According to Novell, Gates's decision to withdraw support for the namespace extension APIs was consistent with a plan that had been discussed and adopted by Microsoft executives in June 1993, at a retreat at Gates's estate on Hood Canal. That plan called for Windows 95 to be shipped with limited extensibility, reserving for Microsoft's applications the functionality that the namespace extension APIs provided. (*See* Pl.'s Ex. 61). The plan's purpose was to give Microsoft's applications "a very significant lead over [Microsoft's] competitors, and make [Microsoft's] competitors' products look 'old.'" (*Id.* at MS 00971223). Microsoft was concerned that if the extensibility were not withheld from ISVs, Word and Excel would have to "battle against their competitors on even turf. Given that Lotus and WordPerfect have largely caught up, [Word and Excel] almost certainly lose ground — if not in market share, then in margins." (Pl.'s Ex. 62 at MX 1389851). **[*17]** [10]

After Microsoft withdrew support for the namespace extension APIs in October 1994, Novell was confronted with three options: (1) to continue to write its own programs using the namespace extension APIs that were no longer supported by Microsoft but were still accessible to ISVs in possession of the beta version; (2) to use Microsoft's common file open dialog (instead of the namespace extension APIs), which remained available to ISVs after the withdrawal of support for the namespace extension APIs; or (3) to write its own customized file open dialog. (*See* Harral, Trial Tr. at 342-44, Oct. 20, 2011). Although it explored the first option, Novell concluded that it could not use the previously released documentation **[*18]** for the namespace extension APIs because Microsoft was no longer providing any assistance for writing programs based upon those APIs. (*Id.* at 345-46). Novell also concluded that the second option was unsatisfactory because to use it would "impose[] the standards of the operating system" on developers. (*Id.* at 271). Specifically, using Microsoft's common file open dialog would have caused Novell to stop providing features that it had provided to its customers in the past, thereby "disenfranchis[ing] [its] customer base." (Harral, Trial Tr. at 504, Oct. 24, 2011; Richardson, Trial Tr. at 629-30, Oct. 25, 2011; *see* Gibb, Trial Tr. at 891, Oct. 26, 2011). Therefore, in January 1995 Novell stopped trying to reproduce the lost functionality and chose the third option, beginning to write its own customized file open dialog by having two developers, Harral and Richardson, work around the clock, sometimes in excess of 80 hours per week, under Gibb's supervision. (*See* Harral, Trial Tr. at 350-54, Oct. 20, 2011).

When Gates decided to withdraw support for the namespace extension APIs, some Microsoft executives were concerned that the decision would not be well received by ISVs. In that regard, **[*19]** Brad Silverberg wrote an email to other Microsoft executives, including Gates, on October 5, 1994, predicting there would be a "firestorm of protests" from ISVs, including WordPerfect, that were using the shell extensions. (Pl.'s Ex. 220 at MX 5103184). However, shortly before Silverberg's email was written, Brad Struss, who headed the Windows 95 team for Microsoft's Development Relations Group and worked closely with Novell, reported that Novell "ha[d] not begun any work on IShellFolder, IShellView, etc.," i.e. the namespace extensions. (Def.'s Ex. 17 at MX 6109491). Struss's

---

[9] There is additional evidence that by October 1994 Gates was concerned about competition from Lotus and Novell. For example, Gates wrote an email, after watching a demonstration of Novell's new technology at a conference held in Scottsdale, Arizona on September 20, 1994, stating that "Novell [was] a lot more aware of how the world [was] changing than I thought they were." (Pl.'s Ex. 222; *see* Pl.'s Exs. 17, 31-33, 54, 72, 88, 91, 127, 201). There also was evidence that other executives at Microsoft perceived Novell's products to constitute middleware threats to Microsoft's operating system. Brad Silverberg, a senior Microsoft executive, wrote in an email dated June 15, 1993 that "our competitors are going to do everything they can to fragment windows, they will build their own middleware to claim api ownership." (Pl.'s Ex. 54 at MS 0185884). Likewise, John Ludwig of Microsoft wrote an internal email in which he stated, *inter alia*, that "our worst nightmare is novell/lotus being successful at establishing their 'middleware' as a standard. **[*16]** [O]urs ought to be ubiquitously available to forestall this. [O]ur huge advantage vis-à-vis novell is our end-user franchise, we shouldn't cast aside this advantage." (*Id.; see* Pl.'s Exs. 32 at MS 7079459, 33 at MS 5011635, 44 at MS 7080466-67).

[10] As Novell's counsel acknowledged in closing argument, the Hood Canal plan was never implemented in light of the fact that Excel, Word, and Office did not use the functionality provided by the namespace extension APIs. (Trial Tr. at 5324-25, Dec. 13, 2011). However, Novell contends the Hood Canal plan is relevant in casting light upon the reason for Gates's decision to withdraw support for the namespace extension APIs on October 3, 1994. That contention is not unreasonable.

email also included the results of a survey Microsoft conducted of major ISVs to ascertain if ISVs in fact were using the namespace extension APIs. (*Id.*). On October 12, 1994, after the decision to withdraw support for the namespace extension APIs was made, Struss advised Microsoft executives by email that Microsoft was "notifying ISVs about the namespace api changes." (Def.'s Ex. 3 at MX 6055840). He reported that "WP [WordPerfect] . . . appear[s] to be OK with this." (*Id.*). Struss also testified at trial that he told others at Microsoft "what [he] knew to be true or what had been communicated to [him] from **[*20]** WordPerfect, which is that they were not using it and they were not dependent upon it." (Struss, Trial Tr. at 3270, Nov. 28, 2011).

Novell presented no witness to rebut this testimony or to contradict what was said in the October 12 email. There also is no evidence in the record that Novell ever complained to Microsoft about Microsoft's decision to withdraw support for the namespace extension APIs. Further, there is no evidence that any top-level executive at Novell was involved in the decision-making process concerning the choice of the third option, i.e., writing of customized code for WordPerfect. Frankenberg testified that any action that could jeopardize the timely release of WordPerfect or Quattro Pro would have been referred to some or all of four senior executives: Ad Rietveld, Executive Vice President of the Novell Applications Group; Dave Moon, Senior Vice President of the Business Applications Group; Mark Calkins, Vice President and General Manager of the Business Applications Group; and Glenn Mella, Vice President of Marketing. (Frankenberg, Trial Tr. at 1140-42, 1179-80, Nov. 7-8, 2011). Moreover, Frankenberg agreed that in any business or organization faced with an important **[*21]** decision, a formal memorandum would normally be presented to the senior executives laying out the concerns, issues, and considerations facing that business and making some strategic or tactical choice. (*Id.* at 1181, Nov. 8, 2011). Novell presented no evidence that any such memorandum was ever written, and Frankenberg testified that he knew of no evidence that Calkins, Mella, Moon, or Rietveld were presented with a decision about how to respond to Gates's decision to withdraw support for the namespace extension APIs. (*Id.* at 1181-82). [11] Instead, Novell assigned responsibility for supervising the writing of code for a custom file open dialog for WordPerfect and Quattro Pro to Gibb, a middle manager, who, in turn, assigned the responsibility for writing the code to Harral and Richardson.

Microsoft sought commitments from several of the most important ISVs to ship their Window 95—compatible applications within 90 days of the release of Windows 95. (*See* Pl.'s Ex. 148). Frederick Warren-Boulton, Novell's economic expert, testified that if Novell's product was shipped according to that timeframe, the application would have been **[*22]** "in pretty good shape," and that his damage calculations are based on the assumption that Novell could have released their product according to the agreement, but for the alleged anticompetitive conduct. (Warren-Boulton, Trial Tr. at 2417-24, Nov. 17, 2011).

According to Novell, because it took one year for Novell to write its customized file open dialog, Novell was unable to meet that timetable. (Novell Mem. Opp'n Rule 50 Mot. ("Novell Opp'n") at 69, ECF No. 501). Microsoft strongly disputes this assertion. It argues Quattro Pro—the spreadsheet component of PerfectOffice—was not ready to be released to manufacturing until well into 1996, and that this explains the delay in Novell's marketing of PerfectOffice. (*See* Microsoft Mem. Supp. Rule 50 Mot. ("Microsoft Mem.") at 48, ECF No. 494). An internal Novell memorandum indicated that although in late 1994 Novell had been considering a September 30, 1995, release date for PerfectOffice for Windows 95, the Quattro Pro team then "believe[d] this [was] barely achievable with all their resources and with no additional functionality." (Def.'s Ex. 211). On March 1, 1995, Bruce Brereton, Novell's Vice President of the Business Applications Unit, **[*23]** wrote in an email that because Quattro Pro believed that "December 30 is a more realistic date," Novell had decided to "move . . . the Storm [PerfectOffice for Windows 95] RTM [release to manufacturer] date back by one month (to December 30) and have put WP on the same time-line as Storm." (Def.'s Ex. 221).

In light of Brereton's email, Frankenberg testified that as of March 1, 1995 the plan became to get PerfectOffice out, i.e., released to manufacturing, on December 30, 1995. (Frankenberg, Trial Tr. at 1220-21, Nov. 8, 2011). In March 1995 a "markets requirement report" prepared by the applications group ranked "Quattro Pro delivering late" as the highest "overall risk" for the PerfectOffice development project. (Def.'s Ex. 223 at 41). David LeFevre, who was then an employee of Novell (he subsequently became an employee of Microsoft), testified that he attended daily

---

[11] Rietveld, Calkins, Moon, and Mella did not testify at trial.

meetings in 1995 with Gibb and others where the matters discussed included "all the different product challenges" of releasing PerfectOffice in a timely manner. (LeFevre, Trial Tr. at 4037, Dec. 2, 2011). According to LeFevre, "the product that was causing the biggest problem was Quattro Pro." (*Id.* at 4045-47).

Karl Ford, **[*24]** then the lead developer for the user interface in WordPerfect for Windows 95, also attended regularly scheduled meetings in 1995, and he learned that "the schedule" was at risk because of Quattro Pro. (Ford, Trial Tr. at 3691-92, 3699-3700, Nov. 30, 2011). The problem of having Quattro Pro ready to be released to manufacturing became even more severe toward the end of 1995, when many developers left Quattro Pro for other employment in Silicon Valley, the area where Scotts Valley—home of Quattro Pro—was located. (*See* Def.'s Ex. 230). On December 23, 1995, four months after the release of Windows 95, Brereton wrote an email to Frankenberg and others reporting that "this past Thursday/Friday about 15 additional people [at Quattro Pro] submitted their resignations," leaving the Quattro Pro development team in Scotts Valley, California with "just 2 people." (*Id.*). In January 1996, Nolan Larsen, an executive of Novell, traveled to Scotts Valley and found that it "was kind of a train wreck" and that "[t]hose people who had not resigned were kind of walking around a little bit shell shocked. So it was — it was very chaotic." (Larsen, Trial Tr. at 3620, Nov. 30, 2011). Larsen and LeFevre testified **[*25]** that Quattro Pro was not ready to be shipped by March 1996. (*Id.* at 3624-25; LeFevre, Trial Tr. at 4062-63, Dec. 2, 2011).

Gibb, however, testified that Quattro Pro was not "critical path" because the delay in the development of shared code on which Harral and Richardson were working was the only issue holding up the release. (Gibb, Trial Tr. at 804-07, Oct. 26, 2011). Ultimately, Quattro Pro and PerfectOffice were not released until May 1996, after the sale to Corel Corporation in March 1996. As described in section III, *infra*, according to Novell, this delay prevented WordPerfect and PerfectOffice from obtaining a sizeable share of the Windows 95-compatible word processing and suite markets. This, in turn, Novell argues, prevented Novell products from becoming successful "middleware," which could have been an effective competitor with Windows 95 in the operating systems market.

On November 8, 2004, Novell and Microsoft entered into a settlement agreement under which any claims not pled in Novell's draft complaint in this action, filed Nov. 12, 2004, were released. (*See* Settlement Agreement, Holley Decl. Supp. Microsoft Mem., Ex. A, ECF No. 497). The complaint in this action asserted **[*26]** claims for damages suffered by Novell's "lost sales of office productivity applications and a diminution in value of Novell's assets, reputation and goodwill in amounts to be proven at trial." (Compl. ¶ 155). The complaint further alleged, in the prayer for relief, that Microsoft maintained its monopoly in three specific markets, the operating systems market, the word processing applications market, and the spreadsheet applications market. (*Id.* at 67).

II.

A Rule 50 motion "test[s] whether there is a legally sufficient evidentiary basis for a reasonable jury to find for the moving party." *Keylon v. City of Albuquerque, 535 F.3d 1210, 1215 (10th Cir. 2008)*. Judgment as a matter of law is appropriate "only if the evidence points but one way and is susceptible to no reasonable inferences which may support the opposing party's position." *Tyler v. RE/MAX Mountain States, Inc., 232 F.3d 808, 812 (10th Cir. 2008)* (citing *Finley v. United States, 82 F.3d 966, 968 (10th Cir. 1996))*; *see* *Miller v. Auto. Club of N.M., Inc., 420 F.3d 1098, 1131 (10th Cir. 2005)* ("Judgment as a matter of law is only appropriate when 'a party has been fully heard on an issue and there is no legally sufficient evidentiary **[*27]** basis for a reasonable jury to find for that party on that issue.'") (quoting *Fed. R. Civ. P. 50(a)(1)*). All reasonable inferences are drawn in favor of the non-moving party, and the court does not "weigh the evidence, pass on the credibility of witnesses, or substitute [its] conclusions for that of the jury." *Miller v. Eby Realty Grp., LLC, 396 F.3d 1105, 1110 (10th Cir. 2005)*. The decisive question is whether "the plaintiff has arguably proven a legally sufficient claim." *Dillon v. Mountain Coal Co., 569 F.3d 1215, 1219 (10th Cir. 2009)*.

III.

Novell's theory may be briefly stated. According to Novell, Microsoft violated *§ 2* of the Sherman Act when it decided in October 1994 to withdraw support for the namespace extension APIs, a decision that Novell asserts led to Microsoft's maintenance of its monopoly in the *operating systems* market. [12] This decision was made personally by Gates, who was motivated by a desire to provide time for Microsoft to catch up with Novell and Lotus in development of its office productivity applications, Word, Excel, and Office. (*See* Pl.'s Ex. 1). As a result of Microsoft's decision, Novell could no longer use the namespace extension APIs and lost valuable **[*28]** time in developing WordPerfect, Quattro Pro, and PerfectOffice. (*See* Rule 50 Hr'g Tr. at 172-74, ECF No. 507). Novell was not able to put those applications on the market until May 1996. (*See* Warren-Boulton, Trial Tr. at 2090, Nov. 16, 2011). This had the effect of preventing WordPerfect and PerfectOffice from becoming effective competitors with Word and Office in the applications market. Moreover, in the longer run, by preventing Novell's applications from being widely used with Windows 95, the decision to withdraw support for the namespace extension APIs prevented WordPerfect and PerfectOffice (and two other Novell programs, AppWare and OpenDoc) from being accepted in the market as middleware. (*See* Rule 50 Hr'g Tr. at 119-27). If Novell's products had been accepted in the market as middleware, ISVs would have begun to write programs using APIs exposed by the Novell applications, thereby reducing the barrier to entry into the PC operating systems market and threatening Microsoft's monopoly in that market. (*Id.* at 194-96).

Microsoft argues that this theory is unique and unprecedented because it is based upon conduct that occurred in one market, the software *applications* market, to assert a Sherman Act § 2 claim in an entirely different market, the *operating systems* market. (*See id.* at 6). That alone, according to Microsoft, is fatal to Novell's claim. (*Id.*). Novell counters that although Microsoft, through Gates, was motivated by a desire to disadvantage Novell's applications in favor of Microsoft's own applications, its conduct was intentional, and a jury could appropriately find that its conduct had anticompetitive effects in the operating systems market. (*Id.* at 165-68). According to Novell, that is sufficient to establish a *§ 2* violation.

I need not decide this issue because, even assuming Novell's argument is correct, its claim nevertheless fails for three separate and independent reasons: (1) Microsoft's conduct was not anticompetitive within the meaning of the Sherman Act; (2) Novell did not present sufficient evidence from which a jury could find that its products would have been successfully developed as middleware; and (3) there is **[*30]** no underlying business reality to the claims. Each of these reasons is examined in section V. Before discussing those issues, however, I will first address two arguments made by Microsoft that I believe lack merit.

IV. [13]

A.

Microsoft argues it has articulated legitimate business reasons for the decision Gates made on October 3, 1994, to withdraw support for the namespace extension APIs and that the fact-finder is not to weigh the factors that led to a particular decision in assessing whether that decision was a violation of antitrust laws. (*See* Microsoft Mem. at 110 (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 597, 605, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; *Multistate Legal Studies v. Harcourt Brace Jovanovich Legal & Prof'l Publ'ns, 63 F.3d 1540, 1550 (10th Cir. 1995)))*. The fallacy in that contention is that in this case, the jury was not asked to weigh the factors that Microsoft articulated in support of the October 3, 1994 decision, but rather to decide whether **[*31]** those articulated reasons were pretextual in light of Gates's email suggesting the decision was made to give Microsoft application developers time to catch up with Microsoft's major competitors, Novell and Lotus. Fact-finders are frequently called upon to answer this question of pretext, particularly in the field of employment discrimination law. *See, e.g., Reeves v. Sanderson Plumbing Prods., 530 U.S. 133, 153-54, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000)* (holding that a plaintiff "introduced enough evidence for a jury to reject [the defendant's explanation]" as pretextual); *Townsend v. Lumbermens Mut. Cas. Co., 294 F.3d 1232, 1243-44 (10th Cir. 2002)* (holding that a jury "could reasonably have

---

[12] To repeat, Novell's theory is not that the October 3, 1994 decision had an anticompetitive effect in the *applications* market in violation of *§ 2*. Any claim based **[*29]** upon that theory is, as stated above, barred by limitations.

[13] Microsoft also makes several arguments to the effect that Novell did not present sufficient evidence of damages. These arguments are, however, in large part merely different iterations of other contentions I address in section V.

found" a defendant employer's stated reasons for demoting an employee "were pretextual, potentially entitling him to a finding of discrimination").

Here, although I am granting Microsoft's Rule 50 motion for the reasons stated in section V, I believe the text of Gates's email provides sufficient evidence upon which a jury could find that the reasons for the October 3, 1994 decision to withdraw support for the namespace extensions were pretextual. Therefore, if the only question raised by the Rule 50 motion were whether the jury **[*32]** was asked to weigh the factors that led Microsoft to make the October 3, 1994 decision, I would deny the Rule 50 motion.

B.

As stated in section I, *supra*, on November 8, 2004, Microsoft and Novell entered into a settlement agreement pursuant to which Novell released any and all claims it had against Microsoft with the exception of claims asserted in a draft complaint that became the complaint in this action. In Count I of the complaint (the only count remaining in the case), Novell alleged that as a result of Microsoft's alleged misconduct, it "was damaged by, without limitation, lost sales of office productivity applications and a diminution in the value of Novell's assets, reputation, and goodwill in amounts to be proven at trial." (Compl. ¶ 155). The term "office productivity applications" is defined earlier in the complaint as "word processing and spreadsheet applications." (*Id.* ¶ 24).

Microsoft argues that because the only Novell applications allegedly damaged by Microsoft's alleged misconduct were the word processing application, WordPerfect, and spreadsheet application, Quattro Pro, Novell released Microsoft from any claim that it had for damages to Novell's office productivity **[*33]** suite, PerfectOffice. (*See* Microsoft Mem. at 126-27). Microsoft also points out that the complaint does not refer in any way to the suite market. (*See id*. at 128-30).

In entering into the release—which certainly was a significant business transaction— Microsoft had the right to rely upon the language of the release and the language of the draft complaint referred to in the release. Those documents made no reference whatsoever to PerfectOffice. Moreover, in deciding to enter into the settlement agreement, Microsoft may have considered the omission of any reference to PerfectOffice to be significant because, as the evidence at trial established, by 1994 it was clear that the office suite market stood separate and apart from the word processing and spreadsheet applications markets. (*See* Gibb, Trial Tr. at 823, Oct. 26, 2011; Frankenberg, Trial Tr. at 1080, Nov. 7, 2011). As Frankenberg's testimony highlighted during the trial, Novell as well as Microsoft understood the importance of the suite market in 1994. Frankenberg testified that in 1994 approximately three-quarters of the suite market was open, and Novell was planning to make substantial inroads into it. (*See* Frankenberg, Trial Tr. **[*34]** at 1008-09, 1063, Nov. 7, 2011; Pl.'s Ex. 412 at 2).

Nevertheless, Microsoft's argument fails. The complaint referred not only to damages resulting from lost sales of office productivity applications but also damages resulting from "a diminution in the value of Novell's assets, reputation, and goodwill in amounts to be proven at trial." (Compl. ¶ 155). Novell's damages expert, Frederick Warren-Boulton, did not calculate damages on a product-by-product basis but instead on the basis of the decrease in the sales price paid to Novell by Corel, allegedly caused by Microsoft's withdrawal of support for the namespace extension APIs. (*See* Warren-Boulton, Trial Tr. at 2094-98, Nov. 16, 2011). This decrease in sales price falls well within the "diminution in value" category of damages referred to in the complaint and thus was not released by the agreement entered into November 8, 1994.

V. [14]

I will now discuss the three reasons Microsoft's Rule 50 motion should be granted.

A.

---

[14] Some of the facts stated in section I are repeated in sections IV and V in connection with the portions of the legal analysis to which they pertain.

A monopolist is free "to exercise [its] own independent discretion as to **[*35]** parties with whom [it] will deal." Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004); *see* United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919). It is well established that a monopolist generally has no duty to cooperate with its competitors. *See, e.g.,* Trinko, 540 U.S. at 408; Aspen Skiing, 472 U.S. at 600; Image Technical Servs., Inc., v. Eastman Kodak Co., 125 F.3d 1195, 1209 (9th Cir. 1997). In accordance with this principle, Novell's counsel properly conceded during the hearing on Microsoft's Rule 50 motion that it would not have been unlawful for Microsoft to keep the namespace extension APIs to itself and never disclose them to ISVs. (Rule 50 Hr'g Tr. at 191-92). Novell argues, however, that Microsoft's conduct was anticompetitive within the meaning of § 2 of the Sherman Act because when it decided to withdraw support for the namespace extension APIs in October 1994, it intentionally made a decision that had an adverse effect upon competition in the operating systems market. (*See id.* at 165-68).

The distinction Novell seeks to draw is unpersuasive. A decision not to publish the namespace extension APIs in the first place is as "intentional" **[*36]** as a decision to withdraw support for the namespace extension APIs after they have been published. Therefore, the principle that a monopolist generally has no duty to cooperate with a competitor governs unless the act of withdrawing support for the namespace extension APIs was itself anticompetitive. [15]

The decision to withdraw support for the namespace extension APIs therefore did not constitute a violation of § 2 of the Sherman Act unless it was made deceptively for an anticompetitive purpose or unless, by making it, Microsoft terminated a previously existing profitable relationship. [16] *See, e.g.,* Aspen Skiing, 472 U.S. at 599-604; Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1224-25 (10th Cir. 2009); Christy Sports, LLC v. Deer Valley Resort Co., 555 F.3d 1188, 1197 (10th Cir. 2009).

Any deception claim necessarily is based upon the premise that Microsoft withdrew support for the namespace extension APIs because it knew that Novell was using those APIs in the development of its applications and that, by withdrawing support for those APIs, Microsoft knew that Novell would fall behind schedule. There is no evidence to support this premise. [17] First, as just stated, because of the undisputed industry practice, Microsoft had no reason

---

[15] Prior to the hearing on the Rule 50 motion, Novell contended that the act of withdrawing support for the namespace extension APIs was itself an unlawful act because beta versions of a release cannot be modified except to fix bugs discovered during the course of the beta process. However, as I noted in section I, *supra*, Novell did not press this contention at the Rule 50 hearing, and it is unsupported by the evidence.

[16] Microsoft **[*37]** argues that while deception may give rise to a common law tort, it cannot, as a matter of law, form the basis for a Sherman Act claim. Although deception usually sounds in tort, *see* Restatement (Second) of Torts § 526 (1977) (defining fraudulent misrepresentation/deceit), I see no reason it could not also give rise to an antitrust claim if the purpose of the deception is to mislead a competitor into taking action (or not taking action) that would substantially change the competitive environment. Microsoft distinguishes cases in which deceptive conduct has given rise to antitrust liability on the grounds that such cases typically involve deception of third parties, not competitors. *See* Am. Prof'l Testing Serv., Inc. v. Harcourt Brace Jovanovich Legal & Prof'l Publ'n, Inc., 108 F.3d 1147, 1151 (9th Cir. 1997); Int'l Travel Arrangers, Inc. v. W. Airlines, 623 F.2d 1255, 1260-63 (8th Cir. 1980). Those cases, however, do not turn on the identity of the party deceived but on whether the challenged conduct in fact harmed competition. *See* Rambus, Inc., v. Fed. Trade Comm'n, 522 F.3d 456, 464, 380 U.S. App. D.C. 431 (D.C. Cir. 2008) ("Deceptive conduct—like any other kind—must have an anticompetitive effect in order **[*38]** to form the basis of a monopolization claim. . . . Cases that recognize deception as exclusionary hinge, therefore, on whether the conduct impaired rivals in a manner tending to bring about or protect a defendant's monopoly power.").

[17] What the evidence, specifically Gates's email announcing the decision to withdraw support for the namespace extension APIs, does suggest is that Microsoft was attempting to buy time for its own office productivity application developers to catch up, so that eventually Microsoft could use the enhanced technology created by Windows 95 as effectively (and potentially, by integration of the applications and the operating system, more effectively) as its major competitors, including Novell. That, however, is quite different from imputing to Microsoft knowledge that Novell needed the namespace extension APIs to develop its own applications. Of course, in fact, as the evidence **[*40]** established, Novell could have used Microsoft's common file open dialog, which remained available to it after support for the namespace extension APIs was withdrawn, to develop its applications.

to believe that Novell was relying upon the documentation for the namespace extension APIs contained in the beta version Microsoft released to ISVs. (*See* Def.'s Ex. 17 at MX 6109491). Second, the evidence establishes that shortly before the decision to withdraw the namespace extension APIs was made, Brad Struss of Microsoft was advised that Novell was not yet using the namespace extension APIs, (*id.*), and that after the decision, he contacted Novell and was notified that "WP . . . appear[s] to **[*39]** be OK with this." (Def.'s Ex. 3 at MX 6055840). Likewise, Struss testified at trial that he told others at Microsoft "what [he] knew to be true or what had been communicated to [him] from WordPerfect, which is that they were not using it and they were not dependent upon it." (Struss, Trial Tr. at 3270, Nov. 28, 2011). Novell did not rebut this evidence in any way, and there is no evidence that Novell made any contemporaneous complaint to anyone at Microsoft about withdrawal of support for the namespace extension APIs.

The claim that Microsoft purposely destroyed a preexisting profitable business relationship is equally flawed. Preliminarily, it should be noted that *Aspen Skiing*, upon which Novell bases its argument, has been characterized by the Supreme Court as being "at or near the outer boundary of § 2 liability." *Trinko, 540 U.S. at 409*. The facts in *Aspen Skiing* were unusual, involving a defendant's exploitation of a situation largely bestowed upon it by Mother Nature. The defendant owned three mountains in a ski resort area and engaged in sharp business practices to prevent the owner of the fourth mountain from competing effectively for skiing business. *See Aspen Skiing, 472 U.S. at 589-95*. In contrast, what Novell is asserting here is that Microsoft could not withdraw from Novell a product that was the result of Microsoft's own ingenuity **[*41]** and that Novell believed would give it optimal advantage in its competition with Microsoft in the applications market.

There is no evidence that Microsoft withdrew support for the namespace extension APIs for the purpose of terminating its relationship with Novell. The final version of Windows 95 made available to all ISVs, including Novell, contained Microsoft's common file open dialog, and Novell never advised Microsoft that this dialog was insufficient for its own purposes. (*See* Harral, Trial Tr. at 502, Oct. 24, 2011; Gibb, Trial Tr. at 847-49, Oct. 26, 2011; Alepin, Trial Tr. at 1604, Nov. 10, 2011). Moreover, after it withdrew support for the namespace extension APIs, Microsoft continued to provide assistance to Novell and never terminated their relationship. (Struss, Trial Tr. at 3253-54, 3259-69, Nov. 28, 2011; Def.'s Ex. 2 at MX 6062581; *see* Frankenberg, Trial Tr. at 1131, Nov. 7 , 2011 (stating that he is "sure" people in the operating system group at Microsoft were trying to help WordPerfect/Novell produce a great application for Windows 95)).

For these reasons, Novell has not created a jury question on the issue of whether Microsoft's conduct was anticompetitive.

B.

The evidence **[*42]** is undisputed that during 1995 Novell's focus was on writing office productivity programs that would run on Windows 95. In Novell's view, Microsoft's new operating system was a "significant step forward" and a "wonderful evolution" in technology. (Harral, Trial Tr. at 253-54, 256-57, Oct. 20, 2011; Frankenberg, Trial Tr. at 1225-26, Nov. 8, 2011; *see* Gibb, Trial Tr. at 788, Oct. 26, 2011; Noll, Trial Tr. at 1911, Nov. 15, 2011). Therefore, as Frankenberg acknowledged, in the short term Microsoft's share of the operating systems market would have increased, not decreased, if it had not withdrawn support for the namespace extension APIs. (*See* Frankenberg, Trial Tr. at 1226-28, Nov. 8, 2011; Noll, Trial Tr. at 1949-50, Nov. 15, 2011). [18]

According to Novell, those programs simply would not be as good as they could have been if Microsoft had continued to make its own technology available to Novell.

[18] Novell argues that Microsoft's willingness to sacrifice the short-term profits it would have earned from increased sales of Windows 95 to customers who would buy the operating system if it ran Novell's applications constituted a classic hallmark of anticompetitive behavior because monopolists are assumed to be rational, and the sacrifice of short-term profits can be explained only by the desire to reap long-term gains by maintaining the monopoly. *See,* ***[*43]*** *e.g., Reazin v. Blue Cross & Blue Shield of Kan., Inc., 635 F. Supp. 1287, 1309 (D. Kan. 1986)*, *aff'd*, *899 F.2d 951 (10th Cir. 1990)*. The flaw in this argument is that there is no evidence that Microsoft sacrificed any short-term profits by withdrawing support for the namespace extension APIs. Novell's own theory is that support for the APIs were withdrawn to prevent a decline of sales of Microsoft's office productivity programs (Word, Excel, and Office) because Novell and Lotus would have been able to put products superior to

Therefore, Novell's theory necessarily is that the anticompetitive effects it alleges did not occur until sometime after 1995. Novell has never specified exactly when those effects did occur. Novell sold WordPerfect to Corel in March 1996, and there is no evidence that by that time there was any operating system on the market comparable to Windows 95 to which Novell planned to write its applications or for which those applications could have been written. That fact, however, may not be dispositive because Novell's damages claim is based upon the alleged diminution in the value of its assets caused by Microsoft's conduct. Presumably, Corel would have paid more for what it bought if by that time Microsoft had not, as Novell **[*45]** alleges, effectively destroyed Novell's applications and prevented them from being cross-platformed to other operating systems then under development. Therefore, I will assume, as Novell implicitly argues, that within a reasonable period of time after Windows 95 was put on the market (say two or three years), another operating system would have come into existence to which Novell's office productivity products could have been written. [19]

In asserting that it could and would have written to an operating system other than Windows 95 within a reasonable period of time after 1995, Novell relies upon two theories: the "franchise theory" and the "middleware theory."

(1)

In advancing the franchise theory, Novell posits that its applications were so popular that if Microsoft had not withdrawn support for the namespace extension APIs, Novell's applications would have flourished in the market, regardless of the operating system on which they ran. There is no evidence **[*47]** to support this theory. In fact, it is contradicted by the record.

First, Novell recognized that Windows 95 was a superior operating system, constituting a "significant step forward." (Frankenberg, Trial Tr. at 1225-26, Nov. 8. 2011). In light of that fact, there is no basis for inferring that office productivity applications Novell developed that did not draw upon the superior functionality of Windows 95 would have been as successful as the applications that ran on Windows 95.

Second, historical data disprove Novell's claim. WordPerfect was extremely popular in the 1980s and early 1990s when it ran on many non-Microsoft operating systems. (Peterson, Trial Tr. at 4667, Dec. 7, 2011; *see* Middleton, Trial Tr. at 4178 (Dec. 13, 2008 Video Dep.), Dec. 5, 2011). However, this popularity did not diminish Microsoft's share of the PC operating systems market, which was approximately 90% during that period. (Noll, Trial Tr. at

---

them on the market if support for the namespace extension APIs had not been withdrawn. Thus, assuming that Microsoft's revenues from the sale of Windows 95 might have slightly declined because a limited number of purchasers would not buy Windows 95 unless there were Novell applications made for Windows 95, there is no basis for inferring that the decline of revenues would not have been more than offset by an increase of revenues in the sales of Word, Excel, and Office.

I recognize that this conclusion may appear somewhat disturbing because arguably it rewards Microsoft for unsavory behavior in the applications market. Nevertheless, the reasoning is sound. Although **[*44]** the proposition upon which Novell relies makes eminent sense as a matter of theory, it is based upon a factual inference about how a rational actor would behave, and here the evidence does not support the inference. Moreover, Novell has only itself to blame for the quandary in which it finds itself because it was its own delay in filing this action that resulted in its claims in the applications market being barred by limitations. *See* Novell, 2005 U.S. Dist. LEXIS 11520, 2005 WL 1398643, at *5.

[19] Although I accept this assumption, it is problematic. While the evidence is undisputed that historically WordPerfect had been cross-platformed to various operating systems, (*see* Harral, Trial Tr. at 216, Oct. 20, 2011; Gibb, Trial Tr. at 776-77, 781, Oct. 26, 2011; Frankenberg, Trial Tr. at 994-97, Nov. 7, 2011), this is not an instance in which it can reasonably be said that the past is a prologue of the future, particularly in light of the technological breakthrough that Novell acknowledges Windows 95 achieved. Likewise, although Harral and Gibb testified that looking into the future Novell intended to make the PerfectOffice suite cross-platform after the initial release of PerfectOffice for Windows 95, (Harral, Trial Tr. at 371, Oct. 24, 2011; **[*46]** Gibb, Trial Tr. at 787, Oct. 26, 2011), mere intent and aspiration do not provide sufficient evidence that, in fact, Novell's applications would have been cross-platform. Moreover, although one of Novell's experts testified that Linux "became a full-fledged, commercial product" in 1996, (Noll, Trial Tr. at 1961, Nov. 15, 2011), the version of WordPerfect for Linux that Corel released in the spring of 1996 was an older version of WordPerfect that did not contain the same shared code as the version of WordPerfect developed for Windows 95. (Murphy, Trial Tr. at 4914-16, Dec. 8, 2011). As such, it was inferior to the WordPerfect application that ran on Windows 95. (*Id.*).

1329-30, Nov. 15. 2011; Murphy, Trial Tr. at 4722-23, Dec. 7, 2011; Finding of Fact ¶ 35). On this record, it cannot reasonably be inferred that if in the years after 1995 Novell's applications ran on operating systems other than Windows, that fact would have challenged **[*48]** Microsoft's monopoly in the PC operating systems market.

(2)

Novell's second argument is its middleware theory. For a middleware product to have an impact on competition in the PC operating systems market, the product (1) must be cross-platformed to various operating systems; (2) must be ubiquitous on the "dominant operating system"; and (3) must expose a sufficient number of APIs of its own to entice ISVs to write applications to it rather than to the operating system on which it sits. (*See* Noll, Trial Tr. at 1923-26, Nov. 15, 2011; Finding of Fact ¶ 28). Novell's office productivity applications did not meet any of these requirements.

As to the first requirement, assuming that within a reasonable period of time after 1995 effective operating systems would have come into existence to which Novell's office productivity applications could have been written, there is no basis for inferring that Novell's office productivity applications written for Windows 95 via the namespace extension APIs could have been effectively ported to those systems. This is so because the namespace extension APIs were, as Novell's own technical expert testified, "platform specific" to Windows. (Alepin, Trial Tr. **[*49]** at 1482-83, 1532-33, Nov. 9-10, 2011; *see* Murphy, Trial Tr. at 4783-84, Dec. 7, 2011; Bennett, Trial Tr. at 5023, Dec. 12, 2011 (stating that "namespace extension APIs . . . [were] a unique component of Windows 95")).

As to the second requirement, although the parties agree that the dominant operating system was Windows 95, they disagree as to the meaning of ubiquity. Microsoft contends it means that Novell's software had to run on "all or nearly all PCs running the 'dominant operating system.'" (Microsoft Mem. at 73-75; Microsoft Reply Supp. Rule 50 Mot. at 37-39, ECF No. 503). Novell argues that "something less than that" might be sufficient "by weakening, though not eliminating, the applications barrier to entry." (Novell Opp'n at 90 (quoting Noll, Trial Tr. at 1926, Nov. 15, 2011)). Novell provided no evidence as to what this lesser threshold might be.

In any event, under either definition of ubiquity, the evidence is clear that Novell's office productivity applications would never have been ubiquitous on Windows 95. In 1995, prior to the release of Windows 95, WordPerfect had roughly a 15% share of the Windows-compatible word processing market, and PerfectOffice had less than a **[*50]** 5% share of the Windows-compatible suite market. [20] (*See* Holley Decl. Supp. Microsoft Mem., Exs. G & K, ECF Nos. 495-7, 495-11). WordPerfect's share of the word processing market at the end of 1994 was substantially greater—approximately 36%—if one includes the installed base of PCs using the DOS platform. (*See* Pl.'s Ex. 599A at tbl. 13). However, 36% is only 36%, and it is entirely speculative to assume, as Novell apparently does, that its applications would have increased to a substantially greater number of computers using Windows if Microsoft had not withdrawn support for the namespace extension APIs. [21] This assumption is made even more speculative

---

[20] According to Microsoft expert Kevin Murphy, these market share numbers must be further reduced by approximately 50% because office suites or any of their component applications were installed on only one-half of all PCs. (Murphy, Trial Tr. at 4750, Dec. 7, 2011).

[21] Novell's reliance upon the DOS installed **[*51]** base also raises a significant question as to whether Novell assigned the claims asserted in this action to Caldera, Inc. when it sold its DOS business to Caldera. In the Asset Purchase Agreement it made with Caldera, Novell transferred "all of Novell's right, title, and interest in and to any and all claims or causes of action held by Novell at the Closing Date and associated directly or indirectly with any of the DOS Products or Related Technology." (*See* Asset Purchase Agreement, Holley Decl. Supp. Microsoft Mem., Ex. P, at 4-5, ECF No. 495-16). I previously ruled that this assignment encompassed the operating systems monopoly claim asserted in this action because the claim asserted here arose in the operating systems market in which DOS had competed. *See In re Microsoft Corp. Antitrust Litig., 699 F. Supp. 2d 730, 739 (D. Md. 2010)*. The Fourth Circuit reversed my ruling. *See Novell, Inc. v. Microsoft Corp.*, 419 Fed. Ap'x. 254, 261 (4th Cir. 2011). I remain bound by that decision. If the Tenth Circuit finds resolution of the issue to be necessary to its decision on Microsoft's Rule 50 motion, however, it may conclude that the law of the case doctrine does not apply and that it may **[*52]** revisit the Fourth Circuit's ruling because the evidence presented at trial is more extensive than was the evidence in the summary judgment record upon which the Fourth Circuit relied. Specifically, the Tenth Circuit might decide that because, as the record now reflects, Novell's claim depends in large part upon the conversion of its share of the DOS installed base into a

by the fact that an internal Novell memorandum dated April 14, 1995, stated that "only 30% of th[e] WordPerfect for DOS installed base is remaining with WordPerfect as they transition to a Windows word processor." (Def.'s Ex. 224 at 20).

The parties also disagree about the meaning of the third requirement. Microsoft argues that to constitute middleware, an application must "expose a sufficiently broad set of APIs to enable ISVs profitably to develop *full-featured* personal productivity applications that rely solely upon those APIs exposed by the middleware." (Microsoft Mem. at 70 (emphasis added)). Novell, on the other hand, relying upon the testimony of Roger Noll, its antitrust expert, and Ronald Alepin, its technical expert, contends that the third element is satisfied if the application "expose[s] a wide range of APIs and sophisticated functionality to developers." (Novell **[*53]** Opp'n at 28). Novell concedes that if Microsoft's interpretation of the meaning of the third element is correct, Microsoft is entitled to judgment as a matter of law because Novell did not present evidence to show that its software exposed sufficient APIs of its own to allow ISVs to write full-featured personal products applications to it. (Trial Tr. at 5436-37, 5439, Dec. 15, 2011). Thus, on this issue, whether Microsoft is entitled to judgment in its favor on the Rule 50 motion turns on the meaning of the third requirement.

Microsoft's position is based upon the Findings of Fact made in the government case, upon which Novell's claim is founded. Judge Jackson found that "[c]urrently, no middleware product exposes enough APIs to allow independent software vendors ("ISVs") profitably to write full-featured personal productivity applications that rely solely on . . . APIs [of the middleware product itself]." Finding of Fact ¶ 28. In contrast, Novell argues the exposure of APIs that would result in "something less" than the writing of full-featured personal product applications is sufficient to constitute a threat to Microsoft's monopoly. (Novell Opp'n at 89-90). This argument is based **[*54]** on the concept, expressed by Noll, that diminishing, as opposed to nearly eliminating, the barrier to entry that protected Microsoft's monopoly in the PC operating systems market was itself sufficient. (Noll, Trial Tr. at 1926, Nov. 15, 2011). To the extent this testimony is based on the premise that other companies would produce similar middleware that, in combination with Novell's products, would diminish the barrier to entry, there is no evidence such other products existed.

Although in other circumstances conduct directed at reducing a barrier to entry might constitute a violation of *§ 2* of the Sherman Act, under the facts of this case, I find Novell's reasoning to be unpersuasive. The findings made in the government case made clear that Microsoft possessed its monopoly by virtue of what Judge Jackson described as a "chicken-and-egg" problem. As Judge Jackson described:

> The overwhelming majority of consumers will only use a PC operating system for which there already exists a large and varied set of high-quality, full-featured applications, and for which it seems relatively certain that new types of applications and new versions of existing applications will continue to be marketed **[*55]** at pace with those written for other operating systems. Unfortunately for firms whose products do not fit that bill, the porting of applications from one operating system to another is a costly process. Consequently, software developers generally write applications first, and often exclusively, for the operating system that is already used by a dominant share of all PC users. Users do not want to invest in an operating system until it is clear that the system will support generations of applications that will meet their needs, and developers do not want to invest in writing or quickly porting applications for an operating system until it is clear that there will be a sizeable and stable market for it.

Finding of Fact ¶ 30. Other findings made by Judge Jackson are to the same effect. *See* Findings of Fact ¶¶ 36, 37, 39, 40. [22]

---

significant share of the Windows market, that claim is "associated directly or indirectly with . . . the DOS Product or Related Technology" and thus was transferred to Caldera.

[22] The barrier to entry issue was eloquently described, from a business point of view, in an email sent on August 17, 1997, by Jeff Raikes, then a Microsoft executive, to Warren Buffett. (Pl.'s Ex. 360 at MS-PCA 1301176). In the email, Raikes wrote of the importance of "widen[ing] the moat," i.e. increasing the barrier to entry, by tying together Microsoft's applications **[*56]** and

In light of these findings, it cannot be reasoned, as Novell argues, that Microsoft's operating systems monopoly would have been threatened by a middleware product that exposed only a limited number of APIs that permitted ISVs to write only a specialized set of applications to it. The barrier to entry that Judge Jackson found in the government case was created by a "chicken-and-egg" problem, and that problem arose because ISVs would write only to programs that supported full-featured personal productivity applications. *See* Finding of Fact ¶ 30. In other words, contrary to what Novell argues in support of what Microsoft has aptly described as its "watered-down version" of the third requirement, Microsoft's monopoly in the PC operating systems market was threatened not by a product that exposed only a limited number of its own APIs but only by a product that exposed sufficient APIs to entice full-featured applications to be written to it. (*See* Microsoft Mem. at 77-78). Otherwise stated, *diminishment* of the barrier to entry is not sufficient because mere diminishment would not have affected the PC operating **[*58]** systems market. In order to constitute a realistic threat to Microsoft's monopoly in that market, *elimination* (or, at least, near elimination) of the barrier to entry through development of full-featured applications using APIs from middleware that ran on operating systems other than Windows was required.

In sum, Novell did not present sufficient evidence from which a reasonable jury could find that its applications could have successfully developed into middleware that threatened Microsoft's monopoly in the operating systems market.

C.

Claims asserted under the Sherman Act, like any other claim asserted in a court, are not cognizable simply because they are theoretically coherent. They must also be based on fact. Here, the absence of any evidence suggesting that the withdrawal of support for Microsoft's namespace extension APIs was the source of any contemporaneous urgency at Novell reflects that the claim Novell asserts is a lawyers' construct and is not based on an underlying business reality. [23]

First, as stated in section I, *supra*, there is no evidence that anyone at Novell made any complaint to anyone at Microsoft who could have reversed the decision to withdraw support for the namespace extension APIs.

Windows. I admitted the email into evidence despite the fact that it was not written until after the events that gave rise to this action on the ground that the jury might find it reflected the views of Microsoft's executives during the relevant time period.

Novell referred to the email at trial and has likewise referred to it in opposing Microsoft's Rule 50 motion. In the event that the Tenth Circuit reverses my ruling that Microsoft's Rule 50 motion should be granted, it would be helpful in the retrial of this case if the Tenth Circuit were to decide whether the Raikes email was properly admitted. It would also be helpful, in the event of a reversal of my *Rule 50* ruling, if the Tenth Circuit resolved a disagreement between the parties as to the proper causation standard. Microsoft contends that the standard that should be applied is whether its decision to withdraw support for the namespace extension APIs "contributed significantly to its continued monopoly power." (Microsoft Mem. at 82). Conversely, Novell contends that the appropriate standard is whether Microsoft's decision was "reasonably capable of contributing significantly" to Microsoft's monopoly power. (Novell Opp'n at **[*57]** 94-95). In reaching my decision, I have not found it necessary to resolve this issue.

[23] This statement is not meant as an unfavorable observation about Novell's counsel. They have skillfully and energetically pursued a claim that I have concluded is not supported by the evidence. **[*59]** It is not, however, frivolous. Likewise, my statement is not intended to reflect badly upon Novell. The evidence presented at trial showed that Novell simply did not believe the deadline of bringing applications to market within 90 days of the release of Windows 95—a deadline that was dictated solely by marketing considerations—was material to the success of Novell's applications. The tradition and culture at WordPerfect had been to develop better products than WordPerfect's competitors, and to depend upon the high quality of those products to achieve market success. Therefore, it is not surprising that Gibb, Harral, and Richardson— who had been employed by WordPerfect prior to its sale to Novell—would have been primarily concerned about delivering the best software applications they could write, even if that entailed some delay. Unfortunately, economic realities, including cost-cutting measures Novell felt compelled to take, were collapsing the world to which they had been accustomed and were destroying Novell's ability to provide hand-tailored products and services to its customers. (Frankenberg, Trial Tr. at 1097-98, Nov. 7, 2011; Bushman, Trial Tr. at 3161-62, Nov. 28, 2011; Acheson, **[*60]** Trial Tr. at 3968, 3972, Dec. 2, 2011; LeFevre, Trial Tr. at 4024-26, Dec. 2, 2011; Def.'s Exs. 15-16).

Second, as also stated in section I, there is no evidence that any top-level executive was involved in the decision-making process concerning the writing of shared code for WordPerfect. Frankenberg testified that any action that could jeopardize the timely release of WordPerfect or Quattro Pro would generally have been referred to some or all of four senior executives. (Frankenberg, Trial Tr. at 1140-42, 1179-80, Nov. 7-8, 2011). Novell presented no evidence that any memorandum was written to those executives, and Frankenberg testified that he knew of no evidence whatsoever that any of the four executives were presented with a decision about how to respond to Gates's decision to withdraw support for the namespace extension APIs. (*Id.* at 1181-82, Nov. 8, 2011). Instead, Novell assigned responsibility for writing shared code for WordPerfect and Quattro Pro to a middle manager, **[*61]** Gibb, who, in turn, assigned the responsibility to only two programmers, Harral and Richardson. However valiant the efforts of Harral and Richardson, if being ready to release WordPerfect, Quattro Pro, and PerfectOffice within 90 days of Microsoft's release of Windows 95 was as critical as Novell now claims it to have been, Novell clearly would have implemented a different development plan.

Third, although Gibb testified that Quattro Pro was "code complete" in time for the release of Quattro Pro and PerfectOffice within 90 days of Microsoft's release of Windows 95, [24] because of the mass exodus of programmers at Novell's facility in Scotts Valley, California, Quattro Pro was not ready for release to manufacturing until 1996. (Gibb, Trial Tr. at 806-09, Oct. 26, 2011; Frankenberg, Trial Tr. at 1145, Nov. 7, 2011; Def.'s Ex. 230).

Fourth, if, as Novell now argues, the 90-day period after the release of Windows 95 was critical to the success of WordPerfect, Quattro Pro, and PerfectOffice, **[*62]** Novell could have released those products using Microsoft's common file open dialog. In fact, Ford and LeFevre testified that they urged Gibb to pursue that option. (Ford, Trial Tr. at 3710-11, Nov. 30, 2011; LeFevre, Trial Tr. at 4041-43, Dec. 2, 2011).

In short, no reasonable jury could find, on the basis of the evidence presented at trial, that Microsoft's withdrawal of support for the namespace extension APIs caused Novell's failure to develop its applications within 90 days of the release of Windows 95.

VI.

For these reasons, Microsoft's Rule 50 motion will be granted. A separate order to that effect is being entered herewith.

Date: July 16, 2012

/s/ J. Frederick Motz

United States District Judge

End of Document

---

[24] Gibb's testimony that Quattro Pro was code complete in time for Quattro Pro and PerfectOffice to be released on schedule is subject to serious question, in light of the facts stated in section I, *supra*.

Opinion by: Brian M. Cogan

Opinion

MEMORANDUM DECISION AND ORDER

COGAN, District Judge.

This case is presently before me on two outstanding motions filed by defendant China Pharmaceutical Group Ltd. ("CPG"). In the first motion, CPG challenges this Court's jurisdiction under *Rule 12(b)(2) of the Federal Rules of Civil Procedure*. In the second motion, CPG seeks summary judgment pursuant to *Rule 56 of the Federal Rules of Civil Procedure*. For the reasons stated below, both motions are denied.

BACKGROUND

The plaintiffs in this action accuse multiple Chinese companies of fixing the prices and limiting the supply of vitamin C exported to the United States from China. This action was originally commenced on January 26, 2005. Related actions were subsequently filed in other districts, and all of these cases were eventually coordinated by the Judicial Panel for Multidistrict Litigation and transferred to this Court for pretrial proceedings. Various cases were consolidated or voluntarily dismissed; only the four above-captioned actions remain.

In Animal Science Products, Inc., *et al*. v. Hebei Welcome Pharmaceutical Co. Ltd., *et al*., 05-CV-453 **[*10]** , the plaintiffs brought strictly federal claims and originally filed the complaint with this Court. In Audette v. Hebei Welcome Pharmaceutical Co. Ltd., *et al*., 06-CV-988, the plaintiffs brought strictly state-law claims under Massachusetts's consumer protection statute. The Audette plaintiffs filed their complaint in Massachusetts state court and the defendants removed the case to federal court in the District of Massachusetts. In Philion v. Hebei Welcome Pharmaceutical Co. Ltd., *et al*., 06-CV-987, the plaintiffs brought federal claims as well as state-law claims under California law. Philion was brought in California state court and removed to federal court in the Northern District of California. Finally, in Keane v. Hebei Welcome Pharmaceutical Co. Ltd., *et al*., 06-CV-988, the plaintiffs brought claims under federal law and various state laws. The Keane complaint was originally filed in this Court.

In all of these cases, the main defendants are four vitamin C manufactures: Jiangshan Pharmaceutical Co. Ltd.; Hebei Welcome Pharmaceutical Co. Ltd.; Northeast Pharmaceutical Co. Ltd.; and Weisheng Pharmaceutical **[*11]** Co. Ltd ("Weisheng"). Plaintiffs also name CPG as a defendant. CPG is a holding company organized under the laws of Hong Kong. Defendant Weisheng is a wholly-owned subsidiary of CPG. It is undisputed that Weisheng manufactures vitamin C and sells it to clients in the United States, including in New York, California, and Massachusetts. Sales contracts between Weisheng and various American buyers indicate that Weisheng sold over $100,000 worth of vitamin C products to a buyer located in the Eastern District of New York; more than $400,000 worth of vitamin C to buyers located in the Southern District of California; and more than $600,000 worth of vitamin C to a buyer located in the District of Massachusetts.

CPG's jurisdictional motion is based primarily on the declaration of Jin Yue, who sits on Weisheng's board of directors and has served as an Executive Director of CPG since 2001. Yue explains that CPG does not have any offices, employees, agents, products for sale, bank accounts, or property in the United States. According to Yue, CPG "has never been engaged in the production, sale, or marketing of vitamin C" and its sole business is to invest in other companies. According to Yue, **[*12]** CPG does not control "the business practices or the daily operations of Weisheng, including with respect to Weisheng's decisions related to production, pricing, marketing and sale of

Weisheng's vitamin C products." Yue also explains that CPG's financial books are separate from Weisheng and that the two companies have never held a joint board meeting or shareholder meeting.

Yue also states that CPG has had virtually no contacts with New York, Massachusetts, California, or the United States as a whole. According to Yue, two CPG employees have travelled briefly to Boston, New York, Los Angeles, and San Francisco, but these business meetings were unrelated to vitamin C marketing or sales.

Plaintiffs' version of the facts, however, paints an entirely different picture of CPG and its relationship to Weisheng. According to plaintiffs, CPG is chiefly in the business of manufacturing vitamin C and selling it to the United States and other countries, albeit through its subsidiaries such as Weisheng. Between 2001 and 2008, nine of Weisheng's eleven directors had also served on CPG's board at one time or another. As Weisheng's sole owner, CPG selects all of Weisheng's directors, none of whom are **[*13]** independent. Weisheng conducts very few board meetings: it held no board meetings in 2001, 2004, 2006, or 2007, and held only one board meeting in 2005.

In public statements, CPG presents itself as a major player in the global vitamin C economy and makes no distinction between CPG and its manufacturer subsidiaries. For example, CPG's press releases state that it "is principally engaged in the manufacture and sale of pharmaceutical products . . . [including] vitamin C," and that the United States is one of its "major markets." The press releases also state that CPG has "increased its market share" in the pharmaceutical industry. To this day, CPG's website advertises that CPG manufactures "drug products include vitamin C" and states that CPG is "one of the largest manufacturers in the world for all of its bulk drug products." CHINA PHARMACEUTICAL GROUP LIMITED, *http://www.cpg.hk/eng/about_cpeic_e.htm* (last visited July 11, 2012). The website also mentions CPG's "production facilities" and lists vitamin C as one of CPG's "major products."

CPG's "Annual Report" from 2003 announced that the company was "building a new production line of vitamin C with an annual capacity of 15,000 tonnes" **[*14]** and predicted that operation of the new production line would commence by the middle of 2003. "By then," according to the Annual Report, "[CPG] will become one of the few largest manufacturers of vitamin C in the world." A March, 2003, press release announced that, "to target sales in overseas high-end pharmaceutical market, the Group will put more effort in seeking US Food and Drug Administration accreditation for the production likes of both bulk and finished drug products."

Aside from these public statements, the facts also demonstrate that CPG has funded the expansion of Weisheng's vitamin C production capacities. At one point, according to Yue, CPG obtained a $500,000,000 loan partially for the purpose of investing in "vitamin C projects." Yue also conceded that CPG paid for a "10,000 ton [vitamin C] expansion project." This project was submitted to CPG's board for Weisheng to gain CPG's approval to use CPG's funds, and Yue testified at deposition that CPG's board discussed the "specific implementation plan" for this expansion project. Finally, in 2003, a "feasibility study report" for a 20,000 ton "vitamin C transformation project" was required to be submitted to CPG's board for **[*15]** approval and CPG's chairman announced, in a press release, CPG's "construction of a new Vitamin C production line."

The facts also suggest that CPG gives general financial support to Weisheng. CPG has taken out several large loans since 2001. According to one of CPG's press releases, at least one large loan was expressly for the purpose of allowing its subsidiaries to "meet their capital expenditure." In 2001, CPG pledged all of Weisheng's equity interest as collateral to secure a $150 million loan facility.

Weisheng's meeting minutes reveal that CPG made an additional trip to the United States that Yue did not mention in his declaration. According to a document entitled "Situation Report on How To Handle the Accounts Receivable Problems Left Over From History," a client in the United States (the "U.S. Pacific Company") owed Weisheng $70,000 for the receipt of partially defective vitamin C products. The document further states that the "leadership concerned at [CPG] repeatedly coordinated this matter, made a special trip to work in the United States, and transferred the whole remaining $70,000 in the US Pacific Company account back to Weisheng."

Although Yue's declaration states that **[*16]** CPG does not interfere with Weisheng's "hiring or compensation" of its employees, Yue admitted at deposition that the compensation of Weisheng's employees is tied to the overall performance of the group of companies owned by CPG, and CPG makes "suggestions" for Weisheng's total payroll. Furthermore, minutes from a 2003 Weisheng board meeting stated that Weisheng's profit distribution plan would be reviewed by CPG.

Plaintiffs argue that CPG subjected itself to jurisdiction in this Court by conspiring to fix the price and control the supply of vitamin C in the United States and by transacting vitamin C-related business in New York, Massachusetts, and California. In the alternative, plaintiffs argue that the activities of Weisheng — which indisputably sells vitamin C in the United States — may be imputed to CPG due to the close relationship between Weisheng and CPG.

DISCUSSION

I. Personal Jurisdiction

On a *Rule 12(b)(2)* motion to dismiss, the plaintiff bears the burden of establishing that the court has personal jurisdiction over the defendant. See *Grand River Enters. Six Nations, Ltd. v. Pryor, 425 F.3d 158, 165 (2d Cir. 2005)*. This burden varies in degree depending on the case's procedural **[*17]** posture. Where, as here, the parties have conducted jurisdictional discovery but an evidentiary hearing has not been held, the plaintiff must make a *prima facie* showing that jurisdiction is proper, and this showing "must include an averment of facts that, if credited by the ultimate trier of fact, would suffice to establish jurisdiction over the defendant." *Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 567 (2d Cir. 1996)* (internal quotation marks omitted). Accordingly, on a *Rule 12(b)(2)* motion, this Court construes "all pleadings and affidavits in the light most favorable to the plaintiff" and resolves "all doubts in the plaintiff's favor." *Penguin Group (USA) Inc. v. American Buddha, 609 F.3d 30, 34 (2d Cir. 2010)*. On the other hand, this Court will not accept either party's legal conclusions as true and will not draw "argumentative inferences" in favor of either party. See *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 673 F.3d 50, 59 (2d Cir. 2012)*.

To exercise personal jurisdiction over CPG, this Court must find that three requirements are met. First, plaintiffs' service of process on CPG must have been procedurally proper. See id. Second, the Court must find **[*18]** statutory authority to exercise jurisdiction over CPG. See id. Finally, the Court must decide whether the exercise of jurisdiction comports with the requirements of the *Due Process Clause of the Constitution*. See id.

A. Service of Process

In CPG's moving papers, it asserts that "CPG moves to dismiss the three above-captioned actions against it which are the only actions in [this multidistrict litigation] in which it has been served with process." The only cases in the caption are Animal Science, Audette, and Philion; CPG thus implies that it was not served with process in Keane. However, CPG never explicitly denies that it was served with the Keane complaint and does not discuss service of process at any point in its moving or reply papers. In their opposition papers, plaintiffs do not address any service issues and discuss personal jurisdiction in Keane as though service is presumed to have been proper. CPG did not correct this assumption in its reply brief, which includes Keane in the caption and discusses Keane without arguing that service was inadequate in that case. This Court will therefore assume that the implication contained in CPG's moving papers was an error and that CPG is **[*19]** not contesting service of process.[1]

CPG does not dispute that plaintiffs' service of process was procedurally proper in Animal Science, Audette, and Philion. This requirement is thus satisfied for all four cases.

---

[1] At oral argument on July 10, 2012, counsel for Weisheng confirmed the Court's understanding in the following exchange:

> THE COURT: The only thing I didn't understand is whether you are contending that the summons was not properly served.
>
> MR. MASON: No.

B. Statutory Jurisdiction

For the purposes of Animal Science and Keane, plaintiffs assert that this Court's jurisdiction over CPG may be predicated on either the Clayton Act, *15 U.S.C. § 22*, or New York's long-arm statute. Plaintiffs argue that this Court's jurisdiction over CPG may be predicated on Massachusetts's long-arm statute for the purposes of Audette. In Philion, plaintiffs assert that this Court's jurisdiction over CPG may be predicated on either the Clayton Act or California's long-arm statute.

i. Animal Science and Keane

Although the Animal Science and Keane plaintiffs alleged violations of the Sherman Act, the private right of action to pursue antitrust claims is provided by the Clayton Act. See *Port Dock & Stone Corp. v. Oldcastle Northeast, Inc., 507 F.3d 117, 121 (2d Cir. 2007)*. **[*20]** Section 12 of the Clayton Act ("Section 12") states:

> Any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

15 U.S.C. § 22. Courts within the Second Circuit analyze this provision as two separate but interrelated clauses: the words preceding the semicolon provide a basis for venue, and the words following the semicolon provide that if venue is proper pursuant to the venue clause, personal jurisdiction may be established through worldwide service of process. See *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 423 (2d Cir. 2005)*. CPG does not dispute that it was properly served with process. This Court may therefore assert personal jurisdiction over CPG in the Animal Science and Keane cases if venue was proper under the Clayton Act in the district where these cases were filed — the Eastern District of New York.

According to Section 12, venue is proper wherever the defendant "is an inhabitant," "may **[*21]** be found," or "transacts business." The Animal Science and Keane plaintiffs assert that venue was proper in this district because CPG "transacts business" here through CPG's subsidiary, Weisheng. It is undisputed that Weisheng transacted business in this district by selling vitamin C to MTC Industries, a client located on Long Island. Sales contracts between Weisheng and MTC Industries indicate that Weisheng sold 23,000 kilograms (approximately 25 tons) of vitamin C to MTC Industries in four shipments from Tianjin, China, to New York. However, CPG argues that Weisheng's business activities may not be imputed to CPG for the purpose of establishing personal jurisdiction. I disagree.

In the seminal case *United States v. Scophony Corp. of Am., 333 U.S. 795, 68 S. Ct. 855, 92 L. Ed. 1091 (1948)*, the Supreme Court explored the meaning of Section 12's phrase "transacts business." The Scophony Court determined that the phrase supplied a "nontechnical" standard for determining whether an entity transacts business; a "practical and broader business conception of engaging in any substantial business operations." *Id. at 807 & 810*. Applying this standard, the Scophony Court held that a British parent company had **[*22]** transacted business in America because its American subsidiary conducted business here which required the parent company's "constant supervision and intervention." *Id. at 815*. The British parent company argued that it was a separate entity from its subsidiary, but the Court explained that the practice of using an "artful arrangement of agents' authority" to avoid personal jurisdiction in antitrust cases was an "artifice [that] saw its day end . . . with the advent of § 12." *Id. at 808 n. 19*. The Second Circuit has likewise described the phrase "transacts business" in Section 12 as requiring courts to make a "realistic assessment of the nature of the defendant's business and of whether its contacts with the venue district could fairly be said to evidence the 'practical, everyday business or commercial concept of doing business or carrying on business of any substantial character.'" *Daniel, 428 F.3d at 429* (quoting *Scophony, 333 U.S. at 807*).

Under this broad standard outlined by the Supreme Court and the Second Circuit, there is no question that CPG has transacted business in New York within the meaning of Section 12. In determining whether a parent company has transacted business through **[*23]** its subsidiaries for the purposes of Section 12, district courts in the Second Circuit often focus on whether the subsidiary's business transactions are ones that the parent "would have to undertake directly if the subsidiary did not exist to perform them." *In re Tamoxifen Citrate Antitrust Litig., 262 F. Supp. 2d 17, 23 (E.D.N.Y. 2003)*; accord *Waldron v. British Petroleum Co., 149 F. Supp. 830, 835 (S.D.N.Y. 1957)* ("A corporation may be a fiction of the law but there is no reason to carry the fiction to the extreme of saying that a corporation which has wholly owned subsidiaries . . . making sales which ordinarily would be made by a sales department, is in fact not transacting business in that jurisdiction. . . .").

As CPG's website and press releases advertise, CPG is in the business of manufacturing and selling vitamin C through subsidiaries such as Weisheng. The website and press releases do not describe CPG as an investment company or a holding company; instead, these public statements state plainly that CPG itself manufactures and sells vitamin C. CPG notes that some courts have disregarded similar evidence in a jurisdictional challenge, reasoning that an "advertising strategy **[*24]** deciding not to present to its consumers the existence of a parent-subsidiary relationship is not equivalent to a showing that the parent corporation exercises any control over its subsidiary's operational or marketing activities." *J.L.B. Equities, Inc. v. Ocwen Fin. Corp., 131 F. Supp. 2d 544, 550 (S.D.N.Y. 2001)*. This is true. However, the facts in this case indicate that the borders between CPG and Weisheng are as permeable as CPG's promotional materials depict.

For example, CPG and Weisheng have a high rate of crossover of directors; for many years, nine out of eleven Weisheng directors were current or former CPG directors. CPG also selects all of Weisheng's directors and has input into Weisheng's payroll. Corporate formalities at Weisheng also seem scarce; even accepting defendants' representation that "Weisheng is not required to have board meetings annually under Chinese law," it is telling that Weisheng held only one board meeting over a four-year span, and minutes from this sole board meeting show that the only agenda was to change Weisheng's official name. Moreover, accepting the facts in a light most favorable to plaintiffs, as this Court is required to do on a Rule 12 motion, **[*25]** it appears that CPG has directly funded Weisheng's day-to-day activities; built vitamin C production facilities from its own pocket; and has even made a special trip to the United States to collect a debt on behalf of Weisheng. In light of these facts, CPG's conclusory assertion that it "merely holds equity in Weisheng, its investment," cannot be taken at face value.

CPG refers this Court to various cases holding that each of the factors just described — overlapping directors, 100% ownership, and extensive financial support, for example — do not necessarily establish that a parent controls a subsidiary. None of these cases change the outcome in this case, however, because the Supreme Court and the Second Circuit have made clear that none of these individual factors should control the analysis. Instead, the determination of whether CPG may be subjected to jurisdiction in New York based on Weisheng's actions involves a non-technical, comprehensive analysis that focuses on the practical reality of their business relationship. Viewing the facts in a light most favorable to plaintiffs, the practical reality of CPG and Weisheng seems to be that CPG, as advertised on its website, manufactures **[*26]** and sells vitamin C through Weisheng, which acts like a sales department of CPG.

CPG devotes most of its brief to arguing that CPG's control over Weisheng is not great enough to justify treating Weisheng as an "agent" or "mere department" of CPG for the purposes of New York's long-arm statute. It is not necessary to reach this issue, since jurisdiction may be premised on the Clayton Act. But it bears noting that all of the cases CPG cites to support its contention that New York "narrowly" construes agency theories of jurisdiction are irrelevant to the question of whether CPG "transacts business" in New York within the meaning of the Clayton Act's jurisdictional provision. The nature of ***antitrust law*** is not local, and the Clayton Act's jurisdictional grant is correspondingly broad. Since jurisdiction is proper under the Clayton Act in Keane and Animal Science, it would not be appropriate for this Court to narrow its jurisdictional inquiry based on New York's long-arm statute. See, e.g., *In re Auto. Refinishing Paint Antitrust Litig., No. 1462, 2002 U.S. Dist. LEXIS 15099, 2002 WL 31261330, at *7 (E.D.Pa. July 31, 2002)* ("[A]ntitrust cases, especially those involving aliens, may pose problems for any one district **[*27]** court to obtain jurisdiction over all the defendants, if left to state long arm statutes." (internal quotation marks omitted)); *Paper Sys. Inc. v. Mitsubishi Corp., 967 F. Supp. 364, 368 (E.D. Wisc. 1997)* ("If the antitrust laws are to be effective, district courts' jurisdiction must reach the limits of the power of the United States of America. In the case of antitrust laws, it makes no sense to tie a district court's jurisdiction to the state in which it sits; it neither promotes the enforcement of ***antitrust law*** nor the management of litigation.").

Moreover, CPG's reliance on New York cases that require "[p]ervasive control over the subsidiary" to pierce the corporate veil for the purpose of liability are particularly misplaced, since the exercise of jurisdiction is different from reaching a parent for the purpose of liability. See, e.g., *All Star Carts & Vehicles, Inc. v. BFI Canada Income Fund, 596 F. Supp. 2d 630, 637 (E.D.N.Y. 2009)* ("The exercise of [Clayton Act] jurisdiction is simply that, and is not equivalent to piercing the corporate veil for the purpose of imposing liability on the parent entity."). Drawing all inferences in plaintiffs' favor, it appears that the relationship **[*28]** between CPG and Weisheng is such that, if Weisheng did not exist to sell vitamin C directly to American clients, CPG would have to sell the vitamin itself. This is sufficient to establish a statutory basis for jurisdiction under Section 12. See *In re Tamoxifen, 262 F. Supp. 2d at 23*.

ii. Philion

The Philion plaintiffs argue that this Court may assert personal jurisdiction over CPG under the Clayton Act or California's long-arm statute. Plaintiffs note that Weisheng has sold vitamin C in California, and sales contracts indicate that Weisheng has made vitamin C sales to clients based near Los Angeles. When considering whether a defendant "transacts business" within a district for the purpose of establishing venue under Section 12, however, sales within a state are not relevant unless the sale took place within the judicial district where the action was filed. See *Daniel, 428 F.3d at 423*; *15 U.S.C. § 22*. Because Philion was filed in a California state court in San Francisco and removed to federal court in the Northern District of California, Weisheng's sales to clients in Southern California are not relevant to the venue analysis under Section 12. Plaintiffs have alleged no facts showing **[*29]** that Weisheng or CPG made vitamin C sales in Northern California. There is thus no basis for this Court to find that venue was proper under Section 12 when Philion was removed to federal court.

Although this conclusion would end the Section 12 inquiry if Second Circuit law controlled the issue, the Philion plaintiffs are saved by a significant circuit split over Section 12's jurisdictional grant. Although the Second Circuit holds that Section 12's venue clause must be satisfied for personal jurisdiction to be established by worldwide service of process, see *Daniel, 428 F.3d at 423*, the Ninth Circuit disagrees. Philion was filed in the Northern District of California, and this Court's jurisdiction over CPG in that case is therefore dependent on whether the Northern District of California could assert jurisdiction over CPG when Philion was filed. See *Goldlawr, Inc v. Shubert, 175 F. Supp. 793, 795-96 (S.D.N.Y. 1959)* ("If the service purported to be made under [Section 12] was effective to give the [transferor court] personal jurisdiction, such jurisdiction would continue after transfer.") (reversed on other grounds). The parties thus agree that the Ninth Circuit's interpretation of Section 12 **[*30]** governs this Court's jurisdiction over CPG in Philion.

In *Action Embroidery Corp. v. Atlantic Embroidery, Inc., 368 F.3d 1174 (9th Cir. 2004)*, the Ninth Circuit held that Section 12's two clauses — the venue clause and the worldwide service of process clause — are independent and unrelated. Seeing no reason to "blur the basic, historic difference" between venue and personal jurisdiction, the Court concluded that the existence of personal jurisdiction under the Clayton Act does not depend on venue being proper in the court where the action was filed. *Action Embroidery, 368 F.3d at 1179-1180*. Since Section 12 allows nationwide service of process, and "a federal court obtains personal jurisdiction over a defendant if it is able to serve process on him," the Ninth Circuit holds that Section 12 confers a statutory basis for personal jurisdiction over any properly-served defendant. *Id. at 1177*. The reach of this Court's jurisdiction over CPG, for the purpose of the Philion case, is thus limited only by the boundaries of the *Due Process Clause*.

iii. Audette

Because the Audette plaintiffs do not bring federal antitrust claims, the Clayton Act cannot serve as a basis for this Court's jurisdiction **[*31]** over CPG in that action. The Audette plaintiffs thus rely on Massachusetts's long-arm statute. This statute provides that a court may exercise personal jurisdiction over:

> a person, who acts directly or by an agent, as to a cause of action in law or equity arising from the person's
> (a) transacting any business in [Massachusetts];
> (b) contracting to supply services or things in [Massachusetts];
> (c) causing tortious injury by an act or omission in [Massachusetts];
> (d) causing tortious injury in [Massachusetts] by an act or omission outside [Massachusetts] if he regularly does or solicits business, or engages in any other persistent course of conduct, or derives substantial revenue from goods used or consumed or services rendered, in this commonwealth;. . . .

Mass. Gen. Laws ch. 223A, §3. The Audette plaintiffs argue that this statute reaches CPG because CPG has "by an agent" transacted business in Massachusetts; contracted to supply vitamin C in Massachusetts; and caused tortious injury through the sale of vitamin C at inflated prices.

It is undisputed that Weisheng is subject to personal jurisdiction in Massachusetts because Weisheng contracted to supply vitamin C in Massachusetts. For example, **[*32]** a February, 2005, sales contract between Weisheng and Suzhou-Chem, Inc., indicates that Weisheng sold nearly 200 tons of vitamin C to Suzhou-Chem, which is located in Wellesley, Massachusetts. Suzhou-Chem paid more than $600,000 for this vitamin C, which was shipped from China to the United States.

The First Circuit has made clear that Massachusetts's long-arm statute should be "broadly construed." *Hannon v. Beard, 524 F.3d 275, 280 (1st Cir. 2008)*. In fact, the only limitation on the reach of Massachusetts's long-arm statute is the Constitution. See *Adelson v. Hananel, 652 F.3d 75, 80 (1st Cir. 2011)*. Given this broad reach, Weisheng's massive shipment of vitamin C to a buyer in Massachusetts unquestionably subjected Weisheng to personal jurisdiction in that state. See *Cambridge Literary Props., Ltd. v. W. Goebel Porzellanfabrik G.m.b.H. & Co., 295 F.3d 59, 64 (1st Cir. 2002)* ("The shipment of large quantities of goods into a state . . . can satisfy the minimum contacts prong of the due process inquiry."); *Hewlett-Packard Co. v. ICL Network Solutions (HK), Ltd., Civil Action No. 05-40153, 2005 U.S. Dist. LEXIS 40293, 2005 WL 3728713, at *4 (D. Mass. Nov. 29, 2005)* ("[E]ven a single business transaction by a defendant, **[*33]** if it creates a substantial connection with the forum, can give rise to personal jurisdiction." (internal quotation marks omitted)).

Although CPG does not dispute that Weisheng is subject to personal jurisdiction under Massachusetts's long-arm statute, CPG asserts that Weisheng's contacts with the state may not be imputed to CPG for the purpose of establishing jurisdiction over CPG. Since Massachusetts's long-arm statute is considered to be "coextensive with the limits allowed by the Constitution," *Adelson, 510 F.3d at 49*, courts frame the analysis of whether a parent may be subjected to personal jurisdiction based on the conduct of its subsidiary as a "minimum contacts" question. See *Donatelli v. Nat'l Hockey League, 893 F.2d 459 (1st Cir. 1990)*. In Donatelli, the First Circuit explained that a subsidiary's contacts with a forum state can be attributed to its parent when the parent "is actually responsible for its subsidiary's decision to undertake instate activities." *Id. at 466*. Although the Court warned that "substance is not to be sacrificed on the altar of form" when analyzing the relationship between a parent and its subsidiary, the Court also held that there is a "presumption **[*34]** of corporate separateness" between a parent and its wholly-owned subsidiary which can only be overridden by "clear evidence" of a "plus factor" which demonstrates the parent's "choice to avail itself of the forum's benefices." *Id. at 466*.

The Donatelli Court listed a few examples of the kind of "plus factor" that could cause a court to attribute a subsidiary's contacts to its parent for jurisdictional purposes: 1.) "when a subsidiary enters the forum state as an agent for the parent"; 2.) "where the parent is exercising unusual hegemony over the subsidiary's operations"; or 3.) "where the subsidiary is a separate entity in name alone." Id.; accord *Ruiz v. Bally Total Fitness Holding Corp., 447 F. Supp. 2d 23, 27 (D. Mass. 2006)*. Some of the factors that district courts have found relevant to this analysis include: 1.) whether the parent is the subsidiary's sole stockholder; 2.) whether there is significant intermingling of corporate officers and directors; 3.) whether the parent appoints officers of the subsidiary independently; 4.) whether the parent has assumed responsibility for the subsidiary's liabilities; 5.) whether the parent was directly involved in development projects on **[*35]** behalf of the subsidiary; 6.) whether the parent publicly held itself out as a company that performed the particular tasks that the subsidiary actually performed; and 7.) whether the subsidiary failed to hold board meetings.[2] See *Ruiz, 447 F. Supp. 2d at 27*; *In re Lernout & Hauspie Sec. Litig., 337 F. Supp. 2d 298, 315 (D. Mass. 2004)*; *Willis v. Am. Permac, Inc., 541 F. Supp. 118, 122 (D. Mass. 1982)*.

For the reasons already discussed, I find that CPG's control over Weisheng amounted to "unusual hegemony" within the meaning of *Donatelli* and was such that Weisheng could be considered CPG's agent. The cases cited by defendants **[*36]** do not alter my conclusion. First, *Andresen v. Diorio, 349 F.3d 8 (1st Cir. 2003)*, is factually distinguishable because the plaintiff in that case made a much weaker factual showing than the Audette plaintiffs have made here. The Andresen plaintiff relied solely on the fact that the parent had a controlling stock interest in the subsidiary; the plaintiff's vague allegation that the parent had "overall financial and policy control"; and "a few news articles" which, according to the Andresen Court, showed "only that [the parent] had employed an interim president who formerly worked for [the subsidiary] and that the parent was generally aware of its subsidiary's business plans." *Id. at 12-13*. The facts put forth by the Audette plaintiffs go much farther to demonstrate the interrelatedness of Weisheng and CPG. Among other factors, the Audette plaintiffs have shown a higher level of interlocking executives and have supported their claims of financial dependence with concrete facts.

Second, *My Bread Baking Co. v. Cumberland Farms, Inc., 353 Mass. 614, 233 N.E.2d 748 (1968)*, discusses piercing the corporate veil for the purpose of establishing liability rather than jurisdiction. Although similar **[*37]** factors are considered by courts in either analysis, the level of rigor to be applied to a jurisdictional motion must be lower. This is especially true because plaintiffs in this case seek to assert specific jurisdiction over CPG, rather than general jurisdiction. Specific jurisdiction requires a lesser showing than general jurisdiction. See *Daynard v. Ness, Motley, Loadholt, Richardson & Poole, P.A., 290 F.3d 42, 54 (1st Cir. 2002)* ("[A]s Donatelli states clearly, the standard for general jurisdiction is more strict than the standard for specific jurisdiction."). When considering motions to dismiss for lack of personal jurisdiction, the First Circuit and other courts of appeals consistently eschew formulaic and overly exacting analyses in favor of practical, fairness-based determinations. "Since the essence of personal jurisdiction is to bring responsible parties before the court, a corporation which is actually responsible for its subsidiary's decision to undertake instate activities should, in all fairness, be within the . . . courts' jurisdictional reach." *Donatelli, 893 F.2d at 466*.

C. Due Process

Having found a statutory basis to exert jurisdiction over CPG in all four cases at **[*38]** issue, this Court's next task is to determine whether this exercise of jurisdiction comports with the *Due Process Clause of the Fourteenth Amendment*. The Due Process analysis begins by asking whether the defendant has had enough "minimum contacts" with the forum state to satisfy the Supreme Court's concern, articulated in *International Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*, that the exercise of personal jurisdiction not offend "traditional notions of fair play and substantial justice." See, e.g., *Bank Brussels Lambert v. Fiddler Gonzalez & Rodriguez, 305 F.3d 120, 127 (2d Cir. 2002)*; *Fiore v. Walden, 657 F.3d 838, 845 (9th Cir. 2011)*; *Adelson, 652 F.3d at 80-81*. There are three central factors that guide the minimum contacts analysis: 1.) whether the defendant purposefully availed itself of the privilege of doing business in the forum and could thus foresee being haled into court there; 2.) whether the plaintiff's claim arises out of the defendant's contacts with the forum; and 3.) whether asserting jurisdiction over the defendant would be fair and reasonable. See *Bank Brussels Lambert, 305 F.3d at 127*; *Fiore, 657 F.3d at 845*; *Adelson, 652 F.3d at 80-81*.

---

[2] Although defendants do not cite this case, *United Elec., Radio & Mach. Workers of Am. v. 163 Pleasant St. Corp., 960 F.2d 1080 (1st Cir. 1992)*, suggests that the corporate form may not be disregarded, for the purposes of a "minimum contacts" analysis, absent a finding of fraudulent intent on the parent's behalf. But this case involved an ERISA plan, and the Court carefully and repeatedly noted that its analysis was tied to the particularities of this statute. Courts within the First Circuit therefore have not adhered to this requirement outside the context of ERISA.

Defendants **[*39]** do not dispute that jurisdiction over CPG comports with the *Due Process Clause* if Weisheng's contacts with New York, Massachusetts, and California can be imputed to CPG. Through Weisheng, CPG purposefully availed itself of the privilege of doing business in New York, California, and Massachusetts by selling tons of vitamin C in these states. Plaintiffs' claims arise directly from these shipments of vitamins, and this Court concludes that it would be fair and reasonable for CPG to come to these states to defend this lawsuit. The *Due Process Clause* thus does not shield CPG from being subject to jurisdiction in this Court.

II. Summary Judgment

Rule 56 of the Federal Rules of Civil Procedure provides that summary judgment is warranted where the "movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute exists "if the evidence is such that a reasonable jury could return a verdict for the non-moving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A fact is material if it "might affect the outcome of the suit under the governing law." Id.

Once the **[*40]** moving party has met its burden, the opposing party "'must do more than simply show that there is some metaphysical doubt as to the material facts. The nonmoving party must come forward with specific facts showing that there is a *genuine issue for trial*.'" *Caldarola v. Calabrese, 298 F.3d 156, 160 (2d Cir. 2002)* (emphasis in original) (quoting *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*. In determining whether genuine issues of material fact exist, I am required to "resolve all ambiguities and draw all permissible factual inferences in favor of the party against whom summary judgment is sought." *Patterson v. Cnty. of Oneida, 375 F.3d 206, 219 (2d Cir. 2004)*.

CPG's summary judgment motion is based on the dearth of evidence showing that CPG attended price-fixing meetings on its own behalf. In this respect, CPG's motion is similar to the motion for summary judgment that this Court granted on behalf of former defendant JSPC America, Inc. ("JSPCA"). See *In re Vitamin C Antitrust Litig., No. 06-MD-1738, 2011 U.S. Dist. LEXIS 153453 (E.D.N.Y. Dec. 27, 2011)*. However, the facts before the Court on JSPCA's motion were significantly different. **[*41]** In the case of JSPCA, which is a subsidiary of defendant Jiangshan Pharmaceutical Co., Ltd., plaintiffs did not argue that a reasonable jury could hold the parent company derivatively liable for the actions of the subsidiary. To this end, plaintiffs did not put forth evidence that the parent had excessive control over the subsidiary. Instead, plaintiffs' opposition to JSPCA's motion focused on whether the subsidiary's chief executive officer, who attended price-fixing meetings, was acting on behalf of the subsidiary or the parent.

In contrast, plaintiffs argue that CPG can be held liable for the price-fixing activities of Weisheng regardless of whether Weisheng's executives attended price-fixing meetings on behalf of CPG. Under federal law, a parent corporation may be held liable for the antitrust violations of its subsidiary under alter ego principles, see, e.g., *Southern New England Tel. Co. v. Global NAPs Inc., 624 F.3d 123, 139 (2d Cir. 2010)*, or under agency principles. See, e.g., *United States v. Bestfoods, 524 U.S. 51, 62-63, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)*. The factors relevant to veil-piercing analyses for liability purposes — such as the absence of corporate formalities, overlap between **[*42]** officers and directors, and the subsidiary's financial reliance on the parent — are the same as those that the Court has considered with respect to personal jurisdiction. See *In re Vebeliunas, 332 F.3d 85, 91 n.3 (2d Cir. 2003)* (listing the factors relevant to a veil-piercing analysis in the Second Circuit). For the same reasons that this Court has denied CPG's jurisdictional motion, the Court also finds that the question of whether CPG may be held liable for the price-fixing activities of Weisheng presents a "genuine issue for trial." *Matsushita, 475 U.S. at 586*. CPG's motion for summary judgment must therefore be denied.

CONCLUSION

CPG's [286] motion to dismiss for lack of personal jurisdiction and its motion [387] for summary judgment are denied.

SO ORDERED.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews the grant of a motion to dismiss de novo. The appellate court may affirm the district court's dismissal of a plaintiff's claims on any grounds, including grounds not relied upon by the district court. In this analysis, all well-pleaded facts in the complaint are accepted as true, and the appellate court construes the complaint in the light most favorable to the nonmoving party.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

A complaint will survive a motion to dismiss only if it contains enough facts to state a claim to relief that is plausible on its face.

Title XXXIX of the Ohio Revised Code, *Ohio Rev. Code Ann. §§ 3901.01-3999.99*, regulates insurance. *Ohio Rev. Code Ann. § 3901.01*.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

HN6[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

The McCarran-Ferguson Act bars a federal antitrust action if title insurance is the business of insurance within the meaning of the Act. *15 U.S.C.S. § 1012(a)-(b)*. There are three criteria relevant in determining whether a particular business or practice is part of the "business of insurance" exempted from the antitrust laws: first, whether the practice has the effect of transferring or spreading a policyholder's risk; second, whether the practice is an integral part of the policy relationship between the insurer and the insured; and third, whether the practice is limited to entities within the insurance industry. No single factor in this analysis is dispositive. Rather, a court must analyze allegedly anticompetitive behavior holistically, keeping in mind that the McCarran-Ferguson antitrust exemption is for the business of insurance, not the business of insurers.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

HN7[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

In the context of the three criteria relevant in determining whether a particular business or practice is part of the "business of insurance" exempted from the antitrust laws by the McCarran-Ferguson Act, the first Pireno factor requires only that a product spread some risk; it does not specify any particular quantity. The amount of risk spread, however, is still relevant: it bears on the first factor's weight in the multifaceted Pireno analysis. There is no dispute that title-insurance policies are priced well above most estimates of the risk involved. Likewise, however, there is no dispute that title-insurance rate-setting is an integral part of the policy relationship between the insurer and the insured; and is limited to entities within the insurance industry. Hence, title-insurance rate-setting satisfies each Pireno criterion. That one factor is weak while others are strong need not change the ultimate conclusion. Rigid insistence on substantial risk-spreading is not required. Rather, courts must examine products or practices with respect to all three criteria. Because title-insurance rate-setting spreads some risk, is a foundational piece of the policy relationship between the insurer and the insured, and has no application outside the context of insurance, it is clearly part of the business of insurance, within the meaning of Pireno.

Insurance Law > Industry Practices > Rate Regulation > General Overview

HN8[] **Industry Practices, Rate Regulation**

Ratemaking is a key part of insurance regulation.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

HN9[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

In the context of the three criteria relevant in determining whether a particular business or practice is part of the "business of insurance" exempted from the antitrust laws by the McCarran-Ferguson Act, the Pireno Court expressly held that no single criterion was determinative in deciding whether a product qualified as the business of insurance.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

HN10[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

In the context of the three criteria relevant in determining whether a particular business or practice is part of the "business of insurance" exempted from the antitrust laws by the McCarran-Ferguson Act, the test in Pireno does not quantify any particular amount of risk; it merely calls for a finding of some risk. Under the Pireno test, title insurance qualifies as the business of insurance.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

HN11[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

Title insurance is the business of insurance within the meaning of the McCarran-Ferguson Act.

Insurance Law > Industry Practices > Rate Regulation > General Overview

HN12[] Industry Practices, Rate Regulation

Ohio Rev. Code Ann. § 3935.06 permits: Cooperation among rating bureaus, or among rating bureaus and insurers, in rate making or in other matters covered by *Ohio Rev. Code Ann. §§ 3935.01 to 3935.17*, inclusive, of the Revised Code provided the filings resulting from such cooperation are subject to all such sections which are applicable to filings generally. The superintendent may review such cooperative activities and practices and if, after a hearing, he finds that any such activity or practice is unfair, unreasonable, or otherwise inconsistent with such sections, he may issue a written order specifying in what respects such activity or practice is unfair, unreasonable, or otherwise inconsistent, and requiring the discontinuance of such activity or practice. *Ohio Rev. Code Ann. § 3935.06*.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN13[] Federal & State Interrelationships, Erie Doctrine

When there is no state caselaw construing a state statute, an appellate court must predict how the state's highest court would interpret the statute.

Governments > Legislation > Interpretation

HN14[] Legislation, Interpretation

In the construction of Ohio statutes the purpose in every instance is to ascertain and give effect to the legislative intent. In order to determine legislative intent it is a cardinal rule of statutory construction that a court must first look to the language of the statute itself. If a statute's language is clear and unambiguous, Ohio courts are required to apply that plain language. If, however, the language is susceptible of more than one reasonable interpretation, the statute is ambiguous. In that case, the court, in determining the intention of the legislature, may consider among other matters: (A) The object sought to be attained; (B) The circumstances under which the statute was enacted; (C) The legislative history; (D) The common law or former statutory provisions, including laws upon the same or similar subjects; (E) The consequences of a particular construction; and (F) The administrative construction of the statute. *Ohio Rev. Code Ann. § 1.49*.

Governments > Legislation > Interpretation

HN15[] Legislation, Interpretation

If two statutes--one general and one specific--are in conflict, they shall be construed so that effect is given to both. If the conflict between the provisions is irreconcilable, the specific provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail. *Ohio Rev. Code Ann. § 1.51*. If statutes enacted at the same or different sessions of the legislature are irreconcilable, the statute latest in date of enactment prevails. *Ohio Rev. Code Ann. § 1.52*.

Governments > Legislation > Interpretation

HN16[] **Legislation, Interpretation**

Where the lawmaking body declares its own intention in the enactment of a particular law, or defines the sense of the words employed, it is within the exercise of its legislative power, and its own construction of its language should be followed.

Insurance Law > Industry Practices > General Overview

Insurance Law > Industry Practices > General Overview

HN18[] **Regulated Practices, Monopolies & Monopolization**

Ohio Rev. Code Ann. § 3901.01 preserves all of the substantive law in Title XXXIX of the Ohio Revised Code, *Ohio Rev. Code Ann. §§ 3901.01-3999.99*, regardless of wording. The legislature clearly intended that combinations of insurers not be subject to antitrust scrutiny under former Ohio Gen. Code § 9592-1; the plain language of *§ 3901.01* preserves insurance law as formerly expressed. The intent of the legislature, then, seems to be that insurers may cooperate in ratemaking activities.

Insurance Law > Industry Practices > Rate Regulation > General Overview

HN19[] **Industry Practices, Rate Regulation**

Ohio Rev. Code Ann. § 3935.10 permits every insurer to exchange information and experience data with insurers in other states and to consult with them with respect to rate making and the application of rating systems. *Ohio Rev. Code Ann. § 3935.10*. That the Code expressly allows both nationwide data pooling and local rating bureaus where insurers pool information with each other suggests that the legislature contemplated widespread collaboration among insurers in the rate-setting context.

Insurance Law > Industry Practices > Rate Regulation > General Overview

HN20[] **Industry Practices, Rate Regulation**

The superintendent may review cooperative activities and practices and if he finds that any such activity or practice is unfair, unreasonable, or otherwise inconsistent with such sections, he may issue a written order requiring the discontinuance of such activity or practice. *Ohio Rev. Code Ann. § 3935.06*. This remedial procedure is consistent with the intent that insurers cooperate. The superintendent's ability to police is a safeguard against abuse.

Insurance Law > Industry Practices > Rate Regulation > General Overview

HN21[] Industry Practices, Rate Regulation

Ohio Rev. Code Ann. § 3935.06 permits cooperation among insurers.

Governments > Legislation > Interpretation

HN22[] Legislation, Interpretation

The Ohio Revised Code's rules of statutory construction provide that, when two statutory provisions are in irreconcilable conflict, the specific provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail. Ohio Rev. Code Ann. § 1.51.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Insurance Law > Industry Practices > General Overview

HN23[] Regulated Practices, Monopolies & Monopolization

The Insurance Code acts as an exception to the Valentine Act, Ohio Rev. Code Ann. §§ 1331.01-1353.06. Ohio Rev. Code Ann. §§ 1.51, 1.52.

Counsel: ARGUED: Daniel B. Allanoff, MEREDITH COHEN GREENFOGEL & SKIRNICK, P.C., Philadelphia, PA, for Appellants.

David M. Foster, FULBRIGHT & JAWORSKI L.L.P., Washington, D.C., for Appellees.

ON BRIEF: Daniel B. Allanoff, Bruce K. Cohen, MEREDITH COHEN GREENFOGEL & SKIRNICK, P.C., Philadelphia, PA, Eugene A. Spector, SPECTOR ROSEMAN & KODROFF, P.C., for Appellants.

Matto, STEPTOE & JOHNSON, PLLC, Columbus, Ohio, for Appellees.

Judges: Before: BOGGS and STRANCH, Circuit Judges; and THAPAR,* District Judge.

Opinion by: BOGGS

Opinion

[*591] [*2]** BOGGS, Circuit Judge. These consolidated cases are eight of at least forty-five lawsuits nationwide, alleging that title-insurance companies and rating bureaus violated state and federal antitrust laws by conspiring to charge inflated rates. *See* In re Title Ins. Real Estate Settlement Procedures Act & Antitrust Litig., 560 F. Supp. 2d

* Hon. Amul R. Thapar, United States District Judge for the Eastern District of Kentucky, sitting by **[**2]** designation.

1374, 1376 (J.P.M.L. 2008) (denying consolidation of twenty-five pending title-insurance antitrust cases; mentioning "at least twenty related actions"). The district court dismissed all of Appellants' claims with prejudice. It held, first, that the filed-rate doctrine foreclosed damages and any injunctive relief that would interfere with an already-filed rate;[1] and, second, that the McCarran-Ferguson Act, along with Title XXXIX of the Ohio Revised Code, barred Appellants' federal and state antitrust actions altogether. We reach the same conclusion through different reasoning. We hold that the McCarran-Ferguson Act and Title XXXIX of the Ohio Revised Code prevent Appellants from maintaining any antitrust action based on Appellees' title-insurance rate filings. As such, the filed-rate doctrine, which limits the antitrust remedies available **[**3]** to private parties, is irrelevant. We therefore affirm the district court's dismissal, with prejudice, of Appellants' complaint.

I

Jordan Katz and eight other named plaintiffs ("Appellants") brought suit on behalf of themselves and all other purchasers of title insurance in Ohio from March 2004 through the present. They alleged that twenty-two title-insurance companies and the **[***3]** Ohio Title Insurance Rating Bureau ("Appellees") violated state and federal antitrust laws by conspiring to set unreasonably high title-insurance rates.[2]

Appellee **[**4]** title-insurance companies filed rates with the Ohio Department of Insurance through a properly licensed rating bureau, the Ohio Title Insurance Rating Bureau ("OTIRB"). Appellants claimed that it was "impossible for the Department of Insurance to review, regulate or supervise the reasonableness of the rates collectively set by defendants because those rates are based principally on undisclosed costs." The "undisclosed costs," Appellants alleged, included "kickbacks, referral fees and other expenses designed to solicit business referrals."[3] They contended that these inducements led to an "increase [in] the prices Ohio title insurance purchasers . . . paid compared to what they would have paid absent defendants' joint illegal conduct." Appellants urge that such an increase in price, resulting from unlawful collaboration, is actionable under § 1 of the Sherman Act, *15 U.S.C. § 1*, and under the Valentine Act, *Ohio Rev. Code §§ 1331.01-1353.06*, Ohio's antitrust statute. **[*592]** They seek both injunctive relief and damages.

Appellees "filed a joint motion to dismiss on the grounds that Plaintiffs' claims were barred by the filed-rate **[**5]** doctrine and by the McCarran-Ferguson Act." The district court referred these motions to a magistrate judge, who issued a Report and Recommendation, suggesting that all claims be dismissed. The magistrate judge did, however, state that Appellants should have "an opportunity to . . . modify the Complaint in order to present a prayer for non-rate-related injunctive relief that might survive the Filed Rate Doctrine."

After considering objections from both parties, the district court issued a Memorandum Opinion. It held, first, that the filed-rate doctrine applied to title insurance, and so foreclosed Appellants' claims for monetary damages, but left open the possibility of injunctive relief that would not interfere with rates already filed. Next, it **[***4]** **[**6]** held that the McCarran-Ferguson Act barred Appellants' federal antitrust claims, and that Appellees' conduct did not violate the Valentine Act because it was permissible under Title XXXIX of the Ohio Revised Code. The district court further concluded that dismissal with prejudice was appropriate because the McCarran-Ferguson Act and Title XXXIX completely foreclosed Appellants' federal and state antitrust claims. Appellants timely appealed.

II

---

[1] Although these cases involve the filed-rate doctrine's antitrust implications, the doctrine also applies when rate-payers challenge the rate they have been charged. In that situation, the filed-rate doctrine protects the company. The doctrine requires that the company charge only the rate it filed, prevents it from charging any other rate, and bars private suits based on the properly filed and duly approved rates. *See, e.g.*, *In re Investigation of Nat'l Union Fire Ins. Co., 66 Ohio St. 3d 81, 1993 Ohio 184, 609 N.E.2d 156 (Ohio 1993)*.

[2] Title insurance is "[a]n agreement to indemnify against loss arising from a defect in title to real property." BLACK'S LAW DICTIONARY 819 (8th ed. 2004).

[3] Title XXXIX prohibits such inducements. *See* *Ohio Rev. Code § 3953.26*.

HN1[] We review the grant of a motion to dismiss *de novo.* *Federal-Mogul U.S. Asbestos Pers. Injury Trust v. Cont'l Cas. Co., 666 F.3d 384, 387 (6th Cir. 2011)*. We may "affirm the district court's dismissal of a plaintiff's claims on any grounds, including grounds not relied upon by the district court." *Ibid*. (quoting *Hensley Mfg. v. ProPride, Inc., 579 F.3d 603, 609 (6th Cir. 2009))*. In this analysis, "[a]ll well-pleaded facts in the complaint are accepted as true," *Ind. State Dist. Council of Laborers v. Omnicare, Inc., 583 F.3d 935, 942 (6th Cir. 2009)*, and "we construe the complaint in the light most favorable to the non-moving party." *Federal-Mogul, 666 F.3d at 387*. *HN2*[] A complaint will survive a motion to dismiss only if it "contain[s] . . . enough **[**7]** facts to state a claim to relief that is plausible on its face." *Ibid*. (internal citations and quotations omitted); *see also* *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949-50, 173 L. Ed. 2d 868 (2009)*.

III

A

The McCarran-Ferguson Act provides: *HN3*[] "[t]he business of insurance, and every person engaged therein, shall be subject to the laws of the several States which relate to the regulation or taxation of such business." *15 U.S.C. § 1012(a)*. Generally, *HN4*[] "[n]o Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance . . . unless such Act specifically relates to the business of insurance." *Id*. at *§ 1012(b)*. However, "the Sherman Act . . . shall be applicable to the business of insurance to the extent that such business is not regulated by State law." *Ibid*. *HN5*[] Title XXXIX of the Ohio Revised Code **[***5]** regulates insurance. *See* *Ohio Rev. Code § 3901.01* (creating department of insurance); *id*. at *§§ 3901.01-3999.99*. Accordingly, *HN6*[] the McCarran-Ferguson Act bars Appellants' federal antitrust action if title insurance is "the business of insurance" within the meaning of the Act. *15 U.S.C. § 1012(a)-(b)*.

There are

> **[*593]** three criteria relevant **[**8]** in determining whether a particular business or practice is part of the "business of insurance" exempted from the antitrust laws . . . *first*, whether the practice has the effect of transferring or spreading a policyholder's risk; *second*, whether the practice is an integral part of the policy relationship between the insurer and the insured; and *third*, whether the practice is limited to entities within the insurance industry.

Union Labor Life Ins. Co. v. Pireno, 458 U.S. 119, 129, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982). No single factor in this analysis is dispositive. *Ibid*. Rather, we must analyze allegedly anti-competitive behavior holistically, keeping in mind that the McCarran-Ferguson antitrust "exemption is for the 'business of insurance,' not the 'business of insurers.'" *Group Life & Health Ins. Co. v. Royal Drug Co., 440 U.S. 205, 211, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)*.

Here, the district court correctly held that title-insurance rate-making was "the business of insurance," within the meaning of the McCarran-Ferguson Act. Appellants below did not dispute the magistrate judge's finding that title insurance met the second and third elements of the *Royal Drug-Pireno* test. Thus, only the first factor, "whether the practice has the effect of **[**9]** transferring or spreading a policyholder's risk," *Pireno, 458 U.S. at 129*, was at issue.

As the court below noted, *HN7*[] the first *Pireno* factor requires only that a product spread some risk; it does not specify any particular quantity. *See* *id. at 129-30*; *SEC v. Variable Annuity Life Ins. Co. of Am., 359 U.S. 65, 71, 79 S. Ct. 618, 3 L. Ed. 2d 640 (1959)* (holding that variable annuity was not the business of insurance because it placed *no* risk of loss on the issuer). The amount of risk spread, however, is still relevant: it bears on the first factor's weight in the multifaceted *Pireno* analysis. The instant case illustrates this point. There is no dispute that title-insurance policies are priced well above most estimates of the risk **[***6]** involved. *See* Appellants' Br. at 28; Appellees' Br. at 38-39. Likewise, however, there is no dispute that title-insurance rate-setting "is an integral part of the policy relationship between the insurer and the insured; and . . . is limited to entities within the insurance industry." *Pireno, 458 U.S. at 129*. Hence, title-insurance rate-setting satisfies each *Pireno* criterion. That one factor is weak while others are strong need not change the ultimate conclusion. Rigid insistence on substantial **[**10]** risk-spreading is not required. Rather, courts must examine products or practices "with respect to all three criteria." *Ibid*. Because title-insurance rate-setting spreads some risk, is a foundational piece of the policy relationship between the insurer and the insured, and has no application outside the context of insurance, it is clearly part of the business of insurance, within the meaning of *Pireno*.

This conclusion is consistent with the policy of the McCarran-Ferguson Act. As the district court observed, ***HN8***[] rate-making is a key part of insurance regulation. In fact, "[t]he floor debates [on the McCarran-Ferguson Act] . . . focused simply on whether cooperative rate making should be exempt [from ***antitrust law***]." *Royal Drug, 440 U.S. at 223*. One of the Act's sponsors, Senator Ferguson, said on the Senate floor: "[W]e cannot have open competition in fixing rates on insurance. If we do, we shall have chaos." *Ibid*. (citing 91 Cong. Rec. 1481 (1945)). Other comments in the floor debates "also indicated a primary concern that cooperative ratemaking would be protected from the antitrust laws." *Ibid*. Even President **[*594]** Franklin Roosevelt indicated that the McCarran-Ferguson Act would allow companies **[**11]** to work together in setting rates when he signed the bill. *Id. at 223-24*. To hold that title-insurance rate-making is not subject to antitrust scrutiny would be to ignore Congress's purpose, and improperly to impose federal oversight on an extensive state regulatory scheme. *Id. at 224* (quoting President Roosevelt's statement in S. Rosenman, The Public Papers and Addresses of Franklin D. Roosevelt, 1944-45 Vol., p. 587 (1950), that "Congress . . . was willing to permit actual regulation of [cooperatively set] rates by affirmative action of the States"). We do not take such a tack. Instead, we hold that the district court was correct to conclude that title insurance is the business of insurance, within the meaning of the McCarran-Ferguson Act.

[*7]** Appellants nevertheless argue that the district court erred. At the outset, they claim that, because the Supreme Court called risk-spreading an "indispensable characteristic of insurance," the first *Pireno* factor is a "threshold requirement[] for application of McCarran-Ferguson Act Immunity." Appellants' Br., at 21-22 (internal citations omitted). Appellants then proceed to argue that title insurance involves so little risk-spreading that it does **[**12]** not have "the effect of transferring or spreading a policyholder's risk," *Pireno, 458 U.S. at 129*; see Appellants' Br. at 21-30, but instead acts as a limited warranty, protecting purchasers from existing defects in title. Appellants' Br. at 22. Because risk-spreading is not the "true nature" of title insurance, they claim, title insurance rates are not the business of insurance within the meaning of the McCarran-Ferguson Act, and they may maintain their federal antitrust claims. *Id*. at 25.

To support this proposition, Appellants cite *Variable Annuity*. There, the Court addressed the question whether variable annuity contracts were the business of insurance within the meaning of the McCarran-Ferguson Act, and thus exempt from reporting requirements under federal securities laws. *See Variable Annuity, 359 U.S. at 73* (Brennan, J., concurring) (labeling the "basic problem involved" as "one of the coverage of two Acts of Congress which concentrated on applying specific forms of regulatory controls to the various ways in which organizations get and administer other people's money"). It held that, while some of the contracts offered did contain "one true insurance feature," *id. at 73 n.15* **[**13]** (maj. op.), variable annuities generally could not be considered part of the 'business of insurance' because they "place[d] *all* the investment risks on the annuitant, *none* on the company." *Id. at 71* (emphasis added).

According to Appellants, *Variable Annuity* establishes that "a court must examine the product [at issue] in order to determine whether it was designed to transfer risk, as in property, casualty and life insurance, or for some other purpose." Appellants' Reply Br. at 19. Further, they argue that the case shows that, when a product contains only a minimal risk-shifting component, it should not be considered the business of insurance. Appellants' Br. at 25-26. Because the title-insurance policies in this case **[***8]** include "at most, 3.4% of premium loss," Appellants' Reply Br. at 21, Appellants urge, they cannot be considered part of the business of insurance, based on *Variable Annuity*.[4]

[4] Appellants also cite *United States v. Title Ins. Rating Bureau of Arizona, 700 F.2d 1247 (9th Cir. 1983)*, and *In re Ticor Title Ins. Co., 112 F.T.C. 344, 1989 WL 1126786 (F.T.C. 1989).* These cases, however, are irrelevant. *Rating Bureau of Arizona* addressed escrow services, and *In re Ticor* involved **[**14]** title search and examination charges. In both cases, the court held that the service provided was not the business of insurance. Neither case, however, involved rate-making, a central component of insurance and insurance regulation.

[*595] Appellants are incorrect at every turn. First, ***HN9***[] the *Pireno* Court expressly held that no single criterion was determinative in deciding whether a product qualified as the business of insurance. *Pireno, 458 U.S. at 129* ("None of these criteria is necessarily determinative in itself."). Appellants' claim that risk-spreading is a threshold requirement, then, is simply contrary to explicit Supreme Court precedent. Second, as the district court pointed out, ***HN10***[] "the test in *Pierno* [sic] . . . does not quantify any particular amount of risk; it merely calls for a finding of some risk." *See In re New Jersey Title Ins. Litig., No. 08-1425, 2010 U.S. Dist. LEXIS 67273, 2010 WL 2710570, at *8 (D.N.J. July 6, 2010)*. If anything, Pireno gives content to *Variable Annuity's* conclusion that "the concept of 'insurance' involves some investment risk-taking on the part of the company." *Variable Annuity, 359 U.S. at 71*. In any event, *Pireno*, not *Variable Annuity*, is this court's guide. Under the Pireno test, **[**15]** title insurance qualifies as the business of insurance. Finally, Appellants "misstate *Variable Annuity's* holding. The *Variable Annuity* Court held that, for purposes of federal statutory exemptions, including the McCarran-Ferguson Act, the concept of insurance involves some investment risk-taking on the part of the company." *In re New Jersey Title Ins. Litig., 2010 U.S. Dist. LEXIS 67273, 2010 WL 2710570, at *8* (internal quotations omitted). The contracts in *Variable Annuity* involved no risk-taking, and therefore were not insurance. Title insurance, by contrast, does involve a risk—small though it may be.

We therefore hold that ***HN11***[] title insurance is the business of insurance within the meaning of the McCarran-Ferguson Act. Thus, Appellants' federal antitrust claims are barred if Ohio law regulates title insurance. Title XXXIX of the Ohio Revised Code does just that. Accordingly, the McCarran-Ferguson Act prevents Appellants from maintaining their federal antitrust claims.

[*9]** B

The McCarran-Ferguson Act bars Appellants' federal antitrust claims because title insurance qualifies as the business of insurance, and "such business is [] regulated by State law." *See 15 U.S.C. § 1012(b)*. The question remains, though, whether Appellees' **[**16]** conduct was permissible under the Ohio Revised Code. The Valentine Act, *Ohio Rev. Code §§ 1331.01-1353.06*, prohibits "a combination of capital, skill, or acts by two or more persons . . . to fix at a standard figure . . . an article or commodity of merchandise, produce, or commerce intended for sale . . . in this state." *Id*. at *§§ 1331.01(B)(4)*, *1331.04*. At the same time, ***HN12***[] *§ 3935.06* permits:

> Co-operation among rating bureaus, or among rating bureaus and insurers, in rate making or in other matters covered by sections 3935.01 to 3935.17, inclusive, of the Revised Code . . . provided the filings resulting from such co-operation are subject to all such sections which are applicable to filings generally. The superintendent may review such co-operative activities and practices and if, after a hearing, he finds that any such activity or practice is unfair, unreasonable, or otherwise inconsistent with such sections, he may issue a written order specifying in what respects such activity or practice is unfair, unreasonable, or otherwise inconsistent, and requiring the **[*596]** discontinuance of such activity or practice.

Id. at *§ 3935.06*. The issue that we must decide, then, is whether the specific language **[**17]** of *§ 3935.06* carves out an exception to the Valentine Act's general prohibition on price-fixing.

In addressing this question, we apply Ohio law. *Rector v. Gen. Motors Corp., 963 F.2d 144, 146 (6th Cir. 1992)*. ***HN13***[] "When there is no state caselaw construing a state statute, we must predict how the state's highest court would interpret the statute." *F.D.I.C. v. Jeff Miller Stables, 573 F.3d 289, 298 (6th Cir. 2009)* (quoting *United States v. Simpson, 520 F.3d 531, 535 (6th Cir. 2008))* (internal alterations omitted).

HN14[] "In the construction of [Ohio] statutes the purpose in every instance is to ascertain and give effect to the legislative intent . . . ." *Carter v. Div. of Water, City of Youngstown, 146 Ohio St. 203, 65 N.E.2d 63, 63 (Ohio 1946)*; *see also Stevens v. Ackman, 91 Ohio St. 3d 182, 2001 Ohio 249, 743 N.E.2d* ***[***10]*** *901, 909 (Ohio 2001)* (citing *Carter, 65 N.E.2d at 63*). "In order to determine legislative intent it is a cardinal rule of statutory construction that a court must first look to the language of the statute itself." *State v. Jordan, 89 Ohio St. 3d 488, 2000 Ohio 225, 733 N.E.2d 601, 605 (Ohio 2000)*. If a statute's language is clear and unambiguous, Ohio courts are "required to apply

[that] plain language." *Jaques v. Manton, 125 Ohio St. 3d 342, 2010 Ohio 1838, 928 N.E.2d 434, 438 (Ohio 2010)*. If, however, **[**18]** "the language is susceptible of more than one reasonable interpretation," *Jordan, 733 N.E.2d at 605*, the statute is ambiguous. In that case,

> the court, in determining the intention of the legislature, may consider among other matters:
>
> (A) The object sought to be attained;
> (B) The circumstances under which the statute was enacted;
> (C) The legislative history;
> (D) The common law or former statutory provisions, including laws upon the same or similar subjects;
> (E) The consequences of a particular construction;
> (F) The administrative construction of the statute.

Ohio Rev. Code § 1.49.

HN15[] If two statutes—one general and one specific—are in conflict, "they shall be construed . . . so that effect is given to both. If the conflict between the provisions is irreconcilable, the [specific] provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail." *Id*. at *§ 1.51*. "If statutes enacted at the same or different sessions of the legislature are irreconcilable, the statute latest in date of enactment prevails." *Id*. at *§ 1.52*; *see also* *List v. Burley Tobacco Growers' Coop. Ass'n, 114 Ohio St. 361, 4 Ohio Law Abs. 194, 151 N.E. 471, 479 (Ohio 1926)* **[**19]** (holding that later-enacted statute permitting cooperation in marketing agricultural products was an exception to the Valentine Act).

Appellants urge that the plain language of *§ 3935.06* resolves this case. Specifically, they contend: "[b]y its express terms, the statute permits cooperation among rating bureaus, or among rating bureaus and insurers—*not among insurers themselves*." Appellants Br. at 19 (emphasis in original). This is one possible interpretation of the statute, which allows "[c]o-operation among rating bureaus, or among rating bureaus and insurers, in rate making **[***11]** or in other matters covered by *sections 3935.01 to 3935.17*, inclusive, of the Revised Code." *Ohio Rev. Code § 3935.06*.

[*597] However, rating bureaus themselves rely on cooperation among insurers. Appellants' own characterization is that "[t]he purpose of a rating bureau is to compile the loss experience of many insurers so that individual insurers and the ODI may benefit from a broader database and better predict future losses." Appellants' Reply Br. at 16. If insurers did not cooperate with each other in this data-swapping exercise, rating bureaus would not exist. Of course, the statute does not specifically authorize **[**20]** collusive rate submissions; this is why "the superintendent may review such co-operative activities and practices." *Ohio Rev. Code § 3935.06*. Still, the Code explicitly provides that rating bureaus are legal. *See ibid*. (providing registration requirements for rating bureaus). As such, it contemplates cooperation among insurers in rate-making. A specific provision authorizing such conduct would be redundant.

Section 3935.06, then, "is susceptible of more than one reasonable interpretation." *Jordan, 733 N.E.2d at 605*. Accordingly, we must turn to extrinsic indicia of legislative intent. *See* *Ohio Rev. Code § 1.49*. As the district court noted, before 1953, when Title XXXIX was enacted, § 9592 of the Ohio General Code governed insurance. At the beginning of that statute, the General Assembly wrote: "[t]he purpose of this act is to promote the public welfare by regulating insurance rates to the end they shall not be excessive, inadequate or discriminatory, and to authorize and regulate cooperative action among insurers in rate making and other matters within the scope of this act." OHIO GEN. CODE § 9592-1 (Eff. Dec. 31, 1947). Insurers would not, of course, be liable under the Valentine Act, **[**21]** given this language. The plain intent of the legislature is to allow what the ***antitrust law*** prohibits: coordinated action among market participants in price-setting. Ohio courts are bound to honor such an expressed legislative intent. *See* *State ex rel. Moore Oil Co. v. Dauben, 99 Ohio St. 406, 124 N.E. 232, 234 (Ohio 1919)* (***HN16***[] "Where the lawmaking body declares its own intention in the enactment of a particular law, or defines the sense of the words employed, it is within the exercise of its legislative power, and its own construction of its language should be followed.").

[*12]** The legislature, though, did not include § 9592-1's statement of purpose in the Revised Code. And while it "specifically stated in *Section 1.24* that it did not intend to change the law as heretofore expressed by the section or sections of the General Code," *State v. Kotapish, 171 Ohio St. 349, 171 N.E.2d 505, 507 (Ohio 1960)* (internal punctuation omitted); *see also Ohio Bank & Sav. Co., 411 F.2d 801, 803 (6th Cir. 1969)* (holding that, in light of *Ohio Rev. Code § 1.24*, the legislature did not intend substantive change in law), that savings clause appears to deal only with numbering and minor grammatical changes.[5] The Ohio Supreme Court has not determined **[**22]** how *§ 1.24* applies when language added or deleted would significantly alter parties' rights and obligations.

We need not resolve this question because *§ 1.24* does not apply to Title XXXIX. *Section 3901.01* provides: ***HN17***[] "it is the intent of the general assembly not to change the law as expressed by Title 39 of the Revised Code." *Id*. at *§ 3901.01*. This specific continuation clause is stronger than the general clause in *§ 1.54*, which replaced *§ 1.24*: it is not limited by its terms to language that is "the same as the **[*598]** prior statute." *Id*. at *§ 1.54*. Rather, ***HN18***[] it preserves all of the substantive law in Title XXXIX, regardless of wording. The legislature clearly intended that combinations of insurers not be subject to antitrust scrutiny under § 9592-1; the plain language of *§ 3901.01* preserves insurance law as formerly expressed. The intent of the legislature, then, seems to be that insurers may cooperate in rate-making activities.

The context of the Insurance Code's **[**23]** enactment and other provisions in the Code confirm this conclusion. Before 1944, the Supreme Court treated the business of insurance as outside of interstate commerce. *See Paul v. Virginia, 75 U.S. 168, 183, 19 L. Ed. 357 (1868)* ("Issuing a policy of insurance is not a transaction of commerce."); *New York Life Ins. Co. v. Cravens, 178 U.S. 389, 401, 20 S. Ct. 962, 44 L. Ed. 1116 (1900)* ("The business of insurance is not commerce."). The States, therefore, were able to regulate insurance as they saw fit. At that time, Ohio exempted insurance from antitrust scrutiny because it was not trade, commerce, or a commodity, within the meaning of the Valentine Act. *See State v. Bovee, 6 Ohio N.P. (n.s.) 337, 17 Ohio Dec. 663 (Ohio Com. Pl. 1907)*.

[*13]** *United States v. South-Eastern Underwriters Ass'n, 322 U.S. 533, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*, changed the landscape of insurance regulation. There, the Court held that insurance did qualify as interstate commerce, and thus was subject to the Sherman Act's strictures. In response, Congress passed the McCarran-Ferguson Act. As discussed above, Congress's primary concern was "that cooperative ratemaking efforts be exempt from the antitrust laws." *Royal Drug, 440 U.S. at 221*. However, as President Roosevelt pointed out, "Congress did not intend **[**24]** to permit private rate fixing, which the Antitrust Act forbids, but was willing to permit actual regulation of rates by affirmative action of the States." *Id. at 224* (quoting S. Rosenman, *supra* at 587). Thus, the states had to pass their own laws regulating the business of insurance, lest the Sherman Act apply full-force. *15 U.S.C. § 1012(b)*. In this context, Ohio passed its insurance code, which included § 9592-1. The declaration of intent, then, matches the concerns that animated the McCarran-Ferguson Act—both federal and state legislatures sought to promote cooperation among insurers in rate-making.

Two statutory provisions also support this interpretation. First, ***HN19***[] *§ 3935.10* permits "every insurer . . . [to] exchange information and experience data with . . . insurers . . . in other states and [to] consult with them with respect to rate making and the application of rating systems." *Ohio Rev. Code § 3935.10*. That the Code expressly allows both nationwide data pooling and local rating bureaus where insurers pool information with each other suggests that the legislature contemplated widespread collaboration among insurers in the rate-setting context. Second, ***HN20***[] "[t]he superintendent may **[**25]** review . . . co-operative activities and practices and if . . . he finds that any such activity or practice is unfair, unreasonable, or otherwise inconsistent with such sections, he may issue a written order . . . requiring the discontinuance of such activity or practice." *Id*. at *§ 3935.06*. This remedial procedure is consistent with the intent that insurers cooperate. The superintendent's ability to police is a safeguard against abuse. This power would be unnecessary if private parties could bring antitrust actions against insurers under the Valentine Act.

---

[5] *Section 1.54* replaced *§ 1.24*. It provides: "A statute which is reenacted or amended is intended to be a continuation of the prior statute and not a new enactment, so far as it is the same as the prior statute." *Ohio Rev. Code § 1.54*.

Therefore, applying Ohio principles of statutory construction, we hold that ***HN21***[] *§ 3935.06* permits cooperation among insurers. The question that remains is **[*599]** whether such cooperation nevertheless violates the Valentine Act. The answer is a straightforward "no." ***HN22***[] The Ohio **[***14]** Revised Code's rules of statutory construction provide that, when two statutory provisions are in irreconcilable conflict, "the [specific] provision prevails as an exception to the general provision, unless the general provision is the later adoption and the manifest intent is that the general provision prevail." *Ohio Rev. Code § 1.51*. The General Assembly adopted the Valentine **[**26]** Act in 1898. 1898 Ohio Laws 143. It passed the Insurance Code in 1947. 1947 Ohio Laws 397. There is no indication that the Valentine Act was ever amended, expressly to displace the provisions of the Insurance Code that allow cooperation. Thus, ***HN23***[] the Insurance Code acts as an exception to the Valentine Act. *See Ohio Rev. Code §§ 1.51*, *1.52*.

Appellants' Ohio antitrust claims, then, are not valid. *Section 3935.06* of the Revised Code permits Appellees' allegedly collusive behavior, and so the Valentine Act does not apply. The district court was correct to dismiss these state-law claims.

IV

Although we resolve this appeal based on the analysis above, we acknowledge that the parties briefed and argued another issue: whether the filed-rate doctrine eliminates Appellants' damages claims, and any injunctive claims that would interfere with an already-filed rate. The court below, like most other courts to consider antitrust challenges to title-insurance rate-setting, addressed this issue. *See, e.g., McCray v. Fidelity Nat'l Title Ins. Co., 682 F.3d 229, 235-42 *8 (3d Cir. 2012)*; *In re New Jersey Title Ins. Litig., 683 F.3d 451, 2012 U.S. App. LEXIS 12057, 2012 WL 2149471, at *2-*7 (3d Cir. June 14, 2012)*; *Dolan v. Fidelity Nat'l Title Ins. Co., 365 F. App'x 271, 273-76 (2d Cir. 2010)*; **[**27]** *Winn v. Alamo Title Ins. Co., 372 F. App'x 461, 461 (5th Cir. 2010)*; *In re Pennsylvania Title Ins. Antitrust Litig., 648 F. Supp. 2d 663, 672-86 (E.D. Pa. 2009)*; *McCray v. Fidelity Nat'l Title Ins. Co., 636 F. Supp. 2d 322, 326-34 (D. Del. 2009)*; *see also Coll v. First Am. Title Ins. Co., 642 F.3d 876, 886-891 (10th Cir. 2011)* (holding that New Mexico filed-rate doctrine barred title insurance rate-setting antitrust claim). The sounder approach, however, is to reject Appellants' claims based only on statutory antitrust exemptions, without reference to the filed-rate doctrine.

[*15]** The filed-rate doctrine prevents private parties from recovering antitrust damages based on a rate properly filed with, and approved by, an appropriate regulatory body.[6] *See Square D Co. v. Niagara Frontier Tariff Bureau, 476 U.S. 409, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)*; *Keogh v. Chicago & Northwestern Ry. Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922)* (Brandeis, J.). It deals only with private parties' remedies, and does not, itself, remove actors from all antitrust scrutiny. *See Square D, 476 U.S. at 422 n.28* ("[A] critical distinction remains between an absolute immunity from all antitrust scrutiny and a far more limited nonavailability of the private treble-damages **[**28]** remedy."). By contrast, the McCarran-Ferguson Act bars all federal antitrust actions involving "the business of insurance to the extent that such business **[*600]** is . . . regulated by State law," *15 U.S.C. § 1012(b)*, unless the alleged antitrust violation is an "agreement to boycott, coerce, or intimidate, or [an] act of boycott, coercion, or intimidation." *Id*. at *§ 1013(b)*.[7] Title XXXIX of the Ohio Revised Code, which regulates title insurance, allows concerted action in rate-setting. Accordingly, Appellants have no claim under federal or state law. The filed-rate doctrine's limitation on remedy is irrelevant.[8]

---

[6] The filed-rate doctrine can also bar injunctive relief, if the injunction that plaintiffs seek is no more than a request for a different rate-making decision, *Dolan, 365 F. App'x. at 276*, or if the injunction would force the court to alter an existing rate. The filed-rate doctrine applies in this scenario because it is designed "to protect the exclusive authority of the agency to accept or challenge [rates]." *Town of Norwood, Mass. v. New England Power Co., 202 F.3d 408, 420 (1st Cir. 2000)* (Boudin, J.).

[7] Appellants concede there is no boycott, coercion, or intimidation here.

[8] The district **[**29]** court's opinion illustrates why it is preferable to address antitrust immunity before the filed-rate doctrine. The opinion below offers a thorough discussion of the filed-rate doctrine, culminating in a holding that Appellants' damages claims had to be dismissed, but their injunctive claims might be permissible, as long as those claims did not interfere with established rates. Later, however, the district court dismissed Appellants' claims with prejudice because "the McCarran-Ferguson Act is a

V

The McCarran-Ferguson Act and Title XXXIX of the Ohio Revised Code are complete bars to Appellants' federal and state antitrust claims. In light of this holding, we need not consider whether the filed-rate doctrine applies in this case. We AFFIRM the judgment of the district court, dismissing **[**30]** Appellants' complaint with prejudice.

End of Document

---

complete bar to Plaintiffs' federal antitrust claim . . . [and] [t]he same logic holds true for Plaintiffs' Valentine Act claim." Allowing Appellants to re-plead either cause of action, it wrote, would "be an exercise in futility." This is true. But it also means that the court's discussion of the filed-rate doctrine was unnecessary: the McCarran-Ferguson Act and the Ohio Insurance Code barred the suit wholesale.

High Tek USA, Inc. v. Heat & Control, Inc.

United States District Court for the Northern District of California

July 18, 2012, Decided; July 18, 2012, Filed

Case No.: 12-CV-00805 YGR

Opinion

ORDER GRANTING IN PART AND DENYING IN PART MOTION OF DEFENDANT HEAT AND CONTROL, INC. TO DISMISS THE COMPLAINT WITH LEAVE TO AMEND

Plaintiff High Tek USA, Inc. ("High Tek") brings this antitrust action against Defendant Heat and Control, Inc. ("H&C") alleging unilateral refusal to deal in the aftermarket for packaging and weighing equipment of food packaging and processing materials. Plaintiff alleges seven causes of action: (1) Violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (2) Violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*; (3) Violation of the Robinson-Patman Act, *15 U.S.C. § 13*; and state law claims for (4) Intentional Interference with Contractual Relations; (5) Intentional Interference with Prospective Economic Advantage; (6) Promissory Estoppel; and (7) Unfair, Unlawful and Fraudulent Business Practices in Violation **[*2]** of *California Business and Professions Code § 17200 et seq.*

Defendant has filed a Motion to Dismiss the Complaint on the grounds that this is a garden variety business dispute between a supplier and its former customer that does not implicate federal ***antitrust law***. The Court held oral argument on July 13, 2012.

Having carefully considered the papers submitted, the Complaint, and the argument of counsel, for the reasons set forth below, the Court hereby **GRANTS IN PART** and **DENIES IN PART** the Motion to Dismiss **WITH LEAVE TO AMEND.**

I. BACKGROUND

This case involves access to replacement parts for processing, packaging, and weighing equipment used in food production. The equipment is used to weigh and fill bags, pouches, cans, jars, cartons, cases and trays with a variety of fresh, processed, and frozen foods. H&C is the exclusive North America distributor of scales, equipment and parts manufactured by Ishida Co., Ltd. ("Ishida"). Dkt. No. 1 ("Complaint") ¶ 8. H&C also manufactures food processing and packaging equipment. *Id.* High Tek alleges that its inability to purchase Ishida parts from H&C violates federal antitrust and California state laws.

In 2004, High Tek was founded by two former H&C **[*3]** employees who began servicing food processing and packaging equipment, including scales manufactured by Ishida. *Id.* ¶ 9. In addition to servicing Ishida scales, High Tek sells used scales which it has refurbished and reconditioned. *Id.* ¶ 11. High Tek alleges that its sale of refurbished and reconditioned scales directly competes with H&C's sale of new scales. *Id.* In order to refurbish, recondition, and service Ishida scales, High Tek must purchase Ishida parts from H&C. *Id.* ¶ 12.

Beginning in early 2007, and continuing until December 20, 2011, H&C provided High Tek with a parts account to purchase Ishida parts. *Id.* ¶¶ 14-16. H&C required High Tek to pay a 10-20% markup on all Ishida parts, which is something that other companies who were not in direct competition with H&C were not required to pay. *Id.* ¶ 15. Prior to entering into the parts account, H&C required that High Tek remove language from its catalog that stated something to the effect of "High Tek is the best in the industry." *Id.* ¶ 14. High Tek alleges that it detrimentally relied upon the promise of a long-term parts account and made the requested changes to its catalog. *Id.*

High Tek alleges that on December 20, 2011, soon **[*4]** after H&C and High Tek held tables near each other at an industry trade show, H&C eliminated High Tek's parts accounts without explanation. *Id.* ¶ 16. High Tek then attempted to purchase Ishida parts from Ishida distributors outside of North America and even from Ishida directly, but they all told High Tek that parts could only be purchased in North America from H&C. *Id.* ¶¶ 17-18. High Tek also attempted to purchase parts from third-parties who had initially purchased parts from H&C but H&C thwarted such efforts by threatening the third-parties that they will lose their parts accounts with H&C if they resell parts to High Tek.

High Tek's inability to purchase Ishida parts has halted the company's ability to conduct business. *Id.* ¶ 20. High Tek has contracts, of which H&C is aware, that require it to obtain Ishida parts, but H&C has prevented High Tek from fulfilling its contractual obligations because H&C will not sell it Ishida parts and High Tek has cut off any alternative means to purchase such parts. *Id.* ¶ 20. As a result of H&C's refusal to sell Ishida parts, High Tek has been forced to breach its contracts and turn away business. *Id.* ¶ 20.

II. LEGAL STANDARD

To survive a motion to **[*5]** dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). In the antitrust context, "a court must determine whether an antitrust claim is 'plausible' in light of basic economic principles." *William O. Gilley Enters., Inc. v. Atl. Richfield Co., 588 F.3d 659, 662 (9th Cir. 2009)* (citing *Twombly, supra, 550 U.S. at 556*). Although the court must construe all allegations of material fact in the light most favorable to the plaintiff, "a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, supra, 550 U.S. at 555* (alteration in original). If the allegations in the complaint fail to give rise to a plausible claim for relief, "'this basic deficiency should . . . be exposed at the point of minimum expenditure of time and money by the parties and the court.'" *Id. at 558* (citations omitted).

III. DISCUSSION

A. [*6] COUNT I: SECTION 1 SHERMAN ACT — CONTRACT IN RESTRAINT OF TRADE[1]

As to Count I, alleging a violation of *Section 1* of the Sherman Act, High Tek fails to allege sufficiently each of the required elements of the claim. Liability under *Section 1* of the Sherman Act, *15 U.S.C. § 1*, requires a "contract, combination . . ., or conspiracy, in restraint of trade or commerce." *Twombly, supra, 550 U.S. at 548*.

To state a claim for conspiracy under *Section 1* of the Sherman Act, a plaintiff must plead not just ultimate facts (such as a conspiracy), but evidentiary facts which, if true, will prove: "'(1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce among the several **[*7]** States, or with foreign nations; (3) which actually injures competition.'" *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)* (quoting *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008))*. "[A] conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality" for purposes of *Section 1* of the Sherman Act. *Twombly, supra, 550 U.S. at 567*.

Here, the Complaint identifies H&C's contract with Ishida, which makes H&C the exclusive North America distributor of Ishida parts, but the Complaint does not allege that either H&C or Ishida entered into the contract for the purpose of harming or restraining commerce. Moreover, as to the third element, the Complaint alleges only the ultimate fact that "the [unspecified] way [H&C] executes those contracts in North America unreasonably restrains trade" without providing any evidentiary fact of injury to competition. *See* Complaint ¶ 25. "[T]o withstand a motion to dismiss, 'a section one claimant may not merely recite the bare legal conclusion that competition has been restrained unreasonably.'" *Brantley, supra, 675 F.3d at 1198* (quoting *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507-08 (9th Cir. 1989))*.

Based **[*8]** on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count I **WITH LEAVE TO AMEND.**

B. COUNT II: *SECTION 2* SHERMAN ACT — ILLEGAL MONOPOLY[2]

As to Count II, alleging a violation of *Section 2* of the Sherman Act, Plaintiff fails to plead facts regarding the relevant product market. *Section 2* of the Sherman Act makes it unlawful to monopolize, attempt to monopolize, or combine or conspire to monopolize.

To state a cause of action for the offense of monopoly under *Section 2* of the Sherman Act, a plaintiff must plead: (1) the relevant market that defendant has monopolized; (2) possession of monopoly power in that market; and (3) willful acquisition or maintenance of that power through competitively unreasonable means, rather than as a consequence of a superior product, business acumen, or historic accident. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

---

[1] *15 U.S.C. § 1*. Trusts, etc., in restraint of trade illegal; penalty

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony . . .

[2] *15 U.S.C. § 2*. Monopolizing trade a felony; penalty

> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . .

Charges of **[*9]** monopolization can only be judged in the framework of the relevant market, which has two dimensions: the "relevant geographic market" and the "relevant product market." *Newcal Indus. v. Ion Office Solution, 513 F.3d 1038, 1044 n.3 (9th Cir. 2008)*. While the parties agree that the relevant geographic market is the United States, they differ on the scope of the "relevant product market." In the Complaint, High Tek alleges that the relevant product market is the purchase of Ishida parts. Complaint ¶ 29. In its Opposition Brief, High Tek adds two additional markets: the aftermarket for refurbished Ishida scales and the aftermarket for servicing Ishida scales. H&C argues that the relevant product market is all food processing scales sold in the United States.

High Tek alleges no facts from which it plausibly could be inferred that the relevant product market is the purchase of Ishida parts (the aftermarket for refurbished Ishida scales and/or the aftermarket for servicing Ishida scales) [3] as opposed to all food processing scales sold in the United States. *See Brown Shoe Co. v. United States, 370 U.S. 294, 325-26, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)* ("The outer boundaries of a product market are determined by the reasonable **[*10]** interchangeability of use . . . between the product itself and the substitutes for it."). This infirmity is fatal to its *Section 2* Sherman Act claim. *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* ("where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist."); *see also Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 180, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)* ("Interbrand competition, our opinions affirm, is the 'primary concern of ***antitrust law***.'").

Because High Tek has failed to show a relevant market against **[*11]** which H&C's market power and the alleged anticompetitive effects of its practices can be judged, [4] High Tek has failed to state a *Section 2* Sherman Act claim.

Based on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count II **WITH LEAVE TO AMEND.**

C. COUNT III: VIOLATION OF THE ROBINSON-PATMAN ACT, *15 U.S.C. § 13*

As **[*12]** to Count III for violation of the Robinson-Patman Act, High Tek fails to allege each of the required elements of the claim. The Robinson-Patman Act of 1936, *15 U.S.C. § 13*, forbids price discrimination when it is apt to have an anticompetitive effect. To state a claim for a violation of *Section 2(a)* of the Robinson-Patman Act, a plaintiff must plead four elements: (1) the relevant sales were made in interstate commerce; (2) the products sold were of the same grade and quality; (3) that H&C discriminated in price as between High Tek and another purchaser; and (4) the discrimination had a prohibited effect on competition. *See Texaco Inc. v. Hasbrouck, 496 U.S. 543, 556, 110 S. Ct. 2535, 110 L. Ed. 2d 492 (1990)*. The fourth factor — whether the discrimination had the prohibited effect on competition — requires, *inter alia*, allegations that the price discrimination is between purchasers in direct competition.

The Complaint alleges that "H&C required HIGH TEK to pay a 10-20% markup on all Ishida parts—something other companies who were not in direct competition with H&C were not required to pay." Complaint ¶ 15. Thus, High Tek

---

[3] In its Opposition Brief, High Tek attempts to explain why it believes that Ishida parts is the relevant market. For example, it argues that Ishida equipment is the "premium brand," the "gold standard" of weighing and packaging equipment, that Ishida equipment is utilized by a majority of manufacturers and distributors of packaging equipment. Facts not alleged in the Complaint will not prevent dismissal for failure to state a claim. Without deciding whether these additional facts are sufficient to state a *Section 2* Sherman Act claim, the Court will permit High Tek to amend its Complaint to allege additional facts.

[4] The term "monopolize," as used in the federal antitrust laws, means the power either to obtain, or to maintain, the power to remove or exclude competitors from the field of competition in a particular business or industry. Since H&C is the exclusive distributor of Ishida parts, H&C maintains its so-called monopoly power to purchase Ishida parts because of H&C's contract with Ishida to be the exclusive North American distributor for Ishida parts, not because of any of the alleged anticompetitive behavior. Additionally, High Tek's theory, that because it is a competitor that has been harmed, that H&C has harmed competition does not state a claim under the antitrust laws. "[T]he plaintiff here must allege and prove harm, not just to a single competitor, but to the competitive process, *i.e.*, to competition itself." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*.

alleges that it was *not* in competition with the purchasers who were allegedly the beneficiaries of **[*13]** the price discrimination. As such, the Complaint alleges a price *difference* but not price *discrimination.* Accordingly, High Tek has failed to state a claim for price discrimination under the Robinson-Patman Act.

Based on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count III **WITH LEAVE TO AMEND.**

D. COUNT IV: INTENTIONAL INTERFERENCE WITH CONTRACTUAL RELATIONS

As to Counts IV and V for intentional interference with contractual relations and intentional interference with prospective economic advantage, H&C attacks the merits of the claim but does not address the sufficiency of the allegations in the Complaint. The elements for a cause of action for intentional interference with contractual relations and intentional interference with prospective economic advantage essentially are: (1) the existence of a contract *or* other economic relationship between plaintiff and a third party; (2) the defendant's knowledge of the contract *or* relationship; (3) defendant intended to disrupt the contract *or* relationship through wrongful conduct; (4) the conduct did disrupt the contract *or* relationship; and (5) defendant caused damage. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)*; **[*14]** *Quelimane Co. v. Stewart Title Guaranty Co., 19 Cal. 4th 26, 55, 77 Cal. Rptr. 2d 709, 960 P.2d 513 (Cal. 1998)*; *see also*, Judicial Council of California Civil Jury Instructions (2011 Ed.) *sections 2201*, 2202 and the cases cited therein.

H&C argues that its decision not to sell Ishida parts to High Tek was not wrongful and was justified by competition. At oral argument, counsel for H&C argued that no wrongful act is alleged because the Complaint alleges only legitimate business activity. Counsel also argued that the business tort claims are based upon the antitrust allegation; and since the antitrust claims fail, the business tort claims necessarily fail, as well.

To say that no wrongful conduct is alleged simply ignores the allegations in the Complaint. The wrongfulness is apparent from the allegations of fact: High Tek had contracts with its customers that required it to obtain Ishida parts and H&C knowingly prevented High Tek from performing those contracts by refusing to sell Ishida parts and cutting off access to alternate sources from third parties by threatening to terminate their parts account if they deal with High Tek. Complaint ¶ 20. No additional pleading of wrongfulness is required. Additionally, not every **[*15]** business tort violates federal ***antitrust law***. Thus, a failure to state a Sherman Act violation does not necessitate dismissal of the business tort claims.

As to H&C's argument that its acts were justified by reasonable notions of competition, no such "competition" justification appears on the face of the Complaint. [5] H&C may assert, as an affirmative defense, that its actions were in fact justified (by competition or otherwise) in its Answer. [6] However, without facts in the Complaint alleging

---

[5] H&C relies on the Restatement of Torts to insinuate that it may interfere with High Tek's contracts with impunity so long as the contracts are terminable at-will. *See* H&C's Br. 17 ("because [the Complaint] concerns a matter involving competition between High Tek and H&C, High Tek has no [tortious interference] claim as to its [at-will] contracts"). The Restatement provides that competition does not justify inducing breach of contract where the contract is not terminable at-will. *See* *Restatement (Second) of Torts § 768*, comm. subs. 2 (1979). This does not mean, **[*16]** as Defendant appears to argue, that interference with an at-will contract is always justified by competition. *See* H&C's Br. 17.

The "competition as justification" defense rests solely on the notion that when a contract is terminable at-will, there is only an expectancy of a continuing contractual relationship and therefore, the termination of contractual relations interferes with future relations for which the plaintiff has no legal assurance. Thus, a defendant may plead, as an affirmative defense, that competition justified its acts in inducing breach. On the other hand, when the contract is not terminable at-will, there is greater definiteness of the legal relationship and the defendant is not justified by the mere fact of competition to induce a breach. Accordingly, competition is not a defense to an intentional interference claim where the contract is for a specific term.

[6] Notably, the first line of the opinion on which Defendant itself relied at oral argument (and which is cited in its briefs) provides that: "The *competition privilege is an affirmative defense* to the tort of interference with prospective economic advantage." *San Francisco Design Ctr. Associates v. Portman Companies, 41 Cal. App. 4th 29, 50 Cal. Rptr. 2d 716 (Cal. Ct. App. 1995)* **[*17]** (emphasis added.)

that H&C's allegedly tortious acts were motivated by competition, the defense of justification is not a basis to dismiss the Complaint.

Accordingly, the Court concludes that H&C has failed to identify a pleading defect in High Tek's intentional interference claims. [7]

Based on the foregoing analysis, the Court **DENIES** the Motion to Dismiss Counts IV and V.

E. COUNT VI: PROMISSORY ESTOPPEL

As to Count VI, High Tek fails to state a claim for promissory estoppel because the Complaint alleges that H&C performed the very promise the High Tek seeks to enforce. The elements for a claim of promissory estoppel are: "'(1) the party to be estopped must be apprised of the facts; (2) he must intend that his conduct shall be acted upon, or must so act that the party asserting the estoppel has a right to believe it was so intended; (3) the other party must be ignorant of the true state of facts; and (4) he must rely upon the conduct to his injury.'" *People v. Castillo, 49 Cal. 4th 145, 156 n.10, 109 Cal. Rptr. 3d 346, 230 P.3d 1132 (Cal. 2010)* (quoting **[*18]** *City of Goleta v. Superior Court, 40 Cal. 4th 270, 279, 52 Cal. Rptr. 3d 114, 147 P.3d 1037 (Cal. 2006))*. If the promise sought to be enforced was performed, then the doctrine is inapplicable. *Money Store Inv. Corp. v. S. California Bank, 98 Cal. App. 4th 722, 732, 120 Cal. Rptr. 2d 58 (Cal. Ct. App. 2002)* ("A cause of action for promissory estoppel would be superfluous"). Moreover, because promissory estoppel is an equitable doctrine that provides a substitute for consideration to enforce a promise, if the only claimed reliance is performance of the act bargained for, the doctrine is inapplicable. *See* *Fontenot v. Wells Fargo Bank, N.A., 198 Cal. App. 4th 256, 275, 129 Cal. Rptr. 3d 467 (Cal. Ct. App. 2011)*.

The Complaint alleges that prior to entering into a parts account, H&C required that High Tek remove language from its catalog that stated something to the effect of "High Tek is the best in the industry." Complaint ¶ 14. High Tek alleges that it detrimentally relied upon this promise of a long-term parts account, and made the requested change to its catalog. H&C provided High Tek with a parts account to purchase Ishida parts from early 2007 until December 20, 2011. *Id.* ¶¶ 14-16.

Either adequate consideration was given here, *i.e.*, H&C promised a long-term parts **[*19]** account if High Tek removed certain language from its catalog, or it was rendered moot by H&C's performance of its obligations under the agreement, *i.e.*, H&C granted High Tek a parts account and provided High Tek with Ishida parts for four over years. To the extent that High Tek believes that it was entitled to a longer term contract, to be valid under California law, an agreement not to be performed within a year must be reduced to writing. *See* *Cal. Civ. Code § 1624(a)(1)* (statute of frauds).

Based on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count VI **WITH LEAVE TO AMEND.**

F. COUNT VII: UNFAIR, UNLAWFUL AND FRAUDULENT BUSINESS PRACTICES IN VIOLATION OF *CALIFORNIA BUSINESS AND PROFESSIONS CODE §§ 17200 ET SEQ.*

As to Count VII, for violations of California's Unfair Competition Law ("UCL"), *Cal. Bus. Prof. Code. § 17200*, High Tek claims are based upon its federal antitrust claims. California's UCL statute prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. Prof. Code. § 17200*; *Cel-Tech Comm., Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (Cal. 1999)*. Because High Tek simply borrows from its federal antitrust claims, and because **[*20]** High Tek has failed to adequately plead its antitrust claims, its

[7] In its Reply brief H&C raises the issue that High Tek has not sufficiently specified the parties with whose relationships H&C has interfered. Reply Br. 13. The Court will not consider an argument raised for the first time in a reply memorandum because Plaintiff did not have an opportunity to address this issue.

UCL claim necessarily fails as well. *See Ingels v. Westwood One Broad. Servs., Inc., 129 Cal. App. 4th 1050, 1060, 28 Cal. Rptr. 3d 933 (Cal. Ct. App. 2005)*.

Based on the foregoing analysis, the Court **GRANTS** the Motion to Dismiss Count VII **WITH LEAVE TO AMEND.**

IV. CONCLUSION

For the reasons set forth above, Defendant's Motion to Dismiss is **GRANTED IN PART** and **DENIED IN PART.** Counts I, II, III, VI, and VII are **DISMISSED WITH LEAVE TO AMEND.**

Plaintiff shall have until **August 3, 2012** to file an amended complaint.

This Order Terminates Docket Number 14.

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION (Sealed)

This matter is before the Court upon HomeServices of America's (DN 628), HomeServices of Kentucky's (DN 625), and Coldwell Banker McMahan Company's (DN 633) motions for summary judgment. These matters have been fully briefed and are now ripe for adjudication. For the following reasons, Defendants' motions for summary judgment (DN 628, DN 625, and DN 633) are GRANTED.

I. BACKGROUND

Plaintiffs are sellers of residential real estate in the Commonwealth of Kentucky who paid an allegedly supra-competitive 6% real estate broker commission to one of the defendant real estate companies. Several of the defendants have settled with Plaintiffs and are no longer parties to this action. The remaining Defendants are HomeServices of America, HomeServices of Kentucky, and Coldwell Banker McMahan Company.

Defendant HomeServices of America ("HSA") is a real estate brokerage firm with its principal place of business in Minneapolis, Minnesota. Ronald Peltier Declaration, DN 630-1 at ¶ 3-4. HSA is the parent company to Defendant HomeServices of Kentucky ("HSK"), but does not directly or independently conduct real estate business in Kentucky. *Id.* at **[*6]** ¶ 5-6.

Defendant HSA purchased Paul Semonin Company ("Semonin") in 1999. Brad DeVries Declaration, DN 627-4 at ¶ 3. After that purchase, Semonin continued to do business under its own name in Louisville and Lexington through 2003. *Id.* On April 1, 2003, Defendant HSA purchased Rector Hayden Realtors ("Rector Hayden"). *Id.* at ¶ 4. By 2003, both Semonin and Rector Hayden became owned by HSK. *Id.* Thereafter, HSK has done business in Louisville under the Semonin name and has done business in Lexington under the Rector Hayden name. *Id.*

Defendant McMahan Company, Inc. d/b/a Coldwell Banker McMahan Company ("McMahan Company"), was formed in 1991 as a franchisee of Coldwell Banker Real Estate LLC, which is now owned by Realogy Corporation, previously a defendant in this action. McMahan Depo., DN 633-5 at p. 3; McMahan MSJ Affidavit, DN 633-6 at ¶ 3. McMahan Company grew from two offices in Crestwood and Prospect, Kentucky in 1991 to 12 offices throughout Kentucky and Southern Indiana in 2005. McMahan MSJ Affidavit, DN 633-6 at ¶ 4. Each McMahan Company office has a "managing broker" who is responsible for the overall operation of that office, including marketing, managing expenses, recruiting **[*7]** agents, supervising agents and staff. *Id.* at ¶ 7. Arvel "Jerry" McMahan is the "principal broker" for McMahan Company and is responsible for the company's overall operation. McMahan Depo., DN 633-5 at p. 4; McMahan Affidavit, DN 633-4 at ¶ 4. Mr. McMahan served as a commissioner of the Kentucky Real Estate Commission (KREC) from 1999 to 2007, serving as chairman in 2002 and 2007. McMahan Affidavit, DN 633-4 at ¶ 3.

To better understand Plaintiffs' claim, a basic understanding of the real estate business in Kentucky is helpful. To become a real estate agent in Kentucky, an individual must be licensed by the Commonwealth of Kentucky Real Estate Commission ("KREC"). Second Expert Report of Gary French ("French Report"), DN 639-1 at ¶ 6. Real estate agents often are members of realtors' boards and relators' associations, including the Greater Louisville Association of Realtors (GLAR), the Lexington-Bluegrass Association of Realtors (LB AR), the Kentucky Association of Realtors (KAR), and the National Association of Realtors (NAR). *Id.* at ¶ 12. Ray Rector, the founder of Rector Hayden, was a member of the board of directors for LBAR and KAR and eventually President of the Board of Directors **[*8]** for the LBAR. *Id.* at ¶ 13.

After entering into a listing or selling agreement with a property seller, a listing broker often markets a home by listing it on the Multiple Listing Service (MLS). *Id.* at ¶ 42. A MLS, which is only accessible by licensed brokers and its agents, is a local or regional venture of real estate brokers who pool and disseminate information on homes for sale in their respective geographic areas. *Id.* at ¶ 47. Information in a MLS listing typically includes a detailed description of the home, the asking price, the name of the listing broker, and an offer of compensation to be paid to a cooperating broker or "buyer's broker" who provides a purchaser for the listing. *Id.* at ¶ 48. The MLS allows broker-members and their agents to search the database based on detailed criteria. *Id.* Thus, the MLS is a critical tool in the real estate business.

In 1991, the KREC passed a regulation prohibiting licensed real estate brokers in Kentucky from offering any item or thing of value, including rebates, to induce clients to retain their services ("KREC Rebate Ban"). French Report, DN 639-1 at ¶ 81. In March of 2005, the United States Department of Justice filed suit against the KREC **[*9]** in the Western District of Kentucky alleging that the KREC Rebate Ban violated *Section 1* of the Sherman Act. *Id.* at ¶ 82. That litigation was settled and this Court entered an order on August 4, 2005 requiring the KREC to cease enforcing and abolish the KREC Rebate Ban. *Id.*

In this class action, filed shortly after the KREC Rebate Ban was abolished, Plaintiffs allege that "Defendants combined, conspired and agreed to fix, maintain and inflate real estate broker commissions and associated fees and refuse to compete on the basis of price in transactions in real estate located within the Commonwealth of Kentucky . . ." in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*. DN 261 at ¶ 1. Despite a dramatic increase in the price of real estate and a decrease in the costs of providing real estate brokerage service, "certain Defendants, individually and collectively, have charged a real estate broker commission of 6%, have described this 6% fee as the 'standard' or 'typical' fee, and have habitually refused to negotiate a lower fee." *Id.* at ¶¶ 2-3. "To the extent that any negotiation did occur during the class period, the negotiations began with the supra-competitive industry standard 6% commission as a bench mark **[*10]** and produced a fee that was inflated." *Id.* at ¶ 52. Plaintiffs allege that, "[a]s a direct result of Defendants' aforesaid combination, conspiracy and agreement, Plaintiffs and Class Members have paid an inflated commission that was higher than they would have paid to transact in Kentucky real estate in the absence of Defendants' unlawful agreement." *Id.* at ¶ 13.

According to Plaintiffs' expert Dr. Gary French, the alleged conspiracy has two related elements: (1) fixing the buyer's broker commission at 3%; and (2) fixing the listing commission at a minimum of 6%. French Report, DN 639-1 at ¶ 56. According to Dr. French, due to the visibility of the offered buyer's broker commission on the MLS, those listing brokers not offering at least 3% to the buyer's broker could be detected and policed. *Id.* at ¶ 54. If a listing broker did not offer at least 3% to a buyer's broker, then a buyer's broker would not be interested in showing the property. *Id.* at ¶ 55. In his report, Dr. French lists several instances of "steering" buyers away from discounters in Kentucky. Thus, "'when listing brokers are asked to defend their commission requests [usually six percent or higher], most explain that they 'must' **[*11]** offer buyers brokers a co-op commission at the 'going rate,' e.g. three percent, to avoid the harm [that buyer's agents would not show the property].'" *Id.* at ¶ 56. According to Dr. French, the KREC Rebate Ban helped maintain commission rates at the conspiratorial standard during the Class Period by ensuring that Defendants did not cheat on their price-fixing agreement by providing a rebate or discount off of the stated fee. *Id.* at ¶ 104.

On November 7, 2008, this Court partially granted Plaintiffs' motion for class certification and certified a class consisting of "All persons who paid a commission to Defendants and/or their affiliates . . . in connection with the sale of residential real estate (excluding initial sales of newly constructed homes) located in the Commonwealth of Kentucky during the period from October 11, 2001 to October 11, 2005 . . . ."[1] DN 322.

Defendant HSA now moves for summary judgment, arguing that Plaintiffs have produced no evidence that it was a direct and independent participant in the alleged conspiracy as is required for a parent to be liable for its subsidiary's participation in a horizontal price-fixing conspiracy. Defendants HSK and McMahan Company also **[*12]** move for summary judgment, arguing that Plaintiffs have not produced sufficient evidence to support a finding that Defendants agreed to fix real estate commissions at a supra-competitive level in violation of *Section 1* of the Sherman Act.

II. THE UNDERLYING LEGAL CONCEPTS

Section 1 of the Sherman Act provides that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. "The existence of an agreement is the hallmark of a *Section 1* claim." *In re Baby Food Antitrust Litigation, 166 F.3d 112, 117 (3d Cir. 1999)*. Such an agreement may be found when "the conspirators had a unity of purpose of a common design and understanding, or a meeting of minds in an unlawful arrangement." *American Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*.

In determining whether the concerted action amounts to an unreasonable restraint on trade, courts apply one of two analysis. "Most restraints are evaluated using a 'rule of reason'" under which the "'finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of

[1] The Court denied Plaintiffs' motion to certify a subclass.

factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's **[*13]** history, nature, and effect.'" *In re Cardizem CD Antitrust Litigation, 332 F.3d 896, 906 (6th Cir. 2003)* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. However, other restraints "are deemed unlawful *per se* because they have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit." *Id.* (internal quotations omitted). "The per se approach thus applies a conclusive presumption of illegality to certain types of agreements; where it applies, no consideration is given to the intent behind the restraint, to any claimed pro-competitive justifications, or to the restraint's actual effect on competition." *Id.* (internal quotations and citations omitted).

Here, Plaintiffs have alleged a horizontal price-fixing conspiracy, which occurs "where competitors at the same market level agree to fix or control the prices they will charge for their respective goods or services." *United States v. Brown Univ., 5 F.3d 658, 670 (3d Cir. 1993)*. "Horizontal price-fixing . . . [is] ordinarily condemned as a matter of law under an 'illegal per se' approach because the probability that [this] practice[] [is] anticompetitive is so high." *National College Athletic Ass'n v. Board of Regents, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. Thus, a *per se* approach applies to this action.

III. SUMMARY JUDGMENT STANDARD IN ANTITRUST CASE

Summary judgment is appropriate where "the movant shows that there is no genuine dispute as to any **[*14]** material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. In determining whether summary judgment is appropriate, a court must resolve all ambiguities and draw all reasonable inferences against the moving party. *See* *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

"[N]ot every issue of fact or conflicting inference presents a genuine issue of material fact." *Street v. J. C. Bradford & Co., 886 F.2d 1472, 1477 (6th Cir. 1989)*. The test is whether the party bearing the burden of proof has presented a jury question as to each element in the case. *Hartsel v. Keys, 87 F.3d 795, 799 (6th Cir. 1996)*. The plaintiff must present more than a mere scintilla of evidence in support of his position; the plaintiff must present evidence on which the trier of fact could reasonably find for the plaintiff. *See id.* (citing *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986))*. Mere speculation will not suffice to defeat a motion for summary judgment: "the mere existence of a colorable factual dispute will not defeat a properly supported motion for summary judgment. A genuine dispute between the parties on an issue of material fact must exist to render summary judgment inappropriate." *Monette v. Electronic Data Sys. Corp., 90 F.3d 1173, 1177 (6th Cir. 1996)*.

In the context of an antitrust case, the Supreme Court has explained that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. "[C]onduct as consistent with permissible competition as with **[*15]** illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Id.* "To survive a motion for summary judgment or for a directed verdict, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently." *Id.* (internal quotation marks omitted). This is because mistaken inferences in the context of conduct that is consistent with permissible competition "are especially costly [as] they chill the very conduct the antitrust laws are designed to protect." *Id. at 594*. Thus, Plaintiffs in this case must present evidence which shows that the inference of a conspiracy is reasonable in light of the competing inferences of independent action. *See id.*

IV. ANALYSIS OF THE EVIDENCE OF CONSPIRACY

The Court must now determine whether or not Plaintiffs have presented sufficiently probative evidence to meet the demanding standard of proof in a *§ 1* antitrust case.

a. Direct Evidence

Plaintiffs assert that they have produced direct evidence Defendants conspired to fix prices of real estate commissions in Kentucky. "Direct evidence in a *Section 1* conspiracy must be evidence that is explicit and requires no inferences **[*16]** to establish the proposition or conclusion being asserted." *In re Baby Food Antitrust Litigation, 166 F.3d 112, 118 (3d Cir. 1999)*. Further explaining the sometimes confusing distinction between direct and circumstantial evidence, the Court of Appeals for the Seventh Circuit has explained that direct evidence is "evidence tantamount to an acknowledgment of guilt" while circumstantial evidence includes "everything else *including* ambiguous statements." *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d 651, 662 (7th Cir. 2002)* (emphasis in original).

As direct evidence of a price fixing conspiracy, Plaintiffs rely heavily on a public hearing before the KREC which occurred on November 28, 2000 at the Holiday Inn Hurstboume Lane in Louisville, Kentucky. The purpose of this hearing was to share a survey of inducement laws in other states and to invite comments on the possible repeal of the KREC Rebate Ban. Holiday Inn Transcript, DN 656-13 at p. 14. Both Ray Rector of Rector Hayden and Jerry McMahan of McMahan Company were present and spoke at this hearing. Mr. Rector, who was the fourth person to comment on the KREC Rebate Ban, stated that "When a licensee offers inducements, I question who really pays for them. In my opinion the consumer pays for those inducements in the form of higher fees or a decreased level of service. One **[*17]** of those two things is going to happen I believe . . . So my position is I feel like we should just stay with the law just as it is. *Id.* at p. 26-30.

Mr. McMahan spoke next, and stated in pertinent part as follows:

> I've got two different hats, and the one hat I want to talk to you about first is as a commissioner because I spoke before this group two years ago. I was not a real estate commissioner, and I was speaking as a broker of a company. And since sitting on the commission my views have not changed at all. As a matter of fact, I've gotten more passionate about it because I see what the commissioners are facing on monthly meetings.
>
> Our problem is we're spending too much time at our commissioners' meetings deciding what is an inducement and what's not an inducement. We're spending too much time approving brokers that have got their license in Virginia and running a website throughout the United States and they want to sell properties in Kentucky. They want to list properties in Kentucky, excuse me.
>
> But with the latest convention there's 125 for-sale-by-owner sites that's on the web now that's competing for our business. My competition is not Joe Guy Hagan here in Louisville or Paul Semonin here in **[*18]** Louisville. We go to the same meetings together. Our people are honorable. Our competition is the unknown, and that's the Internet.
>
> You know, people can come across the Internet and take our clients for $499.00 when they can offer them all these services and what have you. There's no contract we can put down to see who the actual agent is. It's someone sitting behind a computer. How do we regulate that? How do we police that?
>
> I think what Buddy said is exactly right. Whether we want to admit it or not there's inducements going on in our companies day in and day out. As a broker I get calls from agents saying, "Can I do this?" What bothers me is the agents that don't call to see if they can do this, the ones that are trying to put that deal together.
>
> In my opinion the most unprofessional thing we can do in this business is cut our commission. I think we ought to be worth what we charge in the services that we offer. However, I think it might be good business if I wanted to offer a home [warranty] to all the buyers that came to my company which gives them extra protection, but I'm not reducing my commission. It's not costing the consumer extra dollars.
>
> . . . I'm being regulated on what I **[*19]** can do to make good business decisions for my company. I don't think that's unprofessional. I think what I'd like to do is have the opportunity to compete against the Joe Guy Hagans, the Paul Semonins, the Rector-Haydens. Let me compete on a good basis with them, and let our business minds flow as to what we can do.
>
> And I don't think inducements in 35 other states says that those states are unprofessional. Thank you.

Id. at p. 30-33. Plaintiffs contend that these comments by Mr. McMahan constituted a "highly improper proposal" and amounted to a pledge not to reduce his commissions.

According to Plaintiffs, because of Mr. McMahan's improper comments regarding commissions, the other real estate brokers present at the public hearing were obligated to protest or make a record of leaving as required by the NAR's antitrust guidelines.[2] DN 656 at p. 15. Instead of doing so, Plaintiffs contend that Doug Myers of Semonin agreed with Mr. McMahan when he later commented in pertinent part as follows:

> My question is how will inducements help the consumer and how will inducements help our profession? I would like to see us equated more with the professionals in our society, the doctors, the lawyers, as opposed to, **[*20]** say, the banks who offer the toaster when you open the account. I'd like to see us do things that elevate our position in society and our image to the public, and I don't see how inducements are going to assist us in doing that.
> . . .
> Much has been said about the Internet and the competition that we see. First off, I am wholeheartedly in favor of competition. I think that competition is good for both us and for the consumer. I'd like to see our competition based on our professional performance, not upon our brokerage fees which along the lines of using — a more professional image I'd like to see is talk about our brokerage fees as opposed to our commission.
> . . .

Id. at p. 38-42. Plaintiffs contend that the comments of Mr. McMahan and Mr. Myers amount to a "meeting of the minds" between McMahan Company and HSK. Plaintiffs further contend that the fact that Rector Hay den had slightly higher commissions during the remainder of the Class Period suffices to supply acceptance by conduct.

As further direct evidence of the alleged conspiracy, Plaintiffs point to a statement written by Todd Smith, the principal broker of MLS Consultants LLC (not a defendant in this action), in response to a KREC survey regarding **[*21]** its Rebate Ban: "[c]ommissions and sales awards are common in all other industries. The bigger wrong being committed by agents and brokers is the informal unspoken price fixing that occurs." French Report, DN 639-1 at ¶ 84. During his deposition, Mr. Smith did not have any specific recollection of why he made that statement, but noted that it was apparently his opinion at the time: "I had the opinion that the majority of people, of brokers were charging a standard commission [that appeared to be 6 to 7%], and that charging a different commission represented a business opportunity for MLS Consultants." Smith Deposition, DN 657-5 at p. 14. He further stated that he did not recall speaking to anyone about price fixing, but "thought it was a large coincidence that everyone charged the same price." *Id.* at p. 15.

Plaintiffs next point to evidence of harassment as direct evidence of the alleged conspiracy. Plaintiffs contend Mr. McMahan's statement at the Holiday Inn KREC public hearing that "the most unprofessional thing we can do in this business is cut our commission" is an example of expressly "haranguing" brokers. Additionally, Plaintiffs point to the affidavit of Barbara Campbell, operator of Campbell Realty **[*22]** in Murray, Kentucky who regularly charged a commission of 4 1/2%, which states that "One of the most glaring examples of how realtors in this area attempted to coerce me into charging 6% commission rates was to contact my clients directly. Realtors in the area would get contact information for my seller clients by looking at the MLS listings. They would then call my clients. They would tell my clients that they, the other realtors in the area, would not show my clients' homes to their buyer clients so long as they continue to do business with Campbell Realty." Yavas Report, DN 639-8 at ¶ 51; Campbell Deposition, DN 657 at p. 70. In her deposition, Ms. Campbell stated that she was "tricked" into signing the affidavit. Campbell Deposition, DN 657 at p. 44. Ms. Campbell then testified that she did not witness those calls herself and that she had never heard of HSK, Rector Hayden, Semonin, or Realogy. *Id.* at p. 72-73. Ms. Campbell further clarified that:

> No, I don't believe they were maintaining a fixed 6% interest rate, because some of them offered 7 at that time. And they were charging 7. I don't ever get to see their commission structures. They don't see my commission

[2] The NAR guideline cited by Plaintiffs states that "A broker who participates in the affairs of an association of Realtors should be alert to discussions at an association meeting relating to commission levels, pricing structures, or marketing practices of other brokers." Ann McDonald Deposition, DN 656-15 at p. 20.

> structures. So I can't tell you **[*23]** what they were trying to do, because I would have to get in their head and you would have to ask them. What my belief was is they were mad at me for charging 4 1/2%, which would stand to reason, because I would be on the other side.

Id. at p. 10-11. Ms. Campbell testified that other realtors did not try to coerce her into charging a 6% commission. *Id.* at p. 11.

Plaintiffs additionally point to statements of other brokers in Kentucky as evidence of harassment. Stephen Gavin, a broker with Home Listing Service, which provided a la carte services for flat fees, testified that a competing agent harassed him about offering only 2% to the buyer's broker and that he subsequently had a potential client steered away from him because "one of the realtors they had interviewed said that we don't pay commissions . . . to the other realtor." Gavin Deposition, DN 657-3 at p. 15-16. However, Mr. Gavin did not remember the name of the agent, the real estate company with which the agent was affiliated, or the year. *Id.* Mr. Gavin eventually changed his policy to offer 3% or more to the buyer's broker. *Id.* Michael Carman, who opened a Help-U-Sell Distinctive Option Realty franchise in Madison County in October 2005, testified that **[*24]** Rick Hayes of Milestone Realty Consultants (which is not a defendant in this case) called him a "scab" because of his business model of flat-fee pricing. Carman Deposition, DN 657-4 at p. 12. He further testified that a "lady" called to confirm that he was only offering 2 1/2% to the buyer's broker on a particular listing and stated that the broker would not allow her to work for 2 1/2%*. Id*. at p. 13. However, Mr. Carman did not remember the agent's name and could only remember that the broker was in Lexington. *Id.* Todd Smith of MLS Consultants, in response to being questioned about whether any of his clients told him that another realtor would not show their property if it had been listed by MLS Consultants, answered that he recalled "being made aware of a situation that sounded like the question you described." Smith Deposition, DN 657-5 at p. 12. However, he did not recall the individuals involved. *Id.*

Finally, Plaintiffs point to an alleged offer of Rector Hayden to fix the buyer's broker fee at 3% as direct evidence of the alleged conspiracy. Ray Rector, in the 1970s, was unhappy with the prevalence of 40/60 commission splits at the time and wrote a letter to the members of the Lexington Bluegrass **[*25]** Association of Realtors saying that, in the future, Rector Hayden would split commission fees 50/50. Additionally, Rector Hayden's Performance Guidelines Manual states: "The policy of this firm is to pay 3% of the sales price to a cooperating Broker/selling side, as long as the other Broker reciprocates on the same basis." DN 654-32 at p. 58. Plaintiffs contend that, because Defendants had a high degree of transactions with 3% buyer's broker fees, they thereby "reciprocated" and agreed to the conspiracy to fix buyer's broker fees.

The Court finds that Plaintiffs have not presented direct evidence that Defendants conspired to fix real estate commissions at a supra-competitive 6%. First, the Court has thoroughly reviewed the transcript of the public hearing at the KREC Holiday Inn and finds no direct evidence of a conspiracy to fix commission rates or to not compete on the basis of price. Plaintiffs, in their response to Defendants' motions for summary judgment, have taken comments out of context and construed them in a highly-strained manner. For example, Plaintiffs contend that Mr. McMahan's use of the term "honorable" is used to describe firms that do not engage in competition and **[*26]** could be viewed as a euphemism for "people like me who don't cut commissions." DN 656 at p. 14. An more plausible reading is that Mr. McMahan used the term "honorable" to refer to full service brokers working in Kentucky as opposed to Internet brokers who "sit[] behind a computer" and "offer [customers] all these services and what have you" and cannot be regulated. The fact that Plaintiffs have manipulated Mr. McMahan's comments in an attempt to show to this Court how the comments made at the public hearing constituted an illegal agreement highly undermines its argument that the transcript provides direct evidence of a conspiracy. Additionally, Mr. McMahan did not suggest that brokers in Kentucky charge the same supra-competitive commission rate or suggest that brokers in Kentucky not negotiate their commissions. Accordingly, the transcript of the KREC public hearing is not "tantamount to an acknowledgement of guilt." *In re High Fructose Corn Syrup Antitrust Litig, 295 F.3d at 662*.

Second, the opinion of Todd Smith regarding the existence of an "unspoken conspiracy to fix prices" is not direct evidence that the defendants in this action illegally conspired to fix prices in violation of *Section 1* of the Sherman Act. Mr. Smith is not a defendant in this action **[*27]** and did not link the defendants in this action to any conspiracy. Thus, Mr. Smith's opinion is not "tantamount to an acknowledgment of guilt." *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d at 662*. Further, Mr. Smith did not any provide any factual basis for his opinion regarding the existence of a conspiracy outside of his perception that it was a "large coincidence" that the majority of brokers in Louisville were charging 6% to 7%. Evidence that Defendants tended to charge the same amount is not direct evidence that Defendants agreed to charge the same amount. Accordingly, Mr. Smith's testimony, even if admissible as a lay opinion, provides no direct evidence of an *illegal agreement* between Defendants in this action.

Third, the evidence of harassment does not provide direct evidence that Defendants in this action conspired to fix prices. Ms. Campbell, Mr. Gavin, Mr. Carman, and Mr. Smith are not defendants in this action and their statements do not implicate Defendants. Indeed, many of the alleged harassers are unknown and unidentified. More importantly, harassment for offering buyer's brokers rates of less than 3% does not constitute direct evidence of a conspiracy to fix full commission rates at 6%. A finder of fact would need to **[*28]** infer that a buyer's broker fee of 3% always resulted in a supra-competitive full commission rate of 6% and that these individuals were therefore harassed for failing to set a full commission rate of 6%. Likewise, the Ray Rector letter offering to split commissions 50/50 is not direct evidence of an offer to fix the full commission rate. A jury would need to infer that a 50/50 split always results in supra-competitive full commission rate. This of course is an unreasonable inference because a 50/50 split on a commission of 2% surely does not mean that the 2% rate is supra-competitive. Accordingly, Plaintiffs have not presented direct evidence that Defendants conspired to fix real estate commissions at a supra-competitive 6%.

b. Circumstantial Evidence

Having determined that Plaintiffs have not presented direct evidence of a conspiracy, the Court must now determine whether Plaintiffs have presented sufficient circumstantial evidence to allow a jury to infer the existence of an illegal agreement to fix prices. "In the absence of direct evidence, the plaintiffs may nevertheless support their claim with circumstantial evidence of conscious parallelism." *In re Baby Food Antitrust Litig., 166 F.3d at 121*. "Conscious parallelism, sometimes **[*29]** called oligopolistic price coordination, is described as the process 'not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a prefixed maximizing, supracompetitive level by recognizing their shared economic interest and their interdependence with respect to price and output decisions.'" *Id.* (quoting *Brooke Group v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993))*. When competitors in a market establish their prices, not by agreement, but rather in a consciously parallel fashion, this may provide probative evidence of an understanding between competitors to fix prices. *Id.*

However, "[i]n an oligopolistic market, interdependent parallelism can be a necessary fact of life but be the result of independent pricing decisions." *Id.* For illustration:

> [I]n a market served by three large companies, each firm must know that if it reduces its price and increases its sales at the expense of its rivals, they will notice the sales loss, identify the cause, and probably respond. In short, each firm is aware of its impact upon the others. Though each may independently decide upon its own course of action, any rational decision must take into account the anticipated reaction of the other two firms. Whenever **[*30]** rational decision-making requires an estimate of the impact of any decision on the remaining firms and an estimate of their response, decisions are said to be "interdependent." Because of their mutual awareness, oligopolists' decisions may be interdependent although arrived at independently.

Id. (quoting Areeda, ***Antitrust Law*** § 1429 (1986)).

Thus, "[t]he law is settled that proof of consciously parallel business behavior is circumstantial evidence from which an agreement, tacit or express, can be inferred but that such evidence, without more, is insufficient unless the circumstances under which it occurred make the inference of rational, independent choice less attractive than that of concerted action." *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)*. As explained above, to survive summary judgment, the circumstantial evidence must tend to exclude the possibility of independent conduct. *Matsushita, 475 U.S at 588*. The Sixth Circuit has listed several important factors to evaluate in this analysis including: (1) whether the defendants' actions, if taken independently, would be contrary to their economic self-interest; (2) product uniformity; (3) whether the defendants have been uniform in their actions; (4) whether the defendants have exchanged or have had the opportunity **[*31]** to exchange information relative to the alleged conspiracy; and (5) whether the defendants have a common motive to conspire or a large number of communications. *Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1009 (6th Cir. 1999)*; *Wallace v. Bank of Bartlett, 55 F.3d 1166, 1168 (6th Cir. 1995)*. Such evidence are described as "plus factors." *Wallace, 55 F.3d at 1168*. Here, plus factors are needed to show that Defendants' conduct in establishing a supra-competitive 6% commission rate was conscious and not the result of independent business decisions. *See id.*

i. Defendants' Parallel Pricing Behavior

Plaintiffs contend that Semonin, Rector Hayden, and McMahan Company engaged in multiple types of parallel pricing behaviors, all following "parallel, artificially standardized systems."

Semonin maintained a Guidelines for Independent Contracts that applied to all of its agents. DN 654-10. With respect to commissions, the policy stated, in pertinent part, as follows:

> **Residential Listings (Louisville and Indiana)**
> Semonin REALTORS commission policy on ALL residential listings is 7%, with the following exceptions:
> ...
> Properties in excess of $1 million — 6% to 7%.
>
> **Sales Commission Splits**
> On all Kentucky properties listing at 7% the listing/sales commission split offered will be 4/3. Semonin will keep 4% and offer 3% to brokers.
> ...
>
> **Residential Listings (Lexington) [*32]**
> Semonin REALTORS commission policy on ALL residential listings in Lexington is 6%, with the following exceptions:
> ...
> Properties in excess of $1 million — 5% to 6%.
>
> **Sales Commission Splits**
> Listing/sales between companies in Kentucky will be on a 50/50 basis.

DN 654-10 at p. 40-41. That policy was in effect until February 2005, when HSK reset its goal listing commission for Semonin at 6%. DeVries Declaration, DN 627-4 at at ¶ 14.

When Rector Hayden was purchased by HSA in 2003, it identified a goal listing commission of 6%. *Id.* at ¶ 15. Rector Hayden maintains a Performance Guidelines Manual. DN 654-32. With respect to commissions, the manual states, in pertinent part, as follows:

> **3. COMMISSION SCHEDULE**
> The minimum commission fee for any listing taken by the office is $1,000.00 or 6%, whichever is higher.
> ...
>
> **6. VARIABLE RATE COMMISSION**
>
> The use of Variable Rate Commission (VRC) is **prohibited** by this firm, verbally or in writing when acting as listing brokers. Variable rate commission is where one amount of commission is payable if the listing agent or our Company sells the property and a different amount of commission is payable if the sale results through the efforts of the seller or a cooperating broker. **[*33]** For example, **you are not to offer**, "The commission is 6%, but if I sell it myself, I will only charge you 5%."
>
> **7. DISCOUNTED COMMISSION SINGLE FAMILY RESIDENTIAL ONLY**

> Rector-Hayden, Realtors strongly discourages discounting commissions. In the rare case . . . if a listing agent chooses to lower his/her commission, the shortfall portion shall be absorbed by the listing agent, with the office and selling agent retaining their regular portion based on the minimum 6% commission. For example, if a listing agent lists a property at a commission of 5 1/2 % the fee will be 5 1/2 % regardless of who sells the property. In this example, the listing agent would absorb the 1/2 %.
>
> ...
>
> **15. COMMISSION PAID TO COOPERATING BROKER/SELLING SIDE**
>
> The policy of this firm is to pay 3% of the sales price to a cooperating Broker/selling side, as long as the other Broker reciprocates on the same basis. In the event a seller is willing to pay more than the normal brokerage fee charged by Rector-Hayden, Realtors, the listing agent is to specify in the listing the amount to be paid to the cooperating Broker/selling side, with a minimum of 3% being offered to the cooperating Broker/selling side.

DN 654-32 at p. 52-58. **[*34]**

Brad DeVries, president and CEO of HSK, states in his affidavit that "Semonin and Rector-Hayden set their pricing and commission policies independently from HomeServices of American and, indeed, independently of one another, even though they were both part of HomeServices of Kentucky after Rector-Hayden's purchase." DeVries Declaration, DN 627-4 at ¶ 22. According to Mr. DeVries, even though HSK companies may have a goal listing commission rate of 6% or 7%, it does not require that its agents charge that rate. *Id.* at ¶ 17. "It often approves, and its agents often charge, listing commission rates below 6%, for a variety of deal-specific reasons such as effective negotiation by the homeowner, the absence of a buyer's agent, the desire to assist in getting a deal done, a personal connection with the client, repeat business from the client or the price of the home. Occasionally, HSK is able to charge more than 6%." *Id.*

McMahan Company has a Policy and Procedures Manual covering its brokers, agents, and employees. With respect to commission rates, McMahan Company's manual states, in pertinent part, as follows:

No commission will be less than 6% on listings without management approval.

> . . . **[*35]** Any concessions made by Associate at closing and not pre-approved by management will be the sole responsibility of the Associate to pay. NO EXCEPTIONS.

Contract	Minimum	Preferred
...		
Resale Residential	6%	7%
...		

> Minimum commission on . . . residential property is $2100. Any exceptions to these commissions must be discussed and approved by management.
>
> If you list a property at 7% you can make the decision to list at 4/3 (4% to listing company/3% to selling company) or 3.5/3.5, but once you list the property in MLS, it cannot be negotiated differently. (That would be considered unfair trade.) You have to treat all equal. However, it is understood beforehand that any inter-company (COLDWELL BANKER McMAHAN) sale will be split according to the amount that is offered on the MLS listing data sheet to the cooperating agent.

DN 633-6 at p. 25. Jerry McMahan, in his affidavit, stated that he alone established this commission policy for McMahan Company. DN 633-6 at ¶ 9. He further stated the basis he relied upon for establishing the commission policy:

> Coldwell Banker McMahan Company's commission policy is based on several business considerations and business judgments made by [him]. One important fact is **[*36]** the cost of doing business, including the resources that Coldwell Banker McMahan Company provides to its agents. Another key factor is establishing a commission rate that I believe reflects the value of the services that Coldwell Banker McMahan agents provide to their clients. The commission policy is also based on my experience in the real estate business. I broke into

> the real estate business my (sic) working for my father in a predecessor company to Coldwell Banker McMahan Company. My father's business used pre-printed forms that contained a 6% commission for homes . . . . When I started working as an agent, many of my listings were at 6%, but I was also able to obtain a number of listings at 7% or 8%. This experience informed my judgment as to what consumers were willing to pay for full-service real estate brokerage.

Id. at If 10.

At McMahan Company, the managing broker of an office had authority to grant approval for variances from the minimum commission levels for agents in their office. DN 633-6 at If 11. Mr. McMahan, as principal broker overseeing all offices, also had authority to approve departures from McMahan Company's commission policy for any office. *Id.* Mr. McMahan, in **[*37]** his affidavit, stated that his decisions to grant or deny requests for departure from the commission policy were based solely on his business judgment about what was in the best interest of the company. *Id.* at ¶ 12. "Coldwell Banker McMahan would often approve lower commissions in order to ensure the success of transactions in which the parties were close, but not in agreement, on economic terms. Another common reason for approval to depart from the commission policy was that Coldwell Banker McMahan was on both sides of a transaction . . ,, *Id.* at ¶ 14. Additionally, Mr. McMahan may approve a departure for repeat clients. *Id.*

In addition to examining Defendants' written policies concerning their respective commissions structures, Plaintiffs' experts analyzed Defendants' actual transaction data during the Class Period. Dr. French found that, for 53.33% of Defendants' transactions, the full commission rate was exactly 6%. French Report, DN 639-1 at p. 59. However, the prevalence of the exact full commission 6% rate varied among Defendants: (1) Semonin charged exactly 6% in 54.93% of its transactions; (2) Rector Hayden charged exactly 6% in 84.58% of its transactions; and (3)n McMahan **[*38]** Company charged exactly 6% in 57.78% of its transactions. *Id.* at Tables la-ld. For 84.08% of Defendants' transactions, the full commission rate fell between 5% and 7%.[3] *Id.* at p. 59. The average weighted commission rates charged by Defendants by year of the Class Period are as follows:

Year	Semonin	Rector Hayden	McMahan
2001	5.92%	-	5.73%
2002	5.93%	-	5.85%
2003	5.91%	5.93%	5.77%
2004	5.81%	5.95%	5.81%
2005	5.89%	5.85%	5.68%

French Report, DN 639-1 at Table 13. Dr. French further found that Defendants offered a buyer's broker commission rate of exactly 3% in 77.08% of their transactions. The prevalence of the 3% buyer's broker rate varied

[3] Plaintiffs maintain that full commission rates between 5% and 7% are consistent with the alleged conspiracy. Defendants charged a full commission rate of exactly 7% in 7.21% of their transactions, as agents were encouraged to obtain full commissions higher than the minimum acceptable commission of 6%. Defendants charged exactly 5% in 12.76% of their transactions during the Class Period. According to Plaintiffs and Dr. Yavas, "one explanation for a 5% commission is the offer of a volume discount off of the 6% standard to a customer who is selling one residence and buying another, and who retains the agent as the listing agent for the residence to be sold and also as the buyer's agent on the residence to be purchased." DN 654 at p. 32-33. Additionally, other discounts may be offered or commissions foregone altogether when agents are buying or selling property for themselves. Also, in some situations, a broker will authorize payment for a repair or improvement of a property by an agent if such a cost is preventing the transaction from closing. *Id.* Dr. Yavas has also presented several reasons for commission rate variations such as policies allowing for friends and relatives to obtain services at reduced commission and savvy home sellers who ask the listing agent to reduce the commission if a buyer comes straight to the firm. However, Plaintiffs maintain that, if the standard were lower, the discounted rate would likewise be lower.

between Defendants, with Rector Hayden having the highest prevalence at 90.49% and McMahan Company having the lowest at 64.98%.

Dr. French found that Defendants' commission rates did not vary to any significant extent with housing prices, as he opines should happen in the absence a pricing conspiracy. DN 639-1. Defendants' data shows that the median home price increased from $98,000 in 2002 to $115,000 in 2005; however, Defendants' average commission rate fell from just 5.78% in 2002 to 5.72% in 2005. Analyzing the data for statistical significance, Dr. French states that the correlation **[*39]** coefficients between the independent variable of a home's selling price and the dependent variable of the commission rate verifies that there is only a weak correlation between the two variables. According to Dr. French, economic theory predicts that commission rates would vary inversely with the selling price of the property.

Furthermore, Plaintiffs point to evidence that Defendants' commission rates for real estate brokerage services did not decline despite declining costs through the Class Period. Dr. French opined that economic theory predicts that, in a competitive brokerage market, commission rates would decrease if brokers' costs declined. However, Semonin's income statements from 1999-2004 show that its expenses declined as a percent of income yet its average commission rates remained stable between 2001 and 2004. *Id.* at ¶¶ 77-80. Additionally, Defendants' expert Dr. Scott agreed that Defendants' costs do not go up linearly with the price of the house. Thus, "while Defendants' brokerage commissions increase proportionately with the increase in the sales price of the house, their costs do not."

Dr. Yavas likewise observed that Defendants' transaction data showed that the median **[*40]** and mode full commission rate was 6%, while the median and mode buyer's broker commission rate was 3%. Yavas Report, DN 639-8 at ¶ 30. Dr. Yavas then compared Defendants' data to data for other cities across the United States to illustrate how, in contrast to Kentucky, other cities saw significant decreases in the proportion of buyer's broker commission rates that were exactly 3% from 2001 to 2005. DN 639-8 at II 32-33. Next, Dr. Yavas analyzed Defendants' transaction data by performing a series of regression analyses to determine the effect of location, year, and transaction price on the full commission rate, the listing commission rate, and the buyer's broker commission rate. DN 639-8 at ¶ 36-37. After finding that these independent variables had little or no effect on Defendants' commission rates, Dr. Yavas explained that this is the opposite of what one would expect in a competitive market. *Id.* at ¶ 41. Dr. Yavas opines that "observing a uniform commission rate across property prices means we are observing different, not the same, commission amounts being charged for properties with different market values. Given the high degree of homogeneity of the brokerage services, uniform **[*41]** commission rate amounts to price discrimination, and contradicts the law of one price, hence is not compatible with price competition." Yavas Supp. Report, DN 651-13 at ¶ 36.

ii. The Existence of Plus Factors

In addition to providing evidence of parallel pricing decision, Plaintiffs have produced evidence of several plus factors which, in their view, tends to exclude the possibility that Defendants acted independently.

1. <u>Actions Contrary to Economic Self-Interest</u>

The existence of actions taken contrary to economic self-interest has been described as one of the most important plus factors, in that such a finding will consistently tend to exclude the likelihood of independent conduct. *Re/Max Intern., Inc. v. Realty One, Inc., 173 F.3d 995, 1009 (6th Cir. 1999)*. However, "Wile concept of 'action against self-interest' is ambiguous and one of its meanings could merely constitute a restatement of interdependence." *In re Baby Food, 166 F.3d at 122*. Plaintiffs contend that they have adduced substantial evidence that Defendants' parallel actions, if taken independently, would be contrary to their economic self-interest.

First, Plaintiffs contend that Defendants acted contrary to their economic self-interest in charging an increasing *amount* of commission (instead of rate) for higher-priced homes. Plaintiffs **[*42]** contend that, if Defendants lowered commissions for higher-price homes, they could gain market share. Plaintiffs thus conclude that, in the absence of collusion, Defendants would not have independently adopted a policy of charging the same commission rate on all transactions.

Second, Plaintiffs contend that Defendants acted contrary to their economic self-interest in refusing to show houses where a listing broker offered less than 3% to the buyer's broker. Plaintiffs point to evidence contained in Dr. Yavas's expert report that buyer's brokers would forego doing business with a listing broker who offered a buyer's broker commission of less than 3% on the MLS, refusing to show suitable properties to their clients in breach of their fiduciary duties to their clients and in derogation of their own financial interest. Dr. Yavas, in his report, offers an example of how such an action would be contrary to self-interest:

> Consider again two properties listed at $100,000 and $600,000. Suppose the offer to the buyer's broker for the first property is 3% while the offer for the second property is only 1%. A buyer's broker would earn $3,000 from selling the first property and $6,000 from selling **[*43]** the second property. If a broker has buyers interested in both properties, why would the broker try hard to sell the first property and avoid selling the second property even though the second property would generate twice as much in commission? Thus, why would a listing broker offer twice as much or even more for the second property . . . ? The only explanation is that there is a credible threat from the buyers' brokers to steer their clients away from properties with less than the 3% commission rate, and such a non-credible threat (because it is not financially rational) can be sustained only through collusion.

DN 639-8 at ¶ 45.

Third, Plaintiffs contend that Defendants refused to involve themselves in For-Sale-By-Owner transactions in derogation of their economic self-interest. As evidence of this, Plaintiffs point to an email from Keith Rector to Shannon Dodd and Lynn Barber sent on February 25, 2005. Keith Rector had received an email from an individual who stated that his house would be for sale by owner (FSBO) and that he is offering 3% to the agent that sells/closes his house and that the agent could act as his agent for the purchase of a new home. Yavas Report, DN 651-13 at **[*44]** ¶ 38. In his email to Ms. Dodd and Ms. Barber, Keith Rector stated: "Ladies, think this is too strong?: Dearest Brent, We all hope you die and rot in hell. Most sincerely, Keith." *Id.* Plaintiffs contend that Rector Hayden thus refused to deal with a FSBO transaction, even though it would have received a 3% commission. Keith Rector, in his deposition, explained that the individual was "not willing to list with us and employ us, but he would like the benefits of our agents trying to sell his home;" thus he "wanted all of our services and exposure for no cost." DN 669-5 at p. 3-4.

2. <u>Product Uniformity</u>

Plaintiffs rely on the homogenous nature of real estate services as a plus factor. Dr. French opined that "the commission for brokerage services does not vary with the tasks done or the specific services actually provided, because the commission is the charge for bringing the seller and a buyer together to make a sale of the property, regardless of which specific tasks and services are provided to achieve the sale. The prices of this homogenous service — selling the property — are largely invariant as a percent of the sales price as shown [in Defendants' data], and cannot be shown to vary **[*45]** to any significant degree with the agent's effort, the selling price of the property, the location or condition of the property, or any other factor." French Supp. Report, DN 639-10 at ¶ 91. Dr. Yavas additionally opines that, "given the homogenous nature of brokerage services, economic theory dictates that the commission amount charged for each transaction should be similar, and thus that the commission rate should decrease proportionately with increases in the selling price." DN 654; Yavas Report, DN 639-8 at ¶ 9, 11-12. However, Plaintiffs' experts opine that Defendants' commission rates did not significantly decline with increases in the selling price.

3. <u>Opportunity to Conspire</u>

As an additional plus factor, Plaintiffs rely upon evidence relating to the structure of the real estate market in Kentucky which make it conducive to collusion. Specifically, Plaintiffs rely upon evidence of Defendants' knowledge of other brokers' commission fees and Defendants' opportunities to conspire as a means to monitor compliance with the agreement and to enforce it.

Plaintiffs contend that brokers' full commission fees were listed on the MLS listing for at least part of the Class Period. Mr. McMahan **[*46]** testified that "back then in our MLS, it told — it showed the total commission and how it was — how it was broke." McMahan Deposition, DN 654-19 at p. 51. Mr. McMahan then stated "That's when NAR, I think came down the directive to all the — all the different state associations and the boards that with agency you only post what's paid to the cooperating agent." *Id.* When asked when this occurred, Mr. McMahan stated that it has probably been since 1999. *Id.* With respect to when the KREC implemented the NAR directive, Mr. McMahan could not remember but stated that it could possibly have been in the early 2000s. *Id.* at p. 52. He then stated that if he wanted to find out, he would probably call Lisa Stephenson to find out. *Id.* Ms. Stephenson, the Executive Director of GLAR, testified that full commission information was not listed at least since she began working there in 1996. Stephenson Deposition, DN 669-2 at p. 5-7.

Plaintiffs further state that the use of the MLS system allowed Defendants to "signal" to other brokers. According to Plaintiffs, after Ray Rector's 50/50 commission split proposal was accepted, the buyer's broker fee of 3% directly and effectively signaled that the 6% fee was being **[*47]** charged by the selling broker. Thus, if a Defendant offered a 3% broker's fee on the MLS listing, others would know that the listing broker was charging a 6% full commission fee. Plaintiffs also contend that Defendants had full access to the commissions charged by other brokers at closings of real estate transaction in which any Defendants or other brokers participated.[4]

Plaintiffs also rely upon Defendants' many meetings and conversations with one another as a manner of sharing confidential information with competitors. Specifically, Plaintiffs point to the testimony of Brad DeVries of HSK regarding the following: (1) communications with other companies — which Mr. DeVries testified were "far outside our local market area" — about charging of a flat administrative fee: (2) discussions of the KREC rule at HSA meetings; (3) acknowledgments that other brokers in the market were charging administrative fees; (4) interactions with Cendant agents; (5) surveillance of HUD statements at closings;[5] and (6) the recruitment of experienced agents from other brokerage companies. DeVries Deposition, DN 654-10.

Plaintiffs also rely upon the deposition testimony of Ray Rector, wherein he stated that **[*48]** brokers tend to discuss commission fees when they get together. In his deposition, when asked about talking to other people from around the country about what the buying broker fee is in other areas, Mr. Rector responded that: "Buying broker fee? I'm sure there's been a conversation. You get two Realtors together, there's going to be a conversation about these subjects, but I don't know specifically how to answer your question." Rector Deposition, DN 654-8 at p. 197. Mr. Rector also testified that he had lunch with George Gans (Semonin Lexington) and met with Susan Fister (Semonin) and Janice Copeland (Re/Max Creative). *Id.* Mr. Rector also served on boards with Mr. McMahan of McMahan Company. Thus, Plaintiffs argue that "from all these contacts and other sources, real estate brokers knew what one another were charging" and there was "an overwhelming opportunity to conspire." DN 656 at p. 36.

4. <u>Common Motive to Conspire</u>

As a second plus factor, Plaintiffs point to evidence that Defendants had a common motive to conspire — to maximize profit.

5. <u>Other Circumstantial Evidence</u>

Finally, Plaintiffs rely upon the DOJ lawsuit regarding the KREC Rebate Ban as circumstantial evidence of the alleged **[*49]** conspiracy. According to Plaintiffs, "By virtue of all the foregoing and the agreements regarding their buyer's broker fee, Defendants had the ability to monitor compliance with an agreement not to compete on the basis of price UNLESS rebates of commissions were made after the closings." DN 654 at p. 28. However, the enactment of the KREC Rebate Ban closed the door on rebates made after or before the HUD-1 closing and made

---

4 The Court assumes Plaintiffs are referring to the federally mandated HUD-1 disclosure forms.

5 Plaintiffs cite to an email from Brad DeVries to Rhonda Benavidez, which states: "We are also looking at the HUD statements for the closings we have on our competitors listings. We are calculating the amount we get, plus the amount they keep, and then coming up with a total. We think that will give us the answer we are looking for (or at least part of it)." DeVries Deposition, DN 654-11 at p. 24.

it more difficult to cheat on the agreement. *Id.* Plaintiffs also rely upon comments made by brokers in Kentucky in response to a KREC survey, which appeared in the DOJ complaint, as circumstantial evidence that Defendants conspired to fix supra-competitive commissions. For example, one unidentified individual stated that repealing the KREC Rebate Ban "would turn into a bidding war, lessen our profits and cheapen our 'so called' profession." Another stated that "If inducements were allowed, they could lead to competitive behavior, which would make us look unprofessional in the eyes of the public." According to Dr. French, "such views are wholly consistent with forming a cartel to fix commission rates at a high level and with enforcing adherence to the high prices." **[*50]** French Report, DN 639-1 at ¶ 84.

iii. Analysis of the Circumstantial Evidence Viewed in its Totality

In evaluating the evidence of an antitrust conspiracy for purposes of ruling on a defendant's motion for summary judgment, courts must be careful not to fall into the trap of concluding that, if no single item of evidence presented by the plaintiffs points unequivocally to conspiracy, then the evidence as a whole cannot defeat summary judgment. *In re High Fructose Corn Syrup Antitrust Litigation, 295 F.3d at 655*. Thus, the Court will examine the circumstantial evidence produced by Plaintiffs in its totality, viewed in a light most favorable to Plaintiffs, to determine whether it supports an inference that Defendants had a conscious commitment to a common scheme designed to achieve an unlawful objective and tends to exclude the possibility that Defendants were acting independently. *See Matsushita, 475 U.S. at 588*.

First, Plaintiffs have produced evidence which, in their view, shows parallel pricing behavior. However, Plaintiffs' evidence of parallel pricing shows merely that each Defendant had a policy of charging a minimum commission of 6% and that each Defendant occasionally deviated from its respective policy for various reasons. The evidence shows that these policies were in **[*51]** effect before the Class Period and were not adopted in response to any meeting or communication between Defendants. Mr. McMahan testified that the rate was 6% when he began working for his father and that his experience informed his judgment as to what consumers were willing to pay for full-service real estate brokerage services. When HSA purchased Semonin, Semonin's policy set a minimum commission of 7% for the Louisville area. When HSK purchased Rector Hayden, Rector Hayden's policy set a minimum commission of 6%. Dr. French testified that "If you tell your agents that you can do it at six percent and most of their rivals are telling six percent, they are not even going to talk about seven percent to their actual customers . . . . So if everybody is generally charging six percent and one of them wants to charge seven percent and sticks to it, then that one is going to be in trouble." French Deposition, at 202:12 - 203:8. The prevalence of the 6% rate, then, is just as consistent with independent pricing decisions. The existence of a conspiracy cannot be inferred solely on the basis that Defendants tended to charge the same amount for their services.

Further, that declining costs did **[*52]** not result in decreasing commission rates is not probative of an illegal agreement to fix prices. The Sixth Circuit has concluded that a price set without regard to a defendant's costs does not require a conclusion that a defendant conspired to set the price. *Wallace, 55 F.3d at 1168-69* (where defendant banks admittedly set fees without regard to cost). *See also Hall v. United Air Lines, Inc., 296 F. Supp. 2d 652, 676 (E.D. N.C. 2003)*, *aff'd sub nom. Hall v. Am. Airlines, Inc., 118 F. App'x 680 (4th Cir. 2004)* ("The price of any good sold to a consumer is the result of many different factors, and the ability to reduce one cost does not mean that a producer can directly pass on that cost reduction in the form of a price reduction for the consumer.").

Evidence that Defendants fixed the buyer's broker commission rate at 3% is not probative of a conspiracy to fix full commission rates at a supra-competitive 6%. Ray Rector's 1970s letter shows only an offer to split commissions 50/50 with cooperating brokers. Nevertheless, evidence relating a 50/50 commission split, the prevalence of 3% buyer's brokers rates, brokers' refusals to show homes which offered a buyer's broker rate of less than 3%, and harassment of those who offered less than 3% are not probative of a conspiracy to fix the prices of full commissions. The Sixth Circuit has unequivocally **[*53]** proclaimed that "setting cooperative sales-commission rates is not price fixing: it has no relation to the amount charged to clients for an agent's services." *Re/Max Intern., 173 F.3d at 1025*. "Rather, cooperative rates constitute incentives for non-listing agents to show the listed property." *Id.* Thus, even if it was necessary for a listing broker to offer a 3% buyer's broker commission to the cooperating broker as an incentive, the listing broker is free to charge his client 4%, 5%, 10%, or even 3% plus a flat fee as Dr. Yavas has suggested may occur in a perfectly competitive market. Yavas Report, DN 639-8 at ¶ 78-79. Accordingly, Plaintiffs' reliance on the 3% buyer's broker rate to show that Defendants' conspired to set a 6% full commission rate is unfruitful.

Second, Plaintiffs have produced evidence which, in their view, shows that Defendants acted contrary to their economic self-interest. Plaintiffs contend that, if Defendants were acting independently, they would reduce the commissions charged on higher-priced homes in order to increase their market share. However, any rational decision on commission rates would take into account the realities of the market and the estimated reaction of other real estate **[*54]** companies. *In re Baby Food Antitrust Litig., 166 F.3d at 121*. Plaintiffs experts and Defendants both agree that real estate brokerage services are inelastic in that the number of property listings does not respond to changes in commission rates. French Report, DN 639-1 at ¶ 100. Because Defendants' services are inelastic, lower commissions will not increase demand. *See* *E.I. du Pont de Nemours & Co. v. F.T.C., 729 F.2d 128, 132 (2d Cir. 1984)* ("Although a manufacturer in an inelastic market can temporarily capture an increased market share by price reductions or secret discounts, the reductions or discounts are usually discovered and met sooner or later by some form of competition by the other producers without increasing the volume of total sales in the market."). If one competitor were to lower its commission rate and gain market share in the short-term, other companies may lower their commission rates in turn to prevent the loss of market share. Thus, "[t]he sole effect of a price reduction in a declining, inelastic market, therefore, is to reduce the industry's total profits." *Id.* In the Louisville market, four defendant entities possessed a combined market share between 53.9% and 68.4% during the Class Period, making it even more likely that Defendants were cognizant of their interdependence. French Report, **[*55]** DN 639-1 at ¶ 94. Accordingly, evidence that Defendants have not decreased their commission rates is not evidence that they acted contrary to their economic self-interest.

Additionally, refusing to show homes where the offered buyer's broker commission fee is less than 3% is not contrary to Defendants' economic self-interest. Plaintiffs and Dr. Yavas use the example of choosing to show a client a $100,000 home with a 3% buyer's broker commission and refusing to show a client a $600,000 home with a 1% buyer's broker commission. Dr. Yavas asks, "why would the broker try hard to sell the first property and avoid selling the second property even though the second property would generate twice as much in commission?" However, Dr. Yavas's question misses the point. Instead of showing a client a $600,000 home with a 1% buyer's broker commission, an agent is likely to show the client another $600,000 home with a 3% buyer's broker commission. This choice, which is consistent with the Sixth Circuit's conclusion that a cooperative sales-commission rate acts as an incentive to the cooperating broker, is completely rational and not against Defendants' independent economic self-interest.

Further, **[*56]** Plaintiffs have not shown that Defendants refused to involve themselves in For-Sale-By-Owner transactions in derogation of their economic self-interests. Plaintiffs have one ambiguous anecdote wherein Rector Hayden expressed its disinterest in dealing with an individual who listed his own home FSBO. There may be several reasons why a defendant would not want to involve themselves in this particular FSBO transaction or others, including the reason explained by Keith Rector that the particular home seller wanted to use Rector Hayden's services without employing them. Additionally, Plaintiffs have not presented any evidence that Defendants systematically refused to participate in FSBO transactions. Thus, this one anecdote does not show that Defendants acted contrary to their economic self-interest.

Third, Plaintiffs have produced evidence that real estate services are homogenous and that the cost of providing real estate services therefore does not increase with the price of the home. Thus, Plaintiffs contend that Defendants' failure to charge decreasing commission rates for higher-priced homes is probative of an illegal conspiracy to fix prices. However, the homogenous nature of real **[*57]** estate services, on its own, provides no evidence to support an inference of collusion. The evidence shows that Defendants' commission rates did decrease by a small, though statistically significant degree, as the price of a home decreased. French Report, DN 639-1 at ¶ 124-125. Semonin's policy also evidenced a lower minimum commission for homes priced higher than $1 million. Nevertheless, charging a standard commission rate across the board and retaining increasing profits from the sale of higher priced homes is consistent with rational business judgment and not probative of an illegal agreement to fix commissions. Indeed, charging a standard rate across the board is common in other industries such as contingent fees charged by attorneys which customarily do not vary based upon the potential recovery. Accordingly, this evidence does not tend to exclude the possibility that Defendants acted independently.

Fourth, Plaintiffs have presented evidence, which in their view, shows Defendants knew the commission rates of other Defendants and had opportunities to conspire. According to Plaintiffs, this enabled Defendants to monitor and enforce the alleged conspiracy. However, awareness of other **[*58]** real estate companies' commission rates does not tend to rule out independent conduct. As an initial matter, the evidence does not support Plaintiffs' contention that, for at least part of the Class Period, the full commission was listed on the MLS. Mr. McMahan testified that he was unsure when this practice stopped, but that Lisa Stephenson would know. Ms. Stephenson testified that the full commission had not been listed at least since 1996. Additionally, that Defendants may learn what their competitors are charging by seeing the listed commission rate on the federally mandated HUD-1 form is not probative of a conspiracy, as there is no evidence that Defendants' used this information to set their own listing commission rates. *See* *In re Travel Agent Commission Antitrust Litig., 583 F.3d 896, 906-07 (6th Cir. 2009)* (finding that publication of pricing information did not exclude the possibility of independent conduct). Additionally, there is no evidence that individuals with pricing authority shared or discussed their respective commission rates. Regardless, "[t]he exchange of price data and other information among competitors does not invariably have anticompetitive effects; indeed such practices can in certain circumstances increase economic efficiency and render markets **[*59]** more, rather than less, competitive." *United States v. United States Gypsum Co., 438 U.S. 422, 443 n. 16, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*.

In *Wallace v. Bank of Bartlett*, the plaintiffs brought an antitrust action against nine banks for fixing the among of fees charged to bank customers. *55 F.3d 1166*. The Plaintiffs in *Wallace* presented evidence that the defendant banks charged essentially the same fee for check written without sufficient funds, and argued that public disclosure of the fees and the failure of the banks to set fees relative to costs were plus factors which showed a *§ 1* violation. *Id. at 1168*. The defendant banks conceded that they did not set their fees in related to costs and admitted that they evaluated the fees charged by other banks when they set fees. *Id. at 1169*. The Sixth Circuit noted that "[t]he [b]anks naturally are interested in surveying the market to determine what other banks are charging in order to make strategic competitive decisions." *Id.* The court concluded that the evidence did not tend to show that the banks conspired to set their fees. Thus, mere awareness of competitors' commissions does not support an inference that Defendants agreed to conspire.

Additionally, mere opportunity to conspire does not, standing alone, support an inference that an illegal agreement existed. *In re Travel Agent Com'n Antitrust Litigation, 583 F.3d at 911*. Although Defendants **[*60]** often communicated and cooperated with one another and often attended the same meetings, "communications between competitors do not permit an inference of an agreement to fix prices unless those communications rise to the level of an agreement, tacit or otherwise." *In re Baby Food, 166 F.3d at 126*. Mere communication and cooperation between brokers does not support an inference of collusion in this case for another important reason. In the real estate market, cooperation between the listing broker and a buyer's broker occurs in the majority of transactions. French Report, DN 639-1 at ¶ 21. Indeed, Mr. French notes that brokers and agents *must* cooperate with one another to facilitate real estate sales. *Id.* at ¶ 92. Additionally, at a closing, which frequently occurs with other broker, the federally-mandated HUD-1 form lists the commissions. Thus, cooperation and communication between Defendants and knowledge of what other brokers charge is just as consistent with independent conduct. Accordingly, such evidence cannot support an inference that Defendants agreed to fix prices.

Plaintiffs argue that comments made at the Holiday Inn public hearing before the KREC go beyond mere communication and support an inference that **[*61]** Defendants agreed not to compete with one another on the basis of commissions.[6] To this end, Plaintiffs contend that Mr. McMahan made an "improper proposal" when he

[6] In addition to arguing that the comments made at the public hearing do not amount to an illegal agreement, Defendants also argue that the comments made at the public hearing are not admissible pursuant to the *Noerr-Pennington* doctrine, which "allows businesses to combine and lobby to influence the legislative, executive, or judicial branches of government or administrative agencies without antitrust or *§ 1983* liability, because the *First Amendment's* right of petition protects such

stated that, "In my opinion the most unprofessional thing we can do in this business is cut our commission. I think we ought to be worth what we charge in the service that we offer." DN 656-13 at p. 31. However, a consideration of Mr. McMahan's comments in the context of the purpose of the public hearing leads to a more benign interpretation: that Mr. McMahan, in expressing his view that relaxing the KREC Rebate Ban and allowing inducements will help brokers compete with the Internet brokers, differentiates between inducements which cut commission rates — which he views as unprofessional — and non-monetary inducements such as home warranties. A plausible inference is that Mr. McMahan thought full service brokers should not compete with the Internet brokers by offering inducements in the form rebates, but should compete with Internet brokers by making their services worth what they charge — whatever that may be. Such a reading is even more likely if one consider previous speakers who commented that inducements are unprofessional, **[*62]** result in decreased levels of services, and allow "faceless, nameless, unqualified people dealing through the Internet to attract you to them, not by anything that they have to offer except what they have to give." Holiday Inn transcript, DN 656-13 at p. 24, 29 (comments of Sue Ernst and Ray Rector). Indeed, Ann McDonald, who was present at the public hearing, testified that she did not interpret Mr. McMahan's comments as "setting commissions." DN 656-15 at p. 22.

Plaintiffs additionally argue that the comments of Doug Myers of Semonin that "I'd like to see our competition based on our professional performance, not upon our brokerage fees" constituted a meeting of the minds between McMahan Company and HSK. DN 656-13 at p. 40. Mr. Myers comments express only his opinion of what he would like to see occur in the future and do not support an inference that HSK agreed with McMahan Company or any other Defendant to establish or maintain supra-competitive real estate commissions. Further, Mr. Myer is an independent contractor of Semonin and Plaintiffs have produced no evidence that Mr. Myers had any authority with respect to the commission rate **[*63]** structure of Semonin. DeVries Deposition, DN 654-11 at p. 15; *see* *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1357 (9th Cir. 1982)* (finding that evidence of sporadic exchanges of shop talk among field sales representatives who lack pricing authority is insufficient to survive summary judgment).

Importantly, Plaintiffs have presented no evidence of any parallel change or impact on Defendants' pricing decisions after any alleged communication or invitation that was made at the KREC public hearing or any other meeting between Defendants. *Compare* *Krehl, 664 F.2d at 1357* (holding that, to survive summary judgment, there must be evidence that the exchanges of information had an impact on pricing decisions), *with* *Interstate Circuit v. United States, 306 U.S. 208, 227, 59 S. Ct. 467, 83 L. Ed. 610 (1939)* ("Acceptance by competitors, without previous agreement, of an invitation to participate in a plan, the necessary consequence of which, if carried out, is restraint of interstate commerce, is sufficient to establish an unlawful conspiracy under the *Sherman Act*"); *In re Delta/AirTran Baggage Fee Antitrust Litigation, 733 F. Supp. 2d 1348, 1361 (N.D. Ga. 2010)* (where Plaintiffs presented evidence that Defendants engaged in collusive communications through earnings calls and industry conferences and then aligned their business practices following the collusive communications); and *Standard Iron Works v. Arcelormittal, 639 F. Supp. 2d 877 (N.D. Ill. 2009)* (finding conspiracy plausible despite lack of direct evidence of collective action **[*64]** where a series of industry meetings attended by steel executives were followed by industry-wide production cuts). Accordingly, the comments made at the Holiday Inn KREC public hearing do not support an inference that an agreement was made by Defendants.

Fifth, Plaintiffs contend that Defendants had a common motive to conspire. However, Defendants' motive to maximize profits cannot support an inference of a conspiracy. "In a free capitalistic society, profit is always a motivating factor in the conduct of a business. Profit is a legitimate motive in pricing decisions, and something more is required before a court can conclude that competitors conspired to fix prices in violation of the Sherman Act." *In*

---

activities." *Knology, Inc. v. Insight Communs. Co., L.P., 393 F.3d 656, 658 (6th Cir. 2004)*. Plaintiffs maintain that Mr. McMahan's and Mr. Myer's comments should be considered by this Court by arguing that the "sham" exception to the *Noerr-Pennington* doctrine is applicable. "Such a 'sham' situation involves a defendant whose activities are not genuinely aimed at procuring favorable government action at all, not one who genuinely seeks to achieve his governmental result, but does so through improper means." *Id. at 658-59* (internal quotation marks omitted). However, because the Court finds that the Plaintiffs' reading of the Holiday Inn transcript is unreasonable, the Court need not determine that applicability of the *Noerr-Pennington* doctrine.

re Baby Food, 166 F.3d at 134-35. If this Court were to find that Defendants' motive to maximize profits supported an inference of an illegal conspiracy, then all businesses would be subject to anti-trust liability.

Lastly, the DOJ lawsuit regarding the KREC Rebate Ban and comments of unidentified brokers on their views of the KREC Rebate Ban cannot support an inference that Defendants conspired to establish and maintain supra-competitive commission rates. Pleadings in a complaint do not constitute evidence. Additionally, **[*65]** the comments of unidentified brokers which appear in the complaint, are inadmissible hearsay. Accordingly, the DOJ lawsuit and pleadings do not support an inference that the Defendants in this conspired to set and maintain supra-competitive commission rates.

The Court has thoroughly reviewed the evidence and finds that Plaintiffs have not presented sufficient evidence to meet the stringent summary judgment standard in *§ 1* antitrust cases. Price-fixing "includes more than the mere establishment of uniform prices." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 222, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. Even assuming Defendants engaged in consciously parallel pricing, Plaintiffs have not produced "evidence that tends to exclude the possibility that the alleged conspirators acted independently." *Matsushita, 475 U.S. at 588*. At most, Plaintiffs have shown that, despite the passage of time and increases in the prices of residential real estate, commission rates in Kentucky have continued to hover around 6%. However, Defendants' establishment and maintenance of a standard 6% commission rate is just as consistent with independent pricing decisions, as each firm rationally would look to what competitors charge and consider competitors' possible reactions in order to make their own strategic competitive decisions. **[*66]** *See Wallace, 55 F.3d at 1169*. Additionally, establishment and maintenance of a 6% commission rate is not contrary to Defendants' independent economic self-interest, but a rational decision based upon the recognition of real estate brokers' interdependence in the inelastic real estate market.

The testimony of Plaintiffs' experts concerning economic theory's predictions of commission structures which would exist in a perfectly competitive real estate market is not sufficient to overcome the insufficiency of Plaintiffs' evidence. Such abstract conclusions, based merely upon "economic theory" and not upon the specific facts of this case, simply do not show that Defendants' commission policies were the result of illegal agreement and not the result of independent decisions based upon a recognized interdependence. Indeed, Dr. Yavas has conceded that "pretty much every market in the United States is a commission rate based on a percentage of the sales price of a home." Yavas Deposition at 370-71.

This is not a case where one defendant announces a change in its pricing and the others quickly follow suit, or a case where a meeting between defendants is immediately followed by a parallel change in the defendants' pricing. **[*67]** *See e.g., In re High Fructose Corn Syrup, 295 F.3d at 658* (after one defendant announced it was raising its prices, the other defendants quickly followed suit and adopted the same pricing structure); *In re Delta/AirTran Baggage Fee Antitrust Litigation, 733 F. Supp. 2d 1348, 1361 (N.D. Ga. 2010)* (where Plaintiffs presented evidence that Defendants engaged in collusive communications through earnings calls and industry conferences and then aligned their business practices following the collusive communications). Additionally, this is not a case where the defendants have acknowledged an "understanding" or "agreement" among one another. *See e.g., In re High Fructose Corn Syrup, 295 F.3d at 662* (where a defendant's manager commented that "we have an understanding within the industry not to undercut each other's prices" and a defendant's handwritten document wondered if new entrants to the market would "play by the rules (discipline)"). Unlike in these cases, the evidence produced here is simply insufficient to support an inference that Defendants conspired to fix the prices of real estate commissions in Kentucky.

Despite a lengthy and exhaustive discovery process, no evidence has been produced which supports an inference that Defendants *agreed* to establish and maintain supra-competitive commission rates. "The existence of an agreement is the hallmark of a *Section 1* claim." *In re Baby Food Antitrust Litigation, 166 F.3d 112, 117 (3d Cir. 1999)*. Because **[*68]** the evidence presented by Plaintiffs is just as consistent with permissible competition, it is therefore is insufficient to meet the stringent standards governing *§ 1* claims and Defendants are entitled to summary judgment.

V. ANALYSIS OF EVIDENCE OF HSA'S DIRECT PARTICIPATION IN CONSPIRACY

Assuming Plaintiffs presented evidence which supported an inference of a conspiracy to fix real estate commissions in Kentucky and tended to exclude the possibility of independent conduct, Defendant HSA contends that it is entitled to summary judgment because Plaintiffs have produced no evidence that HSA directly participated in the alleged conspiracy. In their response to HSA's motion for summary judgment, Plaintiffs put forth three theories under which HSA would allegedly be liable in this action: direct participant liability, alter ego liability, and successor liability. The Court will examine each of these theories.

Because there cannot be a conspiracy between a corporate parent and its subsidiary, *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*, to prevail on its claim against HSA, Plaintiffs "must set forth facts establishing [HSA's] direct and independent participation in the alleged conspiracy." *Id.* at 688 (citing *McCray v. Fidelity Nat'l Title Ins. Co., 636 F.Supp.2d 322, 334 (D.Del.2009)*; *In re Pressure Sensitive Labelstock Antitrust Litig., 566 F.Supp.2d 363, 375-77 (M.D.Pa.2008)*; *Nobody in Particular Presents, Inc. v. Clear Channel Commc'ns, Inc., 311 F.Supp.2d 1048, 1068-69 (D.Colo.2004))*. Plaintiffs contend that the evidence **[*69]** shows HSA "engaged in independent conduct directing and encouraging the anticompetitive conduct of [HSA's] Semonin and Rector-Hayden Divisions" and "directly involved itself in the Kentucky real estate business through its two Kentucky Divisions." DN 652 at p. 6.

In support of this argument, Plaintiffs cite *Nobody In Particular Presents, Inc. v. Clear Channel Communications, Inc., 311 F. Supp. 2d 1048 (D. Colo. 2004)*("*NIPP*"). In *NIPP*, the district court explained that, "If a parent corporation, through its own employees and agents, is directing, controlling, and encouraging a wholly-owned subsidiary's anticompetitive conduct, the subsidiary dare not defy its sole shareholder's policies. To conclude that a parent can direct and require anticompetitive conduct of its subsidiaries, like any principal directing the conduct of an agent, and then escape antitrust liability by hiding behind its separate incorporation is counterintuitive." *Id. at 1069*. The *NIPP* court thus held that "a parent can be considered a competitor in a market where its subsidiary is a participant if, and only if, the parent sufficiently controls, dictates, or encourages the policies of the subsidiary. When the parent controls, directs, or encourages the subsidiary's anticompetitive conduct, the parent engages in sufficient independent **[*70]** conduct to be held directly liable as a single enterprise with the subsidiary under the Sherman Act." *Id. at 1070*.

In *NIPP*, the plaintiff alleged that the parent company coordinated the use of its different subsidiaries to increase the power of its subsidiaries and therefore increase its own power in various markets. *Id.* The record showed that the management of the parent company: (1) "set the vision, strategy, and culture of all subsidiaries" operating its subsidiaries as divisions of the company reporting up to the parent company; (2) controlled the budgets of the subsidiaries by writing most of the checks that the subsidiaries required so that the divisions could not spend money on capital acquisitions; (3) handled the payroll; (4) routinely reviewed staffing level and operating costs and advised local manager on broad policy matters; (5) took responsibility for long-range planning, allocating resources, financial reporting, and controls; (6) coordinated meetings between managers from the different subsidiaries; and (7) created a department to facilitate communication and cooperation between the different subsidiaries. *Id. at 1071-72*. Thus, the district court found that the evidence supported holding the **[*71]** parent company liable.

Plaintiffs argue that HSA's direct participation in the alleged conspiracy is confirmed by business records and emails collected during discovery, fragments of which are set forth in Plaintiffs' response to HSA's motion for summary judgment. This collection of business records and emails shows the following: (1) Rector Hayden and Semonin were sometimes referred to as "divisions;" (2) HSA provided tools and resources to Rector Hayden and Semonin; (3) Rector Hayden and Semonin reported monthly to HSA; (4) HSA was concerned with and involved in Rector Hayden's and Semonin's business strategy; (5) HSA reviewed Rector Hayden's and Semonin's budgets and required reclassification of certain budget items and use of certain accounting principles; (6) HSA required its approval for plans or acquisitions exceeding plans by $50,000; (7) HSA provided various human resources activities and policies for its companies; (8) HSA collected financial data and created protocols to facilitate communication between HSA and its subsidiaries; (9) HSA CEO founded the Realty Alliance — a group of brokers who meet to discuss issues such as business enhancements and strategic planning and **[*72]** to be brought up to date on NAR activities; and (10) HSA would like to look to national relationships to leverage its overall size.

The Court has reviewed these records, and finds no evidence supporting Plaintiffs' argument that HSA controlled or encouraged Semonin or Rector Hayden's alleged anticompetitive conduct. There is no evidence that HSA discussed commission policies with Semonin or Rector Hayden, set commission policies for Semonin or Rector Hayden, or encouraged agreement or consensus on commission policies between the two. Instead, the evidence merely shows circumstances typical of any parent-subsidiary relationship. Without incurring liability, a parent may articulate and formulate general policies and procedures for its subsidiaries, *Doe v. Unocal Corp., 248 F.3d 915, 926 (9th Cir. 2001)*; may coordinate and cooperate and regularly share financial and operating information, *Hopper v. Ford Motor Co. Ltd., 837 F. Supp. 840, 844 (S.D. Tex. 1993)*; may approve its subsidiaries' budgets, *Joiner v. Ryder Sys., 966 F. Supp. 1478, 1485 (C.D. Ill. 1996)*; and may be directly involved in financing and micro-management of its subsidiaries, *Doe v. Unocal Corp., 248 F.3d 915, 927 (9th Cir. 2001)*. Finally, generic references to Semonin and Rector Hayden as "divisions" does not show that HSA controlled the day-to-day operations of these companies and does not establish an alter ego relationship. *Akzona Inc. v. E.I Du Pont De Nemours & Co., 607 F. Supp. 227, 238 (D. Del. 1984)*. In sum, the evidence produced **[*73]** by Plaintiffs does not show HSA directly participated in a conspiracy to fix real estate commissions in Kentucky.

Next, Plaintiffs contend that HSA should be held liable for the alleged conspiracy under an alter ego theory of liability. As an initial matter, Plaintiffs have not pled an alter ego or piercing the corporate veil claim in their Fourth Amended Complaint and cannot now, when faced with summary judgment, assert this new theory of liability. Nevertheless, Plaintiffs have not produced evidence which would justify piercing the corporate veil to hold HSA liable for the alleged actions of Semonin and Rector Hayden. Because "[p]arents of wholly owned subsidiaries necessarily control, direct, and supervise the subsidiaries to some extent," *IDS Life Ins. Co. v. SunAmerica Life Ins. Co., 136 F.3d 537, 540 (7th Cir. 1998)*, the subsidiary's separate existence can be disregarded only where "the parent exercises control, not mere majority of complete stock control, but complete domination, not only of finances, but of policy and business practice . . . so that the corporate entity as to this transaction had at the time no separate mind, will or existence of its own." *Broussard v. Meineke Discount Muffler Shops, Inc., 155 F. 3d 331, 349 (4th Cir. 1998)*. Under Kentucky law, a court may pierce the corporate veil if two elements are present: (1) domination of **[*74]** the corporation resulting in a loss of corporate separateness and (2) circumstances in which continued recognition of the corporation would sanction fraud and promote injustice. *Inter-Tel Technologies, Inc. v. Linn Station Properties, LLC, 360 S.W.3d 152, 165-66 (Ky. 2012)*.

Here, Plaintiffs allege that HSA "refused to produce any documentary evidence showing that its relevant 'subsidiaries' respected basic corporate requirements such as holding regular Shareholder and Board Meetings, promulgating By-Laws and Resolutions, maintaining Minute Books, or requiring its Officers and Directors to know the duties and responsibilities imposed by Kentucky law on the Officers and Directors of a Kentucky Corporation." DN 652 at p. 30. The evidence shows that HSA, Semonin and HSK shared common officers. During the Class Period, two officers of HSA were among the four or more officers of Semonin or HSK. Mr. Peltier, who was the President and CEO of HSA, testified that he was "not sure" if he served as an officer of Semonin (he did) and that he had no "official duties" in his capacity as an HSK officer. Mr. DeVries of HSK testified that HSK convened for one formal meeting a year and stated that HSK maintained no minute books and created no written record of the yearly meeting other than the **[*75]** written consent.

Plaintiffs have produced no evidence that HSA so dominated HSK's finances, business practices, and policies so as to justify piercing the corporate veil. As the Supreme Court has explained, "it is hornbook law that 'the exercise of the 'control' which stock ownership gives to the stockholders ... will not create liability beyond the assets of the subsidiary. That 'control' includes the election of directors, the making of by-laws ... and the doing of all other acts incident to the legal status of stockholders. Nor will a duplication of some or all of the directors or executive officers be fatal." *United States v. Bestfoods, 524 U.S. 51, 61-62, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998)*. Accordingly, even if Plaintiffs pled an alter ego liability claim in their complaint, Plaintiffs have not presented evidence which would support such a claim.

Finally, Plaintiffs argue that HSA should be held liable for the alleged anticompetitive acts of its subsidiary under principles of successor liability. Plaintiffs contend that, after HSA acquired Semonin and Rector Hayden, HSA did not terminate their agreements not to compete on the basis of price but continued those agreements "in full force." However, HSK — which does business as Semonin and Rector Hayden — is still **[*76]** in existence. Thus, Plaintiffs' theory of successor liability does not fit the facts of this case.

In sum, even if Plaintiffs presented sufficient evidence to support an inference that Defendants' conspired to fix real estate commissions in violation of *Section 1* of the Sherman Act, Plaintiffs cannot show that Defendant HSA directly participated in the alleged conspiracy or would be liable under any other theory. Accordingly, Defendant HSA is entitled to summary judgment on this additional ground.

VI. CONCLUSION

For the foregoing reasons, Defendants' motions for summary judgment (DN 628, DN 625, DN 633) are GRANTED. A separate Order consistent with this Opinion shall issue.

Judges: IRION, J.; MCCONNELL, P. J., HALLER, J. concurred.

Opinion by: IRION, J.

Opinion

Edward Racek, M.D., appeals from a judgment against him in his lawsuit against Rady Children's Hospital of San Diego (the Hospital) arising out of the Hospital's staffing decision to assign Racek to fewer primary call shifts and more back-up call shifts in the Hospital's trauma center. As we will explain, we conclude that the trial court properly sustained the Hospital's demurrer to Racek's causes of action alleging violations of antitrust and unfair business practice laws, and that the trial court properly granted summary judgment on Racek's causes of action for breach of oral contract and quantum meruit. Accordingly, we affirm the judgment.

I

FACTUAL AND PROCEDURAL BACKGROUND

The Hospital operates a pediatric trauma center in San Diego. Racek is a board certified general surgeon, who worked in the Hospital's trauma center for over 20 years, but he is not certified as a pediatric surgeon. The Hospital assigns physicians to be on call in the trauma center by assigning them to either **[*2]** a "primary call" shift or a "back-up call" shift. Physicians are compensated for each shift they are on call in the trauma center, with the physician working the primary call shift paid more than the physician working the back-up call shift. According to Racek, the Hospital also has policies (1) permitting only pediatric surgeons to perform trauma surgery, even when a general surgeon is on trauma call; [1] and (2) permitting only pediatric surgeons to be on call to perform general surgery.

In January 2009 Racek filed a complaint against (1) the Hospital; (2) Children's Specialists of San Diego (CSSD), which is a pediatric specialty medical group; and (3) two physicians who worked shifts in the Hospital's trauma center and were members of CSSD — Mary Hilfiker, M.D., and Nicholas Saenz, M.D. Hilfiker was also the director of the Hospital's trauma center with responsibility for coordinating the schedule of physicians to work the primary call and back-up call shifts.

Racek's complaint alleged that in 2003 the former director of the **[*3]** Hospital's trauma center, Dr. Barry LoSasso, orally agreed to provide Racek with at least six to eight primary call shifts per month or at least as many primary call shifts as the busiest primary call doctor. According to Racek, he terminated his position providing trauma care at another hospital to participate in the promised trauma call shifts at the Hospital.

As alleged in the complaint, after Hilfiker replaced LoSasso as director of the Hospital's trauma center, Hilfiker stated in October 2006 that she intended to give preference to pediatric surgeons, instead of general surgeons, when assigning trauma call shifts. The complaint alleged that as a result of the change in policy, Racek's assignment to primary call shifts "decreased to 2.5 to 5 per month," and the assignment of other general surgeons to primary call shifts in the Hospital's trauma center similarly decreased. According to the complaint, while decreasing the assignment of general surgeons to primary call shifts, Hilfiker also increased the assignment of general surgeons to back-up call shifts, with Racek's assignment to back-up call shifts averaging nine per month. Although not explained in the complaint, other documents **[*4]** submitted in connection with a summary judgment motion show that Hilfiker's implementation of these policies on behalf of the Hospital coincided with a review of the certification of the Hospital's trauma program by the American College of Surgeons in February 2006. The review noted that one weakness of the Hospital's trauma program was that "three of the five core surgeons on the trauma panel were general surgeons who took trauma call but did not operate or provide inpatient care," which detracts from continuity of care. The review noted that "[o]nly two of the seven pediatric surgeons take primary trauma call."

The complaint also alleged that it was often the case that the physician assigned to the back-up call shift would end up being required to report to the Hospital for duty when a pediatric surgeon was assigned to the primary call shift. As the complaint explained, this was because pediatric surgeons were allowed to simultaneously be assigned to general pediatric surgery call and would often end up performing general pediatric surgery rather than being able to cover the trauma care duties, necessitating that the physician on the back-up call shift report to the Hospital. Racek **[*5]** alleged that when on back-up call shift, he was to perform primary call duties approximately 74 percent of the time.

Against all of the defendants, the complaint alleged causes of action for (1) antitrust violations under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) [2] and (2) violation of the Unfair Competition Law (*§ 17200 et. seq.*) (the UCL). Against the Hospital alone, the complaint further asserted causes of action for breach of oral contract, and recovery of the reasonable value of services rendered under a theory of quantum meruit. A cause of action against Hilfiker alone alleged intentional interference with prospective economic advantage.

---

[1] Although the record does not specifically describe the duties of a physician on trauma call, we infer that the duties are distinct from performing trauma surgery.

[2] All further statutory references are to the Business and Professions Code unless otherwise specified.

Without granting Racek leave to amend his complaint, the trial court sustained the demurrers filed by each of the defendants to the antitrust and unfair business practices causes of action as well as the cause of action for intentional interference with prospective economic advantage against Hilfiker.

The Hospital filed a motion for summary judgment on the remaining causes of action for breach of oral contract and quantum meruit. The **[*6]** trial court granted the summary judgment motion and entered judgment in favor of the Hospital.

Racek appeals from the judgment in favor of the Hospital, but he has not pursued an appeal as to the other defendants.

II

DISCUSSION

A. *The Trial Court Properly Sustained the Hospital's Demurrer to the Cartwright Act and Unfair Competition Causes of Action*

We first consider Racek's challenge to the trial court's order sustaining the Hospital's demurrer to the causes of action alleging (1) an antitrust conspiracy in violation of the Cartwright Act and (2) violation of the UCL.

1. *Standard of Review*

" 'On appeal from an order of dismissal after an order sustaining a demurrer, our standard of review is de novo, i.e., we exercise our independent judgment about whether the complaint states a cause of action as a matter of law.' " (*Los Altos El Granada Investors v. City of Capitola (2006) 139 Cal.App.4th 629, 650, 43 Cal. Rptr. 3d 434*.) "A judgment of dismissal after a demurrer has been sustained without leave to amend will be affirmed if proper on any grounds stated in the demurrer, whether or not the court acted on that ground." (*Carman v. Alvord (1982) 31 Cal.3d 318, 324, 182 Cal. Rptr. 506, 644 P.2d 192*.) In reviewing the complaint, "we must assume the **[*7]** truth of all facts properly pleaded by the plaintiffs, as well as those that are judicially noticeable." (*Howard Jarvis Taxpayers Assn. v. City of La Habra (2001) 25 Cal.4th 809, 814, 107 Cal. Rptr. 2d 369, 23 P.3d 601*.)

Further, "[i]f the court sustained the demurrer without leave to amend, as here, we must decide whether there is a reasonable possibility the plaintiff could cure the defect with an amendment. . . . If we find that an amendment could cure the defect, we conclude that the trial court abused its discretion and we reverse; if not, no abuse of discretion has occurred. . . . The plaintiff has the burden of proving that an amendment would cure the defect." (*Schifando v. City of Los Angeles (2003) 31 Cal.4th 1074, 1081, 6 Cal. Rptr. 3d 457, 79 P.3d 569*, citations omitted.)

2. *The Cartwright Act Cause of Action*

"The Cartwright Act states that '[e]xcept as provided in this chapter, every trust is unlawful, against public policy and void.' (*§ 16726*.) *Section 16720* defines the term 'trust' as 'a combination of capital, skill or acts by two or more persons' for certain enumerated anticompetitive purposes, including '[t]o create or carry out restrictions in trade or commerce.' (*§ 16720, subd. (a)*.) That prohibition is analogous to the catchall language **[*8]** of *section 1* of the Sherman Act (*15 U.S.C. § 1*), which prohibits '[e]very contract, combination . . . , or conspiracy, in restraint of trade or commerce.' [Citation.] Thus, although the Cartwright Act was not patterned after the Sherman Act [citations], federal case law interpreting the Sherman Act is often a useful aid in interpreting the Cartwright Act [citations]." (*Flagship Theatres of Palm Desert, LLC v. Century Theatres, Inc. (2011) 198 Cal.App.4th 1366, 1374, 131 Cal. Rptr. 3d 519* (*Flagship Theatres*).)

"Under both Cartwright Act and Sherman Act case law, some restraints of trade are treated as per se unlawful, while others are analyzed under the 'rule of reason.' 'In general, only unreasonable restraints of trade are prohibited. [Citation.] However, "there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." [Citation.] Among these per se violations is the concerted refusal to deal with other traders, or, as it is often called, the group boycott. [Citations.]' **[*9]** [Citation.] Under the rule of reason, the challenged conduct is unlawful only if its anticompetitive effects outweigh its procompetitive effects." (*Flagship Theatres, supra, 198 Cal.App.4th at p. 1374*.)

"A cause of action for violation of the Cartwright Act ' " 'must allege (1) the formation and operation of the conspiracy, (2) the wrongful act or acts done pursuant thereto, and (3) the damage resulting from such act or acts.' " ' " (*Chavez v. Whirlpool Corp. (2001) 93 Cal.App.4th 363, 373, 113 Cal. Rptr. 2d 175*.) For "plaintiffs to recover damages for antitrust violations, they 'must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.' " (*Flagship Theatres, supra, 198 Cal.App.4th at p. 1378*.) "[T]he antitrust injury requirement means that an antitrust plaintiff must show that it was injured by the anticompetitive aspects or effects of the defendant's conduct . . . ," and that the plaintiff's " 'loss stems from a competition-*reducing* aspect or effect of the defendant's behavior.' " (*Id. at pp. 1380, 1381*.)

" 'California requires a "high degree of particularity" in the pleading of Cartwright Act **[*10]** violations [citation], and therefore generalized allegations of antitrust violations are usually insufficient. [Citation.] . . . The absence of factual allegations of specific conduct in furtherance of the conspiracy to eliminate or reduce competition makes the complaint legally insufficient.' " (*Marsh v. Anesthesia Services Medical Group, Inc. (2011) 200 Cal.App.4th 480, 493, 132 Cal. Rptr. 3d 660* (*Marsh*).)

Racek's complaint alleged that the Hospital violated the Cartwright Act when it, "by and through Dr. Hilfiker, and CSSD, along with Dr. Saenz, through their interlocking business and personnel [*sic*] relationships . . . effectively conspired against Dr. Racek and other trauma surgeons in order to increase the CSSD's pediatric surgeons' Primary Trauma Call shifts and limit or restrain general surgeons, such as Dr. Racek, from participating in Primary Trauma Call shifts." Racek alleged that this conduct amounted to "a conspiracy to restrain trade and prohibit competition." He further alleged that the conspiracy in violation of the Cartwright Act consisted of "allowing only pediatric surgeons to be on general surgery call duty," "requiring that all trauma surgeries . . . be performed by pediatric surgeons," **[*11]** and "giv[ing] preference to the pediatric surgeons for all surgeries." The purported injury identified in the complaint stemming from this alleged anticompetitive conduct was "substandard care being provided at Children's Hospital" occurring "when pediatric surgeons schedule necessary and emergent surgeries for later times . . . to accommodate pediatric surgeons['] schedules, as opposed to scheduling such surgeries sooner with a general surgeon." The complaint also alleged injury in the form of "restraining Dr. Racek and other general surgeons from performing trauma and general surgeries at [the Hospital]."

The Hospital presented several arguments in support of its demurrer to the Cartwright Act cause of action, among which were that the complaint (1) did not sufficiently allege a conspiracy involving two or more persons and (2) did not identify conduct unreasonably restraining trade or prohibiting competition. As we will explain, both of these arguments have merit.

We first discuss whether the complaint sufficiently alleges a conspiracy involving two or more persons. A violation of the Cartwright Act requires "a combination of capital, skill or acts by two or more persons" for prohibited **[*12]** purposes. (*§ 16720*.) " '[A] combination means a concert of action by individuals or entities maintaining separate and independent interests.' " (*Roth v. Rhodes (1994) 25 Cal.App.4th 530, 543, 30 Cal. Rptr. 2d 706*.) " '[A]n individual acting alone through his agent or a corporation acting alone through its officers is not a combination in restraint of trade proscribed by the statute.' " (*Id. at p. 544*.) "[A] corporation cannot conspire with itself or its agents for purposes of the antitrust laws." (*Kolling v. Dow Jones & Co. (1982) 137 Cal.App.3d 709, 720, 187 Cal. Rptr. 797*.) Because "[c]oordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition . . . ," "officers or employees of the same firm do not provide the plurality of actors imperative for a[n] [antitrust] conspiracy." (*Copperweld Corp. v. Independence Tube Corp. (1984) 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628*.) Therefore, "it is well settled that a complaint for antitrust violations which fails to allege . . . concerted action by separate entities maintaining separate and independent interests is subject to demurrer." (*G.H.I.I. v. MTS, Inc. (1983) 147 Cal.App.3d 256, 266, 195 Cal. Rptr. 211 (G.H.I.I.)*.)

The complaint vaguely refers to a conspiracy involving **[*13]** the "Hospital, by and through Dr. Hilfiker, and CSSD, along with Dr. Saenz" accomplished "through their interlocking business and personnel [*sic*] relationships." As we have described, the complaint identifies the prohibited restraint of trade as consisting of the Hospital's policies preferring pediatric surgeons in certain types of staffing decisions over general surgeons. However, those policies were put in place by the Hospital, and to the extent they include the policy stated by Hilfiker of scheduling fewer general surgeons for primary call shifts, that policy was enacted in her capacity as an agent of the Hospital in her role as its trauma center director. The complaint contains no allegations of how CSSD or Saenz participated in the purported conspiracy or the setting of the Hospital's staffing policies. "General allegations of the existence and purpose of the conspiracy are insufficient and appellants must allege specific overt acts in furtherance thereof." (*Chicago Title Ins. Co. v. Great Western Financial Corp. (1968) 69 Cal.2d 305, 318, 70 Cal. Rptr. 849, 444 P.2d 481*.) As the complaint's specific allegations of participation in the conspiracy are limited to acts by the Hospital and Hilfiker acting as the **[*14]** Hospital's agent, it fails to adequately plead "concerted action by separate entities maintaining separate and independent interests" as required by the Cartwright Act. (*G.H.I.I., supra, 147 Cal.App.3d at p. 266*.) Demurrer was proper on that ground.

The other meritorious basis for demurrer is the complaint's failure to identify conduct unreasonably restraining trade or prohibiting competition in the relevant market. As explained in a persuasive opinion by the federal Seventh Circuit Court of Appeals, "without something more, a staffing pattern dispute at one hospital does not cause an unreasonable restraint of trade within the ambit of the antitrust laws." (*BCB Anesthesia Care v. Passavant Memorial Area Hosp. Ass'n (7th Cir. 1994) 36 F.3d 664, 668, fn. 3* (*BCB Anesthesia*).) "The cases involving staffing at a single hospital are legion. Hundreds, perhaps thousands of pages in West publications are devoted to the issues those circumstances present. Those cases invariably analyze those circumstances under the rule of reason — there is nothing obviously anticompetitive about a hospital choosing one staffing pattern over another or in restricting the staffing to some rather than many, **[*15]** or all. [Citation.] A hospital has an unquestioned right to exercise some control over the identity and number to whom it accords staff privileges. [Citation.] Malpractice concerns, quality of care, market perceptions, cost, and administrative considerations may all impact those decisions. [¶] Those hundreds or thousands of pages almost always come to the same conclusion: the staffing decision at a single hospital was not a violation of *section 1* of the Sherman Act." (*Id. at p. 667*.) [3] "A staffing decision does not itself constitute an antitrust injury. 'If the law were otherwise, many a physician's workplace grievance with a hospital would be elevated to the status of an antitrust action. To keep the antitrust laws from becoming so trivialized, the reasonableness of a restraint is evaluated based on its impact on competition as a whole within the relevant market.' " (*Id. at p. 669*.)

Relying on *BCB Anesthesia*, this court recently explained in the context of a Cartwright Act challenge to a hospital staffing decision that "[b]efore a court will interfere with how one hospital staffs its physician needs, a strong showing would be required that the purpose and effect of the anticompetitive conduct, within the relevant market defined by the plaintiffs, was outside of reasonable professional standards." (*Marsh, supra, 200 Cal.App.4th at p. 499*.) In *Marsh*, the plaintiff anesthesiologist who complained about a hospital's staffing policies did not establish an unreasonable restraint of trade or prohibition on competition because she did not identify any effect on competition

[3] Racek argues that the Hospital and its alleged coconspirators engaged in a "group boycott" of general surgeons or a "horizontal restraint," which under relevant case law constitute per se unreasonable restraints on trade and therefore relieve the court from having to apply a rule of reason analysis to **[*16]** determining whether Racek identified an unreasonable restraint of trade in the relevant market. We disagree. First, Racek has not identified a horizontal restraint, which involves "entities at the same level combining to deny a competitor at their level the benefits enjoyed by the members of the group." (*Freeman v. San Diego Assn. of Realtors (1999) 77 Cal.App.4th 171, 195, fn. 26, 91 Cal. Rptr. 2d 534*.) The Hospital is not at the same level of market structure as Racek because it does not compete with him as a surgeon. Second, the type of "group boycott" that constitutes a per se unreasonable restraint of trade arises when there is an effort "to disadvantage competitors by 'either directly denying or persuading or coercing suppliers or customers to deny relationships the competitors need in the competitive struggle.' . . . In these cases, the boycott often cut off access to a supply, facility, or market necessary to enable the boycotted firm to compete." (*Northwest Stationers v. Pacific Stationery (1985) 472 U.S. 284, 293-294, 105 S. Ct. 2613, 86 L. Ed. 2d 202*, citations omitted.) That is not the situation described by the complaint. Instead, as we have explained, this case involves a hospital's internal staffing decisions, and case law **[*17]** invariably analyzes antitrust challenges to such staffing decisions under a rule of reason analysis rather than finding them to constitute a per se unreasonable restraint on trade. (*BCB Anesthesia, supra, 36 F.3d at p. 667*.)

in either the market for anesthesiologists in area hospitals or the consumer market for patients who use the services of anesthesiologists. (*Id. at pp. 499-500*.)

Here, too, Racek has not identified unreasonable anticompetitive conduct because there is no indication that the Hospital's **[*18]** staffing policies regarding general surgeons and pediatric surgeons effect competition in the market for surgical or trauma care services in the San Diego area, either as to the surgeons who seek to offer their services in that market or the patients who use those services. Racek complains that he and the other general surgeons at the Hospital have been injured, but the Hospital is simply his place of employment, and is not the same as the San Diego area market for general surgical services. Thus, as in *Marsh* and *BCB Anesthesia*, Racek "did not allege . . . the kind of 'facts indicating special circumstances raising antitrust concerns,' with respect to any detrimental effect on competition that caused injury, in excess of [his] own personal business concerns and circumstances." (*Marsh, supra, 200 Cal.App.4th at p. 500*, quoting *BCB Anesthesia, supra, 36 F.3d at p. 668*.) To state a claim under the Cartwright Act for unreasonable restraint of trade, "a complaint must allege 'facts from which injury to market-wide competition can be inferred.' " (*Marsh, at p. 495*.) Racek has failed to plead a claim under the Cartwright Act because he has not identified an injury to market-wide competition **[*19]** sufficient to establish an unreasonable restraint on trade. [4] Demurrer was therefore proper on this ground as well.

Racek briefly argues that the trial court should have granted him leave to amend his complaint to cure the pleading defects identified by the Hospital. However, Racek has made no attempt to explain how he would amend his complaint to address the deficiencies we have noted above. Therefore, we conclude that **[*20]** the trial court properly sustained the demurrer to the Cartwright Act cause of action without leave to amend.

3. *The UCL Cause of Action*

We next consider the order sustaining the demurrer to the cause of action for violation of the UCL. "*Section 17200* . . . defines 'unfair competition' to include 'any unlawful, unfair or fraudulent business act or practice.' The broad scope of the statute encompasses both anticompetitive business practices and practices injurious to consumers. [Citation.] An act or practice may be actionable as 'unfair' under the unfair competition law even if it is not 'unlawful.' " (*Chavez v. Whirlpool Corp. (2001) 93 Cal.App.4th 363, 374, 113 Cal. Rptr. 2d 175*.)

To the extent that Racek bases his UCL claim on the allegation that the Hospital acted *unlawfully* in that it violated the Cartwright Act, that claim is foreclosed by our rejection of the Cartwright Act claim.

Racek also argues that the Hospital has committed an *unfair* act or practice in violation of the UCL. As Racek acknowledges, our Supreme Court has significantly limited the meaning of the term "unfair" in the context of cases where the wrong complained of is anticompetitive conduct. "When a plaintiff who claims to have suffered **[*21]** injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527*.) For the same reason that Racek has not identified an actual violation of the antitrust laws, he also has not identified an incipient violation. Put simply, Racek has not described a threatened injury to competition in any relevant market.

Racek also argues that it was "unfair" for the Hospital to allegedly pay him the compensation for working a back-up call shift on those allegedly excessive instances when he was called to provide trauma care because the pediatric

---

[4] Racek contends that he has identified "serious anti-competitive injury in that the Hospital's acts have resulted in substandard care being offered to the patients of the only designated pediatric trauma center in San Diego County." He is apparently referring to the complaint's allegation that due to the Hospital's purported policy of giving preference to pediatric surgeons for all surgeries and only allowing pediatric surgeons to be on general surgery call duty, surgeries are not scheduled as soon as they would be if general surgeons were allowed to operate. The problem with this argument is that an antitrust claim requires an *injury to competition* in the market, and the alleged provisions of substandard care is not an injury to the competitiveness of the marketplace.

surgeon assigned to the primary call shift was busy performing pediatric surgery. However, that allegation amounts to no more than an individual complaint about the terms of his contract for compensation with the Hospital for working back-up call shift, **[*22]** and is thus not an "unfair" practice within the meaning of the UCL. As our Supreme Court has explained, "the UCL 'is not an all-purpose substitute for a tort or contract action.' [Citation.] Instead, the act provides an equitable means through which both public prosecutors and private individuals can bring suit to prevent unfair business practices and restore money or property to victims of these practices. . . . [T]he 'overarching legislative concern [was] to provide a streamlined procedure for the prevention of ongoing or threatened acts of unfair competition.' " (*Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134, 1150, 131 Cal. Rptr. 2d 29, 63 P.3d 937*.)

We accordingly conclude that the trial court properly sustained the Hospital's demurrer to the UCL cause of action. Further, because Racek has not attempted to explain how he could amend his complaint to state a claim under the UCL, the trial court properly denied leave to amend.

B. *The Trial Court Properly Granted Summary Judgment on the Breach of Oral Contract and Quantum Meruit Causes of Action*

We next consider Racek's challenge to the trial court's order granting summary judgment in favor of the Hospital on the causes of action for breach of oral **[*23]** contract and quantum meruit.

1. *Legal Standards Applicable to Summary Judgment*

Code of Civil Procedure section 437c, subdivision (c) provides that summary judgment is to be granted when there is no triable issue of material fact and the moving party is entitled to judgment as a matter of law. A defendant "moving for summary judgment bears an initial burden of production to make a prima facie showing of the nonexistence of any triable issue of material fact." (*Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 850, 107 Cal. Rptr. 2d 841, 24 P.3d 493* (*Aguilar*).) A defendant may meet this burden either by showing that one or more elements of a cause of action cannot be established or by showing that there is a complete defense. (*Ibid.*)

If the defendant's prima facie case is met, the burden shifts to the plaintiff to show the existence of a triable issue of material fact with respect to that cause of action or defense. (*Aguilar, supra, 25 Cal.4th at p. 849*; *Silva v. Lucky Stores, Inc. (1998) 65 Cal.App.4th 256, 261, 76 Cal. Rptr. 2d 382*.) Ultimately, the moving party "bears the burden of persuasion that there is no triable issue of material fact and that he is entitled to judgment as a matter of law." (*Aguilar, at p. 850*.)

We review a summary **[*24]** judgment ruling de novo to determine whether there is a triable issue as to any material fact and whether the moving party is entitled to judgment as a matter of law. (*Certain Underwriters at Lloyd's of London v. Superior Court (2001) 24 Cal.4th 945, 972, 103 Cal. Rptr. 2d 672, 16 P.3d 94*.) "In practical effect, we assume the role of a trial court and apply the same rules and standards which govern a trial court's determination of a motion for summary judgment." (*Lenane v. Continental Maritime of San Diego, Inc. (1998) 61 Cal.App.4th 1073, 1079, 72 Cal. Rptr. 2d 121*.) "[W]e are not bound by the trial court's stated reasons for its ruling on the motion; we review only the trial court's ruling and not its rationale." (*Gafcon, Inc. v. Ponsor & Associates (2002) 98 Cal.App.4th 1388, 1402, 120 Cal. Rptr. 2d 392*.)

2. *The Cause of Action for Breach of Oral Contract*

Racek alleged that the Hospital entered into an oral contract with him when the former director of the Hospital's trauma center, LoSasso, told Racek that he would be assigned "at least 6 to 8 Primary Trauma Call shifts per month, or at least as many shifts as the busiest Primary Trauma Call doctor." The complaint alleges that the promise was made in 2003. However, in a declaration filed in opposition to the **[*25]** Hospital's summary judgment motion, Racek stated that the promise was made in 2005. According to Racek, the Hospital breached that agreement when Hilfiker became director of the trauma center and assigned Racek to fewer primary call shifts and more back-up call shifts because he was not a pediatric surgeon.

The Hospital moved for summary judgment on the breach of oral contract cause of action on several grounds, one of which was that it was barred by the statute of limitations. As we find that ground to be dispositive of the motion for summary judgment, we will limit our discussion accordingly.

The statute of limitations applicable to a cause of action for breach of oral contract is two years. (*Code Civ. Proc., § 339, subd. (1)*.) Racek filed his lawsuit in January 2009.

In support of its summary judgment motion, the Hospital relied on evidence that Hilfiker became the new director of trauma services and reduced Racek's primary call shifts in 2006, which was more than two years before Racek filed his complaint in 2009. Specifically, the Hospital pointed out that in a response to an interrogatory, Racek stated that "[i]n 2006, Dr. Hilfiker, as the new head of the trauma department, breached **[*26]** the agreement made by Dr. Lo[S]asso, by reducing the number of primary call trauma shifts assigned to Dr. Racek." [5] The breach that Racek identified occurring in 2006 took place more than two years before Racek filed his complaint in 2009, and therefore a cause of action based on that breach is barred by the two-year statute of limitations set forth in *Code of Civil Procedure section 339, subdivision (1)*.

Racek contends that despite the fact that Hilfiker first reduced Racek's primary call shifts in 2006, the two-year statute of limitations does not bar his **[*27]** claim for breach of oral contract for two reasons: (1) the Hospital committed an "ongoing breach" of the oral contract each month it continued to assign him to fewer primary call shifts than LoSasso promised; and (2) the Hospital is estopped from relying on the statute of limitations because up until 2008, Hilfiker's supervisor at the Hospital told Racek that he was "looking into" the situation regarding Racek's shift assignments.

We find no merit to Racek's argument that his action for breach of oral contract is saved from the statute of limitations bar on the ground that the Hospital committed an ongoing breach. "Ordinarily, a cause of action for breach of contract accrues on the failure of the promisor to do the thing contracted for at the time and in the manner contracted." (*Waxman v. Citizens Nat. Trust & Sav. Bank (1954) 123 Cal.App.2d 145, 149, 266 P.2d 48*.) "The limitations period begins to run when the plaintiff possesses a true cause of action, i.e., where events have developed to a point where the plaintiff is entitled to a legal remedy, not merely a symbolic judgment such as an award of nominal damages." (*Marketing West, Inc. v. Sanyo Fisher (USA) Corp. (1992) 6 Cal.App.4th 603, 614, 7 Cal. Rptr. 2d 859*.) **[*28]** In limited circumstances, the nature of the promise is such that the obligation is "continuing, so that each failure to perform results in a new breach, giving rise to a new cause of action." (3 Witkin, Cal. Procedure (5th ed. 2008) Actions, § 522, p. 667.) However, Racek has identified no authority from which we could conclude that an agreement to provide a specific staffing assignment in an ongoing employment relationship is the type of obligation that continually gives rise to a new breach and thus avoids a statute of limitations bar. The only authority that Racek cites is entirely inapposite, as it deals with the accrual of a cause of action for unpaid wages, holding that a distinct cause of action accrues on each payday as a separate failure to pay the specific obligation due for that payday. (*Cuadra v. Millan (1998) 17 Cal.4th 855, 859, 72 Cal. Rptr. 2d 687, 952 P.2d 704*.) In contrast, this case deals with a *single* and *specific* alleged contractual obligation to assign Racek to the primary care shifts promised by LoSasso. According to Racek's own interrogatory responses, the Hospital breached that specific obligation in 2006, and he suffered injury as of that date. Therefore, the cause of action accrued in 2006 **[*29]** and was barred by the statute of limitations by the time the complaint was filed in 2009.

We also reject Racek's contention that the Hospital is estopped from asserting the statute of limitations. As support for his estoppel argument, Racek relies on his declaration, which describes his conversations with Dr. Buzz Kaufman at the Hospital, whom he describes as supervising Hilfiker in her role as the director of the trauma center.

---

[5] This statement is consistent with Racek's complaint, which states that "[s]tarting in or about October 2006, and continuing to the present, [the Hospital] breached the oral agreement" by failing to assign him to the shift promised by LoSasso. It is also consistent with the statement in Racek's declaration that "in October 2006, Dr. Hilfiker announced that she would give preference to pediatric surgeons for primary trauma call shifts," and that according to his review of data beginning in the Fall of 2006, his primary call shifts "decreased to 2.5 to 5 per month," and his back-up call shifts increased to approximately 11 per month.

According to Racek, he met with Kaufman for the first time in the Fall of 2006 regarding his decreased primary call shift assignments. Racek stated in his declaration that Kaufman instructed him to collect data regarding each surgeon's shifts in the trauma center, and that "[s]everal months later" Racek met with Kaufman to review those findings, at which point Kaufman "indicated that he would review my data and otherwise 'look into' the situation." Racek declared that "[a]t some point, in 2008, Dr. Kaufman affirmatively stated to me that the Hospital would not honor Dr. Lo[S]asso's agreement with me regarding my number of primary call shifts."

" ' "Equitable estoppel . . . comes into play only after the limitations period has run and addresses . . . the circumstances **[*30]** in which a party will be estopped from asserting the statute of limitations as a defense to an admittedly untimely action because his conduct has induced another into forbearing suit within the applicable limitations period. [Equitable estoppel] is wholly independent of the limitations period itself and takes its life . . . from the equitable principle that no man [may] profit from his own wrongdoing in a court of justice." ' " (*Lantzy v. Centex Homes (2003) 31 Cal.4th 363, 383, 2 Cal. Rptr. 3d 655, 73 P.3d 517* (*Lantzy*).) Equitable estoppel to rely on the statute of limitations is based on the principle that " ' "[o]ne cannot justly or equitably lull his adversary into a false sense of security, and thereby cause his adversary to subject his claim to the bar of the statute of limitations, and then be permitted to plead the very delay caused by his course of conduct as a defense to the action when brought." ' " (*Ibid.*)

Racek makes very clear that he is not relying on the doctrine of equitable tolling, under which "the limitations period *stops running* during the tolling event, and begins to run again only when the tolling event has concluded." (*Lantzy, supra, 31 Cal.4th at p. 370*.) In contrast, the doctrine of equitable **[*31]** estoppel, on which Racek relies, " ' "comes into play only *after* the limitations period has run." ' " (*Id. at p. 383*, italics added.) If the defendant's misleading conduct ceased before the running of the statute of limitations, and thus did not prevent the defendant from filing suit within the applicable limitations period, the doctrine of equitable estoppel does not apply. (*Vaca v. Wachovia Mortgage Corp. (2011) 198 Cal.App.4th 737, 746, 129 Cal. Rptr. 3d 354*.) Here, Racek has not established that Kaufman continued to "look into" the staffing issue after the date that the statute of limitations bar arose in October 2008. Instead, Racek's declaration vaguely states that "[a]t some point, in 2008," Kaufman stated that the Hospital would not honor the oral agreement allegedly made by LoSasso. Therefore, Racek has not established that the Hospital caused him to wait until after the statute of limitations had expired to file his lawsuit.

Further, Kaufman's statement that he was "looking into" the staffing assignments was not enough to create an equitable estoppel because it was merely a promise to investigate whether an already-existing breach would be cured, with no promise of what the outcome would be. A defendant **[*32]** is equitably estopped from invoking the statute of limitations when it makes representations that "mak[e] it unnecessary to sue." (*Lantzy, supra, 31 Cal.4th at p. 384*.) For instance, estoppel arises where there has been a promise of settlement (*Flintkote Co. v. Presley of Northern California (1984) 154 Cal.App.3d 458, 465, 201 Cal. Rptr. 262*) or when the defendant represents "that all actionable damage has been or will be repaired." (*Lantzy, at p. 384*.) In such instances, a plaintiff may be able to prove — as necessary to establish estoppel — that it has reasonably relied on the defendant's conduct to its detriment. (See *Lantzy, at p. 384* [estoppel requires that "the plaintiff reasonably relies on [the defendant's] representation to refrain from bringing a timely action"].) A statement that Kaufman would "look into" the staffing issue is not a promise of settlement or other promise to redress the alleged contractual breach asserted by Racek. Therefore, it is not a statement sufficient to create the reasonable reliance needed to equitably estop the Hospital from relying on the statute of limitations.

Racek has identified no basis to avoid the statute of limitations from applying to his cause of action for **[*33]** breach of oral contract. Accordingly, we conclude that the trial court properly granted summary judgment on that cause of action.

3. *The Quantum Meruit Cause of Action*

Racek's cause of action for quantum meruit is based on his claim that he should have been paid more for those shifts when he was assigned to a back-up call shift but was called to perform the duties of the primary call doctor because that doctor was busy in surgery. As we will explain, the quantum meruit claim fails because an express contract covers the same subject.

As the Hospital established through the evidence that it submitted in support of its summary judgment motion, the terms of Racek's provision of trauma services for the Hospital were set forth in a written contract which (1) described the duties performed by physicians while on primary call and back-up call and (2) specified the compensation that Racek would be paid when assigned to a primary call shift and a back-up call shift. The essence of Racek's quantum meruit claim is that the compensation for the back-up call shifts provided in his express agreement was insufficient because of the disproportionate number of times that he was called into the hospital **[*34]** to perform trauma center duties when he was on back-up call.

"Quantum meruit is an equitable theory which supplies, by implication and in furtherance of equity, implicitly missing contractual terms. Contractual terms regarding a subject are not implicitly missing when the parties have agreed on express terms regarding that subject." (*Hedging Concepts, Inc. v. First Alliance Mortgage Co. (1996) 41 Cal.App.4th 1410, 1419, 49 Cal. Rptr. 2d 191*.) Thus, "it is well settled that there is no equitable basis for an implied-in-law promise to pay reasonable value when the parties have an actual agreement covering compensation." (*Ibid.*) " 'The reason for the rule is simply that where the parties have freely, fairly and voluntarily bargained for certain benefits in exchange for undertaking certain obligations, it would be inequitable to imply a different liability.' " (*Ibid.*)

Because Racek's express agreement with the Hospital sets forth the compensation he is to receive when assigned to a back-up call shift, he may not bring a cause of action in quantum meruit seeking additional compensation for doing that work. [6]

DISPOSITION

The judgment is affirmed.

WE CONCUR:

McCONNELL, P. J.

HALLER, J.

End of Document

---

[6] In addressing the quantum meruit cause of action in his appellate briefing Racek argues that under the **[*35]** terms of his written agreement with the Hospital, he should have been compensated at the rate applicable to primary call shifts whenever he was on back-up call duty and called to perform the duties of a physician on primary call. However, that argument describes a claim for breach of contract, not a claim for quantum meruit, which, as we have explained, cannot exist when an express contract covers the same subject matter. We have seen no indication in the record that Racek intends to assert a cause of action against the Hospital for breach of his written contract; he has chosen to proceed under a theory of quantum meruit.

Nfinanse, Inc. v. Interactive Communs. Int'l

United States District Court for the Northern District of Georgia, Atlanta Division

July 24, 2012, Decided; July 24, 2012, Filed

CIVIL ACTION NO. 1:11-CV-3728-AT

Reporter
2012 U.S. Dist. LEXIS 203106 *

NFINANSE, INC., Plaintiff, v. INTERACTIVE COMMUNICATIONS INTERNATIONAL, INC., Defendant.

Opinion

ORDER

This matter is before the Court on Defendant Interactive Communications International, Inc.'s ("InComm") Motion to Dismiss Plaintiff's Second Amended Complaint ("SAC") [Doc. 57]. For the reasons stated below, the Court **GRANTS** Defendant's motion in part and **DENIES** in part.

I. STANDARD FOR MOTION TO DISMISS

This Court may dismiss a pleading for "failure to state a claim upon which relief can be granted." *FED. R. CIV. P. 12(b)(6)*. A pleading fails to state a claim if it does not contain allegations that support recovery under any recognizable legal theory. 5 CHARLES ALAN WRIGHT & ARTHUR R. MILLER, FEDERAL PRACTICE & PROCEDURE § 1216 (3d ed. 2002); *see also* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. In considering a *Rule 12(b)(6)* motion, the Court construes the pleading in the non-movant's favor and accepts the allegations of facts **[*2]** therein as true. *See* *Duke v. Cleland, 5 F.3d 1399, 1402 (11th Cir. 1993)*. The pleader need not have provided "detailed factual allegations" to survive dismissal, but the "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In essence, the pleading "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). "Plausibility is the key, as the well-pled allegations must nudge the claim across the line from conceivable to plausible." *Jacobs v. Tempur-Pedic Intern., Inc., 626 F.3d 1327, 1333 (11th Cir. 2010)* (quoting *Sinaltrainal v. Coca-Cola Co., 578 F.3d 1252, 1261 (11th Cir. 2009)* (quoting *Twombly, 550 U.S. at 570*)) (internal quotation marks omitted).

II. BACKGROUND

A. Background on the GPR Card Industry

Plaintiff nFinanSe is a company that sells general purpose reloadable prepaid cards ("GPR cards"). (SAC ¶ 14.) GPR cards function like traditional debit cards but are not tied to a customer's bank account. (SAC ¶ 16.) Instead, GPR cards are available for purchase at retail outlets like the convenience stores Dollar General and Cumberland Farms. (*Id.* ¶¶ 14, 16.) Customers fund their cards with a desired amount of money and use their cards to make purchases from participating merchants, withdraw **[*3]** money from ATMs and buy goods or services online or by phone. (*Id.*) Cardholders can also pay a fee to reload their cards when they deplete their original deposit. (*Id.*)

The GPR card market currently generates approximately $100 billion in annual revenue. (*Id.* ¶ 1.) The market features a number of horizontal competitors, including InComm, nFinanSe, NetSpend, PayPal and Green Dot. (*Id.* ¶¶ 19, 21.) These various card providers compete on fees ranging from an initial card purchase fee to individual transaction fees to card reload fees. (*Id.* ¶ 18.) Providers also compete on "card features, overall quality, and customer service." (*Id.*)

nFinanSe has made its mark on the GPR card industry by "charging the lowest overall prices in the industry." (*Id.* ¶ 22.) For example, nFinanSe charges $3.00 for a card purchase and $2.95 for a card reload. (*Id.*) By contrast, Green Dot charges a reload price of $4.95. (*Id.* ¶ 64.)

In order to gain access to retailers, GPR card providers like nFinanSe rely on "national distributors to place GPR cards in retail chains." (*Id.* ¶ 24.) These distributors are responsible for processing card activation, (*id.*), offering "a suite of GPR cards" featuring a centralized "point-of-sale **[*4]** technology platform" (*id.* ¶ 26), and determining the placement of GPR cards on retailers' shelves (*id.* ¶¶ 68-69). Retailers have an incentive to deal with only a single national distributor because "1) retailers typically desire to minimize the amount of activation technology in their stores . . . and 2) retailers are often precluded from accepting GPR cards from multiple distribution sources due to an exclusivity agreement with a distributor." (*Id.*; *see also id.* ¶ 26.) Since the nascent years of the GPR card market, individual card providers have found it increasingly difficult to compete with the more efficient national distributors and establish direct distribution deals with retailers. (*Id.* ¶ 27.)

Two companies currently dominate the GPR card distribution market. (*Id.* ¶ 28.) InComm, the defendant in this case, "is the nation's and the world's largest distributor of prepaid cards." (*Id.*) InComm distributes GPR cards to approximately 150,000 retail locations in the United States, including the country's largest grocery, big box and convenience stores. (*Id.*) InComm's largest competitor in the GPR card distribution market is Blackhawk, Inc., a subsidiary of Safeway, Inc. and the country's **[*5]** second-largest GPR card distributor. (*Id.*)

In addition to its role as a GPR card distributor, Defendant InComm is also a GPR card provider. (*Id.* ¶ 2.) The company offers the "Mio" GPR card, which competes directly with cards offered by nFinanse in the GPR card market. (*Id.*) InComm also offers its own "reload packs," which customers use to reload their GPR cards at retail outlets. (*Id.*) These reload packs also compete with similar packs offered by nFinanSe and other competing GPR card providers. (*Id.*) The Mio card has "higher overall fees" than nFinanSe's GPR card. (*Id.* ¶ 2.)

B. nFinanSe's GPR Card Distribution Agreements

In September 2007, nFinanSe was looking for a way to break into the GPR card market. Recognizing that it needed a distributor to help bring its product to retail, nFinanSe signed a distribution agreement with InComm ("the Discover Contract"). (*Id.* ¶ 29.) Under the terms of the agreement, InComm would distribute nFinanSe's Discover-branded GPR card, "providing card issuance and activation services, and assisting with marketing." (*Id.*) The contract provided that InComm would "use commercially reasonable efforts and proceed in good faith to execute the agreement, test the **[*6]** product and launch the Program." (*Id.*) The contract pertained only to nFinanSe's Discover-branded cards because nFinanSe was only offering Discover-branded cards at the time of execution. (*Id.*)

Shortly after signing its distribution contract with InComm, and in an effort to grow its GPR card business, nFinanSe sought and was granted authorization to provide Visa-branded GPR cards. (*Id.* ¶ 32.) In October 2009, nFinanSe Chief Executive Officer Jerry Welch met with InComm President and CEO Brooks Smith to inquire whether InComm would be willing to distribute nFinanSe's Visa-branded cards in addition to its Discover-branded cards. (*Id.* ¶ 33.) According to nFinanSe's Second Amended Complaint, Smith responded "Jerry, if the retailers want your Visa product, then we [InComm] are going to give it to them." (*Id.*) nFinanSe refers to this conversation as the "Visa Amendment" to the Discover Contract. (*Id.*)

nFinanSe and InComm later confirmed the details of the Visa Amendment in a series of e-mails from October and November 2009. (*Id.*) The relevant e-mails state that "any retailer wanting to offer nFinanSe's GPR cards must submit a written request to InComm, which InComm would approve on a case-by-case basis." (*Id.* ¶ 36.) nFinanSe **[*7]** contends that the "case-by-case" qualifier was designed to "prevent InComm from distributing nFinanSe's GPR cards, at nFinanSe's behest, to stores that did not want them." (*Id.*) nFinanSe then alleges that the "case-by-case" provision was also designed to protect InComm, namely, by insuring against a promise from nFinanSe "that InComm would begin card distribution with insufficient lead time for InComm to be ready to proceed." (*Id.*) However, the provision was not designed to allow InComm to refuse retailer requests for nFinanSe's Visa-branded GPR card. (*Id.*) Instead, as an amendment to the Discover Contract, the Visa Amendment incorporated the Discover Contract's provision that "InComm *shall* arrange for and coordinate account management and maintenance functions *at those InComm Retailer locations which notify InComm in writing that they intend to participate in the Program*." (*Id.* ¶ 37.)

nFinanSe pleads that the Visa Amendment "was a valid written amendment that added distribution of nFinanSe's Visa GPR cards to the Discover Contract." (*Id.* 34.) nFinanSe pleads in the alternative that the Visa Amendment was "a new written contract . . . for the distribution of nFinanSe's Visa-branded GPR cards pursuant to the terms of the Discover Contract." (*Id.* ¶ 35.) **[*8]** nFinanSe argues that the Visa Amendment was for a two-year term. (Pl.'s Resp. at 24.) The manner in which the parties contracted for the distribution of nFinanSe's Visa-branded GPR cards "was not an unusual industry practice." (*Id.* ¶ 41.)

Following the parties' execution of the Visa Amendment in October 2009, InComm began distribution of nFinanSe's Visa-branded GPR card to retailers across the country. (*Id.* ¶ 38.) InComm conducted its distribution "in the same manner under the Visa Amendment as the Discover-branded GPR cards had been (and continue to be) distributed under the Discover Contract." (*Id.* ¶ 38.) InComm also indicated that it intended to fulfill the Visa Amendment in late 2010 when it charged nFinanSe $65,000 for warehouse security upgrades required by Visa. (*Id.* ¶ 39.)

In addition to its distribution agreement with InComm, nFinanSe entered into a distribution contract with Coinstar E-Payment Services, Inc. in July 2009 ("the Coinstar Discover Contract"). (*Id.* ¶ 42.) Like nFinanSe's original contract with InComm, the Coinstar agreement also pertained only to nFinanSe's Discover-brand GPR cards. As it had with InComm, however, nFinanSe would later amend its contract with Coinstar to include distribution of nFinanSe's Visa-brand GPR cards, as well ("the Coinstar Visa Amendment"). **[*9]** (*Id.* ¶ 43.) Coinstar agreed "that the distribution of nFinanSe's Visa-branded cards would be covered by the same Coinstar Discover Contract governing distribution of nFinanSe's Discover-branded cards." (*Id.*) The amendment was later confirmed in writing and thereby constituted either a valid written amendment to the Coinstar Discover Contract, (*id.* ¶ 44), or a new written agreement for the distribution of nFinanSe's Visa-branded cards (*id.* ¶ 45).

InComm acquired Coinstar's e-payment business in May 2010. (*Id.* ¶ 47.) The acquisition meant that InComm had assumed the Coinstar Discover Contract and the Coinstar Visa Amendment. (*Id.*)

C. The Vanilla Reload Network

Just as nFinanSe was beginning to introduce its Visa-branded GPR cards, it was contacted by InComm about participating in InComm's new Vanilla Reload Network ("the Network"). (*Id.* ¶ 48.) The Network was touted as a centralized GPR card reload method that consumers could use to reload their cards, regardless of the brand of GPR card they had originally purchased. (*Id.* ¶ 55.) Network participants would no longer have to offer individual reload packs; instead, all consumers using Network-participating GPR cards could reload their cards at one centralized retail location using a single reload **[*10]** technology. The Network would also offer "expanded opportunities for distributing" a participating company's GPR cards. (*Id.* ¶ 48.) nFinanSe has alleged that the true purpose of the Network was to reduce competition among GPR card providers and advantage InComm's Mio card. (*Id.* ¶ 23.)

At a September 2010 meeting, InComm relayed information regarding the Network to nFinanSe. (*Id.*) In particular, InComm stated that it would require all GPR card companies participating in the Network to charge a uniform reload fee of $3.95, (*id.* ¶ 56), a full $1 more than nFinanSe's $2.95 reload fee (*id.* ¶ 49). InComm indicated at a meeting in early summer 2011 that the terms it was offering to nFinanSe to join the Network were the same terms it was offering to other GPR card providers. (*Id.* ¶ 57.) nFinanSe viewed the Network's mandatory pricing schedule as excessive and as an anti-competitive market manipulation and therefore declined to join. (*Id.* ¶ 49.) nFinanSe also objected to the Network's exclusivity provision, which bars Network card participants from independently distributing competing reload products to Network retailers. nFinanSe alleges that "[o]ne goal of the exclusivity provision is to entrench **[*11]** InComm's own new Vanilla branded suite of prepaid product and to remove horizontally competing brands of reload products from the store shelves of participating Vanilla Reload Network retailers." (*Id.* ¶ 63.)

Currently, the Network is comprised of three competing GPR card providers: InComm, who also functions as the founder and organizer of the Network, NetSpend, and PayPal. (*Id.* ¶ 55.) All three providers now charge the uniform reload fee of $3.95. (*Id.* ¶ 56.) Prior to joining the Network, InComm and NetSpend charged customers $2.95 and $2.99 per reload, respectively. (*Id.* ¶ 59.) Each company's reload price has therefore increased as a result of its participation in the Network.

InComm was displeased that nFinanSe continued to undercut the Network on reload pricing. (*Id.* ¶ 51.) In January 2011, an InComm executive stated to a counterpart at nFinanSe that "unless nFinanSe raised its pricing, InComm would not likely be going forward with nFinanSe." (*Id.* ¶ 77.) InComm executives also made comments to nFinanSe executives like "[i]f I were you, I'd change my pricing" and stated that InComm would increase its distribution of nFinanSe's Visa-branded GPR cards if nFinanSe would increase its **[*12]** reload pricing and join the Network. (*Id.*)

After realizing that it would be unable to sway nFinanSe on the issue of reload pricing, InComm began "holding up retailers' requests to offer nFinanSe's Visa-branded GPR cards at their stores." (*Id.* ¶ 53.) InComm stated that it was holding up retailer requests because nFinanSe refused to join InComm's Network. (*Id.* ¶ 54.) InComm also reduced the number of pegs showcasing nFinanSe GPR cards at Fred's stores and placed nFinanSe's cards in the least desirable position on the rack. (*Id.* ¶ 68.)

nFinanSe attempted to compromise with InComm on multiple occasions, including by offering to hang its own reload packs next to the Network's packages and by offering to join the Network without raising its reload price. (*Id.* ¶ 80.) InComm declined these offers and in October 2011, informed nFinanSe in a letter that it would stop distributing nFinanSe's Visa-branded GPR cards to all stores beginning on September 19, 2011. (*Id.* ¶ 83.)

nFinanSe filed a Complaint against InComm in this Court on October 31, 2011 for breach of contract, promissory estoppel and antitrust conspiracy. nFinanSe alleged that the Network constituted a *per se* illegal horizontal price-fixing **[*13]** agreement, and that InComm had unlawfully retaliated against nFinanSe for declining to join the Network by breaching the Visa Amendment and the Coinstar Visa Amendment. (*Id.* ¶¶ 49-63.) InComm filed a

Motion to Dismiss on November 28, 2011, and nFinanSe filed a First Amended Complaint ("FAC") on December 14, 2011. InComm then filed a Motion to Dismiss the FAC.

On March 7, 2012, the Court heard oral argument from the parties on InComm's Motion to Dismiss and on nFinanSe's Motion for a Preliminary Injunction. The Court denied nFinanSe's motion for injunction on the ground that there was not a reasonable likelihood nFinanSe would prevail on its claims at trial. (Hr'g Tr. 139:14-19.) The Court took InComm's motion under advisement. (*Id.* 140:3-4.)

On April 26, 2012, the Court granted nFinanSe's Motion to File the SAC. The Court then denied InComm's pending Motion to Dismiss as moot and permitted a renewed motion to dismiss to be filed on the Second Amended Complaint. This matter is now before the Court on InComm's Motion to Dismiss the SAC.

III. DISCUSSION

A. The Vanilla Reload Network Does not Constitute a *Per Se* Illegal Restraint on Competition.

Section 1 of the Sherman Antitrust Act declares illegal "[e]very contract, combination in the form of **[*14]** trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." 15 U.S.C. § 1. Long ago, however, the Supreme Court made clear that "not every agreement that restrains competition will violate the Sherman Act." *Levine v. Central Florida Med. Affiliates, Inc., 72 F.3d 1538, 1545 (11th Cir. 1996)*. Instead, only those agreements found to "*unreasonably* restrain competition" will result in Section 1 liability. *Id.* (citing *Standard Oil Co. v. United States, 221 U.S. 1, 58-64, 31 S. Ct. 502, 55 L. Ed. 619 (1911))*. "[A] restraint may be adjudged unreasonable either because it fits within a class of restraints that has been held to be 'per se' unreasonable, or because it violates what has come to be know as the 'Rule of Reason.'" *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 457-58, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. Under the rule of reason, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*.

A restraint is declared *per se* illegal, by contrast, "only when history and analysis have shown that in sufficiently similar circumstances the rule of reason unequivocally results in a finding of liability." *Consultants & Designers, Inc. v. Butler Serv. Grp., Inc., 720 F.2d 1553, 1562 (11th Cir. 1983)*. "[T]he *per se* rule is [therefore] appropriate only after courts have had considerable experience with the type of restraint at issue, and only if courts can predict with confidence that it would be invalidated in all **[*15]** or almost all instances under the rule of reason." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886-87, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (citations omitted). "Examples of such [restraints] include horizontal price fixing among competitors, group boycotts, and horizontal market division — business relationships that, in the courts' experience, virtually always stifle competition." *Jacobs v. Tempur-Pedic Intern., Inc., 626 F.3d 1327, 1333 (11th Cir. 2010)*.

1. Each Network Agreement Should be Evaluated Under the Rule of Reason.

In evaluating a claim that a restraint is *per se* illegal, an important consideration is whether the restraint at issue is horizontal, i.e. between competitors, or vertical, i.e. between noncompetitors. *Arizona v. Maricopa Cnty. Medical Soc., 457 U.S. 332, 348, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)* (noting that "horizontal restraints are generally less defensible than vertical restraints"). The Supreme Court has pointed out that vertical restraints "are widely used in our free market economy . . . [and] there is substantial scholarly and judicial authority supporting their economic utility." *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 57-58, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *see also* Robert H. Bork, *The Rule of Reason and the* Per Se *Concept: Price Fixing and Market Division II*, 75 Yale L.J. 373, 404 ("The ability of all truly vertical restraints to enhance the efficiency of [an] integration [is] demonstrated by the argument that they can serve no other function."). Horizontal restraints, by contrast, are generally considered **[*16]** to have more harmful economic effects, and are therefore more likely to be declared *per se* illegal. *See, e.g.*, *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 888, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

nFinanSe alleges that InComm engaged in *per se* illegal horizontal price fixing when it signed contracts with NetSpend and PayPal to launch the Network. nFinanSe points out that InComm sells its own brand of GPR card and, prior to founding the Network, offered its own brand of GPR card reload pack in retail stores across the country. InComm's GPR cards and reload packs each competed directly with the cards and reload packs offered by NetSpend and PayPal. nFinanSe contends that each Network agreement to fix the price for GPR card reloads was therefore a *per se* illegal agreement between horizontal competitors.

In support of its argument, nFinanSe marshals evidence indicating that "InComm's operation of the Vanilla Reload Network and its provision of distribution services are not separate and distinct from its provision of GPR and other prepaid products that directly and horizontally compete with nFinanSe's, NetSpend's, and PayPal's GPR cards." (SAC ¶ 111; *see also id.* ¶ 112 (alleging that "InComm's role as the Mio . . . card provider and the Vanilla Reload Network manager are **[*17]** seamlessly integrated")). For example, nFinanSe notes that InComm employees responsible for marketing the Mio card are also responsible for selling the Network to retailers. (*Id.* ¶ 112.) nFinanSe claims that, like the *per se* illegal market division agreement in *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*, each Network contract is a "*per se* unlawful horizontal restraint of trade . . . embedded in an otherwise legal vertical agreement." (Pl.'s Resp. at 12.) nFinanSe pleads that "[t]he real effect of this naked agreement to fix the reload price in the Vanilla Reload Network will be an increase in prices and a reduction in competition and/or market output at participating Vanilla Reload Network and/or InComm retailers." (*Id.* at ¶ 115)

InComm responds that it executed each of its Network contracts in its capacity as a distributor of GPR cards and as a founder of the Network. InComm does not dispute that its relationship with NetSpend and PayPal is in some sense competitive. However, InComm refuses to concede that this competition makes the Network agreements horizontal. Instead, InComm characterizes the Network contracts as "'dual distribution' or 'hybrid' agreements [involving] both horizontal and vertical elements." (Mot. Dismiss **[*18]** at 8.) Because the agreements are not purely horizontal, InComm asks that they be judged under the rule of reason. (*Id.*; *see also* *id. at 10-11* ("Dual distribution cases and other cases involving hybrid agreements recognize that a single company . . . may operate at multiple levels within an industry without engaging in *per se* illegal conduct.")).

The Court notes as a preliminary manner that nFinanSe's reliance on *Palmer* is misplaced. In *Palmer*, two companies offering bar review courses competed for the bar review course market in Georgia. *Palmer, 498 U.S. at 47*. One company was the largest provider of bar review courses in the country; the other was a new entrant to the market. *Id.* Together, they became the primary bar review course providers in Georgia during the relevant time period. *Id.* After a number of years, the two companies entered into a licensing agreement whereby the larger company would license the smaller company to market its bar review materials in Georgia. *Id.* The larger company agreed not to compete in Goergia, and the smaller company agreed not to compete outside of Georgia. *Id.* The larger company also received a percentage of the sales dollars generated by the smaller company. *Id.* Immediately after **[*19]** the licensing agreement was executed, the larger company increased the price of its course from $150 to over $400. *Id.*

The Supreme Court held that the licensing contract was a *per se* illegal horizontal agreement to divide the market. *Id. at 49*. The court reasoned that "[t]he revenue-sharing formula . . . coupled with the price increase that took place immediately after the parties agreed to cease competing with each other . . . indicates that [the] agreement was formed for the purpose and with the effect of raising the price of the bar review course." *Id.* (internal quotation marks omitted). The *Palmer* Court made clear that "horizontal territorial limitations . . . are naked restraints of trade with no purpose except stifling of competition." *Id. at 49*.

Unlike the agreement in *Palmer*, the Network contracts here involve one party, InComm, which acts both as a competitor and as a noncompetitive distributor in the GPR card market. Even on the face of nFinanSe's pleadings, the Network appears to be a "bona fide joint venture" designed by a GPR reload pack distributor to integrate the reload software of multiple GPR card providers into a centralized card reload system. The Network's efforts to fix the price **[*20]** of GPR card reloads may have some anticompetitive impact. However, it is clear even from the SAC that the Network as a whole is not a sham agreement designed only to obscure illegal horizontal price fixing. *See* *Augusta News Co. v. Hudson News Co., 269 F.3d 41, 48 (1st Cir. 2001)* (describing the agreement in Palmer as "more or less a sham transaction designed to disguise a naked market division arrangement [that] did not involve a bona fide joint venture"). The facts of this case therefore cannot be squared with those of *Palmer*.

Although this case is not analogous to *Palmer*, neither is it on all fours with the dual distribution cases cited by InComm. Dual distribution cases involve manufacturers who sell their products both through a distributor and independently at retail. *See, e.g.*, *Jacobs, 626 F.3d at 1340* (analyzing a dual distribution system in which a manufacturer "sold mattresses both through its authorized distributors and through its website"); *Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 720 (11th Cir. 1984)* (describing a dual distributorship in which the owner of a brand licenses independent franchisees and also "operates its own franchises" in competition with those franchisees); *AT&T Corp. v. JMC Telecom, LLC, 470 F.3d 525, 528 (3rd Cir. 2006)* (evaluating an agreement whereby AT&T sold its prepaid calling service independently and also contracted with JMC to sell its prepaid calling service **[*21]** at retail); *PSKS, Inc. v. Leegin Creative Leather Prods., Inc., No. 2:03 CV 107, 2009 U.S. Dist. LEXIS 28505, 2009 WL 938561, at *6* ("Where a manufacturer is both a wholesale distributor and retail distributor it is called a 'dual distribution system.'"). The Supreme Court has held that dual distribution agreements fixing resale price should be evaluated under the rule of reason because minimum resale price maintenance that reduces intrabrand competition may have the procompetitive effect of increasing interbrand competition. *Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 889, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*.

Unlike a traditional dual distributor, InComm sells its own unique GPR card, called the Mio card, at retail. Prior to the advent of the Network, InComm also sold its own Mio reload packs, which competed with the reload packs sold in stores by NetSpend and PayPal. As a result, InComm's agreement with NetSpend and PayPal to fix the price for GPR card reloads has the effect of reducing *interbrand* competition. The dual distribution cases InComm cites in support of its position are therefore not analogous to the case at hand.

There is some indication that the Eleventh Circuit has expanded its definition of a "dual distributor" beyond the one traditionally accepted in ***antitrust law***. In *Hobart Bros. Co. v. Malcolm T. Gilliland, Inc., 471 F.2d 894 (5th Cir. 1973)*, the Fifth Circuit considered **[*22]** an agreement allocating territory between a distributor, Gilliland, and a manufacturer, Hobart, where Gilliland also manufactured and sold goods in direct competition with Hobart. In *Jacobs*, the Eleventh Circuit referred to the agreement in *Hobart Bros*. as a "dual distribution relationship," *Jacobs, 626 F.3d at 1340 n.15*, even though the agreement restricted *interbrand*, and not *intrabrand*, competition. It therefore appears possible that the Eleventh Circuit would include cases such as the one before the Court in the class of dual distributorships, albeit not of the traditional variety.

The Court is mindful in deciding whether to apply the *per se* rule that restraints on trade "must be treated as [they] operate[] in practice rather than as arranged by skillful drafting." *Hobart Bros. Co., 471 F.2d 899* (internal quotation marks omitted) (citing *Simpson v. Union Oil Co. of Ca., 377 U.S. 13, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)* (refusing to allow "legality for antitrust purposes [to] turn on clever draftsmanship," *id. at 25*)). However, the Court also notes once more that a finding of *per se* illegality is inappropriate unless courts have "had considerable experience with the type of restraint at issue, and only if courts can predict with confidence that it would be invalidated in all or almost all instances under the rule of reason." *Leegin Creative Leather Prods., Inc., 551 U.S. at 886-87 (2007)* **[*23]** (citations omitted). The decision to apply the *per se* rule, moreover, cannot be made without paying "close attention . . . to procompetitive, efficiency-creating integration that is accomplished as the result of an anticompetitive, yet ancillary, restraint." *Nat'l Bancard Corp. (NaBanco) v. VISA USA, Inc., 779 F.2d 592, 603 (11th Cir. 1986)*; *see also* *In re Terazosin Hydrochloride Antitrust Litigation, 352 F. Supp. 2d 1279, 1314 (S.D. Fla. 2005)* (noting that "ancillary" restraints resulting "in an efficiency-enhancing integration among the parties to the agreement" are not *per se* illegal).

nFinanSe has pled that the Network's price-fixing agreement has had significant anticompetitive effects. However, even on the face of nFinanSe's pleadings, it would be unreasonable to conclude that the agreement was designed as a "naked" restraint on trade — that is, as a restraint formed "with no purpose except stifling competition." *White*

Motor Co. v. United States, 372 U.S. 253, 263, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963). InComm as a distributor of GPR cards and reload packs has founded a reload network that creates a more centralized and efficient reload process for consumers and retailers and in which upstream card providers participate. The restraint at issue arguably functions within the context of a larger "efficiency-creating integration"; it is therefore not obvious that the restraint exists *only* to stifle competition. Instead, the Network agreements count among the many "restraints imposed in the context of business relationships where the economic impact of certain practices is not immediately obvious." State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997) (quoting Indiana Fed'n of Dentists, 476 U.S. at 458-59). For this reason, adoption of the *per se* rule would be inappropriate in this case, even though the Defendant's Network arrangement includes some disturbing, anti-competitive **[*24]** features. nFinanSe's claim that the individual Network agreements amount to *per se* illegal horizontal price fixing is therefore **DISMISSED**. In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 317 (3rd Cir. 2010) (noting that, if a plaintiff pleads "exclusively *per se* violations" of the Sherman Act, and "the court determines that the restraint at issue is sufficiently different from the *per se* archetypes to require application of the rule of reason, the plaintiff's claims will be dismissed").

2. The Network Does Not Constitute a *Per Se* Illegal Hub-and-Spoke Conspiracy.

nFinanSe has also raised the argument that the Network constitutes a *per se* illegal hub-and-spoke conspiracy. A hub-and-spoke conspiracy exists where "a central core of conspirators recruits separate groups of co-conspirators to carry out the various functions of the illegal enterprise." United States v. Chandler, 388 F.3d 796, 807 (11th Cir. 2004). The central core of conspirators form the "hub" of the wheel and move outward among the separate groups, or "spokes," to recruit. *Id.* If the various spokes of the conspiracy are unaware of each other, "the conspiracy is analogous to a 'rimless wheel,' with nothing connecting the separate spokes into a single conspiracy." United States v. Huff, 609 F.3d 1240, 1244 (11th Cir. 2010) (quoting Chandler, 388 F.3d at 807). A rimless wheel cannot form the basis for a single illegal agreement; a true hub-and-spoke **[*25]** conspiracy occurs only if "the various spokes are aware of each other and of their common aim." United States v. Seher, 562 F.3d 1344, 1367 (11th Cir. 2009); *see also* Kotteakos v. U.S., 328 U.S. 750, 755 (1946), 66 S. Ct. 1239, 90 L. Ed. 1557 (distinguishing between a hub-and-spoke conspiracy and several independent conspiracies involving "separate spokes meeting at a common center . . . without the rim of the wheel to enclose the spokes" (internal quotation mark omitted)).

The existence of a hub-and-spoke conspiracy is made more plausible if the various spokes are interdependent. Seher, 562 F.3d at 1366; *see also id.* ("To determine [the existence of] a single conspiracy, we consider (1) whether a common goal existed; (2) the nature of the underlying scheme; and (3) the overlap of participants." (quoting United States v. Edouard, 485 F.3d 1324, 1347 (11th Cir. 2007)); United States v. Perez, 489 F.2d 51, 59 n.11 (5th Cir. 1973) ("[T]he test [of a hub-and-spoke conspiracy] seems to be one of 'interdependence.'").[1] In Interstate Circuit v. United States, 306 U.S. 208, 59 S. Ct. 467, 83 L. Ed. 610 (1939), the Supreme Court found a hub-and-spoke conspiracy where "[e]ach [spoke] was aware that . . . without substantially unanimous action . . . there was risk of a substantial loss of the business and good will." In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 331 (3rd Cir. 2010) (quoting Interstates Circuit, 306 U.S. at 222); *see also id.* ("Key to *Interstate Circuit*'s conspiracy finding was its determination that each distributor's decision to accede to Interstate's demands would have been economically self-defeating unless the other distributors did **[*26]** the same.").

nFinanse contends that, like the "hub" in *Interstate Circuit*, InComm functioned as the ringleader of a single conspiracy involving NetSpend and PayPal. nFinanSe alleges that "NetSpend and PayPal knowingly worked together and with InComm to accomplish the common purpose of establishing the . . . Network with a fixed reload price." (SAC ¶ 106.) nFinanSe suggests as evidence of this conspiracy that InComm broached the subject of the Network in meetings with nFinanSe and at industry conferences. (*Id.*) Although nFinanSe acknowledges that it has no evidence of any express agreement between NetSpend and PayPal, it contends that the Network participants

---

[1] In Bonner v. Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981) (en banc), the Eleventh Circuit adopted as binding precedent all decisions of the former Fifth Circuit handed down prior to October 1, 1981.

"knew that InComm was similarly pursuing other GPR card providers based on (1) InComm's promotion of the proposed fixed price within the prepaid card industry and (2) InComm's negotiations with nFinanSe, which nFinanSe reasonably believes mirrored InComm's negotiations with others." (Pl.'s Resp. at 17-18.)

The Court concludes that nFinanSe has not pled sufficient facts to raise a plausible claim of a hub-and-spoke conspiracy. Contrary to nFinanSe's insinuations, InComm was well within its rights to approach potential Network participants **[*27]** about its new program, and even to advertise the program at public gatherings. That InComm launched a publicity campaign does not mean that NetSpend and PayPal knew who else would be participating in the Network, nor does it mean that one company conditioned its participation on its competitor's agreement to join. As in *Chandler*, there is no indication that either Network participant knew about the other or that either encouraged the other to join, beyond nFinanSe's conclusory claim that such knowledge was imparted as a result of InComm's advertising efforts.[2] *See* Seher, 562 F.3d at 1366-67 (finding a hub-and-spoke conspiracy because the spokes knew about each other and encouraged one another to participate in the arrangement).

Indeed, on the face of nFinanSe's pleadings, it is just as likely that NetSpend and PayPal each agreed to participate in the Network independently and because the Network offers a host of cost-cutting and product-distribution opportunities. No matter how large the Network ultimately grows and independent of which businesses InComm can recruit to participate, these opportunities will continue to exist. For example, Network participants no longer need to invest in costly reload software **[*28]** technology; participants can depend on InComm to market any necessary reload software to retailers; and participants can expect that their customers will now be able to reload their cards at a greater number of InComm-related retail locations. nFinanSe's allegation that NetSpend and PayPal elected to join the Network because they agreed to act in concert is therefore highly conclusory: the fact that both companies joined the Network is just as easily explained by each company's independent economic incentives. *See* Twombly, 550 U.S. at 557 (dismissing a "conclusory allegation" as insufficient to survive a motion to dismiss). Accordingly, nFinanSe's claim that the Network constitutes a *per se* illegal hub-and-spoke conspiracy is **DISMISSED**.

B. nFinanSe's Claim for Breach of Contract is Dismissed in Part.

1. nFinanSe has Failed to State a Claim that InComm Breached the Visa Amendment to the Discover Contract.

nFinanSe also argues that InComm has breached a so-called Visa Amendment to the parties' Discover Contract by refusing to distribute nFinanSe's Visa-branded GPR card. The Visa Amendment was either an amendment to the Discover Contract or "a new written contract . . . for the distribution of nFinanSe's Visa-branded GPR cards pursuant to the terms of the Discover Contract." (*Id.* ¶ 35.) nFinanSe claims that **[*29]** InComm incorporated the terms of the Discover Contract into the Visa Amendment, that InComm executives put this Amendment into writing via e-mail, and that the "case-by-case" qualifier InComm included in its e-mails was designed as a "mechanism to prevent InComm from distributing nFinanSe's GPR cards, at nFinanSe's behest, to stores that did not want them. The parties understood that this provision could affect the *timing* of retailer approvals but not the *fact* of retailer approvals." (SAC ¶ 36.)

InComm has moved to dismiss nFinanSe's breach of contract claim under the statute of frauds. Under Georgia's Statute of Frauds, contracts of greater than one year duration are enforceable only if in writing and signed by the

---

[2] nFinanSe does allege that InComm told nFinanSe executives at a business meeting in 2011 that "NetSpend, American Express, Western Union, and MoneyGram had 'all signed' onto InComm's . . . Network with a fixed reload price of $3.95. (Compl. ¶ 103. However, even if this pleading is accepted as true, there is no indication that the same conversation occurred between InComm and NetSpend or between InComm and PayPal, or that these businesses proceeded as groups based on the understanding that otherwise there would be "a substantial loss of the business and good will." Interstate Circuit, 306 U.S. at 222.

party undertaking the contractual obligation. *O.C.G.A. § 13-5-30*. InComm argues, therefore, that the purported Visa contract between InComm and nFinanSe is not enforceable or legally binding. nFinanSe, in an apparent move away from its contention that the Visa Amendment was a written agreement, counters that "the parties fully performed the Visa contract for *1.6 years*, approximately 80% of the [contract's alleged] two-year term." (Pl.'s Resp. at 24.) InComm's alleged part performance thereby removed the barrier of the **[*30]** statute of frauds.

In the SAC, nFinanSe took the position that the Visa Amendment was a written agreement. This position is untenable. Although multiple documents may together form a valid written contract, "the necessary terms [of the contract must be] contained in signed contemporaneous writings." *Baker v. Jellibeans, Inc., 252 Ga. 458, 314 S.E.2d 874, 877 (Ga. 1984)*; *see also* *Bd. of Regents of Univ. Sys. of Ga. v. Tyson, 261 Ga. 368, 404 S.E.2d 557, 559 (Ga. 1991)* (striking down a claim for breach of contract where there was no indication of a writing containing the terms of the purported contract); *Merk v. Dekalb Cnty., 226 Ga. App. 191, 486 S.E.2d 66, 68 (Ga. Ct. App. 1997)* (citing *Bd. of Regents of Univ. Sys. of Ga., 404 S.E.2d at 559*) (same). In this case, the series of e-mails nFinanSe claims as evidence of the Visa Amendment prove nothing more than that InComm "agree[d] to add the Visa GPR product at Winn Dixie only and that any others would be dealt with on a case-by-case basis." (Pl.'s Ex. E-2.) The e-mails include no mention of terms such as the duration of the contract and evidence no meeting of the minds as to any "condition-less" distribution agreement. (Pl.'s Resp. at 23.) nFinanSe has of course offered an explanation for the "case-by-case" qualifier in the e-mail chain. However, this explanation is a tortured one; there is no reason to believe that the qualifier means anything other than that InComm would decide for itself whether to approve retailer requests for nFinanSe's Visa-branded **[*31]** GPR card. *See also* *Hugh Symons Grp., plc v. Motorola, Inc., 292 F.3d 466, 469-70 (5th Cir. 2002)* (holding e-mail exchange insufficient to satisfy statue of frauds where the messages at issue omitted vital terms of the purported contract); *Toghiyany v. AmeriGas Propane, Inc., 309 F.3d 1088, 1091 (8th Cir. 2002)* (same); *S&S Textiles Intern. v. Steve Weave, Inc., No. 00 CIV.8391 DLC, 2002 U.S. Dist. LEXIS 14742, 2002 WL 1837999, at *5 (same)*.

nFinanSe attempts to rehabilitate its interpretation of the e-mails by contending that Mr. Skiba used the term "Product Launch" in his message to refer to a term in the Discover Contract. In that contract, the term "Program Launch" is defined as "the date that InComm commences offering the Program to potential Purchasers." (Pl.'s Resp. at 21.) Accordingly, any use of the term "Launch" therefore "presupposes the fact of distribution and only addresses the timing." (*Id.*)

nFinanSe's reading of Mr. Skiba's e-mail is not plausible. The message expressly states that any further "Product Launch" will be done on a case-by-case basis "*per Lisa Liban's comments*." (Compl. Ex. E-1) (emphasis added). Ms. Liban's e-mail had simply confirmed that, beyond Winn Dixie, any retailer requests for nFinanSe's GPR card "would be dealt with on a case-by-case basis." (Compl. Ex. E-2.) Ms. Liban made no mention of any "Product **[*32]** Launch" or Discover Contract. She was speaking in plain language and clearly intended to communicate that InComm would not approve further Visa card distribution if such distribution did not meet InComm's "strategic goals." (Compl. Ex. E-1.) Furthermore, even if Mr. Skiba intended his reference to a "Product Launch" to have some formal contractual meaning, that term is nowhere to be found in the Discover Contract. Instead, the Contract refers to a "*Program* Launch."[3]

nFinanSe has therefore failed to raise a claim that the Visa Amendment was a written agreement in satisfaction of the Statute of Frauds. However, under Georgia law, the Statute of Frauds does not apply "where there has been such part performance of the contract as would render it a fraud of the party refusing to comply, if the court did not compel a performance." *Smith v. Cox, 277 S.E.2d 512, 564 (Ga. 1981)*. Part performance will only except a contract from the Statute if it is "shown [to be] consistent with the presence of a contract and inconsistent with the lack of a contract." *R.T. Patterson Funeral Home, Inc. v. Head, 215 Ga. App. 578, 451 S.E.2d 812, 817 (Ga. Ct.*

[3] nFinanSe also claims "[a]s further evidence of the Visa Amendment . . . [that], in late 2010, InComm charged and collected from nFinanSe $65,000 for warehouse security upgrades that InComm told nFinanSe were required *by Visa*." (Compl. ¶ 39.) Such evidence is of no consequence: security upgrades required by Visa were necessary because InComm was distributing nFinanSe's Visa cards on a case-by-case basis, not because InComm had agreed to distribute the cards on the same terms as the Discover Contract.

App. 1994). The part performance must therefore be "essential to the contract, that is, required by its terms." Hudson v. Venture Indus., Inc., 243 Ga. 116, 252 S.E.2d 606, 608 (Ga. 1979).

nFinanSe has claimed that InComm performed its responsibilities under the terms of the Visa Amendment for 1.6 **[*33]** years. nFinanSe alleges that InComm distributed its Visa-branded GPR cards to retailers without exception until "nFinanSe rebuffed InComm's price-fixing demands." (Pl.'s Resp. at 23.) nFinanSe pleads that InComm's part performance indicates that the Visa Amendment was an agreement incorporating "every jot and tittle of the 37-page Discover Card agreement." (Pl.'s Resp. at 25.)

nFinanSe pleadings regarding InComm's part performance are once again conclusory. The fact that InComm distributed nFinanSe's Visa-branded GPR card for over a year indicates nothing more than that InComm was approving retailer requests for the card on a "case-by-case" basis. That InComm distributed the Visa-branded card for some period of time does not mean that the Visa Amendment incorporated the Discover Contract or that it included a two-year term or an unconditional distribution agreement. InComm's "part performance" was in no way required by an unconditional distribution agreement or a two-year contract term. InComm merely did what it said it would do in its e-mails, namely, distribute nFinanSe's Visa-branded card as it saw fit. Since there is no indication on the face of nFinanSe's SAC that InComm breached the terms of any written **[*34]** or oral Visa Amendment, nFinanSe's claim for breach of the Visa Amendment is **DISMISSED**. Additionally, since nFinanSe has failed to plead facts indicating the existence of a "condition-less" Visa Amendment, any resources it expended in reliance on such a contract were unreasonable. O.C.G.A. § 13-3-44 (noting that a promise must be fulfilled if the promisor "reasonably expect[ed] [the promise] to induce action . . . on the part of the promisee"); Johnson v. Univ. Health Servs., Inc., 161 F.3d 1334, 1340 (11th Cir. 1998) ("Promissory estoppel requires that reliance on the promise be reasonable."). Accordingly, nFinanSe's claim for promissory estoppel in the context of the Visa Amendment is **DISMISSED**.

2. nFinanSe has Pled Sufficient Facts to State a Claim that InComm Breached the Discover Contract and the Coinstar Discover Contract.

nFinanSe has also alleged that InComm breached "all of its contracts with nFinanSe by, *inter alia*, breaching its account management and maintenance obligations, failing to deal with nFinanSe on a good-faith basis as the parties' contracts require, and by failing to properly distribute nFinanSe's product to a significant number of stores of its largest retailer, Dollar General, during December 2011." (SAC ¶ 91.) nFinanSe alleges that InComm officers have "ceased communicating with nFinanSe" since the commencement **[*35]** of the present lawsuit, "despite the fact that communication between the parties is necessary for full performance of the contracts." (*Id.*) InComm responds that nFinanSe's claim fails because nFinansSe "fails to specify which provisions of which 'contracts' it alleges were breached and fails to allege that it has suffered any damage whatsoever from the alleged breaches." (Mot. Dismiss at 18.)

Under *Twombly*, a plaintiff survives a motion to dismiss if its pleading "contain[s] sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" Iqbal, 556 U.S. at 678 (quoting Twombly, 550 U.S. at 570). Here, nFinanSe pleads that InComm has ceased communicating with nFinanSe executives regarding the details of their written distribution contracts and failed to "properly distribute" nFinanSe's product to its largest retailer. nFinanSe claims that as a result of this breach, its product was not available in sufficient or expected quantity "during . . . the most important sales month of the year." (SAC ¶ 91.)

Accepting nFinanSe's pleading as true, such behavior on the part of InComm would surely constitute a breach of the Discover Contract's provision that InComm "use commercially reasonable efforts **[*36]** and proceed in good faith to execute the agreement, test the product and launch the Program." *See* Ernie Haire Ford, Inc. v. Ford Motor Co., 260 F.3d 1285, 1291 (11th Cir. 2001) ("With the implied covenant [of good faith and fair dealing], one party cannot capriciously exercise discretion . . . so as to thwart the contracting parties' reasonable expectations."). Such behavior would also constitute a breach of the implied covenant of good faith and fair dealing in the written Coinstar Discover Contract, *id.*, which nFinanSe has pled InComm assumed in May 2010. Since the Discover Contract and Coinstar Discover Contract are among the many contracts nFinanSe alleges has been breached, nFinanSe has pled sufficient facts to state a plausible claim for relief. Accordingly, InComm's motion to dismiss nFinanSe's claim for breach of the Discover Contract and Coinstar Discover Contract is **DENIED**.

3. nFinanSe has Pled Sufficient Facts to State a Claim that InComm Breached the Coinstar Visa Amendment.

In a final claim for breach of contract, nFinanSe has alleged that InComm breached a separate contract called the Coinstar Visa Amendment. The Coinstar Visa Amendment was originally between nFinanSe and Coinstar and amended a prior agreement called the the Coinstar Discover Contract. The Coinstar Discover Contract was similar to the InComm Discover Contract, and the Amendment "stated that distribution of nFinanSe's **[*37]** Visa-branded cards would be covered by the same Coinstar Discover Contract governing distribution of nFinanSe's Discover-branded cards." (SAC ¶ 43.) nFinanSe alleges that the Amendment was in writing. (*Id.* ¶ 44.) When InComm acquired Coinstar's e-payment business in May 2010, it assumed the Coinstar Discover Contract and the Coinstar Visa Amendment. When InComm stopped distributing nFinanSe's Visa-branded card in 2011, it was in breach of its assumed Coinstar Visa Amendment.

InComm's Motion to Dismiss does not address its alleged breach of the Coinstar Visa Amendment. InComm states only that nFinanSe, in claiming that InComm breached all of its nFinanSe distribution contracts, "fails to specify which provisions of which 'contracts' it alleges were breached and fails to allege that it has suffered any damage whatsoever from the alleged breaches." (Mot. Dismiss at 18.) InComm's argument clearly fails in the context of the alleged written Coinstar Visa Amendment: nFinanSe has made clear the terms of the Amendment, claimed that InComm assumed the Amendment in May 2010, explained that InComm breached the Amendment by ceasing to distribute its Visa-branded GPR card to "any new retailers," (SAC ¶ 94), and described the various ways in which it has been damaged by this breach (*id.*). At the motion to dismiss stage, all that is needed for **[*38]** a complaint to go forward is a plausible claim for relief. Here, nFinanSe has pled sufficient facts to state such a claim. InComm's Motion to Dismiss nFinanSe's claim for breach of the Coinstar Visa Amendment is therefore **DENIED**.

IV. CONCLUSION

For the reasons stated above, Defendant's Motion to Dismiss [Doc. 57] is **GRANTED IN PART** and **DENIED IN PART**. Defendant's motion to dismiss Plaintiff's claim for a *per se* violation of the Sherman Act is **GRANTED**. Defendant's motion to dismiss Plaintiff's claim for breach of the Visa Amendment is also **GRANTED**. Defendant's motion to dismiss Plaintiff's claims for breach of the Discover Contract, the Coinstar Discover Contract and the Coinstar Visa Amendment is **DENIED**.

IT IS SO ORDERED this 24th day of July, 2012.

ORDER ON DEFENDANTS' F.R.Civ.P. 12 MOTION TO DISMISS

(Doc. 6.)

INTRODUCTION

Several defendants [1] seek to dismiss as legally barred and lacking merit plaintiff Florida Ruiz' ("Ms. Ruiz'") claims to challenge foreclosure of her Bakersfield property ("property"). Ms. Ruiz responds that defendants' wrongful conduct precludes foreclosure of her property. This Court considered defendants' *F.R.Civ.P. 12(b)(6)* motion to dismiss on the record without a hearing, pursuant to *Local Rule 230(g)*. For the reasons discussed below, this Court DISMISSES this action against defendants.

BACKGROUND[2]

Ms. Ruiz' Property Loans And Foreclosure

On April 1, 2007, Mr. Ruiz obtained from SunTrust a $189,592 loan secured by a deed of trust ("first DOT") on the property and which was recorded on April 13, 2007. [3] The first DOT identifies SunTrust as lender and MERS as nominee of SunTrust and SunTrust's successors and assigns and as beneficiary under the deed of trust.

Also on April 1, 2007, Ms. Ruiz obtained a second $47,398 loan secured by a second deed of trust on the property and which was also recorded on April 13, 2007. That deed of trust identifies SunTrust as lender and MERS as nominee of SunTrust and SunTrust's successors and assigns and beneficiary under the deed of trust.

After Ms. Ruiz defaulted, Recontrust Company ("Recontrust") recorded **[*3]** a notice of default and election to sell under deed of trust on May 15, 2009. After Ms. Ruiz failed to cure her default, Recontrust recorded a notice of trustee's sale on January 12, 2010. The property was sold at foreclosure on March 4, 2010, and Recontrust recorded a trustee's deed upon sale on March 12, 2010.

The foreclosure sale was rescinded, and a notice of rescission of trustee's deed upon sale was recorded on December 8, 2011.

By an August 18, 2011 assignment of deed of trust, MERS assigned to SunTrust all beneficial interest under the first DOT. The assignment of deed of trust was recorded on September 2, 2011 and is signed by MERS Vice President Doyle Mitchell ("Mr. Mitchell").

On September 16, 2011, the Wolf Law Firm recorded a second notice of default and election to sell under deed of trust for the property. The Wolf Law Firm substituted as trustee under the first DOT on September 30, 2011. The substitution of trustee was recorded on February 15, 2012. The Wolf Law Firm caused a notice of trustee's sale of the property to be recorded on February 15, 2012.

Ms. Ruiz' Claims

Prior to removal to this Court, Ms. Ruiz filed her original complaint in state court on February 22, 2012. **[*4]** Ms. Ruiz proceeds on her FAC, filed on May 14, 2012, to challenge SunTrust's authority "to initiate and complete foreclosure" in that SunTrust "is neither the Promissory Note Holder, nor the actual Beneficiary of the Deed of Trust." The FAC alleges that SunTrust "cannot show proper receipt, possession, transfer, negotiations, assignment and ownership of the borrowers' Promissory Note and Deed of Trust." The FAC continues that "none of the parties

---

[1] The defendants seeking *F.R.Civ.P. 12(b)(6)* dismissal are SunTrust Mortgage, Inc. ("SunTrust"), Mortgage Electronic Registration Systems, Inc. ("MERS"), and Federal **[*2]** National Mortgage Association ("Fannie Mae") and will be referred to collectively as "defendants."

[2] The factual recitation is derived generally from Ms. Ruiz' First Amended Complaint ("FAC"), the target of defendants' challenges, as well as other matters which this Court may consider on a *F.R.Civ.P. 12(b)(6)* motion to dismiss.

[3] Documents pertaining to Ms. Ruiz' loans and property foreclosure were recorded with the Kern County Official Records.

to neither the securitization transaction, nor any of the Defendants in this case, hold a perfected and secured claim in the Property." The FAC alleges claims of wrongful foreclosure, fraud, slander of title, quiet title and California statutory violations. The claims will be discussed in greater detail below.

DISCUSSION

F.R.Civ.P. 12(b)(6) Motion To Dismiss Standards

Defendants characterize the FAC's claims as lacking merit to warrant dismissal.

"When a federal court reviews the sufficiency of a complaint, before the reception of any evidence either by affidavit or admissions, its task is necessarily a limited one. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the **[*5]** claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)*; *Gilligan v. Jamco Development Corp., 108 F.3d 246, 249 (9th Cir. 1997)*. A *F.R.Civ.P. 12(b)(6)* dismissal is proper where there is either a "lack of a cognizable legal theory" or "the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*; *Graehling v. Village of Lombard, Ill., 58 F.3d 295, 297 (7th Cir. 1995)*. A *F.R.Civ.P. 12(b)(6)* motion "tests the legal sufficiency of a claim." *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*.

In addressing dismissal, a court must: (1) construe the complaint in the light most favorable to the plaintiff; (2) accept all well-pleaded factual allegations as true; and (3) determine whether plaintiff can prove any set of facts to support a claim that would merit relief. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-338 (9th Cir. 1996)*. Nonetheless, a court is not required "to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Sciences Securities Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citation omitted). A court "need **[*6]** not assume the truth of legal conclusions cast in the form of factual allegations," *U.S. ex rel. Chunie v. Ringrose, 788 F.2d 638, 643, n. 2 (9th Cir.1986)*, and must not "assume that the [plaintiff] can prove facts that it has not alleged or that the defendants have violated . . . laws in ways that have not been alleged." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 526, 103 S.Ct. 897, 74 L. Ed. 2d 723 (1983)*. A court need not permit an attempt to amend if "it is clear that the complaint could not be saved by an amendment." *Livid Holdings Ltd. v. Salomon Smith Barney, Inc., 416 F.3d 940, 946 (9th Cir. 2005)*.

A plaintiff is obliged "to provide the 'grounds' of his 'entitlement to relief' [which] requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544,127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)* (internal citations omitted). Moreover, a court "will dismiss any claim that, even when construed in the light most favorable to plaintiff, fails to plead sufficiently all required elements of a cause of action." *Student Loan Marketing Ass'n v. Hanes, 181 F.R.D. 629, 634 (S.D. Cal. 1998)*. **[*7]** In practice, a complaint "must contain either direct or inferential allegations respecting all the material elements necessary to sustain recovery under some viable legal theory." *Twombly, 550 U.S. at 562, 127 S.Ct. at 1969* (quoting *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984))*.

In *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937,1949, 173 L. Ed. 2d 868 (2009)*, the U.S. Supreme Court explained:

> . . . a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." . . . A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. . . . The plausibility standard is not akin to a "probability requirement," but it asks for more than a sheer possibility that a defendant has acted unlawfully. (Citations omitted.)

After discussing *Iqbal*, the Ninth Circuit summarized: "In sum, for a complaint to survive [dismissal], the non-conclusory 'factual content,' and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." *Moss v. U.S. Secret Service, 572 F.3d 962, 969 (9th Cir. 2009)* **[*8]** (quoting *Iqbal, 556 U.S. 662, 129 S.Ct. at 1949*).

The U.S. Supreme Court applies a "two-prong approach" to address dismissal:

> First, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. . . . Second, only a complaint that states a plausible claim for relief survives a motion to dismiss. . . . Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. . . . But where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged - but it has not "show[n]"-"that the pleader is entitled to relief." *Fed. Rule Civ. Proc. 8(a)(2)*.
>
> In keeping with these principles a court considering a motion to dismiss can choose to begin by identifying pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth. While legal conclusions can provide the framework of a complaint, they **[*9]** must be supported by factual allegations. When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief.

Iqbal, 556 U.S. 662, 129 S.Ct. at 1949-1950.

Moreover, a court may consider exhibits submitted with the complaint. *Durning v. First Boston Corp., 815 F.2d 1265, 1267 (9th Cir. 1987)*;*Van Winkle v. Allstate Ins. Co., 290 F.Supp.2d 1158, 1162, n. 2 (C.D. Cal. 2003)*. A "court may consider evidence on which the complaint 'necessarily relies' if: (1) the complaint refers to the document; (2) the document is central to the plaintiff's claim; and (3) no party questions the authenticity of the copy attached to the 12(b)(6) motion." *Marder v. Lopez, 450 F.3d 445, 448 (9th Cir. 2006)*. A court may treat such a document as "part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir.2003)*. Such consideration prevents "plaintiffs from surviving a *Rule 12(b)(6)* motion by deliberately omitting reference to documents upon which their claims are based." *Parrino v. FHP, Inc., 146 F.3d 699, 706 (9th Cir. 1998)*. **[*10]** [4] A "court may disregard allegations in the complaint if contradicted by facts established by exhibits attached to the complaint." *Sumner Peck Ranch v. Bureau of Reclamation, 823 F.Supp. 715, 720 (E.D. Cal. 1993)* (citing *Durning v. First Boston Corp., 815 F.2d 1265, 1267 (9th Cir.1987))*.

With these standards in mind, this Court turns to defendants' challenges to the FAC's claims.

Failure To Tender

The FAC's claims challenge foreclosure of the property. In particular, the FAC's (first) wrongful foreclosure claim alleges that SunTrust "does not have the authority to initiate foreclosure as it is not truly the beneficiary of the Deed of Trust" and "lacks the authority to foreclose on the Plaintiff's Property as it is not the Beneficiary **[*11]** of the Deed of Trust." The claim appears to rest on Ms. Ruiz' assertion that MERS, not Suntrust, is the first DOT beneficiary and "Suntrust does not have the authority to tell Defendant Wolf Firm to initiate foreclosure."

---

[4] "We have extended the 'incorporation by reference' doctrine to situations in which the plaintiff's claim depends on the contents of a document, the defendant attaches the document to its motion to dismiss, and the parties do not dispute the authenticity of the document, even though the plaintiff does not explicitly allege the contents of that document in the complaint." *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)* (citing *Parrino, 146 F.3d at 706*).

Defendants contend that the FAC's claims challenging foreclosure sale are barred by Ms. Ruiz' failure to tender amounts owed on her loans. Mr. Ruiz responds that "[i]t would be inequitable to require the Plaintiff to tender to an entity that does not have the right to foreclose."

"A tender is an offer of performance made with the intent to extinguish the obligation." *Arnolds Management Corp. v. Eischen, 158 Cal.App.3d 575, 580, 205 Cal.Rptr. 15 (1984)* (citing *Cal. Civ. Code, § 1485*; *Still v. Plaza Marina Commercial Corp., 21 Cal.App.3d 378, 385, 98 Cal.Rptr. 414 (1971))*. "A tender must be one of full performance . . . and must be unconditional to be valid." *Arnolds Management, 158 Cal.App.3d at 580, 205 Cal.Rptr. 15*. "Nothing short of the full amount due the creditor is sufficient to constitute a valid tender, and the debtor must at his peril offer the full amount." *Rauer's Law etc. Co. v. S. Proctor Co., 40 Cal.App. 524, 525, 181 P. 71 (1919)*.

A defaulted borrower is **[*12]** "required to allege tender of the amount of [the lender's] secured indebtedness in order to maintain any cause of action for irregularity in the sale procedure." *Abdallah v. United Savings Bank, 43 Cal.App.4th 1101, 1109, 51 Cal.Rptr.2d 286 (1996)*, *cert. denied*, *519 U.S. 1081, 117 S. Ct. 746, 136 L. Ed. 2d 684 (1997)*. In *FPCI RE-HAB 01 v. E & G Investments, Ltd., 207 Cal.App.3d 1018, 1021, 255 Cal.Rptr. 157 (1989)*, the California Court of Appeal explained:

> . . . generally "an action to set aside a trustee's sale for irregularities in sale notice or procedure should be accompanied by an offer to pay the full amount of the debt for which the property was security." . . . . This rule . . . is based upon the equitable maxim that a court of equity will not order a useless act performed. . . . "A valid and viable tender of payment of the indebtedness owing is essential to an action to cancel a voidable sale under a deed of trust." . . . The rationale behind the rule is that if plaintiffs could not have redeemed the property had the sale procedures been proper, any irregularities in the sale did not result in damages to the plaintiffs. (Citations omitted.)

An action to set aside a foreclosure sale, unaccompanied **[*13]** by an offer to redeem, does not state a cause of action which a court of equity recognizes. *Karlsen v. American Sav. & Loan Assn., 15 Cal.App.3d 112, 117, 92 Cal.Rptr. 851 (1971)*. The basic rule is that an offer of performance is of no effect if the person making it is not able to perform. *Karlsen, 15 Cal.App.3d at118, 92 Cal.Rptr. 851* (citing *Cal. Civ. Code, § 1495*). Simply put, if the offeror "is without the money necessary to make the offer good and knows it" the tender is without legal force or effect. *Karlsen, 15 Cal.App.3d at118, 92 Cal.Rptr. 851* (citing several cases). "It would be futile to set aside a foreclosure sale on the technical ground that notice was improper, if the party making the challenge did not first make full tender and thereby establish his ability to purchase the property." *United States Cold Storage v. Great Western Savings & Loan Assn., 165 Cal.App.3d 1214, 1224, 212 Cal.Rptr. 232 (1985)*. "A cause of action 'implicitly integrated' with the irregular sale fails unless the trustor can allege and establish a valid tender." *Arnolds Management, 158 Cal.App.3d at 579, 205 Cal.Rptr. 15*. "Plaintiff's failure to allege that he has tendered or can tender the amount **[*14]** of his indebtedness renders his wrongful foreclosure claim deficient." *Grant v. Aurora Loan Services, Inc., 736 F.Supp.2d 1257, 1270 (C.D. Cal. 2010)*.

"It is settled in California that a mortgagor cannot quiet his title against the mortgagee without paying the debt secured." *Shimpones v. Stickney, 219 Cal. 637, 649, 28 P.2d 673 (1934)*; *see* *Mix v. Sodd, 126 Cal.App.3d 386, 390, 178 Cal.Rptr. 736 (1981)* ("a mortgagor in possession may not maintain an action to quiet title, even though the debt is unenforceable"); *Aguilar v. Bocci, 39 Cal.App.3d 475, 477, 114 Cal.Rptr. 91 (1974)* (trustor is unable to quiet title "without discharging his debt"). "A party may not without payment of the debt, enjoin a sale by a trustee under a power conferred by a deed of trust, or have his title quieted against the purchaser at such a sale, even though the statute of limitations has run against the indebtedness." *Sipe v. McKenna, 88 Cal.App.2d 1001, 1006, 200 P.2d 61 (1948)*.

Moreover, to obtain "rescission or cancellation, the rule is that the complainant is required to do equity, as a condition to his obtaining relief, by restoring to the defendant everything of value which the plaintiff has received in **[*15]** the transaction. . . . The rule applies although the plaintiff was induced to enter into the contract by the fraudulent representations of the defendant." *Fleming v. Kagan, 189 Cal.App.2d 791, 796, 11 Cal.Rptr. 737 (1961)*. "A valid and viable tender of payment of the indebtedness owing is essential to an action to cancel a voidable sale under a deed of trust." *Karlsen, 15 Cal.App.3d at 117, 92 Cal.Rptr. 851*. Analyzing "trust deed nonjudicial foreclosure sales issues in the context of common law contract principles" is "unhelpful" given "the comprehensive statutory scheme regulating nonjudicial foreclosure sales." *Residential Capital v. Cal-Western Reconveyance Corp., 108 Cal.App.4th 807, 820, 821, 134 Cal.Rptr.2d 162 (2003)*.

"The rules which govern tenders are strict and are strictly applied." *Nguyen v. Calhoun, 105 Cal.App.4th 428, 439, 129 Cal.Rptr.2d 436 (2003)*. "The tenderer must do and offer everything that is necessary on his part to complete the transaction, and must fairly make known his purpose without ambiguity, and the act of tender must be such that it needs only acceptance by the one to whom it is made to complete the transaction." *Gaffney v. Downey Savings & Loan Assn., 200 Cal.App.3d 1154, 1165, 246 Cal.Rptr. 421 (1988)*. **[*16]** The debtor bears "responsibility to make an unambiguous tender of the entire amount due or else suffer the consequence that the tender is of no effect." *Gaffney, 200 Cal.App.3d at 1165, 246 Cal.Rptr. 421*.

Defendants are correct that the "tender rule" applies "to any causes of action that derive from the wrongful foreclosure allegations or seek redress from foreclosure." Neither the FAC nor record references Ms. Ruiz' tender of indebtedness or meaningful ability to do so. In fact, the record reflects Ms. Ruiz' defaults and failure to cure them to indicate an inability to tender amounts owed on her loans. In addition, Mr. Ruiz fails to substantiate inapplicability of the tender rule based on MERS' status and inequity to require tender. Inequity results with Mr. Ruiz' attempts to thwart defendants' foreclosure rights given her continuing default. Without Ms. Ruiz' meaningful tender, Ms. Ruiz seeks empty remedies, not capable of being granted, to support dismissal of the FAC's claims seeking to challenge foreclosure.

Foreclosure Proceedings

Defendants challenge the FAC's allegations regarding foreclosure or related irregularities.

Under California law, a lender may pursue non-judicial foreclosure **[*17]** upon default with a deed of trust with a power of sale clause. "Financing or refinancing of real property is generally accomplished in California through a deed of trust. The borrower (trustor) executes a promissory note and deed of trust, thereby transferring an interest in the property to the lender (beneficiary) as security for repayment of the loan." *Bartold v. Glendale Federal Bank, 81 Cal.App.4th 816, 821, 97 Cal.Rptr.2d 226 (2000)*. A deed of trust "entitles the lender to reach some asset of the debtor if the note is not paid." *Alliance Mortgage Co. v. Rothwell, 10 Cal.4th 1226, 1235, 44 Cal.Rptr.2d 352, 900 P.2d 601 (1995)*.

If a borrower defaults on a loan and the deed of trust contains a power of sale clause, the lender may non-judicially foreclose. *See* *McDonald v. Smoke Creek Live Stock Co., 209 Cal. 231, 236-237, 286 P. 693 (1930)*. The California Court of Appeal has explained non-judicial foreclosure under the applicable California Civil Code sections:

> The comprehensive statutory framework established to govern nonjudicial foreclosure sales is intended to be exhaustive. . . . It includes a myriad of rules relating to notice and right to cure. It would be inconsistent with the comprehensive **[*18]** and exhaustive statutory scheme regulating nonjudicial foreclosures to incorporate another unrelated cure provision into statutory nonjudicial foreclosure proceedings.

Moeller v. Lien, 25 Cal.App.4th 822, 834, 30 Cal.Rptr.2d 777 (1994); *see* *I.E. Assoc. v. Safeco Title Ins. Co., 39 Cal.3d 281, 285, 216 Cal.Rptr. 438, 702 P.2d 596 (1985)* ("These provisions cover every aspect of exercise of the power of sale contained in a deed of trust.")

Non-judicial foreclosure sales "are governed by a 'comprehensive' statutory scheme. This scheme, which is found in Civil Code *sections 2924 through 2924k*, evidences a legislative intent that a sale which is properly conducted 'constitutes a final adjudication of the rights of the borrower and lender.'" *Royal Thrift and Loan Co. v. County Escrow, Inc., 123 Cal.App.4th 24, 32, 20 Cal.Rptr.3d 37 (2004)* (quoting *6 Angels, Inc. v. Stuart-Wright Mortgage, Inc., 85 Cal.App.4th 1279, 1283-1284, 102 Cal.Rptr.2d 711*, fn. omitted (2001)).

Under subparagraph (a)(1) of *California Civil Code section 2924* ("*section 2924*"), a "trustee, mortgagee or beneficiary or any of their authorized agents" may conduct the foreclosure process. Under *section 2924(b)(4)*, a "person authorized to record **[*19]** the notice of default or the notice of sale" includes "an agent for the mortgagee or beneficiary, an agent of the named trustee, any person designated in an executed substitution of trustee, or an agent of that substituted trustee." "Upon default by the trustor, the beneficiary may declare a default and proceed with a nonjudicial foreclosure sale." *Moeller, 25 Cal.App.4th at 830, 30 Cal.Rptr.2d 777*.

"A properly conducted nonjudicial foreclosure sale constitutes a final adjudication of the rights of the borrower and lender." *Moeller, 25 Cal.App.4th at 831, 30 Cal.Rptr.2d 777*. "As a general rule, a trustee's sale is complete upon acceptance of the final bid." *Nguyen v. Calhoun, 105 Cal.App.4th 428, 440-441, 129 Cal.Rptr.2d 436 (2003)*. "If the trustee's deed recites that all statutory notice requirements and procedures required by law for the conduct of the foreclosure have been satisfied, a rebuttable presumption arises that the sale has been conducted regularly and properly; this presumption is conclusive as to a bona fide purchaser." *Moeller, 25 Cal.App.4th at 831, 30 Cal.Rptr.2d 777* (citations omitted). "A nonjudicial foreclosure sale is accompanied by a common law presumption that **[*20]** it 'was conducted regularly and fairly.'" *Melendrez v. D & I Investment, Inc., 127 Cal.App.4th 1238, 1258, 26 Cal.Rptr.3d 413 (2005)* (quoting *Brown v. Busch, 152 Cal.App.2d 200, 204, 313 P.2d 19 (1957))*. "This presumption may only be rebutted by substantial evidence of prejudicial procedural irregularity." *Melendrez, 127 Cal.App.4th at 1258, 26 Cal.Rptr.3d 413*.

To challenge foreclosure, "it is necessary for the complaint to state a case within the code sections for which reason it is essential to allege the facts affecting the validity and invalidity of the instrument which is attacked." *Kroeker v. Hurlbert, 38 Cal.App.2d 261, 266, 101 P.2d 101 (1940)*. A "trustee or mortgagee may be liable to the trustor or mortgagor for damages sustained where there has been an illegal, fraudulent or wilfully oppressive sale of property under a power of sale contained in a mortgage or deed of trust." *Munger v. Moore, 11 Cal.App.3d 1, 7, 89 Cal.Rptr. 323 (1970)*. As the California Supreme Court explained decades ago:

> It is the general rule that courts have power to vacate a foreclosure sale where there has been fraud in the procurement of the foreclosure decree or where the sale has been improperly, unfairly **[*21]** or unlawfully conducted, or is tainted by fraud, or where there has been such a mistake that to allow it to stand would be inequitable to purchaser and parties. Sham bidding and the restriction of competition are condemned, and inadequacy of price when coupled with other circumstances of fraud may also constitute ground for setting aside the sale.

Bank of America Nat. Trust & Savings Ass'n v. Reidy, 15 Cal.2d 243, 248, 101 P.2d 77 (1940).

Robo-Signing

The FAC makes references to robo-signing loan and foreclosure documents and identifies Mr. Mitchell as a "robo-signer." Defendants characterize such allegations as "nonsensical" to the effect that Ms. Ruiz seeks to sue defendants because "they forged their own signatures on documents to which she was not even a party." Defendants contend that the FAC "fails to establish how [Ms. Ruiz] has standing to challenge the validity of an agent's signature on any of the recorded documents." Defendants note that "[t]here is no requirement that nonjudicially foreclosing parties 'prove' their authority to foreclose." Defendants further challenge "robo-signing allegations" as conclusory. *See* *Cerecedes v. U.S. Bankcorp, 2011 U.S. Dist. LEXIS 51452, 2011 WL 1666938, at *4 (C.D. Cal. 2011)* **[*22]** ("generic allegations of robo-signing and other unspecified irregularities are insufficient to place defendants on notice of how defendants violated those statutes").

The FAC lacks legally cognizable claims based on "robo-signing." "Robo-signing" allegations fail to establish a necessary statutory violation for wrongful foreclosure. The FAC fails to establish how alleged "robo-signing" precludes foreclosure of the property.

Standing To Foreclose

Defendants fault that FAC's attempt to challenge standing to foreclose. Defendants note that the Wolf Law Firm recorded the second notice of default as an authorized agent for MERS as first DOT beneficiary. Defendants continue that after the Wolf Law Firms substituted as trustee, it recorded a trustee's sale notice. A trustee's duties include "to initiate nonjudicial foreclosure on the property upon the trustor's default, resulting in a sale of the property." *Kachlon v. Markowitz, 168 Cal.App.4th 316, 334, 85 Cal.Rptr.3d 532 (2008)*. Defendants explain that MERS as beneficiary properly substituted the Wolf Law Firm as trustee to initiate foreclosure. "The beneficiary may make a substitution of trustee . . . to conduct the foreclosure and sale." **[*23]** *Kachlon, 168 Cal.App.4th at 334, 85 Cal.Rptr.3d 532*.

Ms. Ruiz claims to challenge MERS' authority to assign the first DOT on August 18, 2011 because "both the Promissory Note and Deed of Trust are extinguished" at the March 4, 2010 trustee's sale. Mr. Ruiz asserts "when MERS attempted to assign the Deed of Trust to Defendant Suntrust . . . , there was nothing to assign."

The FAC raises no legitimate grounds to challenge standing to foreclose on the property. The March 4, 2010 trustee's sale was rescinded to render it a nullity. The FAC points to no statutory irregularities to disrupt standing to foreclose. The FAC's standing allegations are unavailing.

Securitization

Defendants challenge the FAC's allegations that securitization of Ms. Ruiz' loans was unlawful to preclude foreclosure. Defendants note that sale of Ms. Ruiz' loans had "no effect on her obligations." The "request for declaratory relief is based on the erroneous theory that all defendants lost their power of sale pursuant to the deed of trust when the original promissory note was assigned to a trust pool. This argument is both unsupported and incorrect." *Hafiz v. Greenpoint Mortg. Funding, Inc., 652 F.Supp.2d 1039, 1043 (N.D. Cal. 2009)*. **[*24]** "[C]ourts have uniformly rejected that securitization of a mortgage loan provides the mortgagor a cause of action." *Velez v. The Bank Of New York Mellon, 2011 U.S. Dist. LEXIS 15481, 2011 WL 572523, at *4 (D. Hi. 2011)* ("The court also rejects Plaintiff's contention that securitization in general somehow gives rise to a cause of action - Plaintiff points to no law or provision in the mortgage preventing this practice, and otherwise cites to no law supporting that securitization can be the basis of a cause of action."

Defendants are correct that securitization of Ms. Ruiz' loans does not diminish the underlying power of sale upon Ms. Ruiz' default. The FAC's securitization allegations fail to support a necessary irregularity to question foreclosure of the property. Ms. Ruiz' opposition papers concede that "securitization has no affect [sic] on the power of sale clause on a deed of trust."

Note Possession

Defendants further attack FAC allegations that foreclosure is dependent on possession of Ms. Ruiz' original notes as well as joint possession of the notes and deeds of trust.

"Under California law, there is no requirement for the production of an original promissory note prior to initiation of a nonjudicial foreclosure. **[*25]** . . . Therefore, the absence of an original promissory note in a nonjudicial foreclosure does not render a foreclosure invalid." *Pantoja v. Countrywide Home Loans, Inc., 640 F.Supp.2d 1177, 1186 (N.D. Cal. 2009)*. "Pursuant to *section 2924(a)(1) of the California Civil Code*, the trustee of a Deed of Trust has the right to initiate the foreclosure process. Production of the original note is not required to proceed with a non-judicial foreclosure." *Hafiz, 652 F.Supp.2d at 1043* (citation omitted).

"Under Civil Code *section 2924*, no party needs to physically possess the promissory note." *Sicairos v. NDEX West, LLC, 2009 U.S. Dist. LEXIS 11223, 2009 WL 385855, *3 (S.D. Cal. 2009)* (citing *Cal. Civ. Code, § 2924(a)(1)*). Rather, "[t]he foreclosure process is commenced by the recording of a notice of default and election to sell by the trustee." *Moeller, 25 Cal.App.4th at 830, 30 Cal.Rptr.2d 777*. "The trustee has the power and the duty to initiate foreclosure proceedings on the property upon the trustor's default, resulting in a sale of the property." *Hafiz, 652*

F.Supp.2d at 1043 (citation omitted). An "allegation that the trustee did not have the original note or had not received it is insufficient to render the foreclosure **[*26]** proceeding invalid." Neal v. Juarez, 2007 U.S. Dist. LEXIS 98068, 2007 WL 2140640, *8 (S.D. Cal. 2007).

Defendants are correct that inclusion of Ms. Ruiz' promissory notes in an investor pool did not preclude foreclosure. The FAC's references to separating Mr. Ruiz' promissory notes from deeds of trust are unavailing given the absence of need to produce original promissory notes. The clear authority is that production of original promissory notes is unnecessary to initiate foreclosure. FAC allegations that defendants violated their pooling and service agreement ("PSA") are insufficient given Ms. Ruiz is not a PSA party and lacks grounds to enforce PSA provisions.

Moreover, Ms. Ruiz fails to substantiate her claim that "assignment of a Deed of Trust separate from the Promissory Note is not a valid assignment" and that "only the holder of the promissory note can foreclose." The authorities discussed above demonstrate the contrary.

MERS Authority

Defendants further challenge FAC allegations to the effect that MERS lacked authority to execute documents to render the documents fraudulent. Defendants note the absence of facts to support Ms. Ruiz' prejudice from foreclosure irregularities.

The California Court of Appeal has **[*27]** explained that prejudice is required for a wrongful foreclosure claim:

> We also note a plaintiff in a suit for wrongful foreclosure has generally been required to demonstrate the alleged imperfection in the foreclosure process was prejudicial to the plaintiff's interests. . . . Even if MERS lacked authority to transfer the note, it is difficult to conceive how plaintiff was prejudiced by MERS's purported assignment, and there is no allegation to this effect. Because a promissory note is a negotiable instrument, a borrower must anticipate it can and might be transferred to another creditor. As to plaintiff, an assignment merely substituted one creditor for another, without changing her obligations under the note. . . . If MERS indeed lacked authority to make the assignment, the true victim was not plaintiff but the original lender, which would have suffered the unauthorized loss of a $1 million promissory note.

Fontenot v. Wells Fargo Bank, N.A., 198 Cal.App.4th 256, 272, 129 Cal.Rptr.3d 467 (2011); *see* Knapp v. Doherty, 123 Cal.App.4th 76, 86, n. 4, 20 Cal.Rptr.3d 1 (2004) ("A nonjudicial foreclosure sale is presumed to have been conducted regularly and fairly; one attacking the sale **[*28]** must overcome this common law presumption 'by pleading and proving an improper procedure and the resulting prejudice.'"); Angell v. Superior Court, 73 Cal.App.4th 691, 700, 86 Cal.Rptr.2d 657 (1999) (failure to comply with procedural requirements must cause prejudice to plaintiff).

Prejudice is not presumed from "mere irregularities" in the process. Meux v. Trezevant, 132 Cal. 487, 490, 64 P. 848 (1901).

The FAC lacks allegations of requisite prejudice to Ms. Ruiz in connection with foreclosure, especially given her inability to tender amounts owed on her loans or to cure her defaults. Moreover, the first DOT empowers MERS "to exercise any or all of those interests, including, but not limited to, the right to foreclose and sell the Property; and to take any action required of Lender . . ." The FAC alleges no defect as to MERS to preclude foreclosure, especially given the absence of prejudice to Ms. Ruiz.

Fraud

The FAC's (second) fraud claim alleges that Mr. Mitchell signed the first DOT assignment claiming to be a MERS vice president although Mr. Mitchell is a SunTrust employee. The fraud claim references "forged or fraudulently signed" documents. Ms. Ruiz' opposition papers accuse SunTrust **[*29]** and MERS of fraudulently recording documents "alleging an ownership interest in Plaintiff's Property."

Defendants challenge the absence of facts to support fraud elements and to satisfy *F.R.Civ.P. 9(b)* pleading requirements.

Fraud Elements

The elements of a California fraud claim are: (1) misrepresentation (false representation, concealment or nondisclosure); (2) knowledge of the falsity (or "scienter"); (3) intent to defraud, i.e., to induce reliance; (4) justifiable reliance; and (5) resulting damage. *Lazar v. Superior Court, 12 Cal.4th 631, 638, 49 Cal.Rptr.2d 377, 909 P.2d 981 (1996)*. The same elements comprise a cause of action for negligent misrepresentation, except there is no requirement of intent to induce reliance. *Caldo v. Owens-Illinois, Inc., 125 Cal. App. 4th 513, 519, 23 Cal. Rtpr. 3d 1 (2004)*.

"[T]o establish a cause of action for fraud a plaintiff must plead and prove in full, factually and specifically, all of the elements of the cause of action." *Conrad v. Bank of America, 45 Cal.App.4th 133, 156, 53 Cal.Rptr.2d 336 (1996)*. There must be a showing "that the defendant thereby intended to induce the plaintiff to act to his detriment in reliance upon the false representation" and "that the **[*30]** plaintiff actually and justifiably relied upon the defendant's misrepresentation in acting to his detriment." *Conrad, 45 Cal.App.4th at 157, 53 Cal.Rptr.2d 336*. "The absence of any one of these required elements will preclude recovery." *Wilhelm v. Pray, Price, Williams & Russell, 186 Cal.App.3d 1324, 1332, 231 Cal.Rptr. 355 (1986)*.

Particularity Pleading Standard

F.R.Civ.P. 9(b) requires a party to "state with particularity the circumstances constituting fraud." [5] In the Ninth Circuit, "claims for fraud and negligent misrepresentation must meet *Rule 9(b)*'s particularity requirements." *Neilson v. Union Bank of California, N.A., 290 F.Supp.2d 1101, 1141 (C.D. Cal. 2003)*. A court may dismiss a claim grounded in fraud when its allegations fail to satisfy *F.R.Civ.P. 9(b)*'s heightened pleading requirements. *Vess, 317 F.3d at 1107*. [6] A motion to dismiss a claim "grounded in fraud" under *F.R.Civ.P. 9(b)* for failure to plead with particularity is the "functional equivalent" of a *F.R.Civ.P. 12(b)(6)* motion to dismiss for failure to state a claim. *Vess, 317 F.3d at 1107*. As a counter-balance, *F.R.Civ.P. 8(a)(2)* requires from a pleading "a short and plain statement of the claim showing that the **[*31]** pleader is entitled to relief."

F.R.Civ.P. 9(b)'s heightened pleading standard "is not an invitation to disregard Rule 8's requirement of simplicity, directness, and clarity" and "has among its purposes the avoidance of unnecessary discovery." *McHenry v. Renne, 84 F.3d 1172, 1178 (9th Cir. 1996)*. *F.R.Civ.P 9(b)* requires "specific" allegations **[*32]** of fraud "to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. "A pleading is sufficient under *Rule 9(b)* if it identifies the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations." *Neubronner v. Milken, 6 F.3d 666, 671-672 (9th Cir. 1993)* (internal quotations omitted; citing *Gottreich v. San Francisco Investment Corp., 552 F.2d 866, 866 (9th Cir. 1997))*. The Ninth Circuit has explained:

---

[5] *F.R.Civ.P. 9(b)*'s particularity requirement applies to state law causes of action: "[W]hile a federal court will examine state law to determine whether the elements of fraud have been pled sufficiently to state a cause of action, the *Rule 9(b)* requirement that the *circumstances* of the fraud must be stated with particularity is a federally imposed rule." *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103 (9th Cir. 2003)* (quoting *Hayduk v. Lanna, 775 F.2d 441, 443 (1st Cir. 1995)*(italics in original)).

[6] "In some cases, the plaintiff may allege a unified course of fraudulent conduct and rely entirely on that course of conduct as the basis of a claim. In that event, the claim is said to be 'grounded in fraud' or to 'sound in fraud,' and the pleading of that claim as a whole must satisfy the particularity requirement of *Rule 9(b)*." *Vess, 317 F.3d at 1103-1104*.

> Rule 9(b) requires particularized allegations of the circumstances *constituting* fraud. The time, place and content of an alleged misrepresentation may identify the statement or the omission complained of, but these circumstances do not "constitute" fraud. The statement in question must be false to be fraudulent. Accordingly, our cases have consistently required that circumstances indicating falseness be set forth. . . . [W]e [have] observed that plaintiff must include statements regarding the time, place, and *nature* of the alleged fraudulent activities, **[*33]** and that "mere conclusory allegations of fraud are insufficient." . . . The plaintiff must set forth what is false or misleading about a statement, and why it is false. In other words, the plaintiff must set forth an explanation as to why the statement or omission complained of was false or misleading. . . .
> In certain cases, to be sure, the requisite particularity might be supplied with great simplicity.

In Re Glenfed, Inc. Securities Litigation, 42 F.3d 1541, 1547-1548 (9th Cir. 1994) (en banc) (italics in original) *superseded by statute on other grounds as stated in* Marksman Partners, L.P. v. Chantal Pharm. Corp., 927 F.Supp. 1297 (C.D. Cal. 1996); *see* Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997) (fraud allegations must be accompanied by "the who, what, when, where, and how" of the misconduct charged); *see* Neubronner, 6 F.3d at 672 ("The complaint must specify facts as the times, dates, places, benefits received and other details of the alleged fraudulent activity."); Schreiber Distributing Co. v. Serv-Well Furniture Co., Inc., 806 F.2d 1393, 1401 (1986) ("the pleader must state the time, place, and specific content of the false representations as well as the identities of **[*34]** the parties to the misrepresentation").

In a fraud action against a corporation, a plaintiff must "allege the names of the persons who made the allegedly fraudulent representations, their authority to speak, to whom they spoke, what they said or wrote, and when it was said or written." Tarmann v. State Farm Mut. Auto. Ins. Co., 2 Cal.App.4th 153, 157, 2 Cal.Rptr.2d 861 (1991).

F.R.Civ.P. 9(b) "does not allow a complaint to merely lump multiple defendants together but 'require[s] plaintiffs to differentiate their allegations when suing more than one defendant . . . and inform each defendant separately of the allegations surrounding his alleged participation in the fraud.'" Swartz v. KPMG LLP, 476 F.3d 756, 764-765 (9th Cir. 2007) (quoting Haskin v. R.J. Reynolds Tobacco Co., 995 F.Supp. 1437, 1439 (M.D. Fla.1998)). In the context of a fraud suit involving multiple defendants, a plaintiff must, at a minimum, "identif[y] the role of [each] defendant[ ] in the alleged fraudulent scheme." Moore v. Kayport Package Express, Inc., 885 F.2d 531, 541 (9th Cir.1989). "To state a claim of fraudulent conduct, which carries substantial reputational costs, plaintiffs must provide each and every defendant **[*35]** with enough information to enable them 'to know what misrepresentations are attributable to them and what fraudulent conduct they are charged with.'" Pegasus Holdings v. Veterinary Centers of America, Inc., 38 F.Supp.2d 1158, 1163 (C.D. Cal. 1998) (quoting In re Worlds of Wonder Sec. Litig., 694 F.Supp. 1427, 1433 (N.D. Cal.1988)).

Defendants fault the FAC's failure to identify "any specific misrepresentation" made to Ms. Ruiz and the absence of facts that Mr. Mitchell fraudulently signed documents and misrepresented that he was a MERS assistant vice president. Defendants challenge the FAC's failure to satisfy F.R.Civ.P. 9(b)'s heightened pleading standards given the FAC's formulaic allegations "without any factual specificity." Defendants question how Ms. Ruiz' reliance on defendants' representations damaged Ms. Ruiz in the absence of her ability to challenge foreclosure and failure to satisfy loan obligations to avoid foreclosure.

Defendants raise valid points to attack the fraud claim which is subject to dismissal. The FAC lacks facts to identify specific statements, who made statements, authority to make statements, and when statements were made to satisfy fraud elements and F.R.Civ.P. 9(b) **[*36]** requirements. Ms. Ruiz' references to purported "robo-signing" and forgery are unavailing, especially given the absence of facts to support her justifiable reliance. The FAC's conclusory allegations fail to meet Rule 9(b)'s strict standard. The FAC lacks precise allegations to identify what defendants, through specifically identified and authorized agents or representatives, allegedly promised or represented to result in damage to Ms. Ruiz. Ms. Ruiz ignores that her default resulted in initiation of property foreclosure. The FAC lacks facts to support fraud elements let alone the who, what, when, when and how of alleged misconduct and the heightened federal pleading standard. The FAC's incomplete allegations are insufficient to warrant dismissal of the FAC claims sounding in fraud.

Slander Of Title

The FAC's (third) slander of title claim alleges that defendants "disparaged Plaintiff's exclusive valid title by and through the preparing, posting, publishing, and recording of the documents, including, but not limited to, the Notice of Trustee's Sale, and Trustee's Deed." The claim further alleges that defendants "knew of should have know that such documents were improper in that at the **[*37]** time of execution and delivery of said documents, Defendants had no right, title or interest in the Property." In her opposition papers, Mr. Ruiz claims that the second notice of default and election to sell under deed of trust, recorded on September 16, 2011, "was without effect and fraudulent" and "SunTrust knew it was fraudulent at the time it was filed."

The elements of slander of title are: (1) publication; (2) falsity; (3) absence of privilege; and (4) disparagement of another's land which is relied upon by a third party and which results in a pecuniary loss. *Appel v. Burman, 159 Cal.App.3d 1209, 1214, 206 Cal.Rptr. 259 (1984)*.

Defendants fault the FAC's absence of facts to support slander of title elements in that the FAC fails to address how recorded documents were false given Ms. Ruiz' acknowledged default. Defendants point to the privileged nature of recording, mailing and delivering foreclosure notices. *Section 2924(d)* renders as *California Civil Code section 47* "privileged communications" the "mailing, publication, and delivery" of foreclosure notices and "performance" of foreclosure procedures. "[W]e conclude that the protection granted to nonjudicial foreclosure . . . is **[*38]** the qualified common interest privilege of *section 47, subdivision (c)(1)*." *Kachlon v. Markowitz, 168 Cal.App.4th 316, 341, 85 Cal.Rptr.3d 532 (2008)*; *see* *Consumer Solutions REO, LLC v. Hillery, 658 F.Supp.2d 1002, 1018 (N.D. Cal. 2009)* (conduct is "protected by the qualified privilege of *§ 47(c)* so long as . . . not malicious"); *see also* *Hagberg v. California Federal Bank FSB, 32 Cal.4th 350, 361 7 Cal. Rptr. 3d 803, 81 P.3d 244 (2004)* ("As noted, the only tort claim we have identified as falling outside the privilege established by *section 47(b)* is malicious prosecution.").

Defendants continue that foreclosure notices do not slander title in that they do not disparage land. *See* *Ortiz v. Accredited Home Lenders, Inc., 639 F.Supp.2d 1159, 1168 (S.D. Cal. 2009)* ("The recorded foreclosure Notices do not affect Plaintiffs' title, ownership, or possession in the Property.") Lastly, defendants note the FAC's absence of allegations of how Ms. Ruiz' reliance on foreclosure documents caused her pecuniary loss.

Defendants are correct that the FAC lacks facts to support slander of title elements. The recording, mailing and delivery of foreclosure documents are privileged to negate a necessary element of the claim. **[*39]** Ms. Ruiz can plead no facts to revive a slander of title claim.

Quiet Title

The FAC's (fourth) quiet title claim seeks this Court's declaration that Ms. Ruiz is the property's "title owner of record" and to quiet title in Ms. Ruiz "as of the date on which is [sic] loan transaction was consumed."

Defendants challenge the quiet title claim's failure to satisfy statutory and tender requirements.

California Code of Civil Procedure section 760.010 provides for an action "to establish title against adverse claims to real or personal property or any interest therein." California Code of Civil Procedure section 761.020 mandates a "verified" complaint for a quiet title action to include:

1. A legal description and street address of the subject real property;
2. The title of plaintiff as to which determination is sought and the basis of the title;
3. The adverse claims to the title of the plaintiff against which a determination is sought;
4. The date as of which the determination is sought; and
5. A prayer for the determination of the title of the plaintiff against the adverse claims.

The quiet title remedy "is cumulative and not exclusive of any other remedy, form or right of action, or proceeding provided **[*40]** by law for establishing or quieting title to property." *Cal. Code Civ. Proc., § 760.030*.

The FAC is unverified and lacks the property's legal description and facts as to the title of which Ms. Ruiz seeks determination and the basis of Ms. Kham's purported title given her inability to tender amounts due on their loans. A quiet title claim requires an allegation that the plaintiffs "are the rightful owners of the property, i.e., that they have satisfied their obligations under the Deed of Trust." *See* *Kelley v. Mortgage Electronic Registration Systems, Inc., 642 F.Supp.2d 1048, 1057 (N.D. Cal. 2009)*. Defendants correctly question the FAC's reference to April 1, 2007, the date of loan consummation, as the date for quiet title purposes. The FAC lacks facts that Ms. Ruiz is the property's rightful owner, has satisfied DOT obligations and thus lacks a properly pled quiet title claim.

Moreover, a purported quiet title claim is doomed in the absence of a tender of amounts owed. "It is settled in California that a mortgagor cannot quiet his title against the mortgagee without paying the debt secured." *Shimpones v. Stickney, 219 Cal. 637, 649, 28 P.2d 673 (1934)*. "A party may not without payment **[*41]** of the debt, enjoin a sale by a trustee under a power conferred by a deed of trust, or have his title quieted against the purchaser at such a sale, even though the statute of limitations has run against the indebtedness." *Sipe v. McKenna, 88 Cal.App.2d 1001, 1006, 200 P.2d 61 (1948)*; *see* *Mix v. Sodd, 126 Cal.App.3d 386, 390, 178 Cal.Rptr. 736 (1981)* ("a mortgagor in possession may not maintain an action to quiet title, even though the debt is unenforceable"); *Aguilar v. Bocci, 39 Cal.App.3d 475, 477, 114 Cal.Rptr. 91 (1974)* (trustor is unable to quiet title "without discharging his debt. The cloud upon his title persists until the debt is paid.").

"A valid and viable tender of payment of the indebtedness owing is essential to an action to cancel a voidable sale under a deed of trust." *Karlsen, 15 Cal.App.3d at 117, 92 Cal.Rptr. 851*. An "action to set aside the sale, unaccompanied by an offer to redeem, would not state a cause of action which a court of equity would recognize." *Copsey v. Sacramento Bank, 133 Cal. 659, 662, 66 P. 7 (1901)*.

Ms. Ruiz is unable to quiet title in her favor without paying or tendering her outstanding indebtedness. With the FAC's absence of a meaningful ability **[*42]** or willingness to tender the indebtedness, a purported quiet title claim fails. This Court is not in a position to award Ms. Ruiz a windfall.

Lastly, defendants are correct that given the rescission of the foreclosure sale, defendants do not assert a right to title and Ms. Ruiz effectively seeks to quiet title against herself. The quiet title claim fails and is subject to dismissal.

Declaratory Relief

The FAC's (fifth) declaratory relief claim alleges that defendants "do not have authority to foreclose upon and sell the Property" and seeks "a judicial determination of the rights, obligations and interest of the parties with regard to the Property."

Defendants contend that Ms. Ruiz is not entitled to declaratory relief. Mr. Ruiz's response is confusing. Her opposition papers state: "Declaratory Relief fail [sic] because they are based on the same cause of action that Defendants lack the standing to foreclose."

The FAC lacks a viable declaratory relief claim. The Declaratory Judgment Act ("DJA"), *28 U.S.C. §§ 2201*, *2202*, provides in pertinent part:

> In a case of actual controversy within its jurisdiction . . . any court of the United States, upon the filing of an appropriate pleading, may declare **[*43]** the rights and other legal relations of any interested party seeking such declaration, whether or not further relief is or could be sought. Any such declaration shall have the force and effect of a final judgment or decree and shall be reviewable as such.

28 U.S.C. §2201(a).

The DJA's operation "is procedural only." *Aetna Life Ins. Co. of Hartford, Conn. v. Haworth, 300 U.S. 227, 240, 57 S.Ct. 461, 463, 81 L. Ed. 617 (1937)*. "A declaratory judgment is not a theory of recovery." *Commercial Union Ins. Co. v. Walbrook Ins. Co., Ltd., 41 F.3d 764, 775 (1st Cir. 1994)*. The DJA "merely offers an *additional remedy* to litigants." *Nat'l Union Fire Ins. Co. v. Karp, 108 F.3d 17, 21 (2nd Cir. 1997)* (italics in original). A DJA action requires a district court to "inquire whether there is a case of actual controversy within its jurisdiction." *American States Ins. Co. v. Kearns, 15 F.3d 142, 143 (9th Cir. 1994)*.

Declaratory relief is appropriate "(1) when the judgment will serve a useful purpose in clarifying and settling the legal relations in issue, and (2) when it will terminate and afford relief from the uncertainty, insecurity, and controversy giving rise to the proceeding." *Bilbrey by Bilbrey v. Brown, 738 F.2d 1462, 1470 (9th Cir.1984)*.

As **[*44]** to a controversy to invoke declaratory relief, the question is whether there is a "substantial controversy, between parties having adverse legal rights, or sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *Maryland Cas. Co. v. Pacific Coal & Oil Co., 312 U.S. 270, 273, 61 S.Ct. 510, 512, 85 L. Ed. 826 (1941)*. The U.S. Supreme Court has further explained:

> A justiciable controversy is thus distinguished from a difference or dispute of a hypothetical or abstract character; from one that is academic or moot. . . . The controversy must be definite and concrete, touching the legal relations of parties having adverse legal interests. . . . It must be a real and substantial controversy admitting of specific relief through a decree of a conclusive character, as distinguished from an opinion advising what the law would be upon a hypothetical state of facts.

Haworth, 300 U.S. at 240-241, 57 S.Ct. at 464 (citations omitted).

The failure of the FAC's claims as a whole demonstrates the absence of an actual controversy subject to declaratory relief. A declaratory relief action "brings to the present a litigable controversy, which otherwise might only be tried in the future." *Societe de Conditionnement v. Hunter Eng. Co., Inc., 655 F.2d 938, 943 (9th Cir. 1981)*. **[*45]** As an equitable remedy, declaratory relief is "dependent upon a substantive basis for liability" and has "no separate viability" if all other causes of action are barred. *Glue-Fold, Inc. v. Slautterback Corp., 82 Cal.App.4th 1018, 1023, n. 3, 98 Cal.Rptr.2d 661 (2000)*.

In the absence of a viable claim, the FAC fails to support declaratory relief. The FAC presents no litigable controversy to be tried in the future. The declaratory relief claim is subject to dismissal.

California Civil Code Section 2932.5

The FAC's sixth claim appears to allege violation of *California Civil Code section 2932.5* ("*section 2932.5*") and notes that "Fannie Mae never recorded its interest in the Deed of Trust and cannot foreclose on the Plaintiff's Property." Defendants construe the claim to allege wrongful foreclosure in absence of a first DOT assignment prior to foreclosure.

Section 2932.5 addresses power of sale under an assigned mortgage and provides:

> Where a power to sell real property is given to a mortgagee, or other encumbrancer, in an instrument intended to secure the payment of money, the power is part of the security and vests in any person who by assignment becomes entitled to payment of the money secured **[*46]** by the instrument. The power of sale may be exercised by the assignee if the assignment is duly acknowledge and recorded.

Defendants argue that deed of trust assignment is not necessary to validate nonjudicial foreclosure in that "by law, the security follows the transfer of the note." *California Civil Code section 2936* provides: "The assignment of a debt secured by mortgage carries with it the security." Defendants point out that a deed of trust assignment provides public notice of transfer in the beneficial interest but is not required for judicial foreclosure in that the trustee or an authorized agent may initiate foreclosure. Defendants are correct. As a reminder, *section 2924(b)(4)* provides that a "person authorized to record the notice of default or the notice of sale" includes "an agent for the mortgagee or beneficiary, an agent of the named trustee, any person designated in an executed substitution of trustee, or an agent of that substituted trustee." Defendants are further correct that Ms. Ruiz, as a defaulted borrower, lacks standing to challenge transfer of the first DOT. Ms. Ruiz offers nothing to support a section 2932.5 claim.

Unfair Competition Claim

The FAC's seventh claim **[*47]** purports to allege violations of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code, §§ 17200, et seq.* The claim alleges that:

1. Defendants "procured or offered false or fraudulently prepared documents to fabricate the missing gaps in the chain of title or to falsely demonstrate compliance with the PSA";
2. "MERS lacked authority to execute an assignment of the Deed of Trust from the original beneficiary to Defendants";
3. MERS and SunTrust "had knowledge that no such authority was ever bestowed upon it by the original lender, yet Defendant SunTrust still caused to be recorded the false documents with the county recorder"; and
4. The "assignment of the Deed of Trust recorded is signed by an individual purporting to be the 'Vice-President' of Defendant MERS" and "this individual did not have the authority or capacity to sign on behalf of Defendant MERS to cause the assignment."

Defendants fault the FAC's lack of facts to substantiate that defendants committed a UCL violation. Defendants note that their PSA compliance is irrelevant in that Ms. Ruiz is not a PSA party. Defendants challenge the FAC's identifying conduct subject to the UCL given the FAC's vague references to **[*48]** "fraudulent" recording and preparation of documents. Defendants point to the absence of facts that recorded documents were fraudulently signed given the conclusory allegation that "this individual did not have the authority or capacity to sign on behalf of Defendant MERS to cause the assignment."

"Unfair competition is defined to include 'unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising.'" *Blank v. Kirwan, 39 Cal.3d 311, 329, 216 Cal.Rptr. 718, 703 P.2d 58 (1985)* (quoting *Cal. Bus. & Prof. Code, § 17200*). The UCL establishes three varieties of unfair competition - "acts or practices which are unlawful, or unfair, or fraudulent." *Shvarts v. Budget Group, Inc., 81 Cal.App.4th 1153, 1157, 97 Cal.Rptr.2d 722 (2000)*. An "unlawful business activity" includes anything that can properly be called a business practice and that at the same time is forbidden by law. *Blank, 39 Cal.3d at 329, 216 Cal.Rptr. 718* (citing *People v. McKale, 25 Cal.3d 626, 631-632, 159 Cal.Rptr. 811, 602 P.2d 731 (1979))*. "A business practice is 'unlawful' if it is 'forbidden by law.'" *Walker v. Countrywide Home Loans, Inc., 98 Cal.App.4th 1158, 1169, 121 Cal.Rptr.2d 79 (2002)* **[*49]** (quoting *Farmers Ins. Exchange v. Superior Court, 2 Cal.4th 377, 383, 6 Cal.Rptr.2d 487, 826 P.2d 730 (1992))*.

The UCL prohibits "unlawful" practices "forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Superior Court, 27 Cal. App. 4th 832, 838, 33 Cal. Rptr. 2d 438 (1999)*. The UCL "thus creates an independent action when a business practice violates some other law." *Walker, 98 Cal.App.4th at 1169, 121 Cal.Rptr.2d 79*. According to the California Supreme Court, the UCL "borrows" violations of other laws and treats them as unlawful practices independently actionable under the UCL. *Farmers Ins. Exchange v. Superior Court, 2 Cal.4th 377, 383, 6 Cal.Rptr.2d 487, 826 P.2d 730 (1992)*.

A fellow district court has explained the borrowing of a violation of law other than the UCL:

> To state a claim for an "unlawful" business practice under the UCL, a plaintiff must assert the violation of any other law. *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 180, 83 Cal.Rptr.2d 548, 973 P.2d 527 (1999)* (stating, "By proscribing 'any unlawful' business practice, section 17200 'borrows' violations of other law and treats them as unlawful **[*50]** practices that the unfair competition law makes independently actionable.") (citation omitted). Where a plaintiff cannot state a claim under the "borrowed" law, she cannot state a UCL claim either. *See, e.g., Smith v. State Farm Mutual Automobile Ins. Co., 93 Cal.App.4th 700, 718, 113 Cal.Rptr.2d 399 (2001)*. Here, Plaintiff has predicated her "unlawful"

> business practices claim on her TILA claim. However, as discussed above, Plaintiff's attempt to state a claim under TILA has failed. Accordingly, Plaintiff has stated no "unlawful" UCL claim.

Rubio v. Capital One Bank, 572 F.Supp.2d 1157, 1168 (C.D. Cal. 2008).

"Unfair" under the UCL "means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cal-Tech Communications, 20 Cal.4th 163 at187, 83 Cal.Rptr.2d 548*. The "unfairness" prong of the UCL "does not give the courts a general license to review the fairness of contracts." *Samura v. Kaiser Found. Health Plan, 17 Cal.App.4th 1284, 1299, 22 Cal. Rptr. 2d 20* & n. 6, *17 Cal. App. 4th 1284, 22 Cal.Rptr.2d 20 (1993)*.

The "fraudulent" **[*51]** prong under the UCL requires a plaintiff to "show deception to some members of the public, or harm to the public interest," *Watson Laboratories, Inc. v. Rhone-Poulenc Rorer, Inc., 178 F.Supp.2d 1099, 1121 (C.D. Ca. 2001)*, or to allege that "members of the public are likely to be deceived," *Medical Instrument Development Laboratories v. Alcon Laboratories, 2005 U.S. Dist. LEXIS 41411, 2005 WL 1926673, at *5 (N.D. Cal. 2005)*.

"A plaintiff alleging unfair business practices under these statutes [UCL] must state with reasonable particularity the facts supporting the statutory elements of the violation." *Khoury v. Maly's of California, Inc., 14 Cal.App.4th 612, 619, 17 Cal.Rptr.2d 708 (1993)*.

The FAC fails to establish that defendants engaged in unlawful, unfair or fraudulent business practices under the UCL. In the absence of violation of a borrowed law, a UCL claim fails in that it cannot rest on purported deficiencies in foreclosure or related matters. The FAC lacks viable statutory or common law claims and lacks reasonable particularity of facts to support a UCL claim. Reliance on other invalid claims or "robo-signing" fails to support a viable UCL claim. Furthermore, the FAC lacks particularity of fraudulent circumstances, **[*52]** such as a misrepresentation, for a UCL claim, especially given failure of fraud-sounding claims, as discussed above. The FAC lacks facts to describe how consumers were deceived and to hint at a wrong subject to the UCL to warrant the UCL claim's dismissal.

Defendants also challenge the FAC's failure to allege that Ms. Ruiz suffered an injury cognizable under the UCL.

California Business and Professions Code section 17204 limits standing to bring a UCL claim to specified public officials and a private person "who has suffered injury in fact and has lost money or property as a result of the unfair competition." "This provision requires [plaintiff] to show that she has lost 'money or property' sufficient to constitute an 'injury in fact' under Article III of the Constitution, *see* *Birdsong v. Apple, Inc., 590 F.3d 955, 959-60 (9th Cir.2009)*, and also requires a 'causal connection' between [defendant's] alleged UCL violation and her injury in fact, *Hall v. Time Inc., 158 Cal.App.4th 847, 70 Cal.Rptr.3d 466, 471-72 (2008)*." *Rubio v. Capital One Bank, 613 F.3d 1195, 1204-1205 (9th Cir. 2010)*.

Business and Professions Code *section 17203* addresses UCL relief and provides in pertinent part:

> Any **[*53]** person who engages, has engaged, or proposes to engage in unfair competition may be enjoined in any court of competent jurisdiction. The court may make such orders or judgments . . . as may be necessary to restore to any person in interest any **money or property**, real or personal, which may have been acquired by means of such unfair competition. (Bold added.)

"In a suit under the UCL, a public prosecutor may collect civil penalties, but a private plaintiff's remedies are 'generally limited to injunctive relief and restitution.'" *Kasky v. Nike, Inc., 27 Cal.4th 939, 950, 119 Cal.Rptr.2d 296, 45 P.3d 243 (2002)* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 83 Cal.Rptr.2d 548, 973 P.2d 527 (1999))*.

Defendants correctly note the FAC's absence of facts of Ms. Ruiz' money or property allegedly lost due to a UCL violation or unfair competition given that her alleged damages are "self-inflicted" and arise from her default. The property's purported decrease in value is not attributable to defendants. Defendants are correct that the FAC fails to establish a causal connection between purported fraudulent documents and Ms. Ruiz' injury. The FAC lacks facts to support plaintiffs' **[*54]** standing to seek UCL relief to warrant dismissal of the UCL claim.

Punitive Damages

Defendants further seek to strike, pursuant to *F.R.Civ.P. 12(f)*, the FAC's punitive damages allegations in the absence of sufficient supporting allegations. This Court will analyze defendants' request to strike punitive damages allegations under *F.R.Civ.P. 12(b)(6)* standards given the decision of *Whittlestone, Inc. v. Handi-Craft Co., 618 F.3d 970, 971 (9th Cir. 2010)* ("We therefore hold that *Rule 12(f)* does not authorize district courts to strike claims for damages on the ground that such claims are precluded as a matter of law.") The FAC makes sporadic references punitive damages, and its prayer seeks punitive damages.

California Civil Code section 3294 ("*section 3294*") provides that in an action "for breach of an obligation not arising from contract," a plaintiff may seek punitive damages "where it is proven by clear and convincing evidence that the defendant has been guilty of oppression, fraud, or malice." *Cal. Civ. Code, § 3294(a)*. *Section 3294(c)(1)-(3)* defines:

> 1. "Malice" as "conduct which is intended by the defendant to cause injury to the plaintiff or despicable conduct which is carried on by **[*55]** the defendant with a willful and conscious disregard of the rights and safety of others";
> 2. "Oppression" as "despicable conduct that subjects a person to cruel and unjust hardship in conscious disregard of that person's rights"; and
> 3. "Fraud" as "an intentional misrepresentation, deceit, or concealment of a material fact known to the defendant with the intention on the part of the defendant of thereby depriving a person of property or legal rights or otherwise causing injury."

"Although the court will apply the substantive law embodied in *section 3294*, 'determinations regarding the adequacy of pleadings are governed by the Federal Rules of Civil Procedure.'" *Jackson v. East Bay Hosp., 980 F.Supp. 1341, 1353 (N.D. Cal. 1997)*.

Punitive damages are "available to a party who can plead and prove the facts and circumstances set forth in Civil Code *section 3294*." *Hilliard v. A.H. Robbins Co., 148 Cal.App.3d 374, 392, 196 Cal.Rptr. 117 (1983)*. "To support punitive damages, the complaint . . . must allege ultimate facts of the defendant's oppression, fraud, or malice." *Cyrus v. Haveson, 65 Cal.App.3d 306, 316-317, 135 Cal.Rptr. 246 (1976)*. Pleading the language in *section 3294* "is not objectionable **[*56]** when sufficient facts are alleged to support the allegation." *Perkins v. Superior Court, 117 Cal.App.3d 1, 6-7, 172 Cal.Rptr. 427 (1981)*.

In *G.D. Searle & Co. v. Superior Court, 49 Cal.App.3d 22, 29, 122 Cal.Rptr. 218 (1975)*, the California Court of Appeal explained punitive damages pleading:

> When the plaintiff alleges an intentional wrong, a prayer for exemplary damage may be supported by pleading that the wrong was committed willfully or with a design to injure. . . . When nondeliberate injury is charged, allegations that the defendant's conduct was wrongful, willful, wanton, reckless or unlawful do not support a claim for exemplary damages; such allegations do not charge malice. . . . When a defendant must produce evidence in defense of an exemplary damage claim; fairness demands that he receive adequate notice of the kind of conduct charged against him. (Citations omitted.)

"Allegations that the acts . . . were 'arbitrary, capricious, fraudulent, wrongful and unlawful,' like other adjectival descriptions of such proceedings, constitute mere conclusions of law . . ." *Faulkner v. California Toll Bridge Authority, 40 Cal.2d 317, 329, 253 P.2d 659 (1953)*; *see* *Lehto v. Underground Constr. Co., 69 Cal. App. 3d 933,* *944, 138 Cal. Rptr. 419 (1997)* **[*57]** (facts and circumstances of fraud should be set out clearly, concisely, and with sufficient particularity to support punitive damages); *Smith v. Superior Court, 10 Cal.App.4th 1033, 1042, 13 Cal.Rptr.2d 133 (1992)* (punitive damages claim is insufficient in that it is "devoid of any factual assertions supporting a conclusion petitioners acted with oppression, fraud or malice."); *Brousseau v. Jarrett, 73 Cal.App.3d 864, 872, 141 Cal.Rptr. 200 (1977)* ("conclusory characterization of defendant's conduct as intentional, willful and fraudulent is a patently insufficient statement of 'oppression, fraud, or malice, express or implied,' within the meaning of *section 3294*").

Punitive damages are never awarded as a matter of right, are disfavored by the law, and should be granted with the greatest of caution and only in the clearest of cases. *Henderson v. Security Pacific National Bank, 72 Cal.App.3d 764, 771, 140 Cal.Rptr. 388 (1977)*.

Defendants are correct that the FAC seeks punitive damages based on vague, conclusory allegations and lacks facts that defendants acted with requisite malice, oppression or fraud to support punitive damages claims. The FAC merely makes stray references to "fraudulent, **[*58]** oppressive, and malicious" with no facts to support such conclusions. The FAC lacks sufficient allegations of defendants' wrongdoing to impose punitive damages on defendants. Moreover, dismissal of plaintiffs' claims warrants dismissal of punitive damages claims.

Attempt At Amendment

As discussed above, the FAC's global claims are barred legally and as insufficiently pled, and Ms. Ruiz is unable to cure the FAC's claims by allegation of other facts and thus is not granted an attempt to amend. Moreover, this Court surmises that Ms. Ruiz brought this action in absence of good faith and seeks to exploit the court system to delay or to vex defendants' foreclosure of the property. Mr. Ruiz' unsuccessful attempt to remand this action bolsters such conclusion. The test for maliciousness is a subjective one and requires the court to "determine the . . . good faith of the applicant." *Kinney v. Plymouth Rock Squab Co., 236 U.S. 43, 46, 35 S. Ct. 236, 59 L. Ed. 457 (1915)*; *see Wright v. Newsome, 795 F.2d 964, 968, n. 1 (11th Cir. 1986)*; *cf. Glick v. Gutbrod, 782 F.2d 754, 757 (7th Cir. 1986)* (court has inherent power to dismiss case demonstrating "clear pattern of abuse of judicial process"). A lack of good faith or malice **[*59]** also can be inferred from a complaint containing untrue material allegations of fact or false statements made with intent to deceive the court. *See Horsey v. Asher, 741 F.2d 209, 212 (8th Cir. 1984)*. An attempt to vex or delay provides further grounds to dismiss this action.

CONCLUSION AND ORDER

For the reasons discussed above, this Court:

1. DISMISSES with prejudice this action against defendants;

2. DIRECTS the clerk to enter judgment in favor of defendants SunTrust Mortgage, Inc., Mortgage Electronic Registration Systems, Inc., and Federal National Mortgage Association and against plaintiff Florida Ruiz in that there is no just reason to delay to enter such judgment given that the Ms. Ruiz' claims against these defendants and their alleged liability are clear and distinct from claims against and liability of other defendants. *See F.R.Civ.P. 54(b)*;

3. ORDERS Ms. Ruiz, no later than July 31, 2012, to file papers to show cause why this Court should not dismiss this action against any remaining defendants, including The Wolf Firm.

This Court ADMONISHES Ms. Ruiz that this Court will dismiss this action against any remaining defendants if Ms. Ruiz fails to comply with this order and fails to [*60] file timely papers to show cause why this Court should not dismiss this action against any remaining defendants.

IT IS SO ORDERED.

Dated: July 24, 2012

Civil Procedure > ... > Writs > Common Law Writs > Mandamus

HN1[] **Common Law Writs, Mandamus**

A party requesting mandamus relief must meet two requirements. First, it must show that the trial court clearly abused its discretion. Second, it must show that it has no adequate remedy by appeal. The relators carry the burden of demonstrating their right to mandamus relief.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN2[] **Regulated Practices, Private Actions**

The legal authorities establishing federal jurisdiction to decide federal antitrust claims do not preclude state courts from exercising jurisdiction over state-law malpractice claims with embedded federal antitrust issues.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Concurrent Jurisdiction

HN3[] **Jurisdiction Over Actions, Concurrent Jurisdiction**

The general principle of state-court jurisdiction over cases arising under federal laws is straightforward: state courts may assume subject-matter jurisdiction over a federal cause of action absent provision by Congress to the contrary or disabling incompatibility between the federal claim and state-court adjudication. A court begins its analysis with the presumption that state courts enjoy concurrent jurisdiction. Jurisdiction may be exclusively confined to the federal courts by either explicit or implicit Congressional directive. Thus, the Supreme Court of the United States has held that the presumption of concurrent jurisdiction can be rebutted by an explicit statutory directive, by unmistakable implication from legislative history, or by a clear incompatibility between state-court jurisdiction and federal interests.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

HN4[] **Sherman Act, Jurisdiction**

Legal scholarship suggests that the legislative history of the Sherman Act indicates that exclusive jurisdiction was not intended.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

The cardinal policy undergirding the Sherman Act is maximizing consumer welfare through the promotion of economic competition.

Torts > Malpractice & Professional Liability > Attorneys

HN6[] **Malpractice & Professional Liability, Attorneys**

The policy undergirding the state-law tort of legal malpractice is to compensate an injured private party for its losses.

Opinion

[*840] Original Proceeding on Petition for Writ of Mandamus

This original proceeding concerns a legal malpractice claim relating to the handling of an antitrust matter.[1] The relators, **[*841]** Haynes and Boone, LLP and Patrick L. Hughes, are defendants in the malpractice suit. The real parties in interest, Rx.com, Inc. and its founder Joe S. Rosson, filed the suit alleging that the relators (and others) harmed them by failing to timely file an antitrust suit within the limitations period.

The relators contend that the suit presents embedded federal issues in the form of Sherman Act claims which must be proved to prevail on the malpractice cause of action and thus constitute a "case within the case." These federal issues are the basis for relators' invocation of exclusive federal subject-matter jurisdiction over the malpractice claim. They thus argue that Texas state courts lack subject-matter jurisdiction to entertain such claims. These arguments were presented in a plea to the jurisdiction, which the trial court denied. The relators then filed a petition for writ of mandamus to seek review of that ruling.

We conclude that the trial court correctly denied the plea and that Texas courts may exercise jurisdiction over legal malpractice claims related to antitrust matters. Accordingly, we deny the petition.

Background

Prior to the filing of the malpractice suit at issue in this original proceeding, Rx.com filed an antitrust complaint in federal district **[**3]** court against various pharmacy benefit manager defendants. In addition to state-law claims that were later abandoned, the complaint included three causes of action under the Sherman Act: agreement in restraint of trade in violation of *Section 1*; conspiracy to monopolize in violation of *Section 2*; and attempted monopolization in violation of *Section 2*. *See* *15 U.S.C. §§ 1*, *2*. The antitrust suit was dismissed on limitations grounds, and the Fifth Circuit Court of Appeals affirmed that judgment on appeal. *See* *Rx.com v. Medco Health Solutions, Inc., 322 Fed. Appx. 394 (5th Cir. 2009)*.

The real parties in interest sued Rx.com's former lawyers, including the relators, for legal malpractice in connection with the failure to timely file the antitrust suit. The petition was originally filed in a Texas state district court. The defendants removed the case to federal court, arguing that federal-question jurisdiction applied to the legal malpractice claims because of embedded federal questions relating to the original antitrust claims. *See* *Rx.com, Inc. v. O'Quinn, 766 F. Supp. 2d 790, 793 (S.D. Tex. 2011)*. The federal district court analyzed the question of whether the legal malpractice claims were **[**4]** ones "arising under" federal law, *28 U.S.C. § 1331*, applying the standard articulated by the United States Supreme Court in *Grable & Sons Metal Products, Inc. v. Darue Engineering & Manufacturing, 545 U.S. 308, 125 S. Ct. 2363, 162 L. Ed. 2d 257 (2005)*, and considering whether the malpractice claims "necessarily raise a stated federal issue [that is] actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities." *Rx.com, 766 F. Supp. 2d at 794* (quoting *Grable, 545 U.S. at 314, 125 S. Ct. at 2368*). Relying in significant measure upon the Fifth Circuit's application of the *Grable* standard to a legal malpractice claim in *Singh v. Duane Morris LLP, 538 F.3d 334 (5th Cir. 2008)*, the federal court concluded that two of the necessary elements—a substantial federal interest and a lack of disruption to the balance of federal and state judicial responsibilities—were not present. Accordingly, the federal district court found that federal-question jurisdiction did not exist, and the case was remanded to state court. *See* *Rx.com, 766 F. Supp. 2d at 797*.

[*842] Following the remand to state court, two new opinions **[**5]** were issued in other cases, which the relators contend provided supervening authority to support their contention that the case belongs in federal court. In

[1] At the time relators filed their mandamus petition, the underlying case was styled *Rx.com, Inc. and Joe S. Rosson v. John M. O'Quinn & Associates, PLLC d/b/a The O'Quinn Law Firm, John M. O'Quinn & Associates, L.L.P., Laminack,* ***[**2]*** *Pirtle & Martines, L.L.P., Richard M. Laminack, Thomas W. Pirtle, Haynes & Boone, L.L.P., and Patrick Hughes*, No. 2010-66863, in the 80th Judicial District of Harris County, Texas. The respondent is the Honorable Larry Weiman.

USPPS, Ltd. v. Avery Dennison Corp.—a case in which federal subject-matter jurisdiction was apparently undisputed due to the diversity of the parties—the Fifth Circuit applied the *Grable* test to determine that a state-law legal malpractice claim arose under federal patent law so as to invoke the exclusive appellate jurisdiction of the Federal Circuit.[2] Accordingly, the *USPPS* appeal was transferred to the Federal Circuit.[3]

Then the Supreme Court of Texas held, in *Minton v. Gunn*, that the federal courts have exclusive subject-matter jurisdiction over a malpractice claim arising out of legal representation in a patent infringement action. *See* 355 S.W.3d 634, 646 (Tex. 2011), *petition for cert. filed*, No. 11-1118 (U.S. Mar. 9, 2012). The *Minton* case originated in state court and was dismissed on a motion for summary judgment. *See* *id. at 638*. However, in addition to granting federal jurisdiction over cases arising under federal patent law, 28 U.S.C. § 1338(a) also specifically prohibits state courts from exercising jurisdiction over the same category of cases.[4] The claimant thus raised a subject-matter jurisdiction objection on appeal, and that argument was ultimately vindicated by the Supreme Court, which concluded, "based upon the specific facts of this case,"[5] that the **[**7]** embedded federal question "triggered exclusive federal patent jurisdiction," requiring dismissal of the case without considering its merits. *Minton, 355 S.W.3d at 646-47*.

Relying primarily on *USPPS* and *Minton*, the relators re-urged their arguments in the trial court by filing a plea to the jurisdiction. As part of the argument presented **[*843]** to the trial court, the relators contended that "determining whether Rx.com would have prevailed will entail litigation of the full panoply of factual and legal issues attending to a Sherman Act claim." The trial court denied the plea,[6] and the relators filed their mandamus petition, seeking relief from the trial court's continuing exercise of subject-matter jurisdiction over the case.

---

[2] *See* *USPPS, Ltd. v. Avery Dennison Corp., 647 F.3d 274, 277-82 (5th Cir. 2011)*; *28 U.S.C. § 1295(a)(1)* ("The United States Court of Appeals for the Federal Circuit shall have exclusive jurisdiction . . . of an appeal from a final decision of a district court of the United States . . . in any civil action arising under . . . any Act of Congress relating to patents . . . .").

[3] *See* *USPPS, 647 F.3d at 284*. Notably, two judges of the Federal Circuit subsequently concurred in the judgment affirming the trial court in *USPPS* while noting their disagreement with their court's precedents applying *Grable*, which they characterized **[**6]** as turning what "would otherwise be a 'clearly wrong' transfer decision into one that is 'plausible,'" thus requiring their court "to accept the transfer and resolve the merits of the appeal." *Id. at 1350* (O'Malley, J., concurring) (quoting *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 817-19, 108 S. Ct. 2166, 2178-79, 100 L. Ed. 2d 811 (1988))*.

[4] *See* *28 U.S.C. § 1338(a)* ("No State court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents . . . ."). This statute, expressly depriving state courts of jurisdiction over claims arising under federal patent law, was amended in 2011. *See* Act of Sept. 16, 2011, § 19(a), 125 Stat. 331. The prior version of the statute provided: "The district courts shall have original jurisdiction of any civil action arising under any Act of Congress relating to patents . . . . Such jurisdiction shall be exclusive of the courts of the states in patent . . . cases." Act of June 25, 1948, ch. 646, 62 Stat. 931.

[5] The Supreme Court specifically disavowed a broad interpretation of its holding such that "all legal malpractice suits arising out of patent litigation" might be considered "to fall under the exclusive patent law jurisdiction of the federal courts." *Minton v. Gunn, 355 S.W.3d 634, 646 (Tex. 2011)*, *petition for cert. filed*, No. 11-1118 (U.S. Mar. 9, 2012). The Court indicated that **[**8]** "any state litigant asserting a legal malpractice action to recover for damages resulting from his patent attorney's negligence in patent prosecution or litigation must also satisfy all four elements of the *Grable* test to place his claim under exclusive federal jurisdiction." *Id*.

[6] The relators filed a motion in the trial court to stay proceedings pending our resolution of the mandamus petition, and in that context the parties disputed the significance of our request for a response to the relators' petition. Mandamus relief (other than temporary relief) cannot be granted unless the court receives or requests a response. ***Tex. R. App. P. 52.4***. **[**9]** But regardless of whether the court has preliminarily decided that a petition may be meritorious, a response often aids the efficient use of judicial resources by inviting the real party in interest to offer its own legal analysis and perspective of the challenged action. Accordingly, the mere request for a response does not imply any preliminary judgment about the merits of the petition. ***Rule 52.8*** does not suggest otherwise—that rule provides that "*[i]f* the court is of the tentative opinion that relator is entitled to the relief sought or that a serious question concerning the relief requires further consideration . . . the court *must* request a response if one has not been filed." ***Tex. R. App. P. 52.8(b)(1)*** (emphasis supplied).

Analysis

HN1[] A party requesting mandamus relief must meet two requirements. First, it must show that the trial court clearly abused its discretion. *In re Prudential Ins. Co., 148 S.W.3d 124, 135 (Tex. 2004)* (orig. proceeding). Second, it must show that it has no adequate remedy by appeal. *Id. at 135-36*. The relators carry the burden of demonstrating their right to mandamus relief. *See* *Canadian Helicopters Ltd. v. Wittig, 876 S.W.2d 304, 305 (Tex. 1994)* (orig. **[**10]** proceeding).

We will focus our analysis on the relators' contention that the trial court has abused its discretion by exercising subject-matter jurisdiction over this legal malpractice case. The relators' arguments rely on *USPPS* and *Minton*, as well as other cases involving legal malpractice in the patent-law context,[7] as precedents for applying the *Grable* standard to determine when a state-law cause of action "arises under" federal law because of an embedded federal issue.

As explained below, the relators' argument wrongly assumes the relevance in this circumstance of the "arising under" standard as applied in *Grable* and its progeny. Because there is no nexus between the "arising under" standard and the question of whether federal courts have exclusive jurisdiction over the embedded federal antitrust issues, we reject relators' suggestion that the *Grable* standard provides the appropriate frame of analysis. Instead, applying the standard of *Gulf Offshore Co. v. Mobil Oil Corp., 453 U.S. 473, 101 S. Ct. 2870, 69 L. Ed. 2d 784 (1981)*, **[**11]** we conclude that *HN2*[] the legal authorities establishing federal jurisdiction to decide federal antitrust claims do not preclude state courts from exercising jurisdiction over state-law malpractice claims with embedded federal antitrust issues.

I. *Grable* and its specific application relating to patent law

In *Grable*, the United States Supreme Court analyzed whether the claim presented in that case was one "arising under the Constitution, laws, or treaties of the United States" for purposes of federal-question jurisdiction as provided in *28 U.S.C. § 1331*. The claim at issue was a suit to **[*844]** quiet title originally filed in state court, and it was subsequently removed to federal court on the grounds that the case presented a question of federal tax law. *Grable, 545 U.S. at 311, 125 S. Ct. at 2366*. If the case could have been originally brought in federal district court, then removal of the case from state court to federal court was proper under *28 U.S.C. § 1441(a)*. *See* *id. at 312, 125 S. Ct. at 2366*. Under *Grable*, in order for a state-law claim with an embedded federal question to "aris[e] under the Constitution, laws, or treaties of the United States" such that federal courts have subject-matter **[**12]** jurisdiction over that claim pursuant to *section 1331*, the state-law claim must (1) raise a stated federal issue that is (2) actually disputed and (3) substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities. *See* *id. at 314, 125 S. Ct. at 2368*.

Because *Grable* is an application of the "arising under" standard of *28 U.S.C. § 1331*, the rule articulated in that case has special application with respect to patent cases, as federal courts have exclusive jurisdiction over all cases "arising under" patent law pursuant to *28 U.S.C. § 1338(a)*, and the "arising under" language of that statute has been interpreted to apply in the same way that it does for purposes of *section 1331*.[8] Thus, the United States Court of Appeals for the Federal Circuit has applied the *Grable* standard to determine whether patent issues embedded within state-law legal malpractice claims arose under federal patent law, so as to permit federal courts to exercise jurisdiction over the claims.[9] The Federal Circuit precedents in this area have concerned whether federal

---

[7] *E.g.,* *Air Measurement Techs., Inc. v. Akin Gump Strauss Hauer & Feld, L.L.P., 504 F.3d 1262 (Fed. Cir. 2007)*; *Immunocept, LLC v. Fulbright & Jaworski, LLP, 504 F.3d 1281 (Fed. Cir. 2007)*.

[8] *See* *Christianson, 486 U.S. at 808-09, 108 S. Ct. at 2173-74*; *Air Measurement, 504 F.3d at 1271*.

courts could exercise subject-matter jurisdiction over the state-law **[**13]** legal malpractice claims, and they have not been directly concerned with whether the state courts could exercise concurrent jurisdiction over such claims.

The authority of a state court to exercise jurisdiction over a legal malpractice claim involving patent issues was the central issue presented in *Minton v. Gunn. Minton* is procedurally distinguishable from the Federal Circuit precedents because it involved Texas state courts deciding whether a legal malpractice claim arose under federal patent law, not to determine whether a federal court could exercise jurisdiction over the claim, but to determine whether the state courts were forbidden from exercising jurisdiction over the claim. In contrast to *section 1331*, which merely describes an affirmative grant of power for federal courts to exercise jurisdiction over cases "arising under" federal law,[10] *section 1338(a)* both grants power for federal **[*845]** courts to exercise jurisdiction over cases "arising under" patent law[11] and also has a converse effect on the jurisdiction of state courts, which are specifically forbidden from exercising jurisdiction over the same scope of claims.[12] Thus the issue presented in *Minton* was not merely whether the federal courts were authorized to exercise jurisdiction over the **[**15]** claim. That issue had to be considered, but only as a necessary part of the analysis of whether the state courts were prohibited by *section 1338(a)* from exercising jurisdiction over the claim. The Supreme Court of Texas applied the *Grable* test and held in *Minton* that the particular legal malpractice claim at issue arose under federal patent law. Because federal jurisdiction is exclusive over claims arising under federal patent law, *28 U.S.C. § 1338(a)*, the state courts could not exercise subject-matter jurisdiction.

The relators in this original proceeding present yet a different scenario. Their argument is similar to the issue presented **[**16]** in *Minton*, insofar as we are asked to decide whether the state courts are forbidden from exercising jurisdiction over a state-law legal malpractice claim because of an embedded federal question. However, the embedded federal issue in this case involves ***antitrust law*** instead of patent law. Accordingly, the *Grable* analysis is only relevant to this proceeding if, as in the context of patent law, state courts are forbidden to exercise jurisdiction over any claims "arising under" federal ***antitrust law***.

II. Presumed concurrent jurisdiction of state courts

HN3[] "The general principle of state-court jurisdiction over cases arising under federal laws is straightforward: state courts may assume subject-matter jurisdiction over a federal cause of action absent provision by Congress to the contrary or disabling incompatibility between the federal claim and state-court adjudication." *Gulf Offshore Co. v. Mobil Oil Corp., 453 U.S. 473, 477-78, 101 S. Ct. 2870, 2875, 69 L. Ed. 2d 784 (1981)*. We begin our analysis with "the presumption that state courts enjoy concurrent jurisdiction." *Id. at 478, 101 S. Ct. at 2875*. Jurisdiction may

---

[9] In *Air Measurement Technologies, Inc. v. Akin Gump Strauss Hauer & Feld, L.L.P*., a legal malpractice claim was removed from state court, and the plaintiffs appealed the interlocutory decision to deny a remand back to state court. *See 504 F.3d 1262, 1265 (Fed. Cir. 2007)*. The federal district court applied the *Grable* test to determine that legal malpractice claim arose under patent law for purposes of *28 U.S.C. § 1338(a)*. *See id. at 1267*. Because the Federal Circuit agreed that federal jurisdiction could be exercised pursuant to *§ 1338(a)*, the district court's refusal to remand the case was affirmed. *See id. at 1273*; *see also 28 U.S.C. § 1447(c)* ("If at any time before final judgment it appears that the district court lacks subject matter jurisdiction, the case shall be remanded."). Similarly, the Federal Circuit found that *28 U.S.C. § 1338(a)* jurisdiction could be exercised over another legal malpractice claim involving federal patent **[**14]** issues in *Immunocept, LLC v. Fulbright & Jaworski, LLP, 504 F.3d 1281 (Fed. Cir. 2007)*.

[10] *See 28 U.S.C. § 1331* ("The district courts shall have original jurisdiction of all civil actions arising under the Constitution, laws, or treaties of the United States.").

[11] *See 28 U.S.C. § 1338(a)* ("The district courts shall have original jurisdiction of any civil action arising under any Act of Congress relating to patents, plant variety protection, copyrights and trademarks.").

[12] *See id*. ("No State court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents, plant variety protection, or copyrights.").

be exclusively confined to the federal courts by either explicit or implicit Congressional **[**17]** directive. *See id*. Thus, the Supreme Court of the United States has held that "the presumption of concurrent jurisdiction can be rebutted by an explicit statutory directive, by unmistakable implication from legislative history, or by a clear incompatibility between state-court jurisdiction and federal interests." *Id*.; *see also* *Tafflin v. Levitt, 493 U.S. 455, 459-60, 110 S. Ct. 792, 795, 107 L. Ed. 2d 887 (1990)*.

Relators have produced no authority that Congress explicitly granted federal courts exclusive jurisdiction of all cases "arising under" the federal antitrust laws. Congress did grant federal district courts "original jurisdiction of any civil action or proceeding arising under any Act of Congress regulating commerce or protecting trade and commerce against restraints and monopolies." *28 U.S.C. § 1337(a)*. In addition, the Clayton Act authorizes a private cause of action to be pursued in federal court for injury to "business or property by reason of anything forbidden in the antitrust laws," *15 U.S.C. § 15(a)*, including the specific right to seek "injunctive relief . . . against threatened loss or damage **[*846]** by a violation of the antitrust laws," *15 U.S.C. § 26*. With specific reference to the Clayton **[**18]** Act's authorization of injunctive relief to be obtained from "any court of the United States having jurisdiction over the parties," the Supreme Court has stated that "[t]his right to sue . . . is granted in terms which show that it is to be exercised only in a 'court of the United States.'" *Gen. Inv. Co. v. Lake Shore & M.S. Ry. Co., 260 U.S. 261, 287, 43 S. Ct. 106, 117, 67 L. Ed. 244, 1 Ohio Law Abs. 162 (1922)*. Subsequent cases have relied on *General Investment* for the proposition that federal antitrust claims are within the exclusive jurisdiction of the federal courts,[13] despite suggestions[14] that this rule appears to be at odds with the modern understanding that "[i]t is black letter law . . . that the mere grant of jurisdiction to a federal court does not operate to oust a state court from concurrent jurisdiction over the cause of action." *Gulf Offshore, 453 U.S. at 479, 101 S. Ct. at 2875-76*; *see also* *Martinez v. California, 444 U.S. 277, 283 n.7, 100 S. Ct. 553, 558 n.7, 62 L. Ed. 2d 481 (1980)*.

The principle that "federal antitrust claims are within the exclusive jurisdiction of the federal courts" only has been suggested in connection with actual federal antitrust causes of action, and the relators have provided us no example of the rule ever being applied to the broader universe of all claims "arising under" federal ***antitrust law***.[15] Nor have the relators demonstrated any alternative basis for inferring that scope of exclusive federal jurisdiction

[13] *E.g.*, *Marrese v. Am. Acad. of Orthopaedic Surgeons, 470 U.S. 373, 379, 105 S. Ct. 1327, 1331, 84 L. Ed. 2d 274 (1985)*; *see also* *Miller v. Granados, 529 F.2d 393, 395 (5th Cir. 1976)* ("[T]he jurisdiction conferred by Congress on federal courts under the **[**19]** Sherman Act is exclusive.").

[14] *See, e.g.*, *Tafflin v. Levitt, 493 U.S. 455, 470-71, 110 S. Ct. 792, 801, 107 L. Ed. 2d 887 (1990)* (Scalia, J., concurring) (characterizing the analysis in *General Investment as* "less than compelling"); *Vill. of Bolingbrook v. Citizens Utils. Co., 864 F.2d 481, 484-85 (7th Cir. 1988)* ("One may doubt whether in light of *Mitsubishi [Motors Corp. v. Soler Chrysler—Plymouth, Inc., 473 U.S. 614, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)]* antitrust is still an exclusive province of the federal courts.").

[15] All of the case law provided to us by the relators involved or otherwise made specific reference to federal antitrust causes of action. *See* *Tafflin, 493 U.S. at 462, 110 S. Ct. at 796-97* (in context **[**21]** of holding that state courts have concurrent jurisdiction over civil RICO actions, noting that the Supreme Court has "interpreted *§ 4* of the Clayton Act to confer exclusive jurisdiction on the federal courts" (citing *Gen. Inv., 260 U.S. at 286-88, 43 S. Ct. at 116-17*)); *Marrese, 470 U.S. 373, 379, 105 S. Ct. 1327, 84 L. Ed. 2d 274* (in context of holding that a federal court must consider "the preclusive effect of a state court judgment in a subsequent lawsuit involving federal antitrust claims within the exclusive jurisdiction of the federal courts," noting that "[a]lthough federal antitrust claims are within the exclusive jurisdiction of the federal courts [citing *General Investment*], the Court of Appeals ruled that the dismissal of petitioners' complaints in state court barred them from bringing a claim based on the same facts under the Sherman Act"); *Hathorn v. Lovorn, 457 U.S. 255, 266 n.18, 102 S. Ct. 2421, 2429 n.18, 72 L. Ed. 2d 824 (1982)* (in context of holding that state courts are authorized to decide whether the Voting Rights Act applies to a proposed change in voting procedures, noting that "although state courts lack jurisdiction to entertain suits brought pursuant to *§ 4* of the Clayton Act, *15 U.S.C. § 15*, they often decide **[**22]** issues concerning the federal antitrust laws in other contexts"); *Freeman v. Bee Mach. Co., 319 U.S. 448, 450, 63 S. Ct. 1146, 1147, 87 L. Ed. 1509, 1943 Dec. Comm'r Pat. 771 (1943)* (after contract claim was removed to federal court, "respondent moved to amend its declaration by adding a complaint for treble damages under *§ 4* of the Clayton Act"); *Blumenstock Bros. Advertising Agency v. Curtis Pub. Co., 252 U.S. 436, 441, 40 S. Ct. 385, 387 (1920)* (in context of suit for treble damages under *§ 7* of the Sherman Act, observing that "the controversy concerns subject-matter limited by federal law, for which recovery can be had only in the federal courts").

[*847] based upon an "unmistakable implication from legislative history," or "a clear incompatibility between state-court jurisdiction and federal interests."[16] *Gulf Offshore, 453 U.S. at 478, 101 S. Ct. at 2875*. To the contrary, ***HN4***[] legal scholarship suggests **[**20]** that "[t]he legislative history of the Sherman Act indicates that exclusive jurisdiction was not intended." Note, *Exclusive Jurisdiction of the Federal Courts in Private Civil Actions*, 70 HARV. L. REV. 509, 510 n.13 (1957) (citing S. Doc. No. 147, 57th Cong., 2d Sess. 311-13, 317, 320-21, 334 (1903)). And we perceive no clear incompatibility between state-court jurisdiction over the legal malpractice claim at issue and federal interests. ***HN5***[] The cardinal policy undergirding the Sherman Act is maximizing consumer welfare through the promotion of economic competition.[17] By contrast, ***HN6***[] the policy undergirding the state-law tort of legal malpractice is to compensate an injured private party for its losses. *See* *Akin, Gump, Strauss, Hauer & Feld, L.L.P. v. Nat'l Dev. & Research Corp., 299 S.W.3d 106, 122 (Tex. 2009)*. State-court adjudication of claims alleging injuries resulting from legal malpractice does not threaten to undermine the federal interest in preventing restraints on free competition.

The claims at issue in this case are state-law malpractice claims, and they are not causes of action created or specifically authorized by federal antitrust laws.[18] An analysis applying *Grable* and *Minton* would inform the question of whether the malpractice claim may "arise under" federal ***antitrust law*** pursuant to *28 U.S.C. § 1337(a)* and therefore be a candidate for concurrent federal subject-matter jurisdiction. But absent authority that state courts are prohibited from exercising jurisdiction over all claims "arising under" federal ***antitrust law***, the *Grable* analysis does not determine whether the malpractice claim is subject to exclusive federal jurisdiction. The relators thus have made no showing that federal jurisdiction over these claims is exclusive to federal courts to the exclusion of otherwise presumed concurrent state-court jurisdiction.

We conclude that the relators have failed to demonstrate a clear abuse of the trial court's discretion. *See* *Canadian Helicopters, 876 S.W.2d at 305*; *Walker, 827 S.W.2d at 837*. To the contrary, we conclude that the trial court is properly exercising jurisdiction over the state-law malpractice claim.[19]

[*848] Conclusion

We conclude that Texas courts are not prohibited from exercising jurisdiction over the state-law legal malpractice claims in this case. Because we conclude that no clear abuse of discretion has been shown, we express no opinion

---

[16] The relators' petition focuses on the *Grable* test and its consideration of whether the exercise of federal jurisdiction over an overlying state-law claim would disturb "any congressionally approved balance of federal and state judicial responsibilities." *Grable, 545 U.S. at 314, 125 S. Ct. 2368*; *Minton, 355 S.W.3d at 640*. Accordingly, their arguments are oriented towards justifying the federal interest in adjudicating the claim. The more appropriate question is whether state courts may exercise their presumed concurrent jurisdiction without offending some federal interest.

[17] *See,* ***[**23]*** *e.g.,* *Am. Needle, Inc. v. Nat'l Football League, 130 S. Ct. 2201, 2212, 176 L. Ed. 2d 947 (2010)*; *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 2713, 168 L. Ed. 2d 623 (2007)*; *see generally* ROBERT H. BORK, THE ANTITRUST PARADOX 50-71 (1993 ed.).

[18] *Cf.* *Wilshire Oil Co. v. Riffe, 409 F.2d 1277, 1284 (10th Cir. 1969)* (distinguishing federal **[**24]** antitrust claim from employer's common-law right to recover antitrust fine from employees whose conduct occasioned the fine).

[19] We also note that a conclusion that federal courts have exclusive subject-matter jurisdiction over this malpractice claim would be diametrically opposed to the prior ruling in this same dispute that "federal question jurisdiction does not exist in this case, and removal was not proper on this basis." *Rx.com, Inc. v. O'Quinn, 766 F. Supp. 2d 790, 793, 797 (S.D. Tex. 2011)*. If we granted the relief sought by the relators, the real parties in interest would face the circumstance of having to re-file their claims in federal district court after one federal district judge has already ruled that there is no federal subject-matter jurisdiction over the claim. A federal court—perhaps even the same federal district judge—might then be forced to either exercise jurisdiction **[**25]** or effectively leave the real parties judicially homeless, shunned by both state and federal courts refusing to exercise jurisdiction to resolve their claims on the merits. Such "jurisdictional ping-pong" is undesirable due to its tendency to "undermine public confidence in our judiciary" and "squander private and public resources." *Christianson, 486 U.S. at 818-19, 108 S. Ct. at 2179*.

about what circumstances would permit a private litigant to obtain review of the denial of a plea to the jurisdiction by means of a petition for writ of mandamus due to the alleged inadequacy of the remedy of appeal from a final judgment.

Accordingly, we deny the petition for writ of mandamus.

CONCURRING OPINION

I join in the Court's opinion holding that federal courts do not have exclusive jurisdiction over this case. The Court holds, and I agree, that regardless of whether federal courts have jurisdiction over cases like this one, relators **[**26]** have not established that such jurisdiction would be exclusive of, rather than concurrent with, state courts' jurisdiction. I write separately only to address another approach to the issue. Specifically, like the federal district court that considered this issue before us,[1] I would hold that, under the existing record, relators have not established two prerequisites to the existence of federal jurisdiction over this case: (1) the existence of a "substantial" federal question and (2) harmony with the careful balance between federal and state courts. *See Grable & Sons Metal Prods., Inc. v. Darue Eng'g & Mfg., 545 U.S. 308, 125 S. Ct. 2363, 162 L. Ed. 2d 257 (2005)* (setting forth four-part test for embedded-federal-question jurisdiction). Because federal courts do not have jurisdiction over this case, they necessarily do not have exclusive jurisdiction.

Embedded-Federal-Question Jurisdiction

The jurisdictional provisions of the United States Code grant federal district courts original jurisdiction over "civil actions arising under the Constitution, laws, or treaties of the United States." This is often referred to as "federal question jurisdiction" or "arising **[**27]** under jurisdiction." *28 U.S.C. § 1331*. An action "aris[es] under" federal law when (1) federal law creates the cause of action or (2) in some rare cases, when a cause of action created by state law nevertheless turns on a substantial question of federal law. *See Grable, 545 U.S. at 312, 125 S. Ct. at 2366-67* (noting that federal-question jurisdiction over state-law claim is less common); *see also Empire Healthchoice Assur., Inc. v. McVeigh, 547 U.S. 677, 699, 701, 126 S. Ct. 2121, 165 L. Ed. 2d 131 (2006)* (describing category of cases as "special and small" and "slim"); Lonny S. Hoffman, *Intersections of State and Federal Power*: *State Judges, Federal Law, and the "Reliance Principle"*, *81 Tul. L. Rev. 283, 298 (2006)* ("routine efforts to come within this statutory head of jurisdiction should be rejected in favor of allowing the state court to apply and interpret the applicable federal law"). The second type of federal-question jurisdiction is often referred to as embedded-federal-question jurisdiction.

The questions in this legal malpractice suit—arising out of relators' prosecution of **[*849]** a Sherman Act claim in federal court—are whether federal question jurisdiction exists over this state-law action and, if so, whether that **[**28]** jurisdiction is exclusive. Under this record, I answer the first question in the negative, and therefore do not need to reach the second question (although I join in the Court's answer to that question). Answering the first question requires a four-part inquiry: (1) do real-party plaintiffs' legal malpractice claims require resolution of an

---

[1] *RX.com, Inc. v. O'Quinn, 766 F. Supp. 2d 790, 795-97 (S.D. Tex. 2011)*.

issue of ***antitrust law*** under the Sherman Act; if so, is that antitrust issue (2) actually disputed and (3) substantial; and (4) will federal jurisdiction disturb the balance of federal and state judicial responsibilities. *See Grable, 545 U.S. at 312-14, 125 S. Ct. at 2366-68*; *see also Minton v. Gunn, 355 S.W.3d 634, 640 (Tex. 2011)*, *petition for cert. filed*, No. 11-1118 (U.S. March 9, 2012). Requiring an affirmative answer to each of these four inquiries is necessary to ensure that reference to an embedded federal issue is not "a password for opening federal courts" to any state malpractice action "embracing a point of federal law." *Grable, 545 U.S. at 314*.

Relators' plea to the jurisdiction fails to satisfy two of these elements. First, the record before us does not establish the existence of a "substantial" federal question. Second, relators have **[**29]** not demonstrated that affording federal courts jurisdiction over malpractice actions like this one would not upset the careful balance between federal and state courts.

A. The record does not show a substantial, disputed federal issue

Relators' petition in this Court is premised primarily on their broad interpretation of *Minton* and its application of the standards articulated in *Grable*. Relators contend that, under *Minton*, they have shown the presence of an "actually disputed" and "substantial" federal issue (the second and third factors under *Grable*) merely by asserting that they are contesting whether the real-party plaintiffs could have prevailed on their underlying Sherman Act claim. They characterize this fact as being "absolutely dispositive." But that conclusion is not compelled by *Minton* for several reasons. First, while *Minton* involved a meaningful legal and factual dispute over intersecting patent law doctrines, relators have not demonstrated that the federal issues here require anything more than the application of established federal law to factually-disputed claims. Second, the *Minton* court expressly limited its holding to the facts of that case, and the circumstances favoring **[**30]** federal jurisdiction in *Minton* are not present here.

1. *Minton* turned on a substantial, legally and factually disputed issue of federal patent law

In *Minton*, the Texas Supreme Court held that federal courts had exclusive jurisdiction over a legal malpractice lawsuit arising out of the defendants' handling of a patent claim. *Minton, 355 S.W.3d at 640-47*. Relators construe *Minton* as a sea-change in the doctrine of embedded-federal-question jurisdiction, essentially eliminating *Grable's* "actually disputed" and "substantial" federal issue requirements when the federal issue arises from an area of federal law in which Congress has created claims that may originate only in federal courts. But the *Minton* Court did not presume a "substantial" federal question merely because the malpractice action before the Court would require the application of federal patent law; instead, the Court determined that the federal issue in that case was, in fact, substantial and actually disputed.

The federal issue in *Minton* was whether the "experimental use" exception would have excused Minton's patent claim from the statutory on-sale bar against patents filed more than one year after the patented **[*850]** invention is **[**31]** sold. *Id. at 638*. The application of patent law's "experimental use" doctrine was dispositive of Minton's malpractice action: Minton's sole assertion of negligence was premised on his attorneys' failure to timely plead and brief the experimental use exception in the federal patent litigation. *Id. at 642*. The Court recognized the "strong interest in having federal patent law applied uniformly." *Id. at 645*; *see also 28 U.S.C. § 1295(a)* (vesting federal circuit with exclusive jurisdiction over patent appeals). Despite all of this—a state-law claim that depended entirely on the interaction between a federal statute and a federal-common-law exception to that statute in an area of law in which the courts have recognized a strong interest in uniform federal interpretation and application—the *Minton* Court expressly noted that whether the federal issue was sufficiently substantial to justify exclusive federal jurisdiction was a "close" call. *Id. at 643*. If *Minton* was a close call, this is an easy one.

2. Relators have not shown a substantial federal issue that is both legally and factually disputed

Minton instructs that in order for a disputed federal issue to be substantial there must be more **[**32]** than factual disputes regarding the application of the federal laws to the case—there must also be a legal dispute.[2] *Id. at 644* (stating that plaintiff was required to prove that federal issue was "legally and factually viable"); *see also id. at 642-43* ("the legal and factual viability" of federal issue was "clearly in dispute"). It is the construction of the law—not its application, which is often left to the jury—in which the expertise of federal judges is particularly helpful and uniformity is needed. A dispute over the application of the law to the facts of the case is insufficient to open the doors to the federal courthouse. *See Grable, 545 U.S. at 315* ("meaning of the federal [law]" must be actually in dispute); *id. at 316* (observing that the Court in *Merrell Dow Pharmaceuticals Inc. v. Thompson, 478 U.S. 804, 106 S. Ct. 3229, 92 L. Ed. 2d 650 (1986)*, "assumed that federal law would have to be applied to resolve the claim" but nevertheless determined that federal jurisdiction was unavailable). The *Grable* Court rejected the "expansive view that mere need to apply federal law in a state-law claim will suffice to open the 'arising under' door." *Grable, 545 U.S. at 313*. Instead, it twice stated that **[**33]** the issue is whether there is a dispute "respecting the validity, construction or effect of [federal] law." *Id*. (quoting *Shulthis v. McDougal, 225 U.S. 561, 569, 32 S. Ct. 704, 56 L. Ed. 1205 (1912)*.

[*851] Relators rely on certain defenses asserted by the antitrust defendants in the underlying Sherman Act lawsuit as establishing a substantial federal issue.[3] Even if we were to look at its defenses in the original lawsuit,[4] relators have not demonstrated on this record that those defenses implicate a legal dispute involving the validity or construction of federal ***antitrust law***, as opposed to the mere application of such law to the facts of this case. The mere fact that the "case within the case" is based on Sherman Act claims supports a fair inference that federal issues may arise in the course of the litigation. These may include the issues identified in relators' plea to the jurisdiction and may include disputes that are primarily legal in nature or disputes that are more fact-oriented. But at this point we can only speculate; the record does not establish that these defenses **[**35]** would require anything other than a "fact-bound and situation-specific" analysis under generic principles of antitrust litigation. *See Empire Healthchoice, 547 U.S. at 701, 126 S. Ct. at 2137* (stating that "fact-bound and situation-specific" federal questions

---

[2] In *Minton*, there was a factual dispute regarding the applicability of the experimental use exception to the on-sale bar to patentability of the invention. The court of appeals' opinion reveals that there was also, however, a legal dispute. *Minton v. Gunn, 301 S.W.3d 702, 709 (Tex. App.—Fort Worth 2010)*, *rev'd on other grounds*, *355 S.W.3d 634 (Tex. 2011)* (noting that dispute was "predominately one of fact"). In the court of appeals, the parties disagreed on the standard that applies for determining when testing is sufficient to constitute an experimental use. The plaintiff contended that "experimental use is supported by any testing needed to convince the inventor that the invention is capable of performing its intended purpose in its intended environment." *Id. at 712 n. 46*. The court of appeals disagreed and held that the testing must relate to a claimed feature of the patented invention. Applying this standard, the court of appeals concluded that the testing evidence offered by the inventor did "not, as a matter of **[**34]** law, support experimental use." *Id. at 712*. Because the court of appeals affirmed a no-evidence summary judgment on this basis, the disputed legal issue was critical to the ultimate issue in the case. In contrast, in this case, there is no evidence of a significant, disputed legal issue in the plea to the jurisdiction.

[3] To the extent relators rely on expert reports they provided this Court after oral argument, we may not consider evidence not before the trial court at the time of the plea to the jurisdiction hearing. *See In re Taylor, 113 S.W.3d 385, 392 (Tex. App.—Houston [1st Dist.] 2003, orig. proceeding)* (stating that, in mandamus proceedings, we "focus on the record that was before the trial court" and exclude from our consideration filings "that were not part of the trial court record at the time of the hearing on the motion that is the subject of the original proceeding."). Even if I **[**36]** were to consider these reports, it is still not clear to me that there is a substantial federal question; relators' motion for summary judgment (which real-party plaintiffs filed after oral argument and was also filed after the ruling on the plea to the jurisdiction) is not based on any arguments under the Sherman Act.

[4] Real-party plaintiffs contend that we cannot consider this evidence under the well-pleaded complaint rule, a federal standard that limits subject-matter-jurisdiction inquiries to the face of the plaintiff's complaint. *See Franchise Tax Bd. of Cal. v. Constr. Laborers Vacation Trust for S. Cal., 463 U.S. 1, 10, 103 S. Ct. 2841, 2847, 77 L. Ed. 2d 420 (1983)* ("the *plaintiff's* complaint establishes that the case 'arises under' federal law"). Arguably, the inquiry here could be governed by the Texas procedure that permits challenges to the existence of jurisdictional facts in a plea to the jurisdiction. *See Tex. Dep't of Parks & Wildlife v. Miranda, 133 S.W.3d 217, 226-27 (Tex. 2004)*. Because the documents on which relators rely do not demonstrate a substantial, disputed federal issue, I need not decide this issue.

are insufficient to create arising-under jurisdiction); Bennett v. Sw. Airlines Co., 484 F.3d 907, 910 (7th Cir. 2007) ("What the Court said about *Grable* in *Empire Healthchoice* can be said here too. We have a fact-specific application of rules that come from both federal and state law rather than a context-free inquiry into the meaning of a federal law.").

3. *Minton* is an expressly limited holding

Although this case, like *Minton*, is **[**37]** a malpractice action arising out of the prosecution of a federal cause of action, that fact does not, alone, establish a substantial federal issue. The Supreme Court rejected that kind of sweeping displacement of state-law claims in *Grable. See* Grable, 545 U.S. at 314, 125 S. Ct. at 2368 (rejecting "single, precise, all-embracing" test for determining embedded federal jurisdiction) (quoting Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 821, 108 S. Ct. 2166, 2180, 100 L. Ed. 2d 811 (1988) (Stevens, J., concurring); id. at 317-18, 125 S. Ct. at 2370 (describing *Merrell Dow* as disclaiming "any bright-line rule" and explaining that "questions of jurisdiction over state-law claims require 'careful judgments'" and a "contextual enquiry"); Merrell Dow, 478 U.S. at 808, 106 S. Ct. at 3232 (rejecting use of a "single, precise definition" **[*852]** to determine arising-under jurisdiction). Consistently, the *Minton* Court expressly limited the scope of its holding, stating that it would not "cause all legal malpractice suits arising out of patent litigation to fall under the exclusive patent law jurisdiction of the federal courts," and cautioning that the opinion "should only be construed as conferring exclusive **[**38]** federal patent jurisdiction based upon the specific facts of this case." Minton, 355 S.W.3d at 646. Furthermore, the Court noted that "any state litigant asserting a legal malpractice action to recover for damages resulting from his patent attorney's negligence in patent prosecution or litigation must also satisfy all four elements of the *Grable* test to place his claim under exclusive federal jurisdiction," and that "[i]n the context of state-based legal malpractice claims, plaintiffs will not always be able to meet such a burden." *Id*.

In addition to the absence from the record of a substantial *legal* dispute over federal law, several other key facts favorable to federal jurisdiction in *Minton* are not present here. First, ***antitrust law*** does not present the same heightened need for uniformity and predictability presented by questions of patent validity. *See, e.g.,* USPPS, Ltd. v. Avery Dennison Corp., 647 F.3d 274, 284 (5th Cir. 2011) (observing that special federal interest exists in developing uniform body of patent law, and that interest is protected by "Congress's grant of exclusive appellate jurisdiction over patent cases to [federal circuit] court."); *see also* USPPS, Ltd. v. Avery Dennison Corp., 676 F.3d 1341, 1350 (Fed. Cir. 2012) **[**39]** (Prost, J., concurring) (contending that Federal Circuit's approach to legal malpractice cases comports with *Grable* because "substantive patent law issues" implicated in such cases are necessarily substantial).

Second, patent law's "experimental use" exception to the on-sale bar was the fulcrum of the *Minton* action—the failure to properly plead and brief the "experimental use" doctrine was the sole act of negligence Minton pleaded, and Minton alleged that failure, alone, caused him to lose his patent claim—and that issue was brought to a head in the trial court through summary judgment proceedings. Minton, 355 S.W.3d at 642. Here, the negligent conduct pleaded is failure to file the underlying litigation timely; the Sherman Act defenses relators identify (which were pleaded by the defendants in the underlying action) are, under this record, only some of the issues that may be relevant to proving the causation element of real-party plaintiffs' malpractice claim. *Cf.* id. at 646-47 (favorably citing *Roof Tech. Servs., Inc. v. Hill, 679 F.Supp.2d 749, 754 (N.D. Tex. 2010)* (explaining that state legal malpractice action involving attorney's "failure to meet deadlines and communicate with **[**40]** [his] client" and in which "[p]atent issues are merely floating on the periphery" did not trigger exclusive federal patent jurisdiction), and Genelink Biosciences, Inc. v. Colby, 722 F. Supp. 2d 592, 601 (D.N.J. 2010) (holding that where state malpractice claim was based on missed deadlines, and not on the validity of the actual patent itself, there was no patent issue triggering exclusive federal patent law jurisdiction)).

4. Conclusion on the "substantial federal issue" element

A substantial contested federal issue is one that involves "a serious federal interest in claiming the advantages thought to be inherent in a federal forum" and "an important issue of federal law" that is "both dispositive of the case and . . . controlling in numerous other cases." *Grable, 545 U.S. at 313, 315, 125 S. Ct. 2367-68*; *Empire Healthchoice, 547 U.S. at 700, 126 S. Ct. at 2137*. It is also central to the parties' dispute. *See* *Grable, 545 U.S. at 312, 320,* ***[*853]*** *125 S. Ct. at 2367, 2371* (disputed federal issue was "at the heart of the state-law title claim"); *Empire Healthchoice, 547 U.S. at 699 n.5, 126 S. Ct. at 2136* (describing the classic federal-question jurisdiction claim as one "predicated on the centrality **[**41]** of a federal issue"); *see also* *Minton, 355 S.W.3d at 645*; Hoffman, *81 Tul. L. Rev. at 300* (stating that disputed federal issue "may not be some minor point of federal law, but instead vital, relevant, and significant . . . to a wide range of persons and behavior" and "an issue is of widespread import").[5] Thus, relators' burden to show a substantial issue is not a light one. They must demonstrate both the issue's importance in the suit itself and in the greater scheme of the development of the law. Relators have failed to carry this burden to show a clear abuse of the trial court's discretion warranting mandamus relief.

B. Relators have not shown that recognizing federal jurisdiction here would not disrupt the careful balance between federal and state courts

Relators likewise fail to satisfy the fourth, and arguably most important, prong of the *Grable* test. *See* *Grable, 545 U.S. at 310, 125 S. Ct. at 2365* (stating that "the national interest in providing a federal forum" for the federal issue involved in case was "sufficiently substantial to support the exercise of federal-question jurisdiction" without distorting the "division of labor between state and federal courts"); *see also* *Minton, 355 S.W.3d at 644*. Specifically, relators ask this Court to hold that an action traditionally pursued in state court now belongs (exclusively) in federal court, despite a federal district court's determination that it lacked any **[**43]** (much less exclusive) jurisdiction over the case. But they have not demonstrated that such a holding would not disturb the balance of judicial responsibility Congress has struck between federal and state courts under the procedural posture of this case.

Federal courts have limited jurisdiction. And federal courts have expressed concern that the doors to their courts should not be opened too wide for claims that are traditionally handled by state courts—like legal malpractice claims—under the doctrine of embedded-federal-question jurisdiction. *See* *Grable, 545 U.S. at 319, 125 S. Ct. at 2371* (finding jurisdiction only after determining that recognizing federal-question jurisdiction over actions like that before Court "would not materially affect, or threaten to affect, the normal currents of litigation" by introducing flood of state claims into federal courts). Here a federal court has already rejected relators' contention that federal courts have jurisdiction over this case. Congress elected to make a federal court's determination that a case should be remanded generally non-reviewable. *28 U.S.C. § 1447(d)*; *Schexnayder* ***[*854]*** *v. Entergy La., Inc., 394 F.3d 280, 283 (5th Cir. 2004)*. To allow **[**44]** a state court to second-guess a federal court that has already remanded a case because it determined that it lacked jurisdiction would be contrary to Congress's intent in limiting review of remand determinations. If a federal court decides to close its doors to a claim, a state court should not force the federal courthouse door open.

"[T]here must always be an assessment of any disruptive portent in exercising federal jurisdiction." *Grable, 545 U.S. at 314, 125 S. Ct. at 2368*. Here that assessment counsels against a state-court declaration that, contrary to the

---

[5] This requirement, known as the centrality requirement,

> addresses whether the plaintiff's claim is "federal enough" to justify invocation of federal question jurisdiction. Centrality asks how much—an assessment ill-suited to a cut-and-dried rule. It calls for a standard that . . . tends to collapse decisionmaking back into the direct application of the background principle or policy to a fact situation. Standards allow for the decrease of errors of under- and over-inclusiveness by giving the decisionmaker more discretion than do rules. Standards allow the decisionmaker **[**42]** to take into account all relevant factors or the totality of the circumstances. We should not be surprised or disappointed, then, if the centrality inquiry does not always yield litmus-like answers. The nature of the inquiry requires nuance and balancing.

Richard D. Freer, *Of Rules and Standards*: *Reconciling Statutory Limitations on "Arising Under" Jurisdiction*, *82 Ind. L.J. 309, 320 (2007)*.

prior decision of a federal court upon removal, federal courts—and federal courts alone—bear the burden of providing a remedy for a state-law cause of action merely because federal law may be applied to an element of the claim.

Conclusion

Courts should attempt to avoid "upsetting the state-federal line drawn (or at least assumed) by Congress." *Grable, 545 U.S. at 314, 125 S. Ct. at 2368*. Legal malpractice claims are on the side of the line that is "ordinarily resolved in state courts." *Empire Healthchoice, 547 U.S. at 683, 126 S. Ct. at 2127*. Therefore, in deciding whether *28 U.S.C. § 1331* grants federal courts arising-under jurisdiction, **[**45]** courts "should await a clear signal from Congress" that it intends to displace state courts of this task. *Id*. Because no such signal exists here, I would conclude that the trial court did not abuse its discretion in denying the plea to the jurisdiction on the record before it.

I therefore concur in the Court's opinion.

Harvey Brown

Opinion

[*1089] ORDER

Before the Court are the "Dyson Defendants' Motion to Dismiss Pursuant to *Rule 12(b)(6)* and *Rule 9(b)*" (Doc. 19) and "Cornucopia's 12(b)(6) Motion to Dismiss and Alternative 12(f) Motion to Strike" (Doc. 37). For the reasons stated below, the **[**3]** Court will: (i) deny Cornucopia's motion to dismiss as moot; (ii) deny Cornucopia's alternative motion to strike on its merits; (iii) grant Dyson's motion to dismiss Cornucopia's antitrust and tortious interference claims, in part with prejudice and in part without prejudice; and (iv) deny Dyson's motion as to Cornucopia's declaratory judgment claims.

I. LEGAL STANDARD

To state a claim for relief under *Fed. R. Civ. P. 8(a)*, a plaintiff must make "'a short and plain statement of the claim showing that the pleader is entitled to relief,' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it rests.'" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). This "short and plain statement" must also be "plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*.

"Determining whether a complaint states a plausible claim for relief . . . [is] a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 1950*. A claim is plausible if it contains "[f]actual allegations [sufficient] to raise a right to relief above the speculative level," *Twombly, 550 U.S. at 555*, **[**4]** and to permit a reasonable inference that the defendant is liable for the conduct alleged, *Iqbal, 129 S. Ct. at 1949*. "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* Rather, the plaintiff must at least "allege sufficient facts to state the elements of [the relevant] claim." *Johnson v. Riverside Healthcare Sys., LP, 534 F.3d 1116, 1122 (9th Cir. 2008)*.

In evaluating a motion to dismiss, the Court accepts all of Plaintiffs' plausible factual allegations as true and construes the pleadings in a light most favorable to them. *Knievel v. ESPN, 393 F.3d 1068, 1072 (9th Cir. 2005)*. The Court generally does not look beyond the complaint, but the Court may take judicial notice of matters of public record, even if not alleged in the complaint. *Lee v. City of L.A., 250 F.3d 668, 688-89 (9th Cir. 2001)*.

II. THE VARIOUS DYSON ENTITIES

At the outset, certain confusion should be cleared up regarding the various Dyson parties. Cornucopia has sued Dyson Ltd. (the U.K.-based parent company) and Dyson Inc. (a U.S. subsidiary) based on four of "Dyson's" U.S. patents. The true owner of the four patents in question, however, is Dyson Technology **[**5]** Ltd.

Cornucopia has not sued Dyson Technology. However, Dyson Inc. says that it is Dyson Technology's licensee with respect to the four patents. Further, Dyson Technology (along with Dyson Inc.) is a plaintiff in a countersuit brought against Cornucopia for patent infringement. By stipulation of the parties, the Court consolidated Dyson's countersuit with Cornucopia's original action. Thus, all relevant parties are now before the Court, and the Court will treat Cornucopia's complaint as if it named Dyson Technology.

On the current record, it is clear that Dyson Technology applied for and received the patents in question. However, Cornucopia's allegations potentially implicate all three Dyson entities. At this stage, it is **[*1090]** not possible to separate them. Thus, all references to "Dyson" below are to the three Dyson companies collectively, unless otherwise noted.

III. FACTS

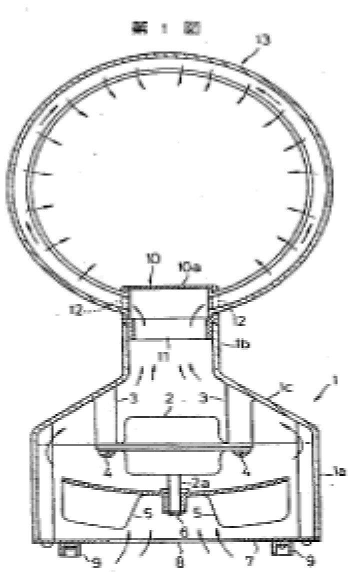
The following facts are drawn from Cornucopia's complaint, as well as matters subject to judicial notice, such as the patents in suit and their file histories. *See, e.g.,* Coinstar, Inc. v. Coinbank Automated Sys., Inc., 998 F. Supp. 1109, 1114 (N.D. Cal. 1998) (taking judicial notice of patents and their file histories). **[**6]** The facts alleged in Cornucopia's complaint are assumed to be true for purposes of Dyson's motion to dismiss.

A. The Japanese Bladeless Fan Patent

In 1981, the Japanese patent office issued patent number S56-167897, which disclosed a "bladeless fan" as follows (according to Cornucopia's translation):

> An electric fan, comprising: a base stand that holds fan blades and a motor that drives the fan blades, and a wind discharge ring with a ring shaped slit that is supported on the base stand, has a hollow shape that receives the wind created by the fan blades from the base stand, and discharges wind therefrom.

(Doc. 1 ¶ 7.) In relevant part, the Japanese patent depicted its invention through the following figures:



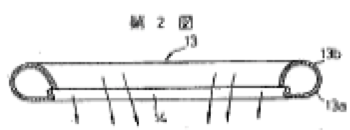


Figure 1 depicts a cross-section of the entire fan, which is not truly bladeless. The lower portion of the apparatus conceals a fan which draws air from underneath the base, as denoted by the arrowed lines surrounding the number 8, and pushes it into what the patent calls — according to Cornucopia's translation — the "wind discharge ring" (item 13), where one might expect a traditional fan's blades to be located. The parties here refer to this ring as a "nozzle."

Figure 2 is a cutaway **[**7]** view of the nozzle. As figure 2 shows, the nozzle is a hollow tube with an annular slit (item 14) — as if one had taken a hose, sliced it open lengthwise, rolled it back into a hose shape with one side of the slice slightly overlapping the other side, and then curled the entire thing into shape of a ring. As the fan inside the base fills the nozzle with air, the air escapes from the nozzle through the slit (and presumably toward the user), as depicted by the two shorter arrowed lines in figure 2 (and the inward-pointing arrows arranged radially over item 13 in figure 1).

The four longer arrowed lines in figure 2 appear to depict air from behind the fan **[*1091]** being pulled into the open ring and forward. According to Cornucopia's translation of the Japanese patent, "'the actual amount of wind [generated by the fan] is much higher than the amount of wind directly discharged from the slit.'" (Doc. 1 ¶ 12 (bracketed material inserted).)

How the fan accomplishes this feat is somewhat in question. Cornucopia's complaint claims that the Japanese fan induces the "Coanda effect." (*See id.*) The Coanda effect is "[t]he tendency of a gas or liquid coming out of a jet to travel close to the wall contour **[**8]** even if the wall's direction of curvature is away from the jet's axis." *McGraw-Hill Dictionary of Scientific and Technical Terms* 416 (6th ed. 2003). The Coanda effect can supposedly "entrain" — grab and pull along — surrounding air, thus increasing the flow of air beyond what is being pushed out of the "jet."

The Coanda effect necessarily requires a curved surface downstream from the "jet" — in this case, downstream from the slit through which air escapes the nozzle. The Japanese patent's figures do not disclose such a surface, nor does Cornucopia quote any text from the Japanese patent regarding the Coanda effect. As far as the figures disclose, it appears that the nozzle and slit are designed to push air both forward and inward, with nothing downstream from the slit. Conceivably, this could create a low-pressure zone within the nozzle, thus pulling air from behind the nozzle forward. However, nothing in the figures discloses the necessary physical shape downstream from the slit to take advantage of the Coanda effect.

B. Dyson's Bladeless Fan Patents

1. The '449 Patent: A Bladeless Fan with a "Diffuser"

In September 2009, Dyson (specifically, Dyson Technology) filed U.S. patent application **[**9]** number 12/560,232, titled simply "fan," a preferred embodiment of which was proposed in these figures (among others):

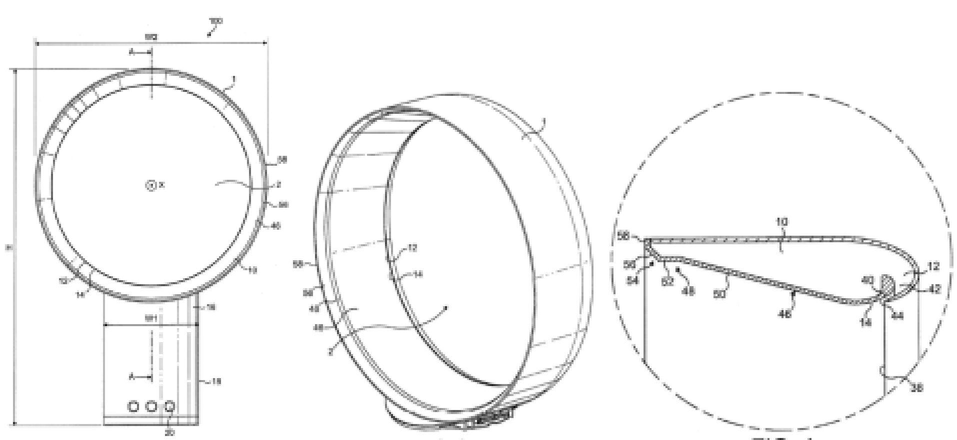

FIG. 1 FIG. 2 FIG. 4

Like the Japanese fan, a bladed fan — an impeller in the preferred embodiment — hides within the base (figure 1, item 18) which draws air from around the base and pushes that air into a hollow nozzle (figures 1 and 2, item 1). The cross-section of the nozzle resembles an upside down airfoil, with the trailing edge of the "wing" pointing in the direction that the fan blows air (figure 4). As the impeller fills the ring casing with air, air escapes out of the ring casing through the forward-facing slit (figure 4, item 38).

Dyson's application proposed one independent claim that is relevant here. That **[*1092]** independent claim (claim 1) describes a bladeless fan with, among other features, a "nozzle extending about an axis to define an opening through which air from outside the fan assembly is drawn by the air flow emitted from the mouth [*i.e.*, the slit through which air escapes from the 'nozzle']." (FH449 at 19.) [1] This appears to describe the same effect as claimed in the Japanese patent, although it is not clear whether Dyson is relying on lower air pressure, the Coanda effect, **[**10]** or both. The proposed specification (not the claims) describes a preferred embodiment that includes a Coanda surface (FH449 at 9) — which is the curve sloping away from the direction in which air escaping the slit would most naturally travel (figure 4, item 14).

Claim 1 also described "a diffuser portion tapering away from" the mouth (*id.*), referring to the angles **[**11]** formed by figure 4, items 38, 46, 48, 50, 52, 54, 56, and 58 in relation to each other and in relation to the nozzle's axis (figure 1, item x), leading to the inverted airfoil shape. In apparent contrast to the Japanese patent's tube-shaped nozzle, the airfoil shape supposedly focuses, smoothes, and accelerates the airflow emerging from the slit.

Dyson included a copy of the Japanese patent with this application. Dyson also included an English translation of that patent's abstract, which read as follows:

> PURPOSE: To improve the safety and stableness of the fan by providing an air discharging ring shaped in a hollow cylinder form to receive an air stream produced by vanes and having an annular slit to discharge the received airstream therethrough.
>
> CONSTITUTION: The air around a base 1 is suctioned thereinto by the rotation of the vanes 5 of the fan, and then sent upward within the base 1 to a neck piece 10, where it is divided into two air discharging ports 12 so that it can flow within the air discharging ring 13. The air flowing [within?] the air discharging ring 13 is then discharged through the annular slit 14. In this instance, the slit 14 is designed to be so narrow as to provide **[**12]** a strong air stream. Such a strong air stream can stir the air with in the air discharging ring 13 and as a result of this, the air is sensed to flow out of the entire space surrounded by the air discharging ring 13.

(*Id.* at 57; *see also* Doc. 20-1 at 76.)

The Japanese patent came up elsewhere in the application as well. For example, Dyson included the international search report that resulted from its counterpart international application (filed under the Patent Cooperation Treaty the previous month). The report cited the Japanese patent and described it as "the most relevant state of the art with regard to" Dyson's proposed claim 1. The report noted that the only material difference between the invention disclosed in the Japanese patent and Dyson's invention was the "diffuser portion" that supposedly focuses and evens out airflow coming from the nozzle. The report concluded that the diffuser "is **[*1093]** merely one of several straightforward possibilities from which the skilled person would select" to improve the fan's "cooling effect," and therefore "[did] not involve an inventive step." (FH449 at 85; *see also* Doc. 20-1 at 82.)

Finally, Dyson mentioned the Japanese patent in the background section **[**13]** of its proposed specification:

> Other types of fan are described in US 2,488,467, US 2,433,795, and JP 56-167897. The fan of US 2,433,795 has spiral slots in a rotating shroud instead of fan blades. The circulator fan disclosed in US 2,488,467 emits airflow from a series of nozzles and has a large base including a motor and a blower or fan for creating the air flow.

(FH449 at 5.)

The Patent Office approved Dyson's application in April 2011, issuing it as U.S. Patent No. 7,931,449. All of the proposed language quoted above from the application ended up in the issued patent.

---

[1] This section contains citations to the file histories of Dyson's patents. These file histories are thousands of pages long, and the Court granted leave for Dyson to file them as PDFs on a CD-ROM, rather than on CM/ECF. Given that, the Court cannot cite to the file histories using a CM/ECF document and page number. In addition, although each patent's file history is contained within its own PDF, none of these PDFs is consecutively paginated from beginning to end (*e.g.*, with Bates numbers). Citations are therefore formatted as in this example, "FH449 at 19" — where "FH" represents "file history"; "449" is the last three digits of the patent number (in this case, U.S. Patent No. 7,931,449); and "19" represents the nineteenth page in the PDF submitted on CD-ROM, regardless of whether that page displays some other page number.

2. The '166 Patent: Adding "Spacers"

In November 2009, Dyson filed patent application number 12/622,844, again titled "fan." This application largely resembled that which became the '449 patent, but focused primarily on adding small tabs, called "spacers," to the nozzle, as depicted by the features labeled 26, 260, 266, and 360 in in these figures:

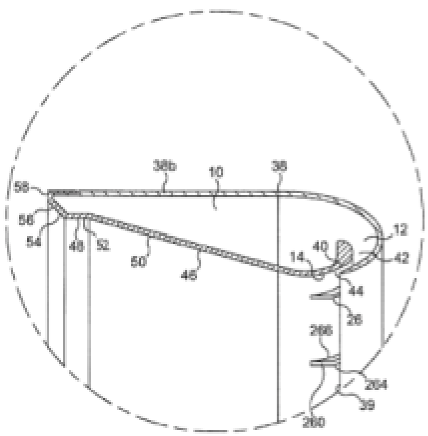

FIG. 4

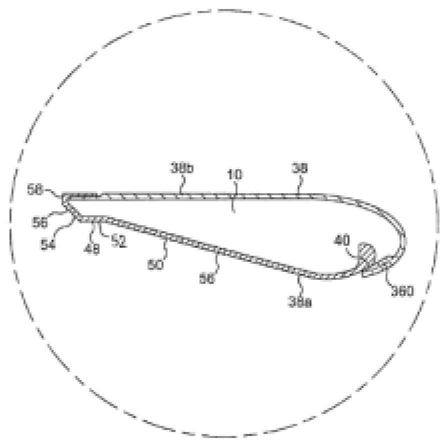

FIG. 5

Dyson asserted that these spacers "even the output of air flow" and ensure "that a user should not experience a variation in the intensity of the air flow over time due to product aging or a variation from one fan assembly to another fan assembly due to variations in manufacture." **[**14]** (FH166 at 7.)

This application proposed two independent claims: one describing the entire fan assembly, and the other describing just the "nozzle," but both calling for "spacers." Echoing the '449 patent, both claims also called for a "nozzle defining an opening through which air from outside the fan assembly is drawn by the air flow emitted from the mouth." (*Id.* at 22, 24.) Unlike the '449 patent, this application contained a separate, dependent claim explicitly based on the Coanda effect, calling for "a Coanda surface located adjacent to the [slit] and over which the [slit] is arranged to direct the air flow" (*id.* at 24) — *i.e.*, item 14 of figure 4.

This application, like the application for '449 patent, disclosed the Japanese patent in full with an English translation of its abstract. (*Id.* at 38.) And mimicking the **[*1094]** '449 patent almost verbatim, the background section of this application's proposed specification contained the following mention of the Japanese patent:

> Other types of fan or circulator are described in US 2,488,467, US 2,433,795, and JP 56-167897. The fan of US 2,433,795 has spiral slots in a rotating shroud instead of fan blades. The circulator fan disclosed in US 2,488,467 **[**15]** emits airflow from a series of nozzles and has a large base including a motor and a blower or fan for creating the air flow.

(*Id.* at 6.)

At one point the application process, the patent examiner tentatively rejected most of Dyson's application in light of the Japanese patent and a U.S. patent not relevant here. (*Id.* at 148.) Nonetheless, the Patent Office ultimately approved this application, issuing it as U.S. Patent No. 8,092,166 in January 2012. All of the proposed language quoted above from the application ended up in the issued patent.

3. The '111 Patent: Adding a "Flexible Sealing Member"

In March 2010, Dyson filed patent application number 12/715,076, titled "fan assembly." This application somewhat resembled that which became the '449 patent, but focused primarily on the impeller inside the fan base, rather than the shape of the nozzle. The proposed patent's single independent claim discloses a "flexible sealing member"

(FH111 at 61) which prevents air pushed by the impeller into the nozzle from flowing back into the impeller or the fan base. A dependent claim, echoing the '449 patent, adds the possibility that "the nozzle extends about an axis to define an opening through which **[**16]** air from outside the fan assembly is drawn by the air flow emitted from the mouth." (*Id.* at 62.) Additional dependent claims add the possibility that "the nozzle comprises a Coanda surface located adjacent the mouth and over which the mouth is arranged to direct the air flow" and "the nozzle comprises a diffuser located downstream of the Coanda surface." (*Id.* at 63.)

Like the application for '449 patent, this application disclosed the Japanese patent in full with an English translation of its abstract. (*Id.* at 148.) The proposed specification also contained the following discussion of the Japanese patent:

> Some fans, sometimes known as air circulators, generate a cooling flow of air without the use of rotating blades. Fans such as those described in US 2,488,467 and JP 56-167897 have large base body portions including a motor and an impeller for generating an air flow in the base body. The air flow is channeled from the base body to an air discharge slot from which the air flow is projected forward towards a user. The fan of US 2,488,467 emits airflow from a series of concentric slots, whereas the fan of JP 56-167897 channels the airflow to a neck piece leading to a single air discharging **[**17]** slot.

(*Id.* at 40.)

The Patent Office approved this application in July 2011, issuing it as U.S. Patent No. 7,972,111. All of the proposed language quoted above from the application ended up in the issued patent.

4. The '379 Patent: Adding the Ability to Tilt Without Toppling

In March 2010, Dyson filed patent application number 12/716,613, titled "fan assembly." This device generally resembled that of the '449 patent, but focused primarily on the fan's ability to tilt the "nozzle" upwards and downwards while keeping the fan's center of gravity in the same place — thus preventing the titled fan from being less stable than a fully upright fan. Its independent claims, as amended, nonetheless called for a "nozzle extending about **[*1095]** an opening through which air from outside the nozzle is drawn by the air flow emitted from the mouth [of the nozzle]." (FH379 at 1360, 1362.)

Like Dyson's previous applications, this application disclosed the Japanese patent in full with an English translation of its abstract. (FH379 at 146.) Unlike the previous applications, Dyson's proposed specification contained no discussion of the Japanese patent.

The Patent Office approved this application in November 2011, issuing **[**18]** it as U.S. Patent No. 8,052,379. All of the proposed language quoted above from the application ended up in the issued patent.

C. Cornucopia's Allegations

Cornucopia, in its complaint, claims that Dyson began selling bladeless fans in the United States in October 2009, [2] and Dyson's bladeless fans were the only bladeless fans available in U.S. retail stores until Cornucopia entered the market in January 2012.

In Dyson's preliminary injunction papers, Dyson says that it saw the Cornucopia bladeless fan for the first time a few weeks after Cornucopia filed this lawsuit in February 2012. (Doc. 33 at 6.) But according to Cornucopia, even before its fan came on the market, Dyson "made specific threats to Cornucopia's customers (bladeless fan retailers)

---

[2] At the preliminary injunction hearing, it became clear that Dyson began selling bladeless fans in the United States in March 2010, rather than October 2009. The difference is immaterial for present purposes.

and suppliers (bladeless fan manufacturers) that Dyson would sue those customers and suppliers if they deal with Cornucopia." (Doc. 1 ¶ 24.) Cornucopia further claims that —

> Dyson threatens retailers such as Target and Bed, Bath, and Beyond **[**19]** with liability/inconvenience if they sell any competing bladeless fan, such as Cornucopia's.
> For example, in April 2011 a Dyson sales representative at the Ace Hardware tradeshow in Chicago, Illinois told a representative of Cornucopia that Dyson would sue if Cornucopia entered the bladeless fan market.
> Similarly, a Dyson sales representative told Laura Kerlagon, a representative of Big Wall, that Dyson would pursue litigation if Cornucopia entered the market.
> Dyson substantiates its threats of United States enforcement litigation by pointing to its extensive international enforcement activities.
>
> For example, Dyson brought a patent infringement claim in China against a Chinese manufacturer, *Yongkang Yixuan*. Dyson and its outside lawyers publish[ed] the successful outcome of that case in order to intimidate those it threatens with United States patent litigation.
> According to news reports, Dyson brought a similar claim in Korea.
> In fact, a recent article reports that Dyson is "embroiled in 15 lawsuits involving copycat bladeless fans."
> * * *
> In approximately July or August 2011, a Cornucopia representative travelled to Northern California to meet with a retail buyer for Walmart.
>
> Upon seeing **[**20]** a prototype and learning that Cornucopia's bladeless fan was available at a price fitting Walmart's buying structure, the Walmart buyer was excited. In fact, he asked Cornucopia's representative to fill out the paperwork Walmart requires of its distributors that same day.
>
> **[*1096]** Shortly thereafter, Walmart's Northern California buyer told Cornucopia that Walmart was no longer interested.
> Upon information and belief, a more senior Walmart buyer from Arkansas told the Northern California buyer that Dyson had threatened to remove Dyson vacuums from Walmart stores if Walmart brought in competing bladeless fans.
> * * *
> On information and belief . . . Dyson threatens retailers with lawsuits if they stock other bladeless fans like Cornucopia's. Dyson also threatens to withhold its vacuums from retailers if they stock competing bladeless fans.

(*Id.* ¶¶ 39-42, 48-51, 71 (emphasis removed).) Cornucopia does not say whether Dyson's alleged threats point to any specific patent, or whether Dyson has referred generically to all of its patents relating to bladeless fans.

As these allegations imply, Cornucopia sells its fan for less than Dyson sells its corresponding product. The complaint does not allege Cornucopia's **[**21]** selling price. It does allege, however, that Dyson sells its product at a much higher price than bladed fans:

> Because consumers that want the safety and performance provided by a bladeless fan are not willing to substitute a standard fan, Dyson's bladeless fans are much more expensive than standard fans. Standard fans in the United States typically retail at low price; for example, $10. Dyson's bladeless fan, on the other hand, is much more expensive, retailing for more than $250.

(*Id.* ¶ 18.)

Based on the foregoing, Cornucopia asserts the following claims for relief:

> • illegal monopolization (or attempted monopolization) in violation of *section 2* of the Sherman Act (*15 U.S.C. § 2*) and Arizona's antitrust act (*A.R.S. §§ 44-1401 to -1416*), based on either a *Walker Process* fraud theory or a *PRE* "sham litigation" theory (both discussed in more detail below);
> • intentional interference with business expectancy under Arizona common law; and
> • declaratory judgment of invalidity or non-infringement of Dyson's patents.

Dyson has now moved to dismiss all claims. Dyson has also filed its own infringement suit against Cornucopia (CV12-0924), since consolidated with this action. Dyson's countersuit alleges **[**22]** infringement of the '379 and '166 patents — *i.e.*, the "tilting" and "spacers" patents — as well as two design patents not relevant here. Dyson has not alleged infringement of the '449 or '111 patents — the "diffuser" and "flexible sealing member" patents.

IV. CORNUCOPIA'S MOTION TO DISMISS/MOTION TO STRIKE

Cornucopia has moved to dismiss Dyson's separately-filed-but-since-consolidated infringement action, arguing that it is, in substance, a compulsory counterclaim that should have been filed under *Fed. R. Civ. P. 13* in response to Cornucopia's complaint — rather than as a separate lawsuit. Cornucopia primarily argues that enforcing such a procedural formality will prevent potential res judicata problems:

> At its most basic, Cornucopia's claim is that Dyson is using illegally obtained patents (and related enforcement actions) to monopolize the bladeless fan market. If [Dyson filed its countersuit as a counterclaim and] Cornucopia was awarded judgment [on] that claim, Dyson could not simply file a new infringement action based on some other patent from the same bladeless fan patent estate.

(Doc. 37 at 6-7.)

Dyson responds that it needed to file a separate suit because Dyson Technology **[*1097]** owns **[**23]** the patents in question, and Cornucopia had not sued Dyson Technology. More importantly, however, Dyson concedes that consolidating the countersuit converts its separate complaint substantially into a counterclaim:

> As a substantive matter, [Dyson Technology] and Dyson, Inc.'s decision to file a separate lawsuit and immediately seek to consolidate it with the existing case is perfectly consistent with the reasons for the rule governing compulsory counterclaims. *Rule 13* aims to prevent multiplicity of litigation and to promptly bring about resolution of disputes before the court. By immediately marking the patent litigation as related to the antitrust case and obtaining a stipulation to consolidation, [Dyson Technology] and Dyson, Inc. achieved those goals.

(Doc. 40 at 9.) At oral argument, counsel for Dyson further stated: "[L]et me be clear on that from our standpoint. . . . [W]e did not assert that [the '449 and '111 patents] were infringed by the current Cornucopia product, and we don't intend to do so." (Doc. 54 at 104.)

Cornucopia's lawsuit plainly puts the '449 and '111 patents in play, including with a request for declaratory judgment of non-infringement. But for the issue of which **[**24]** Dyson entities are the proper defendants, infringement of those patents is an obvious compulsory counterclaim for Dyson. Failure to plead such infringement as a counterclaim would mean that "the claim is waived and the party is precluded by principles of res judicata from raising it again." *Mitchell v. CB Richard Ellis Long Term Disability Plan, 611 F.3d 1192, 1201 (9th Cir. 2010)*. Cornucopia's motion therefore seeks to frame this case procedurally such that Dyson can be deemed to have waived any current or future claim against Cornucopia based on the '449 or '111 patents.

Given Dyson's concession that filing a separate action and then seeking immediate consolidation effects the purposes of *Rule 13*, and given Dyson's more explicit concession at oral argument, Cornucopia's motion to dismiss is moot and will be denied as such. Although Dyson's separate complaint is not formally a counterclaim, the Court treats Dyson's concessions as consent to have its separate complaint treated as if Rule 13 applied. Thus, the Court deems Dyson to have waived any claim against Cornucopia under the '449 or '111 patents as they might relate to the Cornucopia fan at issue in this case, just as if Dyson **[**25]** had filed an answer and counterclaims but omitted any claim based on the '449 or '111 patents.

As for Cornucopia's alternative motion to strike, it will likewise be denied. Cornucopia targets certain paragraphs of Dyson's separate complaint that accuse Cornucopia of copying both the substance and the visual details on Dyson's competing fan. Cornucopia alleges that these allegations have nothing to do with Dyson's patents. However, the allegations may be relevant to Dyson's claim of design patent infringement. They will not be stricken.

V. ANTITRUST CLAIMS

A. *Walker Process*

1. Generally

By nature, a patent is a monopoly, and a patent-holder can generally enforce its rights under an unexpired patent without fear of antitrust liability. *Simpson v. Union Oil Co., 377 U.S. 13, 24, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*. However, in *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp.*, the Supreme Court held that if a patent-holder "obtained [its] patent by knowingly and willfully misrepresenting facts to the Patent Office[, such behavior] would be sufficient **[*1098]** to strip [it] of its exemption from the antitrust laws." *382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. Later case law permits the plaintiff to make an alternative showing — that, **[**26]** whether or not the patent-holder obtained the patent by fraud, "the infringement suit was a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998)* (internal quotation marks omitted). This alternative showing is a separate theory of relief that, although sometimes conflated with *Walker Process* fraud, is governed by different standards and will be analyzed separately. [3]

Nonetheless, if a plaintiff can make one of these showings, and make a showing of monopolization or attempted monopolization under the Sherman Act, the plaintiff can recover antitrust damages, including treble damages. *Walker Process, 377 U.S. at 173, 177-78*. Federal Circuit law now governs the patent-specific portions of such a claim, while regional circuit law governs the antitrust-specific portion of the claim. *Nobelpharma, 141 F.3d at 1068*.

2. Ripeness of the Claim

A *Walker Process* claim "is typically raised as a counterclaim by a defendant in a patent infringement suit." *Id. at 1067*. This case, by contrast, uses *Walker Process* offensively. **[**27]** Whether Cornucopia can raise this claim offensively is a matter of Federal Circuit law because it overlaps with how a patent-holder may enforce its patents. *Unitherm Food Sys., Inc. v. Swift-Eckrich, Inc., 375 F.3d 1341, 1358 (Fed. Cir. 2004)*, *rev'd on other grounds*, *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. Under Federal Circuit law, "the standards . . . developed for determining jurisdiction in a Declaratory Judgment Action of patent invalidity . . . define the minimum level of 'enforcement' necessary to expose the patentee to a[n offensive] *Walker Process* claim . . . ." *Id.* Those standards require a situation in which "a patentee asserts rights under a patent based on certain identified ongoing or planned activity of another party, and where that party contends that it has the right to engage in the accused activity without license." *SanDisk Corp. v. STMicroelectronics, Inc., 480 F.3d 1372, 1381 (Fed. Cir. 2007)*. For a *Walker Process* claim specifically, however, "[t]hreats of patent litigation against customers, based on a fraudulently-procured patent, with a reasonable likelihood that such threats will cause the customers to cease dealing with their supplier" suffice to bring a claim without waiting **[**28]** to be sued on the patent. *Hydril Co. LP v. Grant Prideco LP, 474 F.3d 1344, 1350 (Fed. Cir. 2007)*.

Cornucopia claims that it has standing to assert an offensive *Walker Process* claim because Dyson has threatened Cornucopia and its customers with patent litigation, but Cornucopia does not say whether Dyson has threatened litigation based on any specific patent. A fair reading of Cornucopia's complaint, assuming its allegations to be true, suggests Dyson tells retailers that its patent estate covers all bladeless fans. Yet now that push has come to shove, Dyson accuses Cornucopia of infringing only two of the four relevant patents.

---

[3] *See* Part V.B, *infra.*

As to those two patents — the '379 ("tilting") and '166 ("spacers") patents — Cornucopia plainly has standing because the threat of an infringement suit based on those patents has become a reality. Cornucopia's *Walker Process* claim, to the extent it relies on the '379 and '166 patents, **[*1099]** is now substantively indistinguishable from a typical *Walker Process* counterclaim.

But it appears to be a question of first impression whether Cornucopia can go forward with a *Walker Process* claim based on the '449 and '111 patents, which Dyson has waived. Perhaps Dyson might continue **[**29]** to use those patents (as part of its entire bladeless fan patent estate) to threaten Cornucopia's customers and suppliers in its alleged attempt to corner the entire bladeless fan market, and perhaps that "is the kind of economic coercion that the antitrust laws are intended to prevent." *Hydril, 474 F.3d at 1350*. However, not surprisingly, the Court could locate no case in which a party brought a *Walker Process* claim based on a patent which the patent-holder chose not to enforce against the party bringing the claim. Further, the Federal Circuit has shown special concern for protecting "quiescent patent owners against unwarranted litigation." *Arrowhead Indus. Water, Inc. v. Ecolochem, Inc., 846 F.2d 731, 736 (Fed. Cir. 1988)*, *overruled on other grounds by* *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)*. Thus, there is no viable *Walker Process* claim as to the '449 and '111 patents.

3. Fraud on the Patent Office

Even if the case were otherwise as to the '449 and '111 patents, Cornucopia's *Walker Process* claim is subject to dismissal as to all four patents for independent reasons. Cornucopia's *Walker Process* claim fails on the elements of intent and materiality.

a. Intent Generally

To **[**30]** establish fraud on the Patent Office, a party asserting a *Walker Process* claim may assert "either a fraudulent misrepresentation or a fraudulent omission," but regardless, there must be clear and convincing "evidence [of] a clear intent to deceive the examiner and thereby cause the PTO to grant an invalid patent." *Nobelpharma, 141 F.3d at 1070*. Further, with regard to allegedly fraudulent omissions, "there must be evidence of intent separable from the simple fact of the omission." *Dippin' Dots, Inc. v. Mosey, 476 F.3d 1337, 1347 (Fed. Cir. 2007)*.

"Because direct evidence of deceptive intent is rare, a district court may infer intent from indirect and circumstantial evidence. However, to meet the clear and convincing evidence standard, the specific intent to deceive must be the single most reasonable inference able to be drawn from the evidence." *Therasense, Inc. v. Becton, Dickinson & Co., 649 F.3d 1276, 1290 (Fed. Cir. 2011)* (en banc) (internal quotation marks omitted). [4]

Examples of evidence sufficient to show *Walker Process* fraud include deleting references to on-point prior art from a patent application with no adequate explanation, *Nobelpharma, 141 F.3d at 1062, 1072*; failing to include prior art known to the patent applicant through multiple personal demonstrations of that art, *Unitherm, 375 F.3d at 1360-61*; and failing to include a full translation of a foreign patent where that patent "was the only document in the initial application that, if fully understood by the patent examiner, would have resulted in a denial of the application," *Kaiser* ***[*1100]*** *Found. Health Plan, Inc. v. Abbott Labs., Inc., 552 F.3d 1033, 1051 (9th Cir. 2009)*.

By contrast, *Walker Process* claims have failed on the intent element where the information that allegedly should have been provided to the Patent Office would have been cumulative of what was submitted, and where documents

[4] *Therasense* discusses inequitable conduct, which — before *Therasense* — operated on a similar but looser standard than *Walker Process* fraud. *Therasense*, however, raised inequitable conduct to match the standard for *Walker* ***[**31]*** *Process* claims based on omissions. *See* George G. Gordon & Stephen A. Stack, *Aligning Antitrust and Patent Law: Side Effects from the Federal Circuit's Cure for the Inequitable Conduct "Plague" in* Therasense, 26 Antitrust 88, 88-90 (Fall 2011).

showed that the patent examiner had considered the relevant references, **[**32]** *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1365-67 (Fed. Cir. 1998)*; or where the omission itself was the only evidence of fraudulent intent, *Dippin' Dots, 476 F.3d at 1340-41, 1347-48*.

b. Materiality Generally

In addition to intent, a party claiming *Walker Process* fraud must also make "a clear showing of reliance, *i.e.*, that the patent would not have issued but for the misrepresentation or omission." *Nobelpharma, 141 F.3d at 1071*. Materiality is generally established by showing that omitted or misrepresented prior art (or other relevant information) would have required the examiner to reject the application. *See* *Kaiser Found. Health Plan, 552 F.3d at 1052* (material omission where foreign patent, if fully understood, disclosed the invention); *Dippin' Dots, 476 F.3d at 1340* (material omission of evidence of sales made more than one year before the patent priority date, thus implicating *35 U.S.C. § 102(b)*'s on-sale bar); *Unitherm, 375 F.3d at 1361* (material omission that someone else had already invented precisely the same process); *Nobelpharma, 141 F.3d at 1072* (material omission of a book containing on-point prior art).

c. No Materiality as to '111, '166, and '379 Patents

Three **[**33]** of Dyson's patents may be easily dispensed with on materiality grounds alone. The innovations disclosed in the '111, '166, and '379 patents are, respectively, the "flexible sealing member" to improve the impeller's efficiency, "spacers" to reinforce the nozzle, and the ability to tilt while keeping the center of gravity constant. Cornucopia's complaint contains no allegation that the Japanese patent discloses any such features. Rather, Cornucopia focuses on the Japanese patent's disclosure of the ability to blow more air than the fan blows purely under its own power by pulling air from behind the ring forward. But although Dyson includes this effect in each of these patents (either as a dependent claim or a limitation of an independent claim), Cornucopia has offered no reason to believe that understanding the Japanese patent's disclosure of the air-pulling effect would have led the patent examiner to reject the "flexible sealing member," the "spacers," or the ability to tilt without toppling. Those innovations stand independent of the air-pulling effect.

Further, as to the '166 patent specifically, the file history shows that the patent examiner considered and adequately understood **[**34]** the Japanese patent. The patent nonetheless eventually issued.

Accordingly, Cornucopia has alleged nothing to support the materiality element of its *Walker Process* claim as to the '111, '166, '379 patents.

d. No Intent as to '449 Patent

The international search report included with Dyson's '449 patent application negates any inference that Dyson had a specific intent to deceive the Patent Office by failing to offer a full translation of the Japanese patent. Cornucopia's theory rests on the notion that Dyson formed some sort of plan to disclose the existence of the Japanese patent but distract the U.S. patent examiners' attention from its relevance. However, the international search report discusses in English the very issues that Cornucopia believes Dyson attempted to withhold from the Patent **[*1101]** Office — and indeed, opines that Dyson's invention is *not* patentable over the Japanese patent (just as Cornucopia believes). Disclosing such a document is not the behavior of a party intending to deflect the Patent Office's attention from the true meaning of the Japanese patent. Cornucopia's *Walker Process* claim therefore fails on the intent element with respect to the '449 patent.

4. Leave to Amend

As **[**35]** noted, there is no *Walker Process* claim based on a patent that the patent-holder has chosen not to enforce. Here, Dyson has waived its right enforce the '449 and '111 patents against Cornucopia's current fan. Accordingly, leave to amend would be futile as to the '449 and '111 patents.

Leave to amend as to the '449 patent is also futile because the file history definitively refutes any inference that Dyson intended to deceive the Patent Office. Leave to amend is similarly futile as to the '166 patent, whose file history shows that the patent examiner considered the Japanese patent, understood it, and nonetheless eventually issued the patent — thus refuting the materiality element of the *Walker Process* claim.

This leaves only the '379 "tilting" patent. As to that patent, Cornucopia offered at oral argument additional language from its translation of the Japanese patent: "The electric fan according to Claim 1 wearing the wind discharge ring is supported in a manner such that the angle of elevation can be adjusted on the base stand." (Doc. 54 at 117.) This is insufficient to show that the Japanese patent anticipated the invention taught in Dyson's '379 patent, which requires "a center of **[**36]** gravity located so that when the base is located on a substantially horizontal support surface, a projection of the center of gravity on the support surface is within the footprint of the base when the body is in a fully tilted position." '379 Patent, col. 13, ll. 22-26. If the Japanese patent disclosed such a feature, it is difficult to understand why Cornucopia would not plead it.

Notably, Cornucopia has consistently released only snippets of its translation. It has not submitted its full translation. This choice strongly implies that the facts necessary to Cornucopia's claim do not exist. *See, e.g., O'Brien v. DiGrazia, 544 F.2d 543, 546 (1st Cir. 1976)* ("A plaintiff will not be thrown out of court for failing to plead facts in support of every arcane element of his claim. But when a complaint omits facts that, if they existed, would clearly dominate the case, it seems fair to assume that those facts do not exist."). Nonetheless, the Court does not so conclude at this point. Cornucopia's *Walker Process* claim as to the '379 patent will be dismissed without prejudice to moving for leave to amend within fourteen days. *See Fed. R. Civ. P. 15(a)(2)*; *LRCiv 15.1*. [5]

B. "Sham" Litigation

"[I]rrespective of the patent applicant's conduct before the PTO, an antitrust claim can also be based on [an] allegation that a suit . . . is subjectively and objectively baseless" — or in other words, that "the infringement suit was a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *Nobelpharma., 141 F.3d at 1068, 1071-72*. This is sometimes referred to as a *PRE* claim, shorthand for *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc.*, in which the Supreme Court affirmed that "sham" litigation **[*1102]** is not shielded from the antitrust laws, but tightened the definition of "sham" litigation to require that (1) "the lawsuit [is] objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits," and (2) "the baseless lawsuit conceals an attempt to interfere *directly* with the business relationships of a competitor through the use of the governmental *process* — as opposed to the *outcome* **[**38]** of that process — as an anticompetitive weapon." *508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* (emphasis in original; citations omitted; some alterations incorporated).

Cornucopia asserts that it has stated a claim under this theory based on Dyson's foreign enforcement efforts (mostly in China and Korea), combined with the allegation that "a Dyson representative threatened that Cornucopia would be sued for patent infringement before Dyson had ever seen Cornucopia's product." (Doc. 38 at 13.) Cornucopia here refers to paragraph 40 of its complaint, which states: "[I]n April 2011 a Dyson sales representative at the Ace Hardware tradeshow in Chicago, Illinois told a representative of Cornucopia that Dyson would sue if Cornucopia entered the bladeless fan market."

Cornucopia has not cited, nor could the Court locate, any authority finding "sham" litigation based on foreign enforcement actions. Arguably, one cannot determine whether Dyson's foreign efforts are "objectively baseless in

---

[5] This disposition moots **[**37]** any consideration of Dyson's argument that Cornucopia's *Walker Process* claim does not meet *Rule 9(b)*'s heightened pleading standard.

the sense that no reasonable litigant could realistically expect success on the merits" because those efforts rely on foreign rights under foreign law in a foreign legal system. What might be "objectively baseless" for a litigant **[**39]** suing in the United States on a United States patent might nonetheless be objectively justifiable for the same litigant suing on an otherwise identical patent in a foreign legal system — and vice versa. On the other hand, Cornucopia's complaint admits that at least some of Dyson's foreign enforcement efforts have succeeded, and it is difficult to see how successful foreign litigation could be objectively baseless. Thus, whether or not foreign enforcement efforts could satisfy the "objectively baseless" test, Cornucopia in this case cannot base its *PRE* claim on Dyson's foreign lawsuits.

Dyson's threat to sue "before Dyson had ever seen Cornucopia's product," standing alone, fares no better. Although "sham" threats of litigation against the market competitor can constitute a potential antitrust violation, *see Sosa v. DIRECTV, Inc., 437 F.3d 923, 938 (9th Cir. 2006)*; *Globetrotter Software, Inc. v. Elan Computer Group, Inc., 362 F.3d 1367, 1376 (Fed. Cir. 2004)*, Cornucopia has offered no authority showing that a single threat from a sales representative at a trade show suffices.

However, Cornucopia has also alleged that Dyson repeatedly communicated "sham" threats of litigation to Cornucopia's **[**40]** customers and suppliers in the United States, warning them of liability if they deal with Cornucopia. A few courts have held that threats to a competitor's customers and suppliers can supply the basis for "sham" litigation liability. *See, e.g., Coastal States Marketing, Inc. v. Hunt, 694 F.2d 1358, 1367 (5th Cir. 1983)*; *Alexander v. Nat'l Farmers Org., 687 F.2d 1173, 1200-01 (8th Cir. 1982)*; *Johnson v. Con-Vey/Keystone, Inc., 856 F. Supp. 1443, 1448 (D. Or. 1994)*; *Oahu Gas Serv., Inc. v. Pac. Res., Inc., 460 F. Supp. 1359, 1386 (D. Haw. 1978)*. This is a thinly developed area of law, but there is no clear reason why antitrust liability could never apply in such circumstances. *See* 1 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 205, at 280-82 (3d ed. 2006) (discussing the scenario). The key element to be proven is, like "sham" litigation itself, that patent-holder acted in bad faith — *i.e.*, that the **[*1103]** threat was objectively baseless and subjectively undertaken for the purpose of stifling competition. *See id.*

In these unique circumstances, however, Cornucopia's claim based on Dyson's threats to customers and suppliers states no claim. Whatever threats Dyson communicated to others, **[**41]** the Court has now seen Dyson's lawsuit against Cornucopia. Whether or not it is meritorious, it is not objectively baseless, at least as to one of Dyson's design patents. Accordingly, Cornucopia has failed to state a "sham litigation" claim and it will be dismissed. This dismissal will be without leave to amend, given the futility of amendment. [6]

VI. STATE-LAW INTERFERENCE CLAIM

Dyson challenges Cornucopia's tortious interference claim as preempted. "[F]ederal patent law preempts state-law tort liability for a patentholder's good faith conduct in communications asserting infringement of its patent and warning about potential litigation." *Globetrotter Software, Inc. v. Elan Computer Group, Inc., 362 F.3d 1367, 1374 (Fed. Cir. 2004)*. Thus, "to avoid preemption, bad faith must be alleged **[**42]** and ultimately proven, even if bad faith is not otherwise an element of the tort claim." *Id.* (internal quotation marks omitted). The "bad faith" required for such a claim mirrors the "objectively baseless" prong of the *PRE* test. *Id. at 1377*. As noted above, Cornucopia cannot state a claim for such "bad faith." Accordingly, Cornucopia's state-law tortious interference claim will be dismissed without leave to amend.

VII. DECLARATORY JUDGMENT CLAIM

---

[6] This disposition moots any consideration of the parties' arguments about the relevant antitrust market and applies equally to Cornucopia's state-law antitrust claim (Count III). "Arizona ***antitrust law*** is interpreted in accordance with federal law." *Cal. E. Labs., Inc. v. Gould, 896 F.2d 400, 403 (9th Cir. 1990)*; *Brooks Fiber Commc'ns v. GST Tucson Lightwave, Inc., 992 F. Supp. 1124, 1130 (D. Ariz. 1997)*.

Cornucopia requests a declaration of non-infringement or invalidity of all four Dyson patents. As explained, Dyson has counterclaimed for infringement on only the '166 and '379 patents (plus two design patents). Accordingly, Cornucopia's declaratory judgment claim is indisputably ripe as to the '166 and '379 patents. As to the '449 and '111 patents, Cornucopia's declaratory judgment claim is not mooted as a matter of law by Dyson's election not to enforce those patents. According to the complaint, Dyson has made generalized threats to retailers about bladeless fans. Voluntary cessation of challenged conduct does not automatically or usually moot a case. *Log Cabin Republicans v. United States, 658 F.3d 1162, 1166-67 (9th Cir. 2011)*; *Chem. Producers & Distribs. Ass'n v. Helliker, 463 F.3d 871, 875-78 (9th Cir. 2006)*. **[**43]** Cornucopia has therefore stated a controversy sufficient for declaratory relief with respect to the '166 and '379 patents.

IT IS THEREFORE ORDERED that "Cornucopia's 12(b)(6) Motion to Dismiss and Alternative 12(f) Motion to Strike" (Doc. 37) is DENIED.

IT IS FURTHER ORDERED that "Dyson Defendants' Motion to Dismiss Pursuant to *Rule 12(b)(6)* and *Rule 9(b)*" (Doc. 19) is GRANTED IN PART and DENIED IN PART as follows:

1. Cornucopia's antitrust claims (Counts I, II, and III) are —

    a. DISMISSED with prejudice to the extent they assert a *Walker Process* antitrust theory based on Dyson's conduct in obtaining U.S. **[*1104]** Patent Nos. 7,931,449, 8,092,166, and/or 7,972,111;

    b. DISMISSED without prejudice to the extent they assert a *Walker Process* antitrust theory based on Dyson's conduct in obtaining U.S. Patent No. 8,052,379; and

    c. DISMISSED with prejudice to the extent they assert a "sham litigation" antitrust claim.

2. Cornucopia's state-law tortious interference claim (Count IV) is DISMISSED with prejudice.
3. Dyson's motion is otherwise DENIED.

IT IS FURTHER ORDERED that any motion for leave to amend as to Cornucopia's *Walker Process* antitrust theory based on Dyson's conduct in obtaining U.S. Patent No. 8,052,379 **[**44]** must be filed by August 10, 2012.

Dated this 27th day of July, 2012.

HN1[] **Motions to Dismiss, Failure to State Claim**

The standards governing *Fed. R. Civ. P. 12(b)(6)* motions are familiar. These motions test the legal sufficiency of a complaint. *Fed. R. Civ. P. 8(a)(2)* requires only a short and plain statement of the claim showing that the pleader is entitled to relief, in order to give the defendant fair notice of what the claim is and the grounds upon which it rests. While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, it must set forth more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN2[] Motions to Dismiss, Failure to State Claim

The United States Supreme Court has identified two working principles that underlie Twombly. First, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. *Fed. R. Civ. P. 8* marks a notable and generous departure from the hyper-technical, code-pleading regime of a prior era, but it does not unlock the doors of discovery for a plaintiff armed with nothing more than conclusions. Second, only a complaint that states a plausible claim for relief survives a motion to dismiss. Determining whether a complaint states a plausible claim for relief will be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. Providing too much in the complaint may also be fatal to a plaintiff. Dismissal may be appropriate when the plaintiff has included sufficient allegations disclosing some absolute defense or bar to recovery. If the pleadings establish facts compelling a decision one way, that is as good as if depositions and other evidence on summary judgment establishes the identical facts.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

A dismissal without leave to amend is improper unless it is beyond doubt that the complaint could not be saved by any amendment. The Ninth Circuit has held that in dismissals for failure to state a claim, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts. The issue is not whether plaintiff will prevail but whether he is entitled to offer evidence to support the claims.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN4[] Conspiracy to Monopolize, Sherman Act

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, prohibits any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. To state a claim under *§ 1*, the plaintiffs must plead facts that plausibly suggest (1) an agreement or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intend to harm or restrain competition; and (3) which actually injures competition. Additionally, for each individual defendant, plaintiff must allege that the defendant had a conscious commitment to a common scheme designed to achieve an unlawful object.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] Conspiracy to Monopolize, Sherman Act

A marketing agent is not liable for the acts of its alleged principal in a *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, conspiracy unless the agent (1) had knowledge of its supplier's purpose to restrain trade; (2) intended to restrain trade itself rather than simply earn its usual and customary commission; and (3) contributed materially to the restraint.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

HN6[] **Conspiracy to Monopolize, Sherman Act**

Concerted action under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, does not turn simply on whether the parties involved are legally distinct entities. Rather, substance, not form, should determine whether an entity is capable of conspiring under *§ 1*. So the fact that two companies may have organized themselves under a single umbrella or into a structured joint venture is not dispositive. Instead, the relevant functional inquiry is whether there is a conspiracy between separate economic actors pursuing separate economic interests, such that the agreement deprives the marketplace of independent centers of decisionmaking.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

HN7[] **Conspiracy to Monopolize, Sherman Act**

Copperweld holds that the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, In other words, in that case, the parent and subsidiary could not conspire because they acted as a single entity and it takes two to conspire. The parent and subsidiary have a complete unity of interest; their general corporate actions are guided or determined not by two separate consciousnesses, but one. Courts interpreting Copperweld have held that it does not follow from Copperweld that subsidiary entities are automatically liable under *§ 1* for any agreements to which the parent is a party. As a matter of well-settled common law, a subsidiary is a distinct legal entity and is not liable for the actions of its parent or sister corporations simply by dint of the corporate relationship.

Opinion

MEMORANDUM DECISION AND ORDER

INTRODUCTION

In December 2011, this Court granted certain defendants' motions to dismiss, though it allowed plaintiffs to amend as to four defendants: (1) Potandon Produce LLC, (2) United II Potato Growers of Idaho, Inc. (United II), (3) Idahoan Foods, LLC, and (4) R.D. Offutt Co. Plaintiffs filed amended complaints against these defendants and also named a new individual defendant - Ronald D. Offutt, Jr. All these defendants have moved to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. *See* Dkts. 180, 182, 183, 194. The Offutt defendants also moved for summary judgment on two discrete factual issues. *See* Dkt. 180. For the reasons explained below, the Court will deny all pending motions to dismiss and will deem the motion for summary judgment moot.

ALLEGED FACTS[1]

Plaintiffs, who are both direct and indirect potato purchasers, contend that defendants illegally agreed to reduce the supply of potatoes in order to raise prices. Plaintiffs assert that the alleged scheme started when potato growers in Idaho formed a cooperative called United Potato Growers of Idaho (UPGI). The Idaho potato growers, along with potato farmers in several other states, then established United Potato Growers of America (UPGA) as an umbrella cooperative.

Plaintiffs assert that the cooperatives were created for the purpose of increasing the price of potatoes through supply management. Plaintiffs allege that defendants implemented their plan by, among other things, agreeing to limit potato acreage, and by paying farmers to either destroy existing potatoes or refrain from growing additional potatoes in order to reduce the overall number of potatoes available for sale to direct purchasers. Plaintiffs contend that defendants' supply reduction program caused potato prices to be fixed, raised, maintained, and/or stabilized. Accordingly, plaintiffs contend that defendants' actions **[*7]** violate established antitrust laws.

LEGAL STANDARD

HN1[] The standards governing *Rule 12(b)(6)* motions are familiar. These motions test the legal sufficiency of a complaint. *Conley v. Gibson, 355 U.S. 41, 46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. *Federal Rule of Civil Procedure 8(a)(2)* requires only "a short and plain statement of the claim showing that the pleader is entitled to relief," in order to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss "does not need detailed factual allegations," it must set forth "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Id. at 555*. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Id. at 570*. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. *Id. at 556*. The plausibility standard is not akin to a "probability **[*8]** requirement," but it asks for more than a sheer possibility that a

---

[1] More detailed facts specific to each moving defendant are set forth below. Additionally, a fuller statement of facts relating **[*6]** to non-moving defendants is contained in the Court's December 2, 2011 Order. *See* Dkt. 159, at 21-23.

defendant has acted unlawfully. *Id.* Where a complaint pleads facts that are "merely consistent with" a defendant's liability, it "stops short of the line between possibility and plausibility of 'entitlement to relief.' " *Id. at 557*.

In a more recent case, ***HN2***[] the Supreme Court identified two "working principles" that underlie *Twombly*. *See Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. First, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. *Id.* "*Rule 8* marks a notable and generous departure from the hyper-technical, code-pleading regime of a prior era, but it does not unlock the doors of discovery for a plaintiff armed with nothing more than conclusions." *Id.* Second, only a complaint that states a plausible claim for relief survives a motion to dismiss. *Id. at 679*. "Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id.*

Providing too much in the complaint may also be fatal to a plaintiff. Dismissal may be **[*9]** appropriate when the plaintiff has included sufficient allegations disclosing some absolute defense or bar to recovery. *See Weisbuch v. County of L.A., 119 F.3d 778, 783, n. 1 (9th Cir. 1997)* (stating that "[i]f the pleadings establish facts compelling a decision one way, that is as good as if depositions and other . . . evidence on summary judgment establishes the identical facts").

HN3[] A dismissal without leave to amend is improper unless it is beyond doubt that the complaint "could not be saved by any amendment." *Harris v. Amgen, Inc., 573 F.3d 728, 737 (9th Cir. 2009)* (issued two months after *Iqbal*). [2] The Ninth Circuit has held that "in dismissals for failure to state a claim, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Cook, Perkiss and Liehe, Inc. v. N. Cal. Collection Serv., Inc., 911 F.2d 242, 247 (9th Cir. 1990)*. The issue is not whether plaintiff will prevail but whether he "is entitled to offer evidence to support the claims." *Diaz v. Int'l Longshore & Warehouse Union, 474 F.3d 1202, 1205 (9th Cir. 2007)* **[*10]** (citations omitted).

ANALYSIS

Plaintiffs allege that defendants violated *§ 1* of the Sherman Act, which ***HN4***[] prohibits "any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. To state a claim under *§ 1*, plaintiffs must plead facts that plausibly suggest "(1) an agreement or conspiracy among two or more persons or distinct business entities, (2) by which the persons or entities intend to harm or restrain competition, and (3) which actually injures competition." *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507 (9th Cir. 1989)*. Additionally, for each individual **[*11]** defendant, plaintiff must allege that *that* defendant had "'a conscious commitment to a common scheme designed to achieve an unlawful object.'" *Monsanto Co. v. Spray-Rite Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (citation omitted).

In this round of *Rule 12(b)(6)* motions, the moving defendants fall into two categories: Potandon is a marketer defendant and the others are "dehydrator defendants." The Court will first address Potandon's motion, and then turn to the dehydrator defendants' motions.

1. The Marketer Defendant - Potandon

---

[2] The Court has some concern about the continued vitality of the liberal amendment policy adopted in *Harris v. Amgen*, based as it is on language in *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*, suggesting that "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim. . .." Given *Twombly* and *Iqbal*'s rejection of the liberal pleading standards adopted by *Conley,* it is uncertain whether the language in *Harris v. Amgen* has much of a life expectancy.

Unlike many of the defendants in this action, Potandon does not grow potatoes. It sells potatoes and onions to major retailers, club stores, wholesalers, produce distributors and restaurant chains. It is also the marketing agent for several grower defendants.

Plaintiffs' theory is that Potandon joined and participated in the supply-reduction/price-fixing conspiracy by assisting growers in "flow-control" efforts. As plaintiffs explain it, flow control is exactly what it sounds like - controlling the number of potatoes that flow into the marketplace. The underlying economics are simple - keep supply levels such that they do not exceed demand, which will, in turn, ensure that **[*12]** prices do not drop. *See IPC* [3] ¶¶ 224-25 (quoting a March 2007 UPGI newsletter, which explains: "'Flow controls are based upon sound economic princip[le]s . . . if daily offerings (supplies) DO NOT exceed buyers' needs (demand), buyers begin calling salesman searching for product. When salespeople DO NOT have the product available, they raise the price.'").

The Court dismissed plaintiff's original complaints against Potandon primarily because plaintiffs had not alleged Potandon was directly involved in flow-control efforts. Both amended complaints cure this deficiency. The indirect purchasers now allege that Potandon directly participated in flow-control efforts by changing the grade assigned to potatoes based on supply levels, rather than the actual quality of the potatoes. More specifically, the indirect purchasers allege:

> Potandon knowingly participated in the flow control and output restriction scheme through intentionally imposing pretextual and inconsistent grading controls **[*13]** on the fresh potatoes it sold. Throughout the Class Period, Potandon's principals met on a weekly basis in Snake River Valley, Idaho, to discuss flow control issues, including the amount of potatoes to be sold on the fresh potato market.
> As a result of these weekly meetings, and in order to reduce the number of potatoes sold on the fresh potato market when fresh potatoes supplies were high, Potandon management instructed the Potandon operations team to grade potatoes more rigorously. Potandon's employee oversaw the more rigorous grading of the potatoes in Potandon's own packing sheds,[[4]] as well as the packing sheds of other growers, including Larsen Farms and Driscoll Potatoes. Potandon's application of the more rigorous grading standards while supplies were high facilitated the conspirators' objective of reducing the supply of potatoes to the fresh potato market. Potandon thereby reduced the supply of fresh potatoes to the market by intentionally participating in the flow control and output restrictions.

IPC ¶¶ 226-27. The direct purchaser plaintiffs allege similar facts regarding pretextual grading:

> One of the methods used by Potandon to control the flow of potatoes to the market **[*14]** in concert with its growers was "grading" - the process of modifying quality criteria in order to increase or reduce the flow of potatoes into the market. Following their meeting with Potandon's constituent growers, Potandon executives would direct Potandon's Director of Idaho Operations with regard to the appropriate grading standard. Potandon would gather its Quality Assurance (QA) personnel and the Director of Operations would instruct the QA personnel regarding the grading standard to be employed and whether to adjust the flow of potatoes on to the market, based on the information acquired during the weekly growers meeting.
>
> If there were excessive quantities of potatoes in the growers' sheds, Potandon would direct its QA personnel to use stricter quality guidelines in order to reduce the volume of potatoes available for sale. Conversely, if the quantities of stored potatoes were comparatively low, Potandon would instruct its QA personnel to use less rigid quality guidelines and thus permit larger numbers of potatoes to enter the market. By judicious use of this

---

[3] Throughout this decision, IPC refers to the indirect purchasers' Second Consolidated Amended Class Action Complaint (Dkt. 164). DPC refers to the direct purchasers' Second Amended Class Action Complaint (Dkt. 163).

[4] The parties dispute whether Potandon owns packing sheds. *See, e.g., Potandon Reply*, Dkt. 214, at 6-7; *Indirect Purchaser Opp.*, Dkt. 206, at 13-14. For purposes of resolving this motion, the Court will accept as true the allegation that Potandon has its "own packing sheds." *See IPC* ¶ 226 (quoted above); *DPC* ¶ 99 (alleging Potandon supracompetitively raised prices "both *in its own sheds* and through its growers' sheds.") (emphasis added).

> "grading" strategy, Potandon and its constituent growers were able to ensure that the price of potatoes was maintained **[*15]** at supracompetitive levels.

DPC ¶¶ 101-02*; see also id.* ¶¶ 95-103.

With these allegations, the Court can reasonably infer that Potandon joined and participated in the conspiracy.

Potandon complains that there is no allegation directly showing that it agreed to join the conspiracy. As Potandon puts it, "there is no allegation that Potandon signed a United membership agreement or contract, or was an incorporator founder, or member of United . . . ." *Reply*, Dkt. 214, at 3. But plaintiffs may rely on circumstantial evidence of an agreement - so long as these evidentiary allegations allow the Court to reasonably infer that Potandon joined the conspiracy. *See generally* *Twombly, 550 U.S. at 556* ("a claim requires a complaint with enough factual matter (taken as **[*16]** true) to suggest that an agreement was made"); *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 225 (3d Cir. 2011)* ("To adequately plead an agreement, a plaintiff must plead either direct evidence of an agreement or circumstantial evidence. The question then becomes whether these alleged facts make it plausible that Appellees had an agreement . . . .") (internal citation omitted). Here, viewing the allegations regarding pretextual grading in the light most favorable to plaintiffs, it is reasonable to infer that Potandon joined and participated in the conspiracy.

Potandon next argues that it did not pretextually grade potatoes and contends that plaintiffs' allegations to the contrary are absurd. At this stage, the Court will accept as true plaintiffs' allegation that Potandon arbitrarily graded potatoes based on supply levels rather than the actual quality of the potatoes. "When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief." *Iqbal, 556 U.S. at 679*. The Court does not find the pretextual grading allegations, or plaintiffs' theory regarding Potandon, to be patently illogical **[*17]** or absurd, as Potandon argues.

The Court is also unpersuaded by Potandon's argument that the complaint fails because there is an obvious, alternative explanation for Potandon's otherwise lawful conduct. True, Potandon grades potatoes according to their quality, and there is no dispute that this is a lawful activity. But plaintiffs do not simply allege that Potandon graded potatoes and then ask the Court to infer some nefarious purpose for lawful grading. Rather, plaintiffs directly allege that Potandon adjusted its grading standards based on supply levels, rather than quality. Potandon does not offer any independent lawful reason for pretextually grading potatoes.

Because plaintiffs have successfully alleged Potandon directly participated in the conspiracy, the Court need not address the agency theories of liability in detail. [5] Briefly, however, the Court finds plaintiffs' factual allegations sufficient under a "marketing agent" theory. Under this theory, Potandon argues that plaintiffs failed to allege that Potandon intended to restrain trade itself, as opposed to simply earning its usual and customary commission. *See generally* 7 Herbert Hovenkamp & Philip E. Areeda, *Fundamentals of* ***[*18]*** ***Antitrust Law*** ¶ 1474c (3d ed. 2010) ***HN5***[] (marketing agent not liable for the acts of its alleged principal in a *§ 1* conspiracy unless the agent (1) had "knowledge of its supplier's purpose to restrain trade," (2) "intended to restrain trade itself rather than simply earn its usual and customary commission,"and (3) contribute[d] materially to the restraint."). The complaint does not say this in so many words. But it is reasonable to infer such intent based on the pretextual grading allegations.

2. The Dehydrator Defendants

The dehydrator defendants include United II, R.D. Offutt, Ronald D. Offutt, Jr., and Idahoan Foods, LLC. Plaintiffs allege that in March 2007, R.D. Offutt Co. partnered with United II to create the Idahoan Foods joint venture. The deal allegedly included the following components: (1) UPGI formed United II, which is a second cooperative made up of some UPGI members; (2) R.D. Offutt contributed potato processing plants to the venture; (3) United II and

[5] Additionally, in responding to this round of motions, plaintiffs do not appear to rely on a single-entity theory of liability. The Court will therefore not address that issue.

R.D. Offutt own Idahoan Foods, which is a limited **[*19]** liability company; (4) Idahoan Foods acquired a company (Idaho Fresh-Pak) that had four dehydration plants; and (5) United II's grower-owners supply all the potatoes for Idahoan Foods' Idaho and Nevada plants. *DPC* ¶¶ 146-48, 369-70; *see also IPC* ¶¶ 131, 137, 147-48.

Plaintiffs allege that Idahoan Foods was created as part of the overall scheme to reduce supplies and elevate prices. As plaintiffs put it, the "joint venture enabled potato growers to offload surplus potatoes into the dehydration market and further reduce supplies, thus facilitating and contributing to the price-fixing scheme . . . ." *DPC* ¶ 146; *see also IPC* ¶132. The plaintiffs also allege that UPGI explicitly and publicly stated the joint venture's purpose. *See, e.g., DPC* ¶ 379; *IPC* ¶¶ 132-33. For example, the complaints allege that "UPGI discussed the joint venture in its March 2007 newsletter and stated, 'United of Idaho [UPGI] feels that the current dehy strategy being implemented is critical to United's overall mission of supply management." *IPC* ¶ 133; *DPC* ¶ 379.

What the earlier complaints did not do was plausibly allege that R.D. Offutt and United II viewed the transaction similarly, or entered into it for the same **[*20]** reasons. Thus, the Court dismissed the complaints. As explained below, the amended complaints cure this deficiency.

A. United II

Turning first to United II, plaintiffs now plausibly allege that United II made a conscious commitment to join the conspiracy. The most significant new allegation is that United II's stated corporate purpose, as articulated in its articles of incorporation, is "'to stabilize potato prices and supplies in the State of Idaho . . . ." *DPC* ¶ 30; *IPC* ¶ 138. This statement undercuts United II's insistence that it did nothing more than form a joint venture to participate in the dehydration market. If that were the case, one might expect the statement of corporate purpose to say something like, "United II's purpose is to compete in the dehydration market." It is also noteworthy that UPGI - an alleged conspirator - has the same statement of corporate purpose as does United II. *See DPC* ¶ 217; *IPC* ¶ 203.

And while United II's statement of corporate purpose, standing alone, is not necessarily sufficient to support an inference that it joined the underlying conspiracy, it puts plaintiffs' other allegations on a new footing. Specifically, earlier complaints contained fairly **[*21]** extensive allegations regarding *UPGI's* (not United II's) view of the joint venture. As the Court explained in its earlier order, just because UPGI viewed the transaction one way did not mean that United II shared that view. But now we have two companies with virtually identical statements of corporate purpose, and one company was created right at the time UPGI announced the use of a dehydration venture as part of its supply-management plan. So it becomes far more reasonable to infer that these two companies had a shared vision for the joint venture.

Moreover, the direct purchaser plaintiffs have fleshed out their complaints with new allegations regarding United II. [6] Among other things, these plaintiffs now allege that:

- United II requires its members to abide by UPGI's supply management policies, including acreage restrictions. *DPC* ¶ 372.

- United II board members had discretion to "siphon off" up to three percent of United II members' top quality fresh potatoes to processors in order to "balance the fresh pipeline" by taking fresh potatoes off the market. *Id.* ¶¶ 373-74.

---

[6] The direct purchasers' new allegations regarding **[*23]** United II are more extensive than the indirect purchasers'. The indirect purchasers basically just add United II's statement of corporate purpose, along with an allegation showing that United II's board is populated with numerous UPGI members. United II argues that both new complaints are deficient, but does not directly argue that if the direct purchasers' complaint survives, the indirect purchasers' complaint should not. *See, e.g., United II Reply*, at 3 n.5 (noting that the direct purchaser complaint is more extensive than the "minimal allegations made by the indirect purchaser plaintiffs"). Regardless, however, even the indirect purchasers' minimal new allegations are just enough to nudge their claim against United II across the line from "possible" to "plausible."

- United II also encouraged its members to commit an additional five to 10 percent of fresh potatoes for dehydration. **[*22]** *Id.* ¶ 376.
- Thus, according plaintiffs, United II board members sought to divert as much as 13% of its members' fresh potatoes into the less profitable processed potato market in order to protect returns in the fresh potato market.

Under these alleged facts, the Court may reasonably infer that United II joined and participated in the conspiracy.

Finally, the Court is not persuaded by United II's argument that plaintiffs have done nothing more than allege that United II participated in a pro-competitive joint venture. To be sure, the mere formation of a joint venture - standing alone - would not support a conclusion that the venturers consciously committed to a common scheme designed to achieve an unlawful objective. Additionally, an ordinary purchase contract is not sufficient to bind a party to a conspiracy. *See, e.g., Rick-Mik Enters, Inc. v. Equilon Enters., LLC, 532 F.3d 963, 976 (9th Cir. 2008)*. But as discussed, plaintiffs have successfully alleged that United II did more than form a joint venture or enter into an ordinary purchase contract. They have plausibly alleged that United II joined the conspiracy alleged in the complaint.

B. The Offutt Defendants' Motion to Dismiss

Plaintiffs have also plausibly alleged that the Offutt defendants joined the supply-management conspiracy.

The Court dismissed the earlier complaints against corporate defendant R.D. Offutt because it was unclear if R.D. Offutt had committed itself to the supply management conspiracy, as opposed to simply entering into the dehydration venture for its own lawful, independent reasons **[*24]** - namely, to acquire potatoes for dehydrators. In their amended complaints, however, the direct purchasers allege that in March 2007 - precisely at the time when the dehydration venture was being formed - "R.D. Offutt explicitly agreed to join UPGI . . . thereby affirming his commitment to UPGI's potato supply manipulation agenda - and agreed to reduce supply as a result." *DPC* ¶ 144. The direct purchasers base this allegation on a March 2007 UPGI newsletter, which included the following report about the dehydration venture:

> United of Idaho (United I) is also forming a separate cooperative called United II which will offer to potato growers (who are currently members or decide to become members of United I) preferred stock in United II. . . . This new United II cooperative will partner with Ron D. Offutt Company (RDO) to form a newly combined company, which is yet to be officially named, but is currently known as "NewCo." Once the combined deal is accomplished, . . . NewCo will be a consolidated dehydration company with United II owning and contributing the Idahoan plants and RDO owning and contributing its plants in North Dakota, Nevada, and Idaho. *Ron Offutt has also agreed to join* ***[*25]*** *United.*

Mar. 2007 UPGI Bulletin, Dkt. 208-3, at 2 (internal paragraph divisions omitted; emphasis added); *see generally Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)* (court may examine documents referred to in the complaint without transforming the motion to dismiss into a motion for summary judgment).

The indirect purchasers take a somewhat different tack with regard to Offutt defendants. They allege that the Offutt defendants *actually* joined - not just agreed to join - UPGI and, moreover, that Ron Offutt was a "founding member." *See IPC* ¶¶ 143, 145. These allegations prompted the Offutt defendants' motion for summary judgment and that motion, in turn, prompted the indirect purchasers to disavow their allegations that the Offutt defendants had *in fact* joined UPGI, or that Ron Offutt was as founding member of the cooperative. The direct purchasers also cross-moved for relief under *Rule 56(d)*, asking for additional time to conduct discovery on the membership question.

The upshot of all these motions is that for 12(b)(6) purposes, plaintiffs are left with an allegation that Ron Offutt *agreed* to join UPGI. (The direct purchasers used the "agreed to join" language in their complaint, **[*26]** while the indirect purchasers refer to the March 2007 newsletter quoted above, which uses the "agreed to join" language.) The Offutt defendants did not move for summary judgment on that factual allegation.

The Court finds even this lesser allegation significant. The fact that UPGI announced Mr. Offutt's agreement to join UPGI right at the time the joint venture was being formed makes it reasonable for the Court to infer that the Offutt defendants entered the underlying conspiracy (even in the absence of actually joining UPGI) - particularly when this new allegation is viewed alongside plaintiffs' other factual allegations.

Specifically, plaintiffs also allege that R.D. Offutt is a large, North Dakota-based grower, with 60,000 acres devoted to potatoes. *See IPC* ¶ 144; *DPC* ¶ 140. As plaintiffs point out, R.D. Offutt thus has at least a theoretical motive to join a conspiracy aimed at stabilizing potato prices in the fresh-potato market. *See generally* *Poller v. Columbia Broad. Sys., Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)* (recognizing that in complex antitrust litigations, "motive and intent play leading roles").

Further, R.D. Offutt sent representatives to a November 2004 meeting regarding the formation **[*27]** of regional and national cooperatives. Thus, R.D. Offutt presumably had knowledge of UPGI's key purpose - to reduce potato supply so as to maintain and increase potato prices.

Before the amendment, these allegations did little more than suggest that R.D. Offutt had the opportunity to join the conspiracy. But when these allegations are considered in context with the new allegation - that Ron Offutt agreed to join UPGI - the Court finds it reasonable to infer that the Offutt defendants joined the underlying supply-management conspiracy - even if their names did not appear on UPGI's membership records.

The Offutt defendants argue that the allegation about "agreeing to join" UPGI is insufficient because plaintiffs fail to allege what Mr. Offutt *did* or *said* to indicate such an agreement. The Court is not persuaded. This argument would be persuasive if plaintiffs did nothing more than allege that Mr. Offutt agreed to join UPGI in March 2007. But these allegations are not made in a factual vacuum. Rather, plaintiffs supplied detailed facts about the March 2007 dehydration venture, R.D. Offutt's role in it, prior knowledge of UPGI's goals, and the like. Given this factual context, the allegation **[*28]** that the Offutt defendants agreed to join the conspiracy (and, more specifically, viewed the dehydration venture as a tool of the conspiracy) is plausible. No additional factual detail is necessary at this stage. *See* *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)* (citing *Twombly, at 565 n.10*); *see also* *In re TFT-LCD (Flat Planel) Antitrust Litig., 586 F. Supp. 2d 1109, 1117 (N.D. Cal. 2008)* (granting plaintiffs leave to amend complaint, indicating that "plaintiffs need not plead each defendant's involvement in the alleged conspiracy in elaborate detail, but must simply include allegations specific to each defendant alleging that defendant's role in the alleged conspiracy").

C. The Offutt Defendants' Motion for Summary Judgment

As noted above, the Offutt defendants asked the Court to grant partial summary judgment on two discrete allegations: (1) that Ron Offutt never joined UPGI; and (2) the R.D. Offutt Company never joined UPGI. On reply, however, the Offutt defendants suggest that the Court need not rule on its motion for summary because plaintiffs "disavowed allegations that R.D. Offutt Company joined UPGI - the allegations that gave rise to the motion for summary **[*29]** judgment." *Reply*, Dkt. 215, at 4. The Court concurs with this assessment because, as discussed, plaintiffs have plausibly stated a claim against the Offutt defendants by alleging that "Ron Offutt *agreed to join* United." The Offutt defendants did not move for summary judgment on that issue. The Court therefore deems the motion for summary judgment - along with defendants' cross-motion for relief under *Rule 56(d)* - moot.

D. Idahoan Foods

The Court will deny Idahoan Foods' motion to dismiss because plaintiffs have now plausibly alleged that Idahoan is an "instrumentality" of its owners (R.D. Offutt and United II) in the supply-reduction conspiracy. *See DPC* ¶ 162 [7]; *see generally* Am. Needle, Inc. v. NFL, 560 U.S. 183, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010).

This Court dismissed earlier complaints against Idahoan primarily because plaintiffs had not pled **[*30]** "evidentiary factual allegations tying Idahoan to the scheme alleged in the complaint other than the fact of the dehydration joint venture agreement." *See Dec. 2, 2011 Order,* Dkt. 159, at 55. The amended complaints cure this deficiency by fleshing out allegations regarding the dehydration venture, as well as the joint venture partners - R.D. Offutt and United II. Specifically, as the Court explained above, in earlier complaints, plaintiffs had plausibly alleged that UPGI (but not United II or R.D. Offutt) viewed the dehydration venture as a critical component of the supply-reduction plan. But the amended complaints plausibly allege that R.D. Offutt and United II viewed the dehydration venture the same way, entered the horizontal supply-reduction conspiracy, and used the Idahoan venture to further that conspiracy.

Idahoan argues that it cannot be liable for the actions of its owners - R.D. Offutt and United II - because it is a separately incorporated legal entity. *See Idahoan Reply*, Dkt. 217, at 3. Two Supreme Court cases - *Copperweld* and *American Needle* - guide the Court's analysis of this argument. *See* Am. Needle, Inc. v. NFL, 560 U.S. 183-, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010); Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768-69, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984).

The **[*31]** central teaching of both cases is that ***HN6***[] "concerted action under § 1 does not turn simply on whether the parties involved are legally distinct entities." *Am. Needle, 130 S. Ct. at 2209*. Rather, "'substance, not form, should determine whether a[n] ... entity is capable of conspiring under § 1.'" *Id. at 2211* (quoting *Copperweld, 467 U.S. at 773 n. 21*). So the fact that two companies may have organized themselves "under a single umbrella or into a structured joint venture" is not dispositive. *130 S. Ct. at 2212*. Instead, the "relevant functional inquiry is whether there is a conspiracy between 'separate economic actors pursuing separate economic interests,' such that the agreement 'deprives the marketplace of independent centers of decisionmaking.'" *Robertson v. Sea Pines Real Estate Cos., 679 F.3d 278 (4th Cir. 2012)* (citing *Am. Needle, 130 S. Ct. at 2212* and *Copperweld, 467 U.S. at 769*)).

The Supreme Court recently applied these concepts in *American Needle*. There, the National Football League formed a corporate joint venture - National Football League Properties (NFLP) - to manage the NFL's intellectual property. The NFLP initially granted nonexclusive licenses to several vendors to sell **[*32]** apparel with team insignias. Later, it granted an exclusive license to Reebok - thus excluding the plaintiff, who sued for antitrust violations. *Am. Needle, 130 S. Ct. at 2211*. The Court held that the licensing activities of the NFLP constituted concerted action within the meaning of *§ 1* of the Sherman Act. The Court concluded that "[a]lthough NFL teams have common interests such as promoting the NFL brand, they are still separate, profit-maximizing entities, and their interests in licensing team trademarks are not necessarily aligned." *Id. at 2213*. Therefore, "[t]hirty-two teams operating independently through the vehicle of the NFLP are not like the components of a single firm that act to maximize the firm's profits. The teams remain separately controlled, potential competitors with economic interests that are distinct from NFLP's financial well-being." *Id. at 2215*. As a result, the Court held that the NFL teams and the NFLP were appropriately subject to suit under *§ 1* for NFLP's licensing activities. *See also* United States v. Sealy, 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967).

Here, plaintiffs allege a similar scenario. Viewing the complaints as a whole, both plaintiffs allege that R.D. Offutt and United **[*33]** II are separately controlled, potential competitors with economic interests distinct from Idahoan's financial well-being. *See Am. Needle, 130 S. Ct. at 2215*. They have also plausibly alleged that when R.D. Offutt and United II make decisions for Idahoan, they allegedly "capture individual economic benefits separate and apart

[7] The indirect purchasers do not use the term "instrumentality" in describing Idahoan (and this term comes from the Supreme Court's decision in *American Needle*, which will be discussed). But, like the direct purchasers, they allege evidentiary facts supporting a conclusion that Idahoan was an instrumentality of its owners. *See, e.g., IPC* ¶¶ 130-49, 299, 329-36.

from" Idahoan's profits. *See id.* That is, according to plaintiffs, when Idahoan accepts potatoes that could have gone into the fresh-potato marketplace, it furthers the supply-reduction scheme. Thus, plaintiffs have plausibly alleged that the "members of a legally single entity violated *§ 1* [because] . . . the entity was controlled by a group of competitors and served, in essence, as a vehicle for ongoing concerted activity." *Am. Needle, 130 S. Ct. at 2209* (citing, among other cases, *Sealy, 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238*). Under these allegations, Idahoan is subject to suit under*§ 1* of the Sherman Act.

Idahoan argues that *Copperweld* compels a different result. ***HN7***[] *Copperweld* held that "the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act." *467 U.S. at 771*. In other words, in that case, the **[*34]** parent and subsidiary could not conspire because they acted as a single entity and it takes two to conspire. *See id.* (the parent and subsidiary "have a complete unity of interest . . . their general corporate actions are guided or determined not by two separate consciousnesses, but one").

Courts interpreting *Copperweld* have held that "it does not follow from *Copperweld* that subsidiary entities are *automatically* liable under *§ 1* for any agreements to which the parent is a party. As a matter of well-settled common law, a subsidiary is a distinct legal entity and is not liable for the actions of its parent or sister corporations simply by dint of the corporate relationship." *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 341 n.44 (3d Cir. 2010)* (emphasis added); *see also* Mitchael v. Intracorp, Inc., 179 F.3d 847, 857 (10th Cir. 1999).

Idahoan points to these decisions to support its argument that because it is a separately incorporated LLC, it cannot be held liable as a conspirator based on the actions of its owners. [8] This argument is not persuasive, however, because, the Court has not concluded that Idahoan is potentially liable in this case based *solely* on the fact that its owners **[*35]** are alleged conspirators. Rather, as instructed by both *Copperweld* and *American Needle*, the Court has looked beyond this corporate relationship "in favor of a functional consideration of how the parties involved in the alleged anticompetitive conduct actually operate." *Am. Needle, 130 S. Ct. at 2209*. And, as already discussed, the plaintiffs have plausibly alleged that Idahoan was, in reality, "a formalistic shell for ongoing concerted action." *Id. at 2215*.

Idahoan's remaining arguments in favor of dismissal are also unavailing.

First, the Court is not persuaded that plaintiffs must do still more to plausibly **[*36]** allege a § 1 claim against Idahoan. For example, Idahoan notes that plaintiffs do not allege that Idahoan disposed of surplus potatoes or paid a premium for fresh potatoes when it really only needed dehydrated-grade potatoes. *See Idahoan Mem.*, Dkt. 183-1, at 10. But under *American Needle,* they key is that Idahoan's decisions "reflect not only an interest" in its "profits but also an interest in" the venturers' individual profits. *130 S. Ct. at 2215*. In other words, Idahoan does not necessarily have to act *against* its own interests to be an instrumentality of the conspiracy, and plaintiffs have now plausibly alleged that the entire point of the dehydration venture was to further the supply-management conspiracy.

Second, the Court is not persuaded by Idahoan's argument that it did not join the conspiracy because it was not involved in 2004, when the cooperative first formed. A conspirator can theoretically join an ongoing conspiracy at any time and plaintiffs have plausibly alleged that Idahoan joined the conspiracy in 2007, despite not being involved in the early stages. *Cf. United States v. Green, 523 F.2d 229, 233 (2d Cir. 1975)* ("The fact that new members joined the conspiracy as **[*37]** time went on and old members may have dropped out does not preclude a finding that a single, ongoing conspiracy existed.").

---

[8] Idahoan points out that in its earlier order, the Court stated that it would not disregard the separate corporate form of another defendant - Potandon. *See Dec. 2, 2011 Order*, Dkt. 159, at 45 ("Potandon - a separate corporate entity - cannot be implicated in the conspiracy based solely on the fact that one of its owners was an alleged conspirator.") (citing *In re Ins. Brokerage Antitrust Litig., 618 F.3d at 341 n.44*). But the defendants are distinguishable because plaintiffs did not plausibly allege that Potandon was created and operated as an instrumentality of the conspiracy.

Third, the Court is not convinced that plaintiffs' amended complaints contradict earlier ones. *See Idahoan Mem.*, Dkt. 183-1, at 7-9. Here, Idahoan focuses mainly on plaintiffs' earlier allegation that Idahoan "was formed 'to create a broad network of potato processing plants with convenient access to markets and to customers.'" *Original DPC,* Dkt. 39, ¶ 122; *Original IPC*, Dkt. 63, ¶ 156. This allegation does not appear in the amended complaints.

Idahoan seems to be arguing that plaintiffs are locked into alleging that Idahoan is pro-competitive because of this allegation. *See Idahoan Mem.*, Dkt. 183-1, at 8. But all along, plaintiffs have alleged that the dehydration venture was a component of the overall conspiracy. *See, e.g., Original DPC Comp.* ¶ 124 ("Through its United II/North American Foods joint venture, UPGI has devised an admitted means of furthering its supply-reduction and price-fixing efforts."). Thus, the Court cannot conclude that plaintiffs' amended complaints contradict its earlier ones.

In sum, plaintiffs have plausibly alleged that Idahoan is subject **[*38]** to suit under *American Needle*. The Court will therefore deny Idahoan's motion to dismiss.

ORDER

IT IS ORDERED THAT:

1. All pending motions to dismiss (Dkts. 180, 182, 183, 194) are **DENIED.**

2. Defendant R.D. Offutt Co. and Ronald Offutt's Motion for Partial Summary Judgment (Dkt 180) is **MOOT.**

DATED: **July 27, 2012**

/s/ B. Lynn Winmill

Honorable B. Lynn Winmill

Chief U. S. District Judge

Mueller v. Wellmark, Inc.

Supreme Court of Iowa

Civil Procedure > Appeals > Standards of Review > General Overview

HN1[] Involuntary Dismissals, Failure to State Claims

A reviewing court reviews a trial court's ruling on a motion to dismiss for the correction of errors at law. A motion to dismiss may be granted when a petition's allegations, taken as true, fail to state a claim upon which relief may be granted.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN2[] Summary Judgment, Evidentiary Considerations

A reviewing court reviews a trial court's grant of summary judgment for correction of errors at law. Summary judgment is appropriate if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law. The evidence is viewed in the light most favorable to the nonmoving party. However, when a motion for summary judgment is properly supported, the nonmoving party is required to respond with specific facts that show a genuine issue for trial.

Healthcare Law > ... > Health Insurance > Reimbursement > General Overview

HN3[] Health Insurance, Reimbursement

Iowa Code § 514F.2 (2009) prevents health insurers from utilizing preferred provider arrangements to limit payments "on a basis solely related" to the provider's license.

Governments > Legislation > Statutory Remedies & Rights

HN4[] Legislation, Statutory Remedies & Rights

Not all statutory violations give rise to a private cause of action. A private statutory cause of action exists only when the statute, explicitly or implicitly, provides for such a cause of action.

Governments > Legislation > Statutory Remedies & Rights

HN5[] Legislation, Statutory Remedies & Rights

Seeman set forth a four-factor test to determine whether a statute provides a private cause of action: (1) Is the plaintiff a member of the class for whose benefit the statute was enacted?; (2) Is there any indication of legislative intent, explicit or implicit, to either create or deny such a remedy?; (3) Would allowing such a cause of action be consistent with the underlying purpose of the legislation?; (4) Would the private cause of action intrude into an area over which the federal government or a state administrative agency holds exclusive jurisdiction? The Seeman court modified the four-factor federal test articulated in Cort. If any one of those factors is not satisfied, there is no implied cause of action.

Business & Corporate Compliance > ... > Regulators > State Insurance Commissioners & Departments > Rules & Regulations

Healthcare Law > ... > Health Insurance > Reimbursement > General Overview

HN6[] **State Insurance Commissioners & Departments, Rules & Regulations**

Iowa Code § 514F.3 (2009) directs the insurance commissioner to adopt rules for preferred provider contracts and organizations concerning but not limited to preferred provider arrangements and participation requirements, health benefit plans, and civil penalties.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN7[] **Trade Practices & Unfair Competition, State Regulation**

Iowa Code § 553.6(4) (2009) provides that the Iowa Competition Law shall not be construed to prohibit activities or arrangements expressly approved or regulated by any regulatory body or officer acting under authority of "this state." *Iowa Code § 553.6(4) (2009)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN8[] **Trade Practices & Unfair Competition, State Regulation**

Private anticompetitive conduct is exempt from federal antitrust laws if: (1) the conduct is undertaken pursuant to a clearly articulated and affirmatively expressed state policy and (2) the policy is actively supervised by the state itself.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN9[] **Trade Practices & Unfair Competition, State Regulation**

The general rule is that exemptions from coverage of competition laws are to be narrowly applied. The state action exemption is an affirmative defense as to which a defendant bears the burden of proof. Whether the state action exemption is established is a question of law for a court.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN10[] **Trade Practices & Unfair Competition, State Regulation**

For an "activity or arrangement" to be exempt from antitrust laws, a defendant must establish that it was "expressly approved or regulated" by a regulatory body or an officer acting under state authority. *Iowa Code § 553.6(4) (2009)*. To put it another way, the alleged anticompetitive practice must be expressed as state policy and actively supervised by the state. Rubber stamp approval of private action does not constitute state action.

HN14[] **Health Insurance, Reimbursement**

Iowa Admin. Code r. 191-27.3(2) provides, "A preferred provider arrangement shall not unfairly deny health benefits for medically necessary covered services." *Iowa Admin. Code r. 191-27.3(3)* provides that the regulations will cover preferred provider arrangements even when not sponsored by licensed insurers. a. A provision that if a covered person receives emergency services specified in the preferred provider arrangement and cannot reasonably reach a preferred provider, emergency services rendered during the course of the emergency will be reimbursed as though the covered person had been treated by a preferred provider, subject to any restriction which may govern payment by a preferred provider for emergency services.

HN17[] **Health Insurance, Reimbursement**

Iowa Admin. Code r. 191-27.6 states that a health insurer subject to "this chapter" shall be subject to and is required to comply with all other applicable laws and rules and regulations of "this state." *Iowa Admin. Code r. 191-27.7* indicates that civil penalties for violation of "this chapter" shall be imposed in the amount, and pursuant to the procedure, set forth in *Iowa Code § 507B.6*, *Iowa Code § 507B.7*, and *Iowa Code § 507B.8*. Lastly, *Iowa Admin. Code r. 191-27.8* contains certain whistleblower-type protections: "27.8(1) A health care insurer shall not prohibit a participating provider from or penalize a participating provider for discussing treatment options with covered persons, irrespective of the health care insurer's position on the treatment options, or from advocating on behalf of covered persons within the utilization review or grievance processes established by the health care insurer or a person contracting with the health care insurer. 27.8(2) A health care insurer shall not penalize a provider because the provider, in good faith, reports to state or federal authorities any act or practice by the health care insurer that, in the opinion of the provider, jeopardizes patient health or welfare."

Counsel: Glenn L. Norris of Hawkins & Norris, P.C., Des Moines; Steven P. Wandro of Wandro, Baer & McCarthy, P.C., Des Moines; and Harley C. Erbe of Erbe Law Firm, Des Moines, for appellants.

Opinion

[*247] WATERMAN, Justice.

In this complex interlocutory appeal from a putative class action, we must decide whether the district court correctly granted several dispositive motions. Plaintiffs are doctors of chiropractic who allege they have been victimized by the discriminatory practices of Iowa's largest health insurer, Wellmark, Inc. [1] The plaintiffs claim Wellmark wrongfully imposes restrictions and pays lower rates for chiropractic services than for equivalent services offered by medical doctors or osteopathic physicians. Plaintiffs allege that **[**2]** Wellmark not only has violated various insurance regulatory statutes, but also has engaged in unlawful conspiracy and monopolization in violation of the Iowa Competition Law.

First, the district court granted Wellmark's motion to dismiss claims brought under Iowa's insurance regulatory statutes because no private cause of action is provided therein. We affirm that ruling based on *Seeman v. Liberty Mutual Insurance Co., 322 N.W.2d 35, 42-43 (Iowa 1982)*. The proper forum for raising alleged violations of those regulatory statutes is through administrative proceedings in the Iowa Division of Insurance.

[1] Plaintiffs filed suit against Wellmark, Inc. d/b/a Wellmark Blue Cross and Blue Shield of Iowa and Wellmark Health Plan of Iowa, Inc., which is the Health Maintenance Organization of Wellmark, Inc. The defendants will be collectively referred to as Wellmark.

Second, the district court granted Wellmark's motion for summary judgment on plaintiffs' antitrust claims based on the "state action" exemption found in *Iowa Code section 553.6(4) (2009)*. We reverse in part because the summary judgment record fails to establish the challenged conduct falls within the exemption.

Third, the district court **[**3]** granted summary judgment on claims alleging Wellmark breached its obligations under a judicially approved national class action settlement in *Love v. Blue Cross Blue Shield Ass'n, No. 03-21296-CIV, 2008 U.S. Dist. LEXIS 96604 (S.D. Fla. Apr. 19, 2008)*. We affirm because the record contains no evidence Wellmark's implementation of the *Love* settlement violated the Iowa Competition Law.

Fourth, we affirm summary judgment on several specific antitrust claims for reasons explained below. We remand the remaining claims and defenses for further proceedings.

I. Background Facts and Proceedings.

This litigation began in December 2007 when Steven A. Mueller, D.C., filed a **[*248]** breach-of-contract claim against Wellmark over a $17,376 billing dispute. On May 20, 2008, plaintiffs filed a first amended petition adding plaintiffs, Bradley J. Brown, D.C.; Mark A. Kruse, D.C.; Kevin D. Miller, D.C.; and Larry E. Phipps, D.C. Plaintiffs are doctors of chiropractic who have billed for services provided to patients enrolled in Wellmark health insurance plans. Their amended pleading asserted class action claims on behalf of a putative "class **[**4]** of Iowa-licensed doctors of chiropractic who are citizens of the State of Iowa as of the date of filing." [2] Plaintiffs sought damages and injunctive relief against Wellmark, alleging discriminatory and anticompetitive practices that harmed chiropractic doctors. Division I contained the new class action claims, and Division II retained Mueller's individual claim. This appeal only concerns the class action claims in Division I.

Wellmark's business consists of selling health insurance plans to employer groups and providing administrative services to assist others who provide health insurance coverage, such as self-funded governmental entity plans. Wellmark is one of a dozen health insurers in the state, but retains the largest market share. Wellmark creates a network of preferred health care providers, including doctors **[**6]** of chiropractic, medical doctors, and osteopathic doctors, and incentivizes its members to use its preferred provider panel. Wellmark develops its preferred provider panel by entering into contracts with providers that govern the terms and conditions of treatment as well as fee schedules, at times on a take-it-or-leave-it basis. Preferred providers must adhere to these contracts to receive compensation from Wellmark for services provided to Wellmark's members. Preferred provider arrangements are

---

[2] The chiropractic profession has special significance to this state:

> Chiropractic was founded in Iowa in 1895 by D.D. Palmer, a Canadian immigrant. Palmer was a practitioner of magnetic healing; he had no formal medical training but was well read in both anatomy and physiology. He devoted a great deal of time to the study of the spine and eventually concluded that all disease was the result of abnormal spinal function. Palmer performed his first adjustment in 1895. Subsequent to his initial successes, Palmer's popularity increased and in 1896 he founded the first school of chiropractic in Davenport, Iowa, now known as the Palmer College of [C]hiropractic. One of Palmer's first patients gave the profession its name by combining the Greek words "chiro" (hand) and "praktikos" **[**5]** (done by).
>
> . . . .
>
> In 1906 Palmer's son, B.J. Palmer, took over the school and is credited with the development of the chiropractic profession. By 1910 the Palmer School had courses in X-ray studies and was the first to use this new technology to detect spinal misalignments. In 1935 B.J. Palmer established a research clinic at the school and is credited with developing a prototype of the electroencephalogram or EEG.

Kristyn S. Appleby & Joanne Tarver, *Medical Records Review* § 5.16, at 5-74 (4th ed. 2010). Palmer College of Chiropractic is "[k]nown throughout the profession as The Fountainhead [because it] changed the world as the first institution to offer chiropractic education." Palmer College of Chiropractic, *Palmer at a Glance*, *http://www.palmer.edu/PalmerAtAGlance/(last* visited June 12, 2012).

expressly encouraged by the Iowa legislature as a health care cost control mechanism. *See Iowa Code § 514F.2*. The legislature has directed the Iowa Insurance Commissioner to regulate these preferred provider arrangements. *Id. § 514F.3*.

Stated simply, the plaintiffs in this lawsuit allege Wellmark has employed preferred provider arrangements in an unlawfully discriminatory and anticompetitive manner in violation of statutory insurance provisions and state antitrust laws.

Division I of the first amended petition contains five counts, spanning forty pages. **[*249]** Count I provides factual background for the claims that follow. Count II seeks declaratory relief based upon allegations that Wellmark engages **[**7]** in discriminatory practices that violate insurance regulatory provisions contained in the Iowa Code that prevent health insurers from taking actions "on a basis solely related to the [chiropractor's] license." *Iowa Code § 514F.2*; *accord Iowa Code §§ 509.3(6)*, *514.7*, *514.23(2)*, *514B.1(5)*. Count III pleads Wellmark entered into a contract, combination, or conspiracy to unlawfully restrain trade against chiropractors in violation of *section 553.4* of the Iowa Competition Law. Count III seeks money damages. Count IV also seeks money damages, alleging Wellmark "abused [its] monopoly power in the relevant geographic and product markets" to injure plaintiffs in violation of *section 553.5* of the Iowa Competition Law. [3] Count V repleads the statutory insurance violations alleged in Count II, but seeks injunctive relief.

Division I of the first amended petition alleges Wellmark engaged in substantially similar unlawful conduct for each count in ways that

> (a) violate the various provisions of H.F. 2219 (1986 (71 G.A.) ch. 1180)) in their contracts and dealings with chiropractors and chiropractic patients in order to diminish and restrict the care for human ailments by chiropractors for which payment will be made by the Wellmark Defendants;
>
> (b) impose definitions of "chiropractic" and "medical necessity" contrary to *Chapter 151, Code of Iowa* (2007) in order to diminish and restrict the care for human ailments by chiropractors for which payment will be made by the Wellmark Defendants;
>
> (c) usurp the authority of the Iowa General Assembly, to the detriment **[**9]** of Iowa chiropractors and the treatment and therapy offered to their patients, in requiring the use of and promulgating standards and rules of practice for "Chiropractic Assistants," a category of health care practitioner found nowhere in the present Code of Iowa in Chapters 147 through 158 or elsewhere, and in limiting the employment of certain modes of physiotherapy if not applied by chiropractors or "chiropractic assistants;"
> (d) impose maximum fee schedules to which chiropractors must agree with defendants and with each other in order to provide diagnostic and treatment services for their patients in Iowa;
> (e) prescribe fees for chiropractic services which are discriminatory to doctors of chiropractic in relation to the fees for other health care practitioners for the same or similar services;
>
> (f) prescribe limitations upon and make optional the coverage of diagnostic and treatment services of chiropractors while not imposing the same standards and practices to the coverage of diagnostic and treatment services of other practitioners of health care in Iowa licensed under the chapters of *Title IV, subtitle 3, of the Code of Iowa* **[*250]** [Chapters 147 through 158];

---

[3] Wellmark is a purchaser of health services on behalf of its members. *See Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922, 925 (1st Cir. 1984)* ("Blue Shield in essence 'buys' medical services for the account of others . . . ."). Wellmark is thus a "monopsonist," not a monopolist, as plaintiffs plead. See Herbert Hovenkamp, *Federal Antitrust Policy: The Law of Competition and* ***[**8]*** *Its Practice* § 1.2(b), at 14 (4th ed. 2011). "A monopsonist is a monopoly buyer rather than seller." *Id.* "Although most antitrust litigation of market power offenses has involved monopoly sellers rather than buyers, monopsony can impose social costs on society similar to those caused by monopoly." *Id.* The distinction is not relevant for the issues decided in this opinion, but may be relevant under other substantive areas of ***antitrust law***. *See id.* at 14-16.

(g) agree with over 95% of **[**10]** all Iowa Doctors of Medicine (M.D.'s) and Doctors of Osteopathy (D.O.'s) in active practice to numerous items of preferential treatment, discriminatory to plaintiff, as found in Section 7 of a Settlement Agreement dated April 27, 2007, . . . [*See* *Love, No. 03-21296, 2008 U.S. Dist. LEXIS 96604 (S.D. Fla. Apr. 19, 2008)*];

(h) enter into agreements with various subdivisions of the State of Iowa to limit or exclude chiropractic coverage from health plans offered to employees of various subdivisions of the State of Iowa, based upon the encouragement of and false information provided by the Wellmark Defendants.

Wellmark moved to dismiss plaintiffs' class action claims on several grounds. Wellmark asserted plaintiffs' insurance claims were within the exclusive jurisdiction of the Iowa Insurance Commissioner and the insurance provisions plaintiffs relied upon do not create a private cause of action. As to plaintiffs' Iowa Competition Law claims, Wellmark alleged (1) it was immune from liability pursuant to *Iowa Code section 553.6(4)*, which exempts "activities or arrangements expressly approved or regulated" by the state; (2) plaintiffs "failed to adequately plead an antitrust injury and therefore lack standing"; and (3) **[**11]** plaintiffs "failed to adequately plead facts plausibly suggesting the existence of an agreement to restrain trade." Plaintiffs resisted all grounds. [4]

On October 22, 2008, the district court granted Wellmark's motion to dismiss plaintiffs' statutory insurance claims, but not their antitrust claims. As to the statutory insurance claims, the district court found no implied cause of action:

The second, third, and fourth factors of **[**12]** the *Seeman* test establish that there is no implied right of action under these statutes. Thus plaintiffs' request for declaratory ruling based on alleged violations of these statutes, their request for injunctive relief based on these statutes, and any damages claims based thereon must be dismissed, because there is no private right of action and jurisdiction rests exclusively with the Commissioner of Insurance.

The district court determined the antitrust claims needed further record development before a ruling could be made:

At this early stage of the proceedings, the court cannot find, as a matter of law, that the pricing schedules are regulated within the meaning of the statutory exemption. The court has considered the authorities cited by Wellmark, and the different rationales stated therein for finding an exemption to the antitrust laws in cases against insurers. However, many of these cases were decided either at summary judgment, or on a full record made after an evidentiary hearing.

The district court also determined plaintiffs sufficiently pleaded an antitrust injury and conspiracy under Iowa notice pleading standards. The district court ordered the "claims in Division I of the **[**13]** First Amended **[*251]** Petition based on violations of *Iowa Code Sections 514F.2*, *509.3(6)*, *514.7*, *514.23(2)*, and *514B.1(5)* and other statutes enacted in 1986 Iowa Acts Chapter 1180 are Dismissed" and directed plaintiffs to recast their petition to allege only the antitrust claims.

Plaintiffs' second amended petition did not substantially conform to the district court's order, prompting Wellmark to file a second motion to dismiss or strike, which the district court granted in part. Plaintiffs responded with a third amended petition alleging only the antitrust violations in Division I. Wellmark answered and counterclaimed.

On March 16, 2009, Wellmark moved for summary judgment on Division I (the class action claims) of the third amended petition. [5] Wellmark argued: (1) "The factual record . . . shows that the alleged discriminatory actions

---

[4] Wellmark supported its motion with numerous exhibits, including 1986 Iowa Acts ch. 1180 (H.F. 2219), which enacted the insurance provisions relied on by plaintiffs; an affidavit by Wellmark's associate general counsel and assistant board secretary, Michele Druker, attesting Wellmark's preferred provider contracts require insurance commissioner approval; preferred provider agreement prototypes from 2007 and 2001 stamped "Approved" by the insurance commissioner; and the insurance commissioner's administrative regulations governing preferred provider agreements, Iowa Admininstrative Code rule 191—27. The parties stipulated the court should consider these exhibits along with plaintiffs' resistance and supporting exhibits in ruling on Wellmark's motion to dismiss.

[5] On April 6, 2009, shortly after Wellmark's motion for summary judgment, the district court severed Division I (the class action claims) from Division II (Dr. Mueller's individual claim) pursuant to the parties' stipulation. Division II remained under the existing

plead by Plaintiffs as anti-trust claims . . . fall within the exclusive jurisdiction of the Iowa Insurance Commissioner pursuant to *Iowa Code § 553.6(4)*"; and (2) "Several of the allegations contained in Plaintiffs' *Third Amendment* to Petition are contrary to undisputed fact." The motion contained fourteen pages of "undisputed facts" that were supported by **[**14]** 185 pages of affidavits and exhibits, including affidavits by Michele Druker, associate general counsel; Sheryl Nuzum, group leader of network economics; and Linda Blake, group leader for individual and small business underwriting. The affidavits explain that Wellmark submits all provider forms incidental to preferred provider arrangements to the insurance commissioner for approval and that Wellmark bases its provider reimbursement rates on the Resource-Based Relative Value System (RBRVS) and Relative Value Units (RVUs) federally mandated for Medicare. [6] The RVUs assigned by Medicare require different reimbursement rates for spinal manipulation by chiropractors and by M.D.s and D.O.s, recognizing differences in overhead, training, and malpractice risks among those professions. The Nuzum affidavit noted the different reimbursement rates "are common knowledge in the health care business and would be known by the Iowa Insurance Commissioner when she approves Wellmark's preferred provider arrangements with chiropractors." The exhibits in the summary **[*252]** judgment record include Wellmark's 2001 and 2007 prototype practitioner agreements, policy forms and manuals incorporated into the agreements, **[**15]** insurance commissioner notices approving Wellmark's 2001 and 2007 practitioner agreements, and Wellmark's standard form to administer a governmental entity plan.

Plaintiffs resisted all grounds for summary judgment. Plaintiffs denied forty-five of Wellmark's forty-eight paragraphs of undisputed fact. Most denials stated: "Deny. This paragraph contains inadmissible legal conclusions, opinions without adequate foundation, speculation, and argument. It also fails to state how the affiant [Druker or Nuzum] has or could have personal knowledge of the facts asserted. *Iowa R. Civ. P. 1.981(5)*." Plaintiffs **[**17]** supported their resistance with two exhibits containing eighty-nine pages of illustrative Wellmark fee schedules for chiropractors and other medical providers.

Wellmark filed supplementary affidavits to demonstrate its affiants had personal knowledge over the facts asserted. Plaintiffs objected that the supplemental affidavits are hearsay, speculative, and lack adequate foundation. Plaintiffs also filed three additional exhibits, Mueller's 1994 participating provider agreement, a 2007 letter documenting provider form amendments, and a letter from Wellmark's vice president indicating Wellmark will begin using the RVU system in 2009.

The district court held a reported hearing on July 31, 2009. On September 18, the district court entered summary judgment dismissing plaintiffs' remaining antitrust claims. Both plaintiffs and Wellmark filed motions to amend the ruling. The district court granted Wellmark's motion to add additional findings of undisputed fact and statutory analysis and denied plaintiffs' motion.

The district court ruled plaintiffs' alleged anticompetitive conduct was exempt from the Iowa Competition Law, under *section 553.6(4)*. The district court applied the two-prong federal **[**18]** "state action" immunity test, concluding:

---

case number. The district court ordered plaintiffs to file a recasted third amended petition including only Division I, which would be separately docketed. This is an appeal of the separately docketed case.

[6] In 1989, President George H.W. Bush enacted legislation mandating the Center for Medicare and Medicaid Services (CMS), a federal agency within the United States Department of Human Health and Services, to calculate provider reimbursement rates under the RBRVS. Omnibus Budget Reconciliation Act of 1989, Pub. L. No. 101-239, § 6102, 103 Stat. 2106 (1989) (codified as amended at *42 U.S.C. § 1395w-4 (2006)*). Dr. William Hsiao, a professor of medicine at Harvard, oversaw a research team, which published the RBRVS in 1988. Ann Marie Marciarille & J. Bradford DeLong, *Bending* ***[**16]*** *the Health Cost Curve: The Promise and Peril of the Independent Payment Advisory Board*, *22 Health Matrix 75, 106 n.127 (2012)*. The system attempts to determine rates based upon "the time, effort, skill and stress involved in the[] services." *Id.* The Relative Value Scale Updating Committee (RUC), a group of thirty-one private physicians from different specialties, submits recommendations to the CMS concerning revised values. American Medical Association, *The RVS Update Committee*, *http://www.ama-assn.org/ama/pub/physician-resources/solutions-managing-your-practice/coding-billing-insurance/medicare/the-resource-based-relative-value-scale/the-rvs-update-committee.page* (last visited June 12, 2012). CMS then accepts or rejects the RUC's recommendations. *Id.*

> In short, the legislature has expressly regulated the activities of Wellmark vis-à-vis provider contracts with chiropractors (and other medical providers). The first prong of the state action exemption is met in this case as to claims arising under the provider agreements.
>
> Turning to the second prong, the court must consider whether this state policy is actively supervised by the state, with special attention paid to whether decisions are made by state authorities or by the private parties themselves. The Insurance Commissioner has enacted comprehensive rules for insurers' agreements with providers under Chapter 514F, which are contained in Chapter 191 of the Iowa Administrative Code, Section 27. Of significance, the rules require approval of prototype preferred provider agreements. *191 I.A.C. 27.5(3)*. It is undisputed that Wellmark submits its prototype preferred provider agreements with chiropractors to the Insurance Commissioner for approval, and that they have in fact been approved. Many of the allegations in the petition relate to provisions of the provider agreements, or to physical medicine guides that are incorporated into the provider **[**19]** agreements. . . . The court concludes that the provider agreements challenged in this case are actively supervised by a state agency, the Iowa Insurance Commissioner.

With respect to the *Love v. Blue Cross Blue Shield* settlement, the only alleged anticompetitive conduct not approved by the insurance commissioner, the district court granted summary judgment in favor of Wellmark. The district court found the settlement exempt under the *Noerr-Pennington* doctrine and, alternatively, found no genuine issue of material fact as to **[*253]** whether the settlement discriminated against chiropractors. The district court reasoned:

> Under the *Noerr-Pennington* doctrine, settlement agreements approved by a court are immune from antitrust liability, absent a sham. . . . The Love Settlement Agreement, and the court order approving it, appear genuine and valid. Plaintiffs have submitted no countervailing evidence that the settlement is a sham. The court in that case found that the settlement was an arm's length transaction, and that it is reasonable, adequate, and is not the result of collusion between the parties. As such, it is shielded from antitrust liability under *Noerr*.
>
> Secondly, there is no factual basis **[**20]** for an antitrust claim concerning Section 7 of the Love Settlement Agreement. Wellmark's Assistant General Counsel, Michelle Druker, submitted a spreadsheet containing every item contained in Section 7 of the settlement agreement. This sets forth a series of procedural requirements, such as availability of fee schedules, reduced precertification requirements, greater notice of policy and procedure changes, etc. Most of the items are being applied to agreements with chiropractors. Some are not applicable. Plaintiffs submitted no opposing affidavits controverting these facts.

Plaintiffs filed an application for interlocutory appeal, which we granted.

II. Standard of Review.

HN1[] "We review a district court's ruling on a motion to dismiss for the correction of errors at law." *Dier v. Peters, 815 N.W.2d 1, 4 (Iowa 2012)*. A motion to dismiss may be granted when the petition's allegations, taken as true, fail to state a claim upon which relief may be granted. *Geisler v. City Council, 769 N.W.2d 162, 165 (Iowa 2009)* (citing *Iowa R. Civ. P. 1.421(1)(f)*).

HN2[] We review the district court's grant of summary judgment for correction of errors at law. *Emp'rs Mut. Cas. Co. v. Van Haaften, 815 N.W.2d 17, 22 (Iowa 2012)*. **[**21]** "Summary judgment is appropriate if there are no genuine issues of material fact and the moving party is entitled to judgment as a matter of law." *Id.* The evidence is viewed in the light most favorable to the nonmoving party. *Id.* However, "[w]hen a motion for summary judgment is properly supported, the nonmoving party is required to respond with specific facts that show a genuine issue for trial." *Green v. Racing Ass'n of Cent. Iowa, 713 N.W.2d 234, 245 (Iowa 2006)*; *accord* *Iowa R. Civ. P. 1.981(5)*.

III. Whether the District Court Properly Dismissed Plaintiffs' Claims Brought Under the Insurance Statutes for Lack of a Private Cause of Action.

Plaintiffs' first amended petition alleged Wellmark's preferred provider contracts, administration of the Iowa State University health plan, and participation in the *Love* settlement violated *Iowa Code sections 509.3(6)*, [7] *514.7*, [8] *514.23(2)*, [9] *514B.1(5)(c)*, [10] **[*254]** and *514F.2*. [11] ***HN3***[] *Section 514F.2* prevents health insurers from utilizing preferred provider arrangements to limit payments "on a basis solely related" to the provider's license—the nub of plaintiffs' claims. The provisions were enacted together in H.F. 2219 in 1986. *See* 1986 Iowa Acts ch. 1180. **[**22]** Wellmark moved to dismiss these claims, arguing H.F. 2219 does not create a private cause of action.

HN4[] Not all statutory **[**24]** violations give rise to a private cause of action. A private statutory cause of action exists "only when the statute, explicitly or implicitly, provides for such a cause of action." *Sanford v. Manternach, 601 N.W.2d 360, 371 (Iowa 1999)*. Plaintiffs concede H.F. 2219 does not expressly create a private cause of action. The issue is whether those provisions implicitly created a private right to sue. *Marcus v. Young, 538 N.W.2d 285, 289 (Iowa 1995)*.

In our seminal case, ***HN5***[] *Seeman v. Liberty Mutual Insurance Co.*, we adopted a four-factor test to determine whether a statute provides a private cause of action:

1. Is the plaintiff a member of the class for whose benefit the statute was enacted?
2. Is there any indication of legislative intent, explicit or implicit, to either create or deny such a remedy?
3. Would allowing such a cause of action be consistent with the underlying purpose of the legislation?
4. Would the private cause of action intrude into an area over which the federal government or a state administrative agency holds exclusive jurisdiction?

Marcus, 538 N.W.2d at 288 (citing *Seeman, 322 N.W.2d at 38*). The *Seeman* court modified the four-factor federal test articulated in *Cort v. Ash, 422 U.S. 66, 78, 95 S. Ct. 2080, 2088, 45 L. Ed. 2d 26, 36-37 (1975)*. **[**25]** *Seeman, 322 N.W.2d at 40*. "If any one of these factors is not satisfied, there is no implied cause of action." *Kolbe v. State, 625 N.W.2d 721, 727 (Iowa 2001)*; *see also* *Touche Ross & Co. v. Redington, 442 U.S. 560, 575, 99 S. Ct. 2479, 2489, 61 L. Ed. 2d 82, 96 (1979)* ("The central inquiry remains whether Congress intended to create, either expressly or by implication, a private cause of action.").

---

[7] *Iowa Code § 509.3(6)* ("A policy of group health insurance may limit or make optional the payment or reimbursement for lawful diagnostic or treatment service by all licensees under chapters 148 and 151 on any rational basis which *is not solely related to the license* under or the practices authorized by chapter 151 . . . . (Emphasis added.)).

[8] *Iowa Code. § 514.7(3)* ("A group subscriber contract may limit or make optional the payment or reimbursement for lawful diagnostic or treatment service by all licensees under chapters 148 and 151 *on any rational basis which is not solely related to the license* under or the practices authorized by chapter 151 or is not dependent upon a method of classification, categorization, or description based upon differences in terminology used by different licensees in describing human ailments or their diagnosis or treatment." (Emphasis added.)).

[9] *Iowa Code § 514.23(2)* ("A corporation organized and governed by this chapter which becomes a mutual insurer under this section shall continue as a mutual insurer to *be governed by the provisions of section 514.7* and **[**23]** shall also be governed by *section 509.3*, subsection 6." (Emphasis added.)).

[10] *Iowa Code § 514B.1(5)(c)* ("A prepaid group plan of health care services may limit or make optional the payment or reimbursement for lawful diagnostic or treatment service by all licensees under chapters 148 and 151 *on any rational basis which is not solely related to the license* under or the practices authorized by chapter 151 or is not dependent upon a method of classification, categorization, or description based upon differences in terminology used by different licensees in describing human ailments or their diagnosis or treatment." (Emphasis added.)).

[11] *Iowa Code § 514F.2* (permitting provider agreements "provided these systems do not limit or make optional payment or reimbursement for health care services *on a basis solely related to the license* under or the practices authorized by chapter 151 or on a basis that is dependent upon a method of classification, categorization, or description based upon differences in terminology used by different licensees under the chapters of Title IV, subtitle 3, of the Code in describing human ailments or their diagnosis or treatment") (emphasis added)).

Seeman is particularly analogous because it analyzed whether insurance provisions in the same subtitle of the Code as those contained in H.F. 2219 created a **[*255]** private cause of action. 322 N.W.2d at 36. In that case, David Seeman sued Liberty Mutual Insurance Co., claiming the insurance company unreasonably delayed payment on the settlement of his workers' compensation claim. *Id.* Seeman brought his lawsuit under section 507B.4 of the Insurance Trade Practices Act, which prohibits unfair methods of competition and deceptive acts by insurance companies. *Id. at 40*. Although we found individual claimants were within the class of persons the Act was intended to benefit, we declined to find a private cause of action because we determined the legislature intended the Insurance Trade Practices Act to **[**26]** be "regulatory in nature." *Id. at 42*. We reasoned there was no existing remedy prior to the legislation for an insurer's bad-faith failure to settle an insurance claim, and the legislative history stated the " 'purpose of the chapter is to *regulate* trade practices.' " *Id. at 41-42* (quoting *Iowa Code section 507B.1* (emphasis added)). Moreover, the chapter provided the insurance commissioner with specified administrative powers to investigate, adjudicate, remedy, and sanction prohibited acts of unfair practices. *Id. at 42*; *see also* *Stotts v. Eveleth, 688 N.W.2d 803, 808-09 (Iowa 2004)* (holding no private cause of action exists when "*Iowa Code section 272.2* gives the board the exclusive authority to '[e]nforce rules adopted by the board through revocation or suspension of a license, or by other disciplinary action against' a teacher"); *Young, 538 N.W.2d at 289* (relying on the existence of administrative remedies in *Iowa Code chapter 22*, the Open Records Act, to find no private cause of action). Plaintiffs' statutory insurance claims fail here for the same reasons as those under *Seeman*.

The legislature enacted H.F. 2219 to benefit chiropractors as well as consumers. But, in light of *Seeman*, **[**27]** the history of H.F. 2219, and the available administrative remedies, we conclude the remaining factors do not support recognition of a private cause of action. Accordingly, the district court properly dismissed plaintiffs' statutory insurance claims.

Prior to H.F. 2219, chiropractors were excluded from Iowa statutes regulating health insurance coverage. Judge Stuart, a former Iowa Supreme Court Justice, summarized the state of Iowa law on this issue in 1980:

> *Chapter 514 of the Iowa Code* clearly expresses a policy excluding chiropractic services from coverage by health care service corporations. Throughout that chapter, the state legislature repeatedly stated precisely the particular services covered. No mention is ever made of chiropractors, the practice of chiropractic or *Chapter 151 of the Iowa Code* which governs aspects of the practice of chiropractic, including licensing. The Court believes that the omission of any mention of chiropractic coverage in *Chapter 514* directly suggests that the legislature intended to prohibit coverage of their activities by health care service corporations.

Health Care Equalization Comm. of the Iowa Chiropractic Soc'y v. Iowa Med. Soc'y, 501 F. Supp. 970, 989-90 (S.D. Iowa 1980), **[**28]** *aff'd*, *851 F.2d 1020 (8th Cir. 1988)*. The subsequent 1986 amendments expressly sought to "provid[e] for optional payment by corporations subject to *chapters 509*, *514*, and 514B for services performed by chiropractors." 1986 Iowa Acts ch. 1180. Plaintiffs contend this history indicates the legislature intended to provide chiropractors private rights of enforcement. We disagree.

Before H.F. 2219 was enacted, chiropractors had no statutory or common law remedy if health care insurers declined to cover their services. In *Seeman*, we found chapter 507B did not create a private cause of action, in part because, before **[*256]** that chapter's enactment, individuals had no private common law or statutory remedy against insurers for the conduct proscribed by that chapter. *322 N.W.2d at 41-42*. We reasoned that, if the legislature wanted to create a private cause of action when none previously existed, presumably it would have done so expressly. *See id.* The same logic applies here with even greater force. H.F. 2219 was enacted four years after our decision in *Seeman*. We presume the legislature was aware of our holding in *Seeman* refusing to recognize a private cause of action in related insurance provisions. **[**29]** *Welch v. Iowa Dep't of Transp., 801 N.W.2d 590, 600 (Iowa 2011)* (" 'The legislature is presumed to know the state of the law, including case law, at the time it enacts a statute.' " (quoting *State v. Jones, 298 N.W.2d 296, 298 (Iowa 1980)))*. Given that timing, we decline to infer from legislative silence in the 1986 amendments the intent to provide chiropractors or other licensed health care professionals a private right of action for violation of the insurance statutes.

Plaintiffs in this case are suing under insurance statutes regarded under *Seeman* as "essentially regulatory in nature." *322 N.W.2d at 42*. We reach the same conclusion here as in *Seeman*: The legislature "intended only to invest the insurance commissioner with administrative enforcement power . . . . Accordingly, we hold that the legislature implicitly intended the insurance commissioner's powers to be the exclusive means of enforcing" the statute. *Id. at 43*. The legislature provided the insurance commissioner with extensive administrative powers over health insurance practices. ***HN6***[] *Iowa Code section 514F.3* directs the insurance commissioner to "adopt rules for preferred provider contracts and organizations" concerning "but **[**30]** not . . . limited to . . . preferred provider arrangements and participation requirements, health benefit plans, and civil penalties." The legislature explained its reasoning:

> Presently, preferred provider organizations, i.e., arrangements wherein a health benefit plan provides for treatment by select providers, are *unregulated*. This bill would authorize the division of insurance to adopt rules *regulating* those entities, in particular, to adopt the national association of insurance commissioners' model provision.

H.F. 2307, 72d G.A., Reg. Sess. § 604 Explanation (Iowa 1988) (emphasis added). This history confirms the legislature intended H.F. 2219 to be regulatory in nature.

Pursuant to the legislature's authorization, the insurance commissioner has adopted administrative rules regulating preferred provider arrangements and detailing administrative enforcement powers. *See* Iowa Admin. Code r. 191—27 (governing preferred provider arrangements). The insurance commissioner determined civil penalties for violating preferred provider arrangements regulations "shall be imposed in the amount, and pursuant to the procedure, set forth in *Iowa Code sections 507B.6*, *507B.7*, and *507B.8*." *Id.* **[**31]** r. 191—27.7. The operative statutes and rules authorize the insurance commissioner to issue charges, hold hearings, and levy civil penalties up to $50,000 for improper preferred provider arrangements, all subject to judicial review. *See Iowa Code §§ 507B.6-8*. *Seeman* relied on such administrative procedures in holding the Insurance Trade Practices Act did not create an implied private cause of action. *322 N.W.2d at 42* (citing *Iowa Code sections 507B.6*, *507B.7*, *507B.8*, the enforcement powers in the Insurance Trade Practices Act).

Section 514F.3 specifically commands the insurance commissioner to adopt rules and procedures to regulate preferred provider arrangements. Plaintiffs attempt to **[*257]** distinguish *Seeman* by arguing in that case the legislature enacted the administrative remedies, while here the insurance commissioner promulgated the regulations and administrative remedies. This is a distinction without a difference for determining whether an implied private right of action exists. We rejected this distinction in *Eveleth*, which held "*[s]ection 272.2* clearly suggests that this provision was intended to be a regulatory measure designed to provide the board with authority to suspend or **[**32]** revoke a teacher's license in those situations when violations of its provisions occur." *688 N.W.2d at 809*; *see also Rowen v. LeMars Mut. Ins. Co. of Iowa, 230 N.W.2d 905, 909 (Iowa 1975)* ("When the legislature has given an administrative agency jurisdiction to entertain the particular controversy, we have held the jurisdiction is exclusive and must be exhausted before resort to the courts . . . .").

Plaintiffs are not left without a remedy absent an implied cause of action. Plaintiffs may use chapter 17A administrative remedies to enforce H.F. 2219—they must simply turn to the insurance commissioner first. Plaintiffs may petition the commissioner for a declaratory order as to the legality of Wellmark's allegedly discriminatory activities. *See Iowa Code § 17A.9*. Plaintiffs could then seek judicial review of the ruling. *Id.* Wellmark's exhibits show H.F. 2219 has been the subject of at least two administrative proceedings resulting in declaratory rulings.

Plaintiffs under certain circumstances also may initiate "contested case" proceedings under chapter 17A to obtain an evidentiary hearing for their alleged grievances. *Id. § 17A.2(5)* (defining "contested case" as a "proceeding including **[**33]** but not restricted to ratemaking, price fixing, and licensing in which the legal rights, duties or privileges of a party are required by Constitution or statute to be determined by an agency after an opportunity for an evidentiary hearing"); *see, e.g., Lifeline Ambulance, Inc. v. Iowa Ins. Div., 505 N.W.2d 186, 187 (Iowa 1993)* (reviewing insurance commissioner contested-case ruling to uphold an HMO's decision to terminate a group health insurance plan under *section 514B.17*).

Finally, plaintiffs can petition for "other agency action" pursuant to *section 17A.2(2)*, which also is subject to judicial review. *Iowa Code § 17A.19(10)*; *see also* *Travelers Indem. Co. v. Comm'r of Ins., 767 N.W.2d 646, 650 (Iowa 2009)* (insurance commissioner's adjudication of a workers' compensation premium dispute reviewed as "other agency action").

The insurance commissioner oversees a uniform, statewide scheme to regulate preferred provider arrangements and other health insurer activities. [12] The insurance commissioner is permitted to utilize his expertise and specialization to make an administrative record to resolve disputes within his jurisdiction. On judicial **[*258]** review of the commissioner's ruling, the commissioner **[**34]** will be a party and the reviewing court's adjudication will apply statewide to the health insurance industry. We do not believe the legislature intended to create a private cause of action to allow civil juries to second-guess conduct approved by the insurance commissioner and subject to judicial review from administrative proceedings.

We conclude our legislature chose to provide the Iowa Insurance Commissioner with exclusive powers to regulate health insurance practices under these statutes. For these reasons, we hold *Iowa Code sections 509.3(6)*, *514.7*, *514.23(2)*, *514B.1(5)(c)*, and *514F.2*, enacted as part of H.F. 2219, do not create a private cause of action.

IV. Whether the District Court Erred by Applying the State Action Exemption, *Iowa Code Section 553.6(4)*, to Grant Summary Judgment Against Plaintiffs on Their State Antitrust Claims.

Plaintiffs' third amended petition alleges that discriminatory provisions in Wellmark's preferred provider arrangements constitute a conspiracy to restrain trade against chiropractors in violation of *section 553.4* and an abuse of monopoly power in violation of *section 553.5*. Plaintiffs' alleged anticompetitive conduct can be grouped into three categories: (1) procedural requirements and conditions of treatment, (2) fee payment schedules, and **[**36]** (3) administration of state self-funded group plans that typically have identical preferred provider panels.

Wellmark moved for summary judgment, asserting its preferred provider arrangements are exempt from plaintiffs' antitrust claims pursuant to *section 553.6(4)*. ***HN7***[] This section provides that the Iowa Competition Law "shall not be construed to prohibit . . . activities or arrangements expressly approved or regulated by any regulatory body or officer acting under authority of this state." *Iowa Code § 553.6(4)*. The district court granted Wellmark's motion, and we now are called upon to review the correctness of this ruling.

We have applied the so-called "state action" exemption of *section 553.6(4)* in two prior cases. *Nw. Bell Tel. Co. v. Iowa Utils. Bd., 477 N.W.2d 678, 685-86 (Iowa 1991)*; *Neyens v. Roth, 326 N.W.2d 294, 298-99 (Iowa 1982)*. As we noted in those two cases, ***HN8***[] private anticompetitive conduct is exempt from federal antitrust laws if (1) the conduct is undertaken pursuant to a " 'clearly articulated and affirmatively expressed' " state policy and (2) the policy is " 'actively supervised' " by the state itself. *See* *Nw. Bell, 477 N.W.2d at 685* (quoting *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 943, 63 L. Ed. 2d 233, 243 (1980)*); **[**37]** *Neyens, 326 N.W.2d at 298* (same). We also observed in *Neyens* that the Iowa Competition Law has a uniformity clause. *See* *Iowa Code § 553.2* (stating that the Iowa Competition Law "shall be construed to complement and be harmonized with the applied laws of the United States which have the same or similar purpose"); *Neyens, 326 N.W.2d at 298*; *see also* *Comes v. Microsoft Corp., 646 N.W.2d 440, 452 (Iowa 2002)*

---

[12] New legislation, effective July 1, 2012, prohibits health insurers from imposing larger copayments for chiropractic services than for services by medical doctors or osteopaths. 2012 Iowa Legis. Serv. H.F. 2465, § 36 (West 2012) (to be codified at *Iowa Code § 514C.29*) ("[A] policy, contract, or plan providing for third-party payment or prepayment of health or medical expenses shall not impose a copayment or coinsurance amount on an insured for services provided by a doctor of chiropractic licensed pursuant to chapter 151 that is greater than the copayment or coinsurance amount imposed on the insured for services provided by a person engaged in the practice of medicine and surgery or osteopathic medicine and surgery under chapter 148 for the same or a similar diagnosed condition even if a different nomenclature is used to describe the condition for which **[**35]** the services are provided."). Legislation and regulations administered by the Iowa Insurance Division have uniform applicability statewide. By contrast, plaintiffs' allegations in this litigation target the conduct of a single health insurer.

(Cady, J., dissenting) (noting that in *section 553.2*, the legislature provided "a specific rule of construction" for interpreting the Iowa Competition Law); *Nw. Bell, 477 N.W.2d at 686*.

HN9[] "The general rule is that exemptions from coverage of competition laws are to be narrowly applied." *Neyens, 326 N.W.2d at 298*. The state action exemption is an affirmative defense as to which the defendant bears the burden of proof. *See Nw. Bell, 477 N.W.2d at 685* **[*259]** ("The first prong of the state action exemption requires a *showing* . . . .") (Emphasis added.); *see also F.T.C. v. Ticor Title Ins. Co., 504 U.S. 621, 638, 112 S. Ct. 2169, 2179, 119 L. Ed. 2d 410, 425 (1992)* ("[T]he party claiming the immunity must show that state officials have undertaken the necessary steps to determine the specifics of **[**38]** the price-fixing or ratesetting scheme."); *Yeager's Fuel, Inc. v. Penn. Power & Light Co., 22 F.3d 1260, 1266 (3d Cir. 1994)* ("[S]tate action immunity is an affirmative defense as to which [party asserting immunity] bears the burden of proof."); Louis Altman & Malla Pollack, *1 Callmann on Unfair Competition, Trademarks and Monopolies* § 4:4, at 4-62 (4th ed. Supp. 2012) ("State action immunity is an affirmative defense, and the defendant has the burden of establishing its eligibility for that defense."). Whether the state action exemption is established is a question of law for the court. *Trigen Okla. City Energy Corp. v. Okla. Gas & Elec. Co., 244 F.3d 1220, 1225 (10th Cir. 2001)*; *TEC Cogeneration, Inc. v. Fla. Power & Light Co., 76 F.3d 1560, 1567 (11th Cir.)*, *modified*, *86 F.3d 1028 (11th Cir. 1996)*.

Plaintiffs argue that we should apply the state action exemption to this case as it is currently interpreted by the federal courts. *See Ticor Title Ins. Co., 504 U.S. at 634, 638, 112 S. Ct. at 2177, 2179, 119 L. Ed. 2d at 423, 425* (holding that, for the exemption to apply, "the potential for state supervision [must be] realized in fact" and "the State [must] exercise[] sufficient independent **[**39]** judgment and control so that the details of the rates or prices [are] established as a product of deliberate state intervention, not simply by agreement among private parties"). Wellmark counters that we should apply the "plain language" of the Iowa version of the exemption. Both sides argue that they would prevail even under the other side's legal interpretation of the exemption.

We agree with plaintiffs that, even accepting Wellmark's view of the state action exemption, it does not apply here. Different governmental reviews are for different purposes. When a library checks in a book, it is verifying that the book was returned, not approving the contents of the book. When the county grants a marriage license, it is indicating that the couple may be lawfully married, not that they are necessarily a good match. So too here, the present record indicates that, when the insurance division approves Wellmark's preferred provider forms, it is indicating those forms comply with the legal requirements of chapter 514F and its implementing regulations. It is not comparing specific chiropractor rates to physician rates, which are not even actually disclosed in those forms. Although Wellmark uses **[**40]** the RBRVS system created for Medicare to reimburse chiropractors, Wellmark retains discretion to apply a "Wellmark determined adjustment factor" to alter the rates. Wellmark did not disclose this adjustment factor to the insurance commissioner.

It is true that the State of Iowa encourages health insurers to enter into preferred provider arrangements and requires a prototype of any such arrangement to be submitted for prior review by the insurance division. *See Iowa Admin. Code r. 191—27.5(3)*. It is also true that Wellmark submitted its preferred provider forms to the division and that those forms were approved.

[*260] Nonetheless, ***HN10***[] for the "activity or arrangement" to be exempt from the antitrust laws, Wellmark must establish that it was "expressly approved or regulated" by a regulatory body or an officer acting under state authority. *Iowa Code § 553.6(4)*. To put it another way, the alleged anticompetitive practice must be " 'expressed as state policy' " and " 'actively supervised by the state.' " *Nw. Bell, 477 N.W.2d at 685* (citation omitted); *Neyens, 326 N.W.2d at 298-99*; *see also Cal. Retail Liquor Dealers, 445 U.S. at 105, 100 S. Ct. at 943, 63 L. Ed. 2d at 243*; *A.D. Bedell Wholesale Co. v. Philip Morris Inc., 263 F.3d 239, 260 (3d Cir. 2001)* **[**41]** ("It is the conduct that violates the antitrust laws that states must 'actively supervise' in order for *Parker* immunity to attach."). "Rubber stamp approval of private action does not constitute state action." *A.D. Bedell, 263 F.3d at 260*.

Wellmark has not established the insurance division reviews preferred provider agreements in order to regulate the rates paid to different classes of health care providers such as doctors and chiropractors. Rather, it appears the review is designed to assure fair and equitable access to the preferred provider network and to protect nonparticipants in the network. *See, e.g.*, *Iowa Admin. Code rs. 191—27.4* (allowing but limiting incentives for use of preferred providers), 27.5 (listing participation requirements). In short, the purpose of the insurance division's review is to regulate the overall relationship between preferred provider participants and nonparticipants, not to monitor rates paid to or conditions imposed upon different categories of preferred provider panelists. This is consistent with the authority conferred by the underlying statute, which provides:

> ***HN11***[] The commissioner of insurance shall adopt rules for preferred provider contracts and organizations, **[**42]** both those that limit choice of specific provider and those that do not. The rules adopted shall include, but not be limited to, the following subjects: preferred provider arrangements and participation requirements, health benefit plans, and civil penalties.

Iowa Code § 514F.3.

Thus, the initial section of the relevant regulations explains:

> ***HN12***[] The purpose of this chapter is to encourage health care cost containment while preserving quality of care by allowing health care insurers to enter into preferred provider arrangements and by establishing minimum standards for preferred arrangements and the health benefit plans associated with those arrangements.

Iowa Admin. Code r. 191—27.1. As this section reveals, the underlying purpose of the chapter is to set minimum standards, not to regulate rate differentials. The next section of the regulations sets forth a series of definitions. *Id.* r. 191—27.2. The third section then states what a preferred provider arrangement shall contain "at a minimum":

HN13[] A preferred provider arrangement shall at minimum:

> *a.* Establish the amount and manner of payment to the preferred provider. The amount and manner of payment may include capitation payments for preferred **[**43]** providers.
>
> *b.* Include mechanisms which are designed to minimize the cost of the health benefit plan. These mechanisms may include among others:
> (1) The review or control of utilization of health care costs.
> (2) A procedure for determining whether health care services rendered are medically necessary.
>
> **[*261]** c. Ensure reasonable access to covered services available under the preferred provider arrangement.

Id. r. 191—27.3(1). Hence, a preferred provider arrangement must establish an amount and manner of payment, and a procedure for determining medical necessity, and presumably would be rejected by the insurance division if lacked these items. But, there is no indication that the insurance division reviews and approves the actual rates of payment or regulates the specific terms of access to chiropractors as compared with physicians. [13] By way of analogy, our appellate *rule 6.903(2)* requires the appellant to file a brief containing a table of contents, a table of authorities, a statement of the issues, a routing statement, a statement of the case, a statement of the facts, an argument section, and a conclusion. Our clerk's office typically rejects briefs that do not meet these minimum standards, **[**44]** but this does not mean that by filing the brief the clerk approves of the appellant's argument.

The remaining regulations generally are intended to protect nonparticipants and participants who use noncovered services from unfair discrimination. Thus, ***HN14***[] rule 27.3(2) provides, "A preferred provider arrangement shall not unfairly deny health benefits for medically necessary covered services." Rule 27.3(3) provides that the regulations will cover preferred provider arrangements even when not sponsored by licensed insurers. Rule 27.4 enshrines additional nondiscrimination protections:

---

[13] The fee schedules that Wellmark submitted were merely "Illustrative," according to the charts, comparing "Facility" and "Non-Facility" and "PPO/Indemnity" and "HMO."

> *HN15*[] **27.4(1)** A health care insurer may issue a health benefit plan which provides for incentives for covered persons to use the health care services of a preferred provider. The policies or subscriber agreements shall contain at least all of the following provisions:
>
> *a.* A provision that if a covered person receives emergency services specified in the preferred provider arrangement and cannot reasonably reach a preferred provider, emergency services rendered **[**45]** during the course of the emergency will be reimbursed as though the covered person had been treated by a preferred provider, subject to any restriction which may govern payment by a preferred provider for emergency services.
>
> *b.* A provision which clearly identifies the differentials in benefit levels for health care services of preferred providers and benefit levels for health care services of nonpreferred providers.
>
> **27.4(2)** If a health benefit plan provides differences in benefit levels payable to preferred providers compared to other providers, such differences shall not unfairly deny payment for covered services and shall be no greater than necessary to provide a reasonable incentive for covered persons to use the preferred provider.

So does rule 27.5:

> *HN16*[] **27.5(1)** A health care insurer may place reasonable limits on the number or classes of preferred providers which satisfy the standards set forth by the health care insurer, provided that there is no discrimination against providers on the basis of religion, race, color, national origin, age, sex or marital status.
>
> **27.5(2)** Notwithstanding any other provision of this chapter, a health care insurer may issue policies or subscriber agreements **[**46]** which provide benefits for health care services only if the services have been rendered by a preferred provider, provided the program has met all standards imposed by the commissioner **[*262]** for availability and adequacy of covered services.
>
> **27.5(3)** A health care insurer shall file with the commissioner for the commissioner's prior review a prototype of any preferred provider arrangement and of the health care plan's policy, contract, or subscriber agreement associated with the arrangement, together with any changes in the prototype. Use of the prototypical preferred provider arrangement and health care plan's policy, contract, or subscriber agreement is conditioned upon approval of these documents by the commissioner.

HN17[] Rule 27.6 states that "[a] health insurer subject to this chapter shall be subject to and is required to comply with all other applicable laws and rules and regulations of this state." Rule 27.7 indicates that civil penalties for violation of this chapter "shall be imposed in the amount, and pursuant to the procedure, set forth in *Iowa Code sections 507B.6*, *507B.7*, and *507B.8*." Lastly, rule 27.8 contains certain whistleblower-type protections:

> **27.8(1)** A health care insurer shall **[**47]** not prohibit a participating provider from or penalize a participating provider for discussing treatment options with covered persons, irrespective of the health care insurer's position on the treatment options, or from advocating on behalf of covered persons within the utilization review or grievance processes established by the health care insurer or a person contracting with the health care insurer.
>
> **27.8(2)** A health care insurer shall not penalize a provider because the provider, in good faith, reports to state or federal authorities any act or practice by the health care insurer that, in the opinion of the provider, jeopardizes patient health or welfare.

These regulations are not directed to the regulation of rate differentials for particular services. Their purpose, rather, is to insure that health insurers do not abuse their overall relationship with patients and providers through the use of preferred provider plans. Thus, if a clinic decided to sue Wellmark under the Iowa Competition Law alleging that Wellmark had engaged in prohibited *section 553.5* monopolization by excluding it from a preferred provider arrangement, the *section 553.6(4)* state action exemption might well apply. **[**48]** [14] But, it does not appear that

---

[14] This point is illustrated by *Health Care Equalization Committee of the Iowa Chiropractic Society v. Iowa Medical Society, 851 F.2d 1020 (8th Cir. 1988)*. In that case, chiropractors sued Wellmark's predecessor for antitrust violations, challenging its refusal

the legislature has decided generally to remove the setting of reimbursement rates by health insurance companies from the operations of the marketplace or from claims under the Iowa Competition Law.

A United States Supreme Court decision is on point. In *Patrick v. Burget*, an Oregon physician who had lost privileges at a hospital for allegedly anticompetitive reasons brought suit under the antitrust laws. 486 U.S. 94, 96-98, 108 S. Ct. 1658, 1660-61, 100 L. Ed. 2d 83, 89-90 (1988). Oregon, like other states, had a state-mandated **[*263]** and state-regulated peer-review process, which the hospital had followed in attempting to terminate the physician's privileges. *Id. at 97, 101-102, 108 S. Ct. at 1661, 1663-64, 100 L. Ed. 2d at 89-90, 92-93*. Nonetheless, the Supreme Court rejected the state action defense in a unanimous decision because the record showed that the various state agencies did not review the merits of individual peer-review decisions, as opposed to overall peer-review procedures. As the Supreme Court put it, "The Health Division's statutory authority over peer review relates only to a hospital's procedures; that authority does not encompass the actual decisions made by hospital peer-review committees." *Id. at 102, 108 S. Ct. at 1664, 100 L. Ed. 2d at 93*. Here, likewise, the regulatory scheme does not address the fairness of specific **[**50]** rates paid to chiropractors vis-à-vis doctors.

As noted by the parties, Wellmark filed a lengthy submission on Friday, July 27, 2001, which the division stamped "approved" on the very next business day, Monday, July 30. This did not occur because the division's employees took shortcuts in their work. It happened because the scope of review called for by the law and the regulations was limited. Wellmark offered no affidavit or depostion testimony of the insurance commissioner or any employee of the insurance division involved in approving Wellmark's submissions. The insurance division conducted no hearing. There is no evidence in this record the insurance division has ever rejected or required revisions to the reimbursement rates or terms of access in a health insurer's preferred provider arrangement. Nor does the record reflect the insurance division has ever requested additional information concerning rate differentials. We conclude Wellmark failed to establish a regulatory review sufficient to exempt Wellmark under section 553.6(4) from an antitrust lawsuit alleging that it conspired with physicians to underpay chiropractors or impose unfair terms on them.

To a large extent, the affidavits **[**51]** submitted by Wellmark are an effort to defend the merits of its pricing decisions rather than an attempt to show that the state reviews and regulates those prices. For example, the Nuzum affidavit explains for fifteen paragraphs how Wellmark uses the RBRVS system and why it is fair to chiropractors. In the last paragraph, the affiant attempts to tie everything together by stating:

> The total amounts available for provider reimbursement by Wellmark are ultimately determined by state regulations requiring that provider fees be high enough to provide reasonable access for members to each provider type, including chiropractors.

Thus, Wellmark's theory of implicit rate approval asserts that the company has to pay chiropractors enough because if chiropractor fees were too low, chiropractors would not join the preferred provider arrangement, and there would not be "reasonable access to covered services," as required by rule 191—27.3(1). In this indirect way, according to Wellmark, the insurance division regulates rates. We do not believe this satisfies section 553.6(4). Demonstrating that regulations provide, in some indirect way, an incentive for Wellmark to compensate chiropractors adequately **[**52]** is different from demonstrating the insurance commissioner in fact regulated and approved the specific rate differentials at issue here.

Under Wellmark's reasoning, even if all the health insurance companies doing business in Iowa had engaged in a blatant horizontal conspiracy to cap the rates they paid for chiropractic care, no one could seek redress under the antitrust laws because of the state action exemption. Thus, health insurance companies in Iowa would **[*264]** be free to engage in the kind of conduct for which ordinary citizens go to jail. For the foregoing reasons, we reverse the

---

to include chiropractic services in health care service plans. *Health Care Equalization Comm., 851 F.2d at 1022*. The court found the state action exemption available, noting that under state law at that time, "the exclusion of chiropractors from health care service plans was not merely contemplated by the State of Iowa, but compelled." *Id. at 1026*. The Eighth Circuit thus found the state action exemption applied, not because some state regulation existed in the general area, but because the decisions being challenged as anticompetitive were directly covered by regulation. Nowadays state law mandates the inclusion rather than the exclusion of chiropractic services, *see, e.g.*, Iowa Code section 514.7(3), **[**49]** but the conceptual point remains the same.

district court's summary judgment granting Wellmark a blanket exemption under *section 553.6(4)* from charges that it engaged in anticompetitive price-fixing or term-fixing schemes.

V. Whether the District Court Correctly Granted Summary Judgment on Claims Relating to the *Love v. Blue Cross Blue Shield* Settlement.

Plaintiffs' third amended petition alleges Wellmark conspired to restrain trade against chiropractors by entering into an agreement with over ninety-five percent of Iowa medical and osteopathic doctors to "numerous items of preferential treatment, discriminatory to plaintiff, as found in Section 7 of **[**53]** a Settlement Agreement dated April 27, 2007." The *Love v. Blue Cross Blue Shield* settlement resulted from a national class action by all medical and osteopathic doctors against the state Blue Plans, including Wellmark. *See* *Love, No. 03-21296-CIV, 2008 U.S. Dist. LEXIS 96604 (S.D. Fla. Apr. 19, 2008)*. The settlement was not reviewed or approved by the Iowa Insurance Commissioner and thus is not subject to immunity under *section 553.6(4)*. The district court granted summary judgment in favor of Wellmark, finding no genuine issue of material fact as to whether Wellmark discriminated against chiropractors when implementing the *Love* settlement. We agree with the district court's ruling.

The order approving the *Love* settlement agreement states in part:

> E. The Court has held a hearing to consider the fairness, reasonableness, and adequacy of the Settlement, has been advised of all objections to the Settlement and has given fair consideration to such objections.
> F. The Settlement is the product of good faith, arm's length negotiations between the Representative Plaintiffs and the Signatory Medical Societies and their counsel, on one hand, and the Blue Parties and their counsel, on the other hand.
>
> G. The Settlement, as provided **[**54]** for in the Settlement Agreement, is in all respects fair, reasonable, adequate, is not the product of collusion between the Parties, and is otherwise proper and in the best interests of the Class.

Druker's affidavit in support of Wellmark's motion states:

> No term of the Love Settlement Agreement binds Wellmark not to extend to chiropractors the same or similar terms, or to deny chiropractors the benefit of any perceived advantageous changes in business practices, as are provided to M.D.'s and D.O.'s under that agreement.

As the district court accurately described, Druker also

> submitted a spreadsheet containing every item contained in Section 7 of the settlement agreement. This sets forth a series of procedural requirements, such as availability of fee schedules, reduced precertification requirements, greater notice of policy and procedure changes, etc. Most of the items are being applied to agreements with chiropractors. Some are not applicable.

Accordingly, Wellmark's record evidence presents facts demonstrating Wellmark does not provide preferential treatment to medical and osteopathic doctors as a result of the *Love* settlement.

Plaintiffs' resistance fails to set forth facts that show **[**55]** Wellmark has implemented the *Love* settlement in a manner discriminatory to chiropractors. *See* *Green, 713 N.W.2d at 245*. In response to Druker's affidavit, which was incorporated into **[*265]** Wellmark's statement of undisputed facts, plaintiffs stated:

> Denied. This is legal argument In Exhibit 7 the class is defined as "any and all Physicians, Physician Groups and Physician Organizations . . . ." According to the Settlement Agreement, U 1.85, " 'Physician' means an individual duly licensed by a state licensing board as a Medical Doctor or Doctor of Osteopathy and shall include both Participating Physicians and Non-Participating Physicians." The State of Iowa recognizes that a Doctor of Chiropractic is a "Physician." *Iowa Code § 135.1(4) (2007)*: " 'Physician' means a person licensed to practice medicine and surgery, osteopathic medicine and surgery, osteopathy, chiropractic, podiatry or optometry under the laws of this state." Chiropractors were deliberately excluded from the Agreement, Exhibit 7.

Plaintiffs' response merely acknowledges the *Love* settlement did not include chiropractors; it does not controvert Wellmark's record evidence. Plaintiffs offered no affidavit testimony or other evidence **[**56]** to controvert Wellmark's evidence showing it implemented the *Love* settlement in a nondiscriminatory manner.

Accordingly, we conclude the plaintiffs failed to generate a genuine issue of material fact precluding summary judgment on their claims based on the *Love* settlement.

VI. Other Defenses to State Antitrust Claims.

Wellmark raised several other defenses to plaintiffs' Iowa Competition Law claims in the dispositive motions it filed below. Generally, the district court did not reach those defenses, because it disposed of the claims on the grounds already discussed. With three exceptions, we believe those defenses should be addressed further on remand.

First, we believe the district court properly rejected Wellmark's argument that the plaintiffs did not suffer an actionable "antitrust injury." [15] Wellmark takes the position that, because the plaintiffs are suiing as disadvantaged *sellers* rather than disadvantaged *buyers*, they have not suffered an injury "of the type sought to be compensated by antitrust laws." *Southard v. Visa U.S.A., Inc., 734 N.W.2d 192, 199* (Iowa 2007 (citing *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 538, 103 S. Ct. 897, 908-09, 74 L. Ed. 2d 723, 738 (1983))*. **[**57]** The antitrust laws are as concerned about abuse of monopsony power to pay prices below a competitive level as they are about abuse of monopoly power to charge prices above a competitive level. The seller to the monopsony has been harmed as much as the buyer from the monopoly. *See W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 104-05 (3d Cir. 2010)* (holding that a hospital had alleged antitrust injury based on its receipt of artificially depressed reimbursement rates from a dominant insurer and noting that "the defendants' argument reflects a basic misunderstanding of the antitrust laws"); *see also Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 322, 127 S. Ct. 1069, 1076, 166 L. Ed. 2d 911, 920 (2007)* ("The kinship between monopoly and monopsony suggests that similar legal standards should apply to claims of monopolization and claims of monopsonization."). Hence, we reject Wellmark's "antitrust injury" defense.

Second, by contrast, plaintiffs' counsel conceded at oral argument before **[*266]** us that his clients cannot pursue a claim against Wellmark **[**58]** for *unilaterally* deciding to pay chiropractors less. We agree. *See W. Penn Allegheny Health Sys., Inc., 627 F.3d at 103* (concluding that, if the insurer had been "acting alone, [the health care provider] would have little basis for challenging the reimbursement rates[, and a] firm that has substantial power on the buy side of the market (*i.e.*, monopsony power) is generally free to bargain aggressively when negotiating the prices it will pay for goods and services"). Merely paying less (because one is a monoponist) or charging more (because one is a monopolist) does not violate the antitrust laws. There must be some prohibited conspiracy or exclusionary conduct as well. *See Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP., 540 U.S. 398, 407, 124 S. Ct. 872, 879, 157 L. Ed. 2d 823, 836 (2004)* (stating that "[t]he mere possession of monopoly power, and the concomitant charging of monopoly prices, is . . . not unlawful" and "the possession of monopoly power will not be found unlawful unless it is accompanied by an element of an anticompetitive *conduct*"). Accordingly, we affirm the summary judgment in favor of Wellmark on any claim that Wellmark's pricing decisions violated **[**59]** *section 553.5 of the Iowa Code*.

Third, Wellmark urges us to separately uphold the dismissal of certain claims related to treatment conditions contained in the preferred provider agreements. Wellmark contends those claims are "waived" because plaintiffs failed either here or below to rebut Wellmark's evidence demonstrating that the conditions were nondiscriminatory. In its summary judgment order, the district court found Wellmark's facts were undisputed, although it did not specifically grant summary judgment on that basis because it decided that all the antitrust claims were barred by *section 553.6(4)*.

---

[15] Wellmark reurges this argument on appeal as an alternative ground for affirming dismissal of the antitrust claims.

We agree with Wellmark that it is entitled to dismissal of these claims. We therefore affirm the summary judgment as to plaintiffs' allegations that (1) Wellmark "arbitrarily imposed riders on the policies of patients" seeking spinal treatment when the patient had prior chiropractic care, (2) promulgated "standards and rules of practice for 'Chiropractic Assistants,' " and (3) imposed a definition of "chiropractic" to restrict covered chiropractic treatments.

Blake's affidavit in support of Wellmark's motion states:

> With regard to "riders" that limit coverage when a member discloses preexisting **[**60]** joint or bone conditions, whether such an exclusion or policy amendment will be sought is determined by written underwriting guidelines. These guidelines make no distinction between prior conditions that were treated by a chiropractor as opposed to those that were treated by other medical professionals.

Druker's affidavit states:

> Wellmark does not and has not ever implemented standards and rules of practice for "Chiropractic Assistants" or created a limitation that certain modes of physiotherapy must be applied by "Chiropractic Assistants".

Wellmark also showed that its definition "chiropractic" was based on Iowa law.

Plaintiffs' resistance challenged only the admissibility and competency of Wellmark's affidavits. Plaintiffs conceded Wellmark uses the statutory definition of "chiropractic" in its provider forms. Plaintiffs identified no evidence to avoid summary judgment on these claims. We therefore affirm summary judgment here.

Apart from the three areas we have just discussed, we conclude that any other defenses that Wellmark may have to the Iowa Competition Law claims would be better addressed on remand.

[*267] VII. Disposition.

For the reasons stated, we affirm the district court's ruling granting **[**61]** Wellmark's motion to dismiss plaintiffs' statutory insurance claims. We reverse the summary judgment granted to Wellmark that was based upon the state action exemption. We affirm the district court's summary judgment dismissing claims that Wellmark violated *section 553.5* of the Iowa Competition Law with respect to any unilateral payment decisions regarding chiropractors. We also affirm the district court's summary judgment dismissing claims based on the *Love* settlement, medical spine riders, and definitions of "chiropractic assistant" and "chiropractic." We remand the case for further proceedings consistent with this opinion.

AFFIRMED IN PART, REVERSED IN PART, AND REMANDED.

HN1[] **Summary Judgment, Evidentiary Considerations**

Summary judgment is appropriate when there is no genuine dispute as to any material fact such that the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. Review of a grant of summary judgment is plenary. In reviewing a district court's grant of summary judgment, an appellate court evaluates the evidence using the same standard as the district court; that is, by viewing the evidence and making reasonable inferences from the evidence in the light most favorable to the non-moving party. At the summary judgment stage the judge's function is not to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial. However, a court need not turn a blind eye to the weight of the evidence. In order for a dispute to be genuine, the nonmoving party must do more than simply show that there is some metaphysical doubt as to the material facts but must instead come forward with specific facts showing that there is a genuine issue for trial. Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN2[] **Sherman Act, Claims**

There is an added layer of complexity when determining whether summary judgment is appropriate in an antitrust case as motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. Such difficulties are particularly acute in cases where a plaintiff has failed to put forth direct evidence of conspiracy but is instead relying solely on circumstantial evidence. Although reasonable inferences arising from circumstantial evidence must be drawn in favor of the nonmoving party, what constitutes a reasonable inference in the context of an antitrust case is somewhat different from cases in other branches of the law in that ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, case. The acceptable inferences which an appellate court can draw from circumstantial evidence vary with the plausibility of a plaintiff's theory and the danger associated with such inferences. In antitrust cases, conduct consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN3[] **Sherman Act, Claims**

In order for an antitrust plaintiff to succeed in opposing a motion for summary judgment on a *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, claim, the plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Sherman Act, Claims**

Section 1 (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, provides: Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. This provision requires a plaintiff to prove two elements: (1) that the defendants engaged in some form of concerted action, and (2) that such action resulted in a restraint on trade or commerce. The term concerted action encompasses the statutory terms contract, combination, or conspiracy and denotes a unity of purpose or a common design and understanding or a meeting of minds or a conscious commitment to a common scheme. A plaintiff may attempt to demonstrate the existence of concerted action in two ways. First, a plaintiff may present direct evidence of concerted action. Second, the plaintiff could show that the defendants engaged in parallel conduct (such as raising prices simultaneously) and that certain other plus factors exist which render this conduct a violation of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] **Sherman Act, Claims**

Given the relatively lighter burden afforded to a plaintiff putting forth direct evidence of concerted action, the difference between direct and circumstantial evidence in an antitrust case assumes heightened significance. Direct evidence in this context is described as evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted, such as a document or conversation explicitly manifesting the existence of the agreement in question. On the other hand, vague statements such as an admonition to competitors to play by the rules do not constitute direct evidence of a conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN6[] **Sherman Act, Claims**

To make a successful claim under the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, based on conscious parallelism, a plaintiff must show that a defendant's behavior was parallel; that the defendants were conscious of each other's conduct and that this awareness was an element in their decision-making process; and certain plus factors. Plus factors are circumstances under which the inference of rational independent choice is less attractive than that of concerted action.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN7[] **Sherman Act, Claims**

In the context of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, three potential plus factors are: evidence that a defendant had a motive to enter into a price fixing conspiracy; evidence that a defendant acted contrary to its interests; and evidence implying a traditional conspiracy. The first two factors are generally less important as they may indicate simply that the defendants operate in an oligopolistic market, that is, may simply restate the (legally insufficient) fact that market behavior is interdependent and characterized by conscious parallelism. Indeed, when parallel pricing is alleged, these first two factors largely restate the phenomenon of interdependence, and no conspiracy should be inferred from ambiguous evidence or from mere parallelism when a defendant's conduct can be explained by independent business reasons. The third factor encompasses non-economic evidence that there was an actual, manifest agreement not to compete, which may include proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown. This factor is especially important in cases wherein a plaintiff's theory of conspiracy rests on an agreement among oligopolists to fix prices at a supracompetitive level.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] **Sherman Act, Claims**

Once the plaintiffs have presented evidence of a defendant's consciously parallel pricing and supplemented this evidence with plus factors, a rebuttable presumption of conspiracy arises. The mere presence of one or more of these plus factors does not necessarily mandate the conclusion that there was an illegal conspiracy between the parties, for the court may still conclude, based upon the evidence before it, that the defendants acted independently of one another, and not in violation of antitrust laws. Overarching issue in considering an antitrust claim brought under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Antitrust Act, *15 U.S.C.S. §§ 1-7*, is whether evidence of parallel conduct was placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. The relevant analysis thus required the District Court to consider all of the available facts to determine if there was a genuine dispute as to whether any alleged parallel pricing activity was the product of a specific agreement, or whether it was simply the result of the defendants' independent business judgment.

Antitrust & Trade Law > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN9[] **Antitrust & Trade Law**

Twombly aligns the standard for ruling on a motion to dismiss and the standard for summary judgment in an antitrust case insofar as a plaintiff relying on circumstantial evidence of an agreement must make a showing at both stages (with well-pled allegations and evidence of record, respectively) of something more than merely parallel behavior, something plausibly suggestive of (not merely consistent with) agreement.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN10[] **Supporting Materials, Discovery Materials**

An appellate court reviews a district court's denial of a motion for additional discovery under *Fed. R. Civ. P. 56(d)* for abuse of discretion. Appellate courts typically afford trial courts broad discretion to regulate discovery. For this reason, in order to overturn a district court's ruling to limit discovery, an appellate court must generally conclude that there has been an interference with a substantial right, or that the discovery ruling is seen to be a gross abuse of discretion resulting in fundamental unfairness in the trial of the case.

Civil Procedure > ... > Summary Judgment > Supporting Materials > Discovery Materials

HN11[] **Supporting Materials, Discovery Materials**

A district court is obliged to give a party opposing summary judgment an adequate opportunity to obtain discovery. *Fed. R. Civ. P. 56(d)* (formerly *Rule 56(f)*) sets forth the procedure when a party alleges that it does not possess facts necessary to oppose the motion for summary judgment: (d) When Facts Are Unavailable to the Nonmovant. If a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition, the court may: (1) defer considering the motion or deny it; (2) allow time to obtain affidavits or declarations or to take discovery; or (3) issue any other appropriate order. A *Rule 56(d)* motion is the proper recourse of a party faced with a motion for summary judgment who believes that additional discovery is necessary before he can adequately respond to that motion. A properly filed motion must be accompanied by a supporting affidavit detailing what particular information is sought; how, if uncovered, it would preclude summary judgment; and why it has not previously been obtained. However, because a district court has discretion in acting on Rule 56d motions, this list of factors is not exhaustive. Instead, it simply offers a guide for the district court to follow in exercising its discretion under Rule 56d.

Opinion

[*493] CHAGARES, Circuit Judge.

Superior Offshore **[**2]** International ("SOI") appeals the District Court's grant of summary **[*494]** judgment in favor of the defendants on SOI's antitrust claims related to the defendants' alleged price fixing of helicopter services rates for offshore oil and gas industries. The District Court found that SOI had not shown any evidence of an illegal agreement in violation of the Sherman Antitrust Act (the "Sherman Act"), *15 U.S.C. §§ 1-7*, and denied SOI's request to conduct additional discovery under *Federal Rule of Civil Procedure 56(d)*. We will affirm.

I.

We write solely for the parties' benefit and thus set forth only the facts necessary to our disposition. SOI filed its initial complaint on June 12, 2009, alleging that the defendants conspired to fix prices for their respective helicopter services, which provided air transportation to the oil and gas industries operating in the Gulf of Mexico. Such helicopter services are generally purchased for fixed periods of time through charter agreements that specify a set price plus any additional hourly charges. Collectively, the defendants have approximately a 90% market share in their industry.

The original complaint asserted that between January 1, 2001, and December 31, **[**3]** 2005, in the face of softening demand, the defendants conspired to raise prices by 50%. Of particular importance to SOI was the fact that in the first half of 2001, the defendants instituted two "across-the-board" increases totaling 30%. To bolster its claim that these increases were the result of concerted activity, SOI cited the high concentration of the market, the close-knit community in this business sector (wherein employees often moved between companies), the ongoing investigation by the United States Department of Justice's Antitrust Division into these activities,[1] various quotes by company executives touting their increased profits and the importance of maintaining their respective market share, and the following unattributed quotation in a trade magazine: "If we were to say that the helicopter operators all got together and agreed to these increases, that would be illegal; it would be price fixing. Let's just say that everyone more or less agreed to the necessity of a more or less equal rate hike for everyone." Appendix ("App.") 54. Collectively, the District Court found this evidence was insufficient to state an antitrust claim and dismissed the case. *Superior Offshore Int'l, Inc. v. Bristow Grp., Inc., 738 F. Supp. 2d 505, 510 (D. Del. 2010)*.

Following dismissal of the initial complaint, the District Court allowed SOI to amend its complaint to add allegations that a discussion about price fixing occurred between executives at defendants Bristow Group, Inc. ("Bristow") and PHI, Inc. ("PHI"). The amended complaint, filed on December 2, 2010, alleged that a confidential witness later revealed to be Mike Tuttle had overheard Gene Graves, Bristow's vice president of sales, engage in a conversation in 2001 with "a senior sales and marketing executive of PHI, who [Tuttle] believed may have been Jim [Shugart], PHI Sales Manager." App. 117. Tuttle believed the parties to that conversation discussed raising helicopter rates in unison at their respective companies and at a third company, Era Helicopters, LLC ("Era").[2] Specifically, the amended complaint **[*495]** alleges that Graves did the following in the conversation Tuttle overheard:

> (1) Agreed with PHI to implement a major price increase in [o]ffshore [h]elicopter [s]ervices in the Gulf of Mexico;
>
> (2) Confirmed with PHI that Era had also agreed to make a major **[**5]** price increase at or about the same time;
> (3) Represented that Air Logistics' President Jim Clement authorized Graves to enter into the agreement between Air Logistics, PHI, and Era to implement a major price increase in or about the first half of 2001;
>
> (4) Stressed the importance of Air Logistics, PHI, and Era raising prices *in unison* in order to maintain their respective customer bases; and
> (5) Discussed and agreed on the timing of price increase announcements.

Id. (emphasis in original). The amended complaint also contained the same factual allegations as the original complaint.

Because the District Court found that only the newly added allegations allowed the amended complaint to escape dismissal, it permitted discovery related only to these alleged new facts. The Court allowed the parties to depose Tuttle, Shugart, Graves, and Clement, but refused to allow additional document requests by SOI. Id. at 157.[3]

---

[1] On **[**4]** August 4, 2010, the Antitrust Division closed its five-year investigation of potential antitrust violations without taking any action.

[2] Era and related entities Era Aviation, Inc. and Era Group Inc. are wholly owned by defendant SEACOR Holdings.

Ultimately, only Tuttle and Graves were deposed, as it became clear during this period of discovery that Shugart and Clement had not been involved in the conversation that **[**6]** Tuttle heard.

During Tuttle's deposition, he stated that he had overheard a conversation between Graves and an unknown representative from a competitor that he felt "wasn't right," but he could not describe any specifics, including the exact words Graves used. Id. at 204-05. Tuttle indicated that the call had included a discussion of prices and collusive activity to avoid pursuing the other company's customers, and that the conversation worried him because he believed it could create liability for price fixing. He also stated that very shortly after the phone call occurred, all of the defendants raised their rates. However, Tuttle admitted that several details in the amended complaint were incorrect. First, he conceded that Graves could not have been talking to Shugart because Shugart did not work for PHI at the time of **[**7]** the phone call. Tuttle also admitted that Graves could not have mentioned Clement, as alleged in the complaint, because Clement was also no longer employed by PHI. Tuttle further stated that he "couldn't really say that all three" defendants were involved in an agreement to raise prices in unison, although he reiterated his general sense that the "gist" of the conversation he overheard "was price fixing." Id. at 205. In his deposition, Graves denied that such a conversation occurred.

On February 11, 2011, the defendants filed a motion for summary judgment, which SOI opposed with a request for full discovery pursuant to *Federal Rule of Civil Procedure 56(d)*. In his affidavit, SOI's counsel sought production of documents in the following nine categories:

a. Transactional data reflecting prices charged by Defendants for offshore helicopter services, and Defendants' costs;

b. Information, including but not limited to, calendars, day-timers, telephone records, and correspondence, about any meeting, discussion or other communication **[*496]** between and among Defendants concerning the provision of those services;

c. Price sheets, price announcements, and price change letters generated by any Defendant **[**8]** concerning the provision of those services;
d. Information about Defendants' organizational structures;
e. Documents provided to or received from any government agency or representative, including, but not limited to, the Federal Bureau of Investigation, the United States Department of Justice, any law enforcement agency of any state, or any grand jury regarding any investigation into a possible violation of the antitrust laws;
f. Defendants' financial statements relating to offshore helicopter services;
g. Information about Defendants' membership and involvement in the activities of trade associations relating to offshore helicopter services;
h. Documents relating to any internal investigation conducted by any Defendant of actual or potential violations of law or company policy with respect to offshore helicopter services; and
i. Information relating to Defendants' pricing, marketing and sales strategy.

Id. at 336.

The District Court declined to allow additional discovery and granted summary judgment in favor of the defendants, finding that SOI had not offered any evidence to show there was a "contract, combination . . . , or conspiracy" to fix prices. *15 U.S.C. § 1*. The District Court found **[**9]** summary judgment was appropriate despite the lack of full discovery because the only evidence of collusion mentioned in the amended complaint was Tuttle's overheard conversation, and Tuttle's deposition revealed he remembered very little about the nature of that conversation.

SOI now appeals the denial of its *Rule 56(d)* motion and the District Court's grant of summary judgment in favor of the defendants.

II.[4]

---

[3] Following SOI's letter request for additional discovery, and the defendants' opposition thereto, the Court issued an Order on December 30, 2010, stating that "[t]he scope of all permitted depositions shall be strictly limited to the allegations set forth in Plaintiff's Amended Complaint ¶¶ 30-32" and that "[d]ocument discovery at this time is not warranted." App. 157.

HN1[] Summary judgment is appropriate when "there is no genuine dispute as to any material fact" such that "the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. Our review of a grant of summary judgment is plenary. *Goodman v. Mead Johnson & Co., 534 F.2d 566, 573 (3d Cir. 1976)*. In reviewing a District Court's grant of summary judgment, we evaluate the evidence using the same standard as the District Court; that is, by viewing the evidence and making reasonable inferences from the evidence in the light most favorable to the non-moving party. *Big Apple BMW, Inc. v. BMW of N. Am., Inc., 974 F.2d 1358, 1363 (3d Cir. 1992)*; *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1230 (3d Cir. 1993)*. **[**10]** "[A]t the summary judgment stage the judge's function is not . . . to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. However, a court need not "turn a blind eye to the weight of the evidence." *BMW, 974 F.2d at 1363*. In order for a dispute to be "genuine," the nonmoving party "must do more than simply show that there is some metaphysical doubt as to the material facts" but must instead "come forward with specific facts showing that there is a *genuine issue for* ***[*497]*** *trial*." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (quotation marks omitted) (emphasis in original). "Where the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Id. at 587* (quotation marks omitted).

HN2[] There is an added layer of complexity when determining whether summary judgment is appropriate in an antitrust case because "motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot." Id. Such difficulties **[**11]** are particularly acute in cases where, as here, the plaintiff has failed to put forth direct evidence of conspiracy but is instead relying solely on circumstantial evidence. This is so because although "reasonable inferences" arising from circumstantial evidence must be drawn in favor of the nonmoving party, "what constitutes a reasonable inference in the context of an antitrust case . . . is somewhat different from cases in other branches of the law in that '***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case.'" *In re Baby Food Antitrust Litig., 166 F.3d 112, 124 (3d Cir. 1999)* (hereinafter "Baby Food") (quoting *Matsushita, 475 U.S. at 588*). "The acceptable inferences which we can draw from circumstantial evidence vary with the plausibility of the plaintiffs' theory and the danger associated with such inferences." Id. The Supreme Court has held that in antitrust cases, "conduct consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy." *Matsushita, 475 U.S. at 588*. Thus, **HN3**[] in order for an antitrust plaintiff to succeed in opposing a motion for summary judgment on **[**12]** a Section 1 claim, the plaintiff "must present evidence that tends to exclude the possibility that the alleged conspirators acted independently." Id.

III.

SOI brought this putative class action under**HN4**[] *§ 1 of the Sherman Act*, which provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. We have held that this provision requires a plaintiff to prove two elements: (1) that the defendants engaged in some form of "concerted action," and (2) that such action resulted in a restraint on trade or commerce. *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 315 (3d Cir. 2010)* (hereinafter "Brokerage").

The term "concerted action" encompasses the statutory terms "contract, combination[,] or conspiracy" and denotes "a unity of purpose or a common design and understanding or a meeting of minds or a conscious commitment to a common scheme." *Id. at 314-15* (quotation marks and punctuation omitted). A plaintiff may attempt to demonstrate the existence of concerted action in two ways. First, a plaintiff may present direct evidence of concerted **[**13]** action. *Id. at 323*. Second, the plaintiff could show that the defendants engaged in parallel conduct (such as raising prices simultaneously) and that certain other "plus factors" exist which render this conduct a violation of the Sherman Act. Id.

---

[4] The District Court had jurisdiction pursuant to *28 U.S.C. § 1331*. We have jurisdiction pursuant to *28 U.S.C. § 1291*.

HN5[] Given the relatively lighter burden afforded to a plaintiff putting forth direct evidence of concerted action, the difference between direct and circumstantial evidence in an antitrust case assumes heightened significance. We have described direct evidence in this context as "evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted," Baby Food, 166 F.3d at 118, **[*498]** such as "a document or conversation explicitly manifesting the existence of the agreement in question." Brokerage, 618 F.3d at 324 n.23. On the other hand, we have held that vague statements such as an admonition to competitors to "play by the rules" do not constitute direct evidence of a conspiracy. See InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 156 n.5 (3d Cir. 2003) (holding that "cases require that direct evidence of an illegal agreement be established with much greater clarity" than the ambiguous statements made between **[**14]** bond traders in that case); see also Baby Food, 166 F.3d at 120-21 (rejecting the plaintiffs' contention that they had adduced direct evidence of a conspiracy when they provided statements from employees that they had exchanged pricing information with their peers and superiors, documentary evidence that the defendants knew of their competitors' impending price increases, and an internal memorandum referring to a "truce" between the defendants).

SOI's assertion that Tuttle's testimony constitutes direct evidence of concerted action is unpersuasive. As the District Court explained, Tuttle's deposition testimony reflects that he does not recall the exact words that Graves used during the alleged illicit conversation, but that he simply got a general sense that there was something wrong about the conversation. This vague description of the conversation suggests that Tuttle was drawing his own inferences from the words used by Graves. The District Court properly concluded that it could not accept Tuttle's subjective impression as a conclusive fact. Tuttle's testimony thus is not direct evidence of a conspiracy.

Because this case involves only circumstantial evidence, we must decide whether **[**15]** the District Court correctly determined that SOI did not adduce sufficient evidence of parallel conduct – so-called "conscious parallelism" – and other "plus factors" to survive summary judgment.HN6[] To make a successful claim under the Sherman Act based on conscious parallelism, "a plaintiff must show (1) that the defendants' behavior was parallel; (2) that the defendants were conscious of each other's conduct and that this awareness was an element in their decision-making process; and (3) certain 'plus' factors." In re Flat Glass Antitrust Litig., 385 F.3d 350, 360 n.11 (3d Cir. 2004) (hereinafter, "Flat Glass"). "Plus factors" are "circumstances under which . . . the inference of rational independent choice [is] less attractive than that of concerted action." Lum v. Bank of Am., 361 F.3d 217, 230 (3d Cir. 2004). We have identified HN7[] three potential "plus factors": "(1) evidence that the defendant had a motive to enter into a price fixing conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy." Brokerage, 618 F.3d at 322 (quotation marks omitted). The first two factors are generally less important because they "may **[**16]** indicate simply that the defendants operate in an oligopolistic market, that is, may simply restate the (legally insufficient) fact that market behavior is interdependent and characterized by conscious parallelism." Id. Indeed, when parallel pricing is alleged, these first two factors "largely restate the phenomenon of interdependence," Flat Glass, 385 F.3d at 360, and thus we have held that "no conspiracy should be inferred from ambiguous evidence or from mere parallelism when defendants' conduct can be explained by independent business reasons." Baby Food, 166 F.3d at 122; see also Brokerage, 618 F.3d at 326 (explaining that "a claim of conspiracy predicated on parallel conduct" is insufficient when "'common economic experience,' or the facts alleged in the complaint itself, show that independent self-interest is an 'obvious alternative explanation' **[*499]** for [the] defendants' common behavior" (quoting Bell Atl. Corp. v. Twombly, 550 U.S. 544, 565, 567, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))). The third factor, on the other hand, encompasses "non-economic evidence that there was an actual, manifest agreement not to compete, which may include proof that the defendants got together and exchanged assurances of common action **[**17]** or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown." Flat Glass, 385 F.3d at 360 (quotation marks and citation omitted). This factor is especially important in cases like this one wherein the plaintiff's theory of conspiracy rests on "an agreement among oligopolists to fix prices at a supracompetitive level." Id. at 358.

Our inquiry does not end with the identification of "plus factors." As we explained in Baby Food,

> HN8[] Once the plaintiffs have presented evidence of the defendants' consciously parallel pricing and supplemented this evidence with plus factors, a rebuttable presumption of conspiracy arises. The mere presence of one or more of these 'plus factors' does not necessarily mandate the conclusion that there was an

> illegal conspiracy between the parties, for the court may still conclude, based upon the evidence before it, that the defendants acted independently of one another, and not in violation of antitrust laws.

166 F.3d at 122. The Supreme Court has held that the overarching issue in considering an antitrust claim brought under § 1 of the Sherman Act is whether evidence of parallel conduct was "placed in a context that **[**18]** raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." Twombly, 550 U.S. at 557.[5] The relevant analysis thus required the District Court to consider all of the available facts to determine if there was a genuine dispute as to whether any alleged parallel pricing activity was the product of a specific agreement, or whether it was simply the result of the defendants' independent business judgment.

SOI contends that, even if it does not have direct evidence of a conspiracy, this case should have survived summary judgment because they alleged sufficient "plus **[**19]** factors"[6] to create an inference of impermissible concerted activity. As noted above, the first two "plus factors," motive and action contrary to self-interest, are not especially helpful in price-fixing cases where, as here, there are parallel price increases by competitors in a concentrated market. The three defendants all had a motive to conspire to fix prices, particularly if SOI is correct that demand was lessening for their services, given that joint action would allow them to maintain inflated prices while their customers had no other comparable options in light of the defendants' collective 90% market share. Similarly, although it is against each company's self-interest not to compete, concerted activity would be in their self-interest for the same profit-enhancing reason. The parallel price increases here could just **[*500]** as easily be the result of each company independently analyzing the market and realizing that they needed to charge more in order to make a profit, given that external circumstances indicated that they would be providing fewer services to their customers in the future. Alternatively, given the concentration of the helicopter-services market at issue here, such **[**20]** price increases could have just as easily been the result of "price leadership" as of price fixing. See Flat Glass, 385 F.3d at 359 This obvious business reasons for the defendants' actions casts serious doubt on whether wrongful concerted activity was the real cause of the price increases.

This case thus hinges on whether SOI has produced any evidence suggesting "an actual, manifest agreement not to compete." Id. at 360 (quotation marks omitted). There are two pieces of evidence that could arguably fit here. First, Tuttle's testimony regarding Graves' conversation with a competitor would be evidence of an agreement, although the District Court found Tuttle's deposition testimony so vague that it was essentially worthless. The second piece of evidence suggesting an agreement is the unnamed helicopter operator's remark that despite the fact that universal agreement to the increased rates "would be illegal . . . price-fixing," "everyone more or less agreed to the necessity of a more or less equal rate hike for everyone." In its earlier opinion dismissing the first complaint, **[**21]** the District Court stated that "the relevance of the operator's statement as circumstantial evidence of an agreement is dubious" because

> his statement is ambiguous as to whether he comments on the industry's lawful but interdependent pricing decisions; casual observations about the general convergence of prices among un-named market participants at that time; or perhaps an illegal agreement by un-named actors at some unspecified point in time.

Superior Offshore Int'l, 738 F. Supp. 2d at 513.

We agree with the District Court's thoughtful analysis. These two pieces of evidence are both so vague that they cannot suggest a circumstance in which an "inference of rational independent choice [is] less attractive than that of

---

[5] Although Twombly was decided at the motion to dismiss stage, we recently explained that HN9[] Twombly "aligns" the standard for ruling on a motion to dismiss and the standard for summary judgment in an antitrust case insofar as "[p]laintiffs relying on circumstantial evidence of an agreement must make a showing at both stages (with well-pled allegations and evidence of record, respectively) of something more than merely parallel behavior, something plausibly suggestive of (not merely consistent with) agreement." Brokerage, 618 F.3d at 322 (punctuation and citations omitted).

[6] The defendants do not contest that they exhibited parallel behavior by raising prices in a nearly simultaneous fashion.

concerted action." Lum, 361 F.3d at 230. Quite simply, there is insufficient evidence to create a triable issue of fact regarding whether the defendants conspired to fix prices.[7]

IV.

In an attempt to survive summary judgment despite its **[**22]** failure to produce sufficient evidence of concerted activity, SOI argues that it was entitled to the additional discovery it requested pursuant to Federal Rule of Civil Procedure 56(d). **HN10**[] We review a district court's denial of a motion for additional discovery under Rule 56(d) for abuse of discretion. Doe v. Abington Friends Sch., 480 F.3d 252, 256 (3d Cir. 2007); Renchenski v. Williams, 622 F.3d 315, 339 (3d Cir. 2010).

We typically afford trial courts broad discretion to regulate discovery. See Pub. Loan Co., Inc. v. Fed. Deposit Ins. Corp., 803 F.2d 82, 86 (3d Cir. 1986). For this reason, in order to overturn a district court's ruling to limit discovery, we must generally "conclude that there has been an interference with a 'substantial right,' . . . or that the discovery ruling is 'seen to be a gross abuse of discretion resulting in fundamental unfairness in the trial of the **[*501]** case.'" Id. (quoting Marroquin-Manriquez v. I.N.S., 699 F.2d 129, 134 (3d Cir. 1983)).

HN11[] A District Court is "obliged to give a party opposing summary judgment an adequate opportunity to obtain discovery." Dowling v. City of Philadelphia, 855 F.2d 136, 139 (3d Cir.1988) (citing Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)). **[**23]** Rule 56(d) (formerly Rule 56(f)) sets forth the procedure when a party alleges that it does not possess facts necessary to oppose the motion for summary judgment:

> (d) When Facts Are Unavailable to the Nonmovant. If a nonmovant shows by affidavit or declaration that, for specified reasons, it cannot present facts essential to justify its opposition, the court may:
> (1) defer considering the motion or deny it;
> (2) allow time to obtain affidavits or declarations or to take discovery; or
> (3) issue any other appropriate order.

A Rule 56(d) motion is "the proper recourse of a party faced with a motion for summary judgment who believes that additional discovery is necessary before he can adequately respond to that motion." Murphy v. Millennium Radio Grp. LLC, 650 F.3d 295, 309 (3d Cir. 2011).

A properly filed motion must be accompanied by "a supporting affidavit detailing 'what particular information is sought; how, if uncovered, it would preclude summary judgment; and why it has not previously been obtained.'" Abington, 480 F.3d at 257 n.3 (3d Cir. 2007) (quoting Dowling, 855 F.2d at 140). "However, because '[a] district court has discretion in acting on Rule 56[d] motions,' this list of factors **[**24]** is not exhaustive. Instead, it 'simply offer[s] a guide for the district court to follow in exercising its discretion under Rule 56[d].'" Horvath v. Keystone Health Plan E., Inc., 333 F.3d 450, 458 (3d Cir. 2003) (quotation marks and citations omitted).

Here, SOI's counsel filed an affidavit with his Rule 56(d) motion identifying nine types of discovery that SOI needed to respond adequately to the defendants' summary judgment motion. This discovery, the affidavit asserted, "will lead to more information about communications among the Defendants that can be used to prove that Defendants conspired to raise prices for offshore helicopter services in the Gulf of Mexico starting in 2001." App. 335. In denying this request, the District Court stated that SOI had improperly cast a wide "discovery net" because "the foundation for the requests in purely speculative. No facts have been presented that suggest further discovery would remedy Tuttle's conjecture and speculation." Id. at 22.

---

[7] Because we hold that SOI did not present sufficient evidence of concerted action, we need not address whether the defendants' conduct "imposed an unreasonable restraint on trade." Brokerage, 618 F.3d at 315 (quotations and citations omitted).

We do not believe the District Court abused its discretion in denying SOI's Rule 56(d) motion. At the outset, it is worth noting that the District Court was well within the bounds of its considerable discretion **[**25]** when it elected to limit discovery to the allegations added to the amended complaint. Having already – correctly – determined that the initial complaint was subject to dismissal absent the new allegations, the District Court afforded SOI an opportunity to demonstrate the truth of the allegations made in the amended complaint. SOI failed to do so. As noted above, Tuttle's vague deposition testimony makes clear that the information included in the amended complaint did not accurately reflect what Tuttle observed. Tuttle could not recall crucial details, including the identity of the person who supposedly conspired with Graves to fix prices. SOI then attempted to ameliorate this deficiency by requesting a plethora of discovery, both in a letter request and again in its Rule 56(d) motion. As the District Court noted, the majority of the **[*502]** discovery sought by SOI "pertain[s] to proof of the alleged parallel pricing conduct [and] industry practices" and would thus be of little relevance to demonstrating the existence of any "plus factors." Id. at 20. It was thus proper to conclude that SOI's affidavit failed to demonstrate how additional discovery would preclude summary judgment.

Moreover, **[**26]** SOI failed to exercise diligence in the discovery process since the inception of this litigation. As the District Court correctly noted, SOI could have sought discovery during the 15-month period after SOI's initial complaint was filed and before the District Court ruled on the defendants' motion to dismiss. Counsel for SOI gave no reason for his failure to seek discovery. Thus, for no discernable reason, SOI squandered its opportunity to take discovery during the significant period of time between the filing of the first motion to dismiss and the District Court's ruling on that motion. Accordingly, we conclude that the District Court did not abuse its discretion in denying SOI's Rule 56(d) motion.

V.

For the foregoing reasons, we will affirm the District Court's grant of summary judgment in favor of the defendants.

Judges: Esther Salas, United States District Judge.

Opinion by: Esther Salas

Opinion

SALAS, DISTRICT JUDGE

This matter is before the Court by way of Bankrate Inc.'s ("Bankrate") Motion to Dismiss BanxCorp's Fifth Amended Complaint ("5AC") pursuant to Fed. R. Civ. P. 12(b)(6). (Defendant Bankrate Inc.'s Brief in Support of its Motion to Dismiss Portions of the Fifth Amended Complaint with Prejudice ("Def. Mov. Br.") at 1, D.E. 306). This Court has jurisdiction pursuant to *28 U.S.C. §§ 1331* and *1337(a)*, as well as *15 U.S.C. §§ 1* and *2*. Venue is proper pursuant to *28 U.S.C. §§ 1391(b)*, *(b)(2)*, as well as *15 U.S.C. §§ 15* and *22*. The Court's decision is based on **[*2]** its review of the briefs and exhibits related to Bankrate's Motion to Dismiss, and the Court hereby decides the Motion without oral argument pursuant to *Fed. R. Civ. P. 78*. For the following reasons, Defendant's Motion to Dismiss is GRANTED in part and DENIED in part.

I. BACKGROUND

A. Parties, Facts, and Procedural History

The underlying issue in this case is whether Defendant Bankrate has engaged in anticompetitive practices in violation of federal and state antitrust laws, resulting in economic injury to Plaintiff BanxCorp. The parties, facts, and procedural history of this case are presented in the Court's December 30, 2011 Opinion dismissing part of the Fourth Amended Complaint ("4AC") and are not rehashed in this Opinion. (*See* "December 30, 2011 Opinion", D.E. 298). However, the Court adds to its detailed account of the history of this case that on December 30, 2011, the Court dismissed the First Claim of the 4AC—alleging the existence of a predatory price-fixing conspiracy between Bankrate and its competitors—because Plaintiff failed "to adequately plead that the purported conspirators agreed to join a predatory price-fixing conspiracy for the purpose of forcing prices below a measure **[*3]** of cost." (*Id.* at 21).

B. Arguments

Bankrate moves to dismiss BanxCorp's First, Second, Third, and Fifth Claims (except as these claims concern Lending Tree). (Def. Mov. Br. at 1).

Bankrate argues that BanxCorp's Sherman Antitrust Act § 1 claim should be dismissed because BanxCorp did not avail itself of its right to amend its predatory price-fixing conspiracy claim in the 4AC to cure the deficiencies identified by the Court in its prior Opinion. Instead, Plaintiff has withdrawn its allegations that Bankrate and its partners conspired to price below cost and replaced those allegations with a new theory that Bankrate and its competitors conspired to divide markets and allocate customers. Bankrate argues that plaintiff has failed to cure the previous deficiencies and therefore the § 1 claim must be dismissed with prejudice. (*Id.* at 6).

Bankrate also argues that the market division and customer allocation theories in BanxCorp's 5AC are new and therefore barred by this Court's December 30, 2011 opinion and Judge Wigenton's September 14, 2009 Opinion. (*Id.* at 7; *see* D.E. 298; D.E. 75).

Next, Bankrate argues that the *§ 1* market division and customer allocation theory claim should be dismissed **[*4]** because, first, the 5AC "lacks any factual allegations 'plausibly suggesting a unity of purpose, a common design and understanding, or a meeting of the minds among Bankrate's partner-competitors to engage in' market division and customer allocation." (Def. Mov. Br. at 8) (citation omitted). Specifically, there is nothing in the contracts Plaintiff refers to that indicates that Bankrate's co-branding partners were prevented from competing in the same market as Bankrate. (*Id.* at 11). Second, Plaintiff does not have standing to bring this claim because "a competitor cannot suffer an antitrust injury where the conspiracy is alleged to have caused prices to increase above competitive levels." (*Id.* at 12).

As to the Sherman Antitrust Act *§ 2* claim, Bankrate argues that the Court must dismiss this claim because Plaintiff has failed to allege that Bankrate engaged in the exclusionary conduct that *§ 2* requires. In the 5AC, BanxCorp simply replaced instances of "average variable cost"—a phrase that it had been using since the beginning of this litigation—with "artificially low prices." (*Id.* at 15). Bankrate makes two separate arguments on this point. First, the latter phrase is of "no legal **[*5]** significance." (*Id.* at 16). Second, to the extent that the phrase means "above-cost prices that are below general market levels," courts have rejected the notion that such pricing inflicts the type of injury cognizable under the antitrust laws. (*Id.*) (citation omitted). To the extent that the phrase includes pricing below average variable cost, as Plaintiff suggests, the phrasing appears calculated to confuse jurors. (*Id.* at 16-18). Moreover, the predatory pricing claim is insufficiently pleaded, supported only with conclusory statements and no evidence of actual predatory prices. (*Id.* at 17-18). And because the theory fails, and Plaintiff does not allege any other type of exclusionary conduct, Plaintiff's *§ 2* claim lacks an essential ingredient—exclusionary conduct—and must likewise fail. (*Id.* at 19-20).

Finally, Bankrate argues that Plaintiff's claims under New Jersey's Antitrust Act must fail because that Act mirrors the Sherman Act, and therefore the claims fail for the same reasons. (*Id.* at 20-21).

In its opposition brief, Plaintiff acknowledges that it has completely abandoned its *§ 1* predatory pricing theory. (Plaintiff's Brief in Opposition to Defendant's Motion to Dismiss Portions **[*6]** of the Fifth Amended Complaint, ("Pl. Opp. Br."), at 1, D.E. 307). Plaintiff then argues that it has adequately pleaded its *§ 1* price-fixing and market allocation claims, which were "previously pleaded and allowed to proceed by this Court." (Pl. Opp. Br. at 10). Specifically, under this Court's decisions in this case, BanxCorp does have standing to sue as Bankrate's competitor. (*Id.* at 6-8). Further, BanxCorp argues that its *§ 1* price-fixing and market allocation conspiracies are sufficiently pleaded under the per se rule and the rule of reason. (*Id.* at 12-17). More than the mode of analysis, what is important here is that the Court recognizes that the challenged restraint impaired competition. (*Id.* at 24). Finally, BanxCorp argues that it has sufficiently pleaded the predatory and exclusionary conduct claims under *§ 2*. (*Id.* at 33).

II. LEGAL STANDARD

On a motion to dismiss under *Rule 12(b)(6)*, "courts are required to accept all well-pleaded allegations in the complaint as true and draw all reasonable inferences in favor of the non-moving party." *Phillips v. Cnty. of Allegheny, 515 F.3d 224, 231 (3d Cir. 2008)*; *Burrell v. DFS Servs., LLC, 753 F. Supp. 2d 438, 440 n.1 (D.N.J. Dec. 6, 2010)* **[*7]** (holding that contradictory factual assertions on the part of defendants must be ignored). Courts must "determine whether, under any reasonable reading of the complaint, the Plaintiff may be entitled to relief." *Pinker v. Roche Holdings, Ltd., 292 F.3d 361, 374 n.7 (3d Cir. 2002)*. But, a complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. Determining whether the allegations in a complaint are "plausible" is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679* (citations omitted). "Courts are not required to credit bald assertions or legal conclusions draped in the guise of factual allegations." *McCargo v. Hall, No. 11-553, 2011 U.S. Dist. LEXIS 146449, 2011 WL 6725613, at *1 (D.N.J. Dec. 20, 2011)* (citing *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1429 (3d Cir. 1997))*. Although antitrust complaints are to be liberally construed, they are not exempt from the federal rules. *See* *Pennsylvania ex rel. Zimmerman v. PepsiCo, Inc., 836 F.2d 173, 179 (3d Cir. 1988)* **[*8]** (citations omitted). A pleading that offers "labels and conclusions" or a "formulaic recitation of the elements of a cause of action will not do." *Iqbal, 556 U.S. at 678* (citations omitted). Additionally, in evaluating a plaintiff's claims, generally "a court looks only to the facts alleged in the complaint and its attachments without reference to other parts of the record." *Jordan v. Fox, Rothschild, O'Brien & Frankel, 20 F.3d 1250, 1261 (3d Cir. 1994)*.

In *Twombly*, the Supreme Court set forth the "plausibility" standard for overcoming a motion to dismiss. *See* *Twombly, 550 U.S. at 556-7*. It refined this approach in *Iqbal.* A complaint satisfies the plausibility standard when the factual pleadings "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*). This standard requires showing "more than a sheer possibility that a defendant has acted unlawfully." *Id.* A complaint that pleads facts "'merely consistent with a defendant's liability, stops short of the line between possibility and plausibility of entitlement of relief.'" *Id.* (quoting *Twombly, 550 U.S. at 557*).

To determine the **[*9]** sufficiency of a complaint under *Twombly* and *Iqbal*, the Court must take the following three steps:

> First, the court must "tak[e] note of the elements a plaintiff must plead to state a claim." Second, the court should identify allegations that, "because they are no more than conclusions, are not entitled to the assumption of truth." Finally, "where there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement for relief."

Burtch v. Milberg Factors, Inc., 662 F.3d 212, 221 (3d Cir. 2011) (citations omitted).

The Court now proceeds with its analysis claim-by-claim, element-by-element under the three-step method set forth by the Third Circuit, granting the motion to dismiss as to the First Claim based on Plaintiff's failure to plausibly allege the "object" of the conspiracy, and denying the motion to dismiss as to the Second, Third, and Fifth claims for relief.

III. DISCUSSION

A. Threshold/Preliminary Matters

As a preliminary matter, Bankrate argues that BanxCorp has abandoned its *§ 1* predatory price-fixing conspiracy theory, in direct contravention of (1) this Court's December 30, 2011 warning that Plaintiff **[*10]** not attempt to "shift its theories of liability this late in the game" and (2) Judge Wigenton's September 14, 2009 opinion prohibiting Plaintiff from adding "additional causes of action or new theories of liability." (Def. Mov. Br. at 7, 11 (citing *BanxCorp v. Bankrate, Inc. ("BanxCorp III"), 2011 U.S. Dist. LEXIS 149912, at *79 (D.N.J. Dec. 30, 2011)* and *BanxCorp v. Bankrate, Inc. ("BanxCorp II"), 2009 U.S. Dist. LEXIS 84151, at *12 (D.N.J. Sept. 14, 2009)*)). As a result, Bankrate argues that the § 1 claim should be dismissed. (Def. Mov. Br. at 7). In opposition, Plaintiff confirms that it has abandoned the predatory price-fixing conspiracy theory in its entirety. (Pl. Opp. Br. at 10). The Court takes this as a voluntary withdrawal with prejudice of Plaintiff's predatory price-fixing theory. *See* *Witcher v. Kerestes, 410 F. App'x 529, 532 (3d Cir. 2011)* ("Given that the District Court once permitted Witcher to amend his complaint and the amendment was, as the District Court observed, substantially similar to the original complaint, we do not find an abuse in discretion in the District Court's disallowance of a second amendment."); *Holmes v. Gates, 403 F. App'x 670, 674 (3d Cir. 2010)* (where plaintiff **[*11]** had three opportunities to amend her complaint and plaintiff did not do so, District Court did not err in dismissing her complaint). However, Plaintiff argues that it advances no new theories of liability in the 5AC, and "[p]rice-fixing and market allocation claims under *§ 1* had been previously pleaded and allowed to proceed by this Court." (Pl. Opp. Br. at 10 (citing 4AC ¶ 280(b)-(d) ("Defendant has illegally restrained trade in the market for Bank Rate Websites in violation of *Section 1 of the Sherman Act* [by] . . . entering into . . . exclusionary agreements with partners and competitors that granted Defendant the sole authority and/or exclusive right to sell rate table listings on the Internet at a fixed price [and] . . . by colluding and entering into agreements to divide markets, and allocate revenues, customers[.]"); 3AC ¶ 117(a) ("Bankrate has illegally restrained trade in the market for Bank Rate Websites in violation of *Section 1 of the Sherman Act* by (a) engaging in predatory pricing and exclusive dealings, and forming a profit-sharing and Price-Fixing Cartel . . . and (b) by colluding and entering into exclusive contracts with LendingTree to . . . divide markets, accounts, **[*12]** [and] customers[.]); *BanxCorp II, 2009 U.S. Dist. LEXIS 84151 at *9-10* (discussing the horizontal price-fixing claim)).

In her September 14, 2009 Opinion, Judge Wigenton found that the *§ 1* price-fixing claim in Plaintiff's Second Amended Complaint was adequately pleaded. It appears that these allegations continued through the 3AC. (*See, e.g.*, 3AC ¶¶ 15, ("More specifically, Bankrate has engaged in predatory pricing and price-fixing agreements with competitors[.]"); ¶ 19(a) ("Bankrate conspired, colluded, and entered into horizontal Cost-Per-Click (herein "CPC") price-fixing and profit-sharing agreements by organizing and becoming the ringleader of an illegal cartel with approximately 100 co-branding partners (the "Price-Fixing Cartel") which also are Bankrate.com's competitors[.]")). These same allegations appear to have persisted through the 4AC. (*See, e.g.*, 4AC ¶ 9 ("The centerpiece of this action is a massive predatory pricing, price-fixing, and market division conspiracy[.]"); ¶ 22 ("This enabled

Defendant to essentially charge any fixed price across its "network" at will . . . by charging supra-competitive fixed prices, as Defendant subsequently did after 2006."); ¶ 24 ("From October 1, 2005 to the present, **[*13]** through its combined price-fixing and predatory pricing practices, Bankrate tripled its Hyperlink CPC prices[.]"); ¶ 28 ("On September 23, 2008 after first entering into a co-branding, price-fixing, market division . . . ."); ¶ 89 ("Hence, while there may have been other interchangeable products in the past, by entering into a price-fixing conspiracy among Bankrate and [its competitors] . . . ."); ¶ 92 ("This is a classic example of a per se violation of *§ 1* involving an agreement between competitors to fix prices, divide markets, and allocate revenues, customers, products and Internet traffic in the relevant market.")). Accordingly, the Court finds that Plaintiff does not plead its *§ 1* price-fixing conspiracy claim for the first time in the 5AC, and that Plaintiff did not, in the past, abandon the claim only to re-plead it here.

As for Plaintiff's market division/customer allocation claim, it appears that although Judge Wigenton forbade Plaintiff from amending portions of the complaint not addressed in her September 14, 2009 Opinion, Judge Arleo later permitted Plaintiff to amend the 3AC and file the 4AC, after Plaintiff filed a motion to amend seeking to expand its market division/customer **[*14]** allocation theory. (*See* Order Granting Motion for Leave to File an Amended Complaint, D.E. 209). BanxCorp did in fact expand its market allocation theory in the 4AC to encompass not only Lending Tree, but also all of the members in Bankrate's "cartel." (*See* 4AC ¶ 19 ("Bankrate conspired, colluded, and entered into horizontal predatory price-fixing, market allocation, and revenue-sharing agreements with competitors by organizing and becoming the ringleader of an illegal cartel[.]"); ¶ 26 ("During the fourth quarter of 2002 Bankrate entered into an exclusive partnership agreement with The Wall Street Journal's WSJ.com website affiliate, suppressing and precluding competition, by granting Defendant the exclusive right to sell WSJ.com's rate table listings on the Internet at a fixed price on a "network" basis, and by dividing markets, and allocating revenues, customers, products[,] and Internet traffic."); *see also* 4AC ¶¶ 9, 17, 19, 27, 92, 109, 133, 156, 164, 216, 228, 280(d)-(f), 281, 305(d)-(f) (demonstrating, generally, that Plaintiff expanded its theory to include Bankrate's co-branding partners). The expanded theory remains in the 5AC. (*See, e.g.*, 5AC ¶¶ 16, 18, 25, 26, 101, 125, **[*15]** 136, 148, 188, 211, 217, 223, 228, 229, 233, 246-48, 253, 258, 297, 323) (demonstrating, generally, that Plaintiff expanded its theory to include Bankrate's co-branding partners).

Thus, BanxCorp's market division/customer allocation theory is not new to the 5AC, and is not being asserted in violation of a court order. Accordingly, the Court will now proceed to evaluate the sufficiency of Plaintiff's claims.

B. Sherman Act § 1: Contract or Conspiracy in Restraint of Trade

1. Legal Standard: Sherman Act, 15 U.S.C. § 1

BanxCorp brings its market division/customer allocation claim under *§ 1 of the Sherman Act*. *Section 1* provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. Thus, plaintiffs asserting a § 1 claim "must allege four elements: '(1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action.'" *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir. 2010)* **[*16]** (citations omitted). Existence of a "contract, combination . . . or conspiracy" is the hallmark of a § 1 claim. *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 315 (3d Cir. 2010)* (citations omitted). Over the years, courts have limited their attention to two essential elements: (1) that the defendant was a party to a "contract, combination . . . or conspiracy" and (2) that the conspiracy to which the defendant was a party imposed an unreasonable restraint on trade. *See* *Burtch, 662 F.3d at 221* (citing *In re Ins. Brokerage, 618 F.3d at 315*).

As to the first element, plaintiffs must establish the existence of an agreement or "concerted action," and therefore, in order to state a claim for conspiracy to engage in market division/customer allocation, BanxCorp must plead that the defendant and co-conspirators "conspired" to subdivide "some relevant market in which they had previously competed." Palmer v. BRG of Georgia, Inc., 498 U.S. 46, 48, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990) (citations omitted). "Unilateral activity by a defendant, no matter the motivation, cannot give rise to a section 1 violation." InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 159 (3d Cir. 2003). "An agreement exists when there is a unity **[*17]** of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme." West Penn Allegheny Health Sys. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010) (citing Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)); Howard Hess Dental Labs. Inc., 602 F.3d at 254).

A plaintiff may plead an agreement by alleging direct or circumstantial evidence, or a combination of the two. Direct evidence of a conspiracy is "evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted." In re Ins. Brokerage, 618 F.3d at 324 n.23 (citations omitted). "[D]irect evidence of conspiracy, if credited, removes any ambiguities that might otherwise exist with respect to whether the parallel conduct in question is the result of independent or concerted action." Id. at 324. "If a complaint includes non-conclusory allegations of direct evidence of an agreement, a court need go no further on the question of whether an agreement has been adequately pled." West Penn, 627 F.3d at 99 (citing In re Ins. Brokerage, 618 F.3d at 323).

Examples of direct proof of conspiracies that the Third Circuit has found sufficient include:

> (1) **[*18]** a direct threat to the plaintiff from a competitor that if he went into business his competitors would do anything they could to stop him, including cutting prices or supplies;
> (2) advising distributors that a supplier would cut off access if the distributor failed to maintain a certain price level;
> (3) a memorandum produced by a defendant conspirator detailing the discussions from a meeting of a group of alleged conspirators; and
> (4) a public resolution by a professional association recommending that its members withdraw their affiliation with an insurer.

InterVest, 340 F.3d at 162-63 (citations omitted).

In its evaluation of circumstantial evidence in an antitrust case, the Court must apply special considerations so that only reasonable inferences are drawn from the evidence. Id. at 160. The reason is that "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case." Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). Certainly, "an actionable horizontal conspiracy does not require direct communication among the competitors." In re Ins. Brokerage, 618 F.3d at 331. But a § 1 claim of conspiracy "predicated on parallel conduct **[*19]** should be dismissed if 'common economic experience,' or facts alleged in a complaint itself, show that independent self-interest is an 'obvious alternative explanation' for defendants' common behavior." Id. at 326. Thus some courts have denominated certain factors which, if present, may indicate the existence of a conspiratorial agreement. *See* id. at 321. These factors include: "(1) evidence that the defendant had a motive to enter into a [conspiracy]; (2) evidence that the defendant acted contrary to its interests; and (3) 'evidence implying a traditional conspiracy." Id. at 322. Courts have cautioned that the first two factors may indicate that defendants operate "in an oligopolistic market," and because such a market contains very few sellers, each defendant would be aware of each other's actions. In re Baby Food Antitrust Litig., 166 F.3d 112, 122, 135 (1999) ("[E]vidence of action that is against self-interest or motivated by profit must go beyond mere interdependence."). Evidence of the third factor is "non-economic evidence that there was an actual, manifest agreement not to compete, which may include proof that the defendants got together and exchanged assurances of common **[*20]** action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown." In re Ins. Brokerage, 618 F.3d at 322 (citations and quotations omitted).

The second element of a § 1 claim, an unreasonable restraint on trade, is analyzed under either the *per se* standard or the rule of reason standard. Horizontal market division/customer allocation agreements are analyzed under the *per se* standard. Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984). The *per se* illegality rule applies when a business practice "on its face, has no purpose except stifling competition." *Eichorn v. AT & T Corp., 248 F.3d 131, 143 (3d Cir. 2001)* (citations omitted); *In re Ins. Brokerage, 618 F.3d at 316* (citations omitted) ("A *per se* rule is applied when the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output."). Agreements that fall under established *per se* illegality categories are "conclusively presumed to unreasonably restrain competition." *Id.* (citation and quotations omitted). "Paradigmatic examples are 'horizontal agreements among competitors to fix prices or to divide markets.'" **[*21]** *Id.* (citing *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*. *Per se* illegality "is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010)* (citations and internal quotation marks omitted).

2. Plaintiff's Failure to Sufficiently Plead the Conspiracy Element of Its Market Division/Customer Allocation Theory

Under the Third Circuit's three-step analysis, the Court begins by taking note of the elements of a conspiracy claim under *§ 1*, which are (1) the existence of an agreement to engage in the alleged scheme, here, market division/customer allocation, and (2) that the conspiracy imposed an unreasonable restraint on trade. *See* *Burtch, 662 F.3d at 221*. Below, because the Court finds that Plaintiff has insufficiently pleaded element one, the Court does not analyze the second element. Before moving to step two of the Third Circuit's three-step analysis, the Court briefly sets forth the standard for Plaintiff's required showing and the parties' arguments as to that showing.

To sufficiently plead **[*22]** the conspiracy element of its claim, Plaintiff must show the existence of an agreement among members of the conspiracy demonstrating "a unity of purpose, a common design and understanding, a meeting of the minds, or a conscious commitment to a common scheme." *West Penn Allegheny Health Sys. v. UPMC, 627 F.3d 85, 99 (3d Cir. 2010)* (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*; *Howard Hess Dental Labs. Inc., 602 F.3d at 254*). The "unity of purpose" must point to the "common scheme" alleged in the complaint. *See id.* In this case, Plaintiff's 4AC alleges that the common scheme was market division/customer allocation. In the antitrust context, "market division/customer allocation" means Plaintiff "had to show that [Bankrate and its co-conspirators] had subdivided some relevant market in which they had previously competed." *Palmer, 498 U.S. at 48*. Although "[t]he case law is clear that a market division need not be an agreement that each firm will stay completely out of the assigned territory of the other[,]" it must require that participants "refrain from . . . (2) selling in one another's territories, (3) soliciting or selling to one another's customers, or (4) **[*23]** expanding into a market in which another participant is an actual or potential rival." 12 Herbert Hovenkamp, ***Antitrust Law*** ¶ 2030 at 210, 214 (2d ed. 2005) (citing *United States v. Topco Assocs., 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*; *United States v. Sealy, Inc., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967))*.

A party's failure to allege specifics as to the entrance and object of the agreement will lead to the dismissal of a conspiracy claim. *See* *Matsushita, 475 U.S. at 595-96*; *Summit Health, Ltd. v. Pinhas, 500 U.S. 322, 340, 111 S. Ct. 1842, 114 L. Ed. 2d 366 (1991)* (affirming dismissal of a complaint where evidence indicated that defendants had abolished the featherbedding practice that was the "object of [the] conspiracy"); *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 535, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978)* ("The object of the conspiracy was to restrict St. Paul's policyholders to 'claims made' coverage by compelling them to 'purchase medical malpractice insurance from one insurer only, to wit defendant, St. Paul, and that [such] purchase must be made on terms dictated by the defendant, St. Paul.'") (citation omitted); *In re Ins. Brokerage, 618 F.3d at 321*; *Great W. Mining & Mineral Co. v. Fox Rothschild LLP, 615 F.3d 159, 179 (3d Cir. 2010)* ("Specifically, Great Western has **[*24]** failed to allege except in general terms the approximate time when the agreement was made, the specific parties to the agreement . . . the period of the conspiracy, or the object of the conspiracy."); *Toledo Mack Sales & Serv., Inc. v. Mack Trucks, Inc., 530 F.3d 204, 226 (3d Cir. 2008)* ("Toledo also presented sufficient evidence that "the objects of and the conduct pursuant to th[e] contract or conspiracy were illegal.").

Under this standard, BanxCorp argues that it has adequately alleged that Bankrate engaged in market division/customer allocation with its partner-competitors, a *per se* violation of *§ 1*. (Pl. Opp. Br. at 8). At its core, BanxCorp's theory rests on agreements between Bankrate and its co-branding partners (*e.g.*, Move, Inc.) to divide markets and allocate customers for the purpose of reducing competition in those markets and ultimately driving up prices. (*See* 5AC ¶¶ 228-230). After clearing competitors from the field, Bankrate could, and did, increase its prices at will, thereby harming consumers. (Pl. Opp. Br. at 19). Bankrate argues that BanxCorp has failed to sufficiently plead that Bankrate and its co-conspirators shared a "unity of purpose" to divide markets or allocate **[*25]** customers. (Def. Mov. Br. at 10). Specifically, Bankrate argues that not one of the co-conspirators agreed to refrain from competing in the same market as Bankrate. (*Id.*). The Court agrees with Defendant.

At step two of the Third Circuit's three-step analysis, the Court identifies allegations that—without factual support—would not be entitled to the assumption of truth because they would be no more than mere conclusions. *See* *Burtch, 662 F.3d at 221*. The following is a list of market division/customer allocation allegations from the First Claim in the 5AC:

> Defendant has illegally restrained trade in the market for Bank Rate Websites in violation of *Section 1 of the Sherman Ac*t as follows:
>
> A. Market Division and Allocation Agreements with Competitors
> (i) Defendant has entered into agreements to divide markets, and allocate customers, products, revenues and Internet traffic with approximately 130 partners and competitors that together control more than 300 websites which compete against each other as well as against Defendant's own Bank Rate Websites Bankrate.com, Interest.com and Bankaholic.com; and
>
> (ii) Defendant has entered into approximately 130 agreements with partners and competitors **[*26]** that granted Defendant the sole authority and/or exclusive right to sell rate table listings on the Internet throughout the United States on behalf of each member of Defendant's cartel, also referred to as a "network." Such agreements constitute a territorial market allocation of products and customers throughout the United States.
> As set forth in more detail above (see paragraphs 207-263) , under the "per se" standard, Plaintiff is able to demonstrate (1) that Bankrate contracted, combined or conspired with others through concerted action, and (2) that Plaintiff was injured as a proximate result of that conspiracy.
> Alternatively, under the "rule of reason" standard, Plaintiff is also able to demonstrate in turn (1) that Bankrate contracted, combined or conspired with others through concerted action; (2) that Plaintiff was injured as a proximate result of that conspiracy; (3) that the combination or conspiracy produced adverse, anti-competitive effects within the relevant product and geographic markets; and (4) that the objects of and the conduct pursuant to that contract or conspiracy were illegal.
>
> Defendant's anticompetitive conduct has had a significant adverse effect on competition **[*27]** in the market for Bank Rate Websites, causing direct and proximate harm to the financial service providers—the customers, and to consumers—the end users. In particular, as a result of Defendant's conduct, both financial service providers (the customers) and consumers are denied freedom of choice with respect to Bank Rate Websites: Financial service providers have no effective economic choice but to list their rates with Defendant and consumers have virtually no alternative Bank Rate Website sources other than Defendant's, through its captive Price-Fixing Cartel. Thus, consumers and financial service providers become almost exclusively dependent on Bankrate for access to Bank Rate Websites.

(5AC ¶¶ 297-300).

These allegations are conclusory with respect to the alleged market division/customer allocation conspiracy. They merely allege that Bankrate engaged in market division and customer allocation, yet they fail to allege that Bankrate's co-conspirators agreed not to compete with Bankrate. Without more, these allegations evince no "unity of purpose" among Bankrate and its co-branding partners to divide markets or allocate customers. Such conclusory allegations are not entitled to the **[*28]** presumption of truth. *See* *Burtch, 662 F.3d at 221*. Therefore, the Court proceeds to step three of the Third Circuit's analysis to determine whether these bare allegations are echoed elsewhere in the 4AC by well-pled allegations, and whether those allegations "plausibly give rise to an entitlement for relief." *Id.* In its analysis below, the Court finds that although BanxCorp includes numerous allegations related to dividing markets and allocating customers, Plaintiff fails to adequately plead that the purported conspirators agreed not to compete with each other in a market in which they once competed or were intending to compete, the key requirement under Plaintiff's chosen theory.

The following is a list of allegations in the 5AC related to the nature of the conspirators' agreements from which the Court must determine whether Bankrate and its co-branding partners shared the requisite "unity of purpose":

> 16. Bankrate did not obtain a monopoly in the market for Bank Rate Websites as a result of a superior product. Rather, it created its monopoly through blatant anticompetitive conduct including price fixing, market division, customer, product, revenue and traffic allocation, and partnerships **[*29]** with competitors as described below.
> 18. Bankrate conspired, colluded, and entered into horizontal price-fixing, market allocation, and revenue-sharing agreements with competitors by organizing and becoming the ringleader of an illegal cartel, also referred to as a "network" or "Online Network" with approximately 130 co-branding partners which together control more than 300 partner sites ("Partner Sites"), that compete against each other and against Defendant's own websites Bankrate.com, Interest.com and Bankaholic.com (collectively, the "Price-Fixing Cartel").
> 25. As set forth in more detail below, Plaintiff had regularly provided its BanxQuote rate tables to The Wall Street Journal ("WSJ") for 17 consecutive years, first in print and later also online. During the fourth quarter of 2002 Bankrate entered into an exclusive partnership agreement with The Wall Street Journal and its WSJ.com website affiliate, suppressing and precluding competition, by granting Defendant the exclusive right to sell WSJ.com's rate table listings on the Internet at a fixed price on a "network" basis, and by dividing markets, and allocating revenues, customers, products and Internet traffic.
>
> 101. However, since **[*30]** approximately 1996 Defendant started offering back-office rate aggregation services not merely for free to other independent website operators if they agreed to join its cartel or "network," but even paid these competitors or potential competitors off through co-branding revenue allocation agreements. Therefore, these independent website operators no longer had any incentive or a need to handle their own redundant back-office services.
> 188. Bankrate persuaded Move, Inc. to join its Price-Fixing Cartel entering into a market allocation and revenue-sharing partnership agreement, as evidenced by Defendant's press release issued on September 6, 2007.
>
> 211. As would be required under either the "per se" or "rule of reason" standard, Plaintiff has presented on the record direct evidence that (i) Defendant has entered into agreements to divide markets, and allocate customers, products, revenues and Internet traffic with approximately 130 partners and competitors that together control more than 300 websites which compete against each other as well as against Defendant's own Bank Rate Websites Bankrate.com, Interest.com and Bankaholic.com; and (ii) Defendant has entered into approximately 130 **[*31]** agreements with partners and competitors that granted Defendant the sole authority and/or exclusive right to sell rate table listings on the Internet throughout the United States on behalf of each member of Defendant's cartel, also referred to as a "network."
> 217. With the largest competitors in the market, Bankrate and its more than 130 co-branding partners, coming together in the form of a revenue-sharing market allocation cartel, it became impossible for independent competitors such as Plaintiff to remain in business.
>
> II. THE MARKET ALLOCATION AND PRICE-FIXING CONSPIRACY
>
> A. Defendant's Collusive Market Allocation and Price-Fixing with Competitors
>
> 223. There is enough factual matter, as more fully described below, to prove that Defendant Bankrate and approximately 130 horizontal partners/competitors possessing market power in the relevant market with an approximately 95% market share, (i) have entered into agreements to divide markets, and allocate customers, products, revenues and Internet traffic (ii) have fixed and are fixing prices in the relevant market, (iii) in parallel, by agreement, through acquiescence, and concerted action rather than independent action, (iv) are acting in

> **[*32]** a uniform manner, (v) have severely limited and impeded competition in the relevant market, (vi) have injured and adversely affected Plaintiff, competition, consumers, and financial service providers as a proximate result of the concerted action, (vii) while carrying out a conspiracy with Bankrate as its ringleader.
> 228. Defendant's 130 co-branding partnership agreements granted Bankrate the exclusive right to sell Internet rate table listings to financial service providers nationally [a territorial market allocation of products and customers throughout the United States] on behalf of hundreds of competing websites—at a fixed price—collect fees from customers, and allocate revenues among each competing member of the cartel on a network basis.
>
> 229. Such agreements axiomatically enabled Defendant to control prices, fix prices, decrease prices through fixed pricing and offer free giveaways of Internet rate table listings (at no cost to Defendant's partners). These alliances and practices among competitors effectively nullified competition. Moreover, the resulting territorial market division and allocation of products, customers and revenues between Bankrate and 130 competitors cannot possibly **[*33]** be deemed a unilateral or pro-competitive conduct.
>
> 233. This is a classic example of a per se violation of *§ 1* involving an agreement between competitors to fix prices, divide markets, and allocate revenues, customers, products and Internet traffic in the relevant market.

In each of these paragraphs, BanxCorp fails to adequately allege the conspirators' intention to refrain from competing in the same market as Bankrate. For example, although ¶ 101 alleges that Bankrate and cartel members entered into agreements that no longer provided the members with "any incentive or a need to handle their own redundant back-office services," ¶ 101 does not allege that these members refrained from competition in the market in an effort to reduce their competition with Bankrate. Nor does ¶ 101 allege that Bankrate in any way retreated from a certain market. The same is true of ¶ 228, which alleges that Bankrate obtained the exclusive right to sell rate table listings, but does not allege that Bankrate withdrew or even reduced competition in a market or that, again, the competitor retreated from a market in order to reduce its competition with Bankrate.

As direct evidence in further support of the above **[*34]** allegations, BanxCorp cites to contracts that supposedly demonstrate the requisite division of markets and customers and decisions not to compete in certain markets among Bankrate and its co-branding partners. The Court now evaluates the contracts.

BanxCorp cites to contractual language like the following, which appears in numerous co-branding contracts:

> Bankrate Sells All Other Advertisements. Bankrate shall have the exclusive right to sell and collect fees for advertisements, including Hyperlink Advertisements within Rate Tables and Display Advertisements on the Rate Query Pages, the Rate Results Pages, the Linked Bankrate Site, and, with the exception of the Leaderboard, the Bankrate Content Pages (collectively, the "Bankrate Advertisements"). MSI shall not interfere with Bankrate Advertisements in any manner. At a minimum, MSI shall make available to Bankrate the Display Advertising placements described in Exhibit A. All Bankrate Advertisements shall comply with Bankrate's applicable policies, available at *www.bankrate.com/terms*.

(Ex. 1 to Letter from BanxCorp, D.E. 169-1, at *5) (Contract between Move Sales, Inc. and Bankrate dated July 24, 2007). [1]

2. Exclusivity Obligations.

> i. Exclusivity. During the Term, MSI agrees that it shall not provide, via any MSI Site, information from any third-party that is substantially similar to:
>
> (a) the Rates Pages, Rate Tables, or the Rate/Averages Box related to "mortgage" and "home equity loan and lines of credit" products; or

[1] In support of its argument here, **[*35]** Plaintiff points to certain contracts it attached to or submitted with the 4AC. (*See* Pl. Opp. Br. at 18 n.6).

> (b) Bankrate Financial Content related to "mortgage" and "home equity loan and lines of credit" products. (Ex. 1 to Letter from BanxCorp, D.E. 169-1, at *7) (Contracts between Move Sales, Inc. and Bankrate dated July 24, 2007).

(Pl. Opp. Br. at 17-18 n.6-7 (citing to D.E. 169 Ex. 1 and D.E. 185 Ex. II-G) (reflecting model language found in these contracts and citing to two specific contracts as support)). [2] For two reasons, the Court finds that the exclusivity provisions of these contracts—the only provisions that arguably evince direct evidence of the co-conspirators' intent—fall short of providing adequate support that the purported co-conspirators agreed to refrain from competing in the same market as Bankrate.

First, these provisions do not appear to limit the co-conspirators' ability to post their own rates on their own websites or on the websites of third-parties (*i.e.*, BCRS Data Corp. and RateCatcher are not prohibited under the contracts from posting their own rates). The provisions only appear to limit the co-conspirators' ability to interfere with Bankrate's content or include third-party content on the co-conspirators' own sites. These exclusivity provisions, therefore, show no intention on the part of a co-branding partners to enter agreements requiring them to exit the market. Indeed, the language regarding exclusivity obligations only discusses the co-conspirator's inability to provide some (though not all) third-party information (*i.e.*, "information from any third-party that is substantially similar to: (a) the Rates Pages, Rate Tables, or the Rate/Averages Box related to 'mortgage' and 'home equity loan and lines of credit' products; or (b) Bankrate Financial Content related to 'mortgage' and 'home equity loan **[*37]** and lines of credit' products."). (Ex. 1 to Letter from BanxCorp, D.E. 169-1, at *7, Contract between Move Sales, Inc. and Bankrate dated July 24, 2007).

Second, although the exclusivity provisions explicitly state that the purported co-conspirators "shall not interfere with Bankrate Advertisements in any manner," the contracts are silent on the co-conspirators' ability to post their own rates or advertisements on their own websites. The exclusivity provisions of the contracts—explicitly forbidding the co-branding partner from interfering at all with the prices—clearly fall short of the types of direct evidence set forth in *InterVest. See* *340 F.3d at 162-63* (citations omitted) (listing the following as examples of direct evidence: "(1) a direct threat to the plaintiff from a competitor that if he went into business his competitors would do anything they could to stop him, including cutting prices or supplies; (2) advising distributors that a supplier would cut off access if the distributor failed to maintain a certain price level; (3) a memorandum produced by a defendant conspirator detailing the discussions from a meeting of a group of alleged conspirators; and (4) a public resolution **[*38]** by a professional association recommending that its members withdraw their affiliation with an insurer"). Here, the exclusivity provisions demonstrate only an intention by co-branding partners to allow Bankrate to sell and collect fees for advertisements and to limit third-party content (*i.e.*, mortgage rate tables, and the like) that may appear on a co-branded website. [3]

Plaintiff fails to provide any evidence—direct or circumstantial—plausibly suggesting a unity of purpose, a common design and understanding, or a meeting of the minds among Bankrate's partner-competitors to engage in market division/customer allocation. Accordingly, because the Plaintiff has failed to adequately allege the first element of its § 1 claim, the Court will not address the second element.

---

[2] Specifically, in ¶¶ 232 n.49 and 19 n.2, Plaintiff **[*36]** cites to a contract between Bankrate and BCRS Data Corp. (Letter from BanxCorp, Ex. 7, D.E. 170-2, at *33) and a contract between Bankrate and RateCatcher, (*id.* at *42).

[3] The Court also notes that in ¶ 188 of the 5AC, Plaintiff points to a press release in support of its allegation of market division/customer allocation. Plaintiff cites to a hyperlink purportedly pointing to the press release, but does not include the press release in the exhibits attached to the 5AC. The Court is unable to consider the content of the press release because (1) the hyperlink appears to be inactive, (2) the press release does not appear to have been included in the attached exhibits, and (3) no argument has been made that such document would be integral to the complaint. *See* *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)* ("As a general matter, a district court ruling on a motion to dismiss may not consider matters extraneous to the pleadings. However, an exception to the **[*39]** general rule is that a document integral to or explicitly relied upon in the complaint may be considered without converting the motion to dismiss into one for summary judgment.") (emphasis omitted) (citations and internal quotations omitted).

Although the Court has found that Plaintiff's § 1 claim based on its market division/customer allocation theory should be dismissed, it will briefly address Bankrate's standing argument.

3. Standing

Bankrate argues that Plaintiff lacks standing to bring its market division/customer allocation claim because the Supreme Court has held "that a competitor cannot, as a matter of law, suffer an antitrust injury from a . . . market/customer allocation agreement because the effect of both is to raise prices." (Def. Mov. Br. at 12). The Court rejects this argument, **[*40]** because the United States Supreme Court has held in favor of a Plaintiff asserting market division/customer allocation, after expressly acknowledging that prices rose due to the agreement. *See, e.g.*, *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 47, 49, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*.

C. Sherman Act *§ 2*: Monopolization or Attempt to Monopolize

1. Legal Standard: Sherman Act, *15 U.S.C. § 2*

BanxCorp brings its monopoly claim under *§ 2* of the Sherman Act, which provides: "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony." *15 U.S.C. § 2*. The offense of monopoly has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

Bankrate appears to challenge BanxCorp's ability to prove only the second element of its monopoly claim. (*See* III.C.2 at 22, *infra*). As to the second element, "the **[*41]** acquisition or possession of monopoly power must be accompanied by some anticompetitive conduct on the part of the possessor." *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 308 (3d Cir. 2007)* (citing *Verizon Commcn's Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004))*. "Anticompetitive conduct may take a variety of forms, but it is generally defined as conduct to obtain or maintain monopoly power as a result of competition on some basis other than the merits." *Id.* (citation omitted). "Conduct that impairs the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way may be deemed anticompetitive." *Id.* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 604-05, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985))*. "Conduct that merely harms competitors, however, while not harming the competitive process itself, is not anticompetitive." *Id.* (citing *Brooke Grp., 509 U.S. 209, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* ("It is axiomatic that the antitrust laws were passed for 'the protection of competition, not competitors.'") (citations omitted)).

2. Sufficiency of Plaintiff's *§ 2* Monopoly Claim

BanxCorp alleges that Bankrate has obtained a monopoly in the **[*42]** relevant market. Specifically, it alleges:

> Bankrate has monopoly power in the market for Bank Rate Websites, having since 2003 captured and maintained a market share of approximately 95%.
>
> Bankrate is maintaining and extending its monopoly power through the predatory and exclusionary conduct described above, in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*.
> Substantial barriers to entry exist in the relevant market.
> There is no legitimate business justification for Bankrate's monopolization conduct.

> Defendant's anticompetitive conduct has had a significant adverse effect on competition in the market for Bank Rate Websites, causing direct and proximate harm to financial service providers—the customers—and to consumers—the end users.
>
> The anticompetitive actions of Defendant have directly injured BanxQuote in its business and property and its injuries and damages are ongoing.

(5AC ¶¶ 305-10).

Bankrate argues that this claim must be dismissed because Plaintiff has failed to allege that Bankrate engaged in exclusionary conduct as required under *§ 2*. The predatory pricing claim is insufficiently pleaded, supported only with conclusory statements. (Def. Mov. Br. at 17-18). And because the **[*43]** theory fails, and Plaintiff does not allege any other type of exclusionary conduct, Plaintiff's *§ 2* claim lacks an essential ingredient—exclusionary conduct—and must likewise fail. (*Id.* at 19-20). Bankrate appears to challenge only the second element in the monopoly analysis—the willful acquisition or maintenance of monopoly power. (Def. Mov. Br. at 14-20).

The second element requires a showing of maintenance of the monopoly power "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Grinnell, 384 U.S. at 570-71*. Conduct that would satisfy this element includes conduct that would foreclose competition, allow Bankrate to gain a competitive advantage, or destroy a competitor. BanxCorp plausibly pleads the element of unilateral predatory pricing, because "conduct that impairs the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way may be deemed anticompetitive." *Broadcom, 501 F.3d at 308* (citation omitted). For example, Plaintiff alleges:

> Since the late 1990s Bankrate engaged in an anticompetitive and predatory campaign to cut off Plaintiff's and **[*44]** other competitors' air supply by giving away free rate listings to financial service providers, and by commingling free rate listings with paid rate listings at a significant loss in order to gain a monopoly.

(5AC ¶ 17).

> As mentioned below, the prices for Google.com keywords such as "best CD rate," "money market account," "best mortgage rate," and "best home equity loan rate," ranged from $7.22 per click to $19.35 per click, which is more than double the CPC price that Bankrate charged for its Bank Rate Website CPC rate listings (see paragraph 170).

(*Id.* ¶ 64).

> "We opened our 2008 CPC rate search business with a 20% increase for deposit clicks effective January 1st, 2008. Cost per click or CPC rate search revenue came in at $10.3 million in Q4 2007, compared to $7.4 million in Q4 2006, representing an increase of 39%. The increase was achieved through more CPC clicks, as well as higher CPC rates. As I mentioned, CPC proved to be solid all year long, with CPC revenues for the full fiscal year coming in at $36.9 million, a $10.2 million, or at 38% increase over the $26.7 million we posted for fiscal 2006."

(*Id.* ¶ 78 (quoting, but without providing a citation, Bankrate's Senior Vice President **[*45]** and CFO, Edward DiMaria, during a February 5, 2008, Fourth Quarter 2007 Earnings conference call)).

> According to Bankrate's press release dated October 3, 2005 (*http://investor.bankrate.com/releasedetail.cfm?ReleaseID=236165*), Bankrate's CPC Pricing Program was set up as follows: "The Bankrate cost-per-click pricing is organized in tiers. Pricing in the Bankrate mortgage interest rate tables ranged from $1.75 to $5.25 per click. The CPC pricing for other financial products categories ranged from $1.75 to $6.00 per click."

(*Id.* ¶ 167).

> The CPC rate table listing prices charged to banks by Defendant on behalf of its own websites Bankrate.com, Interest.com and Bankaholic.com, as well as a cartel of hundreds of Bank Rate Website partners, were consistently fixed across Bankrate's "network" and ranged from $3 per click at the end of 2005, to more than $9

> per click in 2010 (an unchallenged series of price increases in excess of 300%), in violation of *Section 1* of the Sherman Act.

(*Id.* ¶ 221). These allegations mention conduct—giving away free rate listings or pricing below some measure of cost—that would certainly impair the opportunities of rivals for whom offering free or below-cost prices **[*46]** was not feasible and who were, as a consequence, excluded from doing business. Taken as true for purposes of this motion, this practice would either foster anticompetitive behavior or not further competition because it would force competitors to suffer losses until either Bankrate or its competitor was driven out of the market. Accordingly, the Court finds that Plaintiff has sufficiently pleaded its monopoly claim based partially on unilateral predatory pricing.

Bankrate argues that this claim must be dismissed because Plaintiff relies on the predatory pricing claim, which this Court found in its December 30, 2011 Opinion to be insufficiently pleaded and was not repleaded under *§ 1* in the 5AC. (Def. Mov. Br. at 17-18). Defendant is mistaken. In its December 30, 2011 opinion, this Court dismissed the *§ 1* predatory pricing conspiracy claim, but rendered no judgment on the claim framed as a unilateral predatory pricing claim. The monopoly claim in the 4AC was partly premised on the predatory-pricing theory. (*See* 4AC ¶ 288 ("Bankrate is maintaining and extending its monopoly power through the predatory and exclusionary conduct described above, in violation of *Section 2* of the Sherman Act, **[*47]** *15 U.S.C. § 2*."); *see also* *BanxCorp III, 2011 U.S. Dist. LEXIS 149912, at *77* ("Under *§ 2*, BanxCorp alleges that Bankrate unilaterally obtained a monopoly or attempted to obtain a monopoly through predatory pricing and exclusionary conduct."). The Court therefore did not prohibit Plaintiff from reasserting that theory as a *unilateral* action theory here under *§ 2* while abandoning the predatory price-fixing conspiracy claim previously brought under *§ 1*.

Because the predatory pricing theory is sufficient to support Plaintiff's *§ 2* monopoly claim, the theory is also sufficient to support the attempted monopoly claim. [4]

D. New Jersey Antitrust Claims

Bankrate argues that BanxCorp's claims under the New Jersey Antitrust Act (*N.J.S.A. § 56:9-1, et. seq.*) fail for the same reasons as under the federal antitrust laws **[*48]** because New Jersey's antitrust laws mirror the federal laws. (Def. Mov. Br. at 20-21). The parties agree that the New Jersey Antitrust Act essentially mirrors the Sherman Antitrust Act. Neither party engages in any substantive analysis under the New Jersey Antitrust Act. (*See* Def. Mov. Br. at 20-21; Pl. Opp. Br. at 40).

"[T]he language of the relevant portions of the New Jersey Antitrust Act is virtually identical to that of the Sherman Antitrust Act and [the] New Jersey Act itself mandates that it 'shall be construed in harmony with the ruling judicial interpretations of comparable Federal antitrust statutes and to effectuate, insofar as practicable, a uniformity in the laws of those states which enact it.'" *St. Clair v. Citizens Fin. Grp., 340 F. App'x 62, 65 n.2 (3d Cir. 2009)*. Thus, courts look to federal jurisprudence on the Sherman Act when analyzing the New Jersey Antitrust Act. *Desai v. St. Barnabas Med. Ctr., 103 N.J. 79, 510 A.2d 662, 671 (N.J. 1986)*; *Patel v. Soriano, 369 N.J. Super. 192, 848 A.2d 803, 826 (N.J. Super. Ct. App. Div. 2004)*. "Accordingly, the state law antitrust claims are only viable if the corresponding federal claims are sufficient." *St. Clair, 340 F. App'x at 65 n.2*.

The elements necessary **[*49]** to make out a successful claim for monopoly under the New Jersey Antitrust Act are identical to the elements of monopoly under *§ 2* of the Sherman Antitrust Act. *Id. at 65-66* ("[T]o state a claim of monopolization in contravention of *Section 2* of the Sherman Act and its analog, the New Jersey Antitrust Act *§ 56:9-4*, a plaintiff must allege: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a

[4] Bankrate does not tailor any of its arguments specifically to Plaintiff's Attempted Monopoly claim. In fact, Defendant argues the following as to the Third Claim: "With predatory pricing no longer pled as a basis for its *§ 2* claims, BanxCorp has not pled any anticompetitive conduct to support its *§ 2* claims and the Court should therefore dismiss BanxCorp's Second and Third Claims for relief." (Def. Opp. Br. at 20).

superior product, business acumen, or historic accident.") (citing *Crossroads Cogeneration Corp. v. Orange & Rockland Utils., Inc., 159 F.3d 129, 141 (3d Cir. 1998)* and *Patel, 848 A.2d at 829-30*). In the same vein, the elements necessary to make out a successful claim for conspiracy to restrain trade under the New Jersey Antitrust Act are essentially identical to the elements of a successful *§ 1* Sherman Act claim. *Id. at 65* ("To state a claim under either *Section 1* of the Sherman Act or the New Jersey Antitrust Act *§ 56:9-3*, a complainant must allege that two or more entities formed a combination or conspiracy. . . . [A]n allegation of parallel conduct and a bare **[*50]** assertion of conspiracy will not suffice. . . . Furthermore, [w]ithout more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality.") (internal quotations and citations omitted); *N.J. Carpenters Health Fund v. Philip Morris, Inc., 17 F. Supp. 2d 324, 339-40 (D.N.J. 1998)* (overruled on other grounds); *Gregory Mktg. Corp. v. Wakefern Food Corp., 207 N.J. Super. 607, 504 A.2d 828, 832 n.4 (N.J. Law. Div. 1985)* (juxtaposing the language of § 3 of the New Jersey Antitrust Act, *N.J.S.A. § 56:9-3*, to *§ 1 of the Sherman Act*) (overruled on other grounds).

Accordingly, the Court finds that Plaintiff's market division/customer allocation conspiracy claim fails under the New Jersey Antitrust Act because it fails under *§ 1* of the Sherman Antitrust Act. By the same reasoning, the Court finds that Plaintiff's monopoly and attempted monopoly claims, insofar as they are partially based on unilateral predatory pricing, are sufficiently pleaded under the New Jersey Antitrust Act. *See* *TransWeb, LLC v. 3M Innovative Props. Co., No. 10-4413, 2011 U.S. Dist. LEXIS 59095, 2011 WL 2181189, at *20 (D.N.J. June 1, 2011)* (stating, in the context of an **[*51]** attempted monopoly claim asserted under the Sherman and New Jersey Antitrust Acts, that "[b]ecause New Jersey's antitrust statutes are construed in harmony with federal antitrust statutes, the Court need not separately analyze the state law claims") (citing *Dicar, Inc. v. Stafford Corrugated Prods., Inc., No. 05-5426, 2010 U.S. Dist. LEXIS 23667, 2010 WL 988548, at *9 n.7 (D.N.J. Mar. 12, 2010)*; *Only v. Ascent Media Grp., LLC, No. 06-2123, 2006 U.S. Dist. LEXIS 72676, 2006 WL 2865492, at *5, *8 (D.N.J. Oct. 5, 2006))*; *Acme Mkts., Inc. v. Wharton Hardware & Supply Corp., 890 F. Supp. 1230, 1238 n.6, 1242 n.10 (D.N.J.1995))*.

IV. CONCLUSION

For the foregoing reasons, Defendant's motion is GRANTED as to the First Claim and DENIED as to the Second and Third Claims. Further, Defendant's motion is GRANTED in part and DENIED in part as to Fifth Claim. Plaintiff's *§ 1* predatory pricing conspiracy claim is dismissed with prejudice. The Court grants BanxCorp fifteen days to amend its First Claim, and only its First Claim. An appropriate Order will follow.

AMERICAN EAGLE WASTE INDUSTRIES, LLC, et al., Respondents/Cross-Appellants, v. ST. LOUIS COUNTY, MISSOURI, Appellant/Cross-Respondent.

Prior History: [1]** APPEAL FROM THE CIRCUIT COURT OF ST. LOUIS COUNTY. The Honorable Barbara Wallace, Judge.

Am. Eagle Waste Indus., LLC v. St. Louis County, 2010 U.S. Dist. LEXIS 25588 (E.D. Mo., Mar. 18, 2010)

Core Terms

Haulers, circuit court, damages, two-year, notice, waiting period, trash collection, contracts, political subdivision, waste collection, bids, collection, districts, provide a service, solid waste, two year, entities, legislative intent, unincorporated, environmental regulation, court of appeals, waste management, provisions, implied in law contract, prejudgment interest, measure of damages, private entity, regulation, Ordinance, antitrust

LexisNexis® Headnotes

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

HN1[] **Solid Wastes, Disposal Planning**

Mo. Rev. Stat. § 260.247 sets certain procedural rules for municipalities that expand their municipal waste collection activities into new territory. Prior to the enactment of S. 54 (Mo. 2007), *section 260.247* applied only to cities. S. 54 amended *§ 260.247* to apply to all cities and political subdivisions.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

HN2[] **Solid Wastes, Disposal Planning**

See *Mo. Rev. Stat. § 260.247*.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN3[] **Standards of Review, De Novo Review**

The decree or judgment of the trial court will be sustained by the appellate court unless there is no substantial evidence to support it, unless it is against the weight of the evidence, unless it erroneously declares the law, or unless it erroneously applies the law. Issues of law, however, are reviewed de novo.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

Governments > Local Governments > Ordinances & Regulations

HN4[] **Solid Wastes, Disposal Planning**

Counties are authorized to enter the business of trash collection, and even to take it out of the hands of private collectors. But enacting an ordinance which would allow the county to do so without following the notice requirement and waiting period in *Mo. Rev. Stat. § 260.247* would bring it out of harmony with the general laws of the state and amount to an attempt to change the policy of the state as declared for the people at large. A charter county's exercise of power that produces this result is impermissible.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN5[] **Preclusion of Judgments, Law of the Case**

The doctrine of law of the case governs successive appeals involving substantially the same issues and facts, and applies appellate decisions to later proceedings in that case. A previous holding constitutes law of the case, precluding relitigation of issues on remand and subsequent appeal. Generally, the decision of an appellate court is the law of the case for all points presented and decided as well as for matters that arose prior to the first adjudication and might have been raised but were not.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN6[] **Preclusion of Judgments, Law of the Case**

The doctrine of law of the case is necessary to ensure uniformity of decisions, protect the parties' expectations, and promote judicial economy. The doctrine is more than merely a courtesy: it is the very principle of ordered jurisdiction by which the courts administer justice. Appellate courts do have discretion to consider an issue when there is a mistake, a manifest injustice, or an intervening change of law. But when there is no demonstrable error in the first decision, law of the case is peculiarly appropriate.

Governments > Legislation > Enactment

HN7[] **Legislation, Enactment**

Mo. Const. art. III, § 23 states that no bill shall contain more than one subject which shall be clearly expressed in its title. This constitutional provision limits the legislature in two distinct but related ways by creating a single subject rule and a clear title requirement. An appellate court will resolve doubts in favor of the procedural and substantive validity of an act of the legislature. Because attacks against legislation based on constitutionally imposed procedural limitations are not favored, the appellate court interprets the procedural limitations of article III, § 23 liberally and will uphold the constitutional validity of a bill unless the act clearly and undoubtedly violates the constitutional limitation.

Governments > Legislation > Enactment

HN8[] **Legislation, Enactment**

A bill's title is constitutionally clear when it indicates in a general way the kind of legislation that was being enacted. However, a title may not be too broad or amorphous such that it fails to identify a single subject.

Governments > Legislation > Enactment

HN9[] **Legislation, Enactment**

A bill will not violate the single subject requirement so long as the matter is germane, connected and congruous. A subject within the meaning of *Mo. Const. art. III, § 23* includes all matters that fall within or reasonably relate to the general core purpose of the proposed legislation. The subject of a bill may be clearly expressed by stating some broad umbrella category when a bill has multiple and diverse topics within a single, overarching subject.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

HN10[] **Solid Wastes, Disposal Planning**

S.B. 54 (Mo. 2007) includes substantive regulations that directly regulate environmental hazards and establishes administrative procedures to allow for the enforcement of those regulations. *Mo. Rev. Stat. § 256.700* (requiring a fee for surface mining), *Mo. Rev. Stat. § 256.710* (establishing a council to review fees), 260.211 (providing criminal penalties for improper waste disposal), and *Mo. Rev. Stat. § 260.247* (providing a regulatory framework for the division of contracts in solid waste disposal areas). S.B. 54 also amends *Mo. Rev. Stat. § 260.247*, which regulates the process by which a political subdivision expands or enters into solid waste collections services.

Governments > Legislation > Effect & Operation > Retrospective Operation

HN11[] **Effect & Operation, Retrospective Operation**

Mo. Const. art. I, § 13 prohibits the enactment of any law that is retrospective in its operation. Article I, section 13 does not prohibit retrospective laws merely relating to past transactions but rather prohibits laws that operate retrospectively, affecting past transactions to the substantial prejudice of parties interested.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Waiver

Governments > Legislation > Statutory Remedies & Rights

HN12[] **Affirmative Defenses, Waiver**

Waiver is the intentional relinquishment of a known right. One voluntarily proceeding under a statute or ordinance, and claiming the benefits conferred by it, may not question its validity to avoid its burdens.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Estoppel

HN13[] **Affirmative Defenses, Estoppel**

The elements of estoppel are (1) an admission, statement, or act inconsistent with the claim afterwards asserted and sued upon, (2) action by the other party on the faith of such admission, statement, or act, and (3) injury to such other party, resulting from allowing the first party to contradict or repudiate the admission, statement, or act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN14[] **Actual Monopolization, Claims**

Missouri prohibits restraint of trade by monopolization. *Mo. Rev. Stat. § 416.031* (Supp. 2010) states that every contract, combination or conspiracy in restraint of trade or commerce in this state is unlawful. Further, it is unlawful to monopolize, attempt to monopolize, or conspire to monopolize trade or commerce in the state. *Mo. Rev. Stat. § 416.031.2*. But state action is exempted if the arrangements are expressly approved or regulated by any regulatory body or officer acting under statutory authority of Missouri or of the United States. *Mo. Rev. Stat. § 416.041.2*.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Governments > Local Governments > Duties & Powers

HN15[] **Scope, Exemptions**

For a political subdivision to prove its actions should be exempt and assert a successful defense to an antitrust suit, it need show only that it acted pursuant to a clearly articulated and affirmatively expressed state policy that is actively supervised by the state. In Missouri, cities and counties are expressly authorized by statute to provide for the collection and disposal of solid wastes, and they may contract with any person, city, county, common sewer district, political subdivision, state agency or authority to provide those services. *Mo. Rev. Stat. §§ 260.215.1*; 260.215.3(1) (Supp. 2010).

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Governments > Local Governments > Duties & Powers

HN16[] Scope, Exemptions

The Missouri legislature has affirmatively expressed a policy of allowing cities and counties to regulate waste management through *Mo. Rev. Stat. § 260.215*. A county, therefore, is a regulatory body acting under statutory authority for purposes of the state action exemption from the antitrust statute, even if it does not comply fully with *Mo. Rev. Stat. § 260.247*. A county's noncompliance does not mean its actions fall outside the state action exemption—it only means it may have violated the statute by noncompliance.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN17[] Breach of Contract Actions, Elements of Contract Claims

Unlike a contract implied in fact, a contract implied in law is imposed, or created, without regard to the promise of the party to be bound. Thus, a contract implied in law is not actually a contract and, instead, is an obligation to do justice where no promise was ever made or intended. Courts sometimes use the term quasi-contract to refer to this phenomenon. The essential elements of quasi-contract are: (1) a benefit conferred upon the defendant by the plaintiff; (2) appreciation by the defendant of the fact of such benefit; and (3) acceptance and retention by the defendant of that benefit under circumstances in which retention without payment would be inequitable.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] Motions to Dismiss, Failure to State Claim

In determining whether a pleading adequately states a claim for relief on a particular basis, the rule is well established in Missouri that the character of a cause of action is determined from the facts stated in the petition and not by the prayer or name given the action by the pleader.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN19[] Motions to Dismiss, Failure to State Claim

To properly plead a cause of action, the petition must state allegations of fact in support of each essential element of the cause pleaded. It is the facts stated in the petition, along with the relief sought, which under the Missouri system of code pleading are to be looked at to determine the cause of action, rather than the form of the petition. To be deemed sufficient, a petition need not even label the theory upon which a plaintiff seeks recovery.

Civil Procedure > Appeals > Standards of Review > General Overview

HN20[] Appeals, Standards of Review

An appellate court is primarily concerned with the correctness of the trial court's result, not the route taken by the trial court to reach that result. A trial court judgment will be affirmed if cognizable under any theory, regardless of whether the reasons advanced by the trial court are wrong or not sufficient.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Legislation > Statutory Remedies & Rights

HN21[] **Solid Wastes, Disposal Planning**

By its plain terms, *Mo. Rev. Stat. § 260.247* does not provide an express remedy for its violation. Nevertheless, when a legislative provision protects a class of persons by the requirement or proscription of certain conduct but does not provide a civil remedy for the violation, a court may, if it determines that the remedy is appropriate to further the purpose and ensure the effectiveness of the enactment, accord to an injured member of the class a right of action. If it clearly appears to have been the legislative intent, courts will find implied private causes of action in such cases.

Governments > Legislation > Statutory Remedies & Rights

HN22[] **Legislation, Statutory Remedies & Rights**

A private remedy will not be implied when it does not promote or accomplish the primary goals of the statute. Moreover, courts often have been reticent to recognize private causes of action where the legislature has established remedies via other means of enforcing statutory obligations.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

Governments > Legislation > Statutory Remedies & Rights

HN23[] **Solid Wastes, Disposal Planning**

The purpose of *Mo. Rev. Stat. § 260.247* is to provide an entity engaged in waste collecting sufficient notice to make necessary business adjustments prior to having its services terminated in a given area. Subsection 3, specifically, shows the legislature's intent to protect the business entities already providing trash collection services. Section 260.247.3 guarantees that previous haulers receive the same amount for which they contracted for two years following a political subdivision's decision to provide services.

Governments > Legislation > Interpretation

HN24[] **Legislation, Interpretation**

When interpreting statutory law, the court must ascertain the intent of the legislature and give effect to that intent if possible. The intent of the legislature may be determined by considering the plain and ordinary meaning of the terms. The construction of statutes is not to be hyper-technical, but instead is to be reasonable and logical and to give meaning to the statutes.

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Duties & Powers

HN25[] Solid Wastes, Disposal Planning

See *Mo. Rev. Stat. § 260.247.3*.

Governments > Legislation > Statutory Remedies & Rights

HN26[] Legislation, Statutory Remedies & Rights

For every actionable injury there is a corresponding right to damages, and such injury arises whenever a legal right of plaintiff is violated.

Civil Procedure > Remedies > Damages > Compensatory Damages

Contracts Law > ... > Measurement of Damages > Foreseeable Damages > Lost Profits

Environmental Law > Solid Wastes > Disposal Planning

Governments > Local Governments > Claims By & Against

Governments > Legislation > Statutory Remedies & Rights

HN27[] Damages, Compensatory Damages

The amount of damages to which *Mo. Rev. Stat. § 260.247* entitles a trash collector harmed by its violation is the collector's projected receipts from its contract price, minus any business and operational costs it would have incurred while providing waste collection services, considering all the circumstances.

Civil Procedure > Remedies > Damages > Compensatory Damages

Contracts Law > ... > Measurement of Damages > Foreseeable Damages > Lost Profits

HN28[] Damages, Compensatory Damages

When the measure of damages is net profit, the basis for determining the expected profit should be reasonably certain. In evaluating the sufficiency of evidence to sustain awards of damages for loss of business profits the appellate courts of Missouri have made stringent requirements, refusing to permit speculation as to probable or expected profits, and requiring a substantial basis for such awards.

Environmental Law > Solid Wastes > Disposal Planning

Environmental Law > Solid Wastes > Flow Control

HN29[] Solid Wastes, Disposal Planning

Pursuant to Mo. Rev. Stat. § 260.247, a private entity is entitled to provide trash collection services during the two-year waiting period after a political subdivision decides to expand into an area and provide trash collection services. That period begins to run from the effective date of the notice by certified mail. Sec. 260.247.2. If the political subdivision fails to give the required notice, then the two-year period, by default, begins at least two years from the effective date of the annexation.

Environmental Law > Solid Wastes > Disposal Planning

HN30[] Solid Wastes, Disposal Planning

The purpose of Mo. Rev. Stat. § 260.247's notice requirement is different from that of most other notice requirements. Usually, the purpose of a notice requirement is to apprise the recipient that there is a legal action pending and to ensure that the recipient knows when and where the recipient can be heard regarding the matter—in other words, to effectuate due process. The purpose of § 260.247, however, is to provide an entity engaged in waste collecting sufficient notice to make necessary business adjustments prior to having its services terminated in a given area. Section 260.247 guarantees private businesses nothing less than an unequivocal statement that a political subdivision intends to seize the businesses' client bases and at least two years following that unequivocal statement to wind down its operations.

Civil Procedure > Remedies > Judgment Interest > Prejudgment Interest

HN31[] Judgment Interest, Prejudgment Interest

Mo. Rev. Stat. § 408.020 provides that creditors should recover prejudgment interest at the rate of 9 percent 1) for all moneys after they become due and payable, on written contracts, 2) and on accounts after they become due and demand of payment is made, 3) for money recovered for the use of another, and retained without the owner's knowledge of the receipt, 4) and for all other money due or to become due for the forbearance of payment whereof an express promise to pay interest has been made. Prejudgment interest is awarded when the amount due is liquidated or readily ascertainable by reference to recognized standards. Prejudgment interest is not awarded in cases in which the measure of damages is not clear.

Counsel: St. Louis County was represented during arguments by Patricia Reddington and Cynthia L. Hoemann of the county counselor's office in Clayton, MO.

American Eagle was represented by Jane E. Dueker, Nicole S. Zellweger and Crystal K. Hall of Stinson, Morrison Hecker LLP in St. Louis, MO.

O'Keefe and Edward J. Sluys of Curtis, Heinz, Garrett & O'Keefe PC in St. Louis, MO and Daniel R. Wichmer of Springfield, MO.

Judges: All concur.

Opinion

[*819] en banc

PER CURIAM

I. Introduction

In 2008, St. Louis County ("County") assumed control of solid waste collection activities in the County's unincorporated areas. Prior to that, waste collection services in those areas had been provided by private entities. Among them were American Eagle Waste Industries, LLC; Meridian Waste Services, LLC; and Waste Management of Missouri, Inc. (collectively, "Haulers"). Following a 2007 amendment to *section 260.247*, which extended hauler-protective business regulations to counties that wish to provide trash collection, Haulers sued County in 2008 for a declaratory judgment that County must comply with *section 260.247*. On appeal, the court of appeals ruled that *section 260.247* applied to County, despite its claim that its status as a charter county made the statute inapplicable.

The case was remanded to the circuit court for further proceedings, and Haulers added the claims on appeal here, including a claim that they suffered money damages as a result of County's failure to comply with the statute. The circuit court found County liable to Haulers on the theory **[**2]** of implied in law contract. After determining damages and assuming a 5-percent profit, the circuit court awarded Haulers $1.2 million in damages. This Court reverses the circuit court's calculation of damages, affirms the judgment in all other respects, and remands the case to the circuit court.

[*820] II. Facts and Procedural History

Each group of Haulers, as private entities, had provided trash collection services to clients in parts of unincorporated St. Louis County prior to December 2006. On December 12, 2006, the St. Louis County council enacted Ordinance No. 23,023, which created significant changes to the charter county's regulation of waste collection in unincorporated areas. Among the changes was the addition of the following two sections:

> **607.1300 Designation of Collection Areas**
>
> 1. The County Executive shall, by January 15, 2008, *establish areas within the unincorporated County for the collection and transfer of waste and recovered materials*. The boundaries of such areas shall be determined after consideration of factors including size, compactness, road system and other relevant considerations.
>
> **607.1310 Grant of Contract**
>
> 1. The County Executive is authorized to advertise for bids or **[**3]** proposals from private or public entities for the provision of services relating to collection and transfer of waste and recovered materials in those areas designated in accordance with Section 607.1300. Such bids or proposals may provide for such services in one or more areas.
> 2. Contracts shall be awarded by order of the County Council to persons that have submitted the most responsible bids or proposals. Such contracts shall require that the person awarded the contract shall comply with all duties imposed by this Waste Management Code; shall provide for exclusive services in the designated area or areas; shall provide for a term not to exceed three (3) years; and shall contain such other terms and conditions approved by the County Counselor.

(Emphasis added). Haulers admit they had actual notice of Ordinance No. 23,023's passage on the day it was enacted. Haulers also received letters from County about one month later notifying them of the changes to the waste management code. The letters, dated January 8, 2007, read in pertinent part:

> Several of the changes made to the Code will have an immediate effect on all waste haulers that provide residential collection service in St. Louis **[**4]** County .... Some of the highlights of the new Code requirements are:
>
> • Establishing basic level of service for [residences] ....
>
> • Basic service level applies throughout St. Louis County.
>
> • Basic service level requirements are to be implemented by January 15, 2007 unless there is a valid contract for service in effect by that date. If a valid contract is in effect, then the implementation date is the later of January 15, 2008 or the expiration of the contract.
>
> • Trash collection districts for unincorporated St. Louis County are to be established and contracts in place by January 15, 2008.
>
> We have scheduled a meeting for Wednesday, January 17, 2007 .... Please come with your ideas of how we can better implement these new provisions and any obstacles you foresee ....

Haulers' representatives appeared at several county council meetings in 2007 and 2008 to comment on Ordinance No. 23,023 and how it should be implemented.

On June 26, 2007, after County had begun implementing its trash collection program, but before trash collection districts for unincorporated St. Louis County had been established, the governor signed into law Senate Bill No. 54, titled:

> **[*821]** An Act to repeal *sections 260.200*, *260.211*, **[**5]** *260.212*, *260.240*, *260.247*, *260.249*, *260.250*, *260.330*, *260.335*, *260.360*, *260.470*, *260.800*, *386.887*, *414.420*, *444.772*, and *643.079, RSMo*, and to enact in lieu thereof thirty-nine new sections relating to environmental regulation, with an effective date and penalty provisions.

HN1[] *Section 260.247* sets certain procedural rules for municipalities that expand their municipal waste collection activities into new territory. Prior to the enactment of S.B. 54, *section 260.247* applied only to "cities." S.B. 54 amended *section 260.247* to apply to all "cities and political subdivisions." The revised version of *section 260.247*, which became effective January 1, 2008, provides:

> ***HN2***[] 1. Any city or political subdivision which annexes an area or enters into or expands solid waste collection services into an area where the collection of solid waste is presently being provided by one or more private entities, for commercial or residential services, ***shall notify the private entity or entities of its intent to provide solid waste collection services in the area by certified mail***.
>
> 2. A city or political subdivision ***shall not commence solid waste collection in such area for at least two years from the effective date [**6] of the annexation or at least two years from the effective date of the notice*** that the city or political subdivision intends to enter into the business of solid waste collection or to expand existing solid waste collection services into the area, ***unless the city or political subdivision contracts with the private entity or entities to continue such services for that period***. If for any reason the city or political subdivision does not exercise its option to provide for or contract for the provision of services within an affected area within three years from the effective date of the notice, then the city or political subdivision shall renotify under subsection 1 of this section.
>
> 3. If the services to be provided under a contract with the city or political subdivision pursuant to subsection 2 of this section are substantially the same as the services rendered in the area prior to the decision to annex the area or to enter into or expand its solid waste collection services into the area, ***the amount paid by the city shall be at least equal to the amount the private entity or entities would have received for providing such services during that period***.

(Emphasis added).

In anticipation of the **[**7]** bidding process to award waste collection contracts for the newly created districts in unincorporated St. Louis County, County held pre-bid meetings on March 6, 2008, and April 21, 2008. Representatives of Haulers attended. Bids for new Trash District 3 opened on March 20, 2008; for new Trash

Districts 1, 5 and 7 on May 14, 2008; and for new Trash Districts 2, 4, 6 and 8 on May 28, 2008. Each group of Haulers submitted at least one bid.

Haulers were not awarded any of the contracts. County awarded the contract for District 3 on April 8, 2008, and the remaining contracts were awarded on June 10 and 17, 2008. The winning bidders began providing waste collection services on July 1, 2008, for District 3, and on September 29, 2008, for the remaining districts.

Haulers filed this lawsuit May 29, 2008, before the contracts were awarded. Their first petition sought a writ of mandamus compelling County to comply with revised *section 260.247*'s notice and two-year waiting period requirements. Alternatively, it sought a declaratory judgment that County's plan to contract with the companies submitting the winning bids violated *section 260.247*. **[*822]** County immediately filed a motion to dismiss for failure **[**8]** to state a claim on which relief could be granted. The circuit court denied the writ and sustained the motion to dismiss on the ground that *section 260.247* could not be constitutionally applied to St. Louis County because its status as a charter county allows it to regulate municipal functions. The circuit court found trash collection to be a "municipal function" within the province of County's ability to regulate.

Haulers appealed, and the court of appeals reversed the dismissal and remanded the cause to the circuit court for further proceedings. *State ex rel. Am. Eagle Waste Indus. v. St. Louis Cnty., 272 S.W.3d 336 (Mo. App. 2008)*. The court of appeals held that dismissal for failure to state a claim was inappropriate because Haulers had invoked principles of substantive law sufficient to entitle them to a declaration of their rights, if any, under *section 260.247*.

The Court went on to address the merits of Haulers' claim and noted that "[t]he fundamental purpose of *section 260.247* is to provide an entity engaged in waste collecting with sufficient notice to make necessary business adjustments prior to having its services terminated in a given area." *Id. at 342*. The court of appeals **[**9]** found *section 260.247* has a general, state wide purpose with which County must comply. The court concluded:

> The County is authorized to enter the business of trash collection, and even to take it out of the hands of private collectors. But enacting an ordinance which would allow the County to do so without following the notice requirement and waiting period in *section 260.247* would bring it "out of harmony with the general laws of the states" and amount to "[an] attempt to change the policy of the state as declared for the people at large.".... The County here can both take over trash collection as it wishes while at the same time *remaining in harmony with the public policy of the state*. Accordingly, we find that the County does not have authority to legislate over the requirements of *section 260.247*.

Id. at 343 (emphasis added) (internal citations and quotations omitted). The court of appeals issued its opinion in October 2008. In January 2009, this Court declined to accept transfer of the appeal.

Haulers subsequently filed an amended petition in the circuit court, adding claims for breach of implied contract, violation of state ***antitrust law***, violation of the *Fifth Amendment's Takings Clause*, **[**10]** and violation of due process under the *Fourteenth Amendment*. County removed the case to the United States District Court for the Eastern District of Missouri in June 2009. The federal court dismissed both federal law claims and remanded the case to state court in March 2010. *Am. Eagle Waste Industries, LLC v. St. Louis Cnty., Mo., No. 4:09-CV-816 CAS, 2010 U.S. Dist. LEXIS 25588, 2010 WL 1049796 (E.D. Mo. March 18, 2010)*.

Back in the circuit court, County again moved to dismiss. The circuit court dismissed Hauler's antitrust count but overruled the motion as to all other counts. Later, Haulers moved for partial summary judgment as to County's liability on its implied in law contract count. The circuit court sustained the motion in September 2010, finding that County was "benefited in that it fully implemented its trash collection program without having to pay the existing haulers" and that County thereby was liable to Haulers on an implied in law contract.

In December 2010, the circuit court heard arguments about the issue of the measure of damages to which Haulers were entitled. The circuit court issued an order in January 2011 holding that "the **[*823]** two year notice period for determining [Haulers'] damages began to **[**11]** run as of ... April 8, 2008 for District 3, and June 10 and 17, 2008 for the remaining Districts," the dates that County signed binding contracts with the new haulers. Finally, the court held that the measure of damages would be "the amount [Haulers would have] *received* for providing such services during [the two-year] period" (emphasis added). Accordingly, the circuit court sustained Haulers' objections to the discovery of any information regarding their profit margins.

Trial was held May 31, 2011, to determine the amount of Haulers' damages that County owed for breach of implied-in-law contract. At the outset, County objected to the use of projected gross revenues as the measure of damages. Only one witness testified at trial: a certified public accountant who gave expert testimony on behalf of Haulers. Relying on Haulers' business records, the accountant testified that, in his opinion, Haulers suffered a combined $23 million in damages. He arrived at this figure by estimating how much gross revenue each Hauler lost by not providing services for the entire two-year waiting period. His calculations were based on estimates of amounts Haulers would have billed rather than amounts Haulers **[**12]** would have received. The number of customers each Hauler would have gained or lost over the 24-month period also figured into his estimates. The accountant admitted he never before had used gross revenues as a measure of business losses. He further testified that he had not audited any of the business records Haulers provided.

The circuit court issued its final judgment, along with findings of fact and conclusions of law, on September 2, 2011. Despite its earlier order that the correct baseline for determining damages was the amount Haulers would have *received* during the two-year waiting period, the circuit court held that the correct measure of damages was the amount of *net profit* Haulers would have realized during the period. The circuit court went on to assume that Haulers would have realized a 5-percent profit margin. Applying this 5-percent profit margin to the $23 million figure to which the expert witness testified, the circuit court concluded that Haulers collectively suffered $1.2 million in damages.

County appeals the circuit court's judgment, and Haulers cross-appeal.

III. Standard of Review

HN3[] "[T]he decree or judgment of the trial court will be sustained by the appellate court **[**13]** unless there is no substantial evidence to support it, unless it is against the weight of the evidence, unless it erroneously declares the law, or unless it erroneously applies the law." *Murphy v. Carron, 536 S.W.2d 30, 32 (Mo. banc 1976)*. Issues of law, however, are reviewed *de novo. Murrell v. State, 215 S.W.3d 96, 102 (Mo. banc 2007)*.

IV. Claims on Appeal and Cross-Appeal

County presents seven claims on appeal and Haulers raise five claims on cross-appeal. These claims can be examined in three groups: threshold issues, substantive appeals from the circuit court, and damage measurements.

County raises four threshold issues, meaning that, if these claims have merit, Haulers' lawsuit should be dismissed. First, County claims *section 260.247* does not apply to its "municipal functions" because it is a charter county. County also argues that S.B. 54, which amended *section 260.247*, is invalid because it violates *article III, section 23 of the Missouri Constitution*, which requires a bill **[*824]** have a clear title and no more than one subject. County next claims that applying *section 260.247* to its waste collection program constitutes invalid retrospective application of the statute. Finally, County **[**14]** believes Haulers waived their right to complain of County's noncompliance with *section 260.247* when they participated in County's bidding process. Haulers counter that law of the case bars each of these from consideration by this Court.

Both County and Haulers appeal substantive rulings from the circuit court's ruling on County's motion to dismiss and Haulers' summary judgment motion in 2010. Haulers argue on cross-appeal that the circuit court erred in dismissing their antitrust claim because County should not receive the "state action" exemption. County claims the circuit court erred in finding County liable on the theory of implied in law contract because, specifically, Haulers failed to show County received a "benefit" from Haulers.

The remainder of both parties' claims takes issue with the circuit court's measurement of damages. County first claims that Haulers should not receive damages because Haulers had actual notice of County's intent to implement a waste collection program on December 12, 2006, and the two-year waiting period began then. County also claims that all of the evidence as to damages provided by Haulers at trial was hearsay and not reasonably reliable. On cross-appeal, **[**15]** Haulers claim that the circuit court erred in declaring the measure of damages under *section 260.247* to be profits and that entering judgment for 5 percent of the amount of gross revenue proven at trial was contrary to the law and against the weight of the evidence. Finally, Haulers argue the circuit court should have awarded Haulers prejudgment interest on their damages pursuant to *section 408.020, RSMo.*

V. Threshold Issues

Haulers argue that each of County's threshold issues are claims that were raised or should have been raised in the circuit court when County filed its motion to dismiss in 2008. As such, Haulers believe these claims constitute law of the case, and this Court should not allow County to relitigate them here. Law of the case doctrine precludes consideration of the first threshold issue: the application of *section 260.247* to County. The other threshold issues, including County's claims regarding *article III, section 23*, the retrospective application of *260.247*, and waiver and estoppel, are denied on the merits.

A. County's Claim that Section 260.247 is Inapplicable

County argues that, as a charter county, it need not comply with *section 260.247*'s notice and two-year waiting **[**16]** period requirements. County asserts that sections of its local code supersede *section 260.247* because both relate to waste management, which is a "municipal function." County believes waste management regulation is reserved to the political subdivision.

The court of appeals previously considered this argument on the merits and discussed the proper interpretation of *section 260.247* at length before rejecting County's position. The court of appeals held:

> ***HN4***[] The County is authorized to enter the business of trash collection, and even to take it out of the hands of private collectors. But enacting an ordinance which would allow the County to do so without following the notice requirement and waiting period in *section 260.247* would bring it "out of harmony with the general laws of the states" and amount to "[an] attempt to change the policy of the state as declared for the people at large. A charter county's exercise of power **[*825]** that produces this result is impermissible."

County then applied for transfer to this Court—an invitation this Court declined.

HN5[] "The doctrine of law of the case governs successive appeals involving substantially the same issues and facts, and applies appellate decisions to **[**17]** later proceedings in that case." *Williams v. Kimes, 25 S.W.3d 150, 153 (Mo. banc 2000)*. A previous holding constitutes "law of the case," precluding relitigation of issues on remand and subsequent appeal. *Id. at 154*. Generally, the decision of an appellate court is the law of the case for all points presented and decided "as well as for matters that arose prior to the first adjudication and might have been raised but were not." *Walton v. City of Berkeley, 223 S.W.3d 126, 129 (Mo. banc 2007)*.

HN6[] The doctrine of law of the case is necessary to ensure uniformity of decisions, protect the parties' expectations, and promote judicial economy. *Id*. The doctrine is "more than merely a courtesy: it is the very principle of ordered jurisdiction by which the courts administer justice." *Davis v. J.C. Nichols Co., 761 S.W.2d 735, 738 (Mo. App. 1988)*. Appellate courts do have discretion to consider an issue when there is a mistake, a manifest injustice, or an intervening change of law. *State v. Johnson, 22 S.W.3d 183, 189 (Mo. banc 2000)*. But when there is no "demonstrable error in the first decision," law of the case is "peculiarly appropriate." *State v. Phillips, 324 S.W.2d 693, 694 (Mo. 1959)*.

This **[**18]** Court declines to consider anew this issue that the parties fully litigated to a final judgment three and a half years ago. County cannot have multiple bites at the apple in attempting to determine this issue favorably. Moreover, the parties—and other Missourians—need the ability to rely on appellate court decisions. Indeed, the court of appeals decision in which these claims first were litigated has been cited as law. *See, e.g., Weber v. St. Louis County, 342 S.W.3d 318 (Mo. banc 2011)* (citing *Am. Eagle Waste Indus., 272 S.W.3d 336*). With no demonstrable error in the first appellate decision, law of the case is "peculiarly appropriate" here.

The parties had every opportunity at that time to present their strongest argument regarding County's status as a charter county and the applicability or inapplicability of *section 260.247*, and the court of appeals fully investigated the arguments and ruled on the issue. This Court holds that it is the law of the case that County was required to adhere to *section 260.247*'s requirements.

B. County's Article III, Section 23 Claims

County claims that S.B. 54 violates the requirements in *article III, section 23 of the Missouri Constitution* that a bill **[**19]** have a single subject and a clear title. ***HN7***[] *Article III, section 23* states that "[n]o bill shall contain more than one subject which shall be clearly expressed in its title." This constitutional provision limits the legislature in two distinct but related ways by creating a single subject rule and a clear title requirement. *See Jackson Cty. Sports Complex Auth. v. State, 226 S.W.3d 156, 161 (Mo. banc 2007)*. "This Court will resolve doubts in favor of the procedural and substantive validity of an act of the legislature." *Hammerschmidt v. Boone Cty., 877 S.W.2d 98, 102 (Mo. banc 1994)*. Because attacks against legislation based on constitutionally imposed procedural limitations are not favored, this Court interprets the procedural limitations of *article III, section 23* liberally and will uphold the constitutional validity of S.B. 54 "unless the act clearly and undoubtedly violates the constitutional limitation." *Id*.

S.B. 54 bore the title "[a]n act to repeal sections ... and to enact in lieu **[*826]** thereof thirty-nine new sections relating to environmental regulation, with an effective date and penalty provisions." ***HN8***[] A title is constitutionally clear when it "indicate[s] in a general way the kind **[**20]** of legislation that was being enacted." *Fust v. Atty General for the State of Mo., 947 S.W.2d 424, 428 (Mo. banc 1997)*. However, a title may not be too broad or amorphous such that it fails to identify a single subject. *St. Louis Health Care Network v. State, 968 S.W.2d 145, 147 (Mo. banc 1998)*. County contends that the title is not sufficiently clear because the title relates to environmental regulations but also includes provisions intended to protect business entities engaged in solid waste management. This Court, in *Corvera Abatement Technologies, Inc. v. Air Conservation Commission*, addressed clear title and single subject challenges to a bill relating to "environmental control." *973 S.W.2d 851 (Mo. banc 1998)*. In that case, this Court held that "environmental control" satisfies the clear title requirement because the title provided sufficient notice of a single subject of legislation in that it showed an intention to "regulate environmental resources through placing substantive standards on certain activities" and, at the same time, "ensure that the purposes of environmental control are accomplished." *Id. at 861-62*. The title showed the legislature's intent to cover "environmental **[**21]** regulation in its plain and ordinary sense." *Id. at 862*.

Consistent with this Court's holding that "environmental control" satisfies the clear title requirement, the title "environmental regulation" of S.B. 54 likewise shows the legislature's intent to protect or manage environmental resources, and it fairly includes provisions to ensure that its purposes are accomplished. *Id*. Ensuring these environmental provisions are accomplished includes regulation of the closely connected solid waste management industry. "Environmental regulation" is a sufficiently clear title for this purpose.

HN9[] A bill will not violate the single subject requirement so long as "the matter is germane, connected and congruous." *Id., citing State v. Mathews, 44 Mo. 523, 527 (1869)*. A "subject" within the meaning of *article III, section 23* "includes all matters that fall within or reasonably relate to the general core purpose of the proposed legislation." *Id*. The subject of a bill may be "clearly expressed by ... stating some broad umbrella category" when a bill has "multiple and diverse topics" within a single, overarching subject. *Jackson Cty. Sports Complex Auth., 227 S.W.3d at 161*.

The original purpose of S.B. 54, **[**22]** and its single subject, is environmental regulation. Therefore, the bill may not include matters not "germane, connected and congruous" to environmental regulation. *Hammerschmidt, 877 S.W.2d at 102*. In *Corvera Abatement Technologies*, Corvera argued that a provision relating to certification and training requirements for asbestos contractors violated this rule because it did not directly regulate the way in which a person should dispose of asbestos. *Id*. This Court rejected Corvera's argument and found that the bill appropriately "includes both substantive provisions that directly regulate environmental hazards and administrative provisions that allow for the enforcement of these and other provisions that protect the environment." *Id*.[1]

Here, County contends that S.B. 54, the purpose of which is environmental **[*827]** regulation, violates the single subject rule because the bill includes regulation **[**23]** of business interests. ***HN10***[] S.B. 54 includes substantive regulations that directly regulate environmental hazards and establishes administrative procedures to allow for the enforcement of those regulations. *See sections 256.700* (requiring a fee for surface mining), 256.710 (establishing a council to review fees), 260.211 (providing criminal penalties for improper waste disposal), and 260.247 (providing a regulatory framework for the division of contracts in solid waste disposal areas). S.B. 54 also amends *section 260.247*, which regulates the process by which a political subdivision expands or enters into solid waste collections services. Just as in *Corvera Abatement Technologies*, the provision including regulation of business interests fairly relates to and is a means of accomplishing environmental control. S.B. 54 satisfies the requirements of *article III, section 23 of the Missouri Constitution*. Accordingly, County's claim is denied on its merits.

C. County's Retrospective Application Claim

Next, County argues that Hauler's attempt to force County to comply with *section 260.247* constitutes an impermissible retrospective application of the statute. The statute became effective January 1, **[**24]** 2008, and County modified its waste collection program in 2006.

HN11[] *Article I, section 13 of the Missouri Constitution* prohibits the enactment of any law that is "retrospective in its operation." *See* Matthew D. Turner, *Retrospective Lawmaking in Missouri: Can School Districts Assert Any Constitutional Rights Against the State? Savannah R-III School District v. Public School Retirement System of Missouri*, *63 Mo. L. Rev. 833, 837 (1998)*. *Article I, section 13* does not prohibit retrospective laws merely relating to past transactions but rather prohibits laws that operate retrospectively, affecting past transactions "to the substantial prejudice of parties interested." *Fisher v. Reorganized School Dist. No. R-V of Grundy Cnty, 567 S.W.2d 647, 649 (Mo. banc 1978)*. Although County enacted its ordinance in 2006, before the statute took effect, County did not contract with the new haulers until April and June of 2008, after the statute took effect. There were no "past transactions" to which the statute applied. County's retrospective application claim is denied.

D. County's Claims of Waiver and Estoppel

County argues that Haulers waived their right to claim damages under *section 260.247* by participating **[**25]** in County's bidding process before insisting that County follow the requirements of *section 260.247*. Alternatively, County claims Haulers should be estopped from claiming damages because of the same action.

HN12[] Waiver is the "intentional relinquishment of a known right." *Richardson v. Richardson, 218 S.W.3d 426, 430 (Mo. banc 2007)*. One voluntarily proceeding under a statute or ordinance, and claiming the benefits conferred by it, may not question its validity to avoid its burdens. *St. Louis Pub. Service Co. v. City of St. Louis, 302 S.W.2d 875, 879 (Mo. banc 1957)*. Haulers had no contract with County and had no contractual rights to relinquish when

---

[1] House Bill Nos. 77, 78 and 356 amended, *inter alia*, *sections 292.602* (establishing the Missouri emergency response commission), 292.617 (requiring reports when storing explosives on property), 643.225 (establishing asbestos abatement projects), and 643.228 (requiring training courses for asbestos removers).

they sued County for failing to adhere to *section 260.247*. Further, while Haulers did submit bids to County, the bids were not accepted; as such, Haulers received no "benefit."

HN13[] The elements of estoppel are "(1) an admission, statement, or act inconsistent with the claim afterwards asserted and sued upon, (2) action by the other party on the faith of such admission, statement, or act, and (3) injury to such other **[*828]** party, resulting from allowing the first party to contradict or repudiate the admission, statement, or act." *Brown v. State Farm Mut. Auto. Ins. Co., 776 S.W.2d 384, 386-87 (Mo. banc 1989)*. **[**26]** County has not shown these elements. County did not take any action on the faith of Hauler's act of supplying bids. In addition, County was not injured by the submission of Hauler's bids. County's claims of waiver and estoppel are denied. Moreover, Haulers had every right to claim that County must comply with *section 260.247*, regardless of their action in submitting a bid.

VI. Substantive Appeals

A. Haulers' Antitrust Claim

In their first amended petition, Haulers claimed that County violated Missouri ***antitrust law*** in creating a monopoly trash district in unincorporated St. Louis County. The circuit court dismissed the claim. Haulers argue the dismissal was in error because County's failure to abide by the notice and two-year waiting period requirements in *section 260.247* means that County did not regulate waste collections pursuant to "authorized" monopoly activity and, thereby, no longer falls under the "state action" exemption to Missouri antitrust laws.

HN14[] Missouri prohibits restraint of trade by monopolization. *Section 416.031, RSMo Supp. 2010*, states that "[e]very contract, combination or conspiracy in restraint of trade or commerce in this state is unlawful." Further, "[i]t is unlawful **[**27]** to monopolize, attempt to monopolize, or conspire to monopolize trade or commerce in this state." *Sec. 416.031.2*. But "state action" is exempted if the arrangements are "expressly approved or regulated by ***any*** regulatory body or officer acting under statutory authority of this state or of the United States." *Sec. 416.041.2* (emphasis added).

HN15[] For a political subdivision to prove its actions should be exempt and assert a successful defense to an antitrust suit, it need show only that it acted pursuant to a "clearly articulated and affirmatively expressed state policy" that is "actively supervised" by the state. *L & H Sanitation, Inc. v. Lake City Sanitation, Inc., 769 F.2d 517, 520 (8th Cir. 1985)* (*citing* *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985))*. In Missouri, cities and counties are expressly authorized by statute to provide for the "collection and disposal of solid wastes," and they may contract with "any person, city, county, common sewer district, political subdivision, state agency or authority" to provide those services. *Secs. 260.215.1*; *260.215.3(1), RSMo Supp. 2010*.

Here, ***HN16***[] the Missouri legislature affirmatively expressed a policy of allowing cities and counties to **[**28]** regulate waste management through *section 260.215*. County, therefore, is a regulatory body acting under statutory authority, even if it does not comply fully with *section 260.247*. County's noncompliance does not mean its actions fall outside the state action exemption—it only means it may have violated the statute by noncompliance. Instead of arguing County violated ***antitrust law***, Haulers' claim is that County violated *section 260.247*.

B. Haulers' Claim for Breach of Implied in Law Contract

In their first amended petition following remand, Haulers alleged that, by failing to comply with *section 260.247*'s notice and two-year waiting period requirements, County breached an implied in law contract. It was on this basis the circuit court granted Haulers relief.

HN17[] "Unlike a contract implied in fact, a contract implied in law is imposed, or created, without regard to the promise of the party to be bound .... Thus, a **[*829]** contract implied in law is not actually a contract and, instead, is an obligation to do justice where no promise was ever made or intended." *Johnson v. Estate of McFarlin ex rel. Lindstrom, 334 S.W.3d 469, 474 (Mo. App. 2010)* (citations and quotations omitted). Courts sometimes use **[**29]** the term "quasi-contract" to refer to this phenomenon. *See Karpierz v. Easley, 68 S.W.3d 565, 570 (Mo. App. 2002)*. "The essential elements of quasi-contract are: (1) a benefit conferred upon the defendant by the plaintiff; (2) appreciation by the defendant of the fact of such benefit; and (3) acceptance and retention by the defendant of that benefit under circumstances in which retention without payment would be inequitable." *Pitman v. City of Columbia, 309 S.W.3d 395, 402 (Mo. App. 2010)*.

County correctly argues that Haulers cannot succeed because there was no "tangible benefit" conferred on County because of its failure to adhere to *section 260.247*. While Haulers had contracted with clients in unincorporated St. Louis County to provide waste collection services during the two-year period, Haulers never actually provided those services—County allowed another entity to provide them. Haulers did not confer a benefit on County that unjustly enriched County. If Haulers had provided the services and never received compensation from County, Haulers would have an implied in law contract claim. That did not happen here.

C. Implied Private Right of Action

While Haulers have failed to show a claim **[**30]** for implied contract, HN18[] in determining whether a pleading adequately states a claim for relief on a particular basis, "[t]he rule is well established in Missouri that the character of a cause of action is determined from the facts stated in the petition and not by the prayer or name given the action by the pleader." *State ex rel. Conaway v. Consol. Sch. Dist. No. 4 of Iron Cnty., 417 S.W.2d 657, 659 (Mo. banc 1967)*.

HN19[] "To properly plead a cause of action, the 'petition must state allegations of fact in support of each essential element of the cause pleaded.'" *Brock v. Blackwood, 143 S.W.3d 47, 57 (Mo. App. 2004)*, *quoting Duvall v. Lawrence, 86 S.W.3d 74, 80 (Mo. App. 2002)*. "It is the facts stated in the petition, along with the relief sought, which under our system of code pleading are to be looked at to determine the cause of action, rather than the form of the petition." *Memco, Inc. v. Chronister, 27 S.W.3d 871, 875 (Mo. App. 2000)*. To be deemed sufficient, a petition need not even label the theory upon which a plaintiff seeks recovery. *Empiregas, Inc. of Rolla v. Whitson, 902 S.W.2d 347, 348 (Mo. App. 1995)*.

HN20[] An appellate court is "primarily concerned with the correctness of the trial **[**31]** court's result, not the route taken by the trial court to reach that result." *Bus. Men's Assur. Co. of Am. v. Graham, 984 S.W.2d 501, 506 (Mo. banc 1999)*. A trial court judgment will be affirmed if cognizable under any theory, regardless of whether the reasons advanced by the trial court are wrong or not sufficient. *Id*. Applying these principles, this Court will look to the petition to determine whether "it invokes principles of substantive law which entitle the plaintiff to relief and informs the defendant of what the plaintiff will attempt to establish at trial." *Chronister, 27 S.W.3d at 876*, *quoting Whitson, 902 S.W.2d at 348*.[2]

[*830] Here, Haulers' basic claim is not complicated: They argue that, by failing to provide notice and abide by the two-year waiting period, County violated *section 260.247*. While Haulers did not expressly reference a claim for

---

[2] *Chronister* is particularly instructive, as the plaintiff there had prevailed at the trial court level based on a petition in which the sole count was titled "Conversion." *Memco, Inc. v. Chronister, 27 S.W.3d 871 (Mo. App. 2000)*. On appeal, the defendant argued that the judgment was based on an unavailable remedy because an action in conversion had not been pleaded or proven properly. *Id. at 873*. In affirming the trial court's judgment, the court of appeals explained that, although the plaintiff had titled his claim as one sounding in conversion, "the facts **[**32]** stated [in the petition] referred to and supported multiple causes of action," *id*., and "[t]he claims asserted in the petition [were] broad enough to state a cause of action for fraud"—the basis on which, the court of appeals found, relief actually had been granted. *Id. at 875*.

relief based on an implied right of action contained in *section 260.247*, the character of that cause of action was adequately determinable from the facts Haulers alleged in their amended petition. Haulers alleged that County violated *section 260.247* and that such violation resulted in damages to Haulers. In particular, an entire section — constituting nearly three full pages—is titled "The County's Actions Are in Violation of State Law." Specific allegations include 1) that County violated the notice provision and timing requirements contained in *section 260.247*; 2) that it acted "in contravention of ... *§260.247*;" and 3) that its actions constituted an "illegal course." Indeed, County was aware **[**33]** that Haulers were asserting a violation of *section 260.247* because it argued the statute did not apply to its actions. Haulers' claim for relief was sufficiently broad to encompass relief based on an implied private right of action for violation of this statute, for they requested "damages in excess of $25,000 plus attorneys' fees, and ... such other and further relief as this Court deems just and proper."

For these reasons, it is proper to treat Haulers' claims as asserting a private right of action for violation of a statute. That raises the legal question of whether a private right of action is created in favor of Haulers under the statute.

HN21[] By its plain terms, *section 260.247* does not provide an express remedy for its violation. Nevertheless, "[w]hen a legislative provision protects a class of persons by the requirement or proscription of certain conduct but does not provide a civil remedy for the violation, *the court may, if it determines that the remedy is appropriate to further the purpose and ensure the effectiveness of the enactment*, accord to an injured member of the class a right of action." *Jensen v. Feely, 691 S.W.2d 926, 928 (Mo. App. 1985)* (emphasis in original). If it **[**34]** clearly appears "to have been the legislative intent," courts will find implied private causes of action in such cases. *Christy v. Petrus, 365 Mo. 1187, 295 S.W.2d 122, 126 (Mo. banc 1956)*.

This Court has stated, however, that ***HN22***[] "[a] private remedy will not be implied when it does not promote or accomplish the primary goals of the statute." *Shqeir v. Equifax, Inc., 636 S.W.2d 944, 948 (Mo. banc 1982)*. Moreover, courts often have been reticent to recognize private causes of action where the legislature has established remedies via other means of enforcing statutory obligations. *See, e.g., id*. (declining to recognize a private right of action where a statute authorized a state official to impose a penalty on an insurer and to suspend or revoke the insurer's license on the insurer's willful violation of the statute).

This Court previously has found ***HN23***[] the purpose of *section 260.247* is "to provide an *entity* engaged in waste collecting sufficient notice to make necessary business adjustments prior to having its services terminated in a given area." *Weber v. St. Louis County, 342 S.W.3d 318, 323 (Mo. banc 2011)* (emphasis added). Subsection 3, specifically, shows the legislature's intent to protect the business **[**35]** entities already **[*831]** providing trash collection services. *Section 260.247.3* guarantees that previous haulers receive the same amount for which they contracted for two years following a political subdivision's decision to provide services.

The reasons for these protections are obvious. County could easily decide to provide waste collection services in unincorporated parts of the county. Then it might agree to hire Haulers for the two-year waiting period but only if they accept a lower contract price. In that situation, Haulers face the risk of losing business or being forced to renegotiate their contract unexpectedly. Subsection 3 also provides Haulers the opportunity to wind up business in the two-year waiting period if they are not chosen to provide services.

Although the facts here are not those specifically contemplated by the statute, they are simply more extreme. Instead of attempting to renegotiate Haulers' contract for the same services at a lower price and lowering Haulers' expected profits, County has cut Haulers out completely. Haulers received nothing instead of a forced lower contract price.

Moreover, the clear implication of *section 260.247* is that the legislature intended a **[**36]** right to damages in this situation. The legislature intended for Haulers to provide service and receive their contract price for two years following notice. *See secs. 260.247.1 - 260.247.3*. County cannot bypass the requirements of *section 260.247.3* by refusing to hire Haulers completely. The legislature's intention to protect Haulers' contracts for two years following County's notice is clear. Haulers have demonstrated that recognizing an implied private right of action in *section 260.247* promotes the primary goal of the statute and is, therefore, clearly consistent with legislative intent.

Recognizing an implied private remedy for violations of the statute's notice provision or its timing requirements naturally serves to advance that goal. Moreover, unlike other cases in which this Court has declined to recognize an implied cause of action,[3] section 260.247 provides no other enforcement mechanism whereby Haulers' rights can be protected.[4] Under the particular circumstances of this case, Haulers have demonstrated that section 260.247 permits them to pursue a civil remedy against County for County's violation of the statute.

In sum, while the circuit court took an incorrect route in finding County liable through implied in law contract, the court still reached the correct result in finding County liable. Judgment as to liability is affirmed.

VII. Damage Measurement

The only remaining issues before the Court, raised **[**38]** by either party, are how the circuit court ought to have calculated Haulers' damages. The circuit court, in its **[*832]** hearing on damages, excluded evidence of Haulers' expenses or net profit, allowing only evidence of their gross revenue for a two-year period starting April 8, 2008. In its final judgment, the circuit court awarded Haulers 5 percent of their gross revenue for that two-year period.

County claims the circuit court judgment was in error because Haulers are not entitled to any damages as Haulers have no rights under the statute. County also complains that the circuit court chose the wrong date to start the running of damages for the two-year waiting period. Haulers claim on cross-appeal that the circuit court erroneously found damages to be limited to profits instead of awarding total gross revenue lost. Haulers also claim they are entitled to prejudgment interest. To address these claims, this Court first must determine Haulers' rights and obligations under section 260.247.

A. Haulers' Rights under Section 260.247

HN24[] When interpreting statutory law, the court must ascertain the intent of the legislature and give effect to that intent if possible. *Greenlee v. Dukes Plastering Serv., 75 S.W.3d 273, 276 (Mo. banc 2002)*. **[**39]** The intent of the legislature may be determined by considering the "plain and ordinary meaning" of the terms. *Id*. "The construction of statutes is not to be hyper-technical, but instead is to be reasonable and logical and to give meaning to the statutes." *Lewis v. Gibbons, 80 S.W.3d 461, 465 (Mo. banc 2002)*.

Section 260.247, as amended, plainly states that Haulers were entitled to notice, by certified mail, of County's intent to provide waste collection services in the county. Sec. 260.247.1. Equally clear is County's prohibition on commencing waste collection in the area for two years, unless it hired Haulers. Sec. 260.247.2. Subsection 3 sets forth further requirements of County and evidences the legislatures' intent in passing and amending this statute:

> ***HN25***[] If the services to be provided under a contract with the city or political subdivision pursuant to subsection 2 of this section are substantially the same as the services rendered in the area prior to the decision of the city to annex the area or to enter into or expand its solid waste collection services into the area, ***the***

---

[3] *See Johnson v. Kraft Gen. Foods, Inc., 885 S.W.2d 334 (Mo. banc 1994)*; **[**37]** *R.L. Nichols Ins., Inc. v. Home Ins. Co., 865 S.W.2d 665 (Mo. banc 1993)*; *Shqeir at 948*.

[4] Section 260.249 purports to provide for administrative penalties when section 260.247 is violated, but it does not apply in this situation. *See* sec. 260.249 (stating that when the director of natural resources determines a provision of sections 260.200 to 260.281 has been violated, he may assess an administrative penalty on the violator). First, the rules used for assessing the penalty clearly contemplate that a violation would cause endangerment to either human health or the environment, whereas here, County's violation only caused harm to a business entity. See 10 CSR 80-2.040(3). Additionally, any penalty assessed "shall be paid to the county in which the violation(s) occurred." 10 CSR 80-2.040(4). County has violated the statute in this situation. It makes no sense for County to pay a penalty to itself.

> ***amount paid by the city shall be at least equal to the amount the private entity or entities would have received* [**40]** for providing such services during that period.

(emphasis added). In other words, if County chose to contract with Haulers during the two-year waiting period, County cannot contract with Haulers for a lower price than they otherwise would have received in that two-year time frame.

Reading all three subsections together, Haulers were *entitled* to continue providing waste collection services for two years. County either could have allowed Haulers to provide services *directly* to clients for that period or could have contracted with Haulers to provide the same services *through* the County for that period—but only if County's contract with Haulers was for the same amount.

Haulers have the right to seek damages from County for the violation of *section 260.247*. To give effect to the legislature's intent and provide the same recovery intended by subsection 3, County must pay Haulers that to which they were entitled: the amount they "would have received" under their contract during the two-year waiting period. *Sec. 260.247.3*. Determining this amount requires this Court to interpret the phrase "would have received."

[*833] *B. Haulers' Amount of Damages*

HN26[] "[F]or every actionable injury there is a corresponding **[**41]** right to damages, and such injury arises whenever a legal right of plaintiff is violated." *Rusk Farms, Inc. v. Ralston Purina Co., 689 S.W.2d 671, 681 (Mo. App. 1985)* (*citing* *Wente v. Shaver, 350 Mo. 1143, 169 S.W.2d 947 (Mo. 1943))*. Because Haulers had a right under *section 260.247* to continue to provide services for two years, and County violated that right, Haulers have a right to damages.

Under *subsection 3 of 260.247*, Haulers, during the two-year waiting period, would have been able to collect "the amount [they] *would have received* for providing such services during that period." *Sec. 260.247.3* (emphasis added). The amount Haulers "would have received" for that two-year waiting period was their contract price for their services. However, Haulers would have been providing the service of trash collection at the time, so they would have had every normal operating expense and business cost during the two-year time period.

In sum, ***HN27***[] the amount to which *section 260.247* entitles Haulers is their projected receipts from their contract price, minus any business and operational costs Haulers would have incurred while providing waste collection services, considering all the circumstances. In other words, **[**42]** the circuit court correctly concluded that Haulers' damages are what would have been their *net profit* during the two-year waiting period.[5] This is in accordance with other damage determinations under Missouri law. *See* *Ameristar Jet Charter, Inc. v. Dodson Int'l Parts, Inc., 155 S.W.3d 50, 55 (Mo. 2005)* ("In general, in calculating lost profits damages, lost revenue is estimated, and overhead expenses tied to the production of that income are deducted from the estimated lost revenue.").

However, the circuit court was incorrect to exclude discovery or evidence of Haulers' expenses or net profit. ***HN28***[] When the measure of damages is net profit, the basis for determining the expected profit should be reasonably certain. "In evaluating the sufficiency of evidence to sustain awards of damages for loss of business profits the appellate courts of this state have made stringent requirements, refusing to permit speculation as to probable or expected profits, and requiring a substantial basis for such awards." *Id. at 54*.

On remand, both parties are allowed to discover, present evidence, and cross-examine regarding these **[**43]** subjects. The measure of damages is the net profit the Haulers' would have realized during the two-year period, considering all the circumstances. Because the parties must present further evidence regarding this issue, the able circuit court can rule on the other evidentiary issues as they arise.

---

[5] *See* section VII.C, below, for a discussion of the date the two-year period began.

C. When Damages Began to Accrue under Section 260.247

HN29[] Pursuant to *section 260.247*, a private entity is entitled to provide services during the two-year waiting period after a political subdivision decides to expand into an area and provide trash collection services. That period begins to run "from the effective date of the notice" by certified mail. *Sec. 260.247.2*. If the political subdivision fails to give the required notice, then the two-year period, by default, begins "at least two years from the effective date of the annexation." *Id*.

The circuit court found that the two-year period began on the dates County awarded contracts to companies to provide waste collection services in the newly created **[*834]** trash collection districts: April 8, 2008, for district 3, and June 10 and 17, 2008, for the other districts. The court reasoned that, in the absence of notice by certified mail as required by *section 260.247*, **[**44]** the two-year clock started running on these dates because County "signed binding contracts with the new haulers" and, thus, "County's *intent* [became] absolute" then (emphasis added).

County asserts that this was in error and, instead, that Haulers' dates of "actual notice" were either December 12, 2006, the day County adopted Ordinance No. 23,023, which Haulers learned of the day it was adopted, or January 7, 2007, the date County mailed a letter to the Haulers apprising them that the waste management code had been amended. County argues that under these dates, it is not liable for damages after either December 12, 2008, or January 7, 2009, when the two-year period expired.

HN30[] The purpose of *section 260.247*'s notice requirement is different from that of most other notice requirements. Usually, the purpose of a notice requirement is to apprise the recipient that there is a legal action pending and to ensure that the recipient knows when and where the recipient can be heard regarding the matter—in other words, to effectuate due process. Here "[t]he purpose of *section 260.247* is to provide an entity engaged in waste collecting sufficient notice to make necessary business adjustments prior **[**45]** to having its services terminated in a given area." *Weber, 342 S.W.3d at 323*. *Section 260.247* guarantees private businesses nothing less than an *unequivocal statement* that a political subdivision intends to seize the businesses' client bases and at least two years following that unequivocal statement to wind down its operations.

County never gave the certified notice required by *section 260.247.1* to begin trash collection and did not wait the two-year period to begin trash collection or hire Haulers to continue trash collection. To give effect to the legislature's intention that the two-year waiting period begins running when County gives official notice, Hauler's damages must have started accruing when County provided an *unequivocal statement* that Haulers no longer would be providing trash collection service similar to that provided by certified notice. *See Greenlee, 75 S.W.3d at 276*. This statement could not have occurred on the dates that County proposes, as noted by the circuit court, because County retained the discretion to abandon its program without consequence at that time. The same is true for the dates County held pre-bid meetings and opened the bidding process. County could **[**46]** still retreat from its program or it could comply with the statute and hire Haulers to provide service for two years on those dates. Those actions did not provide an unequivocal statement to Haulers that County was seizing their client bases.

However, when County signed contracts with new haulers to provide trash collection in the new districts, Haulers had an unequivocal statement that County did not intend to comply with the statute. By signing these binding contracts with new haulers on April 8, 2008, for district 3, and June 10 and 17, 2008, for the remaining districts, County manifested its intent to displace Haulers. The circuit court's judgment as to the date the two-year notice period for determining Haulers' damages began to run is affirmed. On remand, Haulers may present evidence of their expected revenue, set off by expenses, costs, and other circumstances, for a two-year period beginning April 8, 2008, for district 3, and June 10 and 17, 2008, for the other districts.

[*835] ***D. Haulers Prejudgment Interest Claim***

Finally, Haulers claim that *section 408.020* provides them the right to collect prejudgment interest. ***HN31***[] *Section 408.020* provides that creditors should recover prejudgment interest **[**47]** at the rate of 9 percent 1) "for all moneys after they become due and payable, on written contracts," 2) "and on accounts after they become due and demand of payment is made," 3) "for money recovered for the use of another, and retained without the owner's knowledge of the receipt," 4) "and for all other money due or to become due for the forbearance of payment whereof an express promise to pay interest has been made." Prejudgment interest is awarded when the amount due is liquidated or "readily ascertainable by reference to recognized standards." *St. John's Bank & Trust Co. v. Intag, Inc., 938 S.W.2d 627, 630 (Mo. App. 1997)*. Prejudgment interest is not awarded in cases in which the measure of damages is not clear. *Fohn v. Title Ins. Corp., 529 S.W.2d 1, 5 (Mo. banc 1975)*. Because the measure of damages was disputed and uncertain, *section 408.020* is not applicable. The circuit court's judgment regarding prejudgment interest is affirmed.

VIII. Conclusion

The circuit court's judgment as to the calculation of Haulers' damages is reversed. In all other respects, the judgment is affirmed. The case is remanded.

All concur.

Qsgi, Inc. v. IBM Global Fin.

United States District Court for the Southern District of Florida, West Palm Beach Division

July 31, 2012, Decided; July 31, 2012, Entered on Docket

Case No.: 11-CV-80880-RYSKAMP

Judges: KENNETH L. RYSKAMP, UNITED STATES DISTRICT JUDGE.

Opinion by: KENNETH L. RYSKAMP

Opinion

ORDER GRANTING DEFENDANTS' MOTION TO DISMISS WITH PREJUDICE

THIS CAUSE comes **[*2]** before the Court pursuant to Defendants International Business Machines Corporation ("IBM") and IBM Global Financing ("IGF")'s (collectively, "Defendants") motion to dismiss the second amended complaint, filed April 16, 2012 **[DE 54]**. Plaintiff QSGI, Inc. ("QSGI," or "Plaintiff") responded on May 11, 2012 **[DE 78]**. Defendants replied on May 21, 2012 **[DE 84]**. This motion is ripe for adjudication.

I. Background

QSGI was engaged in the "business of purchasing, selling and servicing used IBM mainframe computers" throughout the United States, and alleges that purchasers of these mainframe computers must "modify the large and complex mainframes to fit their needs so that they do not overpay for the licensing of the operating system." (2d Am. Compl. ¶¶ 3, 9). QSGI's business model was dependent on modifying and selling the used IBM mainframe computers to fit the computing requirements of the end-user purchaser, such that the purchaser would not have to pay the additional licensing costs that are calculated as a function of the Millions of Instructions Per Second ("MIPS") capacity. (*Id.* ¶¶ 9, 40-42). QSGI alleges that used mainframe computers "are only economically viable to the purchaser provided **[*3]** that they can be modified upon purchase to fit the needs of the new purchaser to avoid overpaying" for the monthly expenses of licensing the operating systems for the "unnecessary MIPS." *Id.* In order to modify and remarket the used mainframe computers, QSGI (and other companies in the product market) require IBM's proprietary micro-code, which QSGI alleges is central to IBM's monopoly power in this market. (*Id.* ¶ 30). QSGI identifies third parties in the used mainframe market that were allegedly adversely affected by the Defendants' activity. (*Id.* ¶ 35).

QSGI alleges that, in or around the summer of 2007, IBM adopted a policy whereby it prohibited the modification of any recently purchased used IBM mainframe computer's MIPS capacity for a period of six months (the "six-month rule"). (2d Am. Compl. ¶ 31). Further, it is alleged that the six-month rule adversely affected QSGI and other companies in the used mainframe computer market. (*Id.* ¶¶ 31-36). QSGI argues that the six-month rule, in effect, did not apply to IGF, as IGF mainframe computers could still be modified by IBM technicians with access to parts and proprietary micro-code prior to shipping the product. (*Id.*) Thus, QSGI asserts **[*4]** that, as a result of the six-month rule, IBM's policy unfairly disadvantaged QSGI and other companies in the used mainframe computer market, because it made their services no longer economically viable, while also effectively granting an exemption to IGF based on their access to proprietary IBM products. (*Id.* ¶¶ 34, 39-42).

QSGI's Second Amended Complaint asserts that IBM's dominance in the new and used IBM mainframe computer product market in the United States, combined with the alleged anticompetitive behavior, the six-month rule, is indicative of attempted monopolization. QSGI alleges that IBM has "directly injured QSGI and every company that is involved in the purchase, service, and sale of used IBM mainframes." (*Id.* ¶ 34). QSGI asserts a violation of the Florida Antitrust Act of 1980, *Fla. Stat. § 542.15, et seq.*, and repackages the same claim as a violation of the Florida Deceptive and Unfair Trade Practices Act ("FDUPTA"), *Fla. Stat § 501.201, et seq.* Defendants move for dismissal with prejudice of both claims.

II. Legal Standard

To state a claim for relief, *Federal Rule of Civil Procedure 8(a)(2)* requires only "a short and plain statement of the claim showing that the pleader is entitled to relief." Although the court takes plaintiff's allegations as true, "conclusory allegations, **[*5]** unwarranted factual deductions or legal conclusions masquerading as facts will not prevent dismissal." *Davila v. Delta Air Lines, Inc., 326 F.3d 1183, 1185 (11th Cir. 2003)* (citing *South Florida Water Mgm't Dist. v. Montalvo, 84 F.3d 402, 406 (11th Cir. 1996))*. Further, "a court's duty to liberally construe a plaintiff's complaint in the face of a motion to dismiss is not the equivalent of a duty to re-write it for [him]." *Peterson v. Atlanta Hous. Auth., 998 F.2d 904, 912 (11th Cir. 1993)*.

In order to survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S.Ct. 1937, 1949, 173 L. Ed. 2d 868* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S.Ct. 1955, 1974, 167 L. Ed. 2d 929 (2007))*. A claim will be deemed plausible for the purposes of surviving the motion when "the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* Although extensive detailed factual allegations are not required, "a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do . . . ." *Twombly, 550 U.S. at 555* (alteration in original) (internal quotation marks omitted) (citations omitted). Moreover, the inclusion of plausible factual allegations must exceed a threshold such that the "allegations must be enough to raise a right to relief **[*6]** above the speculative level . . . ." *Id.*

III. Discussion

A. QSGI's Allegations of Antitrust Injury are Insufficient, and Therefore QSGI Lacks Antitrust Standing.

When interpreting the Florida Antitrust Act, this Court must rely on the body of federal case law interpreting the Sherman Act and the federal common law requirements for antitrust standing. *See* *Vitacost.com, Inc. v. Gaia Herbs, Inc., No. 06-81141-CIV, 2007 U.S. Dist. LEXIS 6393, 2007 WL 286262, at *1-2 (S.D. Fla. Jan. 26, 2007)*; *see also* *All Care Nursing Serv. v. High Tech Staffing Servs., 135 F.3d 740, 746 (11th Cir.1998)* ("Federal and Florida antitrust laws are analyzed under the same rules and case law."); *Fla. Stat. § 542.32* ("It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes."); *St. Petersburg Yacht Charters, Inc. v. Morgan Yacht, Inc., 457 So.2d 1028, 1032 (Fla. Dist. Ct. App.1984)* ("The Florida legislature has, in effect, adopted as the law of Florida the body of ***antitrust law*** developed by the federal courts under the Sherman Act."). Thus, analysis of the law under the Sherman Act and federal common law standing doctrine is also applicable to QSGI's state law antitrust claim.

The Eleventh Circuit applies a two-pronged approach in establishing whether a plaintiff has antitrust standing. *See* *Florida Seed Co., Inc. v. Monsanto Co., 105 F.3d 1372, 1374 (11th Cir. 1991)*. First, in order to maintain an antitrust action, a plaintiff **[*7]** must prove an "antitrust injury," which is a showing greater than a mere injury linked to a violation of the antitrust laws. *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1449 (11th Cir. 1991)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S.Ct. 690, 697, 50 L. Ed. 2d 701 (1977))*. Antitrust injury is defined as:

> injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations . . . would be likely to cause.

Id. (internal citations and quotations omitted). The plaintiff must prove that there is a public harm that coincides with the antitrust plaintiff's private harm. *Todorov, 921 F.2d at 1449-50*. Thus, if the injury suffered is "inextricably intertwined with the injury that the conspirators [seek] to inflict" or "flows from that which makes defendants' acts unlawful" in the relevant antitrust market, such injury "falls squarely within the area of congressional concern." *Blue Shield of Virginia v. McCready, 457 U.S. 465, 491, 102 S.Ct. 2540, 2555, 73 L. Ed. 2d 149 (1982)*; *Brunswick, 429 U.S. at 489, 97 S.Ct. at 697*.

The second prong of the antitrust standing inquiry is whether the plaintiff is an efficient enforcer of the antitrust laws. *Mun. Utilities Bd. of Albertville v. Alabama Power Co., 934 F.2d 1493, 1499 (11th Cir. 1991)* (citing *Cargill, Inc. v. Monfort, 479 U.S. 104, 110 n.5, 107 S.Ct. 484, 489 n.5, 93 L. Ed. 2d 427 (1986))*. The Eleventh Circuit continues to apply the "target area test." *Monsanto Co., 105 F.3d at 1374* (citing *Austin v. Blue Cross & Blue Shield of Ala., 903 F.2d 1385, 1388 (11th Cir.1990))*; *but see* *Todorov, 921 F.2d at 1450-51, n.19* (noting **[*8]** that "[t]he Supreme Court[1] specifically rejected the 'target area' test that had previously been used in this circuit"). The target area test

[1] The Supreme Court, in *Associated Gen. Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, and subsequently in *Cargill, 479 U.S. 104, 107 S.Ct. 484, 93 L. Ed. 2d 427*, declined to apply this test, reasoning that it may lead to contradictory and inconsistent results. Instead, the Court identified "other factors in addition to antitrust injury" to determine whether a particular plaintiff was an efficient enforcer of the antitrust laws. *Cargill, 479 U.S. at 111 n.6, 107 S.Ct. at 490 n.6*.

requires that the plaintiff establish that "he is within that sector of the economy endangered by a breakdown of competitive conditions in a particular industry," and that he is "the target against which anticompetitive activity is directed." *Id.* (quoting *National Indep. Theatre Exhibitors, Inc. v. Buena Vista Distribution Co., 748 F.2d 602, 608 (11th Cir. 1984)*, *cert denied sub nom., Patterson v. Buena Vista Distribution Co., 474 U.S. 1013, 106 S.Ct. 544, 88 L. Ed. 2d 473 (1985))*. That is, the test demands that the antitrust plaintiff is among the competitors in the relevant antitrust market against whom defendant's alleged violation is directed. *See Amey, Inc. v. Gulf Abstract & Title, Inc., 758 F.2d 1486, 1493 (11th Cir. 1985)*. Because the instant case turns on a lack of antitrust injury, the second prong of establishing antitrust standing is unnecessary.

Where an antitrust plaintiff merely alleges harm to an individual competitor, not harm to competition generally, antitrust injury has not been established and dismissal is warranted. *See Spanish Broad. Sys. Of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1069 (11th Cir. 2004)*. Absent factual allegations of antitrust injury, an antitrust claim will fail under the pleading standards prescribed by *Twombly* and *Iqbal. See Iqbal, 556 U.S. at 678-79, 129 S.Ct. at 1949*; *Twombly, 550 U.S. at 555, 127 S.Ct. at 1965*. Without factual allegations, not merely conclusory ones, there cannot be a plausible claim to relief on an antitrust claim that could withstand **[*9]** dismissal. *See, e.g., NicSand, Inc. v. 3M Co., 507 F.3d 442, 451 (6th Cir. 2007)* ("[A] 'naked assertion' of antitrust injury, the Supreme Court has made clear, is not enough; an antitrust claimant must put forth factual 'allegations plausibly suggesting (not merely consistent with)' antitrust injury." (quoting *Twombly, 550 U.S. at 557, 127 S.Ct. at 1959*)).

The alleged antitrust violation at issue here is IBM's monopolization or attempted monopolization of the alleged used IBM mainframe computer market. In order for QSGI to establish a proper claim, QSGI must assert that IBM willfully acquired or maintained market power in the relevant market.[2] QSGI must establish sufficient antitrust injury, that is, that the injury flowed from IBM's willful acquisition or maintenance of monopoly power in the relevant market. Although QSGI has pleaded harm to itself, it has failed to plead harm to competition. QSGI's wholly conculsory and inconsistent allegations related to competitive harm in the relevant product and geographic market does not raise QSGI's "right to relief above the speculative level." *Twombly, 550 U.S. at 555, 127 S.Ct. at 1965*.

QSGI alleges that the six-month rule has resulted in the bankruptcy of QSGI and harmed other businesses in the used mainframe computer market. Further, QSGI alleges that "[a]t all **[*10]** times material hereto IBM and IGF had monopoly power . . . demonstrated by its 90% market share" and IBM currently "commands approximately 90 percent of the market." (2d Am. Compl. ¶¶ 75, 29.) These allegations suggest that there has not been an increase in Defendants' market share and thus are not indicative of attempted monopolization. Moreover, QSGI, in a wholly conclusory fashion, alleges that IBM and IGF have "increased their market share of used IBM mainframes to approximately 100%." (*Id.* at ¶ 83). There are several issues with this allegation. First, this allegation is inconsistent with the preceding allegation that IBM had a 90% market share "at all times material hereto." (*Id.* at ¶ 75). Second, this also is an inconsistent allegation when considering that other competitors are still operating in the relevant product market. (*Id.* at ¶ 35). This Court "need not accept facts that are internally inconsistent, facts that run counter to facts which the court may take judicial notice of, conclusory allegations, unwarranted deductions, or mere legal conclusions." *U.S., ex rel. Carroll v. JFK Med. Ctr., No. 01-8158-CIV, 2002 U.S. Dist. LEXIS 28169, 2002 WL 31941007, at *2 (S.D. Fla. Nov. 15, 2002)*; *Campos v. Immigration and Naturalization Service, 32 F.Supp.2d 1337, 1343 (S.D.Fla.1998)*.

QSGI has also not sufficiently pleaded cognizable harm to competition **[*11]** based on its allegations pertaining to harm against competitors in the used IBM mainframe computer market. Although QSGI asserts that other competitors in the used IBM mainframe computer market were "adversely effected [sic] by the sixth-month [sic] rule in a manner similar to QSGI," this conclusory allegation is not rooted in fact and is at odds with some of the allegations in QSGI's Second Amended Complaint. (2d Am. Compl. ¶ 35). QSGI lists eight competitors, all of which are still in business,[3] and QSGI does not assert that any of these companies have lost market share as a result of

[2] Although not alleged in QSGI's Second Amended Complaint, this in effect is an alleged *15 U.S.C. § 2* violation.

[3] *See* (DE 54, p.13) (listing the eight competitors' websites that are still operating in the used IBM mainframe computer market).

the six-month rule. It is possible that some of the non-IBM competitors absorbed QSGI's market share upon its dissolution, which cannot be considered harm to competition. *See George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 140 (2d Cir. 1998)* (affirming dismissal for lack of antitrust standing where "plaintiff has failed to plead its own market share" or the "market share purportedly absorbed by" the defendant's alleged coconspirator). QSGI's pleading largely alleges injury only to itself and does not allege antitrust injury. *Todorov, 921 F.2d at 1449*.

Finally, QSGI has not alleged perceivable harm to customers as a result of IBM's six-month rule with sufficient particularity. Although QSGI **[*12]** alleges that certain customers would have been able to purchase used IBM mainframe computers at a QSGI-quoted price "but for the enactment of the six-month rule," the naked assertions that attempt to buttress the claim are unsupported and conclusory. (2d Am. Compl. ¶¶ 50-60). QSGI solely alleges that the end-user purchaser can no longer purchase used IBM mainframe computers for a "significantly lower amount from QSGI" and must now purchase the products from IBM and IGF at supra-competitive prices. (*Id.* at ¶¶ 59-62). QSGI fails to allege why the customers did not buy these products from QSGI or what the customers ultimately ended up doing. QSGI's allegations are quite vague and unclear as to whether the customers purchased used IBM mainframe computers from IBM, IGF or one of the other used IBM mainframe competitors still in the market, whether they paid a higher price, whether it included related services, maintenance, or software, or whether they elected not to purchase a used IBM mainframe computer from *any* supplier. Moreover, as Defendants correctly assert, even if some customers bought used mainframe computers from IBM or IGF, such does not necessarily indicate that the customers **[*13]** paid supra-competitive prices. Because these products are quite specialized and tailored to the needs of the end-user purchaser, it is expected that they would be priced differently than that quoted by QSGI, and that the expenditure of a larger amount may also include a more powerful computer, or a more extensive maintenance plan. (*Id.* at ¶¶ 9-10).

QSGI fails to allege the necessary harms to competition and actual anticompetitive effects. QSGI's conclusory allegations largely assert its own injury, that is "bankruptcy, damages and resulting lack of competition," and attempt to construct an antitrust claim out of the ruins of its failed business model. (Opp. at ¶ 10). Thus, QSGI's conclusory allegations are "not entitled to be assumed true" under the post-*Twombly* pleading requirements, and QSGI's assertions are insufficient to establish antitrust injury. *See Todorov, 921 F.2d at 1449*; *Spanish Broad. Sys. Of Fla., Inc., 376 F.3d 1065, 1069*. Because QSGI has failed to plead changes in IBM's market share with particularity, and has made insufficient allegations of harm to both competition and consumers, QSGI's antitrust claim is dismissed with prejudice.[4] *See, e.g., Mantz v. TRS Recovery Servs., No. 11-80580-CIV, 2011 U.S. Dist. LEXIS 129332, 2011 WL 5515303 (S.D. Fla. Nov. 8, 2011)* (dismissing complaint with prejudice after single opportunity **[*14]** to amend where permitting an additional opportunity to amend would be futile).

B. QSGI Fails to State a valid FDUTPA Claim.

FDUTPA provides that "unfair methods of competition, unconscionable acts or practices, and unfair or deceptive acts or practices in the conduct of any trade or commerce" are unlawful. *Fla. Stat. § 501.204*. In order to state a claim under the FDUTPA, plaintiff must establish three elements "(1) a deceptive or unfair practice, (2) causation, and (3) actual damages." *Siever v. BWGaskets, Inc., 669 F.Supp.2d 1286, 1292 (M.D. Fla. 2009)*. Deception occurs "if there is a representation, omission, or practice that is likely to mislead the consumer acting reasonably in the circumstances, to the consumer's detriment," which requires "a showing of probable, not possible, deception that is likely to cause injury to a reasonable relying consumer." *Silver v. Countrywide Home Loans, Inc., No. 11-12282, 483 Fed. Appx. 568, 2012 WL 2052949 (11th Cir. June 8, 2012)* (quoting *Zlotnick v. Premier Sales Grp., Inc., 480 F.3d 1281, 1284 (11th Cir.2007))*. When a plaintiff's FDUTPA claim is based on the same allegations as its antitrust claim, failure to establish a violation of the ***antitrust law*** is sufficient to conclude that the plaintiff has also

[4] Although QSGI alleges antitrust injury based on IBM's six-month rule beginning in 2007, QSGI made no effort to preserve relevant documents in anticipation of a potential lawsuit. QSGI has admitted to the destruction of documents in a storage facility in Minnesota in 2009, and now QSGI has essentially no documentation or information to establish a basis for a proper antitrust claim. *See* (Plaintiff's Response to IBM's Motion to Compel Compliance with March 16, 2012 Order and For Sanctions for Noncompliance (May 7, 2012, ECF No. 70)).

failed to state a FDUTPA claim. *See* *JES Props. Inc. v. USA Equestrian, Inc., No. 802CV1585T24MAP, 2005 U.S. Dist. LEXIS 43122, 2005 WL 1126665, at *19 (M.D. Fla. May 9, 2005)*.

QSGI's FDUTPA allegations are a repackaging of its monopolization claims, based on its assertion that by "enact[ing] **[*15]** the six-month rule" IBM "engaged in an unfair and deceptive act." (2d Am. Compl. ¶ 65). This allegation is embedded within QSGI's primary antitrust claim, in the assertion that IBM used its "monopoly power to enact the six-month rule." (*Id.*) In QSGI's Response to IBM's Motion to Dismiss, QSGI asserts that the FDUTPA claim is "dependent upon a finding that [Defendants] unfairly monopolized the market for used IBM mainframes." (DE 78, ¶11). Since this Court has found no violation of the Florida Antitrust Act, and QSGI's FDUTPA claim is based on the same allegations as the antitrust claim, this Court finds that QSGI has also failed to state a FDUTPA claim.

QSGI's FDUTPA claim also fails because QSGI fails to plead actual damages. Actual damages are measured by "the difference in the market value of the product or service in the condition in which it was delivered according to the contract of the parties," except where the product is rendered valueless due to defect, whereby the purchase price becomes "the appropriate measure of damages." *Jovine v. Abbott Laboratories, Inc., 795 F.Supp.2d 1331, 1344 (S.D. Fla. 2011)* (quoting *Rollins, Inc. v. Heller, 454 So.2d 580, 585 (Fla. Dist. Ct. App. 1984))*. Under FDUTPA, actual damages do not include consequential damages. *See* *Eclipse Med., Inc. v. Am. Hydro-Surgical Instruments, Inc., 262 F.Supp.2d 1334, 1357 (S.D. Fla. 1999)* (citing *Nyquist v. Randall, 819 F.2d 1014, 1017 (11th Cir. 1987))*.

QSGI alleges that it suffered actual damages when its entire **[*16]** inventory of used IBM mainframes, valued at $4,000,000.00, was rendered "effectively worthless" and its $10,000,000.00 investment in Qualtech was sold for $3,000,000.00 as a result of the six-month rule. (2d Am. Compl. ¶ 72). QSGI has neither alleged any delivery of used mainframe computers by IBM pursuant to a contract nor asserted any other allegations that establish actual damages. QSGI could not have been deceived by IBM in its acquisition of used mainframes, as QSGI acquired used mainframes from other sources in the open market. (*Id.* ¶ ¶ 30, 34). Thus, QSGI's alleged damages are not actual damages compensable under the FDUTPA, and therefore this claim is dismissed.

IV. Conclusion

THE COURT, being fully advised and having considered the pertinent portions of the record, hereby

ORDERS AND ADJUDGES that Defendants' Motion To Dismiss With Prejudice, filed April 16, 2012 **[DE 54]**, is GRANTED WITH PREJUDICE, as explained herein. The Clerk of Court shall CLOSE this case and deny any pending motions as moot.

DONE AND ORDERED at Chambers in West Palm Beach, Florida, this 31 day of July, 2012.

/s/ Kenneth L. Ryskamp

Opinion

[*612] OPINION AND ORDER

Plaintiff cement manufacturers seek declaratory relief and damages from defendant insurers' refusal to defend them against two antitrust suits prosecuted in the U.S. District Court for the Southern District of Florida, which alleged that plaintiffs fixed prices, **[**2]** allocated customers, restricted supply, and concealed their conspiracy in violation of the Sherman Act, Clayton Act, and the Florida Deceptive and Unfair Trade Practices Act. Defendants' and plaintiffs' cross-motions for summary judgment raise the dispositive question whether clauses covering liability for inflicting "personal and advertising injury" required the insurers to defend the manufacturers against allegations that to conceal their antitrust conspiracy they publicly misstated that market forces, rather than anticompetitive conduct, drove them to increase their prices.

BACKGROUND

In the fall of 2009, direct purchasers and indirect purchasers of cement and concrete filed class action antitrust lawsuits against manufacturers of concrete in Florida, charging them with conspiratorial price-fixing. The direct purchaser class actions were consolidated into the "Direct Purchaser Action," and the indirect purchaser class actions into the "Indirect Purchaser Action," both in the U.S. District Court for the Southern District of Florida. The present plaintiffs (or a predecessor) were among the defendants in both actions, although Suwannee and VCNA were later dismissed from both suits. Both **[**3]** consolidated class actions (the "Underlying Actions") were settled while this motion was pending, so this case concerns only whether the insurers must bear all or part of the costs of defending them.

A. Allegations in the Underlying Actions

The Direct Purchaser Action alleges that the manufacturers engaged in the following anticompetitive actions:

> 1. This case arises from an unlawful conspiracy among vertically-integrated manufacturers of Portland cement ("Cement") and ready-mix concrete and concrete block (together, "Concrete"), to fix, raise, stabilize, and/or maintain prices of and allocate customers and markets for Cement and Concrete in the State of Florida, in violation of *Section 1 of the Sherman Act* and *Section 4 of the Clayton Act*. **[*613]** As a result of this illegal conspiracy, Defendants charged supra-competitive prices for Cement and Concrete sold throughout the State of Florida, thereby injuring Plaintiffs and members of the proposed Classes (defined below). . . .
>
> 5. Defendants conspired to fix the prices of Cement and Concrete at artificially-inflated levels by agreeing on the amount and timing of price increases, restricting supply, allocating customers and territories, and attempting **[**4]** to eliminate competition from the ICPs, among other anticompetitive acts.

Direct Purchaser Second Am. Compl. ¶¶ 1,5. That complaint in paragraphs 100 through 144 elaborates (as does the third amended complaint of the Indirect Purchasers, ¶¶ 1-3,5,124) on the manufacturers' anticompetitive acts and describes the purpose of their false statements on which this present case rests:

> 212. During the Class Period, Defendants repeatedly attributed dramatic price increases to rising fuel and input costs, when in fact these costs did not justify the price increases, or to Cement and Concrete shortages or plant shutdowns, which were in fact artificially-created or nonexistent. These statements were a pretext to conceal Defendants' conspiracy to fix prices of Cement and Concrete.
>
> 213. Defendants' purported reasons for price increases of Cement and Concrete were materially false and misleading and were made for the purpose of concealing Defendants' anticompetitive scheme as alleged in this Complaint.
>
> 214. Plaintiffs and members of the Classes reasonably relied on the Defendants' materially false or misleading explanations for increases in the prices of Cement and Concrete, and plaintiffs and members **[**5]** of the Classes were lulled into believing that the increases were the result of normal competitive market forces, rather than the product of Defendants' collusive activity.

Id. at ¶¶ 212-214 (emphases added).

Those allegations are echoed in the Indirect Purchasers' complaint, ¶¶ 225-26 and particularly ¶ 224(emphasis added):

> 224. During the Class Period, Defendants repeatedly attributed dramatic price increases to rising fuel and input costs, when in fact these costs did not justify the price increases. These statements were a pretext to conceal Defendants' conspiracy to fix prices of Cement and Concrete.

The Underlying Actions claimed that the manufacturers' statements concealed the anticompetitive conspiracy; not that they were misappropriated from some other author, or published to stimulate sales. Yet the latter is the rationale concocted by the manufacturers to require the insurance companies to defend them against the conspiracy charges in the Underlying Actions.

B. The Insurance Policies

All of the plaintiffs seek coverage under two sets of insurance policies: a master commercial general liability policy issued by defendant Zurich Insurance Company ("Zurich") covering the years November **[**6]** 1, 2003 through November 1, 2009, and local commercial general liability policies issued by defendant Zurich American Insurance Company, Ltd. ("Zurich American") covering the period August 1, 2005 through November 1, 2009. Suwannee also seeks coverage under a general commercial liability policy issued by defendant Amerisure Insurance Company ("Amerisure") covering the period April 30, 2004 through April 30, 2005.

1. The Zurich American and Amerisure Policies

The policies issued by Zurich American and Amerisure both define "personal and **[*614]** advertising injury" in the following provision (in identical language because it is an industry standard form):

> 14. "Personal and advertising injury" means injury, including consequential "bodily injury", arising out of one or more of the following offenses:
>
> > a. False arrest, detention or imprisonment;
> > b. Malicious prosecution;
> > c. The wrongful eviction from, wrongful entry into, or invasion of the right of private occupancy of a room, dwelling or premises that a person occupies, committed by or on behalf of its owner, landlord or lessor;
> >
> > d. Oral or written publication, in any manner, of material that slanders or libels a person or organization or disparages **[**7]** a person's or organization's goods, products or services;
> > e. Oral or written publication, in any manner, of material that violates a person's right of privacy;
> > f. The use of another's advertising idea in your "advertisement"; or
> > g. Infringing upon another's copyright, trade dress or slogan in your "advertisement".

Facially, none of those include violations of the federal antitrust laws.

The manufacturers argue that the complaints in the Underlying Actions impose the insurers' duty to defend under subdivision (f) of the "advertising injury" clause because they cover "use of another's advertising idea in your "advertisement."' Specifically, the manufacturers contend that their public misstatements can be viewed as "advertisements" expressing the "advertising idea" of promoting concrete sales by offering false innocuous explanations of their conspiratorially-fixed high prices for concrete. The manufacturers say that it could be, and the clause would cover, that they got that idea from another co-conspirator: thus their use of it would be "the use of another's advertising idea in [their] 'advertisement.'"(The defendant insurers say, and I hold, that in any event the clause does not apply when **[**8]** the "other" acquiesces in its use.)

2. The Zurich Policy

The Zurich policy provides in relevant part:

> **5.12.1 Exclusions**

> This extension[1] does not apply to: . . .
> c) Advertising Injury arising out of the willful violation of criminal or penal statute, regulation or ordinance committed by or with the knowledge or consent of the Insured.

Endorsement No. 11 to the Zurich Policy pp. 1-2.

Conspiracies in restraint of trade are illegal, and every person who engages in one is guilty of a felony under *15 United States Code § 1*.

DISCUSSION

Under New York law, "The duty to defend is triggered whenever the allegations in the complaint fall within the risk covered by the policy; thus, if, liberally construed, the claim is within the embrace of the policy, the insurer must come forward to defend its insured." *City of Johnstown, N.Y. v. Bankers Standard Ins. Co., 877 F.2d 1146, 1148 (2d Cir. 1989)* (internal quotation marks and brackets omitted). Florida law is similar. *Eastpointe Condo. I Ass'n v. Travelers Cas. & Sur. Co. of Am.., 664 F. Supp. 2d 1281, 1285-86 **[*615]** (S.D. Fla. 2009)* **[**9]** (applying Florida law), aff'd *379 F. App'x 906 (11th Cir. 2010)* ("An insurer's duty to defend is based entirely on the facts and legal theories alleged in the pleadings and claims against the insured," and "As long as the complaint alleges facts which create potential coverage under the policy, a duty to defend is triggered.").

Every court that has examined the issues in this case has concluded that the advertising injury clauses in similar policies do not provide coverage for the defense of the underlying antitrust suits. Not all of the reasons given in all of the lawsuits fit this case sufficiently to merit much discussion in this case, which is disposed of by two clear principles.

A. The Words "Of Another" Mean They Were Misappropriated

To impose the duty to defend under the Zurich and Amerisure policies, the Underlying Actions must plead injury arising out of the manufacturers' "use of another's 'advertising idea' in their advertisement." There is no injury in the use if the "other" consents to it. For there to be the necessary injury, the idea must be misappropriated, i.e., wrongfully taken or made use of "without authority or right," *Am. Employers' Ins. Co. v. DeLorme Pub. Co., 39 F. Supp. 2d 64, 77 (D. Me. 1999)* **[**10]** (internal quotation marks omitted). Thus there is no Advertising Injury here: even if the idea of the false public statements came from a co-conspirator, they were used with his permission. There was no misappropriation.

As stated by the Seventh Circuit Court of Appeals in an identical case, it is

> . . . clear that coverage is limited to liability to the "other" whose advertising idea is used by the insured without the "other's" permission. That is what "misappropriation" is; . . . the understanding [is] that using someone else's idea with that someone's consent is not misappropriation.

Rose Acre Farms v. Columbia Cas. Co., 662 F.3d 765, 768-769 (7th Cir. 2011) (alterations mine).

The District Court in Rose Acre held;

> The policy states that the advertising injury must arise out of one of the enumerated "offenses'—in this case, 'the use of another's advertising idea in your "advertisement.' We are hard-pressed to understand how use of a co-defendant's idea, as opposed to one of the plaintiffs, could be considered an 'offense.' Thus, to adopt Rose Acre's interpretation of the term 'of another,' the Court would effectively be required to re-write the insurance contract, which (as even Rose **[**11]** Acre concedes) courts are loathe to do.

---

[1] The "Advertising Injury" coverage was an addition ("extension") to the general commercial liability coverage and was contained in a November 30, 2005 amendment to the Zurich policy.

Rose Acre Farms, 772 F.Supp.2d 994 (S.D. Ind. 2011), aff'd *662 F.3d 765*.

The Underlying Actions do not allege that the manufacturers used the idea of another, much less misappropriated it, and neither Zurich American nor Amerisure had a duty to defend them against those actions. See *Champion Lab., Inc. v. Am. Home Assur. Co., 09-Civ-7251 (AJS), 2010 U.S. Dist. LEXIS 65498, 2010 WL 2649848 at * 5 (N.D. Ill. Jun. 30, 2010)* ("Under Illinois law, the use of an another's advertising idea "occurs when a business wrongfully takes a competitor's idea about the solicitation of business.' ... no where in the Aftermarket Filters Antitrust Litigation class action complaints do the direct or indirect purchasers accuse Champion of using Purolator's, another competitor's, or plaintiffs' advertising ideas to sell their engine filters"); *Trailer Bridge, Inc. v. Illinois Nat. Ins. Co., 657 F.3d 1135, 1139 (11th Cir. 2011)* ("We reject Trailer Bridge's contention that the use of a co-defendant's (and alleged co-conspirator's) idea-as opposed to the idea of a plaintiff in the underlying antitrust action-could **[*616]** qualify as an 'offense' under the Policy.").

B. The Criminal Acts Exclusion Forecloses [12] Coverage Under the Zurich Policy**

Under New York law, policy exclusions "must be specific and clear in order to be enforced. They are not to be extended by interpretation or implication, but are to be accorded a strict and narrow construction." *Seaboard Sur. Co. v. Gillette Co., 64 N.Y.2d 304, 311, 476 N.E.2d 272, 275, 486 N.Y.S.2d 873 (1984)*. The burden rests on the insurer to establish that the pleadings to be defended are "cast solely and entirely within the policy exclusions" and are not subject to any other reasonable interpretation which would allow coverage. Id. Similarly, under Florida law, "Where the application of one or more policy exclusions applies to the face of the complaint, no duty to defend exists, even if the complaint alleges facts that would otherwise give rise to a covered claim." *Chicago Title Ins. Co. v. Northland Ins. Co., 31 So. 3d 214, 216 (Fla. Dist. Ct. App. 2010)*.

The criminal acts exclusion in the Zurich policy is specific and clear: it excludes coverage for "Advertising Injury arising out of the willful violation of criminal or penal statute, regulation or ordinance committed by or with the knowledge or consent of the insured."

As stated of the similar provision in Rose Acre **[**13]** Farms:

> Furthermore, the policy does not apply to advertising injury that is "caused by or at the direction of the insured with the knowledge that the act [triggering liability] would violate the rights of another and would inflict 'personal and advertising injury'" or that "arise [es] out of a criminal act committed by or at the direction of any insured." Participation in a conspiracy to violate federal ***antitrust law*** is both deliberate and criminal, and is thus excluded from coverage by both provisions.

662 F.3d at 769 (brackets in original).

It of course may be true that an insurer may have to defend a whole suit where only part of its claims are covered by the policy, but in this case as in *Rose Acre Farms*, "the antitrust suit for which Rose Acre wants a defense makes no claim that the policy could be thought to cover." Ibid.

It makes no difference that the acts for which the manufacturers may be liable have both civil and criminal consequences, and were in Florida pursued only in civil actions. The acts are felonious: "Every person who shall make any contract or engage in any combination or conspiracy . . . shall be deemed guilty of a felony." Section 1 of the Sherman Act, *15 U.S.C. § 1*, **[**14]** reads:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding $100,000,000 if a corporation, or, if any other person, $1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court.

Thus, the acts for which the manufacturers seek a defense are statutorily deemed felonies regardless of whether the Underlying Actions are civil or criminal, and the policy excludes coverage for advertising injury arising out of a criminal violation.

C. Other Reasons

Other courts rejecting claims for defenses of antitrust lawsuits under advertising injury clauses gave additional reasons.

[*617] *Trailer Bridge, Inc. v. Illinois Nat. Ins. Co., 09-CV-1135 (MCR), 2010 U.S. Dist. LEXIS 73970, 2010 WL 2927424 at *5 (M.D. Fla. Jul. 22, 2010)* (brackets in original), aff'd, *657 F.3d 1135 (11th Cir. 2011)* pointed out that the underlying actions did not claim **[**15]** that the "advertising idea" came from another entity, and its purpose was to conceal the conspiracy, not to increase sales. The injury in the underlying actions was antitrust injury, not advertising injury:

> Thus, it is apparent the underlying plaintiffs allege their injuries were caused by higher prices arising from price-fixing, not from the use of another's advertising idea in Trailer Bridge's advertisement. None of the damages sought by the underlying plaintiffs in the Antitrust Complaint are payments requested "because of" an advertising injury, but instead were strictly for antitrust injuries.

*2010 U.S. Dist. LEXIS 73970, [WL] at *7*; see also *Champion Labs., 2010 U.S. Dist. LEXIS 65498, 2010 WL 2649848 at *5* (the underlying antitrust complaints "allege that the engine filter manufacturers were in collusion to fix the price of the engine filters and that the indirect and indirect purchasers' damages arise from the artificial price increases. As such, the plaintiffs' damages in the underlying lawsuit do not arise out of Champion wrongfully taking defendants' or plaintiffs' advertising ideas") ; *Rose Acre Farms, 772 F. Supp. 2d at 1001-1002* ("[T]he Underlying Complaints simply do not allege any injury arising out of any advertising activity **[**16]** on the part of Rose Acre,").

A similar analysis would apply here (the underlying complaints insisted that the purpose of the misstatements was to conceal the conspiracy, pp. 3-4 above), but is unnecessary since the clauses cannot apply in the first place, absent any proof or likelihood of misappropriation.

Sound underwriting principles disfavor indemnification for the insured's intentional misdeeds and criminal acts and, as observed in Rose Acre Farms: "It is hardly likely that parties to an insurance contract would seek to cover such a serious risk [as antitrust litigation] indirectly through an 'advertising injury' provision aimed at misappropriation and other intellectual-property torts." *662 F.3d at 768* (bracketed insertion mine).

CONCLUSION

The motions of defendants Zurich American and Zurich (Dkt. No. 37) and defendant Amerisure (Dkt. No, 40) are granted, and plaintiffs' motions (Dkt. Nos. 46 and 49) are denied.

The Clerk is directed to enter judgment dismissing the complaint with prejudice, with costs and disbursements to the defendants according to law.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN1[] **Standards of Review, Clearly Erroneous Review**

An appellate court will uphold the trial court's findings unless clearly erroneous. Vt. R. Civ. P. 52(a)(2). Its review of the court's legal conclusions is de novo.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Constitutional Law > The Judiciary > Case or Controversy > General Overview

HN2[] **Justiciability, Case & Controversy Requirements**

Vermont courts are limited to deciding actual cases or controversies. An element of the case-or-controversy requirement is that a plaintiff must have standing—that is, must have suffered a particular injury that is attributable to the defendant and that can be redressed by a court of law. To bring a case, a plaintiff must show (1) injury in fact, (2) causation, and (3) redressability.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN3[] **Justiciability, Standing**

Standing embodies a prudential component of self-imposed judicial limits. Under the principles of prudential standing, a plaintiff's complaint must fall within the zone of interests protected by the law invoked, which requires inquiry into the substance of a plaintiff's claim.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > General Overview

HN4[] **Standing, Injury in Fact**

An injury for standing purposes means the invasion of a legally protected interest, not a generalized harm to the public.

Governments > Local Governments > Police Power

Governments > Police Powers

HN5[] **Local Governments, Police Power**

The legislature has created a limited number of governmental entities which are authorized to provide law enforcement services. Constables, municipal police departments, sheriffs' offices, and the Vermont State Police may provide law enforcement services within the state. *Vt. Stat. Ann. tit. 17, § 2646(7)* (appointment or election of constables); *Vt. Stat. Ann. tit. 24, § 1936a* (constable law enforcement authority); *Vt. Stat. Ann. tit. 24, §§ 1931*, *1935* (municipal police departments); *Vt. Stat. Ann. tit. 24, § 291a* (sheriffs' departments); *Vt. Stat. Ann. tit. 20, §§ 1812*, 1911-1915 (state police). No private actors are involved. Municipalities may enter into agreements for the provision of police services. *Vt. Stat. Ann. tit. 24, § 1938* (Cities, towns, incorporated villages, the University of Vermont, sheriffs, and state agencies may enter into agreements to provide for intermunicipal police services).

Governments > Local Governments > Police Power

HN6[] **Local Governments, Police Power**

Vt. Stat. Ann. tit. 24, § 1938 states that various municipalities "may" enter into agreements for the provision of police services, and does not mandate a bidding process. In construing this statute, a court presumes that the legislature intended the plain and ordinary meaning of the statute. The plain, ordinary meaning of the word "may" indicates that a statute is permissive, not mandatory. Thus, municipalities have discretion to enter into agreements for the provision of law enforcement services and may choose the provider in their own manner.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN7[] **Anticompetitive & Predatory Practices, Predatory Pricing**

The Vermont Consumer Fraud Act prohibits engaging in predatory pricing because it is an unfair method of competition in commerce. *Vt. Stat. Ann. tit. 9, §§ 2461c(a)*, *2453*. Commerce is generally defined as the interchange of goods and commodities, especially on a large scale.

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN8[] **Antitrust & Trade Law**

The United States Supreme Court has noted that federal ***antitrust law*** rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of the economic resources, the lowest prices, the highest quality and the greatest material progress, and that the policy unequivocally laid down by the federal law is competition. Similarly, Vermont's predatory pricing statute is designed to protect the integrity of a competitive marketplace. *Vt. Stat. Ann. tit. 9, § 2461c(a)* (proscribing acts that tend to create or maintain a monopoly or otherwise harm competition); *Vt. Stat. Ann. tit. 9, § 2451* (stating that the purpose of Vt. Stat. Ann. ch. 63 is to complement enforcement of federal law concerning unfair competition).

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN9[] **Anticompetitive & Predatory Practices, Predatory Pricing**

There is simply no unrestrained interaction of competitive forces in the Vermont law enforcement market that would require regulation by the predatory pricing statute. It is the protection of competition, rather than the protection of competitors, that antitrust laws are designed to protect, and the statutory scheme relating to law enforcement embraces no element of competition in an open marketplace. This is because the universe of entities that can provide police services is narrowly limited to state actors, and the "market" in which the services are contracted for is wholly restricted.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN10[] **Anticompetitive & Predatory Practices, Predatory Pricing**

Predatory pricing occurs when a firm bites the bullet and forgoes present revenues to drive a competitor from the market, with the intent to recoup lost revenues through higher profits when it succeeds in making the environment less competitive. Predatory pricing in its orthodox form exists where a single firm, having a dominant share of the relevant market, cuts its prices in order to force competitors out of the market, or perhaps to deter potential entrants from coming in.

Headnotes/Summary

Summary

Appeal by sheriff's office from judgment in favor of police department in predatory pricing suit brought by sheriff's office. Superior Court, Franklin Unit, Civil Division, *Mello*, J., presiding. *Affirmed*.

Headnotes

VERMONT OFFICIAL REPORTS HEADNOTES

VT1.[] 1.

Constitutional Law > Standing > Generally

Vermont courts are limited to deciding actual cases or controversies. An element of the case-or-controversy requirement is that a plaintiff must have standing — that is, must have suffered a particular injury that is attributable to the defendant and that can be redressed by a court of law. To bring a case, a plaintiff must show (1) injury in fact, (2) causation, and (3) redressability.

VT2.[] 2.

Parties > Generally > Standing

Standing embodies a prudential component of self-imposed judicial limits. Under the principles of prudential standing, a plaintiff's complaint must fall within the zone of interests protected by the law invoked, which requires inquiry into the substance of a plaintiff's claim.

VT3.[] 3.

Constitutional Law > Standing > Injury in Fact

An injury for standing purposes means the invasion of a legally protected interest, not a generalized harm to the public.

VT4.[] 4.

Police > Generally > Authority

The Legislature has created a limited number of governmental entities which are authorized to provide law enforcement services. Constables, municipal police departments, sheriffs' offices, and the Vermont State Police may provide law enforcement services within the state. No private actors are involved. Municipalities may enter into agreements for the provision of police services. *17 V.S.A. § 2646(7)*; *20 V.S.A. §§ 1812*, 1911-1915; *24 V.S.A. §§ 291a*, *1931*, *1935*, *1936a*, *1938a*.

VT5.[] 5.

Constitutional Law > Standing > Standing Not Found

A sheriff's office lacked constitutional standing to assert a predatory pricing claim against a police department in part because it had no legally protected right to “fair competition” with other statutorily created government entities to provide police services to a town. The town was under no obligation to entertain bids for police services in the first instance, or to award the contract to the lowest bidder. *9 V.S.A. § 2461c*; *24 V.S.A. § 1938*.

VT6.[] 6.

Municipal Law > Services > Particular Cases

The statute pertaining to intermunicipal police services states that various municipalities “may” enter into agreements for the provision of police services, and does not mandate a bidding process. The plain, ordinary meaning of the word “may” indicates that a statute is permissive, not mandatory; thus, municipalities have discretion to enter into agreements for the provision of law enforcement services and may choose the provider in their own manner. *24 V.S.A. § 1938*.

VT7.[] 7.

Statutes > Generally > Unambiguous Statutes and Plain Meaning

In construing a statute, a court presumes that the Legislature intended the plain and ordinary meaning of the statute.

VT8.[] 8.

Commerce > Particular Subjects > Unfair Competition

The Vermont Consumer Fraud Act prohibits engaging in predatory pricing because it is an unfair method of competition in commerce. Commerce is generally defined as the interchange of goods and commodities, especially on a large scale. *9 V.S.A. §§ 2453*, *2461c(a)*.

VT9.[] 9.

Constitutional Law > Standing > Standing Not Found

A sheriff's office lacked constitutional standing to assert a predatory pricing claim against a police department which bid to provide police services to a town, as no commerce existed so as to provide the sheriff's office with a legally protected interest. The provision of police services in Vermont occurred outside the realm of commerce because it involved no interchange of goods or commodities on the open market; it was a governmental function provided only by governmental entities for the benefit of the public. *9 V.S.A. §§ 2453*, *2461c(a)*.

VT10.[] 10.

Parties > Generally > Standing

A sheriff's office lacked prudential standing to assert a predatory pricing claim against a police department which bid to provide police services to a town, as its alleged injuries did not fall within the zone of interests to be protected by the predatory pricing statute. The “competitors” were all statutorily created entities, meaning that one entity could not lower its prices so as to put another out of business, nor could potential entrants be deterred from entering the “market” because the statutory scheme allowed no new entrants. *9 V.S.A. § 2461c*.

VT11.[] 11.

Commerce > Particular Subjects > Unfair Competition

The United States Supreme Court has noted that federal ***antitrust law*** rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of the economic resources, the lowest prices, the highest quality and the greatest material progress, and that the policy unequivocally laid down by the federal law is competition. Similarly, Vermont's predatory pricing statute is designed to protect the integrity of a competitive marketplace. *9 V.S.A. §§ 2451*, *2461c(a)*.

VT12.[] 12.

Commerce > Particular Subjects > Unfair Competition

There is simply no unrestrained interaction of competitive forces in the Vermont law enforcement market that would require regulation by the predatory pricing statute. It is the protection of competition, rather than the protection of competitors, that antitrust laws are designed to protect, and the statutory scheme relating to law enforcement embraces no element of competition in an open marketplace: this is because the universe of entities that can provide police services is narrowly limited to state actors, and the “market” in which the services are contracted for is wholly restricted. *9 V.S.A. § 2461c*.

VT13.[] 13.

Commerce > Particular Subjects > Unfair Competition

Predatory pricing occurs when a firm bites the bullet and forgoes present revenues to drive a competitor from the market, with the intent to recoup lost revenues through higher profits when it succeeds in making the environment less competitive. Predatory pricing in its orthodox form exists where a single firm, having a dominant share of the relevant market, cuts its prices in order to force competitors out of the market, or perhaps to deter potential entrants from coming in.

Opinion by: REIBER

Opinion

[*P1] [190] [***209]** **Reiber, C.J.** In this predatory pricing suit, the Franklin County Sheriff's Office appeals **[***210]** the trial court's judgment in favor of the St. Albans City Police Department. The Sheriff's Office contends that the City Police Department engaged in an unfair method of competition with the intent to harm competition under the Vermont *Consumer Fraud Act*'s (VCFA) predatory pricing provision, *9 V.S.A. § 2461c*. Specifically, the Sheriff's Office argues that the City Police Department submitted an “artificially low” bid in response to the Town of St. Albans's request for proposals for law enforcement services. We affirm.

[*P2] The City Police Department is a municipal police department located in the **[****2]** City of St. Albans. It handles law enforcement duties within the City and provides dispatch services to emergency response organizations in three counties. The Sheriff's Office provides a wide variety of law enforcement services to local municipalities. For the past twenty-five years, the Sheriff's Office has provided law enforcement services to the Town of St. Albans.

[*P3] In 2007, the Town requested proposals for the provision of law enforcement services to the Town for a three-year contract. The City Police Department's bid of $766,532.25 for the first year **[**191]** included the hiring of six new police officers and one-and-a-half dispatchers to provide the Town with services twenty-four hours a day, seven days a week. The Sheriff's Office's bid was lower, however, and its bid was accepted.

[*P4] In October 2010, in anticipation of the expiration of the Sheriff's Office's contract, the Town again requested proposals for law enforcement services for a three-year contract. The Sheriff's Office's first-year bid was $642,652.97, which included services for twenty-four hours a day, seven days a week. The City Police Department's first-year bid was $486,850.99. Its proposal included staffing the combined **[****3]** service areas of the City and Town with between three and six patrol cars. The City Police Department also proposed hiring three fulltime officers and reassigning a fourth to cover the Town for 120 hours per week. The Department proposed using officers who already worked in the City to supply the additional forty-eight hours, so as to meet the contract's requirement of police coverage twenty-four hours a day, seven days a week. The Town selectboard considered both proposals and in an open meeting voted to award the contract to the City Police Department. The three-year term began July 1, 2011.

[*P5] The Sheriff's Office sued the City Police Department, alleging that the Department violated the VCFA. Specifically, the Sheriff's Office claimed that the Department engaged in predatory pricing by intentionally pricing its law enforcement services in a way that would harm competition under *9 V.S.A. § 2461c*. **[****4]** The Sheriff's Office requested an injunction and damages. The City Police Department opposed the injunction on the grounds that the claim did not meet the elements of the VCFA, the Sheriff's Office did not have standing, and the state-action immunity doctrine barred suit against the Department.

[*P6] The trial court denied the injunction in an order dated April 27, 2011, in which the court made preliminary findings of fact and conclusions of law. The Sheriff's Office filed a motion for interlocutory appeal. While that motion was pending, the parties filed a joint stipulation and motion for entry of final judgment, stating that the court could enter a final decision based on the findings of fact and conclusions of law in the court's April 27 order. The court entered judgment for the City Police Department, making its April 27 order the final decision on the merits.

[*P7] The court rejected the City Police Department's argument that the Sheriff's **[***211]** Office lacked standing. The court acknowledged **[**192]** that the statutes authorizing municipalities to enter into agreements for police services do not require a bidding process. The court concluded, however, that the Sheriff's Office acquired a legally protected **[****5]** interest in competing for the contract when the Town opened the procurement process for bidding. It reasoned that the VCFA applies to all activities in commerce, that the provision of police services falls within the definition of commerce, and that an alternative conclusion would "suggest that even egregious antitrust violations (e.g., price fixing) would be acceptable in what purported to be a competitive bidding process." The court also rejected the City Police Department's argument that the suit was barred by the state-action immunity doctrine, reasoning that the City Police Department was not eligible for immunity, having entered the market as a seller.

[*P8] On the merits, however, the court agreed with the City Police Department. The court concluded that the City Police Department's conduct did not violate the VCFA because there was no intent to harm competition. The court found three legitimate reasons for the reduction between the City Police Department's 2007 and 2010 bids: (1) by 2010, the Department was fully staffed and did not have to hire and train as many new officers as it would have in 2007; (2) the Department was able to perform a better analysis of its costs and capacities **[****6]** by 2010 due to an additional qualified accountant in the finance office; and (3) the Department based its bid on using service zones and a cover car.[1] The court found that the use of the current City Police Department employees to concurrently

---

[1] The court described a service zones model as follows. Police patrols perform in overlapping assignment areas within an area that is divided into zones. Between three and six officers are on duty, depending upon the typical intensity of the shift. A shift supervisor divides the service area into two to four zones, depending on the number of officers on duty. The on-duty officers are responsible for calls in their assigned zones, but may leave the area in order to respond to an emergency or "a major incident" in

provide forty-eight hours of coverage to the Town per week would not require the City to pay them overtime. Rather, the court found that police officers are generally not fully occupied during their shifts, and that "combining services for the Town and City allows both municipalities to benefit from using these existing services more efficiently." The **[**193]** court also found that the contract does not require the City or its taxpayers to subsidize the Town because the City would pay its officers the same compensation regardless of whether some of its officers provide coverage to the Town. Ultimately, the court held that the City Police Department did not engage in unfair conduct by taking advantage of efficiencies made possible by geography. The court concluded that the Sheriff's Office had not proven that the City Police Department acted with any intent to harm competition, a prerequisite to a predatory pricing claim. *9 V.S.A. § 2461c*. The Sheriff's **[****7]** Office appeals this decision.

[*P9] The Sheriff's Office argues on appeal that the City Police Department acted unfairly by "supplementing its bid with existing, dedicated resources" and had an intent to harm competition. The Sheriff's Office also argues that the City Police Department subsidized its bid by using City police officers to deliver some Town law enforcement services, and that the **[***212]** court's finding to the contrary is clearly erroneous. The City Police Department **[****8]** contends that the elements of a VCFA claim are not present, that the Sheriff's Office does not have standing, and that its claims are barred by the state-action immunity doctrine.

[*P10] ***HN1***[] We will uphold the trial court's findings unless clearly erroneous. *V.R.C.P. 52(a)(2)*. Our review of the court's legal conclusions is de novo. *Charbonneau v. Gorczyk, 2003 VT 105, ¶ 2, 176 Vt. 140, 838 A.2d 117*.

[*P11] ***VT[1]***[] [1] Because it is a threshold requirement, we first address the question of standing. ***HN2***[] Vermont courts are limited to deciding actual cases or controversies. *In re Constitutionality of House Bill 88, 115 Vt. 524, 529, 64 A.2d 169, 172 (1949)* ("The judicial power, as conferred by the Constitution of this State upon this Court, is the same as that given to the Federal Supreme Court by the United States Constitution; that is, 'the right to determine actual controversies arising between adverse litigants, duly instituted in courts of proper jurisdiction.' " (quoting *Muskrat v. United States, 219 U.S. 346, 361, 31 S. Ct. 250, 55 L. Ed. 246, 46 Ct. Cl. 656 (1911))*. An element of the case-or-controversy requirement is that a plaintiff must have standing — that is, "must have suffered a particular injury that is attributable to the defendant and that can be redressed **[****9]** by a court of law." *Parker v. Town of Milton, 169 Vt. 74, 77, 726 A.2d 477, **[**194]** 480 (1998)*. To bring a case, a plaintiff must show "(1) injury in fact, (2) causation, and (3) redressability." *Id*.[2]

[*P12] ***VT[2]***[] [2] ***HN3***[] Standing also embodies "a prudential component of self-imposed judicial limits." *Hinesburg Sand & Gravel Co. v. State, 166 Vt. 337, 341, 693 A.2d 1045, 1048 (1997)*. Under the principles of prudential standing, a plaintiff's complaint must " 'fall within the zone of interests protected by the law invoked,' " which requires inquiry into the substance of a plaintiff's claim. *Id*. (quoting *Allen v. Wright, 468 U.S. 737, 751, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984))*.

[*P13] We begin by examining the injury-in-fact element of constitutional standing — the only element at issue. The City Police Department argues that the Sheriff's Office has not suffered an injury in fact. The Sheriff's Office claims injury because it lost the bid due to the City Police Department's artificially low bid. The Sheriff's Office contends that it was unable to compete on equal ground with the City Police Department for the present contract,

---

another zone. The supervisor would maintain overlapping responsibility in the cover car. The court found that these operational efficiencies were made possible in part because the Town completely surrounds the City.

[2] The City Police Department urges that antitrust plaintiffs have a heightened burden to demonstrate standing, reasoning that litigation in an antitrust case may be used to restrain, rather than to protect, legitimate competition. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation."); see also 2 P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶ 335a (2d ed. 2000) (noting that antitrust standing "requires more than the constitutional minimum for the 'case or controversy' " requirement). Because we conclude that the Sheriff's Office does not have constitutional standing, we need not reach the issue of whether the Sheriff's Office is required to prove so-called antitrust **[****10]** standing.

and that, going forward, it will not be able to compete with the City Police Department for future contracts. The Sheriff's Office alleges that the City Police Department shifted municipal resources previously dedicated solely to the City in order to underbid the Sheriff's Office, and that the City Police Department **[****11]** has "effectively eliminate[d] its only competitor **[***213]** for the delivery of law enforcement services."

[*P14] ***VT[3,4]***[] [3, 4] ***HN4***[] An injury for standing purposes means the invasion of a legally protected interest, not a generalized harm to the public. *Parker, 169 Vt. at 78, 726 A.2d at 480*. The interest at issue here is the right to provide police services to the Town. Therefore, it is critical to determine if the Sheriff's Office has a right to **[**195]** compete for providing these services. There are several statutory provisions that impact this determination. ***HN5***[] The Legislature has created a limited number of governmental entities which are authorized to provide law enforcement services. Constables, municipal police departments, sheriffs' offices, and the Vermont State Police may provide law enforcement services within the state. See *17 V.S.A. § 2646(7)* (appointment or election of constables); *24 V.S.A. § 1936a* (constable law enforcement authority); *24 V.S.A. §§ 1931*, *1935* (municipal police departments); *24 V.S.A. § 291a* (sheriffs' departments); *20 V.S.A. §§ 1812*, *1911-1915* (state police). No private actors are involved, and the Sheriff's Office conceded at oral argument that it was unaware of any law that would allow a private **[****12]** entity to contract to provide municipal police services. Municipalities may enter into agreements for the provision of police services. See *24 V.S.A. § 1938(a)* ("Cities, towns, incorporated villages, the University of Vermont, sheriffs, and state agencies may enter into agreements to provide for intermunicipal police services.").

[*P15] ***VT[5-7]***[] [5-7] The Sheriff's Office lacks standing to assert a predatory pricing claim in part because it has no legally protected right to "fair competition" with other statutorily created government entities to provide police services to the Town. ***HN6***[] *Section 1938* states that various municipalities "may" enter into agreements for the provision of police services, and does not mandate a bidding process. In construing this statute, we presume that the Legislature intended the plain and ordinary meaning of the statute. *In re Ambassador Ins. Co., 2008 VT 105, ¶ 18, 184 Vt. 408, 965 A.2d 486*. "The plain, ordinary meaning of the word 'may' indicates that a statute is permissive, not mandatory." *Town of Calais v. Cnty. Road Comm'rs, 173 Vt. 620, 621, 795 A.2d 1267, 1268 (2002)* (mem.). Thus, municipalities have discretion to enter into agreements for the provision of law enforcement **[****13]** services and may choose the provider in their own manner.

[*P16] Consequently, the Town was under no obligation to entertain bids for police services in the first instance, or to award the contract to the lowest bidder. The Town's request for proposals echoed this discretionary power, stating that "[t]he Town reserves the right to make a contract award decision based on the totality of response to this [request for proposals], past performance, and comments from Town residents received by the Selectboard." This language alerted bidders that the Town could award the contract **[**196]** to any bidder for practically any reason, without imposing on the Town or the bidders any "fair procedure" requirement. Thus, neither statutory law nor the Town's request afforded the Sheriff's Office any legally protected interest.

[*P17] ***VT[8,9]***[] [8, 9] We disagree with the trial court's conclusion that, once the Town put the contract up for bid, the Sheriff's Office was entitled to a fair procurement process through competitive bidding because providing police services is included in the VCFA definition of commerce. ***HN7***[] The VCFA prohibits engaging in predatory pricing because it is an unfair method of competition in commerce. See *9 V.S.A. §§ 2461c(a)*, **[****14]** *2453*. Commerce is generally defined as the "interchange of goods and **[***214]** commodities, especially on a large scale." *Carter v. Gugliuzzi, 168 Vt. 48, 54, 716 A.2d 17, 22 (1998)* (quotation omitted). We conclude that no commerce existed in this case as would provide the Sheriff's Office with a legally protected interest. The subject of the bidding — i.e., the "commodity" to be provided — is a purely public function. That function, as noted, is carried out only by statutorily authorized public entities. Fundamentally, then, the provision of police services in Vermont occurs outside the realm of commerce because it involves no interchange of goods or commodities on the open market. It is a governmental function provided only by governmental entities for the benefit of the public. We therefore conclude that the Sheriff's Office has no legally protected interest because the provision of law enforcement services does not occur within commerce for the purposes of the VCFA.

[*P18] *VT[10]*[] [10] Furthermore, the claim does not meet the requirements of prudential standing, which demands that the Sheriff's Office's complaint fall within the zone of interests protected by the predatory pricing statute. See *Hinesburg Sand & Gravel Co., 166 Vt. at 341, 693 A.2d at 1048*. **[****15]** Thus, we examine whether the predatory pricing statute was intended to encompass claims by one governmental entity against another outside the realm of a traditional competitive marketplace.

[*P19] *VT[11]*[] [11] *HN8*[] The United States Supreme Court has noted that federal ***antitrust law*** "rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress," and that "the policy unequivocally laid down by the [federal law] is competition." *N. Pac. Ry. v.* ***[**197]*** *United States, 356 U.S. 1, 4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. Similarly, Vermont's predatory pricing statute is designed to protect the integrity of a competitive marketplace. See *9 V.S.A. § 2461c(a)* (proscribing acts that "tend[] to create or maintain a monopoly or otherwise harm[] competition"); see also *id*. *§ 2451* (stating that the purpose of chapter 63 is to complement enforcement of federal law concerning unfair competition).

[*P20] *VT[12]*[] [12] In the context of this case, *HN9*[] there is simply no "unrestrained interaction of competitive forces" in the Vermont law enforcement market that would require regulation by the predatory pricing statute. *N. Pac. Ry., 356 U.S. at 4*. **[****16]** It is the protection of competition, rather than the protection of competitors, that antitrust laws are designed to protect, *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*, and the statutory scheme relating to law enforcement embraces no element of competition in an open marketplace. This is because the universe of entities that can provide police services is narrowly limited to state actors, and the "market" in which the services are contracted for is wholly restricted.

[*P21] *VT[13]*[] [13] More specifically, *HN10*[] predatory pricing occurs when a firm "bites the bullet and forgoes present revenues to drive a competitor from the market," with the intent "to recoup lost revenues through higher profits when it succeeds in making the environment less competitive." *Kelco Disposal, Inc. v. Browning-Ferris Indus. of Vt., Inc., 845 F.2d 404, 407 (2d Cir. 1988)*. Predatory pricing in its orthodox form exists where a "single firm, having a dominant share of the relevant market, cuts its prices in order to force competitors out of the market, or perhaps to deter potential entrants from coming in." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 584 n.8, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Here, the "competitors" **[****17]** **[***215]** are all statutorily created entities, meaning that one entity cannot lower its prices so as to put another out of business, nor can potential entrants be deterred from entering the "market" because the statutory scheme allows no new entrants. Although there is competition within a limited sphere as between the statutorily empowered entities, there is no threat of monopolization by any one of them. Thus, the Sheriff's Office's injuries alleged in the complaint do not fall within the zone of interests to be protected by Vermont's predatory pricing statute. In sum, the Sheriff's Office was not denied something in which it had a legally **[**198]** protected interest, nor is its claim within the zone of interests protected by the statute, and it therefore lacks constitutional and prudential standing.

Affirmed.

Judges: VICTOR MARRERO, United States District Judge.

Opinion by: VICTOR MARRERO

Opinion

[*621] **DECISION AND ORDER**

VICTOR MARRERO, United States District Judge.

By letter dated March 5, 2012, Class Plaintiffs requested leave to file a Third Amended Complaint in this action. (Docket No. 1678.) **[**16]** Among other changes, the proposed Third Amended Complaint would add as named defendants Trinity Funding Co. LLC and GE Funding Capital Market Services Group (the "GE Defendants"). The Court deems the March 5, 2012 letter to be Class Plaintiffs' motion to amend the complaint as set forth therein.

By letters dated March 6, 2012 (Docket No. 1679) and March 14, 2012 (Docket No. 1683), the GE Defendants opposed Class Plaintiffs' motion. The GE Defendants argued that, in light of previous decisions in this matter that dismissed on statute of limitations grounds other plaintiffs' claims against the GE Defendants, Class Plaintiffs' proposed claims are likewise time-barred. Class Plaintiffs responded, by letter dated March 15, 2012 (Docket No. 1682), citing *15 U.S.C. § 16 (i)* ("*§ 16 (i)*") for the first time in this litigation. The basic function of *§ 16(i)* is to toll the statute of limitations as to private civil antitrust claims during the pendency of government antitrust proceedings related to the same subject matter. See *15 U.S.C. § 16(i)*.

By letter dated March 16, 2012 (Docket No. 1685), the GE Defendants argued against the application of *§ 16 (i)* to private civil defendants who have been **[**17]** prosecuted under non-antitrust criminal statutes and asserted that *§ 16 (i)* could not reopen a limitations period which began and concluded prior to the initiation of the relevant government proceeding. Class Plaintiffs submitted a further letter, dated March 19, 2012, disputing these points. (Docket No. 1684.)

Because *§ 16 (i)* had not been addressed by the parties in any prior briefing to this Court, on April 3, 2012, the Court ordered Class Plaintiffs and the GE Defendants to submit further letter-briefs on the applicability of *§ 16(i)* to the Class Plaintiffs' proposed additional claims. (Docket No. 1687.) On April 13, 2012, each party did so (see Docket Nos. 1709 & 1710), supplementing and refining the arguments presented in their earlier submissions described above.

[*622] Now, with the benefit of these submissions and for the reasons discussed below, the Court finds that *§ 16(i)* operates to toll the statute of limitations as to Class Plaintiffs' proposed claims against the GE Defendants and, accordingly, finds that Class Plaintiffs' proposed amendments would not be futile. Further, the Court finds that there has been no undue delay in bringing the amendments. For these reasons, the Court **[**18]** GRANTS Class Plaintiffs' request to amend.

I. BACKGROUND[1]

This multidistrict litigation centers upon an alleged conspiracy among various financial institutions and brokerage firms to illegally rig bids, limit competition, and fix prices in the trillion-dollar municipal derivatives market. The litigation has continued for over four years and the Court has issued numerous opinions on various issues; familiarity with those opinions and the course of this litigation is presumed.[2]

---

[1] "For purposes of this motion to amend, the Court accepts all well-pleaded, nonconclusory factual allegations as true and treats them in the best light for the Plaintiff." *Bartels v. Inc. Vill. of Lloyd Harbor, No. 10 Civ. 5076, 2012 U.S. Dist. LEXIS 92351, 2012 WL 2576142, at *1 (E.D.N.Y. July 2, 2012)* (citing *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Selevan v. N.Y. Thruway Auth., 584 F.3d 82, 88 (2d Cir. 2009))*.

[2] Specifically, the Court presumes familiarity with the following decisions: the September 7, 2011 Decision and Order, *Hinds Cnty. v. Wachovia Bank, N.A., 811 F. Supp. 2d 910 (S.D.N.Y. 2011)* ("Hinds County V"); the June 23, 2011 Decision and Order, *Hinds Cnty. v. Wachovia Bank, N.A., 790 F. Supp. 2d 121 (S.D.N.Y. 2011)* ("Hinds County **[**19]** IV") ; the April 29, 2011 Decision and Order, *Hinds Cnty. v. Wachovia Bank, N.A., 790 F. Supp. 2d 106 (S.D.N.Y. 2011)*; the April 26, 2010 Decision and Order, ***Hinds Cnty. v. Wachovia Bank, N.A., 708 F. Supp. 2d 348 (S.D.N.Y. 2010)***; and the March 25, 2010 Decision and Order, ***Hinds Cnty. v. Wachovia Bank, N.A., 700 F. Supp. 2d 378 (S.D.N.Y. 2010)*** ("Hinds County I").

To provide a measure of context for this particular dispute, the Court will broadly and briefly recapitulate some of the relevant facts. Class Plaintiffs allege a nationwide conspiracy "to fix, maintain or stabilize the price of, and to rig bids and allocate customers and markets for" government investment contracts and other derivative financial products linked to municipal bonds. (Second Consolidated Am. Class Action Compl., Docket No. 450, June 22, 2009 ("SCACAC") ¶ 1.) The operative complaint alleges that brokers of municipal derivatives, who were hired by municipal bond issuers, combined and conspired with certain providers of those investments to fix the prices charged for the transactions. The effect of these actions, according to Class Plaintiffs, was to increase the portion of the returns on those derivative instruments **[**20]** that would be retained by the financial institutions and brokers rather than paid out to the municipal issuers as interest. To manipulate auctions for municipal derivatives, as Class Plaintiffs allege, individuals employed by certain defendants acted as knowing conduits of pricing and bidding information before and during auctions. Moreover, Class Plaintiffs allege that derivative-provider defendants shared profits from manipulated derivative transactions with broker defendants through elaborate and disguised kickback payments.

The alleged conspiracy, as described by the Class Plaintiffs, is as vast as it is complicated. Class Plaintiffs allege corruption throughout many of the largest global financial institutions and present as victims unsophisticated and financially over-burdened towns, school districts and municipal service entities. In addition to the instant suit brought by Class Plaintiffs, scores of individual municipal plaintiffs, multiple state attorneys general and several **[*623]** federal agencies have also initiated civil, enforcement, and criminal actions arising out of the same alleged conspiracy targeted by Class Plaintiffs. News media, ranging from niche trade publications to **[**21]** Rolling Stone magazine, have reported on the investigations and subsequent civil and criminal litigation. The instant dispute implicates the substantive relationship between certain federal criminal prosecutions and the Class Plaintiffs' action, as well as the effect that early media reporting had or should have had on Class Plaintiffs' knowledge of the existence of antitrust claims against the GE Defendants.

Specifically, Class Plaintiffs ask the Court to find that the statute of limitations applicable to its claims against the GE Defendants has been tolled, pursuant to *§ 16(i)* during the pendency of the federal prosecution initiated by the October 29, 2009 indictment in United States v. Rubin/Chambers, Dunhill Insurance Services, Inc., et al., 09 Cr. 1058 (S.D.N.Y. filed Oct. 29, 2009) ("CDR"). The GE Defendants argue that even if *§16(i)* is found to toll the applicable limitations period based on the CDR indictment, early news reports of the CDR investigation put Class Plaintiffs on inquiry notice as to any related claims and started the four-year limitations period more than four years before the CDR indictment was filed. Thus, according to the GE Defendants, the limitations period **[**22]** expired before it could be tolled by *§ 16(i)*, and Class Plaintiffs' claims would be time-barred even if that statute does apply.

To determine whether *§ 16(i)* is applicable to the Class Plaintiffs' proposed claims against the GE Defendants, the Court must begin with a brief review of the CDR indictment and a related criminal proceeding.

A. THE CDR AND CAROLLO INDICTMENTS

On November 15, 2006, agents of the Federal Bureau of Investigations raided the offices of several municipal bond brokers, including the Southern California offices of a broker known as "CDR." Shortly thereafter, the Antitrust Division of the Department of Justice (the "DOJ") presented its case to a grand jury convened in the Southern District of New York. Ultimately, on October 29, 2009, the grand jury returned the CDR indictment, which named as defendants CDR and three of its executives and alleged a criminal antitrust conspiracy in the municipal derivatives industry. (See Indictment, United States v. Rubin/Chambers, Dunhill Ins. Servs., Inc. et al., 09 Cr. 1058, (S.D.N.Y. filed Oct. 29, 2009) (Docket No. 1) (the "CDR Indictment").)

Count One of the CDR Indictment alleges a "conspiracy in unreasonable restraint of interstate **[**23]** trade," which "consisted of an agreement ... to allocate and rig bids for investment agreements or other municipal finance contracts," in violation of *15 U.S.C. § 1*. (CDR Indictment 111 17, 18.) The CDR Indictment describes the "manner and means by which the conspiracy was carried out" by listing several types of actions taken by co-conspirators in furtherance of the alleged conspiracy. (Id. ¶ 19.) Some of those actions include designating winners in advance of auctions, communicating competitors' price information to bidders before and during auctions, submitting intentionally losing bids to create the appearance of competitive auctions, and paying kickbacks to brokers in the form of unearned or inflated fees. (See id.)

The GE Defendants were not included as defendants in the CDR Indictment, nor were they named expressly therein as co-conspirators. The DOJ did, however, prosecute **[*624]** former employees of a GE Defendant for related and overlapping conduct by a separate indictment. (See United States v. Carollo et al., 10 Cr. 654 (S.D.N.Y. filed July 27, 2010) (Docket No. 1) (the "Carollo Indictment").) The Carollo Indictment did not allege antitrust violations; the offenses it described **[**24]** charged only fraud and conspiracy. Further, the DOJ entered into a non-prosecution agreement with one of the GE Defendants that related to conduct at issue in the CDR prosecution and addressed violations of non-antitrust statutes. (See No. 08 Civ. 2516, Docket No. 1709 at 2.)

The Carollo Indictment presents a highly detailed account of the same scheme to manipulate the municipal derivatives market as set forth in the CDR Indictment and, in many instances, employs identical language. (See generally Carollo Indictment ¶¶ 13-21.) In fact, the Carollo Indictment describes at length actions taken by Carollo defendants, former employees of GE Defendants, in concert with CDR defendants. (See, e.g., id. ¶¶ 22-23; 28-31.) On May 11, 2012, the three former employees of the GE Defendants charged in the Carollo Indictment were convicted by a jury sitting in the Southern District of New York. During that trial, defendants named in the CDR Indictment, who had pled guilty to antitrust violations pursuant to cooperation agreements, testified at length regarding the participation of individuals working for a GE Defendant in certain transactions that constituted overt acts in furtherance of the antitrust **[**25]** conspiracy charged in the CDR Indictment.

B. THE CURRENT OPERATIVE COMPLAINT AND CLASS PLAINTIFFS' PROPOSED AMENDMENTS

The SCACAC describes the same conspiracy as the CDR Indictment. It alleges manipulation of the same set of financial instruments through the same bid-rigging conduct by the same set of institutional players. In its fifth paragraph, the SCACAC describes the alleged conspiracy using words and phrases that closely echo those found in the CDR Indictment. (SCACAC ¶ 5.) In its sixth paragraph, the SCACAC expressly identifies the conspiracy it alleges as the object of the DOJ investigation that culminated in the CDR Indictment. (Id. ¶ 6.) In its seventh paragraph, the SCACAC expressly identifies the time period at issue as "track[ing] the time period of the DOJ investigation." (Id. ¶ 7.) By the end of its brief introductory section, the SCACAC has squarely situated itself as a private, civil action seeking redress of the same illegal activity targeted by the CDR prosecution.

The SCACAC also expressly relies on the CDR Indictment and the investigation that led to that charging instrument - to establish a factual basis for the alleged conspiracy. In so doing, the SCACAC makes **[**26]** several specific allegations of facts that also provided a basis for the CDR Indictment and prosecution.

Most prominently, the SCACAC includes a section entitled, "Antitrust Division Investigation," which reviews the 2006 raid of CDR's offices, the CDR Indictment and the fact that the GE Defendants were subpoenaed in connection with the CDR investigation. (Id. ¶¶ 162-168.) Actions taken by CDR in furtherance of the conspiracy alleged in the SCACAC are set forth in at least ten separate paragraphs. (See id. ¶¶ 103, 114, 121-3, 130, 131, 137, 138 & 147.) Several employees of CDR are listed among those who "engaged in the illegal communications and conduct ... to restrain competition" and "engaged in the illegal agreement, understanding and conspiracy." (See id. ¶¶ 100-01.)

In short, the operative complaint, as it stands, advances private civil claims for the precise conduct complained of in the **[*625]** CDR Indictment. Now, Class Plaintiffs seek to include the GE Defendants as named defendants.[3]

C. EARLY MEDIA COVERAGE OF THE MUNICIPAL DERIVATIVES INVESTIGATIONS

The SCACAC also **[**27]** draws heavily from news media reports regarding potential malfeasance in and investigations of the municipal derivatives industry. Prior opinions of this Court have discussed in some depth the

[3] The Court notes that the SCACAC already expressly includes the GE Defendants as named co-conspirators. (SCACAC ¶¶ 43-44.)

effect of such media coverage upon the relevant dates for statute of limitations purposes. See generally *Hinds County V, 811 F. Supp. 2d 910*; *Hinds County IV, 790 F. Supp. 2d 121*.

In response to Class Plaintiffs' instant request to amend, the GE Defendants point to specific media reports which they assert should have put Class Plaintiffs on notice of any private civil claims that could be related to the CDR Indictment. According to the GE Defendants, the CDR investigation was publicly known at least as early as August 2005, when it was reported by Bloomberg news services. (Docket No. 1709 at 5.) As early as April 2005, the publication Bond Buyer reported on corruption at CDR, though the paper did not discuss the specific conduct at issue in the CDR Indictment. (Id.) A regional paper — The Kansas City Star — also reported on an IRS inquiry into the municipal bond market. (Id.) Earlier still, in a February 2005 bulletin, one law firm noted that those in municipal finance were aware of ongoing investigations. **[**28]** (Id.) However, no news source cited by the GE Defendants makes specific reference to the GE Defendants.

II. LEGAL STANDARDS

A. LEAVE TO AMEND

Rule 15 of the Federal Rules of Civil Procedure provides that courts "should freely give leave [to amend] when justice so requires." *Fed. R. Civ. P. 15(a) (2)*. Leave to amend should be granted unless there is "any apparent or declared reason — such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [or] futility of the amendment." *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; see also *Commander Oil Corp. v. Barlo Equip. Corp., 215 F.3d 321, 333 (2d Cir. 2000)* (noting that leave to amend is "discretionary" and should be "freely given"); *Block v. First Blood Assocs., 988 F.2d 344, 350 (2d Cir. 1993)* ("The rule in this Circuit has been to allow a party to amend its pleadings in the absence of a showing by the nonmovant of prejudice or bad faith." (citations omitted)).

An amendment may be denied as futile if it could not withstand a motion to dismiss pursuant to *Rule 12(b)(6)*. *Ricciuti v. N.Y.C. Transit Auth., 941 F.2d 119, 123 (2d Cir. 1991)* **[**29]** (citation omitted) ; *Wong v. HSBC USA, Inc., 2010 U.S. Dist. LEXIS 81058, 2010 WL 3154976, at *5 (S.D.N.Y. Aug. 9, 2010)* (quoting *Lucente v. Int'l Bus. Mach. Corp., 310 F.3d 243, 258 (2d Cir. 2002))*. Specifically, an "[a]mendment would likely be futile if . . . the claims the plaintiff sought to add would be barred by the applicable statute of limitations." *Grace v. Rosenstock, 228 F.3d 40, 53 (2d Cir. 2000)* (citation omitted).

Additionally, "a court has discretion to deny leave to amend where the **[*626]** motion is made 'after an inordinate delay, no satisfactory explanation is offered for the delay, and the amendment would prejudice other parties, or where the belated motion would unduly delay the course of proceedings by, for example, introducing new issues for discovery.'" *State Farm Ins. Cos. v. Kop-Coat, Inc., 183 F. App'x 36, 37-38 (2d Cir. 2006)* (quoting *Grace, 228 F.3d at 53-54*). Delay alone, in the absence of an additional reason such as prejudice to the opposing party, usually does not warrant denial of leave to amend. *Rachman Bag Co. v. Liberty Mut. Ins. Co., 46 F.3d 230, 234-35 (2d Cir. 1995)* (citing *State Teachers Ret. Bd. v. Fluor Corp., 654 F.2d 843, 856 (2d Cir. 1981))*.

Applying these principles, the Court **[**30]** should grant Class Plaintiffs leave to amend the SCACAC unless the GE Defendants can show that the proposed amendment would be futile because the potential claims are time-barred or that the proposed amendment comes after a prejudicial and undue delay.

B. *SECTION 16(i)*

For present purposes, the Rule 15 futility inquiry collapses into the underlying question of timeliness. In evaluating the parties' invocation of the doctrine of fraudulent concealment, the Court has already ruled that plaintiffs were on inquiry notice of the claims at issue here "at least as of November 15, 2006." See September 2011 Decision at 912. Using that date, the applicable four-year statute of limitations would have expired on November 15, 2010 unless some other statute or doctrine acted to toll the running of the clock. Class Plaintiffs argue that *§ 16 (i)*, as applied to the October 2009 CDR Indictment, does just that, rendering their claims against the GE Defendants timely and their proposed amendment not futile.

Section 16(i), in relevant part, reads:

> Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws, . . . the **[**31]** running of the statute of limitations in respect of every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter ....

15 U.S.C. § 16 (i). In analyzing the text of *§ 16(i)*, the Supreme Court of the United States has held that "a private party who brings suit for a conspiracy against which the Government has already brought suit is undeniably basing its claim in whole or in part upon the matter complained of in the Government suit." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 335-36, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. This presumption holds "even if the defendant named in the private suit was named neither as a defendant nor as a coconspirator by the Government." Id. Additionally, for *§ 16 (i)* to apply, "[t]he private plaintiff is not required to allege that the same means were used to achieve the same objectives of the same conspiracies by the same defendants." *Leh v. General Petroleum Corp., 382 U.S. 54, 59, 86 S. Ct. 203, 15 L. Ed. 2d 134 (1965)*.

Claims brought in a private antitrust suit are "based in whole or in part on" the "matter complained of" in a prior criminal antitrust **[**32]** prosecution, if "the matters complained of in the government proceeding bear a real relation to the private plaintiff's claim for relief." *Id. at 59*. In determining whether such a "real relation" exists, a court's analysis "must be limited to a comparison of the two complaints on their face." *Chipanno v. Champion Int'l Corp., 702 F.2d 827, 832-33 (9th Cir. 1983)* (quoting *Leh, 382 U.S. at 65-66*); see also *Philip* ***[*627]*** *Morris Inc. v. Heinrich, No. 95 Civ. 0328, 1996 U.S. Dist. LEXIS 9156, 1996 WL 363156, *11 (S.D.N.Y. June 25, 1996)* (applying *§ 16 (i)* by "comparing the plaintiff's complaint with the complaint in the government proceeding on which the plaintiff relies" (citing *Leh, 382 U.S. at 59*)).

Though the United States Court of Appeals for the Second Circuit has not elaborated on the "real relation" test announced by the Supreme Court in Leh, at least one court in this district has applied the Third Circuit's definition requiring that the litigations share "a 'substantial identity' in order to invoke *§ 16(i)* tolling." *Philip Morris, 1996 U.S. Dist. LEXIS 9156, 1996 WL 363156, at *11* (citing *New Jersey v. Morton Salt Co., 387 F.2d 94, 98 (3d Cir. 1967)*, cert. denied, *391 U.S. 967, 88 S. Ct. 2035, 20 L. Ed. 2d 880 (1968))*. A private action that is substantially broader than a **[**33]** prior Government action may still benefit from *§ 16(i)* tolling where the allegations in the private action incorporate the subject matter of the Government action. See *In re Antibiotic Antitrust Actions, 333 F. Supp. 317, 321 (S.D.N.Y. 1971)* (citing *Zenith Radio, 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77*); see also *In re Scrap Metal Antitrust Litig., No. 02 Civ. 0844, 2006 U.S. Dist. LEXIS 75873, 2006 WL 2850453, at *22 (N.D. Ohio 2006)* ("[S]imply because the conspiracy alleged in this case may differ slightly from the conspiracy alleged in the [Government] case, and because [a particular defendant] was not a named defendant in that case, does not automatically prevent *§ 16(i)*'s application.").

There is no dispute that the CDR prosecution represents a "criminal proceeding . . . instituted by the United States to prevent, restrain or punish violations of [an] ***antitrust law***[]." The central question presented as to *§ 16(i)*, then, is whether Class Plaintiffs' claims against the GE Defendants, as stated in the proposed amendment, are "based in whole or in part on any matter complained of in" the CDR prosecution.

C. INQUIRY NOTICE

Antitrust claims are subject to a four-year statute of limitations. See *15 U.S.C. § 15b*. When civil plaintiffs allege **[**34]** conspiracies involving bid-rigging and price-fixing in violation of *15 U.S.C. § 1*, the statute of limitations does not begin to run until the plaintiffs, in the exercise of due diligence, discover the antitrust violation. See *Hinds County I, 700 F. Supp. 2d at 399*; *In re Nine West Shoes Antitrust Litig., 80 F. Supp. 2d 181, 192 (S.D.N.Y. 2000))*.

As a general matter, the question of whether specific media reports serve to put a diligent plaintiff on inquiry notice involves an objective inquiry into whether the totality of the circumstances revealed probable — and not merely possible — illegal activity attributable to the defendants named in the complaint and of the type described therein. See *Staehr v. Hartford Fin. Servs. Group, Inc., 547 F.3d 406, 427 (2d Cir. 2008)* (describing inquiry notice in context of securities fraud action). "Inquiry notice may be found as a matter of law only when uncontroverted evidence clearly demonstrates when the plaintiff should have discovered the fraudulent conduct." Id. (citation omitted).

Here, the Court has already found that individual antitrust plaintiffs should have been on notice of the conspiracy at issue at least as of the November 15, 2006 raids **[**35]** on the offices of CDR and other co-conspirators. The GE Defendants contend that, assuming Class Plaintiffs acted diligently, they were on inquiry notice of any claims that would be related to the CDR Indictment at least as of early 2005, when the first general reports of investigations into the municipal bond market were published. If Class Plaintiffs were on inquiry notice of **[*628]** the claims at that point, the statute of limitations would have expired in early 2009, prior to the October 2009 CDR Indictment, rendering ineffectual the operation of *§ 16 (i)* based on that prosecution.

The inquiry notice question presented, therefore, is whether Class Plaintiffs were on notice of their claims against the GE Defendants sometime prior to October 2005.

III. ANALYSIS

The Court's analysis below supports the following conclusions: First, that Class Plaintiffs' claims against the GE Defendants demonstrate a "real relation" to the matters complained of in the CDR Indictment, and, accordingly, that *§ 16 (i)* functions to toll the statute of limitation during the pendency of the CDR prosecution. Second, that the GE Defendants cannot establish that Class Plaintiffs were on inquiry notice prior to October **[**36]** 2005, and, as such, that the statute of limitations did not begin to run until less than four years before to the CDR Indictment was filed. Third, because *§ 16(i)* applies and the statute of limitations had not expired prior to October 2009, the pendency of the CDR prosecution tolls the relevant statute of limitations and renders Class Plaintiffs' claims timely and the proposed amendment not futile. Fourth and finally, the Court finds that Class Plaintiffs have not unduly delayed seeking to amend their pleadings to name the GE Defendants. Because the proposed amendment is neither futile nor sought after undue delay, the Court will grant Class Plaintiffs' request to file a Third Amended Class Action Complaint.

A. SECTION 16(i) APPLIES TO CLASS PLAINTIFFS' CLAIMS

To determine whether or not Class Plaintiffs' claims against the GE Defendants are "based in whole or in part on any matter complained of in" the CDR prosecution, the Court need look only at the faces of the CDR indictment and SCACAC. As detailed above, these two documents alleged substantially the same conspiracy.

Where, as here, the private civil action alleges a conspiracy that uses substantially similar means to accomplish the **[**37]** same anticompetitive goal in the same market as the prior government suit, *§ 16(i)* is applicable. See, e.g., *Philip Morris, 1996 U.S. Dist. LEXIS 9156, [WL] at *11* (applying *§ 16 (i)* where civil plaintiff "makes the same allegations . . . elaborating upon the mechanics of the scheme"); *Chipanno, 702 F.2d at 832-33* (applying *§ 16(i)* because "[p]laintiffs' complaint alleged a conspiracy that included the objectives, means, time span, and geographic scope of the conspiracy alleged in the government suit").

The conspiracy alleged by Class Plaintiffs is inarguably based on the conspiracy alleged by the Government in the CDR Indictment. As such, there can be no reasonable doubt that a "real relation" exists between the CDR Indictment and Class Plaintiffs' claims against the GE Defendants.

Nevertheless, the GE Defendants assert that *§ 16 (i)* should not be applied to claims against them because the Government did not name their former employees as CDR's co-conspirators. Rather, the Government chose to indict certain former employees of the GE Defendants under statutes outside of the antitrust laws for conduct indisputably related to the antitrust conspiracy alleged in the CDR Indictment. Similarly, one of the GE Defendants

[38]** itself entered into a non-prosecution agreement with the DOJ that did not include antitrust violations in its scope, though, again, it related to the same underlying conduct. Based on those Government charging decisions, the GE Defendants argue that the Government has **[*629]** stated a definitive position that the GE Defendants' conduct did not violate antitrust laws. (See Docket No. 1709 at 2-4.) The Court is not persuaded. Neither law nor basic logic supports the GE Defendants' theory.

First, the argument cannot stand as a matter of law. Decades ago, the Supreme Court interpreted *§ 16(i)* to apply to claims against private, civil defendants who were not named as co-defendants or co-conspirators in the related, prior Government action. See *Zenith Radio, 401 U.S. at 335*. In Zenith Radio, the Court was unequivocal: "If . . . the government sues only certain conspirators, but also alleges and proves during trial that others were conspirators, the fact of the tolling of the statute against those so proved but not sued can hardly be denied." Id. Further, even if, in the course of its prior action, the government does not prove that a specific defendant was a co-conspirator, *§ 16 (i)* may still apply **[**39]** if the later private plaintiff can prove as much. See id. Neither the Supreme Court nor any court applying Zenith Radio has created an exception from *§ 16(i)* to exempt putative private civil defendants who have been charged by the Government for non-antitrust offenses indisputably related to the same underlying conduct. This Court declines to do so now.

Second, the GE Defendants have presented no explanation for how the particular charging strategy — adopted by the DOJ serves to alter the relationship between the CDR Indictment and the Class Plaintiffs' claims which, of course, is the only subject of inquiry mandated by *§ 16 (i)*.[4] Leh limits the Court's inquiry to the faces of the CDR Indictment and the Class Plaintiffs' pleading to determine whether or not *§ 16 (i)* applies. See *Leh, 382 U.S. at 65*. The GE Defendants' argument asks the Court to ignore the Supreme Court's rule in Leh and to speculate as to an array of conceivable conclusions implicit in prosecutorial decisions; the Court declines that invitation. Cf. *Novell, Inc. v. Microsoft Corp., 505 F.3d 302, 321 (4th Cir. 2007)* (rejecting "reading [that] would require us to look beyond the face of the DOJ complaint").

The application **[**40]** of *§ 16 (i)* to Class Plaintiffs' claims against the GE Defendants also advances the fundamental and repeatedly recognized Congressional purpose in enacting *§ 16 (i)*. "[T]he tolling provision is primarily [intended] to enable private litigants to have the benefit of the final judgment in the government's case . . . [and] also to enable the private litigants to have the benefit of whatever clarification of either the facts or the law the government's litigation may provide." *In re Lower Lake Erie Iron Ore Litig., MDL 587, 1987 U.S. Dist. LEXIS 2932, 1987 WL 4775, at *1 (E.D.Pa. Apr. 13, 1987)*; see also, *Chipanno, 702 F.2d at 832* .("[E]vidence adduced in the trial of the government suit would be of practical assistance to plaintiffs in proving their own complaint [and i]t was precisely the purpose of *[§] 16(i)* to provide such assistance to private antitrust complainants."). As the Supreme Court explained in Zenith Radio,

> holding that *[§] 16([i])* tolls the statute of limitations against all participants in a **[*630]** conspiracy which is the object of a Government suit, whether or not they are named as defendants or conspirators therein . . . materially furthers congressional policy by permitting private litigants to await **[**41]** the outcome of Government suits and use the benefits accruing therefrom.

401 U.S. at 336. Applying *§ 16 (i)* to Class Plaintiffs' claims against the GE Defendants gives effect to the statute's purpose by allowing Class Plaintiffs to benefit from the Government proceedings that have preceded their amended claims.

---

[4] The Court is certainly not tasked with examining any other criminal indictments or filings in an effort to divine the Government's possible rationales for its charging decisions. See *Morton Salt, 387 F.2d at 97* ("[T]he absence of complete identity of defendants may be explained on several grounds unrelated to the question of whether the private claimant's suit is based on matters of which the Government complained. [S]ome of the conspirators whose activities injured the private claimant may have been too low in the conspiracy to be selected as named defendants or co-conspirators in the Government's necessarily broader net." (internal quotations and citation omitted)).

Beyond the specific policies animating the statute, its broader remedial purpose compels courts to liberally construe *§ 16(i)*. The Supreme Court has instructed that "effect must be given to the broad terms of the **[**42]** statute itself — based in whole or in part on any matter complained of — read in light of Congress' belief that private antitrust litigation is one of the surest weapons for effective enforcement of the antitrust laws." *Leh, 382 U.S. at 59* (internal quotation and alterations omitted). "[T]he tolling provision was enacted for the benefit of private parties who were injured[, which] suggest[s] most strongly that the tolling provision, if of doubtful meaning, should be interpreted in a way which will permit a determination on their merits of private claims in this area." *Morton Salt, 387 F.2d at 97*.

Finally, the exception to *§ 16 (i)* advanced by the GE Defendants would also be untenable as a matter of common sense, given the Supreme Court's application of *§ 16(i)* to un-indicted co-conspirators in Zenith Radio: It would place possible co-conspirators against whom the Government alleges non-antitrust criminal charges in a better position than possible co-conspirators against whom the Government brings no charges whatsoever. There is simply nothing in either the statute or the case law to compel such a peculiar and potentially inequitable result.[5]

B. THE GE DEFENDANTS HAVE NOT ESTABLISHED THAT THE CLASS PLAINTIFFS WERE ON INQUIRY NOTICE OF THEIR CLAIMS PRIOR TO OCTOBER 2004

This Court has already held that "the quantity of information about government investigations into the alleged antitrust conspiracy" available to a plaintiff "in January 2005 was simply too meager, particularly in light of the fact that [the moving defendant] was not identified as a possible target," to trigger inquiry notice at that point. See *Hinds County IV, 790 F. Supp. 2d at 124*. Thus, as the basis for their inquiry notice argument here, the GE Defendants advance a set of media reports from between January and August 2005. These reports — which do not mention **[**44]** the GE Defendants and appear to discuss broadly an ongoing and general investigation into the municipal bonds industry — are similarly "simply too meager" to hold that Class Plaintiffs should have recognized in them claims against the GE Defendants. See *id. at 124* (citing *GO Computer, Inc. v. Microsoft Corp., 508 F.3d 170, 178-79 (4th Cir. 2007))*; cf. *Lentell v. Merrill Lynch & Co., 396 F.3d 161, 170 (2d Cir. 2005)* (finding, in securities fraud context, **[*631]** that "numerous generic articles on the subject of structural conflicts appear[ing] in the financial press" insufficient to trigger inquiry notice).

Guidance from the Second Circuit in the securities fraud context cements this conclusion. First, the Second Circuit has instructed that, to trigger inquiry notice, the publications in question must provide "indications of the probability (and not just possibility)" of the relevant claims. *Staehr, 547 F.3d at 430* (internal citations omitted). Even if the articles put forward by the GE Defendants should have suggested the possibility that class antitrust claims might be brought against them, such publications did not come close to suggesting that such claims were probable. The suggestion of **[**45]** probable claims necessary to trigger inquiry notice must also be defendant-specific, in contrast to the analysis required in the *§ 16 (i)* context described above. See id. ("The media reports cited by Appellees at most suggest the potential for conflicts of interest involving some insurers, but not the probability of fraud by The Hartford."); June 2011 Decision at 124 (finding January 2005 articles failed to trigger inquiry notice because specific defendant "was not identified as a possible target" of the investigation). The articles cited here do not suggest a probable claim against the GE Defendants.

Additionally, the GE Defendants rely upon an article prepared by a law firm, Thorpe, Reed & Armstrong, presumably distributed for the firm's promotional purposes. Given that article's status as specialty publications with unknown but undoubtedly limited readerships, the Court "cannot conclude" that a reasonable antitrust plaintiff "would have encountered th[is] article[]." *Staehr, 547 F.3d at 434*. It seems the same can safely be said for the article published in The Kansas City Star.

---

[5] The cases cited by the GE Defendants provide **[**43]** no support for their position. Each case refusing to apply *§ 16 (i)* did so on the grounds that the private, civil plaintiffs alleged a conspiracy in a different market than the earlier, Government action. See, e.g., *Novell, 505 F.3d at 321* ("The DOJ complaint only expressly alleges harm to the markets for PC operating systems and for Internet browsers. Novell's allegations of harm to the office-productivity-applications market, therefore, overlap little with the subject matter of the DOJ complaint.").

Further, as Class Plaintiffs point out, to accept the GE Defendants' position here would be to effectively **[**46]** initiate the limitations period and thus bar legal action against every player in an industry based on the moment any newspaper publishes a report on potential antitrust violations by any actor in that field. Under these facts, the GE Defendants' position would not be restricted by any reasonable limiting principle.

In sum, because the articles presented to the Court do not amount to "uncontroverted evidence [that] clearly demonstrates when the plaintiff should have discovered" the antitrust violations of the GE Defendants, id. at 427, the Court cannot find that the statute of limitations began running prior to November 15, 2006.

Accordingly, the four-year statute of limitations had not expired as of the October 2009 indictment of CDR. As the CDR prosecution then tolled the statute of limitations with respect to Class Plaintiffs' claims against the GE Defendants, those claims are still timely and the proposed amendment is not futile.

C. CLASS PLAINTIFFS' AMENDMENT WAS NOT UNDULY DELAYED

The Court is not persuaded that Class Plaintiffs' request to amend should be denied on the basis of undue delay for two independent reasons.

First, even assuming that the delay was undue, the GE Defendants **[**47]** have not shown that they have suffered any prejudice from the elapsed time. In their earlier letter submission regarding undue delay, the GE Defendants failed to even imply that any prejudice would result from Class Plaintiffs' allegedly belated amendment. (See Docket No. 1683 at 3.) Without prejudice to the opposing party or some other reason, even an extended delay does **[*632]** not mandate denial of leave to amend. See *Rachman Bag Co., 46 F.3d at 234-35*.

Second, there was good reason for Class Plaintiffs to wait before seeking to amend their complaint to add the GE Defendants, so any delay was certainly not "undue." Moreover, this good reason relates directly to the discussion of *§ 16(i)* above: Class Plaintiffs were gathering information and evidence from the ongoing criminal proceedings. (See Docket No. 1678.) Class Plaintiffs have been closely tracking the CDR prosecution, and the very purpose of *§ 16 (i)* is to permit them to do just that in an effort to buttress or develop their claims against any of CDR's co-conspirators. Were the Court to find undue delay here, it would stifle the purposes of *§ 16(i)* through a discretionary denial of leave to amend, which is, of course, to be "freely **[**48]** give[n]." *Fed. R. Civ. P. 15(a)(2)*. In the absence of prejudice to the GE Defendants, such an exercise of the Court's discretion would be improper.

IV. ORDER

For the reasons discussed above, it is hereby

ORDERED that, the Class Plaintiffs' motion for leave to amend the Second Amended Class Action Complaint, deemed contained in their March 5, 2012 letter (Docket No. 1678), is GRANTED.

SO ORDERED.

690 F.3d 51 *; 2012 U.S. App. LEXIS 16330 **; 2012-2 Trade Cas. (CCH) P78,000; 2012 WL 3156156

IN RE: PUBLICATION PAPER ANTITRUST LITIGATION

Subsequent History: US Supreme Court certiorari denied by *Stora Enso N. Am. v. Parliament Paper, Inc., 133 S. Ct. 940, 184 L. Ed. 2d 725, 2013 U.S. LEXIS 829 (U.S., 2013)*

Motion denied by *In re Publ'n Paper Antitrust Litig., 2013 U.S. Dist. LEXIS 89496 (D. Conn., June 20, 2013)*

Prior History: [1]** Appeal from a judgment of the U.S. District Court for the District of Connecticut (Stefan R. Underhill, Judge), awarding summary judgment to defendants Stora Enso North America Corporation ("SENA") and Stora Enso Oyj ("SEO") in an antitrust class action alleging a conspiracy to fix prices in violation of section 1 of the Sherman Act, *15 U.S.C. § 1*. We hold that the district court erred in granting summary judgment to SENA because a jury could reasonably find that SENA and former defendants UPM-Kymmene Corporation and UPM-Kymmene, Inc., reached an unlawful agreement to raise the price of publication paper, and that this agreement injured plaintiffs. We also conclude that the district court properly granted summary judgment to SEO because plaintiffs failed to offer sufficient evidence from which a jury could reasonably conclude that SEO had any direct involvement in decisions regarding the marketing, sale, or pricing of publication paper in the United States. Accordingly, we vacate the district court's judgment in part, affirm it in part, and remand the case for further proceedings consistent with this opinion.

Parliament Paper, Inc. v. Stora Enso Oyj (In re Publ'n Paper Antitrust Litig.), 2010 U.S. Dist. LEXIS 131931 (D. Conn., Dec. 14, 2010)

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN1[] Cartels & Horizontal Restraints, Price Fixing

An appellate court's task on appeal of a grant of summary judgment in an antitrust class action alleging a conspiracy to fix prices in violation of *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, is to determine whether, on the evidence presented, a jury could reasonably conclude that defendants reached an agreement for the purpose and with the effect of raising the price of their products. This requires evidence sufficient to permit a preponderance finding that higher prices came about as a result of the agreement, rather than through independent action of the defendants.

HN2[] Standards of Review, De Novo Review

An appellate court reviews de novo a district court's grant of summary judgment. The court will affirm only if, after construing the evidence in the light most favorable to the non-moving party and drawing all reasonable inferences in its favor, there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law, *Fed. R. Civ. P. 56(a)*.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] Antitrust & Trade Law, Sherman Act

The United States Court of Appeals for the Second Circuit has observed that by avoiding wasteful trials and preventing lengthy litigation that may have a chilling effect on pro-competitive market forces, summary judgment serves a vital function in the area of ***antitrust law***. Nevertheless, summary judgment is not a substitute for trial. Thus, when the evidence admits of competing permissible inferences with regard to whether a plaintiff is entitled to relief, the question of what weight should be assigned to those inferences remains within the province of the fact-finder at a trial.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN4[] Per Se Rule & Rule of Reason, Per Se Violations

Section 1 of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce is illegal. *15 U.S.C.S. § 1*. Notwithstanding its broad language, this provision prohibits only unreasonable restraints of trade. Per se liability attaches, however, to plainly anticompetitive agreements. An agreement between competitors to fix prices, known as a horizontal price-fixing agreement, categorically constitutes an unreasonable restraint, and, accordingly, is unlawful per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN5[] **Cartels & Horizontal Restraints, Price Fixing**

To prevail on a claim of horizontal price fixing, a plaintiff must demonstrate that the defendants entered into a conspiracy formed for the purpose and with the effect of raising prices. In other words, the evidence must show that: (1) the defendants conspired to raise prices, and (2) this conspiracy caused injury to the plaintiff in the form of artificially inflated prices.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN6[] **Sherman Act, Defenses**

Parallel pricing among competitors, also known as conscious parallelism, is often proffered as evidence of a price-fixing agreement. Conscious parallelism describes the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN7[] **Sherman Act, Defenses**

Conscious parallelism alone does not establish an antitrust violation. Such behavior is consistent with both unlawful conspiracy and lawful independent conduct. Accordingly, when the defendants' parallel pricing forms the basis for a price-fixing claim, a plaintiff must show additional circumstances—often referred to as "plus factors" — which, when viewed in conjunction with the parallel conduct, would permit a fact-finder to infer a conspiracy. Such plus factors may include, for example: a common motive to conspire; evidence that the parallel acts were against the apparent economic self-interest of the individual alleged conspirators; or evidence of a high level of interfirm communications.

HN9[] **Sherman Act, Claims**

To survive a motion for summary judgment a plaintiff seeking damages for a violation of *§ 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, must present evidence that "tends to exclude the possibility" that the alleged conspirators acted independently.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN10[] **Clayton Act, Claims**

Matsushita stands for the proposition that substantive ***antitrust law*** limits the range of permissible inferences that may be drawn from ambiguous evidence. It further holds that the range of inferences that may be draw from such evidence depends on the plausibility of the plaintiff's theory. Thus, where a plaintiff's theory of recovery is implausible, it takes strong direct or circumstantial evidence to satisfy Matsushita's tends to exclude standard. By contrast, broader inferences are permitted, and the tends to exclude standard is more easily satisfied, when the conspiracy is economically sensible for the alleged conspirators to undertake and the challenged activities could not reasonably be perceived as procompetitive. Matsushita demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN11[] Cartels & Horizontal Restraints, Price Fixing

Requiring a plaintiff to exclude or dispel the possibility of independent action in a horizontal price fixing claim under *15 U.S.C.S. § 1* places too heavy a burden on the plaintiff. Rather, if a plaintiff relies on ambiguous evidence to prove its claim, the existence of a conspiracy must be a reasonable inference that the jury could draw from that evidence; it need not be the sole inference. It is important not to be misled by Matsushita's statement that the plaintiff's evidence, if it is to prevail, must tend to exclude the possibility that the alleged conspirators acted independently. The U.S. Supreme Court surely did not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct. Not only did the court use the word "tend," but the context made clear that the Court was simply requiring sufficient evidence to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN12[] Clayton Act, Claims

The standards established in Matsushita do not apply at all when a plaintiff has produced unambiguous evidence of an agreement to fix prices. As such, an admission by the defendants that they agreed to fix their prices is all the proof a plaintiff needs. Thus, at least three circuits have held that summary judgment is generally not appropriate where a plaintiff has produced direct, as opposed to circumstantial, evidence of an agreement to fix prices. Some courts have reached this conclusion by reasoning that direct evidence requires no inferences to establish the proposition or conclusion being asserted.

Evidence > Admissibility > Circumstantial & Direct Evidence

HN13[] Admissibility, Circumstantial & Direct Evidence

All evidence, including direct evidence, can sometimes require a factfinder to draw inferences to reach a particular conclusion, though perhaps on average circumstantial evidence requires a longer chain of inferences.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > Claims

HN14[] Clayton Act, Claims

The U.S. Supreme Court has noted that it is enough that the illegality is shown to be a material cause of the antitrust injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling its burden of proving compensable injury. The United States Court of Appeals for the Second Circuit has also observed that an antitrust defendant's unlawful conduct need not be the sole cause of the plaintiffs' alleged injuries; to prove a causal connection between the defendant's unlawful conduct and the plaintiff's injury, the plaintiff need only demonstrate that the defendant's conduct was a substantial or materially contributing factor in producing that injury. The Second Circuit has held further that to prevail on an antitrust claim, a plaintiff must establish that the injuries alleged would not have occurred but for the defendant's antitrust violation, adding necessity to the materiality requirement of the antitrust causation analysis.

Antitrust & Trade Law > Clayton Act > Claims

HN15[] **Clayton Act, Claims**

Common law principles of causation derived from tort and contract law are applied to determine whether the plaintiff has sufficiently alleged an antitrust injury under § 4 of the Clayton Act, *15 U.S.C.S. § 15*.

Torts > ... > Elements > Causation > General Overview

Torts > ... > Causation > Proximate Cause > General Overview

HN16[] **Elements, Causation**

There is a causal link between an act or activity and an injury when the court concludes on the basis of the available evidence that the recurrence of that act or activity will increase the chances that the injury will also occur. In other words, if an act is deemed wrongful because it is believed significantly to increase the risk of a particular injury, the court is entitled—in the tort context at least—to presume that such an injury, if it occurred, was caused by the act. Under this framework, the burden then shifts to the defendant to bring in evidence tending to rebut the strong inference, arising from the injury, that the act was in fact a but-for cause of the plaintiff's injury.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > Claims

HN17[] **Clayton Act, Claims**

In considering the causal link between an agreement to raise prices and a subsequent price increase, price-fixing agreements are conclusively presumed to be unreasonable and therefore illegal precisely because of their pernicious effect on competition and lack of any redeeming virtue—that is, because such agreements are so likely to result in artificially higher prices being charged to consumers without accomplishing any legitimate business purpose. Furthermore, the causal link is presumed to be particularly strong when the agreement is between executives at rival companies, each of whom has final pricing authority.

Judges: BEFORE: CALABRESI, RAGGI, and CARNEY, Circuit Judges.

Opinion by: SUSAN L. CARNEY

Opinion

[*55] SUSAN L. CARNEY, *Circuit Judge*:

Plaintiffs appeal from an award of summary judgment to defendants in an antitrust class action alleging a conspiracy to fix prices in violation of section 1 of the Sherman Act, *15 U.S.C. § 1*. Defendants Stora Enso North America Corporation ("SENA") and Stora Enso Oyj ("SEO") and former defendants UPM-Kymmene Corporation and UPM-Kymmene, **[**3]** Inc. (together, "UPM") are manufacturers and sellers of "publication paper," a type of paper used in preparing printed material of various types. Plaintiffs—a certified class consisting of direct purchasers of defendants' paper products—contend that, in the relevant period, they paid higher prices for publication paper than they would have in the absence of the alleged price-fixing agreement.

Plaintiffs' theory of conspiracy is relatively simple. In August and November 2002, and again in February 2003, SENA and UPM—as well as several other publication paper manufacturers—raised their list prices for certain types of publication paper. The price hikes mirrored each other in amount and occurred in close succession. Plaintiffs maintain that SENA and UPM instituted these three price increases pursuant to an agreement, rather than independently. Plaintiffs also contend that, in the same time frame, SENA and UPM coordinated the closure of paper mills in order to reduce the supply of publication paper, and that SEO played a material role in the overall price-fixing scheme. The U.S. District Court for the District of Connecticut (Stefan R. Underhill, *J.*) concluded that defendants were entitled **[**4]** to summary judgment on all counts because, in its view, and in light of the standards articulated by the Supreme Court in *Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, plaintiffs "failed to offer sufficient evidence to dispel the possibility that SENA and UPM acted independently." *In re Publication Paper Antitrust Litig., No. 3:04-md-1631, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *13 (D. Conn. Dec. 14, 2010)*.

We hold that the district court erred in granting summary judgment to SENA because a jury could reasonably find that SENA and UPM entered into an agreement to raise the price of publication paper, and that, as implemented, this agreement damaged plaintiffs. SENA was thus not entitled to judgment as a matter of law. As to SEO, however, we conclude that the district court properly awarded it summary judgment because plaintiffs failed to offer sufficient evidence from which a jury could reasonably conclude that SEO had any direct involvement in decisions regarding SENA's marketing, sale, or pricing of publication paper in the United States. Accordingly, we vacate the district court's judgment in part, affirm it in part, and remand the case for further proceedings consistent **[**5]** with this opinion.

I. BACKGROUND

Unless otherwise noted, the following facts are not disputed by the parties.

A. The Parties

SEO is a pulp and paper manufacturer headquartered in Helsinki, Finland. In August 2000, SEO acquired Consolidated Papers, Inc., an American paper manufacturer located in Wisconsin. Thereafter, Consolidated

Papers—renamed SENA—operated as a subsidiary of SEO. From August 2000 until May 2003, Kai Korhonen was President of SENA. Under Korhonen's **[*56]** leadership, SENA's sales and marketing team would recommend to him whether SENA should initiate a price increase or follow a price increase previously announced by a competitor. As President, Korhonen had the "final say" over SENA's pricing strategy and decisions. Trial Tr. at 262.[1]

UPM is also a pulp and paper manufacturer headquartered in Helsinki. In January 2002, Markku Tynkkynen became President of UPM's Magazine Paper Division. In this role, Tynkkynen **[**6]** had responsibility for, and "final authority" over, UPM's pricing of publication paper in the United States. Dep. of Markku Tynkkynen, Jan. 22, 2009, at 18.

B. The Publication Paper Industry

"Commercial paper" is a type of publication paper that is used for printing and advertising. Manufactured in several different grades, some of which are numbered 1 through 5, its quality ranges from "fine" (the most expensive type) to "supercalendered" (the least expensive). Fine paper—categorized in the industry as including grades 1, 2, and 3—is typically used for high-end publications. Magazine paper—comprised of grades 4 and 5—is generally used in ordinary magazines and store catalogues. Supercalendered paper—which is not assigned grade numbers—is often used to print the advertising inserts found in newspapers.

The present action involves "publication paper," which, for purposes of this litigation, is defined as grades 3, 4, and 5 of "coated" commercial paper.[2] The publication paper that plaintiffs purchased thus includes the coated products of some fine, and all magazine, paper. Publication paper is commonly considered a commodity product—i.e., a product that is uniform rather than differentiated **[**7]** across sellers. The publication paper market in North America is an oligopoly.

In 2002 and 2003, when the price-fixing agreement is alleged to have been made and implemented, International Paper ("IP"), SENA, and UPM ranked first, second, and third, respectively, in volume of production of publication paper in North America. Each had a market share of between 17% and 21%; their combined market shares totaled approximately 60%.[3] During the same two-year period, publication paper was selling at historically low prices, and the industry suffered from excess capacity and low demand.[4] Despite these unfavorable conditions, in August 2002, IP and MeadWestvaco ("Mead"), another publication paper manufacturer, both announced price increases; in November 2002, Mead announced a price increase; and in February 2003, IP announced a price increase. Both in the timing of the announcements and the amount of the increases, SENA and UPM's price increases in August and November 2002 and in February 2003 closely followed those **[**8]** of their competitors.

C. The Alleged Conspiracy

The conspiracy alleged in this action centers around certain private meetings **[*57]** and phone calls between Korhonen and Tynkkynen that undisputedly occurred soon before each of these three price increase announcements.

---

[1] Citations to the "Trial Tr." refer to the transcript of SENA's criminal trial on alleged antitrust violations (discussed *infra*). In addition, we make a few citations to materials contained in the sealed appendix. With respect to that material only, we hereby lift the seal.

[2] Plaintiffs describe "coated" papers as "papers that contain a layer of coating material . . . in combination with an adhesive on one or both surface(s) of the paper." Compl. ¶ 6.

[3] The individual market shares at the time of other publication paper producers are unclear from the record.

[4] The parties dispute whether demand for publication paper increased in the latter half of 2002 and in 2003.

The two men originally met in Finland in the late 1970s, when both were working as production engineers for Ahlström Company. During the approximately five years that they worked together, they were also neighbors, and became close friends. Tynkkynen left Ahlström Company in 1982; Korhonen, however, remained at the firm, which was later acquired by a predecessor company to SEO. Over the twenty years following Tynkkynen's departure, despite their earlier close friendship, Korhonen and Tynkkynen saw each other only on occasion, their interactions typically limited to social settings and meetings of the Finnish Paper Engineers Association, of which they were both members.

1. The August 2002 Price Increase

In August 2002, soon **[**9]** after he became President of UPM's Magazine Paper Division and twenty years after they last worked as colleagues, Tynkkynen invited Korhonen, who by then had become President of SENA, to lunch. As he later testified at SENA's criminal trial, Tynkkynen wanted Korhonen to provide him with insight into operating in the North American market, a market with which Tynkkynen was unfamiliar. Tynkkynen also sought to determine whether SENA had sufficient market power to lead a price increase in the United States.

In response to Tynkkynen's invitation, Tynkkynen and Korhonen met for approximately 90 minutes on August 8 in a private executive lunchroom at UPM's headquarters in Helsinki. During the meeting, Korhonen expressed his opinion that, contrary to Tynkkynen's view, SENA was not a market leader for coated grade 5 or supercalendered paper. Tynkkynen and Korhonen estimated that together SENA and UPM likely would have a combined 40% market share for coated grade 5 paper. Tynkkynen advised Korhonen, "UPM has been a follower and will be a follower"—meaning that UPM would follow price increases announced by any major competitor and would also try to implement those increases consistently with **[**10]** its customers.[5] Trial Tr. at 177, 104. No one else was present during the meeting, and Korhonen did not disclose to anyone at SENA that he met with Tynkkynen or mention the substance of their discussion.

The following day, on August 9, IP and Mead announced a $2 per hundredweight ("cwt.") price increase for publication paper grades 2 through 4 effective October 1, 2002. Four days later, on August 13, SENA issued an identical announcement as to price, paper grades, and effective date. On August 21, UPM announced its $2 per cwt. price increase for publication paper grades 3 and 4, on the same schedule. (According to plaintiffs, UPM sold little or no grade 2 publication paper in the United States at that time.)

2. The November 2002 Price Increase

On November 6, again at Tynkkynen's invitation, **[**11]** Korhonen and Tynkkynen met at the Chicago O'Hare airport and had lunch together in a private dining room at the O'Hare Hilton Hotel. During their meeting, Korhonen and Tynkkynen discussed the poor economic conditions in the **[*58]** industry: prices were eroding because of an excess supply. Notwithstanding the August price increase, which had become effective approximately five weeks earlier, they agreed that the industry was in need of a price increase. Tynkkynen again advised Korhonen that UPM would follow if a competitor announced a price increase. Apart from his personal assistant, who arranged his itinerary, Korhonen did not disclose to anyone at SENA that he met with Tynkkynen.

The following week, on November 15, Mead announced a $2 per cwt. price increase for publication paper grades 1 through 4 effective January 1, 2003. On November 19, after UPM had decided to follow Mead's price increase but before any public announcement was made, Tynkkynen called Korhonen and left a voicemail stating, "Mead is out, we are following." *Id*. at 118. Korhonen did not return the call. The following day, on November 20, both SENA and

---

[5] To implement a price increase once it is announced, manufacturers in the publication paper industry (as, surely, in many industries) engage in individualized negotiations with customers to try to persuade them to accept all or part of the price increase, while customers—particularly larger ones with more leverage—attempt to convince the vendor not to apply the full proposed price increase to their accounts.

IP announced a $2 per cwt. price increase for publication paper grades **[**12]** 2 through 4, also effective January 1, 2003. Two days later, on November 22, UPM issued a written announcement declaring a $2 per cwt. price increase for publication paper grades 2 through 4, also effective as of the turn of the year.

3. The February 2003 Price Increase

On February 3, 2003, executives at IP decided at an internal meeting to increase the price of their grade 5 publication paper, subject to final approval by senior IP officials. Three days later, on February 6, Korhonen called Tynkkynen. Each man asserts that he does not remember exactly what was discussed during the call, which lasted approximately five minutes.[6]

On February 10, IP publicly announced a $3 per cwt. price increase for grade 5 publication paper effective April 1, 2003. The following morning, on February 11, Korhonen called Tynkkynen and left a message requesting that Tynkkynen return his call. That afternoon, Tynkkynen called Korhonen, and the two men spoke for four minutes. During the call, Korhonen told Tynkkynen, "IP's out and [SENA] will match and follow." *Id*. at 84. Tynkkynen understood "match and follow" to mean that SENA would follow IP's price increase and also would "implement [the price increase] seriously" at the customer end—in other words, that SENA would hold a hard line in negotiating with customers. *Id*. Tynkkynen informed Korhonen that UPM had notified some of its customers of its intention to match IP's price increase. Approximately one half-hour after the men's phone call, SENA e-mailed and faxed a brief letter to its customers announcing a $3 per cwt. price increase for grade 5 paper, coated grade 4 paper, and supercalendered products. **[**14]** That same afternoon, UPM mailed a bulletin to its customers in which it, too, announced a $3 per cwt. price increase for grade 5 publication paper. Both price increases were to take effect April 1.

After Korhonen and Tynkkynen's conversation on February 11, Tynkkynen advised Kevin Lyden, President of UPM's **[*59]** North American subsidiary, that he thought SENA was "going to be tough on the price increase" it had announced. Dep. of Peter Littley, Feb. 18, 2010, at 14. Lyden understood Tynkkynen's statement to mean that SENA would stand firm on its price increase when negotiating contracts with its customers. According to Lyden, Tynkkynen's assessment of how aggressively SENA would implement the price increase was based, in part, on his February 11 phone call with Korhonen.

D. The Department of Justice Investigation and SENA's Criminal Trial

In 2004, the United States Department of Justice ("DOJ") launched a criminal antitrust investigation into the publication paper industry. In July 2004, after learning that government investigators sought to interview him in relation to the investigation, Tynkkynen called Korhonen from a public telephone booth. Tynkkynen concedes that he used a public telephone **[**15]** in order to ensure that he "ha[d] a clean line"—i.e., a phone line that was not being "followed or taped" by law enforcement authorities. Dep. of Markku Tynkkynen, Jan. 22, 2009, at 136. During their conversation, Tynkkynen proposed that he and Korhonen develop a "joint story" concerning what they had discussed during their private phone calls and meetings. Trial Tr. at 133. Korhonen concurred that developing a "joint story" was "a good idea." *Id*. They decided that if interviewed, they would tell law enforcement officials that in their conversations in 2002 and 2003 they discussed railroad fees, timber swaps, and the Finnish Paper Engineers Association. Pricing was not among those topics that they agreed to identify as having been discussed. (Later, in an

---

[6] The parties dispute whether, when they spoke, either Korhonen or Tynkkynen (or both) were aware of IP's possible price increase. Asked at SENA's criminal trial what prompted him to call Tynkkynen, Korhonen testified that he did not have a "specific recollection" of the phone call, but that it "c[ould] be related to" IP's price increase. Trial Tr. at 308. In a subsequent declaration, however, Korhonen asserted that during the February 6 phone call he did not discuss with Tynkkynen "any specific price increase or a possible price increase." Decl. of Kai Korhonen **[**13]** in Supp. of Defs. SEO and SENA's Mot. for Summ. J. ¶ 39. Tynkkynen contends that Tynkkynen first learned of IP's plan to raise its prices on February 8, two days after the phone call.

August 2004 phone call, Tynkkynen told Korhonen that he intended to tell the government "everything" that he remembered about their meetings, rather than the "joint story" they had discussed in July. *Id*. at 135-36.)

In February 2006, the DOJ granted conditional full immunity to UPM in return for the company's cooperation in the price-fixing investigation. In December 2006, a grand jury issued a one-count indictment against SENA charging **[**16]** that from August 2002 through June 2003, SENA and others entered into a conspiracy to fix the price at which the companies sold publication paper to customers in the United States, in violation of *section 1* of the Sherman Act. The case against SENA was tried to a jury in the U.S. District Court for the District of Connecticut (Christopher F. Droney, *J.*) in July 2007. *United States v. Stora Enso N. Am. Corp*., No. 3:06-cr-323.

During the criminal trial, Tynkkynen testified, *inter alia*, that during their phone conversation on February 11, 2003, he and Korhonen reached an "agreement" that UPM and SENA would "match[ ]" IP's February 2003 price increase for coated grade 5 paper and that both firms would "seriously implement" that price increase with their customers. Trial Tr. at 88, 247-48. For his part, Korhonen testified that at the time of the November 6, 2002 meeting, he understood Tynkkynen to be trying to "initiate something to get the prices improved." *Id*. at 281. Korhonen further testified that after the November 6 meeting, "some phone calls" occurred between him and Tynkkynen during which "intentions were exchanged about [publication] paper price increases," and that, during their **[**17]** February 11, 2003 phone conversation in particular, Korhonen told Tynkkynen what SENA was "going to do," and, likewise, Tynkkynen told Korhonen what UPM was "going to do." *Id*. at 282, 284-85. After both parties presented their evidence, SENA unsuccessfully moved for acquittal. On July 19, 2007, in a general verdict, the jury acquitted **[*60]** SENA of criminal antitrust violations.

E. Procedural History

After the DOJ's investigation became public, individual plaintiffs brought nine separate actions against various manufacturers of publication paper in federal district courts across the country, alleging price fixing in the U.S. market for publication paper. In November 2004, the Judicial Panel on Multidistrict Litigation ("MDL") consolidated and transferred these actions to the U.S. District Court for the District of Connecticut, thereby creating MDL 1631, *In re Publication Paper Antitrust Litigation*. Additional suits were filed over the course of the following year. They, too, were consolidated with MDL 1631.

In their fifth and final amended complaint, filed in March 2008, plaintiffs brought claims under section 1 of the Sherman Act, *15 U.S.C. § 1*, and *sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15* **[**18]** and *26*, seeking treble damages and alleging that from October 1, 2002, to May 31, 2004, SENA, SEO, and UPM conspired to fix the prices of coated paper grades 3, 4, and 5. In April 2008, the district court approved plaintiffs' settlement with UPM, leaving only SENA and SEO as defendants in the MDL proceedings. In May 2009, the district court certified the plaintiff class as "[a]ll persons . . . who directly purchased Publication Paper for delivery in the United States from [SENA or SEO] . . . at any time during the period from October 1, 2002 to and including September 30, 2003" (the "class period"). Order Granting Class Certification, D. Ct. Dkt. No. 470. After the close of discovery, defendants moved for summary judgment, and the district court granted defendants' motion. *Publication Paper, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *1*.

In its decision, the district court rejected plaintiffs' argument that Tynkkynen's testimony that he and Korhonen reached an "agreement" on pricing in February 2003 constituted sufficient "direct evidence" of price fixing to withstand defendants' motion for summary judgment. *2010 U.S. Dist. LEXIS 131931, [WL] at *8*. As to plaintiffs' other evidence, the court acknowledged that SENA and UPM's three price **[**19]** increases constituted parallel conduct; that the publication paper industry was conducive to collusion; and that the communications between Tynkkynen and Korhonen supported the existence of a conspiracy. Nevertheless, the court determined that plaintiffs' evidence did not sufficiently "exclude the possibility that SENA acted independently in raising the prices charged for publication paper" and that, in any event, "even if Tynkkynen and Korhonen agreed that UPM and SENA would follow rivals' future price increases," plaintiffs had not demonstrated that such an agreement "had some effect on future price increases announced by SENA." *2010 U.S. Dist. LEXIS 131931, [WL] at *13-14*. The district court also concluded that plaintiffs failed to show that defendants conspired to reduce the supply of publication paper by closing certain of their paper mills, and ruled that plaintiffs offered "virtually no evidence" demonstrating that SEO played a role in the alleged price-fixing scheme. *2010 U.S. Dist. LEXIS 131931, [WL] at *17*.

This appeal followed.

On appeal, plaintiffs contend that the district court made several factual and legal errors that require us to reverse the judgment entered for defendants. In particular, they maintain that the district court **[**20]** improperly discounted direct evidence of a price-fixing agreement; improperly failed to draw reasonable inferences in their favor; and erred in concluding as a matter of law that the alleged agreement between Korhonen and Tynkkynen had no **[*61]** effect on SENA's pricing decisions.[7] ***HN1***[] Our task is to determine whether, on the evidence presented, a jury could reasonably conclude that defendants reached an agreement "for the purpose and with the effect of raising . . . the price of" publication paper. *United States v. Socony Vacuum Oil Co., 310 U.S. 150, 223, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; *accord* *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 336 (2d Cir. 2008)*. This requires evidence sufficient to permit a preponderance finding that "higher prices came about as a result of [the agreement], rather than through independent action of the defendants." *Apex Oil Co. v. DiMauro, 822 F.2d 246, 253 (2d Cir. 1987)*.

II. DISCUSSION

A. Standard of Review

HN2[] We review *de novo* a district court's grant of summary judgment. *MBIA Inc. v. Fed. Ins. Co., 652 F.3d 152, 158 (2d Cir. 2011)*. We will affirm only if, after construing the evidence in the light most favorable to the non-moving party and drawing all reasonable inferences in its favor, *id*., "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law," *Fed. R. Civ. P. 56(a)*.

HN3[] Our Court has observed that "[b]y avoiding wasteful trials and preventing lengthy litigation that may have a chilling effect on pro-competitive market forces, summary judgment serves a vital function in the area of ***antitrust law***." *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 95 (2d Cir. 1998)*. Nevertheless, summary judgment is not a substitute for trial. *Apex, 822 F.2d at 252*. Thus, when the evidence admits of competing permissible inferences with regard to whether a plaintiff is entitled to relief, "the **[**22]** question of what weight should be assigned to [those] inferences remains within the province of the fact-finder at a trial." *Id. at 253*.

B. Price-Fixing Claims

HN4[] *Section 1* of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce . . . is . . . illegal." *15 U.S.C. § 1*. Notwithstanding its broad language, this provision prohibits "only unreasonable restraints of trade." *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. *Per se* liability attaches, however, to "plainly anticompetitive" agreements. *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. An agreement between competitors to fix prices, known as a horizontal price-fixing agreement, categorically constitutes an unreasonable restraint, and, accordingly, is unlawful *per se. Id*.

---

[7] Plaintiffs also take issue with the district court's conclusion that there was insufficient evidence from which a reasonable jury could find that Korhonen and Tynkkynen conspired to reduce the supply of publication paper. We agree with the district court that the evidence demonstrates conclusively **[**21]** that SENA's plan to reduce capacity was in development long before Korhonen and Tynkkynen began communicating in August 2002. Accordingly, we will not discuss further plaintiffs' allegations concerning reductions in capacity.

HN5[] To prevail on a claim of horizontal price fixing, a plaintiff must demonstrate that the defendants entered into a conspiracy "formed for the purpose and with the effect of raising . . . price[s]." *Socony-Vacuum, 310 U.S. at 223*. In other words, the evidence must show that: (1) the defendants conspired to raise prices, and (2) this conspiracy caused injury to the **[**23]** plaintiff in the form of artificially inflated prices. *See* *Apex, 822 F.2d* **[*62]** *at 253*; *In re Flat Glass Antitrust Litig., 385 F.3d 350, 356 (3d Cir. 2004)*.

HN6[] Parallel pricing among competitors, also known as "conscious parallelism," is often proffered as evidence of a price-fixing agreement. "Conscious parallelism" describes "the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions." *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*.

HN7[] Conscious parallelism alone, however, does not establish an antitrust violation. Such behavior is consistent with both unlawful conspiracy and lawful independent conduct. *See* *Apex, 822 F.2d at 253*. Accordingly, when the defendants' parallel pricing forms the basis for a price-fixing claim, a plaintiff must show additional circumstances—often referred to as "plus factors"—which, when viewed in conjunction with the parallel conduct, would permit a fact-finder to infer a conspiracy. *Id*. Such "plus **[**24]** factors" may include, for example: a common motive to conspire; evidence that the parallel acts were against the apparent economic self-interest of the individual alleged conspirators; or evidence of "a high level of interfirm communications." *Id. at 254*.

HN8[] *Section 1* of the Sherman Act does not itself provide a private right of action. That right is established by *section 4* of the Clayton Act, which authorizes private suits by "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," *15 U.S.C. § 15*, and affords prevailing plaintiffs a claim to three times their actual damages.

C. Evidence of an Agreement

1. The Scope of Matsushita

In concluding that summary judgment was appropriate in this case, the district court cited extensively to the Supreme Court's decision in *Matsushita*. Acknowledging that "the evidence as a whole arguably could support an inference of illegal collusive behavior," the district court nonetheless determined that plaintiffs "failed to offer sufficient evidence to dispel the possibility" that SENA acted independently. *Publication Paper, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *9, *13*. The parties dispute the extent to which the "tends **[**25]** to exclude" formulation articulated in *Matsushita, 475 U.S. at 588* (HN9[] "To survive a motion for summary judgment . . . a plaintiff seeking damages for a violation of *§ 1* must present evidence that 'tends to exclude the possibility' that the alleged conspirators acted independently."), applies under the circumstances presented here. We take this opportunity to clarify the application of the standards established in that case.

In *Matsushita*, the plaintiffs alleged that Japanese television manufacturers had engaged in a longstanding and wide-ranging conspiracy to fix prices in the United States below the level that their costs and market conditions made reasonable. According to the plaintiffs' theory, the defendants' predatory prices would eventually force competitors to leave the market, at which point the defendants would raise prices to monopoly levels. The Court observed that, as a general matter, "predatory pricing schemes are rarely tried, and even more rarely successful." *Id. at 589*. Indeed, the conspiracy alleged in *Matsushita* had spanned 20 years without achieving the putatively desired monopoly. Because it found both that the plaintiffs' theory of conspiracy **[*63]** was implausible and **[**26]** that the defendants' price-cutting conduct could as readily be explained as legitimate competitive behavior, the Court required the plaintiffs to "come forward with more persuasive evidence to support their claim than would otherwise be necessary" to withstand summary judgment. *Id. at 587*.

HN10[] *Matsushita*, then, stands for the proposition that substantive "***antitrust law*** limits the range of permissible inferences" that may be drawn from ambiguous evidence. *Id. at 588*; *accord* *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654, 661-62 (7th Cir. 2002)* (Posner, *J.*). It further holds that the range of inferences that may be draw from such evidence depends on the plausibility of the plaintiff's theory. *See* *Matsushita, 475 U.S. at 588*; *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*; *Apex, 822 F.2d at 253*. Thus, where a plaintiff's theory of recovery is implausible, it takes "strong direct or circumstantial evidence" to satisfy *Matsushita's* "tends to exclude" standard. *Apex, 822 F.2d at 253*. By contrast, broader inferences are permitted, and the "tends to exclude" standard is more easily satisfied, when the conspiracy is economically sensible for the alleged conspirators **[**27]** to undertake and "the challenged activities could not reasonably be perceived as procompetitive." *Flat Glass, 385 F.3d at 358*; *cf.* *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 468, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("*Matsushita* demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision.").

At several points in its opinion, intermingled with its use of the "tends to exclude" standard, the district court stated that plaintiffs were required to "exclude" or "dispel" the possibility that defendants acted independently. *Publication Paper, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *10-11, *13-14*.***HN11***[] Requiring a plaintiff to "exclude" or "dispel" the possibility of independent action places too heavy a burden on the plaintiff. Rather, if a plaintiff relies on ambiguous evidence to prove its claim, the existence of a conspiracy must be a reasonable inference that the jury could draw from that evidence; it need not be the *sole* inference. As Professors Areeda and Hovenkamp have advised:

> It is important not to be misled by *Matsushita's* statement . . . that the plaintiff's evidence, if it is to prevail, must "tend . . **[**28]** . to exclude the possibility that the alleged conspirators acted independently." The Court surely did not mean that the plaintiff must disprove all nonconspiratorial explanations for the defendants' conduct. Not only did the court use the word "tend," but the context made clear that the Court was simply requiring sufficient evidence to allow a reasonable fact finder to infer that the conspiratorial explanation is more likely than not.

Phillip E. Areeda and Herbert Hovenkamp, *Fundamentals of* ***Antitrust Law***, § 14.03(b), at 14-25 (4th ed. 2011) (footnotes omitted).

Of course, ***HN12***[] the standards established in *Matsushita* do not apply at all when a plaintiff has produced *unambiguous* evidence of an agreement to fix prices. As such, "an admission by the defendants that they agreed to fix their prices is all the proof a plaintiff needs." *Corn Syrup, 295 F.3d at 654*. Thus, at least three of our sister circuits have held that summary judgment is generally not appropriate where a plaintiff has produced direct, as opposed to circumstantial, evidence of an **[*64]** agreement to fix prices. *See* *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1300 (11th Cir. 2003)*; *Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., Inc., 998 F.2d 1224, 1233 (3d Cir. 1993)*; **[**29]** *In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 906 F.2d 432, 441 (9th Cir. 1990)*; *see also* *R.B. Ventures, Ltd. v. Shane, 112 F.3d 54, 58 (2d Cir. 1997)* (quoting, in dicta, Ninth Circuit decision drawing distinction between direct and circumstantial antitrust evidence). Some courts have reached this conclusion by reasoning that "direct evidence . . . requires no inferences to establish the proposition or conclusion being asserted." *In re Baby Food Antitrust Litig., 166 F.3d 112, 118 (3d Cir. 1999)*.

Neither party in this case questions this evidentiary distinction. Nevertheless, we do not think it necessary to draw bright lines to decide this case. *See* *Corn Syrup, 295 F.3d at 661-62*. ***HN13***[] All evidence, including direct evidence, can sometimes require a factfinder to draw inferences to reach a particular conclusion, though "[p]erhaps on average circumstantial evidence requires a longer chain of inferences." *Sylvester v. SOS Children's Vills. Ill., Inc., 453 F.3d 900 (7th Cir. 2006)* (Posner, *J.*). Here, the totality of the evidence, viewed in the light most favorable to plaintiffs and with proper regard for the *Matsushita* standards, could support a reasonable inference **[**30]** of illegal collusive behavior.

2. Plaintiffs' Evidence of an Agreement to Fix Prices

In this case, the district court concluded that "[n]othing in the record concerning the February 2003 price increase suggests that Tynkkynen or Korhonen had an agreement to follow the IP increase." *Publication Paper, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *9*. We disagree. As previously discussed, Tynkkynen testified during SENA's criminal trial that he and Korhonen reached an "agreement" that UPM and SENA would follow IP's February 2003 price increase and that they would implement that price increase on the customer end "seriously," i.e., to the fullest extent possible. Whether or not this testimony—a co-conspirator's acknowledgment that he understood his numerous communications with Korhonen to reflect a price-fixing agreement—admits any ambiguity as to Korhonen's parallel understanding of the same communications, the testimony is surely strong evidence of a collusive scheme between UPM and SENA. That would be sufficient to satisfy *Matsushita's* "tends to exclude" standard even if plaintiffs' theory were implausible, which it is not. *See* *Apex, 822 F.2d at 253*.[8]

The district court considered Tynkkynen's testimony to be of limited value, in part, because, as the court explained and is not disputed, "English is not the native language of Tynkkynen and Korhonen." *Publication Paper, 2010 U.S. Dist. LEXIS 131931, 2010 WL 5253364, at *8*. Any notion that Tynkkynen did not understand the meaning of "agreement" in English or the import of his testimony, however, is belied by the record. Tynkkynen repeatedly explained in court that he and Korhonen had a "common understanding," and that the substance of that "understanding" was that "both companies are matching . . . [IP's] coated #5 price increase and will seriously implement the price increase. So it was a common understanding, and, thus, [an] agreement." Trial Tr. at 247-48. Moreover, defendants conceded at oral argument before this Court that translation and language were not an issue. Oral Arg. Tr. at 23. Although an "understanding" might in some **[*65]** contexts be intended to signal an "expectation" rather than "agreement," the substance of Tynkkynen's testimony and the context of the events he describes fully support the conclusion **[**32]** that when he said "understanding"—as when he said "agreement"—he meant "agreement."

Plaintiffs have provided additional evidence to support a reasonable finding that SENA and UPM engaged in price fixing. The district court found, and defendants do not contest, that the publication paper industry is conducive to collusion: publication paper is a commodity product with few substitutes; the market is controlled by a limited number of sellers (principally, IP, SENA, and UPM); and high capital investment costs limit the entry of new market players. *See* *Corn Syrup, 295 F.3d at 656-57* (describing characteristics that make a market susceptible to collusion). Furthermore, during the class period, the publication paper industry suffered from excess capacity and historically low prices, conditions that make "price competition more than usually risky and collusion more than usually attractive." *Id. at 657*. Finally, there is ample evidence of conspiratorial behavior. Most notably, it is undisputed that in private phone calls and meetings—for which no social or personal purpose has been persuasively identified—Tynkkynen shared UPM's pricing strategies with Korhonen and both men disclosed to each **[**33]** other their companies' intentions to increase prices before those decisions had been publicly announced. Tynkkynen and Korhonen also developed a "joint story" to conceal from the government the true nature of their communications—behavior from which a jury could infer that both men were aware that their communications and related actions regarding publication paper pricing violated the law.

We recognize that despite the strength of plaintiffs' evidence of an agreement, the totality of the evidence admits of alternative interpretations—namely, that SENA as a corporation acted independently of UPM in deciding to increase its prices and that the price increases each company announced were the product of certain characteristics of the industry and not any agreement between Korhonen and Tynkkynen. But it is the province of the jury to determine how much weight to accord Tynkkynen's testimony and the other relevant evidence. We believe that, on the basis of Tynkkynen's testimony alone, a jury could reasonably find that SENA and UPM made an agreement to fix the prices at which their companies sold publication paper in the latter part of 2002 and early 2003. Plaintiffs' other evidence provides **[**34]** additional support for the theory that, as early as August 2002, Korhonen and Tynkkynen reached an agreement to follow price increases announced by their competitors. In sum, unlike in *Matsushita*, the

---

[8] Any questions of Tynkkynen's credibility, perception, or memory **[**31]** are, of course, for the jury. On this appeal, we must assume they will be answered in favor of plaintiffs.

record in this case presents strong, if not irrefutable, evidence of a conspiracy in a context where the conspiracy's goals were aligned with the conspirators' economic interests.

D. Causation

1. Applicable Law

Having determined that a jury could reasonably find that SENA and UPM unlawfully agreed to raise prices, we now consider whether there was enough evidence for a jury to find that such an agreement actually *caused* the price increases that occurred.[9] This Court has **[*66]** had little occasion to explore at length the issue of causation in the antitrust context,[10] although certain principles have emerged from the Supreme Court's opinions and our precedents. ***HN14***[] The Supreme Court has noted, for instance, that "[i]t is enough that the illegality is shown to be a material cause of the [antitrust] injury; a plaintiff need not exhaust all possible alternative sources of injury in fulfilling [its] burden of proving compensable injury." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. **[**35]** Relying on *Zenith Radio*, our Court has also observed that an antitrust defendant's unlawful conduct need not be the *sole* cause of the plaintiffs' alleged injuries; to prove a "causal connection" between the defendant's unlawful conduct and the plaintiff's injury, the plaintiff need only "demonstrate that [the defendant's] conduct was a substantial or materially contributing factor" in producing that injury. *Litton Sys., Inc. v. AT & T Co., 700 F.2d 785, 823 n.49 (2d Cir. 1983)*; *see also* *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1377 (2d Cir. 1988)*. We have held further that to prevail on an antitrust claim, a plaintiff must establish that "the injuries alleged would not have occurred *but for* [the defendant's] antitrust violation," *Argus Inc. v. Eastman Kodak Co., 801 F.2d 38, 41 (2d Cir. 1986)*, adding necessity to the materiality requirement of our antitrust causation analysis.

Applying these basic concepts here, we consider whether there is sufficient evidence from which a jury could find that Korhonen and Tynkkynen's agreement, if proven, was both a material and but-for cause of the price increases. Our analysis is enriched and refined by study of causation principles as developed in the tort law context. *See generally* *Associated Gen. Contractors of Cal., Inc. v. Cal. St. Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (***HN15***[] applying common law principles of causation derived from tort and contract law to determine whether the plaintiff had sufficiently alleged an antitrust injury under *section 4* of the Clayton Act).

HN16[] "There is a causal link between an act or activity and an injury **[**37]** when we conclude on the basis of the available evidence that the recurrence of that act or activity will increase the chances that the injury will also occur." Guido Calabresi, *Concerning Cause and the Law of Torts: An Essay for Harry Kalven, Jr*., 43 U. Chi. L. Rev. 69, 71 (1975). In other words, if an act is deemed wrongful because it is believed significantly to increase the risk of a particular injury, we are entitled—in the tort context at least—to presume that such an injury, if it occurred, was caused by the act. *See, e.g.,* *Liriano v. Hobart Corp., 170 F.3d 264, 271 (2d Cir. 1999)* ("When a defendant's negligent act is deemed wrongful precisely because it has a strong propensity to cause the type of injury that ensued, that very causal tendency is evidence enough to establish a *prima facie* case of cause-in-fact."); *see also* *BCS Servs., Inc. v. Heartwood 88, LLC, 637 F.3d 750, 758 (7th Cir. 2011)* ("Once a plaintiff presents evidence that he **[*67]** suffered the sort of injury that would be the expected consequence of the defendant's wrongful conduct, he has done enough to withstand summary judgment on the ground of absence of causation."). Under this

---

[9] Plaintiffs' economic expert, Dr. John C. Beyer, estimated that SENA and UPM's prices were 5.98% higher during the class period than they would have been in the absence of the alleged conspiracy. Using this estimate, Dr. Beyer calculated further that plaintiffs sustained $102.5 million in **[**36]** damages during the class period as a result of the alleged conspiracy. Defendants' expert, Dr. Peter Bronsteen, contested this analysis.

[10] Neither this court nor any other of which we are aware has determined whether *Matsushita's* "tends to exclude" standard applies to the causation element as well as to the agreement element of a section 1 price-fixing claim. Assuming, without deciding, that it does, we are satisfied that the causation evidence discussed *infra* would satisfy that standard.

framework, the burden then shifts to **[**38]** the defendant "to bring in evidence tending to rebut the strong inference, arising from the [injury], that the [act] was in fact a but-for cause of the plaintiff's injury." *Liriano, 170 F.3d at 271*.

2. The Strength of the Evidence

As applied here, ***HN17***[] we consider the causal link between an agreement to raise prices and a subsequent price increase. Price-fixing agreements are "conclusively presumed to be unreasonable and therefore illegal" precisely because of their "pernicious effect on competition" and lack of any redeeming virtue, *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*—i.e., because such agreements are so likely to result in artificially higher prices being charged to consumers without accomplishing any legitimate business purpose. Therefore, the demonstrable existence of an agreement between Korhonen and Tynkkynen to follow price increases announced by competitors, if proven, constitutes strong evidence that the alleged agreement caused at least some element of the subsequent price increases (e.g., amount or effective date), or, at a minimum, the inability of plaintiffs to negotiate below the list price. Furthermore, the causal link is presumed to be particularly strong **[**39]** when, as alleged here, the agreement is between executives at rival companies, each of whom has final pricing authority. *Compare* *Flat Glass, 385 F.3d at 368-69* (evidence of "upper level executives hav[ing] secret conversations about price" has more probative weight than "price discussion[s] among low level sales people"), *with* *Baby Food, 166 F.3d at 125* ("Evidence of sporadic exchanges of shop talk among field sales representatives who lack pricing authority is insufficient to survive summary judgment.").

Defendants contend, and the district court concluded, that even if Korhonen and Tynkkynen entered into an illegal agreement, the record provides an inadequate basis on which a jury could find that the agreement caused plaintiffs' complained-of injuries. They so reason from the record's reflection that employees in SENA's sales and marketing department initiated, recommended, and implemented pricing decisions during the class period. Defendants maintain that these lower-level employees—not Korhonen—independently decided that SENA should follow price increases announced by competitors because doing so made economic sense and was consistent with SENA's pricing philosophy to be a market **[**40]** follower rather than a market leader. Defendants further assert that Korhonen never altered or vetoed these employees' pricing recommendations. Accordingly, they urge that the district court properly concluded as a matter of law that even if Korhonen and Tynkkynen reached a price-fixing agreement, it had no effect on SENA's pricing decisions.

Although defendants' argument has some force, and might well persuade a jury, we are not convinced that it so conclusively rebuts plaintiffs' strong evidence that the alleged agreement was both a material and but-for cause of the price increases as to permit an award of summary judgment for defendants. Even if other SENA employees had day-to-day responsibility for pricing strategy and implementation, it is undisputed that Korhonen, as President of SENA, had the final say on *all* pricing decisions. Defendants emphasize that Korhonen never told other SENA employees about his communications with **[*68]** Tynkkynen. But there was no reason for him to do so, and indeed there were strong reasons for him to remain silent on this score. Korhonen's decisions on pricing were final and, as Korhonen himself has admitted, he knew, at a minimum, that his communications **[**41]** with Tynkkynen violated SENA's internal antitrust policy, which prohibited "sett[ing] prices or verify[ing] the activities of [SENA's] competitors by calling competitors," Defs.' Resp. to Pls.' Local Rule 56(a)(2) Statement ¶ 499. Moreover, one component of the alleged pricing agreement was holding firm with customers as to price—an arrangement that Korhonen was in a position to enforce strictly or variably.

In addition, there is scant evidence in the record to support defendants' assertion that SENA has historically been a market follower rather than a market leader, and that any agreement was therefore of no effect. Defendants cite only Korhonen's qualified statement, made in a declaration filed in the course of this litigation, that "SENA *usually* did not initiate a price increase on its own, but rather would respond to (and *normally* match) price increases initiated by other paper manufacturers." Decl. of Kai Korhonen in Supp. of Defs. SEO and SENA's Mot. for Summ. J. ¶ 15 (emphasis added). We are aware of no specific information regarding SENA's pricing decisions outside of the class period in the record on summary judgment. Even during the class period, SENA did not uniformly follow

[42]** the pricing decisions announced by other publication paper manufacturers: for example, SENA did not match Mead's price increase on all products in November 2002 and led price increases in February 2003 for coated grade 4 paper and supercalendered paper—products that were not covered by IP's price announcement. In any event, the mere fact that following price increases announced by competitors may have been consistent with SENA's overall pricing strategy does not immunize SENA from liability if it had an illegal agreement with UPM to adhere to that strategy. Defendants conceded as much at oral argument before this Court. Oral Arg. Tr. at 21-22.

Finally, the alleged agreement between Korhonen and Tynkkynen would have been valuable to SENA because it significantly reduced SENA's risk: by coordinating with UPM in advance, SENA could follow competitors' price increases secure in the knowledge that UPM, one of its biggest competitors, would not undercut SENA. Without an advance agreement, SENA ran the risk that UPM would hold its prices steady, thereby spiriting away SENA's customers and eating into SENA's market share. For these reasons, a jury could reasonably conclude that even if other **[**43]** SENA employees, based on their own independent business judgments, recommended matching competitors' price increases, Korhonen would neither have approved those blanket price increases nor enforced them strictly, absent assurances from Tynkkynen that UPM would do likewise.[11]

Defendants also argue that any agreement reached by Korhonen and Tynkkynen during their phone conversation on February 11, 2003, had no effect on pricing **[*69]** because, by that point, SENA had already decided to follow IP's price increase. But defendants do not dispute that SENA's decision to follow IP's price increase was not actually reached until February 11, the day **[**44]** of the phone call. Moreover, when the call was made, neither UPM nor SENA had publicly announced or implemented any price increase. Indeed, SENA sent its price increase announcement to customers approximately one half-hour *after* Korhonen and Tynkkynen's conversation, and UPM had not finished compiling its list of customer contacts or mailed out its price announcement letter until the afternoon of February 11. It therefore would be reasonable to infer that Korhonen required assurance from Tynkkynen as to UPM's plans before SENA would go forward as it did with its price increase and with its efforts to implement that price increase with customers to the fullest extent possible.[12] *See* Flat Glass, 385 F.3d at 369 (concluding that exchanges of pricing information that are "tightly linked" with subsequent parallel price increases permit the inference that "the exchanges of information had an impact on pricing decisions").

Based on the foregoing, we conclude that the evidence regarding causation presents a genuine dispute of material fact: that is, whether Korhonen and Tynkkynen's agreement, if proven, was both a material and but-for cause of the price increases. The question of causation is therefore a jury question.[13]

E. SEO

---

[11] During SENA's criminal trial, Korhonen testified that even if UPM had not followed IP's price increase in February 2003, SENA would still have increased its prices. Korhonen conceded, however, that notes taken by an investigator during Korhonen's earlier interview with the DOJ reflected that Korhonen told the government that he would *not* have allowed SENA to raise its prices had Tynkkynen informed him that UPM would not match IP. Although Korhonen testified that he did not have a specific recollection of making this statement, he did not deny making it.

[12] Although the record is not decisive in this respect, there is evidence that SENA and UPM each consistently attempted to implement the full amount of the February 2003 price increase when negotiating contracts with customers, reflecting the "seriously implement" aspect **[**45]** of the alleged agreement. For instance, Tynkkynen refused to allow UPM salespeople to enter into contracts with customers at prices below the full price increase amount, even when customers threatened to take their business elsewhere. There is also some evidence that SENA stood firm on the price increase despite customer resistance.

[13] This Court has on at least one occasion mentioned other factors that may inform a court's decision regarding disputed causation issues at summary judgment, *see* Williams v. Utica Coll. of Syracuse Univ., 453 F.3d 112, 121-22 (2d Cir. 2006); *see also* Williams v. KFC Nat'l Mgmt. Co., 391 F.3d 411, 422-25 (2d Cir. 2004) (Calabresi, J., concurring) (considering strength of evidence, relative knowledge of parties, and "how strongly we feel about making an error in one direction as against the other"). Such considerations have not been addressed by the parties, and **[**46]** we therefore do not address them further, although it appears that these factors favor plaintiffs here.

Finally, plaintiffs contend that the district court erred in granting summary judgment to SEO. Plaintiffs have offered evidence that on October 30, 2002, Tynkkynen met with Bernd Rettig, an SEO executive, and that during that meeting Tynkkynen and Rettig agreed that UPM would lead a price increase for publication paper *in Europe*, and that SEO would match that price increase. Plaintiffs assert that the success of SEO's price-fixing efforts in Europe depended on its ability to ensure that SENA and its rivals fixed the price of publication paper in the United States. Plaintiffs have failed, however, to offer any concrete evidence in support of their theory. For that reason, and because the record is devoid of evidence that SEO had any direct involvement in decisions regarding the marketing, sale, or pricing of publication paper in the United States, we affirm the district court's grant of summary judgment to SEO.

III. CONCLUSION

For the foregoing reasons, we conclude that plaintiffs' Sherman Act section 1 claim **[*70]** against SENA is sufficiently supported to require a trial, but their **[**47]** claim against SEO is not. Accordingly, we **VACATE** the district court's judgment in part, **AFFIRM** it in part, and **REMAND** the case for further proceedings consistent with this opinion.

Am. Airlines, Inc. v. Travelport Ltd.

United States District Court for the Northern District of Texas, Fort Worth Division

August 7, 2012, Decided; August 7, 2012, Filed

Judges: TERRY R. MEANS, UNITED STATES DISTRICT JUDGE.

Opinion by: TERRY R. MEANS

Opinion

SEALED ORDER DENYING MOTIONS TO DISMISS

Before the Court is the Partial Motion to Dismiss (doc. 163) filed by defendants Sabre Inc., Sabre Holdings Corporation, and Sabre Travel International Limited (collectively, "Sabre"), along with Sabre's Supplement to Its Motion to Dismiss (doc. 283). Also before the Court are the Motion to Dismiss (doc. 169) and Supplemental Motion to Dismiss (doc. 287) filed by defendants Travelport Limited and Travelport, LP (collectively, "Travelport"), and the Motion to Dismiss (doc. 165) filed by defendant Orbitz Worldwide, LLC ("Orbitz"). After review, the Court will deny the motions.

I. Background

This is an antitrust case that plaintiff American Airlines, Inc. ("American"), filed against Travelport, Orbitz, and Sabre. American is a large domestic and international airline. Orbitz operates an online travel agency. And Travelport and Sabre each operate global distribution systems ("GDSes"). [1]

In its first amended complaint (doc. 70), American asserted claims against the defendants under *sections 1* and *2* of the Sherman Antitrust Act as well as under state law. In that complaint, American alleged in essence that Sabre and Travelport had each unlawfully wielded monopoly power in the market for the distribution of airline fare, flight, and availability information and the provision of booking services to travel agents ("the Market"), as well as in the submarkets consisting of Sabre and Travelport customers, respectively. In addition, American alleged that Sabre and Travelport, along with Orbitz and other unnamed industry participants, had engaged in an industry-wide conspiracy to preserve the GDSes' monopoly power.

All defendants responded by moving for dismissal of the first amended complaint under *Federal Rule of Civil Procedure 12(b)(6)*. After reviewing the motions, the Court determined that American had stated claims against Sabre for monopolization of the Market and the Sabre submarket **[*7]** and a claim against Travelport for monopolization of the Travelport submarket. The Court, however, dismissed all other claims—some with prejudice—and granted American leave to file a second amended complaint. Pursuant to that order, American filed its second amended complaint (doc. 159).

American also filed a motion for reconsideration challenging certain aspects of the Court's dismissal order. The Court rejected the majority of the arguments made in that motion, but granted reconsideration on American's argument that it should be permitted to assert section 1 claims based on its own contracts with Sabre and Travelport. Rather than grant American leave to file an entirely new complaint, however, the Court granted American leave to file a supplement to its second amended complaint. American thereafter filed its supplement (doc. 265), and Sabre and Travelport filed supplemental motions to dismiss.

In the second amended complaint and supplement, American re-urges its position that Sabre, Travelport, and Orbitz have engaged in an industry-wide conspiracy to preserve the GDSes' market power. According to American, the defendants have conspired to preserve the GDS model [2] and to exclude American's **[*8]** "AA Direct Connect" from the Market and submarkets. AA Direct Connect is a method of providing airline information and booking services directly to travel agents without having to go through GDSes.

Based on these allegations, American asserts the following claims in its second amended complaint: (1) monopolization by Sabre of the Market and the Sabre submarket in violation of *section 2* of the Sherman Act; (2) monopolization by Travelport of the Travelport submarket in violation of *section 2*; (3) conspiracy by Sabre, Travelport, Orbitz, and "other unnamed co-conspirators" to monopolize the Market and submarkets in violation of *section 2*; (4) agreement between Sabre and Travelport to unreasonably restrain interstate commerce in violation of *section 1* of the Sherman Act; (5) group boycott by Sabre, Travelport, and "numerous travel agencies" in violation of *section 1*; (6) agreement between Travelport and Orbitz to allocate customers in violation of *section 1*; and (7) unreasonable restraint of competition by Sabre and Travelport via their contracts with **[*9]** American in violation of *section 1*. The defendants now collectively seek dismissal under *Rule 12(b)(6)* of counts 3-7.

II. Legal Standard

Federal Rule of Civil Procedure 12(b)(6) authorizes the dismissal of a complaint that fails "to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. This rule must be interpreted in conjunction with *Rule 8(a)*, which sets forth the requirements for pleading a claim for relief in federal court. *See Fed. R. Civ. P. 8(a)*. *Rule 8(a)*

---

[1] GDSes distribute airline fare, flight, and availability information to travel agents, enabling those travel agents to make reservations and issue tickets **[*6]** to travelers. (Pl.'s Second Am. Compl. 2, ¶ 2.) Airlines provide their information to GDSes and pay each GDS a booking fee for every reservation that is made through the GDS. (*Id.* at 3, ¶¶ 6-7.)

[2] The GDS model is explained in detail in the Court's November 21, 2011 Order Regarding Motions to Dismiss and Motion for Leave (doc. 244).

calls for "a short and plain statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a)(2); *see* Swierkiewicz v. Sorema N.A., 534 U.S. 506, 508, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002) (holding that Rule 8(a)'s simplified pleading standard applies to most civil actions). The Court must accept as true all well-pleaded, non-conclusory allegations in the complaint and liberally construe the complaint in favor of the plaintiff. Kaiser Aluminum & Chem. Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1050 (5th Cir. 1982).

The plaintiff must, however, plead specific facts, not mere conclusory allegations, to avoid dismissal. Guidry v. Bank of LaPlace, 954 F.2d 278, 281 (5th Cir. 1992). Indeed, the plaintiff **[*10]** must plead "enough facts to state a claim to relief that is plausible on its face," and his "[f]actual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." Bell Atl. Corp. v. Twombly, 550 U.S. 544, 547, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (citations omitted). The Court need not credit bare conclusory allegations or "a formulaic recitation of the elements of a cause of action." Id. at 555. Rather, "[a] claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009).

"Generally, a court ruling on a motion to dismiss may rely on only the complaint and its proper attachments. A court is permitted, however, to rely on documents incorporated into the complaint by reference, and matters of which a court may take judicial notice." Dorsey v. Portfolio Equities, Inc., 540 F.3d 333, 338 (5th Cir. 2008) (citations omitted) (internal quotation marks omitted). "A written document that is attached to a complaint as an exhibit is considered **[*11]** part of the complaint and may be considered in a 12(b)(6) dismissal proceeding." Ferrer v. Chevron Corp., 484 F.3d 776, (5th Cir. 2007) (footnote omitted). In addition, a "court may consider documents attached to a motion to dismiss that 'are referred to in the plaintiff's complaint and are central to the plaintiff's claim.'" Sullivan v. Leor Energy, LLC, 600 F.3d 542, 546 (5th Cir. 2010) (quoting Scanlan v. Tex. A&M Univ., 343 F.3d 533, 536 (5th Cir. 2003)).

III. Analysis

A. Count Three: Conspiracy to Monopolize in Violation of Section 2

"Section 2 of the Sherman Antitrust Act provides a cause of action against 'single firms that monopolize or attempt to monopolize, as well as conspiracies and combinations to monopolize.'" Stewart Glass & Mirror, Inc. v. U.S. Auto Glass Disc. Ctrs., Inc., 200 F.3d 307, 315 (5th Cir. 2000) (quoting Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)). [3] To state a claim for conspiracy to monopolize, a plaintiff must plead facts showing "(1) the existence of specific intent to monopolize; (2) the existence of a combination or conspiracy to achieve that end; (3) overt acts in furtherance of the combination or conspiracy; and (4) an effect upon **[*12]** a substantial amount of interstate commerce." Id. at 316 (quoting N. Miss. Commc'ns, Inc. v. Jones, 792 F.2d 1330, 1335 (5th Cir. 1986)) (internal quotation marks omitted).

After reviewing the second amended complaint and drawing all reasonable inferences in favor of American, the Court concludes that American has stated a plausible section 2 conspiracy-to-monopolize claim. [4] First, American identifies the specific intent to monopolize allegedly shared by Sabre, Travelport, and Orbitz. American alleges that

---

[3] Section 2 of the Sherman Act reads, in relevant part, as follows:

> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . .

15 U.S.C.A. § 2 (West 2012).

[4] It would take a treatise to respond to all of the arguments raised by the parties in their motion-to-dismiss briefing. Therefore, the Court will explicitly address only those arguments (a) that are germane to the disposition of the instant motions and (b) that are not indirectly addressed by the Court's analysis.

Sabre, Travelport, Orbitz, and certain unnamed industry participants conspired "to punish and retaliate against American for its direct connect initiative, with the specific intent of preserving Sabre's and Travelport's monopolies in the [Market] and submarkets." (Pl.'s Second Am. Compl. 52, ¶ 177.) American contends that AA Direct Connect **[*13]** poses a threat to the GDS model and that, consequently, the defendants and certain other industry participants share an interest in excluding AA Direct Connect from the Market and submarkets. According to American, the GDSes benefit directly from the GDS model because it allows them to enjoy monopoly power, while travel agencies such as Orbitz benefit indirectly from the model because they share in the booking fees that the GDSes charge to airlines. These allegations, taken as true, support a reasonable inference that GDSes and travel agencies alike share an interest in preserving the status quo of the GDS model and defeating efforts such as AA Direct Connect that challenge the long-term viability of the GDS model. The allegations further support an inference that Sabre, Travelport, and Orbitz have specifically intended to act in accordance with that shared interest.

Second, **[*14]** American has adequately pleaded the existence of a conspiracy. More precisely, American has alleged facts sufficient to support a reasonable inference that Sabre, Travelport, Orbitz, and other industry participants engaged in a combination or conspiracy to preserve the GDS model and exclude AA Direct Connect from the Market and submarkets. American alleges that the defendants, joined by various travel agencies, "agreed with one another not to implement American's direct connect technology, agreed to bias their displays to disfavor American's flights, agreed to boycott American flights for their own corporate sales, and agreed to encourage their corporate customers to 'book away' from American and shift sales to other airlines." (Second Am. Compl. 6, ¶ 14.) American alleges further that this conspiracy was "orchestrated by Sabre and Travelport, with assistance from large travel agencies such as Orbitz and Expedia, and trade associations such as the Business Travel Coalition and the American Society of Travel Agents." (*Id.* 7, ¶ 15.)

Third, American has alleged facts from which it may reasonably be inferred that overt acts were taken in furtherance of the alleged conspiracy. For example, **[*15]** the defendants, American alleges, "coordinated their actions through telephone and email communications, and face-to-face meetings among their senior executives, board members, and employees." (*Id.*) American also alleges that in November 2010 "a senior executive at Sabre reported to colleagues on a conversation he had with a Travelport representative" and mentioned "a roadmap for AA plan." (*Id.* at 36, ¶ 115.). In addition, American alleges that "an Orbitz employee sent an email to employees at Sabre, Expedia, BTC, and ASTA asking them to 'stand together' with Orbitz against American." (*Id.* ¶ 116.) Further, as a final example, American alleges that "[i]n mid-2010, the GDSs were meeting with travel agencies to 'discuss AA' or to 'share views and action plan' on AA Direct Connect." (*Id.* at 39, ¶ 126.) These allegations are sufficient to support an inference that the defendants took actions in furtherance of the alleged conspiracy.

Fourth, American has alleged facts showing that the alleged conspiracy has had a substantial effect on commerce. The second amended complaint alleges that Sabre controls the largest GDS in the Market, accounting for more than 60% of all airline ticket sales made **[*16]** by U.S.-based travel agencies, and that Travelport controls three GDSes—Galileo, Apollo, and Worldspan—which collectively account for over 30% of all airline ticket sales made by U.S.-based travel agencies. (*Id.* at 2, ¶ 3; 11, ¶ 26.) Furthermore, American alleges that the majority of airlines' passenger revenues are generated by ticket sales through travel agencies. (*Id.* at 12, ¶ 33.) According to American, approximately 51% of American's passenger revenue is generated by sales through brick-and-mortar travel agencies, and approximately 10-15% is generated by sales through online agencies. (*Id.*) Given these allegations, it is reasonable to infer that a substantial amount of commerce is affected by the alleged conspiracy.

In their motions to dismiss, the defendants collectively contend that American's conspiracy allegations are merely conclusory and are insufficiently pleaded. Admittedly, American's conspiracy allegations are rather sweeping. But anchoring American's broad conspiracy allegations are facts that, taken as true and construed in American's favor, support a reasonable inference of an industry-wide conspiracy between Sabre, Travelport, Orbitz, and other travel agencies and **[*17]** trade associations. Moreover, whereas American's first amended complaint lacked any allegations linking Sabre's and Travelport's activities, the second amended complaint contains several such allegations of horizontal agreement. Thus, American, rather than alleging several discrete vertical conspiracies (as it did in its first amended complaint), has alleged facts that plausibly support a reasonable inference that a broad, industry-wide conspiracy to exclude American from the Market and submarkets exists.

To illustrate, consider American's allegation that "Sabre and Travelport have a policy and practice of using contractual and technical methods to prevent non-GDS distribution providers from interoperating with their platforms" while "they permit interoperation with each other." (*Id.* at 30, ¶ 93.) This allegation corroborates American's position that Sabre and Travelport have been working together to exclude non-GDS technologies from the Market and the submarkets.

Travelport argues that it is illogical to infer that Travelport and Sabre are engaged in a common conspiracy in the Market, particularly one that preserves Sabre's market position, because they are competitors. But in the economic **[*18]** landscape painted by American's complaint, Travelport has a concrete monopoly in the Travelport submarket and a tight grip on 30% of the Market, each of which is jeopardized if the GDS model crumbles. In view of this, it is not illogical to infer that Travelport is willing to work to maintain the GDS model simply because it benefits Sabre.

Consider also American's allegation that Sabre, Orbitz, and Amadeus, the fifth GDS in the Market, engaged in "regular communication with each other about the threat that American's activities posed to the GDS model, how each of the GDSs would approach negotiations with American (and other airlines)[,] and how they would neutralize the threat that AA Direct Connect posed to the GDS model and its monopoly profits." (*Id.* at 32, ¶ 99.) Describing an example of such collaboration, American alleges that "in September 2010, a senior executive at Sabre and a member of Travelport's board of directors discussed their strategies for negotiating with American, including the Travelport director's belief that American's direct connect initiative would not get any traction." (*Id.*) These allegations help solidify American's assertion that Sabre and Travelport have **[*19]** aligned themselves in their respective negotiations with American.

Moreover, American alleges that the conspiracy to monopolize "between, Sabre, Travelport, and numerous travel agencies was conducted at the highest levels by some of the most senior executives at these firms and they recognized that their communications crossed the line of legitimate competition on the merits." (*Id.* at 34, ¶ 107.) To illustrate, American alleges that "one senior executive at a leading travel agency wrote to one of Sabre's most senior executives, 'the circle needs to be very small and very tight.'" (*Id.*) Furthermore, alleges American, "another travel agency expressed concerns about discussing American's direct connect initiative in writing, and suggested using a code name" while Sabre "ordered its employees not to use words such as 'bias' in their e-mails and to communicate verbally, rather than in writing, with senior executives when possible." (*Id.*) While none of these allegations is, on its own, enough to support an inference of a conspiracy, when considered together and in context, and construed in favor of American, they are sufficient to support a conspiracy-to-monopolize claim under *section 2*.

B. **[*20]** Count Four: Unreasonable Restraint on Interstate Commerce by Sabre and Travelport in Violation of *Section 1*

"To establish a § 1 violation, a plaintiff must prove that: (1) the defendants engaged in a conspiracy, (2) that restrained trade, (3) in the relevant market." *Golden Bridge Tech., Inc. v. Motorola, Inc., 547 F.3d 266, 271 (5th Cir. 2008)* (citing *Apani Sw., Inc. v. Coca-Cola Enters., Inc., 300 F.3d 620, 627 (5th Cir. 2002))*. [5] In addition, "antitrust plaintiffs must prove they have suffered an injury stemming from the complained-of anti-competitive behavior." *Stewart, 200 F.3d at 312* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio, 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986))*.

"Once a plaintiff establishes that a conspiracy occurred, whether it violates *§ 1* is determined by the application of either the per se rule or the rule of reason." *Golden Bridge, 547 F.3d at 271* (citing *Spectators' Commc'n Network, Inc. v. Colonial Country Club, 253 F.3d 215, 222-23 (5th Cir. 2001))*. **[*21]** Should "the court determine[] that the defendant's conduct 'would always or almost always tend to restrict competition and decrease output,' the restraint is per se illegal and no further inquiry occurs." *Id.* (quoting *Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007))*. But "if the conduct is not deemed per se unreasonable, the

[5] *Section 1* states, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C.A. § 1*.

plaintiff will also have to prove that the conduct unreasonably restrains trade in light of actual market forces under the rule of reason." *Id.* (citing *Leegin, 551 U.S. at 886*). Most cases will require analysis under the rule of reason. *See N. Tex. Speciality Physicians v. F.T.C., 528 F.3d 346, 360 (5th Cir. 2008)* (noting that the Supreme Court "has analyzed most restraints under the so-called rule of reason" (footnote omitted) (internal quotation marks omitted)).

American alleges that "Sabre and Travelport have conspired and agreed with one another not to compete with one another on certain terms on which they provide airline booking services to American." (Second Am. Compl. 53, ¶ 180.) In particular, alleges American, Sabre and Travelport have agreed that "they would not implement AA Direct Connect" and that they would "coordinate their negotiations **[*22]** with American." (*Id.*)

As discussed above, American has alleged facts sufficient to support a reasonable inference that Sabre and Travelport have been working together to exclude AA Direct Connect from the Market and submarkets. More to the point here, American has alleged facts from which it may be inferred that Sabre and Travelport have agreed not to compete for American's business, but instead to align themselves together in their negotiations with American. For example, American alleges that a Sabre employee stated: "We don't want to take advantage of it with Travelport agencies. We want AA to LOSE the book/passenger. We need to support Tport in their tough actions." (*Id.* at 39, ¶ 125.) The defendants may dispute that this was ever said or that the speaker intended the comment to mean what American contends it means. But at the *Rule 12(b)(6)* stage, the Court must treat American's allegations as true and draw all reasonable inferences in American's favor—even if those inferences are not the **most** reasonable. [6] *See Kaiser Aluminum, 677 F.2d at 1050*.

Because a horizontal agreement between competitors not to compete "would always or almost always tend to restrict competition and decrease output," Sabre and Travelport's alleged agreement amounts to a restraint that is *per-se* unlawful. *Leegin, 551 U.S. at 886*; **[*24]** *see also Jayco Sys., Inc. v. Savin Bus. Mach. Corp., 777 F.2d 306, 317 (5th Cir. 1985)* ("Horizontal agreements affect inter brand competition, and because interbrand competition is the primary concern of ***antitrust law***, they are generally illegal per se." (citation omitted) (internal quotation marks omitted)); *Transource Int'l, 725 F.2d at 280* ("[A]greements not to compete among potential competitors are also illegal per se." (citing *Otter Tail Power Co. v. United States, 410 U.S. 366, 377, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973))*). But even if analyzed under the rule of reason, the alleged agreement between Travelport and Sabre to align themselves in their negotiations with American would, given the economic landscape alleged in the second amended complaint, unreasonably restrain trade in, and foreclose a substantial share of, the Market and submarkets in violation of *section 1*. *Golden Bridge, 547 F.3d at 271*.

C. Count Five: Group Boycott in Violation of Section 1

American contends that "Sabre, Travelport, and numerous travel agencies have combined and conspired with one another to retaliate against American for its efforts to implement direct connect." (Second Am. Compl. ¶ 183.) American alleges that Sabre and Travelport **[*25]** carried out the boycott by "obtain[ing] agreements from these travel agencies to bias their displays to disfavor American flights" and by "soliciting travel agents and major corporate customers' agreement[s] to reduce their sales of tickets on American flights." (*Id.*)

Technically, the allegations contained in the second amended complaint under the headings "Sabre and Travelport Orchestrate a Group Boycott" and "Fifth Claim for Relief: Group Boycott in the Relevant Markets in Violation of

---

[6] Throughout its briefing, Travelport highlights purported discrepancies between American's allegations and the actual documents from which **[*23]** the allegations are derived. While the Court is permitted to consider certain documents described in American's second amended complaint, and even though the Court is not bound to treat as true any allegations that contradict such documents, the Court declines to engage in significant document review at the pleading stage. In other words, the Court will not undertake to check the accuracy of the allegations in American's fifty-five-page second amended complaint and four-page supplement by comparing each of those allegations to the document from which it is derived. Such an evidence-based process is more appropriately conducted at the summary-judgment stage. At the *Rule 12(b)(6)* stage, the Court will treat American's allegations as true and will only refuse to give them effect if they are directly contradicted by a document obviously central to American's second amended complaint. *See Kaiser Aluminum, 677 F.2d at 1050*; *Sullivan, 600 F.3d at 546*.

Section 1 of the Sherman Act" do not establish the existence of a group boycott involving both Sabre and Travelport. Instead, the allegations under these headings show the existence of two boycotts—one orchestrated by Sabre and the other by Travelport. But reading the allegations in the context of the entire second amended complaint, and considering that elsewhere in the complaint allegations of collusion between Sabre and Travelport can be found, the Court is satisfied that American has alleged sufficient facts to support a reasonable inference that Sabre and Travelport orchestrated a group boycott of American.

Further, because American has alleged that Sabre and Travelport (1) possess dominant positions **[*26]** in the Market and their respective submarkets, (2) "control access to an element necessary to enable [American] to compete," and (3) have no pro-competitive justifications for their alleged boycott, the alleged horizontal boycott is *per se* unlawful. *Tunica Web Adver. v. Tunica Casino Operators, 496 F.3d 403, 414-15 (5th Cir. 2007)*; *see also* *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 290, 105 S. Ct. 2613, 86 L. Ed. 2d 202 (1985)* ("This Court has long held that certain concerted refusals to deal or group boycotts are so likely to restrict competition without any offsetting efficiency gains that they should be condemned as per se violations of *§ 1* of the Sherman Act."); *Hood v. Tenneco Tex. Life Ins. Co., 739 F.2d 1012, 1017 (5th Cir. 1984)* ("Horizontal agreements are ordinarily considered illegal *per se* 'because of their pernicious effect on competition and lack of any redeeming virtue.'" (quoting *Transource Int'l, Inc. v. Trinity Indus., Inc., 725 F.2d 274, 279 (5th Cir. 1984))*).

D. Count Six: Customer-Allocation Agreement in Violation of Section 1

A customer-allocation agreement is *per-se* unlawful under *section 1*. *See* *Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 708, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*. **[*27]** American alleges that "[b]eginning in November 2010, Travelport and Orbitz entered into secret customer allocation agreements with numerous other travel agencies." (Second Am. Compl. 54, ¶ 187.) According to American, "[p]ursuant to these agreements, these agencies agreed not to compete for the business of [the] corporate customers" of Orbitz for Business ("OFB"), Orbitz's corporate travel agency. (*Id.*)

What American is alleging here is not a horizontal customer-allocation agreement. A "classic" customer-allocation agreement is "one[] in which 'competitors at the same level agree to divide up the market for a given product.'" *Cal. ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1137 (9th Cir. 2011)* (quoting *Metro Indus., Inc. v. Sammi Corp., 82 F.3d 839, 844 (9th Cir. 1996))*. Instead, what American is alleging is an agreement between Orbitz and other travel agencies, monitored and enforced by Travelport, not to compete for OFB customers. Such an agreement constitutes a *per-se* violation under *section 1*. *See* *Transource, 725 F.2d at 280* ("[A]greements not to compete among potential competitors are also illegal per se."). Thus, while the Court disagrees with American's characterization of **[*28]** this claim as one challenging a customer-allocation agreement, the Court nevertheless concludes that American has pleaded a section 1 claim based on Orbitz and other travel agents' alleged agreement not to compete for OFB customers. [7]

---

[7] This alleged agreement not to compete is horizontal because it is primarily between Orbitz and other travel agencies. *See* *Bus. Elec. Corp. v. Sharp Elec., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* ("Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints."). That Travelport has joined in the agreement and policed it does not render the agreement a vertical restraint, even though Travelport has a vertical relationship with Orbitz. *See* *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001, 1004 (5th Cir. 1981)* ("Conspiracies between a manufacturer and its distributors are . . . treated as horizontal when the source of the conspiracy is a combination of the distributors.").

Moreover, American's failure to identify the other travel-agency participants is not fatal to American's section 1 claim (as it was to many of American's claims in the first amended complaint) because American has alleged the identity **[*29]** of at least two members of the conspiracy—Travelport and Orbitz—and because American has alleged sufficient facts to apprise Travelport and Orbitz of the particular agreement that it is challenging. In any event, American explains that it knows the identities of the other travel-agency participants but that Orbitz refused to consent to American's filing of a proposed second amended complaint that included those names. If this is true, then Orbitz should not be permitted to now challenge the sufficiency of American's complaint on that basis.

E. Count Seven: Section 1 Violation Based on Sabre's and Travelport's Contracts with American

Lastly, American alleges that "Sabre and Travelport have included terms in their subscriber agreements with American that have the purpose and effect of excluding [from] competition . . . direct connect, as well as restricting competition among GDSs." (Pl.'s Supp. to Second Am. Compl. 1, ¶ 2.) More specifically, alleges American, "both Sabre and Travelport require that American provide them with full content and content parity, and restrict American's ability to provide incentives to travel agents to shift bookings among GDSs." (*Id.*) In addition, American **[*30]** alleges that Sabre "has prohibited American from publicly marketing a Direct Connect program." (*Id.*) According to American, "[t]hese provisions effectively prevent American from promoting competition and supporting new entrants in the relevant markets, including competition from its own AA Direct Connect." (*Id.*)

"To prove conspiracy or 'concerted action' [for purposes of *section 1*], the plaintiff must prove that the conspirators had a 'conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Spectators' Commc'n Network, 253 F.3d at 220* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*. That said, "[a]ntitrust law has never required identical motives among conspirators, and even reluctant participants have been held liable for conspiracy." (*Id.*) Indeed, *section 1* itself states that "**[e]very contract**, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C.A. § 1* (emphasis added). Based on this language, if a contract unreasonably restrains trade, then it offends *section 1*—even if one of the parties to the **[*31]** contract assented to its terms merely because of financial necessity. [8] *See id.*

Sabre and Travelport contend that their subscriber agreements with American cannot support a section 1 claim because the agreements are not exclusionary and do not foreclose a substantial share of the Market or submarkets. Concerning the latter, Sabre argues that American must allege facts indicating its percentage share of the airline-services market. But in the Court's view, this argument would more likely be correct if the aggrieved party were a passenger or a travel agent seeking to obtain flights. Instead, because American is the aggrieved party, the relevant market for purposes of American's section 1 claim is the Market (i.e., the distribution of airline fare, flight, and availability information and **[*34]** the provision of booking services to travel agents), along with the Sabre and Travelport submarkets (i.e., the provision of airline booking services to Sabre and Travelport subscribers,

[8] Travelport posits that "[a] plaintiff that voluntarily enters into and enjoys the benefits of a contract cannot later complain that the contract violates the antitrust laws." (Travelport Supp. Mot. to Dismiss 6.) According to Travelport, American "will need to show that [it] had anticompetitive terms imposed upon it" and that it "unwillingly complied." (*Id.* (internal quotation marks omitted).) Travelport's position is difficult to reconcile with the United States Supreme Court's comments in *Perma Life Mufflers, Inc. v. International Parts Corporation, 392 U.S. 134, 140, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, *overruled on other grounds by* *Copperweld Corporation v. Independence Tube Corporation, 467 U.S. 752, 777, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. There, the Supreme Court, in holding that *in pari delicto* is not a defense to an antitrust action, stated that a "plaintiff who reaps the reward of treble damages may be no less morally reprehensible than the defendant, but the law encourages his suit to further the overriding public policy in favor of competition." *Id. at 139*. The Court noted further that "permitting the plaintiff to recover a windfall gain does not encourage **[*32]** continued violations by those in his position since they remain fully subject to civil and criminal penalties for their own illegal conduct." *Id.* Thus, the Court is not persuaded that American must allege facts showing that it was completely innocent in its involvement in the scheme embodied by the subscriber agreements.

But at the same time, the Supreme Court explicitly declined to answer the question of whether "truly complete involvement and participation in a monopolistic scheme could ever be a basis, wholly apart from the idea of in pari delicto, for barring a plaintiff's cause of action." *Id. at 140*. That is, "*Perma Life Mufflers* did not foreclose a defense to an antitrust claim based on a plaintiff's 'truly complete involvement.'" *Rogers v. McDorman, 521 F.3d 381, 388-89 (5th Cir. 2008)* (quoting *Perma Life Mufflers, 392 U.S. at 140*). In any event, American's allegations do not suggest that it had "truly complete involvement" in the drafting and selection of provisions in the subscriber agreements. To the contrary, American has alleged facts indicating that the economic realities were such that American had little choice but to accept the terms in the subscriber agreements. Thus, **[*33]** American should not be barred from asserting section 1 claims based on its subscriber agreements with Sabre and Travelport simply because American was a party to those agreements. *See* *Perma Life Mufflers, 392 U.S. at 140* ("[E]ven if petitioners actually favored and supported some of the other restrictions, they cannot be blamed for seeking to minimize the disadvantages of the agreement once they had been forced to accept its more onerous terms as a condition of doing business.").

respectively). American has alleged facts showing that its subscriber agreements with Sabre and Travelport (or Travelport's predecessors) bear on its ability to access Sabre and Travelport's combined ninety-plus percentage share of the Market and their respective 100% shares of their submarkets. These allegations are sufficient to establish substantial foreclosure.

Regarding Sabre and Travelport's contentions that the subscriber agreements are not exclusionary, the Court maintains the position it took in its November 21, 2011 Order Regarding Motions to Dismiss and Motion for Leave (doc. 244): that while the factfinder may eventually find that the full-content and related provisions are not anticompetitive, at this stage of the litigation the Court is simply not able to say that the aforementioned allegations are, as a matter of law, insufficient to support a section 1 claim.

IV. Conclusion

Based on the foregoing, the Court concludes that American's second amended complaint and supplement contain sufficient **[*35]** allegations to avoid dismissal under *Rule 12(b)(6)*. Accordingly, the defendants' motions to dismiss are DENIED.

SIGNED August 7, 2012.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN1[] **Agriculture & Food, Food Product Promotions**

Congress passed the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, in order to establish and maintain orderly marketing conditions and fair prices for agricultural commodities. Section 8c of the AMAA, *7 U.S.C.S. § 608c*, authorizes the Secretary of Agriculture to issue orders applicable to handlers who receive, process, package, or redistribute milk or milk products. Marketing orders promulgated pursuant to the AMAA are a species of economic regulation that has displaced competition in a number of discrete markets. The essential purpose of this milk market order scheme is to raise producer prices, and thereby to ensure that the benefits and burdens of the milk market are fairly and proportionally shared by all dairy farmers.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN2[] **Agriculture & Food, Food Product Promotions**

In the context of milk and milk products, "handler" is defined in *7 C.F.R. § 1000.9 (2012)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN3[] **Agriculture & Food, Food Product Promotions**

Milk, milk products, and prices paid by handlers to producers of raw milk (i.e., dairy farmers) are regulated by what are commonly referred to as Federal Milk Marketing Orders (FMMOs) issued by the U.S. Department of Agriculture pursuant to § 8c(5) (*7 U.S.C.S. § 608c(5)*) of the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN4[] **Agriculture & Food, Food Product Promotions**

Under the scheme established by Congress, the Secretary of Agriculture must conduct an appropriate rulemaking proceeding before issuing a milk market order. The public must be notified of these proceedings and provided an opportunity for public hearing and comment. 7 U.S.C.S.S. *§ 608c(3)*. An order may be issued only if the evidence adduced at the hearing shows that it will tend to effectuate the declared policy of this chapter with respect to such commodity. *7 U.S.C.S. § 608c(4)*. Moreover, before any market order may become effective, it must be approved by the handlers of at least 50% of the volume of milk covered by the proposed order and at least two-thirds of the affected dairy producers in the region. *7 U.S.C.S. §§ 608c(8)*, *608c(5)(B)(i)*. If the handlers withhold their consent, the Secretary may nevertheless impose the order. But the Secretary's power to do so is conditioned upon at least two-thirds of the producers consenting to its promulgation and upon his making an administrative determination that the order is the only practical means of advancing the interests of the producers. *7 U.S.C.S. § 608c(9)(B)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN5[] **Agriculture & Food, Food Product Promotions**

Section 8c(5) of the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, requires that the Federal Milk Marketing Orders (FMMOs) contain provisions which, inter alia: (1) classify milk in accordance with the purpose for which it is used, (2) set minimum prices for each such use that handlers must pay, (3) require that said prices be uniform except that adjustments can be made for production differentials, grade or quality of the milk, and locations of delivery, and (4) provide for the use of blended prices such that all producers of milk subject to a particular FMMO receive a uniform price for the milk delivered to handlers regardless of the ultimate use of the milk. *7 U.S.C.S. § 608c(5)*. The AMAA (and hence each FMMO) only requires a minimum price.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN6[] **Agriculture & Food, Food Product Promotions**

Although the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, mandates a minimum price, it does not mandate a maximum price. Handlers cannot pay less than the blend price, but they are allowed to pay as much as they want. In times of relative scarcity, handlers can and do negotiate premiums, known as over-order prices, for the sale of the milk. These premiums are most typically paid for milk that is intended for Class I use, but they can apply to any of the three classes. Thus, market forces are allowed to intrude on this regime on occasion, though only in one direction.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN7[] **Agriculture & Food, Food Product Promotions**

There is no Federal Milk Marketing Order covering the state of California.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN8[] **Agriculture & Food, Food Product Promotions**

The Secretary of Agriculture has delegated his authority under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, to the Under Secretary for Marketing and Regulatory Programs, *7 C.F.R. § 2.22(a)(1)(viii)(G) (2011)*, and, in turn, the Under Secretary has delegated it to the Administrator for the Agricultural Marketing Service (AMS). *7 C.F.R. § 2.79(a)(8)(viii) (2011)*. As to each operative Federal Milk Marketing Order (FMMO), there is a market administrator selected by the Secretary who is empowered, inter alia, to: (1) administer the order in accordance with its terms and provisions; (2) make rules and regulations to effectuate the terms and provisions of the order; (3) receive, investigate, and report complaints of violations to the Secretary; and (4) announce FMMO prices on designated days of each month. *7 C.F.R. §§ 1000.25(b)*, *1000.53 (2012)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN9[] **Agriculture & Food, Food Product Promotions**

The Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, and its implementing regulations use two regulatory mechanisms: price fixing and payment pooling. The minimum prices that handlers must pay vary according to the end use of the milk, as categorized in four classes. *7 U.S.C.S. § 608c(5)(A)*; *7 C.F.R. § 1000.40*. Class I milk is sold in fluid form, Class II milk is used to make ice cream, soft cheeses, and related products, Class III milk is used to produce harder cheeses, and Class IV milk is used to make butter and related products including nonfat dry milk products. Instead of setting specific prices to be paid for each Class, the Secretary has established a formula by which the price for each Class is determined monthly based on the average nationwide wholesale prices from the previous month. *7 C.F.R. § 1000.50*; *Milk in the Northeast and Other Marketing Areas; Notice of Proposed Rulemaking and Tentative Partial Final Decision, 73 Fed. Reg. 35,306, 35,308 (June 20, 2008)*.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN10[] **Agriculture & Food, Food Product Promotions**

Under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, the formulas for Class III and IV milk are based on the nationwide average prices for butter, nonfat dry milk, cheese, and dry whey, minus a set dollar amount for each of those products, multiplied by a yield factor. *7 C.F.R. § 1000.50(l)-(o)*. Class I and II prices are derived from the Class III and IV prices but Class I prices are adjusted for the location of the handler so that handlers pay different prices in different geographic areas. *7 C.F.R. §§ 1000.50*, *1000.52*. The amounts subtracted from the average sale prices of Class III and IV products, known in the milk industry as make allowances or manufacturing allowances, are intended to represent the costs to the handlers of making the end dairy products from raw milk. *Tentative Decision. Milk in the Northeast and Other Marketing Areas; Notice of Proposed Rulemaking and Tentative Partial Final Decision, 73 Fed. Reg. 35,306, 35,308 (June 20, 2008)*. In essence, handlers retain from the average wholesale price the amount set by the make allowance and transfer the balance to producers.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN11[] **Agriculture & Food, Food Product Promotions**

The second major component of dairy market regulation is payment pooling. Under this system, handlers pay prices according to the end use of milk, but all the producers in a geographic area receive the same monthly average or blended price per unit of milk sold, regardless of the use to which their milk is put. *7 U.S.C.S. § 608c(5)(B)*; *7 C.F.R. §§ 1000.70*, *1000.76*. This payment equalization is accomplished through the producer settlement fund into which handlers pay, or from which handlers withdraw, according to whether their blendprice payments to producers are less or greater than the end-use-value of the milk they have purchased. *7 C.F.R. §§ 1000.70*, *1000.76*. The effect of this regime is that handlers make payments which vary according to the market value of the milk they use (as reflected in minimum prices), while all producers in an area receive the same average, or blended, price per unit of milk.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN12[] **Agriculture & Food, Food Product Promotions**

Under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, different geographic areas of the United States are regulated under slightly different conditions, although the formulas used to set prices of Class III and IV milk are the same in all areas. *7 C.F.R. § 1000.50*. Each of eleven areas, generally known as a marketing area or milk marketing area, is governed by a different Order of the Secretary.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN13[] **Agriculture & Food, Food Product Promotions**

Under the Federal Milk Marketing Orders, a dairy plant pays, and a dairy producer receives, minimum prices in the form of federally established component prices for butterfat, protein, solids not fat, and other solids, or skimfat prices that are derived from those component prices. *7 C.F.R. § 1000.50*. There are three factors that are used in the pricing formulas: (1) prices of certain dairy products surveyed by the National Agricultural Statistics Service (NASS); (2) a make allowance; and (3) a yield. *§ 1000.50*. The levels of each of these factors affect the price that plants pay for raw milk and, ultimately, how much producers received for their milk. Adjustments in any of these factors will impact pricing.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN14[] **Agriculture & Food, Food Product Promotions**

Under the Agricultural Marketing Agreement Act of 1937, *7 U.S.C.S. § 601 et seq.*, the make allowance and the yield are fixed by rule; the product prices are determined weekly by National Agricultural Statistics Service (NASS). Every Friday morning, NASS reports the prices of certain cheeses, butter, non-fat dry milk, and dry whey. The U.S. Department of Agriculture (USDA) then announces the advanced prices based on the weighted average of two weeks of NASS prices. The make allowances represent the allowance for manufacturing raw milk into a finished product. Changes to the make allowance have an inverse relationship to the resulting changes in the minimum prices. Producers benefit from lower make allowances, and manufacturers benefit from higher make allowances. The yield factor represents the amount of a manufactured dairy product that can be produced per hundredweight (100 pounds) of milk. USDA accounts for the portion of the price of milk attributable to the costs of the manufacturing process through the make allowance. When the price of manufactured goods is raised, however, USDA recaptures the cost by reporting a higher price for the wholesale product prices to National Agricultural Statistics Service (NASS). As a result, any increase in the selling price of manufactured goods used to produce milk will increase the price manufacturers must pay producers for raw milk.

Milk pricing formulas are changed through formal rule-making hearings. *7 C.F.R. §§ 900.3-900.18*. After the close of the evidentiary portion of the hearing, exceptions and comments are filed by interested parties and an administrative law judge certifies the transcript to U.S. Department of Agricultrue (USDA). *7 C.F.R. §§ 900.9-900.10*. Dairy Programs, a division of USDA, then prepares and submits a recommendation to USDA. The recommendation details the findings of fact, rationale, and the legal authority for its decision. *7 C.F.R. § 900.12*. After Dairy Programs has issued its recommendation, another round of comments follow, and a referendum on the order, as amended, is held. Producers facing a referendum must choose between voting out the entire marketing order or approving the amended order. There is no vote on the amendment itself. If the referendum passes, the order is adopted and becomes a final rule. See id. §§ 900.300-311.

HN16[] **Agriculture & Food, Food Product Promotions**

To actually set the minimum prices, Federal Milk Marketing Orders (FMMOs) require the collection and input of certain economic information regarding commercial transactions involving milk and milk products. Prior to 2000, the USDA's National Agricultural Statistics Service (NASS) relied on the prices of dairy commodities on established and specified public exchanges, including the Chicago and New York Mercantile Exchanges, in the calculation of Federal Milk Marketing Order (FMMO) minimum milk prices. The Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, was enacted in part to give the USDA the authority to make the reporting of dairy product information mandatory. *72 Fed. Reg. 36,341 (July 3, 2007)*. However, the regulations implementing the Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, (now codified at 7 C.F.R. Part 1170 (2012)) were not promulgated until 2008.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN17[] **Agriculture & Food, Food Product Promotions**

Pursuant to the Dairy Market Enhancement Act of 2000 (DMEA), 7 U.S.C.S. § 1637 et seq. weekly surveys are conducted by the National Agricultural Statistics Service (NASS) to collect wholesale prices for representative products within each category. The survey information is gathered from product manufacturers (sometimes referred to in pleadings as milk handlers) who produce a million pounds or more of manufactured product per year. The Federal Milk Marketing Order (FMMO) minimum prices for milk for class III (hard cheese) and IV (dry milk and butter) products are determined by applying the wholesale prices reported in the weekly surveys to formulae specified by the FMMO. The FMMO minimum prices for products in Classes I and II are derived by mathematic formulae from the prices determined in Classes III and IV.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN18[] Agriculture & Food, Food Product Promotions

One of the major wholesale pricing inputs collected by National Agricultural Statistics Service (NASS) for computation of the Federal Milk Marketing Order (FMMO) minimum price for milk for Class IV products is the wholesale price for nonfat dry milk (NFDM). The Dairy Market Enhancement Act of 2000 (DMEA), 7 U.S.C.S. § 1637 et seq., requires handlers to submit National Agricultural Statistics Service (NASS) survey information according to instructions that, among other things, direct the handler to exclude from the survey wholesale prices for NFDM for forward sales contracts. Forward sales contracts are defined as contracts in which the selling price is set more than 30 days before the completion of the transaction. It appears undisputed that forward sales contracts generally reflected lower prices for NFDM than were reflected in contracts that were completed at or near the time of the transaction during the time period in question.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN19[] Agriculture & Food, Food Product Promotions

For enforcement purposes, the Dairy Market Enhancement Act of 2000 (DMEA), 7 U.S.C.S. § 1637 et seq., provides that each reporting firm shall maintain, and make available to the Secretary of Agriculture, on request, original contracts, agreements, receipts, and other records associated with the sale or storage of any dairy products during the 2-year period beginning on the date of the creation of the records. 7 U.S.C.S. § 1637b(c)(6). The 2000 version of the Dairy Market Enhancement Act of 2000 (DMEA), 7 U.S.C.S. § 1637 et seq., also provided that the Secretary shall take such actions as the Secretary considers necessary to verify the accuracy of the information submitted or reported under this subtitle. Pub. L. No. 106-532, § 273(c)(3), 114 Stat. 2541. In 2008, the DMEA was amended and bolstered.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

See 7 U.S.C.S. § 1637b(c)(3)(B).

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN21[] Agriculture & Food, Food Product Promotions

Once National Agricultural Statistics Service (NASS) collects price and volume data, the Agricultural Marketing Service (AMS) uses them to calculate the Federal Milk Marketing Order (FMMO) minimum raw milk prices. Non-fat dry milk (NFDM) prices are one factor used by Agricultural Marketing Service (AMS) to determine FMMO minimum prices. The Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, contains no enforcement mechanism or mechanism for compensating producers who receive prices for their milk that are lower than they should be due to inaccurate reporting.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN22[] **Agriculture & Food, Food Product Promotions**

The Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, contains no provision under which milk producers can challenge a marketing order through administrative review. The U.S. Supreme Court has held that producers could obtain judicial review of the Secretary of Agriculture's practice of deducting certain administrative expenses from the settlement fund before calculating the blended price which resulted in a reduced price for the producers. The Court has found a basis for judicial review because the AMAA had given producers definite personal rights and the silence of Congress as to judicial review is, at any rate in the absence of an administrative remedy, not to be construed as a denial of authority to the aggrieved person to seek appropriate relief in the federal courts in the exercise of their general jurisdiction. The United States Court of Appeals for the Ninth Circuit has concluded that judicial review of the producers' complaint was necessary to ensure achievement of the Act's most fundamental objectives — to wit, the protection of the producers of milk and milk products.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN23[] **Motions to Dismiss, Failure to State Claim**

An appellate court reviews de novo challenges to a dismissal for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. That standard is applied to a district court's dismissal based on the filed rate doctrine. Such review is generally limited to the face of the complaint, materials incorporated into the complaint by reference, and matters of judicial notice. In undertaking review, an appellate court will accept the plaintiffs' allegations as true and construe them in the light most favorable to plaintiffs, and will hold a dismissal inappropriate unless the complaint fails to state a claim to relief that is plausible on its face.

Administrative Law > Judicial Review > Reviewability > Preservation for Review

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN24[] **Reviewability, Preservation for Review**

A federal appellate court does not consider an issue not passed upon below. It limits review to issues argued in a party's opening brief.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > Public Utilities & Telecommunications Carriers

HN25[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine is a judicial creation that arises from decisions interpreting federal statutes that give federal agencies exclusive jurisdiction to set rates for specified utilities, originally through rate-setting procedures involving the filing of rates with the agencies. At its most basic, the filed rate doctrine provides that state law, and some federal law (e.g. ***antitrust law***), may not be used to invalidate a filed rate nor to assume a rate would be charged other than the rate adopted by the federal agency in question. It has generally been recognized that there are three purposes or governmental interests which justify or support the filed rate doctrine.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN26[] **Exemptions & Immunities, Filed Rate Doctrine**

The initial raison d'être for the filed rate doctrine concerned stabilizing rates and preventing pricing discrimination amongst ratepayers. The duty to file rates with the Commission and the obligation to charge only those rates have always been considered essential to preventing price discrimination and stabilizing rates.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN27[] **Exemptions & Immunities, Filed Rate Doctrine**

In original design, the filed rate doctrine was intended to serve as a sword to protect consumers from monopolistic price discrimination, such as a railroad charging different rates to customers of different states, or charging the shipping companies with whom it competes exorbitant prices, without justifications based on the cost of providing service to the customer. Once it was determined that federal law required the primacy of filed rates and tariffs, there developed two additional and related justifications for the doctrine, i.e., federal preemption (or the supremacy of federal law) and deference to federal agency expertise (or primary jurisdiction).

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN28[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine as applied to the actions of the Interstate Commerce Commission assists in the enforcement of the supremacy of federal law: The common rationale is easily stated: There can be no divided authority over interstate commerce, and the acts of Congress on that subject are supreme and exclusive. Consequently, state efforts to regulate commerce must fall when they conflict with or interfere with federal authority over the same activity.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN29[] **Exemptions & Immunities, Filed Rate Doctrine**

One justification for the filed rate doctrine concerns the unnecessary interjection of the courts into the rate-making process where they have no expertise or valid reason to interfere.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN30[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine has been given an expansive reading and application in the United States Court of Appeals for the Ninth Circuit, even in the face of debate in other forums about its wisdom. After reviewing the doctrine and associated principles of federal preemption, the Ninth Circuit has concluded that: to the extent Congress has given a federal agency authority to set rates under a federal statute and the agency has exercised that authority, such rates are just and reasonable as a matter of law and cannot be collaterally challenged under federal ***antitrust law*** or state law.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN31[] **Exemptions & Immunities, Filed Rate Doctrine**

California has declined to create a state filed rate doctrine even where the tariffs are filed with the state regulatory agency having authority over the subject area and even if the rates have been approved as reasonable by that agency.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN32[] **Exemptions & Immunities, Filed Rate Doctrine**

Originally, the filed rate doctrine arose in the context of the following paradigm. A rate or tariff within an industry regulated by federal statute is filed by a carrier or other service/ product provider with a federal agency, which in turn accepts and publishes it. Thereafter, the carrier (and its customer) is not allowed to charge (or pay) a different rate for that service/product other than the filed one. The U.S. Supreme Court has held these provisions to create strict filed rate requirements and to forbid equitable defenses to collection of the filed tariff. In turn, the rate is held not to be subject to challenge on antitrust, state law or most other grounds. Simply stated, the doctrine holds that any "filed rate" — that is, one approved by the governing regulatory agency — is per se reasonable and unassailable in judicial proceedings brought by ratepayers.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN33[] **Exemptions & Immunities, Filed Rate Doctrine**

Application of the filed rate doctrine in any particular case is not determined by the culpability of the defendant's conduct or the possibility of inequitable results. Nor does the doctrine's application depend on the nature of the cause of action the plaintiff seeks to bring. Rather, the courts have held that the doctrine is to be applied strictly to prevent a plaintiff from bringing a cause of action whenever the purpose s underlying the filed rate doctrine are implicated.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN34[] **Agriculture & Food, Food Product Promotions**

Milk pricing is the subject of extensive federal statutory and regulatory control. See, e.g., *7 U.S.C.S. § 608c(5)*. Additionally, under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, the U.S. Department of Agriculture (USDA) (via the Agricultural Marketing Service (AMS) and through the Federal Milk Marketing Orders (FMMOs)) sets minimum prices for raw milk purchased from producers by handlers where there can be no downward deviation in the rate. Therefore, the filed rate doctrine is applicable because Congress has given the USDA authority to set rates under *7 U.S.C.S. § 608c(5)* and the USDA has exercised that authority to create the Federal Milk Marketing Orders (FMMOs) which, in turn, are utilized to establish minimum prices for raw milk purchases; and thus such rates are just and reasonable as a matter of law.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN35[] **Exemptions & Immunities, Filed Rate Doctrine**

The three underlying justifications for the filed rate doctrine apply to Federal Milk Marketing Order (FMMO) prices set under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.* The setting of minimum rates prevents discriminatory pricing (albeit to a more limited extent than other situations where the doctrine has been applied) and stabilizes prices by assuring dairy producers of reasonable payments for raw milk as fixed by the Agricultural Marketing Service (AMS). Additionally, the setting of minimum rates by means of formulas established in the FMMOs is a matter which clearly falls within an area of USDA expertise, which most courts would not possess. Finally, the AMAA and its concomitant regulations establish a federal scheme as to uniform minimum pricing which should not generally be the subject of attack by ratepayers or others.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN36[] **Agriculture & Food, Food Product Promotions**

See *7 U.S.C.S. § 602*.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN37[] **Exemptions & Immunities, Filed Rate Doctrine**

The United States Court of Appeals for the Ninth Circuit does not read Brown as making meaningful agency review a sine qua non for the applicability of the filed rate doctrine.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN38[] **Agriculture & Food, Food Product Promotions**

The U.S. Department of Agriculture has promulgated regulations which create an intricate system for the setting of the prices. The USDA not only examines the dairy products market, but also takes into account volume, location, grade/quality of the milk, production differentials, and other factors in creating the formulas in the Federal Milk Marketing Orders (FMMOs). Also, the formulas do not consider only one or two data points but a large number of them to arrive at the ultimate price determination. Additionally, the formulas which generate the rates also include the consideration of make allowances and yields which are fixed by the agency's rules. Further, the FMMOs are not effective until the Secretary of Agriculture obtains the approval of handlers of at least 50 percent of the milk processed and two-thirds of the affected dairy producers within the geographic territory subject to the order. *7 U.S.C.S. § 608c(8)*. Thus, the Secretary exercises extensive authority vis-a-vis milk pricing in establishing the formulas in the FMMOs which in turn set the parameters for the issued minimum prices.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN39[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine precludes remedies which rely on a court's recalculation of rates which would have been charged, even if the plaintiff is not directly challenging the filed rate.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN40[] **Exemptions & Immunities, Filed Rate Doctrine**

The U.S. Supreme Court has said that the filed rate doctrine does not apply to bar a private litigant's rate-related claims if the rate has been suspended or set aside by the relevant agency. Whether an agency has sufficiently rejected a rate for purposes of the filed rate doctrine analysis, whether that rejection should eliminate the doctrine's preemptive bar, and, even if the bar is so removed, whether thereafter a plaintiff should be allowed to recover damages arising from the incorrect prior rates are admittedly difficult issues. They can only be correctly answered after consideration of the underlying statutory scheme in which the doctrine is being applied and the justifications for the doctrine.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN41[] **Exemptions & Immunities, Filed Rate Doctrine**

Where the controlling statute prohibits a federal agency from altering a filed rate retroactively or limits any application of reconsidered rates to prospective situations, then the agency cannot effectively suspend or set aside the published rates for purposes of a lawsuit seeking recovery based on injuries arising from the imposition of those rates.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN42[] **Agriculture & Food, Food Product Promotions**

There is nothing in the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, or the Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, which specifically bars the U.S. Department of Agricultrue from revising rates where handlers have supplied incorrect data to the agency.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN43[] **Exemptions & Immunities, Filed Rate Doctrine**

In a filed rate doctrine analysis, turning to the issue of the extent to which the federal agency must indicate that it is suspending, setting aside or otherwise rejecting the filed rate, it is noted that a large segment of the cases dealing with the filed rate doctrine arise in the context of statutes where an anti-discriminatory policy as to filed rates or tariffs lies at the very heart of the statutory scheme. In such situations, a federal agency's ability to set aside a published rate retroactively would be extremely limited and, hence, any attempt to do so would have to be explicitly executed and thoroughly explained.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN44[] **Exemptions & Immunities, Filed Rate Doctrine**

The filed rate doctrine contains an important caveat: The filed rate is not enforceable if the agency finds the rate to be unreasonable.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN45[] **Exemptions & Immunities, Filed Rate Doctrine**

Maislin stands, in part, for the limited proposition that, where the statute allows the agency to decide that a published tariff is unreasonable under controlling law, the filed rate doctrine will not bar a plaintiff from seeking reparation from the imposition of the unreasonable rate.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN46[] **Agriculture & Food, Food Product Promotions**

The primary purposes of the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, and Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, are: (1) to establish and maintain such orderly marketing conditions for agricultural commodities in interstate commerce as will establish, as the prices to farmers, parity prices, *7 U.S.C.S. § 602(1)*, and *(2)* the protection of the producers of milk and milk products. Additionally, the prices that are set for raw milk under the applicable statutes are minimum rates which can be (and are) subject to further negotiation between handlers and dairy farmers. Those rates are not initially filed and reviewed by the agency but rather are the product of formulas established by the U.S. Department of Agriculture, which are, in part, dependent upon the receipt of pricing data from certain handlers.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN47[] **Exemptions & Immunities, Filed Rate Doctrine**

The question of what specific steps an agency need take before it can be deemed to have rejected a rate cannot be considered in a vacuum; the steps required before an agency's rate rejection should be recognized will necessarily vary based on both the statutory framework within which the agency acts and upon the purposes of the statute in furtherance of which the agency acts.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN48[] **Exemptions & Immunities, Filed Rate Doctrine**

It is in precisely the scenario where at the time of a misreporting the agency lacks the authority to sanction the misreporting entity that the filed rate doctrine should not bar a private litigant from pursuing claims involving those rates.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN49[] **Agriculture & Food, Food Product Promotions**

The Dairy Market Enhancement Act of 2000 (DMEA), *7 U.S.C.S. § 1637 et seq.*, mandate is that the U.S. Department of Agriculture shall establish a program of mandatory dairy product information reporting that will provide timely, accurate, and reliable market information. *7 U.S.C.S. § 1637b(a)*.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN50[] **Exemptions & Immunities, Filed Rate Doctrine**

Courts typically describe the filed rate doctrine as having three purposes: deference to agencies' greater expertise in rate-setting, preventing discrimination by ensuring all ratepayers face the same price, and avoiding disruption of a Congressional scheme for uniform price regulation.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

Civil Procedure > Remedies > Damages > General Overview

HN51[] **Exemptions & Immunities, Filed Rate Doctrine**

Some uncertainty can arise in any calculations of damages, but that does not preclude recovery where it is clear that some damage has occurred. Where it is only the specific prices that would have been set which remain somewhat unclear, calculating damages would not involve the kind of hypothetical speculation about agency decisions that Keogh forbids.

Torts > Intentional Torts > Prima Facie Tort > Elements

HN52[] **Prima Facie Tort, Elements**

In general, one who has been tortiously injured is entitled to be compensated for the harm and the injured party must establish by proof the extent of the harm and the amount of money representing adequate compensation with as much certainty as the nature of the tort and the circumstances permit. However, there is no general requirement that the injured person should prove with like definiteness the extent of the harm that he has suffered as a result of the tortfeasor's conduct. It is desirable that responsibility for harm should not be imposed until it has been proved with reasonable certainty that the harm resulted from the wrongful conduct of the person charged. It is desirable, also, that there be definiteness of proof of the amount of damage as far as is reasonably possible. It is even more desirable, however, that an injured person not be deprived of substantial compensation merely because he cannot prove with complete certainty the extent of harm he has suffered.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN53[] **Exemptions & Immunities, Filed Rate Doctrine**

The United States Court of Appeals for the Ninth Circuit has endorsed an opinion of the United States Court of Appeals for the Second Circuit which interpreted Square D to hold that the principle of nondiscrimination still suggests the filed rate doctrine should be applied in class actions. Marcus, however, qualified this holding: The concerns for discrimination are substantially alleviated in a putative class action. However, the Supreme Court has rejected the suggestion that the nondiscrimination principle is inapplicable to a putative class action suit. NOS Communications should, therefore, be read as rejecting any blanket rule that discrimination is not a concern in class actions, but still not going so far as holding that putative class action status is irrelevant to an inquiry into the discriminatory impact of not applying the filed rate doctrine.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN54[] **Agriculture & Food, Food Product Promotions**

The prohibition against discriminatory pricing under the Agricultural Marketing Agreement Act of 1937 (AMAA), *7 U.S.C.S. § 601 et seq.*, is concerned with discrimination suffered by the dairy producers, not the handlers.

Antitrust & Trade Law > Exemptions & Immunities > Filed Rate Doctrine > General Overview

HN55[] **Exemptions & Immunities, Filed Rate Doctrine**

Misreported rates and rates reported for fictitious transactions are not agency-approved rates, and barring claims that such fictitious transactions damaged purchasers in the natural gas market would not further the purpose of the filed rate doctrine.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Product Promotions

HN56[] **Agriculture & Food, Food Product Promotions**

While Congress undoubtedly intended the Federal Milk Marketing Orders (FMMOs) minimum prices to apply in a uniform way within the monthly periods and the geographic areas, there is no indication of an overarching congressional or agency intent for uniformity on a nationwide scale, for a long period of time, or even in terms of the actual price paid, given that the FMMO merely sets a floor price.

Judges: Before: Raymond **[**2]** C. Fisher and Johnnie B. Rawlinson, Circuit Judges, and George H. Wu, District Judge.* Opinion by Judge Wu.

Opinion by: George H. Wu

Opinion

[*1118] WU, District Judge:

This appeal raises two issues: (1) whether the judicially created "filed rate doctrine,"[1] which typically has been utilized in common carrier and public utility litigation, is applicable in a class action lawsuit seeking monetary and injunctive relief under state law arising from the misreporting of pricing data to the United States Department of Agriculture ("USDA"), where the data in turn were used to set a minimum price structure for raw milk **[*1119]** sales; and (2) if the doctrine is applicable in that situation, whether the district court erred when it dismissed the plaintiffs' state causes of action on the ground that the filed rate doctrine barred such claims, even though the court found that "[i]t is not disputed that [the] USDA determined that the rates calculated . . . were erroneous and that other rates should have applied based on corrected pricing inputs."[2]

BACKGROUND

I. Statutory and Regulatory Framework as to Milk Pricing

As observed in *Zuber v. Allen, 396 U.S. 168, 172-73, 90 S. Ct. 314, 24 L. Ed. 2d 345 (1969)*:

> The two distinctive and essential phenomena of the milk industry are a basic two-price structure that permits a higher return for the same product, depending on its ultimate use, and the cyclical characteristic of production.
>
> Milk has essentially two end uses: as a fluid staple of daily consumer diet, and as an ingredient in manufactured dairy products such as butter and cheese. Milk used in the consumer **[**4]** market has traditionally commanded a premium price, even though it is of no higher quality than milk used for manufacture. While cost differences account for part of the discrepancy in price, they do not explain the entire gap. At the same time the milk industry is characterized by periods of seasonal overproduction. The winter months are low in yield and conversely the summer months are fertile. In order to meet fluid demand which is relatively constant, sufficiently large herds must be maintained to supply winter needs. The result is oversupply in the more fruitful months. The historical tendency prior to regulation was for milk distributors, "handlers," to take advantage of this surplus to obtain bargains during glut periods. Milk can be obtained from distant sources and handlers can afford to absorb transportation costs and still pay more to outlying farmers whose traditional outlet is the manufacturing market. [Footnote omitted.] To maintain income[,] farmers increase production and the disequilibrium snowballs.

---

* The Honorable George H. Wu, United States District Judge for the Central District of California, sitting by designation.

[1] The precept is most often cited as the "filed rate doctrine," although **[**3]** it is sometimes referenced as the "filed tariff doctrine" (*see, e.g.,* ***Davel Commc'ns, Inc. v. Qwest Corp., 460 F.3d 1075, 1084 (9th Cir. 2006))***, and, on rarer occasions, as the "Keogh doctrine" (*see, e.g., Cost Mgmt. Servs., Inc. v. Wash. Natural Gas Co., 99 F.3d 937, 943 & n.7 (9th Cir. 1996))*, after the case where it was purportedly first established (*i.e., Keogh v. Chi. & Nw. Ry. Co., 260 U.S. 156, 43 S. Ct. 47, 67 L. Ed. 183 (1922))*. As used herein (except where a different term is utilized within a quoted source), the reference will be to the "filed rate doctrine."

[2] The district court's dismissal decision is reported at *Carlin v. DairyAmerica, Inc., 690 F. Supp. 2d 1128 (E.D. Cal. 2010)*.

HN1[] Congress passed the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. § 601 et seq.) ("AMAA") "in order to establish and maintain orderly marketing conditions and **[**5]** fair prices for agricultural commodities." Glickman v. Wileman Bros. & Elliott, Inc., 521 U.S. 457, 461, 117 S. Ct. 2130, 138 L. Ed. 2d 585 (1997). Section 8c of the AMAA (7 U.S.C. § 608c) authorizes the Secretary of Agriculture to issue "orders" applicable to "handlers" who receive, process, package, or redistribute milk or milk products.[3] "Marketing orders promulgated pursuant to the AMAA are a species of economic regulation that has displaced competition in a number of discrete markets . . . ." Glickman, 521 U.S. at 461. As stated in Block v. Cmty. Nutrition Inst., 467 U.S. 340, 104 S. Ct. 2450, 81 L. Ed. 2d 270 (1984), "[t]he 'essential purpose [of this milk market order scheme is] to raise producer prices,' S. Rep. No. 1011, 74th Cong., 1st Sess., 3 (1935), and thereby to ensure that the benefits and burdens of the milk market are fairly and proportionally shared by all dairy farmers." Id. at 342 (second alteration in original); *see also* Ark. Dairy Coop. Ass'n, v. U.S. Dep't of Agric., 573 F.3d 815, 818, 387 U.S. App. D.C. 346 (D.C. Cir. 2009).

[*1120] HN3[] Milk, milk products, and prices paid by handlers to producers of raw milk (*i.e.*, dairy farmers) are regulated by what are commonly referred **[**6]** to as Federal Milk Marketing Orders ("FMMOs") issued by the USDA pursuant to section 8c(5) of the AMAA. 7 U.S.C. § 608c(5). The promulgation process is described in *Block* as follows:

> HN4[] Under the scheme established by Congress, the Secretary must conduct an appropriate rulemaking proceeding before issuing a milk market order. The public must be notified of these proceedings and provided an opportunity for public hearing and comment. See 7 U. S. C. § 608c(3). An order may be issued only if the evidence adduced at the hearing shows "that [it] will tend to effectuate the declared policy of this chapter with respect to such commodity." 7 U. S. C. § 608c(4). Moreover, before any market order may become effective, it must be approved by the handlers of at least 50% of the volume of milk covered by the proposed order and at least two-thirds of the affected dairy producers in the region. 7 U. S. C. §§ 608c(8), 608c(5)(B)(i). If the handlers withhold their consent, the Secretary may nevertheless impose the order. But the Secretary's power to do so is conditioned upon at least two-thirds of the producers consenting to its promulgation and upon his making an administrative determination that the **[**7]** order is "the only practical means of advancing the interests of the producers." 7 U. S. C. § 608c(9)(B).

467 U.S. at 342 (alteration in original).

HN5[] Section 8c(5) of the AMAA requires that the FMMOs contain provisions which, *inter alia*: (1) classify milk in accordance with the purpose for which it is used, (2) set minimum prices for each such use that handlers must pay, (3) require that said prices be uniform except that adjustments can be made for production differentials, grade or quality of the milk, and locations of delivery, and (4) provide for the use of "blended" prices such that all producers of milk subject to a particular FMMO receive a uniform price for the milk delivered to handlers regardless of the ultimate use of the milk. 7 U.S.C. § 608c(5). The AMAA (and hence each FMMO) only requires a *minimum* price. As observed in Farmer Union Milk Mktg. Coop. v. Yeutter, 930 F.2d 466, 468-69 (6th Cir. 1991):

> HN6[] Although the AMAA mandates a minimum price, it does not mandate a maximum price. Handlers cannot pay less than the blend price, but they are allowed to pay as much as they want. In times of relative scarcity, handlers can and do negotiate premiums, known as "over-order" prices, **[**8]** for the sale of the milk. These premiums are most typically paid for milk that is intended for Class I use, but they can apply to any of the three classes. Thus, market forces are allowed to intrude on this regime on occasion, though only in one direction.

FMMOs have been issued which cover some, but not all, regions of the United States.[4] *See* 7 C.F.R. pts. 1001, 1005-07, 1030, 1032-33, 1124, 1126, 1131, 1135 (2012) (setting price regulations for each designated region).

---

[3] HN2[] In the context of milk and milk products, "handler" is defined in 7 C.F.R. § 1000.9 (2012).

[4] For example, HN7[] there is no FMMO covering the state of California. *See* Hillside Dairy Inc. v. Lyons, 539 U.S. 59, 61, 123 S. Ct. 2142, 156 L. Ed. 2d 54 (2003).

HN8[] The Secretary of Agriculture has delegated his authority under the AMAA to the Under Secretary for Marketing and Regulatory Programs, *see 7 C.F.R. § 2.22(a)(1)(viii)(G) (2011)*, and, in turn, the Under Secretary has delegated it to the Administrator for the Agricultural Marketing Service ("AMS"). *7 C.F.R. § 2.79(a)(8)(viii) (2011)*; *see also White Eagle* **[*1121]** *Coop. Ass'n v. Connor, 553 F.3d 467, 482 (7th Cir. 2009)*. As to each operative FMMO, there is a "market administrator" selected by the Secretary who is empowered, *inter alia*, to: (1) "[a]dminister the order in accordance with its terms and provisions"; **[**9]** (2) "[m]ake rules and regulations to effectuate the terms and provisions of the order"; (3) "[r]eceive, investigate, and report complaints of violations to the Secretary"; and (4) announce FMMO prices on designated days of each month. *7 C.F.R. §§ 1000.25(b)*, *1000.53 (2012)*.

The district court correctly observed that "[t]he method by which [the USDA has] accomplished [the framework for a minimum price structure for milk and milk products] is admittedly complex." *690 F. Supp. 2d at 1130*. A description of part of that methodology is provided in *Ark. Dairy Coop. Ass'n, 573 F.3d at 818-19*, as follows:

> HN9[] The AMAA and its implementing regulations use two regulatory mechanisms: price fixing and payment pooling. The minimum prices that handlers must pay vary according to the end use of the milk, as categorized in four classes. *See 7 U.S.C. § 608c(5)(A)*; *7 C.F.R. § 1000.40* (Class I milk is sold in fluid form, Class II milk is used to make ice cream, soft cheeses, and related products, Class III milk is used to produce harder cheeses, and Class IV milk is used to make butter and related products [including nonfat dry milk products].). Instead of setting specific prices to be paid for each Class, **[**10]** the Secretary has established a formula by which the price for each Class is determined monthly based on the average nationwide wholesale prices from the previous month. *See 7 C.F.R. § 1000.50*; *Milk in the Northeast and Other Marketing Areas; Notice of Proposed Rulemaking and Tentative Partial Final Decision, 73 Fed. Reg. 35,306, 35,308 (June 20, 2008)* ("Tentative Decision"). HN10[] The formulas for Class III and IV milk are based on the nationwide average prices for butter, nonfat dry milk, cheese, and dry whey, minus a set dollar amount for each of those products, multiplied by a "yield factor." *7 C.F.R. § 1000.50(l)-(o)*. Class I and II prices are derived from the Class III and IV prices but Class I prices are adjusted for the location of the handler so that handlers pay different prices in different geographic areas. *See 7 C.F.R. §§ 1000.50*, *1000.52*. The amounts subtracted from the average sale prices of Class III and IV products, known in the milk industry as "make allowances" or "manufacturing allowances," are intended to represent the costs to the handlers of making the end dairy products from raw milk. *Tentative Decision, 73 Fed. Reg. at 35,308*. In essence, handlers retain from the **[**11]** average wholesale price the amount set by the make allowance and transfer the balance to producers.
>
> HN11[] The second major component of dairy market regulation is payment pooling. Under this system, handlers pay prices according to the end use of milk, but all the producers in a geographic area receive the same monthly average or "blended" price per unit of milk sold, regardless of the use to which their milk is put. *See 7 U.S.C. § 608c(5)(B)*; *7 C.F.R. §§ 1000.70*, *1000.76*. This payment equalization is accomplished through the "producer settlement fund" into which handlers pay, or from which handlers withdraw, according to whether their blendprice payments to producers are less or greater than the end-use-value of the milk they have purchased. *7 C.F.R. §§ 1000.70*, *1000.76*. Again, the effect of this regime is that handlers make payments which vary according to the market value of the milk they use (as reflected in minimum prices), while all producers in an area receive the **[*1122]** same average, or blended, price per unit of milk.
>
> HN12[] Different geographic areas of the United States are regulated under slightly different conditions, although the formulas used to set prices of Class III and IV milk are the **[**12]** same in all areas. *See 7 C.F.R. § 1000.50*. Each of eleven areas, generally known as a "marketing area" or "milk marketing area," is governed by a different "Order" of the Secretary. *See, e.g.*, *7 U.S.C. § 608c(5)(A)*; *7 C.F.R. § 1001.2*.

The process utilized by the AMS during the relevant period here to establish the formulas through which minimum prices were set pursuant to an FMMO is also complicated, but is adequately summarized in *Ark. Dairy Coop., Inc. v. U.S. Dep't of Agric., 576 F. Supp. 2d 147, 152 (D.D.C. 2008)*, aff'd, *573 F.3d 815, 387 U.S. App. D.C. 346 (D.C. Cir. 2009)*, as follows:

HN13[] Under the FMMOs, a dairy plant pays, and a dairy producer receives, minimum prices in the form of federally established "component prices" for butterfat, protein, solids not fat, and other solids, or skimfat prices that are derived from those component prices. *See* 7 C.F.R. § 1000.50. There are three factors that are used in the pricing formulas: (1) prices of certain dairy products surveyed by the National Agricultural Statistics Service ("NASS"); (2) a make allowance; and (3) a yield. *See id*. The levels of each of these factors affect the price that plants pay for raw milk and, ultimately, how much producers received for **[**13]** their milk. Adjustments in any of these factors will impact pricing.

HN14[] The make allowance and the yield are fixed by rule; the product prices are determined weekly by NASS. *See id*. Every Friday morning, NASS reports the prices of certain cheeses, butter, non-fat dry milk, and dry whey. USDA then announces the advanced prices based on the weighted average of two weeks of NASS prices. *Id*. The make allowances represent the allowance for manufacturing raw milk into a finished product. Changes to the make allowance have an inverse relationship to the resulting changes in the minimum prices. Producers benefit from lower make allowances, and manufacturers benefit from higher make allowances. The yield factor represents the amount of a manufactured dairy product that can be produced per hundredweight (100 pounds) of milk. USDA accounts for the portion of the price of milk that is attributable to the costs of the manufacturing process through the make allowance. When the price of manufactured goods is raised, however, USDA recaptures the cost by reporting a higher price for the wholesale product prices to NASS. As a result, any increase in the selling price of manufactured goods used to produce **[**14]** milk will increase the price manufacturers must pay producers for raw milk. *Id*.

HN15[] The pricing formulas are changed through formal rule-making hearings. *See* 7 C.F.R. §§ 900.3-900.18. After the close of the evidentiary portion of the hearing, exceptions and comments are filed by interested parties and an administrative law judge certifies the transcript to USDA. *See id*. §§ 900.9-900.10. Dairy Programs, a division of USDA, then prepares and submits a recommendation to USDA. The recommendation details the findings of fact, rationale, and the legal authority for its decision. *See id*. § 900.12. After Dairy Programs has issued its recommendation, another round of comments follow, and a referendum on the order, as amended, is held. Producers facing a referendum must choose between voting out the entire marketing order or approving the amended order. There is no vote on the **[*1123]** amendment itself. If the referendum passes, the order is adopted and becomes a final rule. *See id*. §§ 900.300-311.

HN16[] To actually set the minimum prices, FMMOs require the collection and input of certain economic information regarding commercial transactions involving milk and milk products. *See, e.g.*, 7 C.F.R. § 1000.50 (2012). **[**15]** Prior to 2000, the USDA's National Agricultural Statistics Service ("NASS") relied on the prices of dairy commodities on established and specified public exchanges, including the Chicago and New York Mercantile Exchanges, in the calculation of FMMO minimum milk prices. *See, e.g.*, *63 Fed. Reg. 35,564 (June 30, 1998)*.[5] The Dairy Market Enhancement Act of 2000, 7 U.S.C. § 1637 et seq. ("DMEA"), was enacted in part to give the USDA the authority to make the reporting of dairy product information mandatory. *See* 72 Fed. Reg. 36,341 (July 3, 2007). However, the regulations implementing the DMEA (now codified at 7 C.F.R. Part 1170 (2012)) were not promulgated until 2008.

The district court summarized NASS's methods for collecting pricing information during the period of time relevant to this action (and the parties have **[**16]** not disputed that summary) as follows:

HN17[] Pursuant to the DMEA, weekly surveys are conducted by the National Agricultural Statistics Service ("NASS") to collect wholesale prices for representative products within each category. The survey information is gathered from product manufacturers (sometimes referred to in pleadings as milk "handlers") who produce a million pounds or more of manufactured product per year. The FMMO minimum prices for milk for class III

[5] *See also* Kenneth Bailey & Peter Tozer, *An Evaluation of Federal Order Reform*, 84 J. Dairy Sci. 974, 977 (2001) (indicating that NASS had been using such exchanges for pricing information but that they were considered to be "thin markets" because only a small percent of the commodities were actually traded on them and, hence, they were subject to potential price manipulation).

> (hard cheese) and IV (dry milk and butter) products are determined by applying the wholesale prices reported in the weekly surveys to formulae specified by the FMMO. The FMMO minimum prices for products in Classes I and II are derived by mathematic formulae from the prices determined in Classes III and IV.
>
> Of significance to this action, ***HN18***[] one of the major wholesale pricing inputs collected by NASS for computation of the FMMO minimum price for milk for Class IV products is the wholesale price for NFDM [nonfat dry milk]. The DMEA requires handlers to submit NASS survey information according to instructions that, among other things, direct the handler to exclude from the survey wholesale prices for NFDM for forward sales contracts. Forward **[**17]** sales contracts are defined as contracts in which the selling price is set more than 30 days before the completion of the transaction. It appears undisputed that forward sales contracts generally reflected lower prices for NFDM than were reflected in contracts that were completed at or near the time of the transaction during the time period in question.

690 F. Supp. 2d at 1130-31. NASS required the handlers/reporting firms to fill out "Annual Validation Worksheets" which included the question "[w]hen reporting nonfat dry milk sales data to NASS, did you or can you: exclude forward pricing sales (sales in which the selling price is established, and not adjusted, 30 or more days before the transaction is completed)?"

[*1124] ***HN19***[] For enforcement purposes, the DMEA provides that "[e]ach [reporting firm] . . . shall maintain, and make available to the Secretary, on request, original contracts, agreements, receipts, and other records associated with the sale or storage of any dairy products during the 2-year period beginning on the date of the creation of the records." *7 U.S.C. § 1637b(c)(6)*. The 2000 version of the DMEA also provided that "[t]he Secretary shall take such actions as the Secretary considers **[**18]** necessary to verify the accuracy of the information submitted or reported under this subtitle." Pub. L. No. 106-532, § 273(c)(3), 114 Stat. 2541. In 2008, the DMEA was amended and bolstered with the following provision:

> ***HN20***[] QUARTERLY AUDITS. — The Secretary shall quarterly conduct an audit of information submitted or reported under this subtitle and compare such information with other related dairy market statistics.

Food, Conservation, and Energy Act of 2008, Pub. L. No. 110-234, § 1510(b), 122 Stat. 9237 (codified at *7 U.S.C. § 1637b(c)(3)(B)*).

HN21[] Once NASS collects price and volume data, the AMS uses them to calculate the FMMO minimum raw milk prices. Non-fat dry milk ("NFDM") prices are one factor used by AMS to determine FMMO minimum prices. The DMEA contains no enforcement mechanism or mechanism for compensating producers who receive prices for their milk that are lower than they should be due to inaccurate reporting.[6]

II. Factual and Procedural Background

Plaintiffs are "dairy farmers located in states other than California who sold raw milk that was priced according to [FMMOs] during the time between January 1, 2002 and April 30, 2007." *690 F. Supp. 2d at 1129-30*.

[6] ***HN22***[] The AMAA contains no provision under which milk producers can challenge a marketing order through administrative review. *See* ***United Dairymen of Ariz. v. Veneman, 279 F.3d 1160, 1164 (9th Cir. 2002)***. The Supreme Court in *Stark v. Wickard, 321 U.S. 288, 64 S. Ct. 559, 88 L. Ed. 733 (1944)*, held that producers **[**19]** could obtain judicial review of the Secretary of Agriculture's practice of deducting certain administrative expenses from the settlement fund before calculating the blended price which resulted in a reduced price for the producers. The Court found a basis for judicial review because the AMAA had given producers "definite personal rights" and "the silence of Congress as to judicial review is, at any rate in the absence of an administrative remedy, not to be construed as a denial of authority to the aggrieved person to seek appropriate relief in the federal courts in the exercise of their general jurisdiction." *Id. at 309*. In our consideration of the holdings in *Stark*, we concluded that "judicial review of the producers' complaint was necessary to 'ensure achievement of the Act's most fundamental objectives — to wit, the protection of the producers of milk and milk products.'" ***United Dairymen, 279 F.3d at 1165*** (quoting *Block, 467 U.S. at 352*).

[20]** Defendants are: (1) DairyAmerica, Inc. ("DairyAmerica"), a non-profit entity "established by a group of nine dairy cooperatives for the purpose of marketing dairy products manufactured by the cooperatives" and (2) California Dairies, Inc., one of the nine cooperatives. *Id. at 1130*. It is alleged that DairyAmerica sells approximately 75 percent of the NFDM produced in the United States.

As stated by the district court:

> It is not disputed that, during the time in question, Dairy America submitted pricing information to the NASS survey that improperly included wholesale prices for forward contracts for NFDM. Plaintiffs allege, and Defendants do not appear to dispute, that approximately ninety percent of the contracts executed by Dairy America and reported in the weekly NASS surveys were forward contracts that should not **[*1125]** have been reported in the NASS surveys according to DMEA procedures. Plaintiffs contends [sic] that, because forward contract prices were significantly below spot prices during the time period in question, the minimum prices set by the FMMO's for raw milk were significantly lower than would have been the case if the information provided by Dairy America to NASS had been **[**21]** provided according to instructions.

Id. at 1131. On account of DairyAmerica's market dominance, its erroneous reports had the effect of pushing FMMO minimum prices paid to milk producers noticeably lower than they would have been otherwise. Thus, because of its own transgressions, DairyAmerica obtained significant financial benefits from the lowered prices, to the detriment of plaintiff dairy farmers.

In March 2007, DairyAmerica's misreporting was revealed by *The Milkweed*, a dairy industry publication. In April 2007, DairyAmerica's CEO confirmed that misreporting to the NASS.

On or about April 20, 2007, NASS requested that all 39 firms that had reported NFDM data review their weekly price and sales volume submissions for the period of April 29, 2006 through April 14, 2007, and submit revisions. On June 28, 2007, NASS published "revised prices and sales volume" for NFDM, and the "AMS calculated that the errors in the reporting of nonfat dry milk prices for the period April 29, 2006 through April 14, 2007 had increased the average 2-week price of NFDM by $0.0218 per pound and the average 4-5 week price of NFDM by $0.0193 per pound during a period of 14 months."

In February 2008, the USDA **[**22]** Office of the Inspector General ("OIG") issued a report regarding "the April 2007 discovery of the error in the reporting of nonfat dry milk prices." Office of Inspector Gen., U.S. Dep't of Agric., No. 26901-01-IR, Inspection Report: Survey and Estimation Internal Controls for Nonfat Dry Milk and the *Dairy Products Prices* Report i (2008), *available at* http:// www.usda.gov/oig/ webdocs/26901-01-IR.pdf (last visited June 19, 2012). Among its findings were:

> A large dairy firm inappropriately included long-term forward contracted nonfat dry milk volume and price information in their weekly submissions to NASS. We found that this dairy firm has been including data for sales of this type since 2002.
>
> NASS then aggregated the misreported data from this large dairy firm with the weekly data submitted by other dairy firms for the same reporting period. This caused inaccurate nonfat dry milk aggregated volume and price statistics to be published weekly. The internal controls for the survey and estimation process used by NASS for the *Dairy Products Prices* report were inadequate, as this error went undetected from 2002 until April 2007.
>
> NASS' published nonfat dry milk price statistics are utilized **[**23]** by AMS as a component of its formula for establishing federal milk marketing order (FMMO) prices. Given that incorrect nonfat dry milk prices were factored into the FMMO formula, the published FMMO prices were also incorrect. AMS issued a report on June 28, 2007 stating: "The total classified value of milk regulated under the FMMO program for the period covered by the NASS revision was understated by $50 million . . . " covering the period between April 29, 2006, and April 14, 2007.
>
> . . . .

> AMS did not have the authority to audit a reporting firm's books when the misreporting occurred. The authority was included in the Dairy Marketing Act of 2000, but the rulemaking necessary to implement a program of audits was not **[*1126]** completed until July 2007. AMS began performing audits on August 6, 2007. Between August 6, 2007, and September 30, 2007, AMS visited seven plants reporting nonfat dry milk volume and price statistics. Based on these visits, AMS notified NASS of reporting discrepancies at six of the plants. NASS contacted these plants and explained the proper reporting criteria.

Id. at i-ii.

Following the release of the Inspection Report, NASS sent letters to "dairy firms" (*i.e*., handlers) **[**24]** that reported NFDM information asking whether they had correctly related the NFDM data between January 4, 2002 and April 22, 2006, and, if they had not, to provide corrected data. None of the dairy firms provided corrected information, and, hence, the NASS (and consequently the USDA) was unable to publish revised NFDM data or FMMO prices for that period.[7] In August 2007, AMS instituted a new auditing process which included in-person inspections of large dairy firms and their sales records.

Beginning in March 2009, each plaintiff filed a class action on behalf of **[**25]** a nationwide class of raw milk producers in federal court based on diversity jurisdiction. *See* *690 F. Supp. 2d at 1131*. The cases were eventually consolidated. *Id*. The Amended Class Action Complaint contains four causes of action: the first and second claims for relief charged negligent misrepresentation and negligent interference with prospective economic advantage, respectively, both under California common law; the third claim asserted violation of California's Unfair Business Practices Law, *California Business and Professions Code § 17200 et seq*.; and the fourth claim alleged unjust enrichment under California common law.

Defendants filed separate motions seeking dismissal of the entire lawsuit on five grounds: (1) the filed rate doctrine barred plaintiffs' claims, (2) the DMEA confers no right of private enforcement, (3) the USDA is an indispensable party but immune from suit herein, (4) the price reporting program creates no legal obligation on defendants' part, and (5) plaintiffs' state law claims are preempted by the DMEA. The district court dismissed the monetary portions of all four claims *solely* on the grounds that they were not justiciable pursuant to the filed rate doctrine. **[**26]** *690 F. Supp. 2d at 1140-41*. The district court also held that, while the filed rate doctrine purportedly does not bar injunctive relief, the third cause of action — wherein such relief was requested — was inadequately pled. *Id. at 1140*. In so ruling, the district court noted that:

> Because the filed rate doctrine applies narrowly to bar only claims that are based on minimum prices paid for raw milk, the court is not willing at this point to make the determination that there are no other facts that Plaintiffs could possibly plead that would cure the deficiency. Further, as noted, the court cannot determine at this point that there is no non-money equitable remedy available to Plaintiffs. For that reason the **[*1127]** [amended complaint] will be dismissed with leave to amend.
> The court is also mindful that the filed rate doctrine consists of a body of law that has been the subject of conflicting interpretations. The court will therefore give favorable consideration to the motion of either party for interlocutory appeal on the issue of whether the filed rate doctrine bars Plaintiffs' claims in this case.

Id. at 1141.

---

[7] As noted by the NASS:

> In cases where there had been reporting problems, NASS provided the firms with their previously reported data and asked them to review and submit appropriate corrections.
>
> NASS agreed to summarize results of this process in a special report to be released on June 19, 2008. However, no firms provided corrected data, and therefore NASS will not issue a special report.

News Release, Nat'l Agric. Statistics Serv., U.S. Dep't of Agric., NASS Will Not Issue Special Report on Nonfat Dry Milk Prices (June 19, 2008), *available at* http://www.nass.usda.gov/Newsroom/Notices/06_19_2008.asp (last visited June 19, 2012).

Plaintiffs filed an initial appeal, but their appeal was dismissed because the district **[**27]** court's ruling was not a final order. *See* WMX Techs., Inc. v. Miller, 104 F.3d 1133, 1136 (9th Cir. 1997) (en banc). Plaintiffs then moved in the district court to dismiss their complaint with prejudice so that this court could exercise jurisdiction. The district court granted that motion. Plaintiffs then filed a timely notice of appeal.

DISCUSSION

I. Standard of Review and Applicable Procedural Law

HN23[] We review *de novo* challenges to a dismissal for failure to state a claim under Federal Civil Rule 12(b)(6). N.M. State Inv. Council v. Ernst & Young LLP, 641 F.3d 1089, 1094 (9th Cir. 2011). That standard is applied to a district court's dismissal based on the filed rate doctrine. California ex rel. Lockyer v. Dynegy, Inc., 375 F.3d 831, 849 n.16 (9th Cir. 2004), *amended*, 387 F.3d 966 (9th Cir. 2004); Brown v. MCI Worldcom Network Servs., Inc., 277 F.3d 1166, 1169 (9th Cir. 2002). "Such review is generally limited to the face of the complaint, materials incorporated into the complaint by reference, and matters of judicial notice." N.M. State Inv. Council, 641 F.3d at 1094; *see also Metzler Inv. GMBH v. Corinthian Colls., Inc., 540 F.3d 1049, 1061 (9th Cir. 2008)* (citing Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)). **[**28]** In undertaking this review, we will "accept the plaintiffs' allegations as true and construe them in the light most favorable to plaintiffs," Gompper v. VISX, Inc., 298 F.3d 893, 895 (9th Cir. 2002), and will hold a dismissal inappropriate unless the complaint fails to "state a claim to relief that is plausible on its face," Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007).

Because the only issues on appeal raised by plaintiffs concern the application of the filed rate doctrine and its preclusive effect in the present case and because the district court did not rule on defendants' other defenses (such as the purported lack of a private right of enforcement under the DMEA, the status of the USDA as an indispensable party, etc.), our decision is limited to the filed rate doctrine issues. *See* Singleton v. Wulff, 428 U.S. 106, 120, 96 S. Ct. 2868, 49 L. Ed. 2d 826 (1976) (**HN24**[] "[A] federal appellate court does not consider an issue not passed upon below."); U.S. ex rel. Lee v. SmithKline Beecham, Inc., 245 F.3d 1048, 1050 n.1 (9th Cir. 2001) ("[W]e limit our review to issues argued in a party's opening brief.").

II. The District Court Did Not Err in Concluding that the Agency-set Minimum Prices for Raw Milk Are Generally [**29] Subject to the Filed Rate Doctrine.

A. *The Filed Rate Doctrine*

As we observed in E. & J. Gallo Winery v. Encana Corp., 503 F.3d 1027, 1033 (9th Cir. 2007): **HN25**[] "The [filed rate] doctrine is a judicial creation that arises from decisions interpreting federal statutes that give federal agencies exclusive jurisdiction to set rates for specified utilities, originally through rate-setting procedures involving the filing of rates with the agencies." "At its most basic, the filed rate doctrine provides that state law, and some federal law **[*1128]** (e.g. ***antitrust law***), may not be used to invalidate a filed rate nor to assume a rate would be charged other than the rate adopted by the federal agency in question." Wah Chang v. Duke Energy Trading & Mktg., LLC, 507 F.3d 1222, 1225 (9th Cir. 2007) (quoting *Transmission Agency v. Sierra Pac. Power Co., 295 F.3d 918, 929-30 (9th Cir. 2002))*. It has generally been recognized that there are three "purposes" or "governmental interests" which justify or support the filed rate doctrine.

The origin and justifications for the doctrine can be traced to the Supreme Court's early cases involving the Interstate Commerce Act ("ICA"). Ark. La. Gas Co. v. Hall, 453 U.S. 571, 577, 101 S. Ct. 2925, 69 L. Ed. 2d 856 (1981); **[**30]** *see* Jim Rossi, *Lowering the Filed Tariff Shield: Judicial Enforcement for a Deregulatory Era*, 56 Vand. L. Rev. 1591, 1598-99 (2003) (henceforth *Lowering the Filed Tariff Shield). In* New York, New Haven & Hartford R.R. Co. v. ICC, 200 U.S. 361, 391, 26 S. Ct. 272, 50 L. Ed. 515 (1906), the Court, in interpreting the ICA, stated:

> [T]he great purpose of the act to regulate commerce, whilst seeking to prevent unjust and unreasonable rates, was to secure equality of rates as to all, and to destroy favoritism, these last being accomplished by requiring the publication of tariffs, and by prohibiting secret departures from such tariffs, and forbidding rebates, preferences and all other forms of undue discrimination.

Thus, ***HN26***[] the initial *raison d'être* for the doctrine concerned stabilizing rates and preventing pricing discrimination amongst ratepayers.[8] *See* *Maislin Indus., U.S., Inc. v. Primary Steel, Inc., 497 U.S. 116, 126, 110 S. Ct. 2759, 111 L. Ed. 2d 94 (1990)* ("The duty to file rates with the Commission and the obligation to charge only those rates have always been considered essential to preventing price discrimination and stabilizing rates." (citations omitted)).

Once it was determined that federal law required the primacy of filed rates and tariffs, there developed two additional and related justifications for the doctrine, *i.e.*, federal preemption (or the supremacy of federal law) and deference to federal agency expertise (or primary jurisdiction). As observed in *Nantahala Power & Light Co. v. Thornburg, 476 U.S. 953, 964, 106 S. Ct. 2349, 90 L. Ed. 2d 943 (1986)*:

> ***HN28***[] In *Chicago & North Western Transp. Co. v. Kalo Brick & Tile Co., 450 U.S. 311, 101 S. Ct. 1124, 67 L. Ed. 2d 258 (1981)*, the Court similarly noted that the filed rate doctrine as applied to the actions of the Interstate Commerce Commission assisted in the enforcement of the supremacy of federal law:
>
> > "The common rationale of these cases is easily stated: '[There] can be no divided authority over interstate commerce, and . . . the acts of Congress on that subject are supreme and exclusive.' *Missouri Pacific R. Co. v. Stroud, 267 U.S. 404, 408, 45 S. Ct. 243, 69 L. Ed. 683 (1925)*. **[**32]** Consequently, state efforts to regulate commerce must fall when they conflict with or interfere with federal authority over the same activity." *Id. at 318-319*.

(Alterations in original and parallel citations omitted). Allowing filed rates to be **[*1129]** subject to litigation in state courts (or in federal courts applying state law) could result in service rates and conditions varying across jurisdictions, which would conflict with the federal interest in uniformity. *See* *Ark. La. Gas Co., 453 U.S. at 578-79* (permitting individual ratepayers or others to attack a filed rate "would undermine the congressional scheme of uniform rate regulation"). That conflict would be prevented by treating the filed rates as having what amounts to a preclusive effect on state law rate-based claims.

HN29[] The third justification concerns the unnecessary interjection of the courts into the rate-making process where they have no expertise or valid reason to interfere. *See, e.g.,* *Montana-Dakota Utils. Co. v. Nw. Pub. Serv. Co., 341 U.S. 246, 251-52, 71 S. Ct. 692, 95 L. Ed. 912 (1951)* ("We hold that the right to a reasonable rate is the right to the rate which the Commission files or fixes, and that, except for review of the Commission's orders, the courts **[**33]** can assume no right to a different one on the ground that, in its opinion, it is the only or the more reasonable one.").

HN30[] The filed rate doctrine has been given an expansive reading and application in this Circuit, even in the face of "debate in other forums about [its] wisdom."[9] *MCI Telecomms. Corp. v. AT&T Co., 512 U.S. 218, 234, 114*

---

[8] As noted in *Lowering the Filed Tariff Shield*, *56 Vand. L. Rev. at 1599*:

> ***HN27***[] In original design, **[**31]** the [filed rate] doctrine was intended to serve as a sword to protect consumers from monopolistic price discrimination, such as a railroad charging different rates to customers of different states, or charging the shipping companies with whom it competes exorbitant prices, without justifications based on the cost of providing service to the customer.

[9] For example, ***HN31***[] California has declined to create a state filed rate doctrine even where the tariffs are filed with the state regulatory agency having authority over the subject area and even if the rates have been approved as reasonable by that agency. *See* *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 992-93 (9th Cir. 2000)*.

S. Ct. 2223, 129 L. Ed. 2d 182 (1994) (quoting Sec. Servs., Inc. v. Kmart Corp., 511 U.S. 431, 440, 114 S. Ct. 1702, 128 L. Ed. 2d 433 (1994)) (internal quotation marks omitted); *see also* Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 476 U.S. 409, 417-24, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986); *but see* Verizon Del., Inc. v. Covad Commc'ns Co., 377 F.3d 1081, 1089 (9th Cir. 2004) ("[T]he filed rate doctrine now functions in the telecommunications field as an anomaly. It is a relic, open to repudiation by the FCC."). In E. & J. Gallo Winery, 503 F.3d at 1035, after reviewing the doctrine and "associated principles" of federal preemption, we concluded that: "to the extent Congress has given [a federal agency] authority to set rates under [a federal statute] and [the agency] has exercised that authority, such rates are just and reasonable as a matter of law and cannot be collaterally challenged under federal ***antitrust law*** or state law." *See also* Wah Chang, 507 F.3d at 1225-26 **[**34]** ("The filed rate doctrine's fortification against direct attack is impenetrable. It turns away both federal and state antitrust actions; it turns away Racketeer Influenced and Corrupt Organization Act actions; it turns away state tort actions; and it even turns away state attempts to assert sovereign power to commandeer power contracts." (footnotes omitted)).

B. *The Filed Rate Doctrine Applies to the Minimum Rates for Raw Milk Set under FMMOs pursuant to the AMAA*.

No Supreme Court or federal appellate court case has considered whether the filed rate doctrine applies to marketing orders setting the prices for raw milk under the AMAA. However, a number of trial courts (in addition to the district court here) have held it does. *See, e.g.,* In re Se. Milk Antitrust Litig., 801 F. Supp. 2d 705, 732-34 (E.D. Tenn. 2011); In re Dairy Farmers of Am., Inc. Cheese Antitrust Litig., 767 F. Supp. 2d 880, 894-95 (N.D. Ill. 2011); **[**35]** Servais v. Kraft Foods, Inc., 2001 WI App 165, 246 Wis. 2d 920, 631 N.W.2d 629, 633-35 (Wis. Ct. App. 2001); *but see* Ice Cream Liquidation, Inc. v. Land O'Lakes, Inc., 253 F. Supp. 2d 262, 276 **[*1130]** (D. Conn. 2003) (holding that, while filed rate doctrine does apply to challenges to milk pricing set under an FMMO, it does not apply to a challenge to a defendant's artificially inflated wholesale milk prices, which are permitted to be in excess of the minimum rates set under the FMMOs).

HN32[] Originally, the filed rate doctrine arose in the context of the following paradigm. A rate or tariff within an industry regulated by federal statute is filed by a carrier or other service/ product provider with a federal agency, which in turn accepts and publishes it. *See, e.g.,* Sec. Servs., Inc., 511 U.S. at 435. Thereafter, the carrier (and its customer) is not allowed to charge (or pay) a different rate for that service/ product other than the filed one. *Id*. ("We have held these provisions 'to create strict filed rate requirements and to forbid equitable defenses to collection of the filed tariff.'" (quoting Maislin Indus., 497 U.S. at 127)). In turn, the rate is held not to be subject to challenge on antitrust, state law or most other grounds. **[**36]** *See, e.g.,* Keogh v. Chi. & Nw. Ry. Co., 260 U.S. 156, 161-65, 43 S. Ct. 47, 67 L. Ed. 183 (1922); Wegoland Ltd. v. NYNEX Corp., 27 F.3d 17, 18 (2d Cir. 1994) ("Simply stated, the doctrine holds that any 'filed rate' — that is, one approved by the governing regulatory agency — is per se reasonable and unassailable in judicial proceedings brought by ratepayers."). As noted in Ice Cream Liquidation, 253 F. Supp. 2d at 275:

> ***HN33***[] Application of the filed rate doctrine in any particular case is not determined by the culpability of the defendant's conduct or the possibility of inequitable results. Nor does the doctrine's application depend on the nature of the cause of action the plaintiff seeks to bring. Rather, the courts have held that the doctrine is to be applied strictly to prevent a plaintiff from bringing a cause of action whenever [the] purpose[s] underlying the filed rate doctrine [are] implicated.

(Citations omitted).

Here, admittedly, the statutory scheme created by AMAA does not present the typical filed rate scenario. For example, the handlers do not submit rates or prices to the AMS in order to create an unwavering price. Rather, various pricing data are provided to the NASS (some of which are supplied by handlers **[**37]** such as the defendants) and that data are utilized along with "make allowances" and "yields" (which are fixed by the agency's rules) in pricing formulas which, in turn, delineate the raw milk rates. *See* 7 C.F.R. § 1000.50 (2012). Also, the rates consist of only *minimum* prices from which the handlers and producers can deviate, albeit only in an upward direction (which favors the dairy producers). Further, the set rates are not uniform across the nation. They can vary amongst the eleven established milk marketing areas, and there are also locations without any applicable FMMOs (and hence no controlling filed rates). *See* 7 C.F.R. subtit. B, ch. X (2012); Hillside Dairy Inc., 539 U.S. at 61.

Additionally, the individual handlers make payments which vary according to the market value of the milk they use as reflected in the minimum payments, but all the milk producers in the area covered by the FMMO receive the same average, or blended, price per unit of milk. Finally, the FMMOs (which contain the pricing formulas), while promulgated by the USDA and subject to appropriate rulemaking proceedings including public hearing and comment, must be approved by the handlers of at least 50 percent **[**38]** of the volume of milk within the geographic area covered by the proposed order and at least two-thirds of the affected dairy producers in the region. *See 7 U.S.C. § 608c(8)*. Nevertheless, despite those elements, there are sufficient attributes which justify **[*1131]** the application of the doctrine to the AMAA milk pricing situation generally.

First, ***HN34***[] milk pricing is the subject of extensive federal statutory and regulatory control. *See, e.g.*, *7 U.S.C. § 608c(5)*. Additionally, under the AMAA, the USDA (via the AMS and through the FMMOs) sets minimum prices for raw milk purchased from producers by handlers where there can be no downward deviation in the rate. Therefore, to paraphrase *Gallo*, the filed rate doctrine is applicable because Congress has given the USDA authority to set rates under *7 U.S.C. § 608c(5)* and the USDA has exercised that authority to create the FMMOs which, in turn, are utilized to establish minimum prices for raw milk purchases; and thus "such rates are just and reasonable as a matter of law." *503 F.3d at 1035*.

Further, ***HN35***[] the three underlying justifications for the filed rate doctrine apply to FMMO prices set under the AMAA. The setting of minimum rates prevents discriminatory **[**39]** pricing (albeit to a more limited extent than other situations where the doctrine has been applied) and stabilizes prices by assuring dairy producers of reasonable payments for raw milk as fixed by the AMS. Additionally, the setting of minimum rates by means of formulas established in the FMMOs is a matter which clearly falls within an area of USDA expertise, which most courts would not possess. Finally, the AMAA and its concomitant regulations establish a federal scheme as to uniform minimum pricing which should not generally be the subject of attack by ratepayers or others. As stated in *7 U.S.C. § 602*:

> ***HN36***[] It is declared to be the policy of Congress —
>
> (1) Through the exercise of the powers conferred upon the Secretary of Agriculture under this chapter, to establish and maintain such orderly marketing conditions for agricultural commodities in interstate commerce as will establish, as the prices to farmers, parity prices as defined by *section 1301(a)(1)* of this title [*7 U.S.C. § 1301(a)*].
>
> (2) To protect the interest of the consumer by (a) approaching the level of prices which it is declared to be the policy of Congress to establish in subsection (1) of this section . . . and (b) authorizing **[**40]** no action under this chapter which has for its purpose the maintenance of prices to farmers above the level which it is declared to be the policy of Congress to establish in subsection (1) of this section.

C. Meaningful Review by the Federal Agency Is Not a Prerequisite to the Application of the Filed Rate Doctrine.

Plaintiffs challenge application of the filed rate doctrine here based on the contention that the USDA lacks "any actual legal authority to meaningfully review the substance of the pricing." They rely on *Brown v. Ticor Title Ins. Co., 982 F.2d 386 (9th Cir. 1992)*, where we held that the filed rate doctrine did not apply to title insurance rates filed with state insurance agencies because, although the rates were filed with the state agencies, they "were not subjected to meaningful review by the state." *Id. at 394* (citing *Wileman Bros. & Elliott, Inc. v. Giannini, 909 F.2d 332, 337-38 (9th Cir. 1990)*).[10]

---

[10] Plaintiffs also relied on our decision in *Wileman Bros*., which is readily distinguishable from the present case. In *Wileman Bros*., the defendants were nectarine and plum growers who served as members of committees appointed by the Secretary of Agriculture and who (without **[**41]** the Secretary's authorization) issued and enforced a "well-matured" standard governing when those varieties of fruits could be picked. *Wileman Bros*. did not involve a tariff or rate submitted to or issued by a federal agency. Thus, the filed rate doctrine was not applicable to that situation. Further, the holding of that case was that the

[*1132] We are not persuaded that *Brown* requires meaningful review for the filed rate doctrine to apply in all cases, however. In *Square D Co. v. Niagara Frontier Tariff Bureau, Inc., 476 U.S. 409, 417 n.19, 106 S. Ct. 1922, 90 L. Ed. 2d 413 (1986)*, the Supreme Court held that the filed rate doctrine applied to rates merely filed with the Interstate Commerce Commission ("ICC"), even when those rates had not been "investigated and approved by the ICC." Similarly, in *Gallo*, we held that the filed rate doctrine applied to market rates for natural gas authorized by the Federal Energy Regulatory Commission ("FERC"). **[**42]** The plaintiff argued that the filed rate doctrine applied only to "only rates that have been literally filed with and approved by FERC." *503 F.3d at 1039*. We disagreed, emphasizing that the essential question was whether the market rates were *authorized* by the FERC. *See id*. We explained that the FERC was not required to use "any particular form of regulation in its quest to ensure reasonable rates." *Id*. It mattered only that the rates were authorized by the FERC in the exercise of its statutory authority. *See id. at 1040-43*.[11] Thus, like the district courts that have addressed the issue, ***HN37***[] we do not read *Brown* as making meaningful agency review a *sine qua non* for the applicability of the filed rate doctrine. *See In re Hawaiian & Guamanian Cabotage Antitrust Litig., 754 F. Supp. 2d 1239, 1245-46 (W.D. Wash. 2010)* (collecting cases that characterize *Brown* as an "outlier" decision on the issue).

The proper inquiry, therefore, is whether the FMMO minimum prices were authorized by the USDA pursuant to its statutory authority, or, to paraphrase *Gallo*, whether the USDA was doing enough regulation to justify federal preemption **[**44]** of state laws. *See Gallo, 503 F.3d at 1041*. We conclude that it did.

The applicable statute required the Secretary to issue orders which provided for a particular, but partial, methodology for establishing minimum uniform prices for raw milk. *7 U.S.C. § 608c(5)*. It is not disputed that the Secretary exercised his discretion and promulgated regulations governing that rate setting process and issued orders in the form of the FMMOs to effectuate those requirements of the statutory scheme. Part of the methodology includes formulas which are dependent upon the **[*1133]** input of sales prices and volumes supplied by designated handlers.

Plaintiffs argue that the prices DairyAmerica reported to NASS are comparable to market-based rates like those in *Brown* because AMS only had the power to take NASS data, plug them into a predetermined formula, and then publish the resulting FMMO prices. Once the prices were reported to NASS, in other words, the rest of the pricing was mechanical and amounted to silence by AMS. Moreover, as plaintiffs argue, AMS did not have (at that time) the power to review the accuracy of data collected by the NASS. However, plaintiffs do not contend that the Secretary did not have **[**45]** the statutory authority to review the accuracy of NASS data.[12] Instead they argue that the USDA's implementing regulations did not, during the applicable time frame, contain any explicit provision for such a review. In opposition, defendants point out that the USDA has, in at least 18 instances, used its discretion to change the price data it used to calculate milk prices.[13] Plaintiffs counter that, under the relevant

---

defendants could not establish immunity from antitrust claims on the simple basis that the Secretary had "tacitly" approved the higher maturity standards they issued by his failing to explicitly disapprove them, as he could have done under applicable regulations. *See 909 F.2d at 337-38*.

[11] *Gallo* relied on an earlier case involving market rates for electricity, where it was held that the filed rate doctrine applied because the FERC was "doing enough regulation to justify federal preemption of state laws." *Gallo, 503 F.3d at 1041* (quoting *Pub. Util. Dist. No. 1 of Snohomish Cnty. v. Dynegy Power Mktg., Inc., 384 F.3d 756, 760 (9th Cir. 2004)*). **[**43]** In *Gallo* too, we concluded that the FERC was doing enough regulation for the filed rate doctrine to apply. First, the FERC determined that the best way to ensure just and reasonable rates in the evolving natural gas market was to allow natural gas sales to proceed at market prices. *See id. at 1041-42*. Second, the FERC reviewed the natural gas market and determined it was competitive. *See id. at 1042*. Third, although the FERC did not impose individualized reporting requirements on sellers of natural gas, it maintained ongoing oversight of the market and took corrective responses to evidence of market manipulation. *See id*. We thus concluded that, "[b]ecause FERC has not abdicated its responsibilities but has acted, albeit with a light hand, to authorize just and reasonable rates in the natural gas arena, the Filed Rate Doctrine continues to preempt any rate-setting activities by the courts and bar federal antitrust claims under the Filed Rate Doctrine." *Id*.

[12] The USDA clearly had statutory authority. Plaintiffs' Complaint alleges that the Secretary issued a rule that allowed for such review in 2007. Thus, even if the Secretary did not choose to review the accuracy of data reported to NASS, he had the power to do so.

implementing regulations, AMS only has the power to do so "[i]f for any reason a price or pricing constituent required for computing the prices described in *§ 1000.50* is not available." *7 C.F.R. § 1000.54 (2012)*. *Section 1000.50* calculates rates based on NASS pricing data.

Plaintiffs clearly underestimate the extent of the agency's authority (and its execution of those powers) in setting the minimum prices **[**46]** under the FMMOs. Indeed, the USDA here did far more than the FERC in the *Gallo* case in this regard. First, ***HN38***[] the agency promulgated regulations which created an intricate system for the setting of the prices. Unlike the FERC in *Gallo* which merely "reviewed the natural gas market and determined it was competitive," *503 F.3d at 1042*, the USDA not only examined the dairy products market, but also took into account volume, location, grade/quality of the milk, production differentials, and other factors in creating the formulas in the FMMOs. Also, the formulas do not consider only one or two data points but a large number of them to arrive at the ultimate price determination. Additionally, the formulas which generate the rates also include the consideration of "make allowances" and "yields" which are fixed by the agency's rules. Further, the FMMOs are not effective until the Secretary obtains the approval of handlers of at least 50 percent of the milk processed and two-thirds of the affected dairy producers within the geographic territory subject to the order. *7 U.S.C. § 608c(8)*. Thus, the Secretary exercises extensive authority vis-a-vis milk pricing in establishing the formulas in the FMMOs **[**47]** which in turn set the parameters for the issued minimum prices.

Additionally, as in *Gallo*, the USDA here maintained ongoing oversight of the market and initiated remedial actions in response to evidence of market manipulation. Indeed, upon being informed of the misreporting by DairyAmerica, the agency took steps to determine the effect of the misinformation, calculated corrective prices for the periods when the original data were available, and enacted regulations and amendments to the FMMOs for improved oversight of the reporting process. Furthermore, plaintiffs' contention (that AMS **[*1134]** did not and could not do anything but accept the NASS data even if it knew they were unreliable) is incorrect. Plaintiffs' argument is essentially that, had DairyAmerica provided false pricing information to NASS and then sent a letter to AMS saying "we made this data up," AMS would have been obligated to use that data to set prices. That is, to say the least, a curious interpretation of the pertinent regulations, *i.e.*, *7 C.F.R. §§ 1000.50* and *1000.54*. Indeed, during the relevant period, the market administrators (who were empowered to administer the FMMOs) had the authority to (1) make rules and regulations **[**48]** to effectuate the terms and provisions of the FMMOs, (2) receive, investigate, and report violations to the Secretary, and (3) recommend amendments to the Secretary. See *7 C.F.R. § 1000.25(b) (2004)*.

In sum, the USDA did possess the authority and did exercise it to address problems as to the agency-set minimum prices for raw milk under the FMMOs, such that the filed rate doctrine is applicable in the present AMAA situation.[14]

III. Precedent Does Not Require and Policy Considerations Do Not Support Applying the Filed Rate Doctrine as a Bar under the Facts of This Case.

Plaintiffs argue that even if the filed rate doctrine applies to agency-set milk prices in general, it should not serve as a bar in this case, since the USDA has indicated that it would have set different prices had DairyAmerica reported its data correctly. We know that prices would have been different but for the misreporting, because (1) the NASS

---

[13] Defendants' citations are to the federal register and, hence, judicially noticeable. *See 44 U.S.C. § 1507*.

[14] Plaintiffs also cite three cases from the same district court which declined to apply the filed rate doctrine to Medicaid reimbursement rates for prescription drugs. Each case, however, rejected the application of the doctrine at least in part because there were no filed rates. *Massachusetts v. Mylan Labs., 357 F. Supp. 2d 314, 329 (D. Mass. 2005)* (holding that the filed rate doctrine was inapplicable because "[t]he reported data do not control the rates which Defendants can charge customers, as a tariff would"); *In re Lupron Mktg. and Sales Prac. Litig., 295 F. Supp. 2d 148, 163 n.16 (D. Mass. 2003)*; *In re Pharm. Indus. Average Wholesale Price Litig., 263 F. Supp. 2d 172, 192 (D. Mass. 2003)* (holding that filed rate doctrine did not apply because pharmaceutical **[**49]** companies do not file rates with any agency). Furthermore, none of these cases address the doctrine at significant length and they would not therefore be particularly persuasive even if they were on point.

issued retroactive revised prices for part of the relevant period after DairyAmerica acknowledged its erroneous reporting, and (2) AMS calculated the increase in the prices of NFDM for the period between April 29, 2006 and April 14, 2007. We agree that the filed rate doctrine does not preempt or otherwise pose a preclusive bar to plaintiffs' lawsuit, because: (1) the federal agency itself determined that the FMMO prices were incorrect and (2) the policy considerations behind the doctrine do not **[**50]** justify applying the doctrine as a bar in this case.

Plaintiffs initially attempt to avoid the strictures of the filed rate doctrine by arguing that they are not actually seeking to challenge a fixed rate at all. However, we have made it clear that***HN39***[] the doctrine precludes remedies which rely on a court's recalculation of rates which would have been charged, even if the plaintiff is not directly challenging the filed rate:

> Wah Chang cannot avoid the fact that it seeks what amounts to having the courts determine what rates the Energy Companies should have charged instead of the rates they did charge. Wah Chang would inevitably drag the courts into a determination of what rate would be fair and proper. That is precisely what Wah Chang cannot do.

[*1135] *Wah Chang, 507 F.3d at 1226*. Establishing damage amounts for plaintiffs' claims, similarly, would require calculating what rates would have been set but for the defendants' misreporting. For this reason, it would be unavailing for plaintiffs to rely on *Gallo's* dictum that "[w]e are aware of no basis for holding that the Filed Rate Doctrine bars claims based on a reference point for pricing transactions (be it a trade index, the Consumer Price Index, **[**51]** or the New York Stock Exchange) that is not itself a FERC-approved rate." *Gallo, 503 F.3d at 1048 n.15*. Still, as discussed below, it is a different situation where the agency itself in the context of the AMAA/DMEA recognizes that its issued rates are in error due to the misconduct of the enriched party.

A. *The Filed Rate Doctrine Does Not Bar Plaintiffs' Claims Given the USDA's Recognition That Its Published FMMO Rates Were Incorrect Due to Defendants' Misreporting*.

HN40[] The Supreme Court has said that the filed rate doctrine does not apply to bar a private litigant's rate-related claims if the rate has been "suspended" or "set aside" by the relevant agency. *Keogh, 260 U.S. at 163*.[15] **[**52]** Whether an agency has sufficiently rejected a rate for purposes of the filed rate doctrine analysis, whether that rejection should eliminate the doctrine's preemptive bar, and, even if the bar is so removed, whether thereafter a plaintiff should be allowed to recover damages arising from the incorrect prior rates are admittedly difficult issues. They can only be correctly answered after consideration of the underlying statutory scheme in which the doctrine is being applied and the justifications for the doctrine.

Initially, the defendants contend that the issues disputed **[**53]** herein were settled by *Ark. La. Gas Co*., where the Supreme Court held that the filed rate doctrine prohibited a federally regulated seller of natural gas from charging higher rates than those filed with the FERC despite the contention that, had the seller applied for a higher rate, the FERC would have approved it. *453 U.S. at 573-76, 584-85*. In that case, the Court did not find compelling the argument that the defendant's misconduct (a breach of contract) had prevented the plaintiff seller from filing for a higher rate.[16] *Id. at 583*. However, the Court specifically focused on the controlling statute (*i.e*., the Natural Gas Act, *15 U.S.C. § 717 et seq.*). It observed that:

---

[15] *Accord* *City of Groton v. Conn. Light & Power Co., 662 F.2d 921, 929 (2d Cir. 1981)*:

> Under the Keogh or "filed rate" doctrine, . . . a public utility subject to regulation is not subject to antitrust liability to its customers for rates or services provided under tariffs approved by the appropriate regulatory agency. The rationale is that the regulatory agency determines the legal rate and the utility must collect it while it is in effect. The doctrine applies to rates that have been published but not acted upon by the regulatory agency, because they are the legal rates until suspended or set aside.

(Citation omitted).

[16] The Court in *Ark. La. Gas Co*. also noted that "[w]e save for another day the question whether the filed rate doctrine applies in the face of fraudulent conduct." *Id. at 583 n.13*.

> Not only do the courts lack authority to impose a different rate than the one approved by the Commission, but the Commission itself has no power to alter a rate retroactively. When the Commission finds a rate unreasonable, it "shall determine the just and reasonable rate . . . to be *thereafter* observed and in force." § 5 (a), 52 Stat. 823, 15 U. S. C. § 717d (a) (emphasis added).

Id. at 578. Based upon the plain text of the statute specifically precluding the FERC from altering a published **[*1136]** rate retroactively as well as **[**54]** ordering any reparations based on the unlawfulness of past rates, the Court concluded that a state court could not be allowed "to award what amounts to a retroactive right to collect a rate in excess of the filed rate [because it would] 'only accentuate[ ] the danger of conflict.' . . . [and constitute a] usurpation of federal authority." Id. at 584.[17]

Obviously, ***HN41***[] where the controlling statute prohibits the federal agency from altering a filed rate retroactively or limits any application **[**55]** of reconsidered rates to prospective situations, then the agency cannot effectively suspend or set aside the published rates for purposes of a lawsuit seeking recovery based on injuries arising from the imposition of those rates. However, unlike the Natural Gas Act, ***HN42***[] there is nothing in the AMAA or the DMEA which specifically bars the USDA from revising rates where handlers have supplied incorrect data to the agency.

HN43[] Turning to the issue of the extent to which the federal agency must indicate that it is suspending, setting aside or otherwise rejecting the filed rate, it is noted that a large segment of the cases dealing with the filed rate doctrine arise in the context of statutes such as the ICA, the Communications Act, and legislation involving the FERC, where an anti-discriminatory policy as to filed rates or tariffs lies at the very heart of the statutory scheme. *See, e.g.*, New York, New Haven & Hartford R.R. Co., 200 U.S. at 391; AT&T Co. v. Central Office Tel., Inc., 524 U.S. 214, 223, 118 S. Ct. 1956, 141 L. Ed. 2d 222 (1998). In such situations, a federal agency's ability to set aside a published rate retroactively would be extremely limited and, hence, any attempt to do so would have to be explicitly executed **[**56]** and thoroughly explained. For example, in *Keogh*, it was held that a rate that is filed with the ICC (and, after hearings, is approved by the Commission) is deemed reasonable and non-discriminatory as a matter of law, "[u]nless and until suspended or set aside." 260 U.S. at 160-63. However, the Court observed that in the context of the ICA, setting aside or suspending the published tariff for purposes of a legal action for damages would be extremely difficult because (1) any such case which led to a damages award to the plaintiff shipper would operate as "a preference over his trade competitors" and vitiate the paramount purpose of the ICA (*i.e.*, preventing pricing discrimination), and (2) in any such proceeding, "the Commission [would have to] determine whether a rate is discriminatory . . . . But by no conceivable proceeding could the question whether a hypothetical lower rate would under conceivable conditions have been discriminatory, be submitted to the Commission for determination." Id. at 163-64.

Plaintiffs cite to the Supreme Court's decision in *Maislin* for the proposition that the doctrine does not bar claims challenging prices that were rejected by the relevant agency. That **[**57]** reading of the case is overbroad. In *Maislin*, the Court noted the ICA prohibited both carriers and shippers from deviating from published tariffs filed with the ICC, but also required that the carrier's rates be nondiscriminatory **[*1137]** and reasonable, and charged the ICC, upon determining that a rate or practice violates the statute, with prescribing the subsequent rate or practice to be followed. 497 U.S. at 119-20. In 1986, in response to a growing trend wherein carriers and shippers privately negotiated rates lower than those filed with the agency, the ICC concluded that changes in the motor carrier industry "clearly warrant[ed] a tempering of the former harsh rule of adhering to the tariff rate in virtually all cases," and so it established a new policy whereby in referenced cases it would "decid[e] if the collection of undercharges would be an unreasonable practice." Id. at 121. A carrier that had entered into such a private contract went bankrupt, and its bankruptcy estate brought an action against the shipper to collect the difference between the

[17] Defendants also cite *Montana-Dakota Utilities Co*. where the Court declined to order the lower court to direct an agency to make a retroactive determination where Congress had not granted such authority to the agency. 341 U.S. at 254. It was noted that the agency's decision was required because the reasonableness of the rate charged, which could only be assessed by the agency, was determinative as to whether the plaintiff had a viable cause of action and a basis for the federal courts to exercise jurisdiction. Id. at 253-54.

contract rate and the higher filed tariff. The Court initially held that ***HN44***[] "The filed rate doctrine . . . contains an important caveat: The **[**58]** filed rate is not enforceable if the ICC finds the rate to be unreasonable." *Id. at 128*. The Court went on to quote from *Arizona Grocery Co. v. Atchison, Topeka & Santa Fe Ry. Co., 284 U.S. 370, 384, 52 S. Ct. 183, 76 L. Ed. 348 (1932)*, that "Under [the Act] the shipper was bound to pay the legal rate; but if he could show that it was unreasonable he might recover reparation." *Id. at 129* (alteration in original).[18] Thus, ***HN45***[] *Maislin* stands, in part, for the limited proposition that, where the statute allows the agency to decide that a published tariff is unreasonable under controlling law, the filed rate doctrine will not bar a plaintiff from seeking reparation from the imposition of the unreasonable rate.

The Supreme Court in *ICC v. American Trucking Associations, 467 U.S. 354, 104 S. Ct. 2458, 81 L. Ed. 2d 282 (1984)*, considered the related issue regarding the extent to which an agency can retroactively reject a previously filed rate. In the Motor Carrier Act of 1980, *49 U.S.C. § 10706(b)(3)*, Congress set forth specific guidelines to which motor carrier rate bureaus had to comply in order to receive antitrust immunity. **[*1138]** In response, the ICC issued an interpretive ruling wherein it proposed to adopt a new remedy wherein it would retroactively reject "effective" tariffs that had been submitted in substantial violation of the law. It based its authority to adopt that remedy on former *49 U.S.C. § 10762(e)*, which provided that the "Commission may reject a tariff submitted to it by a common carrier . . . if that tariff violates this section or regulation of the Commission carrying out this section." *Id. at 359-60*. The Court held that *section 10762(e)* did not authorize the Commission to reject effective tariffs, but nevertheless found that the ICC's authority "is not **[**61]** bounded by the powers expressly enumerated in the Act . . . . [but that] the Commission also has discretion to take actions that are 'legitimate, reasonable, and direct[ly] adjunct to the Commission's express statutory power.'" *Id. at 364-65* (third alteration in original) (quoting *In re Trans Alaska Pipeline Rate Cases, 436 U.S. 631, 655, 98 S. Ct. 2053, 56 L. Ed. 2d 591 (1978))*. The Court found the ICC's new remedy to be a "justifiable adjunct to its express statutory mandate." *467 U.S. at 370*.

The district court here considered the issue of whether the FMMO prices were rejected by the agency such that the filed rate doctrine would be inapplicable. It found that the USDA had disapproved of the rates but then stated that "the issue before the court is whether the disapproval of rates by the regulating agency can be held by the courts to operate retroactively." *690 F. Supp. 2d at 1139*. The court relied on both *American Trucking* and *City of Groton* to hold that "rejection" in the context of filed rate doctrine analysis necessarily involves (1) the agency's (presumably formal) suspension or setting aside of the published rates, and (2) a finding that a "statutory mandate" would be

---

[18] However, the Court found that the ICC had not found the *rates* were unreasonable but rather that the carrier had engaged in an unreasonable *practice*. It then held that:

> The Commission argues that under the filed rate doctrine, a finding that the carrier engaged in an unreasonable practice should, like a finding that the filed rate is unreasonable, disentitle the carrier to collection of the filed rate. We have never held that a carrier's unreasonable practice justifies departure from the filed tariff schedule. But **[**59]** we need not resolve this issue today because we conclude that the justification for departure from the filed tariff schedule that the ICC set forth in its *Negotiated Rates* policy rests on an interpretation of the Act that is contrary to the language and structure of the statute as a whole and the requirements that make up the filed rate doctrine in particular.
>
> Under the *Negotiated Rates* policy, the ICC has determined that a carrier engages in an unreasonable practice when it attempts to collect the filed rate after the parties have negotiated a lower rate. The ICC argues that its conclusion is entitled to deference because *§ 10701* does not specifically address the types of practices that are to be considered unreasonable and because its construction is rational and consistent with the statute. See *Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 843, 104 S. Ct. 2778, 81 L. Ed. 2d 694 (1984)*.
>
> We disagree. For a century, this Court has held that the Act, as it incorporates the filed rate doctrine, forbids as discriminatory the secret negotiation and collection of rates lower than the filed rate. See *supra, at 126-128*. By refusing to order collection of the filed rate solely because the parties **[**60]** had agreed to a lower rate, the ICC has permitted the very price discrimination that the Act by its terms seeks to prevent.

497 U.S. at 129-30 (footnote omitted).

furthered by the retroactive rejection [**62] of the minimum pricing structures set forth in FMMOs in question.[19] Id. at 1139-40. We disagree with the first point and conclude that the second was satisfied.

As discussed above, HN46[] the primary purposes of the AMAA and DMEA are: (1) "to establish and maintain such orderly marketing conditions for agricultural commodities in interstate commerce as will establish, as the prices to farmers, parity prices," 7 U.S.C. § 602(1), and (2) "the protection of the producers of milk and [*1139] milk products," Block, 467 U.S. at 352. Additionally, the prices that are set for raw milk under the applicable statutes are minimum rates which can be (and are) subject to further negotiation between handlers and dairy farmers. Those rates are not initially [**64] filed and reviewed by the agency but rather are the product of formulas established by the USDA which are, in part, dependent upon the receipt of pricing data from certain handlers. In such a situation, there is nothing in the controlling statutes or concomitant regulations that would appear to require any formal process or particular expression for the agency's retroactively setting aside or rejecting milk prices that have been incorrectly set as a result of misreporting by certain handlers. Further, the statutory goals as to an orderly mandate of marketing conditions and the protection of milk producers would both be served by imposing consequences on handlers for misreporting data[20] that resulted in incorrect FMMO pricing and multimillion dollar losses for dairy farmers.

Neither *Keogh, Maislin*, nor *American Trucking* addresses the issue HN47[] of what specific steps an agency need take before it can be deemed to have "rejected" a rate. Such a question cannot [**65] be considered in a vacuum; the steps required before an agency's rate "rejection" should be recognized will necessarily vary based on both the statutory framework within which the agency acts and upon the purposes of the statute in furtherance of which the agency acts. In *American Trucking*, the Court noted that the agency itself had limited its rejection powers such that "effective tariffs will be nullified only upon findings of substantial violations of rate-bureau agreements." 467 U.S. at 370. Neither *Keogh* nor *Maislin* had the opportunity to address this issue of *when* an agency has taken sufficient steps to officially disapprove a rate. We conclude that the USDA's actions here constitute a sufficient rejection such that the filed rate doctrine is not a bar. Further, the statutory mandate of the AMAA and the DMEA, as well as the policies of the filed rate doctrine more generally, are furthered by our conclusion that the filed rate doctrine does not apply to bar plaintiffs' claims here.

The USDA adequately expressed its disapproval of the FMMO prices.[21] While the USDA's recalculation of minimum dairy prices was not explicitly called a rejection, the agency recognized that earlier filed [**66] rates were

---

[19] The district court also held that the filed rate doctrine should preclude plaintiffs' claim for damages because they had not alleged that DairyAmerica's actions were willful or knowing. 690 F. Supp. 2d at 1139-40. Plaintiffs argue that NASS's instructions were clear and that the fact that DairyAmerica's reporting errors were self-serving suggests that its misstatements were knowing. The Supreme Court made a similar inference in *American Trucking*, holding that "[t]he guidelines for antitrust immunity . . . are of such a nature that carriers who submit tariffs in substantial violation of agreements will be aware of their transgressions." 467 U.S. at 370-71. The regulations in this case were similarly clear ("don't report long-term prices" is not a very hard instruction to understand), yet we need not address the issue of whether DairyAmerica's misreporting was intentional because neither the district court nor the parties have identified a precedent which holds that knowledge is determinative of plaintiffs' right to proceed. [**63] The district court quotes *Cooperative Power Association v. FERC*, which held that *American Trucking* "approved retroactive tariff rejection as a sanction for knowing violations of agreements" but omits its qualification that the Supreme Court's decision was premised on the assumption that "any carrier in substantial violation of a rate-bureau agreement would be aware of the violation." 739 F.2d 390, 391 n.3 (8th Cir. 1984) (per curiam). *Cooperative Power* contains no language *requiring* knowledge. And since *American Trucking* assumed knowledge, it did not reach the question of whether damages could be recovered without it.

[20] The district court found that about 90 percent of the contracts reported to the NASS by DairyAmerica were forward contracts, which under DMEA procedures were not to be included in the data provided to the NASS. 690 F. Supp. 2d at 1131.

[21] While the defendants argue that the AMS (which defendants characterize as "the division that the Secretary charged with FMMO minimum price oversight and enforcement") did not reject or change previously announced FMMO prices as a result of the discovery of their misreporting, the USDA OIG has stated: "Given that incorrect nonfat dry milk prices were factored into the FMMO formula, AMS has stated that its published FMMO prices were incorrect. According to the AMS, this caused the total

incorrect at the time they were filed and imposed significant and improper costs on producers. These "revisions" were, as AMS made clear, not necessarily complete since "reallocation effects [were] not considered." The USDA also sought to recalculate prices for the whole class period, but could not do so because dairy handlers did not supply it with accurate data on their sales of NFDM for the entire class period. While plaintiffs **[*1140]** seek to characterize these revisions as a wholesale repudiation, and defendants as a mere speculative exercise, the reality is that AMS did recognize and attempt to estimate the impact of DairyAmerica's misstatements. The Secretary then took actions to revise regulations to prevent such misreporting from recurring. The USDA took no further action, noting that "[a]ll of the funds in the FMMO pools for the 14-month period covered by NASS' revision had previously been disbursed to the milk producers, and corrective disbursements to producers were no longer possible." But the USDA also recognized that the rates that were filed were incorrect at the time they were filed. Indeed, when members of Congress, outraged by the uncompensated losses suffered **[**67]** by the milk producers, asked what plans the agency had to remedy the situation, the USDA responded by ensuring that, moving forward, the agency would promulgate regulations providing for more oversight responsibilities and more effective enforcement mechanisms. *See* 7 C.F.R. pt. 1170 (2012).

Given that at the time of the misreporting the agency lacked the authority to sanction DairyAmerica,[22] the record supports **[**68]** the conclusion that the USDA rejected the FMMO rates at issue. ***HN48***[] It is in precisely this scenario that *Maislin* and *Keogh* recognized that the filed rate doctrine should not bar a private litigant from pursuing claims involving those rates.

Our holding will not permit a flood of litigation such that the filed rate doctrine will be circumvented every time a milk producer has a quibble with FMMO prices. To the contrary, this case presents a narrow exception to the general rule that the filed rate doctrine not only applies but functions so as to bar FMMO price-related claims. Here, we are faced with the unusual situation where (1) the misreporting is both significant in scope and undisputed between the parties, (2) the USDA has recognized that the FMMO rates based on DairyAmerica's erroneous reports were incorrect, and (3) permitting the rate-related claims to move forward is the only way to remedy the **[**69]** injuries suffered by the milk producers, the very class of persons the statutory scheme was enacted to protect.

B. *The Purposes of the AMAA and DMEA Would Not Be Served by Giving the Filed Rate Doctrine Preemptive Effect Here*.

The district court reasoned that "while the DMEA sets forth procedures for the submission and collection of milk pricing survey data, there is nothing to indicate a 'statutory mandate' that would be furthered by the retroactive 'rejection' of the minimum pricing structures set forth in the FMMO's in question." *690 F. Supp. 2d at 1139*. Yet, as cited by plaintiffs, ***HN49***[] the DMEA's mandate is that the USDA "shall establish a program of mandatory dairy product information reporting that will . . . provide timely, accurate, and reliable market information." *7 U.S.C. § 1637b(a)*. Their complaint includes numerous statements from legislators which suggest that the DMEA, by compelling dairy firms to provide information to NASS, was intended to help AMS produce more accurate prices. Retroactive adjustment of FMMO rates provides a straightforward incentive for reporting firms to obey the DMEA which would increase the accuracy and reliability of market information and ensure that **[**70]** AMS sets correct and accurate prices.

[*1141] Further, the AMAA (which is the underlying legislation) was created to stop the "destabilizing competition" among dairy farmers and the essential purpose of the FMMO scheme is to raise *producer* prices. *Block, 467 U.S. at 341-42*. It would be contrary to those statutory purposes to hold that a handler who misreports required data (which results in potentially millions of dollars in losses to dairy producers and unjustified monetary benefits to itself) should be able to avoid liability because of the absence of a specific provision as to retroactive remedies, even after the

value of milk to be understated by $50 million between April 29, 2006 and April 14, 2007." Further, on June 28, 2007, AMS issued a report on "Impacts of NASS Nonfat Dry Milk Price and Sales Volume Revisions on Federal Order Prices" which was based on revisions due to the discovery of the misreporting.

[22] Because the USDA itself had no mechanism for retroactive sanctions, plaintiffs reason, it could only have attempted to calculate revised rates to facilitate private litigation (they deny, however, that such an interpretation of the agency's actions is necessary for their claims to succeed).

agency has found misconduct by that party.[23] However, the plaintiffs here are proceeding under state law, not federal. Hence, at this point, it is only the filed rate doctrine that has been utilized as a barrier to their case.

C. *The Purposes of the Filed Rate Doctrine Do Not Support Applying It as a Bar under the Facts of This Case*.

Since the cases cited by both plaintiffs **[**71]** and defendants provide, at best, vague guidance on the applicability of the filed rate doctrine to the facts of this case, this court would look again to the purposes of the doctrine in the context of the present statutory scheme. *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1266-67 (9th Cir. 1982)* (applying Keogh's policy considerations to determine that the filed rate doctrine was not a bar). ***HN50***[] Courts typically describe the filed rate doctrine as having three purposes: deference to agencies' greater expertise in rate-setting, preventing discrimination by ensuring all ratepayers face the same price, and avoiding disruption of a Congressional scheme for uniform price regulation. *Wegoland Ltd., 27 F.3d at 21*. All of these goals would be implicated by a reversal of the district court's decision.

1. Assessing damages would not require excessive speculation or hypothetical considerations of agency decision making.

Defendants argue that the filed rate doctrine should be applied because, even with the NASS recalculation, the district court would have a great deal of trouble calculating damages. Plaintiffs counter that the formula used to convert NFDM data to FMMO **[**72]** prices was at all relevant times fixed by statute and regulation. Defendants concede this, but argue that a shift in the filed rate would have had substitution effects[24] and hence a simple recalculation of the FMMO rates would not produce an accurate measure of damages. In other words, if DairyAmerica had accurately reported NFDM prices, some FMMO prices would have been different. That price difference would have given market participants a different set of relative prices for different classes of milk which in turn would have produced losses or gains that cannot be captured by AMS's mere revision of FMMO prices. This is certainly true to some extent, but it is impossible to say how large this effect would have been without more facts. Given that the differences in prices were two cents per pound of NFDM, it seems likely that any substitution effects would have been relatively small.[25] On the other **[*1142]** hand, the aggregate effect of just 14 months of misstated prices was $50 million, so substitution effects might still have been significant.

HN51[] Some uncertainty can arise in any calculations of damages, but that does not preclude recovery where it is clear that some damage has occurred.[26] Unlike the damages contemplated in *Keogh*, those in the present case

---

[23] If the acts of misreporting by the handler were considered to be violations of the FMMO orders themselves, the AMAA provides for civil penalties of up to $1,000 for each such violation. *7 U.S.C. § 608c(14)(B)*.

[24] MS referred to these as "reallocation" effects. Defendants call them a "dynamic model." But all parties are referring to the same phenomenon.

[25] Defendants **[**73]** also note that other firms' misstatements were included in the revised figures issues by NASS and then argue that plaintiffs might not be able to get data from firms besides DairyAmerica in discovery and hence would not be able to calculate accurate revised prices using the FMMO formulas. But if plaintiffs seek to recover damages from DairyAmerica only, damages would be measured by the effect DairyAmerica's misstatements alone had on the FMMO prices. Also, as noted above, DairyAmerica sells about 75 percent of the NFDM produced in the United States, and approximately 90 percent of its contracts reported in the weekly NASS surveys were forward contracts which should not have been included.

[26] As stated in *Clemente v. State, 40 Cal. 3d 202, 219 Cal. Rptr. 445, 707 P.2d 818, 828 (Cal. 1985)*:

> ***HN52***[] In general, one who has been tortiously injured is entitled to be compensated for the harm and the injured party must establish "by proof the extent of the harm and the amount of money representing adequate compensation with as much certainty as the nature of the tort and the circumstances permit." (*Rest.2d Torts, § 912*, p. 478.) However, "[t]here is no general requirement that the injured person should prove with like definiteness the extent of the harm that he has suffered as a result of the tortfeasor's conduct. It is desirable that responsibility for harm should not be imposed until it has been proved with reasonable certainty **[**75]** that the harm resulted from the wrongful conduct of the person charged. It is

are not "purely speculative" or "supplied by conjecture," and "proof of such facts" is not "impossible." *260 U.S. at 164-65*. To prevail in *Keogh*, the plaintiffs would have had to show not only that the rate would have been different had the defendants' misconduct not occurred, but that the **[**74]** ICC would have disapproved of that different rate. *Id. at 164*. In the present case, by contrast, the actions the USDA would have taken had it had correct data from DairyAmerica are clear: the USDA would have announced different FMMO prices, ones more favorable to the producers. It is only the specific prices that would have been set which remain somewhat unclear. Calculating damages would not, therefore, involve the kind of "hypothetical" speculation about agency decisions that *Keogh* forbids.

2. Plaintiffs' claims do not pose a significant risk of price discrimination or destabilization.

Discrimination in the present context relates to the concern that "[i]f [one party] could recover . . . damages resulting from the exaction of a rate higher than that which would otherwise have prevailed, the amount recovered might, like a rebate, operate to give him a preference over his trade competitors." *Id. at 163*. Plaintiffs contend that discrimination is not an issue because their suit's class-action allegations ensure that all affected milk producers will be treated alike. Defendants counter that the Supreme Court has ruled that class action status alone is not enough to defeat the filed rate doctrine. *Square D, 476 U.S. at 423*. ***HN53***[] We have **[**76]** endorsed an opinion of the Second Circuit which interpreted *Square D* to hold that the principle of nondiscrimination still suggests the filed rate doctrine should be applied in class actions. *In re NOS Commc'ns, 495 F.3d 1052, 1059 (9th Cir. 2007)* (citing *Marcus v. AT&T Corp., 138 F.3d 46, 61 (2d Cir. 1998))*. *Marcus*, however, qualified this holding: "We agree that 'the concerns for discrimination are *substantially alleviated* in [a] putative **[*1143]** class action' . . . . However, the Supreme Court has rejected the suggestion that . . . the nondiscrimination principle [is] inapplicable to a putative class action suit." *Marcus, 138 F.3d at 61* (first alteration in original) (emphasis added) (citations and internal quotation marks omitted). *NOS Communications* should, therefore, be read as rejecting any blanket rule that discrimination is not a concern in class actions, but still not going so far as holding that putative class action status is irrelevant to our inquiry into the discriminatory impact of not applying the filed rate doctrine.

While putative class action status does not resolve the question, defendants' arguments that judgment in favor of plaintiffs would have a discriminatory effect **[**77]** are weak. Defendants contend that awarding damages against DairyAmerica would discriminate against them in comparison with other milk handlers. However, as observed above, ***HN54***[] the prohibition against discriminatory pricing under the AMAA is concerned with discrimination suffered by the dairy producers, not the handlers. In any case, were damages assessed against it, DairyAmerica would not be paying a higher (discriminatory) rate at all; it would be paying damages corresponding to the higher rate its own mistakes (or bad acts) had previously caused producers to pay it. It would therefore not, as defendants contend, "face higher/non-uniform prices for the relevant period." Instead, it would face the same prices as everyone else and also a separate damage award. That award might, certainly, put it at a disadvantage relative to its competitors (though it is unclear how large that disadvantage would be given that it controls 75 percent of the NFDM market), but it has already profited from the lower prices its misreporting has allowed it to enjoy; damages would at least partially cancel out this undeserved benefit.

3. Allowing Plaintiffs' claims to go forward would not unduly disrupt the Congressional ***[**78]*** *pricing scheme embodied by the AMAA*.

Plaintiffs did not initiate this lawsuit to challenge the agency's authority to set minimum milk prices or to directly contest rates which the USDA in its expertise has continued to treat as being correct and/or valid. Rather, it was only *after* the USDA concluded that DairyAmerica's misreporting had contaminated the minimum price setting

---

> desirable, also, that there be definiteness of proof of the amount of damage as far as is reasonably possible. It is even more desirable, however, that an injured person not be deprived of substantial compensation merely because he cannot prove with complete certainty the extent of harm he has suffered." (*Rest.2d Torts, § 912, com. a*, at p. 479.)

(Alteration in original).

process that this action was filed. Consequently, this case does not involve a scenario where a litigant is seeking to have a court substitute its evaluation of a proper rate for the agency's determination. This lawsuit does not constitute a disruption of the Congressional pricing scheme embodied in the AMAA. As we observed in *Gallo*, "***HN55***[] [m]isreported rates and rates reported for fictitious transactions are not [agency]-approved rates, and barring claims that such fictitious transactions damaged purchasers in the natural gas market would not further the purpose of the filed rate doctrine." *503 F.3d at 1045*. Moreover, the rate scheme here differs from typical filed rates. ***HN56***[] While Congress undoubtedly intended the FMMOs' minimum prices to apply in a uniform way within the monthly periods and the geographic areas, there **[**79]** is no indication of an overarching congressional or agency intent for uniformity on a nationwide scale, for a long period of time, or even in terms of the actual price paid, given that the FMMO merely sets a floor price.

The facts of this case, therefore, do not justify applying the filed rate doctrine preemptively. The district court would not need to second-guess agency decision-making or speculate about what the agency would have done in order to assess liability or calculate damages. To hold otherwise would be an exercise of mechanical **[*1144]** formalism in contravention of the purposes of both the AMAA/DMEA and the filed rate doctrine itself.

CONCLUSION

The district court properly determined that the filed rate doctrine applies to the AMAA minimum milk pricing program, but erred by concluding that the doctrine applies to bar the plaintiffs' state-law claims in this case. The judgment of the district court dismissing the case is therefore reversed.

REVERSED AND REMANDED.

Opinion

REPORT AND RECOMMENDATION

On October 31, 2011, Defendant, Simon Property Group, Inc. ("Simon"), filed a motion to dismiss the complaint. On November 17, 2011, Plaintiff, Gumwood HP Shopping Partners, L.P. ("Gumwood"), filed its response. On December 12, 2011, Simon filed a reply. On June 7, 2012, the presiding judge referred the motion to dismiss to the undersigned to prepare a report and recommendation. For the following reasons, the undersigned **RECOMMENDS** that the Court **DENY** the motion to dismiss.

I. RELEVANT BACKGROUND

On June 29, 2011, Gumwood filed a complaint **[*2]** against Simon for monopolization in violation of *Section 2* of the Sherman Antitrust Act and for restraint of trade in violation of *Section 1* of the Sherman Antitrust Act. According to the complaint, Gumwood is the owner and landlord of a retail property known as Heritage Square. Heritage Square is a "lifestyle shopping center" located in Mishawaka, Indiana. Simon is the owner of University Park Mall, a super-regional mall also located in Mishawaka, Indiana. Gumwood alleges that Simon interfered with its negotiations with retail tenants, in particular Ann Taylor LOFT and Coldwater Creek, causing them to cease their dealings with Gumwood.

Gumwood alleges that Simon is the largest public U.S. real estate company, owning 382 properties comprising 245 million square feet of leasable area in North America, Europe, and Asia. Doc. No. 1 at 2. Simon is the largest landlord for many national retailers, including several of the retailers with whom Gumwood negotiated to secure as tenants for Heritage Square. Gumwood alleges that Simon has managed to raise its rents at its malls even in the recent recession, while its largest competitor was driven into bankruptcy. *Id*. at 2-3. Gumwood alleges that **[*3]** Simon routinely abuses its power by refusing to renew existing leases or making renewals conditioned upon the tenant not opening stores in a competing development in another market, requiring a tenant to relocate a store without giving it an opportunity to renew an existing lease as a means of preventing the tenant from opening a store in a competing center, and increasing rates or otherwise making the terms of renewal less favorable in retaliation for opening a store in a competing center. *Id*. at 3.

According to the complaint, in 1979, Simon built University Park Mall, which enjoyed its status as the dominant retail platform in the South Bend/Mishawaka area from its opening. *Id*. In 2008, Simon expanded and opened a 100,000 square foot open-air lifestyle component, the Village at University Park. *Id*.

In 2007, Gumwood opened Heritage Square, which was designed to be an open-air lifestyle center designed to attract upscale, national-chain specialty stores with dining and entertainment in an outdoor setting. *Id*. at 3-4. Gumwood entered into lease negotiations with a portion of what it alleges are "key tenants," including Ann Taylor LOFT, Lane Bryant/Cacique, White House Black Market, Brooks Brothers, Eddie Bauer, Chico's, Coldwater Creek, and Aveda. *Id*. at 4. **[*4]** Gumwood also began negotiating with J. Jill, Franchesca's and Acorn. *Id*. Gumwood considered LOFT and Coldwater Creek as its most important potential clients because they would draw other stores to Heritage Square. Doc. No. 1 at 4-5. Co-tenancy provisions are common in retail leasing agreements to guarantee a select mix of stores that will attract more customers. *Id*. at 5. If a co-tenancy provision is not satisfied, the lease may not be binding or the landlord may have to offer a lower rent. *Id*. On August 16, 2006, after leases with some tenants had been executed, including LOFT and Coldwater Creek, Heritage Square was appraised at $46,300,000. *Id*.

Gumwood alleges that in 2005 it began negotiating with LOFT for a lease in Heritage Square, which was signed on June 14, 2006. *Id*. The LOFT lease attracted other tenants, such as Lane Bryant/Cacique and Coldwater Creek, and LOFT became a required co-tenant for some of the potential clients Gumwood was negotiating with. *Id*. at 6.

During that time, Ann Taylor operated a store at University Park Mall. *Id*. On June 25, 2006, the local newspaper published an article announcing that Ann Taylor was opening a LOFT store in Heritage Square. *Id*. On June **[*5]** 27, 2006, Gumwood executed the lease. *Id*. Gumwood alleges that Simon executives then promptly contacted Ann Taylor and pressured Ann Taylor to rescind its lease and not open a LOFT store at Heritage Square. Doc. No. 1 at 6. As a result, Ann Taylor asked to rescind its lease on June 28, 2006. *Id*. Gumwood refused and agreed to renegotiate the terms of the lease and amended the lease on August 16, 2006. *Id*. Ann Taylor took possession of the premises on that date and began construction of its LOFT store. *Id*. at 7.

Sometime after the lease was amended, Simon again contacted Ann Taylor to pressure it not to open its store at Heritage Square. *Id*. Ann Taylor then instructed its contractor to cease operations at Heritage Square after one week of building. *Id*. Gumwood again renegotiated the terms of the lease and both parties agreed on April 20, 2007, but before Ann Taylor signed the lease, Simon again pressured it not to do so. *Id*. Although Ann Taylor refused to sign the second amended lease, it continued to negotiate with Gumwood. *Id*. In August 2007, Ann Taylor terminated its lease with Gumwood. *Id*. at 8.

In February 2008, Ann Taylor informed Gumwood that it had been negotiating with Simon to **[*6]** put a LOFT store at the University Park Mall, but that it had not finalized its negotiations because it still wanted to open at Heritage Square. *Id*. On June 22, 2008, the local newspaper reported that LOFT would open at University Park Mall and not Heritage Square. *Id*. In July 2008, Ann Taylor executed a lease with Simon to open a LOFT store at University Park's outdoor lifestyle center. *Id*.

Gumwood alleges that although some Ann Taylor executives believed that opening at Heritage Square was the right thing to do, they bowed to pressure and anti-competitive tactics employed by Simon. *Id*. at 9. In particular, Simon used other leases it was negotiating with Ann Taylor as leverage to force Ann Taylor to back out of its deal with Gumwood. *Id*. Gumwood alleges that Simon attempted to destroy it as a potential competitor by contacting other potential and signed tenants of Heritage Square and using Simon's market power to use anti-competitive tactics to pressure prospective tactics away from any deals with Heritage Square. *Id*. at 9-10. According to the complaint, Simon told other Heritage Square tenants and potential tenants that Ann Taylor would not open its LOFT store in Heritage Square despite **[*7]** the fact that it had Ann Taylor had signed a lease. *Id*. at 10.

Gumwood also alleges that Simon also interfered with its lease with Lane Bryant/Cacique, which are owned by Charming Shoppes, Inc. *Id*. at 11-13. Gumwood alleges that Simon used similar pressuring tactics with Charming Shoppes as it had with Ann Taylor, and as a result, Charming Shoppes backed out of its deal with Gumwood. *Id*. at 13.

According to the complaint, Simon employed similar tactics with other stores, including Coldwater Creek, Eddie Bauer, and Acorn, often making false representations about the status of Ann Taylor's lease with Gumwood. *Id*. at 10-14.

Gumwood seeks damages in the form of lost rents and the diminution in value of Heritage Square as a result of the loss of tenants, as well as treble damages and attorney fees.

II. ANALYSIS

Under *Fed. R. Civ. P. 12(b)(6)*, dismissal of a complaint is appropriate when the complaint fails to allege a cause of action for which relief can be granted. Federal law only requires a plaintiff to provide a short and plain statement of the claim that the pleader is entitled to relief. *Fed. R. Civ. P. 8*; *see* *Bartholet v. Reishauer A.G. (Zurich), 953 F.2d 1073, 1078 (7th Cir. 1992)* (A **[*8]** complaint should be "short and simple giving the opposing party notice while leaving the rest to further documents"). It is not necessary for a complaint to identify legal theories in order to state a claim or indicate each technical element of a legal theory that is identified. *Powell v. Fujimoto, 119 Fed. Appx. 803, 804 (7th Cir. 2004)*. A complaint that states a plausible claim for relief survives a motion to dismiss. *See* *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct 1937, 1949-50, 173 L. Ed. 2d 868 (2009)*; *see also* *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1965, 167 L. Ed. 2d 929 (2007)* (The pleading stage does not impose a probability requirement, it simply requires alleged facts to be plausible so as to entitle a person to relief even if recovery is remote and unlikely).

A. Count I: Monopolization and Attempted Monopolization

Under the Sherman Antitrust Act, *Section 2*, "Every person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony . . . ." *15 U.S.C. § 2*. Gumwood must allege two elements to allege monopolization: "(1) the possession of monopoly power in the relevant market, and (2) the willful acquisition or maintenance of that **[*9]** power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *U.S. v. Microsoft Corp., 253 F.3d 34, 50, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*. To allege attempted monopolization, Gumwood must allege that (1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

1. Relevant Market

Simon argues that Count I should be dismissed for several reasons. First, Simon argues that Count I should be dismissed because Gumwood has failed to allege a relevant market. To show a relevant market, a plaintiff must allege both a territory encompassed and a product involved. *Mullis v. Arco Petroleum Corp., 502 F.2d 290, 295 (7th Cir. 1974)*. Gumwood has satisfied both of these requirements. First, Simon does not challenge the geographic market, and Gumwood's complaint repeatedly discusses the South Bend/Mishawaka region as the territory in question. That satisfies the geographical market.

Second, Simon argues that Gumwood has failed to allege a relevant product. However, none of the cases it cited **[*10]** in support considered a motion to dismiss. *See* *Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1578 (11th Cir. 1985)* (summary judgment); *Net Realty Holding Trust v. Franconia Props., Inc., 1983 U.S. Dist. LEXIS 19904, 1983 WL 1786 (E.D.Va., Jan. 20, 1983)* (decided at trial); *Deauville Corp. v. Federated Dept. Stores, Inc., 1983 U.S. Dist. LEXIS 15534, 1983 WL 1865 (S.D. Tex., Jul. 12, 1983)* (decided by directed verdicts after trial); *Optivision, Inc. v. Syracuse Shopping Center Assoc., 472 F.Supp. 665 (D.N.Y. 1979)* (preliminary injunction). The complaint alleges that University Park Mall is a "super-regional mall" that contains higher-end stores, and that Heritage Square is a lifestyle shopping center that is similarly designed to attract higher-end specialty stores. Furthermore, the retail industry recognizes certain submarkets defined by various types of shopping centers, such as "super-regional malls," "lifestyle centers," and "big-box" stores. Gumwood has alleged that "super-regional malls" and "lifestyle centers" compete because they are both part of the same market. As a result, Gumwood has sufficiently alleged a relevant product, namely lifestyle shopping centers.

2. Substantial Market Foreclosure

Next, Simon argues that Gumwood fails **[*11]** to allege that Simon caused substantial market foreclosure. "In the context of exclusive dealing arrangements, this means that the plaintiff can prevail only by showing that the agreement in question results in a substantial foreclosure of competition in an area of effective competition, that is, in a relevant market." *Dos Santos v. Columbus-Cuneo-Cabrini Med. Ctr., 684 F.2d 1346, 1352 (7th Cir. 1982)*. "Because an exclusive deal affecting a small fraction of a market clearly cannot have the requisite harmful effect upon competition, the requirement of a significant degree of foreclosure serves a useful screening function." *U.S. v. Microsoft Corp., 253 F.3d 34, 69, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*.

Gumwood's complaint alleges that Simon engaged in anticompetitive tactics designed to induce exclusive deals. As a result, Gumwood must allege a substantial foreclosure of competition. "Courts routinely observe that 'foreclosure levels are unlikely to be of concern where they are less than 30 or 40 percent.'" *B&H Medical, LLC v. ABP Admin., Inc., 526 F.3d 257, 266 (6th Cir. 2008)* (citing *Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield of R.I., 373 F3d 57, 68 (1st Cir. 2004))*. Gumwood has not alleged **[*12]** a specific percentage of market foreclosure, but Simon admits that a precise percentage need not be alleged. Doc. No. 25 at 21. Gumwood has alleged that its primary tenant, LOFT, was foreclosed as well as another significant tenant, Charming Shoppes, and that Simon has charged its tenants above-market rent because of exclusive dealing. Furthermore, Gumwood alleges that Simon has decreased competition in the market for high-end upscale retail space. As a result, Gumwood's complaint does not fail for lack of a "substantial foreclosure."

The Court reiterates that this is not a final decision on the merits of Gumwood's case. This is merely a judgment as to the sufficiency of the pleadings. Under the relevant standard, Gumwood must only state a plausible claim for relief to survive a motion to dismiss. See *Iqbal, 129 S.Ct at 1949-50 (2009)*.

3. Competitive Harm

Third, Simon argues that Gumwood has failed to allege competitive harm. "The exclusion of competitors is cause for antitrust concern only if it impairs the health of the competitive process itself." *Roland Mach. Co. v. Dresser Indus., Inc., 749 F.2d 380, 394 (7th Cir. 1984)*. ***Antitrust law*** is concerned with activity that inhibits competition, **[*13]** not necessarily adverse actions against competitors. *See Id*. Gumwood must allege that "it is likely to keep at least one significant competitor of the defendant from doing business in the relevant market." *Id*. Gumwood must also allege "the probable (not certain) effect of the exclusion will be to raise prices above (and therefore reduce output below) the competitive level, or otherwise injure competition; he must show in other words that the anticompetitive effects (if any) of the exclusion outweigh any benefits to competition from it." *Id*.

Gumwood has met this test. Gumwood has alleged that its Heritage Square shopping center has lost value and key tenants, namely LOFT and Charming Shoppes as a direct result of Simon's actions. Gumwood has alleged that Simon's actions have resulted in Heritage Square's partial exclusion in the market of retail shopping centers. Furthermore, Gumwood has alleged that Simon has raised its rents above the competitive level as a result of the exclusion. This is sufficient to satisfy the competitive harm allegation requirement.

4. Anticompetitive Conduct

Finally, Simon argues that Gumwood has failed to allege any predatory, exclusionary, or anticompetitive **[*14]** conduct by Simon. Neither the possession nor the pursuit of "monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct." Verizon Communs., Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (emphasis in original). In the Seventh Circuit, exclusionary, predatory, or anticompetitive conduct is "conduct that is in itself an independent violation of the antitrust laws or that has no legitimate business justification other than to destroy or damage competition." *The Great Escape, Inc. v. Union City Body Co., 791 F.2d 532, 541 (7th Cir. 1986)*.

Gumwood has alleged, at minimum, that Simon misrepresented the status of Ann Taylor's lease with Gumwood. Gumwood alleged that Simon told Gumwood's potential tenants that Ann Taylor would not open at Heritage Square when in fact it had already signed a lease and was beginning construction. Gumwood also alleged that Simon falsely stated that a LOFT store would be opening at University Park Mall, when no such lease had been signed. There is no legitimate business justification for such a misrepresentation other than to harm Gumwood's Heritage Square. *See Id*. Furthermore, Gumwood has **[*15]** alleged a variety of other tactics that Simon used, which may not be anticompetitive, but Gumwood has alleged that they are. *See* Doc. No. 1 at 3 (describing three separate tactics including refusing to renew existing leases or making renewals conditioned upon the tenant not opening stores in a competing development in another market). This is legally sufficient pleading.

Again, the Court is not concluding that Simon engaged in anticompetitive conduct, only that Gumwood has adequately alleged anticompetitive behavior sufficient to survive a *Rule 12(b)(6)* attack. It is left to a later time to determine if Gumwood can prove its allegations.

Because Gumwood has alleged a relevant market, as well as substantial foreclosure, competitive harm, and anticompetitive conduct, Count I should not be dismissed.

B. Count II: Restraint of Trade

"Every contract, combination in the form of trust or otherwise . . . in restraint of trade or commerce . . . is declared to be illegal." *15 U.S.C. § 1*. To state a claim under this section, Gumwood must allege that Simon's actions restrained trade or commerce in the relevant market. *Gateway Contracting Servs., LLC v. Sagamore Health Network, Inc., 2002 U.S. Dist. LEXIS 7328, 2002 WL 7316686, at *13-14 (S.D. Ind. 2002)*. **[*16]** Simon argues that Count II fails because Gumwood has failed to allege a relevant market, a substantial foreclosure, competitive harm, or anticompetitive harm. These are the very reasons Simon offered to dismiss Count I, which the Court has already discussed and rejected.

Furthermore, Gumwood has alleged that Simon's actions have restrained trade in retail shopping centers in the South Bend/Mishawaka region by inducing retail tenants to cease negotiations with Simon's competitors. Gumwood has alleged that Simon achieved its aim by misrepresenting the status of Ann Taylor's lease with Gumwood. As a result, Gumwood has sufficiently pled Count II.

III. Conclusion

Because Gumwood has sufficiently pled Count I by pleading a relevant market, substantial market foreclosure, competitive harm and anticompetitive conduct, and Count II in similar fashion, the undersigned **RECOMMENDS** that Simon's motion to dismiss be **DENIED**. [Doc. No. 24].

> **NOTICE IS HEREBY GIVEN that within fourteen (14) days after being served with a copy of this recommended disposition a party may serve and file specific, written objections to the proposed findings and/or recommendations. *Fed. R. Civ. P. 72(b)*. FAILURE TO FILE OBJECTIONS [*17] WITHIN THE SPECIFIED TIME WAIVES THE RIGHT TO APPEAL THE DISTRICT COURT'S ORDER**.

SO ORDERED.

Dated this 8th day of August, 2012.

Opinion

ORDER DENYING DEFENDANTS' JOINT MOTION FOR SUMMARY JUDGMENT ON MOTOROLA'S FOREIGN INJURY CLAIMS

On August 3, 2012, the Court heard argument on defendants' joint motion for summary judgment on Motorola Mobility, Inc.'s Sherman Act claim for injuries in foreign markets. Defendants' motion asserts that Motorola's claims based on TFT-LCD purchases in foreign markets are barred by the Foreign Trade Antitrust Improvements Act, *15 U.S.C. § 6a* ("FTAIA").

Defendants argue that Motorola has failed to prove that its foreign injury claims were caused by any domestic effect of defendants' anticompetitive conduct. Defendants contend that although Motorola alleged that "[d]efendants and their co-conspirators . . . entered into supply agreements with Motorola in Illinois to sell Motorola LCD panels at unlawfully inflated prices," Third Amended Complaint ("TAC") ¶ 4, in fact "[d]iscovery has shown that [Motorola's] allegations concerning **[*45]** supposed global price agreements negotiated and entered into in Illinois are untrue." Motion at 3. Pointing to a lack of evidence demonstrating the requisite "domestic effect" proximately causing Motorola's foreign injury claims, defendants argue that two of the three categories of claims against it[1] should not be allowed to go to trial.

The FTAIA establishes a general rule that the Sherman Act "shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations." *15 U.S.C. § 6a*. The FTAIA then "provides an

[1] Motorola's TAC alleges antitrust claims based on three categories of purchases: "(1) LCD Panels delivered by the Defendants to Motorola in the United States; (2) LCD Panels delivered to Motorola manufacturing facilities abroad for inclusion in Motorola devices imported into the U.S. by Motorola and later sold by Motorola to customers in the United States; and (3) LCD Panels delivered to Motorola manufacturing facilities abroad for inclusion in Motorola devices sold to Motorola customers abroad." TAC ¶ 184. Defendants seek summary adjudication on the second and third categories of claims (the "foreign injury claims").

exception **[*46]** to this general rule, making the Sherman Act applicable if foreign conduct '(1) has a 'direct, substantial, and reasonably foreseeable effect' on domestic commerce, and (2) 'such effect gives rise to a [Sherman Act] claim.''" *In re Dynamic Random Access Memory (DRAM) Antitrust Litig., 546 F.3d 981, 985 (9th Cir. 2008)* (quoting *Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*(*Empagran I*) and *15 U.S.C. § 6a*). This is known as the "domestic injury exception" of the FTAIA. *Id*. The Supreme Court has stated:

> This technical language initially lays down a general rule placing *all* (nonimport) activity involving foreign commerce outside the Sherman Act's reach. It then brings such conduct back within the Sherman Act's reach *provided that* the conduct *both* (1) sufficiently affects American commerce, *i.e*., it has a "direct, substantial, and reasonably foreseeable effect" on American domestic, import or (certain) export commerce, *and* (2) has an effect of a kind that ***antitrust law*** considers harmful, *i.e*., the "effect" must "giv[e] rise to a [Sherman Act] claim."

Empagran I, 542 U.S. at 162 (quoting *15 U.S.C. § 6a*) (emphasis original). The FTAIA "sets forth an element of an antitrust claim, **[*47]** not a jurisdictional limit on the power of the federal courts." *Minn-Chem, Inc. v. Agrium Inc., 683 F.3d 845, 852 (7th Cir. 2012)*; *Animal Sci. Prods., Inc v. China Minmetals Corp., 654 F.3d 462, 469 (3d Cir. 2011)*; *see also* October 5, 2011 Order Denying Defendants' Joint Dispositive Motion Regarding Indirect Purchaser Claims Based on Foreign Sales ("IPP Order") at 7, Master Docket No. 3833 (adopting *Animal Science* view that "the FTAIA does not implicate the subject matter jurisdiction of the federal courts").

The Court concludes that whether the price fixing activities alleged by Motorola in this case gave rise to direct, substantial, and reasonably foreseeable effects on domestic commerce, and whether such effects gave rise to a Sherman Act claim present issues of fact which must be resolved by the jury in this case.

Motorola contends, and this Court agrees, that its domestic roots and the locale of the transactions at issue distinguish this case from *Empagran I*. As this Court has previously observed, "Motorola is not a foreign company alleging injury based on wholly foreign transactions and conduct, unlike plaintiffs in *Empagran I*." March 28, 2011 Order Denying Defendants' Joint Motion **[*48]** to Dismiss the Second Amended Motorola Complaint (*Motorola II* Order) at 8, Master Docket No. 2602.

Motorola points to substantial evidence that defendants targeted Motorola in the United States for defendants' sales and marketing of LCD panels. *See* *Animal Science, 654 F.3d at 470* (the relevant inquiry is whether the defendants' anticompetitive behavior "target[ed] import goods or services") (citing *Turicentro, S.A. v. American Airlines Inc., 303 F.3d 293, 303 (3d Cir. 2002))*. Defendants knew that Motorola sold mobile devices in the United States and that the United States was one of the largest markets for mobile devices in the world. *See, e.g*., Declaration of Joshua Stokes ("Stokes Decl."), Ex. 379 (Samsung presentation noting that Motorola had the number one market share in the U.S.); Ex. 150 (Sharp presentation noting same); Ex. 155 (indicating Toshiba's sales plan was based on strong demand from U.S. and Europe); Exs. 156, 157-160 (defendants' presentations and analyses regarding Motorola's U.S. market share). Defendants established U.S. subsidiaries to facilitate sales of LCD panels to Motorola in the United States. *See, e.g*., Opposition at 15, n. 15 (listing defendants' relevant **[*49]** U.S. subsidiaries and affiliates); Stokes Decl., Ex. 80 (AUO email stating that its "regional strategy" for the U.S. was "direct access to Moto/Chicago and its global network"); Ex. 352 (deposition testimony of Samsung SDI employee that "[Samsung] had an office in Chicago because Motorola was in Chicago"); Ex. 345 (deposition testimony that Sharp had an office in a Chicago suburb in order to be "close to our customer . . . [f]irst of all, Motorola").

Defendants also met with Motorola on several occasions in the United States to discuss, and, at times, negotiate prices for LCD panels. *See, e.g*., Exs. 251, 254, 255, 266, 314 (defendants' PowerPoint presentations to Motorola in the United States); Ex. 375 (document indicating that Samsung had several conversations in Chicago with Motorola regarding LCD panel pricing); Ex. 96 (Toshiba America Electronic Corporation ("TAEC") report indicating in-person price negotiations with Motorola in Schaumburg, IL); Ex. 99 (email setting "Final Negotiations Meeting" in Chicago with Motorola and representatives of AUO and AUOA); Ex. 140 (Sharp email describing Motorola meeting held in U.S., where price negotiations took place). Defendants also used their **[*50]** employees --- both U.S.-based and those stationed abroad --- in furtherance of the price-fixing conspiracy. *See, e.g*., Ex. 349 (deposition testimony identifying Samsung employee who was "dispatched" to the U.S. from 1999 to 2004 and given instructions "about how to gather competitive information about [Samsung's] competitors"); Ex. 167 (email requesting that Epson's U.S.-based employees "research competitor's situation" regarding a particular Motorola phone model); Ex. 168 (Toshiba informing its U.S.-based employees that competitive information had been gathered from Sanyo about projected share awards for Razr mobile phones and instructing them to "get information as much as possible").

Motorola also points to the admissions in the guilty pleas of many companies and executives involved in the LCD price-fixing conspiracy as further evidence that the conspiracy was targeted at the United States. Opposition at 26, n. 42 (listing plea agreements of LG, Sharp, Chunghwa, Hitachi, Epson, Chi Mei, and HannStar); *see also* Special Verdict Form, *United States v. AU Optronics Corp*., Case No. 09-cr-0110 SI (N.D. Cal. Mar. 2012) (AUO convicted of participating in a conspiracy to fix prices of LCD **[*51]** panels sold in the United States from September 2001 to December 2006), Docket No. 85. Some defendants admitted to specifically targeting Motorola in the United States. *See* Plea Agreement, *United States v. Sharp Corp*., Case No. 08-cr-802 SI (N.D. Cal. Dec. 8, 2008) (Sharp pled guilty to fixing the price of LCD panels sold to Motorola for use in Razr mobile phones); *United States v. Epson Imagining Devices Corp*., Case No. 09-cr-854 SI (N.D. Cal. Oct. 23, 2009) (Epson pled guilty to fixing the price of LCD panels sold to Motorola for use in Razr mobile phones).

The parties dispute whether defendants' conduct gave rise to its Sherman Act claims. *See DRAM, 546 F.3d at 989-90* ("[W]here a global price-fixing conspiracy is alleged to have affected prices both in the United States and abroad, courts have held that 'the give rise to language of [the FTAIA] requires a plaintiff to establish a direct or proximate causal relationship' between the alleged anticompetitive effects in the United States and the plaintiff's alleged foreign injury."). Defendants argue that, because Motorola's foreign affiliates purchased LCD panels pursuant to globally-negotiated foreign contracts (*i.e*., purchase orders), **[*52]** the "domestic injury exception" is inapplicable to Motorola's foreign injury claims. *See* Motion at 23-24. Defendants claim that the prices used in purchase orders Motorola used with its LCD panel suppliers were based on negotiations abroad, not in the United States. *Id*. On this basis, defendants conclude that "the effect on U.S. domestic commerce that 'gave rise to' the foreign injury claims . . . is non-existent." *Id*. at 25. The Court is not persuaded by defendants' argument. Motorola has presented admissible evidence from which a jury could infer that final decisions regarding pricing of LCD panels took place in the United States. *See, e.g*., Stokes Decl., Ex. 363 (deposition testimony of Motorola's Vice President of Procurement, Janet Robinson, that it was Motorola's "practice" that senior procurement officers in the United States gave "approval to enter into an agreement on price with a display module supplier during the relevant time period . . . ."). Motorola also points to the deposition testimony of its employees to support its claim that foreign affiliates issued purchase orders at the price and quantity determined by Motorola in the United States. *See, e.g*., Ex. 359 (deposition **[*53]** testimony of Motorola's Chief Procurement Officer, Theresa Metty, that the "decision making" regarding contract negotiations, "which would include prices," happened in Illinois); Ex. 372 (deposition testimony of Motorola's Vice President of Global Operations, E.L. Tay, that the purchasing team "basically execute[d] what was done and planned [in the United States]").

Whether, as defendants argue, Motorola's "rubber stamp approval process falls far short of what the FTAIA requires," Motion at 6, will be left up to a jury to decide, not the Court. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)* ("Credibility determinations, the weighing of evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge . . . ruling on motions for summary judgment."). The Court finds that a reasonable jury could find a "concrete link between defendants' price setting-conduct . . . its domestic effect, and the foreign injury suffered by Motorola and its affiliates." *See Motorola II* Order at 8.

Accordingly, the Court DENIES dependants' joint motion for summary judgment. Master Docket No. 5415; Docket No. 312 in 09-5840.

IT IS SO ORDERED.

Judges: BARBARA B. CRABB, District Judge.

Opinion by: BARBARA B. CRABB

Opinion

[*1066] OPINION and ORDER

This case originated in the International Trade Commission, where defendant Motorola Mobility, Inc. filed an infringement action against plaintiff Apple, Inc., seeking an exclusion order that would have prevented Apple from selling its allegedly **[**5]** infringing products in the United States. After the case had been pending for a few months in the Commission, Apple filed several counterclaims against Motorola and removed the counterclaims to this court under *19 U.S.C. § 1337(c)*. In its counterclaims, Apple alleges that Motorola has engaged in a pattern of unfair, deceptive and anticompetitive conduct by failing to timely disclose ownership of patents that it now declares are essential to technological standards adopted by the industry and by failing to offer Apple licenses to those patents on fair, reasonable and nondiscriminatory terms.

Now before the court are the parties' cross motions for summary judgment. Motorola has moved for summary judgment on all of Apple's claims on a variety of grounds. Dkt. #150. Motorola contends that Apple's claims are barred by the doctrine of claim preclusion because Apple could have pursued them as defenses in the International Trade Commission. Motorola also contends that Apple's antitrust claims are barred by the applicable statute of limitations and by the Noerr-Pennington doctrine, which provides immunity from antitrust claims that are filed in response to nonfrivolous lawsuits. Finally, Motorola **[**6]** contends that Apple cannot prove the necessary elements of its tortious interference claim or its claims of unfair competition under California law and cannot prove that it suffered any damages compensable as contractual damages.

Apple has moved for partial summary judgment on specific issues relevant to its claims. Dkt. #143. In particular, Apple seeks determinations from the court that (1) Motorola's commitments to standards-setting organizations are contractually binding; (2) Apple has the right to enforce those contracts as a third-party beneficiary; (3) Motorola was required under the policies of the European Telecommunications Standards Institute (ETSI) to disclose its patents and patent applications before ETSI adopted technical standards incorporating technology covered by the patents or applications; and (4) Motorola did not disclose certain patents or applications until after ETSI adopted the standards incorporating technology from those patents.

After reviewing the parties' arguments and the facts in the record, I conclude that Motorola's motion must be granted in part and denied in part, and Apple's motion must be granted in full. With respect to Motorola's motion, I conclude **[**7]** that Apple's claims are not barred by the doctrine of claim preclusion, but that the Noerr-Pennington doctrine provides Motorola immunity from Apple's antitrust and unfair competition claims premised on Motorola's patent infringement litigation and from Apple's claims for declaratory judgment, to the extent that those claims are premised on a theory of antitrust or unfair competition. Because I conclude that **[*1067]** Noerr-Pennington immunity applies, I need not consider Motorola's statute of limitations argument.

Additionally, I conclude that Motorola is entitled to summary judgment on Apple's claim that Motorola tortiously interfered with its contract with Qualcomm, as well as Apple's claim under *Cal. Bus. & Prof. Code § 17200* based on the same theory, because Apple has failed to adduce any evidence showing that it suffered damages from Motorola's actions.

However, I conclude that Motorola has failed to show that Apple's breach of contract or estoppel claims should be dismissed for Apple's failure to prove that it suffered any compensable damages. Therefore, I will deny Motorola's motion as to that issue.

With respect to Apple's motion, I conclude that Motorola has failed to show that there **[**8]** is any genuine dispute of material fact regarding the existence of contracts between Motorola and standards-setting organizations; Apple's status as a third-party beneficiary of those contracts; Motorola's obligations to disclose its intellectual property rights in a timely manner; and Motorola's failure to disclose its patents and applications before the adoption of standards incorporating its patents. Therefore, I am granting Apple's motion for summary judgment in full.

From the parties' proposed findings of fact and the record, I find the following facts to be material and undisputed.

UNDISPUTED FACTS

A. Wireless Communication Industry

Plaintiff Apple, Inc. and defendant Motorola Mobility, Inc. are competitors in the wireless communication industry. Motorola has been a player in the industry for longer than Apple and, since at least 1990, has been a member of numerous international standards-setting organizations devoted to the development of telecommunications and wireless standards. Through the standards-setting organizations, companies agree on common technological standards so that all compliant products will work together. Standards lower costs by increasing product manufacturing **[**9]** volume and increase price competition by eliminating the costs for consumers to switch between products manufactured by different firms.

Some technological standards incorporate patented technology. If a patent claims technology selected by a standards-setting organization, the patent is called an "essential patent." Many standards-setting organizations have adopted rules related to the disclosure and licensing of essential patents. The policies often require or encourage members of the organization to identify patents that are essential to a proposed standard and to agree to license their essential patents on fair, reasonable and nondiscriminatory terms to anyone who requests a license. (These terms are often referred to by the acronyms FRAND or RAND.) Such rules help to insure that standards do not allow the owners of essential patents to abuse their market power to extort competitors or prevent them from entering the marketplace.

Two standards-setting organizations are relevant to the motions before the court: The European Telecommunications Standards Institute, known as ETSI; and the Institute of Electrical and Electronics Engineers, known as IEEE. At all relevant times, Motorola **[**10]** has been a member of these standards-setting organizations and has participated in developing technological standards for the wireless communication industry. Both organizations have intellectual property rights policies that address disclosure and licensing of patents that are essential to standards being **[*1068]** considered or being adopted by the organizations. Additionally, Motorola has participated in the 3rd Generation Partnership Project, known as the 3G Project, which requires its members to abide by the intellectual property rights policies of ETSI and other standards-setting organizations.

1. European Telecommunications Standards Institute (ETSI)

ETSI is a standards-setting organization located in France that creates technological standards for the telecommunications industry. It has an intellectual property rights policy set forth in Annex 6 of its Rules of Procedure to govern the disclosure of intellectual property rights that are essential to standards being considered by ETSI. Dkt. #148-22. The policy defines "intellectual property right" as "any intellectual property right conferred by statute law including applications therefor. . . [but not] rights relating to . . . confidential **[**11]** information, trade secrets or the like." Id. § 15- 7. Since 1997, ETSI's policy has required members to disclose intellectual property that may be essential to standards. With minor variations, it has stated:

> [E]ach MEMBER shall use its reasonable endeavours, in particular during the development of a STANDARD or TECHNICAL SPECIFICATION where it participates, to inform ETSI of ESSENTIAL [intellectual property rights] in a timely fashion. In particular, a MEMBER submitting a technical proposal for a STANDARD or TECHNICAL SPECIFICATION shall, on a bona fide basis, draw the attention of ETSI to any of that MEMBER's [intellectual property rights] which might be ESSENTIAL if that proposal is adopted.

Id. § 4.1. The policy does not define "reasonable endeavours" or "bona fide basis." However, it is generally understood that members of ETSI should disclose intellectual property rights that they know are relevant to potential standards while the standard is being discussed and before the standard is adopted. Generally, the engineers working on the standards in working groups or technical meetings do not formally disclose intellectual property rights at those meetings. Whinnett Dep., dkt. #142, **[**12]** at 101; Brown Dep., dkt. #136 at 291; Smolinske Dep., dkt. #140, at 72-73. Rather, the owner of the intellectual property right files a formal disclosure with ETSI.

ETSI's intellectual property rights policy also addresses the availability of licenses to essential intellectual property rights. The policy requires the Director-General of ETSI to ask owners of essential patents to agree to "grant irrevocable licences on fair, reasonable and non-discriminatory terms and conditions." Id. § 6.1. Under ETSI's "Guide on Intellectual Property Rights," the owner of the intellectual property right should notify ETSI of its willingness to license by submitting an information and licensing declaration that identifies specific patents or pending applications that may be essential. Guide, dkt. #149-23, § 2.1.2. An owner may also use a general licensing declaration to notify ETSI that it is willing to grant licenses for any of its intellectual property rights that become essential to a standard. However, use of the general licensing declaration "does not take away the obligation for members to declare essential patents to ETSI." Id. Owners are not required to disclose any specific licensing terms **[**13]** and ETSI's policies provide that "[s]pecific licensing terms and negotiations are commercial issues between the companies and shall not be addressed within ETSI." Id. § 4.1.

If a patent owner tells ETSI that it is not prepared to license one of its patents **[*1069]** that is relevant to a standard, ETSI's General Assembly reviews the requirements for that standard to determine whether "a viable alternative technology is available for the standard or technical specification" that is "not blocked by that [patent]." Dkt. #148-22, § 8.1.1. If the General Assembly concludes that no such viable alternative technology exists, ETSI "shall cease" work on the standard. Id. § 8.1.2. If the owner who is refusing to grant a licensee is a member of ETSI, the Director-General of ETSI asks the member to reconsider its position or provide a written explanation of its reasons for refusing to license its patents. Id. The Director-General forwards the written explanation to "ETSI Counselors for their consideration." Id.

The objective of ETSI's intellectual property rights policy is to

> reduce the risk to ETSI, MEMBERS, and others applying ETSI STANDARDS and TECHNICAL SPECIFICATIONS, that investment in the preparation, **[**14]** adoption and application of STANDARDS could

> be wasted as a result of an ESSENTIAL [intellectual property right] for a STANDARD or TECHNICAL SPECIFICATION being unavailable. In achieving this objective, the ETSI [intellectual property rights policy] seeks a balance between the needs of standardization for public use in the field of telecommunications and the rights of the owners of [intellectual property rights].

Id. § 3.1. The policy goes on to state that ETSI "shall take reasonable measures to ensure, as far as possible," that standards and technical specifications will "be available to potential users." Id. § 3.3.

ETSI's bylaws provide that any violation of the policy by an ETSI member "shall be deemed to be a breach, by that MEMBER, of its obligations to ETSI. The ETSI General Assembly shall have the authority to decide the action to be taken, if any, against the MEMBER in breach, in accordance with ETSI Statutes." Id. § 14.

2. The Institute of Electrical and Electronics Engineers (IEEE)

IEEE is a standards-setting organization responsible for the standardization of wireless information exchange among systems and networks. IEEE's bylaws in place from December 1993 through December 1995 **[**15]** provided that "IEEE standards may include patented technology if there is no equivalent noninfringing way of achieving the objectives of the standard, if it is justified for technical reasons, and if the patent holder agrees to nondiscriminatory licensing at reasonable rates." Dkt. #148-23, § 5.

Between 1996 and 2005, IEEE requested owners of intellectual property rights that are essential to declared standards to submit a letter of assurance that was either a general disclaimer of their right to enforce patent claims against anyone practicing the standards or an agreement to license patent rights "without compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of any unfair discrimination." Dkt. #148-26, § 6.

The policies that were approved in February 2011 state that "[n]o license is implied by the submission of a Letter of Assurance," dkt. #7-12, § 6.2, and that IEEE is "not responsible for identifying Essential Patent Claims for which a license may be required, for conducting inquiries into the legal validity or scope of those Patent Claims, or for determining whether any licensing terms or conditions provided in connection with submission **[**16]** of a Letter of Assurance, if any, or in any licensing agreements are reasonable or non-discriminatory." Id.

[*1070] B. Motorola's Disclosure of Essential Patents and Commitments to License

Motorola has declared that its United States Patent Nos. 5,636,223 (the '223 patent), 5,311,516 (the '516 patent), 5,572,193 (the '193 patent), and the 5,319,712 (the '712 patent) are essential to the practice of the 802.11 wireless communication standard adopted by IEEE. In 1994, Motorola submitted a declaration to IEEE, stating that Motorola agreed to license any patents essential to the 802.11 standard "on a non-discriminatory basis offering fair and commercially reasonable terms." Dkt. #148-28.

In 2002, Motorola submitted declarations to ETSI and the 3G Project that its 6,175,559 (the '559 patent), 6,246,697 (the '697 patent) and 898 patents (the '898 patent) are essential or potentially essential to standards adopted by ETSI and the 3G Project. As to the '559 and '697 patents, Motorola declared in a December 20, 2002 letter to ETSI that it "is prepared to grant irrevocable licenses on fair, reasonable and nondiscriminatory terms and conditions under such [patents], to the extent that the [patents] **[**17]** remain essential." Dkt. #148-6. As to the '898 patent, Motorola declared to ETSI in 2003 that it was "prepared to grant irrevocable licenses under the [patents] on terms and conditions which are in accordance with Clause 6.1 of the ETSI [intellectual property rights] Policy, in respect of the STANDARD, to the extent that the [patents] remain ESSENTIAL." Dkt. #148-3.

C. Timeliness of Motorola's Disclosures

1. '697 patent

Motorola filed the application that led to the '697 patent on January 24, 1998. In March 1998, Motorola submitted a proposal using the '697 patent's technology to SMG2, the working group developing a portion of the 3GPP standard for the 3G Project. One of the inventors of the '697 patent, Motorola employee Nicolas Whinnett, participated in SMG2 meetings at that time. Motorola did not disclose the '697 patent or application to ETSI, a partner in the 3G Project, or to the SMG2 working group.

In July 1999, the '697 patent inventors wrote an article discussing the technology of the '697 patent. They filed applications for foreign counterparts of the '697 patent that were published on July 29, 1999 and November 22, 2000.

The 3GPP standard, including technology covered by the '697 patent, **[**18]** was adopted by the 3G Project in December 1999. The '697 patent issued on June 12, 2001. Motorola disclosed the '697 patent to ETSI on September 20, 2002.

2. '559 patent

Motorola filed the application that led to the '559 patent on July 7, 1999. On July 13-16, 1999 at an ETSI meeting in Finland, Tyler Brown, a representative of Motorola and the sole inventor of the '559 patent, proposed including technology covered by the '559 patent in a portion of ETSI's Universal Mobile Telecommunications System standard (known as the UMTS standard). Motorola did not disclose the '559 application. In March 2000, the relevant section of the standard was finalized and adopted. The '559 patent issued on January 16, 2001. Motorola disclosed the '559 patent as essential to the standard in September 2002.

3. '898 patent

Motorola filed a provisional, unpublished application that led to the '898 patent on September 2, 1997. At a meeting in Sophia Antipolis, France, in November 1997, Motorola submitted "Contribution A330" to the ETSI working group developing a portion of the GPRS Technical Specification. **[*1071]** Motorola's Contribution A330 was created, in part, by two inventors of the '898 patent and it disclosed in **[**19]** nearly verbatim form the same technology that was described in a portion of the specification of the September 1997 patent application. On March 11, 1999, Motorola's application that resulted in the '898 patent was published when Motorola applied for foreign counterparts to the application. In April 2001, ETSI published the portion of the GPRS standard that incorporated the ideas from Motorola's Contribution A330.

The '898 patent issued on March 19, 2002. Motorola disclosed the '898 patent to ETSI on April 8, 2003.

D. Negotiations for Licensing between Apple and Motorola

In 2005, Apple began developing the iPhone. No later than mid-2006, Apple became aware that Motorola had declared patents essential to cellular standards. Apple released its iPhone in 2007 without seeking a patent license from Motorola.

In August 2007, Motorola offered Apple a license to its essential patents. At the initial meeting between the companies, Motorola presented information to Apple concerning its licensing program and stated that its standard royalty rate was 2.25% for a worldwide license to its portfolio of standards-essential patents. Apple rejected the 2.25% rate. Motorola continued to engage in license **[**20]** negotiations with Apple for approximately three years, but Apple refused to accept a license on any terms offered by Motorola.

E. Motorola's Termination of the Qualcomm License

Apple entered into a "Strategic Terms Agreement" with Qualcomm on December 16, 2009. Dkt. #153-40. The agreement set terms on which "certain Apple authorized purchasers may purchase certain components from time to time from" a Qualcomm affiliate "for use and incorporation in Apple products." Id. at 1. Among these components are chipsets that allow mobile devices to communicate via cellular networks, including the baseband processor incorporated into the iPhone 4S. The chipsets incorporated technology that Qualcomm had licensed from Motorola since 1990. The Strategic Terms Agreement did not require Apple or any of its affiliates to actually purchase chipsets and also did not guarantee that the chipsets or any other components supplied by Qualcomm would be licensed under Motorola's or any other patent holder's patents.

On January 11, 2011, the day Apple announced the Verizon iPhone 4, Motorola sent a letter to Qualcomm, with a copy to Apple, stating that Motorola was terminating any and all license and covenant rights **[**21]** with respect to Qualcomm's business with Apple, effective February 10, 2011.

PROCEDURAL HISTORY

A. Related Cases

This particular dispute is related to three other proceedings. First, there is the investigation pending in the International Trade Commission that defendant Motorola initiated on October 6, 2010. In the Matter of Certain Wireless Communication Devices, Portable Music and Data Processing Devices, Computers and Components Thereof, ITC Investigation No. 337-TA-745. In that case, Motorola sought an exclusion order and a permanent cease and desist order as a result of plaintiff Apple's alleged infringement of several of Motorola's United States patents, including the '697 and '223 patents.

As part of its original defenses in the International Trade Commission action, Apple argued that Motorola should be barred from enforcing its patents because it had unclean hands and had failed to offer licenses on fair, reasonable and nondiscriminatory terms. In July 20, 2011, **[*1072]** Apple notified the commission that it would "not be pursuing as part of the 745 investigation any affirmative defenses based on Motorola's failure to make a [fair reasonable and nondiscriminatory] Offer," but that it was **[**22]** "specifically reserv[ing] the right . . . to pursue any of these defenses . . . and claims related to them in other actions, including for example, the 661, 662, and 178 actions pending in Wisconsin." Dkt. #153-35.

On April 24, 2012, the administrative law judge issued a preliminary ruling in the International Trade Commission action, finding Motorola's '697 patent valid and infringed by Apple. Dkt. #153-34. (Before this determination, Motorola abandoned its infringement claims as to some of its patents.) The administrative law judge rejected Apple's unclean hands defense, noting that Apple had no "proof that any act of Motorola actually caused any harm (to anyone)." Id. at 151.

Second (and third), the parties are litigating their disputes in two other patent infringement cases filed in this court. Plaintiff Apple filed case number 10-cv-661-bbc on October 29, 2010, asserting patent infringement claims against Motorola. On November 9, 2010, Motorola filed counterclaims in the '661 action alleging infringement of the same patents at issue in the International Trade Commission's 337-TA-745 investigation. On December 2, 2010, this court granted the parties' joint motion to stay the '661 **[**23]** case in favor of the proceedings in the commission. The case remains stayed.

Also on October 29, 2010, plaintiff Apple filed case number 10-cv-662-bbc in this court, asserting patent infringement claims against Motorola. On November 9, 2010, Motorola filed counterclaims against Apple for infringement of several of its United States patents, including the '516, '712, '230, '193, '559 and '898 patents, all of which Motorola has declared essential to certain standards adopted in the wireless communications industry. The 10-cv-662 case was transferred to the Northern District of Illinois in December 2011., where the case was dismissed with prejudice on June 22, 2012. The court found that Motorola's patents were either invalid, not infringed by Apple or that Motorola could not prove the amount of damages to which it was entitled. *Apple, Inc. v. Motorola, Inc., 869 F. Supp. 2d 901, 2012 U.S. Dist. LEXIS 89960, 2012 WL 2376664 (N.D. Ill. June 22, 2012)*.

B. The Case at Issue (11-cv-178-bbc)

Shortly after Apple removed this case to federal court, it moved for preliminary injunctive relief, seeking an order that would have enjoined Motorola from (1) proceeding as a party in the 337-TA-745 investigation in the International Trade Commission with **[**24]** respect to the '223 and '697 patents; (2) proceeding with its counterclaims filed in case number 10-cv-662-bbc in this court with respect to the '712, '230, '193, '559 and '898 patents; and (3) selectively terminating its patent license agreement with Qualcomm as to Apple. A hearing was held on the motion on April 26, 2011. At the conclusion of the hearing, I denied Apple's motion for a preliminary injunction.

Motorola filed a motion to dismiss Apple's claims, which I granted only with respect to Apple's claim of waiver. Apple has the following 10 claims remaining in the case:

• Equitable estoppel (Count 1)

• Breach of contract with ETSI/3GPP (Count 2)

• Breach of contract with ETSI/3GPP to which Apple is a third party beneficiary (Count 3)

• Breach of contract with IEEE to which Apple is a third party beneficiary (Count 4)

[*1073] • False commitments to license on fair, reasonable and nondiscriminatory terms and deceptive acts in violation of *§ 2* of the Sherman Act (Count 5)

• Unfair competition and unlawful business practices in violation of *Cal. Bus. & Prof. Code § 17200* (Count 6)

• Declaratory judgment that Motorola's offers have not been on fair, reasonable and nondiscriminatory terms (Count **[**25]** 7)

• Declaratory judgment on no entitlement to injunctive relief (Count 11)

• Declaratory judgment of patent misuse (Count 12)

• Interference with contract (Count 13)

Apple's Am. Cpt., dkt. #110.

OPINION

A. Motorola's Motion for Summary Judgment

1. Claim preclusion

Motorola contends that all of Apple's claims are barred by the doctrine of "res judicata" because Apple could have raised them in the International Trade Commission as defenses to Motorola's infringement claims, or did raise them there and they were rejected. Specifically, in the International Trade Commission action, Apple abandoned its argument that Motorola's patents were unenforceable because Motorola refused to license its patents on reasonable and nondiscriminatory terms. Apple did argue that Motorola's '697 patent was unenforceable under the doctrine of "unclean hands," but the administrative law judge rejected the argument and found that the '697 patent was valid and had been infringed by Apple.

Res judicata is the traditional term for the doctrine of claim preclusion, but is sometimes used generally to refer to both claim and issue preclusion. *Hayes v. City of Chicago, 670 F.3d 810, 814 n.1 (7th Cir. 2012)*. Motorola does **[**26]** not identify whether it is intending to invoke claim or issue preclusion, but the majority of cases it cites concern claim preclusion. Thus, I am assuming that Motorola is arguing for the application of claim preclusion.

Claim preclusion "prohibits litigants from relitigating claims that were or could have been litigated during an earlier proceeding." *Id. at 813*. The case on which Motorola relies primarily is *Martino v. McDonald's System, Inc., 598 F.2d 1079 (7th Cir. 1979)*, in which the court of appeals held that the plaintiff was barred from bringing an antitrust claim that would have undermined a previous consent judgment issued by a federal district court against the plaintiff. *Id. at 1083*. The court explained that "res judicata . . . treats a judgment on the merits as an absolute bar to relitigation between the parties . . . of every matter offered and received to sustain or defeat the claim or demand and to every matter which might have been received for that purpose." Id.

This case is distinguishable from *Martino* and the other cases cited by Motorola. In Martino, the plaintiff was attempting to attack a judgment issued by a federal court; in this case, Apple is asserting counterclaims **[**27]** that have the potential to undermine the International Trade Commission's decision regarding Apple's infringement of

Motorola's patents. It is well established law that decisions of the International Trade Commission on issues of patent validity and enforceability are not entitled to preclusive effect. E.g., *Powertech Technology Inc. v. Tessera, Inc., 660 F.3d 1301, 1308 (Fed. Cir. 2011)* ("resolution of the ITC action will not have preclusive effect" on district court action); *Bio-Technology General Corp. v. Genentech, Inc., 80 F.3d 1553, 1564 (Fed. Cir. 1996)*; *Texas Instruments Inc. v. Cypress Semiconductor Corp., 90 F.3d 1558, 1569 (Fed. Cir. 1996)*; *Texas Instruments Inc. v.* **[*1074]** *International Trade Commission, 851 F.2d 342, 344 (Fed. Cir. 1988)*.

Motorola argues that the general rule against granting preclusive effect to International Trade Commission determinations does not apply here because there is no rule barring a district court from giving preclusive effect to the commission's decisions on "non-patent" issues, such as Apple's antitrust, estoppel and contract claims. Motorola cites three cases that it believes support its position. In the first two cases, *Aunyx Corp. v. Canon U.S.A., Inc., 978 F.2d 3, 7 (1st Cir. 1992)* **[**28]** and *Baltimore Luggage Co. v. Samsonite Corp., 1992 U.S. App. LEXIS 27493, 1992 WL 296368, *4 (4th Cir. 1992)*, the courts held that it was appropriate to give preclusive effect to commission decisions concerning antitrust and unfair competition. However, neither of those cases is particularly useful because neither involved decisions from the commission arising out of patent disputes.

The third case cited by Motorola, *Telectronics Proprietary, Ltd. v. Medtronic, Inc., 687 F. Supp. 832 (S.D.N.Y. 1988)*, is more helpful to its position. In Telectronics, the district court concluded that it was appropriate to apply issue preclusion to the commission's determination regarding a license defense to a patent dispute. The court distinguished between different types of defenses to patent infringement, stating that "[u]nlike invalidity and unenforeability, noninfringement is not a defense based on the validity of a patent. Rather, it is a defense based on a contractual right to use the patent, or on defendant's lack of use of the patent." *Id. at 846, n.40*. The court concluded that "the ITC's determination as regards the existence of a license under a patent . . . was not one of the validity of a patent but of the existence **[**29]** of a contract" and should be "accorded preclusive effect." *Id. at 845-46*.

However, unlike the district court in *Telectronics*, the Court of Appeals for the Federal Circuit has not distinguished between types of defenses to patent infringement when discussing the preclusive effect of International Trade Commission decisions. As the court of appeals explained in *Texas Instruments, 90 F.3d at 1569*, "once we accept . . . that ITC decisions are not binding on district courts in subsequent cases brought before them, it necessarily follows that accused infringers can raise *whatever defenses they believe are justified*, regardless whether they previously raised them and lost in the ITC." (Emphasis added). See also *Epistar Corp. v. Philips Lumileds Lighting Co., 2008 U.S. Dist. LEXIS 79448, 2008 WL 3930030, *2-4 (N.D. Cal. Aug. 26, 2008)* (patent defendant not precluded from raising defenses of license and covenant not to sue in district court patent infringement action even though it had waived those defenses in International Trade Commission).

In Texas Instruments, the court of appeals recognized that any defense an alleged infringer raises is properly treated as a "patent issue" for purposes of determining whether preclusion **[**30]** principles should apply. In this case, it is clear from Motorola's arguments that it is seeking to give preclusive effect to the International Trade Commission's decision on "patent issues." By seeking to bar Apple from presenting any claim that would undermine the commission's determination of validity and infringement, in effect, Motorola is asking the court to give preclusive affect to the commission's conclusions regarding the enforceability of Motorola's patents. Motorola admits as much in its brief, stating that the defenses that Apple abandoned in the commission challenged whether "the patents are unenforceable." Motorola's Br., dkt. #151, at 5.

Motorola attempts to avoid the rule of Texas Instruments by arguing that the rule against giving preclusive affect to **[*1075]** commission decisions applies only when an alleged patent infringer is facing parallel infringement claims before the commission and district court. Motorola contends that this case is different because Apple has not challenged Motorola's patent disclosures and licensing offers as defenses to an infringement claim, but as affirmative claims that constitute a direct attack on the commission's decisions. However, Motorola **[**31]** cites no cases suggesting that a commission decision should be given preclusive effect in some types of district court cases and not others.

Moreover, Motorola's claim preclusion argument fails for another reason. The claims Apple is pursuing in this case originated as "counterclaims" in the International Trade Commission that were subject to mandatory removal. *19 U.S.C. § 1337(c)*; *19 C.F.R. § 210.14(e)*. Thus, the commission never had jurisdiction to hear Apple's counterclaims or to grant the type of relief that Apple is seeking in this case. The doctrine of claim preclusion does not bar a party from asserting claims that could not have been raised in a previous proceeding. *Carver v. Nall, 172 F.3d 513, 516 (7th Cir. 1999)* ("Claim preclusion does not operate so harshly as to bar whichever set of claims the chosen forum could not hear."). See also *Bio-Technology, 80 F.3d at 1563* ("[T]he bar against later claims based on the same transactional facts is 'subject to certain limitations, one of which is that it will not be applied if the initial forum did not have the power to award the full measure of relief sought in the later litigation.'") (citation omitted). Accordingly, Motorola is **[**32]** not entitled to summary judgment on the basis of claim preclusion.

2. Noerr-Pennington doctrine

Next, Motorola contends that all of Apple's claims are barred by the *First Amendment* under the Noerr-Pennington doctrine. The *First Amendment* protects "the right of the people . . . to petition the Government for a redress of grievances." *U.S. Const. amend. I*. Under the Noerr-Pennington doctrine, a party that exercises its *First Amendment* right to petition the government for redress generally is immune from antitrust liability premised on the petition. *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 136, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of America v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965))*. This includes a party who brings a legitimate dispute to the courts for judicial resolution. *Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc., 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*; *California Motor Transportation Co. v. Trucking Unlimited, 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*. However, petitioning conduct is not immune if it is a "mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationship of a competitor." *Noerr, 365 U.S. at 144*. **[**33]** Motorola contends that Apple's claims in this case are based solely on Motorola's patent litigation in the International Trade Commission and district court, and that because its patent litigation is protected petitioning activity, Motorola is immune from liability on Apple's claims.

Apple does not deny that initiating and prosecuting a patent infringement action is the type of petitioning activity protected by the Noerr-Pennington doctrine, and several courts have reached the same conclusion. See, e.g., *ERBE Elektromedizin GmbH v. Canady Technology LLC, 629 F.3d 1278, 1292 (Fed. Cir. 2010)*; *Monolithic Power Systems, Inc. v. O2 Micro International Ltd., 2007 U.S. Dist. LEXIS 22556, 2007 WL 801886, *6 (N.D. Cal. Mar. 14, 2007)*; *Hynix Semiconductor Inc. v. Rambus, Inc., 2006 U.S. Dist. LEXIS 48884, 2006 WL **[*1076]** 1883353, *1-2 (N.D. Cal. July 7, 2006)*; *In re Relafen Antitrust Litigation, 360 F. Supp. 2d 166, 177-78 (D. Mass. 2005)*. However, Apple contends that the immunity does not apply to any of its claims because they are not based on Motorola's petitioning activity.

a. Apple's antitrust claim

Apple contends that its claim under *§ 2* of the Sherman Act arises out of Motorola's "abuse of the standard-setting process" and "Motorola's deceptive conduct **[**34]** and failure to offer a [fair, reasonable and nondiscriminatory] license." Apple's Br., dkt. #167, at 6. In support of its argument, Apple cites *ERBE Elektromedizin, 629 F.3d at 1292*, in which the Court of Appeals for the Federal Circuit explained that a party's assertion of non-sham claims for "patent infringement, trademark, and trade dress" was protected by Noerr-Pennington from antitrust liability, but that other conduct, including "interfering with and inhibiting the development and marketing of [disputed products], and interfering with . . . contracts and business expectations," could be a basis for antitrust liability. *Id. at 1292-93*. See also *Hynix Semiconductor, 2006 U.S. Dist. LEXIS 48884, 2006 WL 1883353, at *2* (holding that Noerr-Pennington immunity applies only to protected litigation-related activities, but would not immunize defendant from antitrust claims premised on broader unlawful course of anticompetitive conduct).

The problem for Apple is that its allegations and arguments make clear that its antitrust claim is necessarily based on Motorola's patent litigation. In its brief, Apple contends that its antitrust claim arose sometime in 2007, when Motorola offered it a license with exorbitant royalty **[**35]** rates. Apple's Br., dkt. #167, at 13 (Apple's injury "could not have arisen until, at the very earliest, Motorola made its first royalty demand in September 2007"). However, Apple has presented no evidence that it suffered any antitrust injury as a result of Motorola's license demand. It is well established law that a party can sustain an antitrust claim only if it has suffered an antitrust injury. *In re Copper Antitrust Litigation, 436 F.3d 782, 789 (7th Cir. 2006)* ("[A]n antitrust cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business.") (citation omitted); *Warren General Hospital v. Amgen Inc., 643 F.3d 77, 92 (3d Cir. 2011)* ("It is a basic tenet of ***antitrust law*** that a cause of action will not lie if the plaintiff has not been harmed.").

In this case, it is undisputed that Apple refused to pay the 2.25% royalty rate that Motorola demanded and continued to manufacture and market its products despite Motorola's demands. Apple has produced no evidence or argument suggesting that Motorola's licensing demand caused Apple to change its product, delay the release of the iPhone, suffer from increased costs or lose any customers **[**36]** or market share. Instead, the only injury Apple suffered as a result of Motorola's alleged antitrust violation was the attorney fees and costs that it has incurred responding to the patent litigation initiated by Motorola. Apple's damages expert identifies no other damages except litigation fees and expenses. Thus, Apple's antitrust claim is premised on Motorola's attempt to enforce its patents. Because Motorola's enforcement of its patents is privileged conduct protected by the *First Amendment*, the Noerr-Pennington doctrine applies. *Columbia Pictures Industries, Inc. v. Professional Real Estate Investors, Inc., 944 F.2d 1525, 1529 (9th Cir. 1991)* (holding that defendant was immune from antitrust liability under Noerr-Pennington because all of plaintiff's claimed antitrust injuries were caused by defendant's enforcement of copyrights, not by defendant's refusal to license its copyrighted work).

[*1077] Apple devotes one paragraph in its brief to the argument that Motorola may not be entitled to Noerr-Pennington immunity because its patent infringement claims may fall under the "sham" exception to the doctrine. Apple's Br., dkt. #167, at 9. As the party asserting the sham exception, Apple has **[**37]** the burden of showing that it should apply. *IGEN International, Inc. v. Roche Diagnostics GmbH, 335 F.3d 303, 312 (4th Cir. 2003)*; *USS—POSCO Industries v. Contra Costa County Building & Construction Trades Council, AFL—CIO, 31 F.3d 800, 811 (9th Cir. 1994)*. A petition or lawsuit may be considered a "sham" if it is (1) "objectively baseless"; and (2) subjectively motivated by a desire to impose anticompetitive harm from the judicial process rather than obtain judicial relief. *Professional Real Estate Investors, 508 U.S. at 61, 65*. Apple makes no real attempt to satisfy either prong, stating only that Motorola has dropped two of its patent infringement claims and three others were found to be invalid or not infringed. However, the fact that some or even all of Motorola's patent infringement claims were unsuccessful is not sufficient on its own to show that Motorola's claims are "objectively baseless," particularly in light of the preliminary finding of the International Trade Commission that Apple infringed one of Motorola's patents. Simply stating, without factual support, that Motorola's patent litigation may be a sham is not sufficient to raise a genuine issue of material fact regarding **[**38]** the sham exception. Accordingly, I find that Motorola is immune from Apple's antitrust claim.

b. Apple's claims under *Cal. Bus. & Prof. Code § 17200*

Apple has two theories to support its claim of unfair competition and unlawful business practices in violation of *Cal. Bus. & Prof. Code § 17200* (count 6). First, Apple contends that Motorola engaged in unlawful business practices when it interfered with Motorola's contract with Qualcomm. The Noerr-Pennington doctrine is not applicable to that theory because Motorola's actions toward Qualcomm are separate and distinct from Motorola's protected activity of patent litigation. However, Apple's second theory of liability in count 6 is premised on the same allegations as its antitrust claim under *§ 2* of the Sherman Act. In particular, Apple contends that Motorola engaged in unfair competition when it promised standards-setting organizations that it would disclose essential patents and license those patents on reasonable and nondiscriminatory terms, and later failed to disclose the patents in a timely manner, refused to offer Apple a reasonable and nondiscriminatory license and sued Apple for patent infringement.

As with Apple's antitrust claim, **[**39]** a violation of *Cal. Bus. & Prof. Code § 17200*, requires showing that the unfair practice caused the plaintiff an economic injury. *Kwikset Corp. v. Superior Ct., 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 884-85* (holding that party asserting unfair competition or unlawful business practices claim must "establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury . . . and show that that economic injury was the result of, i.e., caused by, the unfair business practice . . . that is the gravamen of the claim"). The only economic injury Apple suffered is the cost of defending itself from Motorola's infringement claims. Thus, Motorola is immune from Apple's unfair competition claim that is premised on the same theory as Apple's antitrust claim. *Monolithic Power Systems, 2007 U.S. Dist. LEXIS 22556, 2007 WL 801886, at *6* (holding that Noerr-Pennington can provide immunity against California unfair competition claims).

[*1078] c. Apple's other claims

Motorola contends that the Noerr-Pennington doctrine provides immunity not just to Apple's statutory antitrust and unfair competition claims, but to Apple's contract and tort claims also. As Motorola points out, courts have applied the Noerr-Pennington doctrine **[**40]** outside the antitrust context. *Theme Promotions, Inc. v. News America Marketing FSI, 546 F.3d 991, 1006-1007 (9th Cir. 2008)* (applying doctrine to claim for tortious interference with prospective economic advantage under California law); *International Brotherhood of Teamsters v. Philip Morris Inc., 196 F.3d 818, 826 (7th Cir. 1999)* (applying Noerr-Pennington immunity to protect petitioning activity from liability for RICO suits); *Tarpley v. Keistler, 188 F.3d 788, 794 (7th Cir. 1999)* (applying doctrine to § 1983 claims); *Video International Production, Inc. v. Warner—Amex Cable Communications, Inc., 858 F.2d 1075, 1084 (5th Cir. 1988)* (applying doctrine to state law claim for tortious interference with contract). Courts have reasoned that because the Noerr-Pennington doctrine derives from the *First Amendment*, it should be applied broadly to protect the right to petition the government. *New West, L.P. v. City of Joliet, 491 F.3d 717, 722 (7th Cir. 2007)* ("Noerr-Pennington has been extended beyond the antitrust laws, where it originated, and is today understood as an application of the *first amendment's* speech and petitioning clauses."); *White v. Lee, 227 F.3d 1214, 1231 (9th Cir. 2000)* **[**41]** (explaining that because "Noerr-Pennington is a label for a form of *First Amendment* protection . . . to say that one does not have Noerr-Pennington immunity is to conclude that one's petitioning activity is unprotected by the *First Amendment*"); *Kottle v. Northwest Kidney Centers, 146 F.3d 1056, 1059 (9th Cir. 1998)* ("the doctrine is a direct application of the Petition Clause").

However, Motorola has cited no authority for the proposition that the Noerr-Pennington doctrine should apply to Apple's breach of contract claims (counts 2, 3, and 4), and I conclude that applying immunity to Motorola from Apple's breach of contract claims is not appropriate. Although the *First Amendment* protects Motorola's right to petition the courts to enforce its patents, Apple's breach of contract claims are based on the theory that Motorola agreed by contract that it would not enforce its patent rights until it offered a license to Apple on fair, reasonable and nondiscriminatory terms. In other words, Apple contends that Motorola waived some of its petitioning rights through contract. It would be improper to use the Noerr-Pennington doctrine to bar Apple from enforcing that contract. *Powertech Technology, Inc. v. Tessera, Inc., 872 F. Supp. 2d 924, 2012 U.S. Dist. LEXIS 70630, 2012 WL 1835699, *5 (N.D. Cal. May 21, 2012)* **[**42]** (concluding that Noerr-Pennington does not provide immunity against breach of contract claims).

Similarly, Motorola has failed to cite any authority or develop any argument for applying Noerr-Pennington to Apple's equitable estoppel claim (count 1), which appears to be an alternative claim to its breach of contract claims. Because Motorola failed to develop any argument about why it should be immune from the equitable estoppel claim or why the estoppel claim should be treated differently from the contract claim, I will not apply Noerr-Pennington to the equitable estoppel claim. Cf. *Garg v. Potter, 521 F.3d 731, 736 (7th Cir. 2008)* (explaining that undeveloped arguments are waived).

As to Apple's tortious interference with contract claim (count 13), it is clear that this claim is not premised on Motorola's patent litigation. Rather, it is premised on Motorola's actions in relation to **[*1079]** Qualcomm. Therefore, the *Noerr-Pennington* doctrine does not apply to that claim.

Finally, I note that Apple asserts three claims for declaratory judgment in its amended complaint. Apple seeks declarations that the terms of the license offered by Motorola to Apple were not fair, reasonable and nondiscriminatory **[**43]** (count 7); Motorola is not entitled to injunctive relief on its patent infringement claims (count 11); and Motorola misused its patents by promising to offer fair licenses and then failing to do so (count 12). It is not clear from Apple's complaint whether its claims for declaratory judgment are based on a contract theory or an antitrust theory. To the extent that they are based on an antitrust theory, Motorola is immune under the Noerr-Pennington doctrine. To the extent that they are based on Apple's breach of contract theory or estoppel theory, they may proceed.

In sum, I am granting Motorola's motion for summary judgment on Apple's antitrust claim (count 5), its claim for unfair competition in violation of Cal. Bus. & Prof. Code § 17200 (count 6) as related to Motorola's licensing and disclosure obligations, and its claims for declaratory relief (counts 7, 11 and 12) to the extent they are based on antitrust or unfair competition theories of liability. Motorola is immune from liability for these claims under the Noerr-Pennington doctrine. I am denying Motorola's motion under the Noerr-Pennington doctrine with respect to Apple's remaining claims.

Because I am dismissing Apple's antitrust **[**44]** claim, I need not consider Motorola's argument that the antitrust claim is barred by the statute of limitations.

3. Apple's tortious interference with contract claim

Motorola has moved for summary judgment on Apple's claim that Motorola tortiously and unlawfully interfered with the Strategic Terms Agreement that Apple had entered into with Qualcomm in December 2009. Apple's Am. Cpt., dkt. #110, ¶¶ 190-195 (count 13). Under that agreement, Apple and Qualcomm agreed to terms under which Apple could purchase chipsets that would be used in Apple's products. The chipsets incorporated Motorola's patented technology, and Motorola and Qualcomm had entered into a separate licensing agreement regarding the chipsets. Apple contends that Motorola committed the tort of interference with contract by terminating license and covenant rights with respect to Apple.

Apple and Qualcomm are both headquartered in California and both Apple and Motorola assume California law applies to Apple's tortious interference claim. Thus, I will apply California law. *Auto-Owners Insurance Co. v. Websolv Computing, Inc., 580 F.3d 543, 547 (7th Cir. 2009)* ("Courts do not worry about conflict of laws unless the parties disagree **[**45]** on which state's law applies.") (citation omitted). To establish the tort of intentional interference with contract under California law, a plaintiff must show:

> (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage.

Pacific Gas & Electric Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587 (Cal. 1990).

Motorola contends it is entitled to summary judgment on Apple's tortious interference claim because Apple cannot establish the last two elements of its claim. Specifically, Motorola contends that Apple has not shown that either it or Qualcomm **[*1080]** breached the Strategic Terms Agreement or that the agreement was otherwise disrupted and that Apple cannot show that it has suffered any injury as a result of Motorola's terminating its license and covenant rights with respect to Apple.

I agree with Motorola. Apple concedes that Motorola's decision to terminate license rights with respect to Apple did not cause Apple or Qualcomm to breach the **[**46]** Strategic Terms Agreement. Motorola's actions did not affect the terms of the agreement itself, because the agreement never purported to guarantee that Qualcomm's chipsets were covered by licenses to third-party patents. Additionally, Apple admits that it has continued to purchase chipsets from Qualcomm under the agreement. Apple's Br., dkt. #167, at 30. Apple does not contend that Motorola's actions have made the chipsets more expensive, that it has been forced to seek chipsets from a different manufacturer or that it has incurred additional licensing fees in response to Motorola's decision to terminate any license and covenant rights Apple may have enjoyed under Motorola's agreement with Qualcomm. In fact, Apple does not even submit evidence about what benefits it would have enjoyed under the licensing agreement and whether it would have paid Qualcomm or Motorola any licensing fees on top of what it paid Qualcomm for chipsets, if Motorola had not terminated license and covenant rights with respect to Apple. Apple implies that the chipsets would have been covered under the Qualcomm's licensing agreement with Motorola, but submits no evidence on the issue.

Apple contends that even though **[**47]** Motorola's actions have not interrupted performance of the contract between Apple and Qualcomm, Motorola's actions constituted tortious interference because they have made performance of the contract "more expensive and burdensome." *Pacific Gas & Electric, 50 Cal. 3d at 1127* ("interference which makes enjoyment of a contract more expensive or burdensome may be actionable"). However, Apple has adduced no factual support to show that Motorola has caused its contractual relationship with Qualcomm to be more expensive or burdensome. In its brief, Apple relies solely on the allegation that Motorola's actions caused Apple to file a lawsuit in a district court in California to clarify its rights to use chipsets manufactured by Qualcomm without threat of patent infringement litigation from Motorola.Apple v. Motorola Mobility, Inc., Case No. 12-cv-355 (S.D. Cal.). Apple argues that the cost of the California litigation qualifies as "damages" arising out of Motorola's tortious interference.

Apple's theory of damages arising out of the California litigation was not pleaded in its complaint. This makes sense because Apple filed the amended complaint in this case in October 2011 and did not commence **[**48]** the California lawsuit until February 2012. Even if it were appropriate to consider this new theory of damages, Apple has included no facts about the California lawsuit or its costs in its proposed findings of fact or responses to Motorola's proposed facts. Apple cannot create a genuine factual dispute sufficient to defeat summary judgment simply by making a factual assertion in its brief. Moreover, even if I considered Apple's assertions about the California lawsuit, Apple fails to connect its litigation costs to the contract between itself and Qualcomm. Apple argues that it was forced to litigate to protect its contractual rights. Apple's Br., dkt. #167, at 31. However, according to Apple's own description of its litigation, it is not suing to protect its rights under its agreement with Qualcomm. Rather, it is suing Motorola in an attempt to enforce the terms of *Motorola's* contract with **[*1081]** Qualcomm. Apple's own agreement with Qualcomm did not promise any of the benefits of which Apple now seeks to take advantage.

In sum, Apple has adduced no evidence that Motorola's decision to terminate license and covenant rights with respect to Apple interfered with Apple's rights or benefits under **[**49]** its agreement with Qualcomm or made Apple's contract with Qualcomm more expensive or burdensome. Therefore, Motorola is entitled to summary judgment on Apple's claim of tortious interference with contract.

4. Apple's claim under *Cal. Bus. & Prof. Code § 17200*

As discussed above, Apple's claim under *Cal. Bus. & Prof. Code § 17200* can be divided into two separate theories: (1) Motorola violated the law by initiating patent litigation against Apple after failing to offer Apple a license on fair, reasonable and nondiscriminatory terms; and (2) Motorola violated the law by suspending its contract with Qualcomm as it related to Apple.

Motorola has moved for summary judgment on Apple's claim under the first theory, contending that it is barred by *California Civil Code § 47(b)*, which provides that the filing of a lawsuit is privileged activity immune from tort liability. Because I concluded above that the *Noerr-Pennington* immunity doctrine applies to this claim, I need not address whether the claim would be barred by the California litigation privilege.

With respect to Apple's second theory of liability, Motorola contends that Apple has not proven that it suffered an economic injury, as required **[**50]** under *Cal. Bus. & Prof. Code § 17200*. *Kwikset, 246 P.3d at 884-85*. I agree. To defeat Motorola's motion for summary judgment, Apple was required to adduce specific evidence showing that it lost money or property as a result of Motorola's termination of any license and covenant rights that flowed to Apple through Qualcomm. As explained in the discussion of Apple's tortious interference claim, Apple has failed to adduce any specific facts on this issue. Therefore, Motorola is entitled to summary judgment on this claim.

5. Apple's breach of contract claims

Motorola has moved for partial summary judgment on Apple's breach of contract claims, seeking a determination from the court that Apple has not suffered any damages from the alleged breaches. (Motorola did not move for summary judgment on Apple's request for specific performance of Motorola's contractual obligations.) The only damages Apple seeks to recover through its contract claims are litigation costs. According to Apple's expert's report, Apple believes it is entitled to a minimum of $31,948,128.31 in damages based on "litigation costs, including attorneys' fees, Apple has incurred to date in (1) having to defend the ITC 745 Investigation; **[**51]** (2) having to defend the District Court Case; and (3) prosecuting the [present case] to establish Motorola's violation of its obligations to ETSI and IEEE." Napper Rep., dkt. #153-36 at 6. Motorola contends that litigation costs cannot be recovered as damages from a breach of contract claim.

The first question is what forum's law applies to Apple's contract claims. Apple (a California company) is suing Motorola (an Illinois company) for violation of commitments to ETSI (based in France) and IEEE (based in New York). Both parties agree that ETSI's bylaws are governed by the laws of France, so I will apply French law to Apple's claims involving ETSI. (Under *Fed. R. Civ. P. 44.1*, courts determining foreign law "may consider any relevant material or source, including testimony, whether or not submitted **[*1082]** by a party or admissible under the Federal Rules of Evidence." Apple submitted an expert report from Philippe Delebecque regarding French contract law. Dkt. #159. Motorola submitted an excerpt regarding French law on damages from an English language treatise. Barry Nicholas, The French Law of Contract (2d ed. 1992), dkt. #176-1.)

Neither party undertakes an adequate choice of law analysis **[**52]** with respect to claims concerning IEEE, and both sides cite variously to Wisconsin, New York and Illinois law in support of their respective positions. However, it does not appear that there is a conflict among Wisconsin, New York or Illinois law relevant to the issues in this case. Thus, I will apply Wisconsin law to Apple's claims concerning IEEE. *Danielson v. Gasper, 2001 WI App 12, ¶ 5, 240 Wis. 2d 633, 623 N.W.2d 182* (under Wisconsin's choice of law principles, if there is no genuine conflict between Wisconsin law and law of other possible state, court applies Wisconsin law); *Tanner v. Jupiter Realty Corp., 433 F.3d 913, 915 (7th Cir. 2006)* (federal court applies choice of law principles of forum state to determine which state's substantive law governs contract claim).

Motorola contends that under the laws of Wisconsin, France or any other jurisdiction, Apple cannot recover attorney fees as damages for a breach of contract action. However, Motorola does not cite any cases establishing such a bright-line rule. Motorola cites *In re Guardianship & Protective Placement of Evelyn O., 571 N.W.2d 700, 214 Wis. 2d 434 (1997)*, and *Computer Docking Station Corp. v. Dell, Inc., 547 F. Supp. 2d 948, 951 (W.D. Wis. 2007)*, **[**53]** for the general "American rule" that a prevailing party may not recover attorneys fees unless authorized by statute or contract. However, Apple is not seeking an award of attorney fees to a prevailing party. It is seeking attorney fees as damages incurred because of Motorola's alleged breach of contract.

As Motorola concedes in its reply brief, Wisconsin law allows recovery of attorneys fees as contractual damages in some situations. Motorola's Br., dkt. #173, at 7 (citing *Repinksi v. Clintonville Federal Savings & Loan Association, 49 Wis. 2d 53, 58, 181 N.W.2d 351, 354 (1970)* ("An award of damages for breach of contract should compensate the injured party for losses necessarily flowing from the breach. . . .When litigation is a natural and proximate result of the breach, recovery may be had as damages for attorney's fees necessarily incurred in that litigation.") (dictum). Additionally, Motorola concedes that French law allows recovery for damages that are the "immediate and direct and foreseeable result of breach." Id. However, Motorola contends that the litigation costs that Apple incurred are not compensable because many specific costs that Apple's expert included in his damages **[**54]** calculations, such as the costs of attorneys' meals and laundry, have too tenuous a relationship to Motorola's alleged breach.

Motorola has not shown that it is entitled to summary judgment on this issue. Its legal analysis is incomplete; it cited no cases discussing whether a party can recover as contract damages the costs it incurred in previous litigation with the same defendant, let alone any cases actually holding that a party may not recover such costs. Further, Motorola raised several new arguments in its reply brief regarding whether Apple's litigation costs were the direct and foreseeable result of Motorola's alleged breach. Therefore, I am denying Motorola's motion for summary judgment on this issue. If Motorola wishes to make further arguments regarding whether certain costs identified by Apple's **[*1083]** expert should be excluded, it may file a motion in limine on the subject.

B. Apple's Motion for Partial Summary Judgment

Apple has moved for partial summary judgment, seeking to establish certain elements of its claims. Because I have concluded that Motorola is entitled to summary judgment on all of Apple's claims with the exception of Apple's contract and estoppel claims, I will consider **[**55]** Apple's arguments only as they relate to those claims. In particular, Apple requests a determination that:

- Motorola entered into binding contractual obligations with ETSI and IEEE to license its declared-essential patents on fair, reasonable and nondiscriminatory terms.
- Apple is a third-party beneficiary of Motorola's contractual obligations to ETSI and IEEE.
- In submitting technical proposals to ETSI for inclusion of Motorola technology in ETSI standards, Motorola was obligated by ETSI policy to make a bona fide effort to identify essential intellectual property rights that might be required by the technical proposal before the adoption of the technical proposal into the standard.
- Motorola was obligated to make a bona fide effort to disclose the applications leading to the issuance of the '898, '559 and '697 patents to ETSI before the adoption of Motorola's technical proposals, even when those patent applications were unpublished.
- Motorola disclosed the patent applications issuing as the '898, '559 and '697 patents after the adoption of the standards to which Motorola contends those patents are essential.

Notably, Apple does not seek a determination that Motorola's failure to disclose **[**56]** its intellectual property rights was intentional, that Motorola failed to comply with the disclosure requirements of ETSI and IEEE policies or that Motorola breached its contractual obligations by demanding unreasonable licensing fees for its patents from Apple.

1. Motorola's contracts with ETSI and IEEE

As discussed above, I am applying Wisconsin law to Apple's breach of contract claims related to IEEE and French law to the claims related to ETSI.

To form a valid contract under Wisconsin law, there must be evidence of an offer, acceptance and consideration, *Kamikawa v. Keskinen, 44 Wis. 2d 705, 710, 172 N.W.2d 24, 26 (1969)*, and an understanding between the parties regarding the essential terms of the contract. *Metropolitan Ventures, LLC v. GEA Associates, 2006 WI 71, ¶ 24, 291 Wis. 2d 393, 717 N.W.2d 58*. Apple's expert states that French law requires the same general elements, which Motorola has not disputed. Delebecque Rep., dkt. #146, ¶ 31 ("French law considers that the contractual agreement is reached . . . as of the moment the parties have reached an agreement on the essential elements of the contract.").

In this case, the combination of the policies and bylaws of the standards-setting **[**57]** organizations, Motorola's membership in those organizations and Motorola's assurances that it would license its essential patents on fair, reasonable and nondiscriminatory terms constitute contractual agreements. The intellectual property rights policies of ETSI and IEEE constituted offers to Motorola for membership in the organization in exchange for Motorola's ability to participate in developing technical standards. The "offers" set out the essential terms of the contract, namely, **[*1084]** that members must abide by intellectual property rights policies. Under IEEE's policy, members must submit letters of assurance including a commitment to license essential patents under reasonable and nondiscriminatory terms. Similarly, ETSI's policy states that its members shall use "reasonable endeavors" to inform the organization of essential patents "in a timely fashion." All members are asked to grant licenses to essential patents on fair, reasonable and nondiscriminatory terms; if they refuse, they must explain their reasons in writing.

Motorola accepted the offers and agreed to be bound by these policies when it joined ETSI and IEEE. Later, Motorola confirmed that it was bound by the organizations' **[**58]** policies when it submitted declarations and letters of assurance stating that it would license its patents on fair, reasonable and nondiscriminatory terms. In particular, Motorola sent declarations to ETSI regarding the '697, '898, '230 and '559 patents, and sent letters of assurance to IEEE regarding the '516, '193, '223 and '712 patents.

Both Motorola and the organizations benefited from this arrangement and thus, the element of consideration is satisfied. Motorola received the benefit of participating in the standards development process and influencing the choice of technology for the standards. The organizations benefited from Motorola's commitments by knowing that their technical standards would be available for use by third parties.

Several courts have reached similar conclusions. *Microsoft Corp. v. Motorola, Inc., 864 F. Supp. 2d 1023, 2012 U.S. Dist. LEXIS 78670, 2012 WL 2030098, *5-6 (W.D. Wash. June 6, 2012)* (holding that contract was formed through Motorola's commitments to IEEE to license patents essential to 802.11 standard on reasonable and nondiscriminatory terms); *Research In Motion Ltd. v. Motorola, Inc., 644 F. Supp. 2d 788, 797 (N.D. Tex. 2008)* (holding at motion to dismiss stage that plaintiff had stated breach of **[**59]** contract claim based on defendant's failure to offer FRAND terms as it had agreed to ETSI and IEEE); *ESS Technology, Inc. v. PC-Tel., Inc., 1999 U.S. Dist. LEXIS 23227, 1999 WL 33520483, *4 (N.D. Cal. Nov. 4, 1999)* (holding that, as third-party beneficiary of contract between standards-setting organization and defendant-essential-patent holder, software manufacturer had properly stated claim for specific performance of agreement requiring defendant to license patents on nondiscriminatory and reasonable terms).

In its opposition brief, Motorola states that it "does not dispute that it made commitments to the industry groups," and "does not dispute that obligations flow from those commitments." Motorola's Br., dkt. #164, at 1. However, Motorola argues that its commitments are not binding contracts and that neither the industry groups nor Apple can enforce those commitments. In other words, Motorola argues that although it made promises, the promises are largely meaningless because they cannot be enforced by either the organizations or third parties.

Motorola relies largely on language from ETSI's and IEEE's policies to argue that the organizations do not intend to enforce their intellectual property rights policies. **[**60]** IEEE's policy states that "[n]o license is implied by the submission of a Letter of Assurance," and that "IEEE is not responsible for determining whether any licensing terms or conditions provided in connection with submission of a Letter of Assurance . . . are reasonable and non-discriminatory." ETSI's policy states that "[s]pecific licensing terms and negotiations are commercial issues between the companies and shall not be addressed within ETSI."

These provisions do not say that the organizations will not enforce their policies. Rather, the provisions make clear **[*1085]** that organizations will not be responsible for deciding what terms constitute a fair, reasonable and nondiscriminatory license. They will not resolve licensing disputes. However, ETSI and IEEE still require members to offer reasonable and nondiscriminatory licenses to their essential patents in order to comply with the conditions of membership and their declarations. ETSI's policies state explicitly that "[a]ny violation of the POLICY by a MEMBER shall be deemed to be a breach, by that MEMBER, of its obligations to ETSI." Similarly, in its commitment to IEEE, Motorola agreed that it would "license those patents on a non-discriminatory **[**61]** basis offering fair and commercially reasonable terms."

Motorola has several arguments about whether it complied with the terms of ETSI's and IEEE's policies by making reasonable efforts to disclose its patents and by offering to negotiate a licensing agreement with Apple. However, these arguments relate to whether Motorola breached the contracts, not whether contractual obligations exist. Neither Apple nor Motorola moved for summary judgment on the element of breach.

In sum, I am granting Apple's motion for summary judgment with respect to the existence of contracts between Motorola and the standards-setting organizations.

2. Apple's status as a third-party beneficiary

The next question is whether Apple has a right to enforce the contracts as a third party beneficiary. *Becker v. Crispell-Snyder, Inc., 2009 WI App 24, ¶ 9, 316 Wis. 2d 359, 763 N.W.2d 192* (party wishing to enforce contract must either be party to contract or third-party beneficiary). Under Wisconsin law, a third-party beneficiary is one whom the contracting parties intended to "directly and primarily" benefit. *Id. at ¶ 11* (citing *Winnebago Homes, Inc. v. Sheldon, 29 Wis. 2d 692, 699, 139 N.W.2d 606 (1966))*. The benefit **[**62]** proven must be direct; an indirect benefit incidental to the primary contractual purpose is insufficient. Id. French law is consistent with Wisconsin law on this issue. Delebecque Rep., dkt. #159, ¶ 25.

Motorola advances several arguments in support of its contentions that its commitments to ETSI and IEEE were not intended primarily to benefit potential users of the standards. However, none of its arguments are persuasive. The primary purpose of the ETSI and IEEE intellectual property rights policies and Motorola's licensing commitments is to protect companies that need to obtain licences in order to practice the standards adopted by the organizations. This is clear from the language of the policies. For example, ETSI's policy states that an "objective" of the policy is to "reduce the risk" of an essential patent's becoming "unavailable." The entities that care the most about the availability of a license are those entities such as Apple, who will incorporate the standards into their own products.

As a potential user of the standards at issue and a prospective licensee of essential patents, Apple is a third party beneficiary of the agreements between Motorola and IEEE and Motorola and **[**63]** ETSI. See also *Microsoft, 2012 U.S. Dist. LEXIS 78670, 2012 WL 2030098, at *5-6* (holding that Microsoft was third-party beneficiary of Motorola's agreements with standard setting organization because the "commitments are clearly designed to benefit potential licensees of Motorola's standard essential patent by ensuring that such patents are readily accessible to everybody at reasonable rates").

3. Scope of contractual obligations to ETSI

Apple also seeks summary judgment on issues related to the scope of **[*1086]** Motorola's contractual obligations to ETSI. In particular, Apple seeks a determination that (1) the ETSI intellectual property rights policy required Motorola to make a "bona fide" effort to identify its intellectual property rights that might be essential to a technical standard *before* the technical proposal was adopted into the standard; and (2) that Motorola was required to include its unpublished patent applications as part of those disclosures.

With respect to the first issue, the ETSI intellectual property rights policy is clear. It states that members

> submitting a technical proposal for a STANDARD shall, on a bona fide basis, draw the attention of ETSI to any of that MEMBER's [intellectual property rights] **[**64]** which *might* be ESSENTIAL *if that proposal is adopted*.

By using the terms "might" and "if," the policy clearly requires members to make efforts to disclose intellectual property rights *before* a standard is adopted.

Motorola has two arguments in opposition, neither of which is persuasive. First, it says it was not required to disclose patents or patent applications at the time a technical proposal is made or during work meetings relating to the technical development of standards. This argument is not responsive to Apple's motion. Apple has not argued that Motorola was required to disclose its intellectual property rights during work meetings or when it submitted technical proposals. Apple has argued only that Motorola was required to disclose its patents and patent applications at some point before a technical proposal is adopted into a standard.

Second, Motorola argues that it was relieved of its obligation to disclose specific patents by submitting a general declaration to ETSI, in which it agreed to license any of its essential patents on fair, reasonable, and nondiscriminatory terms. However, the ETSI policies make clear that the submission of a general declaration does not relieve **[**65]** a member of its duty to make a timely declaration of specific patents and applications that it believes may be essential to an ETSI standard. The ETSI Guide on Intellectual Property Rights states that use of a general licensing declaration "does not take away the obligation for members to declare essential patents to ETSI. . . ."

As to the issue of Motorola's obligation to disclose unpublished patent applications, ETSI's policy makes clear that members are required to disclose patents and "applications therefor." The policy exempts "confidential information." Apple asserts several reasons in its brief about why Motorola's patent applications issuing as the '898, '559 and '697 patents do not qualify as "confidential." Apple's Br., dkt. #144, at 22-23. For example, Apple contends that Motorola waived any confidentiality privilege that might have applied by publicly disclosing the relevant language in those applications through its technical proposals to the relevant working groups and through foreign patent applications.

Motorola's only response is to assert that ETSI members are not required to disclose confidential information and that patent applications may qualify as confidential. **[**66]** This is nonresponsive to Apple's arguments. By failing to respond to Apple's contention that the specific patent applications at issue in this case were not confidential, Motorola has waived any arguments in opposition and has failed to meet its burden at summary judgment of showing the existence of material facts in dispute regarding this issue of the scope of its contractual obligations to ETSI. *Wojtas v. Capital Guardian Trust Co., 477 F.3d 924, 926 (7th Cir. 2007)* ("A failure to oppose an argument permits an inference of acquiescence and 'acquiescence operates as a waiver.'") (quoting *Cincinnati Insurance **[*1087]** Co. v. East Atlantic Insurance Co., 260 F.3d 742, 747 (7th Cir. 2001))*.

4. Timing of Motorola's disclosure

Finally, Apple seeks a determination that Motorola disclosed the patent applications issuing as the '898, '559 and '697 patents after Motorola made technical proposals using technology from those patents and after ETSI adopted standards to which Motorola contends those patents are essential. I am granting Apple's motion on this issue because it is uncontested.

C. Issues Remaining for Trial

I am dismissing all of Apple's claims with the exception of its breach of contract and equitable **[**67]** estoppel claims and its declaratory judgment claims premised on a breach of contract or estoppel theory.

With respect to the breach of contract claims, Apple has shown that Motorola's membership in ETSI and IEEE and the intellectual property declarations it made established a contractual relationship that required Motorola to license its essential patents to third parties on fair, reasonable and nondiscriminatory terms. Additionally, Apple has shown that it is a third-party beneficiary of those contracts and has a right to enforce them. Apple has proven that Motorola's membership in ETSI required Motorola to make reasonable efforts to disclose any intellectual property rights that might have become essential to standards being considered by ETSI before those standards were adopted, including Motorola's unpublished patent applications that became the '898, '559 and '697 patents. Finally, Apple has shown that Motorola disclosed its '898, '559 and '697 patents to ETSI after Motorola made technical proposals using technology from those patents and after ETSI adopted standards to which Motorola contends those patents are essential.

However, there are still several unresolved issues related **[**68]** to Apple's breach of contract claims. To succeed on its claims, Apple must prove that Motorola breached a contract by failing to make bona fide efforts to disclose its patents to ETSI in a timely manner and by failing to offer a license to its essential patents to Apple on fair, reasonable and nondiscriminatory terms. As to the licensing offer, Apple must prove that Motorola's initial offer of a 2.25% royalty rate and attempts to negotiate were unfair, unreasonable or discriminatory and violated Motorola's commitments to ETSI and IEEE.

Additionally, Apple must prove that it suffered damages that are clearly connected to Motorola's breach. At this point, it is not clear how Apple intends to prove that it was damaged by Motorola's failure to disclose patents to ETSI in a timely manner. Additionally, Apple must prove that any litigation damages it seeks to recover are directly attributable to Motorola's breach.

ORDER

IT IS ORDERED that

1. Defendant Motorola Mobility, Inc.'s motion for partial summary judgment, dkt. #150, is GRANTED IN PART and DENIED IN PART.

The motion is GRANTED with respect to plaintiff Apple Inc.'s claims that Motorola violated *§ 2* of the Sherman Act (count 5), that it **[**69]** violated *Cal. Bus. & Prof. Code § 17200* (count 6), and that it tortiously interfered with contract (count 13), and with respect to Apple's requests for declaratory relief in conjunction with these claims.

The motion is DENIED in all other respects.

2. Plaintiff Apple Inc.'s motion for partial summary judgment, dkt. #143, is GRANTED. The court finds as a matter of law that

a. Motorola entered into binding contractual obligations with ETSI and **[*1088]** IEEE to license its declared essential patents on fair, reasonable and nondiscriminatory terms.
b. Apple is a third-party beneficiary of Motorola's contractual obligations to ETSI and IEEE.
c. In submitting technical proposals to ETSI for inclusion of Motorola technology in ETSI standards, Motorola was obligated by ETSI policy to make a bona fide effort to identify essential intellectual property rights that might be required by the technical proposal before the adoption of the technical proposal into the standard.

d. Motorola was obligated to make a bona fide effort to disclose the applications leading to the issuance of its United States patents 6,175,559, 6,359,898 and 6,246,697 to ETSI before the adoption of Motorola's technical proposals, even when **[**70]** those patent applications were unpublished.
e. Motorola disclosed the patent applications issuing as the '898, '559 and '697 patents after the adoption of the standards to which Motorola contends those patents are essential.

Entered this 10th day of August, 2012.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the sufficiency of a complaint. To survive a *Rule 12(b)(6)* motion to dismiss, a complaint's factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all of the allegations in the complaint are true. A court is not bound to accept as true a legal conclusion couched as a factual allegation. Only a complaint that states a plausible claim for relief survives a motion to dismiss. A court considering a motion to dismiss can choose to begin by identifying pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth. While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations. When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief. In sum, to survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim for relief that is plausible on its face.

Civil Procedure > ... > Justiciability > Standing > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

In ruling on a motion to dismiss, a court may consider the complaint as well as (1) documents referenced in the pleadings and central to plaintiff's claims, (2) matters of which a court may properly take notice, (3) public documents, and (4) letter decisions of government agencies may be appended to a motion to dismiss. When standing is called into question, a court may consider matters outside of the pleadings.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN3[] **Sherman Act, Scope**

To maintain an action under the Sherman Act, a plaintiff must allege facts tending to show a critical antitrust injury. An "antitrust injury" is a prerequisite to maintaining a claim under *§§ 1* and *2* of the Sherman Act, *15 U.S.C.S. §§ 1* and *2*. To establish an antitrust injury, a plaintiff must plead: (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN4[] **Sherman Act, Scope**

The related concepts of antitrust injury and antitrust standing are often confused. This confusion occurs because the two concepts share a common ingredient. The common ingredient is that both requirements limit recovery to those who have been injured by restraint on competitive forces in the economy. Any inquiry to determine whether antitrust injury has been shown is more limited than one to determine whether the plaintiff has standing. The single determinant of antitrust injury is whether the plaintiff has suffered an injury the type the antitrust laws were intended to prevent and that flows from that which makes a defendant's act unlawful. On the other hand, even if an antitrust injury is shown sufficiently, standing may be denied on the basis of other factors. The purpose of the additional inquiries is to confine recovery to cases that promote the congressional intent to ensure that consumers receive the benefits of competitive markets.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Public Enforcement, State Civil Actions**

The Michigan Antitrust Reform Act (MARA), *Mich. Comp. Laws § 445.772*, is patterned after the Sherman Antitrust Act, *15 U.S.C.S. § 1 et seq.*, and federal court interpretations of the Sherman Act are persuasive authority as to the meaning of the MARA. The MARA adopted language from and is interpreted consistent with *15 U.S.C.S. § 1*. Courts have applied the same analysis to claims under the Sherman Act and MARA.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN6[] **Public Enforcement, State Civil Actions**

Antitrust liability will not be extended to give succor to dejected buyers or sellers who simply allege that one buyer and one seller colluded to reach a deal that may or may not have been inferior to the deal offered by the disappointed party.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN7[] Sherman Act, Scope

Parties may break a host of state or federal laws and regulations in making a side deal or in otherwise circumventing the bidding process in reaching a final arrangement, but they do not breach *15 U.S.C.S. § 1* where the alleged vertical agreements involve only one buyer and one seller. Without a showing that a judgment in favor of the plaintiff-competitor will confer some benefit on market consumers, it is presumed that antitrust injury is lacking.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] Sherman Act, Scope

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN9[] Sherman Act, Scope

Courts proceeding under *15 U.S.C.S. § 1* analyze all other alleged restraints on trade under the rule of reason, which requires the factfinder to decide whether under all circumstances of the case the restrictive practice imposes an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN10[] Per Se Rule & Rule of Reason, Per Se Violations

Per se violations arise from agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN11[] Price Fixing & Restraints of Trade, Vertical Restraints

Vertical restraints on trade are examined under a rule of reason analysis unless they include some agreement on price or price levels.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN12[] Price Fixing & Restraints of Trade, Vertical Restraints

To show that a vertical restraint on trade violates the rule of reason and *15 U.S.C.S. § 1*, a plaintiff must show: (1) that the antitrust defendant contracted, combined, or conspired; (2) that the combination or conspiracy produced adverse anticompetitive effects (3) within relevant product and geographical markets; (4) that the objects of and conduct pursuant to that contract or conspiracy were illegal; and (5) that the plaintiff was injured as a proximate result of that conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Sherman Act, Claims

Mere parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality.

Antitrust & Trade Law > Sherman Act > Claims

HN14[] Sherman Act, Claims

An opportunity to conspire does not necessarily support an inference of illegal agreement.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] Scope, Monopolization Offenses

15 U.S.C.S. § 2 makes it unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations. Liability under *§ 2* is not premised merely on the existence of monopoly power. Simply possessing monopoly power and charging monopoly prices does not violate *§ 2*; rather, the statute targets the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN16[] Scope, Monopolization Offenses

To establish a claim of attempted monopolization under *15 U.S.C.S. § 2*, a plaintiff must allege and prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Public Enforcement > US Department of Justice Actions > General Overview

HN17[] Public Enforcement, US Department of Justice Actions

No private cause of action exists under *15 U.S.C.S. § 13a*.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN18[] Competitive Injuries, Primary Line Injuries

There are two prerequisites to recovery on claims of predatory pricing. First, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs. That showing is required because as a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control, and because courts must be particularly wary of allowing recovery for above cost price cutting which would perversely, chill legitimate price cutting which directly benefits consumers. Second, to establish a predatory pricing claim, a plaintiff must demonstrate that the competitor had a dangerous probability of recouping its investment in below-cost prices. That element is necessary because without a dangerous probability or recoupment, it is highly unlikely that a firm would engage in predatory pricing.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN19[] **Competitive Injuries, Primary Line Injuries**

Courts to analyze predatory pricing claims rigorously, explaining that the costs of erroneous findings of predatory-pricing liability are quite high because the mechanism by which a firm engages in predatory pricing-lowering prices-is the same mechanism by which a firm stimulates competition, and, therefore, mistaken findings of liability would chill the very conduct the antitrust laws are designed to protect.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN20[] **Competitive Injuries, Primary Line Injuries**

In a predatory pricing case, the plaintiff must demonstrate that there is a likelihood that the predatory scheme alleged would cause a rise in prices above a competitive level that would be sufficient to compensate for the amounts expended on the predation.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN21[] **Competitive Injuries, Primary Line Injuries**

In analyzing a predatory pricing claim, the United States Court of Appeals for the Sixth Circuit requires a court to examine a defendant's overall pricing scheme within a particular market to determine if a price is below the average variable cost.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN22[] **Competitive Injuries, Primary Line Injuries**

Occasional low pricing is not sufficient to allege an antitrust injury due to predatory pricing.

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

HN23[] **Competitive Injuries, Primary Line Injuries**

Courts are skeptical of a plaintiff's attempt to prove predatory pricing through evidence of a low price charged for a single product out of many, or to a single customer. Predation claims cannot be based on occasional instances of allegedly predatory pricing, because they are not likely to drive rivals from the market and to permit the predator to raise prices and profits subsequently. A predatory pricing plaintiff can prevail only by adducing evidence suggesting an overall price structure was predatory, not that a small minority of sales were below average variable cost.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN24[] Intentional Interference, Elements

To establish a claim for tortious interference with a business relationship or expectancy under Michigan law, a plaintiff must show (1) the existence of an advantageous relationship with a third party of which the defendant is aware, (2) with which the defendant intentionally and improperly interferes, (3) resulting in a termination of the relationship or expectancy, and (4) causing damage to the party whose interest has been terminated. One who alleges tortious interference with a business relationship must allege the intentional doing of a per se wrongful act or the doing of a lawful act with malice and unjustified in law for the purpose of invading the business relationship of another.

Torts > ... > Commercial Interference > Business Relationships > General Overview

HN25[] Commercial Interference, Business Relationships

A disappointed bidder on a public contract lacks standing to sue for tortious interference.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN26[] Civil Conspiracy, Elements

Under Michigan law, a claim for conspiracy depends on an underlying viable tort claim.

Antitrust & Trade Law > Sherman Act > Claims

HN27[] Sherman Act, Claims

There is a two-prong test for antitrust injury. It requires: (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions.

Opinion

MEMORANDUM AND ORDER GRANTING DEFENDANTS' MOTIONS TO DISMISS (Docs. 18 and 20) AND DISMISSING CASE

I. Introduction

This is an action asserting antitrust and tort claims arising out of a bidding process which resulted in an award of a contract to provide auction services for Wayne County. Plaintiff Midwest Auto Auction, Inc. (Midwest) is suing defendants Boulevard & Trumball Towing (B&T), its subcontractor, Metro Auction Services (MAS), Wayne County, and Clarence McNeal (McNeal), the former Purchasing Director for Wayne County. Midwest generally claims violations of federal and state anti-trust law and tortious interference under state law. The First Amended **[*2]** Complaint (FAC) (Doc. 16), which runs 42 pages and 337 paragraphs, asserts the following fifteen claims, phrased by Midwest as follows:

Count I Restraint of Trade Resulting in Sherman Act, *15 U.S.C. §1, Et seq*, and Clayton Act *Section 12* Violations as to Defendant McNeal

Count II Unfair Trade Practices Resulting in Michigan Antitrust, *MCL 445.771 et seq* Violations as to Defendant Clarence McNeal
Count III Tortious Interference with an Advantageous Business Relationship or Expectancy as to Defendant Clarence McNeal
Count IV Civil Conspiracy as to Defendant Clarence McNeal

Count V Restraint of Trade Resulting in Sherman Act, *15 U.S.C. §1, Et seq*, and Clayton Act *Section 12* Violations as to Defendant County of Wayne

Count VI Unfair Trade Practices Resulting in Michigan Antitrust, *MCL 445.771 et seq* Violations as to Defendant County of Wayne

Count VII Restraint of Trade Resulting in Sherman Act, *15 U.S.C. §1, Et seq*, and Clayton Act *Section 12* Violations as to Defendant Metro Auction Services, Inc.

Count VIII Unfair Trade Practices Resulting in Michigan Antitrust, *MCL 445.771 et seq* Violations as to Defendant Metro Auction Services, Inc.

Count IX Defendant Metro Auction Services, Inc. Engaged in Predatory **[*3]** Pricing in Violation of Michigan and Federal Anti-Trust Laws
Count X Tortious Interference with an Advantageous Business Relationship or Expectancy as to Defendant Metro Auction Services, Inc.
Count XI Civil Conspiracy as to Defendant Metro Auction Services, Inc.

Count XII Restraint of Trade Resulting in Sherman Act, *15 U.S.C. §1, Et seq*, and Clayton Act *Section 12* Violations as to Defendant Boulevard & Trumbull Towing, Inc.

Count XIII Unfair Trade Practices Resulting in Michigan Antitrust, *MCL 445.771 et seq* Violations as to Defendant Boulevard & Trumball Towing, Inc.
Count XIV Defendant Boulevard & Trumball Towing, Inc. Engaged in Predatory Pricing in Violation of Michigan and Federal Anti-Trust Laws

Count XV Tortious Interference with an Advantageous Business Relationship or Expectancy as to Defendant Boulevard & Trumball Towing, Inc.

Before the Court are separate motions to dismiss by B&T and MAS (Doc. 20) [1] and Wayne County and McNeal (Doc. 18). Both motions raise essentially the same arguments. That is, that the FAC is subject to dismissal for failure to state a claim under *Rule 12(b)(6)* [2] because Midwest has not plead a plausible claim for antitrust injury. Defendants also contend that **[*4]** Midwest's tort claims fail to state a claim. In short, it is defendants' position that the FAC reveals nothing more than a disappointed bidder who seeks legal redress for its failed bid against its competitors, B&T and MAS, who were awarded the bid from Wayne County. The Court agrees. Accordingly, defendants' motions will be granted and this case will be dismissed.

II. Background/FAC

A. The Invitation to Bid

On February 11, 2010, Wayne County issued an Invitation to Bid for Vehicle and Equipment Auction Service (Invitation) for the "purpose of providing vehicle and equipment auction services for Wayne County DPS Equipment Division.". FAC at ¶ 28. Under the Invitation, Wayne County sought and received bids from five competing vendors for the towing and auctioning of surplus vehicles responsive to the bid. FAC at ¶ 64. Both Midwest and B&T submitted bids in response to the Invitation. FAC at **[*5]** ¶¶ 35, 38. There is no dispute that Wayne County ultimately accepted the lowest responsible bid. FAC at ¶ 39

The Invitation had several requirements relating to geographical distance, licensing, and experience. FAC at ¶ 30. For instance, Wayne County required bidders to have a location within 15-miles from Wayne County's equipment yard purportedly "to minimize costs associated with transportation of items and auctions." FAC at ¶ 32.

From Wayne County's perspective, it was important that the Invitation be competitively bid because the auction was generating revenue for it. A competitively bid contract assured Wayne County that compensation paid to the successful vendor is limited in an effort to generate the best net return. Section 8.01 of the Form Contract ("Contract") (included in the Invitation) defined vendor compensation under the Invitation as follows:

(1) a commission fee by Wayne County for auctioning services, from the auction proceeds;

(2) a buyer's commission charged by the vendor to a buyer at an auction; and

(3) transportation costs by Wayne County if a vehicle were to be towed from the County maintenance yard located on Goddard Road in Romulus.

See Wayne County's Ex. A at 13, **[*6]** App. C at 39. Although these are the only forms of "remuneration," to the successful bidder from Wayne County, the Invitation and Contract do not prohibit the vendor from charging other additional fees at the auctions.

The third form of remuneration, "transportation costs," had three elements: (1) towing hookup (price per hookup); (2) towing rate per mile; and (3) trailer hauling for larger vehicles. Id. at 39, App. C. In calculating each element, the Invitation relied on estimates. Wayne County's Ex. A at 7, 5. ("[t]he quantities indicated are reasonable approximates of the County's anticipate usage"). For instance, the Invitation estimated that Wayne County would haul vehicles about 3,000 miles over the three years of the contract. To minimize transportation costs, Wayne County's Department of Public Works (whose surplus vehicles were auctioned) wanted vendors to be within a 15 mile radius of its Goddard maintenance yard. Id. at 7, 2.

B&T's bid identified two possible locations in its bid, one at 7900 Dix Road inn Detroit, Michigan, which is within the 15 mile radius, and one just outside the radius at 2411 Vinewood, Detroit.

---

[1] B&T and MAS's motion is an amended motion to dismiss. They filed an initial motion to dismiss based on the original complaint. The amended motion is aimed at the FAC.

[2] B&T and MAS have also moved to dismiss for lack of subject matter jurisdiction due to lack of standing under *Fed. R. Civ. P. 12(b)(1)*.

The Invitation required bidders to submit pricing for two **[*7]** separate categories: Commission and Transportation Cost. See Ex. A, p. 4 to B&T and MAS's motion. Under the heading "Transportation Cost," the Invitation's price sheet had, among other things, one price line for "Towing Hookup" and one price line for "Towing Rate per mile." Id. at p. 39. Although the price sheet had just one line for "Towing Hookup," Midwest's bid apparently contained two prices for "Towing Hookup." FAC at ¶¶ 52, 53, 55. Indeed, Midwest bid $140.00 per tow for vehicles over 12,000 pounds, and $55.00 per tow for vehicles under 12,000 pounds). B&T's bid, unlike Midwest's, contained just one price for "Towing Hookup," $30.00, which was much lower than Midwest's bid. See Ex. B to B&T and MAS's motion, Official Bid Tabulation; FAC at ¶¶ 52, 53, 55.

According to Wayne County, section 1 is a standard provision in all of its Invitations and grants it discretion to review, accept and reject bids. Id. at 3-6. Paragraph of 10 of section 1 provides in relevant part:

> The County reserves the right to reject any or all bids, or to accept or reject any bid in part and to waive any minor informality or irregularity in bids received if it is determined by Purchasing Director that the **[*8]** best interest of the County will be served by doing so.

Id. at 4, 10.

B. The Bidding Process

When Wayne County issued its Official Bid Tabulation, it identified B&T as the lowest bidder, Martin's Towing & Auto Sales as the second lowest bidder, and Midwest as the third lowest bidder. FAC at ¶ 47; Ex. B. Wayne County used Midwest's price of $140.00 per tow in determining that the it was the third lowest bidder. B&T and MAS's Ex. B; FAC at . ¶¶ 47, 52. Midwest says that Wayne County miscalculated its bid. FAC at ¶ 47. However, Midwest also says that B&T submitted the lowest bid. FAC at ¶ 39.

In the Official Bid Tabulation, Wayne County deemed B&T as "non responsible" because it "exceeded 15 mile limit required in Invitation." B&T and MAS's Ex. B. Wayne County notified M&T of this on May 27, 2010. Initially, Wayne County intended to recommend non party, Martin's Towing & Auto Sales, for award of the Invitation's contract. FAC at ¶ 46.

On June 2, 2010, B&T filed a bid protest. FAC at ¶ 49; See Ex. C to B&T and MAS's motion. Wayne County Ordinance, § 120.161(a), provided for a formal protest procedure. [3]

The protest made two arguments. FAC at ¶ 49. First, B&T was "responsive" because its bid identified a location within the 15-mile exclusionary zone, B&T and MAS's Ex. C, pp.1-2. Second, B&T argued that the 15-mile exclusionary zone would not minimize Wayne County's transportation costs. According to B&T, mileage pricing, not geographical distance, proved more determinative for minimizing Wayne County's cost. FAC at ¶ 51; B&T and MAS's Ex. C, pp. 3-4, n 1-2.

On July 13, 2010, Wayne County, through McNeal, granted the protest, noting that it had overlooked the Dix Highway address which was within the geographical range. FAC at. ¶ 61; Letter, B&T and MAS's Ex. D (July 13, 2010). Wayne County then awarded the contract to B&T (the "Auction Contract"). FAC at ¶ 56.

Also, on July 13, 2010, Wayne County, through McNeal, wrote Midwest advising that it had accepted B&T's bid.

On October 21, 2010, the Wayne County Commission approved B&T as the vendor on **[*10]** the auction contract. See B&T and MAS's Ex. E, Minutes.

C. Midwest's Allegations of Wrongdoing in the Bidding Process

---

[3] While Midwest says it "made many unsuccessful attempts to contact [Wayne County] to object **[*9]** to and further discuss the discrepancy in the bid amounts," Midwest does not allege that it submitted a formal bid protest under Wayne County Ordinance § 120.161(a). Instead, Midwest says it made telephone calls to Wayne County. FAC at ¶¶ 48, 52.

Midwest says that Wayne County's decision to award the auction contract to B&T "suspicious" and "miraculous" because "the Invitation required the bidders storage yard and office to be within a 15 mile radius of the county's Goddard Road address." FAC at ¶ 62. As a result, Midwest asserts that B&T and MAS have generated "approximately $40,000" in revenue. FAC at ¶ 65. Midwest also says that "private consumers of auction services constitute less than 15% of the auction services market within the County of Wayne," governmental agencies constitute the majority of the auction services market, and B&T allegedly has a 75% share of this market in Wayne County. FAC at ¶¶ 66, 67. According to Midwest, B&T "in recent years . . . has obtained contracts to auction vehicles, trucks and equipment for the City of Detroit, the U.S. Marshalls (sic) Service, the FBI, the Michigan State Police, and the City of Hamtramck, among others." FAC at ¶ 67. Midwest also asserts that B&T drove its competitors out of Wayne County "contract-by-contract." FAC at ¶¶ 254, 321. Even though Midwest does **[*11]** not tow for the Detroit Police Department, Midwest says that B&T is "attempting to monopolize towing calls in the City of Detroit," and this leads to "an increase in the providing of auctioning services within the County of Wayne . . . [because] whenever a vehicle's owner does not retrieve the impounded vehicle, the vehicle is auctioned per City of Detroit Rules." FAC at ¶¶ 71-77.

Additionally, Midwest says that at the very first auction under the auction contract, B&T and MAS "charged multiple fees in an effort to recoup its losses that resulted from submitting a below average variable cost bid." FAC at ¶ 82. If these fees were added to B&T's bid, Midwest alleges it would have "greatly increased" B&T's bid. FAC at ¶ 83. Charging these alleged excess fees, Midwest says, "has caused a decrease in the number of potential buyers who attend the auctions." FAC at ¶ 89. "Ultimately the consumer Defendant Wayne County was damaged because the revenue it received from the auctions was far less than if Wayne County would have contracted with Plaintiff and/or one of the other bidders." FAC at ¶ 93.

Midwest essentially asserts the following "antitrust injuries:"

- Midwest and other bidders on the **[*12]** auction contract are being "forced out of the auctioning services industry";
- Wayne County is receiving substandard service and "the revenue generated is greatly reduced";
- the "potential purchasers of the auctioned vehicles . . . are forced to pay exorbitant fees";
- these purchasers have "been deprived of free and open competition in the auction service industry within the County of Wayne";
- "price competition between auction service providers has been restrained, suppressed, or eliminated";
- "pricing . . . has dropped below competitive levels."

See e.g., FAC at ¶¶ 210, 230, 252, 283, 302, 319.

III. Legal Standard

HN1[] A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the sufficiency of a complaint. To survive a *Rule 12(b)(6)* motion to dismiss, the complaint's "factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all of the allegations in the complaint are true." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 545, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. See also *Ass'n of Cleveland Fire Fighters v. City of Cleveland, Ohio, 502 F.3d 545, 548 (6th Cir. 2007)*. The court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* **[*13]** (internal quotation marks and citation omitted). Moreover, "[o]nly a complaint that states a plausible claim for relief survives a motion to dismiss." *Id. at 679*. Thus, "a court considering a motion to dismiss can choose to begin by identifying pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth. While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations. When there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement to relief." Id. In sum, "[t]o survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim for relief that is plausible on its face." *Id. at 678* (internal quotation marks and citation omitted).

HN2[] In ruling on a motion to dismiss, the Court may consider the complaint as well as (1) documents referenced in the pleadings and central to plaintiff's claims, (2) matters of which a court may properly take notice, (3) public documents, and (4) letter decisions of government agencies may be appended to a motion to dismiss. *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 127 S.Ct. 2499, 2509, 168 L. Ed. 2d 179 (2007)*. **[*14]** When standing is called into question, a court may consider matters outside of the pleadings. *Cleveland Branch, NAACP v. City of Parma, 263 F.3d 513, 524 (6th Cir. 2001)*.

Here, the FAC repeatedly refers to, and extensively relies upon, the Invitation and other documents. See FAC at ¶¶ 26, 28-32, 46. As such, the Court has considered these documents in ruling on the motions to dismiss.

IV. Analysis

A. Antitrust Injury

1.

All of the defendants argue that the antitrust claims asserted against them under Counts I, II, V, VI, VII, VIII, IX, XII, XIII, and XIV must be dismissed because Midwest has failed to allege an antitrust injury. The Court agrees. ***HN3***[] To maintain an action under the Sherman Act, a plaintiff must allege facts tending to show a critical "antitrust injury." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. An "antitrust injury" is a prerequisite to maintaining a claim under Section 1 and 2 of the Sherman Act, being *15 U.S.C. §§ 1*, *2*. *Indeck Energy Services, Inc. v. Consumers Energy Co., 250 F.3d 972, 978 (6th Cir. 2000)*. This Court has held that, to establish an antitrust injury, a plaintiff must plead: "(1) that the alleged violation tends to reduce competition **[*15]** in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions." *Baum Research and Development Co. v. Hillerich & Bradsby Co., 31 F. Supp. 2d 1016, 1022 (E.D. Mich. 1998)* (quoting *Tennessean Truckstop, Inc. v. NTS, Inc., 875 F.2d 86, 88 (6th Cir. 1989))*. Stated another way, a private antitrust plaintiff bringing suit under the Sherman Act must plead facts tending to show "antitrust injury," a concept akin to standing. [4] "A private antitrust plaintiff does not acquire standing merely by showing that he was injured in a proximate and reasonably measurable way by conduct of the defendant violating the antitrust laws." III Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 362a at 209-10 (1995). Midwest has not met this standard.

Midwest's claims under *Section 1 of the Sherman Antitrust Act* and the Michigan Antitrust Reform Act, *MCL § 445.772* (MARA) [5] are not plausible because Midwest has not alleged an antitrust injury to competition arising from

---

[4] B&T and MAS have moved to dismiss under *Fed. R. Civ. P. 12(b)(1)* based on Midwest's lack of standing. This argument is based on Midwest's failure to alleged an antitrust injury, which is not exactly the same as Article III standing. As the Court has explained:

> ***HN4***[] The related concepts of antitrust injury and antitrust standing are often confused. This confusion **[*16]** occurs because the two concepts "share a common ingredient." The common ingredient is that both requirements limit "recovery to those who have been injured by restraint on competitive forces in the economy." Any inquiry to determine whether antitrust injury has been shown is more limited than one to determine whether the plaintiff has standing. The single determinant of antitrust injury is whether the plaintiff has suffered an "injury the type the antitrust laws were intended to prevent and that flows from that which makes [a defendant's] act [ ] unlawful." On the other hand, even if an antitrust injury is shown sufficiently, standing may be denied on the basis of other factors. The purpose of the additional inquiries is to confine recovery to cases that promote the congressional intent to ensure that consumers receive the benefits of competitive markets.

Baum, 31 F. Supp. 2d at 1022 n. 6.

[5] Both Michigan and Federal courts have noted that MARA is patterned after the Sherman Act. ***HN5***[] "The Michigan antitrust act is patterned after the Sherman Antitrust Act, *15 U.S.C. § 1 et seq.*, and Federal court interpretations of the Sherman Act are persuasive authority as to the meaning of the Michigan act." *Goldman v. Loubella Extendables, 91 Mich.App. 212, 219, 283 N.W.2d 695 (1979)*. MARA "adopted language from and is interpreted consistent with the Sherman Act, *15 U.S.C. § 1*." *Perceptron, Inc. v. Sensor Adaptive Machs. Inc., 221 F.3d 913, 919 n. 6 (6th Cir. 2002)*. Thus, courts have applied the same analysis to claims under the Sherman Act and MARA.

B&T and MAS's submitting of the lowest bid in response to the Invitation. Midwest **[*17]** has not asserted that B&T's alleged collusion with Wayne County reduced competition in the relevant market and that its injury resulted from this decrease in competition. Instead, Midwest claims economic injury to itself and competitors as a result of not receiving the Auction Contract. See FAC at ¶¶ 64-65. Courts have made clear that the antitrust laws are designed for "the protection of competition, not competitors." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488-89, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (emphasis in original).

A careful review of the FAC reveals that there **[*18]** is little specificity in the allegations of the FAC. For the most part, the allegations are general and do not cite to any document supporting them. An example is paragraph 90 which consists of a charts which purports to compare vehicle sale prices at an auction run by B&T and one run by Midwest. However, there is no information as to date, time, place of the described auctions or as to a buyer. There are no exhibits attached to the FAC.

2.

Although Midwest contends otherwise, its antitrust claims are based on its status as a disappointed bidder. The Sixth Circuit has rejected this kind of claim. In *Expert Masonry v. Boone County, 440 F. 3d 336, 346 (6th Cir. 2006)*, the plaintiff, Expert Masonry, sued the defendant, Boone County Fiscal Court, over its award of two construction contracts to co-defendants (collectively DSM). The bid instructions stated that "[defendant] reserved the right 'to reject any or all Bids,' and that [defendant] 'shall have the right to waive informalities and irregularities in a Bid received and to accept the Bid which, in [defendant's] judgment, is in [defendant's] own best interest." *Id. at 349*. Plaintiff, the second lowest bidder, challenged the bidding process **[*19]** claiming that DSM did not meet the bid specifications as it relates to bonding, while plaintiff met this requirement for both bids. Defendant concluded that DSM's bid was sufficient and awarded the contract to it. Plaintiff sued defendant and DSM alleging antitrust violations. The district court dismissed the claims.

The Sixth Circuit affirmed the dismissal on the grounds that the allegations failed to allege an antitrust injury. The court of appeals "decline[d] to extend ***HN6***[] antitrust liability to give succor to dejected buyers or sellers who simply allege that one buyer and one seller colluded to reach a deal that may or may not have been inferior to the deal offered by the disappointed party." *Expert Masonry, 440 F.3d at 348*. The court of appeals also noted that "[i]t is clear that the injury alleged here has not been previously found to be a cognizable antitrust violation under the Sherman Act in analogous situations." *Id. at 346* (citing *Ace Beer v. Kohn, 318 F.2d 283, 287 (6th Cir. 1963))*. The Sixth Circuit explained:

> [I]n the absence of a showing of market power or some other convincing rationale, we decline to extend antitrust liability to give succor to dejected buyers and sellers **[*20]** who simply allege that one buyer and one seller colluded to reach the deal that may or may not have been inferior to the deal offered by the disappointed party.

Id. at 348. The court of appeals further stated that ***HN7***[] "parties may break a host of state or federal laws and regulations in making a side deal or in otherwise circumventing the bidding process in reaching a final arrangement, but they do not breach *Section 1 of the Sherman Act* where the alleged vertical agreements involve only one buyer and one seller." Id. Without a showing that a judgment in favor of the plaintiff-competitor will confer some benefit on market consumers, it is presumed that antitrust injury is lacking.

Midwest's allegations, fairly read, are virtually no different than those in Expert Masonry. Like Expert Masonry, where the disappointed bidder claimed that the successful bidder on a county contract failed to meet the bid specifications, Midwest's FAC alleges that B&T and MAS failed meet the Invitation specifications. The entire premise for Midwest's Section 1 claim is that B&T was not within 15-miles from Wayne County's equipment yard, contrary to the Invitation's requirement. FAC at ¶¶ 30, 32, 40, 49, 62, 64, **[*21]** 100, 143, 260, 327. As in Expert Masonry, where the bid specifications permitted BCFC to reject "any and all bids" or to "waive irregularities," *440 F.3d at 349*, the Invitation in this case granted Wayne County the same authority. Wayne County, however, did not need to waive irregularities because, after receiving the protest, it determined that B&T was a responsible bidder.

While Midwest alleges that the bidding process was "designed to eliminate or destroy competitors and further B&T's attempted monopoly," FAC at ¶ 115, it was the increase in competition which caused the underlying harm. Notably, the purported injury occurred only after Wayne County re-evaluated B&T's bid and award the Auction Contract to B&T. In other words, the competitive bid process allegedly caused the injury. Thus, the main thrust of the FAC - Midwest's inability to compete in the auction services industry stemming from Wayne County's award of the Auction Contract to a competitor - lacks the "necessary predicate." Although Midwest alleges that the bidding process was "designed to eliminate or destroy competitors and to further B&T's attempted monopoly," it was the increase in competition which caused the underlying **[*22]** harm. FAC at ¶ 115. Midwest alleges injury to itself only after Wayne County re-evaluated and awarded B&T the contract. Therefore, the competitive bid process, and nothing else, caused the alleged injury.

The FAC makes clear that resulting injury was to Midwest and its competitors, not to competition:

> As a result of B&T's below average variable cost bid, and McNeal's manipulation of Plaintiff's bid, Martin's Towing, Plaintiff Midwest, A-1 Auto Auction, Inc., Manheim Auctions Government Services, LLC and any other auctioning company that because it was outside of the 15 mile radius did not bid on the contract, as competitors of B&T and MAS, were damaged because of the lost opportunity to provide these auctioning services within the County of Wayne.

FAC at ¶ 64. Paragraph 65 echoes this allegation and asserts that Midwest's business would benefit from the contract: "Had Plaintiff been awarded the Wayne County contract, its revenue would have been enough to sustain its workforce." Id. 65. These allegations fail to make the critical distinction between conduct that injures competition and conduct which injures competitors. The latter injury is not actionable as an antitrust claim. See *Richter Concrete Corp. v. Hilltop Concrete Corp., 691 F.2d 818, 825 (6th Cir. 1982)*. **[*23]** To be sure, the very nature of competitive bidding results in 1 winner and many losers. Midwest, as a disappointed bidder, has not suffered an injury cognizable under the Sherman Act.

B. Adverse Effect on the Market

Defendants also contend that the FAC fails to properly allege an adverse effect on the relevant market. The Court agrees. Midwest has not plead any such harm. According to Midwest, in the alleged market of auction services, the buyer, Wayne County, paid less to B&T than the amount Midwest bid. Wayne County paid less to B&T in transportation costs (B&T bid $5,250 compared to Midwest's initial and unchanged bid of $11,625) and slightly less in commission to B&T (3% versus 4% offered by Midwest). In short, Wayne County is the consumer who chose the lowest bidder. "If no consumer interest can be discerned even remotely in a suit brought by a competitor-if, as here, a victory for the competitor can confer no benefit, certain or probable, present or future, on consumers-a court is entitled to question whether a violation of ***antitrust law*** is being charged." *Brunswick Corp. v. Riegel Textile Corp., 752 F.2d 261, 266-67 (7th Cir. 1984)*.

However, Midwest alleges that Wayne County, as **[*24]** the consumer, was injured as a result of B&T's "exorbitant fees." This argument is misplaced. First, as described above, Wayne County pays the vendor in only two ways: (1) commissions from auction proceeds; and (2) transportation costs. The terms of the auction contract defined what Wayne County pays the vendor, and did not expressly prohibit the vendor from charging additional fees at the auctions. If the vendor charged "exorbitant fees" which materially impact its contractual performance (i.e., reduce attendance and in turn revenue), Wayne County may pursue a contractual remedy against the vendor. See *Nynex Corp. v. Discon, 525 U.S. 128, 137, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)* (other remedies for various "competitive practices thought to be offensive to proper standards of business morality"). However, Midwest was not a party to the auction contract and is therefore unable to raise or allege injury to Wayne County. Second, even assuming the fees are exorbitant and Wayne County's revenues from the contract decline, the next time it comes up for bid Wayne County may look for a different vendor. Third, there is no allegation that the reduced revenue is otherwise harming competition in the auction industry services. **[*25]** Wayne County is still receiving revenue and there is no allegation that other consumers (i.e. other governmental entities) were also being harmed.

C. Twombly/Iqbal Deficiencies

Defendants also contend that the FAC fails to allege a plausible claim for relief under the antitrust laws, particularly *§ 1 of the Sherman Act*. Section 1 provides, in pertinent part, that ***HN8***[] "[e]very contract, combination ..., or conspiracy, in restraint of trade or commerce among the several States ... is hereby declared to be illegal." *15 U.S.C. § 1*. Section 1 prohibits a small category of agreements that have been found to be per se illegal, and ***HN9***[] courts analyze all other alleged restraints on trade under the "rule of reason," which as its name suggests, "requires the factfinder to decide whether under all circumstances of the case the restrictive practice imposes an unreasonable restraint on competition." Id.

As an initial matter, although Midwest has not argued that the alleged violations are per se illegal or must proceed under the rule of reason analysis, the alleged actions are not per se illegal in the antitrust context. ***HN10***[] Per se violations arise from "'[a]greements or practices which because of their pernicious **[*26]** effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.' " *Foundation for Interior Design Educ. Research v. Savannah Coll. of Arts & Design, 244 F.3d 521, 529 (6th Cir. 2001)* (quoting *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S.Ct. 514, 2 L.Ed.2d 545 (1958))*. Instead of a per se violation, defendants' actions are best described as a "vertical restraint on trade," that is, not a horizontal agreement between competitors, but a "combination[ ] of persons at different levels of the market structure, such as manufacturers and distributors." *Bailey's, Inc. v. Windsor Am., Inc., 948 F.2d 1018, 1027 (6th Cir.2001)* (citation omitted).***HN11***[] "Vertical restraints on trade are examined under a rule of reason analysis unless they include some agreement on price or price levels." *Ezzo's Invs., Inc. v. Royal Beauty Supply, Inc., 243 F.3d 980, 987 (6th Cir. 2001)*.

In order ***HN12***[] to show that a vertical restraint on trade violates the rule of reason and *Section 1 of the Sherman Act*, a plaintiff must show:

> (1) that the antitrust defendant **[*27]** contracted, combined, or conspired; (2) that the combination or conspiracy produced adverse anticompetitive effects (3) within relevant product and geographical markets; (4) that the objects of and conduct pursuant to that contract or conspiracy were illegal; and (5) that the plaintiff was injured as a proximate result of that conspiracy.

International Logistics Grp., Ltd. v. Chrysler Corp., 884 F.2d 904, 907 (6th Cir.1989) (citing *Crane & Shovel Sales Corp. v. Bucyrus-Erie Co., 854 F.2d 802, 805 (6th Cir.1988)*).

There are no specific factual allegations in the FAC showing the plausibility of a bid rigging conspiracy. The pertinent paragraphs in the FAC as to Wayne County and McNeal are:

> 57: "Defendants B&T and MAS, through its varied Fiore representatives, had numerous opportunities to conspire, contract, and combine with Defendant McNeal.
> 58: Defendant McNeal is available via "direct dial telephone"; "internet"; "signed letters"; and "in direct contact with other co-conspirators within Wayne County (i.e., Robert Futuna . . . Benny Napolean)";
> 59: B&T "heavily donate" to Futuna and Napolean's "election efforts"; and
>
> 60: Futuna and Napolean "had numerous opportunities" to conspire with B&T, **[*28]** its owners and McNeal at "varied . . . events (i.e., birthday parties, election parties, campaign fundraisers, and charity events like the annual Easter egg hunt)."

Conclusory allegations of "numerous opportunities" do not pass muster under the pleading requirements under *Twombly* and *Iqbal*. Given the importance of the underlying agreement to a viable Section 1 claim, the Supreme Court in Twombly highlighted an important distinction between "lawful parallel conduct" and "unlawful agreements." "It makes sense to say . . . that an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556-57*. Where, as here, allegations of parallel conduct are set out in order to establish a Section 1 claim, "they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." Id.

The FAC and associated documents shows separate, independent conduct. Wayne County rejected B&T's bid in writing, **[*29]** and only reconsidered it based on B&T's formal written bid protest. The fact, as alleged by Midwest, that Wayne County initially rejected B&T's bid and only reconsidered it based on a written, formal bid protest evidences separate, parallel conduct by B&T and Wayne County:

> On the official bid chart, Defendant B & T was identified as being non-responsible because its location as tabulated from 2411 Vinewood exceeded the 15 mile limit requirement. FAC at ¶ 40.
>
> On or about May 27, 2010, Defendant County determined that Martin's Towing was the successful bidder . . . ." FAC at ¶ 46.
>
> Upon further inspection, Plaintiff discovered that Defendant County . . . incorrectly tabulated its bid. FAC at ¶ 47
>
> On or about July 12, 2010, Defendant County sent out a letter confirming that it reevaluated the bids and that Defendant B & T would be the lowest responsive and responsible bidder. FAC at ¶ 61

These allegations do not describe any direct conduct between B&T and **[*30]** Wayne County which could plausibly suggest anticompetitive behavior. Without more,***HN13***[] parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556-557*.

Moreover, the Sixth Circuit has rejected a plaintiff's effort to survive a *Rule 12(b)(6)* challenge by pleading ***HN14***[] an "opportunity to conspire." See *In re Travel Agent Com'n Antitrust Litigation, 583 F.3d 896, 905 (2009)* (the amended complaint "aver[s] only an opportunity to conspire, which does not necessarily support an inference of illegal agreement . . . [and] plaintiffs' attempt to distinguish Twombly on the basis that plaintiffs allege 'actual agreement' fails.") (emphasis added). "Numerous opportunities" are not sufficient. Indeed, Midwest's allegations of parallel conduct do not possibly suggest an illegal agreement because "it was not only compatible with, but indeed [is] more likely explained by, lawful unchoreographed free-market behavior." *Twombly, 550 U.S at 556-557*.

C. Predatory Pricing

Counts IX and XIV assert claims against B&T and MAS for predatory pricing. B&T and MAS argue that these claims must **[*31]** be dismissed because they are not properly plead. [6] Although the FAC cites *Section 1 of the Sherman Act* "et. seq." It is assumed that Midwest makes a claim under *Section 2* of the Sherman Act for attempted monopolization which encompasses a predatory pricing claim. "***HN15***[] *Section 2* of the Sherman Act makes it unlawful to 'monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations.' " *Pacific Bell Telephone Co. v. Linkline Communications, Inc., 555 U.S. 438, 447, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)* (quoting *15 U.S.C. § 2*). Liability under *§ 2* is not premised merely on the existence of monopoly power. As the Supreme Court explained in Pacific Bell, "[s]imply possessing monopoly power and charging monopoly prices does not violate *§ 2*; rather, the statute targets 'the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.' " *Id. at 447-48* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*); see also, *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. **[*32]** Thus, ***HN16***[] to establish a claim of attempted monopolization under *§ 2*, a plaintiff must allege and prove "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*.

One way in which an antitrust plaintiff may establish the first element is by showing that the defendant engaged in a practice of predatory pricing, that is, offering "Below-cost prices that drive rivals out of the market and allow the monopolist to raise its prices later and recoup its losses." *Pacific Bell, 555 U.S. at 448*. "In a typical predatory-pricing scheme, the predator reduces the sale price of its product (its output) to below cost, hoping to drive

[6] B&T and MAS also contend that to the extent Midwest brings these claims under *15 U.S.C. § 13a*, they must be dismissed because ***HN17***[] no private cause of action exists under this section.

competitors out of business. Then, with competition vanquished, the predator raises output prices to a supracompetitive level." *Weyhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 318, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* (citing *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 584-85 n. 8, 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986))*. **[*33]** In order for a predatory pricing "scheme to make economic sense, the losses suffered from pricing goods below cost must be recouped (with interest) during the supracompetitive-pricing stage of the scheme." Id. Thus, the Supreme Court has "established ***HN18***[] two prerequisites to recovery on claims of predatory pricing." Id. " 'First, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs." Id. (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 113 S.Ct. 2578, 125 L.Ed.2d 168 (1993))*. This showing is required, the Supreme Court explained, because " 'as a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control,' " and because courts must be "particularly wary of allowing recovery for above cost price cutting" which would "perversely, 'chill legitimate price cutting' which directly benefits consumers." *Id. at 319* (quoting *Brooke Group, 509 U.S. at 223-24*). **[*34]** Second, to establish a predatory pricing claim, "a plaintiff must demonstrate that 'the competitor had ... a dangerous probabilit[y] of recouping its investment in below-cost prices.' " *Id. at 318-19* (quoting *Brooke Group, 509 U.S. at 224*) (alteration by Court). This element is necessary because "without a dangerous probability or recoupment, it is highly unlikely that a firm would engage in predatory pricing.' Id. The Supreme Court has described these two prerequisites to a predatory pricing claim as " 'essential components of real market injury' that [are] 'not easy to establish." *Id. at 320* (quoting *Brooke Group, 509 U.S. at 226*). The Supreme Court has also cautioned ***HN19***[] courts to analyze predatory pricing claims rigorously, explaining that "the costs of erroneous findings of predatory-pricing liability [are] quite high because 'the mechanism by which a firm engages in predatory pricing-lowering prices-is the same mechanism by which a firm stimulates competition,' and, therefore, mistaken findings of liability would 'chill the very conduct the antitrust laws are designed to protect." Id. (quoting *Brooke Group, 509 U.S. at 226*) (in turn quoting *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 122 n. 17, 107 S.Ct. 484, 93 L.Ed.2d 427 (1986))*.

Midwest **[*35]** alleges that B&T submitted a bid that was below B&T's average variable cost in response to the Invitation and, to recoup its losses, charged additional, "undisclosed fees" ("Unlisted Fees") that "violate the provisions of the Invitation". FAC at ¶¶ 82, 86, 97, 99. However, Midwest does not cite to any portion of the Invitation that prohibits the unlisted fees, nor offer any explanation to rebut defendants' position that the Invitation does not expressly prohibit the vendor from charging additional fees at the auctions. In short, these allegations do not support a predatory pricing claim.

The FAC, fairly read, demonstrates that B&T and MAS never incurred a loss through predation, as B&T/MAS charged the unlisted fees at the very first auction and every auction thereafter. See FAC at ¶¶ 79, 82, 96-99. Midwest has not plead that B&T/MAS had sales below their measure of costs, then subsequently raised prices to recoup its losses. Midwest also has not alleged that B&T/MAS's fees qualify as supracompetitive monopoly pricing as required to maintain a claim for predatory pricing. ***HN20***[] In a predatory pricing case, "the plaintiff must demonstrate that there is a likelihood that the predatory scheme **[*36]** alleged would cause a rise in prices above a competitive level that would be sufficient to compensate for the amounts expended on the predation." *Brooke Group Ltd, 509 U.S. at 225-6*. The FAC fails to allege that the unlisted fees, combined with B&T/MAS' commission pricing, are priced above a competitive level. Merely charging additional prices is insufficient; the predator must charge supracompetitive prices that only a monopolist can charge because the competition has disappeared. See *Weyhauser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 318, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)*.

HN21[] In analyzing a predatory pricing claim, the Sixth Circuit requires a court to examine a defendant's "overall" pricing scheme within a particular market to determine if a price is below the average variable cost. While Midwest alleges that B&T/MAS have monopolized, or attempted to monopolize, the relevant market through obtaining contracts with 6 different governmental agencies, Midwest alleges only "occasional" below average variable cost pricing. FAC at ¶ 67. This is insufficient.

Moreover, the so called unlisted fees are within the relevant market. Midwest says the relevant market in this case is the "auction services market" **[*37]** within Wayne County. In servicing a single contract within this market, Midwest alleges that B&T charges the unlisted fees to purchasers of the vehicles. These unlisted fees, however, are within the relevant product market of auction services. In *Directory Sales Management Corp. v. Ohio Bell Telephone Co., 833 F.2d 606, 613 (6th Cir. 1987)*, the Sixth Circuit held that the plaintiff's predatory pricing claim must fail because the plaintiff was unable to show that the defendant's pricing mechanism produced a loss to the defendant's "operations taken as a whole." Like Directory Sales, where the plaintiff alleged that the Yellow Pages was the relevant product market and the defendant's offer of a free initial listing constituted predatory pricing, Midwest here alleges that the relevant market is providing "auction services" and B&T's towing rate is predatorily low. Because the relevant market here is "auction services," the appropriate inquiry is to consider B&T's "operations taken as a whole." B&T's towing rate, commission charges and the unlisted fees are not separate product markets, just as the Yellow Pages market was not different from the first listing market in Directory Services.

In **[*38]** *Spirit Airlines v. Northwest Airlines, 431 F.3d 917 (6th Cir 2005)*, the Sixth Circuit held that leisure or price sensitive travelers could be considered a separate market from "local or connecting" passengers with respect to the Detroit-Boston and Detroit-Philadelphia flights. The plaintiff claimed that the defendant engaged in predatory pricing that targeted the price sensitive customer, meaning that the price sensitive customer was the relevant market. The defendant argued that the market was broader than just price sensitive customers, and relied upon the holding in Directory Sales in urging the district court to consider the defendant's overall costs for these two flights in analyzing whether it engaged in predatory pricing. Since the defendant made a profit on these two routes, it argued that it did not engage in predatory pricing. The district court agreed. The Sixth Circuit, however, reversed and held that it was reasonable for the trier of fact to conclude that there were two distinct markets, one for the price sensitive customer and another market for other customers. Therefore, in determining if the defendant engaged in predatory pricing, the district court should only consider **[*39]** the defendant's costs with respect to the price sensitive customer.

Here, Midwest's predatory pricing claims are factually distinguishable from *Spirit Airlines*. Midwest has claimed that there is only one market, being the market for auction services. The plaintiff in Spirit Airlines argued that there were two separate and distinct markets. The unlisted fees, as well as the tow rate and commission charges, are part of B&T and MAS's overall pricing within the auction services market. Moreover B&T and MAS, unlike the defendant in Spirit Airlines, never increased prices once competition (e.g. Midwest) was purportedly destroyed, as the unlisted fees were charged at the very first auction and every auction thereafter. See FAC at ¶¶ 79, 82, 96-99.

Finally, ***HN22***[] occasional low pricing is not sufficient to allege an antitrust injury due to predatory pricing. Midwest argues that it has adequately alleged an antitrust claim because it has alleged that "After being awarded the contract; and once becoming the only vendor to provide the services, Defendants B&T/MAS charged the consumers multiple undisclosed fees." Midwest Resp., p. 11, citing FAC at ¶¶ 82, 91. The FAC also identifies six government agencies **[*40]** that B&T alleges services, yet fails to allege that B&T/MAS has engaged in predatory pricing with respect to these agencies. FAC at ¶ 67. ***HN23***[] Courts are skeptical of a plaintiff's attempt "to prove predatory pricing through evidence of a low price charged for a single product out of many, or to a single customer." *Ponder v. Morgan, 892 F.2d 1355, 1362 (8th Cir. 1989)*, citing *Directory Sales, 833 F.2d at 614*; see also *Ramallo Bros. Printing, Inc. v. El Dia, Inc., 392 F. Supp. 2d 118, 140 (Dist. Ct. P.R. 2005)* ("Predation claims cannot be based on occasional instances of allegedly predatory pricing, because they are not likely to drive rivals from the market and to permit the predator to raise prices and profits subsequently. A predatory pricing plaintiff can prevail only by adducing evidence suggesting defendants' overall price structure was predatory, not that a small minority of sales were below average variable cost."). Here, Midwest has alleged B&T and MAS engaged in predatory pricing on but a single contract with Wayne County. Midwest has not alleged that B&T/MAS obtained their purported 75% market share through predatory pricing and subsequent recoupment, or that B&T achieved this **[*41]** purported market share through predatory pricing.

Overall, Midwest has failed to plead a plausible claim for predatory pricing. Counts IX and XIV must therefore be dismissed.

D. State Action Doctrine

Defendants also argue that even if Midwest had properly plead antitrust claims, they are entitled to immunity from these claims under the state action doctrine. While defendants spend a good deal of time on this argument, the Court declines to address it in light of concluding that Midwest has failed to allege any plausible antitrust claims, however well-taken the argument may be.

D. Tort Claims

1.

Defendants also argue that Midwest's tort claims under Counts III, X and XV alleging tortious interference with a business relationship or expectancy fail.

Count III alleges that McNeal, Wayne County's former Purchasing Director, is liable for tortious interference with a business expectancy. Wayne County and McNeal argue that this claim must be dismissed because: (1) the business relationship must be more than a mere expectancy; and (2) a party cannot tortiously interfere with its own contract and/or business expectancy. A competitive bid process does not rise to the requisite level of a business **[*42]** expectancy, and Midwest has not alleged that McNeal was a "third party" to the business relationship. *Dzierwa v. Michigan Oil Co., 152 Mich. App. 281, 287, 393 N.W.2d 610 (1986)*. The Court agrees.

In order ***HN24***[] to establish a claim for tortious interference with a business relationship or expectancy under Michigan law, the plaintiff must show (1) the existence of an advantageous relationship with a third party of which the defendant is aware, (2) with which the defendant intentionally and improperly interferes, (3) resulting in a termination of the relationship or expectancy, and (4) causing damage to the party whose interest has been terminated. *Mino v. Clio School District, 255 Mich. App. 60, 78, 661 N.W.2d 586 (2003)*. "One who alleges tortious interference with a . . . business relationship must allege the intentional doing of a per se wrongful act or the doing of a lawful act with malice and unjustified in law for the purpose of invading the . . . business relationship of another." *CMI Int'l, Inc v. Intermet Int'l Corp., 251 Mich. App. 125, 131, 649 N.W.2d 808 (2002)* (citation omitted).

Here, there are no circumstances under which Midwest can plausibly plead that the business expectancy at issue, a competitively bid county contract, **[*43]** was more than "wishful thinking." *Trepel v. Pontiac Osteopathic Hospital, 135 Mich. App. 361, 377, 354 N.W.2d 341 (1984)*. Midwest has not alleged that there was a reasonable probability it was going to receive the contract. As described above, Wayne County had discretion under the Invitation to accept or reject, in whole or in part, any aspect of the bids. As such, McNeal was well within this discretion when he adjusted Midwest's bid. Midwest has therefore failed to plead a reasonable expectation or probability it was going to be awarded the bid.

Second, a contracting party may not be held liable in tort for interfering with his or her own contract. *Reed v. Michigan Metro Girl Scout Council, 201 Mich. App. 10, 506 N.W.2d 231 (1993)*. "[I]t is now settled law that corporate agents are not liable for tortious interference with the corporation's contracts unless they acted solely for their own benefit with no benefit to the corporation." *Id. at 13* (emphasis added).

While Midwest alleges generally that McNeal received improper consideration and acted outside the scope of his authority, FAC at ¶ at 146, 147, these allegations are conclusory and lack specific factual underpinning. Further, the sole personal benefit alleged **[*44]** in paragraph 145 of the FAC is McNeal's promotion. But other than timing, there is no alleged corollary between the alleged conduct and McNeal's promotion. This is simply insufficient. Finally, by accepting the lowest, responsive bid after B&T's bid protest, McNeal acted pursuant to Wayne County's best interests.

Overall, Midwest has not stated a claim for tortious interference with a business expectation stemming from McNeal's actions. Count III must be dismissed.

Regarding B&T and MAS, which are the subject of Counts X and XV, Midwest's claims falls short. As B&T and MAS point out, the Michigan Court of Appeals has held that***HN25***[] a disappointed bidder on a public contract lacks standing to sue for tortious interference. *Groves v. Dept. of Corrections, 295 Mich. App. 1, 811 N.W.2d 563 (2011)*.

The FAC alleges that Midwest had a valid business expectancy with respect to the Invitation, because it was purportedly in a position to obtain the Auction Contract but for the actions of the defendants. FAC at ¶¶ 259, 260, 326, 327. However, as a disappointed bidder on a public contract, Midwest does not have a valid expectancy. "Indeed, where the government has a great deal of discretion to choose its contractors, **[*45]** a bidder has no expectancy in the contract to be awarded." *Groves, at 5*. Only allegations of fraud, abuse, or illegality provide the basis for a court to review the public bidding process, but only the proper public official may bring such an action. *Id. at 7* (citation omitted).

Here, Wayne County had broad discretion as the Invitation provided Wayne County the right to accept or reject any and all bids. If fraud, abuse, or illegality had actually occurred, that cause of action belonged to Wayne County, not Midwest. Accordingly, Midwest has not stated a claim for tortious interference against B&T or MAS. In other words, because Wayne County is both a governmental entity and is required, as a result of its operating structure, to exercise a great deal of discretion in selecting the lowest responsible bidder, Midwest cannot plausibly have an expectancy interest in the contract at issue. Midwest has therefore failed to state a claim for tortious interference against defendants.

2.

Midwest alleges a civil conspiracy under Counts IV (against McNeal) and XI (against MAS). ***HN26***[] In Michigan, a claim for conspiracy depends on an underlying viable tort claim. *Cleary Trust v. Edward-Marlah Muzyl Trust, 262 Mich.App. 485, 508, 686 N.W.2d 770 (2004)*. **[*46]** Because Midwest has not alleged a valid claim for tortious inference, the civil conspiracy claim stands alone. As such, Midwest's civil conspiracy claims must be dismissed.

E. Midwest's Arguments

In response to defendants' motions, Midwest makes several arguments, the majority of which have already been discussed. Briefly, Midwest says that it has alleged an antitrust injury. Midwest has conflated antitrust injury and antitrust standing. As this Court has noted and stated above "[t]he related concepts of antitrust injury and antitrust standing are often confused." *Baum Research & Dev. Co. v. Hillerich & Bradsby Co., 31 F. Supp. 2d 1016 (E.D. Mich. 1998)*. ***HN27***[] There is a two-prong test for antitrust injury. It requires: "(1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions." *Tennessean Truckstop, Inc. v. NTS, Inc., 875 F.2d 86, 88 (6th Cir. 1989)*.

Midwest also argues that it is sufficient, under Twombly and Iqbal, to simply give notice of potential opportunities to conspire to state an antitrust claim. Not so. The gravamen **[*47]** of Midwest's allegations suggesting the existence of a conspiracy by defendants to violate the antitrust laws are as follows:

• McNeal's direct dial telephone which was available on the internet. FAC at ¶ 57;

• Futuna and Napoleon having direct access to McNeal as an employee of Wayne County. FAC at 58; and

• Futuna and Napoleon attending events with the vari[ous] Fiore representatives [related to defendant B&T and MAS] like birthday parties, election parties, campaign fundraisers and charity events like the annual Easter egg hunt.

Midwest relies on *Buddie Contracting v. Seawright, 595 F. Supp. 422 (N.D. Ohio 1984)* to argue it has alleged an antitrust claim. Midwest's reliance is Buddie is misplaced. It was decided before Tennessean Truckstop and makes the now inaccurate statement that ""[t]he terms antitrust injury and antitrust standing are used almost interchangeably in this area of law. For ease of reference, the Court will phrase its discussion of these terms as 'antitrust standing.'" *Id. at 432*. Moreover, *Buddie* is factually distinct. In Buddie, a grand jury indicted a government agent, the successful vendor, and its president for actions taken during the award of a contract. All **[*48]** of them plead guilty to having an unlawful interest in a public contract. Faced later with antitrust claims, the district court held that tampering with the bidding process can result in liability. Unlike the complaint in Buddie, which contained detailed factual allegations based on the criminal case, the FAC contains no specific allegations against defendants to confer antitrust liability.

Similarly, in *In re Polyurethane Foam, 799 F. Supp. 2d 777 (N.D. Ohio 2001)*, which Midwest also cites, the district court relied heavily on "specific admissions . . . [extracted from a governmental investigation] that directly support[ed] the existence of a conspiratorial agreement." *Id. at 782*.

The Court's analysis set forth above demonstrates that Midwest has not plead an antitrust injury. Midwest only alleges that itself and other competitors were harmed by B&T being awarded the contract after a competitive bid process. There are no allegations of reduced competition in the alleged market of the "auction services industry" (i.e. that there are fewer competitors submitting bids for publicly bid contracts). The only allegation of injury is Midwest's alleged financial losses because it was not the **[*49]** lowest bidder. Midwest has not plead any injury resulting from a decrease in the alleged auction services industry. Rather, Midwest's concerns stem from competition between the two companies-with Wayne County in the middle.

V. Conclusion

In the end, this case is about a disappointed bidder on a single contract. The contract went to the lowest bidder, a competitor. This is not an antitrust case and the defendants did not engage in tortious or otherwise unlawful conduct. The FAC fails to plead any plausible claims for relief based on the alleged conduct. Accordingly, defendants' motions to dismiss are GRANTED. This case is DISMISSED.

SO ORDERED.

Opinion

MEMORANDUM & ORDER

GOLD, STEVEN M., U.S.M.J.:

Now pending before the Court is a motion for summary judgment brought by defendants seeking dismissal of Robinson-Patman Act claims asserted by twenty-eight plaintiffs. Docket Entry 677. The parties have consented to have defendants' motion decided by the undersigned Magistrate Judge. Docket Entry 683. For the reasons stated below, defendants' motion is granted.

This complex, long-pending antitrust litigation has been the subject of numerous written decisions by various courts. A sampling of those decisions is listed in *Drug Mart Pharmacy Corp. v. Am. Home Prods. Corp., 472 F. Supp. 2d 385, 390 (E.D.N.Y. 2007)*.[1] Accordingly, familiarity with the facts and procedural background of the case is presumed, and is **[*3]** reviewed here only briefly.

In short, plaintiffs are a number of individually-owned retail pharmacies.[2] Plaintiffs allege that defendants, five manufacturers of brand name prescription drugs ("BNPDs"), offered discounts and rebates to plaintiffs' competitors but not to plaintiffs, and that this constitutes price discrimination in violation of the Robinson-Patman Act.

BACKGROUND

A. Early Procedural History

At the beginning of this case, a variety of plaintiffs including chain stores as well as individually-owned retail pharmacies brought antitrust claims under both the Robinson-Patman Act, *15 U.S.C. § 13*, and the Sherman Act, *15 U.S.C. § 1*. The case was consolidated for all pretrial purposes as a multi-district litigation in the Northern District of Illinois. Def. R.56.1 ¶ 10. *See also In re Brand-Name Prescription Drugs Antitrust Litig., 264 F. Supp. 2d 1372 (Jud. Pan. Mult. Lit. 2003)*.

---

[1] *See also Drug Mart Pharmacy Corp. v. Am. Home Prods. Corp., 378 F. Supp. 2d 134 (E.D.N.Y. 2005)*; *In re Brand-Name Prescription Drugs Antitrust Litig., 264 F. Supp. 2d 1372 (Jud. Pan. Mult. Lit. 2003)*; *In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599 (7th Cir. 1997)*; *In re Brand Name Prescription Drugs Antitrust Litig., 1994 U.S. Dist. LEXIS 7146, 1994 WL 240537 (N.D. Ill. May 27, 1994)*.

[2] Plaintiffs originally consisted of 3,700 retail pharmacies operating at 3,987 locations. Def. R.56.1 ¶ 9, Docket Entry 679; Pl. R.56.1 ¶ 9, Docket Entry 685. As of March, 2010, 894 retail pharmacies remained as plaintiffs pursuing damages. Docket Entry 615. In June 2010, plaintiffs stipulated to the dismissal of claims by 3,101 pharmacy locations. Docket Entry 626.

The five defendants remaining in the action are (1) Abbott Laboratories, (2) Johnson **[*4]** & Johnson, (3) Novartis Pharmaceuticals Corp. (formerly Ciba-Geigy and Sandoz), (4) Pfizer Inc. (including two indirect wholly-owned subsidiaries: G. D. Searle LLC, formerly known as G. D. Searle & Co., and Pharmacia & Upjohn Company LLC, formerly known as Pharmacia & Upjohn Company), and (5) Rhone-Poulenc Rorer, Inc. ("RPR") and Hoechst Marion Roussel, Inc., ("HMR"), whose parent companies merged in 1999. Def. Mem. 1 n.1, Docket Entry 678.

Each of the chain store plaintiffs settled its claims years ago. A Sherman Act class of individually-owned retail pharmacies was certified in 1994. *In re Brand-Name Prescription Drugs Antitrust Litig., 264 F. Supp. 2d at 1374*. The **[*5]** plaintiffs in this action opted out of the class. The Sherman Act class plaintiffs settled their claims against several of the defendants and proceeded to trial before United States District Judge Kocoras in the Northern District of Illinois against the others. The Court entered a directed verdict in defendants' favor after trial. *In re Brand Name Prescription Drugs Antitrust Litig., 1999 U.S. Dist. LEXIS 12936, 1999 WL 639173, at *2 (N.D. Ill. Aug. 17, 1999)*; *In re Brand Name Prescription Drugs Antitrust Litig., 1999 U.S. Dist. LEXIS 550, 1999 WL 33889 (N.D. Ill. Jan. 19, 1999)* (granting defendants judgment as a matter of law). On April 21, 1995, Judge Kocoras issued a case management order referred to as Pretrial Order No. 5 ("PTO 5"). This Order called upon the parties to identify twenty of the retail pharmacies that had opted out of the class action and five of the defendants to serve as representative or "Designated Parties." Pursuant to the terms of the Order, discovery was stayed as to the non-designated parties until the conclusion of the first trial of a designated plaintiff's Robinson-Patman claim; upon the expiration of the stay, the non-designated plaintiffs would have eight months to complete fact and expert discovery on their **[*6]** Robinson-Patman Act claims. PTO 5 ¶ 5.

Both the Sherman and Robinson-Patman Act claims of the individual retail pharmacies that opted out of the class were remanded and consolidated before this Court sometime after the entry of Pretrial Order No. 5. In 2005, the parties settled their Sherman Act claims, leaving only plaintiffs' Robinson-Patman claims pending. Docket Entry 519. Apparently anticipating this possibility, Pretrial Order Number 5 provides that any damages recovered by a plaintiff who proceeds to trial on a Robinson-Patman Act claim must be reduced by any portion of those damages previously recovered in connection with the resolution of the plaintiffs' Sherman Act claims. PTO 5 ¶ 11.

B. Dismissal of Designated Plaintiffs' Robinson-Patman Act Claims

When the claims of the individual retail pharmacies were first transferred here, discovery had proceeded, as provided by PTO 5, only with respect to the designated parties. Once the Sherman Act claims of all of the remaining parties were settled, the designated defendants moved for summary judgment on the Robinson-Patman Act claims of the designated plaintiffs.

In 2007, Senior United States District Judge I. Leo Glasser granted defendants' **[*7]** motion for summary judgment "relating to the [seventeen] representative plaintiffs' claims under the Robinson-Patman Act . . . on the ground that plaintiffs have failed to show they are entitled to damages." *Drug Mart Pharmacy Corp. v. Am. Home Prods. Corp., 472 F. Supp. 2d 385, 420-21 (E.D.N.Y. 2007)* ("*Drug Mart II*").[3] At that time, the designated plaintiffs were relying on an expert report that calculated damages based in part on the fact that plaintiffs paid more for BNPDs than favored purchasers did, and on generalized evidence indicating that the share of the market for BNPDs served by favored purchasers had grown while at the same time individual retail pharmacies had lost market share. Judge Glasser rejected plaintiffs' reliance on the fact of a price differential "[b]ecause damages may not be based on the pricing margin caused by the discrimination, but [should be calculated based] on the estimates of plaintiffs' sales absent the discrimination." *Id. at 427*. With respect to plaintiffs' evidence of lost market share, Judge Glasser held that "[u]nder the Robinson-Patman Act, plaintiffs must carry their burden of proof to demonstrate that they *individually* suffered damages. . **[*8]** . . [H]ere, plaintiffs have failed to proffer evidence that specific plaintiff pharmacies lost sales of BNPDs manufactured by defendants to any specific favored purchaser." *Id. at 429* (emphasis added).

Having obtained summary judgment with respect to damages, defendants next sought dismissal of the designated plaintiffs' claims for injunctive relief. Judge Glasser granted defendants' motion for summary judgment, reasoning that, under the particular circumstances presented here, plaintiffs' failure to establish damages was fatal to their injunctive relief claims. *Drug Mart Pharmacy Corp. v. Am. Home Prods. Corp., 2007 U.S. Dist. LEXIS 93493, 2007 WL 4526618 (E.D.N.Y. Dec. 20, 2007)* ("*Drug Mart III*").

---

[3] "*Drug Mart I*," a decision not directly relevant here, is reported at *378 F. Supp. 2d 134 (E.D.N.Y. 2005)*.

C. Discovery Proceedings Culminating in the Pending Motion

Pretrial Order No. 5 provides that judgments entered after trial or other dispositions of the claims of designated parties do not have res judicata or collateral estoppel effect on the claims of non-designated parties. PTO 5 ¶ 12. Thus, while Judge Glasser's rulings with respect to the designated plaintiffs are uniquely relevant and highly persuasive precedent, **[*9]** they neither bar nor resolve the claims of the non-designated plaintiffs.

After Judge Glasser dismissed the claims of the designated parties, approximately 3,700 individual retail pharmacy plaintiffs remained. Def. R.56.1 ¶ 19. Confronted with Judge Glasser's decision, these remaining plaintiffs devised a plan to gather evidence in discovery that might show "that specific plaintiff pharmacies lost sales of BNPDs manufactured by defendants to any specific favored purchaser." *Drug Mart II, 472 F. Supp. 2d at 429*. Pursuant to this plan, which came to be known as the "matching process," plaintiffs compiled lists of specific BNPD customers who no longer purchased drugs from them, and then searched the databases of non-party favored purchasers (and one favored purchaser who is a party) to see whether those same individuals were obtaining the same BNPDs from those favored purchasers. The significance of the data developed by the matching process is at the heart of the pending summary judgment motion.

The precise contours of the matching process evolved over time. Indeed, although as noted above Pretrial Order No. 5 contemplated that the non-designated parties would complete fact and expert **[*10]** discovery within eight months, the matching process took considerably longer than that; the process was not completed until May, 2011. Docket Entry 666-1 ¶ 3.

The first conference at which the matching process was discussed in any detail was held on March 4, 2009. At that time, I pressed plaintiffs to explain how they intended to prove that they sustained damages or injury as a result of defendants' price discrimination:

> [I]f you're not going to have a patient-specific theory, then I think you need to say so, live with it, and let the defendants test it if they want to. If you are going to have a patient-specific theory, then identify the patients and ask the third parties what records they have of those patients and produce your list of patients in an electronic form that's compatible with the third parties from whom you're seeking discovery so that they can cheaply and efficiently tell you which of your former patients are now patients of theirs.

3/4/09 Tr., Docket Entry 586, at 10. In response, plaintiffs represented that they would base their case upon evidence that specific customers were lost to particular favored purchasers:

> [W]e are not suggesting that we would do anything other **[*11]** than put forth patient-specific information. And we're not proposing any kind of extrapolations or use of aggregate data or anything like that. . . . As a pharmacist sits in his pharmacy as a plaintiff in this case, he is able to identify a certain universe of patients who he reasonably believes, based on his own personal knowledge and his own business records, is a lost customer in the sense that we mean it in this litigation, because he knows that that particular patient was getting a long-term maintenance drug from him for a period of years, and that patient is now in a plan where there is a mail-order pharmacy option, and the patient is now getting his maintenance drugs, or some of them at least, filled by the mail-order pharmacy.

Id. at 13-14.

Several court conferences were held to address the details of the matching process and how it would be executed. One such conference was held on November 13, 2009. At that time, plaintiffs reported that they had identified 1.2 million customers who had been purchasing specific BNPDs from 500 plaintiffs but were no longer doing so. Based on that preliminary data, plaintiffs surmised that "at the end of the day we're going to have some material **[*12]** number that isn't going to be three for a pharmacy, or five for a pharmacy." 11/13/09 Tr., Docket Entry 604, at 16.

Yet another conference was held on March 24, 2010. Plaintiffs' counsel reported that it had now become clear that only 894 of the original 3,700 retail pharmacy plaintiffs would be able to identify customers they believed they had lost to favored purchasers. 3/24/10 Tr., Docket Entry 616, at 4. Counsel predicted at that time that these 894 retail pharmacies would demonstrate, through the matching process, that they had lost millions of transactions to favored purchasers. *Id*. at 6. In June 2010, the claims of 3,101 pharmacy locations were dismissed with prejudice by stipulation. Def. R.56.1 ¶ 59; Stipulation of Dismissal, Docket Entry 626.

Another court conference was held after the matching process data had been analyzed and before defendants brought this motion for summary judgment. At that time, plaintiffs raised the possibility that they would seek additional discovery before the motion was made. 8/11/11 Tr., Docket Entry 667, at 26. Although I afforded plaintiffs an opportunity to apply to take additional discovery, *id*. at 26-27, they never did so.

*1. **[*13]** The Matching Process*

The parties ultimately entered into a stipulation that states in pertinent part that,

> after compiling a database of potential lost customers from their data, Plaintiffs have undertaken a so-called 'matching process' to identify which of those potential lost customers may have filled prescriptions at one of five so-called favored purchasers: Caremark, AdvancePCS, Express Scripts, and Medco (collectively, the "PBMs"), and Omnicare, a long-term care pharmacy. ***The matching process was designed to determine the universe of potential lost customers that Plaintiffs claim they lost as a result of the pricing practices of Defendants*** and was subject to the following limitations: (i) the universe of so-called favored purchasers was limited to the four PBMs and Omnicare; (ii) the universe of BNPDs was limited to manufacturer Defendants' top-selling maintenance drugs; and (iii) the time periods searched were limited to data currently maintained by the PBMs and the Plaintiffs.[4]

Stipulation ¶ 1, Docket Entry 666-1 (emphasis added).

In **[*14]** April, 2010, plaintiffs produced a list of potential lost customers from 831 pharmacy locations.[5] Def. R.56.1 ¶ 58. In light of the voluminous data involved and the expense of comparing plaintiffs' lists with those of the favored purchasers, a subset of thirty plaintiffs was randomly selected to participate in the first round of the matching process. Def. R.56.1 ¶ 62. Two of the thirty plaintiffs subsequently dismissed their claims, leaving twenty-eight pharmacies involved in the matching process. Def. R.56.1 ¶¶ 63, 64. These plaintiffs then compared their database of lost customers with electronically stored customer lists, some going back as far as 1998, from the five favored purchasers whose data were examined as part of the matching process. Def. R.56.1 ¶¶ 40, 66. The matching process employed the following criteria:

> If the alleged favored purchaser's data showed a mail order fill of the same drug (say, drug x) for a matched patient within six months of the last fill at the Plaintiff pharmacy, the transaction was . . . counted as a match. Any subsequent prescriptions for drug x, or a therapeutic alternative, were . . . counted as matches against the manufacturer of drug x as well.

Def. **[*15]** R.56.1 ¶ 67.

When the matching process was finally completed, the results were considerably less impressive than plaintiffs had anticipated. *See* 3/23/12 Tr., Docket Entry 700, at 53 (plaintiffs' counsel's acknowledgement that they expected to see more matches). As stated by defendants, the twenty-eight pharmacies participating in the matching process had identified from their own records approximately 164,501 potential lost customers for 168 BNPDs over a twelve-year time frame from 1998 to 2010.[6] Def. R.56.1 ¶ 65. *See also* Plaintiffs' Letter dated 5/29/09, Docket Entry 594

---

[4] "PBMs" are pharmacy benefit managers. Def. R.56.1 ¶ 39.

[5] Plaintiffs had previously produced a list of approximately 2,770,426 potential lost customers for 500 pharmacies. Def. R.56.1 ¶ 50.

[6] For purposes of statistical analysis, defendants point out that the equivalent of ten years of data was collected and analyzed. Herscovici Decl. ¶ 13. Plaintiffs originally identified thirteen favored purchasers and three distributors. Tietjen Decl. Ex. 6, Docket

(identifying 168 BNPDs and a time frame applicable to each). When plaintiffs' data was compared to the data of the five favored purchasers, approximately 5,500 matched potential lost customers and 17,346 matched potential lost transactions were identified.[7] Def. R.56.1 ¶¶ 79, 80 (identifying 5,515 matched customers); *id*. ¶ 89 (identifying 5,454 matched customers); Herscovici Decl. ¶ 5 & n.3.[8] Plaintiffs further refined the results of the matching process, and by the time they submitted **[*16]** their opposition to defendants' summary judgment motion, plaintiffs had calculated a total of 5,147 lost customers and 15,043 lost transactions. Plaintiffs' Memorandum in Opposition ("Pl. Opp."), Docket Entry 684, at 22.

Some plaintiffs could not identify any matched customers at all with respect to BNPDs manufactured by one or more defendants, and those plaintiffs voluntarily dismissed their corresponding claims. Stipulation and Order of Dismissal, Docket Entry 697; Pl. Opp. 22 (identifying individual pharmacies with zero matching results). *See also* 3/23/12 Tr. at 60. In addition, each of the more than 800 remaining plaintiffs has voluntarily dismissed its claims against defendant Hoffman La Roche as a result of the minimal number of matches with respect to this defendant by the twenty-eight plaintiffs. Docket Entry 694.

As demonstrated by these results, only approximately 3% (5,147 of 164,501) of the potential lost customers plaintiffs culled from their own records could be "matched" to a customer who subsequently filled the same prescriptions with one or more favored purchasers. This implies, of course, that 97% of the customers plaintiffs identified as lost based upon their own records could not be found in the databases of favored purchasers searched during discovery. Moreover, even these figures are substantially reduced if the 2,586 **[*18]** lost customers claimed by plaintiff Pharma-Card are excluded; as discussed below, Pharma-Card's results include a large number of customers claimed by plaintiffs but not identified by the matching process.

The results are even less significant when considered in context. Defendants, relying on data reported by the National Community Pharmacists Association, point out that independent retail pharmacies filled between 22,000 and 28,000 BNPD prescriptions per year during the period of time relevant to The matching process.[9] In contrast, the data from the matching process reveals that, on average, each plaintiff pharmacy lost less than 200 (5,147/28) customers and only approximately 537 (15,043/28) transactions over the entire period examined by the matching process, or approximately 18 customers and 54 transactions per year. Pl. Opp. 22-24. This average loss of 54 transactions per year is only about one quarter of one per cent of the more than 20,000 BNPD transactions conducted per year by the average retail pharmacy.

The de minimis nature of these results is further illustrated when they are broken down and analyzed by defendant. According to defendants, when examined in this manner, the results are that approximately 88% of plaintiffs' claims against particular defendants are based on five or fewer lost customers per year. Joint Memorandum of Law in Support of Individual Defendants' Motions for Summary Judgment," Docket Entry 678 ("Def. Mem.") at 3.[10] On the

---

Entry 686. Three of the favored purchasers were able to produce data beginning from 1998. Pl. R.56.1 ¶ 66. Express Scripts matched data beginning from January, 2002; Advance PCS collected data from January, 2006. *Id*. Plaintiffs contend that Express Scripts, Medco and CVS/Caremark currently account for 50% of the PBM marketplace. Pl. Opp. at 7 n.19, Docket Entry 684.

[7] Although defendants challenge several aspects of the results of the matching process as calculated by plaintiffs, I rely — as do defendants in large part — on plaintiffs' tabulations of matched lost customers for purposes of deciding the pending motion.

[8] "Herscovici Decl." refers to the Declaration of Steven Herscovici, Ph, D., submitted in support **[*17]** of defendants' motion for summary judgment, Docket Entry 681.

[9] Although plaintiffs note that the five favored purchasers that were searched as part of the matching process account for only 50% of the PBM marketplace, and that only the **[*19]** most common prescription drugs were included in the search protocol, plaintiffs offer no alternative base figure for comparison.

[10] After defendants submitted their summary judgment motion, plaintiffs further refined their results and dismissed some of their claims. Defendants then filed an amended memorandum of law to reflect plaintiffs' changes to the matching results. Docket Entry 698. In the amended memorandum, defendants calculate that 87% of plaintiffs' claims are based on five or fewer lost customers per year. Docket Entry **[*20]** 698-1 at 10.

other hand, plaintiffs calculate that, excluding the dismissed claims, approximately 31% of plaintiffs' remaining claims against particular defendants are based on five or fewer lost customers per year. Pl. Opp. at 22.

Many pharmacies lost no more than ten customers per defendant over the relevant twelve-year time period, or less than one customer per year. For example, 19 of the 28 pharmacy plaintiffs could identify only ten or fewer matched Novartis (formerly Ciba-Geigy and Sandoz) customers over the entire ten-plus year period, or less than one lost customer per year. Pl. Opp. at 22. The following chart summarizes the de minimis number of lost customers with respect to each of the defendants:

Defendant	**No. of pharmacies with 10 or less lost customers total**	**Percentage of pharmacies with 10 or less lost customers**	**No. of pharmacies that lost only 1 customer total**	**No. of dismissed claims for zero matches**
Abbott	16	57%	5	3
Novartis	19	68%	3	1
Johnson & Johnson	18	64%	6	4
Upjohn/Pfizer	4	14%	0	1
Hoechst Marion Roussel (Marion Merrell Dow)/Rhone Poulenc Rorer ("HMR (MMD)/RPR")	12	43%	2	2
Total	69	49%	6	11

Pl. Opp. at 22. Excluding Upjohn, the defendant that consistently had the highest number of matches, and Pharma-Card, which I conclude for reasons discussed below has substantially overstated its results, none of the plaintiff pharmacies lost more than 50 total customers per defendant over the relevant twelve-year time period, or less than five **[*21]** customers per year per defendant. *Id*.

When examined on a per-plaintiff basis — again, with the arguable exception of plaintiff Pharma-Card — similarly insignificant results are obtained. Even Klein's Pharmacy, the plaintiff with the highest number of lost transactions identified by the matching process, lost a total of only 2,521 transactions, or approximately 252 transactions per year. Pl. Opp. at 23. This amounts to only slightly more than 1% of the total BNPD transactions conducted by an average retail pharmacy during any one year (252/22,000).

In short, no matter how analyzed, the matching process identified only a de minimis number of lost customers and transactions.

2. Plaintiff Pharma-Card Prescription Services

As noted above, plaintiff Pharma-Card claims to have lost a large number of customers other than those identified by the matching process. More specifically, Pharma-Card asserts that it lost approximately 2,586 customers as a result of defendants' price discrimination, or nearly half of the 5,500 lost customers claimed by all 28 of the plaintiffs.[11] Def. R.56.1 ¶ 89. Most of these customers, however, were not identified by the matching process, but were instead added to the **[*22]** results manually by plaintiffs based upon the belief held by Pharma-Card's employees that certain customers were lost to favored purchasers because of defendants' price discrimination. *Id*. ¶ 85(a) (denied by plaintiffs); *see* Pl. Opp. at 17-19. Almost 2,000 of these customers were submitted for matching, but only five were identified in the records of the favored purchasers as having filled subscriptions for BNPDs with them. Def. R.56.1 ¶¶ 90-91; Def. Mem. at 28-29. Moreover, at least during part of the twelve-year period covered by the matching process, Pharma-Card operated at fourteen separate retail locations. Pl. Opp. at 17. Even if all 2,586 customers were properly included in the matching process results, it would show only that approximately 184 customers were lost per retail location, or that Pharma-Card lost only about 18 customers per year at each of its locations.[12]

3. Other Evidence of Damages

Finally, plaintiffs seek to rely on their own affidavits in which they claim to have lost customers and transactions in addition to those identified through the matching process. Teitjen Decl., Docket Entry 686, Exs. 20-48. These affidavits are not properly considered as evidence of plaintiffs' lost sales for at least two reasons. First, plaintiffs offer no convincing explanation for the failure of the matching process to identify the lost customers referenced in these affidavits.[13] Second, and perhaps most significantly — and this applies with equal force to those Pharma-Card customers that were manually added to the matching process results — plaintiffs entered into a stipulation, filed with the Court on August 8, 2011, explicitly providing that the matching process would "determine ***the universe*** **[*24]** of potential lost customers that Plaintiffs claim they lost as a result of the pricing practices of Defendants."[14] Stipulation ¶ 1, Docket Entry 666-1 (emphasis added).

DISCUSSION

A. Standards Governing Summary Judgment

Summary judgment is appropriate where "there is no genuine dispute as to any material fact and the movant is entitled to judgment as **[*25]** a matter of law." *Fed. R. Civ. P. 56(a)*. In reaching a summary judgment determination, the court must resolve ambiguities and draw reasonable inferences in favor of the nonmoving party. *Johnson v. Killian, 680 F.3d 234, 236 (2d Cir. 2012)*.

---

[11] In their memorandum in opposition to summary judgment, plaintiffs contend that Pharma-Card lost 2,773 customers. Pl. Opp. at 22.

[12] Pharma-Card identified a total of 1,669 lost transactions through the matching process. Pl. Opp. at 23. I presume that the number of claimed lost transactions is smaller than the number **[*23]** of lost customers because lost transactions were determined solely from the matching process and not manually supplemented. Even if Pharma-Card operated at a single retail location, this would amount to approximately 160 lost transactions per year, a tiny sum when compared to the more than 22,000 BNPD transactions conducted annually by the average retail pharmacy.

[13] Plaintiffs do contend that some customers were lost to favored purchasers other than those whose data was used in the matching process. Pl. Opp. at 15, 19. It was plaintiffs, though, who selected the favored purchasers whose data would be included.

[14] In addition, reports of customers as related by pharmacy employees are arguably hearsay. *See, e.g.*, Teitjen Decl. Ex. 20, Tallman Aff. ¶ 8 & Ex. B at 4; *id*. Ex. 23, Mouret Aff. ¶ 10; *id*. Ex. 29, Ellison Aff. ¶ 10. However, the Second Circuit has explicitly permitted testimony of the same type pursuant to *Federal Rule of Evidence 803(3)* when offered in antitrust cases to prove customers' motives. *Hydrolevel Corp. v. Am. Soc'y of Mech. Eng'rs, Inc., 635 F.2d 118, 128 (2d Cir. 1980)*; *Herman Schwabe, Inc. v. United Shoe Mach. Corp., 297 F.2d 906, 914 (2d Cir.)*, *cert. denied*, ***369 U.S. 865, 82 S. Ct. 1031, 8 L. Ed. 2d 85 (1962)***.

Two additional principles inform my review of defendants' motion. First, the Second Circuit has held that "summary judgment is particularly favored [in antitrust cases] because of the concern that protracted litigation will chill pro-competitive market forces." *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 104 (2d Cir. 2002)* (citing *Tops Mkts, Inc. v. Quality Mkts, Inc., 142 F.3d 90, 95 (2d Cir. 1998))*. *See also* *Am. Banana Co., Inc. v. J. Bonafede Co., Inc., 407 Fed. Appx. 520, 522 (2d Cir. 2010)*. The Circuit stressed in *Pepsico* that a party may demonstrate that it is entitled to summary judgment by pointing to an absence of evidence to support the nonmoving party's case. *PepsiCo, 315 F.3d at 105*.

Second, the Supreme Court, in its most recent decision addressing the Robinson-Patman Act, urged lower courts to construe the Act narrowly.[15] *Volvo Trucks N. Am., Inc. v. Reeder-Simco GMC, Inc., 546 U.S. 164, 181, 126 S. Ct. 860, 163 L. Ed. 2d 663 (2006)*. The Court cited its much earlier decision **[*26]** in *Automatic Canteen Co. of America v. FTC, 346 U.S. 61, 63, 73 S. Ct. 1017, 97 L. Ed. 1454, 49 F.T.C. 1763 (1953)*, which it described as "cautioning against Robinson-Patman constructions that extend beyond the prohibitions of the Act and, in doing so, help give rise to a price uniformity and rigidity in open conflict with the purposes of other antitrust legislation." *Id. at 181*. Even Justice Stevens, who dissented in Volvo, noted that the Act "may well merit [noted ***antitrust law*** scholar] Judge [Robert] Bork's characterization as 'wholly mistaken economic theory.'" *546 U.S. at 187*. *See also* *Toledo Mack Sales & Serv., Inc. v. Mack Trucks, Inc., 530 F.3d 204, 227 (3d Cir. 2008)* (describing the Supreme Court's decision in *Volvo* as narrowly construing the Robinson-Patman Act).

With this guidance in mind, I now consider whether plaintiffs' evidence, revealing as it does that plaintiffs lost only a trivial number of customers and sales to favored purchasers, is nevertheless sufficient to support a Robinson-Patman Act claim. For the reasons explained below, I conclude that it is not.

B. The Robinson-Patman Act

Section 2(a) of the Robinson-Patman Act (the "Act"), an amendment to the Clayton Act, renders it

> unlawful for any person engaged in commerce, . . . either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of **[*28]** such discrimination, or with customers of either of them.

15 U.S.C. § 13(a).[16]

To succeed on a Robinson-Patman claim, a plaintiff must establish: "(1) that seller's sales were made in interstate commerce; (2) that the seller discriminated in price as between the two purchasers; (3) that the product or commodity sold to the competing purchasers was of the same grade and quality; and (4) that the price discrimination had a prohibited effect on competition." *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d*

---

[15] The Court has, on other occasions, stated that the Robinson-Patman Act should be construed liberally and "broadly to effectuate its purpose." *Abbott Labs. v. Portland Retail Druggists Ass'n, Inc., 425 U.S. 1, 11, 96 S. Ct. 1305, 47 L. Ed. 2d 537 (1976)*, *quoted in* *Jefferson Cnty. Pharm. Ass'n, Inc. v. Abbott Labs., 460 U.S. 150, 159, 103 S. Ct. 1011, 74 L. Ed. 2d 882 (1983)*. Although *Volvo* does not disavow these prior decisions, the *Volvo* decision does seem to place more emphasis on the possible anti-competitive effects of the **[*27]** Robinson-Patman Act than prior decisions. At least one scholar has noted that the Robinson-Patman Act has "come into disfavor" during the last quarter century. Daniel J. Gifford & Robert T. Kudrle, *The Law and Economics of Price Discrimination in Modern Economies: Time for Reconciliation?*, *43 U.C. DAVIS L. REV. 1235, 1269 (2010)*.

[16] Plaintiffs also assert claims pursuant to *Sections 2(d)* and *2(f)* of the Robinson-Patman Act, discussed *infra*.

136, 141 (2d Cir. 1998). As is frequently the case, only the fourth element — proof of what is referred to as "competitive injury" — is at issue here.[17] Indeed, as the Second Circuit has stated,

> [t]he language in Section 2(a) relating to injury to competition is the key to the legality of most differential pricing practices and has engendered significant legal authority as courts have struggled to determine what degree and type of market consequences will constitute the proscribed statutory effect on competition in various commercial situations.

George Haug Co., 148 F.3d at 141.

A plaintiff seeking damages under the Act must not only demonstrate a competitive injury as required by the Act itself, but must also satisfy Section 4 of the Clayton Act, 15 U.S.C. § 15, by establishing an "antitrust injury." Id. at 422-24. That is because the Robinson-Patman Act does not provide for a private right of action; instead, "the private right of action for a § 2(a) Robinson-Patman Act claim, as for all private plaintiff antitrust rights of action, is provided by § 4 of the Clayton Act." Drug Mart II, 472 F. Supp. 2d at 422. The "antitrust injury" requirement "compels plaintiffs to show that they were in fact injured by price discrimination, that the injury is of the type the Act was intended to prevent, and that the injury is causally connected **[*30]** with the violation of the Act." Id. at 423 n. 44 (citing Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)).

In enacting Robinson-Patman, "Congress sought to target the perceived harm to competition occasioned by powerful buyers, rather than sellers; specifically, Congress responded to the advent of large chainstores, enterprises with the clout to obtain lower prices for goods than smaller buyers could demand." Volvo, 546 U.S. at 175. The purpose of the Act is to prohibit "price discrimination only to the extent that it threatens to injure competition." Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 220, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993). The Supreme Court emphasized this point in *Volvo*, where it warned against "interpretation[s of the Act] geared more to the protection of existing *competitors* than to the stimulation of *competition*." 546 U.S. at 181 (emphasis in original).[18]

The parties' submissions do not directly address whether defendants' pricing practices have had any impact on the competitiveness of the market for BNPDs. For example, neither side has presented any evidence regarding whether or how defendants' discount and rebate programs have affected the availability of BNPDs to patients or the amounts patients, or their health insurance providers, must pay for them. Rather, both sides focus on whether the injury, or lack thereof, sustained by plaintiffs is sufficient to demonstrate competitive **[*32]** or antitrust injury. Because the parties have not addressed the impact on competition generally, and because it is difficult to conceive of an adverse impact on competition absent a significant diversion of sales, I do not separately consider whether defendants' pricing practices have adversely affected competition in the market for BNPDs from a consumer's point of view.

---

[17] Defendants **[*29]** do not contest, for purposes of the pending motion, plaintiffs' allegations of discriminatory pricing. Indeed, the Seventh Circuit, ruling on appeal from a grant of judgment as a matter of law against the plaintiff class, stated that "the manufacturers of brand name prescription drugs engage in price discrimination . . . . Everyone knows this." In re Brand Name Prescription Drugs Antitrust Litig., 186 F.3d 781, 786 (7th Cir. 1999).

[18] In opposing summary judgment, plaintiffs cite cases suggesting that a showing of injury to a competitor is sufficient to establish competitive injury, even in the face of proof that competition remains healthy. Pl. Opp. at 40 (citing Chroma Lighting v. GTE Products Corp., 111 F.3d 653, 657 (9th Cir. 1997) **[*31]** (referring to "Congressional intent to protect individual competitors, not just market competition") and J.F. Feeser, Inc. v. Serv-a-Portion, Inc., 909 F.2d 1524, 1535 (3rd Cir. 1990) (holding that "evidence of injury to a competitor may satisfy the component of competitive injury necessary to show a violation of the Robinson-Patman Act")). *See also* Alan's of Atlanta, Inc. v. Minolta Corp., 903 F.2d 1414, 1418 n.6 (11th Cir. 1990) (citing cases and finding that "the legal focus of the competitive injury inquiry is on the competitor, not the consumer"). The language from *Volvo* quoted in the text raises a question about the continued viability of these holdings.

1. Competitive Injury

There are "three categories of competitive injury that may give rise to a Robinson-Patman Act claim: primary line, secondary line, and tertiary line." *Volvo, 546 U.S. at 176*. This case, like *Volvo*, involves a secondary line claim, or a claim of "price discrimination that injures competition among the discriminating seller's customers," described as "'favored' and 'disfavored' purchasers."[19] *Id*. "A hallmark of the requisite competitive injury [in a secondary line claim] . . . is the diversion of sales or profits from a disfavored purchaser to a favored purchaser." *Id. at 177*. In other words, and as plaintiffs' commitment to the matching process reflects, a Robinson-Patman Act claimant may not rely on the effect of price discrimination on the market generally. Rather,

> [t]he plaintiff disfavored purchaser **[*33]** must show that it lost customers or profits because the favored purchaser used its favored advantage either to lower its resale prices or otherwise to attract business. It is for that reason that a plaintiff asserting a claim under the Act must proffer individualized proof of lost customers or profits as against each defendant.

Drug Mart I, 378 F. Supp. 2d at 139. *See also* *O'Connell v. Citrus Bowl, Inc., 99 F.R.D. 117 (E.D.N.Y. 1983)* (denying plaintiffs' motion for class certification of Robinson-Patman Act claims because each putative class member's proof of competitive injury would be highly individualized).

The Robinson-Patman Act prohibits price discrimination only "where the effect of such discrimination **[*34]** may be substantially to lessen competition." *15 U.S.C. § 13(a)*. Applying this statutory language, the Supreme Court in *Volvo* held that an automobile manufacturer defendant was entitled to judgment as a matter of law following a jury verdict in favor of a plaintiff car dealer. In *Volvo*, the plaintiff car dealer claimed that, with respect to certain trucks designed to a customer's specifications, defendant Volvo offered other dealers more favorable price concessions than it received. Plaintiff's difficulty in establishing a Robinson-Patman Act violation stemmed from the fact that he rarely competed with other Volvo dealers over the same truck customers. In fact, plaintiff was able to present evidence of only two occasions over five years when it competed against another Volvo dealer for a particular sale, and a "loss of only one sale of 12 trucks that would have generated $30,000 in gross profits." *546 U.S. at 180*. While the Court focused primarily on the absence of proof that Volvo dealers simultaneously competed with each other for the same retail customers, it also indicated that the limited evidence of lost sales presented by the plaintiff was insufficient to establish competitive **[*35]** injury, stating that "if price discrimination between two purchasers existed at all, it was not of such magnitude as to affect substantially competition between [plaintiff] and the 'favored' Volvo dealer." *Id*. *See also* *United Magazine Co., Inc. v. Curtis Circulation Co., 279 Fed. Appx. 14, 17-18 (2d Cir. 2008)*; *Interstate Cigar Co. Inc. v. Sterling Drug Inc., 655 F.2d 29, 31 (2d Cir. 1981)* (stating that plaintiffs failed to establish that any price discrimination or discount to a favored purchaser "would tend to lessen competition substantially").

Other courts have similarly rejected Robinson-Patman Act claims for failure to demonstrate a substantial anti-competitive impact. For example, the Fifth Circuit, on remand from the Supreme Court, rejected another car dealer's claim because, among other things, the plaintiff failed to establish that the incentive programs he challenged were likely to have a substantial effect on competition. *Chrysler Credit Corp. v. J. Truett Payne Co., Inc., 670 F.2d 575, 581 (5th Cir. 1982)*. In words directly applicable to defendants' pending motion, the Fifth Circuit stated:

> In order to show a violation of *Section 2(a)* of the Robinson-Patman Act a plaintiff **[*36]** must demonstrate the likely effect of the alleged price discrimination was to allow a favored competitor to draw significant sales or profits away from him, the disfavored competitor.

[19] A plaintiff seeking to establish competitive injury in a secondary-line case must prove that it was a disfavored purchaser engaged in actual competition with a favored purchaser(s) at the time of the price differential. *Best Brands Beverage, Inc. v. Falstaff Brewing Corp., 842 F.2d 578, 584 (2d Cir. 1987)*. Defendants apparently do not dispute, at least for purposes of this motion, that plaintiffs and the favored purchasers whose data was used in the matching process were in competition.

670 F.2d at 580. *See also* O'Connell, 99 F.R.D. at 122 (favorably citing the language from *J. Truett Payne* quoted above). In Boise Cascade Corp. v. Federal Trade Commission, 837 F.2d 1127, 267 U.S. App. D.C. 124 (D.C. Cir. 1988), a contention of competitive injury was rejected in part because the number of accounts (162) that switched from the disfavored purchasers to the favored purchaser "was quite small." 837 F.2d at 1145. *See also* Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163, 1171 (7th Cir. 1978) (dismissing primarily because of a lack of competition between plaintiff and any favored purchaser for the same customers and stating that a plaintiff who "has not alleged that its sales lost due to secondary price discrimination were more than 'de minimus'" has failed to establish a cognizable competitive injury); Erickson's Flooring & Supply Co. v. Basic Coatings, Inc., 2007 U.S. Dist. LEXIS 76642, 2007 WL 3036747, at *6 (E.D. Mich. Oct. 15, 2007) (finding that "only one instance of discriminatory pricing towards one other distributor in relation **[*37]** to only one customer [was insufficient]. Indeed, Plaintiff's claim is weaker than the one pressed in *Volvo Trucks*, because Plaintiff does not claim that the allegedly lower prices given to Erickson's Decorating even cost it any sales; it alleges that this discrimination hurt its profit margin at only one point in time, in relation to only one customer. . . . Plaintiff has provided no evidence that the alleged price concession might have had anything approaching a "substantial" effect on competition."). Here, the effect of defendants' pricing practices has been carefully measured, and the results undermine any contention that plaintiffs have suffered a significant loss of sales.

The decision in De Modena v. Kaiser Foundation Health Plan, Inc., 743 F.2d 1388 (9th Cir. 1984), *cert. denied*, *469 U.S. 1229, 105 S. Ct. 1230, 84 L. Ed. 2d 368 (1985)*, is of particular interest because it involved, like this case, allegations of price discrimination in the market for prescription drugs. Defendants in *De Modena* operated health plans that provided medical care to their members in return for monthly dues. The services defendants provided to their members included a prescription drug plan. Plaintiffs, retail pharmacies, brought Robinson-Patman **[*38]** Act claims, contending that defendants were able to acquire drugs at discriminatorily low prices. The Court in *De Modena* held that, with respect to drugs provided to their own members, defendants were protected from liability by an exception to the Robinson Patman Act applicable to transactions made by non-profit institutions for their own purposes. The court found, though, that defendants also made sales to "walk-in" customers who were not their members, and that these sales were thus not covered by the "own purposes" exception described above. The district court dismissed plaintiffs' claim despite these walk-in sales on the grounds that they constituted less than one percent of defendants' total drug sales and were therefore de minimus. The Ninth Circuit reversed, but not on the ground that the district court wrongly concluded that a de minimis number of sales is not actionable; rather, the Ninth Circuit held that whether the sales at issue were de minimis or not should be determined by measuring their effect on competition, not by calculating the portion of defendants' sales they represented. 743 F.2d at 1394-95. Indeed, if a de minimis number of diverted sales were sufficient, **[*39]** it would not matter how they were measured, and the Ninth Circuit would have had no reason to remand.

In this case, of course, the matching process measured the number of customers drawn from plaintiffs to favored purchasers, and defendants in support of their motion seek to examine that number in the context of the BNPD sales volume of a typical retail pharmacy. The reasoning in De Modena accordingly supports defendants' position here.

In response to defendants' argument that the limited number of lost sales demonstrated by the matching process precludes their Robinson-Patman Act claims, plaintiffs invoke what has come to be known as the "*Morton Salt*" inference. The inference takes its name from the decision in FTC v. Morton Salt Co., 334 U.S. 37, 68 S. Ct. 822, 92 L. Ed. 1196, 44 F.T.C. 1499 (1948), where the Supreme Court stated:

> It would greatly handicap effective enforcement of the Act to require testimony to show that which we believe to be self-evident, namely, that there is a 'reasonable possibility' that competition may be adversely affected by a practice under which manufacturers and producers sell their goods to some customers substantially cheaper than they sell like goods to the competitors of these customers. This showing **[*40]** in itself is sufficient to justify our conclusion that . . . findings of injury to competition were adequately supported by evidence.

334 U.S. at 49-51. In *Volvo*, the Supreme Court described *Morton Salt* as recognizing that "a permissible inference of competitive injury may arise from evidence that a favored competitor received a significant price reduction over a substantial period of time." 546 U.S. at 177.

Plaintiffs contend, in essence, that the results of the matching process do not preclude their claims because the *Morton Salt* inference provides them with an alternative means of demonstrating likely competitive injury. As a general matter, plaintiffs are correct: a Robinson-Patman plaintiff may typically establish competitive injury in one of two ways: "proof of lost sales or profits, or under the *Morton Salt* test, proof of a substantial price discrimination between competitors over time." J.F. Feeser, Inc. v. Serv-A-Portion, Inc., 909 F.2d 1524, 1535 (3d Cir. 1990) (internal citations omitted).

The problem for plaintiffs is that this is not a typical case. The *Morton Salt* inference is just that — an inference — and it is subject to rebuttal. Thus, as noted above, the Supreme Court **[*41]** in *Volvo* referred to the *Morton Salt* inference as a "permissible" one that "may" arise under certain circumstances. Even before *Volvo*, the Supreme Court had pointed out that, "[i]n the absence of direct evidence of displaced sales," the *Morton Salt* inference "may be overcome by evidence breaking the causal connection between a price differential and lost sales or profits." Falls City Indus., Inc. v. Vanco Beverage, Inc., 460 U.S. 428, 435, 103 S. Ct. 1282, 75 L. Ed. 2d 174 (1983). Similarly, in *Boise Cascade*, the Circuit Court held that

> The [*Morton Salt*] inference can . . . be overcome by evidence showing an absence of competitive injury within the meaning of Robinson-Patman. That is to say, a sustained and substantial price discrimination raises an inference, but it manifestly does not create an irrebuttable presumption of competitive injury.

837 F.2d at 1144.

Here, plaintiffs have undertaken an extensive, costly and time-consuming effort to trace the customers they claim to have lost to favored purchasers because of price discrimination, but have essentially come up empty. Moreover, their efforts to point to other evidence of competitive injury fail for several reasons, not the least of which is that they have stipulated **[*42]** that the results of the matching process would define the "universe of potential lost customers" they would claim they lost as a result of the defendants' pricing practices. Stipulation ¶ 1, Docket Entry 666-1. Under these circumstances, any inference has been rebutted; the assumption that a substantial price difference over time would result in customers leaving plaintiffs for favored purchasers has been carefully tested, but no meaningful evidence of lost sales has been developed.

As plaintiffs contend, there is authority that suggests that the Act has no substantiality requirement. *See, e.g.,* H.L. Hayden Co. of New York, Inc. v. Siemens Medical Systems, Inc., 879 F.2d 1005, 1020-22 (2d Cir. 1989) (assuming that plaintiff suffered a competitive injury even though plaintiff cited only three instances of lost sales but finding that plaintiff failed to establish a causal connection between any lost sales and alleged Robinson-Patman violations); Precision Printing Co., Inc. v. Unisource Worldwide, Inc., 993 F. Supp. 338, 353 (W.D. Pa. 1998) (finding that plaintiff "raise[d] a genuine issue of material fact on the issue of competitive harm" based on evidence that "at least one customer **[*43]** shifted business away from plaintiff because it was no longer price-competitive" but denying/granting summary judgment because there was no Robinson-Patman violation); Capital Ford Truck Sales, Inc. v. Ford Motor Co., 819 F. Supp. 1555, 1578 (N.D. Ga. 1992) (holding that "[t]he *de minimis* injury doctrine applies only when a plaintiff has no direct evidence of lost sales and adduces proof of competitive injury through evidence of substantial price discrimination over time"); *see also* 3A FED. JURY PRAC. & INSTR. § 150.205 (requiring plaintiff to "show there is a reasonable possibility that the alleged price discrimination may have harmed competition. Plaintiff is not required to show that the alleged price difference actually harmed competition.") (citing Corn Products Refining Co. v. Fed. Trade Comm'n, 324 U.S. 726, 65 S. Ct. 961, 89 L. Ed. 1320, 40 F.T.C. 892 (1945)); The Bohack Corp. v. Iowa Beef Processors, Inc., 715 F.2d 703, 711 n.9 (2d Cir. 1983) (affirming a jury charge that stated that "the plaintiff must establish by a fair preponderance of the evidence that it suffered a loss of sales and consequently a loss of profit because of the illegal price discrimination . . . . The loss of Bohack may be shown by showing that the **[*44]** price discrimination diverted sales from Bohack that Bohack lost sales and therefore profit. It is not necessary that you find that competition was in fact lessened, injured or damaged, but only that the acts of the defendant may have substantially lessened competition, injured or destroyed some competition."); *Cf.* *Gen. Auto Parts Co. v. Genuine Parts Co., 2007 U.S. Dist. LEXIS 15473, 2007 WL 704121, at *6 (D. Idaho Mar. 5, 2007)* (denying summary judgment after finding that there were disputes of fact on whether any price discrimination "might" have substantially lessened competition). However, after reviewing all of the pertinent authorities, and relying in particular on the Supreme Court's most recent pronouncement in *Volvo*, I conclude that a Robinson-Patman claim requires a showing of substantial competitive injury and that the de minimis sales identified by the matching process are insufficient to establish such an injury. *546 U.S. at 180*.

For all these reasons, I conclude that plaintiffs have failed to demonstrate sufficient competitive injury to sustain their Robinson-Patman Act claims. Accordingly, defendants are entitled to summary judgment.

2. Antitrust Injury

As noted above, a plaintiff seeking to recover **[*45]** damages on a Robinson-Patman claim must establish an antitrust injury. An antitrust injury is an "(1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the statute." *Blue Tree Hotels Inv. (Canada), Ltd. v. Starwood Hotels & Resorts Worldwide, Inc., 369 F.3d 212, 220 (2d Cir. 2004)* (citing *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. *See also* *Dayton Superior Corp. v. Marjam Supply Co., 2011 U.S. Dist. LEXIS 17221, 2011 WL 710450 at * 6 (E.D.N.Y. Feb. 22, 2011)*. Even if plaintiffs' claims were not subject to dismissal for failure to raise a question of fact with respect to competitive injury, I would grant defendants' summary judgment motion because plaintiffs have, largely for the reasons discussed above, also failed to present evidence of antitrust injury.

Price discrimination does not entitle a disfavored purchaser to "automatic damages." *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 561, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)*. Rather,

> [f]or purposes of Robinson-Patman secondary line cases, antitrust injury is the competitor's unfair competitive edge that is used to attract sales or profits from the plaintiffs. Thus, the injury must be traced **[*46]** to the competitor's competitive use of their price advantage.[20]

Drug Mart II, 472 F. Supp. 2d at 424 (citing *Uniroyal, Inc. v. Jetco Auto Serv., Inc., 461 F. Supp. 350, 358 (S.D.N.Y. 1978))*. In other words, "[i]f the price discrimination . . . was the cause of the plaintiffs' injury, the plaintiffs should be able to match up their losses with gains to the favored competitors." *Id. at 424-25* (quoting *Hasbrouck v. Texaco, Inc*., 1980 WL 1843 at *19 (E.D. Wash. Mar. 31, 1980), *aff'd in part, rev'd in part*, *663 F.2d 930 (9th Cir. 1981)*. Except to the minimal extent described above, plaintiffs here, despite tremendous effort, have been unable to "match up their losses" with gains to the favored purchasers. Plaintiffs have identified less than 3% of their total lost customers as having purchased BNPDs from favored purchasers, undermining any inference that price advantages enjoyed by favored purchasers caused plaintiffs' injury. Where the evidence of lost sales is as de minimis as it is here, it cannot support a finding of a causal connection between lost sales and the alleged price discrimination.

---

[20] Judge Glasser discussed the standard to apply in analyzing antitrust injury as follows:

> First, **[*47]** the plaintiffs must prove the fact of antitrust injury; second, they must make a showing regarding the amount of damages in order to justify an award by the trier of fact. . . . [P]laintiffs' burden of proving the fact of damage under *§ 4* of the Clayton Act is satisfied by its proof of some damage flowing from the unlawful conspiracy. Once causation is established, the jury is permitted to calculate the actual damages suffered using a "'reasonable estimate, as long as the jury verdict is not the product of speculation or guess work.'" The plaintiffs therefore must proffer evidence of some damage, with the recognition that the actual amount need not be proven to the same degree of certainty as proving some quantum of damages.

Drug Mart II, 472 F. Supp. 2d at 423-24 (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* and *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562, 51 S. Ct. 248, 75 L. Ed. 544 (1931))*.

Although there appear to be few precedents on point, the relevant decisions do suggest that a trivial effect on a claimant's sales is insufficient to demonstrate antitrust injury. For example, in *Allen Pen Co. v. Springfield Photo Mount Co., 653 F.2d 17 (1st Cir. 1981)* **[*48]** (Breyer, J.), the First Circuit rejected plaintiff's claim, holding that because "the affected sales were but a tiny fraction of its total business," plaintiff was unable "to show any significant actual injury." *Id. at 23*. A similar analysis contributed to the dismissal in *Hygrade Milk and Cream Co. v. Tropicana Products, Inc., 1996 U.S. Dist. LEXIS 6598, 1996 WL 257581 at *18-19 (S.D.N.Y. May 16, 1996)* (rejecting claim of antitrust injury where lost sales were, at best, "insignificant").

Because they are essentially unable to match up a significant number of the customers they lost with those the favored purchasers gained, plaintiffs have failed to demonstrate antitrust injury. *But see* *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1377 (2d Cir. 1988)* (affirming that an antitrust plaintiff may recover nominal damages under the Clayton Act, albeit in the context of a Sherman Act claim). Defendants are therefore entitled to summary judgment on this ground as well.

3. Equitable Relief

Plaintiffs seek equitable relief as well as damages. Injunctive relief "against threatened loss or damage by a violation of the antitrust laws" is available pursuant to *Section 16* of the Clayton Act, *15 U.S.C. § 26*. If **[*49]** a Robinson-Patman plaintiff establishes all the elements of its prima facie claim, including competitive injury, injunctive relief may be granted without any showing of antitrust injury.

Although the matter was not explicitly raised by the parties in their motion papers, plaintiffs' claims for equitable relief are foreclosed by Judge Glasser's decision in *Drug Mart III, 2007 U.S. Dist. LEXIS 93493, 2007 WL 4526618 (E.D.N.Y. Dec. 20, 2007)*. In that decision, Judge Glasser considered whether his decision granting defendants summary judgment with respect to plaintiffs' damages claims was dispositive of, or even relevant to, plaintiffs' claims for equitable relief. Judge Glasser determined that plaintiffs' equitable relief claims could not survive, and rendered a thorough decision that explained his reasoning in great detail. Little would be served by retracing Judge Glasser's steps here; I therefore simply summarize his decision as follows. Citing *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*, Judge Glasser recognized that, generally, a plaintiff may obtain equitable relief from price discrimination merely by demonstrating a threat of antitrust injury, and need not establish actual injury and damages. **[*50]** *2007 U.S. Dist. LEXIS 93493, [WL] at *6*. Judge Glasser went on to conclude, however, that

> where the allegedly anticompetitive conduct has been ongoing for a substantial period of time, the distinction between *Section 4*'s requirement of actual injury and Section 16's more liberal requirement of threatened injury tends to shrink or disappear. If the plaintiff cannot show itself to have suffered some actual injury of the type the antitrust laws were intended to prevent from a purportedly anticompetitive practice in which the defendant has engaged for a substantial portion of time, the plaintiff is effectively presumed to be unable to establish the existence of a threat of future injury arising from that same conduct in the future, at least absent some plausible explanation why a practice that has not created a cognizable injury in the past creates a credible risk of doing so in the future if permitted to continue.

*Drug Mart III, 2007 U.S. Dist. LEXIS 93493, 2007 WL 4526618, at *13* (relying on *Merit Motors, Inc. v. Chrysler Corp., 569 F.2d 666, 187 U.S. App. D.C. 11 (D.C. Cir. 1977)*, *Ashley Meadow Farms, Inc. v. Am. Horse Shows Ass'n, Inc., 617 F. Supp. 1058 (S.D.N.Y. 1985)*, and *Machovec v. Council for the Nat'l Register of Health Serv. Providers in Psych., Inc., 616 F. Supp. 258 (E.D. Va. 1985))*.

Accordingly, **[*51]** Judge Glasser granted summary judgment to the designated defendants with respect to the designated plaintiffs' claims for equitable relief. Because plaintiffs have failed to demonstrate competitive injury, Judge Glasser's decision controls here, and it requires dismissal of plaintiffs' claims for injunctive relief.

4. Section 2(d) and 2(f) Claims

Plaintiffs also bring claims pursuant to Sections 2(d) and 2(f) of the Act. *15 U.S.C. §§ 13(d)*, *(f)*.[21] Because 2(f) claims are derivative in nature and I find that plaintiffs failed to establish their 2(a) claims, defendants' motion for summary judgment with respect to the 2(f) claims is granted. *See Intimate Bookshop, Inc. v. Barnes & Noble, Inc., 88 F. Supp. 2d 133, 137 (S.D.N.Y. 2000)*. *Section 2(d)* does not require plaintiffs to establish competitive injury, *Blue Tree Hotels, 369 F.3d at 219* (citing *FTC v. Simplicity Pattern Co., 360 U.S. 55, 65, 79 S. Ct. 1005, 3 L. Ed. 2d 1079 (1959))*; *Hygrade Milk & Cream Co., 1996 U.S. Dist. LEXIS 6598, 1996 WL 257581, at *13*; under the Clayton Act, however, plaintiffs must establish antitrust injury. Because I find that plaintiffs have failed to establish antitrust injury, defendants' motion for summary judgment with respect to the 2(d) claims is also granted.

CONCLUSION

For all these reasons, defendants' motion for summary judgment is granted.

SO ORDERED.

Opinion

ORDER DENYING DEFENDANT'S MOTION TO DISMISS [DOC. 14]

On January 30, 2012, Plaintiff Clean Conversion Technologies, Inc. ("CCT") commenced this action seeking injunctive relief and damages for alleged violations of the Sherman Act (*15 U.S.C. §§ 1-2*), the Clayton Act (*15 U.S.C. § 18*), the California Cartwright Act (*Cal. Bus. & Prof. Code § 16720, et seq.*), and California's Unfair Competition Law ("UCL") (*Cal. Bus. & Prof. Code § 17200, et seq.*). Defendant CleanTech Biofuels, Inc. ("CleanTech") now moves to dismiss the complaint. [1] CCT opposes.

---

[1] Defendant Steve Vande Vegte ("SVV") does not join in CleanTech's motion.

The Court found this motion **[*2]** suitable for determination on the papers submitted and without oral argument. *See* Civ. L.R. 7.1(d.1). (Doc. 17.) For the following reasons, the Court **DENIES** CleanTech's motion.

I. BACKGROUND

A. Pressurized Steam Classification ("PSC") Conversion

CleanTech is a Delaware corporation engaged in the business of producing cellusitic biomass from municipal solid waste. (Compl. ¶ 85.) CCT is a Washington corporation and CleanTech competitor in the PSC conversion market. (*Id.* ¶¶ 1, 102-05.)

"PSC conversion is used to convert solid, contaminated municipal waste . . . into certain kinds of usable commercial materials—specifically, various kinds and types of ferrous metals, non-ferrous metals, plastics, glass, and usable biomass." (Compl. ¶ 14.) "Usable biomass in turn can be transformed into various commercial materials and other kinds of materials." (*Id.*) Without PSC conversion, a very substantial portion of contaminated municipal waste must be buried in landfills, incinerated, or only partially treated by other methods. (*Id.* ¶ 46.)

B. Antitrust Allegations

Beginning in 2008, CleanTech set out to obtain all of the patented PSC conversion technology in existence at the time. (*See* Compl. ¶¶ 87-95.) **[*3]** In September 2008, CleanTech acquired Biomass North America Licensing, Inc. ("Biomass"), the owner of several important patent applications relating to PSC technology—the "Noll Patents"—at that time. (*Id.* ¶ 93.) This transaction gave CleanTech the rights to practice PSC technology described by several patents and patent applications, most importantly the technology described in several U.S. Patent Applications and their related Canadian Patent Applications. (*Id.*) In October 2008, CleanTech purchased another set of PSC patents—the "Eley Patents"—from World Waste Technologies, Inc. ("World Waste"). (*Id.* ¶ 94.) In both instances, CleanTech structured the transactions so that Biomass and World Waste would derive substantial profits by cooperating with CleanTech's attempted monopolization of the PSC conversion market. (*Id.* ¶ 97.) Furthermore, CleanTech's purchase of the Eley Patents from World Waste did not reflect the market value of the patents. (*Id.* ¶ 101.) Rather, CleanTech paid a huge premium in order to accomplish its goal of consolidating the PSC technology in one entity. (*Id.*)

After acquiring the Eley Patents, CleanTech allegedly put into motion a scheme to terminate the Master License **[*4]** Agreement for those patents so that it could corner the market for PSC conversion. (Compl. ¶¶ 96, 100.) However, the Eley Patents had already been exclusively licensed to one of CleanTech's competitors, Clean Earth Solutions. (*Id.* ¶¶ 98-99, 104.) Clean Earth Solutions and its exclusive license of the Eley Patents was one of the final impediments to CleanTech cornering of the PSC market. (*Id.*) Thus, immediately after CleanTech purchased the Eley Patents from World Waste, it set in motion a scheme to terminate Clean Earth Solution's exclusive license. (*Id.* ¶ 100.) Working with Vande Vegte, CleanTech allegedly conspired to have litigation initiated against Clean Earth Solutions to pressure it into giving up its rights to the PSC technology in the Eley Patents ("SVV litigation"). (*Id.* ¶ 103.) As a result of the debt load caused by the SVV litigation, Clean Earth Solutions sold its license under the Eley Patents to CCT. (*Id.* ¶¶ 1, 102-05.) Vande Vegte then used this transfer as a basis of another lawsuit filed against Clean Earth Solutions and CCT for fraudulent transfer. [2]

---

[2] Both parties refer to a second lawsuit between Vande Vegte and CCT in their moving papers even though this *vital* second **[*5]** lawsuit is not clearly alleged anywhere in the complaint. (*See* Def.'s Mot. 7:11-12; Pl.'s Opp'n 4:4-6.) CleanTech cites Paragraph 106 of the complaint, which only passingly mentions "concurrent litigation" against Clean Earth Solutions with no mention of CCT; CCT conveniently does not identify any allegation in the complaint that discusses the second lawsuit.

CleanTech seized the license transfer as an opportunity to attempt to terminate the license itself. (Compl. ¶ 106.) In March 2011, CleanTech's President, Ed Hennessey, approached CCT and stated that he "had talked with Steve Vande Vegte and can make this [State Court] lawsuit go away if you cooperate with me" in working together to market the PSC conversion technology. (*Id.* ¶¶ 106-07.) Based on the allegations in the complaint, it is unclear which state-court lawsuit Mr. Hennessey was referring to.

In September 2011, Mr. Hennessey and Vande Vegte contacted the original inventor of the PSC technology in the Eley Patents, Dr. Michael Eley, in an effort to convince him that he should participate in their attempt to monopolize the PSC market. (Compl. ¶¶ 100, 109.) Then, on November 10, 2011, Mr. Hennessey put in CleanTech's 10-Q filing **[*6]** that it was the company's "intention to 'consolidate the ownership' of the intellectual property rights to PSC technology to corner the PSC market by excluding all other market participants." (*Id.* ¶ 108.)

CCT commenced this action on January 20, 2012, alleging claims against CleanTech for various antitrust violations. Specifically, CCT alleges CleanTech's "overall scheme" to monopolize the PSC market violated *Sections 1* and *2* of the Sherman Act as well as conspiracy to monopolize under the same statute. (Compl. ¶¶ 114, 124.) Additionally, CCT brings suit under the Clayton Act, the California Cartwright Act, and California's UCL. (*Id.* ¶¶ 131, 140, 144.)

II. LEGAL STANDARD

The court must dismiss a cause of action for failure to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. A motion to dismiss under *Rule 12(b)(6)* tests the legal sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. The court must accept all allegations of material fact as true and construe them in light most favorable to the nonmoving party. *Cedars-Sanai Med. Ctr. v. Nat'l League of Postmasters of U.S., 497 F.3d 972, 975 (9th Cir. 2007)*. Material allegations, even **[*7]** if doubtful in fact, are assumed to be true. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. However, the court need not "necessarily assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Warren v. Fox Family Worldwide, Inc., 328 F.3d 1136, 1139 (9th Cir. 2003)* (internal quotation marks omitted). In fact, the court does not need to accept any legal conclusions as true. *Ashcroft v. Iqbal, 556 U.S. 662, 677, 129 S. Ct. 1937, 1949, 173 L. Ed. 2d 868 (2009)*

"While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (internal citations omitted). Instead, the allegations in the complaint "must be enough to raise a right to relief above the speculative level." *Id.* Thus, "[t]o survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 129 S. Ct. at 1949* (citing *Twombly, 550 U.S. at 570*). **[*8]** "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* A complaint may be dismissed as a matter of law either for lack of a cognizable legal theory or for insufficient facts under a cognizable theory. *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 534 (9th Cir. 1984)*.

III. DISCUSSION[3]

[3] CleanTech claims that CCT's opposition was untimely. (Def.'s Reply 6:23-28.) This argument is completely baseless and frivolous. Based on the May 7, 2012 hearing date for this motion, CCT's opposition was due April 23, 2012. CleanTech concedes that that is indeed the due date for the opposition. The docket shows that CCT filed its opposition on April 23, 2012. (Doc. 20.) Accordingly, the Court rejects CleanTech's claim and will consider CCT's opposition in assessing the merits of CleanTech's motion.

CleanTech moves to dismiss CCT's complaint on three grounds: (1) CCT lacks standing to pursue its antitrust **[*9]** claims because it fails to allege an antitrust injury; (2) litigation between CCT and Vande Vegte cannot serve as the basis for this action because the litigation is privileged under the *Noerr-Pennington* doctrine and California's absolute litigation privilege; and (3) CCT fails to allege "market power" under the Sherman Act. The Court will address each argument below.

A. Standing

Only those plaintiffs who meet the requirements for "antitrust standing" may pursue a claim under the antitrust acts. *Am. Ad Mgmt., Inc. v. Gen. Tel. Co., 190 F.3d 1051, 1054-55 (9th Cir. 1999)*. To have antitrust standing, a plaintiff must adequately allege "an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999)*. The Ninth Circuit has defined antitrust injury as injury to the process of competition and consumer welfare. *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 901 (9th Cir. 2008)*; *Amarel v. Connell, 102 F.3d 1494, 1509 (9th Cir. 1997)* (citing *Assoc. Gen. Contractors of Cal. v. Cal. State Council of Carpenters, 459 U.S. 519, 528, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. The **[*10]** plaintiff therefore must show more than injury to itself as a competitor, "but rather injury to the competition." *Austin v. McNamara, 979 F.2d 728, 739 (9th Cir. 1992)*. In addition, to have antitrust standing a plaintiff must be a "participant in the same market as the alleged malefactors." *Glen Holly Entm't, Inc. v. Tektronix Inc., 352 F.3d 367, 373 (9th Cir. 2003)* (internal quotation marks omitted). "In other words, the party alleging the injury must be either a consumer of the alleged violator's goods or services[,] or a competitor of the alleged violator in the restrained market." *Eagle v. Star-Kist Foods, Inc., 812 F.2d 538, 540 (9th Cir. 1987)*.

CleanTech contends that CCT lacks standing to pursue its Sherman Act and Cartwright Act claims because "[t]here is no antitrust violation for intending to enforce legitimate patents rights" and CCT fails to allege an antitrust injury. (Def.'s Mot. 6:23-7:6.) CleanTech does not elaborate much on the former except to add that "CCT could not suffer an antitrust injury arising from CleanTech enforcing its patent rights." (*Id.*) It does, however, elaborate a bit more on the latter, contending that "termination of the license agreement under which **[*11]** CCT intended to use the Eley Patents is not a basis for antitrust injury," and "[n]either is the purported litigation against CCT[.]" (*Id.*) CCT responds that it properly alleges its standing, identifying allegations throughout the complaint that purportedly show an antitrust injury. (Pl.'s Opp'n 7:19-8:16.)

To begin, CCT alleges that it participates in the business of producing cellustic biomass as a licensee of PSC technology. (Compl. ¶¶ 85, 102, 110, 121, 133, 139.) From these allegations, the Court can reasonably infer that CCT is a participant in the same market as CleanTech. *See Glen Holly Entm't, 352 F.3d at 373*.

Moving on, CCT alleges harms that are precisely the type that antitrust laws were designed to prevent. Specifically, it alleges that but for the conspiracy to completely eliminate CleanTech's competition in the market for PSC conversion technology, there would be participants other than CCT who could provide competitive bids and options to consumers. (Compl. ¶ 101, 121, 133.) CCT also alleges that CleanTech's conspiracy suppressed, eliminated, and interfered with competition and continues to do so through a scheme of strategic litigation, market manipulation, and back-room **[*12]** agreements to manipulate market participants out of the market—including CCT—and disrupt the natural competition in the relevant market for PSC conversion technology and services. (*Id.* ¶ 102.) Further, the complaint includes allegations that CleanTech's conduct produced various anticompetitive effects including: (a) adversely affecting competition in the market for PSC technology and services (*id.* ¶ 110), (b) increasing prices in the PSC market (*id.* ¶ 114), (c) monopolizing the market related to municipal waste by PSC conversion (*id.* ¶ 121), and (d) raising the barriers to entry into the PSC market (*id.* ¶ 122). CCT does not allege that it suffered antitrust injury from CleanTech's enforcement of its patent rights. Rather, CCT alleges that it, as well as the market as a whole, suffered an injury to competition as a result of CleanTech's effort to conspire to consolidate the market and monopolize the market power into one entity. (*Id.* ¶¶ 110, 113, 120, 121, 122, 133, 136, 137.)

Accordingly, the Court finds that CCT properly alleges an antitrust injury and thus has standing to pursue its antitrust claims. *See* Austin, 979 F.2d at 739.

B. Market Power

In order to state a valid claim under **[*13]** the Sherman Act, a plaintiff must allege both that a "relevant market" exists and that the defendant has power within that market. *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008)*. CCT brings one of its antitrust claims under *§ 1* of the Sherman Act, which governs restraint of trade and tying, and another under *§ 2* of the Sherman Act, which governs monopolization and attempted monopolization. The "relevant market" and "market power" requirements apply identically under these two sections of the Sherman Act. *Id. at 1044 n.3*. CleanTech does not challenge CCT's Clayton Act claim. And though ***antitrust law*** requires allegations of product market, a geographic market, and harm to competition, CleanTech does not challenge any of CCT's allegations related to those requirements. *See* *id. at 1045*. Rather, CleanTech only challenges the sufficiency of CCT's market-power allegation. Thus, that is the issue that the Court will address below.

"Market power is the ability to raise price profitability by restricting output; when a party has sufficient market power to exclude competition or control prices, that party possesses monopoly power." *DocMagic, Inc. v. Ellie Mae, Inc., 745 F. Supp. 2d 1119, 1136 (9th Cir. 2010)* **[*14]** (citation and internal quotation marks omitted). Market power need not be pled with specificity, and whether a defendant actually possesses market power is a factual question. *Newcal, 513 F.3d at 1045, 1051*. A plaintiff may plead market power through allegations of direct evidence showing the effects of anticompetative behavior, or indirect evidence of market power. To demonstrate market power indirectly, a plaintiff must define the relevant market, and show that (1) the defendant has a dominant share of that market, and (2) that there are significant barriers to entry and existing competitors lack the capacity to increase their output in the short run. *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1439 (9th Cir. 1995)* (the "barriers to entry" test looks at not only whether "there are significant barriers to entry [but also whether] . . . existing competitors lack the capacity to increase their output in the short run"). Additionally, to bring a claim for attempted monopolization, rather than pleading monopoly power, a plaintiff may plead a "dangerous probability" that the defendant may be able to achieve monopoly power. *Newcal, 513 F.3d at 1044 n.3*.

CleanTech argues that "the **[*15]** only allegation of market power is that CleanTech holds the Eley Patent and Noll Patent," and there are no other allegations to support any antitrust violations regarding those patents. (Def.'s Mot. 11:11-17.) It contends that CCT's Cartwright Act claims fail for the same reasons. (*Id.* at 11:18-12:6.) In response, CCT argues that "it alleges facts sufficient to support an indirect inference that Cleantech possesses market power in the PSC market," identifying allegations throughout the complaint to support its argument. (Pl.'s Opp'n 10:18-11:3.)

As briefly discussed above, CCT adequately alleges that the relevant market here is the PSC conversion market. (*See* Compl. ¶¶ 85, 102, 110, 121, 133, 139.) CCT also alleges that CleanTech has taken action to remove competitors from that market in order to dominate it. (*Id.* ¶¶ 93-97, 100-02, 113-14, 121-23, 133, 136-37.) Specifically, CleanTech acquired both competing patents, the Eley patents and Noll patents, concerning the PSC conversion process in the United States with the intent to "consolidate the ownership" of the intellectual-property rights to the PSC technology in order to corner the PSC market by excluding all other market participants. **[*16]** (*Id.* ¶¶ 95-97, 108-10.) A prime example of this exclusionary behavior is CleanTech's alleged attempt to exclude CCT—the *only* licensee under the Eley Patents—from the PSC market by terminating a license agreement that granted CCT rights to use the Eley Patents. (*Id.* ¶¶ 98-106.) This type of exclusionary behavior also constitutes a substantial barrier to entry into the market for any company considering developing its own offering of PSC services. (*See id.* ¶¶ 72, 77.) Additionally, CCT alleges that in a market which already maintains high entry costs in research, development, and manufacturing of the equipment, it is unlikely that there will be additional entry into the PSC market as a result of CleanTech's behavior. (*Id.* ¶ 122.) From these allegations, the Court can reasonably infer that

CleanTech has indirect market power in the PSC conversion market, and that there is a "dangerous possibility" that CleanTech may be able to achieve monopoly power. [4] *See* Rebel Oil, 51 F.3d at 1439.

Finally, CleanTech's argument regarding patent rights and market power are misguided. Contrary to CleanTech's contentions, CCT does not allege that CleanTech obtained its patents through fraud on the Patent Office. Moreover, CCT is not a patent-infringement plaintiff and is not alleging that as a part of CleanTech's conspiracy to monopolize the PSC market that CleanTech improperly maintained infringement actions against CCT. Instead, CCT alleges that CleanTech, through its conspiracy with Vande Vegte, attempted to consolidate market power in one entity, wrongfully terminated at least one patent, and created artificially high barriers to entry into the PSC market. (Compl. ¶¶ 112-16, 119-22, 133, 136-37.) Therefore, the Court rejects CleanTech's argument that this action is a matter of patent-enforcement **[*18]** rights.

C. *Noerr-Pennington* Doctrine

The *Noerr-Pennington* doctrine protects activities by parties to influence government policy or legislation for antitrust claims. *See* E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 135, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961); United Mine Workers v. Pennington, 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965). The doctrine nominally began as a judicially-created limitation on the scope of the Sherman Act with respect to activities by parties to petition the government to take a certain course of action beneficial to them and harmful to competitors. *See, e.g.,* Noerr, 356 U.S. at 135. The doctrine has since been extended to protect those who petition for other forms of governmental actions. *See, e.g.,* Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972) (administrative and judicial proceedings); City of Columbia v. Omni Outdoor Adver., Inc., 499 U.S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991) (municipal ordinances). The doctrine has also been expanded to include litigation to protect rights such as patents. *See* Prof'l Real Estate Investors v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993). The *Noerr-Pennington* doctrine protects "not only petitions sent directly to the court in the course of **[*19]** litigation, but also 'conduct incidental to the prosecution of the suit.'" Sosa v. DIRECTV, Inc., 437 F.3d 923, 934-35 (9th Cir. 2006). The Ninth Circuit has held that "communications between private parties are sufficiently within the protection of the Petition Clause to trigger the *Noerr-Pennington* doctrine, so long as they are sufficiently related to petitioning activity." Id. at 935.

CleanTech contends that the litigation between Vande Vegte and CCT—which the Court again emphasizes is not alleged in the complaint—does not fall within one of the recognized circumstances to lose *Noerr-Pennington* protection, and thus the litigation is protected by the doctrine. (Def.'s Mot. 8:21-25.) CCT responds that the litigation is not protected by the *Noerr-Pennington* doctrine because references to the litigation do not involve "petitioning activity that falls under the *Noerr-Pennington* umbrella." (Pl.'s Opp'n 12:17-25, 18:17-14:12.) CleanTech appears to challenge an allegation that it characterizes as stating that "Clean Tech conspired with SVV to engage in litigation against CCT to monopolize the relevant market." (Def.'s Mot. 7:11-12.) However, the application of the *Noerr-Pennington* doctrine **[*20]** appears to substantively center around the allegation that "CleanTech's president, Ed Hennessey manifested the Defendants' intent to manipulate and conspire to monopolize the PCS [sic] market when he told CCT on March 3, 2011, that he 'had talked with Steve Vande Vegte and can make this [State Court] lawsuit go away if you will cooperate with me' in working together to market the PSC conversion technology." [5] (Compl. ¶ 107.)

---

[4] The Cartwright Act is California's ***antitrust law*** that "was modeled after the Sherman Act." Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001). Accordingly, "[t]he analysis under **[*17]** California's ***antitrust law*** mirrors the analysis under federal law because the Cartwright . . . was modeled after the Sherman Act." *Id.* (citations omitted). Therefore, because CleanTech's argument against CCT's Cartwright Act claim is predicated on the insufficiency of CCT's Sherman Act claims, CleanTech also fails to show that CCT's Cartwright Act claim is insufficiently pled as well.

[5] Though it is unclear which litigation that the "State Court lawsuit" refers to, the analysis below applies to both the SVV litigation and the unalleged second lawsuit between Vande Vegte and CCT.

CCT refers to litigation only in that Mr. Hennessey, CleanTech's president, used it at leverage to attempt to compel CCT to "work[] together to market the PSC conversion technology." (*See* Compl. ¶ 107.) But based on the allegations in the complaint, Mr. Hennessey does not appear to be party to the SVV litigation or the litigation between Vande Vegte and CCT; the SVV litigation is between Vande Vegte and Clean Earth Solutions (*id.* ¶ 103), and the unalleged second litigation appears to be between Vande Vegte and CCT. And though at first glance the offer seems to be for some **[*21]** sort of settlement, that would be an inaccurate characterization because Mr. Hennessey is not a party to either litigation, and thus he lacks the authority to make the lawsuit "go away."

More importantly, CleanTech puts the cart before the horse. Litigation is only implicated in order to support an alleged scheme to violate ***antitrust law***. CleanTech does not, however, provide any substantive analysis as to whether the *Noerr-Pennington* doctrine even applies. It neither specifically identifies any petitions sent directly to the court in the course of nor any conduct incidental to the prosecution of the either litigation. *See Sosa, 437 F.3d at 934-35*. Rather, CleanTech merely starts its analysis from the presumption that the doctrine applies, and then goes on to argue that the unalleged litigation between Vande Vegte and CCT does not fall within the "sham" exception. (*See* Def.'s Mot. 7:15-19, 7:20-8:25.) CleanTech has not shown that it is entitled to the benefit of such a presumption. Simply put, CleanTech fails specifically identify any petitioning activity, and also fails to show that either litigation is entitled to *Noerr-Pennington* protection. Therefore, without more, the Court cannot **[*22]** conclude that either litigation is protected by the *Noerr-Pennington* doctrine. [6]

IV. CONCLUSION & ORDER

In light of the foregoing, the Court **DENIES** CleanTech's motion to dismiss. (Doc. 14.)

IT IS SO ORDERED.

DATED: August 20, 2012

/s/ M. James Lorenz

M. James Lorenz

United States District Court Judge

End of Document

---

[6] CleanTech further moves to dismiss CCT's UCL claim on the grounds that it is barred by California's absolute litigation privilege. "The usual formation is that the privilege applies to any communication (1) made in judicial or quasi judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve objects of the litigation; and (4) that have some connection or logical relation to the action." *People v. The Pac. Lumber Co., 158 Cal. App. 4th 950, 958, 70 Cal. Rptr. 3d 501 (2008)* (internal citations and quotation marks omitted). CleanTech fails to identify any communication or action that falls under this protection. Therefore, the Court rejects CleanTech's absolute-litigation-privilege argument.

Opinion

[*107] **RULING ON MOTION TO COMPEL ARBITRATION**

This case involves a putative class action brought by a Comcast subscriber who is attempting to sue the defendants under the Connecticut Unfair Trade Practices Act ("CUTPA") and the Sherman Act. An arbitration agreement exists between the two parties, and at issue here is whether the class action waiver provision of **[**2]** that agreement is enforceable.

At the time the parties wrote their briefs, there was some question whether the Second Circuit's doctrine on class arbitration had been overruled by the Supreme Court's decision in *AT&T Mobility LLC v. Concepcion, 131 S. Ct. 1740, 179 L. Ed. 2d 742 (2011)*. Two days before the oral argument on the motion to compel, the Second Circuit issued an opinion holding that the Second Circuit's doctrine had not been overruled. *In re American Express Merchants Litig., 667 F.3d 204 (2d Cir. 2012)* ("*American Express III*").

During the hearing, I granted the parties' request to submit supplemental briefing in light of *American Express III* and the issues raised during oral argument. The parties submitted additional briefs, which I have reviewed. For the reasons that follow, the defendants' motion to compel arbitration, doc. 57, is **DENIED**.

I. Background

The plaintiff, Robert Fromer, is a customer of Comcast Corporation, Comcast of Connecticut, Inc., Comcast Cable Communications, LLC, and Comcast Cable Communications Holdings, Inc. (collectively, **[*108]** "Comcast"). Fromer first subscribed to Comcast's cable television service on October 21, 1999, and to its high-speed internet service on April 18, 2002. **[**3]** Defs.' Mot. to Compel Arbitration ("Defs.' Mot. to Compel"), Ex. 1 at ¶ 5. In July 2007, Comcast included an arbitration notice along with Fromer's monthly bill. *Id.* at ¶ 7; Defs.' Mot. to Compel, Ex. A.

On July 26, 2007, Fromer began subscribing to Comcast Digital Voice. Defs.' Mot. to Compel, Ex. 1 at ¶ 9. When Comcast connected Fromer's Digital Voice service, it installed an embedded media terminal adapter ("eMTA"). [1] *Id.* at ¶ 10. At that time Comcast also gave Fromer a work order. *Id.* The work order stated:

> If this Work Order relates to the initial installation of services, I acknowledge receipt of Comcast's Welcome Kit(s) which contain the Comcast subscriber agreement(s), the Comcast subscriber privacy notice(s) and the other important information about the service(s). I agree to be bound by the Comcast subscriber agreement(s) which constitute the agreement(s) between Comcast and me for the service(s).

Defs.' Mot. to Compel, Ex. B at 1. The welcome kit included an arbitration agreement. Defs.' Mot. to Compel, Ex. C at 20-22.

In March 2008, Comcast included a Subscriber Agreement with Fromer's monthly bill. Defs.' Mot. to Compel, Ex. 1 at ¶ 14. The 2008 Subscriber Agreement also contained an arbitration clause. Defs.' Mot. to Compel, Ex. D at 9-11. The arbitration agreement provided:

> If you have a Dispute (as defined below) with Comcast that cannot be resolved through the informal dispute resolution process described in this Agreement, you or Comcast may elect to arbitrate that Dispute in accordance with the terms of this Arbitration Provision rather than litigate the Dispute in court.

Id. at 9. Under the agreement, a "dispute" is defined as:

> [A]ny dispute, claim or controversy between you and Comcast regarding any aspect of your relationship with Comcast that has accrued or may thereafter accrue, whether based in contract, statute, regulation, ordinance, tort (including, but not limited to, fraud, misrepresentation, fraudulent inducement, negligence or any other intentional tort), or any other legal or equitable theory.

Id. The agreement also said that the arbitrators were to determine "the validity, enforceability or scope of this Arbitration Provision (with the exception **[**5]** of the enforceability of the class action waiver clause provided in paragraph F(2))." *Id.*

The arbitration agreement contained an opt-out provision:

> IF YOU DO NOT WISH TO BE BOUND BY THIS ARBITRATION PROVISION, YOU MUST NOTIFY COMCAST IN WRITING WITHIN THIRTY (30) DAYS OF THE DATE THAT YOU FIRST RECEIVE THIS AGREEMENT . . . . YOUR DECISION TO OPT OUT OF THIS ARBITRATION PROVISION WILL HAVE NO ADVERSE EFFECT ON YOUR RELATIONSHIP WITH COMCAST OR THE DELIVERY OF SERVICES TO YOU BY COMCAST.

Id. at 10.

Additionally, the arbitration agreement contained a class action waiver:

---

[1] "An eMTA is a device that allows a Digital Voice subscriber to make phone calls, as well as to access the Internet for data services, over a HSI [high-speed **[**4]** internet] connection." *Id.* at ¶ 10.

> THERE SHALL BE NO RIGHT OR AUTHORITY FOR ANY CLAIMS TO BE ARBITRATED OR LITIGATED **[*109]** ON A CLASS ACTION OR CONSOLIDATED BASIS OR ON BASES INVOLVING CLAIMS BROUGHT IN A PURPORTED REPRESENTATIVE CAPACITY ON BEHALF OF THE GENERAL PUBLIC (SUCH AS A PRIVATE ATTORNEY GENERAL), OTHER SUBSCRIBERS, OR OTHER PERSONS SIMILARLY SITUATED UNLESS THE STATUTE UNDER WHICH YOU ARE SUING PROVIDES OTHERWISE.

Id. "If the class action waiver clause is found to be illegal or unenforceable, the entire Arbitration Provision will be unenforceable, and the dispute will be decided by a court." *Id.* at 11.

On December 21, 2009, Fromer brought a class action **[**6]** against Comcast alleging (1) a violation of the Sherman Antitrust Act for unlawful bundling of the DV service with the eMTA modem, and (2) violation of CUTPA. Doc. 1. Comcast has now filed a motion to compel arbitration on both counts. Doc. 57.

II. Discussion

A. The Arbitration Agreement and the Federal Arbitration Act Govern These Claims

Fromer does not dispute that both the Sherman Act and the CUTPA claims fall within the bounds of the arbitration agreement. That agreement allows for arbitration of any dispute, claim, or controversy between Fromer and Comcast regarding any aspect of Fromer's relationship with Comcast; it is clear that the claim of unfair bundling falls within the reach of the arbitration agreement. It is also clear that the Federal Arbitration Act ("FAA") applies here, because this is a contract "evidencing a transaction involving commerce." *9 U.S.C. § 16(a)(2)*.

Fromer also does not allege that the arbitration agreement was procedurally unconscionable. Instead, Fromer argues that the class action waiver renders the arbitration agreement substantively unconscionable, and therefore, unenforceable.

B. The *American Express* Line of Cases

In *Green Tea Financial Corp.-Alabama v. Randolph, 531 U.S. 79, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)*, **[**7]** the Supreme Court enforced an arbitration agreement between a financial institution and a consumer attempting to bring a claim under the Truth in Lending Act. The plaintiff in *Green Tea* argued that,

> the arbitration agreement's silence with respect to costs and fees creates a "risk" that she will be required to bear prohibitive arbitration costs if she pursues her claims in an arbitral forum, and thereby forces her to forgo any claims she may have against petitioners. Therefore, she argues, she is unable to vindicate her statutory rights in arbitration.

Id. at 90. The Court acknowledged that "[i]t may well be that the existence of large arbitration costs could preclude a litigant such as [the plaintiff] from effectively vindicating her federal statutory rights in the arbitral forum." *Id*. The Court refused to prohibit arbitration, however, because the plaintiff had failed to show that she would "bear such costs if she goes to arbitration." *Id.* "[W]here, as here, a party seeks to invalidate an arbitration agreement on the ground that arbitration would be prohibitively expensive, that party bears the burden of showing the likelihood of incurring such costs." *Id. at 92*.

Although the Supreme **[**8]** Court's pronouncement in *Green Tea* was technically dicta, it still evidenced that the Supreme Court envisioned that arbitration agreements could be voided where arbitration would be so expensive as to preclude a litigant from vindicating her rights. The Second Circuit created a framework for employing *Green Tree in In re American Express Merchants' Litigation, 554 F.3d 300* ***[*110]*** *(2d Cir. 2009)* ("*American Express I*"). In that case, the plaintiffs attempted to bring a tying antitrust claim under the Sherman Act and the Clayton Act; the defendant sought to compel arbitration. The arbitration clause at issue contained a class action waiver provision. The Second Circuit held that the class action waiver provision could not be enforced because the plaintiffs' antitrust claims could, "for all intents and purposes, only be pursued through the aggregation of individual claims, either in class action litigation or in class arbitration." *Id. at 317*. The Court held that the plaintiffs could not pursue their claims individually because, with expert fees, the costs of the case could be as much as $1 million, and no plaintiff could expect to receive more than $38,500. *Id.* Moreover, although the Sherman **[**9]** Act allowed a plaintiff, if successful, to "recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee," that would still leave the plaintiff unable to pay the expert witness fees. *Id. at 317-18* (internal citations omitted). The Second Circuit also noted that the possibility of attorneys' fees was insufficient to overcome this problem, because no plaintiff was assured of victory, and potential plaintiffs had to factor the risk of losing into their calculations of the risks and benefits of litigation. *Id. at 318*.

Shortly after the Second Circuit issued its decision in *American Express I*, the Supreme Court decided *Stolt-Nielsen S.A. v. AnimalFeeds Int'l, 559 U.S. 662, 130 S. Ct. 1758, 176 L. Ed. 2d 605 (2010)*. The plaintiff in that case had attempted to bring a class arbitration. The arbitration agreement was silent with regard to whether class arbitrations were permissible, and the Supreme Court held that "a party may not be compelled under the FAA to submit to class arbitration unless there is a contractual basis for concluding that the party *agreed* to do so." *Id. at 1775*.

After the Supreme Court decided *Stolt-Nielsen*, it vacated the Second Circuit's decision in *American* ***[**10]*** *Express I* and ordered the Second Circuit to reconsider its decision in light of *Stolt-Nielsen*. The Second Circuit responded with *In re American Express Merchants Litigation, 634 F.3d 187 (2d Cir. 2011)* ("*American Express II*"), which reaffirmed the holding in *American Express I*. The Court noted that "*Stolt-Nielsen* states that parties cannot be forced to engage in a class arbitration absent a contractual agreement to do so," but concluded that "[i]t does not follow, as Amex urges, that a contractual clause barring class arbitration is *per se* unenforceable." *Id. at 193*. The Court remarked that class actions are an important vehicle for vindicating statutory rights, and that public policy concerns can bar enforcement of an agreement to arbitrate. *Id. at 194, 197*. Because the record made clear that the cost of arbitration could be prohibitive, the plaintiffs were effectively deprived of the statutory protections of antitrust laws, and the class action waiver was void. *Id. at 197-99*.

A little more than a month after the Second Circuit decided *American Express II*, the Supreme Court issued *AT&T Mobility, LLC v. Concepcion.* The Court held that California's *Discover Bank* rule, which classified **[**11]** most class arbitration waivers as unconscionable, was preempted by the FAA. In doing so, the Court discussed the dangers of class actions in the arbitration setting: class action arbitration often involved absent parties, sacrificed arbitration's informality, and increased the risk to defendants, since "[t]he absence of multilayered review makes it more likely that errors will go uncorrected." *131 S. Ct. at 1750-52*.

In response to *Concepcion*, the Second Circuit requested additional briefing on whether *American Express II* was inconsistent **[*111]** with *Concepcion*. The result was *American Express III,* which again held the arbitration agreement to be invalid. The Second Circuit first noted that *American Express II* had not been overruled by *Concepcion: Concepcion* invalidated state procedures that were inconsistent with the FAA, while *American Express II* rested on a "vindication of statutory rights analysis, which is part of the federal substantive law of arbitrability." *667 F.3d at 213* (emphasis added) (internal citations omitted). The Court remarked that *Stolt-Nielsen* and *Concepcion* do not "require that all class-action waivers be deemed per se unenforceable," *id. at 214*, and that *Green Tree* had **[**12]** not been overruled by *Concepcion. Id.* at 216. The Court then held that when an arbitration agreement effectively prevents the exercise of statutory rights, the agreement is void. As in *American Express I* and *American Express II*, the Court held that the costs of arbitration were so high — and the amount that could plausibly be recovered so low — that rational actors were unlikely to arbitrate. It is clear, then, that the *American Express* line of cases is still the law of the Second Circuit.

Comcast next argues that I should decline to follow *American Express III* because the Second Circuit neglected to consider that its decision violated the Rules Enabling Act. Comcast argues that a refusal to enforce the arbitration agreement would elevate *Federal Rule of Civil Procedure 23* into a substantive right. Comcast argues that because the *American Express III* Court did not discuss the Rules Enabling Act, I may consider whether the Rules Enabling Act prohibits the outcome reached by the Second Circuit. This argument is misguided for two reasons. First, the cases cited by Comcast do not stand for the proposition that a district court may decline to follow an appellate court if it determines that **[**13]** the appellate court's decision was incorrect for reasons not considered by the higher court. Instead, in the main case cited by Comcast, the district court held that the Second Circuit had not reached the legal issue in question, and thus that there was no precedent to follow. *Jackson v. Ashcroft, No. 3:02cv1739, 2003 U.S. Dist. LEXIS 17241, 2003 WL 22272593, at *3-4 (D. Conn. Sept. 28, 2003)*. The Court did not hold that the Second Circuit would have ruled differently if it had reached the question at issue, but instead held that the Second Circuit had not needed to reach that question. [2]

Moreover, the parties in the *American Express III* action discussed the Rules Enabling Act issue. The appellees in that action, like Comcast here, argued that the invalidation of the arbitration agreement would allow *Rule 23* to enlarge a substantive right, in conflict with the Rules Enabling Act. Br. for Defs.-Appellees at 21. The appellants countered that the question was not whether the class action wavier should be struck down because it limited **[**14]** a procedural right; instead, they argued that it must struck down because it limited substantive statutory rights. "It is not the Federal Rules of Civil Procedure that place limitations upon the FAA, . . . but substantive federal statutes, such as the Sherman and Clayton Acts." Reply Br. for Pls.-Appellants at 7-8. Thus, although the Second Circuit did not discuss the Rules Enabling Act in *American Express III*, it was clearly aware of the arguments, and did not find them persuasive. [3] This court, therefore, must follow *American Express III.*

[*112] Finally, Comcast argues that, even if I am bound by *American Express III*, the facts here are distinguishable. Specifically, Comcast argues that the plaintiffs in *American Express III* could not have opted out of the arbitration agreement without terminating the entire contract. Fromer, on the other hand, had the ability to opt out of the arbitration provision of his agreement. Nevertheless, the distinction is unimportant. An inability to opt out of an arbitration agreement affects the agreement's procedural unconscionability. What is at issue in this case is whether the agreement was *substantively* unconscionable. Indeed, the Court in *American Express III* did not mention the lack of an opt-out provision as a basis of its decision. Thus, *American Express III* applies to this case.

C. Viability of Claims without Class Action

Under *American Express III*, if Fromer can show that the class action **[**16]** waiver here effectively precludes him from pursuing federal statutory remedies, the waiver is void.

1. *Expense of Antitrust Claims*

The party who "seeks to invalidate an arbitration agreement on the ground that arbitration would be prohibitively expensive . . . bears the burden of showing the likelihood of incurring such costs." *American Express III, 667 F.3d at 217* (internal citations omitted). Fromer has produced evidence that economic proof in his case "will require professional services costing in the neighborhood of $500,000 to $750,000." Pl.'s Opp'n to Def.'s Supplemental Mot., Ex. 1 at 5 (Decl. of Economist Gordon Rausser). Comcast suggests there may be evidentiary issues related to Fromer's submission. "[D]oes the Court accept the . . . affidavit at face value? Will there be an evidentiary hearing of battling experts?" Def.'s Supplemental Mot. at 8. I need not engage these questions, however, because Comcast has not introduced any countervailing evidence.

Fromer states that the monthly Comcast charges for eMTA are just a few dollars a month. Fromer's eMTA was installed in July 2007, so he has only been billed for those charges approximately fifty-five times. Assuming the monthly **[**17]** charge is approximately $3 (*see* Defs.' Mot. to Compel, Ex. F), Fromer's damages amount to $165.

---

[2] Another case cited by Comcast, *R.B. Ventures, Ltd. v. Shane*, dealt not with precedential effect, but with collateral estoppel. *No. 91cv5678, 1999 U.S. Dist. LEXIS 12702, 1999 WL 632840 (S.D.N.Y., Aug. 18, 1999)*.

[3] Comcast also argues that the Second Circuit failed to consider the fact that its decision violated the American Rule on attorneys' fees. Under the American Rule, "each party is to bear its own costs of litigation, unmitigated by any fee-shifting exceptions." *Arbor Hill Concerned Citizens Neighborhood Ass'n v. Cnty. of Albany, 522 F.3d 182, 186 (2d Cir. 2008)*. According to Comcast, *American Express III* is contrary to the American Rule "because it provides access to class-action procedures and fees even though the Sherman Act — which should be the controlling statutory pronouncement on the issue — does not." Defs.' Supp. Memo. at 6. As noted above, **[**15]** I cannot ignore *American Express III* just because the Second Circuit did not expressly discuss the American Rule argument. In any case, Comcast's argument is unconvincing. *American Express III* does not require the parties to cover each other's fees. Instead, it merely protects access to statutory remedies.

The Sherman Act allows for treble damages, so Fromer could expect to recover $495. That means Fromer can expect to recover approximately $1 for every $202 spent in litigation; in *American Express*, no plaintiff could expect to recover more than $1 for every $26 spent.

2. *Chance to Recover Fees*

Comcast argues that Fromer can vindicate his rights in arbitration because of the availability of attorneys' fees. [4] Comcast is **[*113]** correct that the Clayton Act provides for reasonable attorneys' fees. *15 U.S.C. § 15*. Nevertheless, the Second Circuit considered and rejected that very argument in *American Express III*. The Second Circuit concluded that the possibility of attorneys' fees was insufficient to convince potential plaintiffs to pursue their claims. "Even with respect to reasonable attorney's fees, which are shifted under *Section 4* of the Clayton Act, the plaintiffs must include the risk of losing, and thereby not recovering any fees, in their evaluation of their suit's potential costs." *American Express III, 667 F.3d at 218* (internal citations omitted). Therefore, because the class action waiver **[**18]** in this case effectively precludes Fromer from pursuing federal statutory remedies, the class arbitration waiver is void.

The arbitration agreement provides that "[i]f the class action waiver is found to be illegal or unenforceable, the entire Arbitration Provision will be unenforceable, and the dispute will be decided by a Court." Defs.' Mot. to Compel, Ex. D at 11. The arbitration agreement, therefore, is unenforceable with respect to the antitrust claims.

D. CUTPA Claim

Fromer has also alleged violations of CUTPA. Fromer argues that the arbitration agreement cannot be enforced with regards to his CUTPA **[**19]** claim for same reasons that his antitrust claim cannot be arbitrated; i.e., CUTPA depends upon the private cause of action for its enforcement, and those statutory rights contained within it cannot be vindicated without the availability of class actions. Fromer's argument, however, misses the most crucial distinction between the CUTPA claim and the antitrust claim: CUTPA is a state statute, while the Sherman Act is a federal statute.

In *Concepcion*, the Supreme Court held that the FAA preempted state law that, in effect, required the availability of class-wide arbitration. *131 S. Ct. at 1748*. In *American Express III*, the Second Circuit made clear that its holding was not precluded by *Concepcion*, because *Concepcion* had not addressed "whether a class-action arbitration waiver clause is enforceable even if the plaintiffs are able to demonstrate that the practical effect of enforcement would be to preclude their ability to vindicate their federal statutory rights." *667 F.3d at 212* (emphasis added). The Second Circuit then engaged in a lengthy discussion about the necessity of vindicating federal statutory rights. The Court concluded, "[e]radicating the private enforcement component from **[**20]** our ***antitrust law*** scheme cannot be what Congress intended when it included strong private enforcement mechanisms and incentives in the antitrust statutes." *Id. at 218*.

Judge Pooler, the author of *American Express III*, emphasized in her concurrence to the denial of the rehearing en banc that the distinction between *Concepcion* and *American Express III* was that the former dealt with state law, while the latter dealt with federal statutory law. "While *Concepcion* addresses state contract rights, *Amex III* deals with federal statutory rights — a significant distinction." *In re American Express Merchants' Litig., 681 F.3d 139, 140 (2d Cir. 2001)* (Pooler, J., concurring). She continued,

> Because its analysis focused wholly on the issue of preemption of state law by federal law, *Concepcion* is silent on the holdings of the Court's earlier cases which enforce arbitration clauses only **[*114]** when those clauses permit parties to effectively vindicate their federal statutory rights.

---

[4] The arbitration agreement itself only provides for filing fees. The arbitration agreement provides that "Comcast will advance all arbitration filing fees and arbitrator's costs and expenses upon your written request given prior to the commencement of the arbitration. You are responsible for all additional costs that you incur in the arbitration, including, but not limited to, attorneys or expert witnesses." Defs.' Mot. to Compel, Ex. D at 10 (emphasis added). Moreover, if the arbitration concludes in Comcast's favor, Fromer is required to reimburse Comcast for the arbitration fees. *Id*.

> In stark contrast, *Amex III* raises a different issue: whether the FAA always trumps rights created by a competing federal statute, as opposed to rights existing under a common law of unconscionability. At issue here is not the right **[**21]** to proceed as a class, but the ability to effectively vindicate a federal statutory right that predates the FAA.

Id. The reasoning in *American Express III* does not apply to the CUTPA claim, and the inability to vindicate that statutory right does not provide a basis for the arbitration agreement unenforceable with regard to that claim.

Fromer also argues that the CUTPA claim should not be arbitrated because the demise of the class action waiver with regard to the antitrust claim leads to the demise of the arbitration agreement as a whole. In support, he points to the language of the arbitration agreement, which provides: "[i]f the class action waiver is found to be illegal or unenforceable, the entire Arbitration Provision will be unenforceable, and the dispute will be decided by a court." Defs.' Mot. to Compel, Ex. D at 11.

Comcast argues that this clause does not destroy arbitration for the CUTPA claim, because the class action waiver has only been deemed unenforceable with regards to the antitrust claim. In other words, the question is whether the arbitration agreement was intended to stand and fall with respect to each claim, or with respect to each lawsuit.

Under the arbitration agreement, **[**22]** a "dispute" is defined as:

> [A]ny dispute, claim or controversy between you and Comcast regarding any aspect of your relationship with Comcast that has accrued or may thereafter accrue, whether based in contract, statute, regulation, ordinance, tort (including, but not limited to, fraud, misrepresentation, fraudulent inducement, negligence or any other intentional tort), or any other legal or equitable theory.

Defs.' Mot. to Compel, Ex. D at 9. The breadth of that definition suggests that a "dispute" is more akin to a lawsuit than a claim. It is also difficult to imagine that the parties intended to pursue analogous claims in both federal court and arbitration. Such a strategy would be inefficient, wasteful, and duplicative. Thus, because the class action waiver was found to be unenforceable with regard to the antitrust claim, "the entire Arbitration Provision [is] unenforceable."

III. Conclusion

For the reasons stated above, I **DENY** the defendants' motion to compel arbitration, doc. 57. It is so ordered. Dated at Bridgeport, Connecticut, this 21st day of August 2012.

/s/ Stefan R. Underhill

Opinion

CIVIL MINUTES - GENERAL

Proceedings: (IN CHAMBERS) Order Granting Plaintiff's Motion for Preliminary Injunction (fld 6-8-12) and Denying Defendant First Fruits Business Ministry 's Motion to Dismiss (fld 5-29-12) and Defendant Roger Catarino's Motion to Dismiss (Fld 7-2-12)

Presently before the Court are the Motions to Dismiss for Lack of Personal Jurisdiction of two defendants, as well as the plaintiff's Motion for Preliminary Injunction. (Docket Nos. 22, 65 & 29.) As set forth herein, the Court denies the Motions to Dismiss and grants the Motion for Preliminary Injunction on the terms set forth in the concluding section of this Order. The preliminary injunction shall take effect upon TriPharma's posting of a bond in the amount of $25,000.

I. Background

To fully understand the factual allegations of the present case, it is helpful to first understand an on-going related case and an arbitration award related thereto.

A. Related Case

The allegations made in the present action implicate the related case, TriPharma LLC v. Max International, LLC, et al., SACV 10-00196 JVS (ANx), **[*2]** which arises out of the parties' sale of competing nutritional supplements, and which the Court briefly summarizes here. Plaintiff in the present case, TriPharma, LLC ("TriPharma"), is also the plaintiff in the related case. In the related case, TriPharma alleges that defendant Max International, LLC ("Max Int'l") deceptively marketed its product MaxWLX as being studied by the University of Connecticut and the University of Minnesota when in fact it was TriPharma's product that was the subject of those studies. (Max FAC ¶ 55.)[1] In addition to Max Int'l, has named as a defendant Imagenetix, Inc. ("Imagenetix"), from which TriPharma derives the right to the products it markets.

In the related case, TriPharma asserts a claim for patent infringement. Specifically, TriPharma alleges it possesses an exclusive license to practice United States Patent No. 6,899,892, entitled "Methods to Reduce Body Fat" that patents a method to achieve weight loss in mammals (including humans) by decreasing the amount of blood leptin through dietary intake of "viscous polysaccharides."[2] (Max FAC ¶ 54 & Ex. A (892 Patent).) The formula was invented by Daniel D. Gallaher and Laura Freiburger, patented in May 2005, and assigned to the Regents of the University **[*3]** of Minnesota ("UMinn"). (Max FAC Ex. A.) UMinn, in turn, entered into an exclusive license agreement with Imagenetix, effective September 2, 2005, which granted Imagenetix "substantially all the rights associated with the 892 Patent." (Max FAC ¶ 62.) After securing that exclusive license from UMinn, Imagenetix then

---

[1] In this subsection, the Court's citation to the "Max FAC" refers to the First Amended Complaint in the related case. In the sections that follow, a citation to the "FAC" should be understood to refer to the operative pleading in the present case. By the same token, the Court citation within this subsection to documents by "Docket No." likewise refer to the docket in the related case.

[2] And even more specifically, the 892 Patent claims a method to achieve weight loss in mammals (including humans) by decreasing the amount of blood leptin through dietary intake of "viscous, water-soluable, non-nutritive, non-starch, indigestible polysaccharides." Id.

granted to Plaintiff TriPharma an exclusive sublicense to the rights associated with the 892 Patent on October 1, 2007. (Max FAC ¶ 64.)

On September 13, 2010, the Court granted TriPharma's Motion to Compel arbitration of its claims against Imagenetix.[3] (Docket No. 71.)

B. TriPharma v. Imagenetix Arbitration Award

Pursuant to the Court's order compelling arbitration, the parties proceeded to arbitration. As described more fully below, the November 2, 2011, arbitration award, which bears JAMS Case No. 1240020032, generally reaffirmed TriPharma's rights under its sublicensing agreement with Imagenetix, and held that agreement would remain in force until October 1, 2014. (See generally FAC Ex. C (Docket No. 21-3 to -5).)

The arbitration award defined the issue before the arbitrator as "the scope of the exclusive sublicense" granted to TriPharma by Imagenetix through a series of agreements. (Id. at 22.) The **[*4]** parties' positions differed on this issue. (Id.) Imagenetix contended that the scope was limited to one specific formula of weight loss product that had been clinically studied at the University of Connecticut. (Id.) In contrast, TriPharma maintained that "the sublicense broadly encompassed all products under the 892 UMinn Patent." (Id.)

Applying California law, after determining that the relevant contractual language was ambiguous, the arbitrator analyzed extrinsic evidence before ultimately concluding the Imagenetix-TriPharma sublicense should be given the broad interpretation advanced by TriPharma, encompassing any formulation covered by the 892 Patent. (Id. at 22-27.) Specifically, the arbitrator noted that "the most reasonable interpretation of the wording of the Amended and Restated Agreement grant[ed] to TriPharma a broad exclusive right to Imagenetix' patented and clinically tested weight loss product." (Id. at 27.)

Significantly, the arbitrator found Imagenetix had breached its agreement with TriPharma in several ways: First, by selling products containing a formulation covered by the 892 Patent, "by failing to use its best efforts to prevent any party other than TriPharma from seeking customers for" such products, and "by **[*5]** violating TriPharma's exclusive license to utilize the Patent, marketing claims and study or clinical information conducted on and for" such products. (Id. at 27-28.) The arbitrator awarded over $2 million in actual damages, an additional $250,000 in punitive damages, over $1,000,000 in attorney fees and costs, and interest of approximately $560,000. (Id. at 38.)

The arbitrator found that TriPharma's failure to comply with a provision requiring certain minimum purchases from Imagenetix, the purported basis for Imagenetix's termination of TriPharma's license, "did not constitute a breach" of the license agreement "because [TriPharma's] inability to maintain such minimum orders was caused by Imagenetix's breaches." (Id. at 28.) Therefore, the arbitrator "denie[d] Imagenetix' request for a declaration that it properly terminated" the agreement. (Id. at 32.) Moreover, the arbitrator imposed a six-month period of forbearance in which TriPharma would be excused from the minimum purchase requirements. (Id. at 30.)

In addition to the damages awarded, the arbitrator issued a "permanent" injunction, that "extended the term of the [license] Agreement for two years" (Id. at 30 & 32.) Specifically, and unequivocally, the arbitrator stated: "Imagenetix must now comply **[*6]** with the terms of the Agreement prohibiting it from selling or distributing any weight loss product based on the 892 Patent to anyone other than TriPharma." (Id. at 30.)

On March 5, 2012, the arbitration award was confirmed by the San Diego Superior Court,[4] and it was reduced to judgment on April 27, 2012. (FAC ¶ 40)

---

[3] Recently, on July 17, 2012, the Court stayed TriPharma's claims against Max Int'l pending adjudication of the present action.

[4] TriPharma requests the Court take judicial notice of the Superior Court's Order, as well as other documents. (See generally Request for Judicial Notice ("RJN") (Docket No. 44) & Exhibits thereto.) The Court grants TriPharma's request. See *Fed. R. Evid. 201* (judicial notice); *Lee v. City of Los Angeles, 250 F.3d 668, 689 (9th Cir. 2001)* (courts may judicially notice public documents).

C. Factual Allegations in the Present Case

The present action was filed after the arbitration of TriPharma's claim against Imagenetix. As in the related case, TriPharma's claims in this action are based on its role as "the exclusive licensee to distribute products based on [the 892 Patent]." (FAC ¶ 15.) Moreover, at in the related case, TriPharma alleges that its previous business affiliate, Defendant First Fruits Business Ministry, LLC ("FFBM")[5] deceptively marketed its product "Trim Fit" as that product studied by the University of Connecticut ("UConn") and the University of Minnesota.[6] (FAC ¶ 19.) However, this case goes beyond that of a simple competitor versus competitor dispute over the rights to use a patented method.

Although not named a Defendant in the present case, Imagenetix' actions still figure prominently. TriPharma alleges that Imagenetix acted in concert with other TriPharma's **[*7]** competitors, i.e., the First Fruits entities sued in the present case, to attempt to undercut TriPharma's contractual rights to exploit the 892 Patent. Specifically, TriPharma alleges that although Imagenetix granted TriPharma an exclusive sublicense to the 892 Patent rights, while the arbitration matter was pending, and after TriPharma had worked to build up goodwill associated with the 892 Products,[7] Imagenetix first acquired all rights to the 892 Patent (by purchasing the 892 Patent from UMinn) and then sold those rights to First Fruits in March 2011. (FAC ¶¶ 32-37, 43, 50-51.) First Fruits acquired the rights in March 2011, but did not record the assignment of the 892 Patent until July 28, 2011, just prior to the close of evidence in the TriPharma-Imagenetix arbitration. (FAC ¶ 51.)

Around that time, First Fruits began to sell a beverage called "TrimFit," to label the containers with the number of the 892 Patent, and to label TrimFit's containers with a statement "that [TrimFit's] effectiveness is confirmed by 'clinical studies' . . . that . . . dictate that consumers should drink three bottles per day for best results." (FAC ¶¶ 53-55.) Moreover, on a Lifetime Television Network Program, Catarino falsely stated "that TrimFit was the subject **[*8]** of the Studies" and "that TrimFit is a patented ingredient." (FAC ¶¶ 58-59.) Specifically, a video from that program, which was subsequently embedded on the Network's website from July 2011 until the filing of the FAC, Catarino stated:

> The University of Minnesota took 7 years working and receiving the patent, which we have purchased from them. The proprietary formula that we developed, the Trisynex, then we studied it in clinical studies at the University of Connecticut. And the results were amazing. The people, the women, who were on the active ingredient in 8 weeks lost an average of 20 pounds and 17 percent body fat and inches around the waist, buttocks and thighs.

(FAC ¶ 61.) First Fruits also includes references to the Studies on their website for TrimFit. (FAC ¶ 57.)

As part of its marketing efforts, First Fruits has also arranged for TrimFit to be featured in the television reality program "Biggest Loser," in which contestants compete in losing weight. (FAC ¶ 69.)

D. Claims Asserted in the Present Case

---

[5] TriPharma also sued First Fruits Beverage Company LCC. The Court refers to these two Defendants collectively as "First Fruits". The Court refers separately to First Fruits Business Ministry, LLC as "FFBM" in connection with FFBM's Motion to Dismiss claims against it for lack of personal jurisdiction. Where appropriate, First Fruits Beverage Company LLC is referred to separately as "FF Beverage".

In addition to the entity Defendants, TriPharma asserts claims against individuals Roger J. Catarino ("Catarino") and Greg Guss ("Guss"). Guss is Vice Present of Sales and Marketing for one of the First Fruits entities. (FAC ¶ 10.) Catarino is the President and Chief Executive Officer ("CEO") of both entities. (FAC ¶ 11.)

[6] More specifically, TriPharma alleges that First Fruits "falsely advertise[d] and label[ed] the consumer beverage TrimFit as the 892 Product which was tested under" studies conducted by UConn and UMinn ("the Studies"). (FAC ¶ 19.) Beyond the mere exclusive right to sell, market and distribute any products that are based on the 892 Patent, TriPharma also claims "the exclusive right to refer to and utilize the Studies to sell, market[,] and distribute the 892 Product." (Id. ¶ 19.)

[7] Products can contain a number of different formulations of viscous polysaccharides. (FAC ¶ 18; cf. FAC Ex. A at 1 ("METHODS TO REDUCE BODY FAT") & 4:41-44 ("Any water-soluble, non-nutritive, indigestible, non-starch, viscous polysaccharide available to one of skill in the art can be used in the compositions and methods of the invention.")

Against this factual background, TriPharma asserts the following claims: (1) violation of the Patent Act's prohibition against false marking, *35 U.S.C. § 292*;[8] (2) violation of various provisions **[*9]** of the Lanham Act, *15 U.S.C. §§ 1114 et seq.*, including the Act's prohibitions against false advertising, false designation of origin, and unfair competition found in *15 U.S.C. § 1125(a)*; (3) declaratory relief; (4) tortious interference with contractual relations; (5) unjust enrichment; (6) violation of the California False Advertising Law, *Cal. Bus. & Prof. Code §§ 17500, et seq.* ("FAL"); and (7) Violation of the California Unfair Competition Law, *Cal. Bus. & Prof. Code §§ 17200, et seq.* ("UCL").

E. Motions Before the Court

Presently before the Court are the Motions to Dismiss for Lack of Personal Jurisdiction filed by Defendants Catarino and First Fruits Business Ministry, LLC ("FFBM") (Docket Nos. 22 & 65.) Also before the Court is TriPharma's Motion for Preliminary Injunction. (Docket No. 29.)

III. Legal Standard Governing the Court's Exercise of Personal Jurisdiction

To establish personal jurisdiction over a nonresident defendant, a plaintiff must show that the forum's jurisdictional statute confers personal jurisdiction over the defendant, and that the exercise of jurisdiction accords with federal constitutional due process. *FDIC v. British-Am. Ins. Co., 828 F.2d 1439, 1441 (9th Cir. 1987)*. The plaintiff bears the burden of demonstrating that the Court's exercise of jurisdiction over the defendant is appropriate. *Sher v. Johnson, 911 F.2d 1357, 1361 (9th Cir. 1990)*.

"Where, as here, the existence of personal jurisdiction **[*10]** is challenged and the defendant appears specially to contest its presence in the jurisdiction, the plaintiff has the burden to come forward with some evidence to establish jurisdiction." *Dist. Council No. 16 of Int'l Union of Painters & Allied Trades v. B & B Glass, Inc., 510 F.3d 851, 855 (9th Cir. 2007)*. "The court may consider evidence presented in affidavits to assist it in its determination and may order discovery on the jurisdictional issues." See *Doe v. Unocal Corp., 248 F.3d 915, 922 (9th Cir. 2001)*. "When a district court acts on a defendant's motion to dismiss without holding an evidentiary hearing, the plaintiff need make only a prima facie showing of jurisdictional facts to withstand the motion to dismiss." Id. A prima facie showing of personal jurisdiction is established when a plaintiff offers evidence that, if believed, would support the court's exercise of jurisdiction over the defendant. *Ballard v. Savage, 65 F.3d 1495, 1498 (9th Cir.1995)*.

Where not controverted by evidence, the Court must presume the truth of the allegations in the complaint. *Glencore Grain Rotterdam B.V. v. Shivnath Rai Harnarain Co., 284 F.3d 1114, 1119 (9th Cir. 2002)*. However, where a plaintiff's allegations are contradicted by defendant's evidence, that presumption is overcome. *Alexander v. Circus Circus Enters., Inc., 972 F.2d 261, 262 (9th Cir.1992)*. If both parties provide evidence supporting different versions of a fact, the Court resolves competing inferences in the plaintiff's favor. *Harris Rutsky & Co. Ins. Servs., Inc. v. Bell & Clements Ltd., 328 F.3d 1122, 1129 (9th Cir. 2003)*.

Where there is no applicable statute authorizing federal jurisdiction, **[*11]** the district court applies the law of the state in which the district sits. *Schwarzenegger v. Fred Martin Motor Co., 374 F.3d 797, 800 (9th Cir. 2004)*. California's long-arm statute, *California Civil Procedure Code section 410.10*, extends this jurisdiction to the maximum extent permitted by federal constitutional due process, so the jurisdictional analyses under state and federal law are the same. *Id. at 800-01*.

Absent one of the traditional bases for jurisdiction,[9] the Constitution requires that a defendant have at least "minimum contacts" with the relevant forum such that the exercise of jurisdiction "does not offend traditional notions

---

[8] TriPharma refers to the "False Marking Act" and cites *15 U.S.C. § 292*. (FAC at 15.) Elsewhere in the FAC, and in context, it becomes clear that TriPharma bases its claim on the Patent Act's prohibition against false marking.

[9] The traditional bases personal jurisdiction are service of a defendant in the forum state, consent of the defendant, and domicile of the defendant within the forum state. See *Burnham v. Superior Court, 495 U.S. 604, 610-11, 110 S. Ct. 2105, 109 L. Ed. 2d 631 (1990)* (the party is served within the state); *Nat'l Equip. Rental v. Szukhent, 375 U.S. 311, 316, 84 S. Ct. 411, 11 L. Ed. 2d*

of fair play and substantial justice." *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*.

Personal jurisdiction may be either "general" or "specific." *Brand v. Menlove Dodge, 796 F.2d 1070, 1073 (9th Cir. 1986)*.

A. General Jurisdiction

"A defendant is subject to general jurisdiction only where the defendant's contacts with a forum are 'substantial' or 'continuous and systematic.'" *Easter v. Am. W. Fin., 381 F.3d 948, 960 (9th Cir. 2004)* (citation omitted). The standard for a finding of general jurisdiction over nonresident defendants is "exacting." *Schwarzenegger, 374 F.3d at 801*. "[T]he defendant[s] must engage in 'continuous and systematic general business contacts,' that 'approximate physical presence' in the forum state." *Id*. (citations omitted).

B. Specific Jurisdiction

If a defendant's contacts with the forum state are not substantial or continuous and systematic, the court may exercise **[*12]** specific jurisdiction over the defendant only if the claims are arise out of defendants actions that are sufficiently related to forum state. See *Brand, 796 F.2d at 1073*. Specifically, the Ninth Circuit applies a three-pronged test to determine whether specific jurisdiction exists:

> (1) the non-resident defendant must purposefully direct his activities or consummate some transaction with the forum or resident thereof; or perform some act by which he purposefully avails himself of the privileges of conducting activities in the forum, thereby invoking the benefits and protections of its laws; (2) the claim must be one which arises out of or relates to the defendant's forum-related activities; and (3) the exercise of jurisdiction must comport with fair play and substantial justice, i.e. it must be reasonable.

Schwarzenegger, 374 F.3d at 802. The plaintiff bears the burden of establishing the first two prongs, and the failure to establish both will result in dismissal for lack of personal jurisdiction. Id. If the plaintiff establishes both, then the burden shifts to the defendant as to the third prong, and the defendant must "present a compelling case that the presence of some other considerations would render justice unreasonable." *Panavision, 141 F.3d at 1322* (internal **[*13]** quotation marks omitted).

1. Purposeful Availment or Purposeful Direction

The first prong requires a defendant to purposefully avail himself of the privileges of conducting activities in the proposed forum or purposefully direct his activities toward the forum. Id. Availment and direction are two distinct concepts; the "availment" analysis is most often used in suits sounding in contract, whereas the "direction" analysis is most often used in suits sounding in tort. Id.

The latter is measured by the "Calder-effects" test, which examines whether a defendant has "(1) committed an intentional act, (2) expressly aimed at the forum state, (3) causing harm that the defendant knows is likely to be suffered in the forum state." *Yahoo! Inc., 433 F.3d at 1206* (internal quotation marks omitted) (referring to *Calder v. Jones, 465 U.S. 783, 104 S. Ct. 1482, 79 L. Ed. 2d 804 (1984)*).

2. Relatedness

To satisfy the second prong of the specific jurisdiction test, the claim must arise out of or result from the defendant's forum-related activities. The test is a bright line "but for" test that essentially requires the Court to determine whether the plaintiff would not have been injured "but for" the defendant's conduct directed toward the plaintiff in the forum state. *Panavision, 141 F.3d at 1322*.

3. Reasonableness

---

354 (1964) (the party consents); *Milliken v. Meyer, 311 U.S. 457, 463, 61 S. Ct. 339, 85 L. Ed. 278 (1940)* (the party is domiciled in the state).

Assuming the plaintiff **[*14]** makes the required prima facie showing regarding the first two prongs, the burden shifts to the defendant to show the Court's exercise of personal jurisdiction would be unreasonable, i.e., that the exercise of jurisdiction "comports with 'fair play and substantial justice.'" *Core-Vent Corp. v. Nobel Indus. AB, 11 F.3d 1482, 1487-88 (9th Cir. 1993)*.

That determination requires a balancing of seven non-dispositive factors:

> In determining whether the exercise of jurisdiction over a nonresident defendant comports with "fair play and substantial justice," the court must consider seven factors: (1) the extent of the defendants' purposeful interjection into the forum state's affairs; (2) the burden on the defendant of defending in the forum; (3) the extent of conflict with the sovereignty of the defendants' state; (4) the forum state's interest in adjudicating the dispute; (5) the most efficient judicial resolution of the controversy; (6) the importance of the forum to the plaintiff's interest in convenient and effective relief; and (7) the existence of an alternative forum.

Id.

IV. First Fruits Motion to Dismiss for Lack of Personal Jurisdiction

TriPharma contends the Court may exercise specific jurisdiction over FFBM. (Opp'n at 6.) The Court agrees.

A. Purposeful **[*15]** Direction

TriPharma contends that FFBM has purposefully directed its activities toward the forum state, as may be determined by reference to the "Calder-effects" test. (Opp'n at 8.) The factual basis underlying this contention is complex. TriPharma contends, and there is an evidentiary basis upon which to conclude, that after communicating with TriPharma regarding a possible joint venture regarding rights to the 892 Patent, FFBM changed direction and entered into negotiations directly with Imagenetix designed to place FFBM in a position to undercut TriPharma's rights to the 892 Patent as an exclusive licensee. (Id.)

Specifically, during the pendency of the TriPharma-Imagenetix arbitration, TriPharma, through its CEO Evan Dameshek, attempted to partner with Catarino to first have Imagenetix purchase all rights to the 892 Patent from UMinn and then sell those rights to TriPharma and one or more of the First Fruits entities.[10] (Dameshek Decl. (Docket No 43) ¶¶ 23 & 36.) For a time, Catarino personally and actively participated in this endeavor.

On November 10, 2010, the Dameshek sent an email to Catarino, regarding TriPharma's desire to acquire the 892 Patent and the reasons why acquisition of the patent would benefit both **[*16]** TriPharma and First Fruits' long-term business goals:

> Since we have not had an opportunity to speak about the IP, I figured that I'd send you an email. I was informed today by the company from whom I license my rights that they are now attempting in earnest to sell the IP. . . . Although their sale will not impact our agreement, nor my ability to supply you with product, it will probably impact . . . down the road. We will definitely be at the mercy of whomever purchases the IP . . . . Point is, if you truly have an interest in buying it, now's the time. Let me know if and how you want to proceed.

(Id., Ex. 3 at 6.) Dameshek's and Catarino's exploration of such a deal continued through early January 2011. (See generally id. Ex. 3 (email string).) However, very shortly thereafter, Catarino stopped responding to Dameshek's communications on the issue. (Id. ¶ 36.)

---

[10] With the Reply, Defendants offer the Supplemental Catarino Declaration to establish that Catarino's discussions with Dameshek were exclusively on behalf of FF Beverage and did not involve FFBM. (See Supp'l Catarino Decl. (Docket No. 55-1) ¶ 12.) The emails between the two CEOs are admittedly lacking in specificity as to which First Fruits entity or entities would partner in the acquisition. Nevertheless, even assuming the initial emails to Dameshek were on behalf FF Beverage, Catarino has also acknowledged his actions on behalf of FFBM in acquiring the rights to the 892 Patent. (See RJN (Docket No. 44) Ex. 2 (Catarino Decl.) ¶¶ 3-4.)

Around the same time, in January 2011, the CEO of Imagenetix broke off negotiations with Dameshek, stating he preferred to await the results of the arbitration. (Id. ¶ 36.) Also around the same time, Catarino stopped paying amounts to TriPharma under a sublicensing agreement. (Id.) Shortly thereafter, TriPharma learned (after the **[*17]** fact) that Imagenetix had on March 7, 2011, acquired the rights to the 892 Patent and that FFBM had acquired them. (RJN (Docket No. 44) Ex. 2 (Catarino Decl.) ¶ 3;[11] Dameshek Decl. ¶ 37.)

This chain of events supports the inference made by TriPharma in bringing the present claims, namely, that Imagenetix and Catarino brokered a deal to have FFBM acquire all rights to the 892 Patents in an attempt to undercut TriPharma's existing rights as the exclusive licensee under the 892 Patent. By its very nature, this arrangement is expressly aimed at damaging the rights of TriPharma, which is located in California. Because TriPharma is now called upon to defend its rights to the 892 Patent with the filing of the present action, FFBM's act in acquiring the rights to the 892 Patent in this manner has caused harm that FFBM should have understood would be suffered in the forum state.

Thus, applying the *Calder*-effects test, the Court concludes that FFBM has purposely directed its actions toward the forum state.

B. Relatedness of Claim to Forum-Related Activities

Here, the claims are clearly related to the actions directed toward the forum state. FFBM attempts to preclude TriPharma's rights by claiming its own rights are superior to, or completely negated, **[*18]** TriPharma's rights. FFBM's basis for that position arises directly out of its forum-directed activities.

C. Reasonableness

Because TriPharma has established the first two prongs of specific personal jurisdiction test, the burden shifts to FFBM to overcome the presumption that the exercise of personal jurisdiction is reasonable. As noted previously, seven non-dispositive factors must be balanced. FFBM makes no attempt to address these factors. (See Motion at 8-9.) TriPharma addresses these factors, but fails to cite to the record regarding the factual bases underlying its argument as to some, and fails to adequately explain the legal arguments underlying others. (Opp'n at 20.) Nevertheless, the burden as to this portion of the test is on FFBM, and FFBM has failed to carry its burden.[12]

D. Ruling

Because the Court finds that FFBM's actions were purposefully directed toward the forum state, that TriPharma's claims arise out of or are related to the those actions, and that the exercise of personal jurisdiction is otherwise reasonable, the Court denies FFBM's Motion to Dismiss for lack of personal jurisdiction.

V. Catarino's Motion to Dismiss for Lack of Personal Jurisdiction

The appropriateness **[*19]** of the Court's exercise of personal jurisdiction is measured separately as to each defendant. *Calder, 465 U.S. at 789-90*. Although the Court has concluded that exercise over FFBM is appropriate based mostly on Catarino's actions, it does so because a business entity can act only through its shareholders,

---

[11] The Catarino Declaration was offered as part of an action filed in the Southern District of California to vacate the TriPharma-Imagenetix arbitration award. The Court takes judicial notice of this document.

[12] Moreover, the Court notes that a number of factors weigh strongly in favor of a conclusion that the exercise of jurisdiction over FFBM is reasonable. Because FFBM is jointly represented by FF Beverage, which has not challenged the Court's jurisdiction, the burden of the FFBM defending in this forum is minimal, and this factor weighs strongly in favor of a finding of reasonableness. Moreover, the Court discerns no conflict with another state, and a strong interest in California in adjudicating the claims asserted against TriPharma, whose principal place of business is in the state. Thus, the third and fourth factors weigh in favor of a finding of reasonableness. Additionally, given this Court's familiarity with the present action, the TriPharma-Imagenetix arbitration, and other related cases based upon rights to the 892 Patent, the fifth factor, related to judicial efficiency, weighs in favor of a finding of reasonableness. Finally, the sixth factor, related to the plaintiff's interest in convenient and effective relief, also weighs in favor of finding of reasonableness. Accordingly, on the merits, the Court also finds the exercise of personal jurisdiction reasonable.

officers, members, and/or principals. A separate analysis is required to address the question of whether Defendant Catarino's own contacts with the state of California constitute sufficient minimum contacts with the forum such that the Court's exercise of personal jurisdiction over him as an individual is constitutional. The Court answers this question in the affirmative.

TriPharma contends the Court has specific personal jurisdiction over Catarino based on his contacts with California in negotiating FFBM's acquisition of the 892 Patent and his role as the "pitch man" in a video embedded in a website that offers for sale one of the accused products. The Court considers each separately.

A. FFBM's Acquisition of the 892 Patent

1. Purposeful Direction

At the outset, the Court must pause to address an issue regarding the nature and character of Catarino's actions that may be considered in determining whether the Court may exercise personal **[*20]** jurisdiction over Catarino. Catarino argues that the Court may not consider actions taken by him on behalf of FFBM based on the fiduciary shield doctrine. (Opp'n at 7-8.) The Court disagrees.

"The fiduciary shield doctrine protects individuals from being subject to jurisdiction solely on the basis of their employers' minimum contacts within a given jurisdiction." *Allstar Mktg. Group, LLC v. Your Store Online, LLC, 666 F. Supp. 2d 1109, 1119 (C.D. Cal. 2009)*. "In other words, the mere fact that a corporation is subject to local jurisdiction does not necessarily mean its nonresident officers, directors, agents, and employees are suable locally as well." *Id. at 1119-20* (internal quotation marks, alteration marks, and citations omitted). However, that fact that a defendant takes actions on behalf of an entity employer does not mean that those actions cannot be considered as the individual's contacts with the forum state. See, e.g., *Calder, 465 U.S. at 789-90 (1984)* ("Petitioners are correct that their contacts with California are not to be judged according to their employer's activities there. On the other hand, their status as employees does not somehow insulate them from jurisdiction. Each defendant's contacts with the forum State must be assessed individually."); *Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 781, n.13, 104 S. Ct. 1473, 79 L. Ed. 2d 790 (1984)* ("[W]e today reject the suggestion that employees who act in their **[*21]** official capacity are somehow shielded from suit in their individual capacity.").

TriPharma urges the Court to find that the contacts Catarino had in negotiating the deal to acquire the 892 Patent (and thus, to attempt to cut off TriPharma's rights thereto) confers jurisdiction over Catarino in an individual capacity as well as over FFBM, and under the same rationale. (Opp'n at 15-21.) TriPharma does so on the basis that Catarino was the so-called "moving force" or "guiding light" behind these actions. (Id. at 16.)

"Courts typically consider a corporate officer's contacts on behalf of a corporation as his or her personal contacts for purposes of personal jurisdiction when the contacts support some identifiable theory of liability pursuant to which the officer's contacts on behalf of the corporate employer may justifiably be imputed to the employee." *Allstar Mktg. Group, 666 F. Supp. 2d at 1120* (noting that Ninth Circuit's approval of First Circuit law finding corporate officer liability in cases in which the officer was a "guiding spirit" or "central figure" in the relevant corporate activity). Thus, where a corporate officer's contacts make him the "primary participant in the alleged wrongdoing," his contacts have been found sufficient to confer **[*22]** jurisdiction. Id. (collecting cases). This includes situations in which "officers were active participants in . . . tortious conduct." *Id. at 1121*.

Here, Catarino makes the point — a valid one — that he "did not personally direct any sales of . . . products in California." (Catarino Decl. (Docket No. 66-1) ¶ 17.) However, TriPharma contends the Court's exercise of jurisdiction over Catarino is proper based on actions other than mere sales of accused products.

Catarino also makes the point that his negotiations for the purchase of the patent by FFBM were conducted by telephone while he was located in another State, and that he did not travel to California to further this effort. (Id. ¶ 12; see also RJN (Docket No. 44) Ex. 2 (Catarino Decl.) ¶¶ 3-4 (describing the negotiations in more detail).) Nevertheless, this fact does not preclude a finding of minimum contacts on this basis. To the contrary, under the purposeful direction analysis, all that is required is an intentional act (committed anywhere) that is aimed at the forum state that the defendant understands is likely to be suffered in forum state. See *Yahoo! Inc., 433 F.3d at*

1206. It appears from the record, and the Defendants have not presented evidence to the contrary, **[*23]** that although at the time of the negotiations, Catarino needed to eventually secure the approval of his fellow members of FFBM, he in fact personally conducted all the negotiations with Imagenetix necessary to effectuate FFBM's acquisition of the 892 Patent. As such, the fiduciary shield doctrine does not preclude the Court's consideration of these actions, and these actions are sufficient to constitute the "intentional act" by a defendant under the first prong of the *Calder*-effects test.

The remaining two prongs are met under the analysis applicable to FFBM, namely, that Catarino personally brokered a deal with Imagenetix (subject to approval by his fellow members) to have FFBM acquire all rights to the 892 Patents in an attempt to undercut TriPharma's existing rights as the exclusive licensee under the 892 Patent. By its very nature, this arrangement is expressly aimed at damaging the rights of TriPharma, which is located in California. Because TriPharma is now called upon to defend its rights to the 892 Patent with the filing of the present action, and because Catarino's primary role in effectuating this transaction by FFBM is not subject to the fiduciary shield doctrine, FFBM's act in acquiring the rights to the 892 Patent in this **[*24]** manner has caused harm that Catarino should have understood would be suffered in the forum state.

Thus, applying the Calder-effects test, the Court concludes that Catarino has purposely directed its actions toward the forum state.

2. Relatedness

Here, the claims are clearly related to the actions directed toward the forum state. FFBM attempts to preclude TriPharma's rights by claiming its own rights are superior to, or completely negated, TriPharma's rights. FFBM's basis for that position arises directly out of Catarino's forum-directed activities on its behalf.

3. Reasonableness

Because TriPharma has established the first two prongs of specific personal jurisdiction test, the burden shifts to Catarino to overcome the presumption that the exercise of personal jurisdiction is reasonable. As noted previously, seven non-dispositive factors must be balanced. Catarino makes no attempt to address these factors. (See generally Motion.) TriPharma addresses these factors, but fails to cite to the record regarding the factual bases underlying its argument as to some, and fails to adequately explain the legal arguments underlying others. (Opp'n at 22-23.) Nevertheless, the burden as to this portion **[*25]** of the test is on Catarino, and Catarino has failed to carry its burden.[13]

B. Catarino's Role as Video Pitch Man

1. Purposeful Direction

Catarino appeared personally on Lifetime Television Network in a program entitled "The Balancing Act," to promote and advertise the accused product "Trimfit." (Dameshek Decl. (Docket No. 43) ¶ 41.) TriPharma alleges, and Catarino has not disputed, that Catarino therein refers to Trimfit as a patented product or as containing patented ingredients, whose effectiveness had been confirmed by "clinical studies." (FAC ¶¶ 54-55.) More specifically, TriPharma alleges that Catarino references the UMinn studies of "the proprietary formula that we developed," including certain measurable reductions in body fat attributable to that formula." (FAC ¶ 61.) From August 2001 to the date of the filing of the FAC, the video was available to viewers at TrimFitWater.com with the click of the mouse. (Dameshek Decl. (Docket No. 69-1) ¶ 44.) Clicking the "Buy On Line" icon links the website user to Thirstmonger.com, where TrimFit could be purchased. (Id. ¶ 40.)

The maintenance of a wholly passive website — that is, one that merely provides information and is not interactive — **[*26]** cannot without more satisfy the express aiming prong. See *Cybersell, Inc. v. Cybersell, Inc., 130 F.3d 414, 419 (9th Cir. 1997)*; *Holland Am. Line Inc. v. Wartsila N. Am., Inc., 485 F.3d 450, 460 (9th Cir. 2007)* ("We consistently have held that a mere web presence is insufficient to establish personal jurisdiction."). However, it is

[13] The Court's analysis in footnote 12 is equally applicable to Catarino.

also clear "that operating even a passive website in conjunction with something more — conduct directly targeting the forum — is sufficient to confer personal jurisdiction." *Brayton Purcell LLP v. Recordon & Recordon, 606 F.3d 1124, 1129 (9th Cir. 2010)* (internal quotation marks and citation omitted). To what extent operation of a website might establish the purposeful direction needed to establish personal jurisdiction "is directly proportionate to the nature and quality of commercial activity that an entity conducts over the internet." *Cybersell, 130 F.3d at 419*.

Here, the website is not wholly passive. Instead, it provides a method whereby the user who is persuaded by Catarino's pitch can easily order TrimFit to be delivered by clicking a familiar "by online" icon. Catarino makes the point that this action merely links the user to another website, and an online purchase is facilitated there. The Court is unconvinced that this separation renders TrimFitWater.com wholly passive in the manner contemplated by *Cybersell*. Even Cybersell made a distinction between websites that are commercial and nature, i.e. **[*27]** , that are meant to sell products, and those that are instead merely informational. In addition to providing information to those who have or have not already purchased the product, TrimFitWater.com is clearly meant to market and sell the product whose name it bears. As such, it is clearly commercial in nature. To conclude otherwise based on an intermediate link to another website would elevate form over substance in a manner the Court is unsupported by Cybersell and its progeny.

Thus, Catarino's participation in the marketing and advertising on an interactive commercial website constitutes the intentional act required by the *Calder*-effects test. This act was also aimed at the forum state. TrimFitWater's label offers the purchaser the opportunity to learn more by visiting the website, and TrimFitWater is offered for sale in California. (Dameshek Decl. (Docket No. 69) ¶ 24; Dameshek Decl. (Docket No. 43) Ex. 6 (TrimFit Water label, also referencing the 892 Patent).) Moreover, due to the rights claimed by TriPharma under the 892 Patent, this advertising has caused harm to TriPharma that Catarino should have understood would be suffered in the forum state.

2. Relatedness

Here, the claims are clearly related **[*28]** to the actions directed toward the forum state. Catarino personally promotes the sale of a product, the sale of which TriPharma claims tortiously interferes with its contractual rights and violates it patent rights.

3. Reasonableness

Because TriPharma has established the first two prongs of specific personal jurisdiction test, the burden shifts to Catarino to overcome the presumption that the exercise of personal jurisdiction is reasonable. As noted previously, seven non-dispositive factors must be balanced. Catarino makes no attempt to address these factors. (See generally Motion.) The Court's discussion regarding reasonableness with regard to Catarino's role in FFBM's acquisition of the 892 Patent applies equally here.

C. Ruling

Because the Court finds that Catarino's actions were purposefully directed toward the forum state, that TriPharma's claims arise out of or are related to the those actions, and that the exercise of personal jurisdiction is otherwise reasonable, the Court denies Catarino's Motion to Dismiss for lack of personal jurisdiction.

VI. Venue

Both FFBM and Catarino move to dismiss for improper venue.

A party challenging venue must move pursuant to *Rule 12(b)(3) of the Federal Rules of Civil Procedure* and *28 U.S.C. § 1406(a)*, which provides that a district **[*29]** court shall dismiss or transfer a case if venue is improper. Venue in federal courts is governed entirely by statute. See *Leroy v. Great Western United Corp., 443 U.S. 173, 181, 99 S. Ct. 2710, 61 L. Ed. 2d 464 (1979)*. If the Court finds that the case has been filed "in the wrong division or district," it must "dismiss, or if it be in the interest of justice, transfer such case to any district or division in which it could have been brought. *28 U.S.C. § 1406(a)*.

The venue statute provides for three alternatives:

> (b) Venue in general. — A civil action may be brought in —
>
> (1) a judicial district in which any defendant resides, if all defendants are residents of the State in which the district is located;
>
> (2) a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred, or a substantial part of property that is the subject of the action is situated; or
>
> (3) if there is no district in which an action may otherwise be brought as provided in this section, any judicial district in which any defendant is subject to the court's personal jurisdiction with respect to such action.

28 U.S.C. § 1391(b). For venue purposes, "residency" is defined as the domicile of a natural person. *28 U.S.C. § 1391(c)(1)*. An entity resides in any district in which it is subject to the court's jurisdiction. *28 U.S.C. § 1391(c)(2)*.

The first venue **[*30]** alternative is inapplicable because the Defendants are not all residents of the State in which the district is located.

FFBM contends that the second alternative is likewise inapplicable because a substantial part of the events or omissions did not occur in the Central District. The Court disagrees.

Where claims asserted are tort-like claims, the Ninth Circuit often looks to the locus of the injury to determine whether a substantial part of the events or omissions occurred in the district. See, e.g., *Fiore v. Walden, 657 F.3d 838, 859 (9th Cir. 2011)*. TriPharma, which resides in this district, asserts a tortious interference claim.

As for trademark claims, courts in the Ninth Circuit, and elsewhere, have held that venue is appropriate in any district in which consumers are likely to be deceived, whether that occurs in a single district or in many districts. See, e.g., *Cottman Transmission Sys., Inc. v. Martino, 36 F.3d 291, 295 (3d Cir. 1994)* *Allstar Mktg. Group, LLC v. Your Store Online, LLC, 666 F. Supp. 2d 1109, 1128 (C.D. Cal. 2009)* (collecting cases); *Golden Scorpio Corp. v. Steel Horse Bar & Grill, 596 F. Supp. 2d 1282 (D. Ariz. 2009)*. Moreover, TriPharma's false marking claim, although arising under patent law, is similar to the trademark claims, in that it claims that products are marked in a manner likely to deceive the consumers who purchase them. Thus, the venue analysis is the same. TriPharma has represented, and Defendants have not contended otherwise, that the accused products **[*31]** are offered for sale to the public in this judicial district.[14]

Thus, it is clear to the Court that the second alternative for venue applies because "substantial part of the events or omissions giving rise to the claim occurred" in this district. *28 U.S.C. § 1391(b)(2)*.

The third alternative applies only when neither of the first two applies.

The Court denies the Motions to Dismiss for Improper Venue.

VII. Motion for Preliminary Injunction

A. Relief Sought

TriPharma seeks a preliminary injunction prohibiting all Defendants from selling TrimFit or any products bearing the 892 Patent number, and from referring to the Studies in connection with the sale of any product. TriPharma also seeks to prevent all Defendants from selling or advertising any product that comes within the scope of the 892 Patent. (See Notice of Motion (Docket No. 29) at 1.) Essentially, TriPharma seeks the relief clearly entitled to any party with the exclusive right market and sell products that practice the 892 Patent.

---

[14] TriPharma has offered ample evidence that TrimFit Water is offered for sale in the forum state, but has failed to offer evidence, as opposed to mere representation, that it is offered for sale in the Central District of California. (See, e.g., Dameshek Decl. (Docket No. 69-1) ¶ 24 (referring to introduction of TrimFit Water to distributors that "cover virtually all of the territory of California"). Nevertheless, given that Defendants do not contend otherwise, and that it indeed appears from the record that the product is distributed nationwide, the Court accepts this representation.

B. Factual Basis

Here, TriPharma and FF Beverage claim such an exclusive right, but each does so through a separate chain of custody, each involving Imagenetix as the first link in that chain. TriPharma claims an exclusive right based on the 2005 grant **[*32]** of an exclusive license from 892 Patent Holder UMinn to Imagenetix, and Imagenetix's subsequent grant of a sublicense to TriPharma. Imagenetix purported to terminate the sublicense according to its terms, but an arbitration award (now confirmed and reduced to judgment) reinstated it. In contrast, FF Beverage claims a right to exclusive use of the 892 Patent based on Imagenetix's 2011 purchase of it from UMinn. From there, Imagenetix sold the 892 Patent to FFBM, which in turn granted an exclusive license to FF Beverage.

The evidence of record reveals that FFBM purchased the 892 Patent from Imagenetix subject to the then-pending arbitration. Specifically, as part of the FFBM-Imagenetix purchase agreement, Imagenetix represented that it had ownership rights "free and clear of any and all liens or encumbrances . . . other than . . . (3) the outcome of the arbitration pending before JAMS . . . No. 1240020032 . . . , in which TriPharma claims certain rights to the UMinn Patent which Imagenetix disputes." (Docket No. 69-3 at 3.) Because of the uncertainty created by the then-pending arbitration, the parties included an escape clause in the FFBM-Imagenetix purchase agreement, which expressly permitted FFBM, *at its option*, to recover **[*33]** the entire purchase price from Imagenetix plus interest at a stated rate if Imagenetix was not the "prevailing party" of the arbitration. (Id. at 6.) The agreement specifies that Imagenetix would not be considered the "prevailing party" "if the Arbitrator determines that TriPharma owns all or any of the rights under the [892] Patent." (Id.)

C. Legal Standard

For a preliminary injunction to issue, the plaintiff has the burden to establish (1) a likelihood of success on the merits, (2) the likelihood of irreparable injury if the preliminary relief is not granted, (3) the balance of hardships favors the plaintiff, and (4) advancement of the public interest. *Winter v. NRDC, Inc., 555 U.S. 7, 129 S. Ct. 365, 374, 172 L. Ed. 2d 249 (2008)*; see also *Raich v. Ashcroft, 352 F.3d 1222, 1227 (9th Cir. 2003)*. As an alternative to this "traditional" approach, in the Ninth Circuit, the plaintiff may meet this burden if it "demonstrates either a combination of probable success on the merits and the possibility of irreparable injury or that serious questions are raised and the balance of hardships tips sharply in his favor." *Save Our Sonoran, Inc. v. Flowers, 408 F.3d 1113, 1120 (9th Cir. 2005)* (internal quotations and citation omitted).[15] "These two formulations represent two points on a sliding scale in which the required degree of irreparable harm increases as the probability of success decreases. They are **[*34]** not separate tests but rather outer reaches of a single continuum." Id. (internal quotations and citations omitted). "To reach this sliding scale analysis, however, a moving party must, at an 'irreducible minimum,' demonstrate some chance of success on the merits." *Global Horizons, Inc. v. United States DOL, 510 F.3d 1054, 1058 (9th Cir. 2007)* (citing *Arcamuzi v. Cont'l Air Lines, Inc., 819 F.2d 935, 937 (9th Cir.1987)*). This alternative also still requires that the injunction be in the public interest. *Wild Rockies, 632 F.3d at 1135*.

D. Claim Preclusive Effect of TriPharma-Imagenetix Arbitration Award

Before applying the preliminary injunction standard, the Court must resolve a threshold legal argument underlying Defendants' primary defense, namely, that it has the right to use the 892 Patent and to refer to the Studies in its marketing. Specifically, Defendants do not dispute that FF Beverage distributes TrimFit with a label that bears the 892 Patent number; rather, Defendants contend that FF Beverage has the right to do so by virtue of its licensing agreement with FFBM. However, because the TriPharma-Imagenetix arbitration award affirmed TriPharma's exclusive license, because that award is given claim preclusive effect in the same manner as an adjudicated claim, and because FFBM is in privity with Imagenetix, Defendants are bound by the arbitration award.

---

[15] For a time, some doubt existed regarding the continuing viability of this alternative test; however, the Ninth Circuit recently removed that doubt, reaffirming the validity of this "serious questions" test. See *Alliance for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1131-35 (9th Cir. 2011)*.

As a general matter, **[*35]** claim preclusion[16] (or "res judicata" as it is also sometimes called) "applies not only to judicial proceedings but also to arbitration proceedings." *Thibodeau v. Crum, 4 Cal. App. 4th 749, 755, 6 Cal. Rptr. 2d 27, 30 (1992)* (citing *Lehto v. Underground Constr. Co., (1977) 69 Cal.App.3d 933, 939, 138 Cal.Rptr. 419*.) Res judicata, or claim preclusion, prevents relitigation of the same cause of action in a second suit between the same parties or parties in privity with them. *Mycogen Corp. v. Monsanto Co., 28 Cal. 4th 888, 896-97, 123 Cal. Rptr. 2d 432, 51 P.3d 297, 301-02 (2002)*. "Cause of action" is broadly construed to encompass not just the actual legal theories advanced or relief actually in the underlying action, but also claims based on other legal theories that could have been brought or relief that could have been sought.[17] *Id. at 302* ("Res judicata precludes piecemeal litigation by splitting a single cause of action or relitigation of the same cause of action on a different legal theory or for different relief.").

Imagenetix is clearly bound by the confirmed arbitration award. In that award, the arbitrator concluded that "the Amended and Restated Agreement grant[ed] to TriPharma a broad exclusive right to Imagenetix' patented and clinically tested weight loss product." (FAC Ex. 3 at 27.) The arbitrator found that the exclusive license, which Imagenetix had purported to terminate pursuant to its terms, be reinstated until October 1, 2014. (*Id. at 30*). The subsequent **[*36]** judgment confirming the arbitrator's award regarding the exclusive nature of TriPharma's rights to the 892 Patent is binding as to Imagenetix and those in privity to it, including Defendants, under the doctrine of claim preclusion. In short, because the arbitration award found TriPharma possessed exclusive rights until October 1, 2014, to the commercial exploitation of the 892 Patent, Defendants are precluded by the doctrine of claim preclusion from asserting otherwise.[18]

This doctrine precludes Defendants' position now that the TriPharma-Imagenetix agreement(s) were *void ab initio* because of the failure to follow certain formalities regarding notice of the sublicensing arrangement to UMinn. This is a legal theory — i.e., one putting in issue the validity of the agreement(s) upon which TriPharma necessarily relied to advance its breach of contract claim in the arbitration — that could have been advanced during the

---

[16] The present case does not, as suggested by Defendants, involve the limitation placed on the related doctrine of issue preclusion set forth in *Vandenberg v. Superior Court, 21 Cal. 4th 815, 825, 88 Cal. Rptr. 2d 366, 982 P.2d 229, 234 (1999)*, which held that "a private arbitration award, even if judicially confirmed, may not have nonmutual collateral estoppel effect under California law unless there was an agreement to that effect in the particular case." Id.; cf. *Murphy v. Murphy, 164 Cal. App. 4th 376, 398, 78 Cal. Rptr. 3d 784 (2008)* (differentiating between issue preclusion and claim preclusion). In setting forth its central holding regarding issue preclusion, the California Supreme Court expressly preserved existing California law regarding the claim preclusive effect of arbitration awards. *Vandenberg, 21 Cal. 4th at 825 n.2* ("Nothing in our decision imposes or implies any limitations on the strict res judicata, or claim preclusive, effect of a California law private arbitration award.")

[17] It is clear that this broad construction of "cause of action" likewise applies to arbitrated disputes. *Thibodeau v. Crum, 4 Cal. App. 4th at 755* (noting, as to the scope of the claim preclusive effect to be given an arbitration award, "arbitrating parties are obliged, . . . to place before their arbitrator all matters within the scope of the arbitration, related to the subject matter, and relevant to the issues.").

[18] Defendants have presented evidence that Imagenetix has again purported to terminate the exclusive license based on TriPharma's failure to meet the minimum purchases requirement. (Opp'n at 12; Catarino Decl. (Docket No. 38) ¶¶ 21-22 & Ex. 17 (letter from Imagenetix to TriPharma purporting to terminate exclusive license).) TriPharma has presented evidence that Imagenetix has refused to provide it with the product it has ordered, and that Imagenetix has refused to cooperate in permitting TriPharma to obtain products from a third-party supplier. (Dameshek Decl. (Docket No. 57) ¶¶ 3-4 & Ex. 10.) It appears that Imagenetix takes issue with TriPharma's use of the trademark "Trisynex", to which Imagenetix claims rights, in connection with TriPharma's order. (Id. Ex. 10 at 4 (April 25, 2012 email combining a purported repudiation of the arbitration award, an express refusal to fill TriPharma's purchase order, and a demand that TriPharma cease and desist use of the mark "Trisynex"); cf. Catarino Decl. (Docket No. 38) Ex. 17 (Imagenetix's May 30, 2012 purported termination of agreement).) This issue was raised in post-hearing briefs, but the arbitrator refused to resolve it because it was not raised before the close of the hearing, and it appears to remain outstanding. (FAC Ex. C at 32-33.) Nevertheless, in light of the uncontroverted evidence that Imagenetix refused to provide the ordered product to TriPharma, the Court concludes that the purported termination of the exclusive license does not alter its analysis regarding the preliminary relief sought with the present motion.

arbitration. As noted above, the doctrine of claim preclusion applies not only to legal theories actually relied upon, but to all legal theories that merely could have been raised, but were not.

At the hearing, Defendants argued that as a matter of strategy, Imagenetix could not have raised **[*37]** this argument because acceptance of this argument would likewise lead to the conclusion that Imagenetix granted TriPharma an invalid sublicense, while at the same time warranting that the sublicense was valid, which could expose Imagenetix to liability.[19] (July 30, 2012 Hr'g Tr. at 10-11.) Building on this point, Defendants argued for the first time at oral argument that there was no privity between First Fruits and Imagenetix because privity cannot be found where a would-be privy's interests are not adequately represented by the precluded party.

Generally, an assignment of property interest in a patent gives rise to privity between the assignor and assignee for purposes of claim preclusion. *Enovsys LLC v. Nextel Communications, Inc., 614 F.3d 1333, 1343 (Fed. Cir. 2010)*. However, application of claim preclusion must comport with due process requirements, and to be consistent with due process requirements, a non-party's interests must be adequately represented in order for it to be bound by a judgment to which it is not a party. See, e.g., *Taylor v. Sturgell, 553 U.S. 880, 892-93, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008)*.

Case law belatedly cited by Defendants fails to convince the Court that due process concerns are implicated where, as here, a purported conflict arises by virtue of certain strategic concerns that, although preventing assertion **[*38]** of a particular legal theory by the precluded party, would not similarly constrain that party's privy. Instead, the Court concludes that FFBM falls squarely into a uncontroversial category recognized by the Supreme Court as to which "nonparty preclusion [is] justified based on [a] pre-existing substantive legal relationship . . . between the person to be bound and a party to the judgment." *Taylor v. Sturgell, 553 U.S. 880, 894, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008)* (internal quotation marks, alteration marks, and citation omitted). Recently, the Court identified as examples of such relationships both "preceding and succeeding owners of property," and "assignee[s] and assignor[s]." Id. Notably, the Supreme Court recognized that "[t]hese exceptions originated 'as much from the needs of property law as from the values of preclusion by judgment.'" Id. (quoting 18A C. Wright, A. Miller, & E. Cooper, Federal Practice and Procedure § 4448 (2d ed.2002).) Successors in interest and assignees are bound by judgments involved their predecessors in interest and assignors "in an effort to protect conflicting property interests." Id.

Even if due process in the abstract required such a precise alignment of legal strategies available to both predecessors and successors in interest, the Court would be unlikely **[*39]** to conclude that it is required under the facts of the present case. Here, FFBM entered into the agreement to purchase with express notice of the then-pending arbitration, and the parties to the agreement included as one of the terms an option to rescind the agreement and recover the purchase price in the event Imagenetix failed to prevail in the arbitration. FFBM apparently failed to exercise that option, and instead pursued a course of conduct that gave rise to the present action. In the related context of class actions, in which absent class members are generally bound by a judgment entered on a class-wide basis, courts routinely find that due process concerns are satisfied where class representatives "fairly and adequately represent the interests of the class" and where absent class members are given the opportunity to opt out. *Crawford v. Honig, 37 F.3d 485, 487 (9th Cir. 1994)*. Class representatives are found to be adequate where there is "a *sharing* of interests between representatives and absentees" rather than any precise alignment of all available legal strategies. Id. (internal quotation marks and citation omitted). Here, Imagenetix and FFBM shared the overriding and common interest in asserting that TriPharma lacked rights **[*40]** to the 892 Patent, and this interest was shared by the two in a manner sufficient to satisfy due process concerns. Moreover, FFBM, when given an opportunity to opt out from the judgment, did not avail itself of that opportunity, further supporting this conclusion.[20]

---

[19] For purposes of the present discussion, the Court assumes this point is a valid one. The Court does not express any opinion on the merits of this argument.

[20] Absent class members are given a pre-judgment opportunity to opt out. That FFBM had the benefit of an analogous *post-judgment* option — one that could be exercised when the details of the adjudication are known and the consequences thereof can be assessed with greater clarity — makes even clearer that due process concerns are not implicated here.

Notably, to the extent that the concept of due process of law evolved to provide some assurance of fundamental fairness to all litigants, that principle has been clearly protected under the present facts. FFBM negotiated a deal to acquire property that was expressly subject to a pending adverse claim against it. FFBM negotiated an option to rescind the deal in the eventuality of an adverse adjudication. When that eventuality came to pass in a manner expressly contemplated as possible by the parties, and when FFBM failed to avail itself of the option it negotiated to ameliorate that contemplated adverse eventuality, FFBM most assuredly acted at its own peril and may not now successfully contend it was deprived of the fundamental right of due process of law as a result of its own actions.

Thus, consistent with due process, the Court concludes that the doctrine of claim preclusion bars FFBM from asserting the position that **[*41]** TriPharma lacks exclusive rights to the 892 Patent.

E. Application of Preliminary Injunction Standard

1. Likelihood of Success on the Merits

As detailed below, TriPharma has established a likelihood of success on the merits on its claim for tortious interference with contractual relations and its state-law UCL claim. Because the Court finds a likelihood of success on the merits as to these claims, and because the Court's conclusion on this issue alone supports the relief sought by TriPharma, the Court does not discuss whether TriPharma has established a likelihood of success on the merits of any other claims.

a. Tortious Interference with Contractual Relations

A plaintiff asserting a a claim for tortious interference with contractual relations must establish: (1) a valid contract between the party and a third party; (2) defendant's knowledge of the contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach of the contractual relationship; and (5) resulting damage. *Tuchscher Development Enterprises, Inc. v. San Diego Unified Port Dist., 106 Cal.App.4th 1219, 1239, 132 Cal. Rptr. 2d 57 (2003)*.

Here, TriPharma has presented evidence of all these elements. First, TriPharma has presented evidence of its agreement with third-party Imagenetix granting it **[*42]** the exclusive right to commercially exploit the 892 Patent. Second, as of at least November 30, 2011, when Catarino submitted a declaration acknowledging that the TriPharma-Imagenetix arbitration award "re-instated" TriPharma's exclusive license, Defendants had knowledge of the agreement. (RJN (Docket No. 44) Ex. 2 (Catarino Decl.) ¶¶ 7-8.) Third, TriPharma has also offered evidence regarding each Defendant's intentional actions. As discussed previously, Defendant FFBM, with Catarino's personal involvement, acquired the 892 Patent and has purported to take all rights to commercially exploit it, free and clear of TriPharma's rights. Defendant FF Beverage has distributed a product bearing the 892 Patent number. (See Dameshek Decl. (Docket No. 43) Ex. 6 (TrimFit Water label bearing the 892 Patent number).) Fourth, TriPharma has presented evidence of actual interference with its rights, including the inability to exclusively market products covered by the 892 Patent. Specifically, Defendants' actions in launching a new product modeled on TriPharma's product "SoL'eau" as their own, renamed "TrimFit" has unquestionably interfered with TriPharma's exclusive right to market products based on the 892 Patent. (See Dameshek Decl. (Docket No. 69) ¶¶ 24-26; **[*43]** Dameshek Decl. (Docket No. 43) Ex. 6 (TrimFit Water label, bearing the 892 Patent number).) Finally, damages are easily inferred from this evidence, in the form of lost good will and lost profits. From this evidence, the Court concludes TriPharma has established a strong likelihood of success on the merits of its tortious interference claim.

b. UCL

The UCL prohibits "unlawful, unfair or fraudulent business act[s] or practice[s]" and "unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. A plaintiff may pursue a UCL claim under any or all of three theories: the "unlawfulness," "fraudulent," or "unfairness" prongs. *South Bay Chevrolet v. General Motors Acceptance Corp., 72 Cal. App. 4th 861, 878, 85 Cal. Rptr. 2d 301 (1999)*. TriPharma argues Defendants actions fall under both the "fraudulent" and "unfair" prongs.

Under the UCL, a fraudulent business practice is one that is likely to deceive the public and may be based on representations that are untrue. *McKell v. Washington Mut., Inc., 142 Cal. App. 4th 1457, 1471, 49 Cal. Rptr. 3d*

227 (2006). Defendants' actions in marketing a product with reference to the 892 Patent and the Studies in violation of TriPharma's exclusive rights to do so fall under this category of acts prohibited by the UCL.

"Unfair" means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the **[*44]** same as a violation of the law, or otherwise significantly threatens or harms competition." *Commc'ns v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. Here, TriPharma has presented evidence that Defendants are marketing and selling a product by referring to a patent as to which TriPharma has the exclusive license to practice. Similarly, TriPharma has presented evidence that Defendants are referring to certain clinical studies in connection with the sale of those products when TriPharma has been found to have the exclusive right to make such references. These actions fall under the "unfairness" prong of the UCL.

As to both the "fraudulent" and "unfair" prongs of the UCL, the Court finds TriPharma has established a strong likelihood of success on the merits.

2. Irreparable Injury

Here, TriPharma has offered evidence that Defendants' marketing efforts is expressly designed to capitalize on its goodwill, which was gained through a number of marketing and promotion efforts. (Dameshek Decl (Docket No. 30) ¶¶ 12-21.) Generally, harm to the goodwill established by a business is unquantifiable and, as such, constitutes irreparable injury. See, e.g., *Rent-A-Center, Inc. v. Canyon Tele. & Appliance Rental, Inc., 944 F.2d 597, 603 (9th Cir.1991)* ("Intangible injuries, such as damage to ongoing recruitment efforts and goodwill, qualify as irreparable **[*45]** harm."); *Optinrealbig.com, LLC v. Ironport Sys., Inc., 323 F.Supp.2d 1037, 1050 (N.D. Cal. 2004)* ("Damage to a business's goodwill is typically irreparable injury because it is difficult to calculate."); *MySpace, Inc. v. Wallace, 498 F. Supp. 2d 1293, 1305-06 (C.D. Cal. 2007)* (finding irreparable harm based on the damage to goodwill where defendants used social network computer site to illegally "spam" users).

Here, there is evidence that FF Beverage has actually created confusion regarding its affiliation with TriPharma and damage to TriPharma's goodwill. (Dameshek Decl. ¶¶ 52.) A distributor of TriPharma's SoL'eau has sued TriPharma, alleging that FF Beverage, after informing the distributor that SoL'eau had been re-christened as "TrimFit," actually came and removed SoL'eau from the distributor and, when FF Beverage failed to replace the product with TrimFit, the distributor sued TriPharma. Id.

TriPharma has established the likelihood of irreparable injury.

3. Balance of Hardships

In determining whether to grant preliminary injunctive relief, court "must balance the competing claims of injury and must consider the effect on each party of the granting or withholding of the requested relief." *Winter, 555 U.S. at 24 (2008)* (internal quotation marks and citation omitted).

TriPharma has offered scant evidence directly related to the hardships it might suffer in the absence **[*46]** of an injunction. (See Reply at 23-24 (citing no evidence).) Instead, it relies on a legal argument based on Ninth Circuit authority in an analogous factual setting that effectively precludes a defendant from arguing that the balance of hardships weighs against imposition of an injunction. (Id.) Specifically, in the Ninth Circuit, and elsewhere, "a defendant who knowingly infringes another's copyright 'cannot complain of the harm that will befall it when properly forced to desist from its infringing activities.'" *Cadence Design Sys., Inc. v. Avant! Corp., 125 F.3d 824, 829 (9th Cir. 1997)* (quoting *Triad Sys. Corp. v. Se. Exp. Co., 64 F.3d 1330, 1335 (9th Cir. 1995)*.) This holding applies where a plaintiff establishes a strong likelihood of success on the merits. *Cadence, 125 F.3d at 830*.

Here, it is clear to the Court that the 892 Patent is a commercially valuable intellectual property right. For instance, in the arbitration award, the arbitrator awarded to TriPharma approximately $1.7 million based on Imagenetix's actions in selling products based on the 892 Patent in violation of TriPharma's license. (FAC Ex. C at 31.) Moreover, FF Beverage, has offered evidence that revenue from TrimFit accounts for 60% of its revenue (amounting to "several millions dollars on a bimonthly basis") and keeps employed 40% of its workforce. (Catarino

Decl. ¶¶ 41 &43.) In light of the **[*47]** Court's conclusion that Defendants are bound by the arbitrator's finding that TriPharma has an exclusive license to the 892 Patent, and based on binding authority that requires the Court to give little if any weight to the hardships to Defendants in this case, the Court concludes that this evidence establishes that the balance of the hardships tips in favor of TriPharma.

4. Public Interest

An injunction is in the public interest because "[t]he public has an interest in avoiding confusion between two companies' products." *Internet Specialties West, Inc. v. Milon-DiGiorgio Enters., Inc., 559 F.3d 985, 993 n.5 (9th Cir. 2009)*.

F. Ruling

As set forth above, the Court finds that TriPharma has established a strong likelihood of success on the merits, a likelihood of irreparable injury in the absence of an injunction, a balance of hardships that tips in its favor, and that issuance of an injunction is in the public interest. Therefore, the Court grants the Motion for Preliminary Injunction on the terms detailed below.

VIII. Bond

For the first time at the hearing on this matter, Defendants sought the posting of a bond as security in the event the Court issued a preliminary injunction.

Rule 65(c) of the Federal Rules of Civil Procedure conditions issuance of a preliminary injunction upon the applicant's giving of security, generally in the form of the posting of **[*48]** a bond. Specifically, *Rule 65(c)* provides that "[n]o restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained." *Fed. R. Civ. P. 65(c)*. "Despite this seemingly mandatory language, *Rule 65(c)* invests the district court with discretion as to the amount of security required, *if any*." *Johnson v. Couturier, 572 F.3d 1067, 1086 (9th Cir. 2009)* (internal quotation marks omitted; emphasis in the original).

Because the Court has determined that TriPharma has a high likelihood of succeeding on the merits of its claims, and because the Court has made this ruling based primarily upon conclusions of law rather than a disputed factual record, the Court imposes only a nominal bond requirement on TriPharma. The injunction set forth below shall become effective upon the posting of a bond by TriPharma in the amount of $25,000.

IX. Preliminary Injunction

As set forth herein, the Court denies the Motions to Dismiss (Docket Nos. 22 & 65) and grants the Motion for Preliminary Injunction, which shall become effective upon TriPharma's posting of a $25,000 bond. (Docket No. 29.) **[*49]**

Accordingly, for the reasons set forth above, and pursuant to *Rule 65(c) of the Federal Rules of Civil Procedure*, Defendant First Fruits Business Ministry LLC, Defendant First Fruits Beverage Company LLC, and their officers, directors, employees, and agents (including but not limited to Defendant Roger J. Catarino), and additionally all those individuals and entities acting in concert with them[21] are enjoined and prohibited from directly or indirectly engaging in the following actions:

> (1) Selling or distributing, or advertising or offering for sale or distribution, any weight loss product utilizing a formula that is within the scope of the 892 Patent;

---

[21] Pursuant to *Rule 65(d)(2)(C) of the Federal Rules of Civil Procedure*, in addition to being applicable to the entities and individuals specifically identified above, upon notice, this injunction is also applicable to any individual or entity who acts jointly with or in concert with any one or more of them.

(2) Selling or distributing, or advertising or offering for sale or distribution, the product presently sold and distributed by First Fruits Beverage Company, TrimFit™;

(3) Selling or distributing any product, or advertising or offering for sale any product by reference to the 892 Patent or clinical studies relating thereto; and

(4) Affixing the Patent number to any label or container of any weight loss product sold or distributed, or advertised or offered for sale or distribution.

IT IS SO ORDERED.

Opinion

MEMORANDUM

ROBERT F. KELLY, Sr. J.

Presently before the Court is the Joint Motion to Dismiss the Amended Complaint of TruePosition, Inc. Filed By Alcatel-Lucent USA, Inc. ("ALU"), LM Ericsson Telephone Company (Telefonaktiebolaget LM Ericsson) ("Ericsson") and Qualcomm, Inc. ("Qualcomm"), (collectively, the "Corporate Defendants"), the response in opposition by Plaintiff, TruePosition, Inc. ("TruePosition"), the Corporate Defendants' Joint Reply, as well as the separate Memoranda by ALU. For the reasons provided below, the Joint Motion to Dismiss will be denied.

I.FACTUAL HISTORY[1]

TruePosition **[*3]** describes itself as a "leading innovator in developing and marketing high accuracy location products that operate over cellular telecommunications networks." (Am. Compl. ¶ 3.) "More than 55 million cellular callers in the United States each year are located by TruePosition's products, assisting police, fire, and ambulance services in saving lives and enabling law enforcement to combat criminal activity and terrorist threats." (Id.) According to regulatory requirements set forth by the Federal Communications Commission ("FCC"), all mobile voice networks must be able to locate 911 callers. (Id.) In order to meet current FCC requirements, TruePosition's positioning technology, known as Uplink Time Difference of Arrival ("UTDOA"),[2] has been deployed on more than 90,000 cell tower sites in the United States. (Id.) TruePosition's UTDOA technology is implemented through Location Measurement Units ("LMU") that are located at multiple cell towers.[3] (Id. ¶ 24.) Multiple LMUs measure the difference in time that they receive signals sent over the cellular network by a handset (referred to as the "uplink" transmission). (Id.) These measurements enable the distance of the handset from each cell **[*4]** tower to be calculated. (Id.) By collecting multiple measurements, the handset location can be narrowed to within FCC requirements. (Id.)

This action stems from the alleged anticompetitive conduct of major players in the international telecommunications market within the context of a Standard Setting Organization ("SSO"). (Id. ¶¶ 1-9.) TruePosition alleges that Ericsson, Qualcomm and ALU conspired to exclude its positioning technology, UTDOA, from standards promulgated by Third Generation Partnership Project a/k/a 3GPP ("3GPP"). (Id.) 3GPP is a non-profit standard setting organization of which Plaintiff and the Corporate Defendants are members.[4] (See Am. Compl.) 3GPP is a not-for-profit SSO whose business is to fairly and impartially create global standards for mobile telecommunications technologies based on objective technical merit. (Id. ¶ 14.) The 3GPP standards are designed to be implemented globally through six regional SSOs, known as Organizational **[*5]** Partners, including Defendant European Telecommunications Standards Institute ("ETSI").[5] (Id.) This case arises from the alleged exclusion of

[1] A complete factual history of this action is set forth in *TruePosition, Inc. v. Ericsson, et al., No. 11-4574, 844 F. Supp. 2d 571, 2012 U.S. Dist. LEXIS 1646, 2012 WL 33075 (E.D. Pa. Jan. 6, 2012)*. Although this Memorandum Opinion is based upon the original Complaint, it gives a sound factual history of the action.

[2] Positioning technology" refers to technology used to locate mobile handsets.

[3] In the United States, two major carriers (AT&T Wireless and T-Mobile) have implemented TruePosition LMUs at approximately 90,000 cell sites." (Am. Compl. ¶ 47.)

[4] 3GPP is named as a defendant in this action. Trueposition only recently served the Amended Complaint on 3GPP. 3GPP filed a Motion to Dismiss Plaintiff TruePosition, Inc.'s Amended Complaint on August 15, 2012. (Doc. No. 131.) This Motion will be addressed at a later time.

TruePosition's positioning technology from the 3GPP standard for the newest and most advanced 4G (Fourth Generation) or Long Term Evolution ("LTE") mobile telecommunications networks. (Id. ¶ 2.) Inclusion in the 3GPP 4G LTE standard is vital to the commercial success of TruePosition's UTDOA positioning technology. (Id. ¶ 4.) Notably, "[e]xclusion from the standard guarantees commercial failure and, in most instances, absolute foreclosure from the market." (Id.)

According to TruePosition, the Corporate Defendants collaboratively manipulated 3GPP's processes and procedures to gain unfair advantages for their preferred location technologies, and to prevent or delay standardization of TruePosition's technology. (Id. ¶ 6.) TruePosition further alleges that 3GPP participated in the conspiracy to exclude UTDOA from its standards by failing in its obligations to ensure that the Corporate Defendants complied with 3GPP Rules. (Id. ¶¶ 114-122.) TruePosition alleges that the direct consequence of the Defendants' conspiracy is that it, the UTDOA technology, and other competitors that market UTDOA-based products, have been foreclosed from competition for 4G positioning products, and have been harmed in their continued ability to develop and market 2G (Second Generation) and 3G (Third Generation) products that can be upgraded for 4G networks. (Id. ¶ 8.)

II. PROCEDURAL HISTORY

TruePosition filed a Complaint on July 20, 2011. Therein, TruePosition alleged that the conduct described above violated United **[*7]** States ***antitrust law*** giving rise to two causes of action: (1) violations of Section 1 of the Sherman Act, *15 U.S.C. § 1*; and (2) violations of *Section 2* of the Sherman Act, *15 U.S.C. § 2*.[6] TruePosition's Section 1 claim was asserted against all Defendants, while TruePosition's *Section 2* claim was only asserted against Ericsson and ALU.

A majority of Defendants moved to dismiss the Complaint. Instead of dismissing the action, we allowed TruePosition to file an amended complaint curing any defects set forth in our January 6, 2012 Memorandum Opinion. TruePosition filed an Amended Complaint on February 3, 2012. (See Am. Compl.) The Amended Complaint contains only one count asserted against all Defendants entitled "Combination Conspiracy in Violation of Section 1 of the Sherman Act (*15 U.S.C. § 1*)." (Id. ¶¶ 139-153.) TruePosition seeks monetary damages, treble damages, attorneys' fees and costs, prejudgment interest and injunctive relief. (Id. ¶ 154.) The Corporate Defendants filed a Joint Motion to Dismiss the Amended Complaint. (Doc. No. 103.) ALU also filed its own separate Memorandum **[*8]** in Support of the Corporate Defendants' Joint Motion to Dismiss. (Doc. No. 104.) TruePosition responded to the arguments made by the Corporate Defendants and they, in turn, filed their Replies. (Doc. Nos. 106, 107, 110 and 112.) For the reasons set forth below, the Corporate Defendants' Joint Motion to Dismiss TruePosition's Amended Complaint is denied.

III. LEGAL STANDARD

Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a complaint may be dismissed for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. When reviewing a motion to dismiss pursuant to *Rule 12(b)(6)*, the complaint must be construed in the light most favorable to the plaintiff. *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 220 (3d Cir. 2011)* (citing *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 314 (3d Cir. 2010))*. *Federal Rule of Civil Procedure 8(a)(2)* requires "only 'a short and plain statement of the claim showing the pleader is entitled to relief' in order to 'give the defendant fair notice of what the . . . claim is and the grounds upon which it

---

[5] ETSI was voluntarily dismissed from this action on August 10, 2012. (Doc. No. 130.) Prior to its dismissal, ETSI filed a Motion to Dismiss. (Doc. No. 102.) In their Joint Motion to Dismiss, the Corporate Defendants joined in ETSI's dismissal motion. (Doc. No. 103.) We find that the only novel issue that is relatable to **[*6]** the Corporate Defendants is ETSI's argument concerning ripeness. We will address the ripeness issue at the end of this Memorandum Opinion. Infra Section IV.D.

[6] Pursuant to *28 U.S.C. § 1331*, federal question jurisdiction exists based upon the Sherman Act, *15 U.S.C. § 1*.

rests.'" Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007) (quoting Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)).

"[A] plaintiff's **[*9]** obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of the cause of action will not do." Twombly, 550 U.S. at 555. In Twombly, the United States Supreme Court "set forth the 'plausibility' standard for overcoming a motion to dismiss and refined the approach in Iqbal." Burtch, 662 F.3d at 220 (citing Twombly, 550 U.S. at 557; Ashcroft v. Iqbal, 556 U.S. 662, 680, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)). In other words, Rule 8 requires that a complaint contain factual allegations that, taken as a whole, render the plaintiff's entitlement to relief plausible. West Penn Allegheny Health System, Inc. v. UPMC, 627 F.3d 85, 98 (3d Cir. 2010). "This 'does not impose a probability requirement at the pleading stage,' but instead 'simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of the necessary element.'" Id. (quoting Phillips v. County of Allegheny, 515 F.3d 224, 234 (3d Cir. 2008); Twombly, 550 U.S. at 556). When deciding the sufficiency of a complaint "courts should disregard the complaint's legal conclusions and determine whether the remaining factual allegations suggest that **[*10]** the plaintiff has a plausible - as opposed to merely conceivable - claim for relief." Id. (citing Iqbal, 129 S. Ct. at 1949-50; Fowler v. UPMC Shadyside, 578 F.3d 203, 210-11 (3d Cir. 2009)). Under both Twombly and Iqbal, a court must take the following three steps in order to determine the sufficiency of a complaint:

> First, the court must take note of the elements a plaintiff must plead to state a claim. Second, the court should identify the allegations that, because they are no more than conclusions, are not entitled to the assumption of truth. Finally, where there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement of relief.

Id. (quoting Santiago v. Warminster Twp., 629 F.3d 121, 130 (3d Cir. 2010)). "It is, of course, true that judging the sufficiency of a pleading is a context-dependent exercise." West Penn, 627 F.3d at 98 (citing Iqbal, 129 S. Ct. at 1950; Twombly, 550 U.S. at 567-68; Phillips, 515 F.3d at 232).

IV. DISCUSSION

Section 1 of the Sherman Act states that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the **[*11]** several States, or with foreign nations, is hereby declared to be illegal." 15 U.S.C. § 1. Under Section 1 of the Sherman Act, a plaintiff must plausibly allege the following three elements: (1) an agreement; (2) imposing an unreasonable restraint of trade within a relevant product market; and (3) resulting in antitrust injury, that is "injury of the type the antitrust laws were intended to prevent and . . . that flows from that which make defendants' acts unlawful." Ins. Brokerage, 618 F.3d at 315.

A. Agreement

To prevail on a Section 1 claim, a plaintiff is required to establish the existence of an agreement, at times also referred to as a conspiracy or concerted action. West Penn, 627 F.3d at 99 (citing Twombly, 550 U.S. at 553; Gordon v. Lewistown Hosp., 423 F.3d 184, 207 & n.16 (3d Cir. 2005)). The existence of an agreement "requires some form of concerted action, which we define as unity of purpose or a common design and understanding or a meeting of minds or a conscious commitment to a common scheme." Burtch, 662 F.3d at 221 (citations omitted). Regardless of the motivation, unilateral action is not a violation of Section 1. Id. (citation omitted). An agreement may be pleaded by **[*12]** a plaintiff by either alleging direct or circumstantial evidence or a combination of the two. Id.

1. Direct Evidence

"Direct evidence of a conspiracy is 'evidence that is explicit and requires no inferences to establish the proposition or conclusion being asserted.'" *Burtch, 662 F.3d at 225* (quoting *Ins. Brokerage, 618 F.3d at 324 n.23*) ("A document or conversation explicitly manifesting the existence of the agreement in question is an example of direct evidence.") In this case, TruePosition argues that it has presented direct evidence of an agreement between the Corporate Defendants. Upon examination of the Amended Complaint, we find only conclusory allegations of direct evidence of an agreement.

TruePosition states that "[i]n November 2008, upon information and belief, the corporate defendants agreed to prevent standardization of TruePosition's positioning technology so that their preferred technologies would attain an insurmountable head start in relevant markets." (Am. Com. ¶ 2.) Notably, the Amended Complaint neither contains any allegations that specify a time or place that an actual agreement occurred, nor the identities of any particular individuals who made such an agreement. **[*13]** See *Twombly, 550 U.S. at 565 n.10* (stating that plaintiff's failure to allege a "specific time, place, or person involved in the alleged conspiracies" left "no clue as to which of the [defendants] (much less which of their employees) supposedly agreed, or when and where the illicit agreement took place."); *Great Western Mining & Mineral Co. v. Fox Rothschild LLP, 615 F.3d 159, 179 (3d Cir. 2010)* ("The complaint sets forth merely a conclusory allegation of agreement at some unidentified point[, which] does not supply facts adequate to show illegality. . . . Specifically, Great Western has failed to allege except in general terms the approximate time when the agreement was made, the specific parties to the agreement (i.e., which judges), the period of the conspiracy, or the object of the conspiracy.") Nowhere in the Amended Complaint are there any substantive allegations specifically detailing any facts regarding direct evidence of an illicit agreement.

TruePosition's allegations and arguments of direct evidence of an agreement are conclusory in nature and, therefore, are not entitled to the assumption of truth. See *Burtch, 662 F.3d at 224* ("Under Iqbal, we next identify allegations that **[*14]** are no more than conclusions, [and] are not entitled to the assumption of truth . . . [and] disregard naked assertions. . . ."); see also *Twombly, 550 U.S. at 557* ("[A] conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality.") Consequently, TruePosition has failed to adequately plead direct evidence of a specific agreement.

2. Circumstantial Evidence

In light of TruePosition's failure to plausibly allege direct evidence of an agreement, we must determine whether TruePosition has adequately alleged circumstantial evidence to plausibly show that an agreement exists between the Corporate Defendants. "Circumstantial evidence of parallel behavior must be pled in 'a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.'" *Burtch, 662 F.3d at 226* (quoting *Twombly, 550 U.S. at 557*). "The law is well-established that 'evidence of parallel conduct by alleged co-conspirators is not sufficient to show an agreement.'" Id. (quoting *Ins. Brokerage, 618 F.3d at 321*). "Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement **[*15]** at some unidentified point does not supply facts adequate to show illegality." *Twombly, 550 U.S. at 556-57*. In itself, parallel conduct is insufficient to state a plausible claim because "it is 'consistent with conspiracy, but just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market.'" Id. (quoting *Twombly, 550 U.S. at 554*).

"Alleging parallel conduct 'is thus much like a naked assertion of conspiracy in a § 1 complaint; it gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility of entitlement to relief.'" Id. (quoting *Twombly, 550 U.S. at 557*). In In re Insurance Brokerage Antitrust Litigation, the Court of Appeals for the Third Circuit ("Third Circuit") identified at least three types of facts, often referred to as "plus factors," that tend to demonstrate the existence of an agreement. *Ins. Brokerage, 618 F.3d at 321-22*. The three "plus factors" are the following: "(1) evidence that the defendant had a motive to enter into a . . . conspiracy; (2) evidence that the defendant acted contrary to its interests; **[*16]** and (3) evidence implying a traditional conspiracy." *Id. at 321-22* (citation and internal quotation marks omitted). The Third Circuit ruled that "plaintiffs relying on parallel conduct must allege facts that, if true, would establish at least one 'plus factor.'" *Id. at 323*.

Also, the Third Circuit has "cautioned that the first two plus factors may indicate that 'defendants operate in an oligopolistic market, that is, may simply restate the (legally insufficient) fact that market behavior is interdependent and characterized by conscious parallelism.'" *Burtch, 662 F.3d at 227* (quoting *Ins. Brokerage, 618 F.3d at 322*); see also *In re Baby Food Antitrust Litig., 166 F.3d 112, 117 (3d Cir. 1999)*. "Evidence of the third plus factor is 'non-economic evidence that there was an actual, manifest agreement not to compete, which may include proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.'" Id. (quoting *Ins. Brokerage, 618 F.3d at 322*).

"[W]hen evidence shows communications which provided an opportunity for agreement, a plaintiff must still produce evidence **[*17]** permitting an inference that an agreement in fact existed." *Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1013 (3d Cir. 1994)* (citation omitted). "The evidence must give rise to more than speculation." Id. (citation omitted). "Requiring plausibility to infer an agreement from circumstantial evidence 'does not impose a probability requirement at the pleading stage; it simply calls for enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of an illegal agreement.'" Id. (quoting *Twombly, 550 U.S. at 556*).

With these standards in mind, we review the Amended Complaint's allegations granting reasonable inferences to TruePosition's nonconclusory well-pleaded factual allegations. Unlike TruePosition's unsuccessful attempt at plausibly alleging direct evidence, the Amended Complaint satisfactorily alleges parallel conduct. The Amended Complaint is replete with allegations of parallel conduct by the Corporate Defendants pertaining to their various roles within the standardization process. In addition, the Amended Complaint details the standardization process of the 4G LTE Standard and the Corporate Defendants' alleged concerted acts to obstruct or stop **[*18]** the inclusion of UTDOA within the Standard.

TruePosition articulates the relevant times in which representatives of the Corporate Defendants held central positions of Chairmanship over key committees and working groups making crucial decisions about the standardization of the positioning technologies at issue. (Am. Compl. ¶¶ 41.) According to TruePosition, the Corporate Defendants needed each other in order to successfully obstruct the standardization of TruePosition's UTDOA technology. (Id.) "The corporate defendants . . . controlled the Chairmanships of, and had key members in, every committee essential to progress the corporate defendants' positioning work item." (Id.) (listing the Corporate Defendants' positions). TruePosition asserts that "the corporate defendants could not have foreclosed U-TDOA standardization and secured an insurmountable head start for [their preferred positioning technology], except by coordinating their violations of 3GPP rules and procedures at key points in the standardization process, and permitting those violations through their authority as Chairmen." (Id.)

Although TruePosition has successfully alleged parallel conduct by the Corporate Defendants, "[t]he **[*19]** law is well-established that 'evidence of parallel conduct by alleged co-conspirators is not sufficient to show an agreement.'" *Burtch, 662 F.3d at 226* (quoting *Ins. Brokerage, 618 F.3d at 321*); see also *Twombly, 550 U.S. at 556-57* ("Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality.") Thus, we now examine whether the plus factors advanced by TruePosition lend plausibility to the allegations of conspiratorial parallel conduct.

a. Plus Factors

As previously explained, when relying upon circumstantial evidence to sufficiently plead the existence of an agreement, as is this case, at least three types of facts, often referred to as "plus factors," tend to demonstrate the existence of an agreement: "(1) evidence that the defendant had a motive to enter into . . . conspiracy; (2) evidence that the defendant acted contrary to its interests; and (3) evidence implying a traditional conspiracy." *Ins. Brokerage, 618 F.3d at 321-22* (stating "plaintiffs relying on parallel conduct must allege facts that, if true, would establish at least one 'plus factor'"). Here, viewing **[*20]** all of the non-conclusory allegations as a whole, we conclude that TruePosition's Amended Complaint plausibly alleges parallel conduct by the Corporate Defendants that is consistent with a conspiracy.

Regarding the first two plus factors (i.e., evidence that defendants had a motive to enter into a conspiracy and evidence that defendants acted contrary to their interests), we conclude that TruePosition has not adequately shown that these factors alone demonstrate the existence of an agreement. Without delving into a lengthy discussion about the two factors, it is sufficient to say that neither the first nor second plus factor set forth by TruePosition adequately raise a suggestion of a preceding agreement. In fact, they can be seen as merely parallel conduct that could just as well be independent action motivated by self-interest and legitimate business practices. We caution that "a fine line demarcates concerted action that violates ***antitrust law*** from legitimate business practices." *Big Apple BMW, Inc. v. BMW of N. Am., Inc., 974 F.2d 1358, 1363 (3d Cir. 1992)*. We will, however, consider TruePosition's allegations concerning the first two plus factors within our overall analysis of **[*21]** whether TruePosition's Amended Complaint has plausibly alleged parallel conduct that is consistent with conspiracy. Although we conclude that TruePosition has not sufficiently alleged the first two plus factors, we do find that it has adequately presented allegations of the third plus factor (i.e, evidence implying a traditional conspiracy). When viewing the Amended Complaint as a whole, TruePosition's allegations against the Corporate Defendants are plausible.

"[W]hen allegations of parallel conduct are set out in order to make a § 1 claim," that conduct must be placed in "some setting suggesting the agreement necessary to make out a § 1 claim." *Twombly, 550 U.S. at 557*; see also *In re Blood Reagents Antitrust Litig., 756 F. Supp. 2d 623, 631 (E.D. Pa. 2010)* ("Twombly emphasized context.") The unique backdrop of the alleged conspiracy in this case is within a standard setting organization and involves the evolving worldwide mobile telecommunications industry. In order to explore the unique context of this lawsuit, we begin by examining the standard setting organizational role of 3GPP and positioning technology related to mobile telecommunication prior to, and after, 2008, the year **[*22]** in which the alleged conspiracy began.

Background Prior To 2008

Founded in 1994 as "Associated Radio Location Tracking, Inc.," TruePosition first started developing location products for analog mobile phones and a 2G digital phone technology used in the United States. (Am. Compl. ¶ 18.) By 2002, TruePosition developed UTDOA-based products that potentially could interface with 2G networks. (Id.) TruePosition sells high accuracy positioning and networking technology as a standalone Location Measurement Unit, LMU. (Id. ¶ 19.) These standalone LMUs are collocated with, and must interoperate with, the RAN equipment at a cell tower site, but are separate from the RAN equipment.[7] (Id.) The ability of TruePosition's LMUs to interoperate with multiple vendors' RAN equipment is crucial to the ability of TruePosition (and other LMU vendors) to compete in the markets for positioning equipment. (Id. ¶ 20.) TruePosition markets a universal LMU that is used to determine the locations of mobile phones on networks for 2G mobile telecommunications technology, known as Global System for Mobile Communications ("GSM"), and/or 3G mobile phone networks based on the 3GPP standard known as Universal Mobile Telecommunications **[*23]** System ("UMTS"). (Id. ¶ 21.) According to TruePosition, its customers can maximize their investments in positioning hardware by using the same LMU hardware for current and future networking technologies, and by upgrading their positioning technologies more quickly and inexpensively than through the modification of positioning technology embedded in RAN equipment because LMUs work in tandem with the network equipment and no upgrade of the phones is needed. (Id.)

TruePosition's high accuracy positioning technology, UTDOA, is primarily used in the United States to locate mobile phones that call emergency services such as E-911 (enhanced 911 for 911 calls). (Id. ¶ 22.) The FCC requires mobile carriers such as AT&T Wireless (AT&T), Verizon Wireless, T-Mobile, and Sprint, to provide for the increasingly accurate location of mobile handsets that call E-911 services. (Id.) The FCC has recently promulgated more precise requirements, and is considering even more stringent requirements for the future regarding locating indoor calls. (Id.) Carriers that fail to satisfy FCC requirements are subject to enforcement proceedings **[*24]** and fines. (Id.) TruePosition's UTDOA technology meets current FCC requirements, can meet the recently announced

---

[7] RAN stands for Radio Access Network. (See Am. Compl. Glossary of Acronyms.)

future FCC requirements, and is uniquely adapted to provide indoor location. (Id.) TruePosition alleges that UTDOA alone provides a high level of accuracy that reliably meets the FCC regulatory requirements. (Id. ¶ 25.)

As previously explained, TruePosition's UTDOA method is implemented in LMUs located at multiple cell towers. (Id. ¶ 24.) Multiple LMUs measure the difference in the time they receive signals sent over the cellular network by a handset (referred to as "uplink" transmission). (Id.) By collecting multiple measurements, the handset location can be narrowed within FCC requirements. (Id.) Special signals from the handset are not needed nor is there a need for special hardware or software in the handset. (Id.) No calculations are performed by the handset. (Id.) TruePosition asserts that its UTDOA is superior to the technology promoted by the Corporate Defendants known as "OTDOA" (Observed Time Difference of Arrival) because OTDOA is handset-based requiring a downlink transmission. (Id. ¶ 29.) That is, the handset calculates its location based on the difference in **[*25]** timing between signals received over a cellar network from several cell towers. (Id.) Consequently, OTDOA requires specialized hardware and software of the type manufactured by Qualcomm in every handset, as well as RAN equipment of the type manufactured by Ericsson and ALU. (Id.) TruePosition alleges that Ericsson and Qualcomm each hold patents that are essential to the implementation of OTDOA.[8] (Id. ¶ 30.) According to TruePosition, OTDOA-based positioning equipment has not been successfully deployed commercially. (Id. ¶ 31.)

Importantly, TruePosition asserts that the superiority of UTDOA was demonstrated in 2G and 3G networks. (Id. ¶ 32.) Major United States mobile carriers attempted in 1999-2001 to implement a predecessor of OTDOA technology, known as "EOTD" (Enhanced Observed Time Difference), but discovered that it failed to locate 911 callers to the level of accuracy required by FCC regulations. (Id.) In the late 1990s, a European-based ETSI (European Telecommunications Standards Institute) standard for 2G GSM mobile telecommunication technology proliferated throughout Europe and was beginning to be adopted by several major United States carriers. (Id. ¶ 42.) Positioning for 2G GSM at that time was dominated by a few large companies, including Ericsson, ALU and Qualcomm. (Id.) These vendors favored EOTD positioning technology for the following two reasons: Ericsson and Qualcomm's alleged **[*27]** patents essential to EOTD technology would mean substantial royalties if EOTD was included in the standards; and since 3GPP (Third Generation Partnership Project) did not enable standalone EOTD products, Ericsson and ALU could incorporate EOTD positioning within their RAN equipment and prevent competition from standalone LMU vendors. (Id.)

The EOTD technology offered by the Corporate Defendants, and deployed by major United States carriers in 1999-2001, was a failure because it did not meet FCC regulatory requirements. (Id. ¶ 43.) As a result, the carriers that had heavily invested in GSM RAN equipment faced millions of dollars in fines from the FCC for failing to meet the deadlines to implement E-911 mobile phone location requirements. (Id.) The carriers rectified this failure by implementing UTDOA products from manufacturers, including TruePosition and Andrew Corporation, in standalone UTDOA products offered by TruePosition and Andrew Corporation. (Id. ¶ 44.) However, no ETSI standard specified the method for interoperability with UTDOA technology. (Id.) In the absence of a standard, TruePosition created a "work-around" solution so that its LMUs could obtain from the GSM RAN equipment **[*28]** two necessary pieces of information, namely, the precise time when the E-911 call was placed and the radio channel information used by the handset to place the call. (Id.) Ericsson and ALU independently opposed TruePosition's efforts. (Id.)

TruePosition's "work around" solution was successful, but costly for the carriers. (Id. ¶ 45.) As a result, the carriers required their RAN vendors, primarily Ericsson and ALU, to join with TruePosition in a "UTDOA System Study

---

[8] ALU, which does not have essential patents in OTDOA, argues that it does not have a vested interest in excluding UTDOA from the 4G LTE Standard. (ALU's Supplemental Mem. Law Support Corp. Defs.' Joint Mot. to Dismiss Am. Compl. at 6.) ALU argues that it would benefit, not suffer, from having another option to put into its RAN equipment, particularly if, as TruePosition contends, the UTDOA option is desired by ALU customers (i.e., U.S. telecommunications carriers). (Id. at 7.) TruePosition counters ALU's argument by stating that "[ALU] specifically sought to delay standardization until it could build UTDOA into its own RAN equipment; it successfully promoted standardization **[*26]** of its preferred UTDOA configuration, not one it could 'buy' from TruePosition; and then it proposed to standardize UTDOA so that only a RAN equipment manufacturer like [ALU] could compete to make and sell UTDOA equipment." (TruePosition's Opp'n to Joint Mot. to Dismiss Am. Comp. and Supplemental Mem. of ALU at 37.)

Group" to create a standard interface for TruePosition's LMUs to interoperate with RAN equipment. (Id.) Within approximately one year, the group completed and brought the work to ETSI, and, by 2004, UTDOA was included in the ETSI standard for 2G GSM, including standalone LMUs. (Id.) The standard for the next generation of mobile phone technology called UMTS or 3G was created by 3GPP. (Id. ¶ 46.) AT&T insisted that another study group be formed in 2004 because it wanted the ability to use TruePosition's standalone LMUs with 3G UMTS. (Id.) In 2005 (approximately within 18 months), UTDOA was incorporated within the 3GPP standards for 3G UMTS, including standalone LMUs, despite the independent opposition by both Ericsson and ALU. **[*29]** (Id.)

Since 2005, UTDOA in a standalone implementation has been included in standards for 2G GSM and 3G UMTS systems and has been successfully deployed in standalone LMUs in the United States for public safety E-911 uses and in other countries of the world for security and law enforcement. (Id. ¶ 47.) TruePosition and other companies have successfully marketed UTDOA-based standalone products in the United States, and in foreign countries of the world for security and law enforcement uses. (Id.) In the United States, two major carriers (AT&T Wireless and T-Mobile) have implemented TruePosition LMUs at approximately 90,000 cell sites which locate more than 55 million E-911 callers each year. (Id.)

UTDOA technology is equally applicable to LTE or 4G systems. (Id. ¶ 48.) There is no technological reason why UTDOA in a standalone LMU configuration cannot interoperate with RAN equipment for a LTE network. (Id.) However, the "work around" that enabled UTDOA standalone implementations without standardization is not possible for 4G LTE network equipment due to the different architecture of LTE networks. (Id.) Thus, 3GPP standardization for UTDOA is necessary for standalone LMUs on a LTE network. **[*30]** (Id.) Exclusion from the 3GPP standard for LTE would render UTDOA useless for 4G networks, and make ungradable universal LMUs, such as those sold by TruePosition, virtually unmarketable for 2G and 3G networks. (Id.) It is the Corporate Defendants' alleged concerted actions attempting to foreclose UTDOA standardization in 4G LTE within 3GPP that is the crux of this action.

According to 3GPP policies, TruePosition alleges that it should have been a foregone conclusion that UTDOA in standalone implementations would be included in 3GPP Release 9 (the first release intended for actual deployment of LTE systems).[9] TruePosition asserts that it should have been included due to the prior standardization of UTDOA in the standards for earlier-generation 2G and 3G mobile communications technology, its proven effectiveness to meet regulatory standards, and its marketplace success. (Id. ¶ 49.) Likewise, TruePosition asserts that any standardization work for UTDOA for 4G should have progressed and been completed at least as quickly as the standardization of UTDOA for 2G GSM and 3G UMTS (i.e., within approximately 12-18 months). (Id.) As of today's date, it has not been included in Release 10 (the **[*31]** second release for actual deployment of 4G LTE systems).[10]

2008 Work Item Alleged Conspiracy To Exclude UTDOA From Release 9 And 3GPP Standards

Focusing first on Release 8, TruePosition explains that it did not include any positioning technology; therefore, **[*32]** work needed to be done by the 3GPP System Architecture Group ("SA2 Group") to lay the technological foundation to provide for positioning in 4G networks. (Id. ¶ 50.) The positioning discussions were led by Stephen Edge ("Edge") of Qualcomm, and TruePosition actively participated in the effort because it wanted to ensure that a

---

[9] The 3GPP organizational structure relies on a Radio Access Network Technical Specification Group ('RAN TSG' or 'RAN Plenary') to create technical documents, known as 'Specifications,' for the structure and operation of RAN networks and equipment." (Am. Compl. ¶ 36.) "The RAN TSG consists of five Working Groups (RAN1 through RAN5), each covering different aspects of the network, that perform that technical work of evaluating proposed work items and developing the draft Specification." (Id.) Updates to 3GPP Specifications are issued sequentially in a series of "Releases." (Id. ¶ 38.) The technologies and methods stated in each Release may build upon or add to a prior release. (Id.) When a Release is completed by 3GPP, it is adopted and promulgated as a standard by 3GPP's regional Organizational Partners. (Id.)

[10] Release 11 of 3GPP's Specification for 4G LTE technology is to be completed, at its earliest, by September 2012. (Am. Compl. ¶ 91.)

sound technological foundation would be established for UTDOA positioning for 4G LTE. (Id. ¶ 51.) TruePosition alleges that in November 2008, before work was completed by the SA2 Group, Qualcomm, Ericsson and ALU agreed to privately prepare their own work item to include specific positioning technologies in Release 9 of the 3GPP standards.[11] (Id. ¶ 52.) The work item ("2008 Work Item") was written by Qualcomm's Edge. (Id.)

TruePosition alleges that Qualcomm's early draft of the 2008 Work Item proposed to include UTDOA in the standardization effort, but Ericsson and ALU told Qualcomm that they would not support it if UTDOA was included and insisted that it be removed from the draft. (Id. ¶ 53.) Noting that the draft of the 2008 Work Item did not include UTDOA, TruePosition avers that Qualcomm acceded to the demands of Ericsson and ALU. (Id.) It is noteworthy that TruePosition argues that Ericsson and ALU had each unsuccessfully independently opposed TruePosition's efforts to create the "work-around" solution so that its LMUs could work with the 2G GSM RAN. (Id. ¶ 44.) This is important because one of the premises upon which TruePosition's conspiracy claim lies is that Ericsson and ALU needed to coordinate their efforts with each other and Qualcomm in order to successfully preclude and forestall TruePosition's UTDOA technology from being included in the 4G LTE standard. (Id.)

TruePosition alleges that the SA2 Group met for several days in November 2008 to continue the foundational work. (Id. ¶ 54.) TruePosition asserts that Qualcomm kept the drafting of **[*34]** the 2008 Work Item, as well as its text, secret from the SA2 Group, and from TruePosition, whose representative had one or more one-on-one conversations with Edge regarding positioning, by never disclosing the draft nor the Corporate Defendants' intention of submitting the 2008 Work Item. (Id.) TruePosition alleges that the Corporate Defendants intended and agreed that the intention and the text of the draft would not be shared with TruePosition or other UTDOA manufacturers because they intended to use the Work Item in an effort to exclude or delay the standardization for UTDOA. (Id.)

Interestingly, the draft of the 2008 Work Item contained a background section describing the "Justification" for the Work Item acknowledging that UTDOA technology is capable of meeting regulatory requirements for positioning. (Id. ¶¶ 55-56.) However, out of all of the technologies listed in the "Justification" section, only UTDOA was omitted from the section of the document that proposed the technologies to be included within the 3GPP standard. (Id.)

At the December 2008 RAN Plenary Group meeting in Athens, Greece, the Plenary Group met to determine the features to be included and prioritized for Release **[*35]** 9. (Id. ¶ 57.) Several days after the deadline for making technical submissions passed, Qualcomm submitted the 2008 Work Item proposing to include positioning technologies in the 4G LTE standard. (Id.) Such a late submission violated 3GPP rules. (Id.) TruePosition alleges that such a late submission had to be intentional because the Corporate Defendants held key chairman positions within 3GPP and, therefore, knew the rules and proper procedures.[12] (Id. ¶ 58.) TruePosition also argues that the Corporate Defendants had to agree and plan on the late submission because the only way that the 2008 Work Item would be accepted in violation of the rules is due to the fact that the Chairman of the RAN Plenary Group was a senior employee of ALU possessing the power to refuse any objection based on lateness of the submission by a Qualcomm representative. (Id. ¶ 59.) According to 3GPP rules, a Chairman must defer consideration of late submissions that prejudice 3GPP members and unfairly favor others. (Id.) TruePosition argues that if 3GPP's due process rules had been followed, the Corporate Defendants would not have gained any advantage by the dilatory filing of the Work Item, and it would have **[*36]** had a fair opportunity required by 3GPP rules to consider, review,

[11] Work Items are proposals to include technology features in 3GPP standards initially created through private discussions among members of a Working Group outside of the formal meeting context. (Id. ¶ 37.) In order to be considered by the RAN Plenary Group, a Work Item proposal must list the support of at least four members although Work Item proponents often have a longer list including companies that have no direct interest in the outcome **[*33]** or do not intend to contribute to the project. (Id.)

[12] In the Amended Complaint, TruePosition states that "the Chairman of the Plenary Group and of each RAN Working Group has extraordinary authority to determine which technologies will be included in the Specification, and the order in and speed at which each element of the Specification must be drafted, reviewed, simulated, and completed." (Am. Compl. ¶ 39.) "Chairman positions are almost exclusively filled by representatives from major multinational telecommunications equipment manufacturers, such as the Corporate Defendants." (Id. ¶ 40.)

and respond to the proposal. (Id. ¶¶ 58-59.) The late submission of the proposal was accepted by the ALU RAN Plenary Group Chairman. (Id. ¶ 59.)

TruePosition states that it was ambushed by the submission. (Id. ¶ 60.) TruePosition explains that it, as well as other companies, anticipated and understood that technologies already standardized in 3G would be rolled into the 4G standards once the SA2 Group's foundational work was completed in March 2009, and that any positioning work items for new technologies (such as OTDOA) would only be ripe for submission at that time. (Id.) TruePosition **[*37]** also expresses its surprise at the fact that Stephen Edge, who led the SA2 Group's effort to create the foundation for LTE positioning, did not mention the possibility of an imminent work item submission. (Id.) TruePosition also points out that the exclusion of UTDOA from the proposal was even more suspect given that UTDOA had been commercially successful, widely deployed, and demonstrably met the FCC positioning requirements in contrast to the OTDOA technology proposed in the submission which was unproven technology with no extant commercial implementations since it was derived from the failed EOTD technology and replaced in the United States with TruePosition's UTDOA-based LMUs. (Id. ¶ 61.)

The 2008 Work Item submission listed nine supporting companies in addition to the Corporate Defendants. (Id. ¶ 62.) TruePosition asserts that some of the nine companies did not have any business interests in deploying UTDOA or OTDOA, and others, including AT&T Wireless, lent support to the 2008 Work Item because they mistakenly believed that it sought to standardize the technologies listed in the "Justification" section as "useful and even essential," specifically including UTDOA. (Id. ¶ 63.) TruePosition **[*38]** states that AT&T representatives learned that the 2008 Work Item excluded UTDOA standardization after it was submitted to the RAN Plenary Group in Athens, Greece. (Id.) On the day that the 2008 Work Item was going to be considered by the RAN Plenary Group, TruePosition, AT&T, and Polaris Wireless convened a meeting with a representative of Qualcomm. (Id. ¶ 64.) At this meeting, a representative of AT&T told the Qualcomm representative that AT&T wanted UTDOA added to the 2008 Work Item. (Id.) Refusing AT&T's request, the Qualcomm representative's sole justification was that major companies that had signed on to the 2008 Work Item would oppose any work item that includes UTDOA.[13] (Id.) TruePosition alleges that it believes that the Qualcomm representative was referencing Ericsson and ALU as the "major companies." (Id.) AT&T is a major purchaser of Ericsson and ALU RAN equipment, as well as a major seller of mobile phones using Qualcomm chipsets. (Id.) According to TruePosition, the Corporate Defendants were able to collectively refuse AT&T's request because by acting together they wielded sufficient power in the marketplace to avoid serious commercial repercussions from a major customer **[*39]** that they could not, otherwise, face acting alone. (Id.)

During the meeting when the RAN Plenary Group Chairman from ALU brought up the submission of the 2008 Work Item, a TruePosition representative requested that the discussion be deferred due to the prejudicial non-compliance with the 3GPP rules for submission deadlines. (Id. ¶ 66.) A representative from Polaris Wireless supported the deferral request based upon non-compliance and asserted that the proposal was premature since the SA2 Group had not completed its foundational work. (Id.) TruePosition's representative proposed to add UTDOA to the 2008 Work Item, but the Chairman refused the request reasoning the alleged complexity and potential delay of adding UTDOA. (Id. ¶ 67.) TruePosition asserts that such reasons were baseless because the only requirement needed for the proven UTDOA technology for standalone implementation was a method to deliver to the LMU the time and channel of the E-911 call, as had been **[*40]** done in both the 2G and 3G standards. (Id.) Also, TruePosition asserts that such reasons were baseless since OTDOA was unproven, more complex and would require extensive new engineering work in the 4G standards. (Id.) TruePosition states that, in furtherance of the agreement among the Corporate Defendants, the ALU Chairman denied the requests for delay, but made the submission the sole focus of further discussions of positioning technologies at the meeting. (Id.) TruePosition argues that the Chairman, who was a representative of ALU, acted in furtherance of the agreement of the Corporate Defendants because he violated the 3GPP safeguards against unfair and biased conduct by conducting the meeting in a manner that favored one positioning technology submission to the prejudice of other proposals. (Id. ¶ 68.)

---

[13] Truepositon argues that the Qualcomm representative's denial of AT&T's request is an act against its own interest in furtherance of the conspiracy due to AT&T's significant power within the mobile telecommunications market.

In light of the aforementioned facts, TruePosition asserts that the Corporate Defendants needed an agreement between each other not only to exclude UTDOA from the 2008 Work Item proposal, but to circumvent the due process safeguards set in place by the rules and regulations of 3GPP. TruePosition argues that the exclusion of UTDOA from the proposal was deliberately intended by the **[*41]** Corporate Defendants to preclude or delay UTDOA standardization for 4G LTE, and to seize a first mover advantage for technologies in which those companies held substantial patent portfolios and business interests. (Id. ¶ 61.)

Corporate Defendants' Alleged Continuing Efforts To Exclude Or Delay The Standardization Of UTDOA

In addition to the allegations that the Corporate Defendants successfully colluded with each other in order to foreclose UTDOA from being included in the 2008 Work Item, TruePosition argues that they have been continuing to work together in order to exclude or delay UTDOA standardization since that time. At the March 2009 RAN Plenary Group meeting, TruePosition submitted a proposal to add UTDOA to the positioning Work Item (which was supported by several companies, including AT&T), but the Corporate Defendants actively opposed it and the Chairman (a representative of ALU) rejected it. (Id. ¶ 69.)

TruePosition also proposed a separate Work Item for UTDOA standardization ("UTDOA Work Item") which AT&T, among other companies, supported. (Id. ¶ 70.) ALU also signed on to TruePosition's UTDOA Work Item.[14] (ALU's Supplemental Mem. Law Support Corp. Defs.' Joint Mot. to Dismiss **[*42]** at 5.) TruePosition asserts that, in furtherance of the conspiracy, the Corporate Defendants sought to ensure that the work on the standardization of UTDOA would proceed before committees that they collectively controlled, so that they could derail or delay any separate work item for UTDOA. (Am. Compl. ¶ 70.) Additionally, TruePosition asserts that the Corporate Defendants coordinated their efforts so that they were able to assure control over the progress of the two positioning work items so as to guarantee a significant head start to OTDOA in the relevant markets. (Id.)

Once securing the assignment of TruePosition's UTDOA Work Item to RAN1 Working Group, which is chaired by a representative of Ericsson, the Corporate Defendants allegedly furthered their conspiracy by the RAN1 Chairman proposing two rigorous restrictions on the UTDOA Work Item that were not imposed on OTDOA. (Id. ¶ 71.) Also, the Ericsson RAN1 Chairman delayed **[*43]** any work on the UTDOA Work Item until June 2009, which, TruePosition, points out is the same delay that ALU previously had requested privately from TruePosition. (Id.) This proposed delay by the Ericsson RAN1 Chairman, TruePosition alleges, was made in coordination with ALU. (Id.) These restrictions, which TruePosition asserts are unfair and unprecedented, were approved and imposed by the ALU RAN Plenary Group Chairman. (Id.)

In June and July 2009, the RAN1 Working Group began evaluating UTDOA. (Id. ¶ 72.) At the meeting, TruePosition alleges that it timely submitted a list of simulation testing assumptions representing a reasonable range of field conditions for UTDOA. (Id.) TruePosition conducted extensive and burdensome simulations that demonstrated the ability of UTDOA to meet the set of requirements and that UTDOA for 4G was capable of meeting FCC requirements, as it had been doing for 2G and 3G networks. (Id.) Each time that TruePosition brought new simulation results proving the accuracy of UTDOA under the requested assumption to the RAN1 Working Group, the Chairman (an Ericsson representative) would insist that the last requested assumptions were insufficient, and make them more **[*44]** stringent. (Id. ¶ 73.) TruePosition alleges that no other positioning technology was subjected to these restrictions. (Id.) In spite of positive simulation results for UTDOA, the RAN1 Working Group Chairman from Ericsson ruled that UTDOA could not progress beyond an "evaluation" stage. (Id.)

Regarding technical tests simulating how OTDOA would perform, the results yielded inconsistent results. (Id. ¶ 76.) Due to the unresolved technical issues, several companies were unwilling to approve progress for OTDOA. (Id.) TruePosition asserts that the Ericsson Chairman of the RAN1 Working Group, as well as the other Corporate

---

[14] Although the fact that ALU signed on to TruePositon's UTDOA Work Item does not alone negate all of the allegations of its involvement in an illegal conspiracy, we have given this fact serious consideration in our evaluation of TruePosition''s claims against ALU.

Defendants, were able to get changes through the working group that supported OTDOA, and the Ericsson Chairman sealed the accelerated treatment of OTDOA to secure its inclusion in Release 9. (Id.)

In October 2009, TruePosition was the only company to submit UTDOA simulations for the meeting. (Id. ¶ 77.) Just twelve hours before the UTDOA session was to start, and eight days past the deadline for any submissions, Ericsson submitted a report to the RAN1 Working Group regarding UTDOA subjects that were outside the purview of the RAN1 Working Group. (Id.) Relying on the report, **[*45]** Ericsson used it as an excuse to delay RAN1 Working Group's consideration of UTDOA by insisting that the RAN2 and RAN3 Working Groups needed to be consulted before the RAN1 Working Group could reach any decisions on UTDOA. (Id.) TruePosition asserts that Ericsson's argument was not legitimate because, in its first contribution against UTDOA after its Chairman position expired, Ericsson insisted on the need for prior input from the RAN2 and RAN3 Working Groups because the RAN3 Working Group was chaired by a Qualcomm representative and the Vice Chairman was from Ericsson. (Id. ¶ 78.) Through the Corporate Defendants' control of the RAN3 Working Group, TruePosition alleges that they positioned themselves to create more roadblocks to the consideration of UTDOA which kept it out of Release 9 and 4G LTE standards. (Id.) Even though Ericsson's late submission violated 3GPP rules, the new Chairman of the RAN1 Working Group (a representative of ALU) accepted Ericsson's submission. (Id. ¶ 79.)

TruePosition states that throughout the ensuing series of RAN1 Working Group meetings discussing simulations for UTDOA, the alleged conspiracy by the Corporate Defendants continued to take shape. (Id. ¶ **[*46]** 80.) For instance, TruePosition states that the ALU RAN1 Working Group Chairman, with Ericsson's support, denied TruePosition the sufficient time to discuss UTDOA so as to make progress in the RAN1 Working Group meetings. (Id.) Ericsson repeatedly insisted in the RAN1 Working Group that TruePosition could not assume that the RAN2 and RAN3 Working Groups would support the needed changes for UTDOA when running its simulations, but RAN1 Working Group simulations for OTDOA had expressly been permitted to presume that all necessary support for OTDOA would be provided in the RAN2 and RAN3 Specifications. (Id.) According to TruePosition, the ALU RAN1 Working Group Chairman approved Ericsson's position. (Id.) Over a series of meetings, TruePosition alleges that Ericsson consistently made the performance requirements for UTDOA more stringent and unreasonable. (Id.) The RAN1 Working Group did not impose such atypical simulation conditions on other LTE positioning technologies, including OTDOA. (Id.) In furtherance of the agreement among the Corporate Defendants, TruePosition alleges that the ALU RAN1 Working Group Chairman approved Ericsson's demands delaying the progress for UTDOA over multiple **[*47]** months of meetings. (Id.)

In November 2009, at an important RAN1 Working Group meeting, TruePosition alleges that both Ericsson and Qualcomm submitted simulations skewed against UTDOA, using sham assumptions of extreme conditions far more severe than the simulation conditions for OTDOA.[15] (Id. ¶ 81.) Specifically, TruePosition alleges that Ericsson and Qualcomm submitted their late submissions in order to justify a decision by the ALU RAN1 Working Group Chairman to defer the UTDOA Work Item until future meetings, and allow OTDOA to be included in Release 9. (Id.) In furtherance of the conspiracy, as well as in violation of 3GPP rules, TruePosition alleges that the ALU RAN1 Working Group Chairman accepted the late submissions, denied TruePosition and others an adequate opportunity to review and respond to the submissions, gave credit to the submissions, and used the submissions to further the conspiracy to delay and oppose the standardization for UTDOA. (Id.)

The Release 9 cut-off period regarding **[*48]** the Corporate Defendants' 2008 Work Item and TruePosition's UTDOA Work Item concerning positioning technology was extended to the March 2010 RAN Plenary Group meeting. (Id. ¶ 81.) At one meeting, Ericsson opposed further progress for UTDOA on the premise that its simulation results were inconsistent. (Id.) TruePosition asserts that the only inconsistent results were regarding the simulation results performed by Ericsson and Qualcomm and permitted by the ALU RAN1 Working Group Chairman. (Id.) With the support of AT&T, TruePosition objected arguing that the Corporate Defendants' proposed simulation parameters were patently unreasonable. (Id. ¶ 82.) When challenged, TruePosition alleges that Ericsson

[15] The November 2009 RAN1 Working Group meeting was an important meeting because it was supposed to be the final session before the cut-off for including technologies in Release 9. (Am. Comp. ¶ 81.)

could not prove the need for such extreme requirements and could not provide any valid reason why UTDOA needed to meet more stringent requirements than other comparable LTE work items. (Id.)

During the March 2010 RAN Plenary Group meeting, AT&T and T-Mobile USA supported the advancement of UTDOA past the evaluation phase and into specification work. (Id. ¶ 83.) Due to opposition from Ericsson, as well as the controversies surrounding the simulations by Ericsson and Qualcomm, and approved by **[*49]** ALU, the RAN Plenary Group Chairman assigned the task of establishing an agreed set of assumptions at the RAN1 Working Group level, and then conducting new simulations and coming to a conclusion by September 2010. (Id.) This, TruePosition asserts excluded UTDOA from Release 9 and pushed it into Release 10, while the OTDOA 2008 Work Item was allowed another extension in Release 9. (Id.) In June 2012, OTDOA was officially included in Release 9. (Id.)

TruePosition asserts that the Corporate Defendants held positions of power within two of the three RAN Working Groups; namely, a representative of ALU was the Chairman of the RAN1 Working Group and a Qualcomm representative was Chairman of the RAN3 Working Group. (Id. ¶ 84.) Even though the representative from Ericsson no longer held a position as Chairman of the RAN1 Working Group, TruePosition asserts that Ericsson still improperly attended planning meetings of the RAN Group leadership. (Id.) TruePosition alleges that the Corporate Defendants used these behind closed doors opportunities, including a September 2012 RAN Plenary Group meeting, to delay and prejudice the leadership against UTDOA standardization. (Id.)

According to TruePosition, **[*50]** ALU was focused primarily on OTDOA, but was considering the development of an implementation of UTDOA that eliminated the need for standalone LMUs. (Id. ¶ 85.) Having consistently manufactured UTDOA positioning equipment, TruePosition was ready to compete for sales to 4G carriers. (Id.) After sessions were held in Athens, Greece, and Biarritz, France, a representative from ALU asked TruePosition to delay work on standardizing UTDOA. (Id.) After each request, TruePosition's representatives refused. (Id.)

In mid-2012, TruePosition sets forth that in furtherance of the conspiracy, ALU abused its position as RAN1 Work Group Chairman and confidently stated in public that UTDOA would be standardized in Release 11, even though, at that time, UTDOA had only been pushed out of Release 9 and into Release 10. (Id.) At a September 2010 RAN Plenary Group meeting, an ALU representative admitted to TruePosition that ALU intended to delay standardization of UTDOA into Release 11. (Id.) During this meeting, TruePosition and two major United States carriers supported UTDOA moving forward promptly out of the RAN1 Working Group onto the specification work performed in the RAN2 and RAN3 Working Groups enabling **[*51]** UTDOA to remain on schedule for standardization in Release 10. (Id. ¶ 86.) Even though neither Ericsson nor Qualcomm produced additional accuracy simulations, TruePosition alleges that the Corporate Defendants acted together and used their leadership positions to manufacture arguments and controversies in order to successfully delay a decision on the progress for UTDOA until the next RAN Plenary Group meeting in December 2010. (Id.)

In October 2010, at a RAN1 Working Group meeting, TruePosition and others submitted and presented simulation results favorable to UTDOA standardization. (Id. ¶ 87.) ALU sought to standardize for UTDOA only a technology known as Sounding Reference Signal ("SRS") method. (Id.) According to TruePosition, this SRS method required and burdened far more of a carrier's network resources than the Semi-Persistent Scheduling ("SPS") method developed and advocated by TruePosition, and which TruePosition simulations proved to be accurate and reliable well within FCC requirements. (Id.) TruePosition presented simulations for a combined SPS/SRS implementation that showed more accurate and more reliable results than SRS alone; however, ALU presented UTDOA simulation data **[*52]** showing better results for SRS alone than even a combined SRS/SPS implementation. (Id.) According to TruePosition, the ALU results were flawed and pretextual because it was not technologically possible that SRS alone would perform better than a combined SRS/SPS solution. (Id.) Based on ALU's results, the Corporate Defendants opposed any effort relating to SPS standards support. (Id.) In an attempt to end the discussion, the ALU RAN1 Working Group Chairman wanted to defer the entire UTDOA Work Item until the next RAN Plenary Group Meeting. (Id.) Rather than further delaying the standardization of UTDOA, TruePosition placed on the record an objection to the omission of the SRS method. (Id.)

After TruePosition and others presented their timely-submitted simulations, Ericsson informed the ALU RAN1 Working Group Chairman that it, just moments earlier, posted a revised contribution which was a document that proposed a section outlining a new and controversial "Way Forward" for future evaluations that was prejudicial to and would significantly delay UTDOA standardization. (Id. ¶ 88.) Despite the fact that the contribution violated 3GPP rules by failing to be announced or timely distributed **[*53]** to the Working Group, the ALU Chairman proceeded to use Ericsson's "Way Forward" as the baseline for the meeting record. (Id.) Such action by the ALU Chairman was in violation of 3GPP procedures. (Id.)

The RAN1 Working Group compiled a report of the UTDOA simulation results for submission to the RAN Plenary Group Meeting to be held in December 2010. (Id. ¶ 90.) This Plenary Group Meeting was where decisions would be made regarding whether UTDOA might be included in Release 10. (Id.) Although a TruePosition representative was the rapporteur responsible for the UTDOA Work Item, and should have been tasked with creating the report, the ALU RAN1 Working Group Chairman assigned the responsibility for the compilation of the report to an ALU representative. (Id.) TruePosition alleges that it was an Ericsson representative who created the compilation and knowingly included the facially-flawed and discredited Qualcomm results. (Id.) Ericsson removed the flawed Qualcomm results after TruePosition again objected to it based on many unexplained discrepancies in the Qualcomm paper. (Id.) Due to the removal of the flawed results by Ericsson and Qualcomm, TruePosition agreed to withhold its objections **[*54]** to other contentious items. (Id.) After those items passed, TruePosition claims that the ALU Chairman permitted the Ericsson representative to reinsert the flawed Qualcomm data, and accepted the table with the "sham" Qualcomm results resorted, all without the knowledge of the RAN1 Working Group as a whole. (Id.)

At the December 2010 RAN Plenary Group meeting, UTDOA was accepted as a work item. (Id. ¶ 91.) In light of the controversies that TruePosition alleges the Corporate Defendants manufactured during the RAN1 Working Group Meetings, the RAN Plenary Group subjected UTDOA standardization to the following two conditions: (1) UTDOA standardization would be pushed out to Release 11 (September 2012 would be the earliest); and (2) UTDOA would be standardized only for the SRS transmission method favored by the Corporate Defendants and would not provide for either the option to use only the SPS method or a hybrid of both the SRS and SPS methods. (Id.) According to TruePosition, the Corporate Defendants were successful in their concerted efforts to obtain, at a minimum, a three-year head start for OTDOA products over TruePosition's UTDOA technology, which is "[a] potentially insurmountable **[*55]** lead in the fast-paced race to implement 4G networks in the United States." (Id. ¶ 92.) TruePosition also asserts that they obtained additional competitive advantages by limiting standardization solely to the less effective SRS implementations of UTDOA rather than the superior SPS or SPS/SRS hybrid methods. (Id.)

TruePosition does not end its conspiracy theory here, but goes on to allege that the Corporate Defendants further conspired to limit any UTDOA standardization to implementations integrated within RAN equipment and to exclude standardization of standalone implementations. (Id.) At the RAN Plenary Group meeting in December 2010, the RAN Plenary Group reviewed the Work Item on positioning to determine whether the item could roll from Release 10 to Release 11. (Id. ¶ 93.) On the final day of the meeting, a representative of Ericsson orally recited a long list of proposed changes to the text of the Work Item. (Id.) Ericsson requested that the Chairman issue the Work Item with its requested changes and note them as approved without any further review. (Id.) TruePosition objected to the late comments. (Id.) According to TruePosition, the Ericsson representative had not distributed **[*56]** his comments in writing to the RAN Plenary Group; however, he had given them in advance to an ALU representative because the ALU representative already had prepared a version of the Work Item from the written changes provided to him from Ericsson, and asked for their approval. (Id.) Again, TruePosition's representative objected noting that the RAN Plenary Group did not have time to review the document, the proposed changes were substantive and substantial and TruePosition had comments about the changes. (Id.) Thus, TruePosition asserts that the version of the report released after the meeting differed from the circulated draft and now indicated that this assignment discussion had not concluded and would continue to be debated at the March 2011 RAN Plenary Group Meeting. (Id.)

According to normal procedure, the UTDOA Work Item would progress into the RAN2 Work Group, which is chaired by a Samsung representative. (Id. ¶ 94.) TruePosition alleges that, in furtherance of the conspiracy, Ericsson and Qualcomm argued at the RAN Plenary Group meeting that the UTDOA Work Item should be assigned to the RAN3 Working Group, which is chaired by a Qualcomm representative with an Ericsson representative **[*57]** as Vice

Chairman. (Id.) The Plenary Group decided that the RAN2 Working Group would handle the "stage 2" work and the RAN3 Working Group would take over at "stage 3." (Id.) TruePosition states that the Ericsson RAN3 Vice Chairman revealed his intention to fight this assignment by declaring that after the RAN2 Working Group makes its decisions about UTDOA standardization, the RAN3 Working Group will "fix" them. (Id.) TruePosition alleges that Ericsson and Qualcomm opposed the transfer of the UTDOA Work Item into the RAN2 Working Group because the RAN2 Chairman from Samsung had been open and neutral towards standardization. (Id. ¶ 95.) The Samsung RAN2 Working Group Chairman had accepted proposals to standardize, as options, different positioning methods in commercial use, including in a standalone LMU that could be offered by vendors other than RAN network equipment or handset manufacturers. (Id.) He had observed that it was logical to include standardization in standalone LMUs, and not just in RAN equipment, due to the more than 90,000 existing standalone UTDOA commercial implementations in the United States. (Id.) Pointing out that ALU had proposed to exclude all standalone UTDOA **[*58]** implementations, TruePosition says that Qualcomm and Ericsson objected to this statement by the Samsung RAN3 Working Group Chairman. (Id.)

TruePosition alleges that in furtherance of the conspiracy, the Corporate Defendants succeeded in their attempt at reducing the role in the standardization process of the Samsung chaired RAN2 Working Group. (Id. ¶ 96.) During the RAN Plenary Group meeting in March 2011, the Ericsson RAN3 Vice Chairman asked to return the discussion to the topic of TruePosition's first document, even though the discussion concerning all of the documentation in TruePosition's UTDOA Work Item had previously been concluded and a different agenda topic had been discussed. (Id.) The Ericsson RAN3 Working Group Chairman challenged the placement of TruePosition's UTDOA Work Item in the RAN2 Working Group which TruePosition states was an issue that had been previously decided. (Id.) After a lengthy debate, the Plenary Group Chairman settled the issue by indicating that the work would start in the RAN2 Working Group, but the RAN3 Working Group would review the RAN2 Working Group's work. (Id.) This, TruePosition points out, was a virtually unprecedented request by the Ericsson **[*59]** RAN3 Vice Chairman. (Id.)

During the 2011 RAN2 Working Group meeting, Ericsson, supposedly in concert with ALU, objected to standardization for TruePosition's technology by criticizing the alleged complexity of supporting standalone LMUs. (Id. ¶ 97.) AT&T, which had purchased tens of thousands of standalone LMUs, supported standardization and prevailed by referring to the successful LMU deployment in the United States, and insisting that it would be logical and beneficial to preserve its option to upgrade LMUs that it had acquired and might acquire in the future. (Id.)

During the May-June 2011 RAN Plenary Group meeting, Ericsson, again, insisted that the RAN3 Working Group would review the work of the Samsung chaired RAN2 Working Group before it could include UTDOA within its portion of the Specification. (Id. ¶ 98.) The Samsung Chairman remarked that companies should have sufficient resources to send representatives to complete the work within the RAN2 Working Group, and made an usual public remark expressing concern that certain big companies should not use referrals between groups to "play games" with RAN2 Working Group's standardization process. (Id.)

The August 2011 RAN2 Working **[*60]** Group meeting had a key decision involving an architecture design for UTDOA scheduled to be presented by TruePosition. (Id. ¶ 99.) ALU strenuously opposed TruePosition's design and wanted to standardize a different architecture favoring only RAN equipment vendors and prejudicing standalone equipment manufacturers. (Id.) ALU also preempted TruePosition's presentation proposing that the architecture decision be sent to the RAN3 Working Group (where Qualcomm and Ericsson hold Chairman positions). (Id.) According to TruePosition, the neutral Samsung Chairman of the RAN2 Working Group, and the majority of the Group, approved TruePosition's architecture. (Id.) In conjunction with ALU, Ericsson reminded the group that the RAN3 Working Group would review all RAN2 Working Group decisions. (Id.)

In November 2011, the RAN1 Working Group held a meeting where Ericsson submitted a lengthy contribution that would require all standalone LMU deployments to use separate antenna. (Id. ¶ 100.) Notably, the 90,000 LMUs currently deployed by TruePosition share the same antenna used by RAN equipment, and there are no technological reasons to require a separate antenna. (Id.) In fact, separate antenna for **[*61]** standalone LMUs would substantially increase deployment costs to the RAN vendors' competitors in the positioning markets, i.e., TruePosition. (Id.) Ericsson's submission was circulated on the day that the meeting began and, therefore, was well past the deadline in violation of 3GPP rules. (Id.) Nevertheless, the ALU Chairman of the RAN1 Working Group refused to enforce the 3GPP due process rules accepting the untimely submission. (Id.) ALU supported Ericsson's proposal. (Id.)

From the outset, all simulations of UTDOA were performed using "Wideband" signaling, and all work on UTDOA standardization proceeded for nearly three years on the basis that Wideband would be used for UTDOA. (Id. ¶ 101.) Beginning in September 2011, over the course of several RAN1 and RAN3 Working Groups, Ericsson insisted that UTDOA should be standardized for less than full Wideband signaling, and such would need to be completed before any UTDOA standardization could progress. (Id.) According to TruePosition, this action promoted the conspiracy by interposing months of additional delay against UTDOA standardization. (Id.) Additionally, it would render standalone implementations less effective than UTDOA implementations **[*62]** integrated into RAN equipment because the RAN vendor would always have the discretion to use Wideband signaling for positioning technology integrated into its own equipment, no matter what 3GPP standards prescribe. (Id.) As for standalone implementations that need to interoperate with RAN equipment, they would be limited according to the standard. (Id.) TruePosition offered a compromise to allow Wideband UTDOA standardization first and consider other solutions in parallel, but the Qualcomm RAN3 Working Group Chairman deemed TruePosition's UTDOA Work Item to be at a stalemate where no further progress could occur. (Id.) He then informed the RAN Plenary Group in the December 2011 meeting about the stalemate. (Id.) TruePosition states that the Corporate Defendants' collusive actions have brought the standardization of UTDOA to a virtual standstill. (Id.)

b. Analysis of Law With The Facts

In order to determine whether a complaint states a plausible entitlement to relief, the Court must first identify, and then disregard, those factual allegations which constitute nothing more than "legal conclusions" or "naked assertions." See *Blood Reagents, 756 F. Supp. 2d at 628* (citing *Iqbal, 129 S. Ct. at 1950*; **[*63]** *Twombly, 550 U.S. at 555, 557)*. In the recitation of the extensive facts of this case, we disregarded all of TruePosition's conclusions and assertions that virtually all of the Corporate Defendants' actions were due to their agreement to conspire against TruePosition and its UTDOA technology. We did not give credence to such assertions. Instead, we only included the factual assertions within the Amended Complaint that did not include speculation about motive by TruePosition.

"The resulting 'nub' of plaintiff's Complaint must describe more than parallel conduct; it must include 'factual enhancements' that raise the entitlement to relief above the speculative level." Id.; see also *Alvord-Polk,, 37 F.3d at 1013* ("The evidence must give rise to more than speculation.") It is important to point out that the allegations in the Complaint must be viewed as a whole. Id. (citations omitted). In order to survive a motion to dismiss, the allegations "must be placed in a context that raises a suggestion of a preceding agreement." Id. (citing *Insurance Brokerage, 618 F.3d at 300, 314-16)*.

In this case, the resulting "nub" of TruePosition's Amended Complaint includes factual enhancements raising an **[*64]** entitlement to relief above the speculative level. The Amended Complaint is replete with examples of parallel conduct by the Corporate Defendants within the confines of a standard setting organization. This action is not an antitrust action involving the typical example of parallel conduct found in price fixing, but, instead, involves the behavior of the Corporate Defendants in an organization that sets the standards of an industry that are pivotal to the success of themselves, as well as their competitors. As the Court of Appeals for the Third Circuit ("Third Circuit") stated,

> That 'private standard-setting by associations comprising firms with horizontal and vertical business relations is permitted at all under the antitrust laws [is] only on the understanding that it will be conducted in a nonpartisan manner offering procompetitve benefits,' . . . and in the presence of 'meaningful safeguards' that 'prevent the standard-setting process from being biased by members with economic interests in stifling product competition.

Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 309-10 (3d Cir. 2007) (citing *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 501, 506, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*; *Am. Soc. of Mech. Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 572, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982))*. **[*65]** Notably, "a standard-setting organization . . . can be rife with opportunities for anti-competitive activity." *Hydrolevel, 456 U.S. at 571*. It is within the context of a standard setting organization that the acts of the Corporate Defendants must be viewed.

While the Corporate Defendants attempt to have the Court examine each allegation against them in isolation, we view the allegations in the Amended Complaint as a whole. See *Blood Reagents, 756 F. Supp. 2d at 630* ("[T]he allegations in a complaint must be viewed as a whole."). "[I]n assessing whether a trade association (or any group of competitors) has taken concerted action, a court must examine all the facts and circumstances to determine whether the action taken was the result of some agreement, tacit or otherwise, among members of the association." *Alvord-Polk, 37 F.3d at 1008* (footnote omitted). It is clear that in the standard setting organizational setting, opportunities for agreement are prolific. However, "when evidence shows communications which provided an opportunity for agreement, a plaintiff must still produce evidence permitting an inference that an agreement in fact existed." *Alvord-Polk, Inc., 37 F.3d at 1013*.

Viewing **[*66]** the allegations in the Amended Complaint as a whole, TruePosition has sufficiently pleaded facts permitting an inference that the Corporate Defendants entered into an agreement to preclude TruePosition's UTDOA positioning technology from the 2008 Work Item and to prevent or protract UTDOA's standardization. If we were to "cherry pick" each allegation in the Amended Complaint against each specific Corporate Defendant, our analysis of whether TruePosition has plausibly alleged an agreement would be piecemeal and inconsistent. Neither the alleged scope of the conspiracy nor how all of the allegations are intermingled on top of one another would be adequately assessed. It is by viewing the Amended Complaint in its entirety that the total scope of the alleged conspiracy can be fully understood.

From the exclusion of TruePosition's UTDOA technology from the section of the 2008 Work Item proposing the technologies to be included within the 3GPP standard until the alleged prevention and push back of standardization using positions of power within the RAN Working Groups, it is plausible that the Corporate Defendants agreed on a common plan to prevent or delay the standardization of UTDOA while, **[*67]** at the same time, obtaining a considerable lead for a proposed positioning technology that would directly or indirectly benefit them in different ways. By viewing the allegations in the Amended Complaint as a whole, and not dismembering them, we consider the following as actions, amongst others, as support for the inference that the Corporate Defendants acted as part of a conspiracy: submitting the proposal of the 2008 Work Item which included UTDOA within the "Justification" section, but did not include it within the section proposing the technologies to be included within the 3GPP standard; consistent late submissions; questionable timing of submissions and objections; using positions of power within the RAN Working Groups to circumvent 3GPP due process rules; imposing unreasonable and questionable preconditions, as well as testing and simulation parameters, on the standardization of UTDOA that were not placed upon other proposed positioning technologies; supposedly submitting false and pretextual simulation results in an attempt to discredit UTDOA and to prevent its inclusion in Release 9 while advancing their own proposed positioning technology; attempting to preclude standardization **[*68]** of UTDOA for standalone equipment implementations when all of the successful existing implementations of UTDOA rely upon only standalone implementations; the exclusion of SPS transmission methods by restricting any standardization solely to SRS methods; exclusion of TruePosition's preferred Wideband SRS method; and using their positions as Chairmen of relevant 3GPP committees to suppress competition from UTDOA, as well as other positioning technologies by others, and to advance technologies beneficial to them.

When viewing the Amended Complaint in its entirety, the allegations give rise to more than speculation. TruePosition's allegations of conspiracy are indeed plausible. That is not to say that we find the allegations probable, which is not required at this stage, but we do find that when read together they do raise a reasonable expectation that discovery will reveal evidence of an illegal agreement. Accordingly, we conclude that TruePosition has sufficiently alleged the first requirement of a *Section 1* Sherman Act claim that the Corporate Defendants were parties to an agreement. This conclusion, however, does not end our analysis. We must now satisfy ourselves that the second requirement **[*69]** of a *Section 1* claim under the Sherman Act - the unreasonable restraint element - is met.

B.Unreasonable Restraint on Trade

In addition to demonstrating the existence of a conspiracy or agreement, "the plaintiff must show that the conspiracy to which the defendant was a party imposed an unreasonable restraint on trade." *Ins. Brokerage, 618 F.3d at 316*; see also *Am. Needle. Inc. v. NFL, __ U.S. __, 130 S. Ct. 2201, 2209, 176 L. Ed. 2d 947 (2010)* ("The question whether an arrangement is a contract, combination, or conspiracy is different from and antecedent to the question whether it unreasonably restrains trade."); *Burtch, 662 F.3d at 221* (stating that the second requirement of *Section 1* of the Sherman Act mandates that a plaintiff show "that the conspiracy to which the defendant was a party imposed an unreasonable restraint on trade"). It is well established that this provision only prohibits "unreasonable" restraints of trade. *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 75 (3d Cir. 2010)*. This requirement is analyzed under either the per se standard or the rule of reason standard. *Burtch, 662 F.3d at 221*

"The per se illegality rule applies when a business practice 'on its face, has **[*70]** no purpose except stifling competition.'" Id. (quoting *Eichorn v. AT&T Corp., 248 F.3d 131, 143 (3d Cir. 2001))*. Agreements falling under established per se illegality categories are "conclusively presumed to unreasonably restrain competition." *Id. at 222* (citing *Ins. Brokerage, 618 F.3d at 316*). "Paradigmatic examples are 'horizontal agreements among competitors to fix prices or to divide markets.'" Id. (citation omitted). "Per se illegality 'is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality.'" Id. (quoting *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010))*. We do not reach TruePosition's argument that the conspiracy is per se illegal because we find that TruePosition has met the more demanding "rule of reason" standard.

Agreements that do not fall under per se illegality are analyzed under the "rule of reason" to determine whether they are an unreasonable restraint on trade. "Under the rule of reason analysis, the plaintiff bears the initial burden of showing that the alleged [agreement] produced an adverse, anticompetitive effect within the relevant geographic **[*71]** market." Id. (quote and quotation marks omitted); see also *Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 660 F. Supp. 2d 590, 602 (W.D. Pa. 2009)* ("In actions involving a vertical restraint . . . courts apply the 'rule of reason' analysis.") Satisfying this burden typically includes a demonstration of defendants' market power. Id. (citations omitted). At the pleading stage, a plaintiff may satisfy the unreasonable restraint element by alleging that the conspiracy produced anticompetitive effects in the relevant markets. *West Penn, 627 F.3d at 100* -101 (citations omitted). Anticompetitive effects include the following: increased prices; reduced output; and reduced quality. Id.

Here, the Amended Complaint alleges that the relevant products in this case are highly accurate positioning technologies that locate mobile devices by making measurements of signals from the cellular network. (Am. Compl. ¶ 123.) The two relevant markets for these products are for public safety and for law enforcement and security.[16] (Id.) TruePosition states that "the market for high accuracy positioning technology for mobile communications devices for purposes of public safety (e.g., E-911) is defined geographically **[*72]** by those governments that have mandated positioning capability through regulations." (Id. ¶ 134.) "The geographic market for high accuracy positioning technology for public safety purposes currently is the United States because it is the only government with regulations that currently mandate high accuracy positioning capability." (Id. ¶¶ 10, 134.) TruePosition, which spent approximately twenty-five million dollars on research and development relating to positioning technology, states that the geographic innovation market is global for purposes of security and law enforcement. (Id.)

The Amended Complaint plausibly suggests that by excluding UTDOA technology from 3GPP standards for 4G LTE networks, the conspiracy **[*73]** has foreclosed competition for UTDOA positioning products. (Id. ¶ 137.) This foreclosure has limited consumer and manufacturer choices, as well as constrained and slowed down innovation.

---

[16] TruePosition explains that "[h]igh accuracy positioning capability is a necessary feature where required by government regulation or by a government request for proposals." (Am. Compl. ¶ 125.) "Certain governments require highly accurate positioning capability to promote public safety and to support domestic security and law enforcement." (Id.) TruePosition states that customers for highly accurate positioning capability include wireless carriers and law enforcement. (Id.)

(Id.) These allegations are sufficient to suggest that the conspiracy produced anticompetitive effects in the relevant markets. We note "that conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support an inference of conspiracy." *Alvord-Polk, 37 F.3d at 1011 n.13*. Competition is a hallmark of a free market. However, when viewing the allegations in the Amended Complaint as a whole, especially in the standard setting organizational context, we do not find that the alleged anticompetitive effects of the alleged actions of the Corporate Defendants are outweighed by any countervailing pro-competitive benefits. See *Insurance Brokerage, 618 F.3 at 316*.

C. Antitrust Injury

"An antitrust injury is an 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes [the] defendants' acts unlawful." *West Penn, 627 F.3d at 101* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. "The injury should **[*74]** reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." Id. (quotation and quotation marks omitted) It is the antitrust-injury requirement that assists in ensuring "that the harm claimed by the plaintiff corresponds to the rationale for finding a violation of the antitrust laws in the first place, and it prevents losses that stem from competition from supporting suits by private plaintiffs for . . . damages." Id. (citing *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))* ("[An] injury, although causally related to an antitrust violation, nevertheless will not qualify as an 'antitrust injury' unless it is attributable to . . . a competition-*reducing* aspect or effect of the defendant's behavior.") The antitrust laws were enacted to protect competition, not competitors. *Atl. Richfield, 495 U.S. at 338* (citation omitted). "As a general matter, the class of plaintiffs capable of satisfying the antitrust-injury requirement is limited to consumers and competitors in the restrained market . . . and to those whose injuries are the means by which the defendants seek to achieve their anticompetitive ends." Id. **[*75]** (citations and internal citations omitted).

TruePosition alleges an antitrust injury within the confines of the Sherman Act. That is, TruePosition has shown injury flowing from the alleged anticompetitive activities of the Corporate Defendants. Stressing that 3GPP standardization is an absolute prerequisite for competition in the relevant positioning markets, TruePosition's allegations that the Corporate Defendants' conspiracy has foreclosed present competition for UTDOA positioning products for 4G networks leads to the conclusion that TruePosition has currently been foreclosed from developing, manufacturing or selling its UTDOA positioning products for 4G LTE networks to carriers in the United States and worldwide. (Am. Compl. ¶¶ 137-38.) Also stemming from its allegations of the Corporate Defendants' alleged conspiracy, TruePosition asserts that is has been foreclosed from bidding for potential contracts to sell its UTDOA positioning products and from upgrading for 4G networks the existing universal LMUs already purchased by its customers for 2G and 3G networks. (Id. ¶ 138.) Additionally, it argues that its efforts to sell positioning equipment for 2G and 3G networks has been substantially **[*76]** harmed because it cannot assure potential customers that the equipment can be upgraded until 3GPP creates a standard for standalone UTDOA implementations on 4G networks. (Id.)

Examination of TruePosition's alleged injuries reveals that they are the type for which compensation promotes the designated purpose of the ***antitrust law***; namely, the preservation of competition. The Corporate Defendants' alleged conspiracy which includes allegations of abuse of power of influential positions within a standards setting organization resulting in the preclusion or forestalling of another company's technology directly threatens competition. "There is no doubt that members of [trade and standard setting associations] often have economic incentives to restrain competition and that the product standards by such associations have a serious potential for anticompetitive harm." *Allied Tube & Conduit Corp., 486 U.S. at 500* (citations omitted). It is not just the fact that the alleged conspiracy in this case is set within the confines of a standard setting organization, but it is the alleged abuse of positions of power within that organization and the alleged results of such actions leading to the stalling **[*77]** and preclusion of another company's technology from an industry standard that impairs competition by depriving access of some consumers to a desired product, as well as extinguishing quality competition within the relevant market.

In light of the foregoing, we conclude that TruePosition has plausibly alleged an antitrust injury. Making this finding establishes that TruePosition's Amended Complaint has plausibly alleged the three requisite elements of a Section 1 claim under the Sherman Act. It is important to point out that it is possible that the actions of the Corporate Defendants were not the result of collusive illegal behavior in violation of the Sherman Act. However, at this early stage of the litigation, "neither Twombly nor Insurance Brokerage requires an antitrust plaintiff to plead facts that, if true, definitively rule out all possible explanations." *Blood Reagents, 756 F. Supp. 2d at 642* (citations omitted). Considering all of the well-pleaded factual allegations against the backdrop of a standard setting organization, the Amended Complaint plausibly avers a conspiracy between the Corporate Defendants in violation of *Section 1* of the Sherman Act.

D.Ripeness

As previously explained **[*78]** in footnote 5, the Corporate Defendants joined in ETSI's Motion to Dismiss, and the only pertinent argument relatable to them is the ripeness of TruePosition's claims. "Article III of the Constitution limits the federal judicial power to Cases or Controversies." *Constitution Party of PA v. Cortes, 712 F. Supp. 2d 387, 395 (E.D. Pa. 2010)* (quoting *Khodara Envtl., Inc. v. Blakey, 376 F.3d 187, 193 (3d Cir. 2004))* (quotation marks omitted). "Courts enforce the case-or-controversy requirement through the several justiciability doctrines, including standing, ripeness, mootness, the political-question doctrine, and the prohibition on advisory opinions."[17] Id. (quoting *Toll Bros., Inc. v. Twp. of Readington, 555 F.3d 131, 137 (3d Cir. 2009))* (quotation marks omitted). "The ripeness doctrine determines 'whether a party has brought an action prematurely, and counsels abstention until such time as a dispute is sufficiently concrete to satisfy the constitutional and prudential requirements of the doctrine.'" *Pittsburgh Mack Sales & Serv., Inc. v. Int'l Union of Operating Eng'rs, 580 F.3d 185, 190 (3d Cir. 2009)* (quoting *Peachlum v. City of New York, 333 F.3d 429, 433 (3d Cir. 2003))*. The ripeness **[*79]** doctrine exists "to prevent the courts, through avoidance of premature adjudication, from entangling themselves in abstract disagreements." *Doe v. County of Centre, PA, 242 F.3d 437, 453 (3d Cir. 2001)*.

The ripeness argument in this case is based upon the assertion that TruePosition's antitrust claim is not fit for judicial review because it is based entirely on an uncertain or contingent future event that may not occur as anticipated, or may not occur at all; namely, the exclusion of UTDOA technology from the 4G LTE Specification, which is still being developed. The Amended Complaint does include allegations pertaining to the inclusion of TruePosition's UTDOA Work Item into 3GPP's 4G LTE Specification. This claim may indeed be altered should the UTDOA Work Item be included in the Specification. However, TruePosition's Amended Complaint is not solely based upon this **[*80]** one and only claim. It also includes additional claims and allegations concerning actions by the Corporate Defendants that, if true, exemplify antitrust activity in violation of *Section 1* of the Sherman Act. TruePosition asserts that it has already suffered concrete injury by losing sales and having its UTDOA products appear less marketable as a result of being excluded from the 4G LTE Standard for the past few years. Also, TruePosition argues that by being excluded from the Specification thus far, a competing technology, OTDOA, has gained an insurmountable head start. As for the 4G LTE Specification, TruePosition's Amended Complaint alleges, due to the coordinated actions of the Corporate Defendants, that its UTDOA Work Item has been subjected to conditional terms (i.e., omission of the SRS method) that are not optimal for UTDOA technology. "Where . . . the defendant is alleged to have engaged already in conduct that violates a plaintiff's rights, the force of a ripeness challenge is diminished." *Dasrath v. Continental Airlines, Inc., 228 F. Supp. 2d 531, 546 (D.N.J. 2002)* (citing *Doe v. County of Centre, 242 F.3d at 453*).

In light of the foregoing, we conclude that TruePosition's **[*81]** action is not premature. TruePosition has purportedly suffered injury due to the alleged antitrust actions of the Corporate Defendants since 2008. Inclusion within the 4G LTE Standard alone would not remedy all of the alleged antitrust wrongs supposedly suffered by

---

[17] The standing and ripeness doctrines are related, as '[e]ach is a component of the Constitution's limitation of the judicial power to real cases and controversies.'" ***Constitution Party of PA, 712 F. Supp. 2d at 395*** (quoting *Presbytery of N.J. of Orthodox Presbyterian Church v. Florio, 40 F.3d 1454, 1462 (3d Cir. 1994))*.

TruePosition. In addition, it would be a hardship to withhold relief due to the allegations of antitrust violations and resultant harm already supposedly experienced by TruePositon. As a result, the dispute at issue is sufficiently concrete to satisfy the constitutional and prudential requirements of the ripeness doctrine. Consequently, the Corporate Defendants' argument for dismissal based upon ripeness is denied.

V. CONCLUSION

In order to survive the Corporate Defendants' Motion to Dismiss, TruePosition has plausibly stated a claim for a violation of *Section 1* of the Sherman Act. The allegations of an illegal conspiracy between the Corporate Defendants are plausible when viewed in context and as a whole. The Corporate Defendants' argument for dismissal premised upon ripeness is denied. The Corporate Defendants' Motion to Dismiss is denied. Likewise, the Corporate Defendants' request for oral argument is denied.

An appropriate **[*82]** Order follows.

ORDER

AND NOW, this 21st day of August, 2012, upon consideration of the Joint Motion to Dismiss the Amended Complaint of Trueposition, Inc. Filed by Alcatel-Lucent USA Ins., Ericsson Telephone Company (Telefonakiebolaget LM Ericsson), and Qualcomm Inc. (Doc. No. 103), the Memorandum in Support of the Joint Motion to Dismiss the Amended Complaint of Trueposition filed by Alcatel-Lucent USA Inc., the Response and Replies thereto, it is hereby **ORDERED** that the Motion is **DENIED.**

BY THE COURT:

/s/ Robert F. Kelly

ROBERT F. KELLY, SR. J.

Judges: Richman, J.; Kline, P.J., Haerle, J. concurred.

Opinion by: Richman, J.

Opinion

Fifteen retail pharmacies sued 20 defendants, alleging they conspired to fix the prices on their pharmaceuticals sold in the United States at prices higher than those of the same drugs in Canada in violation of the Cartwright Act (Bus. & Prof. Code, § 16720 et seq.) and the Unfair Competition Law (Bus. & Prof. Code, § 17200 et seq.). Defendants moved collectively (and in three cases, individually) for summary judgment, arguing that plaintiffs could not produce evidence creating a triable issue of fact that defendants engaged in price fixing. The trial court agreed, and in comprehensive orders granted summary judgment for defendants. Plaintiffs appeal, contending that the trial court erred in granting summary judgment, and also asserting numerous procedural claims, including some that would have caused the motions not to be heard when they were—and not by the judge who heard them. We conclude that none of the procedural claims has merit, and on our de novo review further conclude that summary judgment was properly granted. We thus affirm.

BACKGROUND[1]

The Parties

Plaintiffs are 15 retail pharmacies in California.[2] Defendants are, with two exceptions, research-based pharmaceutical companies that manufacture and distribute brand-name pharmaceuticals throughout the United States.[3] The California Supreme Court has described the relationship between plaintiffs and defendants as follows: "[Defendants] sell their drugs to wholesalers at a price referred to as the wholesale acquisition cost. In turn, various independent entities use the wholesale acquisition cost to calculate and publish benchmark drug prices, termed the average wholesale price, for use in the industry. Wholesalers resell the drugs to [plaintiffs] at prices based on a percentage of the average wholesale price. . . . [¶] In turn, [plaintiffs] sell the drugs to . . . consumers . . . ." (*Clayworth, supra, 49 Cal.4th at p. 765*.)

The Complaint

On August 26, 2004, plaintiffs filed a complaint alleging antitrust violations and unfair business practices arising out of defendants' price-setting practices for pharmaceuticals sold in the United States. Shortly thereafter, the case was designated complex and assigned to the Honorable Ronald M. Sabraw for all purposes. In the order designating the case as complex, Judge Sabraw early on signaled his intent to actively manage the case, setting an initial case management conference and advising that "the parties must be prepared to discuss at length the nature of the case, both factually and legally, as well as the projected management of the case at each stage. This is not a perfunctory **[*5]** exercise. The primary objective of the [conference] is to develop a comprehensive plan for a just, speedy and economical determination of the litigation."

Plaintiffs amended their complaint once as a matter of right, and defendants successfully demurred to that amended complaint, as well as a second amended complaint that followed. In the orders sustaining the demurrers,

---

[1] The factual background of this case **[*2]** is well known to the parties and the court. We include only the salient facts here, and defer to the California Supreme Court's opinion in *Clayworth v. Pfizer (2010) 49 Cal.4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066* (*Clayworth*) for additional background information.

[2] Plaintiffs are James Clayworth, R.Ph., an individual, dba Clayworth Pharmacy and Clayworth Healthcare; Marin Apothecaries, **[*3]** Inc., dba Ross Valley Pharmacy; Golden Gate Pharmacy Services, Inc., dba Golden Gate Pharmacy; Pediatric Care Pharmacy, Inc.; Chimes Pharmacy, Inc.; Mark Horne, R.Ph., an individual, dba Burton's Pharmacy; Meyers Pharmacy, Inc.; Benson Toy, R.Ph., an individual, dba Marin Medical Pharmacy; Seventeen Fifty Medical Center Pharmacy, Inc.; Tony Mavrantonis, R.Ph., an individual, dba Jack's Drug; Julian Potashnick, R.Ph., an individual, dba Leo's Pharmacies; Jerry Shapiro, R.Ph., an individual, dba Uptown Drug, Co.; Tilley Apothecaries, Inc., dba Zweber's Apothecary; RP Healthcare, Inc.; Rohnert Park Drugs, Inc.; and JGS Pharmacies, Inc., dba Dollar Drugs.

[3] The manufacturer defendants are Abbott Laboratories; AstraZeneca LP; Novartis Pharmaceuticals Corp.; Allergan, Inc.; Boehringer Ingelheim Pharmaceuticals, Inc. (Boerhringer); Eli Lilly & Company; Johnson & Johnson; Janssen Pharmaceutical, Inc.; Ortho-McNeil Pharmaceutical, Inc.; Ortho Biotech, Inc.; GlaxoSmithKline PLC (GSK); Pfizer, Inc.; Hoffman-La Roche; Aventis Pharmaceuticals, Inc.; Amgen, Inc. (Amgen); Purdue Pharma L.P.; Merck & Co., Inc.; Bristol-Myers-Squibb Company; and Wyeth. The two non-manufacturer defendants are Johnson & **[*4]** Johnson Health Care Systems Inc. (JJHCS), described in this litigation as "the contracting physical distribution and electronic connectivity arm for the operating companies inside of the [Johnson & Johnson] corporation," and Pharmaceutical Research and Manufacturers of America (PhRMA), a U.S.-based nonprofit trade association of which all defendants are members. PhRMA was previously known as the Pharmaceutical Manufacturers Association, or PMA. We use PhRMA throughout for consistency purposes.

Judge Sabraw directed plaintiffs to clarify their theories of the case and satisfy the specificity-in-pleading requirements applicable to antitrust claims.

The result was the complaint operative here: a 23-page, third amended complaint filed on May 6, 2005 "for violations of the Cartwright Act (*Bus. & Prof. Code §16700 et seq.*) and the Unfair Competition Law (*Bus. & Prof. Code §17200 et seq.*[)] [UCL]." It set forth five causes of action, the first three alleging violations of the Cartwright Act, the last two alleging violations of the UCL.

The thrust of the third amended complaint was that defendants conspired "to eliminate price competition and fix prices in the United States" by agreeing "they would not sell their drugs at or below the price at which they sold those same drugs in Canada . . . ." This theory, which became **[*6]** known in this litigation as the "Canadian floor conspiracy," was detailed in paragraph 5, a paragraph plaintiffs repeatedly referenced throughout the third amended complaint as embodying the alleged conspiracy. Paragraph 5 alleged as follows:

"5. The Defendants, pursuant to their unlawful combination and agreement, charge more for their drugs sold in the United States, including California, than they charge for the same drugs sold outside of the United States, including Canada. The Defendants agreed to eliminate price competition and fix prices in the United States, including California, by, *inter alia:*

"(a) Using the prices charged in Canada as a floor or minimum price level;

"(b) Acting in concert to restrict reimportation and/or purchase of lower priced foreign drugs;

"(c) Restricting price competition from generics and brand name variations of existing drugs;

"(d) Selling drugs for fixed prices above the prices in Canada (so that the prices charged in the United States, including California, would be higher than the prices for the same drugs sold outside of the United States, including Canada);

"(e) Agreeing that they would not sell their drugs at or below the price at which they sold **[*7]** those same drugs in Canada, and/or other countries outside of the United States; and

"(f) Agreeing and ensuring each other that they would maintain their agreement to charge more in the United States, including California, than they charged outside of the United States, particularly Canada."

According to the third amended complaint, PhRMA was the instrument through which the conspiracy was facilitated: "[E]ach of the Defendants has executive-level officers that serve on the Board of Directors for PhRMA and its committees and subcommittees. PhRMA's Board of Directors, its committees and subcommittees meet on a regular basis. It is partly within these meetings that the Defendants' chief executive officers and chief marketing officers agreed between and among themselves to fix the prices at which their drugs are sold in the United States, including California." Discussions concerning the conspiracy purportedly took place at "PhRMA conventions, conferences, or events, and events organized by Defendants' [*sic*] at corporate offices, hotels, yachts, and resorts . . .," where "Defendants' highest officials, including their chairmen, presidents, chief executive officers, and top marketing executives" **[*8]** engaged in communications to further their agreement to fix prices.

As noted, the first three causes of action asserted violations of the Cartwright Act. The first alleged a trust to restrain trade, or more specifically to restrict commerce, "by agreeing to maintain high non-competitive prices for drugs sold in the United States, including California, and to eliminate sources of lower and competitive-priced drugs from coming into the United States, including California, to protect the price-fixing conspiracy alleged in paragraph 5 . . . ." The second alleged a trust to fix prices, namely "to increase and/or maintain the high price of drugs sold in the United States, including California, relative to prices in Canada and other countries." And the third alleged a trust to prevent competition and limit availability by "eliminat[ing] sources of lower and competitive priced pharmaceuticals in the United States, including California, as alleged herein, and [by] increas[ing] or maintain[ing] the high non-competitive prices of pharmaceuticals sold in the United States, including California, relative to prices in other countries."

All three trusts were accomplished, plaintiffs alleged, by "agreeing **[*9]** to maintain high artificial prices in the United States, including California; restricting importation of lower priced pharmaceuticals into the United States, including California; and taking collective action to stop such importation by placing foreign wholesalers and retailers on artificial quotas to stop these customers from shipping lower-priced drugs into the United States, including California; refusing to sell to foreign wholesalers and retailers who ship lower-priced drugs into the United States, including California; agreeing with wholesalers and retailers not to sell to persons who ship drugs into the United States, including California; and requiring all foreign wholesalers and retailers of Defendants' drugs to refuse to sell drugs to United States and California citizens at prices the same or lower than the sales price for these same drugs in Canada."

The fourth cause of action alleged an unfair business practice in violation of the UCL. Specifically, plaintiffs asserted that defendants engaged in "unfair competition . . . by charging the plaintiffs more for the same drugs than they charge others outside the United States, particularly Canada; and charging 'the same low **[*10]** prices charged in Canada and Europe' to favored customers in the United States. These price differentials for the same drugs are unfair."

The fifth cause of action alleged illegal business practices in violation of the UCL, namely that defendants' violations of the Cartwright Act also constituted illegal business practices.

Plaintiffs prayed for restitution, treble damages, and injunctive relief, that the court "enjoin[] and restrain[] Defendants from charging higher prices to Plaintiffs than Defendants charge customers outside the United States, including Canada, for the same drugs." Plaintiffs also sought attorney fees and costs.

Significantly, nowhere in the third amended complaint did plaintiffs allege that defendants conspired to tie increases in their pharmaceutical prices to the Consumer Price Index (CPI).

Demurrer to the Third Amended Complaint

Defendants filed a demurrer to the third amended complaint. On July 1, 2005, Judge Sabraw entered an order overruling it in part and sustaining it in part. He observed that in his orders sustaining the demurrers to the first and second amended complaints, he directed plaintiffs "to (1) clarify their legal theories and (2) state facts in support **[*11]** of those theories." He concluded that the conspiracy claims in the third amended complaint satisfied those directives, because plaintiffs alleged the dates, means, and effects of the alleged conspiracy, as well as "overt acts in furtherance of the conspiracy, including the charging of higher prices in California and (otherwise legal) efforts to restrict the importation of drugs into the United States." This, Judge Sabraw reasoned, "allege[d] sufficient parallel conduct by the Defendants to raise an inference of coll[u]sion and permit the claim to proceed under the heightened standards for pleading a claim under the Cartwright Act." Judge Sabraw thus overruled defendants' demurrer as to the first three causes of action for violations of the Cartwright Act, as well as the fifth cause of action alleging illegal business practices under the UCL.

Turning to the fourth cause of action, the "unfair" UCL claim, Judge Sabraw explained that it was "unclear at the Court of Appeal level what standard the trial courts should apply in an 'unfair' UCL claim" because "'[t]he Supreme Court has not yet enunciated a legal test for unfairness in consumer actions under the unfair competition law.'" Given **[*12]** the split of authority on this issue,[4] he concluded he would follow the law requiring that "UCL unlawful

---

[4] Compare *Quacchia v. DaimlerChrysler Corp. (2004) 122 Cal.App.4th 1442, 1453, 19 Cal. Rptr. 3d 508* ["conduct can be 'unfair' even if no other law prohibits the challenged conduct" and is "'determined by weighing the utility of the practice against the gravity of the harm to the consumer'"]; *Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 940, 134 Cal. Rptr. 2d 101* ["the public policy which is a predicate to the action must be 'tethered' to specific constitutional, statutory or regulatory provisions"]; and *In re Firearm Cases (2005) 126 Cal.App.4th 959, 980-981, 24 Cal. Rptr. 3d 659* [UCL unfair claims in the consumer context use the definition of unfairness in the Federal Trade Commission Act, *15 U.S.C. § 45(n)*, which provides that a practice may be deemed unfair it if "causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition"].

and unfair claims brought by private parties . . . be tethered to specific constitutional, statutory or regulatory provisions." (See *Scripps Clinic v. Superior Court, supra, 108 Cal.App.4th at p. 940*; *Gregory v. Albertson's, Inc. (2002) 104 Cal.App.4th 845, 854, 128 Cal. Rptr. 2d 389*.) And under this standard, "Plaintiffs have not identified any fundamental policy in any constitutional, statutory, or regulatory provision that precludes Defendants from seeking the highest price for their products." Judge Sabraw further explained that he "would normally grant Plaintiffs leave to amend to state a claim against a defendant that is related to a pending claim against that defendant," but he observed that this was not "a normal case . . . ." Instead, he described it as "a complex case alleging antitrust claims against all the major companies in a large industry," and concluded that it was "appropriate to focus the claims in this case on the central allegation that all Defendants have unlawfully conspired or colluded to sell their drugs in California for prices that are higher than the prices charged in Canada." **[*13]** He thus sustained the demurrer to plaintiffs' fourth cause of action without leave to amend, but also without prejudice to plaintiffs pursuing the claim in a separate lawsuit.

Discovery

After Judge Sabraw entered his July 1, 2005 order on the demurrer to the third amended complaint, **[*14]** defendants answered, and the case was finally at issue. But even before that point, the parties were already engaging in discovery, which had apparently started as far back as December 2004, if not before.[5]

Over the following two years, the parties participated in nearly monthly case management conferences before Judge Sabraw. Following each conference, Judge Sabraw issued thorough and detailed case management orders typically addressing a wide range of issues. While we need not discuss all of them here, we discuss a few at length for illustrative purposes—and because some of the discovery issues are relevant to plaintiffs' claims on appeal.

In an April 18, 2005 case management order, Judge Sabraw directed the parties to be prepared on April 21 to "discuss how to focus the discovery, substantive motions, and trial in this case." Noting that the "lawsuit appears to allege that the Defendants have conspired not to sell prescription **[*15]** drugs in California for prices that are below or equal to the prices in Canada," he advised that "[t]he trial will be focused on the claims asserted and the discovery should be focused on obtaining evidence to prove or disprove those claims. This is not a general administrative investigation into the business practices of the pharmaceutical industry." Judge Sabraw then proceeded to suggest certain case management ideas, but reiterated that "[c]ounsel should be prepared to discuss these . . . ideas and propose their own at the hearing/case management conference."

The April 21 case management conference apparently proceeded as scheduled, and on April 28 Judge Sabraw issued a follow-up order. There, he addressed the specific pharmaceuticals that would be subject to discovery, establishing the following procedures for selecting what would become known as the "Identified Drugs":

"FOCUSING DISCOVERY—THE 'IDENTIFIED DRUGS.'

"[T]he Court will require that on or before May 5, 2005, each Defendant produce to the Plaintiffs a list that identifies its 20 top selling drugs (by gross sales) for each year 2000 through 2004. The Court will also require Defendants' liaison counsel to provide those lists **[*16]** to the Court on or before May 10, 2005 . . . . From these lists, the Court will identify 5-15 drugs for each Defendant and those drugs will be 'the identified drugs.' . . . .

"Plaintiffs and Defendants may file briefs of no more than 10 pages on May 10, 2005, suggesting how many drugs should be identified for each defendant, which drugs should be identified, and why any particular drug (or sub-market of drug) should be identified. The briefs may include as attachments a proposed table for each defendant identifying the suggested drug and any other relevant information about the drug (sub-market for drug, prior investigations or lawsuits regarding the drug, average disparity from Canada price etc).

---

[5] The record contains an "Order regarding February 1, 2005 Case Management Conference" in which Judge Sabraw noted that there was no stay on discovery and ordered the parties "to meet and confer about Defendants' responses to Plaintiffs' First Set of Interrogatories."

"If any party wants a hearing on the Court's selection of the identified drugs, liaison counsel must notify the Court on or before May 10, 2005. If a hearing is requested, the Court will conduct a hearing on the issue of which drugs will be the identified drugs on May 25, 2005 at 10:00 a.m."

Judge Sabraw then turned to the general scope of discovery and made the following recommendations regarding appropriate guidelines, recommendations subsequently entered as an order of the court:

"GLOBAL ISSUES—SUBSTANTIVE **[*17]** SCOPE

"The discovery must be focused on the claims asserted. Without some focus on 'the needs of the case,' *C.C.P. 2019(b)(2)*, the discovery sought would be similar to that disapproved of in *Calcor Space Facility, Inc. v. Superior Court (1997) 53 Cal.App.4th 216, 222, 61 Cal. Rptr. 2d 567*, where the Court noted '[Plaintiff's] 12-page demand might as well be condensed into a single sentence: Produce everything in your possession which in any way relates to gun mounts.' This case concerns price fixing. Except as limited by other parts of this order, Defendants should provide all information directly relevant to (1) what prices Defendants charged for the identified drugs and (2) how they set those prices. The relevance of information will probably decrease as it moves away from pricing issues." The information, he continued, should relate to "(1) price setting practices (including national policies) that affect or have affected the price of the identified drugs in California and (2) California specific policies" for the time period "January 1, 1995 through the present."

The parties submitted the required briefing regarding the "Identified Drugs," and a hearing followed. Judge Sabraw then issued a preliminary **[*18]** list of the "Identified Drugs," and afforded the parties an opportunity to make objections and suggest substitutions. A tentative ruling with further revisions followed, as well as another hearing.

On July 11, 2005, Judge Sabraw entered an order regarding "the Identified Drugs" that would be the subject of discovery. This is how he put it: "The initial discovery, and perhaps all discovery, will be limited to the pricing and price setting practices for the Identified Drugs. Defendants have represented to the Court that each of the following Identified Drugs is (1) marketed in the United States, (2) marketed in Canada, (3) sold through retail pharmacies, and (4) is a discrete drug. Plaintiffs have suggested that the list of Identified Drugs be modified further based on the following considerations: (5) whether the drug is a top seller; (6) whether the drug caters to a small population; (7) whether the brand name is different in the United States and Canada; (8) whether the drug has is [*sic*] subject to competition from generic drugs; (9) whether the drug has been discontinued; and (10) whether the drug has a pricing history. The Court finds that the additional considerations suggested **[*19]** by Plaintiffs although relevant, are not sufficiently material to be used as determinative criteria in selecting the Identified Drugs." With that, Judge Sabraw identified defendants' top and high selling drugs, listing at least eight drugs for all manufacturer defendants, except for Boehringer (for which he identified four) and Amgen (for which he later identified three). All told, there were 111 pharmaceuticals subject to discovery.

Extensive discovery ensued, both written and testimonial. In terms of written discovery, plaintiffs served on each defendant two sets each of requests for production of documents, requests for admission, and special interrogatories, as well as three sets of form interrogatories.

Deposition discovery included plaintiffs taking, by defendants' calculation, nearly 60 depositions.[6] A significant issue arose concerning "apex" depositions, described as "depositions of senior officers (CEO, President, Vice President, Chairpersons of the Board, members of the Board of Directors) of the defendants." Plaintiffs noticed apex depositions very early in the discovery process, but Judge Sabraw stayed them, ordering plaintiffs to seek leave of court prior to renoticing **[*20]** them, which leave would be granted upon a showing that "the 'apex' deponent has 'unique or superior personal knowledge of discoverable information.' "[7] He further explained he "would expect that such a showing would ordinarily follow completion of written discovery and PMK [person most knowledgeable] depositions." However, later revisiting the issue at plaintiffs' request, Judge Sabraw permitted plaintiffs "to take one

---

[6] As plaintiffs do not dispute defendants' calculation, we accept it as a reliable representation.

[7] See *Liberty Mutual Ins. Co. v. Superior Court (1992) 10 Cal.App.4th 1282, 13 Cal. Rptr. 2d 363*.

apex deposition per Defendant. That apex deposition can be the chairman, the president, the CEO, or some other senior executive. Plaintiffs may select the apex deponent for each Defendant." Plaintiffs subsequently took a total of 19 apex depositions, including more than one for some defendants.

Plaintiffs were also permitted to notice up to three PMK depositions per defendant, with additional PMK depositions upon a showing of good cause. There was no limit on percipient witness depositions. Despite this access to discovery, plaintiffs apparently made, as Judge Sabraw would later describe it, "a strategic **[*21]** decision to pursue written discovery and to seek to depose only high-level employees of the Defendants and [not] depose sub-apex witnesses concerning the Defendants' price-setting practices."

In addition to seeking discovery from defendants, plaintiffs also pursued discovery from third parties that had some relationship to the manufacture, distribution, and/or sale of drugs. In that regard, plaintiffs sought discovery from McKesson (a distributor), First Data Bank (a publisher of pharmaceutical industry information), Health Net (an insurance provider), AmeriSourceBergen (a drug wholesaler), and Walgreens (a large chain pharmacy).

Both sides filed numerous discovery motions, and Judge Sabraw ruled on each and every one (and often motions for reconsideration) with attention and detail. While the record does not reflect every discovery motion filed, it does show at least 22 filed by plaintiffs and 15 by defendants. These were in addition to the numerous—and we mean numerous—discovery disputes Judge Sabraw and his research attorney resolved informally.

Discovery continued right up to November 30, 2006, when plaintiffs filed opposition to the summary judgment motions at issue here. Plaintiffs **[*22]** were permitted to depose any witness who submitted a declaration in support of defendants' motions. Accordingly, after the motions were filed, plaintiffs took at least 15, perhaps as many as 24, additional depositions of officers and employees of various defendants.

Motions for Summary Judgment or Adjudication

On August 21, 2006, after more than a year and a half of discovery, plaintiffs moved for summary adjudication of certain affirmative defenses asserted by defendants, most notably the pass-on defense. Under this defense, defendants asserted that plaintiffs could not prevail because they did not sustain damages from any alleged overcharges since they passed on the claimed overcharges to their customers or their customers' insurers. Whether the pass-on defense was a cognizable defense in California was an open question, and plaintiffs argued that California law did not recognize it, and it should be dismissed.

On September 15, 2006, defendants filed a joint opposition to plaintiffs' motion, as well as a joint cross-motion for summary judgment or, in the alternative, summary adjudication regarding the applicability of the pass-on defense (collectively with plaintiffs' motion, the pass-on **[*23]** motions). In both, defendants argued that the pass-on defense was viable in California and defeated all of plaintiffs' claims. The pass-on motions were set to be heard on November 30, 2006, a date later continued to December 5.

Also on September 15, Amgen filed a separate motion for summary judgment or, in the alternative, summary adjudication (the Amgen motion). The Amgen motion went to the merits of plaintiffs' claims, namely plaintiffs' allegations that defendants conspired to fix drug prices in the United States at higher levels than those in Canada. The motion was supported by a notice of motion; a memorandum of points and authorities; a separate statement of undisputed material facts; and a request for judicial notice of certain sections of the Canadian Patent Act. Amgen also submitted three declarations, of: Pete Feldman, senior director, strategic planning and operation, in Amgen's oncology business unit; Michael Savin, its vice president in sales and marketing operations; and Mack Anderson, its counsel. The declarations sought to authenticate 66 exhibits contained in a "compendium of exhibits" submitted in support of the motion. Amgen's motion was originally set to be heard **[*24]** on November 30, the same day as the pass-on motions.

Two weeks later, on September 29, three more summary judgment motions were filed: (1) a motion of all defendants (except for Amgen, PhRMA, and JJHCS)[8] for summary judgment (the joint motion); (2) a motion of PhRMA for summary judgment (the PhRMA motion); and (3) a motion of JJHCS for summary judgment (the JJHCS motion), which, when referred to collectively with Amgen's motion, will be called the "merits motions." These three motions were set to be heard on December 15, 2006.

Like Amgen's motion, the joint motion was directed at the merits of plaintiffs' allegations, arguing that plaintiffs could not demonstrate a triable issue of material fact concerning the existence of the Canadian floor conspiracy. It was the most voluminous of the merits motions, consisting of a notice of motion; a 34-page memorandum of points and authorities; a separate statement of undisputed facts; a request for judicial notice of "the Canadian Patent Act and certain guidelines promulgated by the PMPRB, a quasi-judicial body established by the Patent Act in 1987"; and a declaration of Aton Arbisser, counsel for **[*25]** Novartis, authenticating documents submitted in a 1046-page compendium of exhibits. The compendium contained discovery responses and excerpts of deposition testimony, as well as 14 declarations of defendants' CEOs and other high ranking officers and executives.

PhRMA's motion differed from the joint motion in that it focused on PhRMA's role in the alleged conspiracy. It argued that it was a "bona fide trade association" that "advoca[tes] for public policies that advance the discovery of life-saving and life-enhancing new medications for patients by pharmaceutical and biotechnology research companies." PhRMA disputed that it was a "sham" organization established to facilitate the alleged conspiracy, and argued that the *Noerr-Pennington*[9] doctrine permitted it "to petition the government to take, or refrain from taking, action[s] . . ., even if such efforts benefit the advocate and even if they are intended to restrict or eliminate competition." PhRMA's motion consisted of a notice of motion; a memorandum of points and authorities; a separate statement of undisputed material facts; and a compendium of exhibits, which included the declarations of Alan F. Holmer, president and CEO of PhRMA **[*26]** until January 2005, and Jennifer A. Carmassi, its counsel.

Lastly, JJHCS's motion focused on its assertion that it did not manufacture, distribute, sell, or set the prices of pharmaceuticals sold in the United States or Canada. It consisted of a notice of motion; a memorandum of points of authorities; a separate statement of undisputed facts; and declarations of Curt M. Selquist, chairman of JJHCS, and Samuel R. Miller, its counsel.

Plaintiffs' Request for a Continuance

On November 13, 2006, plaintiffs sought a continuance of the merits motions pursuant to *Code of Civil Procedure section 437c, subdivision (h)* (437c(h) request). The 437c(h) request was based on what plaintiffs claimed to be newly discovered evidence, described by them as follows: "(1) evidence that the Defendants have employed the sporting theory of justice regarding Plaintiffs' discovery, especially regarding PhRMA documents; (2) evidence that Defendants entered into a price fixing agreement through PhRMA; (3) evidence that pricing and price-setting practices were conducted at meetings at PhRMA." **[*27]** More specifically, plaintiffs cited deposition testimony by Peter Dolan, former CEO of Bristol Meyers Squibb, that they claimed established that prices and price-setting practices regarding the U.S. and Canada were discussed at PhRMA meetings; deposition testimony of Hoffman-La Roche's Kevin O'Leary concerning a "Pledge" made by various pharmaceutical manufacturers to limit price increases to increases in the CPI; and documents recently produced by GSK purporting to show its efforts to prevent the reimportation of its pharmaceuticals into the United States.

Plaintiffs' request came on for hearing on November 20 on shortened time. Following argument, Judge Sabraw denied plaintiffs' request, finding that they had failed to identify as required by the statute facts that "may exist but cannot, for reasons stated, then be presented." (*Code Civ. Proc., § 437c, subd. (h)*.) As he put it: "Plaintiffs have not

---

[8] PhRMA and JJHCS separately joined in this motion.

[9] See *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc. (1961) 365 U.S. 127, 139-140, 81 S. Ct. 523, 5 L. Ed. 2d 464*, and *Mine Workers v. Pennington (1965) 381 U.S. 657, 670, 85 S. Ct. 1585, 14 L. Ed. 2d 626*.

identified information essential to opposing the motions for summary judgment that they could not have obtained at an earlier date. To the extent the motion is based on the Court's discretionary ability to continue the motions for summary judgment, the court exercises its discretion and **[*28]** denies the motion because Plaintiffs have had an adequate opportunity to prepare their cases and develop evidence to oppose the motions for summary judgment." Judge Sabraw went on to note that plaintiffs "d[id] not so much identify facts essential to justify opposition that may exist as identify facts that they have already discovered and seek the opportunity to obtain further information about those facts."

Apparently addressing a complaint by plaintiffs that they had been "thwarted" in discovery, Judge Sabraw responded, "[I]t is because the court has imposed parameters on discovery as to scope, type, and scheduling of discovery. At the outset, the Court stated, 'The trial will be focused on the claims asserted and the discovery should be focused on obtaining evidence to prove or disprove those claims. This is not a general administrative investigation into the business practices of the pharmaceutical industry.' . . . . The evidence does not support the argument that the Plaintiffs have been thwarted because Defendants have failed to comply with their discovery obligations as defined by the Court. The motions for summary judgment will not be continued based on the possibility that **[*29]** the Court might make substantial changes in the discovery parameters."

Plaintiffs filed a petition for a writ of mandate in this court, seeking to compel Judge Sabraw to grant their *section 437c(h)* request. We summarily denied it.

Plaintiffs' Oppositions to the Merits Motions

On November 30, 2006, plaintiffs filed opposition to the merits motions, submitting a single opposition to the joint motion and the motions of PhRMA and JJHCS.[10] The opposition was supported by a separate statement responding to defendants' undisputed material facts and submitting additional facts of their own; a declaration of plaintiffs' counsel Joseph M. Alioto, Jr. attaching 77 exhibits; and a request for judicial notice of 11 of the exhibits appended to the Alioto declaration. In the opposition, plaintiffs renewed their request for a continuance under *section 437c, subdivision (h)*, reiterating their "belie[f] that additional facts exist that are essential to their opposition of Defendants' motions for summary judgment."

On December 13, 2006, defendants filed replies in support of the merits motions, and responded to plaintiffs' additional facts in their separate statement response.

Tentative Ruling Granting Defendants' Pass-On Motion and Plaintiffs' Attempt to Challenge Judge Sabraw

Meanwhile, on December 1, Judge Sabraw issued a 26-page tentative ruling on the motions set for hearing on December 5, specifically the pass-on motions and the Amgen motion. There, Judge Sabraw analyzed the pass-on issue, ultimately holding that the affirmative defense was available in California and defeated plaintiffs' claims. Consequently, the tentative ruling granted summary judgment for defendants, and dropped plaintiffs' pass-on motion and Amgen's merits motion as moot.

After Judge Sabraw issued his tentative ruling, but before the motions came on for hearing, plaintiffs moved to disqualify him, via plaintiffs' "Objection/Motion for Disqualification" filed December 4. Plaintiffs took exception with various of Judge Sabraw's discovery orders, his denial of their request to continue the summary judgment motions, and his so-called **[*31]** "rush to judgment" in granting summary judgment in the tentative ruling, claiming that he "systematically demonstrated a prejudice towards plaintiffs and favoritism towards defendants" and was not impartial. Plaintiffs' statement of disqualification was lengthy, supported by a 19-page declaration by plaintiffs'

[10] Plaintiffs had previously filed separate opposition to the Amgen motion. It was supported by a separate statement disputing Amgen's material facts, a request for judicial notice of six assorted **[*30]** documents, and a declaration of plaintiffs' counsel Russell F. Brasso attaching 24 exhibits.

counsel Alioto in which he purported to detail Judge Sabraw's objectionable conduct. The declaration, in turn, appended over 100 pages of exhibits.

On December 5, the day the pass-on motions and Amgen's merits motion were set to be heard, Judge Sabraw struck plaintiffs' statement of disqualification as untimely, nevertheless agreeing to continue the hearing to December 15 to afford plaintiffs an opportunity to seek a writ of mandate. On December 12, plaintiffs did petition for a writ of mandate. On December 14, we denied it.

Hearing on the Pass-On Motions

On December 15, the pass-on and merits motions came on for hearing before Judge Sabraw, following which argument he took the motions under submission. On December 19, Judge Sabraw granted summary judgment in favor of defendants, holding, consistent with his tentative ruling, that the pass-on defense was a cognizable defense in **[*32]** California. As such, plaintiffs could not demonstrate that they sustained any damages because the undisputed evidence showed that they increased their prices to consumers corresponding to any price increase imposed by defendants. He also concluded that plaintiffs lacked standing to assert a claim under the UCL since they did not suffer any damages. Since the pass-on defense defeated all of plaintiffs' claims, defendants were entitled to summary judgment, which was thereafter entered. Because the case was resolved based on the pass-on defense, Judge Sabraw dropped the merits motions as moot.

Plaintiffs' First Appeal

Plaintiffs appealed from the judgment. We affirmed, agreeing with Judge Sabraw that the pass-on defense was viable under California law and that the undisputed evidence established that plaintiffs did not suffer any damages and thus could not recover on their Cartwright Act or UCL claims. (*Clayworth v. Pfizer, Inc.,* July 25, 2008, A116798) [nonpub. opn.].)

Plaintiffs successfully petitioned the California Supreme Court for review, and that court reversed, holding that the pass-on defense was not permitted in California and that summary judgment was improperly granted. (*Clayworth, supra, 49 Cal.4th at p. 763*.) **[*33]** It then remanded for further proceedings. (*Id. at p. 791*.)

Plaintiffs' Attempts to Disqualify Judge Brick After Remand

After learning that on remand to the Alameda County Superior Court the matter would likely be assigned to the Honorable Steven A. Brick, on August 5, 2010, Covington & Burling, LLP (Covington), counsel for defendant Boeringher, filed a substitution of attorney removing itself as counsel. The substitution was apparently prompted by the fact that Judge Brick's sister-in-law was a partner of the Covington firm.

On September 2, 2010, the matter was in fact assigned to Judge Brick for all purposes. Twelve days later, plaintiffs filed a statement for the disqualification of Judge Brick, demanding his "mandatory disqualification" under *Code of Civil Procedure section 170.1, subdivision (a)(5)*, and also claiming that "his family connection to Covington" was sufficient to establish a doubt about his impartiality such that he should also be disqualified under subdivision (a)(6)(A)(iii).[11] The statement was based not only on Covington's prior representation of Boeringher in this case, but also its continued representation of Boeringher, as well as numerous other defendants, in unrelated **[*34]** matters.

After defendants objected to plaintiffs' request, plaintiffs filed a supplemental statement of disqualification, and Judge Brick filed a verified answer disputing the existence of any facts requiring his disqualification. The

[11] Plaintiffs also filed a peremptory challenge pursuant to *Code of Civil Procedure section 170.6*. The challenge was denied on the ground that they previously filed a successful *section 170.6* challenge to the Honorable Jon S. Tigar.

disqualification request was assigned to the Honorable Faye D'Opal of the Marin County Superior Court, following which assignment plaintiffs filed a second supplemental statement of disqualification, this one appending 148 more pages of exhibits.[12]

On November 24, 2010, Judge D'Opal entered a six-page order denying the disqualification request. She held that (1) no lawyer from Covington was a "lawyer in the proceeding," making *section 170.1, subdivision (a)(5)* inapplicable, and (2) a family relationship with **[*35]** a lawyer who works in a law firm that is not appearing before the judge but represented certain defendants on unrelated matters was not a fact upon which a person might reasonably entertain doubt that the judge would be able to be impartial, making subdivision (a)(6) inapplicable.

Once again, plaintiffs petitioned this court for a writ of mandate. Once again, we denied it. This time, plaintiffs petitioned the California Supreme Court for review, which was denied.

Hearing On the Merits Motions

With the case now revived in the superior court, the parties picked up where they left off when Judge Sabraw had entered summary judgment for defendants—with the four merits motions still to be resolved.

On January 14, 2011, Judge Brick held the twenty-first case management conference in the case. In a statement prepared for that conference, plaintiffs urged that discovery be reopened before the court ruled on the merits motions: "Defendants, unlike Plaintiffs, are not interested in up-dated discovery. They prefer a rush to judgment based on discovery that was propounded more than 4 years ago. [¶] Under *CCP §§ 2030.070*, *2031.050*, Plaintiffs (and Defendants) are entitled to obtain 'any later acquired **[*36]** discovery' to supplement the previous discovery responded to more than 4 years ago. Obviously, under any reasonable judicial measure, Plaintiffs should be permitted to update the written discovery previously propounded to and verified by 17 Defendants." Plaintiffs reiterated this position in the section of their statement identifying any "potentially dispositive motions": "Defendants have proposed that their 'mooted motions' for summary judgment be *revived* and *decided* before any discovery can be undertaken by Plaintiffs. Plaintiffs object to Defendants' joint proposal to rush to judgment and request that discovery be permitted up to an [*sic*] including the discovery cut-off date of August 15, 2011. In the meantime, the parties can disclose and depose expert witnesses . . . . Any summary judgment motions should not be heard until expert witness depositions are completed."

Judge Brick disagreed, and his order following the conference set argument on the merits motions for February 17, 2011, when they in fact came on for hearing, based on the original motion papers, oppositions, and replies filed in the fall of 2006.[13] After hearing lengthy argument spanning the morning and much of the **[*37]** afternoon, Judge Brick took all four motions under submission.

Orders Granting Summary Judgment

On March 7, 2010, Judge Brick entered three separate orders granting the merits motions. The first order, 36 pages of thorough analysis, granted the joint motion and the Amgen motion. After detailing the relevant procedural history and the applicable standard of review, Judge Brick considered defendants' moving burden. This, he concluded, defendants satisfied by providing "admissible evidence describing, in varying levels of detail, the process by which the 'list price' ('wholesale acquisition cost' or 'WAC') was set and periodically reevaluated within each Defendant company. . . . [¶] Defendants' detailed declarations state facts showing that prices were independently determined, based upon Defendants' individual market analyses which generally utilized public information. [Citation.] They tend to belie collusion on pricing. They also tend to show that Defendants responded to market forces by providing

[12] Judge D'Opal subsequently struck this second supplement "as no facts suggesting new grounds for disqualification learned of or arising after the filing of the first statement of disqualification [were] presented therein."

[13] The only newly-filed paper appears to be defendants' joint objections to plaintiffs' evidence, filed on January 28, 2011.

rebates and discounts to customers that had the power to influence **[*38]** the volume of prescriptions written. [Citation.] This showing is sufficient to meet Defendants' initial burden of demonstrating independence rather than collusion."

Judge Brick then considered the request in plaintiffs' opposition for a continuance, which he denied because "[p]laintiffs have not shown that facts essential to justify an opposition may exist or valid reasons that those facts could not have been obtained through more diligent efforts and presented with their opposition . . . ."

With that, Judge Brick turned to the substance of plaintiffs' opposition, noting that plaintiffs bore the burden of "'present[ing] evidence that would allow a reasonable trier of fact . . . to find an unlawful conspiracy more likely than not.'" And, he held, plaintiffs failed to satisfy this burden.

In terms of direct evidence, Judge Brick explained that plaintiffs "based a significant portion of their written opposition on evidence of a different agreement, arguing that they have *direct evidence* of an agreement to raise prices in line with the Consumer Price Index ('CPI')." He described this as "problematic" for two reasons. First, the third amended complaint alleged a conspiracy to fix drug prices **[*39]** in California by using Canadian prices as a floor; it did not allege an agreement to tie price increases to the CPI. Second, plaintiffs would be collaterally estopped from amending to plead the alleged CPI conspiracy because plaintiffs were class members—and, apparently, one plaintiff a class representative—in a prior, unsuccessful action based on the same theory. (See *In re Brand Name Prescription Drugs Antitrust Litig. (N.D. Ill. Feb. 10, 2000, Civ. A. No. 94 C 897) 2000 U.S. Dist. LEXIS 1735, 2000 WL 204064 at *1*.)

Judge Brick then turned to plaintiffs' indirect evidence of conspiracy, and noted that while "[t]hey argued the doctrine of 'conscious parallelism' in their papers with respect to their unpleaded CPI theory," the doctrine also "arguably relate[d] to the Canadian floor theory, as well," which plaintiffs confirmed at the hearing they had not abandoned. He thus undertook an analysis of plaintiffs' circumstantial evidence of the Canadian floor conspiracy, ultimately concluding that plaintiffs did "not provide[] any competent evidence with respect to the pricing of Defendants' drugs (vis-à-vis Canada, or otherwise) during the relevant time period," or any evidence tending to prove that the alleged parallel **[*40]** conduct was "conscious." There was "a complete failure of proof."

Having found no evidence of parallel pricing, conscious or otherwise, Judge Brick could have stopped there. But he did not, and proceeded to examine plaintiffs' evidence on the "plus factors" required to corroborate evidence of conscious parallelism, concluding that plaintiffs' evidence on the "plus factors" failed to suggest collusion. In light of that, he granted the joint motion for summary judgment.

In the same order, Judge Brick also granted summary judgment in favor of Amgen. He concluded that Amgen met its moving burden by "provid[ing] detailed testimony demonstrating that, during the relevant time frame it set prices in the U.S. (including for the Identified Drugs) independently from other Defendants through a bottom-up, collaborative process; that this process involved a large number of employees, who considered a wide range of permissible, precompetititve factors and there was little if any involvement by Amgen's CEO/Chairman in this process; and that pricing information (including pricing actions or price setting policies) was not discussed with or released to other Defendants, other than when a new price was **[*41]** made public." Amgen's evidence further showed that "[p]ricing for Canada is set by different employees, through a different process."

Judge Brick then concluded that, as in their opposition to the joint motion, plaintiffs failed to carry their burden of presenting evidence showing that the conspiracy was "'more likely than not.'" First, he reiterated, the direct evidence cited by plaintiffs in claimed support concerned an alleged conspiracy to increase prices in step with the CPI, which failed for the two reasons explained above. Second, plaintiffs claimed to have satisfied their burden by presenting evidence that Amgen wrongfully offered "secret rebates" to customers. Again, Judge Brick held that this alleged conspiracy was not pleaded in the third amended complaint and could not defeat summary judgment. He therefore concluded that the absence of evidence regarding the Canadian floor conspiracy constituted grounds for granting summary judgment for Amgen.

Judge Brick closed his order by ruling on evidentiary matters. He granted the requests for judicial notices by both plaintiffs and defendants, and sustained in part and overruled in part both sides' objections to evidence. This included **[*42]** sustaining 32 of defendants' objections, three of which rulings plaintiffs assert as error here, which we discuss below.

By separate orders, Judge Brick also granted the motions of PhRMA and JJHCS. As to PhRMA's motion, he preliminarily explained that the motion was technically moot because of his ruling on the joint motion. Nevertheless, he went on to address the merits of the motion, concluding that PhRMA carried its initial burden of demonstrating that it was engaged in "legitimate and routine trade association activities" and that it did not participate in or aid and abet the alleged conspiracy. Plaintiffs, he held, failed to present evidence creating a triable issue as to whether PhRMA was engaged in illegitimate information-sharing activities. As he explained it, "Plaintiffs nominally dispute all of PhRMA's material facts concerning its mission and activities, . . . but none of the evidence cited by Plaintiffs creates a triable issue that PhRMA is not engaged in activities that are legitimate information sharing, as opposed to anti-trust violations. It bears mention that numerous of Plaintiffs' responses to undisputed facts do not comply with the California Rules of Court. They **[*43]** fail to identify the evidence that they assert creates a triable issue or provide a citation to the relevant exhibit, page and line number. [Citations.] In some instances, Plaintiffs simply cross-referenced all of their 'Additional Facts' they provided in responses to the Joint Motion (without providing further detail). In others, Plaintiffs failed to cite to any evidence at all, and instead resort to argument. Such tactics do not create triable issues." Despite these failings, Judge Brick went on to examine the exhibits in the record and found no evidence supporting plaintiffs' alleged facts.

Lastly, as to JJHCS's motion, Judge Brick held that JJHCS met its initial burden by providing admissible evidence demonstrating that "it [did] not have any involvement in setting list prices for any pharmaceutical products sold in California (or the U.S.) or in Canada." Plaintiffs, in turn, failed to carry their burden. Specifically, their written opposition was the same one submitted in opposition to the joint motion, which was largely premised on the unpleaded CPI theory and did not present arguments specific to JJHCS. From what Judge Brick could "glean[]" from plaintiffs' separate statement **[*44]** responding to JJHCS' material facts, however, plaintiffs attempted to demonstrate triable issues as to the following: "(1) JJHCS engaged in the alleged price-fixing conspiracy through its parent, Johnson & Johnson, a separately incorporated 'umbrella' holding company headed by William Weldon, suggesting that the two entities are, in essence, alter egos; (2) JJHCS participated in PhRMA meetings—through Johnson & Johnson's head, Mr. Weldon, and thus was involved in the alleged conspiracy; (3) JJHCS negotiates contracts involving net prices; (4) JJHCS participated in a senior prescription discount program, which involved an agreement on prices; and (5) JJHCS agreed to restrict price competition from generics and brand name variations." But, according to Judge Brick, plaintiffs failed to plead alter ego allegations or introduce any evidence that would support them. Further, he concluded, plaintiffs produced no evidence that JJHCS had any involvement in setting list prices.

Judgment was entered for defendants on March 14, 2011. This timely appeal followed.

DISCUSSION

A. Plaintiffs' Claims on Appeal

Plaintiffs assert numerous errors on appeal, only one of which attacks the summary judgment, **[*45]** arguing essentially that plaintiffs presented evidence creating triable issues of material fact regarding the existence of a conspiracy to fix prices, and thus no defendant, including PhRMA, JJHCS, or Amgen on their individual motions, was entitled to summary judgment. The remaining claims assert procedural errors that, if well taken, would have had the merits motions heard at a later time—and by a different judge. These specific claims are: (1) Judge Sabraw abused his discretion in limiting discovery; (2) plaintiffs' request for Judge Brick's disqualification should have been granted because he had a conflict of interest that prevented him from ruling on the merits motions; (3) Judge Brick erred in denying plaintiffs' request to reopen discovery before the merits motions were heard; (4) Judge Brick erred in sustaining defendants' objections to plaintiffs' exhibits 1, 111, and 117; and (5) Judge Sabraw erred in sustaining the demurrer without leave to amend on plaintiffs' fourth cause of action for unfair business practices. Since certain of these procedural issues would necessitate reversal if well taken, we begin with discussion of these issues.

B. Judge Sabraw Properly Managed the [*46] Case, Including the Scope and Course of Discovery

Plaintiffs' first procedural argument is that the trial court "erroneously limited plaintiffs' discovery." Hardly.

Before turning to a discussion of why, we digress briefly to discuss the subject of case management—and in particular as it pertains to antitrust cases.

Volkswagen of America, Inc. v. Superior Court (2001) 94 Cal.App.4th 695, 114 Cal. Rptr. 2d 541 involved the validity of a San Francisco Superior Court general order in asbestos cases. Holding that the Judicial Council did not intend to preempt such an order in complex litigation, our colleagues in Division Five set forth the two factors supporting the holding, a discussion pertinent here:

"First, effective January 1, 2000, the Judicial Council adopted [California Rule of Court,] rule [3.400] et seq. to govern complex civil cases. Rule [3.400](a) defines a complex case as 'an action that requires *exceptional judicial management* to avoid placing unnecessary burdens on the court or the litigants and to expedite the case, keep costs reasonable, and promote effective decision making by the court, the parties, and counsel.' (Italics added.) The Judicial Council could not have intended rule [3.400](a) to **[*47]** stand like an unarmed sentry warning courts of impending disaster from complex litigation while leaving them powerless to take the steps necessary to meet the onslaught. . . .

"This conclusion is supported by a second factor. The Judicial Council adopted rule [3.400] et seq. on October 22, 1999. (See Judicial Council of Cal., minutes of meeting (Oct. 22, 1999) pp. 18-19.) On that same date, and as part of the same process, the Judicial Council authorized the Administrative Office of the Courts to distribute to all judges in this state a manual that explains how complex cases should be managed. (See Judicial Council of Cal., minutes of meeting, *supra,* p. 18.) The manual [is] entitled Deskbook on the Management of Complex Civil Litigation . . . (Judicial Council of Cal., Deskbook on the Management of Complex Civil Litigation [(2011)] § 3.52, pp. 3-35, 3-37 (hereafter Deskbook).)" (*Volkswagen of America, Inc. v. Superior Court, supra, 94 Cal.App. at pp. 704-705*.)

The Deskbook notes in its preface that "[s]tate and federal judges around the country have been actively managing complex litigation for several decades, and complex litigation has been the subject of intense scholarly scrutiny **[*48]** and evaluation. Drawing upon the wealth of materials available, this deskbook relies upon the Federal Judicial Center's *Manual on Complex Litigation, Third Edition,* and the National Center of State Courts' *Managing Mass Tort Cases: A Resource Book for State Trial Court Judges.* . . . The Complex Civil Litigation Task Force was convinced that the recommendations found in these sources reflect the best thinking available today on how to manage complex cases. We want to acknowledge our gratitude to the authors of these sources for providing the initial direction and basis upon which the task force relied in developing recommendations that are consistent with California authorities and practices. [¶] . . . . [T]he deskbook is intended to provide judges with ideas about management that have proven useful and effective over the years. We hope you find this deskbook to be a useful tool." (Deskbook, *supra,* at p. xv.)

Chapter 3 of the Deskbook addresses specialized areas, the first of which is antitrust. (See § 3.01 et seq.) Antitrust is "included in the list of provisionally complex cases in *California Rules of Court, Rule 3.400(c)* because litigation involving such claims can require voluminous **[*49]** documentary and testimonial evidence; extensive discovery; complicated legal, factual, and technical (particularly economic) questions; numerous parties and attorneys; and substantial sums of money calling for 'exceptional judicial management to avoid placing unnecessary burdens on the court or the litigants and to expedite the case, keep costs reasonable, and promote effective decision making by the court, the parties, and counsel' [*Cal. Rules of Ct., Rule 3.400(a)*]." (§ 3.01, p. 3-2.)

The Deskbook then goes on to say that "[a]ntitrust cases often involve the collection, assimilation, and evaluation of vast amounts of evidence regarding numerous transactions and other economic data. . . . Effective management of such cases depends on the adoption of pretrial procedures to facilitate the production and utilization of this material and its efficient presentation at trial. Among the measures that may be useful are the following: [¶] **Limiting scope of discovery.** Early attention to the issues may make feasible establishment of reasonable limits on the scope of discovery. Limits may be fixed with reference to the transactions alleged to be the subject matter of the case, to the relevant **[*50]** products or services, or to geographical areas and time periods. Limits should, however, be subject to modification if a need for broader discovery later appears. For discussion of discovery in complex cases generally, see § 2.50 et seq." (§ 3.03, p. 3-6.)

As noted, the federal manual was a source for the Deskbook, and it covers the subject of case management in antitrust cases in even more detail. Part III of that manual is entitled "Particular Types of Litigation." Chapter 30 deals with antitrust, and describes how antitrust litigation can involve voluminous documentary and testimonial evidence, extensive discovery, complicated legal and factual questions, numerous parties and attorneys, and substantial sums of money, thus calling for application of procedures for the management of complex litigation. The manual elaborates:

"Effective management of antitrust litigation requires identifying, clarifying, and narrowing pivotal factual and legal issues as soon as practicable. [Citation.] Unless the judge and the attorneys give early attention to these issues, substantial time may be wasted on claims subject to summary dismissal, on class action disputes not critical to the class-certification **[*51]** ruling, and on discovery not relevant to the later-refined issues regarding liability of damages. Defining the issues at an early stage may enable the court to structure the litigation so as to limit the scope and volume of discovery, reduce cost and delay, facilitate the prospects of settlement, and improve the trial.

"The procedures for pretrial management of complex litigation discussed in section 11 apply generally to antitrust litigation. . . ." (West's Manual for Complex Litigation (Federal Judicial Center 4th ed. 2004) § 30, pp. 519-520.) And the referenced section 11 counsels that "Discovery control in complex litigation may take a variety of forms, including time limits, restrictions on scope and quantity, and sequencing." It then goes on to list the following examples of discovery "limits that a judge might consider," elaborating on each limit: time limits and schedules; limits on quantity; and phased, sequenced, or targeted discovery. (*Id.* at §11.422, pp. 53-54.)

Those, then, were the well-developed criteria and guidance by which Judge Sabraw was to manage this 20-defendant case. And as is apparent from the above, he did so in exemplary fashion. And without prejudice to plaintiffs **[*52]** who, as is also apparent from the recitation of facts discussed above, had access to full discovery here.

Despite that, plaintiffs contend that there were four categories of discovery they were denied. Specifically:

First, plaintiffs contend that Judge Sabraw "limited document discovery to prices and price setting practices thereby limiting production of documents price fixing [*sic*] of specific drugs and denying discovery of the top level agreement to stabilize prices." In fact, discovery was broader than plaintiffs claim. Judge Sabraw required defendants to produce documents relating to "national policies that affect or have affected the price of identified drugs." But to the extent that any discovery was limited to prices and price setting practices, the case was about defendants' price setting practices, and such limitation was therefore appropriate. Plaintiffs were afforded discovery concerning pricing decisions on the 111 Identified Drugs—drugs, not incidentally, selected in part based on plaintiffs' input—for a ten year period, which we consider a reasonable scope.

Second, plaintiffs complain that Judge Sabraw "refused to require the production of defendants [*sic*] documents showing **[*53]** efforts to restrict re-importation of drugs saying such action was legal." In support of this argument, plaintiffs cite page 3 of an order granting a motion to quash a subpoena to nonparty Johnson & Johnson, in which Judge Sabraw granted the motion as to plaintiffs' request for documents from "Johnson & Johnson to Canadian wholesalers that refer[red] or related to the threats or warnings of termination of sales by J&J for selling and/or distributing pharmaceutical drugs in the United States." Plaintiffs make no attempt to explain how a nonparty's actions would in any way be relevant to the alleged conspiracy.

Third, plaintiffs argue that Judge Sabraw "denied production and allowed redaction of documents arguably subject to the associational privilege. However, such documents are discoverable under footnote 3 to the *Pennington* case to show the purpose and character of non-protected action." The trial court order cited in support of their argument was an "order following in camera review of PhRMA documents to determine whether redactions are proper." For purposes of the in camera review, PhRMA had been permitted to redact privileged information, but not information that it believed to **[*54]** be irrelevant. Judge Sabraw determined that PhRMA took "a narrow view of what constitutes relevant information," explaining, "For example, PhRMA has not produced information concerning the importation of drugs from Canada. Although this information might not be directly relevant to the existence of a conspiracy to use the Canadian price as a floor for drugs in California, it is relevant for purposes of discovery." Judge Sabraw then ordered PhRMA to produce certain documents or excerpts. We fail to understand how an order directing PhRMA to produce documents could support plaintiffs' claim that Judge Sabraw "denied production and allowed redaction of documents arguably subject to the associational privilege."

Finally, plaintiffs object that Judge Sabraw unreasonably limited the depositions of defendants' apex deponents to three and a half hours, while allowing defendants to depose "plaintiffs [*sic*] apex people" for two days. To begin with, plaintiffs did not have "apex people." Judge Sabraw defined apex deponents as "senior officers (CEO, President, Vice President, Chairpersons of the Board, members of the Board of Directors)," while this court in *Liberty Mutual Ins. Co. v. Superior Court, supra, 10 Cal.App.4th 1282, 1289*, **[*55]** the seminal case on apex depositions, referred to "a corporate president or other official at the highest level of corporate management." Plaintiffs here were small businesses whose officers were involved in daily decisions and were produced for depositions as both fact and corporate "most knowledgeable" witnesses. They were clearly differently situated than defendants' apex deponents.

In any case, plaintiffs have failed to establish that the time limit placed on apex depositions was unreasonable. They assert that it was "not sufficient to cover the factual issues in the case," but do not identify any subjects they were unable to cover or any questions that went unanswered. And, of course, plaintiffs made a "strategic decision" not to depose subapex witnesses, a decision that could account for any perceived lapses in the information plaintiffs received through discovery.

Plaintiffs have shown no error, and certainly not any that plaintiffs demonstrate would have made a difference in the outcome here.

C. The Order Denying Plaintiffs' Request for Judge Brick's Disqualification Was Correct, an Order Plaintiffs Cannot Even Challenge Here

On August 26, 2010, we remanded the case to the Alameda **[*56]** County Superior Court, which on September 2 assigned the matter to Judge Brick. As noted, plaintiffs sought to remove him from the case, including with their improper preemptory challenge and their later request to disqualify him for cause, including with two supplemental statements for disqualification. Plaintiffs assert that the refusal to disqualify Judge Brick was error.

The challenge involved here was plaintiffs' September 14, 2010 request to have Judge Brick removed for cause, pursuant to *Code of Civil Procedure section 170.1, subdivisions (a)(5)* and *(a)(6)*. The former provides in pertinent part that a judge shall be disqualified if "[a] lawyer . . . in the proceeding is the spouse, former spouse, child, sibling, or parent of . . . the judge's spouse or if such a person is associated in the private practice of law with a lawyer in the proceeding"; the latter, if "[a] person aware of the facts might reasonably entertain doubt that the judge would be able to be impartial."

To recap, the basis of plaintiffs' challenge was the relationship between Judge Brick and his sister-in-law, a relationship that plaintiffs describe here as follows: "The facts are undisputed. Judge Brick's sister-in-law **[*57]** was a partner in Covington & Burling. [Citation.] For years the Covington firm represented one of the defendants in this case, from complaint, demurrers, discovery, summary judgment on the pass-on defense, the filing of a motion for summary judgment on the merits, appeals, and reversal. It was only when it became apparent that the case would be assigned to Judge Brick that they substituted ou[t] [citation], while continuing to represent most of the defendants in other matters."

The defendant was Boehringer Ingelheim Pharmaceuticals, Inc., and it is true that Covington represented it in this litigation and that Judge Brick's sister-in-law was a member of that firm. It is also true, however, that Covington substituted out as counsel on August 5, 2010,[14] before the case was assigned to Judge Brick.

Following Judge Brick's response to plaintiffs' challenge, it was assigned to Judge D'Opal of the Marin County Superior Court, who issued a detailed order finding that (1) no attorney at Covington was a "lawyer in the proceeding," thus making *Code of Civil Procedure, section 170.1, subdivision (a)(5)* inapplicable; and (2) some relationship between a judge and an attorney at a firm that represents certain defendants on other matters unrelated to the litigation in issue—but not the case before the court—is not a fact upon which a person "might reasonably entertain doubt that the judge would be able to be impartial," making subdivision (a)(6) inapplicable.

Plaintiffs filed a petition for writ of mandate in this court on December 7, 2010, which we denied. Plaintiffs then filed a petition for review in the Supreme Court, which was also denied. That ends the matter—plaintiffs' claim is not properly before us.

Section 170.3, subdivision (d) provides that "The determination of the question of the disqualification of a judge is not an appealable order and may be reviewed only by a writ of mandate from the appropriate **[*59]** court of appeal . . . ." (See also *People v. Hull (1991) 1 Cal.4th 266, 276, 2 Cal. Rptr. 2d 526, 820 P.2d 1036* *[section 170.3, subdivision (d)* "prescribes the exclusive means of appellate review of an unsuccessful peremptory challenge motion"]; *D.C. v. Harvard-Westlake School (2009) 176 Cal.App.4th 836, 849-850, 98 Cal. Rptr. 3d 300*; *Sears, Roebuck & Co. v. National Union Fire Ins. Co. (2005) 131 Cal.App.4th 1342, 1348-1349, 32 Cal. Rptr. 3d 717*.)

Faced with this law, plaintiffs' reply argues that the California Supreme Court has countenanced appellate review of such a claim on an appeal from the final judgment when due process issues are raised. They rely on *People v. Brown (1993) 6 Cal.4th 322, 24 Cal. Rptr. 2d 710, 862 P.2d 710* (*Brown*), citing the following passage: "[T]he [United States Supreme Court] has made it clear that a defendant has a due process right to an impartial judge, and that violation of this right is a fatal defect in the trial mechanism. In view of this established federal constitutional authority, to foreclose appellate attack on the fundamental constitutional integrity of the judgment would be a radical and extreme step. It would simultaneously (i) preclude traditional full appellate review of defendant's federal constitutional claim, and (ii) impair what defendant asserts **[*60]** is his state constitutional right of appeal." (*Id. at pp. 333-334*.) *Brown* does not avail plaintiffs.

Brown, a death penalty case, was decided on remand from the United States Supreme Court. The California Supreme Court found no error requiring retrial of the guilt or penalty issues, but reversed the penalty judgment and remanded for reconsideration of the automatic motion for modification of the death verdict. (*Brown, supra, 6 Cal.4th at p. 326*.) Prior to the rehearing, defendant moved pursuant to *Code of Civil Procedure section 170.1, subdivision (a)(6)(C)*, to disqualify the trial judge on the basis of lack of impartiality. Declarations of defense counsel and her investigators indicated that the trial judge had engaged in ex parte communications with them concerning her investigation, which involved contacting jurors. The judge who heard the disqualification motion denied it, and the trial court denied the automatic motion for modification of the death verdict. (*Brown, supra, 6 Cal.4th at pp. 326-327*.)

The Supreme Court went on to hold that Brown's claim could be made on appeal. But not on any basis giving solace to plaintiffs, the court holding as follows: "It is enough to determine **[*61]** that his argument is credible; given the maxim that a statute must be construed, if possible, to avoid constitutional issues, we will not ascribe to the

---

[14] Plaintiffs contended below that the "purported substitution" was "defective for three reasons" and that Covington was still counsel of record when the matter was assigned to Judge Brick. Judge D'Opal rejected this contention, concluding that "sufficient evidence supports the basic fact that Covington was not 'a lawyer in the proceeding' when the Presiding Judge assigned this case to Judge Brick **[*58]** for all purposes . . . ." Plaintiffs do not challenge this conclusion on appeal.

Legislature an intent to bar appellate review of defendant's due process claim. [Citations.] [¶] These factors lead us to construe the statute as applied to defendant's claim as follows: *Section 170.3(d)* applies to all *statutory* judicial disqualification claims—even those claims based on statutory provisions that, like *section 170.1, subdivision (a)(6)(C)*, appear to codify due process grounds for relief—but *section 170.3(d)* does not apply to, and hence does not bar, review (on appeal from a final judgment) of *nonstatutory* claims that a final judgment is constitutionally invalid because of judicial bias. [¶] Our conclusion does not alter our construction of *section 170.3(d)* in [*People v.*] *Hull, supra, 1 Cal.4th 266*. Even in a capital case, the denial of a *statutory* judicial disqualification motion is not subject to interlocutory appeal; instead, all litigants who seek to challenge denial of a statutory judicial disqualification motion are relegated to writ review as described in *section 170.3(d)*." (*Brown, supra, 6 Cal.4th at p. 335*.) **[*62]** Here, of course, plaintiffs' challenges were *statutory.*

But even if plaintiffs could make the claim, it would fail. Judge Brick's sister-in-law's firm had substituted out, making *Code of Civil Procedure section 170.1, subdivision (a)(5)* inapplicable. And plaintiffs demonstrate no facts or circumstances by which "[a] person aware of the facts might reasonably entertain a doubt that [Judge Brick] would be able to be impartial" under *section 170.1, subd. (a)(6)*. Plaintiffs cite no authority—and we have found none—that relied upon subdivision (a)(6) to disqualify a judge based merely upon the client of an in-law's law firm. As defendants put it, "The Legislature drew the line in *section 170.1(a)(5)* between family relationships that require recusal and those that do not. There is no reason to believe a broader sweep is required to protect the integrity of the judiciary." We agree.

The few cases cited by plaintiffs are easily distinguishable. *Stitt v. State Bar (1978) 21 Cal.3d 616, 146 Cal. Rptr. 878, 580 P.2d 293*, involved disqualification of a State Bar hearing officer where the officer's law partner was litigating another matter against the parties appearing before the officer. *Tumey v. Ohio (1927) 273 U.S. 510, 47 S. Ct. 437, 71 L. Ed. 749, 5 Ohio Law Abs. 159, 5 Ohio Law Abs. 185, 25 Ohio L. Rep. 236* and *Ward v. Village of Monroeville (1972) 409 U.S. 57, 61, 93 S. Ct. 80, 34 L. Ed. 2d 267*, **[*63]** held that judges were disqualified from cases where they benefitted—either directly (*Tumey*) or indirectly (*Ward*)—from fines they imposed. Judge Brick's relationship to his sister-in-law is a far cry.

D. Judge Brick Did Not Abuse His Discretion In Denying Plaintiffs' Request to Continue the Merits Motions To Allow For Additional Discovery

Plaintiffs next contend, in a brief argument of less than a page, that Judge Brick erred in denying their *Code of Civil Procedure section 437c, subdivision (h)* request for continuance of the summary judgment hearing.[15] Plaintiffs show no error.

Code of Civil Procedure section 437c, subdivision (h) provides that if the party opposing summary judgment shows by declaration that essential evidence "may exist but cannot, for reasons stated, then be presented, the court shall deny the motion" or continue it for a reasonable period. (See *Bahl v. Bank of America (2001) 89 Cal.App.4th 389, 395, 107 Cal. Rptr. 2d 270*.) **[*64]** The reason for the declaration is for the party to '"show that its proposed discovery would have led to "facts essential to justify opposition.""' (*Scott v. CIBA Vision Corp. (1995) 38 Cal.App.4th 307, 325-326, 44 Cal. Rptr. 2d 902*.) This means, as the leading practical treatise describes it, that a party seeking a continuance has to show the following "requirements":

"[10:207.15] **Requirements:** The opposing party's declaration in support of a motion to continue the hearing should show the following:

- *Facts* establishing a *likelihood that controverting evidence may exist* and *why* the information sought is *essential* to opposing the motion;

---

[15] It should be recalled that plaintiffs had first sought to continue the motion on November 13, 2006, by a request to Judge Sabraw. Judge Sabraw denied it, a ruling that plaintiffs unsuccessfully challenged by writ petition. Plaintiffs' opposition to the merits motions also contained a 437c(h) request.

• The *specific reasons* why such evidence cannot be presented at the present time;

• An estimate of the *time* necessary to obtain such evidence; and

• The specific steps or procedures the opposing party intends to utilize to obtain such evidence. [See CCP §437c(h); see also *Roth v. Rhodes* (1994) 25 [Cal.App.]4th 530, 548; . . . *Cooksey v. Alexakis* (2004) 123 [Cal.App.]4th 246, 254, . . .; *Combs v. Skyriver Communications, Inc.*[(2008) 159 [Cal.App.4th 1242,] 1270, . . .—declarations did not explain why information sought was essential to opposing motion or why additional time was **[*65]** needed]."

(Weil & Brown, Cal. Practice Guide: Civil Procedure Before Trial (The Rutter Group 2012) § 10:207.15, p. 10-83.)

If the declaration(s) do not measure up, the court may deny the request (*Cooksey v. Alexakis, supra, 123 Cal.App.4th 246, 253-254*; *Lerma v. County of Orange (2004) 120 Cal.App.4th 709, 716, 15 Cal. Rptr. 3d 609)*, a denial we review for abuse of discretion. (*Combs v. Skyriver Communications, Inc., supra, 159 Cal.App.4th 1242, 1270*; *Knapp v. Doherty (2004) 123 Cal.App.4th 76, 100, 20 Cal. Rptr. 3d 1*; *FSR Brokerage, Inc. v. Superior Court (1995) 35 Cal.App.4th 69, 72, 41 Cal. Rptr. 2d 404*; *Roth v. Rhodes, supra, 25 Cal.App.4th at pp. 547-548*.) We find no abuse here. And plaintiffs' argument certainly does not demonstrate any.

Plantiffs' entire argument is as follows: "Note that the language of the Legislature is mandatory and requires denial or continuance when essential facts are shown by affidavit. Here plaintiffs' [*sic*] submitted lengthy declarations from their counsel showing what specific evidence existed, how it had been requested early in the litigation but not produced and how it bore specifically on the conspiracy. [Citation.] For example the Canadian internet pharmacy documents, while requested early in the litigation, **[*66]** were not produced until after a long fight and then only partially and after the summary judgment was filed. Clearly discovery was needed to flesh out these documents and provide the story that the documents only suggested. That the lower court called these documents inadmissible hearsay merely reinforces the necessity for discovery." We read the record differently.

The extensive discovery in this case was described in detail above, including two sets each of requests for production of documents, requests for admission, and special interrogatories, as well as three sets of form interrogatories served on each defendant. The original discovery included plaintiffs taking nearly 60 depositions. In addition, between the time that defendants moved for summary judgment and plaintiffs filed their opposition, plaintiffs took some two dozen more depositions, including depositions of all but one of the officers and employees who submitted declarations in support of the motions for summary judgment.

As quoted, plaintiffs' brief argument makes the vague claim that the sought-after discovery would have allowed them to "flesh out" some unidentified documents obtained from some defendant(s) in discovery. **[*67]** Such argument is hardly sufficient. As we said in *Mansell v. Board of Administration (1994) 30 Cal.App.4th 539, 545-546, 35 Cal. Rptr. 2d 574*, we are "'not inclined to act as counsel for . . . [plaintiffs] and furnish a legal argument as to how the trial court's rulings . . . constituted an abuse of discretion.'"

As to plaintiffs' claim below that they might not have deposed the best—or most appropriate—witnesses, Judge Brick aptly observed, "If plaintiffs believe they failed to depose the best witnesses, it is Plaintiffs' own doing."[16]

Beyond all that, plaintiffs do not even attempt to demonstrate why Judge Brick's conclusion— that plaintiffs failed to provide "valid reasons" why essential facts "could not have been obtained through more diligent efforts, and presented with their opposition"—was erroneous. Plaintiffs' request was properly turned **[*68]** down.

E. There Was No Error In Judge Brick's Evidentiary Rulings

---

[16] In a similar vein, Judge Sabraw had earlier observed that whatever deficiencies plaintiffs asserted in discovery, it was their own fault. As he put it, "Plaintiffs have had an adequate opportunity to prepare their case and develop evidence to oppose the motions for summary judgment," including "the opportunity to depose the persons responsible for setting prices."

Plaintiffs assert that Judge Brick made "several evidentiary rulings finding documents inadmissible." Rather than "burden" us with "all of these exhibits," plaintiffs focus on three exhibits—numbers 1, 111, and 117.

We begin with the observation that there is no agreement on the standard of review that guides us on the issue here. As we recognized in *Nazir v. United Airlines, Inc. (2009) 178 Cal.App.4th 243, 100 Cal. Rptr. 3d 296* (*Nazir*): "Whether abuse of discretion is the proper standard of review when rulings on evidentiary objections are based on papers alone presents an interesting question, one that is by no means settled. *Carnes* itself recognizes a split of authority. (*Carnes v. Superior Court[(2005) 126 Cal.App.4th 688,] 694, 23 Cal. Rptr. 3d 915*.) And a leading commentary states the rule this way: 'Pursuant to the weight of authority, appellate courts review a trial court's rulings on evidentiary objections in summary judgment proceedings for abuse of discretion. [Citations.]' (Eisenberg et al., Cal. Practice Guide: Civil Appeals and Writs (The Rutter Group 2008) ¶ 8:168, p. 8-130 (rev. #1, 2008), italics omitted.)." (*Nazir, supra, 178 Cal.App.4th at p. 255, fn. 4*; **[*69]** see also *Reid v. Google, Inc. (2010) 50 Cal.4th 512, 535, 113 Cal. Rptr. 3d 327, 235 P.3d 988* [recognizing issue].) But whichever the standard, we find no error here, certainly not reversible error.

Exhibit 1 was a declaration of plaintiffs' counsel Eric Unrein, which in turn appended as exhibit A the United States Department of Justice's 292-page file on defendants' business review letter request concerning the CPI Pledge, documents that Unrein described as having been "obtained at my direction and request . . . from the United States Department of Justice ('DOJ'), Antitrust Division, related to the business review letter requested on behalf of" PhRMA concerning the "Pledge."

Defendants objected that the documents were "[n]ot relevant to the conspiracy that survived demurrer here" and that they were "inadmissible hearsay not subject to any exception." Judge Brick sustained the objection on relevancy grounds, citing *Evidence Code sections 210* and *350*.

Plaintiffs argue here that the records were "properly authenticated and from the files of the Government and as such was admissible as an official record. . . . Much of it is also admissible as statements of a co-conspirator made in the course and furtherance of the conspiracy." **[*70]** In making this argument, plaintiffs overlook one significant factor: the ground on which Judge Brick sustained defendants' objection was relevancy. The records concerned only the alleged CPI conspiracy, a conspiracy not pleaded in the third amended complaint.

Exhibit 111 was an exhibit to the Alioto declaration consisting of 56 pages of documents produced by GSK on or about October 5, 2006, documents plaintiffs describe in their opening brief as follows: "Much of the document consists of minutes, agenda, and decision memoranda prepared by PhRMA, or the Canadian association Rx&D, and produced from the files of GSK. These documents are: (1) Decision Memorandum For The Board of Directors On Canada Advocacy 7/9/02 [citation]; Memorandum PhRMA 'Preventing Government Price Controls' 11/4/02 [citation]; 'Rx&D Internet Pharmacy Committee Meeting Minutes' 1/10/03 [citation]; 'Notice to Canada KIT Staff Work Group' 1/23/03 [citation]; Memorandum PhRMA 'Progress In Opposition to Illegal Internet Imports of Medicines' 4/5/03 [citation]; Memorandum PhRMA 'Canada Key Issue Team Task Force Meeting' 5/12/03 [citation]' Fax from Hohner to PhRMA Board of Directors 5/15/03 with materials for May, 22 Board **[*71]** of Directors Meeting, [citation]; Notice to Canada KIT with Memorandum and Agenda for July 2 meeting, 6/27/03 [citation]. [¶] . . . [¶]

"The balance of Exhibit 111 comes from the files of defendant GSK and include not only GSK prepared documents, or in one case by its consultant and in two cases its competitors Wyeth and AstraZeneca. The first of these is a Timeline prepared by GSK in its regular course of business documenting its cut off of the supply to internet pharmacies, [citation]. The second is an email by Wyeths [*sic*] CEO to GSK's CEO expressing 'Nice Job," [citation]. The third is an internal GSK Memorandum discussing internet pharmacies and GSK's actions, [citation]. The fourth document is an internal GSK Memorandum enclosing an unpublished AstraZeneca letter re internet supply, 4/10/03 [citation]; The fifth is an internal GSK Memorandum of an Update on Internet Issue 4/15/03 [citation]. The sixth document is a report from a GSK consultant regarding 'Communications Recommendations' 4/1/603 [citation]."

Defendants objected that they were irrelevant. Further, as to documents Bates stamped GSK-CAL-7000101-102 and 7000179-184, defendants also objected that "to the extent that Plaintiffs **[*72]** offer the documents to prove the truth of the matter asserted therein, the documents are inadmissible hearsay not subject to any exception."

Judge Brick sustained the objection.

Lastly, Exhibit 117 to the Alioto declaration was described by him as "copies of newspaper articles produced by Defendant GSK." The exhibit consisted of four articles: "Health & Technology: Glaxo Warns Canadian Clients Against Drug Sales to the U.S.," *Wall Street Journal,* January 13, 2003; "Glaxo Wants Canada Drug Sales to U.S. to Stop," *Reuters News,* January 13, 2003; "GlaxoSmithKline May Stop Sales to Canada," *AP Online,* January 11, 2003; and "Will Other Companies Follow GlaxoSmithKline's Lead?", *MedAdNews,* May 2003. Defendants objected on hearsay and relevancy grounds, and on lack of foundation as to the fourth article which lacked a Bates stamp number and was not, according to defendants, produced by GSK. Judge Brick sustained the hearsay, lack of foundation, and relevancy objections.

Plaintiffs argue that this "collection of newspaper articles from the files of GSK [is] admissible to show the date of the GSK announcement of restrictions on Internet Pharmacies. These documents are admissible under *Evid. Code, § 645.1* **[*73]** [presumed to be that newspaper regularly issued]. They are also admissible under general evidence law." In claimed support of their position, plaintiffs rely on *Lawlor v. Loewe (2d Cir. 1913) 209 Fed. 721, 726*, citing the following passage: "But in order to show that the dispute between Loewe and the union excited general interest in the community, newspaper articles published in these towns were introduced in evidence, not as proof of the circumstances therein narrated but to show the improbability of the defendants being ignorant of matters which were constantly being made public and were of vital significance to them. . . . It cannot be denied that all this evidence was competent as to those who actually received it or had knowledge of it."

Plaintiffs have not demonstrated that any of the three challenged rulings was error. But even if they had, they would still not prevail, as reversal is warranted only if plaintiffs can show that a more favorable result was reasonably probable if the evidence had been admitted. (See *Evid. Code, § 354*; *Soule v. General Motors Corp. (1994) 8 Cal.4th 548, 574, 34 Cal. Rptr. 2d 607, 882 P.2d 298*.) This, they have failed to do.

F. Judge Sabraw Properly Sustained Defendants' Demurrer to [*74] the Fourth Cause of Action Without Leave to Amend

Plaintiffs argue that Judge Sabraw erred in sustaining the demurrer to the fourth cause of action, one of their unfair business practices claims. The argument is all of 11 lines, and asserts that the ruling was error because "plaintiffs should have been allowed to amend, but even so, the law in this District was that UCL claims involve a balancing of the benefits and harm of the business practice. *Quacchia v. DaimlerChrysler Corp.*[*, supra,*] *122 Cal.App.[4th] 1442, 1453, 19 Cal. Rptr. 3d 508*. Under this test, the complaint stated a UCL claim."

The background for this argument begins with Judge Sabraw's order of April 18, 2005, which again sustained demurrers, this time to plaintiffs' second amended complaint with leave to amend. On May 6, plaintiffs filed their third amended complaint. Again defendants demurred. On July 1 Judge Sabraw filed his "Order (1) Overruling in Part and Sustaining Without Leave to Amend in Part the Demurrer of Defendants to the Third Amended Complaint . . . ." As pertinent here, the order said: "The Third Amended Complaint alleges that Defendants have conspired to inflate the prices of prescription drugs sold to plaintiffs. [Citation.] **[*75]** The Third Amended Complaint alleges the dates [citation], terms [citations], means [citation], and effects [citations] of the alleged conspiracy. The Third Amended Complaint alleges overt acts in furtherance of the conspiracy, including the charging of higher prices in California and (otherwise legal) efforts to restrict the importation of drugs into the United States. The Court finds that the Third Amended Complaint alleges sufficient parallel conduct by the Defendants to raise an inference of collusion and permit the claim to proceed under the heightened standards for pleading a claim under the Cartwright Act."

Turning to the UCL claim, Judge Sabraw noted that the Supreme Court had not enunciated a legal test for unfairness in consumer cases and that the Courts of Appeal have gone in three directions. He then held that unfair "claims must be tethered to specific constitutional, statutory, or regulatory provisions" and denied plaintiffs' request to amend to "state a UCL claim alleging unilateral price discrimination that borrows from or is tethered to the Robinson-Patman Act, *15 U.S.C. § 13* or some other statute." Doing so, Judge Sabraw said that "The Court would normally grant Plaintiffs **[*76]** leave to amend to state a claim against a defendant that is related to a pending claim against that defendant. This is not, however, a normal case—this is a complex case alleging antitrust claims against all the major companies in a large industry."

To begin with, it is not correct to say that the third amended complaint did not state a UCL claim. The fifth cause of action alleged a violation of the "unlawful" prong of the UCL, based on defendants' actions "collectively" and was predicated on alleged price fixing—as was a portion of plaintiffs' claim under the unfair prong.

Beyond that, the third amended complaint attempted to inject a new cause of action never attempted before—a claim of price discrimination by each defendant "individually" under the "unfair" prong of the UCL. This is the claim Judge Sabraw rejected. Doing so, he rejected the definition of unfairness in *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 186-187, 83 Cal. Rptr. 2d 548, 973 P.2d 527*, and concluded that "Plaintiffs have not identified any fundamental policy in any constitutional, statutory, or regulatory provision that precludes Defendants from seeking the highest price for their products."

As we understand **[*77]** plaintiffs' claim here, they had properly alleged unfairness under the "balancing of the benefits and harms" test, which they claim is the test in this district. Tellingly, plaintiffs did not cite *Quacchia v. DaimlerChrysler Corp., supra, 122 Cal.App.4th 1442*, below, or make any argument about what is the test in "this district." Despite that, Judge Sabraw independently rejected the balancing test in favor of predictability and consistency with *Cel-Tech* in UCL litigation, noting that courts are "ill suited to regulate prices in a functioning marketplace."

Moreover, the third amended complaint made no mention of the Robinson-Patman Act, *15 United States Code section 13*. However, in the order Judge Sabraw stated that plaintiffs would not be granted leave to amend their unilateral UCL claim to borrow from the Robinson-Patman Act, "find[ing] that a claim that any one defendant engaged in price discrimination is qualitatively different from the central claim that all of the Defendants have conspired to fix prices." That said, Judge Sabraw made it clear that rejection of the unilateral price discrimination claim was without prejudice: "If Plaintiffs seek to pursue collateral claims against **[*78]** any of the Defendants they may do so in separate actions." Plaintiffs chose not to do that. Plaintiffs demonstrate no error, let alone prejudicial error.

With that, we turn to the substantive issue before us—whether Judge Brick properly granted summary judgment for defendants.

G. Judge Brick Properly Granted Summary Judgment For Defendants

1. The Cartwright Act and the General Principles

Enacted in 1907, the Cartwright Act "'generally outlaws any combinations or agreements which restrain trade or competition or which fix or control prices.'" (*Pacific Gas & Electric Co. v. County of Stanislaus (1997) 16 Cal.4th 1143, 1147, 69 Cal. Rptr. 2d 329, 947 P.2d 291*; *Bus. & Prof. Code, § 16720, subds. (a)*, *(b)* [prohibiting "combination[s] of capital, skill, or acts by two or more persons" which restrict trade, or limit or reduce the production or increase the price of any commodity].) A conspiracy to fix prices under the act consists of: (1) the formation and operation of the conspiracy, (2) wrongful act or acts done pursuant to it, and (3) damage resulting from such act or acts. (*Chicago Title Ins. Co. v. Great Western Financial Corp. (1968) 69 Cal.2d 305, 316-317, 70 Cal. Rptr. 849, 444 P.2d 481* (*Chicago Title*).) Concerted activity is essential to a Cartwright **[*79]** Act claim because the act prohibits "only *contracts, combinations or conspiracies* in restraint of trade." (*Biljac Associates v. First Interstate Bank (1990) 218 Cal.App.3d 1410, 1423, 267 Cal. Rptr. 819*, disapproved on other grounds in *Reid v. Google, Inc., supra, 50 Cal.4th 512, 532, fn. 8*.)

California courts demand a "'high degree of particularity in the pleading of Cartwright Act violations.'" (*G.H.I.I. v. MTS, Inc. (1983) 147 Cal.App.3d 256, 265, 195 Cal. Rptr. 211*.) To state a claim under the Act, it is insufficient to generally allege the elements set forth in the statute. Rather, a plaintiff must allege facts which indicate the existence of a prohibited contract, combination, or conspiracy. (*Chicago Title, supra, 69 Cal.2d at p. 318* ["General allegations of the existence and purpose of the conspiracy are insufficient and appellants must allege specific overt acts in furtherance thereof."]; *Freeman v. San Diego Assn. of Realtors (1999) 77 Cal.App.4th 171, 196, 91 Cal. Rptr. 2d 534* ["An antitrust claim must plead the formation and operation of the conspiracy and the illegal acts done in furtherance of the conspiracy."]; *Cellular Plus, Inc. v. Superior Court (1993) 14 Cal.App.4th 1224, 1236, 18 Cal. Rptr. 2d 308* ["[I]n order to sufficiently state a cause of action, **[*80]** the plaintiff must allege in its complaint certain facts in addition to the elements of the alleged unlawful act so that the defendant can understand the nature of the alleged wrong and discovery is not merely a blind 'fishing expedition' for some unknown wrongful acts."].)

Direct evidence of the conspiratorial agreement is rarely available. (See *Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 857, 107 Cal. Rptr. 2d 841, 24 P.3d 493* (*Aguilar*) [plaintiff "must often rely on inference rather than evidence since, usually, unlawful conspiracy is conceived in secrecy and lives its life in the shadows"].) Rather, the conspiracy is usually shown by circumstantial evidence which, in an antitrust case, often takes the form of "conscious parallelism." (*In re Travel Agent Com'n Antitrust Litigation (2009) 583 F.3d 896, 903*.)[17] As described in *Eddins v. Redstone (2005) 134 Cal.App.4th 290, 304-305, 35 Cal. Rptr. 3d 863* (*Eddins*): "Conscious parallelism is a pattern of uniform business conduct, not in itself unlawful. [Citation.] To establish consciously parallel behavior, [plaintiff] 'must show (1) that the defendants' business behavior was parallel, and (2) that the defendants were conscious of each other's conduct and that their awareness was **[*81]** an element in their decisional process.'" (Fn. omitted.)

But, as the *Eddins* court went on to explain, evidence of conscious parallelism alone is not enough. Rather, plaintiff must also establish that ""each defendant engaging in the parallel action acted contrary to its economic self-interest," [citation] or offer[] other "plus factors" tending to establish that the defendants were not engaging merely in oligopolistic price maintenance or price leadership but rather in a collusive agreement to fix prices or otherwise restrain trade.'" (*Eddins, supra, 134 Cal.App.4th at p. 305*; see also *Bell Atlantic Corp. v. Twombly (2007) 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929* ["The inadequacy of showing parallel conduct . . . without more, mirrors the ambiguity of the behavior: consistent with conspiracy, but just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market."]; *In re Flat Glass Antitrust Litigation (3rd Cir. 2004) 385 F.3d 350, 360* **[*82]** ["plaintiffs basing a claim of collusion on inferences from consciously parallel behavior [must] show that certain 'plus factors' also exist."]; *Harlem River Cons. Co-op., Inc. v. Associated Groc. (S.D.N.Y. 1976) 408 F.Supp. 1251, 1277*.) "Existence of these plus factors tends to ensure that courts punish 'concerted action'—an actual agreement—instead of the 'unilateral, independent conduct of competitors.' [Citation.] In other words, the factors serve as proxies for direct evidence of an agreement." (*In re Flat Glass Antitrust Litigation, supra, 385 F.3d at p. 360*.)

2. Summary Judgment and the Standard of Review

Code of Civil Procedure section 437c provides that summary judgment is properly granted "if all the papers submitted show that there is no triable issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." (*Code Civ. Proc., § 437c, subd. (c)*.) As we confirmed in *Nazir, supra, 178 Cal.App.4th at p. 253*: "[M]oving defendants can meet their burden by demonstrating that 'a cause of action has no merit,' which they can do by showing that '[o]ne or more elements of the cause of action cannot be separately established . . . .' (*§ 437c, subd.* **[*83]** (*o*)(1); see also *Romano v. Rockwell Internat., Inc. (1996) 14 Cal.4th 479, 486-487, 59 Cal. Rptr. 2d 20, 926 P.2d 1114*.) Once defendants meet this burden, the burden shifts to plaintiff to show the existence of a triable issue of material fact. (*§ 437c, subd. (p)(2)*.)" A plaintiff satisfies his or her burden and creates "a triable issue of material fact if, and only if, the [admissible and properly referenced] evidence would

[17] The Cartwright Act is patterned after the federal Sherman Antitrust Act (*15 U.S.C. § 1 et seq.*), and decisions under the latter are applicable to the former. (*Corwin v. Los Angeles Newspaper Service Bureau, Inc. (1971) 4 Cal.3d 842, 852, 94 Cal. Rptr. 785, 484 P.2d 953*.)

allow a reasonable trier of fact to find the underlying fact in favor of the party opposing the motion in accordance with the applicable standard of proof." (*Aguilar, supra, 25 Cal.4th at p. 850*, fn. omitted.)

Beyond the general rules in *section 437c*, we are further guided by the opinion in *Aguilar,* where the Supreme Court analyzed at length the parties' respective burdens in an antitrust case. As Justice Mosk described, once a defendant sustains its initial burden of production, a plaintiff "who would bear the burden of proof by a preponderance of evidence at trial, must present evidence that would allow a reasonable trier of fact to find in his favor on the unlawful-conspiracy issue by a preponderance of the evidence, that is, to find an unlawful conspiracy more likely than not." (*Aguilar, supra, 25 Cal.4th at p. 852*.) **[*84]** And he went on: "Ambiguous evidence or inferences showing or implying conduct that is as consistent with permissible competition by independent actors as with unlawful conspiracy by colluding ones do not allow such a trier of fact so to find. ***Antitrust law***, including the Cartwright Act, compels the result. Otherwise, it might effectively chill procompetitive conduct in the world at large, the very thing that it is designed to protect [citation] by subjecting it to undue costs in the judicial sphere. Therefore, in addition, the plaintiff must present evidence that tends to exclude, although it need not actually exclude, the possibility that the alleged conspirators acted independently rather than collusively. "[18] (*Ibid.*) "[I]f the court determines that any evidence or inference presented or drawn by the plaintiff indeed shows or implies unlawful conspiracy *more likely than* permissible competition, it must then deny the defendants' motion for summary judgment, even in the face of contradictory evidence or inference presented or drawn by the defendants, because a reasonable trier of fact could find for the plaintiff. . . . [¶] But if the court determines that all of the evidence presented **[*85]** by the plaintiff, and all of the inferences drawn therefrom, show and imply unlawful conspiracy *only as likely as* permissible competition *or even less likely,* it must then grant the defendants' motion for summary judgment . . . ." (*Id. at pp. 856-857*.)

Ultimately, *Aguilar* made clear that "while normal summary judgment principles apply in antitrust cases, 'an important distinction exists.' [Citation.] The distinction is that 'certain "inferences may not be drawn from circumstantial evidence in an antitrust case."'" (*Eddins, supra, 134 Cal.App.4th at p. 328*; see also *Matsushita Elec. Industrial Co. v. Zenith Radio, supra, 475 U.S. at p. 588* **[*86]** ["conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy"]; *Aguilar, supra, 25 Cal.4th at p. 852*.) As a result, it has been said that when opposing a motion for summary judgment in the context of an antitrust claim alleging unlawful collusion, plaintiffs face a "demanding standard of proof." (*In re Baby Food Antitrust (3rd Cir. 1999) 166 F.3d 112, 118*.)

On appeal, we review a grant of summary judgment de novo: "'[W]e must decide independently whether the facts not subject to triable dispute warrant judgment for the moving party as a matter of law. [Citations.]' (*Intel Corp. v. Hamidi (2003) 30 Cal.4th 1342, 1348, 1 Cal. Rptr. 3d 32, 71 P.3d 296*.) Put another way, we exercise our independent judgment, and decide whether undisputed facts have been established that negate plaintiff's claims." (*Nazir, supra, 178 Cal.App.4th at p. 253*.)

With these guidelines in mind, we turn to the evidence presented below.

3. Defendants Produced Evidence Demonstrating That They Independently Set the Prices of Their Pharmaceuticals

As noted, as the moving parties defendants bore the initial burden of making a prima facie showing of the nonexistence **[*87]** of any triable issue of material fact. (*Aguilar, supra, 25 Cal.4th at p. 850*; *Code Civ. Proc., §*

---

[18] The *Aguilar* opinion brought California in line with *Matsushita Elec. Industrial Co. v. Zenith Radio Corp. (1986) 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538*, in which the United States Supreme Court set forth how courts should analyze summary judgment motions involving claims under the Sherman Act, as well as companion cases *Anderson v. Liberty Lobby, Inc. (1986) 477 U.S. 242, 106 S. Ct. 2505, 91 L. Ed. 2d 202* and *Celotex Corp. v. Catrett (1986) 477 U.S. 317, 106 S. Ct. 2548, 91 L. Ed. 2d 265*. (*Aguilar, supra, 25 Cal.4th at p. 848*.) Doing so, *Aguilar* liberalized the granting of summary judgment in California. (*Ibid.; Nazir, supra, 178 Cal.App.4th at pp. 248, 285*.)

437c, subd. (*o*).) Here, a case alleging horizontal price fixing, this means making "a prima facie showing of the absence of any conspiracy." (*Aguilar, supra, 25 Cal.4th at p. 861*.) Defendants carried this initial burden.

Each defendant submitted sworn testimony from its CEO that it did not participate in a conspiracy to set the prices of its pharmaceuticals above the price for the same drugs in Canada. Such testimony was in a declaration, a deposition, or both. (See *Eddins, supra, 134 Cal.App.4th at p. 303, fn. 8* ["Each executive asserted his or her studio acted independently and at no time conferred or agreed with any other studio about the terms of its deal, and did not agree with Blockbuster or each other to deny comparable terms to the wholesale distributors."].)

In addition, defendants submitted evidence by high-ranking employees with personal knowledge of defendants' price-setting practices. This evidence described the process by which each defendant set, and periodically reevaluated, the wholesale acquisition cost for their pharmaceuticals. Judge Brick summarized the process as described **[*88]** in the evidence this way: "Defendants . . . employed generally similar processes for setting prices. Pricing recommendations (including prices for Identified Drugs) were delegated to specific teams, after the consideration of a variety of factors relevant to market participants' willingness to pay (in a competitive market) for the drug. Some defendants also considered other factors: internal (availability of support resources) and external (public policy and/or public relations issues, inflation, etc.). Most engaged in pricing studies and/or testing their tentative price proposals under different market scenarios. Generally, after completing its analysis, the pricing team's recommendations were presented to a senior committee or executive management charged with review and approval."

It is probably sufficient to leave it at that—a succinct summary of defendants' testimony concerning their price-setting practices—and conclude that it was sufficient to carry their initial burden. (See *Aguilar, supra, 25 Cal.4th at p. 861* ["Through the declarations by their officers and managers and similar employees—and through material from others including third parties—they presented evidence that **[*89]** would require a reasonable jury *not* to find any conspiracy more likely than not."].) Put otherwise, it is not necessary to detail the evidence offered by each and every defendant concerning their price-setting practices.

Nevertheless, we offer the testimony presented on behalf of one randomly-selected defendant—Allergan—as illustrative of the detail defendants provided concerning their independent procedures for arriving at the wholesale acquisition cost for their pharmaceuticals. This detail was shown by the declaration of Julian Gangolli, Allergan's corporate vice president and president, North America, who testified as follows:

"12. Allergan's Product Divisions set the United States prices for their products in a 'bottom-up' manner. Each Product Division has researchers and other employees that collect, organize and review the necessary information to make pricing decisions for the Division's newly launched and existing products. It is an interactive process between the staff and the Marketing VP's and the Marketing VP's take an active role.

"13. The Division staff consider a variety of factors in developing and setting prices for its products in the United States, including: whether **[*90]** the product is a newly launched product or an existing product; whether the product is under the protection of a patent; Allergan's position in the therapeutic market for the given product; the uniqueness of the product in its therapeutic market; the value that patients, physicians and third party payors place on the product; the product's benefit to patients that receive it; the average cost per therapeutic dose; the presence and prices of competitors' products in the therapeutic market and the presence of other existing Allergan products in the relevant therapeutic market; the size of the potential patient pool; the business objectives of the Company and Division; the return on investment for the Division and the Company; and the costs of research, development, production and marketing.

"14. Ultimately, in setting its prices Allergan must focus on those individuals and groups with the power to influence drug purchasing decisions, such as physicians, patients and third party payors. Because competition is so intense, Allergan attempts to distinguish its products from its competitors' products and provide supportive clinical and pharmoeconomic information to physicians, patients and **[*91]** third party payors that Allergan's products address their health needs safely, effectively and better than the competition. In this effort, the Product Division Staff tracks how Allergan's products are perceived by physicians, patients and payors in comparison to its competitors. Allergan does not price its products with groups such as retail pharmacists in mind because these groups do not determine which pharmaceutical products are purchased or prescribed.

"15. The Product Division Staff constantly reviews and refines its pricing process and decisions. Allergan usually adjusts its product prices in the United States one to two times a year, to account for both inflation and the demands of the marketplace.

"16. To monitor the competitive conditions in the United States, the Product Division Staffs consult public sources of information regarding their competitors' actions. Allergan does not, however, receive or solicit information from any pharmaceutical manufacturer about the prices of those companies' pharmaceutical products. Similarly, Allergan does not provide information to any pharmaceutical manufacturer regarding its pricing decisions.

"17. The Product Division Staff provides its **[*92]** United States pricing recommendations and supporting information to the Division's Marketing VP for review. The Marketing VP then provides his pricing recommendations to the President North America who in turn forwards them to the President and ultimately the CEO for approval.

"18. The President will either approve or reject the price recommendations of the Division's Marketing VP and President North America. Once approved, the President then notifies the CEO of the price recommendations. The CEO may ask questions of the Division Marketing VP's, President North American and President to clarify certain issues, but I cannot recall an instance where the CEO has overridden a pricing decision made by them.

"19. The aforementioned discussion describes Allergan's price-setting practices for its products in the United States. The Product Division Staffs and the respective Marketing VP's set the United States product prices independently of pricing decisions for Allergan's products in other countries. They do *not* consider the prices of Allergan's products in other countries, including Canada. In Canada, the prices of Allergan's products are largely dictated by government controls.

"20. Allergan **[*93]** also considers the placement of its products on the 'formularies' of Third Party Payors, such as health-care insurers or managed-care organizations. Third Party Payors create formularies to designate the drugs that are within their healthcare plans. They may also establish tiers within the formulary that set different levels of reimbursement for the drugs in their plans. A patient enrolled in a Third Party Payor plan may select a drug that is not on its formulary, but he will pay more for it than he would for a drug on formulary. Simply, a patient will pay more for a drug that is not on a preferred tier of a formulary.

"21. Because Third Party Payors control access to large pools of potential patients, they demand rebates from Allergan and other pharmaceutical manufacturers in return for placing the manufacturer's products on their formularies. Allergan seeks to negotiate with Third Party Payors so that its products are placed on the most favorable formulary tiers.

"22. Formulary placement is very important to Allergan and has tremendous impact on the amount of Allergan's products that are sold. If a Third Party Payor refuses to place Allergan's products on its formulary or declines **[*94]** to place them in a preferred tier, Allergan could lose substantial numbers of sales because physicians and patients will seek products that are on the formulary and its preferred tiers. As such, Allergan aggressively competes with other manufacturers to ensure that its products are on the formularies of Third Party Payors. The effect of this competition is that Allergan's rebates to Third Party Payors and government agencies ultimately reduce the net price of its products."

Similar declarations were submitted on behalf of other defendants: Patrick Bruen, marketing advisor, U.S. strategic pricing, for Eli Lilly and Company; J. Martin Carroll, president and chief operating officer, and Christine Marsh, executive director of contracts, both of Boehringer; Joaquin Duato, president of Ortho Biotech, Inc.; Pete Feldman, senior director, Strategic Planning and Operation, oncology business unit of Amgen; David Moules, vice president of strategic pricing, contracting and marketing of Smith Kline Beecham Corp. dba. GlaxoSmithKline; Kendall O'Brien, president, chief financial officer and vice president of finance of Ortho-McNeil Pharmaceutical; Kevin O'Leary, vice president of customer planning **[*95]** and contracting of Roche Laboratories Inc. (a wholly-owned subsidiary of Hoffman-La Roche Inc.); Robert Spurr, vice president of the strategic business group of Ortho-McNeil

Janssen Pharmaceutical Services; Raymond Tiedemann, vice president, global pricing, forecasting and contracting at Wyeth Pharmaceuticals, Inc.; Janet Vergis, president of Janssen Pharmaceutical, Inc.; and John R. Freeberry, former head of the pricing strategy group of AstraZeneca Pharmaceuticals LP.[19]

4. Plaintiffs' Burden [*96] of Proof

A. Direct Evidence of a Conspiracy

i. The CPI Theory

With the burden shifted to them, plaintiffs were obligated to present evidence that would permit a reasonable trier of fact to find the existence of a conspiracy more likely than not. This, Judge Brick held, plaintiffs failed to do. Plaintiffs challenge this holding on appeal, relying, as they did below, on what they claim is direct evidence. But not direct evidence of the pleaded Canadian floor theory, but direct evidence that defendants conspired to peg increases in their pharmaceutical prices to the CPI.[20] Plaintiffs' challenge fails, both procedurally and substantively.

As plaintiffs describe it in their opening brief, the price of prescription drugs rose precipitously in the 1980's, such that by the early 1990's there was significant public and political criticism of the increasing drug prices. In order to stave off potential price regulation by the government, PhRMA's board of directors passed a resolution—what plaintiffs called a "Pledge"—described by them as follows. The Pledge directed PhRMA's then-chief to "discuss with President-Elect Clinton, his transition staff, members of his Administration and members of Congress whether these Government officials would have an interest in exploring whether individual pharmaceutical manufacturers should undertake voluntarily and independently to hold for a reasonable period of time—given stable market conditions and government policies supportive of innovation—the increase in the weighted average of changes in the net prices of that company's prescription drug products to an approximate level not greater than **[*98]** one or more externally controlled indices such as the Consumer Price Index, and whether such actions should be confirmed to the Government by a series of reports to document actual results of these undertakings."[21] This resulted in John Ferguson, then counsel for PhRMA, sending a request for a business review letter to the United States Department of Justice, seeking an antitrust exemption permitting pharmaceutical companies to agree to use the annual increase in the CPI as a ceiling on pharmaceutical price increases.[22]

According to plaintiffs, their evidence showed that defendants then adopted this pricing policy which, again according to plaintiffs, constituted a per se violation of California's ***antitrust law***. But whether plaintiffs' evidence

---

[19] Plaintiffs argued below that defendants failed to meet their initial burden because their evidence consisted merely of "bald denials" that they engaged in collusive behavior. This, they argued, was insufficient under *Aguilar.* As is seen from the foregoing, plaintiffs' description was myopic. The evidence did more than baldly assert that defendants set their prices independently—it established that prices were independently determined, based upon defendants' individual market analyses which generally utilized public information. In any event, plaintiffs do not reiterate this argument on appeal, which we construe as a concession that defendants' evidence satisfied their initial burden of production.

[20] Plaintiffs variously describe this conspiracy in their opening brief: "to voluntarily restrain their price increases"; "to not increase their prices in excess of the CPI"; "to hold . . . the increase in the weighted average of changes in the net prices . . . to an approximate level not greater than . . . the Consumer Price Index"; "to limit [a company's] price increases, if any, on the entire line of its prescription drug products in any calendar year to an amount not to exceed the increase in the CPI"; "to peg future price increases to the CPI"; to keep **[*97]** "prices in line with the CPI or CPI plus 1 to two-and-a-half percent." And it appears that at some point, plaintiffs' theory morphed into a conspiracy to use the CPI as a floor, rather than a ceiling.

[21] As discussed above, Judge Brick properly sustained defendants' objections to all documents pertaining to the "Pledge." We discuss these documents to provide context for plaintiffs' opposition, not because they have any evidentiary value.

[22] The request was ultimately denied.

concerning the "Pledge" in fact showed what they claimed, it is irrelevant. As Judge Brick properly concluded, such evidence could not defeat summary judgment because plaintiffs **[*99]** never pleaded any conspiracy related to the CPI. The only conspiracy pleaded in the third amended complaint—and the sole focus of discovery—was the Canadian floor conspiracy.

The scope of a motion for summary judgment is determined by the pleadings. (*Rosales v. Battle (2003) 113 Cal.App.4th 1178, 1182, 7 Cal. Rptr. 3d 13)*, a principle plaintiffs conceded in their opposition to the joint motion: "each of Plaintiffs' Cartwright Act claims, as stated in the Third Amended Complaint, controls the present motion." In light of the specificity-in-pleading requirements in an antitrust case (*Freeman v. San Diego Assn. of Realtors (1999) 77 Cal.App.4th 171, 196, 91 Cal. Rptr. 2d 534*; *Chicago Title, supra, 69 Cal. 2d at pp. 317, 326-328)*, Judge Sabraw twice required plaintiffs to amend their complaint to allege their conspiracy claims in greater detail. The result was the third amended complaint, a complaint that can only be read to allege the Canadian floor conspiracy. It cannot be fairly read to incorporate a conspiracy among defendants to tie price increases to the CPI.

Our conclusion finds support throughout the third amended complaint, where plaintiffs made repeated reference to the Canadian floor conspiracy. As quoted above, paragraph **[*100]** five summarized the alleged conspiratorial agreement, as follows:

"5. The Defendants, pursuant to their unlawful combination and agreement, charge more for their drugs sold in the United States, including California, than they charge for the same drugs sold outside of the United States, including Canada. The Defendants agreed to eliminate price competition and fix prices in the United States, including California, by, *inter alia:*

"(a) Using the prices charged in Canada as a floor or minimum price level;

"(b) Acting in concert to restrict reimportation and/or purchase of lower priced foreign drugs;

"(c) Restricting price competition from generics and brand name variations of existing drugs;

"(d) Selling drugs for fixed prices above the prices in Canada (so that the prices charged in the United States, including California, would be higher than the prices for the same drugs sold outside of the United States, including Canada);

"(e) Agreeing that they would not sell their drugs at or below the price at which they sold those same drugs in Canada, and/or other countries outside of the United States; and

"(f) Agreeing and ensuring each other that they would maintain their agreement to charge more **[*101]** in the United States, including California, than they charged outside of the United States, particularly Canada."

And then there was paragraph 6: "The Defendants sell their drugs in the United States, including California, for prices that are 50% to 400% higher than the price those same drugs are sold for in Canada and countries outside of the United States, such as Mexico, Ireland, and the United Kingdom. . . ." And paragraph 8: "The character and nature of the agreement among and between the Defendants are that the Defendants agreed not to charge at or below the prices charged for the same drugs in Canada and elsewhere . . .; that the prices charged in the United States, including California, will be higher than those charged outside of the United States, such as Canada; that the Defendant would continue to abide by the agreement to charge higher prices in the United States, including California, than they charge for the same drugs in Canada and elsewhere . . . ." Many other such examples are peppered throughout the third amended complaint, including in the causes of action and prayer for relief. In short, "Canada" or "Canadian" are mentioned at least 38 times, "Consumer Price Index" **[*102]** or "CPI" not once.[23]

---

[23] In their reply brief, plaintiffs attempt to justify this omission: "Plaintiffs do not contend that the 'pledge injured them, as indeed it is hard to see how a maximum price agreement hurt the pharmacists. This in itself explains why the 'pledge' or 'CPI' was not mentioned in the [third amended complaint] . . . ."

Plaintiffs attempt to circumvent this failure by arguing that the third amended complaint alleged one, generic conspiracy—"Defendants agreed to eliminate price competition and fix prices in the United States"—that was broad enough to encompass the CPI theory, as well as the Canadian floor conspiracy. This is what they argue: the third amended complaint "alleges one conspiracy, not several separate conspiracies. Paragraph 5 of the [third amended complaint] alleges: 'The Defendants agreed to eliminate price competition and fix prices in the United States, including California, by, *inter alia:*' [Citation] [¶] The [third amended complaint] goes on to allege a series of overt acts engaged in by the defendants. The so-called 'Canadian Floor Conspiracy,' so named by the defendants and picked up by the lower court to limit plaintiffs' discovery, is contained in **[*103]** only one of the subparagraphs, out of 6 sub-paragraphs, following the '*inter alia.*' The other 5 sub-paragraphs allege acts to limit re-importation, acting to limit price competition from generics and brand name variations, selling drugs at fixed prices higher in the United States than in other countries, not selling drugs in the United States at or lower than the prices charged in other countries, agreeing and ensuring each other that they would maintain their agreement to charge more in the United States." This argument is without merit.

As noted, a claimed antitrust violation must be pleaded with specificity. The conspiracy plaintiffs now claim to assert—that defendants generally conspired to fix pharmaceutical prices—would not have satisfied these specificity-in-pleading requirements. Nor do the pleading requirements permit plaintiffs to rely on the vagaries of "*inter alia*" to bring a new, unpleaded conspiracy into the case. Indeed, this is precisely why Judge Sabraw twice required plaintiffs to amend their complaint.

Our reading of the third amended complaint is confirmed by Judge Sabraw's orders on defendants' demurrers. Each time he sustained the demurrers, he required plaintiffs **[*104]** to provide further facts concerning the precise price-fixing conspiracy at issue. Each time plaintiffs responded by providing greater details about the Canadian floor conspiracy. The following sequence makes the point:

In his April 18, 2005 order sustaining the demurrer to the second amended complaint, Judge Sabraw said that "The Court finds that Plaintiffs' theories are not defined adequately in the [Second] Amended Complaint. The [Second] Amended Complaint alleges generally that Defendants have conspired to inflate the prices of prescription drugs sold in California, but does not allege the substance of the unlawful agreement or how it is implemented.

"At the hearing, Plaintiffs stated that their claim is that all of the Defendants have agreed not to sell any prescription drugs in California for prices that are lower than the price they charge in Canada. The claim is apparently in the nature of horizontal price fixing because the Defendants all allegedly agreed to restrict competition in California by letting the prices charged in Canada operate as a floor or minimum price level. Such a claim would be clear. In addition, this is a recognized antitrust claim. [Citation.] Plaintiffs **[*105]** may file a [Third] Amended Complaint that articulates this (or any other) claim clearly.

"Plaintiffs must support their claims with factual allegations. The factual allegations must be related to the claims. At the hearing the Plaintiffs articulated the terms of an alleged industry-wide agreement, but they must also allege overt acts in furtherance of that industry-wide agreement, the means used to effectuate the industry-wide agreement, and the effects of the conspiracy.

"The [Third] Amended Complaint must allege facts relating to the price fixing conspiracy. Plaintiffs cannot simply allege the existence of an industry-wide conspiracy without reference to specific facts. Allegations might include that the prices of prescription drugs are uniformly higher in California than Canada, prices of specific drugs in the United States rise and fall depending on the prices approved by regulatory authorities in Canada, profit margins are higher in the United States than in Canada, the alleged cartel has 'punished' members of the cartel that have lowered their California prices below the Canada prices, and other matters."[24]

---

[24] In a case management order ten days later, Judge Sabraw reiterated that **[*106]** in their third amended complaint "Plaintiffs are encouraged to clarify whether their claim is that Defendants agreed not to sell drugs in California for below the Canada price (but permit independent competition above that floor) or to sell drugs for fixed prices above the Canada price (so the price in

Likewise, Judge Sabraw's July 1, 2005 order sustaining defendants' demurrer to plaintiffs' fourth cause of action described the case as "a complex case alleging antitrust claims against all the major companies in a large industry," and concluded that it was "appropriate to focus the claims in this case on the central allegation that all Defendants have unlawfully conspired or colluded to sell their drugs in California for prices that are higher than the prices charged in Canada."

Beyond the language of the third amended complaint, we find support for our conclusion elsewhere in the record. For example, in his April 18, 2005 case management order, Judge Sabraw stated, "This lawsuit appears to allege that the Defendants **[*107]** have conspired not to sell prescription drugs in California for prices that are below or equal to the prices in Canada. The trial will be focused on the claims asserted and the discovery should be focused on obtaining evidence to prove or disprove those claims. This is not a general administrative investigation into the business practices of the pharmaceutical industry."

Additionally, the Identified Drugs that were the focal point of discovery were selected in part because they were sold in both the United States and Canada. In his April 28, 2005 order recommending limitations for discovery, Judge Sabraw suggested that the "average disparity from Canada price" would be a factor in selecting the Identified Drugs. And in his July 11, 2005 order listing the Identified Drugs, he represented that they were selected in part based on defendants' representations that their lists identified drugs that were marketed in the United States and Canada.

In a June 2006 order concerning plaintiffs' claims that defendants improperly redacted documents relating to PhRMA, Judge Sabraw ordered plaintiffs to identify the 3,000 documents they claimed were wrongly redacted and PhRMA to then produce unredacted **[*108]** copies of the documents for in camera review. Then, after reviewing the documents, Judge Sabraw observed, "PhRMA has taken a narrow view of what constitutes relevant information. For example, PhRMA has not produced information concerning the importation of drugs from Canada. Although this information might not be directly relevant to the existence of a conspiracy to use the Canadian price as a floor for drugs in California, it is relevant for purposes of discovery. The Court could identify, and has identified, information that is related to collaboration among the Manufacturer Defendants, to the prices of drugs in Canada, to the antitrust concerns of PhRMA, and to other matters that are relevant as the Court has defined the scope of relevance in prior orders."

In these and many other instances, Judge Sabraw conveyed his understanding that the case was about the Canadian floor conspiracy. Not once did plaintiffs attempt to correct this understanding. Not once did they suggest that any CPI conspiracy was in play. And not once did they attempt to file an amended complaint seeking to allege the CPI conspiracy.

Defendants evidenced a similar understanding. In their moving papers in support **[*109]** of the joint motion, they summarized plaintiffs' allegations as follows: "Plaintiffs claim that Manufacturer Defendants' CEOs orchestrated a price-fixing conspiracy pursuant to which each Defendant agreed to price its drugs in the United States higher than the prices charged for similar drugs in Canada. As the Court ruled in its Order on Defendants' Demurrer to Plaintiffs' Third Amended Complaint: '[I]t is appropriate to focus the claims in this case on the central allegation that all Defendants have unlawfully conspired or colluded to sell their drugs in California for prices that are higher than the prices charged in Canada.' "

JJHCS's moving papers were similar, providing this detailed summary in its statement of facts: "This Court has repeatedly stated that 'the claims in this case concern an alleged multilateral conspiracy among the defendants to not sell drugs in California below the Canada price. Order of Aug. 28, 2006 . . .; see also Order of Apr. 18, 2005 . . . ('At the hearing, Plaintiffs stated that their claim is that all of the Defendants have agreed not to sell any prescription drugs in California for prices that are lower than the price they charge in Canada.'); Hr'g **[*110]** Tr. . . . dated June 30, 2005 . . . ('And indeed when you look at the contentions here [in the Third Amended Complaint], it's just simply that there's this floor, for lack of a better description, that is alleged to be agreed to by the manufacturers, the

---

California would fluctuate in tandem with the Canada price) or to sell drugs for fixed prices (that happen to be above the Canada price) or some combination of these theories."

defendants in this instance.'); Order of July 1, 2005 . . . (stating that the focus of this case is on 'the central allegation that all Defendants have unlawfully conspired or colluded to sell their drugs in California for prices that are higher than the prices charged in Canada').

"Plaintiffs have also consistently represented that their claim centers on an alleged agreement among Defendants to maintain prices in California that are higher than those charged for the same pharmaceutical products in Canada. In describing their claim at the hearing on Defendants' demurrer to the Second Amended Complaint, Plaintiffs stated: [¶] 'What we've charged here is—and it's very rudimentary and elementary and the defendants have acknowledged it—that each of these defendants that we have named have conspired to charge higher prices in the United States than they do in other countries, including Canada. So the charge is here. They either fix the price **[*111]** here, they either had an agreement to charge higher prices here or they did not.' [¶] Hr'g Tr. . . . dated Apr. 8, 2005 . . . . Plaintiffs have repeatedly characterized their claim in this manner throughout the case. See, e.g., [Third Amended Complaint ¶¶ 5-6; Apr. 8, 2005 Tr. . . . ('In our case, we have said over and over again the agreement is and is [*sic*] specific about this, the agreement is don't charge—you must charge higher than you are charging in Canada. That's the whole point of it.'); June 30, 2005 Tr. . . . . ('The parallel conduct, I would respectfully submit and as we've alleged in the complaint, is obvious. The obvious nature of the parallel conduct is that all these people are charging more in the United States and Canada than they are charging in Canada.')."

But Judge Sabraw and defendants were not alone in operating under the understanding that the conspiracy at issue was the Canadian floor conspiracy. So, too, were plaintiffs themselves. As late as November 13, 2006, a mere 17 days before their oppositions to the merits motions were due, plaintiffs' request for a continuance of the merits motions was in part premised on November 10, 2006 deposition testimony of Bristol **[*112]** Myers Squibb CEO Peter Dolan which, plaintiffs argued, consisted of newly discovered evidence because "[c]ontrary to prior testimony of PMK witnesses and CEOs of Defendants, Mr. Dolan testified that prices and price-setting practices regarding the United States and Canada were discussed at the meetings conduct at PhRMA."[25] Plaintiffs' request made no mention of the CPI theory.

Plaintiffs took a similar position on December 4, 2006, one day before Amgen's merits motion was set to be heard. On that day, just **[*113]** after Judge Sabraw issued his tentative ruling granting summary judgment based on the pass-on defense, plaintiffs filed their unsuccessful request to disqualify him. In it, they explained, "This private antitrust suit is the only case existing in the U.S. challenging the pricing practices of defendants who are the largest industrial companies in the world in terms of net profits. For many years defendants have established a substantial pricing differential between the US, including California and other foreign countries, particularly Canada. These substantial price differentials have not and could not be explained by usual economic standards, but are inflated artificially. . . ." Plaintiffs then went on to quote paragraph 5 of the third amended complaint, which detailed the Canadian floor conspiracy.

Indeed, plaintiffs continued to describe the conspiracy as that involving Canadian prices even *after* the matter was remanded and assigned to Judge Brick. In their September 14, 2010 statement seeking Judge Brick's disqualification, plaintiffs reiterated their claim that the lawsuit was "the only case existing in the U.S. challenging the pricing practices of defendants who are the largest **[*114]** industrial companies in the world in terms of net profits. For many years defendants have established a substantial pricing differential between the U.S. including California and other foreign countries, particularly Canada."

In sum, as plaintiffs themselves repeatedly confirmed, this case was about one conspiracy, and one conspiracy only—the Canadian floor conspiracy. This was the conspiracy pleaded. The CPI conspiracy was not. It could not defeat summary judgment. (See, e.g., *Laabs v. Victorville (2008) 163 Cal.App.4th 1242, 1258, 78 Cal. Rptr. 3d 372*

[25] Plaintiffs had previously sought to reopen Dolan's apex deposition on other grounds. In an August 28, 2006 order denying that request, Judge Sabraw observed, "The Court will presume for this motion that the allegedly collusive and illegal settlement between Bristol Myers Squibb and Apotex is relevant to the claims in this case. The Court notes, however, that the claims in this case concern an alleged multilateral conspiracy among the defendants to not sell drugs in California below the Canada price. The claims in this case do not encompass every potentially unlawful action that any of the defendants may have engaged in for the purpose of obtaining higher prices for their products."

[in opposition to city's motion for summary judgment, plaintiff could not raise theory that city's placement of street lighting constituted dangerous condition, as theory was not mentioned in, or encompassed by, either original or amended complaint]; *Nein v. HostPro, Inc. (2009) 174 Cal.App.4th 833, 851, 95 Cal. Rptr. 3d 34* [plaintiff could not raise issue of oral contract in opposition to motion for summary judgment where operative complaint did not allege that terms of employment relationship were by oral agreement]; *Bosetti v. United States Life Ins. Co. in City of New York (2009) 175 Cal.App.4th 1208, 1225, 96 Cal. Rptr. 3d 744* [plaintiff could not defeat motion for summary judgment by raising **[*115]** at hearing theory of liability not alleged in complaint].)

Like plaintiffs here, plaintiff in *Aguilar* made a similar attempt to change theories late in the game. The Court of Appeal and Supreme Court rejected the attempt, the Supreme Court noting as follows: "In alleging facts for her Cartwright Act cause of action, Aguilar proceeded on a theory, which was legally sound [citation], that the assertedly unlawful conspiracy consisted of an agreement among the petroleum companies as competitors to restrict the output of CARB gasoline and to raise its price, and was unlawful per se without regard to any of its effects. In granting the petroleum companies summary judgment, the superior court did so on that theory. On appeal, Aguilar apparently attempts to introduce an alternative theory, which was also legally sound [citation], that the assertedly unlawful conspiracy consisted of the various exchange agreements entered into by the various petroleum companies, and was unlawful because of its effects. The Court of Appeal rejected any such attempt as too late. To the extent that Aguilar makes the same attempt on review, we reject it for the same reason." (*Aguilar, supra, 25 Cal.4th at p. 866, fn. 35*.) **[*116]** The same applies here.

ii. Defendants Would Be Unduly Prejudiced By An Amendment Asserting The CPI Theory

When questioned by Judge Brick at the hearing on the motions about where in the third amended complaint the CPI theory was alleged, plaintiffs' counsel responded that plaintiffs would ordinarily be permitted leave to amend their complaint up until the close of trial. We construe this, as did Judge Brick, as a suggestion that they should be permitted to amend the third amended complaint to allege the CPI theory. This suggestion is wrong.

Code of Civil Procedure section 473 authorizes the trial court, in its discretion, to allow amendments to pleadings "in furtherance of justice"; *section 576* permits amendment during trial to conform to proof. And, of course, trial courts are to show "great liberality" in permitting amendments. (*Barba v. Superior Court (1966) 239 Cal.App.2d 572, 577, 49 Cal. Rptr. 60*; *Desny v. Wilder (1956) 46 Cal.2d 715, 751, 299 P.2d 257*.) However, where the rights of the adverse party would be prejudiced by the amendment, granting leave to amend constitutes an abuse of discretion. (*Garcia v. Roberts (2009) 173 Cal.App.4th 900, 909, 93 Cal. Rptr. 3d 286*; *Singh v. Southland Stone, U.S.A., Inc.* (2010) 186 CalApp.4th 338, **[*117]** 354-355 [no error in denying leave to amend]; *Melican v. Regents of University of California (2007) 151 Cal.App.4th 168, 175, 59 Cal. Rptr. 3d 672* [same].)

Passing over the glaring fact that plaintiffs never moved for leave to amend to allege the CPI theory,[26] any such amendment would have subjected defendants to extreme prejudice. We cannot state it better than did Judge Brick: plaintiffs' argument that they would have been granted leave to amend up until the close of trial "ignores the procedural posture of this case, including this Court's careful efforts to require a clear statement of Plaintiffs' claims and to manage discovery with respect to those claims for a period of two years. The prejudice to Defendants of starting over now is apparent."

---

[26] Plaintiffs apparently had at least two warnings that there appeared to be a disconnect between the conspiracy alleged in the third amended complaint and the conspiracy argued in their opposition to the merits motions. As Judge Brick explained in his order granting the merits motions: "[O]ne of the court's last orders before the summary judgment motions were originally set to be heard in December 2006 expressly declined to resolve 'whether or in what circumstances **[*118]** Plaintiffs might be required to amend their Complaint if the evidence supports claims that are different from the ones asserts in the Third amended Complaint.' [Citation.] Then, before the February 11 hearings, this Court's tentative ruling asked Plaintiffs to explain where the CPI theory is pleaded." Despite this, plaintiffs never requested leave to amend, electing instead to hang their hats on their insistence that the third amended complaint encompassed the CPI theory.

Three times plaintiffs amended their complaint to clarify the alleged conspiracy at issue, finally succeeding. Following this, plaintiffs engaged in extensive discovery for almost two years. Plaintiffs appeared at almost monthly case management conferences before Judge Sabraw, who managed discovery based on the allegations in the third amended complaint. This included seemingly endless discovery disputes, which resulted in more than 37 formal motions before Judge Sabraw, not to mention countless disputes resolved informally. Defendants responded to voluminous written discovery requests, producing, in defendants' estimation, over one million pages of documents.[27] Deposition discovery included plaintiffs deposing some **[*119]** 60 witnesses, including 19 apex deponents, not to mention the numerous depositions following the motions, including depositions of all but one of the officers and employees who submitted declarations in support of the motions. And none of it pertained to the CPI theory.

Defendants prepared multiple summary judgment motions based on the conspiracy alleged in the third amended complaint. Permitting plaintiffs to change course at this late date, abruptly drop the Canadian floor conspiracy, and start over again with a new conspiracy theory would essentially nullify everything the parties did for two years. Simply put, leave to amend under these circumstances would be unduly prejudicial.[28]

iii. Other Direct Evidence: Testimony of Peter Rost

Facing a failure of their unpleaded CPI theory, plaintiffs contend that they in fact produced other direct evidence, this bearing on the Canadian floor conspiracy.[29] This evidence was the entire, 255-page transcript from the deposition of Peter Rost, a former Wyeth vice president, which plaintiffs claim demonstrates an industry-wide agreement to never cut pharmaceutical drug prices. As plaintiffs describe it: "Dr. Rost spent his life in the pharmaceutical industry and has worked for several pharmaceutical manufacturers. While with Wyeth, he was

---

[27] Again, plaintiffs do not dispute defendants' representation.

[28] It is perhaps the case that any attempt to amend would fail because the proposed claim would be subject to demurrer as being barred by collateral estopped. (*Yee v. MobileHome Park Rental Review Bd. (1998) 62 Cal.App.4th 1409, 1429, 73 Cal. Rptr. 2d 227*; see generally *Foxborough v. Van Atta (1994) 26 Cal.App.4th 217, 230, 31 Cal. Rptr. 2d 525* [proposed amendment barred by statute of limitations and no basis for "relation back"].) Specifically:

In re Brand Name Prescription Drugs Antitrust Litig., supra, 2000 U.S. Dist. LEXIS 1735, 2000 WL 204064 **[*120]** (*In re Brand Name*) was a suit by a nationwide class of retail pharmacies against wholesalers and manufacturers of brand name prescription drugs alleging violations of the Sherman Act, *15 United States Code section 1 et seq.* As described by the district court: "Class Plaintiffs claim that Defendants entered into a conspiracy to deny them discounts and to peg any future price increases to gains in the Consumer Price Index ('CPI')." (*In re Brand Name, supra, 2000 U.S. Dist. LEXIS 1735, [WL] at *1*.) Describing plaintiffs' proposed methodology as "ill-defined and vague" and "neither capable of evaluation nor meaningful analysis" (*2000 U.S. Dist. LEXIS 1735, [WL] at *4*), the district court concluded that plaintiffs presented no evidence that they were injured by the CPI conspiracy or that would support a jury's award of damages to compensate for any injury (*2000 U.S. Dist. LEXIS 1735, [WL] at *5*) and that plaintiffs demonstrated no basis for the entry of an injunction.

Defendants claimed below that the issue litigated in *In re Brand Name* and the CPI theory belatedly asserted by plaintiffs are identical, and that the CPI issue was decided unfavorably to plaintiffs there. At the hearing on the merits motions, defendants represented, and plaintiffs did not dispute—and indeed, at oral **[*121]** argument here conceded—that plaintiffs here were all class members in the *In re Brand Name* case, and that one of the plaintiffs here was also a named plaintiff there. Thus, defendants argue that collateral estoppel would apply. (See *Pacific Lumber Co. v. State Water Resources Control Bd. (2006) 37 Cal.4th 921, 943, 38 Cal. Rptr. 3d 220, 126 P.3d 1040*.) This issue was not fully developed or briefed below, and is not necessary to our decision. We thus do not decide it here.

[29] Defendants contend that plaintiffs have abandoned this theory in favor of the CPI theory. They cite plaintiffs' lead counsel's statement at the hearing on the pass-on motions **[*123]** that "There is an outstanding agreement to fix prices. . . . By the way, it looks like the floor is CPI, not Canada. CPI long left Canada. But now it's CPI." This contention is contrary to plaintiffs' representation at the hearing on the merits motions, as well as in their briefs on appeal, that they are still pursing the Canadian floor conspiracy.

assigned to the Nordic region and in that capacity had pricing authority. When he cut list prices for Wyeth in that region he was immediately confronted by representatives **[*122]** of the pharmaceutical manufacturers. As he testified, first he was contacted by email from the president of the local pharmaceutical manufacturers association, Horken Mondel, and told to 'tone down his marketing efforts.' [Citation.] He was then asked by Mr. Mondel to meet with him over lunch. In this meeting, at a private club, 'he basically asked me to compete less aggressively.' [Citation.] When this was ineffective, the General Manager for AstraZeneca, Steiner Hoeg, contacted Dr. Rost's superior, Rume Bremburg, and 'asked to meet with us privately regarding our marketing and pricing of Lanzo.'" At the meeting, Mr. Hoeg "was very upset that we have started competing on price and that we were applying this strategy. And he told us that we are all going to lose out because of this . . . [¶] . . . [¶] because it was going to hurt the industry in general and . . . basically I had broken ranks with the industry. It is like swearing in church. You are lowering prices? You are a branded company? You don't do that.' "

Plaintiffs submit that Rost's testimony constituted "[d]irect evidence, taken in the context of all of plaintiffs' evidence, requir[ing] a trial and denial of summary judgment."[30] We disagree, as any fair reading of Rost's testimony in context makes clear that the conversations he described involved a Swedish trade association and a Swedish competitor (AztraZeneca) who were pressuring him to modify his aggressive pricing of a single product (Lanzo)—in Sweden, in 2000.

v. Other Direct Evidence: Suppression of Illegal Imports [*124] of Prescription Drugs

Plaintiffs also contend that evidence of defendants' efforts to prevent re-importation of their drugs from Canada satisfied their burden of proof. As they put it in their opening brief: "As the PhRMA documents demonstrate, the industry was concerned about the U.S.-foreign price differentials and the re-importation of drugs because it put downward pressure on the U.S. prices and brought the threat of price controls. One remedy was to curb the supply of drugs to internet pharmacies. The evidence shows that GSK led the way, but they made sure that the other industry members followed suit in order to avoid retaliation against GSK. The evidence further shows that Pfizer followed suit even though the GSK action was not yet public and that most of the defendants met at this time to discuss the re-importation issue and responses to it. Eventually, all but two of the defendant manufactures [*sic*] took action to curb re-importation." This argument is problematic for multiple reasons.

First, in claimed support of this argument, plaintiffs rely on Exhibits 111 and 117. As discussed in section E, above, Judge Brick properly sustained defendants' objections to both exhibits. But **[*125]** even if that evidence were before us, the argument would still fail, because evidence of defendants' attempts to block Canadian imports is not evidence of an agreement to fix prices. At best, such evidence might demonstrate a "plus factor," an issue we need not reach given the absence of evidence of parallel pricing, discussed below.

B. Plaintiffs Failed to Present Indirect Evidence Creating a Triable Issue of Fact Concerning the Existence of the Canadian Floor Conspiracy

Given the absence of *direct* evidence supporting the Canadian floor conspiracy, we lastly turn to whether plaintiffs presented any *indirect* evidence of it. As detailed above, in an antitrust case such as this, circumstantial evidence often takes the form of "conscious parallelism," or "a pattern of uniform business conduct . . . ." (*Eddins, supra, 134 Cal.App.4th at pp. 304-305*.) Although plaintiffs need not establish "exact uniformity of detail . . . more than a general similarity of action is required for a finding of consciously parallel behavior." (*Harlem River Cons. Co-op. v. Associated Groc., supra, 408 F.Supp. 1251, 1277*.)

---

[30] While plaintiffs claim on appeal that Rost's testimony is so significant that it defeats summary judgment, they did not even mention him in their opposition below, nor cite his testimony in their separate statement of facts. This failure alone is reason enough for us to disregard it. (*Code Civ. Proc., § 437c, subd. (b)(3)*.)

The starting point for plaintiffs was a showing that defendants engaged in parallel conduct, **[*126]** or that they consistently priced the pharmaceuticals they sell in the United States higher than those sold in Canada. Despite the extensive discovery on defendants' price setting practices for the 111 "Identified Drugs," plaintiffs failed to produce evidence showing parallel conduct on price-setting. Simply, the record contains no competent evidence that defendants set their prices on their Identified Drugs in the United States higher than the prices for those same drugs in Canada.

Plaintiffs' additional fact no. 3 asserted that "Defendants' drug prices are higher in [the United States] than they are for the same drugs sold in the [Canada]." The claimed supporting evidence was (1) a 2004 Congressional Research Service report concluding that, on average, brand name drugs were priced 70% higher in the United States than in Canada; and (2) a 1992 General Accounting Office report entitled "Prescription Drugs: Companies Typically Charge More in the United States Than in Canada." Neither is availing.

As to the Congressional Research Service Report—Exhibit 7 to the Alioto declaration—Judge Brick sustained defendants' objection on hearsay grounds. Plaintiffs do not challenge that ruling, and **[*127]** the report is not before us.

As to the General Accounting Office report—Exhibit 4 to the Alioto declaration—not only does it predate the filing of this lawsuit by 12 years, but it does not constitute competent evidence that defendants priced their drugs higher in the United States than in Canada. The study was based on pharmaceutical prices as of May 1, 1991, a time frame hardly relevant to a lawsuit filed in August 2004. And it was based on 121 pharmaceuticals, only an estimated 33 of which appear, as best as we can determine, to have been manufactured by defendants. Those drugs do not represent all defendants, and some of the studied drugs were less expensive in the United States than in Canada.

To be sure, plaintiffs submitted voluminous opposition to the merits motions—over 2,000 pages in 77 separate exhibits attached to the Alioto declaration. Defendants lodged 45 objections to plaintiffs' evidence, and Judge Brick sustained 32 of them, rendering a significant portion of plaintiffs' evidence inadmissible.[31] Still, they were left with numerous exhibits, comprising hundreds of pages. But nothing in this evidence demonstrated that the prices on defendants' Canadian pharmaceuticals **[*128]** were consistently below the prices on their American counterparts.

In light of plaintiffs' failure to introduce either direct evidence concerning the Canadian floor theory or evidence of parallel pricing, they failed to satisfy their burden of producing evidence showing the alleged conspiracy was more likely than not. Plaintiffs demonstrated no triable issue of material fact, and their antitrust case was properly disposed of by summary judgment. (See *Aguilar, supra, 25 Cal.4th 826*; *Filco v. Amana Refrigeration, Inc. (9th cir. 1983) 709 F.2d 1257, 1266-1267* [affirming summary judgment for defendants where plaintiffs failed to provide evidence that defendants priced at a fixed level; no evidence of parallel conduct]; *Zoslaw v. MCA Distributing Corp. (9th Cir. 1982) 693 F.2d 870, 884* [finding of parallel conduct lacking where evidence demonstrated significant variation in defendants' practices and pricing].)[32]

DISPOSITION

The judgment **[*129]** for defendants is affirmed.

Richman, J.

We concur:

Kline, P.J.

---

[31] As discussed *ante,* plaintiffs challenge Judge Brick's evidentiary rulings only as to three specific exhibits—1, 111, 117—a challenge we concluded was without merit.

[32] We need not consider whether Amgen, PhRMA, and JJHCS were entitled to separate summary judgments.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN1[] **Prerequisites for Class Action, Adequacy of Representation**

Fed. R. Civ. P. 23(a) of sets out four prerequisites for a class action. The *Rule 23(a)* requirements are known as numerosity, commonality, typicality, and adequacy. Subsection (b) provides additional requirements for each type of class action. To obtain certification under *Rule 23(b)(3)*, the moving party must show that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. *Fed. R. Civ. P. 23(b)(3)*. These requirements are known, respectively, as predominance and superiority.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN2[] **Class Actions, Certification of Classes**

The United States Court of Appeals for the Third Circuit has emphasized that a district court must conduct a rigorous analysis in deciding whether to certify a class. The decision to certify a class calls for findings by the court, not merely a threshold showing by a party, that each requirement of *Fed. R. Civ. P. 23* is met. Factual determinations supporting *Rule 23* findings must be made by a preponderance of the evidence. Moreover, the court must resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits—including disputes touching on elements of the cause of action. However, there is no "claims" or "merits" litmus test incorporated into the predominance inquiry beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof. A district court may inquire into the merits of the claims presented in order to determine whether the requirements of *Rule 23* are met, but not in order to determine whether the individual elements of each claim are satisfied.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN3[] **Class Actions, Certification of Classes**

On a class certification analysis, the court's obligation to consider all relevant evidence and arguments extends to expert testimony, whether offered by a party seeking class certification or by a party opposing it. The court must examine critically expert testimony on both sides and may be persuaded by either side as to whether a certification requirement has been met. Performing a rigorous analysis may require the district court to weigh conflicting expert testimony at the certification stage and determine whether an expert's opinion is persuasive or unpersuasive.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN4[] **Prerequisites for Class Action, Numerosity**

Fed. R. Civ. P. 23(a)(1) requires that the class be so numerous that joinder of all members is impracticable. Satisfaction of this standard does not require evidence of the exact number or identification of the members of the proposed class. Generally, if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the numerosity requirement of *Rule 23(a)* has been met.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN5[] **Prerequisites for Class Action, Commonality**

To satisfy *Fed. R. Civ. P. 23(a)(2)*, there must be questions of law or fact common to the class. Satisfaction of the commonality requirement requires that plaintiffs demonstrate that their claims depend upon a common contention, the resolution of which will resolve an issue that is central to the validity of each one of the claims in one stroke. Commonality does not require an identity of claims or facts among class members; instead, the commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN6[] Prerequisites for Class Action, Commonality

Courts interpreting the commonality requirement for a class action in the antitrust area have held that allegations concerning the existence, scope and efficacy of an alleged conspiracy present questions adequately common to class members to satisfy the commonality requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN7[] Prerequisites for Class Action, Typicality

Fed. R. Civ. P. 23(a)(3) requires that the claims or defenses of the representative parties are typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. To conduct the typicality inquiry, the court must examine whether the named plaintiffs' claims are typical, in common-sense terms, of the class, thus suggesting that the incentives of the plaintiffs are aligned with those of the class. The typicality requirement is intended to preclude certification of those cases where the legal theories of the named plaintiffs potentially conflict with those of the absentees. If a plaintiff's claim arises from the same event, practice or course of conduct that gives rise to the claims of the class members, factual differences will not render that claim atypical if it is based on the same legal theory as the claims of the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN8[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(a)(4) requires plaintiffs to show that the representative parties will fairly and adequately protect the interests of the class. Whether adequacy has been satisfied depends on two factors: (a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class. The second factor seeks to uncover conflicts of interest between named parties and the class they seek to represent.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN9[] Prerequisites for Class Action, Predominance

To obtain class certification under *Fed. R. Civ. P. 23(b)(3)*, plaintiffs must also demonstrate predominance and superiority by a preponderance of the evidence.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN10[] Prerequisites for Class Action, Predominance

Fed. R. Civ. P. 23(b)(3) requires that the questions of law or fact common to class members predominate over any questions affecting only individual members. Predominance tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. It is a test readily met in certain cases alleging consumer or securities fraud or violations of the antitrust laws, but a court may not relax its certification analysis as to each element of *Rule 23*.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN11[] **Antitrust & Trade Law, Sherman Act**

Class certification is only appropriate in antitrust cases where plaintiffs can show, by a preponderance of the evidence, that proof of the essential elements of the cause of action, including antitrust injury, do not require individual treatment A key question in a litigation class action is manageability—how the case will or can be tried, and whether there are questions of fact or law that are capable of common proof. Thus, to obtain certification, antitrust plaintiffs must establish by a preponderance of the evidence that common proof will predominate at trial with respect to each of the essential elements of their antitrust claim: (1) that defendants violated *15 U.S.C.S. § 1* of the Sherman Act, (2) the fact of damages arising from the unlawful activity (antitrust impact), and (3) the amount of damages sustained because of the unlawful activity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN12[] **Cartels & Horizontal Restraints, Price Fixing**

In horizontal price-fixing cases, courts routinely hold that common proof predominates in determining whether an unlawful conspiracy existed.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN13[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Antitrust impact is the fact of damage resulting from a violation of the antitrust laws. In antitrust cases, impact often is critically important for the purpose of evaluating *Fed. R. Civ. P. 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof. Plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so. Instead, at the certification stage, plaintiffs must show that their theory of impact is plausible in theory and susceptible to proof at trial through available evidence common to the class.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN14[] Sherman Act, Scope

A theory of impact that is plausible in theory and susceptible to proof through common evidence is sufficient to meet the predominance requirement at the class-certification stage.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN15[] Cartels & Horizontal Restraints, Price Fixing

Under certain circumstances, a court considering a class certification motion in a horizontal price-fixing case may presume antitrust impact. Specifically, if a nationwide conspiracy is proven, the result of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage. Courts often apply this presumption in horizontal price-fixing cases.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN16[] Sherman Act, Scope

A court must rigorously analyze the evidence to determine whether Bogosian applies to a particular case. Moreover, Bogosian alone does not suffice to satisfy the predominance requirement; plaintiffs must present additional evidence that they can prove impact using common proof.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN17[] Sherman Act, Scope

Courts have applied Bogosian even in cases involving multiple varieties of products.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN18[] **Sherman Act, Scope**

Many courts have accepted market-structure analyses in finding predominance with respect to antitrust impact. However, before accepting such an analysis, the court must be persuaded that the market-structure factors identified by the plaintiffs' expert do, in fact, exist.

Antitrust & Trade Law > Sherman Act > Defenses

HN19[] **Sherman Act, Defenses**

The decision of some purchasers to switch from one seller to another when faced with enormous price increases does not establish elastic demand for the higher cost seller. Even where demand is highly inelastic, customers will eventually stop purchasing a product if there is a sufficiently large price increase.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN20[] **Sherman Act, Scope**

A barrier to market entry need not prevent competitors from ever entering the market.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN21[] **Sherman Act, Scope**

Clearly, the fact that prices rise does not, in and of itself, demonstrate antitrust impact— at trial, plaintiffs will need to show that they experienced price increases that resulted from anticompetitive conduct. However, a showing that prices behaved similarly across groups of customers contributes to a finding of predominance at the class certification stage.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN22[] **Sherman Act, Scope**

In an antitrust case, variation in the prices paid by individual customers does not preclude a finding of predominance. However, plaintiffs must be able to account for such variation using common proof.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN23[] **Sherman Act, Scope**

Mergers frequently produce pro-competitive efficiencies that outweigh their anti-competitive harm, and courts routinely weigh these countervailing effects as an integral component of merger analysis. It is far less plausible, on the other hand, that a price-fixing conspiracy would have offsetting benefits to consumers. Some categories of restraints, such as horizontal price-fixing , because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN24[] **Class Actions, Certification of Classes**

At the class certification stage, plaintiffs must establish by a preponderance of the evidence that they will be able to measure damages on a class-wide basis using common proof. The court must address only whether plaintiffs have provided a method to measure and quantify damages on a class-wide basis. The court must find that the model could evolve to become admissible evidence, but the model need not be perfect.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN25[] **Sherman Act, Scope**

Even at the merits stage of an antitrust class action, plaintiffs need not measure damages with complete certainty, because courts recognize the inherent difficulty of identifying a "but-for world." At the merits stage, plaintiffs must demonstrate damages only as a matter of just and reasonable inference.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] **Class Actions, Certification of Classes**

At the class certification stage, courts are precluded from addressing any merits inquiry unnecessary to making a *Fed. R. Civ. P. 23* determination. This is consistent with Hydrogen Peroxide's interpretation of Eisen as precluding a merits inquiry that is not necessary to determine a *Rule 23* requirement.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN27[] **Sherman Act, Claims**

The benchmark methodology is widely accepted for calculating overcharges in antitrust cases. Estimating but-for prices is particularly difficult where the defendants' duopoly was created only a short time before they allegedly conspired to fix prices. Market consolidation tends to increase prices, even in the absence of coordinated conduct.

Evidence > Weight & Sufficiency

HN28[] **Evidence, Weight & Sufficiency**

It is important not to let a quest for perfect evidence become the enemy of good evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN29[] **Class Actions, Certification of Classes**

A district court has limited authority to examine the merits when conducting a class certification inquiry; the ability of the named plaintiff to succeed on his or her individual claims has never been a prerequisite to certification of the class.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN30[] **Sherman Act, Claims**

To succeed at the merits stage of a horizontal price-fixing claim, the yardstick business or product must be as nearly identical to the plaintiff's as possible. Exact correlation is not necessary, however; the products need only be fair congeners. Few cases discuss the showing of similarity that is required at the class certification stage, but courts have rejected proposed yardsticks on certification where the party proffering them failed to perform a substantive analysis of the products' similarity.

Antitrust & Trade Law > Sherman Act > Claims

HN31[] **Sherman Act, Claims**

To avoid the four-year statute of limitations on civil antitrust actions under *15 U.S.C.S. § 15b*, plaintiffs must show (1) fraudulent concealment; (2) failure on the part of the plaintiff to discover his cause of action notwithstanding such concealment; and (3) that such failure to discover occurred notwithstanding the exercise of due care on the part of the plaintiff.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Defenses

HN32[] **Sherman Act, Claims**

An antitrust action implicating fraudulent concealment raises some individual issues, including whether an individual plaintiff knew of the alleged violation and whether he exercised due diligence. However, the United States Court of Appeals for the Third Circuit has held that, in general, it is the fact of concealment that is the polestar in an analysis of fraudulent concealment. The weight of authority is in accord with that holding. Nonetheless, there is no per se rule that individual issues regarding fraudulent concealment can never defeat a finding of predominance. If a case presented particularly complex or important individual issues, it might be appropriate to deny class certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN33[] **Prerequisites for Class Action, Superiority**

With respect to superiority, *Fed. R. Civ. P. 23(b)(3)* requires that a class action be superior to other available methods for the fair and efficient adjudication of the controversy. To determine whether the requirement is satisfied, a court must balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication. Similar to the predominance requirement, the requirement of superiority ensures that resolution by class action will achieve economies of time, effort, and expense, and promote uniformity of decision without sacrificing procedural fairness or bringing about other undesirable results.

Opinion by: JAN E. DUBOIS

Opinion

[*226] MEMORANDUM

TABLE OF CONTENTS

I. INTRODUCTION

In these consolidated antitrust actions, plaintiffs allege that the two leading producers of blood reagents—Immucor, Inc. ("Immucor") and Ortho Clinical Diagnostics, Inc. ("Ortho")— conspired to unreasonably **[**2]** restrain trade and commerce in violation of § 1 of the Sherman Antitrust Act, *15 U.S.C. § 1*. Presently before the Court is Plaintiffs' Motion for Class Certification. On July 26, 2012, the Court received evidence, including **[*227]** testimony from Ortho's economic expert, and held oral argument on the motion. Plaintiffs' economic expert provided rebuttal testimony on August 6, 2012. [1] For the reasons set forth below, Plaintiffs' Motion for Class Certification is granted.

II. BACKGROUND

Between 2000 and 2009, defendants drastically increased the prices of their blood reagent products. Many products' prices rose by more than 2000% during that period. (See Beyer Report, Pls.' Mot. Ex. 1, at 13, 14.) The parties agree that some part of this increase resulted from the creation of a duopoly in the blood reagents industry in 1999 as a result of the acquisition of numerous manufacturers of blood reagents by defendants over a period of several years. However, plaintiffs allege that an unlawful **[**3]** horizontal price-fixing agreement that began in November 2000 accounts for much of the increase. Ortho argues primarily that even if there were such an agreement, the class should not be certified because plaintiffs have failed to offer a reliable methodology to distinguish between lawful and unlawful price increases.

A. Background on Blood Reagents

[1] There were no objections to the documentary evidence received, and no Daubert motions were filed. Reliability objections to the testimony of plaintiff's economic expert are addressed and rejected in this Memorandum.

Blood reagents are used to identify properties of human blood. Most large purchasers of blood reagents are blood donor centers and hospitals, which use them to test whether the blood of a potential donor is compatible with the blood of a potential recipient. (See Report of Teresa Harris ("Harris Report"), Pls.' Mot. Ex. 2, at 3.) Under applicable FDA regulations, Blood Bank and Transfusion Standards promulgated by the American Association of Blood Banks ("AABB"), and other rules, a blood donor center must test a donor's ABO group and Rh type and perform an antibody screen each time he or she donates. (Id. at 9.) A hospital must conduct similar tests on a recipient before providing a blood transfusion. (Id.)

There are two basic categories of blood reagents: traditional and automated. Although both Ortho and Immucor sold products in both categories **[**4]** throughout the class period, the putative class in this case includes only purchasers of traditional blood reagents ("TBR"). When using TBR, laboratory technicians test blood manually in test tubes and interpret the results. (Id. at 6.) "Automated" or "proprietary" blood reagents ("ABR"), on the other hand, are often used with specialized equipment. (Id.) They allow quicker testing while requiring less skill and decreasing the risk of technician error. (See, e.g., Pls.' Mot. Ex. 22, at 13 (citing the benefits of ABR as "[s]ignificant labor reduction," "[i]ncreased productivity/efficiency," and "[i]ncreased patient safety").) ABR tend to be more expensive than TBR. (See, e.g., Weiss Decl., Pls.' Reply Ex. 149, ¶ 14.) The parties dispute the extent to which defendants' customers were able to use TBR and ABR interchangeably.

During the class period, Ortho and Immucor each sold more than forty different TBR products. (See, e.g., Harris Report Ex. C.) A list provided by plaintiffs' industry expert, Teresa Harris, shows that most Ortho TBR products had an equivalent Immucor TBR product, and vice versa. (See id.; see also, e.g., Poynter Decl. ¶ 29.) Ms. Harris testified in her deposition that **[**5]** a few of the products that she paired in the list are not identical. (See Harris Dep., Def.'s Opp. Ex. B, at 64-65, 143-44.) However, she opines that those nonidentical pairs "perform exactly the same function." (Harris Reply Report, Pls.' Reply Ex. B, at ¶ 3.)

The blood-reagents market features significant barriers to entry. Most importantly, a prospective entrant must obtain FDA approval before beginning to market and sell blood reagents. This process takes several years. (See, e.g., Pls.' Mot. Ex. 9, at 4 (2003 interview in which Immucor CEO Edward Gallup stated, "[T]he FDA is very often our friend . . . . [S]ix years is a long time—but, even if it were half that, it's still a huge barrier to entry."); Pls.' Mot. Ex. 62, at 1 (Immucor strategy document stating that "[t]here are high barriers to entry. To enter **[*228]** the market, a company must meet FDA Regulations, which takes approximately five to six years to gain approval.").) Toward the end of the class period, in or around 2008, two new TBR producers entered the market. (See, e.g., Def.'s Opp. 18-19.)

B. Creation of Duopoly by Ortho and Immucor

In the 1980s and 1990s, the TBR market was highly competitive, with more than a dozen competitors. **[**6]** (Pls.' Mot. Ex. 9, at 2.) During that period, there was intense price competition, (see, e.g., id.; Pls.' Mot. Ex. 10, at 1), and TBR prices and profitability were low, (see, e.g., Pls.' Mot. Ex. 5, at 4 (showing Immucor's gross profits declining steadily between 1995 and 2000)). As a result, Immucor approached bankruptcy, (see, e.g., Pls.' Mot. Ex. 7), and Ortho considered exiting the TBR industry, (see, e.g., Pls.' Mot. Ex. 12, at 12), in those years.

In the 1990s, Immucor began to acquire competing TBR producers. (See, e.g., Pls.' Mot. Ex. 9, at 3; Pls.' Mot. Ex. 19, at 1.) After Immucor acquired Gamma Biological in 1998 and the Biological Corporation of America in 1999, Immucor and Ortho had a duopoly in the United States TBR market. (See, e.g., Pls.' Mot. Ex. 10, at 1; Pls.' Mot. Exs. 22-24.) Defendants anticipated that this market consolidation would allow them to raise prices and increase their profitability. (See, e.g., Pls.' Mot. Ex. 19 (statement of Immucor CEO that "by buying up its competition and consolidating the marketplace into two key players, Immucor can raise its prices"); cf. Pls.' Mot. Ex. 21.) Immucor's market share in North America was slightly larger than Ortho's **[**7]** throughout the class period. (See, e.g., Pls.' Mot. Exs. 22-24 (showing Immucor with a market share of approximately 55% and Ortho with a market share of approximately 45% in 1999 and 2007).)

C. Post-Duopoly Price Increases

1. Operation Create Value

Shortly after Ortho and Immucor created their duopoly, Ortho developed a pricing strategy it called "Operation Create Value" ("OCV"). (See, e.g., Pls.' Mot. Ex. 43, at 1.) Ortho began work on OCV at least as early as October 1999. (Id.) With the assistance of a consulting firm, Ortho decided to increase the prices it charged all TBR customers by 25% in 2000 and by an additional 25% in 2001. (Pls.' Mot. Ex. 45, at 1; see also Pls.' Mot. Ex. 47, at 13.) Ortho anticipated that it would impose additional "increases yearly thereafter until profitability achieved." (Pls.' Mot. Ex. 45, at 1; see also Pls.' Mot. Ex. 54, at 10 (describing OCV as consisting of "5+ years of annual 25% price increases").) In developing the strategy, Ortho focused heavily on whether Immucor would follow its price increases and, if so, when the Immucor price increases would take place. (See, e.g., **[**8]** Pls.' Mot. Ex. 47, at 20-22, 39.) Ortho rejected larger proposed price increases—as large as 100% per year—because of the risk of customer loss. (See, e.g., Def.'s Opp. Ex. 46.)

Ortho implemented the first 25% price increase under OCV in April 2000. (Pls.' Mot. Ex. 49, at 1; Pls.' Reply Ex. 156.) Many customers did not actually experience a price increase at that time, however, because Ortho could not increase customers' prices until their existing contracts expired. (See Beyer Reply Report, Pls.' Reply Ex. A, at ¶ 73; 7/26/12 Hr'g Tr. 97; Poynter Decl., Pls.' Reply Ex. 150, at ¶ 31.) As a result, Ortho's average TBR prices increased by less than 25% in 2000. (See, e.g., 7/26/12 Hr'g Tr. 188-91 (testimony of Dr. Bronsteen that average prices of particular TBR products increased by about 10% between 1999 and 2000).)

Immucor implemented similar price increases around the same time. For example, in an October 2000 email, Immucor's CEO, Edward Gallup, told a shareholder that Immucor had begun to increase customers' prices in June 2000 as their existing contracts ended. (Pls.' Mot. Ex. 50, at 1; see also Poynter Decl. ¶ 4 (stating that "Immucor implemented an approximately 20% price increase **[**9]** on traditional blood reagents in June 2000").) Gallup wrote that it was Immucor's goal "to affect [sic] a 10-20% price increase over the next 12 months to all domestic customers." (Id.; see also Pls.' Mot. Exs. 51-52; Poynter Decl. ¶ 5 ("Immucor wanted to target 20% price increases on blood reagents over the next 12 months.").) Gallup further explained, "While there is always **[*229]** some risk of losing customers, early indications are that our only competitor in the U.S. (Ortho Clinical Diagnostics division of [Johnson & Johnson]) is doing the same." (Pls.' Mot. Ex. 50, at 1-2.)

2. Blood Bank Leadership Program

In the fall of 2000, Ortho considered a different, more aggressive pricing strategy that came to be known as the Blood Bank Leadership Program ("BBLP"). An internal Ortho document dated September 15, 2000, enumerated three options: (1) "stay the course" by continuing the 25% annual price increases planned under OCV, (2) exit the TBR market altogether, or (3) enact the BBLP. (Pls.' Mot. Ex. 54, at 2.) Ortho hoped that the larger price increases under the BBLP would increase gross profit margins on all of its TBR products to at least 40%. (Id. at 4.) In considering whether to implement **[**10]** the BBLP, as with OCV, Ortho focused on the risk that Immucor might not "follow aggressively." (Id. at 11.) As early as October 30, 2000, Ortho developed price lists under the BBLP and prepared to inform its customers of the price increases. [2] (Pls.' Mot. Ex. 56.) The BBLP price increases varied by

---

[2] As detailed in Section II.D, infra, plaintiffs presented evidence that Ortho did not charge the BBLP prices to any customer until after it allegedly engaged in unlawful price-related conversations with Immucor. At the class certification hearing, the parties disputed the probative value of a slide contained in an October 30, 2000, Ortho presentation regarding the BBLP. The slide is labeled "Communication with Customers," and it lists the names of seven major customers alongside dates ranging from September 27, 2000, to October 20, 2000. (Pls.' Mot. Ex. 56, at 5.) The record contains no evidence regarding the nature of any communications between Ortho and those customers. Ortho contends that the slide establishes that it had already **[**11]** implemented the BBLP prior to the alleged price-fixing conspiracy, which plaintiffs contend began in November 2000. Plaintiffs argue that, even if Ortho engaged in some kind of discussion with select customers in September and October of 2000, Ortho did not finalize the BBLP until after its allegedly unlawful communications with Immucor. On the present state of the

TBR product but resulted in an overall increase of 200 to 300 percent in TBR prices between 2000 and 2002. (Pls.' Mot. Ex. 11, at 3; see also Pls.' Mot. Ex. 56.)

D. The Alleged Price-Fixing Conspiracy

Plaintiffs allege that defendants began to engage in unlawful pricing-related communications at an annual meeting of the American Association of Blood Banks ("AABB"). The meeting took place in Washington, D.C., between November 4, 2000, and November 8, 2000, and Ortho and Immucor executives were in attendance. (See, e.g., Pls.' Mot. Ex. 59, at 1.)

At the AABB meeting, Immucor executives watched a presentation in which Ortho announced the BBLP price increases. [3] (See, e.g., Thorne Dep., Pls.' Mot. Ex. 60, at 206; DeMezzo Dep., Pls.' Mot. Ex. 153, at 88.) Ortho's president, Catherine Burzik, also stopped by the Immucor booth and introduced herself **[**12]** to Mike Poynter, an Immucor executive. (Poynter Decl. ¶ 7.) She asked Poynter to "pass [her business card] along to Ed Gallup, [Immucor's CEO,] because she wanted to speak with him." (Id.) "Ms. Burzik told [Poynter] that she had recently joined Ortho, that Ortho's margins on traditional blood reagents were terrible, and that she wanted to understand the margin situation regarding traditional blood reagents. She also asked if [Poynter] had seen Ortho's presentation and invited [him] to come to the Ortho booth to see it." (Id.)

In mid-November 2000, shortly after the AABB meeting, Gallup, Immucor's CEO, asked Judy Thorne, Immucor's Director of Marketing, to meet with an Ortho employee to "find **[**13]** out a range of where Ortho may be considering putting the pricing." (Thorne Dep. 206.) Shortly after Gallup made that request, Thorne had lunch with David Gendusa, **[*230]** a Regional Vice President for Ortho. (Id. at 206, 208.) At the lunch meeting, Gendusa "showed [Thorne] the range that [Ortho was] considering" for about twenty-five TBR products but did not give her a copy of the price list. (Id.) Thorne wrote down the prices for several categories of products, returned to the office, and gave the information to Gallup. (Id. at 207-09.) Gallup instructed Thorne to "expense the lunch as if he was the person [she] had lunch with," presumably to conceal her communications with Gendusa. (Cangiamilla Dep., Pls.' Reply Ex. 152, at 45-46.)

Immucor changed its pricing strategy drastically after learning of Ortho's plans. On November 17, 2000, Immucor's Vice-President of Sales sent an email stating, "We are going to increase prices around the first of the year so look out. We are going to piss off a lot of people, but Ortho is going to do the same!!! So maybe we will start getting profitable!" (Pls.' Mot. Ex. 64, at 1.) Ortho sent its customers a letter with the BBLP price list on November 21, 2000. **[**14]** (Def.'s Opp. Ex. 27, at ORTHOCD-0834002.) Immucor received a copy of the price list from a customer on December 1, 2000. (Def.'s Opp. Ex. 39.) In 2001 and 2002, Immucor raised prices on its TBR products by between 247% and 400%. (See, e.g., Pls.' Mot. Ex. 62, at 1.) Ortho raised prices on its TBR products by between 200% and 300% during the same period. (See, e.g., Pls.' Mot. Ex. 11, at 3, 5.) The price increases became effective for different customers at different times, depending on when their existing contracts expired. (See, e.g., Def.'s Opp. 27-28, 30-31.)

E. 2005 Price Increases

Plaintiffs allege that the November 2000 communications initiated a lengthy conspiracy through which defendants colluded to impose substantial price increases throughout the class period. While prices rose somewhat between 2002 and 2004, (see, e.g., Beyer Report figs.1-4), the next "major price increase initiative[]" was implemented in 2005, (id. ¶ 29).

---

record, the Court finds that the slide does not establish that Ortho implemented the BBLP before the AABB meeting, which began on November 4, 2000.

[3] At the class certification hearing, Ortho provided the Court with the Supplemental Declarations of Mike Poynter and Bill Weiss, two Immucor executives. In those declarations, Poynter and Weiss aver that they do not "remember anything being said during [Ortho's] presentation about a 2001 price increases or anything about Ortho's future pricing plans." (Supp. Poynter Decl. ¶ 8; see also Supp. Weiss Decl. ¶ 5.) However, other Immucor employees who attended the AABB meeting testified to the contrary.

Both firms increased the prices of their TBR products significantly in 2005. (See, e.g., Pls.' Mot. Ex. 67 (12/20/04 email from Immucor sales representative stating that "Blood Bank reagents went up approximately 300% in 2001 and now they are rising another **[**15]** 125%"); Pls.' Mot. Ex. 88 (4/12/06 internal Ortho email referring to Ortho's 125% price increase in 2005 and "the fact that Immucor also followed"); Beyer Report tbl.7 (showing that the 2005 increase raised the prices of Immucor's top ten TBR products by 115% to 316%).) Plaintiffs have presented evidence that each defendant was confident that the other would not deviate from this strategy. (See, e.g., Pls.' Mot. Ex. 91.)

Plaintiffs also note that both defendants cancelled contracts with important group purchasing organizations ("GPOs") in order to implement the price increase. (See, e.g., Pls.' Mot. Ex. 94, at 2.) According to plaintiffs, the GPOs comprised a large share of sales for Immucor and Ortho, which would have made those cancellations highly risky absent collusion. (Pls.' Mot. 21-22; Beyer Report ¶ 36.) The cancellations were nearly simultaneous: for example, both Ortho and Immucor decided to terminate their contracts with one GPO, Premier, during the fall of 2004. (Pls.' Mot. Ex. 94, at 2.) The cancellations of the Premier contract by Ortho and Immucor became effective on December 31, 2004, and January 26, 2004, respectively. (Pls.' Mot. Ex. 96.) Both defendants also cancelled **[**16]** their contracts with another GPO, Novation, around the same time. (Id.)

With its 2005 price increases, Immucor introduced two new TBR pricing programs. First, in October 2004, Immucor informed its remaining GPO customers that they could obtain "price protection," freezing their TBR prices at 2004 levels for five years, if they purchased Immucor's ABR instrument. (Def.'s Opp. Ex. 70.) Second, Immucor introduced a "Customer Loyalty Program" that separated customers into three pricing tiers depending on their "commitment" to purchasing Immucor's TBR. (See Def.'s Opp. Ex. 71.) Customers that promised to purchase 90% of their TBR from Immucor received "Level II" prices. (Id.) Customers that promised to purchase 70% of their TBR from Immucor received "Level I" prices. (Id.) Customers that did not make such a commitment received "Base" prices. (Id.) In **[*231]** 2005, Base, Level I, and Level II prices increased by 95%, 70%, and 58%, respectively. (Def.'s Opp. Ex. 72.)

F. 2008 Price Increases

In March 2008, Ortho implemented a final significant price increase, raising TBR prices by an average of 100%. (Def.'s Opp. Ex. 80, at 2.) Ortho notified customers of the increase in December 2007 and January 2008. **[**17]** (Def.'s Opp. Ex. 81, at 7.) In July 2008, Immucor implemented its own price increase. Having reconfigured its pricing tiers since 2004, Immucor increased prices by 20% for customers in its "Automation" tier and by 50% for customers in its "Base" tier. (Def.'s Opp. Ex. 99.) The price increase did not apply to GPOs. (Id.)

G. Procedural History

Plaintiffs began to file civil lawsuits against Ortho and Immucor in 2009, shortly after the Antitrust Division of the Department of Justice opened a criminal grand jury investigation into blood reagents pricing. By Orders dated August 17, 2009, and August 19, 2009, the Judicial Panel on Multidistrict Litigation transferred twenty-three of those cases to this Court for coordinated pretrial proceedings pursuant to *28 U.S.C. § 1407*. Another ten cases were originally filed in this Court. By Order dated December 23, 2009, this Court consolidated these thirty-three cases pursuant to *Federal Rule of Civil Procedure 42(a)*.

Plaintiffs filed a Consolidated Amended Class Action Complaint on February 15, 2010. On August 23, 2010, the Court denied Ortho and Immucor's motion to dismiss the Amended Class Action Complaint. [4] See *In re Blood Reagents Antitrust Litig., 756 F. Supp. 2d 623 (E.D. Pa. 2010)*. **[**18]** The Court denied their motion for reconsideration of that ruling on December 14, 2010. See *In re Blood Reagents Antitrust Litig., 756 F. Supp. 2d 637 (E.D. Pa. 2010)*.

---

[4] The Court dismissed plaintiffs' claims against Ortho's parent company, Johnson & Johnson Health Care Systems. See *In re Blood Reagents Antitrust Litig., 756 F. Supp. 2d 623, 633 (E.D. Pa. 2010)*.

On March 5, 2012, the Court granted preliminary approval of a proposed settlement between Immucor and plaintiffs. Plaintiffs filed a motion for final approval of the settlement on May 23, 2012, and a fairness hearing was held on June 15, 2012. Although the Court has not yet ruled on the motion for final approval of the Immucor settlement, the response and surreply to Plaintiffs' Motion for Class Certification were filed in Ortho's name only.

The Court held a hearing on Plaintiffs' Motion for Class Certification on July 26, 2012. Counsel for plaintiffs and for Ortho presented argument at the hearing. Ortho's economic expert, Dr. Peter Bronsteen, testified, and plaintiffs' counsel cross-examined him. Plaintiffs' economic expert, Dr. John C. Beyer, was unable to attend the July 26, 2012, hearing due to health issues. However, plaintiffs **[**19]** presented Dr. Beyer's rebuttal testimony to the Court by video, which was recorded on August 6, 2012. Counsel for Ortho also cross-examined Dr. Beyer during the August 6, 2012, proceedings.

III. LEGAL STANDARD

HN1[] *Subsection (a) of Federal Rule of Civil Procedure 23* sets out four prerequisites for a class action. The *Rule 23(a)* requirements are known as numerosity, commonality, typicality, and adequacy. *Subsection (b)* provides additional requirements for each type of class action. To obtain certification under *Rule 23(b)(3)*, as plaintiffs seek to do in this case, the moving party must show "that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. These requirements are known, respectively, as predominance and superiority.

HN2[] The Third Circuit recently emphasized that a district court must conduct a "rigorous analysis" in deciding whether to certify a class. See, e.g., *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 306 (3d Cir. 2008)*. "[T]he decision to certify a class calls **[**20]** for findings by the court, not **[*232]** merely a 'threshold showing' by a party, that each requirement of *Rule 23* is met." *Id. at 307*. "Factual determinations supporting *Rule 23* findings must be made by a preponderance of the evidence." Id.

Moreover, "the court must resolve all factual or legal disputes relevant to class certification, even if they overlap with the merits—including disputes touching on elements of the cause of action." *Id. at 307*. However, "there is no 'claims' or 'merits' litmus test incorporated into the predominance inquiry beyond what is necessary to determine preliminarily whether certain elements will necessitate individual or common proof." *Sullivan v. DB Invs., Inc., 667 F.3d 273, 305 (3d Cir. 2011)*. "[A] district court may inquire into the merits of the claims presented in order to determine whether the requirements of *Rule 23* are met, but not in order to determine whether the individual elements of each claim are satisfied." Id.

"Finally, ***HN3***[] the court's obligation to consider all relevant evidence and arguments extends to expert testimony, whether offered by a party seeking class certification or by a party opposing it." *Hydrogen Peroxide, 552 F.3d at 307*. "The court must **[**21]** . . . examine critically expert testimony on both sides and may be persuaded by either side as to whether a certification requirement has been met." *Behrend v. Comcast Corp., 655 F.3d 182, 190 (3d Cir. 2011)*. [5] "Performing a rigorous analysis may require the district court to weigh conflicting expert testimony at the certification stage and determine whether an expert's opinion is persuasive or unpersuasive." *Behrend v. Comcast Corp., 264 F.R.D. 150, 155 (E.D. Pa. 2010)* (citing *Hydrogen Peroxide, 552 F.3d at 323-24*).

IV. DISCUSSION

Ortho does not dispute that the *Rule 23(a)* requirements and the *Rule 23(b)(3)* superiority requirement are satisfied in this case. The Court thus addresses those issues only briefly and focuses its analysis on the *Rule 23(b)(3)*

---

[5] The Supreme Court granted certiorari in Behrend on June 25, 2012. See ***133 S. Ct. 24, 183 L. Ed. 2d 673, 2012 U.S. LEXIS 4754, 80 U.S.L.W. 3707 (U.S. June 25, 2012) (No. 11-864)***.

predominance requirement, which is hotly contested. After a rigorous analysis of the evidence and argument offered by both parties, the Court finds that plaintiffs have established the *Rule 23(a)* and *Rule 23(b)(3)* requirements by a preponderance of the evidence.

A. *Rule 23(a)* Requirements

1. Numerosity

HN4[] *Rule 23(a)(1)* **[**22]** requires that the class be "so numerous that joinder of all members is impracticable." Satisfaction of this standard "does not require evidence of the exact number or identification of the members of the proposed class." *In re Linerboard Antitrust Litig., 203 F.R.D. 197, 205 (E.D. Pa. 2001)*. "'Generally, if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the numerosity requirement of *Rule 23(a)* has been met.'" *In re OSB Antitrust Litig., No. 06-826, 2007 U.S. Dist. LEXIS 56584, 2007 WL 2253418, at *2 (E.D. Pa. Aug. 3, 2007)* (quoting *Ketchum v. Sunoco, Inc., 217 F.R.D. 354, 357 (E.D. Pa. 2003))*.

In this case, transactional data produced by defendants shows that thousands of customers purchased TBR directly from defendants during the class period. (See, e.g., Beyer Reply 54-55.) This renders joinder highly impracticable and satisfies the numerosity requirement.

2. Commonality

HN5[] To satisfy *Rule 23(a)(2)*, there must be "questions of law or fact common to the class." Satisfaction of the commonality requirement requires that plaintiffs demonstrate that their claims "depend upon a common contention," the resolution of which "will resolve an issue that is central to the validity of each **[**23]** one of the claims in one stroke." *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011)*. "Commonality does not require an identity of claims or facts among class members; instead, [t]he commonality requirement will be satisfied if the named plaintiffs share at least one question of fact or law with the grievances of the prospective class." *Johnston v. HBO Film Mgmt., Inc., 265 F.3d 178, 184* ***[*233]*** *(3d Cir. 2011)* (internal quotation marks omitted); see also *Marcus v. BMW of N. Am., LLC, Nos. 11-1193, 11-1192, 687 F.3d 583, 2012 U.S. App. LEXIS 16369, 2012 WL 3171560, at *10 (3d Cir. Aug. 7, 2012)*.

HN6[] "Courts interpreting the commonality requirement in the antitrust area have held that allegations concerning the existence, scope and efficacy of an alleged conspiracy present questions adequately common to class members to satisfy the commonality requirement." *Linerboard, 203 F.R.D. at 205* (internal quotation marks omitted); see also, e.g., *In re Bulk (Extruded) Graphite Prods. Antitrust Litig., No. 02-6030, 2006 U.S. Dist. LEXIS 16619, 2006 WL 891362, at *5 (D.N.J. Apr. 4, 2006)*. In this case, plaintiffs' allegations include a number of common issues, including (1) whether defendants conspired to raise, fix, maintain and/or stabilize the price of blood reagents **[**24]** in the United States, (2) the duration of the conspiracy, and (3) the nature and character of the acts performed by defendants in furtherance of the conspiracy. "Resolving the allegations surrounding" defendants' alleged conduct in conspiring to fix TBR prices "will resolve issues that are 'central to the validity of each one of the claims in one stroke.'" *In re Flonase Antitrust Litig., No. 08-3301, 284 F.R.D. 207, 2012 U.S. Dist. LEXIS 83950, 2012 WL 2277840, at *8 (E.D. Pa. June 18, 2012)*. This suffices to satisfy the commonality requirement.

3. Typicality

HN7[] *Rule 23(a)(3)* requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. To conduct the typicality inquiry, the court must examine "whether the named plaintiffs' claims are typical, in common-sense terms, of the class, thus suggesting that the incentives of the plaintiffs are aligned with those of the class." *Beck v. Maximus, Inc., 457 F.3d 291, 295-96 (3d Cir. 2006)*. "The typicality requirement is intended to preclude certification of those cases where the legal theories of the named plaintiffs potentially conflict with those of the absentees." *Georgine v. Amchem Prods., Inc., 83 F.3d 610, 631 (3d Cir. 1996)*. **[**25]** "If a plaintiff's claim arises from the same event, practice or course of conduct that gives rise to the claims of the class members, factual differences will not render that claim atypical if it is based on the same legal theory as the claims of the class." *Marcus, 687 F.3d 583, 2012 U.S. App. LEXIS 16369, 2012 WL 3171560, at *11*.

In this case, plaintiffs allege that the same unlawful conduct injured the class representatives and the absent class members. All members of the putative class are direct purchasers of TBR and allege that they made their purchases at supracompetitive prices. This is sufficient to satisfy the typicality requirement. See, e.g., *In re Flat Glass Antitrust Litig., 191 F.R.D. 472, 480 (W.D. Pa. 1999)* ("[T]he named class members' claims, as well as the claims of the proposed classes, arise from the alleged price-fixing scheme perpetrated by defendants[,] [which is] the linchpin of plaintiffs' amended complaint, regardless of the product purchased, the market involved or the price ultimately paid.").

4. Adequacy of Representation

HN8[] *Rule 23(a)(4)* requires plaintiffs to show that "the representative parties will fairly and adequately protect the interests of the class." "Whether adequacy has been satisfied 'depends **[**26]** on two factors: (a) the plaintiff's attorney must be qualified, experienced, and generally able to conduct the proposed litigation, and (b) the plaintiff must not have interests antagonistic to those of the class.'" *McDonough v. Toys R Us, Inc., 638 F. Supp. 2d 461, 477 (E.D. Pa. 2009)* (quoting *New Directions Treatment Servs. v. City of Reading, 490 F.3d 293, 313 (3d Cir. 2007))*. "The second factor 'seeks to uncover conflicts of interest between named parties and the class they seek to represent.'" Id. (quoting *In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 532 (3d Cir. 2004))*.

The first element—the qualification of plaintiffs' attorneys—is satisfied. Plaintiffs' lead counsel has extensive experience in complex antitrust class actions and has ably performed his duties as interim class counsel. The Court concludes that plaintiffs' counsel are "qualified, experienced, and generally able to conduct the proposed litigation." *New Directions, 490 F.3d at 313*.

[*234] As to the second element, there is no evidence of any conflict of interest between the named plaintiffs and the absent members of the putative class. Each class member allegedly purchased TBR directly from Ortho or Immucor during **[**27]** the class period at a supracompetitive price. "Each class member holds a strong common interest in establishing [defendants'] liability for these alleged overcharges." *Flonase, 284 F.R.D. 207, 2012 U.S. Dist. LEXIS 83950, 2012 WL 2277840, at *9*.

The Court thus finds that the adequacy requirement is satisfied.

B. *Rule 23(b)(3)* Requirements

HN9[] To obtain class certification under *Rule 23(b)(3)*, plaintiffs must also demonstrate predominance and superiority by a preponderance of the evidence.

1. Predominance

Predominance is the only certification requirement contested by the parties. Ortho argues that plaintiffs have failed to present a reliable method of proving two elements of their claim— antitrust impact and the amount of damages— using predominantly common proof. Ortho also contends that the individual issues involved in evaluating whether individual plaintiffs are entitled to tolling of the statute of limitations based on fraudulent concealment preclude a finding of predominance.

HN10[] *Rule 23(b)(3)* requires that "the questions of law or fact common to class members predominate over any questions affecting only individual members." Predominance "tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." **[**28]** *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*. "It 'is a test readily met in certain cases alleging consumer or securities fraud or violations of the antitrust laws,' but a court may not relax its certification analysis as to each element of *Rule 23*." *Behrend, 655 F.3d at 191* (quoting *Amchem, 521 U.S. at 625*); see also *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 815 (7th Cir. 2012)* ("[C]areful application of *Rule 23* is necessary in antitrust cases, as in all cases, and . . . in antitrust cases, *Rule 23*, when applied rigorously, will frequently lead to certification." (internal quotation marks omitted)).

HN11[] Certification is "only appropriate in antitrust cases where plaintiffs can show, by a preponderance of the evidence, that proof of the essential elements of the cause of action, including antitrust injury, do not require individual treatment." *In re K-Dur Antitrust Litig., 686 F.3d 197, 2012 WL 2877662, at *17 (3d Cir. 2012)*; see also *In re Am. Int'l Grp., Inc. Sec. Litig., No. 10-4401, 689 F.3d 229, 2012 U.S. App. LEXIS 16911, 2012 WL 3264048, at *6 (2d Cir. Aug. 13, 2012)* ("'A key question in a litigation class action is manageability—how the case will or can be tried, **[**29]** and whether there are questions of fact or law that are capable of common proof.'" (quoting *Sullivan, 667 F.3d at 335*)). Thus, to obtain certification, plaintiffs must establish by a preponderance of the evidence that common proof will predominate at trial with respect to each of the essential elements of their antitrust claim: (1) that defendants violated *§ 1* of the Sherman Act, (2) the fact of damages arising from the unlawful activity ("antitrust impact"), and (3) the amount of damages sustained because of the unlawful activity. See, e.g., *Linerboard, 203 F.R.D. at 214*. The Court analyzes each of these essential elements and then addresses Ortho's defense of statute of limitations and the issue of fraudulent concealment.

a. Violation of § 1 of the Sherman Act

HN12[] In horizontal price-fixing cases, courts routinely hold that common proof predominates in determining whether an unlawful conspiracy existed. See, e.g., *Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 105 (2d Cir. 2007)*; *McDonough, 638 F. Supp. 2d at 479-80*; *Lumco Indus., Inc. v. Jeld-Wen, Inc., 171 F.R.D. 168, 172 (E.D. Pa. 1997)*. Ortho does not argue that evaluation of the particular allegations of **[**30]** concerted action in this case might require individual proof. The Court thus concludes that the predominance requirement is satisfied with respect to proof of an antitrust violation.

b. Antitrust Impact

HN13[] Antitrust impact is the "fact of damage" resulting from a violation of the antitrust **[*235]** laws. *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 454 (3d Cir. 1977)*. "In antitrust cases, impact often is critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof." *Hydrogen Peroxide, 552 F.3d at 311*. "Plaintiffs' burden at the class certification stage is not to prove the element of antitrust impact, although in order to prevail on the merits each class member must do so." *Id. at 311-12*; see also *Behrend, 655 F.3d at 197* (holding that, at the certification stage, a court need not "reach into the record and determine whether [p]laintiffs actually have proven antitrust impact" but must determine whether plaintiffs "demonstrated by a preponderance of the evidence that they could prove antitrust impact through common evidence at trial"). Instead, at the certification stage, plaintiffs **[**31]** must show that their theory of impact is "plausible in theory" and "susceptible to proof at trial through available evidence common to the class." *Behrend, 655 F.3d at 198*.

In this case, plaintiffs assert that they will prove antitrust impact using five elements of common proof: (1) application of the so-called "Bogosian shortcut," (2) Dr. Beyer's analysis of the structure of the TBR market, (3) Dr. Beyer's empirical analysis of TBR prices during the class period, (4) documents produced by defendants, and (5) Dr. Beyer's proposed methods of calculating the amount of damage each class member suffered. Ortho heavily criticizes these alleged elements of common proof. The Court concludes, however, that plaintiffs have presented ***HN14***[] a theory of impact that is "plausible in theory" and susceptible to proof through common evidence, which is sufficient at the class-certification stage. Id.

1. Bogosian Shortcut

In *Bogosian v. Gulf Oil Corp., 561 F.2d 434 (3d Cir. 1977)*, the Third Circuit recognized that ***HN15***[] under certain circumstances, a court considering a class certification motion may presume antitrust impact. Specifically, the Bogosian court held as follows:

> If . . . a nationwide conspiracy is proven, **[**32]** the result of which was to increase prices to a class of plaintiffs beyond the prices which would obtain in a competitive regime, an individual plaintiff could prove fact of damage simply by proving that the free market prices would be lower than the prices paid and that he made some purchases at the higher price. If the price structure in the industry is such that nationwide the conspiratorially affected prices at the wholesale level fluctuated within a range which, though different in different regions, was higher in all regions than the range which would have existed in all regions under competitive conditions, it would be clear that all members of the class suffered some damage, notwithstanding that there would be variations among all dealers as to the extent of their damage.

Id. at 455.

Courts often apply this presumption in horizontal price-fixing cases. See, e.g., *OSB, 2007 U.S. Dist. LEXIS 56584, 2007 WL 2253418, at *4-5*; *In re Bulk (Extruded) Graphite Prods. Antitrust Litig., No. 02-6030, 2006 U.S. Dist. LEXIS 16619, 2006 WL 891362, at *11-13 (D.N.J. Apr. 4, 2006)*. However, ***HN16***[] a court must rigorously analyze the evidence to determine whether Bogosian applies to a particular case. See *Hydrogen Peroxide, 552 F.3d at 326* (expressing doubt **[**33]** about whether Bogosian applied where prices were "lower, not higher, at the end of the class period than at the beginning," production increased during the class period, and defendants presented evidence of "substantial price disparities among similarly situated customers"). Moreover, Bogosian alone does not suffice to satisfy the predominance requirement; plaintiffs must present additional evidence that they can prove impact using common proof. Id.; see also *Am. Seed Co., Inc. v. Monsanto Co., 271 F. App'x 138, 141 (3d Cir. 2008)* ("[I]t is important that a putative class's presumption of impact under Bogosian be supported by some additional amount of empirical evidence.").

In many ways, this is a straightforward horizontal price-fixing case brought by direct purchasers of TBR. The anticompetitive effects of horizontal price-fixing are obvious. **[*236]** See, e.g., *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010)*. Many cases in which courts reject application of Bogosian involve alleged conduct whose anticompetitive effect is less straightforward. See, e.g., *Sheet Metal Workers Local 441 Health & Welfare Plan v. GlaxoSmithKline, PLC, No. 04-5898, 2010 U.S. Dist. LEXIS 105646, 2010 WL 3855552, at *21-22 (E.D. Pa. Sept. 30, 2010)* **[**34]** (refusing to apply Bogosian to the claims of indirect purchasers).

Ortho argues, however, that Bogosian is inapplicable for two reasons. First, it relies on the fact that "the alleged conspiracy . . . coincided with a substantial reduction in the number of competitors and the formation of a duopoly market." (Def.'s Opp. 58.) Therefore, while there were substantial price increases during the class period, those increases cannot be presumed to have resulted solely from collusion. However, defendants' creation of a duopoly by the acquisition of a number of competitors shortly before the alleged conspiracy began does not mitigate the fact that prices on many TBR products rose by more than 2000% during the class period, that those huge increases occurred very shortly after the alleged collusion began, and that those huge price increases applied to all customers. Unlike in *Hydrogen Peroxide*, there is no evidence that prices decreased at any time during the class period. Moreover, the benchmark methodology detailed in Dr. Beyer's reports, see infra Section IV.B.1.c.2, estimates the but-for prices that would have been charged in a lawful duopoly market and calculates those additional price **[**35]** increases that resulted from the alleged anticompetitive activity.

Second, Ortho argues that the conspiracy in alleged in this case "encompass[es] dozens of different products, each with different demand and cost factors." (Def.'s Opp. 58-59.) However, ***HN17***[] courts have applied Bogosian even in cases involving multiple varieties of products. See, e.g., *Bulk (Extruded) Graphite, 2006 U.S. Dist. LEXIS 16619, 2006 WL 891362, at *11*. In this case, where Ortho manufactured an analogue of most TBR products manufactured by Immucor, and vice versa, it is logical that a horizontal price-fixing conspiracy encompassing all of those products would impact all purchasers.

There is thus a strong argument that Bogosian applies to the facts of this case. Nevertheless, as set forth below, the Court concludes that other elements of common proof offered by plaintiffs—most importantly, Dr. Beyer's market structure analysis and his damages models—suffice to establish that plaintiffs can prove impact using common evidence regardless of whether Bogosian applies.

2. Market Structure Analysis

Plaintiffs' second element of proof of impact is Dr. Beyer's analysis of the structure of the TBR market. Based on his review of relevant documents and deposition **[**36]** testimony in this case, Dr. Beyer concludes that several features of the blood reagents industry gave "defendants . . . the incentive to form the alleged conspiracy" and made it impossible for individual purchasers to "avoid[] impact from a conspiracy." (Beyer Report 26.) In particular, Dr. Beyer cites (1) the consolidated market, (2) high barriers to entry, (3) inelastic demand for TBR, (4) the interchangeability of defendants' TBR products, (5) defendants' ability to monitor each other's pricing behavior by obtaining price lists from customers, and (6) defendants' unwillingness to deviate from their pricing policies for particular customers. (Id. at 26-35.) Many of these conclusions are reinforced by the reports of Ms. Harris, plaintiffs' industry expert. (See Harris Report ¶¶ 16, 20, 33.)

In its brief, Ortho disputes some of Dr. Beyer's conclusions regarding market structure, arguing that (1) TBR are not interchangeable and, as such, are not commodity products, (2) demand for TBR is not inelastic because TBR and ABR are interchangeable, and (3) recent market entry shows that plaintiffs overstate their claims regarding barriers to entry. However, the report of Ortho's expert, Dr. **[**37]** Bronsteen, does not dispute that the TBR market possessed the structural features Dr. Beyer identifies. Instead, Dr. Bronsteen argues that those structural features are just as consistent with tacit coordination as with unlawful collusion. (Bronsteen Report 34.) He opines that such a market structure "generally make[s] it easier for firms to refrain from aggressive competition and to coordinate their pricing either **[*237]** from an explicit cartel agreement or from tacit coordination." (Id. at 35.) Dr. Bronsteen then concludes that firms often prefer to engage in tacit coordination because, unlike explicit collusion, it is not unlawful. (Id. at 35-36.)

HN18[] Many courts have accepted market-structure analyses in finding predominance with respect to antitrust impact. See, e.g., *Linerboard, 305 F.3d at 153-55*; *Behrend, 264 F.R.D. at 160-61*; *OSB, 2007 U.S. Dist. LEXIS 56584, 2007 WL 2253418, at *4-7*. However, before accepting such an analysis, the Court must be persuaded that the market-structure factors identified by the plaintiffs' expert do, in fact, exist. See, e.g., *In re Plastics Additives Antitrust Litig., No. 03-2038, 2006 U.S. Dist. LEXIS 69105, 2010 WL 3431837, at *7 (E.D. Pa. Aug. 31, 2010)* ("While a market with the characteristics described by [the **[**38]** expert] may in theory be vulnerable to a price-fixing conspiracy, we find that the markets at issue in this case do not actually possess those characteristics."). In this case, after weighing the evidence presented by both parties, the Court is persuaded by Dr. Beyer's conclusions regarding the structure of the TBR market.

First, Ortho does not dispute many of the market characteristics Dr. Beyer identified. Dr. Bronsteen disputes even fewer; his primary argument is that the characteristics are consistent with lawful conduct as well as unlawful conduct. However, the question for the Court at this stage is not whether defendants actually engaged in a price-fixing conspiracy but whether, if plaintiffs establish such a conspiracy, they will also be able to prove impact through predominantly common proof. Dr. Bronsteen's testimony thus does not discredit Dr. Beyer's market-structure analysis at this stage of the litigation.

Second, the Court is persuaded that most customers viewed TBR as commodity products during the class period. (See, e.g., Gallup Dep., Pls.' Reply Ex. 151, at 59-60 (stating that most customers "believed that [TBR] [were] like plain white bread: all the products were the **[**39]** same"); Weiss Decl., Pls.' Reply Ex. 149, ¶¶ 11-12 (stating that customers can use TBR "interchangeably" as long as they have FDA approval and that TBR "are almost identical 'commodity' products").) Ortho presented anecdotal evidence that a few purchasers preferred one defendant's TBR for nonprice reasons. (See, e.g., Carbaugh Dep., Def.'s Opp. Ex. C, at 36; Fennema Dep., Defs.' Opp. Ex. D, at 57-

59.) The Court finds that isolated testimony less persuasive than the expert report and evidence that plaintiffs offered to the contrary. [6]

Third, Ortho disputes Dr. Beyer's conclusions regarding the inelasticity of TBR demand because ABR constituted a "potential substitute product[]" for TBR. (Def.'s Opp. 13.) Ortho explains that, although ABR are more expensive than TBR, they are more efficient and more accurate, which gave customers an incentive to switch despite the increased expense. (Id. at 15-16.) Moreover, Ortho presents evidence that some class members did switch from TBR to ABR during the class period. (Id. at 14-15.) However, as plaintiffs' counsel argued persuasively at the certification hearing, *HN19*[] the decision of some purchasers to switch from TBR to ABR when faced with enormous price increases does not establish elastic demand for TBR. (See 7/26/12 Hr'g Tr. 30-31.) Even where demand is highly inelastic, customers will eventually stop purchasing a product if there is a sufficiently large price increase. See generally IIA Phillip E. Areeda et al., ***Antitrust Law*** ¶ 507 (3d ed. 2007). The Court also credits Dr. Beyer's conclusion that, **[**41]** because Ortho and Immucor dominated both the TBR and ABR markets, the possibility **[*238]** that customers would switch from TBR to ABR did not threaten the success of the alleged conspiracy. (See Beyer Report ¶ 63.)

Finally, the entry of two new TBR manufacturers in 2008—eight years after the alleged price-fixing conspiracy began—does not discredit Dr. Beyer's conclusion that the TBR market features high barriers to entry. *HN20*[] A barrier to entry need not prevent competitors from ever entering the market. See generally IIB Areeda et al., supra, at ¶ 420. Dr. Bronsteen agrees with Dr. Beyer that FDA regulation delays entry to the TBR market. (Bronsteen Dep., Pls.' Reply Ex. 148, at 56, 242-23.) It is undisputed that it takes several years for a new competitor to obtain FDA approval and begin to sell TBR. This is a substantial delay, sufficient to render the TBR market conducive to collusion that would impact all customers.

The Court thus accepts Dr. Beyer's analysis of the structure of the TBR market as persuasive evidence supporting a finding of predominance with respect to impact.

3. Empirical Pricing Analysis

Third, plaintiffs rely on Dr. Beyer's empirical analysis of pricing patterns in the TBR industry **[**42]** during the class period. There are two parts to this analysis. First, Dr. Beyer observes that TBR prices "skyrocketed" during the class period. (Beyer Report ¶ 29 & tbls. 3-4.) Second, he analyzes the prices defendants charged to individual customers and concludes that prices rose somewhat uniformly. Most Ortho customers paid "identical or nearly identical" prices throughout the class period. (Id. ¶ 77, figs. 5-6.) Because of Immucor's pricing tiers, Immucor prices exhibit more dispersion. Moreover, some Immucor customers were able to obtain price protection, which locked their 2004 prices in place for five years. Nonetheless, Dr. Beyer states that the prices for Immucor's TBR "tended to cluster at a handful of pricing points." (Id. ¶ 76.) Further, in his Reply Report, he demonstrates that customers in each of Immucor's pricing tiers and even its price-protected customers paid more than but-for prices. (Beyer Reply Report ¶¶ 77-88.)

HN21[] Clearly, the fact that prices rose does not, in and of itself, demonstrate antitrust impact— at trial, plaintiffs will need to show that they experienced price increases that resulted from anticompetitive conduct. However, a showing that prices behaved similarly **[**43]** across groups of customers contributes to a finding of predominance at the certification stage. [7] Because Ortho's prices were more uniform than Immucor's, this element of proof is more

---

[6] At the class certification hearing, Dr. Bronsteen testified that the evidence regarding whether TBR are commodities is "mixed." (7/26/12 Hr'g Tr. 182.) He argued that differences in the prices of Ortho's and Immucor's TBR during the class period show that some customers preferred one defendant's TBR to the other. (Id. at 182-83.) However, Dr. Beyer's analysis shows that, even if Ortho and Immucor prices were not identical for all products, they were similar. (See, e.g., Beyer Reply fig.1.) Moreover, Dr. Bronsteen compares average prices charged by Immucor and Ortho. Those average prices are very similar through 2004. (See Bronsteen Report Exs. 9A-9D.) **[**40]** The Court concludes that divergence in prices after 2004 is explained, at least in part, by the discounts Immucor gave some of its customers through price protection and pricing tiers.

persuasive with respect to Ortho sales than Immucor sales. (Compare Beyer Report fig.5, with id. figs.10-11.) As described below, however, Dr. Beyer has showed that, despite price variation, he can demonstrate impact to Immucor purchasers using common proof. Therefore, while the Court does not find Dr. Beyer's empirical pricing analysis as persuasive as his market analysis or the results of his damages models, the analysis provides additional support for his assertion that plaintiffs will be able to prove impact using common proof.

4. Defendants' Documents

Fourth, plaintiffs rely on defendants' internal documents for the proposition that the **[**44]** price increases affected all customers. Most importantly, the documents support plaintiffs' contention that defendants were generally unwilling to negotiate prices with their customers. (See, e.g., Pls.' Mot. Ex. 138, at 4 (email from an Immucor sales representative stating that "[u]nfortunately, the pricing change is firm. It was an increase that was shared with our entire customer base and at this time, there aren't any exceptions being made"); Pls.' Mot. Ex. 139 (email from an Ortho executive stating that "everyone pays the same" for TBR).) Moreover, the documents provide evidence that even where defendants provided discounts from list prices, the discounts remained related to the list prices. (See, e.g., Pls.' Reply Ex. 143 (Ortho document stating that "[a]s list price increases all customer prices change in lock step"); Heflin Decl. ¶ 16 (stating that Immucor's list **[*239]** prices and tiered pricing were set based on Ortho's list prices).) This gives rise to an inference that anticompetitive increases in list prices would also impact customers who were purchasing TBR at a discount. See, e.g., *McDonough, 638 F. Supp. 2d at 486* ("[W]hen list prices have been artificially inflated, fixed **[**45]** or proportional discounts from them are equally inflated.").

While these documents would not suffice to prove impact on their own, they lend support to a finding of predominance.

5. Damages Calculation

Plaintiffs offer an additional element of common proof of impact: Dr. Beyer's proposed methodologies for calculating the damages incurred by individual plaintiffs. Those methodologies, which are explained in more detail below, see infra Section IV.B.1.c.2, distinguish between price increases resulting from the creation of a duopoly and price increases resulting from the alleged price-fixing conspiracy. Specifically, Dr. Beyer utilizes a benchmark model to estimate the pricing that would have occurred in a lawful duopoly. He concludes that any differences between those estimated prices and the actual prices charged by defendants resulted from the alleged price-fixing conspiracy. The important point for purposes of the impact analysis is that, by applying one variation of this benchmark model to transactional data produced by defendants, Dr. Beyer has demonstrated that "virtually all customers paid more for traditional reagents than they would have paid in the absence of the alleged anticompetitive **[**46]** conduct." (Beyer Reply Report ¶ 102.) Dr. Beyer's calculations show that virtually all of defendants' customers purchased at least one TBR product for more than the but-for price during the class period. (Id. ¶¶ 105-106 & tbls. 18-19.) The calculations are persuasive evidence that antitrust impact is "susceptible to proof at trial through available evidence common to the class." *Behrend, 655 F.3d at 198*.

As is explained in more detail below, Ortho focuses its argument on the assertion that Dr. Beyer's damages methodologies are speculative and unreliable. For reasons that will be discussed infra Section IV.B.1.c, the Court concludes that these arguments do not defeat plaintiffs' case at the class certification stage.

In addition to its arguments regarding the merits of plaintiffs' damages formula, Ortho argues that Dr. Beyer's conclusions are based on a faulty understanding of antitrust impact. Ortho asserts that it is not enough for plaintiffs

---

[7] ***HN22***[] Variation in the prices paid by individual customers does not preclude a finding of predominance. See, e.g., *K-Dur, 686 F.3d 197, 2012 WL 2877662, at *19-20*; *McDonough, 638 F. Supp. 2d at 486*. However, plaintiffs must be able to account for such variation using common proof— which they have persuaded the Court that they will be able to do in this case. See infra Part IV.B.1.c.3.i.

to show that a customer paid more than the but-for price for at least one item in at least one transaction. Instead, according to Ortho, plaintiffs must analyze "whether the net effect of the alleged antitrust violation is positive or negative." **[**47]** (Def.'s Surreply 16 (emphasis added).) They must offset class members' losses from the alleged conspiracy against any benefits they received from it. (Id. at 17.) For example, Ortho contends that Dr. Beyer wrongly "overlooks the prospect that higher prices for traditional reagents led to lower prices or lower price increases for proprietary reagents and equipment." (Id.)

The Court rejects this argument. The case on which Ortho relies involved a merger, not a horizontal price-fixing conspiracy. See *Kottaras v. Whole Foods Market, Inc., 281 F.R.D. 16 (D.D.C. 2012)*. ***HN23***[] Mergers frequently produce pro-competitive efficiencies that outweigh their anti-competitive harm, and courts routinely weigh these countervailing effects as an integral component of merger analysis. See, e.g., *id. at 24*; see also U.S. Dep't of Justice & Fed. Trade Comm'n, Horizontal Merger Guidelines § 10 (issued Aug. 19, 2010). It is far less plausible, on the other hand, that a price-fixing conspiracy would have offsetting benefits to consumers. See *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 830 (3d Cir. 2010)* ("Some categories of restraints, such as horizontal price-fixing . . . , 'because of their pernicious **[**48]** effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable.'" (emphasis added) (quoting *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)))*. Ortho cites no case in which a court required plaintiffs to account for potential decreases in the price of some products as the result of an alleged horizontal price-fixing conspiracy.

[*240] At the class certification hearing, Dr. Bronsteen stated that the alleged conspiracy might have caused the prices of some TBR or ABR products to decrease because it gave defendants an incentive to "cheat" on the cartel by cutting prices on products not subject to the conspiracy. (7/26 Hr'g Tr. 218-19.) He presented evidence that, while TBR prices were increasing sharply, the prices of some of defendants' leading ABR products were "essentially flat." (Id. at 220.) Moreover, he argued that defendants hoped that increases in the prices of TBR would induce customers to switch from TBR to ABR. (Id.)

The argument that defendants were cheating on the cartel is speculative, at best. Ortho has not persuaded the Court that the "essential flatness" of ABR prices resulted from its alleged conspiracy to fix TBR prices; Ortho **[**49]** has merely suggested that that is a possibility. Second, as a practical matter, Ortho's theory—which could be raised in every price-fixing case—would be very difficult to model. Without stronger evidence that a price-fixing conspiracy did, indeed, have offsetting benefits to consumers, plaintiffs in this type of case should not be saddled with analyzing whether a price-fixing conspiracy might possibly have had any negative effect on the price of any product sold by the defendants. Ortho has not cited any nonmerger cases in which courts imposed such a requirement, and this Court will not do so in this case. The Court thus accepts the results of the damages models as persuasive evidence of impact.

In summary, after a rigorous analysis of the evidence offered by both parties, the Court concludes that plaintiffs have shown by a preponderance of the evidence that they will be able to demonstrate antitrust impact using predominantly common proof.

c. Damages

1. Legal Standard

HN24[] Plaintiffs must also establish by a preponderance of the evidence that they "will be able to measure damages on a class-wide basis using common proof." *Behrend, 655 F.3d at 204*. At the class certification stage, the court **[**50]** must "address only whether [p]laintiffs have provided a method to measure and quantify damages on a class-wide basis." *Id. at 206*. The Court has not "reached the stage of determining on the merits whether the methodology is a just and reasonable inference or speculative." Id. The Court must find that the model "could evolve to become admissible evidence," but the model need not be "perfect." [8] Id. at 204 n.13; see also, e.g., McDonough, 638 F. Supp. 2d at 490 ("[P]redominance requires only a viable method whereby damages can be reasonably estimated based on common evidence."); In re Neurontin Antitrust Litig. No. 02-1390, 2011 U.S. Dist. LEXIS 7453, 2011 WL 286118, at *25 (D.N.J. Jan. 25, 2011).

In Behrend, the Third Circuit rejected the defendant's criticisms of the reliability of the damages model proposed by the **[**51]** plaintiffs' expert. The Court held that those criticisms constituted "attacks on the merits of the methodology that have no place in the class certification inquiry." Behrend, 655 F.3d at 206-07. Behrend makes this point repeatedly, stating, for example, that **HN26**[] "at the class certification stage, [courts] are precluded from addressing any merits inquiry unnecessary to making a Rule 23 determination." Id. at 190. This is consistent with Hydrogen Peroxide's interpretation of Eisen v. Carlisle & Jacquelin, 417 U.S. 156, 177, 94 S. Ct. 2140, 40 L. Ed. 2d 732 (1974), as "preclud[ing] . . . a merits inquiry that is not necessary to determine a Rule 23 requirement." Hydrogen Peroxide, 552 F.3d at 317.

As explained below, Ortho devotes little energy to arguing that individual proof will predominate in calculating damages. Virtually all of Ortho's arguments go to the merits of the models Dr. Beyer has constructed: the question whether the models give rise to "a just and reasonable inference or [are] speculative." Behrend, 655 F.3d at 206. These merits arguments have some **[*241]** force, and they may prove persuasive at the summary judgment stage. However, they do not overlap with the Rule 23 requirements, because they neither implicate **[**52]** a need for individual proof nor convince the Court that Dr. Beyer's models could not "evolve to become admissible evidence." Id. at 204 n.13. Thus, applying Behrend, Hydrogen Peroxide, and Eisen, the Court concludes that it must defer analysis beyond that offered in this Memorandum until it addresses the issues at the summary judgment stage. See In re Online DVD Rental Antitrust Litig., No. 09-2029, 2010 U.S. Dist. LEXIS 138558, 2010 WL 5396064, at *10 (N.D. Cal. Dec. 23, 2010) (rejecting arguments that plaintiffs failed "to discuss or explain the importance of certain competitive variables in the but for world" because those arguments "are ultimately directed to the merits of plaintiffs' ability to prove impact"; they "do not . . . establish that plaintiffs' methodology for proving impact will necessarily require individualized evidence").

2. Damages Models Offered by Dr. Beyer

To calculate damages, each plaintiff must estimate the overcharge that it paid as a result of the alleged conspiracy: that is, the difference between the prices it actually paid for TBR and the prices it would have paid in the absence of a price-fixing conspiracy ("but-for prices"). In this case, plaintiffs' damages model must distinguish **[**53]** between price increases resulting from defendants' creation of a duopoly and price increases resulting from the anticompetitive conduct in which defendants are alleged to have engaged. In his Reply Report, Dr. Beyer formulates and applies several variations on a benchmark model to estimate the but-for prices that would have resulted from creation of a lawful duopoly in the absence of anticompetitive conduct. He then measures the amount by which actual prices exceeded but-for prices, which he concludes is attributable to the anticompetitive conduct alleged by plaintiffs.

As a general matter, **HN27**[] the benchmark methodology is widely accepted for calculating overcharges in antitrust cases. See, e.g., Linerboard, 305 F.3d at 153-55; McDonough, 638 F. Supp. 2d at 490 & n.19; IIB Areeda et al., supra, at § 392d. Estimating but-for prices is particularly difficult in this case, however, because defendants' duopoly was created only a short time before they allegedly conspired to fix prices. Market consolidation tends to increase prices, even in the absence of coordinated conduct. See, e.g., Horizontal Merger Guidelines, supra, at § 6. The parties agree that this would make it very difficult to make **[**54]** reliable use of empirical data regarding pre-

---

[8] **HN25**[] Even at the merits stage, plaintiffs need not measure damages with complete certainty, because courts recognize the "inherent difficulty of identifying a 'but-for world.'" Behrend, 655 F.3d at 203. At the merits stage, plaintiffs must demonstrate damages only "as 'a matter of just and reasonable inference.'" Id. (quoting Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931)).

conspiracy prices to estimate but-for prices. [9] (See Beyer Report ¶ 93; 7/26/12 Hr'g Tr. 165-67.) Moreover, because the damages period extends to the present, there is no "after" period that can serve as a benchmark. (Beyer Report ¶ 92.) Dr. Beyer thus cannot use the familiar "before-and-after" benchmark that courts have approved in many cases. See, e.g., *Linerboard, 305 F.3d at 153-55*; *In re Wellbutrin XL Antitrust Litig., No. 08-2431, 2011 U.S. Dist. LEXIS 90075, 2011 WL 3563385, at *14-16 (E.D. Pa. Aug. 11, 2011)*.

As an alternative, Dr. Beyer bases his benchmark on the price increases defendants planned and partially implemented after the duopoly was created but before they allegedly formed their price-fixing conspiracy. Dr. Beyer asserts that defendants' planned price increases provide a good estimate of but-for prices because (1) they account for the market's consolidation to duopoly, (2) they are "based on Immucor's and **[**55]** Ortho's own projection of the but-for prices of [TBR]," and (3) "the basis for the increase does not appear to include cooperative behavior between the two defendants." (Beyer Report ¶ 97.)

For the period between 2001 and 2005, Dr. Beyer assumes that both defendants' TBR prices would have increased by 25% per year, as Ortho had planned under OCV. [10] Plaintiffs **[*242]** assert that 25% is a reasonable figure for both defendants because it reflects Ortho's carefully considered OCV strategy and because Immucor (1) implemented a 20% increase around the same time and (2) consistently followed Ortho's pricing strategies. Plaintiffs further contend that, based on Ortho strategy documents, it is reasonable to estimate that the increases would have lasted for five years. (See, e.g., Pls.' Mot. Ex. 54, at 10 (Ortho planning document stating that the OCV plan would include "5+ years of annual 25% price increases").) Moreover, Dr. Beyer points out that after five years of 25% increases, Ortho would have more than achieved the level of gross profitability that its president, Catherine Burzik, set as a goal after defendants obtained their duopoly. [11] (8/6/12 Tr. at 336.)

For the period between 2006 and the end of the damages period, Dr. Beyer proposes two alternative methods of estimating but-for prices. The first option is to assume that TBR prices would have risen at the same rate that Immucor's standard costs rose. [12] The second option makes use of a proposed non-TBR "yardstick" product, RhoGAM. RhoGAM is Ortho's brand of Rho(D), a prescription pharmaceutical that is administered to pregnant women. Dr. Beyer asserts that Rho(D) is a good yardstick for TBR because of the following similarities: (1) the Rho(D) market is a "highly concentrated oligopoly," (2) demand for Rho(D) is inelastic, (3) the Rho(D) market features high barriers to entry due to FDA regulation, (4) RhoGAM is interchangeable with other Rho(D) products, (5) the same hospitals that were the largest TBR customers also purchased Rho(D), (6) demand for Rho(D) was

---

[9] For the same reason, the parties agree that it would be difficult to apply multiple regression analysis, another technique often used to isolate anticompetitive effects, reliably in this case. (See Beyer Reply ¶ 52-53; 7/26/12 Hr'g Tr. 164-66.)

[10] Dr. Beyer also presents a variation **[**56]** on this methodology in which he adjusts the size of the but-for price increases of individual TBR products to reflect the distribution of actual price increases on different TBR products. (Beyer Reply ¶ 74.) The weighted average price increase, however, remains 25%. (Id.)

[11] At the class certification hearing, Dr. Bronsteen testified that it did not make sense for the 25% price increases to stop after five years. In his opinion, defendants would have continued raising prices in the but-for world "until they reach[ed] the level of [the prices actually charged]." (7/26/12 Hr'g Tr. 194.) Dr. Bronsteen oversimplifies this point. There are a number of reasons that the price obtained by noncolluding duopolists might be lower than that obtained by a cartel. See, e.g., IIB Areeda et al., supra, at ¶ 405c ("[W]ith any market of given structural and other characteristics, the probability of effective cooperation in raising price and restricting output is much greater with express collusion than with mere reliance on recognized interdependence."); *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 656 (7th Cir. 2002)* (Posner, J.) ("[S]ellers would not bother to fix list prices if they **[**57]** thought there would be no effect on transaction prices.").

[12] Dr. Beyer uses Immucor's standard costs for both defendants because **[**58]** Ortho has represented that its cost data is unreliable. Because both defendants manufactured the same products from similar raw materials and were subject to the same regulations, Immucor's costs are a reasonable proxy for Ortho's costs. (Beyer Reply ¶ 56.) At the very least, using Immucor's standard costs is sufficient to "give 'a reasonable estimate' of damages. And nothing more is required." *McDonough, 638 F. Supp. 2d at 491* (quoting *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 484 (3d Cir. 1998))*.

relatively stable throughout the damages period, and (7) prices for Rho(D) were set based on "the level of competitiveness in the market rather than on cost or demand factors." (Beyer Reply ¶¶ 61-67.)

In sum, in all variations of his proposed damages models, Dr. Beyer uses a benchmark methodology to estimate the but-for prices that defendants would have charged in a lawful duopoly, in the absence of collusion. Dr. Beyer then calculates the differences between those estimated but-for prices and the actual prices charged to plaintiffs, which he concludes are attributable to the alleged price-fixing conspiracy.

3. Ortho's Criticisms of Dr. Beyer's Damages Models

Ortho criticizes Dr. Beyer's proposed damages models on a number of grounds. As stated above, most of these criticisms go to the reliability of the models—their alleged failure to account for important competitive variables—rather **[**59]** than whether their application will require the use of individualized proof at trial.

i. Common Proof Versus Individualized Proof

A few of Ortho's arguments go to the heart of the predominance inquiry—whether plaintiffs will rely on individual evidence to prove their case. First, Ortho asserts that **[*243]** Dr. Beyer's damages model is insufficient because (1) it assumes that there would have been one but-for price for each TBR product in each year and (2) in reality, different customers paid different prices, and a model that accounted for that would require extensive use of individualized proof. The Court rejects that argument. Ortho may be correct that, if feasible, it would be more accurate to estimate but-for prices for each individual transaction separately. However, estimating a single but-for price for each product in each year is sufficient to estimate damages "'as a matter of just and reasonable inference.'" *Behrend, 655 F.3d at 203* (quoting *Story Parchment, 282 U.S. at 563*). What Ortho proposes would exponentially complicate the calculation of damages in this type of case. As Dr. Beyer testified, it would require plaintiffs to estimate "almost a million" different but-for prices. (8/6/12 **[**60]** Tr. at 351.) Ortho has cited no case—and the Court has found none—in which plaintiffs were required to do this. In contrast, the Court has found cases that featured variable pricing in the real world but in which courts accepted the calculation of only one price for all customers in the but-for world. See, e.g., *McDonough, 638 F. Supp. 2d at 490-91*.***HN28***[] "[I]t is important not to let a quest for perfect evidence become the enemy of good evidence." *Flonase, 284 F.R.D. 207, 2012 U.S. Dist. LEXIS 83950, 2012 WL 2277840, at *24* (quoting *Messner, 669 F.3d at 808*).

Plaintiffs have also rebutted Ortho's contention that Immucor's variable pricing will necessitate the use of individualized evidence to calculate damages. It is well established that "variation of damages among class members does not defeat certification" so long as that variation does not raise "[c]omplex and individual questions." *Id. at 204*; see also 7AA Charles Alan Wright et al., Federal Practice & Procedure § 1781 (3d ed. 2005). In his Reply Report, Dr. Beyer shows that the prices paid by most Immucor customers after 2005 corresponded to one of the standard pricing tiers, and it is straightforward to calculate an overcharge percentage for each pricing tier. (See Beyer Reply **[**61]** ¶¶ 77-84.) Moreover, Dr. Beyer calculates damages for a random sample of Immucor and Ortho customers using data regarding their actual transactions. (Id. ¶¶ 90-93.) Despite variation in the prices the customers may have paid, the damages model produces results—and shows antitrust impact—for all of them. (Id.) It would be straightforward to perform a similar calculation for the rest of the class. Dr. Beyer has thus shown that, despite variation in the actual prices paid by purchasers, his damages formula is "able to measure damages on a class-wide basis using common proof." *Behrend, 655 F.3d at 204*.

ii. General Reliability Arguments

At the present stage of the litigation, the Court also rejects Ortho's arguments regarding the reliability of plaintiffs' damages models. Even if Dr. Beyer's models have some deficiencies, the Court concludes that those deficiencies are remediable; Ortho has not established that the models could not "evolve to become admissible evidence." *Behrend, 655 F.3d at 204 n.13*.

First, Ortho argues strenuously that the 25% price increase envisioned under OCV is not a reliable benchmark for prices between 2001 and 2005. Ortho contends that it implemented the BBLP before **[**62]** the alleged price-fixing conspiracy began. As a result, according to Ortho, neither OCV nor the BBLP is a product of the price-fixing conspiracy alleged in this case, rendering it wholly arbitrary for Dr. Beyer to select OCV prices, instead of BBLP prices, as a benchmark. The Court rejects this argument. Plaintiffs' theory—that Ortho began to consider the BBLP before the AABB meetings but would not have executed the plan without explicit assurance that Immucor would follow—is highly plausible and is consistent with documents showing that the BBLP only became fully operational after the meetings. Moreover, even if Dr. Beyer used BBLP prices, rather than OCV prices, as a benchmark, the damages methodology would still utilize common proof. See *Behrend, 655 F.3d at 206-07* (explaining that if the defendant's criticisms were taken into account, "only the final amount of estimated damages would change"; the criticisms thus "do not impeach the . . . ultimate holding that damages are capable of common proof on a class-wide basis"). This is a mer **[*244]** its argument that does not overlap with a *Rule 23* requirement.

Ortho's more persuasive argument is that the OCV benchmark is unreliable because it fails **[**63]** to take crucial competitive variables into account: it does not adequately control for changes in standard costs, demand, or market structure. Dr. Bronsteen presented persuasive testimony on this point at the class certification hearing. First, however, Ortho did not present any evidence that plaintiffs would need to rely on individualized proof to account for these competitive variables. Dr. Bronsteen's testimony did not rebut the fundamental point that standard costs, demand, and market structure are all common variables that Ortho asserts plaintiffs should have included in their common damages formula.

Second, Dr. Bronsteen did not persuade the Court that plaintiffs' damages models could not evolve to become admissible at trial. Dr. Bronsteen argued persuasively that Dr. Beyer's models would be more accurate if, for example, he added annual percentage increases in standard costs to his benchmark to account for the likelihood that defendants would have passed increased costs on to purchasers. (See 7/26/12 Hr'g Tr. 196-97.) He also opined that Dr. Beyer should adjust the benchmark annually to account for changes in aggregate demand. The parties have presented data regarding both costs **[**64]** and aggregate demand, so, if deemed necessary by Dr. Beyer, both of these criticisms can be addressed and rectified before the merits stage of the litigation. [13]

In addition, contrary to Dr. Bronsteen's report and testimony, the damages models account for market structure. The 25% OCV-based benchmark reflects plans defendants formed after their duopoly was created, thus reflecting their estimate of the prices they would be able to impose given the change in market structure. (Beyer Report ¶ 95.) Likewise, both of the alternative benchmarks Dr. Beyer proposes **[**65]** for the post-2005 period take market structure into account. His assumption that "the full amount of variable costs of manufacturing blood reagents would be passed on to purchasers" reflects defendants' market power as duopolists. (Id. ¶ 101.) Likewise, he selected RhoGAM as a yardstick because, like the TBR market, the RhoGAM market was a highly concentrated oligopoly in which Ortho had a large market share. (Beyer Reply ¶ 61.) Ortho argues that, even if Dr. Beyer's damages formulas attempt to account for market share in this way, they are fatally speculative and unreliable. However, as stated above, the models present a viable method of calculating damages using common proof, and "[w]e have not reached the stage of determining on the merits whether the methodology is a just and reasonable inference or speculative." [14] *Behrend, 655 F.3d at 206*.

---

[13] Dr. Bronsteen also testified at the certification hearing that he "suspect[ed]" that if Dr. Beyer made this type of adjustment, but-for prices would fall below average prices and plaintiffs would be unable to prevail on the merits. (7/26/12 Hr'g Tr. 197.) The Court notes that Dr. Bronsteen did not perform any analysis to support his suspicion. More fundamentally, ***HN29***[] "a district court has limited authority to examine the merits when conducting the certification inquiry"; the "ability of the named plaintiff to succeed on his or her individual claims has never been a prerequisite to certification of the class." *Sullivan, 667 F.3d at 305*.

[14] In his original Report, Dr. Beyer stated that the first increase in but-for prices would occur in 2000. (Beyer Report ¶ 95.) His Reply Report shifts the first increase to 2001. (Beyer Reply ¶ 73.) Ortho contends that this change makes Dr. Beyer's methodology "even more ad hoc and speculative." (Def.'s Surreply 11.) However, Dr. Beyer provides **[**66]** a persuasive explanation for the change. He explains that he shifted the first but-for price increase because the alleged price-fixing conspiracy did not begin to impact customers until 2001; neither defendant imposed its substantial price increases until early 2001. (Beyer

iii. The RhoGAM Yardstick

Finally, Ortho argues that RhoGAM is too different from TBR to serve as a yardstick for the post-2005 period. In particular, according to Ortho, the RhoGAM and TBR markets feature different demand and cost factors and different competition levels. **[*245]** (See, e.g., Def.'s Surreply 11-13; see also Bronsteen Report 19-22.) Moreover, prices for RhoGAM and TBR moved very differently prior to the alleged price-fixing conspiracy. (Id.) Plaintiffs respond that the markets are comparable because they both feature, inter alia, Ortho as a major competitor, inelastic demand, barriers to entry created by FDA requirements, homogeneous products, and relatively **[**67]** stable demand. (See, e.g., Beyer Reply ¶¶ 61-67.) Pre-conspiracy prices of TBR and RhoGAM are different because, for most of that period, the TBR market was competitive, while the RhoGAM market was a duopoly. (Id. ¶ 68.)

HN30[] To succeed at the merits stage, the yardstick business or product "'must be as nearly identical to the plaintiff's as possible.'" *Loeffel Steel Prods. v. Delta Brands, Inc., 387 F. Supp. 2d 794, 812 (N.D. Ill. 2005)*. "[E]xact correlation is not necessary," however; the products need only be "fair congeners." Id.; see also *Eleven Line, Inc. v. N. Tex. State Soccer Ass'n, 213 F.3d 198, 208 (5th Cir. 2000)* ("An antitrust plaintiff who uses a yardstick method of determining lost profit bears the burden to demonstrate the reasonable similarity of the business whose earning experience he would borrow." (emphasis added)). Few cases discuss the showing of similarity that is required at the class certification stage, but courts have rejected proposed yardsticks on certification where the party proffering them failed to perform a substantive analysis of the products' similarity. See *In re Live Concert Antitrust Litig., No. 06-1745, 863 F. Supp. 2d 966, 2012 U.S. Dist. LEXIS 47768, 2012 WL 1021081, at *7-9 (C.D. Cal. Mar. 23, 2012)*; **[**68]** *Weiner v. Snapple Beverage Corp., No. 07-8742, 2010 U.S. Dist. LEXIS 79647, 2010 WL 3119452, at *7-10 (S.D.N.Y. Aug. 5, 2010)*.

Under these standards, as well as the more general standards set forth in *Behrend*, the Court concludes that the proposed RhoGAM yardstick supports a finding that plaintiffs will be able to prove the amount of damages using common evidence. Ortho points out important differences between the TBR and RhoGAM markets—most persuasively, the fact that the RhoGAM market featured three competitors, rather than two, during the period for which Dr. Beyer proposes to use it. However, these arguments do not persuade the Court that individualized evidence will be necessary to RhoGAM's use as a yardstick or that a damages model incorporating a RhoGAM yardstick could not evolve to become admissible at trial. [15] Although RhoGAM and TBR are not identical, they appear, on the present state of the record, to be "fair congeners." *Loeffel, 387 F. Supp. 2d at 812*. Moreover, even if the Court rejects the RhoGAM yardstick at the merits stage, the yardstick is merely one proposed method for calculating post-2005 damages; Dr. Beyer has proposed the use of Immucor's standard costs as an alternative.

In conclusion, under the standards set forth in *Behrend* and *Hydrogen Peroxide*, plaintiffs have satisfied the predominance requirement with respect to the amount of damages. Dr. Bronsteen's criticisms of Dr. Beyer's models are not so fundamental that the models could not "evolve to become admissible evidence." Plaintiffs have presented and applied viable methodologies to calculate damages using common proof.

d. Fraudulent Concealment

Finally, Ortho argues that individual issues related to fraudulent concealment will predominate at trial. ***HN31***[] To avoid the four-year statute of limitations on civil antitrust actions under *15 U.S.C. § 15b*, plaintiffs must show "(1) fraudulent concealment; (2) failure on the part of the plaintiff to discover his cause of action notwithstanding such concealment; and (3) that such failure to discover occurred [notwithstanding] the exercise of due care on the part of the plaintiff." *Linerboard, 305 F.3d at 160* **[**70]** (alteration in original) (internal quotation marks omitted). The first

---

Reply ¶ 73.) Thus, since plaintiffs do not allege that prices increased in 2000 due to unlawful collusion, "it is more accurate for but-for prices to equal actual prices in 2000 and to have but-for prices only start diverging from actual prices in 2001." (Id.)

[15] On the present **[**69]** state of the record, the Court is not entirely persuaded by Dr. Beyer's explanation for why he uses RhoGAM as a yardstick only when the RhoGAM market had three competitors. However, that issue does not require the Court to reject the RhoGAM yardstick at the certification stage.

of plaintiffs' class action complaints was filed on May 18, 2009. Thus, claims for damages based on pre-May 18, 2005 purchases of TBR are time-barred unless the purchaser can establish fraudulent concealment. Ortho argues that a finding of predominance is barred by the myriad individual issues that will be involved **[*246]** in analyzing all three elements of fraudulent concealment.

The Court rejects this argument. It is true that ***HN32***[] an action implicating fraudulent concealment raises some individual issues, including whether an individual plaintiff knew of the alleged violation and whether he exercised due diligence. However, in Linerboard, the Third Circuit held that, in general, "[i]t is the fact of concealment that is the polestar in an analysis of fraudulent concealment." *Linerboard, 305 F.3d at 163*. The weight of authority is in accord with that holding. See, e.g., *In re Pressure Sensitive Labelstock Antitrust Litig., No. 03-1556, 2007 U.S. Dist. LEXIS 85466, 2007 WL 4150666, at *21-22 (M.D. Pa. Nov. 19, 2007)*; *In re Flat Glass Antitrust Litig., 191 F.R.D. 472, 488 (W.D. Pa. 1999)*; see also Newberg on Class Actions § 4:26 (4th ed. 2002) ("Challenges **[**71]** based on the statute of limitations, fraudulent concealment, releases, causation, or reliance often are rejected and will not bar predominance satisfaction because those issues go to the right of a class member to recover, in contrast to underlying common issues of the defendant's liability.").

Nonetheless, there is no per se rule that individual issues regarding fraudulent concealment can never defeat a finding of predominance. If a case presented particularly complex or important individual issues, it might be appropriate to deny class certification. However, this is not such a case. Ortho has not persuaded the Court that here, unlike the typical price-fixing case, individualized issues are the "polestar" of the fraudulent-concealment inquiry. In this case, the fraudulent-concealment issue involves the same mix of individualized and common proof that was present in Linerboard and other cases. There is substantial common evidence that defendants took affirmative acts to conceal their alleged conspiracy—for example, the acts of concealment that surrounded the Thorne/Gendusa lunch in November 2000. Ortho cites evidence regarding individual plaintiffs' suspicions and due diligence. However, **[**72]** that evidence is highly similar to, and no more complex than, the individual evidence that failed to preclude certification in Linerboard. See *Linerboard, 305 F.3d 161-62 & n.13*. In this case, as in many others, individual issues relating to fraudulent concealment "can be resolved at a later damages phase" if necessary. *Linerboard, 305 F.3d at 163*. They do not defeat a finding of predominance. [16]

Thus, for the reasons stated above, the Court concludes that plaintiffs have satisfied the *Rule 23(b)(3)* predominance requirement with respect to fraudulent concealment.

2. Superiority

---

[16] Ortho argues in its surreply brief that requiring it to litigate individual plaintiffs' fraudulent concealment defenses in separate damages proceedings would "infringe Ortho's substantive rights and thereby violate the Rules Enabling Act." (Def.'s Surreply 22-23.) Ortho cites two cases for this proposition: *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*, and *Hohider v. United Parcel Service, Inc., 574 F.3d 169 (3d Cir. 2009)*. Neither case supports Ortho's argument.

In Dukes, the Supreme Court held that it would violate the Rules Enabling Act to calculate individual plaintiffs' damages by applying a formula, without conducting any "individualized proceedings." *131 S. Ct. at 2561*. That is very different from the procedure envisioned in this case, in which each individual plaintiff would **[**73]** be required to show that it was entitled to tolling of the statute of limitations.

In Hohider, the district court erroneously concluded that it did not need to determine whether individual employment-discrimination plaintiffs were qualified for their jobs in order to determine whether they were entitled to relief. *574 F.3d at 198*. Based on that conclusion, the court certified a class under *Rule 23(b)(2)*. The Third Circuit reversed, holding that an individualized analysis of each plaintiff's qualifications was, in fact, necessary to the adjudication of their claims and was fundamentally "incompatible with the requirements of *Rule 23*." *Id. at 196*. In this case, in contrast, there is no question that the essential elements of plaintiffs' claims and each plaintiff's entitlement to tolling of the statute of limitations will be adjudicated on the merits. Moreover, unlike in Hohider, analysis of those issues in a class action is compatible with the requirements of *Rule 23*. See, e.g., *Linerboard, 305 F.3d at 163*.

HN33[] With [**74] respect to superiority, Rule 23(b)(3) requires that a class action be "superior to other available methods for the fair and efficient adjudication of the controversy." To determine whether the requirement is satisfied, a court must "balance, in terms of fairness and efficiency, the merits of a class action against those of 'alternative available methods' of adjudication." Amchem, 83 F.3d at 632. "[S]imilar to the predominance requirement, [*247] the requirement of superiority ensures that resolution by class action will 'achieve economies of time, effort, and expense, and promote . . . uniformity of decision without sacrificing procedural fairness or bringing about other undesirable results.'" Flonase, 284 F.R.D. 207, 2012 U.S. Dist. LEXIS 83950, 2012 WL 2277840, at *25 (quoting Amchem, 521 U.S. at 615).

The superiority requirement is satisfied in this case, and Ortho does not dispute that point. Certification of the class will promote fairness and efficiency. If the class were not certified, "the numerous individual class members would be forced to file suit individually, producing numerous identical issues in each case that would waste judicial resources and leave all parties vulnerable to unfair inconsistencies." 2012 U.S. Dist. LEXIS 83950, [WL] at *26. Many [**75] courts have recognized that the cost of maintaining individual actions is frequently prohibitive in this type of antitrust litigation. See, e.g., Wellbutrin, 282 F.R.D. 126, 2011 U.S. Dist. LEXIS 90697, 2011 WL 3563835, at *17; Linerboard, 203 F.R.D. at 223. Due to the many common questions of law and fact involved in the class members' claims, class treatment will promote efficiency. For these reasons, plaintiffs have satisfied the superiority requirement under Rule 23(b)(3).

V. CONCLUSION

For the reasons set forth above, Plaintiffs' Motion for Class Certification is granted. An appropriate Order follows.

ORDER

AND NOW, this 22nd day of August, 2012, upon consideration of Plaintiffs' Motion for Class Certification (Document No. 140, filed September 16, 2011), Defendant Ortho-Clinical Diagnostics, Inc.'s Memorandum in Opposition to Plaintiffs' Motion for Class Certification (Document No. 165, filed March 2, 2012), the Reply in Support of Plaintiffs' Motion for Class Certification (Document No. 180, filed May 24, 2012), and Defendant Ortho-Clinical Diagnostics, Inc.'s Surreply Memorandum in Opposition to Plaintiffs' Motion for Class Certification (Document No. 184, filed July 2, 2012), after a hearing on July 26, 2012, and additional [**76] testimony on August 6, 2012, for the reasons set forth in the Memorandum dated August 22, 2012, **IT IS ORDERED** that Plaintiffs' Motion for Class Certification is **GRANTED.**

IT IS FURTHER ORDERED as follows:

1. The following litigation class is hereby certified pursuant to Federal Rule of Civil Procedure 23(a) and 23(b)(3): "All individuals and entities who purchased traditional blood reagents in the United States directly from Defendants Immucor, Inc., and Ortho-Clinical Diagnostics, Inc. at any time from January 1, 2000 through the present. Excluded from the Class are Defendants, and their respective parents, subsidiaries and affiliates, as well as any federal government entities."

2. Class claims, issues, and defenses are those detailed in the Memorandum of August 22, 2012, and the affirmative defenses raised in the answer of Ortho-Clinical Diagnostics, Inc.

3. The law firm of Spector Roseman Kodroff & Willis, P.C., is hereby appointed as counsel to the class.

4. Within 30 days of the date of this Order, the parties shall submit an agreed-upon proposed notice program and forms of notice to class members. If the parties are unable to agree as to the proposed notice program and/or forms of [**77] notice, they shall submit separate proposals.

BY THE COURT:

/s/ Hon. Jan E. DuBois

JAN E. DUBOIS, J.

Prof. JosÉ M. Font De SantiÁgo v. Burset

United States District Court for the District of Puerto Rico

August 22, 2012, Decided; August 22, 2012, Filed

Civil No. 11-2158 (FAB/BJM)

Reporter

2012 U.S. Dist. LEXIS 204000 *

PROF. DR. JOSÉ M. FONT DE SANTIÁGO, Plaintiff, v. HON. LUIS FORTUÑO BURSET, Governor of Puerto Rico, in his official and individual capacity, et al., Defendants.

Core Terms

immunity, damages, sovereign immunity, allegations, diversity, rights, qualified immunity, recommendation, Disabilities, Treaty, factual allegations, international law, cause of action, territory, license, suits, legislative immunity, declaration, references, parties, waived

Counsel: **[*1]** Jose M. Font-De Santiago, Plaintiff, Pro se, Hato Rey, PR.

For Luis Fortuno-Burset, in his official and individual capacity, Commonwealth of Puerto Rico, through its Secretary of Justice Guillermo Somoza, Guillermo Somoza, in his official and individual capacity, Department of Health of PR, though its Secretary Dr. Lorenzo Gonzalez, Lorenzo Gonzalez, in his official and individual capacity, Defendants: Eliezer Alberto Aldarondo-Lopez, LEAD ATTORNEY, Aldarondo & Lopez Bras, PSC, Guaynabo, PR.

For U.S. Bankruptcy Court, Puerto Rico District, through Judge Brian Tester, Defendant: Agnes I. Cordero, United States Attorneys Office, District of Puerto Rico, San Juan, PR.

For MAPFRE Insurance through its Chairman, Defendant: Jose E. Otero-Matos, Jose E. Otero Law Offices, San Juan, PR.

For ACE Insurance through its Chariman, Defendant: Francisco J. Colon-Pagan, Colon & Colon PSC, San Juan, PR.

For University of Puerto Rico through its President, Defendant: Alondra M. Fraga-Melendez, LEAD ATTORNEY, Alondra Fraga Melendez Law Offices, San Juan, PR.

For American International Insurance through its Chariman, Defendant: Vivian Patricia Ramos-Santiago, De Corral & De Mier, San Juan, PR.

Judges: BRUCE J. McGIVERIN, **[*2]** United States Magistrate Judge.

Opinion by: BRUCE J. McGIVERIN

Opinion

REPORT AND RECOMMENDATION

In a 53-page complaint, Prof. Dr. José M. Font De Santiágo ("Font"), *pro se*, sued the United States and Puerto Rico governments, several of their officers and agencies, and various private parties, seeking equitable relief and the payment of "$1,242,408,890.41 BILLIONS" in damages on a dizzying array of legal theories. (Docket No. 2, hereinafter "Compl.").

Before the court are motions to dismiss brought by the following defendants: Hospital Menonita ("Mennonite") (Docket No. 71); the Commonwealth of Puerto Rico, the Department of Health, Governor Luis Fortuño Burset, President of the Senate of Puerto Rico Thomas Rivera Schatz ("Rivera"), Attorney General Guillermo Somoza ("Somoza"), and Secretary of Health Lorenzo González ("Secretary González") (collectively, "Commonwealth defendants") (Docket No. 87); Speaker of the Puerto Rico House of Representatives Jennifer González ("Speaker González") (Docket No. 90); the University of Puerto Rico ("UPR") (Docket No. 91); American International Insurance Company ("American") (Docket No. 92); the United States of America, the U.S. Bankruptcy Court, and U.S. Bankruptcy Judge **[*3]** Brian Tester (collectively, "federal defendants") (Docket No. 94); and MAPFRE PRAICO Insurance Co. ("MAPFRE") (Docket No. 100). ACE Insurance Company ("ACE") moved to join American's motion. (Docket No. 104). The only captioned defendants not moving for dismissal are the Puerto Rico Board of Medical Examiners, the Puerto Rico Board of Licensure and Discipline, Engineering Builder Construction Group, S.E. ("EBCG"), and Jose Garcia, Inc.

Font has opposed the motions in a series of filings, most of which are written in a near-even mix of English and Spanish and seem to repeat portions of the complaint, coupled with demands for a jury trial and requests for my recusal.[1] (Docket Nos. 101, 102, 103, 110, 112, 115, 116). Several defendants moved to strike the material under Rule 12(f) as "scandalous." (Docket Nos. 105, 106, 107, 108).

The case was referred to me by the presiding district judge. (Docket No. 10). All parties appear to have consented to magistrate judge jurisdiction, but two reserved consent on "trial, the entry of a final judgment[,] and post-trial proceedings." (Docket Nos. 81, 82). Out of an abundance of caution, I therefore present my analysis of these motions as a report **[*4]** and recommendation to the presiding district judge. For the reasons that follow, I recommend that Font's complaint be **dismissed**.

SUFFICIENCY OF THE PLEADINGS

A complaint "must contain . . . a short and plain statement of the grounds for the court's jurisdiction . . . a short and plain statement of the claim showing that the pleader is entitled to relief; and a demand for the relief sought . . . ." *Fed. R. Civ. P. 8(a)*. *Pro se* complaints must be construed liberally, such that if the plaintiff "present[s] sufficient

---

[1] Font alleges that I have violated the Constitution and am partial to defendants' attorneys and requests my recusal. (See Docket No. 110; Docket No. 112, p. 2; Docket No. 113, p. 3; Docket No. 116, p. 2). "Any . . . magistrate judge of the United States shall disqualify himself in any proceeding in which his impartiality might reasonably be questioned," or "[w]here he has a personal bias or prejudice concerning a party . . . ." *28 U.S.C. §§ 455(a)*, *455(b)(1)*. Under *§ 455(a)*, recusal is required "only if the charge against [the judge] is supported by a factual foundation and the facts provide what an objective, knowledgeable member of the public would find to be a reasonable basis for doubting the judge's impartiality." *In re United States (Franco), 158 F.3d 26, 30 (1st Cir. 1998)* (internal quotation marks and citation omitted). The words "bias or prejudice" in *§ 455(b)(1)* "connote a favorable or unfavorable disposition or opinion that is somehow wrongful or inappropriate . . . ." *Liteky v. United States, 510 U.S. 540, 550 (1994)*. Importantly, "[t]he trial judge has a duty not to recuse himself or herself if there is no objective basis for recusal." *In re United States (Vásquez-Botet), 441 F.3d 44, 67 (1st Cir. 2006)*. Moreover, "judicial rulings alone almost never constitute a valid basis for a bias or partiality motion . . . ." *Liteky, 510 U.S. at 555-56*.

Judge Besosa already denied Font's first request for my recusal (Docket No. 111), but since *§ 455* calls for self-disqualification, I will nonetheless briefly consider the other motions. Font does not plainly state the reason he believes I am partial to the defense attorneys, making it difficult to assess his position. As each motion is accompanied by requests to deny the pending motions to dismiss and set the case for trial, the best inference I can draw is that Font is relying on the mere fact that his requests have not been granted. However, that fact is in the nature of ordinary case management and judicial determination, and does not on its own suggest any "wrongful or inappropriate" predisposition. See *Liteky, 510 U.S. at 555-56*. Because Font has not alleged anything that would establish even the objective appearance of partiality, his pending requests for my recusal are **denied**.

facts, the court may intuit the correct cause of action, even if it was imperfectly pled." *Ahmed v. Rosenblatt, 118 F.3d 886, 890 (1st Cir. 1997)*.

Notwithstanding the leniency in construction afforded *pro se* litigants, Font's complaint may be dismissed for failure to inform the defendants of the basis for his claims. "[C]onsidering the length of plaintiff's complaint, the constant repetitions, and the overall confusing nature of the complaint, it would be challenging, at best, for the defendants to be properly put on notice of plaintiff's claims. Indeed, the complaint does not permit the defendants to answer and prepare for trial." Cf. Laurence v. Wall, No. CA 07-066 ML, 2007 WL 1875795, at *1 (D.R.I. June 27, 2007). Moreover, Font has been a *pro se* litigant before this court for over 20 **[*5]** years, having filed complaints here at least nine times since 1990.[2] In observing this, I "[do] not intend to punish [him] for excessive litigiousness, but rather merely to charge him with the responsibilities accompanying his manifest experience with civil litigation." See *Sledge v. Kooi, 564 F.3d 105, 109 (2d Cir. 2009)*; Carey v. Ward, No. 06-CV-293-SM, 2007 WL 2682259, at *1 (D.N.H. Sept. 7, 2007) (*Pro se* plaintiff had been "a frequent litigant in this court and, given his substantial litigation experience, is presumed to fully understand that more is necessary to overcome a properly supported motion for summary judgment").

In short, none of the defendants can be expected to make heads or tails of what Font has accused them of, and any attempt to impose structure on his manifesto gives him far more credit than is due. Nonetheless, construing the pleadings "so as to do justice," *Fed. R. Civ. P. 8(e)*, I will proceed to an alternative analysis of why the complaint, no matter how generously construed, nonetheless fails to state a claim that is cognizable before this court.

STANDARDS FOR MOTIONS TO DISMISS

Several of the **[*6]** moving defendants challenge the court's subject matter jurisdiction. "[F]ederal jurisdiction is never presumed." *Viqueira v. First Bank, 140 F.3d 12, 16 (1st Cir. 1998)*. Rather, "the party invoking the jurisdiction of a federal court carries the burden of proving its existence." *P.R. Tel. Co. v. Telecomm's Reg. Bd. of P.R., 189 F.3d 1, 7 (1st Cir. 1999)*. There are two general rubrics for evaluating subject matter jurisdiction. First, a defendant may challenge the legal sufficiency of the facts offered by the plaintiff, while assuming their accuracy; the court then credits the plaintiff's factual allegations and draws reasonable inferences in its favor. *Valentín v. Hospital Bella Vista, 254 F.3d 358, 363 (1st Cir. 2001)*. Alternatively, the movant may challenge the truth of the plaintiff's facts and offer contrary evidence; the court then weighs the evidence. Id. Here, all of the challenges to subject matter jurisdiction go to the legal sufficiency of Font's allegations; thus, his allegations are taken as true for the jurisdictional analysis.

With the exception of a *res judicata* argument that I do not reach, the non-jurisdictional challenges likewise do not require the weighing of evidence, and are properly treated as motions to dismiss for failure to state a claim. To survive a motion to dismiss at the pleading stage, "an adequate complaint must provide fair notice to the defendants **[*7]** and state a facially plausible legal claim." *Ocasio-Hernández v. Fortuño-Burset, 640 F.3d 1, 12 (1st*

Sana Investment, Inc., Civil No. 00-1408 (RLA) (D.P.R. Feb. 2, 2000), *aff'd*, *6 Fed. Appx. 31 (1st Cir. 2001)*; Font v. González-Torrents, Civil No. 99-2128 (GG) (D.P.R. Oct. 19, 1999); Font v. United States, Civil No. 98-2440 (RLA) (D.P.R. Aug. 2, 1999); Font v. U.S. Trustee, Civil No. 97-1666 (DRD) (D.P.R. May 15, 1997); Font v. United States, Civil No. 91-2162 (JAF) (D.P.R. Feb. 11, 1992); *Font v. Dapena Yordan, 763 F. Supp. 680, 681 (D.P.R.)*, *aff'd*, ***946 F.2d 880, 1991 U.S. App. LEXIS 21169 (1st Cir. 1991)*** (unpublished). See also ***Font v. Albandoz, 946 F.2d 881, 1991 U.S. App. LEXIS 27438 (1st Cir. Sept. 11, 1991)*** (unpublished).

In 1999, Font also pursued several appeals before the D.C. Circuit. See *In re Font, No. 99-5016, 1999 U.S. App. LEXIS 4067 (D.C. Cir. Feb. 26, 1999)*; *Font. v. Clinton, No. 00-5039, 2000 WL 1279292 (D.C. Cir. Aug. 25, 2000)*; ***Font v. Torres, 221 F.3d 195, 2000 U.S. App. LEXIS 10891 (D.C. Cir. May 9, 2000)*** (unpublished); ***Font v. United States, 221 F.3d 196, 2000 U.S. App. LEXIS 10663 (D.C. Cir. Apr. 21, 2000)*** (unpublished); *Font v. U.S. ex rel. Reno, No. 99-5432, 2000 WL 621411 (D.C. Cir. Apr. 12, 2000)*.

Cir. 2011). A court parses the allegations of the complaint in two steps. First, "'legal conclusions couched as fact' or 'threadbare recitals of the elements of a cause of action'" are identified and completely disregarded. Id. (quoting Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1949-50 (2009)) (alteration marks omitted). The remaining "[n]on-conclusory factual allegations" are then "treated as true, even if seemingly incredible." Id. The overall standard is only satisfied if those facts "state a plausible, not a merely conceivable, case for relief"; however, a court must not "attempt to forecast a plaintiff's likelihood of success on the merits." Id.

FACTUAL ALLEGATIONS OF THE COMPLAINT

Font's complaint alleges the following facts, which are taken as true for this analysis.

Font graduated from medical school in the Dominican Republic, studied ophthalmology in Uruguay, was a professor at the Interamerican University in San Juan, and holds an honorary doctorate in constitutional and international law. (Id., p. 5). Font is not currently licensed to practice medicine in Puerto Rico, though it is unclear whether he once held such a license. (See id., p. 7). Font suggests that he once "had the opportunity to take the exam" in the **[*8]** United States—where, precisely, is unclear—but that he refused to do so. (Id., p. 14). Font's ancestors lived in Catalonia for over 1,200 years. (Id., p. 6). Font intends to return there one day to practice ophthalmologic surgery. (Id.).

Sometime in 2009, and again in 2011, Font attempted to purchase the Caguas Regional Hospital. (Id., p. 2). Font planned to establish a private medical school, renovate the hospital, and reopen it as a world-class institution called "Christ Miracle General & Specialties Hospital," annexed to the "Prof. Dr. José M. Font De Santiago School of Medicine." (Id., p. 4). Mennonite won the auction of the hospital. (Id., p. 9). The institution is currently closed, however. (Id., p. 10). A "small splinter group of vested interests," including First Medical and Hospital Pavia (neither of which are named as defendants), controls health services in Puerto Rico. (Id., p. 10). It may be inferred that some combination of proceedings before the Department of Health and/or the Bankruptcy Court resulted in Mennonite's acquisition of the hospital.

On August 26, 2002, at around 2:30 p.m., Font slipped and fell near a construction site on the UPR-Río Piedras campus, due to a buildup of sand and gravel. Font was one of five people to slip **[*9]** and fall in the same location that day. He suffered various fractures, became totally disabled in his right wrist, and lost 14 teeth. UPR and EBCG exercised control over the premises. (Id., p. 5).

Font mailed a set of exhibits to the Clerk of Court. (Docket No. 5). Excluding the untranslated documents, see Local Rule 5(g), the complaint incorporates the following:

- Font's expired passport. (Docket No. 5-1, p. 3).
- Font's doctoral degree, issued by the Eugenio María de Hostos International University in Santo Domingo, Dominican Republic. (Docket No. 5-1, p. 28).
- A certification that Font completed a postgraduate course in Ophthalmology at the University of the Republic, Montevideo, Uruguay. (Docket No. 5-1, p. 32).
- A diagram prepared by Font, illustrating the legal framework presumably governing, *inter alia*, his instant claims. (Docket No. 5-1, p. 43).
- Font's honorary degree in constitutional and international law, also issued by the Eugenio María de Hostos International University. (Docket No. 5-1, p. 45).
- Font's proposals for purchasing the Caguas Regional Hospital. (Docket No. 5-2, p. 5-34, 36-51, 55-58, 60, 66-77).

DISCUSSION

The complaint should be dismissed in its entirety. Font states no federal claims, **[*10]** complete diversity is lacking, and the court should decline supplemental jurisdiction over claims arising under Commonwealth law.

Read generously, the complaint challenges the lawfulness of any Puerto Rico law or regulation requiring examinations as a condition for issuing a medical license. This claim appears directed to several of the moving Commonwealth defendants — Puerto Rico itself, the Secretary of Justice, the Department of Health, the Board of Medical Examiners, and the Board of Licensure. (See Compl., p. 7). Font seems to seek monetary relief, an injunction granting him a medical license, and a declaration that the licensing exam is unconstitutional. The Commonwealth defendants argue generally that (1) claims for damages against the state are barred by the *Eleventh Amendment*, (2) that the individual defendants are entitled to qualified immunity, and (3) that Font has failed to plead any constitutional violations whatsoever, requiring dismissal of the complaint. (Docket No. 87). By like token, the complaint attacks the refusal (by whom is unclear) to grant Font ownership of the Caguas Regional Hospital. This grievance appears to implicate the Governor, the Secretary of Health, Speaker González, **[*11]** Senate President Rivera, Judge Tester, the Bankruptcy Court, and Mennonite. Font seems to seek monetary relief, orders "revoking" Mennonite's purchase of the hospital and immediately "giving" the hospital to himself, and the imprisonment of the individual defendants. In addition to the Commonwealth defendants' arguments, Speaker González highlights the doctrine of absolute legislative immunity, and the federal defendants point to the sovereign immunity of the United States and the absolute immunity for Judge Tester's judicial acts. Finally, the complaint seeks damages from UPR, EBCG, Jose Garcia, Inc., and insurance companies ACE, American, and MAPFRE, stemming from Font's 2002 accident on the UPR-Río Piedras campus. UPR invokes *Eleventh Amendment* immunity, while the insurers argue that the *res judicata* effect of a prior Commonwealth judgment precludes the instant suit.

To simplify the consideration of the defendants' arguments, I begin by reviewing a challenge to the service of process, and then consider whether diversity jurisdiction obtains, followed by the various sovereign and personal immunity doctrines limiting the scope of Font's suit. I then evaluate whether Font states a federal question under **[*12]** any of the remaining claims; finding none, I review the criteria for exercising supplemental jurisdiction over the claims under Commonwealth law. Finally, I address Font's requests for a jury trial.

I. Service of Process

The federal defendants complain that they have not been properly served. Under *Federal Rule of Civil Procedure 4(i)(2)-(3)*, the *sine qua non* of effective service on a U.S. agency, corporation, officer, or employee, including individual-capacity suits "for an act or omission occurring in connection with duties performed on the United States' behalf," is service on the United States itself. No proof of such service is evident in the record, but in light of the requirement that courts extend a "reasonable time to cure" this type of failure, see *Fed. R. Civ. P. 4(i)(4)(B)*, it is not clear that dismissal lies here. Moreover, the substantive infirmity of Font's complaint counsels an ultimate determination of whether the federal defendants are entitled to *Rule 12(b)* dismissal.

II. Diversity Jurisdiction

As a threshold matter, Font's invocation of diversity jurisdiction is plainly deficient. A district court has original jurisdiction of a civil action where the amount in controversy is at least $75,000 and the parties are citizens of different states. *28 U.S.C. § 1332(a)*. **[*13]** This diversity of citizenship "must be complete"; that is, no two parties on opposite sides of the case may hail from the same state. *DCC Operating, Inc. v. Rivera Siaca (In re Olympic Mills Corp.), 477 F.3d 1, 6 (1st Cir. 2007)*. A natural person is a citizen of the state where he is domiciled; that is, where he is physically present, with the intent to make that place his home. *Rodríguez-Díaz v. Sierra-Martínez, 853 F.2d 1027, 1029 (1st Cir. 1988)*. A corporation is a citizen of "any State by which it has been incorporated and of the State where it has its principal place of business . . . ." *§ 1332(c)(1)*. When diversity is challenged, a plaintiff bears the burden of establishing jurisdiction. *Media Duplication Servs., Ltd. v. HDG Software, Inc., 928 F.2d 1228, 1236 (1st Cir. 1991)*. And importantly, "pro se status does not insulate a party from complying with procedural and substantive law." *Ahmed, 118 F.3d at 890*.

Here, Font alleges that he is a citizen of Puerto Rico. (Compl., p. 1-2). Mennonite asserts that because it is a Puerto Rico corporation, it is a Puerto Rico citizen, destroying complete diversity. (Docket No. 71, p. 7-8). In less clear terms, the Commonwealth defendants also imply that they are Puerto Rico citizens. (Docket No. 87, p. 5). Font offers no evidence refuting these contentions, and therefore has failed to carry the burden of establishing complete diversity. Thus, to vest this court with original jurisdiction, Font must state causes of action **[*14]** arising under federal law. See *28 U.S.C. § 1331(a)*.

III. Immunities From Suit

Font's complaint names a variety of governmental entities and officers, each of which are immune from being sued for damages. I consider (1) the federal government's sovereign immunity; (2) Puerto Rico's immunity under the *Eleventh Amendment*; (3) absolute legislative immunity; (4) absolute judicial immunity; and (5) qualified immunity for state and federal officers.

A. The Federal Government's Sovereign Immunity

Congress may waive sovereign immunity by creating specialized causes of action, such as the Federal Tort Claims Act, or by waiving immunity in an agency's organic statute. See *FDIC v. Meyer, 510 U.S. 471, 475-83 (1994)* (analyzing whether Federal Savings and Loan Insurance Corporation lacked sovereign immunity). But "[a]bsent a waiver, sovereign immunity shields the Federal Government and its agencies from suit. . . . Sovereign immunity is jurisdictional in nature. Indeed, the 'terms of [the United States'] consent to be sued in any court define that court's jurisdiction to entertain the suit.'" *Id. at 475* (quoting *United States v. Sherwood, 312 U.S. 584, 586 (1941))* (alterations in original, other citations omitted).

This is so even considering the complaint's recurrent mantra that "the 'sovereign immunity' cannot be invoked to avoid the payment **[*15]** of damages under the subterfuge of financial ruin of the state." (Compl., p. 2, 21, 38, 49) (citing *Riss v. City of New York, 22 N.Y.2d 579 (1968))*. In that case, the highest court of New York held that city police had no tort duty to provide personal protection to individual citizens upon request. The dissenting justice likened the decision to an opening-the-floodgates argument once raised against legislation waiving sovereign immunity. It is enough to say that even if the dissenting justice's indictment of common-law sovereign immunity were persuasive, the Supreme Court has repeatedly upheld the doctrine in the modern era, and this court is bound to follow those decisions. Because the complaint does not present any facts tending to show that the federal government has waived its sovereign immunity, Font's claims for damages against the United States government are barred.

B. Puerto Rico's *Eleventh Amendment* Immunity

The *Eleventh Amendment* bars suits against state governments, with the exception of suits for prospective injunctive or declaratory relief. *Vaquería Tres Monjitas, Inc. v. Irizarry, 587 F.3d 464, 477-78 (1st Cir. 2009)*. *Eleventh Amendment* immunity extends to the Commonwealth of Puerto Rico as it would to one of the fifty states. *Torres v. P.R. Tourism Co., 175 F.3d 1, 3 (1st Cir. 1999)*. That immunity may sometimes be abrogated by Congress, see *Torres-Alamo v. Puerto Rico, 502 F.3d 20, 24 (1st Cir. 2007)*, and may sometimes be waived by the Commonwealth, see *Arecibo Cmty. Health Care, Inc. v. Puerto Rico, 270 F.3d 17, 24-25 (1st Cir. 2001)*. But **[*16]** generally, suits for the direct payment of money from the state treasury—*e.g.*, for money damages or equitable restitution—must be dismissed. *Tres Monjitas, 587 F.3d at 478* (citing *Edelman v. Jordan, 415 U.S. 651, 664-65 (1974))*.

Here, the complaint's factual allegations suggest no basis for abrogation or waiver of this immunity, so Font's damages and restitution claims against the Commonwealth and its agencies, including UPR, should be dismissed.

C. Legislative Immunity

Speaker González invokes the doctrine of absolute legislative immunity. Individuals performing "'legislative functions'" in Puerto Rico, as in the fifty states, are entitled to absolute immunity from federal civil suit based on those legislative acts. *Torres Rivera v. Calderón Serra, 412 F.3d 205, 212 (1st Cir. 2005)* (quoting *Bogan v. Scott-Harris, 523 U.S. 44, 55 (1998))*. It is the function being performed, rather than the individual's title, that creates legislative immunity; thus, for example, a governor is immune from liability for signing a bill into law. See *id. at 212-13* (collecting cases). Legislative acts are those that are (1) driven by "'generalizations concerning a policy or state of affairs,'" rather than "specific facts relating to particular individuals or situations," and (2) which "'involve[] establishment of a general policy'" rather than "'singl[ing] out specifiable individuals and affect[ing] them **[*17]** differently from others.'" *Acevedo-García v. Vera-Monroig, 204 F.3d 1, 9 (1st Cir. 2000)* (quoting *Cutting v. Muzzey, 724 F.2d 259, 261 (1st Cir. 1984))*.

To the extent Font seeks damages from any of the defendants based on the act of enacting any law, such as the medical license requirement or ownership restrictions on hospitals, those defendants are shielded by absolute immunity. However, only qualified immunity shields them from liability for following the mandates of that legislation. See *Torres Rivera, 412 F.3d at 214*.

D. Judicial Immunity

The United States argues that absolute judicial immunity also bars some of Font's claims. It is foundational that "judges . . . are not liable to civil actions for their judicial acts, even when such acts are in excess of their jurisdiction, and are alleged to have been done maliciously or corruptly." *Bradley v. Fisher, 80 U.S. (13 Wall.) 335, 351 (1871)*. Two factors determine whether an act is judicial: (1) "whether it is a function normally performed by a judge," and (2) whether the parties "dealt with the judge in his judicial capacity." *Stump v. Sparkman, 435 U.S. 349, 362 (1978)*. This immunity is absolute unless the judge "has acted in the 'clear absence of all jurisdiction.'" *Id. at 356* (quoting *Bradley, 80 U.S. (13 Wall.) at 351*). To the extent Font is attempting to sue Judge Tester for his judicial actions in the Bankruptcy Court, the action for damages is barred by his absolute immunity.

E. Qualified Immunity

As the Commonwealth **[*18]** defendants observe, they are entitled to qualified immunity because Font has not alleged that any of the named individuals personally deprived him of any rights. The qualified immunity doctrine provides "an immunity from suit and not a mere defense to liability," weeding out "insubstantial claims" even before discovery has occurred. *Maldonado v. Fontanes, 568 F.3d 263, 268 (1st Cir. 2009)*. An individual is entitled to immunity from suits for damages where either (1) the plaintiff fails to state a violation of a constitutional right, or (2) any such right was not "clearly established" when the alleged violation occurred. *Id. at 269*. "Although this case involves suits under both § 1983 [i.e., against Puerto Rico officers] and *Bivens* [i.e., against federal officers], the qualified immunity analysis is identical under either cause of action." See *Wilson v. Layne, 526 U.S. 603, 609 (1999)*. Importantly, an individual's office, standing alone, is insufficient to hold him or her liable for the government's conduct. *Ayala-Rodríguez v. Rullán, 511 F.3d 232, 236 (1st Cir. 2007)* (section 1983); *Ruiz Rivera v. Riley, 209 F.3d 24, 28 (1st Cir. 2000)* (*Bivens*). Rather, a plaintiff must "establish that her constitutional injury resulted from the direct acts or omissions of the official, or from indirect conduct that amounts to condonation or tacit authorization." *Rodríguez-García v. Miranda-Marín, 610 F.3d 756, 768 (1st Cir. 2010)*.

Here, the glaring absence of any answer to the questions of who did **[*19]** what, where, when, and how, is dispositive. The complaint does not allege or imply the personal involvement of any particular government officer. Such allegations are a *sine qua non* for personal-capacity liability; their absence means that regardless of the theory of recovery, the individuals are entitled to qualified immunity.

IV. Claims Arising Under Federal Law

Although this panoply of immunities cuts out the bulk of Font's claims for damages, it is still necessary to consider whether his allegations have established any other viable federal-question claims. I first turn to Font's constitutional claims, followed by his references to the Sherman Act, the Americans with Disabilities Act, and international law.

A. Constitutional Claims

Font's "Constitutional Exposition" (Compl., p. 12-50) name-checks the prohibitions on bills of attainder, cruel and unusual punishment, ex post facto laws, slavery, the impairment of contracts, deprivations of life, liberty, and property without due process, denial of equal protection, and takings for public use without just compensation. Given the complaint's lack of factual detail, a superficial review of these principles demonstrates their clear inapplicability. **[*20]**

Font does not allege that he has suffered any criminal punishment, rendering his references to the Ex Post Facto Clause and *Cruel and Unusual Punishment Clause* inapposite. See *Collins v. Youngblood, 497 U.S. 37, 41 (1990)* ("[I]t has long been recognized by this Court that the constitutional prohibition on *ex post facto* laws applies only to penal statutes which disadvantage the offender affected by them."); *Ingraham v. Wright, 430 U.S. 651, 664* (*Eighth Amendment* "was designed to protect those convicted of crimes."). He does not allege that any law applied to him "is pervaded with the key features of a bill of attainder: a law that legislatively determines guilt and inflicts punishment upon an identifiable individual without provision of the protections of a judicial trial." See *Nixon v. Administrator of General Servs., 433 U.S. 425, 468 (1977)*. And Font alleges neither the use nor the threat of physical restraint, physical injury, or legal coercion forcing him to work for anyone in violation of the *Thirteenth Amendment*. See *United States v. Kozminski, 487 U.S. 931, 952 (1988)* (construing amendment as applied by criminal statutes forbidding involuntary servitude). He does not allege the existence of any contract between himself and another party, let alone a contract that has been impaired. See also *U.S. Trust Co. of N.Y. v. New Jersey, 431 U.S. 1, 17 (1977)* ("[A]s a preliminary matter, appellant's claim requires a determination that the [legislative act] has the effect of impairing a contractual obligation."). He does not relate **[*21]** any facts describing the means by which he was deprived of any liberty or property interest, making it impossible to ascertain that any such deprivation occurred "without constitutionally adequate process." *González-Droz v. González-Colón, 660 F.3d 1, 13 (1st Cir. 2011)*. Likewise, he has not alleged an equal protection violation, since the complaint sheds no light on how he "was treated differently from others similarly situated . . . based on impermissible considerations such as race, religion, intent to inhibit or punish the exercise of constitutional rights, or malicious or bad faith intent to injure a person." *Clark v. Boscher, 514 F.3d 107, 114 (1st Cir. 2008)* (citation and internal quotation marks omitted). And the *Takings Clause* does not require compensation for property "already lawfully acquired under the exercise of governmental authority other than the power of eminent domain." See *Bennis v. Michigan, 516 U.S. 442, 452 (1996)* (civil forfeiture).

In short, regardless of what acts Font's constitutional complaints are directed towards, he has failed to plead the predicate facts to support any of the diverse theories he suggests.

B. The Sherman Act

Font also refers to violations of ***antitrust law*** and antimonopoly law, presumably pegged to his allegations about the hospital market in Puerto Rico. Under *section 1* of the Sherman Act, "[e]very contract, combination **[*22]** . . . or conspiracy, in restraint of trade or commerce among the several States" is unlawful. *15 U.S.C. § 1*. The elements of a *section 1* claim are (1) concerted action, and (2) an illegal restraint of trade. *Euromodas, Inc. v. Zanella, Ltd., 368 F.3d 11, 16 (1st Cir. 2004)*. Importantly, "when allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 557 (2007)*.

Section 2 makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person . . . to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. Monopolization occurs when a person (1) has monopoly power, and (2) "has engaged in impermissible 'exclusionary' practices with the design or effect of protecting or enhancing its monopoly position." *Coastal Fuels of P.R., Inc. v. Caribbean Petrol. Corp., 79 F.3d 182, 195 (1st Cir. 1996)* (quoting Herbert Hovenkamp, Federal Antitrust Policy § 6.4a (1994)). Monopoly power, or the potential for monopoly power, is evaluated in light of the "relevant market" and "the defendant's ability to lessen or destroy competition in that market." *Coastal Fuels, 79 F.3d at 196* (quoting *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456 (1993))*.

Beyond affixing conclusory labels, Font does not specify what unlawful agreements or exclusionary monopolistic practices **[*23]** have allegedly taken place. The bare fact of Mennonite's acquisition of the hospital Font set his eyes on cannot, without more, show either parallel conduct or a capacity to injure competition in the marketplace.

C. Americans with Disabilities Act

Font also makes scattered references to the Americans with Disabilities Act of 1990, as amended, as an anchor for federal jurisdiction. But even granting, *arguendo*, that Font may have some disability as defined under the Act, the facts he has narrated fail to state a violation of its operative provisions. He does not allege that discrimination on the basis of disability has tainted any employment decisions, as prohibited by Title I of the Act. See § 12112(a). Nor can he establish a Title II claim that "by reason of" any disability he has been "excluded from participation in or . . . denied the benefits of the services, programs, or activities of a public entity, or . . . subjected to discrimination by any such entity." § 12132. And the facts do not suggest he has been "discriminated against . . . in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation," as proscribed **[*24]** by Title III. § 12182(a). Finally, there are no allegations that he "has opposed any act or practice made unlawful by" the ADA, or that he has "exercised or enjoyed, or . . . aided or encouraged any other individual in the exercise or enjoyment of, any right granted or protected" by the ADA. See § 12203(a)-(b). Font therefore has stated no ADA cause of action.

D. The Treaty of Paris and International Law

Font frequently refers to the Treaty of Paris of 1898, the Universal Declaration of Human Rights, and various Latin phrases sounding in customary international law. None of those, however, can establish a cause of action on Font's facts. I first consider the 1898 Treaty of Paris between the United States and Spain, under which control of Puerto Rico was ceded to the United States. Font cites Article IX, which provides:

> *Spanish subjects, natives of the Peninsula, residing in the territory over which Spain by the present treaty relinquishes or cedes her sovereignty*, may remain in such territory or may remove therefrom, retaining in either event all their rights of property, including the right to sell or dispose of such property or of its proceeds; and they *shall also have the right to carry on their industry, commerce,* ***[*25]*** *and professions, being subject in respect thereof to such laws as are applicable to other foreigners*. In case they remain in the territory they may preserve their allegiance to the Crown of Spain by making, before a court of record, within a year from the date of the exchange of ratifications of this treaty, a declaration of their decision to preserve such allegiance; in default of which declaration they shall be held to have renounced it and to have adopted the nationality of the territory in which they may reside.
> The civil rights and political status of the native inhabitants of the territories hereby ceded to the United States shall be determined by the Congress.

Treaty of Peace, U.S.-Spain, art. IX, Dec. 10, 1898, *as quoted inDownes v. Bidwell, 182 U.S. 244, 339-40 (1901)* (White, J., concurring) (emphasis added). But this article only confers rights on a small group of people: Spanish-born subjects who were then residing in ceded territory. Font was born in Puerto Rico in 1950, and therefore has no rights under this provision. (See Docket No. 5-1, p. 3).

Even less compelling is his invocation of the Universal Declaration of Human Rights, since that document "is precatory: that is, it creates aspirational goals but not legal **[*26]** obligations, even as between states." *Igartua-De La Rosa v. United States, 417 F.3d 145, 150 (1st Cir. 2005)* (citing *Sosa v. Alvarez-Machain, 542 U.S. 692, 734 (2004))*. And "[a]lthough sometimes said by enthusiasts to be law like other law, customary international law is a diffuse and often highly uncertain body of norms whose force and enforceability vary greatly even in the international sphere; and its status in our domestic courts is even more qualified." *Id. at 151*.

E. Summary

Font's factual allegations do not state any discernible claim arising under federal law. I stress that the fatal defect is not one of legal technicality, but of a failure to allege that any events taking place in the world have offended his federal rights. Cf. *Ahmed, 118 F.3d at 890* (affirming dismissal where "the formal elements of the claim were stated without the requisite supporting facts."). Taking every *fact*—not conclusion—in Font's narrative as true, he is not entitled to any redress under the constitution, laws, or treaties of the United States; therefore, all defendants are entitled to dismissal of the federal claims against them.

V. Supplemental Jurisdiction

Once all claims conferring original jurisdiction have been dismissed, a district court has discretion, assessing "the totality of the attendant circumstances," in retaining supplemental jurisdiction **[*27]** over other claims. *28 U.S.C. § 1367(c)*; *Rodríguez v. Doral Mortgage Corp., 57 F.3d 1168, 1177 (1st Cir. 1995)*. Factors informing this exercise of discretion include judicial economy, convenience, fairness, and comity. Id. (citing *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350 n. 7 (1988))*. But "[a]s a general principle, the unfavorable disposition of a plaintiff's federal claims at the early stages of a suit" counsel dismissal without prejudice. Id.

This case is only at the pleading stage, and no discovery appears to have taken place. Therefore, judicial economy, convenience, and fairness all weigh towards dismissing the Puerto Rico claims without prejudice.[3] See *Martínez v. Colón, 54 F.3d 980, 990-91 (1st Cir. 1995)* (affirming dismissal "far in advance of trial" at summary judgment).

VI. Pretrial Dismissal and the *Seventh Amendment*

In the portions of Font's opposing motions that are written in English, he directs the court's attention to the *Seventh Amendment*, which provides that "In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise reexamined in any Court of the United States, than according to the rules of the common law." Font takes the position that "ALL[] 'motion[s] to dismiss' of the lawyers . . . VIOLATE[] the JUST & IMPARTIAL JURY TRIAL under [the] GUARANTEE **[*28]** in [the] *VII Amendment*," and requests that a jury be impaneled forthwith. (See Docket No. 101, 102, 103). But "the thrust of the Amendment was to preserve the right to jury trial as it existed in 1791." *Curtis v. Loether, 415 U.S. 189, 193 (1974)*. It has long been understood that "[n]o one is entitled in a civil case to trial by jury, unless and except so far as there are issues of fact to be determined." *In re Peterson, 253 U.S. 300, 310 (1920)*. Because the jurisdictional and legal analyses above do not resolve any disputed issues of fact (indeed, the complaint's factual allegations are taken as true), dismissal does not violate Font's *Seventh Amendment* rights.

---

[3] I do not address the insurance defendants' *res judicata* arguments for two reasons. First, since supplemental jurisdiction is not proper, analyzing an affirmative defense would invite decision on a Commonwealth-law controversy that is not before this court. In any case, the insurance defendants filed only untranslated Spanish-language documents from the Commonwealth courts. This violates Local Rule 5(g), and considering such documents to decide a *res judicata* defense could be reversible error. See *Puerto Ricans for Puerto Rico Party v. Dalmau, 544 F.3d 58, 67 (1st Cir. 2008)*.

CONCLUSION

For the foregoing reasons, I recommend that the pending motions to dismiss be **GRANTED**, and that Font's complaint be **DISMISSED**.

This report and recommendation is filed pursuant to *28 U.S.C. 636(b)(1)(B)* and Rule 72(d) of the Local Rules of this Court. Any objections to the same must be specific and must be filed with the Clerk of Court within fourteen (14) days of its receipt. Failure to file timely and specific objections to the report and recommendation is a waiver of the right to appellate review. See *Thomas v. Arn, 474 U.S. 140, 155 (1985)*; *Davet v. Maccorone, 973 F.2d 22, 30-31 (1st Cir. 1992)*; *Paterson-Leitch Co. v. Mass. Mun. Wholesale Elec. Co., 840 F.2d 985 (1st Cir. 1988)*; *Borden v. Sec'y of Health & Human Servs., 836 F.2d 4, 6 (1st Cir. 1987)*.

IT IS SO RECOMMENDED.

In San Juan, Puerto Rico, this 22nd day of August, 2012.

/s/ Bruce J. McGiverin

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN1[] **Class Actions, Certification of Classes**

To obtain class certification, the plaintiffs must meet all four requirements of *Fed. R. Civ. P. 23(a)*, and at least one of the requirements of *Rule 23(b)*. Class certification requires a finding that each of the requirements of *Rule 23* has been met by a preponderance of the evidence.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] **Class Actions, Certification of Classes**

The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only. As recently noted by the United States Supreme Court, *Fed. R. Civ. P. 23* does not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule, that is, he must be prepared to prove that there are in fact sufficiently numerous parties, common issues of law or fact, etc. In ruling on a class certification motion, a court must take a close look at the facts relevant to the certification question, even if those facts tend to overlap with the merits of the case. While an evaluation of the merits is not part of a *Rule 23* analysis, the factors spelled out in *Rule 23* must be addressed through findings, even if they overlap with issues on the merits. The Supreme Court notes that sometimes it may be necessary for the court to probe behind the pleadings before coming to rest on the certification question, and that certification is proper only if the trial court is satisfied, after a rigorous analysis, that the prerequisites of *Rule 23(a)* have been satisfied. The class determination generally involves considerations that are enmeshed in the factual and legal issues comprising the plaintiff's cause of action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN3[] **Class Actions, Certification of Classes**

The rigorous analysis that must be undertaken in the class certification context extends to disputes between experts: Resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court, no matter whether a dispute might appear to implicate the credibility of one or more experts. Of course, there are limits to a court's resolution of expert disputes, and a court should only engage itself in statistical dueling of experts if such dueling presents a valid basis for granting or denying class certification. As noted by the Third Circuit, that weighing expert opinions is proper does not make it necessary in every case or unlimited in scope, and rigorous analysis need not be hampered by a concern for avoiding credibility issues; as findings with respect to class certification do not bind the ultimate fact-finder on the merits. A court's determination that an expert's opinion is persuasive or unpersuasive on a *Fed. R. Civ. P. 23* requirement does not preclude a different view at the merits stage of the case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN4[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(a)(1) provides that one of the requirements to bring a class action is that the class be so numerous that joinder of all members is impracticable. The Fourth Circuit has held that no specified number is needed to maintain a class action. The United States District Court for the District of Maryland has previously noted that, generally speaking, courts find classes of at least 40 members sufficiently large to satisfy the impracticability requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN5[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(a)(2) requires a question of law or fact common to the class. A common question is one that can be resolved for each class member in a single hearing, and does not turn on a consideration of the individual circumstances of each class member. The Fourth Circuit has held that, in a class action brought under Rule 23(b)(3), the commonality requirement of Rule 23(a)(2) is subsumed under, or superseded by, the more stringent Rule 23(b)(3) requirement that questions common to the class predominate over other questions. In the Fourth Circuit, the common questions must be dispositive and overshadow other issues. Thus, the commonality requirement is relatively toothless in comparison with the related requirements of typicality and predominance. As the United States Supreme Court has noted, commonality requires the plaintiff to demonstrate that the class members have suffered the same injury.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

HN6[] Prerequisites for Class Action, Commonality

The commonality element of Fed. R. Civ. P. 23(a) is satisfied because there is at least one common question, namely, whether the alleged conspiracy in fact existed. Accordingly, the United States District Court for the District of Maryland finds by a preponderance of the evidence that the existence of the alleged conspiracy, standing alone, is sufficient to establish commonality.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN7[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(a)(3) requires that the claims or defenses of the representative parties are typical of the claims or defenses of the class. Courts have recognized that the commonality and typicality requirements of Rule 23(a) tend to merge. Both serve as guideposts for determining whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected. The typicality requirement determines whether a sufficient relationship exists between the injury to the named plaintiff and the conduct affecting the class, so that the court may properly attribute a collective nature to the challenged conduct. The class representative must be part of the class and possess the same interest and suffer the same injury as the class members. Essentially, the typicality requirement ensures that only those plaintiffs who can advance the same factual and legal arguments may be grouped together as a class. The essence of the typicality requirement is captured by the notion that as goes the claim of the named plaintiff, so goes the claims of the class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN8[] Class Actions, Certification of Classes

The final prerequisite under Fed. R. Civ. P. 23(a) is that the persons representing the proposed class must be able to fairly and adequately to protect the interests of all members of the class. The adequacy inquiry under Rule 23(a)(4) serves to uncover conflicts of interest between named parties and the class they seek to represent. As noted by the Fourth Circuit, for a conflict to defeat class certification, the conflict must be more than merely speculative or hypothetical; it must be fundamental and go to the heart of the litigation. The typicality requirement has been liberally construed by courts and in the antitrust context, typicality will be established by the plaintiffs and all class members alleging the same antitrust violations by the defendants.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN9[] Class Actions, Certification of Classes

To establish the typicality prong of *Fed. R. Civ. P. 23(a)*, a class representative must be part of the class and possess the same interest and suffer the same injury as the class members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN10[] Prerequisites for Class Action, Adequacy of Representation

Pursuant to the 2003 amendments to *Fed. R. Civ. P. 23*, a court's inquiry into the qualifications and experience of the plaintiffs' counsel are no longer investigated under *Rule 23(a)*, but instead are to be determined under *Rule 23(g)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN11[] Prerequisites for Class Action, Predominance

When the plaintiffs have satisfied *Fed. R. Civ. P. 23(a)*'s requirements, the court turns *Rule 23(b)(3)*, which requires a finding that common questions predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. The *Rule 23(b)(3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. Although the predominance inquiry of *Rule 23(b)(3)* is similar to the commonality requirement of *Rule 23(a)*, the Fourth Circuit has held that the predominance requirement is more stringent than the *Rule 23(a)* requirement. The *Rule 23(b)(3)* criterion is far more demanding than the commonality requirement. In determining whether the plaintiffs have satisfied their burden, the court must conduct a rigorous analysis of the *Rule 23(b)(3)* requirements and the plaintiffs' methodology for proving those requirements, and must act as finder of fact in the face of conflicting expert testimony.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN12[] Prerequisites for Class Action, Commonality

In order to meet the predominance prong of *Fed. R. Civ. P. 23(b)(3)*, a plaintiff must demonstrate that the elements of the legal claim is capable of proof at trial through evidence that is common to the class rather than individual. Because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] **Class Actions, Certification of Classes**

In ruling on class certification, a court may be required to resolve disputes concerning the factual setting of the case. That extends to the resolution of expert disputes concerning the import of evidence concerning the factual setting.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

When a buyer shows that the price paid by him is illegally high and also shows the amount of the overcharge, he has made out a prima facie case of injury and damage.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN15[] **Class Actions, Certification of Classes**

In considering the *Fed. R. Civ. P. 23(b)(3)* predominance requirement, a court's rigorous analysis begins with the elements of the underlying cause of action. If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN16[] **Per Se Rule & Rule of Reason, Sherman Act**

To establish an antitrust violation, a plaintiff must prove three elements: (1) a violation of the antitrust laws; (2) individual injury resulting from that violation; and (3) measurable damages. *15 U.S.C.S. § 1*. However, at the class certification stage, the plaintiffs need only show by a preponderance of the evidence that these elements are capable of proof at trial through evidence that is common to the class rather than individual to its members.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN17[] **Cartels & Horizontal Restraints, Price Fixing**

A horizontal price-fixing scheme is a per se violation of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN18[] **Cartels & Horizontal Restraints, Price Fixing**

The second element of an antitrust action in violation of the Sherman Act, *15 U.S.C.S. § 1*, requires the plaintiffs to establish that the class members suffered injury from the alleged price-fixing conspiracy. That element, commonly referred to as impact, can be likened to the causation element in a negligence cause of action. The term means simply that the antitrust violation caused injury to the antitrust plaintiff. Of course, at the certification stage in the litigation, the plaintiffs need not prove this element, instead, the task for plaintiffs at class certification is to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members. In other words, the plaintiffs' burden of showing antitrust impact is satisfied by its proof of some damage flowing from the unlawful conspiracy; inquiry beyond this minimum point goes only to the amount and not the fact of damage. It is enough that the illegality is shown to be a material cause of the injury. That elements involves two distinct questions: One is the familiar factual question whether the plaintiff has indeed suffered harm, or injury-in-fact. The other is the legal question whether any such injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN19[] **Cartels & Horizontal Restraints, Price Fixing**

The Eighth Circuit defines common proof in a price fixing case as follows: The nature of the evidence that will suffice to resolve a question determines whether the question is common or individual. If, to make a prima facie showing on a given question, the members of a proposed class will need to present evidence that varies from member to member, then it is an individual question. If the same evidence will suffice for each member to make a prima facie showing, then it becomes a common question. Often in horizontal price fixing cases, the plaintiffs seek to show that element is capable of common proof by comparing a hypothetical but-for price, for example, the price that would have been paid in the absence of the conspiracy, with the prices actually paid by the plaintiffs during the class period. In that kind of but-for comparison, prices are analyzed in a scenario that is free of the restraints and conduct alleged to be anticompetitive. If the plaintiffs can show that they paid a higher actual price than the but-for price using evidence common to the class, they have met their burden on the impact element.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN20[] **Cartels & Horizontal Restraints, Price Fixing**

As the Rail Freight court has summarized, there are various methods by which plaintiffs may prove that common evidence is capable of proving impact: One way of showing that common questions predominate on the issue of injury-in-fact is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an economic regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the but-for level for all the plaintiffs. Comparing but-for prices with actual transaction prices by regression analysis, however, is not the only way for the plaintiffs to succeed in a motion for class certification. Other accepted types of evidence for establishing class-wide injury-in-fact include: evidence of lock-step increases of national price lists; proof that defendants conspired to maintain an inflated base price from which all negotiations began; and evidence of structural factors that make an industry susceptible to successful collusion. Ultimately, the question is whether the plaintiffs have shown by a preponderance of the evidence, through regressions, structural industry factors, or any other persuasive means, that methods of common proof exist to show class-wide impact.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN21[] **Class Actions, Certification of Classes**

Because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case. Common questions predominate where even if each class member were to bring suit individually, each plaintiff would have to allege and prove virtually identical facts.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

HN22[] **Remedies, Damages**

The final element the plaintiffs in an antitrust suit will have to prove at trial is that they suffered measurable damages. In contrast to the impact prong of the Fed. R. Civ. P. 23(b) analysis, which asks only whether the plaintiffs were harmed, the damages prong asks by how much. At the class certification stage, the plaintiffs must show, by a preponderance of the evidence, that they will be able to prove damages using common proof.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN23[] Remedies, Damages

The Fourth Circuit has consistently held that average or aggregate damages are not an appropriate measure of damages in an antitrust case. The need to inquire into individual damage calculations, however, is not an impediment to class certification. As summarized by the Fourth Circuit, a damages inquiry necessarily requires individual proof: Fed. R. Civ. P. 23 contains no suggestion that the necessity for individual damage determinations destroys commonality, typicality, or predominance, or otherwise forecloses class certification. In fact, Rule 23 explicitly envisions class actions with such individualized damage determinations. The necessity of making an individualized determination of damages for each class member generally does not defeat commonality. Indeed, in actions for money damages under Rule 23(b)(3), courts usually require individual proof of the amount of damages each member incurred. When such individualized inquiries are necessary, if common questions predominate over individual questions as to liability, courts generally find the predominance standard of Rule 23(b)(3) to be satisfied.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN24[] Remedies, Damages

As discussed by the Second Circuit, there are at least five methods to deal with the individual damages inquiry in an antitrust class action: (1) bifurcating liability and damage trials with the same or different juries; (2) appointing a magistrate judge or special master to preside over individual damages proceedings; (3) decertifying the class after the liability trial and providing notice to class members concerning how they may proceed to prove damages; (4) creating subclasses; or (5) altering or amending the class. While there exist numerous individual questions of damages, that is not enough to defeat class certification, and one or more of the above-listed methods may need to be utilized as a case progresses.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN25[] Class Actions, Certification of Classes

Class certification provides a single proceeding in which to determine the merits of the plaintiffs' claims, and therefore protects the defendant from inconsistent adjudications.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN26[] **Prerequisites for Class Action, Superiority**

The final requirement of *Fed. R. Civ. P. 23(b)(3)* is that a court must determine that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. In deciding whether certification of a class is superior to other trial methods, the court considers whether the resolution of common issues advances the litigation as a whole, as opposed to leaving a large number of issues for case-by-case adjudication.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN27[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(c)(1)(C) provides simply that an order that grants or denies class certification may be altered or amended before final judgment. A district court has broad discretion in determining whether the action may be maintained as a class action, and so long as the court considers the proper criteria, it is permitted to exercise such discretion. A federal district court possesses the same broad discretion in determining whether to modify or even decertify a class. In fact, a federal district court judge has an affirmative obligation to ensure that the class membership remains at all times consistent with the underlying facts and procedural posture of the case. Under *Rule 23*, the district judge must define, redefine, subclass, and decertify as appropriate in response to the progression of the case from assertion to facts. The court is duty bound to monitor its class decision and, where certification proves improvident, to decertify, subclassify, alter, or otherwise amend its class certification.

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Validity of ADR Methods

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN28[] **Alternative Dispute Resolution, Validity of ADR Methods**

The possible arbitration, or other contractual bar, of some class members does not, by itself, defeat class certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN29[] **Prerequisites for Class Action, Adequacy of Representation**

Pursuant to the 2003 amendments to *Fed. R. Civ. P. 23*, the qualifications and experience of the plaintiffs' counsel are now considered under *Rule 23(g)*. *Rule 23(g)(1)* provides that a court that certifies a class must appoint class counsel. In appointing class counsel, a court must consider: (i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class.

Opinion

[*333] MEMORANDUM [5] OPINION**

This case concerns an alleged price-fixing conspiracy in the market for titanium dioxide. Plaintiffs Haley Paint Company and Isaac Industries, Inc., and Intervening Plaintiff East Coast Colorants, LLC d/b/a Breen Color Concentrates (collectively, "Plaintiffs") claim that Defendants E.I. du Pont de Nemours & Co. ("DuPont"), Huntsman International LLC ("Huntsman"), Kronos Worldwide Inc. ("Kronos"), and Millennium Inorganic Chemicals, Inc. ("Millennium") (collectively, "Defendants") engaged in an unlawful conspiracy in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*, to fix, raise, or maintain the price of titanium dioxide in the United States. [1] Plaintiffs allege that as a consequence of the unlawful conspiracy, Defendants were successful in charging artificially inflated prices for titanium dioxide products—thereby injuring all Plaintiffs.

Presently pending is Plaintiffs' Motion for Class Certification and for Appointment of Class Counsel (ECF No. 246). This Court has reviewed the record, as well as the pleadings and exhibits, and conducted a full-day class certification hearing on August 13, 2012. For the reasons that follow, Plaintiffs' Motion for Class Certification will be GRANTED.

BACKGROUND

I. THE PLAINTIFFS' FACTUAL ALLEGATIONS

The allegations contained in the Plaintiffs' Consolidated Amended Complaint (ECF No. 51) were fully set forth in this Court's previous Memorandum Opinion entered on March 29, 2011. *See Haley Paint Co. v. E.I. du Pont de Nemours & Co., 804 F. Supp. 2d 419 (D. Md. 2011)* **[**7]** (denying Defendants' motion to dismiss complaint). That background is repeated here, in part, so as to provide context for the pending motion for class certification.

Defendants are the leading suppliers of titanium dioxide ("TiO_2") in the world, and control approximately 70 percent of the global production capacity. Consol. Am. Compl. ("CAC") ¶ 1. TiO_2, a so-called "quality of life" product, is a dry chemical powder that is the "world's most widely used pigment for providing whiteness, brightness, and opacity . . . to many products, particularly paints and other coatings." *Id.* ¶ 33. TiO_2 has few competitive substitutes, and demand for it tends to be inelastic. *Id.* ¶ 35. Plaintiffs allege that, as a result of a declining market for TiO_2, Defendants conspired to fix, raise, maintain, and stabilize the price of the product. *Id.* ¶ 2, 69. This conspiracy is alleged to have occurred between February 1, 2003, through the present (hereinafter referred to as the "Class Period"). [2] *Id.* ¶ 21. During **[*334]** the Class Period, TiO_2 prices increased, and Defendants earned billions of dollars in revenue. *Id.* ¶ 3, 1.

---

[1] In addition to the named Defendants, Plaintiffs have named several co-conspirators, including, *inter alia*, Tronox Inc. ("Tronox") and The National Titanium Dioxide Company Ltd. (d/b/a "Cristal"). Tronox filed for Chapter 11 bankruptcy protection in January 2009, and is therefore precluded from being named as a defendant. *See 11 U.S.C. § 362(a)*. **[**6]** Plaintiffs originally sought to include Cristal as a named defendant in this case, but this Court dismissed Cristal for want of jurisdiction on March 31, 2011. *See* Mem. Op. and Order, ECF Nos. 101 & 102. Subsequently, Plaintiffs have sought formal reconsideration of that decision on two occasions. On April 3, 2012, this Court denied the Plaintiffs first motion for reconsideration by Memorandum Order (ECF No. 268). At the August 13, 2012 Class Certification hearing, this Court again denied the Plaintiffs' request to add Cristal as a defendant. *See* Order, ECF No. 332.

[2] Plaintiffs originally defined the Class Period as beginning in March of 2002. Plaintiffs **[**8]** have since modified the Class Period to begin on February 1, 2003 because "[t]he evidence shows that while the Cartel behavior began as early as 2002, it does not appear to have become fully effective until February 2003. [citation omitted] As a result, and to be conservative,

II. The Titanium Dioxide Market

As previously mentioned, Defendants are the market leaders in the production of TiO_2. The market is global in scope, with the majority of trade conducted internationally. *Id.* ¶ 49. The market for the chemical has high barriers to entry—it is estimated that a new plant would require $450-500 million and three to five years to build. *Id.* ¶ 43. As a result, the industry is highly centralized. *Id.* ¶ 42-48. Beginning in the early 1990s, prices for TiO_2 began to decline for a variety of reasons, such as global overcapacity and customer consolidation. *Id.* ¶ 68. Prices increased in the late 1990s, but fell significantly in 2001. *Id.* Plaintiffs allege, that as a result of declining prices and declining **[**9]** demand, "Defendants were motivated to reach, and did reach, an agreement or understanding in or about early 2002 to increase prices and improve margins in the industry." *Id.* ¶ 69.

A. Alleged Conspiracy to Fix Prices of Titanium Dioxide

It is alleged that on January 24, 2002, a TiO_2 industry meeting took place in Finland. *Id.* ¶ 54. Shortly thereafter, and in spite of flat or declining demand for TiO_2, Defendants and their co-conspirators announced price increases to be effective March 1, 2002. Further price increases were announced and implemented in the summer of 2002. *Id.* The following year, a TiO_2 conference took place in Miami, Florida. That conference was attended by Defendants, and the former Vice President of Defendant Millennium specifically told attendees to expect further price increases. *Id.* ¶ 55. Numerous other meetings and conferences were held over the next several years, and those meetings neatly corresponded to TiO_2 price increases during the Class Period. *Id.* ¶¶ 52, 56-61. Plaintiffs allege that it was at these conferences where Defendants agreed and conspired to fix the price and supply and capacity of TiO_2. *Id.* ¶ 62.

In addition to conferences and trade meetings, Plaintiffs **[**10]** also allege that the conspiracy was furthered through industry publications and through conversations with industry consultants, customers, and others. *Id.* ¶ 51. "After having reached an unlawful agreement or understanding . . . , Defendants used consultants, customers, and others as conduits to signal or confirm intended pricing and other actions to each other." *Id.* These conversations and signals allowed Defendants to monitor the conspiracy and cut down on potential "cheating," whereby one participant could undercut the others by reducing their prices. *Id.* Plaintiffs also allege that Defendants privately discussed industry conditions and TiO_2 pricing at dinner meetings before and after the various trade association and industry meetings. *Id.* ¶ 53. In short, Plaintiffs allege that Defendants had ample ability to conspire to fix the price and capacity of TiO_2.

B. Titanium Dioxide Pricing

According to the Plaintiffs, in the face of declining demand, reduced costs, and increased production capacity, *see* ¶¶ 54, 69, 71, 74, 81-82, 84, 102, the price of TiO_2 actually increased substantially during the Class Period. *Id.* ¶ 103. Plainitffs allege that Defendant DuPont, the titanium dioxide market **[**11]** leader, typically would announce a price increase which would be quickly followed by all other Defendants. *Id.* ¶¶ 67, 72-75, 77-78, 80, 82-101. According to the Plaintiffs, Defendants announced and implemented multiple and nearly simultaneous TiO_2 price increases in lock-step fashion. Of crucial importance to Plaintiffs case is their contention that these price increases were implemented in the midst of market conditions, such as declining demand, decreasing manufacturing costs, and excess production capacity, that Plaintiffs allege are completely incompatible with across the board price increases among the market leaders of a product.

[*335] Although the price increases were spaced out over five years, they increased in frequency in 2008. Plaintiffs allege that "over the course of approximately 14 weeks, from late May 2008 to early September 2008, Defendants and their co-conspirators announced three separate Titanium Dioxide price increases and at least two energy surcharges," and that these price increases were made amidst declining demand for TiO_2. *Id.* ¶ 99.

Plaintiffs propose to delay the start of the Class period until February 1, 2003, despite the evidence of illegal antitrust activity before that date." Pls.' Class Mem. at 3 n.2, ECF No. 247.

In light of the market conditions for TiO_2, Plaintiffs allege that the price increases implemented by Defendants cannot be explained **[**12]** as anything other than an illegal agreement to fix prices and supply of the chemical. In support of this contention, Plaintiffs draw an analogy to the period in the 1990s—where there is no price fixing conspiracy alleged—when industry overcapacity lead to lower prices and slim profit margins. *Id.* ¶ 102. Plaintiffs allege that the price increases were profitable for Defendants. The average price per ton of TiO_2 increased nearly a third between 2002 and 2006, and Defendants increased their operating incomes and margins. *Id.* ¶ 103.

As a result of this alleged conspiracy, Plaintiffs contend that price competition in the sale of TiO_2 by Defendants (who control approximately 70 percent of global production capacity) has been restrained, suppressed, and eliminated throughout the United States. *Id.* ¶ 104. Plaintiffs further allege that prices for TiO_2 have been raised, fixed, maintained, and stabilized at artificial levels, and as a result, direct purchasers of TiO_2 have been "deprived of the benefit of free and open competition in the purchase" of the chemical. *Id.*

III. CLASS CERTIFICATION ARGUMENTS—FRAMING THE ISSUES

In Plaintiffs' Motion for Class Certification, they seek certification of **[**13]** the following class:

> All persons and entities who purchased titanium dioxide in the United States directly from one or more Defendants or Tronox, or from any predecessors, parents, subsidiaries, or affiliates thereof, between February 1, 2003 and the present ("Class Period"). Excluded from the Class are Defendants, their co-conspirators, parent companies, predecessors, subsidiaries and affiliates, and all governmental entities.

Pls. Class Mot. at 1, ECF No. 246. According to the Plaintiffs, "[t]his case is directly analogous to the legion of antitrust price fixing cases that federal courts have routinely certified as class actions." Pls.' Class Mem. at 2. In that regard, Plaintiffs maintain that all the *Rule 23* requirements are satisfied, and in particular, the predominance requirement of *Rule 23(b)(3)* has been met insofar as "[t]he trial will focus almost entirely on proving that the Cartel Members formed a cartel and conspired to artificially inflate prices for titanium dioxide, that they were successful in raising prices to supra-competitive levels, and that, as a result of this conspiracy, Class members sustained injury and damages when they paid artificially-inflated prices on their **[**14]** purchases of titanium dioxide." *Id.* at 2-3.

Defendants argue that this case is not amenable to class treatment and contest certification of this class on the grounds that: (1) the named Plaintiffs have not satisfied the *Rule 23(a)* requirements of typicality and adequacy of representation; and (2) the *Rule 23(b)(3)* requirements of predominance cannot be met insofar as the Plaintiffs have set forth a flawed methodology for proving individual antitrust impact and damages on a class-wide basis. More specifically, Defendants argue that the named Plaintiffs' claims are not typical of the class because they are small purchasers of TiO_2, are located in narrow geographies, and have individual interests antagonistic to the class as a whole. In this regard, Defendants argue that the named Plaintiffs are not adequate class representatives. Regarding the predominance prong of *Rule 23(b)*, Defendants argue that even if the Plaintiffs could prove the existence of a price-fixing conspiracy, proof of individual injury and damages cannot be computed in a class-wide manner, and therefore must be resolved on an individual basis.

On the typicality and adequacy of representation prongs of *Rule 23(a)*, Plaintiffs **[**15]** maintain that each named Plaintiff suffered the same injury—*i.e.*, they paid artificially inflated prices for TiO_2—and therefore their **[*336]** interests are aligned with the class as a whole. On the predominance prong of *Rule 23(b)*, Plaintiffs contend that they have sufficient class-wide proof to establish individual impact and damages. Plaintiffs plan to present evidence that Defendants colluded to fix the price of TiO_2 in the United States in the form of: (1) proof that Defendants implemented lock-step price increase announcements; (2) proof that Defendants regularly attended industry meetings that facilitated the workings of the conspiracy; and (3) expert analysis regarding the structure of the TiO_2 market and how that structure facilitates collusive agreements. To prove common impact, Plaintiffs plan to present expert testimony showing that, as a result of the cartel, TiO_2 prices were supra-competitive across the class, and as a result affected each individual member of the class. To prove damages, Plaintiffs rely on the same expert analysis and methodology to show that the "aggregate" overcharge was felt uniformly across the class.

Accordingly, while each element of the *Rule 23* class certification **[**16]** analysis will be addressed, this Court will focus on the issues most closely contested by the Defendants— typicality and adequacy of representation, and predominance of common issues.

THE LEGAL STANDARD FOR CLASS CERTIFICATION UNDER RULE 23 OF THE FEDERAL RULES OF CIVIL PROCEDURE

HN1[] To obtain class certification, the Plaintiffs must meet all four requirements of *Federal Rule of Civil Procedure 23(a)*, and at least one of the requirements of *Rule 23(b)*. *Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 423 (4th Cir. 2003)*. Here, Plaintiffs seek certification of the proposed class under *Rule 23(b)(3)*, which requires that common questions of law predominate. "Class certification requires a finding that each of the requirements of *Rule 23* has been met" by a preponderance of the evidence. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 320 (3d Cir. 2008)*.

HN2[] "The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only." *Wal-Mart Stores, Inc. v. Dukes, __ U.S. __, 131 S. Ct. 2541, 2550, 180 L. Ed. 2d 374 (2011)* (internal quotation marks and citation omitted). As recently noted by the Supreme Court in the *Wal-Mart* opinion, "*Rule 23* does **[**17]** not set forth a mere pleading standard. A party seeking class certification must affirmatively demonstrate his compliance with the Rule—that is, he must be prepared to prove that there are *in fact* sufficiently numerous parties, common issues of law or fact, etc." *Id. at 2551*. In ruling on a class certification motion, a court must take a close look at the facts relevant to the certification question, even if those facts "tend to overlap with the merits of the case." *Thorn v. Jefferson-Pilot Life Ins. Co., 445 F.3d 311, 319 (4th Cir. 2006)*; *accord Gariety v. Grant Thornton, LLP, 368 F.3d 356, 366 (4th Cir. 2004)* ("[W]hile an evaluation of the merits is not part of a *Rule 23* analysis, the factors spelled out in *Rule 23* must be addressed through findings, even if they overlap with issues on the merits.").

The Supreme Court recently noted that "'sometimes it may be necessary for the court to probe behind the pleadings before coming to rest on the certification question,' and that certification is proper only if 'the trial court is satisfied, after a *rigorous analysis*, that the prerequisites of *Rule 23(a)* have been satisfied.'" *Wal-Mart 131 S. Ct. at 2551* (quoting *Gen. Tel. Co. of the Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))* **[**18]** (emphasis added); *see also Coopers & Lybrand v. Livesay, 437 U.S. 463, 469, 98 S. Ct. 2454, 57 L. Ed. 2d 351 (1978)* ("[T]he class determination generally involves considerations that are 'enmeshed in the factual and legal issues comprising the plaintiff's cause of action.'") (quoting *Mercantile Nat. Bank v. Langdeau, 371 U.S. 555, 558, 83 S. Ct. 520, 9 L. Ed. 2d 523 (1963))*.

HN3[] The "rigorous analysis" that must be undertaken in the class certification context extends to disputes between experts: "Resolving expert disputes in order to determine whether a class certification requirement has been met is always a task for the court—no matter whether a dispute might appear to implicate the 'credibility' of one or more experts . . . ." *In re Hydrogen Peroxide, 552 F.3d at 323-24*. Of course, there are limits **[*337]** to a court's resolution of expert disputes, and "a court should only engage itself in statistical dueling of experts if such dueling presents a valid basis for granting or denying class certification." *In re Rail Freight Fuel Surcharge Antitrust Litig., __ F. Supp. 2d __, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *17 (D.D.C. June 21, 2012)* (internal quotations, citations, and alterations omitted). As noted by the Third Circuit, "[t]hat weighing expert opinions is proper does **[**19]** not make it necessary in every case or unlimited in scope[,]" and "[r]igorous analysis need not be hampered by a concern for avoiding credibility issues; as . . . findings with respect to class certification do not bind the ultimate fact-finder on the merits. A court's determination that an expert's opinion is persuasive or unpersuasive on a *Rule 23* requirement does not preclude a different view at the merits stage of the case." *In re Hydrogen Peroxide, 552 F.3d at 324*.

ANALYSIS

I. *Rule 23(a)* FINDINGS & CONCLUSIONS

As previously noted, Plaintiffs must first establish—by a preponderance of the evidence—the four requirements of *Rule 23(a)*: numerosity, commonality, typicality, and adequacy of representation. Each will be addressed in turn.

A. Numerosity

Rule 23(a)(1) ***HN4***[] provides that one of the requirements to bring a class action is that the class be "so numerous that joinder of all members is impracticable." The Fourth Circuit has held that "[n]o specified number is needed to maintain a class action." *Brady v. Thurston Motor Lines, 726 F.2d 136, 145 (4th Cir. 1984)* (quoting *Cypres v. Newport News Gen. & Nonsectarian Hosp. Ass'n, 375 F.2d 648, 653 (4th Cir. 1967))*. This Court has previously **[**20]** noted that, generally speaking, "courts find classes of at least 40 members sufficiently large to satisfy the impracticability requirement." *Peoples v. Wendover Funding, Inc., 179 F. R.D. 492, 497 (D. Md. 1998)*.

Here, Plaintiffs assert that at least 700, and as many as several thousand TiO_2 purchasers were affected by the Defendants' alleged conspiracy. *See* Pls. Class Mem. at 18. Defendants do not contest this assertion, and this Court finds that the numerosity requirement is met in this case.

B. Commonality

Rule 23(a)(2) ***HN5***[] requires a question of law or fact common to the class. "A common question is one that can be resolved for each class member in a single hearing," and does not "turn[ ] on a consideration of the individual circumstances of each class member." *Thorn v. Jefferson-Pilot Life Ins. Co., 445 F.3d 311, 319 (4th Cir. 2006)* (internal quotation marks and citation omitted). The Fourth Circuit has held that, "in a class action brought under *Rule 23(b)(3)*, the 'commonality' requirement of *Rule 23(a)(2)* is 'subsumed under, or superseded by, the more stringent *Rule 23(b)(3)* requirement that questions common to the class predominate over' other questions." *Lienhart v. Dryvit Systems, Inc., 255 F.3d 138, 147 n.4 (4th Cir. 2001)* **[**21]** (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 609, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*. Therefore, in the Fourth Circuit "[t]he common questions must be dispositive and overshadow other issues." *Lienhart, 255 F.3d at 146*. "Thus, the commonality requirement is relatively toothless in comparison with the related requirements of typicality and predominance." *In re Puerto Rican Cabotage Antitrust Litig., 269 F.R.D. 125, 131 (D.P.R. 2010)*.

As the Supreme Court recently noted, "[c]ommonality requires the plaintiff to demonstrate that the class members have suffered the same injury." *Wal-Mart, 131 S. Ct. at 2551* (internal quotations and citation omitted). Here, Plaintiffs allege a multi-year price-fixing conspiracy that led to all class members being subjected to artificially inflated prices for TiO_2. Generally speaking, in the antitrust context, "courts have held that the existence of an alleged conspiracy or monopoly is a common issue that will satisfy" the commonality requirement." 1 HERBERT B. NEWBERG & ALBA CONTE, NEWBERG ON CLASS ACTIONS § 3.10 (4th ed. 2002); *see also* 7A CHARLES ALAN WRIGHT, ARTHUR R. MILLER & MARY KAY KANE, FEDERAL PRACTICE AND PROCEDURE § 1763 (3d ed. 2005) ("the **[*338]** claimed existence of **[**22]** a conspiracy to fix prices . . . in violation of the antitrust laws has been found to present common questions in actions brought by plaintiffs who asserted that they had been harmed by those activities") (hereinafter "FEDERAL PRACTICE AND PROCEDURE"); *In re Florida Cement and Concrete Antitrust Litig., 2012 U.S. Dist. LEXIS 281, 2012 WL 27668, at *3 (S.D. Fla. Jan. 3, 2012)* (collecting cases).

Plaintiffs have identified several questions that they assert are common to the class. Most notably, Plaintiffs maintain that the existence of the conspiracy is *the* central issue in this litigation. Defendants acknowledge this point in noting that ***HN6***[] "the commonality element of *Rule 23(a)* is satisfied because there is at least one common question—namely, whether the alleged conspiracy in fact existed." Defs.' Class Opp'n at 15, ECF no. 293. Accordingly, this Court finds by a preponderance of the evidence that the existence of the alleged conspiracy, standing alone, is sufficient to establish commonality. In other words, the Plaintiffs' claims "depend upon a common contention," and that common contention is "of a nature that is capable of classwide resolution—which means that its truth or falsity will resolve an issue that **[**23]** is central to the validity of each one of the claims in one stroke." *Wal-Mart, 131 S. Ct. at 2551*.

C. Typicality & Adequacy of Representation[3]

Rule 23(a)(3) ***HN7***[] requires that "the claims or defenses of the representative parties are typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. Courts have recognized that the commonality and typicality requirements of *Rule 23(a)* tend to merge. "Both serve as guideposts for determining whether . . . the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected . . . ." *Gen. Tel. Co. of the SW. v. Falcon, 457 U.S. 147, 157 n.13, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)*. As this Court has previously noted, the typicality requirement determines "whether a sufficient relationship exists between the injury to the named plaintiff and **[**24]** the conduct affecting the class, so that the court may properly attribute a collective nature to the challenged conduct." *Bullock v. Bd. of Educ. of Montgomery County, 210 F.R.D. 556, 560 (D. Md. 2002)* (citations omitted). The class representative "must be part of the class and possess the same interest and suffer the same injury as the class members." *Broussard v. Meineke Discount Muffler Shops, Inc., 155 F.3d 331, 338 (4th Cir. 1998)*. Essentially, the typicality requirement ensures that "only those plaintiffs who can advance the same factual and legal arguments may be grouped together as a class." *Id. at 340*. "The essence of the typicality requirement is captured by the notion that 'as goes the claim of the named plaintiff, so goes the claims of the class.'" *Deiter v. Microsoft Corp., 436 F.3d 461, 466 (4th Cir. 2006)* (citing *Broussard, 155 F.3d at 340*).

HN8[] The final prerequisite under *Rule 23(a)* is that the persons representing the proposed class must be able "fairly and adequately to protect the interests" of all members of the class. The adequacy inquiry under *Rule 23(a)(4)* "serves to uncover conflicts of interest between named parties and the class they seek to represent." *Amchem, 521 U.S. at 625* **[**25]** (citing *Falcon, 457 U.S. at 157-58 n.13*.). As noted by the Fourth Circuit, for a conflict to defeat class certification, the conflict "must be more than merely speculative or hypothetical;" it "must be fundamental" and "go to the heart of the litigation." *Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 430-31 (4th Cir. 2003)* (internal quotations and citations omitted).

The typicality requirement "has been liberally construed by courts . . . [and] in the antitrust context, typicality will be established by plaintiffs and all class members alleging the same antitrust violations by **[*339]** defendants." *In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *26* (quoting *Meijer, Inc. v. Warner Chilcott Holdings Co. III, Ltd., 246 F.R.D. 293, 301 (D.D.C. 2007))*. Notwithstanding courts' liberal reading of the typicality requirement in price-fixing cases, Defendants maintain that the named Plaintiffs' claims are not typical of the putative class for several reasons. For example, Defendants argue that the named Plaintiffs' claims are not typical of the proposed class because they "(1) represent a very small portion of the total volume of titanium dioxide sold, (2) purchased a small number of the total titanium **[**26]** products offered by defendants, and (3) are located in narrow geographies." Defs.' Class Opp'n at 42.

This Court finds these arguments unavailing. As noted, ***HN9***[] to establish the typicality prong of *Rule 23(a)*, "a class representative must be part of the class and possess the same interest and suffer the same injury as the class members." *Deiter, 436 F.3d at 466*. While some factual differences between the named Plaintiffs and the putative class may exist, they all seek the same relief: overcharge damages as a result of a price-fixing conspiracy in violation of *Section 1* of the Sherman Act. *See* *In re Polyester Staple Antitrust Litig., 2007 U.S. Dist. LEXIS 52525, 2007 WL 2111380, at *10 (W.D.N.C. July 19, 2007)* ("In determining whether the claims of the class representatives are typical of the class, the Court looks to the *nature* of the claims asserted (i.e, the legal theory)

---

[3] In their Class Opposition Memorandum, Defendants make the same arguments for both the typicality and adequacy of representation prongs of *Rule 23*. *See* Defs.' Class Opp'n at 42-46. Because the typicality inquiry "tend[s] to merge with the adequacy of representation requirement," *Falcon, 457 U.S. at 158 n.13*, the Court will address these elements together.

rather than any specific factual differences amongst class members.") (citations omitted, emphasis added). Because Plaintiffs' claims arose from the same alleged conduct, their claims are typical insofar as they will seek relief under the same legal theory and will "tend to advance the interests of the absent class members." *Deiter, 436 F.3d at 466*.

Defendants **[**27]** also argue that each named Plaintiff will not adequately represent the interests of the class because of specific disqualifying problems. For example, Defendants argue that because Plaintiff Isaac is a chemical wholesaler, it is unlike the majority of the putative class members that are in the business of manufacturing products using TiO_2. Moreover, Defendants point out that Isaac purchased only a small volume of TiO_2 in 2004, and later sold that product at a profit. Defendants argue that it is therefore unlikely that Isaac suffered any actual injury as a result of the alleged conspiracy. [4] *See* Defs.' Class Opp'n at 43-44. With respect to Intervener Plaintiff Breen, Defendants highlight deposition testimony by Breen's class representative that indicates Breen was not aware of any price-fixing until 2011—years after the filing of the lawsuit. Finally, Defendants argue that Plaintiff Haley is also an inadequate class representative. Defendants argue that because Haley ceased purchasing TiO_2 in 2008, it therefore has no incentive to "prove a conspiracy beyond mid-2008 when it sold its manufacturing business and no longer had a need to purchase titanium dioxide." Defs.' Class Opp'n at **[**28]** 45. When Haley did purchase TiO_2, it purchased the product through a buying group that negotiated low prices, thereby lessening any alleged impact of the price-fixing conspiracy. [5] Moreover, Defendants argue that they have unique defenses pertaining to Haley, particularly with respect to the statute of limitations.

Notwithstanding these minor issues identified by the Defendants, this Court can discern no "fundamental" conflict that goes to the "heart of the litigation." *Gunnells, 348 F.3d at 430-31*. The thrust of the litigation will concern the *Defendants'* conduct and the existence of the alleged conspiracy. Accordingly, the named Plaintiffs and the putative class will "share common objectives and the same factual and legal positions," and therefore "have the same interest in establishing the liability of [Defendants]." *Id. at 431*. As such, this Court finds, by a preponderance of the evidence, that Plaintiffs have satisfied the typicality and adequacy of representation prongs of *Rule 23(a)*. [6]

[*340] II. *Rule 23(b)(3)* Findings & Conclusions

HN11[] Having determined that the Plaintiffs have satisfied *Rule 23(a)*'s requirements, the Court now turns *Rule 23(b)(3)* which requires a finding that common questions "predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. "The *Rule 23(b)(3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem, 521 U.S. at 623*. Although the predominance inquiry of *Rule 23(b)(3)* is similar to the commonality requirement of *Rule 23(a)*, the Fourth Circuit has held that the predominance requirement is "more stringent" than the *Rule 23(a)* requirement. *Thorn, 445 F.3d at 319* (quoting *Lienhart v. Dryvit Sys. Inc., 255 F.3d 138, 147 n.4 (4th Cir. 2001))*; *see also Amchem, 521 U.S. at 624* (the *Rule 23(b)(3)* criterion is "far more **[**30]** demanding" than the commonality requirement). In determining whether the Plaintiffs have satisfied their burden, this Court must conduct a "rigorous analysis" of the *Rule 23(b)(3)* requirements and the Plaintiffs' methodology for proving those requirements, and must act as finder of fact in the face of conflicting expert testimony. *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 323-24*. ***HN12***[] In order to meet the predominance prong of *Rule 23(b)(3)*, a plaintiff must "demonstrate that the element[s] of [the legal claim] is capable of proof at trial through evidence that is common to the class rather than individual." *Id. at 311*.

---

[4] To the extent that this argument overlaps with the predominance inquiry relating to impact, that argument will be addressed *infra*.

[5] *See supra* note 4.

[6] ***HN10***[] Pursuant to the 2003 amendments to *Rule 23*, **[**29]** the Court's inquiry into the qualifications and experience of Plaintiffs' counsel are no longer investigated under *Rule 23(a)*, but instead are to be determined under *Rule 23(g)*. *See infra* at Section IV for that discussion.

"Because the nature of the evidence that will suffice to resolve a question determines whether the question is common or individual, a district court must formulate some prediction as to how specific issues will play out in order to determine whether common or individual issues predominate in a given case." *Id.* (internal quotations and citations omitted).

With that standard in mind, the Court notes at the outset that, like many courts confronting class certification motions involving horizontal price-fixing claims, it is presented with a battle of the experts **[**31]** with regard to the predominance prong of *Rule 23(b)(3)*. Both parties rely heavily on their respective—and diametrically opposed—expert declarations. [7] Nevertheless, this Court has rigorously analyzed the conflicting testimony, making credibility findings as needed, in order to determine whether Plaintiffs have met their burden on each class certification requirement. *See In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 324*. Because much of the conflicting expert testimony is informed by competing factual characterizations regarding the nature of the market for TiO_2, this Court will first make the necessary factual findings regarding that market before proceeding on to the substantive requirements of *Rule 23(b)(3)*. *See Blades v. Monsanto Co., 400 F.3d 562, 575 (8th Cir. 2005)* ***HN13***[] ("[I]n ruling on class certification, a court may be required to resolve disputes concerning the factual setting of the case. This extends to the resolution of expert disputes concerning the import of evidence concerning the factual setting—such as economic evidence as to business operations or market transactions.").

A. The Titanium Dioxide Market—Findings of Fact

As will be discussed *infra*, in order for this Court to certify a class in this case, it must be satisfied that the Plaintiffs have set forth a plausible methodology for proving class-wide impact as a result of the alleged conspiracy. In other words, assuming the alleged conspiracy existed, Plaintiffs still must be able to show that each class member was injured, or "impacted" by that conspiracy through evidence that is common to the class as a whole. Generally speaking, this will require the Plaintiffs to show that the class members paid a higher price for TiO_2 purchased from Defendants than they would have absent the existence of a conspiracy. *See Hanover Shoe v. United Shoe Machinery Corp., 392 U.S. 481, 489, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)* ***HN14***[] ("when a buyer shows **[*341]** that the price paid by him . . . is illegally high and also shows the amount of the overcharge, he has made out a prima facie case of injury and damage").

Seemingly following the plaintiff-side class certification script [8] for horizontal price fixing cases, Plaintiffs have introduced an expert declaration **[**33]** that relies, in part, on certain oligopolistic tendencies in the TiO_2 market that Plaintiffs allege facilitate collusion and proves common impact. Specifically, Plaintiffs' Expert, Dr. Russell Lamb, maintains that (1) the multiple nearly simultaneous price increase announcements indicate coordinated pricing; (2) the TiO_2 market is dominated by Defendants; (3) TiO_2 is a commodity-like product that is interchangeable across suppliers; (4) there are many buyers in the market for TiO_2; (5) there are high barriers to entry in the market for TiO_2; (6) demand for TiO_2 was stable or declining during the Class Period; and (7) competition occurs primarily on the basis of price in the TiO_2 market. *See* Report of Dr. Russell Lamb ("Lamb Report") ¶¶ 28-62. These factors undergird Dr. Lamb's conclusion that if a price-fixing conspiracy occurred, that conspiracy would have impacted all members of the class by way of artificially inflated prices for TiO_2.

---

[7] At the August 13, 2012 class certification hearing, the parties did not introduce live expert **[**32]** testimony—instead, they introduced excerpts of deposition testimony, and excerpts of the expert declarations.

[8] For example, Dr. John Beyer, a frequent plaintiffs' expert in class certification cases, has outlined the relevant market factors used to prove common impact in *The Role of Economics in Class Certification and Class-Wide Impact, in* LITIGATING CONSPIRACY: **[**34]** AN ANALYSIS OF COMPETITION CLASS ACTIONS (Stephen Pitel ed. 2006).

Following their own script, [9] Defendants argue that certain of these market factors are not present in the market for TiO_2, and as a result, Dr. Lamb's conclusion that common proof of class-wide impact exists is therefore erroneous. Specifically, Defendants' expert, Dr. Michelle Burtis, contends that: (1) Defendants produce hundreds of different TiO_2 products, and therefore TiO_2 cannot be considered a commodity-like product; (2) TiO_2 pricing is highly complex, individualized, and is not the primary basis for competition among Defendants; and (3) class members had the ability to purchase TiO_2 from producers that are not alleged cartel members, thereby necessitating individual inquiry. *See* Report of Dr. Michelle Burtis ("Burtis Report") ¶¶ 14-57.

Each of these TiO_2 **[**35]** market characteristics will be analyzed below.

Price increase announcements indicate coordinated behavior. After analyzing "more than ten years' worth of price increase announcements issued by the Cartel Members," Dr. Lamb concludes that "throughout the Class Period, the Cartel Members announced multiple nearly simultaneous price increases that applied across the board to all users of titanium dioxide, and to all products and grades of titanium dioxide sold by the Cartel Members." Lamb Report ¶ 29. Furthermore, Dr. Lamb concludes that these price increase announcements occurred close-in-time to meetings in which many of the cartel members participated. Accordingly, Dr. Lamb posits that "[w]hile [firms] can certainly announce price increases without coordination, it is hard to explain the same, or nearly the same, price increases being repeatedly announced nearly simultaneously by different firms supposedly acting independently." *Id.* ¶ 28. In support of his conclusions, Dr. Lamb presents a table summarizing the price increase announcements announced by the Defendants in this case. *See id.* at Table 2. Importantly, Dr. Lamb concludes that the price increase announcements "were efforts **[**36]** by the Cartel Members to confirm their cartel behavior and signal to each other and to their customers that price increases would be implemented and enforced market-wide." *Id.* ¶ 29.

In response, Defendants' expert, Dr. Burtis does not take issue with the *existence* of the price increase announcements, but rather, with the *interpretation* of those announcements. Specifically, Dr. Burtis maintains that the price increase announcements by Defendants are not necessarily evidence **[*342]** of collusion. Citing a textbook on industrial organization, Dr. Burtis contends that parallel pricing behavior is a natural consequence of competition in oligopolies, and therefore "it would be expected that a unilateral price increase announcement by one Defendant would influence the decisions of the other Defendants, and that a plausible response would be to announce similar price increases quickly." Burtis Report ¶ 117. Finally, Dr. Burtis argues that even if price increases were *announced* nearly simultaneously, there is no evidence that they were *implemented* in any uniform way. *Id.* ¶ 116.

This Court finds credible Dr. Lamb's conclusions that the Defendants implemented multiple nearly simultaneous price increases **[**37]** throughout the class period, and those price increases can be used to prove coordinated pricing. As noted, Dr. Burtis does not dispute the fact that the price increase announcements were made, but does dispute the inferences that can be drawn from those announcements.

TiO_2 Market Dominance by Defendants.

In Plaintiffs' Consolidated Amended Complaint, they allege that Defendants are the leading suppliers of TiO_2 in the world, and control approximately 70 percent of the global production capacity. CAC ¶ 1. Dr. Lamb, using publicly available documents common to the class as a whole, confirmed this assertion, and concludes "class-wide evidence shows that the Cartel Members controlled the vast majority of sales of titanium dioxide to the Class members during the Class Period in this matter." Lamb Report ¶¶ 30-31. The Defendants' Annual Reports and SEC filings confirm this finding and indicate that the Defendants produce between 70 to 75 percent of the world's supply of TiO_2. *See id.* ¶ 31. Furthermore, Dr. Lamb's analysis concludes that the Cartel Members controlled 98 percent of the North American market for TiO_2 during the Class Period. *Id.* ¶ 34, and Table 4. Dr. Lamb concludes that "[w]hen

---

[9] *See* John H. Johnson & Gregory K. Leonard, *Economics and the Rigorous Analysis of Class Certification in Antitrust Cases*, 3 J. COMPETITION L. & ECON., 341, 344-345 (2007) (taking issue with the "prototypical plaintiffs' argument and arguing that "the requirement of common proof of antitrust injury should usually present a substantial hurdle for plaintiffs.").

[38]** a small group of firms dominate the market for a product, it makes it easier for them to form a cartel such as the one alleged here." *Id.* ¶ 36.

Dr. Burtis does not directly contradict Dr. Lamb's assertions regarding the market power belonging to the alleged conspirators in this case. Instead, she argues that evidence exists showing that TiO_2 customers had the ability to purchase the product from producers other than the alleged co-conspirators throughout the relevant period. Burtis Report ¶ 57. In this regard, Dr. Burtis argues that the ability to purchase TiO_2 from other producers necessitates individual inquiry into "each putative class member's ability to use TiO_2 products produced 'offshore' and the extent to which they used this ability to negotiate prices with Defendants. *Id.* However, because Dr. Burtis does not dispute Dr. Lamb's general conclusions that the market for TiO_2 is a highly concentrated one, this Court will take that fact as established, and will address the import of Dr. Burtis' argument in the predominance section *infra.*

TiO_2 as a commodity-like product & competition based primarily on price

According to Dr. Lamb, TiO_2 is a commodity-like product and is interchangeable **[**39]** [10] across suppliers. Lamb Report ¶ 37. This factor has two main implications: first, when a product is characterized as a commodity, competition is based primarily on price and, second, when a product is interchangeable with other similar products produced by competitors, coordination among firms is facilitated because "firms wishing to form a cartel can more easily monitor and detect defections from a price-fixing agreement." *Id.* Dr. Lamb concludes that TiO_2 is a commodity-like product even though each Defendant produces numerous different grades of the product for many different applications. In so concluding, Dr. Lamb relies on the Defendants' SEC filings, market research reports, and internal documents indicating that the different grades of TiO_2 produced by one Defendant were fungible with those produced by other Defendants. *See id.* ¶ 40. According **[*343]** to Dr. Lamb, this factor "makes the Cartel for titanium dioxide far more likely."

Dr. Burtis and Defendants take great issue with Dr. Lamb's conclusion that TiO_2 is a commodity-like product. Dr. Burtis contends that, although the TiO_2 products produced by the Defendants all contain the same chemical, they vary widely in their intended use and application. Dr. Burtis points to evidence indicating that when TiO_2 purchasers considered changing suppliers, they frequently needed to test the new product to make sure it would work in their production process. Burtis Report ¶ 16. Furthermore, certain TiO_2 purchasers were required to reformulate their production processes to accommodate different TiO_2 products. *Id.* In short, Dr. Burtis has provided substantial evidence indicating that the TiO_2 products produced by the different Defendants were not identical to each other, and that the individual Defendants spent time and money attempting to differentiate their products from those of their competitors.

Notwithstanding this, after reviewing all the evidence, Defendants' contention that titanium dioxide is not a commodity-like product is simply belied by their own characterization of the chemical. For example, in its 2006 Form 10-K, [11] Defendant Millennium **[**41]** stated: "[d]ue to the *commodity nature* of certain of [its] products, competition in [the global titanium dioxide market] is based primarily on price . . ." Lamb Report ¶ 38. Similarly, in its 2010 10-K, Defendant Kronos stated that "the majority of our grades and substantially all of our production are considered *commodity* pigments with price and availability being the most significant competitive factors." *Id.* Defendants also produced so-called "crosswalk" documents that note which products offered by competitors are compatible or interchangeable with their own. *See id.* ¶ 40 n. 93 and accompanying text.

---

[10] "Interchangeability implies that one product is roughly equivalent to another for the use to which it is put; while there may be some degree of preference for one over the other, either would work effectively." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 437 (3d Cir. 1997)* **[**40]** (citation omitted).

[11] Required by the Securities and Exchange Commission, the Form 10-K is a comprehensive annual report summarizing a company's performance and financial condition.

Accordingly, while there is certainly some differentiation among TiO_2 products produced by the Defendants, the Court credits Dr. Lamb's conclusion that TiO_2 is a commodity-like product and that competition among produces is based primarily on price. [12]

Many buyers in the TiO_2 market.

Dr. Lamb concludes that each cartel member maintains a large customer base and that there are numerous purchasers of TiO_2. In this regard, Dr. Lamb asserts that "[w]hen there are many buyers in a market for a particular good, a cartel such as the one alleged here is more likely to be effective." Lamb Report ¶ 44. "This is because the incentive to a cartel member for undercutting the conspiracy is lower when there are many smaller purchasers since each potential sale is small while the risk of disrupting the cartel can carry large penalties." *Id.* Dr. Burtis does not dispute the fact that the buying side of the TiO_2 market is unconcentrated. Accordingly, the Court will take this fact as established.

High barriers to entry.

Next, Dr. Lamb concludes that there are high barriers to entry in the market for TiO_2. Specifically, there is a significant level of capital investment required to build a competitive TiO_2 manufacturing facility—it is estimated that a new plant would require $250-500 million and three to five years to build. Lamb Report ¶¶ 49-50. Additionally, the current TiO_2 producers hold patents for **[**43]** the proprietary productions processes, which would impose another significant barrier to entry into the market. Defendants and Dr. Burtis do not dispute the fact that there are high barriers to entry in the TiO_2 market, and this Court will take this fact as established.

Stable or declining demand for titanium dioxide and excess production capacity

Dr. Lamb concludes that demand for TiO_2 experienced a 34.8 percent decline between 2002 and 2009. Lamb Report ¶ 60. Moreover, he concludes that during this period, **[*344]** there was significant excess capacity in the production of the chemical—meaning that TiO_2 producers were producing less of the chemical than their capabilities allowed. *Id.* ¶ 71-74. According to Dr. Lamb, standard economic theory predicts that, in the absence of a cartel, these factors would lead to falling prices for TiO_2 as a result of competition for market share among competitors. *See id.* ¶ 69. However, Dr. Lamb determined that prices for TiO_2 did not fall as economic theory predicts, but instead rose significantly during the Class Period. *Id.* ¶ 70. According to Dr. Lamb, "[t[his combination of stable or falling demand and increasing prices constitutes common proof that the effect **[**44]** of the anticompetitive behavior which forms the heart of this Cartel was to raise prices above those that would have prevailed in the market otherwise." *Id.*

While Dr. Burtis disputes Dr. Lamb's conclusion that these market factors constitute common proof of class-wide impact, she does not directly refute his underlying findings— that demand for TiO_2 declined during the Class Period and that substantial excess capacity existed in the industry. Accordingly, this Court will take those facts as established, and will consider their import below.

B. Predominance

HN15[] In considering the *Rule 23(b)(3)* predominance requirement, "a court's rigorous analysis begins with the elements of the underlying cause of action." *In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at*

---

[12] This conclusion relates only to the commodity-like nature of TiO_2. Defendants' arguments that pricing for TiO_2 is determined by individual negotiations and varied contract terms **[**42]** will be discussed in the predominance section *infra.*

*30. "If proof of the essential elements of the cause of action requires individual treatment, then class certification is unsuitable." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311.

HN16[] To establish an antitrust violation, a plaintiff must prove three elements: (1) a violation of the antitrust laws—here, Section 1 of the Sherman Act; (2) individual injury resulting from that violation; and (3) measurable damages. *See* 15 U.S.C. § 1; Deiter v. Microsoft Corp., 436 F.3d 461, 467 (4th Cir. 2006). **[**45]** However, at the class certification stage, Plaintiffs need only show by a preponderance of the evidence that these elements are "*capable of proof* at trial through evidence that is common to the class rather than individual to its members." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12 (emphasis added). Each element is addressed in turn.

i. Violation of Antitrust Law

Plaintiffs allege that Defendants conspired to fix the price of TiO_2. CAC ¶ 2. HN17[] This type of horizontal price-fixing scheme, if it existed, is a *per se* violation of the Sherman Act. *See* Texaco, Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006). Defendants do not dispute that this element may be proved by common evidence. *See* Defs.' Class Opp'n at 15; *see also* 7AA Federal Practice and Procedure § 1781 (3d ed. 2005) ("whether a conspiracy exists is a common question that is thought to predominate over the other issues in the case and has the effect of satisfying the first prerequisite in Rule 23(b)(3)"). The question of whether a conspiracy to fix the price of TiO_2 existed is a fact capable of common proof because "plaintiffs' allegations of price fixing indisputably will focus on the actions of the defendants, and, as such, **[**46]** proof for these issues will not vary among class members." In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *31 (quotation and citations omitted). Accordingly, this Court finds by a preponderance of the evidence that the element of antitrust injury is capable of proof at trial through evidence that is common to the class.

The Court now turns to the real crux of Defendants' opposition to class certification—that is, whether the Plaintiffs can prove the elements of common impact and damages on a class-wide basis.

ii. Impact

HN18[] The second element the Plaintiffs will need to establish is that the class members suffered injury from the alleged price-fixing conspiracy. [13] This element, commonly **[*345]** referred to as "impact," can be "likened to the causation element in a negligence cause of action. The term means simply that the antitrust violation caused injury to the antitrust plaintiff." In re Urethane Antitrust Litig., 251 F.R.D. 629, 634 (D. Kan. 2008) (quoting State of Alabama v. Blue Bird Body Co., 573 F.2d 309, 317 (5th Cir. 1978)). Of course, at this stage in the litigation, the Plaintiffs need not *prove* this element, "[i]nstead, the task for plaintiffs at class certification is to demonstrate that the **[**47]** element of antitrust impact is *capable of proof* at trial through evidence that is common to the class rather than individual to its members." In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12 (emphasis added). In other words, Plaintiffs' burden of showing antitrust impact is "satisfied by its proof of *some damage* flowing from the unlawful conspiracy; inquiry beyond this minimum point goes only to the amount and not the fact of damage. It is

---

[13] This elements involves two distinct questions: "One is the familiar factual question whether the plaintiff has indeed suffered harm, or 'injury-in-fact.' The other is the legal question whether any such injury is 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 106 (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). Because Plaintiffs in this case allege only one injury—that they were subjected **[**48]** to artificially inflated prices for TiO_2 as a result of a price-fixing conspiracy in violation of Section 1 of the Sherman Act—the Defendants do not challenge this element. *See* Cordes, 502 F.3d at 107 ("Because each class member allegedly suffered the same type of injury, the legal question of whether such an injury is 'of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful,' Brunswick, 429 U.S. at 489, is a common one."). Accordingly, the legal question of injury is common to the class, and this Court will focus on the first prong of the impact analysis—whether the class members suffered "injury-in-fact."

enough that the illegality is shown to be a material cause of the injury." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* (emphasis added).

To meet their burden, therefore, Plaintiffs must show, using evidence common to the class, that class members paid a higher price for TiO_2 from Defendants than they would have absent the alleged conspiracy. *See Hanover Shoe, 392 U.S. 481, 489, 88 S. Ct. 2224, 20 L. Ed. 2d 1231*. In *Blades v. Monsanto Co.*, ***HN19***[] the Eighth Circuit defined common proof as follows:

> The nature of the evidence that will suffice to resolve a question determines whether the question is common or individual. If, to make a prima facie showing on a given question, the members of a proposed **[**49]** class will need to present evidence that varies from member to member, then it is an individual question. If the same evidence will suffice for each member to make a prima facie showing, then it becomes a common question.

400 F.3d at 566 (citations omitted).

As is often the case in horizontal price fixing cases, Plaintiffs here seek to show this element is capable of common proof by comparing a hypothetical "but-for" price—*i.e.*, the price that would have been paid in the absence of the conspiracy—with the prices actually paid by the Plaintiffs during the Class Period. *See In re EPDM Antitrust Litig., 256 F.R.D. 82, 88 (D. Conn. 2009)*. In this kind of but-for comparison, prices are analyzed in a scenario that is "free of the restraints and conduct alleged to be anticompetitive." *In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *41* (quoting *Blades v. Monsanto, Co., 400 F.3d at 569*. If Plaintiffs can show that they paid a higher actual price than the but-for price using evidence common to the class, they have met their burden on the impact element.

HN20[] As the *Rail Freight* **[**50]** court recently summarized, there are various methods by which plaintiffs may prove that common evidence is capable of proving impact:

> [O]ne way of showing that common questions predominate on the issue of injury-in-fact
>
>> is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an economic regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the "but-for" level for all plaintiffs.
>>
>> *In re EPDM Antitrust Litig., 256 F.R.D. at 88*. . . .
>
> Comparing but-for prices with actual transaction prices by regression analysis, **[*346]** however, is not the only way for plaintiffs to succeed in a motion for class certification. Other accepted types of evidence for establishing class-wide injury-in-fact include: evidence of lock-step increases of national price lists; proof that defendants conspired to maintain an inflated base price from which all negotiations began; and evidence of structural factors that make an industry susceptible to successful collusion. Ultimately, the question is whether plaintiffs have shown by a preponderance **[**51]** of the evidence—through regressions, structural industry factors, or any other persuasive means—that methods of common proof exist to show class-wide impact.

*In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *41* (internal quotations and citations omitted).

Plaintiffs in this case seek to prove impact by way of all the enumerated methods above—they proffer class-wide evidence in the form of: (1) industry characteristics tending to show that the TiO_2 industry was ripe for collusion before the alleged conspiracy; (2) evidence of nearly simultaneous (lock-step) price increase announcements during the relevant period; (3) Defendants' own transactional data showing that prices rose over the period; (4) evidence showing that even if the price increase announcements were not "implemented" uniformly, they nevertheless served to set an artificially high base level upon which the Defendants' began negotiations; (5) a multiple regression model designed by Dr. Lamb that attempts to show that, absent the alleged conspiracy, the but-for prices for TiO_2 would have been lower; and (6) a pricing structure analysis that attempts to show that prices for TiO_2 would **[**52]** have responded similarly to coordinated pricing activity.

In arguing that common evidence exists to show impact on a class-wide basis, Plaintiffs rely heavily on the fact that defendants announced multiple nearly simultaneous price increase announcements throughout the class period. Plaintiffs argue that these price increase announcements amount to common proof insofar as they served to raise prices for TiO_2 across the board for all purchasers. Defendants counter that, regardless of the price increase *announcements*, the evidence shows that price increases were not *implemented* uniformly, and more importantly, individual TiO_2 transactions between buyers and sellers were the result of extensive negotiations between the parties. This is a valid point, and there certainly is substantial evidence showing that the end prices paid by TiO_2 customers were the product of individual negotiation. *See, e.g.* Burtis Report ¶¶ 34-56. However, according to the Plaintiffs, these price increase announcements served to set an artificially high baseline for price negotiations, and point to compelling evidence supporting this proposition. *See, e.g.*, Lamb Rebuttal ¶ 91 nn. 115-16 and accompanying text, ECF **[**53]** No. 306-1.

Having reviewed the submissions and the parties' arguments, this Court concludes that the evidence of the nearly simultaneous price increase announcements, in conjunction with the structural factors present in the TiO_2 industry, *see supra*, makes the element of antitrust impact "capable of proof at trial through evidence that is common to the class rather than individual to its members." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12*. As discussed in *In re Rail Freight*, "this case falls within the line of cases holding that class-wide injury-in-fact can be proven at trial by showing that the allegedly conspiratorial [price increases] were the starting point from which negotiations for discounts began." *2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *62* (collecting cases).

Next, the Plaintiffs argue that class-wide impact can be demonstrated by showing that the prices actually paid by TiO_2 customers were higher than they would have been but-for the conspiracy. To do this, Plaintiffs rely on a multiple regression model created by Dr. Lamb. As described in a reference guide published by the Federal Judicial Center:

> Multiple regression analysis is a statistical tool used to understand the relationship **[**54]** between or among two or more variables. Multiple regression involves a variable to be explained—called the dependent variable—and additional explanatory variables that are thought to produce or be associated with changes in the dependent variable. For example, . . . in an antitrust cartel **[*347]** damages case, the plaintiff's expert might utilize multiple regression to evaluate the extent to which the price of a product increased during the period in which the cartel was effective, after accounting for costs and other variables unrelated to the cartel. The defendant's expert might use multiple regression to suggest that the plaintiff's expert had omitted a number of price-determining variables.

DANIEL L. RUBINFELD, REFERENCE GUIDE ON MULTIPLE REGRESSION 305-06 (Fed. Judicial Ctr., 3d ed. 2011).

In his report, Dr. Lamb explains the variables used in his regression analysis to isolate the effect of the cartel on prices for TiO_2. Lamb Report ¶¶ 75-95. He concludes that, as a result of the cartel, prices for TiO_2 were more than seven percent higher during the Class Period. *Id.* ¶ 94. Defendants attack Dr. Lamb's regression model on numerous grounds which will not be discussed in detail here. That **[**55]** is because:

> The real question before this court is whether the plaintiffs have established a *workable* multiple regression equation, not whether plaintiffs' model actually *works*, because the issue at class certification is not which expert is the most credible, or the most accurate modeler, but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of [impact [14]] through generalized proof.

In re EPDM Antitrust Litig., 256 F.R.D. at 100.

---

[14] The *EPDM* court made this statement in the context of evaluating the damages prong of the predominance inquiry. However, it is equally applicable on the "impact" prong as well.

In short, this Court finds that Dr. Lamb's regression analysis accurately reflects the characteristics of the titanium dioxide industry, and the facts in this case. While his model may not be perfect, [15] this Court concludes that a regression model is certainly *capable* of proving class-wide impact at trial. In light of the structural factors in the TiO_2 industry, this case falls squarely within the type of case that courts have found well-suited to regression analyses. *See, e.g.* *In re Rail Freight Antitrust Litig., 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *72* (collecting **[**56]** cases). Defendants' quibbles with Dr. Lamb's regression model largely center on the *results* of his analysis—in other words, Defendants argue that if Dr. Lamb included more data, or extended certain dates, his very own regression would show that prices of TiO_2 did not increase during the time period. However, by "merely disputing the *results* of the plaintiffs' experts' analysis rather than the feasibility of using a single formula methodology," Defendants raise a "merits issue, not a class certification issue." *In re EPDM Antitrust Litig., 256 F.R.D. at 96*. Considering similar arguments, the United States District Court for the Southern District of New York recently stated:

> [D]efendants do not assert that plaintiffs have failed to prove some factual predicate necessary for demonstrating causation and artificiality on a class-wide basis. Instead, defendants' objections go *solely* to whether plaintiffs' models will *in fact* demonstrate causation and artificiality, and hence, are unrelated to the requirements of class certification. Indeed, by arguing that plaintiffs' models, as corrected by defendants' expert, show that Amaranth did not cause any artificiality during the Class Period, defendants **[**57]** impliedly concede that causation can be evaluated on a class-wide basis.

In re Amaranth Natural Gas Commodities Litig., 269 F.R.D. 366, 385 (S.D.N.Y. 2010). Accordingly, this Court concludes that Dr. Lamb's multiple regression model is "capable" of proving class-wide impact at trial "through evidence that is common to the class rather than individual to its members." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311-12*. Defendants will be free to attack the probativeness of that model or its perceived shortcomings as they see fit.

As previously noted, ***HN21***[] "[b]ecause the nature of the evidence that will suffice to resolve a **[*348]** question determines whether the question is common or individual, a district court must *formulate some prediction* as to how specific issues will play out in order to determine whether common or individual issues predominate **[**58]** in a given case." *Id.* (internal quotations and citations omitted, emphasis added). It does not take a crystal ball to predict the way this case will play out at trial—Plaintiffs will overwhelmingly rely on common evidence to prove the existence of a price-fixing conspiracy. Accordingly, "[c]ommon questions predominate where 'even if each Class Member . . . were to bring suit individually, each plaintiff would have to allege and prove virtually identical facts.'" *In re EPDM Antitrust Litig., 256 F.R.D. at 103* (quoting *In re Merrill Lynch & Co. Research Reports Sec. Litig., 246 F.R.D. 156, 165 (S.D.N.Y. 2007)*.

iii. Damages

HN22[] The final element Plaintiffs will have to prove at trial is that they suffered "measurable damages." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d at 311*. In contrast to the "impact" prong of the *Rule 23(b)* analysis, which asks only "*whether* the plaintiffs were harmed," the damages prong asks "by how much." *In re EPDM Antitrust Litig., 256 F.R.D. at 88*. At the class certification stage, Plaintiffs must show, by a preponderance of the evidence, that they will be able to prove damages using common proof. *In re Rail Freight, 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *74*.

In this case, Plaintiffs **[**59]** argue that common proof of damages exists in in the form of Dr. Lamb's regression analysis. Dr. Lamb contends that his regression method is "a standard economic method [ ] that is capable of being used to compute aggregate damages to the class as a whole." Lamb Report ¶ 114. Briefly, he uses his regression

---

[15] Dr. Lamb notes that his model is "preliminary, given that discovery is ongoing." He states that he is "highly confident that a model similar to this one will be capable of showing the degree to which prices were artificially inflated as a result of the Cartel and computing aggregate overcharges to the Class as a whole at trial." Lamb Report ¶ 82.

analysis to arrive at a seven percent overcharge during the course of the alleged conspiracy (*i.e.*, prices for TiO_2 were seven percent higher than they would have been absent the conspiracy). He then proposes to multiply the total volume of TiO_2 purchases by Class Members during the period by that percentage overcharge to arrive at "the total amount of damages owed to the Class." *Id.* ¶ 116. In other words, Dr. Lamb's regression is only capable of calculating an "aggregate" overcharge that is not capable of distinguishing between individual class members.

As the well-developed economic literature on cartels, relied on by Plaintiffs for their "impact" argument, makes clear, certain structural factors in an industry make collusion more attractive or more feasible. At the same time, however, that same literature teaches that one cannot assume an illegal price-fixing agreement would damage **[**60]** each class member in the same manner. That is because those very same structural factors that encourage collusion also encourage "cheating" by co-conspirators, thereby rendering individual damage amounts different among the members of a class. This theory, first enunciated by Nobel laureate George Stigler in *A Theory of Oligopoly*, 72 J. Pol. Econ. 44, 46 (1964), is well-established in the antitrust context. *See, e.g.*, RICHARD A. POSNER, ***ANTITRUST LAW*** 60-69 (2d ed. 2001). As demonstrated by Stigler, the empirical evidence indicates that even where a horizontal price-fixing agreement has been reached, that agreement will likely result in a range of impacts across the class. 72 J. Pol. Econ. At 46.

HN23[] The Fourth Circuit has consistently held that "average" or "aggregate" damages are not an appropriate measure of damages in an antitrust case. For example, in *Windham v. Am. Brands, Inc.*, the court stated, "[t]he language that Congress used in [the Antitrust statute] . . . leaves no room for awarding damages to some amorphous 'fluid class' rather than, or in addition, to one or more actually injured persons. It likewise does not permit any person to recover damages sustained not by him, but **[**61]** by someone else who happens to be a member of such class." *565 F.2d 59, 66 (4th Cir. 1977)* (quotations and citation omitted). While individual issues do not predominate for the purposes of this Court's "impact" analysis, individual issues certainly overshadow common issues with respect to damages. For example, as the Defendants have clearly shown, some level of individual negotiation took place between buyers and sellers of TiO_2 regarding rebates, price, non-price terms, and the like. If a price-fixing conspiracy existed, it is clear that **[*349]** such a conspiracy would necessarily have damaged the individual class members differently.

The need to inquire into individual damage calculations, however, is not an impediment to class certification. As summarized by the Fourth Circuit, a damages inquiry *necessarily* requires individual proof:

> . . . *Rule 23* contains no suggestion that the necessity for individual damage determinations destroys commonality, typicality, or predominance, or otherwise forecloses class certification. In fact, *Rule 23* explicitly envisions class actions with such individualized damage determinations. *See* *Fed. R. Civ. P. 23* advisory committee's note (1966 Amendment, *subdivision (c)(4)*) **[**62]** (noting that *Rule 23(c)(4)* permits courts to certify a class with respect to particular issues and contemplates possible class adjudication of liability issues with "the members of the class . . . thereafter . . . required to come in individually and prove the amounts of their respective claims."); *see also* 5 *Moore's Federal Practice § 23.23[2]* (1997) ("[T]he necessity of making an individualized determination of damages for each class member generally does not defeat commonality.").
>
> Indeed, "[i]n actions for money damages under *Rule 23(b)(3)*, courts *usually* require individual proof of the amount of damages each member incurred." *Id.* at § 23.46[2][a] (1997) (emphasis added). When such individualized inquiries are necessary, if "common questions predominate over individual questions as to liability, courts generally find the predominance standard of *Rule 23(b)(3)* to be satisfied." *Id.*

Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 427-28 (4th Cir. 2003). Given the inherent difficulties in assessing individual damages questions in this type of case, the Court notes that it has several options with which to consider damages at a future date. ***HN24***[] As discussed by the Second Circuit, there **[**63]** are at least five methods to deal with the individual damages inquiry:

> (1) bifurcating liability and damage trials with the same or different juries; (2) appointing a magistrate judge or special master to preside over individual damages proceedings; (3) decertifying the class after the liability trial and providing notice to class members concerning how they may proceed to prove damages; (4) creating subclasses; or (5) altering or amending the class.

In re Visa Check/ MasterMoney Antitrust Litig., 280 F.3d 124, 141 (citations omitted). Indeed, the Fourth Circuit in the *Gunnells* case reiterated its previous admonition to "take full advantage of the provision in [Rule 23(c)(4)] permitting class treatment of separate issues . . . to reduce the range of disputed issues in complex litigation." 348 F.3d at 426 (quoting In re A.H. Robins Co., Inc., 880 F.2d 709, 740 (4th Cir. 1989)).

Accordingly, while there exist numerous individual questions of damages, that is not enough to defeat class certification, and one or more of the above-listed methods may need to be utilized as this case progresses. *See* Gunnells, 348 F.3d at 427 **HN25**[] ("class certification 'provides a single proceeding in which to determine **[**64]** the merits of the plaintiffs' claims, and therefore protects *the defendant* from inconsistent adjudications.'") (quoting 5 Moore's Federal Practice § 23.02 (1999)).

C. Superiority

HN26[] The final requirement of Rule 23(b)(3) is that this Court must determine that "a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." Fed. R. Civ. P. 23(b)(3). "In deciding whether certification of a class is superior to other trial methods, the Court considers whether the resolution of common issues advances the litigation as a whole, as opposed to leaving a large number of issues for case-by-case adjudication." In re Polyester Staple Antitrust Litig., 2007 U.S. Dist. LEXIS 52525, 2007 WL 2111380, at *31 (W.D.N.C. July 19, 2007) (internal quotation and citation omitted). Here, the Defendants have not specifically argued that the superiority prong has not been met, and this Court concludes that because common issues predominate, class action treatment is superior to other available methods of adjudicating the Plaintiffs' claims. In short, class treatment will "achieve economies of time, effort, and expense, and promote . . . **[*350]** uniformity of decision as to persons similarly situated, **[**65]** without sacrificing procedural fairness or bringing about undesirable results." Amchem, 521 U.S. at 615.

III. Additional Issues

Rule 23(c)(1)(C) of the Federal Rules of Civil Procedure **HN27**[] provides simply that "[a]n order that grants or denies class certification may be altered or amended before final judgment." Fed. R. Civ. P. 23(c)(1)(C). This Court has previously stated that "[a] district court has 'broad discretion in determining whether the action may be maintained as a class action,' . . . and so long as the court considers the proper criteria, it is permitted to exercise such discretion." *Doe v. Lally, 467 F. Supp. 1339, 1345 (D. Md. 1979)* (citations omitted). As this court previously held, "[a] federal district court possesses the same broad discretion in determining whether to modify or even decertify a class." *Wu v. MAMSI Life & Health Ins. Co., 256 F.R.D. 158, 162 (D. Md. 2008)* (citing Gen. Tel. Co. of the Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)). In fact, a federal district court judge has an affirmative obligation to ensure that the class membership remains at all times consistent with the underlying facts and procedural posture of the case. *See* Richardson v. Byrd, 709 F.2d 1016, 1019 (5th Cir. 1983) **[**66]** ("Under Rule 23 . . . the district judge must define, redefine, subclass, and decertify as appropriate in response to the progression of the case from assertion to facts."); Chisolm v. TranSouth Fin. Corp. 194 F.R.D. 538, 544 (E.D. Va. 2000) ("[T]he Court is duty bound to monitor its class decision and, where certification proves improvident, to decertify, subclassify, alter, or otherwise amend its class certification.").

Here, in opposing class certification, the Defendants have raised several additional issues that do not fit neatly into the previously discussed Rule 23 categories. For example, Defendants claim that many members of the putative class entered into contracts with Defendants that contain mandatory arbitration provisions, forum-selection clauses, and jury waiver provisions. Neither party briefed these issues extensively, and they were only briefly addressed at the August 13 class certification hearing. Because it is unclear to what extent the putative class members have this type of contractual provision, and to what extent the Defendants will seek to uphold those agreements, this Court concludes that **HN28**[] "the possible arbitration [or other contractual bar] of some class **[**67]** members does not, by itself, defeat class certification." In re Rail Freight Antitrust Litig., 2012 U.S. Dist. LEXIS 97178, 2012 WL 2870207, at *28 (internal quotation and citation omitted).

Accordingly, to the extent certain putative class members' contracts render them atypical of the class as a whole, this Court will exercise its discretion to amend its class certification Order as necessary.

IV. *Rule 23(g)*—APPOINTING CLASS COUNSEL

HN29[] Pursuant to the 2003 amendments to *Rule 23*, the qualifications and experience of Plaintiffs' counsel are now considered under *Rule 23(g)*. *Rule 23(g)(1)* provides that "a court that certifies a class must appoint class counsel." *Fed. R. Civ. P. 23(g)(1)*. In appointing class counsel, a court must consider:

> (i) the work counsel has done in identifying or investigating potential claims in the action;
> (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action;
> (iii) counsel's knowledge of the applicable law; and
> (iv) the resources that counsel will commit to representing the class[.]

Id. This Court has already appointed the following interim co-lead class counsel: Gold Bennett Cera & Sidener LLP; Leiff, Cabraser, Heimann & Bernstein **[**68]** LLP; and the Joseph Saveri Law Firm. *See* Amended Case Mgmt. Order, ECF No. 326. Those law firms, with the addition of Eric L. Cramer of Berger & Montague, P.C. and Linda Nussbaum of Grant & Eisenhofer, P.A. have been appointed members of the Plaintiffs' Executive Committee. *See* Case Mgmt. Order, ECF No. 106. Finally, Paul Mark Sandler of **[*351]** Shapiro Sher Guinot & Sandler has been appointed Liaison Counsel. *See id.* As noted by the Plaintiffs:

> Since their initial appointment, the above-listed firms . . . have devoted substantial time and resources to this case, including complex legal matters on a variety of motions, case management, discovery planning, and extensive meetings and conferrals with Defendants regarding ongoing discovery. Moreover, proposed Class Counsel have demonstrated their extensive experience and expertise prosecuting antitrust, class action, and complex civil litigation cases and have successfully litigated antitrust class actions and other similar cases in courts throughout the United States.

Pls. Class Mem. at 41-42.

Defendants do not object or disagree with the Plaintiffs' characterization of their representation. This Court has reviewed the *Rule 23(g)(1)* requirements, **[**69]** and concludes that Plaintiffs' proposed co-lead counsel are well qualified to represent the class in this case. Accordingly, those counsel listed above will be appointed class counsel.

CONCLUSION

For the reasons stated above, this Court finds by a preponderance of the evidence that the Plaintiffs have established each necessary element of *Rule 23 of the Federal Rules of Civil Procedure*. Accordingly, Plaintiffs' Motion for Class Certification and for Appointment of Class Counsel (ECF No. 246) will be GRANTED.

Dated: August 28, 2012

A separate Order follows.

/s/ Richard D. Bennett

United States District Judge

ORDER

For the reasons stated in the foregoing Memorandum Opinion, this Court concludes that Plaintiffs and the proposed Class have satisfied the requirements of *Federal Rules of Civil Procedure 23(a)* and *23(b)(3)* as follows:

1. The proposed class is so numerous that joinder is impracticable. *Fed. R. Civ. P. 23(a)(1)*;

2. There are issues of law and fact common to the Class. *Fed. R. Civ. P. 23(a)(2)*;

3. The claims of the named Plaintiffs are typical of the Class claims. *Fed. R. Civ. P. 23(a)(3)*;

4. Named Plaintiffs have the same interests as the Class and are adequate Class representatives. *Fed. R. Civ. P. 23(a)(4)*;

5. Questions of law or fact common to the Class members predominate over questions affecting only individual members. *Fed. R. Civ. P. 23(b)(3)*; and

6. A class action is a superior method of adjudication. *Fed. R. Civ. P. 23(b)(3)*.

Accordingly, it is this 28th day of August, 2012, ORDERED that:

Plaintiffs' Motion for Class Certification and for Appointment of Class Counsel (ECF No. 246) is GRANTED

The following Class is certified under *Rule 23 of the Federal Rules of Civil Procedure*:

All persons and entities who purchased titanium dioxide in the United States directly from one or more Defendants or Tronox, or from any predecessors, parents, subsidiaries, or affiliates thereof, between February 1, 2003 and the present ("Class Period"). Excluded from the Class are Defendants, their co-conspirators, parent companies, predecessors, subsidiaries and affiliates, and all governmental entities.

Plaintiffs Haley Paint Company and Isaac Industries, Inc., and Intervening Plaintiff East Coast Colorants, LLC d/b/a Breen Color Concentrates are appointed as representatives of the Class.

Pursuant to *Federal Rule of Civil Procedure 23(g)*, the Court appoints (a) Gold Bennett Cera & Sidener LLP; Leiff, Cabraser, Heimann & Bernstein LLP; and the Joseph Saveri Law Firm as Co-Lead Class Counsel, (b) Eric L. Cramer of Berger & Montague, P.C. and Linda Nussbaum of Grant & Eisenhofer, P.A. as members of the Plaintiffs' Executive Committee (along with the Co-Lead Class Counsel), and (c) Paul Mark Sandler of Shapiro Sher Guinot & Sandler as Liaison Counsel.

The parties shall confer and submit to the Court a proposed form of notice to the Class **[*352]** no later than 30 days from entry of this Order.

Dated: August 28, 2012

/s/ Richard D. Bennett

United States District Judge

Disposition: The dismissal of the competitor's federal antitrust claims was affirmed, but the dismissal of its claims under the Lanham Act and claims under state law was reversed. The remainder of the judgment was affirmed.

Core Terms

cartridges, infringement, patents, district court, remanufacturers, microchips, Prebate, allegations, antitrust, toner, counterclaim, customers, inducement, damages, printers, claimant, supplier, exhaustion, relevant market, bond amount, indirect, parties, matter of law, Lanham Act, purchasers, prices, new trial, appearance, factors, summary judgment

LexisNexis® Headnotes

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Exclusive Jurisdiction

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

HN1[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

The United States Court of Appeals for the Federal Circuit has exclusive jurisdiction over appeals from final decisions of a district court if the jurisdiction of that court was based, in whole or in part, on *28 U.S.C.S. § 1338* (amended). *28 U.S.C.S. § 1295(a)(1)* (amended). *Section 1338* gives federal district courts original jurisdiction exclusive of the state courts over any civil action arising under any Act of Congress relating to patents. *28 U.S.C.S. § 1338(a)* (amended). Because Congress used the phrase "arising under," patent issues raised in relation to a defense or as counterclaims (prior to the amendments of *§§ 1295*, *1338*) are insufficient to confer Federal Circuit jurisdiction.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN2[] **Pleadings, Amendment of Pleadings**

Constructive amendments typically occur when a specific claim is not raised, but the parties by their actions act as if they consent to making the claim a part of the proceedings. Constructive amendment typically requires express or implied consent of the parties.

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

Civil Procedure > Preliminary Considerations > Removal > Nonremovable Actions

HN3[] **Subject Matter Jurisdiction, Federal Questions**

The United States Supreme has compared the "arising under" inquiry for *28 U.S.C.S. § 1338* (amended) to the "arising under" inquiry for original jurisdiction under *28 U.S.C.S. § 1331*. And third-party defendants may not remove a controversy to federal court solely because the original defendant filed related federal claims against them.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN4[] **Preclusion of Judgments, Law of the Case**

Issues decided at an early stage of the litigation, either explicitly or by necessary inference from the disposition, constitute the law of the case.

Civil Procedure > Remedies > Injunctions > General Overview

HN5[] Remedies, Injunctions

A bond amount shall be set in an amount that the court considers proper to pay the costs and damages sustained by any party found to have been wrongfully enjoined or restrained. *Fed. R. Civ. P. 65(c)*. District courts have broad discretion in setting the bond amount. The court may order a bond that does not completely secure the enjoined party or the court may decline to order a bond, if necessary for the purpose of effecting justice between the parties.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] Standards of Review, De Novo Review

An appellate court reviews de novo a district court's decision to dismiss a counterclaim for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)*. In reviewing a motion to dismiss, the appellate court accepts all non-conclusory allegations of fact as true and decides whether the claimant has stated a plausible claim for relief. The pleading must state enough facts to state a claim to relief that is plausible on its face; failure to plead sufficient facts will lead to dismissal of the claim.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

Antitrust & Trade Law > Sherman Act > Claims

HN7[] Clayton Act, Claims

Pursuant to the Clayton Act, *15 U.S.C.S. § 15(a)*, private parties may bring private actions for violations of the Sherman Act. *Section 1* of the Sherman Act prohibits conspiracies to restrain trade. *15 U.S.C.S. § 1*. A *§ 1* conspiracy requires more than a manufacturer's unilateral refusal to deal. There must be evidence that tends to exclude the possibility that the conspirators were acting independently.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Claims

HN8[] Actual Monopolization, Claims

Section 2 of the Sherman Act prohibits the illegal monopolization of a market. *15 U.S.C.S. § 2*. To bring a claim under *§ 2*, a claimant must show (1) possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen or historic accident.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN9[] **Standing, Requirements**

To bring a private claim for damages under either *§§ 1*, *2*, of the Sherman Act, the claimant must first demonstrate that it has standing. Although required in all cases, standing in an antitrust case is more onerous than the conventional U.S. Const. art. III inquiry. Antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement a court must dismiss it as a matter of law. The district court decides whether a claimant has adequately pleaded antitrust standing by balancing five factors: (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation. No one factor controls.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] **Standing, Requirements**

Traditionally, only claimants who are competitors or consumers within the injured market have standing to sue for anti-competitive conduct. However, claimants who are not direct players in the relevant market may nonetheless have standing if their injury is inextricably intertwined with the injury sought to be inflicted upon the relevant market or participants therein. The inextricably intertwined exception, however, is narrow. This exception was not designed to give standing to claimants whose injuries are a tangential byproduct of monopolistic conduct in a related market. To succeed, the claimant must show that the defendants manipulated or utilized the claimant as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and geographical markets.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN11[] **Standing, Requirements**

An inextricably intertwined injury, for purposes of standing to sue for anti-competitive conduct, is one that results from the manipulation of the injured party as a means to carry out the restraint of trade in the product market.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Standing, Requirements**

Antitrust causation is much more limited than U.S. Const. art. III standing.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

Where there are more-direct victims of the anticompetitive conduct, those victims have the standing to sue, rather than those affected indirectly.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN14[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Merely demonstrating the existence of an exclusive distributorship in a market area does not violate Robinson-Patman -- or any other antitrust provision.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN15[] Regulated Practices, Price Fixing & Restraints of Trade

Antitrust injury does not arise for purposes of § 4 of the Clayton Act until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct. Cases have routinely rejected claims of antitrust violations that may very well be violations when the claimants stood to gain from the anticompetitive conduct. Therefore, a plaintiff cannot recover for a conspiracy to impose nonprice restraints that have the effect of either raising market price or limiting output.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN16[] Noerr-Pennington Doctrine, Sham Exception

The act of filing suit generally does not constitute an antitrust injury under the Noerr-Pennington doctrine. Although exceptions are made when the filing is a sham for interfering with competition, the first inquiry for identifying sham litigation is objective reasonableness: only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation.

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > General Overview

HN17[] Justiciability, Standing

Standing is a jurisdictional requirement that cannot be waived, and such may be brought up at any time in the proceeding.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN18[] Remedies, Injunctions

The Clayton Act permits a private party to obtain injunctive relief against threatened loss or damage by a violation of the antitrust laws. *15 U.S.C.S. § 26*.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN19[] Clayton Act, Remedies

The Clayton Act does not authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred. The only difference between a claim for equitable relief and one for damages is that equitable relief is available at the mere threat of antitrust injury.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Trademark Law > ... > Federal Unfair Competition Law > False Designation of Origin > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

HN20[] Federal Unfair Competition Law, Lanham Act

See *15 U.S.C.S. § 1125(a)(1)*.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

HN21[] False Advertising, Elements of False Advertising

A Lanham Act claimant need not demonstrate actual losses as a result of the defendant's misleading use of the claimant's trademarks in its advertisements, only a likelihood of injury and causation. Under the "reasonable interest" approach, the claimant has standing if the claimant can demonstrate (1) a reasonable interest to be protected against the alleged false advertising and (2) a reasonable basis for believing that the interest is likely to be damaged by the alleged false advertising.

Trademark Law > ... > Federal Unfair Competition Law > False Designation of Origin > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

HN22[] Federal Unfair Competition Law, False Designation of Origin

The United States Court of Appeals for the Sixth Circuit agrees with the Third Circuit's reasoned analysis rejecting a distinction between a claim under *15 U.S.C.S. § 1125(a)(1)(A)* for false association of trademark and under *§ 1125(a)(1)(B)* for false advertising claims for purposes of standing.

Governments > Courts > Judicial Precedent

HN23[] Courts, Judicial Precedent

An appellate panel cannot overturn a prior published decision of the appellate court absent inconsistent United States Supreme Court precedent or an en banc reversal.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN24[] Private Actions, Standing

The "target area" test gives antitrust standing to anyone who was within the zone of economic harm caused by the anticompetitive conduct whose harm was proximately caused by such conduct.

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN25[] Fundamental Rights, Trial by Jury in Civil Actions

See *U.S. Const. amend. VII*.

Civil Procedure > Trials > Bench Trials

Civil Procedure > Trials > Jury Trials > General Overview

HN26[] Trials, Bench Trials

To convert a trial from a jury trial to a bench trial (or vice-versa) in the middle of the proceedings is to interfere with counsel's presentation of their case and, quite possibly, to prejudice one side or the other.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Trials > Judgment as Matter of Law > Postverdict Judgment

HN27[] Standards of Review, De Novo Review

An appellate court reviews de novo a district court's decision to deny a motion for a judgment as a matter of law under *Fed. R. Civ. P. 50*. A renewed motion for a judgment as a matter of law following an adverse jury verdict may only be granted if, when viewing the evidence in a light most favorable to the non-moving party, giving that party the benefit of all reasonable inferences, reasonable minds could come to but one conclusion in favor of the moving party. Judgment as a matter of law is appropriate only where there is no legally sufficient evidentiary basis for a reasonable jury to find for the non-moving party on that issue. *Fed. R. Civ. P. 50(a)(1)*. The appellate court will not substitute its interpretation of the evidence for the jury's, even if it would have reached a different conclusion.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN28[] Standards of Review, Abuse of Discretion

An appellate court reviews for abuse of discretion a district court's decision to deny a motion for a new trial under *Fed. R. Civ. P. 59*. A new trial is warranted after a jury verdict for any reason for which a new trial has heretofore been granted in an action at law in federal court. *Fed. R. Civ. P. 59(a)*. A new trial is appropriate when the jury reaches a seriously erroneous result as evidenced by (1) the verdict being against the clear weight of the evidence; (2) the damages being excessive; or (3) the trial being unfair to the moving party in some fashion, i.e., the proceedings being influenced by prejudice or bias.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN29[] **Entitlement as Matter of Law, Appropriateness**

An appellate court reviews de novo a district court's grant of summary judgment. The moving party is entitled to summary judgment when there is no genuine issue of material fact and the issue may be resolved as a matter of law. *Fed. R. Civ. P. 56(a)*. The evidence on summary judgment must be construed in the light most favorable to the non-moving party. When genuine issues of material fact remain, the proper course of action is to submit such questions to the finder of fact.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

Patent Law > Infringement Actions > Burdens of Proof

HN30[] **Infringing Acts, Indirect Infringement**

To establish a claim for patent inducement under *35 U.S.C.S. § 271(b)*, a plaintiff bears the burden of showing by a preponderance of the evidence that (1) a third party directly infringed the plaintiff's patents; (2) the defendant took active steps that induced the third party's infringement; (3) the defendant intended the third parties to take the infringing acts; and (4) the defendant knew or willfully disregarded the risk that those actions by the third party would constitute direct infringement. Patent infringement by a third-party is therefore a necessary predicate to inducement to infringe.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

Patent Law > Remedies > Damages > Measure of Damages

HN31[] **Infringing Acts, Indirect Infringement**

A plaintiff can establish the first element of inducement to infringe either by demonstrating specific instances of direct infringement or a finding that the accused products necessarily infringe. When the plaintiff can show only individual instances of direct infringement, the plaintiff may recover only for the damages from those individual acts. If the plaintiff can show an entire class of third parties necessarily infringed, damages can be sought more broadly across the entire class.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

Patent Law > Infringement Actions > Defenses > General Overview

HN32[] **Infringing Acts, Indirect Infringement**

Direct patent infringement occurs under *35 U.S.C.S. § 271(a)* when someone (1) without authority (2) makes, uses, offers to sell, sells, or imports (3) the patented invention (4) within the United States, its territories, or its possessions (5) during the term of the patent. Determining whether someone is making, using, or selling a patented invention requires a finding that the patent claim covers the alleged infringer's product or process. The determination that a patent's claims cover a specific device is often referred to as "literal infringement." Literal infringement alone is not enough to support a claim for inducement, because the predicate to inducement is a violation of *§ 271(a)*, which requires more than that the accused devices literally infringe. For example, a party could not be liable for inducing infringement if an accused device literally infringed a patent claim but the literal infringer had authority to use the patent or a patent had otherwise expired, thereby defeating a determination of direct patent infringement.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

HN33[] **Infringing Acts, Indirect Infringement**

An accused device will necessarily infringe a patent, permitting a finding of direct infringement by a class of customers and an inference that the inducer intended the infringement, if the customers can only use the defendant's products in an infringing way. When an accused device could be used in either an infringing or a non-infringing way, a claim of direct infringement based on necessary infringement fails and cannot sustain an inducement claim.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

Patent Law > ... > Defenses > Patent Invalidity > General Overview

HN34[] **Infringing Acts, Indirect Infringement**

Exhaustion of a patentee's rights is a defense to direct infringement and is not the same as establishing a non-infringing use of a patented device, which would defeat a finding that a defendant's customers necessarily infringed the patents.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Evidence > ... > Presumptions > Particular Presumptions > Regularity

HN35[] **Jury Trials, Jury Instructions**

Jurors are presumed to be diligent in following the precise instructions given to them.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

Patent Law > Infringement Actions > Burdens of Proof

HN36[] **Infringing Acts, Indirect Infringement**

A plaintiff bears the burden of establishing by a preponderance of the evidence that a defendant had the requisite intent to induce infringement. This means that the alleged inducer must intend the customers to take the acts that ultimately constituted infringement and the inducer must know or willfully disregard the risk that those actions by its customers would constitute direct infringement.

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Indirect Infringement

HN37[] **Infringing Acts, Indirect Infringement**

Advertising infringing uses, instructing how to engage in infringing uses, demonstrating infringing uses, and recommending infringing uses is strong evidence of specific intent to cause the actions that constitute direct infringement.

Patent Law > ... > Defenses > Patent Invalidity > General Overview

HN38[] **Defenses, Patent Invalidity**

Patent invalidity is a defense to a claim for patent infringement. *35 U.S.C.S. § 282*.

Evidence > Burdens of Proof > Clear & Convincing Proof

Patent Law > Infringement Actions > Burdens of Proof

Patent Law > ... > Defenses > Patent Invalidity > Fact & Law Issues

Patent Law > ... > Defenses > Patent Invalidity > Presumption of Validity

HN39[] **Burdens of Proof, Clear & Convincing Proof**

All patents are presumed valid, and the burden of overcoming this presumption rests on the party seeking invalidity. *35 U.S.C.S. § 282*. Invalidity must be established by clear and convincing evidence. Patent validity is a question of law. However, where legal analysis rests on factual findings, an appellate court will not reverse such findings absent clear error.

Patent Law > Subject Matter > Design Patents > Functionality

Patent Law > Subject Matter > Design Patents > Ornamentality Requirement

HN40[] **Design Patents, Functionality**

Design patents are issued to whoever invents any new, original and ornamental design for an article of manufacture. *35 U.S.C.S. § 171*. A design patent is not ornamental if the design serves only functional purposes. In other words, a design patent cannot be obtained to protect a mechanical function or cover an article whose configuration affects its utility alone. An article is less likely to be ornamental if it is not observed, and the United States Court of Appeals for the Federal Circuit looks not just to whether the article is ever seen but whether the appearance of the article may become a "matter of concern" at any point during the article's "normal and intended use."

HN41[] **Infringement Actions, Burdens of Proof**

To establish invalidity of a design patent, the infringer must show that consumers do not consider the patented design to be significant.

Counsel: ARGUED: Seth D. Greenstein, CONSTANTINE & CANNON LLP, Washington, D.C., for Appellant/Cross-Appellee.

Steven B. Loy, STOLL KEENON OGDEN PLLC, Lexington, Kentucky, for Appellee/Cross-Appellant.

Opinion by: KAREN NELSON MOORE

Opinion

[**1356] [*394] [***2]** KAREN NELSON MOORE, Circuit Judge. Lexmark International, Inc. ("Lexmark") is a major producer of laser printers **[*395]** and toner cartridges for its laser printers. Other companies, called remanufacturers, acquire used Lexmark toner cartridges, refill them, and sell them to owners of Lexmark printers at a lower cost. Lexmark developed microchips for both the toner cartridges and the printers so that Lexmark printers will reject any toner cartridges not containing a matching microchip, and over time Lexmark has patented certain aspects of the cartridges. Static Control Components, Inc. ("Static Control") has identified how to replicate the cartridge microchips and sells the microchips to the remanufacturers along with other parts to facilitate the repair and resale of Lexmark toner cartridges.

Lexmark sued Static Control in 2002 (the "02 Action") for copyright violations related to its source code in making the duplicate microchips and was given a preliminary injunction by the district court. Static Control counterclaimed under federal and state antitrust and false-advertising **[**3]** laws. While that suit was pending, Static Control redesigned its microchips and sued Lexmark for declaratory judgment in 2004 (the "04 Action") to establish that the redesigned microchips did not infringe any copyright.[1] Lexmark counterclaimed again for copyright violations and this time added patent counterclaims against Static Control and eventually three of the remanufacturers. The two suits were consolidated into the 04 Action.

---

[1] Citations to the record herein are to the 04 Action unless designated with "02R."

On appeal of the preliminary injunction, the Sixth Circuit vacated and rejected Lexmark's copyright theories. *Lexmark Int'l, Inc. v. Static Control Components, Inc., 387 F.3d 522 (6th Cir. 2004)* ("*Lexmark* ***[****1357]*** *I*"). On remand, Lexmark successfully moved to dismiss all of Static Control's counterclaims. The case proceeded to trial, and the only issues ultimately submitted to the jury were Lexmark's claim of patent inducement **[***3]** against Static Control and Static Control's defense of patent misuse. The district judge instructed the jury that its findings on patent misuse would be advisory; the jury held that Static Control did not induce patent infringement and advised that Lexmark misused **[**4]** its patents. Lexmark renewed its earlier request for a judgment as a matter of law and also filed a motion for a retrial, which the district court denied. Both parties timely appealed.

For the following reasons, we **AFFIRM** the district court's dismissal of Static Control's federal antitrust claims, but **REVERSE** the dismissal of Static Control's claims under the Lanham Act and certain claims under state law. We **AFFIRM** the remainder of the judgment on appeal.

I. BACKGROUND

A. Factual Background

Lexmark manufactures laser printers, which require toner cartridges to print. The market for printers and toner cartridges generally has many players, e.g., Xerox, Epson, Hewlett-Packard, and Canon, and Lexmark's share of the overall printer market is less than 15%. Second Appellee Br. at 4. Each company generally manufactures its printers to work with only its own style of cartridges, and each company's cartridges will work with only its brand of printers. Therefore, each company typically dominates the aftermarket for cartridges compatible with its brand of printers, although the primary market for printers is well populated.

Remanufacturers are companies that participate in the toner-cartridge aftermarkets **[**5]** by acquiring used toner cartridges of all kinds of printers, repairing and refilling them, and selling them to **[*396]** owners of that kind of printer at a lower price.[2] First Appellant Br. at 11. Lexmark also acquires and repairs its used toner cartridges for resale. In the 1990s, Lexmark started a "Prebate" program with certain large customers whereby Lexmark would sell new toner cartridges at an upfront discount of around 20% **[***4]** if the end user agreed to (1) a single-use license and (2) a restriction that the cartridge be returned to Lexmark for remanufacturing or recycling and not to a third-party remanufacturer. Second Appellee Br. at 6. These terms were printed on several notices on the outside of the toner-cartridge box, which instructed the user that opening the box would indicate acceptance of the terms. Regular cartridges not subject to the Prebate terms are still sold, but at a higher price than the Prebate cartridges. According to Static Control, the price of Lexmark toner cartridges increased following the implementation of the program because of reduced competition from remanufacturers. First Appellant Br. at 16.[3]

Lexmark toner cartridges each contain a microchip that communicates with the printer once installed. Toner cartridges that are otherwise compatible with Lexmark printers will not function without the microchip. Lexmark obtains these microchips from a supplier that has allegedly agreed to sell microchips only to Lexmark. All Lexmark toner cartridges are initially manufactured with the necessary microchip, but the microchip for the Prebate cartridges is specifically designed to enforce the Prebate terms by disabling the cartridge for future use after the cartridge runs out of toner. To use the Prebate cartridge again, the microchip needs to **[**7]** be replaced. To use a non-Prebate cartridge again, the microchip does not need to be replaced unless it was damaged.

---

[2] Wazana Brothers International, Inc. d/b/a Micro Solutions Enterprises **[**6]** ("Wazana"), Pendl Companies, Inc. ("Pendl"), and NER Data Products, Inc. ("NER") are three remanufacturers who have purchased microchips from Static Control for Lexmark toner cartridges and were once third-party defendants to the suit. They are not parties to the appeal.

[3] In comparison, Static Control claims that the price of Hewlett Packard toner cartridges fell during the same period because Hewlett Packard does not employ a similar "Prebate" program and remanufacturers are able to occupy a larger share of the aftermarket for Hewlett Packard toner.

Lexmark eventually obtained several patents relating to its toner cartridges. At issue on appeal are nine utility patents that the remanufacturers allegedly infringe (referred to as the "nine mechanical patents") and two design patents relating to seven different toner cartridges. Static Control developed a microchip that could replace the microchip on the Prebate toner cartridges, permitting a third party to remanufacture and sell the toner cartridge again. Static Control also sent its customers a letter, referred to as an "Anti-Prebate kit," consisting of information from Static Control's general counsel regarding why the Prebate program is not valid under principles of contract law. Second Appellee Br. at 33. Remanufacturers buy these microchips from **[****1358]** Static Control, along **[***5]** with other parts. Static Control does not manufacture, remanufacture, or sell toner cartridges of any kind, but it is the market leader on making and selling the components necessary to remanufacture Lexmark cartridges. First Appellant Br. at 11. Lexmark, on the other hand, sells toner cartridges **[**8]** but does not sell any of the component parts necessary to repair or remanufacture its toner cartridges, whether Prebate cartridges or not.

B. Procedural Background

Lexmark sued Static Control in December 2002 for violations of federal copyright **[*397]** laws and the Digital Millennium Copyright Act ("DMCA"), relating to two computer programs on its printer chips. Lexmark sought to halt Static Control's sale of the allegedly infringing chips. Static Control responded, ultimately counterclaiming under federal and state antitrust and false-advertising laws. Static Control claimed that Lexmark's Prebate program unlawfully excluded competition in the aftermarket for Lexmark-compatible cartridges, reducing competition and increasing prices, and that Lexmark falsely told remanufacturers that Static Control was infringing on Lexmark's patents. Lexmark then counterclaimed in reply, adding remanufacturers as defendants and making additional claims under the DMCA and various state-law claims, but no patent claims.

On January 8, 2003, Lexmark received a temporary restraining order in the 02 Action, and on January 24, 2003, the district court required Static Control to post an injunction bond of $75,000. On **[**9]** February 7, 2003, the district court increased the bond to $250,000 and extended relief for 21 days. On February 27, 2003, district court granted the preliminary injunction. Static Control appealed both the injunction and the bond amount, and in October 2004 the Sixth Circuit reversed the preliminary injunction, making no comment on the bond amount. *Lexmark I, 387 F.3d at 551*. Static Control sought rehearing on the issue of the bond amount, which we denied in a one-sentence order. *Lexmark Int'l, Inc. v. Static Control Components, Inc., No. 03-5400, 2004 U.S. App. LEXIS 27422 (6th Cir. Dec. 29, 2004)* (unpublished order). In light of the ruling, the parties stipulated to **[***6]** summary judgment against Lexmark on its DMCA claims. R. 216 (D. Ct. Order 2/23/06).

Before the Sixth Circuit ruled, however, Static Control initiated the 04 Action seeking declaratory judgment under federal copyright laws and the DMCA that its newly modified chips did not infringe Lexmark's copyrights. Lexmark counterclaimed raising patent infringement, DMCA violations, and tort claims, and added three remanufacturers as third-party defendants—Wazana, NER, and Pendl. Following the Sixth Circuit's remand, Lexmark moved to dismiss Static Control's **[**10]** counterclaims. The district court granted the motion in September 2006. During the course of the proceedings, which concluded in a jury trial, nine of Lexmark's mechanical patents were held valid, *see* R. 1008 (D. Ct. Order 4/24/07), and summary judgment was granted to Lexmark on its claims of direct patent infringement against Wazana, NER, and Pendl, see R. 1203 (D. Ct. Order 5/25/07); R. 1245 (D. Ct. Order 5/31/07). All three defendant remanufacturers ultimately settled with Lexmark at various points before the verdict. The district court also granted summary judgment to Lexmark on the validity of its single-use license for Prebate cartridges, which the district court concluded prevented Lexmark's patents from exhausting following the initial sale of the Prebate toner cartridges to end users. R. 1008 (D. Ct. Order 4/24/07).

By the close of trial, the only remaining issues were Lexmark's patent-infringement-inducement claims against Static Control and Static Control's equitable defense of patent misuse. Because the district court had already ruled on summary judgment that three of the remanufacturers directly infringed, the jury was asked to decide whether the unnamed remanufacturers **[**11]** directly infringed as a class and whether Static Control induced any direct infringement. Because the district court determined that patent misuse was an equitable defense, the final jury instructions indicated that the jury's findings with respect to misuse would be merely advisory. R. 1365 (Jury Instructions). The jury returned a verdict that Lexmark had failed **[*398]** to show that the remanufacturers as a class directly infringed Lexmark's patents and failed to show that Static Control induced the direct infringement of the three named remanufacturers, **[***7]** Wazana, NER, and Pendl. R. 1366 (Special Verdict Form at 1-3). The jury then advised that it found Static Control had proven by a preponderance of the evidence certain facts that supported Static Control's defense that Lexmark misused its patents. *Id*. at 11-19; *see also* R. 1365 (Jury Instructions at 35-41) (defining misuse).

Lexmark moved for judgment as a matter of law both before and after the verdict and also filed a motion for a new trial on its patent inducement claim, arguing that the evidence **[****1359]** was sufficient to establish direct infringement by Static Control's customers as a class and that, with respect to inducement, the district court **[**12]** erroneously excluded evidence at trial. The district court denied the motions. R. 1430 (D. Ct. Op. 10/03/08); R. 1521 (D. Ct. Op. & Order 10/28/10). The district court subsequently reversed its prior ruling that Lexmark's patents were not exhausted in its Prebate cartridges in light of recent Supreme Court precedent. R. 1443 (D. Ct. Op. & Order 3/31/09). Both parties filed timely appeals.

II. JURISDICTION

The parties did not state in their initial briefs the basis for this court's appellate jurisdiction. We therefore asked the parties to submit letter briefs addressing whether we have jurisdiction over this appeal or whether the Federal Circuit has exclusive jurisdiction to review the case under *28 U.S.C. § 1295*. After all, the entirety of Lexmark's appeal requires us to resolve substantive issues of patent law. Static Control responds that this court has jurisdiction; Lexmark maintains that the Federal Circuit has exclusive jurisdiction. On review, we determine that *28 U.S.C. § 1295* does not require that the Federal Circuit hear this case on appeal. We have jurisdiction under *28 U.S.C. § 1291*.

HN1[] The Federal Circuit has exclusive jurisdiction over appeals from final decisions of a district **[**13]** court "if the jurisdiction of that court was based, in whole or in part, on *section 1338* of this title." *28 U.S.C. § 1295(a)(1) (2000)*. *Section 1338* gives federal district courts original jurisdiction exclusive of the state courts over "any civil action arising under any Act of Congress relating to patents." *28 U.S.C. § 1338(a) (1999)*. Because Congress used the phrase "arising under," the Supreme Court has held that **[***8]** patent issues raised in relation to a defense or as counterclaims are insufficient to confer Federal Circuit jurisdiction. *Holmes Grp., Inc. v. Vornado Air Circulation Sys., Inc., 535 U.S. 826, 831, 122 S. Ct. 1889, 153 L. Ed. 2d 13 (2002)*. Congress amended *28 U.S.C. §§ 1295* and *1338* in the Leahy-Smith America Invents Act to provide additionally for exclusive Federal Circuit jurisdiction over "any civil action in which a party has asserted a compulsory counterclaim arising under[] any Act of Congress relating to patents," but the amendment is applicable only "to any civil action commenced on or after the date of the enactment of this Act." Pub. L. 112-29, § 19(b), (e), 125 Stat. 333. The law was enacted on September 16, 2011. The civil actions here were commenced well before that date; therefore, the new **[**14]** provision does not apply.

At first glance, this case appears clear cut: In both the 02 and the 04 Actions, the issues implicating patent law arose as counterclaims. However, the Supreme Court has suggested—but declined to decide—that the evolving circumstances of a case may create a situation wherein exclusive Federal Circuit appellate jurisdiction would follow. *Holmes, 535 U.S. at 829 n.1* **[*399]** ("[T]his case does not call upon us to decide whether the Federal Circuit's jurisdiction is fixed with reference to the complaint as initially filed or whether an actual or constructive amendment to the complaint raising a patent-law claim can provide the foundation for the Federal Circuit's jurisdiction."); *Christianson v. Colt Indus. Operating Corp., 486 U.S. 800, 814-15, 108 S. Ct. 2166, 100 L. Ed. 2d 811 (1988)* ("We need not decide under what circumstances, if any, a court of appeals could furnish itself a jurisdictional basis unsupported by the pleadings by deeming the complaint amended in light of the parties' 'express or implied consent' to litigate a claim.").

Whatever those evolving circumstances may be, however, they are not present in this case. Lexmark can point to no actual or constructive amendment of either complaint. **[**15]** ***HN2***[] Constructive amendments typically occur when a specific claim is not raised, but the parties by their actions act as if they consent to making the claim a part of the proceedings. *See* *Torry v. Northrop Grumman Corp., 399 F.3d 876, 878 (7th Cir. 2005)* (Posner, J.);

Sunbeam Prods., Inc. v. Wing Shing Prods. (BVI) Ltd., 153 F. App'x 703, 706-07 (Fed. Cir. 2005) (unpublished opinion), *cert. denied*, *546 U.S. 1095, 126 S. Ct. 1085, 163 L. Ed. 2d 863 (2006)* **[***9]** (holding Federal Circuit had jurisdiction because pretrial order that added patent issue debated by the parties constructively amended the complaint even though not raised as a claim). Here, the patent claims were raised *ab initio* by the interested party as counterclaims, and no amendment would be necessary to make them formally part of the suit. Furthermore, Lexmark sought actually to amend the complaint in the 02 Action to add its patent claims with the express purpose of assuring Federal Circuit jurisdiction. R. 456 (Lexmark's Mot. to Amend). Static Control objected, and Lexmark's motion was denied. R. 649 (D. Ct. Order 1/9/07). Constructive amendment typically requires express or implied consent of the parties, both of which are lacking. **[****1360]**

Lexmark's best argument is that **[**16]** its patent counterclaims in the 04 Action added new parties, and that the district court's jurisdiction over Lexmark's third-party complaint potentially "arose under" the patent laws. Unfortunately for Lexmark, this too seems insufficient to make the case one "arising under" patent laws. Lexmark offers no law or case addressing whether a third-party complaint can render any part of the controversy "arising under" patent law. However, ***HN3***[] the Supreme Court in *Holmes* compared the "arising under" inquiry for 28 U.S.C. § 1338 to the "arising under" inquiry for original jurisdiction under 28 U.S.C. § 1331. And we know that third-party defendants may not remove a controversy to federal court solely because the original defendant filed related federal claims against them. First Nat'l Bank of Pulaski v. Curry, 301 F.3d 456, 461-67 (6th Cir. 2002). Lexmark has presented no compelling reason to treat this case any differently. The district court's jurisdiction arose under 28 U.S.C. §§ 1331 and 1367, and not under § 1338. Therefore, we have appellate jurisdiction under 28 U.S.C. § 1291.

[***10] III. INJUNCTION-BOND AMOUNT

Static Control appeals the amount of the injunction bond entered by the district court **[**17]** when the district court issued the preliminary injunction in 2002.[4] **[*400]** The final bond amount entered by the district court was $250,000; Static Control sought estimated damages of over $17 million. When the preliminary injunction was entered in 2003, Static Control appealed both the injunction and the bond amount to the Sixth Circuit. We vacated the injunction, but we made no mention of the bond. Lexmark I, 387 F.3d 522. Static Control sought rehearing from the Sixth Circuit specifically on the issue of the proper injunction-bond amount, which we summarily denied.

In November 2009, only a few days after filing its notice of appeal, Static Control filed a Motion for Wrongful Injunction Damages in the district court, seeking actual damages of $7-10 million, well in excess of the $250,000 injunction-bond amount. R. 1473 (Static Control's Mot. to Vacate). Lexmark opposed, arguing that the bond amount should serve as the cap on damages. R. **[**18]** 1495 (Lexmark's Opp. to Mot. to Vacate). As late as January 29, 2010, Static Control was imploring the district court to "recalculate the bond to reflect the projected damages and set an evidentiary hearing to allow Static Control to prove its actual damages." R. 1503 (Static Control's Reply Mot. to Vacate at 14). After oral argument in this appeal and prompting from Lexmark, the district court recently denied this motion and ordered the clerk to release the security bond to Static Control. R. 1530 (D. Ct. Order 4/24/12). Static Control has sent us a letter brief asking us to ignore this order because the district court lacked jurisdiction to decide this amount following the filing of Static Control's notice of appeal, an argument which Static Control presented in its most recent papers before the district court but not in its initial motion seeking the very relief it now claims the district court lacks the jurisdiction to award.

[*11]** Lexmark contends that this panel should not consider this argument because the Sixth Circuit necessarily rejected Static Control's claim in declining to vacate the bond amount on the initial appeal. Static Control argues that this issue may be considered because **[**19]** it was never "*squarely decided*" on the first appeal. First Appellant Br. at 24 n.9 (internal quotation marks omitted). ***HN4***[] "Issues decided at an early stage of the

---

[4] Static Control concedes that "a party cannot recover more than the value of the bond for injunction-related damages." First Appellant Br. at 25 & n.10 (citing Mich. AFSCME Council 25, Local 1640 v. Matrix Human Servs., 589 F.3d 851, 860 (6th Cir. 2009)).

litigation, either explicitly or by necessary inference from the disposition, constitute the law of the case." *Hanover Ins. Co. v. Am. Eng'g Co., 105 F.3d 306, 312 (6th Cir. 1997)* (internal quotation marks omitted); *see also* *Bowles v. Russell, 432 F.3d 668, 676-77 (6th Cir. 2005)*, *aff'd*, *551 U.S. 205, 127 S. Ct. 2360, 168 L. Ed. 2d 96 (2007)*. Static Control appears to have the better of the argument, because we do not see how the prior panel's lack of commentary on the bond amount (and subsequent decision not to rehear the appeal on the bond amount) contains a necessary inference that we found the bond amount to be proper. Ultimately, however, whether our refusal to reconsider Static Control's appeal of the bond amount constitutes the law of the case does not matter because the bond amount was not improper.

HN5[] A bond amount shall be set "in an amount that the court considers proper to pay the costs and damages sustained by any party found to have been wrongfully enjoined or restrained." *Fed. R. Civ. P. 65(c)*. District courts have broad discretion in setting the bond **[**20]** amount. *Div. No. 1, Detroit, Bhd. of Locomotive Eng'rs v. Consol. Rail Corp., 844 F.2d 1218, 1226 (6th Cir. 1988)*. "[T]he court may order a bond that does not completely secure the **[*401]** enjoined party or the court may decline to order a bond, if necessary for the purpose of effecting **[****1361]** justice between the parties." *Id. at 1227 n.15* (internal quotation marks omitted).

At the preliminary injunction hearing, Static Control's CEO testified that the company would lose $17,463,580 if forced to halt sales for two years. The CEO testified to the overall method his company used to calculate that number, but never presented any underlying calculations. Cross-examination revealed a number of assumptions underlying Static Control's estimate, including the assumption that it would take six years for Static Control to regain its previous market position if enjoined. The fact that the ultimate bond amount selected by the district court was only two percent of Static **[***12]** Control's claimed damages therefore carries little weight. The district court was not required to credit Static Control's testimony solely because Lexmark did not present evidence to the contrary. The district court received evidence from Static **[**21]** Control, weighed the evidence against the strength of Lexmark's claims, which were deemed strong at the time, and accordingly raised the initial bond from $75,000 to $250,000. We decline to hold that the district court abused its discretion in setting the bond amount under these circumstances.

IV. STATIC CONTROL'S FEDERAL ANTITRUST COUNTERCLAIMS

Static Control counterclaimed in the 02 Action under *§§ 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15*, *26*, for violations of *§§ 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, seeking damages and injunctive relief. 02R. 172 (2d Am. Answer & Counterclaim). The district court granted Lexmark's motion to dismiss on the basis that Static Control did not have standing to bring the federal antitrust claims for damages or injunctive relief. R. 392 (D. Ct. Order 9/28/06).

A. Standard of Review

HN6[] We review de novo a district court's decision to dismiss a counterclaim for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)*. *United Ass'n of Journeyman & Apprentices of the Plumbing and Pipefitting Indus., Local No. 577 v. Ross Bros. Constr. Co., 191 F.3d 714, 716 (6th Cir. 1999)*. In reviewing a motion to dismiss, we accept all non-conclusory **[**22]** allegations of fact as true and decide whether the claimant has stated a plausible claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 678-79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. The pleading must state "enough facts to state a claim to relief that is plausible on its face"; failure to plead sufficient facts will lead to dismissal of the claim. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

B. Antitrust Standing for Counterclaims with Money Damages

HN7[] Pursuant to the Clayton Act, 15 U.S.C. § 15(a), private parties may bring private actions for violations of the Sherman Act. Section 1 of the Sherman Act prohibits conspiracies to restrain trade. 15 U.S.C. § 1. "A Section 1 conspiracy requires more **[***13]** than a manufacturer's unilateral refusal to deal. 'There must be evidence that tends to exclude the possibility that the [conspirators] were acting independently.'" *Watson Carpet & Floor Covering, Inc. v. Mohawk Indus., Inc., 648 F.3d 452, 457 (6th Cir. 2011)* (internal citation omitted) (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*. HN8[] Section 2 of the Sherman Act prohibits the illegal monopolization of a market. 15 U.S.C. § 2. **[*402]** To bring a claim under § 2, a claimant must show "'(1) possession **[**23]** of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen or historic accident.'" *Tarrant Serv. Agency, Inc. v. Am. Standard, Inc., 12 F.3d 609, 613 (6th Cir. 1993)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*, *cert. denied*, *512 U.S. 1221, 114 S. Ct. 2708, 129 L. Ed. 2d 836 (1994)*.

HN9[] To bring a private claim for damages under either section of the Sherman Act, the claimant must first demonstrate that it has standing. Although required in all cases, standing in an antitrust case is more onerous than the conventional Article III inquiry. "[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement we must dismiss it as a matter of law . . . ." *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc). The district court decides whether a claimant has adequately pleaded antitrust standing by balancing five factors:

> (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's **[**24]** alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery **[****1362]** or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

Southaven Land Co., Inc. v. Malone & Hyde, Inc., 715 F.2d 1079, 1085 (6th Cir. 1983) (citing **[***14]** *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC"), 459 U.S. 519, 537-45, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. No one factor controls. *Peck v. Gen. Motors Corp., 894 F.2d 844, 846 (6th Cir. 1990)*.

Static Control alleges that Lexmark conspired with unidentified microchip suppliers and resellers of Lexmark-manufactured printers to restrain trade and otherwise monopolize "the relevant markets," thereby reducing output, increasing prices, and maintaining Lexmark's monopoly. Static Control defines the "relevant markets" as including three distinct but related aftermarkets for Lexmark-specific products: (1) the market for Lexmark replacement toner cartridges, (2) the market for component parts for Lexmark cartridges, and **[**25]** (3) the market for microchips for Lexmark cartridges.[5] 02R. 172 (2d Am. Answer & Countercl. at ¶¶ 17-18). The allegations repeatedly refer to the "relevant markets" as a group when the specific facts relate only to the market for replacement cartridges. For example, Static Control alleges that Lexmark has "an 85% share in each of the relevant markets," *id*. at ¶ 18, but on closer examination the counterclaim alleges that Lexmark competes only in the market for toner cartridges, *id*. at ¶¶ 12, 24. Static Control alleges that Lexmark's anticompetitive chips "exclude competition, restrict output, and increase end-user prices in the relevant markets," *id*. at ¶ 47, but **[*403]** the counterclaim never identifies any change in competition, output, or prices in the market for component parts or microchips as a result of Lexmark's conduct. The only specific allegations as to price and output relate to the market for toner cartridges. *Id*. at ¶¶ 50-52, 58. Therefore, although we read the allegations of the counterclaim in the light most favorable to Static Control, we must carefully consider the actual factual allegations underlying such conclusory allegations. *Twombly, 550 U.S. at 556-57*.

---

[5] Lexmark argued **[**26]** below that the relevant market was the larger primary market for all brands of laser printer cartridges and parts, not just the aftermarket for Lexmark products. The jury in its advisory findings sided with Static Control. R. 1366 (Special Verdict Form at 15). On appeal, Lexmark does not concede its position on the relevant market, but argues against standing using the aftermarket. Second Appellee Br. at 40.

In its counterclaim, Static Control's allegations can be categorized into five practices by Lexmark that Static Control claims constitute anticompetitive conduct: **[***15]** (1) the Prebate program;[6] (2) using "lock-out" microchip technology in its printers, causing them to disable when any non-Lexmark replacement cartridge is inserted; (3) requiring Lexmark's microchip supplier to refuse to sell replacement chips to anyone but Lexmark; (4) redesigning its microchips specifically to render cartridges that used Static Control's microchips incompatible; and (5) filing the 02 Action targeting Static Control. First Appellant Br. at 12-15; 02R. 172 (2d Am. Answer & Countercl. at ¶¶ 32, 44-46, 54-56). When the allegations are read for specificity and plausibility, these actions target and affect **[**27]** the different markets in different ways. We therefore examine each of these alleged violations separately to see if Static Control has standing to pursue any of them.

1. Prebate Program

Static Control alleges that the Prebate Program, through its lower prices and misleading statements that the end user committed to a license agreement when no such license existed, cajoled end users into purchasing fewer remanufactured cartridges and thereafter returning them primarily to Lexmark. As a result, Static Control was also harmed because it lost profits from the decline in sales of microchips and components for Lexmark-compatible cartridges following the decline in sales of remanufactured cartridges. First Appellant Br. at 16.

As alleged, the Prebate Program targets only the market for remanufactured cartridges. No part of **[**28]** the Prebate Program relates to the market for microchips or components, even though the allegations support the Prebate Program's incidental effects in the other markets. Static Control itself states that "Lexmark specifically launched its Prebate program to intimidate and to exclude competition *from remanufacturers*." 02R. 172 (2d Am. Answer & Countercl. at ¶ 33) (emphasis added). And as discussed above, although Static Control's allegations often refer to the "relevant markets," the specific factual allegations explain **[****1363]** only Prebate's impact on the market **[***16]** for remanufactured cartridges. For example, when Static Control alleges that Lexmark used Prebate to "effect[] its deliberate, unlawful, anticompetitive intent to raise prices and exclude competition," *id*., we can conclude only that this allegation relates to the market for toner cartridges because of the lack of any allegations that the prices were raised in other markets. Having identified the proper market, we easily conclude that all five of the *AGC* factors are lacking with respect to the Prebate program.

[*404] Although causation in the traditional sense appears properly alleged—the implementation of the Prebate program decreased the **[**29]** number of remanufactured Lexmark cartridges, which in turn decreased Static Control's sales—Static Control fails to allege plausibly that the Prebate program was intended to harm Static Control. As the district court correctly held, the intended targets of Lexmark's Prebate Program were the end users and the remanufacturers, not Static Control. R. 392 (D. Ct. Order 9/28/06 at 9). Static Control asserts that these conclusions erroneously rely on factual averments and that the district court failed to accept its facts as alleged, but Static Control itself alleges this: "Lexmark specifically launched its Prebate program to intimidate and to exclude competition from remanufacturers." 02R. 172 (2d Am. Answer & Countercl. at ¶ 33); *see also id*. at ¶ 42 ("Lexmark's sole purpose for deceiving end-users to believe they are contractually bound by [the Prebate Program] is to preserve, maintain, and enhance its unlawful monopoly power in the relevant markets.").

Static Control also fails sufficiently to identify its role in the relevant market for remanufactured cartridges. ***HN10***[] Traditionally, only claimants who are competitors or consumers within the injured market have standing to sue. *Southaven, 715 F.2d at 1086*. **[**30]** However, claimants who are not direct players in the relevant market may nonetheless have standing if their injury is "'inextricably intertwined' with the injury sought to be inflicted upon the relevant market or participants therein." *Id*. The "inextricably intertwined" exception, however, is narrow. *See Blue Shield of Va. v. McCready, 457 U.S. 465, 483-84, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. This exception was not designed to give standing to claimants whose injuries are a tangential byproduct of monopolistic conduct in a

[6] Specifically, Static Control complains that Lexmark engaged in anticompetitive conduct by creating two classes of otherwise identical cartridges, Prebate and non-Prebate, selling the non-Prebate cartridges at artificially inflated prices, falsely invoking patent rights to prevent remanufacturers from repairing Prebate cartridges, and engaging in other threatening behavior.

related market. Southaven, 715 F.2d at 1086. To succeed, the claimant must show that the **[***17]** defendants "manipulated or utilized [the claimant] as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and geographical markets." *Id*.

Static Control must therefore have alleged that an injury in Lexmark's market—the market for replacement toner cartridges—is inextricably intertwined with the injuries Static Control claims to be suffering in the market for component parts and microchips. The district court rejected Static Control's argument, because Static Control failed adequately to allege that it was "manipulated or utilized by the defendant as a fulcrum, **[**31]** conduit or market force to injure competitors or participants in the relevant product and geographical market." R. 392 (D. Ct. Order 9/28/06 at 10) (quoting Province v. Cleveland Press Publ'g Co., 787 F.2d 1047, 1052 (6th Cir. 1986) (internal quotation marks and brackets omitted)). "If anyone is being manipulated according to [Static Control's] allegations, it is the end consumer." *Id*. at 10-11. We agree.

Static Control's counterclaim makes no mention of being used by Lexmark as a fulcrum, and Static Control does not allege that it was harmed because it was manipulated into harming the remanufacturers. Static Control on appeal argues that Lexmark used Static Control as a fulcrum to injure the remanufacturers by (1) falsely telling remanufacturers that using Static Control's products would constitute infringement; (2) redesigning its microchips, thus forcing Static Control to redesign its microchips to remain compatible; (3) threatening legal action against Static Control; (4) and suing Static Control for baseless copyright claims. First Appellant Br. at 39. But, although these specific **[*405]** allegations are sprinkled in various sections of the counterclaim to support other arguments, we can **[**32]** find no allegations in the counterclaim that Lexmark manipulated Static Control in any way to carry out its anticompetitive Prebate Program in the market for remanufactured cartridges. ***HN11***[] "An inextricably intertwined injury is one that results from the manipulation of the injured party as a means to carry out the restraint of trade in the product market." Province, 787 F.2d at 1052.

[*18]** Static Control's allegations establish that it was negatively affected by Lexmark's manipulation of the end users into buying Prebate cartridges, but that Static Control itself was not used as a conduit to achieve the alleged anticompetitive effect in the remanufactured cartridge market. *See* ***[*406]*** *Southaven*, 715 F.2d at 1086 (harm from tangential effects of anticompetitive conduct not enough to convey **[****1364]** standing). Indeed, the allegations make very clear that Lexmark is using the end users to obtain the desired anticompetitive effects, rather than using Static Control. Static Control specifically alleges that Lexmark "fraudulently induces customers' use of Prebate cartridges" and "exploit[s] consumers' lack of information about choices in replacement cartridges" to reduce the number of non-Prebate cartridges on the **[**33]** market. 02R. 172 (2d Am. Answer & Countercl. at ¶ 37); *see also id*. at ¶ 38 ("Lexmark's anticompetitive *exploitation of consumers' and end-users'* lack of adequate information increases prices and reduces output in the relevant markets.") (emphasis added). No such allegations of exploitation or manipulation exist with respect to Static Control. The level of manipulation of the claimant—and the necessity of the success of such manipulation to achieve the anticompetitive conduct—is simply not present in this case with respect to Static Control. *See* Peck, 894 F.2d at 847.

Even if we were to consider Static Control's injury in the market for components and microchips sufficiently related to the harm caused by the Prebate Program in the remanufactured cartridges market, Static Control still lacks standing due to its failure to satisfy the remaining AGC factors. *See* Fallis v. Pendleton Woolen Mills, Inc., 866 F.2d 209, 211 (6th Cir. 1989) (holding no antitrust standing despite assuming claimant was used as a fulcrum in relevant market), *abrogated on other grounds by* Humphreys v. Bellaire Corp., 966 F.2d 1037 (6th Cir. 1992). ***HN12***[] Antitrust causation is much more limited than Article III standing. **[**34]** Here, Static Control's injury is too attenuated to qualify. "[Static Control's] injury is derivative; it is simply a side effect of [Lexmark's] alleged antitrust violations." Fallis, 866 F.2d at 210.

Static Control also fails to establish the final three AGC factors, which all relate to the directness of Static Control's injuries relative to potentially more-direct victims. **[***19]** Static Control's injuries as a result of the Prebate program are clearly a "byproduct" of the alleged antitrust violation. Province, 787 F.2d at 1053; Fallis, 866 F.2d at 211. The more-direct victims are the end users, who according to the allegations had to pay more for their cartridges as a result of the allegedly anticompetitive conduct, and the remanufacturers, who were unable to compete in the market for Lexmark-compatible toner cartridges after Lexmark's Prebate program undercut their prices and reduced supply. Although the end users may have little incentive to sue, two of the remanufacturers raised (and ultimately settled) antitrust claims against Lexmark in the same action. R. 392 (D. Ct. Order 9/28/06 at 12). ***HN13***[] Where there are more-direct victims of the anticompetitive conduct, those victims have the standing **[**35]** to sue, rather than those affected indirectly. *Southaven, 715 F.2d at 1087*; *Province, 787 F.2d at 1053-54*.

The existence of this clear class of direct victims increases the danger of duplicative recovery should Static Control be given antitrust standing to pursue the Prebate Program and receive treble damages.[7] Static Control may seek only the damages from its own losses, but the concern of duplicative recovery relates more broadly to the issue of requiring a defendant to pay treble damages to parties both directly and indirectly injured from the same antitrust violation. *See Ill. Brick Co. v. Illinois, 431 U.S. 720, 731 n.11, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (discussing risk of duplicative recovery between direct and indirect purchasers). Finally, we agree with the district court that Static Control's calculation of over $18 million in damages is speculative. R. 392 (D. Ct. Order 9/28/06 at 11).

Static Control's argument for directness of its injury relies heavily on the Second Circuit case *Crimpers Promotions, Inc. v. Home Box Office, Inc., 724 F.2d 290, 294-95 (2d Cir. 1983)*, *cert. denied*, *467 U.S. 1252, 104 S. Ct. 3536, 82 L. Ed. 2d 841 (1984)*, as does much **[**36]** of its argument on standing. The plaintiff in *Crimpers* had standing because HBO and Showtime colluded to prevent his tradeshow from serving as a middleman between television show producers and cable operators, which was the only alternative forum for them to communicate. Crimpers had standing because "[i]njury to Crimpers was the precisely **[***20]** intended consequence of defendants' boycott," even more than the resulting injury to the tradeshow participants. *Id. at 294*. Here, the allegations of both intent and injury are less direct. The Prebate program reduced the number of cartridges available for remanufacture, which in turn reduced the number of microchips sold by Static Control to the remanufacturers. Static Control's allegations resemble a classic case of a supplier seeking standing to recover for indirect damages following anticompetitive conduct directed at its customers' market. *Crimpers* is simply inapposite. We agree that Static Control lacks standing to pursue its antitrust claims as they relate to the Prebate program. **[****1365]**

2. Restraints on Microchips in Lexmark Printers and Cartridges

Static Control also argues that the existence of microchips in the cartridges in the first place and **[**37]** Lexmark's exclusive distribution agreement with its own microchip supplier are anticompetitive acts. These acts differ from the Prebate program because they directly target the microchip market in which Static Control is a competitor. Although Lexmark does not compete in the market for microchips, the allegations suggest that Lexmark uses its influence to restrain trade in the microchip market in order to restrain trade in the remanufactured cartridge market. Here, however, Static Control again lacks standing because it has failed to allege how Lexmark's actions caused any antitrust injury.

Static Control objects to the initial creation of the "anticompetitive microchips," but fails to allege how the existence of a microchip requirement alone caused Static Control any injury. *See* 02R. 172 (2d Am. Answer & Countercl. at ¶ 44). Static Control makes no allegations at all relating to the change in prices for components and microchips as a result of Lexmark's use of microchips in its toner cartridges, and Static Control makes no allegations regarding how a microchip requirement affected Static Control's share of the market for components and microchips. Indeed, **[*407]** Static Control fails to allege **[**38]** plausibly how the creation of a microchip requirement hurt Static Control's share of the microchip market, because without the requirement that market would not exist. It is possible that, without the microchips, Static Control would be able to sell more component parts, but Static Control does not make this allegation. Static **[***21]** Control has failed to allege how the existence of a microchip requirement injured Static Control or otherwise gave Lexmark a monopoly in the related market for Lexmark component parts.

Static Control's allegations relating to Lexmark's microchip supplier's refusal to compete with third parties fares no better. As a self-proclaimed "leading supplier to toner cartridge remanufacturers," *id*. at ¶ 30, Static Control fails to

[7] The district court did not explicitly discuss the potential for duplicative recovery.

allege how the *removal* of one of its direct competitors from the components and microchips market following an exclusive distributorship agreement with a single customer caused any damage to Static Control's position within those markets or profits. *See New Albany Tractor, Inc. v. Louisville Tractor, Inc., 650 F.3d 1046, 1052 (6th Cir. 2011)* (**HN14**[] "Merely demonstrating the existence of an exclusive distributorship in a market area does not violate **[**39]** Robinson-Patman—or any other antitrust provision."). In general, the removal of a competitor increases (not decreases) the remaining suppliers' market share, and Static Control has not alleged that Lexmark was a former customer or that absent the exclusive agreement Lexmark would have purchased from Static Control.

HN15[] "Antitrust injury does not arise for purposes of *§ 4* of the Clayton Act until a private party is adversely affected by an anticompetitive aspect of the defendant's conduct." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 339, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (citation and emphasis omitted). Cases have routinely rejected claims of antitrust violations that may very well be violations when the claimants stood to gain from the anticompetitive conduct. Therefore, "[Static Control] cannot recover for a conspiracy to impose nonprice restraints that have the effect of either raising market price or limiting output." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 583, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*; *Datagate, Inc. v. Hewlett-Packard Co., 941 F.2d 864, 868-69 (9th Cir. 1991)* ("As an existing competitor, [claimant] would have benefitted from any chilling of new entry into the market. Therefore, [claimant] can **[**40]** claim no injury as a result of such chilling.") (citation omitted), *cert. denied*, *503 U.S. 984, 112 S. Ct. 1667, 118 L. Ed. 2d 388 (1992)*. Static Control has failed plausibly to allege any antitrust injury stemming from Lexmark's decision to use microchips in its cartridges and to remove its own supplier from the market for microchips.

[***22] 3. Redesigning Microchips to Circumvent Static Control's product

Once the market for microchips was created, however, the issue becomes whether Lexmark can engage in a conspiracy to eliminate that market or stifle competition within that market. If Lexmark were able to maintain a monopoly on remanufactured toner cartridges by making cartridge parts wholly unavailable, Static Control might have standing to pursue an antitrust violation. *See Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 463-64, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. The allegations, however, do not sufficiently allege such behavior. Static Control does not specifically allege a tying scheme under *§ 1* of the Sherman Act, as was the case in *Eastman Kodak*, nor does Static Control allege any facts to suggest that the prices **[*408]** for parts increased as a result of being illegally tied to the market for cartridges. Static Control alleges that Lexmark **[**41]** continuously redesigned its microchips "to exclude **[****1366]** competitors from the relevant markets, restrict output, and increase end-user prices." 02R. 172 (2d Am. Answer & Countercl. at ¶ 45). But Static Control does not allege how Lexmark's redesign decreased competition in the markets in which Static Control competes, the market for microchips or parts. Static Control does not even identify in its pleading who competes in the microchip or parts markets, what their market share is, whether they are controlled by Lexmark, what their prices were, or how their prices were affected by Lexmark's redesign (or any of Lexmark's conduct for that matter). *See CBC Companies, Inc. v. Equifax, Inc., 561 F.3d 569, 572 (6th Cir. 2009)* (holding allegations insufficient to establish antitrust injury in part due to failure to identify other market players). The counterclaim lacks other supporting allegations such as the nature and frequency of Lexmark's redesigns and how quickly replacement products were able to adapt to the changes. Nor does Static Control make any non-conclusory allegations to refute the possible business explanation that Lexmark, like most companies, continuously updates its products over **[**42]** the years for legitimate competitive reasons. *Twombly, 550 U.S. at 553*. Static Control's allegations with respect to the microchip redesign therefore also fail to establish antitrust standing for any cognizable antitrust injury.

[***23] 4. Filing Suit

Lexmark further correctly observes that *HN16*[] the act of filing suit generally does not constitute an antitrust injury under the *Noerr-Pennington* doctrine.[8] Second Appellee Br. at 47; *see* *E. R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. Although exceptions are made when the filing is a sham for interfering with competition, the first inquiry for identifying sham litigation is objective reasonableness: "Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation." *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*. We cannot say that Static Control has plausibly alleged that the 02 Action was "objectively meritless." *See* 02R. 172 (2d Am. Answer & Countercl. at ¶ 56). Static Control's allegations focus solely on Lexmark's intent behind bringing the copyright action; Static **[**43]** Control does not offer any allegations upon which we can plausibly conclude that the copyright action was "objectively meritless." The Sixth Circuit's ultimate conclusion that Lexmark lacked a valid copyright claim is not determinative of whether the initial suit was reasonable. *Prof'l Real Estate, 508 U.S. at 60 n.5*. We agree with Lexmark that its efforts in federal court, as alleged, should be immune from antitrust suit.

C. Antitrust Standing for Counterclaims Seeking Injunctive Relief

HN18[] The Clayton Act also permits a private party to obtain injunctive relief **[*409]** "against threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. The district court did not distinguish between Static Control's request for injunctive relief and its request for monetary damages when dismissing the counterclaim for lack **[**44]** of standing. *See* R. 392 (D. Ct. Order 9/28/06 at 12). Static Control argues that the district court separately erred in dismissing its claim for equitable relief because the last three *AGC* factors are inapplicable to whether a claimant has standing to seek injunctive relief. **[***24]** First Appellant Br. at 51. Lexmark argues that the standing requirements for obtaining injunctive relief are no different from the standing requirements for obtaining monetary relief when, as here, Static Control also seeks money damages. Second Appellant Br. at 56 ("The requirements for antitrust standing are the same whether the antitrust plaintiff seeks damages only or damages and injunctive relief.").

HN19[] The Clayton Act does not "authorize a private plaintiff to secure an injunction against a threatened injury for which he would not be entitled to compensation if the injury actually occurred." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 112, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. The only difference between a claim for equitable relief and one for damages is that equitable relief is available at the mere threat of antitrust injury. Because we have held that Static Control has failed to plead an antitrust injury, we affirm the dismissal **[**45]** of Static Control's claim for equitable relief. *See* *Valley Prods. Co. v. Landmark, 128 F.3d 398, 402 (6th Cir. 1997)*.

V. STATIC CONTROL'S LANHAM ACT COUNTERCLAIM

Static Control contends that Lexmark violated the Lanham Act by engaging in false advertising. **[****1367]** Static Control alleges that Lexmark "falsely informed customers that SCC's products infringe Lexmark's purported intellectual property," and "misled . . . customers of SCC's products that license agreements prohibit remanufacturing Lexmark toner cartridges, when no license agreements actually exist," causing Static Control's customers to believe that Static Control is engaging in illegal conduct and thereby damaging Static Control's business and reputation.[9] 02R. 172 (2d Am. Answer & **[***25]** Countercl. at ¶¶ 2, 84-90). The district court

---

[8] Static Control claims Lexmark's *Noerr-Pennington* argument is waived as it was not raised below and was raised on appeal only in a footnote. Third Appellant Br. at 7 n.3. However, *HN17*[] "standing is a jurisdictional requirement that cannot be waived, and such may be brought up at any time in the proceeding." *Zurich Ins. Co. v. Logitrans, Inc., 297 F.3d 528, 531 (6th Cir. 2002)*.

[9] The Lanham Act provides:

dismissed Static Control's counterclaim for lack of Lanham Act standing because Static Control lacked antitrust standing, holding that "[m]ultiple courts have held that the factors" for antitrust standing are the same as for Lanham Act standing. R. 392 (D. Ct. Order 9/28/06 at 13) (citing Fifth and Third Circuit cases).

Static Control maintains that the test "[i]n this Circuit" is "not the same **[*410]** as the . . . test for antitrust standing." First Appellant Br. at 53 (citing *Frisch's Rests., Inc. v. Elby's Big Boy of Steubenville, Inc., 670 F.2d 642, 649-50 (6th Cir.)*, *cert. denied*, *459 U.S. 916, 103 S. Ct. 231, 74 L. Ed. 2d 182 (1982)*). *Frisch's Restaurants* held that ***HN21***[] a Lanham Act claimant need **[**47]** not demonstrate actual losses as a result of the defendant's misleading use of the claimant's trademarks in its advertisements, only a "'likelihood of injury and causation.'" *Id. at 650* (quoting *Johnson & Johnson v. Carter-Wallace, Inc., 631 F.2d 186, 190 (2d Cir. 1980))*. Since *Frisch's Restaurants*, the Second Circuit has further described its approach, called the "reasonable interest" approach, as finding that the claimant has standing if the claimant can demonstrate "(1) a reasonable interest to be protected against the alleged false advertising and (2) a reasonable basis for believing that the interest is likely to be damaged by the alleged false advertising." *Famous Horse, Inc. v. 5th Ave. Photo Inc., 624 F.3d 106, 113 (2d Cir. 2010)*. We have not addressed Lanham Act standing since *Frisch's Restaurants*.

Lexmark urges us to follow one of the narrower approaches adopted by our sister circuits. The Seventh, Ninth, and Tenth use a categorical test, permitting Lanham Act suits only by an actual competitor making an unfair-competition claim. *L.S. Heath & Son, Inc. v. AT & T Info. Sys., Inc., 9 F.3d 561, 575 (7th Cir. 1993)*; *Waits v. Frito-Lay, Inc., 978 F.2d 1093, 1108-09 (9th Cir. 1992)*, **[**48]** *cert. denied*, *506 U.S. 1080, 113 S. Ct. 1047, 122 L. Ed. 2d 355 (1993)*; *Stanfield v. Osborne Indus., Inc., 52 F.3d 867, 873 (10th Cir.)*, *cert. denied*, *516 U.S. 920, 116 S. Ct. 314, 133 L. Ed. 2d 217 (1995)*. These circuits, however, have distinguished the standing inquiry between claims of false association under *15 U.S.C. § 1125(a)(1)(A)* and false advertising under **[***26]** *§ 1125(a)(1)(B)* and do not require direct competition for claims of false association. *See e.g., Waits, 978 F.2d at 1108-09*. Static Control's claim is for false advertising and would fail under this stricter standard, because Static Control and Lexmark are not actual competitors.

The Third, Fifth, Eighth, and Eleventh Circuits all reference antitrust standing or the *AGC* factors in deciding Lanham Act standing. *Conte Bros. Auto., Inc. v. Quaker State-Slick 50, Inc., 165 F.3d 221, 233-34 (3d Cir. 1998)* (Alito, J., authoring); *Procter & Gamble Co. v Amway Corp., 242 F.3d 539, 562-63 (5th Cir.)*, *cert. denied*, *534 U.S. 945, 122 S. Ct. 329, 151 L. Ed. 2d 243 (2001)*; *Gilbert/Robinson, Inc. v. Carrie Beverage-Missouri, Inc., 989 F.2d 985, 990-91 (8th Cir.)*, *cert. denied*, *510 U.S. 928, 114 S. Ct. 338, 126 L. Ed. 2d 282 (1993)*; *Phoenix of Broward, Inc. v. McDonald's Corp., 489 F.3d 1156, 1162-64 (11th Cir. 2007)*, *cert. denied*, *552 U.S. 1275, 128 S. Ct. 1647, 170 L. Ed. 2d 385 (2008)*. The Third Circuit nominally **[**49]** uses a "reasonable interest" approach, but applies it by looking to the five *AGC* factors. *Conte Bros., 165 F.3d at 233-34*. The Third Circuit has also rejected any distinction in standing between the two types of Lanham Act claims. *Id. at 232*. The Second Circuit's more recent cases reject the Third **[****1368]** Circuit's conflation of the reasonable-interest test with the *AGC* factors as "unnecessarily complicat[ing] the inquiry," *Famous Horse, 624 F.3d at 115 n.3*, setting its approach apart. Therefore, Lexmark's statement that the reasonable interest test and the *AGC* test are not "conceptually different," Second Appellee Br. at 60, is not correct.

> ***HN20***[] Any person who, on or in connection with any goods or services, **[**46]** or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which
>
> > (A) is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or
> >
> > (B) in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities,
>
> shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a)(1).

Although the claimant in *Frisch's Restaurants* brought a claim under 15 U.S.C. § 1125(a)(1)(A) for false association of trademark, not under § 1125(a)(1)(B) for false advertising, **HN22**[] we agree with the Third Circuit's reasoned analysis rejecting a distinction between these two types of claims **[*411]** for purposes of standing. Conte Bros., 165 F.3d at 232-33. Because we have already addressed the appropriate level of standing for claims brought under 15 U.S.C. § 1125(a), even if we were to prefer the approach taken by our sister circuits, **HN23**[] we cannot overturn a prior published **[**50]** decision of this court absent inconsistent Supreme Court precedent or an en banc reversal.[10] Geiger v. Tower Auto., 579 F.3d 614, 622 (6th Cir. 2009) **[***27]** . Static Control has therefore sufficiently alleged a Lanham Act claim. Static Control alleged a cognizable interest in its business reputation and sales to remanufacturers and sufficiently alleged that these interests were harmed by Lexmark's statements to the remanufacturers that Static Control was engaging in illegal conduct. This is sufficient to state a claim under the Lanham Act. We therefore **REVERSE** the district court's dismissal of this claim and **REMAND** with instructions to reinstate the Lanham Act claim.

VI. STATE-LAW COUNTERCLAIMS

The district court dismissed Static Control's counterclaims for unfair competition and false advertising under North Carolina law for lack of standing. Static Control appeals and agrees that substantively the state law claims all "substantially mirror" the federal claims. First Appellant Br. at 54.[11]

The parties dispute whether standing under the North Carolina Unfair Deceptive Trade Practices Act ("NCUDTPA"), N.C. Gen. Stat. §§ 75-1, et seq., which is the state-law equivalent of the Sherman, Clayton, and Lanham Acts, is identical to the standing requirements of the federal acts. The district court held that North Carolina had not yet decided the question, and applying "North Carolina's general rule that federal case law is persuasive and instructive in construing North Carolina's own antitrust statutes," the district court dismissed the state-law counterclaims "for the same reasons that it dismissed [Static Control's] federal claims above." R. 392 (D. Ct. Order 9/28/06 at 16). Static Control disagrees that the North Carolina standard is the same.

[*28]** North Carolina has held that the *AGC* factors "do not apply in determining which indirect purchasers have standing to sue under the North Carolina antitrust statutes." Teague v. Bayer AG, 195 N.C. App. 18, 671 S.E.2d 550, 557 (N.C. Ct. App. 2009). Static Control is a supplier rather than an indirect purchaser, but Static Control argues that *Teague* supports the general proposition that North Carolina antitrust standing diverges **[*412]** from federal antitrust **[**53]** standing. Although ruling before *Teague* came down, the district court rejected the relevance of a similar case upon which *Teague* relied—Hyde v. Abbott Labs., Inc., 473 S.E.2d 680, 681-82, 123 N.C. App. 572 (N.C. Ct. App.), *rev. denied*, *344 N.C. 734 (1996), 478 S.E.2d 5*—precisely because the present case did not involve an indirect purchaser. Teague does not state, as Static Control suggests, that antitrust standing under North Carolina law is generally more flexible than the equivalent federal law. We must therefore closely examine North Carolina's departure from federal law on the question of standing for indirect purchasers to determine whether North Carolina would similarly depart on the question of standing for suppliers.

---

[10] Even if we were to adopt the *AGC* factors, Static Control's claim would not necessarily fail. Although we have determined that Static Control failed to satisfy the *AGC* factors regarding its antitrust allegations, this does not necessarily mean Lanham Act standing would be lacking. Not all of Lexmark's conduct supposedly in violation of the Lanham Act is the same as the conduct supposedly violating the Sherman Act. In particular, Static Control alleges that Lexmark violated the Lanham Act when Lexmark falsely advertised that Static **[**51]** Control infringed Lexmark's patents. Because this was not part of Static Control's antitrust allegations, the district court at a minimum should have applied the *AGC* factors to Static Control's allegations of false advertising directly targeting Static Control (not just the Prebate program) and its injuries in conducting the five-factor analysis.

[11] The district court also dismissed the state-law civil-conspiracy claim for lack of standing; however, Static Control has not raised this issue on appeal. Static Control mentioned in a footnote in its opening brief that the district court also erred in dismissing its state-law civil-conspiracy claim. First Appellant Br. at 56 n.14. Lexmark then pointed out the waiver, Second Appellee Br. at 62, and Static Control did not dispute the waiver or make any arguments on either waiver or the civil-conspiracy claim in its Third **[**52]** Brief.

In deciding to reject the federal test for standing for indirect purchasers, the North **[****1369]** Carolina Court of Appeals examined the standing landscape when the North Carolina statute governing standing, *N.C. Gen. Stat. §§ 75-16*, was most recently substantively amended in 1969. *Hyde, 473 S.E.2d at 684-85* (citing *Ill. Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, and *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968))*. Because the amendments expanded the class of persons who could recover **[**54]** under the Act to all consumers, and indirect purchasers were frequently consumers, the court found it "unlikely" that the legislature intended to exclude indirect purchasers as a class. *Id. at 684*. Although acknowledging federal law as "persuasive authority" in interpreting North Carolina antitrust provisions, *id. at 685*, the court observed that most federal circuits permitted suit by indirect purchasers in 1969 when the amendments were passed. The Supreme Court's decision in *Illinois Brick* that indirect purchasers lacked standing to bring antitrust claims was not issued until 1977. *Id. at 683*.

[*29]** Applying the same considerations to the circumstances at hand, we believe North Carolina would grant standing to suppliers such as Static Control. Prior to 1969, the law, at least in the Sixth Circuit, was that suppliers like Static Control lacked standing. *See Volasco Prods. Co. v. Lloyd A. Fry Roofing Co., 308 F.2d 383, 395 (6th Cir. 1962)* ("It is well established in the law that a supplier is too remote and too far removed from the direct injury to recover damages resulting from violation of the anti-trust laws directed against the supplier's customer."), *cert. denied*, *372 U.S. 907, 83 S. Ct. 721, 9 L. Ed. 2d 717 (1963)*. **[**55]** However, the Fourth Circuit had declined to say that no supplier could bring a claim and followed what was previously known as the "target area" test for antitrust standing. *S.C. Milk Council of Milk Producers, Inc. v. Newton, 360 F.2d 414, 418 (4th Cir.)*, *cert. denied*, *385 U.S. 934, 87 S. Ct. 295, 17 L. Ed. 2d 215 (1966)*. ***HN24***[↑] The "target area" test gave antitrust standing to anyone who was within the zone of economic harm caused by the anticompetitive conduct whose harm was proximately caused by such conduct. *Id*.

In ruling that indirect purchasers were not subject to the *AGC* factors, the court in *Teague* emphasized the differences between cases involving indirect purchasers and those, such as *AGC* itself, that did not. *Teague, 671 S.E.2d at 556* (rejecting analogies to *AGC* and other state cases applying *AGC* factors to state-law claims because they did not involve indirect purchasers). However, the *Hyde* court independently rejected many of the concerns identified in *Illinois Brick* (and later repeated in *AGC*) as simply inapplicable to state-law antitrust statutes. *Hyde, 473 S.E.2d at 687-88* (addressing issues of multiple liability, incentives to sue, and complexity of damages). Because the state of the law in 1969 in the Fourth **[**56]** Circuit appears more **[*413]** consistent with North Carolina's reasoning in *Hyde* than the Sixth Circuit's position on supplier standing in 1969, we conclude that North Carolina would not apply the *AGC* factors to cases like this one. As a result, Static Control's counterclaims under state law were incorrectly dismissed for lack of standing. We **REVERSE** and **REMAND** for further proceedings on these claims.

[***30] VII. IMPACT OF JURY VERDICT ON REMAND

Because we have reinstated some of Lexmark's counterclaims, Static Control requests that we instruct the district court on remand to treat retroactively the advisory jury's findings that Lexmark misused its patents as binding jury findings. Lexmark unsurprisingly objects to this. The *Seventh Amendment* provides that ***HN25***[↑] "no fact tried by a jury, shall be otherwise reexamined in any Court of the United States." *U.S. Const. amend. VII*. Static Control claims that presenting the reinstated antitrust claims now to a binding jury would violate this prohibition because these issues were already presented once to a jury, albeit an advisory one. Because those claims must be decided by a jury if reinstated, Static Control suggests that the only remedy to this problem is retroactively **[**57]** to call the advisory jury's findings of fact binding, as opposed to proceeding with a new trial before a new, binding jury.[12]

---

[12] Static Control is right that if a district court erroneously dismisses a legal claim otherwise entitled to a jury determination, any subsequent findings of fact by the judge must be vacated and the claim relitigated before a jury. *Lytle v. Household Mfg., Inc., 494 U.S. 545, 552-53, 110 S. Ct. 1331, 108 L. Ed. 2d 504 (1990)*. That procedural posture, however, is not present in this case. Nonetheless, when a party has the right to a jury determination on an issue under the *Seventh Amendment*, there is ample

The differences between the defense of patent misuse and affirmative state-law antitrust claims or a Lanham Act claim notwithstanding, we decline to deem an advisory jury's findings binding retroactively. *See* *Hildebrand v. Bd. of Trs. of Mich. State Univ.,* ***[****1370]*** *607 F.2d 705, 710 (6th Cir. 1979)* (***HN26***[] "To convert a trial from a jury trial to a bench trial (or vice-versa) in the middle of **[**58]** the proceedings is to interfere with counsel's presentation of their case and, quite possibly, to prejudice one side or the other."); *Fischer Imaging Corp. v. Gen. Elec. Co., 187 F.3d 1165, 1174 (10th Cir. 1999)* (rejecting argument by claimant that advisory jury's verdict should retroactively become binding); *Pradier v. Elespuru, 641 F.2d 808, 811 (9th Cir. 1981)* (noting significant tactical differences in litigating before an advisory jury). Although here the tactical differences are minimal given that the change to an advisory jury occurred when the district court gave the final jury instructions, we decline to speculate as to whether the change in the jury's instruction altered the jury's analysis of the issue Static Control now **[***31]** seeks to treat as binding. *Cf.* *Romano v. Oklahoma, 512 U.S. 1, 8-9, 114 S. Ct. 2004, 129 L. Ed. 2d 1 (1994)* (holding that court may not "mislead the jury as to its role in the sentencing process in a way that allows the jury to feel less responsible than it should for the sentencing decision.") (internal quotation marks omitted). We therefore decline Static Control's request.

VIII. LEXMARK'S PATENT COUNTERCLAIMS

Lexmark counterclaimed in the 04 Action that Static Control induced the remanufacturers **[*414]** **[**59]** to infringe several patents relating to Lexmark's toner cartridges. At trial, the jury determined that Lexmark had failed to meet its burden of showing direct infringement by Static Control's customers as a class and its burden of showing Static Control induced infringement by the three named remanufacturers already held to be direct infringers. Following the trial, Lexmark renewed a motion for judgment as a matter of law and filed a motion for a new trial on whether the jury's verdict was unreasonable in light of the evidence of direct infringement by the class, which the district court denied. Lexmark also sought a new trial on the issue of inducement after the district court excluded questions at trial relating to the procurement of opinion-of-counsel letters, which the district court also denied. Lexmark appeals these rulings, and we affirm. Lexmark also appeals an earlier ruling by the district court on summary judgment that Lexmark's design patents were invalid as a matter of law, which we also affirm.

A. Standards of Review

HN27[] We review de novo a district court's decision to deny a motion for a judgment as a matter of law under *Federal Rule of Civil Procedure 50*. *Mike's Train House, Inc. v. Lionel, L.L.C., 472 F.3d 398, 405 (6th Cir. 2006)*. **[**60]** A renewed motion for a judgment as a matter of law following an adverse jury verdict "may only be granted if, when viewing the evidence in a light most favorable to the non-moving party, giving that party the benefit of all reasonable inferences . . . reasonable minds could come to but one conclusion in favor of the moving party." *Barnes v. City of Cincinnati, 401 F.3d 729, 736 (6th Cir.)*, *cert. denied*, *546 U.S. 1003, 126 S. Ct. 624, 163 L. Ed. 2d 506 (2005)*. Judgment as a matter of law is **[***32]** appropriate only where there is no "legally sufficient evidentiary basis" for a reasonable jury "to find for the [non-moving] party on that issue." *Fed. R. Civ. P. 50(a)(1)*. We will not substitute our interpretation of the evidence for the jury's, even if we would have reached a different conclusion. *Barnes, 401 F.3d at 738*.

HN28[] We review for abuse of discretion a district court's decision to deny a motion for a new trial under *Federal Rule of Civil Procedure 59*. *Mike's Train House, 472 F.3d at 405*. A new trial is warranted after a jury verdict "for any reason for which a new trial has heretofore been granted in an action at law in federal court." *Fed. R. Civ. P. 59(a)*. We have previously held that a new trial is appropriate when the **[**61]** jury reaches a "seriously erroneous result as evidenced by (1) the verdict being against the [clear] weight of the evidence; (2) the damages being excessive; or (3) the trial being unfair to the moving party in some fashion, i.e., the proceedings being influenced by prejudice or bias." *Mike's Train House, 472 F.3d at 405* (internal quotation marks and alterations omitted) (quoting *Holmes v.*

precedent that an advisory jury does not satisfy that requirement. *See* *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 337 n. 24, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)* ("[A]n advisory jury . . . would not in any event have been a *Seventh Amendment* jury.").

City of Massillon, 78 F.3d 1041, 1045-46 (6th Cir.), *cert. denied*, *519 U.S. 935, 117 S. Ct. 312, 136 L. Ed. 2d 228 (1996))*; *see also* Barnes v. Owens-Corning Fiberglas Corp., 201 F.3d 815, 820 (6th Cir. 2000) (new trial appropriate only if "verdict is against the clear weight of the evidence"). Lexmark's argument relies on the first and third of these potential errors.

HN29[] We review de novo a district court's grant of summary judgment. *Int'l Union v. Cummins, Inc., 434 F.3d 478, 483 (6th Cir. 2006)*. The moving party is entitled to summary judgment when there is no genuine issue of material fact and the issue may be resolved as a matter of law. *Fed. R. Civ. P. 56(a)*. The evidence on summary judgment must be construed **[****1371]** in the light most favorable to the non-moving **[*415]** party. *Matsushita, 475 U.S. at 587*. When genuine issues of material fact remain, **[**62]** the proper course of action is to submit such questions to the finder of fact.

B. Evidence of Direct Infringement by Static Control's Customers as a Class

Lexmark argues on appeal that the evidence established as a matter of law that Static Control's customers as a class directly infringed Lexmark's patents. Lexmark seeks to overturn the jury's verdict to the contrary. **HN30**[] To establish a claim for patent **[***33]** inducement under *35 U.S.C. § 271(b)*, Lexmark bore the burden of showing by a preponderance of the evidence that (1) Static Control's customers directly infringed Lexmark's patents; (2) Static Control took active steps that induced the customers' infringement; (3) Static Control intended the customers to take the infringing acts; and (4) Static Control knew or willfully disregarded the risk that those actions by its customers would constitute direct infringement. *See* Global-Tech Appliances, Inc. v. SEB S.A., 131 S. Ct. 2060, 2065-67, 179 L. Ed. 2d 1167 (2011). Patent infringement by a third-party is therefore a necessary predicate to inducement to infringe.

HN31[] A plaintiff can establish the first element of inducement to infringe either by demonstrating "specific instances of direct infringement or a finding that **[**63]** the accused products necessarily infringe." *Lucent Techs., Inc. v. Gateway, Inc., 580 F.3d 1301, 1322 (Fed. Cir. 2009)*, *cert. denied*, *560 U.S. 935, 130 S. Ct. 3324, 176 L. Ed. 2d 1240 (2010)*; *see also* Dynacore Holdings Corp. v. U.S. Philips Corp., 363 F.3d 1263, 1275-76 (Fed. Cir. 2004) (citing *Sony Corp. of Am. v. Universal City Studios, Inc., 464 U.S. 417, 441, 104 S. Ct. 774, 78 L. Ed. 2d 574 (1984))*; 5 DONALD S. CHISUM, CHISUM ON PATENTS § 17.04[1] (2011). When the plaintiff can show only individual instances of direct infringement, the plaintiff may recover only for the damages from those individual acts. *Dynacore, 363 F.3d at 1274*. If the plaintiff can show an entire class of customers necessarily infringed, damages can be sought more broadly across the entire class. *Id*.

HN32[] Direct patent infringement occurs under *35 U.S.C. § 271(a)* when someone "(1) without authority (2) makes, uses, offers to sell, sells, or imports (3) the patented invention (4) within the United States, its territories, or its possessions (5) during the term of the patent." HERBERT F. SCHWARTZ & ROBERT J. GOLDMAN, PATENT LAW AND PRACTICE 163-64 (6th ed. 2008); *see also* Global-Tech, 131 S. Ct. at 2065 n.2 ("Direct infringement has long been understood to require no more than the **[**64]** unauthorized use of a patented invention."). Determining whether someone is making, using, or selling a patented invention "requires a finding that the patent claim covers the alleged infringer's product or process," *Markman v. Westview Instruments, Inc., 517 U.S. 370, 374, 116 S. Ct. 1384, 134 L. Ed. 2d 577 (1996)* (internal quotation marks omitted). The determination that a patent's claims cover a **[***34]** specific device is often referred to as "literal infringement." SCHWARTZ, *supra*, at 174. Literal infringement alone is not enough to support a claim for inducement, because the predicate to inducement is a violation of *35 U.S.C. § 271(a)*, which requires more than that the accused devices literally infringe. For example, a party could not be liable for inducing infringement if an accused device literally infringed a patent claim but the literal infringer had authority to use the patent or a patent had otherwise expired, thereby defeating a determination of direct patent infringement. *See, e.g.,* Aro Mfg. Co. v. Convertible Top Replacement **[*416]** Co., 377 U.S. 476, 483, 84 S. Ct. 1526, 12 L. Ed. 2d 457, 1964 Dec. Comm'r Pat. 760 (1964) (sustaining claim for contributory infringement upon determining that user of patented item lacked authorization, thereby directly infringing).

HN33[] An accused device **[**65]** will necessarily infringe, permitting a finding of direct infringement by a class of customers and an inference that the inducer intended the infringement, if the "customers can only use the [defendant's] products in an infringing way." *Symantec Corp. v. Computer Assocs. Int'l, Inc., 522 F.3d 1279, 1293 (Fed. Cir. 2008)* (reversing summary judgment on inducement because plaintiff did not need to show specific instances of direct infringement when defendants' product could not be used in a non-infringing way); *see also* *Metro-Goldwyn-Mayer Studios Inc. v. Grokster, Ltd., 545 U.S. 913, 932, 125 S. Ct. 2764, 162 L. Ed. 2d 781 (2005)* ("[W]here an article is good for nothing else but infringement, there is no injustice in presuming or imputing an intent to infringe.") (internal quotation marks and citation omitted). When an accused device could be used in either an infringing or a non-infringing way, a claim of direct infringement based on necessary infringement fails and cannot sustain an inducement claim. *ACCO Brands, Inc. v. ABA Locks Mfr. Co., 501 F.3d 1307, 1313-14 (Fed. Cir. 2007)* (reversing jury verdict of inducement to infringe patented method because no evidence of direct infringement and accused product **[****1372]** could be used **[**66]** in either an infringing or a non-infringing way); CHISUM, *supra*, § 17.04[1].

Prior to the jury's verdict, the district court granted summary judgment to Lexmark on whether the three named remanufacturers—Wazana, NER, and Pendl—directly infringed Lexmark's nine valid mechanical patents. R. 1245 (D. Ct. **[***35]** Order 5/31/07) (holding direct infringement); R. 1008 (D. Ct. Order 4/24/07 at 48-49) (holding mechanical patents valid). Lexmark had therefore established the necessary predicate to inducement, but could recover only for those three remanufacturers' infringement unless Lexmark could demonstrate that all of Static Control's customers as a class necessarily infringed. The question of direct infringement by Static Control's customers as a class was submitted to the jury, which held that Lexmark had failed to meet its burden. R. 1366 (Special Verdict Form at 1). The district court denied Lexmark's renewed motion for a judgment as a matter of law and also Lexmark's motion for a new trial on this issue, finding that the evidence in support of Lexmark did not compel a different result. The district court upheld the jury's verdict because "[t]hough Lexmark presented evidence of infringement **[**67]** by Static Control's customers, that evidence was not so overwhelming that reasonable people could come to but one conclusion." R. 1430 (D. Ct. Order 10/03/08 at 9).

Lexmark argues that the district court erroneously conflated the direct-infringement inquiry, which Lexmark must establish, with the affirmative defense of patent exhaustion, which Static Control must establish. Lexmark offered as circumstantial evidence of infringement by the class the testimony of an expert establishing that the toner cartridges remanufactured by Wazana, NER, and Pendl all literally infringed the claims present in the nine mechanical patents. Although Lexmark offered no testimony regarding specific cartridges from other remanufacturers, Static Control has not argued or even suggested that the unidentified remanufacturers' cartridges did not literally infringe at least some of the more than one hundred patent claims that cover the original cartridges. Instead, Static Control argues that Lexmark confuses literal infringement **[*417]** with direct infringement, and, as the district court held, some of the toner cartridges could not sustain a claim for direct infringement because they were sold domestically first, thereby **[**68]** exhausting Lexmark's patent rights. Third Appellant Br. at 40-41. Lexmark has conceded that its patent rights were exhausted in the non-Prebate cartridges sold first in the United States and certain cartridges sold to IBM customers.

[*36]** Part of the problem here is that the jury instructions never defined what it means for a party to "directly infringe" a patent. Lexmark maintains that when the jury was asked to decide whether Static Control's customers as a class "directly infringed," the question must have related solely to whether the remanufactured toner cartridges as a class literally infringed, because Static Control's sole arguments against direct infringement related to patent exhaustion, which was delineated as a separate question on the jury's special-verdict form. R. 1366 (Special Verdict Form at 1, 4). Lexmark is theoretically correct—***HN34***[] exhaustion of a patentee's rights is a defense to direct infringement and is not the same as establishing a non-infringing use of a patented device, which would defeat a finding that Static Control's customers necessarily infringed the patents. However, this distinction was never clearly made to the jury.

Lexmark's claim fails upon closer examination **[**69]** of the jury's instructions. The jury instructions explicitly suggested that patent exhaustion would defeat a finding of "direct" infringement, as opposed to operating only as a defense following a showing of direct infringement:

> I instruct you that there are at least two kinds of uses of microchips made by Static Control that are lawful and *do not directly infringe* any Lexmark patent. . . . The first non-infringing use of Static Control's microchips is in the remanufacture of Non-Prebate Lexmark cartridges that were first sold by Lexmark in the United States. Static Control has no liability for active inducement of infringement when its microchips are used in those cartridges because those cartridges may be lawfully remanufactured by anyone *without directly infringing* any patent rights of Lexmark.

R. 1365 (Jury Instructions at 18) (emphasis added). The district court then gave the same instruction with respect to the IBM cartridges. Although Lexmark is correct that exhaustion should be an affirmative defense,[13] at no point did Lexmark object to the district court's statement that exhausted cartridges could not **[****1373]** "directly infringe" Lexmark's patents. *See* R. 1119 (Lexmark's Objections to **[**70]** Proposed Jury Instructions); **[***37]** R. 1171 (Jury Instructions Hr'g Tr.); R. 1361 (Joint Proposed Corrections to Final Instructions).

HN35[] Jurors are presumed to be "diligent in following the precise instructions given to them." *United States v. Tosh, 330 F.3d 836, 842 (6th Cir. 2003)*. The evidence presented by Lexmark was not so strong as to prevent a reasonable juror from concluding that some members of the class remanufactured cartridges in a non-infringing manner, as defined by the district court. With two categories of cartridges that categorically did not "directly infringe," according to the jury instructions, the jury reasonably could have concluded Lexmark had not met its burden of showing that the remanufacturers as a class "necessarily infringed" Lexmark's **[*418]** patents by remanufacturing exhausted cartridges. *See* *ACCO Brands, 501 F.3d at 1313* ("Because the accused device can be used at any given time in a noninfringing manner, the accused device does not necessarily **[**71]** infringe the [plaintiff's] patent."). Nor was Lexmark's circumstantial evidence of literal infringement sufficient to compel a conclusion that all of Static Control's customers literally infringed, even if this were an appropriate inquiry. Lexmark's own expert, Dr. Reinholtz, stated that he examined remanufactured cartridges from only the three named companies and did not know if other companies' remanufactured cartridges literally infringed. R. 1216 (Trial Tr. 5/25/07 at 42-43). Although this may have been sufficient circumstantial evidence to sustain a jury verdict of infringement, the evidence certainly does not compel one. As a result, Lexmark was not entitled to judgment as a matter of law or a new trial on the issue of whether Static Control's customers directly infringed as a class. *Barnes, 401 F. 3d at 736* (holding post-trial judgment as a matter of law improper unless "reasonable minds could come to but one conclusion in favor of the moving party"); *Owens-Corning, 201 F.3d at 821* (holding new trial improper "if a reasonable juror could have reached the challenged verdict").

C. Excluded Evidence Relating to Intent to Induce Infringement

Lexmark claims that it was entitled to **[**72]** a new trial on the issue of inducement of the three direct infringers because the district court erroneously excluded certain **[***38]** questions relating to opinion-of-counsel letters at trial, rendering the proceedings unfair. We review for abuse of discretion.[14]

At trial, Lexmark was not allowed to ask Static Control's CEO explicitly whether Static Control had ever obtained a legal opinion regarding potential patent or antitrust violat ions. R. 1269 (Trial Tr. at 108-09). Static Control objected to the presentation of evidence relating to Static Control's failure to obtain advice of counsel, even though Static Control had made available to third parties advice of counsel on the issue of whether Prebate violated contract **[**73]** law.[15] R. 1269 (Trial Tr. 06/04/07 at 108-09). The district court agreed and instructed the witness not to

---

[13] The jury instructions later also define exhaustion as Static Control's burden, using the exact same categories of cartridges the jury was previously instructed did not "directly infringe." R. 1365 (Jury Instructions at 25-26).

[14] Lexmark suggests on appeal that the entirety of the jury's verdict on inducement was "unreasonable and against the weight of the evidence." Second Appellee Br. at 32. This argument, however, is briefed in the context of the excluded opinion-of-counsel letter and only further elaborated upon in Reply. Despite Lexmark's apparent waiver of this issue, the merits of the sufficiency-of-the-evidence argument is discussed herein due to its relevance to the opinion-of-counsel issue.

answer. Lexmark claims that it was "manifestly unfair" to permit the CEO to testify regarding the procurement of exculpatory advice from counsel but not permit Lexmark "to identify failures to procure such **[*419]** advice as circumstantial evidence of intent to infringe." Second Appellee Br. at 34 (quoting *Broadcom Corp. v. Qualcomm Inc., 543 F.3d 683, 699 (Fed. Cir. 2008))*.

Lexmark's argument on appeal relies heavily on *Broadcom, 543 F.3d 683*, a Federal Circuit case issued after trial but before the district court ruled on Lexmark's motion. *Broadcom* held that "[i]t would be manifestly unfair to allow opinion-of-counsel evidence to serve an exculpatory function . . . and yet not permit patentees to identify failures to procure such advice as circumstantial evidence of intent to **[****1374]** infringe." *Broadcom, 543 F.3d at 699*. Although *Broadcom* appears to support Lexmark's position, the district court ruled against Lexmark, *see* R. 1521 (D. Ct. Op. & Order at 16-19), after reading *Broadcom* in the context of the Federal Circuit's prior **[***39]** ruling in *Knorr-Bremse Systeme Fuer Nutzfahrzeuge GmbH v. Dana Corp., 383 F.3d 1337 (Fed. Cir. 2004)* (en banc), which held that it would be "inappropriate to draw a[n] . . . adverse inference from failure to consult counsel" when an accused infringer was under no obligation in the first place to obtain advice of counsel on whether it was **[**75]** infringing. *Id. at 1345*.

We need not decide whether a party's failure to obtain an opinion-of-counsel letter may ever constitute circumstantial evidence of the requisite intent to induce infringement. Even if we assume that this evidence was wrongly excluded, the best-case scenario for Lexmark—a negative answer to the forbidden question—would not have changed the jury's verdict on this issue.

HN36[] Lexmark bore the burden of establishing by a preponderance of the evidence that Static Control had the requisite intent to induce infringement. The Supreme Court has recently clarified that this means that the alleged inducer must intend the customers to take the acts that ultimately constituted infringement and the inducer must know or willfully disregard the risk that those actions by its customers would constitute direct infringement. *See Global-Tech, 131 S. Ct. at 2065*. By way of analogy, the Supreme Court compared a used-car salesman who encouraged a customer to buy a car that later turned out to be damaged to a used-car salesman who encouraged a customer to buy a car knowing it was damaged; we fault the latter more than the former.

Lexmark correctly explains that ***HN37***[] "advertising infringing uses, **[**76]** instructing how to engage in infringing uses, demonstrating infringing uses, and recommending infringing uses is strong evidence of specific intent to cause the actions that constitute direct infringement." Second Appellee Br. at 31 (citing *Grokster, 545 U.S. at 936*). But, given the jury instructions that delineated certain cartridges as non-infringing, Lexmark's evidence needed to show that Static Control advertised, instructed, or otherwise recommended the remanufacture of *infringing* cartridges, which at the time of trial were the Prebate cartridges and the cartridges first sold outside the United States. Lexmark's proof, however, is not compelling enough for us to find that the district court abused its discretion in upholding the jury verdict.

[*40]** Lexmark argues that it presented specific evidence demonstrating that Static Control encouraged and instructed remanufacturers to remanufacture Prebate cartridges and cartridges first sold overseas, the two categories not deemed "non-infringing" at trial. But the testimony primarily indicated that Static Control encouraged and instructed its customers to remanufacture cartridges generally and such instructions did not distinguish between **[**77]** foreign or domestic-sold cartridges or Prebate cartridges. *See, e.g.*, R. 1242 (Trial Tr. 5/30/07 at 37-38) (testimony **[*420]** from Static Control that instructions would enable remanufacture of cartridges, including

---

[15] Static Control's general counsel had previously obtained a legal opinion letter regarding the illegality of Lexmark's Prebate program under principles of property and contract law. Static Control provided this letter to its customers as assurance that "Prebate does not create any legal barrier to the purchase and reuse by others of 'prebate' cartridges." J.A. at 1280 (Letter from Static Control). The letter from counsel stated that it "does not deal with the application of either patent law or ***antitrust law***" to Lexmark's Prebate program. However, despite this assertion, the letter includes a short paragraph stating that counsel "see[s] nothing in either area of [patent or ***antitrust] law*** that would raise any questions **[**74]** about my conclusion [and] there are doctrines in both areas of law that might well prevent the successful adoption by any manufacturer" of a program to prevent reuse of toner cartridges. *Id*. at 1286.

Prebate); id. at 121-22 (testimony from NER that Static Control did not differentiate between Prebate and non-Prebate at tradeshows). However, Static Control offered testimony that its instructions contained explicit warnings not to use the Static Control chips on Prebate cartridges unless they were first sold in North Carolina after October 1, 2003,[16] and not for resale in the United States. *See, e.g*., J.A. at 657 (Instructions for Replacement Chip). And employees of Static Control were under strict instructions to repeat those conditions to any customer who called to inquire about the microchips. R. 1285 (Trial Tr. 6/6/07 at 88-89). Although Lexmark offered testimony that there was simply no way for a remanufacturer to distinguish between a foreign-sold cartridge and a United States cartridge just by looking at the cartridge, *id*. at 155, Static Control offered testimony that the remanufacturers could determine origin by inquiring at the time of acquisition, *id*. at 88. The jury **[**78]** was best situated to weigh the competing evidence and determine whether Static Control had the requisite intent to induce the infringing acts. The evidence offered by Lexmark may have been sufficient to sustain a jury finding of inducement; however, this evidence certainly does not compel such a finding when the jury has rejected it.

The excluded question during Static Control's CEO's testimony does not change this calculus. Lexmark inflates the significance of the exclusion. Static Control's CEO was asked if he "ever had an outside patent attorney . . . give you advice on the issue of single-use patent licenses," to which the CEO responded in **[****1375]** the negative. R. 1269 **[***41]** (Trial Tr. 6/4/07 at 94). He was then asked explicitly whether he sought out legal counsel relating to Prebate, and the CEO answered affirmatively that he "sought advice about prebate cartridges that had been either put into the landfill or were on the way to the landfill." *Id*. at 95. When asked **[**79]** if that was all he sought advice on, he unequivocally said "Yes." *Id*. It was only when counsel later asked specifically whether Static Control sought advice relating to patent or ***antitrust law*** that Static Control objected and the district court instructed the witness not to answer. *Id*. 108-09. And despite this exclusion in the CEO's testimony, Static Control's general counsel was asked about and specifically discussed concerns over patent-law issues, including whether or not Static Control's actions could constitute inducement to infringe. R. 1242 (Trial Tr. 5/30/07 at 249-50, 263-65, 272-73).

Lexmark bore the burden of establishing Static Control's knowledge or willful blindness to the underlying infringing acts. Based on the related evidence already on the record, we cannot conclude that the jury would have reached a different conclusion had the jury been told that Static Control failed to obtain an opinion-of-counsel letter specifically on issues of patent law. The exclusion of this potential evidence was harmless in light of the other elements that Lexmark failed to establish by a preponderance of the evidence. *See Bridgeport Music, Inc. v. Justin Combs Publ'g, 507 F.3d 470, 481 (6th Cir. 2007)*, **[**80]** *cert. denied*, *555 U.S. 818, 129 S. Ct. 85, 172 L. Ed. 2d 29 (2008)*.

D. Exhaustion of Prebate Cartridges

Lexmark also challenges the district court's post-trial ruling holding that Lexmark's **[*421]** sale of Prebate cartridges exhausted its patent rights in their cartridges. The relief Lexmark seeks on this issue, however, is unclear. Whether the Prebate agreement prevented the exhaustion of Lexmark's patent rights as a matter of law does not change the outcome of the jury trial, because at the time of trial the district court had ruled favorably to Lexmark that Prebate cartridges prevented exhaustion. R. 1008 (D. Ct. Order 4/24/07). Thus, unlike the non-Prebate cartridges sold in the United States and the IBM cartridges, the jury was never instructed that Prebate cartridges could not serve the basis for direct infringement by Static Control's customers as a class. Nor does the **[***42]** question of exhaustion bear in any way on the jury's verdict that Static Control did not induce the direct infringement by Wazana, Pendl, and NER. We therefore decline to resolve this extremely complex and unsettled question, because it would have no relevance to the outcome of this appeal.

E. Design-Patent Invalidity

[16] North Carolina passed a law in October 2003 that Static Control believed made Prebate restrictions unenforceable in North Carolina. The jury was instructed that these cartridges could not infringe. R. 1365 (Jury Instructions at 19).

The district court held on summary **[**81]** judgment that two of Lexmark's design patents relating to the appearance of its toner cartridges—D399,249 and D458,300—were invalid. R. 1008 (D. Ct. Order 4/24/07). ***HN38***[] Patent invalidity is a defense to a claim for patent infringement. *35 U.S.C. § 282*. As a result of this ruling, the issue of whether any party directly infringed Lexmark's design patents or induced someone else to infringe was never decided. Lexmark appeals, and we affirm.

HN39[] All patents are presumed valid, and the burden of overcoming this presumption rests on the party seeking invalidity. *35 U.S.C. § 282*; *Campbell v. Spectrum Automation Co., 513 F.2d 932, 935-36 (6th Cir. 1975)*. Invalidity must be established by clear and convincing evidence. *Microsoft Corp. v. i4i Ltd. P'ship, 131 S. Ct. 2238, 2243, 180 L. Ed. 2d 131 (2011)*. Patent validity is a question of law. *Schnadig Corp. v. Gaines Mfg. Co., 494 F.2d 383, 387-88 (6th Cir. 1974)*. However, where legal analysis rests on factual findings, we will not reverse such findings absent clear error. *Id. at 388*.

HN40[] Design patents are issued to whoever "invents any new, original and ornamental design for an article of manufacture." *35 U.S.C. § 171*; *Schnadig, 494 F.2d at 387* ("To be patentable a design **[**82]** must be new, original, ornamental and nonobvious."). A design patent is not ornamental if the design serves only functional purposes. In other words, "[a] design patent cannot be obtained to protect a mechanical function or cover an article whose configuration affects its utility alone." *Kwik-Site Corp. v. Clear View Mfg. Co., 758 F.2d 167, 171 (6th Cir. 1985)* (internal quotation marks and emphasis omitted) (holding design patent for rifle scope mount invalid because configuration served solely functional purposes); *Fuji Kogyo Co. v. Pacific Bay Int'l, Inc., 461 F.3d 675, 683 (6th Cir. 2006)* ("[I]f the particular design is essential to the use of the article, it can not be the subject of a design patent.") (internal quotation marks omitted), *cert. denied*, **[***43]** *549 U.S. 1252, 127 S. Ct. 1373, 167 L. Ed. 2d 160 (2007)*. An article is less likely to be ornamental if it is not observed, **[****1376]** and the Federal Circuit looks not just to whether the article is ever seen but whether the *appearance* of the article may become a "matter of concern" at any point during the article's "normal and intended use." *In re Webb, 916 F.2d 1553, 1558 (Fed. Cir. 1990)* (holding design of hip implants could be patented because even though not seen during **[**83]** normal use the "design[was] clearly intended to be noticed during the process of sale.").

[*422] The district court held that Lexmark's design patents were invalid because the design of Lexmark's toner cartridges was primarily functional and "the appearance of Lexmark's printer cartridges in question are [sic] of no matter of concern during those cartridges' entire existence." R. 1008 (D. Ct. Order 4/24/07 at 10-11). The design of the cartridges was primarily functional because the design of the printer dictated the exact design of the cartridge. *Id*. at 13-14 (citing *Best Lock Corp. v. Ilco Unican Corp., 94 F.3d 1563, 1566 (Fed. Cir. 1996)* (holding design of key not patentable because dictated by function, i.e., the design of the corresponding lock)). And even though the cartridges may be seen at some point during their lifetime, at no point was their appearance a matter of concern to the end-user. *Id*. at 11 (citing *In re Stevens, 173 F.2d 1015, 36 C.C.P.A. 1017, 1019-20, 1949 Dec. Comm'r Pat. 303 (C.C.P.A. 1949))*.

Lexmark claims that the district court improperly shifted the burden of proof onto Lexmark to show validity and improperly credited disputed issues of fact in Static Control's favor. Lexmark does not dispute the general proposition **[**84]** that ***HN41***[] to establish invalidity, the infringer must show "that consumers do not consider [the patented design] to be significant." Second Appellee Br. at 36 (quoting *Int'l Seaway Trading Corp. v. Walgreens Corp., 589 F.3d 1233, 1242 (Fed. Cir. 2009))*. Lexmark objects to the lack of survey evidence showing consumers do not consider Lexmark's cartridge appearance to be a matter of concern and argues that the district court ignored the presence of photographs of the cartridges on the website where the cartridges were sold and on the cartridge boxes. Lexmark argues that this determination is an issue of fact subject to genuine dispute and therefore inappropriate on summary judgment.

[*44]** The district court applied the correct standard and evaluated the undisputed facts offered by Static Control establishing that the design of the cartridges was functional and not ornamental.[17] The toner cartridges are visible to users at some points, but are generally hidden from view inside the printer. Their design is dictated solely by the printer with which they are compatible. Lexmark itself explained that the advertisements containing photographs were primarily to assist the customer in selecting the cartridge **[**85]** that was *compatible* with the printer they owned. R. 506 (Lexmark's Opp. to Summ. J. at 10). The cartridges' appearance had no other role in the purchaser's decision of which cartridge to purchase. "[T]he purpose of the statute is to give encouragement to the decorative arts. It contemplates not so much utility as appearance." *Cavu Clothes, Inc. v. Squires, Inc., 184 F.2d 30, 32 (6th Cir. 1950)* (citing *Gorham Mfg. Co. v. White, 81 U.S. 511, 524, 20 L. Ed. 731 (1871))*.

On appeal, Lexmark does not attempt to dispute any of these material facts, arguing instead that Static Control should have presented *more* evidence, such as consumer surveys, and suggesting that the presence of photographs of the product should be enough to create a dispute over whether appearance matters. Second Appellee Br. at 36-37. Although **[**86]** we make all inferences in favor of Lexmark on this issue, Static Control has demonstrated by undisputed clear and convincing evidence that **[*423]** the design patents were invalid. Lexmark has not pointed to any genuine fact disputes that would undermine this conclusion. We therefore **AFFIRM** the district court's holding that Lexmark's design patents are invalid.

IX. CONCLUSION

For the aforementioned reasons, we **AFFIRM** the district court on all claims except the dismissal of some of Static Control's counterclaims under the Lanham Act and North Carolina state law, which we **REVERSE** and **REMAND** for further proceedings consistent with this opinion. **[****1377]**

End of Document

[17] Lexmark relies heavily on the district court's statement that "Lexmark fail[ed] to set forth any evidence," R. 1008 (D. Ct. Order 4/24/07 at 15). The district court recited at length Static Control's burden and applied it to the facts. *Id*. at 9-15. The district court appears to have been emphasizing that Lexmark's suggestion that there were open issues of fact was unsupported by any actual evidence.

Opinion

[*794] MEMORANDUM OPINION

Before the Court are numerous motions filed by the party Defendants to the lawsuit, AT&T, Inc., AT&T Mobility, LLC, Motorola Solutions, Inc., Motorola Mobility, Inc., and Qualcomm Incorporated, brought by Plaintiffs, Corr Wireless Communications, LLC, Cellular South, Inc., and Cellular South Licenses, LLC, for violations of federal antitrust laws. [1] Plaintiffs' 146-page complaint revolves around the development of standards governing wireless spectrum utilized by providers of commercial wireless services. On April 12, 2012—ten days after Plaintiffs filed their complaint—Plaintiffs filed a Motion to Expedite Scheduling and Case Management Conference and for Other Relief [10]. After considering the arguments made by all parties on the motion to expedite, the Court deferred ruling on the motion until the Defendants had an opportunity to file motions to dismiss, specifically motions to dismiss under Federal *Rule 12(b)(6)*. All parties agreed on a scheduling order for such motions, and the Court **[**3]** accepted the same.

The motions now currently pending and ripe for judicial review are as follows: (1) a Motion to Dismiss Pursuant to *Federal Rule of Civil Procedure 12(b)(2)* [61] filed by AT&T, Inc.; (2) Motion to Dismiss for Failure to State a Claim or, in the alternative, Pursuant to the Doctrine of Primary Jurisdiction by AT&T Mobility LLC [65]; (3) a Motion to Dismiss for Failure to State a Claim or, in the alternative, Pursuant to the Doctrine of Primary Jurisdiction [67] by Qualcomm Incorporated; (4) Motion Request for Judicial Notice [69] filed by Qualcomm Incorporated; (5) Motion to Dismiss for Failure to State a Claim [70] filed by Motorola Solutions, Inc.; and (6) Supplemental Motion for Request for Judicial Notice [90] filed by Qualcomm Incorporated. On July 17, 2012, the Court entertained oral arguments on all of the aforementioned motions.

After marshaling through the motion-to-dismiss record, carefully considering the arguments articulated in the hearing, and reviewing the pertinent authority, **[**4]** [2] the Court finds that Plaintiffs' complaint fails to state a claim and, for this reason, Defendants' motions brought pursuant to *Rule 12(b)(6)* shall be granted. As the Supreme Court explained in *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 557, 127 S. Ct. 1955, 167 L. Ed. 2d 929* ***[*795]*** *(2007)*, "[t]he need at the pleading stage for allegations plausibly suggesting (not merely consistent with) agreement reflects *Rule 8(a)(2)*'s threshold requirement that the 'plain statement' possess enough heft to 'sho[w] that the pleader is entitled to relief.'" Here, Plaintiffs have simply "not nudged their claims across the line from conceivable to plausible[; thus], their complaint must be dismissed." Id.

Relevant Background Facts

Spectrum

The antitrust allegations in this case concern electromagnetic spectrum, which at a basic level, essentially refers to wireless capacity. Since the mid-1990s, the Federal Communications Commission ("FCC") has conducted auctions of licenses for such electromagnetic spectrum. That is, the FCC makes available, through auctions and a competitive bidding process, new **[**5]** spectrum for mobile telephony and/or broadband. The spectrum at issue in Plaintiffs' complaint is the 700 MHz band, which is comprised of 70 megahertz of commercial, non-guard band spectrum, 4 megahertz of guard band spectrum, 24 megahertz of public safety spectrum, and 10 megahertz of spectrum that will be reallocated for public safety use pursuant to congressional mandate.

---

[1] For clarification, the Court notes that the Plaintiffs to this lawsuit are referred to collectively as either "Plaintiffs" or "Cellular South" throughout this memorandum opinion.

[2] The Court notes that it has reviewed the case law supplemented by Plaintiffs on August 22, 2012 [98].

The FCC recently launched proceedings to "free up" the 700 MHz band for commercial mobile services, as this spectrum was once occupied by analog television broadcasters in TV channels 52-69. Commercial licenses for this spectrum were assigned through several FCC auction proceedings. The FCC auctioned licenses for the guard bands in the Upper 700 MHz band in 2000, and it initially auctioned licenses in the Lower C and D Blocks in 2002. In 2008, the FCC auctioned licenses in the Lower 700 MHz band A, B, and E Blocks, as well as the Upper 700 MHz band C Block.

3GPP and Long-Term Evolution Wireless Broadband Technology

The service at issue here is the fourth-generation ("4G") [3] Long-Term Evolution ("LTE") service, which Plaintiffs refer to as the "gold standard" of wireless technology. The Plaintiffs state that "[although **[**6]** 4G-LTE is not required to be deployed on 700 MHz spectrum, it is described in the industry as 'beachfront spectrum.'" Industry standards for such LTE wireless broadband technology to be deployed on 700 MHz spectrum are developed by a non-profit standard setting organization called Third Generation Partnership Project ("3GPP"). [4] 3GPP is a consensus-driven international partnership of industry-based telecommunications standards bodies. 3GPP, established in 1998, is an industry-based group and it is not associated with any governmental agency.

As **[**7]** noted, the FCC held an auction to sell and repurpose licenses in the 700 MHz spectrum in 2008. The complaint filed in this action focuses on three blocks of spectrum in the Lower 700 MHz band: the A, B, and C Blocks. AT&T purchased licenses in the Lower B and C Block. Cellular South purchased spectrum in the Lower A Blocks.

[*796] In this Lower 700 MHz band, there are currently two different operating bands:

- **Band Class 12**, which covers operations in the Lower A, B, and C Blocks; and
- **Band Class 17**, which covers operations in the Lower B and C Blocks only.

Band Class 17 was created through the 3GPP process after "Auction 73," and the creation of Band Class 17 is the focal point of Plaintiffs' claims of conspiracy, as Band Class 17 does not include the Lower A Block that was purchased by Cellular South. [5] The entities involved in the creation of Band Class 17 during 3GPP proceedings, which include the Defendants named in this action, assert that it was necessary to create a separate band class for Lower 700 MHz B and C Block licenses in order to avoid interference issues from DTV in Channel 51 and high power operations in the E Block. Due to the creation of this separate band class, certain **[**8]** Lower MHz A Block licensees, including Cellular South, filed a petition for rulemaking with the FCC in late 2009.

FCC Petition for Rulemaking

In 2009, Cellular South Licenses, Inc., Cavalier Wireless, LLC, Continuum 700, LLC, and King Street Wireless, L.P. — all holders of Lower 700 MHz A Block licenses — filed a petition for rulemaking, asking the FCC to assure that consumers will have access to all paired 700 MHz spectrum that the FCC licenses. The FCC was also requested to put an immediate freeze on the authorization of mobile equipment that is not capable of operation on all paired commercial 700 MHz frequencies. The Wireless Telecommunications Bureau sought comment on the petition in

---

[3] 4G is the successor to 3G and 2G technologies and, according to Plaintiffs, is intended eventually to supplant those standards.

[4] See *Golden Bridge Technology, Inc. v. Motorola, Inc., 547 F.3d 266, 269 (5th Cir. 2008)* (The 3GPP "institutes uniform technology standards for the telecommunications industry to ensure worldwide compatibility of cellular devices and systems. More than 260 companies belong to 3GPP, representing all levels of the cell phone industry. The 3GPP members are responsible for creating and developing the 3GPP standard, which means determining what technologies will be included in the standard as either mandatory or optional features").

[5] Band Class 17 was originally labeled Band Class 15.

2010, and the FCC received comments and reply comments. In order to update the record and gather additional information, the Wireless Telecommunications Bureau held a workshop on the status and availability of interoperable mobile user equipment across commercial spectrum blocks in the 700 MHz band. Thereafter, the FCC issued a notice of proposed rulemaking to address the issues raised by the petition for rulemaking, seeking comment, data, and evidence **[**9]** on the argument that an interoperability requirement in the 700 MHz band is necessary to obtain affordable, advanced mobile devices to deploy service to consumers in smaller, regional, and rural service areas. This notice of proposed rulemaking was issued in March 2012, and less than two weeks before Plaintiffs filed the instant action. All of the Defendants named in this action maintain that the FCC has "primary jurisdiction" [6] over this dispute.

Allegations in Plaintiffs' Complaint

A. 3GPP Process

Plaintiffs filed their complaint on April 2, 2012, filed an amended complaint on June 8, 2012, and provide a "summary of the allegations in the complaint" in their **[*797]** response in opposition to the Defendants' motion to dismiss. Plaintiffs essentially contend that AT&T, Motorola, and Qualcomm maintained a conspiracy that manipulated the 3GPP standard setting process. The antitrust allegations began in 2008, shortly after "Auction 73." [7] In May of 2008, Motorola proposed that a separate band—now known as Band Class 17—be created to *include* the Lower B and C Block 700 MHz spectrum (*i.e.*, the spectrum purchased by AT&T), yet *exclude* the Lower A Block 700 MHz spectrum licenses (*i.e.*, the spectrum purchased by Cellular South and others, including Verizon Wireless). Plaintiffs maintain that "Motorola, as a current and prospective wireless device supplier to AT&T, would have never made its proposal in the first place without the prior consent, blessing, and agreement of AT&T."

After Motorola proffered its proposal, Plaintiffs assert that, in June 2008, AT&T submitted a paper that "supported the creation of what became Band Class 17." In the report for the June 2008 meeting, Qualcomm also allegedly agreed with AT&T's conclusion on Band Class 17 with respect to "user equipment." Plaintiffs maintain that Qualcomm's support for the creation of Band Class 17 was against its own self-interest, and "can only be explained by a preceding agreement with AT&T." Plaintiffs further argue that "neither [Qualcomm or Motorola] would have taken such steps . . . without such a prior agreement [with AT&T]." Plaintiffs contend that Ericsson, a device manufacturer, raised concerns that the creation of a separate band class would "go[] against the economies of scale." Ericsson, however, subsequently withdrew its initial objection to the creation of this separate band class.

In August 2008, the 3GPP, acting by a consensus, adopted the proposal to create Band Class 17, with no dissent. Plaintiffs maintain that the 3GPP "rubber-stamped" the "concerted work" of the Defendants concerning Band Class 17. Plaintiffs, however, do not **[**12]** contest that the 3GPP process itself was strictly followed. That is, technical arguments supporting the creation of Band Class 17 were set out in writing for evaluation by experts, and the 3GPP acted by a consensus with no objection from anyone concerning Band Class 17.

---

[6] The doctrine of primary jurisdiction operates, when applicable, to postpone judicial consideration of a case until an agency with special competence in the area makes a determination regarding a particular issue involved in the case. *Mercury Motor Express, Inc. v. Brinke, 475 F.2d 1086, 1092-93 (5th Cir. 1973)*. The doctrine "applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views." *United States v. Western Pac. R.R., 352 U.S. 59, 63-64, 77 S. Ct. 161, 1 L. Ed. 2d 126, 135 Ct. Cl. 997 (1956)*; **[**10]** see also *Wagner & Brown v. ANR Pipeline Co., 837 F.2d 199, 201 (5th Cir. 1988)*.

[7] As discussed *supra*, "Auction 73" happened in 2008, when the FCC licensed rights in the 700 **[**11]** MHz spectrum, including the Lower A, B, and C Blocks.

B. Alleged Delay of Band Class 12 Standards

Plaintiffs assert that after the Defendants "caused 3GPP to fragment Band 12 by creating Band 17, AT&T and the other Defendants continued to preserve what their concerted action had wrought (*i.e.*, AT&T's private ecosystem) when that private ecosystem was threatened by Cellular South." After Plaintiffs filed the aforementioned petition for rulemaking with the FCC, Plaintiffs maintain that AT&T and the other Defendants agreed to improperly delay Band Class 12 standards. Plaintiffs contend that they "do[] not claim that the Defendants' opposition to the Interoperability Petition before the FCC was actionable . . . Rather, the Complaint alleges that it was the Defendants' conduct beyond its opposition before the government in threatening Cellular South with the delay of Band 12, actually delaying Band 12, and attempting to secure Cellular South's withdrawal of the Interoperability **[**13]** Petition which was, and is, actionable." Plaintiffs maintain that while Band Class 12 was recognized prior to "Auction 73," "work was left to be done by 3GPP to develop the technical specifications necessary for the implementation of Band 12 by carriers and equipment manufacturers." Plaintiffs maintain that Defendants **[*798]** "block[ed] and/or delay[ed]" the development of such specifications. To support this assertion, Plaintiffs set forth factual evidence in the form of comments made by employees of Motorola and Qualcomm.

First, Plaintiffs maintain that in May 2010—approximately two years after Band Class 17 was created—Qualcomm representative, Michael Chard, allegedly stated to Brian Caraway of Cellular South that "there may be individuals participating in 3GPP discussions who would oppose amendments to the Band 12 standard." Chard allegedly also commented that the Interoperability Petition was a "conflict generator" and that "there could be some 'blocking' of Band 12 by the 3GPP participants that were concerned about the Interoperability Petition." In the same conference call, Chard also allegedly stated that "Qualcomm was concerned that the actions of the companies that filed the Interoperability **[**14]** Petition — including Cellular South — conflicted with the best interests of Qualcomm's 'other carrier partners.'" In Plaintiffs' brief in opposition to the motions to dismiss, Plaintiffs contend that "Chard's reference to its 'carrier partners' . . . had to include AT&T." Chard also allegedly commented that "most if not all of what happens in RAN 4 [discussions] happens before the meeting."

Second, Plaintiffs contend that at a June 2010 3GPP meeting, Gene Fong of Qualcomm had a conversation with Brian Caraway of Cellular South. When asked by Caraway if the Interoperability Petition had caused delays in the advancement of Band 12 standards, Fong allegedly stated, "I would be lying if I said no." However, Fong then also stated, "but I am still going to do my job." Fong also allegedly noted that Qualcomm's position on adoption of Band Class 12 standards was subject to "external influences."

Third, Plaintiffs assert that at the same 3GPP June 2010 meeting, Edgar Fernandes of Motorola, who was also the Vice Chairman of the RAN 4 Working Group at 3GPP, asked Brian Caraway of Cellular South and others if their companies were part of the group that had filed the Interoperability Petition. Caraway **[**15]** confirmed that Cellular South, among others, had filed the Interoperability Petition. Fernandes allegedly stated to Caraway that the petition and related filings "have made us hesitant to do anything with Band 12." Fernandes also allegedly commented that the petition "had gummed up the works."

As it relates to these comments from Qualcomm and Motorola employees, Plaintiffs argue that because they "came virtually simultaneously, it is clear that they acted in concert both to protect the newly created AT&T private ecosystem and to punish Cellular South for its role in filing the Interoperability Petition." Plaintiffs further maintain that the "only interpretation that can be given to these statements which directly evidence concerted action is that Motorola and Qualcomm were acting at least with AT&T." Plaintiffs additionally assert that Qualcomm refused to build chipsets that function on Band Class 12; however, Plaintiffs concede that "[s]hortly thereafter . . . Qualcomm announced that it had decided to build a Band 12 chip after all." Plaintiffs maintain that Qualcomm decided to build the Band 12 chip to "cover its tracks" concerning the alleged conspiracy. According to Plaintiffs, **[**16]** the revised final standards for Band 12 were approved by 3GPP in November 2010.

C. Exclusive Dealing

Plaintiffs also base their antitrust claims on alleged exclusive dealing arrangements. That is, Plaintiffs proffer that, "on information and belief, Cellular South believes that AT&T has secured its 4G-LTE devices on an exclusionary basis." In their response in opposition to the motions to dismiss, Plaintiffs contend that, "[t]hose **[*799]** [alleged] formal agreements, whose existences and whose content are known (at least before the parties to this litigation have conducted discovery) solely to the defendants, are susceptible to legal attack under *Section 2* of the Sherman Act as they are under *Section 1*."

D. Roaming

Plaintiffs additionally set forth allegations concerning AT&T's "increased power and opportunity" to deny Cellular South roaming on AT&T's national network. Roaming services are essentially network services that customers of regional carriers, such as Cellular South, may utilize when outside of their service area. Plaintiffs contend that "[b]ased on prior knowledge and experience, AT&T will abuse its monopoly power over 4G-LTE nationwide data roaming in the Lower 700 MHz spectrum to **[**17]** delay or refuse to provide meaningful nationwide roaming to [Plaintiffs]." As the complaint sets forth by its very language, and as Plaintiffs concede in oral argument, Plaintiffs' claim for denial of roaming is not based on any action that AT&T has already taken. Rather, it is based on a course of future action that AT&T, at some point, may pursue.

Summary of Plaintiffs' Antitrust Claims

Plaintiffs maintain that Defendants' alleged conduct presents a "very mixed combination" of (a) concerted action by all three Defendants; and (b) unilateral abuse of monopoly power by AT&T." Plaintiffs allege that these claims fall under both *Section 1* and *2* of the Sherman Act. According to Plaintiffs, the complaint "has alleged a claim for violation of *Section 1* arising out of two types of conduct: (1) the Defendants' collective and concerted action to fragment and delay Band 12, delaying the development of Band 12 devices and depriving Cellular South and others of roaming; and (2) AT&T's exclusive agreements with manufacturers to produce Band 17 devices, and refusal to sell devices to AT&T's competitors."

Plaintiffs' complaint further alleges that AT&T is also liable under *Section 2* of the Sherman **[**18]** Act. Plaintiffs contend that, in assessing *Section 2* liability, "AT&T's conduct must be considered as a whole — including the creation of Band 17, the agreements with device manufacturers, and AT&T's pattern of conduct designed to deprive competitors of roaming access."

Legal Standards

Pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, a plaintiff must state a claim upon which relief can be granted or the complaint may be dismissed with prejudice as a matter of law. *Fed. R. Civ. P. 12(b)(6)*. When considering a motion to dismiss for failure to state a claim, the "court accepts 'all well-pleaded facts as true, viewing them in the light most favorable to the plaintiff.'" *In re Katrina Canal Breaches Litig., 495 F.3d 191, 205 (5th Cir. 2007)* (quoting *Martin K. Eby Constr. Co. v. Dallas Area Rapid Transit, 369 F.3d 464, 467 (5th Cir. 2004)* and *Jones v. Greninger, 188 F.3d 322, 324 (5th Cir. 1999))*. To withstand a *Rule 12(b)(6)* motion, the plaintiff must plead "enough facts to state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570-72, 127 S. Ct. 1955*.

Rule 8 of the Federal Rules of Civil Procedure sets out the fundamental pleading standard for civil **[**19]** litigation and governs all claims in a civil suit, requiring "a short plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. "A plaintiff's obligation to provide the 'grounds of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555, 127 S. Ct. 1955*. Factual allegations must be enough to raise a right to relief above the speculative level. Id. Although the Supreme **[*800]** Court in Twombly stressed that it did not impose a probability standard at the pleading stage, the allegation of a mere possibility of relief does not satisfy the threshold requirement of Rule 8(a)(2) that the "plain statement" of a claim include factual "allegations plausibly suggesting (not merely consistent with)" an entitlement to relief. Id. at 557, 127 S. Ct. 1955; see also Ashcroft v. Iqbal, 556 U.S. 662, 684, 129 S. Ct. 1937, 1953, 173 L. Ed. 2d 868 (2009).

When ruling on a motion to dismiss under Rule 12(b)(6), a court must accept as true all of the factual allegations contained in the complaint. Twombly, 550 U.S. at 555-56, 127 S. Ct. 1955 (citing **[**20]** Swierkiewicz v. Sorema N. A., 534 U.S. 506, 508 n.1, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002); Neitzke v. Williams, 490 U.S. 319, 326-27, 109 S. Ct. 1827, 104 L. Ed. 2d 338 (1989); Scheuer v. Rhodes, 416 U.S. 232, 236, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)). But, a court need not accept as true "conclusory allegations, unwarranted factual inferences, or legal conclusions," which will not defeat a Rule 12(b)(6) motion to dismiss. Plotkin v. IP Axess, Inc., 407 F.3d 690, 696 (5th Cir. 2005) (citing Southland Sec. Corp. v. INSpire Ins. Solutions, Inc., 365 F.3d 353, 361 (5th Cir. 2004)).

In Iqbal, the Court formalized a two-pronged approach to apply the underlying jurisprudential principles of Twombly. The first prong requires the Court to separate factual allegations from legal conclusions. Id. The Court in Iqbal dismissed those allegations deemed to be "conclusory" on the basis that bare legal conclusions are not entitled to the privilege that all well-pleaded facts be taken as true at the motion to dismiss stage. Id. [8] The second prong then applies the plausibility test to the remaining allegations. Id. (explaining that although the court must "take all of the factual allegations in **[**21]** the complaint as true," it is "not bound to accept as true a legal conclusion couched as a factual allegation" (internal quotation marks omitted)). That two-pronged approach is now the standard for evaluating the plausibility of a complaint under Rule 8(a)(2).

Discussion and Analysis

Section 1 Claim Against All Defendants

Section 1 of the Sherman Act states: "Every **[**23]** contract, combination in **[*801]** the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." 15 U.S.C. § 1. Although § 1 could be read to outlaw all contracts, it has long been interpreted to only proscribe unreasonable restraints. See Leegin Creative Leather Prods. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007). To establish a § 1 violation, a plaintiff must prove that: (1) the defendants engaged in a conspiracy; (2) that restrained trade; (3) in the relevant market. See Apani Sw., Inc. v. Coca-Cola Enter., Inc., 300 F.3d 620, 627 (5th Cir. 2002). Once a plaintiff establishes that a conspiracy occurred, whether it violates § 1 is

[8] Iqbal illustrated its analysis of the first prong as follows:

> We begin our analysis by identifying the allegations in the complaint that are not entitled to the assumption of truth. Respondent pleads that petitioners "knew of, condoned, and willfully and maliciously agreed to subject [him]" to harsh conditions of confinement "as a matter of policy, solely on account of [his] religion, race, and/or national origin and for no legitimate penological interest." Complaint ¶ 96, App. to Pet. for Cert. 173a-174a. The complaint alleges that Ashcroft was the "principal architect" of this invidious policy, id., ¶ 10, at 157a, and that Mueller was "instrumental" in adopting and executing it, id., ¶ 11, at 157a. These bare assertions, much like the pleading of conspiracy in Twombly, amount to nothing more than a "formulaic recitation of the elements" of a constitutional discrimination claim, 550 U.S., at 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929, **[**22]** namely, that petitioners adopted a policy " 'because of,' not merely 'in spite of,' its adverse effects upon an identifiable group ." Feeney, 442 U.S., at 279, 99 S. Ct. 2282, 60 L. Ed. 2d 870. As such, the allegations are conclusory and not entitled to be assumed true. Twombly, supra, 550 U.S., at 554-555, 127 S. Ct. 1955, 167 L. Ed. 2d 929. To be clear, we do not reject these bald allegations on the ground that they are unrealistic or nonsensical. We do not so characterize them any more than the Court in Twombly rejected the plaintiffs' express allegation of a "'contract, combination or conspiracy to prevent competitive entry,'" id. at 551, 127 S. Ct. 1955, 167 L. Ed. 2d 929, because it thought that claim too chimerical to be maintained. It is the conclusory nature of respondent's allegations, rather than their extravagantly fanciful nature, that disentitles them to the presumption of truth.

Id. at 1951.

determined by the application of either the per se rule or the rule of reason. See *Spectators' Commc'n Network, Inc. v. Colonial Country Club, 253 F.3d 215, 222-23 (5th Cir. 2001)*. If the court determines that the defendant's conduct "would always or almost always tend to restrict competition and decrease output," the restraint is per se illegal and no further inquiry occurs. Id. However, if the conduct is not deemed per se unreasonable, **[**24]** the plaintiff will also have to prove that the conduct unreasonably restrains trade in light of actual market forces under the rule of reason. Id. [9]

Regarding the conspiracy element, the Supreme Court recently observed that "the crucial question [in a § 1 claim] is whether the challenged anticompetitive conduct stems from independent decision or from an agreement." *Twombly, 550 U.S. at 553 127 S. Ct. 1955* (internal quotations omitted). The plaintiff must present evidence that the defendants engaged in concerted **[**25]** action, defined as having "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Concerted action may be shown by either direct or circumstantial evidence. Direct evidence explicitly refers to an understanding between the alleged conspirators, while circumstantial evidence requires additional inferences in order to support a conspiracy claim. See *Tunica Web Adver. v. Tunica Casino Operators Ass'n, 496 F.3d 403, 409 (5th Cir. 2007)*. Independent parallel conduct, or even conduct among competitors that is consciously parallel, does not alone establish the contract, combination, or conspiracy required by *§ 1*. See *Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929*.

As noted *supra*, Plaintiffs "ha[ve] alleged a claim for violation of *Section 1* arising out of two types of conduct: (1) the Defendants' collective and concerted action to fragment and delay Band 12, delaying the development of Band 12 devices and depriving Cellular South and others of roaming; and (2) AT&T's exclusive agreements with manufacturers to produce Band 17 devices, and refusal to sell devices to AT&T's **[**26]** competitors." While, in considering whether Plaintiffs' allegations state an antitrust violation, the Court considers the allegations together, the Court analyzes each allegation separately in order to flesh out all of Plaintiffs' arguments in more detail.

[*802] A. 3GPP and the Creation of Band Class 17

The genesis of Plaintiffs' antitrust claims begins in 2008. Plaintiffs maintain that "AT&T — with the assistance of Motorola and Qualcomm — [ ] caused the 3GPP to create a private band for the benefit of AT&T." During oral argument on this issue, Plaintiffs again reiterated that Motorola "started" the alleged concerted action by proffering a paper at the 2008 3GPP meeting recommending the creation of a separate band class. While Plaintiffs contend that Motorola would never have made its 2008 proposal at 3GPP to create Band Class 17 without the "prior consent, blessing, and agreement of AT&T," Plaintiffs provide no factual support for such a proposition either in the complaint or the response in opposition to Defendants' motions to dismiss. Due to this factual void in Plaintiffs' filings, the Court inquired from Plaintiffs at oral argument what facts they had to support the claim that Motorola **[**27]** recommended the creation of a separate band class based on a prior "agreement" with AT&T. Plaintiffs, instead of providing *facts*, simply maintained that Motorola "had to have talked to AT&T about it." Plaintiffs further stated, "We can be reasonably assured that Motorola did not change AT&T's spectrum because it made a difference to AT&T." Plaintiffs, as to this issue, additionally stated, "That just doesn't happen."

Plaintiffs have articulated the same threadbare allegations concerning Qualcomm as it relates to the creation of Band Class 17 in 2008. Plaintiffs contend that, in June 2008, AT&T and Qualcomm joined Motorola in support of the creation of Band Class 17. According to Plaintiffs, "Qualcomm's support, like Motorola's . . . can only be explained by a preceding agreement with AT&T." Plaintiffs provide *no* factual support for such an assertion. In fact, when

---

[9] Plaintiffs contend that the Court "need not make the determination about whether the per se or rule of reason applies at this juncture since that question need not be decided the context of the current motions." The Court agrees. See *TruePosition, Inc. v. LM Ericsson Telephone Co., 844 F. Supp. 2d 571, 2012 WL 22075, at *18 (E.D. Pa. 2012)* ("We agree with the Defendants that a decision concerning the standard we will use [*i.e.*, rule of reason or per se] to determine whether the restraint on trade is unreasonable is a premature question if the Complaint fails to allege a conspiracy. Therefore, we will reach this question only if we find that TruePosition has sufficiently alleged a conspiracy.").

questioned about whether Plaintiffs had any facts to support the proposition that there was a prior agreement amounting to concerted action, Plaintiffs simply reiterated that Motorola "started it," Qualcomm "supported it," and "they had to have some reason to do it." Plaintiffs continued with this highly speculative and entirely **[**28]** conclusory argument, noting that the parties "had strong motives to act in concert" because they "needed AT&T as a customer."

While Plaintiffs maintain that Qualcomm and Motorola had such "motives" to engage in concerted action, accusations of a motive do not establish a Sherman Act violation, and Plaintiffs provide no factual allegations to plausibly show the existence of an agreement. That is, there are no allegations of when such a purported agreement happened, nor are there facts showing that particular individuals met at particular times, or even what such an alleged agreement entailed. It should go without saying that merely articulating that an agreement "had to have" occurred prior to Motorola's 2008 recommendation to create a separate band class is not a *factual* allegation that raises Plaintiffs' right to relief above the speculative level in accordance with Twombly. See *Twombly, 550 U.S. at 565 n.10, 127 S. Ct. 1955*; *TruePosition, Inc. v. LM Ericsson Tel. Co., 844 F. Supp. 2d 571, 2012 WL 33075, at *21 (E.D. Pa. 2012)*. Even if Motorola, Qualcomm, and AT&T all supported the creation of Band Class 17 during the 3GPP process—due to what each contend is technologically justified because of **[**29]** interference concerns with the Lower A Block—"[c]ircumstantial evidence of parallel behavior must be pled in 'a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.'" *Burtch v. Milberg Factors, Inc., 662 F.3d 212, 226-27 (3d Cir. 2011)* (quoting *Twombly, 550 **[*803]** U.S. at 557, 127 S. Ct. 1955*). "Parallel conduct in itself is insufficient to state a claim for conspiracy because it is 'consistent with conspiracy, but just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions in the market.'" Id. (quoting *Twombly, 550 U.S. at 554, 127 S. Ct. 1955*).

Here, other than Plaintiffs' conclusory statements that an agreement happened regarding the creation of Band Class 17, the only factual allegations provided show that Motorola, Qualcomm, and AT&T participated in the 3GPP process. Yet, the Fifth Circuit has consistently maintained that "it has long been recognized that the establishment and monitoring of trade standards is a legitimate and beneficial function." *Consol. Metal Prods. Inc. v. Am. Petroleum Inst., 846 F.2d 284, 293-94 (5th Cir. 1988)* (finding **[**30]** that though a trade association naturally involves collective action by competitors, it is not by its nature a "walking conspiracy"). In *Golden Bridge Technology, Inc. v. Motorola, Inc., 547 F.3d 266 (5th Cir. 2008)*, the court affirmed summary judgment in a challenge brought by the developer of wireless communications technologies for cellular networks against other members of the 3GPP nonprofit origination. There, Golden Bridge Technology, a member of 3GPP, alleged that the defendants unlawfully conspired not to deal with Golden Bridge in violation of the Sherman Act. Id. The Fifth Circuit, in addressing the function of the 3GPP, noted as follows:

> The standards 3GPP sets allow the numerous necessary components of cellular communications to operate compatibly. Potential procompetitive benefits of standards promoting technological compatibility include facilitating economies of scale in the market for complementary goods, reducing consumer search costs, and increasing economic efficiency. See ABA Section of ***Antitrust Law***, Handbook on the Antitrust Aspects of Standard Setting 10 (2004).

Id.; see also, e.g., *Consolidated Metal Prods., 846 F.2d at 294*; *TruePosition, 844 F. Supp. 2d 571, 2012 WL 33075, at *2* **[**31]** (dismissing antitrust claim based on alleged conspiracy to exclude technology from 3GPP standard).

To be clear, the Court is not holding that joint standard setting cannot be the basis of a Sherman Act violation, as such standard setting has been successfully challenged under *Section 1*. See *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*. Plaintiffs rely heavily on Allied Tube to support their claim. However, *Allied Tube* is quite distinguishable.

In that case, the Supreme Court addressed both the risks and benefits of standard-setting. The case involved a steel manufacturing corporation that set out to convince an SDO not to change its standards in a way that would negatively affect steel manufacturers. *Id. at 495-97, 108 S. Ct. 1931*. The standards setting organization, the National Fire Protection Association, published the National Electric Code each year. Until 1981, the Code had approved only steel as an electrical conduit. When a new material suitable for use as an electrical conduit became available, the steel company rounded up everyone it could to vote against incorporating this new material into the code as another viable **[**32]** material for electrical conduits. Id. (stating the facts). The issue in the case was whether this behavior violated *Section 1* of the Sherman Act by unreasonably restraining trade, or whether the steel company was immune from such liability because it was merely lobbying a legislative body for the result it desired. *Id. at 495, 108 S. Ct. 1931* (citing *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct.* ***[*804]*** *523, 5 L. Ed. 2d 464 (1961)* (providing antitrust immunity for individuals who petition the government to adopt a rule or law that would restrain trade)).

The Court in Allied Tube held that the steel company did not enjoy any such immunity. *Id. at 509-10, 108 S. Ct. 1931*. The Court found that the steel company, which had a clear economic interest in stifling competition from this new material, *was biasing the standard setting process.* It therefore refused to grant the steel company antitrust immunity, and concluded that efforts to influence private standard setting organizations *may* violate antitrust laws. *Id. at 509-10, 108 S. Ct. 1931*.

Unlike *Allied Tube,* which involved a standard setting process that was biased through the use of improper and unfair **[**33]** practices and procedures, see *Clamp-All Corp. v. Cast Iron Soil Pipe Institute, 851 F.2d 478, 488 (1st Cir. 1988)* (Breyer, J.) (discussing Allied Tube), in this case *sub judice*, the Defendants' conduct during the 3GPP process in 2008 is, on its face, lawful. While Plaintiffs argue that Defendants' technical justifications set forth during the 3GPP process are merely pretext for anticompetitive behavior, the 3GPP process was followed to the letter. That is, there are no facts demonstrating procedural irregularities within the process, that the 3GPP process was subverted or turned into a sham, or that the Defendants agreed to employ—or indeed did employ—any improper practices within the standard setting process. The highly complex and technical arguments in favor of creating Band Class 17 were set out in writing for evaluation by experts, and the concerns relating to such creation of Band Class 17 were duly contemplated at 3GPP meetings. The 3GPP acted by a consensus as it relates to the creation of Band Class 17, and there was no objection from any person or entity, including the Plaintiffs and Verizon Wireless, who also holds spectrum licenses in the Lower A Block. As the Court made **[**34]** clear in Golden Bridge,

> We have found it "axiomatic" that a standard setting organization must exclude some products, and such exclusions are not themselves antitrust violations. See *Consol. Metal Prods., 846 F.2d at 294* . To hold otherwise would stifle the beneficial functions of such organizations, as "fear of treble damages and judicial second-guessing would discourage the establishment of useful industry standards." *Id. at 297*. Accordingly, we decline to infer conspiratorial action on the basis of limited circumstantial evidence, particularly where this evidence is at least as consistent with permissible competition, and with independent action, as with unlawful conspiracy. See *Matsushita, 475 U.S. at 588, 106 S. Ct. 1348*.

547 F.3d at 273. Here, Plaintiffs have not alleged plausible facts demonstrating that the 3GPP standard setting process was biased or otherwise subverted, or that the Defendants engaged in any type of conspiracy or concerted action as it relates to the creation Band Class 17.

B. Delaying Development of Band Class 12 Devices

Plaintiffs additionally contend that AT&T agreed with Defendants Motorola and Qualcomm to improperly delay Band Class 12 standards. During oral **[**35]** argument, Plaintiffs attempted to clarify their argument related to the alleged delay of Band Class 12. Plaintiffs maintain that, in order to preserve Band Class 17, the Defendants conspired to delay the finalization of Band Class 12, and that such a threat was made in order to force Cellular South to withdraw its Interoperability Petition filed with the FCC. At the outset, the Court notes that the Plaintiffs, during oral argument, noted that Band Class 12 was, **[*805]** in reality, only "slightly delayed at 3GPP." Plaintiffs made clear that the standards for Band Class 12 were in fact already set prior to "Auction 73," but there were still some "finalizations" to be made. To support its contention that delay was at least threatened, Plaintiffs point to comments made by employees of Qualcomm and Motorola. [10] These comments are as follows:

- First, that a Qualcomm employee (Michael Chard), two years after Band Class 17 was created, stated that there **may be** individuals participating in 3GPP discussions who would oppose amendments to the Band 12 standard. That the same Qualcomm employee also stated that the petition was conflict generator, that there **could be** some blocking of Band 12 by the 3GPP **[**36]** participants that were concerned about the petition, that Qualcomm was concerned that the petition conflicted with the interests of its other carrier partners, and that most of what happens at the RAN 4 3GPP meetings happens before the meeting. [11]
- Second, that another Qualcomm employee (Gene Fong) was asked at a June 2010 3GPP meeting if the petition had caused delays in the advancement of Band 12 standards, and the response was, "I would be lying if I said no . . . but I am still going to do my job." The employee also allegedly stated that Qualcomm's position on the adoption of Band Class 12 standards was subject to external influences. [12]
- Third, that the Vice Chairman of RAN 4, who is also a Motorola employee (Edgar Fernandes), stated that the petition and related filings "have made us hesitant to do anything with Band 12" and that the petition "had gummed up the works." [13]

As it relates to such comments, Plaintiffs first contend that they are "direct evidence" of concerted action taken by the Defendants. Allegations of direct evidence of an unlawful agreement must be "explicit and require[ ] no inferences to establish the proposition or conclusion being asserted." *In re Baby Food Antitrust Litig., 166 F.3d 112, 118 (3d Cir. 1999)*; *Golden Bridge, 547 F.3d at 272* ("Direct evidence explicitly refers to an understanding between the alleged conspirators"); *Tunica, 496 F.3d at 410* (finding that email communications **[**38]** show conspiracy because they contain direct evidence stating that the parties entered into a "gentlemen's agreement" not to deal with another company). Here, unlike *Tunica*, the statements made by Qualcomm and Motorola employees do not constitute direct evidence of any type of conspiracy. Accordingly, the Court reviews such allegations under the standard required for circumstantial evidence.

As discussed above, regarding the conspiracy element, the Supreme Court has **[*806]** observed that "the crucial question [in a § 1 claim] is whether the challenged anticompetitive conduct stems from independent decision or from an agreement." *Twombly, 550 U.S. at 544, 127 S. Ct. 1955*. (internal quotations omitted). A plaintiff must present evidence that the defendants engaged in concerted action, defined as having "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. Plaintiffs here have failed to present evidence of a conspiracy, either to create Band Class 17, or to preserve Band Class 17 by delaying Band Class 12. Plaintiffs have in fact failed to point to any action taken, **[**39]** or any agreement to take action, by any of the Defendants that delayed or resulted in some delay of any Band Class 12 standards, specifications, or technical finalizations. Instead, Plaintiffs cite to comments made by Qualcomm and Motorola employees over a year after Band Class 17 was adopted without objection, that do not refer to any agreement, much less an agreement by the party Defendants to this action. The comments at most can be said to plausibly show that the FCC petition inserted uncertainty or delay into Band Class 12 finalization and "may" have caused certain—unnamed and apparently unknown—members of the

---

[10] The Court notes that Plaintiffs do not point to any comments made by AT&T or any commentary made by any individual referencing any action taken by AT&T.

[11] While a Qualcomm employee allegedly stated that there "could be" blocking by such unnamed 3GPP members, there is no allegation that any blocking actually **[**37]** occurred.

[12] The Court notes that even Plaintiffs' version of this conversion (which is taken as true) only states that the petition itself caused delay in Band 12. The comment from Gene Fong does not state, or even infer, that an "agreement" or a "conspiracy" between any individuals or entities, much less the Defendants to this action, could or would cause such delay.

[13] As noted in relation to the comment made by Gene Fong, the comment made by Edgar Fernandes states that the petition and related filings "gummed up the works." The comment does not state nor infer that any agreement or concerted action by any of Defendants caused or threatened such alleged delay.

world wide 3GPP organization "hesitant" to proceed with Band Class 12 development. The comments do nothing to suggest any "agreement" or conspiracy between Qualcomm, Motorola, and AT&T, much less an unlawful and speculative agreement that "had to have" initially occurred at some unknown time prior to the 2008 3GPP meeting and resulted in three multinational companies submitting numerous public and fraudulent technical papers and related filings to a standard setting organization and the FCC in order to harm Cellular South, a smaller regional carrier. [14]

Plaintiffs additionally cite evidence that Qualcomm initially allegedly announced it would not supply Band Class 12 chips. However, Qualcomm—only one month later— unilaterally and publically announced it would supply such chips. Plaintiffs have provided no factual evidence suggesting there was an agreement between Motorola, AT&T, and Qualcomm not to provide such chips, much less that it was agreed amongst the Defendants—one month later—to change course and supply Band Class 12 chips after all. In fact, both alleged announcements were made publically by Qualcomm. Nevertheless, it is not enough for Cellular South to state Qualcomm initially refused to supply Band Class 12 chips, as Cellular South cannot claim that Qualcomm had an obligation under federal ***antitrust law*** to engage **[**41]** in the immediate development of chips in order to satisfy Cellular South's needs as they related to Band Class 12. Far to the contrary; Cellular South has the burden to allege a plausible *agreement* between the Defendants to delay such Band Class 12 devices and standards. Neither the complaint and memorandum brief nor oral arguments proffered by Plaintiffs plausibly allege such an agreement.

C. Denial of Roaming

Plaintiffs' antitrust allegations also concern AT&T's alleged refusal to provide roaming services [15] access to Cellular **[*807]** South. Plaintiffs maintain that "[b]ased on prior knowledge and experience, AT&T will abuse its monopoly power over 4G-LTE nationwide data roaming in the Lower 700 MHz spectrum to delay or refuse to provide meaningful nationwide roaming." As the very language of Plaintiffs' complaint illustrates, Plaintiffs claims do not challenge any present conduct taken by AT&T. Instead, such a claim is based on allegations that AT&T might, at some point in the future, deny roaming access. In fact, Plaintiffs have yet to request roaming services from AT&T. When questioned about such allegations during oral argument, Plaintiffs maintained that they are asking the Court to "fence **[**42]** [AT&T] in" as it relates to roaming services. The Court finds that such speculative assertions about conduct that may—or may not—occur in the future is not a proper basis for seeking relief here. Just as conclusory allegations that an agreement "had to have" occurred do not plausibly state a claim for relief under Twombly, conclusory speculation regarding what could happen at some unknown date in the future also fails to plausibly state a violation of federal antitrust laws. See *Twombly, 550 U.S. at 555, 127 S. Ct. 1955*.

Additionally, the Court notes that when mobile wireless carriers must provide roaming access is already the subject of FCC regulation, see *47 C.F.R. § 20.12*, and Cellular South has not alleged that AT&T has presently failed to comply with its regulatory obligation to provide roaming access on commercially reasonable terms and conditions. Further, beyond this regulatory obligation, Plaintiffs have not alleged that AT&T has an independent duty under federal antitrust laws to provide roaming services to one particular regional **[**43]** company such as Cellular South. Indeed, such antitrust laws generally do not "'restrict the long recognized right of [a] trader or manufacturer . . . freely to exercise his own independent discretion as to parties with whom he will deal.'" *Verizon Commc'ns Inc. v. Law Offices of Curts V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919))*.

[14] Each of the comments **[**40]** allegedly made occurred after the petition for rulemaking and after each of the Defendants had already set forth in public filings its opposition on technical grounds to the regulatory relief that Cellular South and other carriers had requested. As Cellular South even recognizes, it was publically known that AT&T, Verizon, and numerous others in the industry opposed the regulatory relief requested by Cellular South.

[15] As noted *supra*, roaming services are network services that customers of Cellular South may utilize when outside of Cellular South's service area.

However, as the Trinko Court recognized, "'[t]he high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified.'" *540 U.S. at 408, 124 S. Ct. 872* (quoting *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985))*. "Under certain circumstances, a refusal to cooperate with rivals can constitute anticompetitive conduct and violate *§ 2*." *Trinko, 540 U.S. at 408, 124 S. Ct. 872*. The Supreme Court, however, has been "very cautious in recognizing such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm." Id. The leading case for *§ 2* **[**44]** liability based on refusal to cooperate with a rival is Aspen Skiing, a case upon which all parties to this litigation understandably devote time to discussing.

The Aspen ski area consisted of four mountain areas. *Aspen Skiing, 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467*. The defendant in Aspen Skiing, who owned three of those areas, and the plaintiff, who owned the fourth, had cooperated for years in the issuance of a joint, multiple-day, all-area ski ticket. After repeatedly demanding an increased share of the proceeds, the defendant canceled the joint ticket. The plaintiff, concerned that skiers would bypass its mountain without some joint offering, tried a variety of increasingly desperate measures to re-create the joint ticket, even to **[*808]** the point of in effect offering to buy the defendant's tickets at retail price. *Id. at 593-94, 105 S. Ct. 2847*. The defendant refused even that. The Supreme Court upheld a jury verdict for the plaintiff, reasoning that "[t]he jury may well have concluded that [the defendant] elected to forgo these short-run benefits because it was more interested in reducing competition . . . over the long run by harming its smaller competitor." *Id. at 608, 105 S. Ct. 2847*.

As **[**45]** the Trinko Court expressly made clear, "Aspen Skiing is at or near the outer boundary of *§ 2* liability." *Trinko, 540 U.S. at 409, 124 S. Ct. 872*. The Court in Aspen Skiing found significance in the defendant's decision to cease participation in a cooperative venture. *Aspen Skiing, 472 U.S. at 608, 610-11, 105 S. Ct. 2847*. The Court found that the unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggested a willingness to forsake short-term profits to achieve an anticompetitive end. Id. Similarly, the Court concluded that the defendant's unwillingness to renew the ticket even if compensated at retail price revealed a distinctly anticompetitive bent. Id. Moreover, in Aspen Skiing, the defendant turned down a proposal to sell at its own retail price, suggesting a calculation that its future monopoly retail price would be higher. Id.

In the case *sub judice*, the claims related to an alleged refusal to deal do not fit within the "limited exception" recognized by *Aspen Skiing*. *Trinko, 540 U.S. at 409, 124 S. Ct. 872*; see also *Four Corners Nephrology Assocs., P.C. v. Mercy Med. Ctr. of Durango, 582 F.3d 1216, 1224-25 (10th Cir. 2009)* (quoting *Trinko, 540 U.S. at 409, 124 S. Ct. 872*) **[**46]** (emphasis in original) ("Aspen Skiing controls *only* where the monopolist's 'unilateral termination of a voluntary (and thus presumably profitable) course of dealing suggest[s] a willingness to forsake short-term profits to achieve an anticompetitive end.'"); *In re Elevator Antitrust Litig., 502 F.3d 47, 53-54 (2nd Cir. 2007)* (per curiam) (noting that termination after prior course of dealing is "sole exception to the right of refusal to deal"). That is, a speculative and entirely conjectural refusal to provide roaming access to Cellular South at some unknown point in the future does not state a claim under federal antitrust laws in this case.

Along the same lines, Plaintiffs have not alleged how a speculative future dispute over roaming access with one particular regional carrier could give rise to competition as a whole. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("[A]ntitrust laws . . . were enacted for the protection of competition, not competitors.") (internal quotations omitted); *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 458, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)* ("The purpose of the [Sherman] Act is not **[**47]** to protect businesses from the working of the market; it is to protect the public from the failure of the market."). Accordingly, Plaintiffs' allegations concerning AT&T's alleged refusal to allow roaming services fail, as such arguments do not challenge any present conduct, provide concrete factual evidence that there is a threat of such conduct in the future, allege that AT&T has a duty under federal ***antitrust law*** to provide such access, or factually allege how some possible future refusal to provide roaming to Cellular South will harm competition.

D. Exclusive Agreements

Plaintiffs also base their antitrust claims on alleged exclusive dealing arrangements. That is, Plaintiffs proffer that, "on information and belief, Cellular South believes that AT&T has secured its 4G-LTE devices on an exclusionary basis." Plaintiffs contend that "[u]pon information **[*809]** and belief, AT&T has entered into formal and informal understandings with manufacturers that limit the ability of those manufacturers to provide 4G-LTE devices to smaller carriers such as Cellular South and Corr Wireless on a timely basis." Both Plaintiffs' brief in opposition to Defendants' motions to dismiss and the contentions made **[**48]** at oral argument on the allegations of exclusive agreements illustrate why Twombly's plausibility standard is crucial in antitrust cases, as well as other forms of litigation. It is clear from Plaintiffs' own admissions in this case that Plaintiffs cannot plausibly allege any such agreements are actually in existence. In fact, Plaintiffs have not named a single manufacturer that has entered into an exclusive agreement—or is considering entering into such an agreement—with AT&T.

Instead, Plaintiffs assert that the "existence and [ ] content" of such alleged agreements "are known (at least before the parties to this litigation have conducted discovery) solely to the defendants." As such a statement makes clear, Plaintiffs apparently seek to utilize discovery in order to establish whether such agreements exist. That is, Plaintiffs request this Court to allow enormously expensive and protracted antitrust discovery to proceed in order so that Plaintiffs may "discover" whether they have claim for purported exclusive dealing agreements between AT&T and such unnamed manufacturers. But, as the Court in Twombly made clear in applying the plausibility standard to a Sherman Act claim, "stating **[**49]** such a claim requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *550 U.S. at 556, 127 S. Ct. 1955*. Plaintiffs' complaint in this action provides no factual matter to infer an agreement "was made." Instead, Plaintiffs concede that their complaint rests on factual matter currently not known, and Plaintiffs' contention that "[w]hether such agreements exist now is a red herring" is directly contrary both to Twombly and basic pleading standards. Federal *Rule 8(a)(2)*— even before Twombly articulated its plausibility standard—requires Plaintiffs to set forth a "'plain statement' possess[ing] enough heft to 'sho[w] that the pleader is entitled to relief.'" Id. (quoting *Fed. R. Civ. P. 8(a)(2)*). That is, *Rule 8(a)(2)* does not state that plaintiffs may set forth a plain statement showing they might be entitled to relief if they can engage in discovery and such discovery reveals the existence and content of an agreement, and such agreement is unlawful and runs afoul of federal antitrust laws. If *Rule 8(a)(2)* allowed a pleader to overcome a motion to dismiss for failure to state a claim simply by stating that discovery could reveal such a claim, even **[**50]** though the "existence and content" of the claim is not yet known, Federal *Rule 12(b)(6)* would become utterly futile.

Antitrust litigation is expensive, see *Twombly, 550 U.S. at 558, 127 S. Ct. 1955*; *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed."), [16] and while it does **[*810]** not require heightened fact pleading of specifics, there must be enough facts to "state a claim of relief that is plausible on its face." *Twombly, 550 U.S. at 570, 127 S. Ct. 1955*. Plaintiffs here have not alleged a plausible claim based on exclusive dealing by AT&T, and Plaintiffs' allegations that AT&T might, at some unknown time in the future, enter into such agreements is a naked speculation that the Court shall not presume is or will become true absent factual evidence to support such. Likewise, while Plaintiffs contend that such agreements—assuming they unlawfully exist—would harm competition, Plaintiffs' complaint fails to allege facts in support of this. That is, there is no allegation **[**51]** of the scope of this particular market, the number of potential manufacturers, or the terms and duration of such alleged exclusive agreements. Accordingly, the Court finds Plaintiffs' complaint fails to plausibly state a claim based on alleged exclusive dealing agreements entered into by AT&T.

Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984)* ("[T]he costs of modern federal antitrust litigation and the increasing caseload of the federal courts counsel against sending the parties into discovery when there is no reasonable likelihood that the plaintiffs can construct a claim from the events related in the complaint"); Note, Modeling the Effect of One-Way Fee Shifting on Discovery Abuse in Private Antitrust Litigation, *78 N.Y. U. L. Rev. 1887, 1898-1899 (2003)* (discussing the unusually high cost of discovery in antitrust cases); Manual for Complex Litigation, Fourth, § 30, p. 519 (2004) (describing extensive scope of discovery in antitrust cases); Memorandum from Paul V. Niemeyer, Chair, Advisory Committee on Civil Rules, to Hon. Anthony J. Scirica, Chair, Committee on Rules of Practice and Procedure (May 11, 1999), 192 F.R.D. 354, 357 (2000) (reporting **[**52]** that discovery accounts for as much as 90 percent of litigation costs when discovery is actively employed).

***Section 2* Claim**

Plaintiffs' complaint further alleges that AT&T is also liable under *Section 2* of the Sherman Act. Plaintiffs contend that, in assessing *Section 2* liability, "AT&T's conduct must be considered as a whole - including the creation of Band 17, the agreements with device manufacturers, and AT&T's pattern of conduct designed to deprive competitors of roaming access." *Section 2* of the Sherman Act establishes a cause of action against single firms that monopolize, or attempt to monopolize, or conspire to monopolize, "any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*; *Stewart Glass & Mirror, Inc. v. U.S. Auto Glass Discount Ctrs., Inc., 200 F.3d 307, 315 (5th Cir. 2000)*; *C.A.T. Indus. Disposal, Inc. v. Browning-Ferris Indus., Inc., 884 F.2d 209, 210 (5th Cir. 1989)*. The Court addresses all three causes of action, and concludes that Plaintiffs' complaint fails to state a claim against AT&T under *Section 2* of the Sherman Act.

A. Conspiracy to Monopolize

The Court begins by addressing Plaintiffs' conspiracy to monopolize claim. **[**53]** Such a claim can be established only by proof of (1) the existence of specific intent to monopolize; (2) the existence of a combination or conspiracy to achieve that end; (3) overt acts in furtherance of the conspiracy; and (4) an effect upon a substantial amount of interstate commerce. *Stewart Glass & Mirror, Inc., 200 F.3d at 316*. Such proof is nonexistent here. As the Court's analysis under *Section 1* demonstrates, Plaintiffs have failed to plead sufficient plausible facts of any agreement or conspiracy, anticompetitive or otherwise, between the Defendants. Because a conspiracy to monopolize claim requires joint action, Plaintiffs' deficiencies are fatal to their *Section 2* claim. Accordingly, Plaintiffs' claims under *Section 2* of the Sherman Act for conspiracy to monopolize shall also be dismissed.

B. Attempted Monopolization and Monopolization

Next, the Court addresses the claims of attempted monopolization and monopolization. In order to prevail on an attempt to monopolize claim under *section 2*, a plaintiff must prove that (1) the defendant has engaged in predatory or anti-competitive conduct with (2) a specific intent to monopolize and (3) a dangerous **[*811]** probability of achieving monopoly **[**54]** power. See *Salts v. Moore, 107 F. Supp. 2d 732, 743 (N.D. Miss. 2000)*. "Unfair or predatory conduct may be sufficient to prove the necessary intent to monopolize." Id. However, intent alone is insufficient to establish the dangerous probability of success, which requires inquiry into the relevant product and geographic market and the defendant's economic power in that market. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247* (citing *Swift & Co. v. United States, 196 U.S. 375, 396, 25 S. Ct. 276, 49 L. Ed. 518 (1905)*). "Thus, Defendants may not be liable for attempted monopolization under *§ 2* of the Sherman Act absent proof of a dangerous probability that they would monopolize a particular market and specific intent to monopolize." *Salts, 107 F. Supp. 2d at 743*.

Plaintiffs' complaints against AT&T concern allegations of exclusion from the Lower A Block 700 MHz "competitive playing field." Plaintiffs base such allegations on "three different but related types of conduct." This conduct, as quoted by Plaintiffs, is as follows:

- By creating Band 17, AT&T has excluded smaller carriers seeking to use Lower A Block spectrum from competition by denying **[**55]** them access to Band 12 devices and roaming access. AT&T acted with the other Defendants so this conduct is actionable under *Section 1* and as a conspiracy to monopolize subject to *Section 2*. Wholly apart from its actions in concert with the other Defendants, AT&T's conduct in creating and using Band 17 unilaterally is actionable as actual and attempted monopolization under *Section 2*.
- In addition, AT&T has exacerbated the effect of the creation of Band 17 by continuing its prior practice of entering into exclusive arrangements with manufacturers of wireless devices and extending it to 4G-LTE devices, with the purpose and intent of denying smaller carriers access to devices.

• Finally, by creating Band 17, AT&T has now created at least a pretextual, and perhaps a real, incompatibility that provides AT&T an excuse for denying nationwide 4G-LTE roaming to carriers using Lower 700 MHz spectrum. Moreover, AT&T's exploitation of what is effectively a private wireless ecosystem within Band 17 may enable it to build additional technical incompatibility into its network over and above that required by the difference in frequencies used by Band 12 and Band 17. Even if the Court requires AT&T to **[**56]** eliminate all of those technological incompatibilities, AT&T may continue the denial of roaming that is now occurring by the next step in the plan — simply refusing to allow roaming on any feasible basis.

The Court has already addressed many of Plaintiffs' allegations under its Section 1 analysis. First, even accepting all factual allegations as true, the Court concludes that Plaintiffs have failed to state a plausible antitrust violation as it relates to the creation of Band Class 17. In fact, the only factual evidence presented as it relates to AT&T's actions regarding the creation of Band Class 17 is that AT&T supported Motorola's position on the issue during the 3GPP standard setting process. [17] There is no reference to any action AT&T has taken, other than its participation **[*812]** in the 3GPP, which would demonstrate anticompetitive conduct or a specific intent to monopolize. That is, there is no factual allegation that AT&T subverted or manipulated the 3GPP process to create or strengthen monopoly power. Instead, the facts alleged show that AT&T, as one company among hundreds, participated in the 3GPP process, which acted by a consensus without objection as to Band Class 17. Plaintiffs' **[**57]** amended complaint, which adds a new theory of purported intent driving AT&T's actions, does not cure this factual pleading deficiency.

In Plaintiffs' amended complaint, it is alleged that AT&T's "motives in creating Band 17 have become even clearer in light of two recent statements of AT&T's Chief Executive Officer." The statement Plaintiffs rely on is included in Plaintiffs' complaint and is as follows:

> Yeah, most of your other large economies — and you can go through it, whether it be Korea or the large economies in Europe, Japan — there are much fewer numbers of competitors in those markets, so therefore you have a more rational allocation of spectrum. But, you know, I don't know what the optimal number is; I'm not into industrial design or industrial planning. I think our policymakers, whether it be the Department of Justice or the FCC, has got to come to a realization that the current structure **[**58]** will not accommodate what they want to do in terms of growing these services and these capabilities. It is — obviously, the more competitors you have, the less efficient the allocation of the spectrum will be. It just — that's mathematical. And, obviously, you know, there's probably an optimal place in there; I think the markets are more than capable of kind of sorting that out. But it's going to have to change; whether they want it to change, or not, it will probably change. I don't think the market is going to accommodate the number of competitors that are currently in the marketplace. [18]

Based on this statement, Plaintiffs maintain that AT&T sought to develop Band Class 17 in order to devalue the Lower A Block, and then purchase it for a lower price years later. Thus, Plaintiffs maintain that AT&T defrauded both the FCC and the 3GPP in order to make the Lower A Block spectrum available for purchase at a cheaper price. Such an allegation is based on layer after layer of factual speculation as to make the theory utterly implausible.

• First, the Court would have to assume, without factual support, that AT&T intentionally did not bid on the Lower A Block spectrum during the FCC auction **[**59]** in 2008 but, instead, concocted and launched a conspiracy with Motorola and Qualcomm to allow other entities, including Verizon, to buy the spectrum.

---

[17] As discussed *supra*, while Plaintiffs proffer, under their Section 1 claim, that an agreement between AT&T and Motorola "had to have" happened prior to Motorola's proposal in 2008 to create a separate band class, there is not a single factual allegation supporting such a conclusory assertion.

[18] See Transcript of Milken Institute 2012 Global Conference, April 29-May 2, 2012, Los Angeles, A Conversation With AT&T's Randall Stephenson (11:00 AM-Wednesday May 2, 2012, at p. 2).

• Second, the Court would have to infer, without factual support, that AT&T, purportedly with the help or assent of the other Defendants, had the intent to devalue this spectrum by submitting numerous and public fraudulent technical submissions and related filings to both 3GPP and the FCC.
• Third, the Court would have to assume, without factual support, that Motorola and Qualcomm, among others, joined in AT&T's concocted scheme to defraud both 3GPP and the FCC by also submitting fraudulent public submissions.

[*813] • Fourth, the Court would have to accept, without factual support, that Verizon, the largest holder of A Block spectrum and a major competitor of AT&T, simply acquiesced to the actions taken by AT&T at 3GPP that were, according to Plaintiffs, taken to devalue the very spectrum it had just purchased. [19]

• Fifth, the Court would have to assume, without factual support, that AT&T engaged in this conduct with the foresight that the Lower A Block spectrum would be devalued, thus allowing AT&T the ability to possibly purchase the spectrum **[**60]** from A Block carriers four years later for a lower price.
Such suggestions based on entirely unsupported factual predicates create only implausible speculations. Moreover, inserting into an amended complaint a factually unsupported yet possible "motive" on AT&T's part does not establish an antitrust violation.

As it relates to Plaintiffs' claims of exclusionary conduct, the Court has already addressed Plaintiffs' allegations regarding AT&T's alleged exclusive agreements with manufacturers. Other than providing a blanket assertion that such agreements exist and/or will exist at some unknown time in the future, Plaintiffs provide no facts plausibly supporting such an allegation. Plaintiffs' speculative claims concerning roaming access are also discussed in more detail above and they fall on the same footing as Plaintiffs' allegations related to exclusive dealing agreements. The complaint does **[**61]** not allege that AT&T has ever denied Cellular South the opportunity to roam, or that AT&T even has a duty under ***antitrust law***—as opposed to a regulatory obligation from the FCC—to allow Cellular South to do so.

Plaintiffs' claims of monopolization, as distinguished from attempted monopolization, also fail. As noted, *Section 2* of the Sherman Act declares that a firm shall not "monopolize" or "attempt to monopolize." It is settled law that this offense requires, in addition to the possession of monopoly power in the relevant market, "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Trinko, 540 U.S. at 407, 124 S. Ct. 872*. "The mere possession of monopoly power . . . is not only not unlawful; it is an important element of the free-market system." *Trinko, 540 U.S. at 407, 124 S. Ct. 872*. As the Supreme Court has made clear, "[t]o safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of **[**62]** anticompetitive *conduct.*" Id. (emphasis in original). Plaintiffs' complaint is void of plausible factual allegations illustrating anticompetitive conduct on the part of AT&T. While Plaintiffs' complaint details, in 146 pages, its allegations and the background leading up to this action, Twombly does not require longer complaints. *Twombly*, instead, requires that a complaint state enough facts, as opposed to conclusions, so that relief is plausible. That is, Plaintiffs must "nudge[] their claims across the line from conceivable to plausible." Plaintiffs have failed to do so here.

Conclusion

For the foregoing reasons, Defendants' motions to dismiss for failure to state a **[*814]** claim brought pursuant to *Federal Rule of Civil Procedure 12(b)(6)* shall be granted. Because the Court has concluded that such motions are due to be granted, Defendants' motions to dismiss pursuant to the doctrine of primary jurisdiction are deemed moot.

SO ORDERED, this the 31st day of August, 2012.

---

[19] For clarification, the Court notes that Verizon did not object to the creation of Band Class 17 at 3GPP in 2008.

/s/ Sharion Aycock

U.S. DISTRICT JUDGE

Davis v. HSBC Bank

United States Court of Appeals for the Ninth Circuit

February 6, 2012, Argued and Submitted, Pasadena, California; August 31, 2012, Filed

No. 10-56488

Reporter

691 F.3d 1152 *; 2012 U.S. App. LEXIS 18503 **; 2012 WL 3804370

GARY DAVIS, an individual on behalf of himself, as Private Attorney General and on behalf of all others similarly, Plaintiff-Appellant, v. HSBC BANK NEVADA, N.A., a National Bank; BEST BUY CO., INC., a Minnesota corporation; BEST BUY STORES, L.P., a Virginia limited partnership; HSBC FINANCE CORPORATION, a Delaware corporation, Defendants-Appellees.

Subsequent History: As Corrected September 18, 2012.

Prior History: **[**1]** Appeal from the United States District Court for the Central District of California. D.C. No. 2:08-cv-05692-GHK-JC. George H. King, District Judge, Presiding.

Davis v. HSBC Bank Nev., N.A., 557 F.3d 1026, 2009 U.S. App. LEXIS 4043 (9th Cir. Cal., 2009)

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Standards of Review, De Novo Review**

An appellate court reviews de novo a district court's order granting a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*. To survive dismissal, the complaint must allege enough facts to state a claim to relief that is plausible on its face. Factual allegations must be enough to raise a right to relief above the speculative level. The appellate court must accept all factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party. At the same time, the appellate court can affirm a *Rule 12(b)(6)* dismissal on any ground supported by the record, even if the district court did not rely on the ground.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN2[] **Standards of Review, Abuse of Discretion**

The court's relevant case law has recognized consistently that the district court may, but is not required to incorporate documents by reference. A court "may consider" evidence that is incorporated by reference. The incorporation doctrine "permits" the court to consider extrinsic documents. A document may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. Additionally, *Fed. R. Civ. P. 12(b)(6)* specifically gives courts the discretion to accept and consider extrinsic materials offered in connection with these motions, and to convert the motion to one for summary judgment when a party has notice that the district court may look beyond the pleadings. Thus, the court has held, for example, that a district court's decision to take judicial notice of extrinsic evidence shall be reviewed for abuse of discretion.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Authentication > General Overview

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > General Overview

HN3[] **Motions to Dismiss, Failure to State Claim**

Under the "incorporation by reference" doctrine in the Ninth Circuit, a court may look beyond the pleadings without converting the *Fed. R. Civ. P. 12(b)(6)* motion into one for summary judgment. Specifically, courts may take into account documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the plaintiff's pleading. A court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Authentication > General Overview

HN4[] **Motions to Dismiss, Failure to State Claim**

In the context of the "incorporation by reference" doctrine, whether or not a party had access to and reviewed the proffered documents is a matter unrelated to their authenticity — i.e., whether the documents are "what its proponent claims."

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

In the context of the "incorporation by reference" doctrine, a party's ongoing and substantial reliance on documents as a basis for his allegations substantially weakens his position.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Authentication > General Overview

HN6[] **Motions to Dismiss, Failure to State Claim**

Where the party opposing incorporation by reference argues only that he did not review or have access to the proffered copies, this does not amount to a challenge to those documents' authenticity.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Authentication > General Overview

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN7[] **Motions to Dismiss, Failure to State Claim**

Where an appellant failed to assert an objection as to authenticity before the district court, he has waived this objection on appeal.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN8[] **False Advertising, State Regulation**

California's False Advertising Law, *Cal. Bus. & Prof. Code § 17500 et seq.*, makes it unlawful for any person to induce the public to enter into any obligation based on a statement that is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. *Cal. Bus. & Prof. Code § 17500*. Whether an advertisement is "misleading" must be judged by the effect it would have on a reasonable consumer. Unless the advertisement targets a particular disadvantaged or vulnerable group, it is judged by the effect it would have on a reasonable consumer. A reasonable consumer is the ordinary consumer acting reasonably under the circumstances. To prevail under this standard, a plaintiff must show that members of the public are likely to be deceived by the advertisement. In applying this test, the court is mindful that whether a business practice is deceptive will usually be a question of fact not appropriate for decision on a motion to dismiss.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN9[] **False Advertising, State Regulation**

California courts construe *Cal. Bus. & Prof. Code § 17500* to extend beyond literal falsities. The statute has been interpreted broadly to encompass not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. Consequently, even a perfectly true statement couched in such a manner that it is likely to mislead or deceive the consumer, such as by failure to disclose other relevant information, is actionable under this section.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN10[] **False Advertising, State Regulation**

In the context of *Cal. Bus. & Prof. Code § 17500*, a representation does not become "false and deceptive" merely because it will be unreasonably misunderstood by an insignificant and unrepresentative segment of the class of persons to whom the representation is addressed.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN11[] **Actual Fraud, Elements**

The elements of a cause of action for fraud in California are: (a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or "scienter"); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN12[] **Nondisclosure, Elements**

Under California law, a claim for fraudulent concealment requires that: (1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN13[] **Jury Trials, Province of Court & Jury**

In an action for fraud under California law, recovery shall be denied if the conduct of the plaintiff in relying upon a misrepresentation in the light of his own intelligence and information was manifestly unreasonable. To establish manifest unreasonableness, it must appear that the plaintiff put faith in representations that were preposterous or shown by facts within his observation to be so patently and obviously false that he must have closed his eyes to avoid discovery of the truth. The court bears in mind, however, that whether reliance on a misrepresentation was reasonable is a question of fact for the jury, and may be decided as a matter of law only if the facts permit reasonable minds to come to just one conclusion.

Contracts Law > Defenses > Failure to Read Contract

Torts > ... > Fraud & Misrepresentation > Actual Fraud > General Overview

HN14[] **Defenses, Failure to Read Contract**

California courts have held that where the parties to an agreement deal at arm's length, it is not reasonable to fail to read a contract before signing it. There can be no reasonable reliance where the plaintiff, dealing at arm's length, had a reasonable opportunity to discover the true terms of the contract but simply failed to read the contract before signing it.

Banking Law > Consumer Protection > Truth in Lending > General Overview

HN15[] **Consumer Protection, Truth in Lending**

The Truth in Lending Act and its implementing regulations require "absolute compliance" by creditors.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN16[] **Trade Practices & Unfair Competition, State Regulation**

The California Supreme Court has explained the "safe harbor" doctrine in this way: Although the Unfair Competition Law's, *Cal. Bus. & Prof. Code § 17200 et seq.*, scope is sweeping, it is not unlimited. Specific legislation may limit the judiciary's power to declare conduct unfair. If the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination. When specific legislation provides a "safe harbor," plaintiffs may not use the general unfair competition law to assault that harbor. Under the safe harbor doctrine, to forestall an action under the Unfair Competition Law, another provision must actually "bar" the action or clearly permit the conduct.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN17[] **Truth in Lending, Disclosure**

The Truth in Lending Act requires that applications for an account under an open end consumer credit plan must include certain disclosures. *15 U.S.C.S. § 1637(c)*. Where the application is provided online and contains "specific information" about the terms and conditions, the application must disclose, among other things, any annual fee, other periodic fee, or membership fee imposed for the issuance or availability of a credit card, including any account maintenance fee or other charge imposed based on activity or inactivity for the account during the billing cycle. *15 U.S.C.S. § 1637(c)(1)(A)(ii)(I)*, *(c)(3)(B)(i)(I)*. The disclosure must appear "clearly and conspicuously" in the tabular format commonly referred to as the Schumer Box. *15 U.S.C.S. § 1632(a)*, *(c)(2)*.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN18[] **Truth in Lending, Disclosure**

The Truth in Lending Act delegates to the Board of Governors of the Federal Reserve Bank (Board) the duty to implement the disclosure requirements and to prescribe regulations governing the "form and manner" of the disclosures. *15 U.S.C.S. § 1632(c)(1)(A)*. Accordingly, the Board has promulgated "Regulation Z," *12 C.F.R. § 226.1 et seq.*, which imposes "even more precise" disclosure requirements. Regulation Z requires lenders to provide specific disclosures on or with a solicitation or an application to open a credit or charge card account. *12 C.F.R. § 226.5a(a)*, *(b)*. In pertinent part, the lender must disclose any annual or other periodic fee that may be imposed for the issuance or availability of a credit or charge card, including any fee based on account activity or inactivity; how frequently it will be imposed; and the annualized amount of the fee. *12 C.F.R. § 226.5a(b)(2)(i)*.

Further, the disclosure shall be in the form of a table with headings, content, and format substantially similar to any of the applicable tables found in G-10 in appendix G to this part. *12 C.F.R. § 226.5a(a)(2)(i)*.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN19[] **Truth in Lending, Disclosure**

In the context of the Truth in Lending Act, both the statute and the regulations clearly permit, and indeed require with equal force, the disclosure of any annual fee in an application for a credit card.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN20[] **Federal & State Interrelationships, Erie Doctrine**

In a case requiring a federal court to apply California law, the court must apply the law as it believes the California Supreme Court would apply it.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN21[] **Trade Practices & Unfair Competition, State Regulation**

Regarding whether the Unfair Practices Act provides a safe harbor to shield certain business conduct from liability under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, while an express statutory provision permitting specific conduct would be sufficient to create a safe harbor, the Legislature's mere failure to prohibit an activity does not prevent a court from finding it unfair. If no statute provides a safe harbor, the court must decide whether the alleged misconduct violates the UCL. The court rejects the notion that this last passing reference established a bright-line rule that only statutes can create safe harbors. Instead, the court understands the California Supreme Court to be outlining its analysis in the context of the case before it, which concerned only a potential statutory safe harbor. Furthermore, even if the Legislature's mere failure to prohibit an activity does not create a safe harbor, this does not preclude the possibility that one might arise where an implementing regulation clearly permits that activity.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Medical Treatment > Patient Confidentiality > Medical Records Under HIPAA

HN22[] **Trade Practices & Unfair Competition, State Regulation**

If HIPAA regulations intended to permit a defendant's conduct, it cannot be "unfair" under *Cal. Bus. & Prof. Code § 17200*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN23[] **Trade Practices & Unfair Competition, State Regulation**

California intermediate courts agree with the conclusion that regulations can create safe harbors. Most recently, the state appellate court discussed approvingly the United States Court of Appeals for the Ninth Circuit's decision in Alvarez v. Chevron Corp., where the Ninth Circuit held that California gasoline regulations created a safe harbor against the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN24[] **Trade Practices & Unfair Competition, State Regulation**

In the context of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, even if regulations cannot create safe harbors, federal statutes can.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN25[] **Trade Practices & Unfair Competition, State Regulation**

A credit card issuer's compliance with the Truth in Lending Act's disclosure requirements provides a safe harbor with respect to a plaintiff's Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, claims based only on the sufficiency of the issuer's disclosures.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN26[] **Trade Practices & Unfair Competition, State Regulation**

In the context of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, the California Supreme Court has explained that when specific legislation affirmatively permits conduct, courts may not simply impose their own notions of the day as to what is fair or unfair. In other words, the safe harbor doctrine protects specific conduct not because of its provenance, but because the content of the conduct itself is deemed "fair" as a matter of law.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN27[] **Truth in Lending, Disclosure**

The Truth in Lending Act and Regulation Z, *12 C.F.R. § 226.1 et seq.*, expressly permit and require that online credit card applications disclose the annual fee in a prescribed manner.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN28[] **Trade Practices & Unfair Competition, State Regulation**

In the context of the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, it is the conduct, not the actor, that the safe harbor embraces. If the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination. To forestall an action under the UCL, another provision must actually "bar" the action or clearly permit the conduct. Acts that the Legislature has determined to be lawful may not form the basis for an action under the UCL. Courts may not use the UCL to condemn actions the Legislature permits.

Administrative Law > Judicial Review > Standards of Review > Rule Interpretation

Banking Law > Consumer Protection > Truth in Lending > General Overview

HN29[] **Standards of Review, Rule Interpretation**

Under Regulation Z, *12 C.F.R. § 226.1 et seq.*, a "solicitation" is defined as an offer by the card issuer to open a credit or charge card account that does not require the consumer to complete an application. *12 C.F.R. § 226.5a(a)(1)*. In other words, a solicitation is an offer made to a consumer who is pre-approved to be a cardholder and therefore need not undergo the credit approval process to acquire the card. This reading comports with the agency's official staff interpretation, which explains that where a card issuer merely contacts a consumer who has not been preapproved for a card account about opening an account and invites the consumer to complete an application, such a contact does not meet the definition of solicitation, unless the contact itself includes an application form in a direct mailing, electronic communication or "take-one"; an oral application in a telephone contact initiated by the card issuer; or an application in an in-person contact initiated by the card issuer. Div. of Consumer and Cmty. Affairs of the Fed. Reserve Bd., Official Staff Comm., 12 C.F.R. pt. 226, supp. I, *§ 226.5a* cmt. 5a(a)(1). The court has been directed to treat these official staff interpretations of Regulation Z as controlling unless demonstrably irrational.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN30[] **Trade Practices & Unfair Competition, State Regulation**

In the context of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, to fall under a safe harbor, the omission of an annual disclosure from advertisements must be expressly permitted by some other provision. It is not enough if the Truth in Lending Act (TILA) and Regulation Z, *12 C.F.R. § 226.1 et seq.*, merely fail to prohibit such an omission. However, the court has not located any provision in TILA, Regulation Z, or elsewhere that clearly permits the omission of the annual fee disclosure from such advertisements. Instead, Regulation Z only specifies that if the advertisement sets forth a specific credit term that "triggers" additional disclosure, such as a finance charge, then the advertisement shall also clearly and conspicuously set forth, among other items, the annual membership fee. *12 C.F.R. § 226.16(b)*; Official Staff Comm., 12 C.F.R. pt. 226, supp. I, *§ 226.16(b)(1)* cmt. 6. Thus, the court cannot conclude that some provision affirmatively permits the absence of the annual fee disclosure from the advertisements.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN31[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, prohibits "unfair competition," which is broadly defined to include three varieties of unfair competition — acts or practices which are unlawful, or unfair, or fraudulent. Because the statute is written in the disjunctive, it is violated where a defendant's act or practice violates any of the foregoing prongs.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN32[] **Trade Practices & Unfair Competition, State Regulation**

To be "unlawful" under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, the advertisements must violate another "borrowed" law. *Cal. Bus. & Prof. Code § 17200* borrows violations of other laws and treats them as unlawful practices that the UCL makes independently actionable. Virtually any state, federal or local law can serve as the predicate for an action under *§ 17200*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Banking Law > Types of Banks & Financial Institutions > National Banks > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN33[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

OCC regulation *12 C.F.R. § 7.4008(c)* states that a national bank shall not engage in unfair or deceptive practices within the meaning of § 5 of the Federal Trade Commission Act, *15 U.S.C.S. § 45(a)(1)*, and regulations promulgated thereunder in connection with loans made under this *§ 7.4008*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN34[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

A practice is deceptive under Federal Trade Commission Act § 5, *15 U.S.C.S. § 45*, *(1)* if it is likely to mislead consumers acting reasonably under the circumstances (2) in a way that is material.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN35[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

A practice is "unfair" under Federal Trade Commission Act § 5, *15 U.S.C.S. § 45*, only if it causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition. *15 U.S.C.S. § 45(n)*. In determining whether consumers' injuries were reasonably avoidable, courts look to whether the consumers had a free and informed choice. An injury is reasonably avoidable if consumers have reason to anticipate the impending harm and the means to avoid it, or if consumers are aware of, and are reasonably capable of pursuing, potential avenues toward mitigating the injury after the fact.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN36[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

In the context of *15 U.S.C.S. § 45*, the question is not whether subsequent mitigation was convenient or costless, but whether it was "reasonably possible."

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN37[] **Trade Practices & Unfair Competition, State Regulation**

A business practice is fraudulent under the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, if members of the public are likely to be deceived. The challenged conduct is judged by the effect it would have on a reasonable consumer.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN38[] **Trade Practices & Unfair Competition, State Regulation**

The Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, does not define the term "unfair." In fact, the proper definition of "unfair" conduct against consumers is currently in flux among California courts. Before Cel-Tech, courts held that "unfair" conduct occurs when that practice offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers. Under this approach, courts must examine the practice's impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In short, this balancing test must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN39[] **Trade Practices & Unfair Competition, State Regulation**

Regarding "unfair" conduct under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, Cel-Tech held that the balancing test was "too amorphous" and provided too little guidance to courts and businesses. Instead, the California Supreme Court held that "unfair" means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. It further required that any finding of unfairness to competitors under *Cal. Bus. & Prof. Code § 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition. However, the California Supreme Court expressly limited its new test to actions by competitors alleging anti-competitive practices, emphasizing that nothing the California Supreme Court says relates to actions by consumers or by competitors alleging other kinds of violations of the UCL such as "fraudulent" or "unlawful" business practices or "unfair, deceptive, untrue or misleading advertising."

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN40[] **Trade Practices & Unfair Competition, Federal Trade Commission Act**

Following Cel-Tech, appellate court opinions have been divided over whether the definition of "unfair" under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, as stated in Cel-Tech should apply to UCL actions brought by consumers. The California courts have not yet determined how to define "unfair" in the consumer action context after Cel-Tech. Some courts in California have extended the Cel-Tech definition to consumer actions, while others have applied the old balancing test, or borrowed the three-pronged test set forth in the Federal Trade Commission Act.

Banking Law > Consumer Protection > Truth in Lending > Disclosure

HN41[] **Truth in Lending, Disclosure**

Although Regulation Z, *12 C.F.R. § 226.1 et seq.*, does not expressly permit the omission of the annual fee disclosure from advertisements, it surely does not require such disclosure where the advertisement does not include specific terms that trigger additional disclosure. *12 C.F.R. § 226.16(b)*.

HN42[] **State Regulation, Claims**

In the context of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, while the court is mindful that what is "unfair" is a question of fact, which involves an equitable weighing of all the circumstances, the court will affirm a judgment of dismissal where the complaint fails to allege facts showing that a business practice is unfair.

Counsel: Drew E. Pomerance (argued), Burton E. Falk, Roxborough, Pomerance, Nye & Adreani, LLP, Woodland Hills, California, for the plaintiff-appellant.

Stuart M. Richter (argued), Gregory S. Korman, Katten Muchin Rosenman LLP, Los Angeles, California, for the defendants-appellees.

Judges: Before: Dorothy W. Nelson, Diarmuid F. O'Scannlain, and N. Randy Smith, Circuit Judges. Opinion by Judge Nelson.

Opinion by: Dorothy W. Nelson

Opinion

[*1157] NELSON, Senior Circuit Judge:

Gary Davis appeals the district court's dismissal of his First Amended Complaint ("FAC"). In this putative class action, Davis alleges that HSBC Bank Nevada, N.A. ("HSBC") and Best Buy Stores, L.P. ("Best Buy") (collectively, "Defendants") defrauded California customers by offering credit cards without adequately disclosing that cardholders would be subject to an annual fee. We must decide whether the district court erred when it considered extrinsic evidence in deciding Defendants' motion to dismiss, and whether dismissal was proper under *Federal Rule of Civil Procedure 12(b)(6)*. We have jurisdiction **[**2]** pursuant to *28 U.S.C. § 1291*, and we affirm.

I. BACKGROUND[1]

Best Buy operates a national chain of retail stores that sells consumer electronics and related services. As part of its marketing platform, Best Buy implements the "Reward Zone Program," which allows customers to earn "Reward Certificates" for their purchases at Best Buy stores and redeem the certificates for discounts off **[*1158]** future purchases at such stores. At the same time, qualified consumers may also obtain a Reward Zone Program MasterCard ("RZMC"), a credit card that is issued by HSBC, a federally chartered bank regulated by the Office of the Comptroller of the Currency ("OCC"). The owner of an RZMC is automatically enrolled in the Reward Zone Program, and may earn reward certificates by using the card not only at Best Buy, but wherever MasterCard is accepted. Accordingly, Defendants advertised the RZMC as providing the cardholder, among other things, with the ability to obtain reward certificates as well as exclusive bonus point offers to earn rewards more rapidly.

In or around April 2007, Davis read a newspaper **[**3]** advertisement for the RZMC stating that applicants would receive $25 worth of reward certificates with their very first purchase using the card. Davis applied online to become an RZMC holder. Before applying, however, he read a webpage entitled "Program Rules — Best Buy Reward Zone." Further, while applying, Davis viewed a webpage entitled "FAQ's" (Frequently Asked Questions). Neither webpage mentioned an annual fee for using the RZMC.

At step two of the application process, Davis was directed to Best Buy's website labeled "Best Buy MBBC Consumer — Review the Important Account Credit Terms." In the upper-left corner of the page, in boldface font at least twice as large as the other text on the page, read the words "Terms and Conditions." Immediately below that, also in bold, was the subheading, "Important Terms of Your Best Buy Credit Account and Disclosure Statement" ("Important Terms & Disclosure Statement"). Underneath stood a scrolling rectangular text box, the contents of which were only partially visible because one would need to scroll down to view the whole statement. The visible portion commenced with the instruction, "Read the notice below carefully and print and/or download **[**4]** a copy for your records," followed by the text:

> The Reward Zone® program MasterCard® Privacy Statement HSBC BANK NEVADA, N.A.

Beneath the text box was a small check-box, which was adjacent to the following affirmation: "I agree to the Important Terms & Disclosure Statement of the Best Buy Reward Zone® MasterCard®." The FAC does not allege that Davis read the contents of the Important Terms and Disclosure Statement, but only alleges that he checked the box and completed his online application.

Davis's application was approved and shortly thereafter he received his new credit card in the mail. Also enclosed with the card were seven brochures, including a document entitled "Cardholder Agreement and Disclosure Statement," as well as one entitled "Additional Disclosure Statement." Upon reading the latter, Davis was "surprised" to learn that there was a $59 annual fee for use of the card. At that point, Davis admits, he revisited the terms and conditions website, scrolled down toward the end of the Important Terms & Disclosure Statement, and discovered the disclosure of a possible annual fee. Davis asked HSBC to waive the annual fee, but the bank

---

[1] Because this appeal is from an order granting dismissal, the facts are taken from the FAC.

declined. Instead of canceling the card, Davis **[**5]** refused to activate it and continued to pay the annual fee for five years.

On July 28, 2008, Davis filed a class action complaint in state court against Defendants[2] on behalf of a putative class including all California residents who applied **[*1159]** for an RZMC between 2004 and 2008, and were charged an annual fee. He alleges that Defendants failed to disclose adequately the existence of the annual fee. The case was removed to federal court and then remanded to state court, triggering an appeal to this Court, which reversed the remand order. *Davis v. HSBC Bank Nevada, N.A., 557 F.3d 1026, 1030 (9th Cir. 2009)*. Upon return to federal court, Defendants filed a motion to dismiss, which the district court granted on federal preemption grounds. Davis was given 30 days to amend the complaint.

On September 25, 2009, Davis filed the FAC on the same theory that Defendants failed to disclose adequately whether RZMC owners would be charged an annual fee. The operative complaint alleges four causes of action **[**6]** for (1) false advertising in violation of the *California Business & Professions Code § 17500, et seq*. ("False Advertising Law" or "FAL"), as to Best Buy; (2) fraudulent concealment as to both Defendants; (3) "unlawful" business practices in violation of the *California Business & Professions Code § 17200, et seq*. ("Unfair Competition Law" or "UCL") as to HSBC; and (4) "unfair" and "fraudulent" business practices in violation of the UCL as to Best Buy.

Defendants filed a *Rule 12(b)(6)* motion to dismiss the FAC, along with a motion requesting judicial notice of three disclosure documents that were referenced in, but not attached to the FAC: (1) a copy of the complete Important Terms & Disclosure Statement contained in the scrolling box from the online application; (2) a copy of the Additional Disclosure Statement received in the mail; (3) a copy of the Cardmember Agreement and Disclosure Statement received in the mail (collectively, "disclosure documents").

The district court dismissed all four claims with prejudice on the ground that they fail to state claims entitling Davis to relief.

Davis timely appealed the dismissal of his claims.

II. STANDARD OF REVIEW

HN1[] We review de novo a district court's **[**7]** order granting a motion to dismiss pursuant to *Rule 12(b)(6)*. *Stearns v. Ticketmaster Corp., 655 F.3d 1013, 1018 (9th Cir. 2011)*. To survive dismissal, the complaint must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "'Factual allegations must be enough to raise a right to relief above the speculative level.'" *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)* (quoting *Bell Atl. Corp., 550 U.S. at 555*). We must accept "all factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party." *Rowe v. Educ. Credit Mgmt. Corp., 559 F.3d 1028, 1029-30 (9th Cir. 2009)* (quoting *Knievel v. ESPN, 393 F.3d 1068, 1072 (9th Cir. 2005))*. At the same time, "we can affirm a 12(b)(6) dismissal on any ground supported by the record, even if the district court did not rely on the ground." *United States v. Corinthian Colls., 655 F.3d 984, 992 (9th Cir. 2011)* (internal citation and quotation marks omitted). As we sit in diversity, California law governs our analysis of the state law claims. *See, e.g., Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 338 (9th Cir. 1996)*.

We **[**8]** take this opportunity to clarify what standard of review applies to a district court's decision to incorporate by reference documents outside the pleadings. ***HN2***[] Our relevant case law has recognized consistently that the district court may, but is not required to incorporate documents by reference. *See, e.g., Marder v. Lopez, 450 F.3d 445, 448 **[*1160]** (9th Cir. 2006)* (observing that a court "may consider" evidence that is incorporated by

---

[2] The original complaint also brought claims against Defendants' affiliates, HSBC Finance Corporation and Best Buy Co., Inc. However, Davis has since voluntarily dismissed these affiliates from the case.

reference); *Knievel, 393 F.3d at 1076* (noting that the incorporation doctrine "permits" the court to consider extrinsic documents); *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)* (explaining that a document "may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff 's claim"). Additionally, in *Hamilton Materials, Inc. v. Dow Chemical Corp., 494 F.3d 1203, 1207 (9th Cir. 2007)*, we explained that "*Federal Rule of Civil Procedure 12(b)(6)* specifically gives courts the discretion to accept and consider extrinsic materials offered in connection with these motions, and to convert the motion to one for summary judgment when a party has notice that the district court **[**9]** may look beyond the pleadings." Thus, we have held, for example, that a district court's decision to take judicial notice of extrinsic evidence shall be reviewed for abuse of discretion. *Skilstaf, Inc. v. CVS Caremark Corp., 669 F.3d 1005, 1016 n.9 (9th Cir. 2012)*. The foregoing leads us to conclude that the district court's decision to incorporate by reference documents into the complaint shall be reviewed for an abuse of discretion.

III. DISCUSSION

On appeal, Davis argues preliminarily that the district court erred when it considered three disclosure documents that were not attached to the FAC, and which were introduced by Defendants in support of their motion to dismiss the FAC. Davis next argues the district court's conclusion that none of the four claims plausibly suggested a right to relief was error. We address each argument in turn.

A. Disclosure Documents

The district court expressly incorporated by reference three disclosure documents for which Defendants sought judicial notice in support of their motion to dismiss. ***HN3***[] Under the "incorporation by reference" doctrine in this Circuit, "a court may look beyond the pleadings without converting the *Rule 12(b)(6)* motion into one for summary **[**10]** judgment." *Van Buskirk v. Cable News Network, Inc., 284 F.3d 977, 980 (9th Cir. 2002)*. Specifically, courts may take into account "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the [plaintiff 's] pleading." *Knievel, 393 F.3d at 1076* (alteration in original) (internal citation and quotation marks omitted). A court "may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *Ritchie, 342 F.3d at 908*.

In this case, it is beyond dispute that the FAC alleges the contents of the disclosure documents. The complaint emphasizes that only part of the contents of the Important Terms & Disclosure Statement were visible without scrolling down, and that the portion which was visible concerned only the Privacy Statement. Davis also alleges in detail that the Cardmember Agreement and Disclosure Statement did not mention the annual fee, whereas the Additional Disclosure Statement did. Davis does not dispute these references. Instead, he argues that the district court mistakenly determined that he did not challenge the **[**11]** documents' authenticity. He claims he raised this issue when he stated in his opposition to the motion to dismiss: "There is no evidence that these documents were ever reviewed by Plaintiff or made available to Plaintiff." We disagree **[*1161]** and conclude that Davis did not challenge the documents' authenticity.

HN4[] Whether or not Davis had access to and reviewed the proffered documents is a matter unrelated to their authenticity — i.e., whether the documents are "what its proponent claims." *Las Vegas Sands, LLC v. Nehme, 632 F.3d 526, 533 (9th Cir. 2011)* (internal citation and quotation marks omitted); *see also* *Fed. R. Evid. 901* (noting that authentication concerns whether "the item is what the proponent claims it is"). Here, Defendants claimed that the documents are copies of the disclosure documents referenced in the FAC. Even assuming these copies were not personally reviewed by Davis, that does not address, much less cast doubt on, whether the copies are accurate reproductions of the original disclosure documents. Therefore, Davis's objection was insufficient to challenge the documents' authenticity.

Our conclusion is supported by the fact that Davis had ample opportunity in district court **[**12]** to argue that the disclosure documents were not authentic, yet failed to do so. Davis initially objected to the admission of the documents in his opposition to the motion to dismiss the original complaint, on the ground that the documents were not reviewed by or made available to him. In their reply brief, Defendants pointed out that Davis "never questions the[ ] authenticity" of the proffered documents. If Davis had wished to contest this assertion, he could have done so in his subsequent opposition to the motion to dismiss the FAC. Yet he merely repeated verbatim his prior protestation that the documents were not reviewed by, or made available to him.

Further, ***HN5***[] Davis's "ongoing and substantial reliance on the [documents] as a basis for [his] allegations substantially weakens [his] position." *In re Silicon Graphics Inc. Sec. Litig., 183 F.3d 970, 986 (9th Cir. 1999)*, *abrogated on other grounds as recognized in South Ferry LP, No. 2 v. Killinger, 542 F.3d 776, 784 (9th Cir. 2008)*. In particular, having based his allegations on the contents and appearance of the Important Terms & Disclosure Statement, "[Davis] can hardly complain when [Defendants] refer to the same information in **[**13]** their defense." *Id*.

We therefore hold that ***HN6***[] where the party opposing incorporation by reference argues only that he did not review or have access to the proffered copies, this does not amount to a challenge to those documents' authenticity. Accordingly, the district court properly incorporated the disclosure documents.

Further, we reject Davis's attempt to challenge the documents' authenticity for the first time on appeal. ***HN7***[] Because Davis failed to assert an objection as to authenticity before the district court, he has waived this objection on appeal. *See McGonigle v. Combs, 968 F.2d 810, 825 (9th Cir. 1992)*.

B. False Advertising Claim Against Best Buy

Turning to the claims in the FAC, Davis first alleges that Best Buy's advertising was misleading because it failed to disclose the existence of an annual fee. We agree with the district court that no reasonable consumer would have been deceived by these advertisements into thinking that no annual fee would be imposed.

HN8[] California's False Advertising Law makes it unlawful for any person to "induce the public to enter into any obligation" based on a statement that is "untrue or misleading, and which is known, or which by the exercise of reasonable **[**14]** care should be known, to be untrue or misleading." *Cal. Bus. & Prof. Code § 17500*. Whether an advertisement is "misleading" must be judged by the effect it would have on a reasonable consumer. *Williams, 552* ***[*1162]*** *F.3d at 938*; *see also Lavie v. Procter & Gamble Co., 105 Cal. App. 4th 496, 129 Cal. Rptr. 2d 486, 494 (Cal. Ct. App. 2003)* ("[U]nless the advertisement targets a particular disadvantaged or vulnerable group, it is judged by the effect it would have on a reasonable consumer."). A reasonable consumer is "the ordinary consumer acting reasonably under the circumstances." *Colgan v. Leatherman Tool Group, Inc., 135 Cal. App. 4th 663, 38 Cal. Rptr. 3d 36, 48 (Cal. Ct. App. 2006)* (internal citation and quotation marks omitted). To prevail under this standard, Davis must "'show that members of the public are likely to be deceived'" by the advertisement. *Williams, 552 F.3d at 938* (quoting *Freeman v. Time, Inc., 68 F.3d 285, 289 (9th Cir. 1995))*. In applying this test, we are mindful that "whether a business practice is deceptive will usually be a question of fact not appropriate for decision on [a motion to dismiss]." *Id*.

As an initial matter, we note that Davis does not allege that Best Buy's advertisement contained any statements that were actually **[**15]** false. He does not suggest, for example, that the advertisement stated that the RZMC would be free, or that it would generate a profit. Nor can Davis be heard to argue that the advertisement's failure to mention the annual fee, standing alone, supports a reasonable belief that there was no annual fee. Given the advertisement's legible disclaimer that "[o]ther restrictions may apply," no reasonable consumer could have believed that if an annual fee was not mentioned, it must not exist.

This does not end our inquiry, however, because ***HN9***[] California courts construe *Section 17500* to extend beyond literal falsities. The statute has been interpreted broadly to encompass "'not only advertising which is false, but also advertising which[,] although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public."' *Williams, 552 F.3d at 938* (quoting *Kasky v. Nike, Inc., 27 Cal. 4th 939, 119 Cal. Rptr. 2d 296, 45 P.3d 243, 250 (Cal. 2002))*. Consequently, even "[a] perfectly true statement couched in such a manner that it is likely to mislead or deceive the consumer, such as by failure to disclose other relevant information, is actionable under th[is] section[ ]." *Day v. AT&T Corp., 63 Cal. App. 4th 325, 74 Cal. Rptr. 2d 55, 60 (Cal. Ct. App. 1998)*.

Davis **[**16]** contends that the omission of the annual fee was misleading because the promise of reward certificates beginning with the first purchase implied that no offsetting charges would operate to "nullify" those rewards. This argument fails. While it is true that an annual fee could offset the cash value of any rewards, the same tradeoff exists with respect to numerous other costs of owning a credit card, such as monthly interest charges, late-payment fees, and over-the-limit fees. It defies common sense to claim that this tradeoff would lead a rational consumer to conclude that any credit card that offers rewards for spending must therefore not have associated costs of ownership.

Of course, it is possible that some consumers might hazard such an assumption. But ***HN10***[] "[a] representation does not become 'false and deceptive' merely because it will be unreasonably misunderstood by an insignificant and unrepresentative segment of the class of persons to whom the representation is addressed." *Lavie, 129 Cal. Rptr. 2d at 494* (internal citation and quotation marks omitted). We therefore hold that Best Buy's advertising was not likely to deceive a reasonable consumer; the district court's dismissal of **[**17]** the false advertising claim was proper.

C. Fraudulent Concealment Claim Against Best Buy and HSBC

Davis next alleges that Defendants fraudulently concealed the existence **[*1163]** of an annual fee in its advertising and marketing. ***HN11***[] "The elements of a cause of action for fraud in California are: (a) misrepresentation (false representation, concealment, or *nondisclosure*); (b) knowledge of falsity (or 'scienter'); (c) intent to defraud, i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage." *Kearns v. Ford Motor Co., 567 F.3d 1120, 1126 (9th Cir. 2009)* (emphasis in original) (internal citation and quotation marks omitted).

In particular, ***HN12***[] a claim for fraudulent concealment requires that: "(1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff **[**18]** must have sustained damage." *Marketing West, Inc. v. Sanyo Fisher (USA) Corp., 6 Cal. App. 4th 603, 7 Cal. Rptr. 2d 859, 864 (Cal. Ct. App. 1992)*. Without reaching the other factors, the district court determined that Davis's claim fails because he cannot demonstrate justifiable reliance on the purported failure to disclose the annual fee. We agree.

HN13[] In an action for fraud under California law, recovery shall be denied "[i]f the conduct of the plaintiff [in relying upon a misrepresentation] in the light of his own intelligence and information was manifestly unreasonable." *Broberg v. Guardian Life Ins. Co. of Am., 171 Cal. App. 4th 912, 90 Cal. Rptr. 3d 225, 232 (Cal. Ct. App. 2009)* (alterations in original) (internal citation and quotation marks omitted). To establish manifest unreasonableness, "[i]t must appear that [plaintiff] put faith in representations that were preposterous or shown by facts within his observation to be so patently and obviously false that he must have closed his eyes to avoid discovery of the truth." *Id*. (internal quotation marks omitted). We bear in mind, however, that "[w]hether reliance [on a misrepresentation] was reasonable is a question of fact for the jury, and may be decided as a matter of law only if the **[**19]** facts permit reasonable minds to come to just one conclusion." *Id*. (alterations in original) (internal citation and quotation marks omitted).

Fatal to Davis's claim is the undisputed fact that he failed to read the Important Terms & Disclosure Statement before checking the box accepting these terms and conditions. ***HN14***[] California courts have held that where, as here, the parties to an agreement deal at arm's length, it is not reasonable to fail to read a contract before signing it. *See, e.g.,* *Desert Outdoor Adver. v. Super. Ct., 196 Cal. App. 4th 866, 127 Cal. Rptr. 3d 158, 163 (Cal. Ct. App. 2011)*; *Brown v. Wells Fargo Bank, NA, 168 Cal. App. 4th 938, 85 Cal. Rptr. 3d 817, 833-34 (Cal. Ct. App. 2008)* (explaining that there can be no reasonable reliance where the plaintiff, dealing at arm's length, "had a reasonable opportunity to discover the true terms of the contract" but simply failed to read the contract before signing it).

Moreover, the existence of the annual fee was "within [Davis's] observation" because he concedes that he was able to discover the annual fee when he revisited Best Buy's website and scrolled through the Important Terms & Disclosure Statement. However, by refusing to read this document before completing the application, **[**20]** and instead assuming the absence of an annual fee, Davis "put faith" in a purported representation that was "shown by facts within his observation to be so patently and obviously false that he must have closed his eyes to avoid discovery of the **[*1164]** truth." *Broberg, 90 Cal. Rptr. 3d at 232* (internal quotation marks omitted). The only conclusion that reasonable minds may draw is that Davis's reliance on the purported misrepresentation was manifestly unreasonable.

Davis's reliance on *Barrer v. Chase Bank USA, N.A., 566 F.3d 883 (9th Cir. 2009)*, is misplaced. He argues that *Barrer* leaves open the possibility that, where a disclaimer concerning a particular term is buried in the fine print of an agreement, a reasonable consumer may still be deceived by advertising or marketing materials concerning that term. This is not what *Barrer* says. Rather, we held in *Barrer* that because a provision empowering the defendant to change the cardholder's annual percentage rate for any reason was "buried too deeply in the fine print," the defendant could not show, as a matter of law, that the credit card agreement made "clear and conspicuous" disclosure of that provision, as required by Regulation Z and the **[**21]** Truth in Lending Act ("TILA"). *Barrer, 566 F.3d at 892*. However, whether a disclosure satisfies the "clear and conspicuous" standard under the federal regulatory framework, *see* *Rubio v. Capital One Bank, 613 F.3d 1195, 1199 (9th Cir. 2010)* (noting that ***HN15***[] TILA and its implementing regulations require "absolute compliance" by creditors), is inapposite to whether, in the common law context, it was reasonable for Davis to rely on a purported representation when he did not read the terms and conditions to which he assented. Thus, we conclude that Davis cannot demonstrate reasonable reliance and that the district court did not err in dismissing his fraud claim.

D. UCL Claims Against HSBC and Best Buy

Davis's third and fourth causes of action each allege that Defendants made inadequate disclosure of the annual fee in their advertising and marketing in violation of the UCL. Defendants argue that because their annual fee disclosure complied with, and was required by, TILA and Regulation Z, their conduct falls within a "safe harbor" that is impervious to the UCL. We agree in part and conclude that while the disclosures in the online application fall within the safe harbor, the advertisements do **[**22]** not.

First, it is necessary to understand what constitutes a safe harbor, and whether TILA and Regulation Z can meet this test. ***HN16***[] The California Supreme Court has explained the "safe harbor" doctrine in this way:

> Although the unfair competition law's scope is sweeping, it is not unlimited . . . . Specific legislation may limit the judiciary's power to declare conduct unfair. If the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination. When specific legislation provides a "safe harbor," plaintiffs may not use the general unfair competition law to assault that harbor.

Cel-Tech Comms. Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 541 (Cal. 1999). Under the safe harbor doctrine, "[t]o forestall an action under the unfair competition law, another provision must actually 'bar' the action or clearly permit the conduct." *Id*.

We conclude that TILA and Regulation Z provide such a safe harbor with respect to Defendants' disclosures in the online application. ***HN17***[] TILA requires that applications for an account under an open-end consumer credit plan must include certain disclosures. *15 U.S.C. § 1637(c)*. **[**23]** Where, as here, the application is provided online and contains "specific information" about the terms and conditions, the application must disclose, among other things, "[a]ny annual fee, other periodic fee, or membership **[*1165]** fee imposed for the issuance or availability of a credit card, including any account maintenance fee or other charge imposed based on activity or inactivity for the account during the billing cycle." *15 U.S.C. §§ 1637(c)(1)(A)(ii)(I)*, *(c)(3)(B)(i)(I)*. The disclosure must appear "clearly and conspicuously" in the tabular format commonly referred to as the Schumer Box. *15 U.S.C. §§ 1632(a)*, *(c)(2)*.

HN18[] TILA delegates to the Board of Governors of the Federal Reserve Bank ("Board") the duty to implement these disclosure requirements and to prescribe regulations governing the "form and manner" of the disclosures. *15 U.S.C. § 1632(c)(1)(A)*. Accordingly, the Board has promulgated "Regulation Z," *12 C.F.R. § 226.1 et seq*., which imposes "even more precise" disclosure requirements. *Virachack v. Univ. Ford, 410 F.3d 579, 581 (9th Cir. 2005)*. Regulation Z requires lenders to provide specific disclosures "on or with a solicitation or an application to open a credit or charge card **[**24]** account." *12 C.F.R. §§ 226.5a(a)*, *(b)*. In pertinent part, the lender must disclose "[a]ny annual or other periodic fee that may be imposed for the issuance or availability of a credit or charge card, including any fee based on account activity or inactivity; how frequently it will be imposed; and the annualized amount of the fee." *12 C.F.R. § 226.5a(b)(2)(i)*. Further, the disclosure "shall be in the form of a table with headings, content, and format substantially similar to any of the applicable tables found in G-10 in appendix G to this part." *12 C.F.R. § 226.5a(a)(2)(i)*.

We have no trouble concluding that TILA and Regulation Z create a safe harbor for Defendants' disclosure in the online application. ***HN19***[] Both the statute and the regulations clearly permit, and indeed require with equal force, the disclosure of any annual fee in an application for a credit card such as the RZMC. Our comparison of the online application's disclosure with the sample Schumer table in Appendix G demonstrates that Defendants' disclosure complied with these federal requirements. Indeed, Davis has not and cannot allege any violation under these provisions. Because the disclosure in the application clearly was **[**25]** permitted by federal law, it cannot serve as the basis for UCL liability.

Davis relies on *Krumme v. Mercury Insurance Co., 123 Cal. App. 4th 924, 20 Cal. Rptr. 3d 485, 497 n.5 (Cal. Ct. App. 2004)*, for the contention that only statutes, not regulations, can create "safe harbors." In *Krumme*, the state intermediate court rejected an insurance company's argument that California insurance regulations provided a safe harbor against UCL liability. *Id*. It reasoned that such materials "are not germane to our analysis" because the California Supreme Court in *Cel-Tech* "held that only statutes can create a safe harbor." *Id*. (citing *Cel-Tech, 973 P.2d at 541-42*).

We are not persuaded that *Cel-Tech* stands for this rule. *See Kairy v. SuperShuttle Int'l, 660 F.3d 1146, 1150 (9th Cir. 2011)* (***HN20***[] "In a case requiring a federal court to apply California law, the court must apply the law as it believes the California Supreme Court would apply it.") (internal quotation marks omitted). *Cel-Tech* involved ***HN21***[] whether the Unfair Practices Act provided a safe harbor to shield certain business conduct from liability under the UCL. The court explained that while an express statutory provision permitting specific conduct would be sufficient to create **[**26]** a safe harbor, "the Legislature's mere failure to prohibit an activity does not prevent a court from finding it unfair." *Cel-Tech, 973 P.2d at 542*. The court then stated that "[i]f no statute provides a safe harbor," the court must decide whether the alleged misconduct violates the UCL. *Id*.

[*1166] We reject the notion that this last passing reference established a bright-line rule that only statutes can create safe harbors. Instead, we understand the court to be outlining its analysis in the context of the case before it, which concerned only a potential statutory safe harbor. Furthermore, even if "the Legislature's mere failure to prohibit an activity" does not create a safe harbor, *id. at 542*, this does not preclude the possibility that one might arise where an implementing regulation clearly permits that activity. At bottom, the question of whether regulations can create safe harbors simply was not before the *Cel-Tech* Court, and therefore any intimation on this point was non-essential dicta.[3] Rather, we follow our previous decision in *Webb v. Smart Document Solutions, LLC*, where we

---

[3] ***HN23***[] California intermediate courts agree with our conclusion that regulations can create safe harbors. Most recently, in *Lopez v. Nissan North America, Inc., 201 Cal. App. 4th 572, 135 Cal. Rptr. 3d 116, 132 (Cal. Ct. App. 2011)*, the state appellate

observed that *HN22*[] if HIPAA regulations "intended to permit [the defendant's] conduct, it cannot be 'unfair' under **[**27]** *Section 17200*." *499 F.3d 1078, 1082 (9th Cir. 2007)*. We therefore recognize that Regulation Z does provide a safe harbor for Defendants' disclosures in the online application.

We would add that *HN24*[] even if regulations could not create safe harbors, Davis does not deny that federal statutes can. Indeed, we have held as much. *See* *Hauk v. JP Morgan Chase Bank USA, 552 F.3d 1114, 1122 (9th Cir. 2009)* (holding that *HN25*[] a credit card issuer's "compliance with TILA's disclosure requirements provides a safe harbor with respect to [the plaintiff 's] UCL claims based only on the sufficiency of [the issuer's] disclosures"). **[**28]** In this case, to reiterate, TILA not only clearly permits the annual fee disclosure in the online application, it mandates it. *See* *15 U.S.C. §§ 1632(a)*, *(c)(2)*; *15 U.S.C. §§ 1637(c)(1)(A)(ii)(I)*, *(c)(3)(B)(i)(I)*. At a minimum, therefore, Defendants' disclosure draws protection from a safe harbor under TILA.

Davis next objects that any safe harbor under TILA could not protect Best Buy because TILA does not govern retailers such as Best Buy. Even if TILA does not govern Best Buy, which we need not decide, Davis's argument misses the mark because the safe harbor doctrine immunizes conduct, not entities. In *Cel-Tech*, *HN26*[] the California Supreme Court explained that when specific legislation affirmatively permits conduct, "[c]ourts may not simply impose their own notions of the day as to what is fair or unfair." *973 P.2d at 541*. In other words, the safe harbor doctrine protects specific conduct not because of its provenance, but because the content of the conduct itself is deemed "fair" as a matter of law.[4] Here, **[*1167]** *HN27*[] TILA and Regulation Z expressly permit and require that online credit card applications disclose the annual fee in a prescribed manner. Best Buy operated the online application process **[**29]** in compliance with these rules, and therefore its conduct cannot give rise to UCL liability.

We are not convinced, however, that Defendants' advertisements may be swept into the ambit of this safe harbor. Unlike the online application, it is undisputed that the advertisements lacked any disclosure of the annual fee. Thus, to qualify for a safe harbor, we must be satisfied that the omission of the annual fee is permitted by some statute or regulation.

Taking the contrary view, Davis **[**30]** contends that the advertisements were "solicitations" that violated TILA and Regulation Z because they failed to disclose the annual fee. However, this argument rests on a misunderstanding of the definition of "solicitation." *HN29*[] Under Regulation Z, a "solicitation" is defined as "an offer by the card issuer to open a credit or charge card account that does not require the consumer to complete an application." *12 C.F.R. § 226.5a(a)(1)*. In other words, a solicitation is an offer made to a consumer who is pre-approved to be a cardholder and therefore need not undergo the credit approval process to acquire the card.

This reading comports with the agency's official staff interpretation, which explains that where a card issuer merely "contact[s] a consumer who has not been preapproved for a card account about opening an account . . . and invite[s] the consumer to complete an application[, s]uch a contact does not meet the definition of *solicitation*, . . . unless the contact itself includes an application form in a direct mailing, electronic communication or 'take-one'; an oral application in a telephone contact initiated by the card issuer; or an application in an in-person contact initiated **[**31]** by the card issuer." Div. of Consumer and Cmty. Affairs of the Fed. Reserve Bd., Official Staff Comm., 12 C.F.R. Pt. 226, Supp. I, *§ 226.5a cmt. 5a(a)(1)*; *see* *Johnson v. Wells Fargo Home Mortg., Inc., 635 F.3d 401, 417*

---

court discussed approvingly our decision in *Alvarez v. Chevron Corp., 656 F.3d 925, 933 (9th Cir. 2011)*, where we held that California gasoline regulations created a safe harbor against the UCL. *See also* *Byars v. SCME Mortg. Bankers, Inc., 109 Cal. App. 4th 1134, 135 Cal. Rptr. 2d 796, 805-806 (Cal. Ct. App. 2003)* (noting that HUD policy statement created safe harbor for mortgage lender's conduct).

[4] Consistent with this view, *Cel-Tech* repeatedly explains that *HN28*[] it is the conduct, not the actor, that the safe harbor embraces. *See also* *973 P.2d at 541* ("If the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination."); *id.* ("To forestall an action under the unfair competition law, another provision must actually 'bar' the action or clearly permit the conduct."); *id. at 541-42* ("Acts that the Legislature has determined to be lawful may not form the basis for an action under the unfair competition law . . . ."); *id. at 542* ("[C]ourts may not use the unfair competition law to condemn actions the Legislature permits.").

(9th Cir. 2011) ("We have been directed to treat these official staff interpretations of Regulation Z as controlling unless demonstrably irrational.") (internal quotation marks and alteration omitted). Here, Davis does not allege that he viewed any advertisement offering to extend him credit without requiring an application. In fact, he concedes that he was required to and did submit an application before he was approved for the RZMC. Thus, the advertisements were not solicitations lacking the requisite disclosure.

Nevertheless, ***HN30***[] to fall under a safe harbor, the omission of the annual disclosure from Defendants' advertisements must be expressly permitted by some other provision. It is not enough if TILA and Regulation Z merely fail to prohibit such an omission. *Cel-Tech, 973 P.2d at 542*. However, the parties have not provided, and we have not located, any provision in TILA, Regulation Z, or elsewhere that clearly permits the omission of the annual fee disclosure from such **[**32]** advertisements. Instead, Regulation Z only specifies that if the advertisement sets forth a specific credit term that "triggers" additional disclosure, such as a finance charge, then the advertisement "shall also clearly and conspicuously set forth," among other items, the annual membership fee. *See* *12 C.F.R. § 226.16(b)*; Official Staff Comm., 12 C.F.R. Pt. 226, Supp. I, § 226.16(b)(1) cmt. 6. Thus, we cannot conclude that some provision affirmatively permits the absence of the annual fee disclosure from the advertisements.

Because no authority provides a safe harbor, we must decide whether Davis **[*1168]** adequately has alleged that Defendants' advertisements violate the UCL. *Cel-Tech, 973 P.2d at 542-43*. ***HN31***[] The UCL prohibits "unfair competition," which is broadly defined to include "three varieties of unfair competition — acts or practices which are unlawful, or unfair, or fraudulent." *Id. at 540*. Because the statute is written in the disjunctive, it is violated where a defendant's act or practice violates any of the foregoing prongs. *See* *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007)*. Davis claims that HSBC violated the "unlawful" prong, and that Best Buy violated the **[**33]** "fraudulent" and "unfair" prongs of the UCL. We address each contention in turn.

1. "Unlawful" Business Practices Claim Against HSBC

HN32[] To be "unlawful" under the UCL, the advertisements must violate another "borrowed" law. *Cel-Tech, 973 P.2d at 539-40* ("[S]ection 17200 borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.") (internal quotation marks omitted). "[V]irtually any state, federal or local law can serve as the predicate for an action under *section 17200*." *People ex rel. Bill Lockyer v. Fremont Life Ins. Co., 104 Cal. App. 4th 508, 128 Cal. Rptr. 2d 463, 469 (Cal. Ct. App. 2002)* (internal citation and quotation marks omitted). In this case, Davis alleges that the advertisements violated ***HN33***[] OCC regulation *12 C.F.R. § 7.4008(c)*, which states that "[a] national bank shall not engage in unfair or deceptive practices within the meaning of section 5 of the Federal Trade Commission Act, *15 U.S.C. [§] 45(a)(1)*, and regulations promulgated thereunder in connection with loans made under this *§ 7.4008*." Defendants admit that the RZMC credit card loan was made pursuant to *12 C.F.R. § 7.4008*, so the question is whether their conduct was unfair **[**34]** or deceptive.[5]

HN34[] A practice is deceptive under section 5 "(1) if it is likely to mislead consumers acting reasonably under the circumstances (2) in a way that is material." *FTC v. Cyberspace.com LLC, 453 F.3d 1196, 1199 (9th Cir. 2006)*. For the same reasons discussed above with respect to the FAL claim, we reject the argument that the advertisements were deceptive under section 5. No reasonable consumer would have been deceived by these advertisements into thinking that no annual fee would be imposed.

Nor were the advertisements unfair. ***HN35***[] A practice is "unfair" under *section 5* only if **[**35]** it "causes or is likely to cause substantial injury to consumers which is not reasonably avoidable by consumers themselves and not outweighed by countervailing benefits to consumers or to competition." *15 U.S.C. § 45(n)*. "In determining whether

[5] Davis also argues that the disclosure of the annual fee in the online application was "unfair and deceptive" in violation of the OCC regulation and was therefore "unlawful" under the UCL. However, because the safe harbor protects the application, this basis for the UCL claim must fail. While we are sensitive that there may be some facial tension between the TILA safe harbor and the OCC regulation in this situation, we need not address it here because (1) the California Supreme Court has not indicated that such a tension thwarts the safe harbor, and (2) in any event, the parties have not raised this issue.

consumers' injuries were reasonably avoidable, courts look to whether the consumers had a free and informed choice." *FTC v. Neovi, Inc., 604 F.3d 1150, 1158 (9th Cir. 2010)*. An injury is reasonably avoidable if consumers "have reason to anticipate the impending harm and the means to avoid it," or if consumers are aware of, and are reasonably capable of pursuing, potential avenues toward mitigating **[*1169]** the injury after the fact. *Orkin Exterminating Co., Inc. v. FTC, 849 F.2d 1354, 1365-66 (11th Cir. 1988)* (cited approvingly in *Neovi, 604 F.3d at 1158*).

Davis's alleged injury was certainly avoidable before he completed the application for the RZMC. The advertisement contained the disclaimer, "other restrictions may apply," which would have motivated a reasonable consumer to consult the terms and conditions. If that were not enough, the online application used boldface and oversized font to alert Davis to the Important Terms & Disclosure Statement, **[**36]** instructing him to "read the notice below carefully." The disclaimer and the terms and conditions were enough to give a reasonable consumer "reason to anticipate" the possibility of fees. Additionally, the fact that Davis was required to check the box indicating his assent before completing the application meant that he could have aborted his application upon reading the terms and conditions. This provided "the means to avoid" the alleged harm.

The annual fee was also avoidable after the account was opened. Pursuant to the Cardmember Agreement, which Davis admits he received after completing the application, the annual fee was completely refundable if Davis closed his account within 90 days without using the card. Davis refused to do so, citing the negative impact it would have on his credit score. ***HN36***[] The question, however, is not whether subsequent mitigation was convenient or costless, but whether it was "reasonably possible." *Orkin, 849 F.2d at 1365*. Under these circumstances, we conclude that Davis reasonably could have avoided the annual fee, and therefore that the advertisements were not unfair under section 5. Accordingly, the advertisements were not "unlawful" under the UCL.

2. "Fraudulent" [**37] and "Unfair" Business Practices Claim Against Best Buy

HN37[] A business practice is fraudulent under the UCL if members of the public are likely to be deceived. *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal. App. 4th 638, 72 Cal. Rptr. 3d 903, 909 (Cal. Ct. App. 2008)*. The challenged conduct "is judged by the effect it would have on a reasonable consumer." *Id*. (internal citation and quotation marks omitted). For the same reasons that we rejected Davis's FAL claim, we also conclude that the advertisements were not fraudulent under the UCL.

Last, we turn to Davis's contention that Best Buy's advertisements were "unfair" under the UCL. ***HN38***[] The UCL does not define the term "unfair." In fact, the proper definition of "unfair" conduct against consumers "is currently in flux" among California courts. *Lozano, 504 F.3d at 735*. Before *Cel-Tech*, courts held that "unfair" conduct occurs when that practice "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (Cal. Ct. App. 1999)* (internal quotation marks omitted). Under this approach, courts must examine the practice's **[**38]** "impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer." *Id*. (internal quotation marks omitted). In short, this balancing test must weigh "the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Id*. (internal quotation marks omitted).

HN39[] *Cel-Tech* held that the balancing test was "too amorphous" and "provide[d] too little guidance to courts and businesses." *973 P.2d at 543*. Instead, the court held that "unfair" means **[*1170]** "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 544*. It further required that "any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id*. However, the court expressly limited its new test to actions by competitors alleging anti-competitive practices, emphasizing that "[n]othing we say relates to actions by consumers or by competitors alleging other **[**39]** kinds of violations of the unfair competition law such as 'fraudulent' or 'unlawful' business practices or 'unfair, deceptive, untrue or misleading advertising.'" *Id. at 544 n.12*.

HN40[] "Following *Cel-Tech*, appellate court opinions have been divided over whether the definition of 'unfair' under the UCL as stated in *Cel-Tech* should apply to UCL actions brought by consumers." *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 108 Cal. Rptr. 3d 682, 695 (Cal. Ct. App. 2010)* (internal citation and quotation marks omitted); *see also* *Lozano, 504 F.3d at 736* ("The California courts have not yet determined how to define 'unfair' in the *consumer* action context after *Cel-Tech*."). As we previously have summarized, some courts in California have extended the *Cel-Tech* definition to consumer actions, while others have applied the old balancing test, or borrowed the three-pronged test set forth in the FTC Act. *Lozano, 504 F.3d at 736*; *see also* *Durell, 108 Cal. Rptr. 3d at 695-96* (describing split of authority).

The question then is whether we are to apply the new definition in *Cel-Tech*, or to follow the former balancing test under *South Bay*. *504 F.3d at 736*. In this regard, the district court erred when it held that Davis could not **[**40]** invoke the unfairness prong at all. The proper inquiry is what definition of "unfair" must apply to Davis's claim.

We need not resolve that question here, however, because Davis fails to state a claim under either definition. With respect to *Cel-Tech*, Davis advances no factual allegations to support the claim that the omission of the annual fee in Best Buy's advertisements threatens to violate the letter, policy, or spirit of the antitrust laws, or that it harms competition. As for the balancing test, we begin by noting that nothing in the FAC supports the conclusion that the advertisements were against public policy, immoral, unethical, oppressive, or unscrupulous. Quite the opposite, the advertisements warned that "other restrictions might apply," and the subsequent application process clearly disclosed the annual fee. More than this, Davis had the opportunity to cancel the account for a full refund within 90 days.

Because Davis failed to read the terms and conditions before agreeing to them, and because he refused to cancel his card within 90 days, even when viewing the facts in Davis's favor, we must conclude that any harm he suffered was the product of his own behavior, not the **[**41]** advertisements. As a result, we cannot say that the FAC alleges "above the speculative level" that the advertisements themselves caused any harm. *Bell Atl. Corp., 550 U.S. at 555*. Meanwhile, any harm is offset by Best Buy's strong justification for publishing the advertisement. Specifically, ***HN41***[] although Regulation Z does not expressly permit the omission of the annual fee disclosure from advertisements, it surely does not require such disclosure where, as here, the advertisement does not include specific terms that trigger additional disclosure. *12 C.F.R. § 226.16(b)*. Therefore, Best Buy justifiably relied on **[*1171]** this federal guidance in circulating the advertisements. ***HN42***[] While we are mindful that what is "unfair" is a question of fact, "which involves an equitable weighing of all the circumstances, . . . we will affirm a judgment of dismissal where the complaint fails to allege facts showing that a business practice is unfair." *Bardin v. Daimlerchrysler Corp., 136 Cal. App. 4th 1255, 39 Cal. Rptr. 3d 634, 644 (Cal. Ct. App. 2006)*. Davis fails to plead facts to show that Best Buy engaged in an unfair business practice as defined in *South Bay*.

In sum, Defendants' online application is protected by the safe harbor doctrine. **[**42]** As for Defendants' advertisements, Davis fails to allege that they were "unlawful" as they were not deceptive and their alleged harm was reasonably avoidable. Davis also fails to allege that the advertisements were "fraudulent" or "unfair." Therefore, the district court properly dismissed the UCL claims in their entirety.[6]

IV. CONCLUSION

The district court properly incorporated the disclosure documents, and we affirm its order dismissing Davis's complaint with prejudice.

---

[6] Although Defendants argue on appeal, as they did at the district court, that Davis's UCL claims are preempted by federal law, we need not reach that issue because we conclude that Davis has failed to state a claim under the UCL.

AFFIRMED.

Williamson v. Apple, Inc.

United States District Court for the Northern District of California, San Jose Division

September 4, 2012, Decided; September 4, 2012, Filed

CASE NO. 5:11-cv-00377 EJD

Reporter
2012 U.S. Dist. LEXIS 125368 *; 2012 WL 3835104

BETSALEL WILLIAMSON, individually and on behalf of all others similarly situated, Plaintiff(s), v. APPLE, INC., Defendant(s).

Core Terms

iPhone, glass, consumer, cause of action, allegations, housing, phone, warranty, unfair, omissions, marketing materials, leave to amend, practices, dropped, unjust enrichment, misrepresentations, misleading, circumstances, cracked, reasons, representations, resistance, contends, disclose, argues, express warranty, advertised, fraudulent, smartphone, marketing

Counsel: **[*1]** For Betsalel Williamson, individually and on behalf of all others similarly situated, Plaintiff: Elaine T. Byszewski, LEAD ATTORNEY, Hagens Berman Sobol Shaprio LLP, Los Angeles, CA; Lee M. Gordon, LEAD ATTORNEY, Hagens Berman Sobol Shapiro LLP, Pasadena, CA; Steve W. Judges: EDWARD J. DAVILA, United States District Judge.

Opinion by: EDWARD J. DAVILA

Opinion

ORDER GRANTING DEFENDANT'S MOTION TO DISMISS

[Docket Item No(s). 25]

Defendant Apple, Inc. ("Apple") presently moves for an order dismissing the First Amended Class Action Complaint ("FAC") filed by Plaintiff Betsalel Williamson ("Plaintiff"). See Docket Item No. 25. Apple's motion will be granted for the reasons stated below.

I. FACTUAL BACKGROUND

A. The Product

Among other products, Apple designs, manufactures and markets smartphones. See FAC, Docket **[*2]** Item No. 18, at ¶¶ 5, 6. On June 7, 2010, Apple introduced a new product in its iPhone smartphone line, the iPhone 4, at the World Wide Developers Conference ("WWDC") in San Francisco. See id., at ¶¶ 7, 8. The iPhone 4 is 3.5 inches long, weighs 4.8 ounces, and is encased in aluminosilicate glass. See id., at ¶ 8. The glass feature of the iPhone 4 differed from its predecessor versions, which had back panels made of aluminum and plastic. See id., at ¶ 7.

Apple made available on its website a video of the iPhone 4's introduction. See id., at ¶ 8. The FAC alleges that during this introduction, Steve Jobs ("Jobs"), the former CEO of Apple, made a number of statements describing the iPhone 4:

- Jobs says it is "beyond a doubt this is one of the most beautiful and precise things we've ever made."
- Jobs goes on to state that the "precision of which this is made is beyond any consumer product we've ever seen."
- Jobs "called attention" to the glass paneling on the iPhone 4, stating that Apple utilized glass on the "front and back for optical quality and scratch resistance."

The FAC also alleges that Jonathan Ive, Apple's Senior Vice President of Industrial Design, referred to the iPhone 4's glass **[*3]** housing as "comparable in strength to sapphire crystal" and 30 times harder than plastic at the WWDC. See id., at ¶ 9. A video demonstration of the glass' strength, where a portion of the glass used on the iPhone 4 was bent to show that it can withstand bending of up to 30 degrees without cracking or breaking, was also included on Apple's website and widely reported by the media. See id.

According to the FAC, Apple has used the strength of the iPhone 4's glass housing as a marketing point. See id., at ¶ 10. Apple has described the glass as "the same type of glass used in the windshields of helicopters and high-speed trains." See id. Apple also markets the glass as "20 times stiffer and 30 times harder than plastic . . . ultradurable and more scratch resistant than ever." See id. Apple produced commercials available on national television and its own website showing the iPhone 4 being used without a protective cover. See id., at ¶ 11.

2. The Alleged Defect

The FAC alleges that within the first week of its release for sale, consumers and technology critics began to comment that the iPhone 4's glass housing was quickly scarred and broken by normal, foreseeable use despite Apple's representations **[*4]** that the glass was ultradurable. See id., at ¶¶ 14-17. A third-party phone insurer released a study finding that the glass housing on the iPhone 4 breaks at rate 82% higher than those reported for a prior version of the iPhone. See id., at ¶ 26. Broken or shattered glass renders the iPhone 4 useless. See id., at ¶ 19.

Consumers who purchased the iPhone 4 were charged $199 to replace the product if the glass housing was broken or $29 to replace a cracked glass panel. See id., at ¶ 33. Plaintiff contends these charges are a breach of the warranty Apple issues with the iPhone 4. See id., at ¶ 40.

3. The Plaintiff in this Case

Plaintiff purchased an iPhone 4 on October 26, 2010, for $319.93, after viewing various marketing materials describing the strength and durability of the device, including those attributed to Jobs as described above. See id., at ¶ 4. These marketing materials influenced Plaintiff's decision to purchase the iPhone 4. See id.

Approximately two days after purchasing his iPhone 4, Plaintiff's device fell from the arm of a chair which resulted in spider cracks across the back glass panel. See id. Plaintiff was required to pay $29 for a replacement panel. See id.

Plaintiff **[*5]** alleges he would not have purchased the iPhone 4 if he knew that the glass housing on the phone was more susceptible to cracking during normal and foreseeable usage than earlier iPhone versions. See id. He now seeks to represent a class of consumers who purchased an iPhone 4 in the United States.

II. LEGAL STANDARD

The legal standard governing Apple's motion is well-established and involves three common rules of procedure. The first is *Federal Rule of Civil Procedure 8(a)*, which requires a plaintiff to plead each claim with sufficient specificity to "give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Com. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929, (2007)* (internal quotations omitted). *Rule 8* works in tandem with the next applicable rule, *Federal Rule of Civil Procedure 12(b)(6)*. A complaint which falls short of the *Rule 8(a)* standard may be dismissed if it fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. "Dismissal under *Rule 12(b)(6)* is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory." *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. **[*6]** The factual allegations "must be enough to raise a right to relief above the speculative level" such that the claim "is plausible on its face." *Twombly, 550 U.S. at 556-57*.

The third relevant rule requires more detailed allegations for causes of action based in fraud. "In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. Proc. 9(b)*. These allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. To that end, the allegations must contain "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)*. In other words, claims of fraudulent conduct must generally contain more specific facts than is necessary to support other causes of action.

Mechanically speaking, the court generally "may not consider any material beyond the pleadings" when **[*7]** deciding whether to grant a motion to dismiss. *Hal Roach Studios, Inc. v. Richard Feiner & Co., 896 F.2d 1542, 1555 n. 19 (9th Cir. 1990)*. The court must generally accept as true all "well-pleaded factual allegations." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 1950, 173 L. Ed. 2d 868 (2009)*. The court must also construe the alleged facts in the light most favorable to the plaintiff. *Love v. United States, 915 F.2d 1242, 1245 (9th Cir. 1988)*. There are notable exceptions to these guidelines, however. The court may consider material submitted as part of the complaint or relied upon in the complaint, and may also consider material subject to judicial notice. See *Lee v. City of Los Angeles, 250 F.3d 668, 688-69 (9th Cir. 2001)*. [1] In addition, "courts are not bound to accept as true a legal conclusion couched as a factual allegation." *Twombly, 550 U.S. at 555*.

III. DISCUSSION

The FAC contains seven causes of action: (1) breach of express warranty in violation of *California Commercial Code § 2313*; (2) breach of implied warranty in violation of *California Commercial Code § 2314*; **[*8]** (3) violation of the Magnuson-Moss Warranty Act, *15 U.S.C. § 2301 et. seq.*; (4) violation of the Consumers Legal Remedies Act ("CLRA"), *California Business and Professions Code § 1750 et. seq.*; (5) violation of California's False Advertising Law ("FAL"), *California Business and Professions Code § 17500*; (5) violation of California's Unfair Competition Law ("UCL"), *California Business and Professions Code § 17200*, and (6) common law unjust enrichment. The court addresses each of cause of action in turn, beginning with the CLRA.

A. CLRA

---

[1] Plaintiff's Request for Judicial Notice (Docket Item No. 27) is DENIED as the court finds the information contained therein irrelevant to this determination.

The CLRA makes unlawful "unfair methods of competition and unfair or deceptive acts or practices." *Cal. Civ. Code § 1770(a)*; *In re Actimmune Marketing Litig., 2009 U.S. Dist. LEXIS 103408, at *47, 2009 WL 3740648 (N.D. Cal. Nov. 6, 2009)*. In particular, the CLRA prohibits a person from "[r]epresenting that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities which they do not have," "[r]epresenting that goods or services are of a particular standard, quality, or grade . . . if they are of another," or "[a]dvertising goods or services with intent not to sell them as advertised." *Cal. Civ. Code §§ 1770(a)(5)*, **[*9]** *(a)(7)*, *(a)(9)*. "The CLRA is interpreted liberally 'to promote its underlying purposes, which are to protect consumers against unfair and deceptive business practices and to provide efficient and economical procedures to secure such protection.'" *Buckland v. Threshold Enters., Ltd., 155 Cal. App. 4th 798, 809, 66 Cal. Rptr. 3d 543 (2007)*, overruled on other grounds by *Kwikset Corp. v. Super. Ct., 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)* (quoting *Cal. Civ. Code § 1760*).

Conduct that is "likely to mislead a reasonable consumer" violates the CLRA. *Keegan v. Am. Honda Motor Co., Inc., 838 F. Supp. 2d 929, 938, 2012 U.S. Dist. LEXIS 3007, 2012 WL 75443 (C.D. Cal. 2012)* (quoting *Colgan v. Leatherman Tool Group, Inc., 135 Cal. App. 4th 663, 680, 38 Cal. Rptr. 3d 36 (2006))*. "A 'reasonable consumer' is 'the ordinary consumer acting reasonably under the circumstances,' who 'is not versed in the art of inspecting and judging a product, [or] in the process of its preparation or manufacture. . . .'" Id. (quoting *Colgan, 135 Cal. App. 4th at 680*). "The CLRA proscribes both active misrepresentations about the standard, quality, or grade of goods, as well as active concealment related to the characteristics or quality of goods that are contrary to what has been represented **[*10]** about the goods." *Morgan v. Harmonix Music Sys., No. C08-5211 BZ, 2009 U.S. Dist. LEXIS 57528, at *9, 2009 WL 2031765 (N.D. Cal. July 7, 2009)*.

"Any consumer who suffers any damage as a result of the use or employment by any person of" the unlawful activity may bring an action under this section. *Cal. Civ. Code, § 1780(a)*. But like its common law counterpart, a plaintiff asserting a CLRA claim which sounds in fraud must establish reliance and causation. *Buckland, 155 Cal. App. 4th at 809*.

The essence of Plaintiff's allegations under the CLRA center on the statements of Apple employees as well as the marketing materials used to advertise the iPhone 4. Plaintiff contends that through these statements and materials, Apple knowingly misrepresented the characteristics of the phone's glass housing and failed to disclose any defects in the glass. In response, Apple argues that (1) Plaintiff failed to allege that the damages to his phone was caused by Apple; (2) Plaintiff failed to allege an actionable misrepresentation; and (3) Plaintiff failed to identify and allege an actionable omission.

1. Causation

Without doubt, the CLRA cause of action asserted by Plaintiff here is one which sounds in **[*11]** fraud, and the parties do not appear to disagree on this characterization. To succeed, Plaintiff must therefore allege that Apple's misrepresentations and omissions caused him damage and must meet the heightened pleading standard required by *Federal Rule of Civil Procedure 9*. Apple argues Plaintiff failed to do this in the FAC because the FAC does not attribute the damage to Plaintiff's phone to Apple. Instead, Apple contends that any damage to Plaintiff's phone was caused by Plaintiff's own carelessness when the phone dropped from the arm of a chair.

In making this argument, Apple mischaracterizes Plaintiff's theory of liability. The FAC does not allege or even suggest that Apple caused the phone to fall from the chair because such an assertion would be absurd. That type of claim would require a fanciful concoction of allegations, perhaps detailing a scheme by Apple employees to surreptitiously enter Plaintiff's home in order to push Plaintiff's new iPhone 4 from its resting place atop a piece of furniture while Plaintiff was not looking.

The theory presented here is not so unbelievable. Plaintiff, like many other CLRA plaintiffs, contends that misrepresentations and omissions concerning **[*12]** the quality of the product caused him to purchase something he would not have purchased had he been presented different information. See, e.g., *Henderson v. Gruma Corp.,* No. CV 10-04173 AHM (AJWx), 2011 U.S. Dist. LEXIS 41077, 2011 WL 1362188 (C.D. Cal. Apr. 11, 2011). In this case the product is Plaintiff's iPhone 4, and it took the fall from the chair for Plaintiff to realize that he may have been misled about the quality of its glass housing. Thus, the damage at issue is the economic loss from Plaintiff's purchase that he may not have otherwise made, not the actual physical damage to Plaintiff's phone that resulted from its impact with the floor.

As far as causation goes, Plaintiff alleges that the marketing materials he reviewed influenced his decision to purchase the iPhone 4, and that he would have acted differently under other circumstances. The court therefore rejects Apple's causation argument, which focuses too narrowly on the fall from the chair.

2. Actionable Misrepresentation

In a second attack on the CLRA claim, Apple argues that the misrepresentations identified in the FAC are either statements of fact not alleged to be false or non-actionable puffery. The court begins **[*13]** this portion of the discussion by addressing each of the cited statements separately. Apple is correct that the statements attributed to Jobs are not actionable under the CLRA. The descriptors used by Jobs - that the iPhone 4 is "beautiful," and "precise" - constitute puffery. "Generalized, vague, and unspecified assertions constitute 'mere puffery' upon which a reasonable consumer could not rely, and hence are not actionable." *Oestreicher v. Alienware Corp., 544 F. Supp. 2d 964, 973 (N.D. Cal. 2008)* (internal quotation marks and citations omitted), aff'd by *322 Fed. Appx. 489 (9th Cir. 2009)*. Vague or highly subjective claims about product superiority also amount to non-actionable puffery; it is only "misdescriptions of specific or absolute characteristics of a product [that] are actionable." Id. (quoting *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1145 (9th Cir. 1997))*.

Jobs' explanation that glass was used "front and back for optical quality and scratch resistance" is no more than a description of the phone. It is not a specific commentary about the iPhone 4's durability, let alone one that is likely to mislead a "reasonable consumer." [2]

Nor does the Ive statement support the CLRA cause of action. Much like the statements from Jobs, Ive's comparison of the glass to sapphire crystal and the claim that it is "30 times harder than plastic" are not alleged in the FAC to be misdescriptions of the glass used on the iPhone 4, assuming these statements are specific enough so as to escape classification as puffery. The same goes for the video demonstration of the glass' strength. In any event, Plaintiff does not allege that he specifically relied on the Ive statements or video demonstration in a manner which meets the standard required by *Federal Rule of Civil Procedure 9(b)*. *Donohue v. Apple, Inc., No. 11-cv-05337 RMW, 871 F. Supp. 2d 913, 2012 U.S. Dist. LEXIS 65860, at *24, 2012 WL 1657119 (N.D. Cal. May 10, 2012)* (citing *Baltazar v. Apple, Inc., Case No. CV-10-3231-JF, 2011 U.S. Dist. LEXIS 13187, at *10-11, 2011 WL 588209 (N.D. Cal. Feb. 10, 2011))*.

The court also rejects Plaintiff's contention that commercials demonstrating use of the iPhone 4 without a cover equate to some affirmative commentary on the phone's durability for two primary reasons. First, the allegations describing the commercial **[*16]** depiction are not plead with the specificity mandated by *Rule 9(b)*. See id.

---

[2] Plaintiff attempts to escape a **[*14]** determination that these statements are puffery by arguing that "factual assertions are not puffery." That much is true, but it does not assist Plaintiff here because it is also true that vague assertions are not actionable under the CLRA even if they are purported assertions of fact. See, e.g., ***Shroyer v. New Cingular Wireless Servs., 622 F.3d 1035, 1043 (9th Cir. 2010)*** ("'[A]ll the advantages that only the nation's largest wireless company can provide' is a vague statement and provides nothing concrete upon which [plaintiff] could reasonably rely.")

Moreover, the "classic example of an actionable representation of fact" cited by Plaintiff is inapposite to this case. While there does appear some facial similarly between an auto dealer's assertion that a windshield is made of shatterproof glass and this action since both do involve glass and the breaking of glass, the similarities end there. In the case underlying the "classic example," the auto dealer made a specific *written representation* that the glass windshield would not would not fly or shatter under the hardest impact. ***Baxter v. Ford Motor Co., 168 Wash. 456, 459-60, 12 P.2d 409 (1932)***. In contrast, Apple is not alleged to have made any similar **[*15]** statement concerning the glass housing on the iPhone 4.

Second, without more than what is contained in the FAC, the type of representation described is not actionable under the CLRA. A "reasonable consumer" viewing a commercial showing the iPhone 4 in use as a phone, but without a cover, would not be misled to believe that the iPhone 4 could withstand any particular level of impact if the phone was dropped. This is because the commercial has nothing to do with durability. The FAC does not allege, for example, that any of the television commercials showed a coverless iPhone 4 being dropped on the ground only to emerge unscathed. That type of representation could mislead the reasonable consumer in the way Plaintiff alleges; the commercial alluded to in the FAC would not. Plaintiff, therefore, reads too much into this piece of marketing material.

Relying on *Morgan v. AT&T Wireless Services, Inc., 177 Cal. App. 4th 1235, 99 Cal. Rptr. 3d 768 (2009)*, Plaintiff argues that he is relying on the allegedly misleading nature of Apple's marketing as a whole, rather than on any particular representation made by Apple. But the court is not convinced that the marketing described in the FAC can be interpreted **[*17]** in the same manner as that described in Morgan. In Morgan, plaintiffs cited to a combination of "AT&T's statements that it was committed to providing for all of its customers' wireless needs 'today and tomorrow'", "the fact that it held itself out as the world's leading provider of wireless communications services," and the "sale of expensive . . . phones that required service contracts for one, two, or more years" as material that would lead the average consumer to believe that AT&T would maintain a network compatible with the phone they purchased. *Morgan, 177 Cal. App. 4th at 1245-46*. The Morgan court noted that the plaintiffs' premise was possible under those circumstances. *Id. at 1243, 1256*.

Here, the representations taken as a whole would not lead the "reasonable consumer" to believe that the glass housing on the iPhone 4 was indestructible or drop-proof because of one important distinction not at issue in *Morgan*: it is a well-known fact of life that glass can break under impact, even glass that has been reinforced. This much is known to the ordinary, reasonable consumer. The shattered window of a storefront, the cracked windshield of a car, and the chipped smartphone screen are **[*18]** routine encounters of modern existence. It seems a suspension of logic to say that the marketing campaign described in the FAC, which notably has nothing to do with phone-dropping, somehow erases these images from the collective experience such that the reasonable consumer could expect that glass could not break if dropped.

3. Actionable Omission

Omissions are actionable under the CLRA only when the omission is contrary to a representation actually made by the defendant or where a duty to disclose exists. *Keegan, 838 F. Supp. 2d 929, at 938, 2012 U.S. Dist. LEXIS 3007*. Under California law, a duty to disclose arises in four circumstances: "(1) when the defendant is in a fiduciary relationship with the plaintiff; (2) when the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) when the defendant actively conceals a material fact from plaintiff; or (4) when the defendant makes partial representations but also suppresses some material facts." *Id*. (quoting *Smith v. Ford Motor Co., 749 F. Supp. 2d 980, 987 (N.D. Cal. 2010))*.

Here, Plaintiff asserts the following omissions in the FAC: (1) "Apple failed to disclose and concealed from Plaintiff and Class members that normal use of **[*19]** the iPhone 4, including use as advertised, would result in cracked glass housing such that the device would not longer be functional," and (2) "[n]ormal wear and tear can easily render the device inoperable and a safety risk to the consumer. This information was not disclosed to the consumer." See FAC, at ¶¶ 22, 23. The problem with these allegations is that they do not constitute actionable omissions when construed with the representations actually attributed to Apple. No where in the FAC is Apple alleged to have stated that the iPhone 4 was resistant to normal wear and tear, that the glass housing would never break or crack under normal use, or that the phone might not be damaged if it was dropped. As already pointed out, phone-dropping is not alleged to have been depicted anywhere in the marketing material. The alleged omissions, then, are not contrary to any of Apple's actual representations.

Moreover, Plaintiff has not sufficiently plead facts supporting a duty to disclose on the part of Apple because Plaintiff does not allege what was actually known to Apple in anything less than a conclusory fashion. Alleged reports by unidentified consumers which neither reveals the timing of **[*20]** the reporting, who the reporting was made to, nor the specific content of the reporting is not consistent with Plaintiff's obligation to plead specific facts under *Rule 9*. See FAC, at ¶ 17. Similarly, the allegation that, "[a]ccording to sources inside and outside Apple," the company began working to correct the defect in the glass also fails under *Rule 9*. See FAC, at ¶ 29. The studies and internet articles which apparently discuss defects in the iPhone 4's glass housing fare no better because they do not create a duty disclose without an allegation explaining how or why Apple was aware of these items. See *Kent v. Hewlett-Packard Co., No. 09-5341 JF (PVT), 2010 U.S. Dist. LEXIS 76818, at *23-24, 2010 WL 2681767 (N.D. Cal. July 6, 2010)* (citing *Oestreicher, 544 F. Supp. 2d at 975 n.9*).

As discussed, Plaintiff has not plead either an actionable misrepresentation or omission. The CLRA claim will be dismissed with leave to amend.

B. FAL

The FAL makes it unlawful to make or disseminate any statement concerning property or services that is "untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading[.]" *Cal. Bus. & Prof. Code § 17500*.

For **[*21]** this cause of action, Plaintiff cites to the same marketing material discussed under the CLRA claim. Specific to the FAL, Plaintiff contends the material is misleading and "likely to deceive a reasonable consumer into believing that the iPhone [4] should be able to sustain the kind of short drop that occurs in the ordinary course of careful usage." See FAC, at ¶ 89.

For much the reasons that the allegations do not presently support liability under the CLRA, they similarly do not support liability under the FAL. Accordingly, the FAL claim will be dismissed with leave to amend.

C. Warranty Claims

1. Breach of Express Warranty

To prevail on a breach of express warranty claim under *California Commercial Code § 2313*, "a plaintiff must prove (1) the seller's statements constitute an 'affirmation of fact or promise' [which relates to the goods] or a 'description of the goods'; (2) the statement was 'part of the basis of the bargain'; and (3) the warranty was breached." *Weinstat v. Dentsply Int'l, Inc., 180 Cal. App. 4th 1213, 1227, 103 Cal. Rptr. 3d 614 (2010)* (quoting *Keith v. Buchanan, 173 Cal. App. 3d 13, 20, 220 Cal. Rptr. 392 (1985))*.

Since liability for breach of express warranty sounds in contract, "[a] manufacturer's liability **[*22]** for breach of an express warranty derives from, and is measured by, the terms of that warranty." *Cipollone v. Liggett Group, 505 U.S. 504, 525, 112 S. Ct. 2608, 120 L. Ed. 2d 407 (1992)*. "The key under *[§ 2313*] is that the seller's statements - whether fact or opinion - must become 'part of the basis of the bargain.'" *Hauter v. Zogarts, 14 Cal. 3d 104, 115, 120 Cal. Rptr. 681, 534 P.2d 377 (1975)* (quoting *Cal. Com. Code § 2313(1)(b)*).

Here, the language applying the warranty to "the hardware product manufactured by and for Apple" appears to cover the glass encasing the iPhone 4, and Apple does not directly dispute that defects in the glass case may be covered by the warranty under specified circumstances. But that determination notwithstanding, the facts contained in the FAC do not support the ultimate "affirmation of fact or promise" that Plaintiff relies on as a basis for this cause of action. Plaintiff argues in the his opposition that Apple warranted the iPhone 4 to have "damage-resistant glass housing." But the representation of "damage resistance" appears no where in the FAC. To the contrary, the fact that a warranty covering the glass even exists suggests that Apple never made or reasonably could make such a representation.

Furthermore, for reasons **[*23]** similar to those discussed in relation to the CLRA claim, the marketing material and statements by Apple employees which are cited in the FAC cannot be legitimately used as a representation that the iPhone 4 was completely damage-resistant, especially when the product at issue contains a component that is inherently breakable, like glass.Under the facts alleged, the marketing material could not become "part of the basis for the bargain" for the purposes of warranty liability.

In addition to these shortcomings, this cause of action is also deficiently plead because Plaintiff does not identify the purported defect in the glass housing, other than to simply say that the glass housing is defective because it broke when Plaintiff's iPhone 4 was dropped. But again, glass can break when it is dropped. Under these circumstances, Iqbal and Twombly require something more about the purported defect that what has been presented. This cause of action will therefore be dismissed with leave to amend.

2. Breach of Implied Warranty and Magnuson-Moss Warranty Act

The implied warranty of merchantability, which Plaintiff invokes through this cause of action, provides that a product must be "fit for the ordinary **[*24]** purposes for which such goods are used." *Cal. Com. Code § 2314*; see also *Hauter, 14 Cal. 3d at 118-19*.

Plaintiff contends that the iPhone 4 is not fit for its ordinary purpose because the glass housing is not ultradurable. That allegation, however, has nothing to do with the iPhone 4's intended use as a smartphone, which the court safely presumes includes functions like making and receiving calls, sending and receiving text messages, or allowing for the use of mobile applications. Notably, the FAC does not state that Plaintiff's iPhone 4 was deficient in any of these or other expected phone functions, and it is certainly a stretch to conclude that one "ordinary purpose" of the iPhone 4, or any smartphone for that matter, is to drop it on the ground. Accepting Plaintiff's theory of liability would mean that the iPhone 4 is not merchantable unless it is completely resistant from accidental breakage or damage. That cannot be.

This cause of action is dismissed with leave to amend. Since both warranty claims fail as plead and since Plaintiff's cause of action under the Maguson-Moss Warranty Act is derivative of those claims, that cause of action is also dismissed with leave to amend.

D. UCL

Under **[*25]** the UCL, there are three varieties of unfair competition: "acts or practices which are unlawful, or unfair, or fraudulent." *Khoury v. Maly's of California, Inc., 14 Cal. App. 4th 612, 618-19, 17 Cal. Rptr. 2d 708 (1993)*. "Unlawful" practices are "forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Sup. Ct., 27 Cal. App. 4th 832, 838, 33 Cal. Rptr. 2d 438 (1999)*. "Unfair" practices constitute "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. The "fraudulent" prong under the UCL requires a showing of actual or potential deception to some members of the public, or harm to the public interest. See *id. at 180*; see also *McKell v. Wash. Mut., Inc., 142 Cal. App. 4th 1457, 49 Cal. Rptr. 3d 227 (2006)*; *Freeman v. Time, Inc., 68 F.3d 285, 289 (9th Cir. 1995)*. The UCL 'borrows' violations of other laws and treats them as unfair business practices, and also "makes clear that a practice may be **[*26]** deemed unfair even if not specifically proscribed by some other law." *Cel-Tech, 20 Cal. 4th at 180*.

Here, Plaintiff bases the cause of action under the UCL on the same allegations as the CLRA cause of action. But the allegations do not support liability under the UCL for the same reasons they do not support liability under the CLRA.

Plaintiff's only allegations under the "unlawful" prong of the UCL relate to violations of the CLRA and the other statutes referenced by Plaintiff. Since the court has determined that each of those purported statutory causes of action fail as presently plead, Plaintiff has also failed to state a claim under this portion of the UCL.

Turning to the "unfair" prong, Plaintiff alleges Apple's practices are unfair because "consumers are led to believe that the iPhone 4 has qualities that it does not" and "are further injured when Apple refuses to replace or repair the defective device." See FAC, at ¶ 96. However, the court has already explained why reasonable consumers could not be misled by the materials described by Plaintiff, and has also indicated why Plaintiff's claims of defect with the iPhone 4's glass housing are not sufficiently plead. For these same reasons, **[*27]** Plaintiff has not stated a claim under the unfair prong of the UCL.

For the fraudulent prong, Plaintiff again makes the same claim he made under the CLRA based on the same facts: that Apple's "practices are misleading because they are likely to deceive consumers into believing that the iPhone 4 can sustain normal and reasonable use, including the use advertised by Apple, without damaging the front and back panels." See id., at ¶ 95. But the allegations fail to support liability based on fraudulent business practices under the UCL for the same reasons they do not state a claim under the CLRA.

For these reasons, the UCL claim will be dismissed with leave to amend.

E. Unjust Enrichment

Apple argues that the cause of action for unjust enrichment must be dismissed because it is not a recognized claim in California. The court agrees. "Courts consistently have held that unjust enrichment is not a proper cause of action under California law." *In re Toyota Motor Corp. Unintended Acceleration Mktg., Sales Practices, & Prods. Liab. Litig., 754 F. Supp. 2d 1145, 1194 (C.D. Cal. 2010)*. "Unjust enrichment is a general principle, underlying various legal doctrines and remedies, rather than a remedy itself." **[*28]** *Melchior v. New Line Prods., Inc., 106 Cal. App. 4th 779, 793, 131 Cal. Rptr. 2d 347 (2003)*. "Simply put, 'there is no cause of action in California for unjust enrichment.'" *In re Toyota Motor Corp., 754 F. Supp. 2d at 1194* (citing *Melchior, 106 Cal. App. 4th at 793*). Since Plaintiff's claim for unjust enrichment cannot state a claim for relief, it will be dismissed without leave to amend.

IV. ORDER

Based on the foregoing, Apple's Motion to Dismiss (Docket Item No. 25) is GRANTED. The cause of action for unjust enrichment is DISMISSED WITHOUT LEAVE TO AMEND. All other causes of action are DISMISSED WITH LEAVE TO AMEND. Any amended complaint must be filed within 21 days of the date of this order.

The court schedules this case for a Case Management Conference on **November 9, 2012, at 10:00 a.m.** The parties shall file an updated Joint Case Management Statement on or before **November 2, 2012**

IT IS SO ORDERED.

A court of appeals reviews a discretionary award of attorney's fees under *28 U.S.C.S. § 1447(c)* for an abuse of discretion.

Civil Procedure > ... > Removal > Postremoval Remands > General Overview

Civil Procedure > ... > Attorney Fees & Expenses > Basis of Recovery > Statutory Awards

HN3[] Removal, Postremoval Remands

28 U.S.C.S. § 1447(c) provides that an order remanding a case may require payment of just costs and any actual expenses, including attorney fees, incurred as a result of the removal. However, there is no automatic entitlement to an award of attorney's fees. The mere determination that removal was improper does not require a district court to award attorney's fees. Rather, a court may award attorney's fees when the removing party lacks an objectively reasonable basis for removal. The appropriate test for awarding fees under *§ 1447(c)* should recognize the desire to deter removals sought for the purpose of prolonging litigation and imposing costs on the opposing party, while not undermining Congress's basic decision to afford defendants a right to remove as a general matter, when the statutory criteria are satisfied. In that regard, *§ 1447(c)* fee awards are cost recoupments, hence punitive in policy only.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Removal > Elements for Removal > Removability

HN4[] Specific Cases Removed, Federal Questions

The United States Supreme Court has articulated a multi-part test to determine when a state claim is removable: does a state-law claim necessarily raise a stated federal issue, actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Removal > Postremoval Remands > Appellate Review

Civil Procedure > ... > Attorney Fees & Expenses > Basis of Recovery > Statutory Awards

HN5[] Standards of Review, Abuse of Discretion

A defendant's subjective good faith belief that removal was proper is insufficient to establish that the district court abused its discretion in awarding attorney's fees under *28 U.S.C.S. § 1447(c)*.

HN6[] Antitrust & Trade Law

The Texas Free Enterprise and Antitrust Act of 1983 (TFEAA) requires a state court to construe the statute in harmony with federal judicial interpretations of comparable federal antitrust statutes. *Tex. Bus. & Com. Code Ann. § 15.04*. However, nothing in the plain language of the TFEAA or Texas caselaw interpreting the TFEAA requires that federal law control Texas's interpretation of its state antitrust statute.

Antitrust & Trade Law > General Overview

Governments > Legislation > Interpretation

HN7[] **Antitrust & Trade Law**

See *Tex. Bus. & Com. Code Ann. § 15.04*.

Antitrust & Trade Law > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law**

State courts look to federal law interpreting the Sherman Act for guidance in interpreting the Texas Free Enterprise and Antitrust Act of 1983 (TFEAA). Claims under the TFEAA are wholly state-law claims that do not raise a federal issue.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Statutory Sources

HN9[] **Preliminary Considerations, Federal & State Interrelationships**

A state legislature cannot by statute confer jurisdiction over a state-law claim to a federal court.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

Civil Procedure > ... > Removal > Elements for Removal > Removability

HN10[] **Specific Cases Removed, Federal Questions**

No reasonable argument can be made that the mere fact that a federal standard is to be referenced by a state court in determining whether there has been a state-law violation causes a state-law claim to necessarily raise a stated federal issue for removal purposes.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN11[] **Preliminary Considerations, Federal & State Interrelationships**

A plaintiff does not give up or alter its particular rights to pursue its state-law remedies in state court by simultaneously asserting rights under federal law.

Antitrust & Trade Law > General Overview

HN12[] **Antitrust & Trade Law**

Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies.

Civil Procedure > ... > Removal > Specific Cases Removed > Federal Questions

HN13[] **Specific Cases Removed, Federal Questions**

Neither the test set forth in Grable, nor caselaw applying the Grable test, adjusts the federal question removal analysis because of the existence of parallel state and federal proceedings; instead, the Grable test asks distinctively whether a state-law claim necessarily raises a stated federal issue. Grable directs courts to examine the state-law claim itself, not whether legal or factual determinations included in the state-law claim may also be implicated in a parallel federal proceeding.

For SABRE, INC., SABRE HOLDINGS CORPORATION, SABRE TRAVEL INTERNATIONAL LIMITED, Defendants - Appellants: Stephen Lyle Tatum, Sr., Ralph H. Duggins, III, Esq., Scott Alan Fredricks, Philip Avery Vickers, Cantey Hanger, L.L.P., Fort Worth, TX; Sundeep Kumar Addy, Bartlit, Beck, Herman, Palenchar & Scott, Denver, CO; Christopher Lind, Esq., Andrew Polovin, Esq., Katherine M. Swift, Bartlit, Beck, Herman, Palenchar & Scott, L.L.P., Chicago, IL.

Judges: Before HIGGINBOTHAM, HAYNES, and HIGGINSON, Circuit Judges.

Opinion by: HIGGINSON

Opinion

[*540] HIGGINSON, Circuit Judge:

Defendants-Appellants Sabre Inc., Sabre Holdings Corporation, and Sabre Travel International Limited (collectively, "Sabre") appeal the district court's award of attorney's fees to Plaintiff-Appellee American Airlines, Inc. ("American") pursuant to *28 U.S.C. § 1447(c)*.[1] We AFFIRM the district court's ruling, finding that the district court did not abuse its discretion in awarding attorney's fees to **[**2]** American based on its assessment that Defendants-Appellants

---

[1] *28 U.S.C. § 1447(c)* states:

> *HN1*[] (c) A motion to remand the case on the basis of any defect other than lack of subject matter jurisdiction must be made within 30 days after the filing of the notice of removal under *section 1446(a)*. If at any time before final judgment it appears that the district court lacks subject matter jurisdiction, the case shall be remanded. An order remanding the case may require payment of just costs and any actual expenses, including attorney fees, incurred as a result of the removal. A certified copy of the order of remand shall be mailed by the clerk to the clerk of the State court. The State court may thereupon proceed with such case.

Sabre did not have objectively reasonable grounds to believe removal of the case from state court to federal district court was legally proper.

FACTS AND PROCEEDINGS

Defendants-Appellants Sabre own and operate a computerized reservation system, known as a Global Distribution System ("GDS"), which is used by travel agents, corporate customers, and the traveling public to search, price, book, and ticket travel services offered by airlines, hotels, and other travel-related entities. **[**3]** In 1998, American and Sabre entered into a Participating Carrier Distribution and Services Agreement which generally set forth the terms and conditions under which Sabre would make American's fare and schedule information available to Sabre GDS subscribers. Recently, however, the business relationship between American and Sabre has become strained. **[*541]** American has incorporated newer, lower-cost technologies into the distribution of its products and services, and this "direct connection" system presents a competitive threat to Sabre's GDS business.

American filed a lawsuit against Travelport, Inc. in the District Court of Tarrant County, Texas, 67th Judicial District in November 2010 and later added Sabre as defendants. In this state court lawsuit, American alleged state-law causes of action for breach of contract and tortious interference with prospective business relations and sought a temporary restraining order and temporary injunction against Sabre. Specifically, American alleged that Sabre had been biasing American's fares and schedules in Sabre's displays, causing American to lose business to competing airlines by "misleading the public into believing that American's services either **[**4]** no longer existed or were not competitive with options offered by other air carriers" and that Sabre had more than doubled the fees it charged to distribute American flight/fare data in breach of the parties' contract.

In April 2011, American filed a lawsuit against Travelport Limited, Travelport, LP, and Orbitz Worldwide, LLC in the United States District Court for the Northern District of Texas. American added Sabre as defendants by amended complaint filed June 9, 2011. American's federal claims included alleged anti-competitive conduct by Sabre and the other defendants and violations of *Sections 1* and *2* of the Sherman Act. *15 U.S.C. §§ 1-2*.

Meanwhile, in its state court suit, American filed its third amended petition on July 8, 2011, which included a new claim against Sabre for monopolization in violation of *Section 15.05(b)* of the Texas Free Enterprise and Antitrust Act of 1983 ("TFEAA"). On July 13, 2011, American filed motions for expedited discovery and to compel production of documents in the state court suit and notified Sabre that the motions were to be heard at 2:00 pm on July 18, 2011. On the morning of July 18, 2011, Sabre filed a notice of removal, and the removed case **[**5]** was assigned to United States District Judge McBryde. On July 19, 2011, American filed an emergency motion to remand pursuant to *28 U.S.C. § 1447(c)*, which the district court granted after holding a telephone conference hearing on the motion.

On July 25, 2011, American filed a motion for an award of fees and costs for Sabre's removal, and Sabre filed a response. On August 4, 2011, the district court issued a 19-page Memorandum Opinion and Order which did not award the full $18,515.00 requested, but instead awarded American $15,955.00 in attorney's fees, finding that Sabre's removal from state court was objectively unreasonable. Sabre appeals the district court's Memorandum Opinion and Order and Final Judgment awarding attorney's fees to American under *28 U.S.C. § 1447(c)*, contending that the district court erred by finding that Sabre's removal was objectively unreasonable.

DISCUSSION

HN2[] This court reviews a discretionary award of attorney's fees under *28 U.S.C. § 1447(c)* for an abuse of discretion. *Hornbuckle v. State Farm Lloyds, 385 F.3d 538, 541 (5th Cir. 2004)*.

HN3[] *28 U.S.C. § 1447(c)* provides that, "[a]n order remanding the case may require payment of just costs and any actual expenses, **[**6]** including attorney fees, incurred as a result of the removal." However, "[t]here is no automatic entitlement to an award of attorney's fees." Valdes v. Wal-Mart Stores, Inc., 199 F.3d 290, 292 (5th Cir. 2000) (holding that the "mere determination that removal was improper" does not require a district court to award attorney's **[*542]** fees). Rather, a court "may award attorney's fees when the removing party lacks an objectively reasonable basis for removal." Howard v. St. Germain, 599 F.3d 455, 457 (5th Cir. 2010) (per curiam) (citing and referring to Martin v. Franklin Capital Corp., 546 U.S. 132, 141, 126 S. Ct. 704, 163 L. Ed. 2d 547 (2005) (holding that "[a]bsent unusual circumstances, courts may award attorney's fees under § 1447(c) only where the removing party lacked an objectively reasonable basis for seeking removal")). The Supreme Court in *Martin* explained, "[t]he appropriate test for awarding fees under § 1447(c) should recognize the desire to deter removals sought for the purpose of prolonging litigation and imposing costs on the opposing party, while not undermining Congress' basic decision to afford defendants a right to remove as a general matter, when the statutory criteria are satisfied." 546 U.S. at 140. In **[**7]** that regard, § 1447(c) fee awards are cost recoupments, hence punitive in policy only.

Sabre contends that the district court abused its discretion by awarding American attorney's fees despite Sabre's alleged reasonable, good faith[2] interpretation of Grable & Sons Metal Products, Inc. v. Darue Eng'g & Mfg., 545 U.S. 308, 125 S. Ct. 2363, 162 L. Ed. 2d 257 (2005), as applied to American's parallel state and federal antitrust lawsuits. In *Grable*, **HN4**[] the Court articulated a multi-part test to determine when a state claim is removable: "does a state-law claim necessarily raise a stated federal issue, actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities." 545 U.S. at 314.

Addressing the first *Grable* prong, Sabre argues that American's TFEAA claim necessarily raises a stated federal issue because **[**8]** **HN6**[] the TFEAA requires the state court to construe the statute "in harmony with federal judicial interpretations of comparable federal antitrust statutes." *See* Tex. Bus. & Com. Code § 15.04. However, nothing in the plain language of the TFEAA or Texas caselaw interpreting the TFEAA requires that federal law control Texas's interpretation of its state antitrust statute.[3] The full text of Tex. Bus. & Com. Code § 15.04 states:

> **HN7**[] The purpose of [the TFEAA] is to maintain and promote economic competition in trade and commerce occurring wholly or partly within the State of Texas and to provide the benefits of that competition to consumers in the state. The provisions of [the TFEAA] shall be construed to accomplish this purpose and shall be construed in harmony with federal judicial interpretations of comparable federal antitrust statutes *to the extent consistent with this purpose*.

Tex. Bus. & Com. Code § 15.04 (emphasis added). As the Texas Supreme Court elaborated in Caller-Times Publ'g Co., Inc. v. Triad Commc'ns, Inc., 826 S.W.2d 576 (Tex. 1992), **HN8**[] state courts "look to federal **[*543]** law interpreting . . . the Sherman Act for guidance in interpreting . . . the Texas Antitrust Act." Id. at 580. Claims **[**9]** under the TFEAA are "wholly state-law claims" that do not raise a federal issue. Waste Control Specialists, LLC v. Envirocare of Texas, Inc., 199 F.3d 781, 784 (5th Cir. 2000), *modified in part*, 207 F.3d 225 (5th Cir. 2000).[4]

---

[2] **HN5**[] A defendant's subjective good faith belief that removal was proper is insufficient to establish that the district court abused its discretion in awarding attorney's fees under Section 1447(c). Valdes, 199 F.3d at 292 ("To be sure, the district court may award fees even if removal is made in subjective good faith.").

[3] **HN9**[] A state legislature cannot by statute confer jurisdiction over a state-law claim to a federal court. *See* Burford v. Sun Oil Co., 319 U.S. 315, 317, 63 S. Ct. 1098, 87 L. Ed. 1424 (1943). The district court observed that if it were to accept the argument that the "in harmony" language of the TFEAA presents a "stated federal issue," then "every cause of action brought in state court under the TFEAA would automatically be removable to federal court."

[4] Sabre contends that *Waste Control* does not apply here because *Waste Control* was decided before the Supreme Court's decision in *Grable* and concerned the question of whether a Texas antitrust claim is "completely preempted" by federal ***antitrust law***. Sabre points out that "significant federal issue" jurisdiction is different than jurisdiction based on complete preemption and that it is undisputed that state antitrust claims are not preempted by federal ***antitrust law***. *See* Bernhard v. Whitney Nat'l Bank, 523 F.3d 546, 551 (5th Cir. 2008) (holding that if **[**10]** a petition "alleges only state law claims, the district court [has] federal question jurisdiction over their case only if: (1) the state law claims necessarily raise a federal issue or (2) the state law claims

Notably, this case is distinguishable from *Grable*, where the **[**11]** Supreme Court held that federal question jurisdiction existed because "an essential element" of Grable's state-law claim was whether the plaintiff "was given notice within the meaning of the federal [tax] statute" and that issue "appear[ed] to be the only legal or factual issue contested in the case." *Grable, 545 U.S. at 315*. Plaintiff Grable had asserted a quiet title action in state court claiming that the defendant's title was invalid because the IRS failed to comply with a federal tax statute in giving notice of the seizure of Grable's property. *Id. at 311*. Here, in contrast, the state court would not be obligated to interpret a federal statute, like the federal notice statute in *Grable, id. at 315* (finding that "[t]he meaning of the federal tax provision is an important issue of federal law that sensibly belongs in a federal court"), because American's claims arise solely under the TFEAA. The district court did not abuse its discretion by concluding that, ***HN10***[] "[n]o reasonable argument can be made that the mere fact that a federal standard is to be referenced by a state court in determining whether there has been a state-law violation causes a state-law claim to 'necessarily raise **[**12]** a stated federal issue.'" *See Grable, 545 U.S. at 314*.

Sabre's argument, however, extends beyond the text of the TFEAA itself and focuses also on the language of the TFEAA in light of American's parallel state and federal antitrust claims. Sabre contends that, because the TFEAA must be interpreted "in harmony" with federal judicial interpretation of federal ***antitrust law***, "[i]f the federal court were to find American's single-product market definition to be deficient as a matter of law . . . or that Sabre's contractual terms were not exclusionary or anticompetitive as a matter of law . . . then American's parallel state antitrust case would suffer a similar fate." The district court correctly pointed out, however, that, "it's not unusual to have a **[*544]** parallel state court suit and federal court suit that involve the same legal and factual issues, but the difference is that sometimes one of them is brought under federal law and the other one is brought under state law." ***HN11***[] American did not give up or alter its particular rights to pursue its state-law remedies in state court by simultaneously asserting rights under federal law. *See ARC Am. Corp., 490 U.S. at 102* (***HN12***[] "Congress intended the federal **[**13]** antitrust laws to supplement, not displace, state antitrust remedies."). Moreover, ***HN13***[] neither the test set forth in *Grable*, nor caselaw applying the *Grable* test, adjusts the federal question analysis because of the existence of parallel state and federal proceedings; instead, the *Grable* test asks distinctively whether the state-law claim "necessarily raise[s] a stated federal issue." *Grable, 545 U.S. at 314*. *Grable* directs courts to examine the state-law claim itself, not whether legal or factual determinations included in the state-law claim may also be implicated in a parallel federal proceeding.

Because Sabre failed to satisfy the first prong of the *Grable* test—that is, failed to show that American's state-law claim *necessarily* raises a stated federal issue—we do not address the remaining prongs. Acknowledging the discretion we vest in district courts when assessing attorney's fees, we hold that the district court was within its discretion when it concluded that Sabre did not have objectively reasonable grounds to believe that removal was proper.

CONCLUSION

For the foregoing reasons, we AFFIRM the district court's award of attorney's fees to Plaintiff-Appellee American.

End of Document

are completely preempted by federal law."); *California v. ARC Am. Corp., 490 U.S. 93, 102, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* ("Congress has not pre-empted the field of ***antitrust law*** . . . . Congress intended the federal antitrust laws to supplement, not displace, state antitrust remedies."). However, this court's assertion in *Waste Control* that TFEAA claims are "wholly state claims," *199 F.3d at 784*, rebuts the argument that a TFEAA claim necessarily "raise[s] a stated federal issue" because the statute "requires" that state courts interpret it "in harmony" with federal ***antitrust law***. Moreover, it is not determinative that *Grable* was decided after *Waste Control* because *Grable* did not address TFEAA claims and did not create a new basis for federal question jurisdiction. *See Grable, 545 U.S. at 312-14*; *see generally* Fairbairn, Jennifer E., *Keeping Grable Slim: Federal Question Jurisdiction and the Centrality Test*, 58 Emory L.J. 977, 977-89 (2009).
