Punitive Damages > Aggravating Circumstances

HN14[ ] Legislation, Interpretation

Where a statutory penalty is imposed for a wrongful act, it does not preclude recovery of punitive damages in a tort action where the necessary malice or oppression is shown. If the purpose of the penalty is the same as that of punitive damages, however, the plaintiff cannot obtain a double recovery and must elect to have judgment entered in an amount which reflects either the statutory trebling or the compensatory and punitive damages. When a statute recognizes a cause of action for a violation of a right, all forms of relief granted to civil litigants generally, including appropriate punitive damages, are available unless a contrary legislative intent appears. But when a new right, not existing at common law, is created by statute and a statutory remedy for the infringement thereof is provided, such remedy is exclusive of all others unless the statutory remedy is inadequate.

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

In a bus company's action against a competing bus company, alleging the competitor sold its bus transportation services to a county below its costs in violation of *Bus. & Prof. Code, § 17043* (sale below cost for purpose of injuring competitor), the trial court permitted plaintiff to make a postverdict election between the remedies of punitive damages and the treble damages provided in *Bus. & Prof. Code, § 17082* (recovery of treble damages for violation of Unfair Practice Act (*Bus. & Prof. Code, § 17000 et seq.*)). Without being apprised of plaintiff's entitlement to treble damages, the jury returned a verdict in favor of plaintiff for $ 259,568 in compensatory damages and $ 1 million in punitive damages, and plaintiff elected to receive the jury's award instead of treble damages. (Superior Court of San Joaquin County, No. 164610, James P. Darrah, Judge.)

The Court of Appeal affirmed in part and reversed in part, and remanded for a new trial on the amount of damages. It held that *Bus. & Prof. Code, § 17043*, was not unconstitutional, since its use of the fully allocated cost method to determine whether a service is sold below cost was rationally related to the valid legislative purpose of preventing the creation or perpetuation of monopolies as enunciated in *Bus. & Prof. Code, § 17001*. It held that *§ 17043* did not conflict with, and was therefore not preempted by, the federal Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*). It also held that plaintiff was limited to the treble damages remedy of *Bus. & Prof. Code, § 17082*, which was mandatory. (Opinion by Marler, J., with Sims, Acting P. J., and DeCristoforo, J., concurring.)

Headnotes

CA(1a)[] **(1a)** ***CA(1b)***[] **(1b)** ***CA(1c)***[] **(1c)** ***CA(1d)***[] **(1d)**

Unfair Competition § 3—Unfair Practices Act—Validity—Prohibition Against Selling Below Cost to Injure Competitor.

--*Bus. & Prof. Code, §§ 17026*, *17029*, define costs to include all variable and fixed costs, and thus the Unfair Practices Act (*Bus. & Prof. Code, § 17000 et seq.*) employs a fully allocated cost or fully distributed cost standard to determine whether a sale has violated *Bus. & Prof. Code, § 17043* (sales below cost to injure competitor). When viewed in conjunction with the injurious intent requirement of *§ 17043*, the use of the fully allocated cost method to determine whether services are sold below cost, although not perfect, is rationally related to the valid legislative purpose of safeguarding the public against the creation of monopolies (*Bus. & Prof. Code, § 17001*). Thus, *§ 17043* does not violate the due process clauses of the California and United States Constitutions.

CA(2)[] **(2)**

Constitutional Law § 17—Judicial Power to Declare Legislation Void—Challenge Based on Due Process.

--In addressing a party's due process challenge to a statute, a court may question the wisdom of the statute, but the due process clause does not empower the judiciary to sit as a superlegislature to weigh the wisdom of legislation.

CA(3)[] **(3)**

Words, Phrases, and Maxims—Variable Costs—Fixed Costs.

--Variable costs are costs that vary with changes in output, while fixed costs are those that do not vary with changes in output.

CA(4)[] **(4)**

Statutes § 7—Validity—Factual Difficulties in Applying Statute.

--Statutes are not to be declared invalid because in their application factual difficulties may arise.

CA(5a)[] **(5a)** *CA(5b)*[] **(5b)** *CA(5c)*[] **(5c)**

Unfair Competition § 3—Unfair Practices Act—Federal Preemption.

--*Bus. & Prof. Code, § 17043* (prohibition against sales below cost for purposes of injuring competitors), does not conflict with federal law, and thus is not preempted by the federal Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*). Although *§ 17043* employs a method of determining costs that has been rejected by some federal courts of appeal, absent a determination by the United States Supreme Court regarding what formula or cost method must be used in determining whether pricing is predatory, there is no clear federal standard upon which the Unfair Practices Act (*Bus. & Prof. Code, § 17000 et seq.*), may be said to conflict. Also, the mere fact that the Unfair Practices Act proscribes conduct that might, according to some federal courts, be permitted under federal law is insufficient to show the Unfair Practices Act is preempted by the Sherman Act.

CA(6a)[] **(6a)** *CA(6b)*[] **(6b)**

Conflict of Laws § 4—Relationship Between Federal and State Law—Federal Preemption.

--Within constitutional limits, Congress may preempt state authority by so stating in express terms. Absent exclusive preemptive language, Congress's intent to supersede state law altogether may be found from a scheme of federal regulation so pervasive as to make reasonable the inference that Congress left no room for the state to supplement it. Even where Congress has not entirely displaced state regulation in a specific area, state law is preempted to the extent that it actually conflicts with federal law. Such a conflict arises when compliance with both federal and state regulations is a physical impossibility, or where state law stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress. An inference of preemption is not appropriate where the basic purposes of the state and federal statutes are similar.

CA(7)[] **(7)**

Monopolies and Restraints of Trade § 4—Sherman Act—Federal Preemption.

--The history of the Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*), makes it clear that the Congress did not intend that the federal legislation preempt parallel state efforts to control unfair competitive practices.

CA(8)[] **(8)**

Courts § 40—Doctrine of Stare Decisis—Conflicting Federal Circuit Rules.

--A California court need not resolve or harmonize conflicts among the federal circuits, as California courts are not bound by their decisions.

CA(9a)[] **(9a)** ***CA(9b)***[] **(9b)**

Unfair Competition § 10—Punitive Damages—Action for Sale Below Cost.

--In an action for violation of *Bus. & Prof. Code, § 17043* (sales below cost for purpose of injuring competitors), the trial court erred in allowing plaintiff to elect remedies between punitive damages and the treble damages provided in *Bus. & Prof. Code, § 17082* (recovery of treble damages for violation of Unfair Practice Act (*Bus. & Prof. Code, § 17000 et seq.*)). The treble damages provision of *§ 17082* is punitive in nature and similar in purpose to *Civ. Code, § 3294* (punitive damages); and the treble damages provision is mandatory. Also, plaintiff was pursuing a purely statutory cause of action, and did not pursue any alternate theory of liability founded on a common law tort action that existed before the enactment of the Unfair Practice Act. Thus, plaintiff was limited to the statutory remedy of treble damages.

CA(10)[] **(10)**

Damages § 22.2—Exemplary or Punitive Damages—Availability—Extant Statutory Penalty.

--Where a statutory penalty is imposed for a wrongful act, it does not preclude recovery of punitive damages in a tort action where the necessary malice or oppression is shown. If the purpose of the penalty is the same as that of punitive damages, however, the plaintiff cannot obtain a double recovery and must elect to have judgment entered in an amount which reflects either the statutory trebling or the compensatory and punitive damages. When a statute recognizes a cause of action for violation of a right, all forms of relief granted to civil litigants generally, including appropriate punitive damages, are available unless a contrary legislative intent appears. But when a new right, not existing at common law, is created by statute and a statutory remedy for the infringement thereof is provided, such remedy is exclusive of all others unless the statutory remedy is inadequate.

Counsel: Alan D. Croll, Eve Triffo, Wyman, Bautzer, Kuchel & Silbert, James T. Freeman, Charity Kenyon, Diepenbrock, Wulff, Plant & Hannegan for Defendant and Appellant.

William A. Schuckman for Plaintiff and Respondent.

Judges: Opinion by Marler, J., with Sims, Acting P. J., and DeCristoforo, J., concurring.

Opinion by: MARLER

Opinion

[*814] [857]** Defendant ARA Transportation, Inc. (ARA), appeals from a judgment entered after a jury found ARA had sold its bus transportation services at below its cost of providing the **[***2]** services with the purpose of injuring competitors or destroying competition in violation of *Business and Professions Code section 17043* (hereafter all undesignated section references are to this code). The jury awarded plaintiff Turnbull & Turnbull, doing business as Sullivan & Co. (Sullivan), $ 259,568 in compensatory damages and $ 1 million in punitive damages.

[*815] On appeal, ARA contends the judgment should be reversed because California's below cost sales statute is unconstitutional and preempted by federal law and because there is no substantial evidence that ARA sold its services below cost. ARA also contends there is no substantial evidence it had the requisite intent to injure competitors and that it was prejudiced by instructional error and by the erroneous admission of certain evidence. In addition, it alleges juror misconduct prevented ARA from having a fair trial. Finally, ARA raises various challenges to the compensatory and punitive damages awards. We shall reverse the judgment and remand the matter for a new trial limited to the issue of damages.

Factual and Procedural Background

Sullivan and ARA were providers of bus transportation services and had been **[***3]** competitors for several San Joaquin County Office of Education contracts for the transportation of handicapped school children. Every year the San Joaquin County Superintendent of Schools provided bid specifications which indicated the estimated number of children that were to be transported and their addresses. From this information bus contractors interested in bidding on the contract could calculate the mileage and costs involved in transporting the students and submit their bids accordingly. During the 1978-1979, 1979-1980, 1980-1981, and 1981-1982 school years, ARA was awarded the contracts.

On July 13, 1982, Sullivan filed its first amended complaint against ARA alleging ARA sold its bus transportation services **[**858]** below cost in violation of *section 17043*. [2] **[***4]** Sullivan alleged it was injured in that it was deprived of being awarded the transportation contracts as a proximate result of ARA's conduct. Sullivan sought compensatory and punitive damages and treble damages pursuant to *section 17082*. [3]

The court ruled Sullivan's claim based on the 1978-1979 contract was barred by the statute of limitations. Relying on *G.H.I.I. v. MTS, Inc. (1983) 147 Cal.App.3d 256, 277-279 [195 Cal.Rptr. 211, 41 A.L.R.4th 653]*, it also ruled a one-year statute of limitation applied to the award of treble damages, **[*816]** precluding such an award except for the 1981-1982 contract year. In addition, the court determined Sullivan was not entitled to both treble damages and punitive damages and would therefore be permitted to make a post verdict election of remedies. It was also decided the jury would not be apprised of Sullivan's entitlement to treble damages and **[***5]** that the trebling would be performed by the court if Sullivan opted not to receive punitive damages.

At trial, John Bahnsen, the deputy superintendent of schools of San Joaquin County, testified that ARA and Sullivan provided services of equivalent quality, but ARA was awarded the contracts in question because it was the lowest bidder.

George Grundig, an economist specializing in transportation economics and transportation analysis, testified that in his opinion ARA had submitted bids that were lower than its cost of providing the contract services. Grundig used four different methods in calculating whether ARA's bid was below its costs. The first method involved comparing the revenue per mile received by ARA on the San Joaquin County contract with the revenue per mile it received on other bus transportation contracts in other counties, after having made adjustments for cost differentials between the counties. The second method compared the revenue per mile ARA received on the San Joaquin County contract with the revenue per mile it received on its Delta College contract in San Joaquin County. In the third method, Grundig calculated ARA's costs based on two national cost surveys **[***6]** regarding operating costs of private passenger vans. Grundig's fourth method entailed an analysis of ARA's operating statements and an

[2] *Section 17043* provides: ***HN1***[] "It is unlawful for any person engaged in business within this State to sell any article or product at less than the cost thereof to such vendor, or to give away any article or product, for the purpose of injuring competitors or destroying competition."

Section 17024 provides: "'Article or product' includes any article, product, commodity, thing of value, service or output of a service trade."

[3] *Section 17082* provides in pertinent part: ***HN2***[] "In any action under this chapter, it is not necessary to allege or prove actual damages or the threat thereof, or actual injury or the threat thereof to the plaintiff. But, in addition to injunctive relief, any plaintiff in any such action shall be entitled to recover three times the amount of the actual damages, if any, sustained by the plaintiff, . . ."

allocation of ARA's operating expenses per mile traveled. ARA's total operating costs for the year were divided by the total miles traveled to yield an average cost per mile. This figure was then multiplied by the contract mileage to determine the contract cost. In each year in question, ARA's bid was below its costs of providing the contract services. Katherine Porter, who had a degree in mathematics and worked primarily as an investment adviser and financial planner, assisted Grundig in calculating both ARA's costs and Sullivan's damages.

Based on the limited information provided to Sullivan by ARA, Grundig was unable to calculate more accurately ARA's costs of providing the contract services. In response to interrogatories from Sullivan requesting the amount of overhead and administrative expenses and the amount of net profit or loss on each contract, ARA stated it did not maintain records which allocated overhead expenses and profits on a per contract basis. Some ARA witnesses verified that ARA did not have any documents allocating its costs **[***7]** per contract. However, according to Robert Griffiths, who had **[*817]** been ARA's area controller, initially documents were kept which would enable ARA to determine the cost of each contract, but once the level one operating **[**859]** statements were prepared at the end of each year, these documents were routinely destroyed. Griffiths testified it was not possible to recreate this documentation, although it could have been generated several years ago when the contracts were in effect. Griffiths stated he was unaware that on March 16, 1982, prior to the expiration of the 1981-1982 contract, Sullivan's counsel had written Merle Jewett, ARA's director of marketing, advising Jewett that litigation would ensue if documentation was not voluntarily provided demonstrating that ARA's bid on the 1981-1982 contract was above its costs. When ARA refused to supply the requested information, Sullivan advised ARA's general counsel in April 1982 that it would pursue litigation and Sullivan subsequently served ARA with its first amended complaint on July 20, 1982.

Augustine Zemba, who had been ARA's executive vice-president of the transportation group until mid-1977, testified concerning ARA's policy of **[***8]** bidding below cost. Zemba oversaw operations, assisted in the bidding process and worked at the policy-setting level with ARA. His office was located at the group headquarters in Encino. Apparently the transportation group was comprised of approximately five regions or areas and each area had several divisions. ARA's Stockton operation was part of a division that belonged to the central area. All of the Stockton operation's bids were approved by the Encino office prior to being submitted to the parties seeking transportation service bids.

According to Zemba, ARA's overall policy was to penetrate the market and where there was existing competition, it would bid at any cost, even below cost, a process known as "low-balling." Other ARA personnel involved in this policy were Mel Sherman, who was the president of the transportation group, Bill Seegel, who was president of ARA's food services and executive vice-president of ARA Services, Inc., and Livingston Kosborg, who was senior vice-president of ARA Services, Inc. Zemba became aware of ARA's below cost bidding policy approximately one year after he joined the corporation in 1972. At a transportation group meeting, attended by **[***9]** Sherman, Kosborg, and Zemba, Kosborg announced his objective was for ARA to become the largest transportation company and show tremendous growth in specific areas including Northern California. Kosborg stated ARA would bid below cost, secure contracts and eliminate the competition. After that meeting, below cost bids were submitted to various school districts by ARA.

Zemba explained the process that was used in bidding below cost. He stated that true cost figures, submitted by the bidding division to the group **[*818]** transportation office for approval would simply be reduced so that it appeared the bid was above cost. The loss would be reallocated to some other profit-making division of ARA. This also served to reduce the amount of profit ARA appeared to make on other school district contracts to which the costs had been reallocated. After showing the school district altered documents reflecting its small profit, ARA would be able to justify an increase in its bids when it came time to renew these contracts. Lower level management was unaware that these changes and reallocations were being made as they did not receive complete financial reports. Zemba used to have many **[***10]** documents reflecting these alterations, but he returned them to ARA after he left the corporation in 1977.

Zemba testified he left ARA because he was concerned that Kosborg would conveniently forget he had endorsed the below cost bidding policy and Zemba would be held responsible. He was also embarrassed by being repeatedly put in the awkward position of approaching the school district and asking for more money, using the excuse that a mistake had been made in preparing the bid. He had been asked to do this several times and had been successful in obtaining the necessary increases.

Based upon information Zemba received after his departure from ARA and upon his 30 years of experience as an executive at the policy-making level of large private corporations and government organizations, he believed ARA's "low-balling" was continuing as a matter of practice as corporate **[**860]** policy is slow to change. In May 1978, Zemba met with Marvin Heaps and Frank Pfizenmayer, the president and general counsel of ARA Services, Inc., and discussed, among other things, ARA's low-ball bidding practices. Zemba stated one purpose of the meeting was to ask him to be quiet as there was other litigation going **[***11]** on throughout the country and publicity throughout the news media. According to Zemba, Heaps asked him to "lay off" and stated he knew there was low-ball bidding going on. Zemba remembered that after the meeting, Heaps sent him a letter thanking him and stating something to the effect that Heaps knew he had "a lot of mud to clean up."

Heaps and Pfizenmayer admitted that the meeting took place, but denied that Heaps made any statements concerning ARA's bidding practices. A portion of the letter Heaps sent to Zemba was introduced and it stated: "I appreciate your sharing your views on so many subjects. Please be assured I take this matter seriously and continue to be desirous that ARA and all of its components operates [*sic*] in a completely ethical way." There was nothing specifically about cleaning up mud.

Charles Gross, ARA's chief financial officer between 1975 and 1979, testified that ARA was concerned with making a profit on each contract **[*819]** and would not bid under cost. Jack Gottsman, the president of ARA's transportation group, testified ARA's overall policy was to bid "a profitable business so that we could grow competitively. . . ." ARA was concerned that each **[***12]** contract make a profit and bids were reviewed to make sure ARA was going into a contract on a profitable basis.

Robert Griffiths, the area controller who was in charge of the bidding process between 1979 and 1982, testified concerning ARA's method of allocating costs. It appears that variable costs were allocated per bus, per day. Fixed or overhead costs were allocated on the basis of bus days and revenue generated by each contract. The overhead would first be allocated among the various divisions based on the number of bus days generated by each division. Then each division would allocate the overhead per contract in proportion to the percentage of revenue generated by each contract. According to Griffiths, the San Joaquin County bids covered ARA's costs and generated a profit. ARA provided no testimony or documentation concerning the *amount* of either its actual or projected costs of providing the San Joaquin County contract services.

The jury awarded Sullivan compensatory and punitive damages for the contract years 1979-1980 and 1981-1982 and nothing for 1980-1981. Sullivan elected to receive the compensatory and punitive damages award instead of treble damages. After **[***13]** ARA unsuccessfully moved for a new trial or a judgment notwithstanding the verdict, it timely filed a notice of appeal.

Discussion

I

CA(1a)[] **(1a)** ARA contends the Unfair Practices Act (*§ 17000 et seq.*) violates the due process clauses of the California and United States Constitutions because the method for determining whether a service is sold below cost is arbitrary and irrational. ***CA(2)***[] **(2)** ***HN3***[] In addressing ARA's due process argument a court may question the wisdom of a statute, but "the Due Process Clause does not empower the judiciary 'to sit as a "superlegislature to weigh the wisdom of legislation" . . . .' [Citation.]" (*Exxon Corp. v. Governor of Maryland (1978) 437 U.S. 117, 124 [57 L.Ed.2d 91, 99, 98 S.Ct. 2207]*.)

CA(1b)[] **(1b)** *HN4*[] As *sections 17026* [4] **[***15]** and *17029* [5] define cost to include all variable and fixed costs, **[**861]** it appears the Unfair Practices Act employs a fully allocated **[*820]** cost or fully distributed cost standard to determine whether a sale has violated *section 17043*. (*G.H.I.I. v. MTS, Inc., supra, 147 Cal.App.3d at p. 275*; *William Inglis, etc. v. ITT Continental Baking Co. (9th Cir. 1981) 668 F.2d 1014, 1048*.) **[***14]** *CA(3)*[] **(3)** Variable costs are costs that vary with changes in output, while fixed costs are those that do not vary with changes in output. (Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act* (1975) 88 Harv.L.Rev. 697, 700.) *CA(1c)*[] **(1c)** The concept of fully allocated cost has been equated with average total cost, which "reflects that portion of the firm's total costs -- both fixed and variable -- attributable on an average basis to each unit of output." (*William Inglis, supra, 668 F.2d at p. 1035, fn. 30, 1048*; but see *MCI Communications v. American Tel. & Tel. Co. (7th Cir. 1983) 708 F.2d 1081, 1122*.)

The Legislature has declared the purpose of the Unfair Practices Act "is to safeguard the public against the creation or perpetuation of monopolies and to foster and encourage competition, by prohibiting unfair, dishonest, deceptive, destructive, fraudulent and discriminatory practices by which fair and honest competition is destroyed or prevented." (*§ 17001*.) Although the California Supreme Court has determined the purpose and policy of the Legislature in enacting the Unfair Practices Act and the means employed to subserve the legislative purpose by prohibiting sales below costs made with intent to injure competitors or competition is a valid exercise **[***16]** of the police power (*Wholesale T. Dealers v. National etc. Co. (1938) 11 Cal.2d 634 [82 P.2d 3, 118 A.L.R. 486]*), it has not directly addressed the issue of whether the act's method of cost allocation is constitutional. (*Id., at p. 662*; *People v. Pay Less Drug Store (1944) 25 Cal.2d 108, 118 [153 P.2d 9]*.) *CA(4)*[] **(4)** The court did note, however, that *HN7*[] any difficulty in computing costs is a factual one, and statutes are not to be declared invalid because in their application factual difficulties may arise. (*Pay Less Drug Store, supra, at p. 118*.)

CA(1d)[] **(1d)** ARA points out that some authorities question the use of the fully allocated cost method or average total cost method in determining the costs below which a business may not sell its goods or services for federal ***antitrust law*** purposes and instead propose the use of the average variable cost or long-run incremental cost method. (*MCI Communications v. American [*821] Tel. & Tel. Co., supra, 708 F.2d at pp. 1119-1122* and cases cited therein; *Areeda & Turner, op. cit.* **[***17]** *supra*, 88 Harv.L.Rev. at pp. 716-718, 732-733.) Average variable cost is the sum of all variable costs divided by output. (*Areeda and Turner, op. cit. supra*, at p. 700.) Long-run incremental cost measures all of the fixed and variable costs of adding a new product or service but, unlike fully allocated cost, only measures such costs which are causally related to the service or product in question. (*MCI, supra, 708 F.2d at pp. 1115, 1122*.)

The Seventh Circuit has stated that the fully distributed cost (FDC) method, which is one method of calculating average total cost, "is a quite arbitrary allocation of costs among different classes of service. There are countless FDC methods, each allocating costs by a different mathematical formula. Despite trenchant criticism on economic grounds, FDC continues to be widely used for regulatory purposes, *inter alia*, because of its ease of application in dividing an authorized total revenue requirement among individual products or services -- much as a pie is divided into slices. But FDC cannot purport to identify those costs which are *caused* by a product or service, and this is fundamental to economic cost determination." **[***18]** (*MCI Communications v. American Tel. & Tel. Co., [**862] supra, 708 F.2d at p. 1116*, fns. omitted, italics original.) The court also noted various FDC methods would normally

---

[4] *Section 17026* provides in pertinent part: *HN5*[] "'Cost' as applied to production includes the cost of raw materials, labor and all overhead expenses of the producer. [para.] 'Cost' as applied to distribution means the invoice or replacement cost, whichever is lower, of the article or product to the distributor and vendor, plus the cost of doing business by the distributor and vendor and in the absence of proof of cost of doing business a markup of 6 percent on such invoice or replacement cost shall be prima facie proof of such cost of doing business. [para.] 'Cost' as applied to warranty service agreements includes the cost of parts, transporting the parts, labor, and all overhead expenses of the service agency."

[5] *Section 17029* provides: *HN6*[] "'Cost of doing business' or 'overhead expense' means all costs of doing business incurred in the conduct of the business and shall include without limitation the following items of expense: labor (including salaries of executives and officers), rent, interest on borrowed capital, depreciation, selling cost, maintenance of equipment, delivery costs, credit losses, all types of licenses, taxes, insurance and advertising."

produce quite different calculations of the cost of a product or service and set forth a simple example to highlight what it termed the arbitrariness of FDC methodology. It stated: "Imagine a railroad line that simultaneously transports three different products: gold, lead and feathers. If the railroad attempted to calculate, on a fully distributed cost basis, the cost of shipping each of these products, it would reach radically different results depending on whether it allocated joint and common costs on the basis of the value, weight, or bulk of the respective commodities shipped." (*Id., at p. 1116, fn. 48*.)

The Sixth and Ninth Circuits have not adopted any particular cost method, but have instead held that whatever method is used only affects the burden of proof. If the plaintiff establishes the defendant sold its product below its average total cost but above its average variable cost, then the plaintiff has the burden of proving defendant did so with a predatory intent. **[***19]** If the plaintiff establishes the defendant sold its product below its average variable cost, then the defendant has the burden of negating that it had a predatory intent. (*William Inglis, etc. v. ITT Continental Baking Co., supra, 668 F.2d at pp. 1035-1036*; accord *Arthur S. Langenderfer, Inc. v. S.E. Johnson Co. (6th Cir. 1984) 729 F.2d 1050, 1056*.) The Ninth Circuit has stated the opinion that prices exceeding average total cost may be considered predatory where the plaintiff provides clear and convincing evidence of the defendant's predatory intent. (*Transamerica Computer Co., Inc. v. IBM **[*822]** Corp. (9th Cir. 1983) 698 F.2d 1377, 1387-1388*.) These cases demonstrate there has been no consensus in the federal courts regarding which measure of cost should be used in determining whether a business has engaged in predatory below-cost-pricing in a federal antitrust context. (*Cargill, Inc. v. Monfort of Colorado, Inc. (1986) 479 U.S. 104, 117, fn. 12 [93 L.Ed.2d 427, 440, 107 S.Ct. 484]*.)

We find ***HN8***[] the use of the fully allocated cost method, when viewed in conjunction **[***20]** with the injurious intent requirement of *section 17043*, is rationally related to the valid legislative purpose enunciated in *section 17001* as it assists in preventing the creation or perpetuation of monopolies. For example, assume that a large multiproduct company that uses the average variable cost method is in competition with a small single-product company which manufactures widgets (a product familiar to all lawyers and law students). The multiproduct company could allocate major indirect or fixed costs disproportionately to its nonwidget products and allocate little or nothing except variable costs to its widgets. In contrast, the single-product competitor's total fixed and variable costs must of necessity be allocated among its widgets. Accordingly, the multiproduct competitor could claim its cost of manufacturing widgets was far below that of the single-product competitor and set its prices at a level that would technically be above its costs and profitable, yet be damaging to competition. Because the single-product competitor could not meet the multiproduct competitor's artificially low prices, it might be driven from the marketplace, leaving the multiproduct competitor **[***21]** with a monopoly on the sale of widgets. The multiproduct competitor could then dramatically increase widget prices, disproportionately allocate its fixed costs to widgets, and by using the same variable cost method attack some other competitor's product line or market with unrealistically low prices. The fully allocated cost method, although not perfect, prevents this method of monopolization by requiring that a pro rata portion of the multi product competitor's overhead and fixed costs be included in its widget cost figures.

ARA claims the fully allocated cost method is arbitrary because there are many ways of allocating costs (for example, in the present case per mile, per bus or per student) each of which may result in significantly different cost profiles. While we agree there are many ways of fully allocating costs, the possibilities are not without limitation. ***HN9***[] To be legally acceptable, the **[**863]** allocation of indirect or fixed overhead costs to a particular product or service must be reasonably related to the burden such product or service imposes on the overall cost of doing business. (*William Inglis & Sons Bak. Co. v. ITT Con. Bak. Co., Inc. (N.D.Cal. 1975) 389 F.Supp. 1334, 1344*, **[***22]** reversed on other grounds in *Wm. Inglis & Sons Baking v. ITT Cont. Baking Co. (9th Cir. 1975) 526 F.2d 86, 88*.) Moreover, a defendant is free to demonstrate **[*823]** to the trier of fact that its fully allocated cost, using another reasonable allocation method other than that used by the plaintiff, is actually lower than the plaintiff alleges and lower than defendant's sales or bid price. (See McCarthy, *Whatever Happened to the Small Businessman? The California Unfair Practices Act* (1968) 2 U.S.F. L.Rev. 165, 179-180.) ARA did not do so. It merely presented witnesses who testified ARA always bid above cost or always sought to make a profit. In fact, ARA did not even demonstrate it sold its services above its average variable cost or long-run incremental cost, the methods it espouses. As such, defendant failed to demonstrate that the use of the fully allocated cost method was arbitrary or irrational as applied to the facts of this case.

ARA's attack on the use of the fully allocated cost method is, in effect, nothing more than a challenge to the economic wisdom of the statute, a matter more properly addressed to the Legislature. Since **[***23]** we have concluded the use of the fully allocated cost method is rationally related to a valid legislative purpose, we must reject ARA's due process claim. (*Exxon Corp. v. Governor of Maryland, supra, 437 U.S., at pp. 124-125 [57 L.Ed.2d at p. 99*]; *Eye Dog Foundation v. State Board of Guide Dogs for the Blind (1967) 67 Cal.2d 536, 547 [63 Cal.Rptr. 21, 432 P.2d 717]*.)

II

CA(5a)[] **(5a)** ARA contends California's use of the fully allocated cost method in *section 17043* may be interpreted as economic regulation intended to protect smaller or less efficient competitors from competition. (See *MCI Communications v. American Tel. & Tel. Co., supra, 708 F.2d at p. 1117*.) As such it is preempted by the Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*) because it prohibits procompetitive conduct that is not injurious to competition. [6]

[*24]** ***CA(6a)***[] **(6a)** ***HN10***[] "It is well established that within contitutional limits Congress may pre-empt state authority by so stating in express terms. [Citation.] Absent exclusive pre-emptive language, Congress' intent to supersede state law altogether may be found from a '"scheme of federal regulation . . . so **[*824]** pervasive as to make reasonable the inference that Congress left no room for the States to supplement it," . . .' [Citations.] Even where Congress has not entirely displaced state regulation in a specific area, state law is pre-empted to the extent that it actually conflicts with federal law. Such a conflict arises when 'compliance with both federal and state regulations is a physical impossibility,' [citation], or where state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.' [Citation.]" (*Pacific Gas & Elec. v. Energy Resources Comm'n. (1983) 461 U.S. 190, 203-204 [75 L.Ed.2d 752, 765, 103 S.Ct. 1713]*.)

CA(7)[] **(7)** ***HN11***[] "'The history of the Sherman Antitrust Act makes it clear that the Congress did not intend that the federal legislation preempt parallel state efforts to control **[**864]** unfair competitive **[***25]** practices.' . . . [Citations.]" (*Amarel v. Connell (1988) 202 Cal.App.3d 137, 147 [248 Cal.Rptr. 276]*.) ***CA(5b)***[] **(5b)** Therefore we need only decide whether the Unfair Practices Act actually conflicts with federal law.

ARA argues the Unfair Practices Act conflicts with the Sherman Act because it could be interpreted as anticompetitive, as the fully allocated cost method protects smaller or less efficient competitors from competition. Furthermore, it conflicts with federal law because it makes rational, profitable and nonpredatory pricing above long-run incremental cost presumptively unlawful.

A similar argument was raised by the defendant in *William Inglis, etc. v. ITT Continental Baking Co., supra, 668 F.2d 1014*. Continental contended that California's fully allocated cost standard conflicted with the Ninth Circuit's interpretation of federal antitrust laws, which permitted pricing, under appropriate circumstances, at or above

---

[6] The Sherman Antitrust Act provides in pertinent part: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. . . ." (*15 U.S.C. § 1*.)

"Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, . . ." (*15 U.S.C. § 2*.)

Generally, the Sherman Act bans all arrangements that are adopted to reduce competition or which have a significant tendency to reduce competition. (*Northrop Corp. v. McDonnell Douglas Corp. (9th Cir. 1983) 705 F.2d 1030, 1050*.)

marginal or average variable cost. It argued that the California law proscribed conduct which federal law permitted and thereby frustrated the fundamental policies of the Sherman Act. (*Id., at pp. 1048-1049*.) **[***26]**

The Ninth Circuit held that the possibility of proscription by California of conduct that federal law might permit was not sufficient to warrant preemption. (*668 F.2d at p. 1049*.) The fact that federal law had established an evidentiary standard, which did not make all pricing below average total cost indicative of anticompetitive intent, did not create a federal right to set such prices. (*Id., at p. 1049*.) The court noted the cost method used by California's statute essentially proscribed pricing below average total cost. (*Id., at p. 1048*.) The statute did not make all sales below average total cost illegal per se, but only such sales that had been made for the purpose of injuring competitors or destroying competition. The court found the only real difference between the California statute and federal law was in the **[*825]** allocation of evidentiary burdens, as follows: "Assuming proof of injury to a competitor has been made, California law allows plaintiffs to establish a prima facie case with proof of prices below average total cost. The defendant then has the burden of negating the inference of illegal intent or establishing **[***27]** an affirmative defense. Under federal law, the plaintiff who relies on prices below average total cost, but above average variable cost, has not created a presumption of illegal intent. To establish such a presumption he must show that no legitimate business reason for the below-cost price exists. It follows, therefore, that a price below average total cost but above average variable cost does not always violate California law, nor is such a price a guarantee of immunity under federal law. The difference between the two laws does not warrant the inference of preemption." (*668 F.2d at pp. 1049-1050*.)

ARA disagrees with the statement in *William Inglis* that the Unfair Practices Act essentially proscribes pricing below average total cost and relies on the Seventh Circuit decision in *MCI Communications, supra, 708 F.2d 1081* to support its position. The *MCI Communications* court noted that average total cost should not be equated with fully distributed cost and that it is best measured by average long-run incremental cost. (*MCI Communications, supra, at p. 1122*.) It also noted that some federal circuits had rejected the **[***28]** use of the fully allocated cost method and endorsed a marginal cost method. (*Id., at pp. 1120-1122*.) ***CA(8)***[] **(8)** We need not resolve or harmonize this apparent conflict among the federal circuits, however, as we are not bound by their decisions. (*Rohr Aircraft Corp. v. County of San Diego (1959) 51 Cal.2d 759, 764-765 [336 P.2d 521]*, revd. without comment on this point, *362 U.S. 628 [4 L.Ed.2d 1002, 80 S.Ct. 1050]*; accord *Graham v. Scissor-Tail, Inc. (1981) 28 Cal.3d 807, 830 [171 Cal.Rptr. 604, 623 P.2d 165]*.) ***CA(5c)***[] **(5c)** ***HN12***[] Absent a determination by the United States Supreme Court regarding what formula or cost method should be used in determining whether pricing is predatory, there is no clear federal standard with which the Unfair Practices Act may be said to conflict.

[865]** In any event, even if, as ARA contends, the Unfair Practices Act may hypothetically have an anticompetitive effect, this does not warrant an inference of preemption. "For if an adverse effect on competition were, in and of itself, enough to render a state statute invalid, the States' power to engage **[***29]** in economic regulation would be effectively destroyed." (*Exxon Corp. v. Governor of Maryland, supra, 437 U.S. at p. 133 [57 L.Ed.2d at p. 105]*.) ***HN13***[] The mere fact that the Unfair Practices Act proscribes conduct that might, according to some federal courts, be permitted under federal law is insufficient to demonstrate that the Unfair Practices Act is preempted by the Sherman Act. (*Id., at p. 130-131 [57 L.Ed.2d at p. 103]*.)

[*826] As previously discussed, the use of the fully allocated cost method is rationally related to the Unfair Practices Act's legitimate purpose of safeguarding the public against the creation or perpetuation of monopolies and of fostering and encouraging competition. This purpose is basically the same as that of the Sherman Act. (See fn. 6, *ante; William Inglis, etc. v. ITT Continental Baking Co., supra, 668 F.2d at p. 1050, fn. 62*.) ***CA(6b)***[] **(6b)** An inference of preemption is not appropriate where the basic purposes of the state and federal statutes are similar. (*Exxon Corp., supra, 437 U.S. at pp. 132-133 [57 L.Ed.2d at p. 104]*.) **[***30]**

On the facts of this case, ARA has not shown there is any conflict between the Sherman Act and the Unfair Practices Act. Under the circumstances, we find no preemption. (See also *People v. Gordon (1951) 105 Cal.App.2d 711, 718-719 [234 P.2d 287]*.)

III-VIII *

. . .

IX

A.

CA(9a)[] **(9a)** ARA also challenges the award of punitive damages arguing Sullivan was not entitled to an election of remedies as it was limited to the treble damages provided for in *section 17082*. We agree.

CA(10)[] **(10)** *HN14*[] Where a statutory penalty is imposed for a wrongful act, it does not preclude recovery of punitive damages in a tort action where the necessary malice or oppression is shown. (*Greenberg v. Western Turf Assn. (1903) 140 Cal. 357, 363 [73 P. 1050]*; 5 Witkin, Summary of Cal. Law (9th ed. 1988) Torts, § 1334, p. 792.) If the purpose of the penalty is the same as that of punitive damages, however, the plaintiff cannot obtain a double recovery and must elect **[***31]** to have judgment entered in an amount which reflects either the statutory trebling or the compensatory and punitive damages. (*Marshall v. Brown (1983) 141 Cal.App.3d 408, 419 [190 Cal.Rptr. 392]*.) When a statute recognizes a cause of action for a violation of a right, all forms of relief granted to civil litigants generally, including appropriate punitive damages, are available unless a contrary legislative intent appears. (*Commodore Home Systems, Inc. v. Superior Court (1982) 32 Cal.3d 211, 215 [185 Cal.Rptr. 270, 649 P.2d 912]*.) But when a new right, not existing at **[*827]** common law, is created by statute and a statutory remedy for the infringement thereof is provided, such remedy is exclusive of all others unless the statutory remedy is inadequate. (*Orloff v. Los Angeles Turf Club (1947) 30 Cal.2d 110, 112-113 [180 P.2d 321, 171 A.L.R. 913]*; *Strauss v. A. L. Randall Co. (1983) 144 Cal.App.3d 514, 518-519 [194 Cal.Rptr. 520]*.)

CA(9b)[] **(9b)** Here it is not disputed that the treble damages provision of *section 17082* is punitive **[***32]** and similar in purpose to *Civil Code section 3294* and hence plaintiff is not entitled to both remedies. Nor is it disputed that the treble damages provision is mandatory. (See *Uneedus v. California Shoppers, Inc. (1978) 86 Cal.App.3d 932, 942 [150 Cal.Rptr. 596]*.)

Relying on *Marshall v. Brown, supra, 141 Cal.App.3d 408*, Sullivan contends it was entitled to an election of remedies. In *Marshall*, the plaintiff sued her previous employer based on statements the employer made to the plaintiff's prospective employer. She alleged both a cause of action for slander seeking compensatory **[**866]** and punitive damages and a civil action authorized by *Labor Code sections 1050* and *1054* which provided that an employer who had discharged an employee or paid off an employee voluntarily leaving such service and by any misrepresentation prevented or attempted to prevent the former employee from obtaining employment was liable to the former employee for treble damages. (*Id., at pp. 411-412*.) The jury found the employer had made a misrepresentation that prevented plaintiff from obtaining employment **[***33]** and found each defendant slandered plaintiff. (*Id., at p. 413*.) The court found the Labor Code provision for treble damages was mandatory and punitive. (*Id., at p. 419*.) Since the purpose of the treble damages provision was the same as that of punitive damages, the plaintiff was not entitled to both and had to elect between a judgment entered in an amount which reflected either the statutory trebling or the compensatory and punitive damages. (*Ibid.*)

Marshall does not support Sullivan's position, as in that case the plaintiff was pursuing two causes of action, each with different remedies though relying on the same facts. Here, Sullivan is relying solely on a statutory violation. It has not alleged, identified or pursued any alternate theory of liability nor has it pursued any common law tort cause of action that existed prior to the enactment of the Unfair Practices Act. As such, Sullivan is limited to a recovery of treble damages.

B., C. *

* See footnote 1, *ante*, page 811.

* See footnote 1, *ante*, page 811.

[*34]** . . .

[*828] The judgment is reversed and the matter is remanded to the trial court for a new trial limited to a determination of the amount of damages in accordance with part VIII of this opinion. * Each party shall bear its own costs on appeal.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN1[] **Private Actions, Standing**

While U.S. antitrust laws give the court jurisdiction over antitrust claims that arise from actions directly affecting U.S. commerce, only persons or corporations injured while trading in U.S. foreign or domestic commerce have the standing necessary to bring such claims.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN2[] **Private Actions, Standing**

The first prerequisite to a determination that a plaintiff was injured in the relevant market is a finding that the market is part of American foreign or domestic commerce.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

International Trade Law > General Overview

HN3[] Private Actions, Standing

Where the contracts at issue were made is equally unimportant if the market itself is considered a U.S. market or directly impacts U.S. commerce. A plaintiff should not be penalized for the utilization of a foreign branch of a market instead of an equally accessible American branch.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN4[] Private Actions, Standing

Where the market in question has even slight direct ties to U.S. commerce, that market is not an exclusively foreign market and is therefore deemed a U.S. market.

Governments > Courts > Judicial Comity

International Law > Dispute Resolution > Comity Doctrine > General Overview

HN5[] Courts, Judicial Comity

In evaluating the interests of a foreign government prior to determining whether to assert jurisdiction over a transaction occurring outside the United States, the courts have generally applied a jurisdictional rule of reason, which seeks to balance the competing interests asserted.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN6[] Summary Judgment, Burdens of Proof

A party seeking summary judgment must demonstrate that there is no genuine issue as to any material fact. *Fed. R. Civ. P. 56(c)*. When the moving party has carried its burden under *rule 56(c)*, its opponent must do more than simply show that there is some metaphysical doubt as to the material facts. It must establish that there is a genuine issue for trial. In considering the motion, the court's responsibility is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

Antitrust law limits the range of permissible inferences from ambiguous evidence in a case under *15 U.S.C.S. § 1* of the Sherman Act. Specifically, conduct as consistent with permissible conduct as with an illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. There must be direct or circumstantial evidence that tends to exclude the possibility that the defendants were acting independently. Moreover, in antitrust cases, if the factual context renders plaintiff's claim implausible, if the claim is one that simply makes no economic sense, plaintiff must come forward with more persuasive evidence to support its claim than would otherwise be necessary.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN8[] **Antitrust & Trade Law, Sherman Act**

While some assessment of the evidence is necessary to determine rationally what inferences are reasonable and therefore permissible, it is evident that the question of what weight should be assigned to competing permissible inferences remains within the province of the fact-finder at a trial.

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN9[] **Summary Judgment, Opposing Materials**

A higher burden is imposed on the party opposing summary judgment when the scheme alleged is economically irrational.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Sherman Act, Claims**

To establish a violation of *15 U.S.C.S. § 1* of the Sherman Act, a plaintiff must establish only two elements: 1) a conspiracy 2) that unreasonably restrains trade or affects interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

A plaintiff must be able to prove that defendants had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement in order to prove a conspiracy under 15 U.S.C.S. § 1of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] Antitrust & Trade Law, Sherman Act

In determining whether circumstantial evidence of a conspiracy exists, a court must keep in mind the distinction between independent but parallel business actions and a conscious commitment to a common scheme designed to achieve an unlawful objective which excludes the possibility of independent action. Only the latter is prohibited by the antitrust laws. Conduct equally consistent with permissible business activity as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Energy & Utilities Law > Taxation Issues

HN14[] Antitrust & Trade Law, Sherman Act

A plaintiff must show the existence of additional circumstances, often referred to as "plus" factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy. These plus factors should not be considered in isolation; the important determination is whether the evidence viewed as a whole supports a reasonable inference of conspiracy.

Civil Procedure > Discovery & Disclosure > Discovery > Misconduct During Discovery

HN15[] Discovery, Misconduct During Discovery

The nonproduction of material evidence in the control of a party raises an inference that evidence is unfavorable to that party.

Civil Procedure > Discovery & Disclosure > Discovery > Misconduct During Discovery

HN16[] Discovery, Misconduct During Discovery

An inference that the missing evidence is harmful can be rebutted by an adequate explanation of the reason for nonproduction.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Sherman Act > Claims

HN17[] Clayton Act, Claims

A plaintiff must prove that its business injury was caused by defendants' violation of the antitrust laws in order to recover damages under 15 U.S.C.S. § 4 of the Clayton Act.

HN19[] Types of Contracts, Futures

While 7 U.S.C.S. § 2(a)(1) of the Commodity Exchange Act provides the Commodity Futures Trading Commission with regulatory jurisdiction over contracts of sale of a commodity for future delivery, it further provides that the term future delivery shall not include any sale of a cash commodity for deferred shipment or delivery.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

HN20[] Agriculture & Food, Commodity Exchange Act

See 7 U.S.C.S. § 2.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Securities Law > Commodities Futures Trading > Future Delivery

HN21[] Agriculture & Food, Commodity Exchange Act

Commodity is broadly defined to include, among others, all other goods and articles, and all services, rights, and interests in which contracts for future delivery presently or in the future dealt in.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Futures

Securities Law > Commodities Futures Trading > Cash Forward Contracts

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Securities Law > Commodities Futures Trading > Future Delivery

Securities Law > Commodities Futures Trading > Futures Contracts

HN22[] Types of Contracts, Futures

Cash commodity contracts for deferred shipment or delivery are commonly known as cash forward contracts, whereas contracts of sale of a commodity for future delivery are called futures contracts.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Futures

Securities Law > Commodities Futures Trading > Definitions

Business & Corporate Compliance > ... > Negotiable Instruments > Types of Parties > Accommodated & Accommodation Parties

Contracts Law > ... > Negotiable Instruments > Indorsements > Accommodation Indorsements

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Securities Law > Commodities Futures Trading > Futures Contracts

HN23[] Types of Contracts, Futures

Sales of cash commodities for deferred shipment or delivery generally have been recognized to be transactions in physical commodities in which delivery in fact occurs but is delayed or deferred for purposes of convenience or necessity. Forward contracts have thus been defined as transactions in which the commercial parties intend and can accommodate physical transfer of the actual commodity. By contrast, futures contracts are undertaken primarily to assume or shift price risk without transferring the underlying commodity. As a result, futures contracts providing for delivery may be satisfied either by delivery or offset.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Contracts Law > ... > Negotiable Instruments > Negotiations > Deliveries

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Futures

HN24[] **Agriculture & Food, Commodity Exchange Act**

The Commodity Futures Trading Commission has recognized that commodity transactions between commercial participants in certain markets have evolved from privately negotiated contracts for deferred delivery of a physical commodity under which delivery generally occurs to transactions that have highly standardized terms and are frequently satisfied by payments based upon intervening market price changes.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

HN25[] **Agriculture & Food, Commodity Exchange Act**

The forward contract exclusion is unavailable to contracts for sale for commodities which are sold merely for speculative purposes and which are not predicated upon the expectation that delivery of the actual commodity by the seller to the original contracting buyer will occur in the future.

Tax Law > State & Local Taxes > Sales Taxes > Sales Tax Definitions

HN29[] **Types of Contracts, Futures**

Wash trading, not defined in 15 U.S.C.S. § 4c(a) of the Commodity Exchange Act (CEA) itself, is the practice of entering into or purporting to enter into transactions for the purpose of giving the appearance that trades are being or have been made but without having actually taken a market position. The existence of a wash result, the purchase and sale of the same futures contract at a similar price, is an insufficient showing to establish a wash sale in violation of § 4c(a) of the CEA. Prohibited wash sales are proved only if it is demonstrated that the trader knowingly participated in transactions initiated with intent to avoid a bona fide market position. Whether a transaction constitutes a wash sale inevitably turns on the particular facts and circumstances of individual cases and not on any absolute formula.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Securities Law > ... > Express Liabilities > Price Manipulation > Matched Orders & Washed Sales

Governments > Agriculture & Food > General Overview

HN30[] **Agriculture & Food, Commodity Exchange Act**

15 U.S.C.S. § 4c(a)(A) of the Commodity Exchange Act's broad prohibition of any transaction of the character of, or commonly known to the trade as, a "wash sale," suggests that negating market risk sufficiently eliminates any significant risk to fall within the prohibition.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Securities Law > ... > Express Liabilities > Price Manipulation > Matched Orders & Washed Sales

HN31[] **Agriculture & Food, Commodity Exchange Act**

While prearrangement is not a necessary element for finding a wash sale violation, it is one method used to avoid a bona fide market position.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

Criminal Law & Procedure > ... > Fraud > Securities Fraud > Elements

HN32[] **Agriculture & Food, Commodity Exchange Act**

Where a trader acts with a legitimate investment or commercial purpose, no manipulative intent can be found.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Commodity Exchange Act

HN33[] **Agriculture & Food, Commodity Exchange Act**

Where multiple causes of an artificial price can be sorted out, and defendants are a proximate cause of the artificial price, a charge of manipulation can be sustained.

Opinion

[*1474] OPINION AND ORDER

WILLIAM C. CONNER, UNITED STATES DISTRICT JUDGE

This action under the antitrust and commodity laws is before the Court on defendants' motion for summary judgment.

BACKGROUND

Plaintiff Transnor (Bermuda) Ltd. ("Transnor") is a corporation established under the laws of Bermuda and with its principal place of business there. Transnor's suit arises out of its purchase of two cargoes of North Sea Crude Oil in December 1985 at an average price of $ 24.50 per barrel for delivery in Scotland in March 1986. Transnor refused to take delivery of these cargoes because their market value had declined after Transnor entered into the contracts. [1]

[1] SITCO, a party to one of the contracts, obtained a judgment against Transnor for its default. Transnor settled with Nissho Iwai, a party to the second contract.

[*1475] Transnor claims that remaining defendants Conoco Inc., Conoco (U.K.) Ltd. (collectively "Conoco") **[**2]** and Exxon Corporation "Exxon"), conspired with the settling defendants [2] to cause a decline in crude oil prices by jointly selling cargoes of Brent blend crude oil ("Brent Oil") at below-market prices. Brent Oil is a blend of oils produced in various fields in the North Sea and delivered through pipelines for loading onto cargo ships at Sullem Voe in the Shetland Islands. By the end of March 1986, the price of a barrel of Brent Oil had dropped substantially to $ 13.80 per barrel, from $ 29.05 per barrel in November 1985. Transnor asserts claims against defendants for violations of the Sherman Act, *15 U.S.C. § 1 (1982)*, and *sections 4(c)*, *6(b)*, and *13(b)* of the Commodity Exchange Act ("CEA"), *7 U.S.C. §§ 6(c)*, *9(b)* and *13(b) (1980 & 1989 Supp.)*.

Defendants have moved for **[**3]** summary judgment pursuant to *Rule 56, Fed. R. Civ. P.* on the grounds that (1) Transnor lacks standing to sue under the antitrust laws and the CEA or, alternatively, that the Court should decline to exercise jurisdiction under principles of comity and international law; (2) there is no evidence that defendants conspired to drive down the price of oil in violation of the antitrust laws; (3) Transnor's injury is not cognizable under *Section 4* of the Clayton Act, *15 U.S.C. § 15 (1973 & 1990 Supp.)* because there is no evidence that defendants' behavior caused oil prices to fall; and (4) defendants' conduct was neither governed by nor in violation of the CEA. For the following reasons, the motion is denied.

ANTITRUST AND COMMODITY LAW STANDING

Defendants first move for summary judgment on the ground that Transnor lacks standing under both the Sherman Act, *15 U.S.C. §§ 1 et seq.* and the Commodity Exchange Act, *7 U.S.C. §§ 1 et seq.* In an opinion and order dated August 5, 1987 ("Order"), this Court denied defendants' motion to dismiss pursuant to *Rule 12, Fed. R. Civ. P. Transnor (Bermuda) Ltd. v. BP North America Petroleum, 666 F. Supp. 581 (S.D.N.Y. 1987)*. One of the grounds **[**4]** advanced by defendants for dismissal was that Transnor lacked standing under the antitrust and commodity laws. Accepting the facts alleged by Transnor as true, as a court must on a motion to dismiss, I found that the Brent Oil Market, in which Transnor allegedly suffered its injury, is "primarily a U.S. market," or at least a "part of U.S. commerce." *Id. at 583*. The Court accordingly held that Transnor had standing under U.S. antitrust and commodity laws.

Defendants then moved the Court to certify for immediate appeal the question of "whether Transnor, a foreign corporation which engaged in no business in this country, has standing to sue for injuries allegedly suffered in wholly foreign trading on an international market merely because it is alleged that there are U.S. participants trading in that market as well." The Court denied the motion because the question for certification had misstated the underlying basis for the Court's initial ruling, in which the Court specifically accepted as true Transnor's unrefuted allegation that the Brent Market is a U.S. market and not merely an international market. *Transnor (Bermuda) Ltd. v. BP North America Petroleum, 677 F. Supp. 777 (S.D.N.Y.* ***[**5]*** *1988)*. The Court thereafter stated that,

> if, after conducting pre-trial discovery, defendants uncover evidence indicating that the Brent Market is indeed an international market with no direct impact on **[*1476]** U.S. commerce, then it may be appropriate for them to move for summary judgment on the ground that plaintiff lacks standing under the antitrust laws.

Id. at 778. Defendants now move accordingly for summary judgment, insisting that the undisputed facts demonstrate that the Brent Market is an international market and that Transnor, therefore, lacks standing under U.S. antitrust and commodity laws.

HN1[] While U.S. antitrust laws give this Court jurisdiction over antitrust claims that arise from actions directly affecting U.S. commerce, only persons or corporations injured while trading in U.S. foreign or domestic commerce have the standing necessary to bring such claims. [3] In *de* *Atucha v. Commodity Exchange, Inc., 608 F. Supp. 510*

---

[2] Transnor settled and dismissed with prejudice its claims against Shell International Trading Company ("SITCO") and Shell U.K. Limited ("SUKO"), as well as against BP North American Petroleum and BP Oil International Ltd. (collectively "BP"). Transnor also dismissed with prejudice its claims against the Royal Dutch Petroleum Company, the "Shell" Transport and Trading Company, p.l.c., and the Shell Oil Company.

(S.D.N.Y. 1985), the district court held that foreigners who trade "exclusively" on a foreign exchange do not have standing under either U.S. antitrust or commodity laws. The court noted that "**HN2**[] the first prerequisite to a determination that a plaintiff **[**6]** was injured in 'the relevant market' is a finding that the market is part of American foreign or domestic commerce." *Id. at 518*. Because Transnor's claims rest on injury from anticompetitive activity in the Brent Market, the issue presented here is whether the Brent Market is a part of American foreign or domestic commerce or is an exclusively foreign market.

According to Judge Lasker in *de Atucha*, "Congress did not contemplate recovery under the antitrust laws by an individual who traded, and was injured entirely outside of United States commerce." *Id. at 518*. The court further held that "such transactions were not intended to be and are not regulated under the [CEA]." *Id. at 523*. Judge Lasker then found that the plaintiff, having traded on an exclusively foreign market, lacked standing. This case, however, presents a wholly different situation wherein the plaintiff claims that the market on which it traded was a U.S. market or had a direct **[**7]** impact on U.S. commerce, a nexus with the United States sufficient to invoke standing.

Because 95% of the trades in the Brent Market are made for speculative or hedging purposes not calling for actual delivery of the oil, the appropriate inquiry involves a consideration of the location of the trading market. The location of the production area and the delivery point are manifestly much less relevant. *See* *Transnor (Bermuda) Ltd. v. BP North America Petroleum, 666 F. Supp. 581, 583 (S.D.N.Y. 1987)*. **HN3**[] Where the contracts at issue were made is equally unimportant if the market itself is considered a U.S. market or directly impacts U.S. commerce. *See id*. A plaintiff should not be penalized for the utilization of a foreign branch of a market instead of an equally accessible American branch. As this Court has previously stated, Transnor's choice to purchase the contracts through the London branch, rather than in New York or Houston, "does not lessen Transnor's ability to vindicate Congress's clearly expressed desire that foreigners have standing to sue under the U.S. antitrust laws if the alleged course of anti-competitive conduct has the requisite impact on U.S. commerce." *Transnor, **[**8]** 666 F. Supp. at 584*.

The unrefuted evidence establishes that of the 109 traders and brokers Transnor knew to be active in the Brent Market, 88 had offices located in the United States and at least 6 traded exclusively in the United States. It is further uncontested that two of the three principal trading centers of the Brent Market are located in the United States, specifically, New York and Boston.

HN4[] Where the market in question has even slight direct ties to U.S. commerce, that market is not an exclusively foreign market and is therefore deemed a U.S. market. While the Brent Market may be a substantially foreign market, Transnor has presented sufficient proof that the Brent Market is not an exclusively foreign market, and thus a U.S. market.

[*1477] Moreover, Brent Oil is imported into the United States and it may be delivered to fulfill Light Sweet crude oil contracts traded on the New York Mercantile Exchange. These indirect ties to U.S. commerce further support the determination that Transnor has standing to assert claims arising from trades executed on the Brent Market. Accordingly, the Court concludes that Transnor has standing under U.S. antitrust and commodity laws.

COMITY AND INTERNATIONAL **[**9]** LAW

Defendants next move this Court to stay its hand under principles of comity and international law, claiming that an assertion of jurisdiction by this Court would "affront legitimate and powerful British interests." **HN5**[] In evaluating the interests of a foreign government prior to determining whether to assert jurisdiction over a transaction occurring outside the United States, the courts have generally applied a "jurisdictional rule of reason," which seeks to balance the competing interests asserted. The parties agree that the applicable principles of comity among nations is set forth in *Timberlane Lumber Co. v. Bank of America Nat'l Trust & Sav. Ass'n, 749 F.2d 1378 (9th Cir. 1984)*, *cert. denied*, *472 U.S. 1032, 87 L. Ed. 2d 643, 105 S. Ct. 3514 (1985)*. They disagree, however, on the application of the

---

[3] This Court carefully attempts to distinguish those cases dealing with standing from those interpreting subject matter jurisdiction. Defendants clearly contest plaintiff's standing to assert its antitrust and commodity claims.

seven principles espoused by *Timberlane* to the facts at hand. For the following reasons, the Court finds that comity principles do not compel the Court to decline to exercise jurisdiction.

The Court must first determine whether the extraterritorial enforcement of United States antitrust and commodity laws create an actual or potential conflict with the laws and policies of other nations. Defendants assert **[**10]** that the Securities and Investments Board ("SIB") -- the British government agency with jurisdiction over United Kingdom ("U.K.") financial markets -- has adopted a *Consultive Document on the Future Regulation of the Oil Markets* and an *Oil Market Code of Conduct* in February and March 1988, which presents guidelines for the forward trading of Brent Oil, and that SIB intends to promulgate regulations thereon. Transnor contends that defendants' speculation on the future action of SIB does not create a conflict with foreign law or policy. Transnor also states that no binding regulation of Brent Market trading presently exists in the U.K. The Court agrees with Transnor that application of U.S. antitrust and commodity laws does not create either an actual or potential conflict with existing British government regulation of Brent Market transactions. That a conflict may arise in the future should the British government act is too uncertain to weigh against the exercise of jurisdiction.

Next to be weighed are the headquarters and other office locations of the party corporations, as well as citizenship of persons involved in the alleged illegal conduct. In this case, of the three remaining **[**11]** defendants, Conoco Inc. and Exxon are U.S. corporations, headquartered in the U.S., and Conoco (U.K.) Limited is a subsidiary of Conoco Inc., controlled and directed by its parent. Transnor, a Bermuda corporation, transacted business internationally. Although the relevant transactions were effected through the London branch of the Brent Market, the parties' ties to the United States are stronger than those to the United Kingdom.

Also considered is the extent to which enforcement by either state can be expected to achieve compliance. In this case, compliance with the applicable statutes can be achieved only in the United States because there is no comparable regulation of the Brent Market in the U.K. and defendants offer no evidence that U.S. interests under the pertinent statutes can be vindicated abroad. Therefore, compliance with American law can only be assured in the United States.

The Court next turns to the relative significance of the effects of the alleged illegal conduct on the domestic and foreign commerce of the United States and on commerce elsewhere. Transnor maintains and defendants admit that defendants' trading of Brent Market contracts took place mainly in the United **[**12]** States. It is defendants' alleged conduct in the United States which **[*1478]** gave rise to this action. Because two of the three branches of the Brent Market are in the United States, as mentioned earlier, defendants' alleged conduct has clearly impacted U.S. commerce. This Court recognizes, of course, the equally significant impact on U.K. and international commerce. Consequently, this factor neither favors nor disfavors the exercise of jurisdiction.

The Court must also consider whether defendants' actions were intended to harm or affect American commerce or the foreseeability of such effect. Transnor's complaint alleges that defendants engaged in conduct intended to depress market prices. In its submissions in opposition to the motion for summary judgment, Transnor has sufficiently demonstrated that, at the least, there are issues of fact as to whether defendants intended to affect U.S. commerce or should reasonably have foreseen such an impact. These fact issues preclude summary denial of jurisdiction on the ground of lack of the necessary scienter.

Finally, a court should weigh the location of the alleged illegal conduct in order to assess the appropriateness of the exercise of extraterritorial **[**13]** jurisdiction. Transnor claims that the United States was the center of the illegal conduct charged. While defendants refute the substance of the charges in the complaint, they do not specifically deny that this conduct is alleged to have taken place in the United States. Clearly then, the U.S. is an important locus, if not the hub, of defendants' alleged manipulation.

With all factors considered, both a quantitative and a qualitative tally favor the exercise of jurisdiction by this Court -- a result which should not affront British interests.

ANTITRUST CLAIM

Standard for Summary Judgment

HN6[] A party seeking summary judgment must demonstrate that "there is no genuine issue as to any material fact." Fed. R. Civ. P. 56(c); Knight v. U.S. Fire Ins. Co., 804 F.2d 9, 11 (2d Cir. 1986), *cert. denied*, *480 U.S. 932, 94 L. Ed. 2d 762, 107 S. Ct. 1570 (1987)*; *see* Celotex Corp. v. Catrett, 477 U.S. 317, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986). "When the moving party has carried its burden under Rule 56(c), its opponent must do more than simply show that there is some metaphysical doubt as to the material facts." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). It must establish that there is a "genuine issue for **[**14]** trial." Id. at 587. "In considering the motion, the court's responsibility is not to resolve disputed issues of fact but to assess whether there are any factual issues to be tried, while resolving ambiguities and drawing reasonable inferences against the moving party." Knight, 804 F.2d at 11.

However, "HN7[] ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case." Matsushita, 475 U.S. at 588. [4] Specifically, "conduct as consistent with permissible conduct as with [an] illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.;* Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 764, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984). There must **[*1479]** be direct or circumstantial evidence that "tends to exclude the possibility that the [defendants] were acting independently." Monsanto, 465 U.S. at 764. Moreover, in antitrust cases, "if the factual context renders [plaintiff's] claim implausible -- if the claim is one that simply makes no economic sense -- [plaintiff] must come forward with more persuasive evidence to support [its] claim than would otherwise be necessary." Matsushita, 475 U.S. at 587; Apex Oil, 822 F.2d at 253 ("implausibility **[**15]** of a scheme will reduce the range of inferences that may permissibly be drawn from ambiguous evidence").

[16]** *Description of Tax Spinning*

Transnor claims that defendants carried out their conspiracy through "tax spinning" -- the arm's-length sale by an integrated oil producer to a third party and a substantially simultaneous purchase of a similar quantity of oil at substantially the same price for use in that producer's refineries -- which, depending on the relation between the average market price and the price at which the trades were made, created the possibility of substantial tax savings under U.K. tax law. The crux of Transnor's claim is that from approximately November 1985 through mid-March 1986, defendants conspired to tax spin Brent Oil at below-market prices in order to reduce the U.K. taxes paid by defendants. Transnor also claims that the artificially reduced price of the spin sales drove down the market price of Brent Oil, a benchmark crude oil, as well as that of other crude oils such as West Texas Intermediate ("WTI"), an oil traded on the New York Mercantile Exchange, with which Brent Oil is virtually interchangeable.

Under the U.K. Oil Taxation Act of 1975 ("Taxation Act"), the applicable petroleum revenue tax rate between April 2, 1985 and March 31, 1986 was 87%. Under **[**17]** the then-applicable provisions of the Taxation Act, the taxed price on sales of oil differed depending on whether the sale was at arm's length on the open market or the oil was transferred directly to an integrated producer's affiliated entity. Transfers to affiliated companies were taxed at an assessed market value, known as the tax reference price ("TRP"), which, beginning in 1984, was determined by the

---

[4] Some courts and commentators state that the Supreme Court's decisions in *Matsushita, Celotex*, and Anderson v. Liberty Lobby, Inc, 477 U.S. 242, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986) represent a "new era" more favorable to summary judgment motions. *See e.g.*, Childress, *A New Era for Summary Judgments:* Recent Shifts at the Supreme Court, 116 F.R.D. 183 (1987). For example, the *Matsushita* court stated that plaintiffs "must show that the inference of conspiracy is reasonable in light of the competing inferences [of lawful behavior]." Matsushita, 475 U.S. at 588. This language suggests that courts must more critically weigh the inferences which the parties urge. However, the Second Circuit Court recently emphasized in the context of an antitrust summary judgment motion that, "HN8[] while some assessment of the evidence is necessary to determine rationally what inferences are reasonable and therefore permissible, it is evident that the question of what weight should be assigned to competing permissible inferences remains within the province of the fact-finder at a trial." Apex Oil Co. v. Dimauro, 822 F.2d 246, 253 (2d Cir.), *cert. denied*, ***484 U.S. 977, 98 L. Ed. 2d 487, 108 S. Ct. 489 (1987)***.

Inland Revenue's Oil Taxation Office ("OTO") based on an average of prices established retrospectively for a period of time prior to the interaffiliate transfer. Defendants argue that because of declining oil prices from other causes, primarily the excess supply in the world oil market caused by OPEC, the TRP was higher than the current market price and thus led to payment of taxes on sales to affiliated entities based on an artificially high rate. Rather than pay taxes based on such an inflated price, defendants entered into matched buy/sell transactions in the open market instead of transferring oil directly to their refineries. Defendants claim that tax spinning thus resulted in payment of taxes based on a more accurate market rate, not, as Transnor claims, at below-market rates. **[**18]** This would furnish a logical explanation of tax spinning if it was done only in a declining market, in which the tax-spin transactions were at an actual market price lower than the TRP -- i.e. lower than the average market prices over the past month. Whether the tax spinning was done only in such circumstances is unclear from the present record.

Both parties spend considerable energy debating whether these transfers violate U.K. tax law. In brief, Transnor contends that while it was legal for an integrated oil company to sell its oil in the open market and to buy oil for its own needs, it was not legal to enter into a large number of matched buy/sell contracts at the same price in order to establish a "portfolio" of contracts for delivery months in the future. Defendants held these contracts open until the delivery month and then selected from their "portfolio" the lowest-priced sale and assigned to it oil they produced that month, known as "equity production." Producers were also able to choose among their affiliated businesses in assigning the sale, which was then reported to the tax authorities as the arms-length price at which they sold their equity production. In order to balance **[**19]** its portfolio for the month, other **[*1480]** buy/sells for that month would be disposed of by "booking out" [5] or by entering into an offsetting transaction.

Defendants offer a lengthy explanation for the legality of their behavior and note that after reviewing data concerning all of their Brent transactions during the relevant period, the OTO subsequently approved the portions of Conoco's and Exxon's tax returns that Transnor now challenges. Defendants state that Conoco informed the OTO that when multiple sales and purchases were made in a given delivery month, it reported the lowest-priced transaction as the arms-length sale. [6]

Economic Incentive to Lower Prices

Defendants argue that they had no financial motive to encourage low, **[**20]** rather than high, crude oil prices and thus Transnor cannot meet its increased burden to defeat summary judgment. [7] **[**21]** Transnor claims that defendants had the following financial incentives to encourage lower crude oil prices. First, defendants are companies, or affiliates of companies, which not only produce and refine crude oil, but also market crude oil and petroleum products made from crude oil. Lower crude prices would allow defendants to obtain higher profit margins in their sales of "downstream" refinery products, more than offsetting losses from sales of lower-priced crude oil. [8]

---

[5] "Bookout" contracts are separate contracts entered into by the parties to the original contracts whereby they settle their respective obligations under the original contracts by paying each other the difference between the contract price and an agreed reference price.

[6] In 1987, the U.K. government changed the tax law to limit a producer's ability to select lower-priced sales from a large portfolio, thus reducing the frequency of tax spinning.

[7] In *Matsushita*, the Supreme Court imposed ***HN9***[] a higher burden on the party opposing summary judgment when the scheme alleged is economically irrational. The *Matsushita* Court found that the predatory pricing scheme alleged -- pricing sufficiently below the market level to drive out competitors in order to gain monopoly power and then recoup any resulting losses through monopoly profits -- was economically irrational because it led to definite short-term loss and uncertain long-term gain. The instant case involves possible short-term gain and, defendants contend, almost certain long-term loss.

[8] Earnings from upstream operations, which include the exploration and production of crude oil, rise and fall directly with crude oil prices. Earnings from downstream operations, which include the refining and marketing of refined products, derive from the difference between the cost of purchasing and refining the crude oil and the market price of the refined products.

Transnor further claims that because defendants were huge net buyers of crude oil, [9] they stood to gain from lower prices. [10]

Second, defendants would reap significant financial benefits from shifting profits from Brent crude oil production, which was taxed by the United Kingdom at a rate of 87%, to refining and marketing petroleum **[**22]** products, which were taxed at a significantly lower rate of approximately 40%. Under the U.K. tax scheme, a dollar reduction in the price of crude oil led to an after-tax 13-cent loss to defendants on the sale of the oil, whereas defendants' refining affiliates could buy Brent Oil for a dollar per barrel cheaper and, assuming no decline in the price of refined products, increase its after-tax profit by 60 cents per barrel. [11]

[23]** **[*1481]** As further evidence that defendants had incentives to tax spin to drive down market prices, Transnor points to an Exxon document which calculated "spinning incentive, $/B". Another Exxon document stated that tax spinning "directionally effects downward pressure on market (especially forward months)." Finally, Dr. Edwin Spuller, a Transnor witness, testified that "the majors had, at [the relevant] time, an interest to make their refineries profitable, so they had an interest to damage the crude oil price." Spuller Dep. at 270.

The economic plausibility of the alleged scheme is enhanced by defendants' admission that a decrease in crude oil prices temporarily widens the refining profit margin because of the time lag between the change in crude oil prices and the adjustment in the related refined product markets. An article in Weekly Petroleum Argus states that in the first quarter of 1986, Exxon and Conoco made in the downstream thirty-four and thirteen times more profit, respectively, per barrel of oil than they had made in the previous year. Defendants respond that Exxon and Shell experienced combined upstream and downstream net earnings declines during that same quarter. [12] In addition, **[**24]** they argue that BP's and Conoco's temporary gains were wiped out by the end of the second quarter of 1986, as the depressed price levels of crude oil and narrowed refinery margins resulted in decreased earnings. However, in the 4th quarter of 1985 and the 1st quarter of 1986, the period during which the conspiracy allegedly operated, Exxon and Conoco earned more than they did in the next three quarters combined, when Transnor alleges that tax spinning subsided and crude oil prices recovered.

The parties agree that prices of refined products eventually fall when crude oil prices decline. [13] Defendants claim that they would not act to achieve short-term **[**25]** increases in earnings since any such gain would disappear

---

[9] Conoco claims that when its crude production and refinery runs are compared, it was a net seller of crude oil between January and June of 1986.

[10] Defendants contend that Colin Robinson, Transnor's expert witness, wrongly assumed that defendant companies bought lower-priced North Sea crude oil for their refineries in the open market during 1986. Exxon claims that from late 1985 through early 1986, the use of North Sea Crude Oil in Exxon refineries dramatically decreased, and the use of Saudi Arabian oil purchased on a netback basis increased. Moreover, Conoco did not use Brent Oil in its U.K. refinery.

[11] Transnor's expert Colin Robinson, Professor of Economics at the University of Surrey, England, opined that defendants' overall after-tax profits would be increased by a drop in crude-oil prices, based on his analysis of the effect of declining oil prices on a "typical" and "sophisticated" integrated producer/refiner of North Sea crude oil, employing data gathered from the trade journal Petroleum Intelligence Weekly. Robinson acknowledges, however, that his data do not reflect "the crude prices paid, the refinery netbacks achieved [nor] . . . the tax position of any one company." Robinson Decl. paras. 49-50. Defendants object to Robinson's results as imprecise and lacking probative value because he did not examine data produced in discovery relating to defendants' actual experiences.

[12] Transnor argues that Exxon's and Conoco's figures are misleading because they refer to "earnings" or "after tax operating income" rather than "profits." However, these terms are interchangeable, each referring to the excess, if any, of revenues over expenses. Transnor further faults Exxon's figures because they combine natural gas and petroleum earnings; Exxon attempts to justify this by asserting that the bulk of its natural gas production is dissolved in crude oil and it is unable to separate out the two for reporting purposes.

[13] Richard J. Kruizenga, Vice President-Corporate Planning for Exxon states that "competitive pressures are strong in the downstream and as a result product prices adjust to reflect changes in the price of crude oil." Kruizenga Aff. para. 5. A Conoco document prepared in connection with Conoco's 1986 proposed plan stated "the effect of lower crude oil prices is dependent

shortly as product prices adjusted to the lower prices of crude oil, ultimately leading to substantially lower overall earnings. Defendants further argue that even if they were net buyers of crude oil, they had no incentive to drive down the price of crude oil because earnings from upstream operations are the overriding determinant of overall earnings. [14] Defendants therefore maintain that they have a strong incentive to obtain higher prices on their sales of crude oil.

[26]** Transnor responds that huge profits stood to be made as long as product prices fell at a slower rate than crude oil prices. Transnor claims that defendants possessed sufficient market power to make product prices "sticky" during a period of price declines. [15] Therefore, defendants had the **[*1482]** economic incentive to lower the prices of crude oil in order to increase their profits in the refined market and their overall earnings.

[27]** In its surreply, Transnor argues that information and arguments relating to defendants' incentive to drive world oil prices down are irrelevant because defendants had an incentive to tax spin only on the Brent market and only between late 1985 and early 1986. However, the effect of low Brent prices on other oil prices is pertinent to an examination of defendants' economic incentives to engage in such a scheme. Transnor has acknowledged that "the Brent Market is one of the principal benchmarks of the world price of oil." Transnor's own expert stated that "integrated companies would not have embarked on a tax spinning strategy -- which they would have expected to reduce crude prices both in the Brent market and elsewhere -- had they not believed that, on balance, they would gain worldwide from that strategy." [16] Robinson Decl. para. 70.

Defendants' internal documents during the time period of the **[**28]** alleged conspiracy show no such expectation. For example, on October 31, 1985, Exxon's Corporate Planning Department informed Exxon's Management Committee that a $ 3 per barrel drop in crude oil prices during 1986-1988 would cause after-tax earnings from operations to decrease between $ 650 and $ 700 million per year. [17] Similarly, on February 25, 1986, Exxon's Management Committee was presented with a bar graph charting its outlook for 1986 which illustrated that net income would dramatically decrease if Brent prices continued to fall. On February 10, 1986, Colin Lee, Conoco's then President of Petroleum Operations predicted that "the impact of a 20% drop in crude prices to $ 20/BBL would reduce our After Tax Operating Income by $ 99 million or 21% from our 1986 Profit Objective." Lee Aff. para. 11. These documents directly contrast Transnor's claim that defendants desired lower crude prices.

However, defendants' arguments that they had no incentive to drive down the **[**29]** market price of Brent Oil, while superficially attractive, miss the real point. Plaintiff does not have to prove that defendants intended to drive

---

upon how quickly product margins reach a new equilibrium and whether the crude oil price decline precedes that of products or vice versa."

[14] Exxon states that between 1976 and 1988, its upstream earnings averaged $ 3.4 billion and downstream earnings averaged $ 1.1 billion. During that period, whenever lower crude oil prices depressed upstream earnings, increases in downstream earnings were never sufficient to compensate for the upstream decreases. In further support of their claims of implausibility, defendants point to their large reserves of oil and natural gas and argue that they could not benefit from a decline in its price.

[15] Transnor claims that a high degree of market power enabled integrated companies to keep refinery netbacks high while crude prices were falling. Robinson identifies eight firms, including four other than defendants and their alleged co-conspirator Mobil, as constituting an oligopoly in Western Europe because they accounted for 65% of total product sales in Western Europe in 1984 and 82% of refinery capacity in the British market in 1986. When defendants applied the Herfindahl-Hirshman Index ("HHI"), a measure of market concentration, to firms with Western European refineries, an index of 1028 resulted. Since an HHI range between 1000-1800 represents a moderately concentrated market, *see* U.S. Department of Justice Merger Guidelines at § 3.1, 4Trade Reg. Rep. (CCH) P13,103 at 20, 560 (1984), it is unlikely, although possible, that Western European refineries operated as an oligopoly. Robinson concedes that defendants lacked "enough market power to be able to keep refinery netbacks constant whilst crude [oil] prices were being cut." Robinson Decl. para. 44.

[16] Robinson also concedes that such gains could be recognized only if these companies could delay the decline of product prices in the other markets as well. Transnor has provided no evidence that defendants possessed sufficient market power to delay the decline of product prices worldwide.

[17] Although the document does not state whether this $ 3.00 per barrel decrease refers to oil prices generally or only Brent prices, it appears from subsequent documents that this figure refers to Brent prices.

down the market price of Brent Oil. It only has to establish that defendants conspired to rig prices in certain transactions for the purpose of understating their income and evading taxes, that this activity had the foreseeable effect of causing prices in general to decline, and that this decline caused economic injury to plaintiff. There was clearly an incentive to tax spin, and defendants do not dispute that there was. There is at least an issue of fact whether plaintiff was in the fall-out area of such activity. The Court therefore concludes that the scheme alleged is sufficiently plausible to avoid placing a higher burden on Transnor under *Matsushita*.

Antitrust Conspiracy

HN10[] Section 1 of the Sherman Act proscribes "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations . . ." 15 U.S.C. § 1. **HN11**[] A plaintiff must establish only two elements: 1) a conspiracy 2) that unreasonably restrains trade or affects interstate commerce. **[**30]** Belfiore v. New York Times Co., 826 F.2d 177 (2d Cir. 1987), *cert.* **[*1483]** *denied*, *484 U.S. 1067, 98 L. Ed. 2d 994, 108 S. Ct. 1030 (1988)*.

HN12[] Transnor must be able to prove that defendants had a "unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." International Distrib. Centers Inc. v. Walsh Trucking Co., 812 F.2d 786, 793 (2d Cir.), *cert. denied*, *482 U.S. 915, 96 L. Ed. 2d 676, 107 S. Ct. 3188 (1987)* (quoting American Tobacco v. United States, 328 U.S. 781, 810, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)). Transnor has submitted no direct evidence of a conspiracy, but proof of such an agreement may be established by circumstantial evidence which permits a rational inference that defendants conspired to rig prices in Brent Oil transactions. *See* Interstate Circuit, Inc. v. United States, 306 U.S. 208, 83 L. Ed. 610, 59 S. Ct. 467 (1939); *cf.* In re Plywood Antitrust Litigation, 655 F.2d 627, 633 (5th Cir. 1981), *cert. dismissed*, *462 U.S. 1125, 103 S. Ct. 3100, 77 L. Ed. 2d 1358 (1983)* ("solemnized covenants to conspire are difficult to come by . . .").

As previously discussed, **HN13**[] in determining whether such circumstantial evidence exists, a court must keep in mind the distinction between independent but parallel business actions [18] and a "conscious commitment to a common scheme designed to achieve an unlawful **[**31]** objective" which excludes the possibility of independent action. Monsanto Co., 465 U.S. at 768. Only the latter is prohibited by the antitrust laws. Conduct equally consistent with permissible business activity as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Matsushita, 475 U.S. at 588. According to the Second Circuit Court of Appeals:

> **HN14**[] a plaintiff must show the existence of additional circumstances, often referred to as 'plus' factors, which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy,

Apex Oil Co. v. Dimauro, 822 F.2d 246, 253-54 (2d Cir.), *cert. denied*, *484 U.S. 977, 98 L. Ed. 2d 487, 108 S. Ct. 489 (1987)*. These plus factors should not be considered in isolation; the important determination is whether the evidence viewed as a whole supports a reasonable inference of conspiracy. Id. at 254-55. Because each defendant had an independent incentive to engage in tax spinning in order to minimize the amount of tax paid on their crude oil under the U.K. tax system, [19] these "plus" factors assume extreme importance. This Court finds that the following factors, considered together, support **[**32]** a reasonable inference of conspiracy.

Circular and other Transactions

---

[18] Defendants argue that there was little "commonality of conduct" among them as each producer adopted different rules for tax spinning and engaged in spinning for different motives. Nonetheless, defendants' conduct shared important common features in that each defendant entered into significant numbers of matched buy/sell transactions for tax purposes.

[19] Transnor's own experts admit that it was not necessary for defendants to collude in order to benefit individually from tax spinning. Spuller Dep. at 290, 308, 337; Robinson Dep. at 174.

Between November 27, 1985 and February 4, 1986, defendants Exxon, BP, Shell, Conoco and alleged co-conspirator Mobil were parties to at least 16 circular sales [20] whereby the identical amount, grade and delivery date of oil was traded among them on the same day at the same price. Transnor argues that it is unlikely that independent business reasons caused these defendants to trade exactly the same quality, amount and grade of oil on the same day among themselves. Transnor argues that these transactions tend to exclude the possibility that the defendants were acting **[**33]** independently, especially considering that they occurred at identical prices when Brent prices can fluctuate over wide ranges in the course of a day.

These transactions are certainly unusual in that the only parties who entered into them were certain defendants and Mobil. Defendants argue that Transnor lacks any documentary records establishing prearrangement **[*1484]** and cannot rely solely on the fact that these transactions occurred. However, since all the parties acknowledge that many Brent transactions are arranged over the telephone, the absence of such records is not critical. In any event, the striking similarities among these transactions strongly supports an inference that there was some form of coordination among the parties thereto. The inference of coordination is strengthened by the fact that defendants Exxon and Conoco were able to enter into 87 and 69 buy/sells, respectively, at identical prices during a volatile period in the Brent market.

Disappearance of Evidence

"***HN15***[] The nonproduction of material evidence in the control **[**34]** of a party raises an inference that evidence is unfavorable to that party." *Tupman Thurlow Co. v. S.S. Cap Castillo, 490 F.2d 302, 308 (2d Cir. 1974)*; *see also* *INA Aviation Corp. v. United States, 468 F. Supp. 695 (E.D.N.Y. 1979)*, *aff'd*, *610 F.2d 806 (2d Cir. 1979)*. Transnor argues that Exxon's failure to produce the notebook of Diane Sharp, the Exxon trader responsible for the Conoco and Mobil accounts, covering the period from October 1985 to July 1986 presents an additional "plus" factor. A trader's notebooks generally contain a detailed chronological record of the trader's dealings. Sharp's notebook is clearly material as it involves the time period of the alleged conspiracy and likely contained information relating to the circular transactions with Conoco and Mobil. Pursuant to Transnor's document requests, Exxon produced all their traders' notebooks, except Sharp's notebook covering the aforementioned period. Sharp testified that the notebook existed and was in Exxon's control when she left Exxon's employ in July 1986, several months after Transnor served its document production request.

HN16[] An inference that the missing evidence is harmful can be rebutted by an adequate **[**35]** explanation of the reason for nonproduction. *Tupman Thurlow, 490 F.2d at 308*. Exxon claims that the notebook was inadvertently lost when Sharp left the company during a massive reduction in work-force. There is merit in defendants' argument that Transnor's failure to identify any evidence of collusion from Conoco's traders' notebooks or to attempt to obtain Mobil's traders' notebooks weakens the suspicion that Sharp's notebook might be a "smoking gun."

Therefore, considered alone, the absence of this notebook clearly could not support an inference of conspiracy. However, it is an additional element which must be considered as part of the whole. *See* *Apex, 822 F.2d at 254-55*.

Internal Documents

Transnor points to a number of internal documents which it believes contain evidence of a coordinated strategy among defendants to rig prices in the tax-spin transactions. A November 1, 1985 memorandum written by Exxon employee E.H. Gassenheimer discussed the tax-spinning strategies of Exxon, Conoco, Shell and BP. Transnor suggests this memorandum is based on information conveyed to Exxon by the other named companies rather than information gleaned from independent research or analysis. **[**36]** Examination of the memorandum, however, reveals statements such as "[Shell] is believed to be trading only one or two months ahead." Further, the

---

[20] Except for one four-way transaction, these transactions involved three parties and the original selling party ended up with exactly what it had sold.

memorandum explicitly states that it is based on "market information." If the memorandum were based on information conveyed by the alleged co-conspirators, it would not have been necessary for the author to speculate as to what the other producers were doing. Furthermore, the author's failure to mention the strategies of other integrated producers, a failure which Transnor deems suspicious, may logically be attributable to the author's view that the other producers were not engaged in tax spinning. [21]

Transnor next points to an Exxon "commercial telecon" dated November 11, 1985, which states in relevant part: "[Esso Petroleum Company] later reported that Shell have 44 BSM [Brent System] buy/sells in **[*1485]** place for Dec of which only 13 can be spins." Defendants respond that the number of buy/sells entered into in a given month was available from other **[**37]** market participants, such as brokers. Defendants also claim that it is obvious that only 13 Shell trades for a given month could have been spins because Shell was entitled to lift only 13 Brent equity cargoes a month. This telecon is therefore not strong evidence that the information was provided by Shell, since it could have been provided by other market participants as well.

Another Exxon "commercial telecon" dated January 21, 1986 states "1 equity cargo has been nom. out to BP. Next one will be 8th Feb cargo to Conoco. Signalled continue Feb spinning." The document does not indicate whether the individuals or entities signalled were, as Transnor contends, defendants BP and Conoco or Exxon's own traders. While this document provides support for the fact that defendants' engaged in tax-spinning transactions, which defendants do not dispute, standing alone it is too ambiguous to support an inference that defendants signalled to one another, and thereby conspired, to collude in tax spinning.

After careful consideration of the evidence presented, this Court finds that Transnor has sufficiently met its burden under *Matsushita* to survive defendants' summary judgment motion. The evidence **[**38]** submitted, when viewed as a whole, could permit the trier of the facts to draw a reasonable conclusion that the actions of the defendants were not independent but the product of a conspiracy to engage in joint conduct which had the foreseeable effect of lowering the price of Brent Oil.

Causation

HN17[] A plaintiff must prove that its business injury was caused by defendants' violation of the antitrust laws in order to recover damages under the Clayton Act. [22] *See Argus, Inc. v. Eastman Kodak Co., 801 F.2d 38, 41 (2d Cir. 1986)*, *cert. denied*, *479 U.S. 1088, 94 L. Ed. 2d 151, 107 S. Ct. 1295 (1987)*. Of course, "***HN18***[] mere conjecture or speculation by the party resisting summary judgment does not provide a basis upon which to deny [a summary judgment] motion." *Id. at 42* (quoting *Quarles v. General Motors Corp., 758 F.2d 839, 840 (2d Cir. 1985)*. Defendants argue that Transnor cannot establish a causal connection between its injury and the alleged antitrust violation. In order to avoid summary judgment, Transnor must be able to provide material facts to support its claim that the 1986 price decline was caused by defendants' tax spinning rather than by other causes.

[39]** The Court must first consider whether defendants actually traded at below-market prices. [23] This requires a basic understanding of the two major ways in which Brent cargoes were traded. [24] "Dated Brent" refers to cargoes

---

[21] Another Exxon document relied on by Transnor discusses the tax spinning strategies of Shell and BP, making statements such as "believe BP is selling equity; buying cheapest alternative."

[22] *Section 4* of the Clayton Act, *15 U.S.C. § 15 (1976)* provides that, "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . and shall recover threefold the damages by him sustained."

[23] Defendants maintain that "Transnor's case depends on its ability to prove as *fact* that defendants traded at below-market." Defendants' Reply Brief at 2. Since a violation of *section 1* of the Sherman Act occurs when there is even an unconsummated agreement in restraint of trade, *see American Tobacco Co. v. United States, 328 U.S. 781, 789, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*; *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 225 n. 59, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*, the Court will address the issue of causation in those terms.

which were sold for delivery at a specific date and "15-Day Brent" refers to cargoes which were sold for delivery during a specific forward month, on 15 days notice to the buyer of the date on which the cargo should be **[*1486]** lifted. Brent was sold for delivery both in the current month and for delivery up to five months in the future. In the Brent market, prices vary depending on the date the oil will be delivered and the market participants' expectations as to how future events will affect prices. Thus, dated and undated Brent contracts essentially involve two different markets. *See* Sas, "The Legal Aspects of the 15 Day Brent Market (Part I)," *5 Journal of Energy and Natural Resources Law* 109, 111 (1987) ("although dated and 15-day Brent involve the same commodity, the purposes and methods of trading each are sufficiently different to justify regarding them as two distinct (albeit interrelated) markets."). According to defendants, the 1986 decline in prices **[**40]** for forward Brent cargoes resulted from the expectation of participants in the Brent market that future Brent prices would decline.

[41]** Transnor defines "below-market prices" as (1) prices lower than those at which the Brent market was previously trading before defendants undercut it or (2) prices below the average price of non-defendants' trades for the same period. Plaintiff's Opposition Brief at 41. Defendants first respond that Transnor cannot support its claim that defendants' prices were below the average of non-defendants' trading prices. This is unclear. Colin Darracott, a former trader for the British National Oil Corporation, analyzed trading records for Transnor, and concluded that defendants traded Brent Oil at an average of 66 cents per barrel below the remainder of the market between November 25, 1985 and February 7, 1986. At first glance, this appears to support Transnor's theory of below-market prices. However, by comparing the range of prices which occur on any given trading day, Darracott's calculations fail to take into account that 1) the price of Brent Oil varies depending on the delivery month; 2) as prices declined, they were lower for more remote months than for near months; and 3) the volume of trading done near the beginning of the price decline and near the end differed. Thus, it is doubtful **[**42]** whether these calculations support a conclusion of below-market trading.

Darracott also compared average prices for defendants and non-defendants for a given day and delivery month and found that in the 127 direct comparisons, defendants' average prices were below non-defendants' average prices 57% percent of the time and equal to or above non-defendants' average prices 43% percent of the time. However, as defendants point out, this analysis fails to take into consideration the amount by which these averages differed or whether defendants' trades were within the range of those of non-defendants.

Defendants' expert Franklin Fisher, Professor of Economics at the Massachusetts Institute of Technology, compared trades to which defendants, and Mobil, were parties to trades where no defendant was a party and concluded that defendants did not engage in below-market trading. Only some of his conclusions will be summarized here. Like Darracott's second set of calculations, Fisher compared the transaction prices of defendants and nondefendants on a given day and delivery month. Between the period of November 26, 1985 and March 31, 1986, the period of the steepest price decline, defendants' **[**43]** average transaction prices averaged 1.2 cents below non-defendants' average transaction prices, a difference statistically indistinguishable from zero. [25] At the time, the average spread between the day's high and low prices for non-defendants was 35.7 cents per barrel. Of the 86 trading days in this period, there were twenty days in which defendants' average price was below the non-defendants' average price for all months traded for which comparisons were possible, and twenty-two days in which defendants' average prices were at or above non-defendants' prices for all months traded.

After careful review of the calculations presented by the parties, this Court concludes that there are simply no material facts showing that defendants' trades were **[*1487]** below the average prices of non-defendants' trades.

---

[24] The parties have agreed to enter into a stipulation as to the terms of Exxon's, Conoco's, SUKO's and SITCO's contracts for the purchase and sale of crude oil, and have agreed, where supported by documentary evidence, on the contract's date of entry, price, grade, and month of delivery. No agreement has yet been reached with respect to BP contracts. The prices, dates and delivery months of non-defendant transactions were derived from Petroleum Argus Ltd. ("Argus"), a London-based spot market crude oil reporting service which gathers its information directly from market participants, which the parties have agreed to stipulate are accurate.

[25] Transnor does not contradict this conclusion. When Fisher performed the same calculations using the same time period as Darracott's calculations, defendants were found to have traded an average of 0.96 cents *above* non-defendants.

However, Transnor explains the lack of statistical difference between defendants' and non-defendants' prices as demonstrating the devastating success of defendants' **[**44]** tax-spinning scheme, which so influenced the market that all trades were conducted at lower prices. Thus, Transnor essentially contends that "below-market prices" should be defined as prices below what the market prices would be in the absence of tax spinning. However, Transnor must still prove that defendants caused prices to fall; the mere fact that prices declined is obviously insufficient to support a conclusion that defendants caused the price decline.

Transnor asserts that defendants' volume of low-priced tax-spin transactions led other traders to assume there was a downward price trend and to decrease their prices accordingly, creating a downward price spiral. Transnor argues that other market participants, not knowing the reasons for the lower-priced transactions, [26] followed the lead of the major oil companies. As previously described, oil producers were either taxed at the price in an arms-length sale or, in the case of an interaffiliate transfer, upon the TRP -- the market average for the 30 days prior thereto. Defendants could save taxes by tax-spinning only when the tax-spin price was less than the TRP. Transnor claims defendants colluded to set prices for their **[**45]** tax spins below the TRP in order to achieve tax savings. Exxon trader Jay Wald confirmed that tax spinning was utilized only when the spin price was lower than the expected TRP. Defendants answer that although the tax-spin price was below the expected TRP when the market was in decline, it was not below the market price. Transnor responds that the tax-spin prices were not a response to a declining market, but its cause. This cause-effect conundrum is an issue for the jury to decide.

While Transnor does not present evidence that defendants traded at low prices earlier in the day to set off a chain reaction of lower prices, this does not, as defendants contend, invalidate Transnor's claim that defendants undercut the market. This Court fails to discern why defendants could not, for **[**46]** example, trade at low prices in the middle of the day with the result that those low trades would affect prices later in the same day or over the course of several days.

Defendants also argue that their reported trades did not influence the market. For example, with reference to the sixteen days on which defendants' low prices were below the low prices of non-defendants for all months traded, where comparisons are possible, prices declined on four of the days and increased on seven. On the day after each of the sixteen days, prices declined on seven days but not on the other nine. While these examples show no predictable corollation between defendants' low-priced trades and prices on the same or next day, this does not conclusively establish that other market participants were not affected by defendants' low-priced trades.

While defendants emphatically deny that their tax spinning caused prices to decline, the view that tax spinning contributed to lower prices was expressed in an internal Exxon document which stated that tax spinning "directionally effects downward pressure on market (especially forward months)." However, the document also stated that "crude surplus judged to be by **[**47]** far the major factor influencing current market drop." A report on an Oxford North Sea Study sponsored by, among others, Shell and Exxon, also contained a hypothesis that a higher volume of tax spinning has a downward price bias. On September 8, 1986, Argus stated, "the impetus to the fall in prices in the first quarter of this year was provided by vigorous tax spinning, as companies attempted to minimize their tax exposure." Transnor's **[*1488]** Supp. Exh. 3. Transnor thus provides documentary evidence that tax spinning was believed to depress prices.

Defendants argue that the Brent Oil price decline was instead caused by a worldwide oversupply of crude oil, attributable to the policies and actions of Saudi Arabia and OPEC. In 1983, OPEC agreed to oil production quotas and Saudi Arabia agreed to serve as the "swing producer" and adjust its production to absorb movements above and below the expected demand for OPEC's output. By September 1985, this agreement had failed and Saudi Arabia began to increase its output and to offer customers a "netback contract" whereby the crude oil price was determined by the spot price of the refined product less transport and processing cost and a profit margin **[**48]**

---

[26] Transnor provides evidence that other market participants were unaware of the extent of tax spinning. For example, Exxon trader Sharp testified that non-participants in the tax spin did not know whether a given transaction was a tax spin or not. This was confirmed by Morgan Stanley trader Nancy Kropp, who stated that she could not tell what percentage of Exxon's or Conoco's trades were tax spins.

for the buyer. In response, other OPEC countries also increased their output. At a meeting in December 1985, OPEC shifted its official policy from production quotas to increasing OPEC market share. Defendants argue that as oil from earlier netback sales arrived in markets, product prices decreased and led to reduced crude oil prices. The oversupply of OPEC crude also displaced Brent as a feedstock for European refineries, forcing Brent Oil producers to sell Brent Oil at lower prices in other markets. [27]

A material issue of fact whether supply exceeded consumption, is created by the view of Transnor's expert Robinson that world consumption **[**49]** exceeded supply in the first quarter of 1986 when the consumption of non-industrialized countries is taken into account. Furthermore, Robinson contends that by early January 1986, the market had adjusted to the impact of changes in Saudi policy and the OPEC meeting and even if the $ 5.00 per barrel decline in oil prices between late November 1985 and January 9, 1986 were attributed to OPEC and the Saudis, the further $ 15.00 per barrel drop is attributable only to tax spinning. [28] In a paper given at an energy seminar in September 1986, President of former defendant SITCO Sylvan Robinson, stated that "netback deals . . . have not created automatic downward pressures." Although his paper did not attribute the decline in Brent prices to tax spinning, it supports Transnor's theory to the extent that OPEC's actions did not cause the price declines in question.

[50]** From the evidence provided, there are material questions of fact whether tax spinning, OPEC actions or some combination of the two caused prices to decline on the Brent market. Of course, plaintiff must be able to segregate damages caused by defendants' illegal behavior from damages caused by other factors. *See e.g., Southern Pac. Com. Co. v. American Tel. & Tel. Co., 556 F. Supp. 825 (D.D.C. 1982)*, *aff'd*, *740 F.2d 980*, (D.C.Cir. 1984), *cert. denied*, *470 U.S. 1005, 105 S. Ct. 1359, 84 L. Ed. 2d 380 (1985)*. While defendants vigorously contend that Robinson's estimates as to the extent of the price decline caused by tax spinning is mere speculation, it is the jury's task, not the Court's, to weigh Robinson's theory that the market had already adjusted to OPEC's actions and that the price decline which forced Transnor's defaults was caused by tax spinning. These issues of material facts preclude summary judgment.

[*1489] APPLICABILITY OF THE CEA

Next, defendants challenge the Court's subject matter jurisdiction over the commodities claims, contending that the Brent transactions were "cash forward contracts" specifically exempted from the scope of the CEA. ***HN19***[] While *section 2(a)(1)* of the CEA provides **[**51]** the Commission with regulatory jurisdiction over "contracts of sale of a commodity for future delivery," [29] it further provides that the term future delivery "shall not include any sale of a cash commodity for deferred shipment or delivery." [30] **[**52]** This case presents the Court with a novel type of

---

[27] Defendants note that market analysts and commentators in late 1985 and early 1986 overwhelmingly attributed the price decline to OPEC. One piece of evidence which defendants provide is a January 1986 telex written by E. Roy Moor, a principal of Transnor, in which he stated that Transnor had "become increasingly concerned about the price distortions created in the crude oil markets by the impact of refined product netback related crude oil and in particular the effects of increased Saudi Arabia crude oil production/netback sales." Moor Exh. 81.

[28] in Robinson's deposition, taken before he submitted these calculations, he testified that he was "not sure" how to make these calculations and had seen no literature which explained the principles to apply. Robinson Dep. 258-59. Although Robinson claims that the market had fully adjusted to OPEC policy by January 1986, he also attributes a $ 2.00 per barrel price drop to reaction to a March 1986 OPEC meeting. Thus, it appears that, contrary to his earlier statements, Robinson claims that tax spinning accounted for a $ 13.00, not a $ 15.00, drop in price per barrel.

[29] "***HN20***[] Contracts of sale" is defined as "sales, agreements of sale, and agreements to sell." *7 U.S.C. § 2 (1976)*. "***HN21***[] Commodity" is broadly defined to include, among others, "all other goods and articles . . ., and all services, rights, and interests in which contracts for future delivery presently or in the future dealt in." *Id*. Defendants do not contest that the Brent transactions were contracts of sale of commodities as defined by *section 2(a)(1)* of the Act.

[30] ***HN22***[] Cash commodity contracts for deferred shipment or delivery are commonly known as "cash forward contracts," whereas contracts of sale of a commodity for future delivery are called "futures contracts." *See* H.R.Rep.No. 93-975, 93rd Cong., 2d Sess. 129-30 (1974).

transaction, which appears to be a hybrid of a futures contract and a forward contract. [31] Examination of the distinctions between the two, their purposes and the caselaw construing them, leads the Court to conclude that Transnor's 15-day Brent transactions are futures contracts within the meaning of the Act, and are therefore subject to the Commission's regulatory powers.

HN23[] Sales of cash commodities for deferred shipment or delivery generally have been recognized to be transactions in physical commodities in which delivery in fact occurs but is delayed or deferred for purposes of convenience or necessity. See *Commodity Futures Trading Comm. v. Co Petro Marketing Group, Inc., 680 F.2d 573 (9th Cir. 1982)*; *In re Stovall*, [1977-1980 Transfer Binder]Comm. Fut. L. Rep. (CCH) P20,941, 23,777 (CFTC 1979); *52 Fed. Reg. 47022* ("Regulation of Hybrid and Related Instruments: Advance Notice of Proposed Rulemaking") (CFTC, December 11, 1987). Forward contracts have thus been defined as transactions in which the commercial parties intend and can accommodate physical transfer of the actual commodity. *See Co Petro, 680 F.2d at 578-79*; *NRT Metals, Inc. v. Manhattan Metals (Non-Ferrous), Ltd., 576 F. Supp. 1046, 1050-51 (S.D.N.Y. 1983)*. By contrast, futures contracts are undertaken primarily **[**53]** to assume or shift price risk without transferring the underlying commodity. As a result, futures contracts providing for delivery may be satisfied either by delivery or offset. *See 54 Fed. Reg. 30694, 30695* ("Policy Statement Concerning Swap Transactions") (CFTC, July 21, 1989). Once distinguished by unique features, futures and forward contracts have begun to share certain characteristics due to increasingly complex and dynamic commercial realities. The predominant distinction between the two remains the intention of the parties and the overall effect of the transaction.

HN24[] The Commodity Futures Trading Commission ("CFTC") has recognized that commodity transactions between commercial participants in certain markets have evolved from privately negotiated contracts for deferred delivery of a physical commodity under which delivery generally occurs to transactions that have highly standardized terms and are frequently satisfied by payments based upon intervening market price changes. *See* Regulation of Hybrid and Related Instruments: Advance Notice of Proposed Rulemaking, *supra* at 47027. 15-day Brent is such a market. The 15-day Brent market involves sales or purchases of a **[**54]** cargo for delivery on an unspecified day of a given month. The actual delivery dates are determined at the seller's option, the buyer being entitled to clear notice of a three-day loading range. 15-day Brent sales are therefore highly specialized forward sales which start out **[*1490]** "dry" [32] but ultimately become "wet," [33] subject to liquidation of the contract. *See* The Legal Aspects of the 15-Day Brent Market, *supra*, at 110. Because the contracts do not provide for offset without the consent of the parties and because the sellers cannot predict in advance whether a particular buyer will insist on physical delivery, the market remains one based on physical trading. *Id. at 116*. Yet, because 15-day Brent oil can be sold without physical cover initially, participants can take long or short positions in the market for purposes of hedging and speculation, explaining the high ratio between barrels traded and barrels delivered. The three major motivations in Brent market activity, hedging, speculation and tax spinning, *id*.; R. Bacon, The Brent Market: An Analysis of Recent Developments, WPM8, Oxford Institute for Energy Studies (1986), have led at least one commentator to describe **[**55]** the market as an "unregulated and unguaranteed form of futures trading." The Legal Aspects of the 15-Day Brent Market, *supra*, at 117 (quoting International Petroleum Exchange of London: "Brent Crude Oil, Trading of Brent Crude. Notes for Discussion," February 26, 1986). The 15-day Brent Market has thus assumed aspects of the futures market while retaining elements of the forward contract.

Forward Contracts

---

[31] The Commission intends to adopt regulations concerning the scope of the forward contract's jurisdictional exclusion in a future release. *54 Fed. Reg. 1128, 1130 n. 14* ("Proposed Rules Concerning Regulation of Hybrid Instruments") (CFTC January 11, 1989).

[32] A "dry" or "paper" deal refers to the purchase or sale of a claim on a cargo of Brent in some future month.

[33] A "wet" deal refers to a physical transaction in which a specific cargo actually changes hands.

The legislative history of the forward contract exclusion, fully set forth by the Ninth Circuit Court in [Commodity Futures Trading Comm. v. Co Petro Marketing Group, Inc., 680 F.2d 573 (9th Cir. 1982)](), reveals its narrow purpose: to facilitate commodities transactions within the commercial supply chain. Policy Statement Concerning Swap Transactions, *supra*, at 30695. The exemption originated in the 1921 Act to meet the particular need of a farmer to sell part of next season's harvest at a set price to a grain elevator or miller. *See* S. Rep. No. **[**56]** 212, 67th Cong. 1st Sess. 1 (1921), H.R. Rep. No. 345, 67th Cong. 1st Sess. 7 (1921). The exemption was predicated upon the contemplation of actual, albeit future, delivery of the underlying commodity. [34] *Co Petro, 680 F.2d at 578*; *NRT Metals, Inc. v. Manhattan Metals (Non-Ferrous), Ltd., 576 F. Supp. 1046 1050 (S.D.N.Y. 1983)*. The more recent 1974 version of the Act has left unchanged the exemption's limited scope, confirming the view that a forward contract is one in which the parties contemplate the future transfer of the commodity. *See* *Co Petro, 680 F.2d at 578* (citing H.R. Rep. No. 975, 93rd Cong. 2d Sess. 129-30 (1974)); *NRT Metals, 576 F. Supp. at 1050*. [35] "Nothing in the legislative history surrounding . . . [the exemption] suggests that Congress intended to encompass agreements for the future delivery of commodities sold . . . for . . . speculative purposes." *Co Petro, 680 F.2d at 579*. The *Co Petro* Court summed up that,

> ***HN25***[] this exclusion is unavailable to contracts for sale for commodities which are sold **[*1491]** merely for speculative purposes and which are not predicated upon the expectation that delivery of the actual commodity by the seller to **[**57]** the original contracting buyer will occur in the future.

Id.; see *NRT Metals, 576 F. Supp. at 1051*.

HN26[]

[58]** In determining whether a particular transaction is exempt from the Act's jurisdiction as a forward contract, the Courts and the CFTC have required that the contract's terms and the parties' practice under the contract make certain that both parties to the contract deal in and contemplate future delivery of the commodity. *See* *Co Petro, 680 F.2d at 578*; *50 Fed. Reg. 39656, 39657-58* ("Characteristics Distinguishing Cash and Forward Contracts and 'Trade' Options") (CFTC, September 30, 1985).

In *Co Petro*, the relevant agency agreements in gasoline obligated Co Petro to perform an offsetting service for its customers which would satisfy their contractual duties without delivery. Co Petro customers could also liquidate their positions in the face of adverse price fluctuations through a cash settlement by cancelling their contracts and paying only the liquidated damages provided for in the agreements. The Ninth Circuit Court likened Co Petro's customers to those customers who trade on organized futures markets because they could deal in commodities futures without the forced burden of actual delivery, *Co Petro, 680 F.2d at 570, 580*, and accordingly held that "the contracts here **[**59]** represent speculative ventures in commodities which were marketed to those for whom delivery was not an expectation." *Id. at 581*.

---

[34] During the hearings prior to enactment of the CEA's predecessor, the Futures Trading Act, which sought to bring federal control to futures trading, witnesses expressed concern that there were a variety of legitimate off-exchange commercial transactions, such as cash grain contracts between farmers and grain elevator operators for the future delivery of grain, in which delivery of the commodity was delayed. Then-Secretary of Agriculture Henry Wallace urged preservation of the right to buy or sell next season's crop which had not yet been planted or harvested but which would exist at the delayed delivery date. 1921 Senate Hearings at 462. Senator Capper, the sponsor of the Senate version of the bill, also stated that the bill dealt only with transactions in which the transfer of actual grain was not contemplated and that the entire business of sales or purchases of actual grain, either for present or future delivery, is expressly excluded from coverage. 61 Cong. Rec. 4762, 67th Cong., 1st Sess. (Aug. 9, 1921); *Co Petro, 680 F.2d at 578*.

[35] A House Report on the recent amendments focused on the "inherent value" of the commodity to the buyer because of the nature of his business in reselling, distributing, manufacturing or otherwise dealing with the underlying commodity. *See* *Co Petro, 680 F.2d at 578*.

In *Commodity Futures Trading Comm. v. Comercial Petrolera Internacional S.A*., [1980-82 Transfer Binder]Comm. Fut. L. Rep. (CCH) P21,222 at 25,088 (S.D.N.Y. 1981), Judge Knapp similarly held that the relevant oil contracts were intended as "investment vehicles" in which the parties had never anticipated delivery. *Id*. at 25,098. The court's reasoning emphasized the language in the contracts that obligated the buyers to "purchase a specified amount of oil at a fixed price *or* to notify the dealer to sell the oil at the going price on or before a specified future date." *Id*. at 25,092-93.

In *Habas v. American Board of Trade*, [1986-87 Transfer Binder]Comm. Fut. L. Rep. (CCH) P23,500 at 33,320 (CFTC 1987), the Judgment Officer, viewing the transactions as a whole to be futures contracts, noted that "the company's literature implies the opportunity to offset and the company permits entering into an opposite offsetting transaction prior to the maturity of the contract, both of which are characteristic of a futures contract." The **[**60]** Judgment Officer further considered the transactions' standardized terms as a means of facilitating offsetting transactions. *Id*. at 33,321.

In determining whether the parties to copper contracts intended delivery of the commodity, Judge Carter in *NRT Metals, Inc. v. Manhattan Metals (Non-Ferrous), Ltd., 576 F. Supp. 1046, 1050 (S.D.N.Y. 1983)*, focused on whether the parties maintained facilities to accomodate physical delivery of the 500 metric tons of copper and whether the parties simultaneously bought and sold copper futures contracts. The district court concluded that both factors contraindicated any intention of actual delivery. *Id. at 1051*.

In the present case, defendants have acknowledged the tax advantages of trading in 15-day Brent and do not dispute that during the relevant period, 15-day Brent oil contracts were routinely settled by means other than delivery, most typically through the clearing techniques of offset and bookout. However, defendants maintain that because the contracts lack a contractual right to avoid delivery, they are predicated upon actual delivery of the oil and thus constitute forward contracts within the Act's definition. The Court disagrees. **[**61]** The high levels of speculation and performance without delivery, as well as the relatively standardized contracts, distinguish the 15-day Brent transactions from the forward contracts contemplated by the drafters of the Act.

The Court acknowledges that 15-day Brent contracts may represent binding commitments to buy or sell physical oil. The real question, however, is whether the **[*1492]** transactions are more like bargains for the purchase and sale of crude oil than speculative transactions tacitly expected to end by means other than delivery. The Ninth Circuit Court's "forced burden of delivery" language in *Co Petro* does not mandate forward contract classification of those contracts imposing a forced burden which is not expected to be enforced. The Ninth Circuit Court held only that the *absence* of a forced burden of delivery is indicative of the speculative nature of futures contracts. That court did not have before it contracts imposing a forced burden of delivery, and thus did not rule on the effect of the *presence* of such a burden. Accordingly, this Court need not disagree with or deviate from *Co Petro*, but merely considers as relevant whether the contracts provide for an opportunity **[**62]** to avoid delivery. This is consistent with the reasoning of the *Habas* court, which speaks in terms of "opportunity to offset." This Court concludes that ***HN27***[] even where there is no "right" of offset, the "opportunity" to offset and a tacit expectation and common practice of offsetting suffices to deem the transaction a futures contract.

Defendants admit that the incentive to spin and respin was to ensure that taxes were paid on the basis of a more favorable market price. Defendants' 328 tax spin transactions reveal that the underlying purpose was not to transfer physical supplies of oil. Defendants' expert, Donald Miller, states in his Affidavit that,

> Many participants in the Brent Market have no intention of taking delivery of oil either to store or refine it and others who sell Brent do not produce it.

Miller Aff. para. 16. Indeed, "only a minority of transactions in the Brent market result in delivery." *Securities and Investments Board, Consultative Document on the Future Regulation of the Oil Markets* at 2 (February 1988). The customary use of offsetting and booking out strongly suggests that physical delivery was not contemplated by the parties.

Moreover, the high degree **[**63]** of standardization of terms such as quantity, grade, delivery terms, currency of payment and unit of measure, which facilitate offset, bookout and other clearing techniques available on the Brent market, further evidence the investment purpose of Brent trading. The 15-day Brent market does not remotely resemble the commercial trading originally excepted from the Act. While this Court recognizes that commercial transactions have increased in complexity since the predecessor to the CEA was enacted, the interests of Brent participants, which include investment and brokerage houses, do not parallel those of the farmer who sold grain or the elevator operator who bought it for deferred delivery, so that each could benefit from a guaranteed price. [36]

While there is no contractual entitlement to satisfy Brent obligations by means other than delivery, the likelihood **[**64]** of avoiding delivery has enabled participants to develop what is essentially a "paper" market for speculative or hedging purposes rather than one for physical transfer. The Court therefore concludes that the 15-day Brent transactions do not constitute forward contracts excepted from the CEA.

Futures Contracts

After deciding that the relevant contracts were not forward contracts, the *Co Petro* court considered whether the contracts constituted futures contracts. In making that determination, the court found that,

> no bright line definition or list of characterizing elements is determinative. The transaction must be viewed as a whole with a critical eye toward its underlying purpose.

Co Petro, 680 F.2d at 581. The Ninth Circuit Court then held that, due to their speculative nature, the contracts at issue were "contracts for sale of a commodity for future delivery." In a recent policy **[*1493]** statement, the Commodity Futures Trading Commission affirmed and amplified *Co Petro's* holding by declaring,

> In determining whether a transaction constitutes a futures contract, the Commission and the courts have assessed the transaction "as a whole with a critical eye toward its underlying **[**65]** purpose" [citing *Co Petro*]. Such an assessment entails a review of the "overall effect" of the transaction as well as a determination as to "what the parties intended." Although there is no definitive list of the elements of futures contracts, the CFTC and the courts recognize certain elements as common to such contracts. Futures contracts are contracts for the purchase or sale of a commodity for delivery in the future at a price that is established when the contract is initiated, with both parties to the transaction obligated to fulfill the contract at the specified price. In addition, futures contracts are undertaken principally to assume or shift price risk without transferring the underlying commodity. As a result, futures contracts providing for delivery may be satisfied either by delivery or offset. The Commission has explained that this does not mean that all commodity futures contracts must have these elements [citation omitted]. To hold otherwise would permit ready evasion of the CEA.

Policy Statement Concerning Swap Transactions, *supra*, at 30694-95. [37] Therefore, there is no exhaustive check-list by which a contract can be measured. Addressing the essentials of **[**66]** the futures contract, the Court is convinced that the 15-day Brent transactions satisfy the criteria.

Transnor's contracts for 15-day Brent, a commodity within the CEA's meaning, were dated December 1985 and called for March 1986 delivery, indicating that sales of 15-day Brent could occur several months ahead of the specified loading month. Transnor's Brent contracts established a price for a standardized volume when the contract was initiated in December 1985, despite the +/- 5% volume tolerance, and both parties to the contracts were obligated to fulfill the contract at the specified price. Most importantly, the Brent contracts were undertaken

---

[36] Nor will finding the 15-day Brent transactions to constitute futures contracts effectively eliminate the CEA's forward contract exception. The intentions of the parties still govern and the opportunity to satisfy a contract through means other than delivery is alone insufficient to categorize the nature of the transaction.

[37] The Commission outlines additional elements characteristic of exchange-traded futures contracts, the "presence or absence [of which] is not dispositive of whether a transaction is a futures contract." Policy Statement Concerning Swap Transactions, *supra*, at 30694-95. Accordingly, defendants' claim that the absence of certain of these elements dooms Transnor's off-exchange contracts is spurious at best.

mainly to assume or shift price risk without transferring the underlying commodity. Defendants acknowledge that the volume of Brent **[**67]** contract trading greatly exceeded the amount of physical oil available to satisfy such contracts. The volume of contracts traded and the high standardization of the contracts demonstrate the essential investment character of the 15-day Brent market. "With an eye toward [their] underlying purpose," the Court concludes that Transnor's 15-day Brent transactions constitute futures contracts.

SUFFICIENCY OF TRANSNOR'S CLAIM UNDER THE CEA

Defendants next argue that Transnor cannot state a claim under ***HN28***[] the anti-manipulation provisions of the CEA *§§ 9(b)* and 4(c) which require proof of each of the following four elements: (1) manipulative conduct; (2) a specific intent to create an artificial price which is not determined by the forces of supply and demand; (3) a causal relationship between the manipulative conduct and a change in market prices; and (4) an artificial price. *Cargill, Inc. v. Hardin, 452 F.2d 1154, 1162-63 (8th Cir. 1971)*, *cert. denied*, *406 U.S. 932, 92 S. Ct. 1770, 32 L. Ed. 2d 135 (1972)*; *In re Cox*, [1986-87 Transfer Binder]Comm. Fut. L. Rep. (CCH) P23,786, at 34,061 (CFTC July 15, 1987); T. Russo, *Regulation of the Commodity Futures and Options Markets*, § 12.11 at 12-18 (1983). **[**68]** Because Transnor has raised issues of material fact, not properly decided on this motion, summary judgment is denied.

Manipulative Conduct

Transnor's central allegation concerning manipulative conduct is that defendants' **[*1494]** tax-spinning transactions constituted prohibited "wash sales" entered into for the purpose of artificially depressing the price of oil. ***HN29***[] Wash trading, not defined in the Act itself, is the practice of entering into or purporting to enter into transactions for the purpose of giving the appearance that trades are being or have been made but without having actually taken a market position. *See* 80 Cong. Rec. 7858 (May 25, 1936); *accord* Admin. D. 200 (May 25, 1966). The existence of a wash result -- the purchase and sale of the same futures contract at a similar price -- is an insufficient showing to establish a wash sale in violation of § 4c(a) of the CEA. *See In re Collins*, ("Collins III") [1986-87 Transfer Binder]Comm. Fut. L. Rep. (CCH) P23,401 at 33,077 (CFTC Nov. 26, 1986). Prohibited wash sales are proved only if it is demonstrated that the trader "knowingly participated in transactions initiated with intent to avoid a *bona fide* market position." **[**69]** *Id.; Stoller v. Commodity Futures Trading Comm., 834 F.2d 262, 265 (2d Cir. 1987)*; *In re Goldwurm*, 7 Agric.Dec. 265, 274 (1948) ("The essential and identifying characteristic of a 'wash sale' seems to be the intent not to make a genuine, bona fide trading transaction . . ."). In *Stoller*, the Second Circuit Court acknowledged that prior rulings on wash sales had concerned transactions that were "virtually riskfree, often prearranged, and intentionally designed to mislead, or to serve other illicit purposes." *Stoller, 834 F.2d at 266* (citations omitted). Whether a transaction constitutes a wash sale "inevitably turns on the particular facts and circumstances of individual cases and not on any absolute formula." *Collins III*, at 33,077.

Defendants argue that because the 15-day Brent Market involves binding commitments to take or make delivery of physical oil, the fact that a tax spin leaves a company in a net unchanged position as to price spreads does not mean that it has avoided a *bona fide* market position. Defendants claim that, to the contrary, a company completing a spin has assumed the risks of non-performance by its seller and buyer as well as the credit **[**70]** risks of both counterparties, unlike an offsetting transaction on a exchange-traded futures market where participants look directly to the central clearing house for performance of contractual obligations. Defendants claim that these non-market risks distinguish this case from *In re Goldwurm*, 7 Agric.Dec. 265 (1948), and *In re Siegel Trading Co.*, [1977-80 Transfer Binder]Comm. Fut. L. Rep. (CCH) P20,452 at 21,827 (CFTC July 26, 1977), which ruled that trades intended as tax avoidance mechanisms are "artificial as far as futures trading is concerned. . . . [and] fictitious from the standpoint of reality and substance." *In re Siegel*, at 21,844. Transnor maintains that it is market risk, not credit or performance risk, that makes commodities transactions "*bona fide* market positions," citing *In re Gimbel*, [1988]Comm. Fut. L. Rep. (CCH) P24,213; *1988 CFTC LEXIS 204* (CFTC April 14, 1988), *aff'd*, *872 F.2d 196 (7th*

Cir. 1989), and *Campbell v. Shearson American Express, Inc*., [1985-86 Transfer Binder]Fed. Sec. L. Rep. (CCH) P92,303 at 92,047, 92,050 n. 5 (E.D.Mich. Aug. 9, 1985), *aff'd*, *829 F.2d 38 (6th Cir. 1987)*. [38]

[71]** While In re Gimbel, 1988 CFTC LEXIS 204, at 4, n. 7, states that "to be ficticious within the meaning of Section 4c(a)(A), . . . it is sufficient if the transaction is structured to negate price competition or market risk," the Commission did not consider credit or performance risk because the clearing house guaranteed the contractual obligations. Neither the Commission nor any court has considered risks other than price competition or market risk in determining whether a party "negated risk" because hybrid transactions such as those at bar have not until now been deemed futures contracts. Nonetheless, the purpose of the prohibition, to prevent cheating and fraudulent practices "employed to give a false appearance of trading and to cause prices to be registered which are not true prices," 80 Cong. Rec. 7858 (May 25, 1936 **[*1495]** (comments of bill's sponsor, Senator Pope), is served by prohibiting transactions that negate market risk. [39] As stated by the Commission in *In re Collins*, ("Collins II") [1986-87 Transfer Binder]Comm. Fut. L. Rep. (CCH) P22,982 at 31,896 (CFTC April 4, 1986), "the common denominator of the specific abuses in Section 4c(a) -- [including] wash sales **[**72]** . . . -- and the central characteristic of the general category of fictitious sales, is the use of trading techniques that give the appearance of submitting trades to the open market while negating the risk or price competition incident to such a market."

Transnor asserts that defendants' 16 circular transactions in which the identical amount, grade and delivery date of the oil was traded among the defendants and Mobil on the same day at the same price, as well as defendants' 328 buy/sell transactions with one other party, at identical prices during an erratic Brent Market period, negated market risk. Because defendants do not dispute that these transactions left the companies "in a net unchanged position as to price spreads," this Court concludes that defendants' tax spins feigned a non-existent market position and potentially misled other Brent Market traders, despite any non-market risks incurred. To hold otherwise would **[**73]** defeat the purpose of the CEA's clear prohibition. [40]

Specific Intent

Defendants next claim that Transnor cannot establish the required intention to induce an artificial price because the transactions were **[**74]** entered into for legitimate commercial or investment purposes, citing *In re Indiana Farm Bureau Coop. Ass'n*, [1982-84 Transfer Binder]Comm. Fut. L. Rep. (CCH) P21,796 at 27,279 (CFTC Dec. 17, 1982). *See* Russo, *supra* at § 12.19. Defendants maintain that tax-spinning transactions were routine commercial transactions entered into for permissible purposes, including tax certainty. Transnor first refutes the relevance of

---

[38] *Campbell's* footnote does nothing more than explain the distinction between two risks in a completely unrelated 10(b)(5) securities claim.

[39] Moreover, ***HN30***[] section 4c(a)(A)'s broad prohibition of any transaction ". . . of the character of, or commonly known to the trade as, a 'wash sale,'" suggests that negating market risk sufficiently eliminates any significant risk to fall within the prohibition.

[40] Transnor also claims that defendants paired buy/sell transactions were prearranged. ***HN31***[] While prearrangement is not a necessary element for finding a wash sale violation, it is one method used to avoid a *bona fide* market position. *See Collins II*, at 31,897. Because it is improbable that a pattern of matched orders or wash results represents the true interplay of market forces, the existence of such a pattern may "raise an inference that the results were intentionally achieved by means of prearrangement." *Id*. Defendants' matched transactions during the relevant period raise an inference of prearrangement, negating price competition, and would be grounds for denial of summary judgment even if the transactions were not deemed wash sales.

Transnor also argues that defendants engaged in manipulative conduct by trading at artificially low prices. This contention, analyzed earlier in connection with Transnor's antitrust claims, need not be further discussed here.

any legitimate purpose to a determination of manipulation and alternatively asserts that defendants' activities, constituting tax fraud, further evidence wash sales. [41]

HN32[] Where a trader acts with a legitimate investment or commercial purpose, no manipulative intent can be found. Stoller, 834 F.2d at 266 (citing with approval the distinction between legitimate market purpose and manipulative intent drawn in **[**75]** *In re Collins*, ("Collins I") [1977-80 Transfer Binder]Comm. Fut. L. Rep. (CCH) P20,908 at 23,687 (CFTC Aug. 16, 1979); Russo, *supra* § 12.19 at 12-34. The "legitimate market purpose" test for conduct alleged to constitute wash sales is intended to avoid charging a knowing violation and causing undue prejudice to a litigant who may have relied on an agency's prior interpretation or policy. *See* Stoller, at 265-266. A second purpose of the test recognizes that a trader is entitled to act in his best interest so long as he does not act with manipulative intent. *See In re Indiana Bureau Coop. Ass'n*., [1982-84 **[*1496]** Transfer Binder]Comm. Fut. L. Rep. (CCH) P21,767 at 27,279 (CFTC Dec. 17, 1982). [42]

[76]** In *Stoller*, the court reversed the Commission's ruling of liability because, in its view, the public was not apprised that the Commission considered the practice of "roll forward" trading to be encompassed within the wash-sale prohibition of the Act. The Second Circuit Court accepted defendant's claim that the transactions at issue were "*designed to fulfill a purpose generally considered legitimate in the industry*" and declined to hold the public accountable under the Commission's construction of the statute without appropriate notice. Stoller, 834 F.2d at 266-67 (emphasis added). [43]

In the case at bar, the alleged legitimate market purpose is tax certainty. However, it is obvious that the incentive behind tax spinning was the achievement not merely of a more certain tax but of a lower **[**77]** tax. Defendants claim that OTO's subsequent sanction of the transactions as legitimate distinguish their activities from the proscribed tax structurings in *Goldwurm* and *In re Siegel*. Transnor maintains that the *Goldwurm* and *In re Siegel* rulings fairly apprised defendants that achieving tax advantages by engaging in offsetting transactions at artificial prices is within the prohibition of "wash sales" and, moreover, that at the time of the tax spins, defendants did not act to "fulfill a purpose generally considered legitimate in the industry," making irrelevant that the U.K. subsequently condoned their conduct. [44]

Clearly, *Goldwurm* and *In re Siegel* gave public notice that illicit tax maneuverings are prohibited under the Act. The more difficult question is whether the U.K.'s subsequent approval of the transactions retroactively renders the purpose of the transactions legitimate. This Court believes that it does not. More appropriate to a determination of legitimate market purpose than subsequently **[**78]** adjudicated legality is whether the transaction was "designed to fulfill a purpose generally considered legitimate in the industry." Stoller, 834 F.2d at 266. Although defendants offer testimony that U.K. tax law as it existed prior to March 1987 permitted integrated oil companies to sell and buy back future cargoes to establish the lowest price for tax purposes, Transnor has refuted that "portfolio pricing" in particular was generally considered legitimate in the industry, citing the deposition testimony of Exxon chief-of-

---

[41] This Court rejects Transnor's proposition that *Stoller* recognizes that an illicit purpose indicates the existence of a wash sale. A clear reading reveals that the Second Circuit Court merely stated that wash sales had in the past been found in transactions motivated by illicit purposes, not that illegal motives mandate a finding of wash sales.

[42] The Court rejects Transnor's argument that *In re Gimbel*, para. 24,313 at 35,003 n. 5, mandates abandonment of the legitimate market purpose test. That the Commission "remains of the view" that commercial motivations underlying transactions are not relevant, neither binds nor persuades this Court in light of the Second Circuit Court's ruling in Stoller, 834 F.2d at 266, which is also cited in the footnote. *Stoller* recognized that the statutory language permits the Commission to define its meaning although it may hold the public accountable only upon proper notification.

[43] *Stoller* overrules a prior CFTC ruling, *Collins II*, at 31,896, that there is "no basis in the statutory language of Section 4c(a) or the legislative history to imply an exception so that otherwise prohibited trading techniques, such as wash sales, would become acceptable when used for an alleged 'legitimate market purpose.'" *See* In re Gimbel, 1988 CFTC LEXIS 204, at 3, n. 6.

[44] Transnor's argument that OTO would never have accepted defendants' transactions had it been apprised of the true facts is beyond the scope of this inquiry.

trading Morey Lorenz, Exxon trader Diane Sharp, Conoco trader Player Edwards, Morgan Stanley trader Nancy Kropp, and defendants' expert witness Donald Miller. Transnor also offers the testimony of its U.K. tax expert James Bentley that defendants trading constituted attempted tax fraud. Because there remains a question of material fact as to whether defendants' transacted with a legitimate market purpose in mind, summary judgment is denied.

Causal Relationship

Defendants assert that the tax spinning transactions were not responsible for the decline in oil prices thereby defeating Transnor's manipulation claim for lack of causation. Defendants submit testimony **[**79]** that the drop in oil prices resulted from the actions of OPEC, particularly its decision to compete for market share. However, ***HN33***[] where "multiple causes of an artificial **[*1497]** price . . . can be sorted out, and [defendants] are a 'proximate' cause of the artificial price, a charge of manipulation can be sustained." *In re Cox*, at 34,066. As discussed earlier, Transnor presents a question of fact as to causation.

Artificial Price

Finally, defendants contend that their conduct did not result in the creation of an artificial price, a requisite to Transnor's CEA manipulation claim. Transnor contends otherwise. This issue of material fact precludes summary judgment.

CONCLUSION

For the reasons outlined above, defendants' motion for summary judgment is denied.

SO ORDERED.

HN1[] **Summary Judgment, Opposing Materials**

On an appeal from a summary judgment, a court reviews the record de novo to determine whether there are genuine issues of material fact. *Fed. R. Civ. P. 56(c)*. The court assesses the record in the light most favorable to the non-movant and draws all reasonable inferences in its favor. The non-movant, however, who must sustain the ultimate burden of proof, must demonstrate in opposing a summary judgment motion that there is some evidence which would create a genuine issue of material fact. Conclusory allegations will not suffice to create a genuine issue. There must be more than a scintilla of evidence, and more than some metaphysical doubt as to the material facts.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] **Monopolies & Monopolization, Actual Monopolization**

To establish the offense of monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must demonstrate (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The fact that profit maximization is a goal of a monopolist's policy provides support for an argument that the policy is a legitimate practice, but does not shield the policy from judicial scrutiny. A monopolist cannot escape liability for conduct that is otherwise actionable simply because that conduct also provides short-term profits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

Denial of an essential facility and, by implication, a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, relies on a four-factor test: 1) Control of the essential facility by a monopolist; (2) A competitor's inability practically or reasonably to duplicate the essential facility; (3) The denial of the use of the facility to a competitor; and (4) The feasibility of providing the facility.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The third element in determining whether an essential facility had been denied, the denying of the use of the facility to a competitor, does not require an outright refusal to deal in order to find that denial of an essential facility occurred. It is sufficient if the terms of the offer to deal are unreasonable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN6[] **Attempts to Monopolize, Sherman Act**

To make out a successful claim of attempted monopolization under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, a plaintiff must demonstrate: (1) anti-competitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power.

Opinion by: TIMBERS

Opinion

[*176] TIMBERS, Circuit Judge:

Appellant Delaware & Hudson Railway Co. ("D & H") appeals from a summary judgment entered November 20, 1989 in the Northern District of New York, Neal P. McCurn, *Chief Judge*, in favor of appellant Consolidated Rail Corp. ("Conrail") in this antitrust action. *724 F. Supp. 1073 (N.D.N.Y. 1989)*. **[**2]**

The district court found that D & H failed to raise a genuine issue of material fact with respect to any of its three claims, viz. monopolization, denial of an "essential facility" and attempted monopolization. On appeal, D & H asserts as error the district court's rejection of each of these three claims. It asserts that the court misconstrued the applicable law and, contrary to the approved practice at the summary judgment stage, failed to draw proper factual inferences in its favor.

After careful consideration, we hold that D & H's contentions are meritorious. For the reasons which follow, we vacate the judgment of the district court and remand the action.

I.

We summarize only those facts and prior proceedings believed necessary to an understanding of the issues raised on appeal.

A brief overview of recent developments in the freight railroad industry may help to place this dispute in context. Conrail was organized in the early 1970's in an effort to preserve the viability of freight transportation by rail in the northeastern and midwestern United States. *Regional Rail Reorganization Act Cases, 419 U.S. 102, 108-09, 42 L. Ed. 2d 320, 95 S. Ct. 335 (1974)*. **[**3]** Several large railroads, including the giant Penn Central, had become insolvent. Congress saw as the solution a single system run on a for-profit basis. *Id.* Subsequently, Conrail absorbed still more insolvent railroads.

D & H is a much older and smaller system than Conrail. It controlled about 1,700 miles of track at its peak, while Conrail controls about 17,000. Conrail does not challenge the fact that, as a result of the disparity, D & H is forced to rely on Conrail's system in order to compete. In the market involved on this appeal -- shipment of newsprint from eastern Canada to locations in the mid-Atlantic states of this Country -- only Conrail can provide transport from start to finish in most instances.

An example used by the district court and by both parties in their briefs may illustrate the parties' relationship: A newsprint shipper seeks to have newsprint delivered from a point in Quebec, Canada, to Lancaster, Pa. There are two relevant options. One option would entail delivery via a Canadian railroad to Conrail's border facility. Conrail then would carry the cargo on its tracks for the entire journey. Under the other option, after receiving the cargo at its border **[**4]** facility, D & H would carry the cargo on its tracks only as far as **[*177]** Harrisburg, Pa. From there, it would have to complete the journey on Conrail's tracks.

Most of D & H's newsprint shipments therefore require the cooperation of Conrail. That cooperation takes the form of "joint rates". A joint rate is a cooperative rate -- less than the sum of the separate rates of the individual railroads -- charged to the shipper when the shipment requires the use of the tracks of two or more railroads. Each railroad's share of the rate usually is in proportion to the percentage of miles traveled on that railroad's tracks.

Until 1980, the Interstate Commerce Commission required cooperation in the setting of joint rates. In that year Congress moved to deregulate the railroads. The Staggers Rail Act of 1980, *49 U.S.C. § 10101 et seq. (1988)*, left to the railroads the decision whether or not to cooperate, albeit subject to antitrust and other laws. H.R.Conf.Rep. No. 1430, 96th Cong., 2d Sess. 83 (1980), *reprinted in* 1980 U.S.Code Cong. & Admin.News 4110, 4114.

The dispute leading to this appeal arose when Canadian shippers and railroads sought to lower **[**5]** rates so that rail carriage of newsprint could compete more readily with carriage by truck. Conrail agreed to lower its rates on trips where it was the sole American carrier. It did not decline outright to cooperate in cases where it was the secondary ("short haul") carrier to D & H, but instituted a policy, called "make or buy", that achieved the same effect. Under that policy, Conrail would agree to the reduced rate only if its profit, called "contribution", matched its profit on the route where it was the sole carrier.

The effect of the make or buy policy can be demonstrated by reference to the example referred to above. On a Quebec-Lancaster carriage entirely on Conrail tracks, Conrail would earn $ 30,000 in revenue, less $ 20,000 in costs, for a contribution of $ 10,000. Prior to the make or buy policy, Conrail's revenue for the Harrisburg-Lancaster short haul route, when D & H was responsible for the long haul, would be $ 2,000, less costs of $ 750, for a contribution of $ 1,250. The make or buy policy was intended to assure that Conrail would receive the same contribution for any carriage in which it participated, whether it was the short or long haul carrier. Accordingly, **[**6]** under its new policy, Conrail demanded a contribution of $ 10,000 for the Harrisburg-Lancaster short haul route, an increase of 800%. The price for D & H's failure to agree to those terms was the denial by Conrail of any joint rates.

Conrail's action placed D & H in a bind between giving up almost all of its profits on a given route and losing entirely the ability to carry freight on the route. It decided not to concur in joint rates where the make or buy policy was in effect. It commenced the instant action in July 1986. In June 1988, D & H sought protection under Chapter 11 of the United States Bankruptcy Code.

After surviving a motion to dismiss, *654 F. Supp. 1195 (N.D.N.Y. 1987)*, and after extensive discovery, D & H's antitrust claims were rejected by the district court on Conrail's motion for summary judgment. The three claims, all of which relate to the same product market (shipment of newsprint from eastern Canada to the mid-Atlantic states) and the same conduct (Conrail's make or buy policy), are those set forth in the second paragraph of this opinion.

From the summary judgment rejecting these claims, this appeal was taken by D&H which asserts that, since **[**7]** there are genuine issues of material fact with respect to the three claims, summary judgment was improper. We agree.

II.

HN1[] On an appeal from a summary judgment, we review the record de novo to determine whether there are genuine issues of material fact. *Fed.R.Civ.P. 56(c)*. We assess the record in the light most favorable to the non-movant and we draw all reasonable inferences in its favor. *Ramseur v. Chase Manhattan Bank, 865 F.2d 460, 465* (2 Cir. 1989). The non-movant, however, who must sustain the ultimate burden of proof, must demonstrate in opposing a summary judgment motion that there is some evidence which would create **[*178]** a genuine issue of material fact. *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. Conclusory allegations will not suffice to create a genuine issue. There must be more than a "scintilla of evidence," *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*, and more than "some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. **[**8]**

III.

We turn first to the question whether the make or buy policy constituted the offense of monopolization under *§ 2* of the Sherman Act, *15 U.S.C. § 2 (1988)*. *HN2*[] To establish the defendant's liability, the plaintiff must demonstrate "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*.

(A)

Addressing the second element first, we must affirm the district court's ruling unless D & H has demonstrated that there is a genuine issue of material fact as to whether Conrail's make or buy policy constituted willful anti-competitive conduct in the relevant newsprint transportation market. Conrail's most significant contention in this regard is that, since the policy was intended to increase short-term, as well as long-term, profits, Conrail is insulated from liability.

[9]** Conrail finds support for this contention primarily in two opinions. The first is *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. There the Court affirmed a decision that the defendant had engaged in actionable conduct in its refusal to continue cooperating with a competitor. The Court held that a monopolist would not be liable merely because its actions adversely affected a competitor, if such actions were motivated by a valid business justification. *Id. at 605*. In determining that there was no valid justification, the Court found significant the fact that the defendant "was willing to sacrifice short-run benefits and consumer goodwill in exchange for a perceived long-run impact on its smaller rival." *Id. at 610-11*. Conrail infers from *Aspen Skiing* that conduct which has profit maximization as a goal cannot violate *§ 2*.

Conrail finds further support for this contention in *United States Football League v. National Football League, 842 F.2d 1335* (2 Cir. 1988). There, we approved a jury instruction which included the following:

> "[A] monopolist **[**10]** is under no duty affirmatively to help or aid its competitors and is free to set as its legitimate goal the maximization of its own profits *so long as it does not exercise its power to maintain that [monopoly] power*."

Id. at 1361 (emphasis added).

The plain language of the above excerpt from *United States Football League* demonstrates that Conrail's contention is incorrect. *HN3*[] The fact that profit maximization is a goal of the make or buy policy provides support for an argument that the policy is a legitimate practice, but does not shield the policy from judicial scrutiny. A monopolist cannot escape liability for conduct that is otherwise actionable simply because that conduct also provides short-term profits. *Aspen Skiing* does not hold to the contrary.

Our review of the record in the instant case satisfies us that there is evidence which would support a jury finding that Conrail is liable for monopolization. Here are a few examples: First, James Hagen, Conrail's former Senior Vice President -- Marketing, stated that the refusal to concur in lowered joint rates would have been implemented whether or not it increased Conrail's profits. Second, **[**11]** several Conrail employees, including its President, Stuart M. Reed, stated that a shift of D & H's traffic to Conrail would be desirable. Third, David Kalapos, an analyst for Conrail, stated that D & H would be unlikely to concur in a joint rate under the make or buy policy as its profits "would be almost **[*179]** ludicrously low." Fourth, there is no question that D & H was harmed by the implementation of the policy. D & H introduced in evidence a letter from a Conrail vice president stating "I'm for a monopoly in total . . . So let's Conrail take and rationalize the entire D & H."

We agree with the district court that the vice president's letter, standing alone, would not give rise to a *§ 2* violation. *Ocean State Physicians Health Plan v. Blue Cross & Blue Shield of R.I., 883 F.2d 1101, 1113* (1 Cir. 1989), *cert. denied*, *494 U.S. 1027, 110 S. Ct. 1473, 108 L. Ed. 2d 610 (1990)*; *Olympia Equipment Leasing Company. v. Western Union Tel. Co., 797 F.2d 370, 373, 379* (7 Cir. 1986) (intent that "these turkeys . . . be flushed" did not give rise to liability), *cert. denied*, *480 U.S. 934 (1987)*. In view of the evidence **[**12]** referred to above, however, we hold that D & H has proffered evidence sufficient to support a verdict in its favor by a reasonable jury on the question whether Conrail's conduct violated *§ 2*. Obviously, therefore, this issue could not properly be decided against D & H on a motion for summary judgment.

(B)

The district court assumed for purposes of argument that Conrail had monopoly power in the relevant market, transportation of newsprint from eastern Canada to the mid-Atlantic states. Conrail now asserts as an alternative ground for affirming the district court that this assumption was incorrect. D & H's evidence on the subject, it contends, was insufficient to create a triable issue.

D & H's expert witness, Gordon Fay, stated in an affidavit that Conrail had two-thirds of the market in rail transportation of newsprint and one-half of the total market (including truck transportation). While market share is not the sole factor in the determination of market power, it is a highly significant one. *Broadway Delivery Corp. v. United Parcel Service, Inc., 651 F.2d 122, 128* (2 Cir.), *cert. denied*, *454 U.S. 968, 70 L. Ed. 2d 384, 102 S. Ct. 512 (1981)*. **[**13]**

The parties and the district court seem not to have devoted significant attention to the question of monopoly power. Conrail did not even take the deposition of the witness Fay. We are not presented with a well-developed record on that question. Nevertheless, on the record before us, we are persuaded that D & H has presented a genuine issue of material fact as to monopoly power, precluding summary judgment in favor of Conrail on this issue.

IV.

We turn next to the question whether the make or buy policy constituted ***HN4***[] denial of an essential facility and, by implication, a violation of *§ 2*. The alleged essential facility is Conrail's tracks used for short haul routes, e.g., the Harrisburg-Lancaster tracks in the hypothetical Quebec-Lancaster run. The district court rejected D & H's claim, relying on the four-factor test set forth in *MCI Communications v. American Tel. & Tel. Co., 708 F.2d 1081, 1132-33* (7 Cir.) ("(1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial **[**14]** of the use of the facility to a competitor; and (4) the feasibility of providing the facility."), *cert. denied*, *464 U.S. 891, 78 L. Ed. 2d 226, 104 S. Ct. 234 (1983)*; *see also* *Twin Laboratories, Inc. v. Weider Health & Fitness, 900 F.2d 566, 568-69* (2 Cir. 1990) (applying *MCI.*)

There is no question that Conrail controls the short haul tracks, thus satisfying the first element. With respect to the second element, we agree with the district court's statement that "physical duplication of [Conrail's] lines would be an impractical and unreasonable project to undertake." *724 F. Supp. at 1079*. The fourth element, feasibility, is demonstrated by the fact that D & H was permitted continuous use of the tracks until the make or buy policy foreclosed that use.

HN5[] The third element -- whether Conrail impermissibly denied to D & H the use of the tracks -- is the one on which the district court based its decision. The court held correctly that there need not be an outright **[*180]** refusal to deal in order to find that denial of an essential facility **[**15]** occurred. It is sufficient if the terms of the offer to deal are unreasonable. In this context the following passage is particularly appropriate:

> "Such plan of reorganization must also provide definitely for the use of the terminal facilities by any other railroad not electing to become a joint owner, upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies."

United States v. Terminal Railroad Assoc., 224 U.S. 383, 411, 56 L. Ed. 810, 32 S. Ct. 507 (1912); *see also* Areeda & Hovenkamp, ***Antitrust Law*** para. 736.1, at 700-01 (1989 Supp.).

We disagree, however, with the district court's conclusion that the terms of the make or buy policy were reasonable as a matter of law. We return to the earlier illustration to make the point clear. Prior to the implementation of the policy, Conrail received a contribution of $ 1,250 for D & H's use of its Harrisburg-Lancaster tracks. Under the policy, Conrail demanded a contribution of $ 10,000, an increase **[**16]** of 800%. The magnitude of that increase may be sufficient in itself to create a triable issue as to whether the terms were unreasonable. Whether it is or is not, however, the various statements of Conrail executives, excerpted above, support our conclusion that there is a triable issue.

The relatively sparse case law on this question supports our conclusion. In *Laurel Sand & Gravel, Inc. v. CSX Transp., Inc., 704 F. Supp. 1309 (D.Md. 1989)*, the court found that the defendant's offer to transport cargo for $.01 per ton above the defendant's own variable cost was reasonable. *Id. at 1323-24*. While it is difficult to extrapolate economic reasonableness from one case to another, we hold that a sudden price rise of 800% raises a genuine issue of material fact under *Laurel Sand*.

We need not determine on this appeal the circumstances under which a legitimate business practice will shield a defendant from liability for conduct that otherwise would constitute denial of an essential facility. *MCI, supra, 708 F.2d at 1133* (suggesting that a legitimate practice may serve as a shield from liability). In our discussion above on the monopolization **[**17]** claim, we held that there is a genuine issue of material fact with respect to the question whether the make or buy policy was a legitimate practice. That holding is equally applicable here.

V.

D & H also contends that the make or buy policy constituted the *§ 2* offense of attempted monopolization. *HN6*[] To make out a successful claim of attempted monopolization, a plaintiff must demonstrate: (1) anti-competitive conduct; (2) intent to monopolize; and (3) a dangerous probability of obtaining monopoly power. *International Distrib. Centers, Inc. v. Walsh Trucking Co., 812 F.2d 786, 790* (2 Cir.), *cert. denied*, *482 U.S. 915, 96 L. Ed. 2d 676, 107 S. Ct. 3188 (1987)*. These elements essentially track those required for a successful monopolization claim. We held with respect to the monopolization claim that the development and implementation of the make or buy policy raised triable issues on the questions of conduct and intent. Likewise, evidence of Conrail's monopoly power that is sufficient to withstand a motion for summary judgment also suffices to raise a triable **[**18]** issue as to whether there was a dangerous probability that Conrail would obtain monopoly power.

VI.

To summarize:

> We hold that there are genuine issues of material fact with respect to whether the development and implementation by Conrail of its make or buy policy constituted the antitrust offenses of monopolization, denial of essential facilities and attempted monopolization.

Nothing in this opinion is to be construed as an expression of our views on the merits of the issues to be tried. All we hold today is that there are genuine **[*181]** issues of material fact which should not be decided by summary judgment.

Reversed and remanded.

Mergers & Acquisitions Law > Antitrust > General Overview

HN4[] **Civil Actions, Divestiture**

The general language of *15 U.S.C.S. § 25* is broad enough to authorize divestiture. Indeed, in government actions divestiture is the preferred remedy for an illegal merger or acquisition. Divestiture or dissolution has traditionally been the remedy for Sherman Act violations whose heart is intercorporate combination and control, and it is reasonable to think immediately of the same remedy when *15 U.S.C.S. § 18*, which particularizes the Sherman Act standard of illegality, is involved.

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] **Antitrust & Trade Law, Clayton Act**

15 U.S.C.S. § 26 states no restrictions or exceptions to the forms of injunctive relief a private plaintiff may seek, or that a court may order. Rather, the statutory language indicates Congress' intention that traditional principles of equity govern the grant of injunctive relief. The plain text of *§ 26* authorizes divestiture decrees to remedy *15 U.S.C.S. § 18* violations.

Securities Law > ... > Self-Regulating Entities > National Securities Exchanges > General Overview

HN6[] Private Actions, Remedies

Injunctions issued pursuant to 15 U.S.C.S. § 26 have been upheld regardless of whether they are mandatory or prohibitory in character. Section 26 has been enacted not merely to provide private relief, but to serve as well the high purpose of enforcing antitrust laws. The remedy that § 26 affords, like other equitable remedies, is flexible and capable of nice adjustment and reconciliation between the public interest and private needs as well as between competing private claims.

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Remedies

HN7[] Legislation, Statute of Limitations

The Clayton Act's provisions manifest a clear intent to encourage vigorous private litigation against anticompetitive mergers. 15 U.S.C.S. § 18 itself creates a relatively expansive definition of antitrust liability: To show that a merger is unlawful, a plaintiff need only prove that its effect may be substantially to lessen competition. 11 U.S.C.S. § 26, construed to authorize a private divestiture remedy when appropriate in light of equitable principles, fits well in a statutory scheme that favors private enforcement, subjects mergers to searching scrutiny, and regards divestiture as the remedy best suited to redress the ills of an anticompetitive merger.

Antitrust & Trade Law > Clayton Act > General Overview

HN8[] Antitrust & Trade Law, Clayton Act

Distinction between divestiture and injunctions that prohibit future conduct for purposes of 15 U.S.C.S. § 26 is illusory.

Civil Procedure > Preliminary Considerations > Equity > General Overview

HN9[] Preliminary Considerations, Equity

The essence of equity jurisdiction has been the power of a court to do equity and to mould decrees to the necessities of a particular case. Flexibility rather than rigidity distinguishes it.

Civil Procedure > Preliminary Considerations > Equity > General Overview

HN10[] **Preliminary Considerations, Equity**

When Congress endows federal courts with equitable jurisdiction, Congress acts aware of a longstanding tradition of flexibility. Unless a statute in so many words, or by a necessary and inescapable inference, restricts a court's jurisdiction in equity, the full scope of that jurisdiction is to be recognized and applied.

HN11[] **Civil Actions, Divestiture**

In a government case under *15 U.S.C.S. § 25*, a proof of a violation of law may itself establish sufficient public injury to warrant relief. A private litigant, however, must have standing under *15 U.S.C.S. § 26* and must prove threatened loss or damage to his own interests in order to obtain relief.

Lawyers' Edition Display

Decision

Divestiture held to be form of injunctive relief authorized by 16 of Clayton Act (*15 USCS 26*), where antitrust suit by state of California claimed that supermarket merger violated 7 of Act (*15 USCS 18*).

Summary

Section 16 of the Clayton Act (*15 USCS 26*) provides that any person, firm, corporation, or association shall be entitled to have injunctive relief against threatened loss or damage by a violation of the antitrust laws, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. After a company which operated supermarkets in many states, including California, notified the Federal Trade Commission (FTC), under *15 USCS 18a*, that the company intended to acquire all of a major competitor's outstanding stock, the FTC negotiated a settlement which included a condition that the acquirer comply with a "Hold Separate Agreement" preventing the acquirer from integrating the two companies' assets and operations until after the acquirer had divested itself of several designated supermarkets. The state of California then filed an action in the United States District Court for the Central District of California.

The complaint alleged that the merger violated federal antitrust statutes, including 7 of the Clayton Act (*15 USCS 18*), which generally prohibits acquisitions whose effect may be substantially to lessen competition. Meanwhile, the company consummated the merger as a matter of legal form under Delaware corporation law, but the two companies' business operations were not combined, as a matter of practical fact, due to the "Hold Separate Agreement." The District Court eventually entered a preliminary injunction--which ordered the acquirer, during the pendency of the action, to take all steps necessary to operate the two companies independently in California, and to refrain from taking any action to modify the status quo as to the California operations of the two companies, other than in the ordinary course of business--and expressed the view that (1) the state of California had proved a prima facie violation of 7; (2) the state had made an adequate showing of irreparable harm to Californians; (3) such harm outweighed the harm that the acquirer would suffer as a result of the injunction; and (4) under the circumstances, the injunction was not prohibited by United States Court of Appeals for the Ninth Circuit precedent to the effect that divestiture was not an authorized form of injunctive relief under 16 (*697 F Supp 1125*). On interlocutory appeal, the Court of Appeals, ordering that the preliminary injunction be set aside, expressed the view that (1) the District Court had not abused its discretion in finding that the state had proved (a) a likelihood of success on the merits, and (b) the probability of irreparable harm; but (2) divestiture was not an available remedy in private actions under 16; and (3) 16 did not permit indirect divestiture by means of an injunction which, as in the case at hand, (a) did not on its face order divestiture, but (b) had the same effect (*872 F2d 837*).

On certiorari, the United States Supreme Court reversed the judgment of the Court of Appeals and remanded the case for further proceedings. In an opinion by Stevens, J., expressing the unanimous view of the court, it was held that divestiture is a form of injunctive relief within the meaning of 16, and that the District Court, with respect to the case at hand, had the power under 16 to divest the acquirer of any part of the acquirer's ownership interest in the acquired company--either by forbidding the exercise of the owner's normal right to integrate the operations of two previously separate companies, or by requiring the acquirer to sell certain assets located in California--because (1) if the merger violated antitrust laws, and if it were correctly found that the conduct of the merged enterprise threatened economic harm to California consumers, then the literal text of 16 was sufficient to authorize injunctive relief, including an order of divestiture, that would prohibit that conduct from causing that harm; (2) such a construction harmonizes 16 with its statutory context, which (a) favors private enforcement, (b) subjects mergers to searching scrutiny, and (c) regards divestiture as the remedy best suited to redress the ills of an anticompetitive merger; (3) even though it was alleged that excerpts from subcommittee hearings on the adoption of the Act demonstrated that a conduct-structure distinction had been recognized and that Congress had rejected a private dissolution remedy, and thereby had rejected divestiture as well, such allegations were not confirmed by anything that had been called to the Supreme Court's attention in the committee reports, floor debates, conference report, or contemporaneous judicial interpretations concerning the Act, given the historical importance of the distinction between dissolution and divestiture; (4) the equitable principles that govern 16 support a construction that would enable a chancellor to impose the most effective, usual, and straightforward remedy to rescind an unlawful purchase of assets; and (5) the fact that the term "divestiture" is used to describe what is typically no more than the familiar remedy of rescission does not place the remedy beyond the normal reach of the chancellor.

Kennedy, J., concurring, expressed the view that (1) Congress has not yet enacted a strict rule prohibiting divestiture after a negotiated settlement with the FTC; but (2) *15 USCS 18a*, by establishing a time period for review of merger proposals by the FTC, may lend a degree of objectivity to the determination whether divestiture is barred by laches.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §70 > STATUTES §108.5 > Clayton Act -- private injunctive relief -- divestiture -- dissolution -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]***LEdHN[1D]***[] [1D]***LEdHN[1E]***[] [1E]***LEdHN[1F]***[

] [1F]**LEdHN[1G]**[] [1G]**LEdHN[1H]**[] [1H]**LEdHN[1I]**[] [1I]**LEdHN[1J]**[] [1J]**LEdHN[1K]**[] [1K]**LEdHN[1L]**[] [1L]**LEdHN[1M]**[] [1M]

Divestiture is a form of injunctive relief within the meaning of 16 of the Clayton Act (*15 USCS 26*)--which authorizes any person to have injunctive relief against threatened loss or damage by a violation of the antitrust laws, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity--and a Federal District Court, with respect to a state's claim that one company's acquisition of another company violated 7 of the Act (*15 USCS 18*), has the power under 16 to divest the acquirer of any part of the acquirer's ownership interest in the acquired company--either by forbidding the exercise of the owner's normal right to integrate the operations of two previously separate companies, or by requiring the acquirer to sell certain assets located in the state--because (1) if the merger violated antitrust laws, and if it is correctly found that the conduct of the merged enterprise threatens economic harm to the state's consumers, then the literal text of 16 is sufficient to authorize injunctive relief, including an order of divestiture, that will prohibit that conduct from causing that harm, where (a) 16's authority, on its face, would seem to encompass divestiture just as plainly as the comparable language in 15 of the Act (*15 USCS 25*) with respect to actions intitiated by the Federal Government, which language, to the effect that antitrust violations shall be enjoined or otherwise prohibited, is agreed to be broad enough to authorize divestiture, (b) 16's requirement of threatened loss or damage (i) is satisfied under the assumed circumstances, and (ii) if divestiture is an appropriate means of preventing such harm, does not negate the power to grant such relief, and (c) 16's reference to threatened conduct is not the equivalent of a directive that unlawful conduct may be prohibited, but structural relief may not be mandated, since any distinction between conduct and structure, or between prohibitory and mandatory relief, is illusory in a case of this kind; (2) such a construction harmonizes 16 with its statutory context, which (a) favors private enforcement, (b) subjects mergers to searching scrutiny, and (c) regards divestiture as the remedy best suited to redress the ills of an anticompetitive merger; (3) even though it is alleged that excerpts from subcommittee hearings on the adoption of the Act demonstrate that a conduct-structure distinction was recognized and that Congress rejected a private dissolution remedy, and thereby rejected divestiture as well, such allegations are not confirmed by anything that has been called to the United States Supreme Court's attention in the committee reports, floor debates, conference report, or contemporaneous judicial interpretations concerning the Act, given the historical importance of the distinction between dissolution and divestiture, where dissolution, at the time of the Act's adoption, was an ambiguous term that could (a) include divestiture, or (b) refer to greater penalties ranging up to a "corporate death sentence"; (4) the equitable principles that govern 16 support a construction that would enable a chancellor to impose the most effective, usual, and straightforward remedy to rescind an unlawful purchase of assets; and (5) the fact that the term "divestiture" is used to describe what is typically no more than the familiar remedy of rescission does not place the remedy beyond the normal reach of the chancellor.

APPEAL §1339.5 > STATUTES §145.4 > language -- legislative history -- review of Federal Court of Appeals' decision -- certiorari -- > Headnote:
LEdHN[2A][] [2A]**LEdHN[2B]**[] [2B]

On certiorari to review a Federal Court of Appeals' judgment which set aside a Federal District Court's preliminary injunction on the ground of the alleged limits on such injunctive relief under 16 of the Clayton Act (*15 USCS 26*), the statutory text is the natural place for the United States Supreme Court to begin its analysis; although the Supreme Court does not believe the statutory language to be ambiguous, the Supreme Court will nonetheless consider the legislative history that persuaded the Court of Appeals to place a narrow construction on 16; in order to understand such history, however, it is necessary to place the statute in its historical perspective.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §78 > divestiture -- > Headnote:
LEdHN[3][] [3]

Under 15 of the Clayton Act (*15 USCS 25*)--which provides that, in actions initiated by the Federal Government, antitrust violations shall be enjoined or otherwise prohibited--divestiture is the preferred remedy for an illegal merger or acquisition; divestiture, which is simple, relatively easy to administer, and sure, should always be in the forefront of a court's mind when a violation of 7 of the Act (*15 USCS 18*) has been found.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34.5 > merger -- violation -- > Headnote:
LEdHN[4A][] [4A]***LEdHN[4B]***[] [4B]

Section 7 of the Clayton Act (*15 USCS 18*) particularizes the Sherman Act (*15 USCS 1 et seq.*) standard of illegality and creates a relatively expansive definition of antitrust liability, as a plaintiff, in order to show that a merger is unlawful under 7, need only prove that the merger's effect "may be" substantially to lessen competition.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §74 > STATUTES §145.4 > injunctive relief -- forms -- equitable principles -- > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]***LEdHN[5C]***[] [5C]***LEdHN[5D]***[] [5D]***LEdHN[5E]***[] [5E]

The text of 16 of the Clayton Act (*15 USCS 26*) states no restrictions or exceptions to the forms of injunctive relief that a private plaintiff may seek, or that a federal court may order, as 16 authorizes any person to have injunctive relief against threatened loss or damage by a violation of the antitrust laws, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity; rather, the language of 16 indicates Congress' intention that traditional principles of equity govern the grant of injunctive relief, and a fair reading of the entire legislative history supports the conclusion that 16 means what it says when it endorses the conditions and principles governing injunctive relief in the courts of equity--that 16 should be construed generously and flexibly, pursuant to the principles of equity; the evident import of 16's reference to threatened loss or damage is not to constrict the availability of injunctive remedies against violations that have already begun or occurred, but rather to expand such remedies' availability against harms that are as yet unrealized; the reference in 16 to threatened conduct that will cause loss or damage is not a limitation on the power to grant relief, but part of the general reference to the standards that should be applied in fashioning injunctive relief.

APPEAL §1363 > review of preliminary injunction -- satisfaction of conditions -- > Headnote:
LEdHN[6][] [6]

On certiorari to review a Federal Court of Appeals' setting aside of a Federal District Court's preliminary injunction under 16 of the Clayton Act (*15 USCS 26*)--which authorizes such injunctions in certain situations which involve threatened loss or damage by a violation of the antitrust laws--the United States Supreme Court will conclude that 16's requirement of threatened loss or damage is satisfied, where the allegations of a complaint filed by a state, the findings of the District Court, and the opinion of the Court of Appeals all assume that, even if the merger is a completed violation of law, the threatened harm to the state's consumers will persist.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §78 > STATUTES §180 > divestiture -- dissolution -- > Headnote:
LEdHN[7][] [7]

In interpreting 16 of the Clayton Act (*15 USCS 26*)--which authorizes any person to have injunctive relief against threatened loss or damage by a violation of the antitrust laws, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity--the fact that divestiture was encompassed within the concept of dissolution at the time of the Act's framing does not imply that the equitable formulation of 16 cannot permit divestiture while excluding the more severe sanctions, ranging up to a "corporate death sentence," that also traveled at that time under the name "dissolution," for the rejection of a proposed remedy that would terminate the corporate existence of a company and would appoint a receiver to supervise the disposition of the company's assets is not the equivalent of the rejection of a remedy that would merely rescind a purchase of stock or assets.

EQUITY §1 > jurisdiction -- statutory grant -- > Headnote:
LEdHN[8][] [8]

Unless a statute in so many words, or by a necessary and inescapable inference, restricts the court's jurisdiction in equity, the full scope of that jurisdiction is to be recognized and applied.

EVIDENCE §979 > LIMITATION OF ACTIONS §27 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §70 > divestiture -- government suit -- private suit -- sufficiency of proof -- standing -- laches -- > Headnote:
LEdHN[9][] [9]

A conclusion that a Federal District Court has the power to order divestiture in appropriate private antitrust cases brought under 16 of the Clayton Act (*15 USCS 26*) does not mean that such power should be exercised in every situation in which the Federal Government would be entitled to such relief under 15 of the Act (*15 USCS 25*), for (1) in a Federal Government case, the proof of the violation of law may itself establish sufficient public injury to warrant relief; but (2) a private litigant must have standing--that is, such a litigant must prove threatened loss or damage to the litigant's own interest in order to obtain relief under 16; and (3) equitable defenses such as laches, or perhaps "unclean hands," may protect consummated transactions from belated attacks by private parties when it would not be too late for the Federal Government to vindicate the public interest.

APPEAL §1363 > preliminary injunction -- what reviewable -- > Headnote:
LEdHN[10A][] [10A]***LEdHN[10B]***[] [10B]

On certiorari to review a Federal Court of Appeals' setting aside of a Federal District Court's preliminary injunction, under 16 of the Clayton Act (*15 USCS 26*), against a company which acquired another company--where the Court of Appeals based its decision on the court's view that divestiture is not an available remedy in private actions under 16--the United States Supreme Court (1) is merely confronted with the naked question whether the District Court had the power to divest the acquirer of any part of the acquirer's ownership interest in the acquired company, either

(a) by forbidding the exercise of the owner's normal right to integrate the operation of two previously separate companies, or (b) by requiring the acquirer to sell certain assets located in a particular state; and (2) is not presented with questions as to whether divestiture is appropriate in the particular case, with respect to such issues as the plaintiff's standing or the possible existence of equitable defenses such as laches, or perhaps "unclean hands."

Syllabus

Shortly after respondent American Stores Co., the fourth largest supermarket chain in California, acquired all of the outstanding stock of the largest chain, the State filed suit in the District Court alleging, inter alia, that the merger constituted an anticompetitive acquisition violative of *§ 7* of the Clayton Act and would harm consumers throughout the State. The court granted the State a preliminary injunction requiring American to operate the acquired stores separately pending resolution of the suit. Although agreeing that the State had proved a likelihood of success on the merits and the probability of irreparable harm, the Court **[****2]** of Appeals set aside the injunction on the ground that the relief granted exceeded the District Court's authority under § 16 of the Act to order "injunctive relief." The court relied on an earlier decision in which it had concluded on the basis of its reading of excerpts from subcommittee hearings that § 16's draftsmen did not intend to authorize the remedies of "dissolution" or "divestiture" in private litigants' actions. Thus, held the court, the "indirect divestiture" effected by the preliminary injunction was impermissible.

Held: Divestiture is a form of "injunctive relief" authorized by § 16. Pp. 278-296.

(a) The plain text of § 16 -- which entitles "[a]ny person . . . to . . . have injunctive relief . . . against threatened loss or damage . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity" -- authorizes divestiture decrees to remedy *§ 7* violations. On its face, the simple grant of authority to "have injunctive relief" would seem to encompass that remedy just as plainly as the comparable language in § 15 of the Act, which authorizes the district courts **[****3]** to "prevent and restrain violations" in antitrust actions brought by the United States, and under which divestiture is the preferred remedy for illegal mergers. Moreover, § 16 states no restrictions or exceptions to the forms of injunctive relief a private plaintiff may seek or a court may order, but, rather, evidences Congress' intent that traditional equitable principles govern the grant of such relief. The section's "threatened loss or damage" phrase does not negate the court's power to order divestiture. Assuming, as did the lower courts, that the merger in question violated the antitrust laws, and that the conduct of the merged enterprise threatens economic harm to consumers, such relief would prohibit that conduct from causing that harm. Nor does the section's "threatened conduct that will cause loss or damage" phrase limit the court's power to the granting of relief against anticompetitive "conduct," as opposed to "structural relief," or to the issuance of prohibitory, rather than mandatory, injunctions. That phrase is simply a part of the general reference to the standards that should be applied in fashioning injunctive relief. Section 16, construed to authorize a private **[****4]** divestitutre remedy, fits well in a statutory scheme that favors private enforcement, subjects mergers to searching scrutiny, and regards divestiture as the remedy best suited to redress the ills of an anticompetitive merger. Pp. 278-285.

(b) The legislative history does not require that § 16 be construed narrowly. American's reliance on the subcommittee hearing excerpts cited by the *Court of Appeals and on Graves v. Cambria Steel Co., 298 F. 761* -- each of which contains statements indicating that private suits for dissolution do not lie under § 16 -- is misplaced. At the time of the Act's framing, dissolution was a vague and ill-defined concept that encompassed the drastic remedy of corporate termination as well as divestiture. Thus, the fact that Congress may have excluded the more severe sanction does not imply that the equitable formulation of § 16 cannot permit divestiture. Since the inferences that American draws simply are not confirmed by anything else in the legislative history or contemporaneous judicial interpretation, § 16 must be taken at its word when it endorses the "conditions and principles" governing injunctive relief in equity courts. There **[****5]** being nothing in the section that restricts courts' equitable jurisdiction, the provision should be construed generously and flexibly to enable a chancellor to impose the most effective, usual, and straightforward remedy to rescind an unlawful stock purchase. Pp. 285-295.

(c) Simply because a district court has the power to order divestiture in appropriate § 16 cases does not mean that it should do so in every situation in which the Government would be entitled to such relief under § 15. A private litigant must establish standing by proving "threatened loss or damage" to his own interests, and his suit may be barred by equitable defenses such as laches or "unclean hands." Pp. 295-296.

Counsel: H. Chester Horn, Jr., Deputy Attorney General of California, argued the cause for petitioner. With him on the briefs were John K. Van de Kamp, Attorney General, Andrea Sheridan Ordin, Chief Assistant Attorney General, Michael J. Strumwasser, Special Assistant Attorney General, Sanford N. Gruskin, Assistant Attorney General, and Lawrence R. Tapper and Ernest Martinez, Deputy Attorneys General.

Rex E. Lee argued the cause for respondents. With him on the brief were Carter G. Phillips, **[****6]** Mark D. Hopson, Donald B. Holbrook, and Kent T. Anderson. *

[**7]**

Judges: STEVENS, J., delivered the opinion for a unanimous Court. KENNEDY, J., filed a concurring opinion, post, p. 296.

Steinsapir, and D. William Heine.

Opinion

[*274] [*248] [**1855]** JUSTICE **STEVENS** delivered the opinion of the Court.

LEdHN[1A][] [1A]By merging with a major competitor, American Stores Co. (American) more than doubled the number of supermarkets that it owns in California. The State sued, claiming that the merger violates the federal antitrust laws and will harm consumers in 62 California cities. The complaint prayed for a preliminary injunction requiring American to operate the acquired stores separately until the case is decided, and then to divest itself of all of the acquired assets located in California. The District Court granted a preliminary injunction preventing American from integrating the operations of the two companies. The Court of Appeals for the Ninth Circuit agreed with the District Court's conclusion that California had made **[*275]** an adequate showing of probable success on the merits, but held that the relief granted by the District Court exceeded its authority under § 16 of **[****8]** the Clayton Act, 38 Stat. 737, as amended, *15 U.S.C. § 26*. In its view, the "injunctive **[**1856]** relief . . . against threatened loss or damage" authorized by § 16 does not encompass divestiture, and therefore the "indirect divestiture" effected by the preliminary injunction was impermissible. *872 F. 2d 837 (1989)*. We granted certiorari to resolve a conflict in the Circuits over whether divestiture is a form of injunctive relief within the meaning of § 16. *493 U.S. 916 (1989)*. We conclude that it is.

I

American operates over 1,500 retail grocery stores in 40 States. Prior to the merger, its 252 stores in California made it the fourth largest supermarket chain in that State. Lucky Stores, Inc. (Lucky), which operated in seven Western and Midwestern States, was the largest, with 340 stores. The second and third largest, Von's Companies and Safeway Stores, were merged in December 1987. *697 F. Supp. 1125, 1127 (CD Cal. 1988)*; Pet. for Cert. 3.

On March 21, 1988, American notified the Federal Trade Commission (FTC) that it intended to acquire all of Lucky's outstanding stock for a price of $ 2.5 billion. **[****9]** [1] The FTC conducted an investigation and negotiated a settlement with American. On May 31, it simultaneously filed both a complaint alleging that the merger violated *§ 7* of the Clayton **[***249]** Act and a proposed consent order disposing of the *§ 7* charges subject to certain conditions. Among those conditions was a requirement that American comply with a "Hold Separate Agreement" preventing it from integrating the two companies' assets and operations until after it had divested itself of **[*276]** several designated supermarkets. [2] American accepted the terms of the FTC's consent order. In early June, it acquired and paid for Lucky's stock and consummated a Delaware "short form merger." *872 F. 2d, at 840*; Brief for Respondent 2. Thus, as a matter of legal form American and Lucky were merged into a single corporate entity on June 9, 1988, but as a matter of practical fact their business operations have not yet been combined.

[**10]** On August 31, 1988, the FTC gave its final approval to the merger. The next day California filed this action in the United States District Court for the Central District of California. The complaint alleged that the merger violated *§ 1* of the Sherman Act, *15 U.S.C. § 1*, and *§ 7* of the Clayton Act, *15 U.S.C. § 18*, and that the acquisition, "if consummated," would cause considerable loss and damage to the State: Competition and potential competition "in many relevant geographic markets will be eliminated," App. 61, and "the prices of food and non-food products might be increased." Id., at 62. In its prayer for relief, California sought, inter alia, (1) a preliminary injunction "requiring American to hold and operate separately from American all of Lucky's California assets and businesses

---

[1] See *15 U.S.C. § 18a* (Hart-Scott-Rodino Antitrust Improvements Act of 1976).

[2] Among other requirements, the Hold Separate Agreement obligated American to maintain separate books and records for the acquisition; to prevent any waste or deterioration of the acquired company's California operation; to refrain from replacing the company's executives; to assure that it is maintained as a viable competitor in California; to refrain from selling or otherwise disposing of the acquired company's warehouse, distribution or manufacturing facilities, or any retail grocery stores in California; and to preserve separate purchasing for its retail grocery sales. *697 F. Supp. 1125, 1134 (CD Cal. 1988)*.

pending final adjudication of the merits"; (2) "such injunctive relief, including rescission . . . as is necessary and appropriate to prevent the effects" alleged in the complaint; and (3) "an injunction requiring American to divest itself of all of Lucky's assets and businesses in the State of California." Id., at 65, 66-67.

[*277] The District **[****11]** Court granted California's motion for a temporary restraining order and, after considering extensive statistical evidence, entered a preliminary injunction. Without reaching the Sherman Act claim, the **[**1857]** court concluded that the State had proved a prima facie violation of *§ 7* of the Clayton Act. On the question of relief, the District Court found that the State had made an adequate showing "that Californians will be irreparably harmed if the proposed merger is completed," *697 F. Supp., at 1134*, and that the harm the State would suffer if the merger was not enjoined "far outweighs" the harm that American will suffer as the result of an injunction. *Id., at 1135*. The court also rejected American's argument that the requested relief was foreclosed by a prior decision of the Court of Appeals for the Ninth Circuit holding that divestiture is not a remedy authorized by § 16 of the Clayton Act. American contended that the proposed injunction was "tantamount to divestiture" since the merger of the two companies **[***250]** had already been completed, but the District Court disagreed. It held that since the FTC's Hold Separate Agreement was still in effect, **[****12]** the transaction was not a completed merger. [3]

American filed an interlocutory appeal pursuant to *28 U.S.C. § 1292(a)(1)*. The Court of Appeals for the Ninth Circuit first held that the District Court had not abused its discretion in finding that California had proved a likelihood of success on the merits and the probability of irreparable harm. Nevertheless, on the authority of its earlier decision in *International Telephone & Telegraph Corp. v. General Telephone & Electronics Corp., 518 F. 2d 913 (1975)* **[****13]** (IT&T), **[*278]** it set aside the injunction. The Court of Appeals reasoned that its own prior decisions established both that "'divestiture is not an available remedy in private actions under § 16 of the Clayton Act,'" and that "section 16 does not permit indirect divestiture, that is, an injunction which on its face does not order divestiture but which has the same effect. IT&T, 518 F. 2d at 924." *872 F. 2d, at 844*. The Court of Appeals applied this rule to conclude that the injunction issued by the District Court was legally impermissible. Observing that under the injunction "these stores must operate as if Lucky had never been acquired by American Stores at all," the Court of Appeals held that "such an injunction requires indirect divestiture." *Id., at 845*. Finally, the Court of Appeals added that the District Court had "compounded its misapprehension of the law of divestiture" by misunderstanding "the legal status of the merger." Specifically, the District Court erred by concluding that the "FTC's consent order" undid "the legal effect of this merger" which "had already taken place" according to Delaware corporation law. Ibid.

[**14]** On California's application, JUSTICE O'CONNOR entered a stay continuing the District Court's injunction pending further review by this Court. *492 U.S. 1301 (1989)*. We then granted certiorari to resolve the conflict between this decision and the earlier holding of the Court of Appeals for the First Circuit in *CIA. Petrolera Caribe, Inc. v. Arco Caribbean, Inc., 754 F. 2d 404 (1985)*. We now reverse.

II

In its IT&T opinion, the Court of Appeals for the Ninth Circuit reasoned that the term "injunctive relief" as used in § 16 is ambiguous and that it is necessary to review the statute's legislative history to determine whether it includes divestiture. Then, based on its reading of a colloquy during a hearing before a subcommittee of the Judiciary Committee of the House of Representatives, it concluded that the draftsmen of the bill did not intend to authorize the remedies of **[*279]** "dissolution" or "divestiture" in actions **[**1858]** brought by private litigants. *518 F. 2d, at 921-922*. The Court of Appeals **[***251]** for the First Circuit has rejected that reasoning. It found instead that a fair reading of the statutory text, buttressed **[****15]** by recognized canons of construction, [4] required a construction of

---

[3] The District Court observed that because the Hold Separate Agreement was still in effect, "this is not a completed merger. [American] and Lucky, pursuant to the Hold Separate Agreement, are performing numerous functions as separate entities. They retain their separate names and with them their respective corporate identities." The court stated that only by completing a "linguistic triathalon" could one conclude that an injunction stopping such a merger was "tantamount to divestiture." *697 F. Supp., at 1134*.

the words "injunctive relief" broad enough to encompass divestiture. Moreover, it doubted whether the references to "dissolution" in the legislative history referred to "divestiture," and did not consider this evidence sufficiently probative, in any event, to justify a restrictive reading of the Act that seemed inconsistent with its basic policy. *754 F. 2d, at 415-428*.

[**16]** American endorses the analysis of the Court of Appeals for the Ninth Circuit, but places greater reliance on two additional arguments. First, it argues that there is a significant difference between the text of § 15 of the Act, which authorizes equitable relief in actions brought by the United States, and the text of § 16, which applies to other parties. Specifically, it argues that the former is broad enough to encourage "structural relief" whereas the latter is limited to relief against anticompetitive "conduct." Second, reading § 16 in its historical context, American argues that it reflects a well-accepted distinction between prohibitory injunctions (which are authorized) and mandatory injunctions (which, American argues, are not).

LEdHN[1B][] [1B] ***LEdHN[2A]***[] [2A]American's argument directs us to two provisions in the statutory text, and that is the natural place to begin our analysis. Section 15 grants the federal district courts jurisdiction "to prevent and restrain violations of this Act" when **[*280]** United States attorneys "institute proceedings **[****17]** in equity to prevent and restrain such violations" through petitions "praying that such violation shall be enjoined or otherwise prohibited." [5] **[****18]** Section 16 entitles "any person, firm, corporation, or association . . . to sue for and have injunctive relief . . . against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." [6]

[*252]** ***LEdHN[1C]***[] [1C] ***LEdHN[3]***[] [3] ***LEdHN[4A]***[] [4A] **[****19]** ***HN4***[] It is agreed that the general language of § 15, which provides that antitrust violations "shall be enjoined or otherwise prohibited," is broad enough to authorize divestiture. Indeed, in Government actions divestiture is the preferred **[*281]** remedy for an illegal merger **[**1859]** or acquisition. As we wrote in the Du Pont case:

"Divestiture or dissolution has traditionally been the remedy for Sherman Act violations whose heart is intercorporate combination and control, and it is reasonable to think immediately of the same remedy when *§ 7* of

---

[4] The Court of Appeals observed:***HN1***[]

"Although we have no way of definitively determining the congressional intent in passing § 16, there remains at least one secure guidepost: when Congress uses broad generalized language in a remedial statute, and that language is not contravened by authoritative legislative history, a court should interpret the provision generously so as to effectuate the important congressional goals." *CIA. Petrolera Caribe, Inc. v. Arco Caribbean, Inc., 754 F. 2d 404, 428 (1985)*.

[5] ***HN2***[] The section provides in pertinent part:

"The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of this Act, and it shall be the duty of the several United States attorneys, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition, and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises. . . ." *15 U.S.C. § 25*.

[6] ***HN3***[] The section provides in pertinent part:

"Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections 13, 14, 18, and 19 of this title, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss of damage is immediate, a preliminary injunction may issue . . . ." *15 U.S.C. § 26*.

the Clayton Act, which particularizes the Sherman Act standard of illegality, is involved. Of the very few litigated *§ 7* cases which have been reported, most decreed divestiture as a matter of course. Divestiture has been called the most important of antitrust remedies. It is simple, relatively easy to administer, and sure. It should always be in the forefront of a court's mind when a violation of *§ 7* has been found." *United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 329-331 (1961)* (footnotes omitted).

LEdHN[1D][] [1D] ***LEdHN[5A]***[] [5A] **[****20]** On its face, the simple grant of authority in § 16 to "have injunctive relief" would seem to encompass divestiture just as plainly as the comparable language in § 15. Certainly § 16's reference to "injunctive relief . . . against threatened loss or damage" differs from § 15's grant of jurisdiction to "prevent and restrain violations," but it obviously does no follow that one grant encompasses remedies excluded from the other. [7] Indeed, we think it could plausibly be argued that § 16's terms are the more expansive. ***HN5***[] In any event, however, as the Court of Appeals for the First Circuit correctly observed, § 16 "states no restrictions or exceptions to the forms of injunctive relief a private plaintiff may seek, or that a court may order. . . . Rather, the statutory language indicates Congress' intention that traditional principles of equity govern the grant of injunctive relief." *754 F. 2d, at* ***[*282]*** *416*. We agree that the plain text of § 16 authorizes divestiture decrees to remedy *§ 7* violations.

[**21]** American rests its contrary argument upon two phrases in § 16 that arguably narrow its scope. The entitlement "to sue for and have injunctive relief" affords relief "against threatened loss or damage by a violation of the antitrust laws." Moreover, the right to such relief exists "when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity. . . ."

LEdHN[1E][] [1E] ***LEdHN[5B]***[] [5B] ***LEdHN[6]***[] [6]In this case, however, the requirement of "threatened loss or damage" is unquestionably satisfied. The allegations of the complaint, **[***253]** the findings of the District Court, and the opinion of the Court of Appeals all assume that even if the merger is a completed violation of law, the threatened harm to California consumers persists. If divestiture is an appropriate means of preventing that harm, the statutory reference to "threatened loss or damage" surely does not negate the court's power to grant **[****22]** such relief. [8]

LEdHN[1F][] [1F] ***LEdHN[5D]***[] [5D]The second phrase, which refers to "threatened conduct that will cause loss or damage," is not drafted as a limitation on the power to grant relief, but rather is a part of the general reference to the standards that should be applied in fashioning injunctive relief. It is surely not the equivalent of a directive stating that unlawful conduct may be prohibited but structural **[****23]** relief may not be mandated. Indeed, as the Ninth Circuit's analysis of the issue demonstrates, the distinction between conduct and structure -- or between prohibitory and mandatory relief -- **[**1860]** is illusory in a case of this kind. Thus, in the IT&T case the court recognized that an injunction prohibiting **[*283]** the parent company from voting the stock of the subsidiary should not be treated differently from a mandatory order of divestiture. [9] **[****24]** And in this case the court treated

---

[7] That the two provisions do differ is not surprising at all, since § 15 was largely copied from *§ 4* of the Sherman Act, see 26 Stat. 209, ch. 647, *15 U.S.C. § 4*, while § 16, which had to incorporate standing limits appropriate to private actions -- see *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)* -- had no counterpart in the Sherman Act.

[8] ***LEdHN[5C]***[] [5C]

Indeed, the evident import of Congress' reference to "threatened loss or damage" is not to constrict the availability of injunctive remedies against violations that have already begun or occurred, but rather to expand their availability against harms that are as yet unrealized. See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, and n. 24 (1969)*.

[9] The District Court in the IT&T case had observed that "'[i]f it were necessary to strain terminology in order to accomplish the same result, a court could easily phrase a "negative injunction" in such terms as to enjoin the activities of a corporation to such a degree that divestiture would be the only economical choice available to that corporation.'" *518 F. 2d, at 924*. The Court of Appeals admitted the force of this observation, agreeing with the District Court that the Standard Oil dissolution decree, *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 78 (1911)*, served as an example of an "'indirect' divestiture decre[e]." *518 F. 2d, at 924*.

the Hold Separate Agreement as a form of "indirect divestiture." In both cases the injunctive relief would unquestionably prohibit "conduct" by the defendants. American's textual arguments -- which rely on a distinction between mandatory and prohibitive relief -- do not explain why such remedies would not be appropriate. [10]

If we assume that the merger violated the antitrust laws, and if we agree with the District Court's finding that the conduct of the merged enterprise threatens economic harm to California consumers, the literal text of § 16 is plainly sufficient to authorize injunctive relief, including an order of divestiture, that will prohibit that conduct from causing that harm. ***HN6***[] This interpretation is consistent with our precedents, which have upheld injunctions issued pursuant to § 16 regardless of whether they were mandatory or prohibitory in character. See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 129-133 (1969)* (reinstating injunction that required defendants to withdraw from patent pools); see also *Silver v. New York Stock Exchange, 373 U.S. 341, 345, 365 (1963)* **[****25]** (reinstating judgment for defendants in suit to compel **[*284]** installation of wire services). We have recognized when construing § 16 that it was enacted "not merely to provide private relief, but . . . to serve as well the high purpose of enforcing the antitrust laws." *Zenith Radio Corp., 395 U.S., at 130-131*. We have accordingly applied the section "with this purpose in mind, and with the knowledge that the remedy it affords, like other equitable remedies, is flexible and capable of nice 'adjustment and reconciliation between the public interest and private needs as well as between competing private claims.'" Ibid., quoting *Hecht Co. v. Bowles, 321 U.S. 321, 329-330 (1944)*.

LEdHN[1G][] [1G] ***LEdHN[4B]***[] [4B]Finally, by construing § 16 to encompass divestiture decrees we are better able than is American to harmonize the section with its statutory context. ***HN7***[] The Act's other provisions manifest a clear intent to encourage vigorous private **[****26]** litigation against anticompetitive mergers. *Section 7* itself creates a relatively expansive definition of antitrust liability: To show that a merger is unlawful, a plaintiff need only prove that its effect "may be substantially to lessen competition." Clayton Act *§ 7*, 38 Stat. 731, *15 U.S.C. § 18* (emphasis supplied). See *Brown Shoe Co. v. United States, 370 U.S. 294, 323 (1962)*. In addition, *§ 5* of the Act provided that during the pendency of a Government action, the statute of limitations for private actions would be tolled. The section also permitted plaintiffs to use the final judgment in a Government antitrust suit as prima facie evidence of liability in a later civil suit. Private enforcement of the Act was in no sense an afterthought; it was an integral part of the congressional plan for protecting competition. See *Minnesota Mining & Mfg. Co. v. New* ***[**1861]*** *Jersey Wood Finishing Co., 381 U.S. 311, 318 (1965)*. Congress also made express its view that divestiture was the most suitable remedy in a suit for relief from a *§ 7* violation: In § 11 of the Act, Congress directed the FTC to issue orders requiring that a violator **[****27]** of *§ 7* "cease and desist from the violation," and, specifically, that the violator **[*285]** "divest itself of the stock held" in violation of the Act. [11] Section 16, **[***255]** construed to authorize a private divestiture remedy when appropriate in light of equitable principles, fits well in a statutory scheme that favors private enforcement, subjects mergers to searching scrutiny, and regards divestiture as the remedy best suited to redress the ills of an anticompetitive merger.

[**28]** III

---

[10] Notably, the Court of Appeals for the Ninth Circuit did not rely on either of the textual arguments that American has advanced here. Had it done so, it would have been forced to acknowledge a distinction between direct divestiture and indirect divestiture.

[11] In the context of construing the FTC's authority to issue such "cease and desist" orders, this Court -- speaking through Justice McReynolds, who had served as President Wilson's chief antitrust enforcement officer at the time the Clayton Act was framed -- had no difficulty finding that the continuing ownership of stock unlawfully acquired was itself a continuing violation of the Act:

"The order here questioned was entered when respondent actually held and owned the stock contrary to law. The Commission's duty was to prevent the continuance of this unlawful action by an order directing that it cease and desist therefrom and divest itself of what it had no right to hold. Further violations of the Act through continued ownership could be effectively prevented only by requiring the owner wholly to divest itself of the stock and thus render possible once more free play of the competition which had been wrongfully suppressed." *FTC v. Western Meat Co., 272 U.S. 554, 559 (1926)* (McReynolds, J.).

The suggestion that continuing ownership of stock unlawfully acquired might constitute a "further violatio[n] of the Act" would cast some doubt upon the utility of American's distinction between mandatory and prohibitory injunctions even were we inclined to accept the relevance of that distinction. As we reject the distinction, we have, however, no cause to pursue this line of inquiry further.

LEdHN[1H][] [1H] **LEdHN[2B]**[] [2B]Although we do not believe the statutory language is ambiguous, we nonetheless consider the legislative history that persuaded the Ninth Circuit to place a narrow construction on § 16. To understand that history, however, it is necessary to place the statute in its historical perspective.

The Sherman Act became law just a century ago. It matured some 15 years later, when, under the administation of Theodore Roosevelt, the Sherman Act "was finally being used against trusts of the dimension that had called it into **[*286]** being, and with enough energy to justify the boast that the President was using a Big Stick." W. Letwin, Law and Economic Policy in America 240 (1965). Two of the most famous prosecutions concluded in 1911, with decisions from this Court endorsing the "Rule of Reason" as the principal guide to the construction of the Sherman Act's general language. *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1*; *United States v. American Tobacco Co., 221 U.S. 106*. In consequence **[****29]** of the violations found in those two cases, wide-ranging injunctions were entered requiring the separation of the "oil trust" and the "tobacco trust" into a number of independent, but still significant, companies. The relief granted received mixed reviews. In some quarters, the cases were hailed as great triumphs over the forces of monopoly; in others, they were regarded as Pyrrhic victories. [12]

[**30]** **[**1862]** Concern about the adequacy of the Sherman Act's prohibition against combinations in restraint of trade prompted President Wilson to make a special address to Congress in 1914 recommending that the antitrust laws be strengthened. 2 The New Democracy, The Public Papers of Woodrow Wilson 81-89 (R. Baker & W. Dodd eds. 1926). Congressman Clayton, the Chairman of the House Judiciary Committee, promptly appointed a subcommittee to prepare the legislation. The bill drafted by the subcommittee contained most of the provisions that were eventually enacted into the law now known as the Clayton Act. The statute reenacted certain provisions of the Sherman Act and added new provisions of both a substantive and procedural character. Letwin, **[*287]** Law and Economic Policy in America, at 272-273; 2 A. Link, Wilson: The New Freedom 426 (1956). Thus, *§ 4* of the Sherman Act, which authorizes equitable **[***256]** relief in actions brought by the United States, was reenacted as § 15 of the Clayton Act, while § 16 filled a gap in the Sherman Act by authorizing equitable relief in private actions. *Section 7* of the Clayton Act made stock acquisitions of competing companies more **[****31]** vulnerable, and *§§ 4* and *5* gave special procedural advantages to private litigants. The reform project had broad social significance, and it is obvious that the Act as a whole is fairly characterized as important remedial legislation.

Some proponents of reform, however, were critical of the bill for not going further. Thus, for example, proposals that were never enacted would have expressly authorized private individuals to bring suit for the dissolution of corporations adjudged to have violated the law and for appointment of receivers to wind up the corporation's affairs. [13] Samuel Untermyer, a New York lawyer who urged Congress to give private plaintiffs express authority to seek dissolution decrees, stated his views in a colloquy with Congressman John Floyd during a hearing on the bill before a subcommittee of the House Judiciary Committee. Floyd told Untermyer that "We did not intend by section 13 to give the individual the same power to bring a suit to dissolve the corporation that the Government has," and added that the committee Members **[*288]** had discussed the matter very thoroughly. Untermyer replied that "the very

---

[12] The Taft Administration received the decisions warmly, but they provoked bitter criticism from the Democratic Party leadership. Antitrust policy was sharply debated during the 1912 Presidential campaign. See W. Letwin, Law and Economic Policy in America 266, 269 (1965). Upon becoming Woodrow Wilson's first Attorney General shortly thereafter, James McReynolds promised to deliver dissolutions "free from the fundamental defect in the plans adopted in the Standard Oil and Tobacco cases where the separate parts into which the business was divided were left under the control of the same stockholders." Annual Report of Attorney General, H.R. Doc. No. 460, 63d Cong., 2d Sess., 7 (1913).

[13] An amendment passed by the Senate, but rejected by the House, provided:

"That whenever a corporation shall acquire or consolidate the ownership or control of the plants, franchises, or property of other corporations, co-partnerships, or individuals, so that it shall be adjudged to be a monopoly or combination in restraint of trade, the court rendering such judgment shall decree its dissolution and shall to that end appoint receivers to wind up its affairs and shall cause all of its assets to be sold in such manner and to such persons as will, in the opinion of the court, restore competition as fully and completely as it was before said corporation or combination began to be formed. The court shall reserve in its decree jurisdiction over said assets so sold for a sufficient time to satisfy the court that full and free competition is restored and assured." 51 Cong. Rec. 15863 (1914).

relief that the man needs nine times out of ten **[****32]** is the dissolution of the corporation, because . . . it may not be doing any specific act of illegality, but its very existence, in violation of law, is the thing that is injuring him." Hearings on Trust Legislation before the House Committee on the Judiciary, 63d Cong., 2d Sess. 842-846 (1914) (House Hearings).

[**33]** Two weeks later, Louis Brandeis, testifying on behalf of the administration before the same committee, was asked whether he favored a proposal "to give the individual the right to file a bill in equity for the dissolution of one of these combinations, the same right which the Government now has and which it is its duty to perform." Brandeis responded that the proposal was not sound and added:

"It seems to me that the right to change the status [of the combination], which is the right of dissolution, is a right which ought to be exercised only by the Government, although the right for full redress for grievances and protection against future **[**1863]** wrongs is a right which every individual ought to enjoy.

"Now, all of this procedure ought to be made so as to facilitate, **[***257]** so far as possible, the enforcement of the law in aid, on the one hand, of the Government, and in aid, on the other hand, of the individual. But that fundamental principle is correct, that the Government ought to have the right, and the sole right, to determine whether the circumstances are such as to call for a dissolution of an alleged trust." *Id., at 649-650*.

LEdHN[1I][] [1I] **[****34]** American relies on these exchanges to support two slightly different arguments. First, it suggests that the committee recognized a distinction between relief directed at conduct and relief that is designed to change a company's status or structure. Second, it suggests that Congressman Floyd's statements permit an inference that the Congress as a whole rejected the possibility of a private dissolution remedy, and **[*289]** thereby rejected divestiture as well, because divestiture is a species of dissolution. Neither suggestion is persuasive.

HN8[] We have already concluded that the suggested distinction between divestiture and injunctions that prohibit future conduct is illusory. These excerpts, moreover, from the legislative history provide even less support for such a categorical distinction than does the text of § 16 itself.

The flaw in American's second suggestion is its assumption that the dissolution proposals submitted to Congress contemplated nothing more extreme than divestiture. Dissolution could be considerably more awesome. As the New York Court of Appeals ominously declared **[****35]** before affirming a decree against the North River Sugar Refining Company, dissolution was a "judgment . . . of corporate death," which "represent[ed] the extreme rigor of the law." [14] **[****36]** This meaning is evident from the text of the Senate amendment proposing private dissolution suits, which provided for a receiver to administer the doomed corporation's assets. [15]

---

[14] *People v. North River Sugar Refining Co., 121 N.Y. 582, 608, 24 N.E. 834 (1890)*. The New York attorney general had sought dissolution of the company for its participation in the sugar trust, relying upon two theories: that dissolution was appropriate because the company had violated the terms of its charter by entering the trust, and that dissolution was appropriate under the state antitrust laws. The Court of Appeals agreed that dissolution was appropriate on the first ground, and so declined to reach the second. *Id., at 626, 24 N.E., at 841*.

Judge Finch, writing for a unanimous court, began the opinion by announcing, "The judgment sought against the defendant is one of corporate death." *Id., at 608, 24 N.E., at 834*. He then said that although the "life of a corporation is indeed less than that of the humblest citizen," "destruction of the corporate life" may not be effected "without clear and abundant reason." Ibid. The ensuing opinion bristles with the rhetoric of moral condemnation; when characterizing the corporation's defense, for example, Judge Finch commented that the court had been asked "to separate in our thought the soul from the body, and admitting the sins of the latter to adjudge that the former remains pure." *Id., at 626, 24 N.E., at 837*.

[15] See n. 13, supra. Senator Reed, the sponsor of the Senate amendment which would have expressly authorized dissolution proceedings, stated that the statute's dissolution remedy should guarantee that "we shall have a real decree, that there shall be a real burial, and that we shall sod down the grave upon the monster that was created in defiance of law, but that we shall at the same time preserve its parts and restore them to competition and activity . . . ." 51 Cong. Rec. 15864 (1914).

[*290] ***LEdHN[1J]***[] [1J] ***LEdHN[7]***[] [7]The concept of dissolution, of course, also encompassed remedies comparable to divestiture, or to our present-day understanding of **[***258]** dissolution. [16] **[****39]** It was one thing to **[**1864]** dissolve a **[*291]** pool, trust, combination, or merger, and quite another to atomize, or to revoke the charter of, a large corporation. [17] In the early part of this century, however, new forms of corporate organization were arising at a pace that **[****37]** outstripped the vocabulary used to describe them. [18] Concern about monopoly and competition dominated domestic politics, but people disagreed about **[***259]** what these things were, and about why, and to what extent, they were good or bad. [19] **[****40]** Men like McReynolds, Wilson's Attorney General, and Brandeis, the President's chief adviser on antitrust policy, could concur upon the need for forceful antitrust legislation and prosecution while finding themselves parted -- as their later battles on this Court made clear -- by a vast gulf in their understandings of economic theory and marketplace ethics. [20] Absent **[*292]** agreement

---

[16] There is a common core to present-day and early 20th-century understandings of the distinction between dissolution and divestiture:

"As applied in both early and more recent antitrust cases, 'dissolution' refers to an antitrust judgment which dissolves or terminates an illegal combination or association -- putting it out of business, so to speak. 'Divestiture' is used to refer to situations where the defendants are required to divest or dispossess themselves of specified property in physical facilities, securities, or other assets." Oppenheim, Divestiture as a Remedy Under the Federal Antitrust Laws, 19 Geo. Wash. L. Rev. 119, 120 (1950).

Nevertheless, for at least the past four decades dissolution and divestiture have been treated as interchangeable terms in ***antitrust law***. See *United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 330, n. 11 (1961)* (terms are to a "large degree interchangeable"); see also Oppenheim, 19 Geo. Wash. L. Rev., at 121 (recognizing technical distinction between terms, but treating them as interchangeable nonetheless).

During the first decades of this century, however, "dissolution" was the favored term for a remedy that put an end to an unlawful combination and "divestiture" was rarely mentioned in the antitrust context. The early 20th-century treatise writers seem to have spoken exclusively in terms of dissolution. See, e.g., W. Thornton, A Treatise on the Sherman Anti-Trust Act § 372 (1913). Not surprisingly, all of the legislative history cited by the parties to this case refers to dissolution, not to divestiture.

Yet even without using the term "divestiture," Congress could and did recognize the appropriateness of a divestiture remedy in merger cases: § 11 of the Clayton Act expressly authorizes the FTC to order a defendant corporation to "divest itself of the stock held . . . contrary to the provisions of sectio[n] seven . . . of this Act." 38 Stat. 735. Indeed, the term "divestiture" appears to have entered the antitrust vocabulary as a consequence of FTC proceedings against alleged violators of *§ 7* of the Act. See, e.g., *Arrow-Hart & Hegeman Electric Co. v. FTC, 291 U.S. 587 (1934)*; *FTC v. Western Meat Co., 272 U.S. 554 (1926)*. Use of the term in those cases is unsurprising, for the text of the Act suggested that "divestiture," rather than "dissolution," was the remedy being sought.

By 1944, Justice Douglas was using the two terms in close proximity, see *United States v. Crescent Amusement Co., 323 U.S. 173, 188-189 (1944)* (Sherman Act case), although it is at least arguable that his usage preserved the technical distinction that was to be generally elided less than a decade later. Cf. *Swift & Co. v. United States, 276 U.S. 311, 319 (1928)* (referring to "divestiture of the instrumentalities" in a case raising both Sherman Act and Clayton Act claims). It would appear that, as the moral conception of dissolution lost favor and divestiture decrees became paradigmatic of dissolution remedies, the two concepts were collapsed into one another.

[17] For discussion of the scope of various dissolution decrees entered pursuant to the federal antitrust laws, see Hale, Trust Dissolution: "Atomizing" Business Units of Monopolistic Size, 40 Colum. L. Rev. 615 (1940); Adams, Dissolution, Divorcement, Divestiture: The Pyrrhic Victories of Antitrust, 27 Ind. L.J. 1 (1951). See also 2 A. Link, Wilson: The New Freedom 417-423 (1956).

[18] See, e.g., H. Thorelli, The Federal Antitrust Policy 72-87 (1954). Thorelli observes that "[n]o general incorporation law before 1888 explicitly sanctioned intercorporate stockholdings; some state laws even explicitly forbade them in the absence of special permission by the legislature. Common law rules did not recognize such relationships between corporations." Id., at 83. Perhaps because of the rapid pace of developments in corporate law, the politically charged "trust" concept came to embrace any large corporate combination as well as one specific device for creating such combinations. Id., at 84-85. See also D. Martin, Mergers and the Clayton Act 15, 43 (1959).

[19] See, e.g., Thorelli, The Federal Antitrust Policy 108-163, 309-352.

on the terms of debate, dissolution could mean the corporate death sentence, or the decrees of the Standard Oil and American Tobacco cases, or something else. [21] So long as this ambiguity persisted, dissolution had to be considered a public remedy, one that encompassed a power peculiarly suited to transgressions so "material and serious" as to "harm or menace the public welfare" in a manner transcending the " **[**1865]** quarrels of private litigants." [22] For those like Brandeis, who viewed dissolution as desirable only if treated not as a moral penalty **[****38]** but rather as a necessary economic remedy, [23] it would be imprudent to allow private parties to control a weapon potentially so lethal. Although it may now be second nature to conceive of dissolution in economic terms compatible with the policy Brandeis championed, [24] this view was anything but uncontroversial when the Act was drafted. [25]

[**41]** Once the historical importance of the distinction between dissolution and divestiture is understood, American's argument from the legislative history becomes singularly unpersuasive. The rejection of a proposed remedy that would terminate the corporate existence of American and appoint a **[*293]** receiver to supervise the disposition of its assets is surely not the equivalent of the rejection of a remedy that would merely rescind a purchase of stock or assets. Dissolution was too vague and ill defined a remedy to be either incorporated into or excluded from § 16 as such; Congress instead sensibly avoided the problematic word and spoke in terms of equitable relief drawn to redress damage or loss which a private party might suffer by consequence of the Act's violation. [26] That **[***260]** divestiture was encompassed within the concept of dissolution as understood at the time of the Clayton Act's framing does not imply that the equitable formulation of § 16 cannot permit divestiture while excluding more severe sanctions that also traveled under the name "dissolution."

[**42]** For similar reasons, we need not consider how much weight might otherwise be due to *Graves v. Cambria Steel Co., 298 F. 761 (NY 1924)*, a brief District Court decision by Judge Learned Hand upon which American relies heavily. [27] The suit appears to have been brought by dissatisfied shareholders of a target corporation who wished

---

[20] See 2 Link, Wilson: The New Freedom 117, n. 83.

[21] See *CIA. Petrolera Caribe, Inc., 754 F. 2d, at 419-422*.

[22] *North River Sugar Refining Co., 121 N.Y., at 609, 24 N.E., at 835*.

[23] "[Brandeis] believed that anti-trust policy should be constructive rather than destructive: '. . . we should approach this subject from the point of view of regulation rather than of restriction; because industrial crime is not a cause, it is an effect -- the effect of a bad system.'" A. Mason, Brandeis: A Free Man's Life 402 (1956) (footnote omitted).

[24] Cf. *United States v. Du Pont & Co., 366 U.S., at 326* ("divestiture" is the "most drastic, but most effective, of antitrust remedies," yet it should be imposed only to "restore competition" and must not be "punitive"). See also Comment, The Personification of the Business Corporation in American Law, *54 U. Chi. L. Rev. 1441, 1478-1483 (1987)* (discussing decline of moral conceptions of the corporation).

[25] The notion that a proper remedy for violating the antitrust laws is complete dissolution of the wrongdoer persists in some state antitrust statutes that allow termination of a foreign corporation's right to do business within the State when the corporation is found guilty of violating the law. See e.g., *Wis. Stat. § 133.12* (1987-1988).

[26] Congress could, of course, have referred expressly to the divestiture remedy, as was done in § 11 of the Act, directing that the FTC shall require a violator of *§ 7* to "divest itself of the stock" unlawfully acquired. There was, however, no reason for Congress to itemize the various remedies which might be available in a § 16 suit. Moreover, while divestiture might be the appropriate remedy in every *§ 7* case prosecuted by the FTC, there is no reason to believe that the same would be true in private *§ 7* cases. There is thus nothing remarkable about the absence of any specific reference to divestiture in § 16.

[27] American also seeks to buttress its position by citations to *Fleitmann v. Welsbach Co., 240 U.S. 27 (1916)*; *Duplex Printing Press Co. v. Deering, 254 U.S. 443 (1921)*; *General Investment Co. v. Lake Shore & M.S.R. Co., 260 U.S. 261, 287 (1922)*; *Continental Securities Co. v. Michigan Cent. R. Co., 16 F. 2d 378 (CA6 1926)*, cert. denied, ***274 U.S. 741 (1927)***; and *Venner v. Pennsylvania Steel Co. of New Jersey, 250 F. 292 (NJ 1918)*. Several of these cases seem to us to involve issues entirely

to dissolve the new merged entity. The plaintiffs sought relief **[*294]** under § 16 of the Clayton **[**1866]** Act. Judge Hand remarked that the suit "is really a suit for the dissolution of a monopoly pro tanto. I cannot suppose that any one would argue that a private suit for dissolution would lie under section 16 of the Clayton Act." *298 F., at 762*. Not only does Hand, like Floyd, Untermyer, and Brandeis before him, refer to dissolution rather than divestiture, but, moreover, the state corporation law overtones of the inchoate complaint make it possible that the suit implicated the more drastic forms of dissolution.

[**43]** ***LEdHN[1K]***[] [1K] ***LEdHN[5E]***[] [5E] ***LEdHN[8]***[] [8]The inferences that American draws from its excerpts from the subcommittee hearings simply are not confirmed by anything that has been called to our attention in the Committee Reports, the floor debates, the Conference Report, or contemporaneous judicial interpretations. [28] Indeed, a fair reading **[***261]** of the entire legislative history supports the conclusion that § 16 means exactly what it says when it endorses the "conditions and principles" governing injunctive relief in courts of equity: that the provision should be construed generously and flexibly pursuant to principles of equity. See **[*295]** *CIA. Petrolera Caribe, Inc., 754 F. 2d, at 418-427*. As the Court stated in *Hecht Co. v. Bowles, 321 U.S., at 329*:

HN9[] "The essence of equity jurisdiction has been the power of the Chancellor to do equity and to mould each **[****44]** decree to the necessities of the particular case. Flexibility rather than rigidity has distinguished it."

HN10[] More recently, in *Weinberger v. Romero-Barcelo, 456 U.S. 305, 313 (1982)*, we observed that when Congress endows the federal courts with equitable jurisdiction, Congress acts aware of this longstanding tradition of flexibility. "'Unless a statute in so many words, or by a necessary and inescapable inference, restricts the court's jurisdiction in equity, the full scope of that jurisdiction is to be recognized and applied.'" Ibid., quoting *Porter v. Warner Holding Co., 328 U.S. 395, 398 (1946)*. These principles unquestionably support a construction of the statute that will enable a chancellor to impose the most effective, usual and straightforward remedy to rescind an unlawful purchase of stock or assets. The fact that the term "divestiture" is used to describe what is typically nothing more than the familiar remedy of rescission does not place the remedy beyond the normal reach of the chancellor.

[**45]** IV

LEdHN[1L][] [1L] ***LEdHN[9]***[] [9] ***LEdHN[10A]***[] [10A]Our conclusion that a district court has the power to order divestiture in appropriate cases brought under § 16 of the Clayton Act does not, of course, mean that such power should be exercised in every situation in which the Government would be entitled to such relief under § 15. ***HN11***[] In a Government case the proof of the violation of law may itself establish sufficient public injury to warrant relief. See *Du Pont, 366 U.S., at 319-321*; see also *Virginian R. Co. v. Railway Employees, 300 U.S. 515,*

---

distinct from those posed here, and, in any event, in none of these precedents do we find anything that casts any doubt upon the rule we announce today.

[28] Professors Areeda and Turner have criticized the Court of Appeals for the Ninth Circuit on the ground that it did not correctly evaluate the legislative history of § 16 in IT&T. Areeda and Turner state that the "fragment of legislative history" relied upon by the Court of Appeals "cannot bear the weight the court placed upon it, when the reports of the relevant House and Senate committees were silent on the point, which also did not appear to have been mentioned on the House or Senate floor." They point out that "other courts have indicated, correctly, that divestiture is available in a private suit challenging unlawful mergers," and conclude that "divestiture is the normal and usual remedy against an unlawful merger, whether sued by the government or by a private plaintiff." 2 P. Areeda & D. Turner, ***Antitrust Law*** § 328b (1978) (footnotes omitted). Other commentators have likewise reasoned that § 16 affords private plaintiffs a divestiture remedy. See, e.g., Peacock, Private Divestiture Suits Under Section 16 of the Clayton Act, 48 Tex. L. Rev. 54 (1969); Note, Availability of Divestiture in Private Litigation as a Remedy for violation of *Section 7* of the Clayton Act, 49 Minn. L. Rev. 267 (1964); Note, Divestiture as a Remedy in Private Actions Brought Under Section 16 of the Clayton Act, *84 Mich. L. Rev. 1579 (1986)*.

*552 [**1867] (1937)* ("Courts of equity may and frequently do, go much farther both to give and withhold relief in furtherance of the public interest than they are accustomed to go when only private interests are involved"); *United States v. San Francisco, 310 U.S. 16, 30-31 (1940)* **[*296]** (authorizing issuance **[****46]** of injunction at Government's request without balancing of the equities). A private litigant, however, must have standing -- in the words of § 16, he must prove "threatened loss or damage" to his own interests in order to obtain relief. See *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)*. Moreover, equitable defenses such as laches, or perhaps "unclean hands," may protect consummated transactions from belated attacks by private parties when it would not be too late for the Government to vindicate the public interest.

LEdHN[1M][] [1M] ***LEdHN[10B]***[] [10B]Such questions, however, are not presented in this case. We are merely confronted **[***262]** with the naked question whether the District Court had the power to divest American of any part of its ownership interests in the acquired Lucky Stores, either by forbidding the exercise of the owner's normal right to integrate the operations of the two previously separate companies, or by requiring it to sell certain assets located in California. We hold that such a remedy is a form **[****47]** of "injunctive relief" within the meaning of § 16 of the Clayton Act. Accordingly, the judgment of the Court of Appeals is reversed, and the case is remanded for further proceedings consistent with this opinion.

It is so ordered.

Concur by: KENNEDY

Concur

JUSTICE KENNEDY, concurring.

In agreement with our holding that § 16 of the Clayton Act does authorize divestiture as a remedy for violations of *§ 7* of the Clayton Act, I join the Court's opinion. I write further to note that both the respondents and various interested labor unions, the latter as amici curiae, have argued for a different result on the basis of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (Clayton Act § 7A, as added and amended), *15 U.S.C. § 18a*. See Brief for Respondents 47-48; Brief for United Food and Commercial International Union et al. as Amici Curiae 7-15. Although I do not believe that § 7A is controlling as an interpretation of the earlier **[*297]** enacted § 16, it may be of vital relevance in determining whether to order divestiture in a particular case.

Section 7A enables the Federal Government to review certain transactions that might violate *§ 7* before **[****48]** they occur. The provision, in brief, requires those contemplating an acquisition within its coverage to provide the Federal Trade Commission (FTC) with the information necessary for determining "whether such acquisition may, if consummated, violate the antitrust laws." *15 U.S.C. § 18a(d)(1)*. During the mandatory waiting period that follows the submission of this information, see *§ 18a(b)(1)*, the agency may decide, as it did in this case, to negotiate a settlement intended to eliminate potential violations. See *16 CFR §§ 2.31-2.34 (1989)*. The procedure may resolve antitrust disputes in a manner making it easier for businesses and unions to predict the consequences of mergers and to conform their economic strategies in accordance with the probable outcome.

The respondents, and the unions in their brief as amici, argue that a State or private person should not have the power to sue for divestiture under § 16 following a settlement approved by the FTC. They maintain that the possibility of such actions will reduce the Federal Government's negotiating strength and destroy the predictability that Congress sought to provide when it enacted § 7A. It is plausible, **[****49]** in my view, that allowing suits under § 16 may have these effects in certain instances. But the respondents and unions have identified nothing in § 7A that contradicts the Court's interpretation of *§ 7* and § 16. Section 7A, indeed, may itself contain **[**1868]** language contrary to their position. See, e.g., *15 U.S.C. § 18a(i)(1)*. Although Congress might **[***263]** desire at some point to enact a strict rule prohibiting divestiture after a negotiated settlement with the FTC, it has not done so yet.

The Court's opinion, however, does not render compliance with the Hart-Scott-Rodino Antitrust Improvements Act irrelevant to divestiture actions under § 16. The Act, for instance, may bear upon the issue of laches. By establishing a **[*298]** time period for review of merger proposals by the FTC, § 7A may lend a degree of objectivity to the laches determination. Here the State received the respondents' § 7A filings in mid-April 1988, see Brief for Petitioner 3, and so had formal notice of the parties' intentions well before completion of the merger or the settlement with the FTC. It elected not to act at that time, but now seeks a divestiture **[****50]** which, the facts suggest, would upset labor agreements and other matters influenced in important ways by the FTC proceeding. These considerations should bear upon the ultimate disposition of the case. As the Ninth Circuit stated:

"California could have sued several months earlier and attempted to enjoin the merger before the stock sale was completed. The Attorney General chose not to do so. California must accept the consequences of his choice." *872 F. 2d 837, 846 (1989)*.

With the understanding that these consequences may include the bar of laches, I join the Court's decision.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN1[] **Regulated Practices, Market Definition**

Competition is the driving force behind a free enterprise system. Unlike centrally planned economies, where decisions about production and allocation are made by government bureaucrats who ostensibly see the big picture and know to do the right thing, capitalism relies on decentralized planning, millions of producers and consumers making hundreds of millions of individual decisions each year, to determine what and how much will be produced. Competition plays the key role in this process: It imposes an essential discipline on producers and sellers of goods to provide a consumer with a better product at a lower cost; it drives out inefficient and marginal producers, releasing resources to higher-valued uses; it promotes diversity, giving consumers choices to fit a wide array of personal preferences; it avoids permanent concentrations of economic power, as even the largest firm can lose market share to a feistier and hungrier rival.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN2[] **Regulated Practices, Market Definition**

It is a simple but important truth that antitrust laws are designed to protect the integrity of the market system by assuring that competition reigns freely. Ultimately a court must resolve a practical question in every monopolization case: Is this the type of situation where market forces are likely to cure a perceived problem within a reasonable period of time? Or, have barriers been erected to constrain the normal operation of a market, so that a problem is not likely to be self-correcting? In the latter situation, it might well be necessary for a court to correct a market imbalance; in the former, a court ought to exercise extreme caution because judicial intervention in a competitive situation can itself upset the balance of market forces, bringing about the very ills antitrust laws are meant to prevent.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN3[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Monopsony is defined as a market situation in which there is a single buyer or a group of buyers making joint decisions. Monopsony and monopsony power are the equivalent on the buying side of monopoly and monopoly power on the selling side.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN4[] **Regulated Practices, Market Definition**

All antitrust cases must make economic sense. Competition, not government intervention, is the touchstone of a healthy, vigorous economy. Monopoly power is the power to exclude competition or control prices.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

Many legitimate market arrangements diminish the number of competitors. It would be odd if they did not, as the nature of competition is to make winners and losers. If there are no significant barriers to entry eliminating competitors will not enable survivors to reap a monopoly profit; any attempt to raise prices above a competitive level will lure into a market new competitors able and willing to offer their commercial goods or personal services for less.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] **Regulated Practices, Market Definition**

A basic fact of economic life is that a high market share, though it may ordinarily raise an inference of monopoly power, will not do so in a market with low entry barriers or other evidence of a defendant's inability to control prices or exclude competitors.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

Mergers & Acquisitions Law > Merger Guidelines

Mergers & Acquisitions Law > Antitrust > General Overview

HN7[] **Regulated Practices, Market Definition**

If entry into a market is so easy that existing competitors cannot succeed in raising price for any significant period of time, the United States Department of Justice is unlikely to challenge mergers in that market.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Evidence > Types of Evidence > Documentary Evidence > Summaries

HN8[] **Standards of Review, Clearly Erroneous Review**

An appellate court determines if trial court factual findings are clearly erroneous.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Regulated Practices, Market Definition**

A district court acts within the legitimate scope of its discretion in determining that evidence of a high market share establishes a prima facie antitrust violation, shifting to a defendant the burden of rebutting a prima facie violation. The converse is not true, however; evidence of a high market share does not require a district court to conclude that there is an antitrust violation. In fact, such a conclusion normally should not be drawn where the evidence also indicates that there is no barrier to entry into a relevant market. An absence of entry barriers into a market constrains anticompetitive conduct, irrespective of a market's degree of concentration. The explanation is simple; where entry barriers are low, market share does not accurately reflect a party's market power.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Regulated Practices, Monopolies & Monopolization**

In evaluating monopoly power, it is not market share that counts, but the ability to maintain market share.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] **Regulated Practices, Monopolies & Monopolization**

It cannot be said often enough that antitrust laws protect competition, not competitors. Competition is essential to effective operation of a free market because it encourages efficiency, promotes consumer satisfaction and prevents the accumulation of monopoly profits. When a producer is shielded from competition, he is likely to provide lesser service at a higher price; the victim is a consumer who gets a raw deal. This is the evil antitrust laws are meant to avert. When a producer deters competitors by supplying a better product at a lower price, when he eschews monopoly profits, when he operates his business so as to meet consumer demand and increase consumer satisfaction, the goals of competition are served, even if no actual competitors see fit to enter a market at a particular time. While the successful competitor should not be raised above the law, neither should he be held down by law.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN12[] Regulated Practices, Monopolies & Monopolization

Unlawful monopoly power is distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident which are off limits to an enforcer of antitrust laws. If a dominant supplier acts consistent with a competitive market, out of fear perhaps that potential competitors are ready and able to step in, the purpose of antitrust laws is amply served. An efficient, vigorous, aggressive competitor is not a villain antitrust laws are aimed at eliminating. Fostering an environment where businesses fight it out using the weapon of efficiency and consumer goodwill is what antitrust laws are meant to champion. Courts have failed to see how the existence of good will achieved through effective service is an impediment to, rather than the natural result of, competition.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN13[] Regulated Practices, Monopolies & Monopolization

In a free economy a market itself imposes a tough enough discipline on all market actors, large and small. Every supplier of goods and services is integrated into an endless chain of supply and demand relationships, making it dependent on the efficiency and goodwill of upstream suppliers, as well as the patronage of customers. Absent structural constraints that keep competition from performing its leveling function, few businesses can dictate terms to customers or suppliers with impunity. It is risky business even to try. A larger company often is more vulnerable to a squeeze play than a smaller one. It is for that reason that neither size nor market share alone suffice to establish a monopoly. Without the power to exclude competition, large companies that try to throw their weight around may find themselves sitting ducks for leaner, hungrier competitors. Such a tactic may boomerang, causing big trouble with suppliers.

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview

Antitrust & Trade Law > Public Enforcement > US Department of Justice Actions > General Overview

HN14[] Public Enforcement, US Federal Trade Commission Actions

Some of the most insuperable barriers in the great race of competition are the result of government regulation. Regulation often helps entrench existing businesses by placing new entrants at a competitive disadvantage. It is perhaps less well appreciated that litigation itself can be a form of regulation; lawsuits brought by the government impose significant costs on enterprises that are sued, and create significant disincentives for those that are not.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN15[] Regulated Practices, Market Definition

In a competitive market buying out competitors is not merely permissible, it contributes to market stability and promotes the efficient allocation of resources. The fact is, a relentless, growing competitor is frequently the most logical buyer of a business that is declining. For competitors in a free market to fear buying each other out lest they be hit with the expense and misery of an antitrust enforcement action amounts to a burden only slightly less palpable than a direct governmental prohibition against such a purchase. In a free enterprise system decisions such as these should be made by market actors responding to market forces, not by government bureaucrats pursuing their notions of how a market should operate. Personal initiative, not government control, is the fountainhead of progress in a capitalist economy.

Judges: Charles Wiggins and Alex Kozinski, Circuit Judges, and Justin L. Quackenbush, District Judge. * Quackenbush, District Judge, concurring.

Opinion by: KOZINSKI

Opinion

[*661] KOZINSKI, Circuit Judge:

Suspect that giant film distributors like Columbia, Paramount and Twentieth Century-Fox had fallen prey to Raymond Syufy, the canny operator of a chain of Las Vegas, Nevada, movie theatres, the United States Department of Justice brought this civil antitrust action to force Syufy to disgorge the theatres he had purchased in 1982-84 from his former competitors. The case is unusual in a number of respects: The Department of Justice concedes that moviegoers in Las Vegas suffered **[**2]** no direct injury as a result of the allegedly illegal transactions; nor does the record reflect complaints from Syufy's bought-out competitors, as the sales were made at fair prices and not precipitated by any monkey business; and the supposedly oppressed movie companies have weighed in on Syufy's side. The Justice Department nevertheless remains intent on rescuing this platoon of Goliaths from a single David.

After extensive discovery and an 8 1/2 day trial, the learned district judge entered comprehensive findings of fact and conclusions of law, holding for Syufy. He found, inter alia, that Syufy's actions did not injure competition because there are no barriers to entry -- others could and did enter the market -- and that Syufy therefore did not have the power to control prices or exclude the competition. While Justice raises a multitude of issues in its appeal, these key findings of the district court present the greatest hurdle it must overcome.

Facts

Gone are the days when a movie ticket cost a dime, popcorn a nickel and theatres had a single screen: This is the age of the multiplex. With more than 300 new films released every year -- each potentially the next Batman or **[**3]** E.T. -- many successful theatres **[*662]** today run a different film on each of their six, twelve or eighteen screens. The multiplex offers something for everyone: Moviegoers can choose from a wider selection of films; theatre operators are able to balance profits and losses from blockbusters and flops, and to reduce manpower by consolidating concession islands; the producers, of course, like having the extra screens on which to display their wares.

* The Honorable Justin L. Quackenbush, United States District Judge for the Eastern District of Washington, sitting by designation.

Raymond Syufy understood the formula well. In 1981, he entered the Las Vegas market with a splash by opening a six-screen theatre. Newly constructed and luxuriously furnished, it put existing facilities to shame. Syufy's entry into the Las Vegas market caused a stir, precipitating a titanic bidding war. [1] Soon, theatres in Las Vegas were paying some of the highest license fees in the nation, while distributors sat back and watched the easy money roll in.

[4]** It is the nature of free enterprise that fierce, no holds barred competition will drive out the least effective participants in the market, providing the most efficient allocation of productive resources. And so it was in the Las Vegas movie market in 1982. After a hard fought battle among several contenders, Syufy gained the upper hand. Two of his rivals, Mann Theatres and Plitt Theatres, saw their future as rocky and decided to sell out to Syufy. While Mann and Plitt are major exhibitors nationwide, neither had a large presence in Las Vegas. Mann operated two indoor theatres with a total of three screens; Plitt operated a single theatre with three screens. Things were relatively quiet until September 1984; in September, Syufy entered into earnest negotiations with Cragin Industries, his largest remaining competitor. [2] Cragin sold out to Syufy midway through October, leaving Roberts Company, a small exhibitor of mostly second-run films, as Syufy's only competitor for first-run films in Las Vegas.

[5]** It is these three transactions -- Syufy's purchases of the Mann, Plitt and Cragin theatres -- that the Justice Department claims amount to antitrust violations. [3] As government counsel explained at oral argument, the thrust of its case is that "you may not get monopoly power by buying out your competitors." Tr. of Oral Arg. at 1.

Discussion

HN1[] Competition is the driving force behind our free enterprise system. Unlike centrally planned economies, where decisions about production and allocation are made by government bureaucrats who ostensibly **[**6]** see the big picture and know to do the right thing, capitalism relies on decentralized planning -- millions of producers and consumers making hundreds of millions of individual decisions each year -- to determine what and how much will be produced. **[*663]** Competition plays the key role in this process: It imposes an essential discipline on producers and sellers of goods to provide the consumer with a better product at a lower cost; it drives out inefficient and marginal producers, releasing resources to higher-valued uses; it promotes diversity, giving consumers choices to fit a wide array of personal preferences; it avoids permanent concentrations of economic power, as even the largest firm can lose market share to a feistier and hungrier rival. If, as the metaphor goes, a market economy is governed by an invisible hand, competition is surely the brass knuckles by which it enforces its decisions.

When competition is impaired, producers may be able to reap monopoly profits, denying consumers many of the benefits of a free market. ***HN2***[] It is a simple but important truth, therefore, that our **[**7]** antitrust laws are designed to protect the integrity of the market system by assuring that competition reigns freely. While much has

---

[1] Film distributors do not hand out prints for free; they sell exhibition licenses. These licenses normally specify a percentage of weekly house receipts, known as license fees, payable by the theatre owner to the distributor. Where more than one theatre in a given area volunteers to pay the license fee for a particular film, the distributor has several options: It can license the film to more than one theatre in the area; it can award the film to a particular theatre with which it has an ongoing relationship; or it can let them all bid for exclusive exhibition rights. Where the distributor adopts the competitive bidding approach, as virtually all distributors did in Las Vegas prior to October 1984, the high bid usually includes a guarantee -- a minimum fee payable to the distributor even if the film bombs.

As bidding in Las Vegas grew more fierce, guarantee amounts went over the top. Too often, the bids were so high that theatre owners ran up substantial losses. The industry refers to these as busted guarantees, meaning that because the film did less business than was expected, the theatre was trapped into paying the higher guarantee amount instead of the percentage of box office it had negotiated. Occasionally, guarantees in Las Vegas were so high that they exceeded the gate at a particular theatre.

[2] Cragin's Redrock Theatre was an 11-screen multiplex. It was sold to Syufy when the enterprise fell upon hard times because of a dispute between partners Lucille Cragin and Horst Schmidt.

[3] Specifically, the government's complaint alleges monopolization and/or attempted monopolization of a part of commerce in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2 (1988)*, and substantial lessening of competition by acquisition within a line of commerce in violation of *Section 7* of the Clayton Act, *15 U.S.C. § 18 (1988)*.

been said and written about the antitrust laws during the last century of their existence, ultimately the court must resolve a practical question in every monopolization case: Is this the type of situation where market forces are likely to cure the perceived problem within a reasonable period of time? Or, have barriers been erected to constrain the normal operation of the market, so that the problem is not likely to be self-correcting? In the latter situation, it might well be necessary for a court to correct the market imbalance; in the former, a court ought to exercise extreme caution because judicial intervention in a competitive situation can itself upset the balance of market forces, bringing about the very ills the antitrust laws were meant to prevent. *See* R. Coase, *The Firm, The Market, and the Law* 117-19 (1988); R. Posner, *Economic Analysis of Law* 324-25, 338-39 (3d ed. 1986).

It is with these observations in mind that we turn to the case before us. Perhaps the most remarkable aspect of this case is that the accused monopolist is **[**8]** a relatively tiny regional entrepreneur while the alleged victims are humongous national corporations with considerable market power of their own. While this is not dispositive -- it is conceivable that a little big man may be able to exercise monopoly power locally against large national entities -- chances are it is not without significance. Common sense suggests, and experience teaches, that monopoly power is far more easily exercised by larger, economically more powerful entities against smaller, economically punier ones, than vice versa.

Also of significance is the government's concession that Syufy was only a monopsonist, not a monopolist. [4] Thus, the government argues that Syufy had market power, but that it exercised this power only against its suppliers (film distributors), not against its consumers (moviegoers). This is consistent with the record, which demonstrates that Syufy always treated moviegoers fairly: The movie tickets, popcorn, nuts and the Seven-Ups cost about the same in Las Vegas as in other, comparable markets. While it is theoretically possible to have a middleman who is a monopolist upstream but not downstream, this is a somewhat counterintuitive scenario. **[**9]** Why, if he truly had significant market power, would Raymond Syufy have chosen to take advantage of the big movie distributors while giving a fair shake to ordinary people? And why do the distributors, the alleged victims of the monopolization scheme, think that Raymond Syufy is the best thing that ever happened to the Las Vegas movie market?

The answers to these questions are significant because, like ***HN4***[] all antitrust cases, this one must make economic sense. *See* Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 594 n. 19, 596-97, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). **[**10]** Keeping in mind that competition, not government intervention, **[*664]** is the touchstone of a healthy, vigorous economy, we proceed to examine whether the district court erred in concluding that Syufy does not, in fact, hold monopoly power. There is universal agreement that monopoly power is the power to exclude competition or control prices. *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; *Syufy Enters. v. American Multicinema, Inc., 793 F.2d 990, 993 (9th Cir. 1986)*, *cert. denied*, *479 U.S. 1031, 93 L. Ed. 2d 830, 107 S. Ct. 876 (1987)*. The district court determined that Syufy possessed neither power. As the government's case stands or falls with these propositions, the parties have devoted much of their analysis to these findings. So do we.

1. Power to Exclude Competition

It is true, of course, that when Syufy acquired Mann's, Plitt's and Cragin's theatres he temporarily diminished the number of competitors in the Las Vegas first-run film market. But this does not necessarily indicate foul play; **[**11]** ***HN5***[] many legitimate market arrangements diminish the number of competitors. It would be odd if they did not, as the nature of competition is to make winners and losers. [5] If there are no significant barriers to entry, however, eliminating competitors will not enable the survivors to reap a monopoly profit; any attempt to raise prices above the

---

[4] ***HN3***[] Monopsony is defined as a "market situation in which there is a single buyer or a group of buyers making joint decisions. Monopsony and monopsony power are the equivalent on the buying side of monopoly and monopoly power on the selling side." R. Lipsey, P. Steiner & D. Purvis, *Economics* 976 (7th ed. 1984).

[5] *See* 3 P. Areeda & D. Turner, ***Antitrust Law*** para. 608e, at 20-21 (1978); L. Sullivan, *Handbook of the Law of Antitrust* § 34, at 96 (1977). Given this reality, it would be perverse to expect rivals engaged in head on competition to act like best friends; indeed, it would be cause for suspicion if they did.

competitive level will lure into the market new competitors able and willing to offer their commercial goods or personal services for less. *See* Metro Mobile CTS, Inc. v. NewVector Commun., Inc., 892 F.2d 62 (9th Cir. 1989).

Time after time, we have recognized **HN6**[] this basic fact of economic life:

> A high market share, though it may **[**12]** ordinarily raise an inference of monopoly power, will not do so in a market with low entry barriers or other evidence of a defendant's inability to control prices or exclude competitors.

Oahu Gas Serv., Inc. v. Pacific Resources, Inc., 838 F.2d 360, 366 (9th Cir.), *cert. denied*, *488 U.S. 870, 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)* (citation omitted). *See also* Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 924 (9th Cir. 1980), *cert. denied*, *450 U.S. 921, 67 L. Ed. 2d 348, 101 S. Ct. 1369 (1981)* ("Blind reliance upon market share, divorced from commercial reality, [can] give a misleading picture of a firm's actual ability to control prices or exclude competition."). [6] There is nothing magic about this proposition; it is simple common sense, embodied in the Antitrust Division's own Merger Guidelines:

> **HN7**[] If entry into a market is so easy that existing competitors could not succeed in raising price for any significant period of time, the Department is unlikely to challenge mergers in that market.

Antitrust Policies and Guidelines, U.S. Dep't of Justice, Merger Guidelines **[**13]** § 3.3, reprinted in 4Trade Reg. Rep. (CCH) P 13,103 at 20,562 (1988).

The district court, after taking testimony from a dozen and a half witnesses and **[*665]** examining innumerable graphs, charts, statistics and other exhibits, found that there were no barriers to entry in the Las Vegas movie market. **HN8**[] Our function is narrow: we must determine whether that finding is clearly erroneous. *See* Oahu Gas, 838 F.2d at 363, 367. Our review of the record discloses that the district court's finding is amply supported by the record.

[14]** We bypass as surplusage the hundreds of pages of expert and lay testimony that support the district court's finding, and focus instead only on a single -- to our minds conclusive -- item. Immediately after Syufy bought out the last of his three competitors in October 1984, he was riding high, having captured 100% of the first-run film market in Las Vegas. But this utopia proved to be only a mirage. That same month, a major movie distributor, Orion, stopped doing business with Syufy, sending all of its first-run films to Roberts Company, a dark horse competitor previously relegated to the second-run market. [7] Roberts Company took this as an invitation to step into the major league and, against all odds, began giving Syufy serious competition in the first-run market. Fighting fire with fire,

---

[6] We have previously held that **HN9**[] a district court acts within the legitimate scope of its discretion in determining that evidence of a high market share establishes a prima facie antitrust violation, shifting to the defendant the burden of rebutting the prima facie violation. *See* California v. American Stores Co., 872 F.2d 837, 842 (9th Cir. 1989), reversed on other grounds, 495 U.S. 271, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990). The converse is not true, however; evidence of a high market share does not require a district court to conclude that there is an antitrust violation. In fact, such a conclusion normally should not be drawn where the evidence also indicates that there is no barrier to entry into the relevant market. *See* Oahu Gas Serv., Inc. v. Pacific Resources, Inc., 838 F.2d 360, 366 (9th Cir.), *cert. denied*, ***488 U.S. 870 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)***; *accord* American Stores, 872 F.2d at 842 ("An absence of entry barriers into a market constrains anticompetitive conduct, irrespective of the market's degree of concentration."). The explanation is simple; where entry barriers are low, market share does not accurately reflect the party's market power. United States v. Waste Mgmt., Inc., 743 F.2d 976, 982-83 (2d Cir. 1984).

[7] Second-run films are the same as first-run films, only older. When a film is initially released for public exhibition, it is in its first run. Once public demand for the film has fallen off (but usually before it is reduced to a dead calm), the first-run theatre will ship it out to make room for something more recent. The film may then open elsewhere in the same area, usually at a lower ticket price, this being the film's second run.

Roberts opened three multiplexes within a 13-month period, each having six or more screens. By December 1986, Roberts was operating 28 screens, trading places with Syufy, who had only 23. At the same time, Roberts was displaying a healthy portion of all first-run films. In fact, Roberts got exclusive exhibition rights to many of its films, meaning that Syufy could not show them at all.

[15]** By the end of 1987, Roberts was showing a larger percentage of first-run films than was the Redrock multiplex at the time Syufy bought it. Roberts then sold its theatres to United Artists, the largest theatre chain in the country, and Syufy continued losing ground. It all boils down to this: Syufy's acquisitions did not short circuit the operation of the natural market forces; Las Vegas' first-run film market was more competitive when this case came to trial than before Syufy bought out Mann, Plitt and Cragin. [8]

[16]** The Justice Department correctly points out that Syufy still has a large market share, but attributes far too much importance to this fact. [9] ***HN10***[] In evaluating **[*666]** monopoly power, it is not market share that counts, but the ability to *maintain* market share. *See* Oahu Gas, 838 F.2d at 366. Syufy seems unable to do this. In 1985, Syufy managed to lock up exclusive exhibition rights to 91% of all the first-run films in Las Vegas. By the first quarter of 1988, that percentage had fallen to 39%; United Artists had exclusive rights to another 25%, with the remaining 36% being played on both Syufy and UA screens.

[17]** Syufy's share of box office receipts also dropped off, albeit less precipitously. [10] **[**18]** In 1985, Syufy raked in 93% of the gross box office from first-run films in Las Vegas. By the first quarter of 1988, that figure had fallen to

---

[8] The government argues that the district court's finding that "Roberts was a *successful* competitor of Syufy in Las Vegas," United States v. Syufy Enters., 712 F. Supp. 1386, 1393 (N.D.Cal. 1989) (emphasis added), is clearly erroneous because it conflicts with a stipulation that "Roberts was not an *effective* competitor." *United States v. Syufy Enters.*, No. C-86-3057-WHO at 6 (N.D.Cal. Nov. 3, 1988) (Stipulated Facts) (emphasis added). We see no reason to resolve this semantic squabble. The stipulation on which the government relies goes on to state that "Roberts expanded its operation in Las Vegas from five screens in 1983 to 28 screens in 1987." *Id.* It is this fact that colors our conclusion, not the particular adjective selected by the parties or by the district court.

The stipulation -- even if read as the government suggests -- does not undermine the district court's separate findings that United Artists, Roberts' successor, "competes vigorously with Syufy, a substantially smaller chain," that UA is "much more successful than was Roberts because of its substantial 'clout' with distributors," and that UA could, if it wished to, compete with Syufy even more vigorously. 712 F. Supp. at 1394. All of this amply supports the district court's determination that Syufy faces substantial competition.

[9] The government also challenges the district court's definition of the relevant upstream product market in Las Vegas. The court defined the market broadly to include not only first-run theatrical exhibition, but also "exhibition on home video, cable television, and pay-per-view television." 712 F. Supp. at 1389. We agree with the government that this is not the proper market definition in examining Syufy's power over film distributors. While moviegoers may well view these alternative methods of film exhibition as readily substitutable, film distributors do not. Distributors use first-run theatrical exhibition to make sure that audiences are exposed to a film so that, even if it gets bad reviews and fails to turn a profit in theatres, people switching channels or checking out videos will recognize the title and be induced by its fame to watch it. That first-run theatrical exhibition enhances a film's performance in auxiliary markets does not mean that auxiliary markets can substitute for theatrical release. The district court was therefore mistaken in relying on testimony that "of the 578 films produced in 1987, 214 were released on home video and not in the theatres," id. at 1400, as there was no suggestion that any of these 214 films were suitable for theatrical release, or that any film has ever been released first on home video and then later played in first-run theaters. Jane Fonda's Low Impact Aerobic Workout may be a best-selling videocassette, but it is unlikely to be the hit at a local movie theatre.

The district court's erroneous definition of the relevant upstream product market does not warrant reversal, however. The district court repeatedly made alternative findings using the government's narrower market definition limited solely to first-run exhibition. Our review of the record convinces us that these alternative findings are supported by substantial evidence.

[10] The district court was entitled to rely on any of several indicia of Syufy's market share, including its percentage of first-run films, its percentage of first-run playdates and its percentage of gross box office receipts. As each of these indices points in the same direction -- toward Syufy's decreasing market share -- we fail to understand what the government hopes to gain by arguing that box office receipts are the only meaningful indicator of market share.

75%. The government insists that 75% is still a large number, and we are hard-pressed to disagree; but that's not the point. The antitrust laws do not require that rivals compete in a dead heat, only that neither is unfairly kept from doing his personal best. Accordingly, the government would do better to plot these points on a graph and observe the pattern they form than to focus narrowly on Syufy's market share at a particular time. The numbers reveal that Roberts/UA has steadily been eating away at Syufy's market share: In two and a half years, Syufy's percentage of exclusive exhibition rights dropped 52% and its percentage of box office receipts dropped 18%. During the same period, Roberts/UA's newly opened theatres evolved from absolute beginners, barely staying alive, into a big business. [11]

The government concedes that there are no structural barriers to entry into the market: Syufy does not operate a bank or similar enterprise where entry is **[*667]** limited by government regulation or licensing requirements. Nor is this the type of industry, like heavy manufacturing or mining, which requires onerous front-end investments that might deter competition from all but the hardiest and most financially secure investors. [12] **[**20]** **[**19]** *See* R. Posner, *supra* p. 663, at 290. Nor do we have here a business dependent on a scarce commodity, control over which might give the incumbent a substantial structural advantage. Nor is there a network of exclusive contracts or distribution arrangements designed to lock out potential competitors. To the contrary, the record discloses a rough-and-tumble industry, marked by easy market access, fluid relationships with distributors, an ample and continuous supply of product, and a healthy and growing demand. [13] It would be difficult to design a market less susceptible to monopolization.

In any event, we are unable to agree with the government on this issue. By focusing exclusively on box office receipts, the government attributes to Syufy a prescience he does not possess. No one, not even Syufy, can accurately predict how every movie will do at the box office. As demonstrated by the large number of busted guarantees, exhibitors in Las Vegas often had great expectations for films that eventually disappeared without a trace. That does not necessarily mean that the films were bad or that the theatres that played them did not want them very much; it simply means that the exhibitor did not have perfect foresight. Thus, for example, the government stepped out of bounds in disparaging Powwow Highway. *See* Reply Brief for Appellant at 7-8 n. 7. While somewhat off beat, the film garnered terrific reviews and captured the Filmmakers Trophy at the Sundance United States Film Festival in Park City, Utah. LA Times, Jan. 31, 1989, at VI-7, col. 4. Film critic Sheila Benson described it as "a little zinger of a comedy with a rare backbone of intelligence"; "a pretty irresistible movie . . . that fixes [itself] permanently in our affections." LA Times, March 17, 1989, at VI-1, col. 2, VI-16, col. 1. *See also* L. Maltin, *Leonard Maltin's TV Movies & Video Guide* 204 (1989). Reviews this good are not common; some theatre operators, seeing that a movie had become the critic's choice, might well be willing to go for the longshot rather than the sure thing.

[11] The Antitrust Division's Merger Guidelines adopt a two-year test in determining whether there are barriers to entry in a market: if successful entry is likely within two years, there are no significant entry barriers, and the government will not challenge mergers in that market. Merger Guidelines § 3.3, reprinted in 4Trade Reg. Rep. (CCH) P 13,103 at 20,562 (1988). Had the government applied the two-year test here, it surely would not have pursued this suit against Syufy. The critical acquisition occurred in October 1984; by December 1986, Roberts had not only successfully entered the market, it was operating five more first-run screens than was Syufy.

[12] The Justice Department argues that it is expensive to build a multiplex, but the district court was rightly unimpressed by this contention. Syufy was neither the first nor the last to open a multiplex in Las Vegas: Cragin's 11-screen Redrock was there before Syufy came into the market and, soon thereafter, Roberts opened three multiplexes in quick succession. In fact, Roberts was spared the expense of construction, as several of its theatres were financed by shopping center developers from whom Roberts later leased space. *See* RT 2:254-55, 2:261, 2:272-73, 2:278-79.

[13] The Justice Department claims that the district court misunderstood the evidence on this point. It argues that Las Vegas is "overscreened," *i.e.*, that potential competitors declined to enter the market because there was not enough business to go around. The district court made detailed contrary findings: The rule of thumb in the film industry is that it takes 10,000 people to support one screen. Las Vegas is populated by approximately 600,000 residents and 100,000 tourists at any given time, leaving room for as many as 70 screens. Yet, at the time of trial, there were only 50 first-run screens in the city, meaning that the Las Vegas market offered ample opportunities to potential entrants. In addition, Las Vegas is a boom town, growing at the rate of 30,000 people a year. Thus, the potential for new entry into the first-run film market will continue. RT 2:300, 3:338, 6:989. "Because untapped potential provides a mouth-watering incentive for vigorous competition, it is axiomatic that monopoly power

[21]** Confronted with this record and the district court's clear findings, the government trots out a shopworn argument we had thought long abandoned: that efficient, aggressive competition is itself a structural barrier to entry. According to the government, competitors will be deterred from entering the market because they could not hope to turn a profit competing against Syufy. In the words of government counsel:

> There is no legal barrier. There is no law that says you can't come into this market, it's not that kind of barrier. . . . But, the fact of mere possibility in the literal sense, is not the appropriate test. Entry, after all, must, to be effective to dissipate the monopoly power that Syufy has, entry must hold some reasonable prospect of profitability for the entrant, or else the entrant will say, as Mann Theatres said . . . this is not an attractive market to enter. There will be shelter. And the reason is very clear. You have **[*668]** to compete effectively in this market. And witness after witness testified you would need to build anywhere from 12 to 24 theatres, which is a very expensive and time consuming proposition. *And, you would then find yourself in* **[**22]** *a bidding war against Syufy*.

Tr. of Oral Arg. at 5 (emphasis added).

The notion that the supplier of a good or service can monopolize the market simply by being efficient reached high tide in the law 44 years ago in Judge Learned Hand's opinion in *United States v. Aluminum Co. of Am., 148 F.2d 416 (2d Cir. 1945)*. [14] In the intervening decades the wisdom of this notion has been questioned by just about everyone who has taken a close look at it. *See, e.g., MCI Commun. Corp. v. AT & T, 708 F.2d 1081, 1107-08* (7th Cir.), *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*; 3 P. Areeda & D. Turner, *supra* n. 5, P. 608e, at 22 ("It is absurd to classify such behavior as unlawfully 'exclusionary.'"); L. Sullivan, *supra* n. 5, at 103 ("The Hand formulation . . . fails to clearly identify the differences between guilty and innocent conduct."). It has

---

is unlikely to arise in dynamic industries marked by a rapidly expanding volume of demand and low barriers to entry." *Metro Mobile CTS, Inc. v. NewVector Commun., Inc., 892 F.2d 62, 63 (9th Cir. 1989)*.

More fundamentally, the government's static model, which assumes that there is only so much demand for a particular product, is alien to modern economic theory, as well as common sense, which teach us that things change. The demand for movie tickets can fluctuate with a variety of factors such as price, quality of the movie theatre, cost of related goods such as concession stand products, and quality of films shown. Even assuming that the Las Vegas movie market was, in some static sense, operating at capacity, the entry of a new competitor might, as the district court found, simply result in "the exit of some of the less attractive and less efficient theatres in Las Vegas." *712 F. Supp. at 1396*. Or, a new competitor with high hopes might price movie tickets lower, increase advertising, provide more convenient parking facilities, or otherwise induce people to go to the movies more often. Or, a theatre operator might hit the jackpot by catering to parents of small children who might be more likely to patronize drive-in theatres. We cannot and should not speculate as to the details of a potential competitor's performance; we need only determine whether there were barriers to the entry of new faces into the market. As we discuss in greater detail below, in making that determination we are not concerned with whether, once in the market, the competitor will wind up doing well. The thing to remember is that doing business in the crucible of free enterprise is inherently unpredictable.

[14] In *Alcoa*, Judge Hand concluded that defendant corporation violated the antitrust laws simply by making all the right moves, in particular, by filling the demand of which it was the creator:

> True, it stimulated demand and opened new uses for the metal, but not without making sure that it could supply what it had evoked. . . . "Alcoa" avows it as evidence of the skill, energy and initiative with which it has always conducted its business; as a reason why, having won its way by fair means, it should be commended, and not dismembered. . . . We may assume that all it claims for itself is true. . . . [But] it was not inevitable that it should always anticipate increases in the demand for ingot and be prepared to supply them. Nothing compelled it to keep doubling and redoubling its capacity before others entered the field. It insists that it never excluded competitors; but we can think of no more effective exclusion than progressively to embrace each new opportunity as it opened, and to face every newcomer with new capacity already geared into a great organization, having the advantage of experience, trade connections and the elite of personnel. . . . That was to "monopolize" that market, however innocently it otherwise proceeded.

148 F.2d at 430-32.

been soundly repudiated by the Second Circuit. *See* [*Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 273-74 (2d Cir. 1979)*](), *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*.

[23]** The argument government counsel presses here is a close variant of *Alcoa*: The government is not claiming that Syufy monopolized the market by being too efficient, but that Syufy's effectiveness as a competitor creates a structural barrier to entry, rendering illicit Syufy's acquisition of its competitors' screens. We hasten to sever this new branch that the government has caused to sprout from the moribund *Alcoa* trunk.

HN11[] It can't be said often enough that the antitrust laws protect competition, *not* competitors. As we noted earlier, competition is essential to the effective operation of the free market because it encourages efficiency, promotes consumer satisfaction and prevents the accumulation of monopoly profits. When a producer is shielded from competition, he is likely to provide lesser service at a higher price; the victim is the consumer who gets a raw deal. This is the evil the antitrust laws are meant to avert. But when a producer deters competitors by supplying a better product at a lower price, when he eschews monopoly profits, when he operates his business so as to **[**24]** meet consumer demand and increase consumer satisfaction, the goals of competition are served, even if no actual competitors see fit to enter the market at a particular time. While the successful competitor should not be raised above the law, neither should he be held down by law.

The Supreme Court has accordingly distanced itself from the *Alcoa* legacy, taking care to distinguish ***HN12***[] unlawful monopoly power from "growth or development as a consequence of a superior product, business acumen, or historic accident," *United States v. Grinnell Corp., 384 U.S. 563, 571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*, which are off limits to the enforcer of our antitrust laws. If a dominant **[*669]** supplier acts consistent with a competitive market -- out of fear perhaps that potential competitors are ready and able to step in -- the purpose of the antitrust laws is amply served. We make it clear today, if it was not before, that an efficient, vigorous, aggressive competitor is not the villain antitrust laws are aimed at eliminating. Fostering an environment where businesses fight **[**25]** it out using the weapon of efficiency and consumer goodwill is what the antitrust laws are meant to champion. As the Second Circuit has said: "We fail to see how the existence of good will achieved through effective service is an impediment to, rather than the natural result of, competition." *United States v. Waste Mgmt., Inc., 743 F.2d 976, 984 (2d Cir. 1984)*.

But we need not rely on theory alone in rejecting the government's argument. The record here conclusively demonstrates that neither acquiring the screens of his competitors nor working hard at better serving the public gave Syufy deliverance from competition. Immediately following the disappearance of Mann, Plitt and Cragin, Roberts took up the challenge, aggressively competing with Syufy for first-run films -- and with considerable success. United Artists, with substantial resources at its disposal and nationwide experience in running movie theatres, considered the market sufficiently open that it bought out Roberts in 1987. We see no indication that competition suffered in the Las Vegas movie market as a result of Syufy's challenged acquisitions. [15] The district court certainly had ample basis in the record **[**26]** for its finding that Syufy lacked the power to exclude competitors. Indeed, on this voluminous record we are hard-pressed to see how the district court could have come to the other conclusion.

[27]** 2. Power to Control Prices

---

[15] The government points out that the interiors of United Artists' theatres were not as luxurious as those of Syufy. We have no clue what sinister inference the government would have us draw from this fact. As the district court noted, "No one stopped United Artists from remodeling Roberts' theatres after it acquired them. As the largest exhibitor in the nation, it certainly has the resources to do so." *712 F. Supp. at 1402*. Competitors need not provide a perfectly undifferentiated product in order to be competitive; it is a strength of our free market economy that competitors often provide products that cater to the varied tastes and preferences of consumers. Syufy made a business decision to invest in luxury theatres while Roberts and United Artists apparently decided to dispose of their profits in some other fashions. It remains to be seen which strategy will ultimately prevail. Indeed, it is not a winner take all situation; in a free market, any number can play and any number can win. We therefore agree with the district court's refusal to conclude that this difference in business strategies was an indication of market failure.

The crux of the Justice Department's case is that Syufy, top gun in the Las Vegas movie market, had the power to push around Hollywood's biggest players, dictating to them what prices they could charge for their movies. The district court found otherwise. This finding too has substantial support in the record.

Perhaps the most telling evidence of Syufy's inability to set prices came from movie distributors, Syufy's supposed victims. At the trial, distributors uniformly proclaimed their satisfaction with the way the Las Vegas first-run film market operates; none complained about the license fees paid by Syufy. Columbia's President of Domestic Distribution testified that "Syufy paid a fair amount of film rental" that compared favorably with other markets. RT 5:715. A representative of Buena Vista, a division of Disney, testified that Syufy had never refused to accept its standard terms. RT 6:924. Particularly damaging to the government's case was the testimony of the former head of distribution for MGM/UA that his company "never had any difficulty . . . in acquiring the terms that we thought were reasonable," RT 6:888, explaining that the license fees **[**28]** Syufy paid "were comparable or better than any place in the United States. And in most cases better." RT 6:911. Indeed, few if any of the distributors were willing to say anything to support the government's claim.

The documentary evidence bears out this testimony. Syufy has at all times paid **[*670]** license fees far in excess of the national average, even higher than those paid by exhibitors in Los Angeles, the Mecca of Moviedom. In fact, Syufy paid a higher percentage of his gross receipts to distributors in 1987 and 1988 than he did during the intensely competitive period just before he acquired Cragin's Redrock. [16]

[29]** While successful, Syufy is in no position to put the squeeze on distributors. The one time he tried there was an immediate backlash. In 1984, about seven days after allegedly acquiring its monopoly, Syufy informed Orion Releasing Group that he had cold feet about The Cotton Club and would not honor the large guarantees he had contracted for, only to see his gambit backfire. Orion sued Syufy for breach of contract, *see* *Orion Pictures Distrib. Corp. v. Syufy Enters., 829 F.2d 946 (9th Cir. 1987)*, licensed the film to Roberts and cut Syufy off cold turkey. To this day, Orion refuses to play its films in any Syufy theatre, in Las Vegas or elsewhere. *712 F. Supp. at 1393*. Accordingly, Syufy lost the opportunity to exhibit top moneymakers like Robocop, Platoon, Hannah and Her Sisters and No Way Out. [17] The district court found no evidence that Orion considered Roberts/UA's theatres a less than adequate substitute for Syufy's. *Id.*

[30]** Because he needs plenty of first-run films to fill his many screens (22 at the time of trial; 34 now), Syufy is vulnerable. Distributors like Orion have substantial leverage over Syufy and they know it. One witness, the President of Domestic Distribution for Columbia, testified at length about the power he and other distributors wield over Syufy:

> . . . With Syufy having 23 first-run screens, he could not get into a two and a half percent fight with Columbia; he had so many mouths to feed in those theatres, that he was more or less compelled to pay national suggested terms for films.
>
> . . . .
>
> . . . He could have tried [to dictate terms], but he wouldn't have gotten away with it, your Honor. He was very vulnerable. My point is that he was very vulnerable in that market. He could not -- he needed the flow of product to fill those screens, and to take on -- to get into a fight with the distributor over terms, or film rentals paid to a distributor, would create an attitude where we could sell [to] his opposition and he'd be egregiously hurt.
>
> . . . .

---

[16] The government argues that the district court erred in finding this earlier level of competition to be "unhealthy." *712 F. Supp. at 1394*. While we agree, we need not reverse because of the insignificance of the error. The erroneous finding was relevant to only one of three elements needed to prove the government's attempted monopolization claim. As the government was unable to demonstrate that Syufy had the power to control prices or to exclude competition, it cannot prevail even though we disregard the district court's finding of unhealthy competition.

[17] The list of Orion films that played exclusively at Roberts theaters also includes such popular fare as Amadeus, Back to School, Bull Durham, Colors, Hoosiers, Married to the Mob, Radio Days and the unforgettable Throw Momma From the Train.

> . . . He was his own competition, your Honor. He had created such a large amount of screens that he was -- he was himself **[**31]** -- he was himself vulnerable. As I described before, if he would have pressed, and if he would have come to Jimmie Spitz and said, "I'm not going to pay you this percentage for the film," I would have said, "Fine, Ray, we'll stay out of the marketplace." He couldn't afford -- he has to -- he has to have film in his theatres. And that's the leverage that this company had with Mr. Syufy.

RT 5:714-16 (testimony of James Spitz).

After hours of such testimony, the judge quite rightly concluded that Syufy did not have the power to control license fees. This evidence, moreover, reveals the trap in the oftmade assumption that, by virtue of being a leviathan, a company will automatically have the power to wield a big stick with which to push around suppliers, customers and competitors. While size no doubt provides significant business advantages, it can also have very substantial **[*671]** drawbacks, such as increased management costs and other diseconomies of scale. [18]

[32]** More fundamentally, ***HN13***[] in a free economy the market itself imposes a tough enough discipline on all market actors, large and small. Every supplier of goods and services is integrated into an endless chain of supply and demand relationships, making it dependent on the efficiency and goodwill of upstream suppliers, as well as the patronage of customers. Absent structural constraints that keep competition from performing its levelling function, few businesses can dictate terms to customers or suppliers with impunity. It's risky business even to try. As Syufy learned in dealing with Orion and his other suppliers, a larger company often is more vulnerable to a squeeze play than a smaller one. It is for that reason that neither size nor market share alone suffice to establish a monopoly. Without the power to exclude competition, large companies that try to throw their weight around may find themselves sitting ducks for leaner, hungrier competitors. Or, as Syufy saw, the tactic may boomerang, causing big trouble with suppliers.

On this record, we have no basis for overturning the district court's **[**33]** finding that Syufy lacked the power to set the prices he paid his suppliers. As with the district court's finding as to Syufy's power to exclude competition, we believe the record here lent itself to only one sensible conclusion. [19]

[34]** 3. Additional Considerations

Undeterred by the district court's carefully crafted 45 page opinion, the government sets out a variety of other contentions. [20] **[**35]** We have dealt with the principal ones during the course of our discussion and the rest are largely beside the point. By finding that Syufy did not possess the power to set prices or to exclude competition, the

---

[18] *See generally* A. Alchian & W. Allen, *University Economics* 270, 301 (1964); 2 P. Areeda & D. Turner, *supra* n. 5, § 407b, at 286-87; R. Posner, *supra* slip op. at p. 6, at 318 n. 2, 368. In business, as elsewhere in life, it is sometimes true that the bigger they are, the harder they fall.

[19] The Justice Department throws out a volley of numbers which, it claims, show that Syufy managed to depress license fees after buying out his competitors. The government attributes the lower fees to the exercise of monopoly power, but it is mistaken. The percentage of box office receipts paid to movie distributors rises and falls due to a combination of factors; it is not an accurate measure of the competitiveness of the market.

For example, in 1985, Syufy paid Universal a very low license fee (48.1%). The fact is, however, Syufy paid more money to Universal that year than in any other from 1983 to 1988. The percentage only looks low because, in 1985, Universal released the hugely successful Back to the Future. The film played in Syufy's first-run theatres for more than six months; the longer a film's run, the lower the percentage of gross receipts payable to the distributor. Thus, the low percentage rate was based on factors other than monopoly power, as the district court quite reasonably found. Support is missing in the record for the Justice Department's theory of a shakedown by a ruthless predator.

[20] Among them are the following: (1) the district court misdefined the relevant market; (2) the court did not understand that this was a monopsony case; (3) the court erred in looking beyond Syufy's large market share; (4) the court mistakenly looked at the number of first-run movies shown as indicative of market share; (5) the court was wrong to call the preacquisition level of competition "unhealthy"; (6) aggressive competition is itself a barrier to entry; (7) Las Vegas is "overscreened"; and (8) Roberts/United Artists' theatres are not as luxurious as Syufy's.

district court removed the firing pins from the government's litigation arsenal. Without these essential elements, it can make out a violation of neither the Sherman nor Clayton Acts; its lawsuit collapses like a house of cards. [21]

[36]** **[*672]** It is a tribute to the state of competition in America that the Antitrust Division of the Department of Justice has found no worthier target than this paper tiger on which to expend limited taxpayer resources. [22] Yet we cannot help but wonder whether bringing a lawsuit like this, and pursuing it doggedly through 27 months of pretrial proceedings, about two weeks of trial and now the full distance on appeal, really serves the interests of free competition.

[37]** The record here demonstrates in graphic detail that Syufy's entry into the Las Vegas first-run movie market resulted in a vast improvement for movie distributors and consumers alike. By all accounts, Raymond Syufy's theatres are among the finest built and best run in the nation, making him somewhat of a local hero. At the same time, movie distributors have nothing but praise for Syufy, as his being there has invigorated theatre attendance in Las Vegas, substantially driving up their revenues. As is often the case when a vigorous competitor enters the market, more complacent theatre operators were eliminated, but there was no credible evidence that Syufy did anything improper to drive them out. *712 F. Supp. at 1390-91*. Indeed, by buying them out, Syufy may well have helped cushion the losses they would have suffered had they been required to sell the theatres at fire sale prices or leave them abandoned.

What then was the problem the government sought to solve by bringing this lawsuit? At oral argument, the lawyer for the government explained it thus:

---

[21] Absent any power to exclude competition, the government cannot prevail on its claim of monopolization under *Section 2* of the Sherman Act, as that requires a showing that Syufy possesses monopoly power. Similarly, the attempted monopolization claim fails because the government cannot show that there was a dangerous probability that Syufy would succeed in destroying competition. Finally, the lack of entry barriers prevents the government from prevailing on its Clayton Act claim, as Syufy's acquisition of its competitors was not likely to substantially lessen competition.

In his concurrence, Judge Quackenbush complains that our focus on the lack of entry barriers is too narrow; he lists other factors that ought to be considered. Concurrence at 673. While we agree that these other factors are relevant, as explained in the preceding paragraph, the total lack of entry barriers in Las Vegas determines the outcome of these factors in this case: Because others easily could (and did) enter the market successfully, Syufy lacked "the ability to maintain [market] share, the power to control prices, [and] the capability of excluding competitors." *Id.*

Judge Quackenbush suggests that, under our holding, no one having "less than 100 percent of market share" could ever have a monopoly "since the existence of competitors in the market would apparently establish the lack of barriers to entry." Concurrence at 674. We respectfully disagree. Entry barriers pertain not to those already in the market, but to those who would enter but are prevented from doing so. *See* Merger Guidelines § 3.3, reprinted in 4Trade Reg.Rep. (CCH) P 13,103 at 20,562 (1988) (focusing on difficulty of "entry into a market"). Thus, a market containing two firms, each having a 50% share, could well be deemed monopolistic if entry barriers prevented other firms from gaining a foothold.

[22] The concurrence disputes our benign characterization of Syufy, relying largely on his conduct in another market. Concurrence slip op. at 4554-55. As a general matter, we do not agree with this logic. Antitrust violations must be judged on a market-by-market basis. That Syufy may have been guilty of some impropriety in the past would not justify the government's decision to pursue a drawn-out legal battle as to his conduct in Las Vegas unless there was substantial evidence of wrongdoing *in* Las Vegas.

In any event, *Syufy Enters. v. American Multicinema, Inc., 793 F.2d 990 (9th Cir. 1986)*, *cert. denied*, *479 U.S. 1031, 93 L. Ed. 2d 830, 107 S. Ct. 876 (1987)*, on which Judge Quackenbush relies, does not support his point; rather, it supports ours. In *American Multicinema*, we *reversed* an antitrust jury verdict against Syufy for insufficient evidence. *See* *793 F.2d at 1001-03*. Given the infrequency with which we reverse jury verdicts, the Antitrust Division might have considered this, if at all, as a sign that Syufy was not the evildoer he was made out to be.

> Basically if you drive down by anti-competitive conduct the price at which theatre owners buy film licenses, then **[**38]** there will be less films ultimately produced, because there will be a distortion in the natural market in the competitive forces, and people who go to movies like you and me would ultimately have less choice.

Tr. of Oral Arg. at 9. It is, we suppose, not out of the question that what Raymond Syufy and other local theatre operators do in their respective markets could stem the avalanche of movies that comes to us out of Hollywood every year. Yet movie distributors are not exactly a powerless lot, likely to surrender the first time they are presented with hard choices by a theatre operator; nor are they reluctant to precipitate a showdown when they believe their rights are being infringed. [23] And, as we have seen, the market has its own fail-safe mechanisms. Where the government inserts **[*673]** an antitrust enforcement action into this type of situation, there is a real danger of stifling competition and creativity in the marketplace.

[39]** It is well known that ***HN14***[] some of the most insuperable barriers in the great race of competition are the result of government regulation. Regulation often helps entrench existing businesses by placing new entrants at a competitive disadvantage. It is perhaps less well appreciated that litigation itself can be a form of regulation; lawsuits brought by the government impose significant costs on enterprises that are sued, and create significant disincentives for those that are not.

In this case, the government was suspicious because Syufy bought out the movie theatres of his retreating competitors. But, ***HN15***[] in a competitive market, buying out competitors is not merely permissible, it contributes to market stability and promotes the efficient allocation of resources. The fact is, a relentless, growing competitor is frequently the most logical buyer of a business that is declining. For competitors in a free market to fear buying each other out lest they be hit with the expense and misery of an antitrust **[**40]** enforcement action amounts to a burden only slightly less palpable than a direct governmental prohibition against such a purchase. [24] In a free enterprise system decisions such as these should be made by market actors responding to market forces, not by government bureaucrats pursuing their notions of how the market should operate. Personal initiative, not government control, is the fountainhead of progress in a capitalist economy.

[41]** Conclusion

The judgment of the district court is affirmed.

Concur by: QUACKENBUSH

Concur

QUACKENBUSH, District Judge, concurring:

---

[23] *See, e.g., Columbia Pictures Indus. v. Professional Real Estate Investors, Inc., 866 F.2d 278 (9th Cir. 1989)*, *Orion Pictures Distrib. Corp. v. Syufy Enters., 829 F.2d 946 (9th Cir. 1987)*; *Twentieth Century-Fox Film Corp. v. MCA, Inc., 715 F.2d 1327 (9th Cir. 1983)*, *Paramount Pictures Corp. v. Thompson Theatres, Inc., 621 F.2d 1088 (10th Cir. 1980)*.

[24] We are aware, of course, that even in a monopoly situation competitors may buy each other out where the selling company is failing. *See United States v. General Dynamics Corp., 415 U.S. 486, 507, 39 L. Ed. 2d 530, 94 S. Ct. 1186 (1974)*; *F. & M. Schaefer Corp. v. C. Schmidt & Sons, Inc., 597 F.2d 814, 817-18 (2d Cir. 1979)*. But establishing a failing company defense is not easy; a competitor must be in critical condition to be subject to acquisition under that doctrine. In a competitive market, however, there is no need to rely on a failing company defense, and the ability to buy out competitors who are merely ailing may well promote market efficiency, enhance consumer welfare and foster competition.

I concur in the result reached in Parts 1 and 2 of the opinion since I agree that the district court's findings were supported by the record and were not clearly erroneous. I further agree that the district court did not err in its conclusion that Syufy did not have monopoly power over the first-run movie distributors.

I do not agree with those portions of Parts 1 and 2 which state that if there are no significant barriers to entry, there can be no monopoly as a matter of law. I believe that the issue of barriers to entry is just one of the factors which should be considered by the court in determining whether monopoly power exists.

The offense of monopolization under *Section 2* of the Sherman Act has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 1704, 16 L. Ed. 2d 778 (1966)*. **[**42]** In the instant case, there is no contention that Syufy did not willfully acquire 100 percent of the first-run movie market in Las Vegas in 1985. Syufy clearly accomplished that position by the purchase of its competitors.

If the opinion stands for the proposition that a finding of lack of barriers to entry *mandates* a finding of lack of monopoly power, then I disagree with the opinion. While I agree that the issue of monopoly power often depends heavily upon market share and barriers to entry, the analysis should also include consideration of the extent of the alleged monopolist's market share, the ability to maintain that share, the power to control prices, the capability **[*674]** of excluding competitors, and the intent of the alleged monopolist, along with the existence of barriers to entry. *Oahu Gas Serv., Inc. v. Pacific Resources Inc., 838 F.2d 360, 366* (9th Cir.), *cert. denied*, *488 U.S. 870 109 S. Ct. 180, 102 L. Ed. 2d 149 (1988)*.

If lack of barriers to entry precluded a finding of monopoly power, then the existence of less than 100 percent of market share would seem to preclude a finding of a monopoly, regardless of other factors, **[**43]** since the existence of competitors in the market would apparently establish the lack of barriers to entry. I do not believe this to be the proper interpretation of *Section 2* of the Sherman Act, nor has the Supreme Court so interpreted monopoly power.

If absence of barriers to entry mandated a finding of lack of monopoly, the United States Supreme Court could not have held, as it did, that Standard Oil Company of New Jersey and John D. Rockefeller and their associates, with between 50 percent and 90 percent of the petroleum business, were monopolists, since there was no finding of barriers to entry and others were in competition in the petroleum business. *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. Likewise, if absence of barriers to entry required a finding of lack of monopoly power, the Supreme Court could not have held, as it did, in *FTC v. Procter & Gamble Co., 386 U.S. 568, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967)*, that the merger of Proctor & Gamble with Clorox would violate the laws prohibiting monopolies where the merged company would have control of 65 percent of the country's sales of liquid bleach, **[**44]** since there were many other existing competitors in the liquid bleach market.

I do not believe that Congress intended to isolate a business or industry from the strictures of *§ 2* of the Sherman Act solely because there are no barriers to entry. All relevant factors should be considered in the monopoly determination. If Congress intended to except markets from scrutiny solely by reason of absence of barriers to entry, it would have done so. "Where exceptions are made, Congress should make them." *United States v. Line Material Co., 333 U.S. 287, 310, 68 S. Ct. 550, 92 L. Ed. 701 (1948)*.

I am unable to concur in Part 3 of the opinion which takes the Justice Department to task for the expenditure of government funds and the initiation of this action against an alleged "paper tiger." I do not agree that Syufy was a "paper tiger" or that there was not a reasonable basis for the initiation of this action.

In 1985, shortly before the commencement of this case, Syufy had completed the acquisition of all of its first-run theatre competitors. Syufy's final acquisition was of the 11-screen Red Rock theatres for which he paid $ 4,850,000 in cash, giving him ownership of **[**45]** all first-run theatres in Las Vegas. In 1985, Syufy had over 93 percent of the total box office receipts from first-run films. The only reason Syufy did not have 100 percent of the market was because of a dispute which arose between Syufy and Orion Pictures when Syufy, 7 days after acquiring Red Rock theatres, cancelled guarantees he had previously made to Orion.

The foregoing circumstances appear to have warranted the Antitrust Division in initiating this action. Syufy's prior actions belied a conclusion that it was a completely innocent party. Not only had Syufy spent large amounts of money to buy up all of its competitors in the first-run theatre business in Las Vegas, but it had a track record of monopolization, having been found, shortly before the commencement of this action, to have monopolized the exhibition of major feature films in the San Jose area. *Syufy Enterprises v. American Multicinema, Inc., 793 F.2d 990* (9th Cir.), *cert. denied*, *479 U.S. 1031, 107 S. Ct. 876, 93 L. Ed. 2d 830 (1987)*. While I concur in the opinion that Judge Orrick's decision in this case was not erroneous, I do not concur in Part 3 of the opinion. [1]

[46]**

End of Document

[1] In Part 3 of the opinion, the majority, in footnote 21, construes my citation of a prior case involving Syufy Enterprises, in which Syufy was found to be a monopolist, as a suggestion on my part that such a finding of prior monopolistic action, in and of itself, justified the initiation of this action. That was not my intent. The citation of the case in question, *Syufy Enterprises v. American Multicinema, Inc., 793 F.2d 990 (9th Cir. 1986)*, was for the purpose of demonstrating that Syufy, who spent almost 5 million dollars in cash in purchasing all of his competitors, was not a "paper tiger" as suggested by the majority.

In footnote 22, the majority also contends that the finding of monopolistic actions by Syufy in the San Jose major feature films market was reversed by the Ninth Circuit in *American Multicinema* for insufficient evidence. To the contrary, this jury finding was found to have been supported by substantial evidence. At page 996 of *American Multicinema*, the court stated: "In conclusion, we hold that there is substantial evidence to support a jury verdict in favor of AMC on its first *Section 2* monopolization theory; that Syufy monopolized the market for the exhibition of industry anticipated top-grossing films in the San Jose area."

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN2[] **Remedies, Damages**

A private plaintiff may not recover antitrust damages under *15 U.S.C.S. § 15* merely by showing injury causally linked to an illegal presence in a market. Instead, a plaintiff must prove the existence of antitrust injury, which is to say injury of the type antitrust laws are intended to prevent and that flows from that which makes a defendant's acts unlawful. Injury, although causally related to an antitrust violation, nevertheless will not qualify as "antitrust injury" unless it is attributable to an anticompetitive aspect of a practice under scrutiny, since it is inimical to antitrust laws to award damages' for losses stemming from continued competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

Contracts Law > Defenses > Illegal Bargains

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN3[] **Vertical Restraints, Nonprice Restraints**

A maximum-price vertical agreement is per se illegal and operates by substituting the perhaps erroneous judgment of a seller for the forces of the competitive market and may severely intrude upon the ability of buyers to compete and survive in a market. Maximum prices may be fixed too low for a dealer to furnish services essential to the value which goods have for a consumer or to furnish services and conveniences which consumers desire and for which they are willing to pay. By limiting the ability of small dealers to engage in nonprice competition, a maximum-price-fixing agreement might channel distribution through a few large or specifically advantaged dealers. If the actual price charged under a maximum price scheme is nearly always the fixed maximum price, which is increasingly likely as the maximum price approaches the actual cost of a dealer, a scheme tends to acquire all the attributes of an arrangement fixing minimum prices.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN4[] **Vertical Restraints, Price Fixing**

A vertical, maximum price-fixing agreement is per se unlawful because of its potential effects on dealers and consumers, not because of its effect on competitors. If a vertical agreement fixes maximum prices too low for a dealer to furnish services desired by consumers, or in such a way as to channel business to large distributors, then a firm dealing in a competing brand would not be harmed. A competitor may not complain of conspiracies that set minimum prices at any level.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN5[] **Price Fixing & Restraints of Trade, Vertical Restraints**

When a firm, or even a group of firms adhering to a vertical agreement, lowers prices but maintains them above predatory levels, business lost by rivals cannot be viewed as an "anticompetitive" consequence of a claimed violation. A firm complaining about the harm it suffers from nonpredatory price competition is really claiming that it is unable to raise prices. This is not antitrust injury; indeed, cutting prices in order to increase business often is the very essence of competition. The antitrust laws are enacted for the protection of competition, not competitors. To hold that the antitrust laws protect competitors from the loss of profits due to nonpredatory price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN6[] **Sherman Act, Claims**

Price fixing violates *§ 1* of the Sherman Act (Act) even if a single firm's decision to price at the same level would not create *§ 2* of the Act liability. In a *§ 1* case, a price agreement itself is illegal. Although a vertical, maximum-price-fixing agreement is unlawful under *§ 1*, it does not cause a competitor antitrust injury unless it results in predatory pricing. Antitrust injury does not arise for purposes of *15 U.S.C.S. § 15* until a private party is adversely affected by an anticompetitive aspect of a defendant's conduct. In the context of pricing practices, only predatory pricing has the requisite anticompetitive effect. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN7[] Clayton Act, Claims

Nonpredatory price competition for increased market share, as reflected by prices that are below "market price" or even below the costs of a firm's rivals, is not activity forbidden by the antitrust laws. When prices are not predatory, any losses flowing from them cannot be said to stem from an anticompetitive aspect of a defendant's conduct. It is in the interest of competition to permit dominant firms to engage in vigorous competition, including price competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN8[] Regulated Practices, Private Actions

The per se rule is a method of determining whether *§ 1* of the Sherman Act has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury and thus whether he may recover damages under *15 U.S.C.S. § 15*. Per se and rule-of-reason analysis are but two methods of determining whether a restraint is "unreasonable," that is, whether its anticompetitive effects outweigh its procompetitive effects. The per se rule is a presumption of unreasonableness based on business certainty and litigation efficiency. It represents a longstanding judgment that the prohibited practices by their nature have a substantial potential for impact on competition. Once experience with a particular kind of restraint enables a court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that a restraint is unreasonable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Both per se rules and the rule of reason are employed to form a judgment about the competitive significance of a pricing restraint. Whether an ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same - whether or not a challenged restraint enhances competition.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN10[] Private Actions, Remedies

The antitrust injury requirement under *15 U.S.C.S. § 15* ensures that the harm claimed by a plaintiff corresponds to the rationale for finding a violation of antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief. Actions per se unlawful under antitrust laws may nonetheless have some procompetitive effects, and private parties might suffer losses therefrom. Conduct in violation of antitrust laws may have three effects, often interwoven: in some respects the conduct may reduce competition, in other respects it may increase competition, and in still other respects effects may be neutral as to competition. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. The need for this showing is at least as great under the per se rule as under the rule of reason.

Antitrust & Trade Law > Clayton Act > General Overview

HN11[] Antitrust & Trade Law, Clayton Act

Proof of a per se violation and of antitrust injury under *15 U.S.C.S. § 15* are distinct matters that must be shown independently.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN12[] Standing, Clayton Act

Even in cases involving per se violations, the right of action under *15 U.S.C.S. § 15* is available only to those private plaintiffs who have suffered antitrust injury. Plaintiffs are required to show that a conspiracy caused them an injury for which antitrust laws provide relief. A restraint of trade may be illegal per se in the sense that it could be condemned even without proof of its actual market effect, but even if it may have been unlawful, it does not, of course, necessarily follow that still another party .is a person injured by reason of a violation of the antitrust laws within the meaning of *§ 15*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN13[] Vertical Restraints, Price Fixing

The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party to perform the office of a private attorney general.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN14[] Vertical Restraints, Price Fixing

A competitor is not injured by anticompetitive effects of vertical, maximum price-fixing, and does not have any incentive to vindicate the legitimate interests of a rival's dealer. A competitor will not bring suit to protect a dealer against a maximum price that is set too low, inasmuch as a competitor would benefit from such a situation. Instead, a competitor will be motivated to bring suit only when a vertical restraint promotes interbrand competition between a competitor and a dealer subject to a restraint. A competitor will be injured and hence motivated to sue only when a vertical, maximum-price-fixing arrangement has a procompetitive impact on a market. Therefore, providing a competitor a cause of action will not protect the rights of dealers and consumers under antitrust laws.

Lawyers' Edition Display

Decision

Firm held not to suffer "antitrust injury," and thus held unable to sue under 4 of Clayton Act (*15 USCS 15*), for alleged loss of sales to competitor charging nonpredatory prices pursuant to vertical, maximum price-fixing scheme.

Summary

Section 4 of the Clayton Act (*15 USCS 15*) generally authorizes a treble damages suit by any person injured in the person's business or property by reason of anything forbidden in the antitrust laws. The United States Supreme Court has held that, in order for a private plaintiff to bring such a 4 suit, the plaintiff must prove the existence of "antitrust injury"--injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. An independent retail marketer of gasoline competed with the dealers of an integrated oil company. The marketer brought a suit against the oil company in the United States District Court for the Central District of California and included in the suit an antitrust claim of the existence of a vertical, maximum price-fixing agreement prohibited by 1 of the Sherman Act (*15 USCS 1*). The District Court, however, in granting summary judgment for the oil company on the 1 claim, expressed the view that (1) even assuming that the marketer could establish a vertical conspiracy to maintain low prices, the marketer could not satisfy the "antitrust injury" requirement of 4, without showing such prices to be predatory; and (2) the marketer could make no such showing of predatory pricing, because, given the oil company's market share and the ease of entry into the market, the oil company was in no position to exercise market power. On appeal, the United States Court of Appeals for the Ninth Circuit, reversing, expressed the view that (1) injuries resulting from vertical, nonpredatory, maximum price-fixing agreements could constitute "antitrust injury" for purposes of a private suit under 4; and (2) in the case at hand, the marketer's claimed injuries were the direct result and, if the marketer's allegations were accepted as true, the intended objective of the alleged price-fixing scheme, where, according to the marketer, the purpose of the alleged price fixing was to disrupt the market of retail gasoline sales (*859 F2d 687*).

On certiorari, the Supreme Court reversed the judgment of the Court of Appeals and remanded the case for further proceedings. In an opinion by Brennan, J., joined by Rehnquist, Ch. J., and Marshall, Blackmun, O'Connor, Scalia, and Kennedy, JJ., it was held that--assuming for the purposes of decision that the oil company's pricing was not predatory in nature, and that vertical, maximum price fixing was subject to a per se rule of illegality under 1--(1) a firm does not suffer an antitrust injury, and thus the firm cannot bring a treble damages suit under 4, when the firm allegedly loses sales to a competitor charging nonpredatory prices pursuant to a vertical, maximum price-fixing scheme allegedly prohibited by 1, because (a) the firm's losses do not flow from the aspects of the vertical, maximum price fixing that render it illegal, (b) the business lost by the firm as a rival cannot be viewed as an anticompetitive consequence of the claimed violation, (c) any differences between liability under 1 and liability under 2 of the Sherman Act (*15 USCS 2*) do not affect the result, (d) similarly, no salient difference results from the fact that the source of the nonpredatory price competition is an agreement alleged to be unlawful under 1 of the Sherman Act, rather than a merger alleged to be unlawful under 7 of the Clayton Act (*15 USCS 18*), and (e) the fact that a vertical price-fixing scheme may facilitate predatory pricing in some circumstances is no reason to dispense with the antitrust-injury requirement in an action by the firm against the competitor's vertical agreement; (2) the allegation of a per se violation of 1 does not obviate the need to satisfy the antitrust-injury test; and (3) there is no need to encourage private enforcement in such circumstances, and thus to permit the dilution of the antitrust-injury requirement.

Stevens, J., joined by White, J., dissenting, expressed the view that the court's opinion undermined the enforceability of a substantive price-fixing violation with a flawed construction of 4, which erroneously assumed that (1) the level of a price fixed by a 1 conspiracy is relevant to legality, and (2) all vertical arrangements conform to a single model.

Headnotes

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > STATUTES §108.5 > damages suit -- vertical, maximum price-fixing scheme by competitor -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]***LEdHN[1D]***[] [1D]***LEdHN[1E]***[] [1E]***LEdHN[1F]***[] [1F]***LEdHN[1G]***[] [1G]***LEdHN[1H]***[] [1H]***LEdHN[1I]***[] [1I]***LEdHN[1J]***[] [1J]***LEdHN[1K]***[] [1K]***LEdHN[1L]***[] [1L]***LEdHN[1M]***[] [1M]

A firm does not suffer an "antitrust injury," and thus the firm cannot bring a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), when the firm allegedly loses sales to a competitor charging nonpredatory prices pursuant to a vertical, maximum price-fixing scheme allegedly prohibited by 1 of the Sherman Act (*15 USCS 1*), because, even assuming for the purposes of decision that vertical, maximum price fixing is subject to a per se rule of illegality under 1, (1) the firm's losses do not flow from the aspects of the vertical, maximum price fixing that render it illegal, for, even if the agreement had ultimately acquired all the attributes of a minimum price-fixing scheme, the competitor's higher prices would work to the firm's advantage; (2) when a competitor, or even a group of competitors adhering to a vertical agreement, lowers prices but maintains them above predatory levels, the business lost by rivals cannot be viewed as an anticompetitive consequence of the claimed violation, for a firm complaining about the harm it suffers from nonpredatory pricing is really claiming that the firm is unable to raise prices; (3) any differences between liability under 1 and liability under 2 of the Sherman Act (*15 USCS 2*) do not affect the result, for although a vertical, maximum price-fixing agreement may be unlawful under 1, such an agreement does not cause a competitor antitrust injury unless the agreement results in predatory pricing, for, in the context of pricing practices, only predatory pricing has requisite anticompetitive effect; (4) for similar reasons, no salient difference, for purposes of the antitrust-injury requirement, results from the fact that the source of the nonpredatory price competition is an agreement alleged to be unlawful under 1 of the Sherman Act, rather than a merger alleged to be unlawful under 7 of the Clayton Act (*15 USCS 18*); and (5) the fact that a vertical price-fixing scheme may facilitate predatory pricing in some circumstances is no reason to dispense with the antitrust-injury requirement in an action by a firm against a competitor's vertical agreement, because a firm always is able to challenge directly a competitor's pricing as predatory. (Stevens and White, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §14 > damages suit -- injury to plaintiff -- per se violation -- equitable relief -- > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]***LEdHN[2C]***[] [2C]***LEdHN[2D]***[] [2D]***LEdHN[2E]***[] [2E]

The allegation of a per se violation of 1 of the Sherman Act (*15 USCS 1*) does not obviate a private plaintiff's need to satisfy the "antitrust injury" test, in order to bring a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), because the per se rule, which is a method for determining whether 1 has been violated, does not indicate whether a plaintiff has suffered antitrust injury, for (1) the antitrust-injury requirement has the different purpose of (a) insuring that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and (b) preventing losses that stem from competition from supporting suits by private plaintiffs for either damages or equitable relief; (2) the antitrust-injury requirement insures that a plaintiff can recover only if the loss stems from the competition-reducing aspect or effect of the defendant's behavior, rather than any competition-increasing or competition-neutral aspect or effect of such behavior; (3) the need for such a showing is at least as great under the per se rule as under the rule of reason; (4) insofar as the per se rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust-injury requirement is underscored; and (5) thus, proof of a per se violation and of antitrust injury are distinct matters that must be shown independently. (Stevens and White, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- encouragement of enforcement -- > Headnote:
LEdHN[3A][] [3A]***LEdHN[3B]***[] [3B]***LEdHN[3C]***[] [3C]***LEdHN[3D]***[] [3D]***LEdHN[3E]***[] [3E]***LEdHN[3F]***[] [3F]***LEdHN[3G]***[] [3G]***LEdHN[3H]***[] [3H]

With respect to the requirement that a private plaintiff show "antitrust injury" in order to bring a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), even if it is assumed for the purposes of decision that vertical, maximum price fixing is subject to a per se rule of illegality under 1 of the Sherman Act (*15 USCS 1*), there is no need to encourage a rival firm's private enforcement of such a rule, and thus to permit the dilution of the antitrust-injury requirement when the firm allegedly loses sales to a competitor charging nonpredatory prices pursuant to a vertical, maximum price-fixing scheme, because (1) if such a scheme causes anticompetitive consequences so as to result in a per se violation of 1, consumers and the manufacturer's own dealers may bring suit; and (2) providing the firm, as a rival, with a cause of action will not protect the rights of dealers and consumers under the antitrust laws, for the firm's injury is not inextricably intertwined with the antitrust injury that a dealer would suffer, where the firm (a) is not injured by the anticompetitive effects of vertical, maximum price fixing, and (b) will be injured, and hence motivated to sue, only when the competitor's vertical, maximum price-fixing arrangement has a procompetitive impact on the market. (Stevens and White, JJ., dissented from this holding.)

APPEAL §1289 > summary judgment -- inferences from facts -- > Headnote:
LEdHN[4A][] [4A]***LEdHN[4B]***[] [4B]

On certiorari, in a case coming to the United States Supreme Court on review of summary judgment, inferences to be drawn from the underlying facts must be viewed in the light most favorable to the party opposing the motion.

APPEAL §1331.5 > what reviewable -- predatory pricing -- > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]***LEdHN[5C]***[] [5C]***LEdHN[5D]***[] [5D]

On certiorari to determine whether a firm suffers an "antitrust injury," for purposes of the firm's ability to bring a treble damages suit, under 4 of the Clayton Act (*15 USCS 15*), for sales allegedly lost to a competitor charging nonpredatory prices pursuant to a vertical, maximum price-fixing scheme, the United States Supreme Court, upon assuming for the purposes of decision that the competitor's pricing was not predatory in nature, has no occasion (1) to consider the proper definition of "predatory pricing," or (2) to determine whether an accurate statement of the law was made by the Supreme Court's dictum, in a prior case, that predatory pricing might consist of pricing below the level necessary to sell the offender's products.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > suit for damages -- injury -- > Headnote:
LEdHN[6][] [6]

A private plaintiff may not recover damages under 4 of the Clayton Act (*15 USCS 15*) merely by showing injury causally linked to an illegal presence in the market; instead, such a plaintiff must prove the existence of "antitrust injury"--injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > minimum prices -- damages suit -- > Headnote:
LEdHN[7][] [7]

In a treble damages suit under 4 of the Clayton Act (*15 USCS 15*) for an alleged violation of 1 of the Sherman Act (*15 USCS 1*), a competitor may not complain of conspiracies that set minimum prices at any level.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §6 > purpose -- > Headnote:
LEdHN[8A][] [8A]***LEdHN[8B]***[] [8B]

Under the antitrust laws, which were enacted for the protection of competition, not competitors, the statutory policy precludes inquiry into the question whether competition is good or bad.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > nonpredatory pricing -- damages suit -- > Headnote:
LEdHN[9A][] [9A]***LEdHN[9B]***[] [9B]

For purposes of the requirement that a private plaintiff show "antitrust injury" in order to bring a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), such a plaintiff cannot claim antitrust injury from nonpredatory price competition on the asserted ground that it is "ruinous," for to hold that the antitrust laws protect competitors from the loss of profits due to nonpredatory price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share. (Stevens and White, JJ., dissented in part from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > STATUTES §108.5 > price-fixing violations -- > Headnote:
LEdHN[10][] [10]

Price fixing violates 1 of the Sherman Act (*15 USCS 1*) as an agreement in restraint of trade, even if a single firm's decision to price at the same level would not create liability under 2 of the Act (*15 USCS 2*) as an attempt to monopolize, because, in a 1 case, the price agreement itself is illegal; 1 in general and the per se rule in particular are grounded on faith in price competition as a market force, and not on a policy of low selling prices at the price of eliminating competition.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > damages suit -- injury -- > Headnote:
LEdHN[11A][] [11A]***LEdHN[11B]***[] [11B]

"Antitrust injury" does not arise, for purposes of a private party's ability to maintain a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), until the private party is adversely affected by an anticompetitive aspect of the defendant's conduct; for purposes of 4, injury in fact cannot be equated with "antitrust injury," and the antitrust-injury requirement cannot be met by broad allegations of harm to the "market" as an abstract entity; although all antitrust violations, under both per se and rule-of-reason analyses, "distort" the market, not every loss stemming from a violation counts as antitrust injury.

EVIDENCE §343.5 > RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §14 > violations per se -- rule of reason -- presumptions -- > Headnote:
LEdHN[12A][] [12A]***LEdHN[12B]***[] [12B]

For purposes of determining whether 1 of the Sherman Act (*15 USCS 1*) has been violated, per se and rule-of-reason analyses are but two methods of determining whether a restraint is "unreasonable," that is, whether the restraint's anticompetitive effects outweigh its procompetitive effects; both per se rules and the rule of reason are employed to form a judgment about the competitive significance of the restraint; whether the ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same--whether the challenged restraint enhances competition; a per se rule (1) is a presumption of a reasonableness based on business certainty and litigation efficiency, and (2) represents a long-standing judgment that the prohibited practices, by their nature, have a substantial potential for impact on competition; and once experience with a particular type of restraint enables the United States Supreme Court to predict with confidence that the rule of reason will condemn the restraint, the Supreme Court applies a conclusive presumption that the restraint is unreasonable.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §16 > rule of reason -- > Headnote:
LEdHN[13A][] [13A]***LEdHN[13B]***[] [13B]

With respect to whether a manufacturer's vertical arrangements with a dealer violate 1 of the Sherman Act (*15 USCS 1*), exclusive territorial arrangements and other nonprice restrictions are subject to only rule-of-reason scrutiny, rather than to a rule of per se illegality.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §67 > suit for damages -- injury -- > Headnote:
LEdHN[14][] [14]

For purposes of determining the required "antitrust injury" that a private plaintiff must suffer in order to bring a treble damages suit under 4 of the Clayton Act (*15 USCS 15*), the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party to perform the office of a private attorney general.

Syllabus

Petitioner Atlantic Richfield Company (ARCO), an integrated oil company, increased its retail gasoline sales and market share by encouraging its dealers to match the prices of independents such as respondent USA Petroleum Company, which competes directly with the dealers at the retail level. When USA's sales dropped, it sued ARCO in the District Court, charging, inter alia, that the vertical, maximum-price-fixing scheme constituted a conspiracy in restraint of trade in violation of *§ 1* of the Sherman Act. The court granted summary judgment to ARCO, holding that USA could not satisfy the "antitrust injury" requirement for purposes of a private damages suit under **[****2]** § 4 of the Clayton Act because it was unable to show that ARCO's prices were predatory. The Court of Appeals reversed, holding that injuries resulting from vertical, nonpredatory, maximum-price-fixing agreements could constitute "antitrust injury." Reasoning that any form of price fixing contravenes Congress' intent that market forces alone determine what goods and services are offered, their prices, and whether particular sellers succeed or fail, the court concluded that USA had shown that its losses resulted from a disruption in the market caused by ARCO's price fixing.

Held:

1. Actionable "antitrust injury" is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Injury, although casually related to an antitrust violation, will not qualify unless it is attributable to an anticompetitive aspect of the practice under scrutiny, since it is inimical to the antitrust laws to award damages for losses stemming from continued competition. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 109-110*. P. 334

2. A vertical, maximum-price-fixing conspiracy in violation of *§ 1* of the Sherman **[****3]** Act must result in predatory pricing to cause a competitor antitrust injury. Pp. 335-341.

(a) As a competitor, USA has not suffered "antitrust injury," since its losses do not flow from the harmful effects on dealers and consumers that rendered vertical, maximum price fixing per se illegal in *Albrecht v. Herald Co., 390 U.S. 145*. USA was benefited rather than harmed if ARCO's pricing policies restricted ARCO's sales to a few large dealers or prevented its dealers from offering services desired by consumers. Even if the maximum price agreement acquired all of the attributes of a minimum-price-fixing scheme, USA still would not have suffered antitrust injury, because higher ARCO prices would have worked to USA's advantage. Pp. 335-337.

(b) USA's argument that, even if it was not harmed by any of the Albrecht anticompetitive effects, its lost business caused by ARCO's agreement lowering prices to above predatory levels constitutes antitrust injury is rejected, since cutting prices to increase business is often the essence of competition. Pp. 337-338.

(c) It is not inappropriate to require a showing of predatory pricing before antitrust injury can be established **[****4]** in a case under *§ 1* of the Sherman Act. Although under *§ 1* the price agreement itself is illegal, all losses flowing from the agreement are not by definition antitrust injuries. Low prices benefit consumers regardless of how they are set. So long as they are above predatory levels, they do not threaten competition and, hence, cannot give rise to antitrust injury. Pp. 338-341.

3. A loss flowing from a per se violation of *§ 1* does not automatically satisfy the antitrust injury requirement, which is a distinct matter that must be shown independently. The purpose of per se analysis is to determine whether a particular restraint is unreasonable. Actions per se unlawful may nonetheless have some procompetitive effects, and private parties might suffer losses therefrom. The antitrust injury requirement, however, ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. Pp. 341-345.

4. Providing competitors with a private cause of action to enforce the rule against vertical, maximum price fixing would not protect the rights of dealers and consumers -- the class of persons whose self-interest would **[****5]** normally motivate them to vindicate Albrecht's anticompetitive consequences -- under the antitrust laws. USA's injury is not inextricably intertwined with a dealer's antitrust injury, since a competitor has no incentive to vindicate the legitimate interests of a rival's dealer and will be injured and motivated to sue only when the arrangement has a procompetitive impact on the market. Pp. 345-346.

Counsel: Ronald C. Redcay argued the cause for petitioner. With him on the briefs were Matthew T. Heartney, Otis Pratt Pearsall, Philip H. Curtis, Francis X. McCormack, Donald A. Bright, and Edward E. Clark.

John G. Roberts, Jr., argued the cause for the United States et al. as amici curiae urging reversal. With him on the brief were General Boudin, Deputy Solicitor General Shapiro, Michael R. Dreeben, Catherine G. O'Sullivan, and Kevin J. Arquit.

Maxwell M. Blecher argued the cause for respondent. With him on the brief were Alicia G. Rosenberg and Lawrence A. Sullivan. *

Opinion

[*331] [*341] [**1887]** JUSTICE **BRENNAN** delivered the opinion of the Court.

LEdHN[1A][] [1A] ***LEdHN[2A]***[] [2A] ***LEdHN[3A]***[] [3A]This case presents the question whether a firm incurs an "injury" within the meaning of the antitrust laws when it loses sales to a competitor charging nonpredatory prices pursuant to a vertical, maximum-price-fixing scheme. We hold that such a firm does not suffer an "antitrust injury" and that it therefore cannot bring suit under § 4 of the Clayton Act, 38 Stat. 731, as amended, *15 U.S.C. § 15*. [1]

[**7]** I

Respondent USA Petroleum Company (USA) sued petitioner Atlantic Richfield Company (ARCO) in the United States District Court for the Central District of California, alleging the existence of a vertical, maximum-price-fixing agreement prohibited by *§ 1* of the Sherman Act, 26 Stat. 209, as amended, *15 U.S.C. § 1*, an attempt to monopolize the local retail gasoline sales market in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*, and other misconduct not relevant here. Petitioner ARCO is an integrated oil company that, inter alia, markets gasoline in the Western United States. It sells gasoline to consumers both directly through its own stations and indirectly through ARCO-brand dealers. Respondent USA is an independent retail marketer of gasoline which, like other independents, buys gasoline from major petroleum **[***342]** companies for resale under its own brand name. Respondent competes directly with ARCO dealers at the retail level. Respondent's outlets typically are low-overhead, high-volume "discount" stations that charge less than stations selling equivalent quality gasoline under major brand names.

LEdHN[4A][] [4A] **[****8]** In early 1982, petitioner ARCO adopted a new marketing strategy in order to compete more effectively with discount **[*332]** independents **[**1888]** such as respondent. [2] Petitioner encouraged its

Strong, Assistant Attorney General; for the Service Station Dealers of America by Dimitri G. Daskalopoulos; and for the Society of Independent Gasoline Marketers of America by William W. Scott and Christopher J. MacAvoy.

[1] Section 4 of the Clayton Act is ***HN1***[] a remedial provision that makes available treble damages to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws."

[2] ***LEdHN[4B]***[] [4B]

dealers to match the retail gasoline prices offered by independents in various ways; petitioner made available to its dealers and distributors such short-term discounts as "temporary competitive allowances" and "temporary volume allowances," and it reduced its dealers' costs by, for example, eliminating credit card sales. ARCO's strategy increased its sales and market share.

[**9]** ***LEdHN[1B]***[] [1B] ***LEdHN[3B]***[] [3B] ***LEdHN[5A]***[] [5A]In its amended complaint, respondent USA charged that ARCO engaged in "direct head-to-head competition with discounters" and "drastically lowered its prices and in other ways sought to appeal to price-conscious consumers." First Amended Complaint para. 19, App. 15. Respondent asserted that petitioner conspired with retail service stations selling ARCO brand gasoline to fix prices at below-market levels: "Arco and its co-conspirators have organized a resale price maintenance scheme, as a direct result of which competition tht would otherwise exist among Arco-branded dealers has been eliminated by agreement, and the retail price of Arco-branded gasoline has been fixed, stabilized and maintained at artifically low and uncompetitive levels." para. 27, App. 17. Respondent alleged that petitioner "has solicited its dealers and distributors to participate or acquiesce in the conspiracy and has used threats, intimidation and coercion to secure compliance **[****10]** with its terms." para. 37, App. 19. According to respondent, this conspiracy drove many independent gasoline dealers in California out of business. para. 39, App. 20. Count one of the amended complaint charged that petitioner's vertical, maximum-price-fixing scheme constituted an agreement in restraint of trade and thus violated *§ 1* of the Sherman Act. Count two, later withdrawn with prejudice by respondent, **[*333]** asserted that petitioner had engaged in an attempt to monopolize the retail gasoline market through predatory pricing in violation of *§ 2* of the Sherman Act. [3]

[**11]** The District Court granted summary judgment for ARCO on the *§ 1* claim. The court stated that "[e]ven **[***343]** assuming that [respondent USA] can establish a vertical conspiracy to maintain low prices, [respondent] cannot satisfy the 'antitrust injury' requirement of Clayton Act § 4, without showing such prices to be predatory." App. to Pet. for Cert. 3b. The court then concluded that respondent could make no such showing of predatory pricing because, given petitioner's market share and the ease of entry into the market, petitioner was in no position to exercise market power.

A divided panel of the Court of Appeals for the Ninth Circuit reversed. *859 F. 2d 687 (1988)*. Acknowledging that its decision was in conflict with the approach of the Court of Appeals for the Seventh Circuit in several recent cases, [4] see *id., at 697, n. 15*, the Ninth Circuit nonetheless held that injuries resulting from vertical, nonpredatory, maximum pricefixing agreements could constitute "antitrust **[**1889]** injury" for purposes of a private suit under § 4 of the Clayton Act. The court reasoned that any form of price fixing contravenes Congress' intent that **[****12]** "market forces alone determine what goods and services are offered, at what price these goods and services **[*334]** are sold, and whether particular sellers succeed or fail." *Id., at 693*. The court believed that the key inquiry in determining whether respondent suffered an "antitrust injury" was whether its losses "resulted from a disruption . . . in the . . . market caused by the . . . antitrust violation." Ibid. The court concluded that "[i]n the present case, the

Because the case comes to us on review of summary judgment, "'inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion.'" *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 587 (1986)* (quoting *United States v. Diebold, Inc., 369 U.S. 654, 655 (1962))*.

[3] ***LEdHN[1C]***[] [1C] ***LEdHN[3C]***[] [3C] ***LEdHN[5B]***[] [5B]

The District Court granted petitioner's motion to dismiss the *§ 2* claim as originally pleaded. *577 F. Supp. 1296, 1304 (1983)*. Respondent subsequently amended its *§ 2* claim, but shortly after petitioner filed for summary judgment, respondent voluntarily dismissed that claim with prejudice. See App. 76-78. The Court of Appeals framed the issue as "whether a competitor's injuries resulting from vertical, non-predatory, maximum price fixing fall within the category of 'antitrust injury.'" *859 F. 2d 687, 689 (CA9 1988)* (emphasis added). For purposes of this case we likewise assume that petitioner's pricing was not predatory in nature.

[4] See *Indiana Grocery, Inc. v. Super Valu Stores, Inc., 864 F. 2d 1409, 1418-1420 (1989)*; *Local Beauty Supply, Inc. v. Lamaur, Inc., 787 F. 2d 1197, 1201-1203 (1986)*; *Jack Walters & Sons Corp. v. Morton Bldg., Inc., 737 F. 2d 698, 708-709*, cert. denied, ***469 U.S. 1018 (1984)***.

inquiry seems straightforward: USA's claimed injuries were the direct result, and indeed, under the allegations we accept as true, the intended objective, of ARCO's price-fixing scheme. According to USA, the purpose of ARCO's price-fixing is to disrupt the market of retail gasoline sales, and that disruption is the source of USA's injuries." Ibid.

[**13]** We granted certiorari, *490 U.S. 1097 (1989)*.

II

LEdHN[6][] [6]***HN2***[] A private plaintiff may not recover damages under § 4 of the Clayton Act merely by showing "injury causally linked to an illegal presence in the market." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 (1977)*. Instead, a plaintiff must prove the existence of "antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." Ibid. (emphasis in original). In *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)*, we reaffirmed that injury, although causally related to an antitrust violation, nevertheless will not qualify as "antitrust injury" unless it is attributable to an anticompetitive aspect of the practice under scrutiny, "since '[i]t is inimical to [the antitrust] laws to award damages' for losses stemming from continued competition." *Id., at 109-110* (quoting *Brunswick, supra, at 488*). **[****14]** **[***344]** See also *Associated General Contractors of California, Inc. v. Carpenters, 459 U.S. 519, 539-540 (1983)*; *Blue Shield of Virginia v. McCready, 457 U.S. 465, 483, and n. 19 (1982)*; *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562 (1981)*.

[*335] ***LEdHN[1D]***[] [1D] ***LEdHN[2B]***[] [2B] ***LEdHN[3D]***[] [3D]Respondent argues that, as a competitor, it can show antitrust injury from a vertical conspiracy to fix maximum prices that is unlawful under *§ 1* of the Sherman Act, even if the prices were set above predatory levels. In addition, respondent maintains that any loss flowing from a per se violation of *§ 1* automatically satisfies the antitrust injury requirement. We reject both contentions and hold that respondent has failed to meet the antitrust injury test in this case. We therefore reverse the judgment of the Court of Appeals.

A

LEdHN[1E][] [1E] ***LEdHN[3E]***[] [3E] **[****15]** In *Albrecht v. Herald Co., 390 U.S. 145 (1968)*, we found that a vertical, maximum-price-fixing scheme was unlawful per se under *§ 1* of the Sherman Act because it threatened to inhibit vigorous competition by the dealers bound by it and because it threatened to become a minimum-price-fixing scheme. [5] That case concerned a newspaper distributor who sought to charge his customers more than the suggested retail price advertised by the publisher. After the publisher attempted to discipline the distributor by hiring another carrier to take away some of the distributor's customers, the distributor brought suit under *§ 1*. The Court found that "the combination **[**1890]** formed by the [publisher] in this case to force [the distributor] to maintain a specified price for the resale of newspapers which he had purchased from [the publisher] constituted, without more, an illegal restraint of trade under *§ 1* of the Sherman Act." *Id., at 153*.

[**16]** In holding such a maximum-price vertical agreement illegal, we analyzed the manner in which it might restrain competition by dealers. ***HN3***[] First, we noted that such a scheme, "by substituting the perhaps erroneous judgment of a seller for the forces of the competitive market, may severely intrude upon the ability of buyers to compete and survive in that market." *Id., at 152*. We further explained that "[m]aximum **[*336]** prices may be fixed too low for the dealer to furnish services essential to the value which goods have for the consumer or to furnish services and conveniences which consumers desire and for which they are willing to pay." *Id., at 152-153*. By limiting the ability of small dealers to engage in nonprice competition, a maximum-price-fixing agreement might "channel distribution through a few large or specifically advantaged dealers." *Id., at 153*. Finally, we observed that "if the actual price charged under a maximum price scheme is nearly always the fixed maximum price, which is

---

[5] ***LEdHN[1F]***[] [1F] ***LEdHN[3F]***[] [3F]

We assume, arguendo, that Albrecht correctly held that vertical, maximum price fixing is subject to the per se rule.

increasingly likely as the maximum price approaches the **[****17]** actual cost of the dealer, the scheme tends to acquire all the attributes of **[***345]** an arrangement fixing minimum prices." Ibid.

LEdHN[1G][] [1G] **LEdHN[7]**[] [7]Respondent alleges that it has suffered losses as a result of competition with firms following a vertical, maximum-price-fixing agreement. **HN4**[] But in Albrecht we held such an agreement per se unlawful because of its potential effects on dealers and consumers, not because of its effect on competitors. Respondent's asserted injury as a competitor does not resemble any of the potential dangers described in Albrecht. [6] For example, if a vertical agreement fixes "[m]aximum prices . . . too low for the dealer to furnish services" desired by consumers, or in such a way as to channel business to large distributors, *id., at 152-153*, then a firm dealing in a competing brand would not be harmed. Respondent was benefited rather than harmed if petitioner's pricing policies restricted ARCO **[*337]** **[****18]** sales to a few large dealers or prevented petitioner's dealers from offering services desired by consumers such as credit card sales. Even if the maximum-price agreement ultimately had acquired all of the attributes of a minimum-price-fixing scheme, respondent still would not have suffered antitrust injury because higher ARCO prices would have worked to USA's advantage. A competitor "may not complain of conspiracies that . . . set minimum prices at any level." *Matsushita Electric Industrial Corp. v. Zenith Radio Corp., 475 U.S. 574, 585, n. 8 (1986)*; see also *id., at 582-583* ("[R]espondents [cannot] recover damages for any conspiracy by petitioners to charge higher than competitive prices in the . . . market. Such conduct would indeed violate the Sherman Act, but it could not injure respondents: as petitioners' competitors, respondents stand to gain from any conspiracy to raise the market price . . ."). Indeed, the gravamen of respondent's complaint -- that the price-fixing scheme between petitioner and its dealers enabled those dealers to increase their sales -- amounts to an assertion that the dangers with which we were concerned in Albrecht **[**1891]** **[****19]** have not materialized in the instant case. In sum, respondent has not suffered "antitrust injury," since its losses do not flow from the aspects of vertical, maximum price fixing that render it illegal.

[**20]** **LEdHN[1H]**[] [1H] **LEdHN[8A]**[] [8A] **LEdHN[9A]**[] [9A]Respondent argues that even if it was not harmed by any of the anticompetitive effects identified in Albrecht, it nonetheless suffered antitrust injury because of the low prices produced by the vertical restraint. We disagree. **HN5**[] When a firm, or even a group of firms adhering to a vertical agreement, lowers prices but maintains them above predatory levels, the business lost by rivals cannot be viewed as an "anticompetitive" consequence of the claimed **[***346]** violation. [7] A firm **[*338]** complaining about the harm it suffers from nonpredatory price competition "is really claiming that it [is] unable to raise prices." Blair & Harrison, Rethinking Antitrust Injury, *42 Vand. L. Rev. 1539, 1554 (1989)*. This is not antitrust injury; indeed, "cutting prices in order to increase business often is the very essence of competition." *Matsushita, supra, at 594*. The antitrust laws were enacted for "the protection of competition, **[****21]** not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962)* (emphasis in original). "To hold that the antitrust laws protect competitors from the loss of profits due to [nonpredatory] price competition would, in effect, render illegal any decision by a firm to cut prices in order to increase market share." *Cargill, 479 U.S., at 116*.

---

[6] Albrecht is the only case in which the Court has confronted an unadulterated vertical, maximum-price-fixing arrangement. In *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213 (1951)*, we also suggested that such an arrangement was illegal because it restricted vigorous competition among dealers. The restraint in Kiefer-Stewart had an additional horizontal component, however, see *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 348, n. 18 (1982)*, since the agreement was between two suppliers that had agreed to sell liquor only to wholesalers adhering to "maximum prices above which the wholesalers could not resell." *Kiefer-Stewart, supra, at 212*.

[7] **LEdHN[8B]**[] [8B] **LEdHN[9B]**[] [9B]

The Court of Appeals implied that the antitrust injury requirement could be satisfied by a showing that the "long-term" effect of the maximum-price agreements could be to eliminate retailers and ultimately to reduce competition. *859 F. 2d, at 694, 696*. We disagree. Rivals cannot be excluded in the long run by a nonpredatory maximum-price scheme unless they are relatively inefficient. Even if that were false, however, a firm cannot claim antitrust injury from nonpredatory price competition on the asserted ground that it is "ruinous." Cf. *United States v. Topco Associates, Inc., 405 U.S. 596, 610-612 (1972)*; *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 220-221 (1940)*. "[T]he statutory policy precludes inquiry into the question whether competition is good or bad." *National Society of Professional Engineers v. United States, 435 U.S. 679, 695 (1978)*.

[**22]** ***LEdHN[1I]***[] [1I] ***LEdHN[10]***[] [10]Respondent further argues that it is inappropriate to require a showing of predatory pricing before antitrust injury can be established when the asserted antitrust violation is an agreement in restraint of trade illegal under *§ 1* of the Sherman Act, rather than an attempt to monopolize prohibited by *§ 2*. Respondent notes that the two sections of the Act are quite different. ***HN6***[] Price fixing violates *§ 1*, for example, even if a single firm's decision to price at the same level would not create *§ 2* liability. See generally *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 767-769 (1984)*. In a *§ 1* case, the price agreement itself is illegal, and respondent contends that all losses flowing from such an agreement must by definition constitute "antitrust injuries." Respondent observes that *§ 1* in general and the per se rule in particular are grounded "'on faith in price competition as a market force **[*339]** **[****23]** [and not] on a policy of low selling prices at the price of eliminating competition.'" *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 348 (1982)* (quoting Rahl, Price Competition and the Price Fixing Rule -- Preface and Perspective, 57 Nw. U.L. Rev. 137, 142 (1962)). In sum, respondent maintains that it has suffered antitrust injury even if petitioner's pricing was not predatory under *§ 2* of the Sherman Act.

LEdHN[1J][] [1J] ***LEdHN[11A]***[] [11A]We reject respondent's argument. Although a vertical, maximum-price-fixing agreement is unlawful under *§ 1* of the Sherman Act, it does not cause a competitor antitrust injury unless it results in **[**1892]** predatory pricing. [8] **[****25]** Antitrust injury **[***347]** does not arise for purposes of § 4 of the Clayton Act, see n. 1, supra, until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct, see *Brunswick, 429 U.S., at 487*; in the context of pricing practices, only predatory pricing has the requisite anticompetitive effect. **[****24]** [9] See Areeda & Turner, Predatory Pricing and Related **[*340]** Practices Under *Section 2* of the Sherman Act, 88 Harv. L. Rev. 697, 697-699 (1975); McGee, Predatory Pricing Revisited, 23 J. Law & Econ. 289, 292-294 (1980). Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury.

LEdHN[1L][] [1L] ***LEdHN[5C]***[] [5C]We have adhered to this principle regardless of the type of antitrust claim involved. In *Cargill, Inc. v. Monfort of Colorado, Inc., supra*, for example, we found that a plaintiff competitor had not shown antitrust injury and thus could not challenge a merger that was assumed **[****26]** to be illegal under § 7 of the Clayton Act, even though the merged company threatened to engage in vigorous price competition that would reduce the plaintiff's profits. ***HN7***[] We observed that nonpredatory price competition for increased market share, as reflected by prices that are below "market price" or even below the costs of a firm's rivals, "is not activity forbidden by the antitrust laws." *479 U.S., at 116*. Because the prices charged were not predatory, we found no antitrust injury. Similarly, we determined that antitrust injury was absent in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra*, even though the plaintiffs alleged that an illegal acquisition threatened to bring a "'deep pocket' parent

---

[8] ***LEdHN[11B]***[] [11B]

The Court of Appeals erred by reasoning that respondent satisfied the antitrust injury requirement by alleging that "[t]he removal of some elements of price competition distorts the markets, and harms all the participants." *859 F. 2d, at 694*. Every antitrust violation can be assumed to "disrupt" or "distort" competition. "[O]therwise, there would be no violation." P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 340.3b, p. 411 (1989 Supp.). Respondent's theory would equate injury in fact with antitrust injury. We declined to adopt such an approach in *Brunswick Corp. v. Pueblo Bowl-O-Mat., Inc., 429 U.S. 477 (1977)*, and *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)*, and we reject it again today. The antitrust injury requirement cannot be met by broad allegations of harm to the "market" as an abstract entity. Although all antitrust violations, under both the per se rule and rule-of-reason analysis, "distort" the market, not every loss stemming from a violation counts as antitrust injury.

[9] ***LEdHN[1K]***[] [1K]

This is not to deny that a vertical price-fixing scheme may facilitate predatory pricing. A supplier, for example, can reduce its prices to its own downstream dealers and share the losses with them, while forcing competing dealers to bear by themselves the full loss imposed by the lower prices. Cf. *FTC v. Sun Oil Co., 371 U.S. 505, 522 (1963)*. But because a firm always is able to challenge directly a rival's pricing as predatory, there is no reason to dispense with the antitrust injury requirement in an action by a competitor against a vertical agreement.

into a market of 'pygmies,'" *Id., at 487*, a scenario that would cause the plaintiffs economic harm. We opined nevertheless that "if [the plaintiffs] were injured, it was not 'by reason of anything forbidden in the antitrust laws': while [the plaintiffs'] loss occurred 'by reason of' the unlawful acquisitions, it did not occur 'by reason of' that which **[****27]** made the acquisitions unlawful." *Id., at 488*. To be sure, the source of the price competition in the instant case was an agreement allegedly unlawful **[***348]** under *§ 1* of the Sherman Act rather than a merger in violation of § 7 of the Clayton Act. But that difference is not salient. When prices are not predatory, any losses flowing from them cannot be said to stem from an anticompetitive aspect of the defendant's **[*341]** conduct. [10] **[****28]** "'It is in the interest of competition to permit dominant firms **[**1893]** to engage in vigorous competition, including price competition." *Cargill, 479 U.S., at 116* (quoting *Arthur S. Langenderfer, Inc. v. S.E. Johnson Co., 729 F. 2d 1050, 1057* (CA6), cert. denied, *469 U.S. 1036 (1984))*. [11]

B

LEdHN[2C][] [2C] ***LEdHN[12A]***[] [12A]We also reject respondent's suggestion that no antitrust injury need be shown where a per se violation is involved. ***HN8***[] The **[*342]** per se rule is a method of determining whether *§ 1* of the Sherman Act has been violated, but it does not indicate whether a private plaintiff has suffered antitrust injury and thus whether he may recover damages under § 4 of the Clayton **[****29]** Act. Per se and rule-of-reason analysis are but two methods of determining whether a restraint is "unreasonable," i.e., whether its anticompetitive effects outweigh its procompetitive effects. [12] The per se rule is a presumption of **[***349]** unreasonableness based on "business certainty and litigation efficiency." *Arizona v. Maricopa County Medical Society, 457 U.S., at 344*. It represents a "longstanding judgment that the prohibited practices by their nature have 'a substantial potential for impact on competition.'" *FTC v. Superior Court Trial Lawyers Assn., 493 U.S. 411, 433 (1990)* (quoting *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 16 (1984))*. "Once experience with a particular kind of restraint

---

[10] ***LEdHN[5D]***[] [5D]

We did not reach a contrary conclusion in *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574 (1986)*, where we declined define precisely the term "predatory pricing" but stated instead that "[f]or purposes of this case it is enough to note that respondents have not suffered an antitrust injury unless petitioners conspired to drive respondents out of the relevant markets by (i) pricing below the level necessary to sell their products, or (ii) pricing below some appropriate measure of cost." *Id., at 585, n. 8*. This statement does not imply that losses from nonpredatory pricing might qualify as antitrust injury; we were quite careful to limit our discussion in that case to predatory pricing. See ibid. (nonpredatory prices would not cause antitrust injury because they would "leave respondents in the same position as would market forces"). We noted that "[e]xcept for the alleged conspiracy to monopolize the . . . market through predatory pricing, these alleged conspiracies could not have caused respondents to suffer an 'antitrust injury.'" *Id., at 586*. We also observed that "respondents must show that the conspiracy caused them an injury for which the antitrust laws provide relief. That showing depends in turn on proof that petitioners conspired to price predatorily in the American market, caused such an injury." *Id., at 584, n. 7* (citations omitted); see also Id., at *id., at 594*; *Cargill, supra, at 117, n. 12* (interpreting our decision in Matsushita). We have no occasion in the instant case to consider the proper definition of predatory pricing, nor to determine whether our dictum in Matsushita that predatory pricing might consist of "pricing below the level necessary to sell [the offender's] products," *475 U.S., at 585, n. 8*, is an accurate statement of the law. See n. 3, supra.

[11] The Court of Appeals purported to distinguish Cargill and Brunswick on the ground that those cases turned on an "attenuated or indirect" relationship between the alleged violation -- the illegal merger -- and the plaintiffs' injury. *859 F. 2d, at 695*. We disagree. The Court in both cases described the injury as flowing directly from the alleged antitrust violation. See *Cargill, 479 U.S., at 108*; *Brunswick, 429 U.S., at 487*.

[12] ***LEdHN[12B]***[] [12B]

"***HN9***[] Both per se rules and the Rule of Reason are employed "to form a judgment about the competitive significance of the restraint.'" *National Collegiate Athletic Assn. v. Board of Regents of University of Oklahoma, 468 U.S. 85, 103 (1984)* (quoting *National Society of Professional Engineers v. United States, 435 U.S., at 692*). "[W]hether the ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same -- whether or not the challenged restraint enhances competition." *468 U.S., at 104*.

enables the Court to predict with confidence that the rule of reason will condemn it, it has applied a conclusive presumption that the restraint is unreasonable." *Maricopa County Medical Society, supra, at 344*.

[**30]** ***LEdHN[2D]***[] [2D] ***LEdHN[13A]***[] [13A]The purpose of the antitrust injury requirement is different. ***HN10***[] It ensures that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for either **[**1894]** damages or equitable relief. Actions per se unlawful under the antitrust laws may nonetheless have some procompetitive effects, and private parties might suffer losses **[*343]** therefrom. [13] See *Maricopa County Medical Society, supra, at 351*; *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50, n. 16 (1977)*. Conduct in violation of the antitrust **[*344]** laws may have three effects, often interwoven: In some respects the conduct may reduce competition, in other respects it may increase competition, and in still other respects effects may be neutral as to competition. **[****31]** The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. The need for this showing is at least as great under the per se rule as under the rule of reason. Indeed, insofar as the per se rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust injury requirement is underscored. "[P]ro-competitive or efficiency-enhancing aspects of practices that nominally violate the antitrust laws may cause serious harm to individuals, but this kind of harm is the essence of competition and should play no role in the definition of antitrust damages." Page, The Scope of Liability for Antitrust Violations, *37 Stan. L. Rev. 1445, 1460 (1985)*. ***HN11***[] Thus, "proof of a per se violation and of antitrust injury are distinct matters that must be shown independently." P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 334.2c, p. 330 (1989 Sup.).

[**32]** ***HN12***[]

For this reason, we have previously recognized that even in cases involving per se violations, the right of action under § 4 of the Clayton Act is available only to those private plaintiffs who have suffered antitrust injury. For example, in a case involving horizontal price fixing, "perhaps the paradigm of an unreasonable restraint of trade,"

---

[13] ***LEdHN[13B]***[] [13B]

When a manufacturer provides a dealer an exclusive area within which to distribute a product, the manufacturer's decision to fix a maximum resale price may actually protect consumers against exploitation by the dealer acting as a local monopolist. The manufacturer acts not out of altruism, of course, but out of a desire to increase its own sales -- whereas the dealer's incentive, like that of any monopolist, is to reduce output and increase price. If an exclusive dealership is the most efficient means of distribution, the public is not served by forcing the manufacturer to abandon this method and resort to self-distribution or competing distributors. Vertical, maximum price fixing thus may have procompetitive interbrand effects even if it is per se illegal because of its potential effects on dealers and consumers. See *Albrecht v. Herald Co., 390 U.S. 145, 159 (1968)* (Harlan, J., dissenting) (maximum price ceilings "do not lessen horizontal competition" but instead "drive prices toward the level that would be set by intense competition," by "prevent[ing] retailers or wholesalers from reaping monopoly or supercompetitive profits"). Indeed, we acknowledged in Albrecht that "[m]aximum and minimum price fixing may have different consequences in many situations." *Id., at 152*. The procompetitive potential of a vertical maximum price restraint is more evident now than it was when Albrecht was decided, because exclusive territorial arrangements and other nonprice restrictions were unlawful per se in 1968. See *id., at 154*; *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 375-376 (1967)*. These agreements are currently subject only to rule-of-reason scrutiny, making monopolistic behavior by dealers more likely. See *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 761 (1984)*; *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 47-59 (1977)*.

Many commentators have identified procompetitive effects of vertical, maximum price fixing. See, e.g., P. Areeda & H. Hovenkamp, ***Antitrust Law*** para. 340.3b, p. 378, n. 24 (1988 Supp.); Blair & Harrison, Rethinking Antitrust Injury, *42 Vand. L. Rev. 1539, 1553 (1989)*; Blair & Schafer, Evolutionary Models of Legal Change and the Albrecht Rule, 32 Antitrust Bull. 989, 995-1000 (1987); Bork, The Rule of Reason and the Per Se Concept: Price Fixing and Market Division, part 2, 75 Yale L.J. 373, 464 (1966); Easterbrook, Maximum Price Fixing, 48 U. Chi. L. Rev. 886, 887-890 (1981); Hovenkamp, Vertical Integration by the Newspaper Monopolist, *69 Iowa L. Rev. 451, 452-456 (1984)*; Polden, Antitrust Standing and the Rule Against Resale Price Maintenance, 37 Cleveland State L. Rev. 179, 216-217 (1989); Turner, The Durability, Relevance, and Future of American Antitrust Policy, *75 Calif. L. Rev. 797, 803-804 (1987)*.

[1895]** National Collegiate Athletic Assn. v. Board of Regents of University of Oklahoma, 468 U.S. 85, 100 (1984), we observed that the plaintiffs were still required to "show that the conspiracy caused them an injury for which the antitrust laws provide relief." Matsushita, 475 U.S., at 584, n. 7 (citing Brunswick) (emphasis added). Similarly, in Associated General Contractors of California, Inc. v. Carpenters, 459 U.S. 519 (1983), we noted that a restraint of trade was illegal per se in the sense that it could "be condemned even without proof of its actual market effect," but we maintained that even if it "may have **[*345]** been unlawful, it does not, of course, necessarily follow that still **[****33]** another party . . . is a person injured by reason of a violation of the antitrust laws within the meaning of § 4 of the Clayton Act." Id., at 528-529.

C

LEdHN[3G][] [3G] **LEdHN[14]**[] [14]We decline to dilute the antitrust injury requirement here because we find that there is no need to encourage private enforcement by competitors of the rule against vertical, maximum price fixing. If such a scheme causes the anticompetitive consequences detailed in Albrecht, consumers and the manufacturers' own dealers may bring suit. **HN13**[] The "existence of an identifiable class of persons whose self-interest would normally motivate **[***351]** them to vindicate the public interest in antitrust enforcement diminishes the justification for allowing a more remote party . . . to perform the office of a private attorney general." Associated General Contractors, 459 U.S., at 542.

LEdHN[3H][] [3H] **[****34]** Respondent's injury, moreover, is not "inextricably intertwined" with the antitrust injury that a dealer would suffer, McCready, 457 U.S., at 484, and thus does not militate in favor of permitting respondent to sue on behalf of petitioner's dealers. **HN14**[] A competitor is not injured by the anticompetitive effects of vertical, maximum price-fixing, see supra, at 336-337, and does not have any incentive to vindicate the legitimate interests of a rival's dealer. See Easterbrook, The Limits of Antitrust, 63 Texas L. Rev. 1, 33-39 (1984). A competitor will not bring suit to protect the dealer against a maximum price that is set too low, inasmuch as the competitor would benefit from such a situation. Instead, a competitor will be motivated to bring suit only when the vertical restraint promotes interbrand competition between the competitor and the dealer subject to the restraint. See n. 13, supra. In short, a competitor will be injured and hence motivated to sue only when a vertical, maximum-price-fixing arrangement has a procompetitive impact on the market. Therefore, **[****35]** providing **[*346]** the competitor a cause of action would not protect the rights of dealers and consumers under the antitrust laws.

III

LEdHN[1M][] [1M] **LEdHN[2E]**[] [2E]Respondent has failed to demonstrate that it has suffered any antitrust injury. The allegation of a per se violation does not obviate the need to satisfy this test. The judgment of the Court of Appeals is reversed, and the case is remanded for proceedings consistent with this opinion.

It is so ordered.

Dissent by: STEVENS

Dissent

JUSTICE **STEVENS**, with whom JUSTICE **WHITE** joins, dissenting.

The Court today purportedly defines only the contours of antitrust injury that can result from a vertical, nonpredatory, maximum-price-fixing scheme. But much, if not all, of its reasoning about what constitutes injury actionable by a competitor would apply even if the alleged conspiracy had been joined by other major oil companies doing business in California, as well as their retail outlets. [1] The Court undermines the enforceability of a **[**1896]**

---

[1] For example, the Court reasons:

substantive price-fixing violation with a flawed **[****36]** construction of § 4, erroneously assuming that the level of a price fixed by a *§ 1* conspiracy is relevant to legality and that all vertical arrangements conform to a single model.

[*352]** I

Because so much of the Court's analysis turns on its characterization of USA's cause of action, it is appropriate to **[*347]** begin with a more complete description of USA's theory. As the case comes to us on review of summary judgment, we assume the truth of USA's allegation that ARCO conspired with its retail dealers to fix the price of gas at specific ARCO stations that compete directly with USA stations. It is conceded that this price-fixing conspiracy is a per **[****37]** se violation of *§ 1* of the Sherman Act.

USA's theory can be expressed in the following hypothetical example: In a free market ARCO's advertised gas might command a price of $ 1 per gallon while USA's unadvertised gas might sell for a penny less, with retailers of both brands making an adequate profit. If, however, the ARCO stations reduce their price by a penny or two, they might divert enough business from USA stations to force them gradually to withdraw from the market. [2] **[****38]** The fixed price would be lower than the price that would obtain in a free market, but not so low as to be "predatory" in the sense that a single actor could not lawfully charge it under *15 U.S.C. § 2* or *§ 13a*. [3]

This theory rests on the premise that the resources of the conspirators, combined and coordinated, are sufficient to sustain below-normal profits in selected localities long enough to force USA to shift its capital to markets where it can receive a normal return on its investment. [4] Thus, during the initial **[*348]** period of competitive struggle between the conspirators and the independents, consumers will presumably benefit from artificially low prices. If the alleged campaign is successful, however -- and as the case comes to us we must assume it will be -- in the long run there will be less competition, or potential competition, from independents such as USA, and the character of the market will be different **[****39]** than if the conspiracy had never taken place. USA alleges that, in fact, the independent market already has suffered significant losses. [5]

[**40]** **[***353]** **[**1897]** II

"Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. Hence, they cannot give rise to antitrust injury." Ante, at 340.

"When prices are not predatory, any losses flowing from them cannot be said to stem from an anticompetitive aspect of the defendant's conduct." Ante, at 340-341.

[2] "31. Arco and its co-conspirators have engaged in limit pricing practices in which prices are deliberately set on gasoline at a level below their competitors' cost with the purpose and effect of making it impossible for plaintiff and other independents to compete. For example, Arco and its co-conspirators have sold gasoline, ex tax, at the retail pump for less than independents, such as plaintiff, can purchase gasoline at wholesale." Amended Complaint, App. 18.

[3] "27. Arco and its co-conspirators have organized a resale price maintenance scheme, as a direct result of which competition that would otherwise exist among Arco-branded dealers has been eliminated by agreement, and the retail price of Arco-branded gasoline has been fixed, stabilized and maintained at artificially low and uncompetitive levels. . . ." Amended Complaint, App. 17.

[4] It may be that ARCO could have accomplished its objectives independently, merely by reducing its own prices sufficiently to induce its retail customers to charge abnormally low prices and divert business from USA stations. See, e.g., Amended Complaint para. 30, App. 18. Such independent action by ARCO, followed by independent action by its retail customers, of course would be lawful, even if it produced the same consequences as the alleged conspiratorial program. See *United States v. Parke, Davis & Co., 362 U.S. 29, 44 (1960)*. Indeed, a full trial might establish that that is what happened. Nevertheless, as the case comes to us, we assume that ARCO is the architect of an illegal conspiracy.

[5] "18. For the last few years, there has been, and still is, a steady and continuous reduction in the competitive effectiveness of independent refiners and marketers selling in California and the western United States. During this time period, more than a dozen large independents have sold out, liquidated or drastically curtailed their operations, and many independent retail stations have been closed. The barriers to entry into this market have been high, and today such barriers are effectively insurmountable; once an independent is eliminated, it is highly unlikely that it will be replaced." Amended Complaint, App. 15.

ARCO's alleged conspiracy is a naked price restraint in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. [6] It is undisputed that ARCO's price-fixing arrangement, as alleged, **[*349]** is illegal per se under the rule against maximum price fixing, which is "'grounded on faith in price competition as a market force [and not] on a policy of low selling prices at the price of eliminating competition.' Rahl, Price Competition and the Price Fixing Rule -- Preface and Perspective, 57 Nw. U.L. Rev. 137, 142 (1962)." *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 348 (1982)*. At issue is only whether a maximum price, administered on a host of retail stations that are ostensibly competing with one another as well as with other retailers, may be challenged by the competitor targeted by the pricing scheme.

[**41]** Section 4 of the Clayton Act allows private enforcement of the antitrust laws by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*. See *Simpson v. Union Oil Co. of California, 377 U.S. 13, 16 (1964)* (quoting *Radovich v. National Football League, 352 U.S. 445, 454 (1957))* (laws allowing private enforcement of the antitrust laws by an aggrieved party "'protect the victims of the forbidden practices as well as the public'"). In order to invoke § 4, a plaintiff must prove that it suffered an injury that (1) is "of the type the antitrust laws were intended to prevent" and (2) "flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 (1977)*. In Brunswick, the plaintiff businesses claimed that they were deprived of the benefits of the increased concentration that would have resulted had failing businesses not been acquired by petitioner, allegedly in violation of § 7. In concluding that the plaintiffs had failed to prove "antitrust injury," we found that neither condition of § **[****42]** 4 standing was satisfied: First, the plaintiffs sought to recover damages because the mergers had preserved businesses and competition, which is not the type of injury that the antitrust laws are designed to prevent; and second, the plaintiffs had not been harmed by any potential change in the market structure **[*350]** effected by the entry of the "'deep pocket' parent." *Id., at 487-488*.

[*354]** In this case, however, both conditions of standing are met. First, *§ 1* is intended to forbid price-fixing conspiracies that are designed to drive competitors out of the market. See *Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 213 (1959)* (illegal coordination "is not to be tolerated merely because the victim is just one merchant whose business is so small that his destruction makes little difference to the economy"). USA alleges that ARCO's pricing scheme aims at forcing independent refiners and marketers out of business and has created "an immediate and growing probability that the independent **[**1898]** segment of the industry will be destroyed altogether." [7]

[**43]** In Brunswick, we recognized that requiring a competitor to show that its loss is "of the type" antitrust laws were intended to prevent

---

[6] We have long held under the Sherman Act that "a combination for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222-223 (1940)*. See also *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 213 (1951)* (maximum resale prices); *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 761 (1984)* (vertical resale prices); *Albrecht v. Herald Co., 390 U.S. 145 (1968)* (vertical maximum resale prices).

[7] USA's Amended Complaint specifically alleges:

"39. As a direct and proximate result of the above-described combinations and conspiracy and of the acts taken in furtherance thereof:

"(a) the price of gasoline has been artificially fixed, maintained and stabilized;

"(b) independent refiners and marketers have suffered substantial losses of sales and profits and their ability to compete has been seriously impaired;

"(c) independent refiners and marketers have gone out of business or been taken over by Arco;

"(d) there is an immediate and growing probability that the independent segment of the industry will be destroyed altogether and that control of the discount market will be acquired by Arco." App. 20.

> "does not necessarily mean . . . that § 4 plaintiffs must prove an actual lessening of competition in order to recover. The short-term effect of certain anticompetitive behavior -- predatory below-cost pricing, for example -- may be to stimulate price competition. But competitors may be able to prove antitrust injury before they actually **[*351]** are driven from the market and competition is thereby lessened." *429 U.S., at 489, n. 14*.

The pricing behavior in the Court's hypothetical example may cause actionable injury because it is "predatory." This is so because the Court assumes that a predatory price is illegal. The direct relationship between the illegality and the harm is what makes the competitor's short-term loss "antitrust injury." The fact that the illegality in the case before us today stems from the illegal conspiracy, rather than the predatory character of the price, does not change the analysis of "that which makes defendants' acts unlawful." [8] **[****45]** **[***355]** Thus, notwithstanding any temporary benefit **[****44]** to consumers, the unlawful pricing practice that is harmful in the long run to competition causes "antitrust injury" for which a competitor may seek damages. [9]

[*352] Second, USA is directly and immediately harmed by this price-fixing scheme, that is to say, by "that which makes defendants' acts unlawful." *Id., at 489*. In Brunswick, the allegedly illegal conduct at issue -- the merger -- itself did not harm the plaintiffs; similarly, in *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)*, the alleged injury arose not from the illegality of the proposed merger, but merely from possible postmerger behavior. Although the link between the illegal mergers and the alleged harms was insufficient to prove antitrust injury in either Brunswick or Cargill, both of those cases recognize that illegal pricing practices may **[**1899]** cause competitors "antitrust injury." [10]

[**46]** The Court accepts that, as alleged, the vertical price-fixing scheme by ARCO is per se illegal under *§ 1*. Nevertheless, it denies USA standing to challenge the arrangement because it is neither a consumer nor a dealer in the vertical arrangement, but only a competitor of ARCO: The "antitrust laws were enacted for 'the protection of competition, not competitors.'" Ante, at 338 (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320 (1962))*. This proposition -- which is often used as a test of whether a violation of law occurred -- cannot be read to deny all remedial actions by competitors. **[*353]** When competitors are injured by illicit agreements among their rivals rather than by the free play of market forces, the antitrust laws protect competitors precisely for the purpose of

---

[8] *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 (1977)*. The analysis in *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104 (1986)*, also supports this conclusion. There, the respondent alleged "antitrust injury" on alternative theories: first, that after the challenged merger petitioners' company would be able to lower its prices because it would be more efficient; and second, that it might attempt to drive respondent out of business by engaging in sustained predatory pricing. We rejected the first theory because independent decisions to reduce prices based on efficiencies are legal and precisely what the antitrust laws are intended to encourage. *Id., at 116-117*. We rejected the second theory because respondent "neither raised nor proved any claim of predatory pricing before the District Court." *Id., at 119*. However, in discussing the second theory, we recognized that predatory pricing "is a practice that harms both competitors and competition," and because it aims at "the elimination of competition . . . . is thus a practice 'inimical to the purposes of [the antitrust] laws,' *Brunswick, 429 U.S., at 488*, and one capable of inflicting antitrust injury." *Id., at 117-118* (footnote omitted). Again, a competitor suffers the same "antitrust injury" from an illegal conspiracy setting prices designed to eliminate it as it would suffer from a single firm setting predatory prices.

[9] See also Blair & Harrison, Rethinking Antitrust Injury, *42 Vand. L. Rev. 1539, 1561-1565 (1989)* (unsuccessful predatory efforts cause "antitrust injury" even though consumers have not suffered).

[10] I agree that not every loss that is causally related to an antitrust violation is "antitrust injury," ante, at 339, n. 8, but a scheme that prices the services of conspirators below those of competitors may cause injury for which the competitor may recover damages under § 4. In *Blue Shield of Virginia v. McCready, 457 U.S. 465 (1982)*, the presumed injury to competitors was strong enough to support even an indirect action by a patient of the competitor. Petitioners, a medical insurance company and an organization of psychiatrists, conspired in violation of *§ 1* to compensate patients for the services of psychiatrists, but not those of psychologists. We recognized that if patients had chosen to go to psychiatrists, the "antitrust injury would have been borne in the first instance by the [psychologist] competitors of the conspirators." *Id., at 483*. Instead, patient McCready went to a psychologist at her own expense. We held that "[a]lthough McCready was not a competitor of the conspirators, the injury she suffered was inextricably intertwined with the injury the conspirators sought to inflict on the psychologists and the psychotherapy market." *Id., at 483-484*.

protecting competition. The Court nevertheless interprets the proposition as categorically excluding actions by a competitor who suffers when others charge "nonpredatory prices pursuant to a vertical, maximum-price-fixing scheme." Ante, at 331. In the context of a *§ 1* violation, however, the distinctions both of the price level **[***356]** and of the vertical nature of the conspiracy **[****47]** are unfounded. Each of these two analytical errors merits discussion.

III

The Court limits its holding to cases in which the noncompetitive price is not "predatory," ante, at 331, 333, n. 3, 335, 339, 340, essentially assuming that any nonpredatory price set by an illegal conspiracy is lawful, see n. 1, supra. This is quite wrong. Unlike the prohibitions against monopolizing or underselling in violation of *§ 2* or *§ 13a*, the gravamen of the price-fixing conspiracy condemned by *§ 1* is unrelated to the level of the administered price at any particular point in time. A price fixed by a single seller acting independently may be unlawful because it is predatory, but the reasonableness of the price set by an illegal conspiracy is wholly irrelevant to whether the conspirators' work product is illegal.

If any proposition is firmly settled in the law of antitrust, it is the rule that the reasonableness of the particular price agreed upon by defendants does not constitute a defense to a price-fixing charge. [11] **[****50]** In *United States v. Trenton Potteries* ***[*354]*** *Co., 273 U.S. 392 (1927)*, the Court explained that "[t]he reasonable price fixed today may through economic **[****48]** and business changes become the unreasonable price of tomorrow," *id., at 397*, and cautioned that

> " **[**1900]** in the absence of express legislation requiring it, we should hesitate to adopt a construction making the difference between legal and illegal conduct in the field of business relations depend upon so uncertain a test as whether prices are reasonable -- a determination which can be satisfactorily made only after a complete survey of our economic organization and a choice between rival philosophies." *Id., at 398*.

See also *United States v. Masonite Corp., 316 U.S. 265, 281-282 (1942)*. This reasoning applies with equal force to a rule that provides conspirators with a defense if their agreed upon prices are nonpredatory, but no defense if their prices fall below the elusive line that defines predatory pricing. [12] **[***357]** By assuming that the level of a price is relevant to the inquiry in a *§ 1* conspiracy case, the Court sets sail on the "sea of doubt" that Judge Taft condemned in his classic opinion in the Addyston Pipe & Steel case:

> "It is true that there are some cases in which the courts, mistaking, as we conceive, **[****49]** the proper limits of the relaxation of the rules for determining the unreasonableness of restraints of trade, have set sail on a sea of **[*355]** doubt, and have assumed the power to say, in respect to contracts which have no other purpose and no other consideration on either side than the mutual restraint of the parties, how much restraint of competition is in the public interest, and how much is not." *United States v. Addyston Pipe & Steel Co., 85 F. 271, 283-284 (CA6 1898)*.

---

[11] See *United States v. Trenton Potteries Co., 273 U.S. 392, 398 (1927)*; see also *United States v. Trans-Missouri Freight Assn., 166 U.S. 290 (1897)*; *United States v. Addyston Pipe & Steel Co., 85 F. 271, 291 (CA6 1898)* ("[T]he association of the defendants, however reasonable the prices they fixed, however great the competition they had to encounter, and however great the necessity for curbing themselves by joint agreement from committing financial suicide by ill-advised competition, was void at common law, because in restraint of trade, and tending to a monopoly").

[12] Like the determination of a "reasonable" price, determination of what is a "predatory price" is far from certain. The Court declines to define predatory pricing for the purpose of the § 4 inquiry it creates today, ante, at 341, n. 10. Predatory pricing by a conspiracy, rather than a single actor, may result from more than pricing below an appropriate measure of cost. See *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 585, n. 8 (1986)*. See also *A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F. 2d 1396, 1400 (CA7 1989)* (describing the many considerations in a single firm case that make it difficult to infer predatory conduct from the relation of price to cost).

IV

The Court is also careful to limit its holding to cases involving "vertical" price-fixing agreements. In a thinly veiled circumscription of the substantive reach of *§ 1*, the Court simply interprets "antitrust injury" under § 4 so that it excludes challenges by any competitor alleging a vertical conspiracy: "[A] vertical price-fixing scheme may facilitate predatory **[****51]** pricing . . . [b]ut because a firm always is able to challenge directly a rival's pricing as predatory, there is no reason to dispense with the antitrust injury requirement in an action by a competitor against a vertical agreement." Ante, at 339, n. 9. [13] This focus on the vertical character of the agreement is misleading because it incorrectly assumes that there is a sharp distinction between vertical and horizontal arrangements, and because it assumes that all vertical arrangements affect competition in the same way.

The characterization of ARCO's price-fixing arrangement as "vertical" does not limit its potential consequences to a neat category of injuries. A horizontal conspiracy among ARCO retailers administered by, for example, trade association executives instead of executives **[****52]** of their common supplier would generate exactly the same anticompetitive consequences. ARCO and its retail dealers all share an interest in excluding independents like USA from the market. The fact **[*356]** that each member of a group of price fixers may have made a separate, individual agreement with their common agent does not destroy the horizontal character of the agreement. We so held in the Masonite case:

> **[**1901]** "[T]here can be no doubt that this is a price-fixing combination which is illegal per se under the *Sherman Act. United States v. Trenton Potteries Co., 273 U.S. 392* [(1927)]; *Ethyl Gasoline Corp. v. United States, 309 U.S. 436* [(1940)]; *United States v. Socony-Vacuum Oil Co., 310 U.S. 150* [(1940)]. That is true though the District Court found that, in negotiating and entering into the first agreements, each appellee, other than Masonite, acted independently **[***358]** of the others, negotiated only with Masonite, desired the agreement regardless of the action that might be taken by any of the others, did not require as a condition of its acceptance that Masonite make such an agreement with any of the **[****53]** others, and had no discussions with any of the others. . . . Prices are fixed when they are agreed upon. *United States v. Socony-Vacuum Oil Co., supra, p. 222*. The fixing of prices by one member of a group, pursuant to express delegation, acquiescence, or understanding, is just as illegal as the fixing of prices by direct, joint action. Id." [14]

Differences between vertical and horizontal agreements may support an argument that the former are more reasonable, and therefore more likely to be upheld as lawful, than the latter. But such differences provide no support for the Court's contradictory reasoning that the direct and intended consequences of one form of conspiracy **[****54]** do not constitute "antitrust injury," while precisely the same consequences of the other form do.

[*357] Finally, the Court's treatment of vertical maximum-price-fixing arrangements necessarily assumes that all such conspiracies have the same competitive consequences. Ante, at 337, 339-340, 345. The Court is again quite wrong. [15] For example, a price agreement that is ancillary to an exclusive distributorship might protect consumers

---

[13] Thus, a victim of a vertical maximum-price-fixing conspiracy that is successfully driving it from the market cannot bring an action under *§ 1* as long as the conspirators take care to fix their prices at "nonpredatory" levels.

[14] *United States v. Masonite Corp., 316 U.S. 265, 274-276 (1942)*. See also ante, at 336, n. 6 (suggesting a horizontal component of the maximum-price-fixing arrangement in Kiefer-Stewart); *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 744-748 (1988)* (STEVENS, J., dissenting).

[15] Indeed, the Court elsewhere acknowledges that "'[m]aximum and minimum price fixing may have different consequences in many situations.'" Ante, at 343, n. 13 (quoting *Albrecht, 390 U.S., at 152*). This is quite true. See, e.g., *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 348 (1982)* (the per se rule against maximum prices guards against the elimination of competition, discouraging entry into the market, deterring experimentation, and allowing hidden price setting); *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 51, n. 18 (1977)* (vertical price fixing reduces interbrand and intrabrand competition and may facilitate cartelizing). In Sylvania, the Court also recognized that "Congress recently has expressed its approval of a per se analysis of vertical price restrictions by repealing those provisions of the Miller-Tydings and McGuire Acts allowing fair-trade pricing at the option of the individual States." Ibid. See also *White Motor Co. v. United States, 372 U.S. 253, 268 (1963)*

from an attempt by the distributor to exploit its limited monopoly. However, a conclusion that such an agreement would not cause any antitrust injury lends no support to the Court's holding that an illegal price arrangement designed to drive a competitor out of business is immune from challenge by its intended victim. [16]

[**55]** **[*358]** **[***359]** **[**1902]** V

In a conspiracy case we should always ask ourselves why the defendants have elected to act in concert rather than independently. [17] Although in certain situations collective action may actually foster competition, see, e.g., *National Collegiate Athletic Assn. v. Board of Regents of University of Oklahoma, 468 U.S. 85 (1984)*, we normally presume that the free market functions most effectively when individual entrepreneurs act independently. This is true with respect to both maximum and minimum pricing arrangements.

[**56]** Professor Sullivan recognized that producers fixing maximum prices "are not acting from undiluted altruism," but **[*359]** from self-interested goals such as prevention of new entries into the market. L. Sullivan, Law of Antitrust 211 (1977). He described the broad policy reasons to prohibit collusive pricing:

> "The policy which insists on individual decisions about price thus has at its source more than a preference for the independence of the small businessman (though that is surely there) and more than a preference for the lower prices which such a policy will usually yield to consumers (though that too is strongly present). Also at work is the theoretical conviction that the most general function of the competitive process, the allocation and reallocation of resources in a rational yet automatic manner, can be carried out only if independence by each trader is scrupulously required. Created out of the confluence of these parallel strivings, the policy has a breadth **[***360]** which makes it as forbidding to maximum price arrangements as to the more common ones which forestall price decreases." *Id., at 212*.

(BRENNAN, J., concurring) ("Resale price maintenence is not only designed to, but almost invariably does in fact, reduce price competition not only among sellers of the affected product, but quite as much between that product and competing brands").

[16] The Court grudgingly "assume[s], arguendo, that Albrecht correctly held that vertical, maximum price fixing is subject to the per se rule," ante, at 335, n. 5, but seeks to limit that holding to "potential effects on dealers and consumers, not . . . competitors," ante, at 336. However, in its zeal to narrow antitrust injury, the Court assumes that all vertical maximum-price-fixing arrangements mimic the circumstances present or discussed in Albrecht, in which there was monopoly power at both the production and exclusive distributorship stages. This approach is incorrect. For example, in Albrecht itself the Court identified possible injury to consumers as one basis for its per se rule, even though there was no evidence of actual consumer injury in that case. *390 U.S., at 152-153*. Furthermore, the Albrecht Court did not treat Albrecht himself as a "dealer" in the conspiracy, but essentially as a "competitor" targeted by the price-fixing conspiracy between Herald Company and the new dealers that were hired "to force petitioner to conform to the advertised retail price" by selling newspapers in his territory at lower, fixed prices. *Id., at 149-150*, and n. 6. Although Albrecht was a potential Herald dealer -- and thus not strictly a "dealer" or a "competitor" in the Court's use of those terms -- what is critical is that he had standing to bring a *§ 1* action as the victim of a vertical conspiracy to underprice his sales. Finally, the Court contradicts its own contrived model when it admits that vertical maximum-price-fixing schemes may facilitate predatory pricing for which a competitor could suffer "antitrust injury" in violation of *§ 2*. Ante, at 339, n. 9.

[17] Until today, the Court has clearly understood why *§ 1* fundamentally differs from other antitrust violations:

"The reason Congress treated concerted behavior more strictly than unilateral behavior is readily appreciated. Concerted activity inherently is fraught with anticompetitive risk. It deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands. In any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit. This not only reduces the diverse directions in which economic power is aimed but suddenly increases the economic power moving in one particular direction. Of course, such mergings of resources may well lead to efficiencies that benefit consumers, but their anticompetitive potential is sufficient to warrant scrutiny even in the absence of incipient monopoly." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768-769 (1984)*.

In carving out this exception to the enforcement of *§ 1*, **[****57]** the Court has chosen to second-guess the wisdom of our per se rules and to embark on the questionable enterprise of parsing illegal conspiracies. This approach fails to heed the prudence urged in *United States v. Topco Associates, Inc., 405 U.S. 596 (1972)*:

> "The fact is that courts are of limited utility in examining difficult economic problems. Our inability to weigh, in any meaningful sense, destruction of competition in one sector of the economy against **[**1903]** promotion of competition in another sector is one important reason we have formulated per se rules.
>
> "In applying these rigid rules, the Court has consistently rejected the notion that naked restraints of trade are to be tolerated because they are well intended or because they are allegedly developed to increase competition. **[*360]** E.g., *United States v. General Motors Corp., 384 U.S. 127, 146-147 (1966)*; *United States v. Masonite Corp., 316 U.S. 265 (1942)*; *Fashion Originators' Guild v. FTC, 312 U.S. 457 (1941)*." *Id., at 609-610*.

The Court, in its haste to excuse illegal behavior in the name of efficiency, [18] has cast aside a century of understanding **[****58]** that our antitrust laws are designed to safeguard more than efficiency and consumer welfare, [19] and that private actions not only compensate the injured, but also deter wrongdoers. [20]

[**59]** **[*361]** **[***361]** As we explained in *United States v. American Tobacco Co., 221 U.S. 106, 183 (1911)*: "[I]t was the danger which it was deemed would arise to individual liberty and the public well-being from acts like those which this record exhibits, which led the legislative mind to conceive and to enact the Anti-trust Act." The conspiracy alleged in this complaint poses the kind of threat to individual liberty and the free market that the Sherman Act was enacted to prevent. In holding such a conspiracy immune from challenge by its intended victim, the Court is unfaithful to its history of **[**1904]** respect for this "charter of freedom." [21]

---

[18] See, e.g., ante, at 337-338, n. 7 ("Rivals cannot be excluded in the long run by a nonpredatory maximum-price scheme unless they are relatively inefficient"); ante, at 344 ("[I]nsofar as the per se rule permits the prohibition of efficient practices in the name of simplicity, the need for the antitrust injury requirement is underscored"). Firms may properly go out of business because they are inefficient; market inefficiencies may also create imperfections leading to some firms' demise. The Court sanctions a new force -- the super-efficiency of an illegally combined group of firms who target their resources to drive an otherwise competitive firm out of business. Cf. Note, Below-Cost Sales and the Buying of Market Share, *42 Stan. L. Rev. 695, 741 (1990)* (discussing long-term displacement of "otherwise efficient producers" by pricing to buy out a market share in a geogaphic area).

[19] Chief Justice Hughes regarded the Sherman Act as a "charter of freedom," *Appalachian Coals, Inc. v. United States, 288 U.S. 344, 359 (1933)*. Judge Learned Hand recognized Congress' desire to strengthen small business concerns and to "put an end to great aggregations of capital because of the helplessness of the individual before them," *United States v. Aluminum Co. of America, 148 F. 2d 416, 428-429 (CA2 1945)*, and we recently reaffirmed that the Sherman Act is "the Magna Carta of free enterprise," *United States v. Topco Associates, Inc., 405 U.S. 596, 610 (1972)*. See also, e.g., Handler, Is Antitrust's Centennial a Time for Obsequies or for Renewed Faith in its National Policy? 10 Cardozo L. Rev. 1933 (1989); Hovenkamp, Distributive Justice and the Antitrust Laws, 51 Geo. Wash. L. Rev. 1 (1982); Flynn & Ponsoldt, Legal Reasoning and the Jurisprudence of Vertical Restraints: The Limitations of Neoclassical Economic Analysis in the Resolution of Antitrust Disputes, *62 N.Y.U.L. Rev. 1125, 1137-1141 (1987)* (discussing the political, social, and moral -- as well as economic -- goals motivating Congress in enacting antitrust legislation).

[20] See, e.g., *Simpson v. Union Oil Co. of California, 377 U.S. 13 (1964)*; see also Polden, Antitrust Standing and the Rule Against Resale Price Maintenance, 37 Clev. St. L. Rev. 179, 208-209, 220-221 (1989) (§ 4 furthers congressional objectives of deterrence and compensation by allowing private suits by injured competitors); Blair & Harrison, 42 Vand. L. Rev., at 1564-1565 (treating losses of firms that are targeted by unsuccessful predatory efforts as "antitrust injury" furthers private enforcement of antitrust laws and avoids "suboptimal levels of deterrence").

The Court of Appeals below observed that barring competitor standing leaves enforcement of the "vast majority of unlawful maximum resale price agreements" in the hands of "an unenthusiastic Department of Justice and, under certain circumstances, the dealers who are parties to the resale price maintenance agreement." *859 F. 2d 687, 694, n. 5 (CA9 1988)*.

[21] *Appalachian Coals, Inc., 288 U.S., at 359*.

I respectfully dissent.
